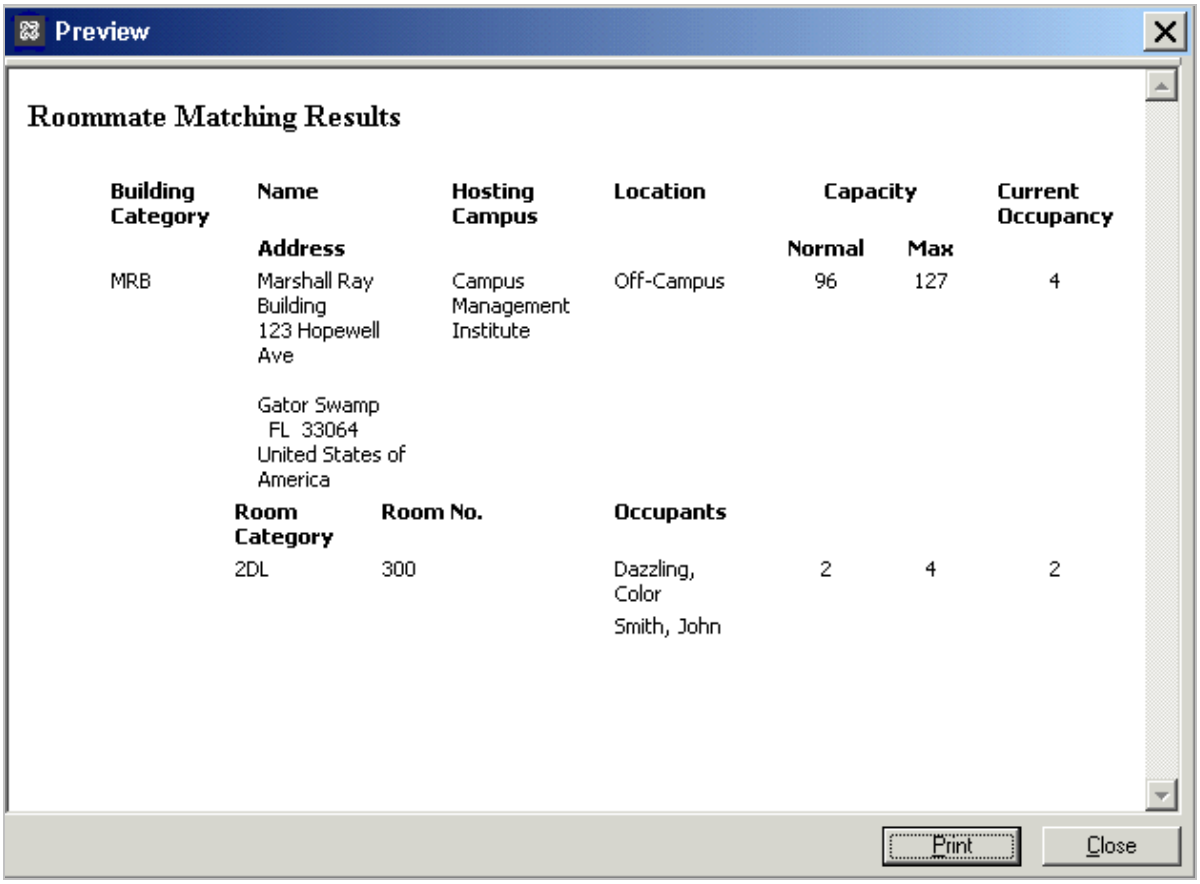
    Note: Students can be moved from a room if their lease status is not updated as **Current** (see step 8).

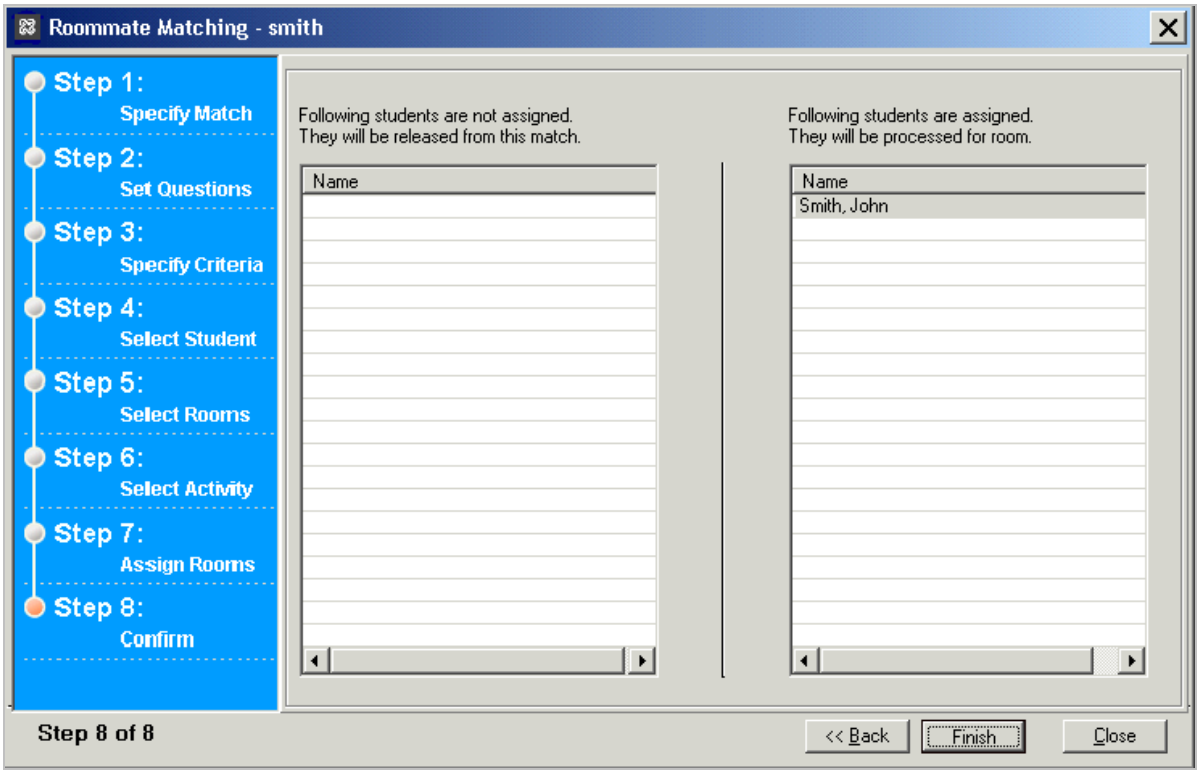
25. Click the **Save** button to assign students to the rooms. A lease is created for each student with the lease status as

'Pending'.

26. You can preview and print the roommate matching results by clicking the **Print** button.



27. Click **Close** to close the roommate matching results preview.
28. Click **Next**. Step 8 of 8 of the Roommate Matching Wizard is displayed.



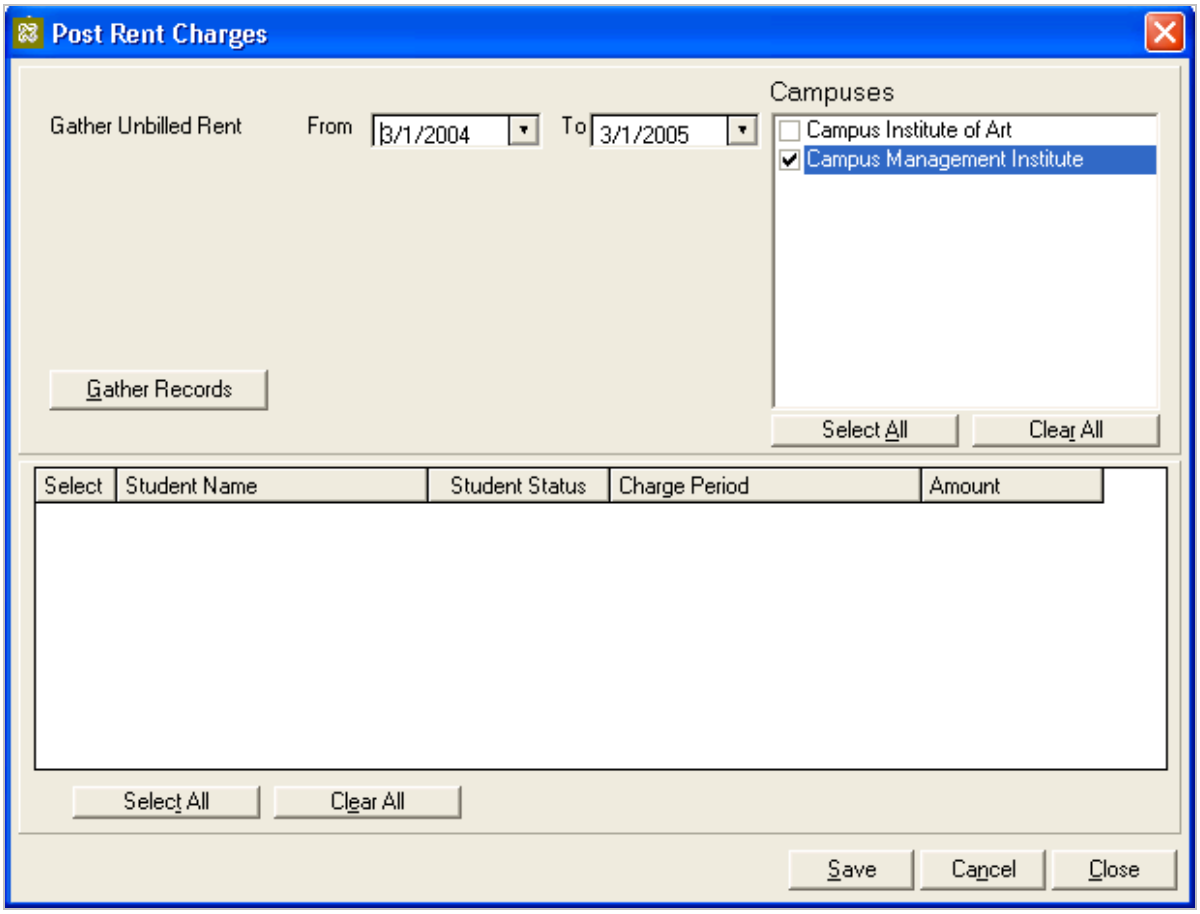
29. Step 8 shows two lists, one displaying the names of the students who are assigned rooms in this match and the other displaying the names of the students who are not assigned rooms in this match. Click **Finish** to confirm the rooms to be assigned to the students. A confirmation box will appear, asking you if the rooms allocated to students in the match be confirmed and the students who are not allocated be released from this match.
30. Click **Yes** on the confirmation box to confirm. The lease status for the students who are placed is now set to **Current**, the students who are not placed are released from the match, and the match is deleted. Students released from the match can be allocated rooms in some other match.
31. If Housing Lease has been configured to be printed via CampusNexus Student (Setup > Campus Location > Housing), you are prompted to confirm. Click **Yes** to print the lease(s) for the selected students.
32. See Working with Housing Lease.

Post Rent Charges

Users can post unbilled rent charges of students using the Post Rent Charges form. The form enables users select records based on the campus and the charge period (based on the **From** and **To** dates defined by the user).

To Post outstanding rent charges:

1. Navigate to **Daily > Housing > Post Rent Charges**. The Post Rent Charges form is displayed.



2. Select the **Campuses**. Click the **Select All** and **Clear All** buttons to select or clear campuses.
3. Select the **From** and **To** dates, and click **Gather Records** to display student records having outstanding rent charges within the dates selected.
4. Select the check box appearing at the top left corner of each record to post rent charges to the student ledger (View > Student Accounts > Ledger Cards). Click the **Select All** and **Clear All** buttons to select or clear all records.

   Note: Click **Cancel** to cancel a transaction.
5. Click **Save** to post the rent charges of the selected records to the student ledger.
6. Click **Close** to close the form.

Move Out or Renewal

The Move-Out/Renewal Wizard allows you to move-out student batches from housing accommodations or renew housing leases for student batches.

To move-out student batches:

1. Navigate to **Daily > Housing > Batch Move Out/Renewal**.
2. When Step 1 of the Move-Out/Renewal Wizard is displayed, select **Move-Out**.
3. Select the **Lease Start Date** and the **Lease End Date**.
4. Select the **Graduation Date** for the students to be moved out.
5. Click **Next**. Step 2 of the Move-Out/Renewal Wizard is displayed.
6. The students matching the criteria specified in step 1 are listed. Select the students to move-out by enabling the corresponding check boxes. You can click **Select All** to select all students, or click **Clear All** to clear all selected students.
7. Click **Next**. Step 3 of the Move-Out/Renewal Wizard will appear. The Move-Out frame in the wizard is activated.
8. Select one of the following system-defined move-out reasons from the **Move-Out Reason** drop-down list:
    - Lease Ended
    - Evicted
    - Changing Rooms
    - Medical Reasons
    - Personal Reasons
9. Specify a move-out date in the **Move-Out Date** field.
10. If you choose to refund the housing deposit by selecting the **Yes** radio button, the **Refund Amount** field is activated. Specify the refund amount in this field.
11. Specify a termination fee in the **Termination Fee** field. If you specify a termination fee, select the transaction code for the termination fee from the **Trans Code** drop-down list.
12. Select the **Termination Fee Subsidiary Code** from the list of subsidiary associated with the selected transaction code. This field is only populated when the transaction code selected for Termination Fee is associated with single or multiple subsidiaries.
13. Select a Contact Manager activity that will be sent to all students being moved out from the **Assign Activity** drop-down list.
14. Click **Finish**. A confirmation box is displayed.
15. Click **OK** on the confirmation box to close the Move-Out/Renewal Wizard.

Note: The lease status of all students being moved-out is changed to **Lease Broken**. Any active applications for the students would also be made inactive.

To renew housing leases for student batches:

1. Navigate to **Daily > Housing > Batch Move Out/Renewal**.
2. When Step 1 of the Move-Out/Renewal Wizard is displayed, select **Renewal**.

3. Select the **Lease Start Date** and **Lease End Date**.
4. Select the **Graduation Date** for the students whose housing leases need to be renewed.
5. Click **Next**. Step 2 of the Move-Out/Renewal Wizard is displayed.
6. The students matching the criteria specified in step 1 are listed. Selects the students whose housing leases need to be renewed by enabling the corresponding check boxes. You can click **Select All** to select all students, or click **Clear All** to clear all selected students.
7. Click **Next**. Step 3 of the Move-Out/Renewal Wizard is displayed. The Renewal frame in the wizard is activated in step 3.
8. Select the **Start Date** and the **End Date** for the new leases.
9. Select a Contact Manager activity that will be sent to all students whose leases are being renewed from the **Assign Activity** drop-down list.
10. Click **Finish**. A confirmation box is displayed.
11. Click **OK** on the confirmation box to close the Move-Out/Renewal Wizard.

Note: The new leases that are created have the start date and end date as specified in the Move-Out/Renewal Wizard, the remaining information, such as Building Name, Suite No, and Room No, is derived from the leases that are being renewed.

Reports Menu

This menu provides the following options:

- Executive Information
- Contact Manager
- Admissions
- Financial Aid
- Student Accounts
- Academic Records
- Distance Education
- Career Services
- Loan Management
- Student Services
- Housing
- Custom Reports
- Open Report Selector

The reports are organized by department modules. Each module has an alphabetically sorted list of reports. The number of reports for each module varies.

Your client workstation operating system determines how you view a long list of reports.

- If you are using Windows NT, the list is displayed in multiple columns.
- If you are using Windows 2000, Windows XP, or Windows 7, scroll controls are displayed at the top and bottom of the list.

Reports Overview

CampusNexus Student reports retrieve information from your school's database. From the Reports menu, you can access reports specific to a department (e.g., Admissions, Academic Records, Housing, etc.), choose the rules for selecting data, view reports, and print reports.

You can run standard CampusNexus Student reports and customize reports to accommodate your special reporting requirements.

The Report Wizard simplifies the process of running a report. The wizard guides you through the process of selecting parameters for displaying or printing reports.

The Report Viewer allows you to browse, print, and export a report. Using the Report Viewer you can also add students from the report to a student group or modify existing student groups based on report data. Further, you can use the Report Viewer's mail-merge tool to merge report data with letter activities.

The Cube Reports option offer a means of producing a multidimensional, spreadsheet-style report that can accommodate three or more dimensions in a report presentation.

The Executive Summary Report option is a collection of reports that provide a comprehensive summary of key business indicators within a school's operation.

General Features of Reports

- The title of the report is displayed in the upper left corner of each page.
- The selection criteria and the sort order are listed in the upper left corner of the first page.
- The name of the program that produced the report and the date and time of the report are listed in the upper right corner of the first page.
- Column headers are shown at the top of each page.
- Group headers are listed on the left side of the report as required by your sorting criteria. You can sort by all the available sort variables, but group totals are available only for the high-order three sort variables.
- The total number of records selected is listed at the end of the report.
- The company name appears in the lower left corner of each page. (This is the company name from the Setup > System menu option.)

Note: Reports from your system parameter tables can be printed in a similar manner from the Lists menu.

The G/L Summary and Detail reports and the G/L Account Code Setup report are displayed as HTML documents. When the HTML report is displayed, right-click on the report and then select Print from the context-menu to print it.

Using the Report Selection Form

The Report Selection form is displayed after you select a report from the Reports menu. The form enables you to specify selection criteria (filters) for the data in a report. For some reports, filtering is not needed. For other reports, not filtering could result in long search times and excessively large reports.

The selection tools on the Report Selection form are grouped as follows:

- Report Preference
- Sort Variables and Selected Sort Order
- Campus Selection Tab
- Selection Tab
- Student Groups Tab
- Employer Groups Tab

The record selection for a report is based on a view, depending on the tab that is visible when you click the **Preview** button.

- If the Selection tab is visible, the program selects records using the information provided on the Selection tab and the campuses selected on the Campus Selection tab.
- If the Student Group tab is visible, CampusNexus Student selects records using the selected student groups and the campuses selected on the Campus Selection tab.

Report Preference

You can use the Report Preference feature to save a set of report parameters that you want to rerun later. Preferences are saved for a specific report only.

To load or save report preferences:

1. Select a name from the **Preference Name** drop-down menu. If none exist, skip to step 3.
2. Click **Load** to apply the saved preferences.
3. Click **Save As** to save the current selection criteria under a new preference name, or click **Save** to save the current selection criteria under the current name.

You can also edit or delete your report preferences. After you edit you report preference, click **Save**. To delete your report preference, select the preference name from the list and click **Remove**.

Sort Variables and Selected Sort Order

For most reports, you can select sort variables and set in the order in which you want the variables to be sorted in the report. Some reports have required sort sequences and do not allow you to change the sort order.

The sort order determines how subtotals are grouped on the report. If three sort variables are selected, the report sorts the output by all three variables, in the order selected, and then groups the subtotals by the first two variables.

Note: Some reports require a minimum number of sort variables to total the data groups correctly. Therefore, you should select the same number of sort variables as used in the default sort sequence. A smaller or larger number of variables may yield an unexpected result when the report is displayed.

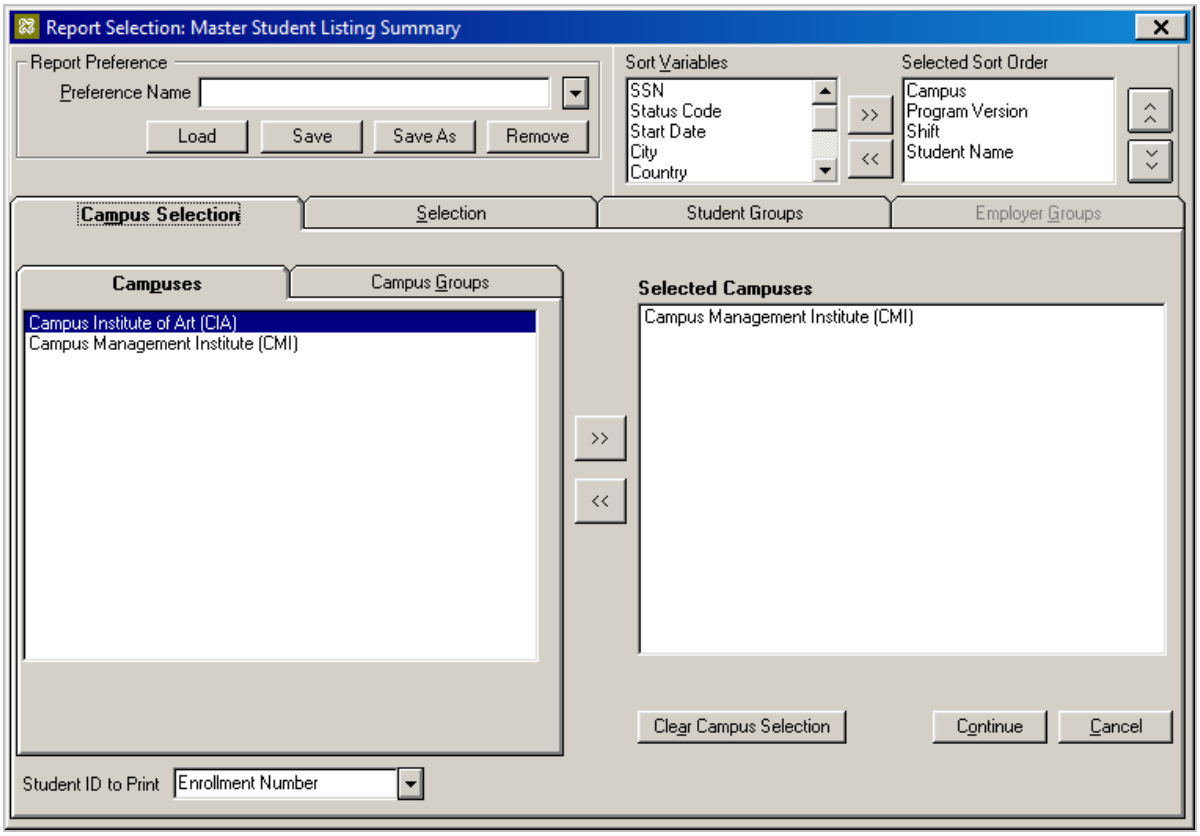
To select and sort variables:

1. In the **Sort Variables** box, select a sort variable and click >> or << to move the variables to and from the **Selected Sort Order** box.

2. In the **Selected Sort Order** box, select a sort variable and click ^^ or vv to change the order of the variables.

Campus Selection Tab

When you select a report, the Report Selection form is displayed with the Campus Selection tab in the foreground. The Campus Selection tab has two sub-tabs: Campuses and Campus Groups. The default campus in listed in the Selected Campuses box. The default campus is based on the Campus setting in your Session Parameters.



To specify the Campus or Campus Group selection criteria:

1. On the **Campuses** sub-tab, click a campus and click >> to move it to the **Selected Campuses** list. You can also double-click the campus to select it.

   Click a campus in the Selected Campuses list and click << to remove the campus from the Selected Campuses list.

   – OR –

   Click the **Campus Groups** sub-tab and select Campus Groups in the same manner as described above for campuses.

If necessary, click **Clear Campus Selection** to remove all campuses and campus groups from the Selected Campuses list

2. From the **Student ID to Print** select Student ID, Social Security Number, Enrollment Number, or None.

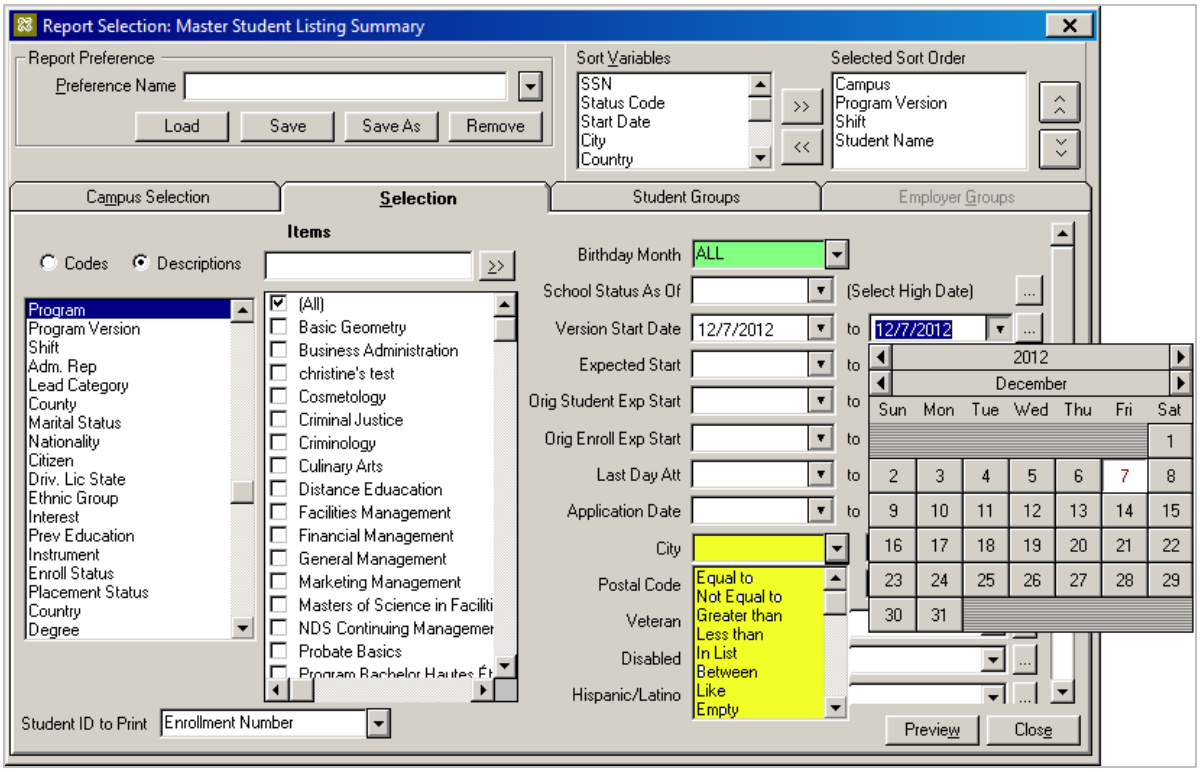
   Note: The ID is printed for each student selected for the report. The default Student ID to Print is chosen as a setup option (see Setup > System > Default ID on Reports). Most reports have all three student IDs available to print on the report. The SSN is required on some reports. Reports about leads (prospects) do not have an Enrollment ID. The ID selection is not used for reports that do not list individual students.

3. Click the **Selection** tab or the **Student Groups** tab to further filter the data for your report.

   Note: If you use the Student Groups tab, the criteria on the Selection tab do not apply.

Selection Tab

Use the Selection tab on the Report Selection form to define additional filters for the report data. The available filters vary between reports.



To filter data using the Selection tab on the Report Selection form:

1. The left side of the Selection tab contains a list of variables. Click **Code** or **Descriptions** above the list of variables to change the **Items** displayed in the right column. You can also enter a partial or complete Code or Description in the text box above the Items list to search for it in a long list.

2. Select **Items** in the list or accept the default of All. You can select any combination of items within a category.Select Empty or None to find the records that do **not** have one of the other values on the list.

Note: Any report that displays the Report Selection form and has status selection includes the degree-seeking and the Non-Degree-Seeking (NDS) Status codes. When Status Categories are available for selection, the NDS Status Category codes are also included.

3. Click to see the campuses for the Codes or Descriptions displayed in the Items list.

   Note: If **Term** is selected to display the list of terms for term selection, the **Select Term** button is displayed at the bottom of the form. Click **Select Term** to display the Term Selection form for reports. All terms (active and inactive) for the selected campus or campuses including Reporting Only terms are displayed for selection. When a parent term is selected, its child term is automatically selected.

4. Some reports require a **date** or **date range** to be selected before the report is run. The options for date selections include the following:

   - You can select specific dates from the calendar tool.
   - You can select dates such as Today or Yesterday on reports where there is a single date field, such as an As of Date.
   - If you select This Week on a single date selection, the system defaults to the last day of the week.
   - Relative Date options, such as Next Week, Last Year, This Quarter, are available in place of an actual date or date range. The system calculates the actual dates at run time and fills in the date values for the beginning and ending dates of last month on the report form. The relative date selection is displayed as a tool tip when hovering over the button on the report form.

     Note: The Relative Date options allow you to save report preferences that run for weekly, monthly, quarterly, or annual periods. When the preference is reused, the dates are calculated using the relative date selection and the current system date.

5. Some reports allow you to compare values, such as City or Postal Code. The **Comparison** options used in reports include:

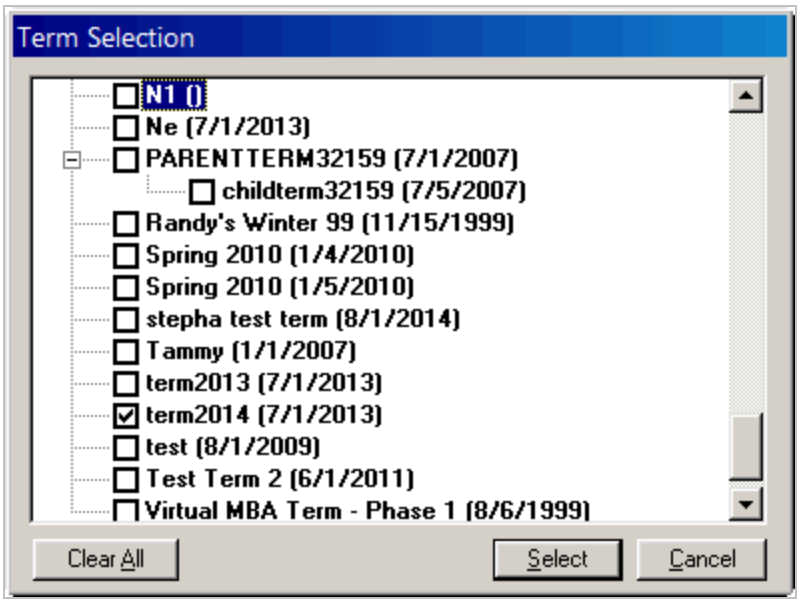
   - Equal to returns records with items that are equal to the value listed.
   - Not Equal to returns all records with items that are not equal to the value listed.
   - Greater than returns records with items that are higher than the value listed. Greater than 10 returns 11 or higher.
   - Less than returns records with items that are lower than the value listed. Less than 10 returns 9 or lower.
   - In List returns records that have values that match exactly. Use a semicolon (;) to separate multiple values.

     Note: When using variable comparisons, type a semicolon (;) between the values. For example: Between 30000;39999. In List 33441;33445;34555.
   - Between returns records with values listed within the upper and lower boundaries. Use a semicolon (;) to separate the upper and lower values. Between 100;200 includes 100 and 200, but not 99 nor 201.
   - Like may be used as a wild card. In the Postal Code example, "Like 33" would retrieve all the records in which 33 are the first two characters.
   - Empty returns records with no characters (not even blanks) in a character field. A field is not empty if it has

blank characters in it. If you completely delete a character field, it will not have blanks in it and it is empty.

- Is Null returns records with a numeric field that has never been initialized with data. It does not mean a numeric field is zero. A value of zero is data. A null field has no data in it.

6. Reports that include Term as a selection criterion provide a Select Term button at the bottom of the Selection tab. Click **Select Term** to display the Term Selection form.



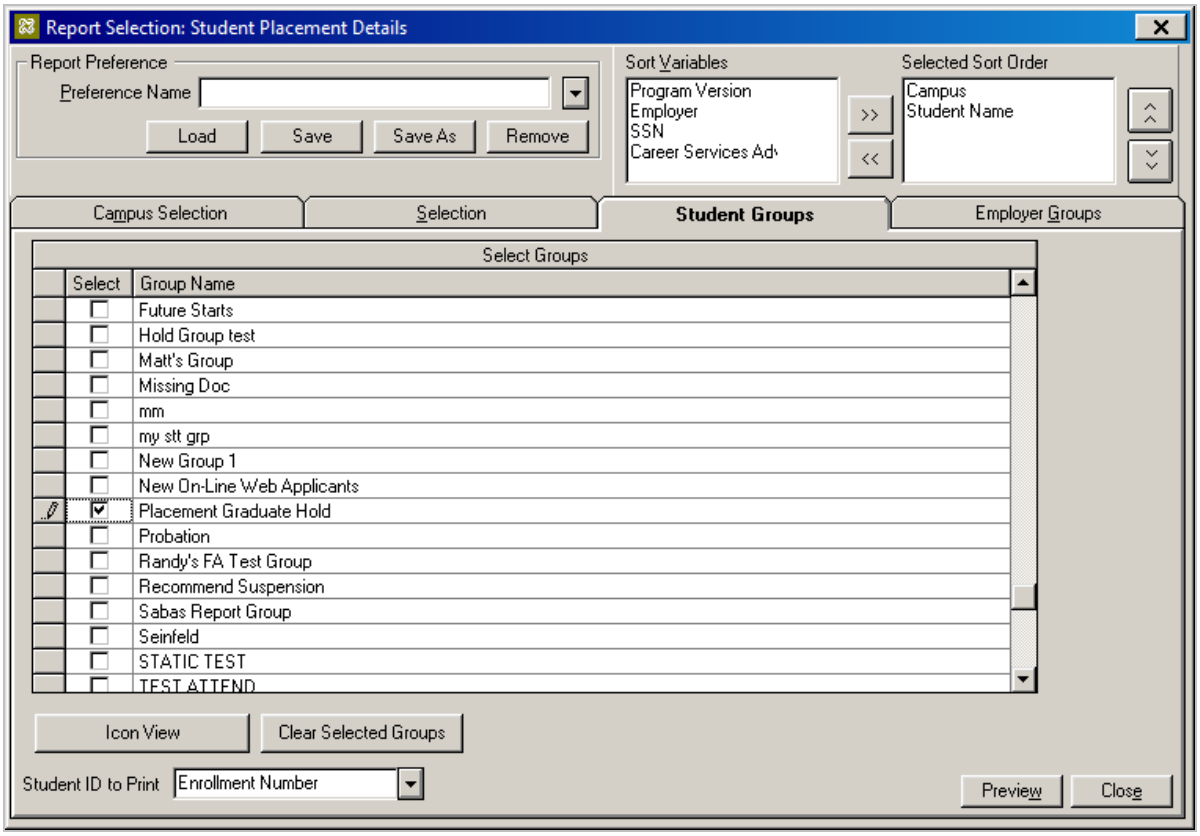
All terms (active and inactive) for the selected campuses including reporting only terms are displayed for selection. If a parent term is selected, its child terms are selected, too. You can select individual terms or all terms related to a parent term.

7. Click the **Student Groups** or **Employer Groups** tab (if available) to further filter the data for your report.

   Note: If you use the Student Groups tab, the criteria on the Selection tab do not apply.

Student Groups Tab

Click the **Student Groups** tab to report on one or more selected student groups.



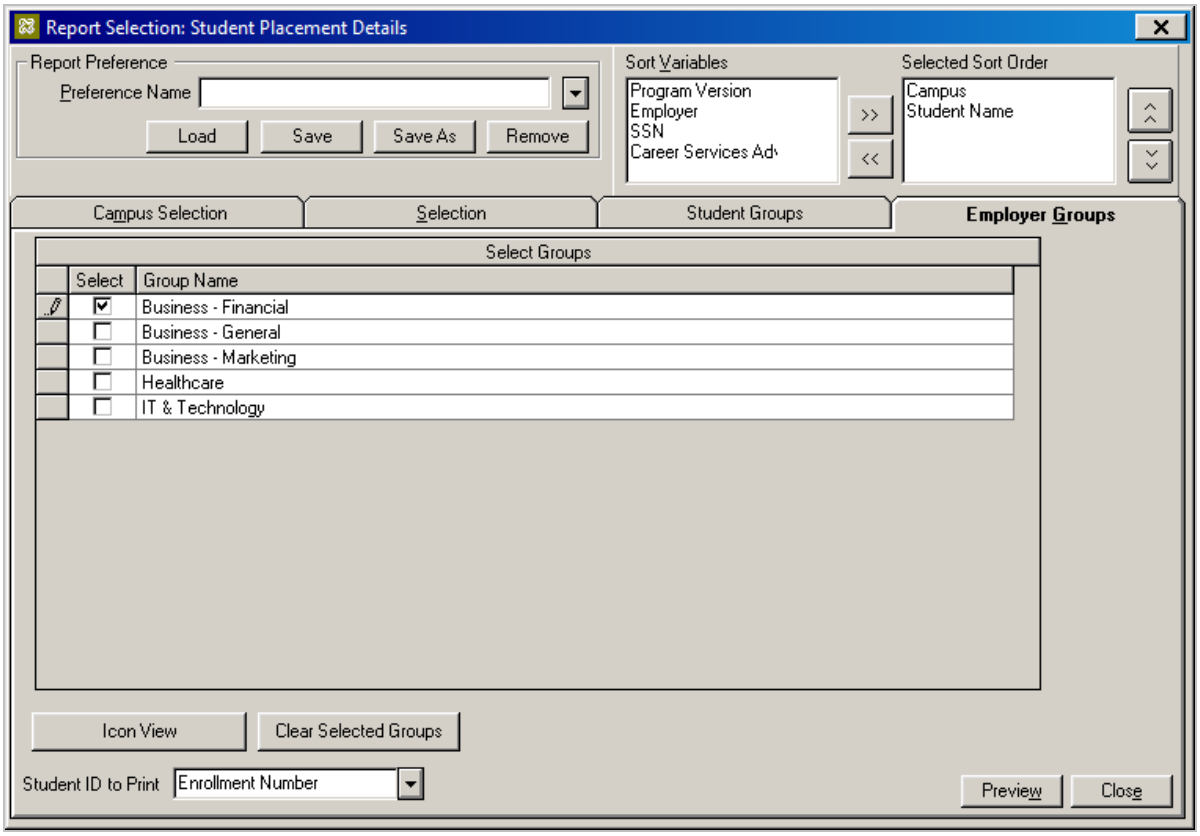
To filter data using the Student Groups tab on the Report Selection form:

1. Click **List View** or **Icon View** to view the student groups as text items or as icons.
2. Select one or more student groups for your report. To select multiple groups, use the **Shift** and **Ctrl** keys.

   Note: When you select student groups and then run the report, selections on the Selection tab are ignored. tab. When you select student groups, and then go back to the Selection tab, the selected student groups are ignored. Only the information on the visible tab is used to select records. Campuses selected on the Campus Selection tab are included in the report regardless of whether you are running the report from the Selection tab or the Student groups tab.

Employer Groups Tab

The functionality for Employer Groups mirrors the Student Groups functionality.



Use Report Server

The Report Server option only appears on the Report Selection form if a report server has been set up for your CampusNexus Student system.

There can be one reporting server set up for each campus. See Setup > Campus Locations > Campus Options.

Additionally, you must have permission to select the alternative report server before this option appears on the report selection form. See Setup > Staff > Staff Members > User Info Tab

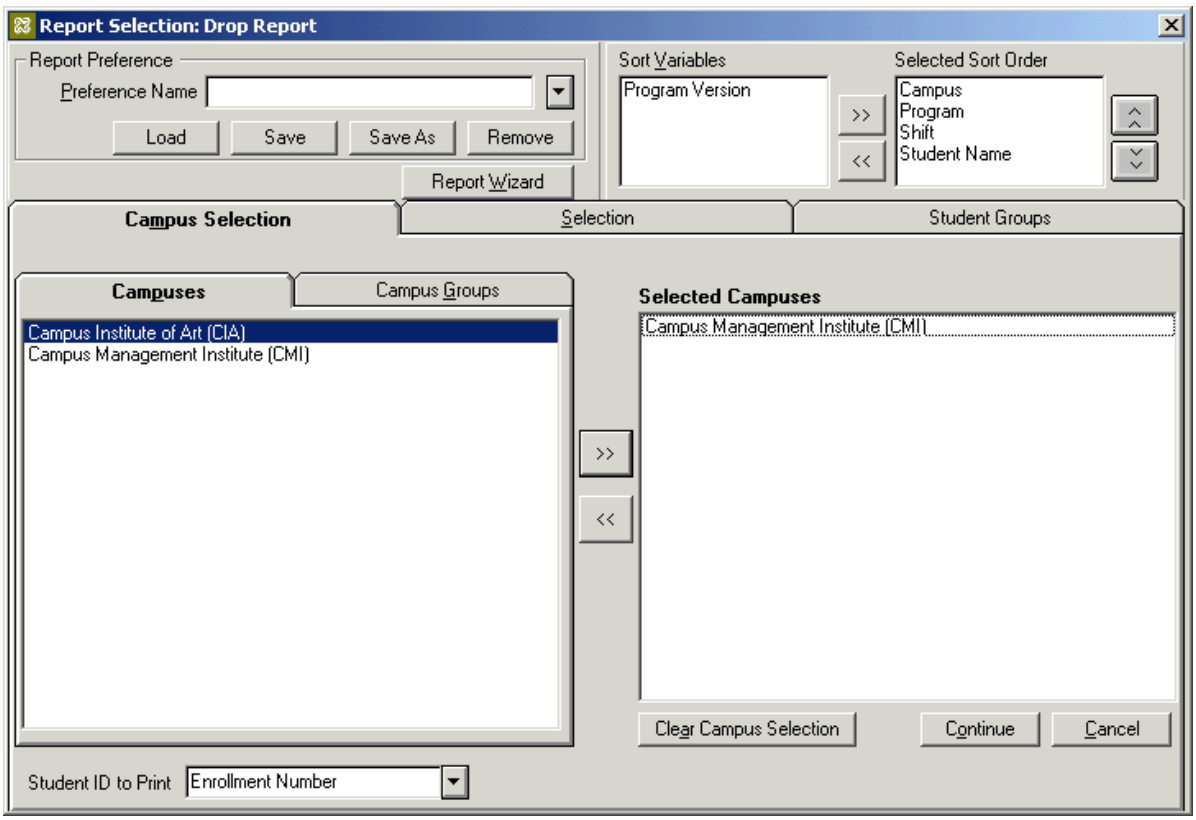
Using the Report Wizard

The Report Wizard guides you through the process of selecting parameters for displaying or printing reports. The CampusNexus Student generic and custom reports can be set up to use the report wizard (see Maintaining and Customizing Reports).

The **Setup > Staff > Staff Members > Staff Information > User Info** form contains a Default to Report Wizard option. If this option is selected, report selection defaults to the Report Wizard wherever it is available.

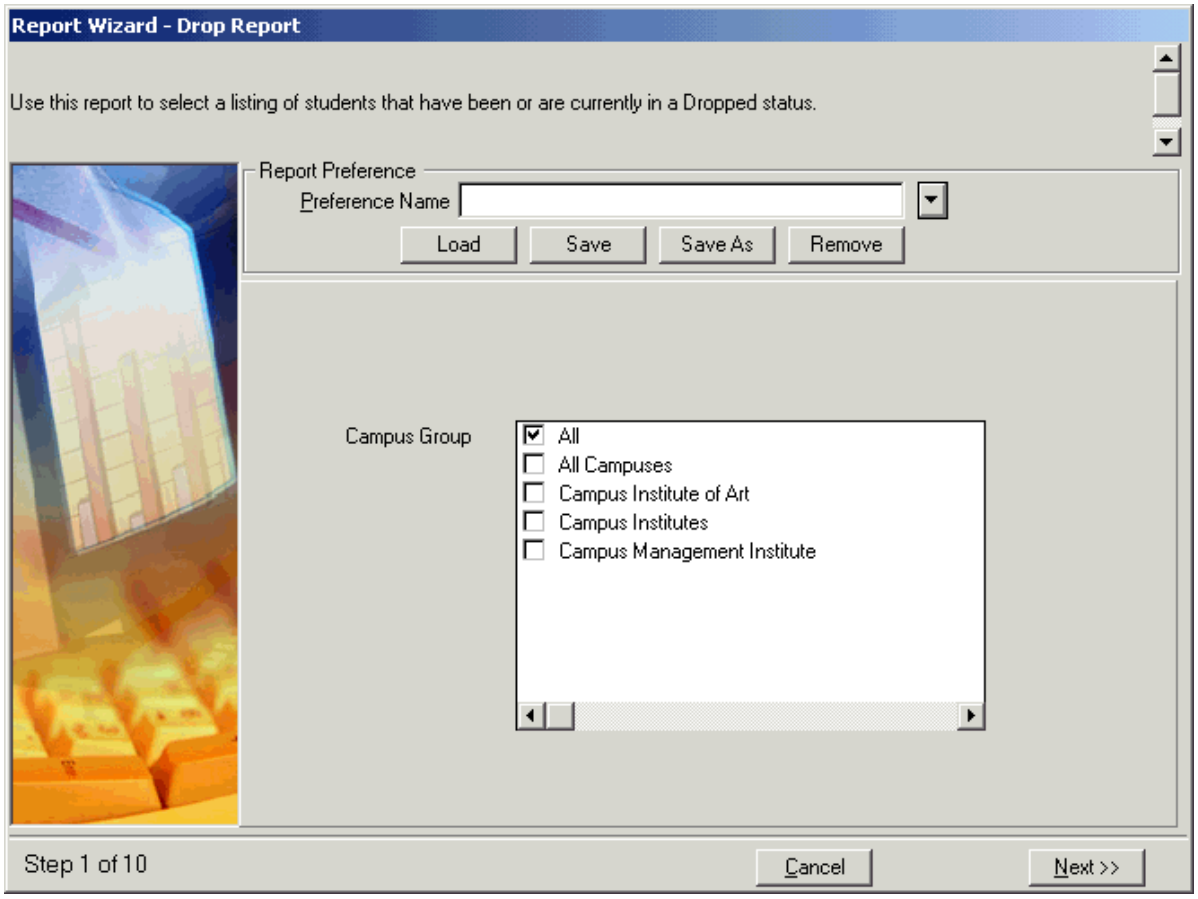
To run a report using the report wizard:

1. From the **Reports** menu select a report.
2. Depending on how CampusNexus Student is set up by your administrator, you might have to click the **Report Wizard** button on the Report Selection form to start the Report Wizard.

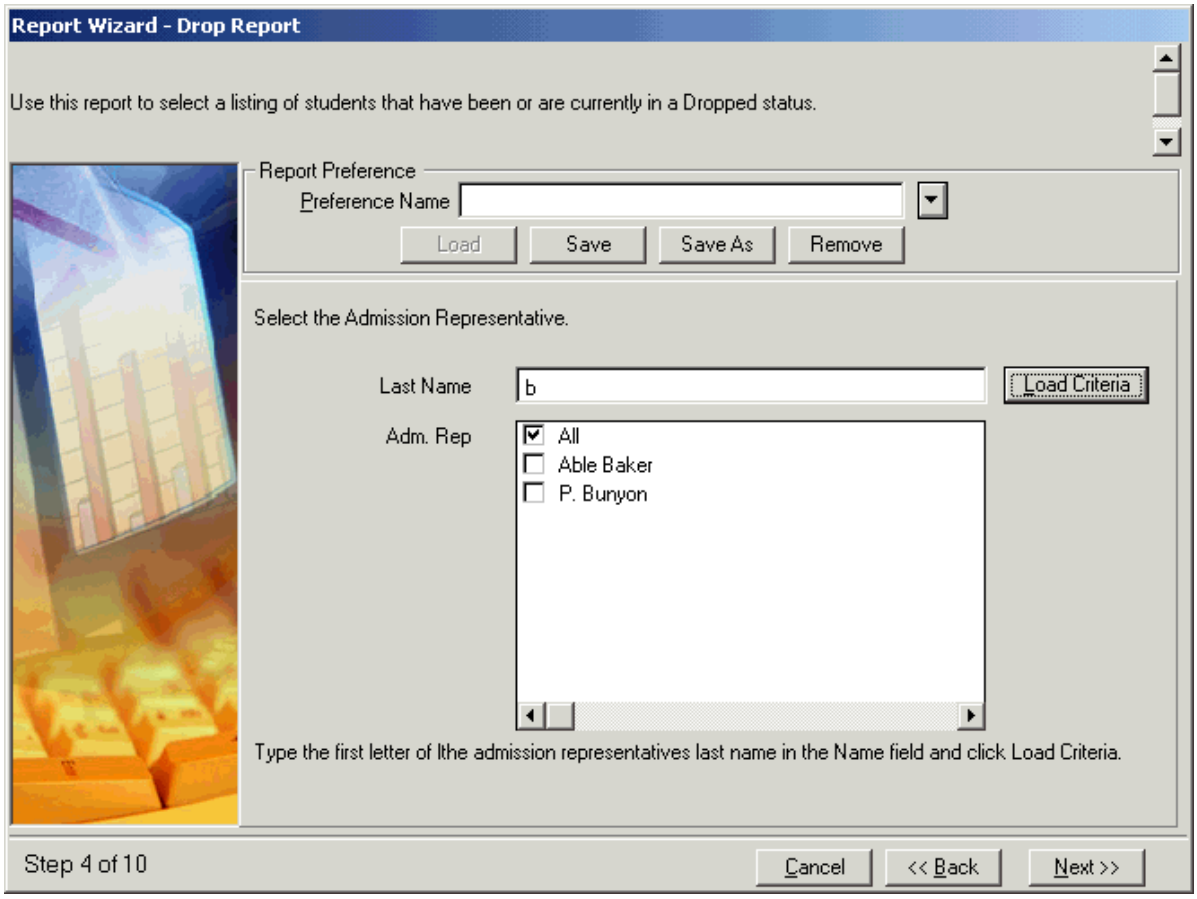


- OR -

The Report Wizard is displayed automatically.

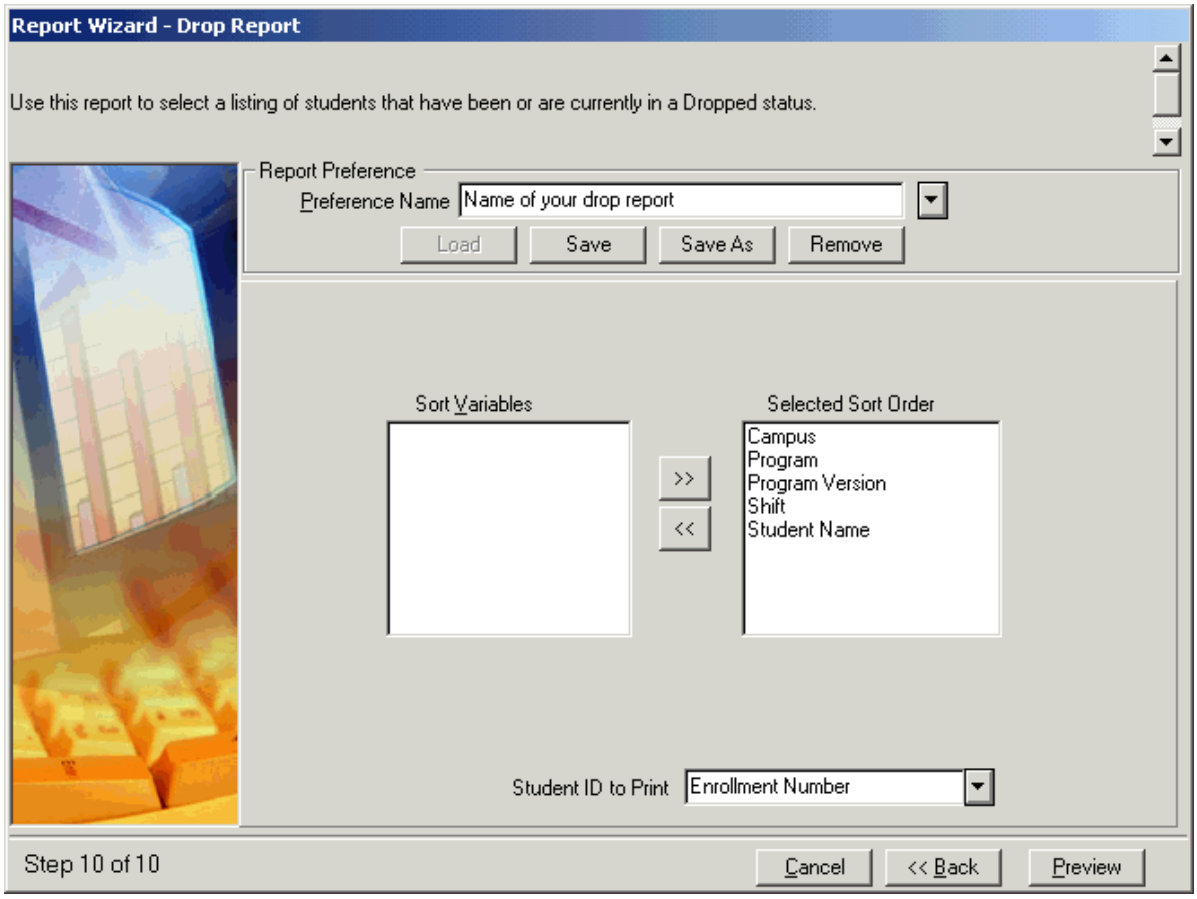


3. Select appropriate options on each form of the wizard. The number of forms depends on the number of available options.



Note: Click the **Load Criteria** button only when you have entered data in the field.

4. On the last form of the wizard, save your **Report Preferences** so that you can load the same preferences the next time you run the report .



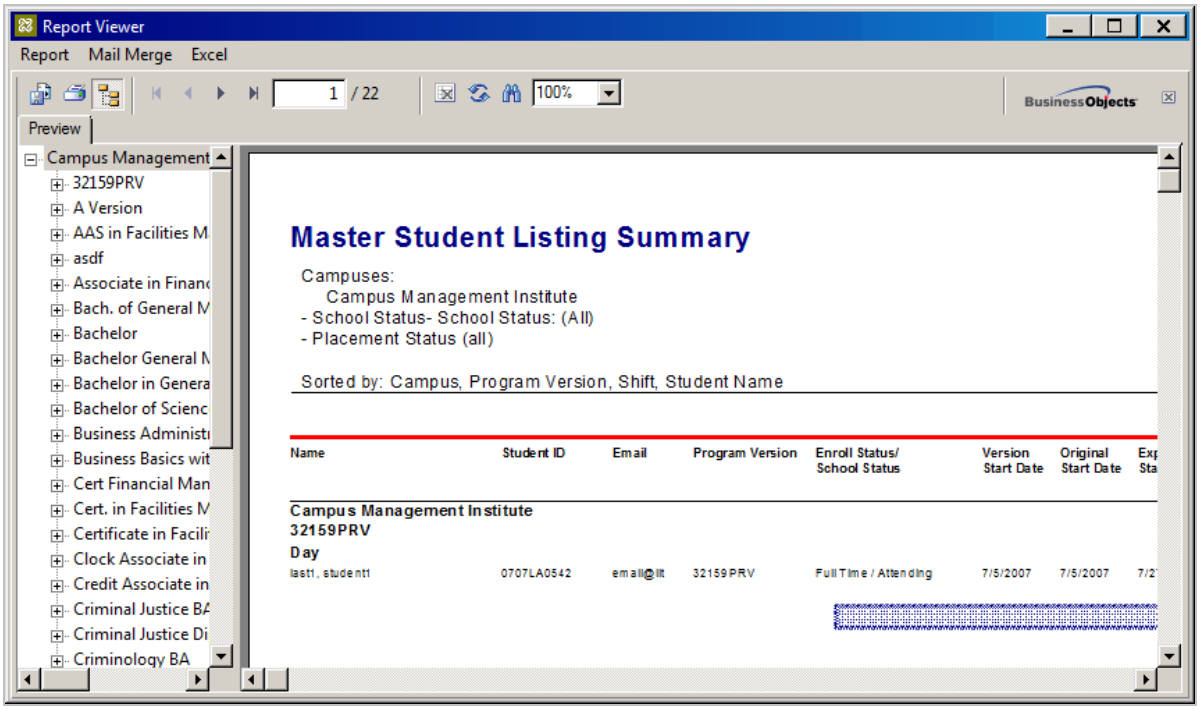
Note: When you select an **All** check box and save your Report Preference, CampusNexus Student applies your selection to all the options. This can result in a long list at the beginning of your report. If you run the report without loading a preference and select an All check box, the report lists just the All statement.

5. Click **Preview** to display the report in the Report Viewer.

Using the Report Viewer

The Report Viewer allows you to browse, print, and export a report. Using the Report Viewer you can also add students from the report to a student group or modify existing student groups based on report data. Further, you can use the Report Viewer's mail-merge tool to merge report data with letter activities.

The Report Viewer is displayed when you click **Preview** on a Report Selection form or in the Report Wizard.



The Report Viewer interface comprises a main window, and tabs, a menu bar, and several controls.

Main Window

The main window displays the report title, selection criteria, and report details.

When you move the cursor over the data displayed in the main window and the cursor changes to a magnifying glass, you can double-click to drill down into the details of the report.

Note: When you double-click a student name in a report, the Student Master form for that student is displayed.

Tabs

The **Preview** tab is displayed when a report contains several sections. Use the Preview tab to navigate to a specific section within a report. When you click a subsection in the Preview tab, another tab displays the selected subsection in the main window.

Report Viewer Menus

The Report Viewer menu options are Report, Mail Merge, and Excel.

Report Menu

Use the **Report** menu to perform the following tasks:

- Select **Print** or click to print a report. The print dialog box is displayed. Choose to print the complete report or selected pages. Indicate the number of copies to be printed. Click **OK** to send the report to the printer.
- Select **Print Setup** to select a printer, set the number of copies to be printed, and select other print options.
- Select **Save Student Group** to access the following options:
    - **Add Students to New Group**

      If the internal Campus ID and internal Student ID are contained in the record set for the report, you can save the students listed on the report as a group. Select this option and give your group a name.

      
      Student Groups can be saved from report output if configured under **Setup > System > Other**. The initial type of the new Student Group is also defined on the system level.

      Note: To configure student groups for the Portal filter, select the **Active** check box on the Student Groups form and the **Make Group for Portal Content** check box on the Save New Group dialog box.

    - **Add Students to an Existing Group**

      Select this option to add the students listed in the report to an existing group.

      
      If applicable, select the **Replace All Students in Group** check box to replace all existing students in the group with the students listed in the report. If the check box is not selected, the students from the report are added to the existing students in the group.

      Click **Save** to update the student group.

      If the selected group was a non-manual group, you are prompted to confirm changing the group type to manual for the selected group.

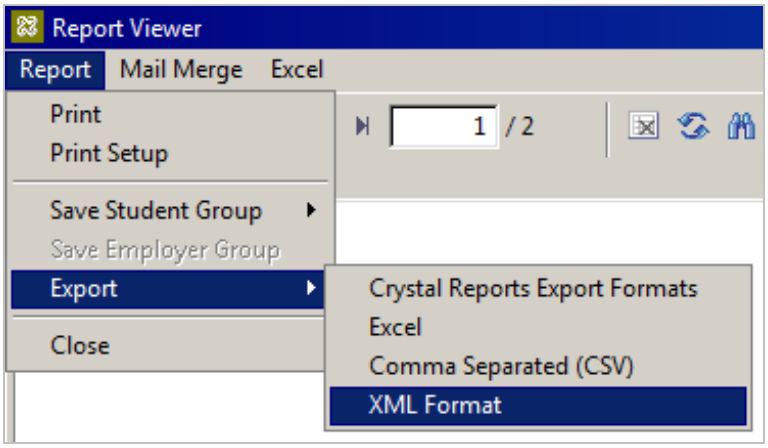
    - **Delete Students from an Existing Group**

Select this option to delete the students listed in the report from an existing group.

Click **Save** to remove all students listed in the report from the group. In this case, the relationship records are deactivated, but not deleted.

If the selected group was a non-manual group, you are prompted to confirm changing the group type to manual for the selected group.

- Select **Export** to access the following export format options:
  - Crystal Report Export Formats
  - Excel
  - Comma Separated (CSV)
  - XML Format



You can then select several options for **Format** and **Destination** of your report. Click **OK** after you make your selections.

- Select **Close** to close the report preview. The program returns to the **Report Selection** form.

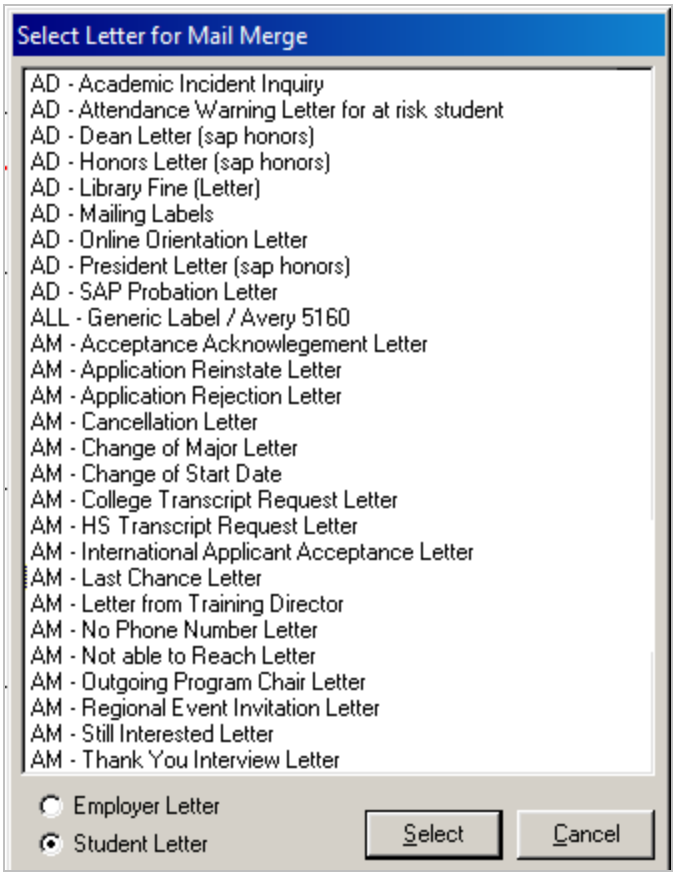
Mail Merge Menu

The Mail Merge option is displayed on the Report Viewer menu bar if the following conditions are met:

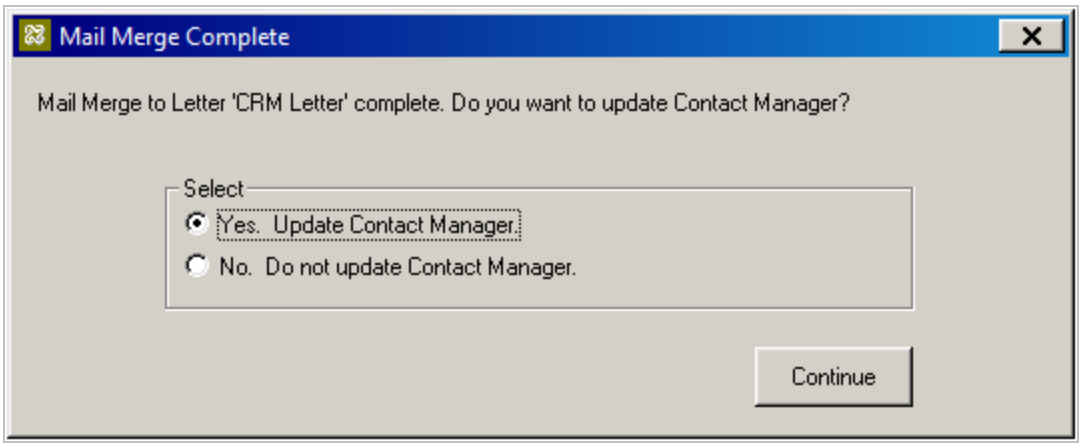
- Your school has letter activities related to students.
- The path to the letters is correctly designated in **Setup > System**.
- The report being previewed lists students.

Mail Merge displays the options for letter activities with which to merge the data on the displayed report.

- Select **Employer Letter** or **Student Letter**, and click **Select** to continue processing.



- Confirm that you want to merge the records from the report with the letter you selected.
- You can also update the student's activity record after processing the letter. The system asks if you want to update the Contact Manager. If you select **Yes**, the student's Contact Manager history is updated upon successful completion of the Mail Merge from the report.



Excel Menu

This option exports the report data to an Excel spreadsheet. The export procedure uses column names as headings. A maximum of 65,000 rows can be exported. Sub-reports are not exported.

Report Viewer Controls

The Report Viewer provides the following controls:

- **Report Views**: Double-click a report heading or sub-heading to open a view containing only that heading and the data below it. A tab is displayed at the top of the report. You can alternate between views. You can also print only a selected view of the report.
- **Close Current View**: Click on the view to be closed and then click to close it.
- **Group Tree**: The left side of the Report Viewer is a control known as the Group Tree. It is used to drill down to specific report section. Click on the plus and minus boxes beside the group names to expand or collapse the tree list. Click on a tree item to go to that portion of the report.
- **Toggle Group Tree**: Use this tool to show or hide the Group Tree.
- **Zoom**: Use the zoom tool 
to size the image of the report to a convenient viewing size. You can select or type a percentage value.
- **Search**: Type text in the search box and click the binoculars to find text in the report preview. Click the binoculars again to find the next occurrence, and so on. Search entries are saved so that you can reuse them by clicking the arrow beside the text box. When you close the report, the search entries are discarded.
- **Page Navigation**: You can go to the first, next, previous, and last page of a multi-page report.

Working with Cube Reports

Each CampusNexus Student module has one or more cube reports associated with it. A cube reports is a multidimensional report that can accommodate three or more dimensions in a presentation. An ordinary spreadsheet is two-dimensional.

Data elements for a cube report are provided in a form that you can readily use. Cube reports provide capabilities for drilling down from summary level reports to details. You can also move data around on the report, add or remove horizontal and vertical data elements to achieve the precise combination of rows and columns to present the results.

Data for a cube report is gathered each time the report is opened. The data is stored in a temporary file while the cube is open. For large databases this data gathering effort can take time.

Cube report output can be generated in four forms:

- On-screen displays in which rows and columns can be rearranged to suit you needs
- Printed spreadsheets with optional horizontal and vertical cross-footed totals
- Charts and graphs
- Microsoft Excel files

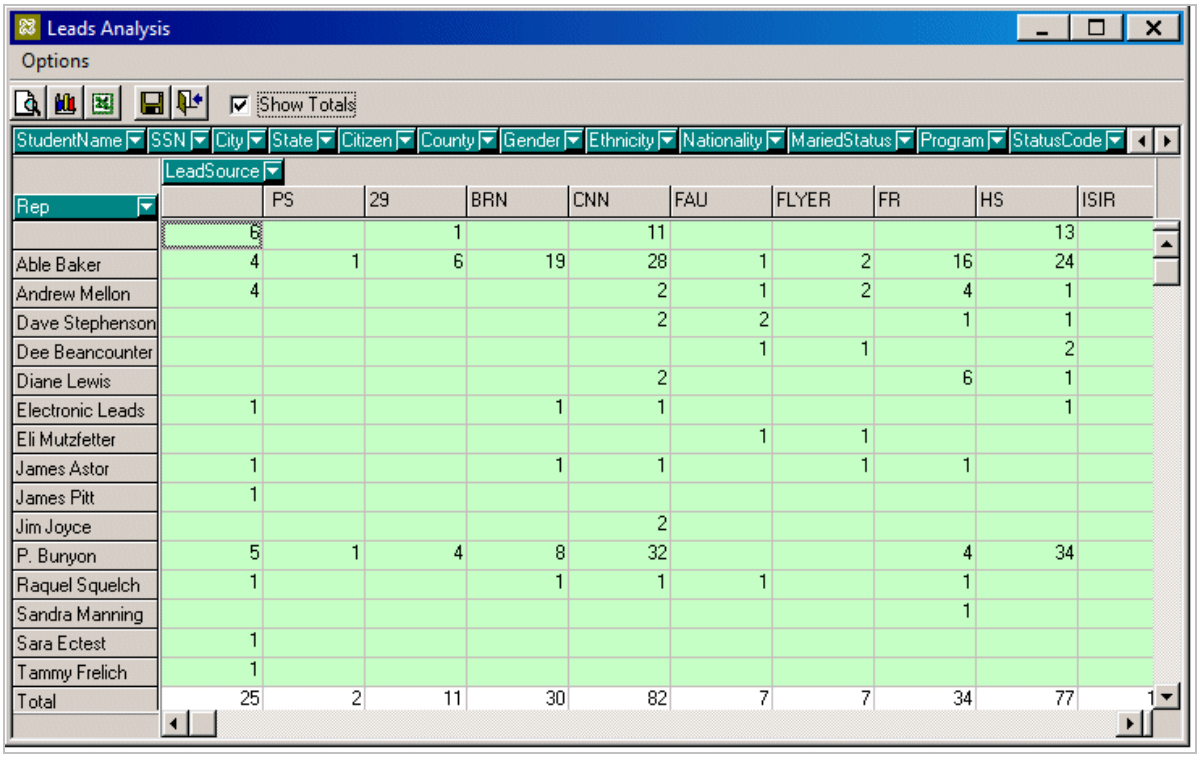
The cube reporting feature in CampusNexus Student can eliminate the need for customized reports. Even if you cannot get the combinations of data you need from a single cube, you can export data from multiple cubes to Excel spreadsheets.

To view a sample cube report:

1. Navigate to **Reports** > **Admissions** > **Leads Analysis**. The Report Selection form is displayed.

   Note: Cube reports are listed at the bottom of each departmental reports menu.

2. If the Report Selection form contains selection criteria for the report, select appropriate criteria.
3. Click **Preview** on the Report Selection form to start the gathering of data for the cube report. Be patient. This can take a while.
4. When the necessary data are assembled, the cube report form is displayed and you can work with the report.

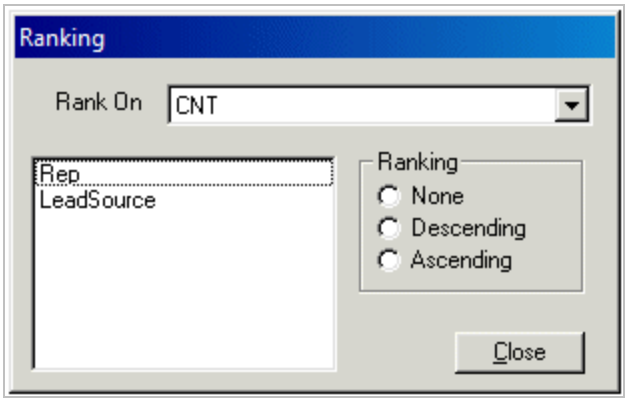


The cube report form contains the following controls:

- Print Preview – Shows a preview of the printed report in spreadsheet format.
- Graph – Opens the graph design feature.

  Note: Before you click **Graph**, you must select the cells you want to include in the graph.
- Excel – Exports the cube report to an Excel spreadsheet.
- Save – Saves data from the report to various file formats.
- Close Report – Closes the report and returns to the CampusNexus Student work area.
- Show Totals – Check box to indicate whether to include the totals in the report.

The **Options** menu contains the options described above plus the Ranking option which allows you to sort the data presented in the report.

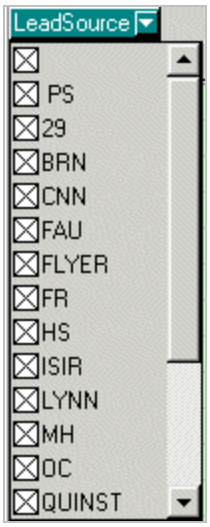


5. You can add data elements to the report.

   The Leads cube report example uses Rep and Lead Source data. You can add data, such as Student Name, SSN, City, State, etc., to the report view by dragging the these elements from the top of the report to the horizontal or vertical axis of the grid.

6. You can select subsets of data elements.

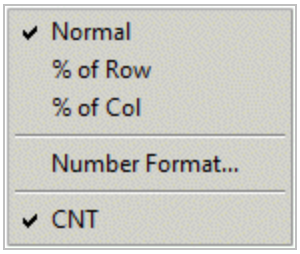
   - Click beside a data element name, e.g., Lead Sources. The list of codes and names drops down for your selection.
   - Click the check boxes to select items to be included in your report. To select all or to deselect all, hold the Ctrl key while selecting items.



7. You can change the data format in the report.

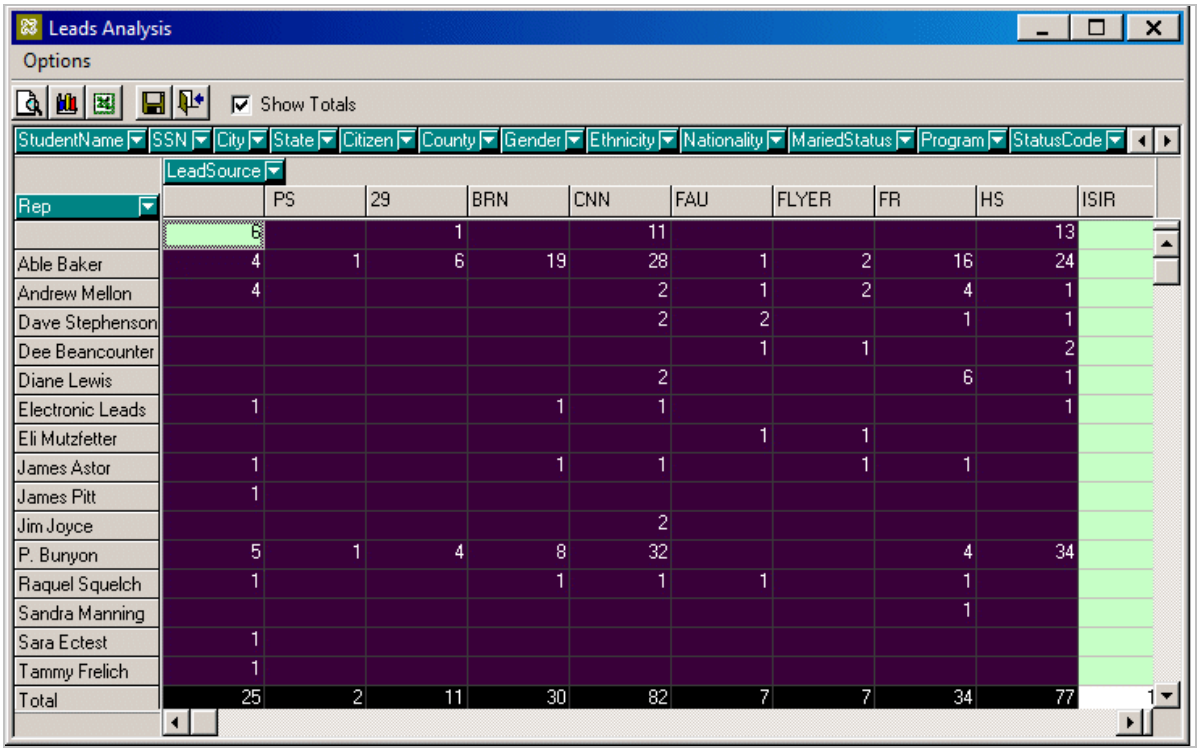
   Right-click anywhere in the data area of the cube report to view a shortcut menu with the following options.

   - Normal – Causes the cube data to be displayed in its normal format. In our example, it is a count of the lead source occurrences.
   - % of Row – Changes the data format to be a percentage of the row total.
   - % of Col – Changes the data format to be a percentage of the column total.
   - Number Format... – Change the format of the numbers in the data cells.
   - CNT – Data element to be displayed. In our example, there is only one element. In other reports, more options may be listed here.



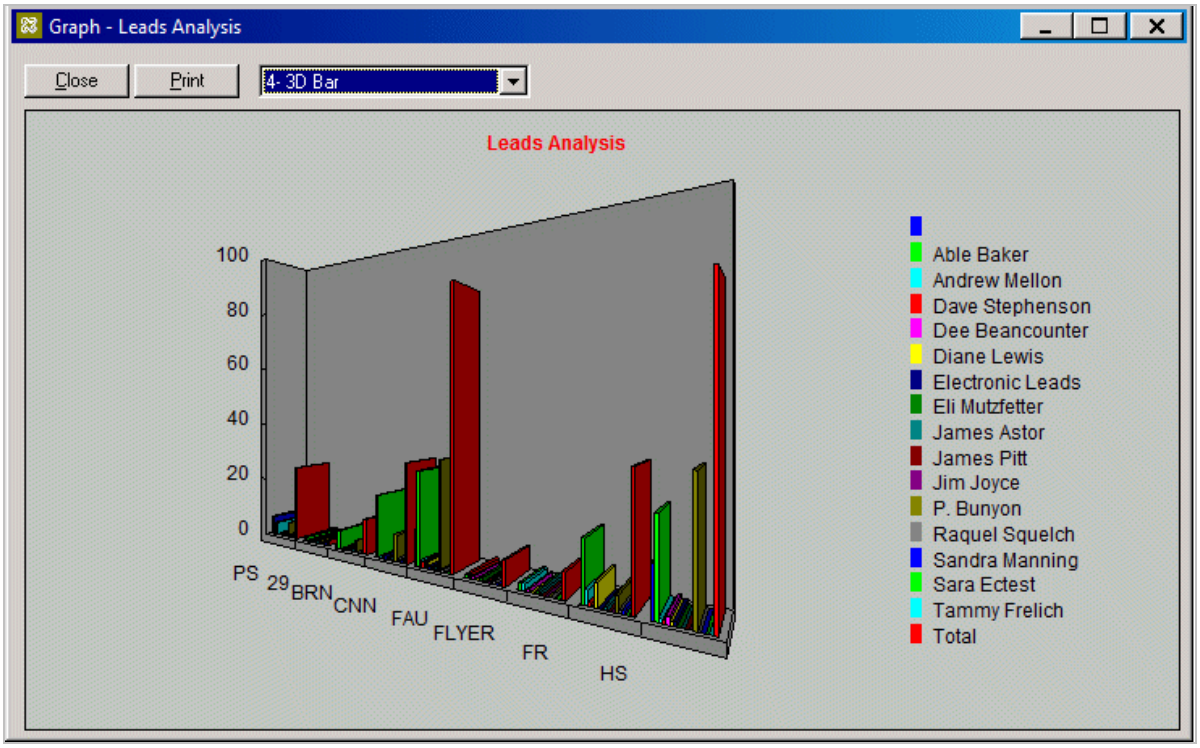
8. You can create a graph.

a. Before creating a graph you must **select cells**. To select cells, click one corner of a data range and drag to the diagonally opposite corner of the range. All selected cells except the first one are darkened.



b. Click the **Graph** button. The Graph form is displayed showing the report data in a graph presentation.

c. To change the graph presentation style, click the graph style drop-down list and select a different style, e.g., 3D bar, 3D area, etc.



d. To print the graph, click **Print** on the graph form.

e. Click **Close** to close the form. You are returned to the cube report form.

9. You can export the complete report or selected cells to Microsoft Excel.
   - To select cells, click one corner of a data range and drag to the diagonally opposite corner of the range.
   - To export the data to Excel, click the **Excel** button.
10. You can preview a print version of the cube report form.
    - Click the **Print Preview** button. The Print Preview form is displayed.
    - Use the **Print**, **Print Setup**, **Margins and Columns**, **Page Change**, **Zoom In**, and **Zoom Out** controls on

the Print Preview form as needed.

Printing Reports

The print features of CampusNexus Student Reports include:

- The title of the report is in the upper left corner of each page.
- The selection criteria are listed in the upper left corner of the first page.
- The sort order is listed in the upper left corner of the first page.
- The name of the program that produced the report is listed in the upper right corner of the first page.
- The date and time that the report was printed is listed in the upper right corner of each page.
- Column headers are shown at the top of each page.
- Group headers are listed on the left side of the report as required by your sorting criteria.

  You can sort by all the available sort variables. Group totals are available only for the high-order three sort variables.
- The total number of records selected is listed at the end of the report.
- The company name is displayed in the lower left corner of each page. (This is the company name from **Setup > System > General**.)

Note: Reports from your system parameter tables can be printed in a similar manner from the **Lists** menu.

Executive Summary Report

This report provides a comprehensive summary of key business indicators within a school's operation. Listed below are questions answered by the different sections of this report that an upper level manager of a school might ask.

- How much am I spending on advertising, and on which lead sources?
- How many leads are being generated from the different lead sources I am spending advertising dollars on?
- What is my advertising cost per lead generated? Per scheduled start? Per actual start? Which lead sources are most effective?
- What is the overall effectiveness of the admissions reps?
- Which admissions reps are converting the most leads into enrollments?
- Which admissions reps enroll the most students who actually start school?
- Are all of my scheduled start dates in the upcoming year sufficiently booked with scheduled starts?
- Are the students scheduled to start being packaged for financial aid in a timely basis?
- How much cash was received in the past week, month, year? How much cash am I expecting to receive in the upcoming months? What cash was I expecting but have not yet received?
- What is my school population? What percentage of students are withdrawing from school?
- How many students who graduate from my school are finding jobs?

The report consists of 15 sections that can be run as a single report. The sections and associated options are configured using the **Executive Summary Report Setup** form under the **Setup > Executive Summary Report** menu.

The report sections (sorted alphabetically) include:

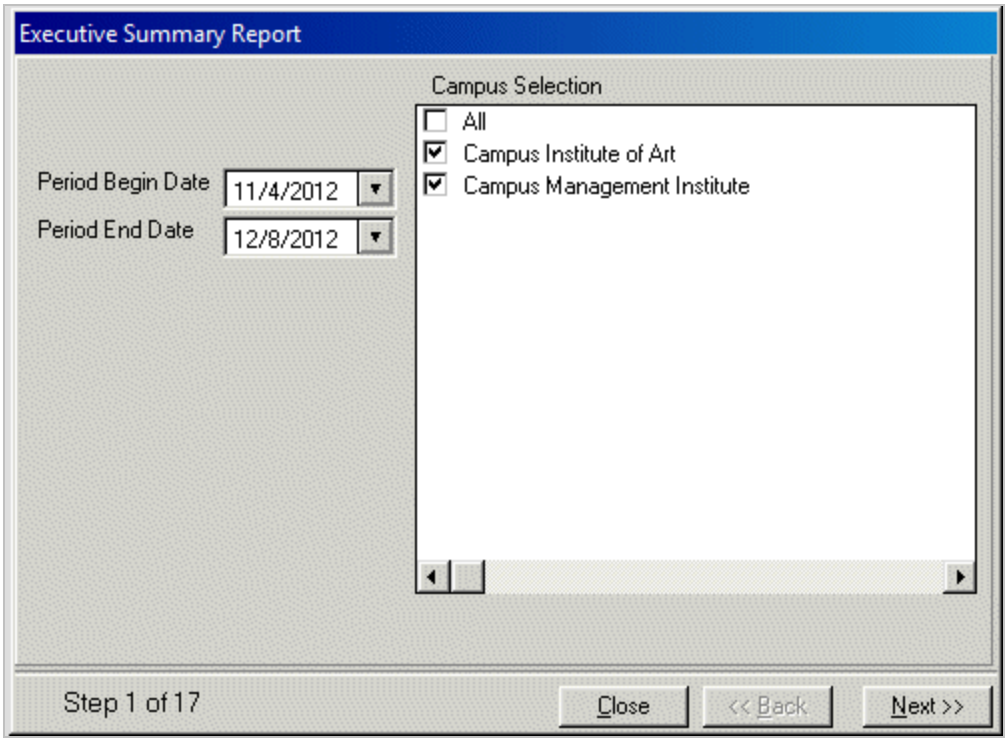
- Booked Futures Summary
- Cash Receipts Summary
- Cost Analysis Breakdown by Lead Category
- Cost Analysis Breakdown by Lead Source
- Expected/Past Due Cash Summary
- FA Packaging Status Summary
- Conversion Breakdown by Admissions Rep - Summary
- Lead Conversion Breakdown by Admissions Rep Type - Summary
- Lead/Enrollment/Start Breakdown by Lead Source
- Lead/Enrollment/Start Breakdown by Lead Source Category
- Placement Summary Section
- Population Analysis Detail
- Population Analysis Summary
- Show Rate Breakdown by Admissions Rep
- Show Rate Breakdown by Admissions Rep Type

The report output is displayed in a Microsoft Excel workbook with a separate worksheet for each report section.

To run the Executive Summary Report:

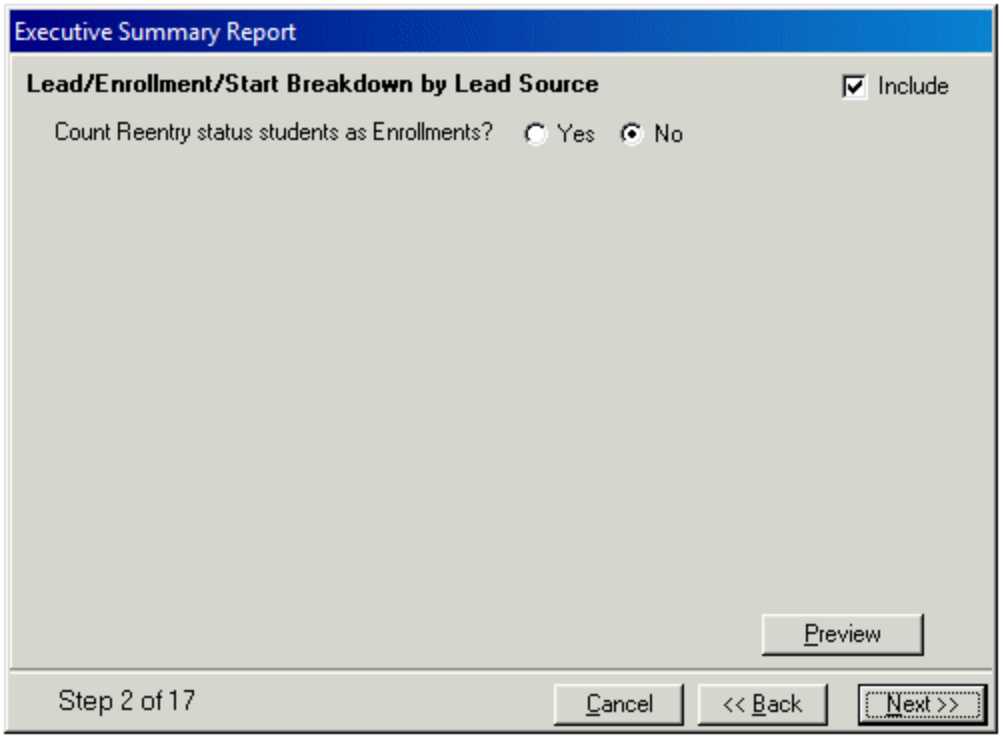
1. Navigate to **Reports > Executive Information > Executive Summary Report**. Step 1 of the Executive Summary Report form is displayed.
2. Select the **Period Begin Date**, **Period End Date**, and the **Campus(es)**.

   Note: Month-to-date (MTD) amounts are the MTD amounts for the Period End Date month only. For example, when specifying filters for the Cash Receipts Summary section, if you enter 10/20/12 as the begin date and 11/20/12 as the ending date, the resulting MTD amounts include all cash receipts from 11/01/12 to 11/20/12 and none from October.



3. Click **Next**. Step 2 of the Executive Summary Report form is displayed. Select appropriate options.

   If you do not want to change the report options, run the complete report by clicking **Preview**. Otherwise, click **Next** and step through the remaining sections of the report.

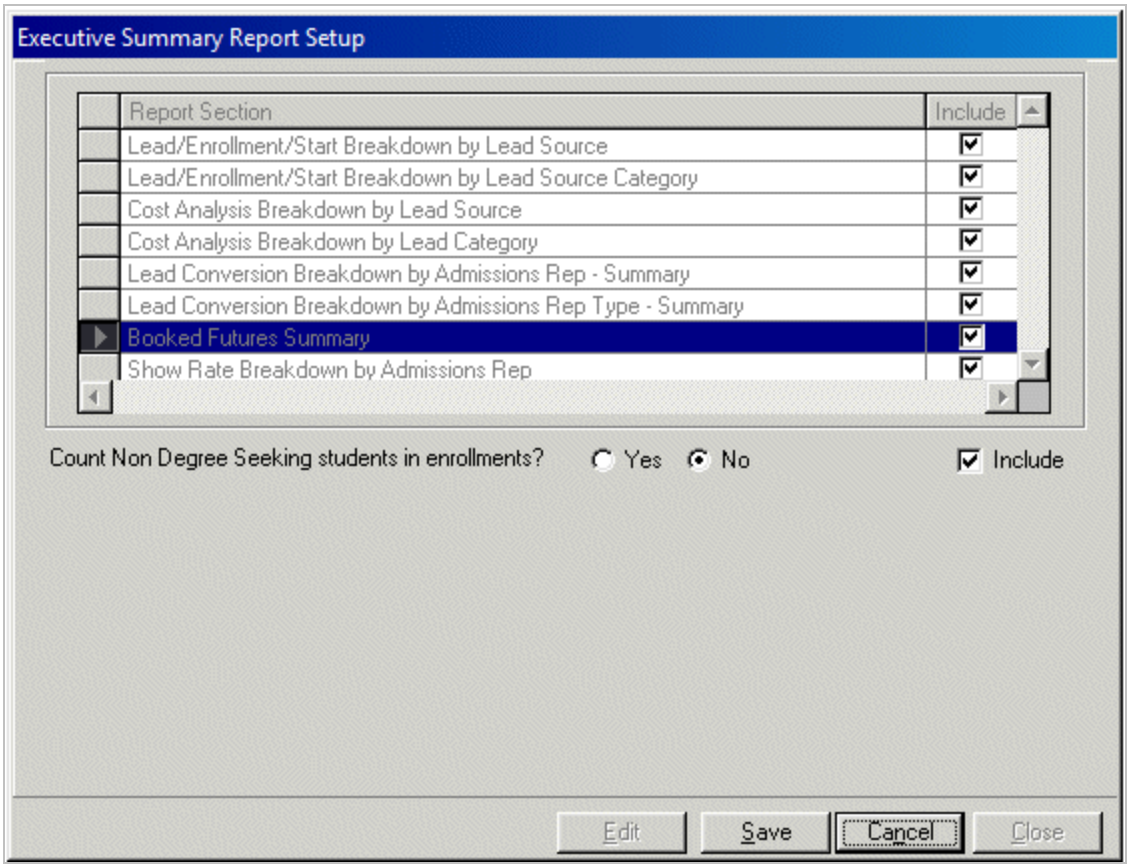


Booked Futures Summary

This section of the Executive Summary Report shows the number of students scheduled to start school each month for the next 13 months. This makes it easy to identify scheduled start dates with low enrollment. Admissions representatives can then target these start dates specifically when enrolling students.

To set up the Booked Futures Summary section:

1. Navigate to **Setup** > **Executive Summary Report**. The Executive Summary Report Setup form is displayed.
2. Select **Booked Futures Summary** and click **Edit**.



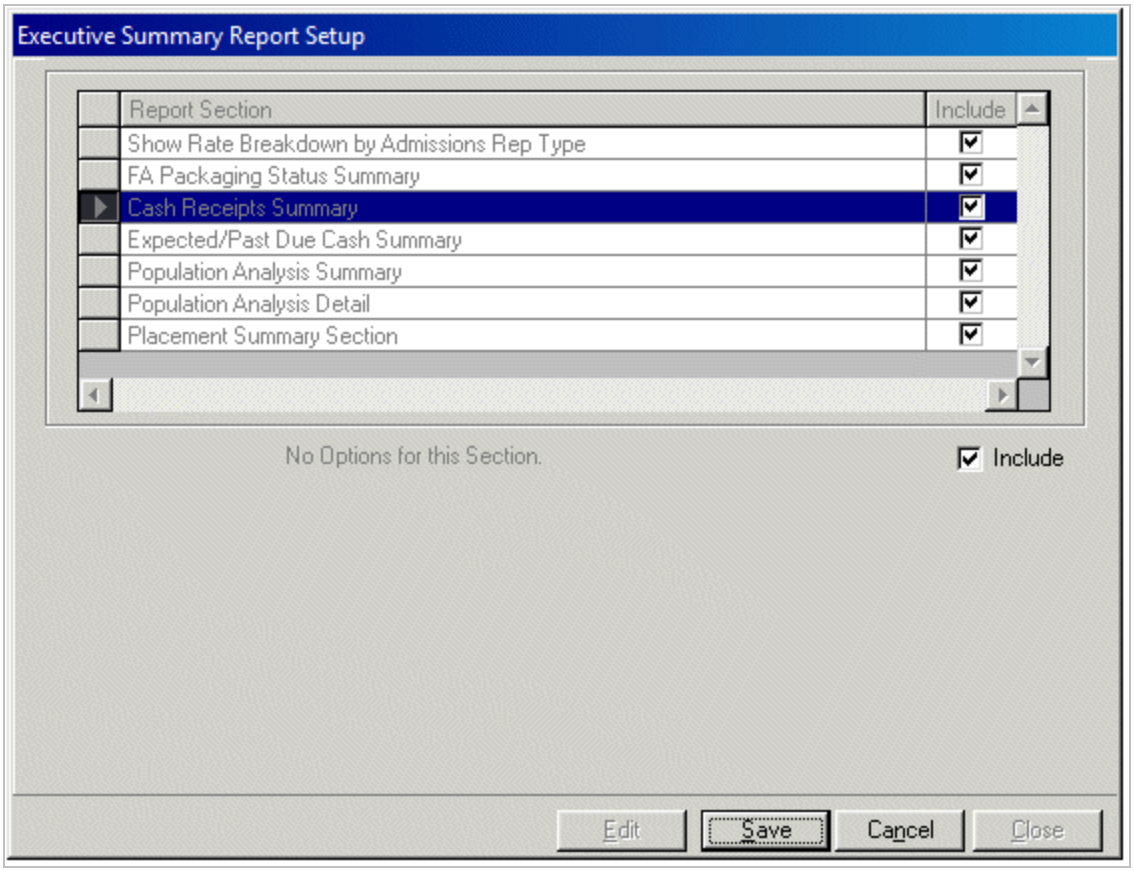
3. Select **Yes** or **No** for the option to 'Count Non Degree Seeking students in enrollments'.
4. Select the **Include** check box if you want this section to be part of the Executive Summary Report.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Cash Receipts Summary

This section of the Executive Summary Report shows the total cash receipts received. The cash receipts are broken out into Title IV and Non-Title IV receipts. This information is critical when evaluating a school's compliance with the 90/10 regulation.

To set up the Cash Receipts Summary section:

1. Navigate to **Setup** > **Executive Summary Report**. The Executive Summary Report Setup form is displayed.
2. Select **Cash Receipts Summary** and click **Edit**.



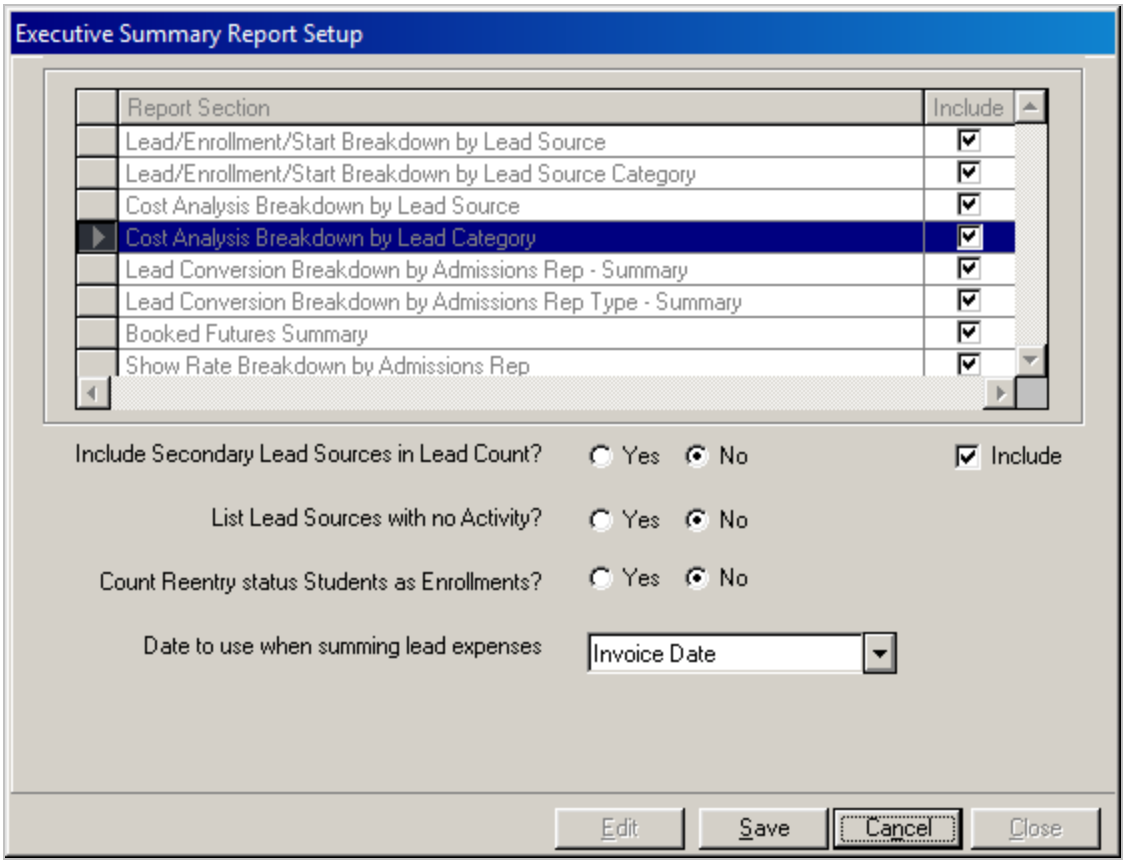
3. Select the **Include** check box if you want this section to be part of the Executive Summary Report.
4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Cost Analysis Breakdown by Lead Category

This section of the Executive Summary Report report shows the qualitative effectiveness of each lead source. The money spent on advertising month to date and year to date for each lead source is listed. The number of leads, number of enrollments, and number of actual starts are also listed. The cost per lead, cost per enrollment, and cost per actual start can then be computed for each lead source to determine which lead sources are performing the best and which are performing the worst.

To set up the Cost Analysis Breakdown by Lead Category section:

1. Navigate to **Setup** > **Executive Summary Report**. The Executive Summary Report Setup form is displayed.
2. Select **Cost Analysis Breakdown by Lead Category** and click **Edit**.



3. Select **Yes** or **No** to 'Include Secondary Lead Sources in Lead Count'.

   Select **Yes** or **No** to 'List Lead Sources with no Activity'.

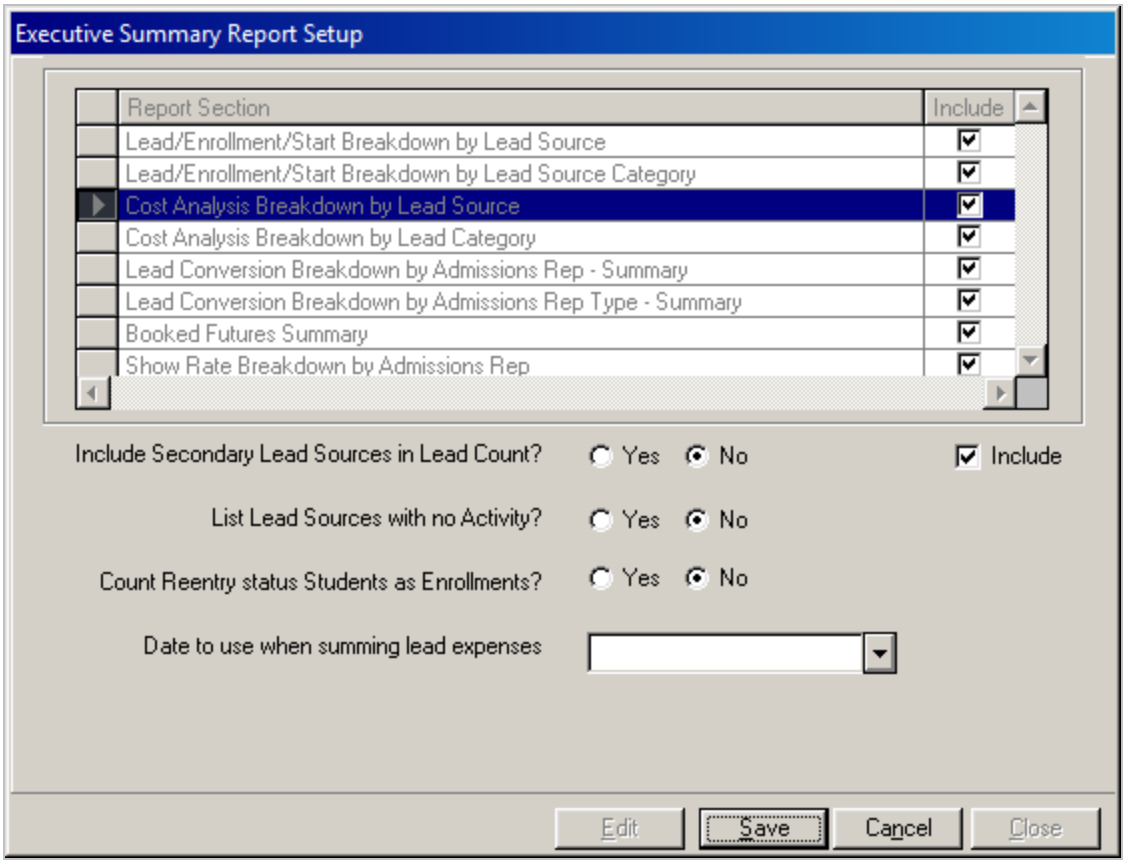
   Select **Yes** or **No** to 'Count Reentry status Students as Enrollments'.
4. Select **Invoice Date** or **Ad Start Date** for the 'Date to use when summing lead expenses'.
5. Select the **Include** check box if you want this section to be part of the Executive Summary Report.
6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Cost Analysis Breakdown by Lead Source

This section of the Executive Summary Report report shows the qualitative effectiveness of each lead source. The money spent on advertising month to date and year to date for each lead source is listed. The number of leads, number of enrollments, and number of actual starts are also listed. The cost per lead, cost per enrollment, and cost per actual start can then be computed for each lead source.

To set up the Cost Analysis Breakdown by Lead Source section:

1. Navigate to **Setup** > **Executive Summary Report**. The Executive Summary Report Setup form is displayed.
2. Select **Cost Analysis Breakdown by Lead Source** and click **Edit**.



3. Select **Yes** or **No** to 'Include Secondary Lead Sources in Lead Count'.

   Select **Yes** or **No** to 'List Lead Sources with no Activity'.

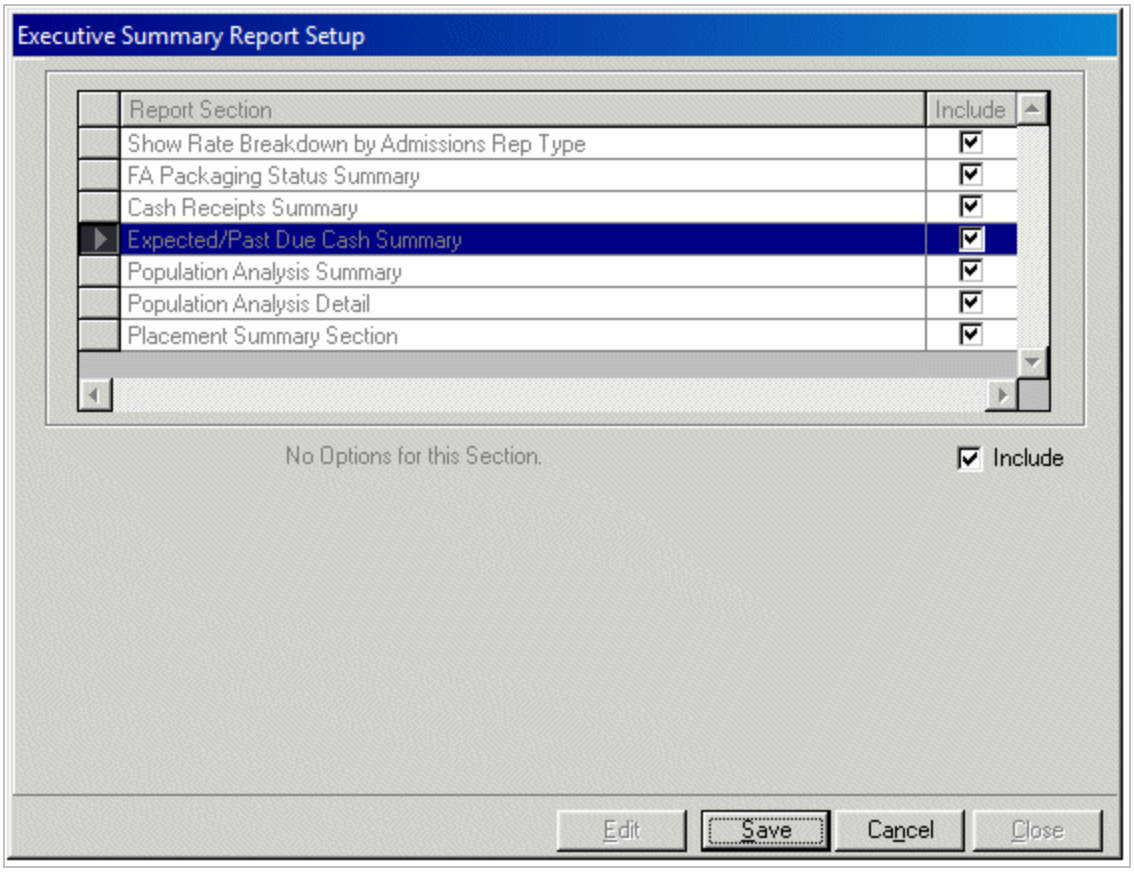
   Select **Yes** or **No** to 'Count Reentry status Students as Enrollments'.
4. Select **Invoice Date** or **Ad Start Date** for the 'Date to use when summing lead expenses'.
5. Select the **Include** check box if you want this section to be part of the Executive Summary Report.
6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Expected/Past Due Cash Summary

This section of the Executive Summary Report shows the cash that is expected and past due. The report section identifies Title IV and Non-Title IV receipts.

To set up the Expected/Past Due Cash Summary section:

1. Navigate to **Setup** > **Executive Summary Report**. The Executive Summary Report Setup form is displayed.
2. Select **Expected/Past Due Cash Summary** and click **Edit**.



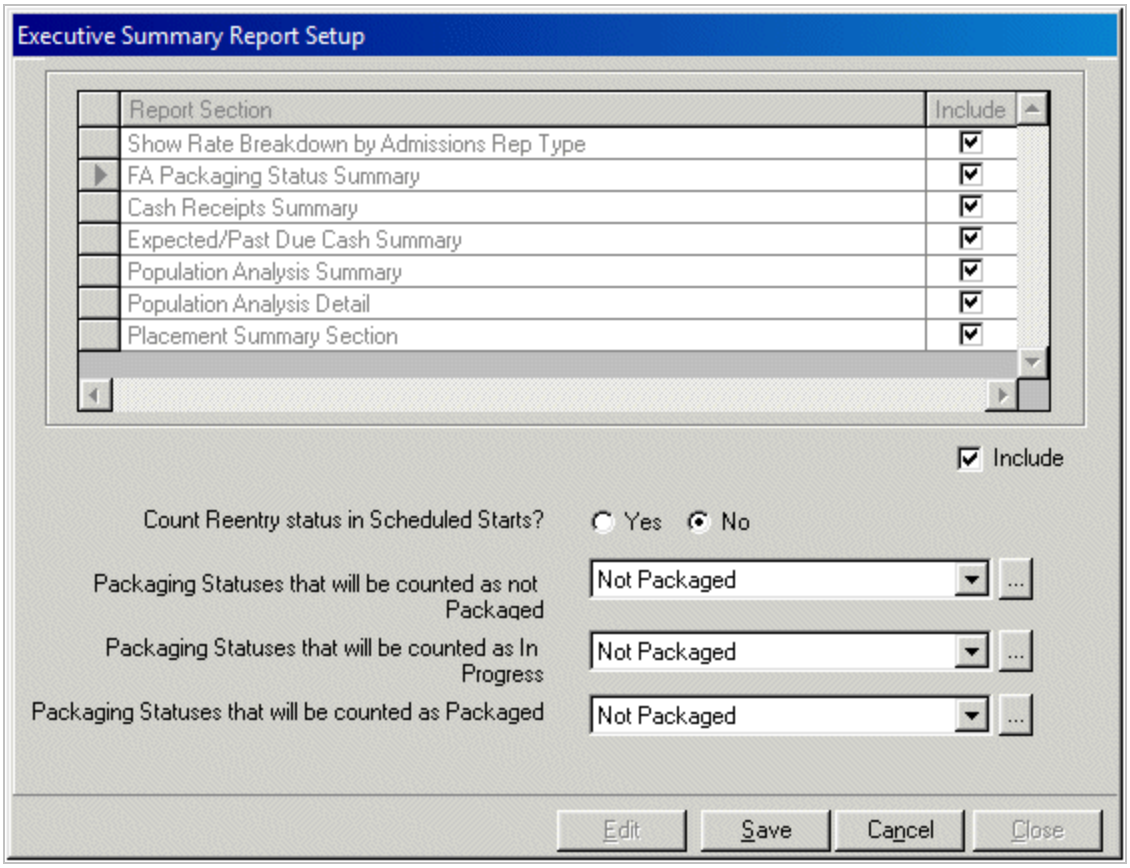
3. Select the **Include** check box if you want this section to be part of the Executive Summary Report.
4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

FA Packaging Status Summary

This section of the Executive Summary Report shows packaging information for students scheduled to start each month for the next 12 months and beyond. Each scheduled start is classified as being packaged, not packaged, or in progress.

To set up the FA Packaging Status Summary section:

1. Navigate to **Setup** > **Executive Summary Report**. The Executive Summary Report Setup form is displayed.
2. Select **FA Packaging Status Summary** and click **Edit**.



3. Select **Yes** or **No** to 'Count Reentry status in Scheduled Starts'.
4. Use the drop-down lists to select the appropriate statuses for the following fields:
   - Packaging Statuses that will be counted as not Packaged
   - Packaging Statuses that will be counted as in Progress
   - Packaging Statuses that will be counted as Packaged

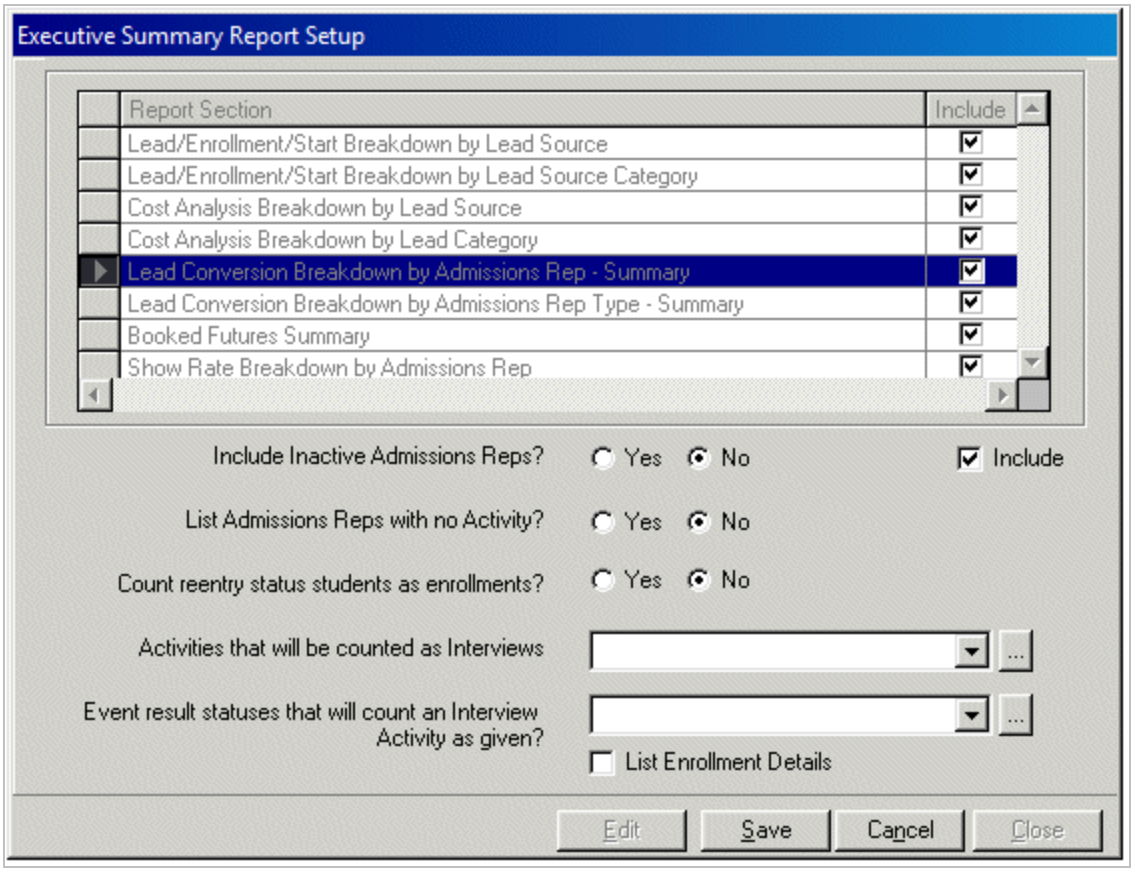
   To select multiple options, click ... and select the appropriate check boxes.
5. Select the **Include** check box if you want this section to be part of the Executive Summary Report.
6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Lead Conversion Breakdown by Admissions Rep - Summary

This section of the Executive Summary Report shows the effectiveness of each admissions representative and the overall effectiveness of the admissions department. The report section lists the number of leads assigned to each representative. It also lists the number of enrollments and actual starts which show the percentage of leads each representative is converting into enrollments for the school.

To set up the Lead Conversion Breakdown by Admissions Rep - Summary section:

1. Navigate to **Setup** > **Executive Summary Report**. The Executive Summary Report Setup form is displayed.
2. Select **Lead Conversion Breakdown by Admissions Rep - Summary** and click **Edit**.



3. Select **Yes** or **No** to 'Include Inactive Admissions Reps'.

   Select **Yes** or **No** to 'List Admissions Reps with no Activity'.

   Select **Yes** or **No** to 'Count reentry status students as enrollments'.

4. Use the drop-down lists to select the appropriate statuses for the following fields:

   - Activities that will be counted as Interviews
   - Event result statuses that will count an Interview Activity as given

   To select multiple options, click ... and select the appropriate check boxes.

5. Select **List Enrollment Details** to include the enrollment details in the report.

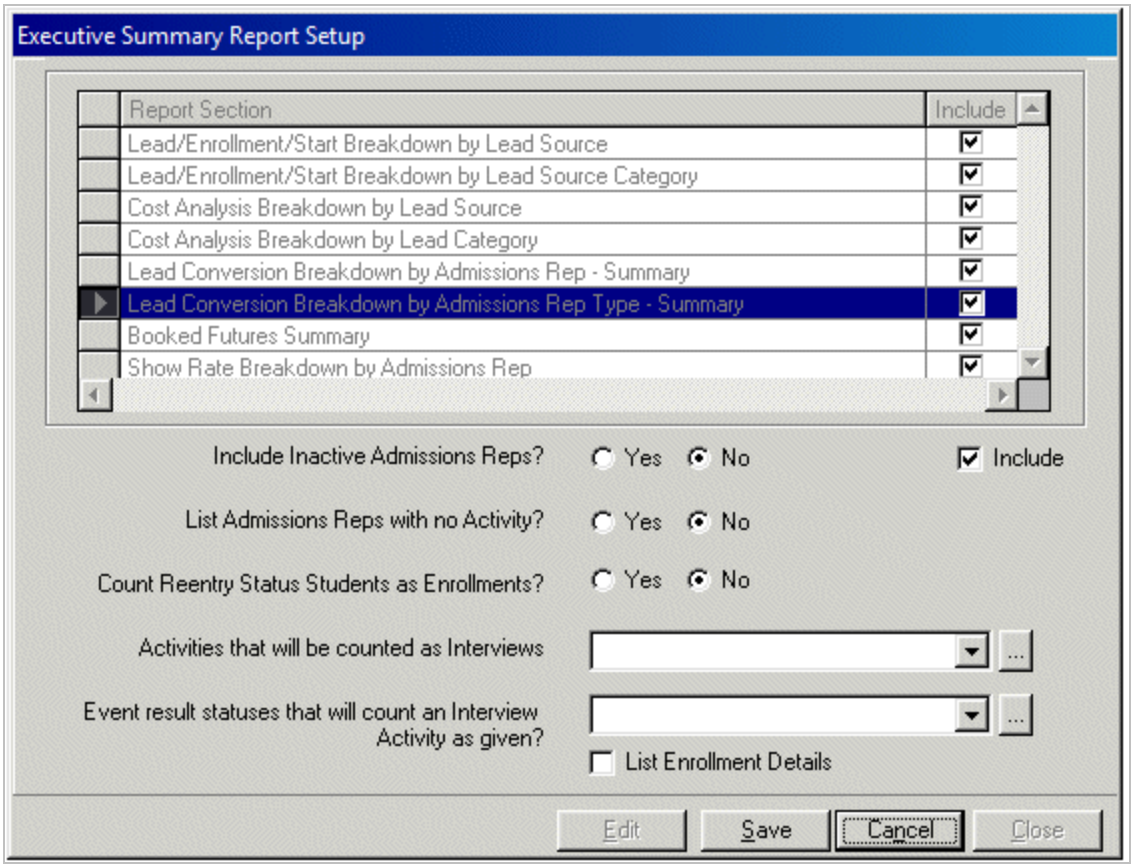
6. Select the **Include** check box if you want this section to be part of the Executive Summary Report.
7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Lead Conversion Breakdown by Admissions Rep Type - Summary

This section of the Executive Summary Report provides the same output as the Lead Conversion Breakdown by Admissions Rep - Summary section, in addition it totals the numbers for each admissions rep type. Similar to lead source categories, admissions rep types are categories for which the admissions reps are categorized.

To set up the Lead Conversion Breakdown by Admissions Rep Type - Summary section:

1. Navigate to **Setup** > **Executive Summary Report**. The Executive Summary Report Setup form is displayed.
2. Select **Lead Conversion Breakdown by Admissions Rep Type - Summary** and click **Edit**.



3. Select **Yes** or **No** to 'Include Inactive Admissions Reps'.

   Select **Yes** or **No** to 'List Admissions Reps with no Activity'.

   Select **Yes** or **No** to 'Count Reentry Status Students as Enrollments'.
4. Use the drop-down lists to select the appropriate statuses for the following fields:

   - Activities that will be counted as Interviews
   - Event result statuses that will count an Interview Activity as given

   To select multiple options, click ... and select the appropriate check boxes.
5. Select **List Enrollment Details** to include the enrollment details in the report.

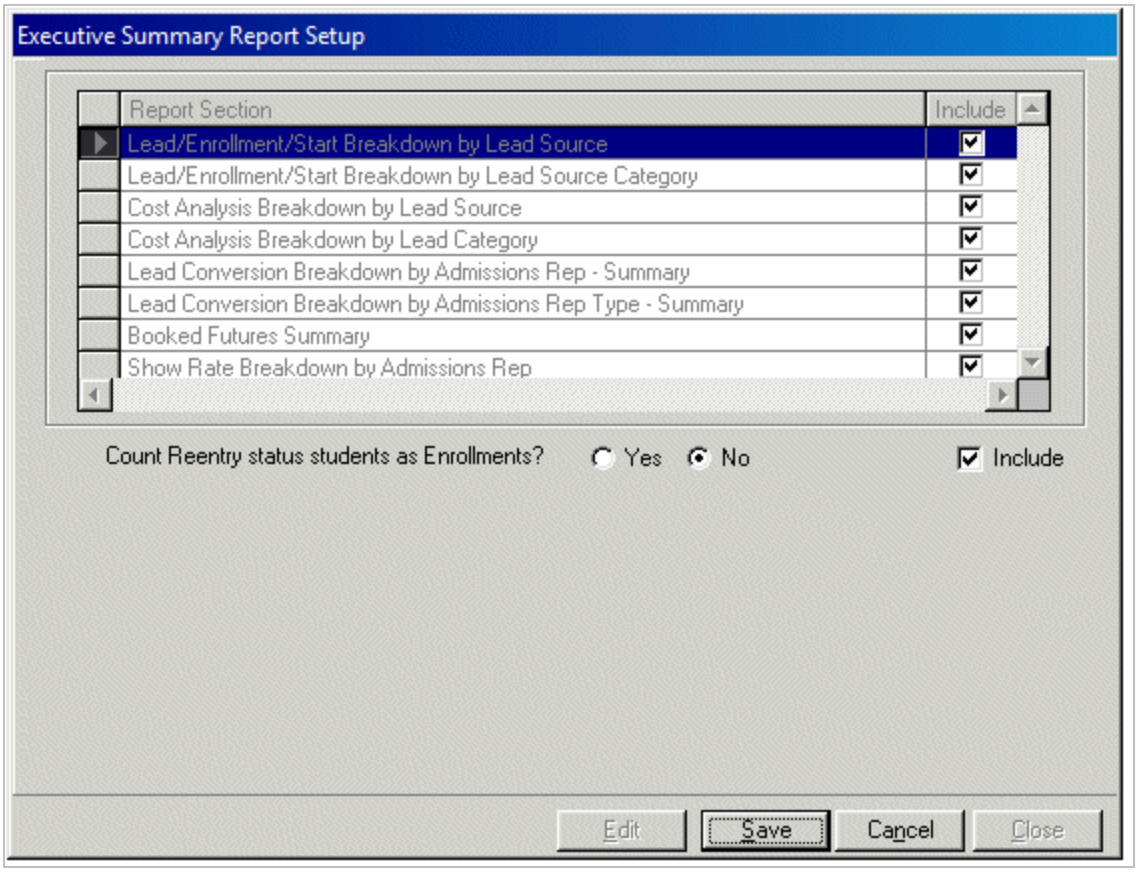
6. Select the **Include** check box if you want this section to be part of the Executive Summary Report.
7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Lead/Enrollment/Start Breakdown by Lead Source

This section of the Executive Summary Report provides a quantitative picture of the effectiveness of each lead source. The report section lists the number of leads, number of enrollments, and number of actual starts for each lead source. Totals for the report date range, month to date, and year to date are computed.

To set up the Lead/Enrollment/Start Breakdown by Lead Source section:

1. Navigate to **Setup** > **Executive Summary Report**. The Executive Summary Report Setup form is displayed.
2. Select **Lead/Enrollment/Start Breakdown by Lead Source** and click **Edit**.



3. Select **Yes** or **No** to 'Count Reentry status students as Enrollments'.
4. Select the **Include** check box if you want this section to be part of the Executive Summary Report.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

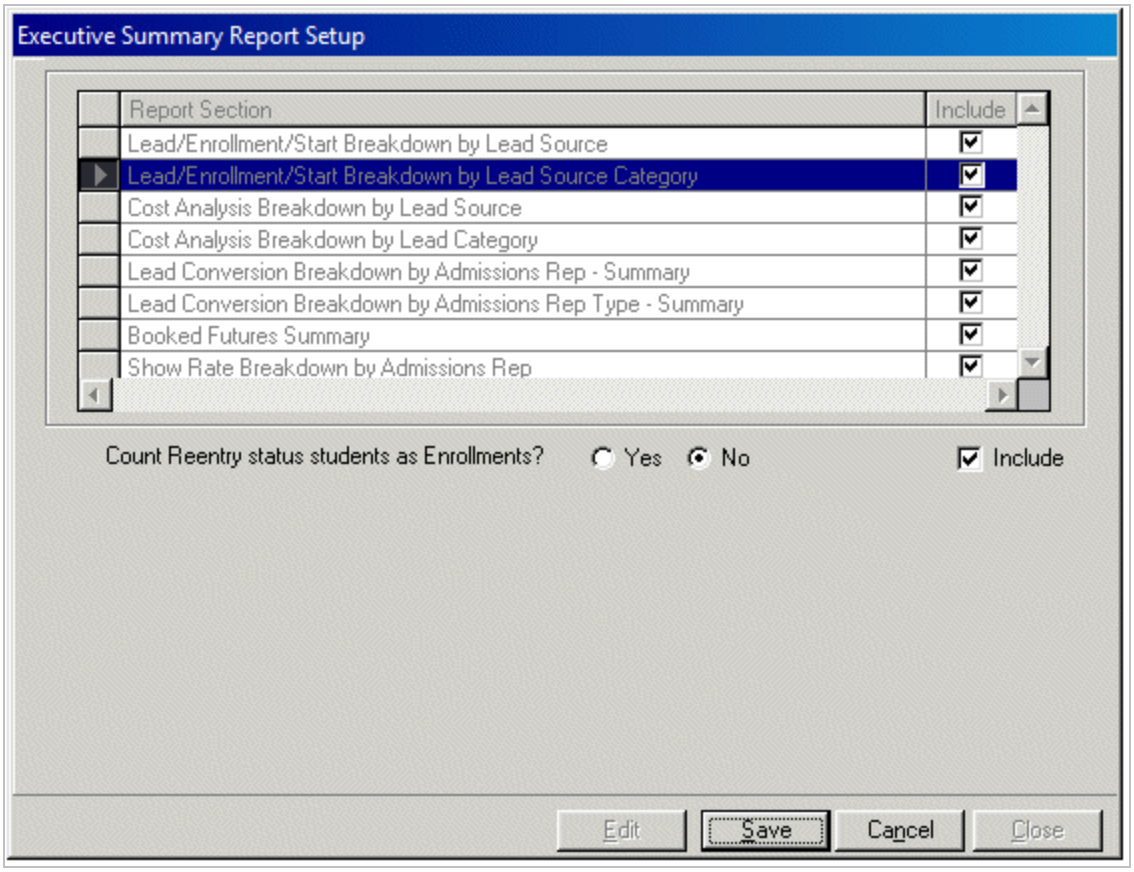
Lead/Enrollment/Start Breakdown by Lead Source Category

This section of the Executive Summary Report provides the same output as the Lead/Enrollment/Start Breakdown by Lead Source section, in addition it lists totals for each lead source category. Multiple lead sources can be categorized into the same category.

For example, a school may advertise on four different radio stations. A lead source would exist for each of the four radio stations for which the school advertises. However, each of those lead sources would have a lead source category of Radio. Data for the four radio station lead sources would be computed and listed on one line in this report.

To set up the Lead/Enrollment/Start Breakdown by Lead Source Category section:

1. Navigate to **Setup** > **Executive Summary Report**. The Executive Summary Report Setup form is displayed.
2. Select **Lead/Enrollment/Start Breakdown by Lead Source Category** and click **Edit**.



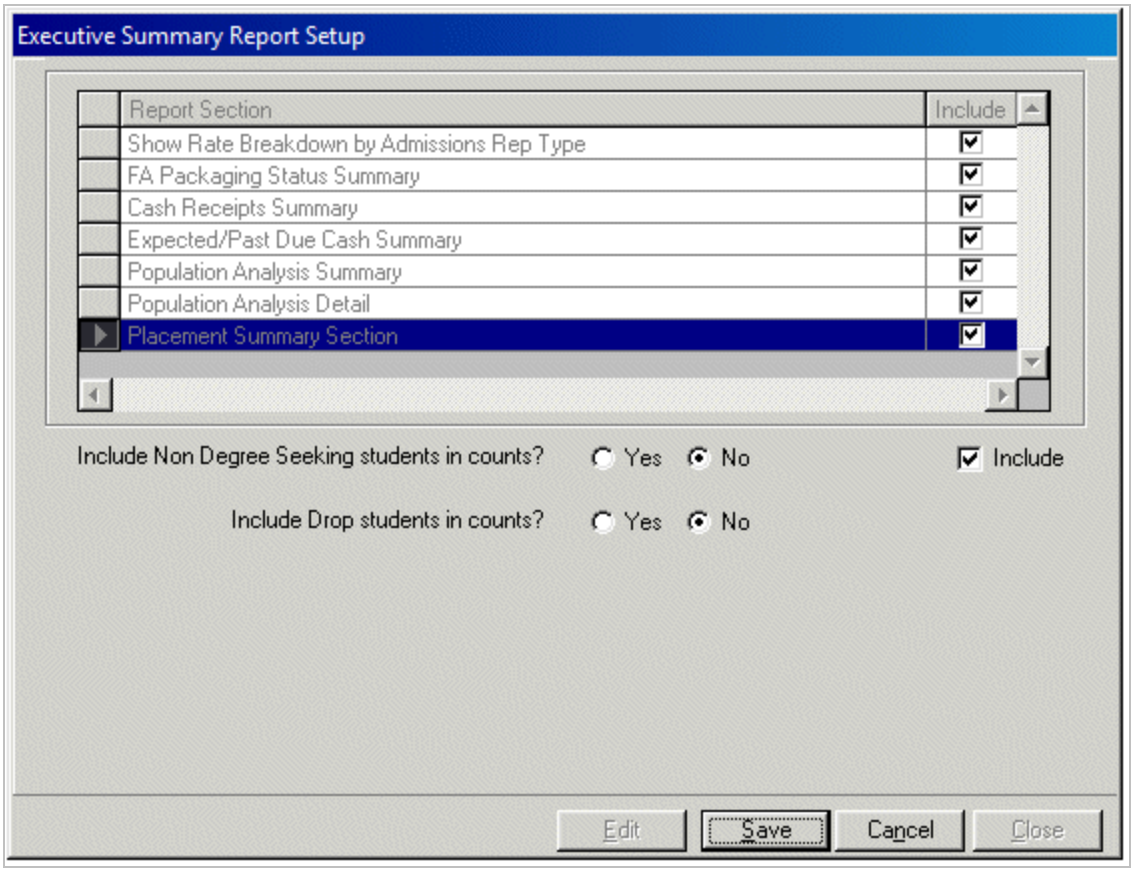
3. Select **Yes** or **No** to 'Count Reentry status students as Enrollments'.
4. Select the **Include** check box if you want this section to be part of the Executive Summary Report.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Placement Summary Section

This section of the Executive Summary Report summarizes data related to placement. The report section lists the number of students who graduated and the number of student that have been placed.

To set up the Placement Summary Section section:

1. Navigate to **Setup** > **Executive Summary Report**. The Executive Summary Report Setup form is displayed.
2. Select **Placement Summary Section** and click **Edit**.



3. Select **Yes** or **No** to 'Include Non Degree Seeking students in counts'.

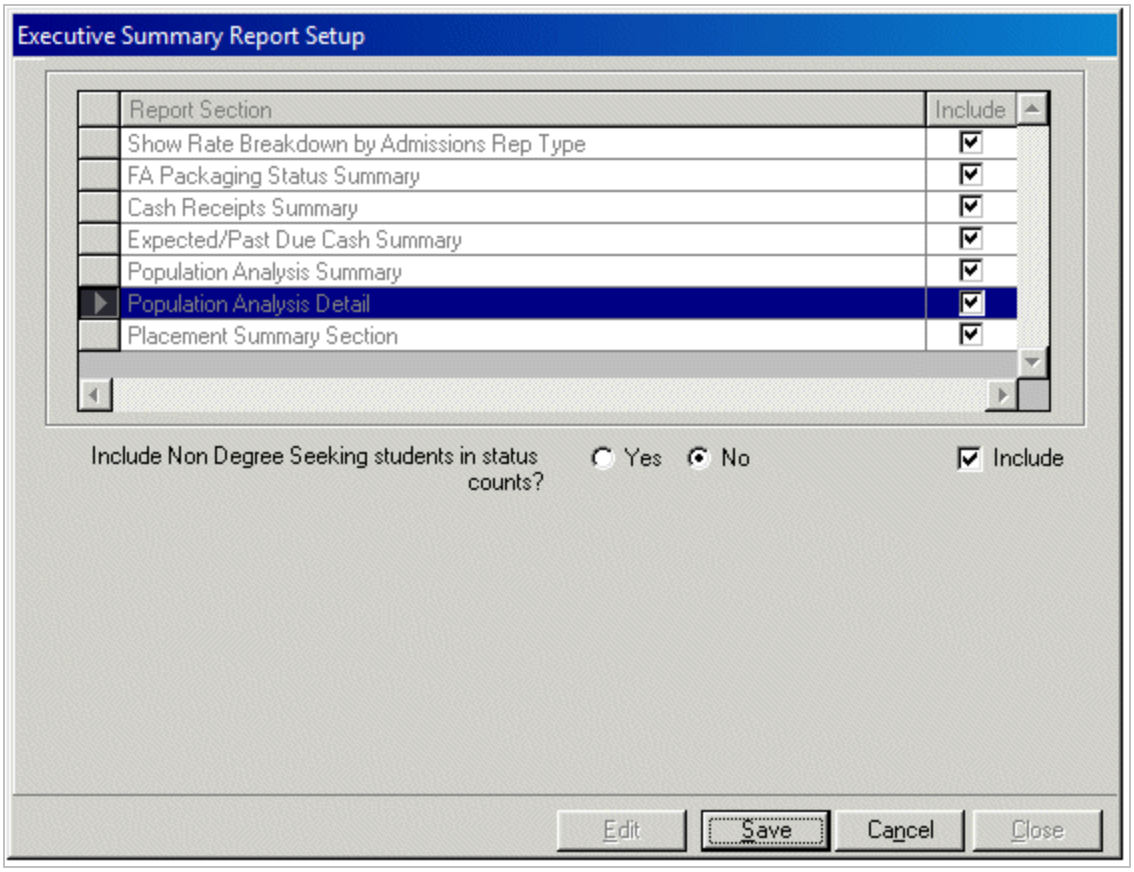
   Select **Yes** or **No** to 'Include Drop students in counts'.
4. Select the **Include** check box if you want this section to be part of the Executive Summary Report.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Population Analysis Detail

This section of the Executive Summary Report shows the student population detail counts.

To set up the Population Analysis Detail section:

1. Navigate to **Setup** > **Executive Summary Report**. The Executive Summary Report Setup form is displayed.
2. Select **Population Analysis Detail** and click **Edit**.



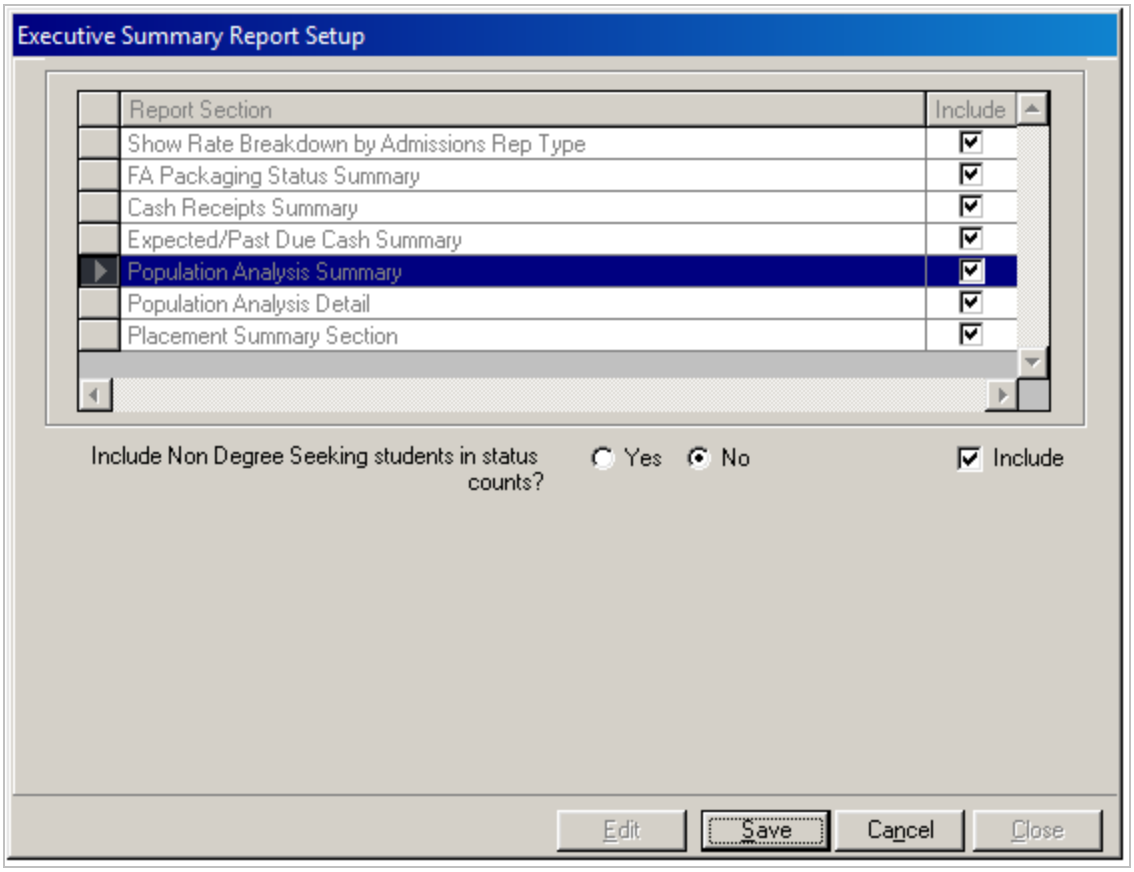
3. Select **Yes** or **No** to 'Include Non Degree Seeking students in status counts'.
4. Select the **Include** check box if you want this section to be part of the Executive Summary Report.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Population Analysis Summary

This section of the Executive Summary Report shows a summary of the school's student population. Key data elements are number of new starts, number of drops, number of grads, and current in school population. A school's retention rate can be calculated from this section of the report.

To set up the Population Analysis Summary section:

1. Navigate to **Setup** > **Executive Summary Report**. The Executive Summary Report Setup form is displayed.
2. Select **Population Analysis Summary** and click **Edit**.



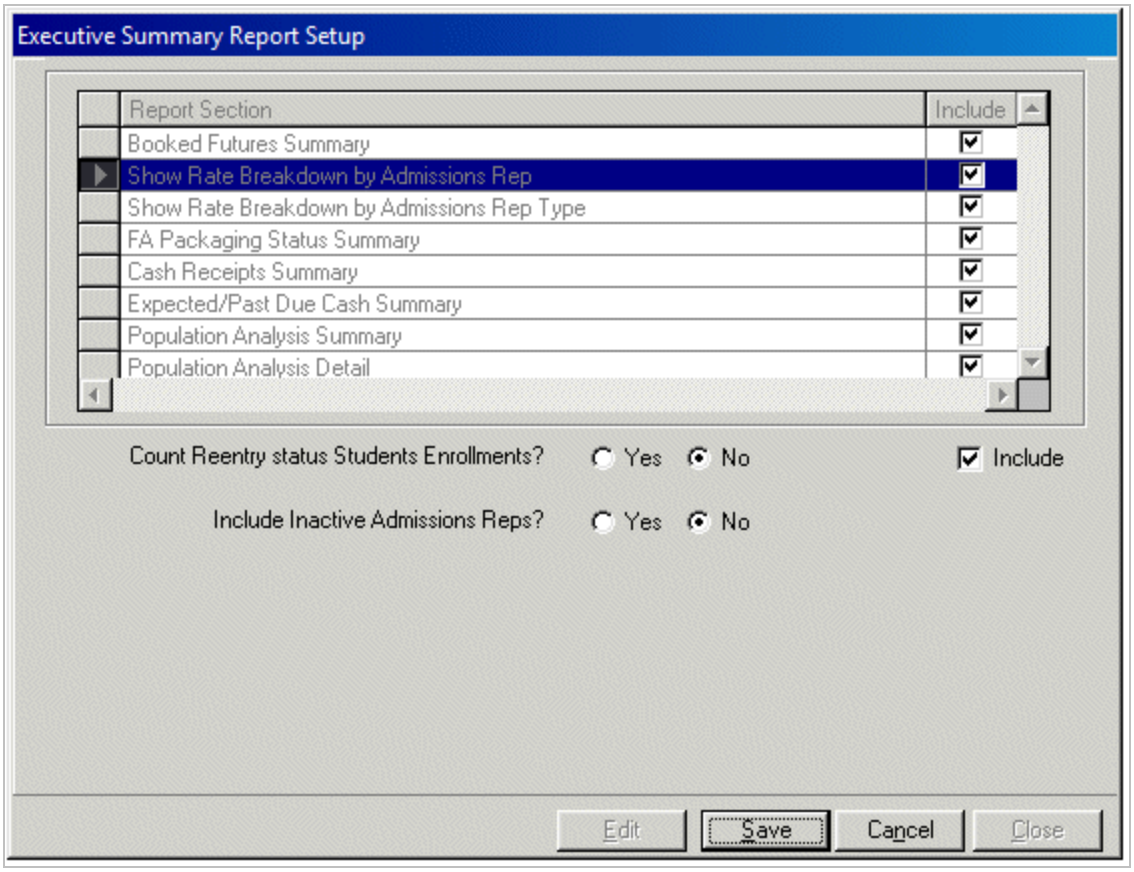
3. Select **Yes** or **No** to 'Include Non Degree Seeking students in status counts'.
4. Select the **Include** check box if you want this section to be part of the Executive Summary Report.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Show Rate Breakdown by Admissions Rep

This section of the Executive Summary Report shows how many students scheduled to start showed up at the school. Totals are listed for each admissions rep. This section identifies reps who can be effective in enrolling students but are not effective in getting the students to actually start school.

To set up the Show Rate Breakdown by Admissions Rep section:

1. Navigate to **Setup** > **Executive Summary Report**. The Executive Summary Report Setup form is displayed.
2. Select **Show Rate Breakdown by Admissions Rep** and click **Edit**.



3. Select **Yes** or **No** to 'Count Reentry status Student Enrollments'.

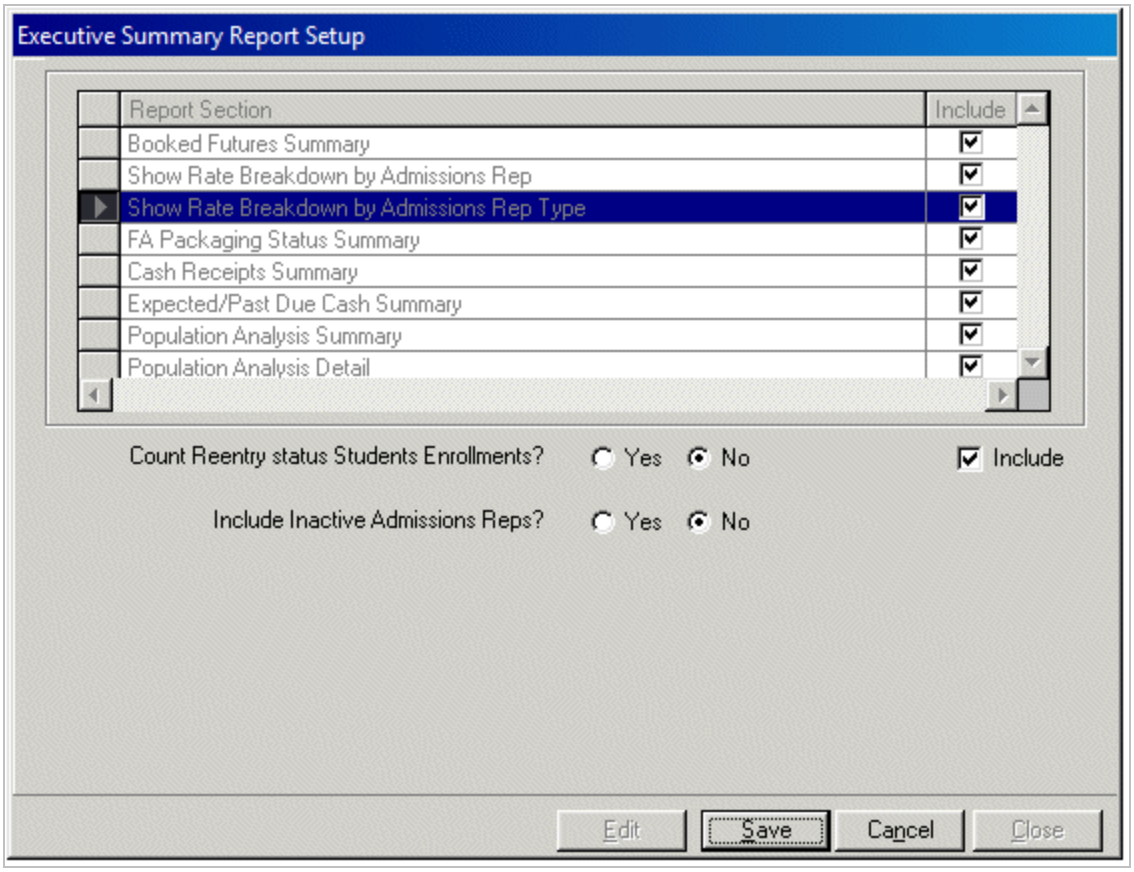
   Select **Yes** or **No** to 'Include Inactive Admissions Reps'.
4. Select the **Include** check box if you want this section to be part of the Executive Summary Report.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Show Rate Breakdown by Admissions Rep Type

This section of the Executive Summary Report provides the same output as the Show Rate breakdown by Admissions Rep section, in addition it totals the numbers for each admissions rep type.

To set up the Show Rate Breakdown by Admissions Rep Type section:

1. Navigate to **Setup** > **Executive Summary Report**. The Executive Summary Report Setup form is displayed.
2. Select **Show Rate Breakdown by Admissions Rep Type** and click **Edit**.



3. Select **Yes** or **No** to 'Count Reentry status Student Enrollments'.

   Select **Yes** or **No** to 'Include Inactive Admissions Reps'.
4. Select the **Include** check box if you want this section to be part of the Executive Summary Report.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Contact Manager Reports

Navigate to **Reports > Contact Manager** to access the following Contact Manager reports:

- Activity Detail
- Do Not Call List
- Do Not Call List (No Phone Number)
- Document Tracking Report
- FERPA Opt-Out Listing
- Incident Details
- Outstanding Transcript Requests
- Permit Document Tracking
- Scan Cover Sheet
- Staff Listing
- Student Activities
- Activity Analysis (cube report)

Navigate to **Reports > Contact Manager > International** to access the following reports for international students:

- Document Tracking
- Enrollment Status Comparison
- Master Student Listing Detail
- Master Student Listing Summary
- SEVIS Export Report
- SEVIS Import Report
- Student Report
- Students with Dependents
- Demographics (cube report)

Note: The System Administrator must set up security rights to view, print, or export reports. Staff members and staff groups must be given security rights to view, print, and/or export reports. This does not apply to custom reports.

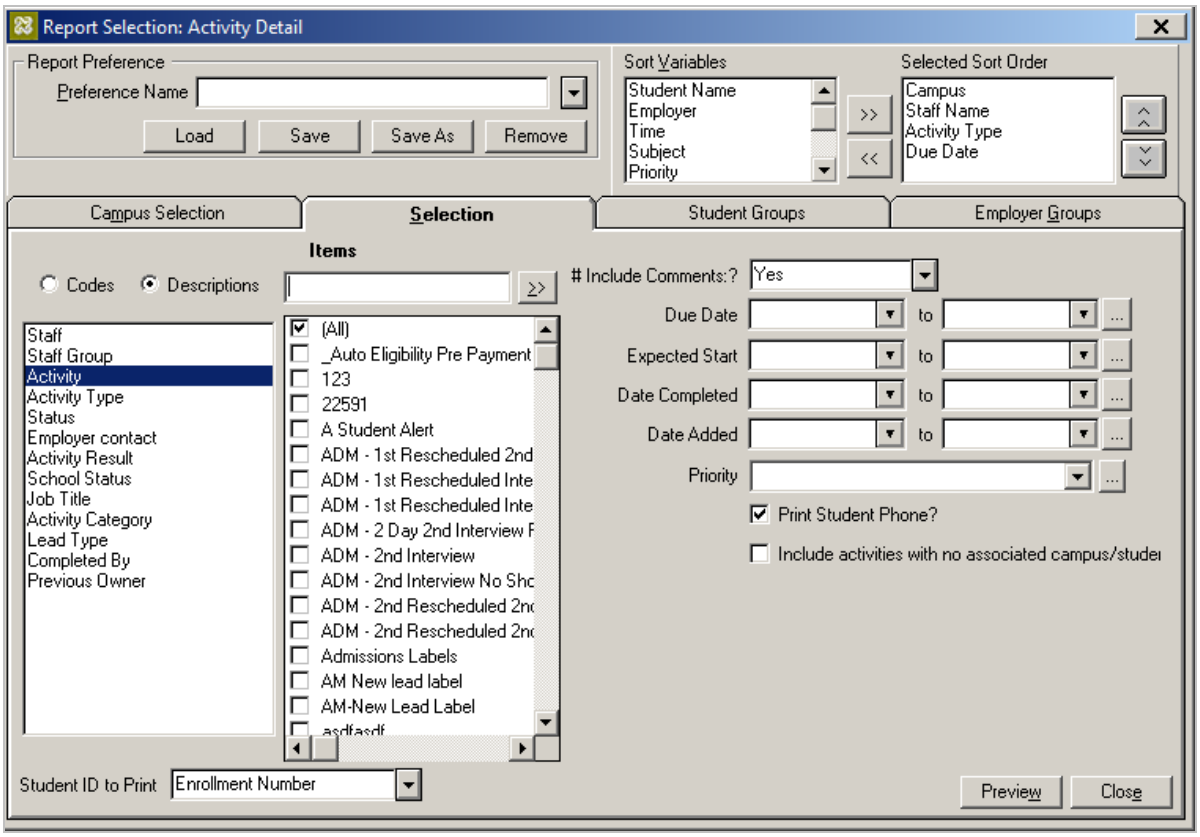
Activity Detail

This report lists details of Contact Manager activities. Associations between activities and activity categories may also appear on this report. For additional information on setting up associations between activities and their categories, see Activity Categories.

Note: If the activity involves sorting by lead type, CampusNexus Student filters results based on lead sources mapped to students in the SyStudent table.

To run the report:

1. Navigate to **Reports > Contact Manager > Activity Detail**. The Report Selection: Activity Detail form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

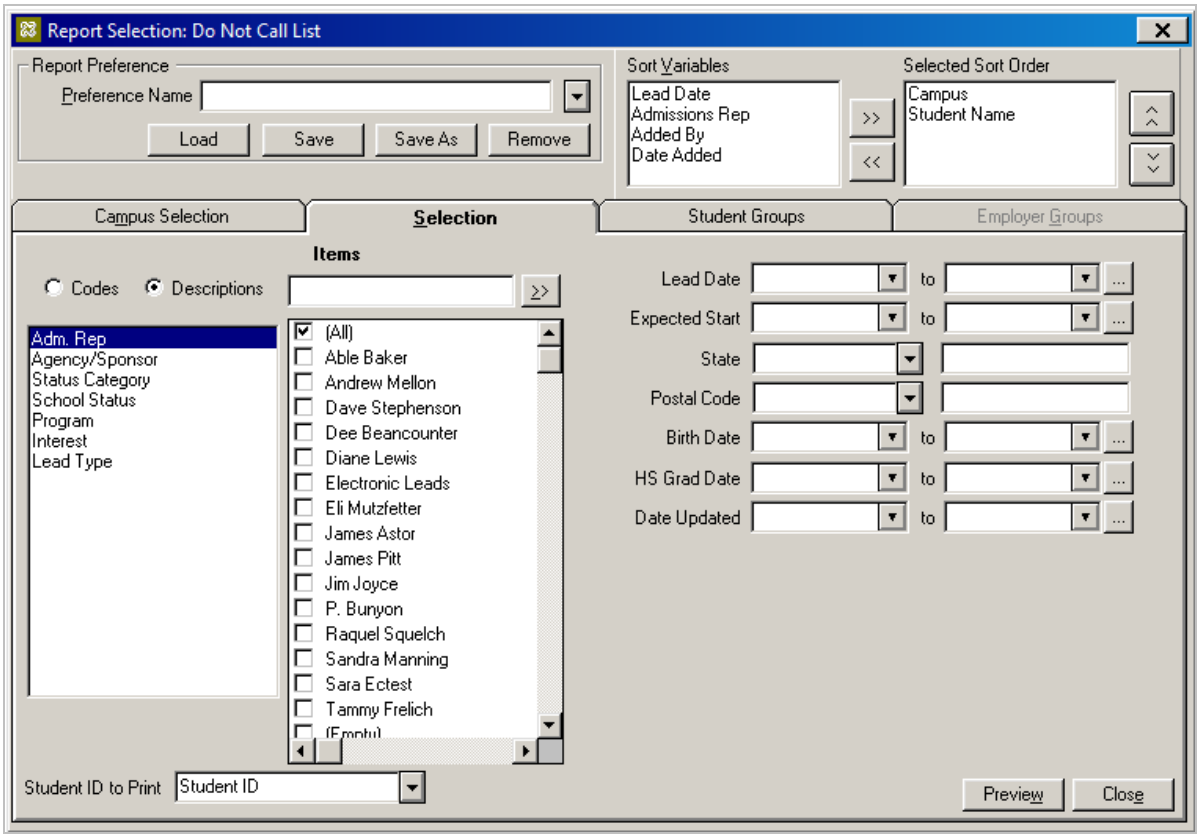
Campus Management Page 6 of 22

Do Not Call List

This report lists all students whose phone numbers were matched and updated by the CampusNexus Student Do Not Call (DNC) Update process (see Updating Phone Numbers). For information about the rules that determine whether phone numbers are displayed or masked in the report, refer to Masking of Phone Numbers.

To run the report:

1. Navigate to **Reports > Contact Manager > Do Not Call List**. The Report Selection: Do Not Call List form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

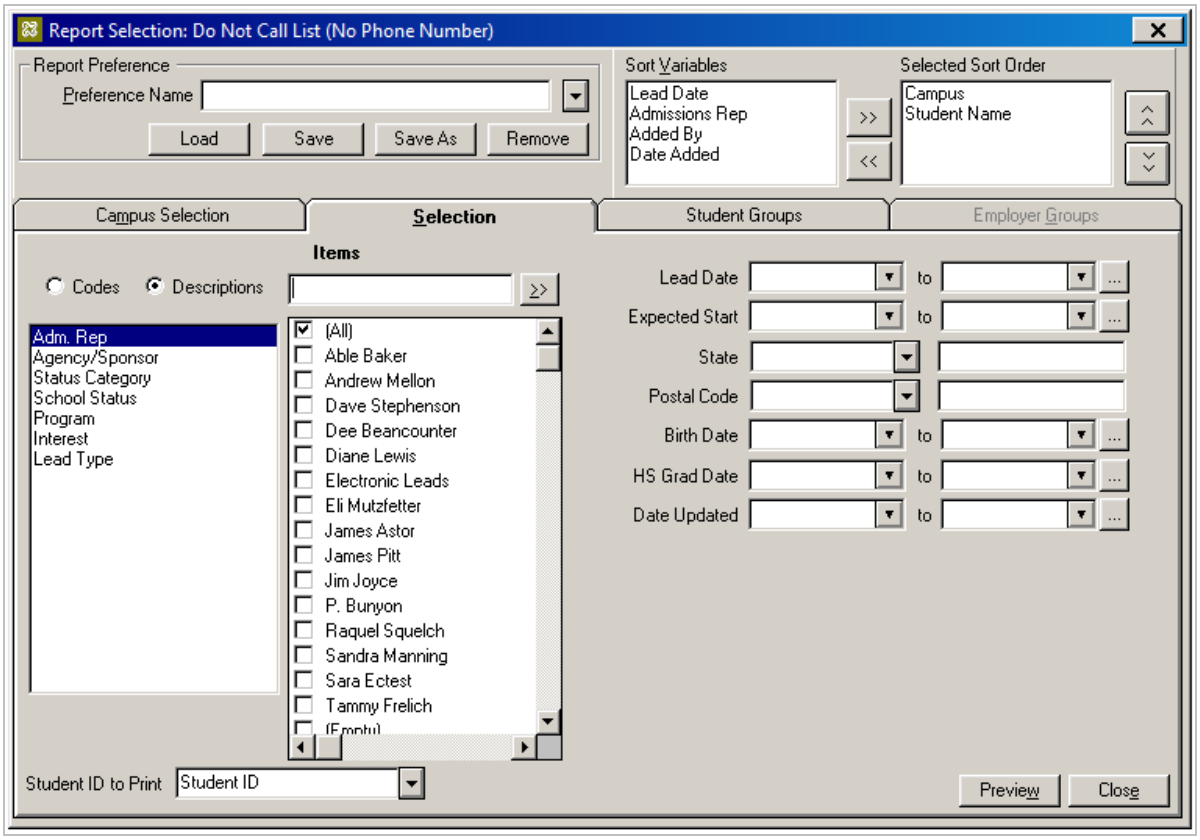
5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

Do Not Call List (No Phone Number)

This report lists all students whose phone numbers were matched and updated by the CampusNexus Student Do Not Call (DNC) Update process (see Updating Phone Numbers), however, the phone numbers are masked in the report. For information about the rules that determine whether phone numbers are displayed or masked in the report, refer to Masking of Phone Numbers.

To run the report:

1. Navigate to **Reports > Contact Manager > Do Not Call List (No Phone Number)**. The Report Selection: Do Not Call List (No Phone Number) form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

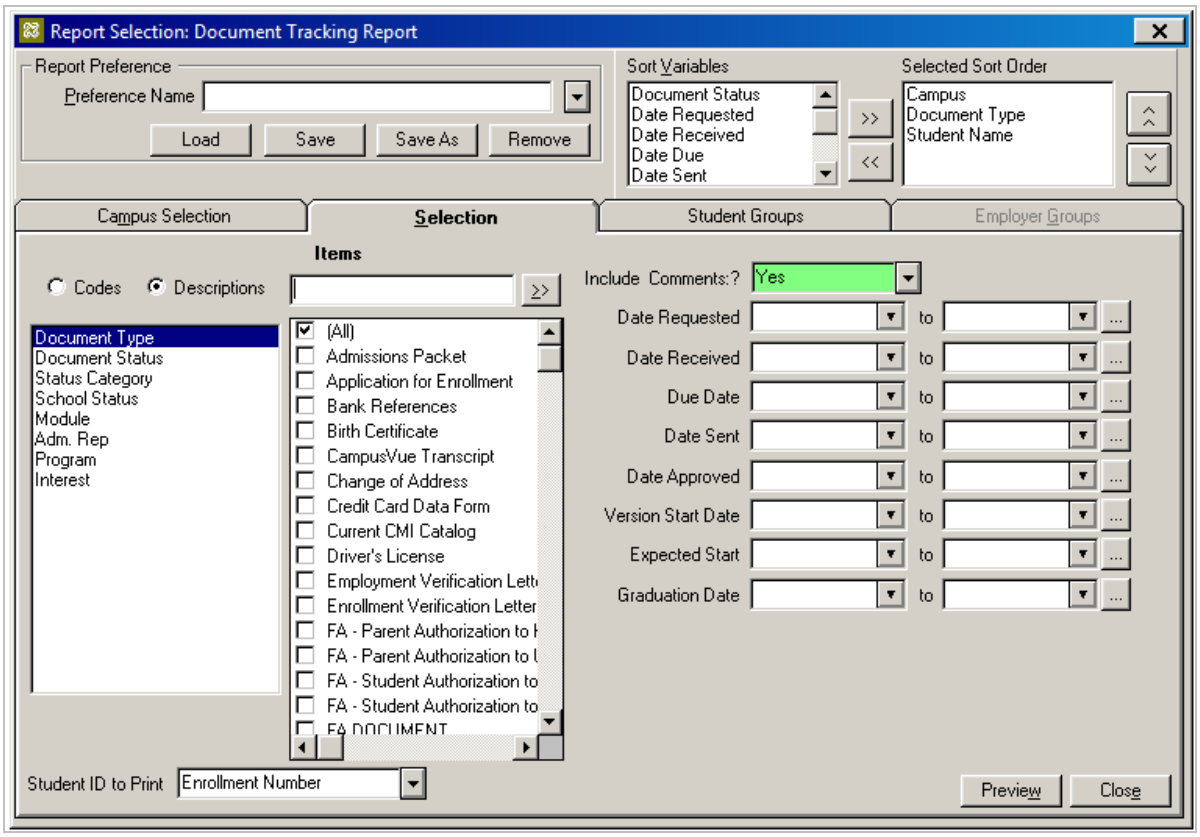
Document Tracking Report

This report lists documents and shows the status of documents for selected campuses, types of documents, and students. The report is applicable in all departments where student-related documents are tracked.

The report uses the Start Date in the student master file only when a record does not exist for the student in the enrollment table. If an enrollment record exists, the report uses the Expected Start Date.

To run the report:

1. Navigate to **Reports > Contact Manager > Document Tracking Report**. The Report Selection: Document Tracking Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

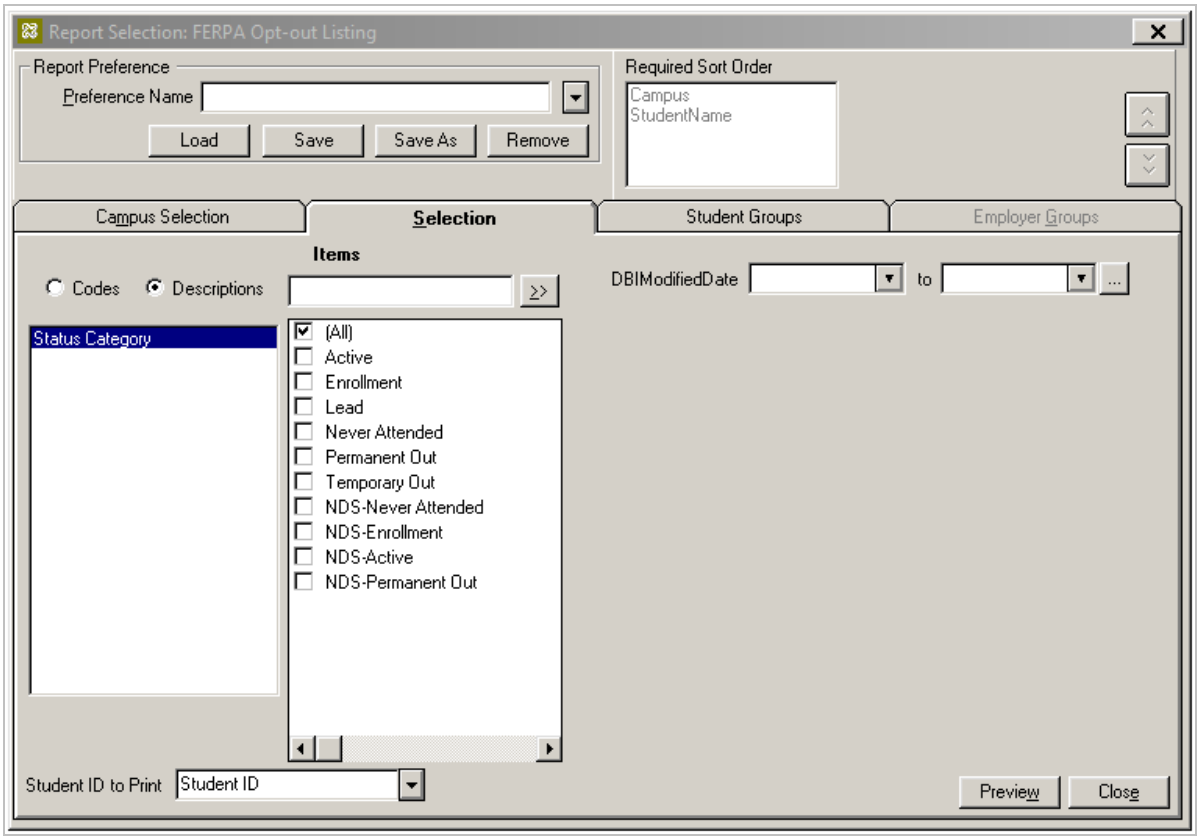
FERPA Opt-out Listing

This report lists the students who elected to block the release of FERPA directory information.

To run the report:

1. Navigate to **Reports > Contact Manager > FERPA Opt-out Listing**. The Report Selection: FERPA Opt-out Listing form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.
5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report contains the campus, student's name, school status, student ID, Data Block Indicator (DBI) status

(Yes/No), and date when the DBI was last modified.

Incident Details

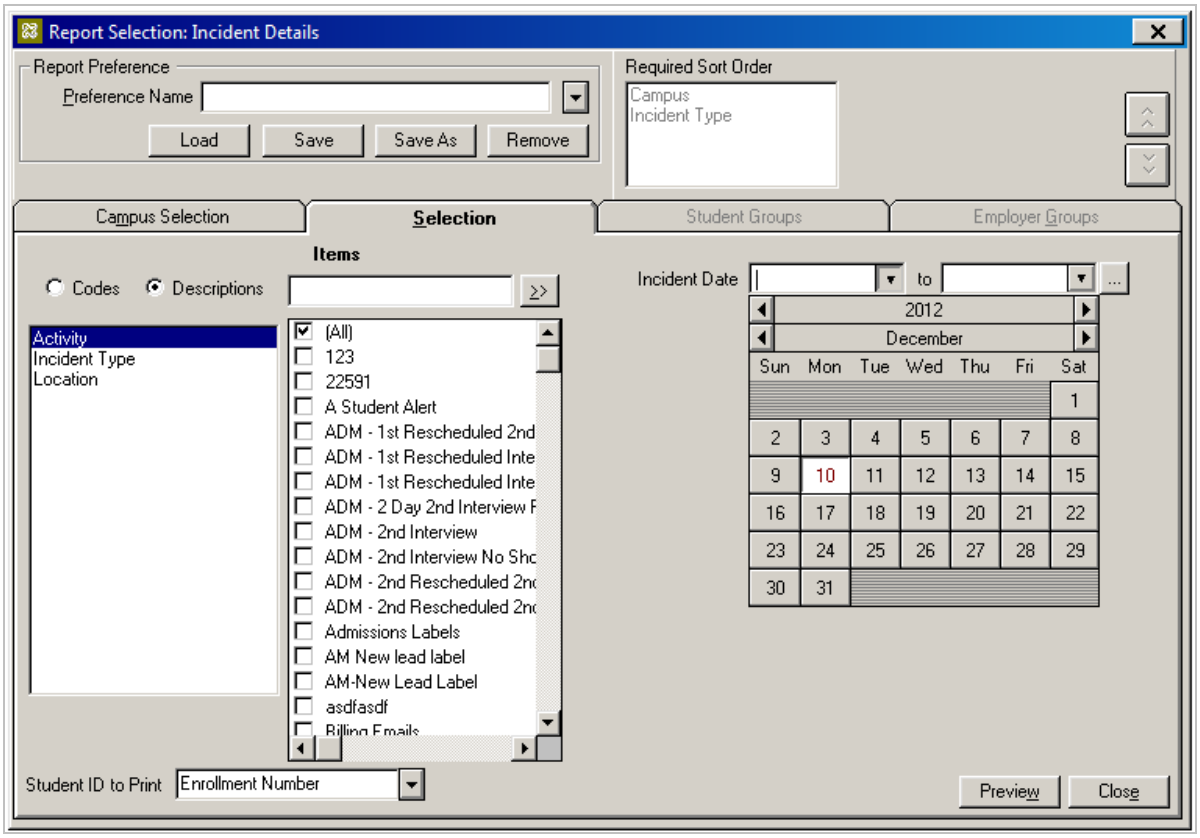
The Incident Details report records and summarizes incident information. The incidents are grouped by campus and incident type. Additionally, the report displays the following information:

- sub totals of all incidents reported for each location (On Campus, Non-Campus Property, Public Property);
- total number of incidents reported for each incident type at each location, and
- total number of incidents reported at each building or room for On Campus Incidents.

The report displays a count of one (1) for each incident reported, regardless of the number of students involved in the incident. Sub-reports display the incident details.

To run the report:

1. Navigate to **Reports > Contact Manager > Incident Details**. The Report Selection: Incident Details form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The following is an example of the report, followed by the associated details.

Campus	Williams Hall	12/10/2004	1	0	0	Incident Report

Incident Descrip: Peabody was found in possession of another student's wallet.

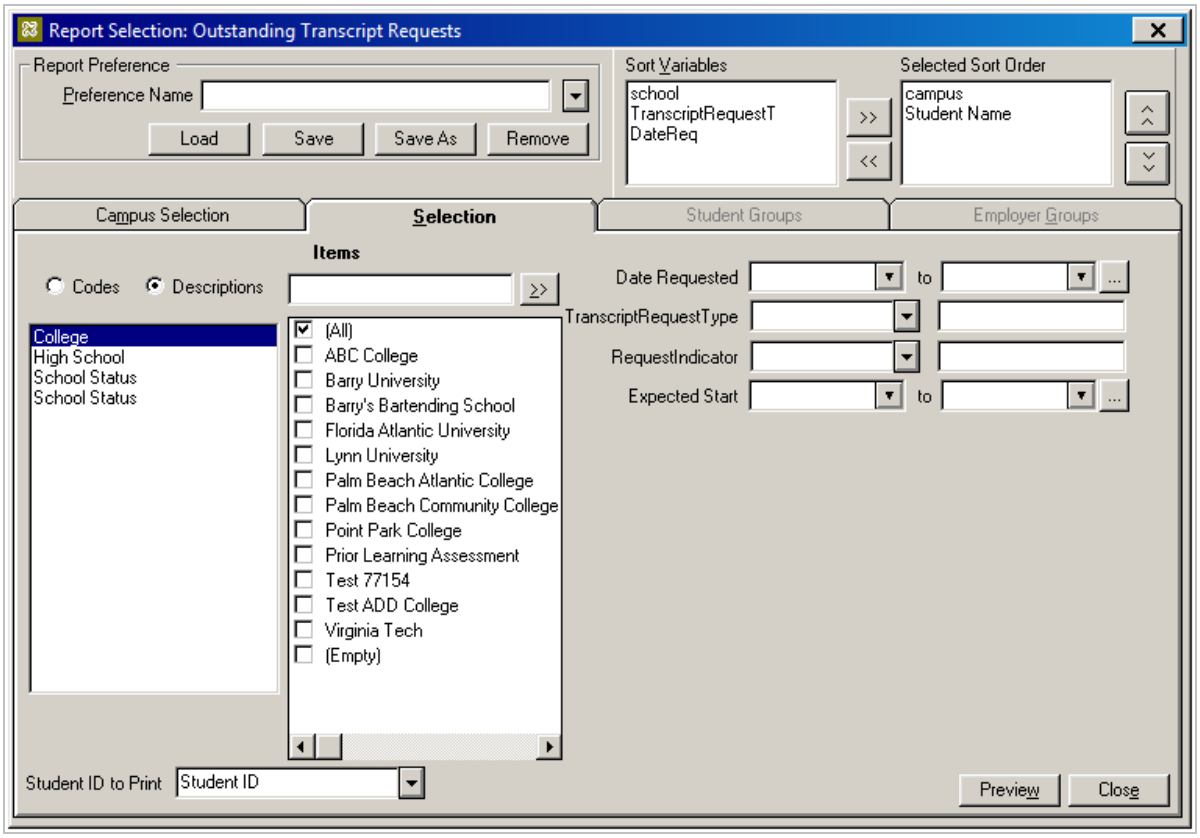
Student Name	SSN	School Status	LDA
Snacker, Peabody	264-56-8099	Attending	5/18/2001

Outstanding Transcript Requests

This report is used to process and track academic transcript requests that your institution has made to other institutions.

To run the report:

1. Navigate to **Reports > Contact Manager > Outstanding Transcript Requests**. The Report Selection: Outstanding Transcript Requests form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the campus, college/high school, request number, request date, expected start date, school

status, and status category.

Permit Document Tracking

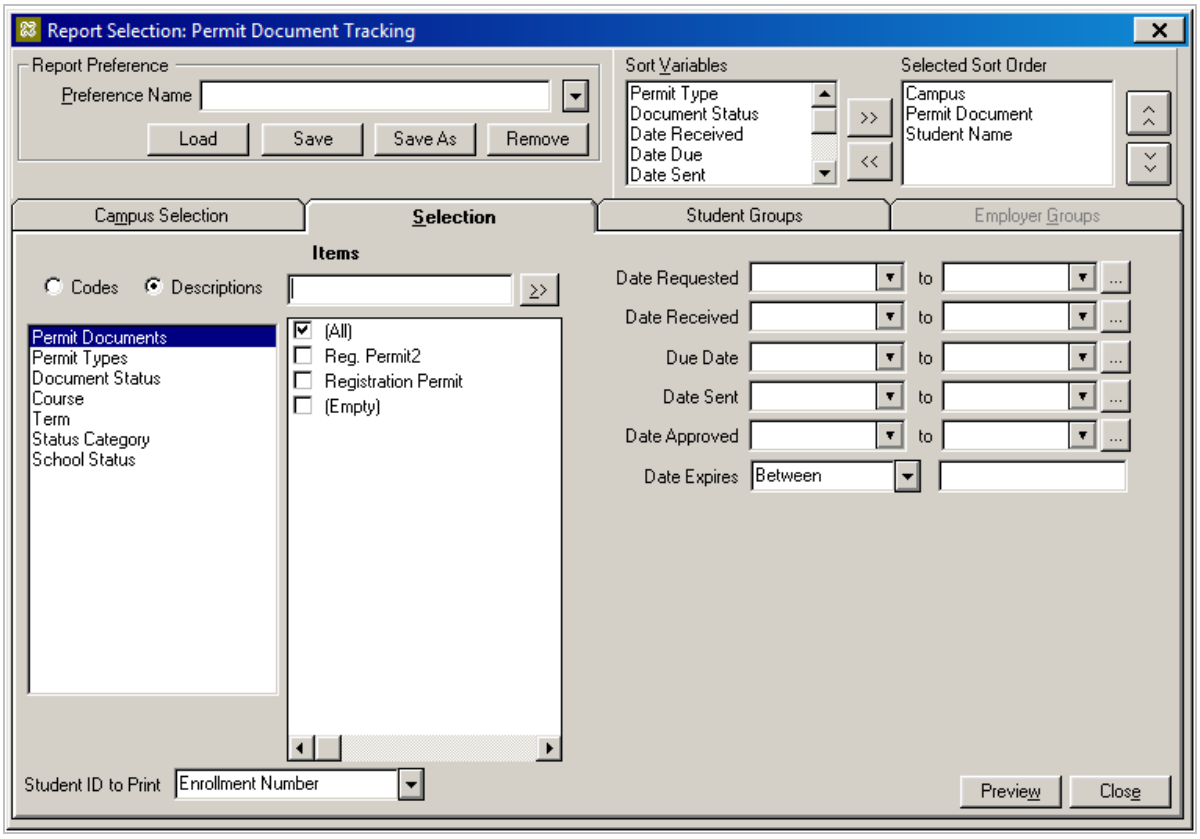
This report is based on the current Document Tracking Report.

The Section information (suppressed when no data) includes:

- Term
- Course
- Section
- Description
- Instructor

To run the report:

1. Navigate to **Reports > Contact Manager > Permit Document Tracking**. The Report Selection: Permit Document Tracking form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

- Student Name
- Student ID
- Campus
- Permit Document Description and Code
- Permit Types (one per line)
- Document Status
- Comments
- Date Requested
- Date Received
- Date Approved
- Date Expires
- Courses and Terms (list, one per line)

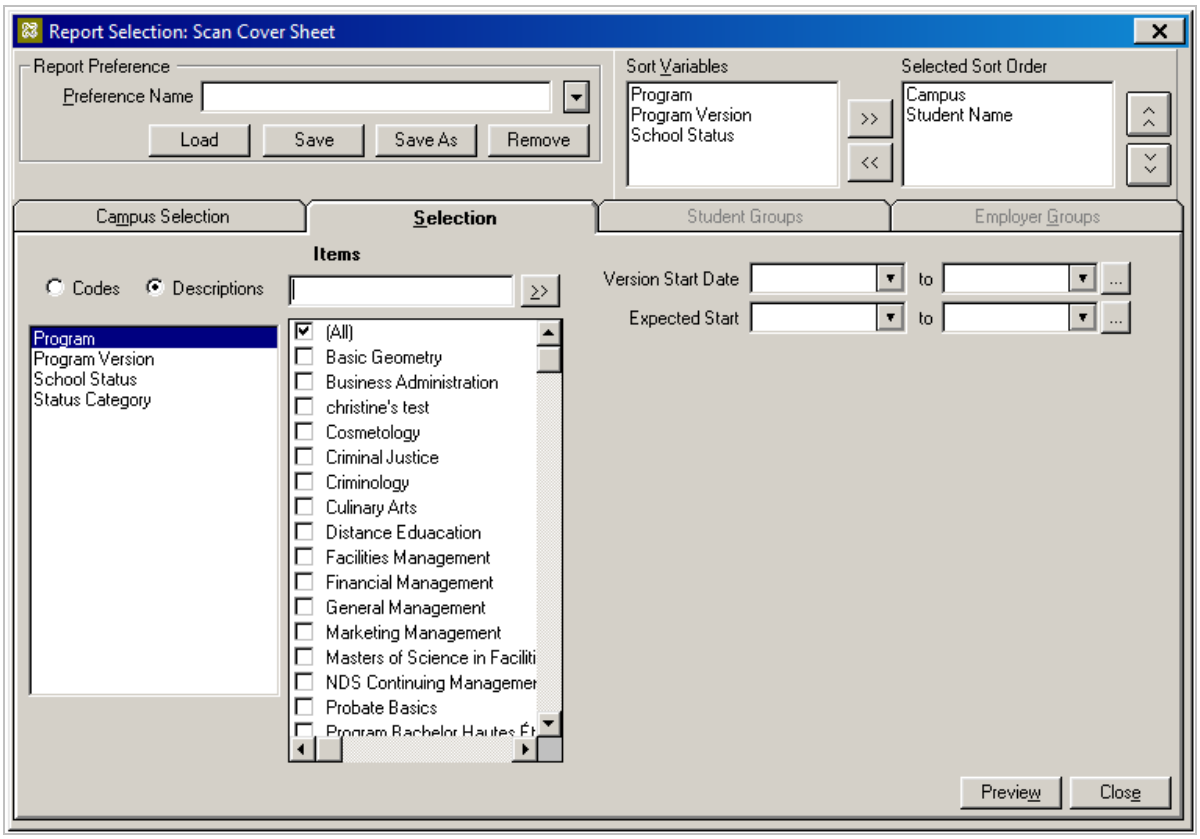
The report uses two groups which contain group (student) counts. The report totals students in the footer.

Scan Cover Sheet

The Scan Cover Sheet report is a valuable tool for any ImageNow campus because the cover sheets can be printed all at once. If more than one school status is selected for the report, a scan cover sheet is printed for each school status selected.

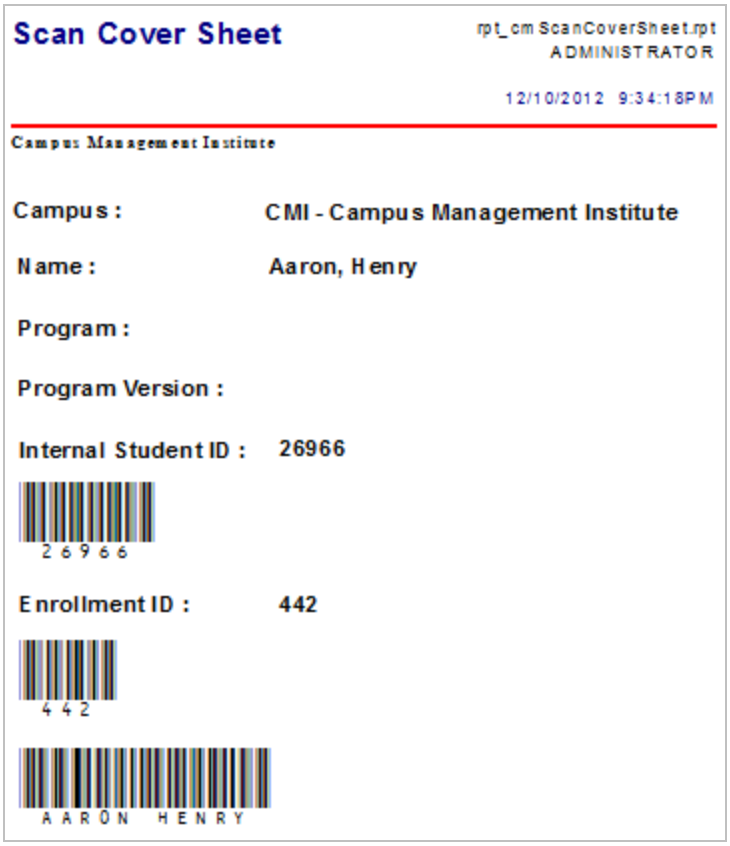
To run the report:

1. Navigate to **Reports > Contact Manager > Scan Cover Sheet**. The Report Selection: Scan Cover Sheet form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



Note: The Student Groups tab is disabled to prevent unwanted Scan Cover Sheets to be printed for students with multiple enrollments such as Cancelled or Dropped if run by student group. This could lead to confusion and/or documents being attached to the wrong enrollment.

4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

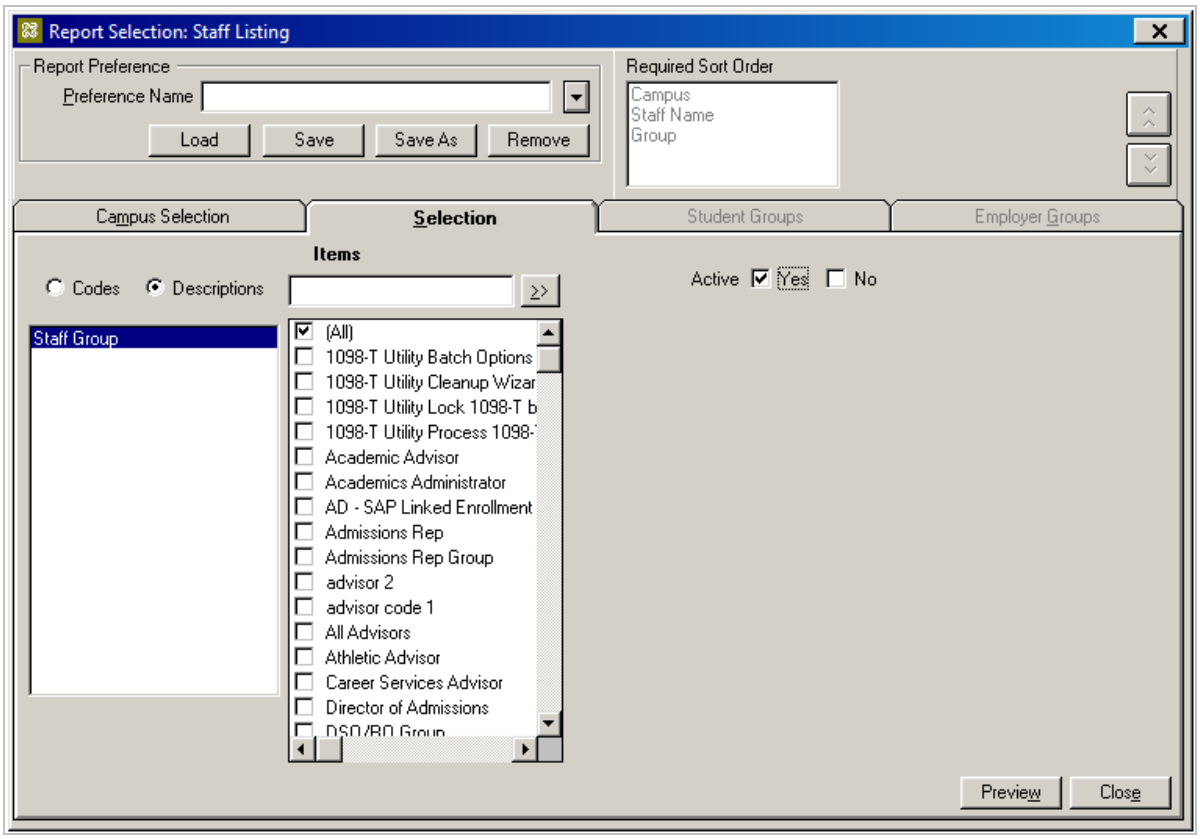


Staff Listing

This report lists staff members for a selected campus or all campuses. For each staff member listed, demographic data from the Staff Member Setup form is displayed. Staff groups to which each staff member belongs are also listed.

To run the report:

1. Navigate to **Reports > Contact Manager > Staff Listing**. The Report Selection: Staff Listing form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

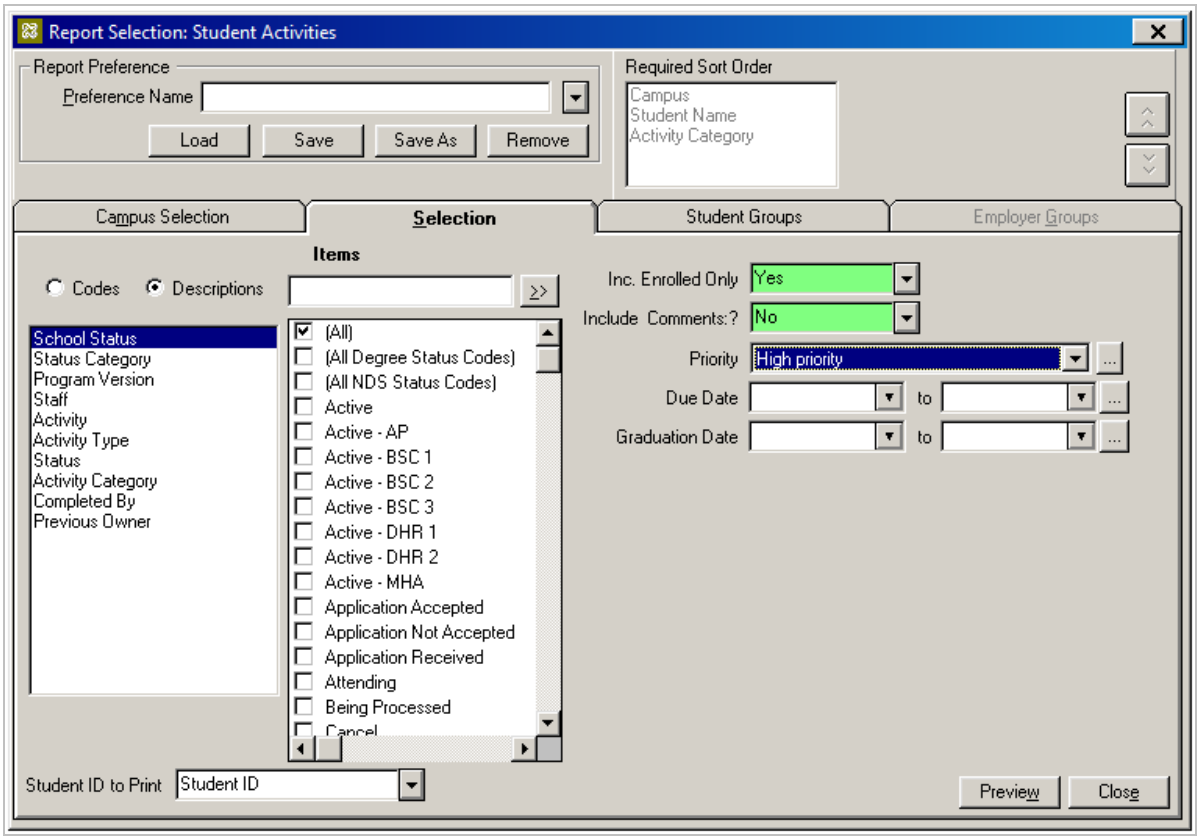
Student Activities

The Student Activities report lists activities by students based on your selection criteria. The report may also display associations between activities and activity categories. For additional information on setting up associations between activities and their categories, see Activity Categories.

To run the report:

1. Navigate to **Reports > Contact Manager > Student Activities**. The Report Selection: Student Activities form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report header lists the student name and address, campus, degree, status in school, and graduation date.

   For each activity, the body of the report shows the due date, activity description, activity category, status, result,

completed by, date completed, contact person (staff member assigned), and comments.

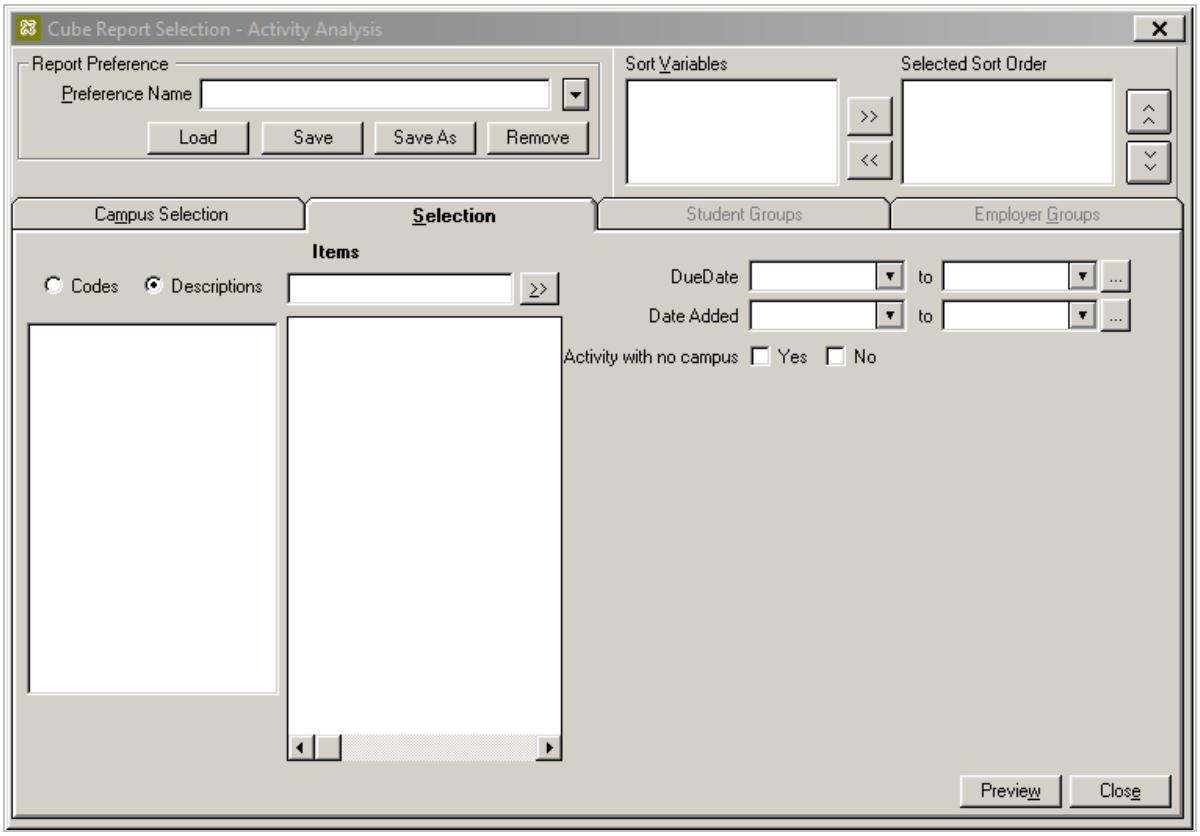
Activity Analysis

This cube report is a tool for the analysis of Contact Manager activities. Associations between activities and activity categories may also appear on this report. For additional information on setting up associations between activities and their categories see Activity Categories.

To run the report:

1. Navigate to **Reports > Contact Manager > Activity Analysis**. The Cube Report Selection: Activity Analysis form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



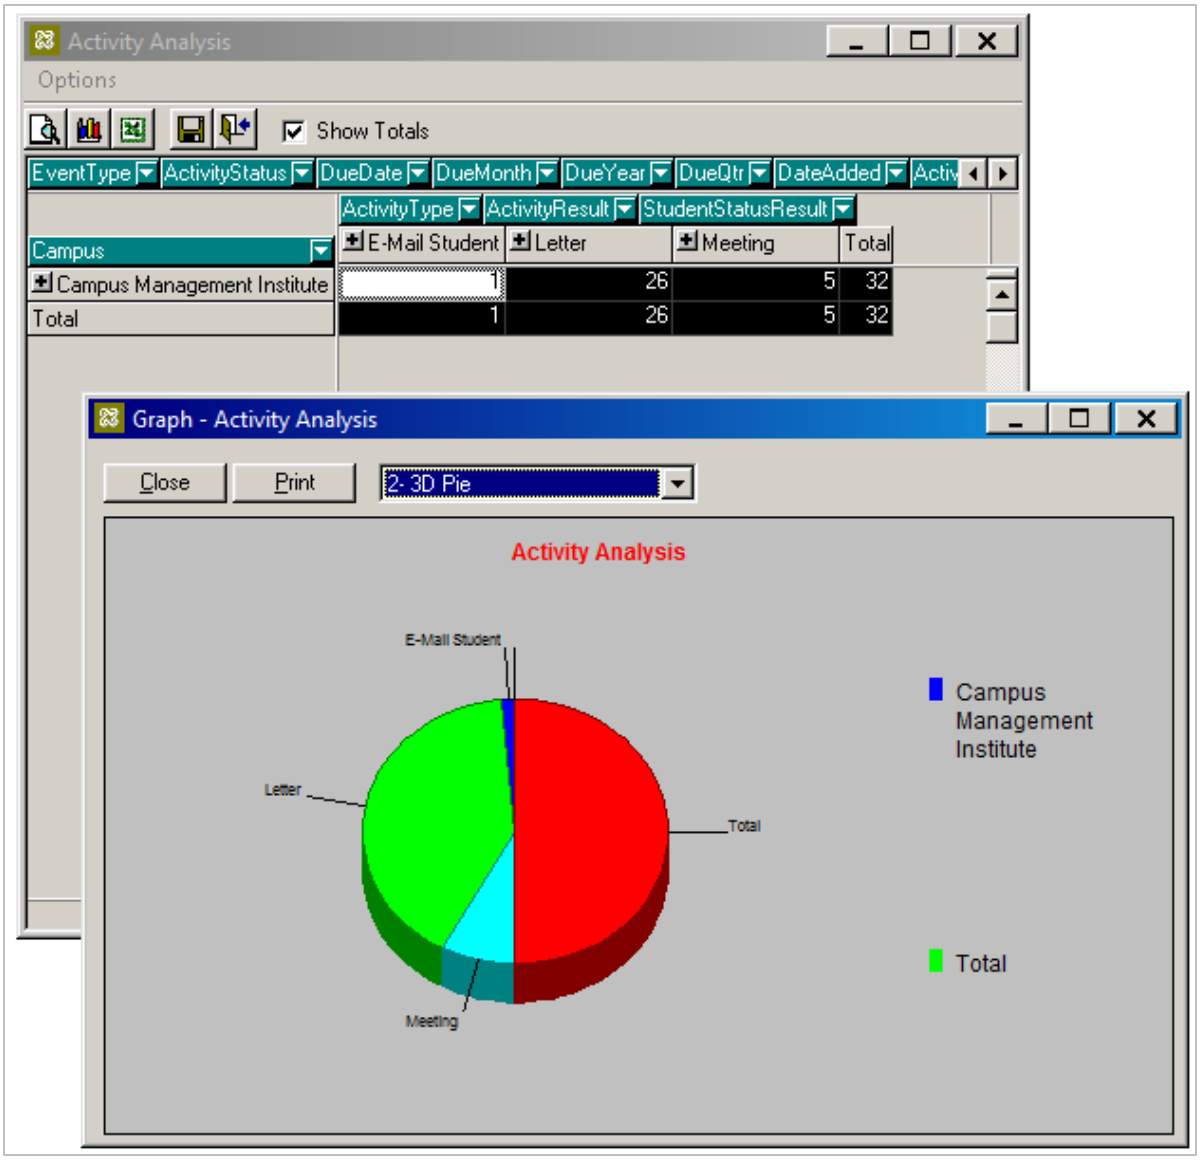
4. Click **Preview**. The cube report is assembled and displayed.

   The following variables are available for use in this cube report:

   - Event Type
   - Activity Status
   - Due Date
   - Due Month
   - Due Year
   - Due Quarter
   - Date Added
   - Activity Status Date

- Activity Category
- Completed By
- Previous Owner
- Activity Type
- Activity Result
- Student Status Result
- Campus

Drag the variables to the vertical or horizontal axes as needed to get the cross-tabulated spreads. The cube is initialized with Campus as the Y axis (rows) and Activity Type, Activity Result, and Student Status result as the X axis (columns).



Contact Manager Reports

Navigate to **Reports > Contact Manager** to access the following Contact Manager reports:

- Activity Detail
- Do Not Call List
- Do Not Call List (No Phone Number)
- Document Tracking Report
- FERPA Opt-Out Listing
- Incident Details
- Outstanding Transcript Requests
- Permit Document Tracking
- Scan Cover Sheet
- Staff Listing
- Student Activities
- Activity Analysis (cube report)

Navigate to **Reports > Contact Manager > International** to access the following reports for international students:

- Document Tracking
- Enrollment Status Comparison
- Master Student Listing Detail
- Master Student Listing Summary
- SEVIS Export Report
- SEVIS Import Report
- Student Report
- Students with Dependents
- Demographics (cube report)

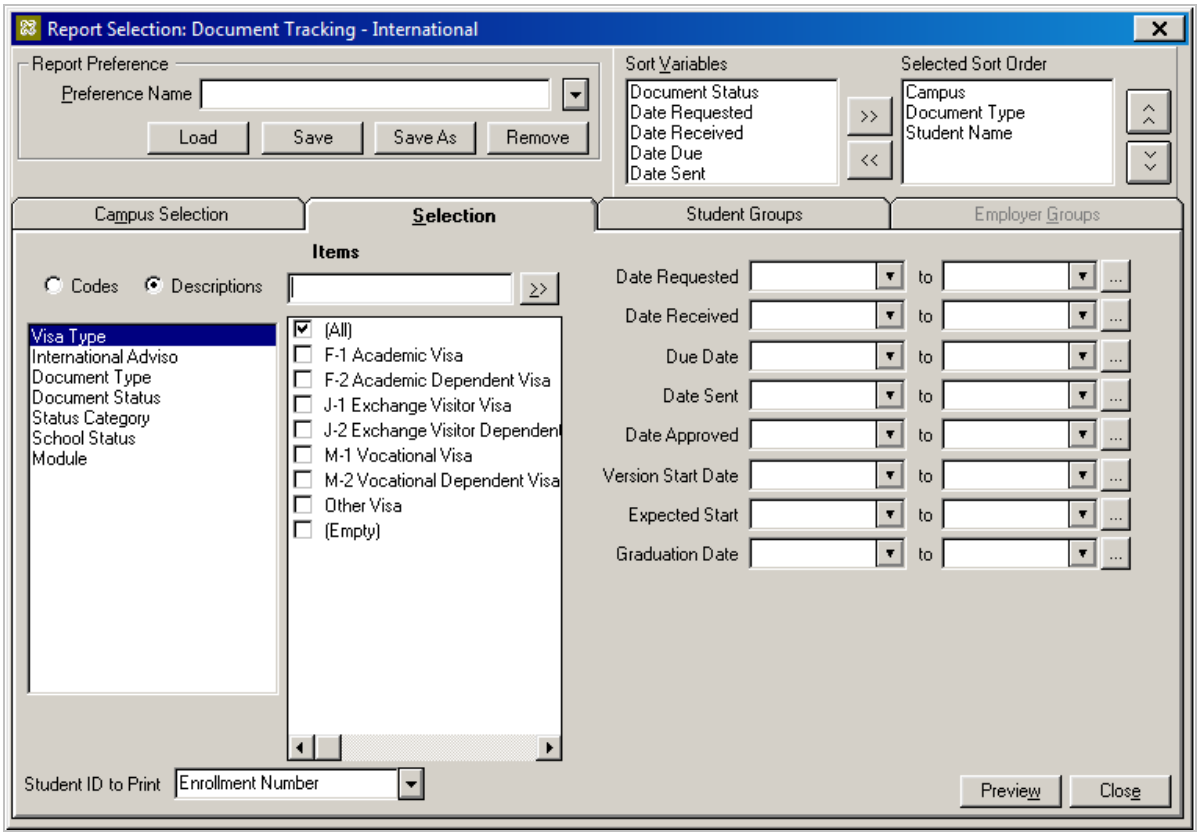
Note: The System Administrator must set up security rights to view, print, or export reports. Staff members and staff groups must be given security rights to view, print, and/or export reports. This does not apply to custom reports.

Document Tracking

The Document Tracking - International report is different from other document tracking reports in that it focuses on the special requirements for monitoring international students.

To run the report:

1. Navigate to **Reports > Contact Manager > International Reports > Document Tracking**. The Report Selection: Document Tracking - International form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

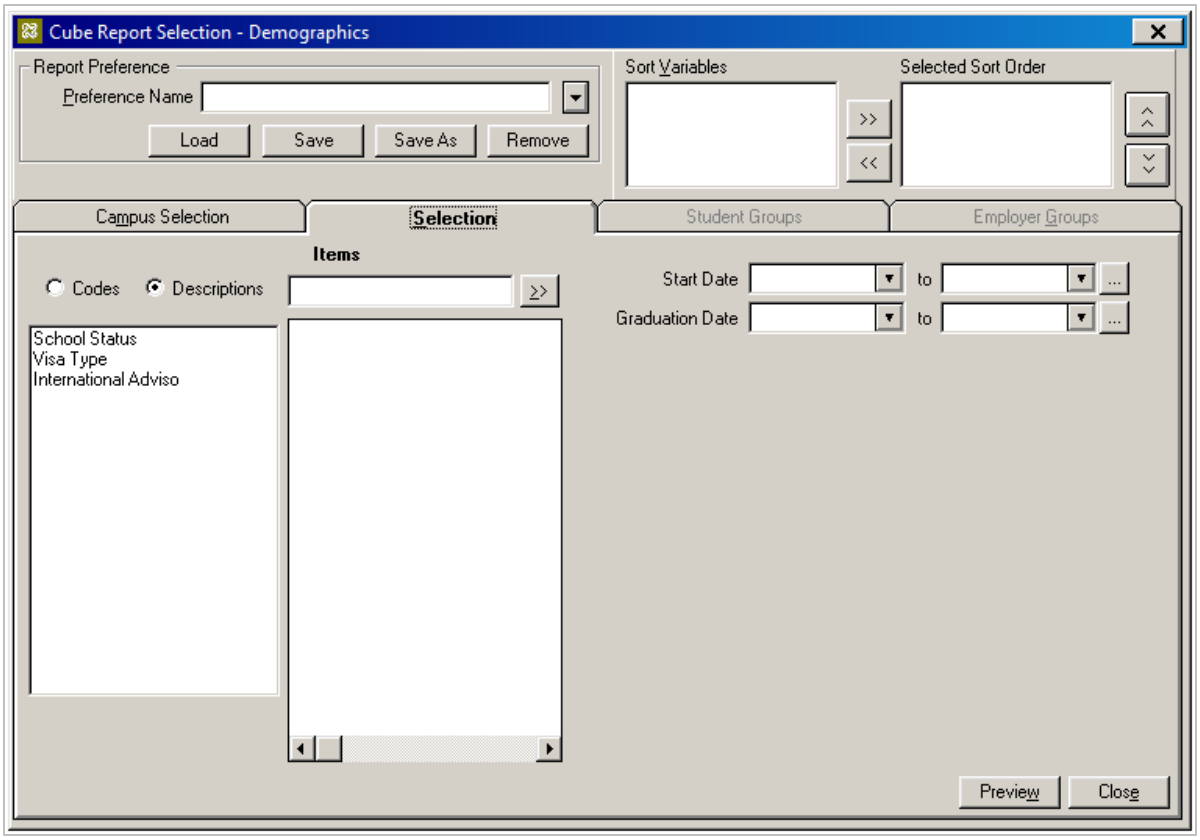
Demographics

You can use the Demographics cube report to manipulate data from your international student records in many combinations.

To run the report:

1. Navigate to **Reports > Contact Manager > International Reports > Demographics**. The Cube Report Selection: Demographics form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



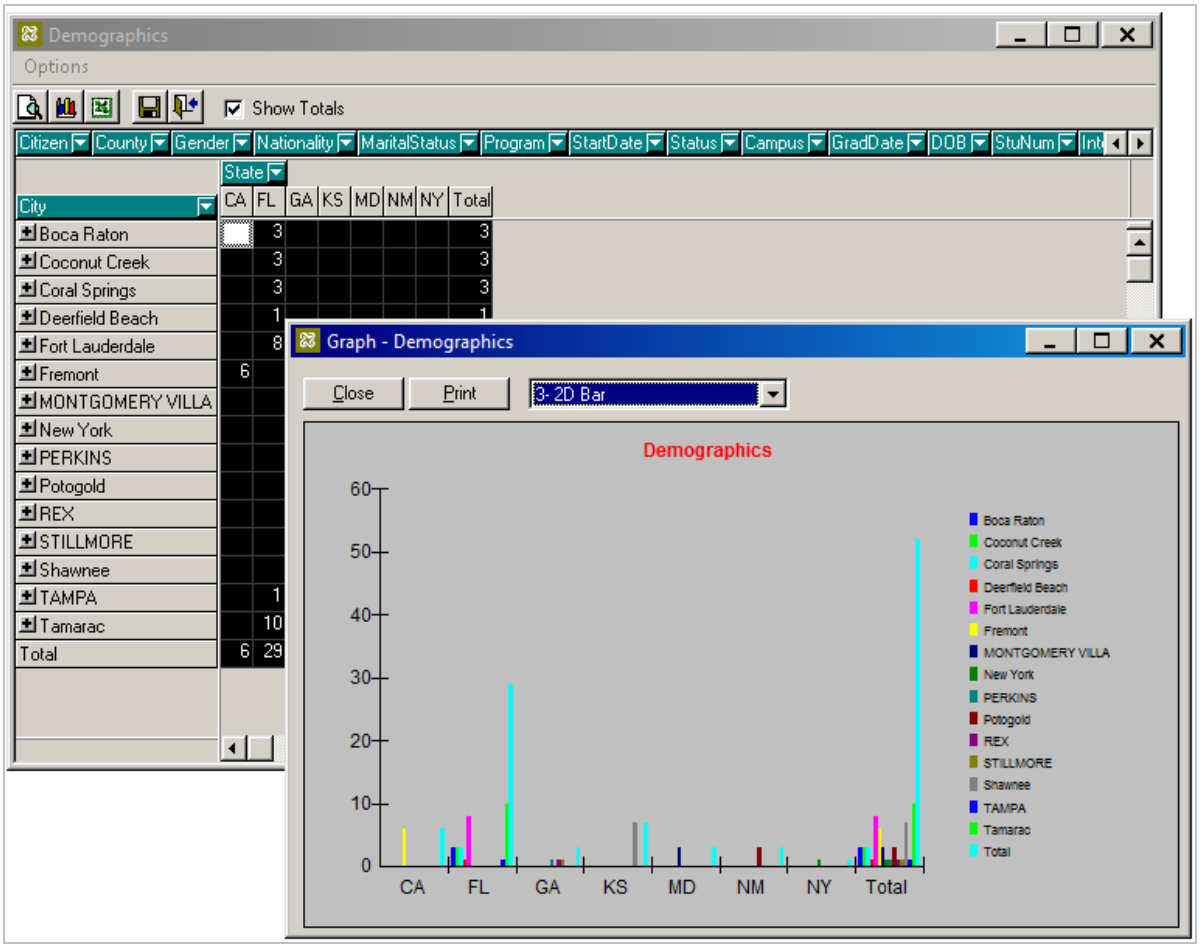
4. Click **Preview**. The report is assembled and displayed.

   The following variables are available for use in this cube report:

   - Name
   - Social Security Number (SSN)
   - Admissions Rep
   - Citizenship Status
   - County
   - Gender
   - Nationality
   - Marital Status
   - Program
   - Start Date
   - Status

- Campus
- Graduation Date
- Date of Birth (DOB)
- Student ID Number
- International Advisor
- Visa Type
- Visa Type Description
- City
- State

The cube is initialized with City as the Y axis (rows) and State as the X axis (columns). Drag the variables to the vertical or horizontal axes as needed to get the cross-tabulated spreads.



Admissions Reports

Navigate to **Reports > Admissions** to access the following Admissions reports:

- Admissions Campus Lead Conversion
- Admissions Deposits
- Admissions Rep Lead Conversion
- Data Changes Report
- Entrance Test Batch Import Detail
- Entrance Test Detail Report
- Entrance Tests
- High School Contacts
- Interviews not Enrolled
- Lead Expenses by Category
- Lead Master Listing Detail
- Lead Master Listing Summary
- Lead Source Performance
- Leads not Interviewed
- Start Date
- Starts - Actual vs. Budget
- Student Previous Education
- Lead Summary by Source (cube report)
- Leads Analysis (cube report)
- Start Date Enrollment Stats (cube report)

Note: The System Administrator must set up security rights to view, print, or export reports. Staff members and staff groups must be given security rights to view, print, and/or export reports. This does not apply to custom reports.

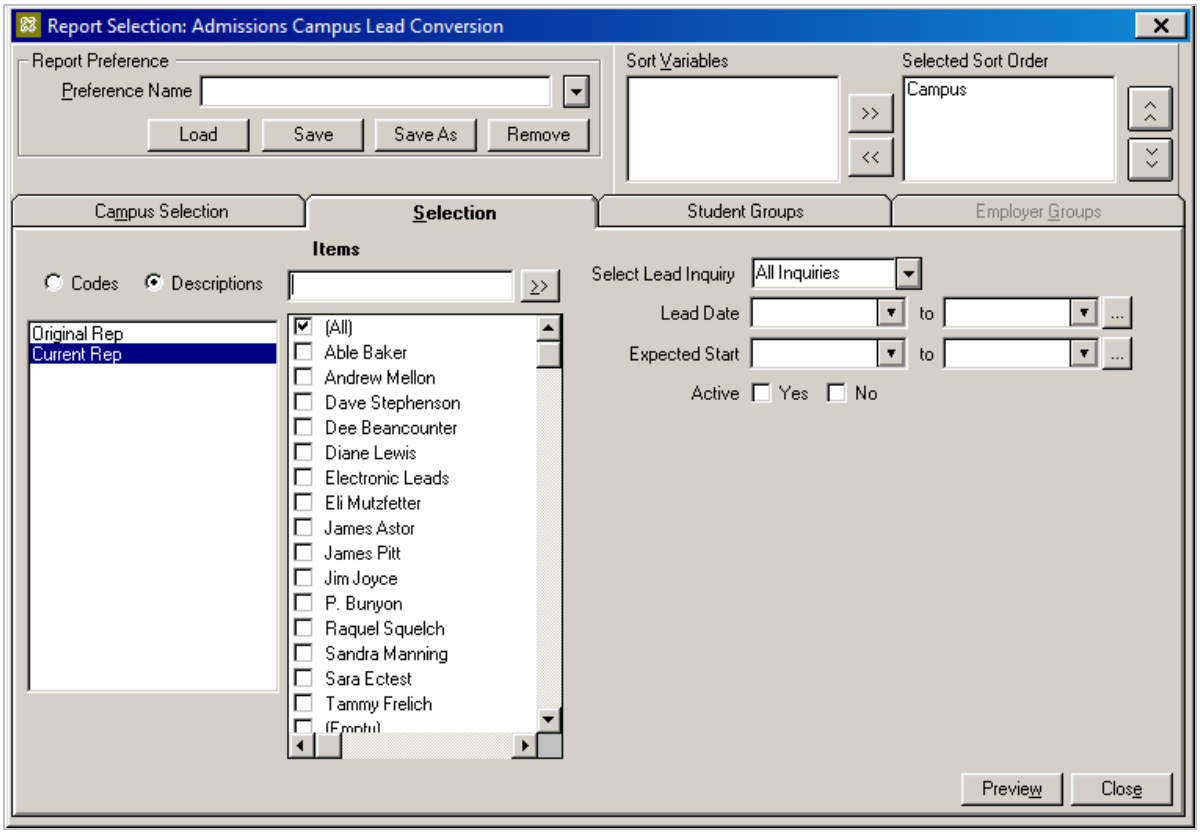
Admissions Campus Lead Conversion

This report lists the leads converted by each admissions representative.

To run the report:

1. Navigate to **Reports > Admissions > Admissions Campus Lead Conversion**. The Report Selection: Admissions Campus Lead Conversion form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: The Select Lead Inquiry drop-down list on the Report Selection form provides options to display and print multiple lead inquiries if the Track Multiple Leads Entry flag has been enabled. See Campus Allow for setup instructions.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

Admissions Rep Lead Conversion

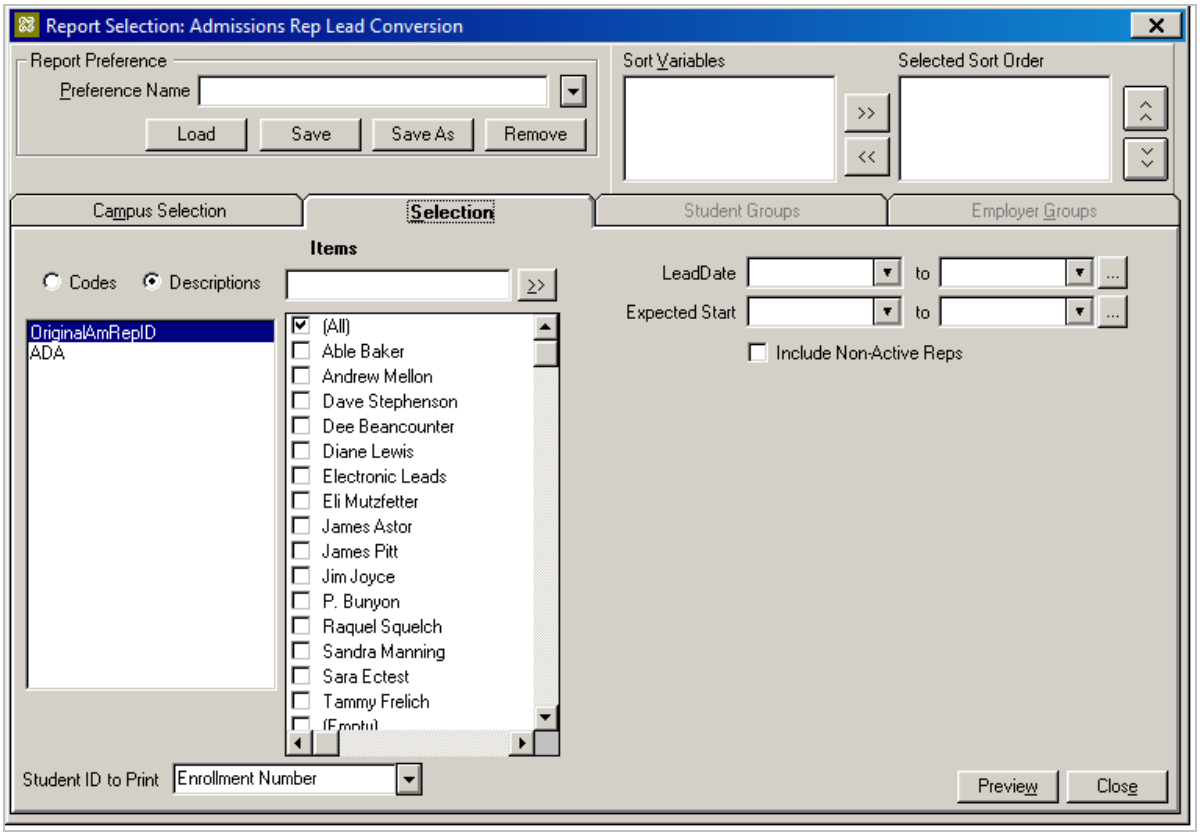
This report (formerly known as Admissions Rep Performance) summarizes Admissions Rep activity with one line per representative.

To run the report:

1. Navigate to **Reports > Admissions > Admissions Rep Lead Conversion**. The Report Selection: Admissions Rep Lead Conversion form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   You can select the campus group, school status, and reps to appear on the report and enter a range of lead dates. You can also choose to include non-active reps.

   If you filter by school status, the filter only limits the lead statuses that appear on the report not the other statuses. If a student status is not in the Lead category, the student still appears on the report if the student meets the remainder of the report selection criteria.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

- Name: Rep staff name.
- New Leads: This column is calculated by summing all rows in the Student master table where the Original Rep ID equals the rep's Rep ID and all other report criteria is satisfied.
- Reassigned In: This is the sum of all rows in the Prospect Admissions Rep table where the New Admissions Rep ID equals the rep's Rep ID, and the Effective Date is within the report date range.
- Reassigned Out: This is the sum of all rows in the Prospect Admissions Rep table where the Old Admissions Rep ID equals the rep's Rep ID, and the Effective Date is within report date range.
- Total Leads: New Leads plus Reassigned In minus Reassigned Out.
- Number Interviewed: The program adds 1 if a record exists in the Status Change table for the student where the Status is not U or C, and the New Status ID joins to a row in the Status table where the Code equals "INT" or "APPREC", or the Status Category is "E", "N", "A", "T" or "P".
- Number Enrolled: The program adds 1 if a record exists in the Status Change table for the student where the Status is not U or C, and the New Status ID joins to a row in the Status table where the Status Category is "E", "N", "A", "T" or "P". This column will list the number of leads who actually began their program.
- % Leads Interviewed: Number Interviewed divided by Total Leads
- % Leads Enrolled: Number Enrolled divided by Total Leads
- % Leads Started: Number Started divided by Total leads

The Admissions Rep Performance Graph is displayed and printed after the report body. The graph shows total leads, number of interview, number of enrollments, and number of starts by rep.

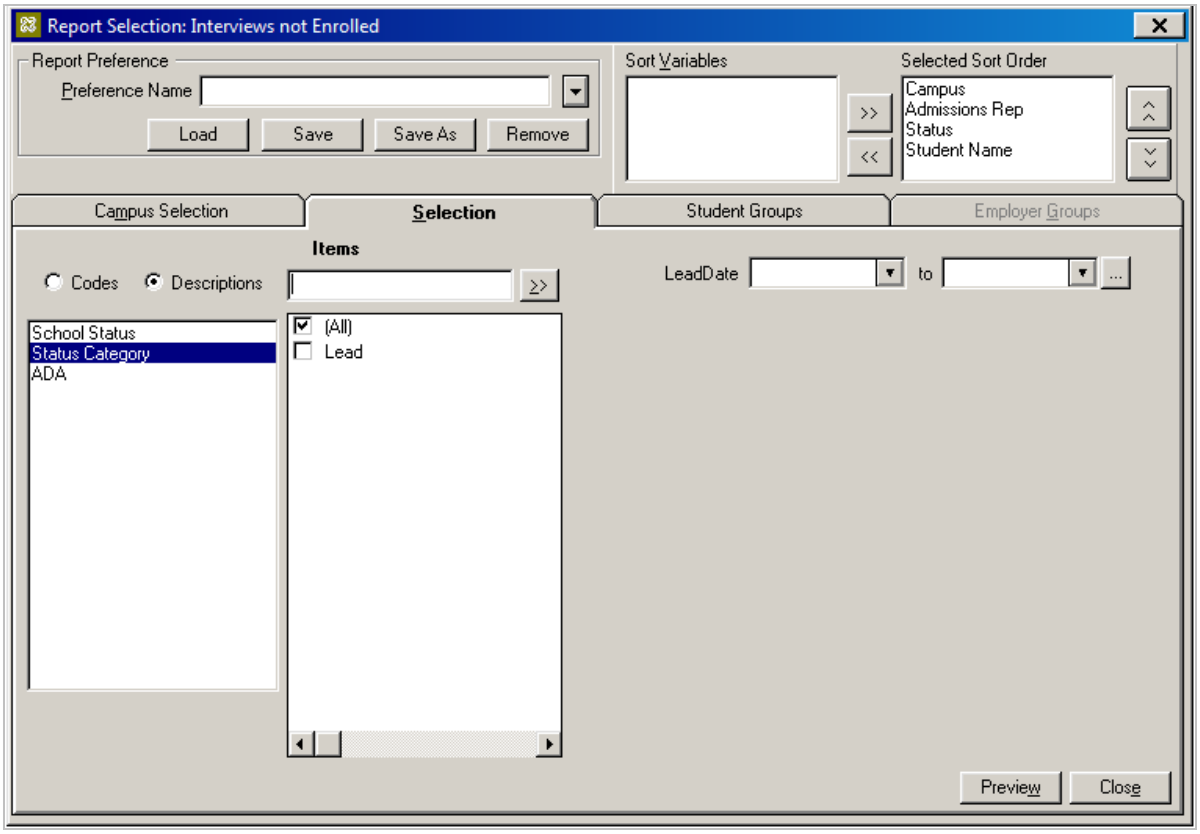
Interviews not Enrolled

This report lists leads that have been interviewed but not enrolled.

To run the report:

1. Navigate to **Reports > Admissions > Interviews not Enrolled**. The Report Selection: Interviews not Enrolled form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.
5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

The report is grouped by Admissions Rep.

Lead Master Listing Detail

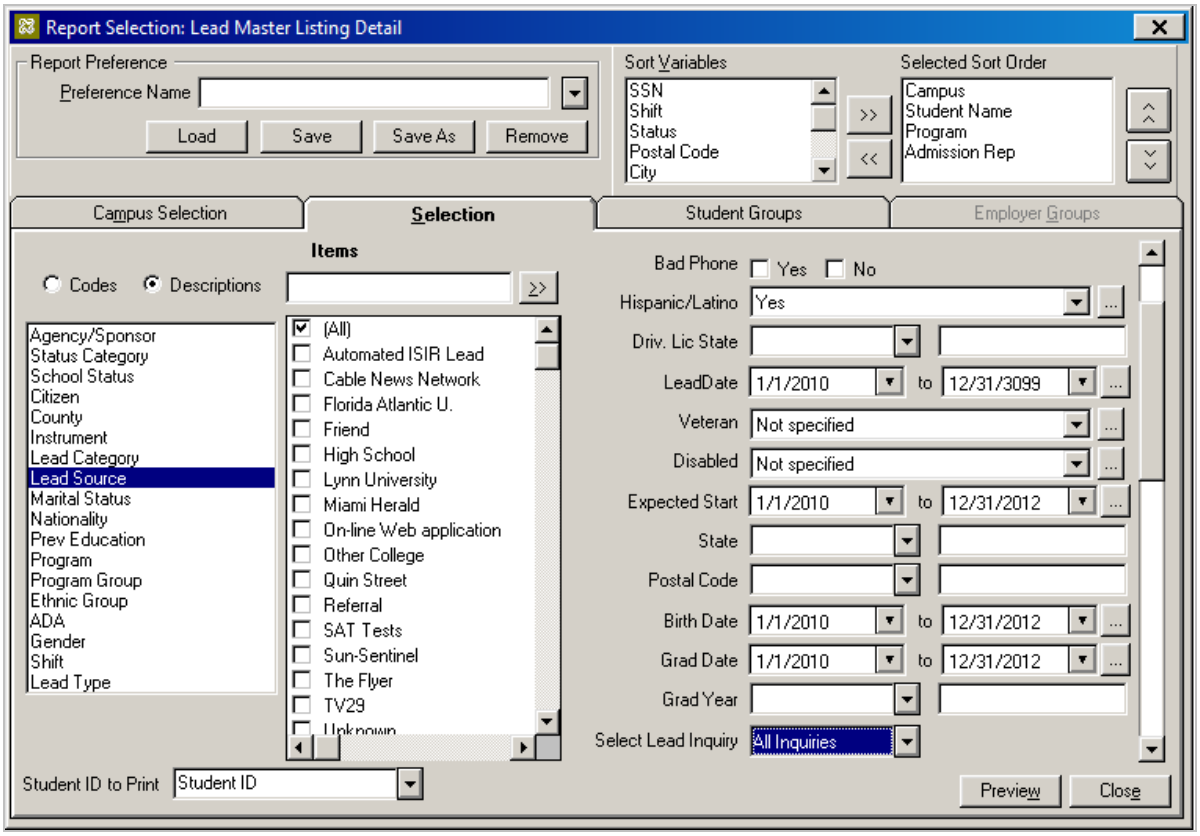
This report lists the leads converted by each Admissions Rep.

To run the report:

1. Navigate to **Reports > Admissions > Lead Master Listing Detail**. The Report Selection: Lead Master Listing Detail form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Notes:

   - If Yes is selected in the Show Prev. Education field, the following previous High School education information is displayed on the report: High School Name, Grad Year, Grad Date, and Graduate.
   - The Select Lead Inquiry drop-down list field is displayed only if the Track Multiple Lead Inquiries option is enabled. See Campus Allow for setup instructions.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

Lead Master Listing Summary

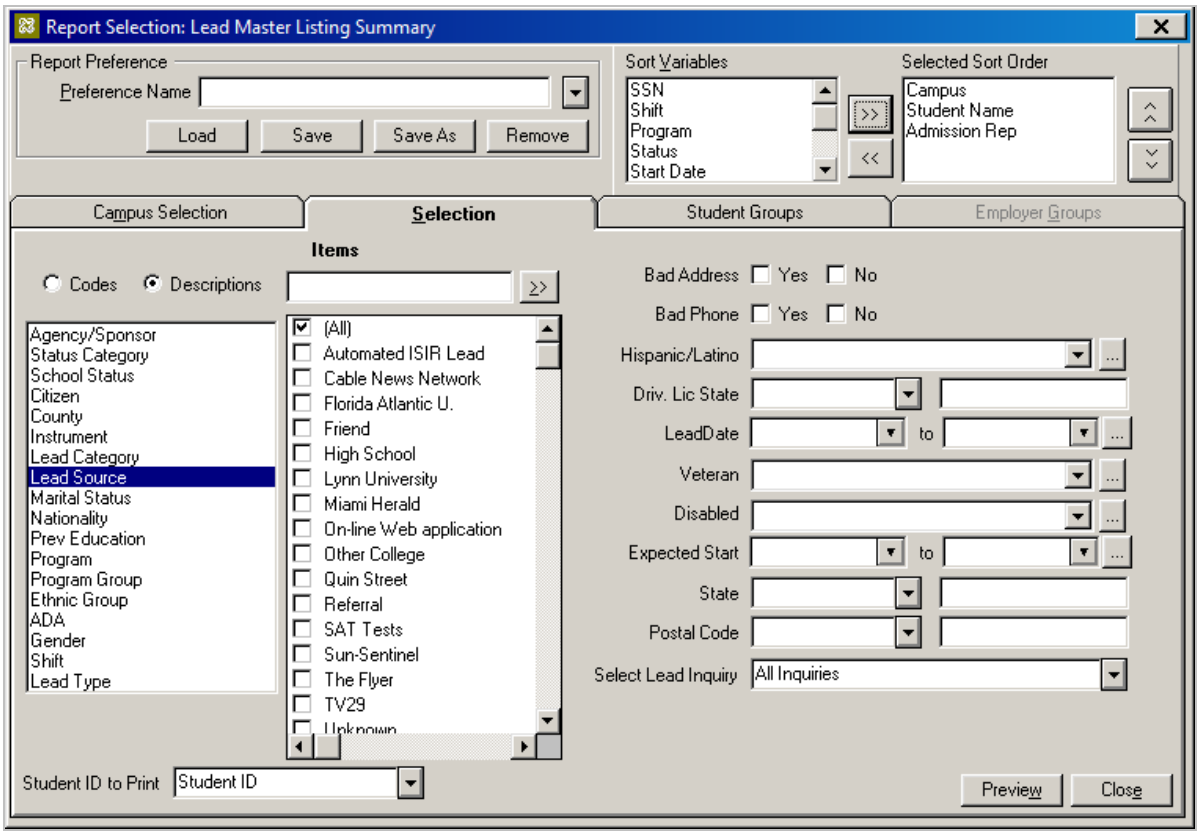
This report lists the leads converted by each Admissions Rep and provides summary information about leads. (Once leads are enrolled as students, they no longer appear on this report. For information about students, use the Master Student Listing in Academic Records.)

To run the report:

1. Navigate to **Reports > Admissions > Lead Master Listing Summary**. The Report Selection: Lead Master Listing Summary form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Notes:

   - If you select Program Group as a selection criterion, you can filter the data by one or more active or inactive program groups. This selection enables you to filter the student population by the program group or groups to which their enrollments or leads are associated.
   - The Select Lead Inquiry drop-down list provides options to display and print multiple lead inquiries if the Track Multiple Lead Inquiries flag has been enabled. See Campus Allow for setup instructions.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

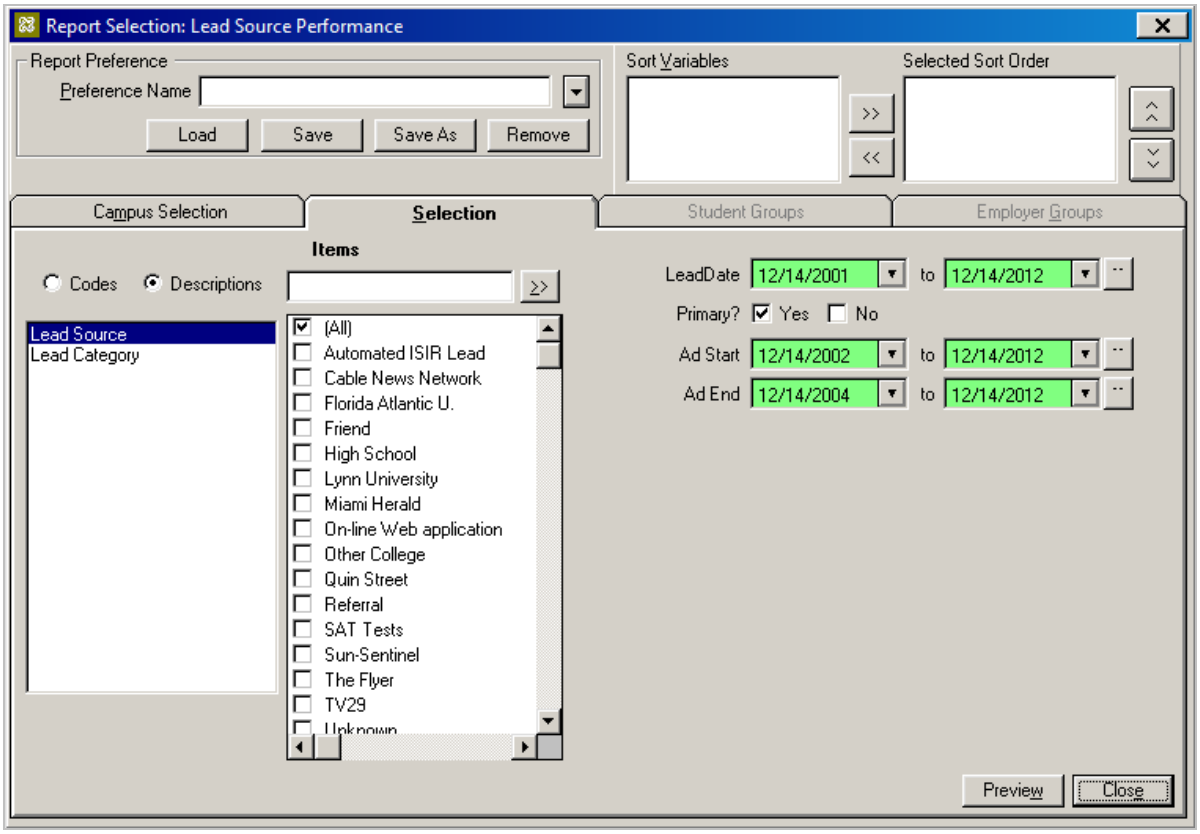
Lead Source Performance

This report is a summary of lead generation and resulting enrollment activities. This report provides a cost analysis for each lead source showing the effectiveness of each source of advertising.

The logic of counting the numbers of interviews given, enrollments, and actual starts follows a cohort basis. These numbers are counted from the pool of records being counted as leads received within the entered date range. The logic for interpreting the numeric columns is: *Of the X number of leads received for this fund source, how many were scheduled for interviews, enrolled, etc.*

To run the report:

1. Navigate to **Reports > Admissions > Lead Source Performance**. The Report Selection: Lead Source Performance form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Lead Source
   - Lead Category
   - Leads Received
   - Interviews Given

- Enrollments
- Actual Starts
- Total Cost
- Cost Per Lead
- Cost Per Interview
- Cost Per Enrollment
- Cost Per Start

Group and grand totals are included for all columns.

Starts - Actual vs. Budget

This report lists budgeted versus actual starts for each program of study. Some institutions refer to this report as the Future Starts report.

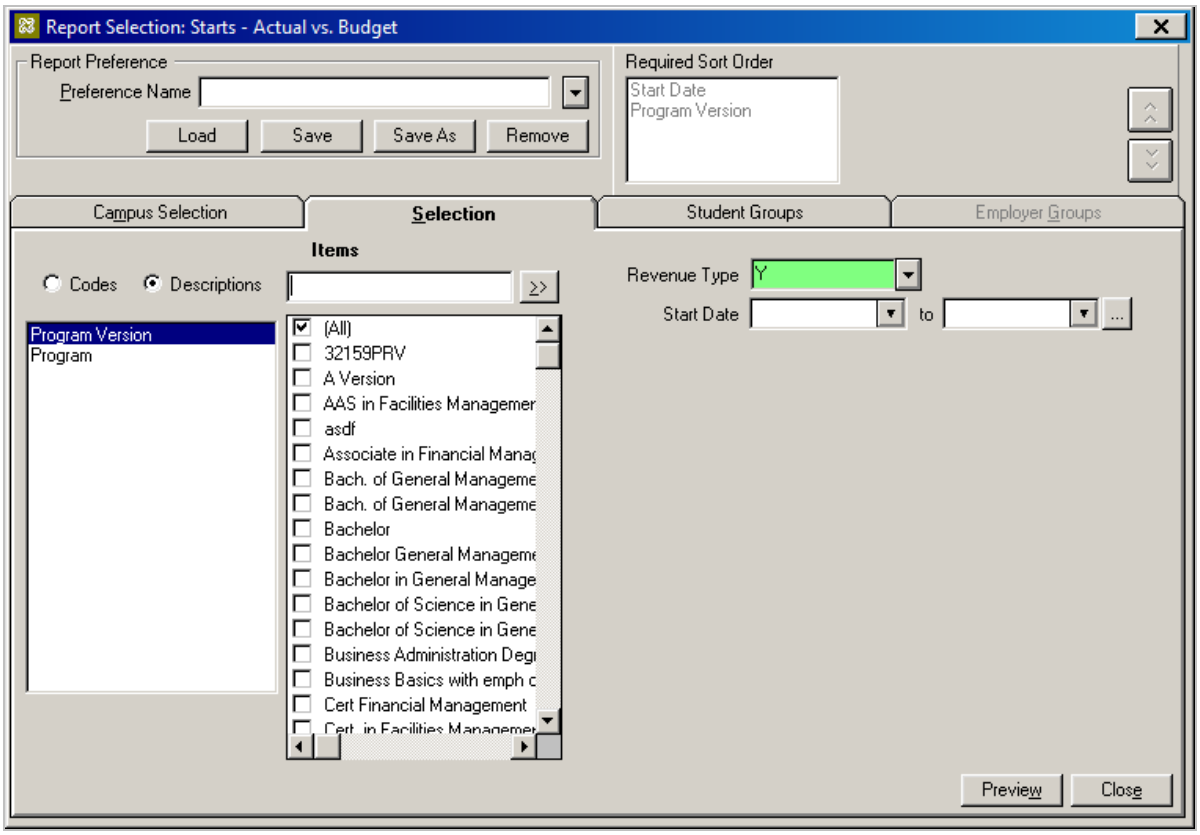
The start date for program versions is configured on **Lists > Academic Records > Programs > Edit > Versions > Edit > Start Date** form. Budgeted tuition cost is entered into the Budget Tuition field on the Start Date form. This number is used to calculate the Budgeted Tuition on the this report. This field is not required. Budget Tuition defaults to zero.

The Revenue Type criterion has no impact on the record set gathered for this report. The only effect Revenue Type has is how the revenue columns are calculated on the report. The Y option calculates revenue through the end of the year. The P option (default) calculates revenue through the end of the program.

To run the report:

1. Navigate to **Reports > Admissions > Starts - Actual vs. Budget**. The Report Selection: Starts - Actual vs. Budget form is displayed
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: When both a Start Date Range and Campus Group are specified, a start date record from the Start Date table is included on the report if the Start Date is within the Start Date range criteria and the Program Version ID specified in the Start Date table includes a campus that is in the specified Campus group. The criteria for gathering records from the Start Date table are modified accordingly if only one or none of the criteria is specified.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

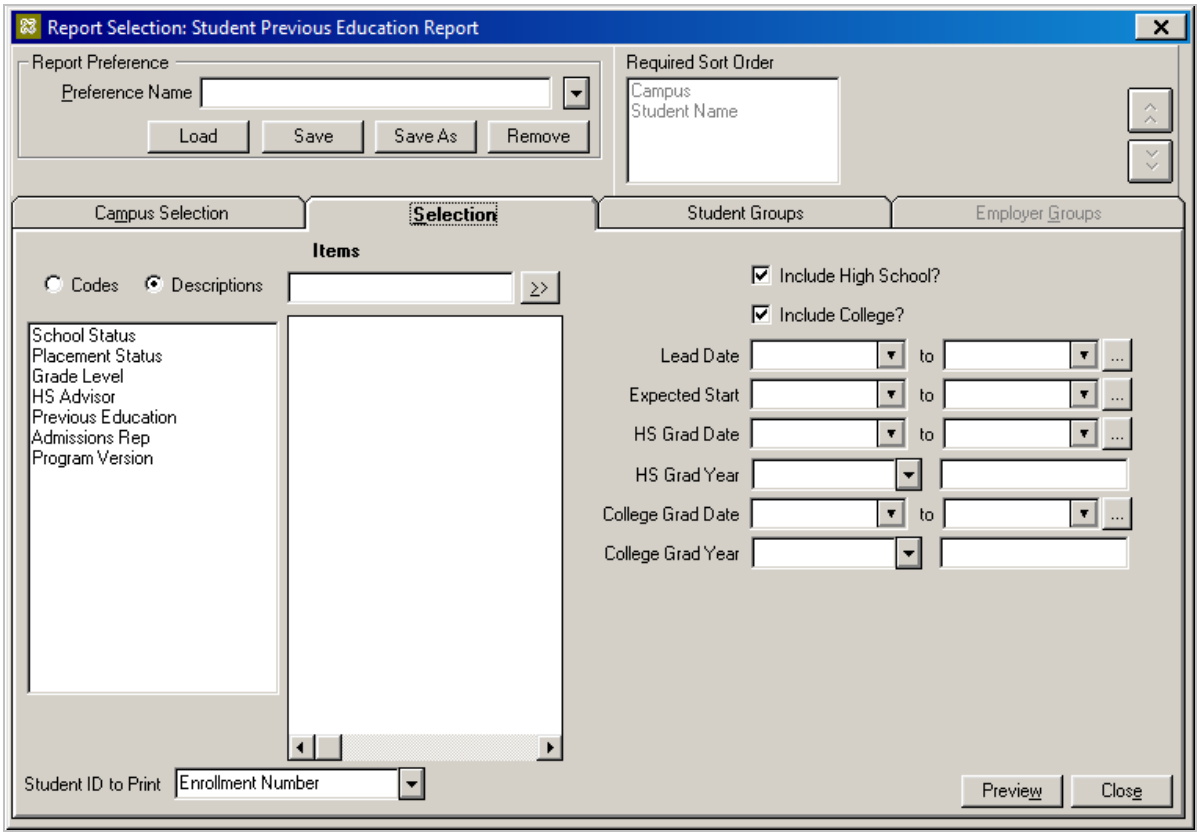
Student Previous Education

This report gathers previous education information for a student's high school, college or both.

To run the report:

1. Navigate to **Reports > Admissions > Student Previous Education Report**. The Report Selection: Student Previous Education Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

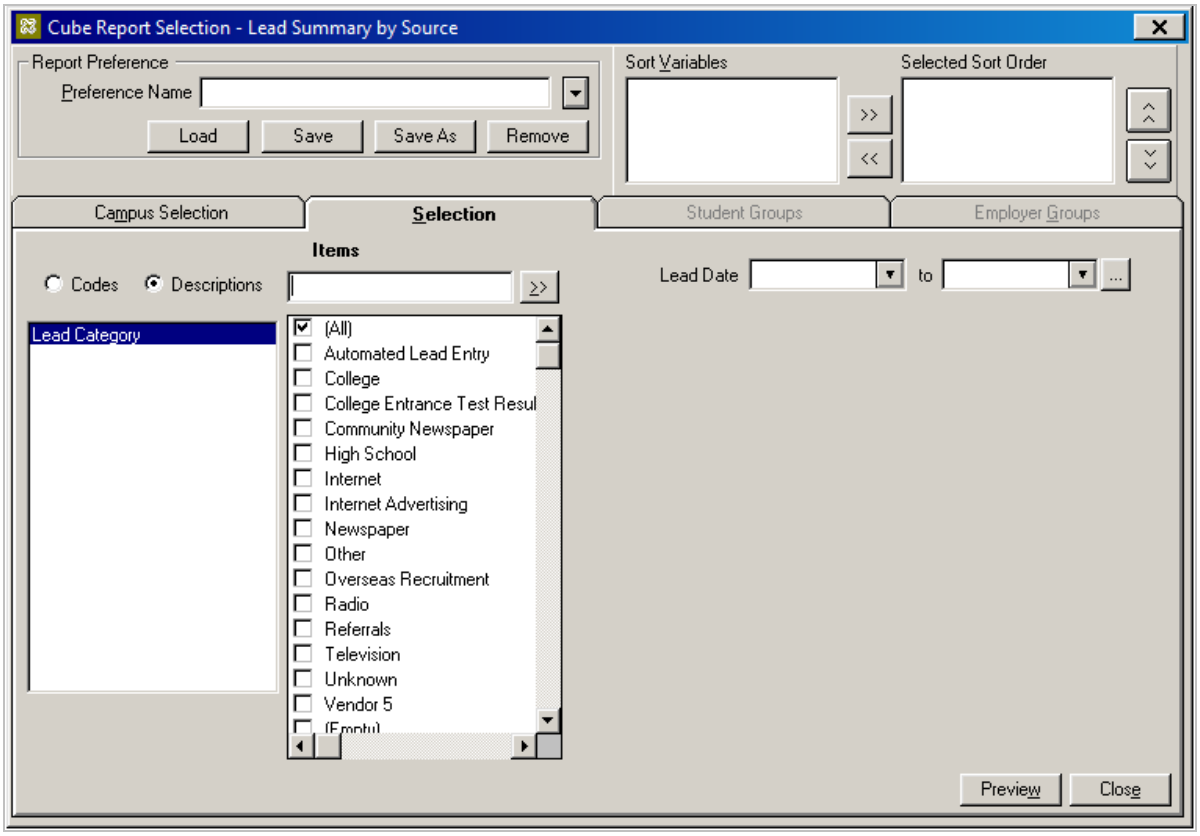
Lead Summary by Source

This cube report is a tool to analyze lead sources. The available variables are year/month, lead date, and source.

To run the report:

1. Navigate to **Reports > Admissions > Lead Summary by Source**. The Cube Report Selection: Lead Summary by Source form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



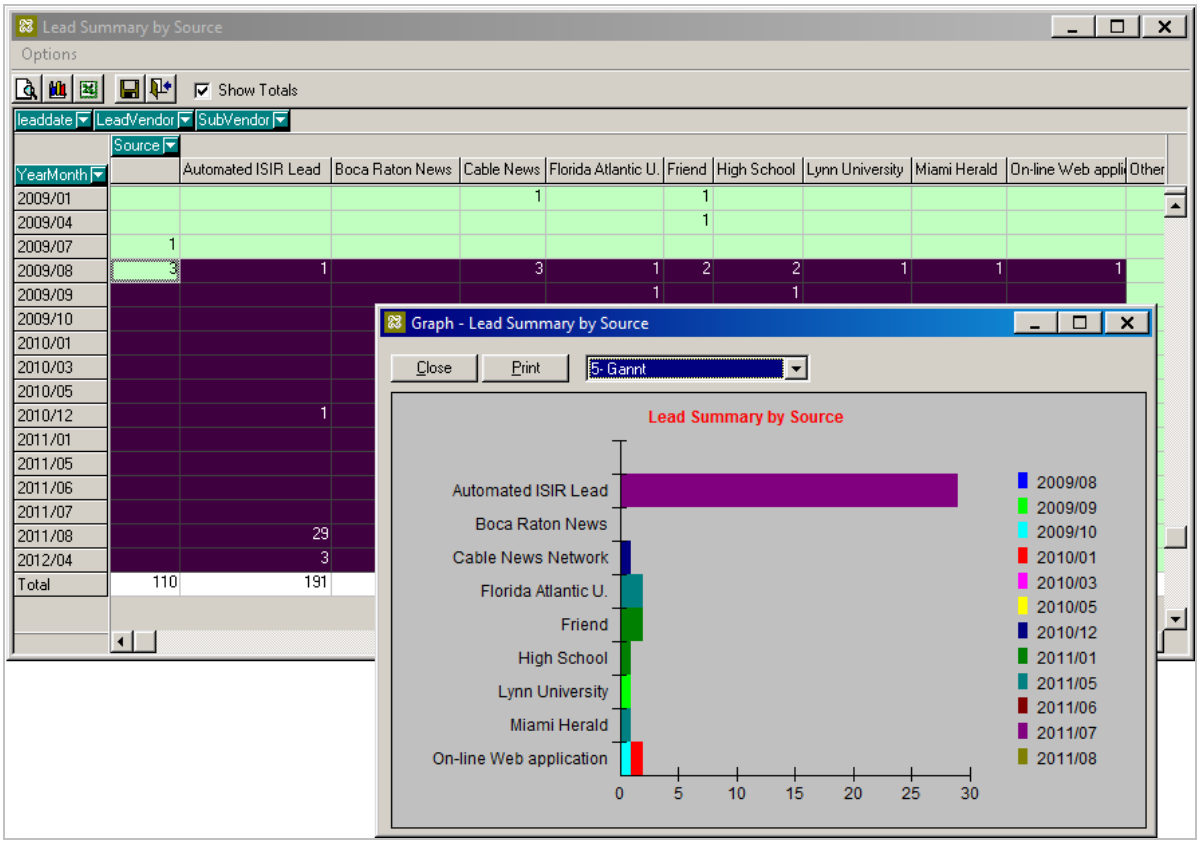
4. Click **Preview**. The cube report is assembled and displayed.

   The following variables are available for use in this cube report:

   - Lead Date
   - Lead Vendor
   - Sub Vendor
   - Source
   - Year/Month

   Drag the variables to the vertical or horizontal axes as needed to get the cross-tabulated spreads. The cube is ini-

tialized with Year/Month as the Y axis (rows) and Source as the X axis (columns).



Leads Analysis

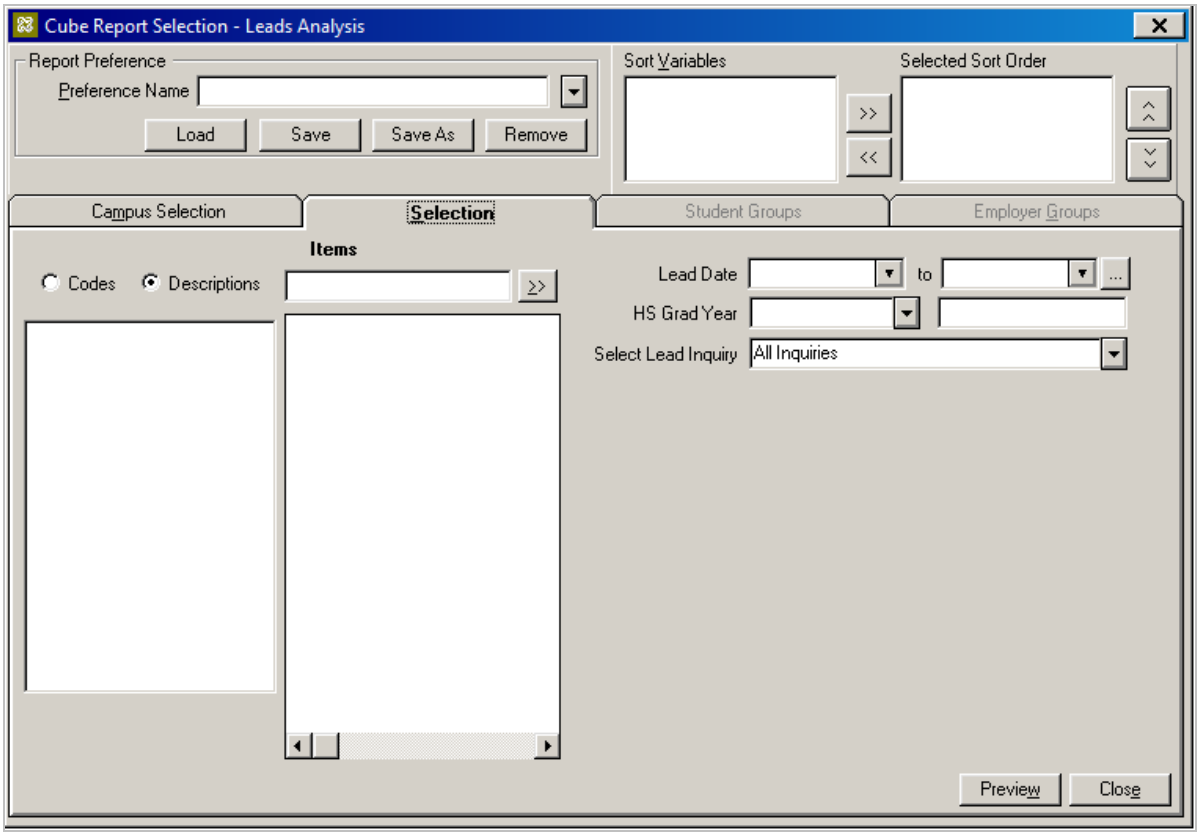
This cube report lists the leads converted by each admissions representative and includes a column showing the expected start date.

To run the report:

1. Navigate to **Reports > Admissions > Leads Analysis**. The Cube Report Selection: Leads Analysis form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Notes:

   - You can enter a lead date range or high school graduation year range for the data to be included.
   - The Select Lead Inquiry drop-down list provides options for displaying and printing multiple lead inquiries if the Track Multiple Lead Inquiries flag has been enabled. See Campus Allow for setup instructions.



4. Click **Preview**. The cube report is assembled and displayed.

   The following variables are available for use in this cube report:

   - Student Name
   - SSN
     City

- State
- Citizen
- County
- Gender
- Ethnicity
- Nationality
- Marital Status
- Program
- Status Code
- Lead Category
- Month
- Year
- Quarter
- Week
- Lead Date
- Interest
- Sponsor
- ZIP
- Campus
- Lead Type
- HS Graduation Year
- Lead Vendor
- Sub Vendor
- Expected Start Date
- Ethnicity
- Lead Source
- Admissions Representative

Drag the variables to the vertical or horizontal axes as needed to get the cross-tabulated spreads. The cube is initialized with Year/Month as the Y axis (rows) and Source as the X axis (columns).

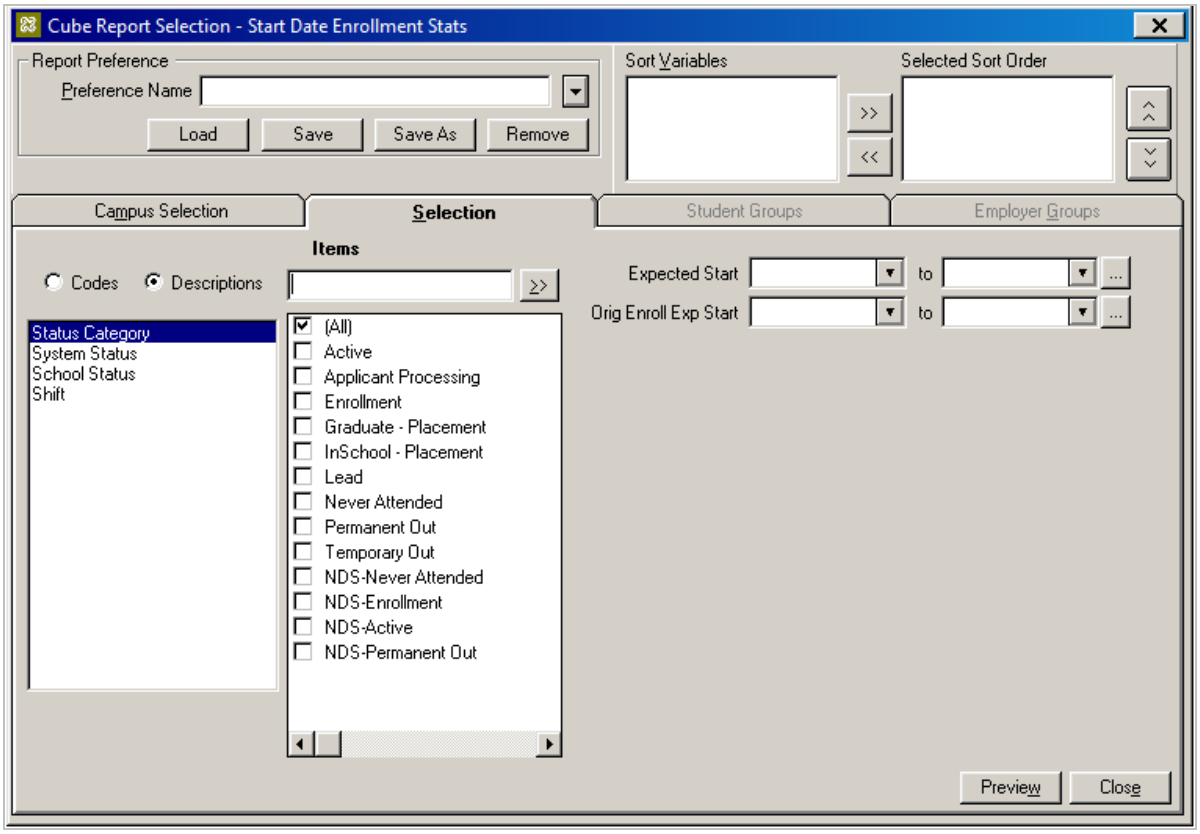
Start Date Enrollment Stats

This cube report shows the current enrollment statistics for each available start date. This report enables you to quickly view every possible combination of program version and start date and the number of students currently enrolled in each version/date combination. The report also compares currently enrolled to budgeted number of starts.

To run the report:

1. Navigate to **Reports > Admissions > Start Date Enrollment Stats**. The Cube Report Selection: Start Date Enrollment Stats form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



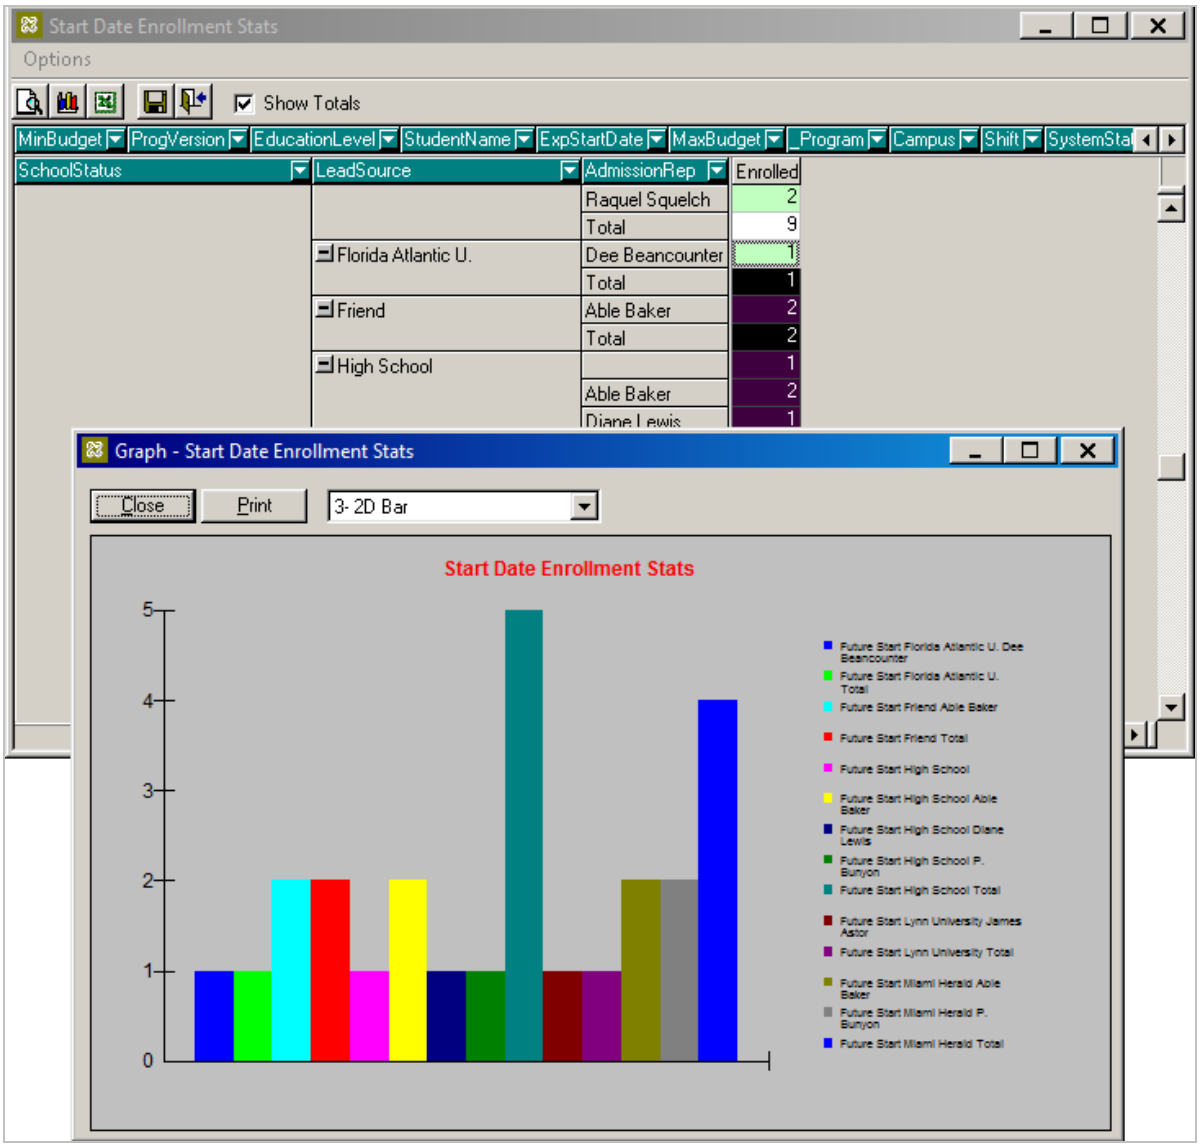
4. Click **Preview**. The cube report is assembled and displayed.

   The following variables are available for use in this cube report:

   - Student Name
   - Program Version
   - Minimum Budget
   - Maximum Budget
   - School Status
   - Shift
   - Campus
   - Program

- System Status
- Admissions Representative
- Lead Source
- Education Level
- Re-Entry Date
- Packaging Status
- Category
- Original Enrollment Expected Start
- Expected Start
- Enrolled
- Expected Start Date

Drag the variables to the vertical or horizontal axes as needed to get the cross-tabulated spreads. The cube is initialized with Expected Start Date as the Y axis (rows) and Enrolled as the X axis (columns).



Financial Aid Reports

Note: For the latest content about FAFSA, ISIR and COD processing, access Regulatory Help.

Use the **Reports > Financial Aid** menu to access the following Financial Aid reports:

- Student Financial Aid History
- Student Financial Aid Summary
- Student Financial Aid Summary By Term
- Student Financial Aid Summary by Payment Period
- Students Failing Disbursement Criteria Report
- Unmatched ISIRs

For information about Servicer Reports, see Servicer Integration Overview, Servicer Batch History Report, Servicer Daily Transaction Audit, Disbursement Batch Review

Note: The System Administrator must set up security rights to view, print, or export reports. Staff members and staff groups must be given security rights to view, print, and/or export reports. This does not apply to custom reports.

2003-2004 Signature Hold

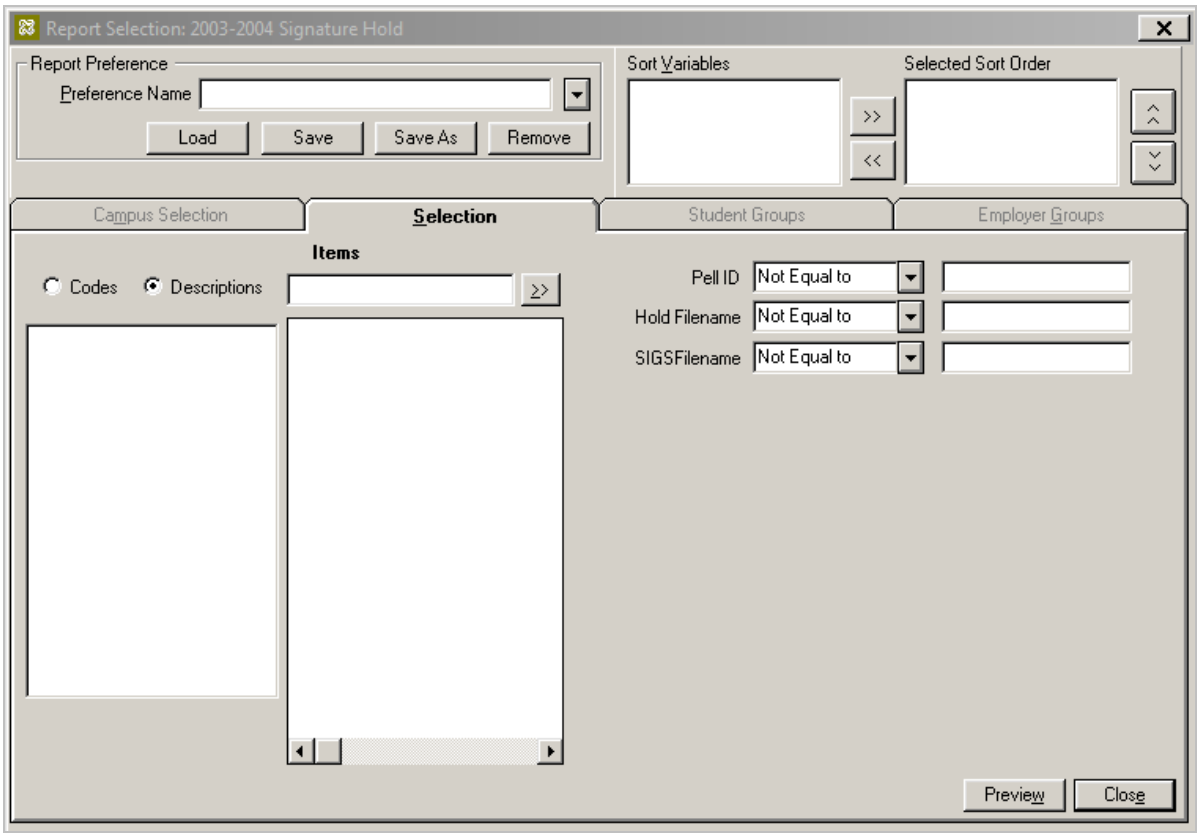
Note: For the latest content about FAFSA, ISIR, and COD processing, access Regulatory Help.

This report was used to list FAFSA applicants that did not provide an electronic or paper signature with their application. The FAFSA application remained in a signature hold file for up to 14 days. it was not processed again until a signature was is received.

Note: The Department of Education discontinued Signature Hold Files beginning with the 2005-06 FA Award Year.

To run the report:

1. Navigate to **Reports > Financial Aid > 2003-2004 Signature Hold**. The Report Selection: 2003-2004 Signature Hold form is displayed.
2. Select appropriate options on the Selection tab.



3. Click **Preview**. The report is assembled and displayed in the Report Viewer.

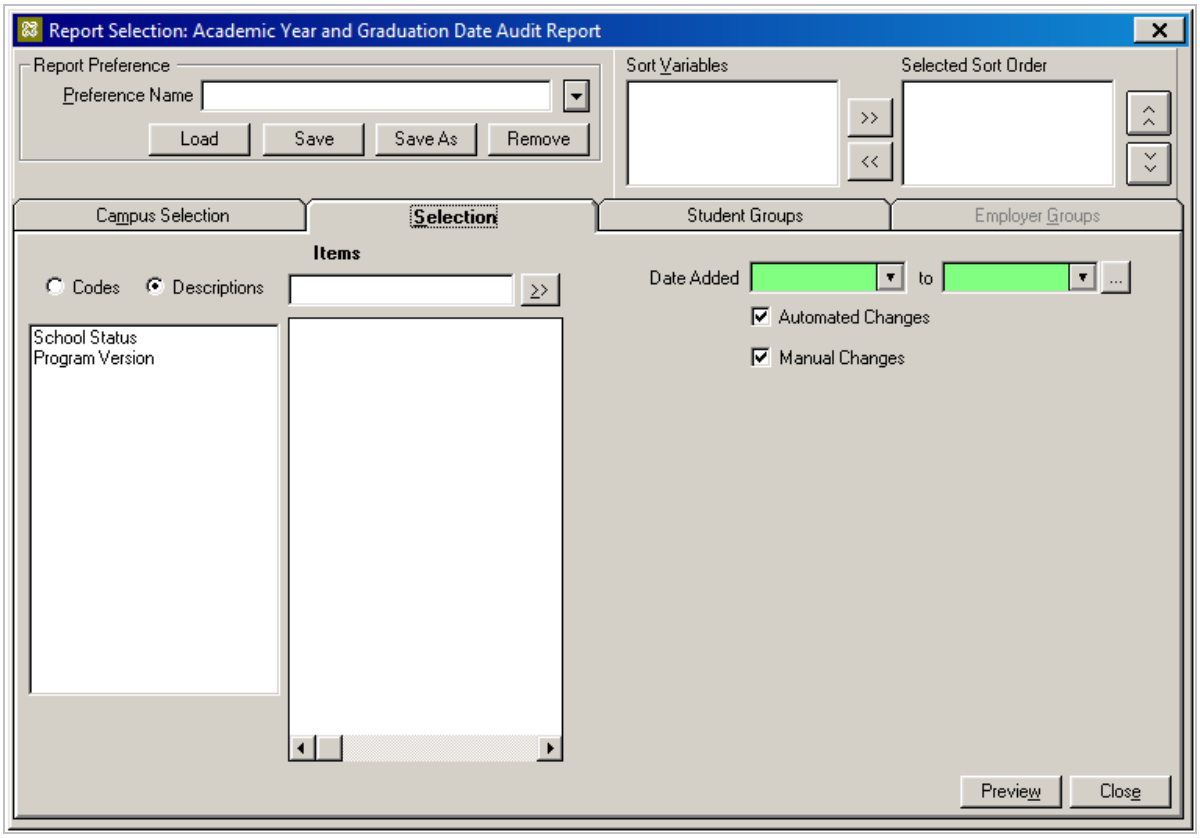
Academic Year and Graduation Date Audit

This report details each academic year record, payment period record, scheduled disbursement record, and academic year based housing lease that has been changed. It also displays disbursement records that have been or will be changed by the Automated Processes.

To run the report:

1. Navigate to **Reports > Financial Aid > Academic Year and Graduation Date Audit Report**. The Report Selection: Academic Year and Graduation Date Audit Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   For each enrollment, the report indicates the Student Name, Student Status and then displays one or more sections depending on the changes that occurred.

Campus Management Page 1 of 1

Each section display columns containing the name of the field changed, Old Value, New Value, Date Changed and Modified By.

- If a change to the student's Enrollment occurred, the Enrollment Record # and Student Status are displayed as well as any changes that occurred to the student's Expected Graduation Date or Externship Date.
- If a student's Academic Year based Award information changed, the Academic Year, and Sequence # are displayed as well as any changes that occurred to the Ac Yr Start Date, Ac Yr End Date, and any Payment Period Start Date, Payment Period End Date, Disbursement Date, Disbursement Status, Award Amount, or Award Description.
- If there are any modifications to the BBAY Start and End Dates, on the Loan Period, and the Loan Period Seq, AcYr Start and End Dates on the Direct Loan forms, these changes are being recorded in the FA Audit and are also reported in the Graduation and Academic Year Audit report.
- If a student has a housing lease that is based on one or more Academic Years and changes have occurred to the lease information, the report displays the Housing Academic Year, Sequence #, and any changes that occurred to the Lease Start Date or Lease End Date.

ACG Data Report

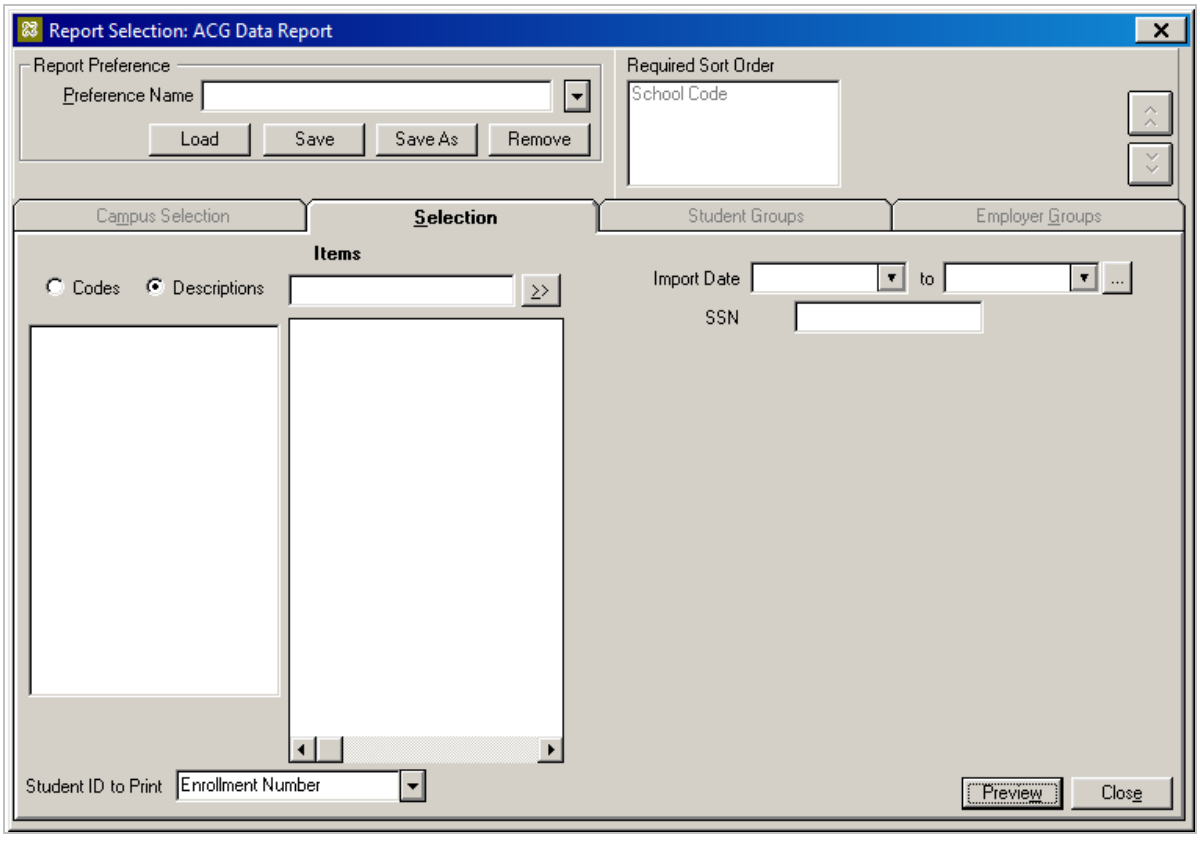
The Academic Competitiveness Grant (ACG) was authorized by the Higher Education Reconciliation Act (HERA). On July 29, 2006, the COD System began sending Electronic Statement of Account (ESOA) reports reflecting authorizations for the new grants to schools. Students must be U.S. citizens and eligible for a Pell Grant to be eligible for either of these grants.

The report is imported through the Import Application Data process.

- The Campus School Code (Campus Setup) associated with the Federal School Code contained in the file is used to determine the Campus Description displayed on the report. This Campus description is printed on the report in a group header.
- The report groups students by Campus (also determined by finding the School Code in Campus Setup that matches the Federal School Code in the file).

To run the report:

1. Navigate to **Reports > Financial Aid > ACG Data Report**. The Report Selection: ACG Data Report form is displayed.
2. Select appropriate options on the Selection tab.



3. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

- Award years
- Original SSN
- Original Name ID
- Transaction number
- Student Name
- Date of Birth
- Whether the student graduated before 1/1/05 (Yes/No)
- High School State
- High School Program Code
- AP or IB (Yes/No)
- Rigorous Courses (Yes/No)
- Federal School ID

COD Disbursement Analysis

This report summarizes the total COD disbursements and compares that number to the total COD disbursements posted as received in CampusNexus Student (see **View** > **Financial Aid** > **Packaging** > **Add/Edit** > **Package**). The report shows only those students that have a record for the Award Year selected.

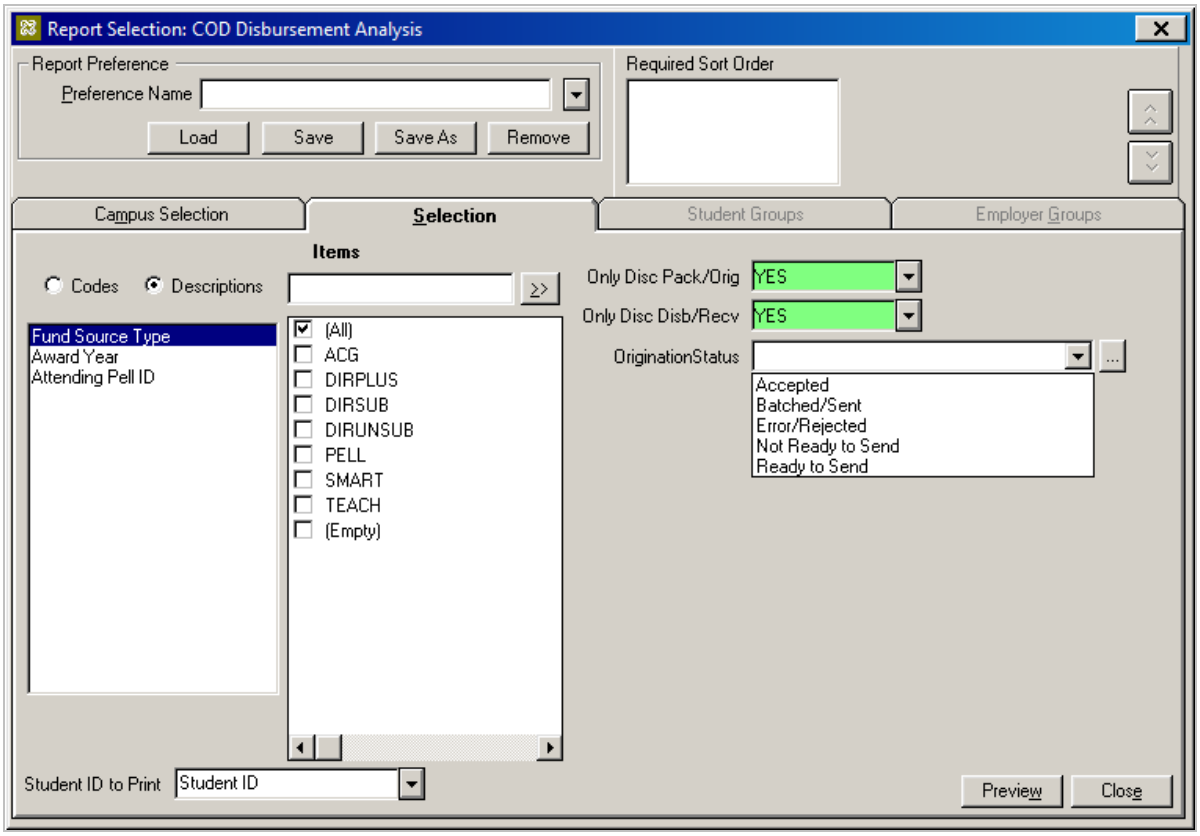
To run the report:

1. Navigate to **Reports > Financial Aid > COD Disbursement Analysis**. The Report Selection: COD Disbursement Analysis form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Notes:

   - If the COD Award Amount differs from the Origination Amount, you can select the Only Disc Pack/Orig field to only list discrepancies between the COD Award Amount and the Origination Amount.
   - If the Disbursed Amount Accepted differs from the Amount Received, you can select the Only Disc Dis-b/Recv field to only list discrepancies between the Disbursed Amount and the Amount Received.

     Both fields allow you to select Yes or No. If you select No in either field, the report displays all records. If you select Yes in either field, the report shows those students where the selected amounts are different.
   - The Origination Status options include: Accepted, Batched/Sent, Error/Rejected, Not Ready to Send, and Ready to Send.
   - The Additional Eligibility Indicator Only? check box is disabled by default. The check box becomes enabled when the Fund Source Type is Pell (and any of the other awards), combined with an Award Year equal to or greater than 2009-10.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - Program
   - Model
   - AEI (Additional Eligibility Indicator)
   - Origination ID/Status
   - Enrollment Status

   Sub-report details include:

   - Enrollment details (Start Date, Status, Program Version, Award Packaged)
   - Disbursement details (Disbursement Number, Scheduled Disbursement Amounts, Paid Disbursement Amounts, and Accepted Disbursement Amounts)

   The following additional information is provided for each student:

   - Amt. Originated (previously named 'Orig. Amt.')
   - COD Net Disb. Amt. Accepted (previously named 'Disb Accepted')
   - Amt Disbursed
   - Amt Refunded
   - Net Amt. Received (previously named 'Amt. Received')
   - Net Disb. Amt. Difference

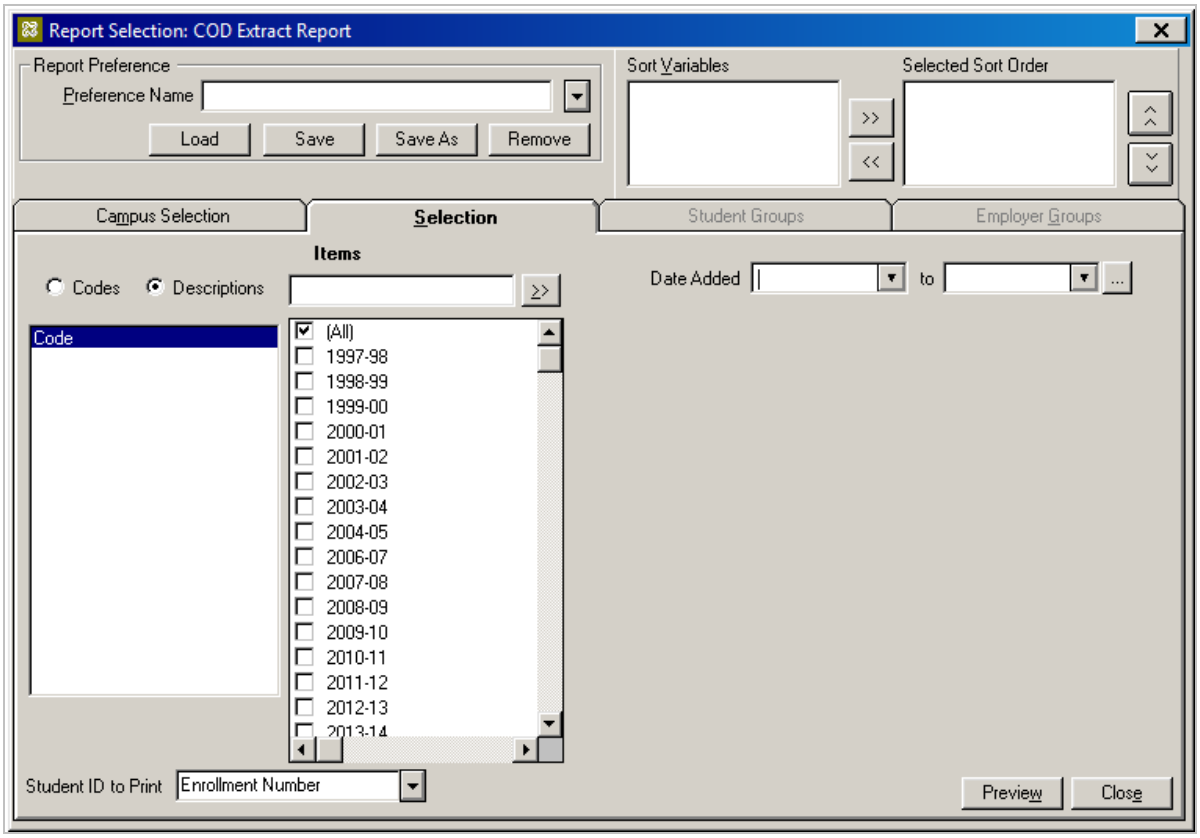
COD Extract Report

This report provides batch details for COD Awards exported out of CampusNexus Student. These awards include ACG, Direct Loans, Pell, and SMART.

To run the report:

1. Navigate to **Reports > Financial Aid > COD Extract Report**. The Report Selection: COD Extract Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: The selection criteria include a Date Added range and the Award Year. You can select from a list of award years or select 'Empty'. Empty Award Years are batches that contain multiple Award Years.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report header displays an Award Year or the word 'Multiple'. It also indicates the Document ID, Date Exported, and the Rpt Entity ID.

   The report displays the following details:

   - Student Name
   - SSN
   - Campus

- Financial Award ID #
- Award Type
- Award Amount
- Disbursement #
- Gross Amount
- Net Amount
- Disbursement Released or Not Released

The Award Year column in the detail section is displayed only if the Award Year for the batch (header) is 'Multiple'.

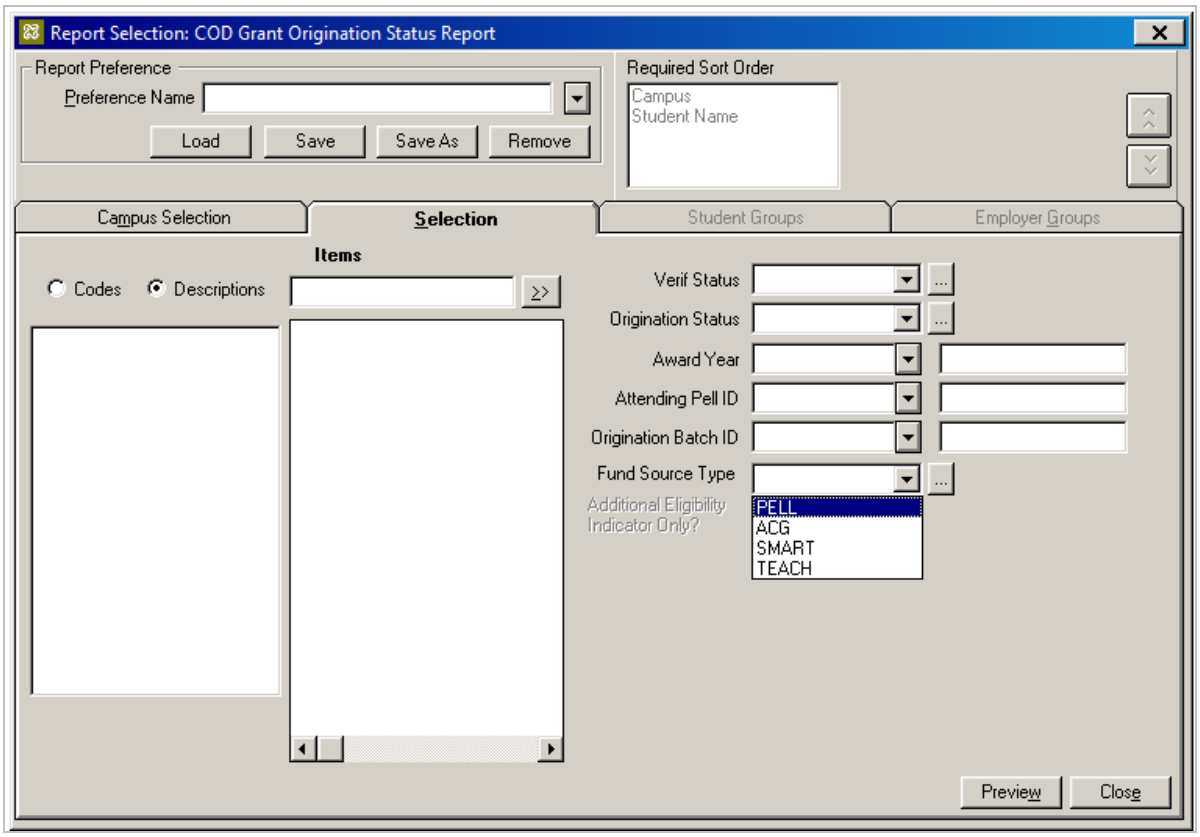
COD Grant Origination Status

This report should be used as an origination tool. It is necessary because a student with no disbursements sent do not appear on the COD Disbursement Analysis report. Only students that have a record for the selected award year are listed on the report (the students are scheduled to receive a COD Grant).

To run the report:

1. Navigate to **Reports > Financial Aid > COD Grant Origination Status Report**. The Report Selection: COD Grant Origination Status Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: The Additional Eligibility Indicator Only? check box is disabled by default. This check box becomes enabled for selection when the Fund Source Type is Pell (and any of the other grants), combined with an Award Year equal to or greater than 2009-10.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

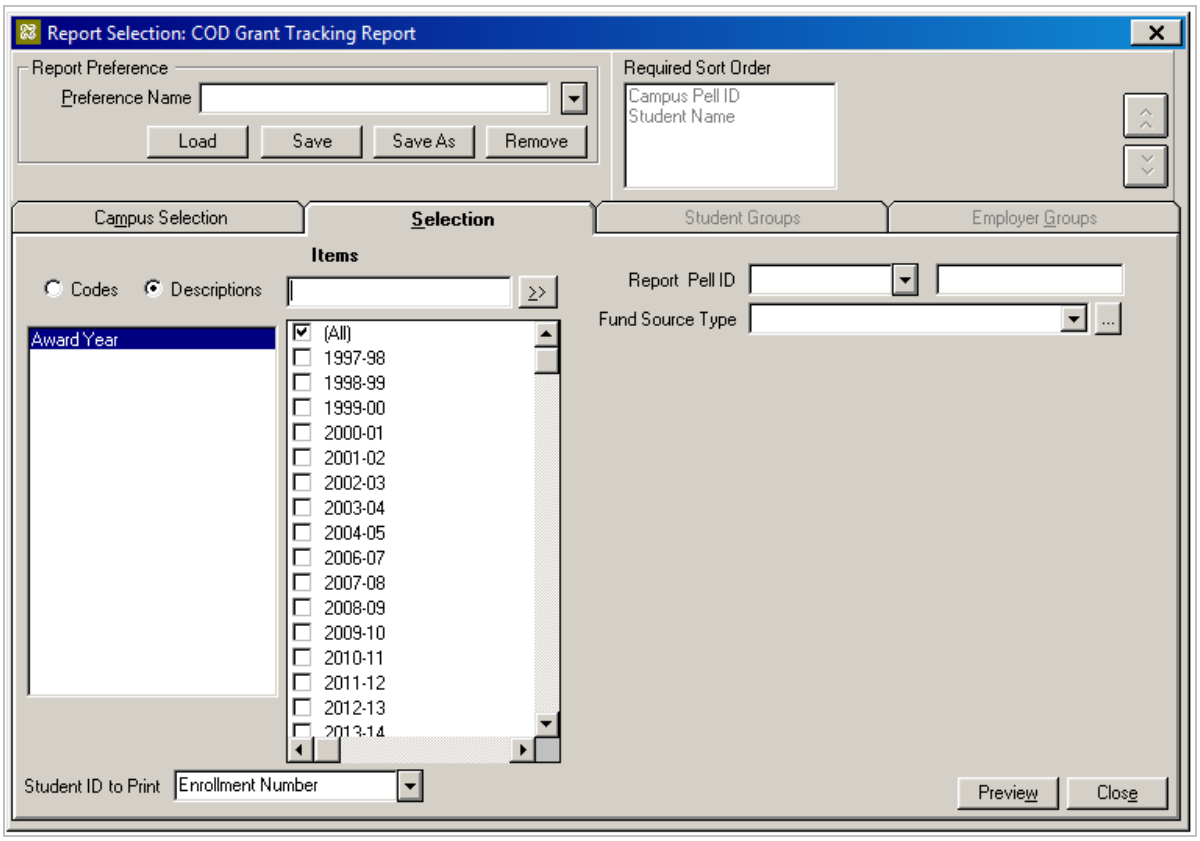
COD Grant Tracking Report

This report summarizes grant amounts for the specified award year and lists detailed disbursement and refund information. Totals are included at the bottom of each report showing counts of unduplicated students. The report is sorted by Campus Pell ID and Student Name.

To run the report:

1. Navigate to **Reports > Financial Aid > COD Grant Tracking Report**. The Report Selection: COD Grant Tracking Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: The selection criteria include a the Report Pell ID range, Fund Source Type, and Award Year. You can select from a list of award years or select Empty. Empty award years are batches that contain multiple award years.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The detail lines on the report are specific to the fund source type selected.

   The report displays the following details:

   - Total of all eligible COD grant amounts
   - Total amount awarded and packaged
   - Total of all amounts disbursed

- Total of all amounts refunded
- Pell LEU% (Pell Lifetime Eligibility Used)
- Count of students to whom COD grants were disbursed

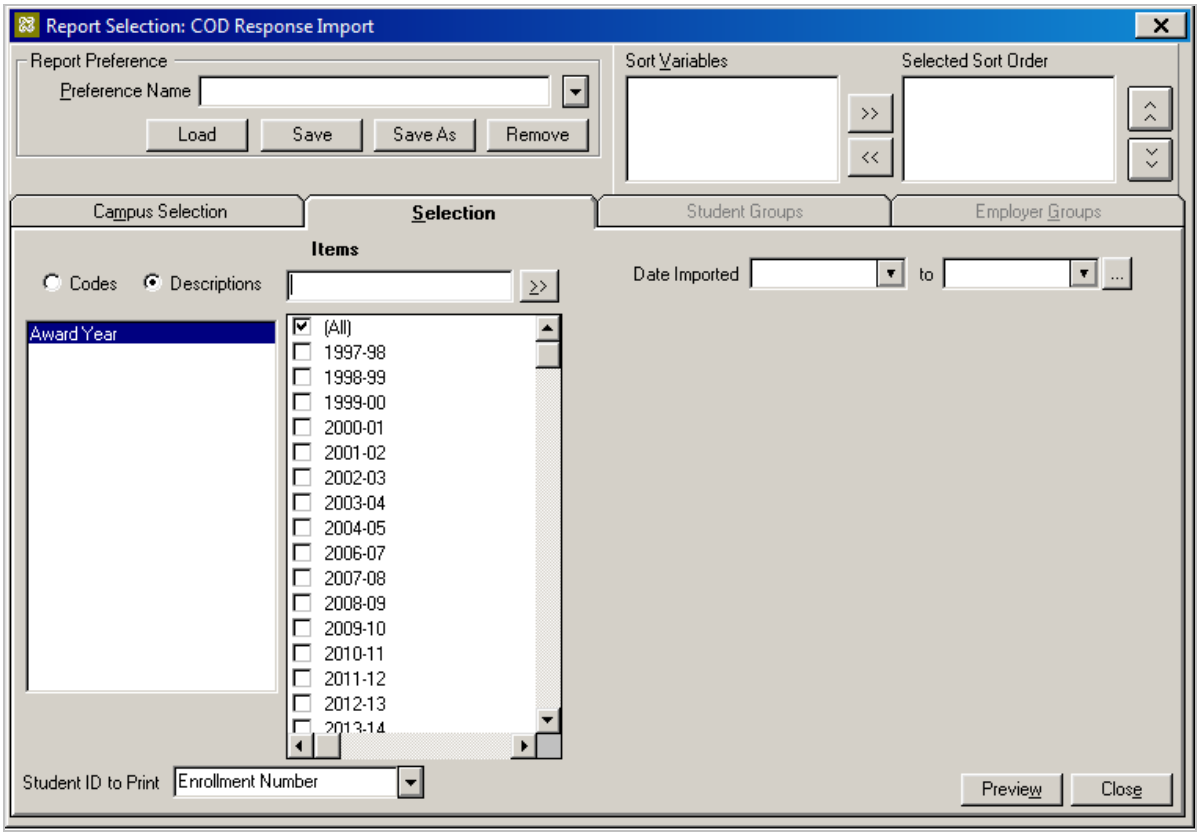
COD Response Import

This report provides batch details for COD Awards imported to CampusNexus Student. These awards include ACG, Direct Loans, Pell, and SMART.

To run the report:

1. Navigate to **Reports > Financial Aid > COD Response Import**. The Report Selection: COD Response Import form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: The selection criteria include a Date Imported range and Award Year. You can select from a list of award years or select Empty. Empty award years are batches that contain multiple award years.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The header of the report output shows an Award Year or the word 'Multiple'. It also shows the Document ID, Date Exported, and the Report Entity ID.

   The Award Year column in the detail section is displayed only if the Award Year for the batch (header) is 'Multiple'.

   The report displays the following details:

   - Student Name
   - SSN

- Campus
- Financial Award ID
- Award Type
- Award Amount
- Disbursement #
- Gross Amount
- Net Amount
- Description of COD edit (comment) codes
- Disbursement Released or Not Released.

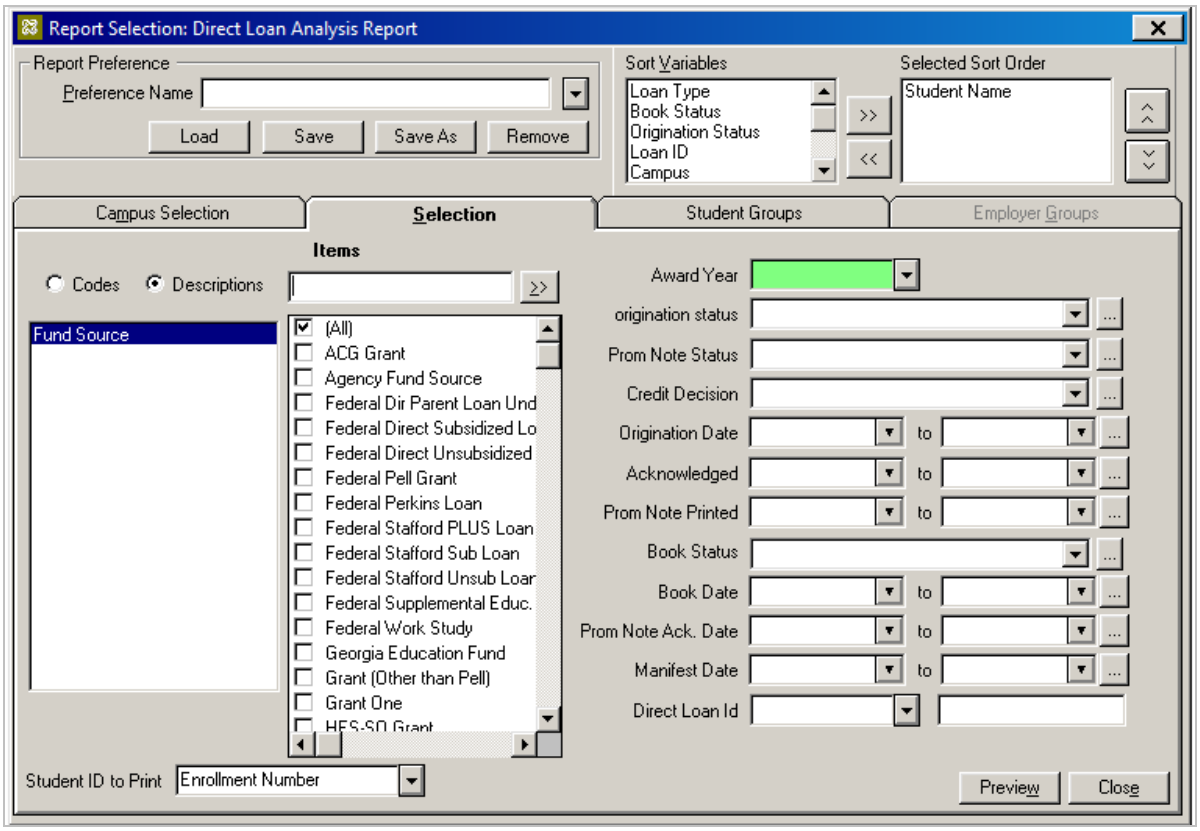
Direct Loan Analysis Report

This report provides a detailed analysis of the direct loan activity at your institution. It also includes a summary page of statistics about your institution's direct loans.

To run the report:

1. Navigate to **Reports > Financial Aid > Direct Loan Analysis Report**. The Report Selection: Direct Loan Analysis Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - Campus
   - Program Version
   - Start Date
   - Student Status in school

- Loan Type
- Booked Status

For each loan type, the Totals Page includes totals for number of students, total loan amount, total loan amount booked, and total amount disbursed.

A summary table of origination statuses displays the number of subsidized and unsubsidized Stafford loans and PLUS loans.

A table of Prom Note statuses displays the number of subsidized and unsubsidized Stafford loans and PLUS loans.

Another summary table lists the number of booked and unbooked subsidized, unsubsidized, and PLUS loans.

A time average analysis table shows the average days and number of loans for six milestones in direct loan processing:

- From Origination Date to Batched to COD Date
- From Origination Date to Prom Note Printed Date
- From Prom Note Printed Date to Signed Prom Note Received
- From Signed Prom Note Received to Manifest Date
- From Prom Note Printed Date to Manifest Date
- From Manifest Date to Prom Note Acknowledged Date

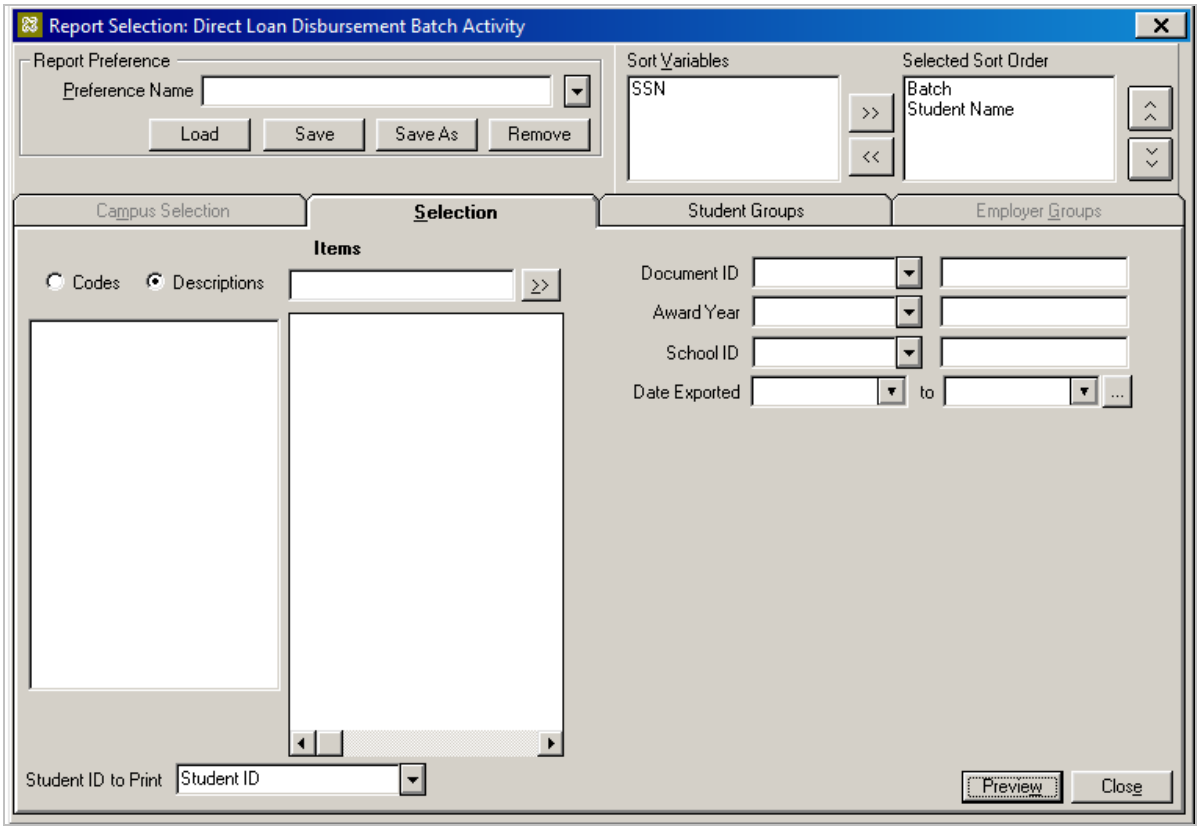
Direct Loan Disbursement Batch Activity

This report provides information about direct loan batch activity for phase-in participant batches and full participant batches. The data selection is based on the Award Year, School ID (six-digit direct loan school ID), and a date range for which to include batches. The date the batch was created is compared with the date range entered.

The report selects all rows from the FA Batch Export/Import table where the type is direct loan and the report selection criteria are met. In addition, the program evaluates the File Type #H in the FA Batch Export/Import table.

To run the report:

1. Navigate to **Reports > Financial Aid > Direct Loan Disbursement Batch Activity**. The Report Selection: Direct Loan Disbursement Batch Activity form is displayed.
2. Select appropriate options on the Selection tab.



3. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The reports list summary information about the loan disbursement batch activity. The report displays the following details:

   - Student Name
   - Campus
   - Model

- Loan ID
- Loan Amount
- Disbursement Number
- Sequence Number
- Disbursement Type
- Disbursement Amount
- Status

The detail records in the batch are listed on the report or included as a drill down.

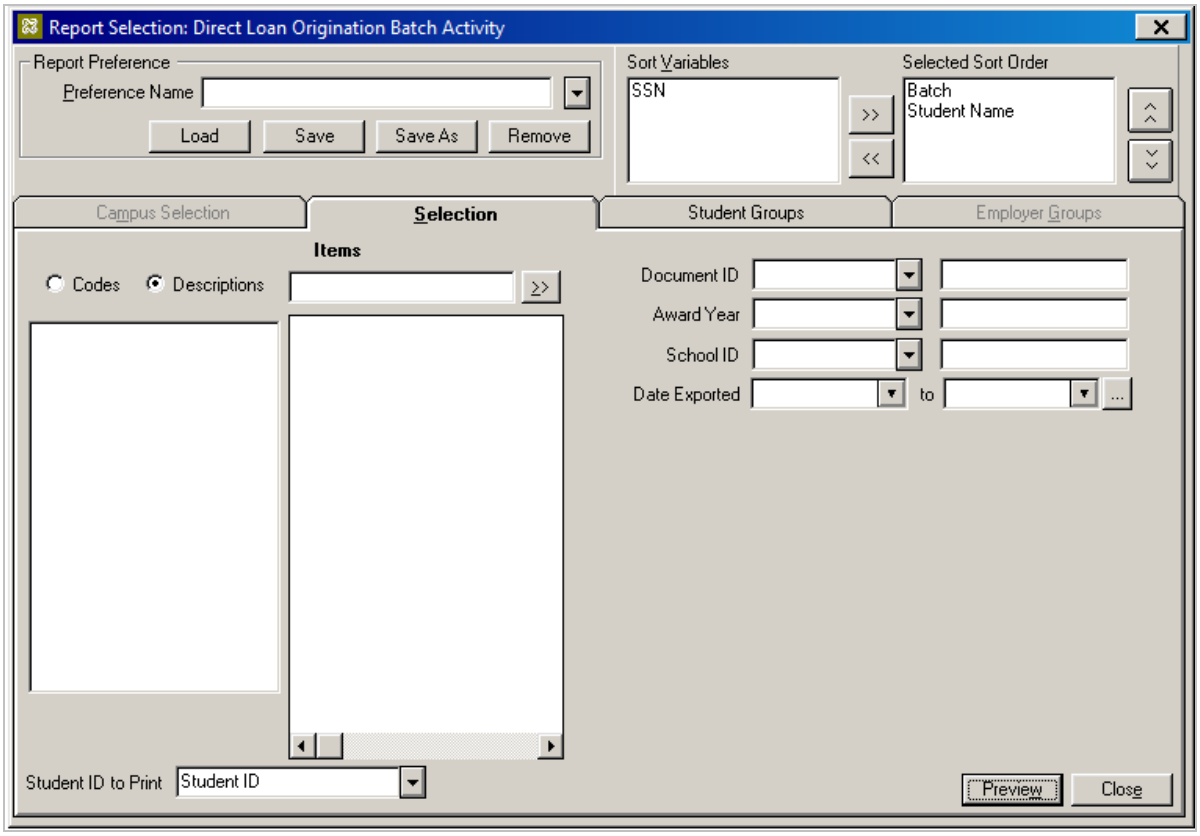
Direct Loan Origination Batch Activity

This report provides information about direct loan batch activity for phase-in participant batches and full participant batches. The data selection is based on the Award Year, School ID (six-digit direct loan school ID), and a date range for which to include batches. The date the batch was created is compared with the date range entered.

The report selects all rows from the FA Batch Export/Import table where the type is direct loan and the report selection criteria are met. In addition, the program evaluates the File Types PF or #D in the FA Batch Export/Import table.

To run the report:

1. Navigate to **Reports > Financial Aid > Direct Loan Origination Batch Activity**. The Report Selection: Direct Loan Origination Batch Activity form is displayed.
2. Select appropriate options on the Selection tab.



3. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The reports list summary information about the loan origination batch activity. The report displays the following details:

   - Student Name
   - Campus
   - Model

- Loan ID
- Origination Status
- Loan Amount

- The detail records in the batch are listed on the report or included as a drill down.

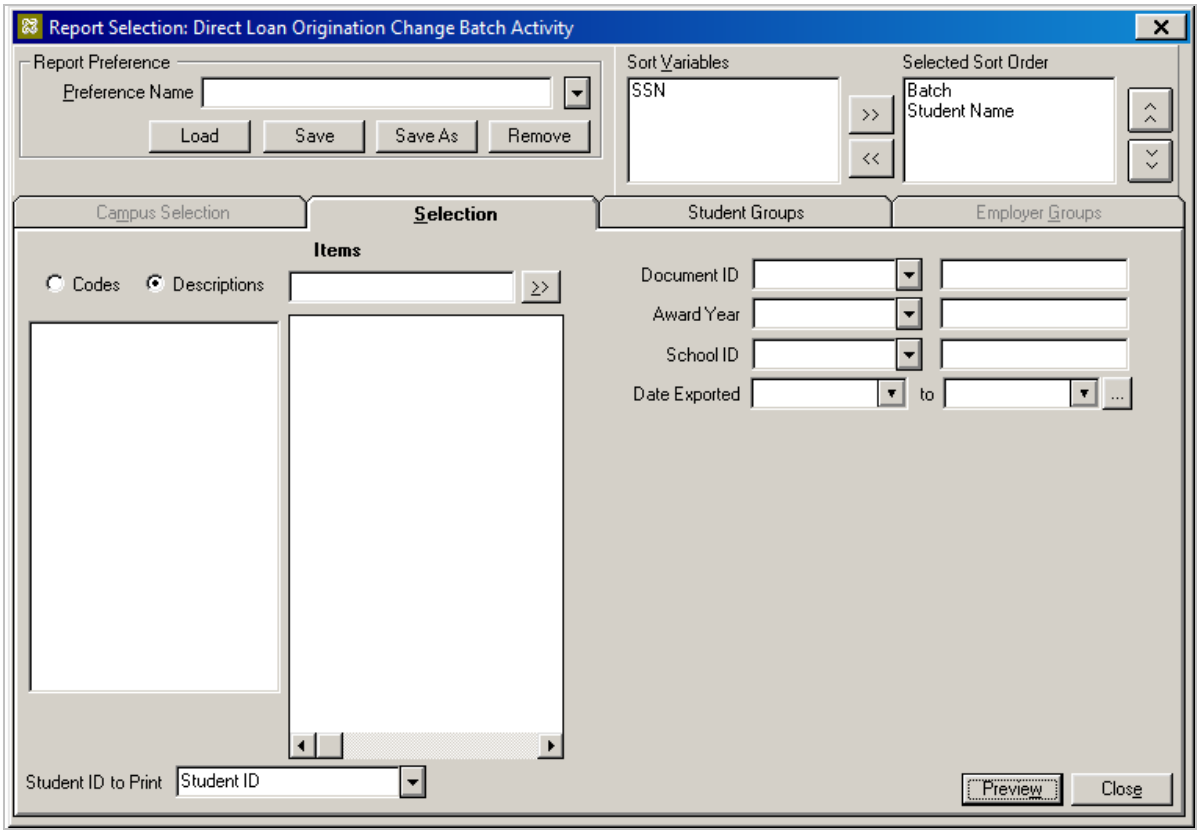
Direct Loan Origination Change Batch Activity

This report provides information about direct loan batch activity for phase-in participant batches and full participant batches. The data selection is based on the Award Year, School ID (six-digit direct loan school ID), and a date range for which to include batches. The date the batch was created is compared with the date range entered.

The report selects all rows from the FA Batch Export/Import table where the type is direct loan and the report selection criteria are met. In addition, the program evaluates the File Type #E in the FA Batch Export/Import table.

To run the report:

1. Navigate to **Reports > Financial Aid > Direct Loan Origination Change Batch Activity**. The Report Selection: Direct Loan Origination Change Batch Activity form is displayed.
2. Select appropriate options on the Selection tab.



3. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The reports list summary information about the loan origination change batch activity. The report displays the following details: :

   - Student Name
   - Campus
   - Model

- Loan ID
- Loan Amount
- Field Changed
- New Field Value
- Status: PENDING, ACCEPTED, or REJECTED

The detail records in the batch are listed on the report or included as a drill down.

Disbursement Batches Not Reconciled

This report includes details about posted batches where the amount posted is not reconciled, for example when posted dollars plus returned dollars are unequal to the total amount for the batch.

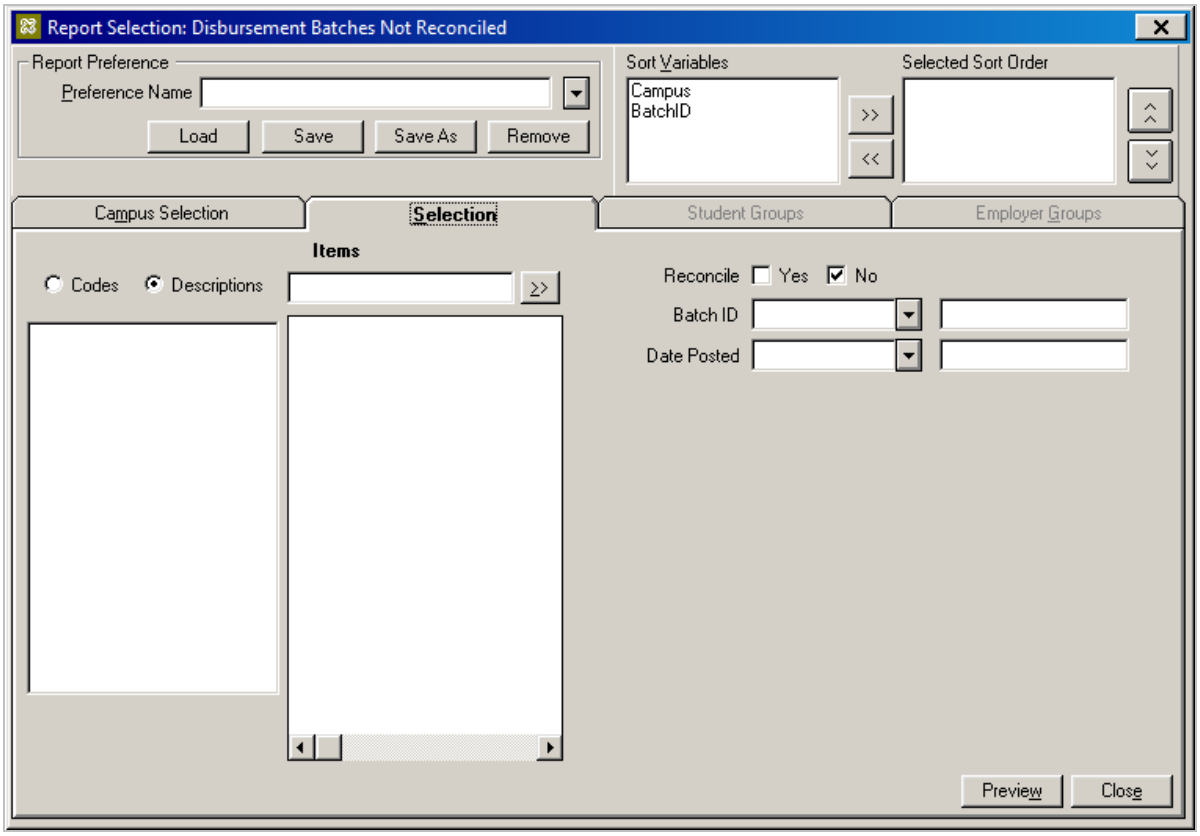
The report enables you to:

- Determine that a deposit associated with a disbursement batch is required before the batch can auto-post.
- Determine that a disbursement batch has a deposit associated with it.

To run the report:

Note: This report may also be run by clicking **View Report** in the Deposit Tracking and Reconciliation User Interface.

1. Navigate to **Reports > Financial Aid > Disbursement Batches Not Reconciled**. The Report Selection: Disbursement Batches Not Reconciled form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Select appropriate options on the Selection tab.

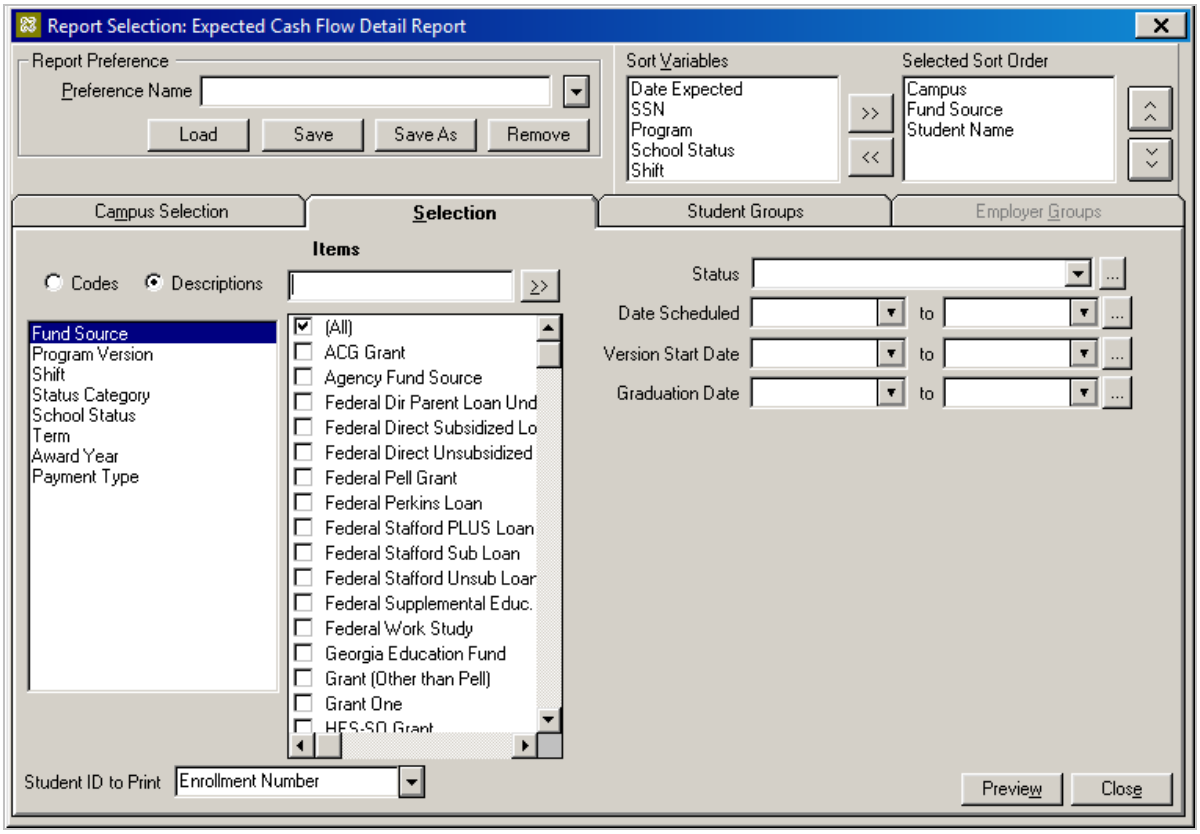
Expected Cash Flow Detail Report

This report provides details to back up the Expected Cash Flow Summary report.

To run the report:

1. Navigate to **Reports > Financial Aid > Expected Cash Flow Detail Report**. The Report Selection: Expected Cash Flow Detail Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: Select three sort variables. If you are matching the expected cash flow details to the Expected Cash Flow Summary Report, the sort variables should be the same.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - School Status
   - Shift

- Start Date
- Graduation Date
- Account Balance
- Fund Source
- Date App Sent
- Date Scheduled
- Net Amount

Subtotals and a grand total are listed with counts and amounts. The drop date is listed in the Excel output view.

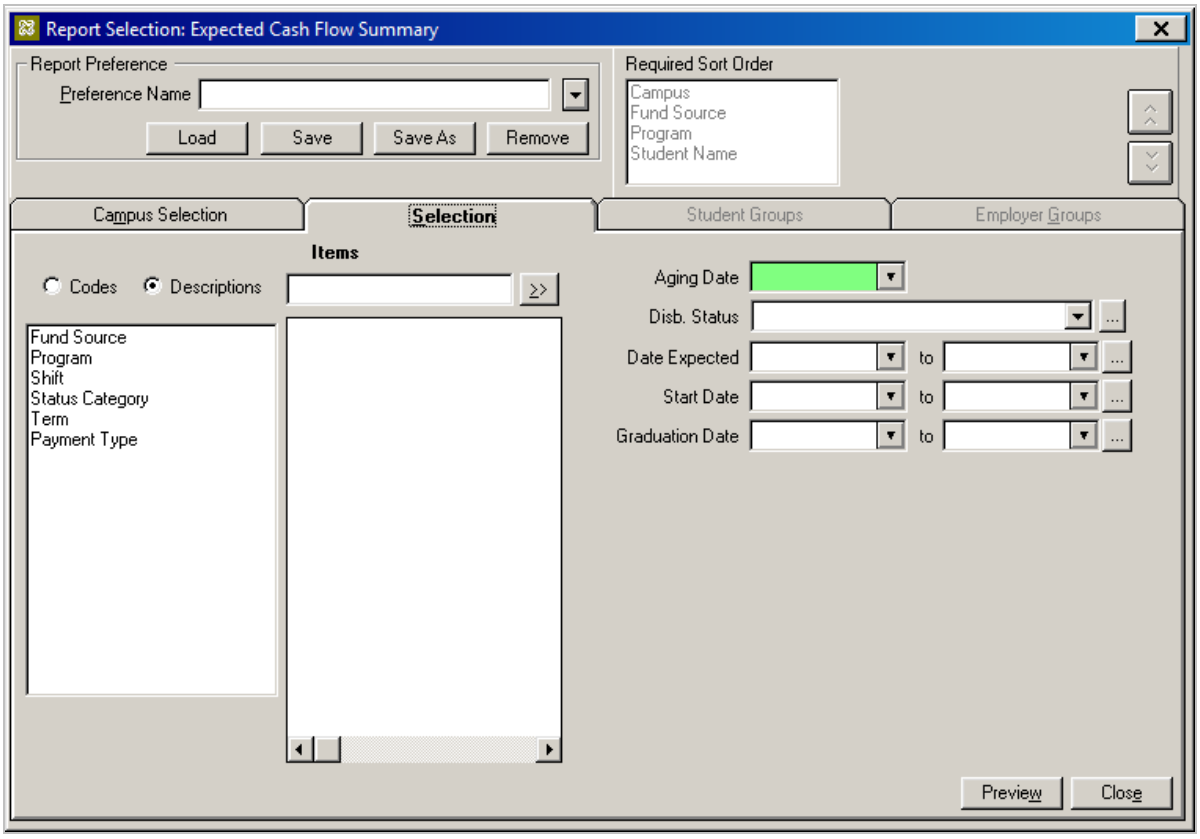
Expected Cash Flow Summary

This report presents a summary of the expected cash flow. The report selects disbursements that have not yet been received.

The report does not select records from the FA disbursement table if the disbursement status is Canceled or Paid.

To run the report:

1. Navigate to **Reports > Financial Aid > Expected Cash Flow Summary Report**. The Report Selection: Expected Cash Flow Summary Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Fund Source
   - Past Due number of disbursements and amount for current (less than 30 days), 30, 60, 90+

- Row totals, column subtotals, and grand totals for amounts

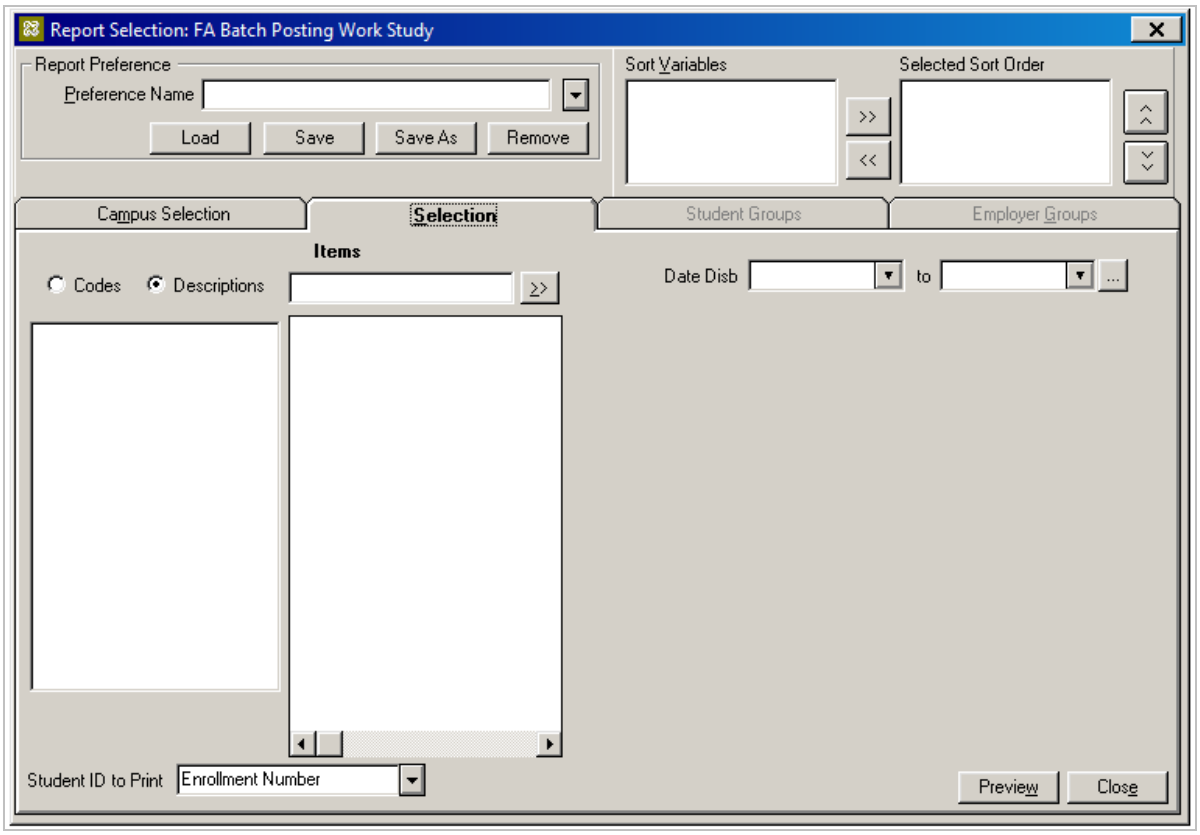
FA Batch Posting Work Study

This report lists work study payments that have been entered in CampusNexus Student. The report shows a grand total on the amount paid sorted by student name.

To run the report:

1. Navigate to **Reports > Financial Aid > FA Batch Posting Work Study**. The Report Selection: FA Batch Posting Work Study form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - Award Year
   - Amount Packaged
   - Period End Date
   - Term
   - Academic Year
   - Hours

- Amount Paid
- Check Number

There is a grand total on amount paid.

FA Disbursement Batch Tracking

This report provides a detailed audit trail to the batches prepared and posted in CampusNexus Student. This report can be used to view the paid or not paid status of each disbursement in a batch.

This report gathers data from two tables: FaDisbBatch and FaDisbBatchDetail. The FaDisbBatch table holds one record for each batch of disbursements prepared in CampusNexus Student. The FaDisbBatchDetail table holds one record for each disbursement in each batch.

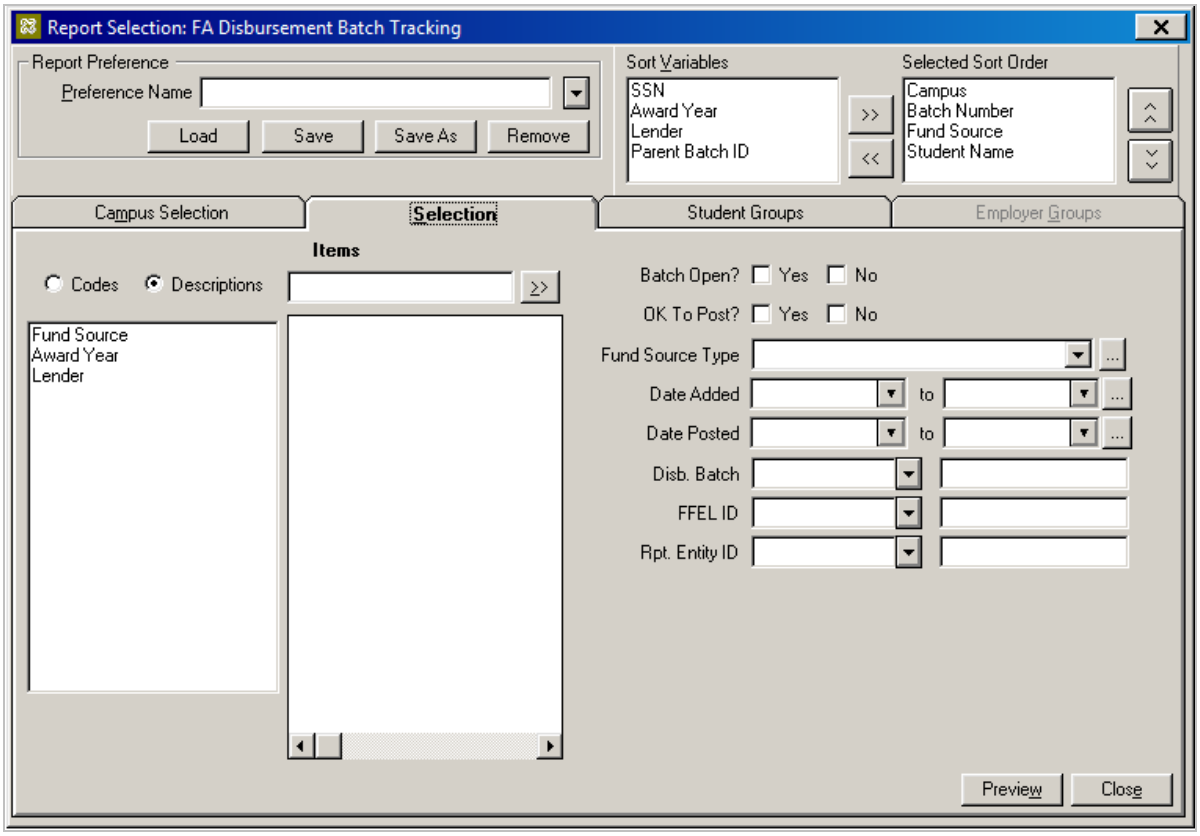
To run the report:

1. Navigate to **Reports > Financial Aid > FA Disbursement Batch Tracking**. The Report Selection: FA Disbursement Batch Tracking form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Notes:

   - The Batch Open? and OK To Post? flags allow you to select batches that have not yet been approved to post.
   - The FFEL ID and Rpt. Entity ID fields enable you to submit one or more IDs as selection criteria. The FFEL ID must be in the following format: FFEL ID plus Branch (e.g., 12345678).
   - You can only view disbursement records associated with FFEL IDs or Rpt. Entity IDs that belong to the campus locations to which you have security access.
   - When you enter the FFEL IDs or the Rpt. Entity ID, these IDs override the Campus Selection tab as well as the selection criterion under Items on the Selection tab. If the FFEL ID is not used, the report displays campus specific information (as selected in the criteria) per your defined campus permissions.
   - The Disb. Batch field allows you to enter comparison parameters for batch numbers, such as Equal to, Not Equal To, Greater than, Less than, etc., before the Batch Number. To generate a report for specific batch numbers, enter the batch number or multiple batch numbers separated by semicolons (;).
   - When generating this report, the following is applicable only if Campus is selected in the Selected Sort Order section to display the disbursement totals based upon campus locations:
     - If the output includes more than one batch, all original batch records are displayed together and provide a batch total for the entire original batch.
     - The disbursement records are sorted by campus, providing a summary per campus location to include the sum total per campus location.
     - If more than one FFEL ID is included in the report, the disbursement records are sorted by FFEL ID and then campus locations, giving a sum total per FFEL ID, and providing a secondary sort by campus location.
     - If more than one Rpt. Entity ID is included in the report, the disbursement records are sorted by Rpt.

Entity ID and then by campus locations, giving a sum total per Rpt. Entity ID, and providing a secondary sort by campus location.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Campus
   - Award Year
   - Batch #
   - Lender
   - # Disbursements
   - Batch Amount
   - Approved Amount
   - Created By
   - Date Credits
   - Date Posted
   - Posted by
   - Student Name
   - SSN
   - Fund Source
   - Disbursement Number (for each disbursement included in the batch)
   - Disbursement Amount
   - Expiration Date

- Payment Period
- Approval indicator (Yes/No)
- Additional Information

If any students in this batch are missing documents, a field labeled ' Missing Documents' is presented in the Additional Information area. Document Codes for all missing documents, by student, are listed.

FA Export/Import Batch Tracking

This report lists information about files that have been imported or exported for Application Processing, Clearinghouse, COD, Direct Loan, Pell/RFMS, SSCR and SSCE. The report provides summary list of files and helps the school quickly identify any batches for which the school has not received a response or batches that have been rejected. In addition, this report provides a summary snapshot of Financial Aid activity that is occurring at the school.

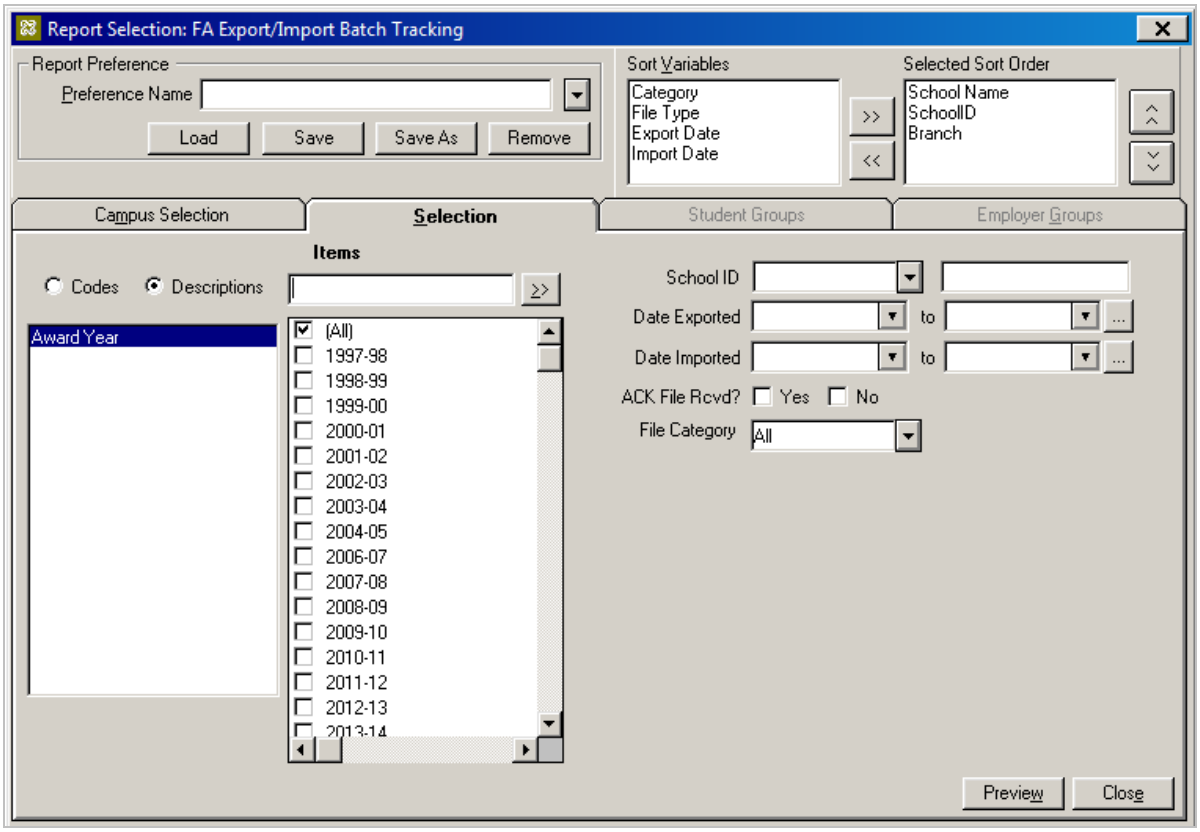
The data for this report is extracted from FaBatchExpImp. This table contains records for several categories of batches. The File category includes the following batches:

- All
- ACG/SMART
- Application Processing
- Clearinghouse
- Common Origination and Disbursement (COD)
- Direct Loan
- Pell/RFMS
- SSCE Error Notification
- SSCE Roster file

This means that the only records that are considered for inclusion on this report are records where the column ExtImpType = ACG/SMART, APPLICPROC, CLEARINGHS, DIRECTLOAN, Pell/RFMS, SSCR, SSCE.

To run the report:

1. Navigate to **Reports > Financial Aid > FA Export/Import Batch Tracking**. The Report Selection: FA Export/Import Batch Tracking form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - School Name
   - Branch ID
   - Category
   - File Type
   - Award Year (the word 'Multiple' displays for batches that are not specific to an award year)
   - Date Exported/Date Imported
   - Import and Export File Name
   - Number of Records
   - Batch ID/Batch Rejected Indicator
   - Exported by User/Imported by User

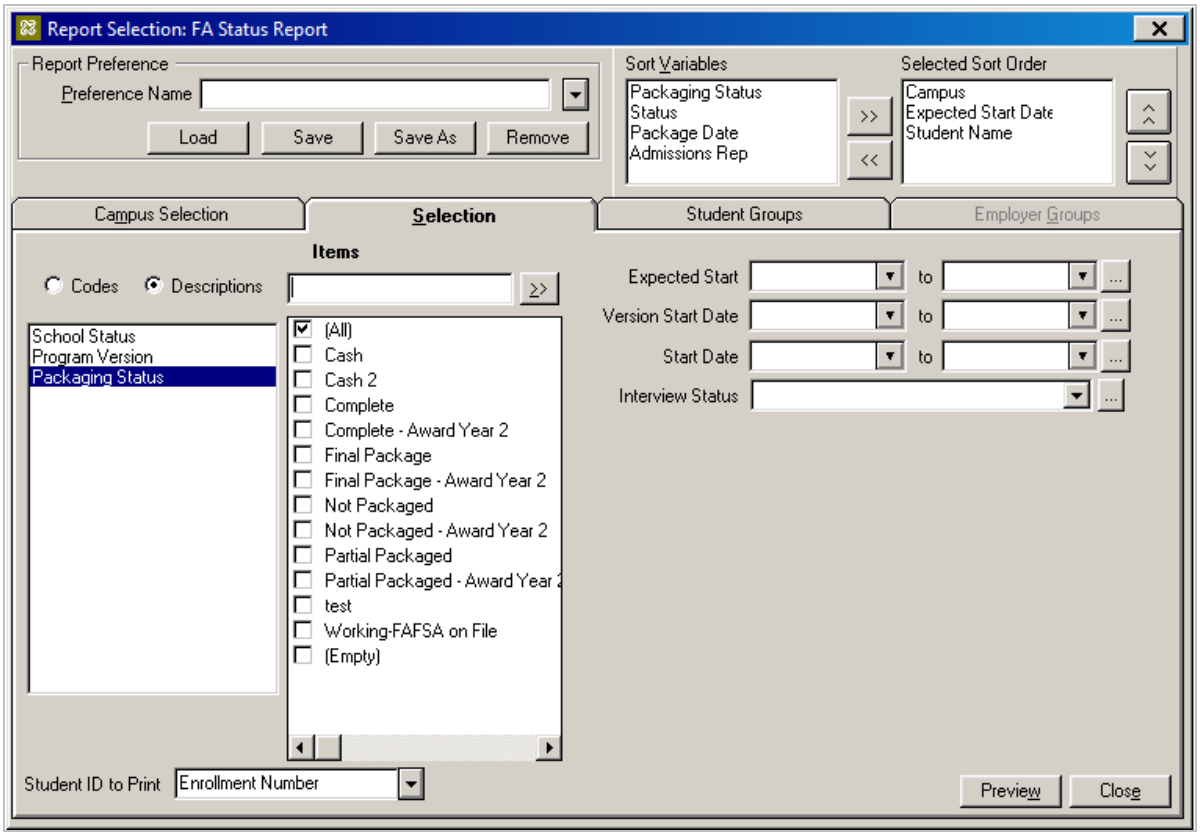
FA Status Report

This report is used to track financial aid packaging information for students.

To run the report:

1. Navigate to **Reports > Financial Aid > FA Status Report** The Report Selection: FA Status Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Program Version
   - Date Packaged
   - Verification Status
   - Institutional Charges
   - Net Amount Packaged

- Student Id
- Expected Start Date
- Status
- Award Year Packaged Status
- Missing Documents
- Interview Status
- City, State, ZIP
- Phone
- Admissions Rep

The Net Amount calculation excludes canceled disbursements and displays the adjusted Net Amount on the report.

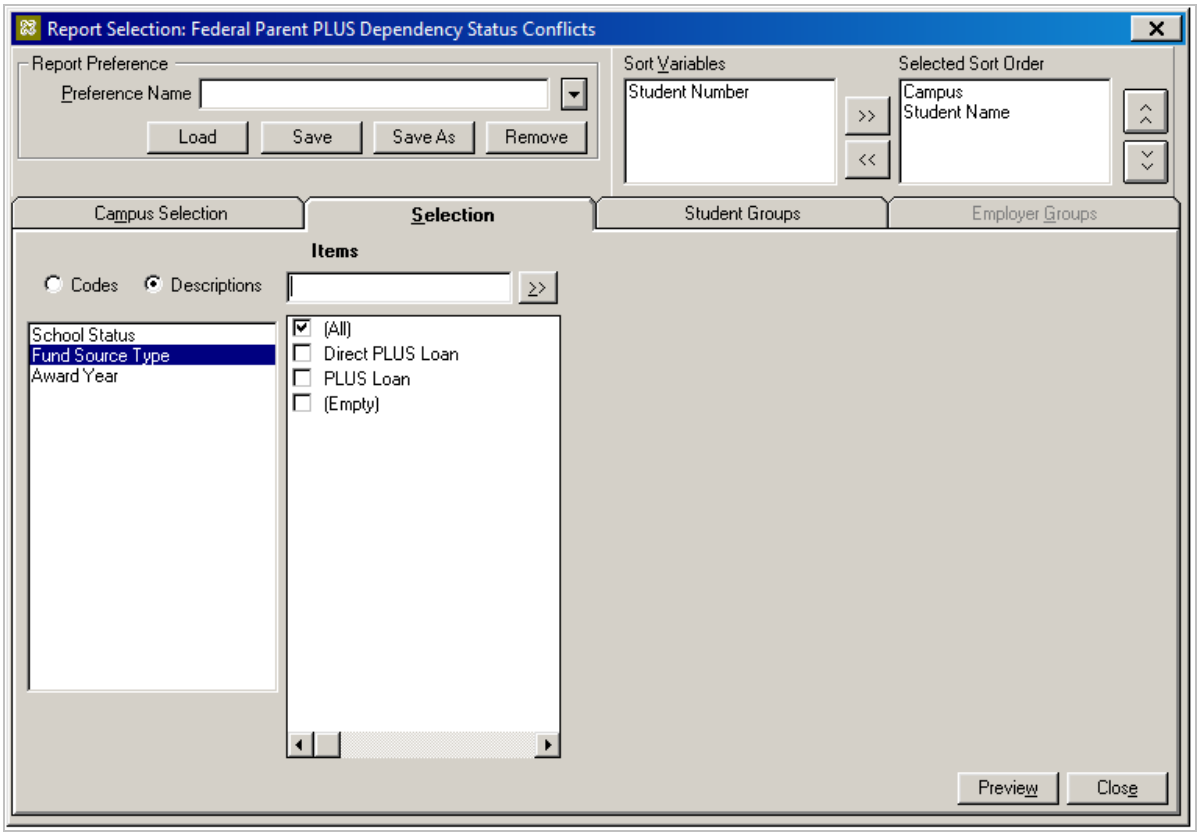
Federal Parent PLUS Dependency Status Conflicts

This report displays student records that have conflicts in the dependency status.

To run the report:

1. Navigate to **Reports > Financial Aid > Federal Parent PLUS Dependency Status Conflicts**. The Report Selection: Federal Parent PLUS Dependency Status Conflicts form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Campus
   - Student Name
   - Student ID
   - Model
   - Fund Source
   - Total Amount

- Date Added
- Manual Dependency Status
- Academic Year

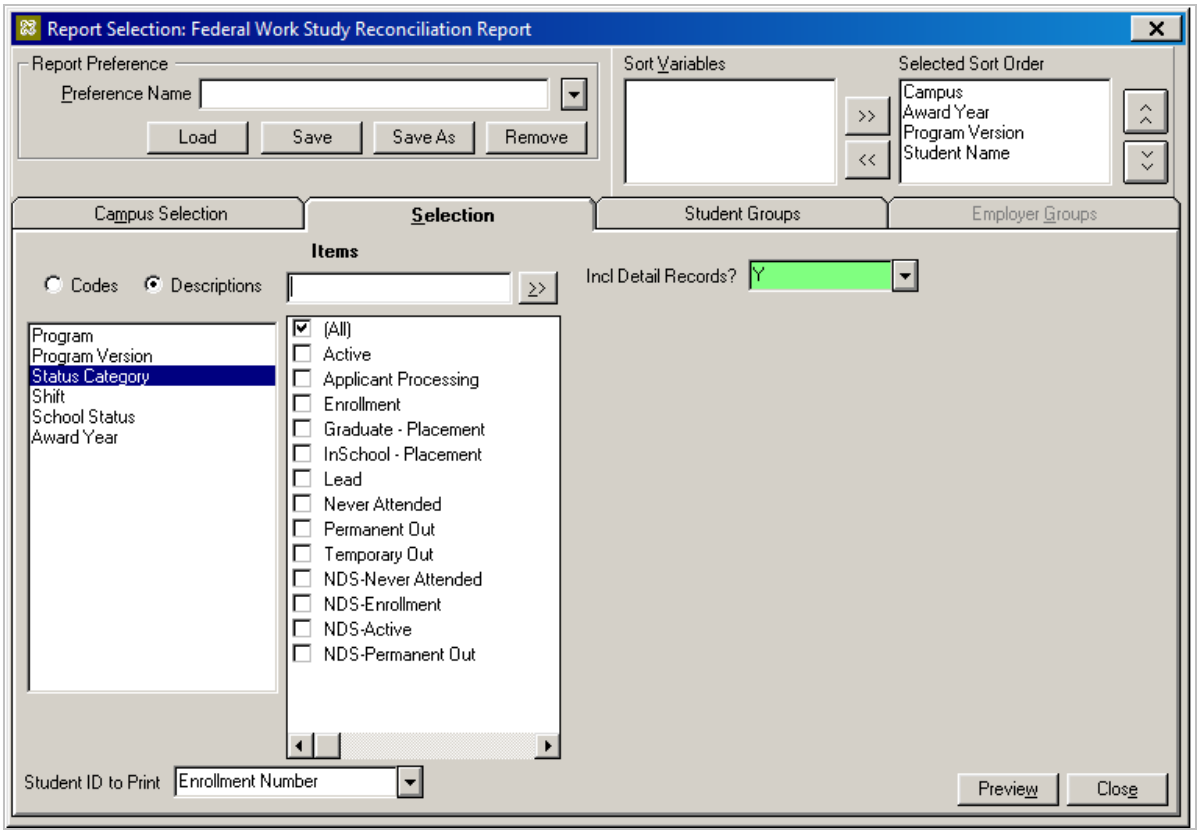
Federal Work Study Reconciliation Report

This report lists the hours worked, hourly rate, and other related information about students involved in the Work Study program.

To run the report:

1. Navigate to **Reports > Financial Aid > Federal Work Study Reconciliation Report**. The Report Selection: Federal Work Study Reconciliation Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: You must choose whether to display detail records on the report.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

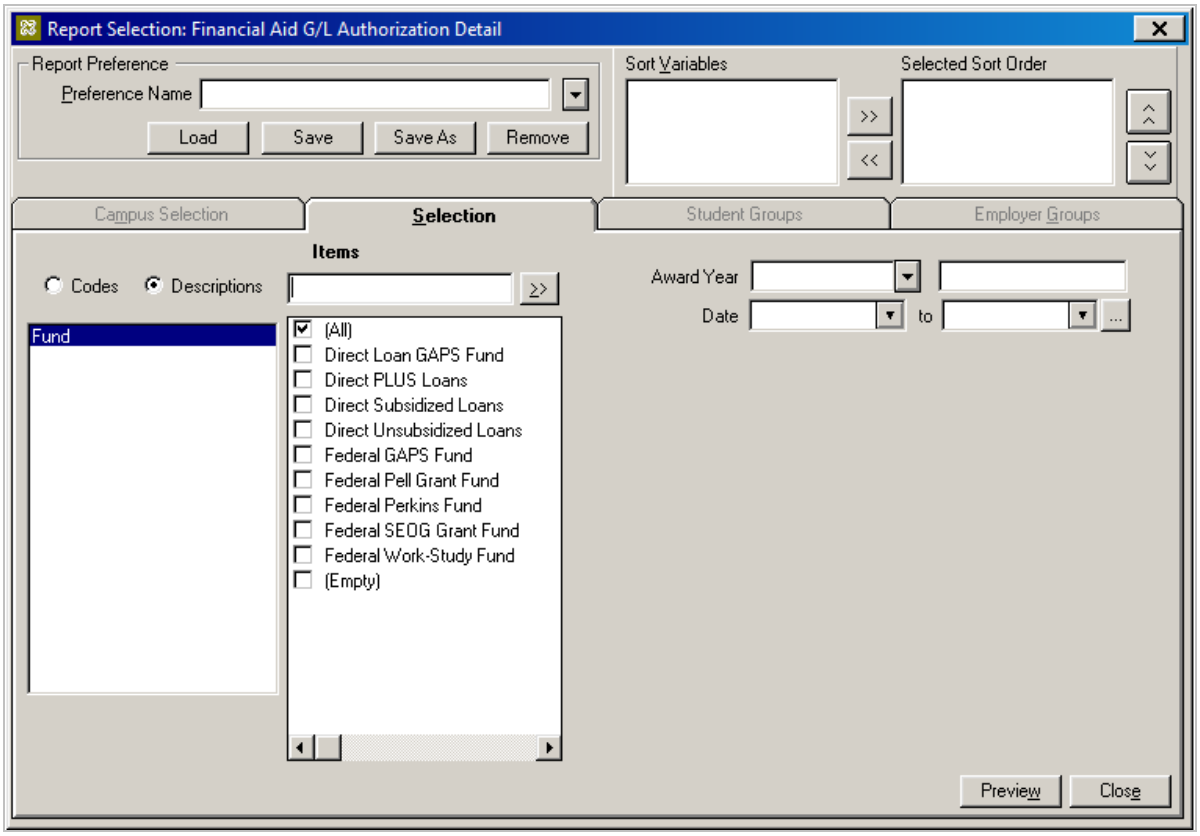
5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

Financial Aid G/L Authorization Detail

This report lists the status of the authorization levels in the various fund accounts at the detail level.

To run the report:

1. Navigate to **Reports > Financial Aid > Financial Aid G/L Authorization Detail**. The Report Selection: Financial Aid G/L Authorization Detail form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Description
   - Date
   - Reference
   - Amount.

Transactions are grouped and subtotaled by fund ID and award year.

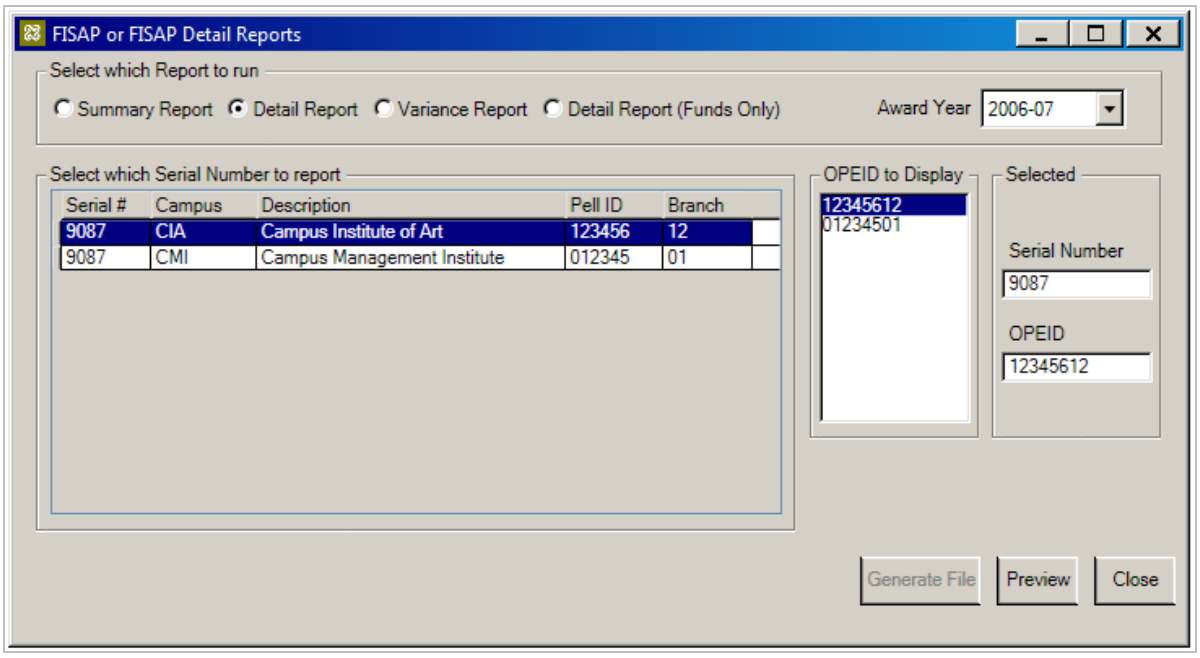
FISAP or FISAP Detail Reports

The FISAP or FISAP Detail Reports form allows you to preview and print a summary or detailed report for the selected award year by selecting the school, based upon serial number, and the OPEID of the affiliated campus. Refer to the FISAP Data Correction Tool in Regulatory Help for additional information.

The Fiscal Operations to Report and Application to Participate (FISAP) requirements are outlined by the Department of Education. For detailed information on preparation of FISAP, visit: https://ifap.ed.gov/ifap/.

To run the report:

1. Navigate to **Reports > Financial Aid > FISAP or FISAP Detail Reports**. The FISAP or FISAP Detail Reports form is displayed.



2. From the 'Select Which Report to run' section, choose one of the following options:
   - **Summary Report** – to run a FISAP summary report
   - **Detail Report** – to run a detailed report with a listing of individual students
   - **Variance Report** – to show the variance between FISAP detail report and the Cash Receipt detail report from Student Accounts
   - **Detail Report (Funds Only)** – to run a detailed report of only those students who received funds
3. Select the applicable **Award Year** from the drop-down list.
4. From the 'Select which Serial Number to report' section, select the **Serial #** of the school.

   The OPEID to Display appears when a selection has been made.

   Note: Stand-alone schools and branch numbers of a main campus are typically 00. In exceptional cases a different numbering convention is used when a school is acquired by another school.
5. From the 'OPEID to Display' section, choose the **OPEID** of the affiliated campus.

The OPEID and Serial Number fields appear.

Note: CampusNexus Student uses the combination of school code (also known as Pell ID) and branch number to create the OPEID.

6. For FISAP Detail Reports post-2010 ONLY:

   Click **Generate file**. A dialog box is displayed, enabling you to save the FISAP Detail Report as a file that can be exported to Excel.

   – OR –

   Click **Preview**. The report is assembled and displayed in the Report Viewer.

   A report for the following academic year display 'Draft' in the header.

7. Click **Close** to close the form.

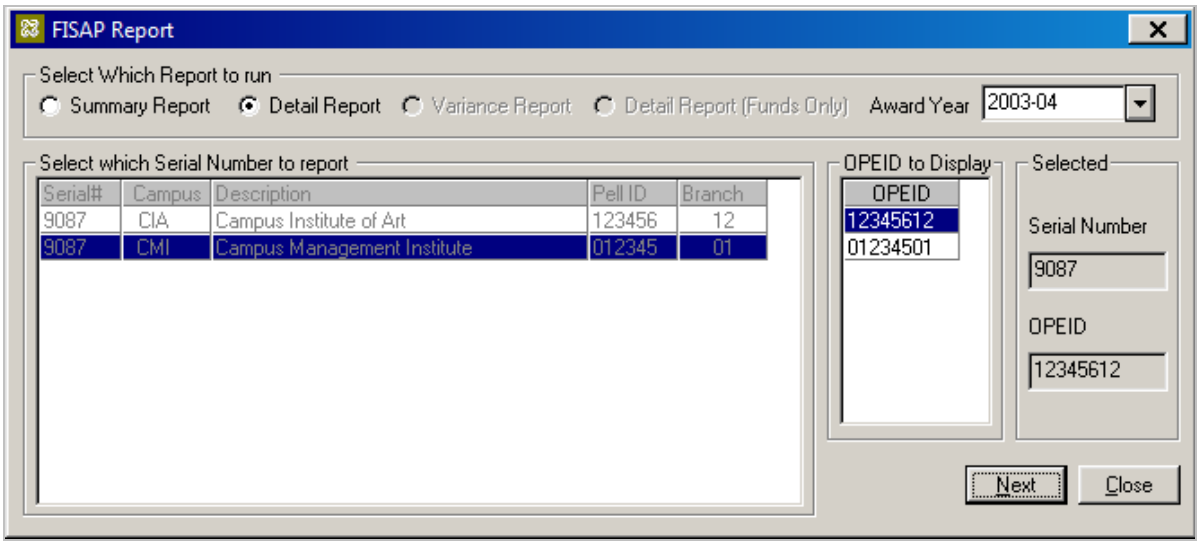
FISAP or FISAP Detail Reports (Prior to 2005-06)

The FISAP Report form allows you to preview and print a summary or detailed report for the selected award year by selecting the school, based upon serial number, and the U.S. Department of Education's Office of Postsecondary Education Identification (OPEID) of the affiliated campus. Refer to ' FISAP Data Correction Tool' in Regulatory Help for additional information.

The Fiscal Operations to Report and Application to Participate (FISAP) requirements are outlined by the Department of Education. For detailed information on preparation of FISAP, visit: https://ifap.ed.gov/ifap/.

To run the report:

1. Navigate to **Reports > Financial Aid > FISAP or FISAP Detail Reports (Prior to 2005-06)**. The FISAP Report form is displayed.



2. From the 'Select Which Report to run' section, choose one of the following radio buttons.
   - **Summary Report** – to run a FISAP summary report
   - **Detail Report** – to run a detailed report with a listing of individual students
   - **Variance Report** – to run a report on the variance between the FISAP detail report and the Cash Receipt detail report from Student Accounts
   - **Detail Report (Funds Only)** – to run a detailed report of only those students who received funds
3. Select the applicable **Award Year** from the drop-down list.
4. From the 'Select which Serial Number to report' section, select the **Serial #** of the school. The 'OPEID to Display' appears when a selection is made.

   Note: Stand-alone schools and branch numbers of a main campus are typically 00. In exceptional cases a different numbering convention is used when a school is acquired by another school.
5. From the OPEID to Display section, choose the **OPEID** of the affiliated campus. The OPEID and Serial Number fields appear.

Note: CampusNexus Student uses the combination of school code (also known as Pell ID) and branch number to create the OPEID.

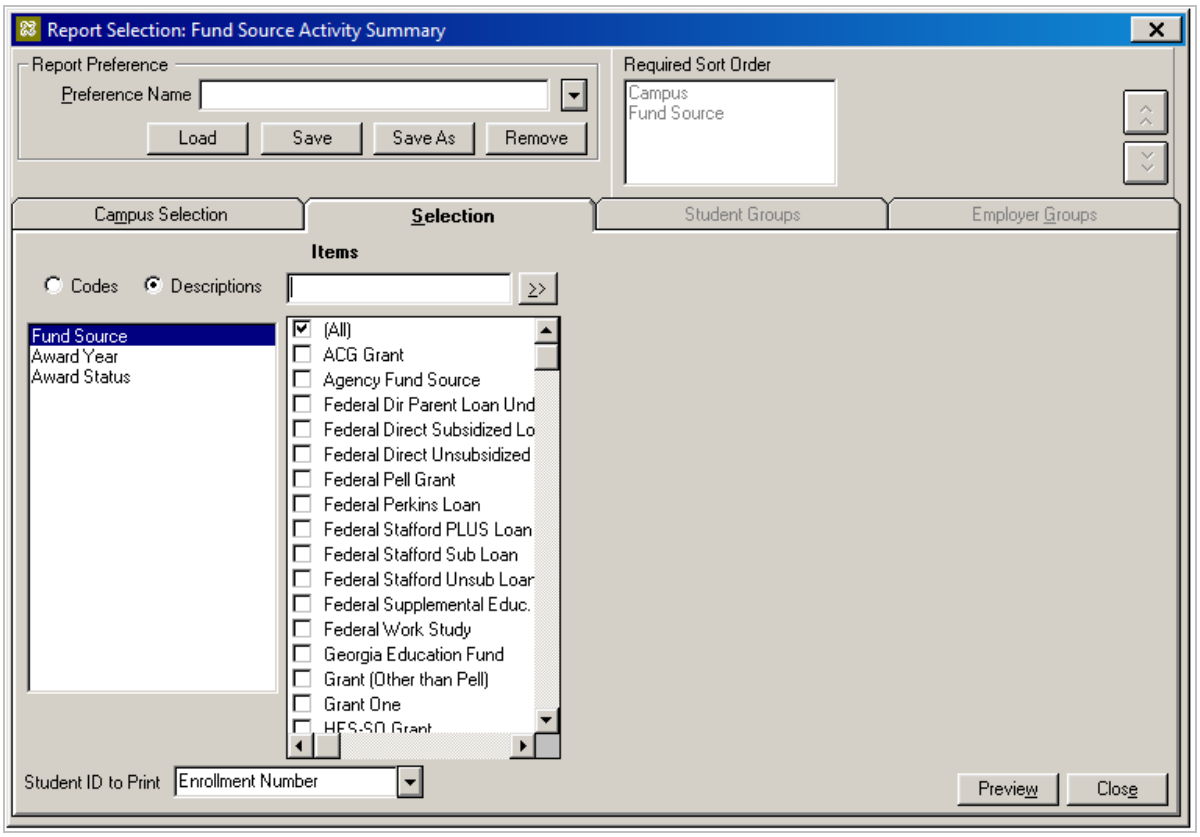
6. Click **Preview**. The report is assembled and displayed in the Report Viewer.

Fund Source Activity Summary Report

This report provides a summary of fund sources, number of students and awards, and amounts awarded, received, refunded, and voided.

To run the report:

1. Navigate to **Reports > Financial Aid > Fund Source Activity Summary Report**. The Report Selection: Fund Source Activity Summary Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Fund Source
   - Number of Students
   - Number of Awards
   - Amount Awarded
   - Amount Received

HOPE Evaluation Report

This report lists each student with HOPE and Zell Miller Scholarships and GPA. The HOPE Scholarship and Zell Miller Scholarship has four stages, or tiers, throughout the student's program.

1. Student has attempted 1 - 29 credit hours
2. Student has attempted 30 - 59 credit hours
3. Student has attempted 60 - 89 credit hours
4. Student has attempted 90 - 127 credit hours

The students are also evaluated at benchmark terms. This report addresses the Spring Term, 30, 60, and 90 credit hours attempted benchmark values.

The GPAs reported are based upon the benchmark that the student has reached. The 'As of Date' defaults to the current date and provides the most current HOPE GPA for each student for all terms completed before the current date. When the 'As of Date' is changed, the report calculates the GPA up to the date specified.

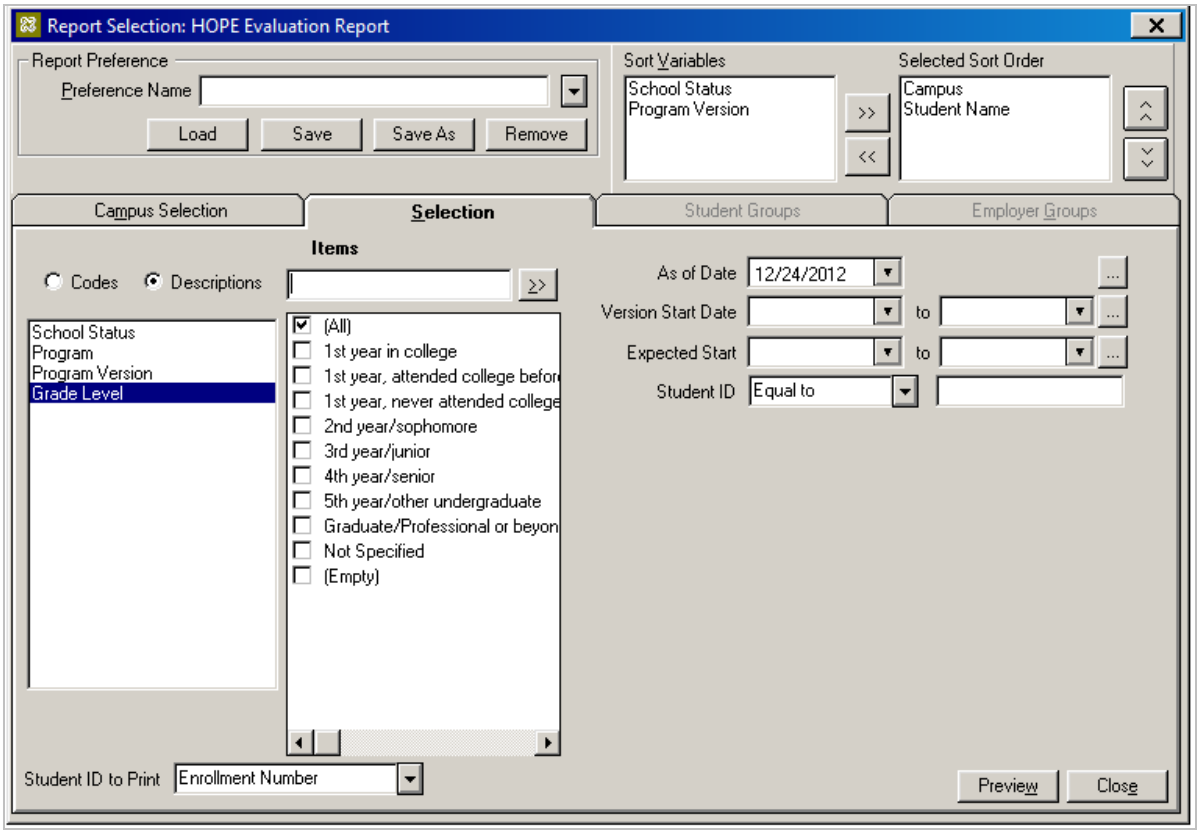
For transfer students, the Benchmark Spring term calculation logic calculates transfer credits and GPA on the basis of Transfer Status and Type configuration. The values are then stored in the database.

The HOPE Evaluation Report considers transfer credits on active and inactive terms while evaluating benchmarks. If a benchmark is not achieved within a registered term, the system reviews the student's transfer credits to evaluate if a benchmark 30, 60, or 90 is achieved. For the course that reaches the achieved benchmark, the report displays the Completion Date.

To run the report:

1. Navigate to **Reports > Financial Aid > HOPE Evaluation Report**. The Report Selection: HOPE Evaluation Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: If no report selections are made, the report lists all students with HOPE and Zell Miller Scholarships (using the fund sources that are configured in the Georgia State Configuration Tool on the Fund Source mapping tab). When report selections are made, students who do not meet the selection criteria, are filtered out of the report.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Term End Date when the most recent benchmark has been reached
   - Number of Credits completed for a particular benchmark
   - Cumulative HOPE GPA
   - Award Amount
   - Disbursements
   - Dates
   - Status
   - Amounts

HOPE Summary Report

This report provides historical HOPE Scholarship awarding information. Each student with HOPE and Zell Miller Scholarships with their respective HOPE GPA is listed on the report.

The HOPE and Zell Miller Scholarships have four stages, or tiers, throughout the students program:

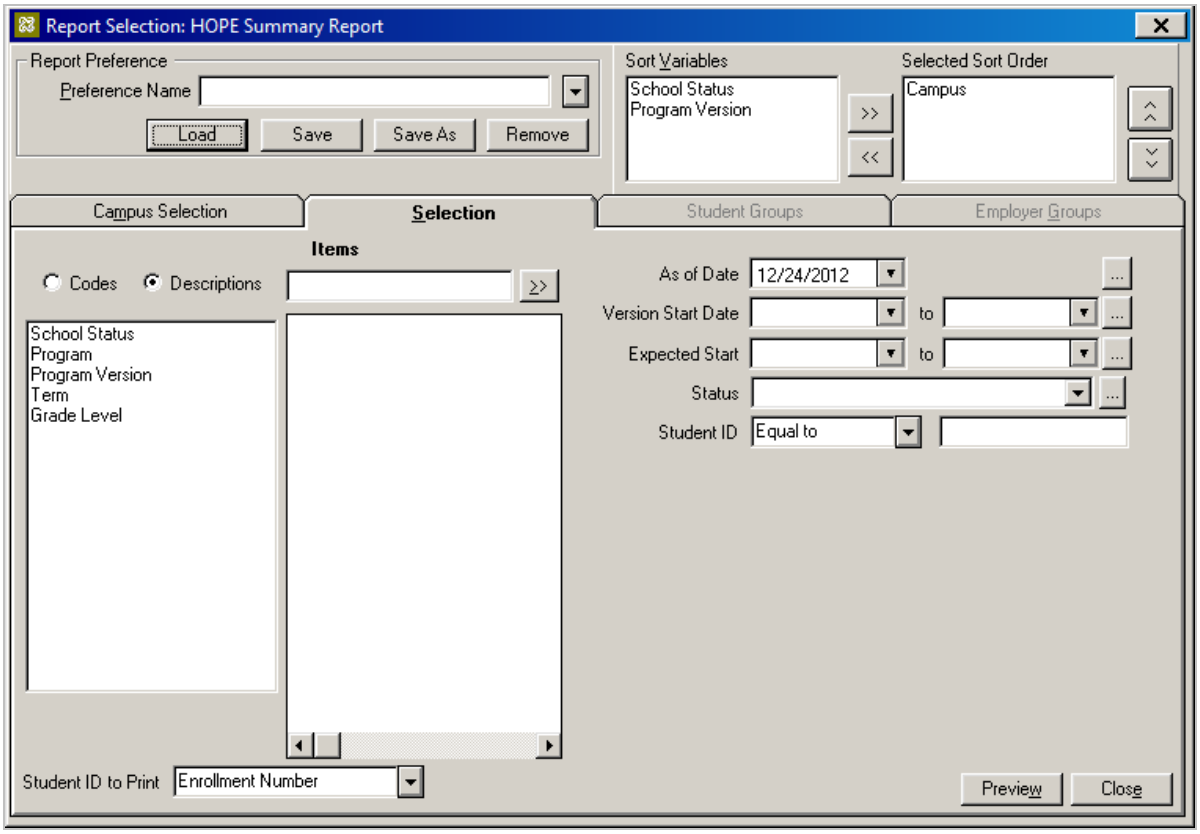
1. Student has attempted 1- 29 credit hours
2. Student has attempted 30 - 59 credit hours
3. Student has attempted 60 - 89 credit hours
4. Student has attempted 90 - 127 credit hours

The evaluation benchmarks for this report are 30, 60, and 90.

To run the report:

1. Navigate to **Reports > Financial Aid > HOPE Summary Report**. The Report Selection: HOPE Summary Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: If no report selections are made, the report lists all students with HOPE and Zell Miller Scholarships (using the fund sources that are configured in the Georgia State Configuration Tool on the Fund Source mapping tab). When report selections are made, students who do not meet the selection criteria are filtered out of the report.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

The report displays the following details:

- Term End Date when the most recent benchmark has been reached
- Number of Credits completed for a particular benchmark
- Cumulative HOPE GPA
- Award Amount
- Disbursements
- Dates
- Status
- Amounts

The report only displays and evaluates matching terms in the HOPE GPA to the terms configured in the Georgia State Configuration Tool on the Term Mapping tab.

ISIR Summary Report

This report contains processed application and correction information (i.e., comment codes) for Institutional Student Information Record (ISIR) data.

For CampusNexus Student 13.1, the ISIR comment codes related to the new Pell Grant Lifetime Eligibility Units (LEU) regulations are now in the Pell Lifetime Limit column:

- 345 (High Pell percentage)
- 346 (Pell percentage close to Pell LEU limit)
- 347 (Meet or exceed Pell LEU limit)
- 348 (No longer a problem)

If the Pell Lifetime Limit column is blank, it means the student has not come close enough to a Pell LEU limit to cause a comment code to be generated.

More information about Pell LEU regulations can be found here: Pell LEU Regulations.

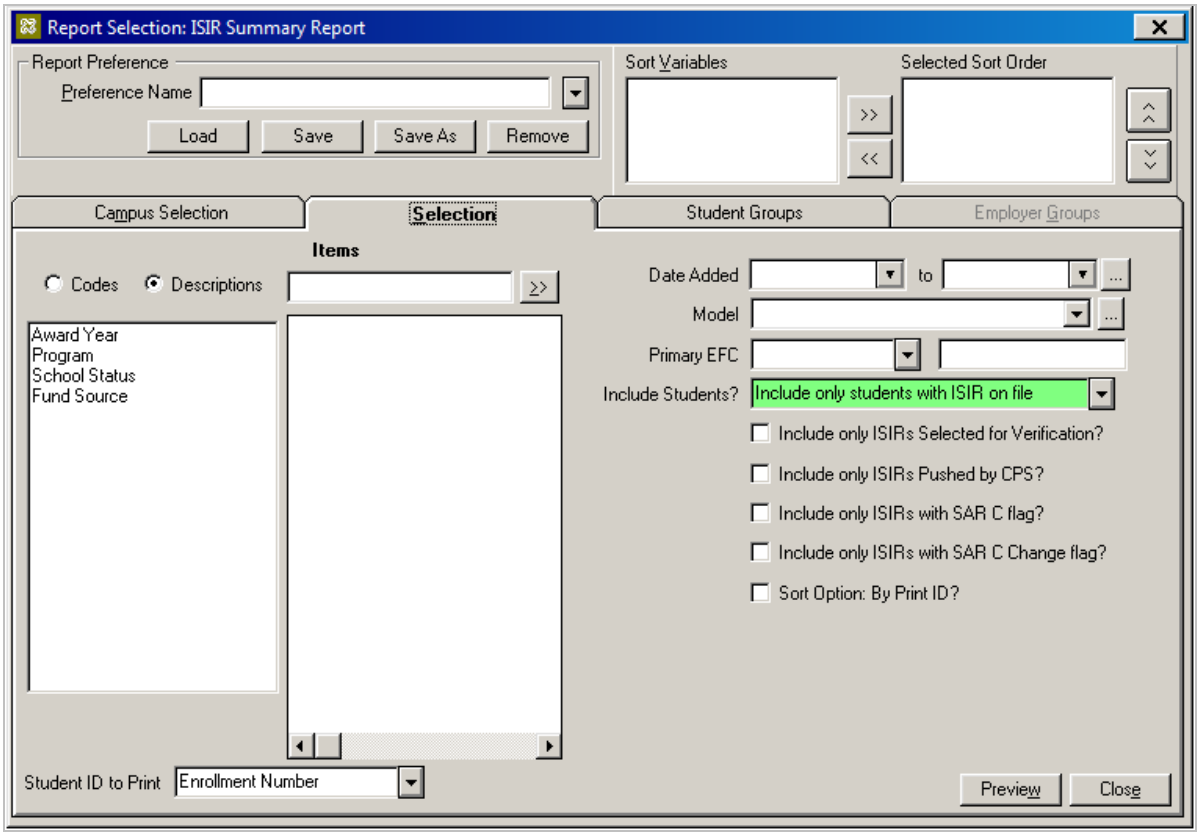
A school resolution is required if a C code (C-Flag, comment code, correction code) is displayed is the report.

To run the report:

1. Navigate to **Reports > Financial Aid > ISIR Summary Report**. The Report Selection: ISIR Summary Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   The Include Students? drop-down list is particularly useful when you are trying to reconcile Pell funds for a given year.

   - If you select **Include only students with ISIR on file**, the system uses the selection criteria to return the students having ISIRs.
   - If you select **Include only students without ISIR on file**, the report does not use the other selection criteria for the students being returned that do not have ISIRs.
   - If you select **All Students**, the system uses the selection criteria on the students having ISIRs and does not use the selection criteria to return the students without ISIRs.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - Transaction ID
   - PEFC
   - Verification
   - Verification Complete
   - Date ISIR Received
   - Pell Eligibility
   - Pell Lifetime Limit (Pell LEU)
   - SAR C Flag
   - SAR C Change Flag
   - CPS Pushed ISIR Flag
   - Model
   - Professional Judgment.

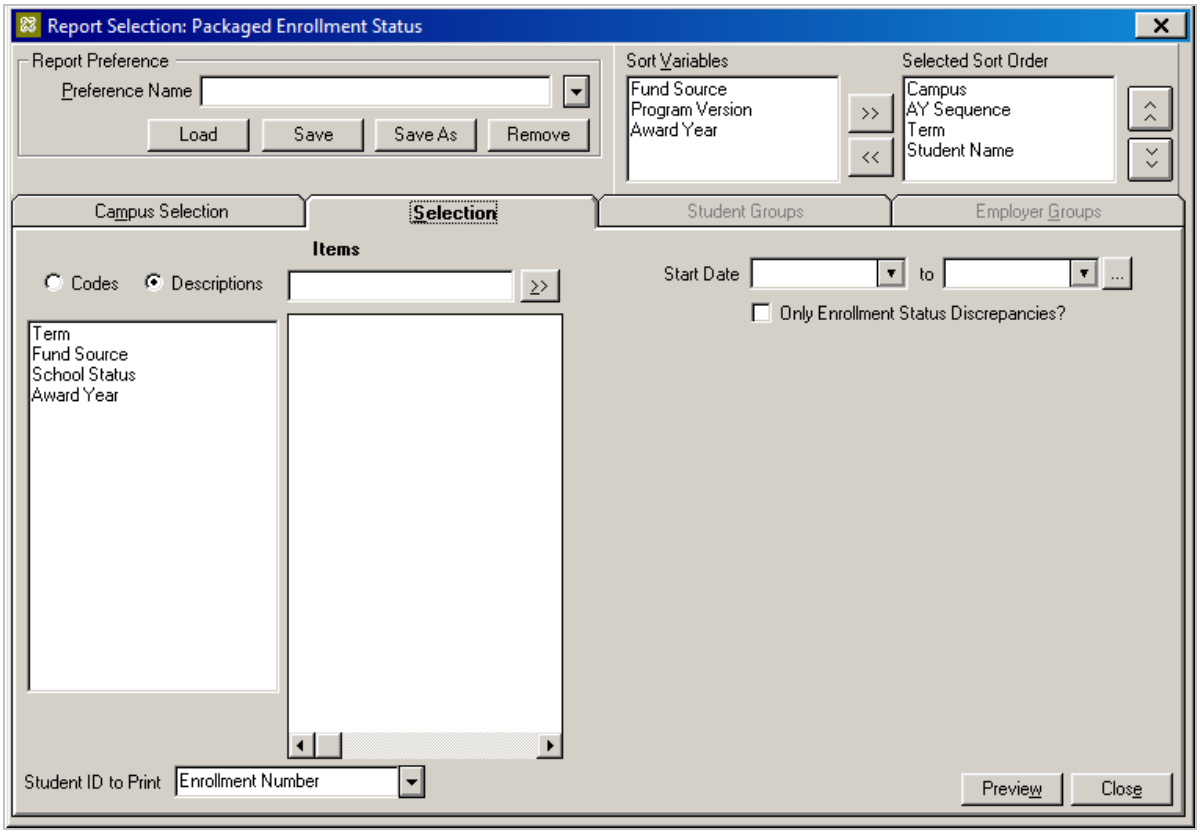
Packaged Enrollment Status

This report is used to identify courses that a student never attended, but which are charged and are on the official transcript. If a student has registered for a course, and then never attends that course, some aid may need to be reduced. Even though the school may still charge the student for the course, the student may not receive Federal Aid for that course. If not counting that course drops a Pell Grant recipient below full time, the school needs to adjust the Pell Grant. The Packaged Enrollment Status report allows you to determine if an adjustment is needed for a student.

You can also generate a report when there is a discrepancy with the student's packaged status with respect to the current enrollment status.

To run the report:

1. Navigate to **Reports > Financial Aid > Packaged Enrollment Status**. The Report Selection: Packaged Enrollment Status form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - Academic Year Sequence
   - Program Version

- Status
- Last Date Attended (LDA)
- Fund Source
- Term
- Enrollment Status (Current)
- Enrollment Status (Packaged to)
- Eligible Amount for the fund source
- Scheduled amount
- Amount received

The amounts are totaled. The Net Amount calculation excludes canceled disbursements and displays the adjusted Net Amount.

Packaging Summary

This report summarizes the financial aid packaging data for student enrollments.

To run the report:

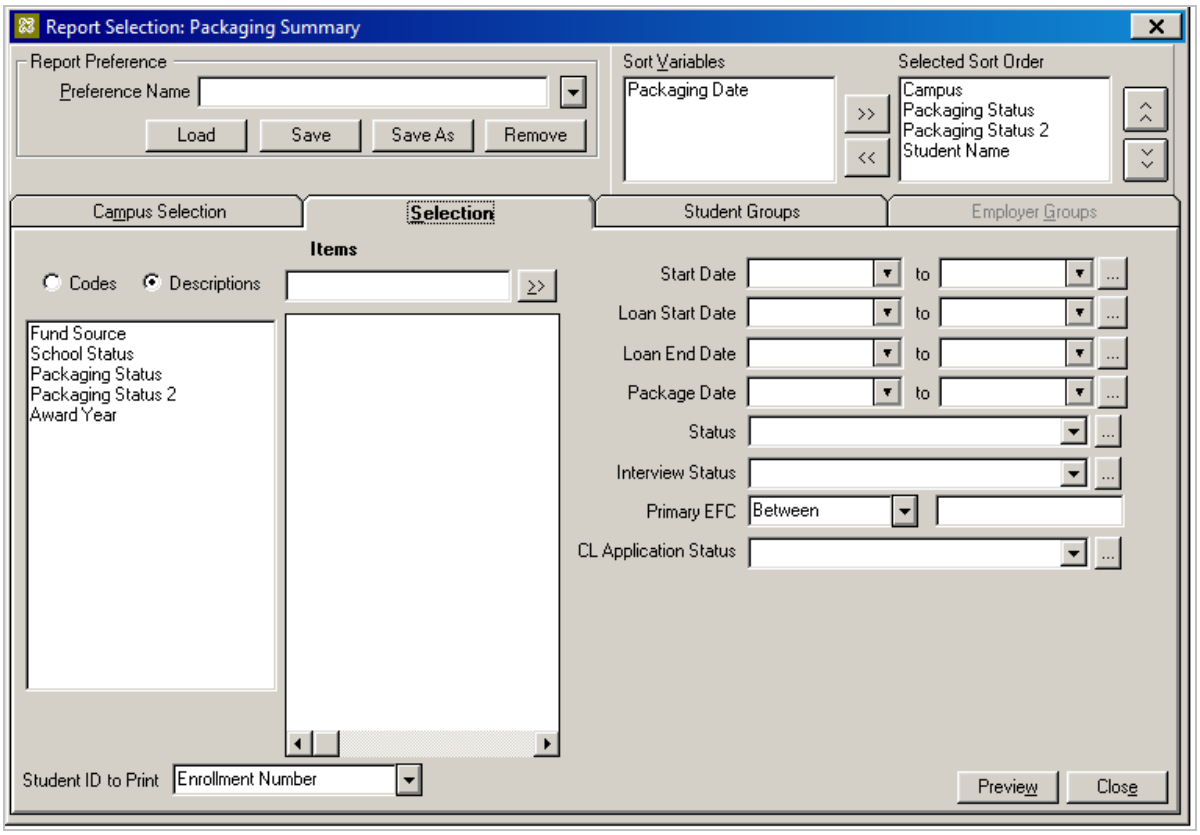
1. Navigate to **Reports > Financial Aid > Packaging Summary**. The Report Selection: Packaging Summary form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: The Student Name must be the final sort element.

   Comparison variables include start date, loan start date, loan end date and Primary EFC (PEFC).

   The status options are:

   - A = Initial processing successful, guarantee or obtain guarantee upon receipt of the promissory note
   - I = Initial processing successful, pending further approval
   - G = Guaranteed
   - B = Guaranteed, promissory note received and approved for disbursement
   - P = Pending processing (error resolution underway by sending organization)
   - D = Denied/rejected/incomplete; no further processing unless school, borrower, or lender provides updated data



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   For each student enrollment, the report shows the following information:

   - Award Year
   - Program
   - Academic Year
   - Start and end dates
   - Enrollment date
   - Enrollment status
   - Packaging status
   - Packaging date
   - Interview status
   - Cost of attendance
   - Date ISIR received
   - EFC
   - Pell cost of attendance.

   Within each award year, the report shows the following information:

   - Fund sources
   - CL Application status
   - Aid status
   - Loan start date
   - Loan end date
   - Gross amount awarded
   - Net amount packaged

   The Net Amount Packaged calculation excludes canceled disbursements and displays the adjusted Net Amount Packaged on the report.

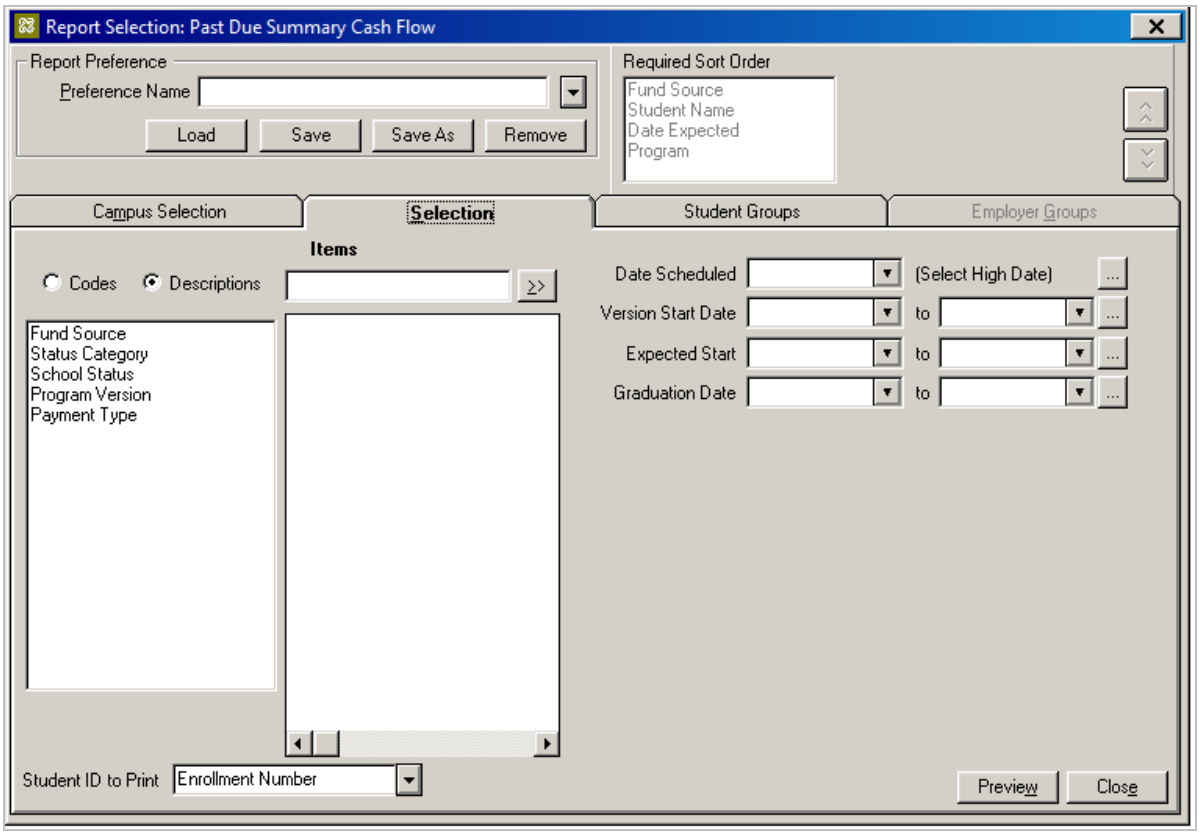
Past Due Summary Cash Flow

This report tracks financial aid that is past due. The report is sorted by Fund Source, Student Name, Date Expected, and Program.

To run the report:

1. Navigate to **Reports > Financial Aid > Past Due Summary Cash Flow**. The Report Selection: Past Due Summary Cash Flow form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report is summarized by fund source. It uses the aged receivables format of 0 - 30, 31 - 60, 61 - 90, 91 - 120, and 121+ days past due.

   A summary page is shown first with drill down to details by fund source. Double-click a fund source line on the summary page to see a list of students that make up the summary line.

   The following is an example of a summary page followed by details for a fund source.

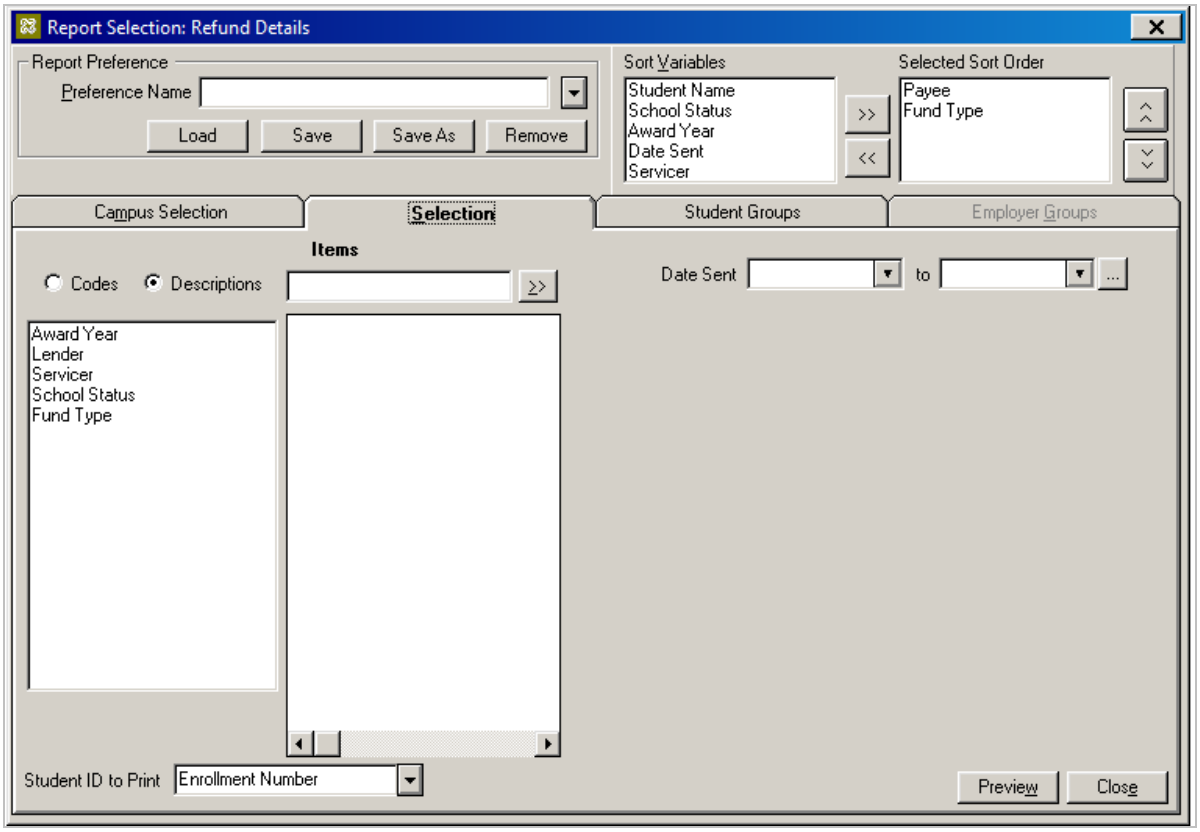
Refund Details

This report provides a detail report of all processed refunds by Lender, Student, and Fund Source Type. It also contains a summary total amount for the total refunds included in the report.

The report may be configured to report on one, some, or all campuses, and it may also be configured to report on individual Student Groups.

To run the report:

1. Navigate to **Reports > Financial Aid > Refund Details**. The Report Selection: Refund Details form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student ID (SSN, Student ID, or Enrollment ID, depending on configuration)
   - Student Name
   - Award Year
   - Payee (Institution, Bank, or Person receiving the refund)

- Program Version
- Fund Source Type
- Fund Source
- Disbursement Number

Note: Whereas a refund is not directly associated with a disbursement, it is related to aid; based on the aid, the system identifies the disbursement to which the refund is related.

- Gross Amount
- Net Amount
- Refund Amount

Remaining Balance To Schedule (Acad. Year)

This report displays the funding requirements for an Academic Year. The Remaining Balance To Schedule (Acad. Year) report displays funding information based on school status (current status of student) to prevent duplicate counts for students with both Drop and Active enrollments or students with both Program Transfer and Graduate enrollments on the Remaining Balance to Schedule (Full Program) report.

The remaining balance to schedule is a number computed by comparing the total charges for a specified block of time to all monies scheduled to be received for that same block of time. This information enables the school to quickly identify any students where the proper amount of funding has not been scheduled to cover the cost for any specific enrollment period.

The remaining balance to schedule for a student is computed based on 1 of 2 possible blocks of time. The block of time used for a student depends on which report is used.

- Remaining Balance to Schedule for Term: If the frequency for the billing method is T, then the Term/Semester block of time will be used. See Remaining Balance to Schedule (Term) report.
- Remaining Balance to Schedule for Academic Year: If the frequency for the billing method is A, then the Academic Year will be used.

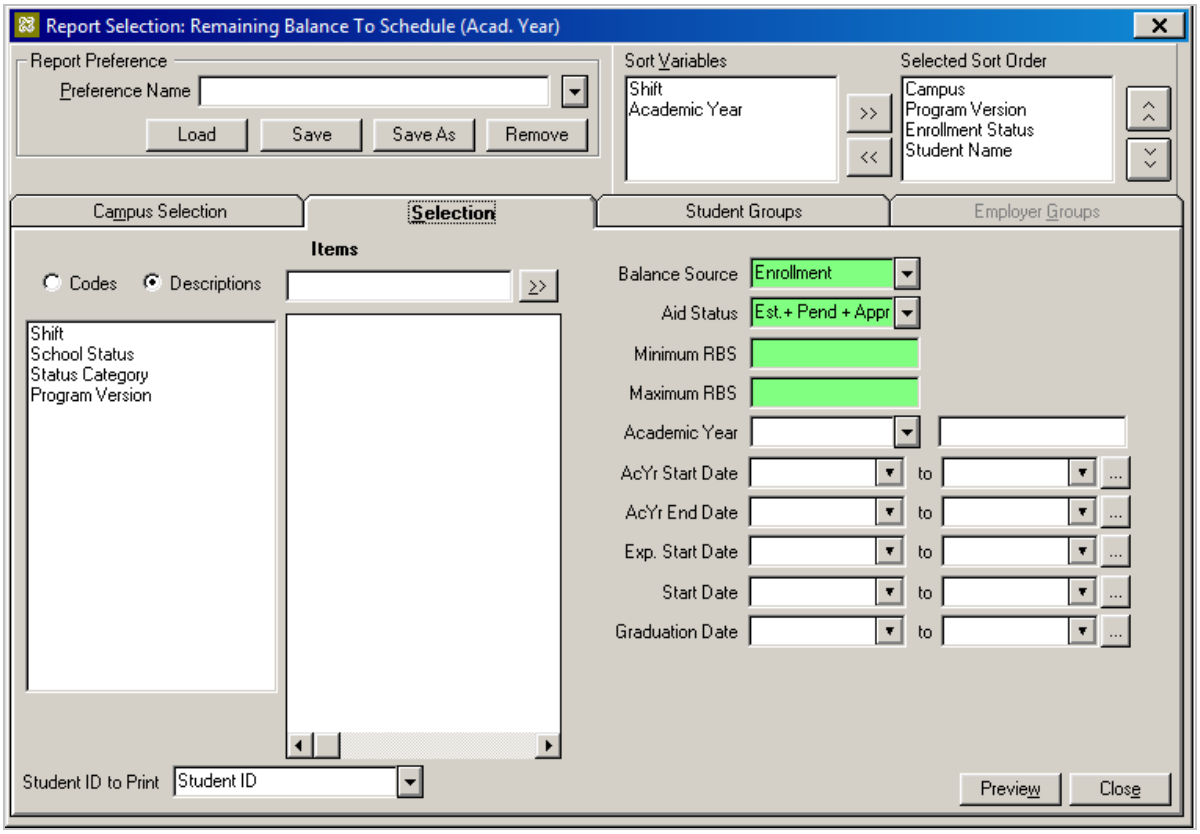
The Remaining Balance To Schedule (Acad. Year) report uses the institutional charges for an Academic Year. However, the report requires the billing frequency to be A. Since the report uses institutional charges, it theoretically works regardless of the billing method.

To run the report:

1. Navigate to **Reports > Financial Aid > Remaining Balance To Schedule (Acad. Year)**. The Report Selection: Remaining Balance To Schedule (Acad. Year) form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Notes:

   - When you select the Permanent Out status category, if a student has multiple enrollments in a Permanent Out status, then the information is not duplicated on the report and the AR Balance on the report is the enrollment account balance, not the student account balance.
   - When you select all Academic Years that meet as of a specific date, all records that match the additional selection criteria (status, program version, etc.) are included in the report.
   - If a student has two Academic Years (in different enrollments) that meet on this date, and both enrollments match the other selection criteria, the student is listed twice. The balance is also displayed twice on the report for this student.
   - Students are only eliminated from the report if you specify an institutional cost variance and the student does not meet this condition.
   - You must select an Academic Year as-of-date.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - Academic Year
   - Start Date
   - Graduation Date
   - Program Version
   - Time Unit
   - Status
   - Shift
   - Academic Year AR Balance
   - Current AR Balance
   - Unbilled Charges Thru Academic Year
   - Funding Expected Thru Academic Year
   - Remaining Balance to Schedule
   - Institutional Charges
   - Academic Year Total Funding Packaged
   - Institutional Charges Variance

   All amount columns are subtotaled at the group levels and grand totaled.

Notes:

The 'Funding Expected Thru AY' column accommodates aid still expected from a prior Academic Year. This columns shows all records for the enrollment where the Date Scheduled is equal to or less than the end date of the student's Academic Year. Expected Funding displays ALL records with funds anticipated through the end date of the Academic Year selected.

If a student is selected to appear on the report based on selection criteria, but an Academic Year is not found that meets on the date requested by the user, the report lists the student name and the remark "No Academic Year on File for Student."

Remaining Balance To Schedule (Full Program)

This report displays the funding requirements for a full program.

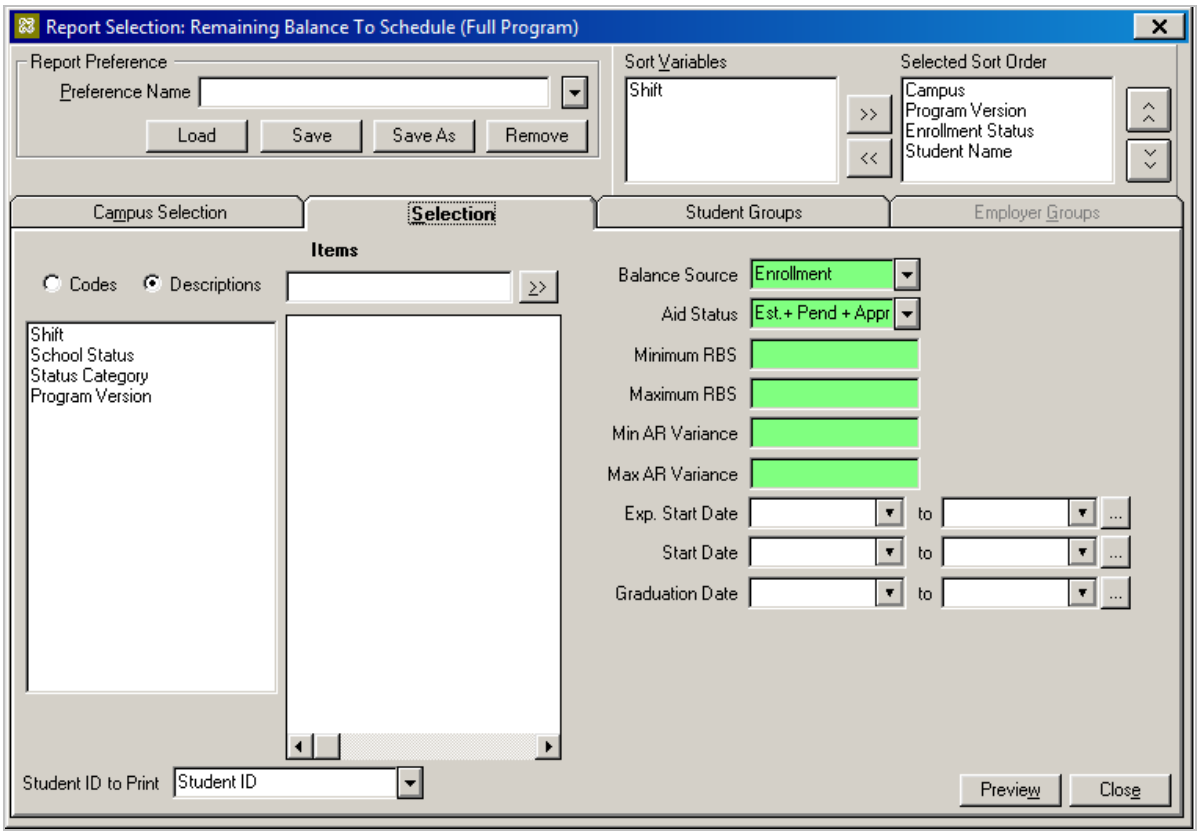
The remaining balance to schedule is a number computed by comparing the total charges for a specified block of time to all monies scheduled to be received for that same block of time. This information enables the school to quickly identify any students where the proper amount of funding has not been scheduled to cover the cost for any specific enrollment period.

The remaining balance to schedule for a student is computed based on 1 of 2 possible blocks of time. The block of time used for a student depends on which report is used.

- Remaining Balance to Schedule for Term: If the frequency for the billing method is T, then the Term/Semester block of time will be used. See Remaining Balance to Schedule (Term) report.
- Remaining Balance to Schedule for Academic Year: If the frequency for the billing method is A, then the Academic Year will be used. See Remaining Balance to Schedule (Acad. Year) report.

To run the report:

1. Navigate to **Reports > Financial Aid > Remaining Balance To Schedule (Full Program)**. The Report Selection: Remaining Balance To Schedule (Full Program) form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - Start Date
   - Graduation Date
   - Program Version Code
   - Time Unit
   - Status
   - Shift
   - Total Program Cost
   - Current AR Balance
   - Total Funding Packaged
   - Funding Expected
   - Program Cost Variance (total program cost minus total funding packaged)
   - AR Balance Variance (current AR balance minus funding expected)

   All amount columns are subtotaled at the group levels and grand totaled.

Remaining Balance To Schedule (Term)

This report displays funding information based on term costs.

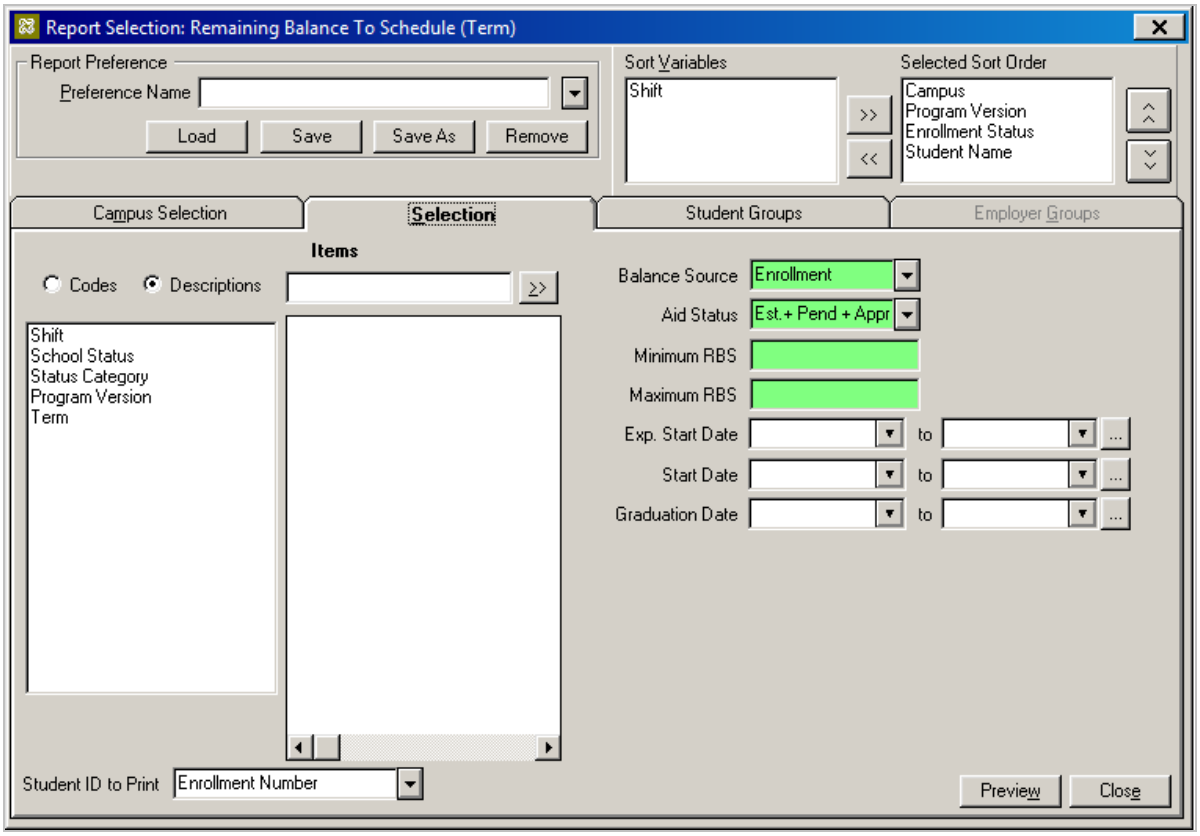
The remaining balance to schedule is a number computed by comparing the total charges for a specified block of time to all monies scheduled to be received for that same block of time. This information enables the school to quickly identify any students where the proper amount of funding has not been scheduled to cover the cost for any specific enrollment period.

The remaining balance to schedule for a student is computed based on 1 of 2 possible blocks of time. The block of time used for a student depends on which report is used.

- Remaining Balance to Schedule for Academic Year: If the frequency for the billing method is A, then the Academic Year will be used. See Remaining Balance to Schedule (Acad. Year) report.
- Remaining Balance to Schedule for Term: If the frequency for the billing method is T, then the Term/Semester block of time will be used.

To run the report:

1. Navigate to **Reports > Financial Aid > Remaining Balance To Schedule (Term)**. The Report Selection: Remaining Balance To Schedule (Term) form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - Start Date
   - Graduation Date
   - Program Version
   - Time Unit
   - Status
   - Shift
   - Current AR Balance
   - Total Term Charges
   - Total Funding Packaged for Term
   - Funding Expected Thru Term
   - AR Balance Variance

   Subtotals and grand totals are provided on the amount fields.

Remaining Balance to Schedule by Course

The report displays the charges for the course as well as any payment plan disbursements associated with the course. The main purpose of this report is to display the difference in amounts charged versus any payment plans that have been setup to cover the charges for the course.

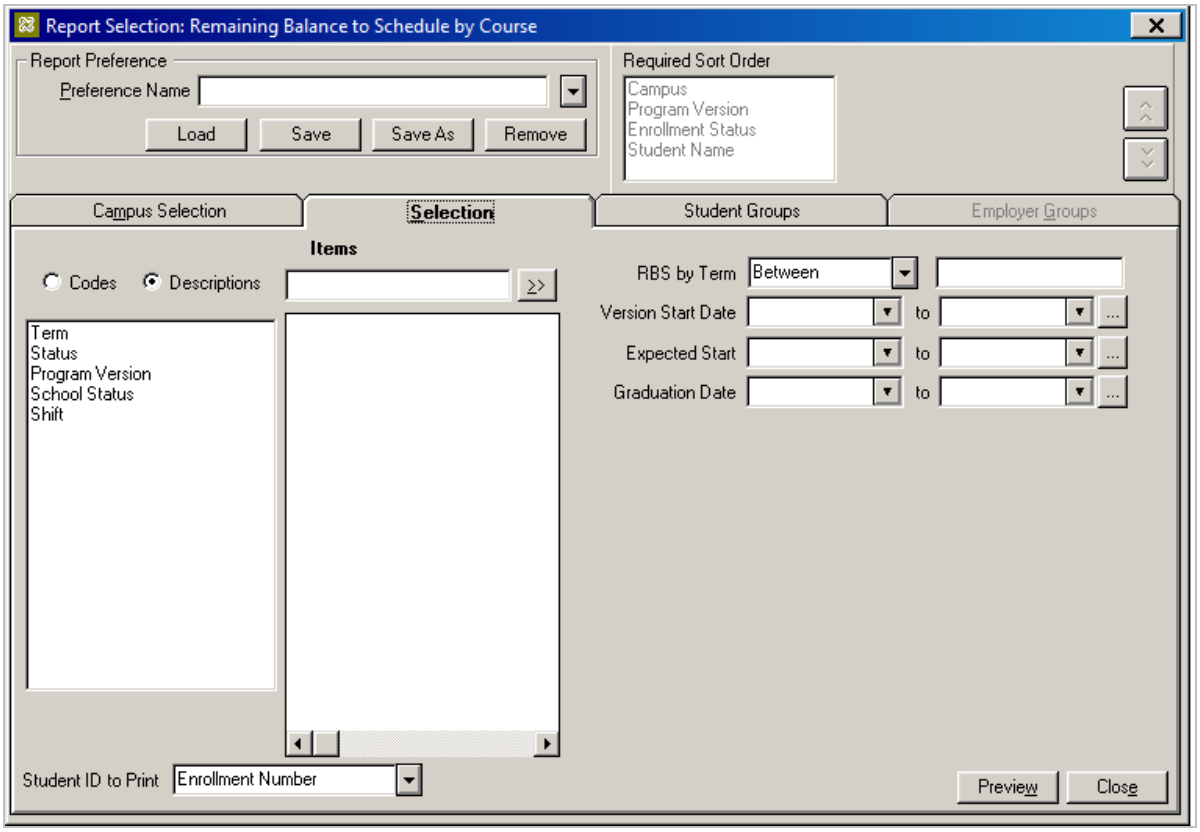
This report also identifies any 'Other Aid' that may be packaged and that could possibly cover the difference between the charges and any payment plans for the course. The 'Other Aid' consists of any scheduled aid with a disbursement date that falls within the term dates associated with the course, except for work study fund sources and those NOT marked for **Exclude from Estimated Financial Assistance** located under the **Fund Source Rules** section of the **Rules/Attributes tab**.

To run the report:

1. Navigate to **Reports > Financial Aid > Remaining Balance to Schedule by Course**. The Report Selection: Remaining Balance to Schedule by Course form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Notes:

   - You must select at least one Term other than ALL.
   - If you select a child term for the Student Accounts ledger entries, the associated parent term is used for the financial aid portion of the query.
   - You can select to filter the financial aid packaging for the appropriate courses based on the selection of aid Status: Estimated + Pending + Approved, Estimated Only, or Pending and Approved Only.
   - You can select to filter the report based on the Minimum and Maximum Remaining Balance to Schedule (RBS) amounts, where: RBS = Total Course Charges - Amount Packaged by Course
   - You can select to filter the report by an enrollment's expected start date, start date, and/or graduation date.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - Start Date
   - Graduation Date
   - Program Version
   - Status
   - Shift
   - Course
   - Course Code
   - Charges
   - Payment Plans

   Totals are provided on the amount fields.

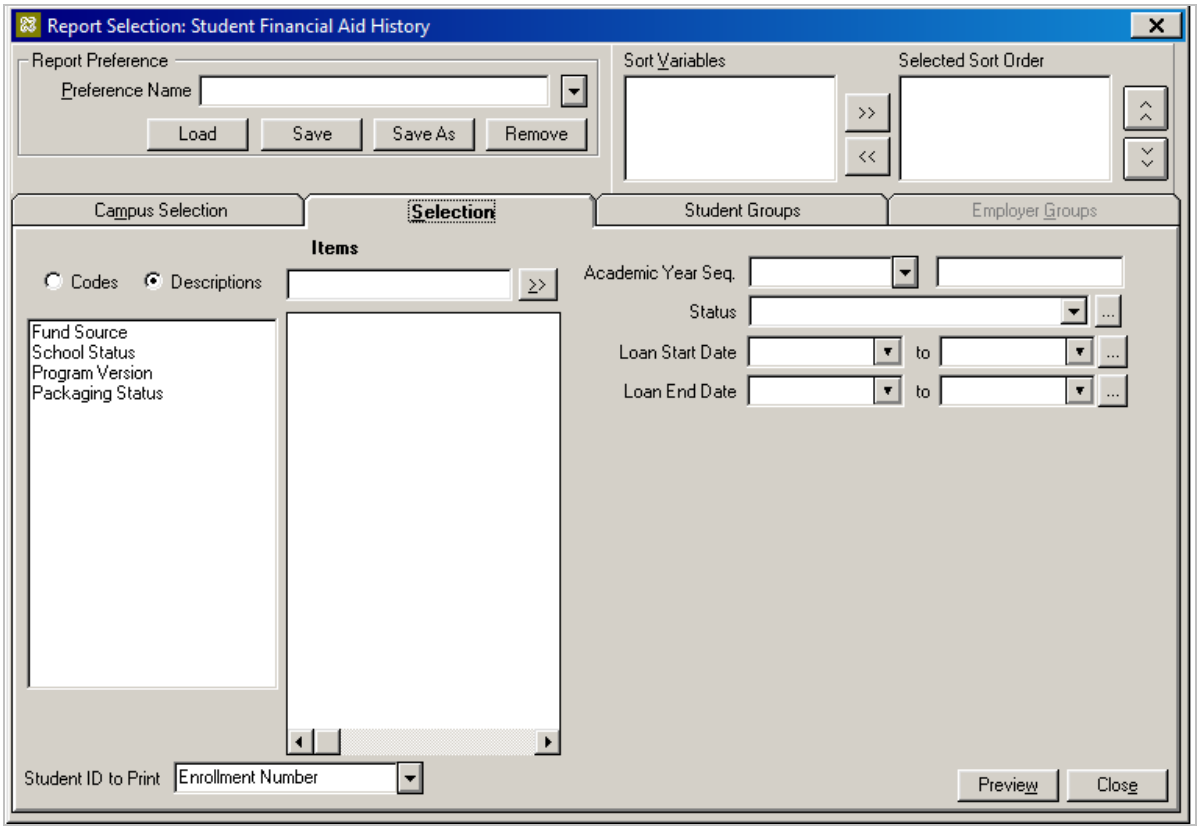
Student Financial Aid History

This report provides details of the financial aid history for enrolled students.

To run the report:

1. Navigate to **Reports > Financial Aid > Student Financial Aid History**. The Report Selection: Student Financial Aid History form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   Details on this report include the following sections :

   - Student Name, ID, and Address
   - Academic Year
   - Funding Packaged

   The Academic Year section contains the following information:

- Award Year
- Academic Year
- Packaged Date and Status
- Cost of Attendance
- Packaged EFC
- Institutional Charges
- Gross Award Amount
- Net Funding Amount (does not include canceled disbursements, if any)

The Funding Packaged section contains the following information:

- Program Version
- School Status
- Award Year
- Fund Source
- Funding Status
- Loan Period
- Gross Award Amount
- Lender
- Servicer
- Guarantor
- Origination Status
- Bank Fee
- Net Award Amount
- Net Packaged Amount
- Amount Received
- Loan ID
- Promissory Note Status
- Disbursements section that lists the disbursement date, amount, status, term, and disbursement number for loans.

The Net Packaged calculation excludes canceled disbursements and displays the adjusted Net Packaged amount on the report.

Student Financial Aid Summary

This report provides a summary of each type of funding scheduled. Individual disbursements are not included on this report. Instead, information showing the number of disbursements scheduled, received, and the net amount received are listed.

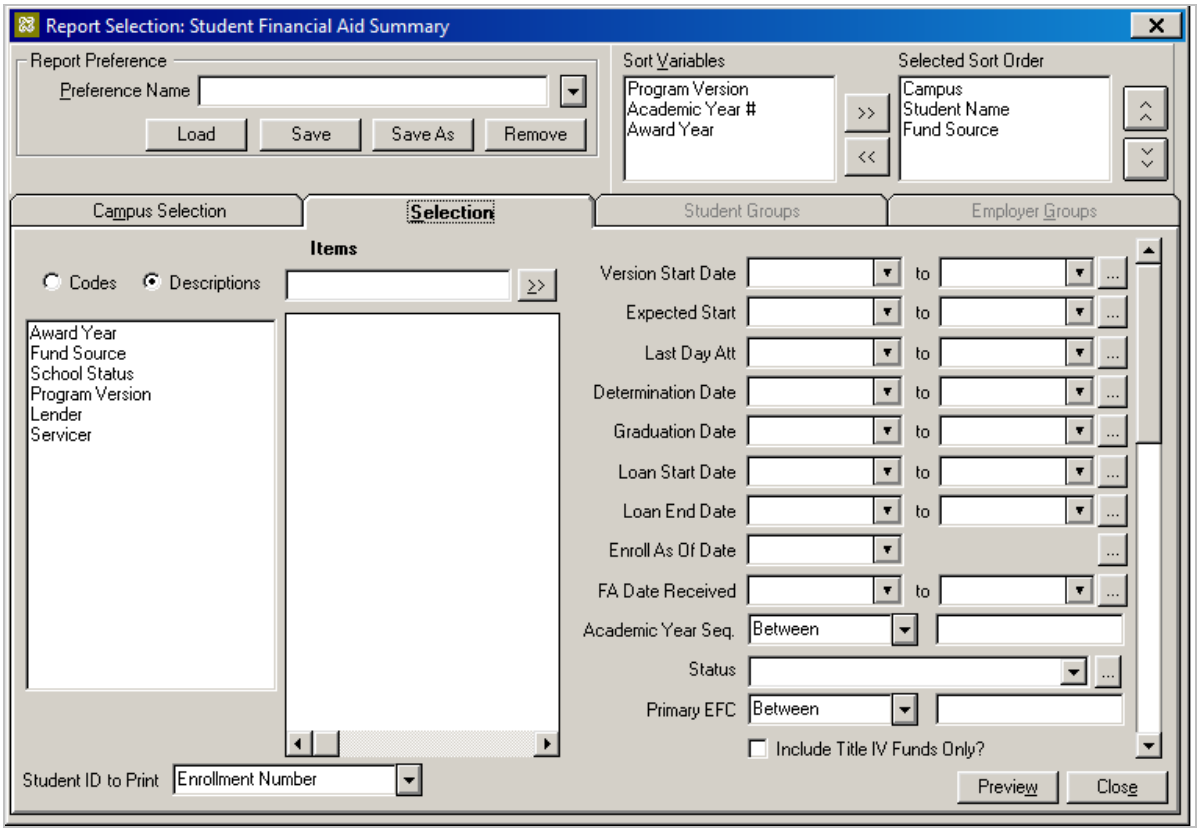
To run the report:

1. Navigate to **Reports > Financial Aid > Student Financial Aid Summary**. The Report Selection: Student Financial Aid Summary form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   In addition to the options visible in the screen capture below, the following options are available:

   - Include Title IV Funds Only?
   - Display Missing FA Documents?
   - Display Application Sent and Received Dates?
   - Include Addl Eligibility Ind. Only?

   Note: The Include Addl Eligibility Ind. Only? check box is disabled by default. This check box becomes enabled when the Fund Source is Pell (and any of the other awards) combined with an Award Year equal to or greater than 2009-10.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

The report includes details of financial aid for each student followed by summaries per fund source. The report displays the following details:

- Student Name
- Student ID
- Program
- Student Status
- Last Date of Attendance (LDA)
- Fund Source
- Academic Year Start Date
- FA Status
- Lender
- Servicer
- Academic Year
- Award Year
- Academic Year Begin Date
- Academic Year End Date
- Date Packaged
- Comments
- Number of Disbursements Scheduled
- Number of Disbursements Received
- Loan Start Date
- Loan End Date
- Model (dependency status)
- Gross Awarded
- Gross Packaged
- Amount Scheduled
- Amount Received
- Refunds
- Stipends

Subtotals and totals are provided on the amount fields.

The Gross Packaged calculation excludes canceled disbursements and displays the adjusted Gross Packaged on the report.

The following is an example of financial aid summaries per student.

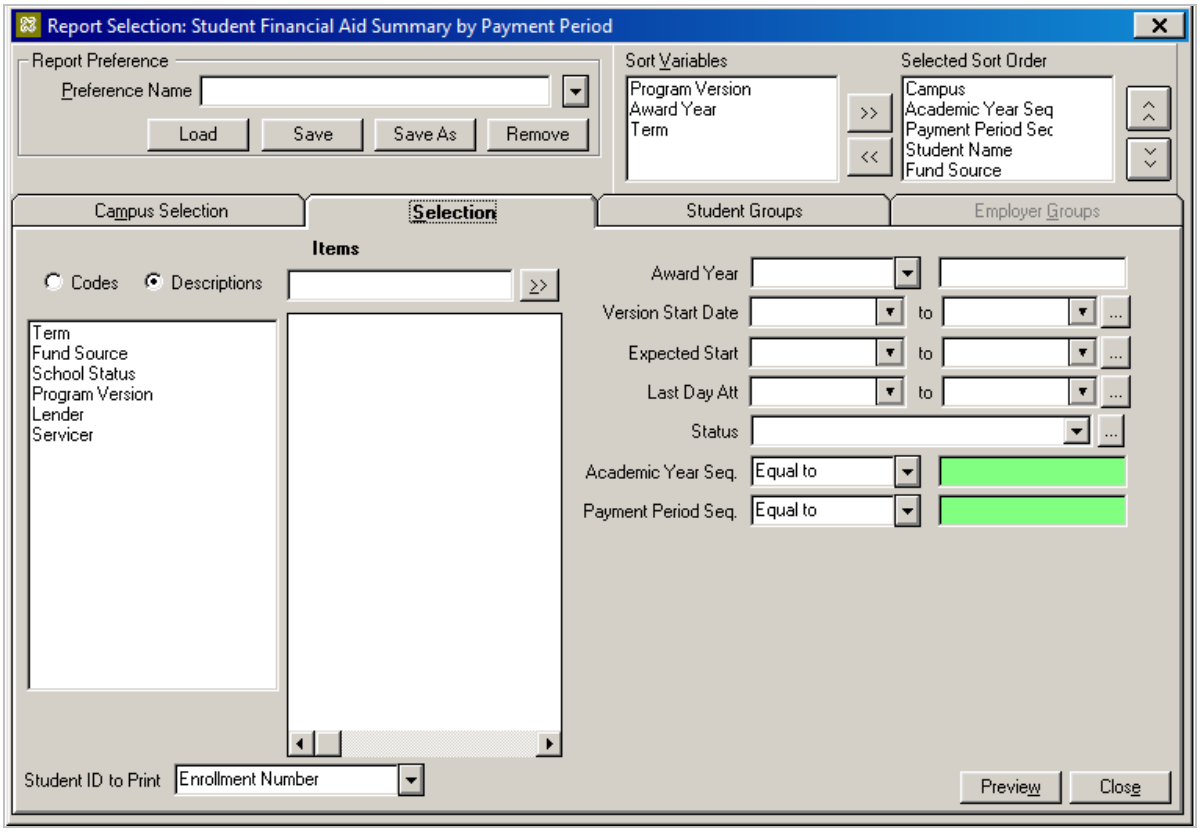
Campus Management Page 6 of 6

Student Financial Aid Summary by Payment Period

The Student Financial Aid Summary by Payment Period report is similar to the Student Financial Aid Summary by Term report, except that Academic Year (AY) and Payment Period (PP) are used as filter criteria instead of Term. Awards are listed for each A/Y or PP selected.

To run the report:

1. Navigate to **Reports > Financial Aid > Student Financial Aid Summary by Payment Period**. The Report Selection: Student Financial Aid Summary by Payment Period form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

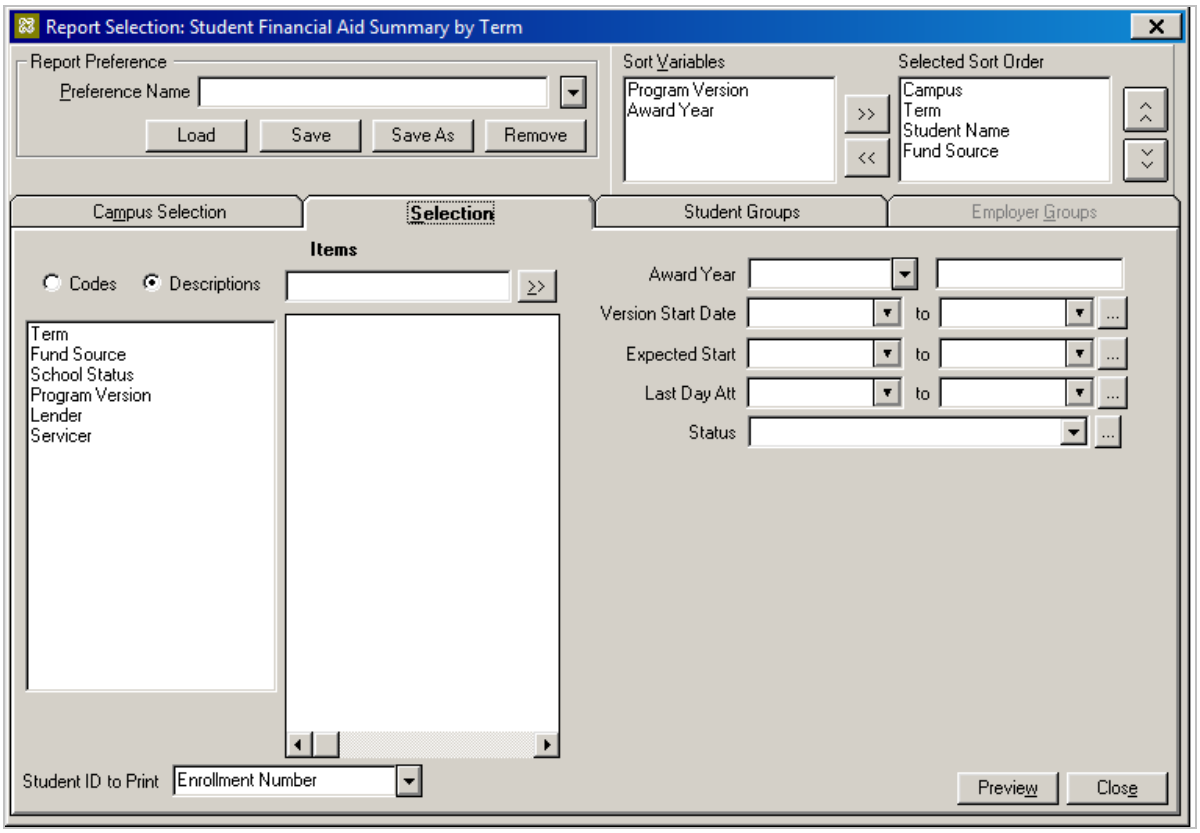
5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

Student Financial Aid Summary By Term

This report provides a student-by-student look at financial aid by fund source within terms. The selection criteria for the report enable schools to capture the information required for the Financial Aid Compliance audit.

To run the report:

1. Navigate to **Reports > Financial Aid > Student Financial Aid Summary by Term**. The Report Selection: Student Financial Aid Summary by Term form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - Program Version
   - Student Status
   - Last Date of Attendance (LDA)

- Fund Source
- FA Status
- Lender
- Servicer
- Award Year
- Term
- Number of Disbursements Scheduled
- Number of Disbursements Received
- Gross Awarded
- Gross Packaged
- Amount Scheduled
- Amount Received
- Pell LEU% (Pell Lifetime Eligibility Used)
- Refunds
- Stipends.

Group and grand totals are provided on the amount columns.

The Gross Awarded, Gross Packaged, Amount Scheduled, Amount Received, Refunds and Stipends for each fund source are displayed at the bottom of the report.

The Amount Scheduled calculation excludes canceled disbursements and displays the adjusted Amount Scheduled on the report.

Students Failing Disbursement Criteria

The Students Failing Disbursement Criteria report allows schools to validate posted Financial Aid Disbursement batches against the disbursement approval criteria to verify student eligibility for disbursement batches.

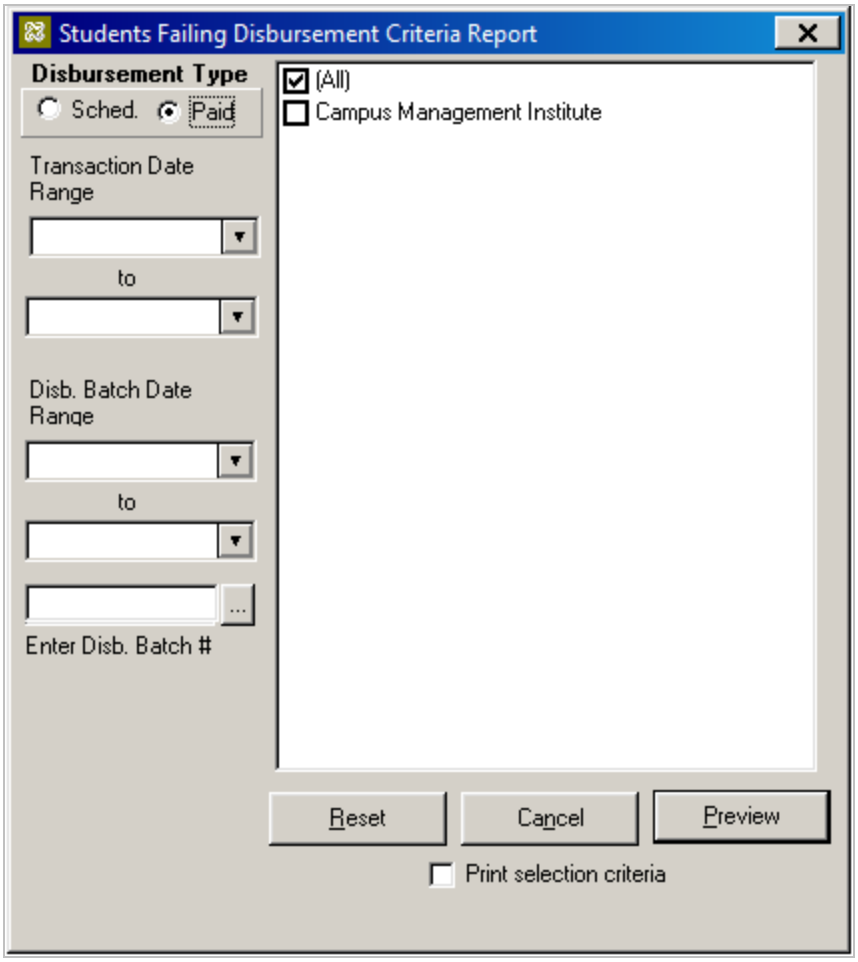
In preparation for an upcoming term schools need to determine which students are "out of compliance" for payment of aid funds, what is missing, and for what term. This report provides a means to determine which students are "out of compliance."

To run the report:

1. Navigate to **Reports > Financial Aid > Students Failing Disbursement Criteria**. The Report Selection: Students Failing Disbursement Criteria form is displayed.
2. Select a **Disbursement Type**.
   - If you select **Scheduled**, you can use the filters shown in the image below.

     When you click a filter button, you can select multiple options. The system defaults to (All) for each filter.

   - If you select **Paid**, you can use the filters shown in the image below.



Note: The Batch IDs are in numeric order and are displayed in a multiple select drop-down list. You can select one or multiple batch IDs. If you know the batch number, you can enter it in the Enter Disb. Batch # field.

If only the date appears in the Disbursement Batch Range with no batches selected or no Transaction Date provided, it will take a long time to generate the report.

3. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report header indicates the Disbursement status (Scheduled or Paid), the Batch Date Range, and the Batch ID (if applicable).

   The report details include the academic records for each student.

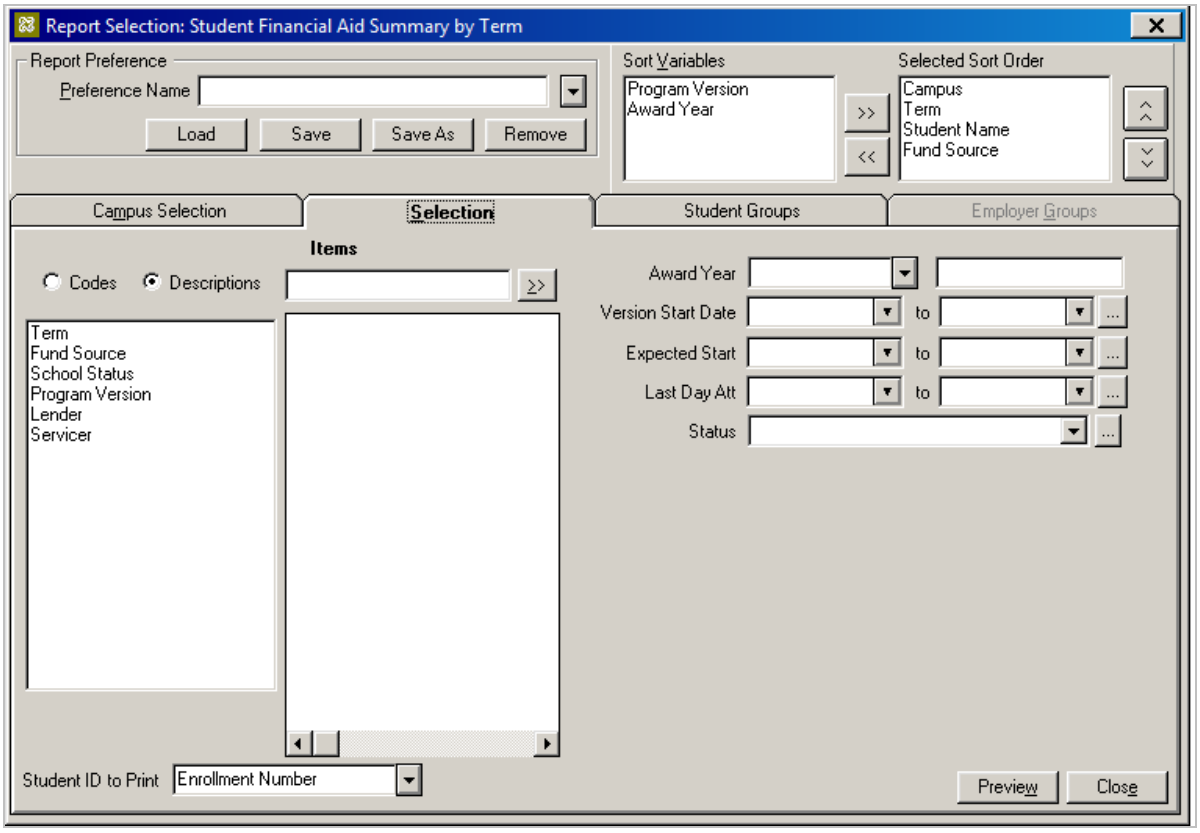
Unmatched ISIRs

The unmatched ISIRs Report is generated for students that do not exist in the CampusNexus Student database. When the ISIR records are imported for those students, CampusNexus Student looks at the ISIR lead flag on Setup > Admissions and selects students as follows:

- If the ISIR lead flag is set to Yes, then the Master File is generated for those students (these students are NOT on Unmatched ISIR Report).
- If the ISIR lead flag is set to No, then the Master File is not generated for those students (these students are on Unmatched ISIR Report).

To run the report:

1. Navigate to **Reports > Financial Aid > Unmatched ISIRs**. The Report Selection: Unmatched ISIRs form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

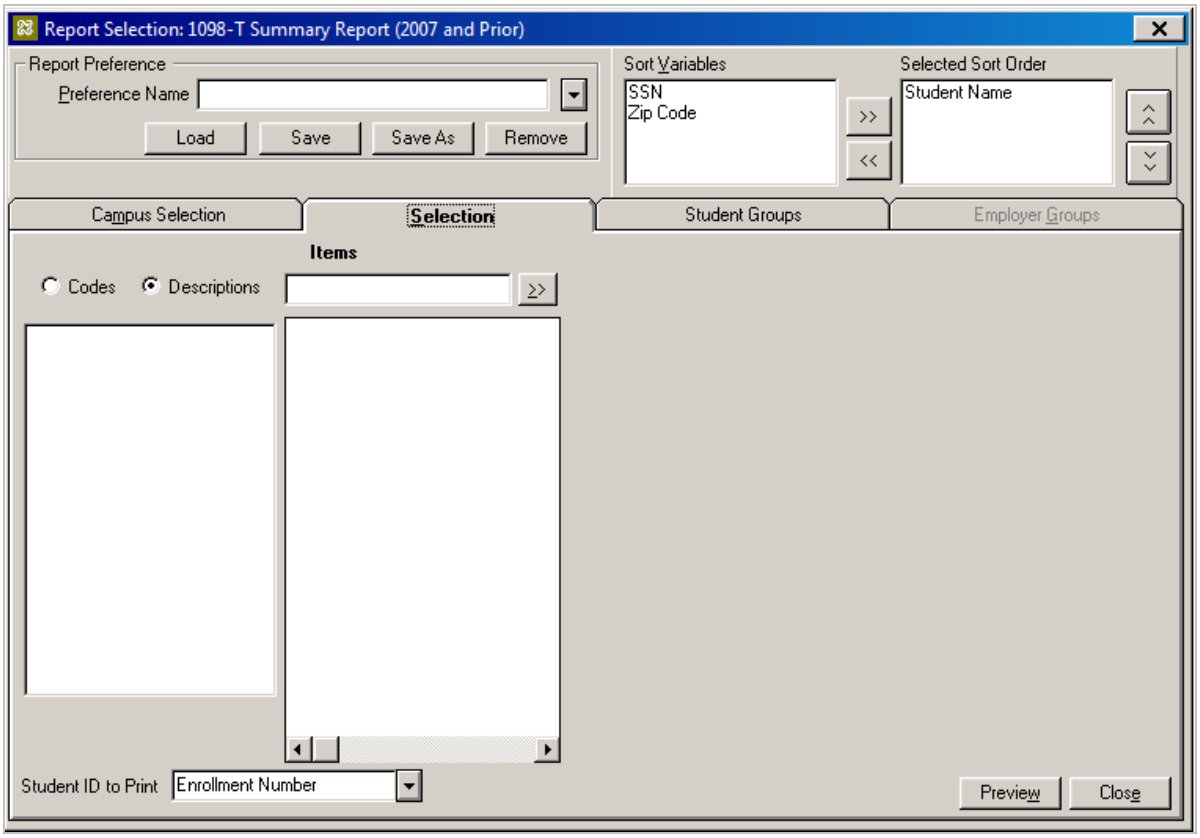
1098-T Summary Report (2007 and Prior)

This report lists all charges, monies received, and monies refunded from some fund sources for the year 2007 and earlier years.

The logic used to identify students that are required for 1098-T reporting is also used in the application under **Daily > Student Accounts > Process 1098-Ts (2007 and Prior)**. It gathers all students who were enrolled in a calendar year.

To run the report:

1. Navigate to **Reports > Student Accounts > 1098-T Summary Report (2007 and Prior)**. The Report Selection: 1098-T Summary Report (2007 and Prior) form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Campus
   - ID
   - Enrollment Status

- Program Version
- Start Date
- Charges (Sum of all charges on the student's account)
- Payments (Sum of all payments received on the student's account, excluding all payments where the Fund Source Type is WORKST, GRANT, SCHOLAR, or Pell)
- Refunds (Sum of transactions where the Source is R and the date is within the calendar year. This includes stipends. All transactions where the Fund Source Type is WORKST, GRANT, SCHOLAR, or Pell are excluded.)
- Half Time?
- Graduate Level

90-10 Report by Revenue Source

The purpose of the 90-10 calculation is to determine the percentage of revenue received from Federal Student Aid (FSA) funds. These FSA funds are calculated on a student by student basis up to eligible charges, assessed for Eligible Programs and certain qualifying non-eligible programs, determined by an attribute on the Financial Aid Program Version to identify these programs.

Determining Revenue

The 90-10 calculation includes three categories of revenue received during the school's fiscal year (reporting period) and used to satisfy eligible charges defined above. They are payments from:

- Non-Federal Resources
- FSA Funds
- Other Receipts sources (such as cash payments, private educational loans etc)

The 90/10 regulation has a provision which states that Title IV must be included in the calculation regardless of whether the funds are credited to the student's account or paid directly to the student to the extent that charges exist and have not been satisfied with funds received from a non-federal resource such as a state grant.

Stipends as adjustments to revenue

Stipends in the 90-10 calculation are calculated in the similar way as refunds calculation, with the exception of stipends to Title IV funds. If a school grants stipends money to a student from a fund source that is considered to be Other Receipt or Non Federal Resource, then that amount is excluded from the revenue reported for that fund source. However, the 90-10 presumption makes stipends irrelevant for FSA funds except for the stipends being the result of a Title IV Credit balance (which is always excluded from the 90-10 calculation).

Adjustments to revenue received in the prior year

Adjustments in the current year to revenue received that were included in the 90-10 calculation in a previous year are not considered in the 90-10 calculation for the current year. However, this limitation does not apply to Title IV Funds refunded in the current year as a result of a Return of Title IV Calculation defined in Part 668.22 even if the refund is to Title IV revenue received in the previous year. Additionally, it has been observed that some institutions give stipends to students when the funds have not even been posted to the student's account. Adjustments should never be included in the 90-10 calculation unless the source of that stipend is being counted.

Refunds/Revenue Adjustments

Revenue adjustments, including revenue that exceeds eligible charges, are recorded under the Refunds/Revenue Adjustments column. Any revenue adjustments including refunds, SEOG matching and revenue that exceeds eligible charges are included. The amount reported in Refunds/Revenue Adjustments column is the difference between the Payments column and the Total column for the payment being reported.

Title IV Credit Balances

Under the Cash Basis of Accounting, the revenue is counted for the year in which it was received. Title IV Credit balances are excluded as revenue. However, if in a subsequent year, charges are posted that eliminate the prior year Title IV Credit Balance, then the revenue is counted for that year in which the charges were assessed, not for the year in which the revenue was received. Based on an extreme literal interpretation of the principles underlying the cash basis of accounting, it can be interpreted, that the revenue in this case can not be included in either year. According to the Department of Education, this extremely literal interpretation is an impermissible interpretation of the principles governing the cash basis of accounting since it ignores the context of the 90-10 rule and produces an absurd result where the funds would never be counted.

Application of Funds

The impact of the 90-10 presumption and the exclusion to that presumption for revenue from non-federal resources means that regardless of the order that transactions occur on the student's account, the revenue will be counted in the formula based on the

category for which the revenue belongs. In other words, revenue from Non-Federal Resources are counted first, then FSA funds are counted and then revenue from the third category Other Receipts.

90-10 Calculation

Non-Federal Resources

The calculation first considers the revenue from Non-Federal Resources and uses the information to satisfy eligible charges such including:

- State Grants
- Grants from private sources
- Job training
- Institutional scholarships that count toward the 10% revenue requirement
- Other Non Federal Resource attribute may be available on the Fund Source Code. For additional information, see Financial Aid Lists [Fund Source].

Title IV fund sources

After considering the payments from Non-Federal Resources if there are still unsatisfied charges, the calculation considers revenue from payments received from Title IV fund sources. Revenue from Title IV funds includes PELL, SEOG (Exclude Institutional Match), TEACH, and Direct Loans. Federal Work Study (FWS) is not included in this category.

Other Receipts

If there is still a remaining balance of unpaid eligible charges, then include revenue from Other Receipts, revenue derived from funds that are not Non-Federal Resources or Title IV. Revenue received from Student Payments, Private Educational Loans are limited.

Amount from School Activities Revenue include Funds received by the institution for academically related activities. These are funds that an institution may count in the denominator of the calculation (not on a student by student basis) when the institution collects money for academically related activities. For example, a culinary institution can offer food cooked by students, studying to be chefs, if this activity is required as part of the program and supervised by an instructor. Include as School Activities Revenue in 90/10 option on the transaction code must be selected. This revenue amount is entered as miscellaneous receipts and is not reported for individual students but rather as a separate revenue category in the report's summary. There is a configuration on the Transaction Code to identify this revenue type of revenue. For additional information, see Setup - Student Account Lists [Transaction Codes].

Calculate and report for Eligible Programs and Non-Eligible Programs

To calculate 90-10 percentage for students with both a Title IV degree program and a non-Title IV Non-Degree Seeking (NDS) program during the 90-10 report audit period, the denominator of the non-Title IV Non-Degree Seeking program(s) is calculated separately and then correctly combined with the denominator of the Title IV program(s) to correctly calculate the 90-10 Revenue Percentage for the student.

90-10 Calculation	Definition
90-10 denominator	Includes payments received during the reporting year used to satisfy eligible charges. The amount is capped by those eligible charges. The denominator can also include prior year amounts that were credit balances in the prior year are now counted in the current year when the charges were posted.
90/10 numerator	Includes the amount of Title IV payments (revenue) reported in the denominator.

All revenue calculated in the above information is included in the denominator of the calculation. The portion of the denominator that is derived from FSA funds is included in the numerator.

Calculate and report based on enrollment at institution when student enrolled in multiple campuses

When running 90/10 Report by Revenue Source for multiple campuses, the students who are enrolled at multiple campuses no longer have their 90/10 data calculated separately for each campus. The transactions are combined (regardless whether or not the enrollment has transactions in the reporting period) before calculating individual amounts (carryover charges, eligible charges in the period, payments in each payment category) for 90/10 purposes. All transactions associated with the selected campus(es) from all of the student's enrollments such as:

- Students with only one enrollment
- Students with multiple enrollments at the same campus. Transactions from all enrollments must be combined before calculating 90/10 amounts.
- Students with multiple enrollments at multiple campuses. Combine all transactions associated with the specified campus(es) from all of the student's enrollments before calculating 90/10 amounts.

For students who are enrolled in both Title IV and non-Title IV programs, the report calculates and report students' 90/10 data separately for each program type. the hierarchy for application of funds (which funds to apply first satisfy charges) remains the same.

Eligible Institutional Charges

Eligible Charges are identified by enabling the Include in Title IV Institutional Charges option while configuring Transaction Code. For additional information, see Setup - Student Account Lists [Transaction Codes].

Carryover Charges

Calculate balance of unpaid institutional charges for the student as of the first day of the current reporting period. If this balance is less than 0, then the carryover charge is 0.

1. Calculate the eligible charges from the beginning of the student's program until the last day of the previous reporting period.
2. Subtract all payments used to satisfy the charges in Step 1 for the same period identified above.

If the amount is not 0 or a negative amount it is considered a carryover charge. Amounts that are adjustments such as voided transactions are reduced from the amount to carryover.

Current Year Charges

This amount is the amount of eligible charges for the current year. Adjustments such as voided transactions are reduced from the current year charges.

Total Available Institutional Charges

This is the sum of the current year charges and the carryover charges as defined above. It is the amount to which the revenue considered is limited in the calculation. Refer to the example mentioned below:

Available Institutional Charges	Amount (example)	Explanation
Carryover Charges	$6,189.74	Carryover charges calculation should include transactions from all enrollments and campuses.

Available Institutional Charges	Amount (example)	Explanation
Current Period Eligible Charges	$6,065.00	Eligible charges calculation should include eligible charges from all enrollments and campuses.
Total Eligible Charges	$12,254.74	The sum of Carryover Charges and Current Year Charges
Payments	$6,000.00	Payments calculation for each bucket should include payments from all enrollments and campuses.
Denominator		Denominator is the payments in the period capped by eligible charges in the period. For this example, the total payments in the period is $6000, therefore, all of the payments are counted in determining the denominator. However, if the total amount of the payments is greater than the eligible charges in the period (let's say $15,000.00), then the denominator will be capped by the eligible charges, which is $12,254.74 instead.
Numerator	$0.00	The numerator is the amount is the Title IV portion out of all the payments. For this example, since all the payments are non-title IV, that's why numerator is $0. If out of $6,000 payments, some of which is Title IV (let's say $2,500), then the numerator will be $2,500 instead.
Percentage		The percentage is the amount reported in the numerator divided by the amount reported in the denominator. Since in this example none of the revenue was from a Title IV source, both the percentage is 0%

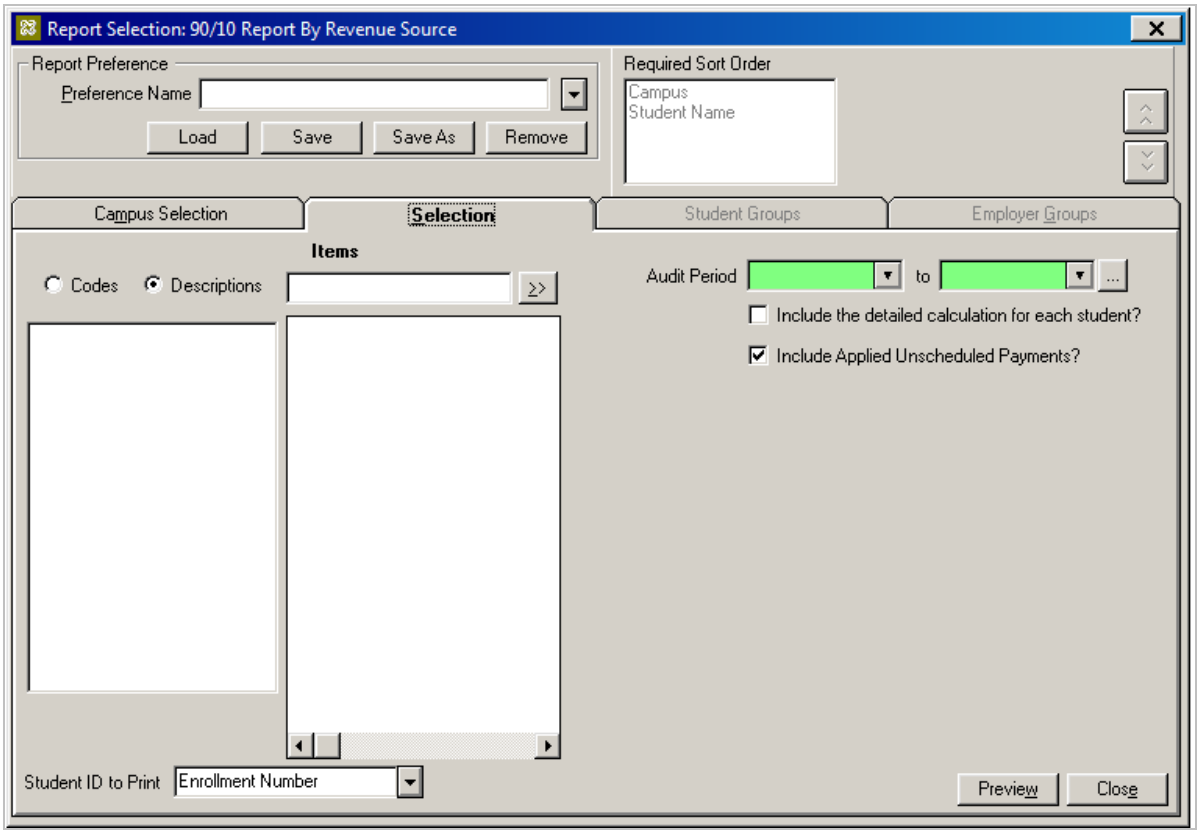
To run the report:

1. Navigate to **Reports > Student Accounts > 90/10 Report by Revenue Source**. The Report Selection: 90/10 Report by Revenue Source form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Notes:

   - When the 'Include the detailed calculation for each student' option is cleared, the report displays revenue data by campus and provides an overall total.
   - The 'Include Applied Unscheduled Payments' option is selected by default. This functionality applies only to unscheduled payments not tied to a fund source. These payments are treated as Cash (Other Receipts) payments for 90/10 processing.

     The existing 90/10 Report calculations for the fund sources reported are not adjusted for the 'Other Receipts' column on the 90/10 Report.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The following are report examples. The first example excludes detailed calculations for each student. The second example includes detailed calculations for each student.

Account Aging Report

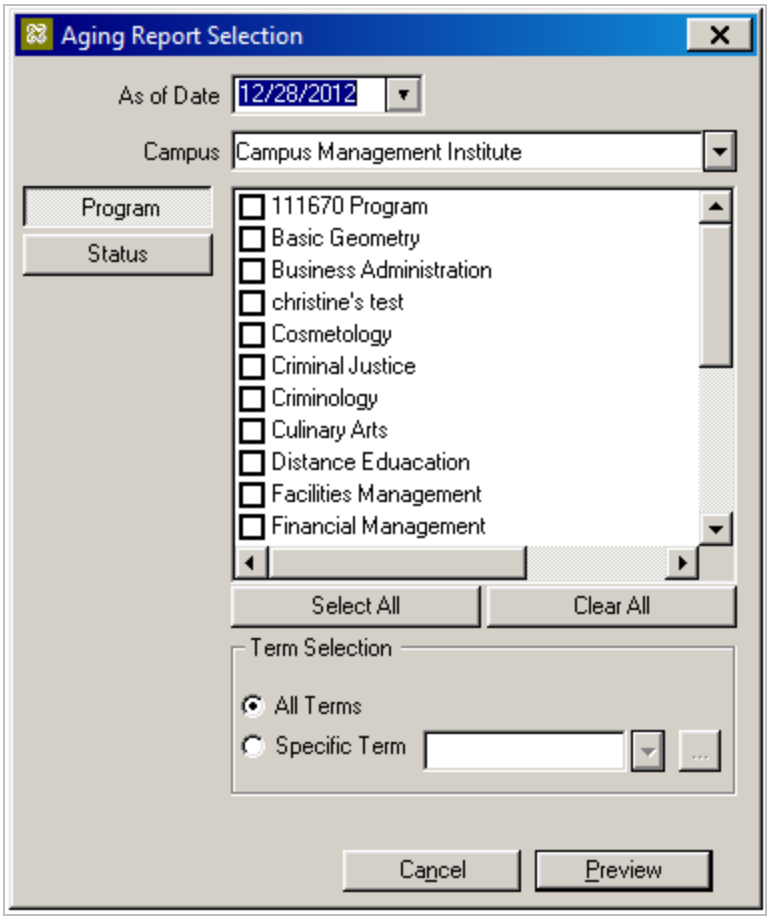
This report provides a summary of aged student accounts receivable. One detail line is listed on the report for each student enrollment.

To calculate the aging balances, there are five calculations (one for each time frame) for each student. All transactions 30 days or less from the Aging date are placed in the 0-30 category. To calculate the aged balance all transaction records with type D (debits) or I (invoices) are added. All transaction records with type C (credits) or P (payments) are subtracted.

To run the report:

1. Navigate to **Reports > Student Accounts > Account Aging Report**. The Aging Report Selection form is displayed.
2. Select appropriate options in the **As of Date**, **Campus**, **Program** or **Status**, and **Term** fields.

   Note: If a Status category is selected, the student's status as of the aging date needs to be determined. This is done by looking at the student record in the SyStatChange table where the effective date is closest to but not greater than the aging date.



3. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

- Student Name
- SSN
- Enrollment Status
- AR Balance
- Current (0-60)
- Over 30
- Over 60
- Over 90
- Over 120

The report is sorted by Student within Program. Grand totals for each age range are listed at the bottom of the report.

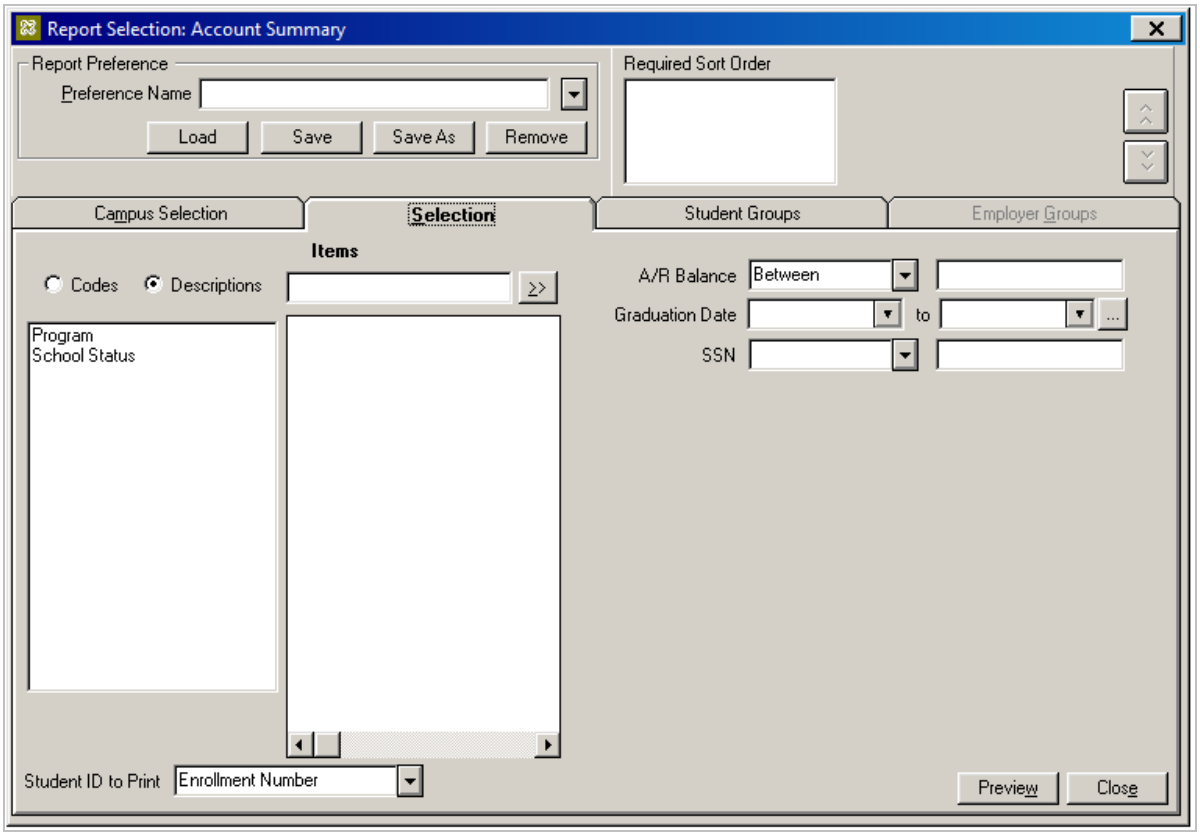
Account Summary

This report provides a student account summary. It includes balances for each enrollment, transaction detail, expected funding, and a transaction code (category) breakdown.

To run the report:

1. Navigate to **Reports > Student Accounts > Account Summary**. The Report Selection: Account Summary form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: When you enter a Social Security Number, a report for a single student is produced.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   You can create student groups and - with the Student Groups tab remaining enabled - change your Campus selections, use your saved Report Preferences, and preview the report created to verify that the report matches your selection criteria before exporting your report to various formats, including Excel and XML.

   Additionally, you can make student groups inactive. To do so, click 'Edit' and clear the Active check box. When go back to the Report Selection form and click the Student Groups tab, the 'inactive' student group will no longer appear.

   Notes:

- If you filter data by Student Groups, the Selection tab filters do not apply.
- This type of report is based on a *view* of the pre-selected group of students. The report only uses the student group because it saves the query used when the student group is created.
- You can also have a report based on a *stored procedure*. This type of report allows the use of the Student Group tab and the report selection criteria.
- You can obtain different results for the same report depending upon whether it is a report based on a view or stored procedure.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report is sorted by Student Name. Each student begins on a new page.

   The report displays the following details:

   - Balance summary by enrollment
   - List of all transactions in date order with a total
   - Summary by transaction code (category) with totals.

Credit Card Transactions

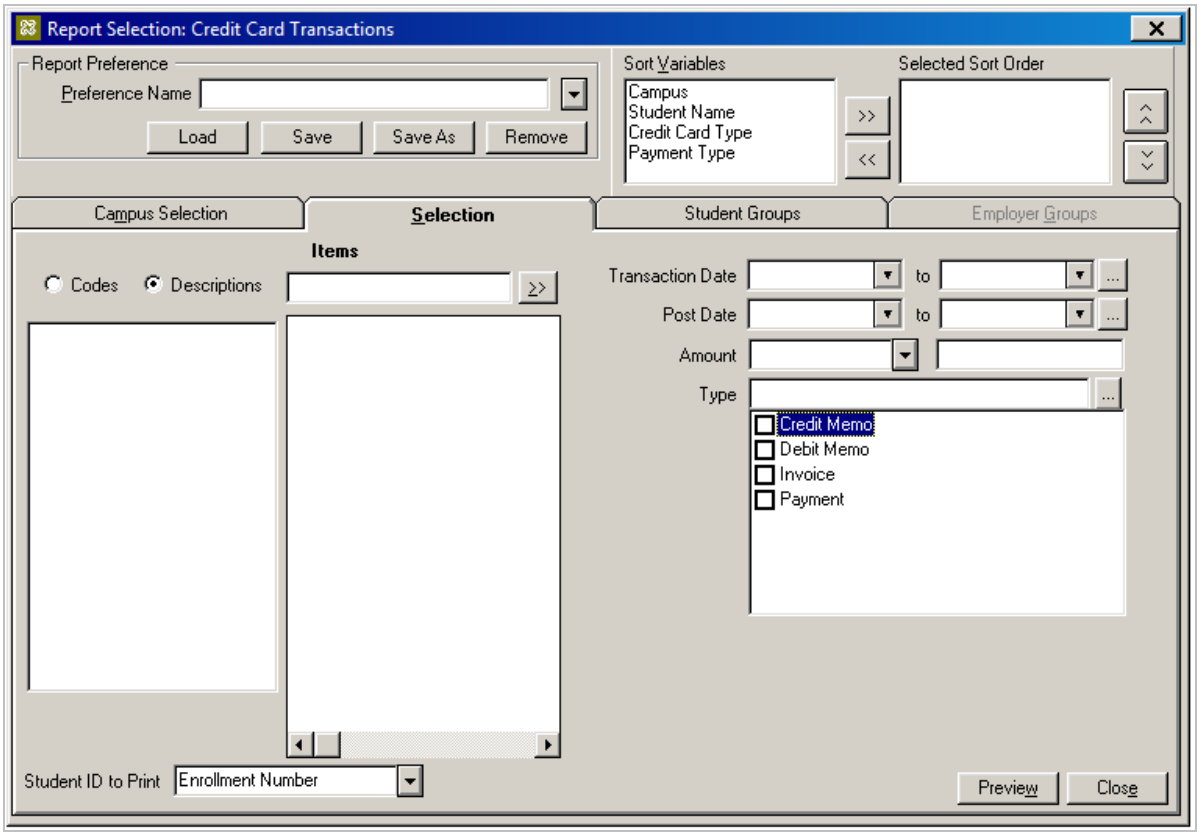
This report lists credit card transactions within a date range entered by the user.

To run the report:

1. Navigate to **Reports > Student Accounts > Credit Card Transactions**. The Report Selection: Credit Card Transactions form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Notes:

   - You can specify only transactions that are greater than or less than an entered number.
   - If you specify only transactions where the amount is less than zero (0), the resulting report lists only Credit Card Refunds made.
   - If you specify only transactions where the amount is greater than zero (0), the resulting report lists only Credit Card Payments Received.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

The report displays the following details:

- Student Name
- Student ID
- Transaction Description
- Transaction Date
- Posting Date
- Credit Card Number
- Credit Card Type (Visa, AMEX, etc.)
- Credit Card Expiration Date
- Card Holder Name
- Card Holder ZIP Code
- Authorization Code
- Decline Code
- Transaction Date
- Transaction Amount

A campus total and grand total are provided.

Detail Subsidiary Transaction Register

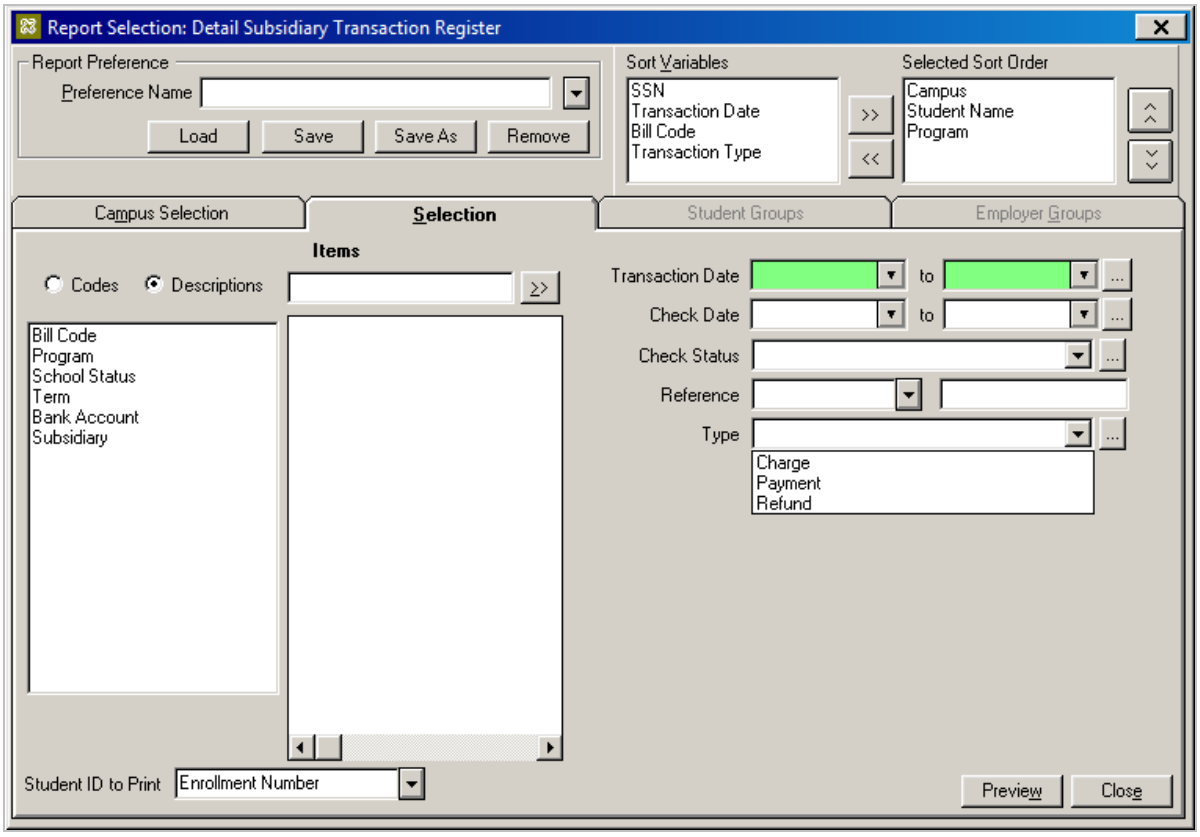
This report provides detailed information about transactions in the subsidiary register.

To run the report:

1. Navigate to **Reports > Student Accounts > Detail Subsidiary Transaction Register**. The Report Selection: Detail Subsidiary Transaction Register form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   You must specify the transaction date range for the report. Additional selection options include the Check Status (Cleared, Sent, Unclaimed, Void) and Check Date options to collect information about subsidiary refund checks and options to search data by Reference ID or Type (Charge, Payment, or Refund).

   Note: The Detail Transaction Register report provides additional Sort and Selection options, such as 'Tuition Discount Policy', the Type options 'Credit Memo', 'Debit Memo', and 'Invoice', and the option to 'Include applied payments'.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID

- Transaction Type
- Bill Code
- Bill Code Description
- Transaction Date
- Check Status
- Check Date
- Check Number
- Bank Account Description
- Bank Account Number
- Voided/Deposited Amount

The report displays transaction details for each student and a summary of all transactions grouped by Bill Code and selected sort criteria.

Drop Report

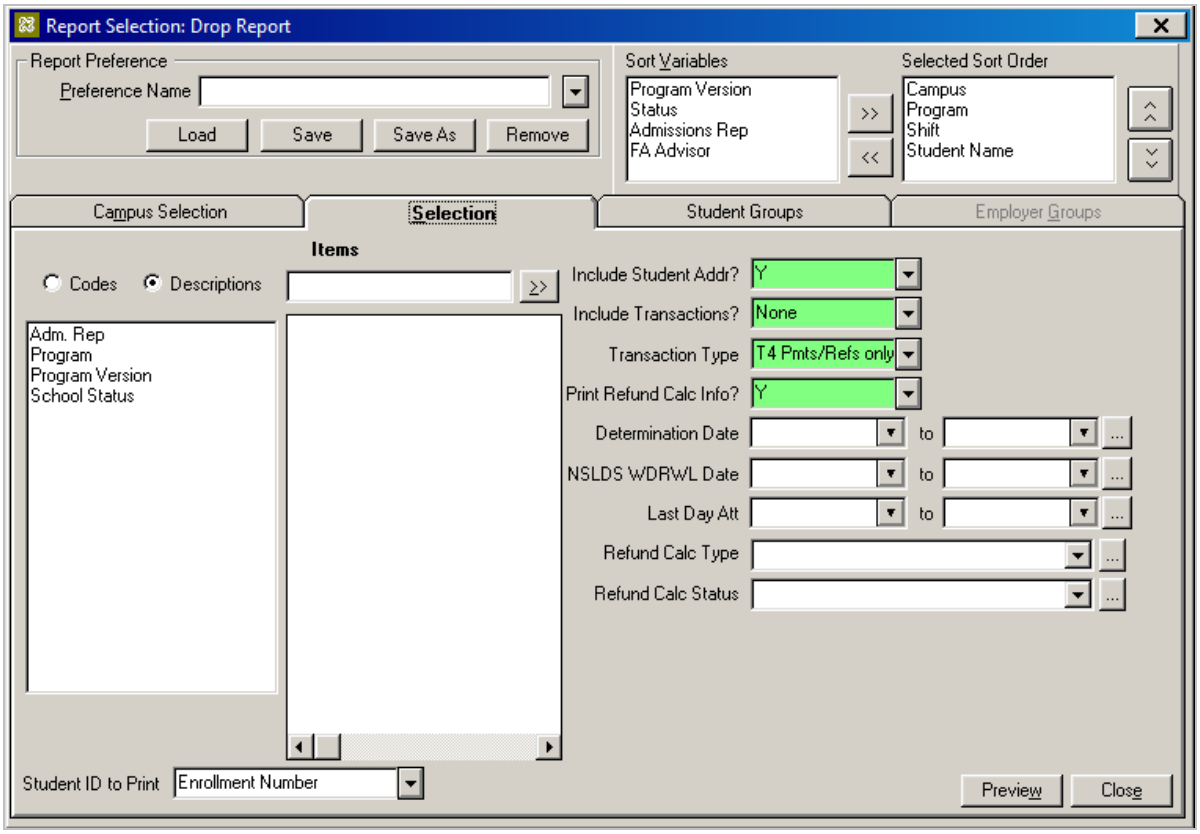
This report lists students that have dropped out of an enrollment.

To run the report:

1. Navigate to **Reports > Student Accounts > Drop Report**. The Report Selection: Drop Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Notes:

   - If you select to include transactions, the sub report 'Ledger Card Transactions' is displayed as a part of the report.
   - If you select to print refund information, the sub report 'Refund Calculation Status' is displayed as a part of the report. Details on the sub report include Refund Calculation Type, Refund Calculation Status, Date Calculated, Description of the Fund Source, Refund Amount, T4Refund Amount, Return Method, and the Date Sent.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

The report displays the following details:

- Student Name

Earned/Prepaid A/R Report

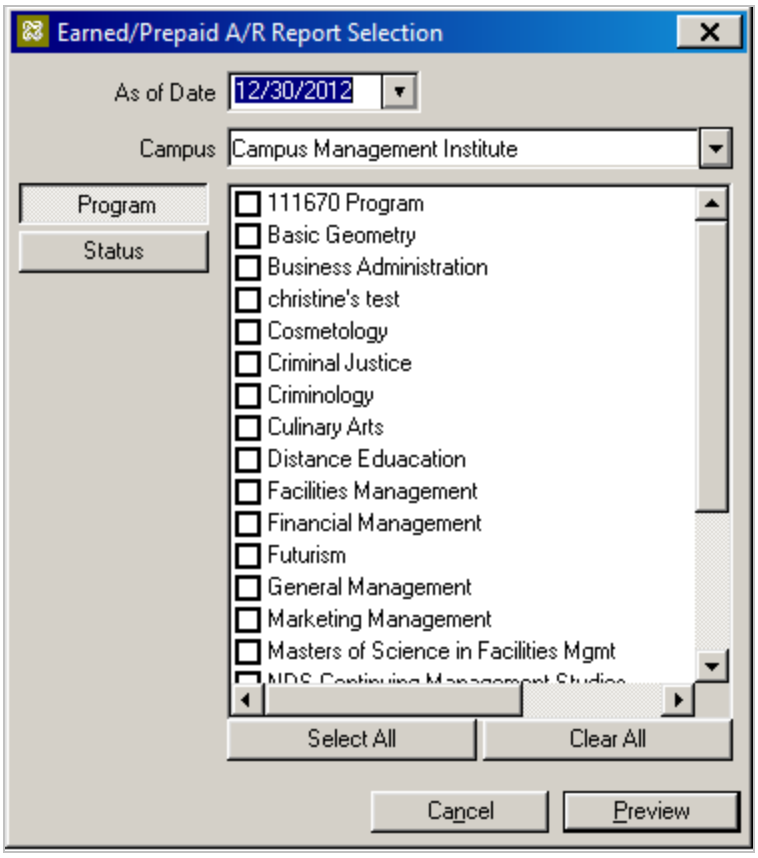
This report compares a student's account balance to the deferred tuition balance. Schools use this report to confirm that they have collected the amount of revenue they have earned from the student.

A school earns revenue on students over a period of time. If a student's account is "up to date", in theory, a school will have collected the amount of money from the student that they have "earned" as revenue. Therefore, the amount that is left to earn for a student (deferred amount) could equal the student's account balance.

For example, if a school has earned $5000.00 on a student, and still has $5000.00 deferred (unearned), the student's account balance would be expected to be equal to or less than $5000.00. If the student's account balance was $8,000.00, the school could recognize revenue of $3000.00 earned but not received. Likewise, if a student's account balance is zero, with $5000.00 deferred, the student has "prepaid" the amount of deferred revenue. This becomes critical when reporting "unearned revenue" on financial statements.

To run the report:

1. Navigate to **Reports > Student Accounts > Earned/Prepaid A/R Report**. The Earned/Prepaid A/R Report Selection form is displayed.
2. Select appropriate options in the **As of Date**, **Campus**, **Program** or **Status** fields.



3. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

- Student Name
- Status, Program
- Start Date
- Graduation Date
- Total End Deferred
- Accounts Receivable (AR) Balance
- Earned AR
- Prepaid AR.

The following are examples of the Earned/Prepaid A/R Report details page and the Summary by Status page.

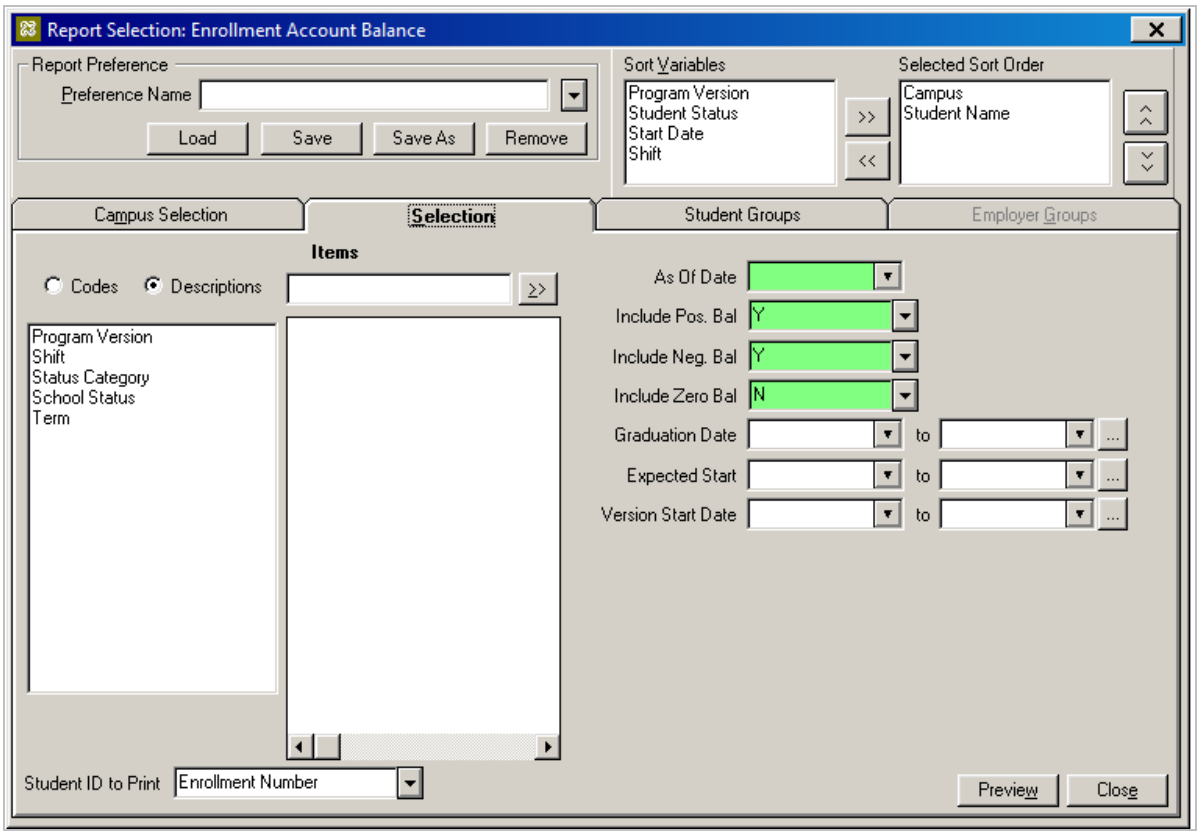
Enrollment Account Balance

This report displays one line for each student enrollment and shows the students' ledger card balances as of a given date. Students are listed alphabetically by name.

To run the report:

1. Navigate to **Reports > Student Accounts > Enrollment Account Balance**. The Report Selection: Enrollment Account Balance form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - Phone
   - Shift
   - Program Version Description

- Student Status
- Start Date
- Number of Days Since Last Payment
- Student Balance
- Enrollment Balance (from all enrollments)

The last page of the report provides grand totals on the Student Balance and Enrollment Balance.

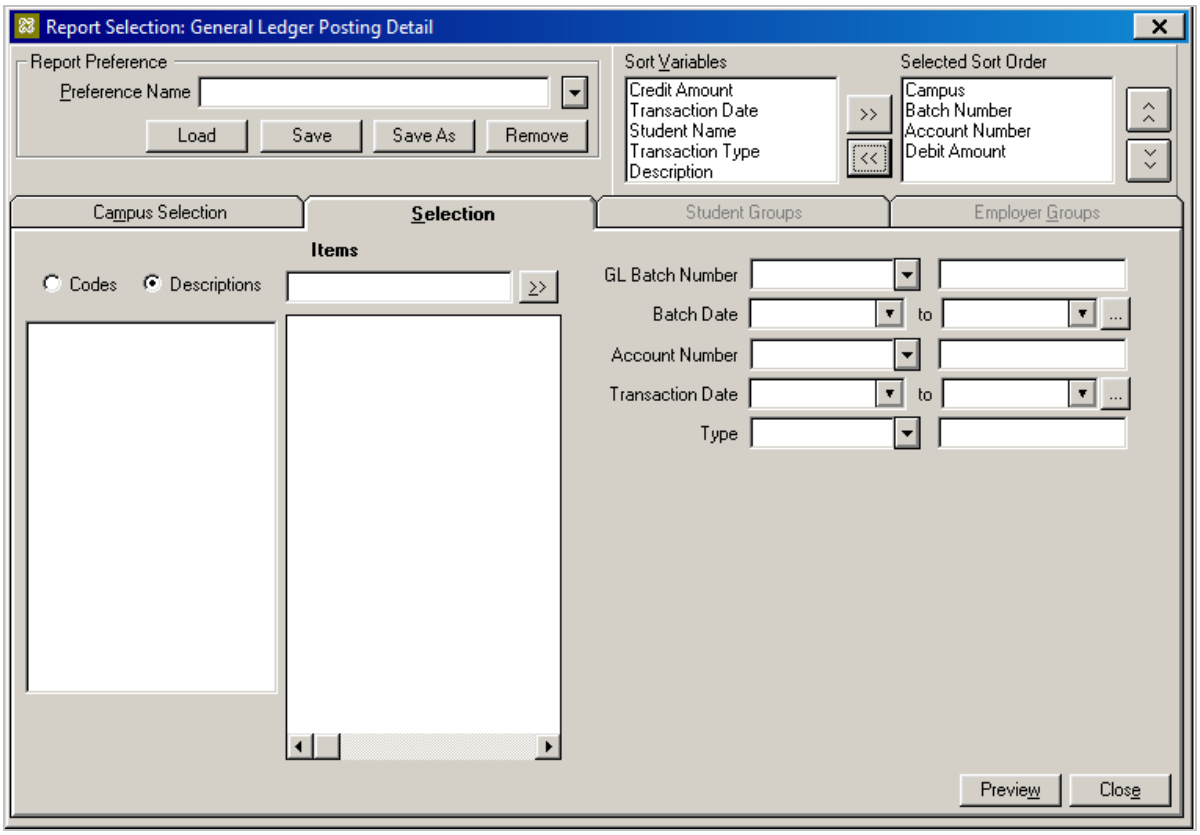
General Ledger Posting Detail

This report lists selected general ledger transaction posting details. When printed from the Reports menu, the General Ledger Detail report prints only posted batches.

To run the report:

1. Navigate to **Reports > Student Accounts > General Ledger Posting Detail**. The Report Selection: General Ledger Posting Detail form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Campus
   - Account Number
   - Transaction Date
   - Description
   - Transaction Type
   - Student Name
   - Payment Type
   - Check Number
   - Debit Amount

- Credit Amount
- Net Change

Group and grand totals are included for the amount fields.

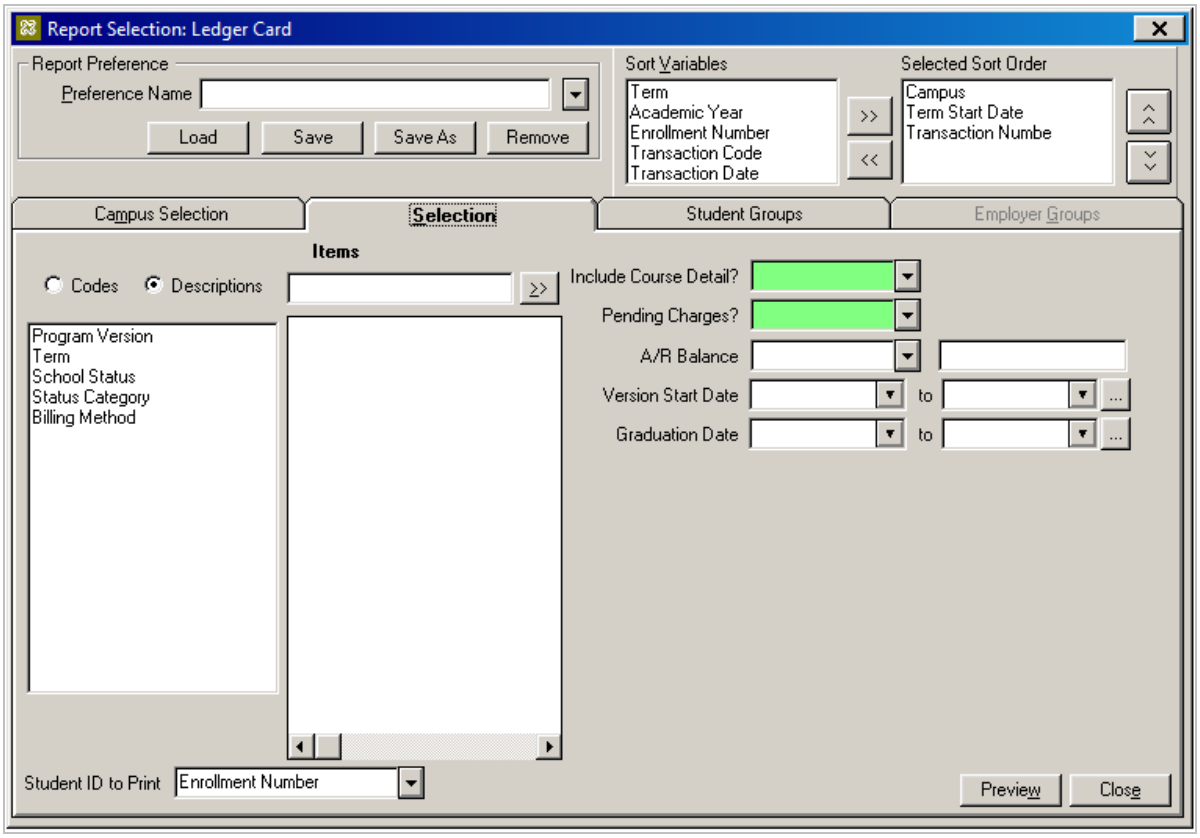
Ledger Card Report

This report produces a ledger card for each student selected. Transactions on each ledger card are separated by enrollment. The combined current balance for all enrollments is displayed at the top of the report along with student identification data. When you print the Ledger Card report for students with multiple enrollments, the current (most recent) status is listed.

To run the report:

1. Navigate to **Reports > Student Accounts > Ledger Card**. The Report Selection: Ledger Card form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The student information section displays the following:

   - Student Name, Address, and ID
   - Balance
   - Current Status
   - Program Version
   - Start Date

- Last Date Attended
- Graduation Date

The detail lines provide the following:

- Date
- Check/Reference Number
- Enrollment
- Term
- Campus
- Charge Code
- Payment Period/Academic Year Description
- Charges
- Payments
- Balance

Group and grand totals are included for the amount fields.

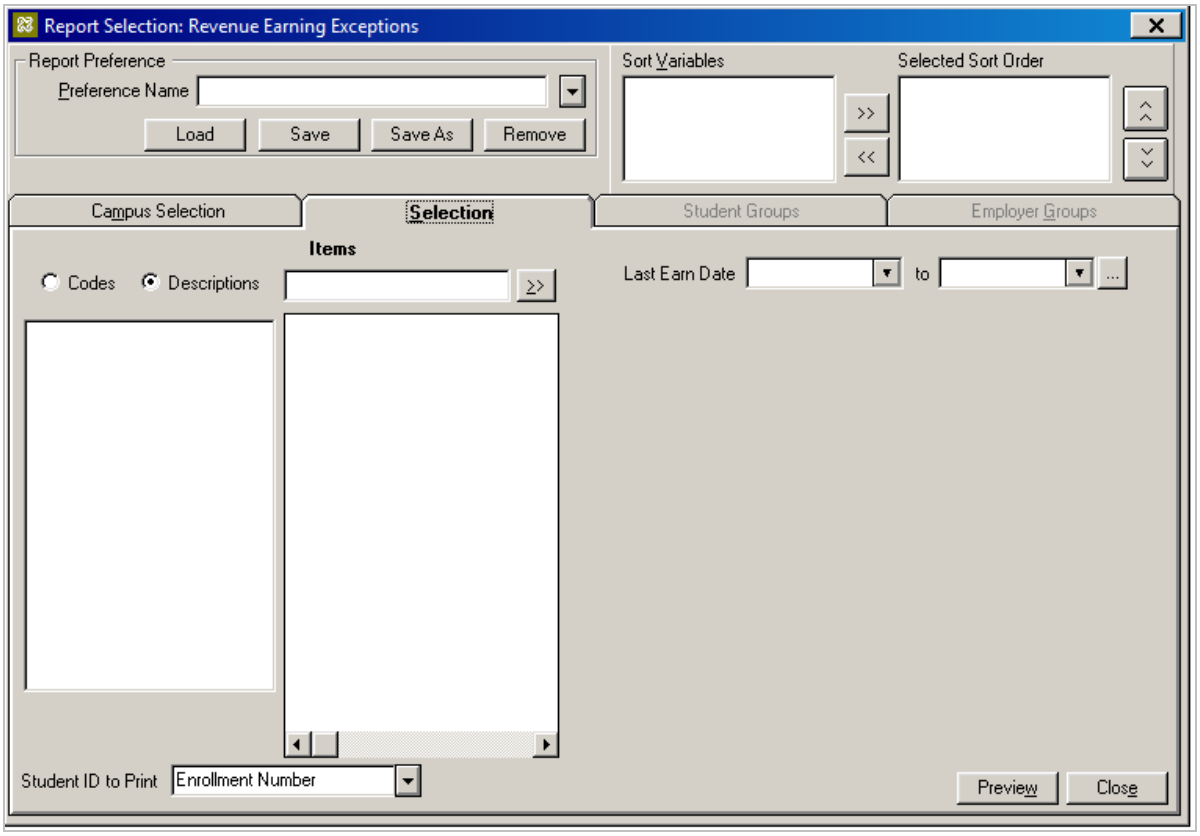
Revenue Earning Exceptions

This report lists revenue earning exceptions including the reasons for the exceptions.

To run the report:

1. Navigate to **Reports > Student Accounts > Revenue Earning Exceptions**. The Report Selection: Revenue Earning Exceptions form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - Earned Date
   - Student Status
   - Exception Reason
   - TRX Code (transaction code associated with the revenue type cross-reference)
   - Unearned Revenue Amount

The report displays the total of unearned revenue.

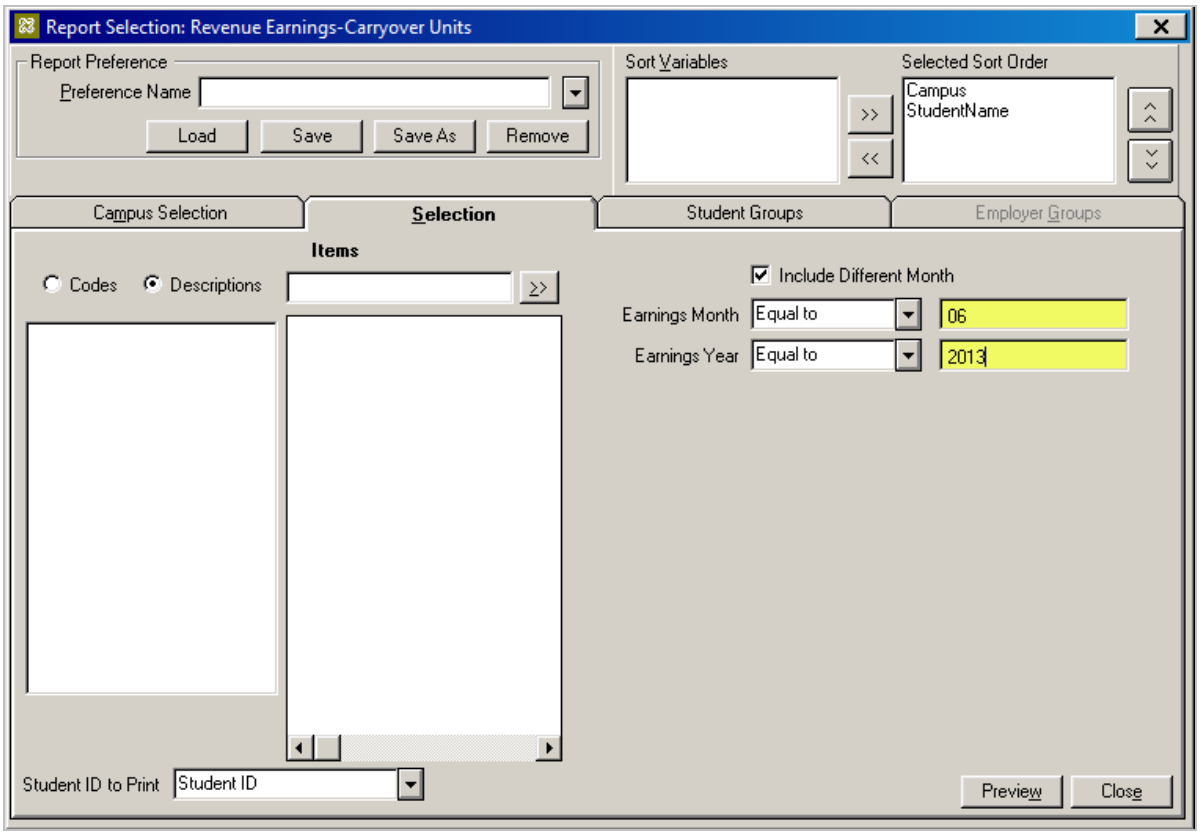
Revenue Earnings - Carryover Units

This report lists students that have Carryover Units who have earned across Academic Years with Attended Hours revenue units. The report displays both the Academic Year where the extra revenue units (attended hours) occurred as well as the Academic Year that received the Carryover Units. For more information please refer to Example of Revenue Recognition with Billed by Academic Year and Earned by Attended Hours section of the Revenue Recognition Help topic.

To run the report:

1. Navigate to **Reports > Student Accounts > Revenue Earnings - Carryover Units**. The Report Selection: Revenue Earnings - Carryover Units form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab. Clear the **Include Different Month** check box to gather only students who had earned Carryover Units in the selected month and had transitioned from one Academic Year to the next Academic Year in the same month. Select this check box to also include students who had earned Carryover Units in the selected month but the transition from on Academic Year to the next occurred in a different month. Specify a month and year in the Earnings Month and Earnings Year text box to gather students who had Carryover Units in that month.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Enrollment number

- Enrollment Code
- Campus
- Academic Year – Academic Year sequence
- Bill Code
- Unearned Amount – Total remaining amount to be earned for the Academic Year sequence
- Earned Amount – Total amount earned for the Academic Year Sequence
- Last Earn Date – Date when the revenue was last earned
- Units Earned – Total revenue units earned to date for the Academic Year Sequence
- Transaction Date – Date when revenue is recognized
- Source
- Beginning Balance
- Deferred Amount – New charge(s) amount for the month
- Units Remaining – Units remain to be earned
- Units Earned – This column displays the total units earned for the period including any Carryover Units.
- Earned Amount – Amount earned for the period
- Ending Balance – Remaining amount to be earned
- CarryOver Units – This column displays the extra attended hours carried over from the prior Academic Year.

The report displays students gathered with the specified criteria.

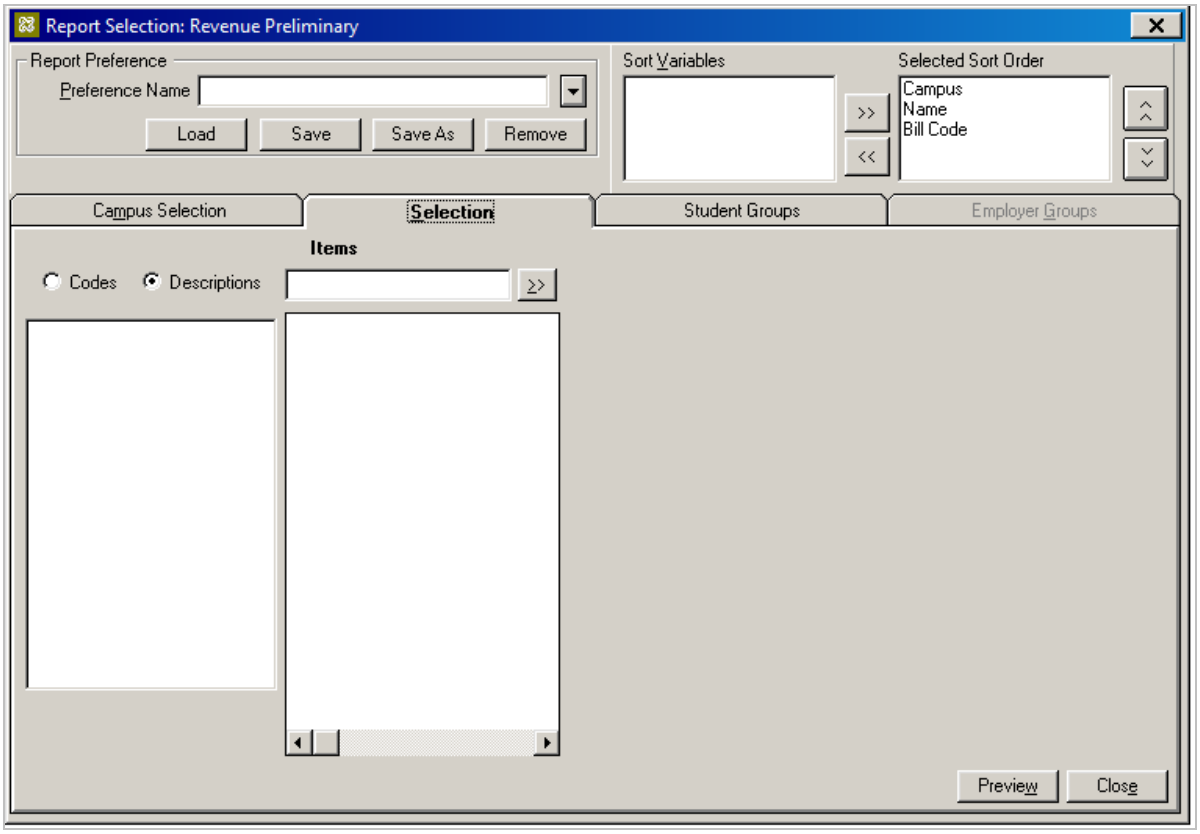
Revenue Preliminary

This report lists preliminary revenue data.

To run the report:

1. Navigate to **Reports > Student Accounts > Revenue Preliminary**. The Report Selection: Revenue Preliminary form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.
5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

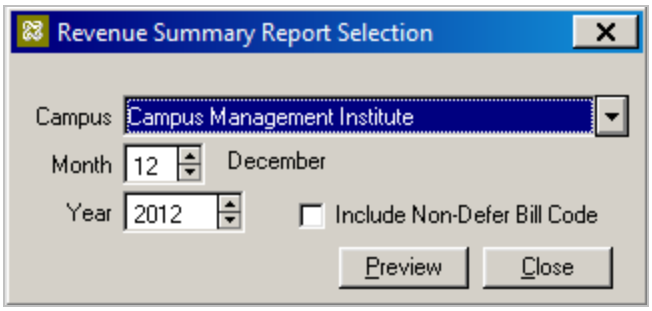
Revenue Summary

This report provides a revenue summary as of a specified date.

Note: Manually deferred adjustments are not updated with a status on this report.

To run the report:

1. Navigate to **Reports > Student Accounts > Revenue Summary**. The Revenue Summary Report Selection form is displayed.
2. Select the Campus, Month, and Year. If applicable, select the check box to 'Include Non-Defer Bill Code'.



3. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - SSN
   - Program
   - Program Version
   - Start Date
   - Graduation Date
   - Status
   - Course
   - Trans Code
   - Term
   - Academic Year/Payment Period
   - Units
   - Revenue Per Day
   - Beginning Unearned
   - Current Charges
   - Future Charges
   - Current Month Revenue
   - Ending/Total Unearned

   Lines appear on the report if non-zero amounts appear in Beginning Unearned, Current Charges, or Current Month Revenue. Future Charges come from Program Fees not yet billed. Grand totals are provided for the amount columns.

   The following cross-tabulation is provided at the end of the report:

   - Current Revenue by Status/Program
   - Transaction Code

- Billing Code/Program

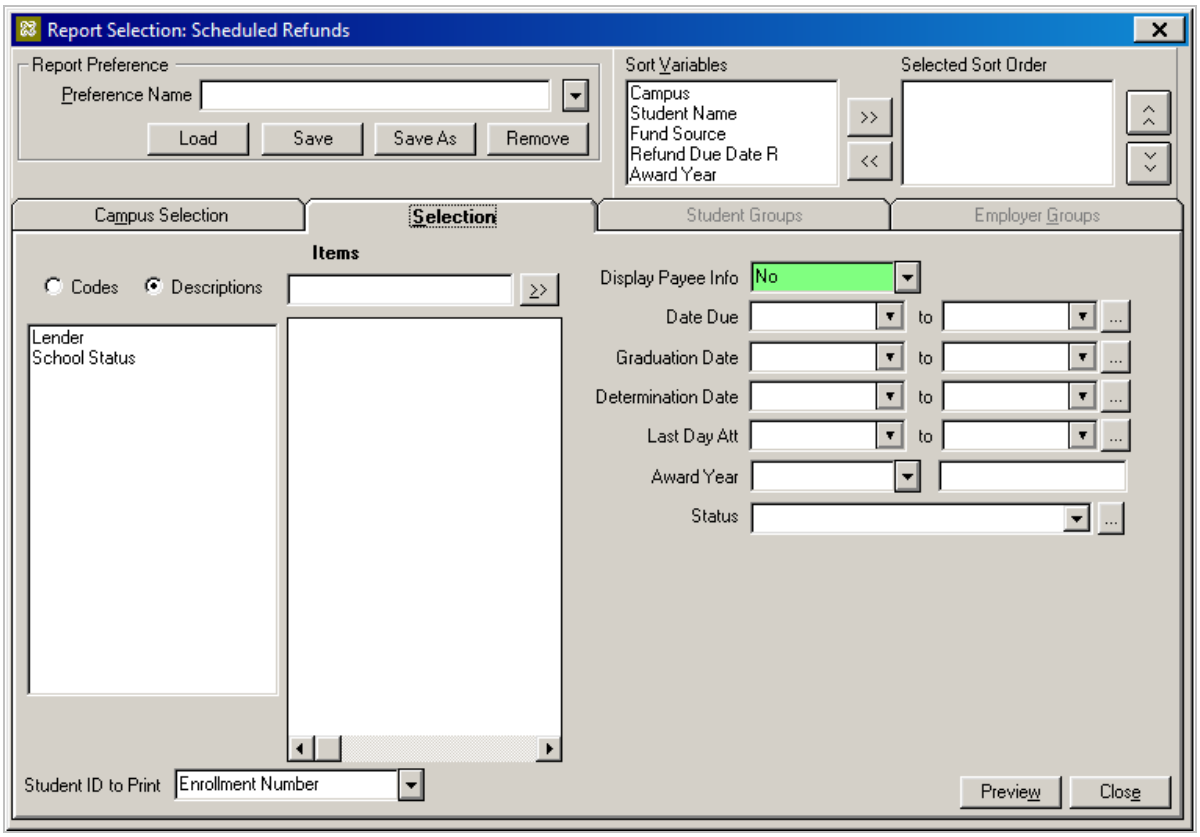
Scheduled Refunds

This report displays refund checks scheduled to be printed. It provides an easy way for you to make sure all refunds are being made in a timely manner. The status (of the refund) can be Posted, Not Posted, and/or Void.

To run the report:

1. Navigate to **Reports > Student Accounts > Scheduled Refunds**. The Report Selection: Scheduled Refunds form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - Campus Code
   - School Status
   - Start Date
   - LDA
   - Program Version
   - Drop Date
   - Fund Source/Award Year

- Refund Status
- Refund Amount Due
- Due Date
- Date Sent
- Check #

The amount of a voided refund is listed as a negative value to be subtracted from the report totals.

Title IV Credit Balance

The report calculates all charges identified as Title IV charges and subtracts all payments defined as Title IV payments to determine if there is a credit balance. The report displays a list of students and the detailed transactions that result in the Title IV balance.

When a Title IV credit balance occurs, institutions have 14 days to return the credit balance to the student (or to parent for PLUS loans) unless the institution has obtained authorization to hold credit balances. When the award year has expired, or the loan period has expired, the institution must return the credit balance within 14 days, regardless of whether they have obtained authorization to hold credit balances.

Campuses that are configured to use Auto-Stipends also take into account the time period selected for evaluation. If the time period has not expired, then waivers are acknowledged and used in the calculations.

Filtering the Title IV Credit Balance Wizard or Title IV Credit Balance Report by Loan Period

When a student has only Title IV loans, or a combination of Title IV loans and Title IV grants, the system reports the pay period based on the Loan Period.

The system gathers students who have posted charges and as well as grant and loan disbursements for the specified loan period and considers any refunds or stipends where the student is left with a credit balance. It then generates a report that displays information such as: Student's Campus, Student Name, ID Enroll Status, Description, Program Version, Term Code, Title IV/Institutional Charges, Title IV Payment, Start Date, Grad Date, and Credit Balance.

Filtering the Title IV Credit Balance Wizard or Title IV Credit Balance Report by Award Year

If a student is packaged for only Title IV grants, the system reports the pay period based on the Award Year.

The system gathers students who have posted charges and grant disbursements and considers any refunds or stipends where the student is left with a credit balance associated with an Award Year. It generates a report that displays the Student's Campus, Student Name, ID Enroll Status, Description, Program Version, Term Code, and Title IV / Institutional Charges.

Proration Logic

For any students who are charged up front for multiple payment periods (e.g. for an entire program or academic year), Campus Nexus Student prorates the Title IV funds charges to determine the actual payment period (term / payment period) charges and calculate whether a Title IV Credit Balance has occurred. These credit balances are posted to the student's ledger as stipends and can be used by the student for non-institutional educational expenses in each payment period. This proration enables an institution to remain in compliance with the Department of Education's (ED) Program Integrity and Improvement Rule of October 30, 2015.

The prorated amount of charges associated with a current pay period are determined by:

- If the program has substantially equal payment periods, the program's total institutional charges are divided by the number of payment periods in the program.
- For other programs, the number of credit or clock hours in the current payment period are divided by the total number of credit or clock hours in the program. That result is then multiplied by the total institutional charges for the program.

Term-based students

Term-based students are students who enrolled in a program where the program’s Academic Calendar is one of the following:

- Academic Calendar 1 – Non-standard terms (SE9W – terms substantially equal in length, with each term comprised of 9 or more weeks of instructional time)
- Academic Calendar 2 – Standard terms of quarters
- Academic Calendar 3 – Standard terms of semesters
- Academic Calendar 4 – Standard terms of trimesters

For term-based students who are billed in advance by program, the system prorates the Title IV charges for each term in the current year (loan period or award year being evaluated) by dividing the total Title IV charges for the program by the total number of credits required to complete the program, then multiplying the result by the number of credits registered in the term.

- Prorated Term Charge = (All Title IV charges / # credits required) X Credits registered in the term

For term-based students who are billed in advance by academic year, the system prorated the Title IV charges for the academic year equally among all the terms in the academic year. The system determines the number of terms in an academic year by dividing the credits defined for the academic year by the number of expected credits per term configured at the program version setup.

- Prorated Term Charge = Academic Year's Title IV charges / # of terms in the Academic Year

Note: The use of perpetual terms for disbursing Title IV aid and / or course registration is not supported under this feature since the system must be able to determine the credits registered and the Title IV payments for each term in order to accurately calculate the credit balance. As a result, no proration of Title IV charges will be carried out for these students and the Title IV balance is calculated in the same manner as it is for students who are not billed in advance.

Non-term based students

Non-term based students are students who enrolled in a program where the program's Academic Calendar is one of the following:

- Academic Calendar 5 – Clock Hours
- Academic Calendar 6 – Credit hours without terms

For non-term based students who are billed in advance by Program, the system prorates the Title IV charges for each payment period in the current year by dividing the total Title IV charges for the program by the total number of credits required to complete the program, then multiplying the result by the number of credits defined for the payment period.

- Prorated Payment Period Charge = (All Title IV charge / # of credits or hours required) X credits or hours defined for the payment period

For non-term based students who are billed in advance by academic year, the system prorates the Title IV charges for each payment period in the current year by dividing the Title IV charges for the academic year by the number of credits/hours defined for the academic year, then multiply the result by the number of credits/hours defined for the payment period.

- Prorated Payment Period Charge = (Academic Year's Title IV charges / # of credits or hours defined for the Academic Year) X credits or hours defined for the payment period

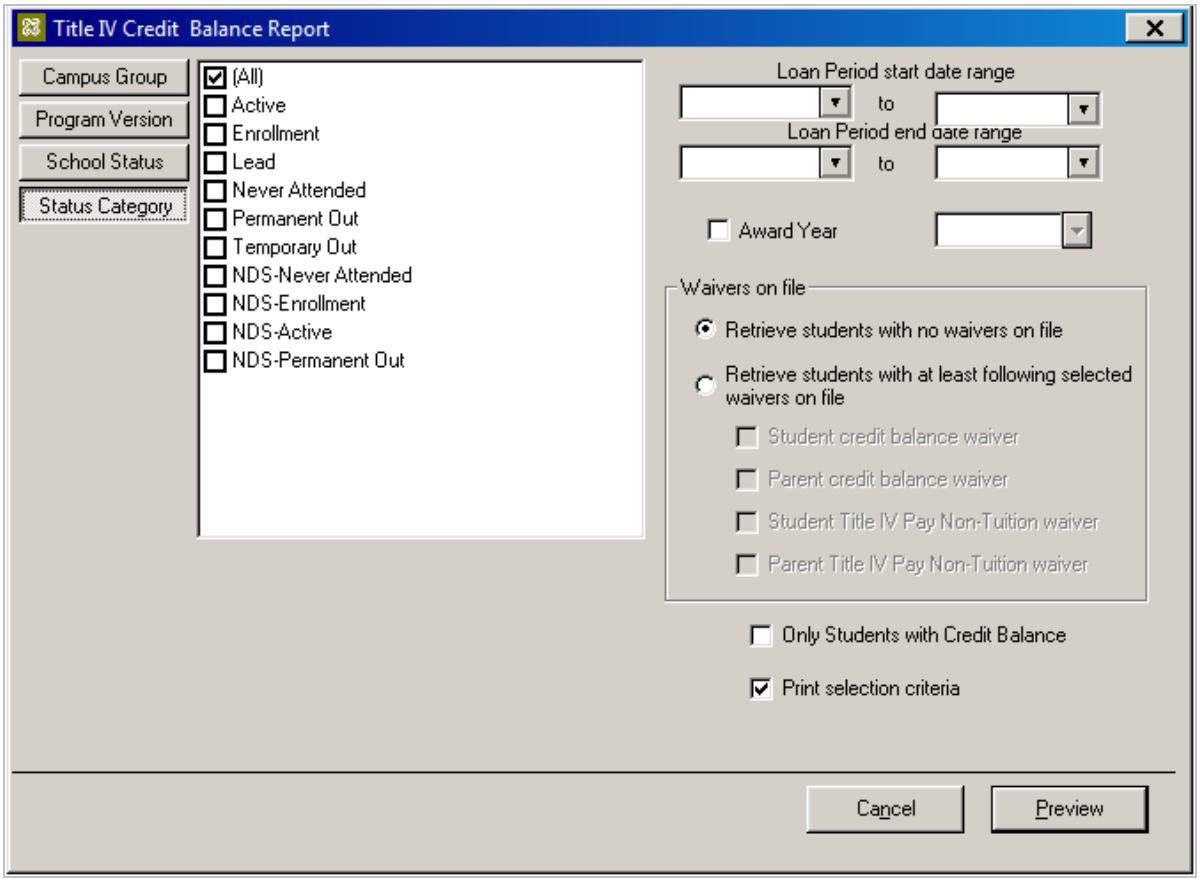
Note: Payment periods are required to prorate Title IV charges and to identify Title IV payments, and to accurately calculate the credit balance for each payment period. No proration of Title IV charges will be carried out for non-term students who are billed in advance if payment periods are not found. As a result, the Title IV balance is calculated in the same manner as it is for students who are not billed in advance.

Non-standard term based not SE9W students

Non-standard term based not SE9W students are awarded Title IV grants based on terms, but are awarded direct loans based on payment periods. The guidance from ED allows schools to evaluate Title IV credit balance for these students based on terms if Title IV grant(s) exists in the current year. Otherwise, the Title IV credit balance evaluation must be done based on payment periods. So if the Title IV grants exist in the current year, the system prorates the Title IV charges using the prorate logic for term-based students. If Title IV grants do not exist in the current year, the system prorates the Title IV charges using the prorate logic for non-term based students.

To run the report:

1. Navigate to **Reports > Student Accounts > Title IV Credit Balance**. The Title IV Credit Balance Report form is displayed.



2. Click **Campus Group** and select appropriate options.
3. Specify the **Loan Period start date range** or select an **Award Year**.
    - For the Loan Period option, the system gathers students who have posted Title IV charges and Direct loan disbursements as well Title IV grant disbursements for the specified loan period. The system considers refunds and stipends in the Title IV balance calculation.
    - For the Award Year option, the system gathers students who have only posted Title IV charges and Title IV grants for the specified award year. The systems considers refunds and stipends in the Title IV balance calculation.

    Fund Source types configured as Title IV Grants are Pell, Perkins, ACG, SMART, TEACH, or SEOG.

    Fund Source types for FFEL or Direct Loans are SUB, UNSUB, PLUS, DIRSUB, DIRUNSUB, and DIRPLUS.
4. Optional: Select additional filter criteria, such as Program Version, School Status, Status Category, Waivers, Students with Credit Balance.
    - You can indicate by enrollment if the student has signed a waiver allowing the institution to retain the credit balances.
    - You can choose to include only students without a credit balance waiver on file, to include only students with a waiver on file, or to include students with credit balances regardless of the waiver status.
    - You can choose to include students with at least one of the following selected waivers on file:

- Student credit balance waiver
- Parent credit balance waiver
- Student Title IV Pay Non-Tuition waiver
- Parent Title IV Pay Non-Tuition waiver

See Credit Balance Waiver.

- You can choose to include only students with a credit balance or to include all students.
- You can have the program list the selection criteria on the report.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Campus
   - Student Name
   - Student ID (Social Security Number)
   - Enrollment Status
   - Program Version
   - Start Date
   - Graduation Date
   - Waiver on File Indicator
   - Description
   - Title IV Charges
   - Title IV Payments
   - Balance

   Totals are provided by enrollment and student with a grand total at the end of the report.

Credit Balance Waiver

Lists > Contact Manager > Documents

To run the Title IV Credit Balances Report for students with credit balance waivers on file, you must set up a Credit Balance Waiver Document.

Navigate to **Setup** > **Campus Locations** > **Campuses** > **Campus Information** > Financial Aid

You must select that document as the credit balance waiver in the campus financial aid setup.

Navigate to **View** > **Contact Manager** > Documents

Add the credit balance document to a specific enrollment, not to 'All Enrollments'.

To appear on the Title IV Credit Balance Report as a student with a waiver on file:

- A document must be selected as the Title IV Credit Balance Waiver on the Financial Aid tab of the campus setup form.
- The document must be related to a specific student enrollment.
- In the document tracking folder, the Document Status for the Title IV Credit Balance document must be On File.
- The Date Expires field for the document on file must be null or later than the current date.

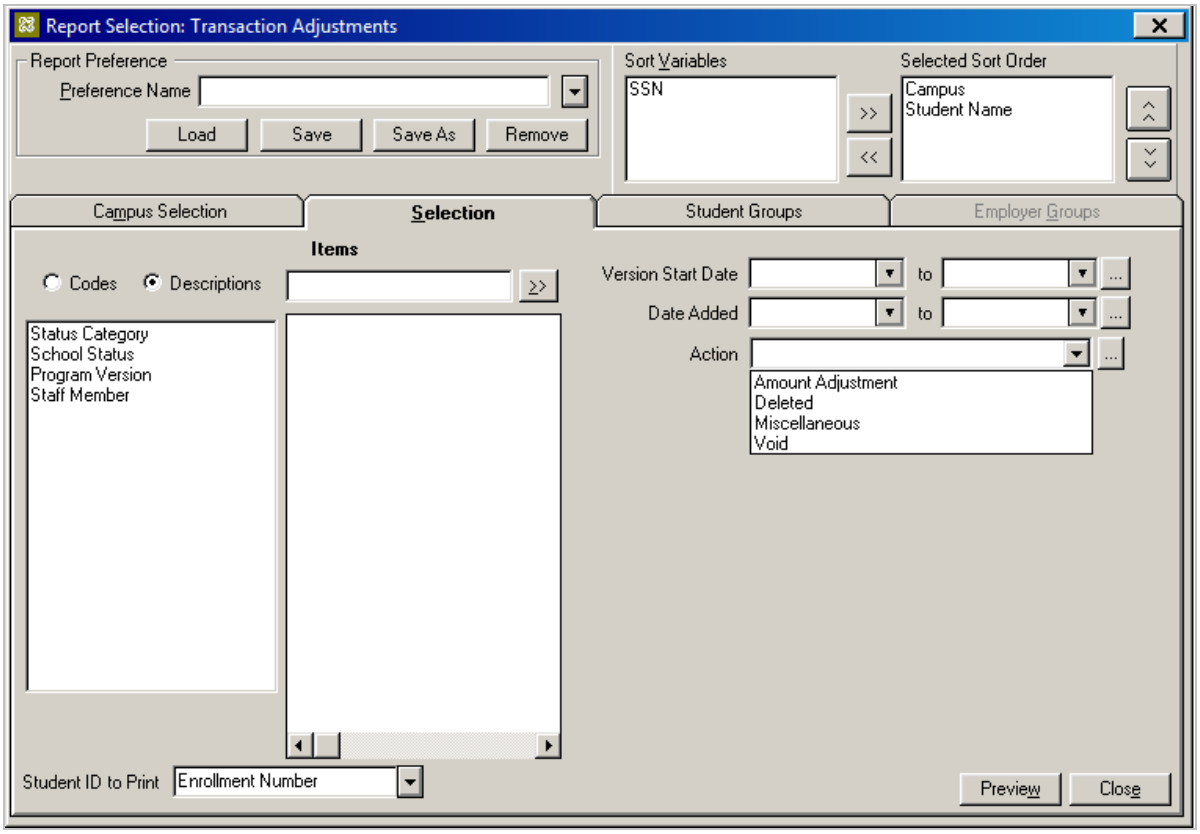
All students who do not meet the above requirements are considered to not have a waiver on file with your institution.

Transaction Adjustments

This report lists the data included under View > Student Accounts > Ledger Cards > Adjustments.

To run the report:

1. Navigate to **Reports > Student Accounts > Transaction Adjustments**. The Report Selection: Transaction Adjustments form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

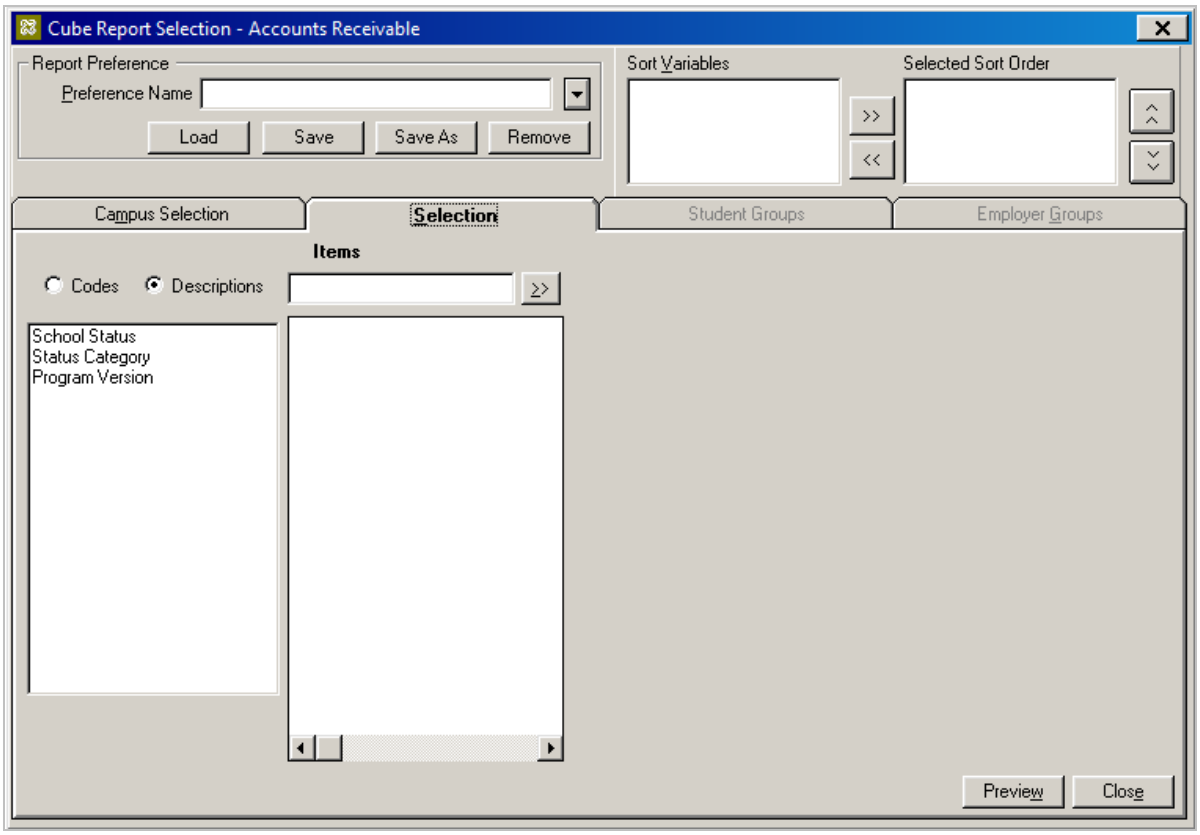
Accounts Receivable

This cube report can be used to analyze accounts receivable (AR) balances. The balances are computed from Enrollment Balances .

To run the report:

1. Navigate to **Reports > Student Accounts > Accounts Receivable**. The Cube Report Selection: Accounts Receivable form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The cube report is assembled and displayed.

   The following variables are available for use in this cube report:

   - Student Name
   - SSN
   - Status
   - Category
   - Program Version
   - Program
   - AR Debit Balances
   - AR Credit Balances
   - Total AR

Drag the variables to the vertical or horizontal axes as needed to get the cross-tabulated spreads. The cube is initialized with Program as the Y axis (rows) and Credit Balance, Debit Balance, Total AR as the X axis (columns).

Bank Deposit Report

This cube report can be used to analyze bank deposits.

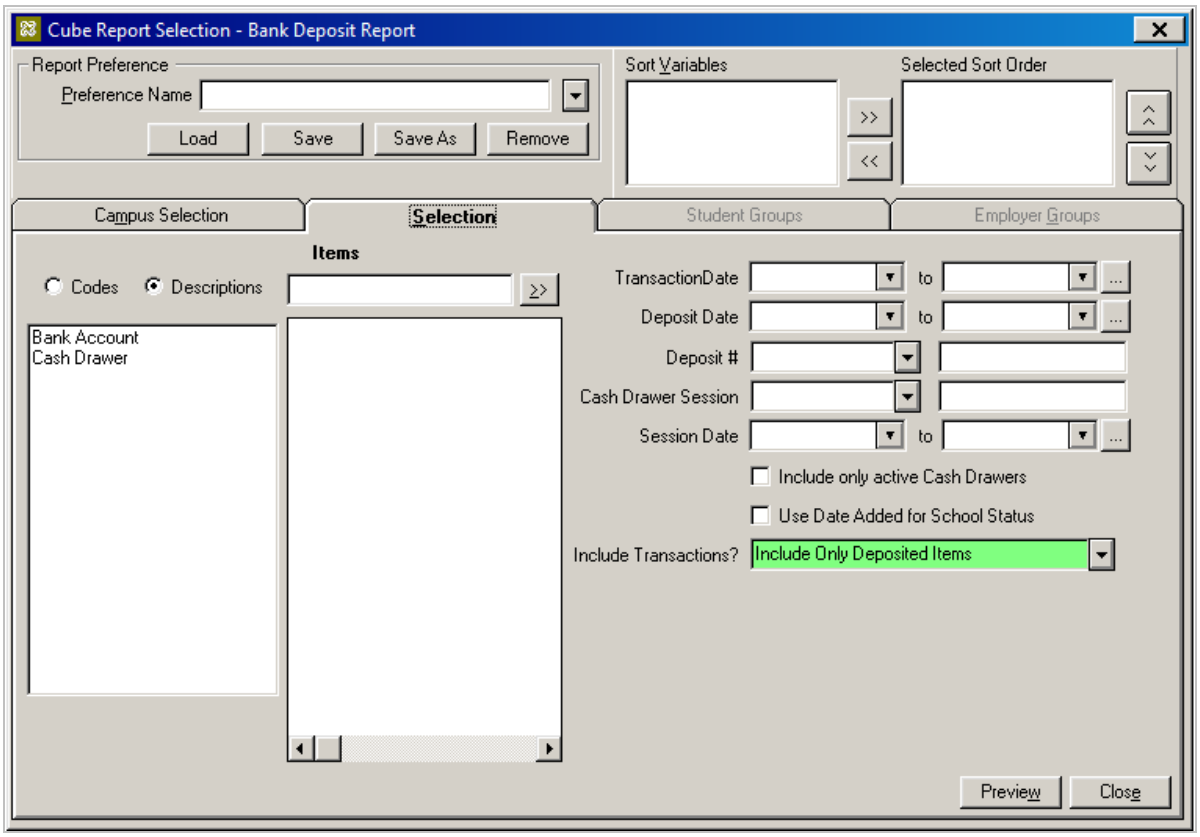
To run the report:

1. Navigate to **Reports > Student Accounts > Bank Deposit Report**. The Cube Report Selection: Bank Deposit Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: The 'Include Transactions?' options are as follows:

   - Collected in a Bank Deposit Only
   - Not Collected in a Bank Deposit Only
   - Include All Transactions

   An example of a 'Not Collected in a Bank Deposit Only' transaction are EFT bank transactions which are recorded electronically, i.e., no bank deposit slip is issued.



4. Click **Preview**. The cube report is assembled and displayed.

   The following variables are available for use in this cube report:

   - Record Name (a composite variable composed of student name, SSN, and receipt number)
   - Payment Type (cash, check, and credit card)

- Transaction Code (labeled as BillCode)
- Receipt Date
- Deposit Date
- Deposit Number
- Payment Type
- Bank Account
- Campus
- Payment Description
- Fund Type
- Cash Drawer Session
- Cash Drawer Session Date
- Cash Drawer
- General Ledger Debit Account
- General Ledger Credit Account
- Fund Source Code
- School Status
- NSFs
- Bill Code

Drag the variables to the vertical or horizontal axes as needed to get the cross-tabulated spreads. The cube is initialized with Receipt Name as the Y axis (rows) and Bill Code as the X axis (columns).

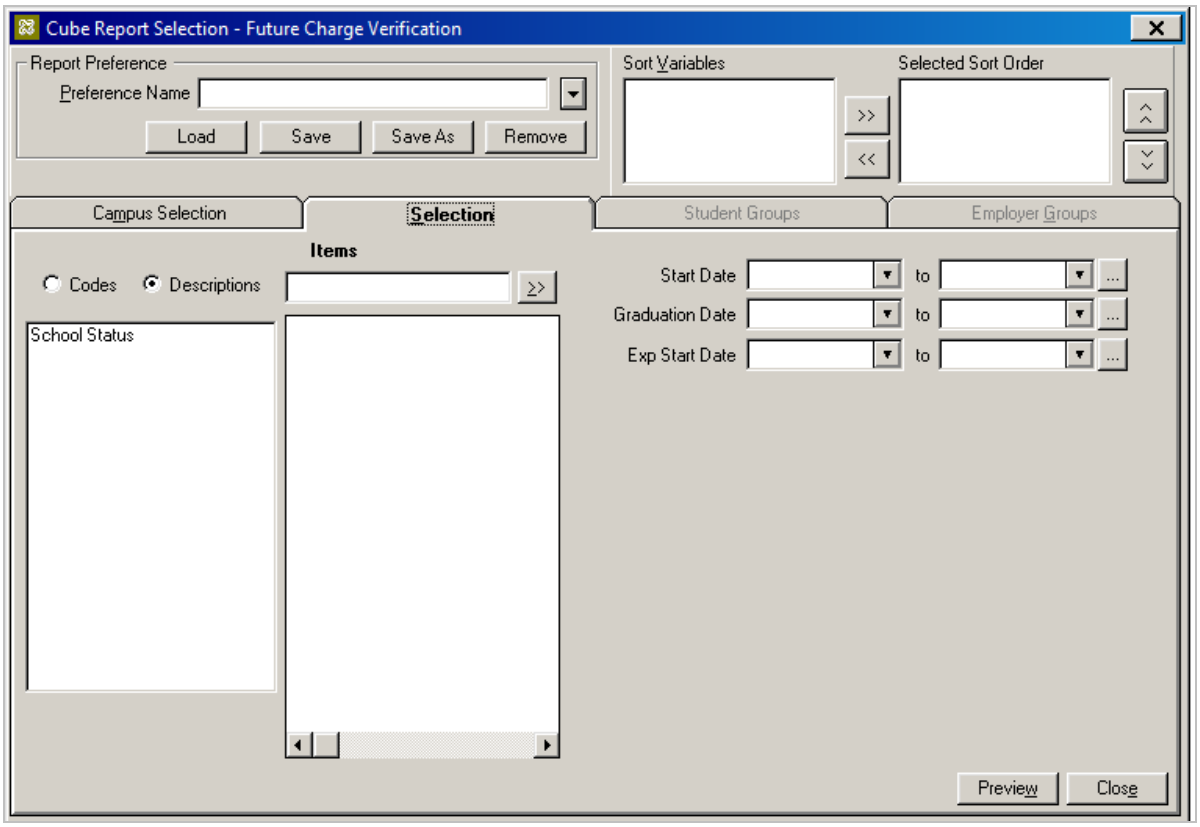
Future Charge Verification

This cube report displays future charge information for each student so that the user can easily determine if a student is over or under charged.

To run the report:

1. Navigate to **Reports > Student Accounts > Future Charge Verification**. The Cube Report Selection: Future Charge Verification form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



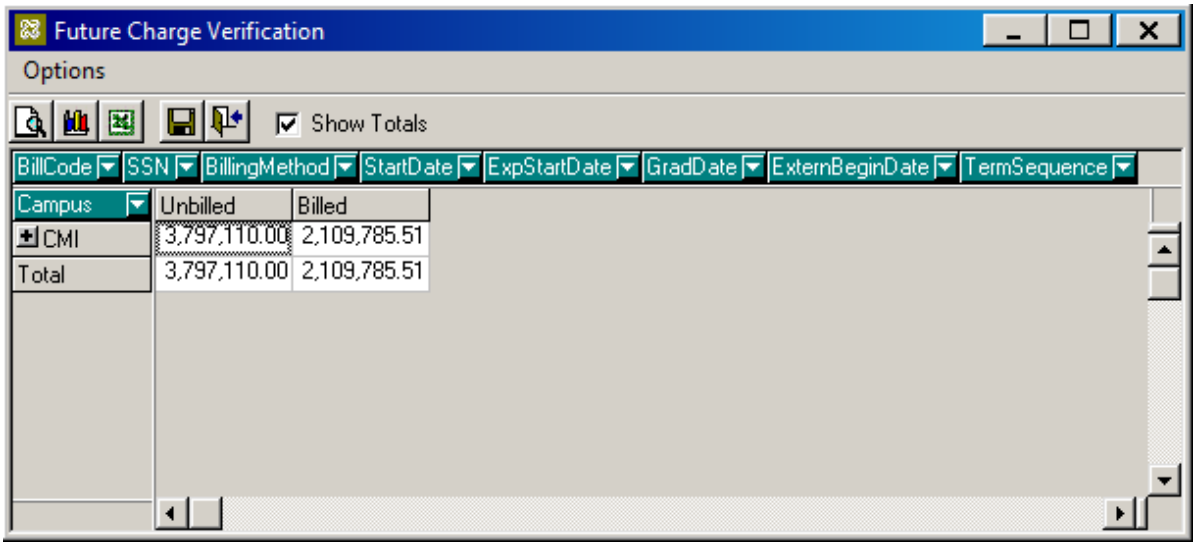
4. Click **Preview**. The cube report is assembled and displayed.

   The following variables are available for use in this cube report:

   - Bill Code
   - SSN
   - Billing Method
   - Start Date
   - Expected Start Date
   - Graduation Date
   - Externship Begin Date
   - Term Sequence
   - Campus

- Total Unbilled Tuition Charges
- Total Billed Tuition Charges

Drag the variables to the vertical or horizontal axes as needed to get the cross-tabulated spreads. The cube is initialized with Campus as the Y axis (rows) and Unbilled and Billed as the X axis (columns).

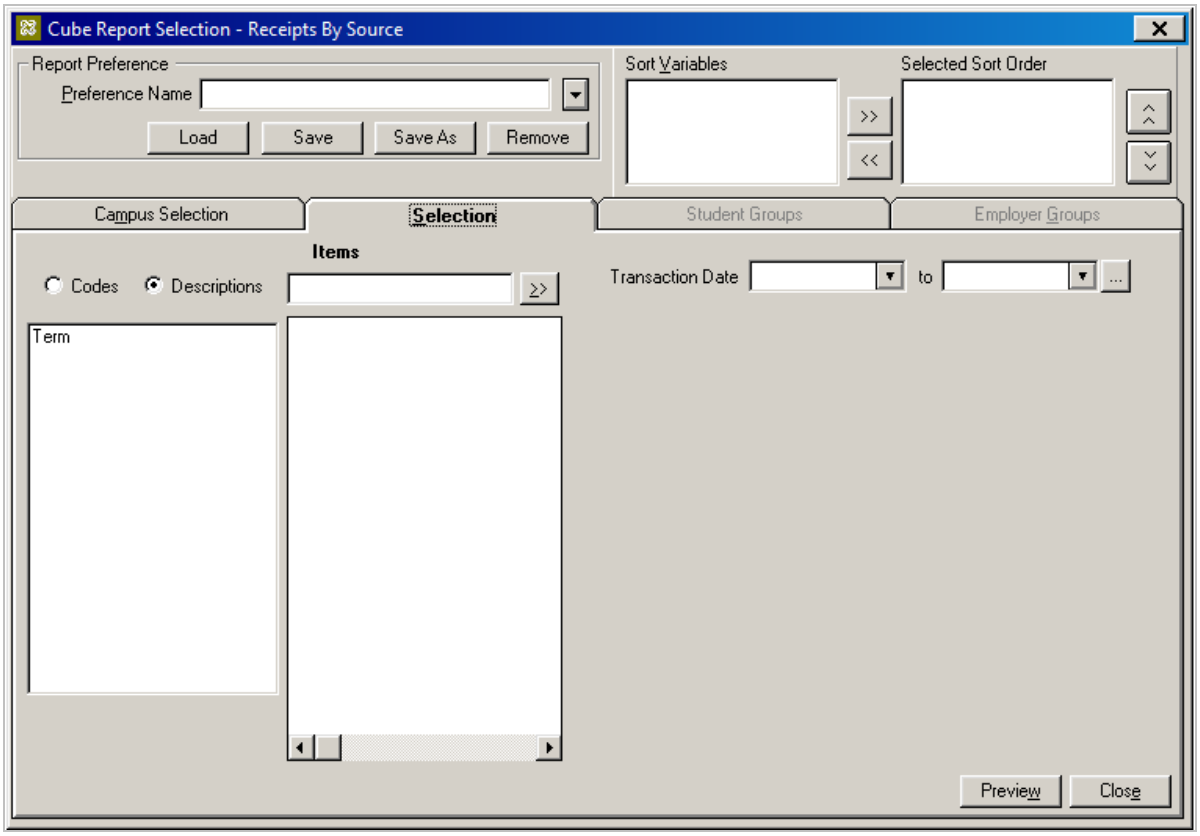


Receipts by Source

This cube report displays receipts from the various fund sources at your institution.

To run the report:

1. Navigate to **Reports > Student Accounts > Receipts by Source**. The Cube Report Selection: Receipts by Source form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

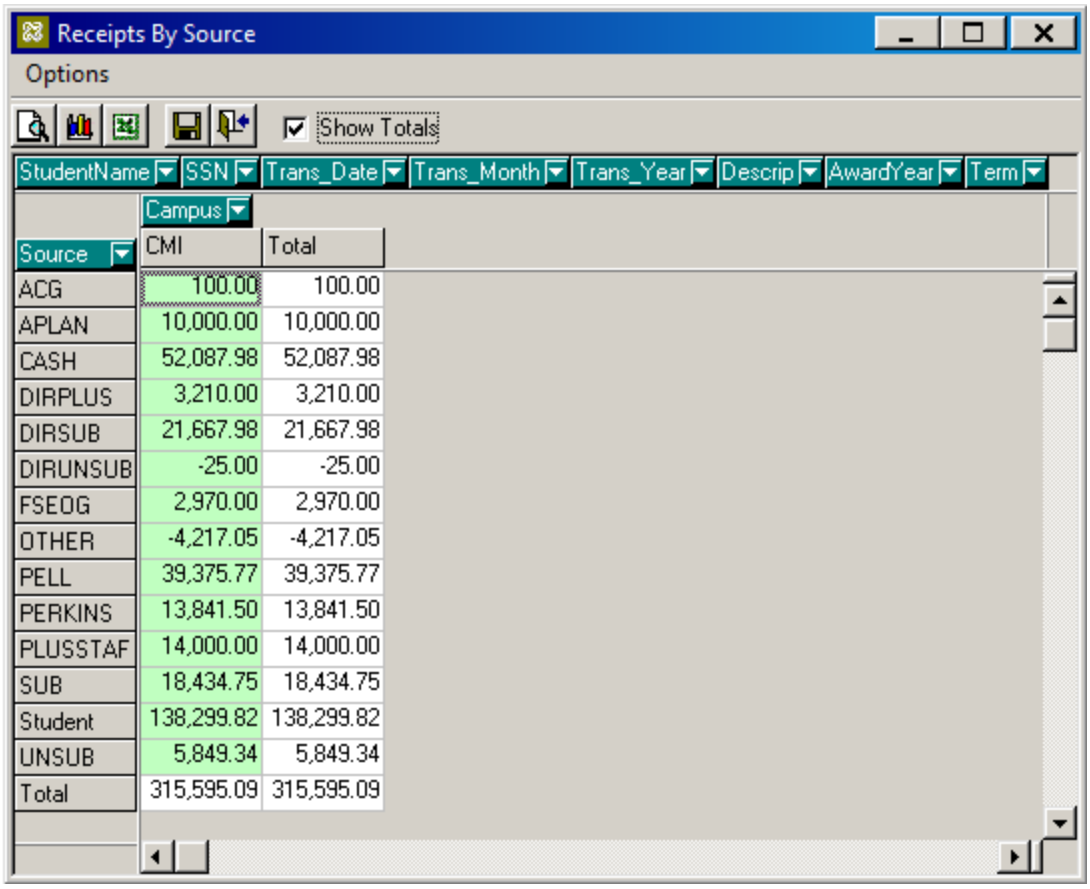


4. Click **Preview**. The cube report is assembled and displayed.

   The following variables are available for use in this cube report:

   - Student Name
   - SSN
   - Transaction Date
   - Transaction Month
   - Transaction Year
   - Transaction Description
   - Award Year
   - Term
   - Fund Source
   - Campus

Drag the variables to the vertical or horizontal axes as needed to get the cross-tabulated spreads. The cube is initialized with Source as the Y axis (rows) and Campus as the X axis (columns).

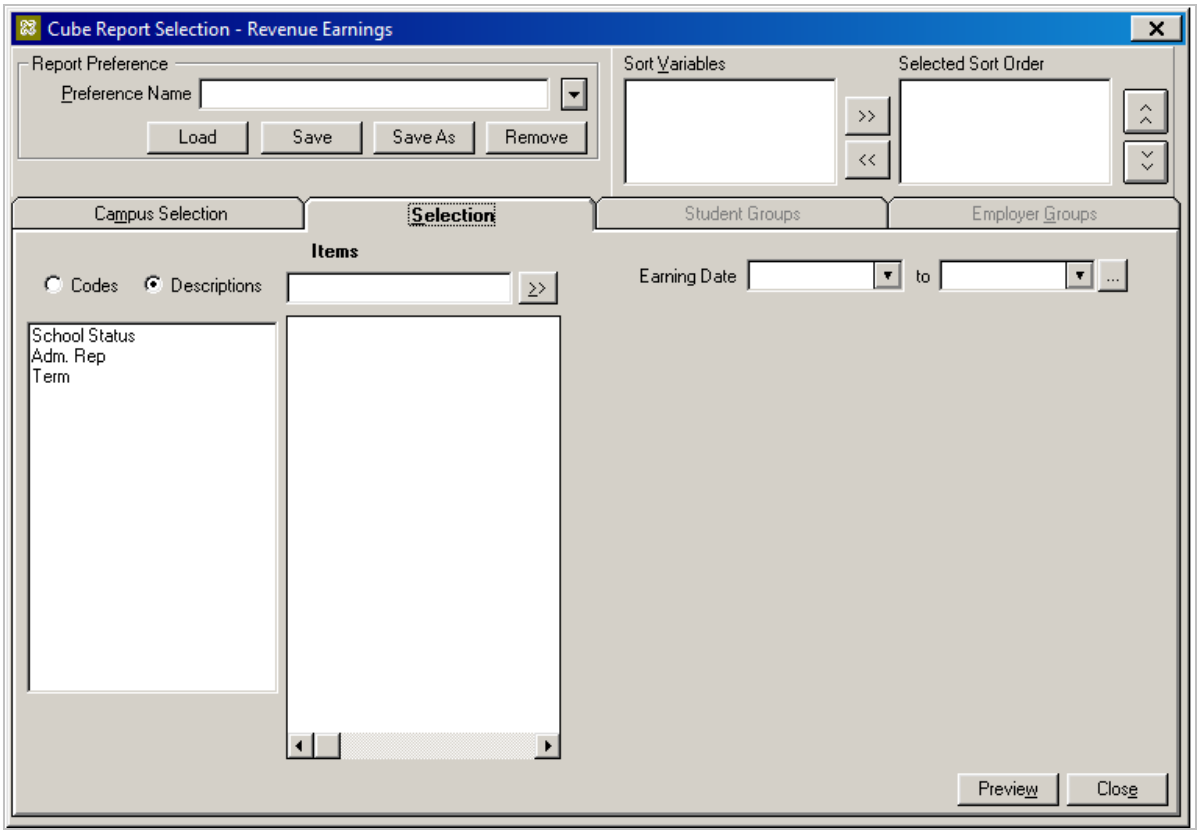


Revenue Earnings

This cube report is used to analyze how revenue is distributed according to various CampusNexus Student parameters.

To run the report:

1. Navigate to **Reports > Student Accounts > Revenue Earnings**. The Cube Report Selection: Revenue Earnings form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The cube report is assembled and displayed.

   The following variables are available for use in this cube report:

   - SSN
   - Program Version Code
   - Term
   - Earn Month
   - Start Month
   - Start Year
   - Earn Year
   - Transaction Code
   - GL Debit Account
   - GL Credit Account

- Rep Name
- Lead Source
- Campus
- Enrollment Start Date
- Transaction Date
- Student Name
- Program
- Student Status

Drag the variables to the vertical or horizontal axes as needed to get the cross-tabulated spreads. The cube is initialized with Program, Student name, and Earn Year as the Y axis (rows) and Status as the X axis (columns).

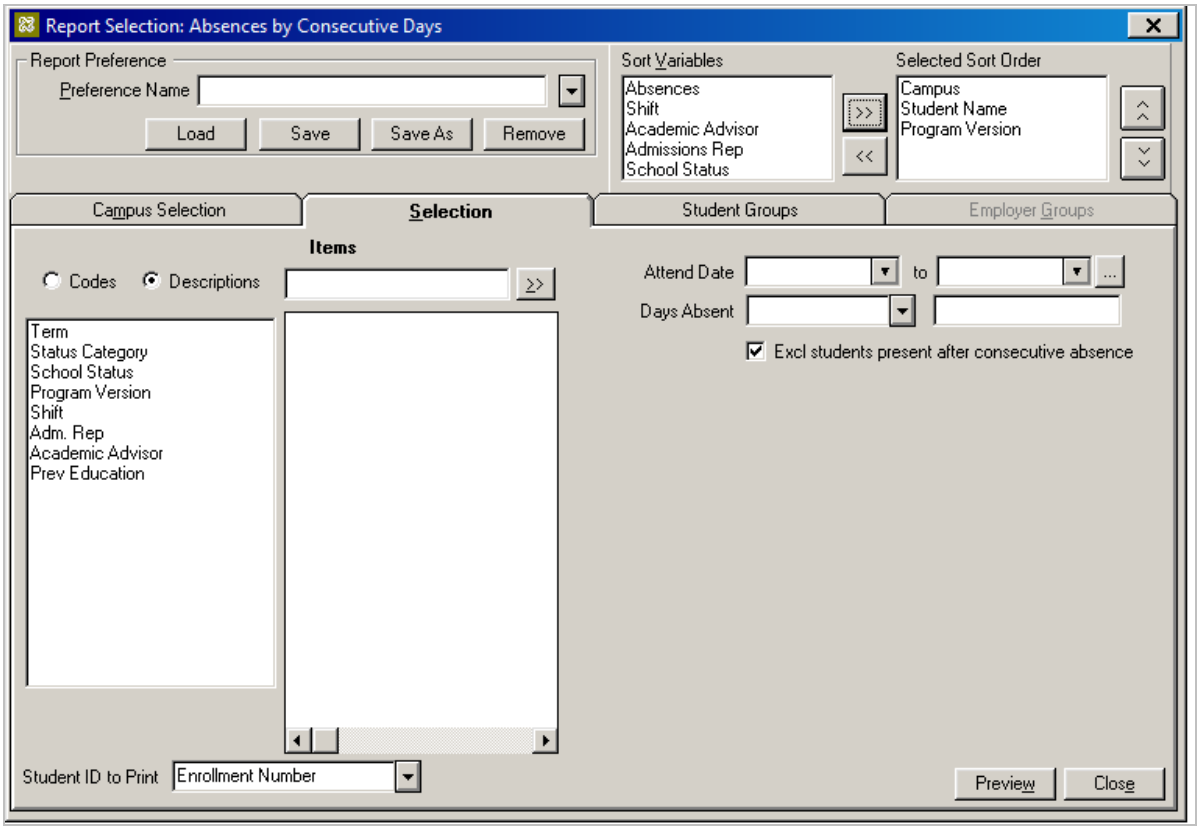
Absences by Consecutive Days

This report lists students who have been absent from school for a consecutive number of days as of the date the report is run. This report can be used to quickly identify any students who may be in danger of dropping from school. You can enter the minimum number of days absent required for a student to appear on the report.

To run the report:

1. Navigate to **Reports > Academic Records > Absences by Consecutive Days**. The Report Selection: Absences by Consecutive Days form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - Phone
   - Status
   - Program Version

- Shift
- Start Date
- Last Date Attended (LDA)
- Admissions Representative
- Academic Advisor
- # of Days Absent

The report provides, by campus, the total number of students appearing on the report along with the grand total number of records selected.

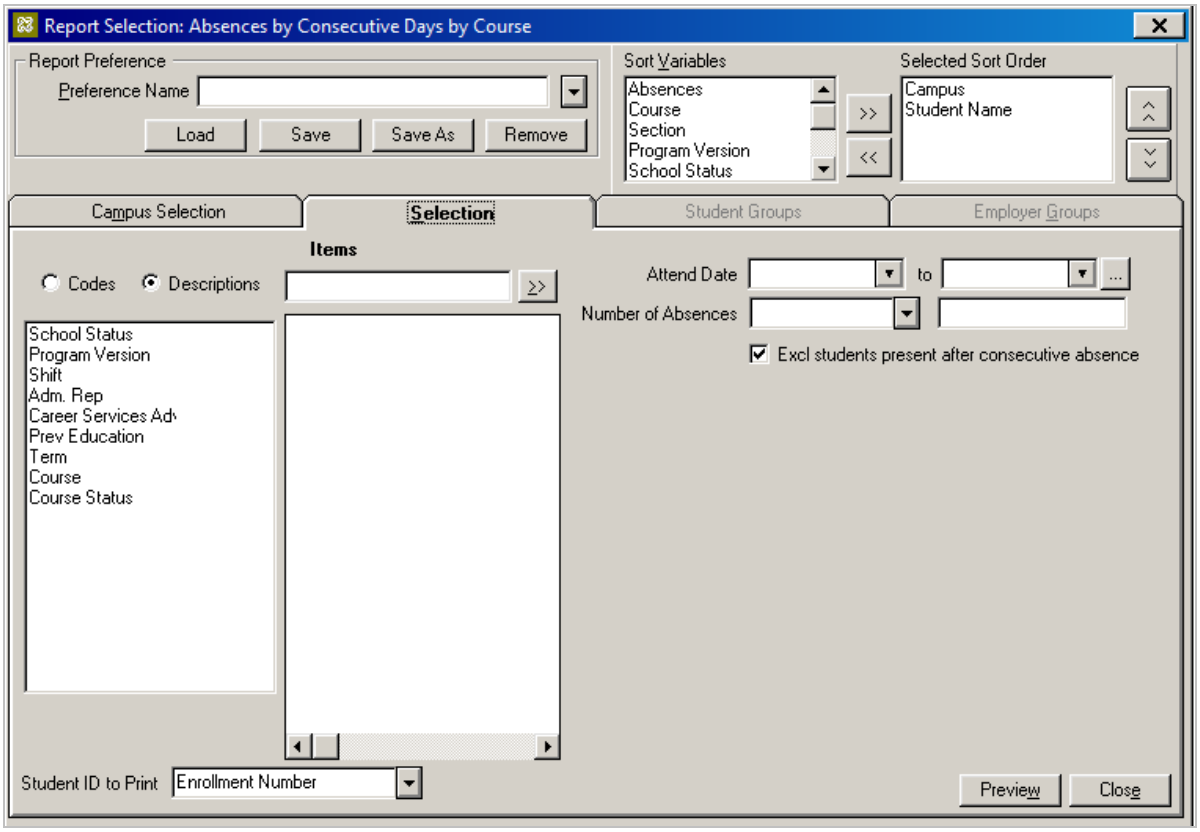
Absences by Consecutive Days by Course

This report shows the number of consecutive absences of a student from a class section.

To run the report:

1. Navigate to **Reports > Academic Records > Absences by Consecutive Days by Course**. The Report Selection: Absences by Consecutive Days by Course form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Selection criteria are School Status, Program Version, Shift, Adm. Rep, Career Services Advisor, Prev Education, Term, Course, Course Status, Attend Date, Days Absent, and 'Exclude students with Course LDA after end date'.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

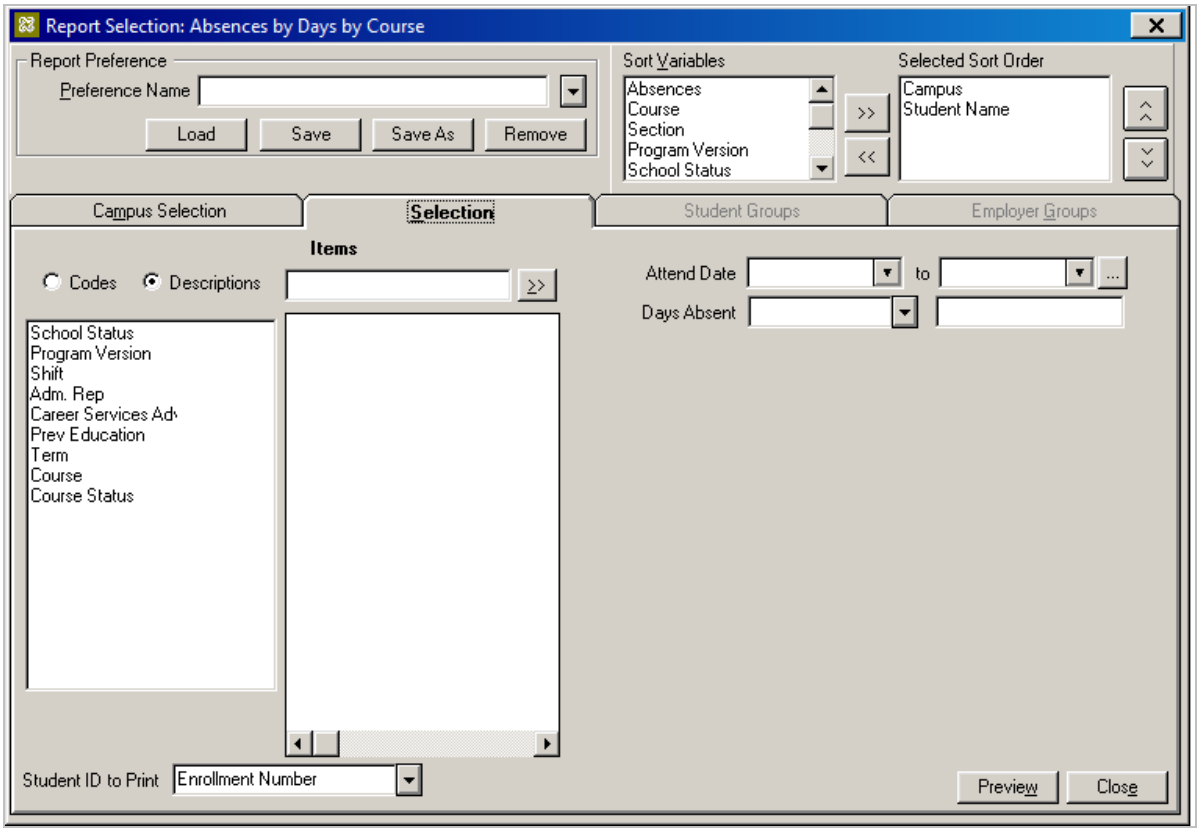
Absences by Days by Course

This report shows those students who were absent between a specified date range from a class section and by a specified minimum number of days a student could be absent (not consecutively).

To run the report:

1. Navigate to **Reports > Academic Records > Absences by Days by Course**. The Report Selection: Absences by Days by Course form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Selection criteria are School Status, Program Version, Shift, Adm. Rep, Career Services Advisor, Prev Education, Term, Course, Course Status, Attend Date, and Days Absent.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Name
   - Student ID
   - Phone #
   - Status
   - Program Version
   - Shift

- Status
- Term
- Course
- Section
- Course Name
- Instructor

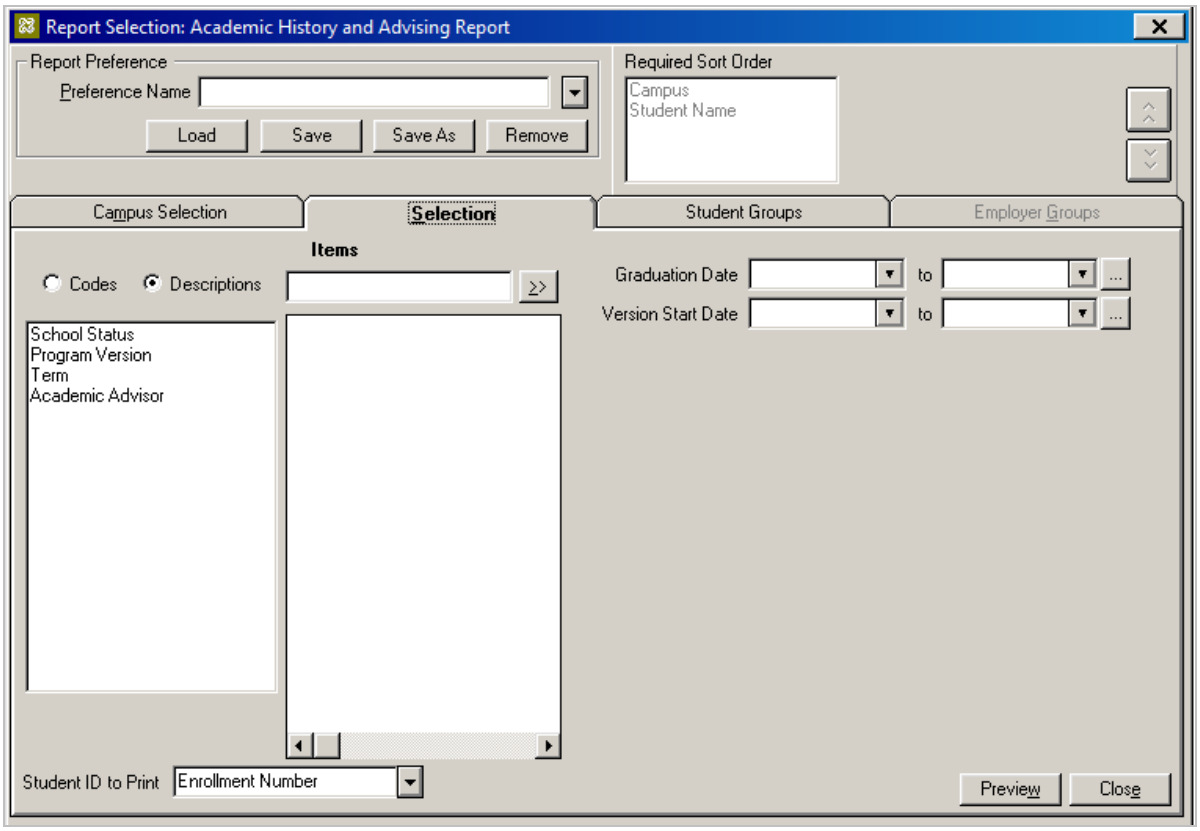
Academic History and Advising Report

This report provides a detailed history of a student's academic history and future courses. It is useful when a snapshot of a student's total academic history is required to determine, for example, if a student needs academic counseling.

To run the report:

1. Navigate to **Reports > Academic Records > Academic History and Advising Report**. The Report Selection: Academic History and Advising Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   Each student's information begins on a new page of the report. The student's ID, name, address, and phone number are listed.

   For each term, the start and end dates, term code, term name, program version, hours and credits required, SAP status, expected graduation date, advisor, and school status are listed.

All courses attempted in the term are displayed complete with course status, grades, quality points, and hours absent. The term GPA, cumulative GPA, honors assignments, and any comments for the term are shown.

After the student's terms are shown, a list of the student's future courses and associated program versions are displayed.

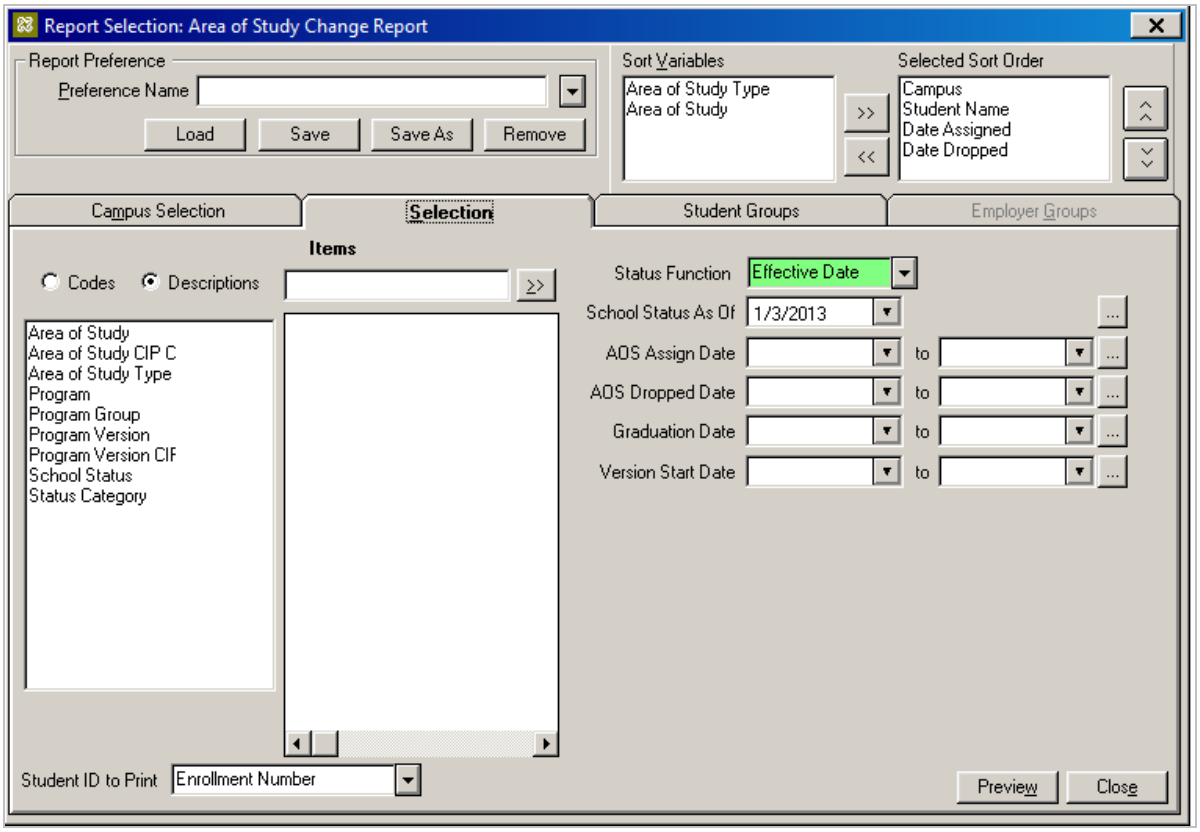
Area of Study Change Report

This report provides a detailed history of changes to a student's Area of Study (AOS) or major, allowing institutions to report these changes to accrediting bodies and helping institutions to determine the number of available enrollment spots and plan for future classroom needs.

To run the report:

1. Navigate to **Reports > Academic Records > Area of Study Change Report**. The Report Selection: Area of Study Change Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: The 'Status Function' options are 'Effective Date' and 'Date Added'.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - School Status

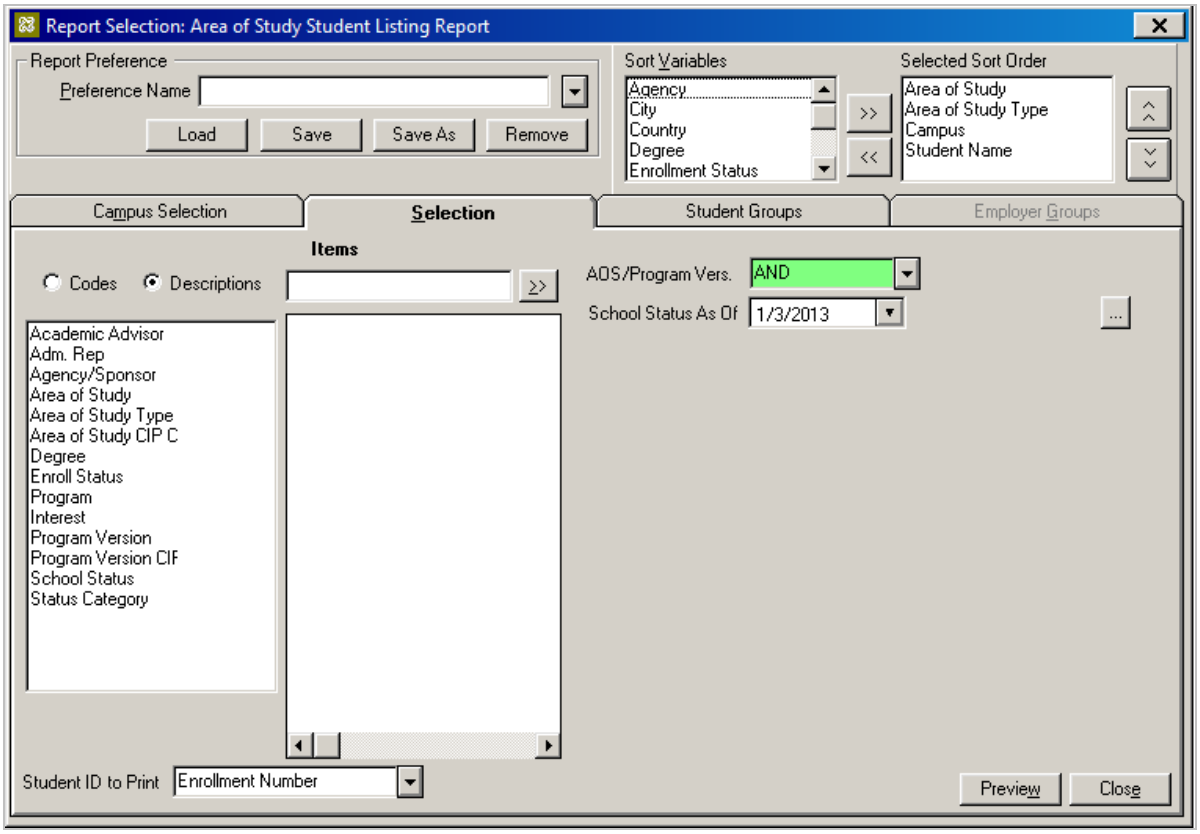
Area of Study Student Listing Report

This report provides basic demographic information about students sorted and filtered by the Area of Study (AOS) and AOS Type.

To run the report:

1. Navigate to **Reports > Academic Records > Area of Study Student Listing Report**. The Report Selection: Area of Study Student Listing Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: To display students in both the selected Program Version and AOS, choose the AND option for AOS/Program Vers. To display students in the selected Program Version or selected AOS, choose the OR option. The AND/OR option also applies to Program Version and Major Classification of Instructional Program (CIP) Codes.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID

- Email
- Academic Advisor
- Phone numbers (home, work, mobile and other numbers)

Attendance Summary by Program for Clock Hour

This report has been developed specifically for institutions that measure students' progress in clock-hours to calculate their progress in an academic program. The institution can see the percentage of program hours completed to date, or as of a specific date, compared to the required attended hours the student has completed according to the selection criteria of the report.

The report enables the institution to monitor and report on a student's rate of progress at a campus or in a specific program by analyzing the progress the student is making and the rate of the student's progress based on the selected variables in the report.

The report allows a user to review a student's attendance for a given program.

The user can also run the report for a specific group of students using a pre-defined Student Group, such as for students who have completed:

- In between specific percentages of their program
- Less than a specific percentage of their program
- Equal to a specific percentage of their program
- Specified percentage of their program at a certain date
- Greater than a specific percentage of their program

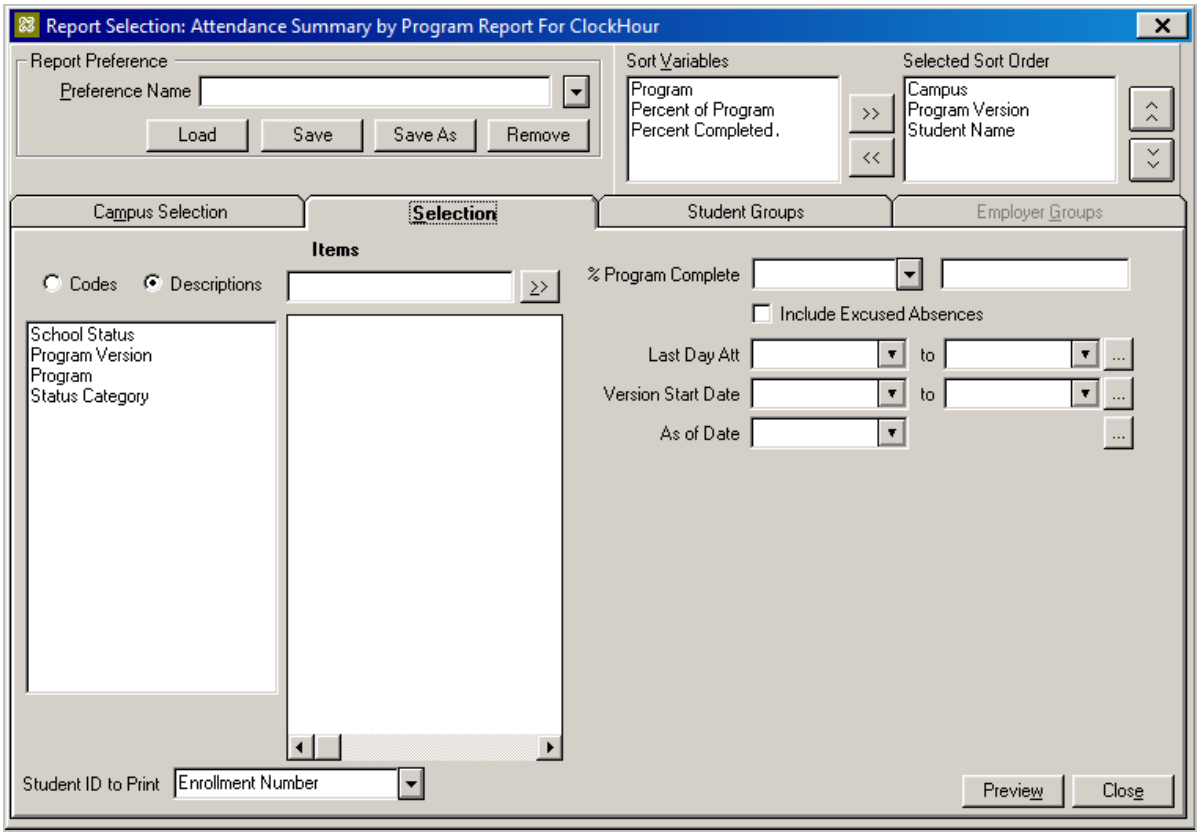
The report can be run on students by a Program Version Start Date range or the Last Date of Attendance (LDA) date range.

The user can search for a specific Student Group by entering various search criteria. The system will scan for records matching the search criteria and then focus on the first one it finds matching the search criteria. When the user selects the record, the system displays the student master for the selected student record. The user can continue the search by selecting the Next record. The user can also select a Group heading that matches the search criteria, such as Student Group or Employer Group. This action creates a new Results tab which displays the selected group's records.

To run the report:

1. Navigate to **Reports > Academic Records > Attendance Summary by Program for Clock Hour**. The Report Selection: Attendance Summary by Program for Clock Hour form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: The 'As of Date' defaults to today's date. This date is used to gather attended hours and scheduled hours. If the 'As Of' date is left blank in the selection criteria, the students in a program version configured to Use Scheduled Hours will have the Hours Scheduled field = ((attend + absent) – makeup), up to the Last Date (positive or absent) Attendance was posted. Students who are in a clock hour program version that is not configured to Use Scheduled Hours will have the Hours Scheduled field = ((attend + absent) – makeup), up to the present date.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student ID
   - Student Name
   - Program Version
   - Start Date
   - Required Hours (hours which come from the student's enrollment folder)
   - Transfer Hours (hours that have been accumulated by the student at a different institution)
   - Scheduled Hours (scheduled period hours for Current and Completed courses only)
   - Excused Hours (summation of absent hours)
     This field is used when Excused Absent is selected in the Report Selection form; if it is not selected, then the field is hidden. If Excused Absent is selected in the Report Selection form, then Scheduled Hours, Attended Hours, % Completed Attend to Sched. and % of Program Completed will include Excused Absent Hours.
   - Attended Hours (hours earned by a student before LOA was activated)

For an enrollment that contains an Associated Course, the Attended Hours will be calculated for each enrollment. Attended hours exclude hours earned by a student in a Failed or Dropped course.

- % Completed Attended to Scheduled (comparison of Attended Hours to Scheduled Hours).
- % of Program Completed (comparison of the Attended Hours to the Program Version Required Hours - Transfer Hours).

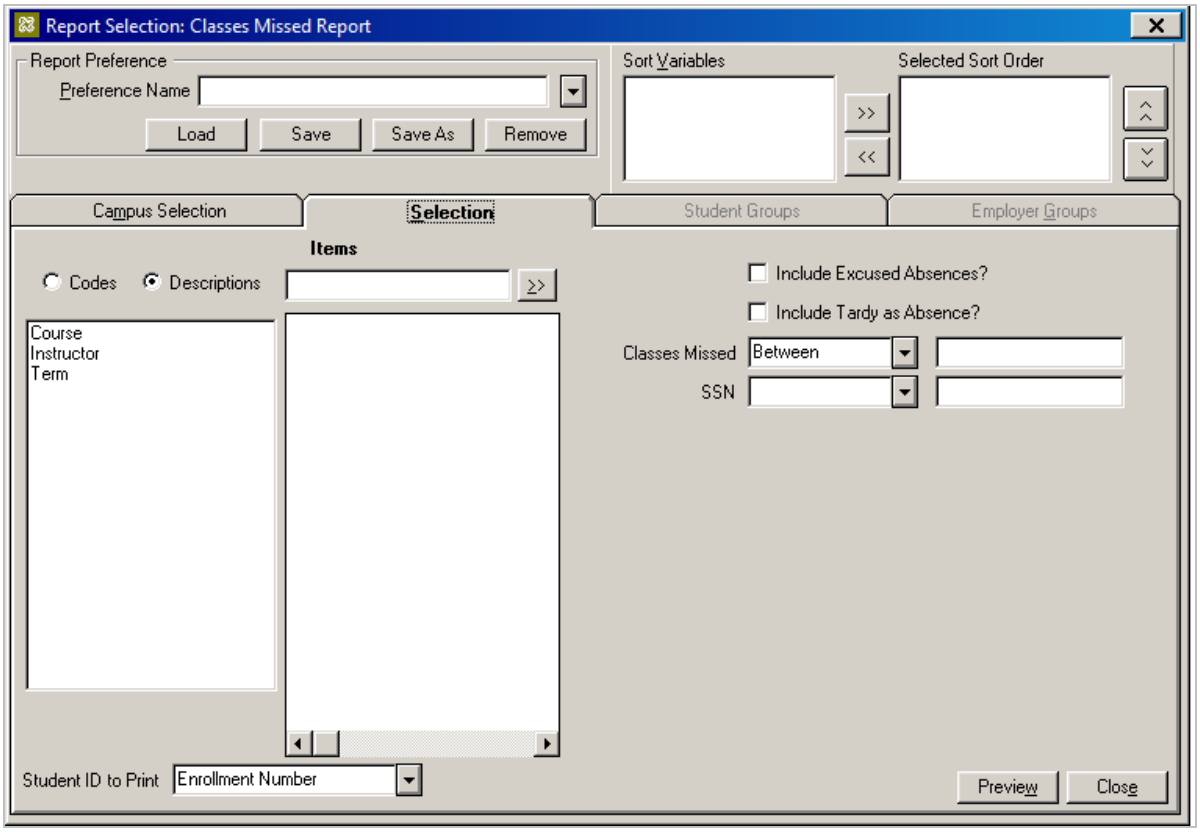
Classes Missed Report

This report lists students that have been absent from class for a specified number of class sessions.

To run the report:

1. Navigate to **Reports > Academic Records > Classes Missed Report**. The Report Selection: Classes Missed Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - Program
   - Course/Section
   - Start Date
   - Graduation Date
   - Student Phone Number
   - Last Date of Attendance
   - Status
   - Instructor

- Classes Absent
- Min. Tardy

Class Rank

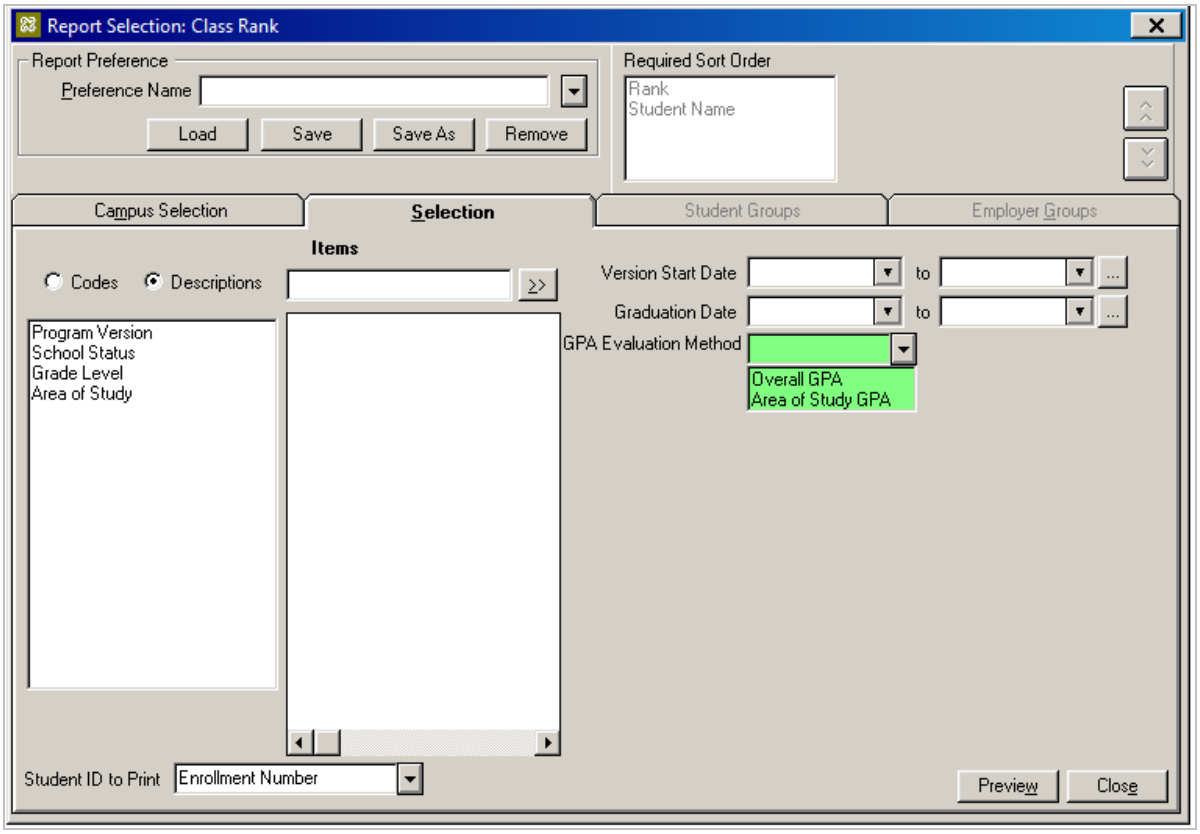
This report displays a list of students ranked according to their Grade Point Averages (GPAs) for a particular course program or the area of study.

To run the report:

1. Navigate to **Reports > Academic Records > Class Rank**. The Report Selection: Class Rank form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   You can select one of the following two methods to evaluate GPAs:

   - **Overall GPA**: Select this method to evaluate students' rankings based on the GPA for the selected course programs taken by the student.
   - **Area of Study GPA**: Select this method to evaluate students' rankings based on the GPA for the selected area of study. If a student has more than one area of study, the student name will appear twice in the report.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Rank
   - ID
   - Student Name

- Grade Level
- Program
- Start Date
- Graduation Date
- GPA (computed on the basis of the GPA evaluation method specified in the selection criteria)

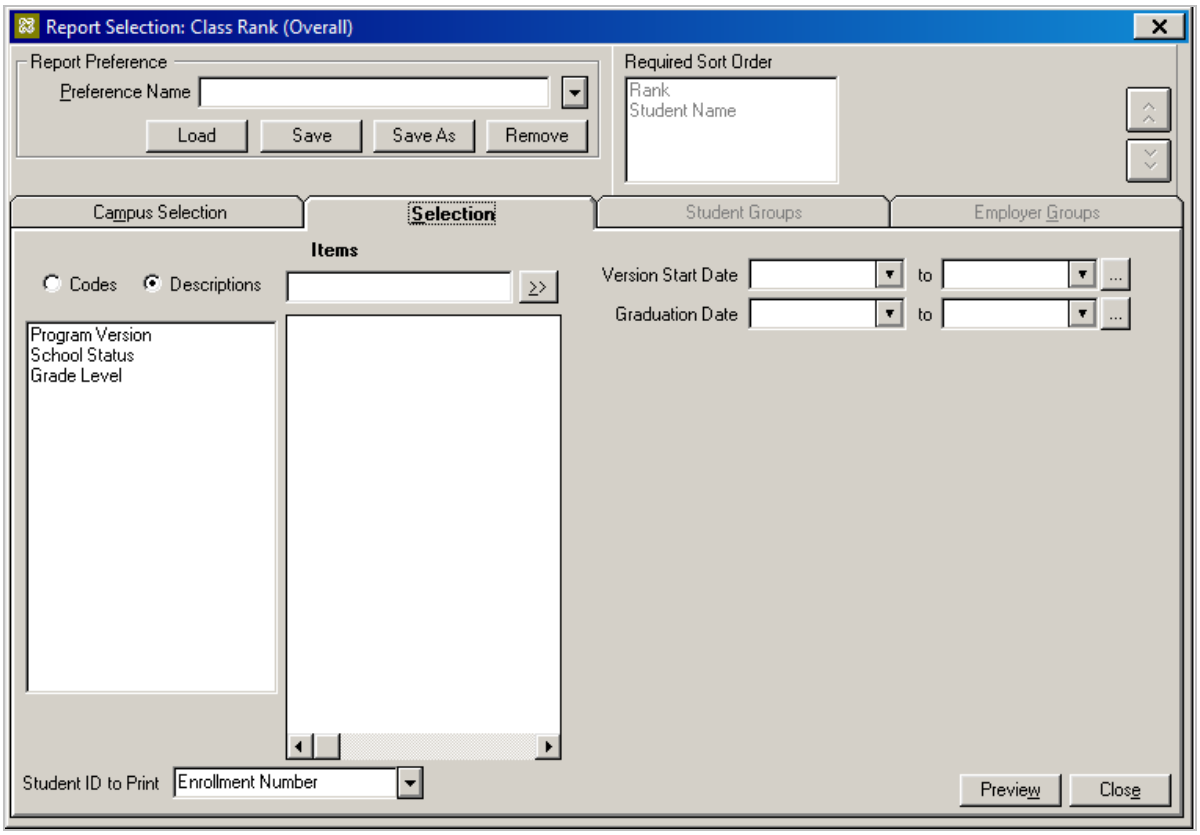
Class Rank (Overall)

This report displays a list of students ranked according to their GPA for all courses taken in a particular campus.

The selection criteria and sort variables for this report are same as for the Class Rank report. The only difference between the reports is that unlike the Class Rank report, this report does not include the criteria for specifying a GPA evaluation method to rank students.

To run the report:

1. Navigate to **Reports > Academic Records > Class Rank (Overall)**. The Report Selection: Class Rank (Overall) form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Rank
   - ID
   - Student Name
   - Grade Level
   - Program
   - Start Date

- Graduation Date
- GPA (computed on the basis of the averages of all courses specified by the student)

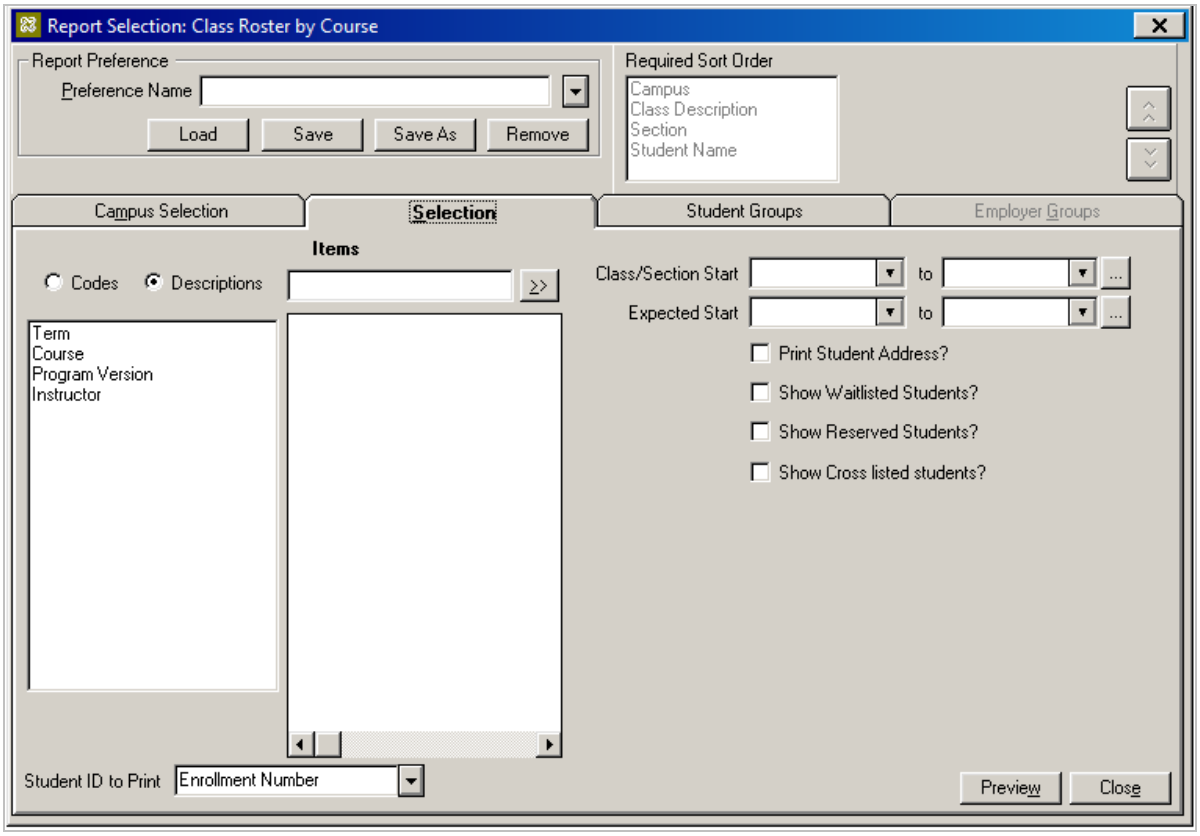
Class Roster by Course

This report produces rosters of class sections in sequence by class section, including courses that are defined as "Dependent".

When posting attendance for a class section, if a course section fails the Auto Drop rule after the Last Day to Withdraw (LDW) date, and that class section has the "Drop Rule Warning When Failed After LDW" enabled, then the class roster report displays a message alerting staff members that the Auto Drop rule failed after the LDW date. This warning appears regardless of whether the class section is configured for "Enforce LDW" within attendance rules. If the course is not dropped because "Enforce LDW" is selected in Attendance Rules (**Daily > Academic Records > Schedule Classes > Attendance Rules**) and it is after the LDW Date, the warning still appears on attendance rosters.

To run the report:

1. Navigate to **Reports > Academic Records > Class Roster by Course**. The Report Selection: Class Roster by Course form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.
5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

- Course Code
- Section
- Instructor
- Credits
- Hours
- Class Start
- Class End
- Student ID
- Student Name
- Course Status
- Program
- Enrollment Status
- Variable Credits
- Start and End Date
- Student Count

Within class sections, students are sorted alphabetically by name. Each class section begins on a new page.

Class Schedule

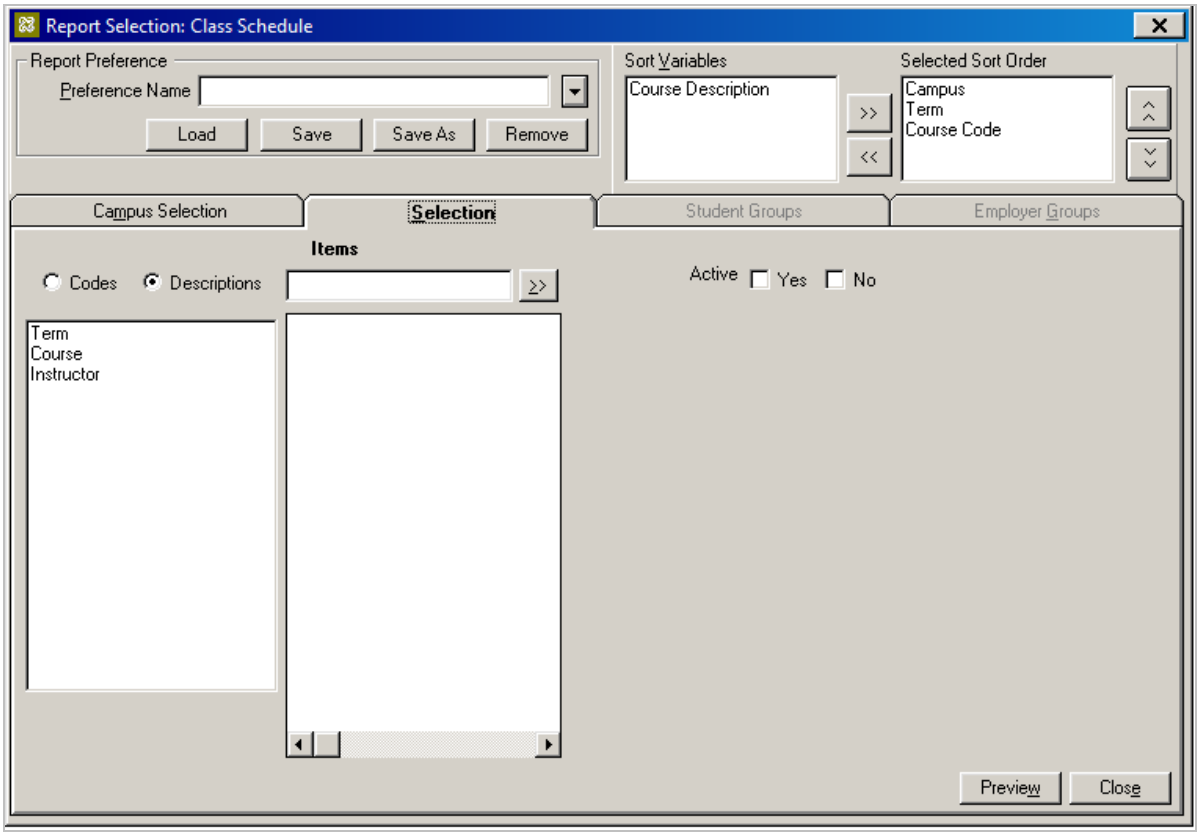
This report is a list of class sections with some basic information about each section.

Shared courses appear on the Course Schedules of all campuses. For Example, if a campus shares on-line courses with an on-ground campus, then the report displays courses for both types of campuses. Additionally, the number of available seats is displayed. Registrars have override capability for courses and seats available for their campuses but not for courses shared from other campuses.

The Class Schedule report contains a line below the Course Code and Course Description line indicating the Course Sharing Status. If the report is for the Shared Campus, then the Course Sharing Status is displayed as "Shared to other Campuses". The line is blank if the course is not a shared course. If the report is for the Receiving Campus, then the Course Sharing Status line displays "Offered by" and the Origination Campus name.

To run the report:

1. Navigate to **Reports > Academic Records > Class Schedule**. The Report Selection: Class Schedule form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

- Building/Room
- Course Code
- Section Code
- Course Description
- Pass/Fail (yes/no)
- Days of Week
- Instructor (and secondary instructor(s) if applicable)
- Start Date/Time
- End Date/Time
- Maximum Number of Students
- Number of Active Students
- Number of Available Seats
- Scheduled Hours
- Contact Hours
- Included in Comparison (yes/no)

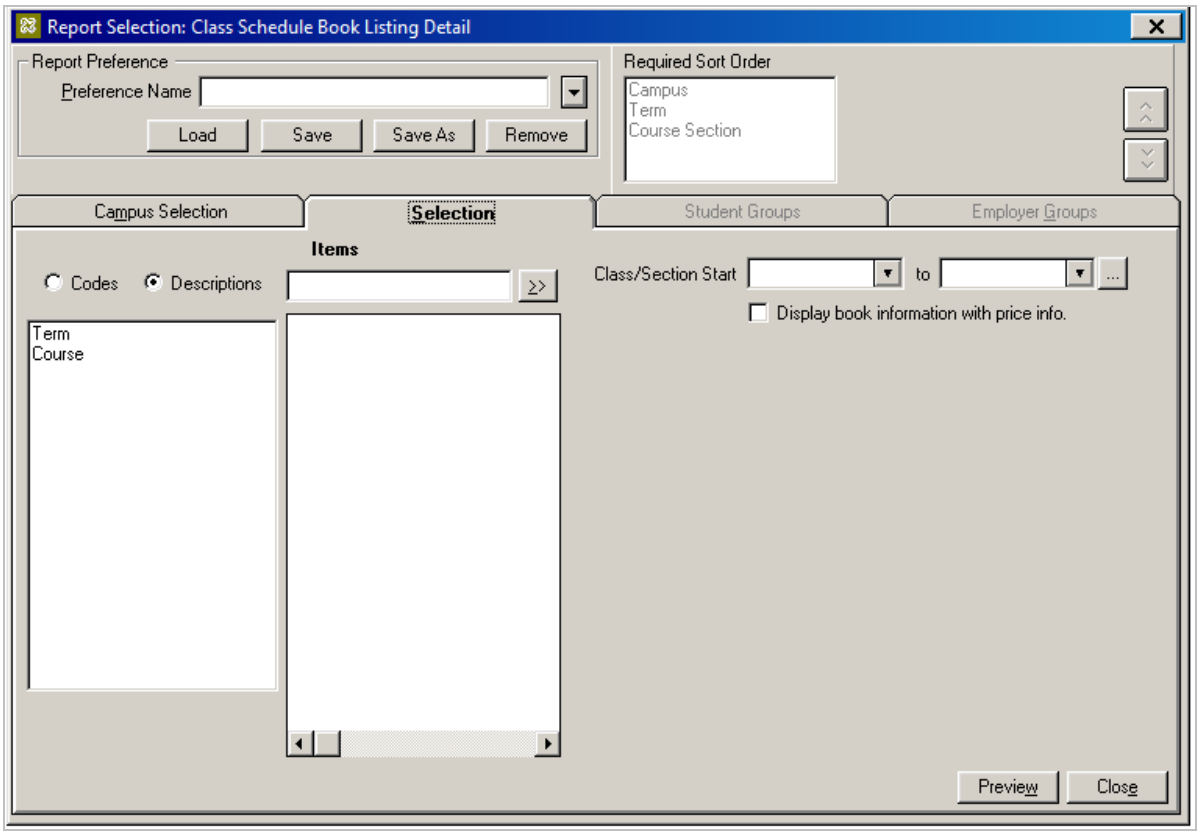
Class Schedule Book Listing Detail

This report lists the book information for individual course sections. This information retrieved from the book lists assigned to each course section.

To run the report:

1. Navigate to **Reports > Academic Records > Class Schedule Book Listing Detail**. The Report Selection: Class Schedule Book Listing Detail form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   For each course section the report lists the assigned books with the following details:

   - Book Name
   - ISBN
   - Author
   - Publisher
   - Copyright Year
   - Edition
   - Required (Yes or No)
   - Comments (if configured to be visible on student reports and online)

Optionally the Cost, Price, and Price Used fields may be included.

The report displays the following details for each course section:

- Campus
- Term
- Course Section
- Class Start Date
- Maximum Number of Students
- Number of Students Registered
- Delivery Method
- Instructor
- Secondary Instructor

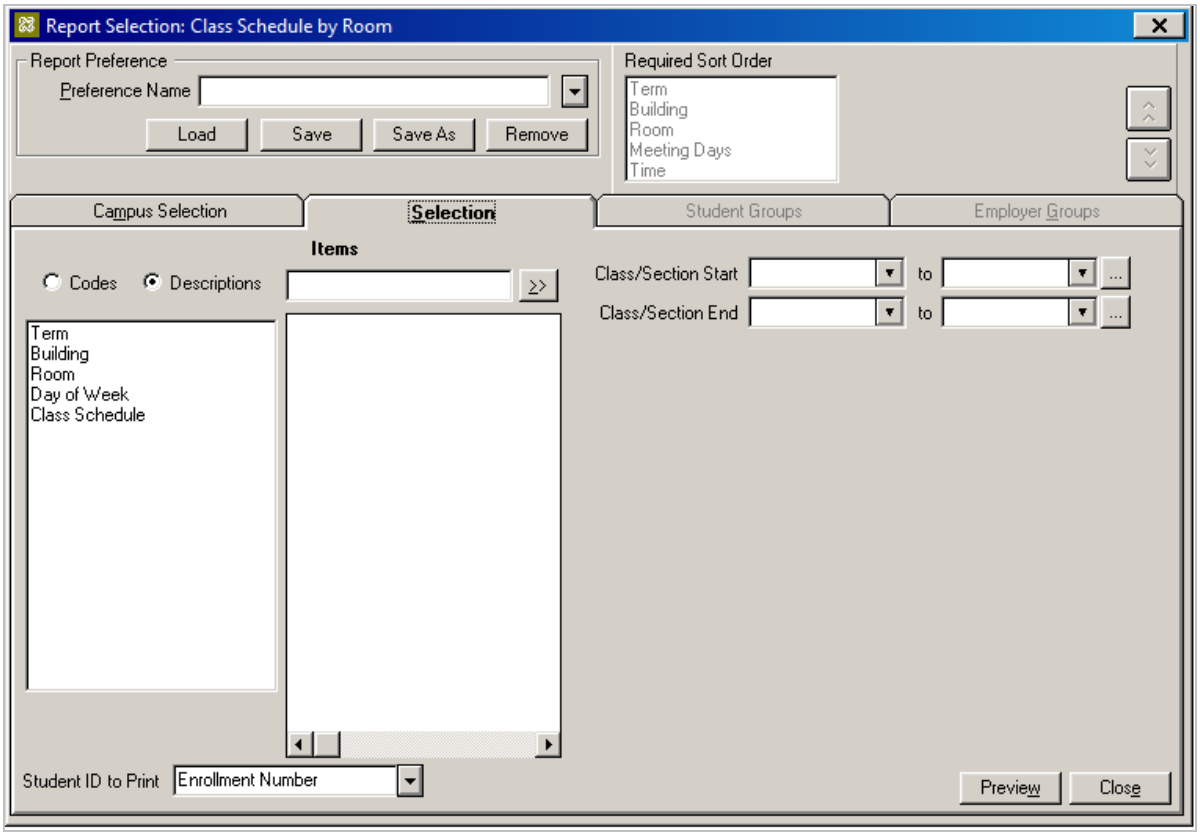
Class Schedule by Room

This report displays information about the classes being offered in a classroom.

To run the report:

1. Navigate to **Reports > Academic Records > Class Schedule by Room**. The Report Selection: Class Schedule by Room form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details for each course section:

   - Term
   - Building
   - Room Description
   - Course Code
   - Section
   - Course Description
   - Day of Week
   - Instructor
   - Class Start and End Date

- Start and End Time

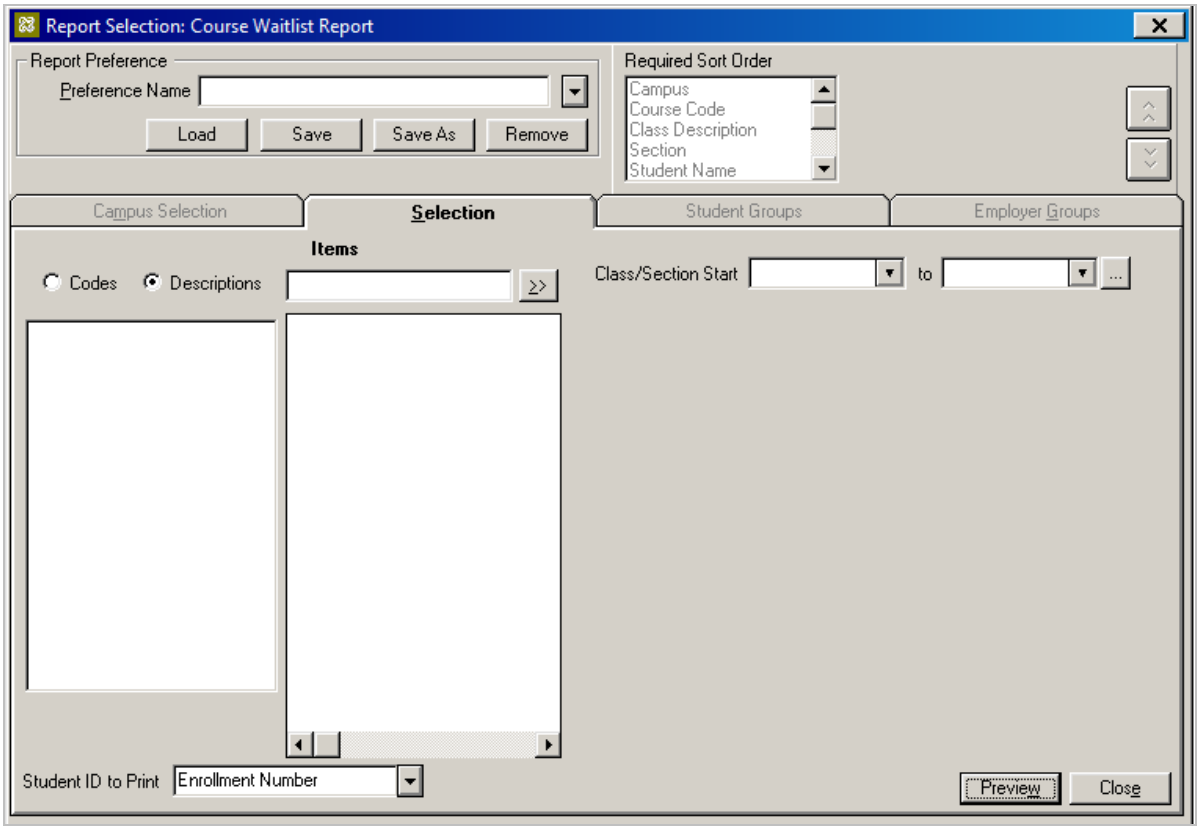
Course Waitlist Report

This report displays students that are on the waitlist for a class/section start date range.

To run the report:

1. Navigate to **Reports > Academic Records > Course Waitlist Report**. The Report Selection: Course Waitlist Report form is displayed.
2. Select appropriate options on the Selection tab.



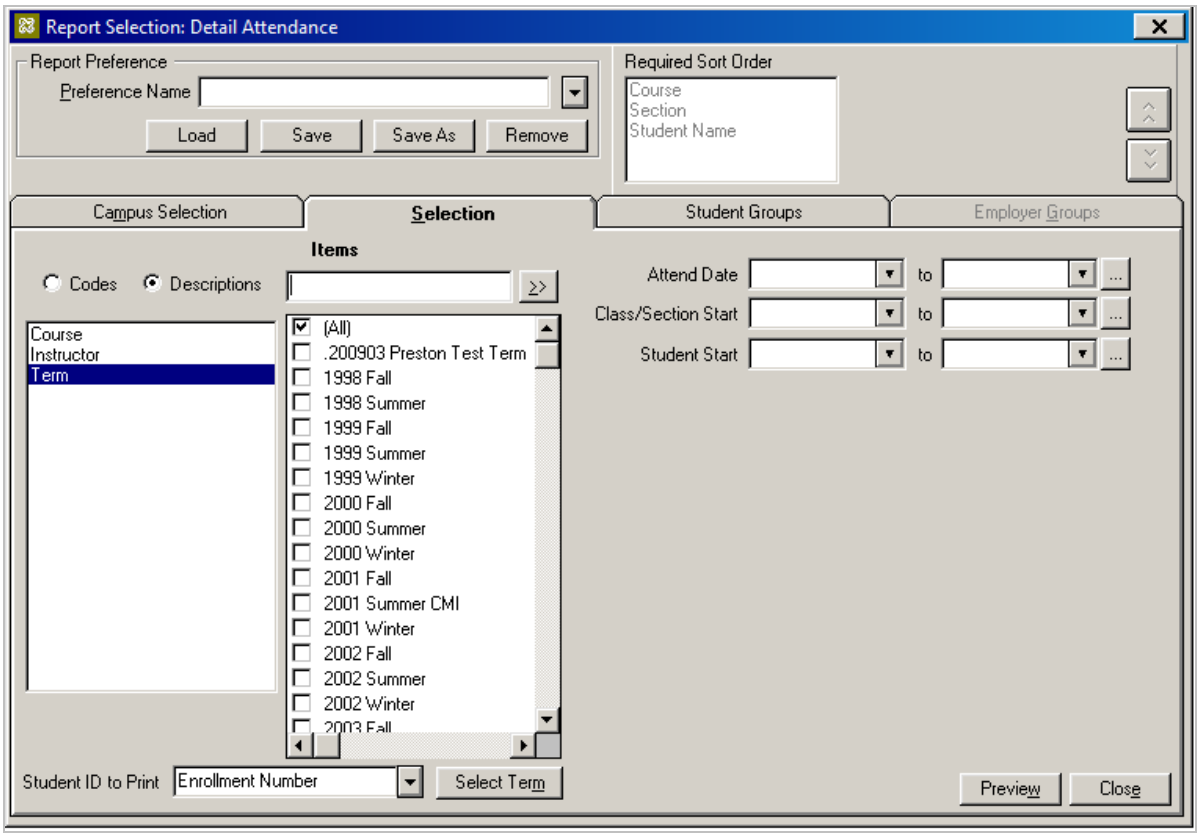
3. Click **Preview**. The report is assembled and displayed in the Report Viewer.

Detail Attendance

This report provides a detailed list of attendance records for each student. The report can be executed from the Reports menu (for all students) or from the View menu (for a selected student).

To run the report:

1. Navigate to **Reports > Academic Records > Detail Attendance**. The Report Selection: Detail Attendance form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Course/Section Code
   - Course Description
   - Term
   - Instructor
   - Student Name

- Student ID
- Date
- Hours Attended
- Hours Scheduled
- Excused Absences
- Comments (indicating, for example, if the hours are makeup hours)

If a detailed attendance record is for a "Dependent" course, the "Dependent" course description is updated to the comment field in the attendance table.

For each student, totals include hours attended and hours scheduled.

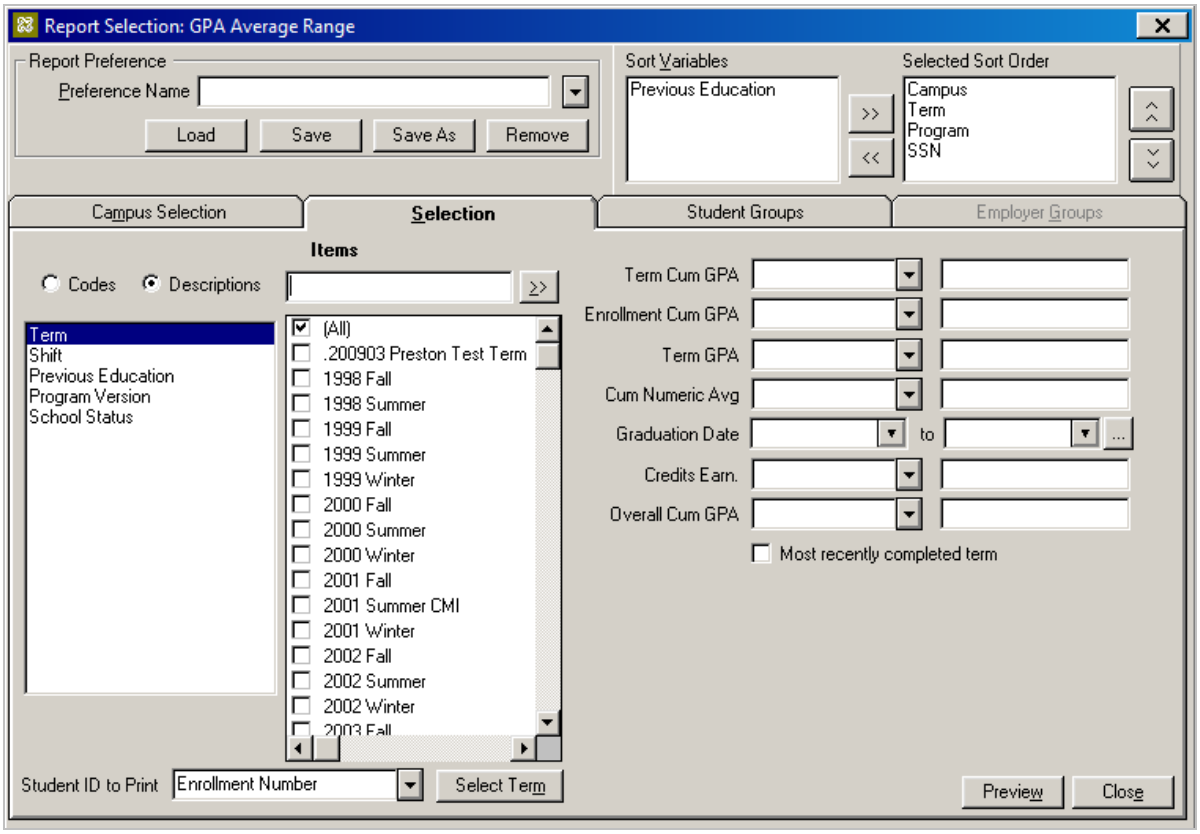
GPA Average Range

This report lists students within a given range of Grade Point Averages (GPAs).

To run the report:

1. Navigate to **Reports > Academic Records > GPA Average Range**. The Report Selection: GPA Average Range form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   For each student listed the report displays the following:

   - Student ID
   - Student Name
   - Term Code
   - Program
   - Start Date
   - Graduation Date

- Cumulative Numeric Average
- Term GPA

Instructor Drop Analysis

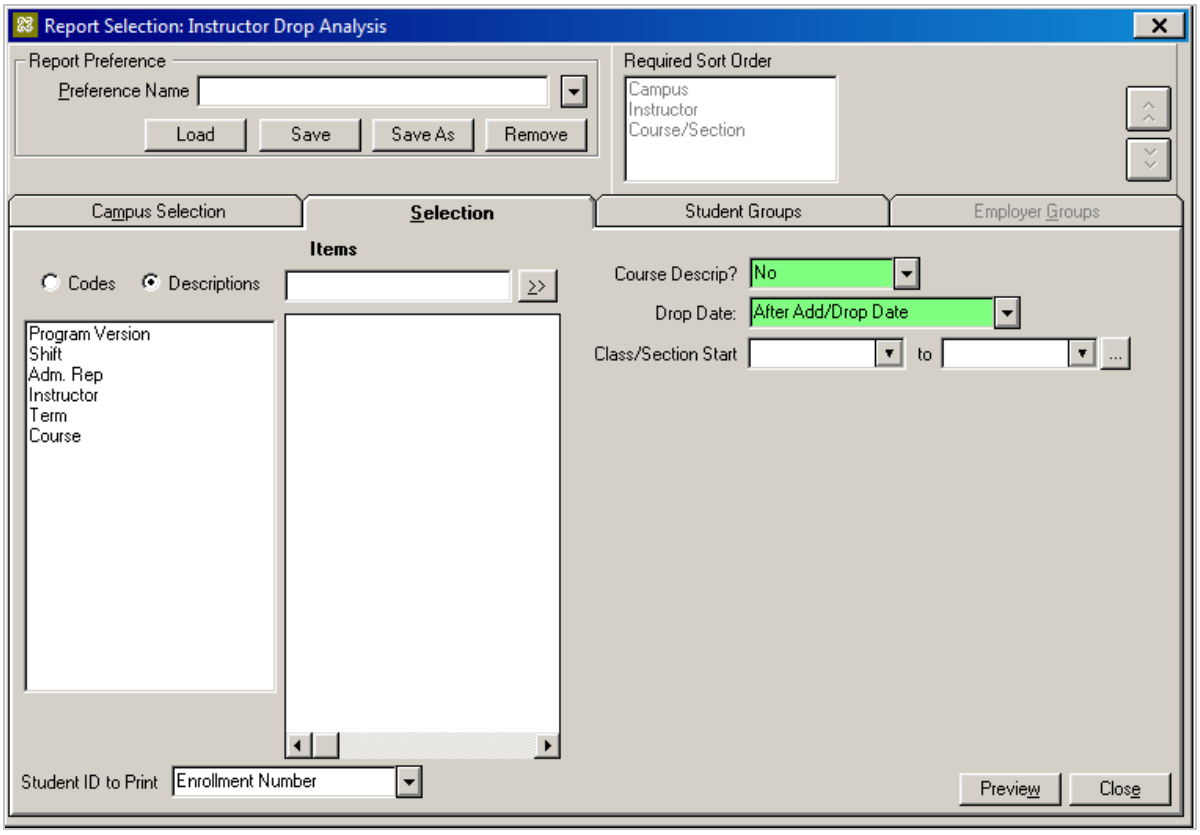
This report provides the drop count, student attrition percentage, and class filled percentage for instructors and courses/sections.

To run the report:

1. Navigate to **Reports > Academic Records > Instructor Drop Analysis**. The Report Selection: Instructor Drop Analysis form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Notes: Specify the Drop Date to include or exclude students based on the following values:

   - **After Add/Drop Date**: Select this value to exclude all students dropped after the Term Drop date.
   - **Within class begin and end dates**: Select this value to include all students dropped within the date range specified for the Class/Section Start list.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

Lesson Status

This report is used to track lessons and exams, mostly in Distance Education programs.

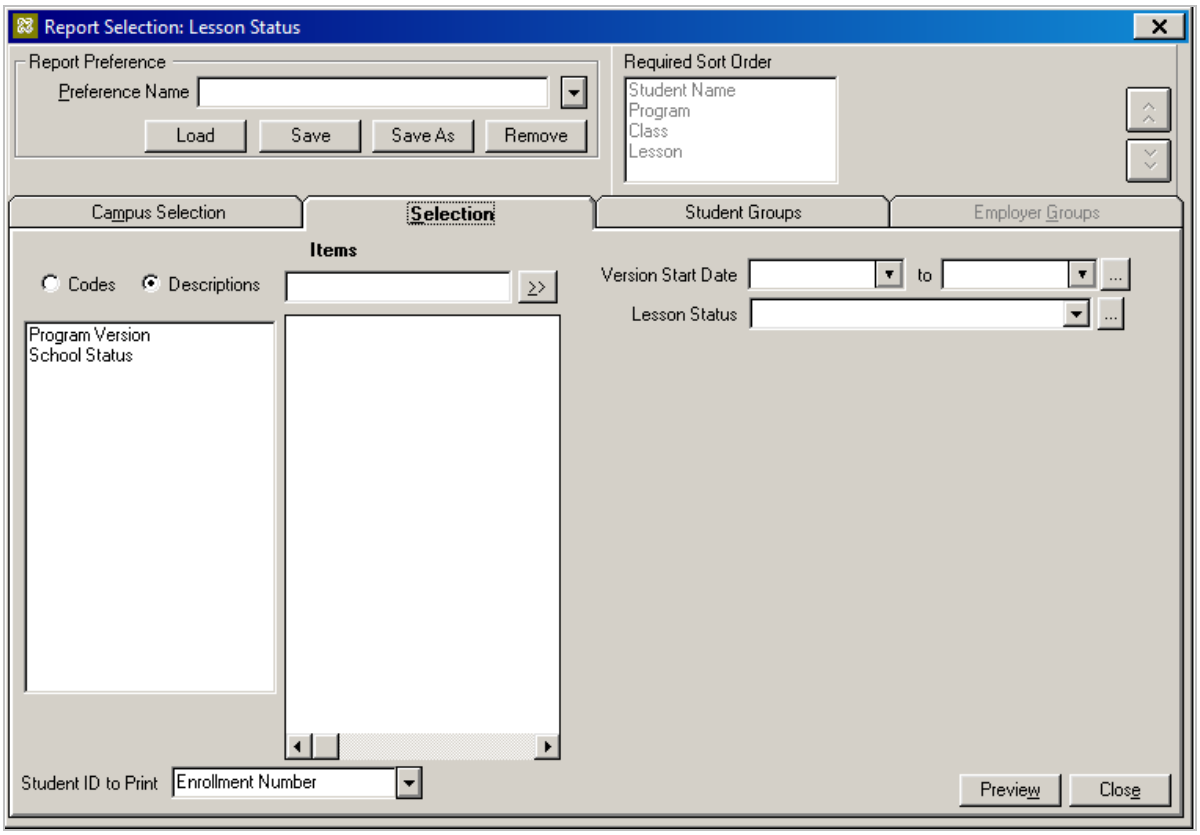
To run the report:

1. Navigate to **Reports > Academic Records > Lesson Status**. The Report Selection: Lesson Status form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: The Lesson Status selection can be "On Hold" or blank.

   When you select "On Hold", report lists only those students who have lessons on hold. CampusNexus Student blocks receipt of "held" lessons until the hold is released. To release a held lesson, select the student and navigate to View > Academic Records > Lessons. Select the course and lesson then click "Hold". The "Hold" button changes to "Release". Click "Release".

   An alternative to the procedure described above is to create a "Hold Group". This method does not set the class/-lesson hold flag as described above. That is why lessons do not appear on the report as on hold. The student group hold will keep the lessons from being received or worked with, but they are not actually "On Hold".



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   For each student in a class section for which lessons and exams are listed, the report displays:

   - Course Code
   - Section
   - Description
   - Status
   - Grade
   - Start and End dates of the class section.

   On the lesson detail lines, the report shows:

   - Lesson Number
   - Lesson Description
   - Date Taken
   - Date Graded
   - Letter Grade
   - Numeric Grade
   - Lesson Status
   - Grade Posted By

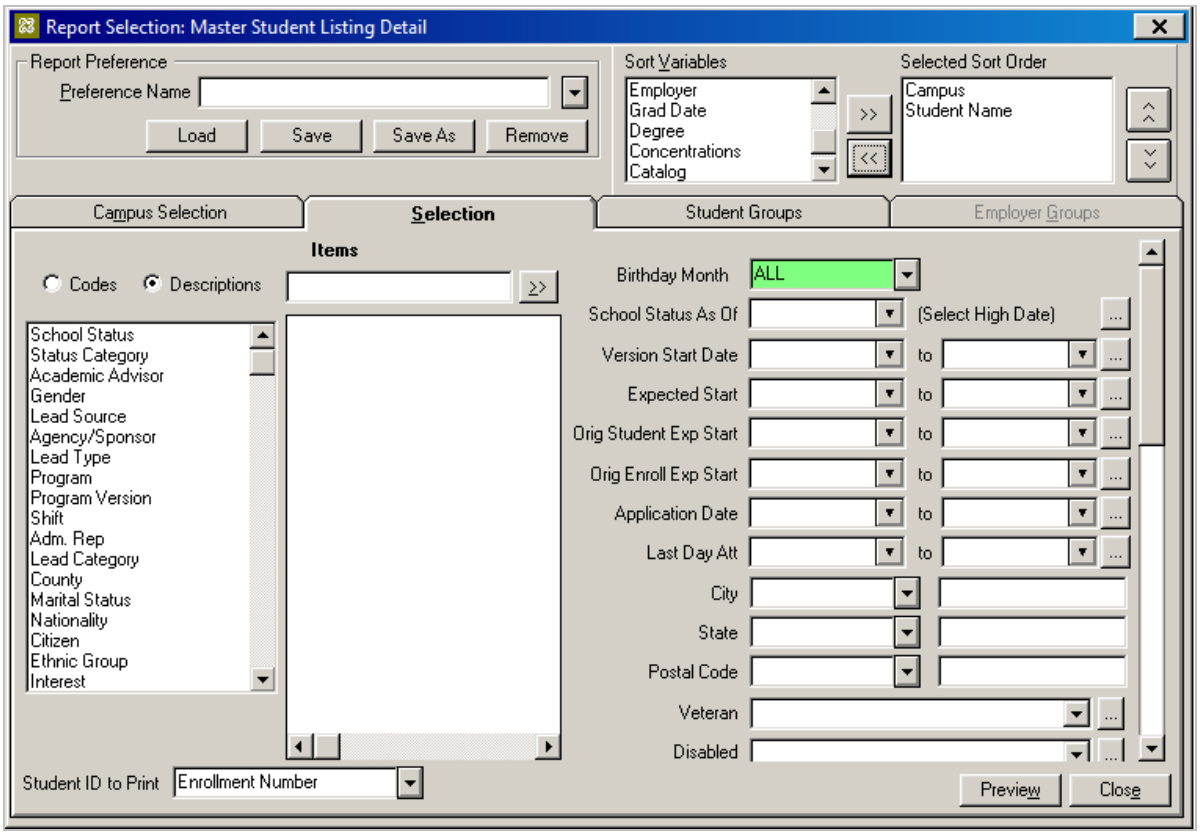
Master Student Listing Detail

This report provides basic demographic information about students, including those who are enrolled but have not yet started classes. This is a popular report because of the long list of selection and sort criteria.

Note: Leads do not appear on Master Student Listing Detail report. For information about leads, use the Admissions > Lead Master Listing Detail report.

To run the report:

1. Navigate to **Reports > Academic Records > Master Student Listing Detail**. The Report Selection: Master Student Listing Detail form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Name
   - Student ID
   - Enrollment ID or SSN

- Email
- Other Email Address
- County
- Country
- Program Version
- Shift
- Lead Source
- Enroll Status
- Degree
- Concentration

Master Student Listing Summary

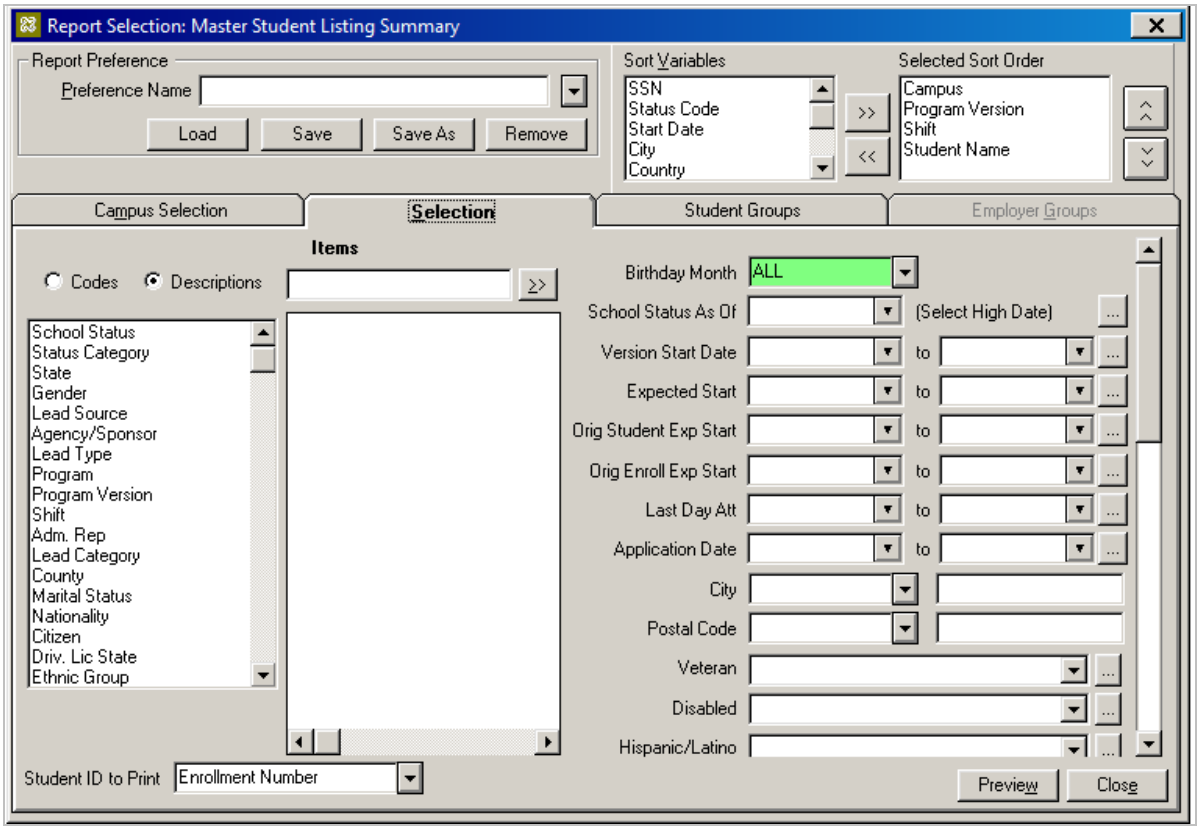
This is the summary version of the Master Student Listing Detail report. Students who have been enrolled but have not yet started classes can be listed on this report.

Note: Leads do not appear on Master Student Listing Summary report. For information about leads, use the Admissions > Lead Master Listing Detail report.

To run the report:

1. Navigate to **Reports > Academic Records > Master Student Listing Summary**. The Report Selection: Master Student Listing Summary form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: You can filter the data by one or multiple active or inactive program groups.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

- Name
- Student ID
- Email
- Program Version
- Enroll Status/School Status
- Version Start Date
- Original Start Date
- Expected Start Date
- Original Enrollment Expected Start
- Original Expected Start
- Last Date of Attendance (LDA)

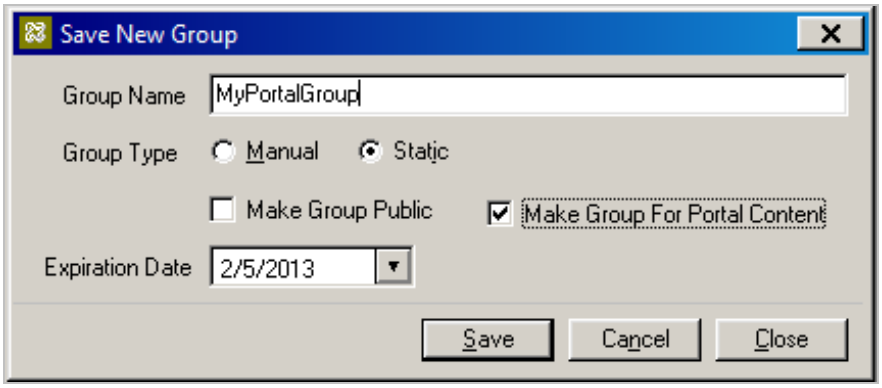
To save student groups from this report for Portal, perform the following steps:

a. In the Report Viewer, select **Report > Save Student Group**.

b. In the Save New Group form, enter the **Group Name**, select the **Group Type**, and select **Make Group**

for Portal Content.



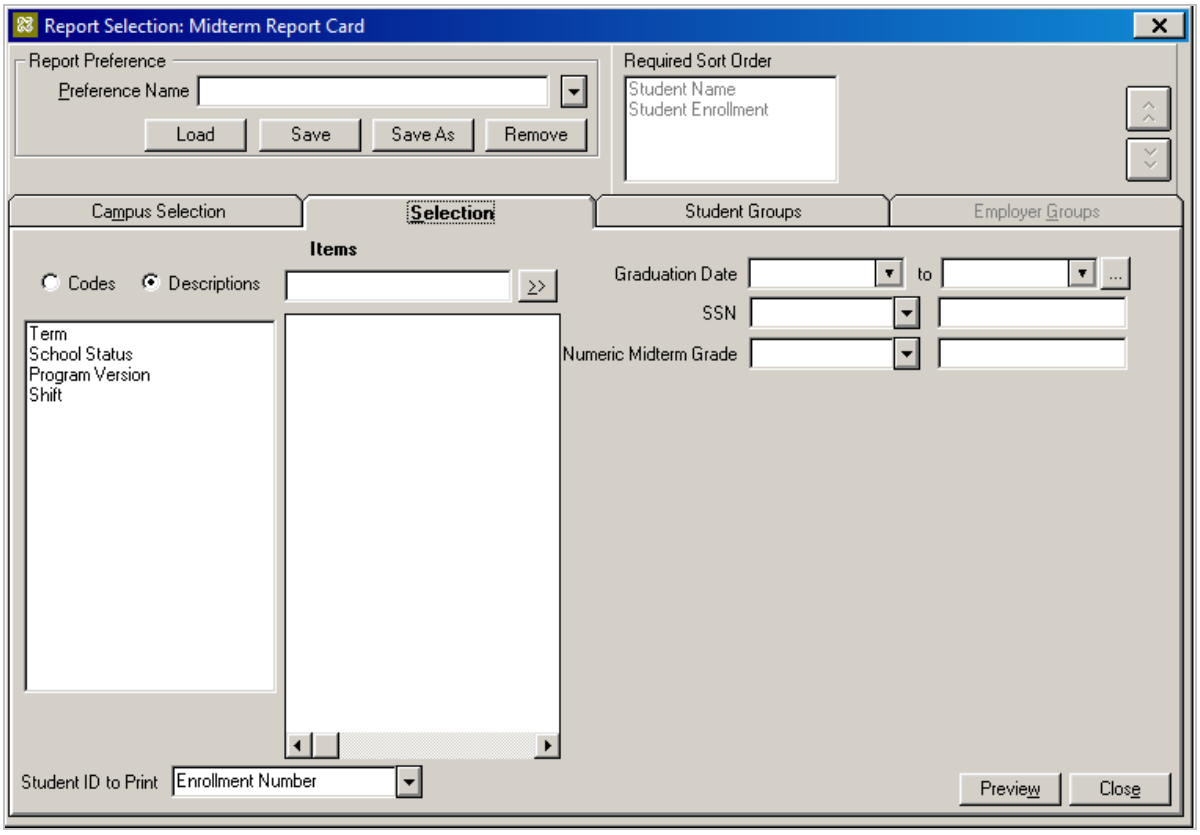
Midterm Report Card

This report prints Midterm Report Cards for one student or for all students if a lesson code of MIDTERM has been assigned to a course. The Midterm Report Card models the Report Cards report.

Note: The Midterm Report Card also displays the independent posted midterm grade if it is available on the student record.

To run the report:

1. Navigate to **Reports > Academic Records > Midterm Report Card**. The Report Selection: Midterm Report Card form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

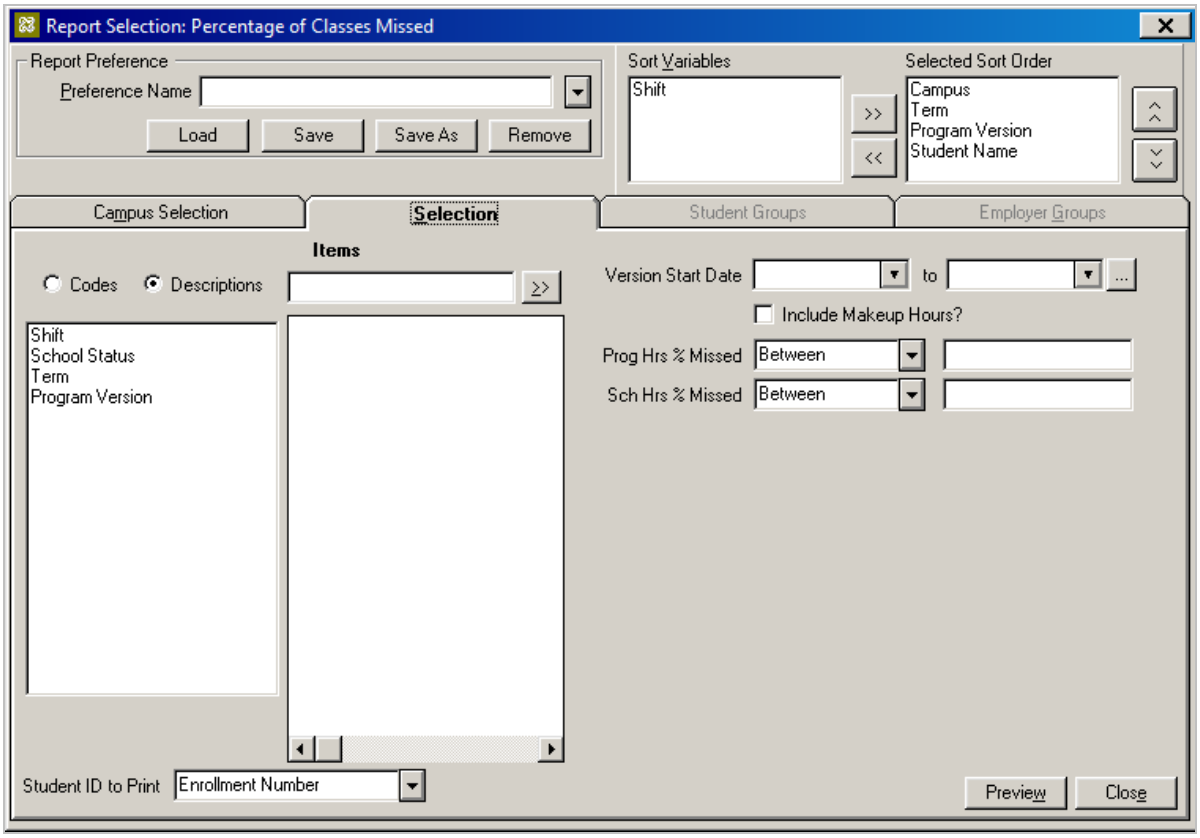
Percentage of Classes Missed

This report lists the percentage of classes missed by a student. This report can be used in a variety of ways. Many states and accrediting bodies have regulations that require a student be dropped from school if the student is absent a certain percentage of the scheduled class time or a certain percentage of the total program hours.

To run the report:

1. Navigate to **Reports > Academic Records > Percentage of Classes Missed**. The Report Selection: Percentage of Classes Missed form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

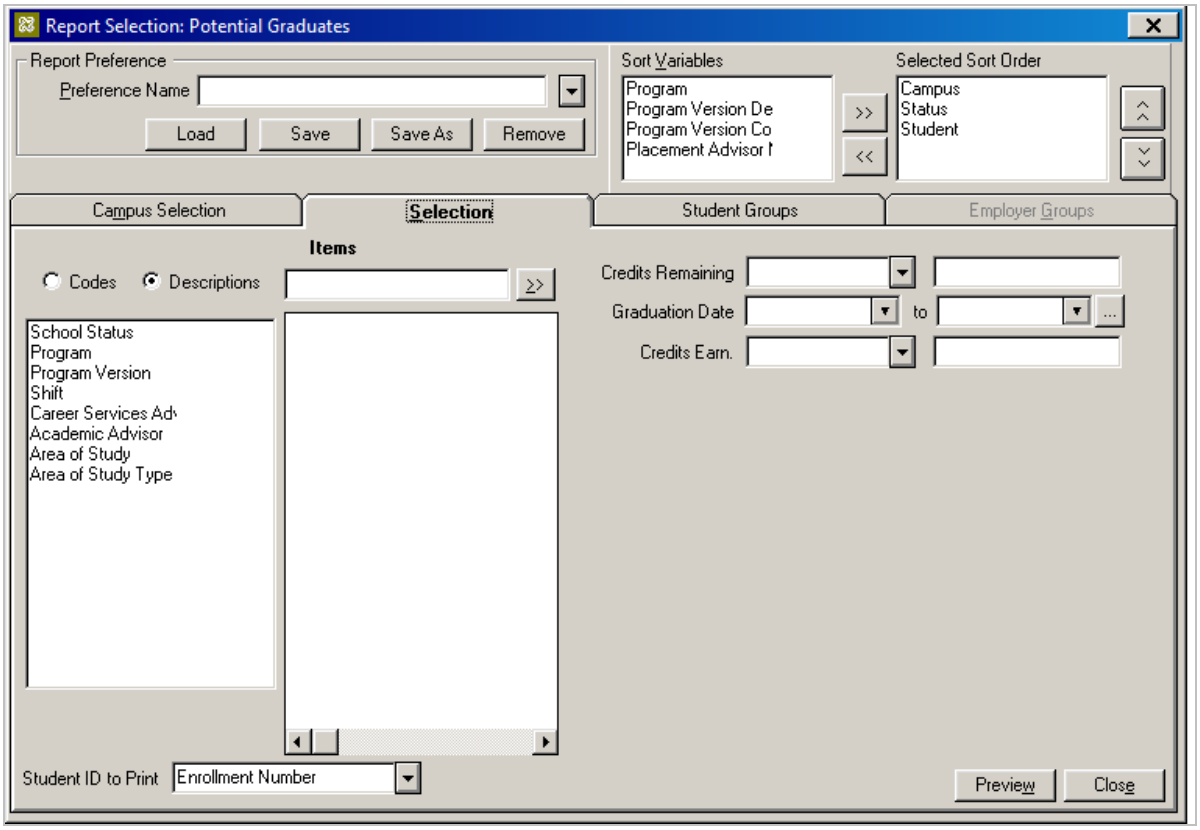
Potential Graduates

This report lists potential graduations based on the selection criteria.

To run the report:

1. Navigate to **Reports > Academic Records > Potential Graduates**. The Report Selection: Potential Graduates form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   Details are listed for each student enrollment include:

   - Student Name
   - Student ID
   - Advisor Name
   - Program Description
   - Graduation Date
   - Phone and Work Phone

- Email address and Other email address
- Shift
- Credits: Required, Earned, Taking, Attempted, Total (taking and attempted), Remaining
- GPA

Note: The 'Credits Taking' calculation includes only 'Current' courses and not 'Scheduled' courses.

Totals include a count of students in each group and the grand total of students listed.

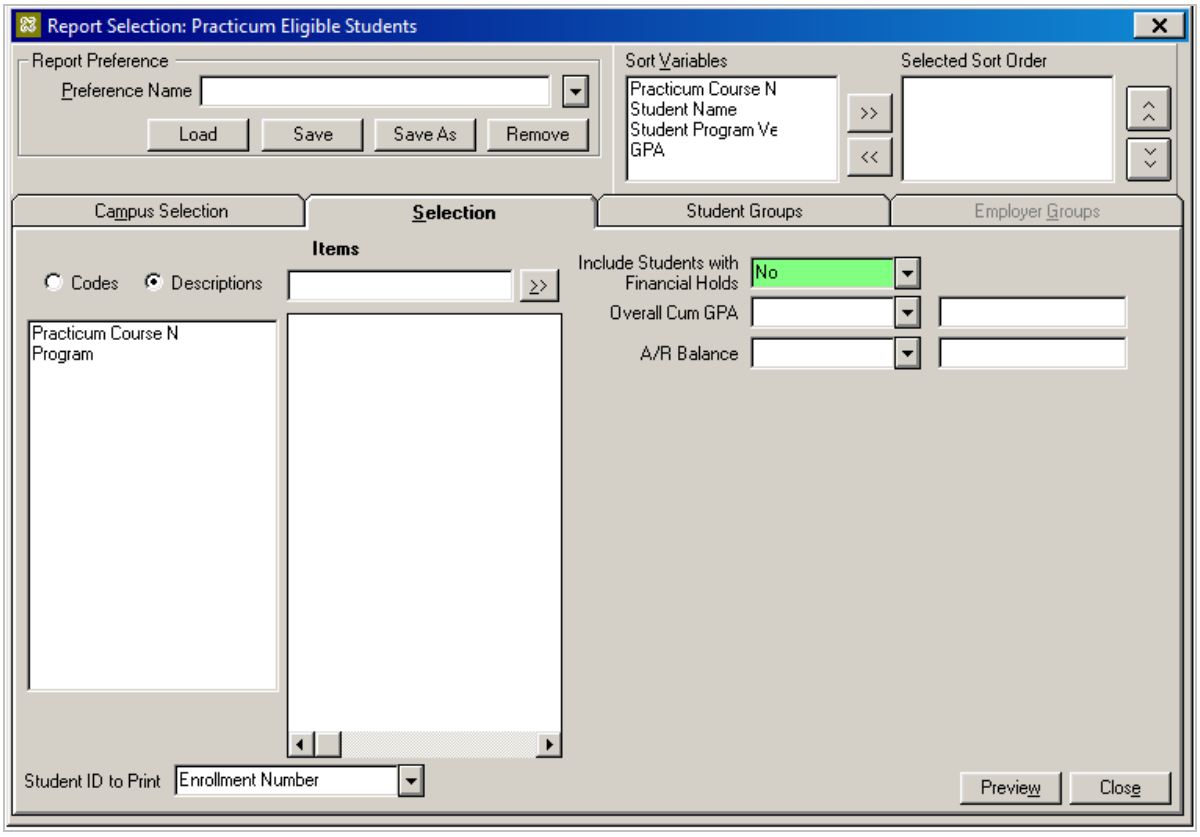
Practicum Eligible Students

This report lists students who have completed all prerequisite courses and who have met the GPA requirement to be eligible for a practicum.

To run the report:

1. Navigate to **Reports > Academic Records > Practicum Eligible Students**. The Report Selection: Practicum Eligible Students form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   You can select whether students with financial holds should be included or not included in the report. You can also select an threshold for the GPA and the outstanding student balance.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.
5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   Details listed for each student include:

   - Student Name
   - Student ID

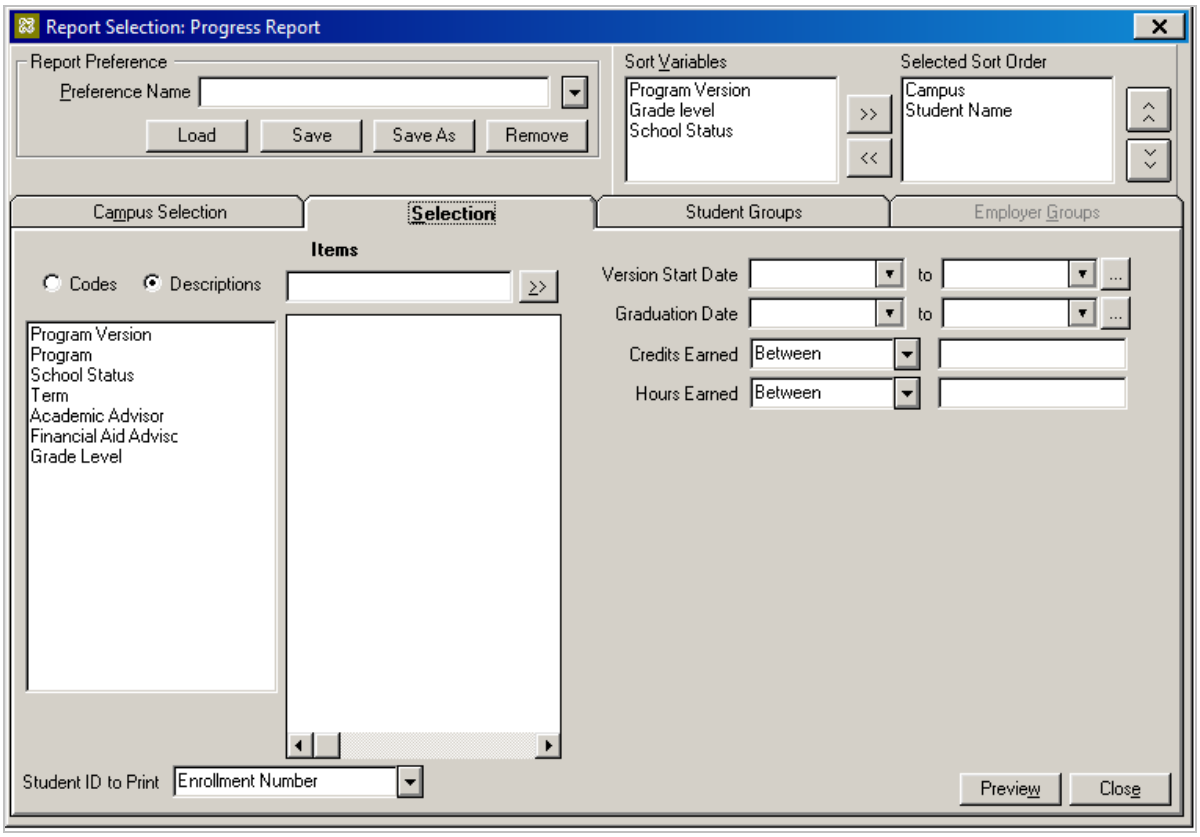
- Practicum course name
- GPA

Progress Report

This report allows users to view the progress of more than one student at a time. The report displays Financial Aid Eligibility and Academic Record information for students. See Access Security for Reports for authorization setup information.

To run the report:

1. Navigate to **Reports > Academic Records > Progress Report**. The Report Selection: Progress Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

Registered Credits by Confirmed Terms

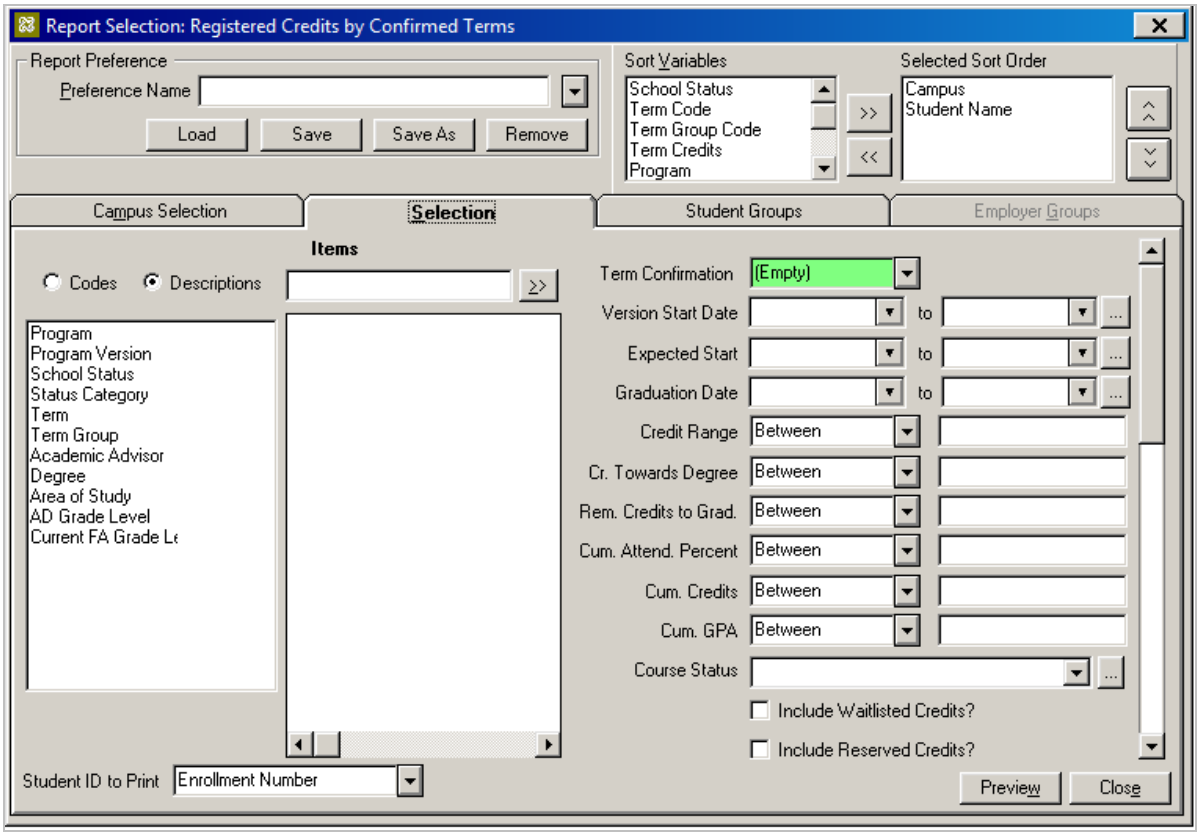
This report shows how many credits a student has registered for in a selected term that is set as a confirmed term.

To run the report:

1. Navigate to **Reports > Academic Records > Registered Credits by Confirmed Terms**. The Report Selection: Registered Credits by Confirmed Terms form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   The Term Confirmation drop-down menu provides the following options:

   - Empty (default) - no filtering on Term Confirmation
   - Yes - filter for students with Confirmed Terms
   - No - filter for students without Term Confirmation



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.
5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

- Student Name
- Student ID
- School Status
- Phone
- Program
- Program Version
- Academic Advisor
- Graduation Date
- Term Group
- Term Confirmation
- Term
- Number of Credits

Note: From Report Viewer, you can generate a list of students that match the selection criteria and save the list as a Student Group.

Review the report, print it, save it, or use it in a mail merge. You can also export it to Crystal Reports, Excel, Comma-Separated Value (CSV) file, or XML.

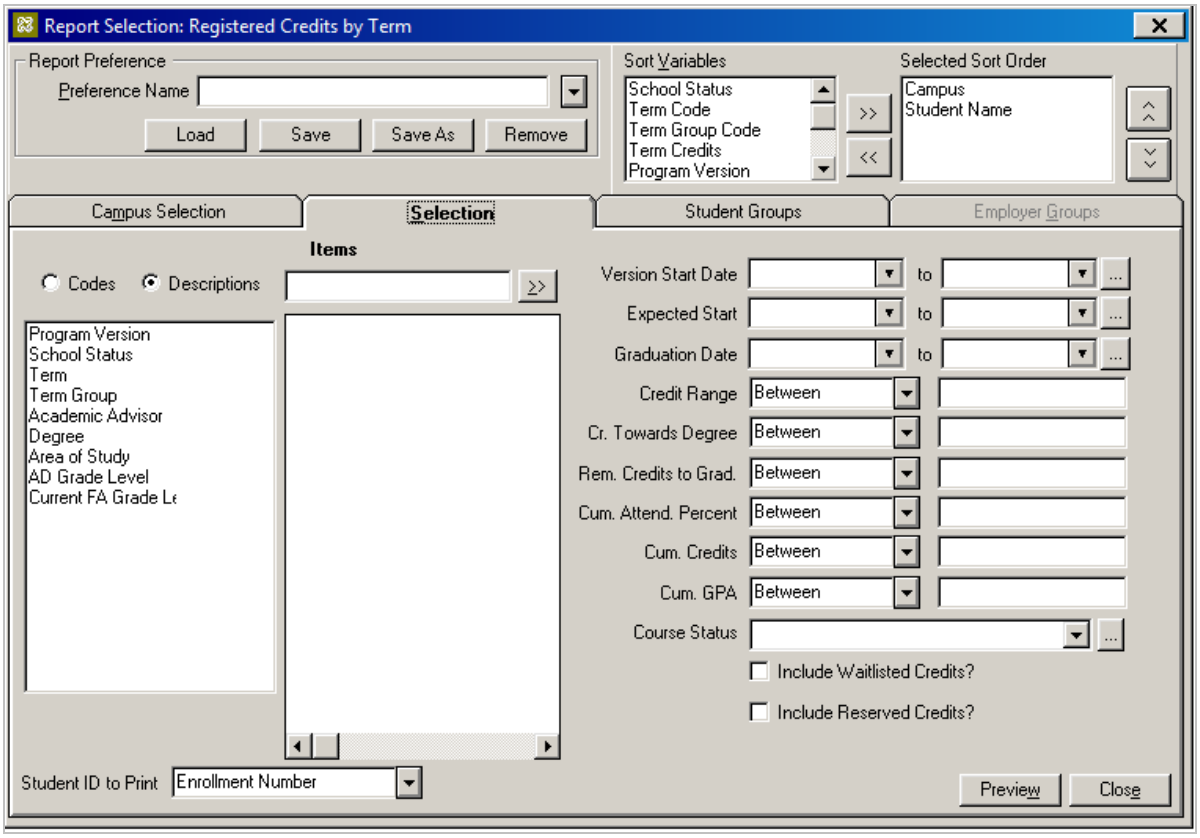
Registered Credits by Term

This report shows how many credits a student has registered for in a selected term. The report satisfies the following questions:

- How many credits is each student scheduled for?
- Who has not registered for any courses in the term and is "Active"? (Number of credits equals zero.)

To run the report:

1. Navigate to **Reports > Academic Records > Registered Credits by Term**. The Report Selection: Registered Credits by Term form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

Campus Management

Page 1 of 212

Note: From Report Viewer, you can generate a list of students that match the selection criteria and save the list as a Student Group.

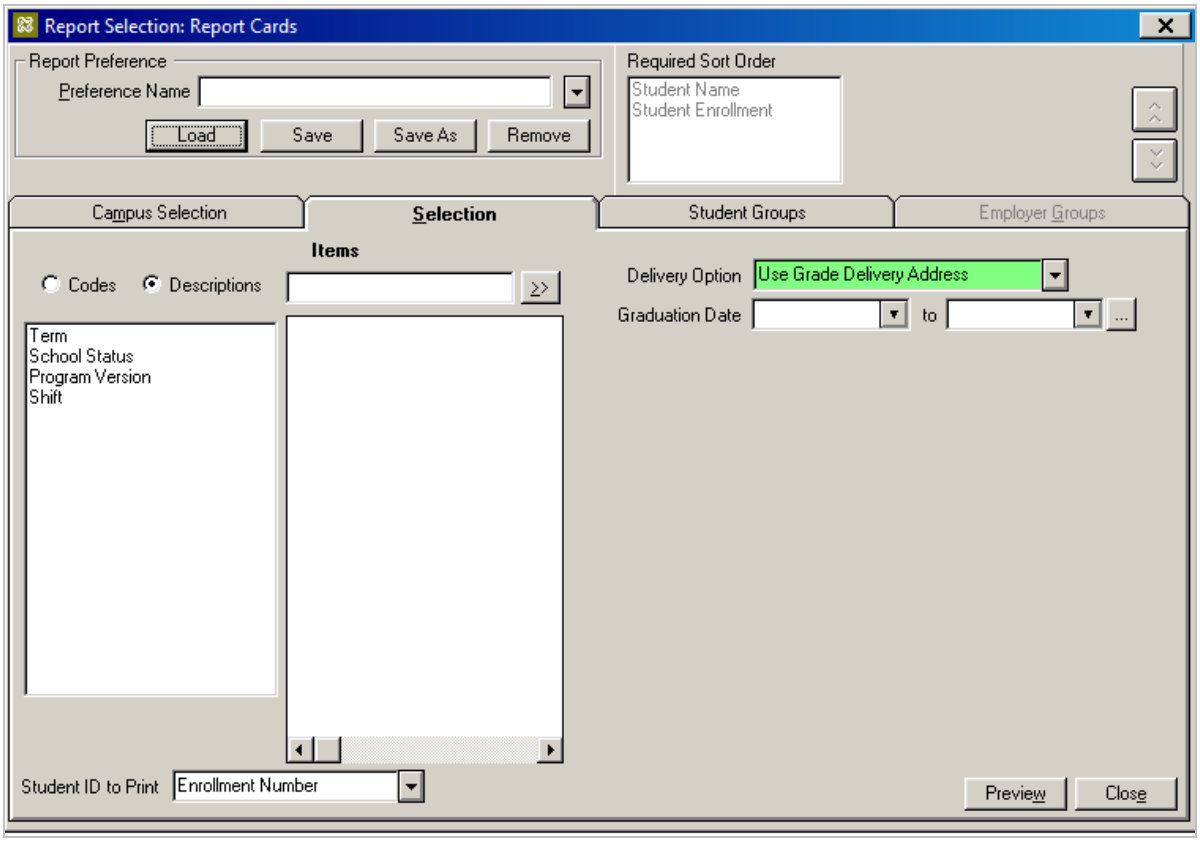
Report Cards

This report produces Report Cards by term for each student.

To run the report:

1. Navigate to **Reports > Academic Records > Report Cards**. The Report Selection: Report Cards form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: The 'Delivery Option' choices are **User Student Master Address** and **Use Grade Delivery Address**. If you select 'Use Grade Delivery Address', only students who have the 'Grade Address' type added under the View > Contact Manager > Address form are included in the report.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   Header information on the report card includes the date printed and the campus name and address. Header information for the student includes name, identifier (ID, enrollment number, or SSN), and status in school. The header also includes the program version description, term code and description, and the term start and end dates.

Detail lines include course code, description, credits attempted, credits earned, letter grade, numeric grade, clock hours, honors, and date completed.

The report also includes the student's term GPA, cumulative GPA, term credits attempted, term credits earned, cumulative credits earned, term hours scheduled, and term hours attended.

If the student has elected to take a class on a pass/fail basis, a note is displayed next to the course. The letter grade reflects the pass/fail grade scale in these instances.

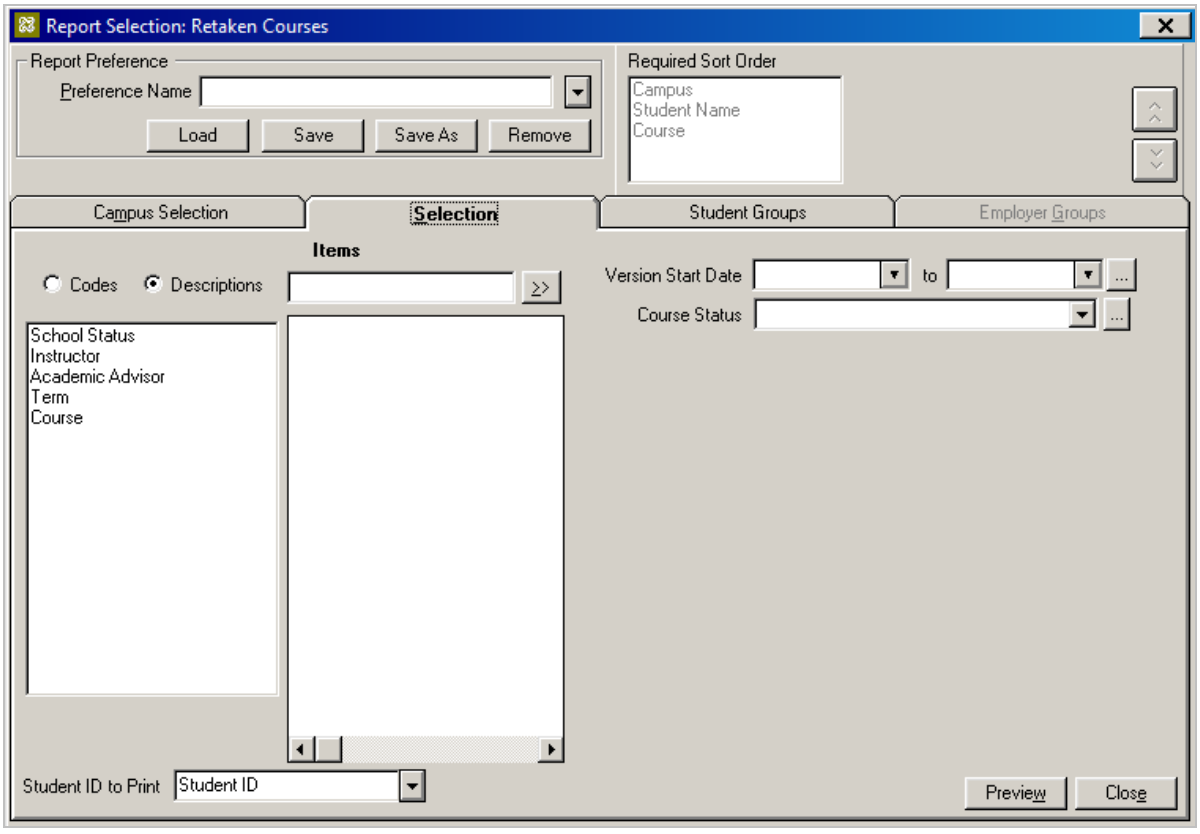
Retaken Courses

This report displays students who have been scheduled or registered to retake a class even though a grade has not been posted.

By using the Retake Override flag (View > Academic Records > Final Grades), the Retaken Courses report and the Final Grades form display the retake courses independent of the class status. The Final Grades form displays the courses as retakes. The GPA calculation does not reset the Retake Override flag. For more information, see Grading and Retakes.

To run the report:

1. Navigate to **Reports > Academic Records > Retaken Courses**. The Report Selection: Retaken Courses form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Course Description
   - Class Section

SAP Audit Report

This report contains information stored in the SAP Audit, for example:

- SAP date
- Name of the operator who ran the SAP
- SAP status posted
- Failed sequence number

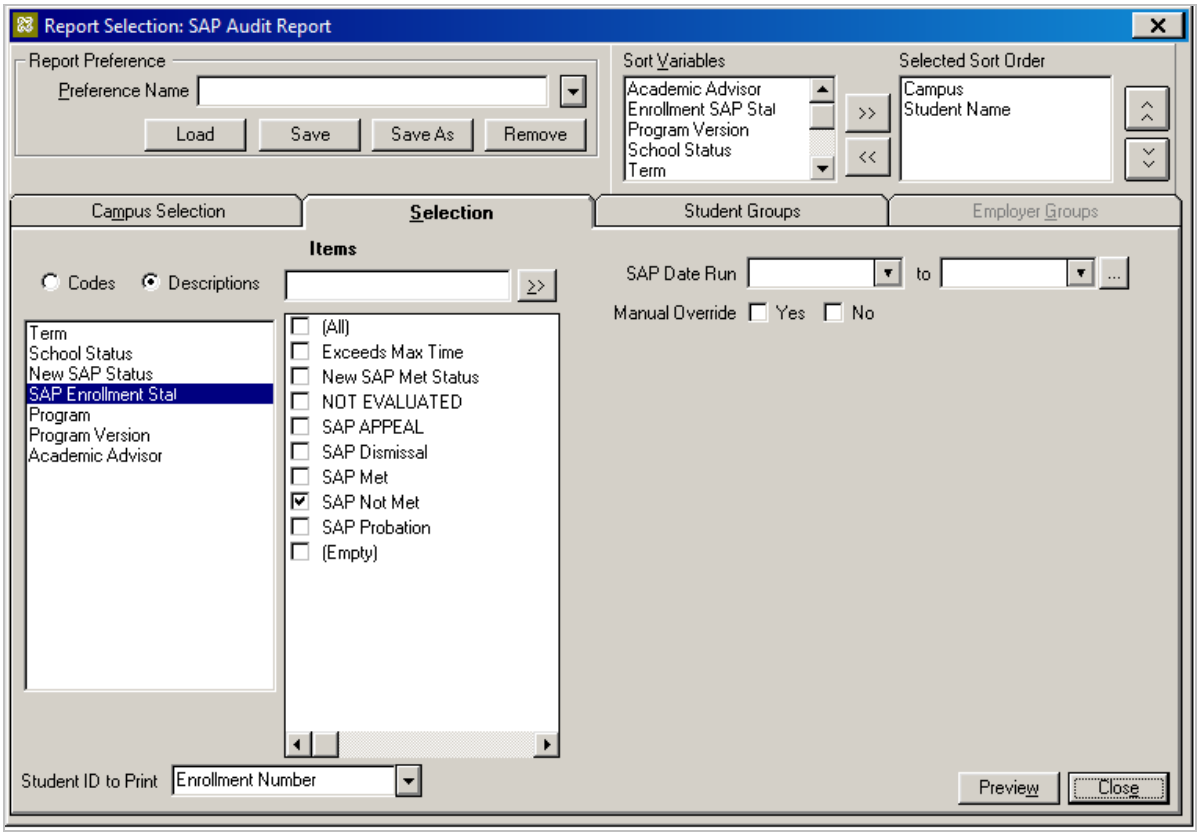
You can include all detail records from all students included in the SAP run, or to only include students where a manual override of SAP status occurred. See also SAP status override security setup.

To run the report:

1. Navigate to **Reports > Academic Records > SAP Audit Report**. The Report Selection: SAP Audit Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   You may run the report by:

   - Identifying the date and user of SAP calculation for selected campuses
   - A prior SAP batch by campus and term (all students evaluated in SAP calculation will be included)
   - Identifying a student's previous SAP status, new SAP status, if manually overridden, related comments, and user who made changes, or
   - Identifying only those students whose SAP status was manually overridden.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

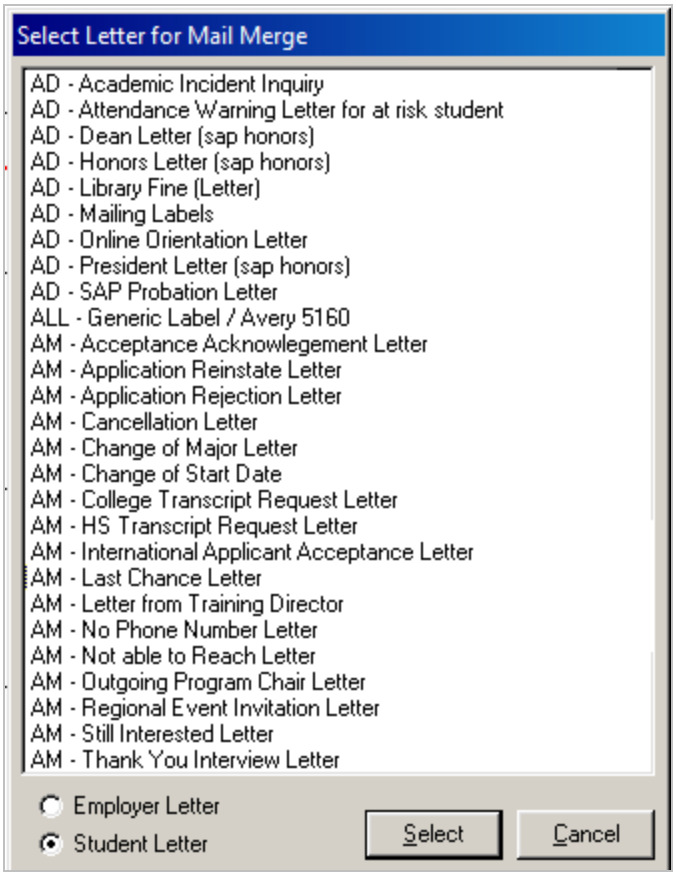
Page 1 of 74

You can generate SAP Failure Letters directly from the report in the Report Viewer.

a. In the Report Viewer, select the **Mail Merge** menu option.

b. Select the configured SAP failure letter activity from the list of mail merge options in the **Select Letter for Mail Merge** form.



c. Click **Select**.

   Note: When you click Select, SAP Failure Letters are printed for every student on the report. To print SAP Failure Letters only for students who did not meet SAP, re-run the report with the SAP Status selection that represent students not meeting SAP and then generate the SAP Failure Letters from that report.

d. On the Mail Merge confirmation message, click **Yes** to proceed or click **No** to cancel the mail merge request.

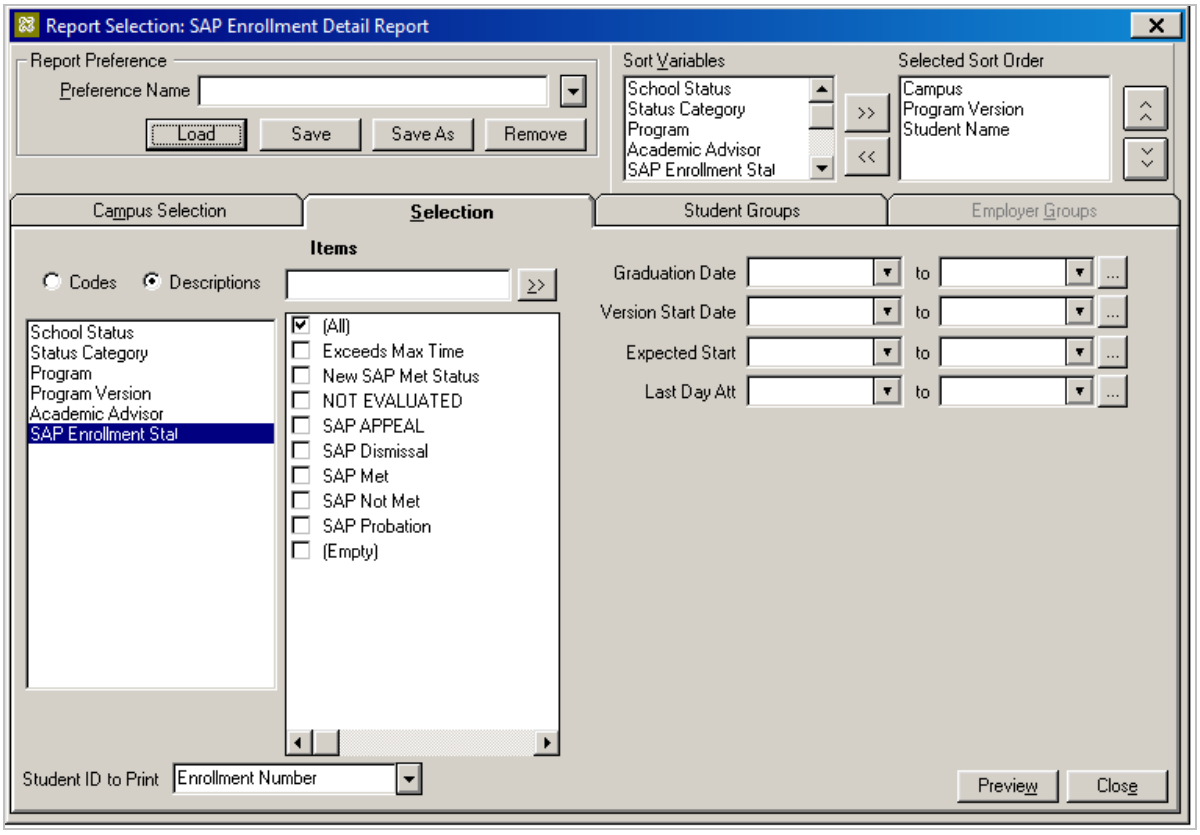
SAP Enrollment Detail Report

This report shows the SAP status as it is displayed on the student's Enrollment Progress tab.

Note: The SAP Enrollment Detail Report includes students that are evaluated by payment period. To run an SAP report only on students evaluated by payment period, use the SAP Payment Period Detail Report.

To run the report:

1. Navigate to **Reports > Academic Records > SAP Enrollment Detail Report**. The Report Selection: SAP Enrollment Detail Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - School Status
   - Enrollment Status

- Program
- Program Version
- Academic Advisor
- SAP Enrollment Status

Additional fields in the Excel output view include:

- Graduation Date
- Version Start Date
- Expected Start
- Last Day Attended

Any linked SAP enrollment is displayed in the field labeled 'Linked SAP Enroll'.

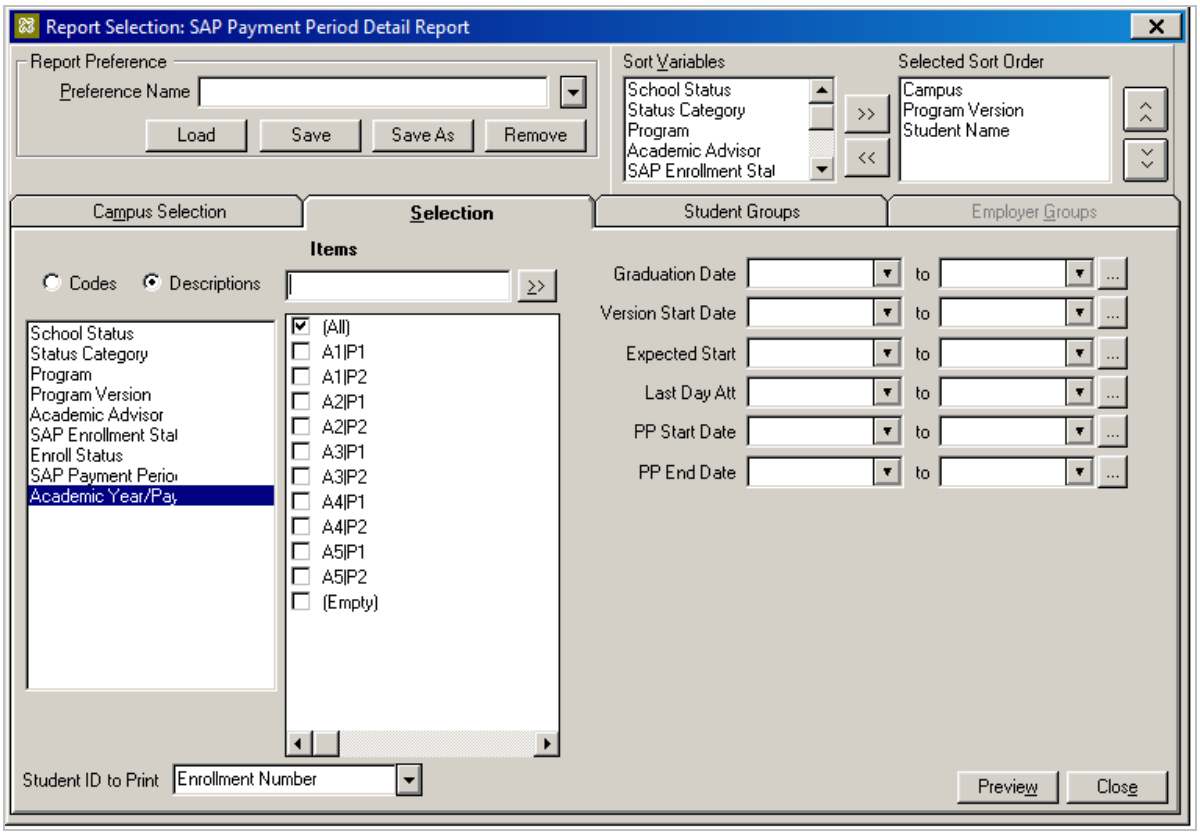
3. Click **Preview**. The report is assembled and displayed in the Report Viewer.

SAP Payment Period Detail Report

This report displays students that are evaluated by Academic Years/Payment Period. The SAP Payment Period Detail Report is similar to the SAP Term Detail Report, except that it is based on Academic Years/Payment Periods instead of Terms.

To run the report:

1. Navigate to **Reports > Academic Records > SAP Payment Period Detail Report**. The Report Selection: SAP Payment Period Detail Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

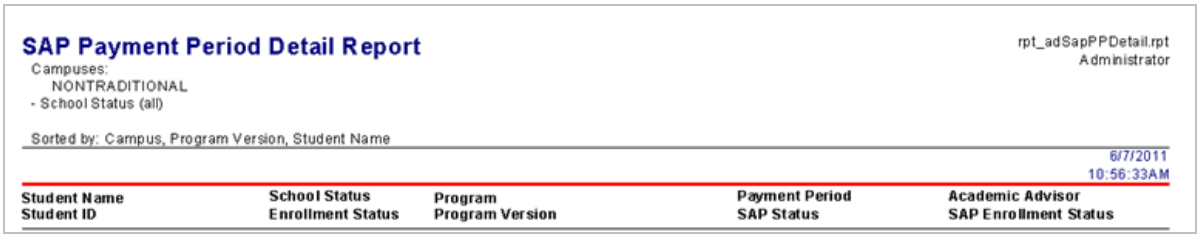
   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - School Status
   - Enrollment Status
   - Program

- Program Version
- Payment Period
- SAP Status
- Academic Advisor
- SAP Enrollment Status

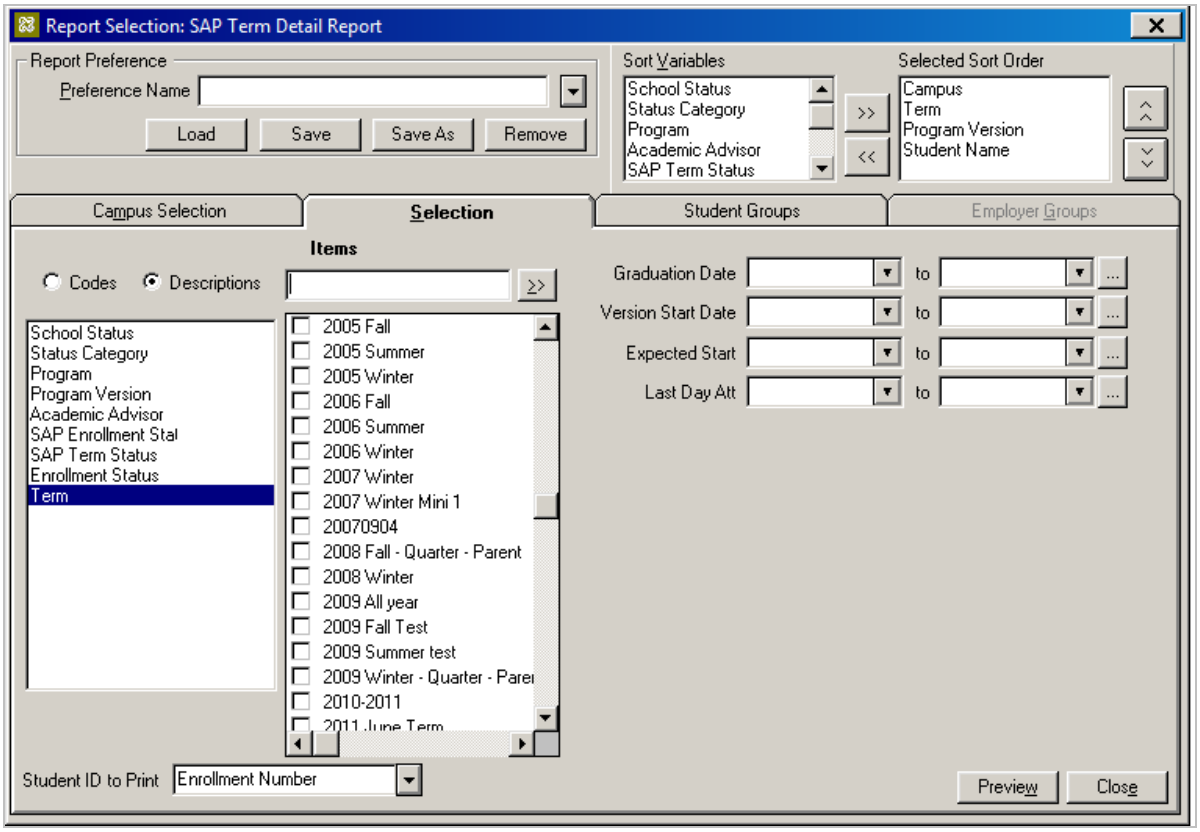


SAP Term Detail Report

This report shows the SAP status for each term as it is displayed on the student's Enrollment Term Summary tab.

To run the report:

1. Navigate to **Reports > Academic Records > SAP Term Detail Report**. The Report Selection: SAP Term Detail Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - School Status
   - Enrollment Status
   - Program
   - Program Version

- Term
- SAP Term Status
- Academic Advisor
- SAP Enrollment Status

Additional fields in the Excel output view include:

- Graduation Date
- Version Start Date
- Expected Start
- Last Day Attended

Any linked SAP enrollment is displayed in the field labeled 'Linked SAP Enroll'.

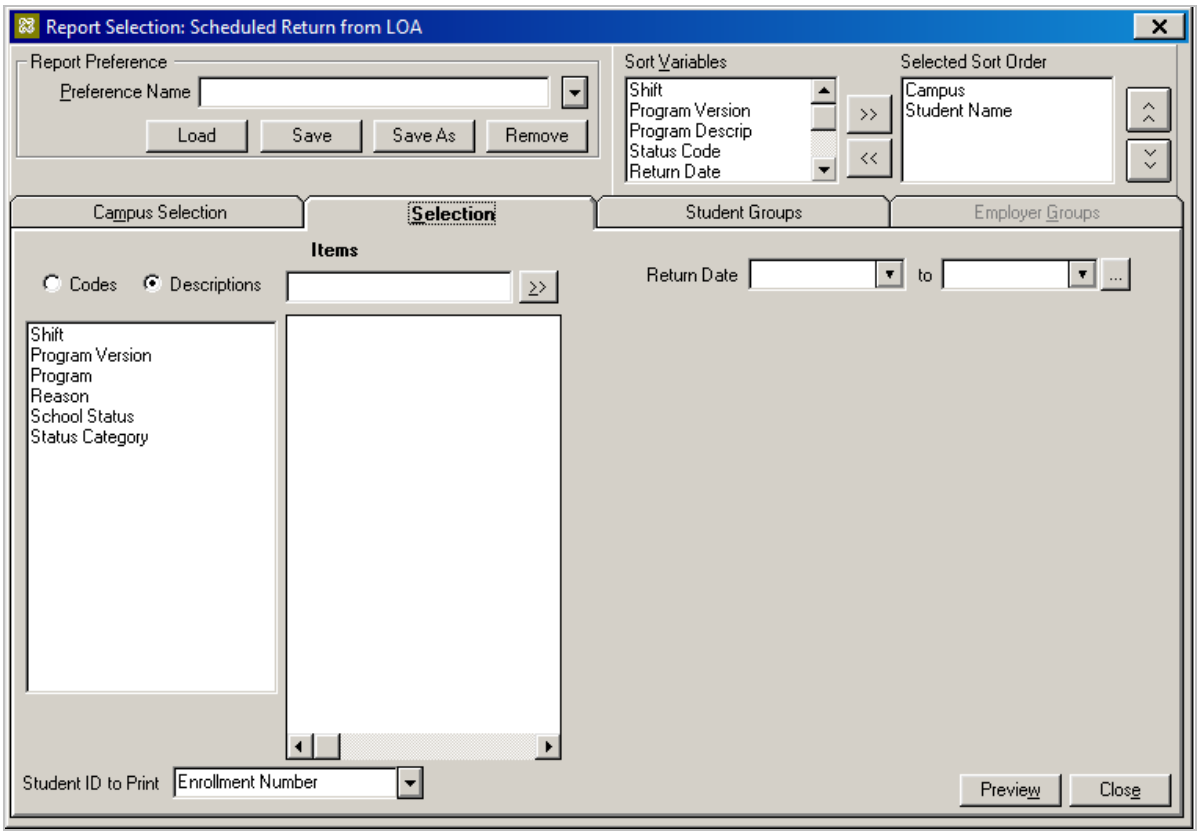
Scheduled Return from LOA

The Scheduled Return from Leave of Absence (LOA) report provides a list of students scheduled to return from LOA within a date range that you provide.

To run the report:

1. Navigate to **Reports > Academic Records > Scheduled Return from LOA**. The Report Selection: Scheduled Return from LOA form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - Program Version
   - Shift
   - Student Phone

- Reason
- Date on LOA
- LOA Return Date
- Status
- Total LOA

A count of students listed is provided at the end of the report.

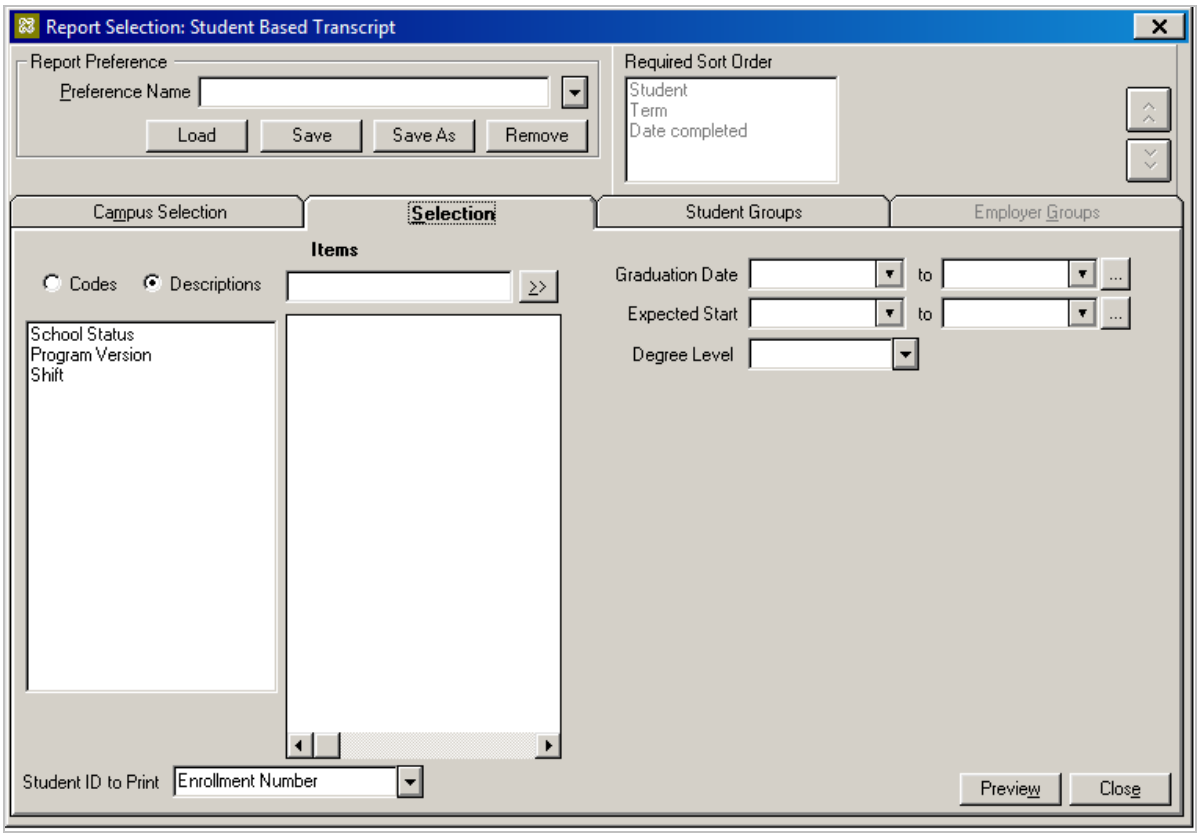
Student Based Transcript

This report provides student based transcripts. The report list courses for all student enrollments grouped by term code in chronological order by term start date. Enrollment and degree information is displayed at the end of the report. The GPA, Credits, and Hours for courses taken in the same term but at different schools are added up and presented as a single set of totals for the term.

Note: To configure the transcript format, navigate to **Setup > Academic Records > Academic Records Settings >** Transcripts tab.

To run the report:

1. Navigate to **Reports > Academic Records > Student Based Transcript**. The Report Selection: Student Based Transcript form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

Student Degree Evaluation Report

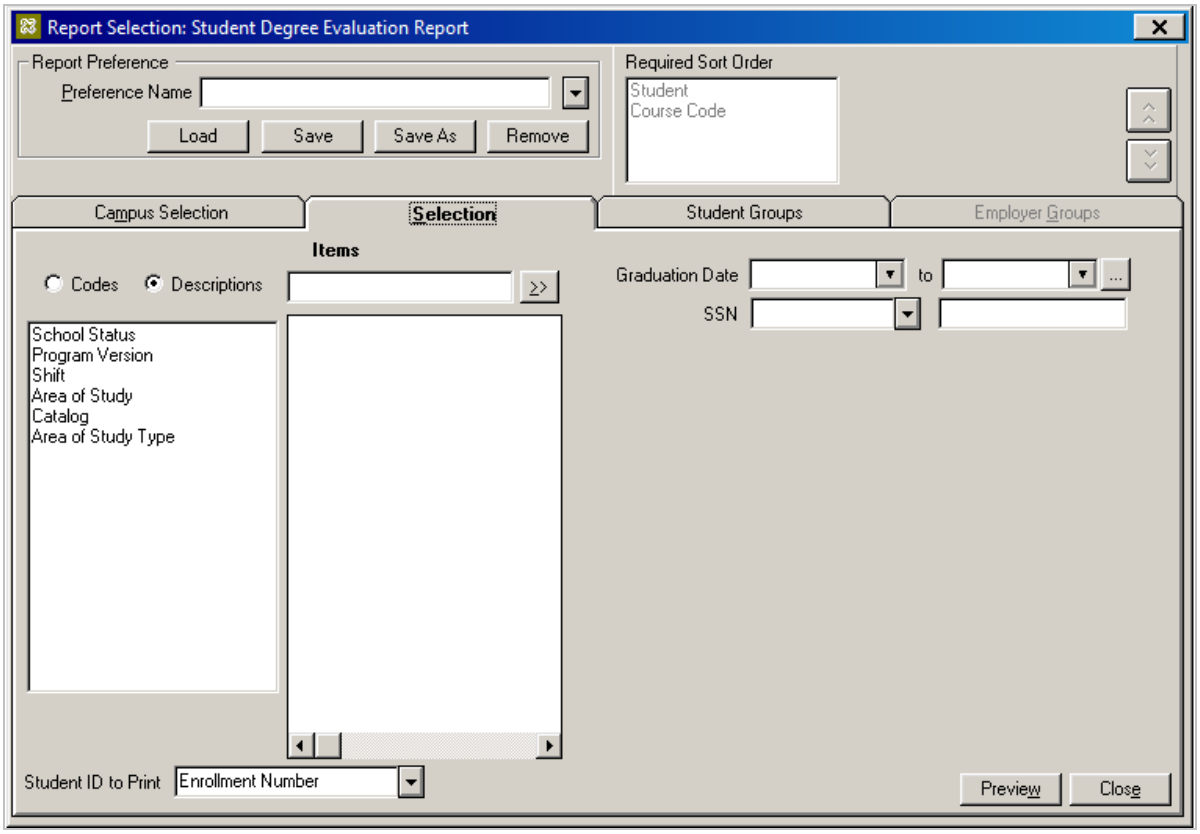
The Degree Evaluation Report report lists all courses taken by the student.

Note: A different report, the Degree Progress Audit, can be obtained from **View > Academic Records >** Degree Progress Audit. The Degree Progress Audit lists only courses relevant to the degree.

To run the report:

1. Navigate to **Reports > Academic Records > Student Degree Evaluation Report**. The Report Selection: Student Degree Evaluation Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: You can use the student's SSN to obtain the report for a single student.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The group header for a student includes student name and address, SSN, date of birth (DOB), school status, start date, and end date.

   Program data includes the description, credits required, hours required, shift, and enrollment status.

Detail lines include course code, section, course description, course status, term, start date, end date, credits, credits earned, grade, quality points, and "include in GPA" indicator.

Totals for each student include the GPA, credits attempted, credits earned, and catalog.

A note is displayed if the student has elected to take a class on a pass/fail basis. The letter grade reflects the pass/-fail grade scale in these instances.

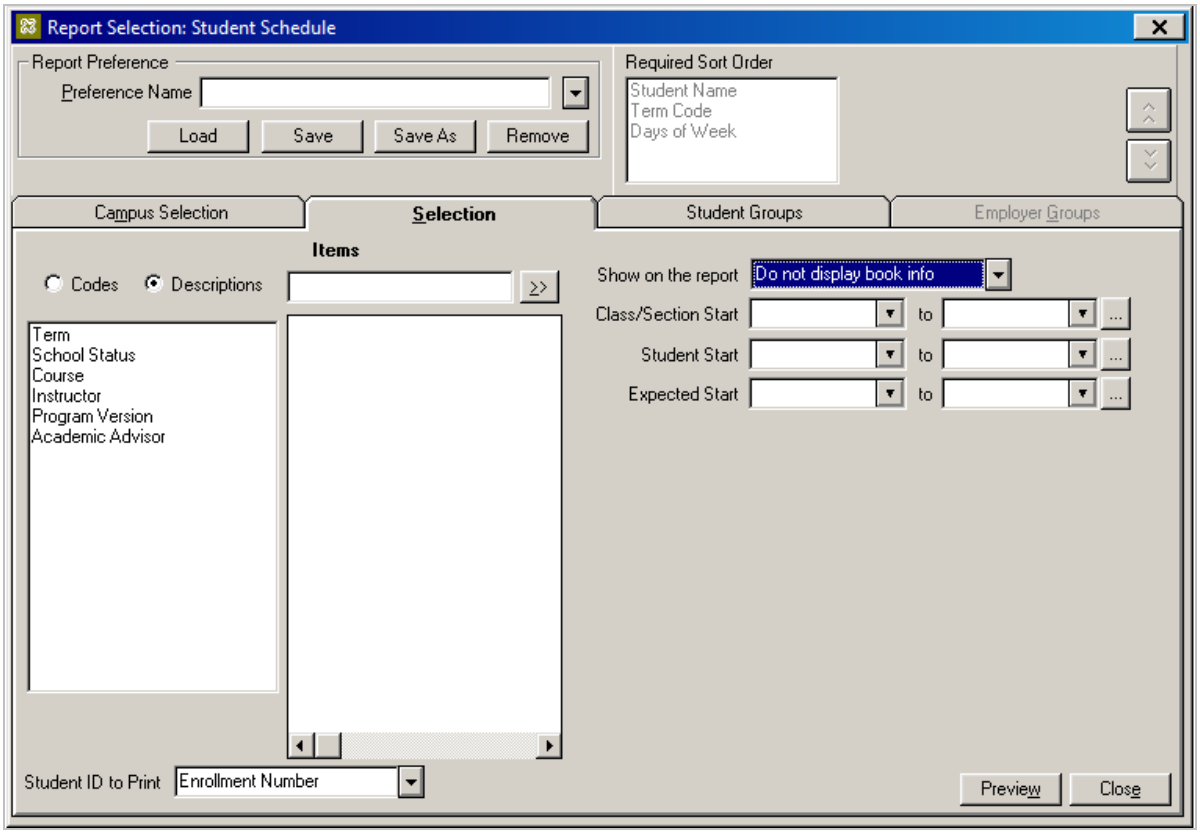
Student Schedule

This report lists class section schedules for students.

This report can be run from the Reports menu for multiple students (page breaks separate the schedules for each student) or from the View > Academic Records > Schedule > Print option for a selected student.

To run the report:

1. Navigate to **Reports > Academic Records > Student Schedule**. The Report Selection: Student Schedule form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - Weekday
   - Start Time

- End Time
- Campus
- Program Version
- Academic Advisor
- Building
- Room Number
- Course
- Section
- Description
- Instructor
- Enrollment Status
- Start Date
- Audit
- Hours or Credits
  If the Academic Calendar code used in the program version setup is 5 - Clock Hours, the column heading is Hours. Otherwise, the heading is Credits.
- Date Start
- Date End
- Delivery Method
- Comments
  The report includes comments that have been entered for individual class sections. These comments are in addition to the comments that can be entered for all student schedules on the Setup > Campus Locations > Academic Records tab.

If applicable, the report includes Dependent class sections scheduled for a student.

A note is displayed if the student has elected to take a class on a pass/fail basis.

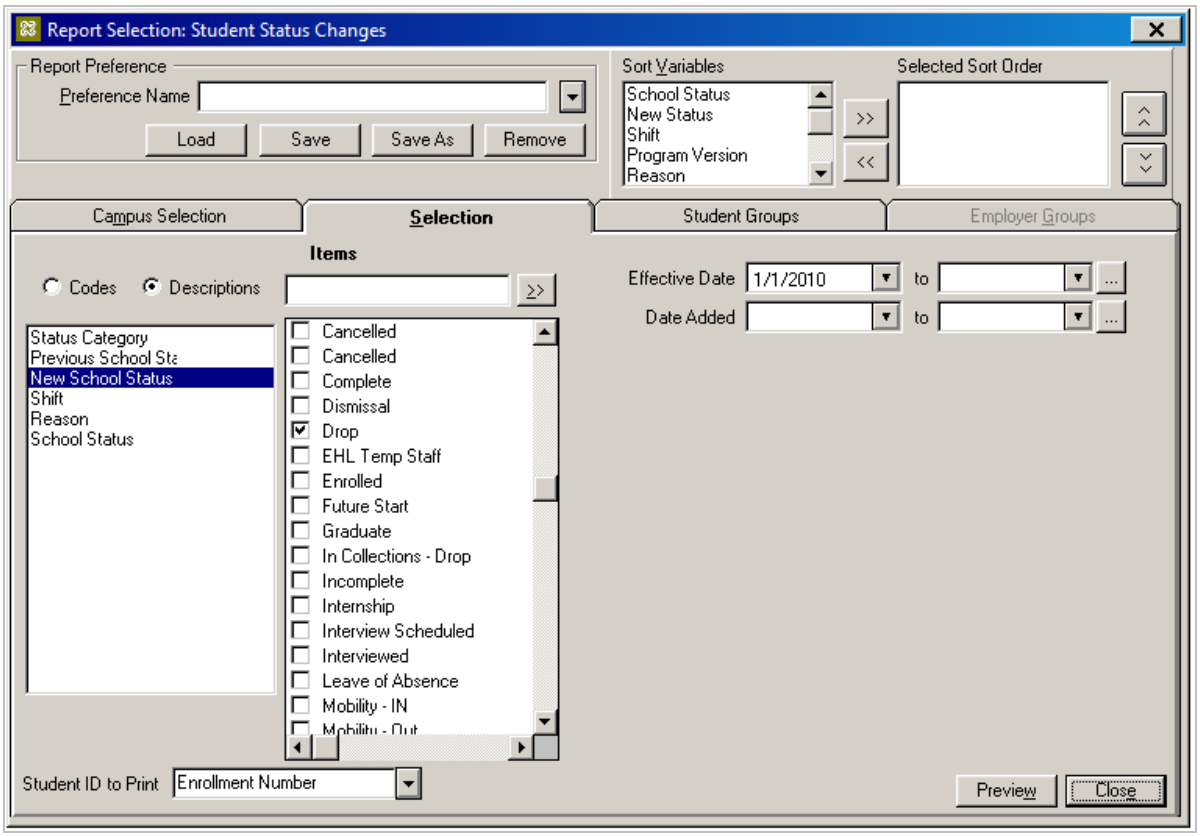
Student Status Changes

This report is a history of Admissions and Enrollment status changes by student. The status change records included in this report are those in which the status category codes are Active (A), Enrollment (E), Never Attended (N), Permanent Out (P), and Temporary Out (T). Lead and Placement statuses are not included.

To run the report:

1. Navigate to **Reports > Academic Records > Student Status Changes**. The Report Selection: Student Status Changes form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: If you select a value of **Drop** in the New School Status or School Status selection, the effective date range will be applied for Drop status records using the NSLDS withdrawal date.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID

- Student's Phone Number
- Application Date
- Start Date
- Stored Last Date of Attendance (LDA)
- NSLDS Withdrawal Date
- Program Version
- Shift
- Current Status
- Previous Status
- New Status
- Comments/Reason
- Date Done
- Done By

The Excel output includes the student's address (street address, city, state, country, and postal code) and home phone number.

The total number of status changes is listed at the end of the report.

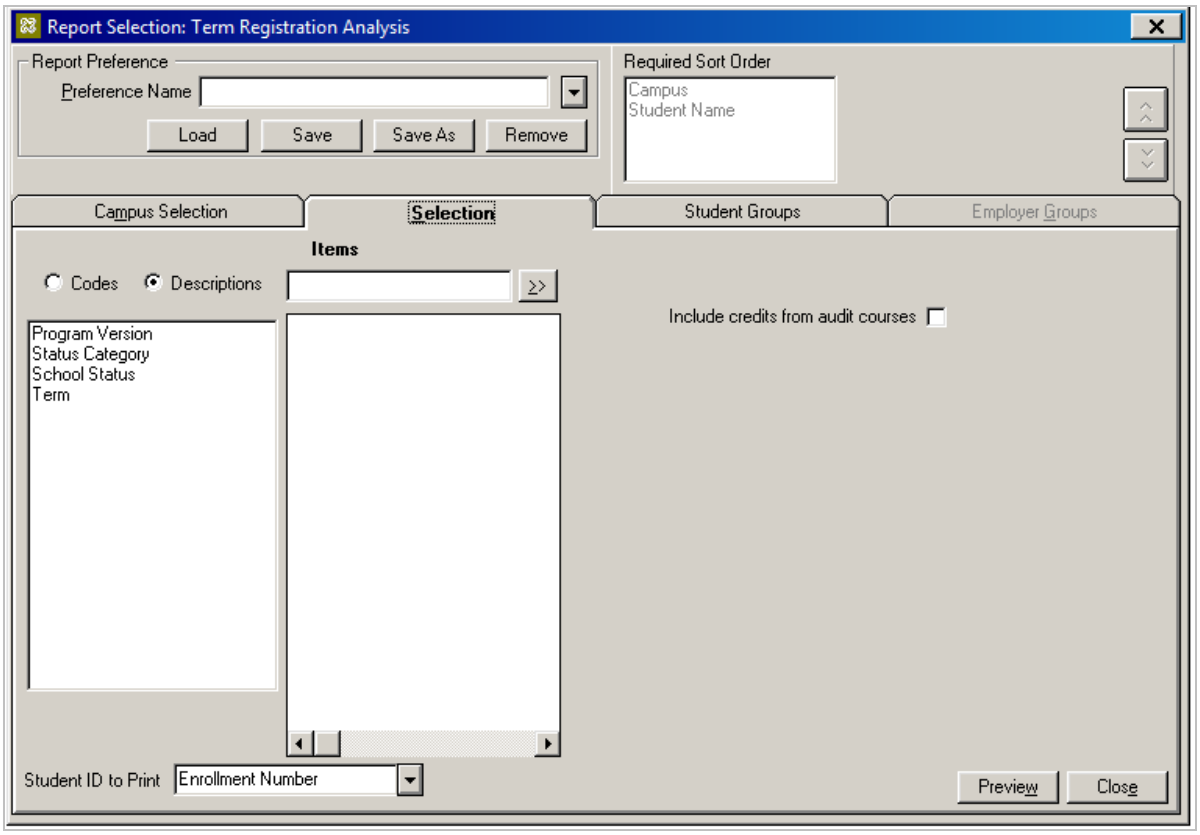
Term Registration Analysis

The purpose of this report is to determine who is currently registered in one term but is not registered in another term and to show a side-by-side comparison report.

To run the report:

1. Navigate to **Reports > Academic Records > Term Registration Analysis**. The Report Selection: Term Registration Analysis form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

Term Relationship

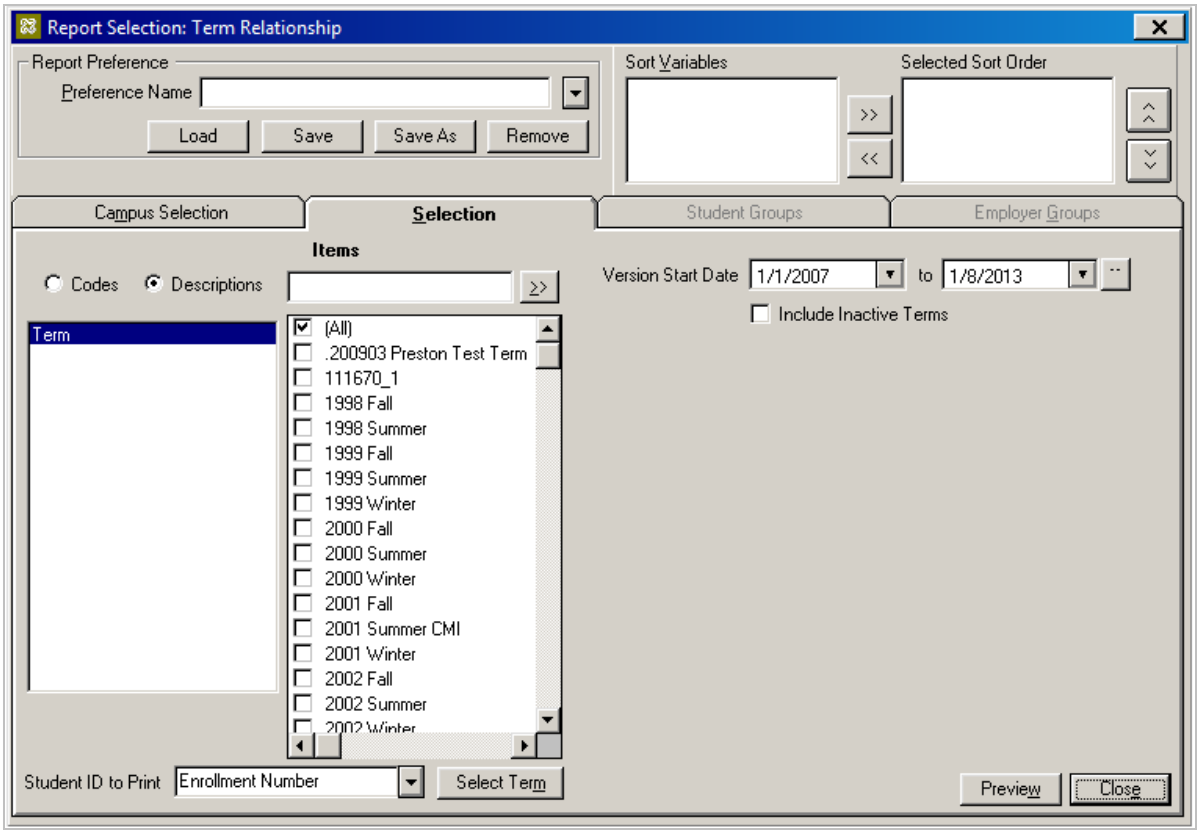
This report displays a family of terms as a Parent Term plus at least one non-reporting Child Term. The report identifies child terms that are associated with families that do not carry a complete representation of term usages (Financial Aid, Student Accounts, and Registration/Attendance).

The information presented on the report contains terms where:

a. The Child Term belongs to one of the Campuses being reported and
b. The Parent Term starts within the Version Start Date Range selected by the user.

To run the report:

1. Navigate to **Reports > Academic Records > Term Relationship**. The Report Selection: Term Relationship form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report results is grouped and sorted by all Parent Terms associated with the selected Child Terms.

   For each term, the term code, term description, term start date, term end date, term add/drop date, term length, and term flag (usage) are displayed.

Terms that are considered to be orphaned are marked with an asterisk.

Page 1 of 1

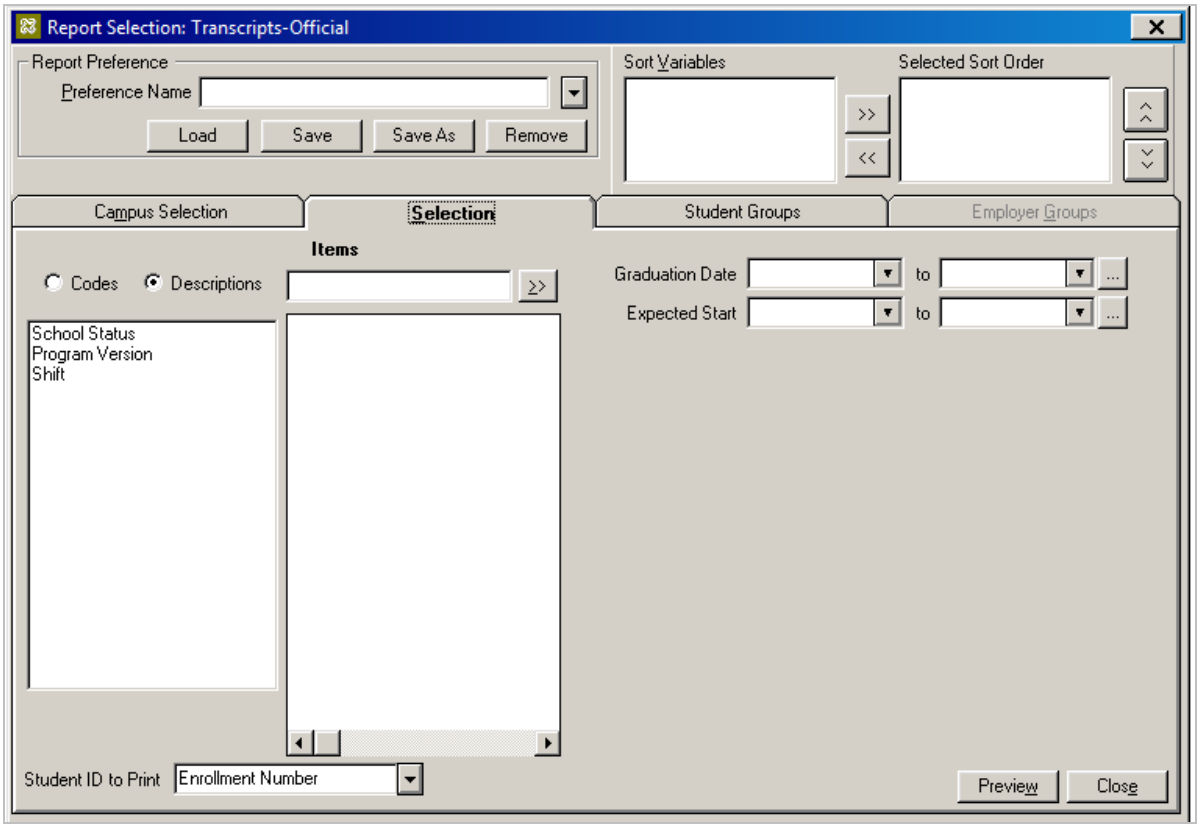
Transcripts-Official

Student Transcripts can be run from the Reports menu (for multiple students) or from the View > Academic Records > Final Grades > Print option (for a selected student).

The transcript report can retrieve a student's entire academic history (all enrollments), regardless of selection criteria. Students are selected by graduation date (and possibly school statuses as well) when batch printing transcripts. If a graduation date returns a student's record, all grades related to all enrollments for that student are printed on the transcript. Since the transcript is a representation of all course work completed at the school, all the enrollments are displayed. Additionally, the SAP status for each term is added to the view (Excel output) for the report so that you can display this information on your custom transcript. A note is displayed on the transcript, if the student has elected to take a class on a pass/fail basis.

To run the report:

1. Navigate to **Reports > Academic Records > Transcripts-Official**. The Report Selection: Transcripts-Official form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.
5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

Each student enrollment begins on a new page with a student identification header on each page. Each page is divided horizontally in two sections. Term and course information flows from the top of the left section to the bottom of the right section on each page. If multiple pages are required for a student's record, the header is repeated on the next page and details continue in the left section.

When all data is listed, a message is displayed to signify the end of the report: "*** End of Transcript ***".

This message is displayed at the bottom of all pages: "Not official unless signed by registrar."

Terms are listed in chronological order. For each term in which the student is enrolled, the courses for which grades have been posted are listed. The detail line for each course shows the course code, course description, credits attempted, credits earned, letter grade, and quality points. A summary line is displayed for each term and includes the term GPA, total credits attempted, total credits earned, and total quality points.

If a student is enrolled in a program that has both a program version description and a transcript description, the transcript displays the transcript description. If a student is enrolled in a program that has only a program version description, the transcript displays the program version.

The transcript shows the Catalog Code for the course (if there is a value in the Catalog Code field). If there is no value in Catalog Code, then the Code is printed.

At the end of the transcript, a summary line is displayed that includes the description of the enrollment, total credits attempted, total credits earned, and cumulative GPA.

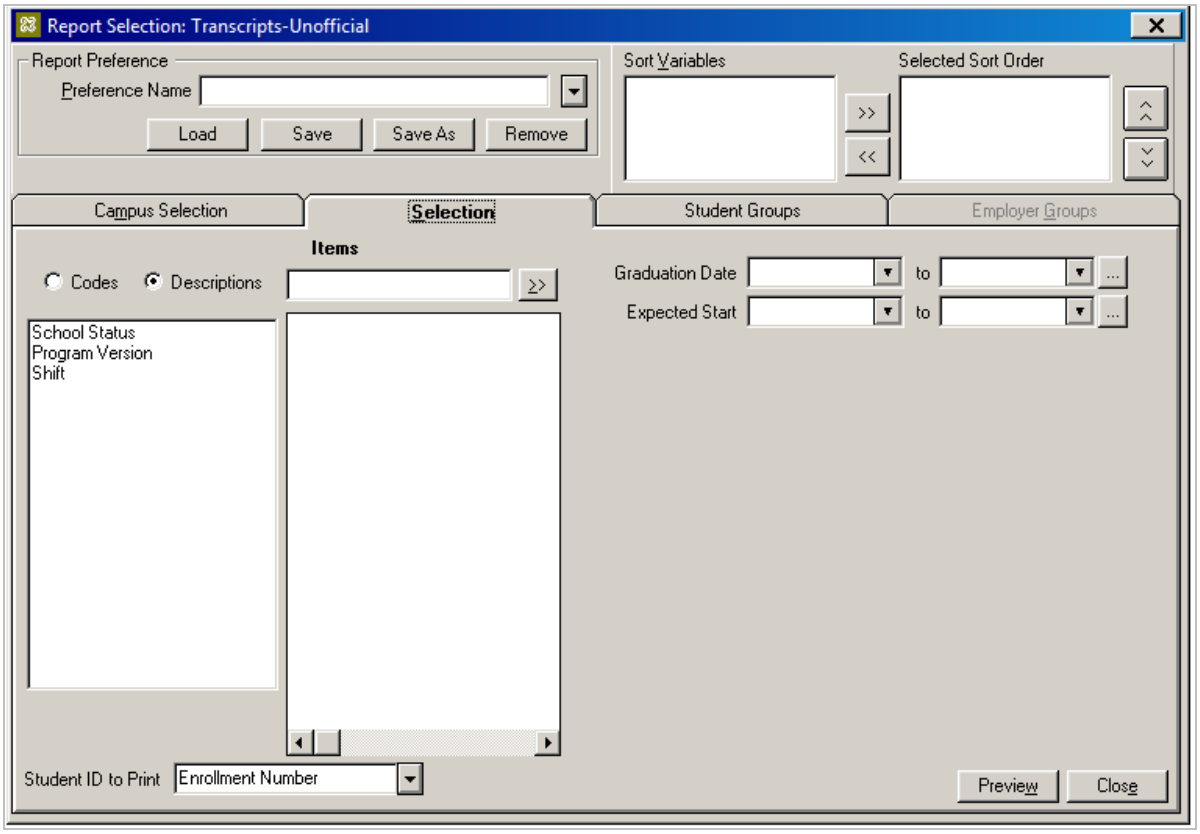
Transcripts-Unofficial

The unofficial transcript includes everything that is currently printed on the official transcript. In addition, the unofficial transcript includes current classes from the student's schedule. The phrase, "- In Progress" follows the term description in the heading for any term (i.e., Spring 2003 - In Progress) that includes current classes. Current classes are not included in any calculations on the report. The unofficial transcript also includes the word "UNOFFICIAL" at the top of each page and does not include an authorized signature and date line.

The transcript report can retrieve a student's entire academic history (all enrollments), regardless of selection criteria. Students are selected by graduation date (and possibly school statuses as well) when batch printing transcripts. If a graduation date returns a student's record, all grades related to all enrollments for that student are printed on the transcript. Since the transcript is a representation of all course work completed at the school, all the enrollments are displayed. Additionally, the SAP status for each term is added to the view (Excel output) for the report so that you can display this information on your custom transcript. A note is displayed on the transcript, if the student has elected to take a class on a pass/fail basis.

To run the report:

1. Navigate to **Reports > Academic Records > Transcripts-Unofficial**. The Report Selection: Transcripts-Unofficial form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   If a student is enrolled in a program that has both a program version description and a transcript description, the transcript displays the transcript description. If a student is enrolled in a program that has only a program version description, the transcript displays the program version.

   A note next to a final grade indicates that the retake override flag is set. Example: If the Retake Override indicator is on, then "R*" is listed next to the grade. The transcript is the only report that identifies a course as being a Retake.

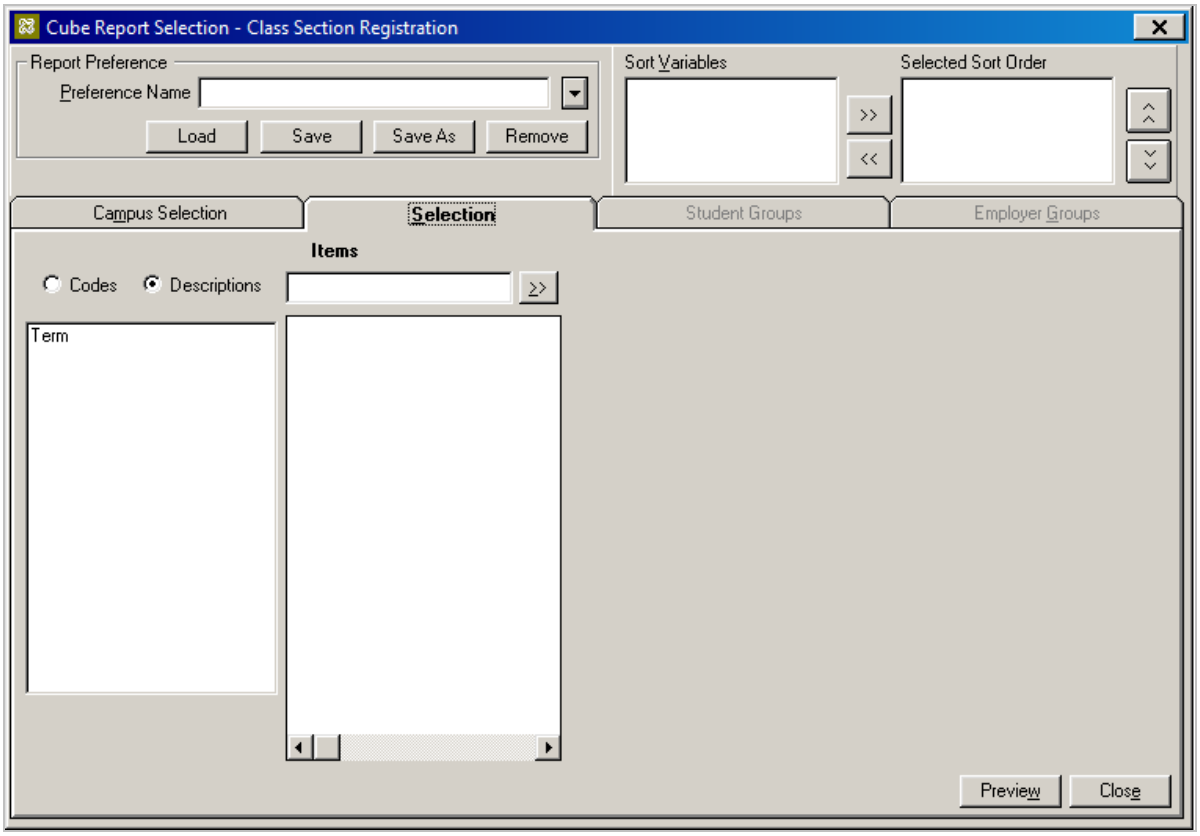
Class Section Registration

This cube report helps you analyze class registration statistics. The report helps to plan the use of school resources such as instructors, classrooms, and time. For example, you can see which instructors, which students, which class sections are in what rooms at what time on what days of the week in the fall term.

To run the report:

1. Navigate to **Reports > Academic Records > Class Section Registration**. The Cube Report Selection: Class Section Registration form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



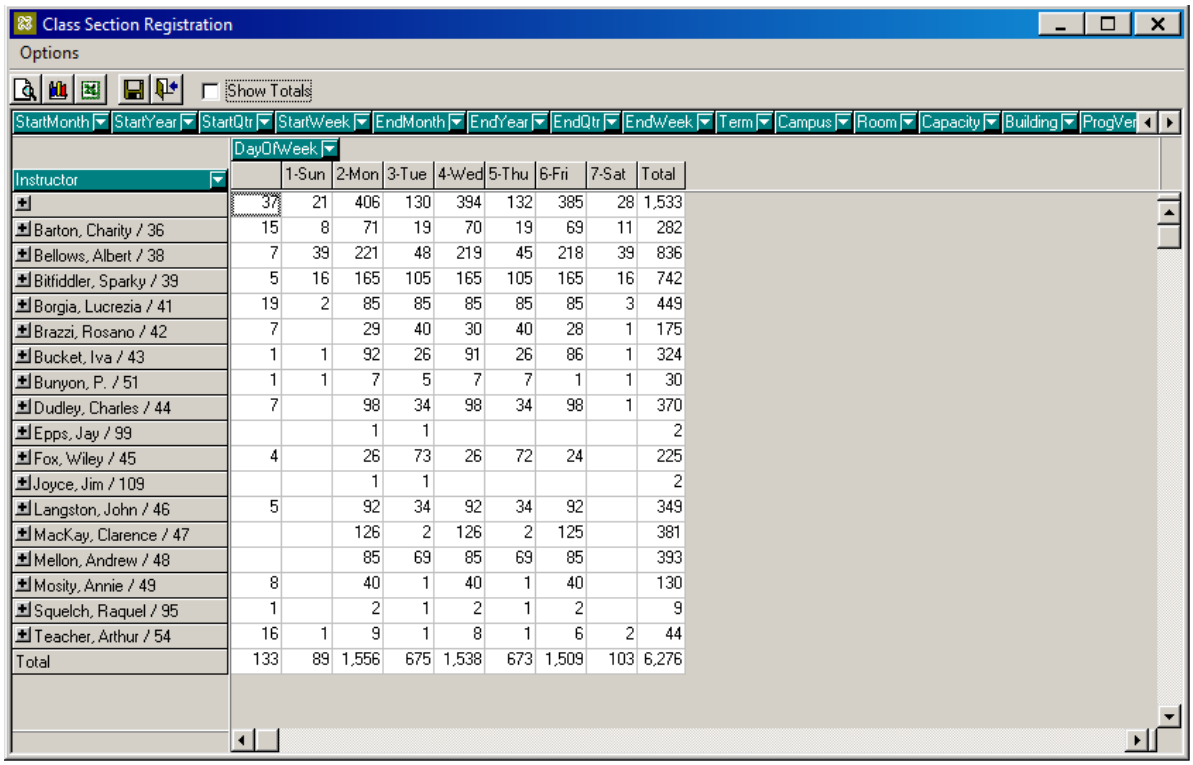
4. Click **Preview**. The cube report is assembled and displayed.

   The following variables are available for use in this cube report:

   - Campus
   - Building
   - Room
   - Room Capacity
   - Day of the Week
   - Period
   - Course/Section
   - Course Hours

- Program Version Code
- Program Version Description
- Instructor Name
- Student Name
- Term
- Start Year
- Start Quarter
- Start Month
- Start Week
- End Year
- End Quarter
- End Month
- End Week

Drag the variables to the vertical or horizontal axes as needed to get the cross-tabulated spreads. The cube is initialized with Instructor as the Y axis (rows) and Day of the Week as the X axis (columns).



Instructor	1-Sun	2-Mon	3-Tue	4-Wed	5-Thu	6-Fri	7-Sat	Total
	37	21	406	130	394	132	385	28	1,533
Barton, Charity / 36	15	8	71	19	70	19	69	11	282
Bellows, Albert / 38	7	39	221	48	219	45	218	39	836
Bitfiddler, Sparky / 39	5	16	165	105	165	105	165	16	742
Borgia, Lucrezia / 41	19	2	85	85	85	85	85	3	449
Brazzi, Rosano / 42	7		29	40	30	40	28	1	175
Bucket, Iva / 43	1	1	92	26	91	26	86	1	324
Bunyon, P. / 51	1	1	7	5	7	7	1	1	30

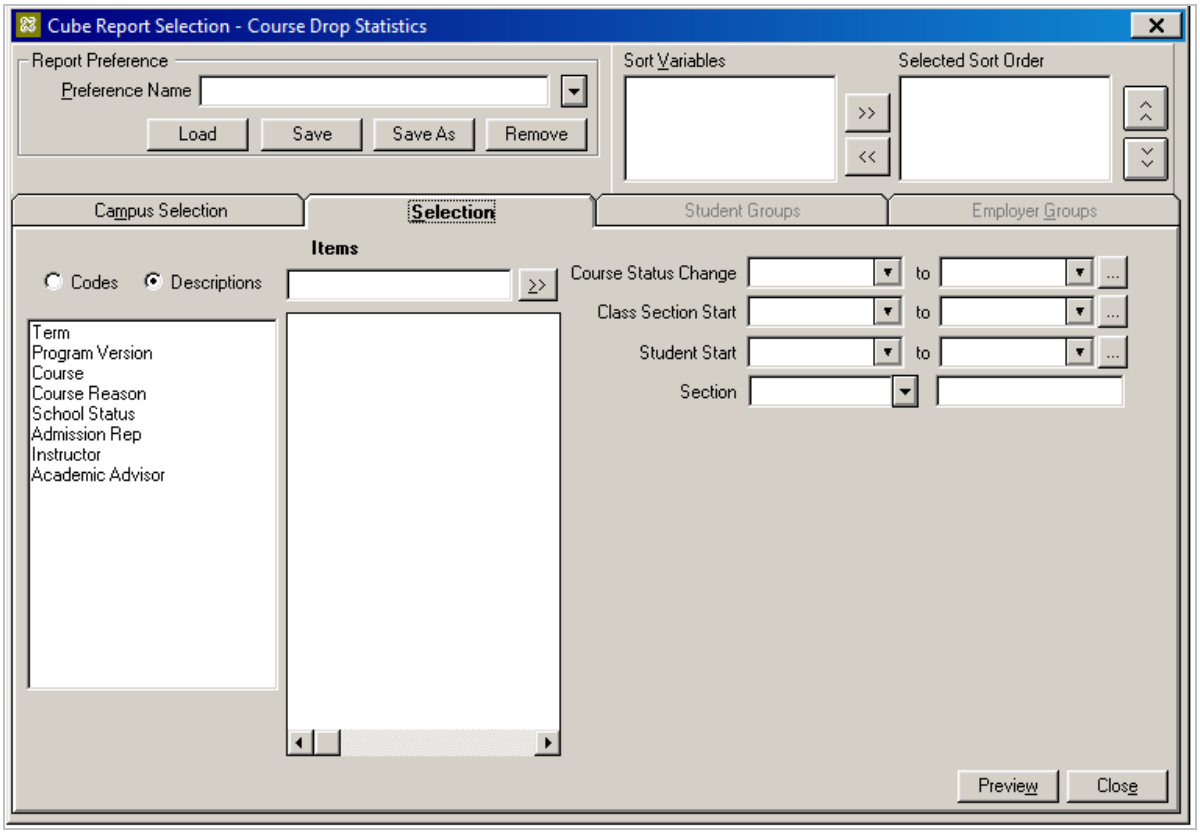
Total	133	89	1,556	675	1,538	673	1,509	103	6,276

Course Drop Statistics

This cube report helps you analyze course drop statistics.

To run the report:

1. Navigate to **Reports > Academic Records > Course Drop Statistics**. The Cube Report Selection: Course Drop Statistics form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



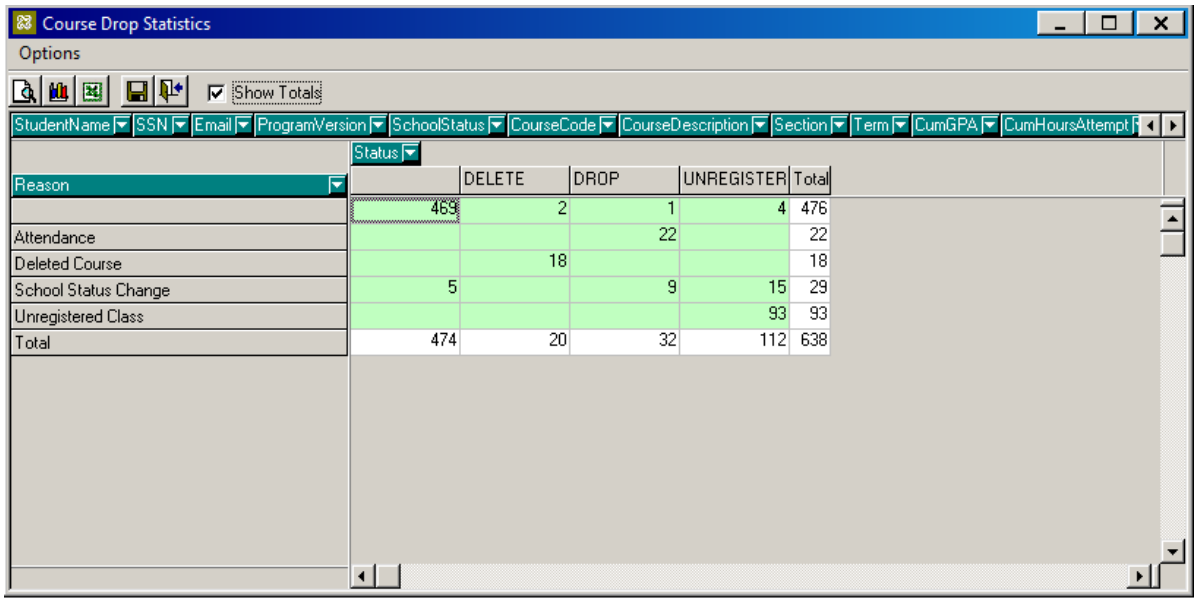
4. Click **Preview**. The cube report is assembled and displayed.

   The following variables are available for use in this cube report:

   - Student Name
   - SSN
   - Email
   - Program Version
   - School Status
   - Course Code
   - Course Description
   - Section
   - Term
   - Cumulative GPA

- Cumulative Hours Attempted
- Cumulative Hours Earned
- Campus
- Academic Advisor
- Instructor
- Admissions Representative
- Course Status Change Date
- Student Start
- Class Section Start
- Reason
- Status

Drag the variables to the vertical or horizontal axes as needed to get the cross-tabulated spreads. The cube is initialized with Reason as the Y axis (rows) and Status as the X axis (columns).

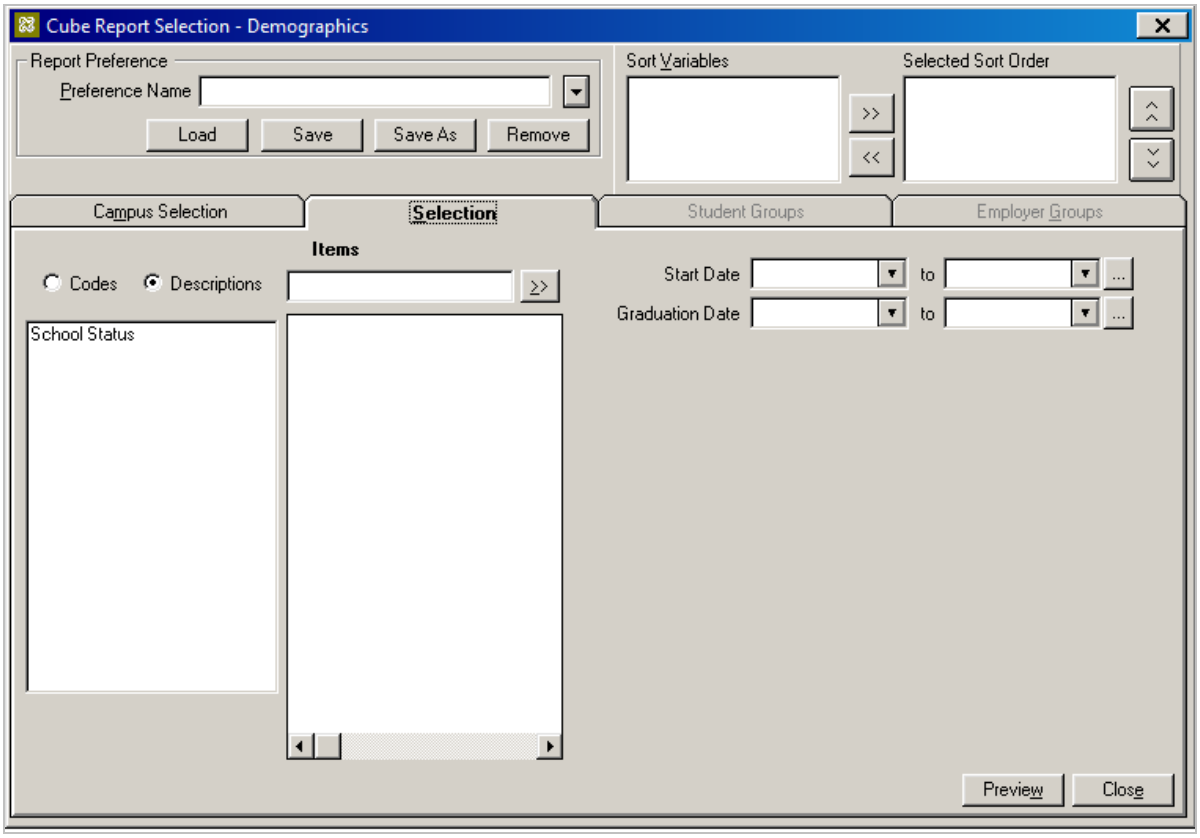


Demographics

This cube report helps you analyze student demographics in your school.

To run the report:

1. Navigate to **Reports > Academic Records > Demographics**. The Cube Report Selection: Demographics form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



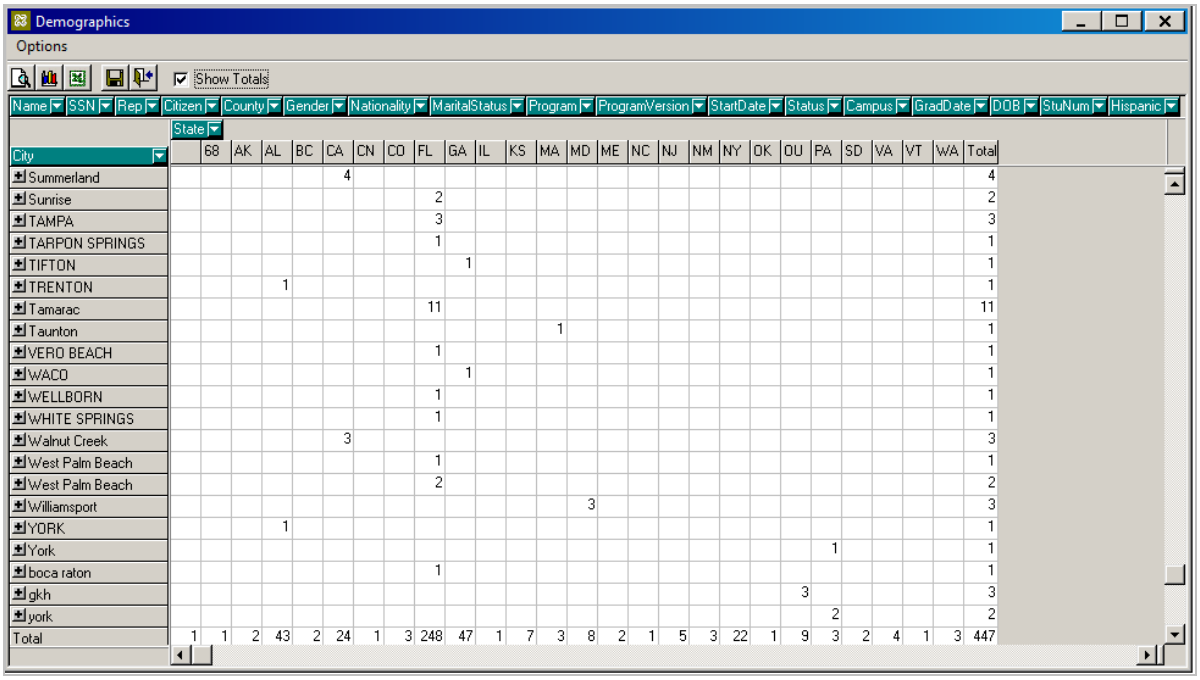
4. Click **Preview**. The cube report is assembled and displayed.

   The following variables are available for use in this cube report:

   - Name
   - Social Security Number (SSN)
   - Admissions Rep
   - Citizenship Status
   - County
   - Gender
   - Nationality
   - Marital Status
   - Program
   - Program Version

- Start Date
- Status
- Campus
- Graduation Date
- Date of Birth (DOB)
- Student ID Number
- Ethnicity
- City
- State

Drag the variables to the vertical or horizontal axes as needed to get the cross-tabulated spreads. The cube is initialized with City as the Y axis (rows) and State as the X axis (columns).



Future Course Seat Requirements

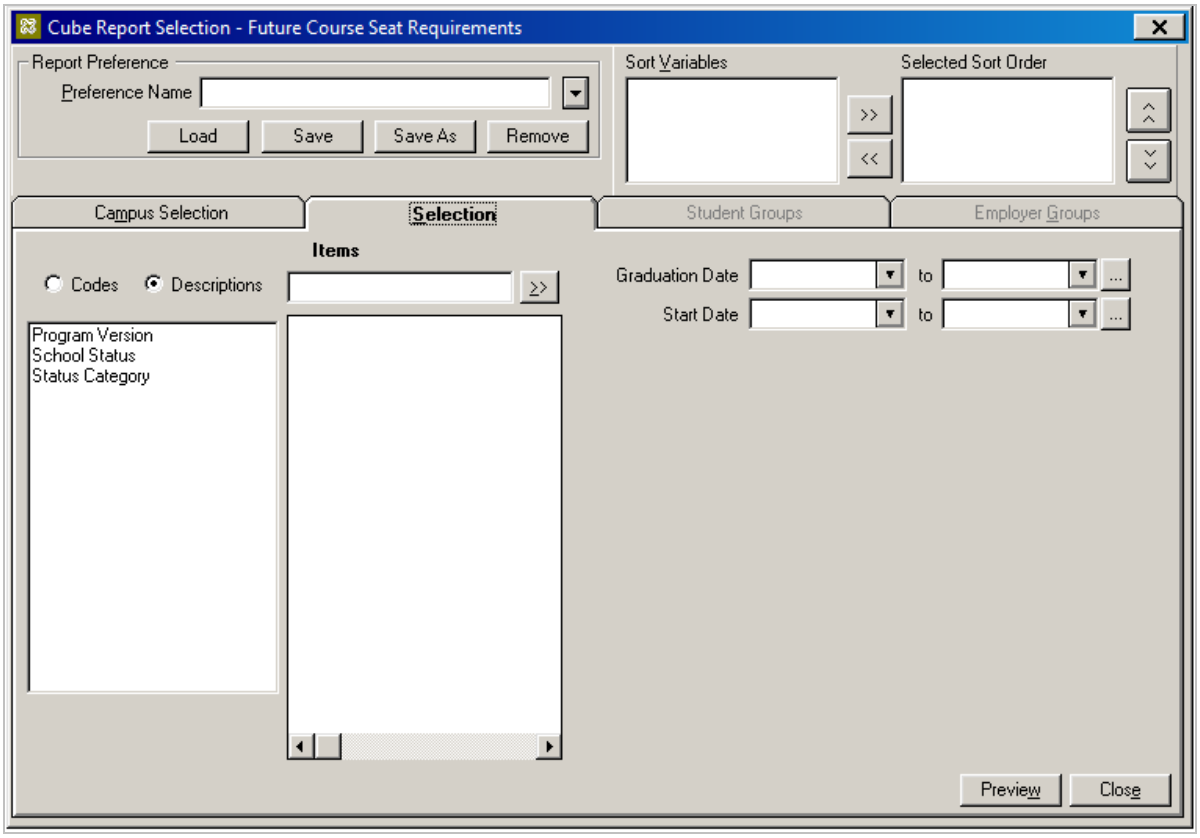
This cube report allows you to see the number of students that need to take specific courses before the given graduation date. The report helps to plan future class schedules.

The report displays the number of students with a "future" class record for any course that meets the selection criteria, grouped by graduation date. The view gathers only students in a status category of:

- E - Enrollment
- A - Active
- T - Temporary Out

To run the report:

1. Navigate to **Reports > Academic Records > Future Course Seat Requirements**. The Cube Report Selection: Future Course Seat Requirements form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



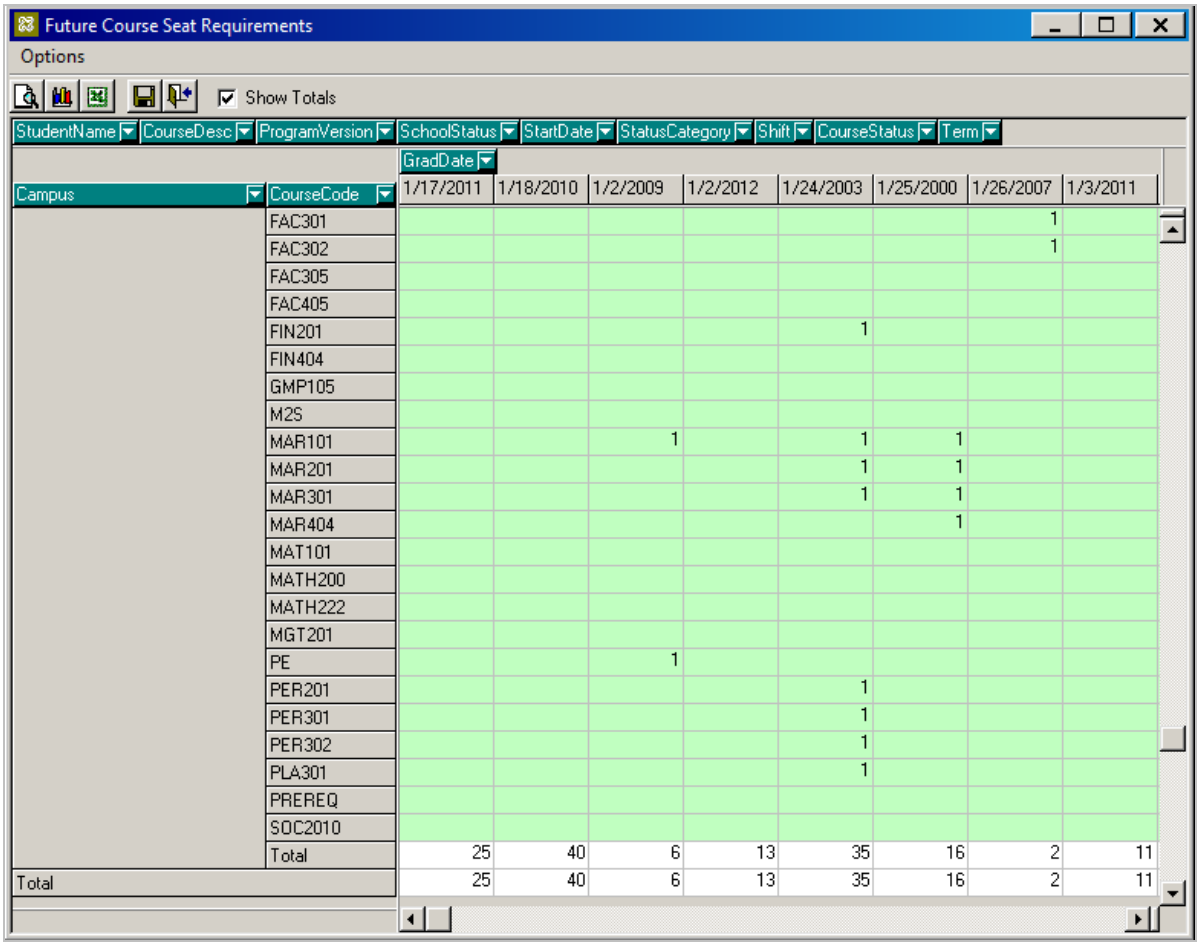
4. Click **Preview**. The cube report is assembled and displayed.

   The following variables are available for use in this cube report:

   - Student Name
   - Course Description
   - Program Version

- School Status
- Start Date
- Status Category
- Shift
- Course Status
- Term
- Graduation Date
- Campus
- Course Code

Drag the variables to the vertical or horizontal axes as needed to get the cross-tabulated spreads. The cube is initialized with Campus and Course Code as the Y axis (rows) and Graduation Date as the X axis (columns).

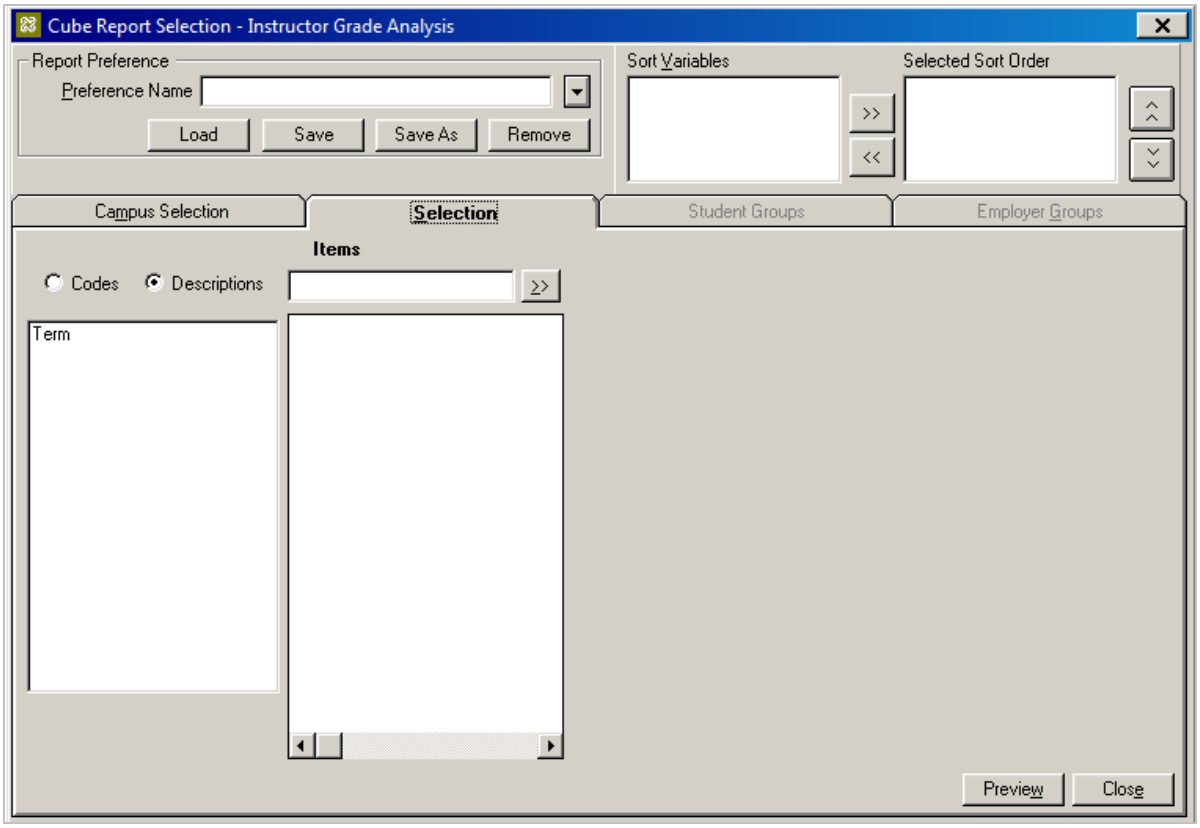


Instructor Grade Analysis

This cube report can be used to evaluate the grading patterns of your instructors.

To run the report:

1. Navigate to **Reports > Academic Records > Instructor Grade Analysis**. The Cube Report Selection: Instructor Grade Analysis form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

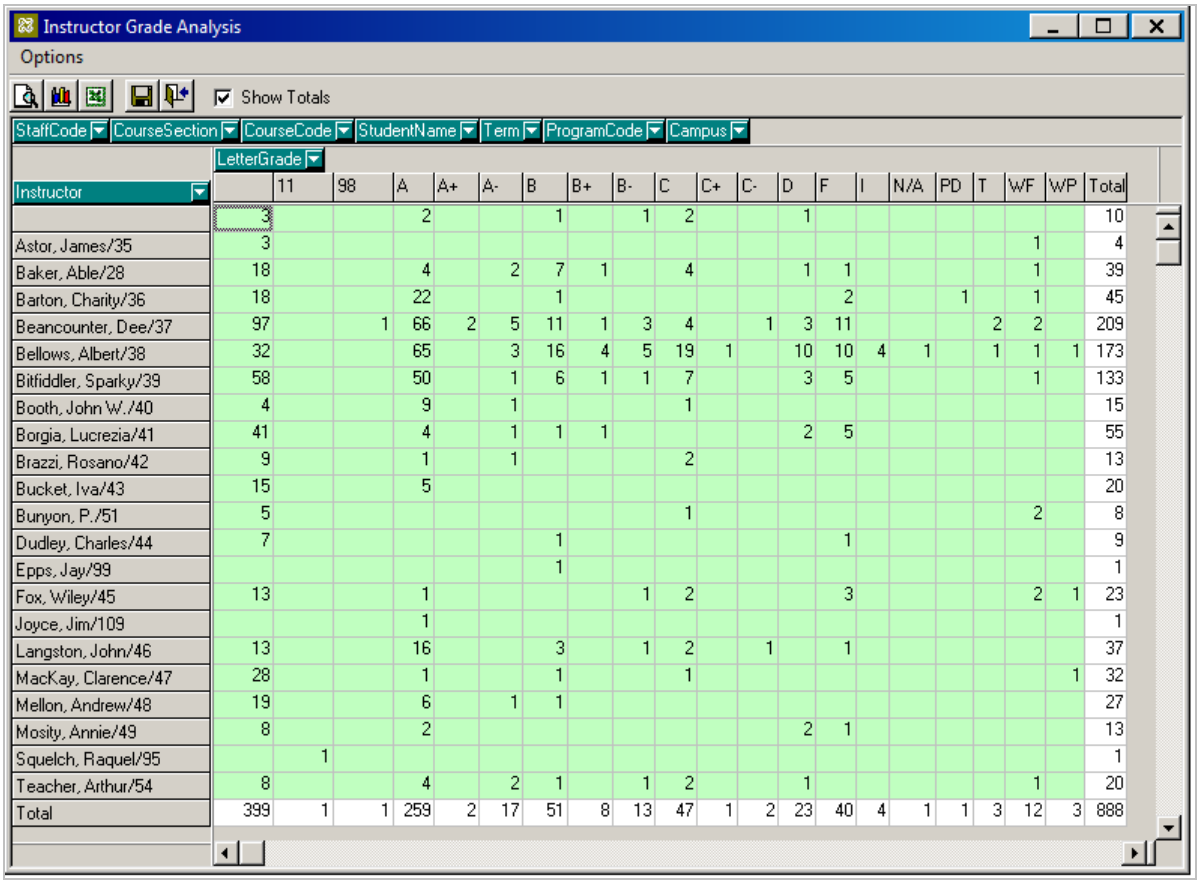


4. Click **Preview**. The cube report is assembled and displayed.

   The following variables are available for use in this cube report:

   - Staff Code
   - Course Section
   - Course Code
   - Student Name
   - Term
   - Program Code
   - Campus
   - Instructor Name
   - Letter Grade

The cube is initialized with Instructor as the Y axis (rows) and Letter Grade as the X axis (columns).



Term Enrollment Summary

The Registrar and Finance departments generate the Term Enrollment Summary Cube Report upon matriculation of students each new term. The Registrar uses it to report registration depending on the program version to assist program chairs in the scheduling process.

To run the report:

1. Navigate to **Reports > Academic Records > Term Enrollment Summary**. The Cube Report Selection: Term Enrollment Summary form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

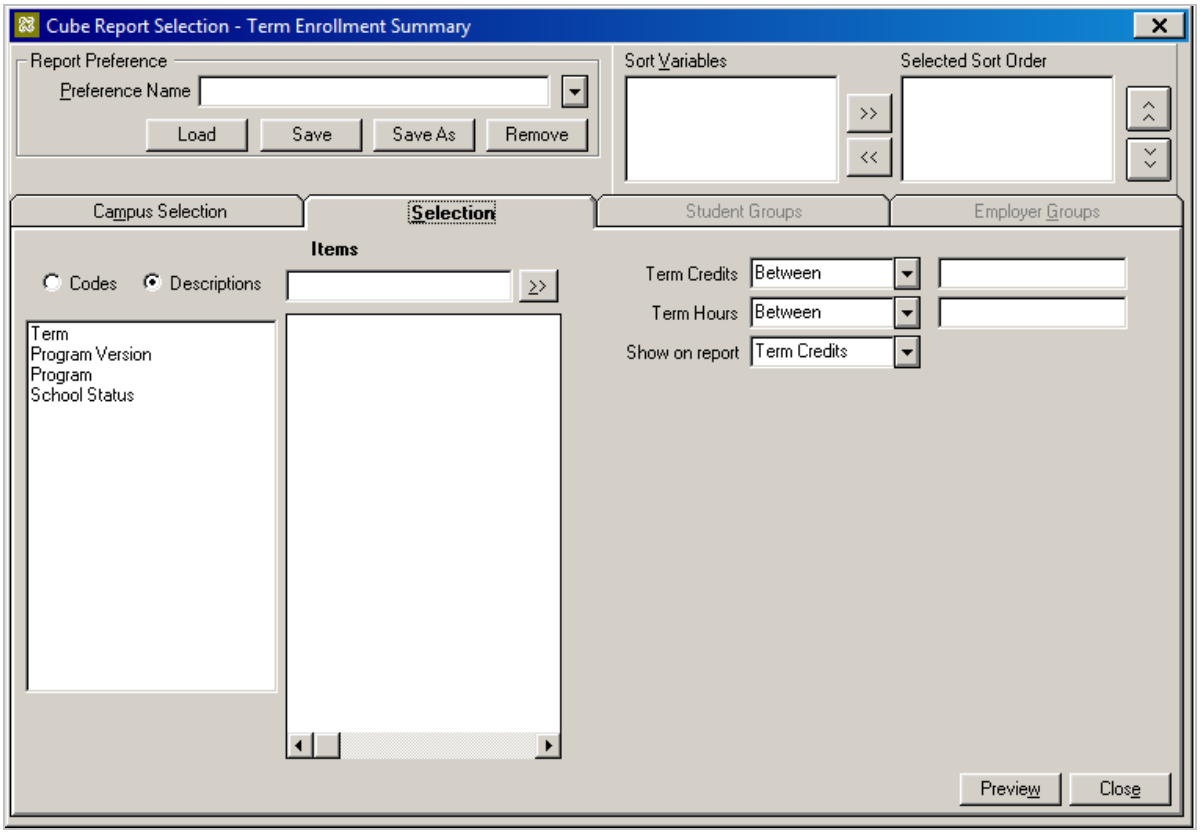
   Notes:

   You can query by Term Credit ranges and/or Term Hours ranges. Use a semi-colon (;) to separate the beginning value and ending value of the ranges. The system matches the student's total number of credits/hours if you enter values in the term credit/hours range fields.

   If no term credits/hours range is entered, the report defaults to the number of credits in each Term selected.

   The 'Show on Report' drop-down allows you to select only the Term Credit ranges, Term Hours ranges, or both.

   The report displays all terms when you select Program/Program Version or School Status as the selection criteria.

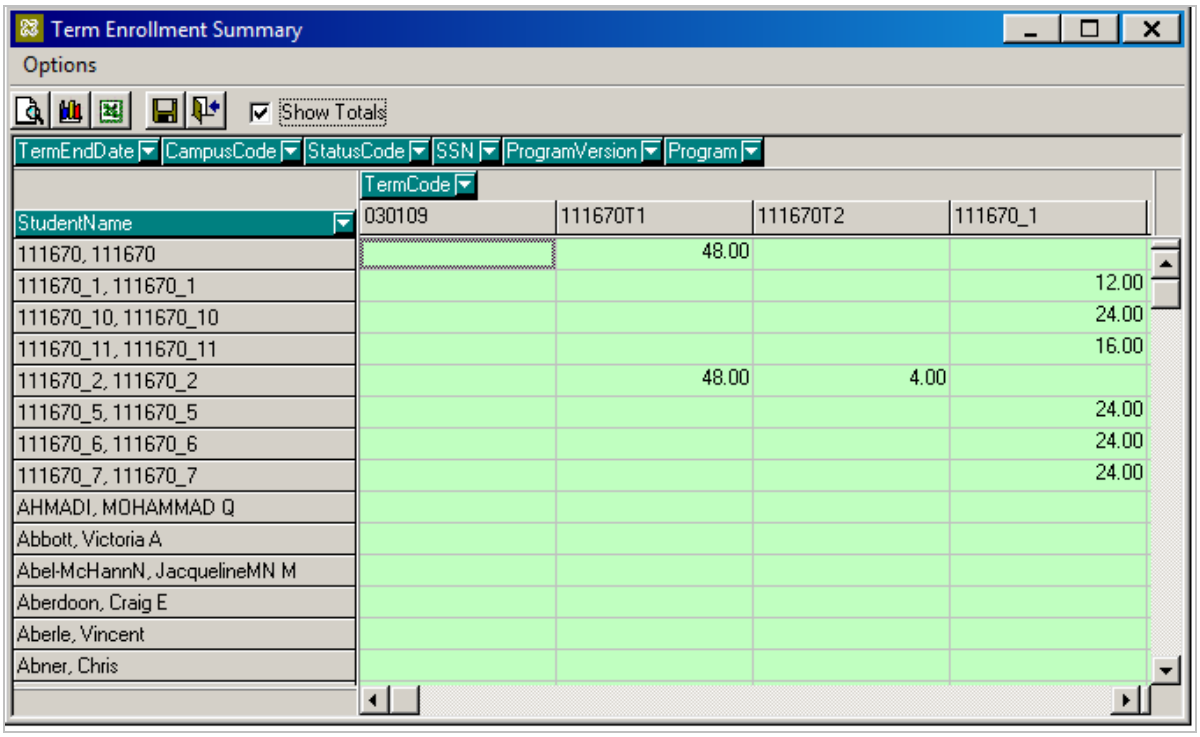


4. Click **Preview**. The cube report is assembled and displayed.

The following variables are available for use in this cube report:

- Term End Date
- Campus Code
- Status Code
- SSN
- Program Version
- Program
- Term Code
- Student Name

Drag the variables to the vertical or horizontal axes as needed to get the cross-tabulated spreads. The cube is initialized with Student Name as the Y axis (rows) and Term Code as the X axis (columns).



Distance Education Reports

Navigate to **Reports > Distance Education** to access the following Distance Education reports:

- Class Status Summary by Course
- Class Status Summary by Instructor
- College Student Roster
- Course Lesson Log
- Extensions Report
- High School Student Roster
- Instructors Payment History
- Lesson Tracking
- Registration by Student
- Student Balance/Course Status

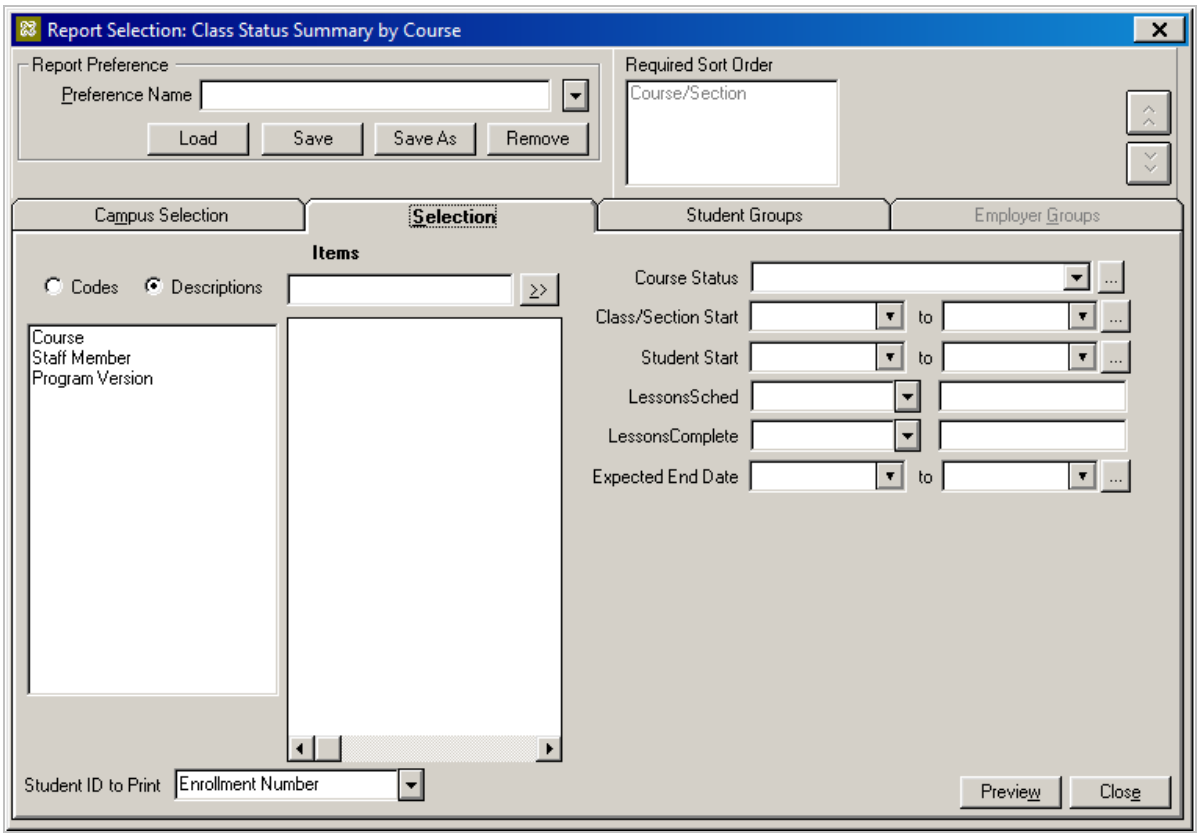
Note: The System Administrator must set up security rights to view, print, or export reports. Staff members and staff groups must be given security rights to view, print, and/or export reports. This does not apply to custom reports.

Class Status Summary by Course

This report lists students within courses/class sections and the number of lessons completed compared to the number of lessons required. The report is sorted by courses/class sections.

To run the report:

1. Navigate to **Reports > Distance Education > Class Status Summary by Course**. The Report Selection: Class Status Summary by Course form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

The report has page breaks for every course (class section).

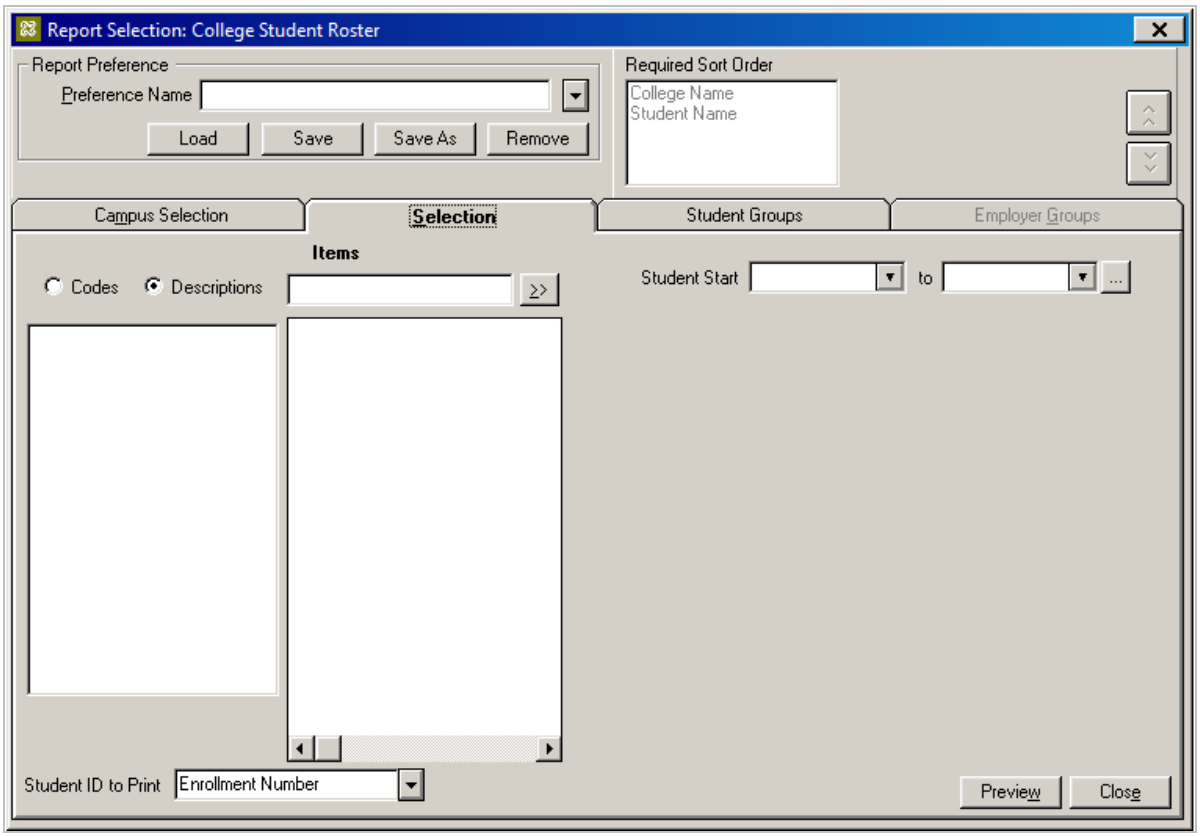
College Student Roster

This report lists Distance Education students who are also students in a college. The report does not represent the total number of students from each college nor the total number of college students enrolled in distance education programs.

To run the report:

1. Navigate to **Reports > Distance Education > College Student Roster**. The Report Selection: College Student Roster form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report shows one detail line for each student registration in a class section. Therefore, a student may be coun-

ted several times in the report.

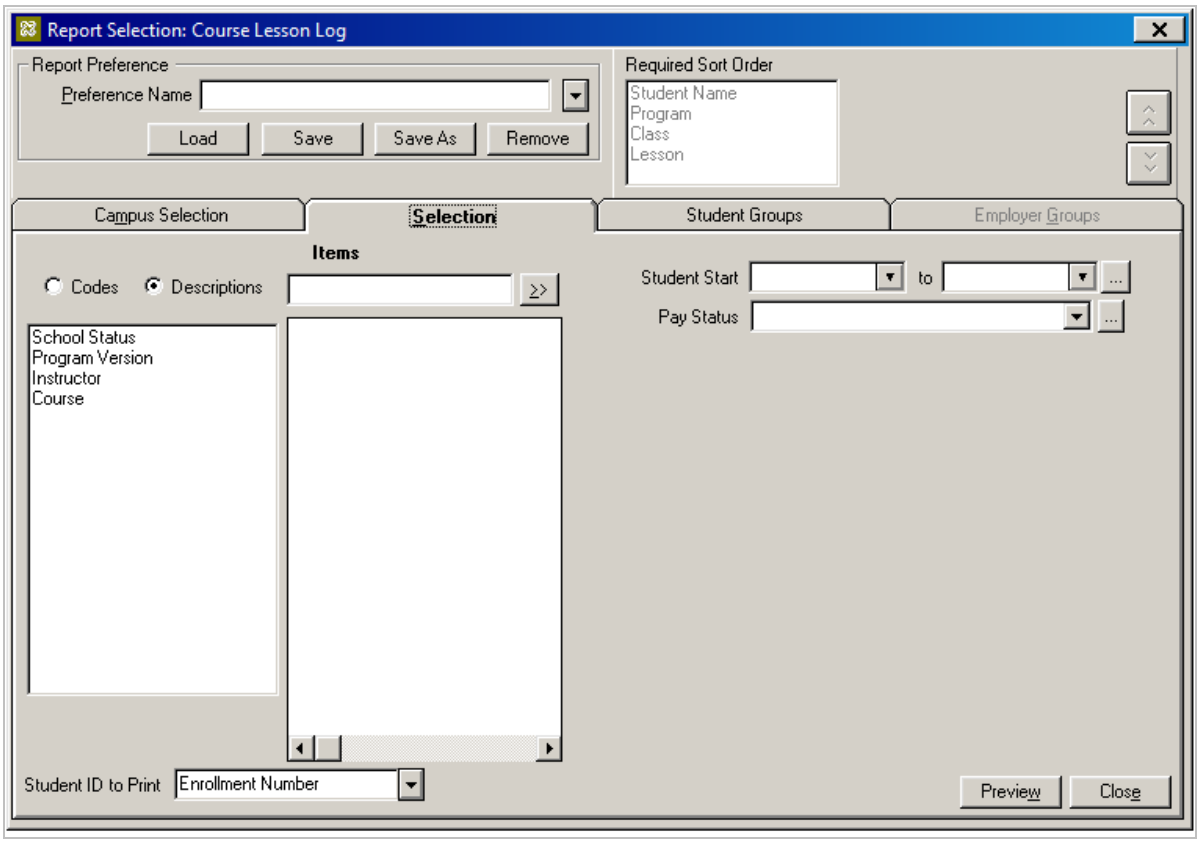
Course Lesson Log

This report tracks lesson activity primarily between the instructor and the school administration but does include tracking of tests between the school and the student's proctor.

To run the report:

1. Navigate to **Reports > Distance Education > Course Lesson Log**. The Report Selection: Course Lesson Log form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays a detail line for each lesson.

Page breaks occur on change of instructor, student enrollment, or course (class section).

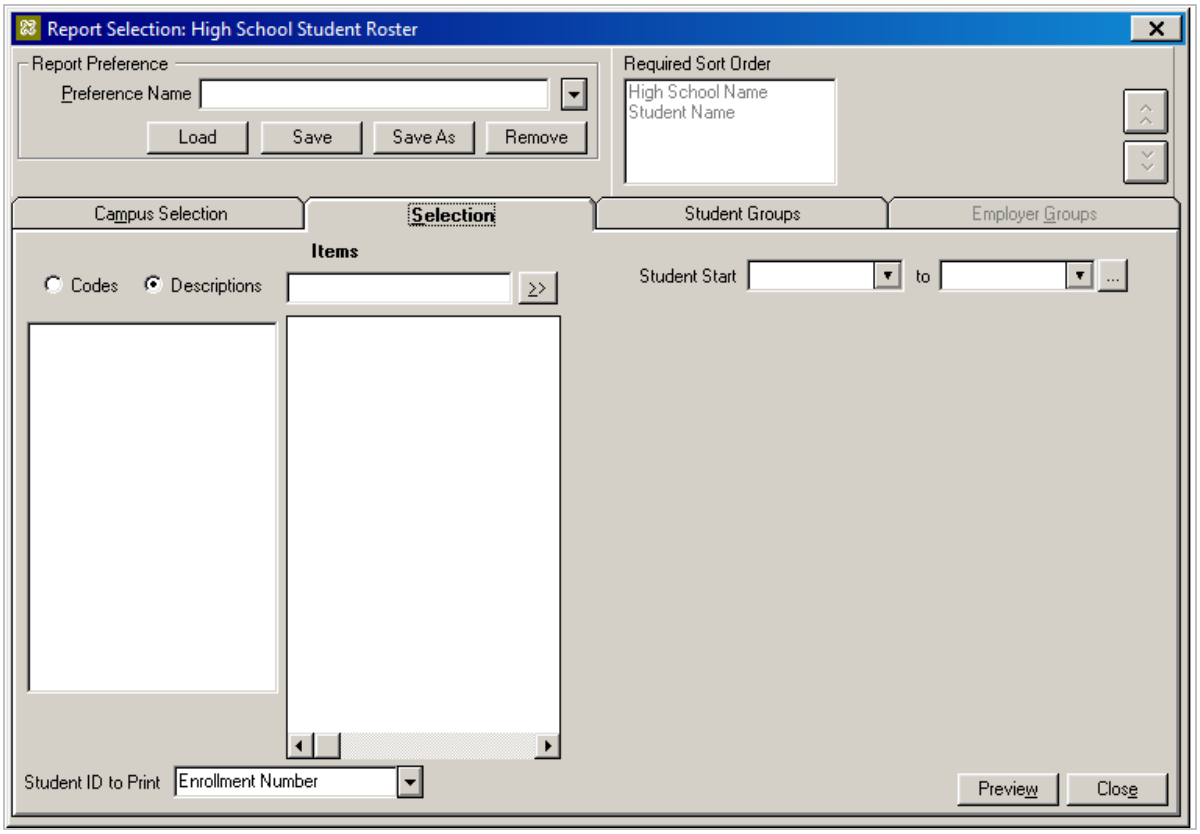
High School Student Roster

This report is a list of Distance Education students who are also students in a high school. The report does not represent the total number of students from each high school nor the total number of high school students enrolled in distance education programs. The report is grouped by student so that the students' names appear only once.

To run the report:

1. Navigate to **Reports > Distance Education > High School Student Roster**. The Report Selection: High School Student Roster form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.
5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

The report shows one detail line for each student registration in a course/class section.

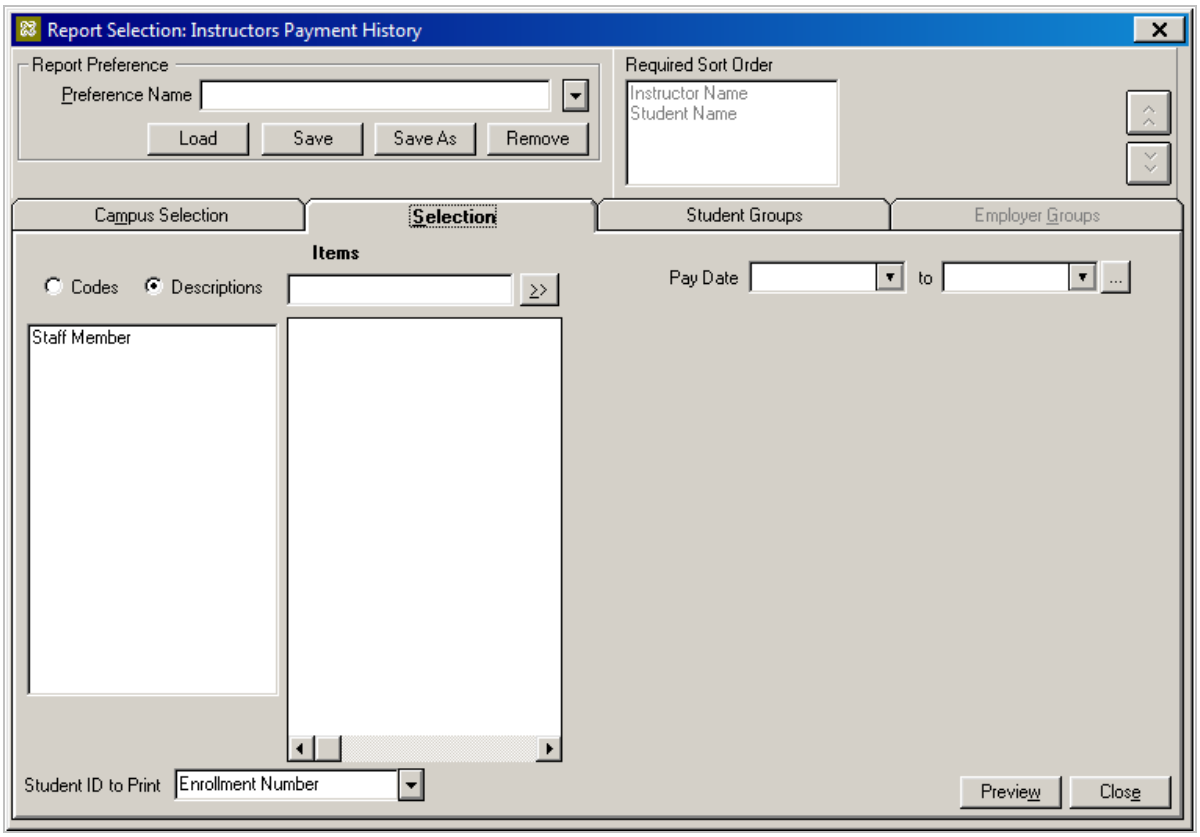
Instructors Payment History

This report lists payments paid to instructors by date by instructor. Payment data is for distance education activity including grading of lessons and exams, courses, and course revisions.

Payments depend on Distance Education Setup for payment schedules per instructor, course, lesson, exam, and bonuses for prompt responses. Payments for course revisions are recorded on a case by case basis.

To run the report:

1. Navigate to **Reports > Distance Education > Instructors Payment History**. The Report Selection: Instructors Payment History form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

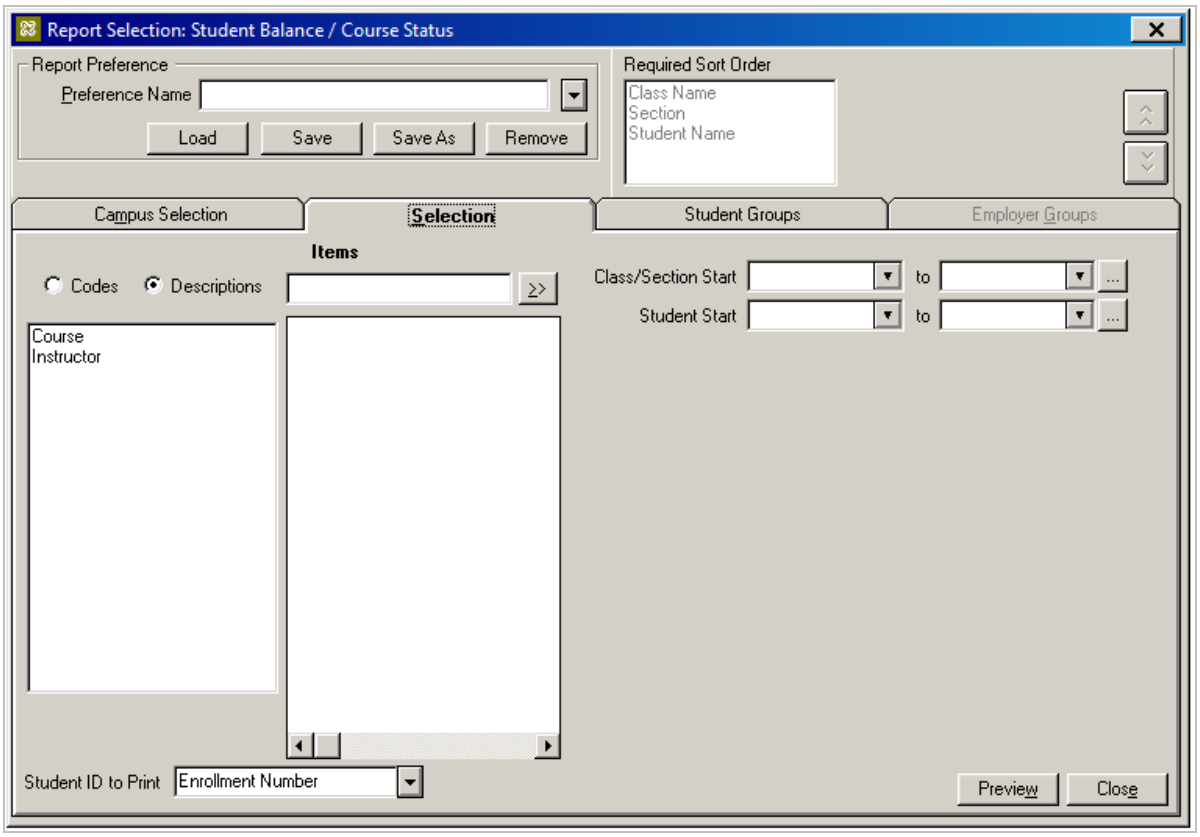
Student Balance / Course Status

This report lists the students' balance for each class/section.

Note: The number of lessons for a given course can vary by class section. Also, the term "lessons" in the context of this report encompasses lessons, exams, and book reports. The lesson/exam/book report plan for a class section is determined under Daily > Academic Records > Class Scheduling.

To run the report:

1. Navigate to **Reports > Distance Education > Student Balance / Course Status**. The Report Selection: Student Balance / Course Status form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

Job Conversion Rate

This report lists information about the conversion rate of job listings in placements. The report displays the number of job listings that were entered within the selected date range and how many of these job listings have been closed (a student was placed into the job), canceled, or unable to fill.

For each job listing entered into the system, the user can assign it to a specific industry, category, or program. The report displays the number of new job listings entered and the corresponding placements by campus, industry, and category. It also displays the average length of time to close listings for each category.

To run the report:

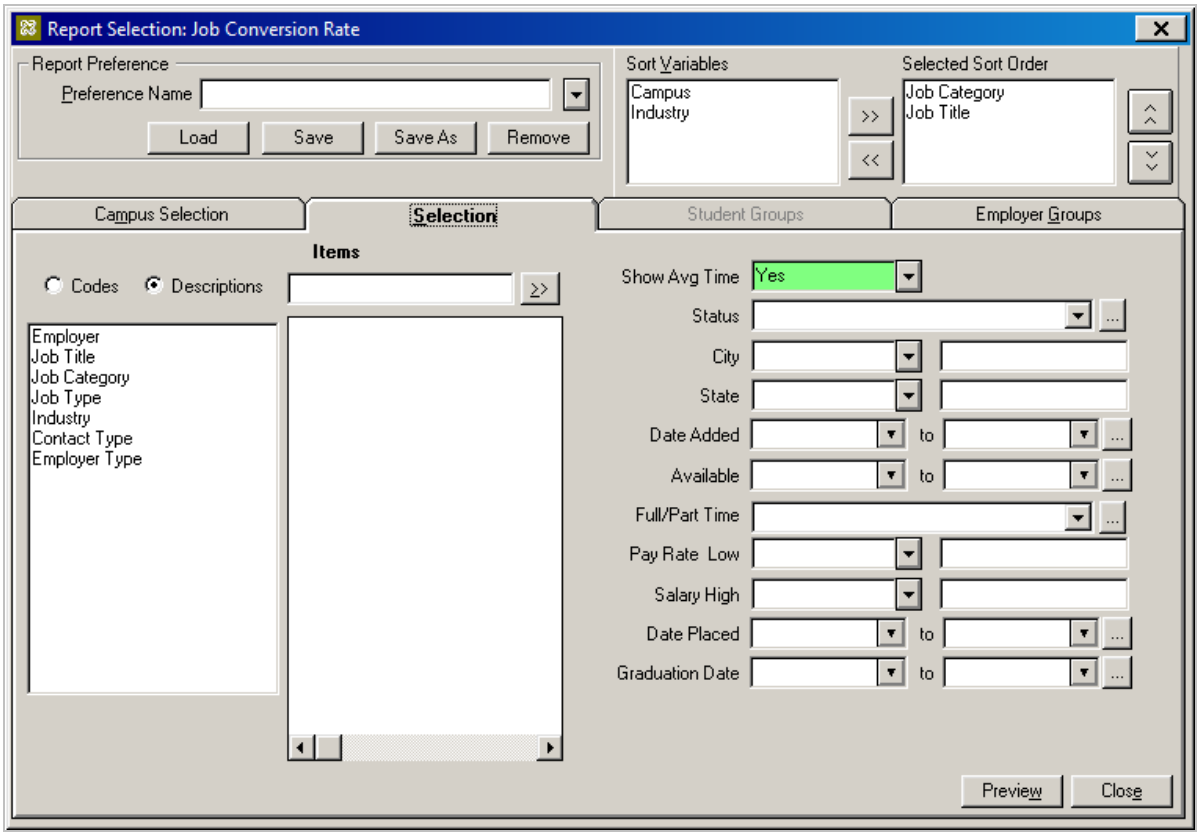
1. Navigate to **Reports > Career Services > Job Conversion Rate**. The Report Selection: Job Conversion Rate form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note:

   You can select to include the average length of time it took to close the listings. If you include the time, an Average Time appears on the sort sub totals line of the report.

   The average time is calculated differently based upon what the outcome of the job was.

   - If the student was placed (job status = filled), then the average time is based on the low availability date, to the date that the student was placed in the job.
   - If the job was closed (status = closed or unable to fill) and no placements have been made, the average time is based on the low availability date to the high availability date.



4. Optional: You can also use the **Employer Groups** tab to filter the report data.

   Note: If you filter data by Employer Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Company
   - Job Title
   - Exact Job Title
   - Job Description
   - Employer Code
   - Contact
   - Job ID
   - Schedule

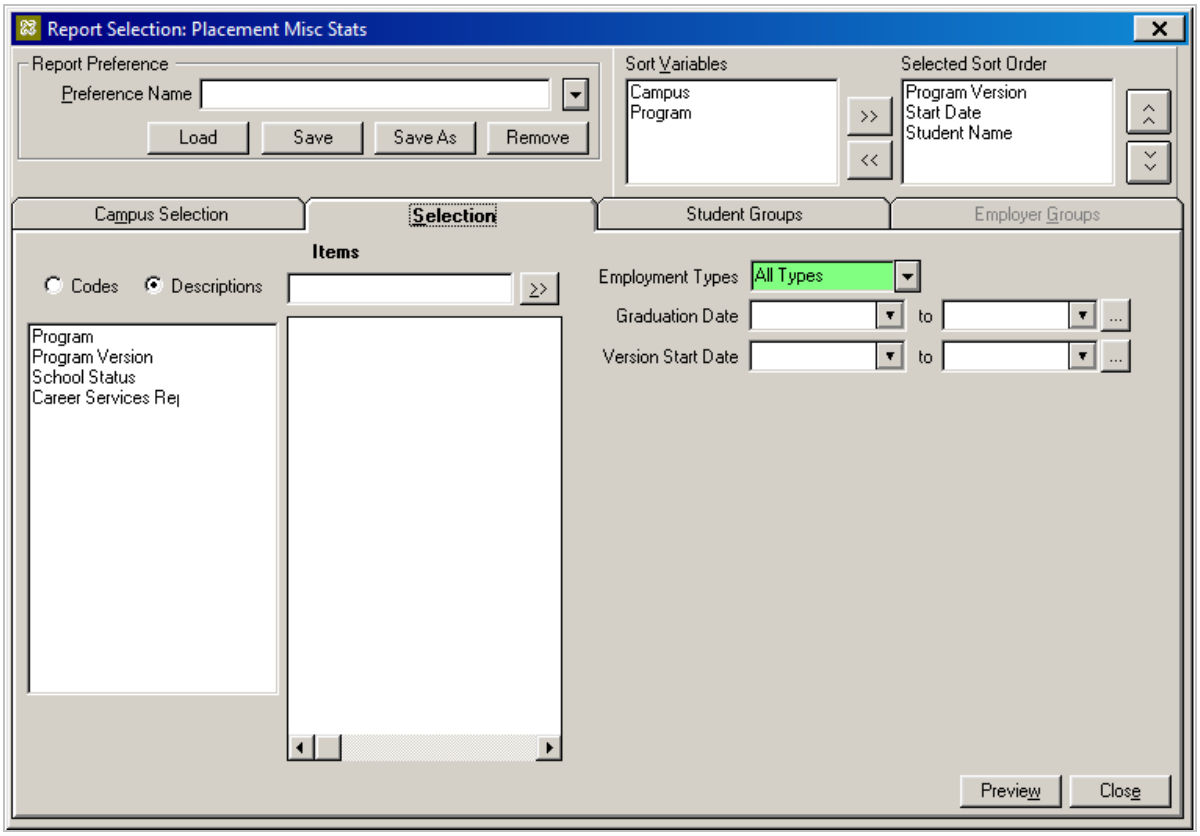
Placement Misc Stats

This report is a summary of placement activity at your school. The report excludes Cancels and Drops.

To run the report:

1. Navigate to **Reports > Career Services > Placement Misc Stats**. The Report Selection: Placement Misc Stats form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: If you filter the report on Program or Program Version, Program and Program Version must be included on the sort.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report has a detail row for each program version. For each row on the report, the columns include:

   - Program Version Code
   - Total Placements
   - With Salary Info.
   - Average Hourly Wage

- Average Yearly Salary
- Average Flat Salary
- Average Volunteer Salary
- College Placed
- Self Placed
- Continuing Education
- Full Time
- Part Time

The "V - Volunteer" salary category counts as a placement for a school. The calculation of "Total Placed" remains the same. The calculation of Avg Hr Salary and Avg Yr Salary excludes the students where Salary Category = "V". The student will be counted as a placement; however the salary information may or may not be blank and should not be counted towards the average. Therefore, if there are 10 placements, and two (2) of those are "volunteer", the salary calculation will be an average based on eight (8) placements rather than 10.

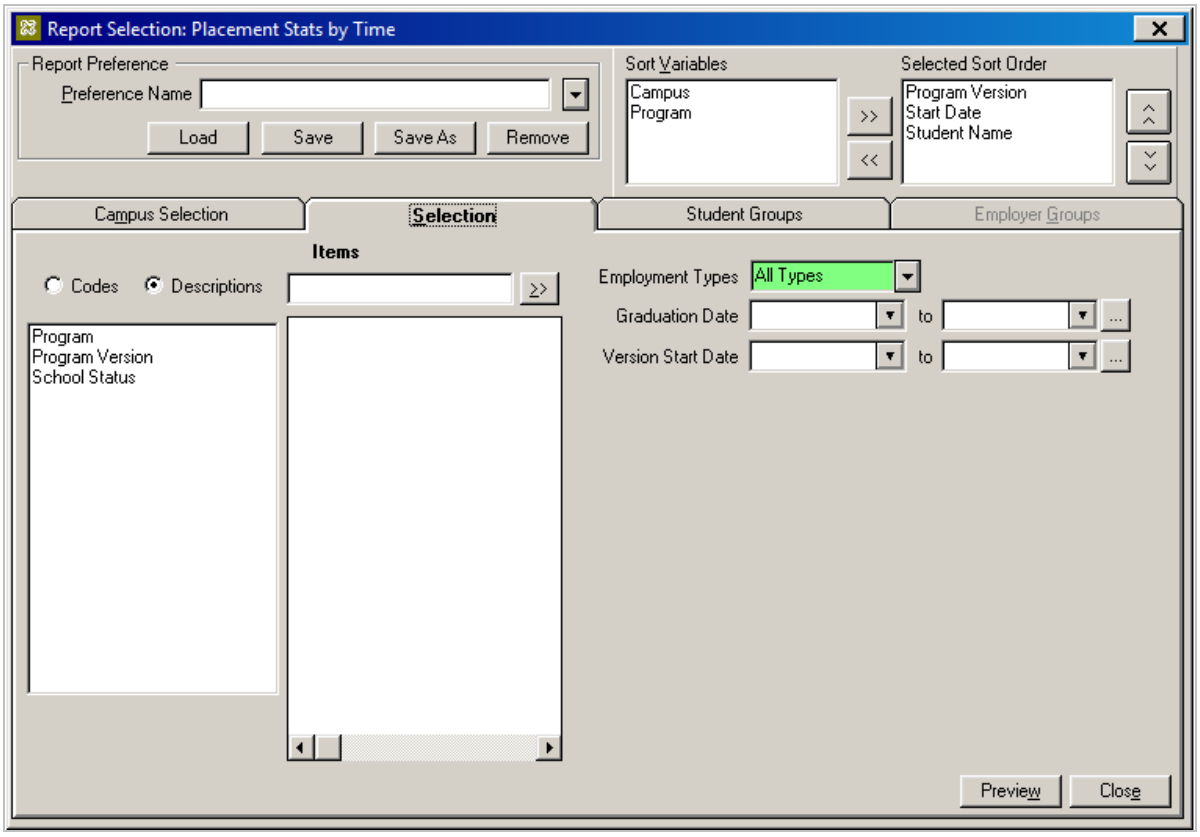
Placement Stats by Time

This report is a summary of placement activity measured in days from graduation to placement. The report excludes Cancels and Drops. The report does not include students where the System Status Code is = "NA" (Not Available).

To run the report:

1. Navigate to **Reports > Career Services > Placement Stats by Time**. The Report Selection: Placement Stats by Time form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: If you filter the report on Program or Program Version, Program and Program Version must be included on the sort.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report has a detail row for each program version. For each row on the report, the columns include:

   - Program Version Code
   - Total Placements
   - Not Yet Placed

- Unknown Number of Days to Placement
- 0 to 30 Days to Placement
- 31 to 60 Days to Placement
- 61 to 90 Days to Placement
- Percentage of Total Placements in the 0 to 30 Range
- Percentage of Total Placements in the 31 to 60 Range
- Percentage of Total Placements in the 61 to 90 Range
- Percentage of Total Placements 91+ Days

Percentages are rounded and presented out to 2 decimal places.

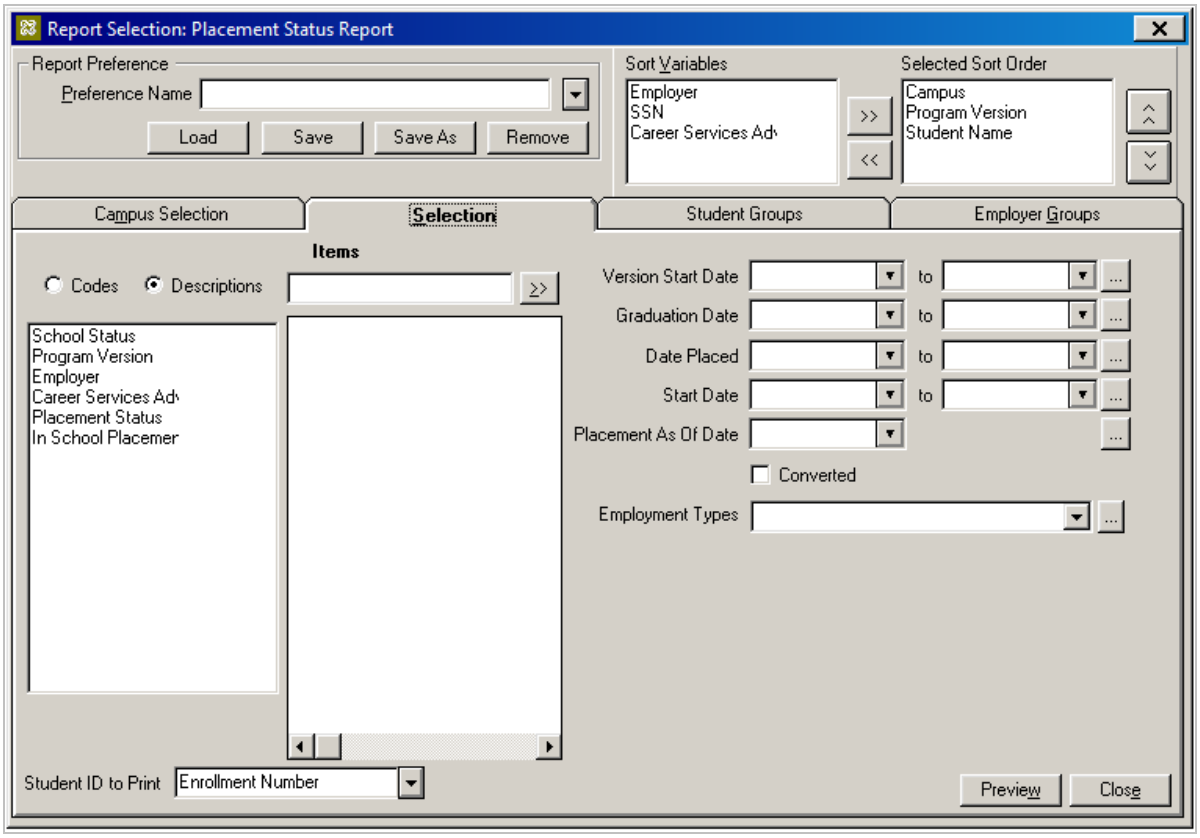
Placement Status Report

This report shows the placement status of students and related employer information.

To run the report:

1. Navigate to **Reports > Career Services > Placement Status Report**. The Report Selection: Placement Status Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter the report data.

   Note: If you filter data by Student Groups, the Selection tab and Employer Groups tab filters do not apply.

5. *Optional*: You can also use the **Employer Groups** tab to filter the report data.

   Note: If you filter data by Employer Groups, the Selection tab and Student Groups tab filters do not apply.

6. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - Student Phone

- Program Version
- Enrollment Status
- Enrollment Start Date
- Graduation Date
- Placement Status
- Career Services Advisor
- Date Placed
- Employment Start Date
- Converted
- Job Title
- Employer

The employer's name, address, and telephone number appear to the right of a student having a status of Placed on this report.

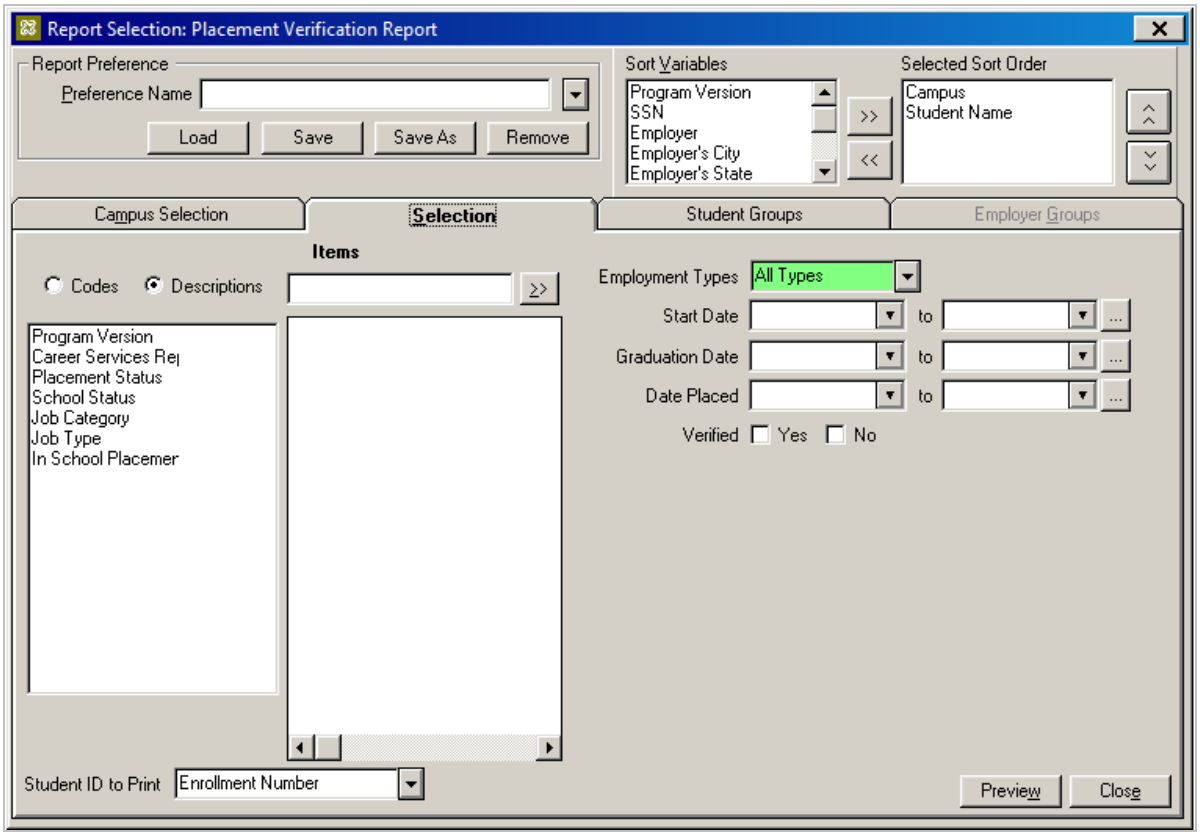
Placement Verification Report

This report can be used as a tool for processing verifications. Using the report selection criteria, you can list a group of students with a column that indicates whether their employment has been verified and use the list of those students who have not been verified as a check list when performing the verifications.

To run the report:

1. Navigate to **Reports > Career Services > Placement Verification Report**. The Report Selection: Placement Verification Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name and ID
   - Job Category
   - Program Version
   - Graduation Date

- Date Placed
- Exact Job Title
- Job Status
- Start Date
- Verified (Yes/No)

Placements Stats by Field of Study

The Placements Stats (Statistics) by Field of Study report is a summary of placement activity at your school. The report excludes Cancels and Drops.

Selection criteria include campus group and student status, program, and program version.

The report is sorted by program or program version. You can enter date ranges for graduation date and program version start date. You can select the Employment Type or types. You must be aware that the report will not function unless both Program and Program Version are in the sort. Simply change the order without removing any sort variable to change the order of the sort.

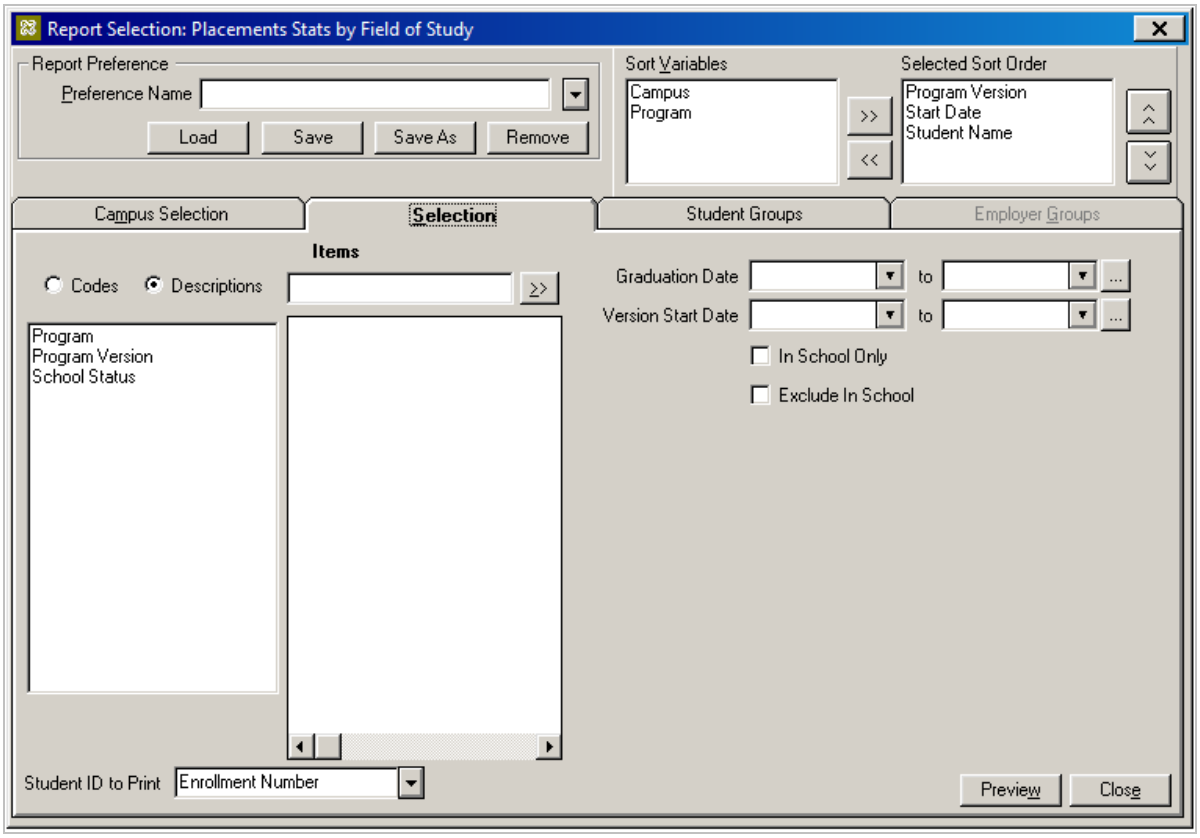
The report has a detail row for each program version. For each row on the report, the columns include program version code, eligible graduates, placed graduates, in field of study, out of field of study, related field of study, percentage of placements in field of study, percentage of placements out of field of study, and percentage of placements in related field of study.

Note: The report includes an option for the Field of Study column. This column reflects the option to show a count of 'placements by attestation' per program version. When Student Attestation is chosen as the option, the placement percentage behaves the same as using "placed in a related field". CampusNexus Student hides the Student Attestation columns in the reports if the data in the reports does not have at least one placement record with the value ‘Student Attestation’ for the In Field of Study field.

To run the report:

1. Navigate to **Reports > Career Services > Placements Stats by Field of Study**. The Report Selection: Placements Stats by Field of Study form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Note: If you filter the report on Program or Program Version, Program and Program Version must be included on the sort.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report has a detail row for each program version. For each row on the report, the columns include:

   - Program Version Code
   - Scheduled Graduates
   - Actual Graduates
   - Exit Interviews
   - Not Available
   - Waived Graduates
   - Eligible Graduates
   - Eligible Graduates Placed
   - Eligible Graduates Not Yet Placed

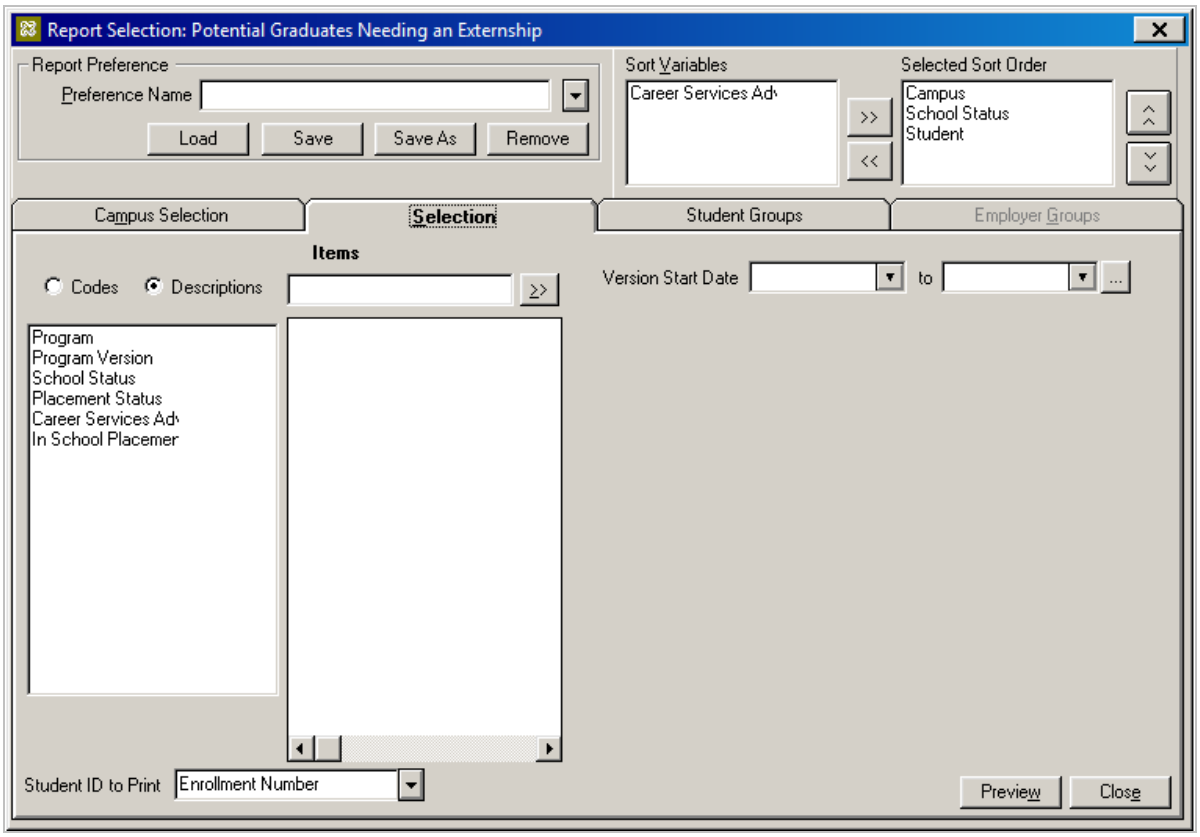
Potential Graduates Needing an Externship

This report lists students who are scheduled for a course that is coded as an externship and are not set up with an employer for the externship.

To run the report:

1. Navigate to **Reports > Career Services > Potential Graduates Needing an Externship**. The Report Selection: Potential Graduates Needing an Externship form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name and ID
   - Externship Needed
   - Graduation Date
   - Program Description

- Credits required, credits, earned, credits taking, total credits, and credits attempted
- GPA

Note: The student's 'Credits Taking' calculation includes only Current courses and not Scheduled courses.

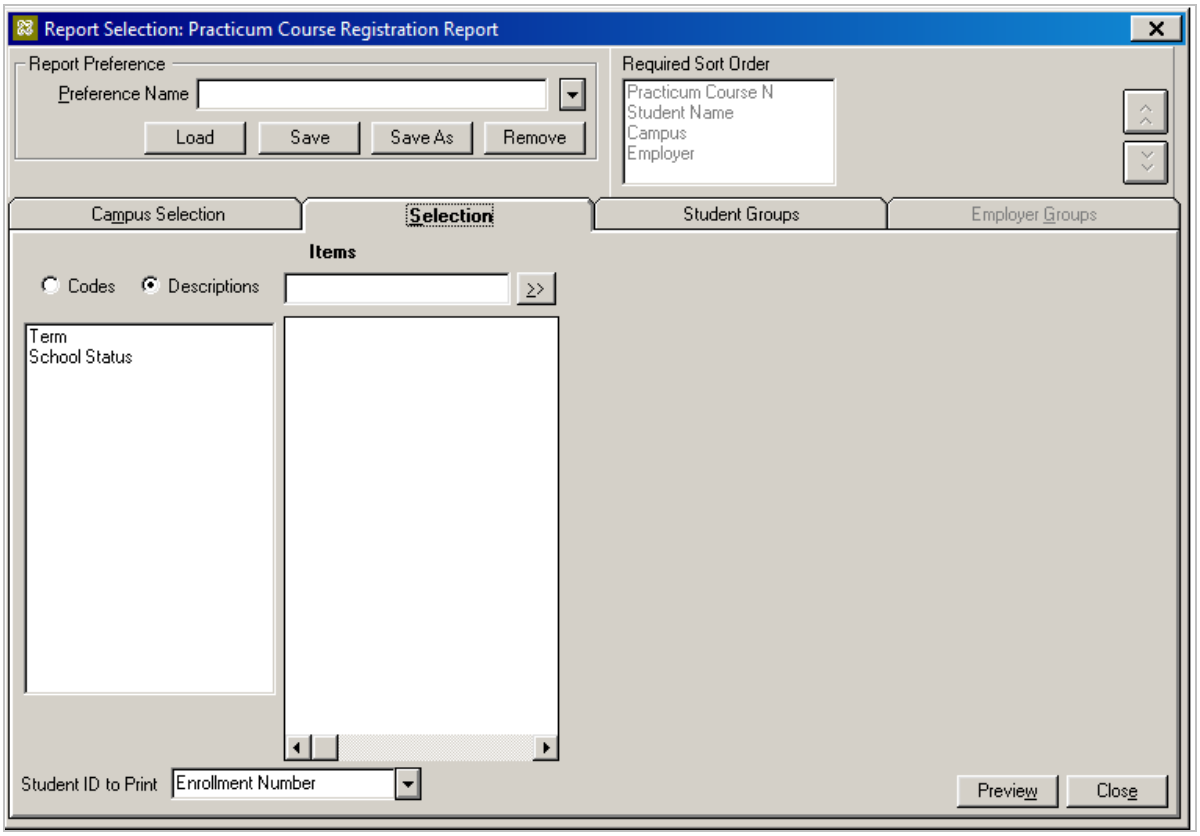
Practicum Course Registration Report

This report lists details regarding practicum course registrations.

To run the report:

1. Navigate to **Reports > Career Services > Practicum Course Registration Report**. The Report Selection: Practicum Course Registration Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

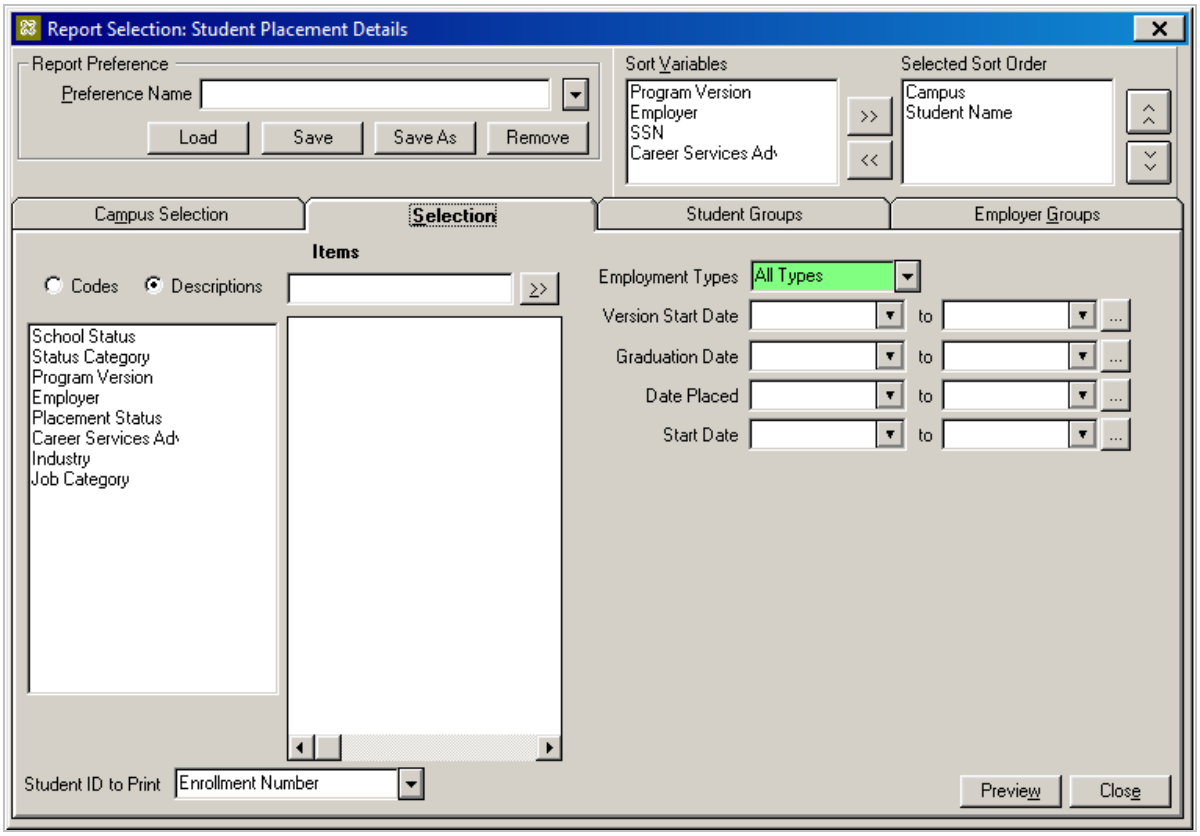
   - Practicum
   - Course Name
   - Student Name
   - Campus
   - Employer

Student Placement Details

This report provides placement details for an individual student.

To run the report:

1. Navigate to **Reports > Career Services > Student Placement Details**. The Report Selection: Student Placement Details form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter the report data.

   Note: If you filter data by Student Groups, the Selection tab and Employer Groups tab filters do not apply.

5. *Optional*: You can also use the **Employer Groups** tab to filter the report data.

   Note: If you filter data by Employer Groups, the Selection tab and Student Groups tab filters do not apply.

6. Click **Preview**. The report is assembled and displayed in the Report Viewer.

Cube Report Placement Stats

This cube report allows you to analyze placement statistics. You can select the Employment Type or types.

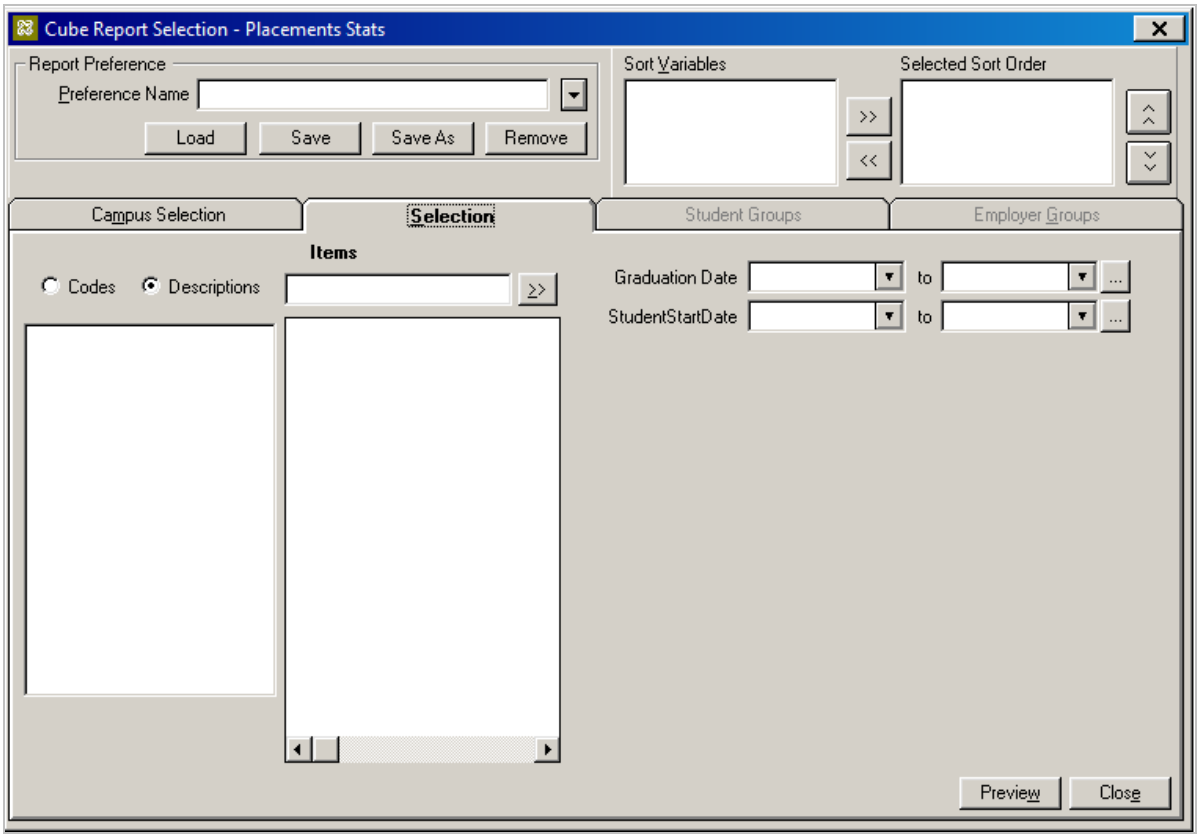
To run the report:

1. Navigate to **Reports > Career Services > Placement Stats** (Cube Report). The Cube Report Selection: Placement Stats form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Notes:

   Graduation Date range and Student Start Date range are available on the report selection form.

   - If you enter a Graduation Date range, the program will gather all rows from the enrollment table where the graduation date is within your entered date range and the Status Category is "P - Placement".
   - If you enter a Student Start Sate range, the program will gather all rows from the enrollment table where the start date is within your entered date range and the status category is "P - Placement".



4. Click **Preview**. The cube report is assembled and displayed.

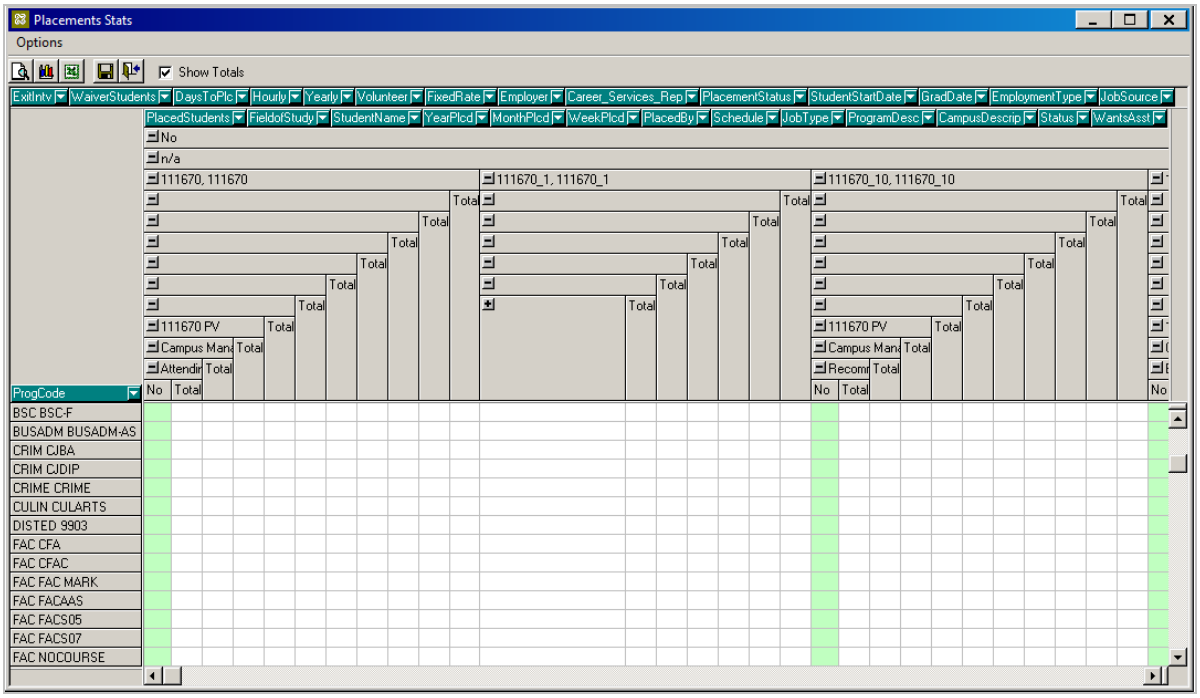
   The following variables are available for use in this cube report:

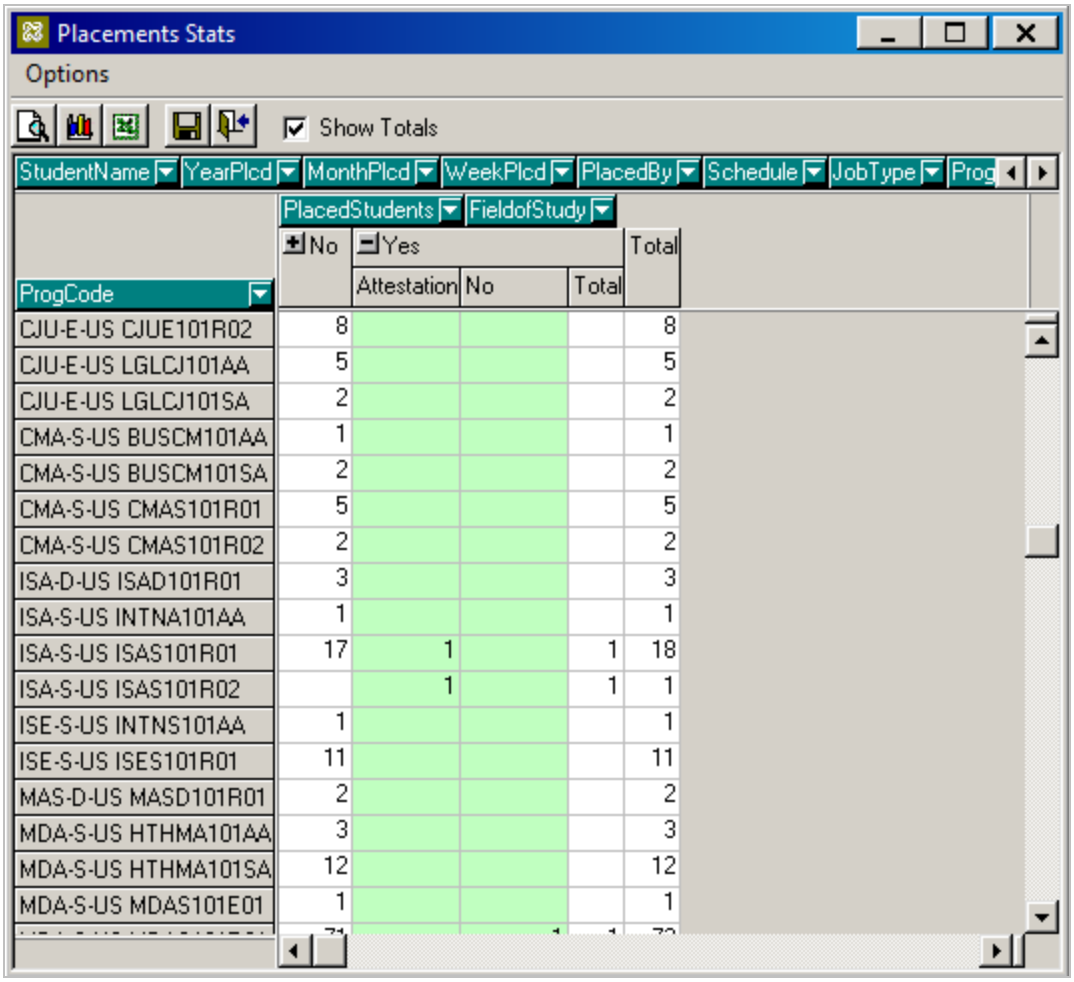
- Program Code
- Program Description
- Student Name
- Job Type
- Job Source
- Volunteer
- Year Placed
- Month Placed
- Week Placed
- Placed By
- Schedule (full time or part time)
- Campus Description
- Student Status
- Graduation Date
- Wants Assistance
- Exit Interviewed
- Days to Placement
- Hourly Wages
- Yearly Salary
- Flat Rate
- Employer
- Career Services Representative
- Eligible Students
- Waiver Students
- Placed Students
- Placement Status
- Student Start Date
- Field of Study

Drag the variables to the vertical or horizontal axes as needed to get the cross-tabulated spreads. The cube is initialized with Program Code as the Y axis (rows) and Placed Students and Field of Study as the X axis (columns).

In the cases where a student has multiple placement records, add Employer to the parameter selection to see all of a student's placement information.

Note: The report was designed to work with up to three elements. The best practice is to keep three sort elements and to "swap" Program for Program Version and Grad Date for Start Date.





The above cube report displays Placed Students in Field of Study by Attestation.

Loan Management Reports

Navigate to **Reports > Loan Management** to access the following Loan Management reports:

- Cohort Rate Report
- Exit Interview
- Expected Graduates with Loans
- Loan Status Report

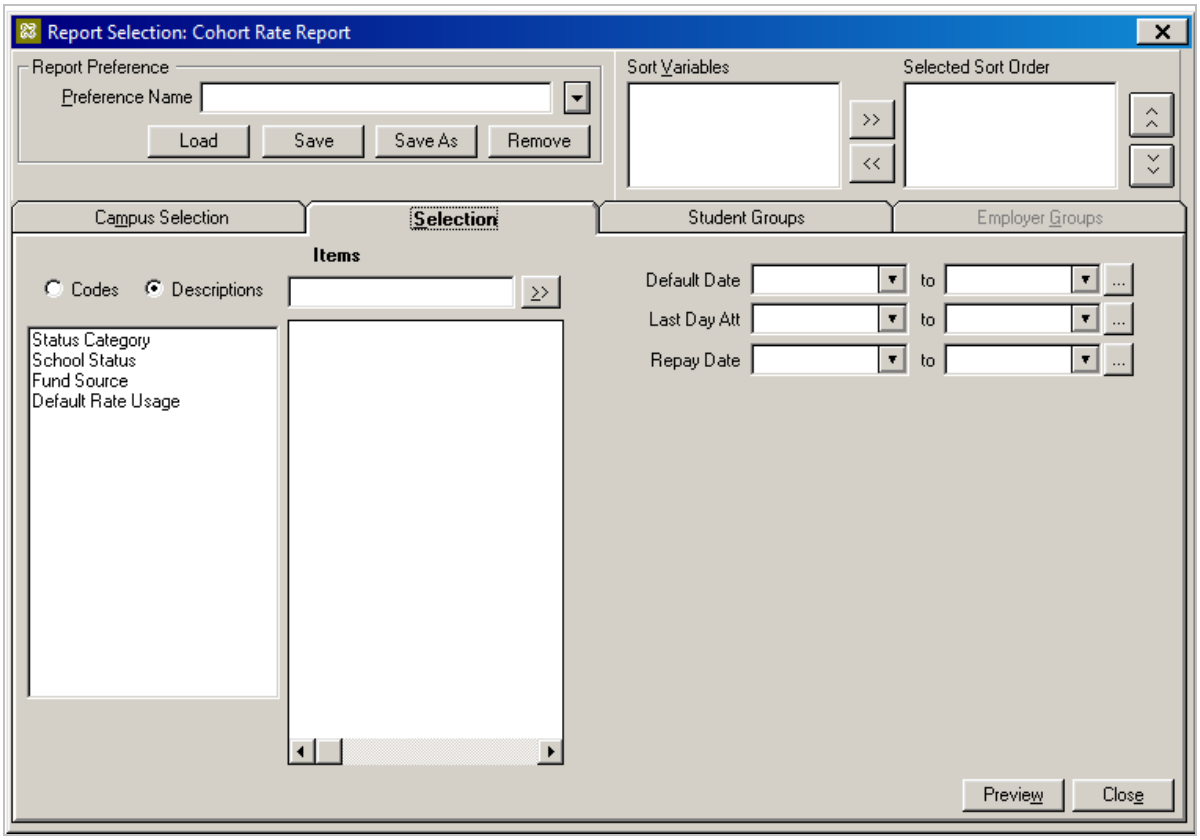
Note: The System Administrator must set up security rights to view, print, or export reports. Staff members and staff groups must be given security rights to view, print, and/or export reports. This does not apply to custom reports.

Cohort Rate Report

This report provides a review of students who have financial aid loans outstanding from your school. Details on the report include the number of students who went into default, the number of students who went into repayment, and the Cohort Rate (number defaulted divided by number in repayment). The report lists all students in each group.

To run the report:

1. Navigate to **Reports > Loan Management > Cohort Rate Report**. The Report Selection: Cohort Rate Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - SSN
   - Status
   - Last Date of attendance (LDA)

- Graduation Date
- Fund Source
- Loan Status
- Loan Status Effective Date
- Default Date
- Default Rate Usage Code

An asterisk (*) appears beside students that are counted in the default group.

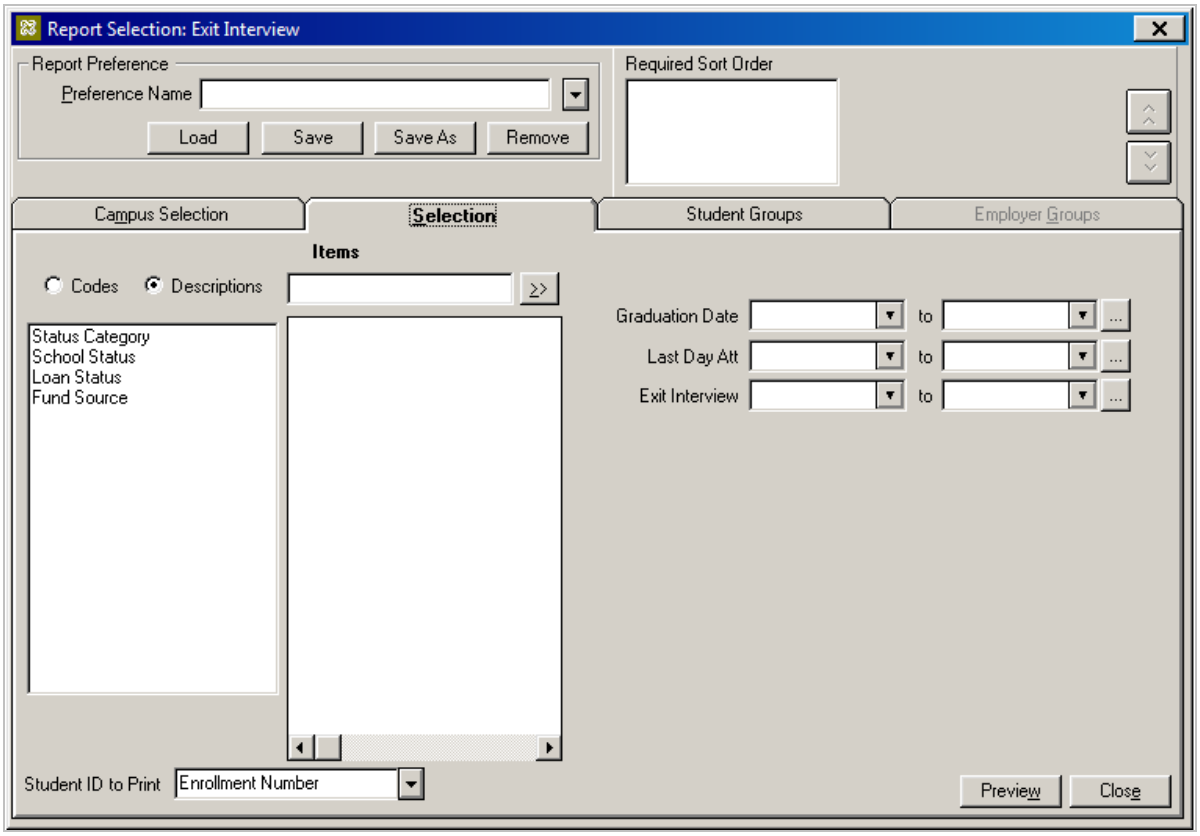
Exit Interview

This report can be used by the Loan Management Office to conduct exit interviews with departing students. This report can be printed for individual students from the **View > Loan Management > Loan Management > Print Exit Interview** menu option. From the Reports menu, you can select a group of students for which to print exit interview reports.

Two fields (**Interest Rate** and **Default # of Monthly Payments**) on the **Lists > Financial Aid > Lender > Payment & Interest** tab allow you to configure the interest rate and default number of payments for repaying loans. The values, if entered, automatically calculate the estimated monthly payments within the Exit interview report.

To run the report:

1. Navigate to **Reports > Loan Management > Exit Interview**. The Report Selection: Exit Interview form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report provides page breaks at the beginning of each student listed and displays the following student information:

- Student Name and ID
- Phone
- Address
- Graduation Date
- Last Date of Attendance (LDA)
- Exit Interview Date

Loan information:

- Loan Description
- Loan Type
- Loan Period
- Repayment Date
- Interest Rate
- Number of Payments
- Original Loan Amount
- Amount Disbursed/Borrowed
- Estimated Monthly Payment
- Status
- Lender's name and address
- Guarantor's name and address
- Servicer's name and address

Totals:

- Original Total of all Loans
- Total Monthly Payment Amount
- Total of Expected Payments

A signature line for the student is provided on the form. In the case of PLUS and DIRPLUS loan type(s), a signature line for the student's parent is provided.

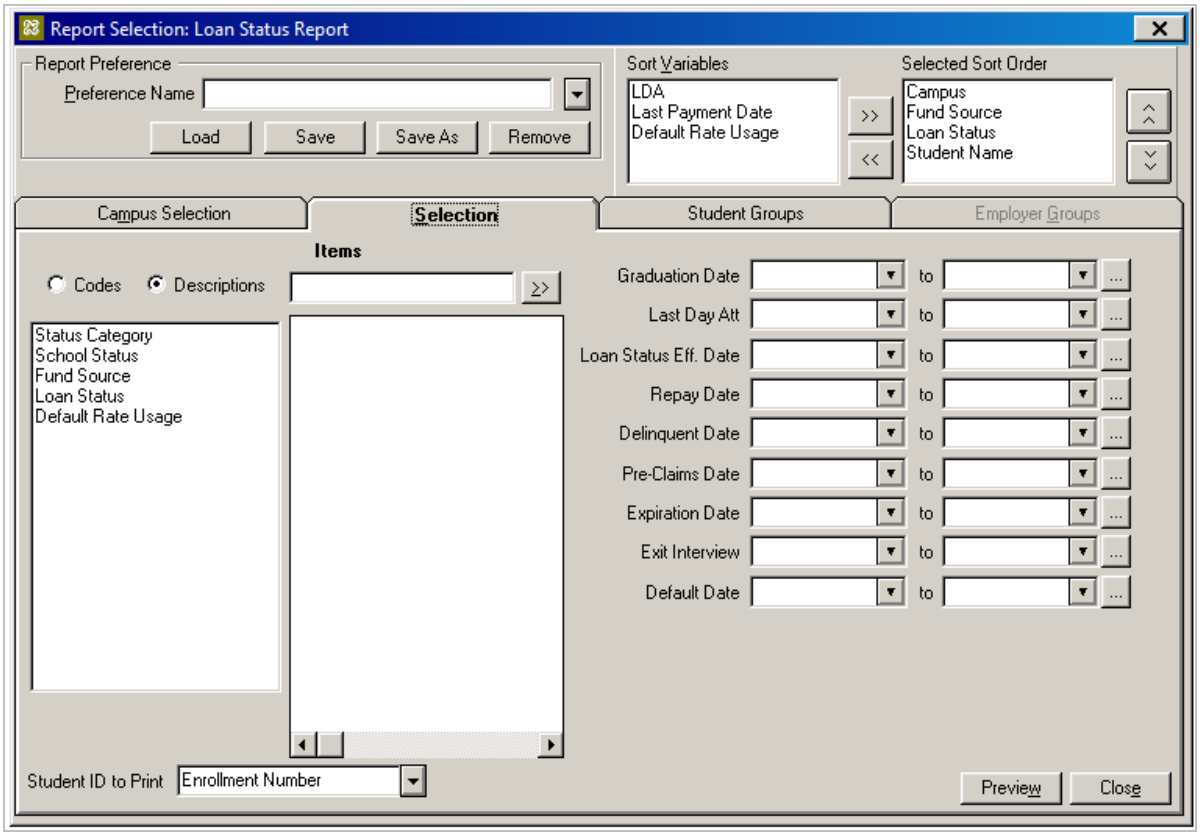
Loan Status Report

This report provides a detailed and summary view of student loans at your institution.

To run the report:

1. Navigate to **Reports > Loan Management > Loan Status Report**. The Report Selection: Loan Status Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student ID
   - Student Status
   - Original Start Date
   - Home Phone
   - Work Phone

- Program Version Start Date
- Last Date of Attendance (LDA)
- FA Exit Date
- Fund Source
- Lender
- Default Date
- Default Rate Usage Code
- Loan Status
- Effective Loan Status Date
- Loan Gross
- Loan Net Amount Disbursed

Grand totals are provided for the student count, gross, net. There is a summary count of students in each Loan Status and student in default.

Student Services Reports

Navigate to **Reports > Student Services Reports** to access the following Student Services reports:

- Athletics Eligibility in Years Report
- Athletics Equity Report
- Athletics Financial Aid Report
- Disability Services Report
- Housing Assistance Report
- Veteran Information Report

Note: The System Administrator must set up security rights to view, print, or export reports. Staff members and staff groups must be given security rights to view, print, and/or export reports. This does not apply to custom reports.

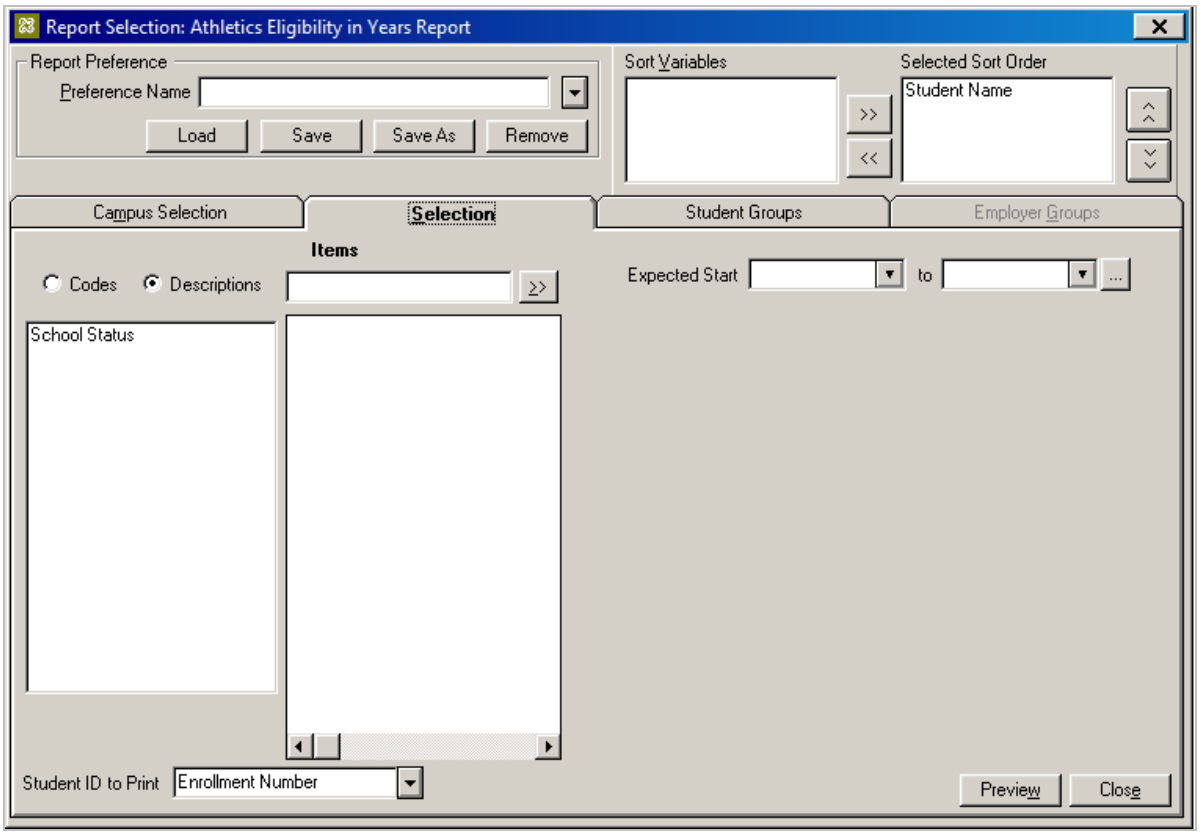
Athletics Eligibility in Years Report

This report lists each student's remaining athletic eligibility in years by start date, as well as those who have exhausted their athletic eligibility. The report allows Athletic Administrators to identify the following regarding a cohort of student athletes:

a. Time to graduation
b. Students who dropped or terminated before receiving their degrees who would have been eligible to compete in the next regular academic term
c. Remaining eligibility in years

To run the report:

1. Navigate to **Reports > Student Services > Athletics Eligibility in Years Report**. The Report Selection: Athletics Eligibility in Years Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.
5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

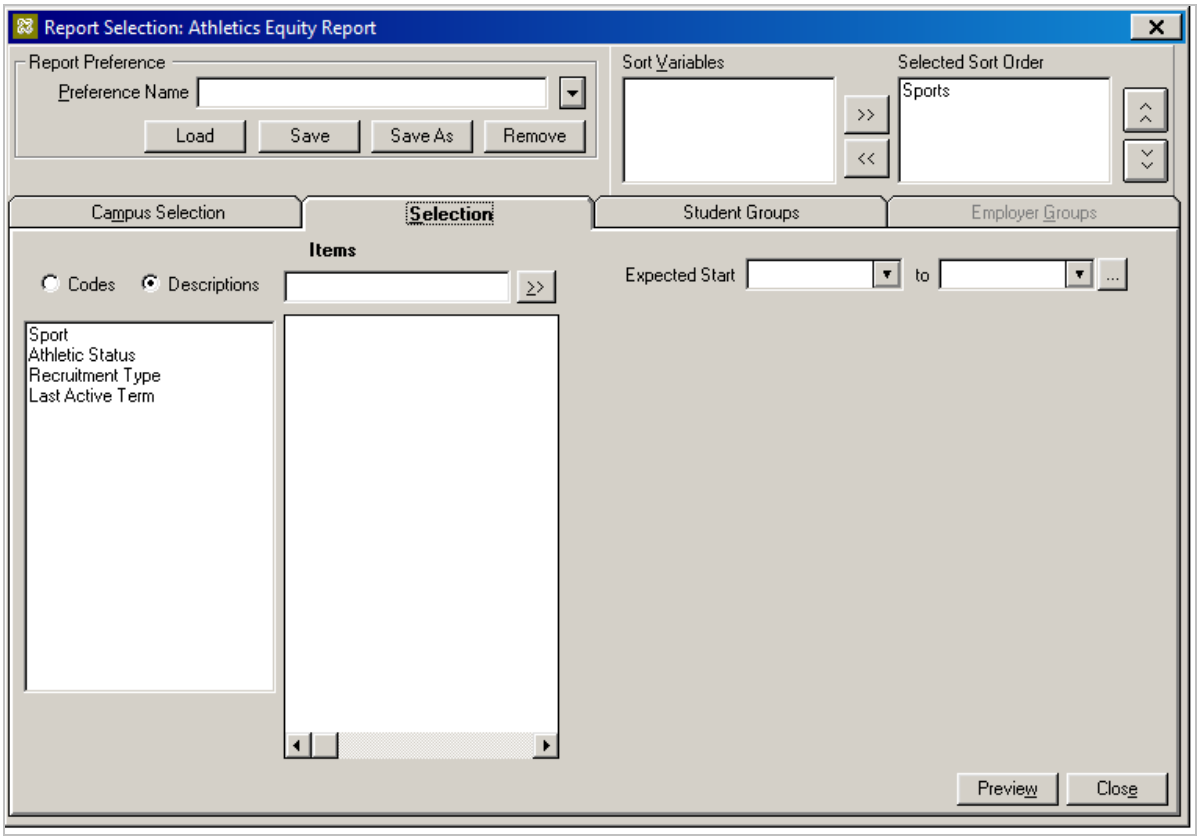
Athletics Equity Report

This report lists the number of male and female athletes in each sport which is a part of the institution's athletic association.

To run the report:

1. Navigate to **Reports > Student Services > Athletics Equity Report**. The Report Selection: Athletics Equity Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

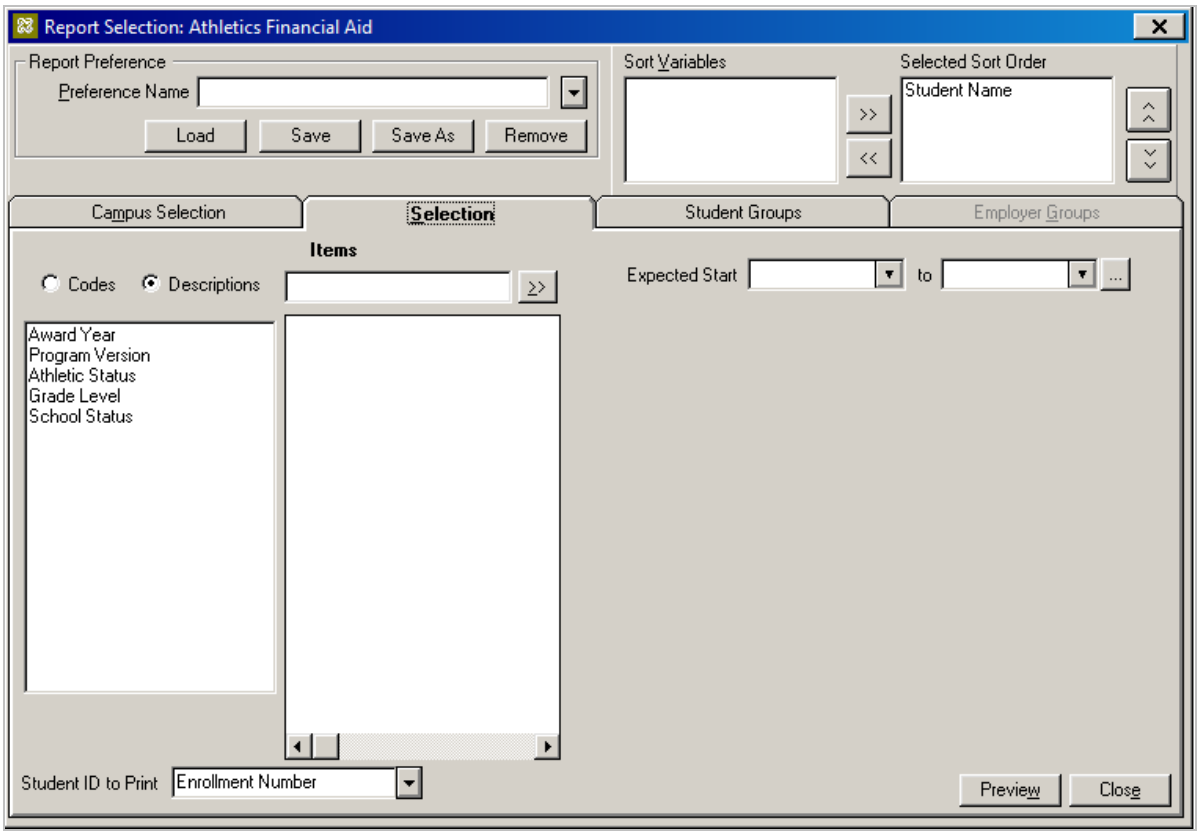
   The report displays all sports in which students participated and the number of male and female athletes participating in each sport.

Athletics Financial Aid

This report provides financial aid information required by an athletic association such as the NCAA. The report identifies special types of fund sources related to athletics.

To run the report:

1. Navigate to **Reports > Student Services > Athletics Financial Aid**. The Report Selection: Athletics Financial Aid form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

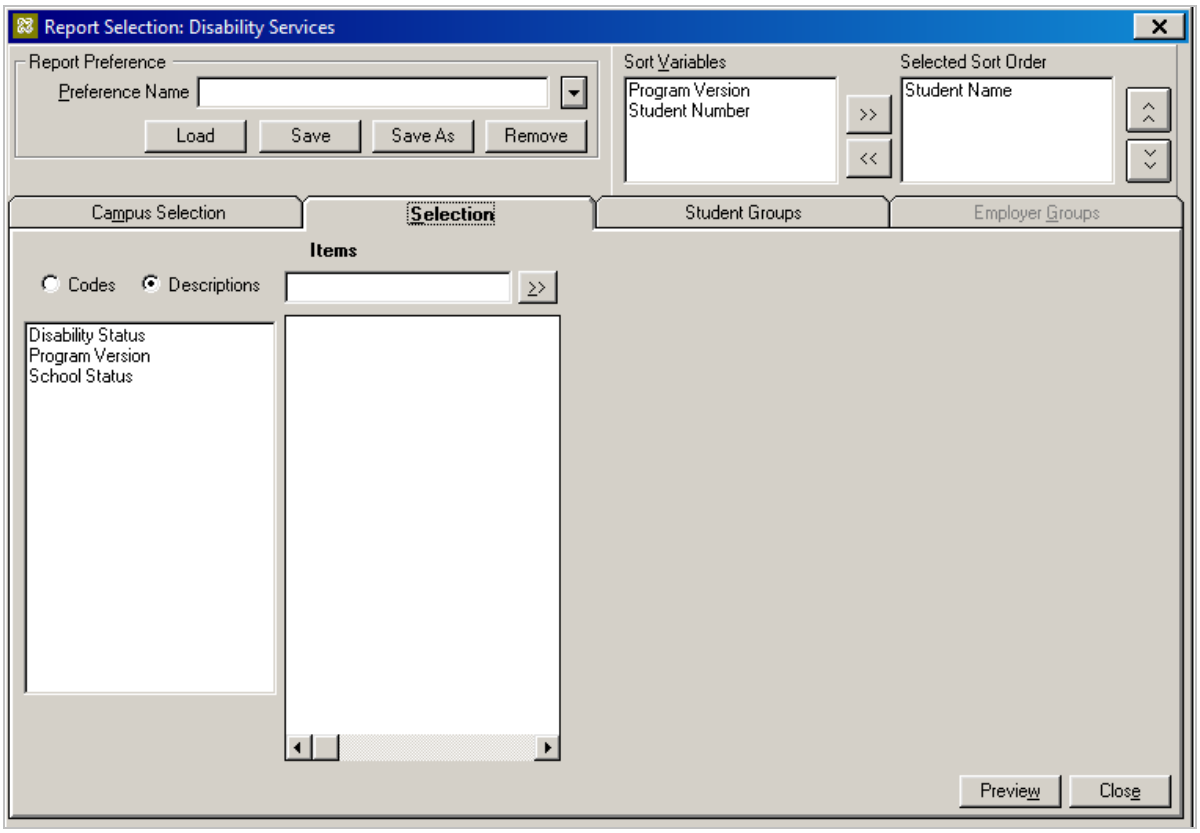
   Note: If you filter data by Student Groups, the Selection tab filters do not apply.
5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

Disability Services

This report lists the number of undergraduate students currently registered and/or confirmed with the Office of Disability Services. The report is used by institutions that need to complete the IPEDS Institutional Characteristics report for their campus.

To run the report:

1. Navigate to **Reports > Student Services > Disability Services**. The Report Selection: Disability Services form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Student Number
   - School Status
   - Program Version

- Disability Status

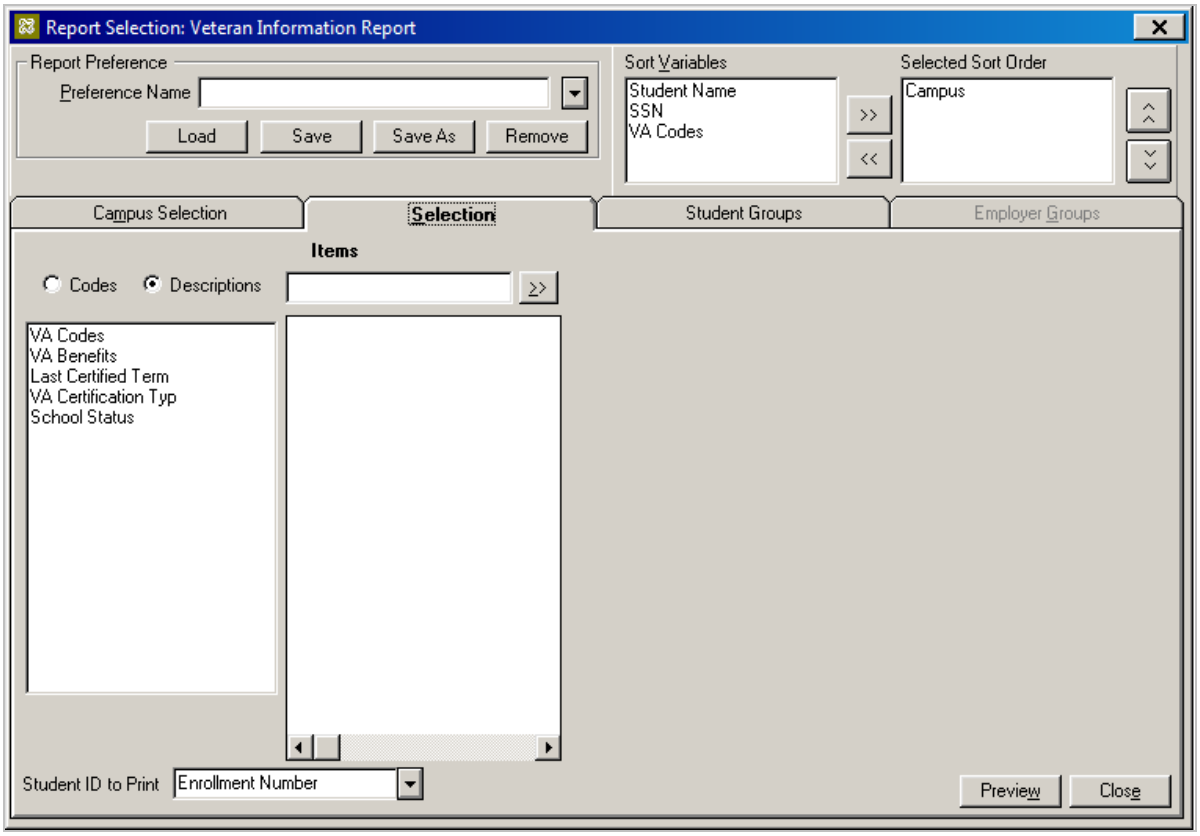
Veteran Information Report

This report is used by Veterans Affairs (VA) Advisors to review information regarding VA students.

To run the report:

1. Navigate to **Reports > Student Services > Veteran Information Report**. The Report Selection: Veteran Information Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - VA Codes
   - VA Benefits
   - Last Certified Term
   - VA Certification Type
   - School Status

Campus Management

Page 1 of 1

From the Report Viewer, you can save student groups and export the data to Excel.

Note: Since VA Advisors can report on VA students by current and previous certified terms, a best practice is to run the Veteran Information Report and save the output as a student group at the end of each term. For more information see Student Groups. Another best practice is to add a new VA record every term the student is certified.

Housing Reports

Navigate to **Reports > Housing** to access the following Housing reports:

- Academic Year Dates Comparison
- Available Housing
- Current Occupants By Room Type
- Housing Exception Report
- Housing Population Percentage
- Housing Requirement Progress
- Housing Start Rates
- New Student Occupants
- Occupancy Count
- Occupants By Lease and Graduation Dates
- Overbooked Rooms
- Persistence Report
- Student Move Out Details
- Students Requiring Housing Assignment

Note: The System Administrator must set up security rights to view, print, or export reports. Staff members and staff groups must be given security rights to view, print, and/or export reports. This does not apply to custom reports.

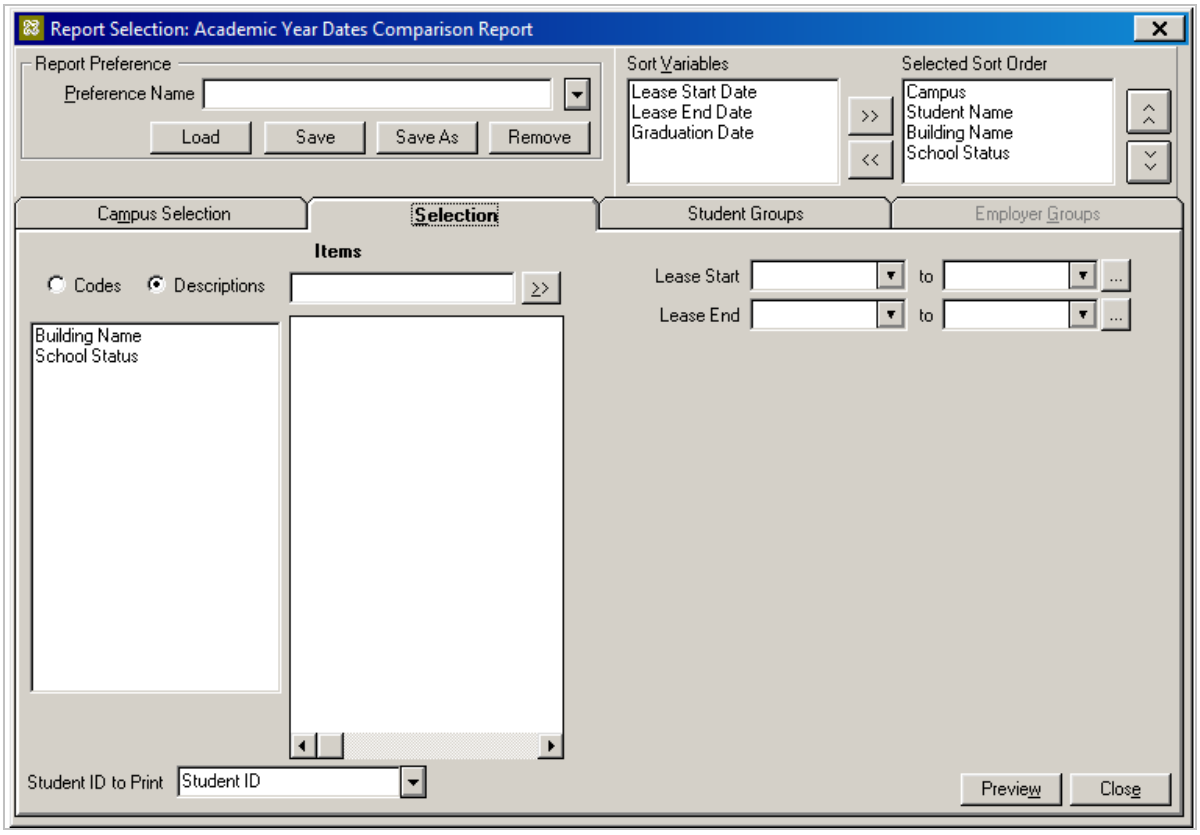
Academic Year Dates Comparison Report

This report lists students who have discrepancies between their Lease Academic Year dates and the Academic Year dates in financial aid.

Note: The report does not list students whose housing period is term or housing date.

To run the report:

1. Navigate to **Reports > Housing > Academic Year Dates Comparison Report**. The Report Selection: Academic Year Dates Comparison Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. *Optional*: You can also use the **Student Groups** tab to filter report data.

   Note: If you filter data by Student Groups, the Selection tab filters do not apply.

5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   For each student identified with a discrepancy, the report lists the following details:

   - Student Name
   - Student ID
   - School Status
   - Building Name

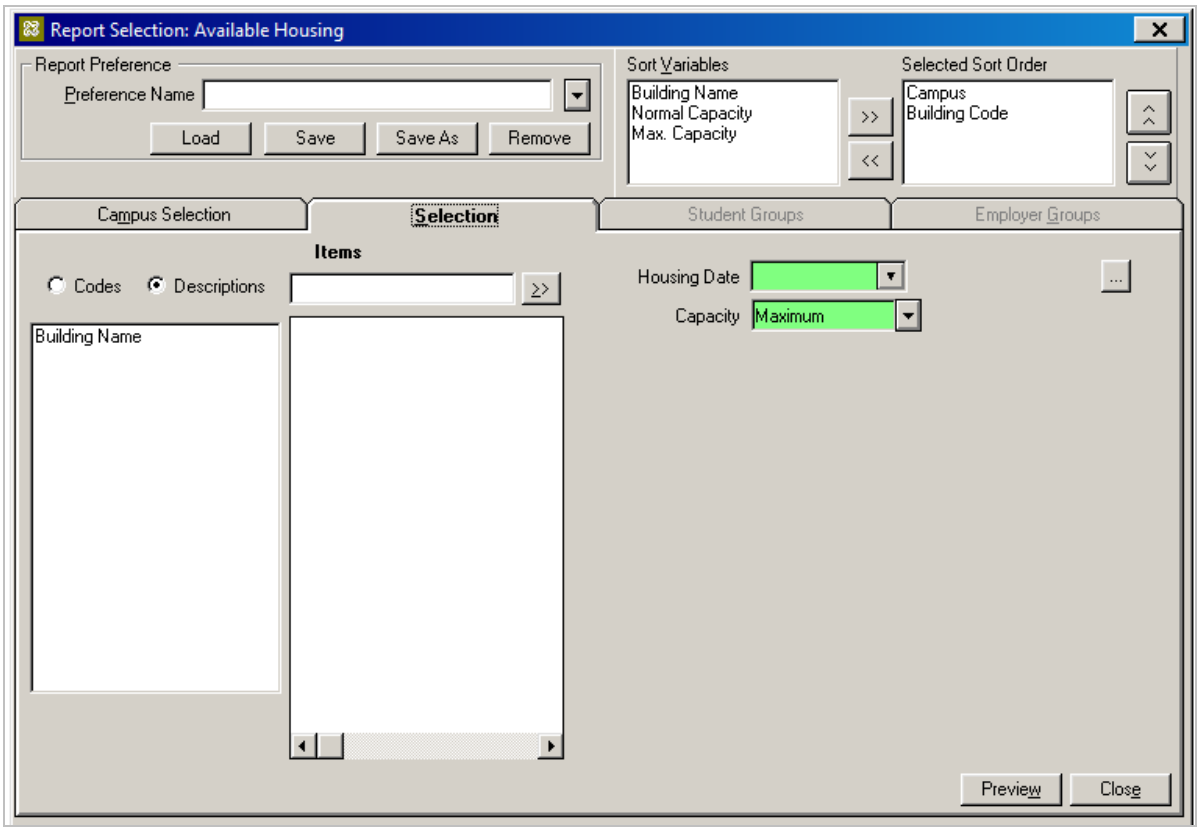
- Room Number
- Suite Number
- Lease Dates
- Academic Year Date(s)

Available Housing

This report lists the number of available rooms (of specific capacity) in selected campus building(s) on a particular date. The report displays only those rooms where the selected date falls between the lease start date and end date.

To run the report:

1. Navigate to **Reports > Housing > Available Housing**. The Report Selection: Available Housing form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Code
   - Building Category
   - Name
   - Hosting Campus
   - Location
   - Normal Capacity
   - Maximum Capacity
   - Occupancy

- Available Capacity (= normal capacity minus occupancy)

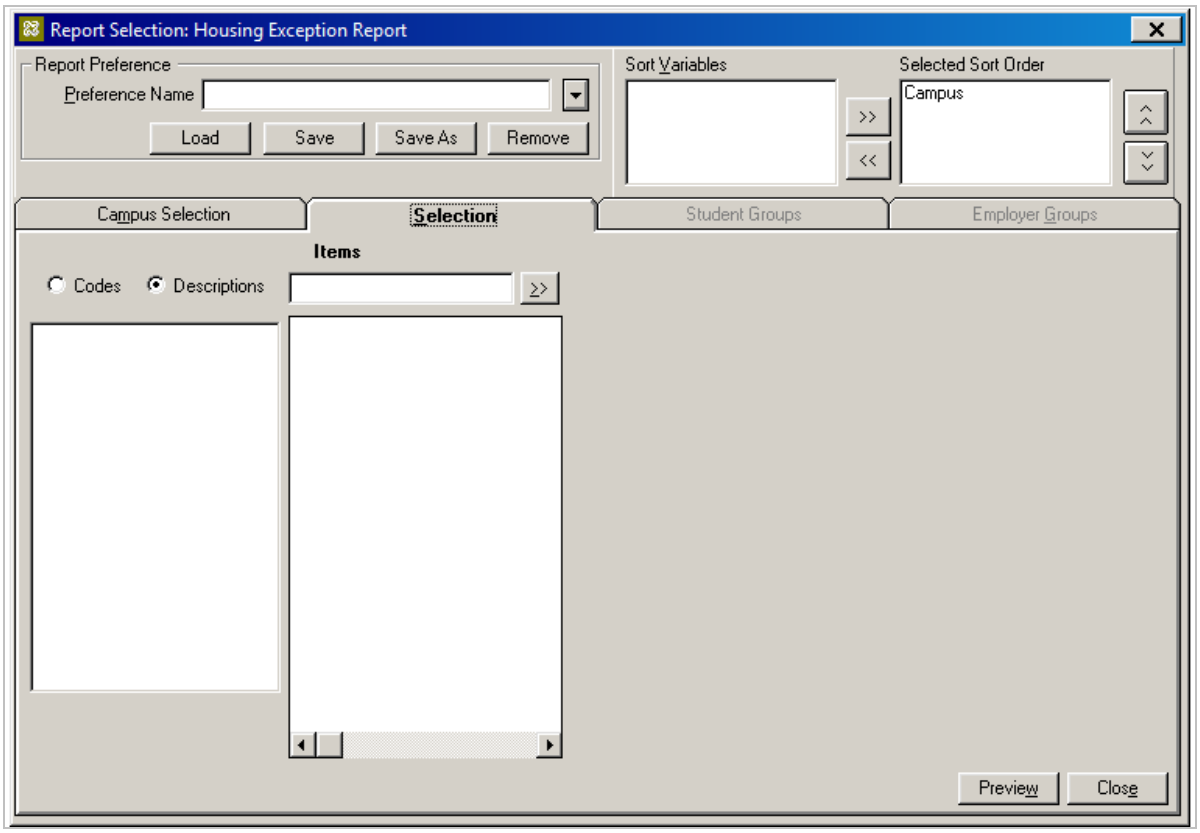
   - School Status
   - Building Name
   - Room Number and Category
   - Suite Number and Category

Housing Exception Report

This report displays students whose lease status has been set to "Pending". This status is set if a room conflict occurred when a lease was extended resulting in a conflict with another student who was to move into that room.

To run the report:

1. Navigate to **Reports > Housing > Housing Exception Report**. The Report Selection: Housing Exception Report form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.



4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The report displays the following details:

   - Student Name
   - Room
   - Sequence Number
   - Lease Start and End Date
   - Lease Status
   - Reason for the exception

Housing Population Percentage

This report displays the detailed summary of student occupancy in selected campus buildings within a specific time period (specified housing start and end dates). The report also displays the total number of active students in the selected campus.

To run the report:

1. Navigate to **Reports > Housing > Housing Population Percentage**. The Report Selection: Housing Population Percentage form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

Custom Reports

The *Custom Reports* option lists customized reports designed especially for your campus. Custom reports are developed by editing a CampusNexus Student generic report or by creating a new report.

Crystal Reports application software and system administrator privileges are required to customize reports. Crystal Reports products and training materials can be obtained from this website: http://www.crystalreports.com/.

To customize a generic CampusNexus Student report:

1. As system administrator, select the Setup > Report Maintenance option.
2. Double-click the generic report you want to copy. The selected report is displayed in the Custom tab.
3. Open SQL 7/Enterprise Manager and click on the SQL server group/server associated with CampusNexus Student in Databases > CampusNexus Student > Views.
    a. Find the `cst_` report you created and right-click the table. Select **Open Views** and **return all rows**. This opens the tables.
    b. Click the **Show/Hide diagram pane** icon.
    c. Right-click on the top, empty box area to open up a box to add a table.
    d. Click on the table you want to add.
    e. Click the buttons **Add** and then **Close**.
    f. Click on the field name that is similar in both tables and drag it to the other table that has the same name, to the same name (This joins the tables) (do not check the box).
    g. Click all the boxes (fields) you want to appear in the tables.
    h. Click the **Show/Hide Grid Pane** icon. Another section is displayed in your view.
    i. Click the **Alias** column and change the *expr1* to a *real description* to the fields you created.
    j. Click the **Verify SQL** icon.
    k. Click **OK** (to the syntax question).
    l. Click the **Explanation** icon to run the query.
    m. Go into the **Design View** and **Save**.
    n. Exit the file.
4. In Crystal Reports/32 Bit Crystal Report Designer, perform the following steps:
    a. Go to the server's c2000 directory/reports and open the custom report you just created.
    b. On the title bar, click on **Database** and verify the database.
    c. Click **OK** at the SA login. The verify record set box is displayed.
    d. In the left drop-down box entitled *Object type*, select **View**.
    e. In the **Object** box, select the report you customized (this pulls the two tables together).
    f. From the Design View tab, delete any unwanted items in the report.

g. From the Insert menu, select **Insert database field**. A list of the fields in the tables you selected is displayed.

h. Click the fields you want to add and drag them to the **Details** portion of your report.

i. Create a title by using **Create text box** in the page header. Right-click the field and format the field.

j. Click the **Common** tab to *Horizontal Align = left* and click **OK**.

k. Select **File > Print Preview**.

l. Go to **Design** and check the sort and selections to delete or add the fields you changed.

m. Click **Save**.

5. In CampusNexus Student, from the Report menu select the module associated with the new report. The custom report is displayed with an asterisk (*) to distinguish it from the original report. Run the custom report like you would any other report.

Creating Custom Reports

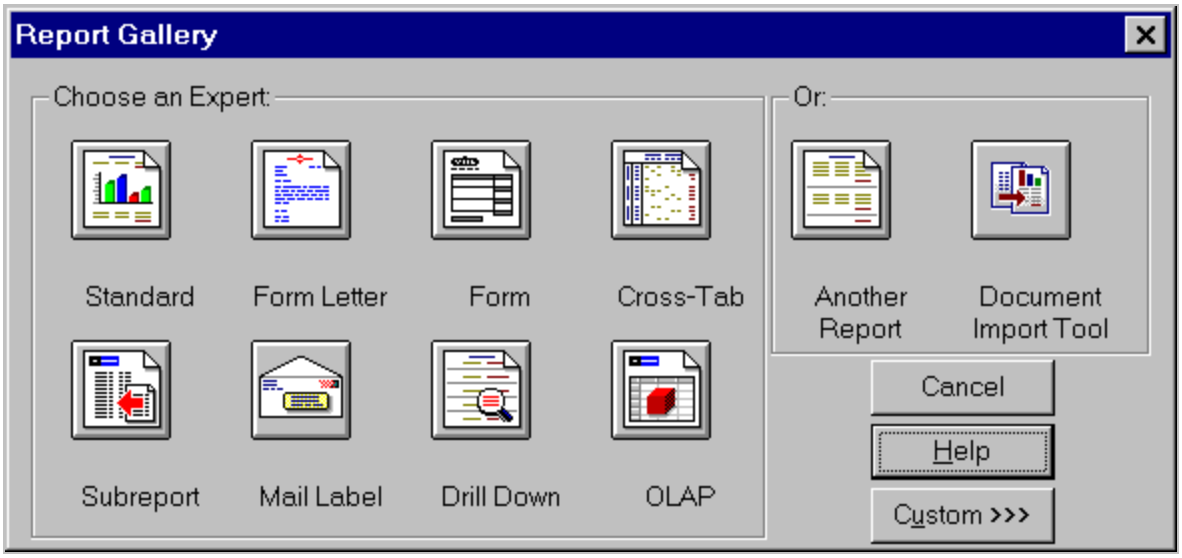
A client version of the Crystal Reports application can be used to create custom reports for CampusNexus Student data. The application uses a drag and drop interface associated with a data dictionary for easy creation of customized reports.

A report typically contains the following sections:

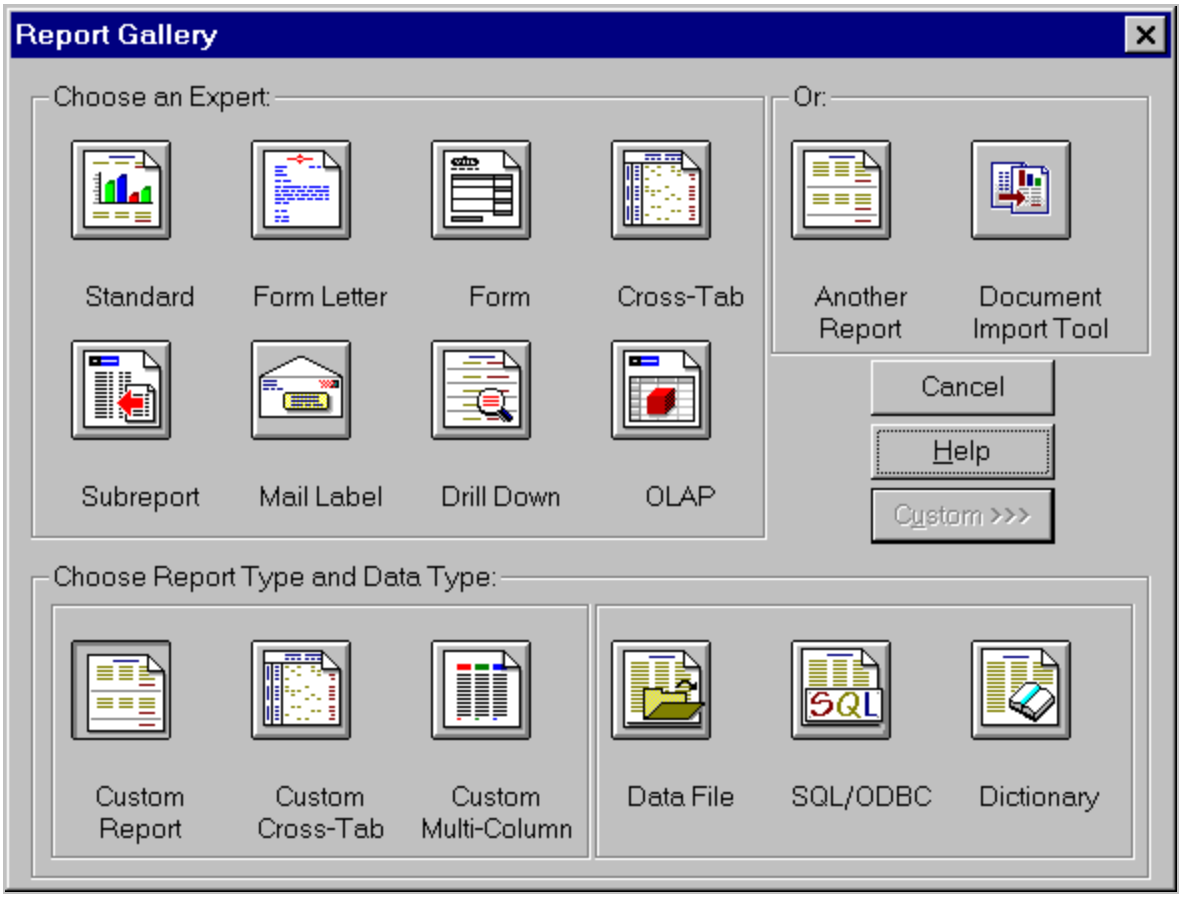
- Report Header – stores the general report information that is displayed on the first page of the report, e.g., report title.
- Page Header – stores the information that is repeated at the top of each page, e.g., page numbers or field titles.
- Details section – contains the report data.
- Report Footer and Page Footer – are the same as the Report Header and Page Header, only they appear at the bottom of the report and page.

To create a Custom Report:

1. Open the **Crystal Reports** application.
2. From the File menu, select **New**. The Report Gallery is displayed.

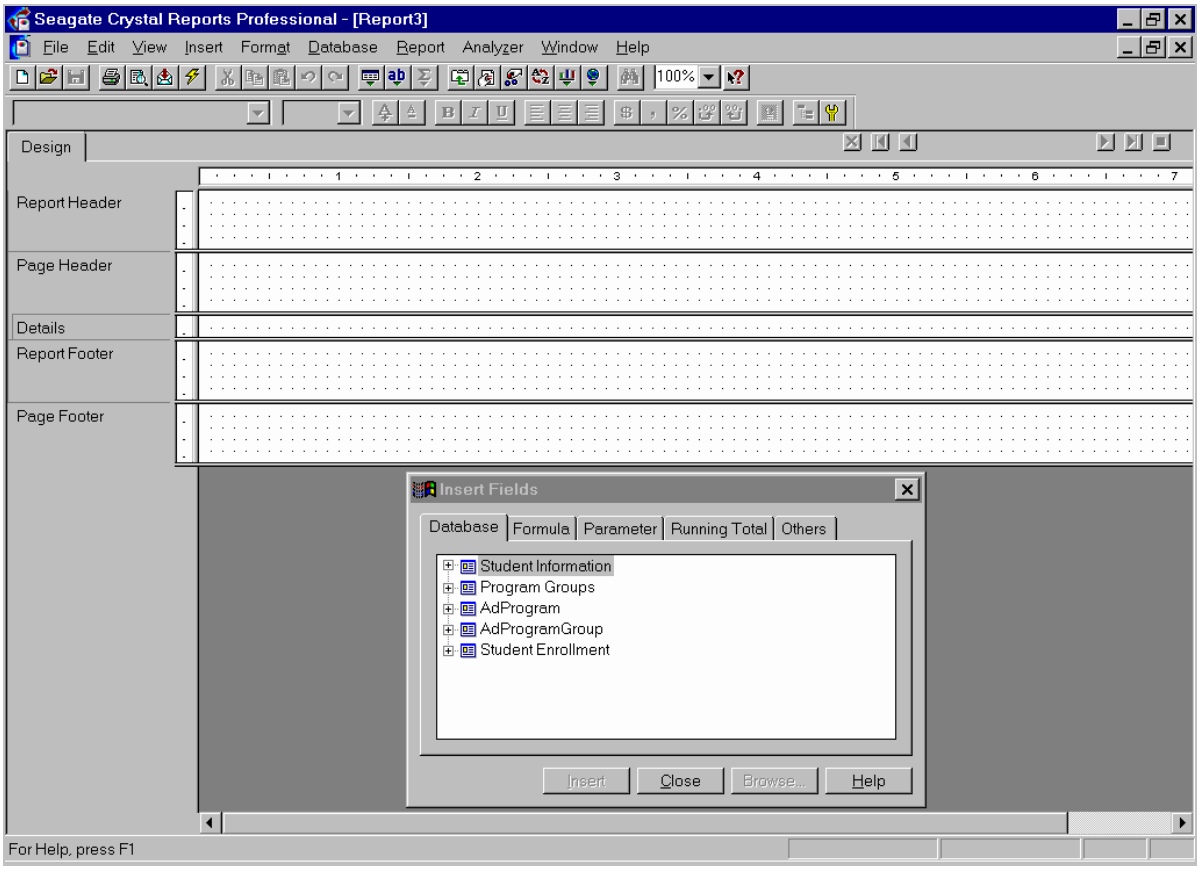


3. In the *Report Gallery*, click the **Custom >>>** button.
4. Click the **Dictionary** icon.



5. Select a dictionary (or select *auto-open dictionary* from the *Options* menu).

   The *Design* tab is displayed along with the *Insert Fields* form.



6. On the *Database* tab of the *Insert Fields* form, click the plus sign (**+**) to the left of a database.

   The fields of the selected database are displayed.

7. Double-click a field or select a field and press the **Insert** button. Place the field in the appropriate section of your report.

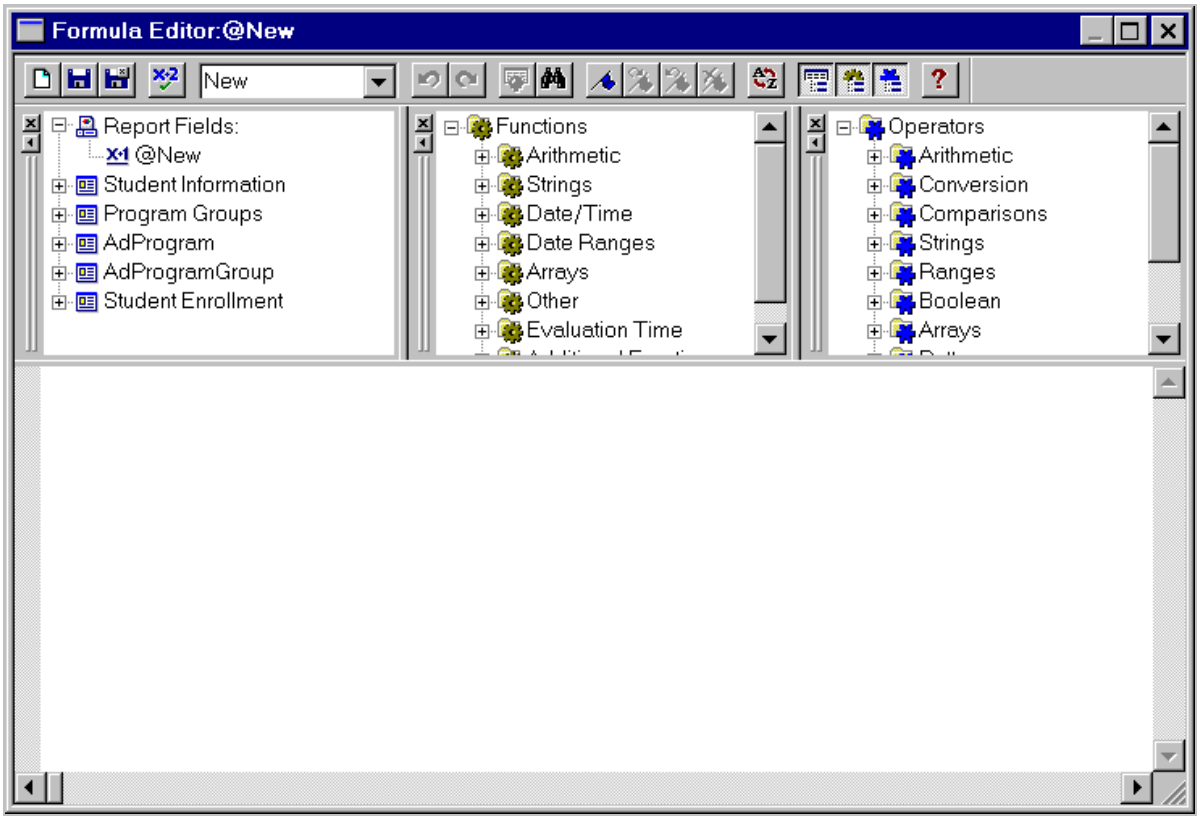
   Note: When you place a field in the *Details* section, a title is created automatically in the *Page Header*.

8. Select **Preview** from the *File* menu and check your report design.

9. To insert a formula into the report, click the **Formula** tab. Click **New** and type a name for the formula.

   The *Formula Editor* is displayed. It is organized as follows:

   - The list on the left contains the fields from the database.
   - The list in the middle contains the functions that can be used to construct a formula.
   - The list on the right contains the operators that can be used to construct a formula.



Use the *Formula Editor* to create a formula.

Example: To create a formula that checks if the Enrolled Date is less than the Graduation Date, perform the following steps in the Formula Editor:

a. Double-click the **EnrollDate** field under *Student Enrollment*.

b. Double-click the **Less than** operator under *Comparisons*.

c. Double-click the **GradDate** field.

d. **Save** the formula.

e. **Close** the Formula Editor.

10. If the report requires a running total of the data (e.g., total number of students), perform the following steps:

a. Click the **Running Total** tab.

b. Click **New** and type a name for the running total field.

c. Select the field on the left that you want to use for the running total.

d. Select a **Type of Summary** option.

e. Select an option in the **Evaluate** section.

- The *For each record* option evaluates each record in a field.
- The *On change of field* option performs its evaluation only when a specified field has changed.
- The *On change of group* option performs its evaluation only when a specified group has changed.
- The *Use a formula* option uses a formula when performing its calculations.

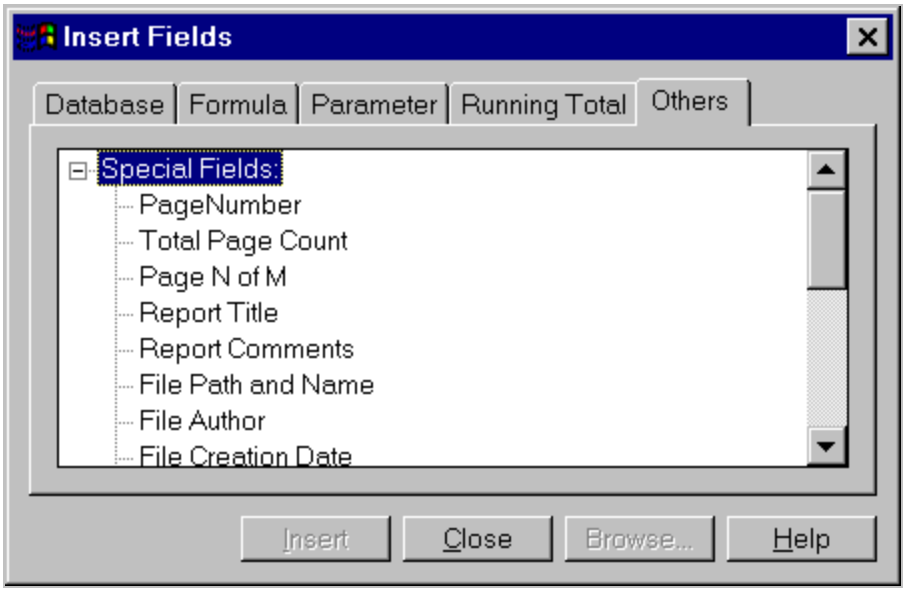
f. Select an option in the **Reset** section.

- The *Never* option locks your running total field, i.e., the running total performs its calculations on that field throughout the entire report.
- The *On change of field* option resets the running total when a designated field changes. Use the Add button (>) to copy a field from the *Available Tables and Fields* list box.
- The *On change of group* option resets a running total evaluate when a designated group changes. Use the Add button (>) to copy a field from the *Available Tables and Fields* list box.
- The *Use a formula* option uses a formula to reset the running total.

g. Click **OK**.

h. Click **Insert** to insert the running total into the report.

11. To include the page number, file name, or other information on a report, click the **Others** tab on the *Insert Fields* form. Select the appropriate field and click **Insert** to insert it onto the report.



Selecting and Sorting Records

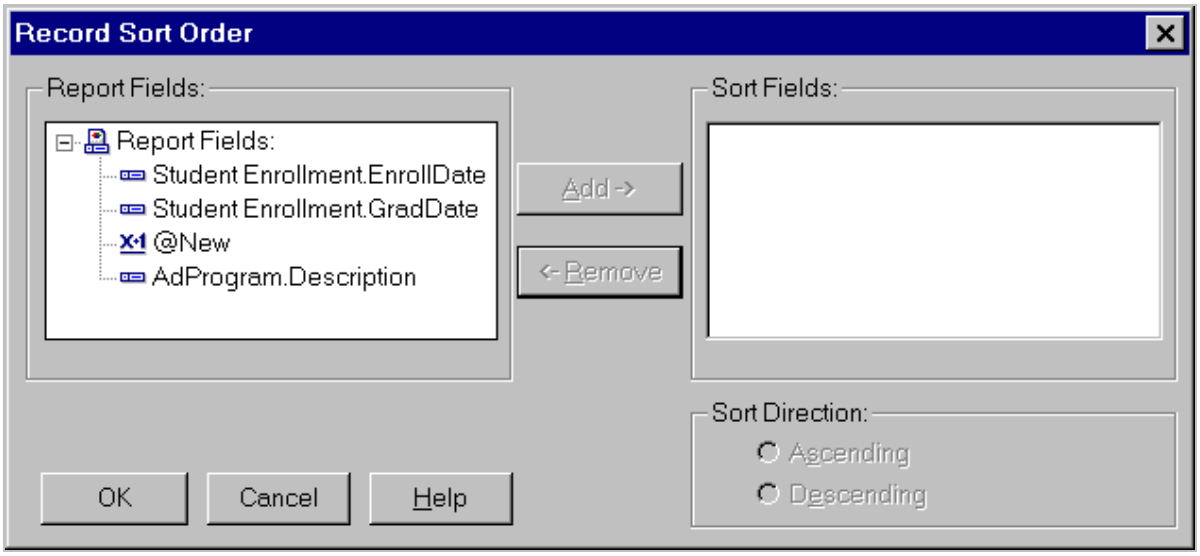
To select records from a report:

1. From the *Report* menu, select **Select Expert**.
2. Select the **field** that you want to select the data from.
3. Select the **criteria** for your selection.
4. Click **OK**.

The selected information is displayed.

To sort records in a report:

1. From the *Report* menu, select **Sort Records**. The *Record Sort Order* form is displayed.
2. From the *Report Fields* list, select the **field** that you want to sort on.
3. Click **Add**.
4. Select a Sort Direction: **Ascending** or **Descending** .



5. Click **OK**.

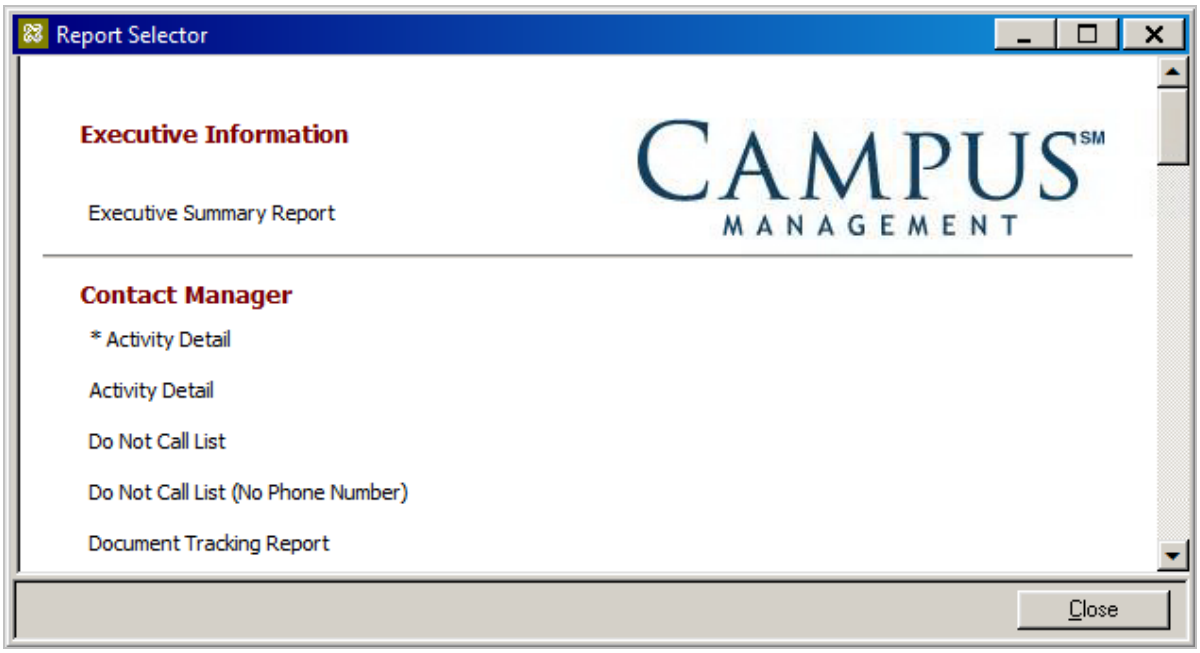
Using the Report Selector

The Open Report Selector option displays the Report Selector form. This form lists all the reports that are available on the Reports menu and its submenus. It is an alternate method of finding and running the reports that you are permitted to access.

Note: The Report Selector does not list reports that are run from locations other than the Reports menu.

To view a report using the Report Selector:

1. Select **Reports** > **Open Report Selector**. The Report Selector form is displayed.



2. Use the scroll bar to locate a report in the list. Click the report name to start the report.

   – OR –

   Use the **Tab** and **Shift+Tab** keys to locate a report. When the name of the report you want is marked with dotted lines, press **Enter**to start the report.

3. Click **Close** to close the form.

Window Menu

This menu lists the open windows in CampusNexus Student. The list of items changes as you open and close windows (or forms). The active window is indicated by a check mark to the left of the item name.

The menu also includes options to arrange windows in the work area in tiled or cascaded format.

Tools Menu

This menu provides the following options:

- Contact Manager
- Admissions
- Financial Aid
- Student Accounts
- Academic Records
- Career Services
- Loan Management (No tools are available for this option.)
- System

Tools > Contact Manager

The Tools > Contact Manager submenu options are as follows:

- National Do Not Call Import
- National Do Not Call Student Update
- Delete Batch Activities
- Import ZIP Code Data
- Unlock Activities

National Do Not Call Import

The FTC requires telemarketers (including institutions who call clients or students) to honor the request of prospects and customers not to call their homes. Specific rules determine when it is lawful to call a prospect or a person with an existing business relationship. Failure to adhere to these rules can result in fines.

The National Do Not Call Registry phone list is available for purchase in its entirety, by state, or by area code. The list contains phone numbers that have been registered with the FTC by consumers as restricted.

Additional information can be found at the following websites:

- https://www.donotcall.gov/ - Site where clients or students can register a phone number with the National Do Not Call list.
- https://telemarketing.donotcall.gov/ - Site where telemarketers (institutions) can download phone lists.
- https://www.ftc.gov/ - The FTC's Do Not Call main information page.

New Database Installation

To implement the National Do Not Call Registry features, CampusNexus Student creates a new database called C2000_DNC on the server where your database resides. This database contains a single table (syNationalDNC) with a single column (phone number). The FTC data file is imported to this destination, and it serves as the primary reference for matching student phone numbers to be compliant with the FTC requirements.

Note: This database creates a large (approximately 1.5 GB) data file to hold the entire current Do Not Call Registry file list. If your database server does not have sufficient available space, the database will NOT be created. Consult your database administrator for information regarding hard disk space requirements.

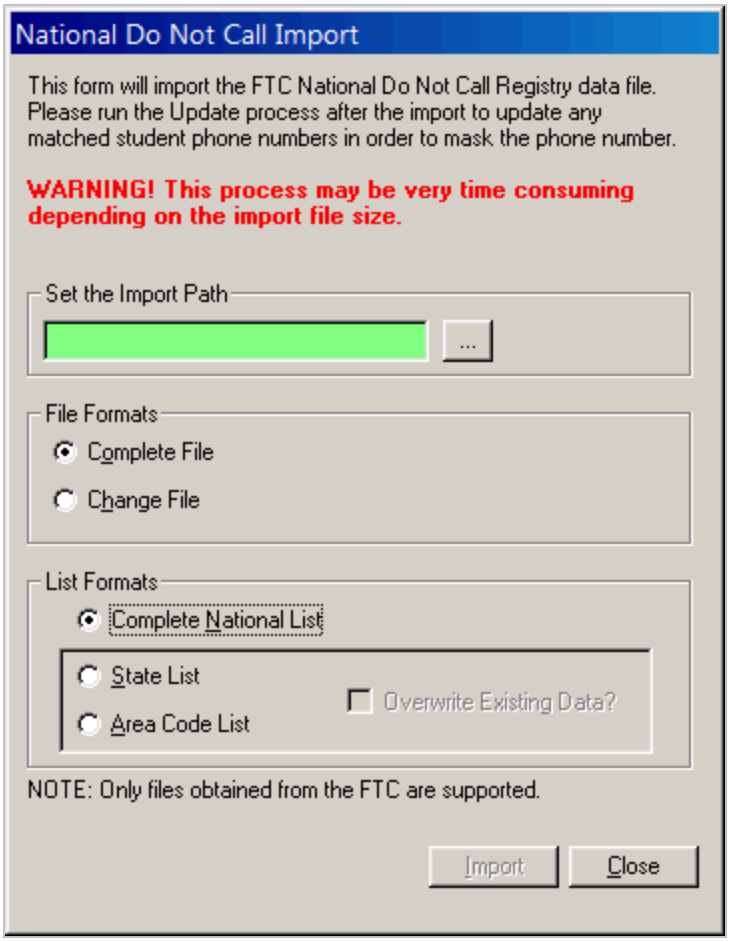
If you do not plan to import the entire list, the C2000_DNC database can be created with a smaller file.

Use CampusNexus Student utilities to import a downloaded Do Not Call Registry file into the CampusNexus Student DNC database. You can also import files and append them to the existing data.

Note: Depending on the type of file downloaded, this import process can be time consuming.

To import the Do Not Call Registry:

1. Download the DNC file from the National Do Not Call Registry and store it on the computer where you will be running the import tool.
2. Navigate to **Tools** > **Contact Manager** > **National Do Not Call Import**. The National Do Not Call Import form is displayed.



3. Specify the path to the downloaded file or click ... to select the file.
4. Select the **File Format**. The options are:
    - Complete File – the entire list of phone numbers for the type of downloaded file (All Area Codes, Entire State, Multiple Area Codes, Single Area Code).
    - Change File – only phone numbers for the type of downloaded file (All Area Codes, Entire State, Multiple Area Codes, Single Area Code) that have been added or deleted since the last update by the FTC.

    Each of these file types is available in two formats:

    - Comma-delimited flat text file (for the full list) containing one 3-digit area code and 7-digit telephone number per line, separated by a comma, with a carriage return at the end of each line. The file (for the change list) has several data items per record, separated by commas.
    - XML tagged file containing both data and markers ("tags") with information in angle brackets that indicate the nature of the data.
5. Select the **List Format**. The options are:
    - Complete National List (default)
    - State List
    - Area Code List

If you select Complete National List, CampusNexus Student resets everything currently in the database and creates the DNC table based on the imported file.

If you select State List or Area Code List, you can select **Overwrite Existing Data**. If this option is not selected (default), data is appended to the existing table.

6. Click **Import** to begin the import process.

Masking of Phone Numbers

Fields that display phone numbers on Student Master, Contact Manager, Contact Methods, and Addresses forms dynamically display or mask phone numbers based on date criteria defined by the user based on system status as indicated below.

All admissions reports that display a phone number match the phone number from the DNC list and mask the phone number if it meets the criteria listed below for screening.

Conditions for the Masking of Phone Numbers

If the student's status is...	the phone number is...
Active or Leave of Absence	visible
Lead and the most recent Lead Date is less than 90 days	visible
Lead and the most recent Lead Date is greater than 90 days	masked, unless a DNC override is on file
Enrolled and Never Attended and the last transaction date or last date of attendance is less than 18 months	visible
Enrolled and Never Attended and the last transaction date or last date of attendance is greater than 18 months	masked, unless a DNC override is on file
Graduated or Dropped and the last transaction date is less than 18 months	visible
Graduated or Dropped and the last transaction date is greater than 18 months.	masked, unless a DNC override is on file

National Do Not Call Student Update

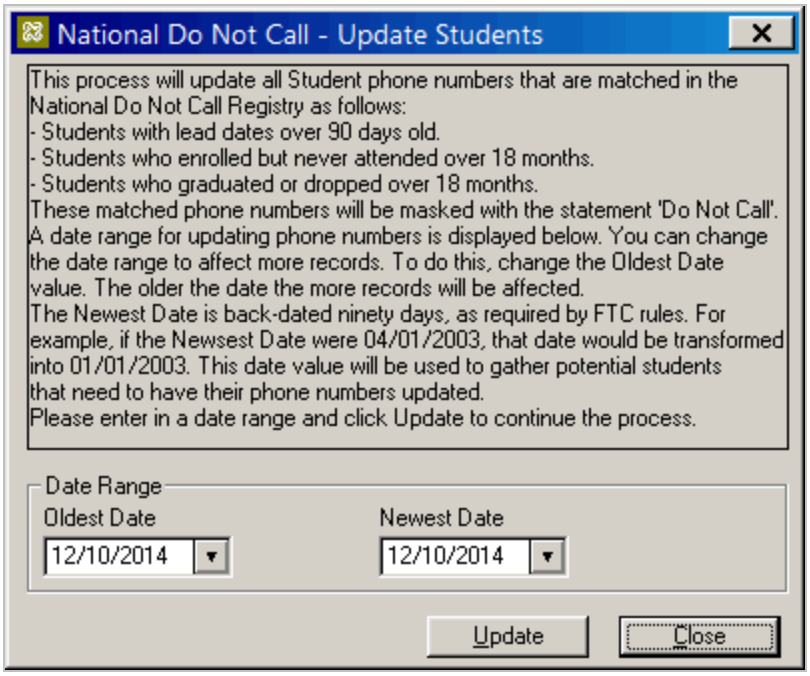
After you have imported the FTC Do Not Call file into the CampusNexus Student DNC database (see National Do Not Call Import), you can perform an update. Any student who was added to the DNC list will be added to the CampusNexus Student database.

The update process gathers all numbers that have a Newest Date within the date range provided, adjusted for 90 days back-dating on the Newest Date value. Any matched phone numbers (phone, work phone, or other/secondary phone) in the CampusNexus Student DNC database are replaced with the text *Do Not Call*. The original phone number is stored in a cross-reference table.

An override document stores exceptions to the DNC list. Students with phone numbers listed on the DNC list, but who permit phone calls from the institution, require an override to comply with FTC rules. Identify the override document in **Setup > Campus Locations > Contact Manager** (tab). During updates, if the phone number is also on file for the defined override document, the phone number is restored and displayed as a number that is permissible to call.

To update phone numbers:

1. Navigate to **Tools** > **Contact Manager** > **National Do Not Call Student Update**. The National Do Not Call Student Update form is displayed.



2. The default for the date range fields is today's date. You can change the **Oldest Date** value to affect more records. The older the date, the more records are affected.

   The **Newest Date** is back-dated 90 days, as required by FTC rules. For example, if the Newest Date is 04/01/2012, that date is transformed into 01/01/2012. This date value is used to gather potential students who need to have their phone numbers updated.

3. Click **Update** to begin the updating process. This may be time-consuming, depending on the number of phone numbers in the CampusNexus Student DNC database.

Do Not Call Registry Reporting

A report is available to list all students whose phone numbers were matched and updated by the CampusNexus Student DNC Update process.

To view the report, navigate to **Reports > Contact Manager >** Do Not Call List.

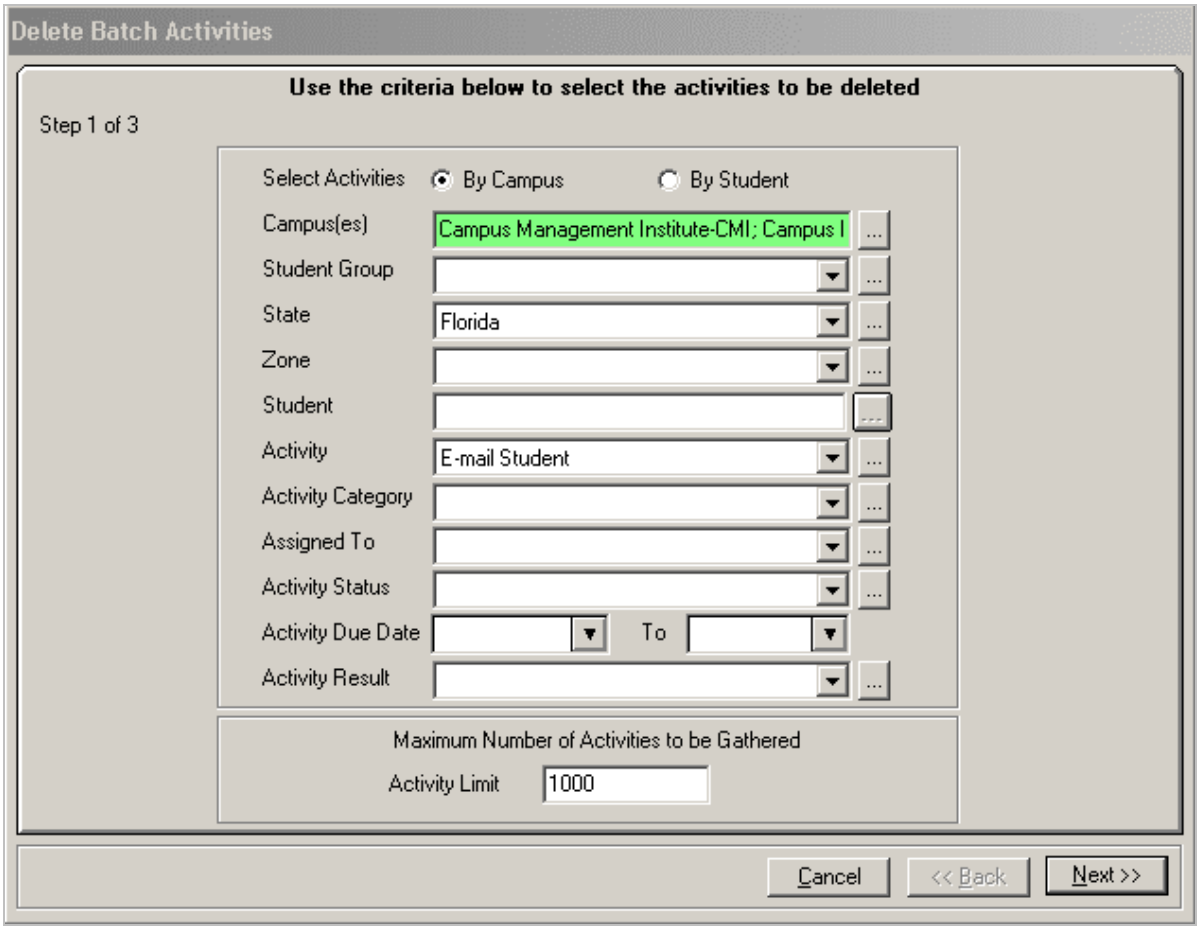
Deleting Batch Activities

You can delete batch activities in Contact Manager, for example, remove activities that have been added to student records erroneously or remove undeliverable emails from a staff member's Contact Manager. A notification confirms the batch action in progress and offers an option to cancel the action.

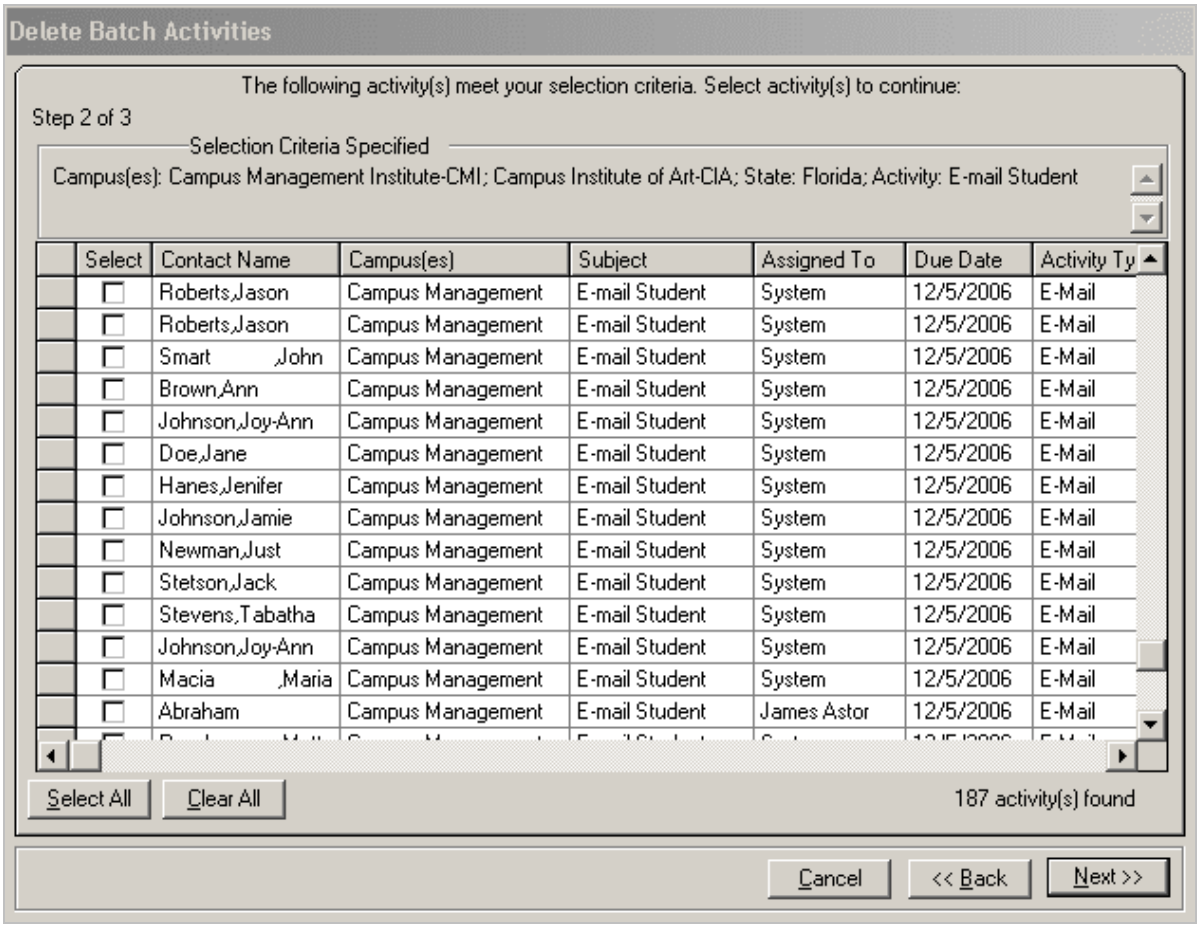
Note: Also refer to Modifying Batch Activities.

To delete activities in a batch mode:

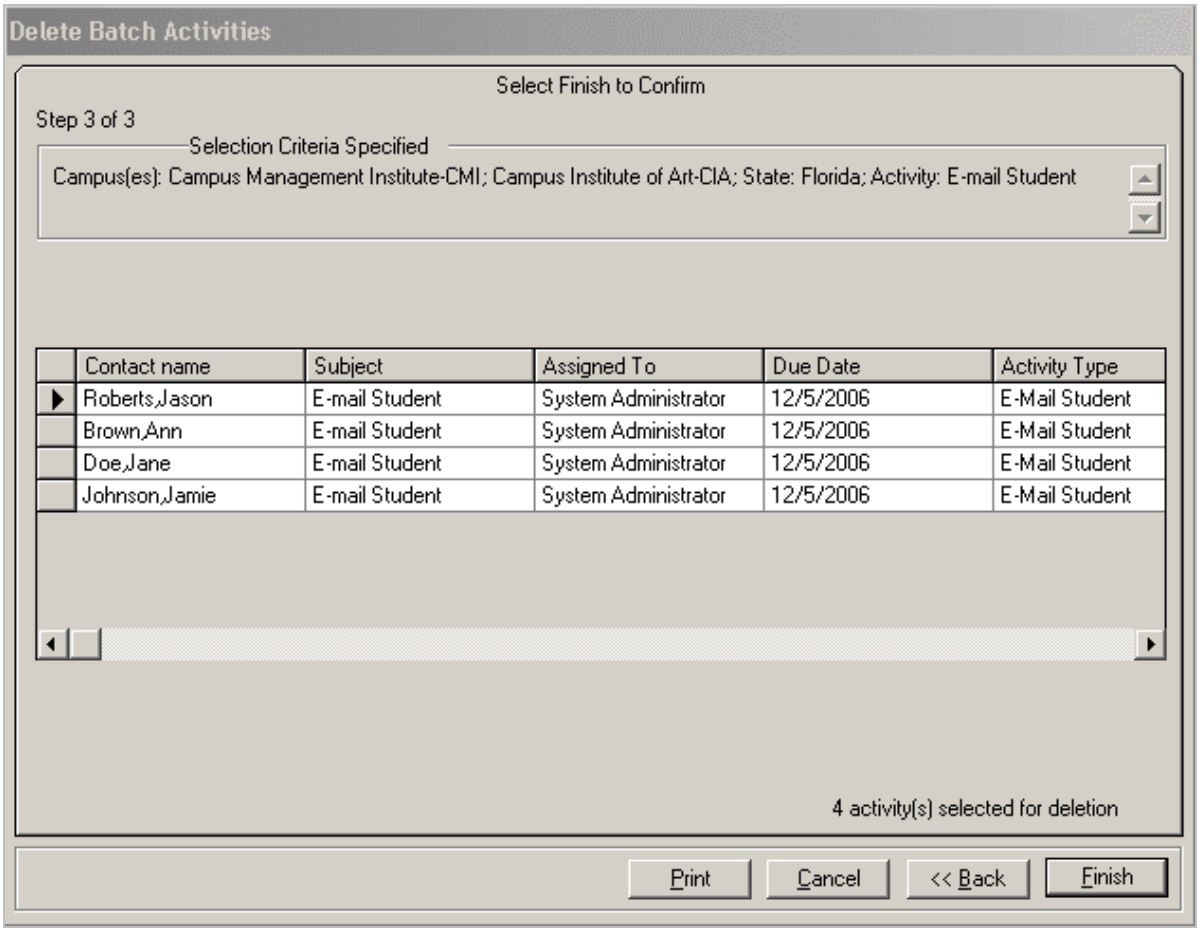
1. Navigate to **Tools > Contact Manager > Delete Batch Activities**. The Delete Batch Activities wizard is displayed.
2. Select applicable options from Step 1 and click **Next**.



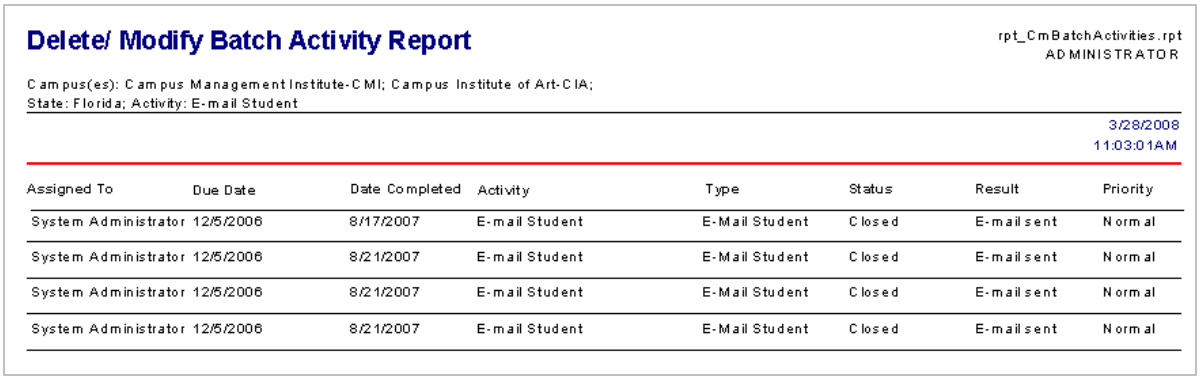
3. Select applicable options from Step 2 and click **Next**.



4. Review your selections in Step 3.



5. Click **Print** to view or print the Delete/Modify Batch Activity Report.



Note: If you click Finish without printing the report, a warning message is displayed stating that the selected activities will be permanently deleted from the database. Click **Yes** to continue deleting the selected activities without printing a report, or **No** to return to the previous form.

6. Click **Finish**. A confirmation message is displayed. Click **OK**.

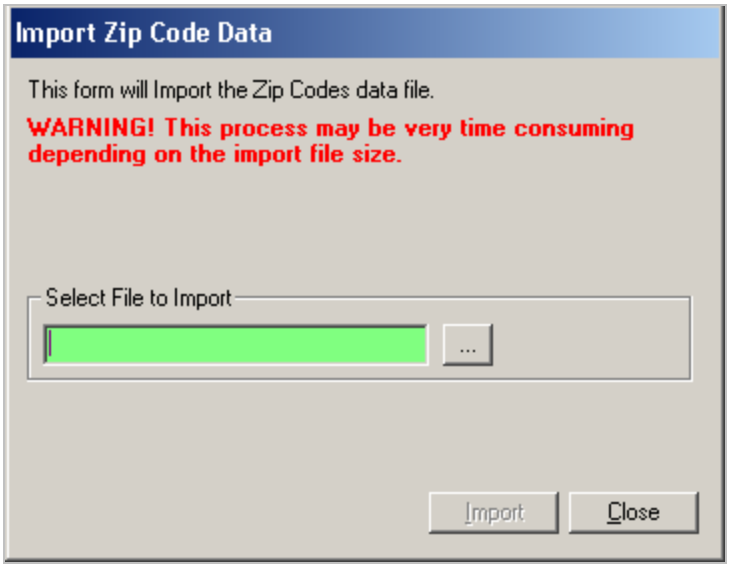
Import ZIP Code Data

CampusNexus Student provides a tool to import ZIP code data from a database file.

Note: Anthology Inc. purchased a ZIP code file from a company called ZIP Code Download (http://www.zipcodedownload.com). This file is provided as part of the installation package. The file name is `USA-5-DI.MDB`. The file is located in your `C:\Program Files\CMC\C2000\CustomFiles` directory, or on your COM+ Server.

To import a ZIP code data file:

1. Navigate to **Tools** > **Contact Manager** > **Import ZIP Code Data**.



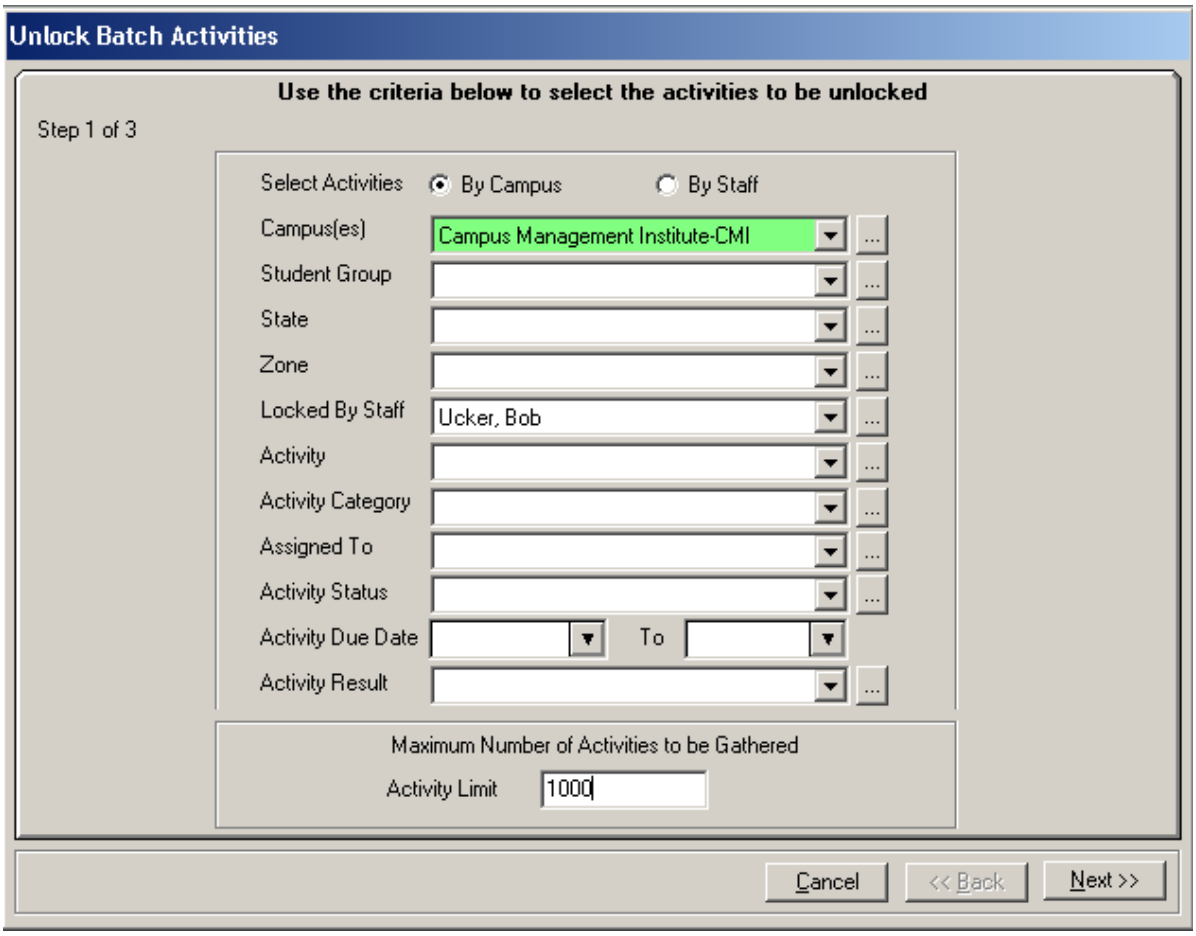
2. In the **Select File to Import** field, specify the path of the file location or click to navigate to the file.
3. Click **Import**. A message is displayed before importing the file stating that all data in the `SyZipCode` table will be deleted and the data from the new file will be inserted.
4. Click **Close** to close the form.

Unlocking Activities

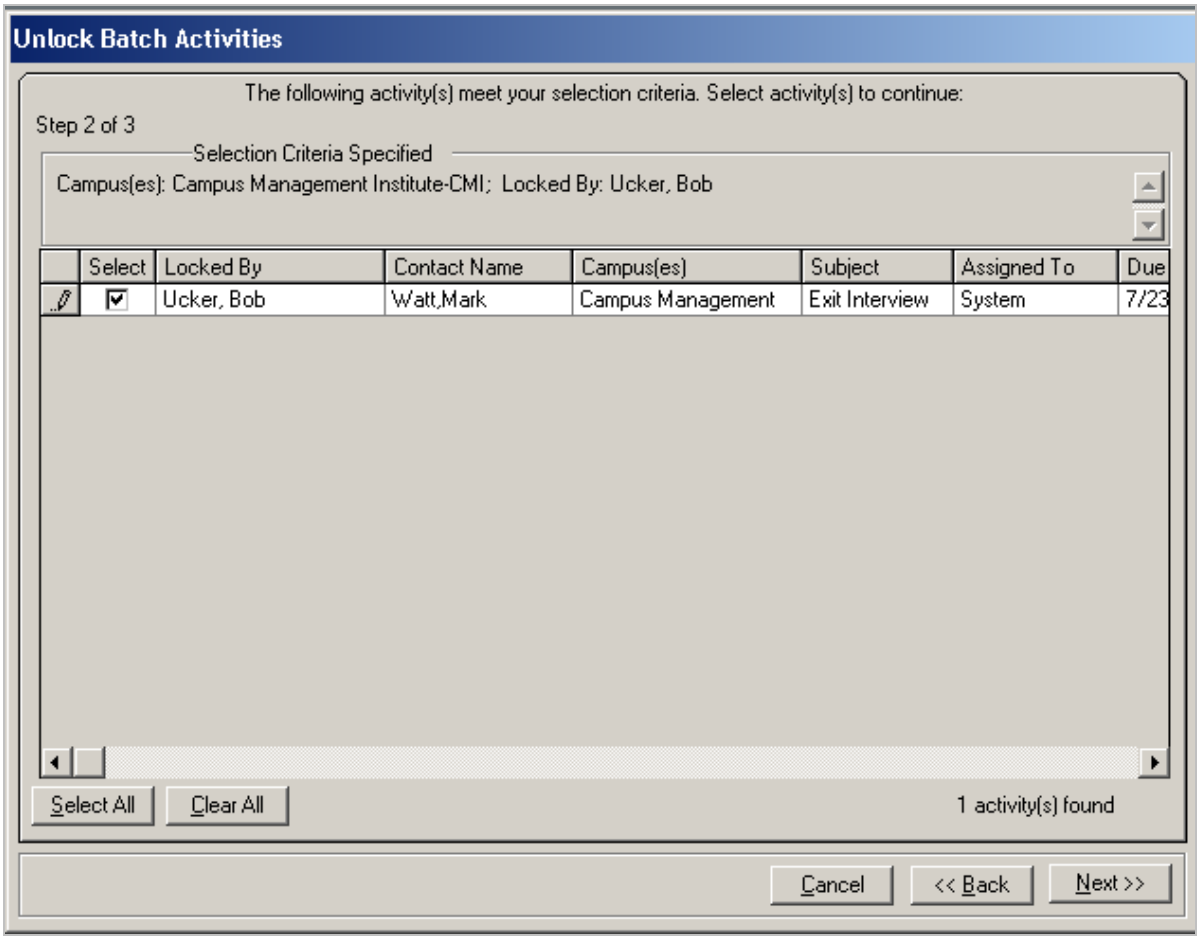
If CampusNexus Student unexpectedly terminates while users are viewing, editing, or closing an activity from the Contact Manager form, the activity is locked indefinitely until an SQL script is manually executed to unlock the activity or the following procedure is performed.

To unlock activities:

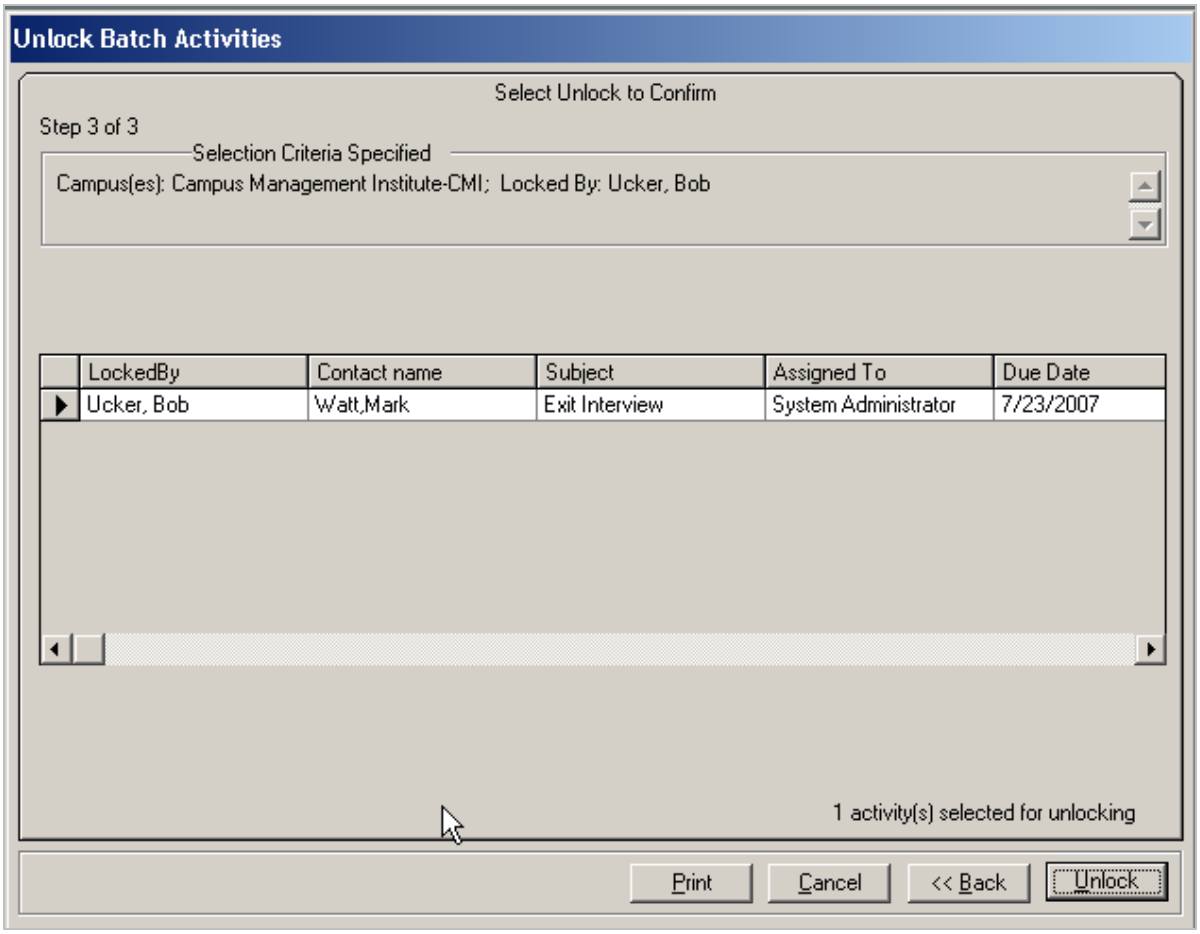
1. Navigate to **Tools > Contact Manager > Unlock Activities**. The Unlock Batch Activities wizard is displayed. The Campus(es) field shows the campus at which you are logged in.



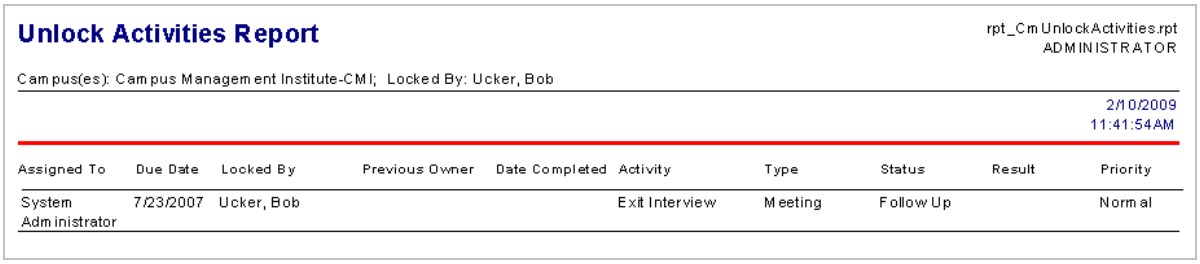
2. Select activities **By Campus** (default) or **By Staff**.
3. From the **Locked by Staff** list (or ... button), select the name of the staff member whose activity is locked, and click **Next**.
4. In Step 2 of the wizard, select appropriate activities and click **Next**.



5. Review your selections in Step 3.



6. Click **Print** to view or print the Unlock Activities Report.



Note: If you click **Unlock** without printing the report first, a warning message is displayed stating that the selected activities will be unlocked. Click **Yes** to continue unlocking the selected activities without printing a report, or click **No** to remain on Step 3 of the wizard.

7. Click **Unlock**. A confirmation message is displayed. Click **OK**.

Tools > Admissions

The Tool > Admissions submenu option is as follows:

- Test File Layout Entry

Test File Layout Entry

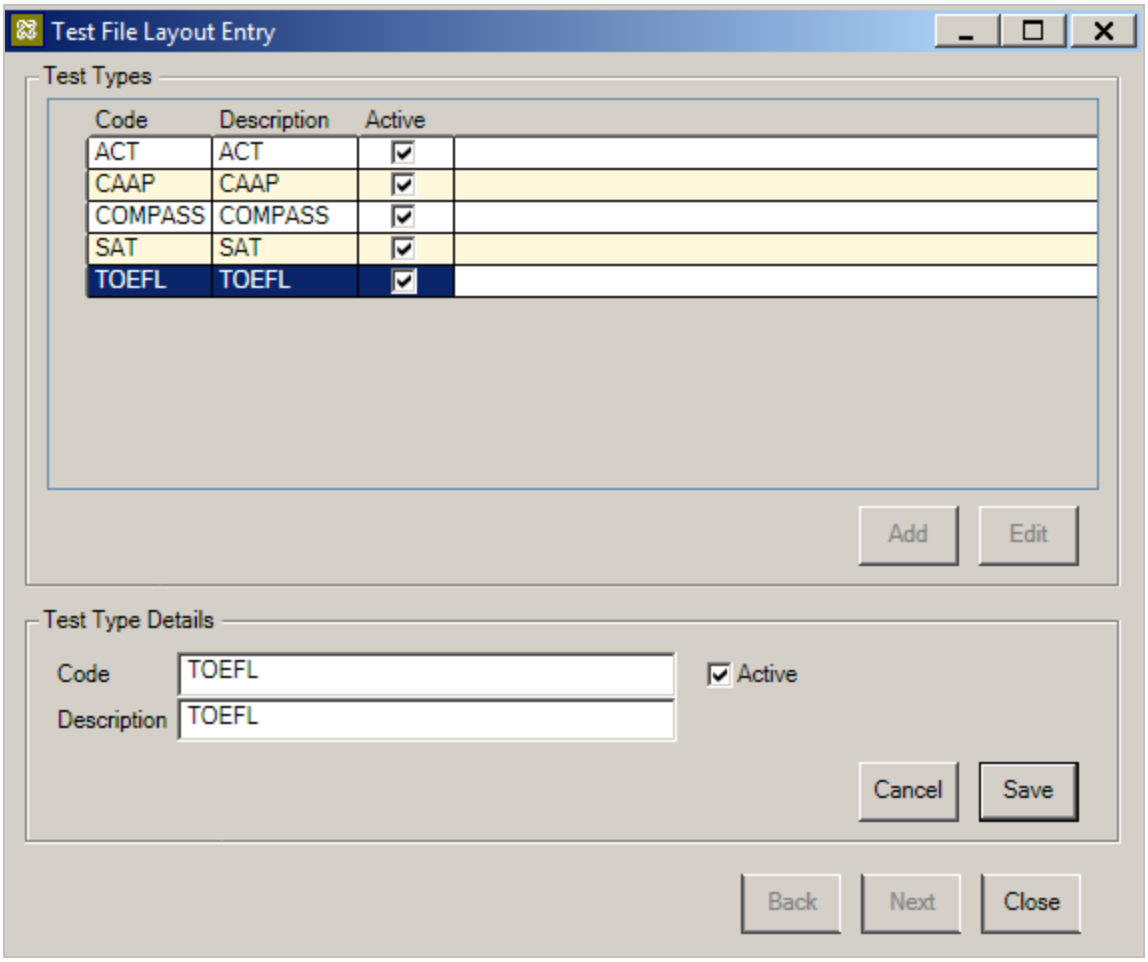
Use the Test File Layout Entry form to add file layouts for tests that need to have test scores imported into CampusNexus Student. You can also import test scores for additional tests, match the import results, conduct test mapping, and run the Entrance Test, Entrance Test Detail, and Entrance Test Batch Import Detail reports.

Note: Anthology Inc. no longer supports yearly updates for the admissions tests, including SAT, ACT, CAAP, COMPASS, and SAT to ACT conversion. Likewise, the ability to modify current file layouts for yearly updates is no longer supported. Institutions are now responsible for tracking changes to the tests and updating them in the CampusNexus Student database.

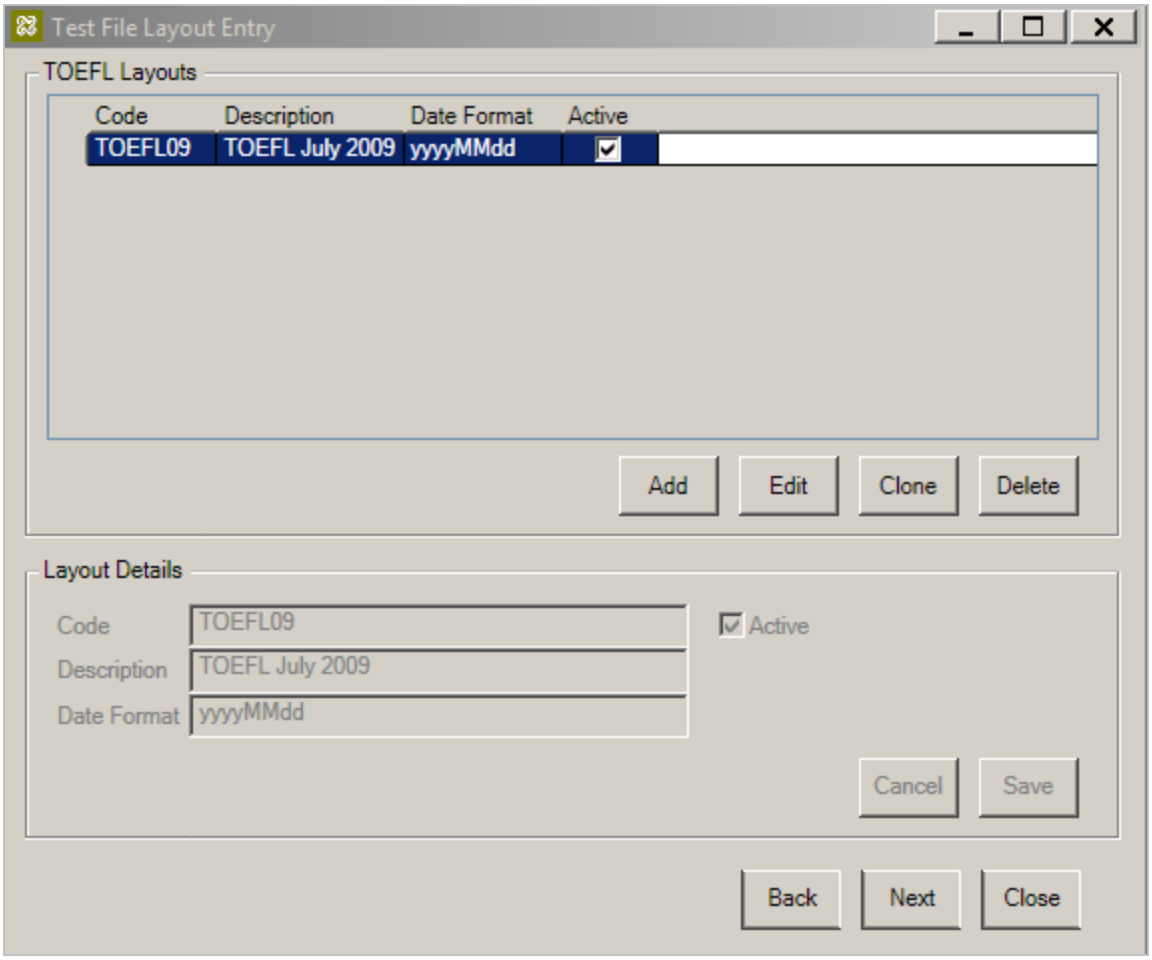
To add test file layouts:

1. Navigate to **Tools > Admissions > Test File Layout Entry**. The Test File Layout Entry form is displayed.

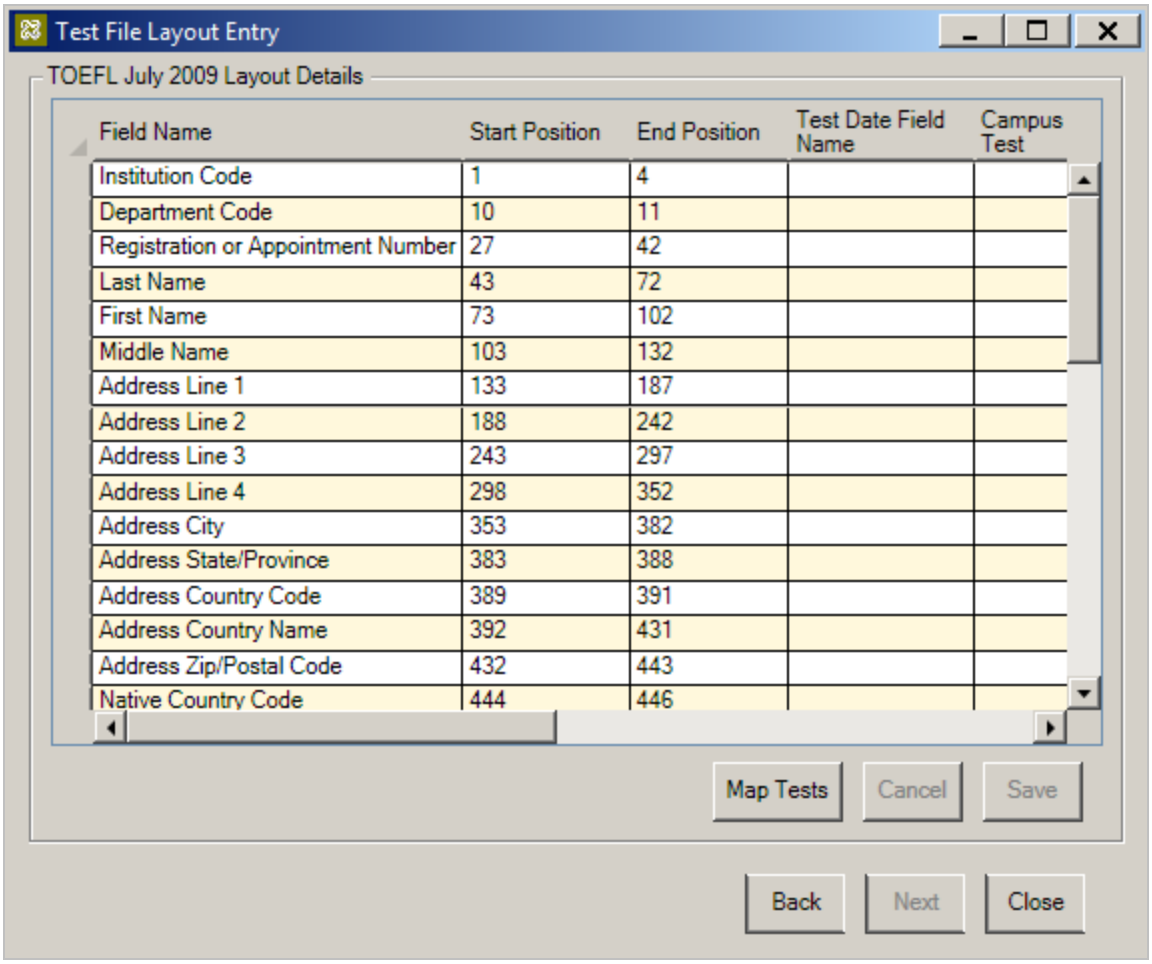
   You can add or edit a Test Type. If you add a test type, the Code for a new test type is capitalized and checked for uniqueness when you save it. The Code and Description fields are required and cannot contain spaces.



2. Select a **Test Type** and click **Next**. The Layout form for the selected Test Type is displayed. You can add, edit, clone, and delete the file layout of the Test Type.



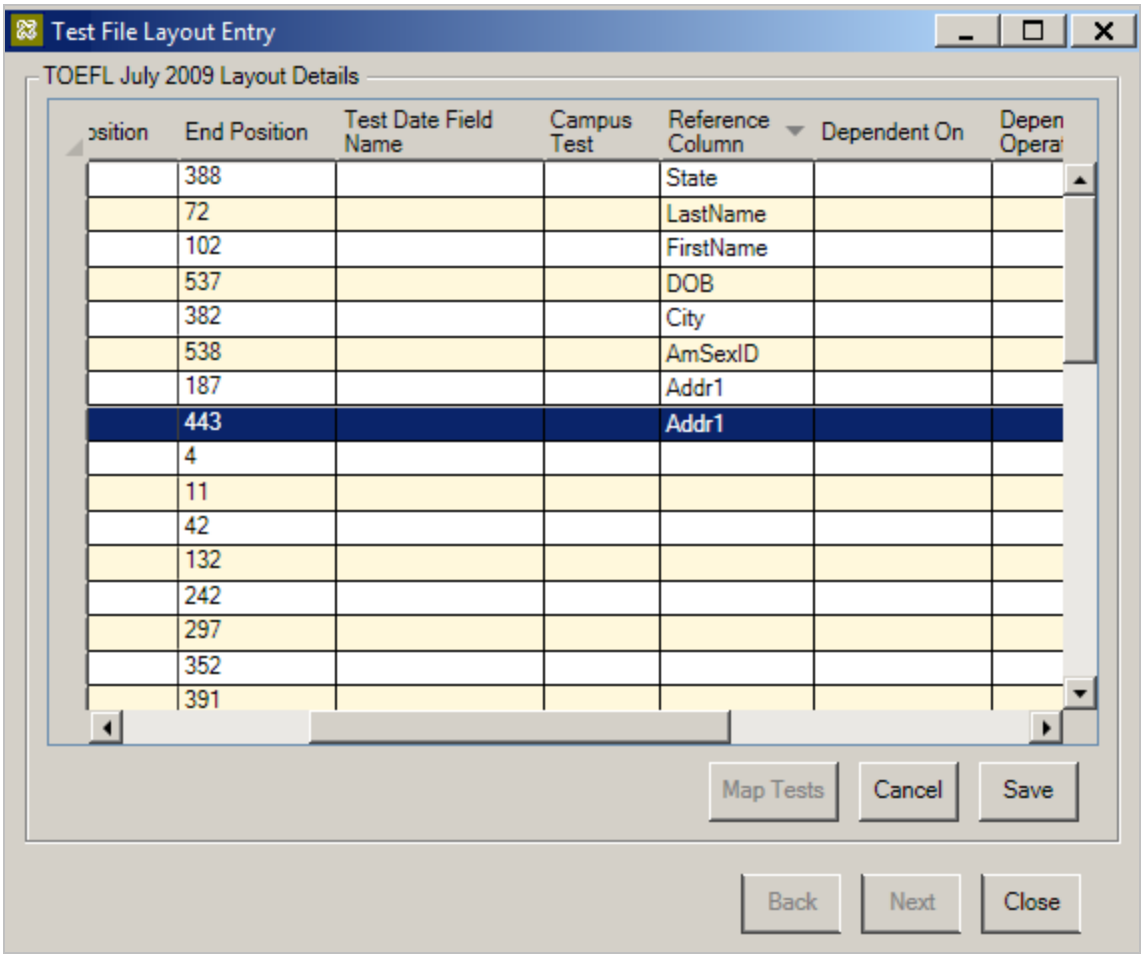
3. To clone a layout, click **Clone**. A confirmation message is displayed. Click **Yes**. Another message prompts you to enter the Code.
4. Specify the **Code** (max. 8 characters) for the cloned file layout and click **OK**. A message confirms that the file layout has been cloned, and you are returned to the Layout form. The file layout details are displayed in a grid.
5. Select a file layout from the grid and click **Next**. The Layout Details form is displayed. The Import Test Scores process uses the file layout details entered on this form to parse the test file while importing test scores into CampusNexus Student.



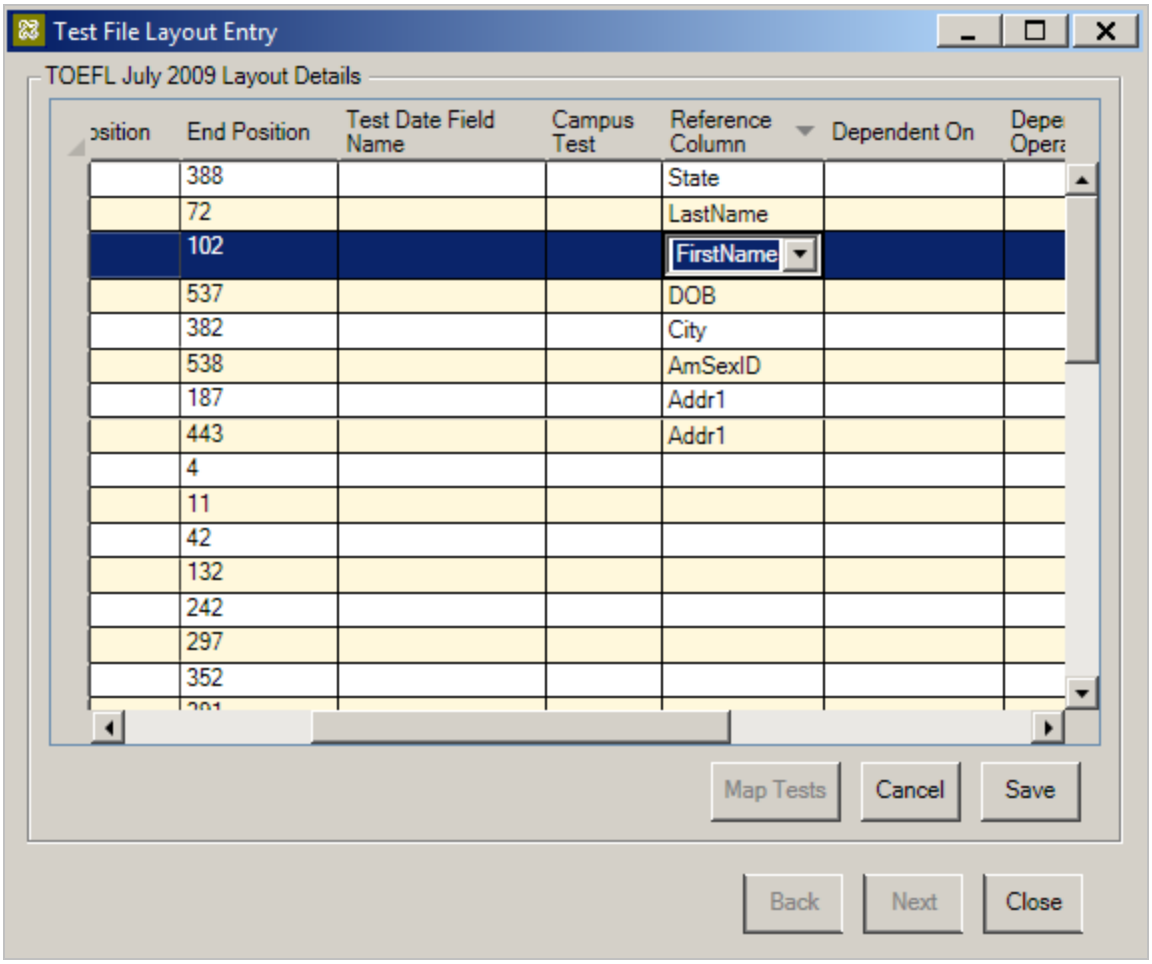
Notes about the layout details:

- The Reference Column consists of a drop-down list that appears when you click on the Reference Column header. The list is populated with the following fields:

  Addr1, AmSexID, City, DOB, Email, FirstName, HsGradDate, HsGradYear, LastName, MI, Phone, SSN, State, SyCountryID, Vet, and ZIP.



- You can designate a field as one of the above fields by clicking on the right side of the field in the grid to display the available selections. These fields are used by the Match Test Scores process when a new lead is created.



- A field can be designated as a College Code. The College Codes can be mapped to campuses.
    - If the College Code was previously mapped to a campus, that campus is used as the student's campus when creating a lead while importing tests.
    - If the College Code was not mapped to a campus, the default campus is used as the student's campus. Lead defaults can be configured at Setup > Admissions > Admissions Settings, Create Lead From Test = Yes
- A field can be designated as a conditional field, which means that how the value in this field is interpreted may depend on the value of the Dependent On column. The Dependent On column provides the following values:

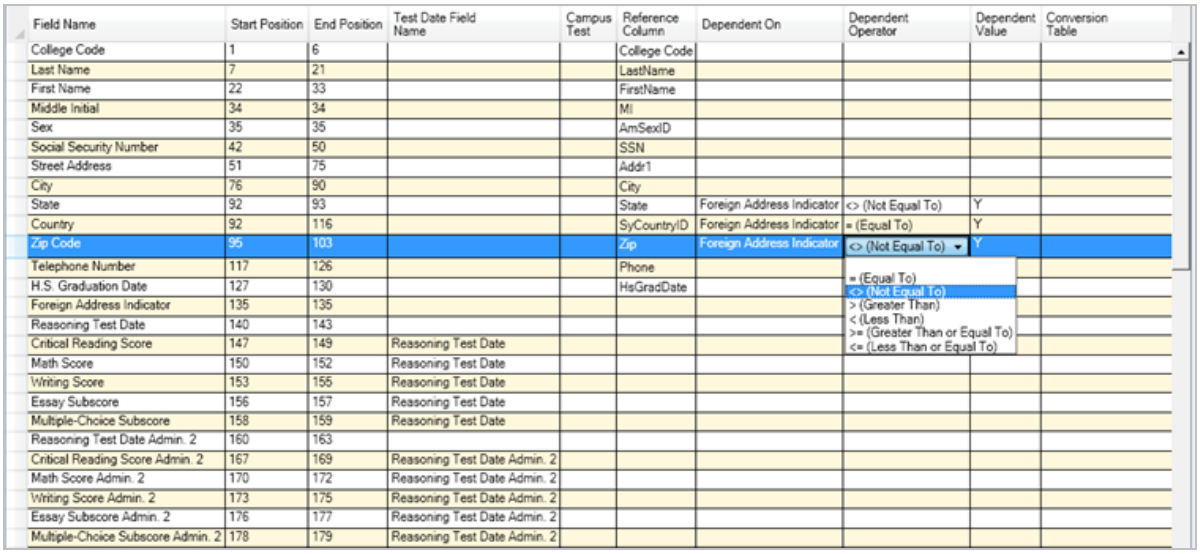
Depend On Column Values

Value	Description
=	Equal To
<	Less Than
<=	Less Than or Equal To

Value	Description
<>	Not Equal To
>	Greater Than
>=	Greater Than or Equal To

In the following example, the State, Country, and ZIP Code fields depend on the Foreign Address Indicator field.

- If the value extracted from the Foreign Address Indicator field is "equal to Y", positions 92 thru 116 are interpreted as the Country.
- If the value extracted from the Foreign Address Indicator field is "not equal to Y", positions 92 thru 93 are interpreted as the State, and positions 95 thru 103 are interpreted as the ZIP Code.



Field Name	Start Position	End Position	Test Date Field Name	Campus Test	Reference Column	Dependent On	Dependent Operator	Dependent Value	Conversion Table
College Code	1	6			College Code				
Last Name	7	21			LastName				
First Name	22	33			FirstName				
Middle Initial	34	34			MI				
Sex	35	35			AmSexID				
Social Security Number	42	50			SSN				
Street Address	51	75			Addr1				
City	76	90			City				
State	92	93			State	Foreign Address Indicator	<> (Not Equal To)	Y	
Country	92	116			SyCountryID	Foreign Address Indicator	= (Equal To)	Y	
Zip Code	95	103			Zip	Foreign Address Indicator	<> (Not Equal To)	Y	
Telephone Number	117	126			Phone				
H.S. Graduation Date	127	130			HsGradDate				
Foreign Address Indicator	135	135							
Reasoning Test Date	140	143							
Critical Reading Score	147	149	Reasoning Test Date						
Math Score	150	152	Reasoning Test Date						
Writing Score	153	155	Reasoning Test Date						
Essay Subscore	156	157	Reasoning Test Date						
Multiple-Choice Subscore	158	159	Reasoning Test Date						
Reasoning Test Date Admin. 2	160	163							
Critical Reading Score Admin. 2	167	169	Reasoning Test Date Admin. 2						
Math Score Admin. 2	170	172	Reasoning Test Date Admin. 2						
Writing Score Admin. 2	173	175	Reasoning Test Date Admin. 2						
Essay Subscore Admin. 2	176	177	Reasoning Test Date Admin. 2						
Multiple-Choice Subscore Admin. 2	178	179	Reasoning Test Date Admin. 2						

- The Conversion Table, Conversion From Column, and Conversion To Column columns allow conversion of a test score to an equivalent score. You can specify the Conversion Table to be used for the conversion, the From Column, and the To Column.

  The following ACT layout example specifies the SyACTtoSAT Conversion table as the Conversion Table to convert extracted ACT test scores to their equivalent SAT scores.

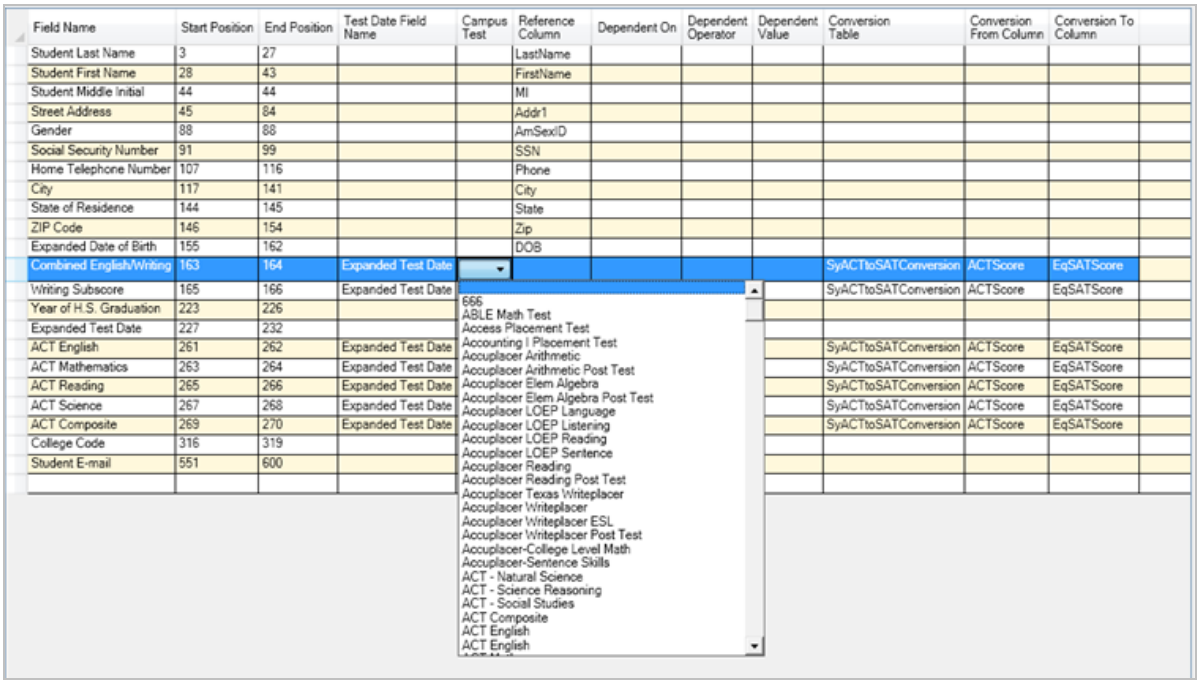
Field Name	Start Position	End Position	Test Date Field Name	Campus Test	Reference Column	Dependent On	Dependent Operator	Dependent Value	Conversion Table	Conversion From Column	Conversion To Column
Student Last Name	3	27			LastName						
Student First Name	28	43			FirstName						
Student Middle Initial	44	44			MI						
Street Address	45	84			Addr1						
Gender	88	88			AmSexID						
Social Security Number	91	99			SSN						
Home Telephone Number	107	116			Phone						
City	117	141			City						
State of Residence	144	145			State						
ZIP Code	146	154			Zip						
Expanded Date of Birth	155	162			DOB						
Combined English/Writing	163	164	Expanded Test Date						SyACTtoSATConversion	ACTScore	EqSATScore
Writing Subscore	165	166	Expanded Test Date						SyACTtoSATConversion	ACTScore	EqSATScore
Year of H.S. Graduation	223	226			HSGradYear						
Expanded Test Date	227	232									
ACT English	261	262	Expanded Test Date						SyACTtoSATConversion	ACTScore	EqSATScore
ACT Mathematics	263	264	Expanded Test Date						SyACTtoSATConversion	ACTScore	EqSATScore
ACT Reading	265	266	Expanded Test Date						SyACTtoSATConversion	ACTScore	EqSATScore
ACT Science	267	268	Expanded Test Date						SyACTtoSATConversion	ACTScore	EqSATScore
ACT Composite	269	270	Expanded Test Date						SyACTtoSATConversion	ACTScore	EqSATScore
College Code	316	319			College Code						
Student E-mail	551	600			email						

- The Campus Test list displays all active Campus Tests. A test can be mapped or unmapped. When the Map Tests button is clicked, all specified mappings are applied by inserting records or removing records for each active Campus. This provides the initial mapping of a test to a Campus Test. You can override this default mapping by navigating to Setup > Admissions > Test Mapping (tab) > Test Field and College Codes Configuration (button).

  This feature is intended to facilitate specifying default mapping of a new test; it is not intended for ACT, SAT, CAAP, or COMPASS.

  If the Campus Test column is left empty for a test and the Map Tests button is clicked, existing mappings are deleted.

  If the Campus Tests column for a test is empty in the Configure Tests form, it means that the Campus Test is not available for the selected campus. Go to Lists > Admissions > Tests, and edit a test to identify the campuses for which it is available.



6. Click **Save**.

   The following validations occur when Save is clicked:

   a. Field Name, Start Position, and End Position cannot be empty.

   b. Start Position and End Position must be numeric values greater than zero.

   c. End Position cannot be less than the corresponding Start Position.

   d. Field Name cannot be duplicated.

   e. Test Date Field Name must be defined as a Field Name.

   f. Dependent On must be defined as a Field Name.

   g. Test Date Field Name cannot reference itself.

   h. Dependent On cannot reference itself.

   i. When a Dependent On field is defined, corresponding Dependent Operator and Dependent values must be defined.

   j. Dependent Operator and Dependent Value can only be specified when Dependent On is specified.

   k. Conversion Table, Conversion From, and Conversion To are not required; however, if a value is entered, it cannot consist only of spaces.

   l. When Conversion Table is specified, Conversion From and Conversion To columns must also be defined.

   m. Conversion From and Conversion To columns can only be specified when Conversion Table is defined.

   n. Tests are the fields that have Test Date Field Name filled. They cannot have Reference Column specified.

   o. Only Test fields can have Conversion Table, Conversion From, and Conversion To columns specified.

   p. Only Test fields can be mapped to a Campus Test.

   q. Maximum lengths:

   Maximum Field Lengths

Field	Number of Characters
Field Name	200 characters
Test Date Field Name	200 characters
Dependent On field	200 characters
Dependent Value field	100 characters
Conversion Table field	100 characters
Conversion From Column field	100 characters
Conversion To Column field	100 characters
Start Position	6 digits

Field	Number of Characters
End Position	6 digits

Tools > Financial Aid

The Tools > Financial Aid submenu options are as follows:

- Manage COD Originations
- FISAP Data Correction
- Update Disbursement Information
- Fix Duplicate FaStudent Pell Records
- Link Payment to Scheduled Disbursements
- Update Award Information
- Student Pace Evaluation
- Gainful Employment Configuration (Refer to Help > Regulatory Help.)
- Education Level Setup (Refer to Help > Regulatory Help.)
- College Financing Plan Configuration (Refer to Help > Regulatory Help.)
- Multiple Disbursements

Manage COD Originations by Student

Use this tool to keep Origination changes made on the COD website synchronized with CampusNexus Student. Permission to use this tool by is set by selecting the Allow Override of COD Change Status field under Setup Menu > Staff > Staff Members > User Info Financial Aid Subtab.

You can override the following Originations:

For Pell, ACG, and SMART grants: Origination Process date, Origination Status, Pell Amount

For TEACH grants: Origination Process date, Origination Status, Pell Amount, ATS Status, ATS Link Indicator

For Direct Loans: Acknowledge date, Origination Status, PN Status, MPN Type, MPN Indicator, Plus Credit Decision Status, Loan Amount Requested

Notes:

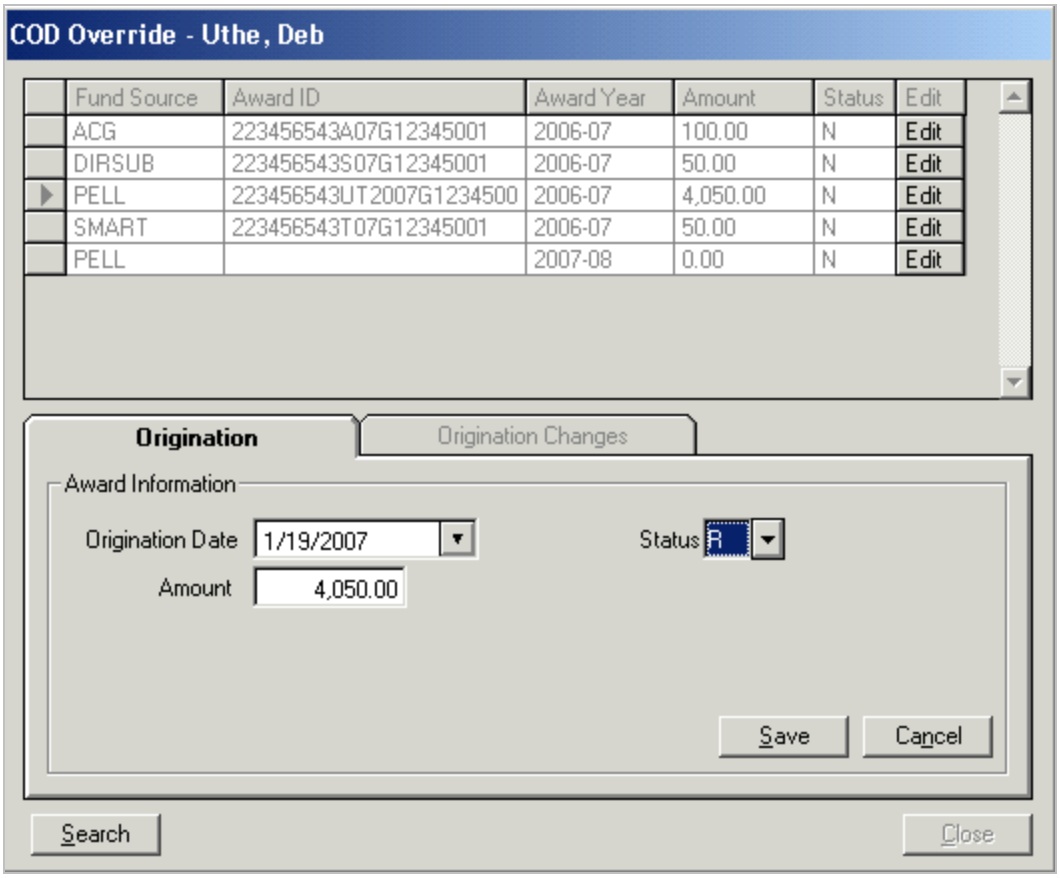
- When Automated Processes are enabled, for a Stafford loan disbursement to be exported, the MPN Link Indicator field should contain a value, that is, an MPN Response (CRNPXXOP) file is imported into the database.
- For a Direct PLUS loan disbursement to be exported, ensure the following:
    - The MPN Link Indicator is Y.
    - The Credit Decision Status value selected is A, E, or C.

To manage COD originations by student:

1. Navigate to **Tools > Financial Aid > Manage COD Originations by Student**. The COD Override form is displayed.
2. To search for a student, click **Search**, otherwise select the desired **Fund Source**, and click on the corresponding **Edit** button.
3. Depending on the selected found source, the Origination tab or the Origination Changes tab is enabled. The fields on the Origination tab vary depending on the selected fund source. Proceed with the steps for the Origination tab or the Origination Changes tab.

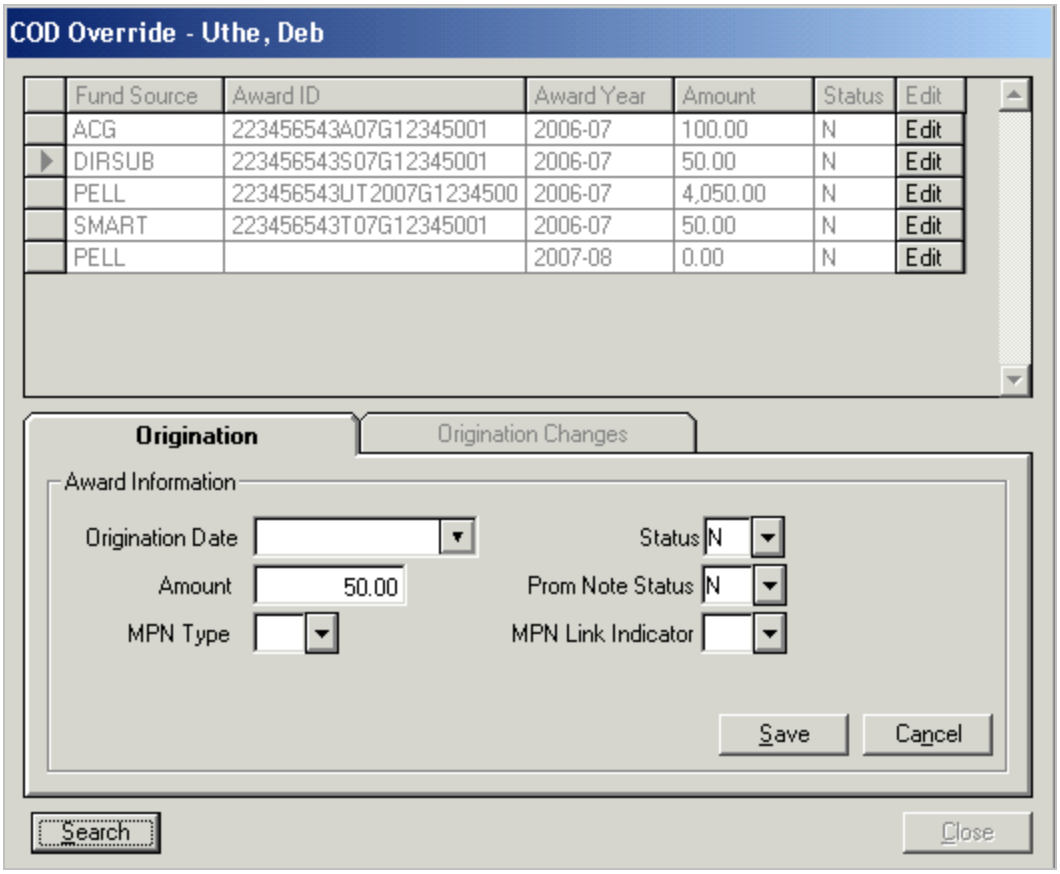
Origination Tab

Pell, ACG, SMART



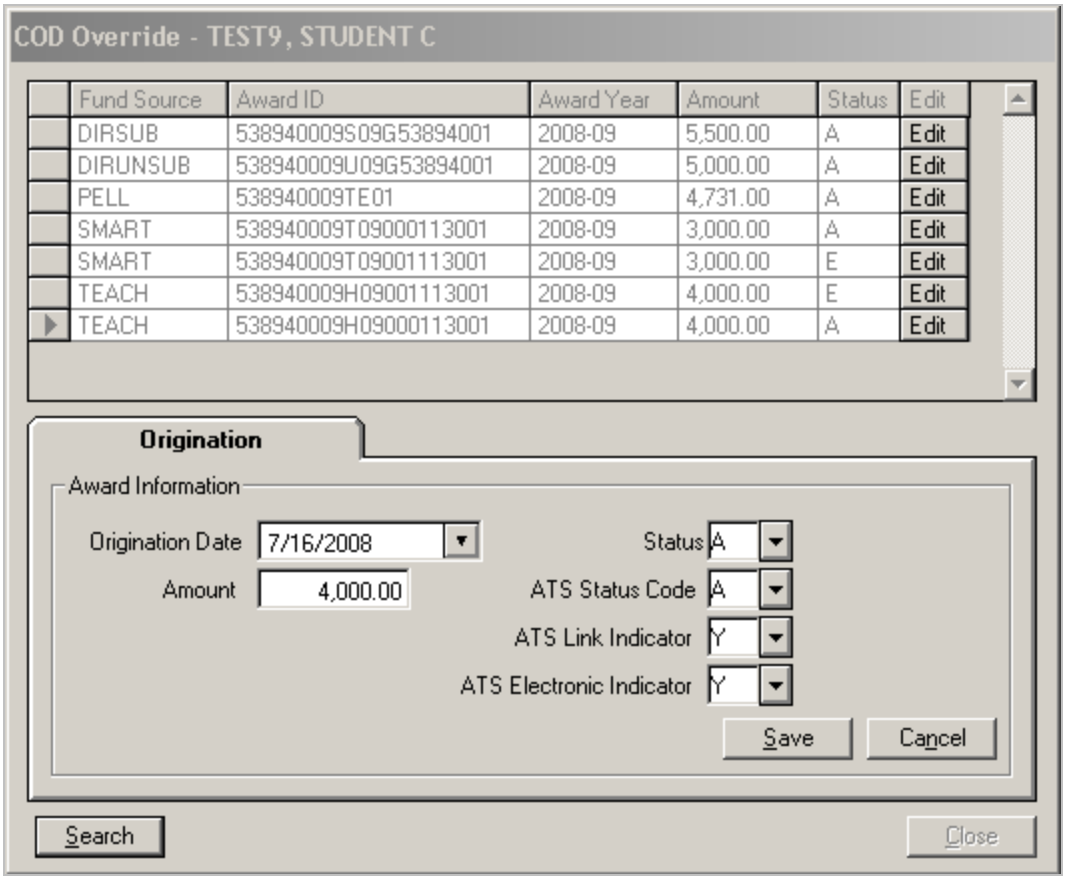
1. Select an **Origination Date**.
2. Select the applicable origination **Status**.
3. Specify an **Amount**.
4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Direct Loan



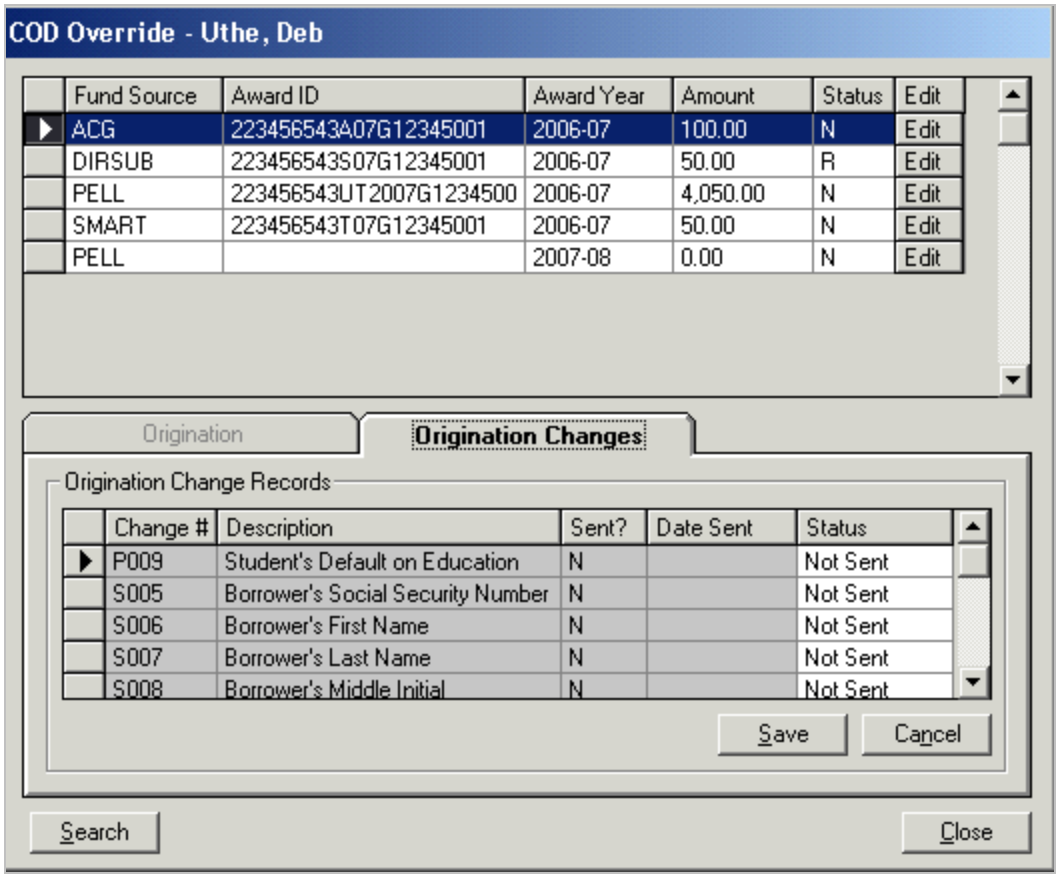
1. Select an **Origination Date**.
2. Select the applicable origination **Status**.
3. Specify an **Amount**.
4. Select a **Prom Note Status**.
5. Select an **MPN Type**.
6. Select an **MPN Link Indicator**.
7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

TEACH



1. Select an **Origination Date**.
2. Select the applicable origination **Status**.
3. Specify an **Amount**.
4. Select the applicable **ATS Status Code**.
5. Select the applicable **ATS Link Indicator Code**.
6. Select the applicable **ATS Electronic Indicator Code**.
7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Origination Changes Tab



1. Select an **Origination Change Record** from the list.
2. Click in the **Status** field of the selected record. A list of available options is displayed. Select the status to apply to the record.
3. Specify an **Amount**.
4. Select a **Prom Note Status**.
5. Select an **MPN Type**.
6. Select an **MPN Link Indicator**.
7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

FISAP Data Correction

Note: Please access Regulatory Help for the latest content about FAFSA, ISIR, and COD processing.

Update Disbursement Information

When an institution changes a start date for a term, the Disbursement Schedule dates need to be adjusted so that disbursements are not paid out early. The Update Disbursement Information tool automates this adjustment.

To update disbursement information:

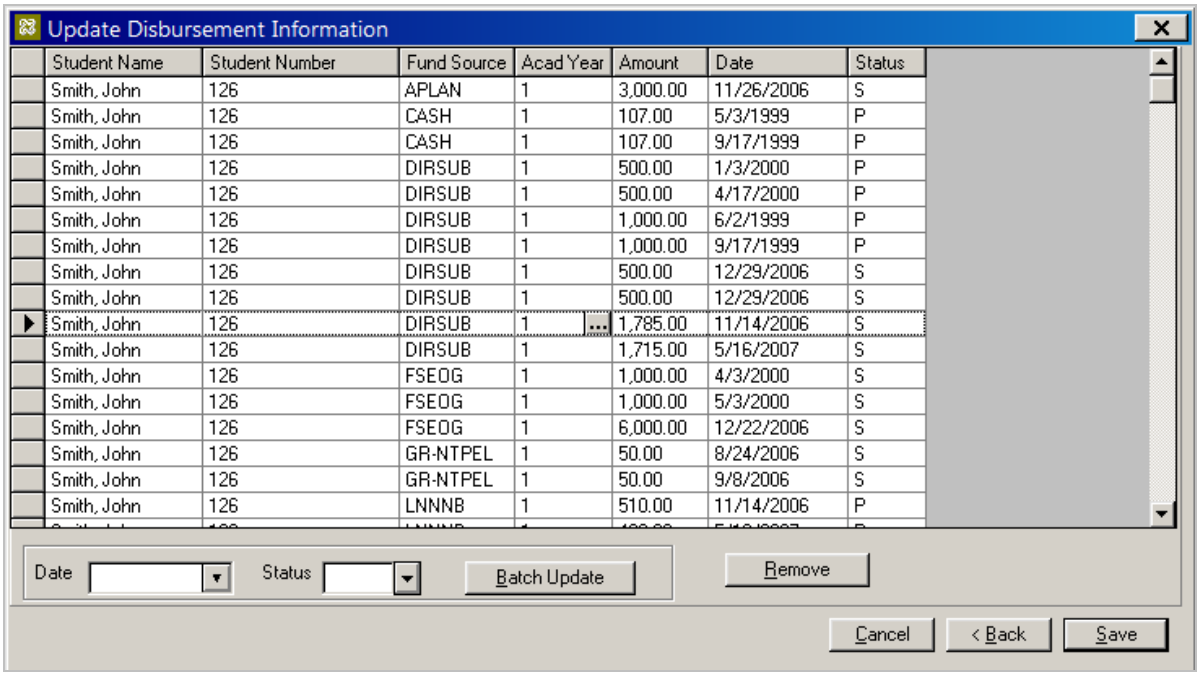
1. Navigate to **Tools > Financial Aid > Update Disbursement Information**. The Update Disbursement Information form is displayed.

   - To update information for an individual, select **Individual** and enter the proper information in the **Student**, **Term**, **Fund Source**, and **Award Year** fields.
   - To update information for a group of students, select **Group** and enter the proper information in the **Term**, **Fund Source**, **Disbursement Batch ID**, **Campus**, **Award Year** fields. Select the **First Time Borrowers** check box to restrict the updates for first-time borrowers only.

2. Click **Next** to assemble the records affected. A grid displays the retrieved records.

   Note: To change the data in the grid, click on a column and select a value from drop-down list that is displayed after you click on the column.

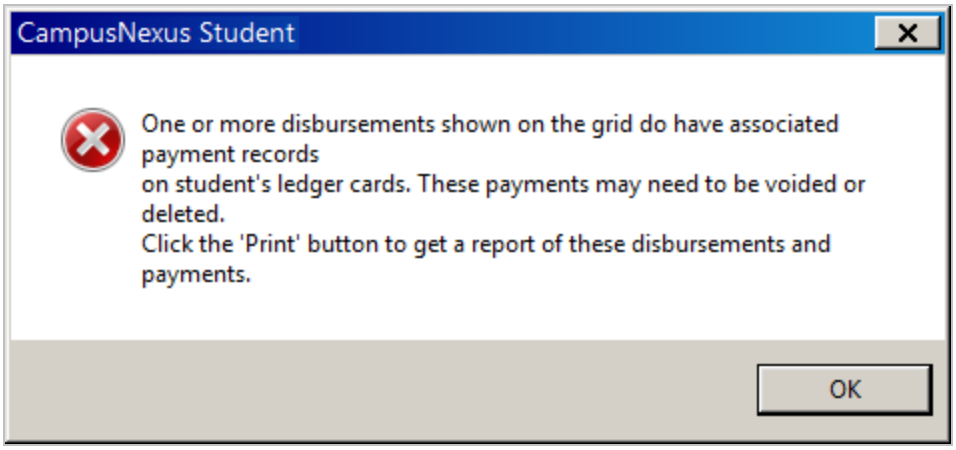
   When you change the disbursement date, Academic Year, Payment Period, or Loan Payment Period), the other columns are automatically updated. For example, if you change the disbursement date, the other columns are updated with appropriate values to encompass that disbursement date.



3. Specify the **Date** for the disbursement.
4. Select the disbursement **Status**. The options include:

    - **C** for cancelled
    - **R** for ready to pay
    - **P** for paid
    - **S** for scheduled

    Note: When you change a disbursement status from P to any other status (R, C or S) and a payment transaction exists for the disbursement record that you are changing, a message alerts you that one or more disbursements within this update have payment transactions associated with them. To see the list of disbursements with payment transactions, click **Print**.



5. To exclude a record from the update process, select the record and click **Remove**.

Note: CampusNexus Student validates the data to ensure that the corresponding disbursement received record is deleted, even when changing the status for a paid scheduled disbursement without a payment record. These types of disbursements usually result from data conversion.

6. Click **Batch Update**. CampusNexus Student updates all listed student's disbursements with the selected date and status information.

Fix Duplicate FaStudent Pell Records

Note: Please access Regulatory Help for the latest content about FAFSA, ISIR, and COD processing.

If a student has duplicate Pell (FaStudentPell) records, origination information to can be reported improperly. Use this tool to combine duplicate records into a single record based on the combination of SyStudentID, Award Year, and AttRFMSPellId for the selected campuses.

When you select a student, and an award year, CampusNexus Student displays all Pell records associated with the student for the award year. FaStudentPell records with blank award years are also displayed.

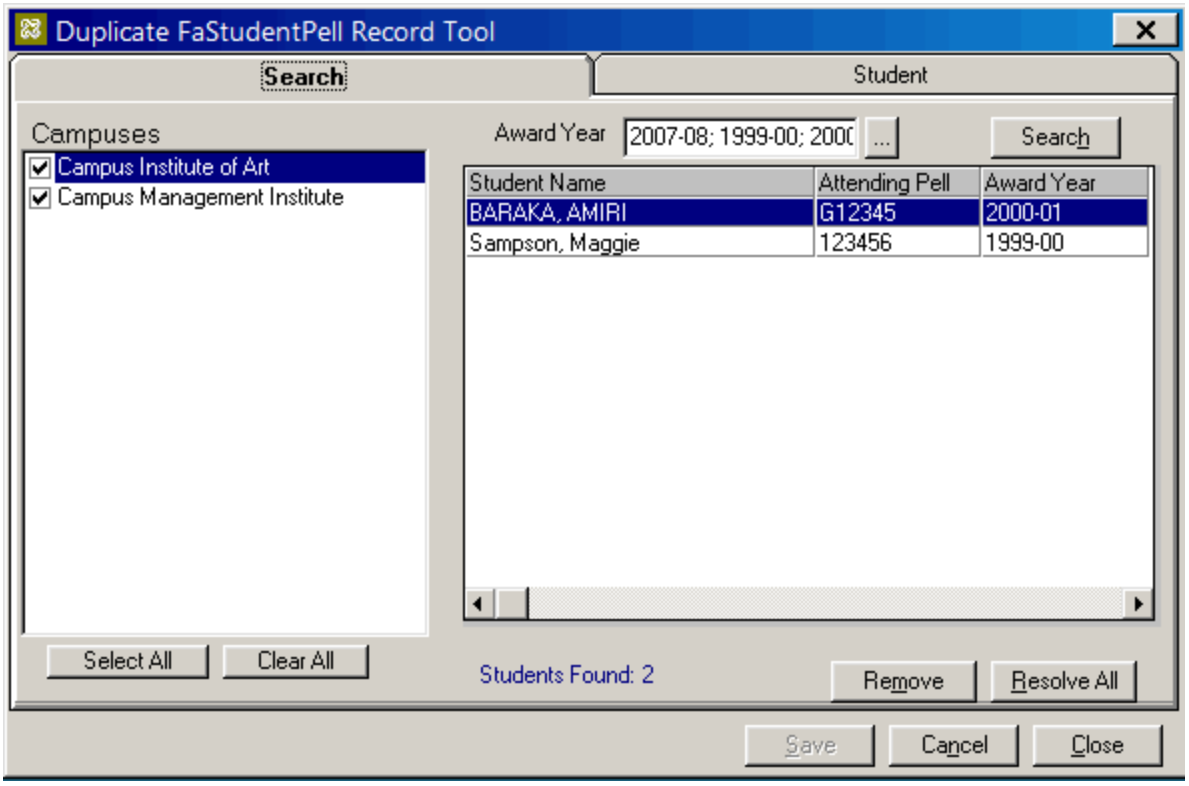
CampusNexus Student compares the values from the records and displays the fields containing different values. You determine which value to use in the resultant record.

This tool can merge the duplicate records into a single Pell record and delete the remaining record(s) from CampusNexus Student. You can cancel the process up until the Delete prompt.

See also FISAP Data Correction in Regulatory Help.

To fix a duplicate Pell record:

1. Navigate to **Tools > Financial Aid > Fix Duplicate Pell Records**. The Duplicate FaStudentPell Record Tool is displayed.



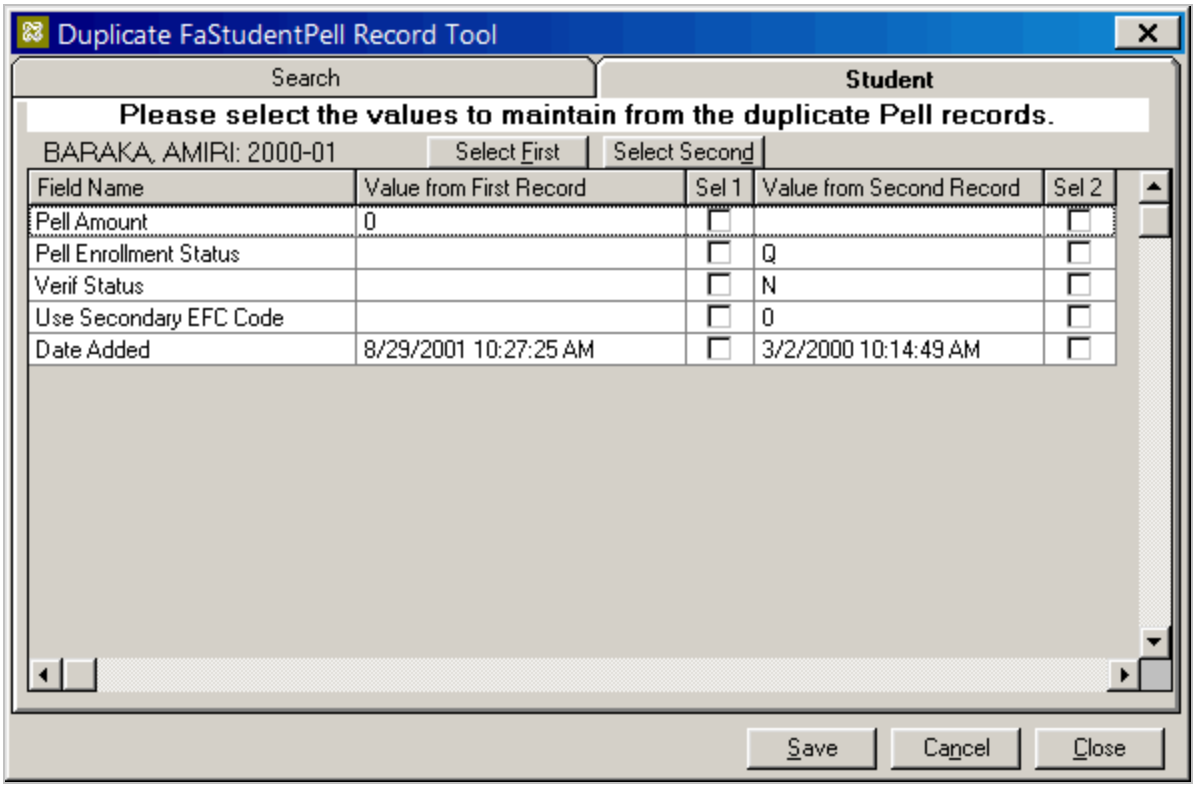
2. Select one or more **Campuses**.
3. Select an **Award Year**. To select more than one award year, click ... . All available award years are displayed. Select the award years to include in your search.
4. Click **Search**. CampusNexus Student retrieves all students that match your search criteria.

5. Select a student and click **Remove** to remove that student from your search results. To resolve Pell conflicts for all students, click **Resolve All**.

   Note: Up to three Pell records can be displayed in the grid.

6. If any Pell records are not exact duplicates, CampusNexus Student displays a message indicating the number of records that could not be resolved. Each of these records must be merged individually. Select the correct values and click **OK** to proceed.

7. Select a student and click the **Student** tab. The Student tab displays all conflicting data from duplicate Pell records. Fields with blank or null values are not displayed.



8. Select the values to keep from each record and merge the records into one, keeping only the correct data. You can select all values from one record or select values individually.

   a. To select all values from one record, click the **Select First** or **Select Second** button.

      - If you see only these two buttons, you can assume that there are only two Pell records for this student.
      - If you see a **Select Third** button, repeat the merge process to determine if there are more than three Pell records.

   b. To select individual values from each record, use the check boxes in the grid to select values associated with each field name.

9. Click **Save** to merge all data into one Pell record.

All other Pell records are deleted and CampusNexus Student updates all pertinent forms (ISIR, FAFSA, FaStudentAid, FaPellDisb and FaPellSpecialDisb) with the new Pell ID. If no conflicts are found, CampusNexus Student performs the merge.

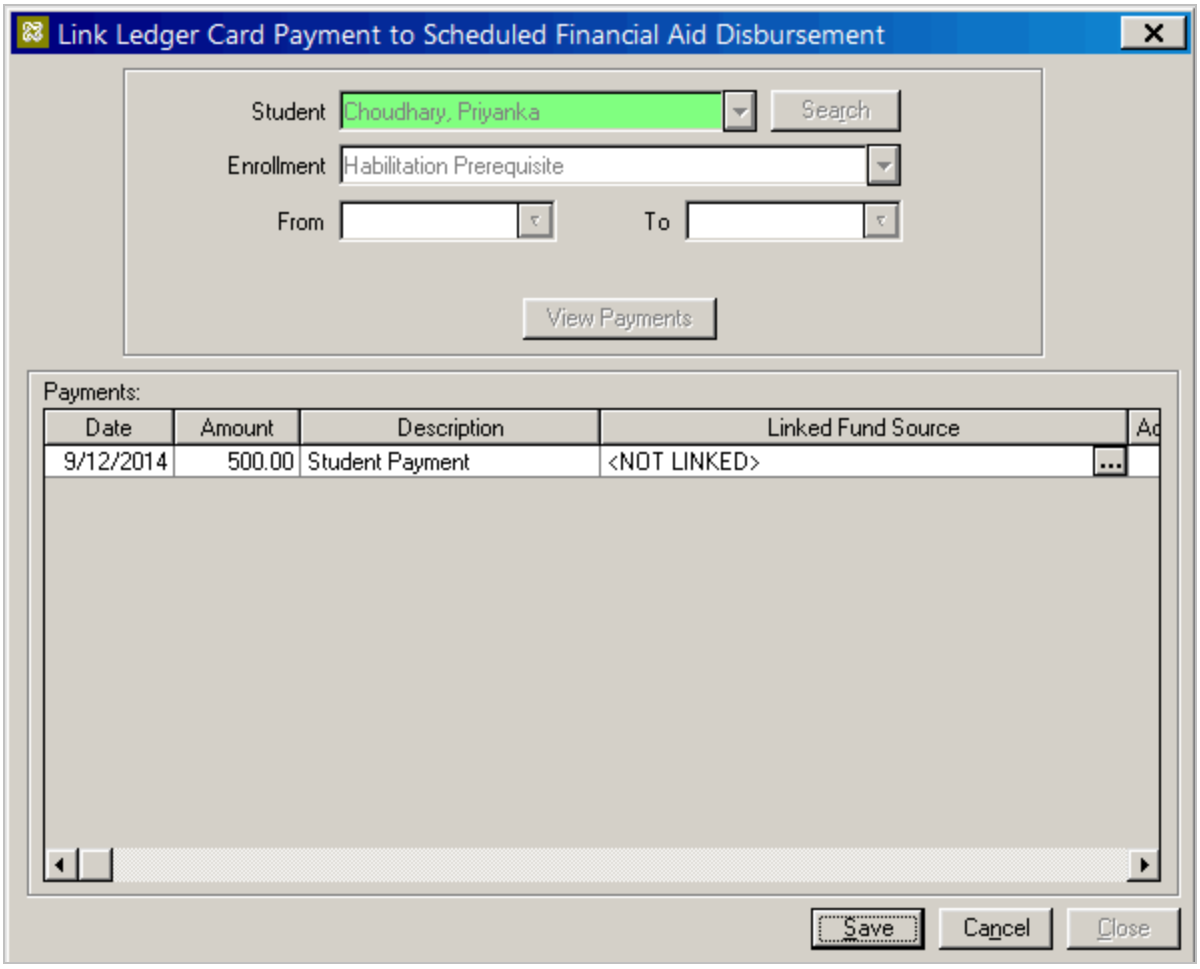
10. Click **Close** to close the form.

Link Payments to Scheduled Disbursements

Student ledger card payments are not always linked properly to financial aid packaging fund sources and scheduled disbursements. Institutions often discover this issue after conversion, when they try to reconcile fund source accounts or review past due and expected cash flow reports. This tool enables the authorized user to link an existing ledger card payment to a scheduled disbursement for a specific academic year.

To link a ledger card payment to a scheduled disbursement for an academic year:

1. Navigate to **Tools > Financial Aid > Link Ledger Card to Scheduled Financial Aid Disbursement**. The following form is displayed:



2. Click **Search** to find the student for whom you want to link payments.
3. Select an **Enrollment** for the student. This is not a required field. CampusNexus Student populates this field with the current enrollment for the student.
4. Select a **date range**.
5. Click **View Payments**. CampusNexus Student displays all unpaid scheduled disbursements for the academic year.
6. For records listed as <NOT LINKED>, click

... to see available options for the payment. Choose the payment to link with a disbursement.

7. Click **Save** to update the existing records and create any new records needed to complete the link between disbursement and payment.

   The transaction is linked properly to the disbursement and is apparent when viewing the ledger card transaction details, paid disbursements for the fund source, or running reports that include Financial Aid and Student Account information for the fund source.

   Note: CampusNexus Student ensures that a disbursement received record does not already exist.

   - If a record exists, pertinent information from the received disbursement record is updated. This avoids the creation of duplicate disbursement received records.
   - If a record does not exist, the process proceeds normally.

8. When the selected payment and disbursement have been linked, you can continue linking disbursements by changing selections as follows:

   - Same enrollment and a different date range
   - Different enrollment and date range
   - Different student

Update Award Information

CampusNexus Student provides an update tool to edit an award year within the packaging module instead of having to delete the award and set up another award with the correct award year. The award year cannot be modified for awards (Pell Grants, Direct Loans) that have been reported to the COD.

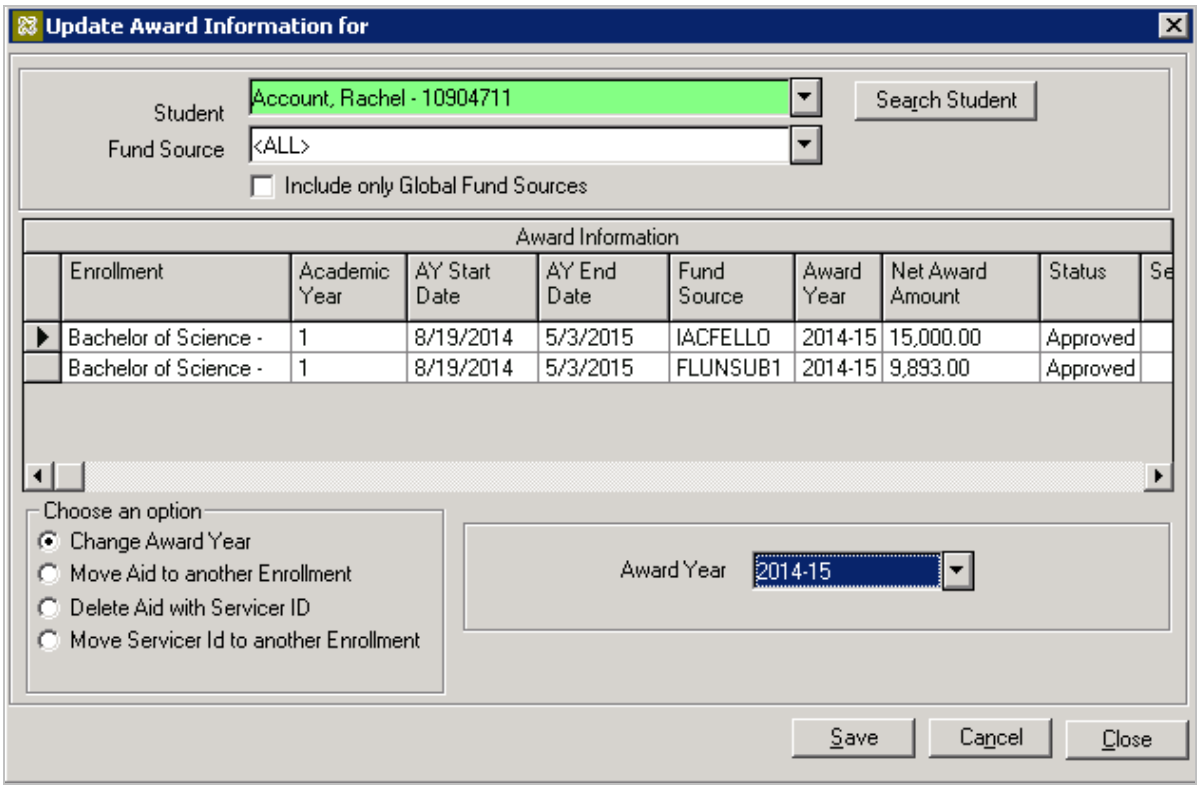
The Update Award tool can also be used to move aid from one enrollment to another, delete aid already associated with a Global Servicer ID, and move a Global Servicer ID from one enrollment to another.

This tool updates records one student at a time; however, it does not need to be closed and re-opened to update multiple student records.

> ⚠ Take extreme care when using this tool. Changes to awards can adversely affect a student's eligibility to receive aid. Erroneous reporting can lead to negative audit points and possibly affect your institution's eligibility to offer various types of aid to its students.

To update award information:

1. Navigate to **Tools > Financial Aid > Update Award Information**. The Update Award Information form is displayed.



2. Select a **Student** or click **Search Student** to find a student using the Search form.

   If you are already working with a student (student's name is displayed in the Recent Students window of your tool bar), CampusNexus Student loads that student's financial aid awards.

3. Select a **Fund Source**. The list includes all fund sources associated with this student.

4. Select or clear **Include only Global Fund Sources**. If selected, the grid displays only those fund sources that

have a servicer ID associated with each financial aid award.

5. Choose one of the following options:

   - **Change Award Year**: Select an award in the grid and use the Award Year list to choose a year. Click **Save**
   - **Move Aid to Another Enrollment**: Select this option to apply an award to a different enrollment. If selected, CampusNexus Student displays the Enrollment and Academic Year list box. Select the enrollment and academic year and click **Save**. This option is useful when working with students who have multiple enrollments.

     You can only move title IV awards from a term-based program (Academic Calendar 1, 2, 3, and 4) to another term-based program. Additionally, you can only move title IV awards from a clock hour program (Academic Calendar 5) to another clock hour program, and move title IV awards from a non-term program (Academic Calendar 6) to another non-term program. CampusNexus Student displays a message indicating that an award cannot be moved due to Academic Calendar incompatibility between enrollments.

     When a direct loan is moved between clock hour and non-term programs, you can select the appropriate loan period to assign to the award being moved. You are prompted to create loan periods for the new enrollment if no loan periods are found.

     When you move a direct loan award to an enrollment that has an overlapping loan period and did not populate the fields "Overlap Period Credits/Hours" and "Overlap Period Weeks" for the enrollment in the “NSLDS Loans / Overlapping Loan Periods” tab of the NSLDS Previous Institute Details form, the message below is displayed. The "Overlap Period Credits/Hours" and "Overlap Period Weeks" are required to create loan periods to award direct loans for the overlapping loan period.

     
   - **Delete Aid**: If the award has an associated Global servicer ID, the award selected can be deleted. Click **Save**. This feature is available only to institutions using the Global financial aid servicer.
   - **Move Servicer ID to Another Enrollment**: If the selected award has an associated Global servicer ID, this ID can be moved and associated with another enrollment. If this option is selected, CampusNexus Student displays the Enrollment and Academic Year list box. Select the enrollment and academic year and click **Save**. This feature is available only to institutions using the Global financial aid servicer.

Student Pace Evaluation (SPE)

The Student Pace Evaluation tool evaluates a student's academic progress and determines whether the student's Financial Aid payment period and academic year dates, as well as expected graduation date or externship date, if applicable, need to be extended due to the lack of academic progress.

The Financial Aid and Housing sections tool are only applicable for students enrolled in non-term based programs that contain payment periods: programs configured with an academic calendar of Credit Hours without Term or Clock Hours.

To be gathered by this tool, a student must have a class scheduled. The tool uses the classes on a student's schedule to determine when the student will complete payment periods and academic years, and to set the graduation dates. If there are not enough classes scheduled, CampusNexus Student uses date add logic from the end date of the last class to calculate when the student will complete the expected number of credits to finish the payment period.

You can run the tool manually or schedule a job to run the tool automatically. When using the automated option, we recommend that you choose a time frame that does not interfere with daily operations.

Using the SPE tool, Financial Aid, Academic, Career Services, and Externship Advisors can do the following without having to first verify the accuracy of date information:

- Identify students who are ineligible to progress to the next payment period or academic year due to lack of academic progress.
- Extend students' payment period and academic year end dates when students are ineligible to progress to the next payment period.
- Correctly identify students who need exit interviews for financial aid.
- Prepare students for Externships.
- Prepare students for Career Searches.

The following assumptions apply:

- The academic year is defined for each program, including the credits/hours and weeks that make up a full academic year.
- The 'Total Credits for Externship' value defined for the Program Version includes the credits for any associated Externship.
- The Externship is taken after completing the classroom courses.
- The "Expected Hours per Week for Externship" will only be used in the graduation date calculation once the student is enrolled in an Externship course.
- A student cannot be registered into overlapping terms unless term sequencing is being used.

For more information on how CampusNexus Student analyzes and manages these program types, see Title IV Payment Periods. See also Graduation and Externship Date Calculations.

Only students in a program version that uses an Academic Calendar of Clock Hour, Credit Hours Without Terms, or Non-Standard Term populate information in the Academic Year, Payment Period, and Disbursement section. Students in standard term programs are only displayed in the enrollment section with projected graduation dates.

In the case where there is at least one class scheduled in the payment period(s), but there are not enough classes scheduled to complete a payment period, CampusNexus Student uses prorating logic to determine the end date of the payment period.

Note: If an updated FA Clock to Credit Conversion Rate (As of 7/1/2011) was added to the configuration, the SPE tool functionality that completes the Clock to Credit conversion, when needed, checks the enrollment date for the student and ensures the correct conversion rate is used to provide the proper adjustments to the dates on the Academic years for the student. This ensures that the proper progression is executed on the student.

If configured to do so, for non-term institutions (Academic Calendars 5 and 6), the Student Pace Evaluation tool can trigger the following automatic updates:

- The Origination Status of an originated Pell award is set from "Accepted" or "Batched to Send" to "Ready to Send" when the anticipated disbursement date of a Pell disbursement is updated by the Student Pace Evaluation tool. See COD Grants Setup.
- Origination change records are created when the Academic Year (AY) start/end dates, Loan Period (LP) start/end dates, or Disbursement dates are updated for a Direct Loan (DIRSUB, DIRUNSUB, and DIRPLUS) by the Student Pace Evaluation tool. See Direct Loan Setup.

Scheduled Complete Flag

For programs with credit or hour requirements, the SPE tool flags a payment period (PP) as “Scheduled Complete” in the database when enough courses are registered to complete the credits/hours of a PP. The SPE tool adjusts the final AY/LP for any extra credits/hours.

The Scheduled Complete flag is able to use courses in a scheduled, current, or completed status to determine if there are enough courses with credits that would potentially complete the payment period. If a course is completed, the grade posted must ‘earn the credits’ in order to utilize the credits or hours value of the course. The scheduled complete flag does not reference the IW milestone.

Complete Flag

The Complete flag is set when the system date is > than the IW milestone of a PP and there are enough credits/hours associated with grades that ‘earn the credits’ and/or meet the minimum grade points configured for the course requirement.

Applying the flags with ‘Disallow Rolling Credits’ disabled:

Academic Years:

In any payment period of an AY when ‘Disallow Rolling Credits’ is not enabled, the AYs progress at the rate defined in the FSA handbook. Therefore, Scheduled Complete/Complete flags for academic year PPs are set using cumulative counts (for the enrollment) of credits/hours for course work with an end date equal to or later than the SPE start date. No faster progression occurs with this setting.

Example:

For a 24-credit AY sequence utilizing 12 credit payment periods, CampusNexus Student would set the flags at 12, 24, 36, 48, etc., respectively. The PPs of the first AY sequence may contain 28 actual credits even though the AY only requires 24 (12 for each PP). The 4 extra credits and any extra weeks are counted toward completing the credit and weeks requirement of the next sequence.

Loan Periods:

The flags are applied using cumulative counts with in each loan period (LP). There is no carryover of extra credits/hours to the subsequent LP sequence.

Example:

For a 24 credit AY sequence utilizing 12 credit payment periods (PP), CampusNexus Student would set the flags at 12, 24|reset the counts| 12,24| reset the counts, etc., respectively. The PPs of the first LP sequence may contain 28 actual credits even though the LP only requires 24 (12 for each PP). The 4 extra credits and any extra weeks are not counted toward completing the credit and weeks requirement of the next sequence. Note that any extra credits/hours or weeks earned during the first PP of an LP sequence can carry over to the second PP of that sequence.

Applying the flags with ‘Disallow Rolling Credits’ enabled:

This setting allows the flags for AY PPs to mimic the logic used for LPs. The flags are applied using cumulative counts with in each loan period (AY). There is no carryover of extra credits/hours to the subsequent AY sequence.

Note that the AY/LP evaluation is triggered at the end of PP2 for each sequence to determine if there are any extra credits or hours earned during that sequence.

- When the Courses Exempt from Progression (CEFP) logic is enabled, courses flagged as 'Y' are used to determine the Scheduled Complete and Complete status. Clock hour programs use scheduled hours for current and scheduled courses and attended hours for completed courses.
- When the CEFP logic is disabled, current and scheduled courses always progress a student. If a course is completed, the SPE tool uses completed courses with a grade that earns the credits to determine the Scheduled Complete and Complete status. For hours-based programs, the attended course hours are used to determine the Scheduled Complete and Complete status. Scheduled hours are evaluated for scheduled and current courses.

During the final AY/LP, the Scheduled Complete flag can be set as a result of transfer credits being Approved. In this case, SPE reduces the duration of the final AY/LP and may attempt to remove a PP. If a PP cannot be removed, the AY/LP is not adjusted and a Contact Manager activity is created.

If PP2 has a disbursement, CampusNexus Student checks the setting of the 'Allow zero out extra AY/LP' option:

- If the option is selected, CampusNexus Student sets PP2 to zero (0).
- If the option is not selected, CampusNexus Student notifies you that the AY/LP could not be adjusted.

The Scheduled Complete flag is removed as a result of transfer credits being unapproved. In this case, SPE extends the final AY/LP.

The Scheduled Complete flag is not set or is removed on a student's AY and LPs when not enough courses are registered to complete the credits/hours requirement of that PP.

Title IV Eligibility

Payment periods that the student will not attend are flagged to indicate that the student is not eligible for Title IV funds during that payment period since the student will be unable to establish eligibility for Title IV funds.

The 'notEligibleforT4' flag is set to 1 for the following scenarios:

- A final non-zero credit payment period occurs with a credits milestone that is the same as a prior payment period (i.e., the student registered enough credits to complete the program version in the payment period prior to the final payment period). Use cases are AY/LP having 1 or 2 payment periods. Disallow rolling credits is disabled to create this data pattern for a final AY/LP with a single payment period.
- A zero credit payment period can occur when the flag to allow adjustment to 0 is enabled. See Allow zero out extra AY/LP under Setup > Campus Information > Financial Aid (tab). Extra payment periods that are unneeded, but cannot be removed due to constraints, are updated to have 0 credits/hours.

When the flag is set to 1, the Payment Period for Academic Year form displays the message: *"The system has calculated that the student will complete the program prior to this payment period. The student is not eligible for the TIV funds associated to this payment period."* For more information, see Payment Periods for Academic Year form.

You can configure an alert for a staff member when a payment period is flagged non-eligible for Title IV funds. For more information, see TIV Eligibility Alert under Setup > Campus Information > Financial Aid (tab).

Association between Courses and Payment Periods

For institutions that use the Student Pace Evaluator (SPE), CampusNexus Student can re-evaluate the association between registered courses and Payment Periods after the SPE has changed Payment Period dates so that courses are associated with the correct Payment Periods.

Re-association of courses and charges can occur in the following instances:

1. Registration and creation of pending charges in payment periods that will change after SPE executes.

- The registration of a course that has an end date in a future payment period and after SPE executes the credits for that course are needed to complete a more recent payment period. This change cascades through the subsequent payment period/course and charge associations.

2. Adjusting Payment periods due to dropped or failed courses.

- The actions (triggers) in this instance occur in a payment period and the payment period is extended to include a new course(s) and the associated charges for those courses. This change cascades through the subsequent payment period/course and charge associations.

3. Transfer Section

- This action can be performed at various times during the actions mentioned above.

4. Re-Entry > 180

- This process can create an overlap in AY/LP sequences and the associated payment periods. The PP sequences linked to an AY that starts prior to the Re-Entry > 180 date are no longer valid for associating with charges.

The logic for updating pending charges and ledger transactions should only be done for a configuration of the student's billing method that uses Payment Period Detail Billing and Revenue should only be updated if earning by transaction code over the course section.

Executing Student Pace Evaluation and Payment Period Billing Steps in Sequential Order Automatically

When the Student Pace Evaluation (SPE) job is used to update a student's academic progress along with payment period billing based on attendance, best practice is to run the following SQL jobs associated with the SPE and payment period billing in sequential order to ensure that the students are billed properly:

1. Autolock Payment Periods/Loan Periods
2. Recalculate the Graduation Date and Expected Externship Begin Date
3. Recalculate Payment Period Pending Charges
4. Process Payment Period Adjustments
5. Post Payment Period Pending Charges Based on Attendance

For institutions that do not want to manage these jobs individually, the SPE and Payment Period Billing job serves as a master job to run these jobs in the proper sequence. This master job checks if any of the individual jobs are enabled and disables them before running the corresponding steps within the master job.

Note: This master job is disabled by default, allowing institutions to decide when to replace their current job sequence.

Each step uses a SyRegistry key. Institutions can update the Registry keys to enable/disable certain steps.

SyRegistry Keys

	Step Name	Corresponding syRegistry Key Name
1	Autolock Payment Periods/Loan Periods_Step1	xxADFAExecuteAutoLockStep
2	Recalculate the Graduation Date and Expected Externship Begin Date_Step2a, 2b, 2c	xxADFAExecuteSPEStep
3	Recalculate Payment Period Pending Charges_Step3	xxSAExecuteRecalculatePPPendingChargesStep
4	Process Payment Period Adjustments_Step4	xxSAExecutePPAdjustmentsStep
5	Post Payment Period Pending Charges Based on Attendance_Step5	xxSAExecutePostPPPendingChargesStep

The master job default frequency is daily starting at midnight.

Prorating Logic

CampusNexus Student uses the following logic to determine the end date of the payment period.

1. First, calculate the number of days needed to complete the current courses (scheduled, current or complete) in the payment period. This is calculated by counting the number of days between the Payment Period start date and the end date of the last current course (add more days to factor in holidays as needed).
2. Calculate the number of credits/hours still needed to complete the payment period by subtracting the credits/hours of the current courses in the payment period from the total number of credits/hours required for the payment period.

The prorating is calculated as follows:

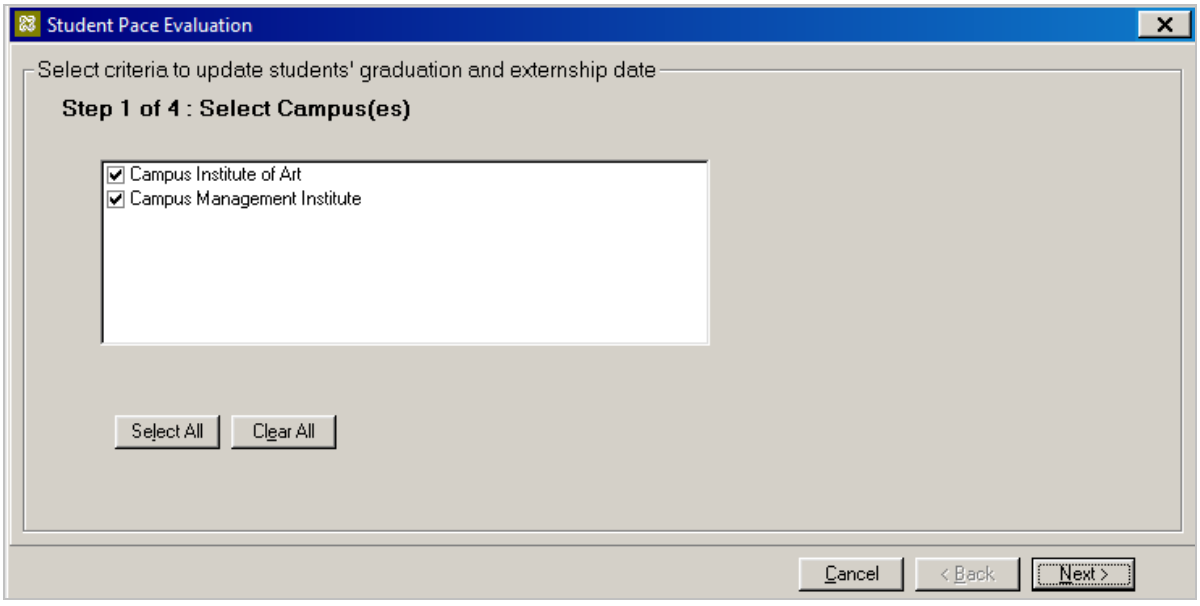
- Number of days to extend = (number of days calculated in Step 1 * number of credits/hours calculated in Step 2) / (number of credits/hours of current courses in the payment period)
- Add the number of days calculated previously to the end date of the latest current course (Scheduled, completed, current). The new date calculated is the end date of the current payment period.
- Add 1 day to this new end date, and this is the start date of the next payment period. The end date of this next payment period is calculated by using the start date and the number of weeks in the payment period. This process is repeated for subsequent payment periods.

Note 1: When a course overlaps non-term payment periods, i.e., the courses began in the first payment period and ended in the second payment period, weeks and credits associated with the overlapping courses are counted toward completion of the second payment period and the second payment period end dates are adjusted accordingly.

Note 2: When "Allow courses to be exempt from progression" is enabled, CampusNexus Student uses Instructional Weeks (IW) projection to determine both milestone dates on the payment period if there are not enough courses scheduled to complete the payment period. The exception to the rule is that if the IW milestone has been met; however, the hours or credits requirement has not, CampusNexus Student uses prorating to determine how long it will take the student to complete the requirement. Subsequent payment periods not covered by scheduled course work continue to use Instructional Week projection.

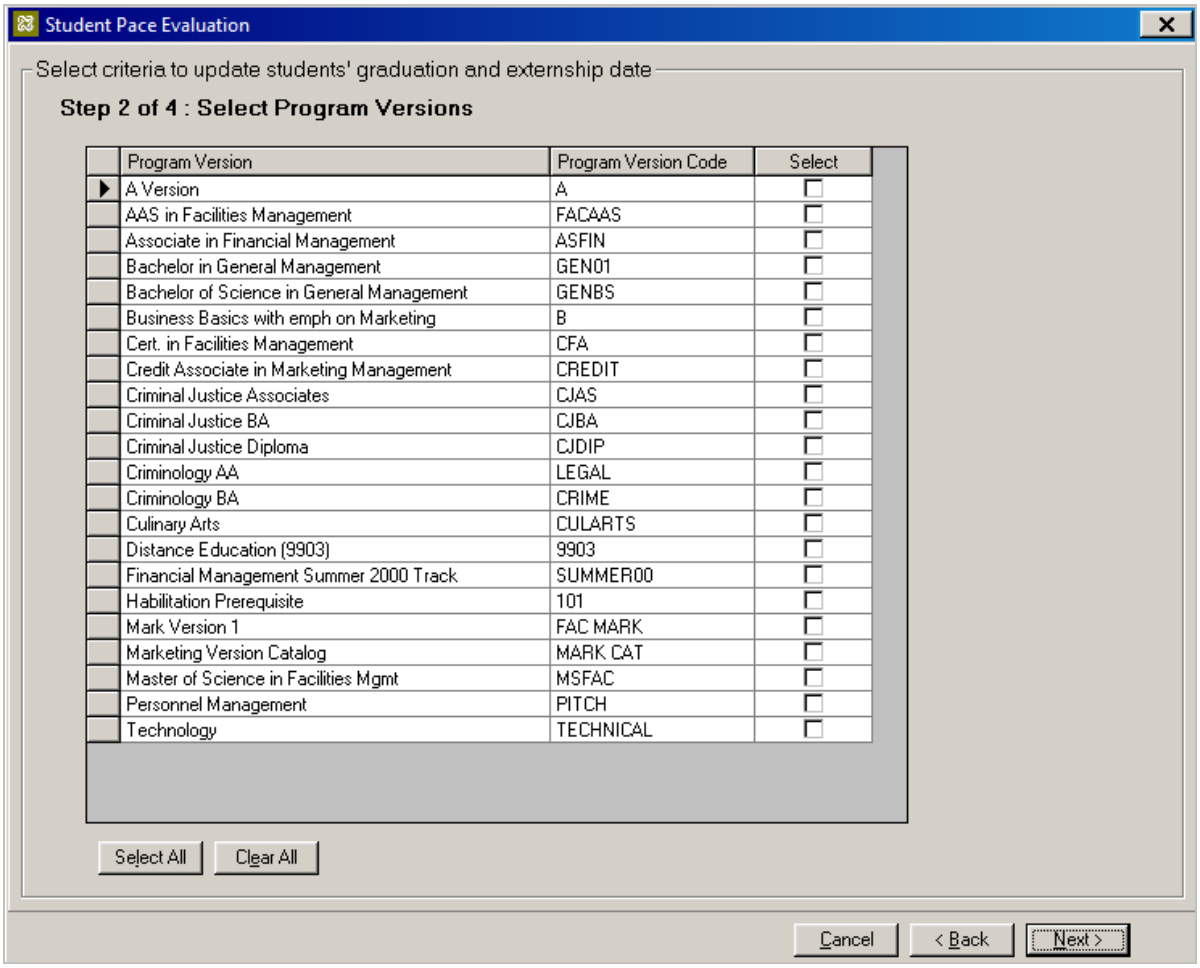
Updating Graduation and Externship Dates

1. Navigate to **Tools > Academic Records > Student Pace Evaluation**. Step 1 of 4: Select Campuses of the Student Pace Evaluation (SPE) tool is displayed.



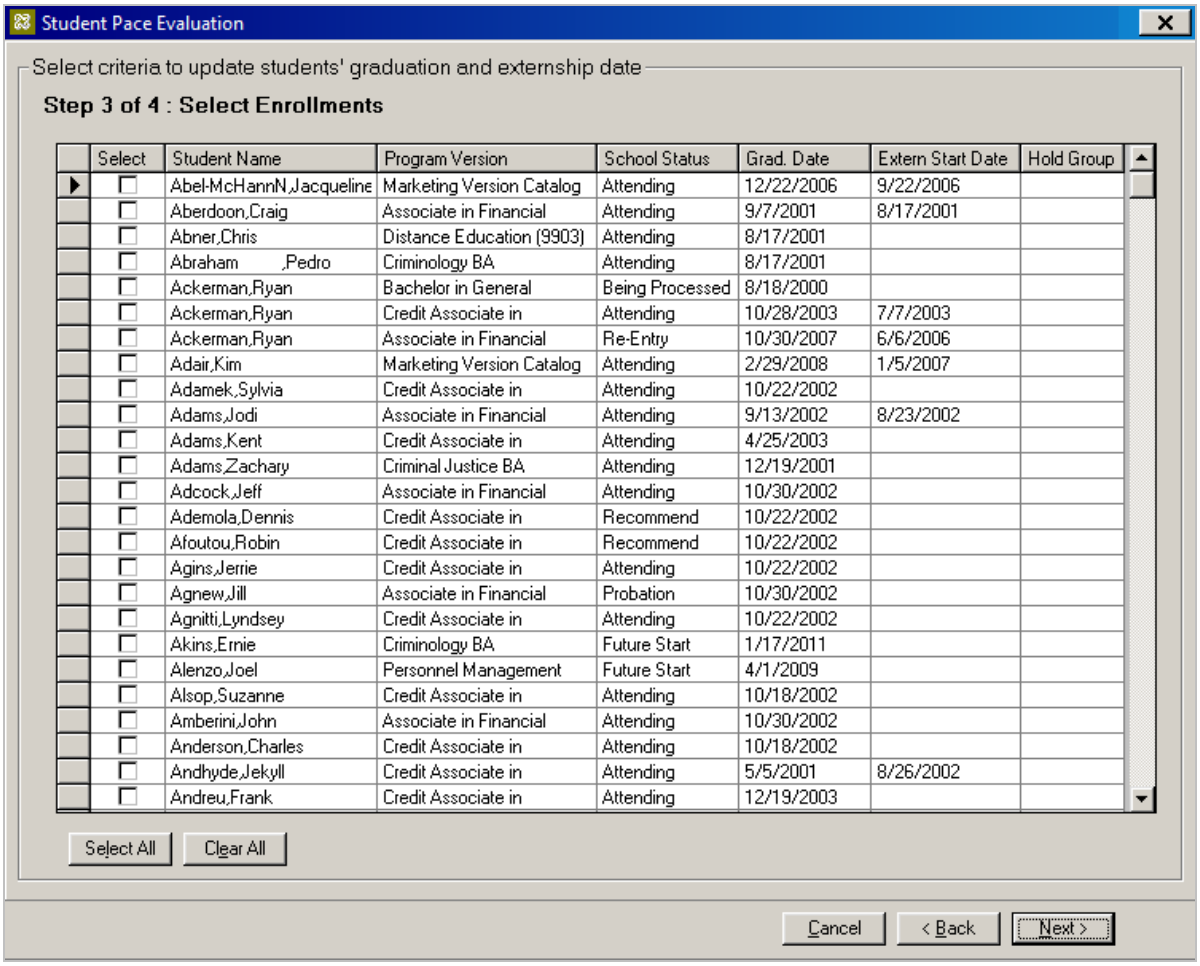
2. Select the applicable Campus(es) from the **Campuses** list. Use **Select All** or **Clear All** to select or clear *all* check boxes in the list. Click **Next**.

Step 2 of 4: Select Program Versions of the SPE tool is displayed.



3. Indicate the applicable **Program Version**(s) by selecting the check box(es) on the corresponding grid rows. Use **Select All** or **Clear All** to select or clear *all* check boxes in the list. Click **Next**.

   Step 3 of 4: Select Enrollments of the SPE tool is displayed.



Select	Student Name	Program Version	School Status	Grad. Date	Extern Start Date	Hold Group
☐	Abel-McHannN,Jacqueline	Marketing Version Catalog	Attending	12/22/2006	9/22/2006	
☐	Aberdoon,Craig	Associate in Financial	Attending	9/7/2001	8/17/2001	
☐	Abner,Chris	Distance Education (9903)	Attending	8/17/2001		
☐	Abraham ,Pedro	Criminology BA	Attending	8/17/2001		
☐	Ackerman,Ryan	Bachelor in General	Being Processed	8/18/2000

☐	Agnew,Jill	Associate in Financial	Probation	10/30/2002		
☐	Agnitti,Lyndsey	Credit Associate in	Attending	10/22/2002		
☐	Akins,Ernie	Criminology BA	Future Start	1/17/2011		
☐	Alenzo,Joel	Personnel Management	Future Start	4/1/2009		
☐	Alsop,Suzanne	Credit Associate in	Attending	10/18/2002		
☐	Amberini,John	Associate in Financial	Attending	10/30/2002		
☐	Anderson,Charles	Credit Associate in	Attending	10/18/2002		
☐	Andhyde,Jekyll	Credit Associate in	Attending	5/5/2001	8/26/2002	
☐	Andreu,Frank	Credit Associate in	Attending	12/19/2003		

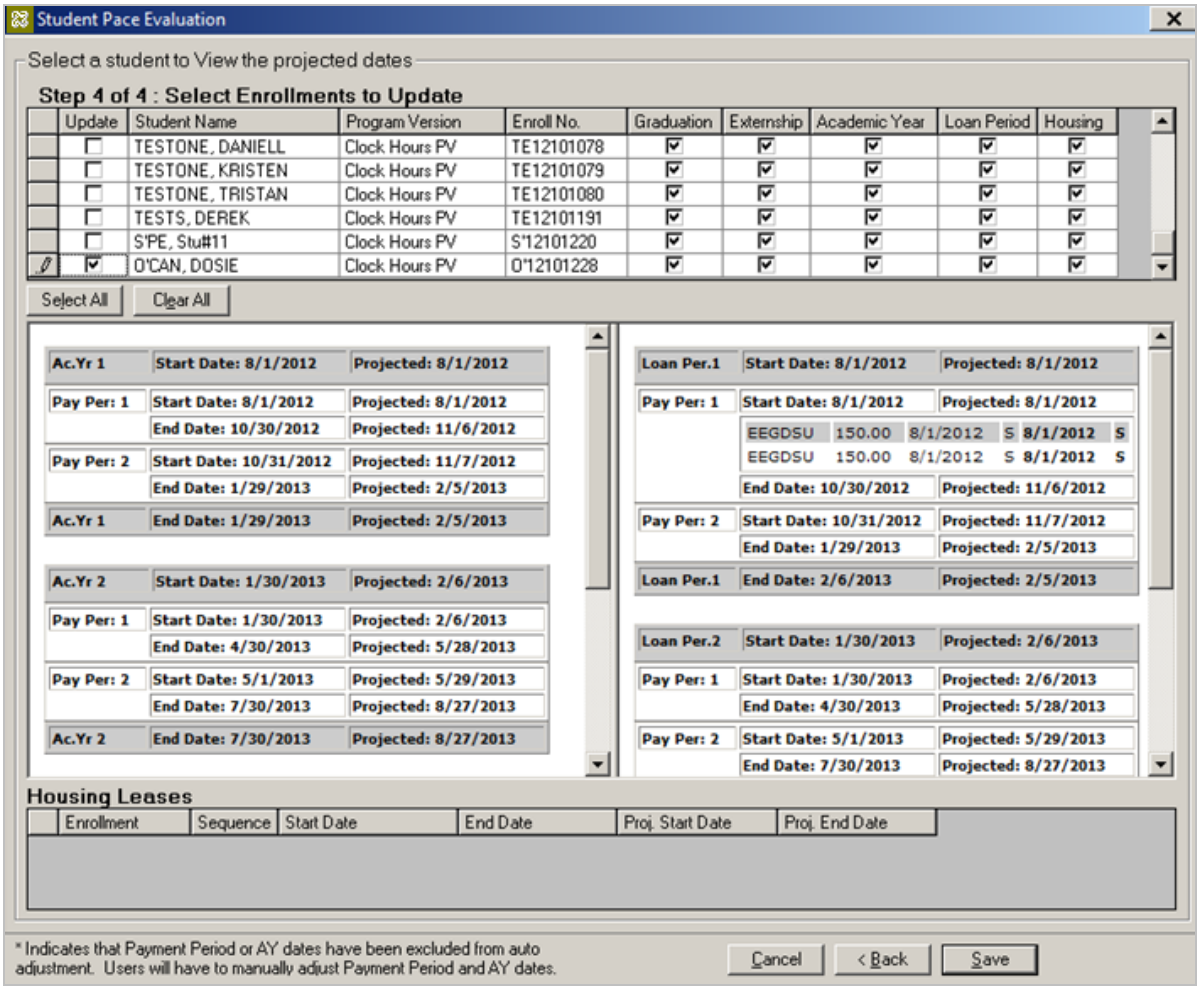
4. **Select** the check box for the student(s) you would like updated. Use **Select All** or **Clear All** to select or clear *all* check boxes in the list. Click **Next**.

   Step 4 of 4: Select Enrollments to Update of the SPE tool is displayed. It shows a list of selected students along with the projected dates for the Graduation Date, Externship Date, Academic Year Dates, Payment Period Dates, and Disbursement Dates that would change as the result of a student's progress in the chosen program.

5. **Select** a record in this grid to display the information in the lower grids. Select the **Update** check box to allow the record to be updated.

   The preview pane on the left lists academic years, the right pane displays loan period information. If there are loan periods associated with the award, it is displayed in the loan period pane; however; if no loan periods are associated, it is displayed in the academic year pane. The listing is either/or and will not show both at once.

   Note: Only enrollments with payment periods display academic year, payment period, and disbursement information.



Academic Years: This grid contains the academic years for the enrollment selected in the top grid. The grid also shows the current start and end dates along with the projected new dates. The selected record determines which payment periods are displayed in the Payment Periods grid.

Loan Periods: This grid contains the Loan Periods for the enrollment selected in the top grid. The grid also shows the current start and end dates along with the projected new dates. The selected record determines which payment periods are displayed in the Payment Periods grid.

BBAY Dates: This grid contains the BBAY Start and End Dates for the enrollment selected in the top grid. The grid also shows the current start and end dates along with the projected new dates. During SPE evaluation, if a student fails to progress as expected, this may cause the student's Loan Period to be extended. Should the Loan Period be extended, SPE will make the corresponding adjustments to the BBAY Start and End Dates by extending the BBAY Start and End Dates by the same number of days that the Loan Period Start and End Dates are extended. When the student has a stub loan period, the SPE evaluation will not adjust the BBAY start date. Also, if any adjustments made due to course progression, the Loan Period and the BBAY End Date will not be adjusted prior to the NSLDS End date on the stub loan period. For the Loan Period and BBAY dates to be adjusted by the SPE evaluation process, the Title IV Loan configuration must be enabled on the SPE settings and checked at the time of SPE evaluation.

Payment Periods: This grid contains the payment periods for the selected academic Year. The grid also shows the current start and end dates along with the projected new dates. Select a payment period to display any disbursement dates in the Disbursements grid.

Additionally, Payment Period dates will be flagged (*) if the manual Override Payment Period has been selected for the student. A caption noted with an asterisk * will appear at the bottom of each step of the SPE tool to indicate that the Payment Period dates have been excluded from auto adjustment and users will have to manually adjust the Payment Period and AY dates.

Note: The Academic Years and Payment Periods are updated based on the definition of instructional weeks as specified by the Department of Education (ED). The instructional weeks logic includes the weeks from failed courses and weeks from a dropped course prior to the drop date (by default). It does not include weeks while the student is on a leave of absence (LOA).

Outlined below are some of the general rules that CampusNexus Student follows when creating payment periods:

- When initially creating academic years and payment periods, CampusNexus Student uses instructional weeks to determine the actual dates based on the weeks attribute.
- The Start Date for Sequence 1 of a payment period sets the start date for the instructional weeks block for the enrollment.
- The initial payment period Start Date is aligned with the Program Version's Start Date

Rules for subsequent payment period start dates:

CampusNexus Student sets the Start Date to the day after the prior payment period's End Date in either of the following cases:

- If the first course in the subsequent payment period starts before the end date of the prior payment period,

  - OR -

- If the check box to align payment periods to course start and end dates is cleared (see Student Pace Evaluation Settings).

If these conditions are not met, CampusNexus Student sets the start date to the next course's start date, or the check box to align payment periods to course start and end dates is selected (see Student Pace Evaluation Settings).

Rules for payment period end dates:

The end dates are set to a point in time where both the "weeks" and "credits"/"hours" payment period attributes are satisfied. CampusNexus Student shows visibility into the dates calculated by displaying milestone dates of when the student will satisfy the attributes of the payment periods. The logic will take the greater of the two milestone dates and set the end date of the payment period to that date when the flag to align payment period to course start and end dates is cleared. If the check box to align payment periods to course start and end dates is selected, CampusNexus Student finds the course that encompasses the greater of the two milestone dates and sets the payment period end date to that date.

Note: A payment period can never end on a holiday configured in the Calendar set up in CampusNexus Student (**Lists > Academic Records > Calendar (tab)**). The End Date is always the day after the holiday ends.

Note: When SAP is executed by Payment Period End Date for clock hour programs and the institution has an excused absence policy, the excused absence policy is accounted for and incorporated.

Note regarding Payment Periods and Student Pace Evaluation (SPE) logic:
There is a difference in the calculations if the institution is configured to use Global as a servicer. See Title IV Payment Periods for more information.

Disbursements: This grid displays disbursements from the selected payment period if the date or the status is projected to change.

The disbursement dates for scheduled and ready to pay disbursement are moved the same number of days as the start date unless a disbursement would be moved outside of the payment period. If the previous logic would place a disbursement outside of a payment period then the system will apply the following rules:

- If the current system date is prior to the payment period start, then set the 1st disbursement to the start date and an additional disbursement to the midpoint.
- If the current system date is during the payment period, then set the 1st disbursement to the start date and an additional disbursement to the later of the midpoint or current system date.
- If the current system date is greater than the payment period end, then set the 1st disbursement to the end date of the payment period.

This record includes the amount of the packaged award, the disbursement number, the disbursement amount, the current and projected disbursement dates, and the current and projected disbursement status.

Note: CampusNexus Student marks Title IV grant disbursements as Canceled if the payment period (with which the disbursement is associated) start date or the disbursement date is adjusted by the SPE tool to fall after the end of the award year, i.e., after June 30 of the award year. In the case of Pell, ACG, SMART, and SEOG grants, the payment period start date is considered when determining whether disbursements will be canceled; for Perkins loans, which are campus-based loans that follow similar regulations as Title IV grants, the disbursement date is considered when determining whether disbursements will be canceled. When a disbursement is canceled on this basis, CampusNexus Student updates the award amount accordingly.

If the change is made by the SPE tool job, CampusNexus Student assigns SPE TOOL AUTO USER as the user who canceled the disbursement. If the change is made by running the SPE tool through the Tools menu, CampusNexus Student records the User ID of the user who runs the SPE tool as the user who canceled the disbursement.

If configured to do so, SPE can cancel a direct loan or any remaining scheduled disbursements of the direct loan:

- When the SPE update causes the loan's BBAY start date to be later than the Award Year's end date.

  - OR -

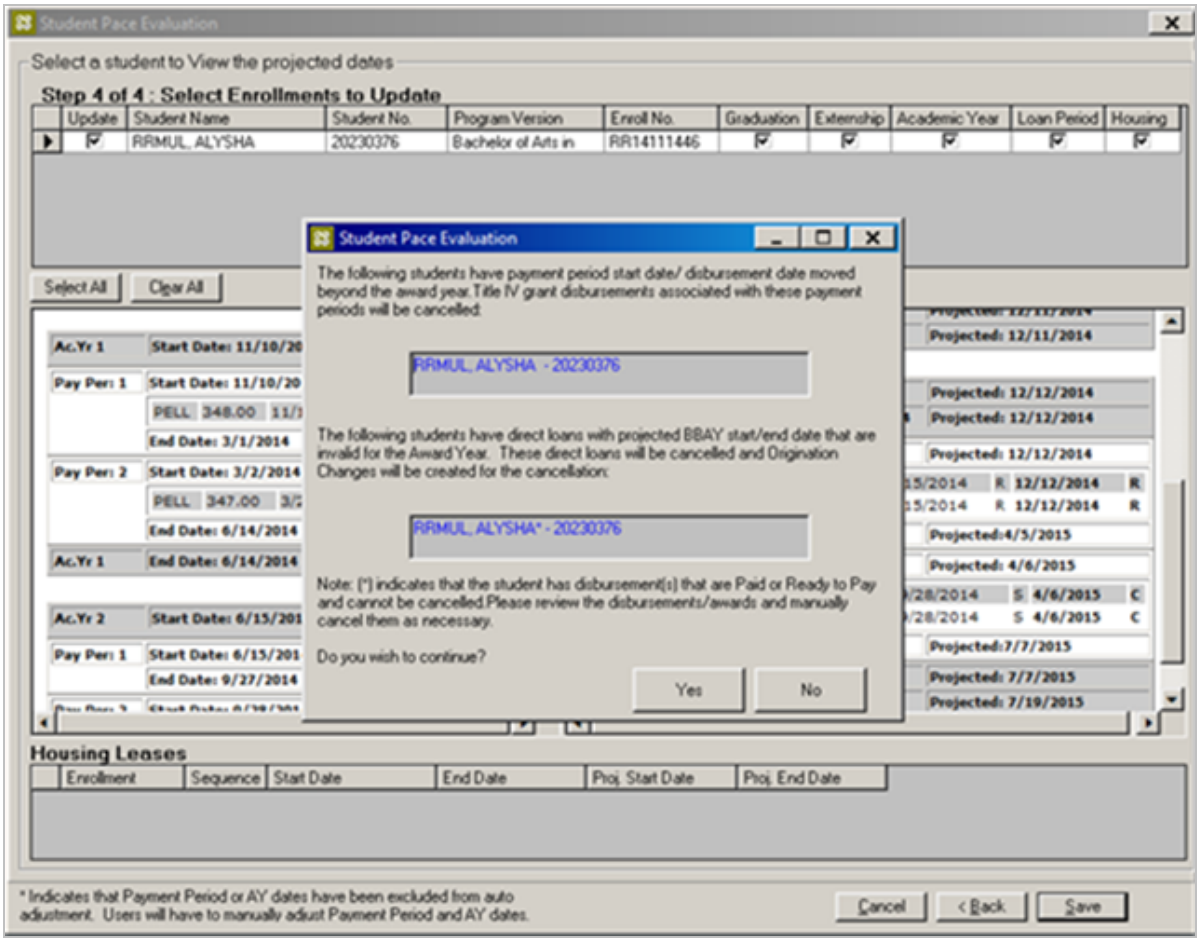
- When the SPE update causes the BBAY end date to be earlier than the Award Year's start date.

To configure this option, select Yes for "*Cancel loan when loan dates are invalid?*" in the Direct Loan Setup form. For the direct loans that cannot be cancelled due to Paid or Ready to Pay disbursements, CampusNexus Student cancels all remaining scheduled disbursements. Direct loan disbursements that will be cancelled are displayed on the SPE user interface with the Projected Status as 'C' (Cancelled). Additionally, CampusNexus Student automatically creates origination change records for the cancelled loan if the loan is eligible for origination changes. For this to occur the Origination Status must be 'Accepted' or 'Batched to Send', and the configuration '*Auto Create Orig. Changes/Adjustments for cancelled disbs/refunds?*' option in the same Direct Loan Setup form option must be set to Yes. CampusNexus Student also creates Origination Changes for the cancellation if the *Auto create Orig. Changes/Adjustments for canceled disbs/refunds?* option in the same Direct Loan Setup form option is set to Yes.

Note: When a loan or remaining scheduled disbursements of a loan are cancelled by the SPE due to invalid loan dates, the loan's dates at the loan level (the loan period and BBAY start and end date as well as disbursement dates) are not updated to the projected invalid dates. This ensures that the origination changes for the cancellation pass loan dates validation during Export to COD.

Additionally, you can configure CampusNexus Student to notify a staff member when a direct loan is cancelled or cannot be cancelled by SPE. See Auto Update Alert on the Financial Aid tab of the Campus Information form.

Before updating the students' data, the SPE tool will notify you if there are students who have Title VI grant disbursements or direct loans to be cancelled as a result of the update. This alert also indicates students whose Title IV grant disbursements and/or loans that cannot be cancelled due to Paid or Ready to Pay disbursements. You can decide whether to proceed.



Housing Leases: This grid displays student leases with a Housing Period of Academic Year that can be updated by the tool. For each lease, the enrollment, sequence number, current lease start date, current lease end date, projected lease start date, and projected lease end date are displayed.

Note: When a student's lease is updated with new academic year dates, CampusNexus Student checks if the room is available for the new dates. If the room is occupied by another student on the new dates, the lease will be extended for the student currently occupying the room and the other student's lease will be marked as pending. The Lease Exception report may then be used to identify students with pending leases who will have to be assigned new accommodation.

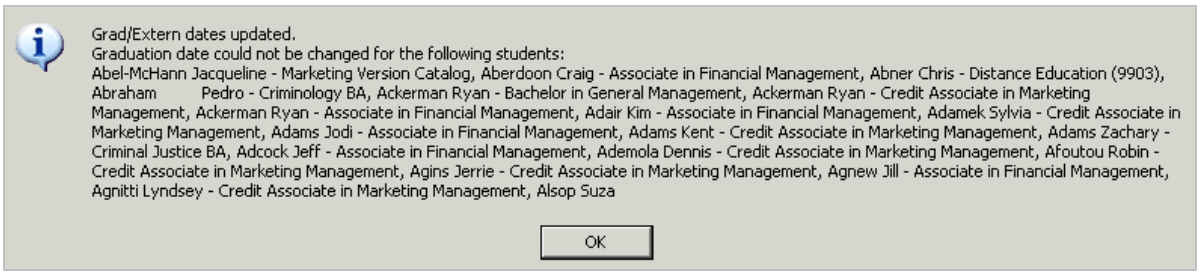
LOA Students: Leave of Absence (LOA) students are gathered in the tool and dates adjusted using the expected return date for Academic Calendars that contain payment periods. If the student does not return on or before the expected return date, CampusNexus Student continues to adjust the dates each time the tool is run. If a student is placed on LOA after completing payment period 1 in an academic Year but before completing any credits/hours in the next payment period, the start date of the payment period is adjusted to the return date from LOA.

6. Select **Save** to save your changes, **Cancel** to discard your changes, or **Back** to return to the previous screen.

   Upon clicking **Save**, if any Title IV grant disbursements for the selected student(s) are subject to cancellation (see Disbursements above), CampusNexus Student displays a warning message listing the students for whom disbursements are about to be canceled and asking if you would like to continue.

   If you click **Yes**, CampusNexus Student continues to update the payment period dates, academic year dates, and graduation dates, cancels the indicated disbursements, and updates the total award amounts for the selected enrollments.

7. A message notifies you that the graduation/externship dates have been updated and lists any exceptions. Click **OK** to close the message.



Transfer Enrollment Settings for Payment Period Logic

When the transfer enrollment process is performed on students in Program Versions that use payment periods, select the logic to transfer the start date and the academic Year information or to not transfer the start date and academic Year information. This setup is found under **Setup** > **Campus Locations** > **Transfer Opt.** tab. The check box to transfer the start date and academic Year information can be selected independently of each other; however, you should not select one without the other as the SPE tool logic needs these to be synchronized for the tool to work correctly.

When the start date is transferred during an enrollment transfer with a program version configured for non-term, the Financial Aid will be transferred to the new enrollment. Selecting the start date to transfer is a trigger for CampusNexus Student to allow the Financial Aid to move to the new enrollment. You must validate the rules below as designated by the Department of Education as CampusNexus Student currently does not have a rules engine to determine these validations.

You may consider a student who transfers from one program to another at your institution to remain in the same payment period if all of the following conditions apply:

- The student is continuously enrolled at your institution.
- The coursework in the payment period the student is transferring out of is substantially similar to the coursework the student will be taking in the program into which he/she is transferring.
- The payment periods are substantially equal in length in weeks of instruction and credit or clock-hours.
- There are few or no changes in institution charges associated with the payment period.
- The credits from the payment period the student is transferring out of are accepted for credit in the new program.

When the start date is not transferred during an enrollment transfer, Financial Aid will not be moved to the new enrollment.

Course Retake Logic for Non-Term Programs within the Student Pace Evaluation Process

The logic of the SPE tool for non-term programs does not consider course retakes in which credit has previously been earned in the payment period, academic year, and graduation date calculations. In other words, a retaken course where credit has previously been earned is not used to start or end payment periods or academic years. Additionally, the credits earned on the retake instance are not included when calculating whether the student has met the credits required to progress to the next payment period or academic year. For students in non-term programs, the expected graduation date is updated based on the projected academic year dates, so the payment period and academic year logic affects the expected graduation date accordingly.

Example 1: Retake after failing the course and not receiving credit

Program Length: 24 credits and 30 weeks

Academic Year: 24 credits and 30 weeks

Payment Periods: 2 payment periods, each 12 credits and 15 weeks (1-12 credits and 13-24 credits)

Each payment period consists of three courses at 4 credits each. The student passes two courses and fails the third (student does not earn the credit for the course). The student must retake the course to have successfully completed the 12 credits defined for the payment period. Once the student has successfully passed the retaken course, the student progresses to the next payment period as long as the weeks part of the payment period definition has been met. Until the student successfully completes the retaken course (assuming they retake the course immediately after the first instance,) the student is considered to remain in the first payment period.

Example 2: Retake after passing the course and receiving credit

Program Length: 48 credits and 60 weeks

Academic Year: 24 credits and 30 weeks

Payment Periods: 2 payment periods, each 12 credits and 15 weeks (1-12 credits and 13-24 credits)

Each payment period consists of three courses at 4 credits each. The student passes all three courses but needs to retake one of the courses to receive a better grade. The student has already received credit for the first payment period based on the coursework assigned to that payment period (the earned credit from the retaken course has been included) and 15 weeks have elapsed. The student is considered to have completed the first payment period and, if all other eligibility requirements have been met, may receive a Title IV disbursement for the subsequent payment period. Although the institution may charge the student for retaking the course, the student may not receive a Title IV payment for this course again. In addition, the course retake is not considered for determining the credits successfully completed in the subsequent payment period. For example, since the program length in this example is 48 credits, this retaken course would not count when determining whether the student progresses from the 13-24 credit payment period in the first academic year to the 25-36 credit payment period in the second academic year.

Impact of SPE on Overlapping Loan Periods

The SPE tool does not update loan dates for a stub loan period so that the stub loan period truly reflects the student's overlapping loan period and correctly shows the student's progress in subsequent loan periods. For programs configured with Academic Calendar 5 and 6, changes to the student's schedule (e.g., course registration, unregistration, course association, reassignment of courses, and posting of pass, fail, CLEP, and transfer final grades) do not affect the following dates of the stub loan period:

- LP end date
- BBAY start and end date
- Loan end date of any direct loans associated with the stub loan period
- BBAY start and end date of any direct loans associated with the stub loan period
- Disbursement dates of any direct loans associated with the stub loan period

Dates for subsequent LPs continue to be updated using current SPE logic.

The SPE tool applies *Scheduled Complete* or *Completed* flags to overlapping loan payment periods (LPPs) for all programs configured with Academic Calendar 5 and 6 using the logic below:

- LPPs of the stub loan period are flagged as Schedule Complete when enough credits/hours are registered.
- LPPs of a stub loan period are flagged as Completed when all courses that end within the LPP have final grade posted.

LPPs of the subsequent LPs are marked as Schedule Complete or Completed using standard SPE logic.

When the last LPP of the stub loan period is marked as *Scheduled Complete* or *Completed*, the SPE tool updates the following values for the stub loan period and rebuilds subsequent LPs to reflect the true remaining credits/hours and instructional weeks needed to complete the program:

- The number of credits/hours of the stub loan period is updated to the total number of credits/hours of Scheduled Complete / Completed courses that have the end date within the stub loan period's date range.
- The number of weeks in the stub loan period is updated with the calculated number of instructional weeks of all the Scheduled Complete / Completed courses that end within the stub loan period's date range.
- The attributes of the payment periods of the stub loan period are updated based on the updated credits/hours and weeks of the stub loan period.

The SPE uses the course expected end date or actual end date to determine if the course falls within the overlapping period. This allows the SPE to calculate and update the correct attributes for the overlapping loan period when the LP is Scheduled Complete / Completed. To update the attributes of the PP during Scheduled Complete / Completed the LP's credits/hours are divided in halves (if there are two LPPs) for each LPP.

Note: In some scenarios, the stub loan period's credits/hours are updated as a result of Scheduled Complete/Completed and the new attributes require the LPP of the stub loan period to be removed or added. For example, the stub loan period was originally created with credits/hours that are more than half of the full AY definition and therefore two LPPs were created. When setting the Scheduled Complete / Completed flag for the LPPs of the stub loan period, CampusNexus Student calculated the actual credits/hours Scheduled Complete/Completed and updated the credits/hours and IWs for the stub loan period accordingly. However, the new credits/hours attribute of the stub loan period is less than half of the full AY definition and therefore the stub loan period should have only one LPP. In this scenario, the removal of the second LPP of the stub loan period must be manually removed and the first LPP should be updated accordingly.

Configuring Multiple Disbursement Definitions

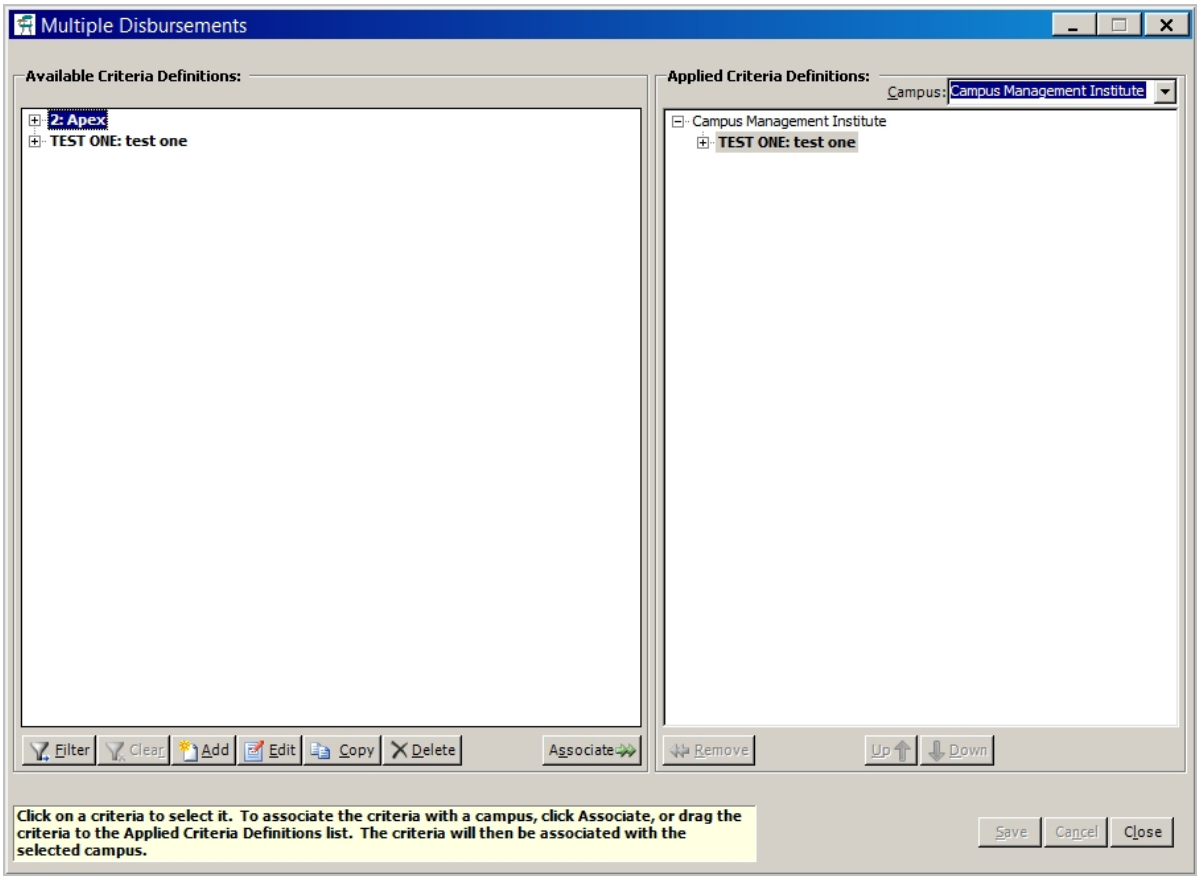
Before enabling the Multiple Disbursements feature in the Financial Aid tab of the of the Campus Information form, the Multiple Disbursement Criteria Definitions must be created and saved for the campus being configured. The Multiple Disbursements form allows users to perform a variety of configuration tasks (e.g., add, edit, copy, delete, and associate their rules to a campus) for Multiple Disbursements. The form supports Drag and Drop capability. There is also a Filter function so that after rules have been established, the user can filter for specific items to see rules that have specific conditions.

The Multiple Disbursements feature uses rules created in several areas of CampusNexus Student. The Multiple Disbursements form contains Criteria Definitions that enable users to perform a variety of configuration tasks that can be driven by the institution's business rules concerning Multiple Disbursements.

Note: If the Definitions are not configured for a campus, an error message is displayed when the Enable Multiple Disbursements check box is selected on the Campus Information form's Financial Aid tab.

Rules in the Applied Criteria Definitions section of the Multiple Disbursement form are applied in order, so it is important for institutions that opt to configure a variety of rules that the most specific rules be at the top of the list. If a very general rule is at the top (for example, no specific information about population and set to assign X% of payment period) and it is followed by a very specific rule (for example, a rule for first-time borrowers living in the state of Tennessee), the dates would likely be assigned by the first rule rather than the second rule, because Multiple Disbursements looks to see if a date can be assigned and would move to subsequent criteria only if it cannot be defined by the preceding rule.

1. Navigate to: **Tools > Financial Aid > Multiple Disbursements**. The Multiple Disbursements form is displayed.



2. Select a **Campus**.
3. Drag and drop Definitions from the **Available Criteria** to the Applied Criteria list as needed, or select the Available

Criteria and click **Associate** to move the Definition.

4. Drag and drop definitions from the Applied Criteria list to the Available Criteria list to remove them, or select Definitions on the Applied Criteria Definitions list and click **Remove** to move them back to the Available Criteria Definitions list.
5. Click **Filter** to filter the Available Criteria list.
6. Click **Clear** to clear the filter, allowing a new filter to be created.
7. Click **Add** to add a Definition.
8. Select a Definition and click **Edit**to change the Definition properties using the Multiple Disbursement Editor.
9. Select a Definition and click **Copy** to create a new definition with the same properties for later editing.
10. Select a Definition and click **Delete** to remove it from the Available Criteria list.
11. Select a Definition in the Applied Criteria list and click **Up** to move the Definition higher on the list,.
12. Select a Definition in the Applied Criteria list and click **Down** to move the Definition lower on the list
13. Click **Save** to save the settings.
14. Click **Cancel** to cancel changes.
15. Click **Close** to close the form.

Field Descriptions

Field	Description
Filter	Activates the filter window
Clear	Clears the filter and shows all criteria
Add	Adds a new criteria and its associated rules
Edit	Opens the Multiple Disbursements Editor form, to edit the selected Definition Criteria
Copy	Copies the Definition Criteria and opens a new copy of it in the Multiple Disbursements Editor
Delete	Deletes the selected Definition Criteria
Associate	Associate the selected Definition Criteria with a campus
Remove	Removes the selected Definition Criteria
Up/Down	Moves the selected Definition Criteria up or down as needed

Tools > Student Accounts

The Tools > Student Accounts submenu options are as follows:

- Change Billing Method
- Purge Billing Statement Records
- Unlock Refund/Stipend Records
- Reallocate Applied Credits
- Update Incremental Units/Offset

Change Billing Method

CampusNexus Student enables institutions to change billing methods for students based on the campus and expected start date. This is a manual process by which the authorized user can enter a date range and modify the billing method of records that fall within the date range. Typically, this feature is used to correct billing methods assigned in error, or update billing methods based on changes within a school.

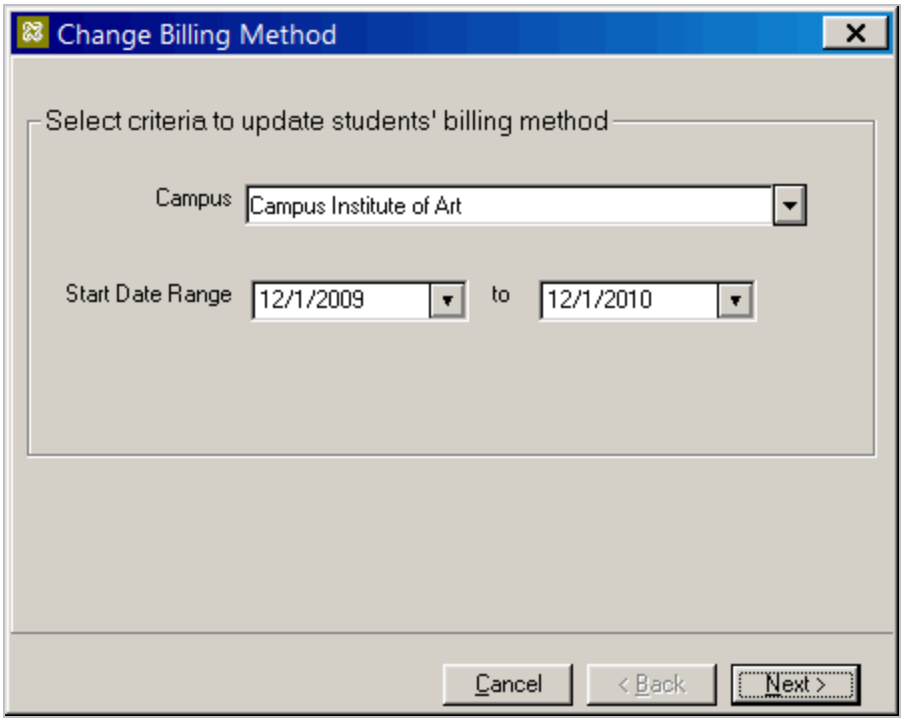
The billing methods options are based on:

- Academic Year
- Course
- Program
- Term

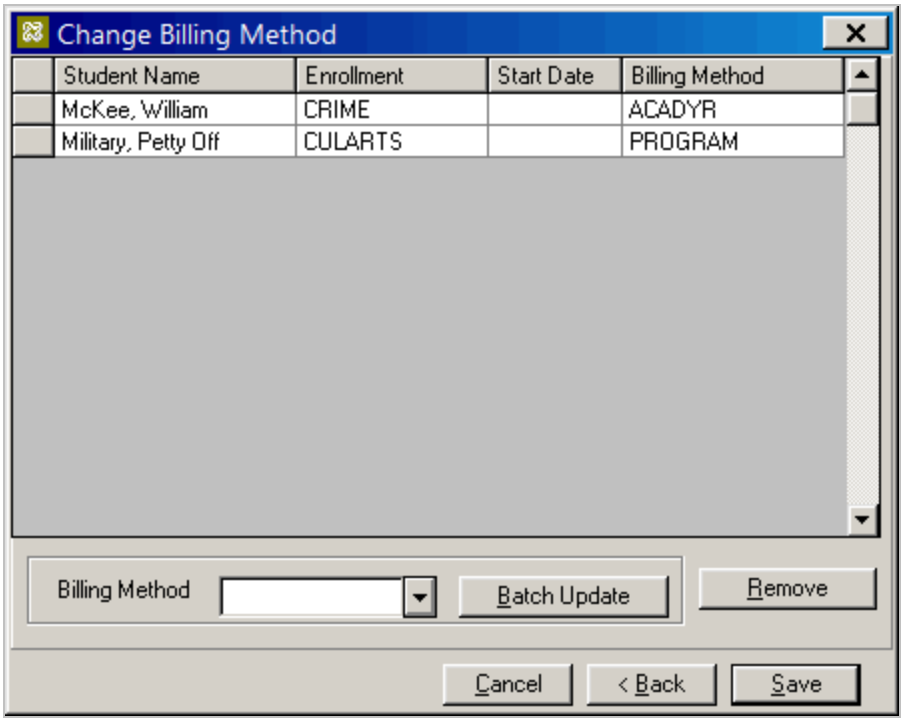
For detailed information on setting up billing methods, refer to Billing Methods.

To change the billing method manually:

1. Navigate to **Tools > Student Accounts > Change Billing Methods**. The Change Billing Methods form is displayed.
2. Select a **Campus, Start Date Range** and **End Date**.



3. Click **Next**. A list of students who meet the selection criteria is displayed.



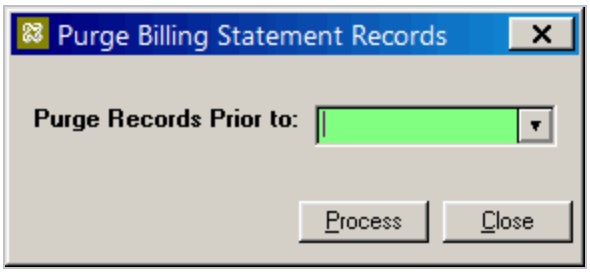
4. To remove a record from list, select the record and click **Remove**. A confirmation message is displayed. Click **Yes**.
5. To change the billing method for all students in this list, click in the **Billing Method** field, select an option, and click **Batch Update**. A confirmation message is displayed. Click **Yes**.
6. To change the billing method for individual students, click in the Billing Method column of the student record, click , and select an option. A confirmation message is displayed. Click **Yes**.
7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Purge Billing Statement Records

Students can view billing statements in Portal. Institutions can decide how many statements are displayed to the student and purge statements as needed. For example, your institution wants to display billing statements only for the term. When the term is over, the billing statements are purged. Use this tool to purge historical billing statement records.

To Purge Billing Statement Records:

1. Navigate to **Tools > Student Accounts > Purge Billing Statement Records**.



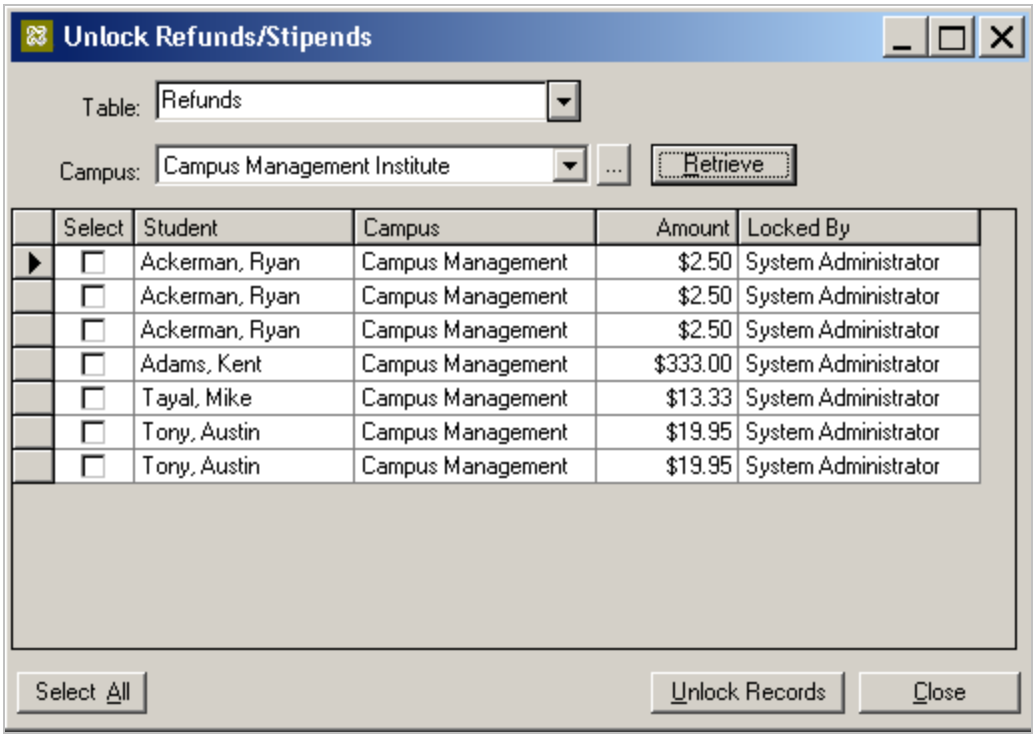
2. Select an appropriate date from the **Purge Records Prior to** calendar.
3. Click **Process**. A confirmation message is displayed. Click **Yes**. The records containing a closing date that is on or before the date selected are deleted.
4. A confirmation message is displayed. Click **OK**.

Unlock Refunds/Stipends

CampusNexus Student enables a system administrator to clear a locked stipend or refund record in case the lock cannot be cleared by normal methods. For example, if a user who has a lock on a file went on vacation or if a system locks up or crashes, the lock remains on the record and a system administrator needs to perform a manual unlock.

To unlock a stipend or refund manually:

1. Navigate to **Tools > Student Accounts > Unlock Refund/Stipend Records**. The Unlock Refunds/Stipends form is displayed.
2. In the **Table** list, select Refunds or Stipends.
3. Select the **Campus**.



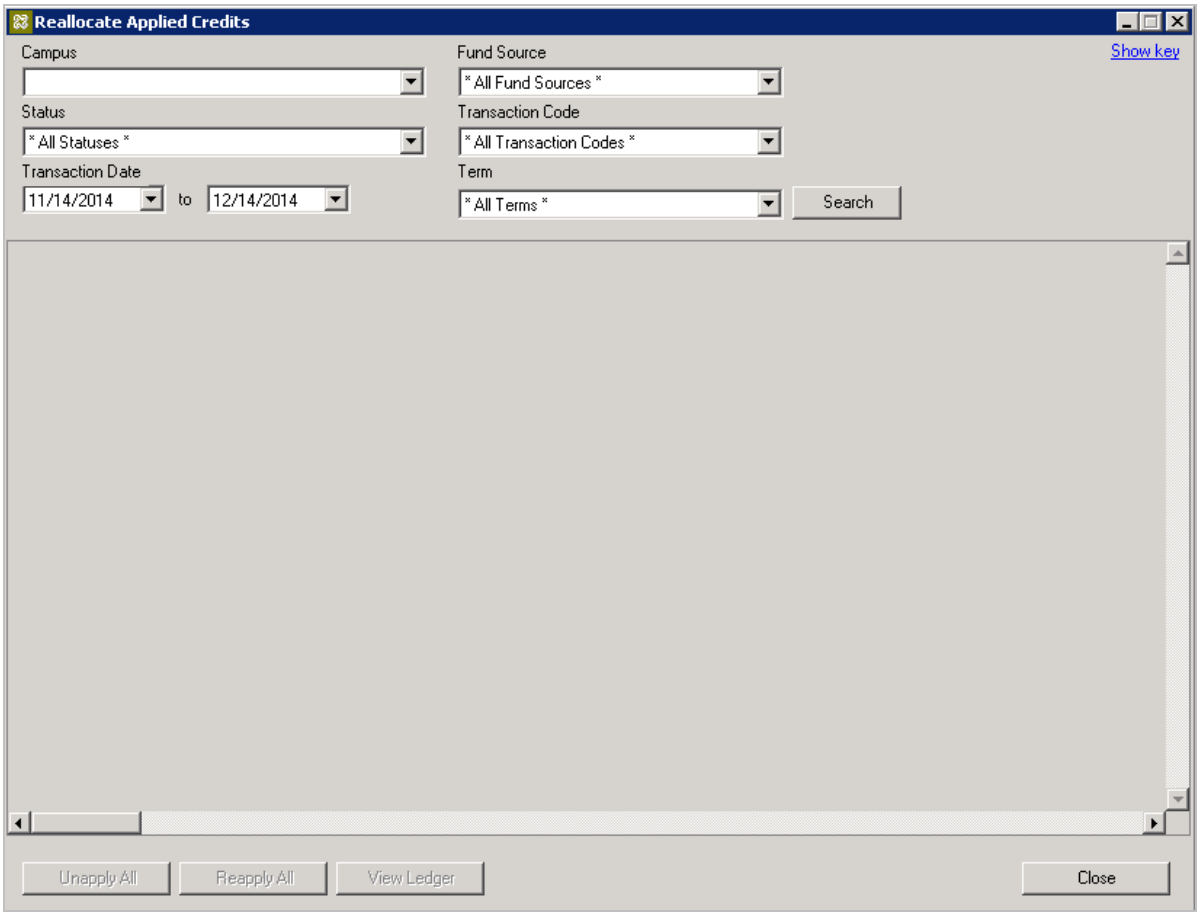
4. In the **Select** column, select the record(s) you want to unlock.
5. Click **Unlock Records**. A confirmation message is displayed. Click **OK**.

Reallocate Applied Credits

Use this tool to redistribute credits that were previously applied to debits.

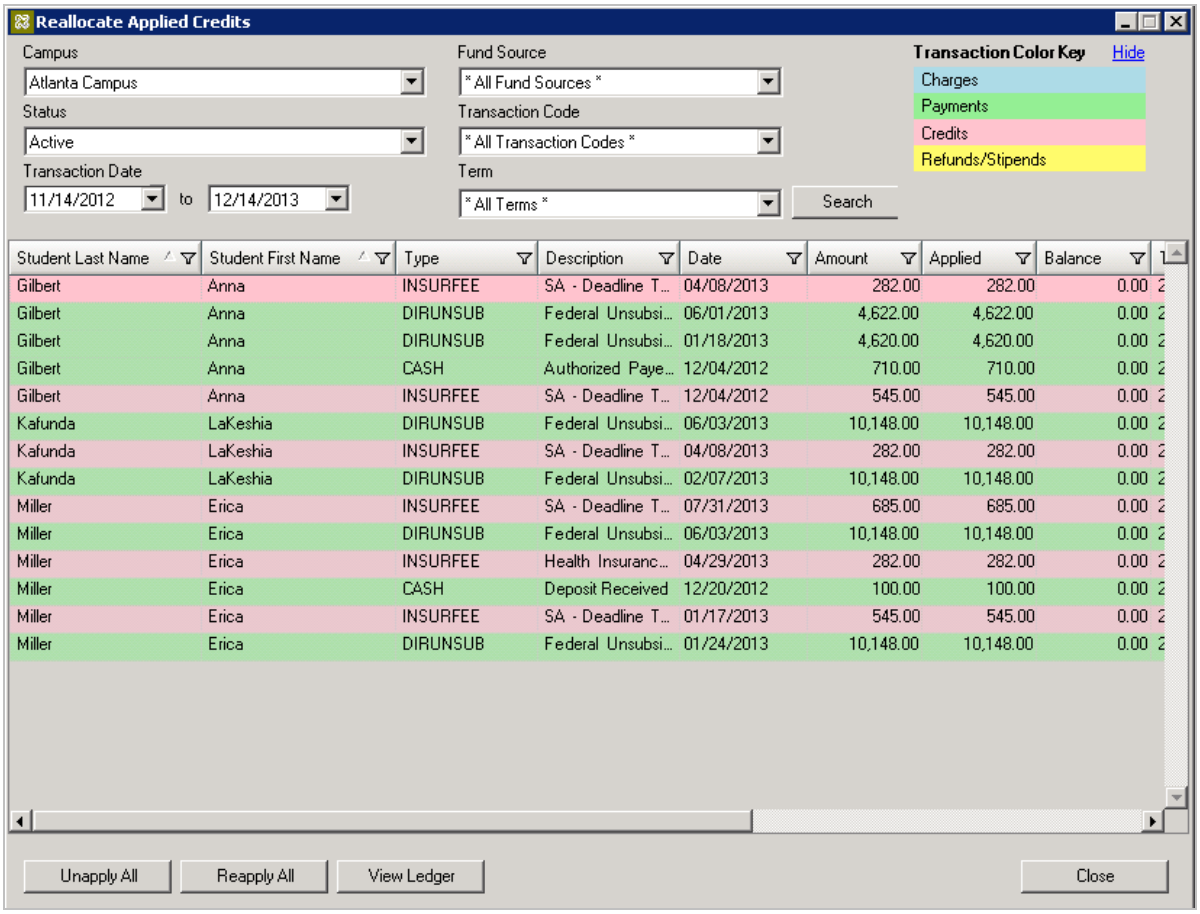
To reallocate applied credits:

1. Navigate to **Tools > Student Accounts > Reallocate Applied Credits**. The Reallocate Applied Credits form is displayed.

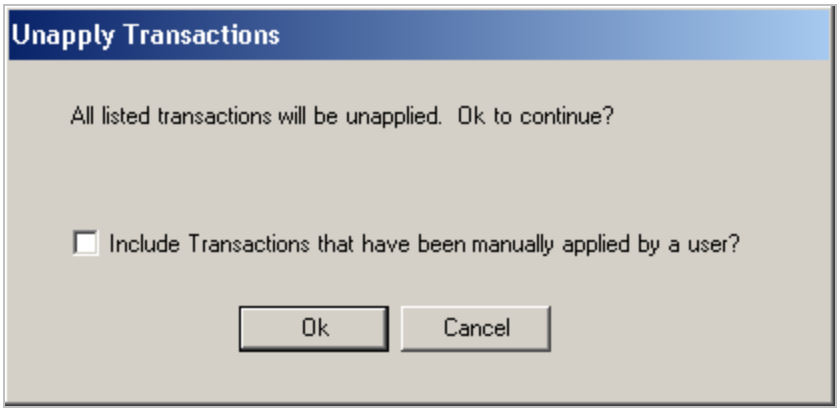


2. To find unapplied credits, select appropriate options from the following search criteria:
   - **Campus**
   - **Fund Source**
   - Student enrollment **Status**
   - **Transaction Code** - Select a fund source that has credits applied to the selected transaction code. Selecting a transaction code does not mean only transactions with the selected transaction code are displayed.
   - **Transaction Date**
   - **Term**
3. Click **Search** to display the list of credits. The form lists all transaction types.

a. Click the **Show key** link to view the Transaction Color Key for the color codes applied to the transactions types.
b. Click the column headings to sort the records.
c. Click the filter icon and select an option from pre-defined filter fields or specify a custom filter.

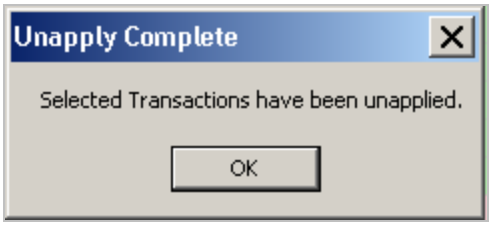


4. Select one of the following actions:
   a. Click **Unapply All** to remove all the credits from the debits at one time. The following message is displayed:

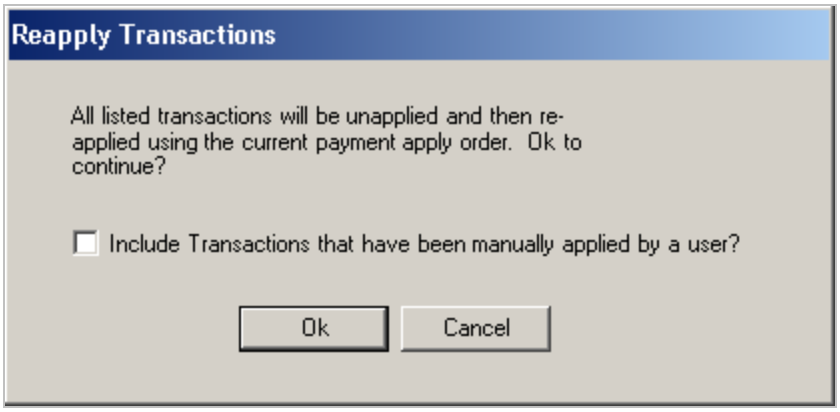


By default manually applied transactions are not included in the Unapply All function. When you select **Include Transactions that have been manually applied by a user?**, you can override the default and choose to include manual transactions in the unapply activity.

Click **Cancel** to abort the transaction or click **OK** to keep your changes. A confirmation message is displayed. Click **OK**.

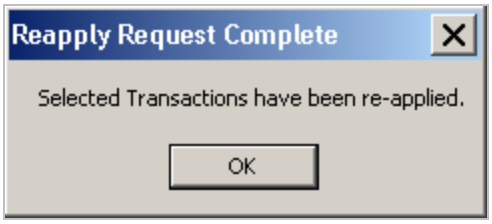


b. Click **Reapply All** to unapply the credit transactions from the debit transactions and then reapply them based on the hierarchies configured in Configure Payment Apply Order. The following message is displayed:



By default, manually applied transactions are not included in the **Reapply All** function. When you select **Include Transactions that have been manually applied by a user?**, you can override the default and choose to include manual transactions in the reapply activity.

Click **Cancel** to abort the transaction or click **OK** to keep your changes. A confirmation message is displayed. Click **OK**.



c. Click **View Ledger** to display the Student Ledger Card for the student associated with the currently selected row in the grid. See Ledger Cards for more information.

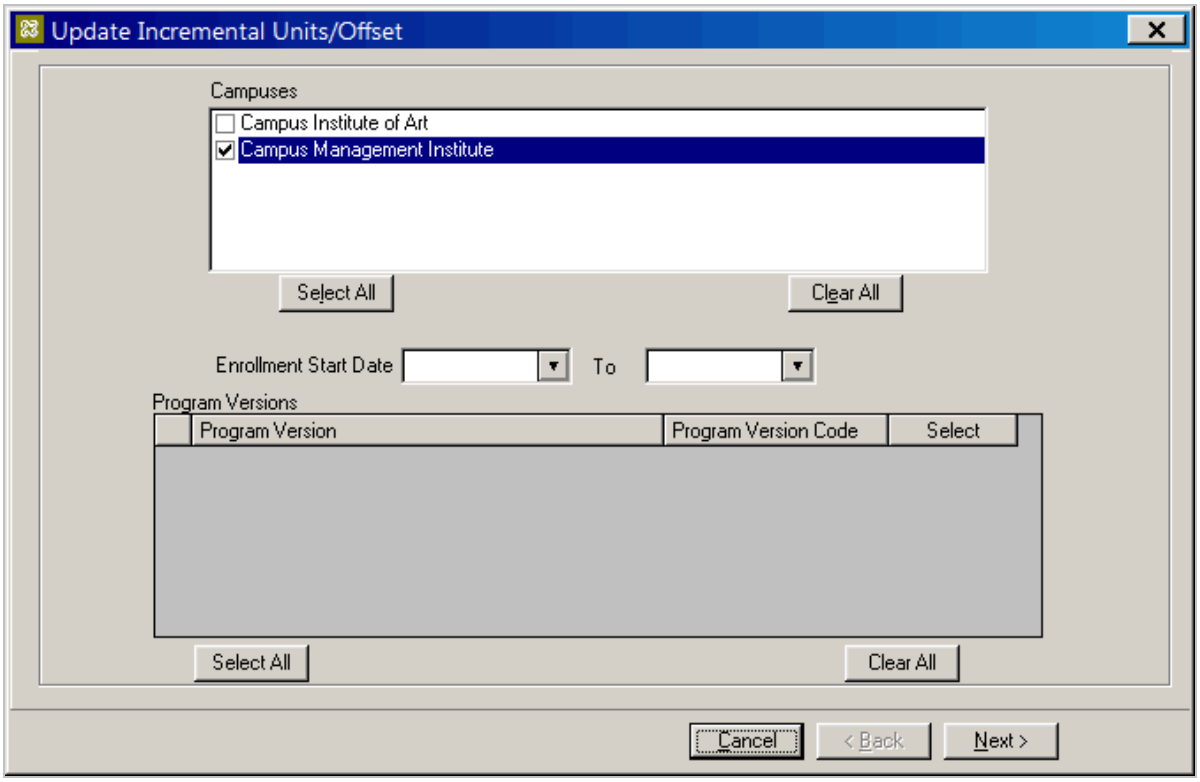
Update Incremental Units/Offset

CampusNexus Student enables a system administrator to update incremental units/offset for charges associated with program versions.

Note: This is a custom feature that is not available to all clients. This feature is used for incremental billing and earning by academic year. For more information, contact your Anthology Inc. account representative.

To update incremental units/offset :

1. Navigate to **Tools > Student Accounts > Update Incremental Units/Offset** . The Update Incremental Units/Offset form is displayed.
2. Select one or more **Campuses**.



3. Specify the **Enrollment Start Date** range.
4. Select the **Program Versions** and click **Next**.
5. Specify the incremental units/offset and click **Finish**.

Tools > Academic Records

The Tools > Academic Records submenu options are as follows:

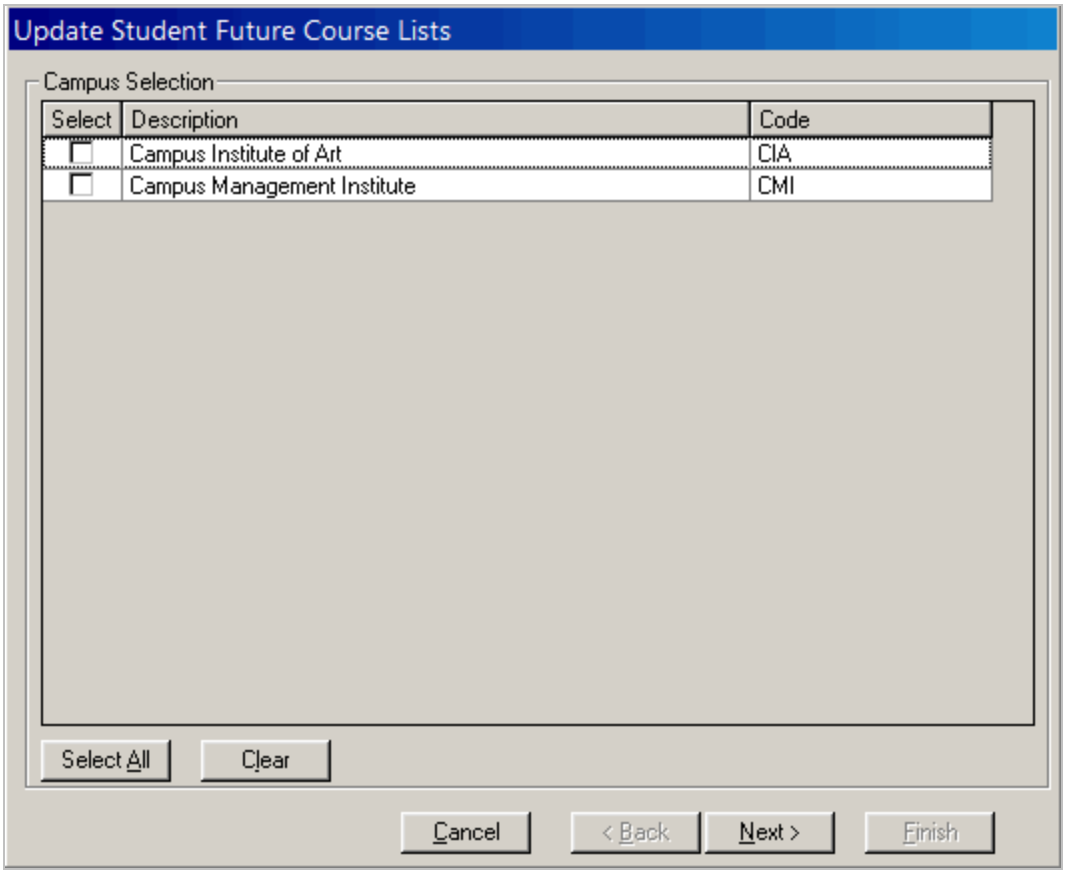
- Update Student Required Course Lists
- Student Pace Evaluation
- Change Course Description
- Deactivate Start Dates
- Archive Attendance
- Modify Term Relationships
- Batch Catalog Assignment
- Update Version Start Date
- Update Grade Scale

Updating Student Required Course Lists

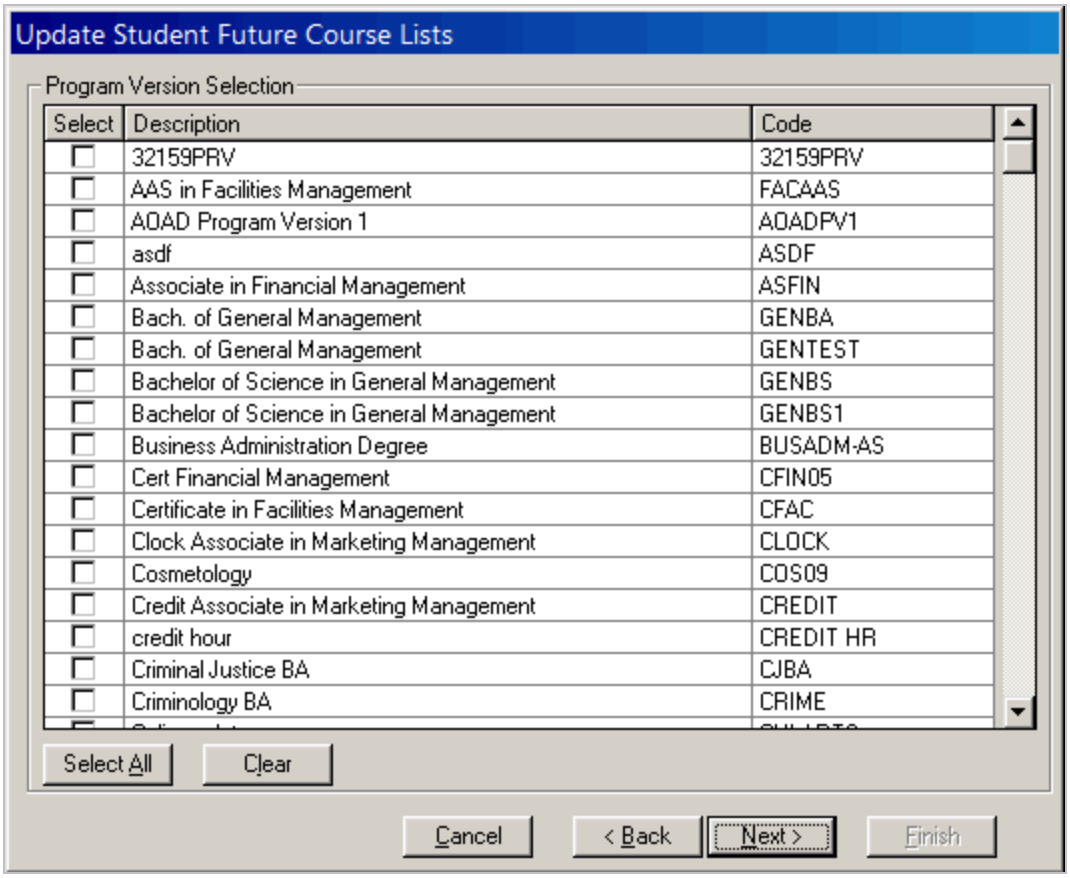
The Update Student Required Course Lists tool re-evaluates non-term students for academic year, loan periods, and Student Pace Evaluation (SPE). The tool allows CampusNexus Student to process enrollments through the AY/LP evaluation logic and SPE logic after updating the course list for any enrollments using a non-term program version when Courses Exempt from Progression (CEFP) is enabled, and the academic calendar is selected for processing in the SPE settings.

Confirmation occurs on the student's AYs and LPs if CEFP is enabled after the required course list is changed by the tool. The AY/LP sequences must have enough credits or hours and weeks to complete the program version requirements. You can specify the criteria for the rebuilding of required course lists.

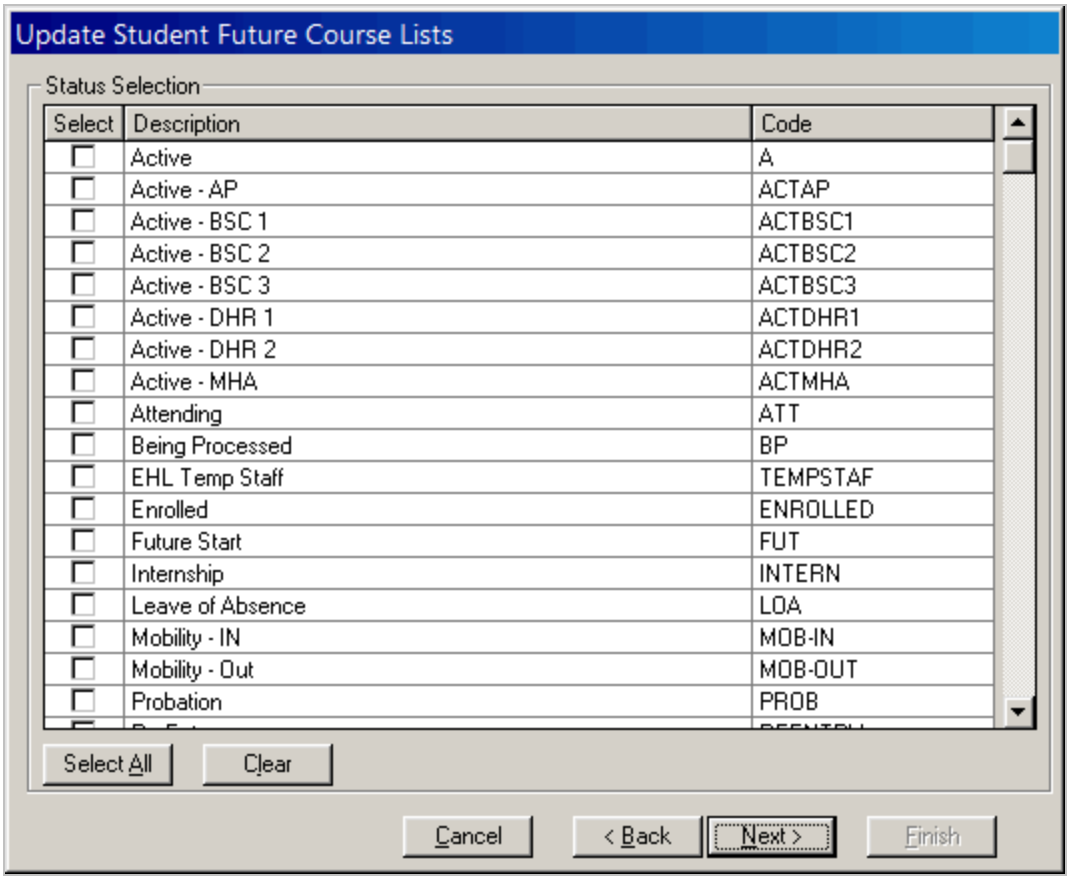
1. Navigate to **Tools** > **Academic Records** > **Update Student Required Course Lists**. The Update Student Future Course Lists form is displayed.



2. Select one or more **Campuses**. Click **Next**.
3. Select the **Program Versions** and click **Next**.

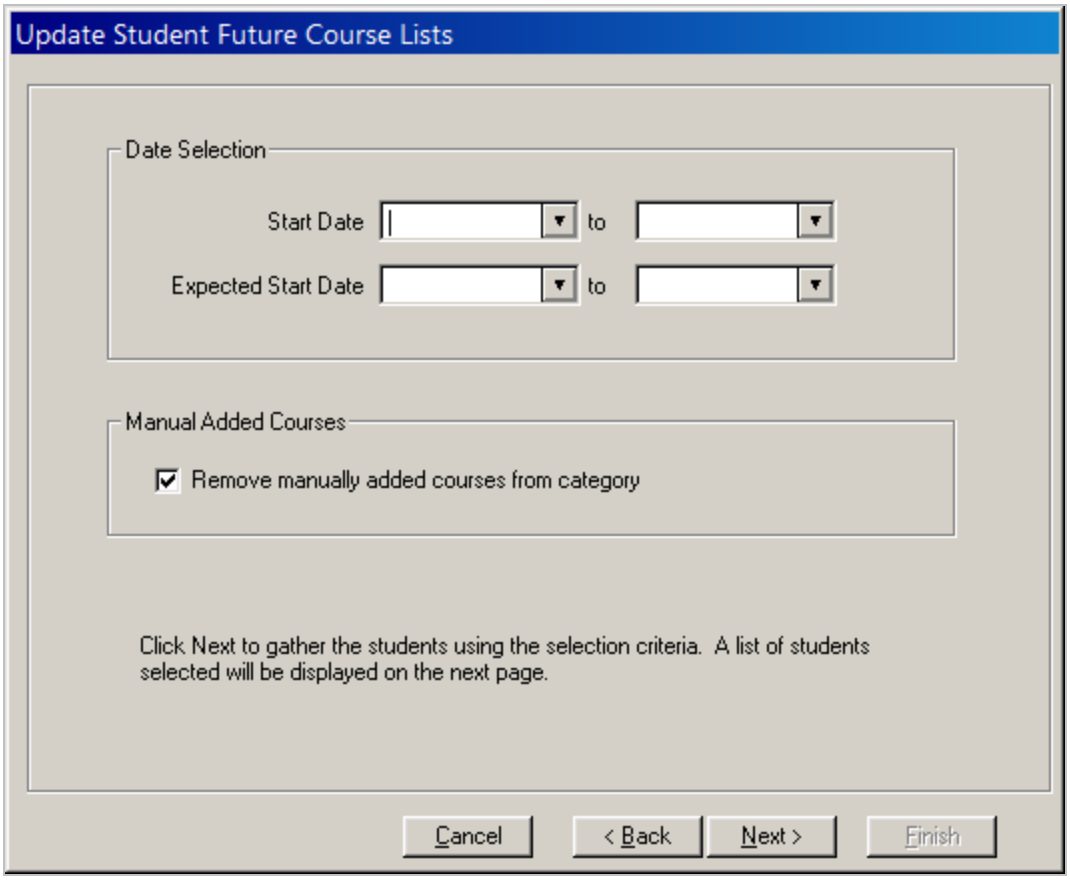


4. Select the **Statuses** and click **Next**.



Note: A school status is included in the list only if it relates to a specified status category. Since this data cleanup option is not applicable to out of school students, school statuses with status categories of L (Lead), N (Never Attended), and P (Permanent Out) are omitted from the list. Placement school statuses (status category of G) are also omitted from the list.

5. In the **Start Date** field, enter a low date only, a high date only, or both.



6. The **Remove manually added courses from category** check box is selected by default. When selected, manually added courses are removed from the Course Category on the Degree Progress Audit. When the check box is cleared, manually added courses are not removed from the Course Category on the Degree Progress Audit.

   When Courses Exempt from Progression (CEFP) is not enabled, the following warning message is displayed when you run the Update Student Required Course List tool:

   When CEFP is not enabled, the warning message displays the following additional information:

   Running this Tool on a Program Version configured for Custom Clock to Credit Conversion may evaluate the FA Hours for Individual Students which may be greater or less than the Total FA Hours configured on the Program Version and will Adjust Academic Years. Please see HELP or the Department of Education for further guidance.

7. In the **Expected Start Date** field, enter a low date only, a high date only, or both.

8. Click **Next** to view the students selected.
9. Click a student name and click a student folder to view the student information.
10. Click **Finish** to preform the data cleanup or cancel the process by clicking **Cancel**. Use the **Back** button to modify the selection criteria.

Student Pace Evaluation (SPE)

The Student Pace Evaluation tool evaluates a student's academic progress and determines whether the student's Financial Aid payment period and academic year dates, as well as expected graduation date or externship date, if applicable, need to be extended due to the lack of academic progress.

The Financial Aid and Housing sections tool are only applicable for students enrolled in non-term based programs that contain payment periods: programs configured with an academic calendar of Credit Hours without Term or Clock Hours.

To be gathered by this tool, a student must have a class scheduled. The tool uses the classes on a student's schedule to determine when the student will complete payment periods and academic years, and to set the graduation dates. If there are not enough classes scheduled, CampusNexus Student uses date add logic from the end date of the last class to calculate when the student will complete the expected number of credits to finish the payment period.

You can run the tool manually or schedule a job to run the tool automatically. When using the automated option, we recommend that you choose a time frame that does not interfere with daily operations.

Using the SPE tool, Financial Aid, Academic, Career Services, and Externship Advisors can do the following without having to first verify the accuracy of date information:

- Identify students who are ineligible to progress to the next payment period or academic year due to lack of academic progress.
- Extend students' payment period and academic year end dates when students are ineligible to progress to the next payment period.
- Correctly identify students who need exit interviews for financial aid.
- Prepare students for Externships.
- Prepare students for Career Searches.

The following assumptions apply:

- The academic year is defined for each program, including the credits/hours and weeks that make up a full academic year.
- The 'Total Credits for Externship' value defined for the Program Version includes the credits for any associated Externship.
- The Externship is taken after completing the classroom courses.
- The "Expected Hours per Week for Externship" will only be used in the graduation date calculation once the student is enrolled in an Externship course.
- A student cannot be registered into overlapping terms unless term sequencing is being used.

For more information on how CampusNexus Student analyzes and manages these program types, see Title IV Payment Periods. See also Graduation and Externship Date Calculations.

Only students in a program version that uses an Academic Calendar of Clock Hour, Credit Hours Without Terms, or Non-Standard Term populate information in the Academic Year, Payment Period, and Disbursement section. Students in standard term programs are only displayed in the enrollment section with projected graduation dates.

In the case where there is at least one class scheduled in the payment period(s), but there are not enough classes scheduled to complete a payment period, CampusNexus Student uses prorating logic to determine the end date of the payment period.

Note: If an updated FA Clock to Credit Conversion Rate (As of 7/1/2011) was added to the configuration, the SPE tool functionality that completes the Clock to Credit conversion, when needed, checks the enrollment date for the student and ensures the correct conversion rate is used to provide the proper adjustments to the dates on the Academic years for the student. This ensures that the proper progression is executed on the student.

If configured to do so, for non-term institutions (Academic Calendars 5 and 6), the Student Pace Evaluation tool can trigger the following automatic updates:

- The Origination Status of an originated Pell award is set from "Accepted" or "Batched to Send" to "Ready to Send" when the anticipated disbursement date of a Pell disbursement is updated by the Student Pace Evaluation tool. See COD Grants Setup.
- Origination change records are created when the Academic Year (AY) start/end dates, Loan Period (LP) start/end dates, or Disbursement dates are updated for a Direct Loan (DIRSUB, DIRUNSUB, and DIRPLUS) by the Student Pace Evaluation tool. See Direct Loan Setup.

Scheduled Complete Flag

For programs with credit or hour requirements, the SPE tool flags a payment period (PP) as “Scheduled Complete” in the database when enough courses are registered to complete the credits/hours of a PP. The SPE tool adjusts the final AY/LP for any extra credits/hours.

The Scheduled Complete flag is able to use courses in a scheduled, current, or completed status to determine if there are enough courses with credits that would potentially complete the payment period. If a course is completed, the grade posted must ‘earn the credits’ in order to utilize the credits or hours value of the course. The scheduled complete flag does not reference the IW milestone.

Complete Flag

The Complete flag is set when the system date is > than the IW milestone of a PP and there are enough credits/hours associated with grades that ‘earn the credits’ and/or meet the minimum grade points configured for the course requirement.

Applying the flags with ‘Disallow Rolling Credits’ disabled:

Academic Years:

In any payment period of an AY when ‘Disallow Rolling Credits’ is not enabled, the AYs progress at the rate defined in the FSA handbook. Therefore, Scheduled Complete/Complete flags for academic year PPs are set using cumulative counts (for the enrollment) of credits/hours for course work with an end date equal to or later than the SPE start date. No faster progression occurs with this setting.

Example:

For a 24-credit AY sequence utilizing 12 credit payment periods, CampusNexus Student would set the flags at 12, 24, 36, 48, etc., respectively. The PPs of the first AY sequence may contain 28 actual credits even though the AY only requires 24 (12 for each PP). The 4 extra credits and any extra weeks are counted toward completing the credit and weeks requirement of the next sequence.

Loan Periods:

The flags are applied using cumulative counts with in each loan period (LP). There is no carryover of extra credits/hours to the subsequent LP sequence.

Example:

For a 24 credit AY sequence utilizing 12 credit payment periods (PP), CampusNexus Student would set the flags at 12, 24|reset the counts| 12,24| reset the counts, etc., respectively. The PPs of the first LP sequence may contain 28 actual credits even though the LP only requires 24 (12 for each PP). The 4 extra credits and any extra weeks are not counted toward completing the credit and weeks requirement of the next sequence. Note that any extra credits/hours or weeks earned during the first PP of an LP sequence can carry over to the second PP of that sequence.

Applying the flags with ‘Disallow Rolling Credits’ enabled:

This setting allows the flags for AY PPs to mimic the logic used for LPs. The flags are applied using cumulative counts with in each loan period (AY). There is no carryover of extra credits/hours to the subsequent AY sequence.

Note that the AY/LP evaluation is triggered at the end of PP2 for each sequence to determine if there are any extra credits or hours earned during that sequence.

- When the Courses Exempt from Progression (CEFP) logic is enabled, courses flagged as 'Y' are used to determine the Scheduled Complete and Complete status. Clock hour programs use scheduled hours for current and scheduled courses and attended hours for completed courses.
- When the CEFP logic is disabled, current and scheduled courses always progress a student. If a course is completed, the SPE tool uses completed courses with a grade that earns the credits to determine the Scheduled Complete and Complete status. For hours-based programs, the attended course hours are used to determine the Scheduled Complete and Complete status. Scheduled hours are evaluated for scheduled and current courses.

During the final AY/LP, the Scheduled Complete flag can be set as a result of transfer credits being Approved. In this case, SPE reduces the duration of the final AY/LP and may attempt to remove a PP. If a PP cannot be removed, the AY/LP is not adjusted and a Contact Manager activity is created.

If PP2 has a disbursement, CampusNexus Student checks the setting of the 'Allow zero out extra AY/LP' option:

- If the option is selected, CampusNexus Student sets PP2 to zero (0).
- If the option is not selected, CampusNexus Student notifies you that the AY/LP could not be adjusted.

The Scheduled Complete flag is removed as a result of transfer credits being unapproved. In this case, SPE extends the final AY/LP.

The Scheduled Complete flag is not set or is removed on a student's AY and LPs when not enough courses are registered to complete the credits/hours requirement of that PP.

Title IV Eligibility

Payment periods that the student will not attend are flagged to indicate that the student is not eligible for Title IV funds during that payment period since the student will be unable to establish eligibility for Title IV funds.

The 'notEligibleforT4' flag is set to 1 for the following scenarios:

- A final non-zero credit payment period occurs with a credits milestone that is the same as a prior payment period (i.e., the student registered enough credits to complete the program version in the payment period prior to the final payment period). Use cases are AY/LP having 1 or 2 payment periods. Disallow rolling credits is disabled to create this data pattern for a final AY/LP with a single payment period.
- A zero credit payment period can occur when the flag to allow adjustment to 0 is enabled. See Allow zero out extra AY/LP under Setup > Campus Information > Financial Aid (tab). Extra payment periods that are unneeded, but cannot be removed due to constraints, are updated to have 0 credits/hours.

When the flag is set to 1, the Payment Period for Academic Year form displays the message: *"The system has calculated that the student will complete the program prior to this payment period. The student is not eligible for the TIV funds associated to this payment period."* For more information, see Payment Periods for Academic Year form.

You can configure an alert for a staff member when a payment period is flagged non-eligible for Title IV funds. For more information, see TIV Eligibility Alert under Setup > Campus Information > Financial Aid (tab).

Association between Courses and Payment Periods

For institutions that use the Student Pace Evaluator (SPE), CampusNexus Student can re-evaluate the association between registered courses and Payment Periods after the SPE has changed Payment Period dates so that courses are associated with the correct Payment Periods.

Re-association of courses and charges can occur in the following instances:

1. Registration and creation of pending charges in payment periods that will change after SPE executes.

- The registration of a course that has an end date in a future payment period and after SPE executes the credits for that course are needed to complete a more recent payment period. This change cascades through the subsequent payment period/course and charge associations.

2. Adjusting Payment periods due to dropped or failed courses.

- The actions (triggers) in this instance occur in a payment period and the payment period is extended to include a new course(s) and the associated charges for those courses. This change cascades through the subsequent payment period/course and charge associations.

3. Transfer Section

- This action can be performed at various times during the actions mentioned above.

4. Re-Entry > 180

- This process can create an overlap in AY/LP sequences and the associated payment periods. The PP sequences linked to an AY that starts prior to the Re-Entry > 180 date are no longer valid for associating with charges.

The logic for updating pending charges and ledger transactions should only be done for a configuration of the student's billing method that uses Payment Period Detail Billing and Revenue should only be updated if earning by transaction code over the course section.

Executing Student Pace Evaluation and Payment Period Billing Steps in Sequential Order Automatically

When the Student Pace Evaluation (SPE) job is used to update a student's academic progress along with payment period billing based on attendance, best practice is to run the following SQL jobs associated with the SPE and payment period billing in sequential order to ensure that the students are billed properly:

1. Autolock Payment Periods/Loan Periods
2. Recalculate the Graduation Date and Expected Externship Begin Date
3. Recalculate Payment Period Pending Charges
4. Process Payment Period Adjustments
5. Post Payment Period Pending Charges Based on Attendance

For institutions that do not want to manage these jobs individually, the SPE and Payment Period Billing job serves as a master job to run these jobs in the proper sequence. This master job checks if any of the individual jobs are enabled and disables them before running the corresponding steps within the master job.

Note: This master job is disabled by default, allowing institutions to decide when to replace their current job sequence.

Each step uses a SyRegistry key. Institutions can update the Registry keys to enable/disable certain steps.

SyRegistry Keys

	Step Name	Corresponding syRegistry Key Name
1	Autolock Payment Periods/Loan Periods_Step1	xxADFAExecuteAutoLockStep
2	Recalculate the Graduation Date and Expected Externship Begin Date_Step2a, 2b, 2c	xxADFAExecuteSPEStep
3	Recalculate Payment Period Pending Charges_Step3	xxSAExecuteRecalculatePPPendingChargesStep
4	Process Payment Period Adjustments_Step4	xxSAExecutePPAdjustmentsStep
5	Post Payment Period Pending Charges Based on Attendance_Step5	xxSAExecutePostPPPendingChargesStep

The master job default frequency is daily starting at midnight.

Prorating Logic

CampusNexus Student uses the following logic to determine the end date of the payment period.

1. First, calculate the number of days needed to complete the current courses (scheduled, current or complete) in the payment period. This is calculated by counting the number of days between the Payment Period start date and the end date of the last current course (add more days to factor in holidays as needed).
2. Calculate the number of credits/hours still needed to complete the payment period by subtracting the credits/hours of the current courses in the payment period from the total number of credits/hours required for the payment period.

The prorating is calculated as follows:

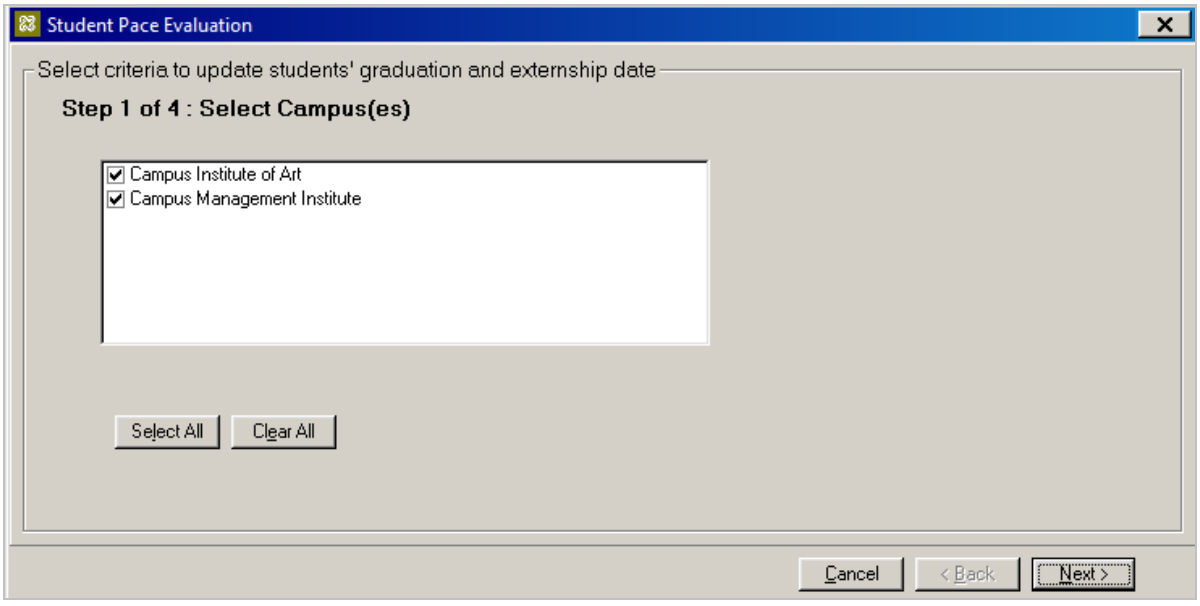
- Number of days to extend = (number of days calculated in Step 1 * number of credits/hours calculated in Step 2) / (number of credits/hours of current courses in the payment period)
- Add the number of days calculated previously to the end date of the latest current course (Scheduled, completed, current). The new date calculated is the end date of the current payment period.
- Add 1 day to this new end date, and this is the start date of the next payment period. The end date of this next payment period is calculated by using the start date and the number of weeks in the payment period. This process is repeated for subsequent payment periods.

Note 1: When a course overlaps non-term payment periods, i.e., the courses began in the first payment period and ended in the second payment period, weeks and credits associated with the overlapping courses are counted toward completion of the second payment period and the second payment period end dates are adjusted accordingly.

Note 2: When "Allow courses to be exempt from progression" is enabled, CampusNexus Student uses Instructional Weeks (IW) projection to determine both milestone dates on the payment period if there are not enough courses scheduled to complete the payment period. The exception to the rule is that if the IW milestone has been met; however, the hours or credits requirement has not, CampusNexus Student uses prorating to determine how long it will take the student to complete the requirement. Subsequent payment periods not covered by scheduled course work continue to use Instructional Week projection.

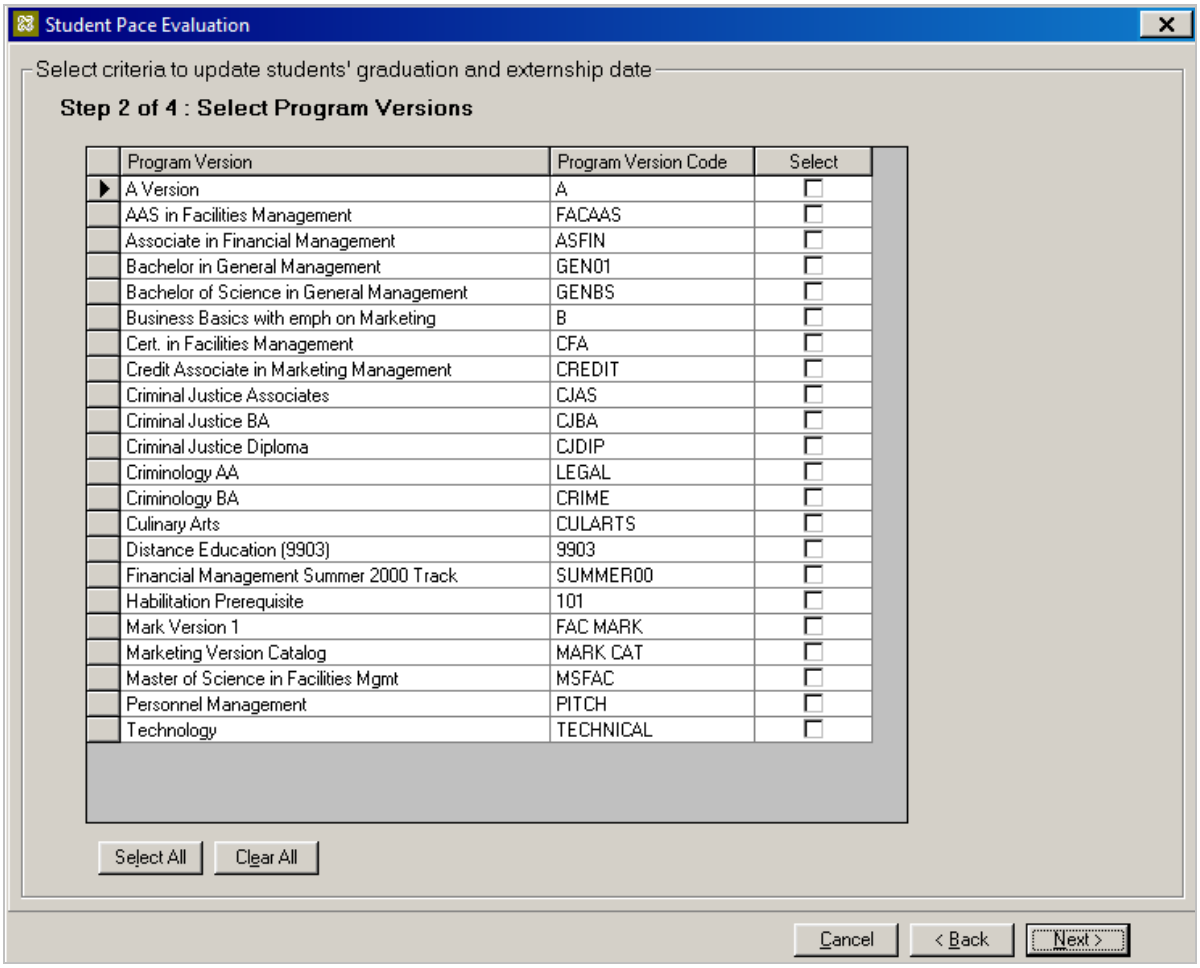
Updating Graduation and Externship Dates

1. Navigate to **Tools > Academic Records > Student Pace Evaluation**. Step 1 of 4: Select Campuses of the Student Pace Evaluation (SPE) tool is displayed.



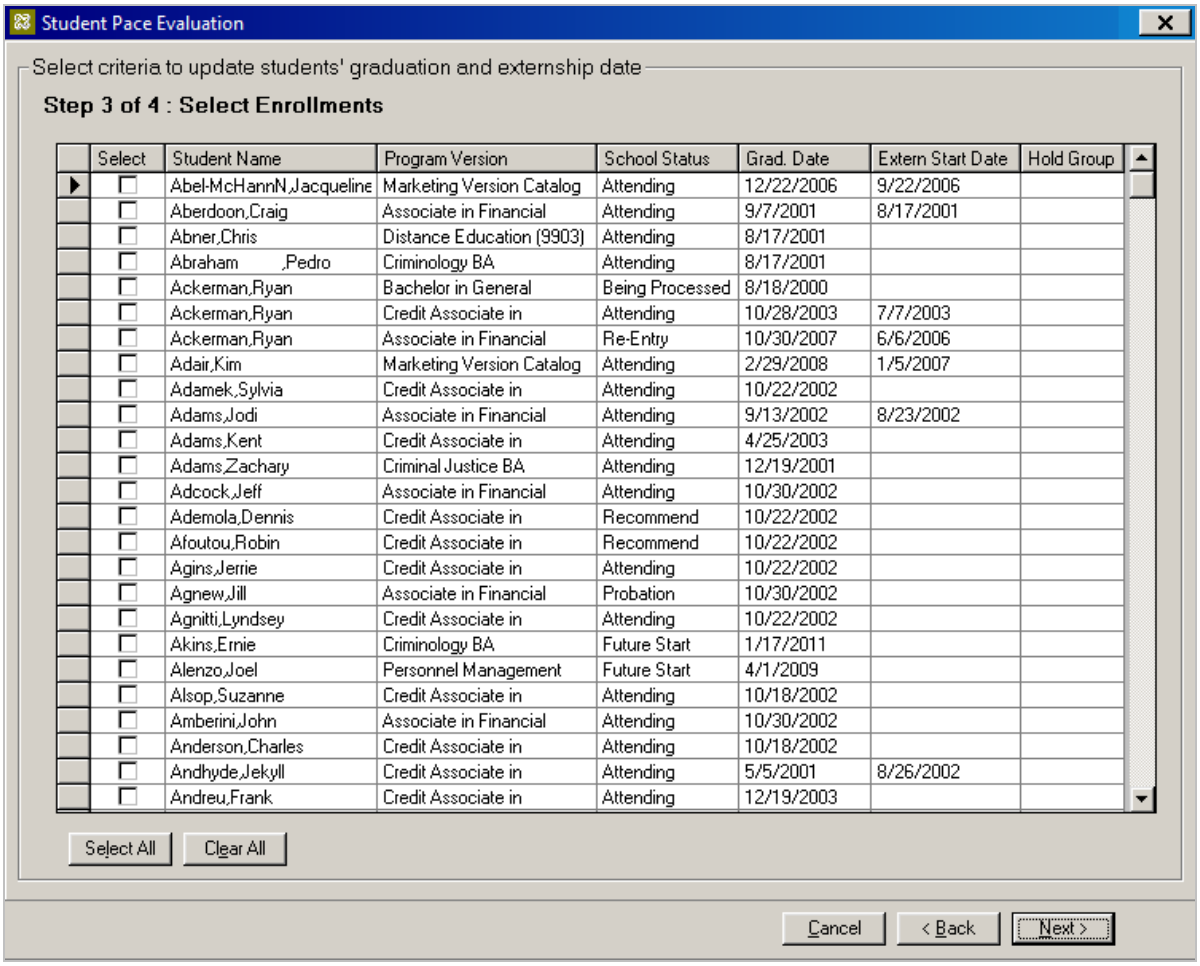
2. Select the applicable Campus(es) from the **Campuses** list. Use **Select All** or **Clear All** to select or clear *all* check boxes in the list. Click **Next**.

Step 2 of 4: Select Program Versions of the SPE tool is displayed.



3. Indicate the applicable **Program Version**(s) by selecting the check box(es) on the corresponding grid rows. Use **Select All** or **Clear All** to select or clear *all* check boxes in the list. Click **Next**.

   Step 3 of 4: Select Enrollments of the SPE tool is displayed.



Select	Student Name	Program Version	School Status	Grad. Date	Extern Start Date	Hold Group
☐	Abel-McHannN,Jacqueline	Marketing Version Catalog	Attending	12/22/2006	9/22/2006	
☐	Aberdoon,Craig	Associate in Financial	Attending	9/7/2001	8/17/2001	
☐	Abner,Chris	Distance Education (9903)	Attending	8/17/2001		
☐	Abraham ,Pedro	Criminology BA	Attending	8/17/2001		
☐	Ackerman,Ryan	Bachelor in General	Being Processed	8/18/2000		
☐	Ackerman,Ryan	Credit Associate in	Attending	10/28/2003	7/7/2003	
☐	Ackerman,Ryan	Associate in Financial	Re-Entry	10/30/2007	6/6/2006	
☐	Adair,Kim	Marketing Version Catalog	Attending	2/29/2008	1/5/2007	
☐	Adamek,Sylvia	Credit Associate in	Attending	10/22/2002		
☐	Adams,Jodi	Associate in Financial	Attending	9/13/2002	8/23/2002	
☐	Adams,Kent	Credit Associate in	Attending	4/25/2003		
☐	Adams,Zachary	Criminal Justice BA	Attending	12/19/2001		
☐	Adcock,Jeff	Associate in Financial	Attending	10/30/2002		
☐	Ademola,Dennis	Credit Associate in	Recommend	10/22/2002		
☐	Afoutou,Robin	Credit Associate in	Recommend	10/22/2002		
☐	Agins,Jerrie	Credit Associate in	Attending	10/22/2002		
☐	Agnew,Jill	Associate in Financial	Probation	10/30/2002		
☐	Agnitti,Lyndsey	Credit Associate in	Attending	10/22/2002		
☐	Akins,Ernie	Criminology BA	Future Start	1/17/2011		
☐	Alenzo,Joel	Personnel Management	Future Start	4/1/2009		
☐	Alsop,Suzanne	Credit Associate in	Attending	10/18/2002		
☐	Amberini,John	Associate in Financial	Attending	10/30/2002		
☐	Anderson,Charles	Credit Associate in	Attending	10/18/2002		
☐	Andhyde,Jekyll	Credit Associate in	Attending	5/5/2001	8/26/2002	
☐	Andreu,Frank	Credit Associate in	Attending	12/19/2003		

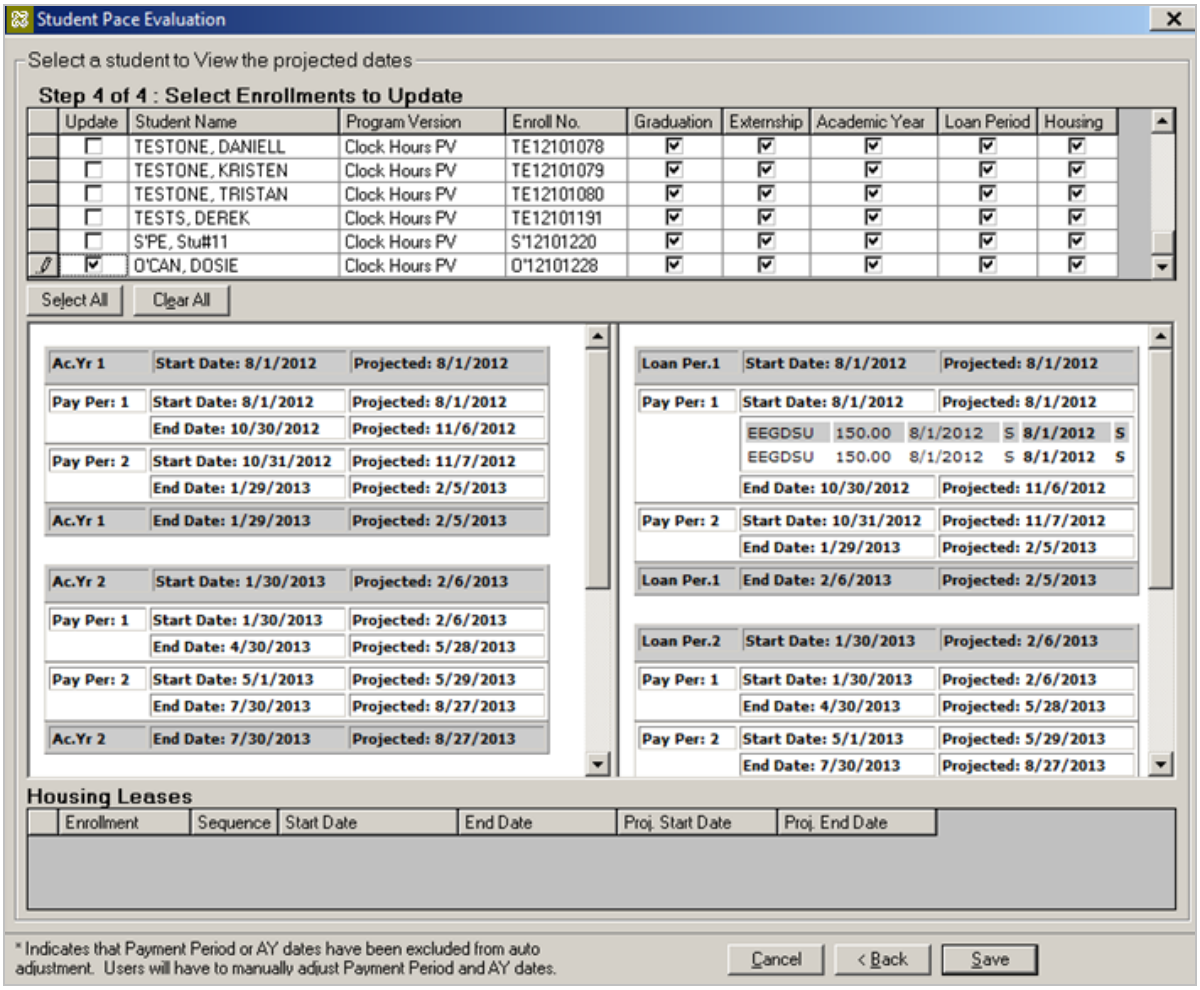
4. **Select** the check box for the student(s) you would like updated. Use **Select All** or **Clear All** to select or clear *all* check boxes in the list. Click **Next**.

   Step 4 of 4: Select Enrollments to Update of the SPE tool is displayed. It shows a list of selected students along with the projected dates for the Graduation Date, Externship Date, Academic Year Dates, Payment Period Dates, and Disbursement Dates that would change as the result of a student's progress in the chosen program.

5. **Select** a record in this grid to display the information in the lower grids. Select the **Update** check box to allow the record to be updated.

   The preview pane on the left lists academic years, the right pane displays loan period information. If there are loan periods associated with the award, it is displayed in the loan period pane; however; if no loan periods are associated, it is displayed in the academic year pane. The listing is either/or and will not show both at once.

   Note: Only enrollments with payment periods display academic year, payment period, and disbursement information.



Academic Years: This grid contains the academic years for the enrollment selected in the top grid. The grid also shows the current start and end dates along with the projected new dates. The selected record determines which payment periods are displayed in the Payment Periods grid.

Loan Periods: This grid contains the Loan Periods for the enrollment selected in the top grid. The grid also shows the current start and end dates along with the projected new dates. The selected record determines which payment periods are displayed in the Payment Periods grid.

BBAY Dates: This grid contains the BBAY Start and End Dates for the enrollment selected in the top grid. The grid also shows the current start and end dates along with the projected new dates. During SPE evaluation, if a student fails to progress as expected, this may cause the student's Loan Period to be extended. Should the Loan Period be extended, SPE will make the corresponding adjustments to the BBAY Start and End Dates by extending the BBAY Start and End Dates by the same number of days that the Loan Period Start and End Dates are extended. When the student has a stub loan period, the SPE evaluation will not adjust the BBAY start date. Also, if any adjustments made due to course progression, the Loan Period and the BBAY End Date will not be adjusted prior to the NSLDS End date on the stub loan period. For the Loan Period and BBAY dates to be adjusted by the SPE evaluation process, the Title IV Loan configuration must be enabled on the SPE settings and checked at the time of SPE evaluation.

Payment Periods: This grid contains the payment periods for the selected academic Year. The grid also shows the current start and end dates along with the projected new dates. Select a payment period to display any disbursement dates in the Disbursements grid.

Additionally, Payment Period dates will be flagged (*) if the manual Override Payment Period has been selected for the student. A caption noted with an asterisk * will appear at the bottom of each step of the SPE tool to indicate that the Payment Period dates have been excluded from auto adjustment and users will have to manually adjust the Payment Period and AY dates.

Note: The Academic Years and Payment Periods are updated based on the definition of instructional weeks as specified by the Department of Education (ED). The instructional weeks logic includes the weeks from failed courses and weeks from a dropped course prior to the drop date (by default). It does not include weeks while the student is on a leave of absence (LOA).

Outlined below are some of the general rules that CampusNexus Student follows when creating payment periods:

- When initially creating academic years and payment periods, CampusNexus Student uses instructional weeks to determine the actual dates based on the weeks attribute.
- The Start Date for Sequence 1 of a payment period sets the start date for the instructional weeks block for the enrollment.
- The initial payment period Start Date is aligned with the Program Version's Start Date

Rules for subsequent payment period start dates:

CampusNexus Student sets the Start Date to the day after the prior payment period's End Date in either of the following cases:

- If the first course in the subsequent payment period starts before the end date of the prior payment period,

  - OR -

- If the check box to align payment periods to course start and end dates is cleared (see Student Pace Evaluation Settings).

If these conditions are not met, CampusNexus Student sets the start date to the next course's start date, or the check box to align payment periods to course start and end dates is selected (see Student Pace Evaluation Settings).

Rules for payment period end dates:

The end dates are set to a point in time where both the "weeks" and "credits"/"hours" payment period attributes are satisfied. CampusNexus Student shows visibility into the dates calculated by displaying milestone dates of when the student will satisfy the attributes of the payment periods. The logic will take the greater of the two milestone dates and set the end date of the payment period to that date when the flag to align payment period to course start and end dates is cleared. If the check box to align payment periods to course start and end dates is selected, CampusNexus Student finds the course that encompasses the greater of the two milestone dates and sets the payment period end date to that date.

Note: A payment period can never end on a holiday configured in the Calendar set up in CampusNexus Student (**Lists > Academic Records > Calendar (tab)**). The End Date is always the day after the holiday ends.

Note: When SAP is executed by Payment Period End Date for clock hour programs and the institution has an excused absence policy, the excused absence policy is accounted for and incorporated.

Note regarding Payment Periods and Student Pace Evaluation (SPE) logic:
There is a difference in the calculations if the institution is configured to use Global as a servicer. See Title IV Payment Periods for more information.

Disbursements: This grid displays disbursements from the selected payment period if the date or the status is projected to change.

The disbursement dates for scheduled and ready to pay disbursement are moved the same number of days as the start date unless a disbursement would be moved outside of the payment period. If the previous logic would place a disbursement outside of a payment period then the system will apply the following rules:

- If the current system date is prior to the payment period start, then set the 1st disbursement to the start date and an additional disbursement to the midpoint.
- If the current system date is during the payment period, then set the 1st disbursement to the start date and an additional disbursement to the later of the midpoint or current system date.
- If the current system date is greater than the payment period end, then set the 1st disbursement to the end date of the payment period.

This record includes the amount of the packaged award, the disbursement number, the disbursement amount, the current and projected disbursement dates, and the current and projected disbursement status.

Note: CampusNexus Student marks Title IV grant disbursements as Canceled if the payment period (with which the disbursement is associated) start date or the disbursement date is adjusted by the SPE tool to fall after the end of the award year, i.e., after June 30 of the award year. In the case of Pell, ACG, SMART, and SEOG grants, the payment period start date is considered when determining whether disbursements will be canceled; for Perkins loans, which are campus-based loans that follow similar regulations as Title IV grants, the disbursement date is considered when determining whether disbursements will be canceled. When a disbursement is canceled on this basis, CampusNexus Student updates the award amount accordingly.

If the change is made by the SPE tool job, CampusNexus Student assigns SPE TOOL AUTO USER as the user who canceled the disbursement. If the change is made by running the SPE tool through the Tools menu, CampusNexus Student records the User ID of the user who runs the SPE tool as the user who canceled the disbursement.

If configured to do so, SPE can cancel a direct loan or any remaining scheduled disbursements of the direct loan:

- When the SPE update causes the loan's BBAY start date to be later than the Award Year's end date.

  - OR -

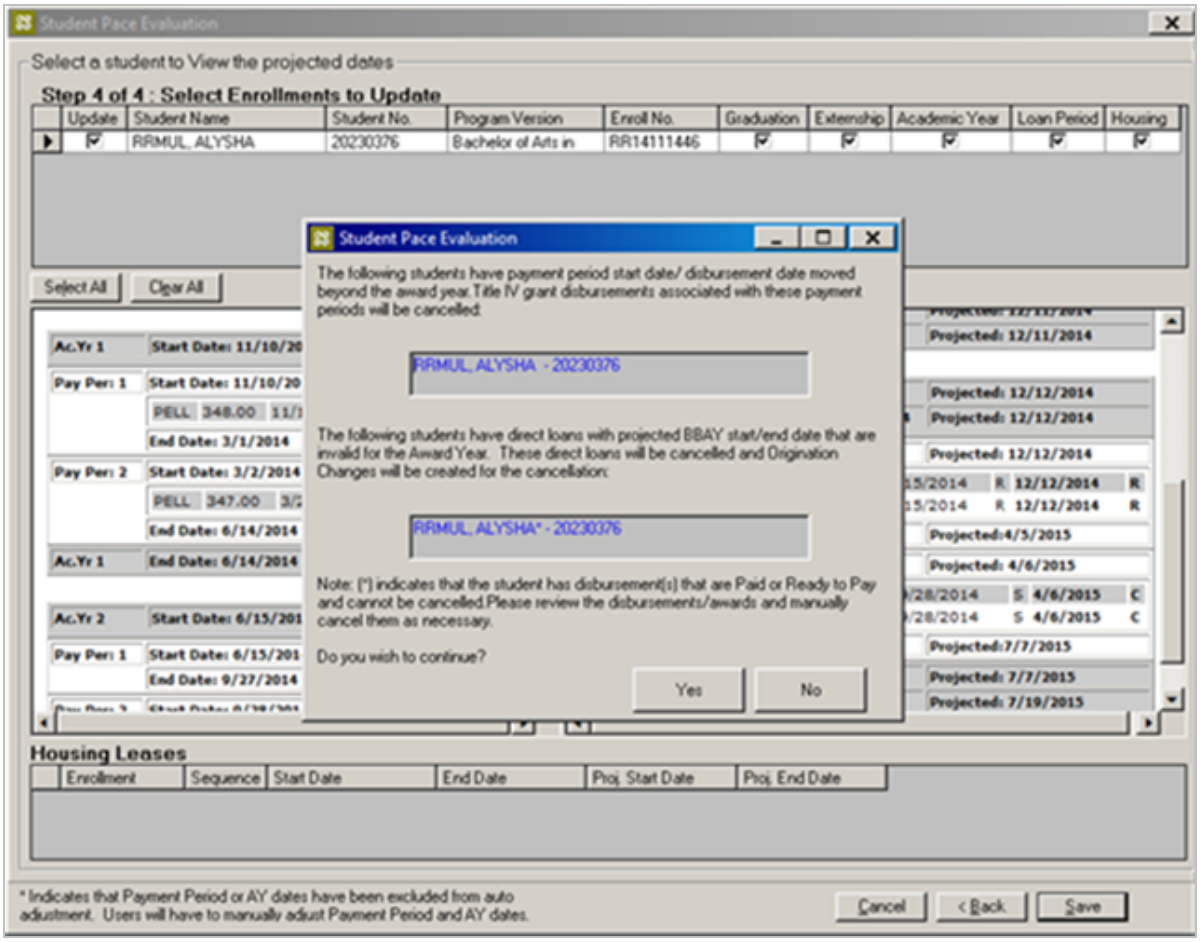
- When the SPE update causes the BBAY end date to be earlier than the Award Year's start date.

To configure this option, select Yes for "*Cancel loan when loan dates are invalid?*" in the Direct Loan Setup form. For the direct loans that cannot be cancelled due to Paid or Ready to Pay disbursements, CampusNexus Student cancels all remaining scheduled disbursements. Direct loan disbursements that will be cancelled are displayed on the SPE user interface with the Projected Status as 'C' (Cancelled). Additionally, CampusNexus Student automatically creates origination change records for the cancelled loan if the loan is eligible for origination changes. For this to occur the Origination Status must be 'Accepted' or 'Batched to Send', and the configuration '*Auto Create Orig. Changes/Adjustments for cancelled disbs/refunds?*' option in the same Direct Loan Setup form option must be set to Yes. CampusNexus Student also creates Origination Changes for the cancellation if the *Auto create Orig. Changes/Adjustments for canceled disbs/refunds?* option in the same Direct Loan Setup form option is set to Yes.

Note: When a loan or remaining scheduled disbursements of a loan are cancelled by the SPE due to invalid loan dates, the loan's dates at the loan level (the loan period and BBAY start and end date as well as disbursement dates) are not updated to the projected invalid dates. This ensures that the origination changes for the cancellation pass loan dates validation during Export to COD.

Additionally, you can configure CampusNexus Student to notify a staff member when a direct loan is cancelled or cannot be cancelled by SPE. See Auto Update Alert on the Financial Aid tab of the Campus Information form.

Before updating the students' data, the SPE tool will notify you if there are students who have Title VI grant disbursements or direct loans to be cancelled as a result of the update. This alert also indicates students whose Title IV grant disbursements and/or loans that cannot be cancelled due to Paid or Ready to Pay disbursements. You can decide whether to proceed.



Housing Leases: This grid displays student leases with a Housing Period of Academic Year that can be updated by the tool. For each lease, the enrollment, sequence number, current lease start date, current lease end date, projected lease start date, and projected lease end date are displayed.

Note: When a student's lease is updated with new academic year dates, CampusNexus Student checks if the room is available for the new dates. If the room is occupied by another student on the new dates, the lease will be extended for the student currently occupying the room and the other student's lease will be marked as pending. The Lease Exception report may then be used to identify students with pending leases who will have to be assigned new accommodation.

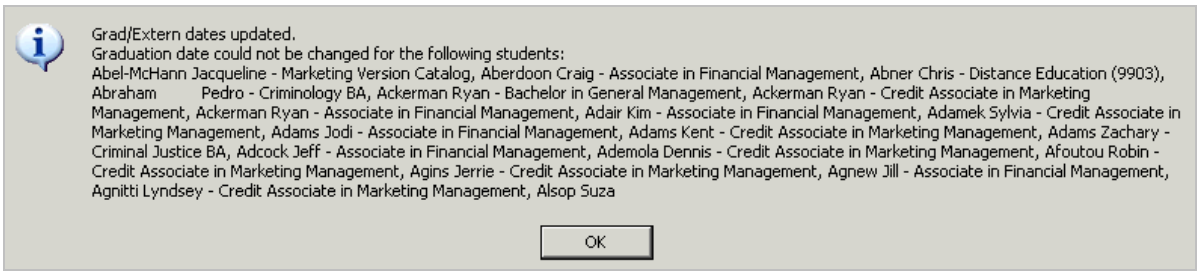
LOA Students: Leave of Absence (LOA) students are gathered in the tool and dates adjusted using the expected return date for Academic Calendars that contain payment periods. If the student does not return on or before the expected return date, CampusNexus Student continues to adjust the dates each time the tool is run. If a student is placed on LOA after completing payment period 1 in an academic Year but before completing any credits/hours in the next payment period, the start date of the payment period is adjusted to the return date from LOA.

6. Select **Save** to save your changes, **Cancel** to discard your changes, or **Back** to return to the previous screen.

   Upon clicking **Save**, if any Title IV grant disbursements for the selected student(s) are subject to cancellation (see Disbursements above), CampusNexus Student displays a warning message listing the students for whom disbursements are about to be canceled and asking if you would like to continue.

   If you click **Yes**, CampusNexus Student continues to update the payment period dates, academic year dates, and graduation dates, cancels the indicated disbursements, and updates the total award amounts for the selected enrollments.

7. A message notifies you that the graduation/externship dates have been updated and lists any exceptions. Click **OK** to close the message.



Transfer Enrollment Settings for Payment Period Logic

When the transfer enrollment process is performed on students in Program Versions that use payment periods, select the logic to transfer the start date and the academic Year information or to not transfer the start date and academic Year information. This setup is found under **Setup** > **Campus Locations** > **Transfer Opt.** tab. The check box to transfer the start date and academic Year information can be selected independently of each other; however, you should not select one without the other as the SPE tool logic needs these to be synchronized for the tool to work correctly.

When the start date is transferred during an enrollment transfer with a program version configured for non-term, the Financial Aid will be transferred to the new enrollment. Selecting the start date to transfer is a trigger for CampusNexus Student to allow the Financial Aid to move to the new enrollment. You must validate the rules below as designated by the Department of Education as CampusNexus Student currently does not have a rules engine to determine these validations.

You may consider a student who transfers from one program to another at your institution to remain in the same payment period if all of the following conditions apply:

- The student is continuously enrolled at your institution.
- The coursework in the payment period the student is transferring out of is substantially similar to the coursework the student will be taking in the program into which he/she is transferring.
- The payment periods are substantially equal in length in weeks of instruction and credit or clock-hours.
- There are few or no changes in institution charges associated with the payment period.
- The credits from the payment period the student is transferring out of are accepted for credit in the new program.

When the start date is not transferred during an enrollment transfer, Financial Aid will not be moved to the new enrollment.

Course Retake Logic for Non-Term Programs within the Student Pace Evaluation Process

The logic of the SPE tool for non-term programs does not consider course retakes in which credit has previously been earned in the payment period, academic year, and graduation date calculations. In other words, a retaken course where credit has previously been earned is not used to start or end payment periods or academic years. Additionally, the credits earned on the retake instance are not included when calculating whether the student has met the credits required to progress to the next payment period or academic year. For students in non-term programs, the expected graduation date is updated based on the projected academic year dates, so the payment period and academic year logic affects the expected graduation date accordingly.

Example 1: Retake after failing the course and not receiving credit

Program Length: 24 credits and 30 weeks

Academic Year: 24 credits and 30 weeks

Payment Periods: 2 payment periods, each 12 credits and 15 weeks (1-12 credits and 13-24 credits)

Each payment period consists of three courses at 4 credits each. The student passes two courses and fails the third (student does not earn the credit for the course). The student must retake the course to have successfully completed the 12 credits defined for the payment period. Once the student has successfully passed the retaken course, the student progresses to the next payment period as long as the weeks part of the payment period definition has been met. Until the student successfully completes the retaken course (assuming they retake the course immediately after the first instance,) the student is considered to remain in the first payment period.

Example 2: Retake after passing the course and receiving credit

Program Length: 48 credits and 60 weeks

Academic Year: 24 credits and 30 weeks

Payment Periods: 2 payment periods, each 12 credits and 15 weeks (1-12 credits and 13-24 credits)

Each payment period consists of three courses at 4 credits each. The student passes all three courses but needs to retake one of the courses to receive a better grade. The student has already received credit for the first payment period based on the coursework assigned to that payment period (the earned credit from the retaken course has been included) and 15 weeks have elapsed. The student is considered to have completed the first payment period and, if all other eligibility requirements have been met, may receive a Title IV disbursement for the subsequent payment period. Although the institution may charge the student for retaking the course, the student may not receive a Title IV payment for this course again. In addition, the course retake is not considered for determining the credits successfully completed in the subsequent payment period. For example, since the program length in this example is 48 credits, this retaken course would not count when determining whether the student progresses from the 13-24 credit payment period in the first academic year to the 25-36 credit payment period in the second academic year.

Impact of SPE on Overlapping Loan Periods

The SPE tool does not update loan dates for a stub loan period so that the stub loan period truly reflects the student's overlapping loan period and correctly shows the student's progress in subsequent loan periods. For programs configured with Academic Calendar 5 and 6, changes to the student's schedule (e.g., course registration, unregistration, course association, reassignment of courses, and posting of pass, fail, CLEP, and transfer final grades) do not affect the following dates of the stub loan period:

- LP end date
- BBAY start and end date
- Loan end date of any direct loans associated with the stub loan period
- BBAY start and end date of any direct loans associated with the stub loan period
- Disbursement dates of any direct loans associated with the stub loan period

Dates for subsequent LPs continue to be updated using current SPE logic.

The SPE tool applies *Scheduled Complete* or *Completed* flags to overlapping loan payment periods (LPPs) for all programs configured with Academic Calendar 5 and 6 using the logic below:

- LPPs of the stub loan period are flagged as Schedule Complete when enough credits/hours are registered.
- LPPs of a stub loan period are flagged as Completed when all courses that end within the LPP have final grade posted.

LPPs of the subsequent LPs are marked as Schedule Complete or Completed using standard SPE logic.

When the last LPP of the stub loan period is marked as *Scheduled Complete* or *Completed*, the SPE tool updates the following values for the stub loan period and rebuilds subsequent LPs to reflect the true remaining credits/hours and instructional weeks needed to complete the program:

- The number of credits/hours of the stub loan period is updated to the total number of credits/hours of Scheduled Complete / Completed courses that have the end date within the stub loan period's date range.
- The number of weeks in the stub loan period is updated with the calculated number of instructional weeks of all the Scheduled Complete / Completed courses that end within the stub loan period's date range.
- The attributes of the payment periods of the stub loan period are updated based on the updated credits/hours and weeks of the stub loan period.

The SPE uses the course expected end date or actual end date to determine if the course falls within the overlapping period. This allows the SPE to calculate and update the correct attributes for the overlapping loan period when the LP is Scheduled Complete / Completed. To update the attributes of the PP during Scheduled Complete / Completed the LP's credits/hours are divided in halves (if there are two LPPs) for each LPP.

Note: In some scenarios, the stub loan period's credits/hours are updated as a result of Scheduled Complete/Completed and the new attributes require the LPP of the stub loan period to be removed or added. For example, the stub loan period was originally created with credits/hours that are more than half of the full AY definition and therefore two LPPs were created. When setting the Scheduled Complete / Completed flag for the LPPs of the stub loan period, CampusNexus Student calculated the actual credits/hours Scheduled Complete/Completed and updated the credits/hours and IWs for the stub loan period accordingly. However, the new credits/hours attribute of the stub loan period is less than half of the full AY definition and therefore the stub loan period should have only one LPP. In this scenario, the removal of the second LPP of the stub loan period must be manually removed and the first LPP should be updated accordingly.

Graduation and Externship Date Calculations

Use the Student Pace Evaluation tool to update graduation and externship dates, or run SQL jobs to do these processes without using the CampusNexus Student user interface (UI).

Automated Updates

Institutions must configure a service broker and a SQL job if they want to bypass the CampusNexus Student UI to calculate changes to dates for non-term based students. Institutions would only need the SQL job if they use only term-based program configurations.

The service broker contains logic for non-term configurations that calculates milestone dates for each payment period in a 'Near Real Time Calculation' by calling the following stored procedure for students in non-term programs:

- `sproc_student_AcademicRecords_StudentPace_Evaluator_Dates`

  The job contains logic that gathers Term students to adjust the Grad date, Extern Date by calling the following stored procedure:

- `sproc_Student_Academics_GradDateExternShipDate_Update`

  The job also contains logic that uses the milestone dates for non term students to adjust the Grad date, Extern Date, Academic Years, Loan Periods, Payment Periods and disbursements by calling the following stored procedure:

- `sproc_student_AcademicRecords_StudentPace_NightlyJob`

Manual Updates

Institutions can manually update graduation and externship dates by using the Student Pace Evaluation tool under Tools > Financial Aid > Student Pace Evaluation or Tools > Academic Records > Student Pace Evaluation. CampusNexus Student calls the stored procedures listed above as needed for students gathered in a the adjustment batch. This tool is meant for small batch corrections and not handling the day to day processing of an institution's population.

Step 1: Calculate the Duration of the Remaining Classroom Time

The duration of the remaining classroom time is calculated by using the remaining terms to map out the end date of the last term of classroom time for each student. The calculation is the same for students with or without externships.

Remaining Terms = Remaining Classroom Credits/Expected Credits per Term, rounded up to the next whole number

Remaining Classroom Credits = (Total Credits for Program Version + Total Credits from Associated Areas of Study) - Total Credits for Externship - Credits Earned - Credits Currently Taking

Note: Credits for a course need to be counted only once. If a course satisfies an Area Of Study (AOS) requirement and a Core course requirement for the Program Version, the credits for that course are reflected in the Total Credits for the Program Version and the Required Credits for the AOS. The business rules, therefore, count those credits for the course only once.

Total Credits for Externship = Total Credits for Externship of the Program Version.

Credits Earned = Total Credit Value of courses at a Status of Complete and course type is not externship.

Credits Currently Taking = Total Credit Value of courses at a Status of 'Scheduled' or 'Current' and course type is not externship.

Example A

Field	Value
a) Program Version Credits	130

Field	Value
b) Total Credit from AOS	50
c) Credits common to both Program Version Credits and Total Credits for AOS	10
d) Total Credits for Externship	30
e) Credits Earned	100
f) Credits Currently Taking	16 (4 Scheduled courses at 4 Credits Each)
g) Expected Credits per Term	10 (of Enrollment)
h) Current Term Dates	0527 (07/10/2006 - 09/23/2006)
Remaining Terms = Remaining Classroom Credits/Expected Credits per Term, rounded up to the next whole number	= ((a + b) - c - d - e - f) / g
	= ((130 + 50) - 10 - 30 - 100 - 16) / 10
	= 24 / 10
	= 2.4
	= 3 terms

Duration of Remaining Classroom Time

Using the result of the calculation for remaining terms above, calculations for the End Date of the Last Terms need to be verified if Term Sequencing and/or Term Relationship are used.

If the student is registered into a Program Version with Term Sequencing, the list of future terms is already be planned out for the student. In these circumstances, the End Date of the Term that is listed third following the current term will be the Date to be used as the basis for further calculation. If Term Relationships are used, only the Parent Terms will be considered.

If Term Sequencing is not used, the terms are sorted such that the Start Dates fall after the End Date of the Current Term's End Date as shown below. If Term Relationships are used, only the Parent Terms will be considered.

Using Example A above, and assuming that the campus is not using Term Relationships, CampusNexus Student calculates the End Date of the Remaining Terms as follows:

1. Beginning with the End Date of the 0527 term, the student's Current Term, the Next Term following that End Date is located, which is the 0531 term (10/10/2006 - 12/23/2006).
2. Locate the Next Term following the End Date of the Term in #1, which is the 0545 term (01/16/2007 - 03/31/2007).
3. Locate the Next Term following the End Date of the Term in #2, which is the 0550 term (04/16/2007 - 06/30/2007)

Step 2: Calculate the Duration of Remaining Externship Time

This step is performed only when an externship course is associated with the student's enrollment. The calculation of the Graduation Date and Externship Start Date for students with an externship is based on the Duration of the Remaining Externship Time calculation result.

Remaining Externship Weeks= (Total Hours for Externship - Hours Already Recorded for the Student)/Expected Hours per Week for Externship, rounded up to the next whole number

Total Hours for Externship

This value varies depending on whether the student has scheduled/started his externship course.

If the student *has not* started his externship course (i.e., if the enrollment has no externship/internship course with 'Current' or 'Scheduled' status), the Total Hours for Externship is equivalent to the value in the new 'Total Hours for Externship' field.

If the student has started his externship course (i.e., if the enrollment has one or more externship/internship course(s) with 'Current' or 'Scheduled' status), the Total Hours for Externship is the sum of hours associated with the externship course(s) of the student that has a status of 'Scheduled' or 'Current'.

Hours Already Recorded for the Student

This is the Minutes Attended for the courses of type 'Externship' and Status of 'Current' or 'Scheduled'.

Expected Hours per Week for Externship

This is the value stored in the 'Expected Hours Per Week Of Externship' field for the enrollment. If the field is blank, the Program Version's 'Expected Hours Per Week For Externship' value are used.

Example B

Field	Value
a) Total Hours for Externship	125
b) Externship Hours Already Recorded for Student	30
c) Expected Hours per Week for Externship	15
Remaining Externship Weeks = (Total Hours for Externship - Hours Already Recorded for the Student)/Expected Hours per Week for Externship, rounded up to the next whole number	= (a - b)/c
	= (125 - 30)/15
	= 95/15
	= 6.3
	= 7 weeks

Calculating the Graduation Date

The following occurs when the Expected Externship Start Date and Graduation Date are calculated:

- When the student does not have an externship

  If no course of type externship/internship resides on the Enrollment Schedule, CampusNexus Student defines the Student as not having an externship, the Expected Externship Start Date is set to NULL, and the Last Term's End Date is calculated using Step 1 above.

- When the student has an externship that has already started, the Expected Externship Start Date is not calculated.

  If one or more courses of type externship/internship exists on the Enrollment Schedule with a status of Current, Completed, or LOA, or Attendance has already been posted, the Externship Start Date is not updated for the respective enrollment, the Expected Externship Start Date is not updated, and the Graduation Date will equal the Last Term End Date plus the 'Duration of remaining Externship Time' value.

- When the student has an externship that has not yet started, the Expected Externship Start Date is calculated

If one or more courses of type externship/internship exists on the Enrollment Schedule, and none of the statuses are Current or Completed or LOA, or none have Attendance posted yet, the Externship Start Date is updated for the respective Enrollment. The Expected Externship Start Date is set to the Last Term End Date, and the Graduation Date will equal the Last Term End Date plus the 'Duration of remaining Externship Time' value.

Using the information in Step 1 and Step 2 above, calculations for the Externship Start Date and Graduation Date for our Example A and Example B can be updated.

Example A

This student does not have an externship, therefore Externship Start Date = NULL, and Graduation Date = End Date of the fourth term or 06/30/2007.

Example B

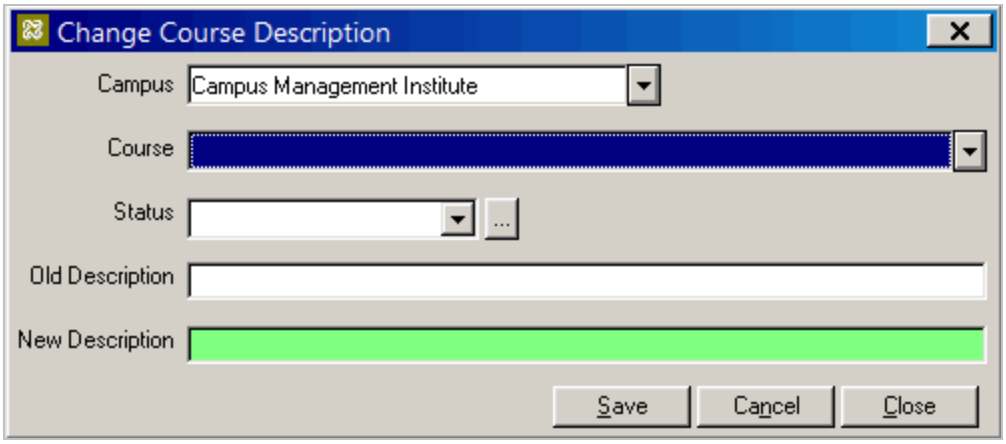
This student has an externship, and none of the externship courses have a status of Current, Scheduled, or Future. Assume that the End Date for the Student's Last Term according to the calculated Duration of Remaining Classroom Time is the same as Example A's value of the same name. Then, the Externship Start Date = 06/30/2007, and the Graduation Date = 06/30/2007 + 6 weeks or 08/17/2007.

Change Course Description

Use this tool to modify the description for a course and to have the change cascade for the selected campuses including courses that already have students registered.

To change a course description:

1. Navigate to **Tools > Academic Records > Change Course Description**. The Change Course Description form is displayed.



2. Select a **Campus**. If the change applies to all campuses, select **All Campuses**.
3. Select the **Course**.
4. If the change is for a specific status, select all statuses that apply from the **Status** list.
5. The existing description is displayed in the **Old Description** field.

   Specify the new course description in the **New Description** field.
6. Click **Save**. Confirm that you want to proceed.

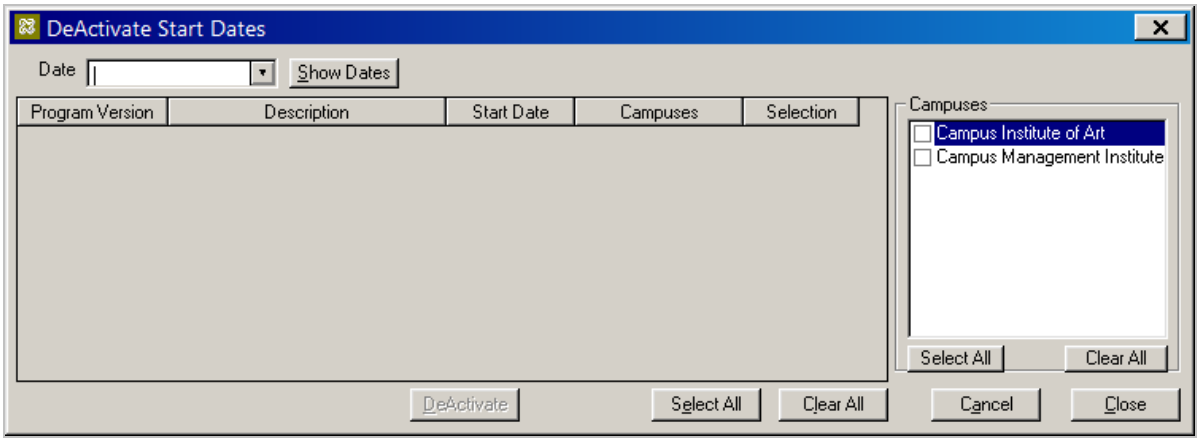
   When the change is implemented, the following message is displayed: *Successfully updated. Do you want to update more courses?*
7. Click **Yes** to update more courses, or click **No** to close the form.

Deactivate Start Dates

Use this tool to deactivate a batch of past program version start dates instead of having to create and submit a script. This tool returns a listing of program versions with start dates that occur on or before the search date selected, the campuses associated with each program version found (only campuses which have been selected in the Campuses list will be listed), and the start dates associated with each program version found. You can then select multiple start dates from and deactivate them for all selected campuses.

To deactivate start dates:

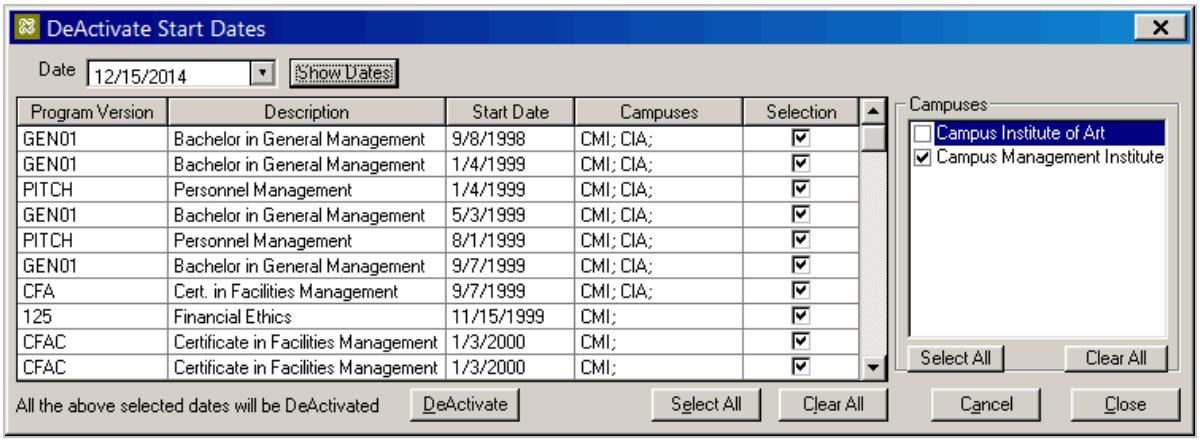
1. Navigate to **Tools > Academic Records > Deactivate Start Dates**. The DeActivate Start Dates form is displayed.



2. Select a **Date**.
3. Select one or more **Campuses**.
4. Click **Show Dates**.

   The form displays all programs that meet the filtering criteria of the start date and campuses. If a program version belongs to two campuses, and neither one of the campuses was selected, the program version is not displayed.

   - The Program Version column displays all programs that meet the filter criteria.
   - The Description column lists the description of all programs that meet the filter criteria.
   - The Start Date column lists the specific start date for the program listed on the same line.
   - The Campuses column displays all the selected campuses where the start date on that line applies.



5. In the **Selection** column, all dates that match the search criteria are selected. Remove the check marks for the dates you do not want to deactivate.
6. Click **DeActivate** to deactivate the selected dates (or click **Cancel** to reset the form). A confirmation message is displayed when the dates have been successfully deactivated.
7. Click **Close** to close the form.

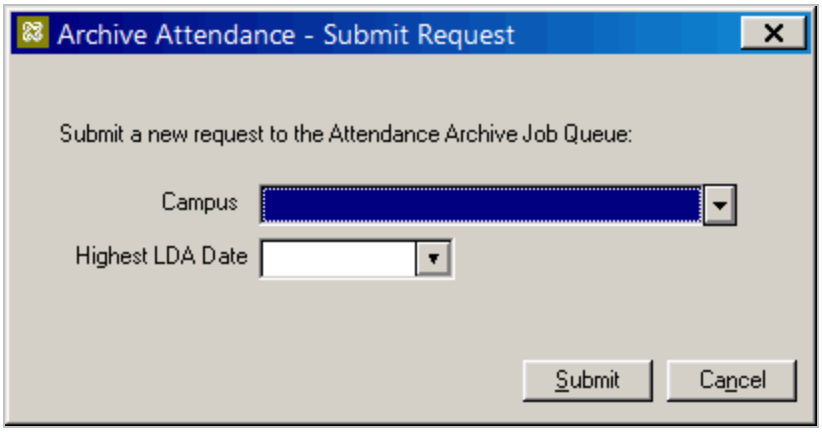
Archive Attendance

Use the Archive Attendance tool to archive attendance data. This tool improves the performance of CampusNexus Student with large student databases.

The Student Master form of any student whose records were archived displays a symbol indicating that attendance records were archived. You can recall the archived data from the Attendance form.

To archive attendance data:

1. Navigate to **Tools > Academic Records > Archive Attendance**. The Archive Attendance - Submit Request form is displayed.



2. Select the **Campus** for which attendance data is to be archived. Only one campus can be processed at a time.
3. In the **Highest LDA Date** field, select the last date of attendance (LDA) that should be archived. For instance, to archive attendance data prior to January 1, 2014, select 12/31/2013. Student attendance records with an LDA that occurs after 12/31/2013 will not be archived.
4. Click **Submit**. Click **OK** on the confirmation message.
5. The tool submits a request to archive the selected attendance records and displays a Tracking Number. Click **OK** to finish the archive task.

   The archive request is added to the CampusNexus Student system queue where it will be processed as scheduled by the database administrator (DBA). Typically, the DBA will schedule attendance archiving to run periodically, e.g., daily, weekly, monthly, and during non-peak hours.

To retrieve archived data for a student's enrollment:

1. Navigate to **View > Academic Records > Attendance**. With the Attendance form open and active for the student whose data you want to retrieve, select the student's enrollment for retrieval.
2. Click the **Recall Attendance** button.
3. When the confirmation message is displayed, check that the correct enrollment is selected, and click **Yes** to retrieve the archived data.

Modify Term Relationships

You can modify relationships between terms even when students have been registered into a term. This feature requires CampusNexus Student to update various parts of the student record. For example, if the term relationship is modified after students have been billed, the term associated with the transactions on the student's ledger card is updated to the new parent term. Once term relationships have been modified and saved, a report is displayed.

Note: You must have permissions to all campus locations associated with a child term. To configure the Term Relationships form, navigate to Setup > Security, select a Staff Group, and click View.

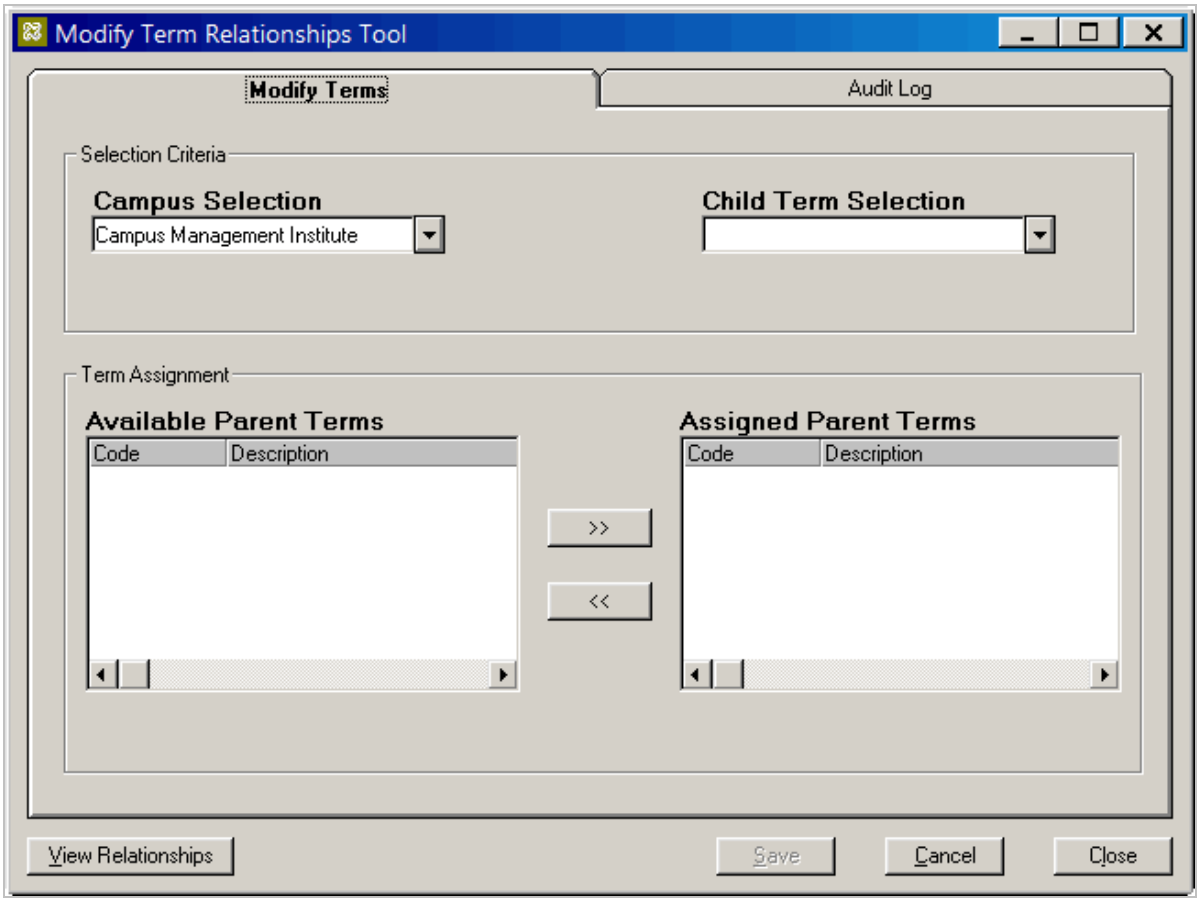
The following business rules must be met when modifying term relationships:

1. The term usage properties of Student Accounts, Financial Aid, and Registration/Attendance must be contained within the relationship, unless the parent term is a "Reporting Only" term.
2. The selection of a unique child term must meet the following criteria:
    - The term cannot be closed or inactive.
    - The term must have the term usage of Registration/Attendance.
    - The term must have at least one course that is scheduled or current.

When these rules are met and the term relationships have been modified and saved, CampusNexus Student updates all relevant areas of a student's record and logs any changes to the term relationships. Any affected enrollments are reported at the end of the process.

To modify term relationships:

1. Navigate to **Tools > Academic Records > Modify Term Relationships**. The Modify Term Relationships Tool is displayed.



2. Click **View Relationships** to obtain a list of relationships.
3. Select a **Campus**.
4. Select a **Child Term**.
5. Modify the desired relationship and click **Save**.

   CampusNexus Student saves the modified term relationships and rebuilds the term summary for every student that was registered in the selected child term.

   - The terms are displayed using the business logic that is in place to define relationships (Lists > Academic Records > Terms > Length Relationships > Define Relationships) which identifies the parent terms that are *currently* and *potentially* assigned to the selected child term.
   - The term summary is recalculated using the business logic that is in place to rebuild relationships (View > Academic Records > Enrollment > Term Summary > Rebuild Relationships).

   At the end of the Save process a report displays the results of rebuilding term relationships on enrollments for the child term .

   Note: This report is not available from the Reports menu.
6. Any changes to the term relationships are posted to the audit log. Click the **Audit Log** tab and select the **Campus** to view the term relationship changes for the campus.

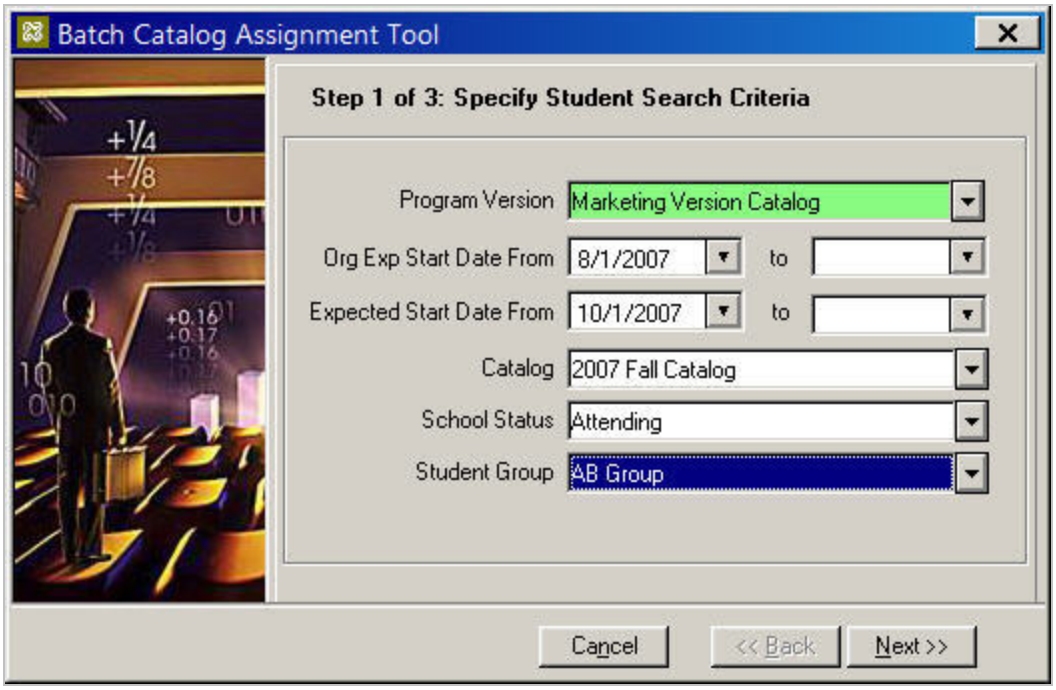
Batch Catalog Assignment Tool

This tool is used by the Registrar when assigning a group of students to a new catalog. This may be required if a number of students enrolled before a catalog was finalized. Rather than changing the catalog one student at a time, the Batch Catalog Assignment Tool allows a specified group of students to be migrated to a new catalog. One or more students must have been enrolled in a catalog that now needs to be changed. These students can be identified by a unique characteristic such as a combination of Expected Start Date, Catalog, Program Version, School Status, and Student Group. See also Student Degree Evaluation Report.

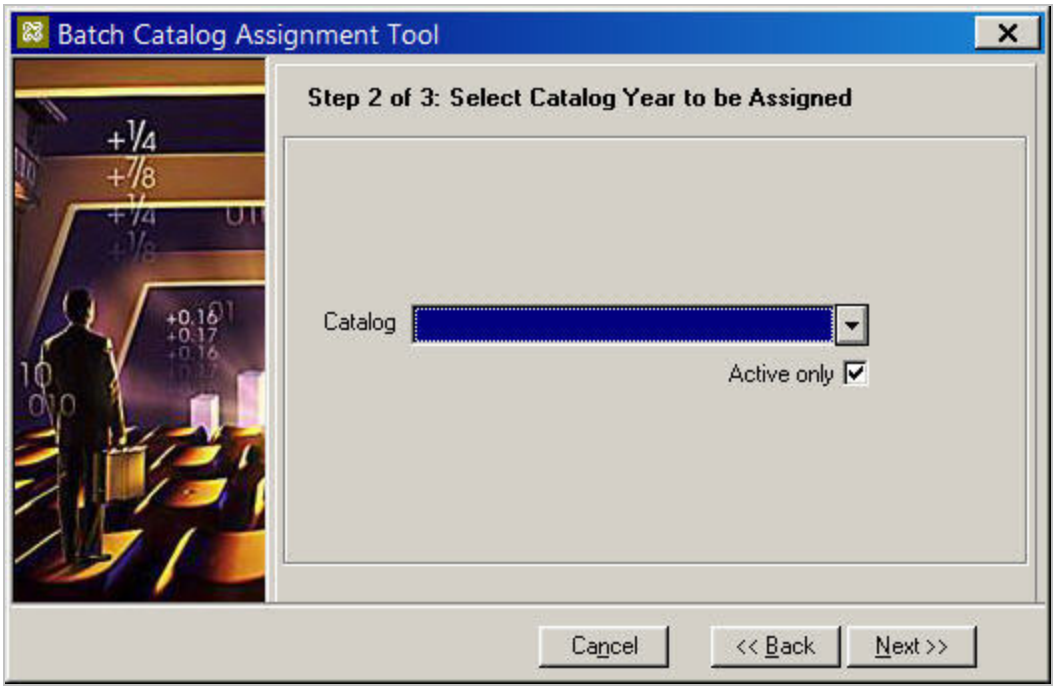
Note: For students who are transferred, CampusNexus Student assigns a new course schedule based upon the new catalog. This does not affect courses in the student's schedule that have a status of current, completed, or scheduled.

To assign a group of students to a new catalog:

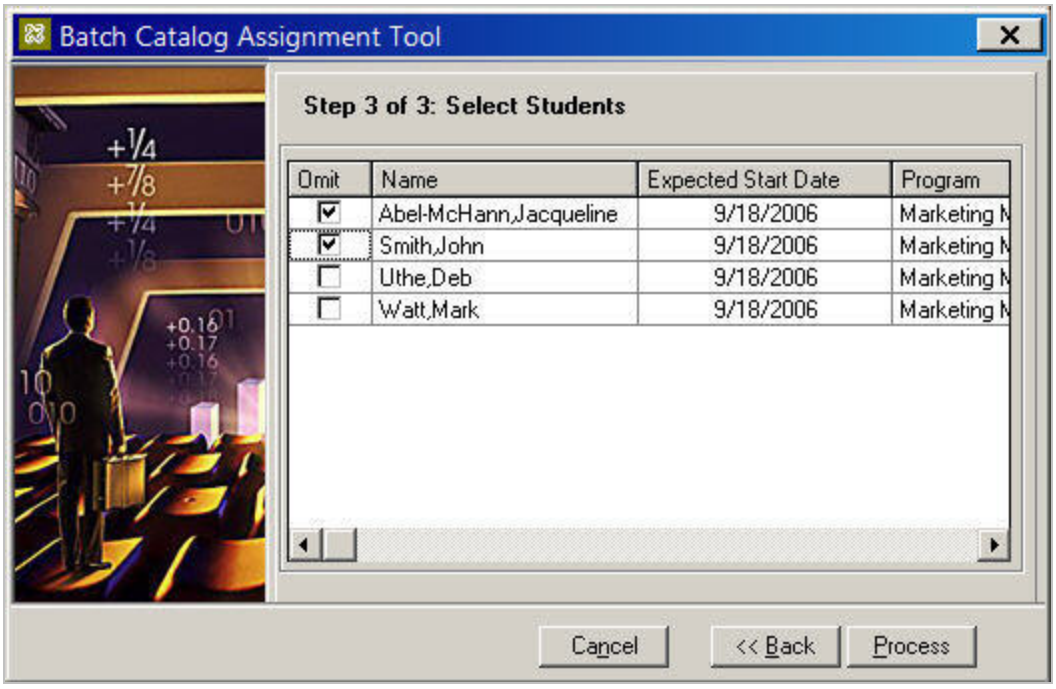
1. Navigate to **Tools > Academic Records > Batch Catalog Assignment**. The Batch Catalog Assignment Tool is displayed.



2. Select appropriate options for **Program Version**, **Original Expected Start dates**, **Expected Start dates**, **Catalog**, **School Status**, and **Student Group**. Make sure you select a Program Version that has one or more associated catalogs.
3. Click **Next**. Step 2 of 3: Select Catalog Year to be Assigned is displayed.



4. Select the **Catalog** to be assigned to the students.
5. Click the **Next**. Step 3 of 3: Select Students is displayed.



6. Select the students that will not be assigned to the selected catalog by selecting the **Omit** check box beside the student's name.
7. Click **Process**. A confirmation message states "All Students Processed Successfully!"

For courses that have a status of 'Future', the wizard transfers the students (except for those that were omitted) to the new catalog provided that the existing Program Version and Area of Study (if applicable) are associated with the new catalog. A report is produced listing students who were unable to be transferred into the new catalog along with the reason.

8. Click **Close** to close the form.

Update Version Start Date

Use this tool to correct enrollment version start dates. This tool gathers records for one student and enrollment at a time. An audit feature tracks all version start date changes and comments and posts them in the Admissions Audit folder.

The version start date can be updated to a blank value *only* when a student has a school status that is associated with a system status category of:

- C (Applicant)
- N (Never Attended)
- W (NDS-Never Attended)

OR is associated with a system status code of

- FUT
- BP
- NDS-FUT
- NDS-BP

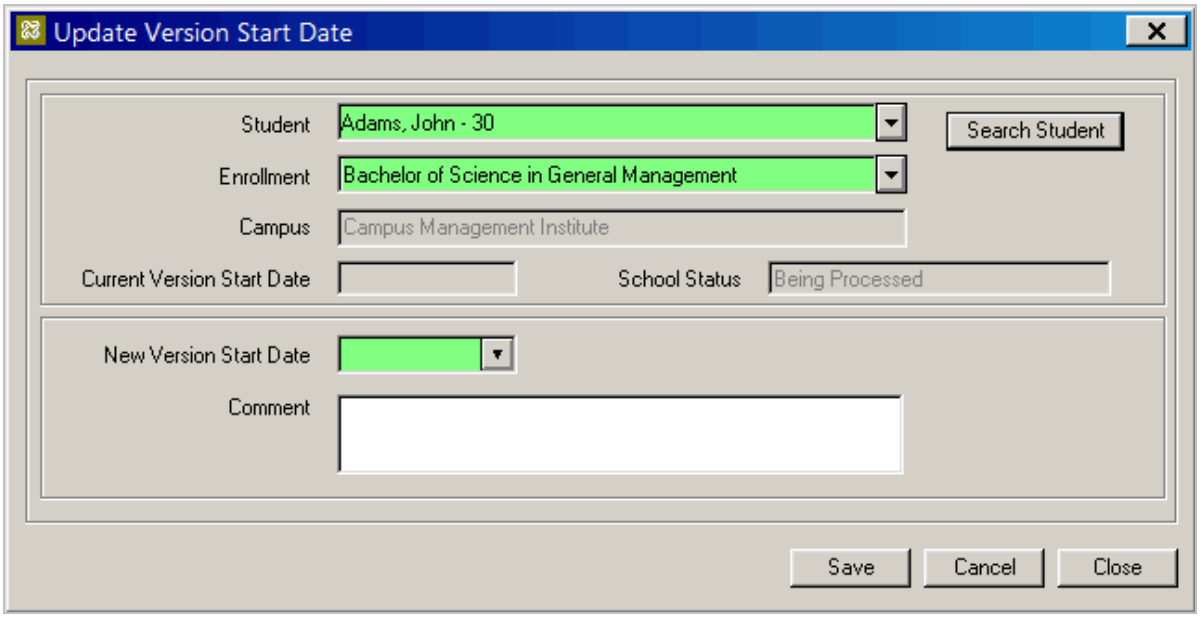
CampusNexus Student does not accept a blank value for the student's version start date for any other school status that is not associated with one of the system status categories, or system status codes listed above.

The current date validation rules that apply to the Version Start Date value itself are enforced in the tool, such as the date entered must be an earlier date than the Expected Grad Date. Any changes made to the Version Start Date are updated on the student's Enrollment folder.

Institutions with program versions using Academic Calendars 5 or 6 and using the Student Pace Evaluator (SPE) also execute the auto-adjust AY/LP evaluation logic and place the enrollment in the SPE queue. This allows CampusNexus Student to account for any needed changes in AY/LP sequences based on the change to the version start date, and re-measure the students progression through their academic years.

To update the version start date:

1. Navigate to **Tools > Academic Records > Update Version Start Date**. The Update Version Start Date form is displayed. By default the current student and enrollment are displayed.



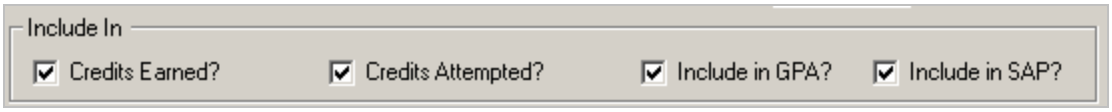
2. Click **Search Student** to search for a specific student and enrollment.

3. If a Current Version Start Date exists, it is displayed. The School Status field displays the student's school status.
4. Select the **New Version Start Date**.
5. Enter any comments in the **Comment** field.
6. Click **Save**.
7. A confirmation message is displayed. Click **OK**.

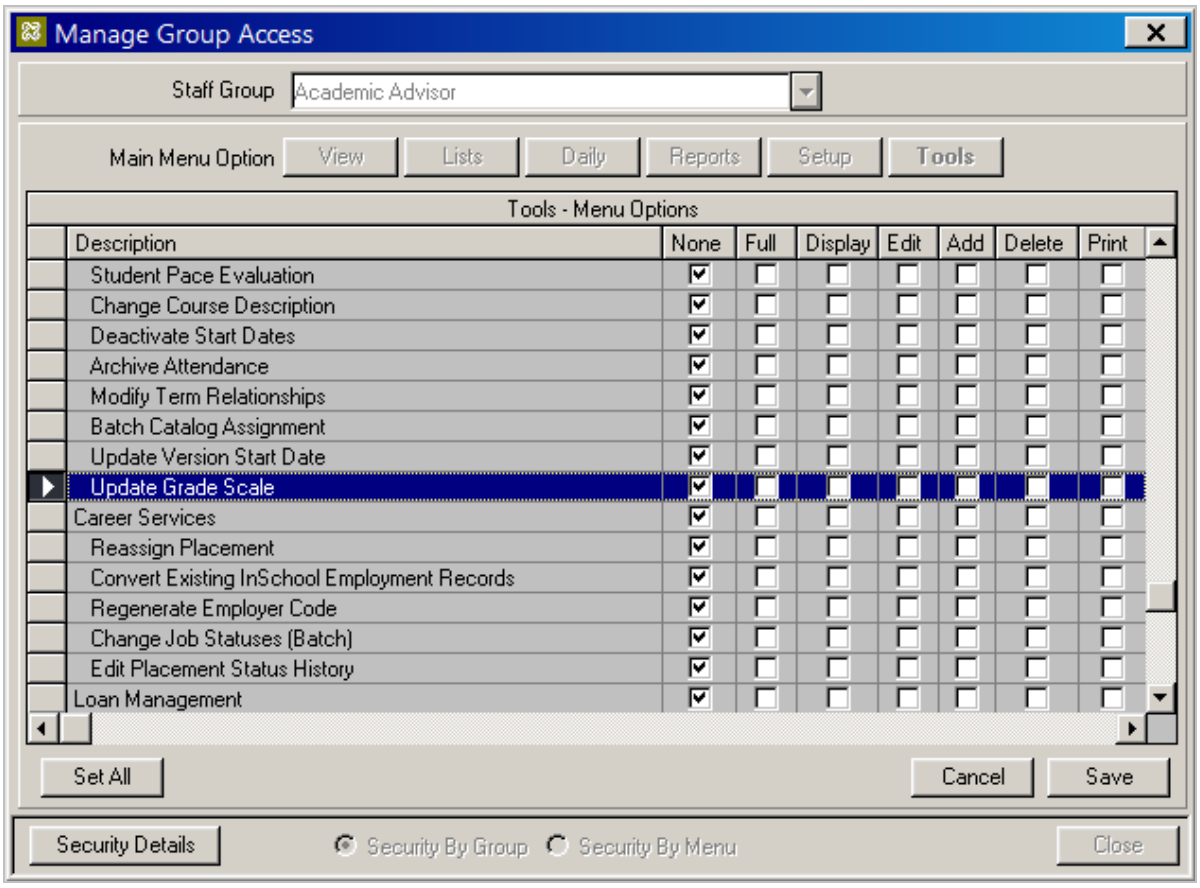
Update Grade Scale

The Update Grade Scale tool is used by academic advisors to update grades for a batch of students. When an advisor changes a grade in a grade scale, this tool is run to update the changes for students.

Note: The only criteria that apply to this tool are updates in the following fields on the Grade Letter Setup form:

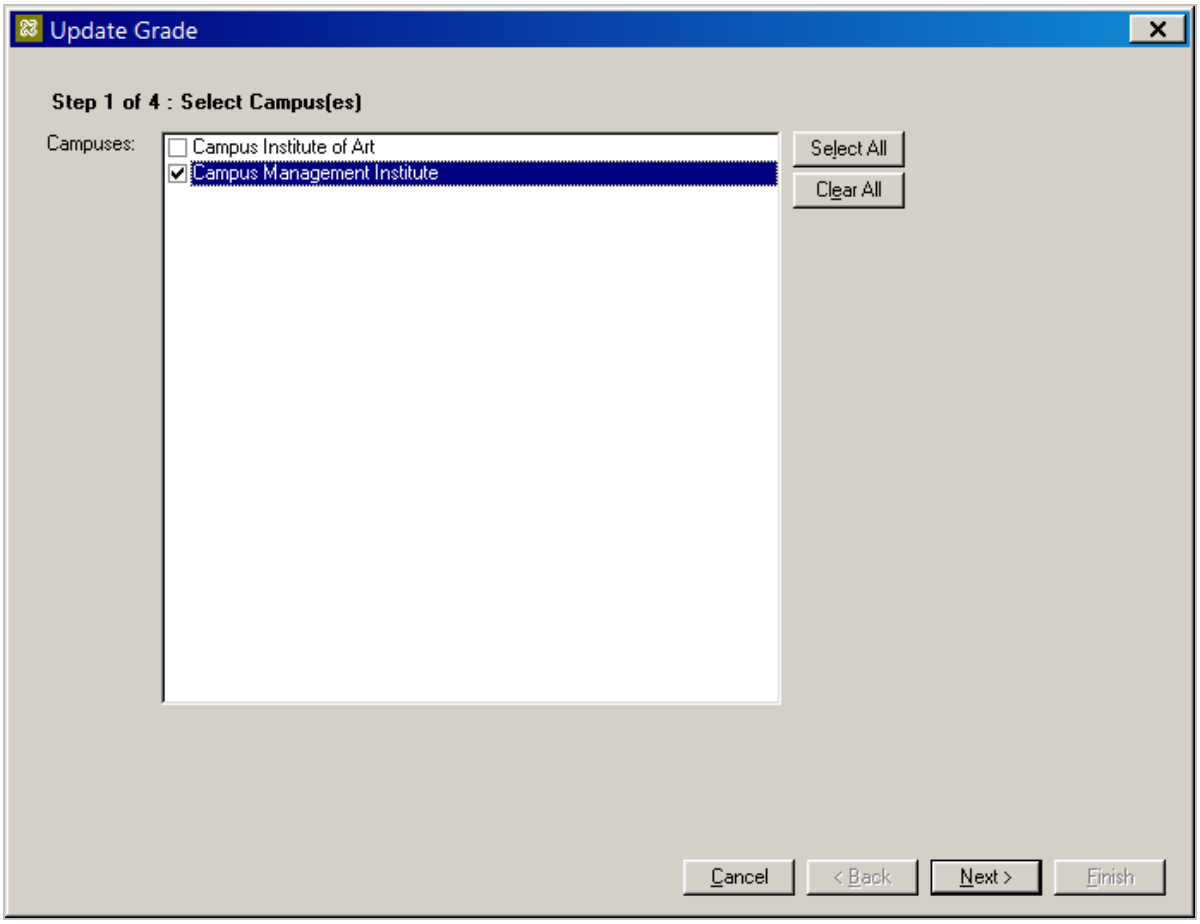


To use the tool, appropriate permissions must first be set up in Setup > Security > Tools. On the Manage Group Access form under Academic Records, select the **Update Grade Scale** check boxes accordingly.

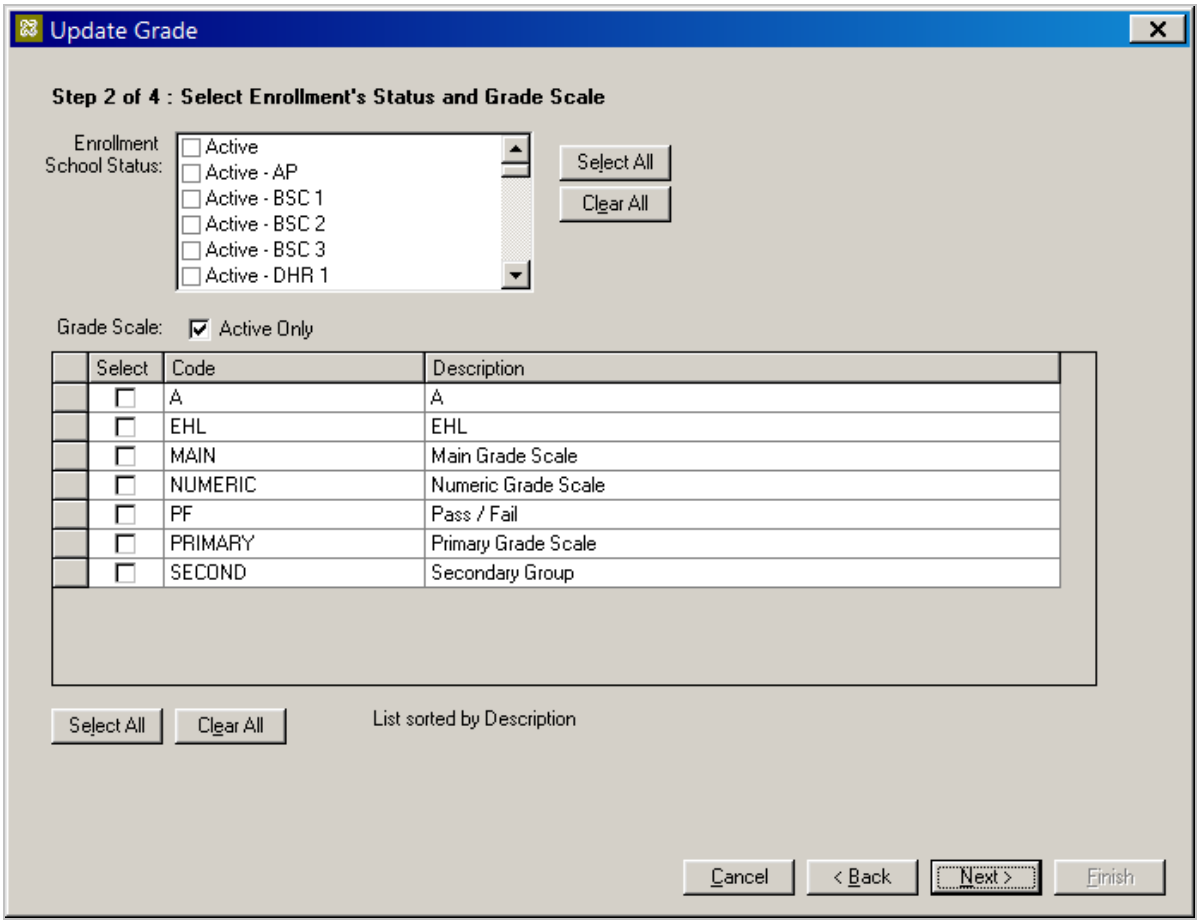


To update grade scales:

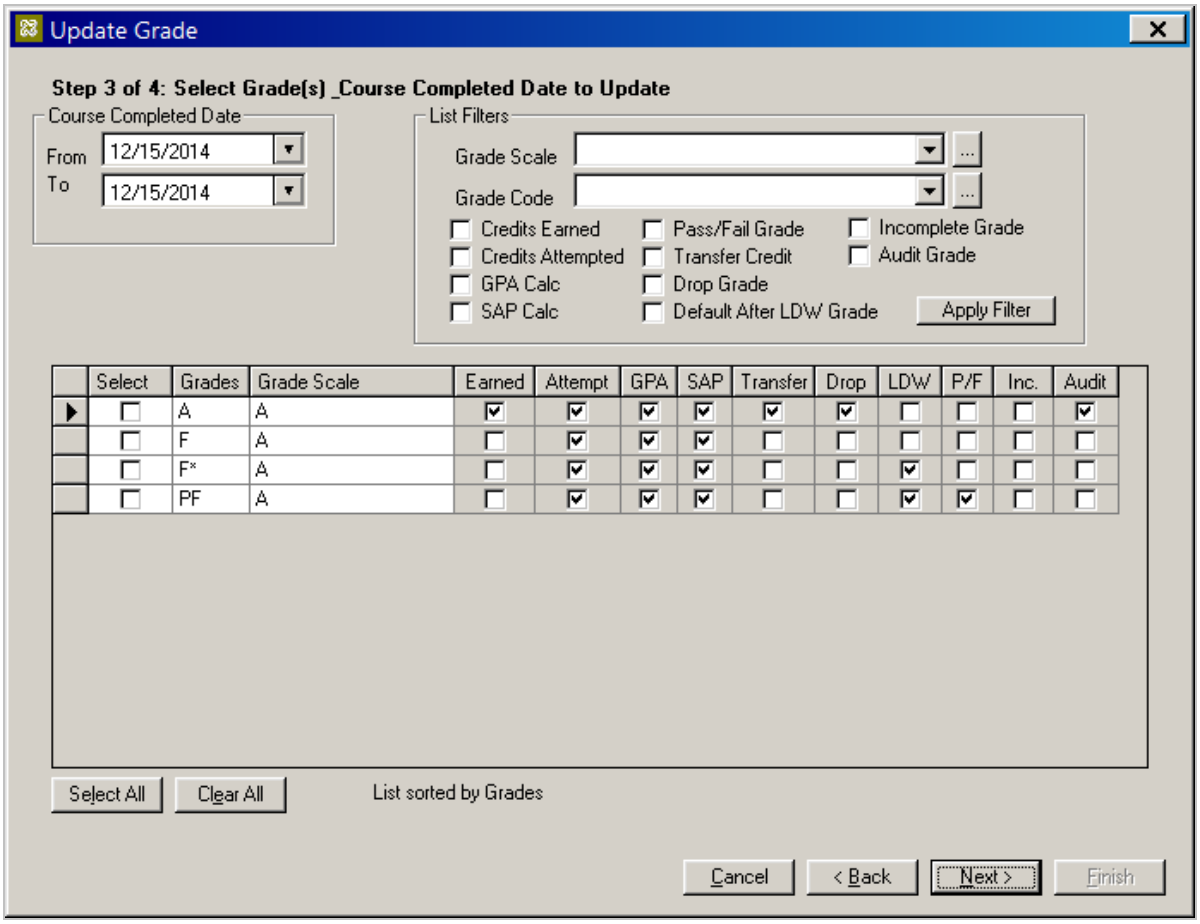
1. Navigate to **Tools > Academic Records > Update Grade Scale**. Step 1 of the Update Grade tool is displayed.



2. Select one or more **Campuses**.
3. Click **Next** to proceed to Step 2.



4. Select **Enrollment School Status** and **Grade Scale** values .
5. Click **Next** to proceed to Step 3.



6. Select appropriate options in Step 3:

    a. Select the **Grades** to be updated from the list displayed for the selected Grade Scales.

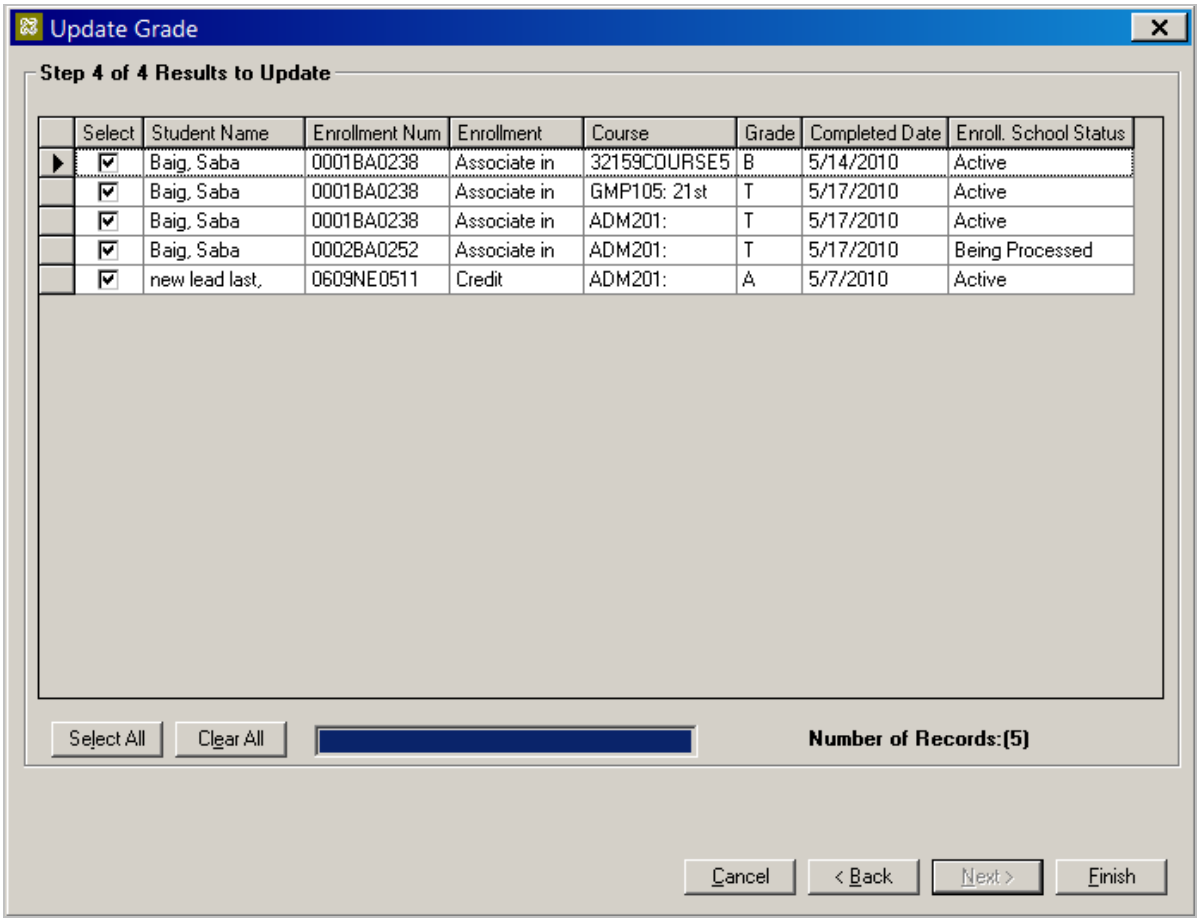
    b. Select the **Course Completed Date** range using the **From** and **To** fields.

    c. Use the options in the **List Filters** group box to modify your selections as needed.

    Change the **Grade Scale** and/or **Grade Code** and select or clear the check boxes corresponding to the following filter options (click **Apply Filter** to apply the changes in each case):

    - Credits Earned
    - Credits Attempted
    - GPA Calc
    - SAP Calc
    - Pass/Fail Grade
    - Transfer Credit
    - Drop Grade
    - Default After LDW Grade
    - Incomplete Grade
    - Audit Grade

7. Click **Next** to proceed to Step 4.



8. Step 4 displays the records resulting from your selections in Steps 1, 2, and 3. Select or clear the check boxes for the students whose grades are to be included or excluded in the update. After completing your selections, click **Finish**.
9. To confirm your selections and proceed with the update, click **Yes**.
10. A confirmation message is displayed. Click **OK**.

Tools > Career Services

The Tools > Career Services submenu options are as follows:

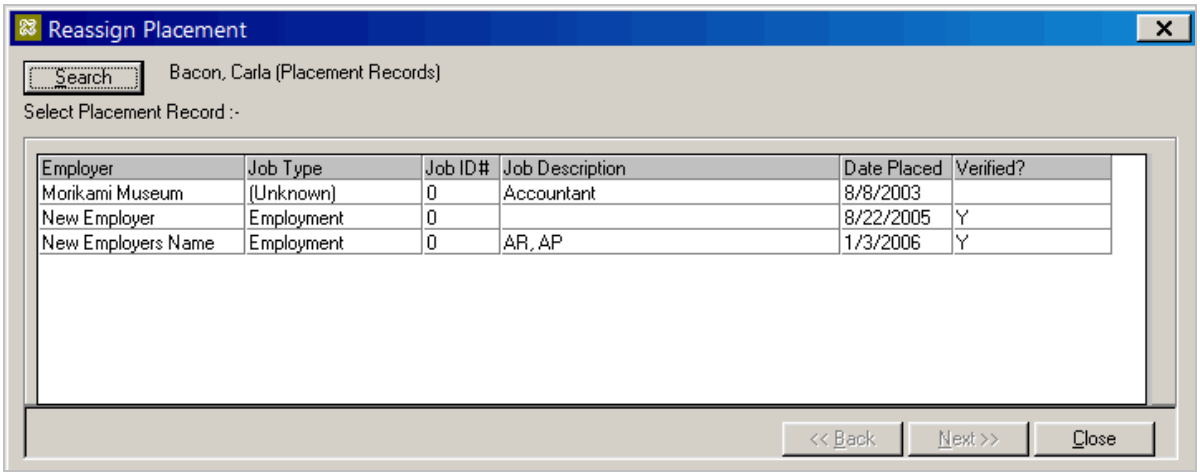
- Reassign Placement
- Convert Existing InSchool Employment Records
- Regenerate Employer Code
- Change Job Statuses (Batch)
- Edit Placement Status History

Reassign Placement

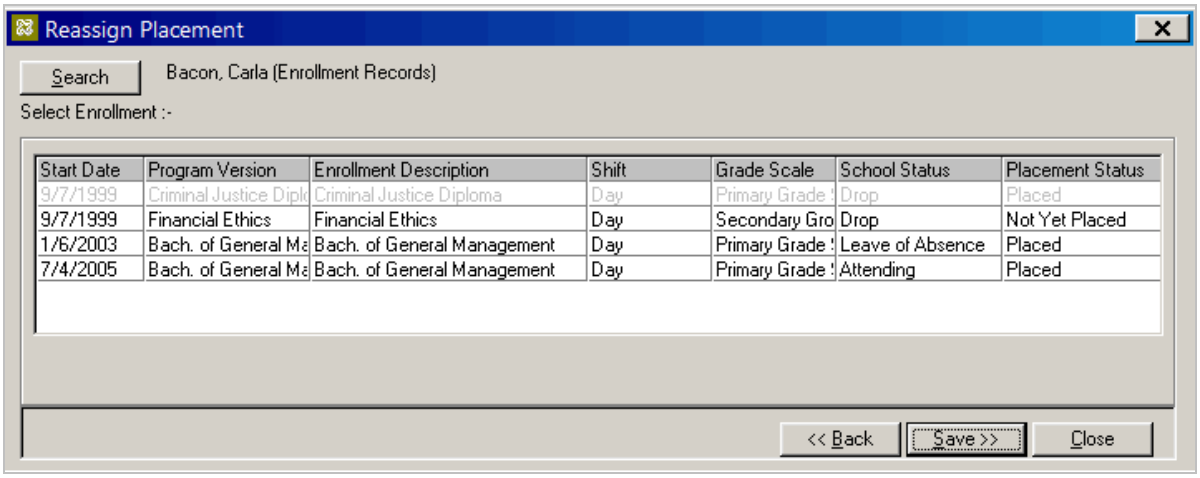
Use the Reassign Placement tool to reassign a placement record to a different enrollment if the original assignment was in error. The action of reassigning placement records to new enrollments is included in the student Placement Audit. Access to this feature is restricted based on the user's access to the Tools menu.

To reassign a placement:

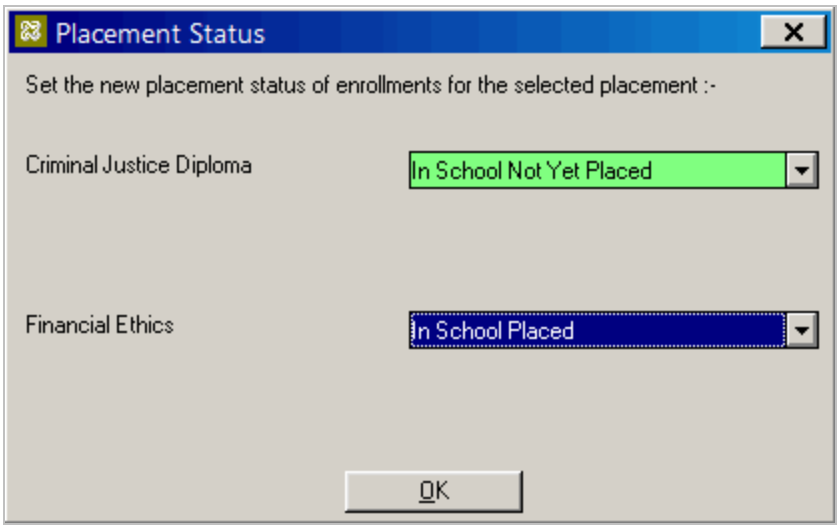
1. Navigate to **Tools > Career Services > Reassign Placement**. The Reassign Placement form is displayed.
2. Click **Search** and enter the search criteria to find the student record to be changed. Double-click the row that corresponds to the student record to be changed. If the selected student record does not meet the selection criteria for the reassignment, a message is displayed.
3. If the selected student record meets the reassignment criteria, the placement records are displayed on the Reassign Placement form. Select a **Placement Record** and click **Next**.



4. If the selected student record meets the reassignment criteria, the enrollment records are displayed on the Reassign Placement form. Select an **Enrollment Record** and click **Next**.



5. Click **Save**. The Placement Status form is displayed.



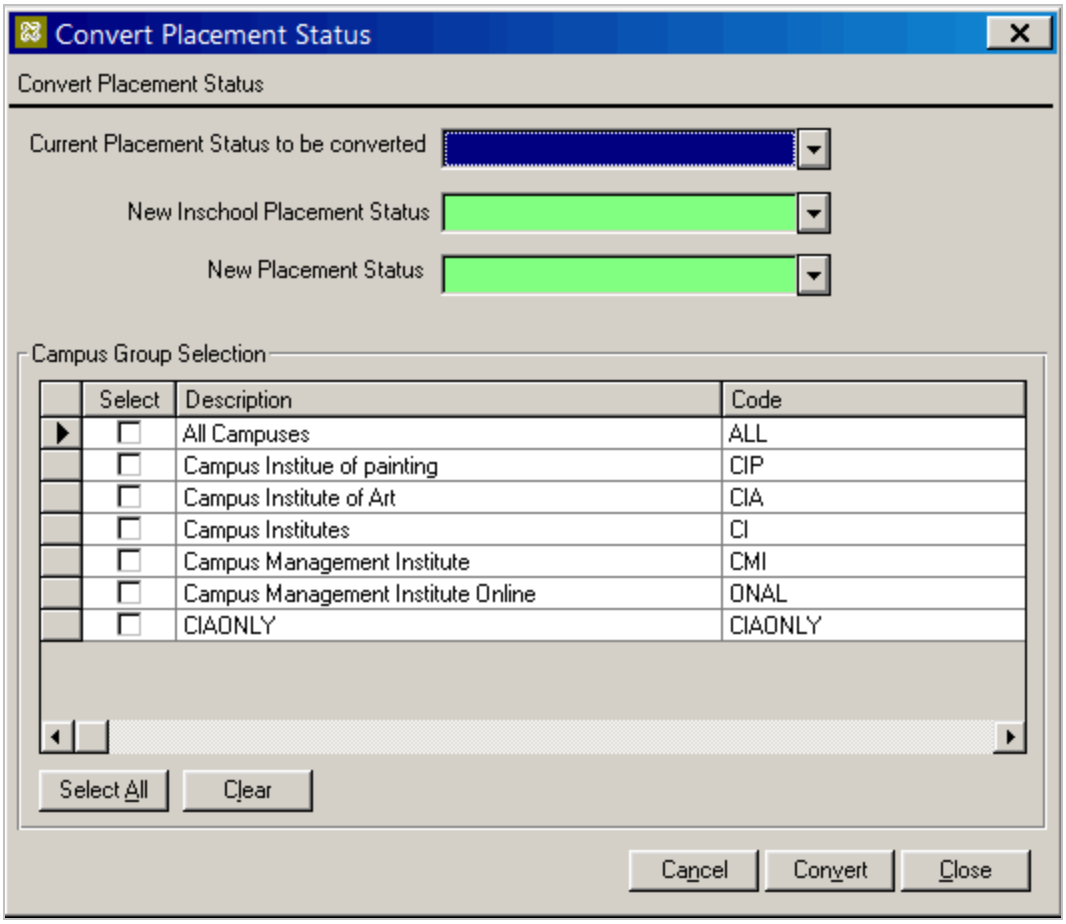
6. In the Placement Status form, select the new **placement status** for each enrollment, and click **OK**.
7. A confirmation message is displayed. Click **OK**. The selected placement status is changed. The placement status history is updated for each enrollment record that had its placement status modified.

Convert Existing InSchool Employment Records

System administrators use this tool to convert a batch of placement status records to a new InSchool placement status.

To convert placement statuses:

1. Navigate to **Tools > Career Services > Convert Existing InSchool Employment Records**. The Convert Placement Status form is displayed.



2. Select the placement status to be converted from the **Current Placement Status to be converted** list.
3. Select the InSchool status to be applied to each placement record from the **New In-school Placement Status** list.
4. Select the new placement status to be applied from the **New Placement Status** list.
5. Select one or more **Campuses**.
6. Click **Convert** to change the statuses for all selected records. All placement records for students in the selected campuses who have the selected status are converted to the new status.
7. Click **Close** to close the form.

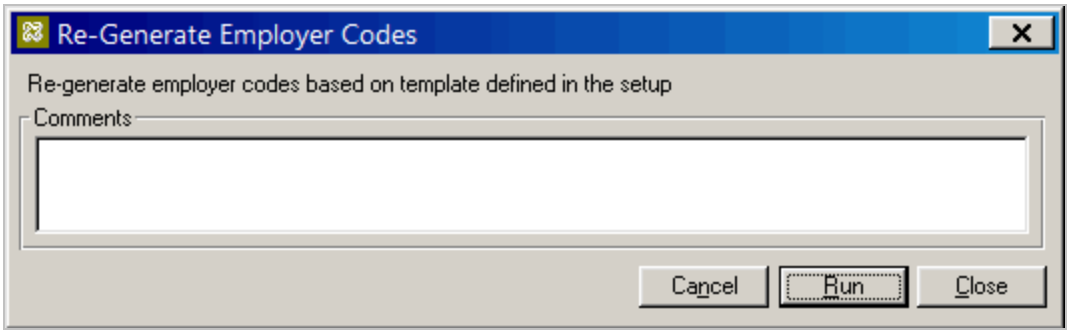
Regenerate Employer Codes

Use this tool to regenerate employer codes based on the Employer Code Format template for any employers currently in the database. If the Employer Code Format contains a date parameter, the Date Added stored on the employer record is used, otherwise the system date is used.

IMPORTANT! When you upgrade CampusNexus Student for a campus that has implemented Portal, the Employer Code option (Setup > Career Services > Settings tab) must be set to Use Employer Code Format, and you must run the Regenerate Employer Code tool before using Portal. The regeneration of employer codes requires that employers use the newly created employer code as the user name for Portal Login.

To regenerate employer codes:

1. Navigate to **Tools > Career Services > Regenerate Employer Code**. The following form is displayed.



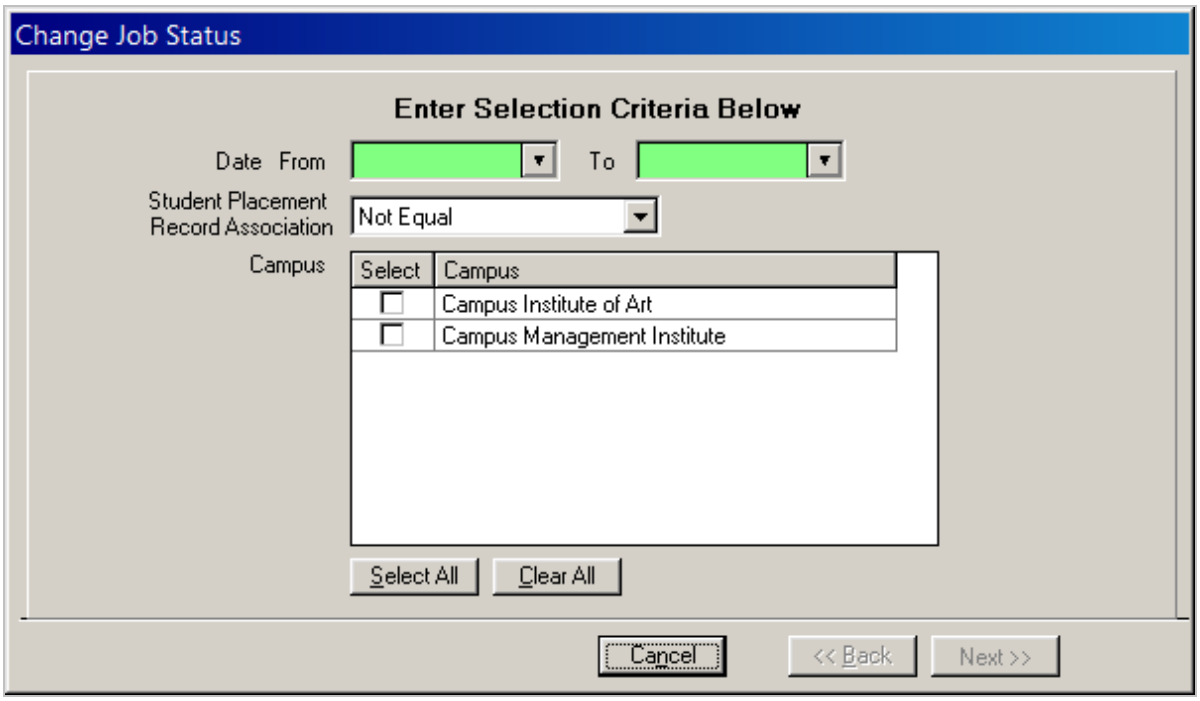
2. Enter any comments in the **Comment** field. The text entered into the Comments field appears in the Employer Audit table.
3. Click **Run** to modify the employer codes to the current format.
4. Click **Close** to close the form.

Change Job Statuses (Batch)

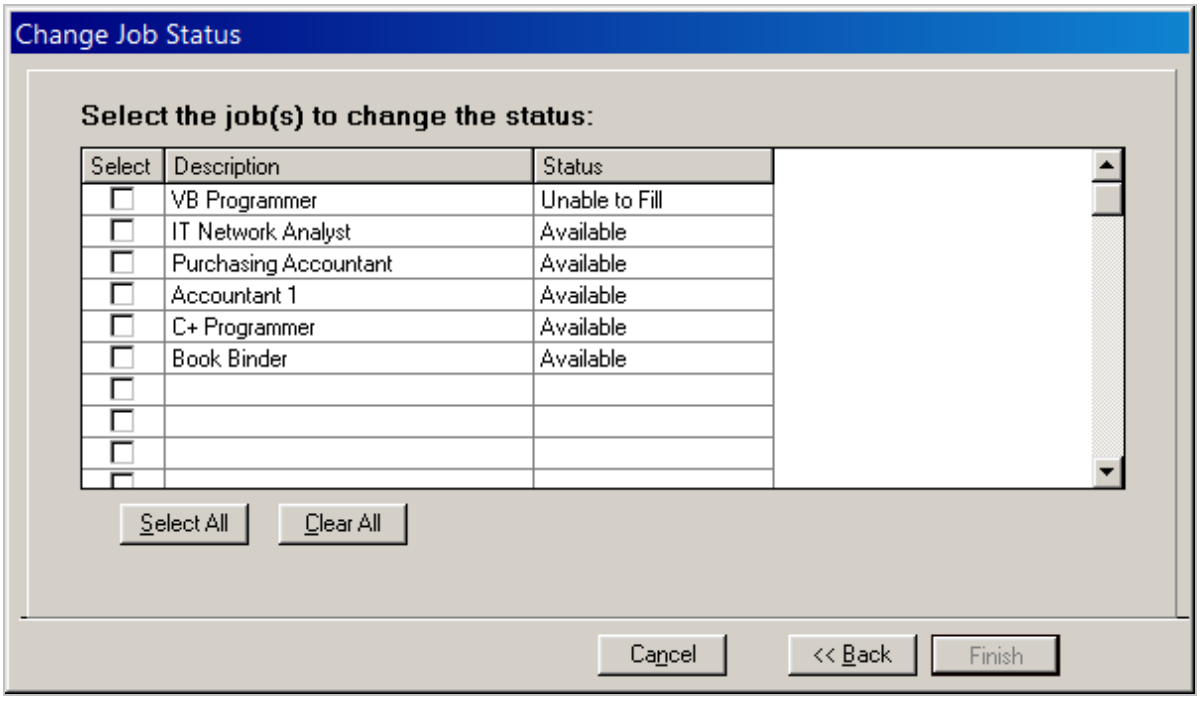
System administrator use this tool to convert a batch of job statuses within a specific date range. The statuses of the selected jobs are changed to the value specified and saved in CampusNexus Student. Employer Audit records are updated to reflect any changes made to the employer available jobs values.

To change job statuses:

1. Navigate to **Tools > Career Services > Change Job Statuses (Batch)**. The Change Job Status form is displayed.



2. In the **Date From**and **To** fields specify the date range that includes all the statuses which are to be changed.
3. Select an option from the **Student Placement Record Association** list.
    - **None** - No student placement record is associated with the filled job. If this option is selected, the next form displays the following fields:
        - **Description** that displays the name or code of the filled job
        - **Status** of the job
    - **Not Equal** - The number of student placement records does not equal to the number of filled jobs. If this option is selected, the next form displays the following fields:
        - **Description**
        - **Status** of the job
        - **Number Filled**
        - **Placement Record(s)**
4. Select one or more **Campuses**.
5. Click **Next**.



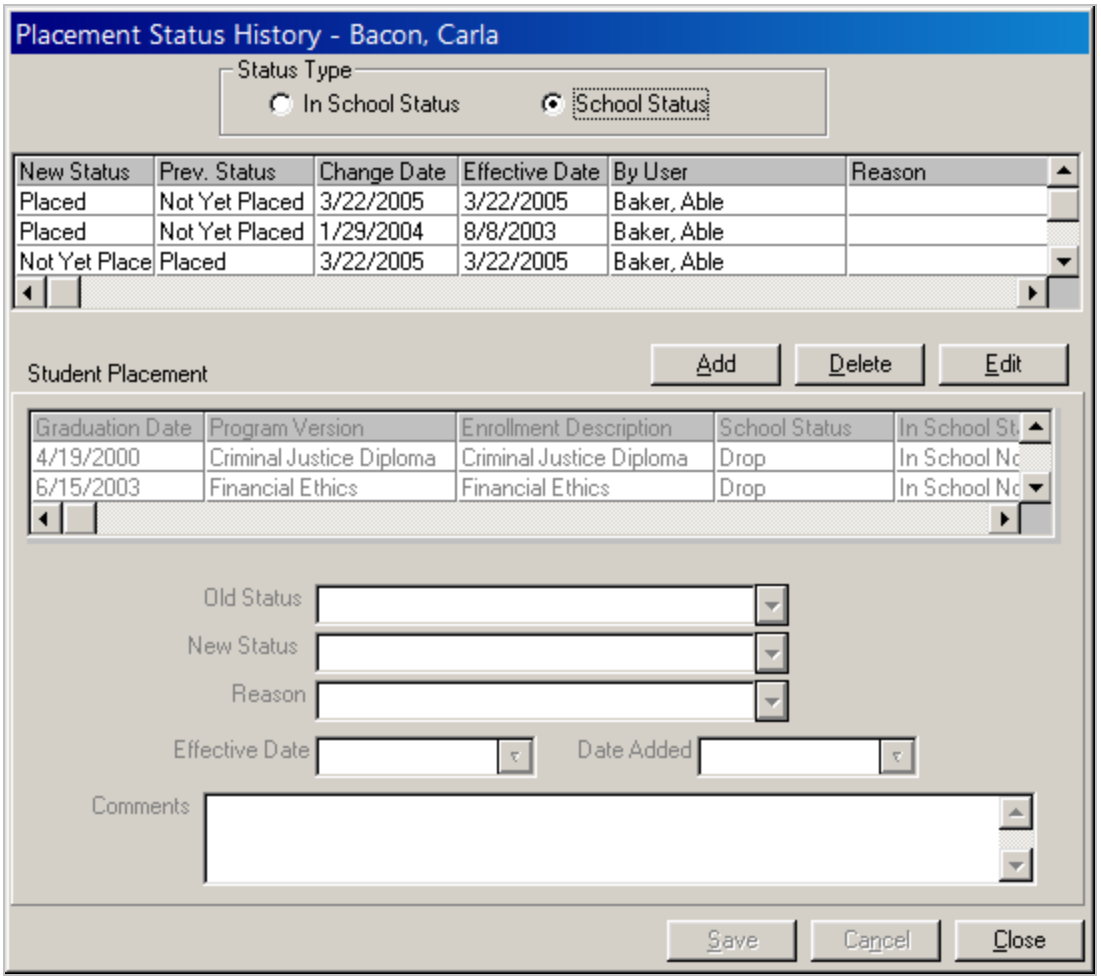
6. Select the **jobs** whose status you want changed.
7. Click **Finish**.

Edit Placement Status History

Use this tool to view, edit, add, or delete the placement status types for a student.

To view or modify placement status types:

1. Select the student whose record you want to view or change.
2. Navigate to **Tools > Career Services > Edit Placement Status History**. The Placement Status History form is displayed.



3. Select the **Status Type**, In School Status or School Status.
4. Select the record you want to view or modify.
5. Click **Edit** to change the placement status history. Click **Add** to add a new entry.
6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Tools > Loan Management

Currently, no tools are available for this menu option.

Tools > System

The Tools > System submenu options are as follows:

- Merge Student Master Records (This option is not available when CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll.)
- Purge Leads
- Edit Student Status History
- Delete Credit Card Verification Code
- Export Student Data for Talisma Fundraising (This option is available only if CampusNexus Student is integrated with Talisma Fundraising.)

Merge Student Master Records

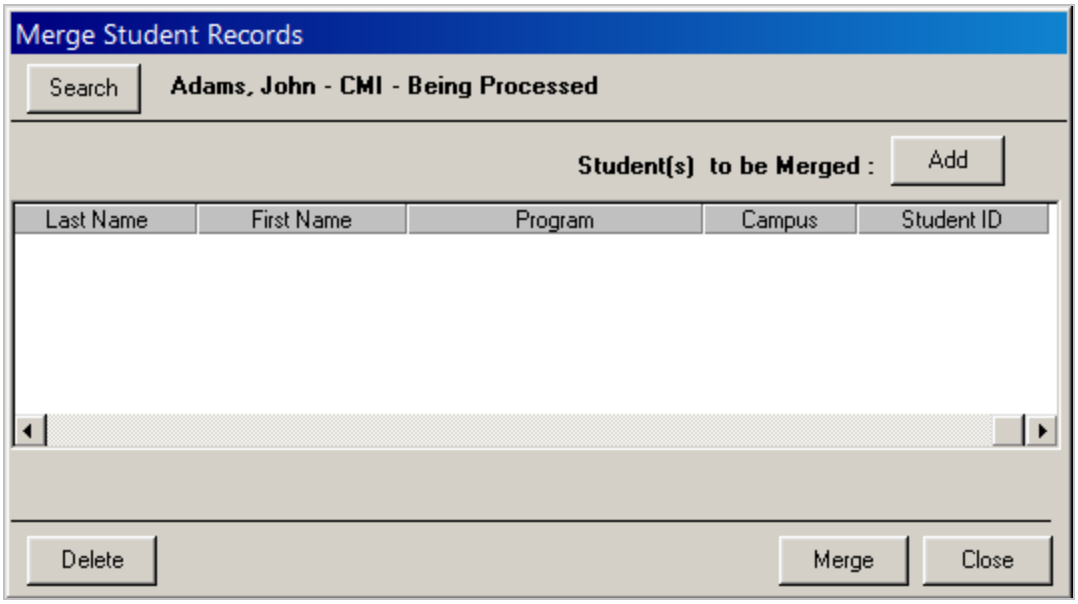
Duplicate student masters records are usually a result of clerical error or name changes that have not been updated in the institution's records. In such cases, multiple student master records must be merged.

WARNING: The student master records that you merge into your current student are deleted. This process is **not reversible** and should be used with extreme caution!

Note: The Merge Student Master Records option is not available when CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll.

To merge student master records:

1. Select the student for whom you want to merge records
2. Navigate to **Tools > System > Merge Student Records**. The Merge Student Records form is displayed.



3. Click **Search** to find any duplicate records for this student or records that share values that should be unique to an individual student, for example, two student records that share one Social Security Number (SSN). SSNs must then be assigned to the correct students. If there are duplicates, CampusNexus Student displays the Search form.
4. Click **Add** to search for and select student records to be merged with your current student.
5. Select a student from the grid and click **Delete** to remove that record.
6. Click **Merge** to complete the process. The resultant record shows the student master information from your current student along with a separate enrollment record for each student that you merged. The status shown on the student master reflects the status of the most current enrollment as determined by the status hierarchy.
7. When merging students, CampusNexus Student checks for duplicate Pell records. If a duplicate Pell record is found, CampusNexus Student prompts you to use the Fix Duplicate Pell Records tool to resolve the conflict. CampusNexus Student merges the two (or more) Pell records, but you still need to return to the Merge Student Records form to finalize the merge.

Purge Leads

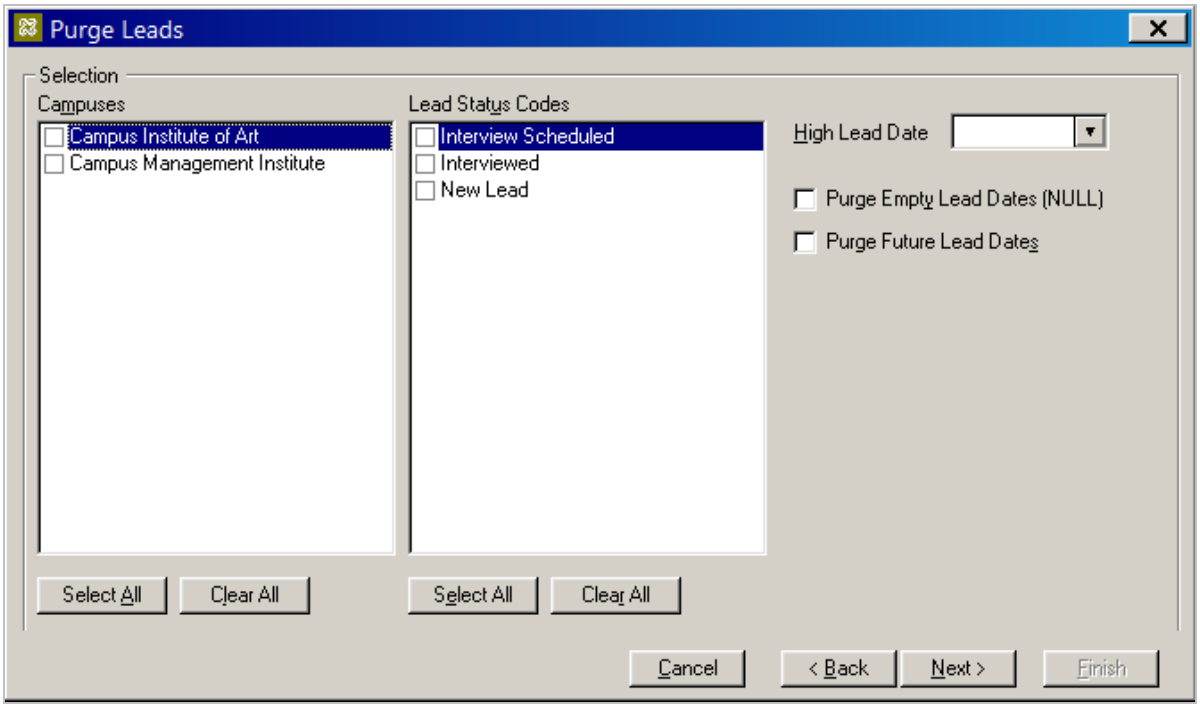
The Purge Leads tool provides a means for the mass deletion of student records. Be careful when using this tool:

- Purging large numbers of leads can cause performance problems on the server depending on server resources available and the relative size of the database. Purge large numbers of leads incrementally. Perform purges when significant server resources are not in use.
- CampusNexus Student provides a warning if more than 25000 leads are selected for purging. Lead purging times out after one hour. Large purges that cannot be handled by available resources will time out.

WARNING: The purge process is **not reversible**! The purged student records cannot be restored in your database.

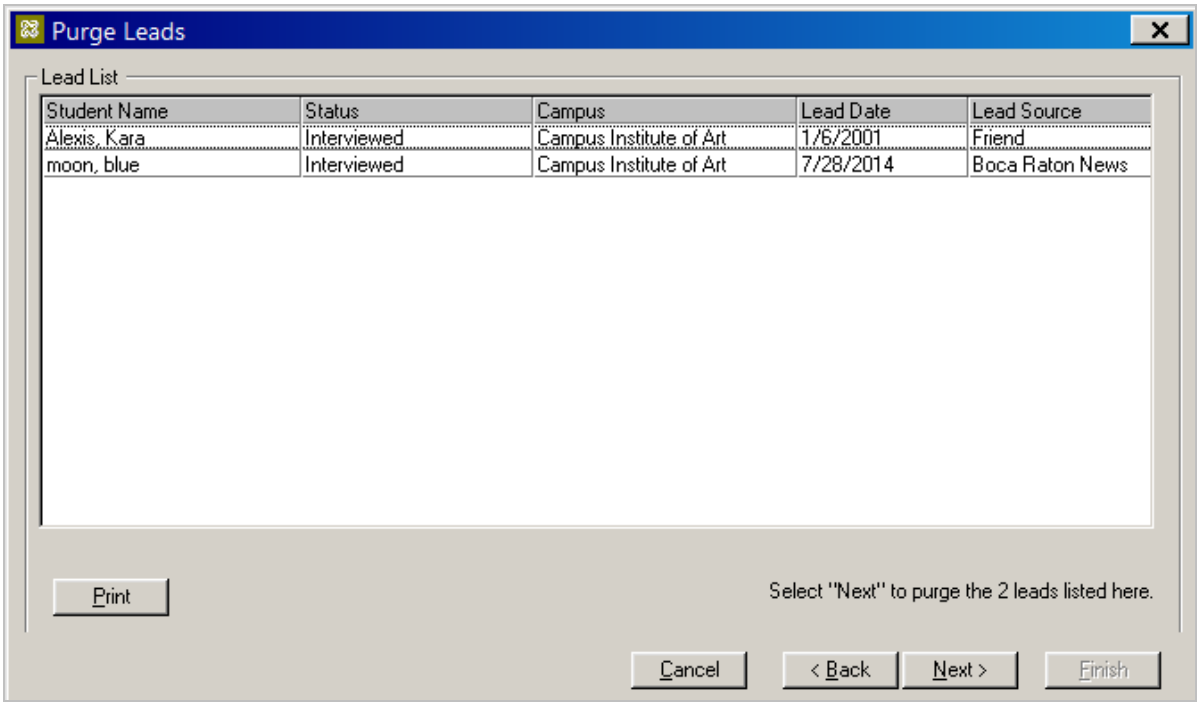
To purge leads:

1. Navigate to **Tools > System > Purge Leads**. The Purge Leads form is displayed.



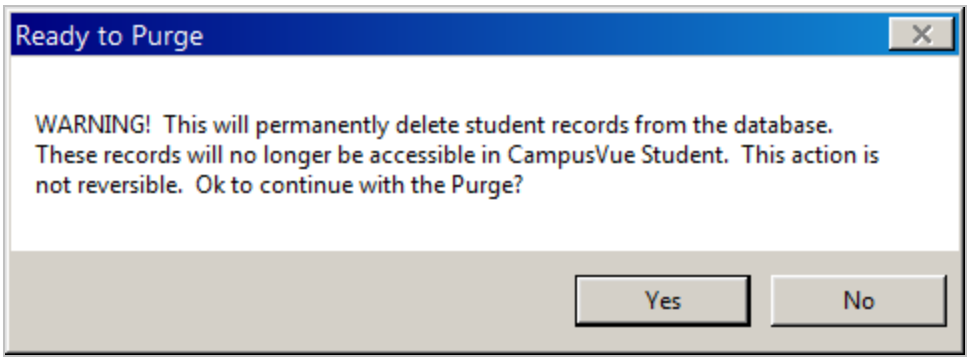
2. Select one or more **Campuses**.
3. Select one or more **Lead Status Codes**. The list of available statuses contains only those statuses that belong to the "Lead" system status category.
4. In the **High Lead Date** field, select the maximum lead date. Select from the options to purge only blank lead dates, and/or lead dates that are in the future.

   Rows that match the selection criteria are added to a new table "SyPurge_SyStudent" and removed from the SyStudent table. SyStudent rows that have any associated SaTrans rows are not purged.
5. Click **Next**.
6. Review the list of records to be purged. Click **Next**.



If necessary, click **Back** to change your selection criteria, **Print** the lead list, or **Cancel** the process.

7. If you clicked Next, the following warning is displayed. Click **Yes** to continue.



8. The purge process reports the number of records purged. Click **OK**.
9. Click **Finish** to close the Purge Leads form.

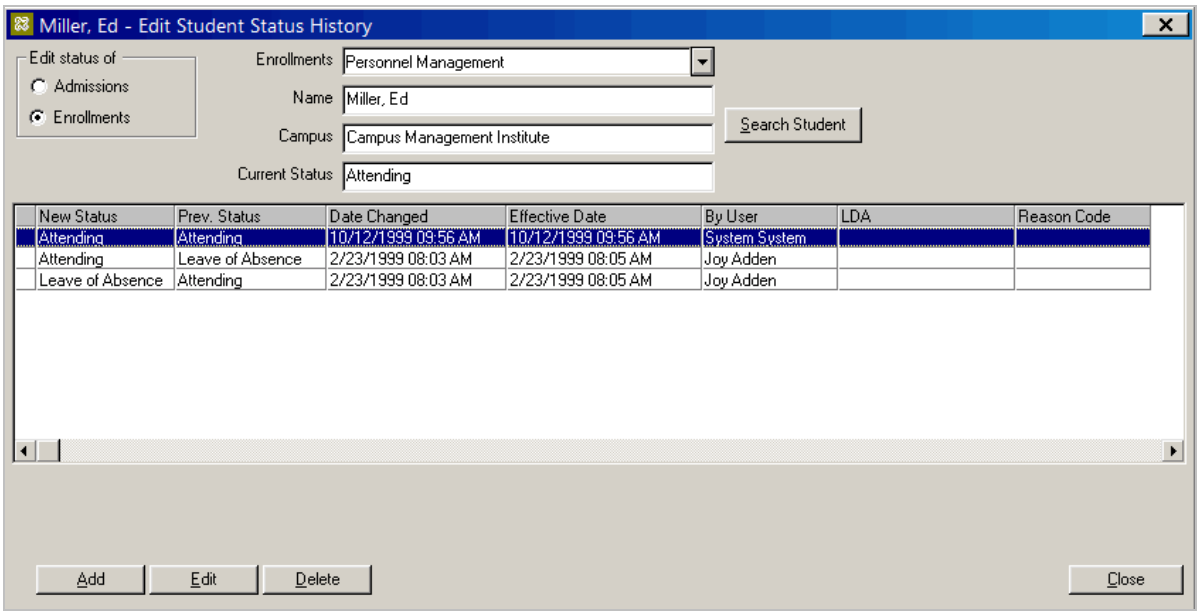
Edit Student Status History

Use the Edit Student Status History tool to modify a student's status history. The student master record, student admissions master record, and student enrollment master record are updated with the changes to the status history.

WARNING: This process does not validate status changes and should be used with caution. Using this tool improperly can have adverse effects on Admissions performance reports, the Population Analysis cube report, the SSCR process, the Clearinghouse process, or any other CampusNexus Student report or process that uses information about a student's status history.

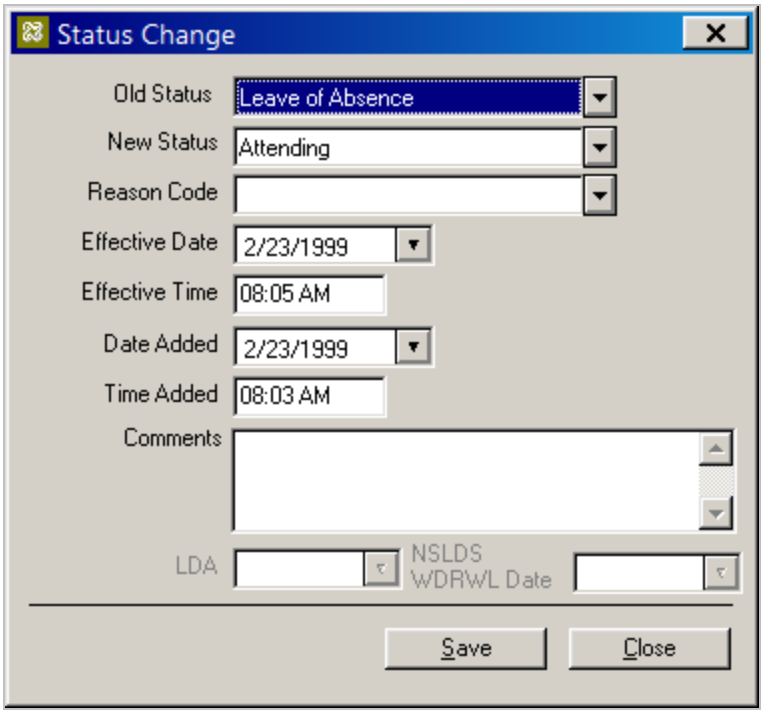
To edit a student's status history:

1. Navigate to **Tools > System > Edit Student Status History**. The Edit Student Status History form is displayed.
2. Click **Search Student** to find the student for whom you want to edit the status history (or select the student before you open the form).



3. **Add**, **Edit**, or **Delete** status history records for the student, including Admissions and Enrollment records.

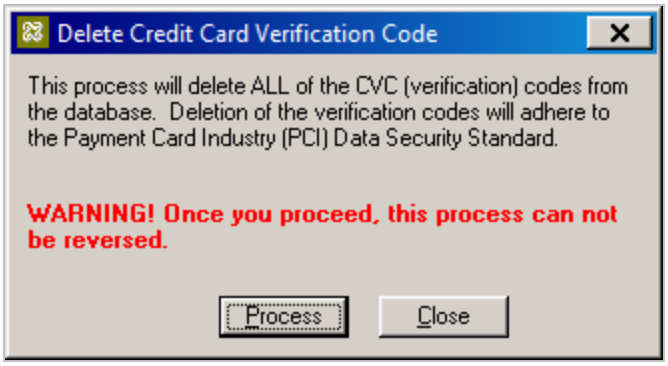
   When you click Add or Edit, the Status Change form is displayed.



4. Complete the fields on the Status Change form and click **Save**.
5. Click **Close** to close the form.
6. To view the student's status change history, navigate to **View > Admissions >** Status History.

Delete Credit Card Verification Code

1. Navigate to **Tools > System > Delete Credit Card Verification Code**. This option initiates a process that deletes all credit card verification codes. The following warning is displayed:



2. Click **Process** to proceed.
3. Click **Close** to close the form.

Export Student Data for Talisma Fundraising

Student information can be exported from CampusNexus Student to Talisma Fundraising. The export adds records to the Talisma Fundraising database for recruiting and fund raising purposes. The export functionality accommodates various student selection criteria based on client needs.

To set up the Talisma Fundraising integration:

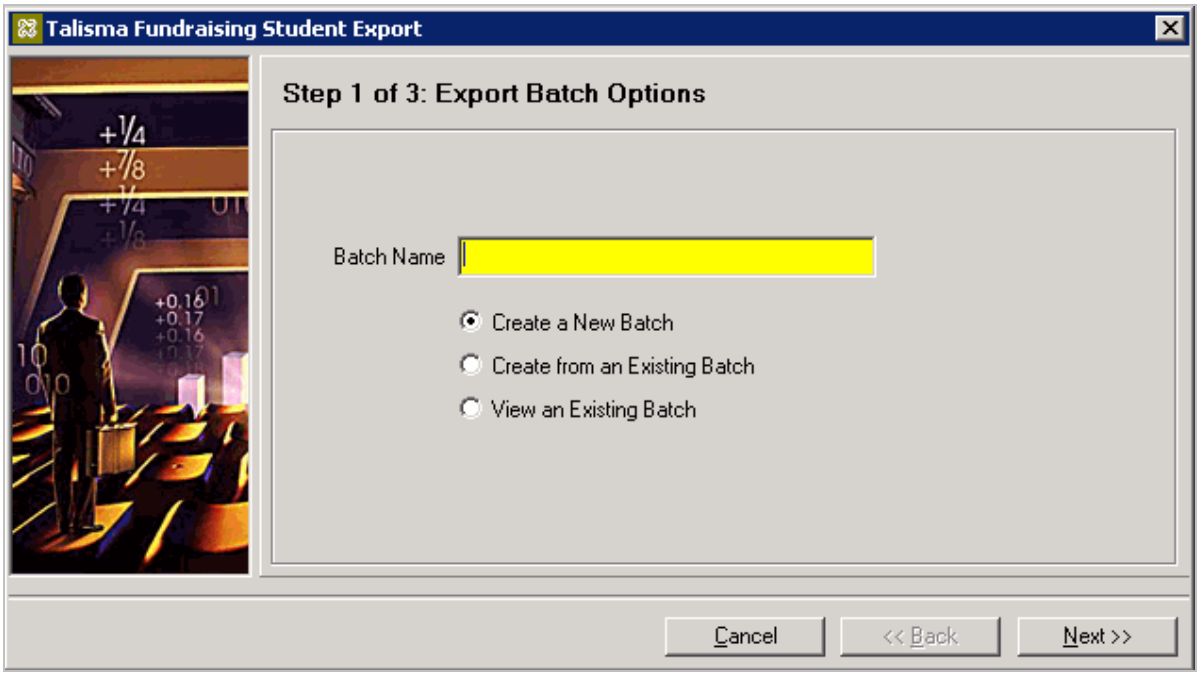
1. Navigate to **Setup > System**. The Systems Settings form is displayed.
2. On the File Server tab, click Configure Web Service Locations.
3. Select the CampusNexusFinance/Talisma Fundraising tab.
4. Enter two Web Service locations to enable CampusNexus Student/Talisma Fundraising integration.

The Data Conversion Resource Center (DCRC) application provides a smooth transition of data from CampusNexus Student to Talisma Fundraising. Using the DCRC application, the system administrator can map fields between the two applications and translate values between the two databases. For example, a Previous College value of 'X of Y' in the CampusNexus Student database could be mapped to 'XY' in the Talisma Fundraising database.

For more information on using the DCRC application, see the Help menu in the DCRC application. Technical details regarding the initial installation and configuration of the CampusNexus Student/Talisma Fundraising Integration can be found in the Talisma Fundraising Installation Guide.

To use the Talisma Fundraising Student Export wizard:

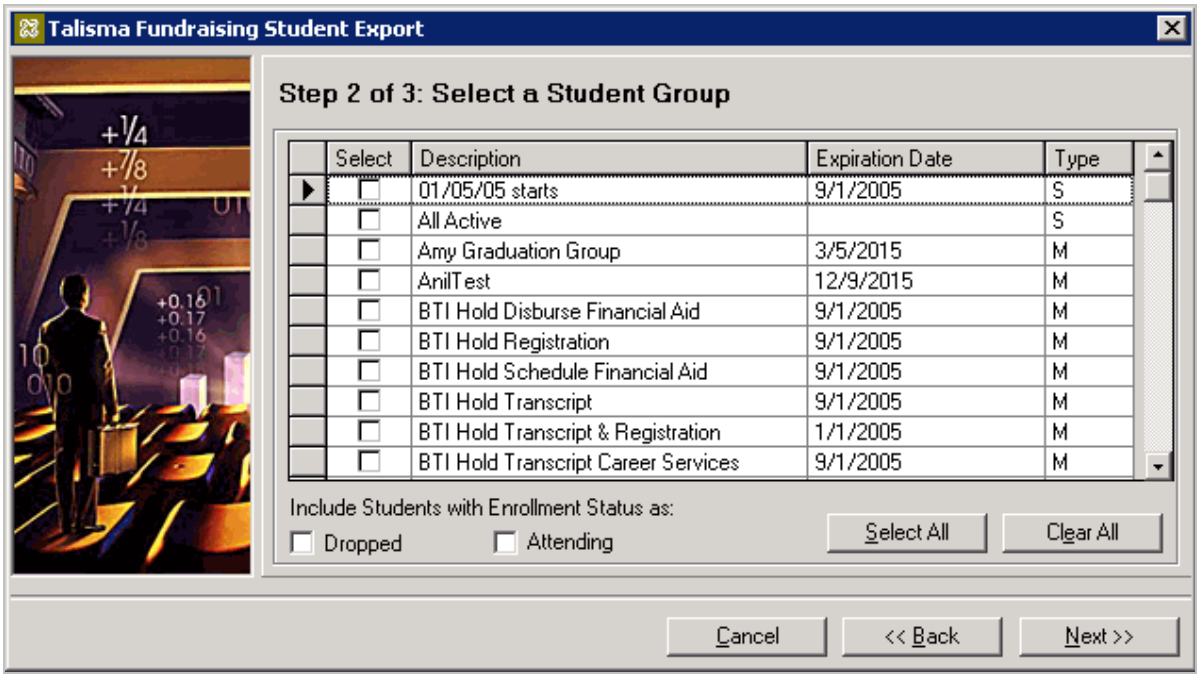
1. Navigate to **Tools > System > Export Student Data for Talisma Fundraising**. Step 1 of the Talisma Fundraising Student Export wizard is displayed. You can Create a New Batch, Create from an Existing Batch, or View an Existing Batch.



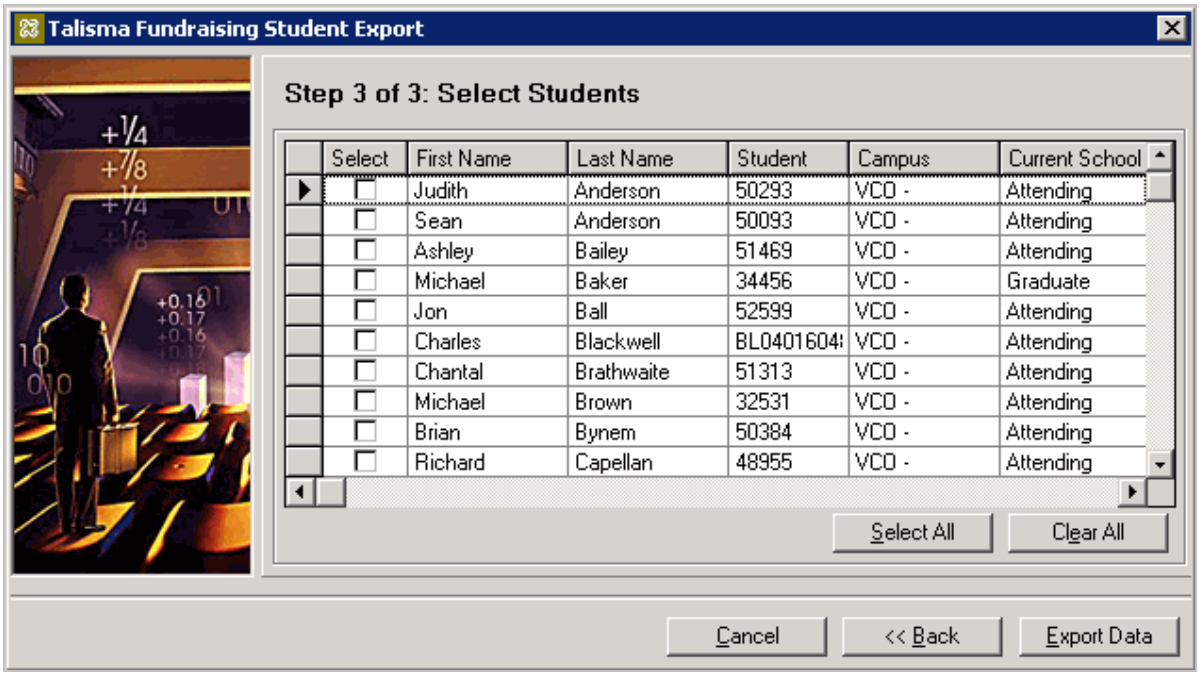
2. **To Create a New Batch**:

a. Specify a **Batch Name**, click **Create a New Batch**, and click **Next**.

b. In Step 2, select the **Student Groups**, select the **Enrollment Status** (Dropped or Attending), and click **Next**.



c. In Step 3, select the **Students** and click **Export Data**. After the export is complete, the wizard displays the exported students and the results of their export.



Notes:

- You can select or deselect student(s) to include in the export without impacting the original student group created. The information passed to Talisma Fundraising is gathered based on each student ID within the selected student groups and formatted accordingly. A unique export batch ID is associated with each export batch and used for tracking purposes.
- Duplicate checks are performed within each student group selected for export to ensure the same student information record is not exported more than once in the same file. If a student has multiple enrollment records that satisfy the export criteria, the export contains a student information record with multiple enrollment records and associated statuses.
- If a student's record is exported and the student already has a record in Talisma Fundraising, the placement and academic information is updated in Talisma Fundraising, but the student's address information is not updated.

3. **To Create from an Existing Batch**:
    a. Specify a **Batch Name** for the new batch that you are creating. The batch name must be different from any previous batch names.
    b. Click **Create from an Existing Batch** and click **Next**.
    c. In Step 2, select a **Batch**. An arrow is displayed to the left of the selected batch. Click **Next**.
    d. In Step 3, select the **Students** and click **Export Data**.
4. **To View an Existing Batch**:
    a. Click **View an Existing Batch** and click **Next**. A list of existing batches is displayed with Batch ID, Description (Batch Name), Number of Students, User, and the Date the batch was exported.
    b. Click on the **Batch** you want to view and click **Next**. A list of the students in the batch is displayed with Last Name, First Name, Student Number, Campus, Current School Status, and the Last Result of the batch export.

Setup Menu

The Setup menu functions include defining critical system parameters, adding and maintaining staff members, control of security, and several others.

Note: The Setup menu, like all other menus in CampusNexus Student, is controlled by the program's security features. The system administrator (SA) can allow other users access to all or portions of it. Users who belong to the system administrator staff group have access to all functions on all menus.

- System
- Campus Locations
- Staff
- Security
- Status Codes
- Contact Manager
- Admissions
- Financial Aid
- Student Accounts
- Academic Records
- Distance Education
- Career Services
- Housing
- CampusVue Finance
- Report Maintenance
- Web
- Data Dictionary
- School Defined Fields
- Required Fields
- Field Level Security
- Student Pace Evaluation Settings
- Executive Summary Report

Setup > System

When you navigate to Setup > System, the System Settings form is displayed. The system administrator can configure the system parameters as necessary to conform to the policies of the institution. The System Settings form has the following tabs:

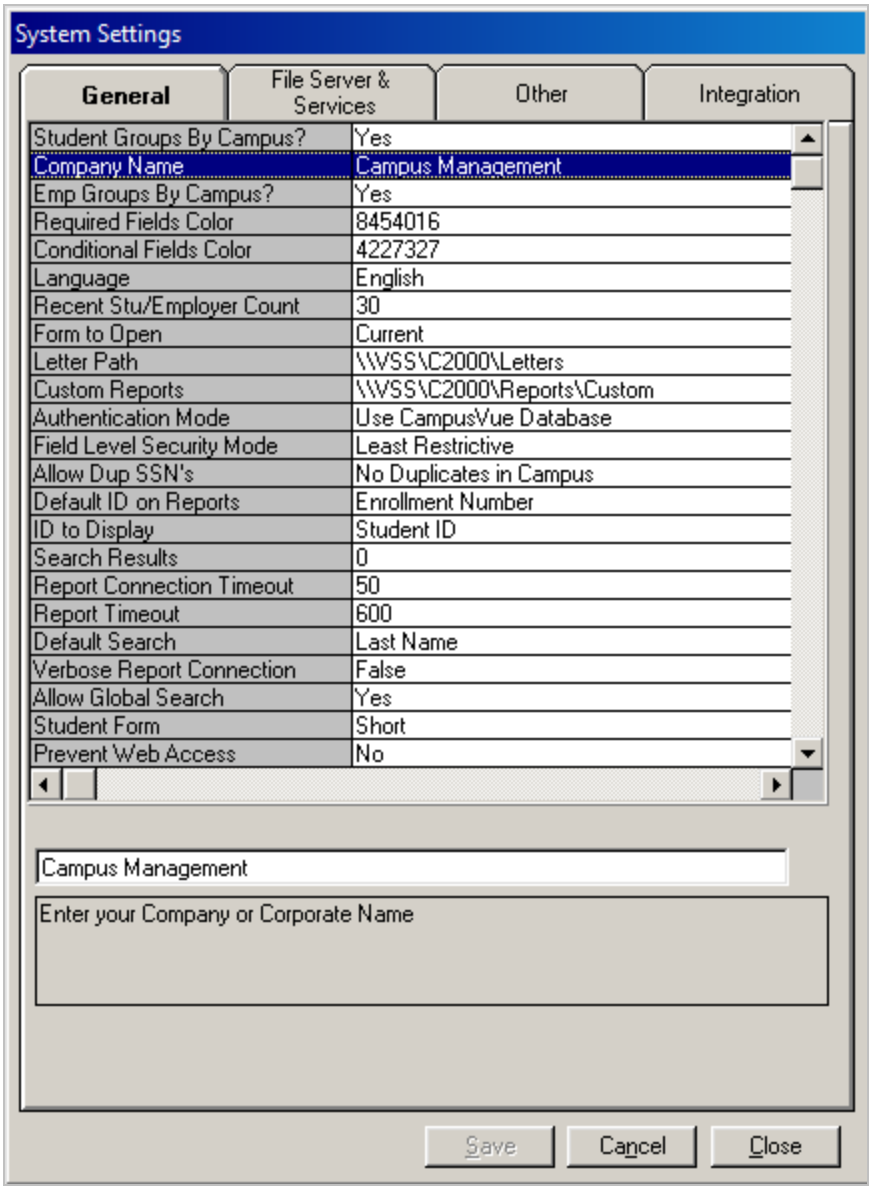
- General Tab
- File Server & Services Tab
- Other Tab
- Integration Tab

System Settings - General Tab

The General tab of the System Settings form contains general configuration parameters for the CampusNexus Student system.

To edit the system parameters on the General tab:

1. Navigate to **Setup > System** and select the **General** tab.



2. On the General tab, click the setting you want to edit. Scroll down to see additional settings.

   Read the instructions for changing a setting in the text box near the bottom of the form. For more information, see Field Descriptions.

3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Field Descriptions

Field	Description
Company Name	Enter the Corporate, Company, Institution, or Campus name as you want it to appear at the top of the CampusNexus Student main window. This name also appears at the bottom of generic reports provided with CampusNexus Student.
Student Groups By Campus?	To limit the user's access to student groups to the user's own campus group, select **Yes**. If you want users to have access to student groups across all campuses, select **No**.
Employer Groups By Campus?	To limit the user's access to employer groups to the user's own campus group, select **Yes**. If you want users to have access to employer groups across all campuses, select **No**.
Required Fields Color	This setting controls the background color of data entry fields that are required by your institution. When you select this setting for change, a button appears below the settings list box. Click **Click to change** to display a color selection chart. Select the color from the basic colors, custom colors, or color spectrum. Click **OK** to save your color selection. Click **Cancel** to close the color selection dialog box without changing the previously selected color. See Required Fields for more about marking fields as required.
Conditional Fields Color	This setting controls the background color of data entry fields that are *conditionally* required by your institution. When you select this setting for change, a button appears below the settings list box. Click **Click to change** to display a color selection chart. Select the color from the basic colors, custom colors, or color spectrum. Click **OK** to save your selection. Click **Cancel** to close the color selection dialog box without changing the previously selected color.
Language	This setting controls the language in which the labels on forms are displayed. Select a language from the list box that appears below the settings list.
Recent Stu/Employer Count	This setting controls the maximum number of students or employers that are listed when a user clicks on the Recent Students (or Recent Employers) list box above the CampusNexus Student work area. Enter the number of students or employers to store in the list. Use the spinner arrows to increase or decrease the number.

Field	Description
Form to Open	This setting controls which form is opened when you select a student from the recent student listing. A registry key has been added to the setup form to select which form is to be opened. Options are: 1. Current (default) 2. Student Master 3. None "Current" means to open another copy of the current form (if it is a student related form) and display the information for the student selected from the list. For example, if the Enrollment Form is displayed for student John Doe, and you select Bill Collins from the recent student list, another copy of the enrollment form is opened with Bill Collins' information. If the current form happens to be a form like "Class Scheduling" (Daily / Academic Records / Class Schedules), when you select a student from the list, the Student Master opens. "Student Master" means to always open the Student Master form for the student selected from the recent student list. "None" means that no form is opened automatically. With this setting, you can select a student from the recent student list and the system does nothing except set the student as the current student. You can then select a folder from the Student Bar or the View menu to open a specific student form. If you change the setting, you must exit from CampusNexus Student and log on again to see the effect of the change.
Letter Path	Enter the path to be used to store letter documents. Letters created through the interaction of CampusNexus Student and Microsoft Word are stored in this directory. Mail Merge checks this directory for letters when you are sending them to lists of recipients. See Letter Activity, Print Letters Overview and Employer Letters Overview.
Custom Reports	Enter the path to be used to store custom reports designed for or by your institution. When a user selects a report,CampusNexus Student checks this folder for a report file with the appropriate name (for instance, a customized transcript). If the program does not find such a report in your Custom Reports folder, it checks the system reports folder.

Field	Description
Authentication Mode	The Authentication Mode contains four options. The selection of these options affects the Sign-In form, Cashier ID Check form, and Session Parameters form when authenticating users. When Active Directory is enabled with single sign-on option, the Sign In dialog is not displayed. The username@domain for the current windows session is passed to the authentication method to get the CampusNexus Student user information. If the username@domain is *not* found in CampusNexus Student, the user is *not* allowed to execute CampusNexus Student using the current account. When Active Directory is enabled without single-sign-on, the Sign In dialog is displayed. The username@domain is displayed in the User Name field as read-only. The user is required to enter a password for his/her domain account. The username@domain and the supplied password are passed to the authentication method to get the CampusNexus Student user information. If the username@domain is *not* found in CampusNexus Student, or if the password does *not* match the user's domain password, the user receives an "Access Denied" message and is prompted to re-enter the password. An additional button labeled Options >> is displayed in this mode. The user can click this button to change the authentication mode to **Use CampusNexus Student Database**. This allows the user to sign-in with the Administrator account. The Administrator account remains a database account even when Active Directory is enabled. **WARNING:** When you change to Active Directory Mode, the user code is appended with @DOMAINNAME, and the passwords are cleared in the CampusNexus Student database. Changing back to the **Use CampusNexus Student Database** mode require manual works. Passwords need to be set on all users, and the @DOMAINNAME suffix needs to be cleared from the User code. None of this is supported through the CampusNexus Student interface; it requires a support call, and someone working with the institution to execute scripts at the database level. With Active Directory, the user cannot change the User Name field. To "run as" a different user, the user can do one of two things: 1. Sign-in to the Windows workstation (or Citrix server) using another account to execute CampusNexus Student. 2. On a Windows workstation, right-click the CampusNexus Student menu, or desktop item, and select "Run as ..." from the context menu. For any staff member to run CampusNexus Student, the staff member's password must contain more than six (6) characters. If no password is entered in the staff file setup, it is assumed that the staff member will not be using CampusNexus Student. Staff members who do not actually use CampusNexus Student are listed in the system so that they may be assigned to classes as instructors or for other administrative duties such as advisors, etc.
Use CampusNexus Student Database	Formerly, Database, this setting is now referred to as **Use CampusNexus Student Database**. A staff member's user name and password from the CampusNexus Student database is used to authenticate the user when logging on. The user name is displayed upon entering the Sign-in window followed by a prompt for a password.

Field	Description
Use Windows Login (Non-AD)	Formerly, Use NT Security, this setting is now referred to as **Use Windows Login (Non-AD)**, and determines whether CampusNexus Student recognizes users who log on to the Windows operating system as being authorized users. This option is built in and uses the local computer account to match the staff member user's account in the CampusNexus Student database. If this setting is selected, then the Sign In program compares the user's Windows log on ID to the list in CampusNexus Student. If the program finds an ID match, the user is automatically logged on to CampusNexus Student without having to enter the ID and CampusNexus Student password again. CampusNexus Student does not match the password in Windows to the password in CampusNexus Student. The Sign In program only checks if the password in CampusNexus Student contains more than six (6) characters. If the user is allowed access to your Windows domain and has a record in the staff file, the user is trusted in CampusNexus Student. This setting does not affect the other security provisions of the CampusNexus Student system such as access to menus and permission to read and write data. If a staff member logs in to Windows with a password that is not recognized by CampusNexus Student, a message is displayed when the program is started. The staff member then has to enter a valid ID and a valid password. If the Use CampusNexus Student Database authentication option is selected, passwords and policies are enabled as well.
Use Active Directory	Account Management may be facilitated in a central location when the Active Directory is enabled. If so, password changes are *disabled*. This is the default option for Active Directory. When you sign in, CampusNexus Student displays the user's user name in the username@domain format for the current windows session. The user is *not* allowed to modify the user name, and is prompted to enter the windows domain password. **Note**: An "Administrator" account is still of "database" type. **WARNING:** Selecting this option does not allow the institution to revert the configuration to Use CampusNexus Student Database or Use Windows Login (Non-AD), since all accounts passwords are encrypted one way in the Active Directory storage.

Field	Description
Use Active Directory (single sign-on)	Please read the Active Directory Assumptions, Dependencies, Constraints section below first. Account Management may be facilitated in a central location when the Active Directory (single sign-on) is *enabled*. This option does *not* prompt the user for credentials. The current windows session information is used to authenticate the user and sign-in to CampusNexus Student. If the username@domain is *not*defined in the CampusNexus Student database, the user is *not*allowed to execute CampusNexus Student using the current credentials. **Note**: An "Administrator" account is still "database" type. **WARNING:** Selecting this option does not allow the institution to revert the configuration to Use CampusNexus Student Database or Use Windows Login (Non-AD), since all accounts passwords are encrypted one way in the Active Directory storage. **Active Directory Integration** When configured to use the Windows Directory Services, CampusNexus Student provides direct authentication against Active Directory. The goal is to create a seamless integration between CampusNexus Student and Windows authentication services already in place for each institution, and not to manage them. The CampusNexus Student role will be solely to integrate with the directory services for authentication processing. When Active Directory is enabled in CampusNexus Student, the Password Profiles functionality is replaced by the Windows Domain policies. **Password Change** • CampusNexus Student users can only change their passwords if the database is configured as authentication storage. • Portal users can only change passwords through the Faculty Portal when Active Directory is enabled. **Password Encryption** All passwords are changed to use hashing in the database. Authentication credentials are stored in a *new* users table that will eventually consolidate all types of users. **Portal Database Dependency** Portal authentications for Faculty members are validated against the CampusNexus Student database, while the Student, Applicant, and Employer accounts are validated against the Portal database. **To enable Activity Directory (single sign-on)** Select the '*Use Active Directory (single sign-on)*' option, and click **Save**. The following message is displayed.

Field	Description
	 When **Yes** is selected from the "Do you want to continue enabling Active Directory Authentication" drop-down list, CampusNexus Student requests additional information.  After the User Domain field is entered and the Enable AD button is selected, a confirmation message states: *The update to Active Directory is completed.* CampusNexus Student appends an ampersand (@) and the User Domain entered to each staff member's User ID (i.e., 'staffmember@CMC'). **Note**: When you change to Active Directory Mode, the system appends the text entered in the User Domain to each staff member's UserID (i.e., @DOMAINNAME), and the passwords are

Field	Description
	cleared. Changing back to Use CampusNexus Student Database mode requires manual work. Passwords need to be set on all users, and the @DOMAINNAME suffix needs to be cleared from the UserID field. None of this is supported through the CampusNexus Student interface; it will require a support call and someone working with the institution to execute scripts at the database level. **Active Directory Assumptions, Dependencies, Constraints** • CampusNexus Student does not play a role in Staff Active Directory account creation. All Active Directory accounts are created manually by administration personnel, or automatically through the use of third party tools, such as MIIS or Lawson. This approach satisfies the needs of clients that manage all faculty accounts in Active Directory through external software. • CampusNexus Student does not manage or maintain Active Directory accounts for faculty type users. All account status, expiration, lock-outs, and organizational units related to faculty member accounts are managed manually by institution administration or by third-party software. • CampusNexus Student password changes are enabled for the Database Authentication process only. No changes to passwords are allowed when Active Directory is configured. • CampusNexus Student integration with Active Directory is global. All institutions and campuses under the current implementation use the same process of authentication and authorization for faculty staff users. • Once Active Directory integration is in place, CampusNexus Student does not allow changing the user name from CampusNexus Student. All user name changes are done through the Active Directory manager. • The Authentication Service can receive user names with and without the domain name attached to them. If the client submits the user name in the form of username@domain.com, the system uses the domain name specified for the authentication process; otherwise the default domain configured for the API is used. • Secure Sockets Layer should be installed and configured for all instances of the Authentication Web Service providing authentication to CampusNexus Student.

Field	Description
Field Level Security Mode.	This setting controls how Field Level security behaves when a user belongs to more than one staff group and each group has different levels of field-level access. The available options include: • **Most Restrictive** - Field-Level Security operates in the same manner as Staff Group security for multiple security groups. Users assigned to multiple groups receive the MOST restrictive level of security granted in any group to which they have been assigned. For example, a staff member who has read-only capability in the instructor group and edit capability in the advisor group has read-only capability in the instructor group. • **Least Restrictive** - Field-Level Security does not operate in the same manner as Staff Group security for multiple security groups. Users assigned to multiple groups receive the LEAST restrictive level of security granted in any group to which they have been assigned. For example, a staff member who has read-only capability in the instructor group and edit capability in the advisor group has edit capability in the instructor group.
Allow Dup SSNs	The following options are available: • **Yes**. If this setting is Yes, the system allows you to enter a duplicate Social Security Number within the same campus. • **No duplicates in Database**. Choose this setting if you do not want duplicate SSNs anywhere in your CampusNexus Student database. This implies that in multi-campus institutions, a student can only have a master record on one campus. • **No duplicates in Campus**. This option allows duplicate SSNs in the database, but not within the same campus.
ID to Display	Select the **Student ID** or the **Social Security Number** to be displayed beside the student name in the Recent Students text box. Refer to Student ID Format (Setup > Admissions > General (tab)).
Search Results	Enter the maximum number of rows that the search procedure is to return when you use the student search procedure. A zero in this field indicates that all matches are to be displayed in the resulting grid. This does not apply to the employer search tool.
Default ID on Reports	Select the default ID to appear on reports that list students. Select Social Security Number (SSN), Student ID, or Enrollment Number. On most reports, you can change the ID to be displayed at the time the report is requested.
Report Connection Timeout	This setting is used to enter the number of seconds to wait for the database connection.
Report Timeout	This setting is used to adjust the amount of time the system waits for a report query to complete. If your institution is getting time-out errors when running reports, adjust this setting to allow more time for the query to run. The default is 600 seconds (10 minutes).
Default Search	Select the default text box in which the insertion pointer (cursor) is placed when a user starts a new search for student records. Select Last Name, SSN, Student ID, or Enrollment Number.

Field	Description
Verbose Report Connection	This setting is used in conjunction with the Report Timeout setting. If this setting is **True**, it displays the current connection time on the Form Sys Report Selection. The default for the registry is 10 seconds; the default for the database is 20 seconds. If this setting is **False**, the connection time is not displayed.
Allow Global Search	Allow users to search for students across all campuses in the system or limit the search to the user's campus list. If you select **Yes** and user-level permissions are configured to allow Global Search, an additional All Campuses in Database option appears on the search form. See Setup Menu > Staff > Staff Members > User Info Tab > User Info > General sub-tab.
Student Form	Select which Student Master edit form is to be used. Options include: • Short - default form. • Long - used by institutions with long lists of selections for certain fields on the student master. See Edit a Student Master.
Prevent Web Access	This setting controls use of the Help on the Web option on the Help menu. Select **Yes** to restrict Web access. In other words, to remove Help on the Web from the Help menu. Select **No** (default) to leave the option on the Help menu.
Allow Dynamic Groups	If you select **No**, the Dynamic student group type is unavailable when creating new groups. On the Student Group form, if the Allow Dynamic Groups option is No, the program does not allow the group type to be changed to dynamic. The message, "*Dynamic Groups have been disabled by the System Administrator*" is displayed. If you select **Yes**, users can create dynamic groups.
SQL Server	When dynamic groups are in use, the database supports a SQL server job to evaluate dynamic groups and related frequency. The SQL server job provides an option to define a time and recurrence for each frequency in use. The jobs will execute based on their assigned frequency so that dynamic group refresh can occur only on the groups necessary when required and on intervals defined by the user.
Staff Group Permissions	Users can select a default frequency when dynamic groups are in use. Each group contains a property allowing users to define how often each of the dynamic groups needs to be updated - hourly, daily, biweekly, weekly or monthly - which is performed on a regulated basis through the functionality provided by SQL server jobs. The frequency selection available to the user is limited to only those frequencies granted based on the user staff group permissions defined. Users can define any combination of frequency permissions based on these staff groups. Users can also limit the frequency selection by staff group. When creating or editing dynamic groups, users are presented with the frequency options defined within the dynamic group permissions, based on the users' staff groups. New dynamic groups default to the system default frequency, and only users with the correct permissions are able to edit them. Users in multiple staff groups are provided a unique list of all frequencies allowed based on an evaluation of all staff groups the user is associated with. The option to set frequency is disabled when the option to use dynamic groups is not in use.

Field	Description
SEVIS Transmission	This setting controls the transmission by School Code, Campus, Campus Group, or Program Number.
Enable SEVIS Extract	This setting, when set to Yes, enables you to extract the SEVIS information.
SEVIS Extract Folder	Enter the location where SEVIS extract files are saved.
SEVIS Eligibility Folder	Enter the location where eligibility forms should be saved so that CampusNexus Student can associate them with the student.
Enter EDE Path	Enter the path where folders for exported files should be saved. • For Financial Aid Automation (FAA) applications, enter a UNC-compliant path (`\\<computer name>\<shared directory>\`). • For non-FAA applications, the path does not have to be UNC-compliant, that is, it can be mapped to a drive letter (e.g., `E:\<shared directory>\`). Select **Help > About > More Info** to view the current server path.
EDE Archiving Frequency	Choose how often files in the EDE Path should be archived into subdirectories. Options are **Never**, **Daily**, **Weekly** (default), and **Monthly**.
User Toolbar Icon Folder.	Enter the path where the folder containing static data elements from student records and shortcuts to frequently used processes should be saved.
FERPA document?	The Family Educational Rights and Privacy Act is a Federal law that protects the privacy of student education records. This law applies to all institutions that receive funds under an applicable program of the U.S. Department of Education. FERPA gives eligible students certain rights with respect to their education records. Select 'Yes' to indicate that the student would like to be exempt from FERPA directory information disclosure. The student record is saved with Data Block designation, the date the change was made, and an "F" is displayed on the student bar next to the hold status icon. If a user clicks on the "F" (FERPA) icon, CampusNexus Student opens the FERPA Information Request form displaying the list of fields in the campus-level FERPA group that the student has elected to block and the list of any addresses that have been designated to allow FERPA academic fields. See FERPA Document Setting and Address Types to set up a FERPA address type.
Allow Emp Global Search?	Select **Yes** to allow Employer searches across all campuses in the system, or **No** to limit the search to the user's Campus List.

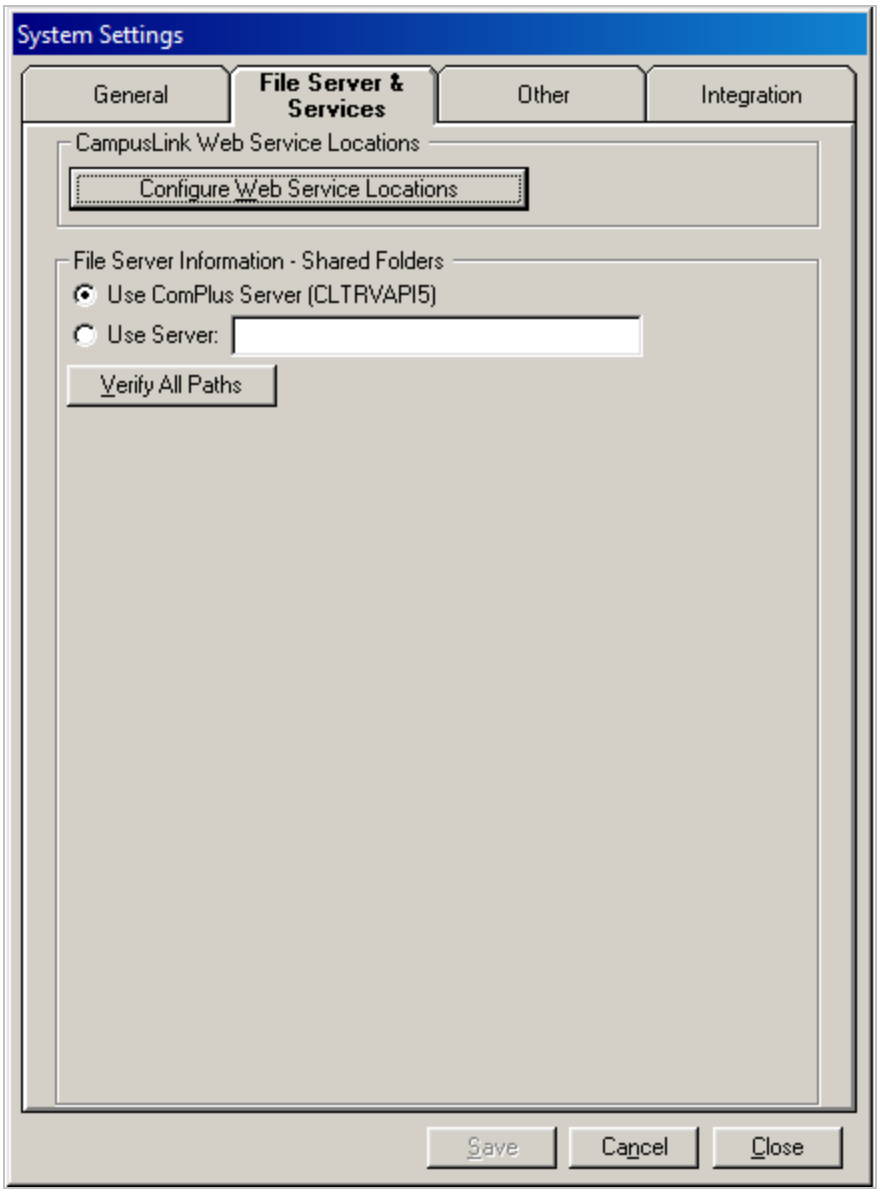
Field	Description
Require Audit Comment?	This selection indicates whether staff is required to enter a comment when updating audited placement fields. The following options are available: • **Never** - comments are not required except when records are being deleted. • **Required Fields Only** - the user must enter a comment when updating required fields or deleting records. This is the default setting. • **Always** - the user must enter a comment any time an update is made or a record is deleted.
Logoff After Pwd Change?	Choose **Yes** to force the user to log off after making a successful password change. If the setting is **Yes**, the change password window indicates that the user is logged off after changing the password. If the setting is **No**, the change password form will work in the same manner as before, and not log the user off.
Data Web Service URL	Enter the URL for the applicable data web service.
Automated User	Refers to a user who has permission for Automated Processes and can be selected from the drop-down list to resolve Exception Processing Auto Resolve Type III exceptions. The system assigns all exceptions that are auto resolved by the pool to the Automated User except for the original exception that was resolved.

System Settings - File Server & Services Tab

This tab stores the server name where the CampusNexus Student share resides. The tab also is used to define the Middle Tier Web Service URL locations and service names used for API services, CampusNexus Student/Portal Integration, CampusVue Finance, HR & Payroll or CampusNexus Finance, HR & Payroll/Talisma Fundraising, WCF Integration and Custom Integrations.

To configure the file server settings:

1. Navigate to **Setup** > **System** and select the **File Server & Services** tab.



2. Select **Use ComPlus Server** (default) or **Use Server**. If you select Use Server, enter the name of the server.
3. Click **Verify All Paths**. CampusNexus Student verifies the paths.
4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To configure Web Service locations:

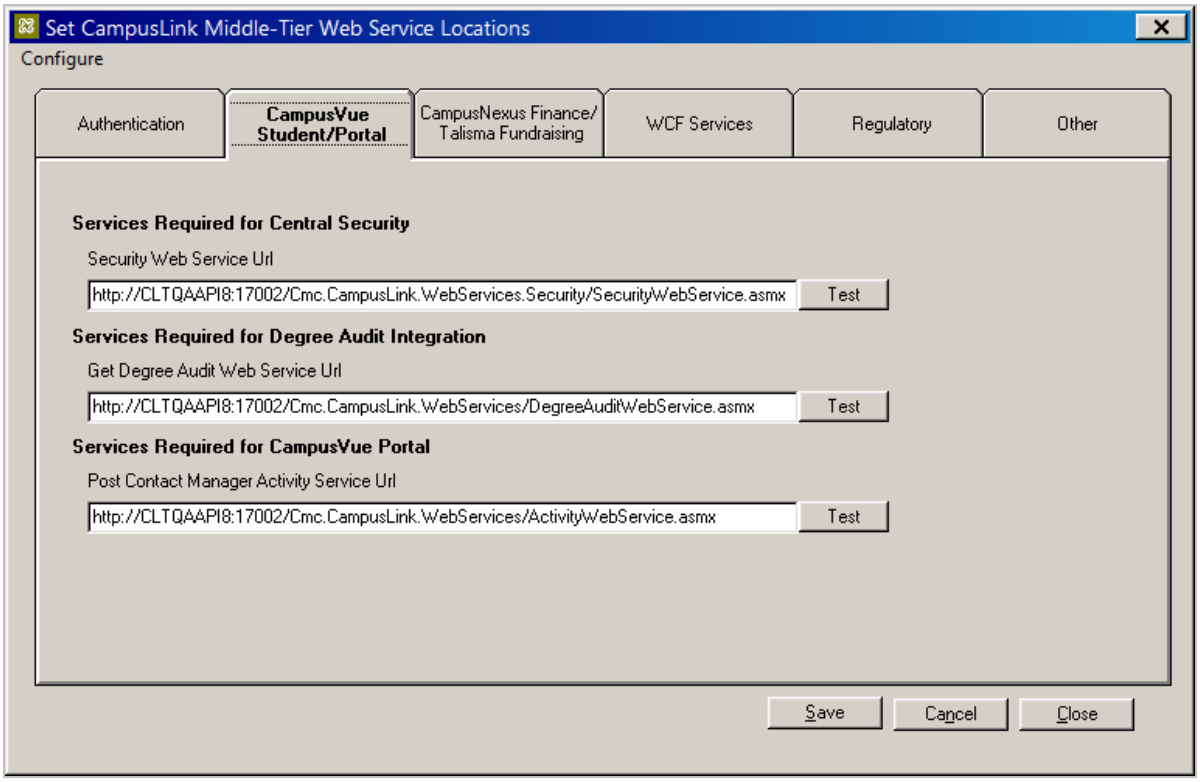
1. Click the **Configure Web Service Locations** button. The Set CampusLink Middle-Tier Web Service Locations form is displayed.

   The **Authentication** tab contains fields for:

   - Authentication Web Service URL
   - Staff Web Service URL
   - Get List Web Service URL

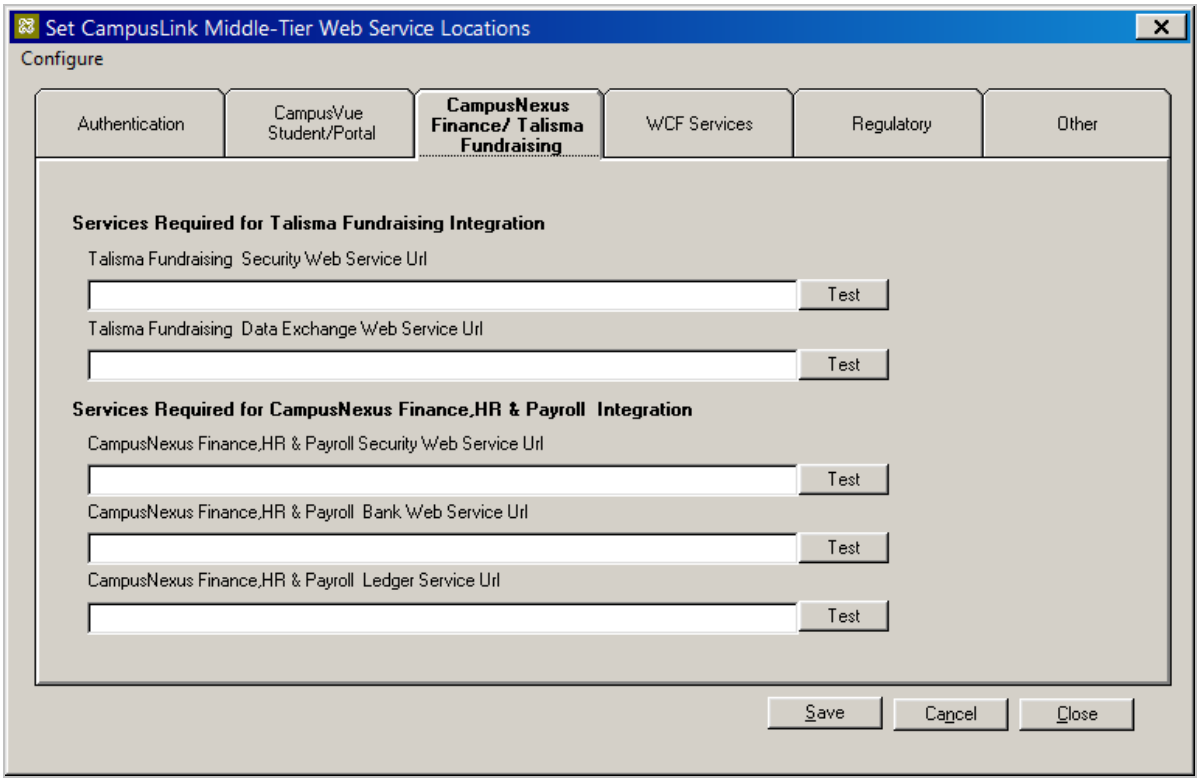
   The **CampusNexus Student/Portal** tab contains fields for:

   - Security Web Service URL
   - Degree Audit Web Service URL
   - Contact Manager Activity Service URL



The **CampusNexus Finance / Talisma Fundraising** tab contains fields for:

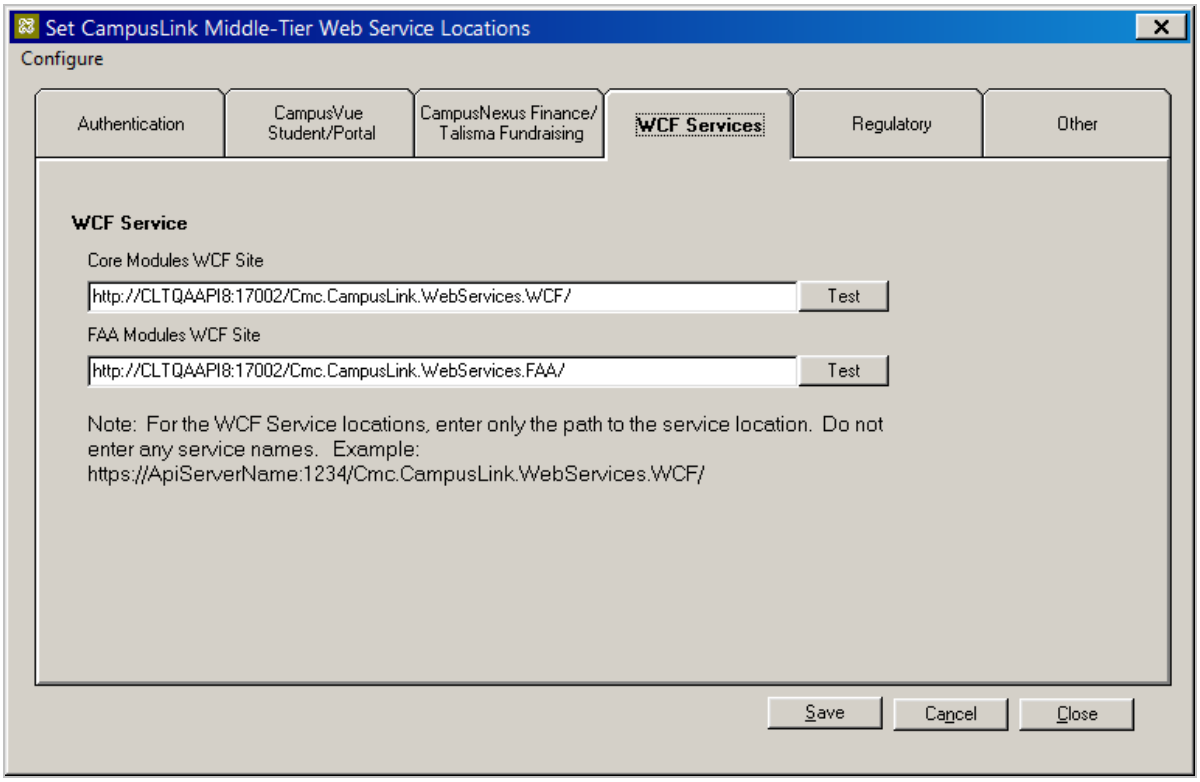
- Talisma Fundraising Security Web Service URL
- Talisma Fundraising Data Exchange Web Service URL
- CampusNexus Finance, HR & Payroll Security Web Service URL
- CampusNexus Finance, HR & Payroll Bank Service URL
- CampusNexus Finance, HR & Payroll Ledger Service URL



Note: When integration of CampusNexus Student with CampusNexus Finance, HR & Payroll is enabled (see GL/AP Package), the tab is labeled **CampusNexus Finance / Talisma Fundraising** and the **Services Required for CampusNexus Finance, HR & Payroll Integration** fields are labeled accordingly.

The **WCF Services** tab allows contains fields for:

- Core Modules WCF Site
- FAA Modules WCF Site

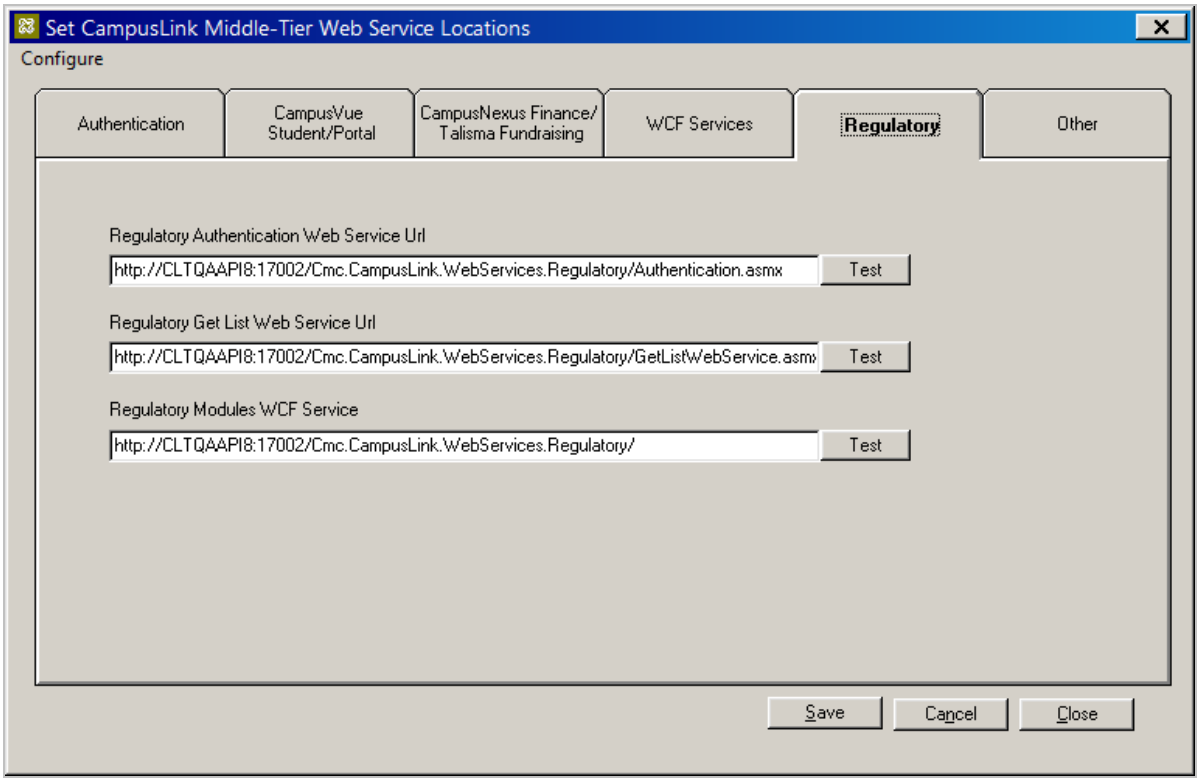


Note: For WCF Service locations, enter only the path to the service location. Do not enter any service names.

Example: `https://APIServerName:1234/Cmc.CampusLink.Webservices.WCF/`

The **Regulatory** tab contains fields for:

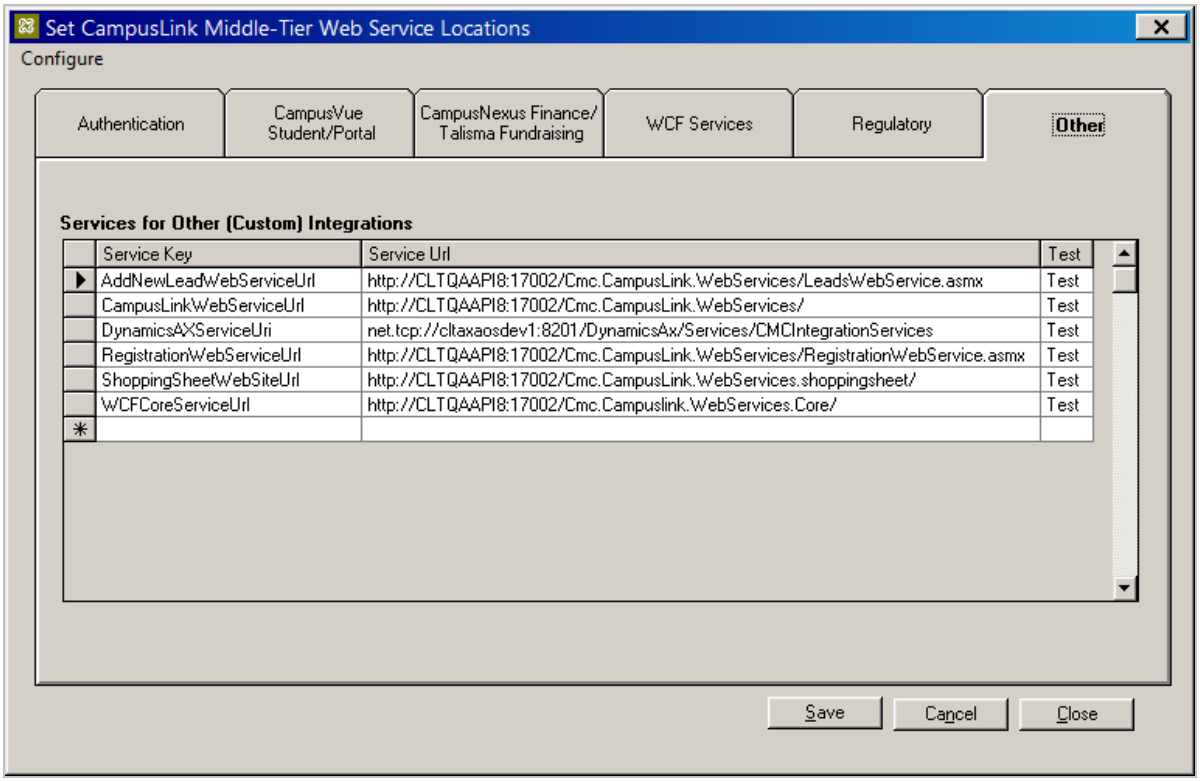
- Regulatory Authentication Web Service URL
- Regulatory Get List Web Service URL
- Regulatory Modules WCF Service



Note: For the WCF Service locations, enter only the path to the service location. Do not enter any service names.

Example: `https://APIServerName:1234/Cmc.CampusLink.Webservices.WCF/`

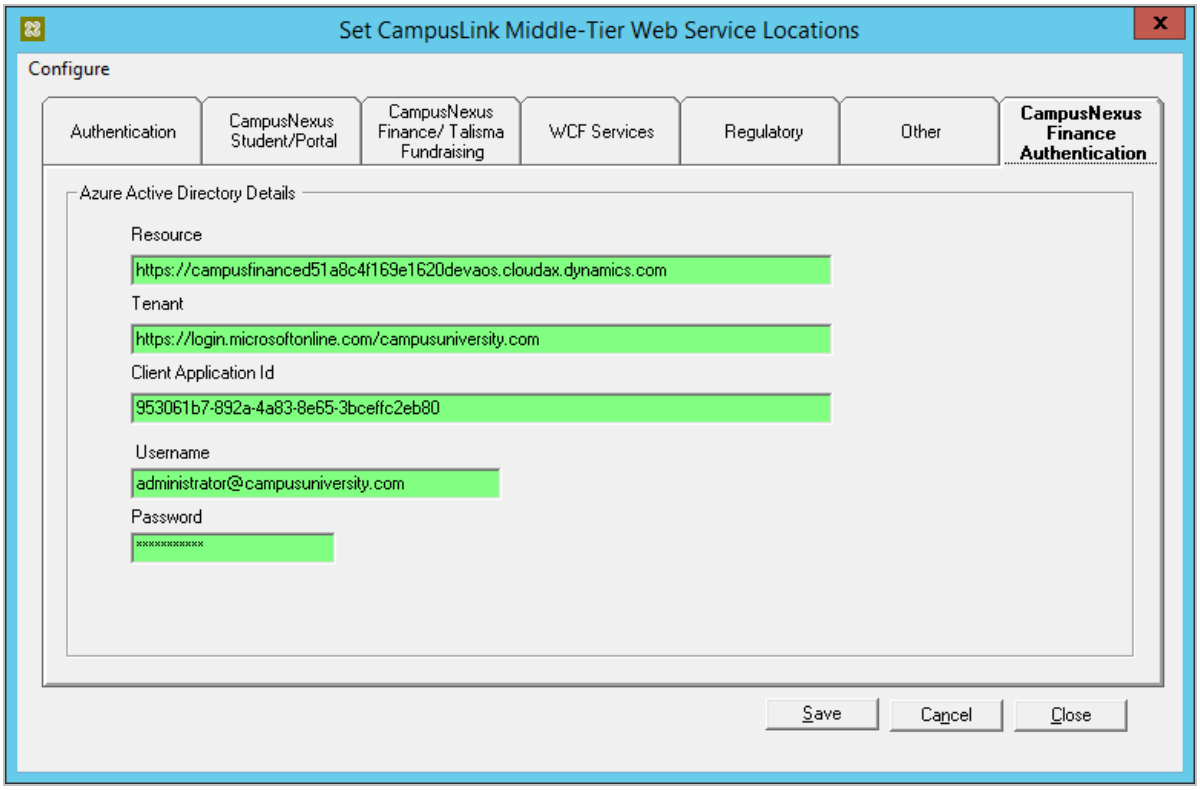
The **Other** tab contains fields for Service Keys and Service URL Location fields for Other (Custom) Integrations:



The **CampusNexus Finance Authentication** tab displays Azure Active Directory details, which is used by CampusNexus Student application to communicate with the CampusNexus Finance, HR & Payroll web services.

Following are the fields in this tab:

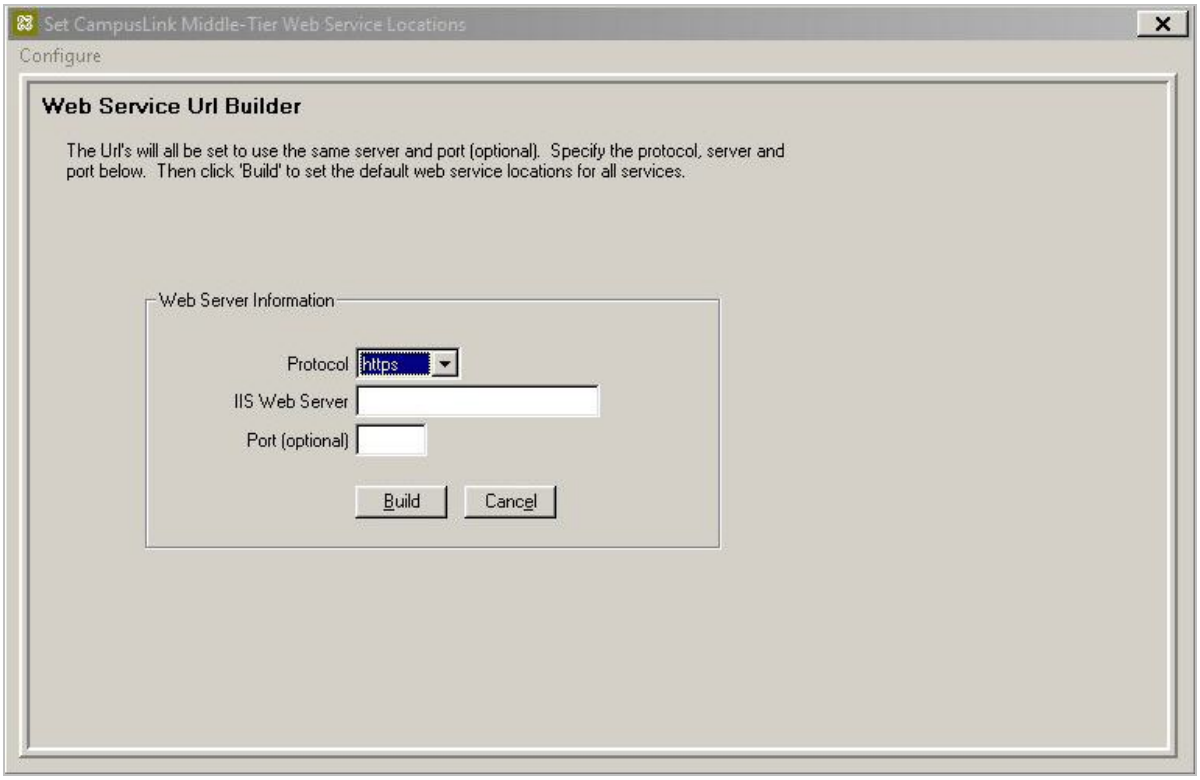
- Resource - The URL of the cloud-hosted environment where the CampusNexus Finance, HR & Payroll solution is deployed.
- Tenant - The Azure Active Directory (AAD) instance created for your organization on Microsoft Azure.
- Client Application Id - The Client ID information that is generated while registering a native application with the AAD of your organization.
- Username and Password - The user credentials existing in the AAD,



2. Select the appropriate tab to configure a Web Service. For each of the Web Services that applies to your configuration, enter a URL in the form of:

   `https://{APIServerName:port}/{service path}/{servicename}.asmx`

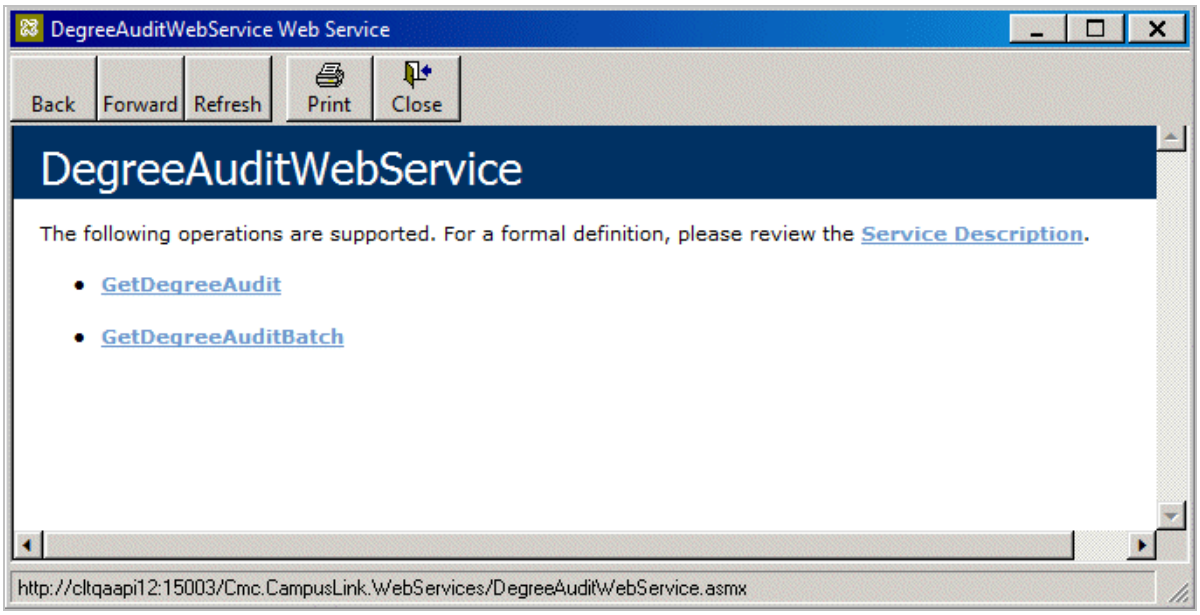
   a. To enter a URL, click the **Configure** link in the top left hand corner of the tab and select **Use Builder**. The Web Service URL Builder form is displayed.



b. Specify the **Protocol**, **IIS Web Server**, and **Port** (optional).

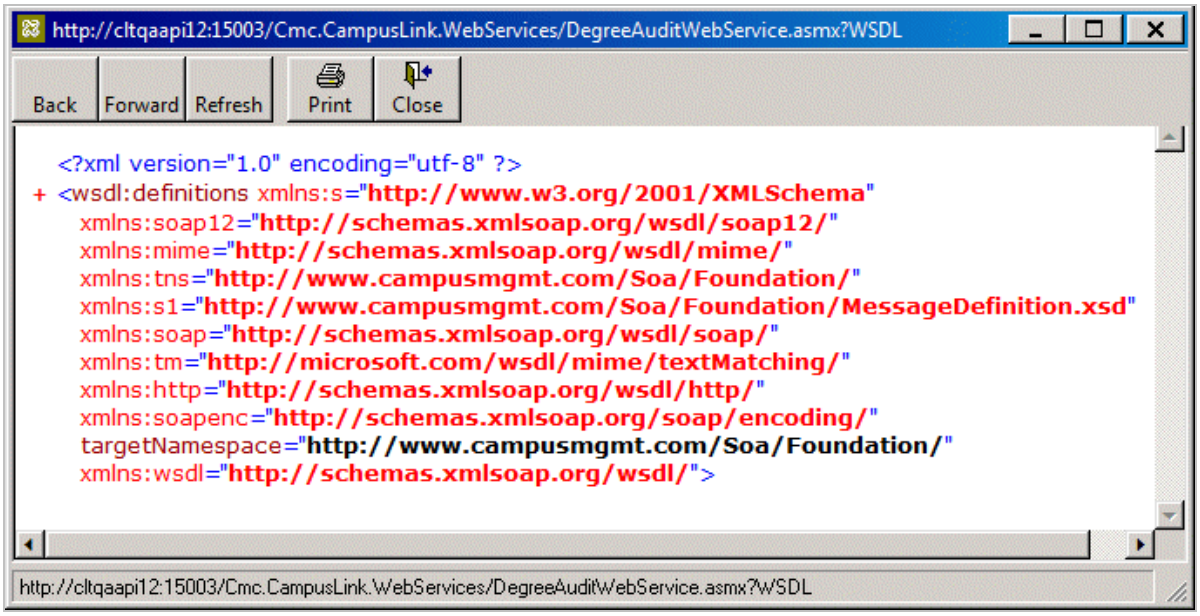
c. Click the **Build** button. The URL is loaded in the proper format and the Web Service URL Builder form is closed.

3. In the Set CampusLink Middle-Tier Web Service Locations form, click the **Test** button next to the Web Service location you entered. If the service is valid, a form identifying the service and listing the operations it supports is displayed.



4. Click the **links** in the page identifying the service and listing the operations it supports. The WSDL associated with

the service is displayed.



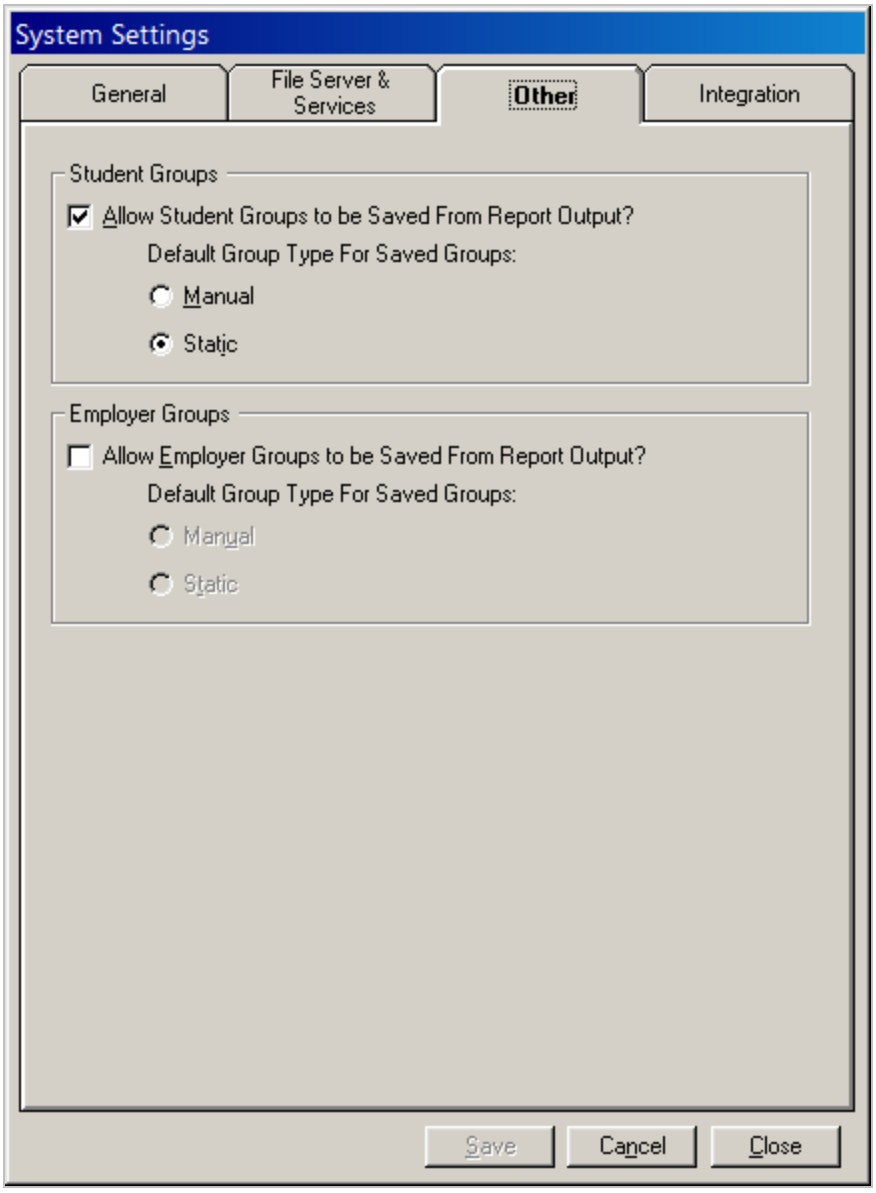
5. Click **Close** to close the form.
6. Click **Save** on the Set CampusLink Middle-Tier Web Service Locations form.
7. When prompted, verify your **login** to complete the save operation.

System Settings - Other Tab

Use the Other tab of the System Settings form to save student groups and employer groups from report output. You can also select a default (manual or static) group type for the saved groups.

To allow groups to be saved from reports:

1. Navigate to **Setup > System** and select the **Other** tab.



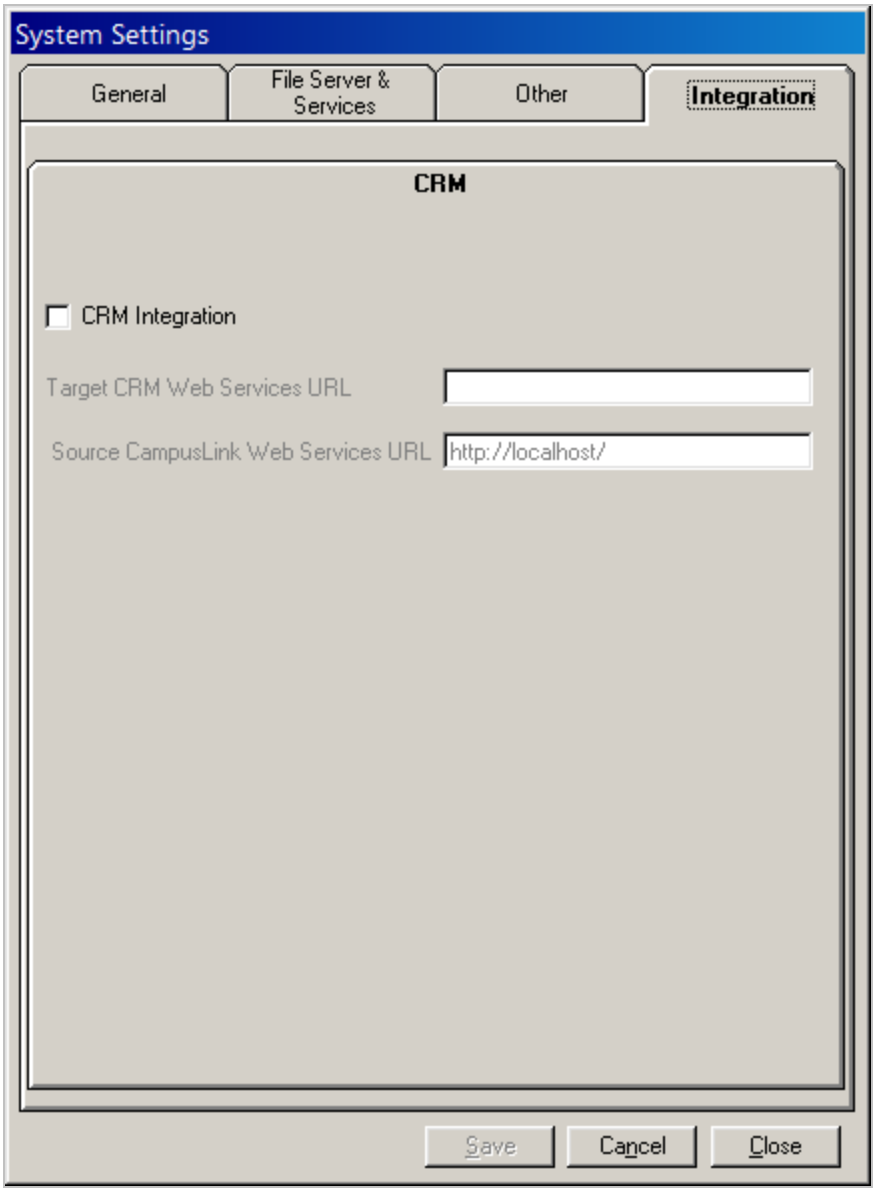
2. Select appropriate options for Student Groups and Employer Groups.
3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

System Settings - Integration Tab

Use the System Settings Integration tab to configure CampusNexus Student to integrate with a Constituent Relationship Management (CRM) product.

To configure integration with a CRM product:

1. Navigate to **Setup > System** and select the **Integration** tab.



2. Select **Enable CRM Integration** to enable CampusNexus Student for integration with a CRM product. The default is disabled. The selected value is stored in the CampusNexus Student database SyRegistry table.

When CRM Integration is selected, the Target CRM Web Service URL and Source CampusLink Web Services URL fields become enabled. When CRM Integration is enabled at the system level, the outgoing queue is populated with Organizational level information such as list item elements and account elements.

3. Specify the **Target CRM Web Service URL** and **Source CampusLink Web Services URL** to provide the destination/source locations for outgoing transactions. The values in these fields are stored in the SyRegistry table.

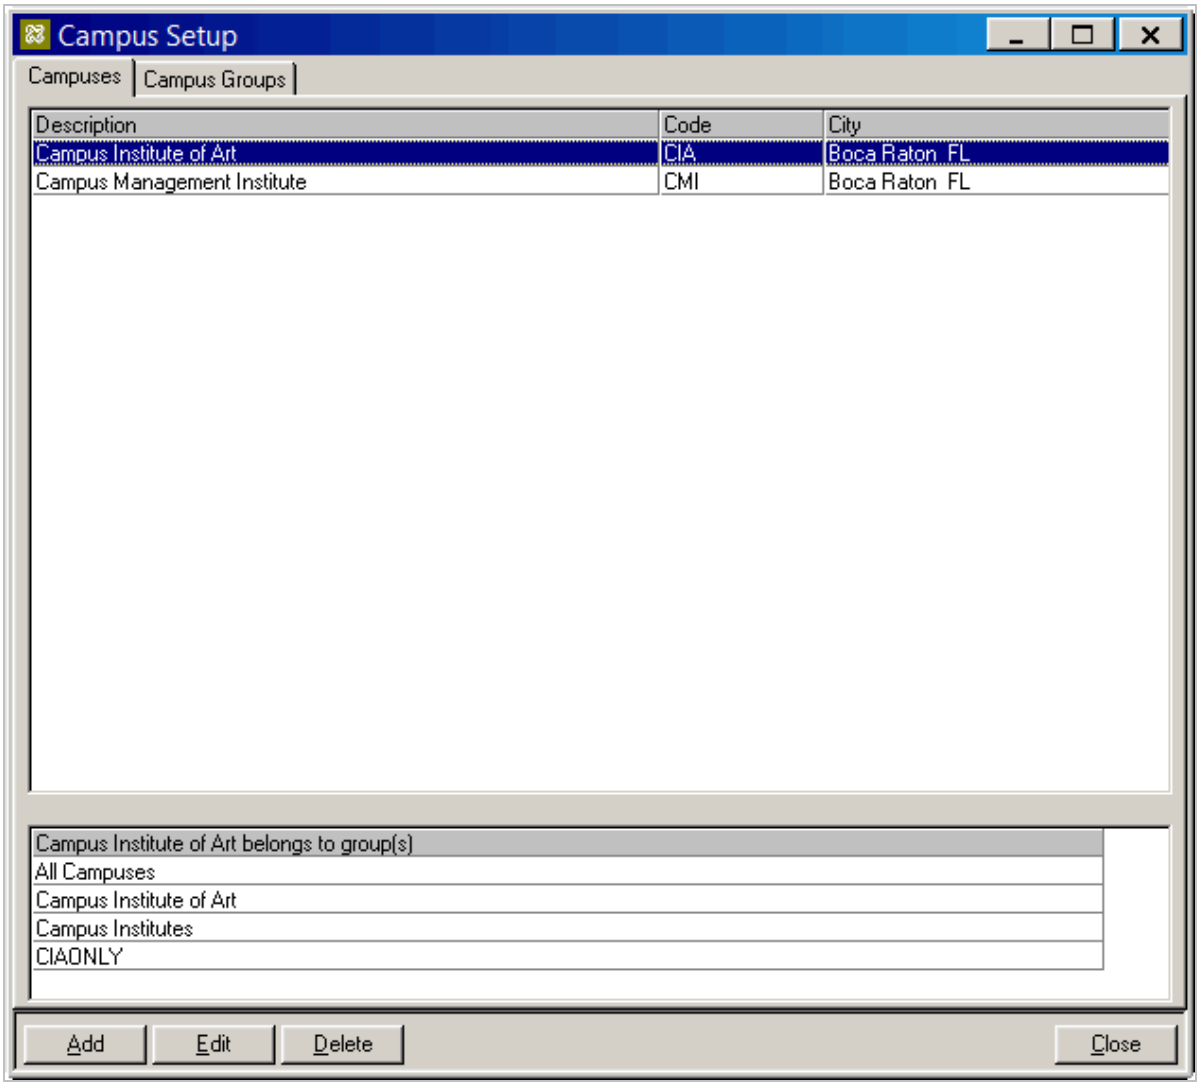
Note: If Enable CRM Integration is selected (Setup > Campus Locations > Add/Edit > Allow...) and you clear the CRM Integration check box (Setup > Settings > Integration), the following message is displayed: *CRM integration configured at the campus level will also be turned OFF. Do you want to continue?*

Campus Setup Form

CampusNexus Student requires that at least one campus is configured. The software comes with a default campus called Main which you can change when your system is installed. You can also add, edit, and delete campuses and campus groups.

To set up a campus or campus group:

1. As the system administrator, navigate to **Setup > Campus Locations**. The Campus Setup form is displayed.
2. On the Campuses tab, select a **campus**. You can set up each campus with the same or different configurations.



Note: When CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll (i.e., the selected GL/AP Package is "CampusNexus Finance"), campus information is passed from CampusNexus Student to CampusNexus Finance, HR & Payroll, for example:

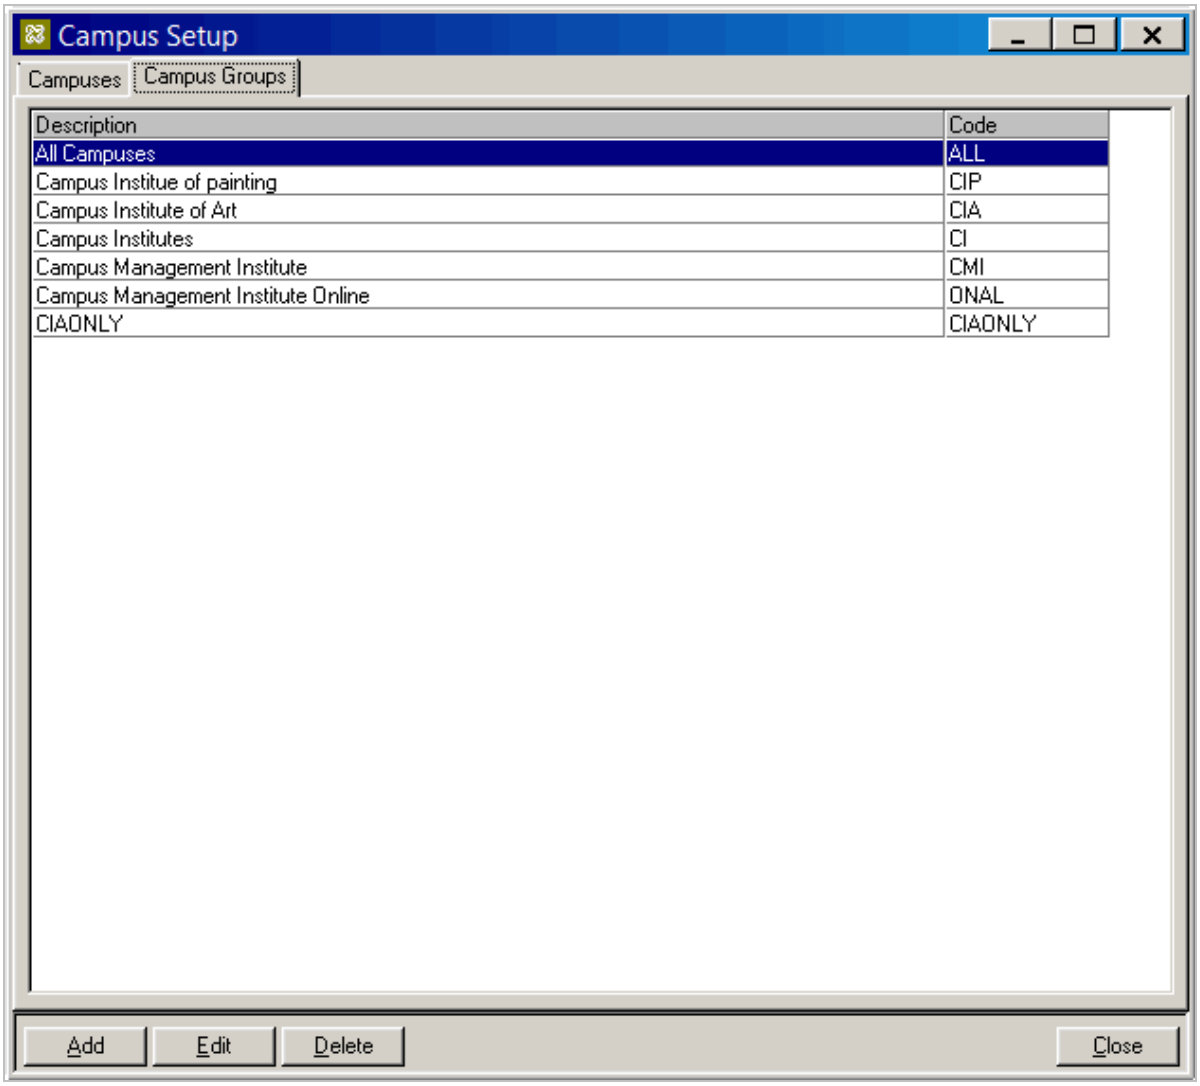
- If you create a campus with the proper GL Company Number, the Campus Code and Campus Description are passed to CampusNexus Finance, HR & Payroll and the same campus is created in CampusNexus

Finance, HR & Payroll.

- If you edit a Campus Description, the Campus Code and the changed Campus Description are passed to CampusNexus Finance, HR & Payroll, and the Campus Description is changed in CampusNexus Finance, HR & Payroll.
- If you delete a campus from CampusNexus Student, the same campus is deleted from CampusNexus Finance, HR & Payroll.

3. Click **Add** or **Edit**. The Campus Information form is displayed. Each tab contains options that can be configured for each campus. Specify appropriate data on each tab. For more information, see Campus Information form.
4. Click **Delete** to remove a campus. A confirmation message is displayed. Click **Yes**.

   Note: CampusNexus Student does not allow you to delete a campus that has been set up with data, such as staff member assignments, students enrolled, programs and courses set up, etc.
5. Click the **Campus Groups** tab to set up campus groups. For more information, see Add or Edit a Campus Group or Delete a Campus Group.



Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Campus Information Form

The Campus Information form is displayed when you navigate to Setup > Campus Locations, select a campus, and click Add or Edit. The Campus Information form contains the following tabs:

- Address
- Contact Info
- Accounting
- Financial Aid
- Options
- Allow...
- Academic Records
- Electronic Processing
- Transfer Options
- International
- Refunds & Stipends
- Career Services
- Housing
- Student Services

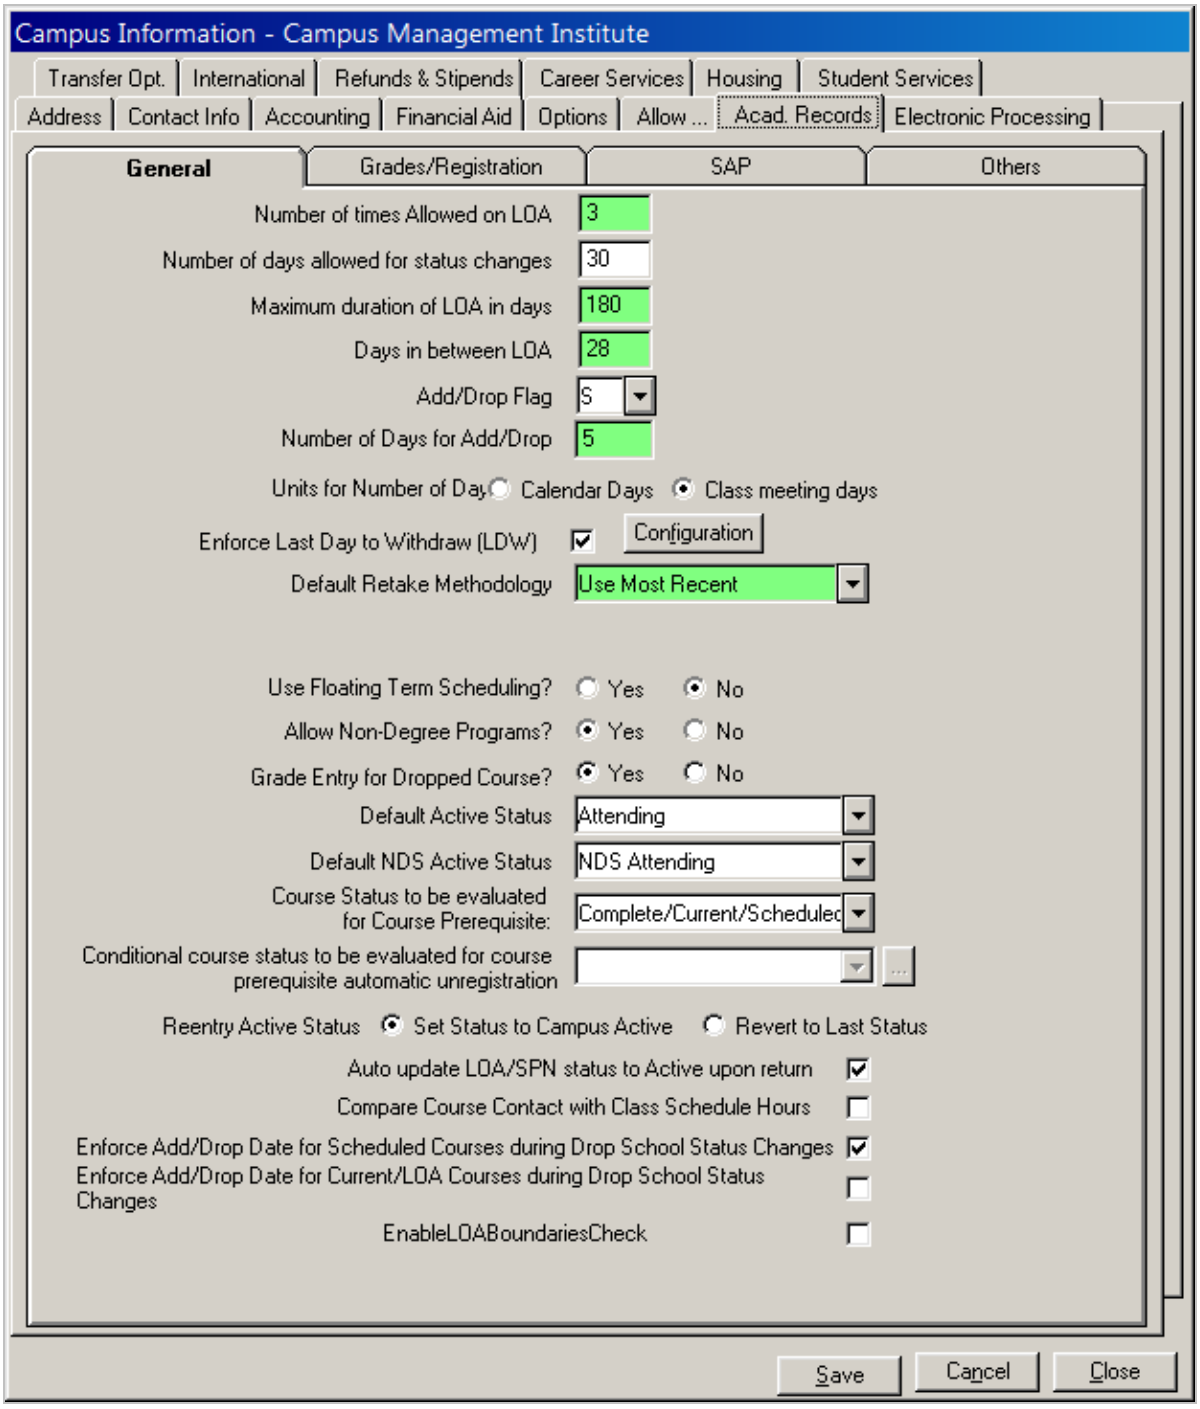
Each tab contains options that can be configured for each campus. Specify appropriate data on each tab. For more information, see the Help topics for each tab.

Campus Information - Academic Records Tab

Use the Acad. Records tab on the Campus Information form to set up basic information about your school's policies for certain student-related situations, e.g., leave of absences, course cancellation, and course retakes.

To add or edit academic records options for a campus:

1. Navigate to **Setup** > **Campus Locations** > select a campus > **Add/Edit** (button) > **Acad. Records** (tab).



2. Specify appropriate options. For more information, see the fields descriptions for the General, Grades/Registration, SAP, and Others sub tabs.
3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Field Descriptions: General Tab

Field	Description
Number of times Allowed on LOA	Enter the maximum number of times a student can take a Leave of Absence (LOA) from the school in each enrollment. 0 = unlimited.
Number of days allowed for status changes	Enter the number of days allowed to go back when setting the effective date for any status change.
Maximum duration of LOA in days	Enter the maximum number of days allowed for each Leave Of Absence. 0 = unlimited.
Days in between LOA	Enter the minimum number of days between Leaves of Absences. 0 = unlimited.
Add/Drop Flag	Select one of the following options: • Not Enforced (N) - default, campus does not enforce an add/drop date. • Campus Enforced (C) - enables an entry box where the user indicates the number of days after start date for the drop/add date for all terms for the campus location. • Term Enforced (T) - the add/drop date for the campus (specified during Term Setup) is enforced on a Term basis (each term defines a date). • Course Section Enforced (S) - the add/drop date for the campus is enforced based on the course section level.
Number of Days After Term Start Date for Add/Drop	This field becomes visible when 'C - Campus Enforced' is selected in the 'Add/Drop Flag' field. The 'Number of Days After Term Start Date for Add/Drop' value is the number of calendar days, starting with the day after the term start date, that are allowed for add/drop.
Number of Days for Add/Drop	This field becomes visible when 'S - Course Section Enforced' is selected in the 'Add/Drop Flag' field. The 'Number of Days for Add/Drop' value is the number of calendar days or class meeting days (depending on the Units for Add/Drop), starting with the course section's start date, that are allowed for add/drop.

Field	Description
Units for Number of Days are?	This field becomes visible when you select 'S (Course Section Enforced)' in the 'Add/Drop Flag' field. When a value is entered in the 'Number of Days for Add Drop' field, you must specify if the number of days are Calendar Days or Class meeting days.

Field	Description
Enforce Last Day to Withdraw	Select this check box to enforce last day to withdraw dates. When this feature is enabled, a last day to withdraw date is calculated for each course section offered at this campus. This does not mean "last day to withdraw and receive a non-punitive drop grade." This last day to withdraw date, once it has passed, will restrict staff users (who do not have override permission) and students from withdrawing from a course (moving a course from scheduled or current status to dropped). By default, this option is not selected. Before this feature can be turned on, you must ensure all Grade Scales associated with the campus have at least one general grade configured as a default 'After LDW Grade' and one Pass/Fail grade with a default 'After LDW Grade'. These grade settings are required to ensure that when school status changes to a dropped system status occur (if a course's LDW date is in the past), an appropriate non-drop grade will be posted to the course. If CampusNexus Student finds at least one grade scale without these two grades, the following message is displayed:  **Configuration (Enforce Last Day to Withdraw)** When Enforce Last Day to Withdraw is enabled, the LDW Configuration options are displayed. These options determine how CampusNexus Student calculates an LDW date for each course section.  • **Percentage of Course Length (in weeks) for LDW** allows you to enter the numeric percentage of course time allotted for withdrawals, i.e., the point at which course withdrawals are no longer allowed. For example, when you enter 80, an LDW date is calculated that falls after 80% of the course, in weeks, has passed. This value is then used to calculate the **Last Day of Withdrawal** for course sections during class scheduling. To calculate the percentage of course length in weeks for determining a LDW date, CampusNexus Student must first calculate the total number of weeks in the course. Institutions may have different methods of calculating course length in weeks depending on how they define the school week. The following additional configuration options enable you to define exactly how you prefer CampusNexus Student perform this calculation. Consider, as an example, a course section that starts on Wednesday, 4/1/09, and ends on Tuesday, 8/18/09, and you want to prohibit course withdrawals after 80% of the course has passed.

Field	Description
	• **Calculate Weeks Based on** allows you to configure how your institution defines weeks, and more specifically, how your institution wants CampusNexus Student to calculate the total number of weeks in the course. ◦ If **Start Day** is selected, the second week of the course starts on the 7th day after the course section's start date. Using the example course section noted above, if the course section's start date is Wednesday, 4/1/09, and **Start Day** is selected, then week 2 starts on Wednesday, 4/8/09. This also means that the last day of week 1 is Tuesday, 4/7/09. With this information, CampusNexus Student can then calculate the total course length as exactly 20 weeks. ◦ If **Standard Weeks** is selected, the next week starts the day after the selected **Last Day of Week**. So in this case, if the course section's start date is Wednesday, 4/1/09, and **Last Day of Week** is selected as Sunday, then week 1 ends on Sunday, 4/5/09 and week 2 starts on Monday, 4/6/09. With this information, CampusNexus Student can then calculate the total course length as 20 weeks and 2 days, which is rounded to 21 weeks. • **Set LDW to** allows you to select how CampusNexus Student sets the LDW date. ◦ If **Calculated Day** is selected, CampusNexus Student sets the course section's LDW date to the exact date calculated based on the Percentage of Course Length and Calculate Weeks Based on settings. Again, using the example course, this would translate to an LDW date of Tuesday, 7/21/09 (80% of the weeks based on start day = 16 weeks which equates to an exact LDW date based on the end of the 15th week), or Saturday, 7/25/09 (80% of the standard weeks = 16.8 weeks which equates to an exact LDW date on the 6th day after the 16th week). ◦ If **Last Day of Week** is selected, CampusNexus Student sets the course section's LDW date to the last day of the week (selected by the user in the next configuration option) following the exact calculated LDW date. So if the exact calculated LDW date is Tuesday, 7/21/09, and the Set LDW to setting is Last Day of Week and the Last Day of the Week setting is Sunday, then the LDW date set on the course section will be Sunday, 7/26/09. Or, if the exact calculated LDW date is Saturday, 7/25/09, and the Last Day of the Week setting is Sunday, then the LDW date set on the course section will also be Sunday, 7/26/09. • **Select Last Day of Week** allows you to select a day that is used as the last day of week when calculating LDW date. This field is required if Calculate Weeks Based on is configured to Standard Weeks, or Set LDW to is configured to Last Day of the Week. When this option is enabled, the default selection is Saturday. When you select the Enforce Last Day to Withdraw option, the following message is displayed:  • If you click No, the record is not saved and the Last Day to Withdraw feature remains off.

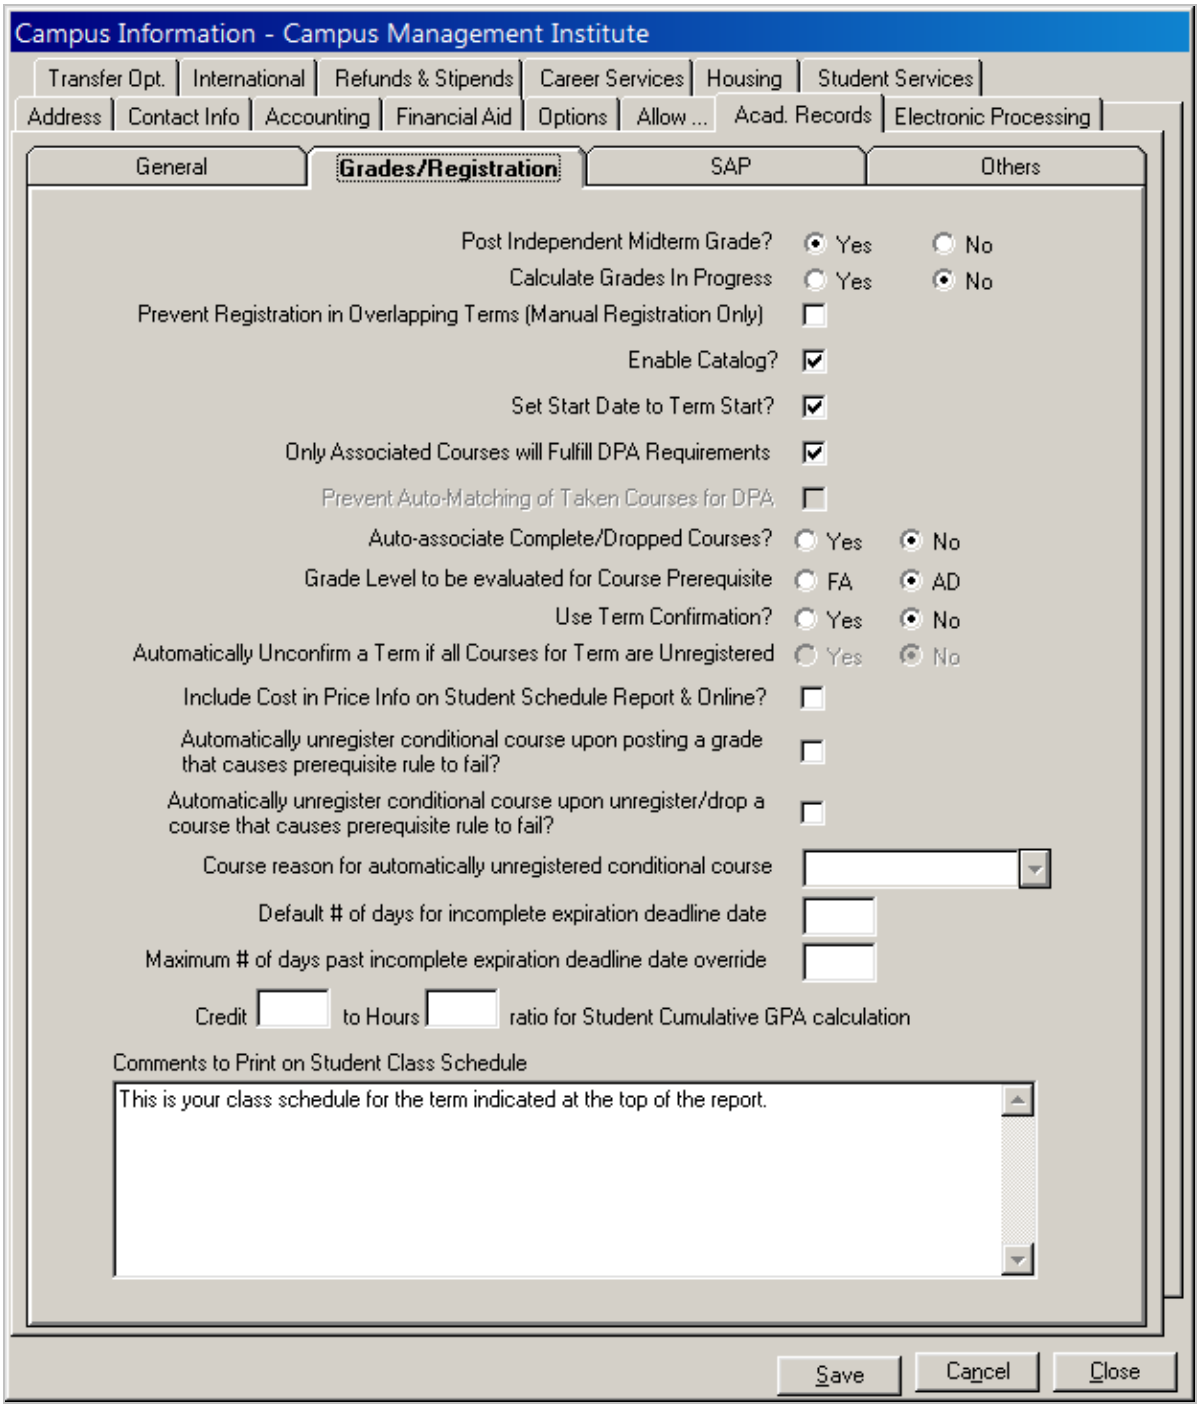
Field	Description
	• If you click Yes, an LDW date for all current and future course sections is calculated based on the LDW configuration settings and each course section's start and end dates. When you clear the Enforce Last Day to Withdraw option, the following message is displayed:  • If you click No, the record is not saved and the Last Day to Withdraw feature remains on. • If you click Yes, LDW dates for all course sections are deleted along with the LDW-related configurations for Attendance Rules and Auto Drops.
Default Retake Methodology	For courses that have been retaken, select the method by which CampusNexus Student is to count the grades in the GPA. The options are: • Average the grades for all retakes • Include all the grades • Use the highest of the grades for the course • Use the most recent of the grades for the course
Use Floating Term Scheduling?	Select Yes if your school offers uses floating term scheduling. The default is No. The value specified in this field is stored in SyCampus.FloatingTerm. • If the campus elects to use floating term scheduling, it can attach a single class to multiple terms. • If the campus is not using floating term scheduling, a scheduled class is attached to only one term.
Allow Non-Degree Programs?	Select Yes if your institution offers courses or programs for non-degree-seeking students. The default is No when you add a campus. See also Tracking NDS students.
Grade Entry for Dropped Course?	Select Yes if your school requires that a final grade be designated before allowing a student to drop a course. The default is No when you add a campus. **Note**: For batch status changes (Daily > Academic Records > Batch Status Change), when dropping multiple students, the default grade as set on the Grade Scale is applied. If no default grade is enabled, no grade is applied for dropped students in the batch.
Default Active Status	Select the default active status for degree-seeking students. This is the status to which students are changed when their first attendance is posted in a degree program. See Tracking NDS students.

Field	Description
Default NDS Active Status	Select the default active status for NDS students. This is the status to which students are changed when their first attendance is posted in a non-degree course or program. **Note**: Before you can select the Default NDS Active Status, you must set up your NDS School Status codes. See Tracking NDS students.
Course Status to be evaluated for Course Pre-requisite	Use this field to register a student for any class regardless of the status that the prerequisite may have; however, CampusNexus Student forces you to acknowledge a "Prerequisites Not Met" dialog box before completing the registration if the prerequisite does not have a complete status. To avoid using the prerequisite override property, you can define, at the campus level, which pre-requisite statuses (complete, current, or scheduled) do not require the override property. The choices are: • Complete – if the prerequisite status is complete, an override is not required. • Complete/Current – if the prerequisite status is complete or current, an override is not required. • Complete/Current/Scheduled – if the prerequisite status is complete, current or scheduled, an override is not required.
Conditional course status to be evaluated for course pre-requisite automatic unre-gistration	Use this field to configure any combination of the following conditional course statuses to be evaluated to allow automatic unregistration: Scheduled and/or Current. **Note**: This field is required if you selected one of the following options on the Grades/Registration tab: • Automatically unregister conditional course upon posting a grade that causes prerequisite rule to fail • Automatically unregister conditional course upon unregister/drop a course that causes pre-requisite rule to fail
Reentry Act-ive Status	Select an active school status for students upon reentry after attendance is first taken by choosing 'Set Status to Campus Active', or select 'Revert to Last Status'.
Auto update LOA/SPN status to Act-ive upon return	Use this option to automatically update a student's school status from a Leave of Absence (LOA) or a Standard Period Non-Enrollment (SPN) to the student's last "active" status when attendance is pos-ted. **Note**: This update will not occur unless the student's LOA period has ended. If the student is returning from an LOA period early, LOA dates must be manually adjusted to ensure that attendance is available for posting on the Daily and View menus.
Compare Course Contact with Class Sched-ule Hours	Use this option to compare class hours scheduled to the contact hours configured at the course level.

Field	Description
Enforce Add/Drop Date for Scheduled Courses during Drop Status Changes	Use this option to restrict the unregistration of Scheduled status course if the add/drop date of the course sections has passed. This setting only applies when processing a school status change to any new school status that belongs to a system status of Drop. **Note**: When determining if the school status change occurs before or after a scheduled status course's add/drop date, CampusNexus Student uses the NSLDS Withdrawal Date.
Enforce Add/Drop Date for Current/LOA Courses during Drop Status Changes	Use this option to restrict the unregistration of Current/LOA status course if the add/drop date of the course sections has passed. This setting only applies when processing a school status change to any new school status that belongs to a system status of Drop.

Field	Description
Only change status of courses within LOA period	When this feature is enabled, CampusNexus Student automatically changes courses in Current and Scheduled status only when the course dates fall within the LOA period to LOA status. It additionally updates each course's status to the appropriate status when a student returns to an Active status category after a Leave of Absence (LOA) period ends. The automatic status change applies only to registered courses in Current and Scheduled statuses. When this feature is disabled, all current and scheduled courses change to an LOA status when a student takes a leave of absence. Each of those courses then needs to be reinstated through the interface individually when the student returns from the LOA. Enabling this feature removes the burden on administrators and registrars to manually reinstate courses on the student's schedule when the student returns from an LOA. CampusNexus Student applies the following rules to the automatic status change: • If the course was in Scheduled status before the LOA and the student returns before the course end date, the course status is changed from LOA to Scheduled. • If the course was in Current status before the LOA and the student returns before the course end date, the course status is changed from LOA to Current. • If the course end date is prior to the LOA end date, the course remains in LOA status. • If any days within the start and end dates of Current and Scheduled course fall within the LOA date range, the course status is changed to LOA. • If a student posts attendance in a course that is in LOA status, the course status is changed from LOA to Current. The automatic status change also applies when the LOA return date is extended or shortened on the Status Change form: • When the LOA return date is extended, if a course start date did not fall within the original LOA date range but now does, that course status is automatically changed to LOA. • When the LOA return date is shortened, if a course start date did originally fall within the LOA date range but now does not, that course status is automatically changed to its original status. CampusNexus Student also updates course statuses that go from a particular LOA status to another LOA status. For an LOA that begins in the future, perform the following procedure: 1. Specify the student's LOA begin date on the Status Change form and click Save. 2. On the LOA begin date, manually execute the stored procedure (SP) `c2ksp_AdStatusChange_CheckFuture`. After running this SP, student status changes to LOA and all Current courses change to LOA. **Notes**: • If course status change requires course instances to be added, manually update the courses that fall within that scenario. CampusNexus Student does not automatically add future instances of courses.

Field	Description
	• For a course that cannot be completed because the end date of the course falls within the LOA period, the course status does not revert back to its original status. In this case the administrator/registrar needs to add a future course instance manually. This ensures that courses that cannot be completed are not used in SPE calculations. • For courses that remain in LOA status after the automatic status changes, institutions need to apply their own policies with regard to charges for those courses. Any status changes from Active to LOA are captured chronologically in the CampusNexus Student audit.



Field Descriptions: Grades/Registration Tab

Field	Description
Post Independent Midterm Grade?	Select Yes if your institution wants to post midterm grades that are independent of final grades. The default is No when you add a campus.
Calculate Grades in Progress	Select Yes to allow current grades to be viewed and calculated. This functionality is enabled in Gradebook, Student Lesson Schedules and Reports. The default is No.

Field	Description
Prevent Registration in Overlapping Terms (Manual Registration Only)	Select this option to prevent registration for overlapping terms. This applies to manual registration only.
Enable Catalog	Select this option to tie courses to a catalog. See also Programs, Program Versions, Areas of Study, Applicant, Enroll Student and Batch Catalog Assignment tool. **To disable/enable a catalog**: **Note**: The following messages may be displayed when you try to disable a catalog and you cannot disable it: a. When a student is enrolled in a program version with both Campus A and Campus B checked, and the catalog is enabled in both campuses in Campus A and the student is enrolled in the program version with both Campus A and Campus B checked with the catalog enabled in both campuses in campus B, then navigate to Setup > Campus Locations > Edit Campus B - OR - navigate to Campus A > Academic Records > Grades and Registration and disable the catalog. The following message is displayed: *This campus has students enrolled using one or more catalogs. The catalog function cannot be turned off.* b. Remove the catalog associated with Campus B from the Enrollment form, navigate to Setup > Campus Locations > Edit Campus B > Academic Records > Grades and Registration, and disable the catalog. The following message is displayed: '*This campus has program versions using one or more catalogs. The catalog function cannot be turned off.*' Navigate to Setup > Campus Locations > Edit Campus A > Academic Records > Grades and Registration and disable the catalog. The following message is displayed: *This campus has students enrolled using one or more catalogs. The catalog function cannot be turned off.*

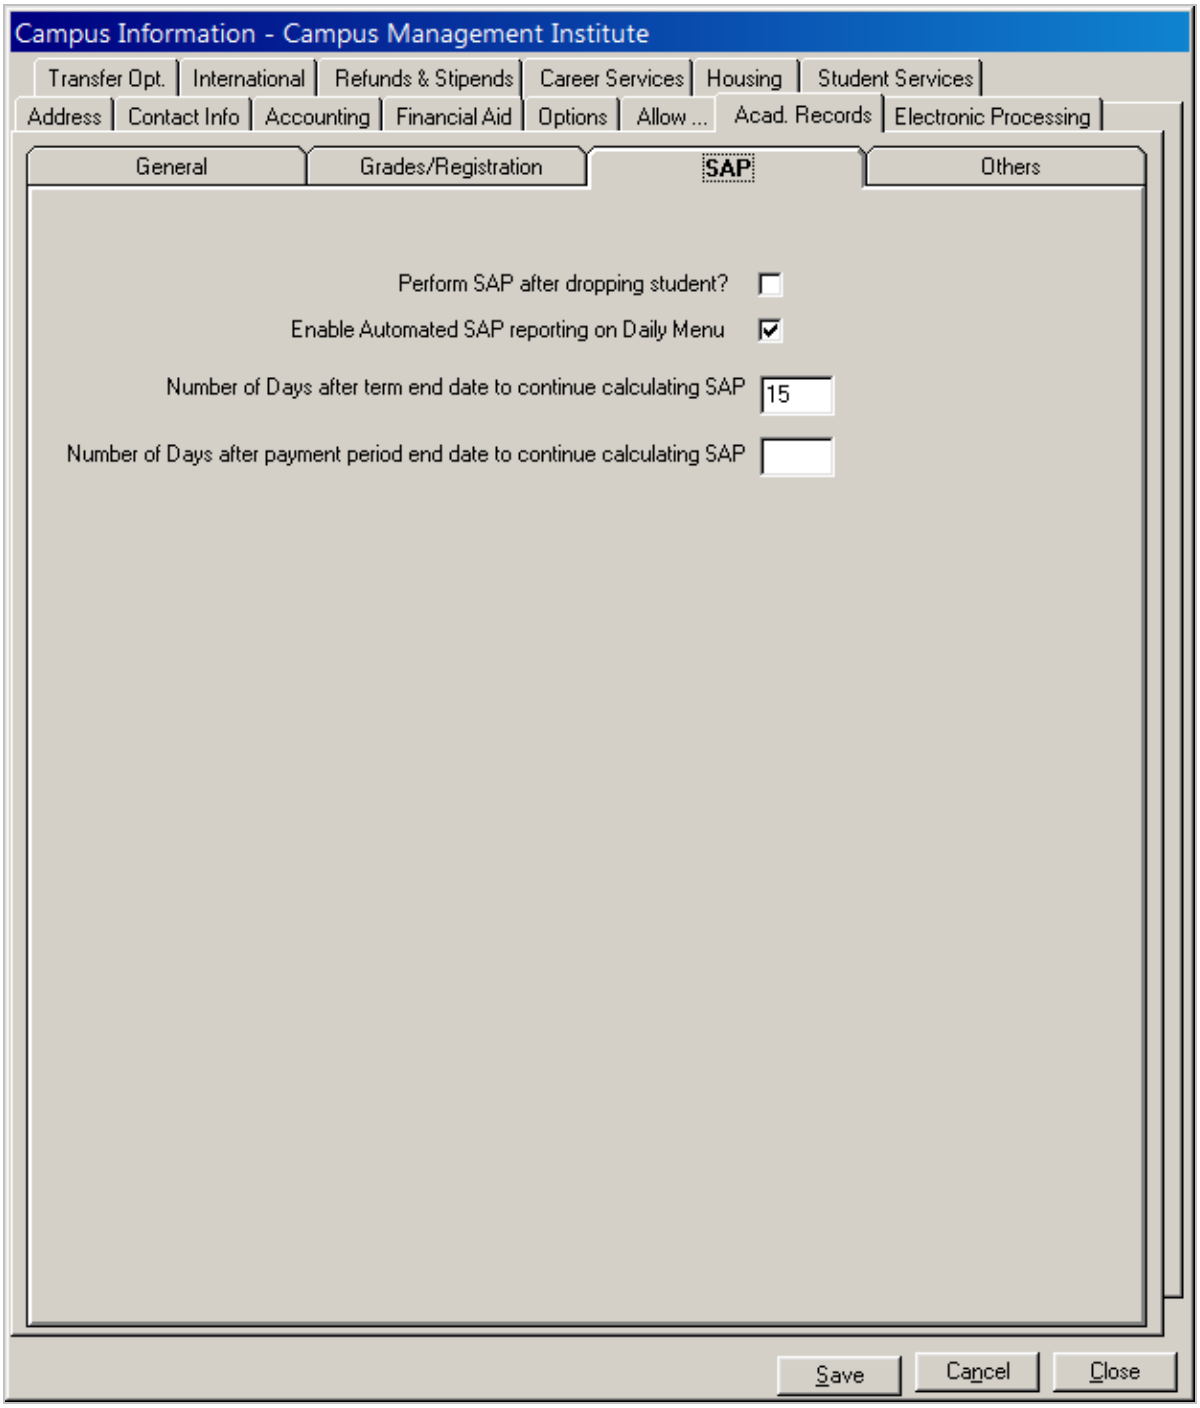
Field	Description
Set Start Date to Term Start?	Select this option to set the start date for the enrollment to the Term Start date for the first class the student attends. This option compares the version start date to the term start date to ensure that start dates are accurate and meaningful in term-based schools. The value is stored in SyCampus.SetTermStart. *Example* If Term 0501 starts on 01/03/2008, and a new student registers for a Term 0501 class which meets on WED and FRI, when attendance is recorded for the class on Wednesday, 01/05/2008: • If this check box is selected, the Enrollment Start date is set to 01/03/2008. • If this check box is cleared, the Enrollment Start date is set to 01/05/2008. If this option is not selected, the version start date is same as the day as when positive attendance gets posted. **Note**: For Reentry with Active Units of "Attendance Recorded" configuration of program version, upon status change to active, a record must be inserted into enrollment status history and the begin date must be populated with the date when positive attendance gets posted and sum of positive attendance is equal to or more than the active unit configuration. The date of the positive attendance has to be on or after the reentry date. If it's before the reentry date, the status will not be set to active. Version Start Date are updated only if enrollment record does not have it. If it's there, it won't be updated. When version start date gets updated, "Set Start date to term Start" configuration is taken into consideration.
Only Associated Courses will Fulfill DPA Requirements	Select this check box to configure CampusNexus Student to ONLY auto-match courses that are associated (**associated course**[1]). The check box is cleared by default. Selecting this check box automatically disables the option Prevent Auto-Matching of Taken Courses for DPA. A user can see courses fulfilled on the actual DPA only if the courses were associated when CampusNexus Student was configured to do so. In the case of multiple enrollments across different campuses, the student's enrollment campus configuration is taken into consideration.

[1]A course with a status of Completed or Dropped that is linked to an enrollment other than, and in addition to, the student's original enrollment.

Field	Description
Prevent Auto-Matching of Taken Courses for DPA	Select this check box to prevent **auto-matching**[1] of **taken course**[2]s in other enrollment(s). The check box is cleared by default. If the check box is selected, the Only Associated Courses will Fulfill DPA Requirements option is disabled. When configured to prevent auto-matching of taken courses, CampusNexus Student does not auto-match required courses on the actual DPA form. In the case of multiple enrollments across different campuses, the student's enrollment campus configuration is taken into consideration.
Auto-associate Completed/Dropped Course?	Select Yes to Auto-Associate Complete/Dropped courses to other enrollments that share the same course requirements. If this is set to Yes, courses are auto-associated when grades are posted and when Enrollment and/or Area of Study changes are made. The default is No.
Grade level to be evaluated for Course Prerequisite	Select FA (Financial Aid) or AD (Academic Records) to associate grade levels to be evaluated for course prerequisites.
Term Confirmation	Set the Use Term Confirmation and Automatically Unconfirm a Term if all Courses for Term are Unregistered options as defined in Term Confirmation.
Automatically unregister conditional course upon posting a grade that causes prerequisite rule to fail?	Select this check box if a conditional course is automatically unregistered when a grade is posted that causes the prerequisite rule to fail. The default is No.
Automatically Unconfirm a Term if all Courses for Term are Unregistered	Select Yes if CampusNexus Student automatically unconfirms a term when all courses for that term are unregistered. The default is No.
Include Cost in Price Info on Student Schedule Report & Online	Select this check box to include the cost with the available price information on the Student Schedule Report and online.
Automatically unregister conditional course upon unregister/drop a course that causes prerequisite rule to fail?	Select this check box if a conditional course is automatically unregistered when an action occurs that causes the prerequisite rule to fail (e.g., dropped/unregistered course). By default this field is cleared.
Course reason for automatically unregistered conditional course	Use this field to configure the course reason that will be applied upon automatic unregistration if either of the automatic unregistration options above is set to Yes. By default this field remains blank.

[1]Degree Progress Audit logic that automatically matches course requirements from one enrollment with taken courses of other enrollments.
[2]A course with a status of Scheduled, Current, Completed, or Dropped.

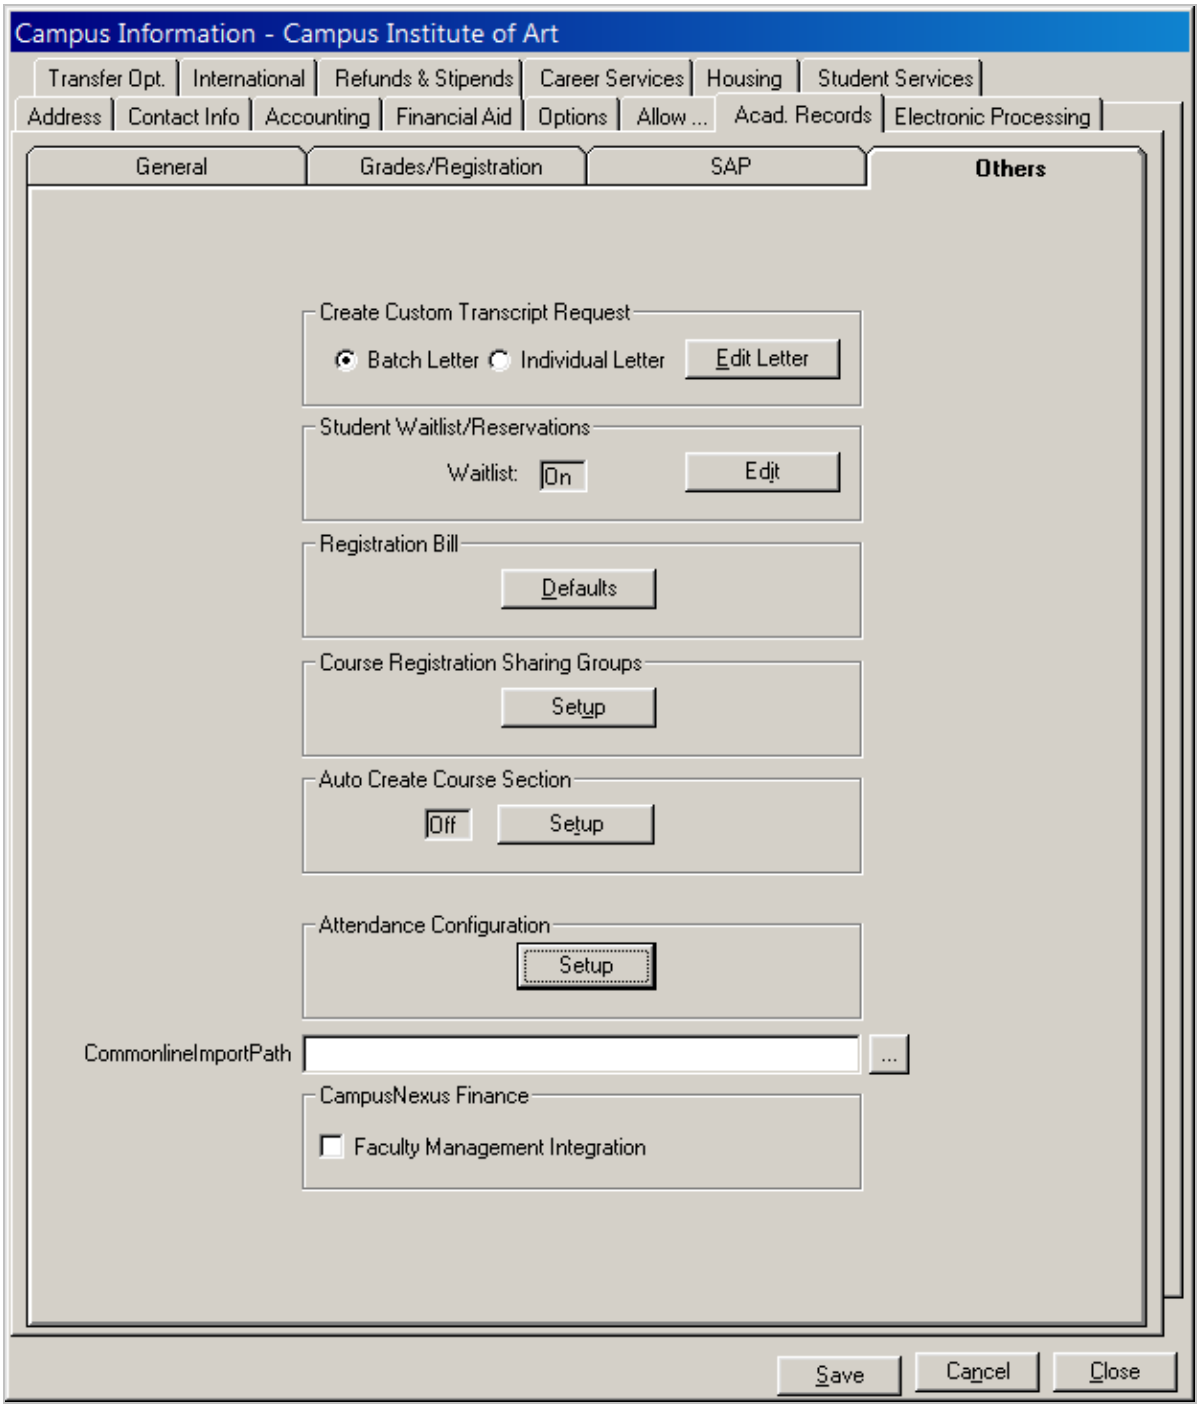
Field	Description
Default # of days for expiration deadline date	Enter the number of days your institution allows students who receive an Incomplete to finish the coursework required to complete a course after the course's end date.
Max # of days past expiration deadline date override	Provide the number of days past the expiration deadline date that you allow your instructors or staff to override the default date (provided above).
Credit to Hours ratio for Student Cumulative GPA calculation	Populate the Credit field with the number of credits that correspond to the number of Hours in a Clock Hours program version to ensure that the Cumulative GPA is calculated correctly for students enrolled in a Credit Hour program version and a Clock Hour program version. It is configurable on a campus by campus basis for situations where outside agencies dictate different credit to hour ratios.
Comments to Print on Student Class Schedule	Enter any comments to be included on all student schedules printed for the selected campus. The default is No when you add a new campus.



Field Descriptions: SAP Tab

Field	Description
Perform SAP after dropping student?	Select Yes to calculate SAP for any student who has dropped. The default is No (to skip SAP calculation).

Field	Description
Enable Automated SAP reporting on Daily Menu	Select this option when the campus uses Automated SAP Reporting and wants to allow viewing of the results of Automated SAP Processing. When this check box is selected, the menu item Review Automated SAP Results is displayed when the Daily > Academic Records menu is selected.
Number of Days after term end date to continue calculating SAP	When a campus uses Automated SAP Processing or wants to limit the time period during which manual calculations can be performed, enter the number of days after a term end date during which Automated SAP processing should occur. Once this value has been exceeded, automatic or manual SAP processing no longer occurs, unless you have the authority to override this setting. If the field is blank, manual processing may be done at any time but no Automatic SAP processing occurs.
Number of Days after payment period end date to continue calculating SAP	When a campus uses Automated SAP Processing or wants to limit the time period during which manual calculations can be performed, enter the number of days after a payment period end date during which Automated SAP processing should occur. Once this value has been exceeded, automatic or manual SAP processing no longer occurs, unless you have the authority to override this setting. If the field blank, manual processing may be done at any time but no Automatic SAP processing occurs.



Field Descriptions: Other Tab

Field	Description
Create Custom Transcript Request	Select Batch Letter or Individual Letter and - if needed - click **Edit** to modify the letter.

Field	Description
Student/Waitlist Reservations	Click **Edit** to enable the wait list option and/or modify the wait list default settings. This feature may be used in conjunction with the Auto Create Course Section feature. • When the Student/Waitlist Reservations flag is disabled (Off), reservations for classes are not permitted. • When the Student/Waitlist Reservations flag is enabled (On), reservations for classes are permitted. For more information, see Student Waitlist Defaults.
Registration Bill	Click **Defaults** to configure registration bill defaults. For more information, see Registration Bill Defaults.
Course Registration Sharing Groups	Click **Setup** to configure course registration sharing groups. For more information, see Course Registration Sharing Groups.
Auto Create Course Section	When registering a student, if the student is registered in a course where the threshold for 'Remaining Seats in a Current Section' or 'Remaining Seats on a Waiting List' is met by adding the student, CampusNexus Student automatically creates a new Class Schedule (section), and informs you hat a new section was added if the Auto Create Course Section flag is set to 'On'. CampusNexus Student changes the flag from 'Off' to 'On' if the 'Allow Auto Add Course Section?' flag is activated and Auto Add Course Section Setup configurations have been entered (click **Setup** to activate this feature) and saved. These settings are used inPortal for online courses only.

Field	Description
Attendance Configuration	Click **Setup** to access the Attendance Configuration form.  **Field Descriptions: Attendance Configuration** **Field** / **Description** Allow Makeup Hours? — Select this check box to allow makeup hours. Update LDA with Makeup Date? — Select this check box to update the last day of attendance (LDA) with the makeup date. **Note**: This option becomes available after Allow Makeup Hours? is selected. Retain LDA on Unregistered Courses? — Select this check box to keep the course LDA when unregistering a course, even though attendance is being removed. If this check box is cleared, the course LDA is lost and the LDA are reset to the last date the student was in attendance in courses other than the unregistered course. This setting is in effect for the entire campus unless overridden by a 'Retain LDA on Unregistered Courses' setting for a specific course reason code or term. Custom Message? — When you select this check box, the associated text box is enabled so that you can edit the default message and save the modified, custom message of up to 2000 characters. If the check box is not selected, the text box remains populated with the default message.
Batch Transcript Print Path	Click ... to select the appropriate path.

Field	Description
Faculty Management Integration	This campus-level option is available only if the global Faculty Management Integration flag is enabled on the Academic Records Settings - General Tab. If both the global and campus-level Faculty Management Integration flags are enabled, the synchronization of courses taught by an instructor and related details affects only campuses in which the campus-level flag is enabled.

Course Registration Sharing Groups

Course Registration Sharing Groups (CRSG) provide the means for a campus to share a course with another campus so that students have additional options for registering for course sections that may be filled or inconveniently scheduled at their regular campus.

The sponsoring campus (the campus that owns the course) settings for the course determine when students from other campuses can view shared course sections and when students can register into the shared course sections.

The Course Registration Sharing Groups feature is enabled or disabled system-wide under Setup > Academic Records > Student Registration. If 'Yes & Use CRSG (Course Registration Sharing Groups)' is enabled, CampusNexus Student users can share access to courses offered at other campuses.

Prerequisites:

a. Users must have access to the campuses involved (enabled under Setup > Staff > *staff member*> Staff Information > User Info tab).

b. Terms must be Active and enabled for the campuses involved (enabled under Lists > Academic Records > Term tab > Edit > Campuses field).

c. Courses must be Active and shared to the campuses involved (enabled under Lists > Academic Records > Courses tab > Edit > Campuses).

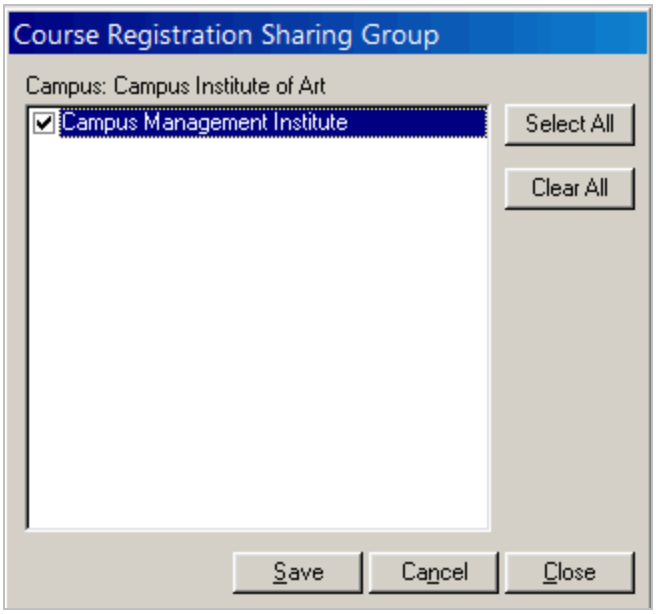
d. Course Sharing Start and End dates and times must have valid dates entered for all columns on the grid (Daily > Academic Records > Schedule Classes > select a class schedule > Publish Schedule).

e. Class schedules must be shared with the desired campuses (Daily > Academic Records > Schedule Classes > select a class schedule > Edit > Course Sharing list).

The campus list for Course Sharing is available only if all prerequisites are met. The campus list will include only those campuses that meet all the criteria involved.

To enable course registration sharing groups:

1. Navigate to **Setup** > **Campus Locations** > select a campus > **Add/Edit** (button) > **Acad. Records** (tab) > **Others** (tab).
2. On the Others tab under Course Registration Sharing Groups, click **Setup**. The Course Registration Sharing Group form is displayed.



3. Select the campuses that will be sharing courses.
4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

To enable users for CRSG:

1. Navigate to **Setup > Staff**, select a staff member from the list, and click **Edit**. The Staff Information form is displayed.
2. On the **User Info** tab set up the options that are required for this user. Each user must have permissions for the sponsoring campus and the sharing campus. The users must also have the appropriate permissions for the functions for their job tasks. See Staff Member-Add for further details.

When a user at a sponsoring campus is scheduling courses, the user can schedule courses from the sponsoring campus only, but can remove at the section level other campuses listed in the CRSG.

Registration Groups are not supported for courses being offered by other campuses. Students can register based on their home school registration group rules. Class sections offered by other campuses are available for registration only if the home campus has indicated "online registration start dates" for the term in which the class is scheduled.

Course Registration Sharing and Course Section Add/Drop Date Enforcement

Course registration can take place from multiple locations within CampusNexus Student and course sections can be shared between multiple campuses. Regardless of where course registration is initiated, during the registration process, the Add/Drop flag for the student (in relation to the course being registered) depends on the Academic Records system level setting for Add/Drop enforcement (Setup > Academic Records > Settings tab). Based on whether Add/Drop enforcement is configured as 'Student's enrollment campus' or 'Course section's campus', the appropriate campus is checked to determine what type of add/drop validation needs to take place, if any. If an add/drop policy is configured, CampusNexus Student calculates the add/drop date.

The logic to determine the add/drop date is as follows:

a. The Academic Records system level setting ('Campus for add/drop?') is used to determine which campus to use when determining the add/drop policy: the 'Student's enrollment campus' or the 'Course section's campus'.
b. The Add/Drop flag for the campus designated in the Academic Records system level setting is checked.

c. If the Academic Records system level setting is configured to use the 'Student's enrollment campus' and the 'Add/Drop Flag' of the student's enrollment campus is set to 'S - Course Section Enforced', CampusNexus Student enforces the add/drop policy of the course section's campus. If the 'Add/Drop Flag' for the student's enrollment campus is different than 'S - Course Section Enforced', the student's enrollment campus is used.

d. If the Academic Records system level setting is configured to use the 'Course section's campus', the same campus's policy is used.

e. When the appropriate campus and add/drop flag configurations have been determined, the add/drop date is calculated as follows:

Add/Drop Flag Configurations

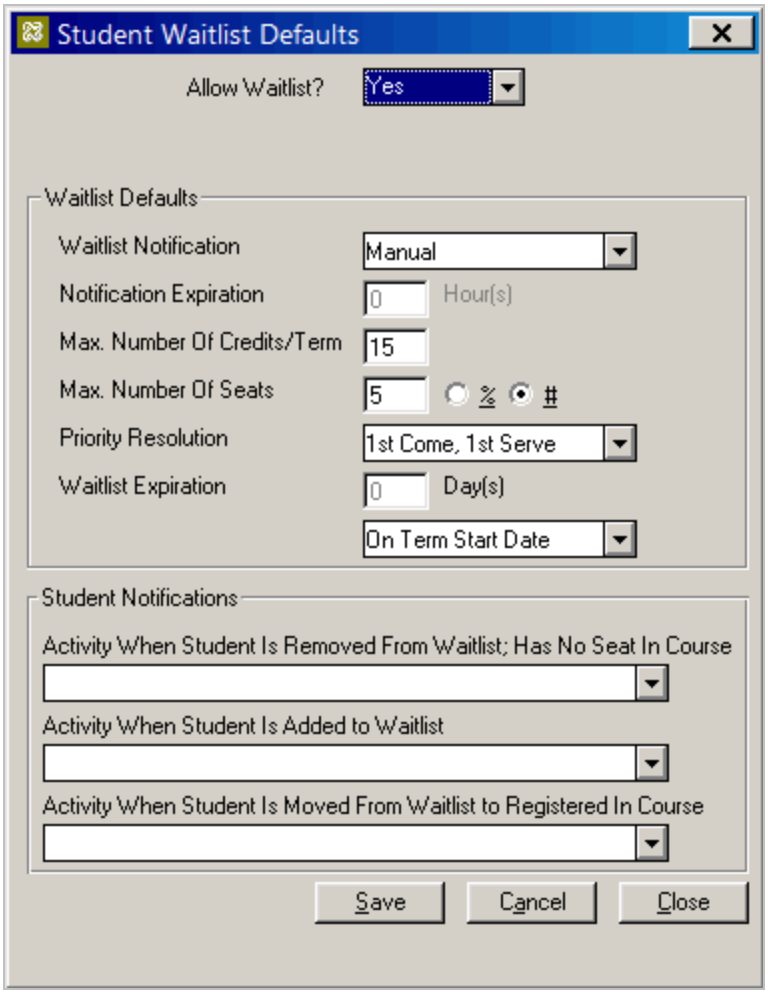
If the 'Add/Drop Flag' is...	...calculate the add/drop date as follows:
N - Not Enforced	...there is no add/drop date because one is not being enforced.
C - Campus Enforced	...the add/drop date is being enforced by campus (the campus that was determined above). Calculate the add/drop date by adding the number of days after the start date configured at the campus level to the course section's term start date.
T - Term Enforced	...the add/drop date is being enforced by term. Obtain the add/drop date configured at the term level for the course section's term.
S - Course Section Enforced	...the add/drop date is being enforced by course section. Obtain the add/drop date configured at the course section level for the appropriate course section.

Student Waitlist Defaults

You can configure the waitlist defaults for course reservations. See also Class Schedule.

To configure waitlist defaults:

1. Navigate to **Setup** > **Campus Locations** > select a campus > **Add/Edit** (button) > **Acad. Records** (tab) > **Others** (tab).
2. On the Others tab under Student/Waitlist Reservations, click **Edit**. The Student Waitlist Defaults form is displayed.



3. Specify appropriate options. For more information, see Field Descriptions.
4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Field Descriptions

Field	Description
Allow Waitlist?	Select Yes to allow a waitlist/reservations for selected classes, otherwise select No.

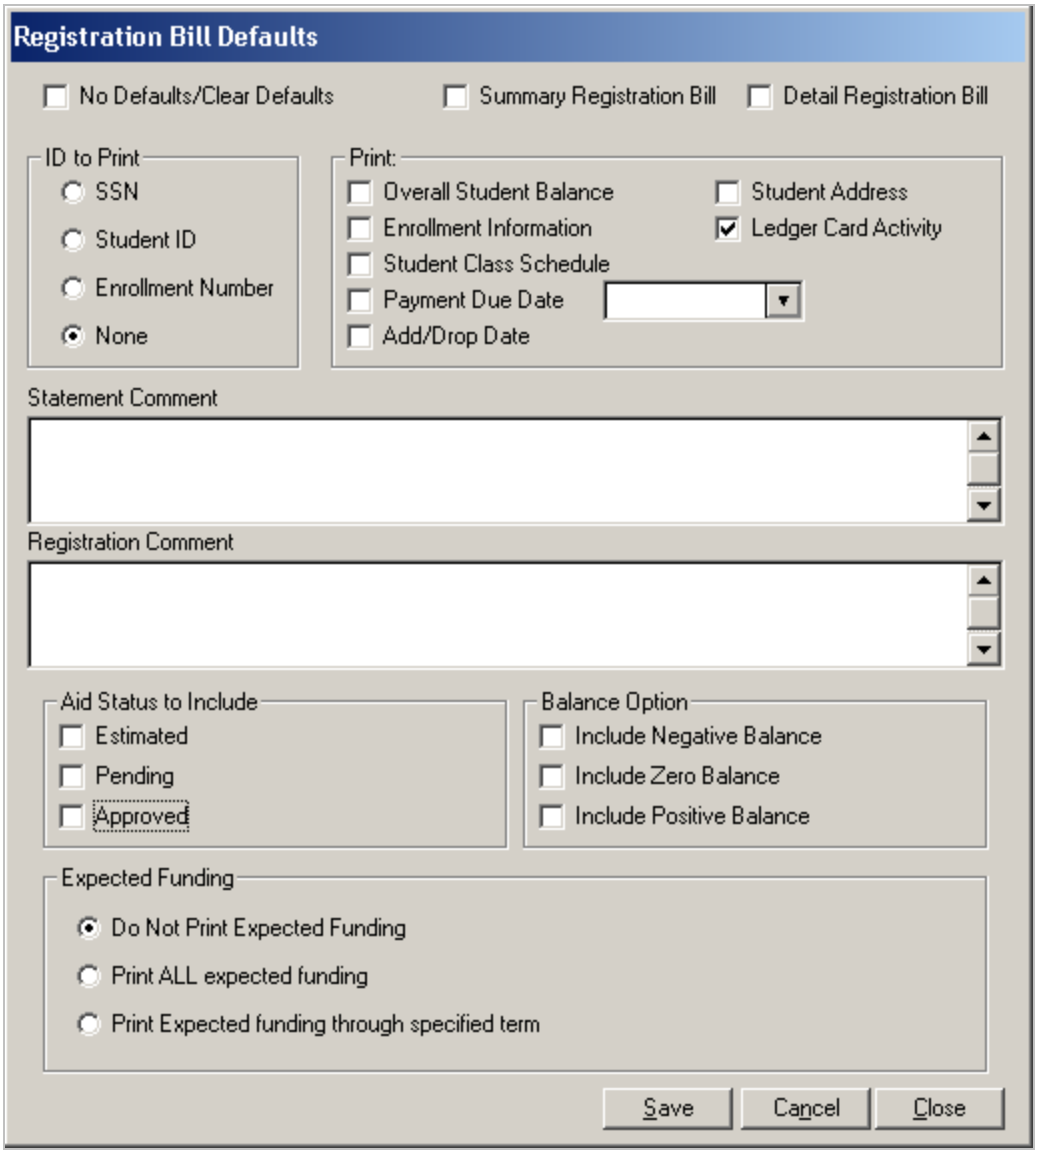
Field	Description
Waitlist Notification	Select Automatic or Manual.
Notification Expiration	Specify the number of hours for the waitlist notification to expire.
Max. Number Of Credits/Term	Specify the class maximum number of credits/terms that must be fulfilled before being considered for a waitlist. This number is derived by taking the maximum number of seats multiplied by the maximum number of credits for a class. For example, if you offer 3 credit classes, you would take 5 (maximum number of seats) and multiply by 3 credits to get 15 maximum number of credits/terms.
Max. Number Of Seats	Specify the maximum number of seats assigned to the waitlist. If you want the number entered to be a percentage, select the percentage (%) option, otherwise select (#).
Priority Resolution	Select one of the following options: • 1st Come, 1st Serve • Cumulative Credits • GPA
Waitlist Expiration	Specify the number of days for the waitlist to expire and select one of the following options to indicate what the expiration date is based on: • On Term Start Date • After Term Start Date • Before Term Start Date • On Add/Drop Date for Term • After Add/Drop Date for Term • Before Add/Drop Date for Term
Activity When Student is Removed From Waitlist; Has No Seat in Course	Select one of the following activities to indicate when the student is removed from the waitlist: • FA Verification Dependent • Send waitlist email to student
Activity When Student is Added to Waitlist	Select one of the following activities to indicate when the student is added to the waitlist: • FA Verification Dependent • Send waitlist email to student
Activity When Student Is Moved From Waitlist to Registered in Course	Select one of the following activities to indicate when the student is moved from the waitlist to a registered course: • FA Verification Dependent • Send waitlist email to student

Registration Bill Defaults

The Print Registration Bill buttons on the student schedule and ledger card are not enabled unless defaults for the report have been defined for the campus. The defaults that you define here are also used in the Registration Wizard, but can be changed when running the report.

To configure registration bill defaults:

1. Navigate to **Setup** > **Campus Locations** > select a campus > **Add/Edit** (button) > **Acad. Records** (tab) > **Others** (tab).
2. On the Others tab under Registration Bill, click **Defaults**. The Registration Bill Defaults form is displayed.



3. Specify appropriate options. For more information, see Field Descriptions.
4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Field Descriptions

Field Label	Description
No Defaults/Clear Defaults	Select this check box if no defaults are to be specified or to clear the current default values.
Summary Registration Bill Detail Registration Bill	Select Summary Registration Bill to generate the standard (summary) student registration bill report. Select Detail Registration Bill to generate a detailed student registration bill report. You may select Summary, Detail, or both; you **must** select at least one option.
ID to Print	Select one of the following that you want printed on the form: • SSN (Social Security Number) • Student ID • Enrollment Number • None
Print	Select the information to be printed: • Overall Student Balance • Enrollment Information • Student Class Schedule • Payment Due Date • Add/Drop Date • Student Address • Ledger Card Activity
Statement Comment	Enter a comment that you want printed at the top of each statement.
Registration Comment	Enter a comment that you want printed with the registration information.
Aid Status to Include	Select the aid status to include: • Estimated • Pending • Approved
Balance Option	Select one or more of the following options to specify how the Summary and Detail reports are to be filtered: • Include Negative Balance • Include Zero Balance • Include Positive Balance
Expected Funding	Select one of the following fund types to print: • Do Not Print Expected Funding • Print ALL expected funding • Print Expected Funding through specified term

Auto Add Course Section Setup

Many institutions offer online course sections that are administered without the constraints of traditional course sections. Although online classes have maximum seat counts, institutions create new sections as demand for online courses justifies the need for a new section.

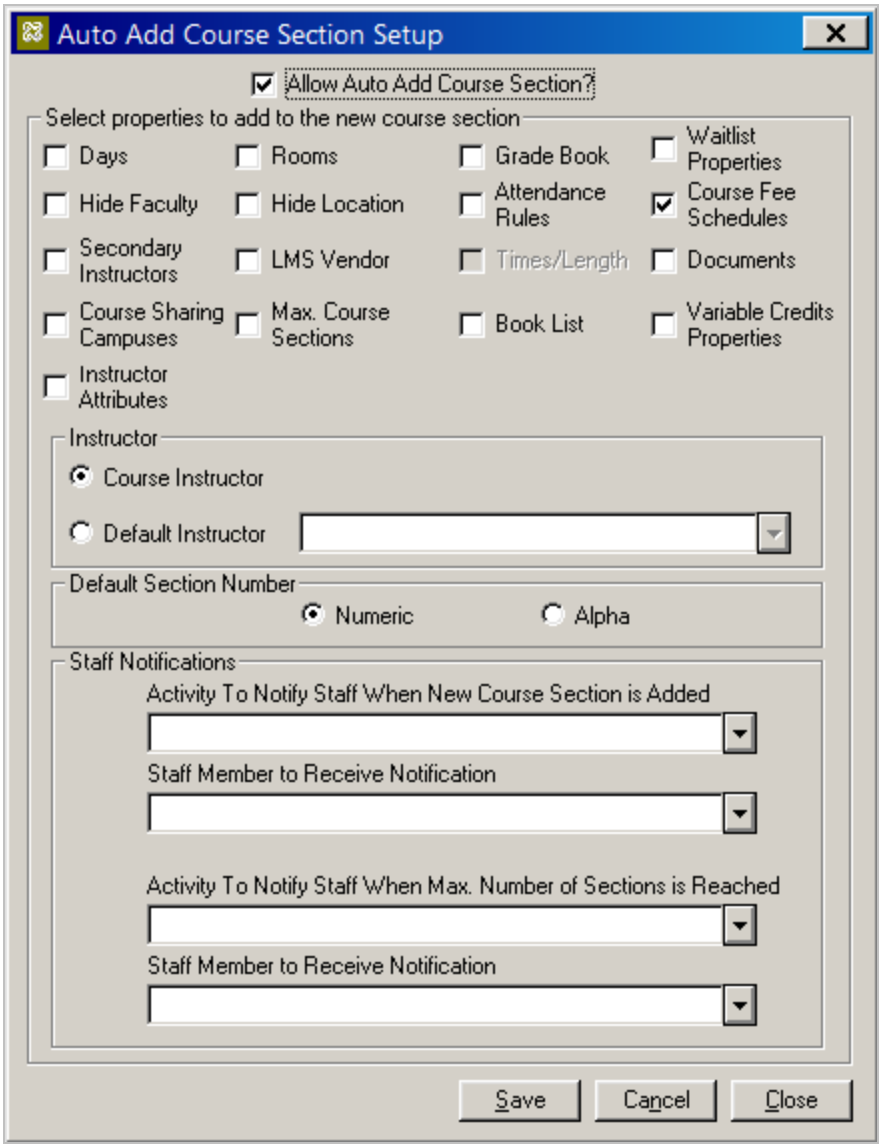
You can configure CampusNexus Student to add new course sections when online courses reach their capacity filled. This eliminates the need to manually check course sections and accommodates student overflow from one section to another (i.e., removing complexities associated with moving students from one section to another).

Note: This feature is available for online courses only.

See also Courses, Delivery Methods, Class Schedule, and Waitlists.

To configure auto add course section:

1. Navigate to **Setup** > **Campus Locations** > select a campus > **Add/Edit** (button) > **Acad. Records** (tab) > **Others** (tab).
2. On the Others tab under Auto Create Course Section, click **Setup**. The Auto Add Course Section Setup form is displayed.
3. To activate this feature, select **Allow Auto Add Course Section?**



4. Select appropriate properties to add to the new course section.

   Important Notes:

   - If **Course Fee Schedules** is selected, CampusNexus Student copies the course fee schedules to the course section with the default and view settings. When it is cleared, CampusNexus Student copies the course fee schedules to the course section without any of the default or view settings. To enable the Course Fee Schedules functionality, select the **Allow Auto Add Course Section?** check box and select the **Course Fee Schedules** check box.
   - If **Book List** is selected, the Book List(s) (with books) of the already filled course section is copied to the new course section. If the check box is not selected, only the default Book Lists contained in the course configuration are assigned to the newly created course section.
   - If **Variable Credits Properties** is selected, the Credits, Hours, Min. Credits, Max Credits, and Allow

Override During Registration settings of the already filled course section are copied to the new course section. If the check box is not selected, the settings are copied from default settings contained in the course configuration.

When a new course section is automatically created, if the Enforce Last Day to Withdraw feature is part of the configuration for the existing course section's campus (Setup > Campus Locations > Edit/Add > Academic Records (tab) > General (tab)), the new course section is populated with the LDW date of the existing course section.

- If **Instructor Attributes** is selected, instructor attributes are copied to the new course section when a new course section is automatically created. This only occurs if Auto Add Course Section is configured to include instructors.
    - If Course Instructor is selected, the newly created course section copies the instructor attributes from the original section.
    - If Default Instructor is selected, the attributes copied to the new course section are the attributes for the default instructor.

  If the Instructor option is not enabled and the Secondary Instructor option is not selected, the Instructor Attributes check box is disabled. By default, the Instructor Attributes option is cleared.

5. Select an **Instructor** option.
    - If you select Course Instructor, the newly created course section copies the instructor attributes from the original section.
    - If you select Default Instructor, choose a default instructor from the list.
6. Select **Numeric** or **Alpha** as the default section number.
7. Select **activities** and associated staff members:
    a. In the 'Notify Staff When New Course Section is Added' field, select an activity.

       In the 'Staff Member to Receive Notification' field, select the staff member that is assigned the activity.

    b. In the 'Activity to Notify Staff When Max. Number of Sections is Reached' field, select an activity.

       In the 'Staff Member to Receive Notification' field, select a staff member.
8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

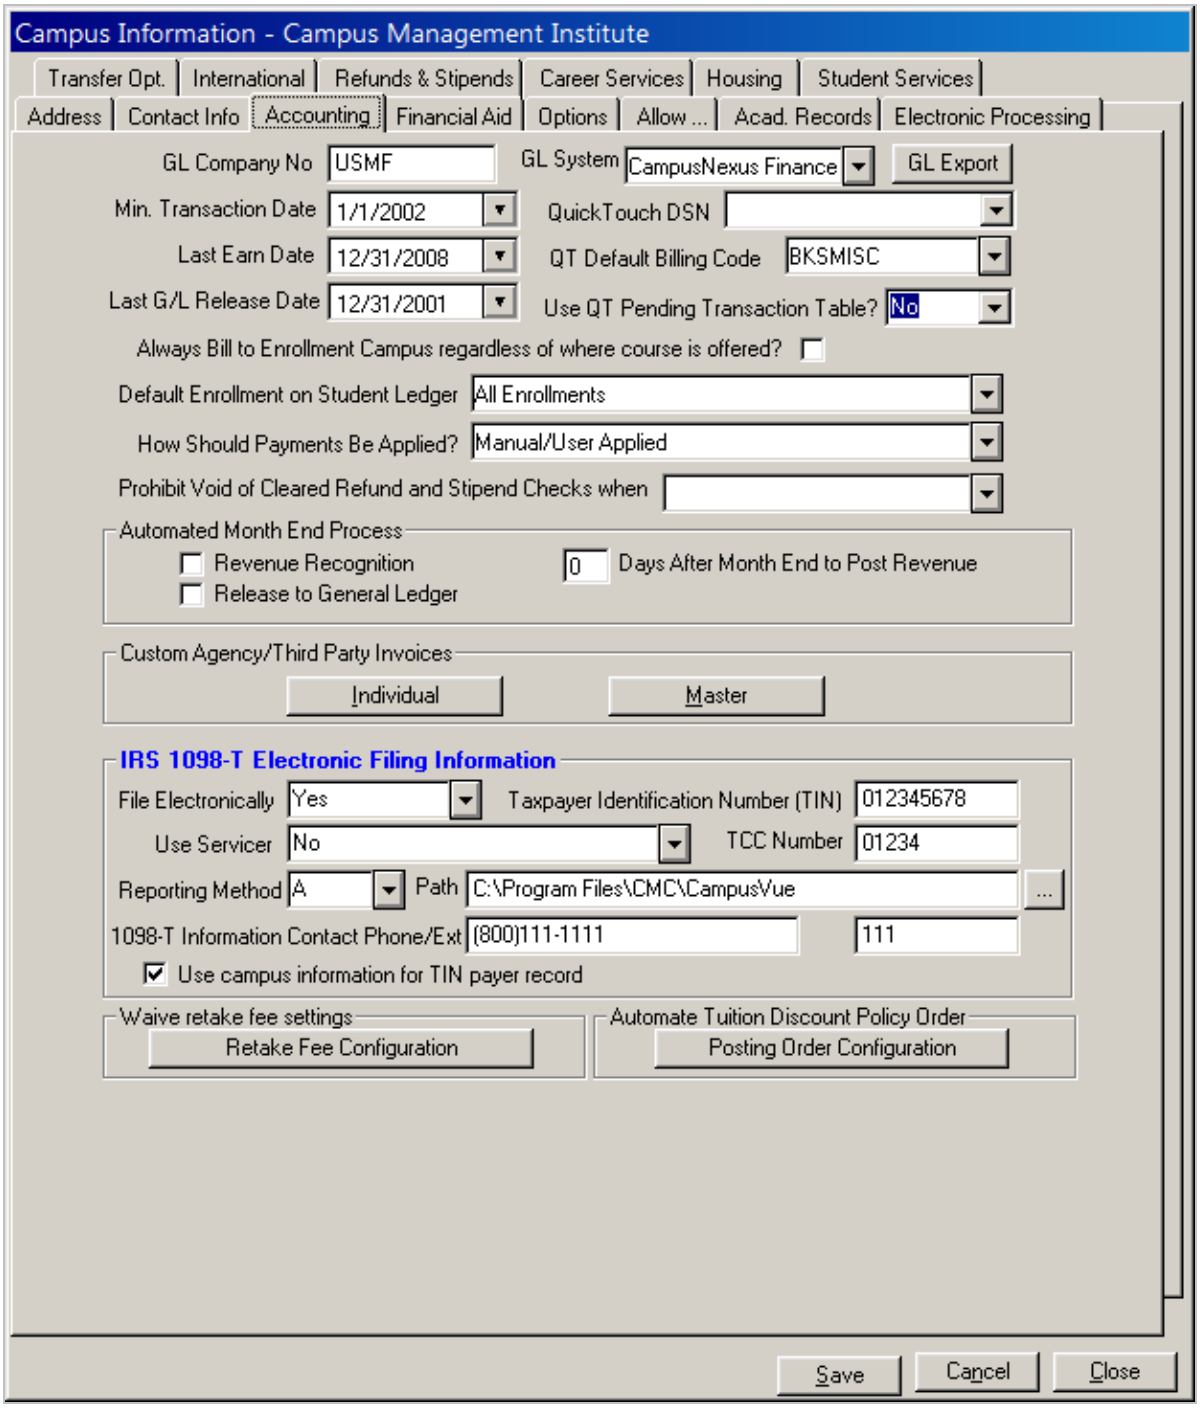
Campus Information - Accounting Tab

Use the Accounting tab on the Campus Information form to set up information related to financial procedures in CampusNexus Student. Configurations on this tab are important if your institution requires general ledger posting information and exports files from CampusNexus Student to your accounting system.

To add or edit accounting data for a campus:

1. Navigate to **Setup** > **Campus Locations** > select a campus > **Add/Edit** (button) > **Accounting** (tab).

   Note: The fields on the Accounting tab vary depending on the selected accounting system (GL System).



2. Specify appropriate options. For more information, see Field Descriptions.
3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Field Descriptions

Field	Description
GL Company No	Enter the number (up to 8 characters) by which this campus is identified as a company in your accounting system. Multiple campuses can have the same company number.
GL System	GL Systems are external accounting applications for which CampusNexus Student can provide importable transaction files with the proper record layout. The options are: • Great Plains (see Settings for GL System "Great Plains") • Other • None • CampusVue Finance, HR & Payroll (see Settings for CampusVue Finance, HR & Payroll) **Note**: The reports provided by CampusNexus Student can be used to prepare manual journal entries even if your accounting system is not on the list.
GL Export	The GL Export button is enabled for the GL System options Great Plains and Other. Click **GL Export** to select the Export File Definition and the Export File Drive and Folder. Min. Transaction Date	This is the date before which ledger transactions will not be accepted. This date must be updated manually. It is normally updated after you run the Release to General Ledger procedure. CampusNexus Student reject transactions with dates earlier than this date.
Last Earn Date	This field is filled in by CampusNexus Student when you run the Revenue Recognition procedure.
Last G/L Release Date	This field is filled in by CampusNexus Student each time you release transactions to your general ledger system (see Daily/Student Accounts/Release to General Ledger).

Field	Description
Always Bill to Enrollment Campus regardless of where course is offered?	Use this option to designate which ledger card should be posted with a registration billing – the ledger card at the campus at which the student is enrolled or the ledger card at the campus at which a course is offered. The default is to post to where the courses are offered. If no current value exists for the campus selected, the check box is cleared by default. If the billing method for the student has a frequency of program, academic year, or term, and does not use a rate schedule, the charge will be billed to the student's enrollment campus regardless of whether this check box is selected. If you select this check box and... a. you have multiple campuses, and b. you are currently billing by course, and c. you have students taking courses at more than one campus , ... you will change where registration billing transactions are posted.
Default Enrollment on Student Ledger	Specify the initial default view of a student's ledger card when the Ledger Card form is loaded. The options are: • Current Enrollment • All Enrollments
How Should Payments be Applied?	Select how to apply credits to debit balances on the student's ledger card. The options are: • Auto Apply Using Hierarchy – Payments (credit transactions) posted to the ledger card are automatically applied to charges (debit transactions) that have not been applied. When the payment is a non-financial aid source, CampusNexus Student uses the default payment applications hierarchy for the campus to apply the payment. If the payment is a fund source payment, the payment application hierarchy for the fund source is used. See Configure_Payment_Apply_Order to configure the default campus payments/fund source application hierarchies. • Manual/User Applied – This option lets you to manually choose how payments get applied. See Apply Payments to Charges for more information.

Field	Description
Prohibit Void of Cleared Refund and Stipend Checks when	To control whether users can void a refund or stipend check if the check status is 'Cleared', select one of the following options: • Check Cleared Date is not blank • Check Cleared Date is not blank AND Check Status is "Cleared" • Check Status is "Cleared" When a user highlights a refund or stipend from a student's ledger card and selects 'Adjust Transaction', CampusNexus Student checks if the check is cleared. The determination of whether the check is cleared is based on the definition assigned in the campus configuration (i.e., the three conditions noted above). If the user chooses to adjust a refund or stipend check that is cleared, the 'Void This Transaction' button is not enabled on the 'Void Refund/Stipend Check' form, prohibiting the user from voiding the refund or stipend check. **Note:** Beginning with CampusNexus Student 14.0, you can set up unique debit and credit accounts for stipends so that you do not have to use the same accounts as your refunds.
Path to Great Plains Dynamics DB	If your campus uses Great Plains, click the button to specify the connect string to the Great Plains Dynamics database. Use your Windows or SQL Server authentication to connect, click **Test** to test the connection, and click **OK**.
Path to Great Plains Company DB	If your campus uses Great Plains, click the button to specify the connect string to the Great Plains Company database.Use your Windows or SQL Server authentication to connect, click **Test** to test the connection, and click **OK**.
Batch ID	Specify a Batch ID. It is usually non-numeric but can be numeric. For example, if the Batch ID is set to "Austin", every batch starts with "Austin".
Automated Month End Process	Select the process you want to run as an automated month end process. The options are: • Revenue Recognition • Release to General Ledger Specify the number of Days After Month End to Post Revenue.
Custom Agency/Third Party Invoices	Select an appropriate option for processing custom agency/third party invoices: • Individual - Process individual invoices using Crystal Reports • Master - Process master invoices using Crystal Reports

Field	Description
IRS 1098 -T Electronic Filing Information	Select appropriate IRS 1098 -T Electronic Filing Information. The options are: • File Electronically – Select Yes if your school files electronically. • Use Servicer – Select Yes if your school uses a servicer such as Global Financial Systems. • Taxpayer Identification Number (TIN) – Specify the IRS taxpayer identification number for the institution that will file 1098-Ts. • Transmitter Control Code (TCC) Number – Specify the TCC number assigned to your school by the IRS for filing 1098-Ts electronically. This must be five alphanumeric characters. • Reporting Method – CampusNexus Student supports only one method of reporting: Amount Billed (A). Institutions need to specify the reporting method they use for processing 1098-Ts: Amounts Billed or Payments Received. Reporting methods cannot be switched without consent from the IRS. • Path – Click to select a location in which export files will be stored. • 1098-T Contact Information Phone – Specify the appropriate phone number. • Ext – Specify the extension of your 1098-T contact. • Use campus information for TIN payer record – **Note**: After the initial system setup, CampusNexus Student manages the dates listed in the table. We recommend that you not attempt to adjust them without prior consultation with CampusNexus Student Support.
Waive retake fee settings	Use the configurations described below when retake fees will be waived if the previous grade was a passing grade or failing grades or if the student enrolled after course start date. Click **Retake Fee Configuration** to display the configurations. • Waive if previous retake grade is passing – Retake fees will be waived if the previous grade was a passing grade. • Waive if previous grade is failing – Retake fees will be waived if the previous grade was a failing grade. • Waive if registered after course start date – Retake fees will be waived if the student registers in a course after the course start date. • Number of days if registered after course start date – If waiving the retake fees due to the student registering in a course after the course start date, configure the number of days past the course start date that a student can register in the course to determine when the waiver of the retake fees will occur. The number of days must not exceed 999 days.

Field	Description
Automate Tuition Discount Policy Order	Use this form to configure and save the posting order for the campuses selected for a tuition discount. Click **Posting Order Configuration** to display the Tuition Discount Posting Order form.  Under **Available Tuition Discount Policies**, select Tuition Discount Policies and click >>. Your selected policies now appear under the **Selected Tuition Discount Policies section**. Use the Up and Down arrows to establish your posting order for the policies. Click **Save** to keep your posting order. To remove policies from your posting order, highlight the policies and click <<. Your selected policies now appear under the Available Tuition Discount Policies section.

Settings for GL System "Great Plains"

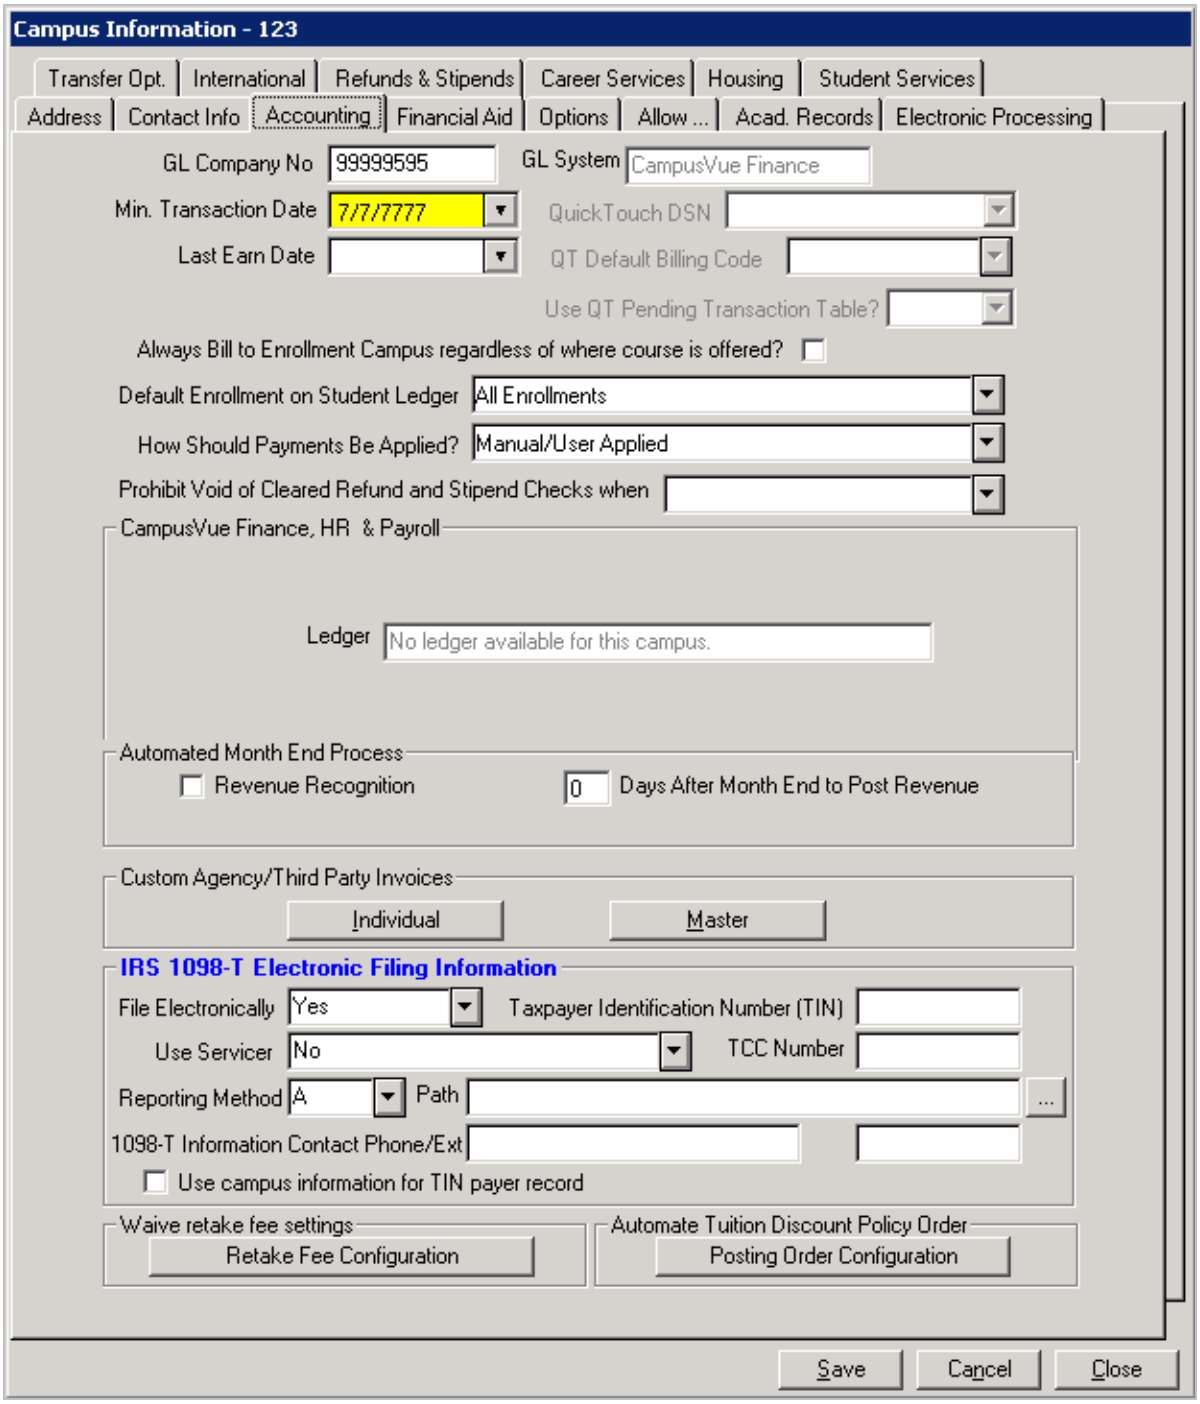
If your campuses use Great Plains, you must enable the following settings to use the Great Plains General Ledger Account search feature.

- In the General tab (Setup > Student Accounts):
  - Set the GL/AP Package to GREAT PLAINS.
  - Set Integrate with GP to Yes.
  - Set Integrate Bank Rec w/GP to Yes if you want the Bank Reconciliation portion to be turned on; otherwise set it to No.
  - Set Map GP GL Account Search to any positive number from 1 to 50,000. This field specifies the number of records that the search results display in a page. The default number is 500.

- In the Accounting tab:
    - Set GL System to Great Plains.
    - Specify the connect string for the Great Plains Dynamics DB.
    - Specify the connect string for the Great Plains Company DB.
    - Specify a Batch ID. It is usually non-numeric, but it can be numeric. For example, if the Batch ID is set to "Austin", every batch starts with "Austin".

Settings for CampusVue Finance, HR & Payroll

When CampusVue Finance, HR & Payroll is installed, the GL System field displays 'CampusVue Finance' and the drop-down list is disabled. In addition, the current fiscal year that is assigned in Journal Entry Group Setup is displayed in a read-only mode.



The 'Minimum Transaction Date' field is used in CampusNexus Student; however, if the fiscal period for the CampusNexus Student module is closed in CampusVue Finance, HR & Payroll, it updates this minimum transaction date to the first date of CampusVue Finance, HR & Payroll's open period if the minimum transaction date is less than the new period's start date. This prevents invalid entries, using the most restrictive date. An error message is displayed if this is the case.

The minimum transaction date may not be changed to a date greater than the transaction date of any records in the error log of CampusVue Finance, HR & Payroll. This forces users to make corrections to clear out the error log before the period can be closed or before the minimum transaction date can be pushed forward. The error indicates which GL accounts are invalid, along with the applicable area, such as Setup - Student Accounts - GL Links, Lists - SA - Bank Codes, or Lists - SA - Subsidiaries where the user can correct the account number. Once this is done, the error log is cleared the next time the automatic release process runs.

Using today's date to determine the fiscal year, the system checks the campus group the campus is assigned, looks up the Ledger assigned, and displays it in the 'Ledger' field as read-only information.

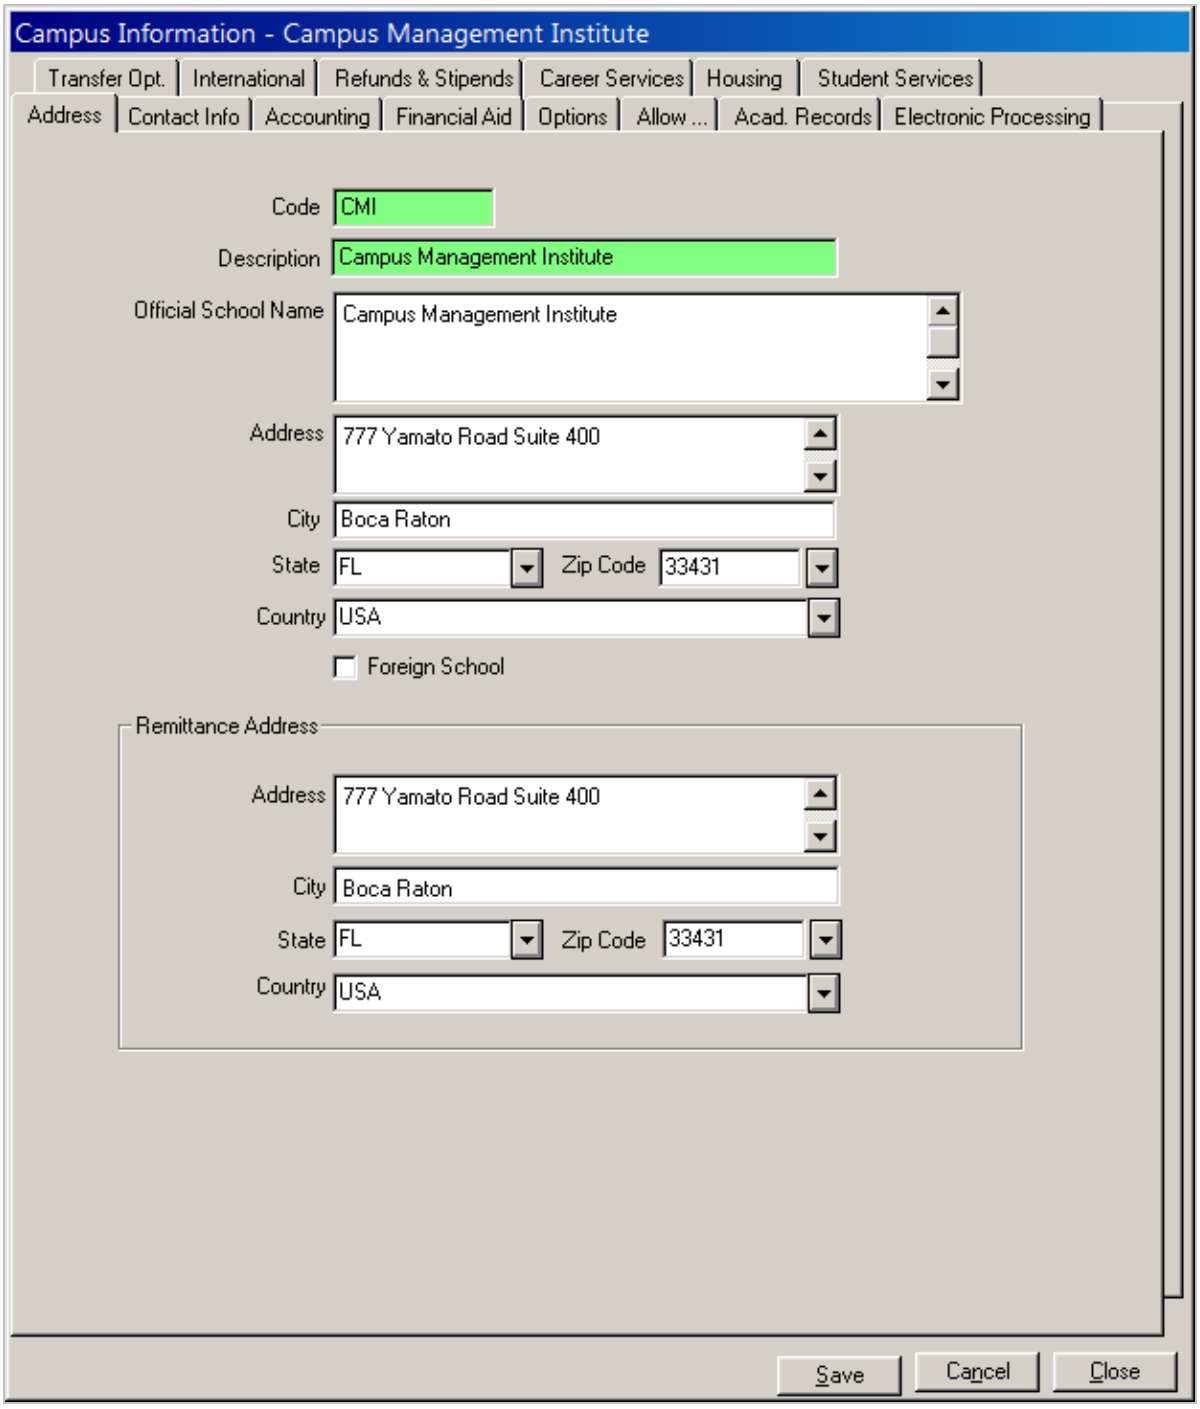
The 'Last G/L Release Date' field is removed because there will be a process running to move GL information to CampusVue Finance, HR & Payroll, therefore, the field will not need to be updated.

Campus Information - Address Tab

Use the Address tab on the Campus Information form to set up the code and description for the campus address in the CampusNexus Student database.

To add or edit address data for a campus:

1. Navigate to **Setup** > **Campus Locations** > select a campus > **Add/Edit** (button) > **Address** (tab).



2. Specify a unique **Code**.
3. Enter a **Description**.The Description field is used on most forms and reports in CampusNexus Student.
4. Specify the **Official School Name** (up to 120 characters) to use on formal documents such as transcripts. A merge field for the official school name is available for use with letters.
5. Specify the **Address**, **City**, **State**, **ZIP Code**, and **Country**.
6. If applicable, select **Foreign School** (by default the check box is cleared).

   Note: This option is used for Common Origination and Disbursement (COD) purposes in support of the current Common Record XML schema requirements. Enabling this flag restricts the population of the Program of Study tag to foreign schools. The Program of Study tags for foreign schools are linked with CIP codes based upon the following program grouping logic:

   Program of Study Codes

Program of Study Code	Description
01	Medical
02	Nursing
03	Veterinary
04	Other

7. Specify the **Remittance Address** if it is different from the official address. This allows you to use the return coupons printed on students' statements and third party or agency invoices. The Remittance Address can be configured for each campus. For example, schools may need the official address on transcripts but not on the payment coupons.

   - When the remittance address is configured, it is printed within the return coupon section of the statement or invoice.
   - When the remittance address is left blank, CampusNexus Student uses the campus address, if configured.

   The remittance address fields appear as mail merge fields and are available for selection when adding or editing letters.
8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

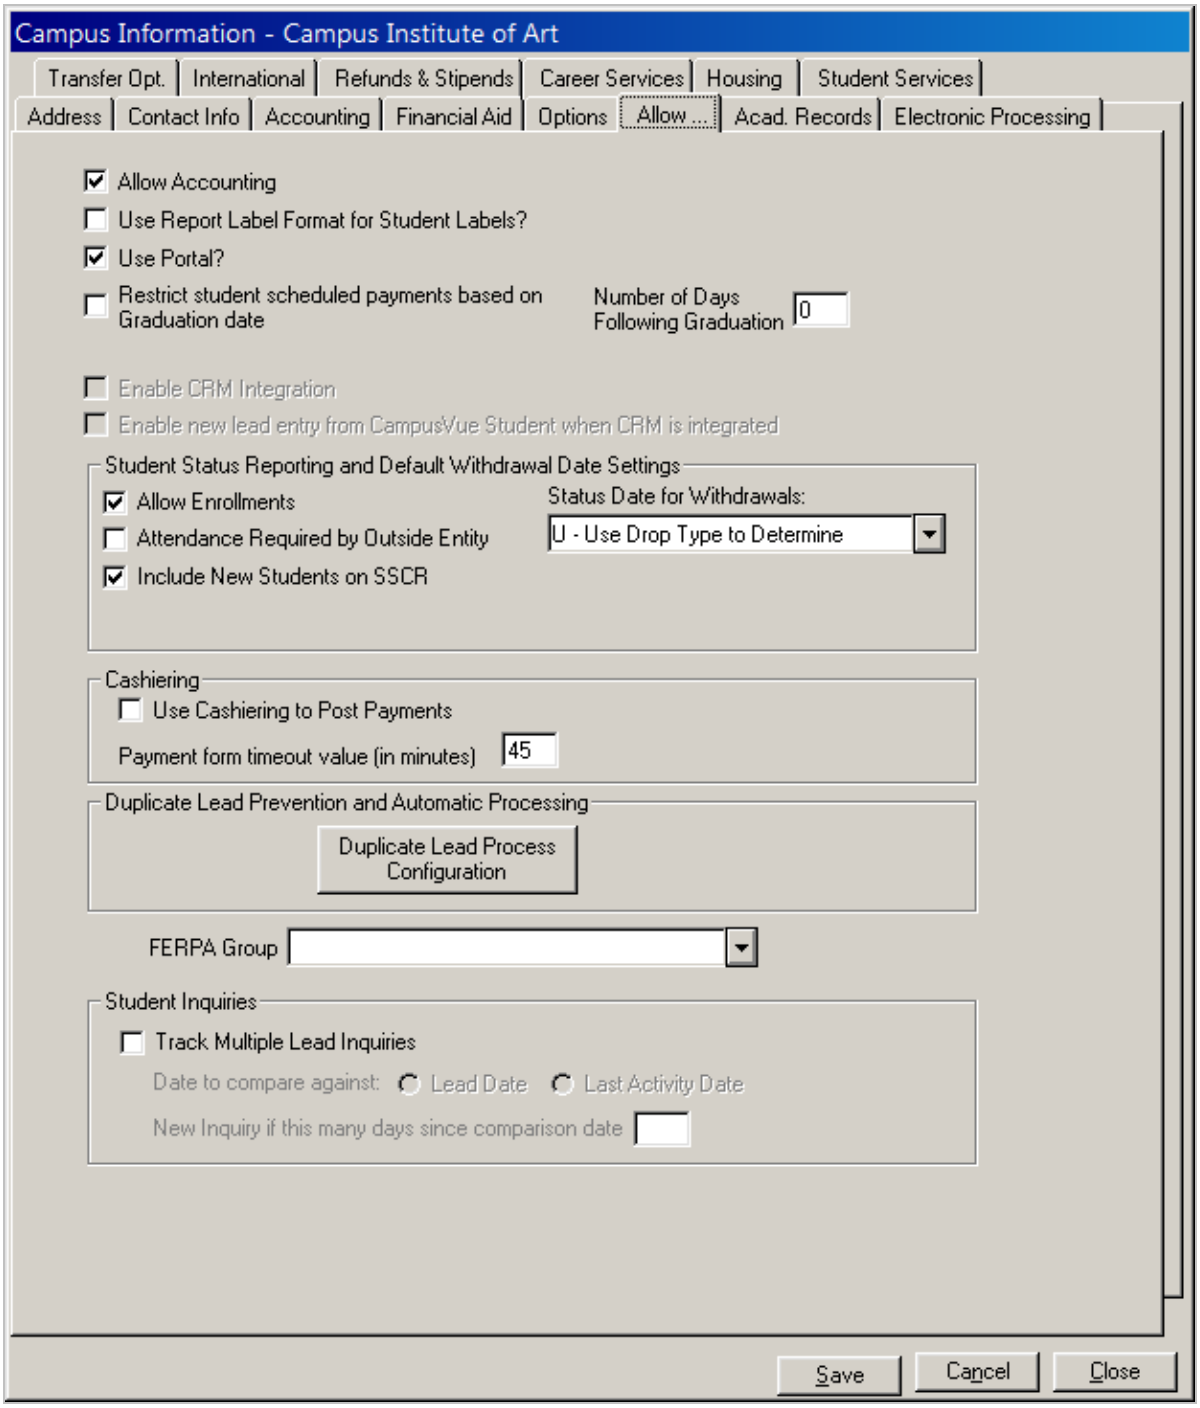
Campus Information - Allow Tab

Use the Allow tab on the Campus Information form to enable or disable some functional areas in CampusNexus Student for the selected campus. Special circumstances may apply to a campus when an institution defines it in a narrow context. Under these conditions, the institution may not want the campus to enroll students or post accounting transactions. One possible use for these options would be for a telemarketing effort to generate leads for other campuses. These options might be used in a start-up scenario for a campus in which only the admissions features are required.

Use this tab also to configure a print label format. CampusNexus Student prints labels from the Student Master in a defined label format. To accommodate international address labels, the format may vary. You can define a label format to be used instead of the system-defined label format.

To allow or disallow enrollments and/or accounting transactions, or to select a label format:

1. Navigate to **Setup** > **Campus Locations** > select a campus > **Add/Edit** (button) > **Allow...** (tab).



2. Specify appropriate options. For more information, see Field Descriptions.
3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Field Descriptions

Field	Description
Allow Accounting	Select whether accounting transactions are allowed. • If this option is selected (default), accounting transactions are allowed. • If this check box is cleared, no accounting transactions can be posted at the selected campus, i.e., no student ledger cards, no revenue accounting, no transaction code setup, and so on.
Use Report Label Format for Student Labels?	Define a report label format to be used instead of the system-defined label format. • If you select this option, all reports with the `lst_SyLabel%.rpt` file name format are listed. You are prompted for a file name. Select the Label Report Name to use for the Student Labels from the reports listed. • If this box is cleared, the generic label format is used.
Use Portal?	Indicate whether the selected campus uses Portal. If the option is selected, the option for Online Registration Configuration becomes visible in the Daily > Academic Records menu. Select this option when you create a portal group. You can then configure that group to be available to the Portal administrator for customization of web content, including granting portal access to custom home pages, content channels, custom web parts, etc. To configure student groups for portal filters, select the following options: • 'Active' on the Student Groups form • 'Make Group for Portal Content' on the Save New Group form. To access the Make Group for Portal Content check box, when the Master Student Listing Summary is displayed, from the Report Viewer, select Report > Save Student Group. On the Save New Group form, enter the Group Name, select the Group Type, and select the Make Group for Portal Content check box. **Note**: The Save New Group form also is displayed when you save the result set of a search to a new group.
Restrict student scheduled payments based on Graduation date	Select this option to restrict users from scheduling payment plans that end more than a configured period of time past the grad date.
Number of Days Following Graduation	Specify the number of days following graduation. This is a school-defined rule for the last day on which users may schedule a payment.

Field	Description
Enable CRM Integration	Select this option to enable the campus for integration with a CRM product. The default is disabled. The value of this setting is stored in the CampusNexus Student database SyCampus table. • If this check box is selected, the CampusNexus Student database launches the triggers associated with the campus level CRM integration functionality. The outgoing transaction queue database tables are populated with outgoing transaction messages such as campus student records and enrollment records. • If this check box is cleared, the CampusNexus Student database does not launch the triggers associated with the campus level CRM integration functionality. The outgoing transaction queue database tables are not populated with outgoing transaction messages.

Field	Description
Enable new lead entry from CampusNexus Student when CRM is integrated	Select this option to allow new lead and new student records to be entered directly into CampusNexus Student through the user interface. This configuration is only applicable when CRM is integrated with CampusNexus Student on a campus by campus basis. When this check box is cleared (default), you are not allowed to enter new leads or new student records directly into CampusNexus Student for this campus. The paths within CampusNexus Student where the creation of new lead/student records are restricted include: • File > Add New Lead ( ) • File > New Lead (full) • Daily > Admissions > Process Electronic Leads • Daily > Admissions > Batch Quick Lead Entry **Notes**: • If CRM Integration (Setup > System > Integration) is selected and Enable CRM Integration is cleared, this field is disabled. • If this field is selected and Enable CRM Integration is cleared, this field automatically becomes disabled without a warning message. • When you create a new student from the Student Master, a campus will not be available for selection if (system level) CRM Integration is selected and (campus level) Enable CRM Integration is selected, and the (campus level) 'Enable new lead entry from CampusNexus Student when CRM is integrated' check box is cleared. In all other scenarios, a campus is available for selection. • When you create a New Lead (full) for the default campus, if both (system level) CRM Integration and (campus level) Enable CRM Integration are selected, but (campus level) 'Enable new lead entry from CampusNexus Student when CRM is integrated' is cleared, the following message is displayed: "*Your default campus, Campus Management Institute, is integrated to CRM. To add a lead (or student) to this campus, use CRM. To add a lead to a different campus, please select the campus from the drop-down.*" You can create New Lead/Student records in CampusNexus Student according to the settings listed in the table below: **CRM Settings Matrix** **CRM Integration (System level CRM integration)** / **Enable CRM Integration (Campus level CRM integration)** / **Enable new lead entry from CampusNexus Student when CRM is integrated** / **Allow create Lead/Student for a campus?** OFF / OFF / OFF / YES ON / OFF / OFF / YES ON / ON / OFF / NO

Field	Description
Student Status Reporting and Default Withdrawal Date settings	These settings allow campuses to define configurations that are applicable to National Student Loan Data System (NSLDS) reporting, particularly in relation to reporting withdrawal dates. Student status data is reported to the NSLDS via the SSCR or Clearinghouse reports. The Department of Education set guidelines for how withdrawal dates should be determined. The Attendance Required by Outside Entity and Status Date for Withdrawals settings are critical to ensuring accurate withdrawal dates in CampusNexus Student. These two fields drive the logic for calculating the NSLDS Withdrawal Date on students who are withdrawn from school. Although it is not as common for an institution to be mandated to take attendance, the Attendance Required by Outside Entity option is available for configuration at the campus level. This setting can also be configured for individual program versions and/or fund sources. Regardless of the location of this setting, the option allows institutions to report the Last Date of Attendance (LDA) as the NSLDS Withdrawal Date on all withdrawing students regardless of the Official or Unofficial withdrawal designation. This also applies to students who do not return from an LOA and are subsequently dropped (instead of the date that a student began the LOA, if a student attending one of these institutions fails to return from that LOA, the LDA is reported as the NSLDS Withdrawal Date). It is important to consider that if an institution has an internal policy requiring to take attendance, this does not meet the definition as applied to the regulation. An institution is considered to be required to take attendance "only if an outside entity such as an accrediting agency requires them to do so." Only institutions that meet this criteria should use the Attendance Required by Outside Entity check box configuration. The Department of Education mandates that a student's withdrawal date be treated differently in scenarios where attendance is NOT required to be taken. In this scenario, institutions can still opt to use an LDA as the NSLDS Withdrawal Date if they can document attendance was related to an academic activity. In many cases institutions do take attendance (despite not being mandated to do so) and have published attendance and withdrawal policies within their school catalog. Institutions that do not take attendance, or only do so based on an internal policy, should rely on the Status Date for Withdrawals setting to dictate the NSLDS Withdrawal Date logic. If a campus is not required, but opts to take attendance per a published attendance and withdrawal policy, the recommended Status Date for Withdrawals setting is L-LDA. This ensures that the default NSLDS Withdrawal Date calculation on Unofficial withdrawals are in relation to the LDA. Campuses with this configuration can use an additional field to define the number of days that should be added to the LDA to comply with their policy. If a campus is a non-attendance taking Institution (may take attendance

Field	Description
	periodically, but not regularly and has no established attendance withdrawal policies), the Status Date for Withdrawals setting should be U-Use Drop Type to Determine. With this configuration, the NSLDS Withdrawal Date for Unofficial withdrawals is calculated using Financial Aid Academic Calendar and Return of Title IV period definition settings. For students who fail to return from an LOA at an institution that is not required by an outside entity to take attendance, the NSLDS Withdrawal Date continues to calculate the LOA Begin Date as the NSLDS Withdrawal Date.
Allow Enrollments	Select this option to enable this feature. If this box is cleared, no students can be enrolled at the selected campus. The default is to allow enrollments.
Attendance Required by Outside Entity	Select this option for all students enrolled at the campus, per description above. This check box must be selected to report to the SSCR (NSLDS).
Include New Students on SSCR	Select this option to add all attending enrollments that are not already included in the SSCR roster file regardless of whether they are receiving Title IV aid. A student who does not have a Title IV loan at your institution might have received Title IV elsewhere, therefore, current enrollment status information is used to assess that student's potential deferment privileges.
Status Date for Withdrawals	Select an option from the drop-down list. • When attendance is required by an outside entity, Status Date for Withdrawals is disabled because LDA will always be used to calculate the NSLDS Withdrawal Date. • When the attendance check box is not selected (indicating that attendance is not required by an outside entity), Status Date for Withdrawals is enabled. If attendance is not required, the options are: • L - LDA (Last Date of Attendance) • U - Use Drop Type to Determine. When a student is reported to the NSLDS as a withdrawal student, the effective date of this status change is reported via the SSCR or Clearinghouse reports based on the date calculated as the NSLDS Withdrawal Date. The calculation of default NSLDS Withdrawal Dates depends on the setting of this flag.
Number of Days to Add to LDA on Unofficial Withdrawal	Enter a value to correspond with the campuses institutional attendance withdrawal policy when the Status Date for Withdrawals setting is L-LDA. For more information on how NSLDS Withdrawal Dates are calculated, see Default Date Calculation for Drop Status Change.

Field	Description
Cashiering	Select this option to enable the cashiering functionality. Specify the time-out value for the Post Payment form. If there is no valid action on the form for the time configured, the form is locked. A valid CampusNexus Student user ID and password is required to unlock it.
Duplicate Lead Process Configuration	Click Duplicate Lead Process Configuration to access the forms to determine the processing steps in CampusNexus Student when a new lead record is determined to be a duplicate of a record already in the database.
FERPA Group	Select the FERPA Directory Group to assign to this campus from the drop-down list. See also FERPA Document Settings.
Student Inquiries - Track Multiple Lead Inquiries	Select this option to enable tracking each time a prospective student inquires about enrollment. When you enable multiple inquiries, select **Lead Date** or **Last Activity Date** as the date the inquiries are compared with to find the latest entry. If this option is disabled, the View > Admissions > Inquiry menu option is hidden. Several Admissions reports require this option to be enabled to display and print multiple lead inquiries.You can establish the number of days that an inquiry can remain unchanged before it becomes a new inquiry by setting the **New Inquiry if this many days since comparison date** value. When processing duplicates, CampusNexus Student checks the number of days since the Last Activity Date or Lead Date, creates a new inquiry record, and sets it to be a current inquiry records, or does not create an additional record. If a zero value (0) is entered, student inquiries may be captured and stored on the same day, a 1 indicates the next day, and so on. **Note**: The Response Number, Response Time, and Response Date fields are displayed on the Student Inquiry form only if 'Track Multiple Lead Inquiries' is selected and 'Capture Advertising Information' is selected on the Lead Sources Code Setup form (List > Admissions > Lead Sources > Add/Edit Lead Source > Lead Sources Code Setup).

Contact Manager Setup - FERPA Groups Tab

The Family Educational Rights and Privacy Act (FERPA) is a federal law that protects the privacy of student education records. The law applies to all institutions that receive funds under an applicable program of the U.S. Department of Education. FERPA gives eligible students certain rights with respect to their education records.

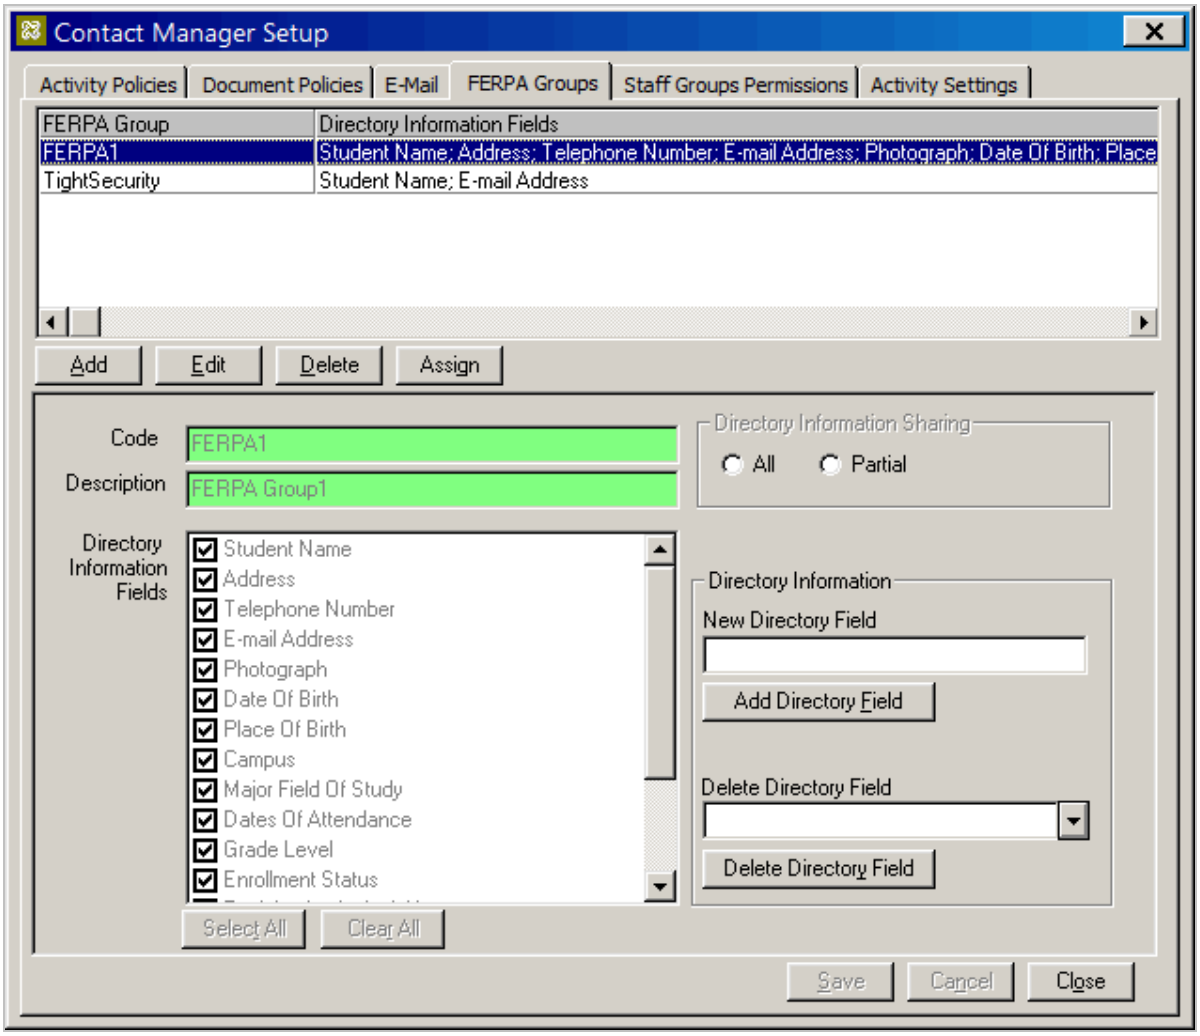
For instance, institutions are required to notify students annually of specific directory information - such as student name, address, telephone number, email address, etc. - that can be disclosed to individuals outside of institution employees or designees. Institutions must give students a reasonable amount of time to opt out of this disclosure. Unless students opt out, institutions may disclose this directory information without the students' consent; if students opt out of disclosure, the institution must obtain consent from the students before releasing the information.

CampusNexus Student enables you to perform the following tasks:

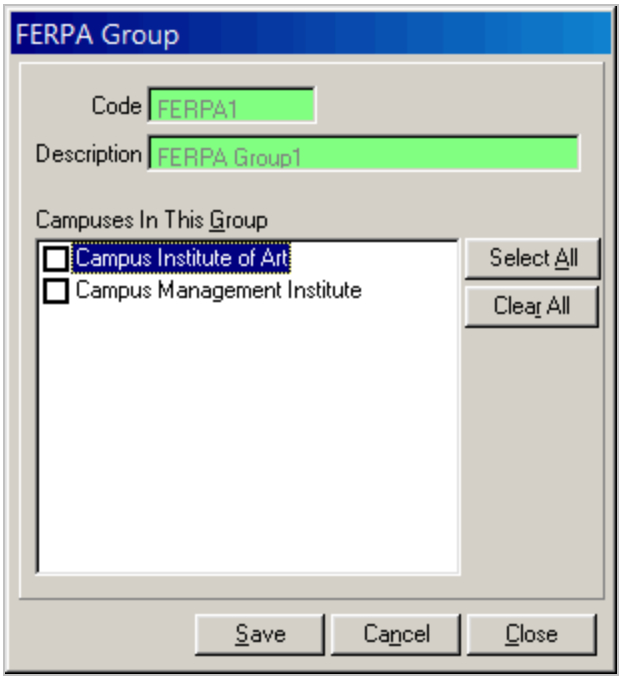
- Create FERPA directory information groups and assign them to campuses. See Campus Allow.
- Notify students when their FERPA information is changed.
- Configure release permissions and designations for student FERPA directory information and academic Information.
- Generate the FERPA Opt-out report.
- Allow students to view the FERPA directory information and academic Information.

To create a FERPA directory group:

1. Navigate to **Setup > Contact Manager > FERPA Groups** (tab).



2. Specify a unique **Code**.
3. Enter a **Description**.
4. Select the **Directory Information** fields to configure the release permissions and designations for your institution.
5. Click **Save**. Your fields selections are saved as a group that can be assigned to individual campuses.
6. Click **Assign**. The FERPA Group form is displayed.



7. Select the **Campuses** that you want to associate with your FERPA Group.

   When your FERPA group is assigned to campuses, site administrators can configure by campus whether CampusNexus Student prompts the user with the student document form after changing FERPA information. For this to occur, you must select **Yes** in the FERPA Document? field on the System Settings > General tab. If you select Yes, all changes to FERPA designations for students, both directory and academic, cause a document form to be displayed.

8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

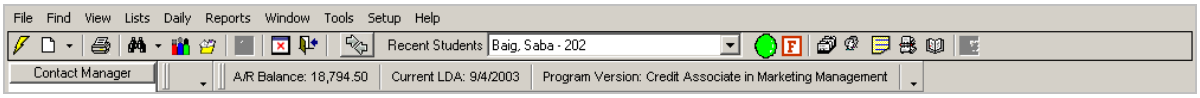
FERPA Document Settings

Institutions are required to notify students annually of specific directory information – such as student name, address, telephone number, email address, etc. – that can be disclosed to individuals outside of school employees or designees. Institutions must give students a reasonable amount of time to opt out of this disclosure. Unless students opt out, institutions may disclose this directory information without the students' consent; if students opt out of disclosure, the institution must obtain consent from the students prior to releasing the information. See also Student Master fields regarding the Data Block Indicator.

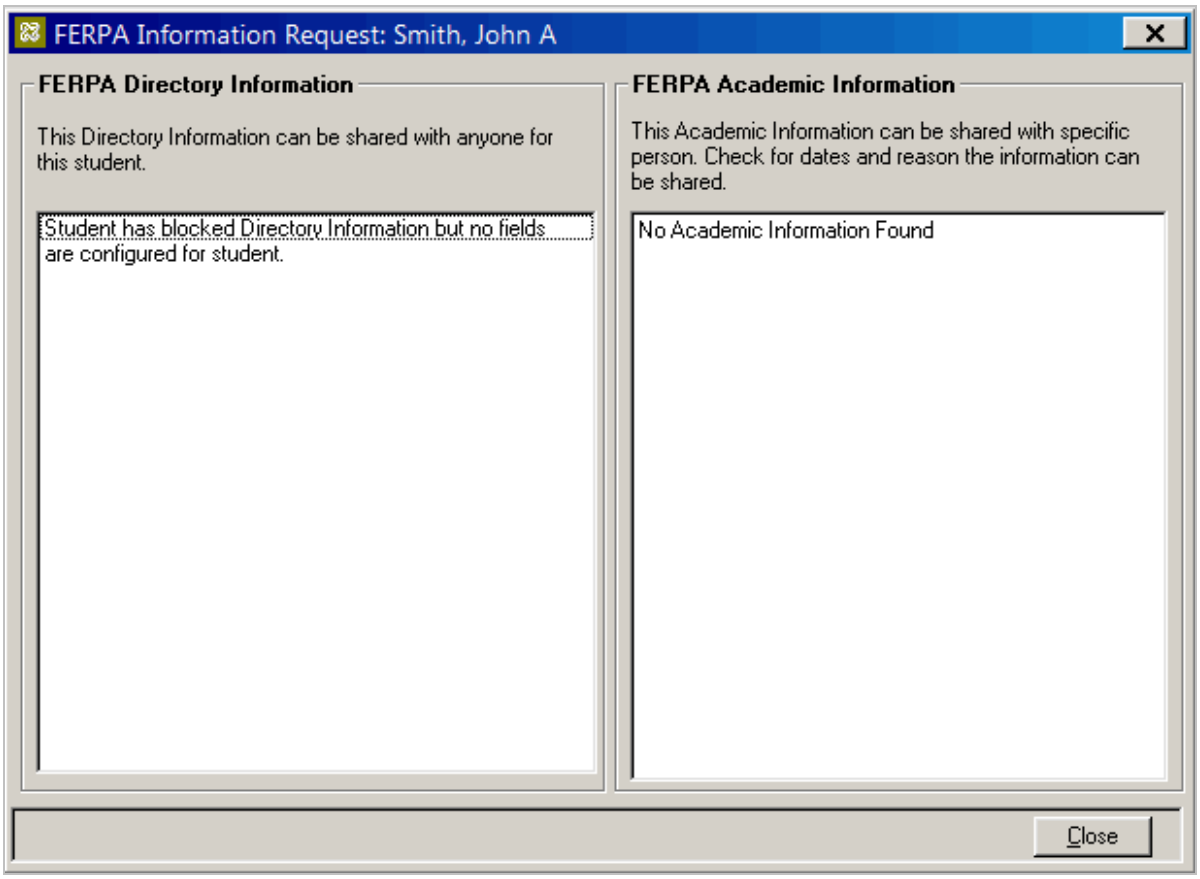
To opt out of this disclosure:

1. Navigate to **Setup** > **System** > **General** (tab), locate the FERPA document? attribute and select **Yes**.

   This selection allows your student record to be saved with Data Block designation and records the date the change was made. It also causes the F icon to be displayed on your student bar.



2. After you have provided all required information, click F to view your FERPA Information Request form. The form displays the list of fields in the campus-level FERPA group that you have selected to block, lists the names of people you have authorized to obtain your academic information, and identifies the information they are allowed to obtain.



3. Set up each Contact Manager Policy for FERPA Groups.

4. Add the FERPA Document to your list of documents.
5. Assign a FERPA Group to a campus.
6. View the FERPA Opt-Out report which displays the users who elected to block release of the FERPA directory information. This report shows the names associated with any addresses, the address types that have been given access to academic records, and the academic fields that are available to the specified address.

Duplicate Lead Processing

When a New Lead is entered on a Quick Lead or Student Master form, the duplicate lead processing function checks if a possible duplicate record is on file. The rules set up in Duplicate Lead Process Configuration determine how an institution deals with duplicate leads.

Electronic leads are those imported from electronic sources outside of CampusNexus Student through Portal, the institution's Web interface, or any other third party process. For details on processing duplicate electronic leads, refer to Process Electronic Leads. See also School Defined Fields.

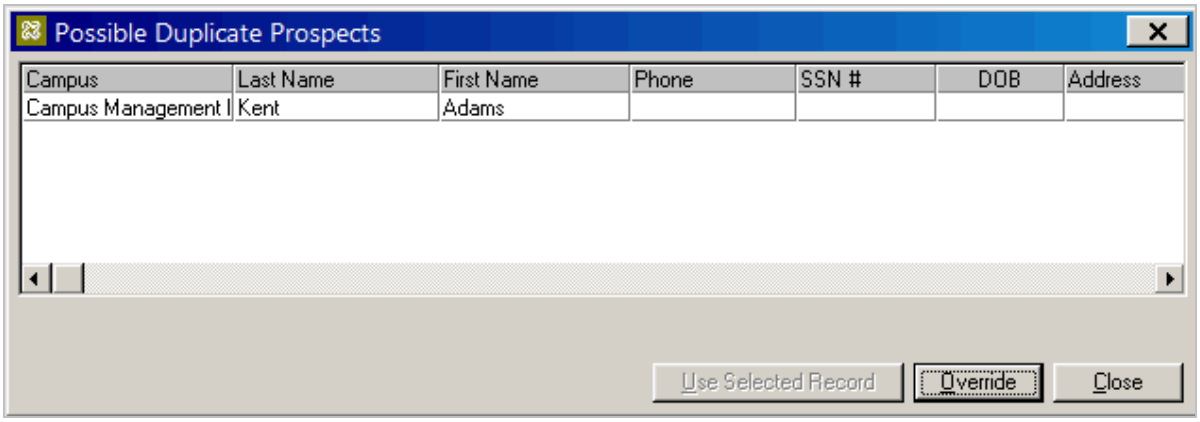
To process duplicate leads on Quick Lead and Student Master forms:

1. Navigate to the Quick Lead form (**File > Add New Lead**) or the Student Master form (**File > New Lead-Full**) and enter the new lead information.

   CampusNexus Student checks for duplicate records already on file using your institution's configuration rules. If possible duplicates are found, a list of student records matched to the new lead entered is displayed on the Possible Duplicate Prospects form. This feature is set up in the Admissions Settings form (Setup > Admissions > General tab > Duplicate Name/Phone).

   Note: If duplicate lead checking is enabled (Yes), CampusNexus Student displays possible duplicates as soon as you press Tab after entering a name, phone number, or email address that exists in another record in the CampusNexus Student database. If you are working with a large database, we recommend that you set this flag to No, so that the search for duplicates is not performed on each field as you enter data.

   - If this flag is set to Yes, the following form is displayed each time the system detects a possible duplicate.
   - If set to No, the duplicate search criteria is executed when you save the New Lead.



2. Select one of the possible duplicate records and click **Use Selected Record** to save the data on this record to the Student Master for the selected student.

   - OR -

   Click **Override** to populate a new Student Master with data from the New Lead. When you click Override, CampusNexus Student returns to the Quick Lead form.

   Data fields to be updated are set up in the Duplicate Lead Process Configuration. Override is available only if you have been given override permission (on the Duplicate Processing tab of the Duplicate Lead Process Criteria Selection form).

   A new Inquiry record may or may not be added.

3. Click **Save**. The Possible Duplicates form is displayed. Click **Cancel** to return to the previous form.

4. Click **Save New** to have the New Lead record result in a separate record to be created. This option is available only if you have override permission.

   If you do not have override permission, the Save New button is unavailable. Without override permission, you can process the New Lead as a duplicate, but cannot create a new Student Master for the New Lead.

5. Click **Process Duplicate** if you have determined that the New Lead record being entered is a duplicate of the lead record selected from the possible duplicates list.

   The following occurs when you click Process Duplicate:

   - Data entered in the new lead record for the user-defined fields is updated to the existing record if a configured field list is found for a status category that matches the status category of the school status on the existing record.
   - Data that is modified in the existing lead record is written to the Student Master audit table.
   - If the existing student record has a school status in the Lead system category and the Admissions rep assigned to the lead is Inactive, you are prompted to reassign the existing lead record to an Active Admissions rep.
   - If an activity is configured, that activity is scheduled for the selected lead record and assigned to that lead's admissions rep.

   When a duplicate student record is found and you click Process Duplicate, data from the new lead record is only updated to the existing record if the fields are specified in the configuration and the field in the new lead record contains data. A field in the existing lead record that contains data is not overwritten with a blank value from the new lead record. For details on setting up school-defined rules for duplicate processing, refer to Duplicate Lead Process Configuration.

6. Click **View Student** to see the Student Master for this student.

School Defined Fields

Clients may send School Defined Fields to the Process Electronic Leads process. This allows institutions to configure how this information is imported following the Duplicate Leads Processing procedures set up on the campus level.

To configure the import of School Defined Fields when processing electronic leads:

1. Navigate to **Setup** > **Campus Locations** > select a campus > **Add/Edit** (button) > **Allow...** (tab).
2. Click the **Duplicate Lead Process Configuration** button. The Duplicate Lead Process Criteria Selection form is displayed.
3. Click the **Duplicate Processing** tab.
4. In the Fields list, select **School Defined Fields** to allow school defined fields to be overwritten or discarded depending on the current student master's status category field.

Configuring Duplicate Lead Processing Rules

Authorized users can configure rules for the steps CampusNexus Student takes when a New Lead is identified as a duplicate of an existing record. Rules specify which data fields on an existing student record are updated from information on the New Lead form when that new lead is processed as a duplicate. You can also configure a Contact Manager activity that is triggered after a duplicate lead has been processed.

The permission to override a duplicate and create a new record can be given to select staff groups who can add a new staff group or edit an existing one and specify the override permission for the selected group. A member of the staff group with this permission can override the new lead record being entered and block it from being processed as a duplicate thereby allowing a new lead record to be created.

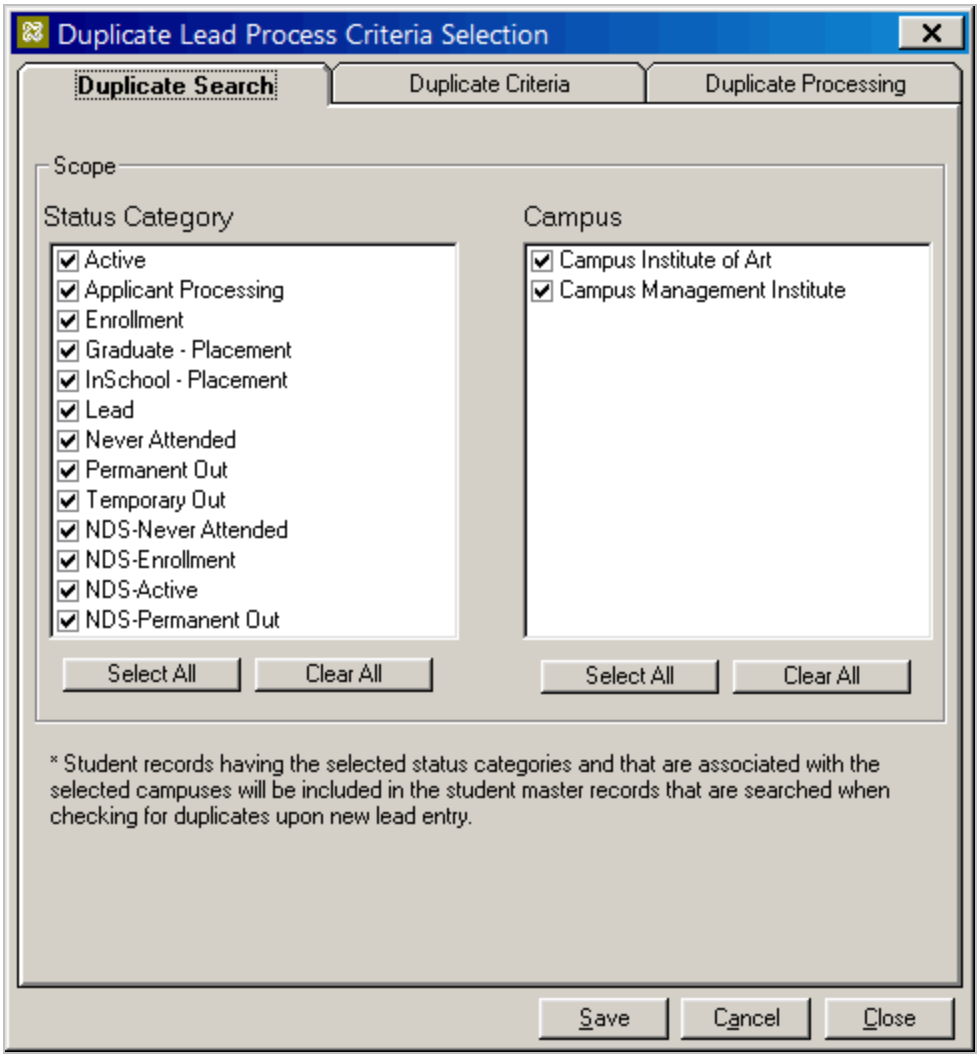
Once Duplicate Lead Process Criteria have been set up, duplicate checking may be performed within any of the following CampusNexus Student processes:

- Student Master (Add or Edit)
- Quick Lead Entry
- Process Electronic Leads
- Process On-Line Applicants

Note: To create a new group or add members to an existing group, see Add a Staff Group (Setup > Staff > Staff Groups > Add a Staff Group)

To configure duplicate lead processing rules:

1. Navigate to **Setup** > **Campus Locations** > select a campus > **Add/Edit** (button) > **Allow...** (tab).
2. Click **Duplicate Lead Process Configuration**. The Duplicate Lead Process Criteria Selection form is displayed.



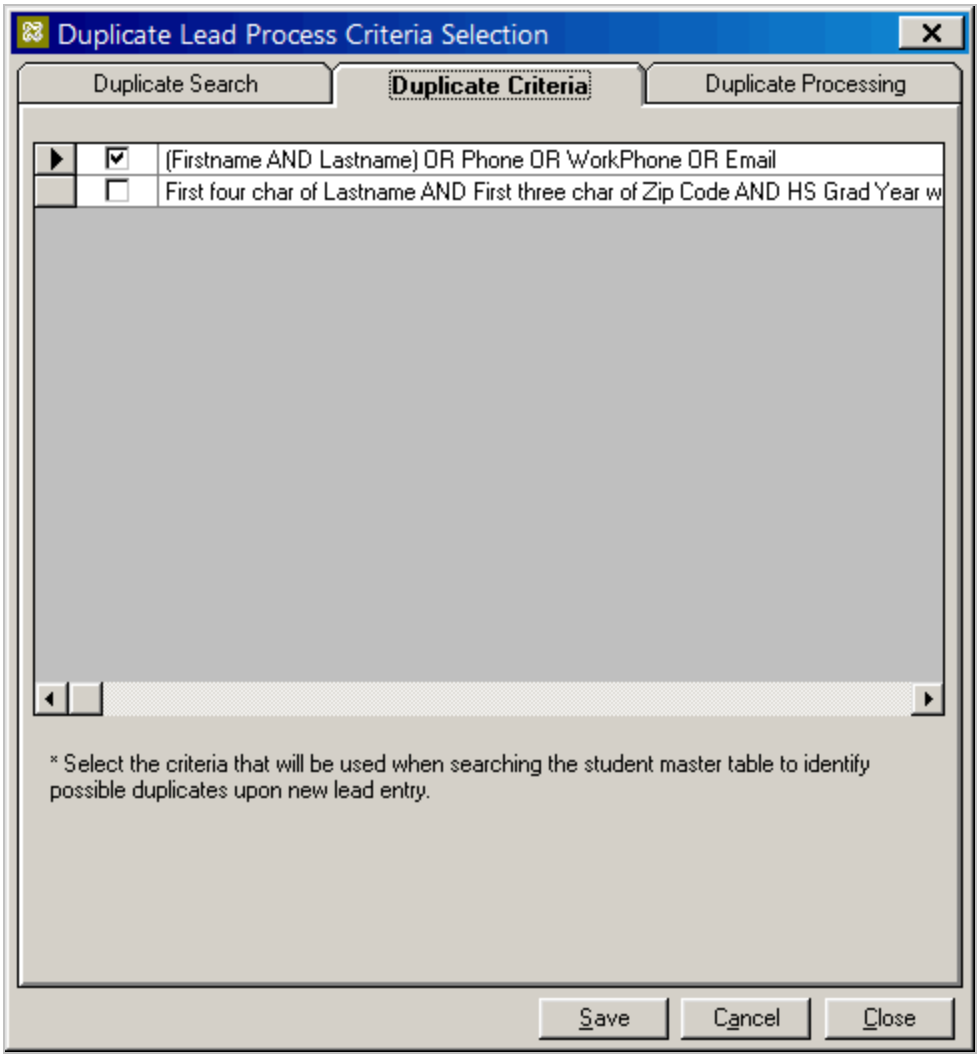
3. On the Duplicate Search tab, select the **Status Category** and **Campus** to be searched during the process of gathering duplicates. You can select or clear all categories and campuses at once, then add/clear them one-by-one as required.

   Use the Status Category list to specify the system status categories to be included in the duplicate search. The status categories pertain to the fields that will be updated from a New Lead record to the existing record when a duplicate student record is found.

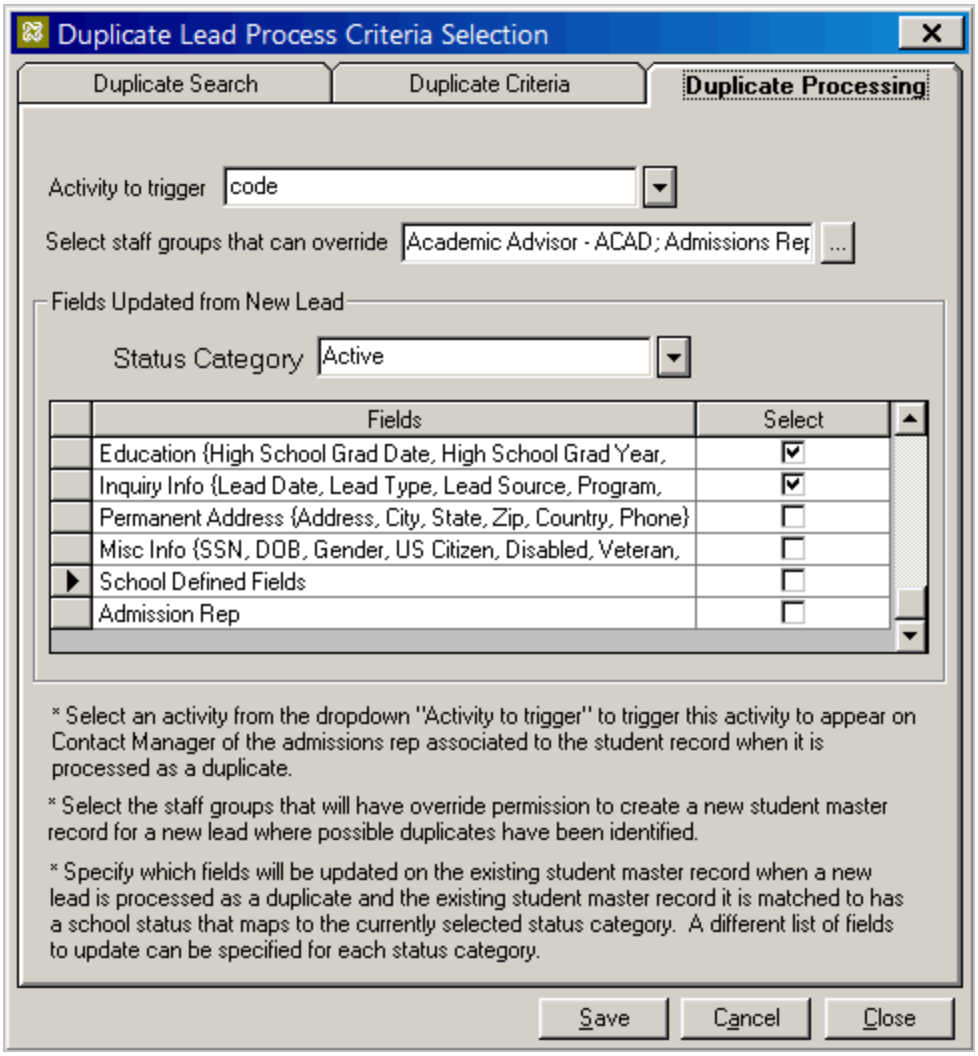
   In the Campus section select the campuses to be included in the duplicate search when a lead is entered for the currently selected campus.

4. Click **Save**.

5. Click the **Duplicate Criteria** tab and select the criteria to be used when searching the Student Master table to identify possible duplicates when new leads are entered. You can select fields and combinations of fields that will constitute a duplicate if a new lead record is matched to an existing student record using these fields. The fields selected will be updated from the new lead record to the existing record when a duplicate student record is found.



6. Click **Save**.
7. Click the **Duplicate Processing** tab to do the following:
    - Select an activity from the **Activity to Trigger** list. This activity is triggered and assigned to the admissions representative associated with the student record that is processed as a duplicate.
    - Use the Search tool in the **Select the staff groups that can override** list to assign permission to create a new Student Master record for a new lead when possible duplicates have been identified.
    - Select a **Status Category** and specify which fields shall be updated on the existing student record when a New Lead is processed as a duplicate and the existing Student Master to which it is matched has a school status that maps to this status category. A different list of fields to update can be specified for each status category.



Notes:

- When a duplicate lead record is detected and the 'Misc Info' check box is selected from the 'Fields' in the "Fields Updated from New Lead" section, any previously recorded 'Ethnic Group' category information is replaced with the new 'Ethnic Group' category information.
- The 'Process Electronic Leads' form processes 'Ethnic Group' information only when the 'Misc Info' check box configuration is selected.

8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

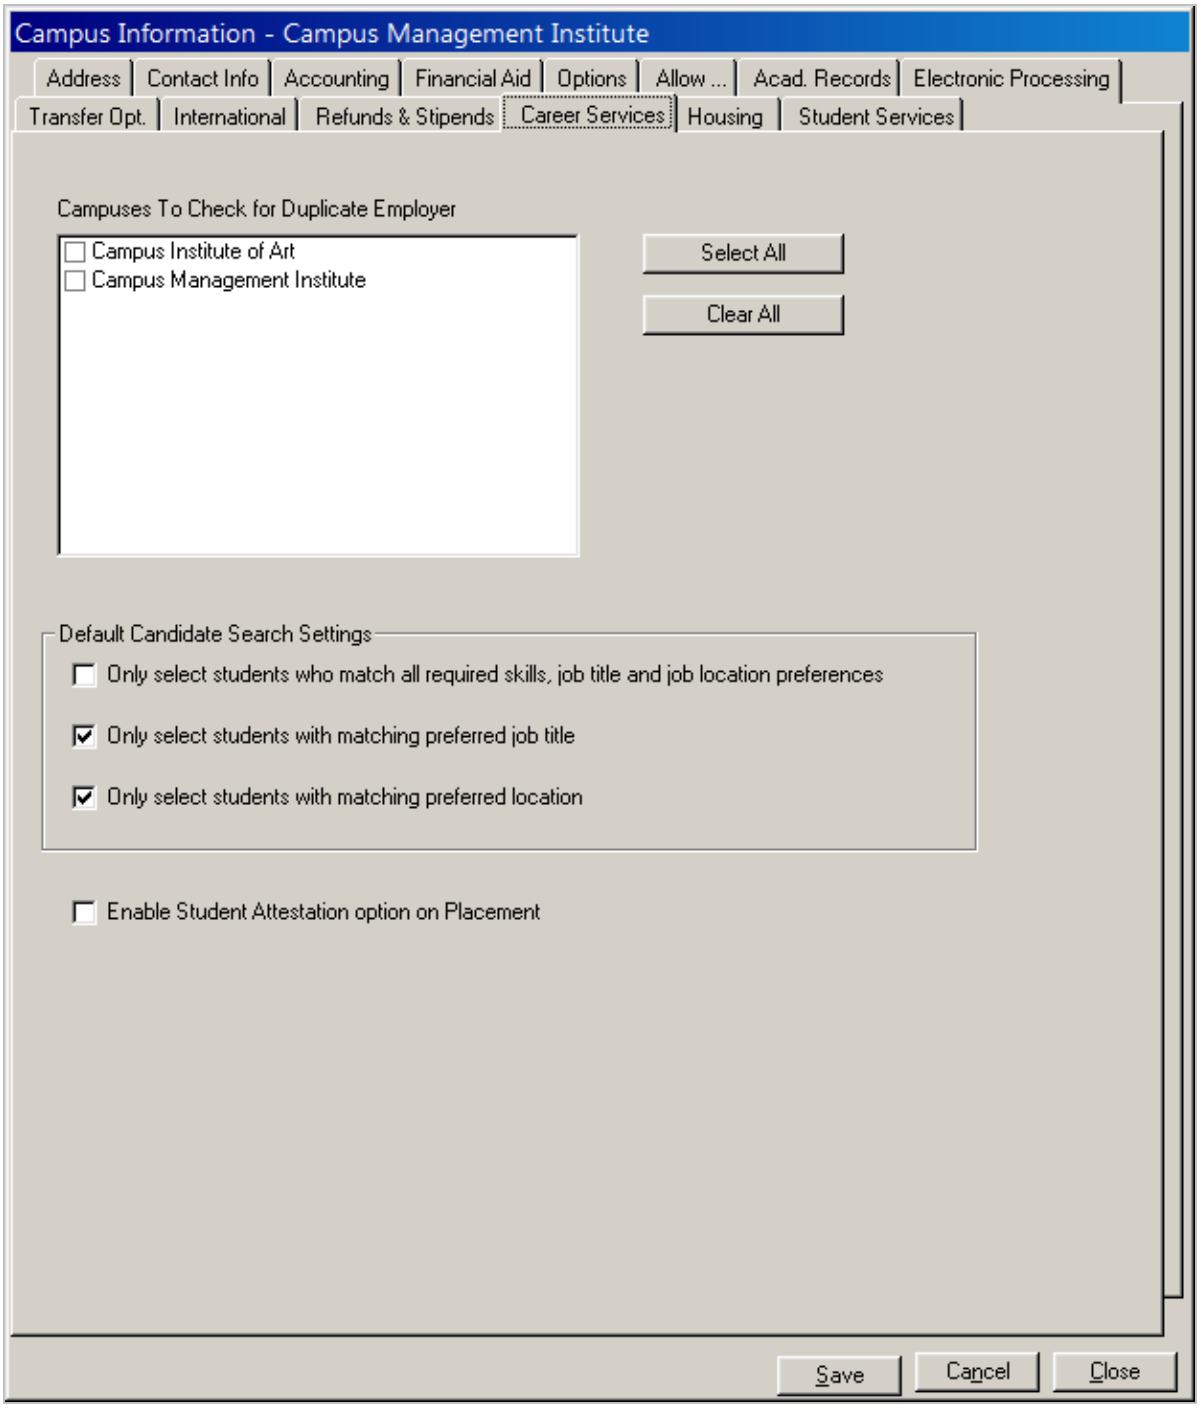
Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Campus Information - Career Service Tab

Use Career Services tab of the Campus Information form to set up campuses to check for duplicate employers and to specify default candidate search settings.

To add or edit career services options for a campus:

1. Navigate to **Setup** > **Campus Locations** > select a campus > **Add/Edit** (button) > **Career Services** (tab).



2. In the **Campus To Check for Duplicate Employer** section, select the campuses that will check for duplicate employer entries.
3. In the **Default Candidate Search Settings** section, select appropriate options to only return those students that match the criteria selected when searching for a job candidate. If no selection is made, any student that matches any of the criteria is included in the list.

   Note: The value selected here is also displayed in Step 2 of the Job Candidate Search wizard.
4. Select **Enable Student Attestation option on Placement** for this option to appear in the Placement wizard. The option will read 'Student Attestation' when the 'In Field of Study' field is enabled in the configuration setup and the campus level configuration for Student Attestation is enabled.

   Note: When editing a placement, if either of the above configurations is disabled, Student Attestation does not appear as an option in the Field of Study field, unless Student Attestation is selected as 'In Field of Study' in the existing placement record.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

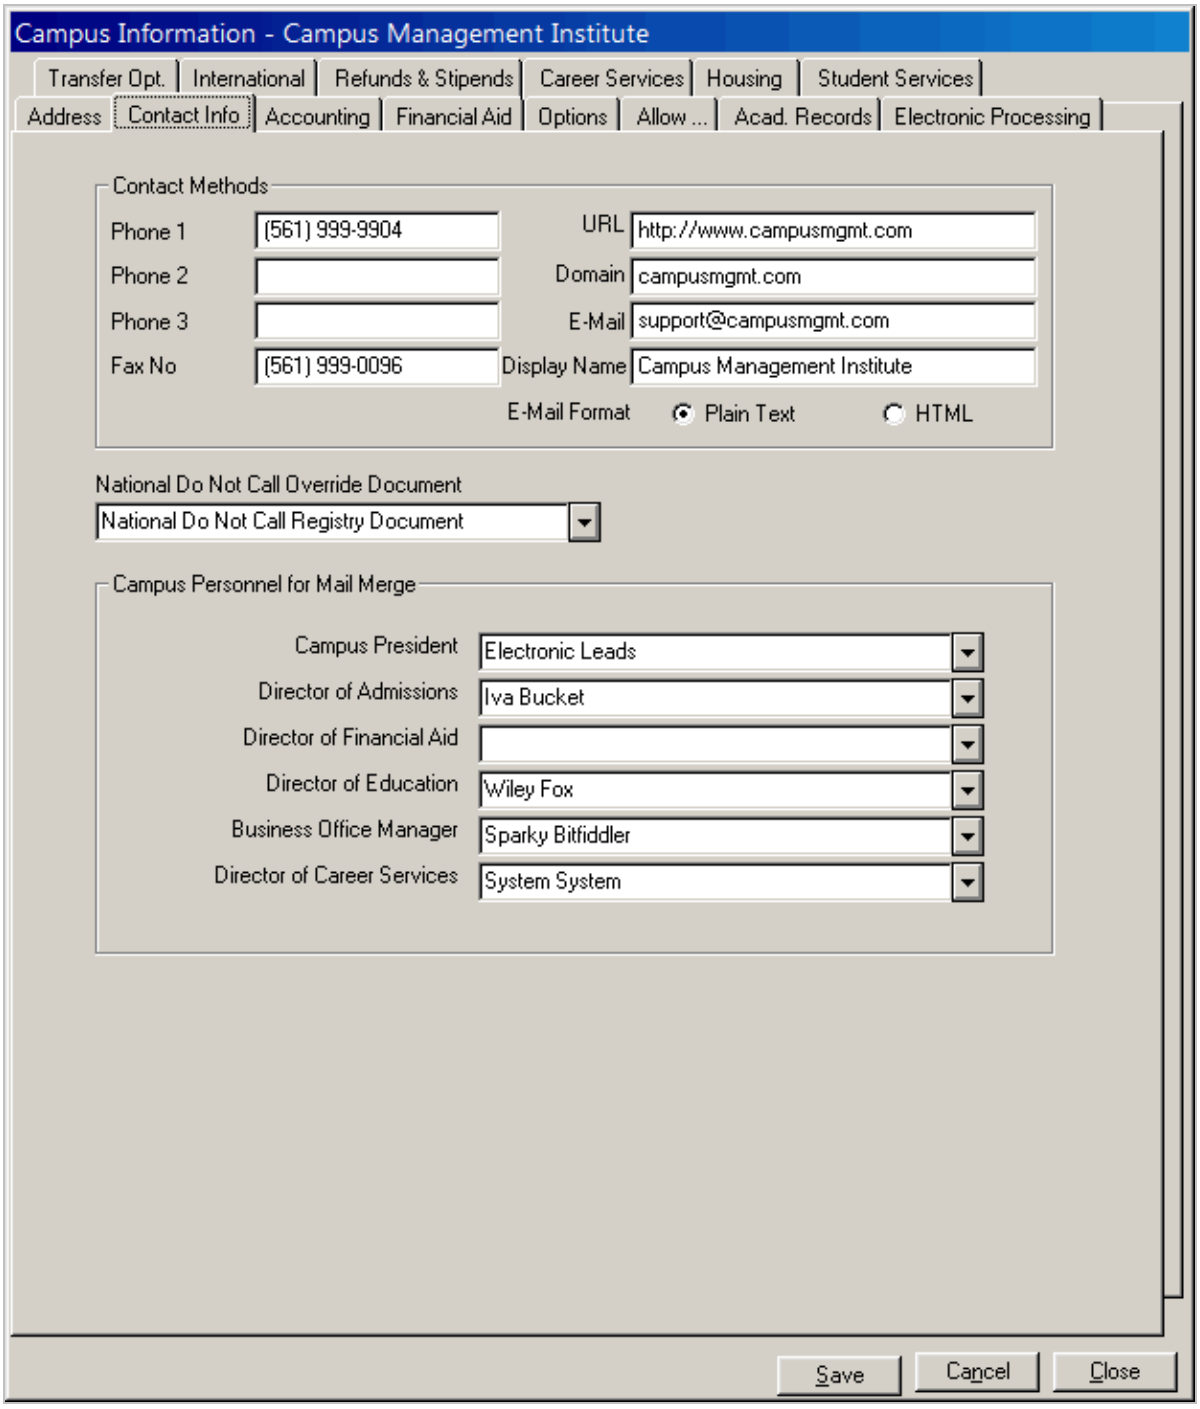
Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Campus Information - Contact Info Tab

Use the Contact Info tab of the Campus Information form to set up telephone and fax numbers, Internet address data, a campus e-mail address and e-mail format, and to select campus personnel for mail merge tasks.

To add or edit contact information for a campus:

1. Navigate to **Setup** > **Campus Locations** > select a campus > **Add/Edit** (button) > **Contact Info** (tab).



2. Specify appropriate options. For more information, see Field Descriptions.
3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Field Descriptions

Field	Description
Phone 1, Phone 2, Phone 3	Specify up to three telephone numbers for the campus.
Fax No	Specify the Fax number for the campus.
URL	Specify the URL for the campus website.
Domain	Specify the domain name of the campus website.
E-Mail	Specify the default e-mail address for the campus.
Display Name	Specify the display name of the campus on the website.
E-Mail Format	Select a formatting option for campus e-mails. The options are Plain Text and HTML.
National Do Not Call Override Document	Select the document that provides permission to override a Do Not Call listing.
Campus Personnel for Mail Merge	Select up to six contacts to be used in automated mail merge fields. The options are: • Campus President • Director of Admissions • Director of Financial Aid • Director of Education • Business Office Manager • Director of Career Services

Campus Information - Electronic Processing Tab

Use the Electronic Processing tab of the Campus Information form to configure CampusNexus Student for electronic payment processing and to set up the necessary account details. Electronic processing allows students to post payments to their accounts, make scheduled payments, make admission deposits, and submit admission fees from a web page using a third party vendor or merchant account. A VeriSign account is required for electronic payment processing.

VeriSign Requirements

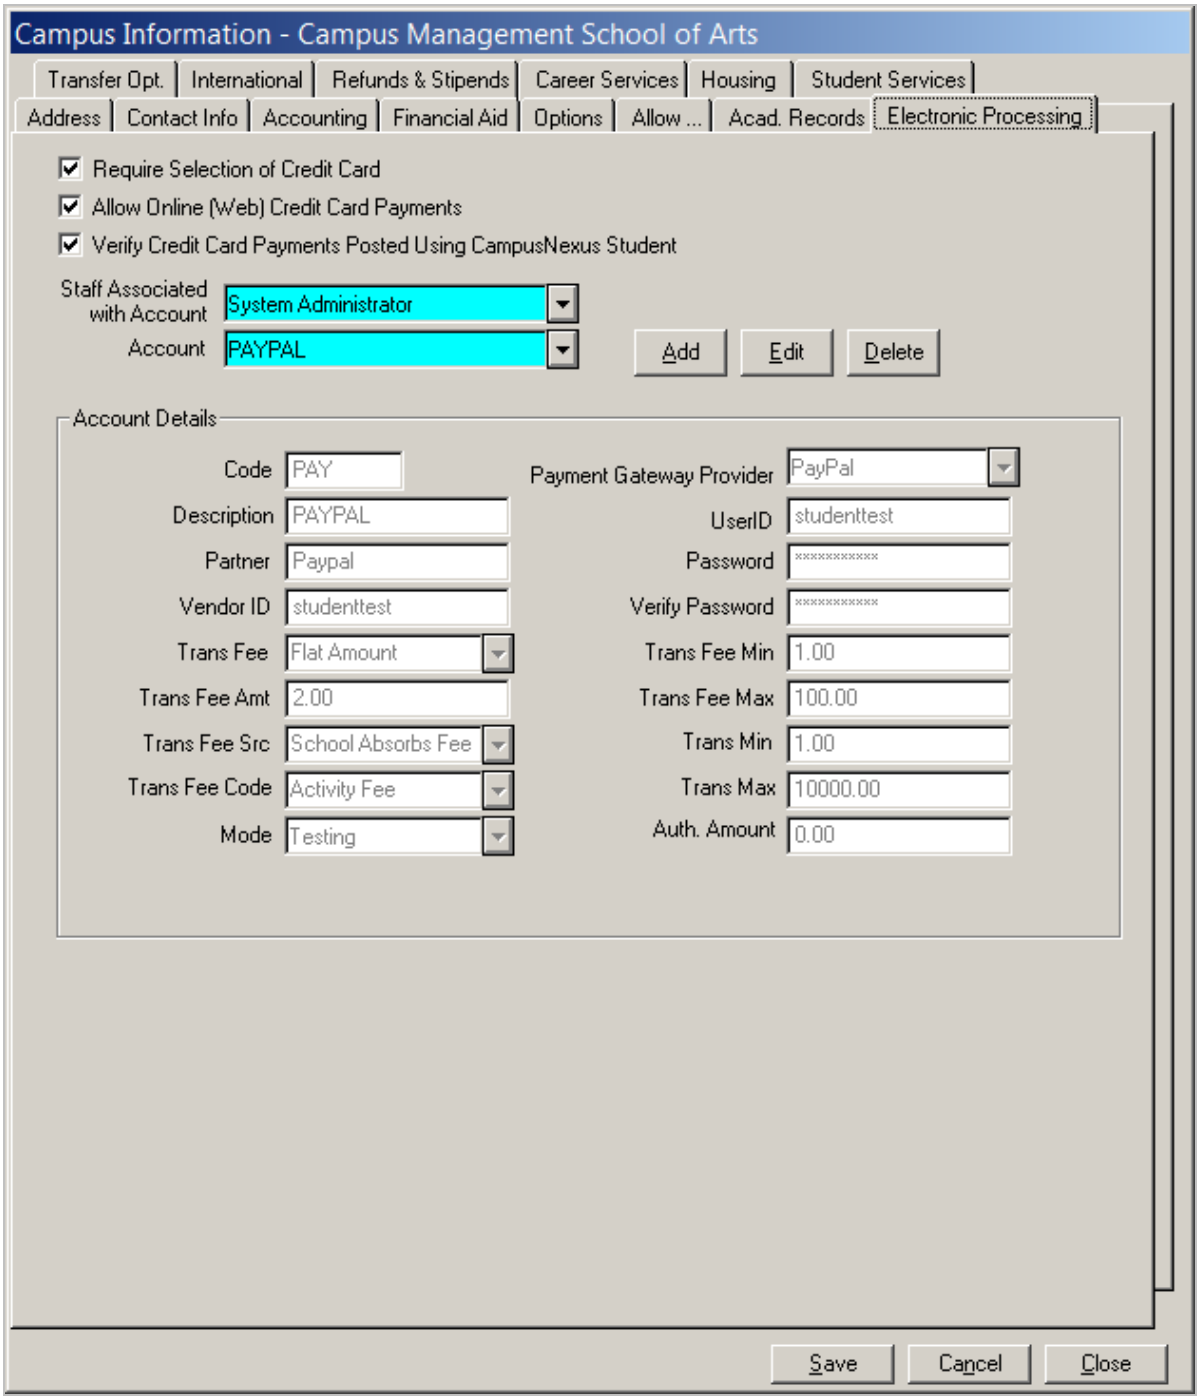
- Each institution needs to create a merchant account. If a merchant account is already established, contact the merchant bank to confirm that it allows online transactions.
- The Online Application is completed with VeriSign supplying the Merchant Information.
- An SSL Certificate must be purchased from VeriSign. A dedicated Web Server Site must be created with a public IP allowing for the SSL Certificate to be installed.
- Payflow Pro must be purchased from VeriSign. The client must be installed on the Web server, allowing for the secure connection between the Web Server and VeriSign.
- The account information supplied by VeriSign must be added to the campus setup for each campus in CampusNexus Student. (If all campuses use a single account, select that one account.) Refer to the procedure to set up electronic processing.
- Allow Online (Web) Credit Card Payments must be selected on the Campus Information > Electronic Processing tab.

For additional information regarding VeriSign, see:

- Process Electronic Drafts
- Student Accounts: Additional Tab Settings .

To add or edit electronic processing options for a campus:

1. Navigate to **Setup** > **Campus Locations** > select a campus > **Add/Edit** (button) > **Electronic Processing** (tab).



2. Specify appropriate options. For more information, see Field Descriptions.
3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Field Descriptions

Field	Description
Require Selection of Credit Card	Select this option if a credit card selection is required.
Allow Online (Web) Credit Card Payments	Select this option to allow online payments for this campus.
Verify Credit Card Payments Posted Using CampusNexus Student	Select this option to have VeriSign validate credit card transactions before they are posted to the students' Ledger Cards.
Staff Member Associated with Account	Select the staff person assigned to web transactions from the drop-down list. You can only select staff members with an email address on file.
Account	Select the account from the drop-down list.
Click **Add** or **Edit** to enable the following fields.	
Code	Specify a code for the account.
Description	Specify a descriptive name for the account .
Partner	Specify the Partner value assigned by VeriSign.
VendorID	Specify the VendorID value assigned by VeriSign.
Trans Fee	Assign a transaction fee to be a percentage of the payment or a flat amount.
Trans Fee Amt	Based on how you set up the transaction fee, select the transaction fee amount to be an amount or a percentage.
Trans Fee Src	Assign the fee source to come from the student or the institution.
Trans Fee Code	Assign a transaction fee code for tracking purposes.
Mode	Set the mode to Live if you are sending real data, otherwise select Testing to send dummy data using a test account.
Payment Gateway Provider	Specify the Payment Gateway Provider: PayPal or ACI. **Note**: If ACI is selected, the **Vendor** field is changed to **Division Business ID**. Also, the **Partner** field is not applicable for ACI. Anthology Inc. products support only the “Funding Portal” product from ACI.
UserID	Specify the UserID assigned by VeriSign.
Password	Specify the Password assigned by VeriSign.
Verify Password	The field is used to verify that the password entered matches the password assigned by VeriSign.
Trans Min Fee	Assign a minimum transaction fee for each transaction.

Field	Description
Trans Max Fee	Assign a maximum transaction fee for each transaction.
Trans Min	Assign a minimum transaction amount.
Trans Max	Assign a maximum transaction amount .
Auth. Amount	Specify the amount being used to authorize the credit card when adding a new credit card. Some credit card processors do not allow authorization amount of $0. This amount can be changed based on the processor's requirement if needed.

Online Student Payment Process

1. The student visits the CampusNexus Student web interface and logs in with user name and password.
2. The student selects the "Online Payment" option from the Financial Information tab.
3. If a Scheduled Payment Plan exists for the student, the student can select/view a scheduled payment to which the transaction applies.
4. If credit card information is already on file, the student can use that account or create a new account.
5. When the form is completed, a confirmation is displayed. The amount being transferred plus any transaction fees charged by the institution are displayed. If the information is correct, the student submits the payment.
6. A confirmation displays the accepted payment or a reason for a rejected payment.
7. The student prints a receipt of the payment or views the ledger card which shows the updated payment information.

Campus Information - Financial Aid Tab

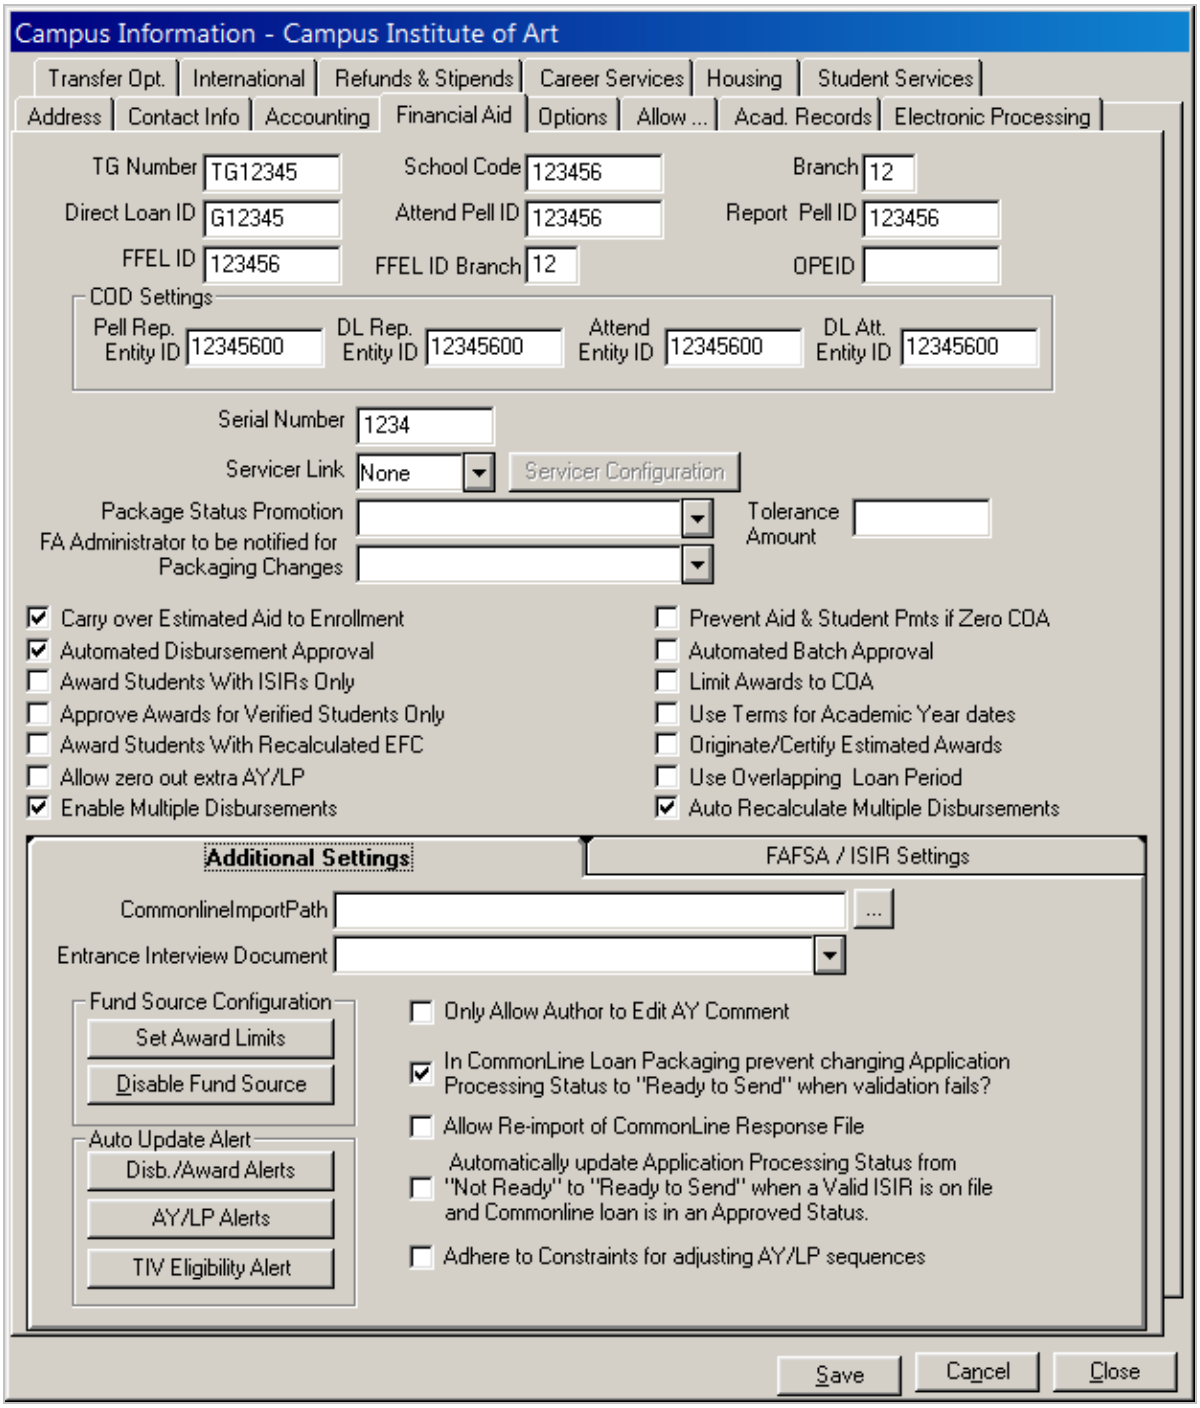
Use the Financial Aid tab of the Campus Information form to set up campus-related financial aid information necessary for working with the Department of Education (ED) and its divisions and branches. This form also enables administrators to set parameters related to the third-party Direct Loan tab. Additional financial aid information is required on the COD Grants tab.

See Locking Academic Year/Loan Period Awards for instructions to lock AY/LP awards.

To add or edit financial aid information for a campus:

1. Navigate to **Setup** > **Campus Locations** > select a campus > **Add/Edit** (button) > **Financial Aid** (tab).

   This tab contains identification codes that may have been assigned to your school by divisions of the U.S. Department of Education. They are required if your school participates in Title IV student financial aid programs.



2. Specify the **TG Number** (SAIG mailbox; destination point) that identifies this campus to the Department of Education (TG followed by 5 alphanumeric characters).
3. Specify the **School Code** for this campus (6 characters). The school code is the Federal School Code listed on the school's ECAR (Eligibility and Certification Approval Report); also called the Pell ID.
4. Specify the Department of Education **Branch** code if this campus is a branch of another school.
5. Specify the **Direct Loan ID** used by this campus for processing Direct Loans with Common Origination and

Disbursement (COD). This field contains six characters and begins with a G or E.

6. Specify the **Attend Pell ID** that is used when processing Pell grants for students who are attending this campus. The Attend Pell ID is also used on ISIRs. This campus could also be part of a larger organization that uses the Report Pell ID. Attend Pell IDs may not be changed without updating all students who had the original Attend Pell ID in CampusNexus Student.

   When you try to modify a campus's Attend Pell ID, CampusNexus Student checks if the following conditions are met:

   a. There are no Originated Pell Awards for students at the selected campus. CampusNexus Student checks if there are any students who have an Originated Pell Award with a status of 'Accepted' or 'Batched to Send' for the campus under the original Attend Pell ID. These values appear in the 'Origination Status' field of the Pell Grant form.

   b. There are no ISIRs that were matched to students at the selected campus that are associated with the Attend Pell ID. If the campus' Attend Pell ID was not already the same as the First College Choice or Pell ID, and there are ISIRs that were matched to a student at this campus using the Attend Pell ID's value, CampusNexus Student does not allow the Attend Pell ID for that campus to be changed, since the system would try to match the ISIR with an Attend Pell ID that no longer exists.

   If the conditions are met, the Attend Pell ID is updated. In addition, the student's Attend Pell ID is updated with the new Attend Pell ID on the student's campus' Pell tracking record. This ensures that the student's previous Pell award information is associated with the new Attend Pell ID for the student's campus.

   Informational messages specific to the condition above that were not met are displayed.

   The business logic behind this validation for the Attend Pell ID is as follows:

   a. If Pell Awards were successfully originated using the campus' Attend Pell ID and were accepted by COD, it is likely that the Attend Pell ID is correct, and therefore should not be changed.

   b. If ISIRs were imported and matched to a student at the campus and the Attend Pell ID matched on the ISIR College Choices that came from CPS, it is likely that the Attend Pell ID is correct, and therefore should not change.

7. Specify the **Report Pell ID** of the campus or organization that is reporting Pell Grant activity for this campus. This ID could be used by several campuses if they are organized under one corporate identity. It is possible that Attend Pell ID and Report Pell ID are the same.

8. Specify appropriate values in the **FFEL ID** and **FFEL ID Branch** fields. This information is populated in the Source School ID field .

9. Specify the **OPEID** only if the 8-digit OPEID for your institution is different from the 6-digit School Code appended with the 2-digit Branch.

   If you specify an OPEID # for a campus, it should only be populated with an 8 digit number.

   For the specific processes that utilize the OPEID field, please access Regulatory Help.

10. *COD Settings:* Define the **Pell Reporting Entity ID** for each campus participating as a full participant.

11. *COD Settings:* Define the **DL Rep. Entity ID** (Direct Loan Reporting Entity ID) for each campus participating as a full participant.

12. *COD Settings:* Define the **Att Entity ID** {Attend Entity ID} for each campus participating as a full participant.

13. *COD Settings:* Define the **DL Att. Entity ID** {Direct Loan Attend Entity ID} for each campus participating as a full

participant.

14. The **Serial Number** is used in the Financial Aid General Ledger system. SEOG, FWS, and Perkins authorization levels are assigned to the "Campus-Based Serial Number". This is a 6-digit number that is assigned by ED. An organization can have one or many campuses assigned to the same serial number. The authorization comes from ED under the serial number. When posting to CampusNexus Student, the institution can post the entire authorization amount to the serial number, or it can split the amount and post individual amounts to each campus within the serial number. This number is also used in the FISAP process to gather data for specific campuses.
15. The **Servicer Link** is used when a school has an arrangement with Global Financial Services, Inc. to process financial aid records for your students. In that case, select **Global** from the list. If not, select **Other** or **None**.
16. Click **Servicer Configuration** if you process financial aid through a third-party servicer such as Global. See Servicer Configuration for more information.
17. Select a **Package Status Promotion** code. The value is saved to SyCampus.FaPackStatusPromoID. The list of available methods is from the FaPackStatusPromo table, which is maintained at Lists > Financial Aid > Packaging Status Promotion. To remove the code from this field, click on the field and press **Delete**.
18. Select the **FA Administrator to be notified for Packaging Changes**. CampusNexus Student assigns a review activity to this person for each packaging change.
19. Specify a **Tolerance Amount** to be set for the packaging status promotion to handle any small differences - such as bank fees or disbursement schedule changes - that might occur in the student's award that would cause the student to fall out of the promoted packaging status.

    The Packaging Status Promotion process applies the tolerance to the four packaging status promotion attributes:

    - Aid > COA
    - Aid > Inst Costs
    - Approved > COA
    - Approved > Inst Costs

    The RBS tolerance level can be configured in the Tolerance Amount field on the Financial Aid tab on the Campus Information form. The maximum tolerance limit is $1000. If the Tolerance Amount field is zero or remains blank, no tolerance is applied.
20. Select **Carry over Estimated Aid to Enrollment** for CampusNexus Student to handle this process or leave the check box cleared if you want to do this manually. For more information see Financial Aid Estimates.
21. Select **Automated Disbursement Approval** to specify that the campus uses the auto approval feature when approving disbursements to pay.
22. Select **Award Students With ISIRs Only** to prevent awarding to students without ISIRs. This ensures compliance with Title IV regulations. Once this feature is set up, the user may award non-Title IV aid to the student without an ISIR, but is prevented from awarding fund sources that have a fund source type of Title IV. The Title IV indicator on the Fund Source Setup (Lists > Financial Aid > Fund Source) is used to define which fund sources meet the Title IV designation for packaging.
23. Select **Approve Awards for Verified Students Only** to restrict users from saving the students award status to *Approved* when their verification status is *Selected, Not Verified*.

    If you select this option, the *Approved* status is available in the menu when adding/editing a fund source; however, an informational message is displayed stating that the verification status of *Verified* is required before CampusNexus Student saves the student's award status as *Approved*.

If the fund source is a PLUS loan, you can save the student's award status to *Approved* in the *New Source of Aid* form. For more information, see New Source of Aid.

24. Select **Award Students With Recalculated EFC** to provide estimated financial aid packages after the EFC (Expected Family Contribution) has been changed, but before a new ISIR (Institutional Student Information Record) has been received. This allows you to provide prospective students with accurate packaging information while waiting for the corrected ISIR from the Central Processing System.

25. Select **Allow zero out extra AY/LP** to allow CampusNexus Student to adjust a packaged academic year (AY) and loan period (LP) when "Course work to reduce AY/LP's" is enabled. With this check box enabled, credits or hours and weeks can be adjusted to zero even when it cannot be removed due to packaged aid, comments, or applied locks. CampusNexus Student can then adjust prior sequence credits or hours and weeks as more "Course work to reduce AY/LP's" is entered.

    This setting can work in conjunction with the "Do not adjust AY/LP if award is fully disbursed" setting. With that setting enabled, CampusNexus Student stops adjusting AY/LP sequences with a sequence that contains a fully disbursed award.

    Course work to reduce AY/LP's" are approved Transfer Credits, CLEP courses, associated courses, and course work prior to the version start date (if null Exp. Start Date).

    The Student Pace Evaluation (SPE) tool checks the "Allow zero out extra AY/LP" setting when adjusting AY/LP. For example, if PP2 has a disbursement, and "Allow zero out extra AY/LP" is selected, SPE sets PP2 to zero. If the option is not selected, CampusNexus Student notifies the user that the AY/LP could not be adjusted.

26. Select **Enable Multiple Disbursements** to enable this feature at your campus, provided you have a CampusNexus license. Having an active CampusNexus license is essential to use CampusNexus features. If you do not have a license, you will be able to see some aspects of some features (via the user interface and Help), and you may learn what options you will gain with CampusNexus, but the screens will show clear reminders that feature activation requires the license.**Note**: Before using Multiple Disbursements features, set up the required system and campus level definition rules. See Configuring Multiple Disbursement Definitions.

27. Select **Prevent Aid & Student Pmts if Zero COA** to prevent users from awarding aid to a student for an academic year that has a Cost of Attendance (COA) of zero (0).

28. Select **Automated Batch Approval** to enable the user to auto-post approved disbursements to a new batch and set the batch status to **OK to Post**.

29. Select **Limit Awards to COA** to limit awards to COA. This prevents institutions from over-awarding. CampusNexus Student prevents the creation of a student payment plan when the COA is zero.

    When creating student payment plans, internal logic defaults the academic year for each scheduled payment to the applicable academic year based on the expected date of the payment. The academic year for the payment is defaulted to the academic year record in which the expected date of the payment is within the academic year start and end date.

    Selecting this check box also allows a $300.00 tolerance above the COA only for the Federal Work Study fund source. This accommodates instances where a student has completed more work hours than anticipated and is due payment from Federal Work Study.

30. Select **Use Terms for Academic Year dates** to allow the academic start and end dates to be matched to the term start and end dates, even if holidays fall within an academic year, for term programs based on Financial Aid Terms configured in CampusNexus Student. Refer also to Enrollment, Programs, Packaging, Awards,and Applicant.

- If this check box is not selected, and the school has clock hour program versions, perpetual terms (no term with start date within 15 days of start date), or does not have the number of terms and credits configured,CampusNexus Student adds the number of weeks for the academic year sequence from the program setup to determine the dates. If there are 5 consecutive days or more of holidays in the period, the period will be added to the end date.
- If this check box is selected and the term is defined as a Financial Aid Term and associated with the student's enrollment campus, then:

    a. CampusNexus Student finds the term that has a start date that matches the student's program start date, and assigns this date to the first Academic Year start date in the sequence.

    b. Next, CampusNexus Student finds the term with a date greater than the end date of the term but closest to that date and considers it the next term that is part of the academic year. This step is repeated until the number of terms considered part of the academic year is equal to the total number of terms in an academic year.

    c. Once the final term of the academic year is determined, the end date of that term will be the academic year-end date.

    If the student's program of study is greater than one academic year, the start date for the subsequent academic year will be the next term with a date greater than the previous academic year-end date but closest to that date, for the student's entire program of study.

    Note: Only Financial Aid Terms will be considered for these date calculations.

Note: If the **Total Number of Terms in an Academic Year** has not been defined on the Financial Aid Program Version for the program in which a student is enrolled, date calculations will reflect calculation formulas as if the check box was cleared (not selected).

Note: Program transfers and the existence of transfer credits processes will be taken into consideration since these credits may result in a student completing a program in fewer terms than the total number of terms defined for the student's program of study. Under these circumstances, the average number of credits taken in a term is calculated, and if a student's transfer credits exceed the number of credits in a term, the academic year is reduced by the term. The steps are repeated until the accurate number of terms that the transfer student will attend is determined, and the transfer credits are deducted from the end of the program. See also Transfer Enrollment for additional information.

31. Select **Originate/Certify Estimated Awards** to enable the Award Status of an award to be ignored when determining if the award's Origination Status or Application Processing Status can be updated to 'R' (Ready to Send).

    If this check box is selected, awards for Title IV Aid may be certified even though the Award Status is 'Estimated'. When a Pell, ACG, SMART, or Direct Loan has an Award Status of 'E' (Estimated), 'P' (Pending), or 'A' (Approved), and has award amounts and disbursement information entered, its Origination Status may be set to 'R' (Ready to Send).

    If a Subsidized Stafford, Unsubsidized Stafford, PLUS or ALT Loan has an Award Status of 'E' (Estimated), 'P' (Pending), or 'A' (Approved), and contains award amounts and disbursement information, its Application Processing Status may be set to 'R' (Ready to Send.

    In addition, if **Originate/Certify Estimated Awards** is selected and the **Automatically update Pell Origination Status to Ready to Send?** flag (Setup > Financial Aid > Pell) is enabled, the Origination Status will be converted to an 'R' if the Award Status is not equal to 'C' (Cancel) when an ISIR is imported or during the ISIR Matching process.

When manually updating a Pell award, when **Originate/Certify Estimated Awards** is not selected, regardless of how the **Automatically update Pell Origination Status to Ready to Send?** flag is set, if the Origination Status is set to 'Ready to Send' and the Pell Award Status is updated to 'E' (Estimated), or 'P' (Pending), the message "Origination Status cannot be 'Ready to Send' until the Pell Grant Status 'Approved' is displayed" when an attempt is made to save the award.

32. Select **Use Overlapping Loan Period** to create a stub loan period if the student has an overlapping loan period. If this option is not selected, CampusNexus Student does not consider the overlapping loan period and loan periods are created without a stub loan period.

    Note: This option also controls the packaging logic. If this option is selected, CampusNexus Student always considers the loan amounts received in the overlapping loan period during packaging for the first loan period (regardless of whether the first loan period is a stub loan period). If this option is not selected,CampusNexus Student ignores any amount received in the overlapping loan period during packaging.

    For more information regarding the stub loan period and overlapping loans, refer to Packaging for Overlapping Loans.

33. Select **Auto Recalculate Multiple Disbursements** to enable this feature at your campus.

Additional Settings Tab

34. Click and select the **CommonLineImportPath** directory.

35. Select the **Entrance Interview Document**. When the document has been added to the student's document folder and the document status code is "OK", "REC", "RECVD", "RECEIVED", "REC'VD", or "A" and is associated with an "Approved/On file" status, the entrance interview date in the Academic Year form is set to the date that the document was received.

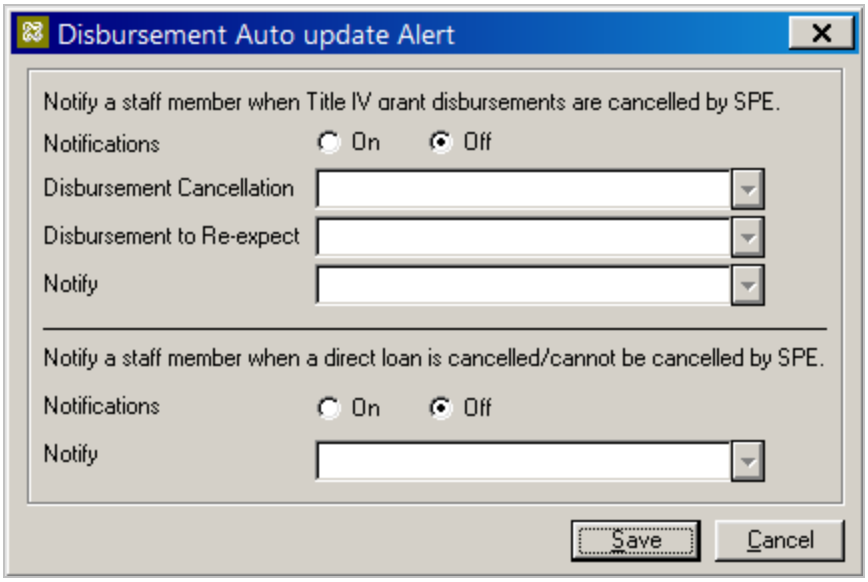
36. *Fund Source Configuration:* Click **Set Award Limits** and choose the Award Selection Criteria (academic year and fund sources).

37. *Fund Source Configuration:* Click **Disable Fund Source** to deactivate a fund source by award year.

38. *Auto Update Alert:* Click **Disb./Award Alerts** to set up notifications for the following incidents:

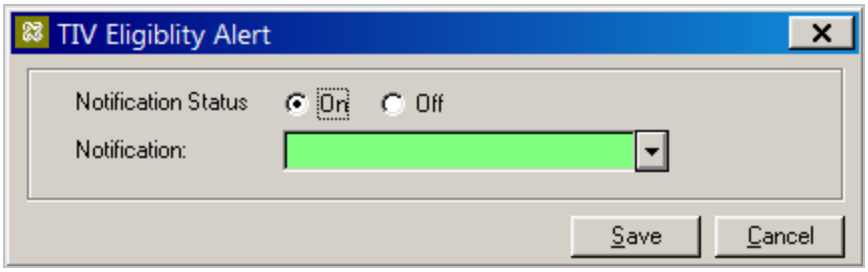
    - Title IV grant disbursements are cancelled by SPE. When the payment period start date of a Title IV grant disbursement is moved beyond the Award Year's end date by the SPE, the disbursement is cancelled and activities can be configured to notify the appropriate staff member of the cancellation. For more information, see Student Pace Evaluation (SPE) and Activities Codes.
    - A direct loan is cancelled or cannot be cancelled by SPE. This form allows you to specify the appropriate staff member to notify when the loan is cancelled or cannot be cancelled by the SPE due to invalid BBAY dates. For more information, see Direct Loan Setup and Student Pace Evaluation (SPE).

    The default setting for the alerts is **Off**. To enable notifications, change the setting to **On** and select the staff member to be notified.



39. *Auto Update Alert:* Click **AY/LP Alerts** to set up AY/LP notifications for a user.

40. *Auto Update Alert:* Click **TIV Eligibility Alert** to set up Title IV Eligibility notifications for a user. The default setting for the alert is **Off**. To enable notifications, change the setting to **On** and select the staff member to be notified. For more information, see Academic Year Form, Loan Periods, and Student Pace Evaluation (SPE).



41. Select **Only Allow Author to Edit AY Comment** if applicable.

42. Select **In CommonLine Loan Packaging prevent changing Application Processing Status to "Ready to Send" when validation fails?** if applicable.

43. Select **Allow Re-import of CommonLine Response File** if applicable.

44. If applicable, select **Automatically update Application Processing Status from "Not Ready" to "Ready to Send" when a Valid ISIR is on file and CommonLine loan is in an Approved Status.**

45. Select **Adhere to Constraints for adjusting AY/LP sequences** to prevent the final Academic Year / Loan Period Evaluation logic from over adjusting or deleting Academic Year (AY) and Payment Period (PP) data for enrollments using non-term program versions. In all of the documented scenarios below, the elements are eligible to have date adjustments performed by the SPE should a student fail to progress during their final AY/LP

    a. When the following conditions are met, the AY/LP and associated payment period weeks and hours or credits are eligible to be automatically adjusted by the system; however, none of the values will be adjusted to 0:

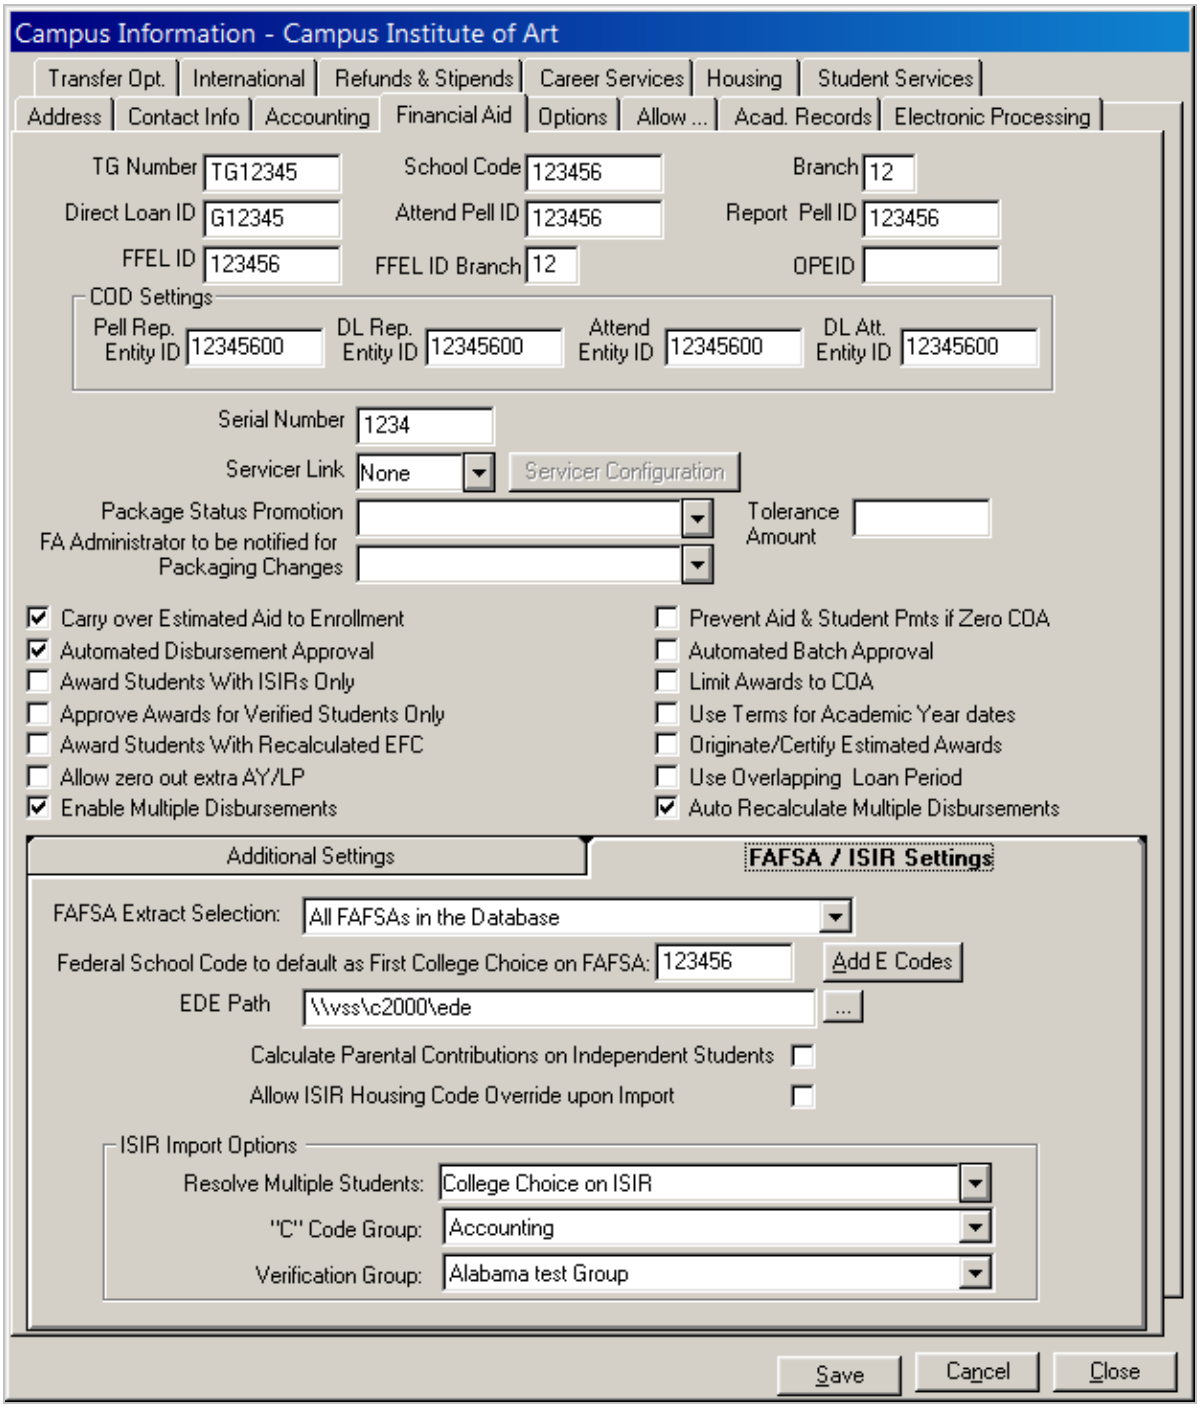
        - A single disbursement has been posted to the AY, but the AY is not fully disbursed.
        - A ledger transaction has been posted because attendance was posted in the PP.
        - Active courses are on student schedules associated with a PP in the AY.

b. When an award, excluding payment plans or agency payment plans, for a final AY/LP is fully disbursed, the weeks and hours or credits are not eligible to be automatically adjusted by the system.

An activity with the description *"The AY/LP definition cannot be changed due to an adjustment constraint."* is assigned to the student and staff user when one of the above conditions exists.

FAFSA/ISIR Settings Tab

46. Click the **FAFSA/ISIR Settings** tab to finish the Financial Aid configuration settings.



Note: For the latest content about FAFSA, ISIR and COD processing, access Regulatory Help.

47. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

For more information about locking AY/LP awards, see Locking Academic Year/Loan Period Awards.

Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

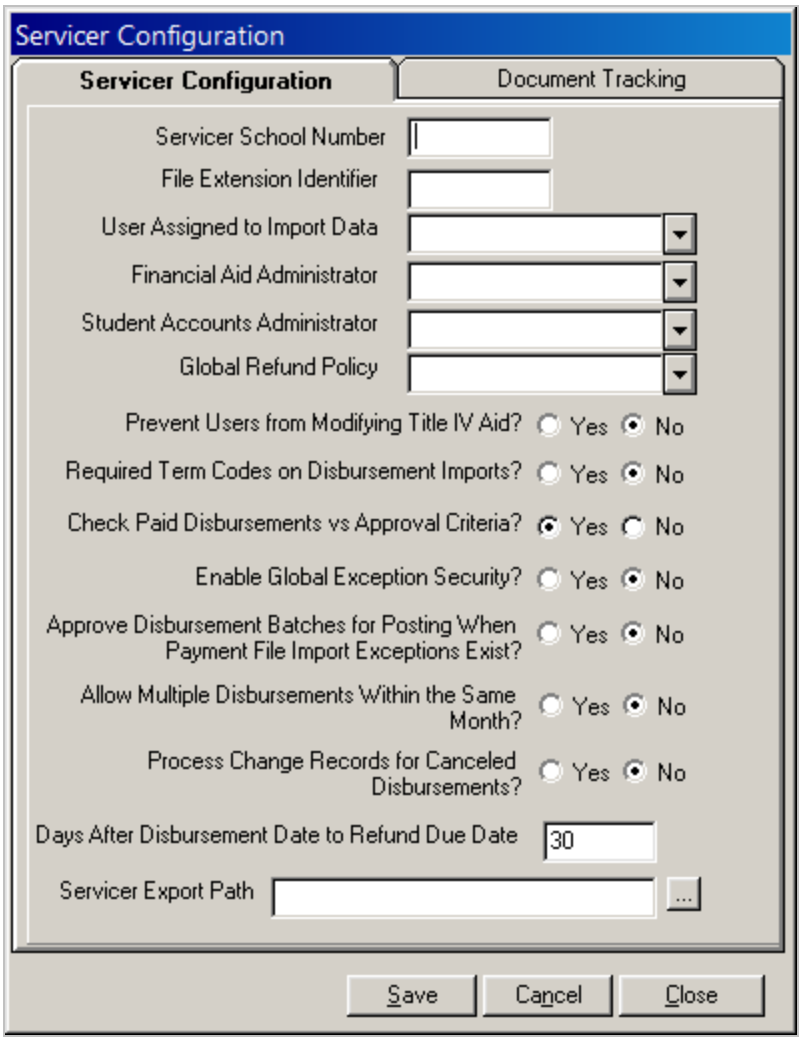
Servicer Configuration

If your institution uses Global Financial Services for processing financial aid, use this form to provide CampusNexus Student with some of the necessary setup information. If you need further details, consult Global at http://globalfas.com/

Once you have configured your Servicer correctly, CampusNexus Student updates the student's document list when an SD file is imported from Global. The student's Document Folder has a current record of the status of each document required by Global for Title IV.

To enter the data for Global:

1. Navigate to **Setup** > **Campus Locations** > select a campus > **Add/Edit** (button) > **Financial Aid** (tab).
2. Select **Global** or **Other** from the Servicer Link drop-down menu.
3. Click **Servicer Configuration**. CampusNexus Student displays the following form.



4. If the Servicer Link selection is *Global*, a Global Setup form is displayed. This form is used to set up the following

information:

Field Descriptions

Field	Description
Servicer School Number	10 characters. Enter the number assigned to your institution by the servicer. This number is used when exporting FA records to the servicer. Contact your servicer if you do not know this number.
File Extension Identifier	8 characters. Provided by your servicer. Contact your servicer if you do not know this information.
User Assigned to Import Data	Select from a list of all users assigned to any group with more than Display Only Permissions in FA.
Financial Aid Administrator	Select from a list of all users with more than Display Only Permissions in CM and Daily/FA.
Student Accounts Administrator	Select from a list of users with more than Display Only Permissions in SA Post.
Global Refund Policy	Select the refund policy used for the Global refund calculation.
Prevent Users from Modifying Title IV Aid?	Select Yes or No. The default is Yes.
Required Term Codes on Disbursement Imports?	Select Yes or No. The default is Yes. If you selected Yes, define your disbursement schedules by the Academic Year Start Date Range, Campus, and Fund Source. If you have questions about your disbursement dates, contact your servicer. If you have questions on how to set up your schedules, contact Support (1-800-483-9106).
Check Paid Disbursements vs Approval Criteria?	Select Yes or No. The default is No.
Enable Global Exception Security?	Select Yes or No. The default is No.
Approve Disbursement Batches for Posting When Payment File Import Exceptions Exist?	Select Yes or No. The default is No.
Allow Multiple Disbursements Within the Same Month?	Select Yes or No. The default is No.
Process Change Records for Canceled Disbursements?	Select Yes or No. The default is No.
Days After Disbursement Date to Refund Due Date	If the "Check Paid Disbursements vs Approval Criteria?" option is Yes, you can enter a number in this field.
Servicer Export Path:	Specify the path to the location of the academic extract files.

Note: Contact your servicer if you have questions about the data for this form.

5. Click **Save**.

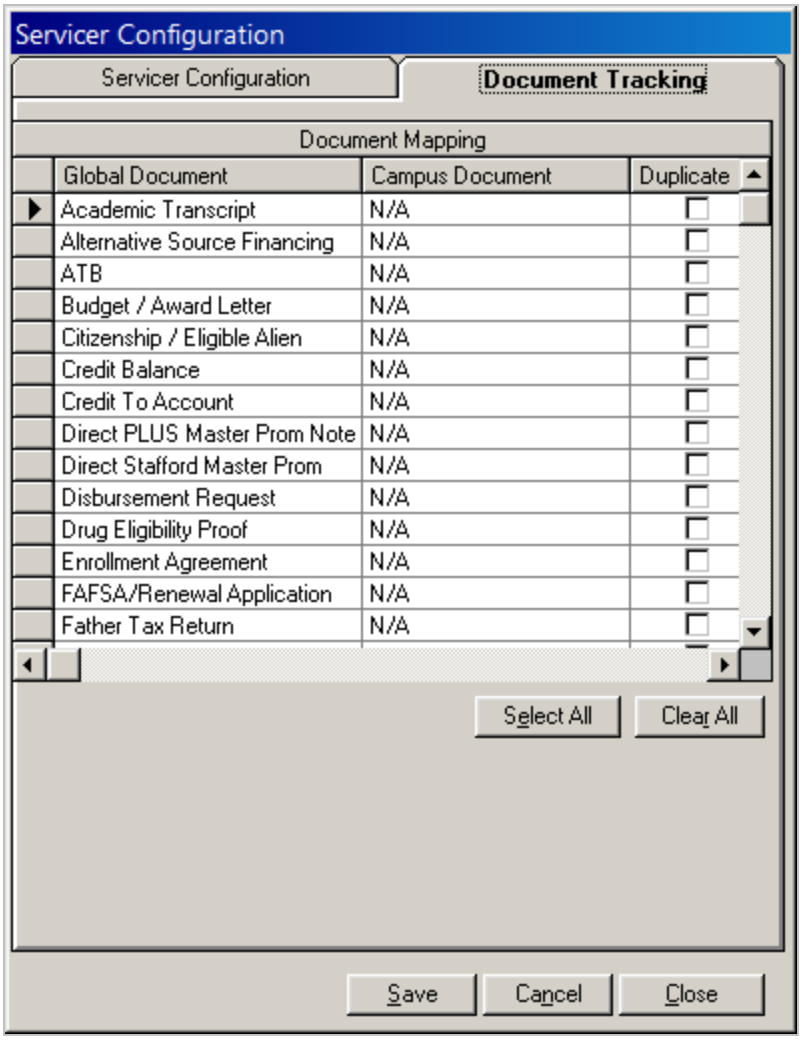
To continue further Global servicer configuration, proceed as follows:

1. Specify your terms as Global Terms. Enter the **Add/Drop Date** for each **Global Term** for institutions that are using the Add/Drop and Pre-Pull Academic Extracts. (**Lists** > **Academic Records** > **Term** > **Edit**).
2. Enter the fund source code used by the servicer in the **Third Party Code** field. These codes are provided by your servicer (Fund Source Map). Make sure all aid is correctly marked as "Title IV". (**Lists** > **Financial Aid** > **Fund Source** > **Edit**).
3. The 6-digit Lender ID should be populated in the **Lender/ServicerID** field for all lenders packaged by your servicer. These codes are provided by your servicer (Lender ID Map). Enter the Default Servicer and Guarantor on the lender. (**Lists** > **Financial Aid** > **Lenders** > **Edit**).
4. Verify that the **Clock to Credit** indicator is set up correctly for each program version. Select this option if your institution is subject to a Clock Hour to FA Credit Conversion ratio. Enter the Service Program ID. (**Lists** > **Financial Aid** > **Programs** > **Edit**).
5. If the **Servicer Link** field is turned on by selecting a servicer, COD and Direct Loan must be turned off for the Direct Loan ID and Report Pell ID in the Financial Aid Settings. (**Setup Menu** > **Campus Locations** > **Campuses** > **Financial Aid tab** > **Servicer Configuration**).

Note: When you edit a Campus, all changes are audited. Audit verifications are handled at the database level only and performed through appropriate SQL queries.

Document Tracking Tab

1. Click the **Document Tracking** tab. *Global* documents appear on the left side, drop-down lists for *Campus* documents appear on the right side.



2. When you click inside a Campus Document cell, it becomes a drop-down list. Select a **Campus Document** to correspond to each Global document listed in the grid.
3. When the **Duplicate** check box is selected, the document that is configured is allowed to appear multiple times within the student's Document Tracking. If this option is not selected and a document sent in the SD file that exists in the student's folder is in an "On file" status, the record is ignored and will not appear multiple times for the student.
4. Click **Save**. CampusNexus Student displays a validation message if you left any Global documents unmapped.
5. Click **Yes** to continue or **No** to go back and map all documents.

   If there is a document in the SD file that is required (status of **Y** or **N**) but it is not mapped to a CampusNexus Student document, a Servicer Exception is created for the document. A servicer exception is also created if CampusNexus Student cannot find an enrollment for a student contained in the SD file.
6. Click **Close** to close the form and save your entries.

Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

The import of the SD file will not delete documents from a student's document folder when they are not needed by Global FAS. Therefore, we strongly recommend that the setup of CampusNexus Student documents mapped to the Global document list

(**Setup** > **Campus Locations** > **Campuses** > **Financial Aid** > **Servicer Configuration** > **Document Tracking**) not be used for purposes other than tracking the completion of a student's file at Global FAS.

We also recommend that the list of documents not be added to the student's document folder. Furthermore, any existing document triggers that include Financial Aid documents should be deactivated. These guidelines ensure that only those documents required for the student's file are included in their CampusNexus Student document folder.

Locking Academic Year/Loan Period Awards

Users can direct CampusNexus Student not to update Academic Year (AY) and Loan Period (LP) Credits/Hours/Weeks when entering transfer credits if any award in the AY/LP is fully disbursed.

To enable this feature:

1. Navigate to **Setup** > **Campus Locations** > select a campus > **Add/Edit** (button) > **Financial Aid** (tab).
2. On the Additional Settings tab, select **Do not adjust AY/LP if award fully disbursed**.
3. Click **Save**.

In addition, users can assign a hard coded system activity to a specific staff user with the permissions to alert the staff that CampusNexus Student did not change the individual students credits/hours or weeks values due to an Award being fully disbursed.

1. On the Additional Settings tab of the Financial Aid form, click **AY/LP Alerts**. The AY/LP Alert dialog box is displayed.
2. Select **On**. The Notify list is activated.
3. Select a person to receive the activity from the Notify list.
4. Click **Save**.

The following scenarios are affected by this enhancement:

- CampusNexus Student adjusts an AY/LP sequence when transfer credits, CLEP, Associated, or reassigned courses prior to the PV start date are added and no awards have been fully disbursed for that AY/LP.
- CampusNexus Student adjusts the AY/LP and associated attributes for awards that are in a partially disbursed status. A notification message will not be generated if the AY/LP definition cannot be adjusted.
- If an award has been fully disbursed when transfer credits, CLEP, Associated, or reassigned courses prior to the PV start date are added and there is a staff user assigned to the activity, CampusNexus Student creates an activity which includes a message that the AY/LP cannot be changed.

The credits and weeks for an AY/LP are not automatically adjusted if any award has all disbursements in a “Paid” status.

This feature also works when CampusNexus Student is configured to "Allow zero out extra AY/LP". With both features enabled, a student’s AY/LP cannot be reduced to zero when transfer credits, CLEP, Associated, or reassigned courses prior to the Program Version start date are added and the AY has been fully disbursed.

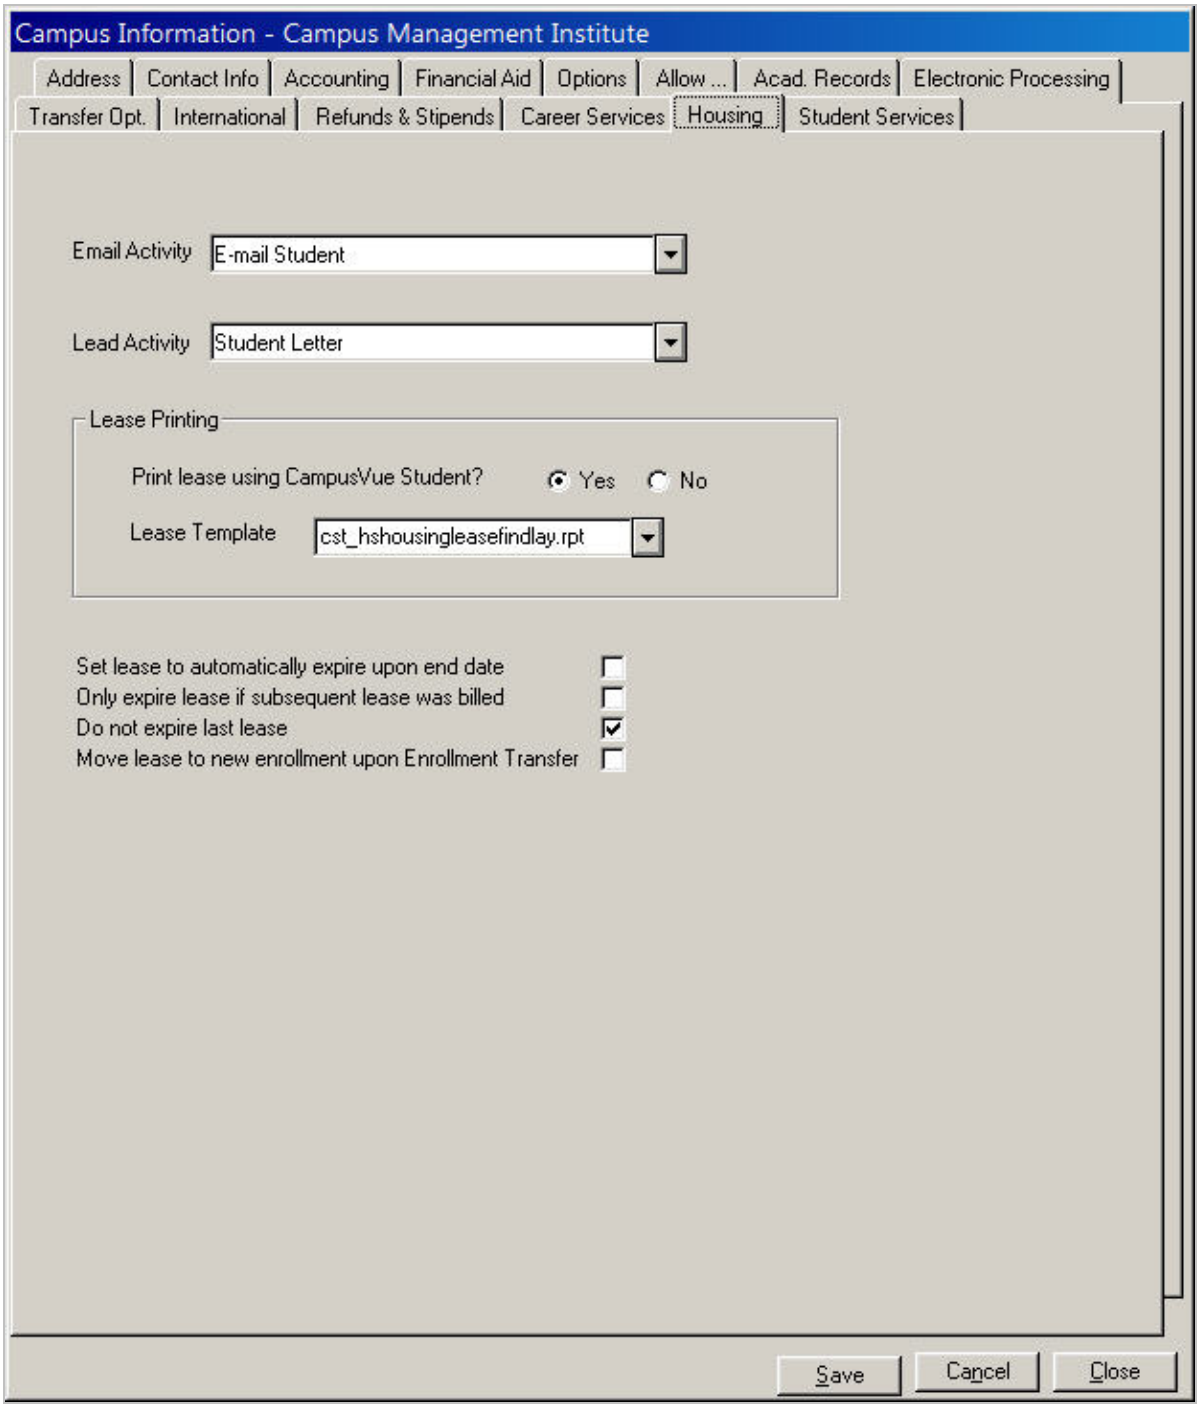
If the student has been only packaged or partially disbursed and CampusNexus Student determines the Academic Year and Loan Period are no longer needed, an adjustment is made to zero for credits/hours or weeks of the final Academic year and Loan Period.

Campus Information - Housing Tab

Use the Housing tab of the Campus Information form to specify lease options for housing facilities at a campus.

To add or edit housing lease information for a campus:

1. Navigate to **Setup** > **Campus Locations** > select a campus > **Add/Edit** (button) > **Housing** (tab).



2. Specify appropriate options. For more information, see Field Descriptions.
3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Field Descriptions

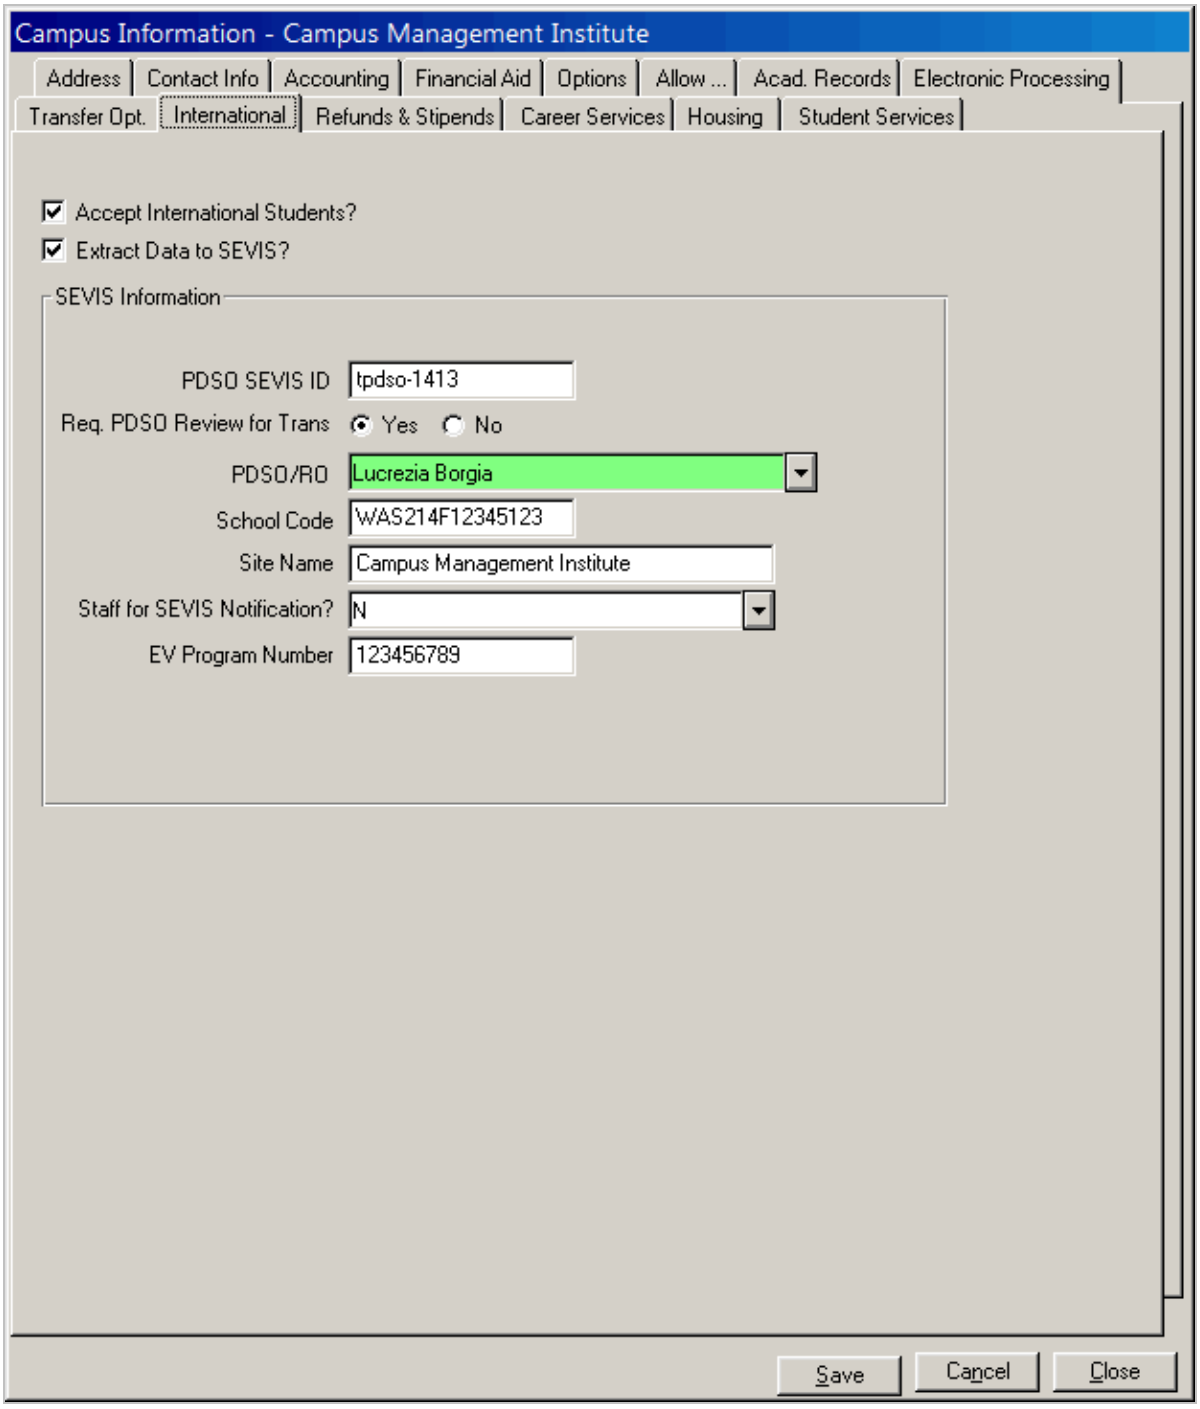
Field	Description
Email Activity	Select the default Email Activity.
Lead Activity	Select the default Lead Activity.
Print Lease Using CampusNexus Student?	Select whether leases should be printed through CampusNexus Student.
Lease Template	Select a customized lease to associate with your campus. Only one customized lease can be associated with a campus at a time. By default this option is blank.
Custom Housing Lease Report	Using the Report Maintenance function, create a custom report based on the Housing Lease report. The name of the report must be in the format: `cst HsHousingLease%.rpt`. For more information, see Report Maintenance Overview.
Set lease to automatically expire upon end date	Select this option if you want CampusNexus Student to automatically expire leases when they reach their end date.
Only expire lease if subsequent lease was billed	Select this option if you want CampusNexus Student to expire a lease only if a subsequent lease is billed (or it is the last lease).
Do not expire last lease	Select this option to prevent a student's last lease from expiring on the ending date.
Move lease to new enrollment upon Enrollment Transfer	Select this option to transfer a lease to the new enrollment when a student transfers to a new enrollment.

Campus Information - International Tab

Use the International tab of the Campus Information form to set up non-immigrant (NI) student and SEVIS processing information. The Student and Exchange Visitor Information System (SEVIS) requires that institutions having non-immigrant students report certain information to the Immigration and Naturalization Service (INS).

To add or edit SEVIS processing information for a campus:

1. Navigate to **Setup** > **Campus Locations** > select a campus > **Add/Edit** (button) > **International** (tab).



2. Complete the fields on this tab. For more information, see Field Descriptions.
3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Field Descriptions

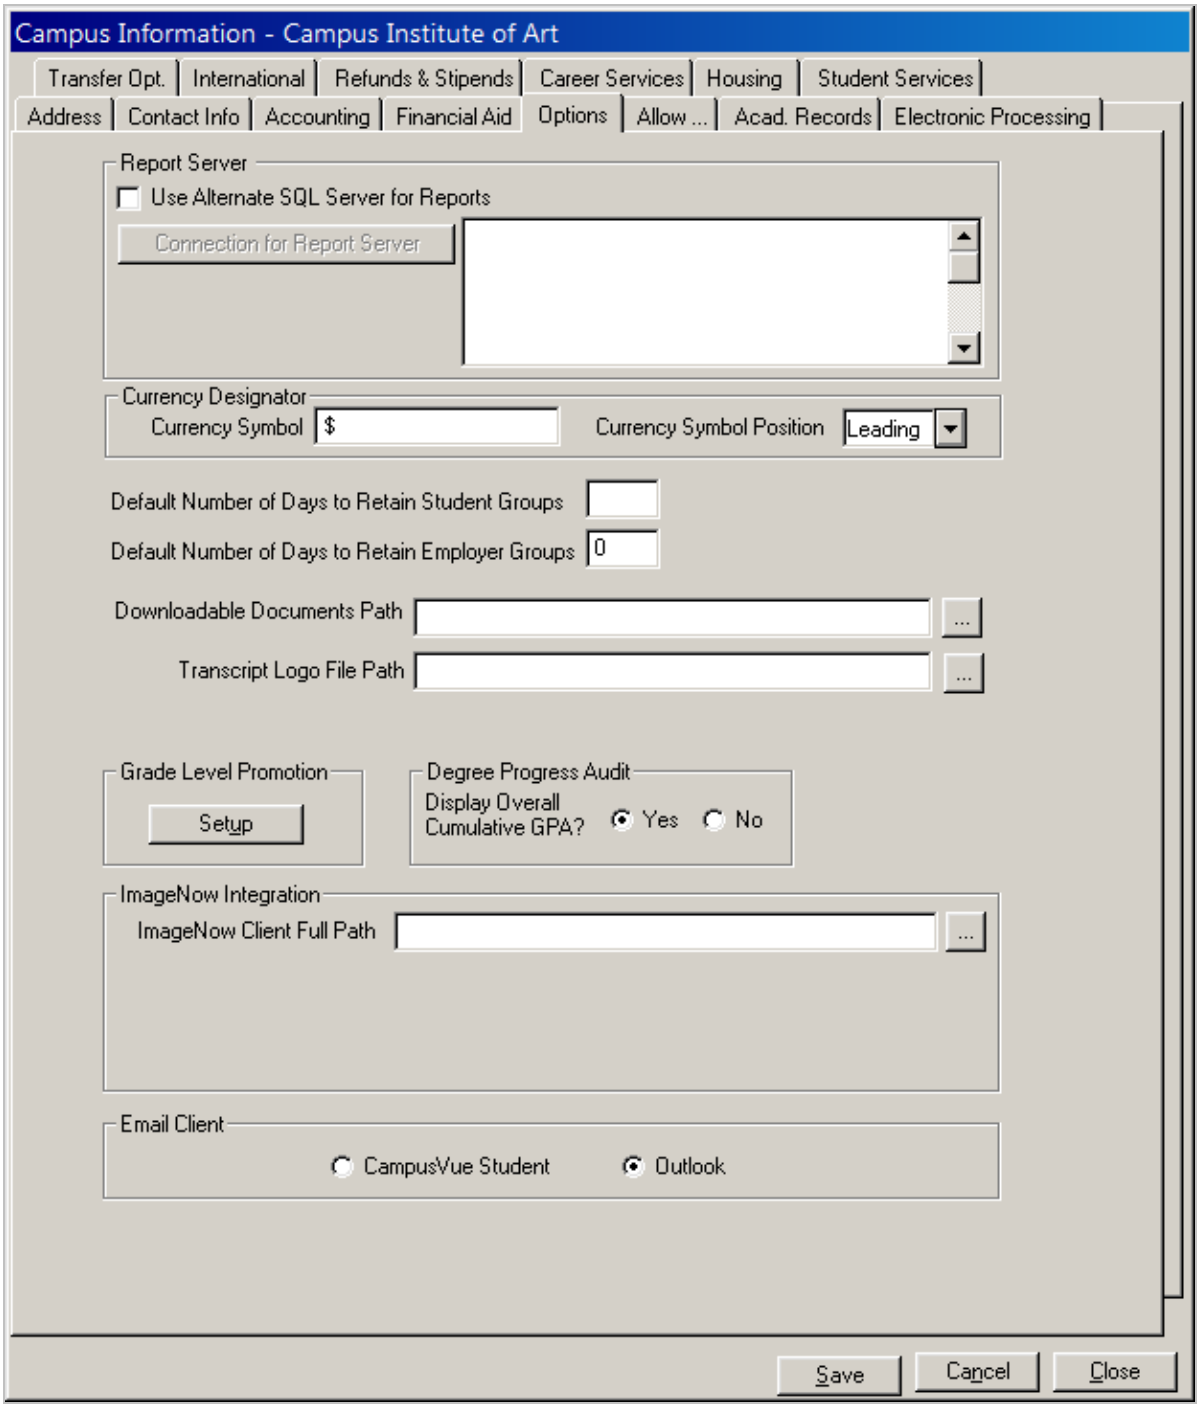
Field	Description
Accept International Students?	Select Yes to indicate that you want to use the SEVIS features, i.e., that your institution accepts International Students covered by the Student and Exchange Visitor Program (SEVP) regulations and that you must gather the required data.
Extract Data To SEVIS?	Select Yes to have CampusNexus Student extract the necessary data for transmission to SEVIS. If you select No, the extract process becomes unavailable. **Note**: The SEVIS Information data below this option is not displayed until you select Yes. This option defaults to No and should remain No until the SEVIS communication features are fully defined and developed in CampusNexus Student.
PDSO ID.	PDSO's INS identification number from SEVIS.
Req. PDSO Review for Trans.	Must the PDSO review SEVIS data before it is transmitted to SEVIS? Select Yes to indicate that the DSO is the only person who can set a batch transmission s Status to "Ready to Send".
PDSO/RO	Designated School Official or Responsible Officer for the campus group
School Code	School code for this campus (6 characters)
Site Name	SEVIS site name for the campus group
Staff for SEVIS Notification	DSO's user name from SEVIS
EV Program Number	Exchange Visitor program number

Campus Information - Options Tab

Use the Options tab on the Campus Information form to set up campus-specific options of a general nature, such as connection to a report server, currency settings, number of days to retain student and employer groups, paths for documents, grade level promotion rules, degree progress display options, ImageNow integration, and email client options.

To add or edit campus options:

1. Navigate to **Setup** > **Campus Locations** > select a campus > **Add/Edit** (button) > **Options** (tab).



2. Complete the fields on this tab. For more information, see Field Descriptions.
3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Field Descriptions

Field	Description
Use Alternate SQL Server for Reports	When you select this option, the Connection for Report Server button is enabled. Each campus may use an alternate server for reports. An option is available on each report to indicate if the report should be run from the "live" database or from the alternate report server. Setting up the alternate report server is the responsibility of the customer. The backup database can be set up using SQL Server 2000 replication. The customer, while setting up the replication, determines how often the report database is updated. During the setup of the replication, records can be filtered by campus ID and sent to different servers/databases based on the campus ID. When the records are filtered in this manner, reporting from the backup server will only include the records that are being published to the backup server (a user running a report against the backup database cannot generate a report that includes records for a campus that is not in the backup database). See What is Replication for additional information. **Note**: The FLASH report always uses the report server.

Field	Description
Connection for Report Server (button)	When you click this button, the Connection for Alternate Report Server window is displayed.  a. Specify the **Connection Values**. • If you select Windows Authentication, specify the Database and Server name. • If you select SQL Server Authentication, specify the UID (User ID), Password, Database, and Server. b. Click **Test** to test the values you entered. CampusNexus Student tries to connect to the appropriate server and SQL database. c. Click **OK** if the test is successful. Otherwise, correct the data entry values and test again. When you click OK, the connection parameters are displayed in the text box on the form. d. Click **Save** to save your connection settings.
Currency Designator	Choose a symbol to represent the currency your school accepts. For example $, £, etc. Use the drop-down list to indicate whether you want the symbol to appear before or after the amount. **Note**: This option adjusts the default paper size for reports to the typical choice for that currency (for example A4 for £, or 8.5 x 11 for $).
Default Number of Days to Retain Student Groups	Specify the number of days to retain student groups. When a group is expired, check the need for the group or the members in that group. When this feature is enabled, a dialog box is displayed when you open the Student Groups form. The message prompts you to have CampusNexus Student display all expired groups. Expiration dates of all groups are also shown in the grid of student groups.
Default Number of Days to Retain Employer Groups	Specify the number of days to retain employer groups.

Field	Description
Downloadable Documents Path	Click ... to select a location to which documents will be downloaded. **Note**: Ensure that the documents are stored in a folder which is accessible by the COM server. The Windows Service retrieves documents from the path defined in the Downloadable Documents Path and cannot retrieve the document if the path does not refer to a local path or a shared public folder.
Transcript Logo File Path	Click ... to select a location for the logo that is displayed on transcripts.

Field	Description
Grade Level Promotion	To enable Automatic Grade Level Promotion and Anticipated Grade Level Evaluation: 1. Click the **Setup** button. The Grade Level Promotion form is displayed.   2. Select **Enable Automatic Grade Level Promotion and Additional Academic Year Loan Packaging Enable Automatic Grade Level Promotion** or/and **Additional Academic Year Loan Packaging**. - OR - Select **Enabled Anticipated Grade Level Evaluation and Additional Academic Year Loan Packaging**. If you choose this option, select a Contact Manager activity from the list. When CampusNexus Student inserts additional eligibility loan records onto the student's package and an activity trigger has been set up, CampusNexus Student notifies the appropriate staff member to review the additional eligibility loans. 3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. Next, assign Grade Level Promotion Rules for each Program Version. For more information, see Grade Level Promotion Rules. If CampusNexus Student determines that a student is expected to move to the next grade level, any additional eligibility loans for which the student qualifies are added to the student's package (in the current academic year) at an estimated status. A grade level is associated with each student

Field	Description
	enrollment record. **Note**: When the Grade Level Promotion feature is enabled at the campus level, an SQL job runs periodically that executes a stored procedure to evaluate enrollments. Within this stored procedure, the add/drop date configuration is determined as part of the logic to include the Academic Records system level setting for add/drop campus and uses the add/drop date configured at the course section level when the 'Add/Drop Flag' is set to 'S - Course Section Enforced'. If the 'Add/Drop Flag' is set to: • 'C - Campus Enforced' or 'T - Term Enforced', once a term is evaluated for anticipated grade level promotion, it is not evaluated again. • 'N - Not Enforced', the term can be evaluated more than once as long as all other criteria have been met. • 'S - Course Section Enforced', CampusNexus Student evaluates the anticipated grade level promotion the same as 'N - Not Enforced'. This is because a student may add or drop a course throughout the term until it ends, which may end up changing the student's situation as far as grade level promotion. As a result, students can be evaluated more than once per term.
Degree Progress Audit: Display Overall Cumulative GPA	This setting determines whether the overall cumulative GPA is displayed when the Degree Progress Audit is performed.

Field	Description
ImageNow Integration: ImageNow Client Full Path	Click ... to select the path for the ImageNow Client. The installation of ImageNow 6.0 client and server allows for the coexistence of version 5.4 on the same machine for testing purposes. The ImageNow default is version 6.0 in CampusNexus Student versions 8.3 and higher. CampusNexus Student checks the path indicated in this field for the ImageNow client. If the 5.42 path is detected, CampusNexus Student executes the 5.42 version; otherwise, the 6.0 version is executed. The path to the ImageNow client changed for Version 6.0, along with the name of the ImageNow 6.0 client executable and its location. Customers updating from ImageNow 5.4 to ImageNow 6.0, must change the name and location in CampusNexus Student in the ImageNow Client Full Path field as follows: • In version 5.4, the client executable is located in Program Files\ImageNow. • In version 5.4, the client executable is named imagenow32.exe. • Full client path for 5.4: \Program Files\ImageNow\ imagenow32.exe • In version 6.0, the client executable is located in Program Files\ImageNow6\bin. • In version 6.0, the client executable is named imagenow.exe. • Full client path for 6.0: \Program Files\ImageNow6\bin\imagenow.exe **Note**: Upgrading from version 5.x to version 6.0.x must be performed by a trained PSI Product Upgrade Engineer. To arrange for this upgrade, contact Perceptive Software Technical Support at 800.941.7460 or email upgrade@imagenow.com. Before calling, gather the following information: • Details about the 6.0 upgrade process • ImageNow/CampusNexus Student integration scripting changes required. When the upgrade has been completed and the new integration scripts added, the only change that must occur in CampusNexus Student is the ImageNow client path in this field.
Email Client	Indicate if your school uses Microsoft Outlook or CampusNexus Student for e-mail.

Campus Information - Refunds & Stipends Tab

Use the Refunds & Stipends tab on the Campus Information form to set up basic information about your institution's policies for refund of tuition and other fees and stipends for living expenses.

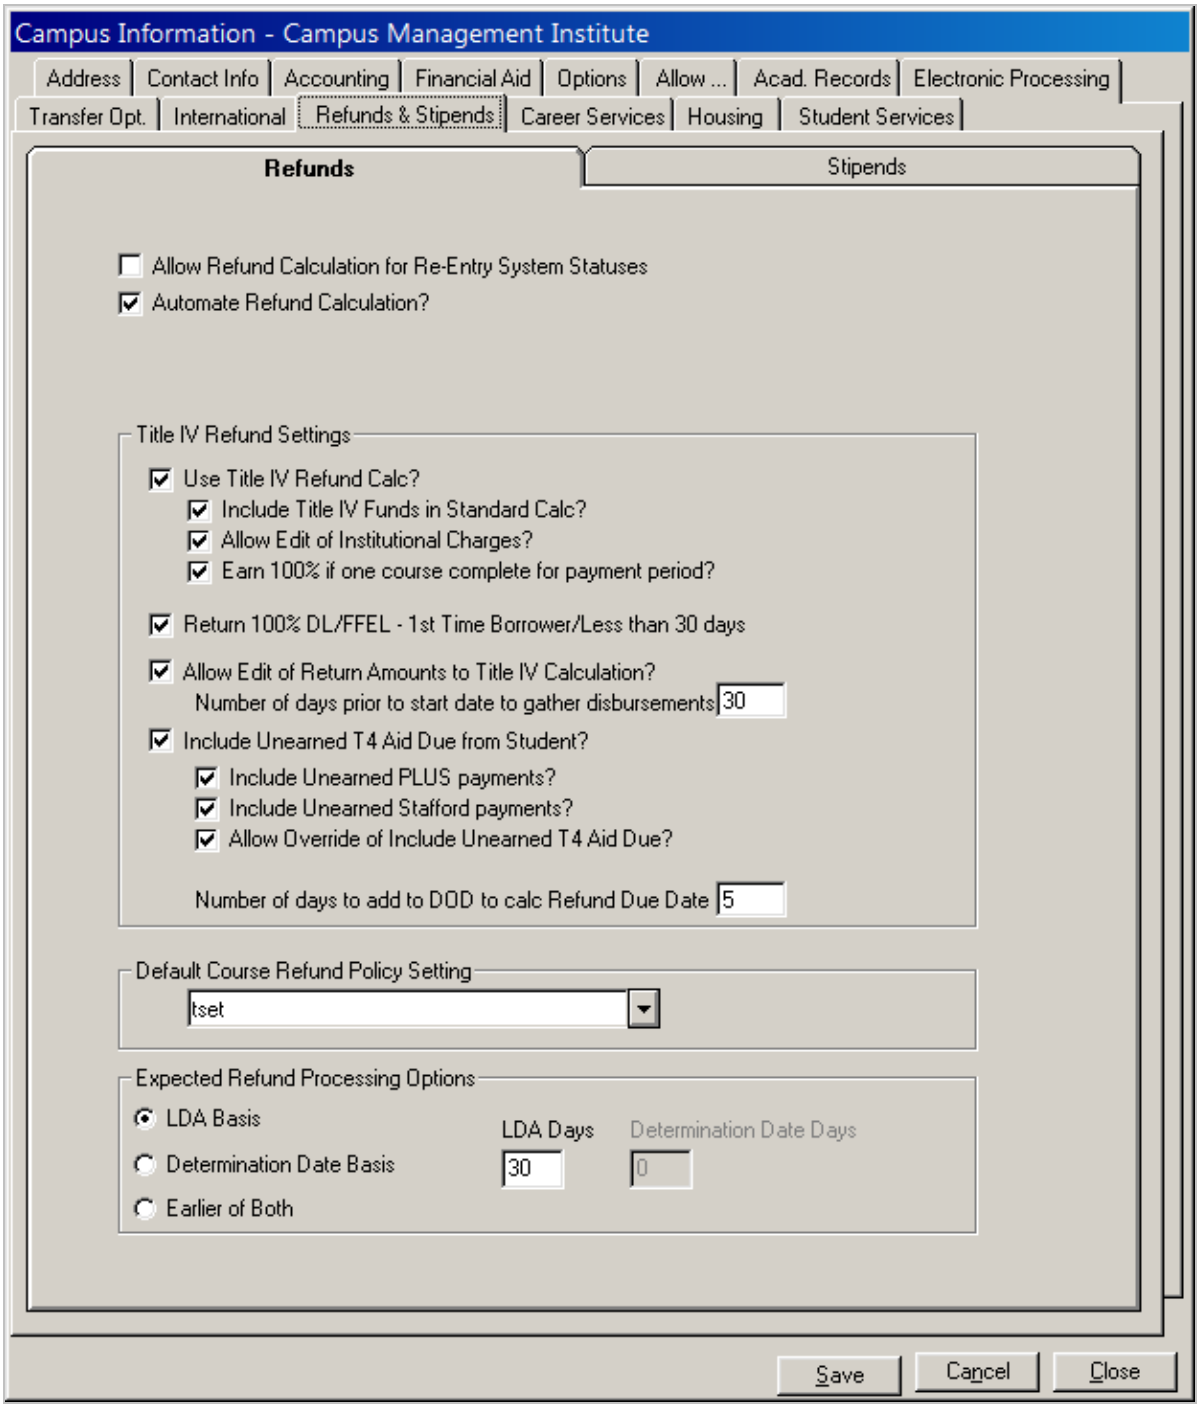
Refunds are monies returned to students, government agencies, and private agencies when a student is in school for a shorter time than the expected period for which the student is receiving a grant or loan. This could be due to early graduation, dropping a program, military service, medical leave, etc. See Refunds Subtab.

Stipends are monies from financial aid fund sources to the student to help with the living expenses related to attending an institution. See Stipends Subtab.

Refunds Subtab

To add or edit refunds settings for a campus:

1. Navigate to **Setup** > **Campus Locations** > select a campus > **Add/Edit** (button) > **Refunds & Stipends** (tab) > **Refunds** (subtab).



2. Specify appropriate options. For more information, see Field Descriptions - Refunds Subtab.
3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Field Descriptions - Refunds Subtab

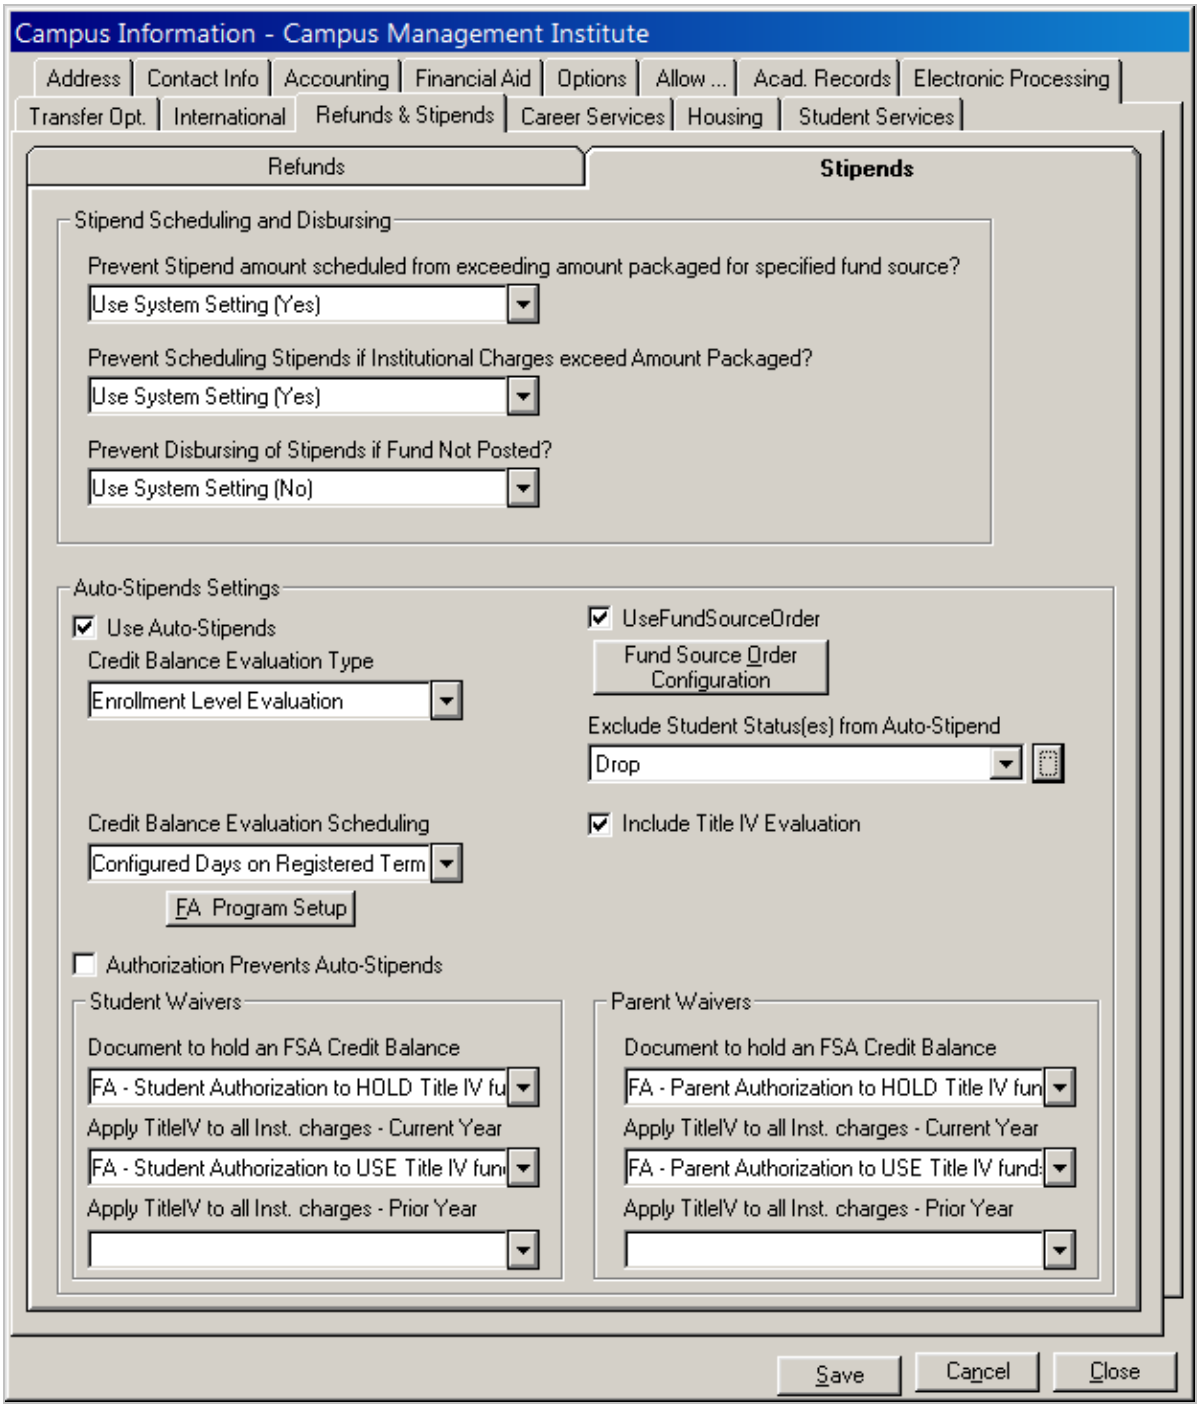
Field	Description
Allows Refund Calculation for Re-Entry System Statuses	Select this option to set up a standard refund calculation for students. For detailed information on how to set up refund calculations, see Refund Policies.
Automate Refund Calculation	This feature is used by small institutions that have batches of 200 or fewer students to help manage the timing of refund calculations for students who drop out. When this option is enabled and a student drops out of school, a "placeholder" refund calculation record is added to student's Refund Calculation form. This is a hypothetical calculation of the expected refund date should the student drop out. Use the Drop Report with "Include Refund Calculation Information" option to track the institution's performance with regard to processing refunds.
Title IV Refunds Settings	
Use Title IV Refund Calc?	Select this option to use the Title IV Refund Calculation. This option must be enabled if students receive government grants or loans (Pell, SEOG, etc.).
Include Title IV Funds in Standard Calc?	Select this option to include Title IV money if students receive government funding.
Allow Edit of Institutional Charges?	Select this option to allow users to change the amount of institutional charges in the refund calculation. This is usually done when actual student expenses (books, living expenses, etc.) are different from projected expenses. **Note**: This option is not applicable for students whose billing frequency is by payment period. Institutional charges for these students can always be edited.
Earn 100% if one course complete for payment period?	Select this option to indicate that the institution keeps 100% of the tuition payment if a student completes one course during the period for which he/she has paid. **Note**: This option is not applicable for students whose billing frequency is by payment period.
Return 100% DL/FFEL - 1st Time Borrower/Less than 30 Days	Select this option to indicate that the student or lending institution will be refunded 100% of the payment to the institution if the student drops the program within 30 days or is a first-time borrower ('borrower' means a person who borrows tuition money from any lending institution).
Allow Edit of Return Amounts to Title IV Calculation?	Select this option to allow users to edit the return amounts for Title IV refunds by clicking on that is displayed on the Refund Calculation form. 1. If this option is enabled, and you click **Calculate** on the Refund Calculation form, the Return of Title IV Funds Calculation wizard is displayed. 2. Select one of the previously calculated Title IV options and follow the prompts to where changes are needed, make your modifications and continue following the prompts until you have selected the **Finish** button in the wizard.

Field	Description
Number of days prior to start date to gather disbursements	Specify the number of days before the start date that the disbursements are scheduled to be gathered. If any funding amounts were posted before the student's enrollment, this option allows you to include those amounts for refunds. This option is only available if 'Allow Edit of Return Amounts to Title IV Calculation?' is enabled.
Include Unearned T4 Aid Due from Student?	Select this option to include unearned Title IV Aid in the refunds that are scheduled from the institution within the Return of Title IV Funds Calculation. See Allow Edit of Return Amounts to Title IV Calculation?
Include Unearned PLUS payments	Select this option to include unearned PLUS payments in the refunds that are scheduled from the institution within the Return of Title IV Funds Calculation. See Allow Edit of Return Amounts to Title IV Calculation?
Include Unearned Stafford payments	Select this option to include unearned Stafford payments in the refunds that are scheduled from the institution within the Return of Title IV Funds Calculation. See Allow Edit of Return Amounts to Title IV Calculation?
Allow Override of Include Unearned T4 Aid Due?	Select this option to permit users to override the 'Include Unearned T4 Aid Due' option for individual students. This allows users to exclude the unearned Title IV aid due from the student in the scheduled refunds from the institution within each refund calculation. This option is only available if ' Include Unearned T4 Aid Due from Student?' is enabled.
Number of days to add to Determination Date to calc "Due Date"	Specify the number of days to be added to the student's withdrawal Date of Determination to calculate the Title IV Funds Return 'Due Date' in Step 6 of the Return to Title IV wizard. This is done to ensure that clients remain in compliance with Title IV regulations that require Title IV funds be returned to their appropriate Title IV program within 45 days of the Date of Determination. The value can be less than, but not greater than 45 days. The default value is 45 days.
Default Course Refund Policy Setting	Select a Course Refund Policy that will be assigned as the default when refunds are given for courses at the selected campus.
Expected Refund Processing Options	These options enable you to choose the basis for the refund deadline, the Expected Refund Process Date that is displayed on the Refund Calculation form.
LDA Basis	The refund deadline is based on the last date of attendance (LDA). If you select LDA Basis, the Determination Date Days field becomes unavailable. You must specify a value greater than 0 for LDA Days. The default is 30 days.
Determination Date Basis	The refund deadline is based on the Determination Date of the student's enrollment. If you select Determination Date Basis, the LDA Days field becomes unavailable. You must specify a number for Determination Date Days. The default is 0.
Earlier of Both	The refund deadline is based on the earlier of the two options, LDA Days or Determination Date Days. If you select Earlier of Both, you must enter numbers in both fields. The values entered for LDA Days and Determination Date Days must be greater than 0.

Stipends Subtab

To add or edit stipends settings for a campus:

1. Navigate to **Setup** > **Campus Locations** > select a campus > **Add/Edit** (button) > **Refunds & Stipends** (tab) > **Stipends** (subtab).



2. Specify appropriate options. For more information, see Field Descriptions - Stipends Subtab.
3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Field Descriptions - Stipends Subtab

Field	Description
Stipend Scheduling and Disbursing	
Prevent Stipend amount scheduled from exceeding amount packaged for specified fund source?	Use this option to indicate whether the institution wishes to manually schedule stipends without adhering to the business rules that require the net amount of stipends scheduled to be less than or equal to the amount packaged or the amount received for a fund source. Select Yes, No, or Use System Setting (<value>). The default is Use System Setting (<value>). The <value> is Yes or No, whichever is the current System Default value. See Limit Stipend Amount? under Student Accounts Settings - General tab.
Prevent Scheduling Stipends if Institutional Charges exceed Amount Packaged?	Select this option to indicate whether stipends are to be manually scheduled if the institutional charges exceed the amount packaged. Select Yes, No, or Use System Setting (<value>). The default is Use System Setting (<value>). The <value> is Yes or No, whichever is the current System Default value. See Limit Stipend Amount? under Student Accounts Settings - General tab.
Prevent Disbursing of Stipends if Fund Not Posted?	Select this option to specify whether stipends are to be posted and issued to the student before the funding is received on the ledger card. Select Yes, No, or Use System Setting (<value>). The default is Use System Setting (<value>). The <value> is Yes or No, whichever is the current System Default value. See Limit Stipend Amount? under Student Accounts Settings - General tab.

Field	Description
Stipend Processing Behavior for Possible Configuration Scenarios at Campus Level and Fund Source Level The table below summarizes the possible combinations of configurations at Campus level (Prevent Disbursing of Stipends if Fund not posted?) and Fund Source level (Allow Disbursing of Stipend Without Funds Posted?) and the expected results for stipend processing. **Stipend Processing Behavior**	

Campus Level Configuration	Fund Source Level Configuration	Fund Source Posted to Ledger Card?	Can Stipend Be Processed?
No	No	No	No
No	No	Yes	Yes
Yes	No	No	No
Yes	No	Yes	Yes
Yes	Yes	No	No
Yes	Yes	Yes	Yes
No	Yes	Yes	Yes
No	Yes	No	Yes

Auto-Stipends Settings	
Use Auto-Stipends	When this feature is enabled, stipends are automatically scheduled and additional filters (drop-down lists) become available on this tab. Configure the auto-stipend feature before items being posted for the evaluation time frame. Prior credit balances should be addressed by hand. The credit balance calculations can be triggered by any method of posting to the ledger card. **Note**:For a credit balance to be evaluated, the payment posted must be associated with a fund source. Unscheduled cash payments not associated with a fund source or web payments will not trigger the credit balance evaluation.
Authorization Prevents Auto-Stipends	This check box is displayed when 'Use Auto-Stipends' is selected. Authorization Prevents Auto-Stipends uses the Parent and Student Credit Balance Waivers. Select this check box if your institution enforces carrying over of credit balances. If selected, when a credit balance occurs from the result of a Title IV fund source payment, an Auto Stipend is "Prevented" or not created. A credit balance will remain on the ledger card for the Title IV evaluation.

Field	Description
Use Fund Source Order	Select this option to enable the Fund Source Order Configuration button. For more information on generating stipends with fund source order configuration, refer to Title IV Credit Balance. **To configure a fund source order**: 1. Click the **Fund Source Order Configuration** button. The Fund Source - Stipend Return Order form is displayed.  2. Select the Include check box for the fund sources to include in the stipend return order. 3. Select each included fund source and click the sort buttons to establish the desired order. 4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Field	Description
Credit Balance Evaluation Type	Select one of the following options. a. Student Level Evaluation Select this option to configure an 'All Transaction' credit balance evaluation to evaluate auto stipends at the student level across multiple enrollments and include a Title IV Calculation. **Note**: If a student has enrollments at two campuses, both campuses must be set to Student Level Evaluation. If one campus uses Student Level Evaluation and another campus uses another evaluation type, Student Level Evaluation will not yield the expected result. When Student Level Evaluation is selected, the Include Title IV Evaluation option becomes available and, if selected, Title IV Evaluation is run for the FSA time frame applicable to the disbursements being evaluated and each enrollment. CampusNexus Student executes the FSA Title IV Evaluation before the Student Level Evaluation: it creates a Title IV stipend and then an 'All Transaction' stipend as needed. Based on the configuration at the student level, all the stipends are posted to the Student Accounts Auto Stipend Payment Queue. CampusNexus Student ensures that Use Auto Stipend is activated before any payments are placed into the queue. If Use Auto Stipend is not activated, the payments will not go into the queue. b. Enrollment Level Evaluation This option checks for an overall credit balance for the student's enrollment that has been specified: [Total charges - (total payments - scheduled stipends and refunds)]. An Auto Stipend is generated if there is a Credit Balance on the enrollment. **Note**: A tuition charge must be posted on the ledger card for a stipend to be created for a credit balance for the Enrollment and Time Period Evaluation. c. FSA Title IV (only) Evaluation This option evaluates the student using the current Title IV Regulations for calculation of a credit balance amount on the award year for grants or Perkins and uses the loan period for loans. The calculation uses only Title IV charges and Title IV payments to calculate the credit balance amount. When a Title IV payment is posted and CampusNexus Student determines that there is a Title IV Credit Balance for an elapsed award year or an elapsed loan period, an auto stipend is scheduled, regardless of whether there is an authorization on file to hold credit balances. **Note**: If an Enrollment Level Evaluation or FSA Title IV (only) Evaluation is selected as the Credit Balance Evaluation Type, the Credit Balance Evaluation Time Frame box is disabled on the form. d. Time Period Evaluation This option is used to designate a defined period of time that will be used to calculate a credit balance.

Field	Description
Credit Balance Evaluation Time Frame	Select one of the following options: a. Payment Period or Term If a Time Period Evaluation is selected as the Credit Balance Evaluation Type, the 'Payment Period or Term' option is populated by default. CampusNexus Student performs a credit balance check on the individual term or payment period time frame. You can select to include a Title IV credit balance evaluation which would occur on the FSA time frame determined by the awards in the financial aid package. Additionally, you can select Allow up to $200 of FSA funds for prior period charges. b. 'Loan Period or Academic Year This option calculates an 'All transaction' stipend. You can select to include a Title IV evaluation that will be executed before the 'All Transaction' time frame. Additionally, you can select Allow up to $200 of FSA funds for prior period charges. This configuration matches loan periods to academic years based on sequences. For example, Loan Period 1 = Academic Year 1, Loan period 2 = Academic Year 2, etc. When the Loan Period or Academic Year is selected along with Fund Source Order to Stipend, CampusNexus Student resolves any preexisting credit balance within the current loan period or academic year being evaluated. The prior existing credit balances are not automatically satisfied until a new payment is made to that Loan Period or Academic Year, which will result in a greater credit balance. When the financial aid package consists of Title IV Loans and Title IV grants, the Title IV Loan Period is used for the evaluation time frame of the 'All Transaction' calculation. This allows the calculation time frames to match up for both evaluation types and gather all charges and payments for the Packaged credit values of the Academic Year. If the financial aid package consists of only Title IV grants, the Academic Year is used for the evaluation time frame of the 'All Transaction' calculation. Non-Title IV awards can exist in either of the packages mentioned here. CampusNexus Student uses the Academic Year time frame to match charges with the financial aid awards for the time frame. If a Title IV evaluation is included for this scenario, it would occur on the Award Year. **FSA Principals** If a student's financial aid package includes a Direct Loan, the 'year' for Title IV credit balance evaluation is the loan period even if the financial aid package contains Award Year based funds. Award Year based funds include all Title IV Grants and Perkins loans. If the student's financial aid package does not have a Direct Loan, the 'year' for Title IV credit balance evaluation is the Award Year. When determining a debit balance 'Tuition, Fees, Room and Board' are always included. 'Other Charges' can be included in the evaluation if the waivers that allow the charges to

Field	Description
	be included are on file. (Setup > Campus Locations > Edit a campus > Refunds & Stipends > Stipends). • 'Tuition, Fees, Room and Board' - To designate these fees in CampusNexus Student, select 'Include in 'Title IV Institutional Charges' and 'Always allow Title IV to Pay charge' on the transaction code (Lists > Student Accounts > Transaction Codes) . • 'Other Charges' - To designate these fees in CampusNexus Student, select 'Include in Title IV Institutional Charges' and clear 'Always allow TIV to Pay charge' on the transaction code (Lists > Student Accounts > Transaction Codes).
Allow up to $200 of FSA funds for prior period charges?	This option is available for 'Time Period Evaluation' calculations. It allows the 'All transaction' evaluation for the time period being evaluated to validate if there are up to $200 of unsatisfied Title IV charges in the prior period that have not been satisfied before applying the Title IV funds to the current period calculations. This corresponding value is then added to the current charges of the selected time frame, and then the credit balance amount is calculated. This option is available for all Credit Balance Evaluation Types where Title IV funds are used in the calculation, including Time Period Evaluation, in which the credit balance evaluation time frame is payment period or term; FSA Title IV (only) Evaluation, for which Title IV Funds are automatically included in this calculation; Enrollment Level Evaluation, and Student Level Evaluation. To apply Title IV charges to these transactions, ' Include in Title IV Institutional Charges' and 'Always allow Title IV to pay charge' must be selected (Lists > Student Accounts > Transaction Codes > Edit (a particular transaction code). Additionally, Allow up to $200 of FSA funds for prior period charges must be selected. The $200 prior period charges can be used for charges other than tuition, fees, room, and board; however, the total amount cannot exceed $200, and it must include any amount used to cover prior year charges that are tuition, fees, room, and board. For example, if $100 was already applied for fees, there would only be up to $100 remaining that could be applied for the prior period charges for which the total cannot exceed $200.

Field	Description
Credit Balance Evaluation Scheduling	Credit Balance Evaluation Scheduling applies to all Evaluation types. The Credit Balance Evaluation Scheduling drop-down list is displayed when you select a value in the Credit Balance Evaluation Type list. Select one of the following Credit Balance Evaluation Scheduling options: a. Day of Posting This option evaluates the credit balance on the same day the payment was made. b. Configured Days on Registered Term This option enables the FA Program Setup button. See FA Program Setup. When the campus is configured to control the scheduling of the processing of credit balance calculations, CampusNexus Student holds all payments made by any posting method to be processed later at the appropriate configured point in time. Once the configured scheduled time frame has elapsed, CampusNexus Student executes the credit balance evaluation processing immediately after the payment is posted; this also occurs for campuses not configured to control the timing of the credit balance evaluation. If you clear the Use Auto Stipend check box and if there are payment records waiting to be processed, as per configuration, a warning message is displayed. If you select 'Yes', the check box is disabled and the records remain unprocessed.
Include Title IV Evaluation	This check box is displayed when the Credit Balance Evaluation Type is not FSA Title IV (only) Evaluation. • If the payment is a Title IV payment and Include Title IV Evaluation is selected,CampusNexus Student evaluates the payment using 'FSA Title IV Evaluation' first and creates a stipend. Then, CampusNexus Student re-evaluates the same payment transaction through the Enrollment Level or Time Period configuration, and if needed, an additional stipend will be created. • If the payment is a Title IV payment and Include Title IV Evaluation is not selected, CampusNexus Student evaluates the payment using the Enrollment Level or Time Period configuration only. If needed, a stipend is created. • If the payment is a non-Title IV payment, CampusNexus Student evaluates the payment based on the current Enrollment Level or Time Period configuration.

Field	Description
Exclude Student Statuses from Auto-Stipend	Auto stipends can be configured to exclude student statuses across all evaluation types, so that students can be limited from having an auto stipend processed. For instance, for a student with a credit balance, no stipend is issued or scheduled if the student has dropped and is pending R2T4 calculation. You can select one or more statuses and save the status selection for the campus. Students whose statuses are configured here are excluded from the auto-stipend job calculation, and no stipends will be calculated or posted through the auto-stipend job. When a status has been excluded from the auto stipend process, a warning message reminds you that the credit balance for these students needs to be resolved manually. The Title IV Evaluation Process is triggered by the process Title IV Credit Balance job, which only runs the Title IV Evaluation. The Year and Title IV Evaluation process is triggered by the process Expired Loans for Stipends job, which only runs the Title IV Evaluation for loans about to expire before the loan period or academic year.

Field	Description
FA Program Setup	This button is enabled when you select 'Configured Days on Registered Term' from the Credit Balance Evaluation Scheduling list. When you click this button, the Associate Credit Balance Scheduling Configuration with Program Version form is displayed.  The Credit Balance Scheduling configuration for the selected program versions controls when the stipend will be created on the basis of the Start or Add/Drop date of the student's registered term. The Program field is populated with those programs that are associated with the selected campus. 1. Select a **Program** to view the program versions associated with the program. 2. Select appropriate **Program Versions** using the check boxes or the Select All button. 3. In the Credit Balance Scheduling list, select **Start Date** or **Add/Drop Date**. When Start Date is selected, the number of days before or after the Academic Registration Term Start Date to execute the credit balance calculations on registered students can be configured. CampusNexus Student allows a date range of 10 days before or 14 days after the Academic Registration Term Start Date.

Field	Description
	When Add/Drop Date is selected, an administrator can configure the number of days before or after the Academic Registration Term Add/Drop Date to execute the credit balance calculations on registered students. CampusNexus Student allows a date range of 24 days before or 10 days after the Academic Registration Term Add/Drop Date. CampusNexus Student then validates that the processing date is within the allowable range of days before and after the Academic Registration Term Start Date. 4. In the **Days** field, specify the configured days for the selected Program Versions. 5. Click **Applied** to update the Credit Balance Scheduling and Days in the Program Version grid only for the selected Program Versions. 6. Click **Save** to update the selected program versions with the newly applied values. **Note**: Click to search program versions by code or description.  The Academic Registration term is identified as follows: • Payment Period - If a payment period is associated with the payment, the student's schedule is evaluated for the term that starts closest to the payment period start date. • Term - If a payment period is associated with the payment, the student's schedule is evaluated for the: If a term is associated with the payment, the student's schedule is evaluated for a matching term or a corresponding child term related to the parent assigned to the payment. • No Payment Period or Term - If a payment period is associated with the payment, the student's schedule is evaluated for the The payment is evaluated on the same

Field	Description
	day it was posted.
Waiver Principals The waivers designated on the Stipend configuration are created in Lists > Contact Manager > Documents. They must be on file with the status code that has Approved = 'Y' in a student's Documents folder to allow the functionality for each waiver to be applied (View > Contact Manager > Documents). Any time a waiver that is on file is moved to an 'Approved' status, the logic will trigger the student to be queued for auto stipend evaluation.	
Document to hold an FSA Credit Balance (Student)	Select your institution's official credit balance waiver document containing the student approval to retain a Title IV Credit Balance during the 'year' for Title IV credit balance evaluation. If the Student Waiver selected in the configuration is on file with a document status of 'Approved', CampusNexus Student allows the institution to carry the credit balance until the end of the 'year'.
Document to hold an FSA Credit Balance (Parent)	Select your institution's official document containing the parental authorization to retain Title IV Credit Balances. This authorization is required in case PLUS funds are part of the Title IV Credit Balance. If PLUS funds are part of the financial aid package and the Parent Waiver selected in the configuration is on file with an 'Approved' status, the logic will allow the institution to carry the credit balance until the end of the 'year'.
Apply Title IV to all Inst. Charges – Current Year (Student)	Select your institution's official document containing the student approval to apply Title IV funds to 'Other Charges' in the current 'year' evaluation. Title IV funds regulations have made it mandatory to seek student authorization before applying Title IV funds to institutional charges except tuition, fees, room and board. If the Student Waiver selected in the configuration is on file with an 'Approved' status, CampusNexus Student applies Title IV Funds to 'Other Charges' that are configured to require the waiver.
Apply Title IV to all Inst. Charges – Current Year (Parent)	Select your institution's official document containing the parental approval to apply Title IV funds to 'Other Charges' in the current 'year' evaluation. This document is required in case the Title IV fund sources packaged for the student include a PLUS fund. If the Parent Waiver selected in the configuration is on file with an 'Approved' status,CampusNexus Student applies Title IV Funds to 'Other Charges' configured to require the waiver.

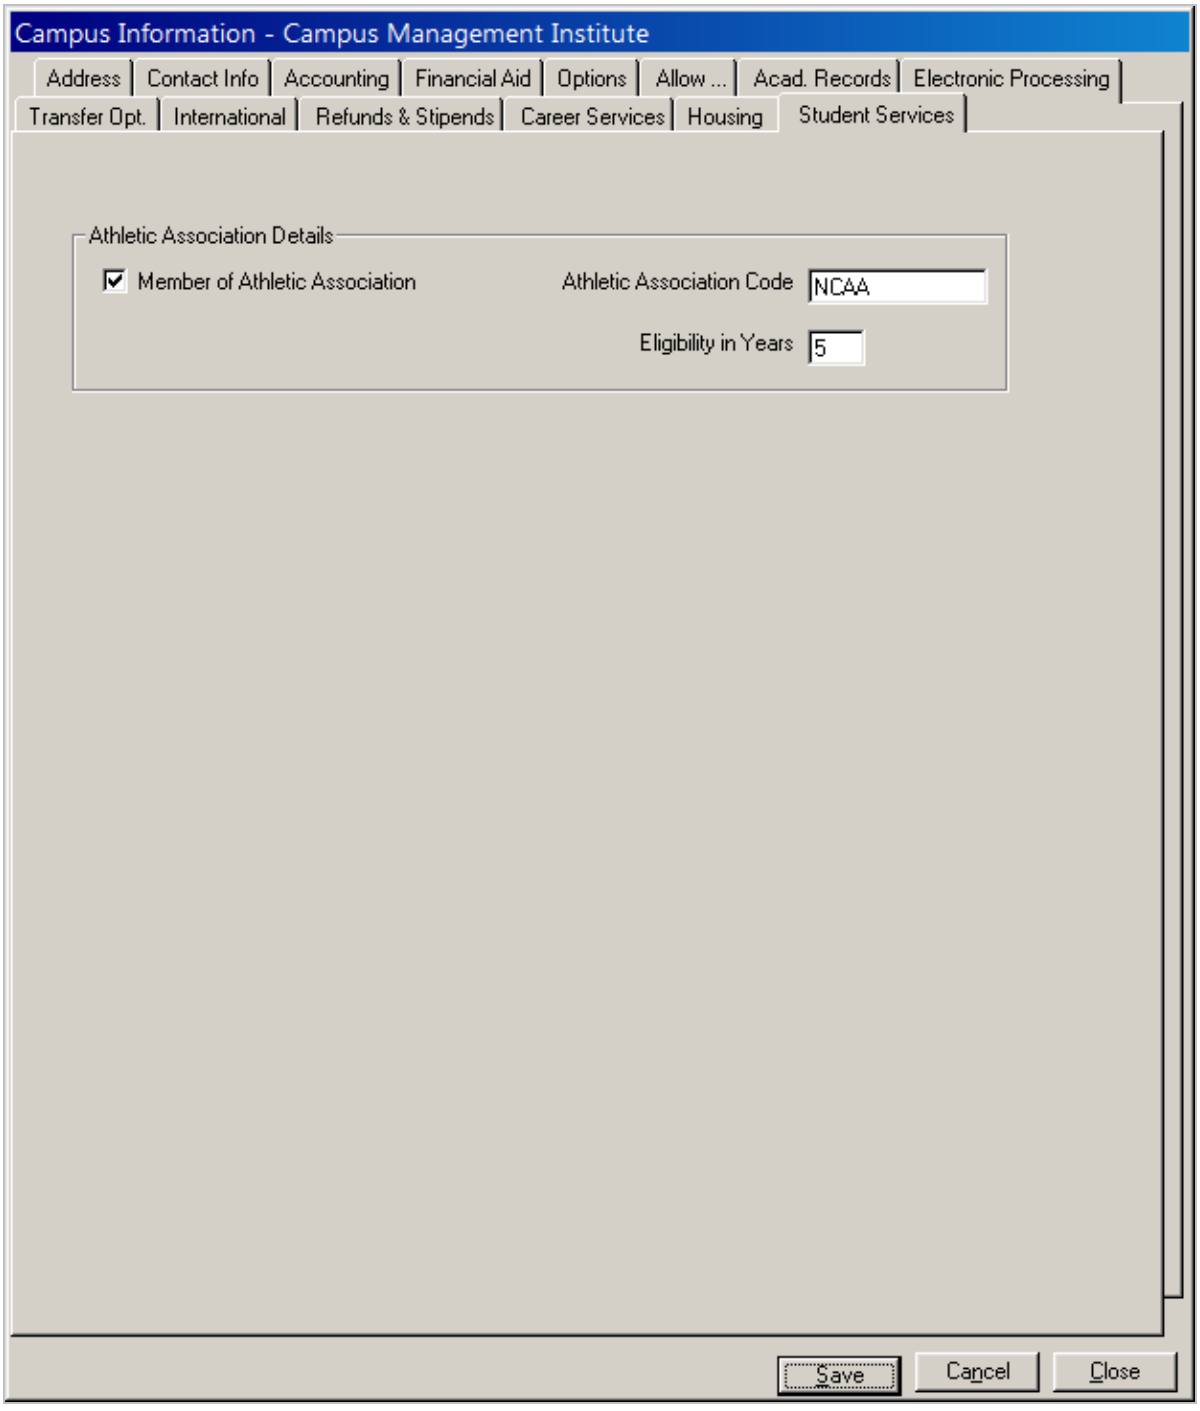
Field	Description
Apply Title IV to all inst. Charges – Prior Year (Student Waiver)	Select your institution's official document containing the student approval to allow up to $200 of current year funds to pay prior year charges which is applicable to Credit Balance Evaluation Types: FSA Title IV (only) Evaluation, all configurations where 'Include Title IV Evaluation' is selected. If the Student Waiver selected in the configuration is on file with an 'Approved' status, CampusNexus Student includes 'Other Charges' that have occurred in a prior year in the calculation to determine if there is a prior year debit balance up to $200. The waiver allows Student level Title IV disbursements to pay 'Other charges' that are configured to require the waiver.
Apply Title IV to all Inst. Charges – Prior Year (Parent Waiver)	Select your institution's official document containing the parental approval to allow up to $200 of current year funds to pay prior year charges which is applicable to Credit Balance Evaluation Types: FSA Title IV (only) Evaluation, all configurations where 'Include Title IV Evaluation' is selected. If the Parent Waiver selected in the configuration is on file with an 'Approved' status, CampusNexus Student includes 'Other Charges' that have occurred in a prior year in the calculation to determine if there is a prior year debit balance up to $200. The waiver allows Parent Loan Title IV disbursements to pay 'Other charges' that are configured to require the waiver.

Campus Information - Student Services Tab

Use the Student Services tab on the Campus Information form to configure the Athletic Association to which the campus belongs and the maximum number of years the Athletic Association allows a student athlete to be eligible to participate in intercollegiate athletics.

To add or Athletic Association details for a campus:

1. Navigate to **Setup** > **Campus Locations** > select a campus > **Add/Edit** (button) > **Student Services** (tab).



2. Select the **Member of Athletic Association** check box. The other fields on the form are enabled.
3. Specify the **Athletic Association Code** (e.g., NCAA).
4. In the **Eligibility in Years** field, enter the number of years students are eligible to participate according to the Athletic Association.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To continue setting up and configuring your **Athlete Tracking** for initial use, navigate to Lists > Student Services > Sports.

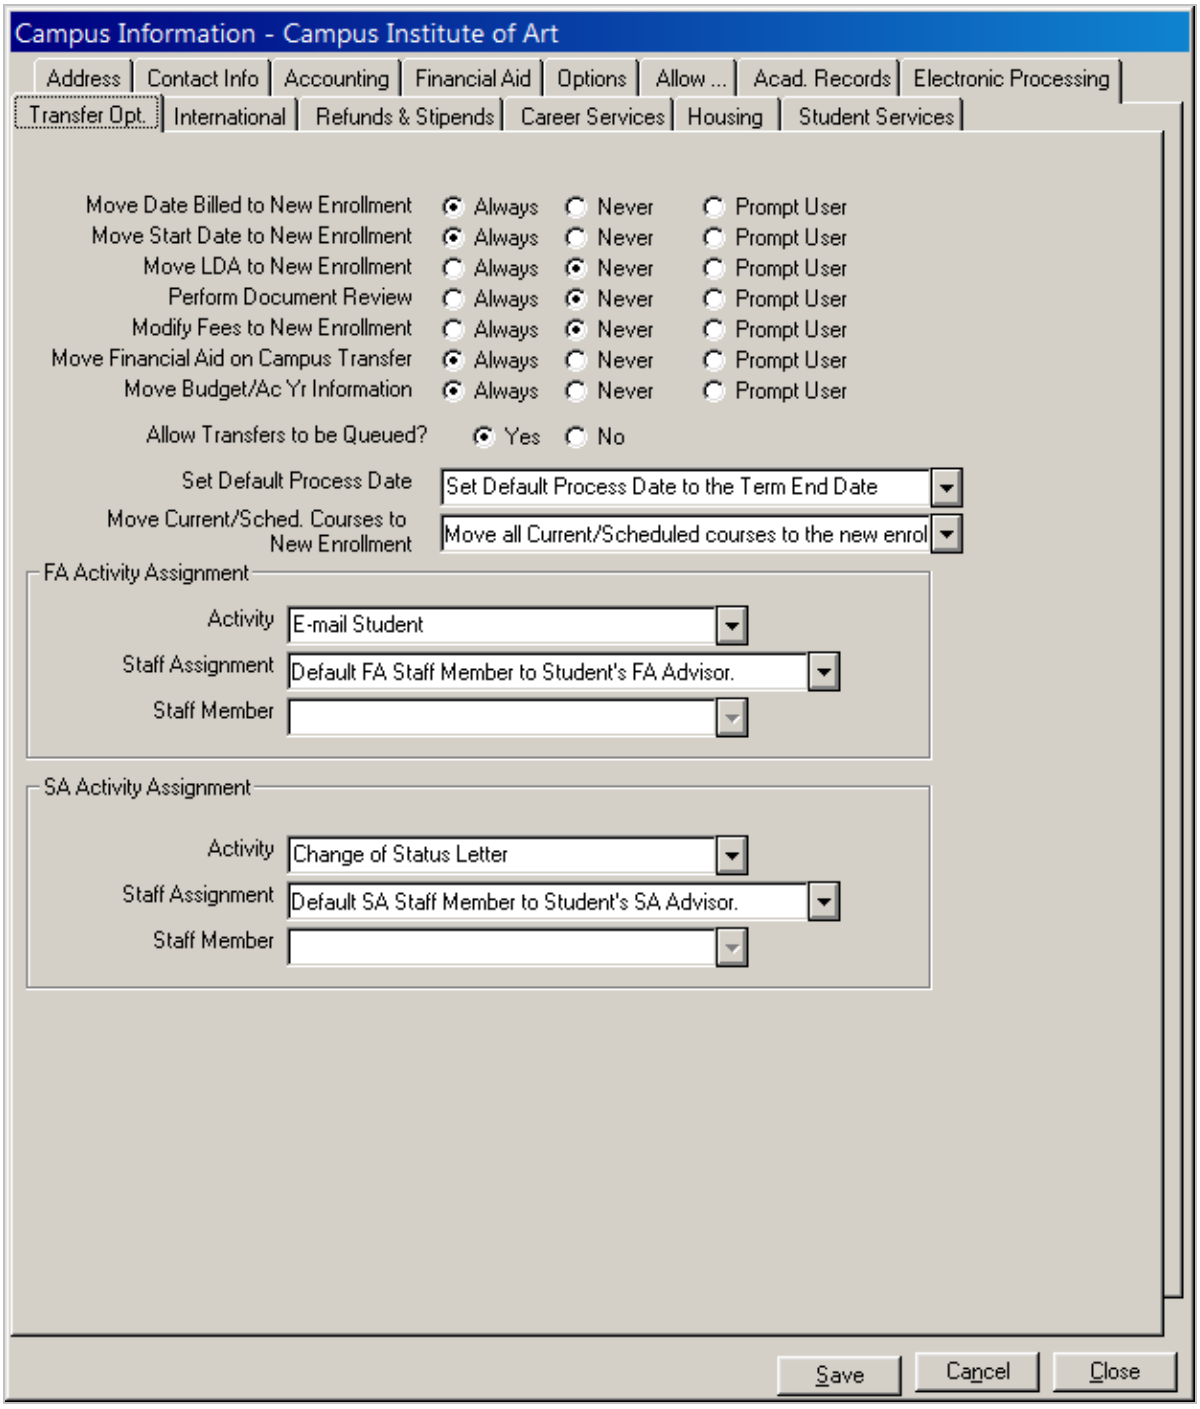
Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Campus Information - Transfer Opt. Tab

Use the Transfer Options tab on the Campus Information form to set up transfer related options, such as Date Billed, Start Date, Last Day of Attendance, Required Course list options, and activities for a staff member or financial aid advisor.

To enter the transfer options setup information for a campus:

1. Navigate to **Setup** > **Campus Locations** > select a campus > **Add/Edit** (button) > **Transfer Opt.** (tab).



2. Specify appropriate options. For more information, see Field Descriptions.

   Note: Some of the options on this form provide the options Always, Never, or Prompt User, that correspond to check boxes in the Transfer Enrollment/Campus form.

   - When you select **Always** the Transfer Enrollment/Campus form the related check box is selected but cannot be changed.
   - When you select **Never** the Transfer Enrollment/Campus form the related check box is cleared but cannot be changed.
   - When you select **Prompt User** the Transfer Enrollment/Campus form the related field is selected but can be changed.

3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Field Descriptions

Field	Description
Move Date Billed to New Enrollment	Select Always, Never, or Prompt User.
Move Start Date to New Enrollment	Select Always, Never, or Prompt User. This field is displayed on the Transfer Enrollment/Campus form ONLY if the staff member viewing the form can override transfer configuration options as configured in the Academic Records tab of the Staff Information form.
Move LDA to New Enrollment	Select Always, Never, or Prompt User.
Perform Document Review	Select Always, Never, or Prompt User.
Modify Fees to New Enrollment	Select Always, Never, or Prompt User.
Move Financial Aid on Campus Transfer	Select Always, Never, or Prompt User. When you select Always or Prompt User, Pell grants are moved to the new enrollment if the attending Pell ID of the campus to which the enrollment is being transferred is the same as the attending Pell ID of the campus from which the enrollment is being transferred. Direct loans are moved to the new enrollment if the Direct Loan ID of the campus to which the enrollment is being transferred is the same as the Direct Loan ID of the campus from which the enrollment is being transferred. All other aid is moved to the new enrollment if the School code of the campus to which the enrollment is being transferred is the same as the school code of the campus from which enrollment is being transferred.
Move Budget/Ac Yr Information	Select Always, Never, or Prompt User to move budgets on campus transfers or enrollment transfers.

Field	Description
Transfer Enrollment Settings for Payment Period Logic	When the transfer enrollment process is performed on students in Program Versions that use payment periods, the logic should be selected to transfer both the start date and the Academic Year information or to not transfer both the start date and Academic Year information. This setup is found under **Setup** > **Campus Locations** > **Transfer Opt.** tab. The check box to transfer the start date and Academic Year information can be selected independently of each other; however, users should not select one without the other as the Grad Tool logic needs these to be synchronized with each other.
Allow Transfers to be Queued	Select Yes to allow transfers to be queued for batch processing.
Set Default Process Date	Select one of the following options: • Set Default Process Date to Term End Date • Set Default Process Date to Current Month End Date • No Default. User will key in Process date for each Transfer
Move Current/Sched. Courses to New Enrollment	Select one of the following options: • Move all Current/Scheduled courses to the new enrollment • Move only Current/Scheduled courses that exist in the new program's version course (to associate with program version) • Move only Current/Scheduled courses selected by the user to the new enrollment • Prompt user . (If selected, the user chooses how to handle the current/scheduled courses within the transfer wizard for each individual transfer processed.) • Do not move Current/Scheduled courses (This option is to *not* reassign scheduled courses.)
FA Activity Assignment	In the FA Activity Assignment section: a. Select an Activity. b. Select a Staff Assignment. The drop-down list is only enabled when an Activity is selected. c. Select a Staff Member. The drop-down list is only enabled when an Activity is selected and the selection in Staff Assignment is "Use Specific Default FA Staff Member."

Field	Description
SA Activity Assignment	In the SA Activity Assignment section: a. Select an Activity. b. Select a Staff Assignment. The drop-down list is only enabled when an Activity is selected. c. Select a Staff Member. The drop-down list is only enabled when an Activity is and the selection in Staff Assignment is "Use Specific Default SA Staff Member." **Note**: Remember to set up permissions for staff members. See Add or Edit a Staff Member.

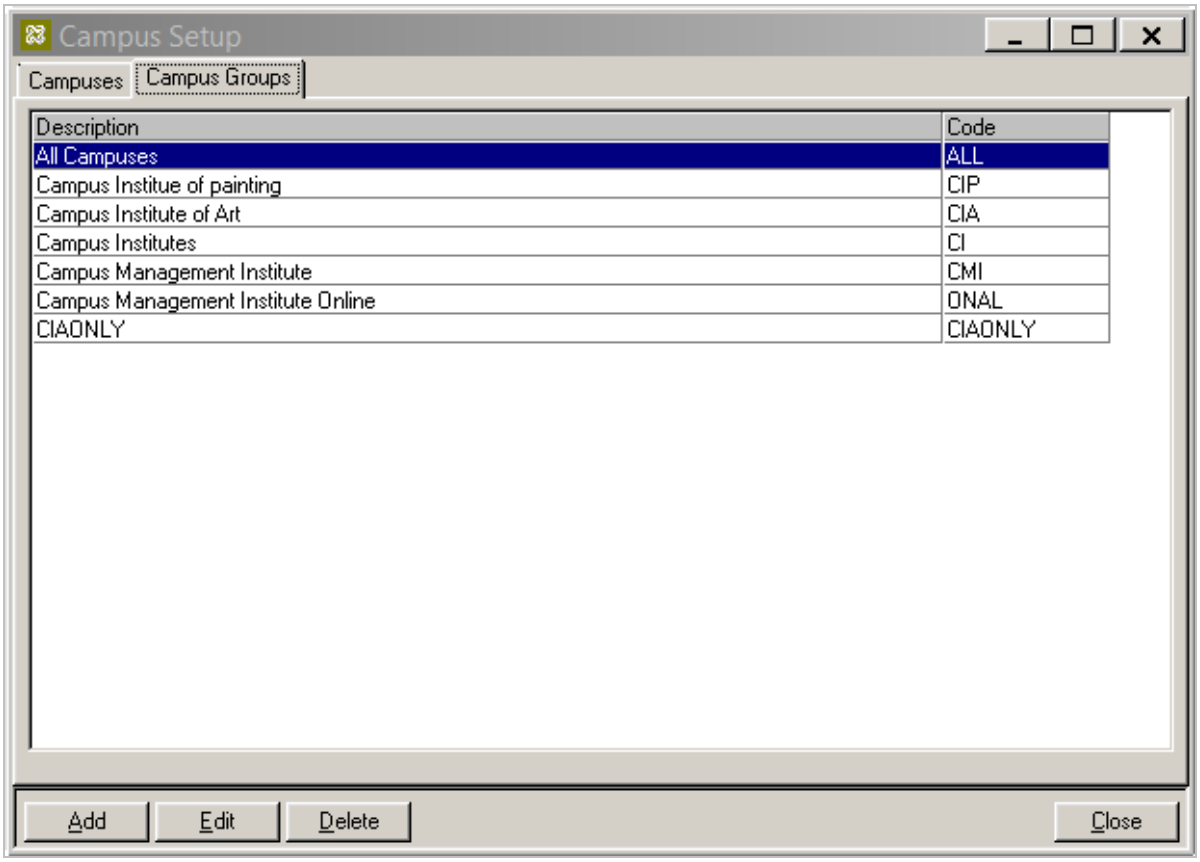
Managing Campus Groups

When an institution has more than one campus, each campus must be associated with a campus group. A campus group may include campuses that are located in the same city and share instructors and administrative staff. Even when the institution has only one campus, a campus group with one campus must be created. Many reports in CampusNexus Student use the Campus Group property as a selection option.

If your CampusNexus Student system is integrated with an accounting system, refer to CampusVue Finance, HR & Payroll or CampusNexus Finance, HR & Payroll for instructions on setting up campus groups.

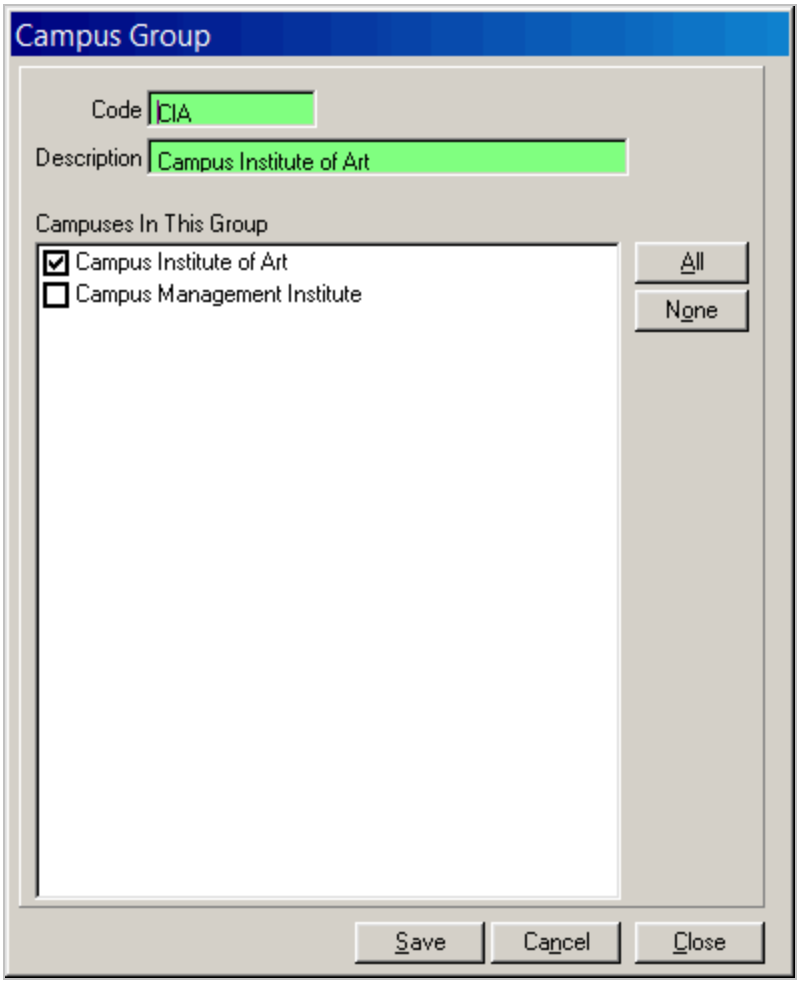
To add or edit a campus group:

1. Navigate to **Setup > Campus Locations > Campus Groups** (tab). The Campus Setup form is displayed.
2. Click the **Campus Groups** tab.



3. Click **Add** to add a campus group, or select a campus group and click **Edit** to view or change it.

   The Campus Group form is displayed. All campuses that have been set up are listed in the 'Campuses In This Group' section.



4. Specify a unique **Code**.
5. Enter a **Description**.
6. Click **All** to include all campuses in the group. CampusNexus Student places check marks beside all the campuses. Clear the check marks on campuses that you do not want to be included in the group.
7. Click **None** to exclude all campuses from the group. CampusNexus Student clears the check boxes beside each campus. Select the campuses that you want to include in the group.
8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To delete a campus group:

When you delete a campus group, you are only deleting the indicators that the campuses are related. The campuses in the group are not deleted. When you delete a campus group you may be affecting displays and reports that were based on the group.

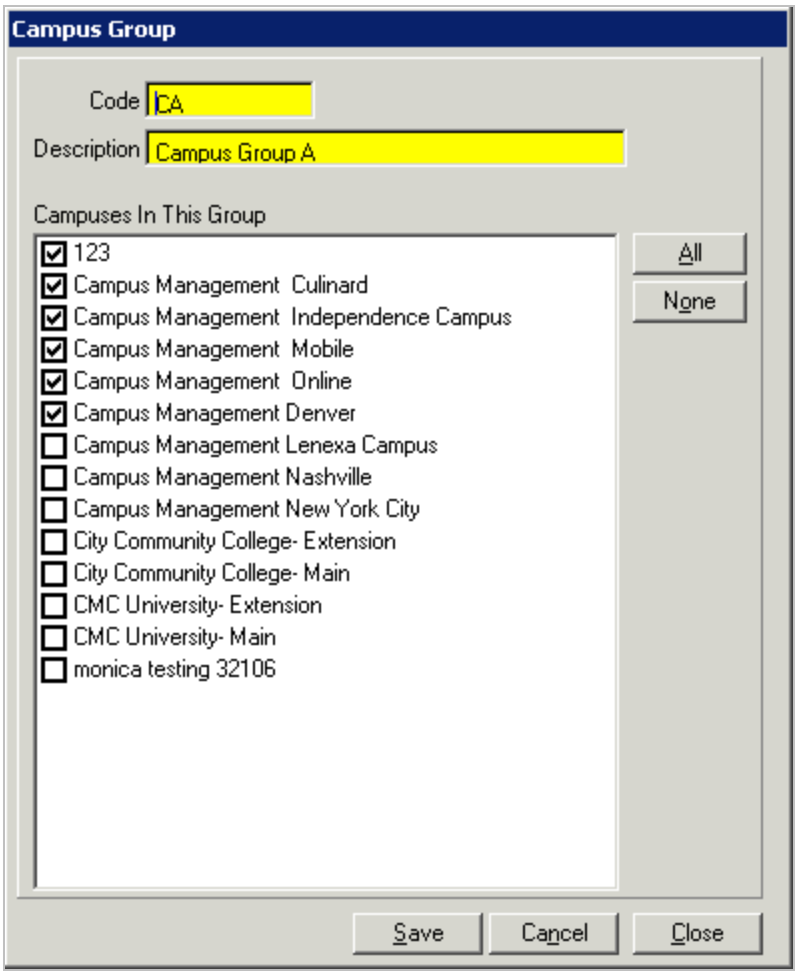
1. On the Campus Groups tab of the Campus Setup form, click the campus group to be deleted.
2. Click **Delete**. A confirmation message is displayed. Click **Yes**.

CampusVue Finance, HR & Payroll

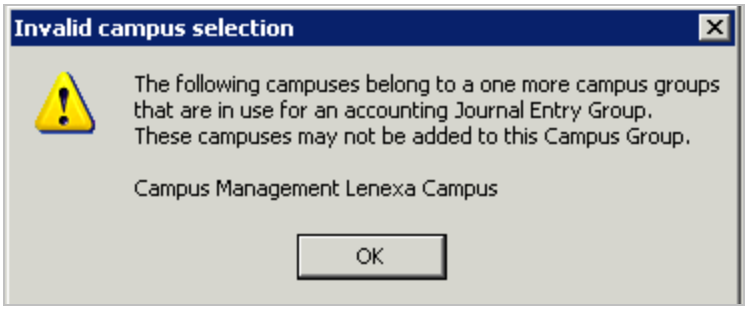
When CampusVue Finance, HR & Payroll is integrated with CampusNexus Student, Journal Entry Groups are set up per fiscal year and ledger and associated with campus groups. A campus can only be associated with one journal entry group for a fiscal year. The Journal Entry Group form validates this business requirement.

To set up campus groups:

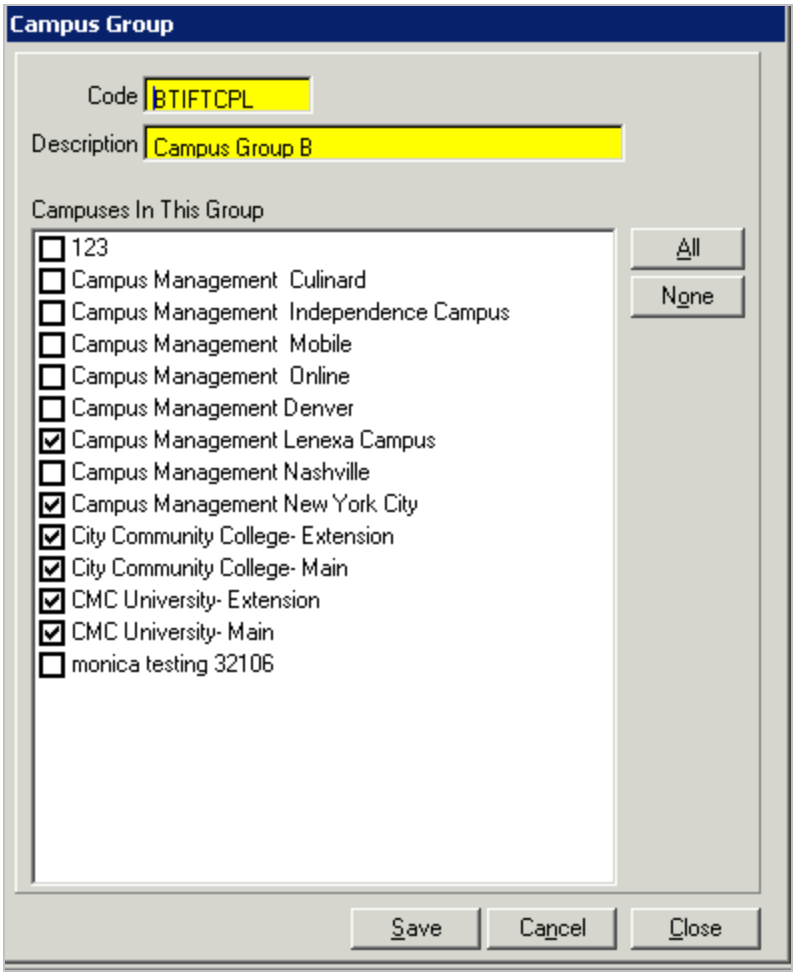
1. Navigate to **Setup > Campus Locations > Campus Groups** (tab) **> Add/Edit** (buttons).
2. Select a campus group, e.g., Campus Group A.



In this example, the user is attempting to add 'Campus Management Lenexa Campus' and 'Campus Management New York City' to Campus Group A. These campuses are assigned to Campus Group B, which is linked to a Journal Entry Group associated with the same fiscal year. Since these campuses are assigned to Campus Group B that is associated with a different Journal Entry Group with the same fiscal year as the selected Campus Group A, CampusNexus Student will not add the campuses to the campus group and the following message will appear.



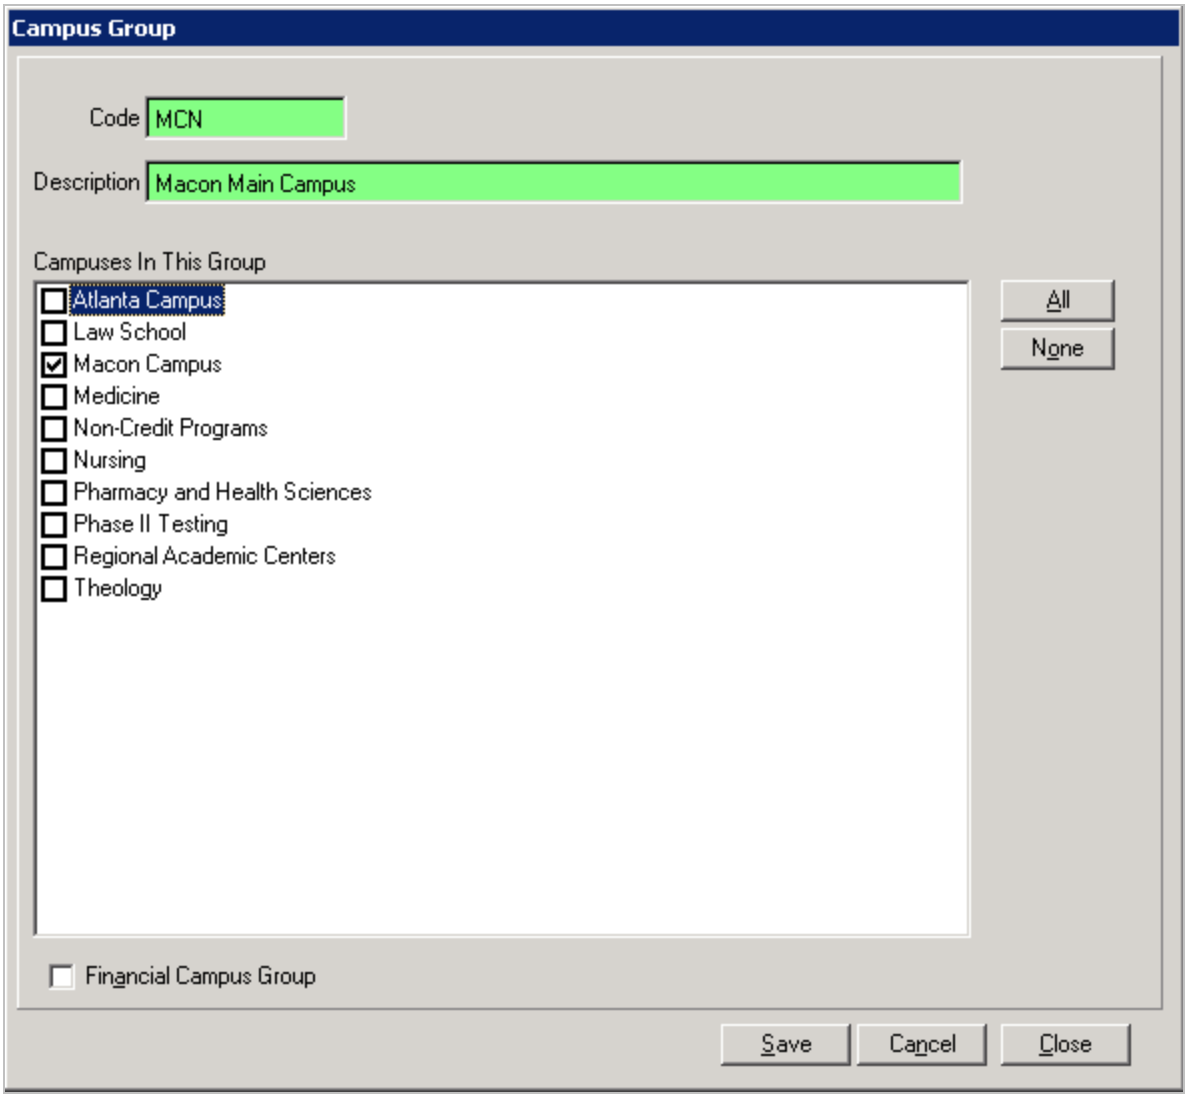
3. Click **OK**. You will return to the Campus Groups selection form and these campuses will not be added to the Campus Group. However, any other campuses selected that do not violate the restriction will be successfully linked to the campus group.
4. Select Campus Group B. Note that 'Campus Management Lenexa Campus' and 'Campus Management New York City' are assigned to Campus Group B.



When the fiscal year is the same for the journal entry groups associated with **Campus Group A** and **Campus Group B**, a campus can only be linked to one campus group for a fiscal year.

CampusNexus Finance, HR & Payroll

When CampusNexus Finance, HR & Payroll is integrated with CampusNexus Student, the Campus Group form displays a check box labeled **Financial Campus Group**. Selecting this check box tells the system to combine all transactions associated with this campus group into the same Journal Entry. A campus can only be part of one Financial Campus Group at a time.



See Initial Configuration of CampusNexus Finance, HR & Payroll.

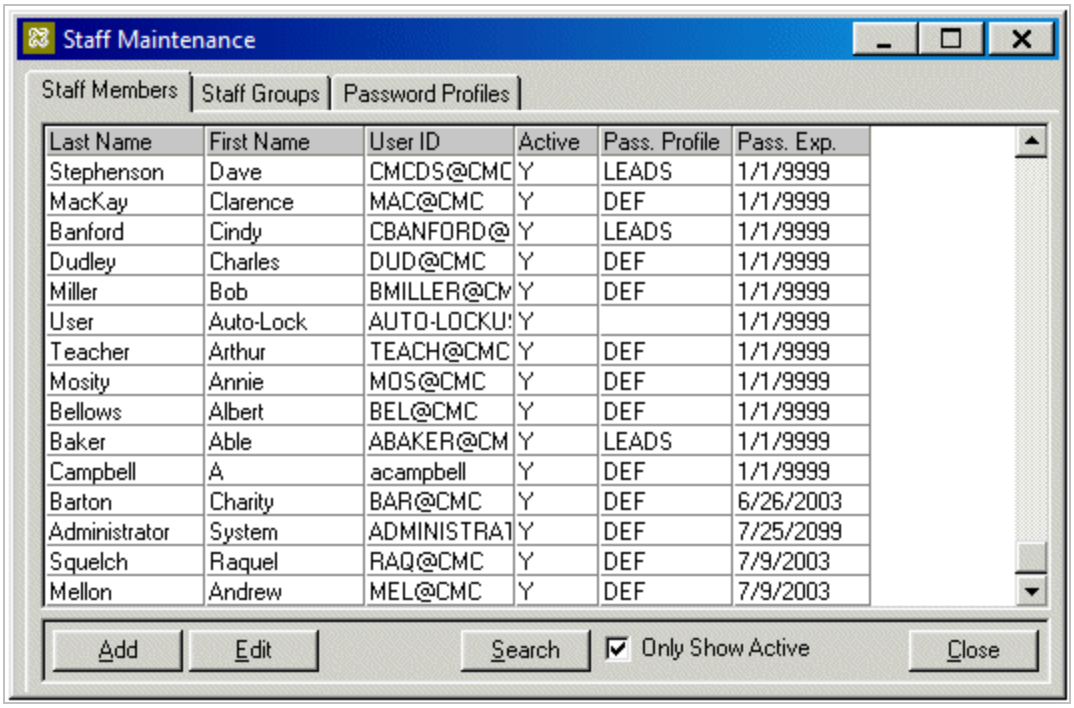
Staff Maintenance Form

The system administrator (SA) can set up and modify staff members and staff groups for your institution.

To set up and modify Staff Members and Staff Groups:

1. As a system administrator, navigate to **Setup > Staff**. The Staff Maintenance form is displayed.

   - If the authentication modes **Use CampusNexus Student Database** or **Use Windows Login (Non-AD)** are enabled, the Staff Maintenance form contains the Staff Members, Staff Groups, and Password Profiles tabs.
   - If passwords and password rules are controlled by **Active Directory**, the Password Profiles tab does not appear, and the 'Pass. Profile' and 'Pass. Exp' columns do not appear on the Staff Members and Staff Groups tabs.



2. The **Staff Members** tab presents a list of staff members. In addition to names and user IDs, the tab displays the following information:

   - The Active column indicates the staff member's status (Y = active, N = inactive). This setting is derived from the Staff Information form.
   - The Pass. Profile column lists the active Password Profile for that user.
   - The Pass. Exp. column lists the current password's expiration date.

   On the Staff Members tab, you can perform the following actions:

   a. Select **Only Show Active** to display only active staff members. Clear the check box to view all staff members.

   b. Click **Add**, **Edit**, or **Search** to add, edit, or search for a staff member. You cannot delete a staff member;

however, you can **deactivate** a staff member to prevent the staff member from having new work assigned.

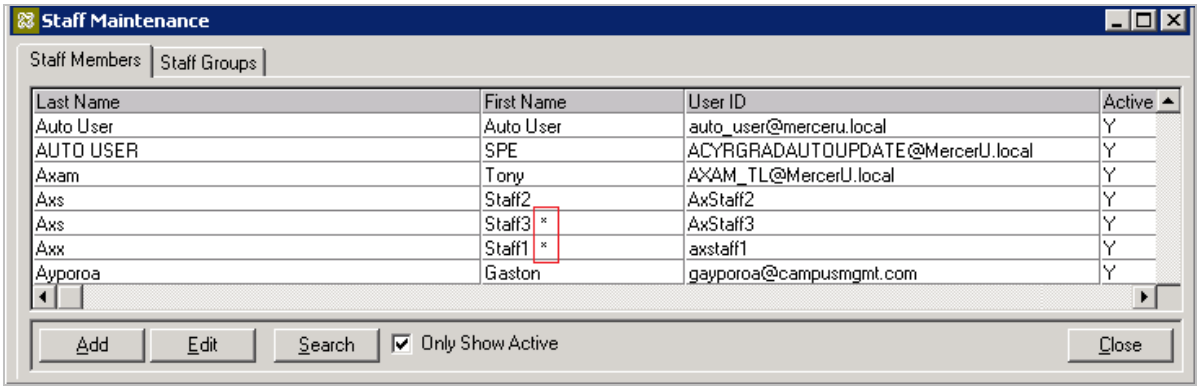
Note: Making a staff member inactive does not prevent the person from logging into the system. The only way to prevent a staff member from logging into the system is to remove (clear) the person's password.

All staff members who use CampusNexus Student must be recorded in the Staff Maintenance form. Even staff members who will not use CampusNexus Student directly must be entered if they are to be referenced in any way, for example, instructors who are assigned to class sections but do not need access to CampusNexus Student. If a staff member needs to be referenced, the staff member is assigned a User ID but not a password. Without a password, a staff member cannot access the system.

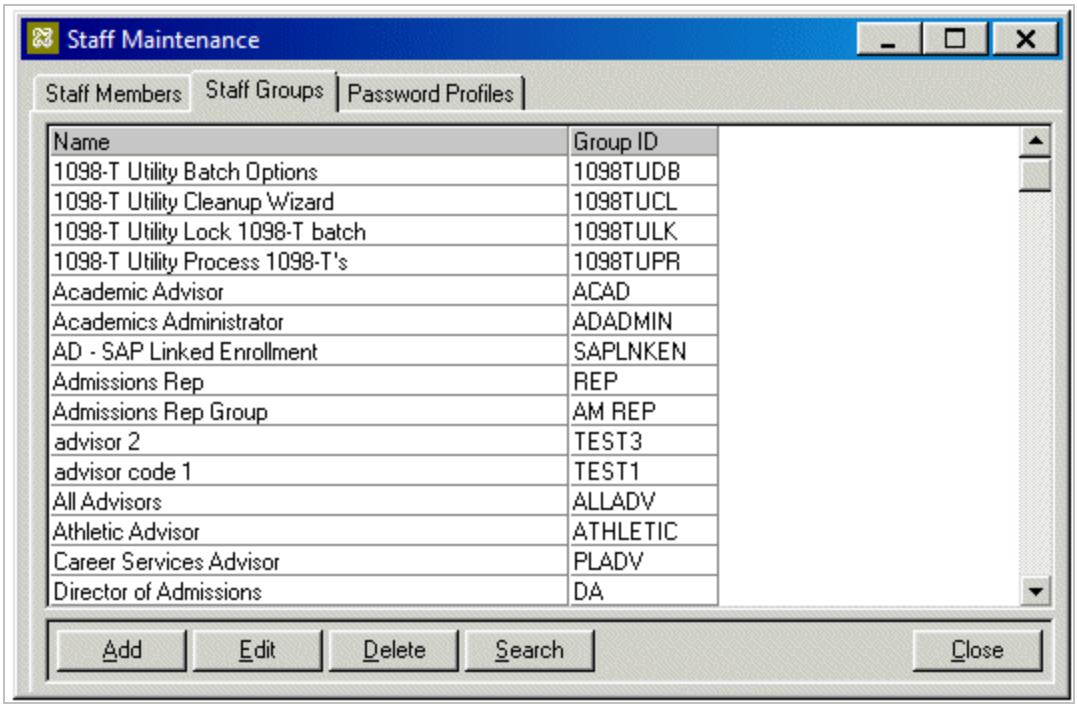
See Assigning Staff Permissions.

See Security to set up security rights for staff members and groups.

If Faculty Management Integration for CampusNexus Finance, HR & Payroll is enabled (see Academic Records Settings - General Tab), Instructors created in CampusNexus Finance, HR & Payroll are marked with an asterisk (*) as shown below. These Instructors must be assigned to Campus Groups in CampusNexus Student. See Assigning Staff Permissions.



3. Click the **Staff Groups** tab to add, edit, delete, and search staff groups. Assign staff members to groups based on the department they are in and the work they do. Groups are given certain privileges based on the needs of the group when performing their administrative duties. These permissions include the permissions to access, view, or write data in CampusNexus Student.



Some staff groups are required by CampusNexus Student. These groups may not be deleted; however, there is no requirement that you must assign staff members to any of these groups except the System Administrator group.

- System Administrator
- Director of Admissions
- Admissions Reps
- Financial Aid Advisors
- Academic Advisors
- Instructors
- Career Services Advisors

At least one person must be assigned to the System Administrator group. A default person with the name "Administrator" is delivered with CampusNexus Student. After you assign another person to the System Administrator group, you can delete the default Administrator.

The Staff Group AD - SAP Linked Enrollment allows staff members to link enrollments using the Enrollment Wizard and the Re-Entry Wizard, as long as the SAP Enrollment Linking? Academic Records Setting is configured to Yes.

4. Click the **Password Profiles** tab to access the Password Profile form.

Note: When you edit a staff member or staff group, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Active Directory Integration with CampusNexus Finance, HR & Payroll

If Faculty Management Integration for CampusNexus Finance, HR & Payroll is enabled (see Academic Records Settings - General Tab), Instructors (Staff/Users) can be created in CampusNexus Student or in CampusNexus Finance, HR & Payroll. Active Directory integration between the two systems ensures that every Instructor that is intended to be created in CampusNexus Student is mapped to a User in CampusNexus Finance, HR & Payroll.

If the CampusNexus Finance, HR & Payroll User is not expected to be a CampusNexus Student application user, the CampusNexus Finance, HR & Payroll User is just a domain user with no application permissions for CampusNexus Student.

The Active Instructor flag in CampusNexus Finance, HR & Payroll is synchronized with the CampusNexus Student Staff (Instructor) record.

Faculty Members can be imported into CampusNexus Finance, HR & Payroll with User Domain Details, so that at the end of import, the CampusNexus Finance, HR & Payroll Instructors are mapped to CampusNexus Student Staff.

The Instructor record in CampusNexus Finance, HR & Payroll must include the domain details. CampusNexus Finance, HR & Payroll attempts to send the Instructor record to CampusNexus Student when the domain details are present. CampusNexus Student checks for the existence of the domain details. If found, the First Name & Last Name are compared with CampusNexus Finance, HR & Payroll.

- If there is a mismatch in the First Name & Last Name, a message about the mismatch is displayed in CampusNexus Finance, HR & Payroll.
- If there is a match in the First Name & Last Name, the CampusNexus Student Staff and CampusNexus Finance, HR & Payroll Instructor are mapped.
- If the user domain details never existed in CampusNexus Student, a new Instructor (Staff) is created.

As part of the mapping, CampusNexus Student sends the Staff ID to the CampusNexus Finance, HR & Payroll Instructor record. For an existing Instructor, CampusNexus Student sends a list of Campuses.

Changes in domain details or changes in the related CampusNexus Finance, HR & Payroll User go through the same synchronization and validation flow. The following rules apply:

- Once a domain is assigned to an Instructor, the domain details cannot be removed. This means a Staff/Instructor user can be replaced but not removed.
- A visual indicator is displayed in CampusNexus Finance, HR & Payroll for records that are not synchronized.
- Domain details cannot be edited in CampusNexus Student.
- Duplicate domain details cannot be saved against Users (in CampusNexus Finance, HR & Payroll and CampusNexus Student).

Sample Scenarios:

A. Hari is an Instructor. His User Principal Name (UPN) in the Active Directory database is harihara@cmc.com. When Faculty Management Integration is enabled, CampusNexus Finance, HR & Payroll sends the domain details to CampusNexus Student, and CampusNexus Student checks for the UPN in the Staff list.
    - If the UPN is not found, a new Instructor (Staff) record is created in CampusNexus Student. The message *"Instructor created in CampusNexus Student"* is displayed in CampusNexus Finance, HR & Payroll.
    - If the UPN is found, the Instructor is mapped to the Staff record for Hari. The Campuses associated with his record are sent to CampusNexus Finance, HR & Payroll. The message *"Instructor mapped in CampusNexus Student"* is displayed in CampusNexus Finance, HR & Payroll.
    - If UPN is found against Staff member 'Ben', the message *"Staff mapping failed because of mismatch in First Name & Last Name between CampusNexus Finance, HR & Payroll and CampusNexus Student"* is displayed when the administrator attempts to link the records to harihara@cmc.com. The records are not synchronized and the domain details are not saved.

B. After the initial synchronization Hari's name is changed to Ben. When Faculty Management Integration is enabled, CampusNexus Finance, HR & Payroll sends the Active Directory details to CampusNexus Student, and the name is changed in CampusNexus Student.

C. Hari's UPN is changed from harihara@cmc.com to hari@cmc.com. When Faculty Management Integration is enabled, CampusNexus Finance, HR & Payroll sends the Active Directory details to CampusNexus Student, and

CampusNexus Student checks for hari@cmc.com in the Staff list.

- If the UPN is not found, the existing domain details of the mapped Staff record are changed from hari-hara@cmc.com to hari@cmc.com.
- If the UPN is found against Staff member Ben, a message is displayed indicating that the domain details cannot be changed.

Staff Information Form

The fields and tabs available on the Staff Information form vary depending on whether the Central Security Application is used to set up and maintain end-user security. Refer to Central Security Application Not Used, otherwise see Using Central Security Application.

Use the General tab on the Staff Information form to set up the Code, Name, and status (active/inactive) of the staff member,

To enter or change general information for a staff member:

1. Navigate to **Setup** > **Staff**. The Staff Maintenance form is displayed.

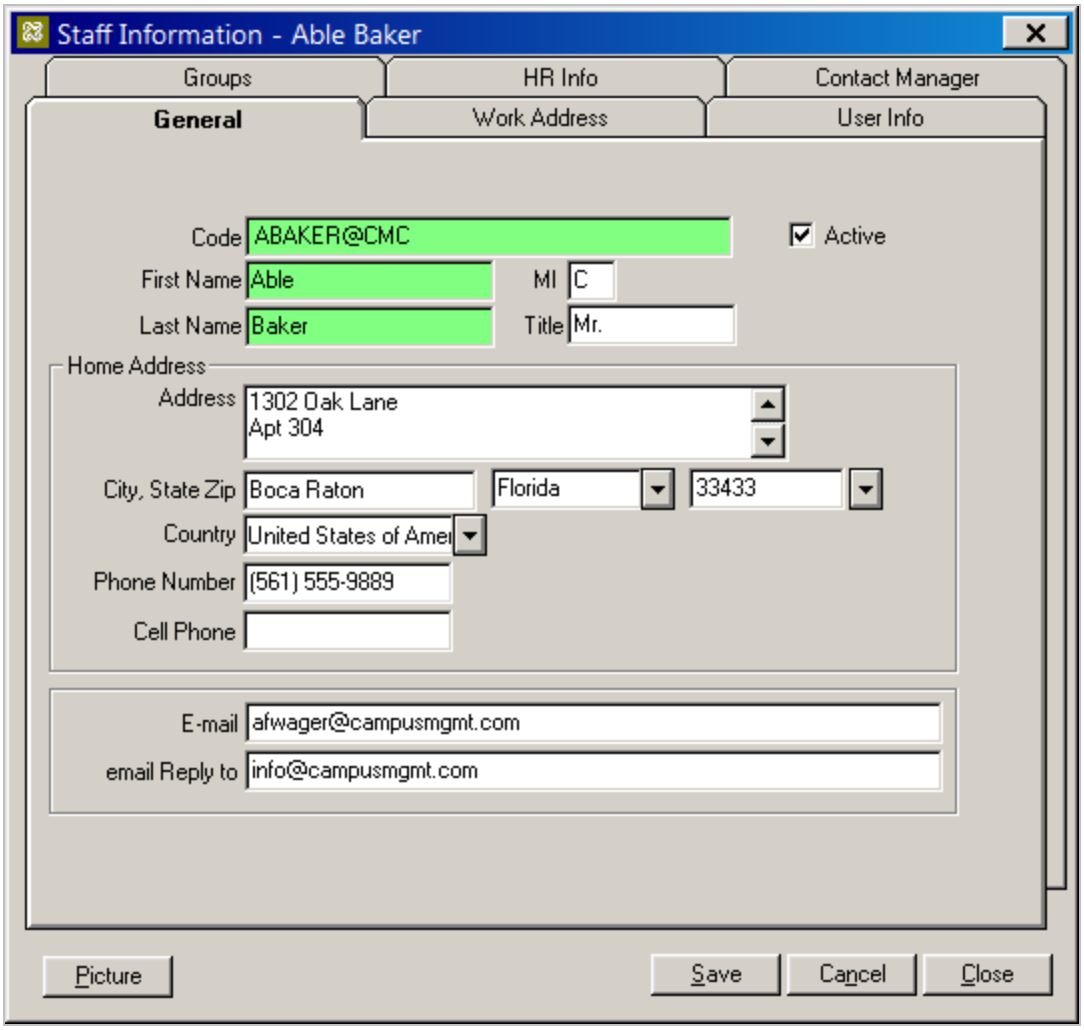
   Select a record on the Staff Members tab and click **Add** or **Edit**. The Staff Information form is displayed.

   When you add a staff member, a blank Staff Information form is displayed; otherwise, the form displays previously entered information pertaining to the staff member.

   ### Central Security Application Not Used

   When the Central Security Application is not used, the Staff Information form contains the following tabs:

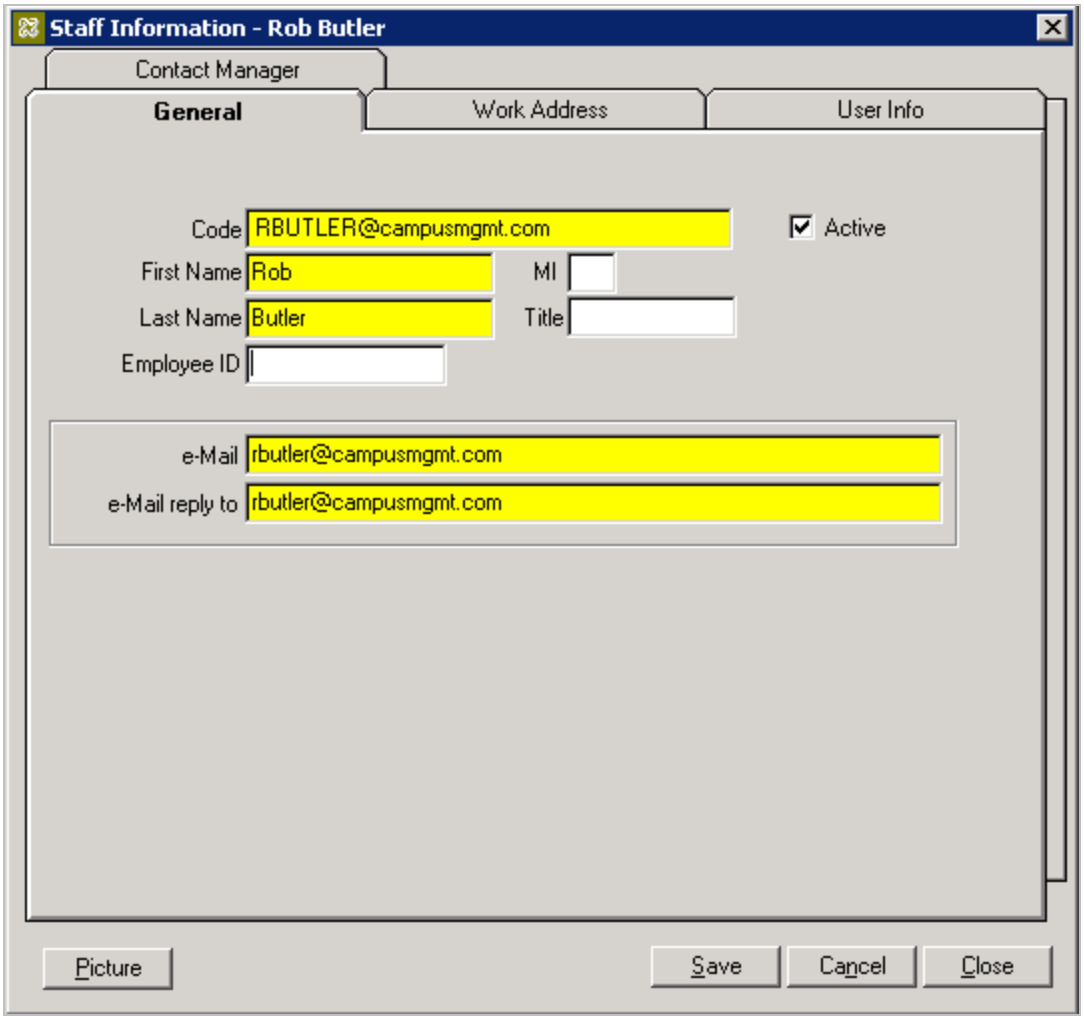
   - General
   - Work Address
   - User Info
   - Groups
   - HR Info
   - Contact Manager



Using Central Security Application

When the Central Security Application is used, the Staff Information form contains the following tabs:

- General
- Work Address
- User Info
- Contact Manager



2. Specify the staff member's **Code**, **Name**, and other pertinent information.
3. If this is an active staff member, be sure the **Active** check box is selected.

   Note: A staff member's status can be changed to inactive to prevent the staff member from having new work assigned. For further details on the impact of active/inactive status, refer to the following topics:

   - Displaying active/inactive status of staff members: Staff Maintenance Form
   - Assigning activities to staff members: Contact Manager Form
   - Displaying names of staff members for Admissions Rep purposes: Admissions Rep Maintenance
   - Displaying names of staff members for Instructor purposes: Instructor Maintenance
   - Automatic triggering of activities assigned to advisor groups: Add an Auto Activity

   Making a staff member inactive does not prevent the person from logging into CampusNexus Student. The only way to prevent a staff member from logging into the system is to remove (clear) the person's password.
4. Click **Picture** to view or upload a picture of the staff member.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a staff member or staff group, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Searching for Staff Members

The search engine in CampusNexus Student enables system administrators to manage staff lists at specific campuses. System administrators can search for staff members by specifying search parameters on the Search Staff form.

To search for a staff member:

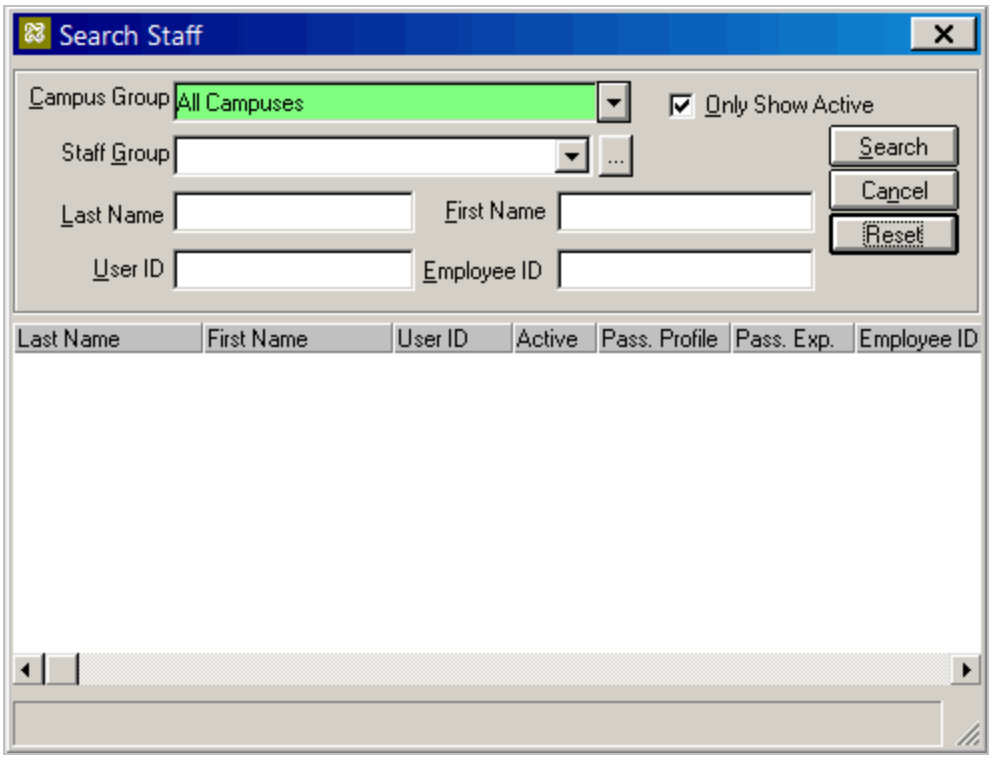
1. Click the Search icon on the Main toolbar, and select **Search Staff**.

   - OR -

   Right-click in the work area and select **Find Staff**.

   The Search Staff form is displayed.

   Note: The Search Staff and Find Staff options are enabled only if you have view permissions on Setup > Security and Setup > Staff.



2. To perform a search, select or enter any (at least one) or all of the following parameters:

   - Campus Group
   - Staff Group
   - Last Name
   - First Name
   - User ID
   - Employee ID

   Note: If you previously used the search option, CampusNexus Student retains your search criteria. Click the **Reset** button to clear previous search parameters.

3. Click **Search**. The search results are displayed in the grid.

Note: The selection of fields in the staff search results can be customized. For more information, see Customizing Search Results.

4. Double-click a record in the grid. The Staff Information form display the details of the selected record. You can modify the record.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.
6. Click **Cancel** to close the Search form

Adding or Editing a Staff Member

To add or edit a staff member:

1. Navigate to **Setup > Staff**. The Staff Maintenance form is displayed.
2. To add a new staff member, click **Add** on the Staff Maintenance form. A blank Staff Information form is displayed.
3. To modify a staff member's information, select a record and click **Edit**. The Staff Information form is displayed containing the staff member's existing information.

   Note: When you edit a staff member or staff group, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.
4. Fill out the information within all Staff Information form tabs that is applicable to the staff member.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Staff Information - General Tab - Deactivating a Staff Member

You can deactivate staff members who have been set up by mistake and have no tasks, historical references, or student-related assignments. Deactivating is also highly recommended for staff members who have history accumulated in CampusNexus Student, but are no longer active users.

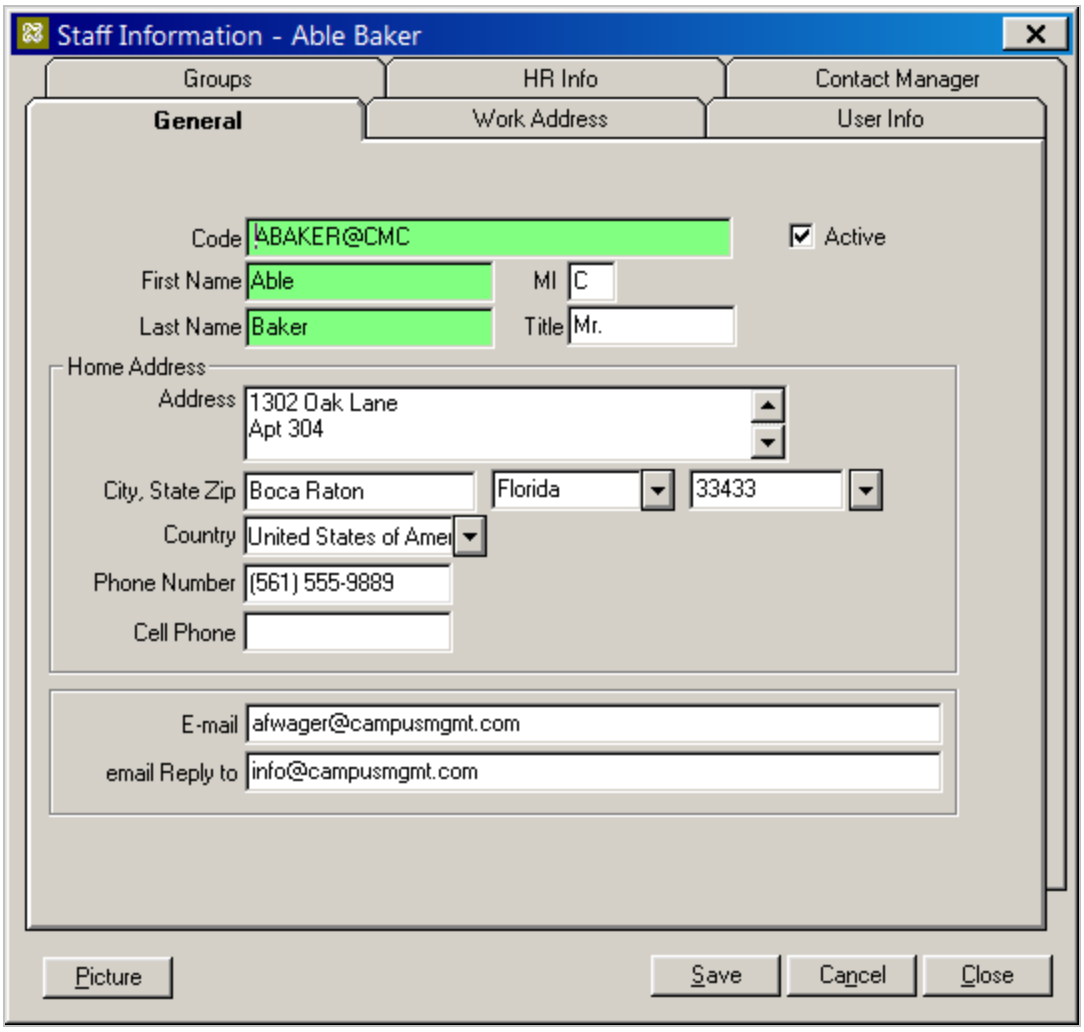
Note: Deactivating a staff member does not prevent the person from logging into CampusNexus Student. To prevent a staff member from logging into the system, lock the person's account. For more information, see Assigning Staff Permissions.

To deactivate a staff member:

1. Navigate to **Setup** > **Staff**. The Staff Maintenance form is displayed.

   Select a record on the Staff Members tab and click **Add** or **Edit**. The Staff Information form is displayed.

2. Select the **General** tab.



3. Clear the **Active** check box.
4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a staff member or staff group, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Deleting a Staff Member

Staff members cannot be deleted using the CampusNexus Student user interface. Instead of deleting a staff member, deactivate the staff member. Thus, you do not risk disturbing historical information in your system. You can also remove the staff member's password. This prevents the person from logging into CampusNexus Student while you keep a record of the person's previous involvement with the system.

Note: Clients who need to delete a staff member can request a delete script from Support (1-800-483-9106).

Staff Information - General Tab - Pictures

You can import staff pictures into CampusNexus Student and display them when the need arises. When they are imported, the pictures are stored as bit maps in the CampusNexus Student database.

To import staff pictures:

1. Navigate to **Setup** > **Staff**. The Staff Maintenance form is displayed.

   Select a record on the Staff Members tab and click **Add** or **Edit**. The Staff Information form is displayed.

2. On the General tab, click the **Picture** button. If a picture has already been imported for the staff member, it is displayed on the form.

   Note: You can edit, clip, and size, the picture before you load the file into CampusNexus Student. Once it is imported, you cannot change anything except its orientation.

3. Click **Load** to import a picture from a file on disk. The file must have ".bmp" as its extension. When you click Load, CampusNexus Student opens a directory search form. Use it to find the image you want to import.

4. Click **Scan** to open your scanner software and import an image directly from a scanner attached to your computer or on your network. When you click Scan, CampusNexus Student looks for "Twain" compliant applications on your PC. If there is more than one, choose one to open. When the image is scanned, select an option in the scanner application to export the image to CampusNexus Student.

5. Click **Clear** to clear an existing picture of the staff member from the form and from the database.

6. Click **Close** to close the Staff Picture form and save any changes you have made.
7. Click **Rotate** to rotate the image on the form 90 degrees.
8. Click **Flip** to turn the picture upside-down. This is the same as rotating it 180 degrees.
9. Click **Print** to print a copy of the staff member's picture. The picture is enlarged to just fit on an 8.5" x 11" sheet of paper.

Staff Information - Groups Tab

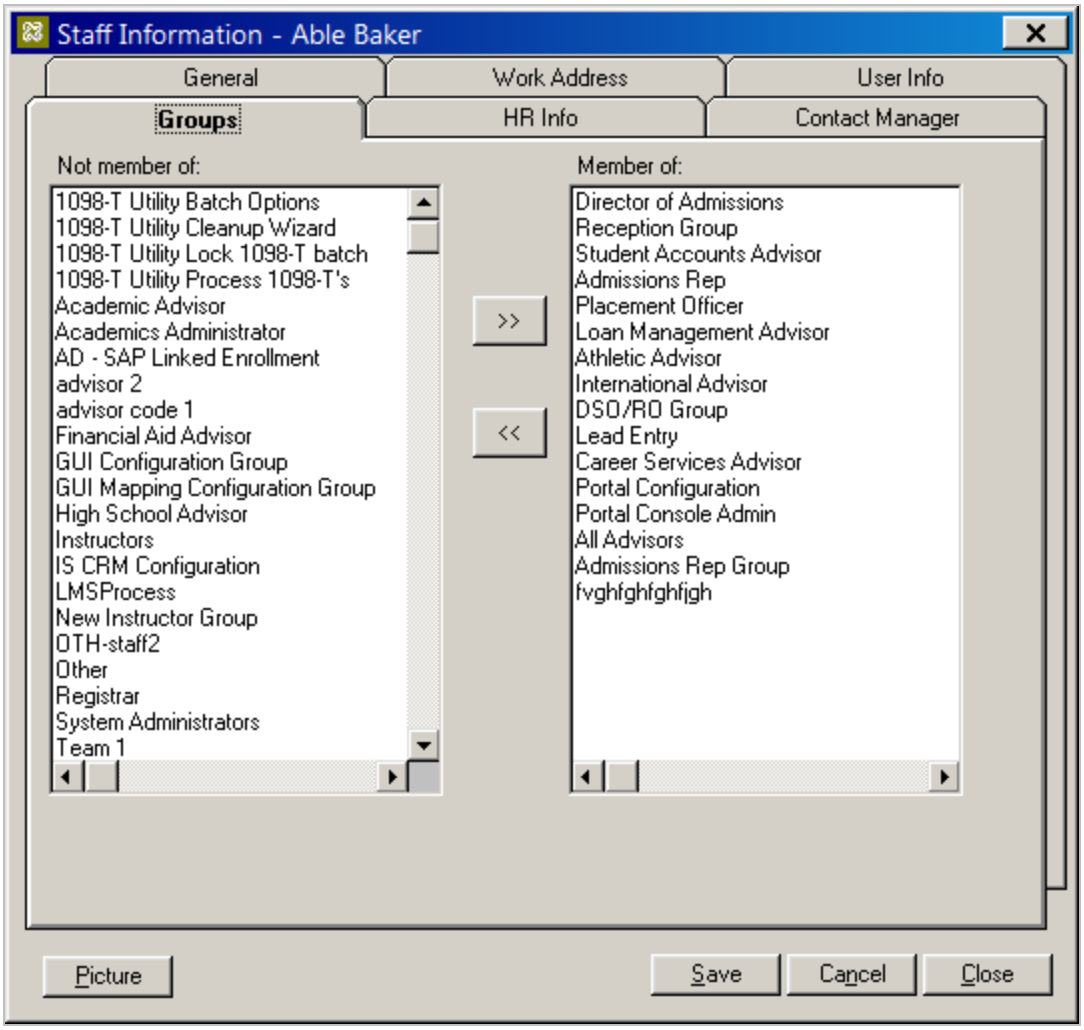
Use the Groups tab on the Staff Information form to display the groups to which a staff member is assigned or to assign a new staff member to one or more staff groups. A staff member can belong to several groups.

To assign the staff member to a group:

1. Navigate to **Setup** > **Staff**. The Staff Maintenance form is displayed.

   Select a record on the Staff Members tab and click **Add** or **Edit**. The Staff Information form is displayed.

2. Select the **Groups** tab. The 'Member of' list, displays all the groups to which the selected staff member belongs.



3. Click a group name in the **Not member of** box on the left to highlight it.
4. Click the **>>** button to move the group name under **Member of** in the right-hand box.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To remove the staff member from a group:

1. Click a group name in the **Member of** box on the right to highlight it.
2. Click the **<<** button to move the group name under **Not member of** in the left-hand box.
3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a staff member or staff group, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Staff Information - HR Info Tab

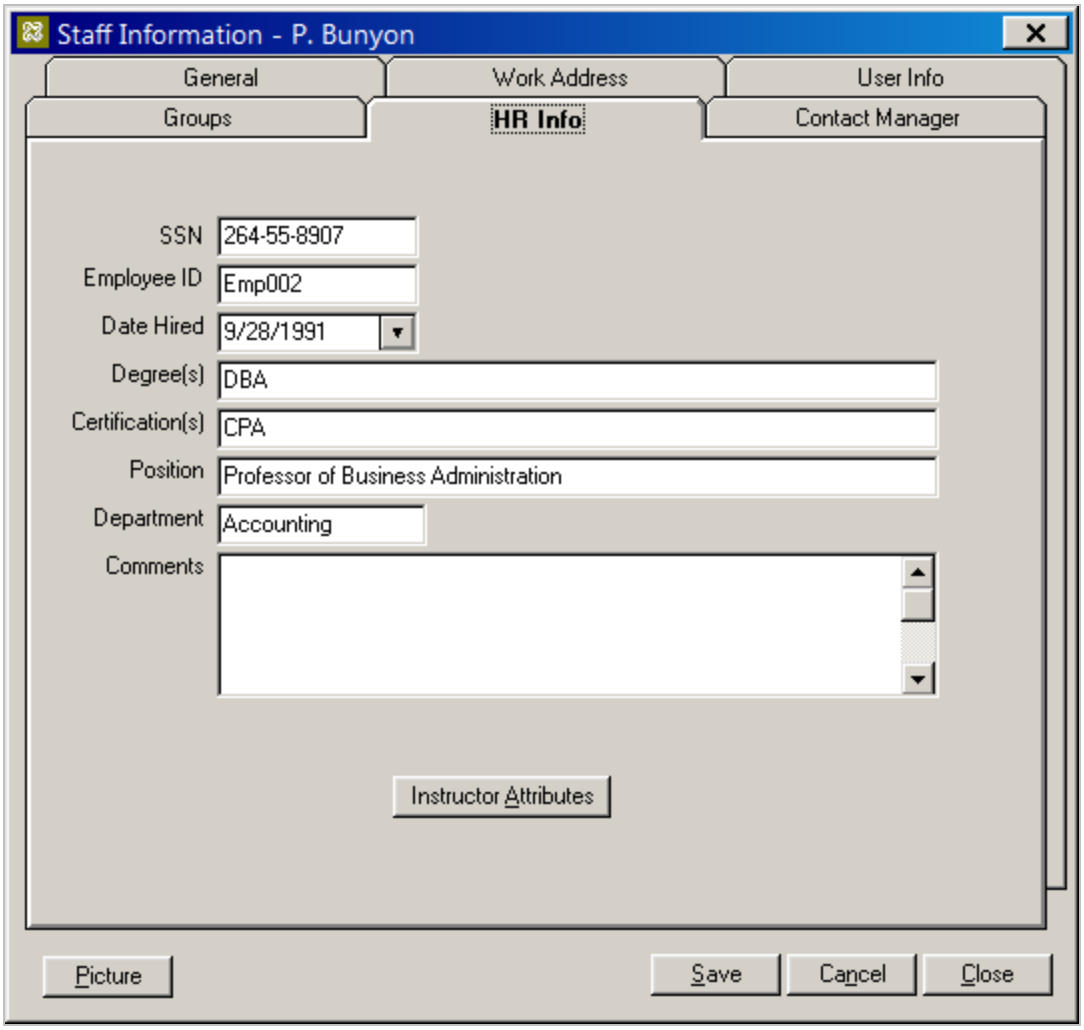
Use the HR Info tab on the Staff Information form to enter human resources information about a staff member, such as SSN, hire date, qualifications, position, and department.

To enter HR information for a staff member:

1. Navigate to **Setup** > **Staff**. The Staff Maintenance form is displayed.

   Select a record on the Staff Members tab and click **Add** or **Edit**. The Staff Information form is displayed.

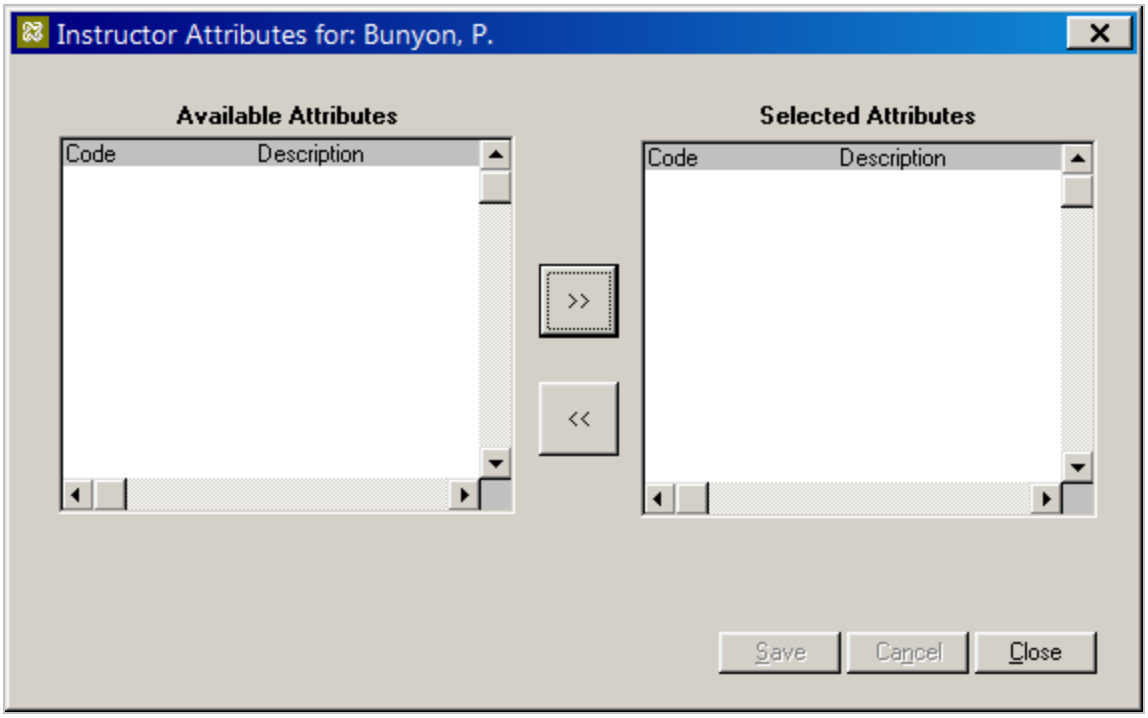
2. Select the **HR Info** tab.



3. Complete the fields on this tab. For more information, see Field Descriptions.

4. Click the **Instructor Attributes** button to select and deselect default attributes for an instructor. Click the **>>** button to add the attributes or click **<<** to remove them. The selected attributes set will appear in the course section when the instructor is selected.

   Note: The Instructor Attributes button is visible only if the selected staff member belongs to the staff group with code 'TEACH.'



5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a staff member or staff group, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Field Descriptions

Field	Description
SSN	The staff member's Social Security Number
Employee ID	The staff member's employee identification
Date Hired	The date the staff member was hired
Degree(s)	Degrees the staff member holds
Certification(s)	Certifications that apply to this staff member
Position	The staff member's position
Department	The staff member's department
Comments	A comment of up to 3,000 characters

Staff Information - Contact Manager Tab

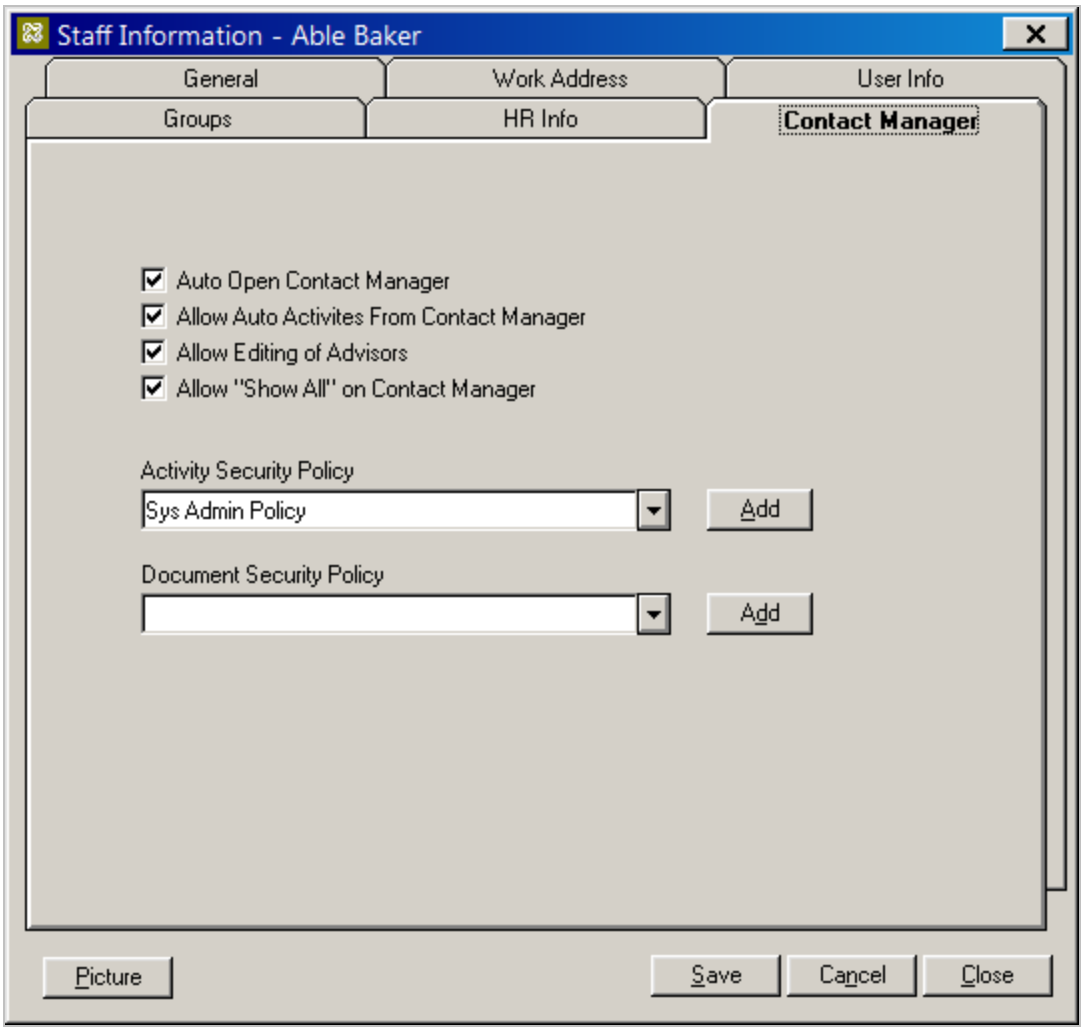
Use the Contact Manager tab of the Staff Information form to enter information about how staff use certain Contact Manager options. 'Staff' may refer to a staff member or group below depending on whether the Contact Manager tab was accessed via the Staff Information form (Staff Member) or the Setup Template form (Staff Group).

To assign Contact Manager options to a staff member:

1. Navigate to **Setup** > **Staff**. The Staff Maintenance form is displayed.

   Select a record on the Staff Members tab and click **Add** or **Edit**. The Staff Information form is displayed.

2. Select the **Contact Manager** tab.



3. Complete the fields on this tab. For more information, see Field Descriptions.
4. Click the Picture button (Only available on the Staff Information form) to access the staff member's picture.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a staff member or staff group, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Field Descriptions

Field	Description
Auto Open Contact Manager.	Select this option if you want Contact Manager to be opened at each logon.
Allow Auto Activities From Contact Manager	Select this option if you want the user to receive automatically assigned activities from Contact Manager.
Allow Editing of Advisors	Select this option to give the staff member permission to edit students advisors.
Allow "Show All" on Contact Manager	Select this option to display the All check box on the staff member's Contact Manager form. If the check box is enabled, the staff member can view all pending activities for all staff members.
Activity Security Policy	Select a policy and click **Add** to apply the policy to the staff member. For more information, see Activity Policies Setup.
Document Security Policy	Select a policy and click **Add** to apply the policy to the staff member. For more information, see Document Policies Setup.

Staff Information - Work Address Tab

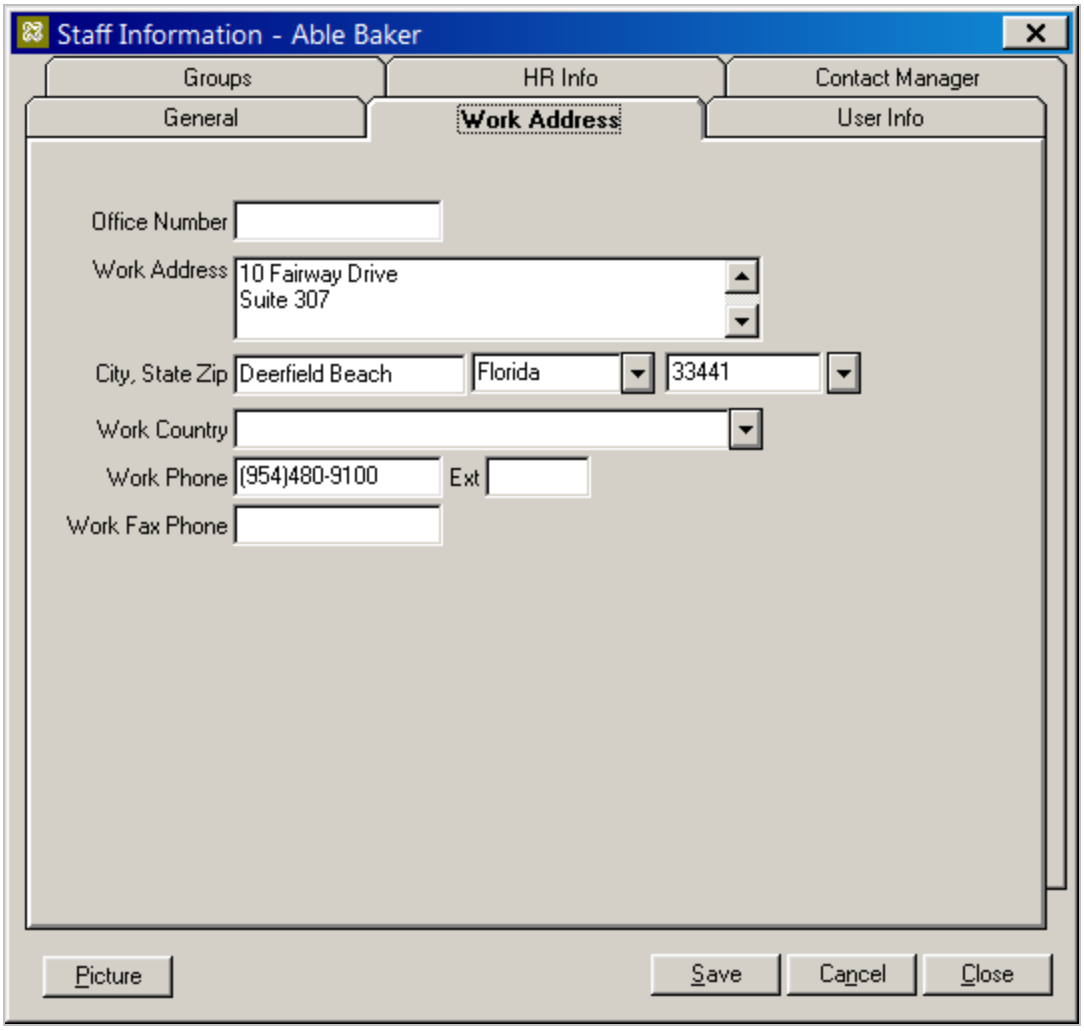
Use the Work Address tab on the Staff Information form store information about the staff member's work address.

To add or change work address information for a staff member:

1. Navigate to **Setup** > **Staff**. The Staff Maintenance form is displayed.

   Select a record on the Staff Members tab and click **Add** or **Edit**. The Staff Information form is displayed.

2. Select the **Work Address** tab.



3. Specify appropriate information in the following fields:

   - Office Number
   - Work Address
   - City
   - State
   - ZIP
   - Work Country
   - Work Phone

- Ext (extension)
- Work Fax Phone

4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a staff member or staff group, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Assigning Staff Permissions

The User Info tab on the Staff Information form contains information about a staff member's permissions in CampusNexus Student. The subtabs (see Reference topics) contain permissions pertaining to General settings, Student Accounts, Academic Records, Career Services, Financial Aid, Admissions, and Housing (if Housing is enabled in CampusNexus Student).

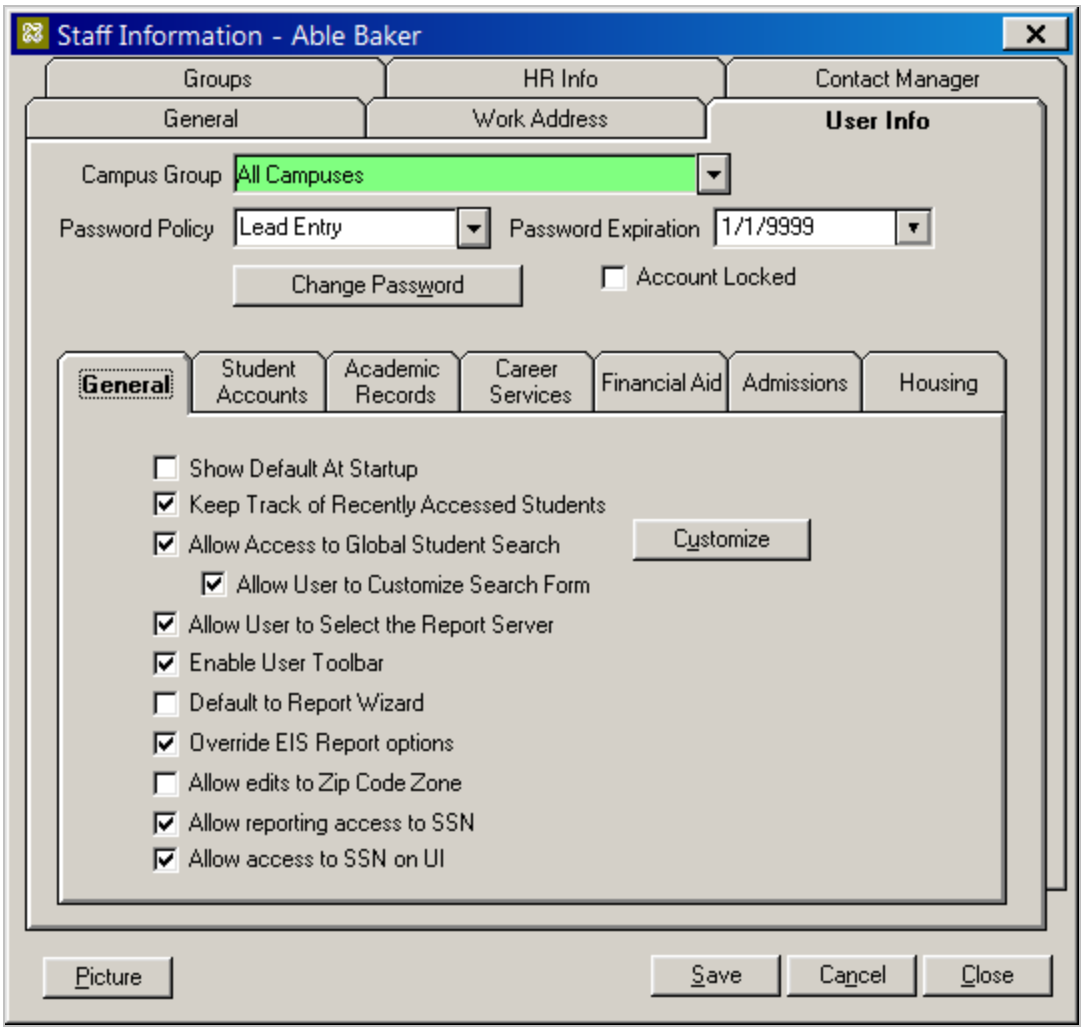
The User Info tab enables the system administrator to assign a password policy to a staff member, change a password, and lock an account.

To assign a password policy to a staff member:

1. Navigate to **Setup** > **Staff**. The Staff Maintenance form is displayed.

   Select a record on the Staff Members tab and click **Add** or **Edit**. The Staff Information form is displayed.

2. Select the **User Info** tab.



3. **Important!** Select a **Campus Group** to which the staff member belongs.
4. Select a **Password Policy** from a list of available Password Profiles.
5. Change the **Password Expiration** date if you want a date different from the supplied default date.

To change a staff member's password:

1. Navigate to **Setup** > **Staff**. The Staff Maintenance form is displayed.

   Select a record on the Staff Members tab and click **Add** or **Edit**. The Staff Information form is displayed.

2. Select the **User Info** tab.

3. Click **Change Password**. When the Change Password dialog is displayed, enter the new password, and then reenter the new password to confirm the exact characters. The new password must conform to the restrictions already set for the user's password profile.

   If you do not enter a password for a staff member, that person will not have access to the system. The person can be referenced by system users when, for instance, assigning instructors to class sections.

4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To lock a staff member's account:

1. Navigate to **Setup** > **Staff**. The Staff Maintenance form is displayed.

   Select a record on the Staff Members tab and click **Add** or **Edit**. The Staff Information form is displayed.

2. Select the **User Info** tab.

3. Select the **Account Locked** check box to prevent the user from logging on to CampusNexus Student.

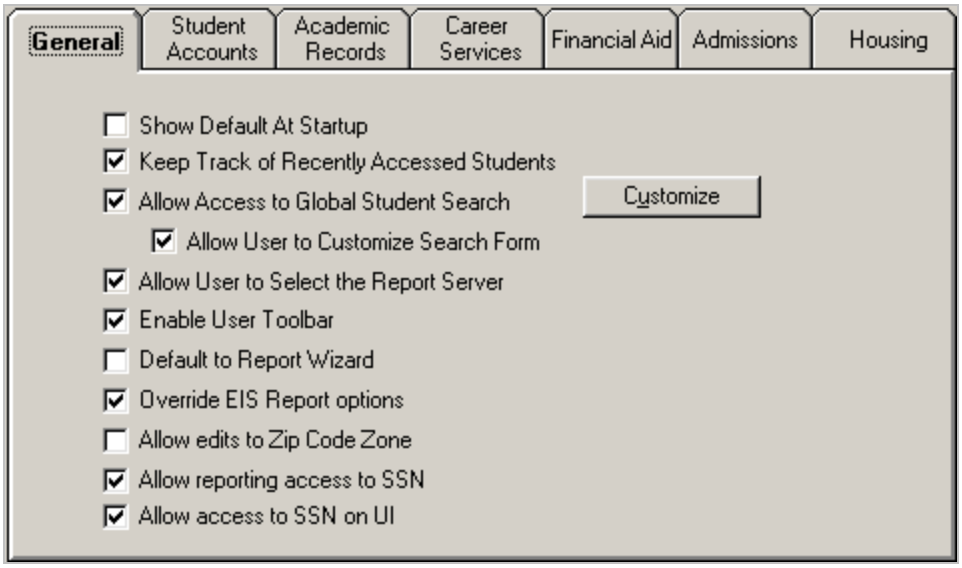
4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a staff member or staff group, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

User Info General Subtab

The General subtab on the User Info tab of the Staff Information form and Setup Template form contains general configuration settings for staff members and/or staff groups.

Note: When editing a staff member, all changes are audited. Audit verifications are handled at the database level only and performed through appropriate SQL queries.



Field Descriptions

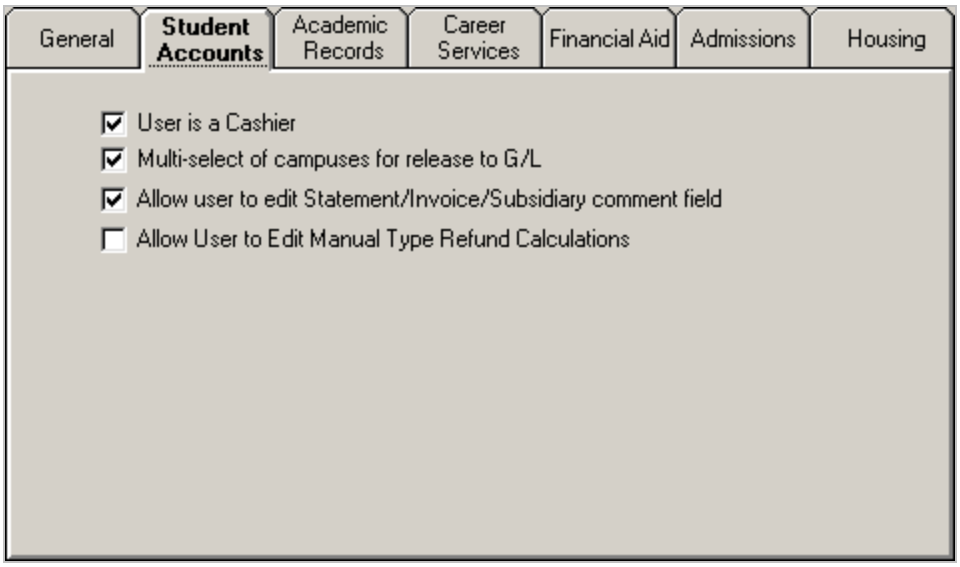
Field	Description
Show Default At Startup	Select this option to allow the staff member to view his or her default settings at each login.
Keep Track of Recently Accessed Students	Select this option to maintain a list of student master records recently accessed by the staff member. The number of student records tracked for each staff member is determined in another system setup option.
Allow Access to Global Student Search	Select this option to allow the staff member unlimited access to the global student search tool for students across all campuses in the system. If a student belongs to a campus that is not in the staff member's campus group, the staff member will see the student in the search results but cannot access the student's data. **Note**: The Allow Global Search system setting must be enabled (see Setup > System > System Settings) . To prevent a staff member from viewing data for students other than those assigned to the staff member in Contact Manager, clear this check box.

Field	Description
Allow User to Customize Search Form	Select this option to allow the staff member to use the Customize button on the Search Form. Click the **Customize** button and select the fields that are displayed in the grid on the search form.  Alternatively, the system administrator (SA) can clear the "Allow User to Customize ..." check box and customize the search form by clicking **Customize** on the User Info form. The same Customize Search Form is displayed for the SA who can then select fields for the staff member to view when searching.
Allow User to Select the Report Server	If this option is selected and the campus that the staff member is signed into has a report server (Setup > Campus Locations > Campus Information > Options), a check box is enabled during report selection to allow the staff member to select/clear the report server. The default value of this check box is set by the report.
Enable User Toolbar	Select this option to allow the staff member to customize the toolbar.
Default to Report Wizard	Select this option to set the report wizard as the default.
Override EIS Report options	Select this option to allow the staff member to change the Executive Summary Report settings to be different than the default settings.
Allow edits to ZIP Code Zone	Select this option to allow the staff member to change the ZIP Code Zone settings on the Inquiry and Applicant forms.

Field	Description
Allow reporting access to SSN	Select this option to allow the staff member to view, print, and export social security numbers (SSNs) for all reports listed under the Reports menu and some reports accessible via the View or Daily menus when clicking the Print button. The student's SSN will be a selectable option from the 'Student ID to Print' drop-down list on the Report Selection form, will appear on the selected report, and will be available for export. This feature does not apply to Custom Reports. This check box is selected by default. To revoke the permission, clear the check box for each staff member or staff group. If the SSN is a specified field on the report and the staff member or staff group does not have permission to view, print, or export the social security number, the phrase "SSN Blocked" is printed on the report instead of the actual social security number. This feature applies to export files as well.
Allow access to SSN on UI	Select this option to allow the staff member to view social security numbers (SSNs) on specific forms and on the Setup Template for Instructor Groups and Admissions Rep Groups. This check box is selected by default. To revoke the permission, clear the check box for each staff member or staff group. **Note**: On the Student Master, view permission for SSNs is based on the Field Level Security, not on this configuration option.

User Info Student Accounts Subtab

The Student Accounts subtab on the User Info tab of the Staff Information form and Setup Template form contains configuration settings that give staff members and/or staff groups permissions to perform functions within the Student Accounts module.



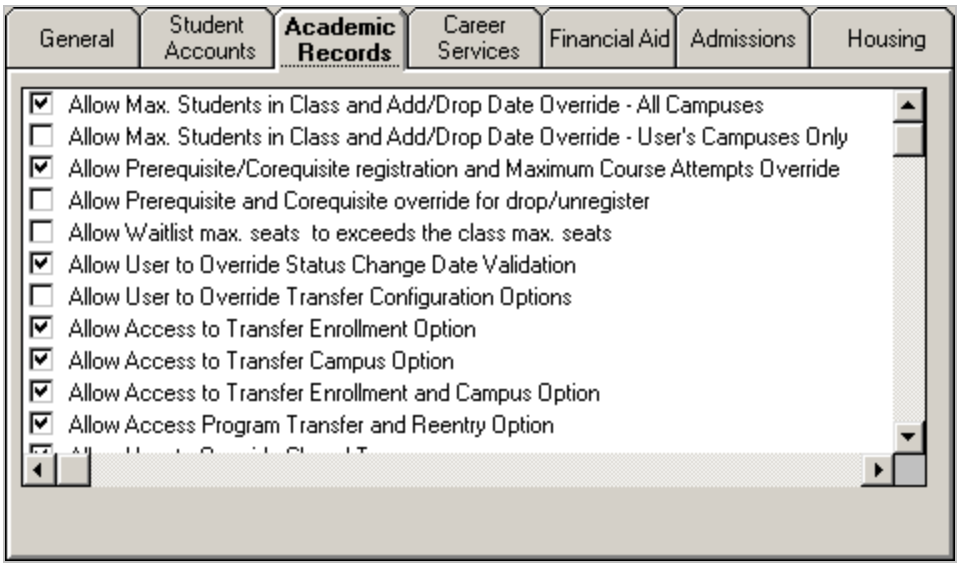
Field Descriptions

Field	Description
User is a Cashier	This check box is displayed only when a campus is enabled for cashiering. Select this option if the staff member must use a cash drawer to post payments. If a Campus is configured to use cashiering, the staff member is prompted to re-authenticate before being allowed to post payment transactions in CampusNexus Student. The Cashier ID check form validates the cashier in Active Directory, when enabled. The form displays the current logged in user and domain as User@domain. The user name field is disabled when using Active Directory. The staff member is required to enter the domain password to continue. If Active Directory is not enabled, the staff member enters the User Name and Password to continue.
Multi-select of campuses for release to G/L.	Select this option to allow the staff member to run the Release to General Ledger for campus groups that consist of more than one campus.
Allow user to edit Statement/Invoice/Subsidiary comment field.	Select this option to allow the staff member to edit the comment fields on statements, invoices, or subsidiaries in the Print Student Statements wizard and the Third Party - Agency Invoices wizard.

Field	Description
Allow User to Edit Manual Type Refund Calculations	Select this option to allow the staff member to edit manual type refund calculations. If a staff member does not have permissions to edit the manual refund policy, the Refund Calc Details form for a manual refund policy appears in display mode with the Edit Time, Edit Charges, and Edit Payment buttons disabled. If the staff member has edit permissions for non manual refund policies, these permissions remain unchanged. If a staff member has permissions to edit the manual refund policy, the Refund Calc Details form displays all editable columns with a white background. The editable fields for a Manual Refund Policy are Time in Period, Time Complete, Refund Percent, Period Base, Earned Charges, Title IV Refund, and Add'l Inst Refund. The Print button on the Refund Calc Details form is enabled whenever a staff member edits a policy. **Note**: A manual refund policy can be edited only if the Manual Calculation check box is selected. If the Manual Calculation check box is not selected, a staff member who has edit permissions still cannot edit the policy. The Refund Calc Details form appears in edit mode with the Edit Time, Edit Charges, and Edit Payment buttons enabled, but on selecting Edit Time, the Refund Percent field will not be editable; on selecting Edit Charges, the Period Base and Earned Charges fields will not be editable, and on selecting Edit Payments, the Title IV Refund fields will not be editable. To enable these fields, the Manual Calculation check box must be selected.

User Info Academic Records Subtab

The Academic Records subtab on the User Info tab of the Staff Information form and Setup Template form contains configuration settings that give staff members and/or staff groups permissions to perform functions within the Academic Records module.



Field Descriptions

Field	Description
Allow Max. Students in Class and Add/Drop Date Override - All Campuses	Select this option to allow the staff member to override the maximum class size when registering students in a class section for all campuses. During registration, a message is displayed when maximum class size is about to be exceeded. The staff member can indicate at that time that it is OK to enroll the student anyway. **Note**: If this check box is selected, the campus setting for Add/Drop is overridden.
Allow Max. Students in Class and Add/Drop Date Override - User's Campuses Only	Select this option to allow the staff member to override the maximum class size when registering students in a class section for the campuses that the staff member is allowed to access. During registration, a message is displayed when maximum class size is about to be exceeded. The staff member can indicate at that time that it is OK to enroll the student anyway. **Note**: If this check box is selected, the campus setting for Add/Drop is overridden within the campuses that the staff member is allowed to access.
Note: Only one or none of the options above may be selected. Both options may not be selected at the same time.	
Allow Prerequisite/Corequisite registration and Maximum Course Attempts Override	Select this option to allow the staff member to override prerequisite and corequisite course requirements when processing a single student registration in a course for which there are other courses required as prerequisites or corequisites. Also allow the staff member to override the Maximum Course Attempts rule when registering a student. If a staff member without this authorization attempts to register a student without the required prerequisite or corequisite courses, the registration is denied.

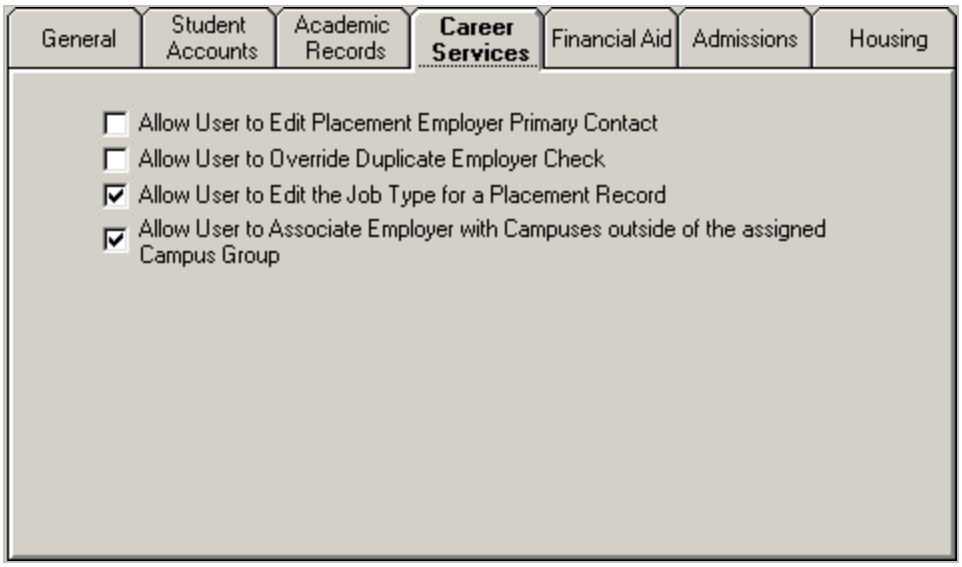
Field	Description
Allow Prerequisite and Corequisite override for drop/unregister	Select this option to allow the staff member to override prerequisite and corequisite course requirements when processing a single student drop or unregister from a course which is a prerequisite or corequisite to another course. If a staff member without this authorization attempts to drop or unregister a student from a course that is a prerequisite or corequisite for another course the student is registered in, the drop or unregistration is denied.
Allow Waitlist max. seats to exceed the class max. seats	Select this option to allow the staff member to specify a maximum number of waitlist seats that exceeds to maximum class seats.
Allow User to Override Status Change Date Validation	Select this option to allow the staff member to override the 'Number of Days Allowed for Status Changes' as specified in the campus setup.
Allow User to Override Transfer Configuration Options	Select this option to allow the staff member to override transfer configuration options.
Allow Access to Transfer Enrollment Option	Select this option to allow the staff member access to the transfer enrollment option, i.e., allow staff member to transfer a student to another enrollment with the same campus.
Allow Access to Transfer Campus Option	Select this option to allow the staff member access to the transfer campus option, i.e., allow staff member to transfer a student to another campus (which changes the Campus field on the Student Master to the new campus).
Allow Access to Transfer Enrollment and Campus Option	Select this option to allow the staff member access to transfer enrollment and campus options, i.e., allow staff member to transfer a student to another enrollment in another campus (which adds the new enrollment to the student's enrollment folder and changes the Campus field on the Student Master to the new campus).
Allow Access Program Transfer and Reentry Option	Select this option to allow the staff member access to program transfer and reentry options.
Allow User to Override Closed Term	Select this option to allow the staff member to reopen a term when it is closed.
Allow User to Override Registration Group Constraint	Select this option to allow the staff member to register a student and assign the student to a group even though the student does not meet the criteria for the group.
Allow User to Override Audit Designation Deadline	Select this option to allow the staff member to override the Audit Designation Deadline date while converting a course from Full Credit to Audit. The staff member can override access to convert a course from Full Credit to Audit after the Audit Designation Deadline date has passed.
Allow User to Override Instructor Course Association.	Select this option to allow the staff member to override the instructor course association.
Allow User to Override SAP Status	Select this option to allow the staff member to override a student's SAP status during the SAP calculation process within the SAP wizard. In addition, the staff member may override a SAP status that had been set to not be recalculated.

Field	Description
Allow User to Override SAP Term Defined Dates	Select this option to allow the staff member to calculate a student's SAP status beyond the period defined by the 'Number of Days after term end date to continue calculating SAP' setting. A campus can define the number of days after a term ends during which SAP calculations may take place. Normally, a staff member is not allowed to perform a manual SAP calculation after that period. If this check box is selected, the staff member can perform a SAP calculation beyond the regular cut off date.
Allow User to Override SAP Payment Period Defined Dates	Select this option to allow the staff member to calculate a student's SAP status beyond the period defined by the 'Number of Days after payment period end date to continue calculating SAP' setting. A campus can define the number of days after a payment period ends during which SAP calculations may take place. Normally, a staff member is not allowed to perform a manual SAP calculation after that period. If this check box is selected, the staff member can perform a SAP calculation beyond the regular cut off date.
Allow User to Override Partial SAP Terms	Select this option to allow the staff member to manually exclude student's SAP terms from the term sequence calculation during SAP evaluation. The staff member can then skip counting Partial SAP Terms as a full term sequence.
Allow User to Override Academic Transcript Hold Group	Select this option to allow the staff member to override the Academic Transcript Hold Group.
Allow User to Rebuild Term Summary Relationships	Select this option to allow the staff member to rebuild Term Summary Relationships by click the Rebuild Relationships button on the Enrollment form. We recommend that you review Term Relationships, Modify Term Relationships, and SAP before selecting this option.
Allow User to Reassign Courses.	Select this option to allow the staff member to reassign courses. See Associate and Transfer courses.
Allow User to Override Locked Term Sequence	Select this option to allow the staff member to override a locked term sequence.
Allow User to Waive/Undo Waive on the Degree Progress Audit	Select this option to allow the staff member to waive/undo waive on the Degree Progress Audit.
Allow User to Override Registration Holds	Select this option to allow the staff member to override a registration hold and register students without needing to remove these students from a registration hold group.
Allow User to Override Registration Locks	Select this option to allow the staff member to override any configured registration locks.
Allow User to Modify Course Section Fee Schedule during Registration	Select this option to allow the staff member to modify the course section fee schedule during registration.

Field	Description
Allow User to Waive Retake Fee	Select this option to allow the staff member to waive retake fees. **Note**: When a staff member is authorized to waive a retake fee and attempts to register a retake course, a message is displayed asking whether to charge a retake fee. The response to this message determines whether a retake fee should be charged.
Allow User to Override Last Day to Withdraw Restriction	Select this option to allow the staff member to drop a course even after the Last Day to Withdraw date has passed.
Allow Access to Connected Enrollment Option	Select this option to allow the staff member access to the Connected Enrollments option under View > Academic Records > Enrollment. For more information, see Enrollment in Academic Records.
Allow User to Override SPE Course Progression	This setting enables the Master Override flag accessed from View > Academic Records > Schedule > View Course Progression (button) when "Allow courses exempt from progression" is enabled. For more information, see View Course Progression.
Allow User to Override Expiration Deadline Date.	Select this option to allow the staff member to override the expiration deadline date by the number of days configured on the campus level.
Allow User to Override Transfer Credit Approval Restriction	Select this option to allow the staff member to override permission for approving transfer credit.
Allow User to Fulfill/Undo Fulfill Requirements on the Degree Progress Audit.	Select this option to allow the staff member to fulfill/undo fulfill requirements on the DPA.

User Info Career Services Subtab

The Career Services subtab on the User Info tab of the Staff Information form and Setup Template form contains configuration settings that give staff members and/or staff groups permissions to perform functions within the Career Services module.

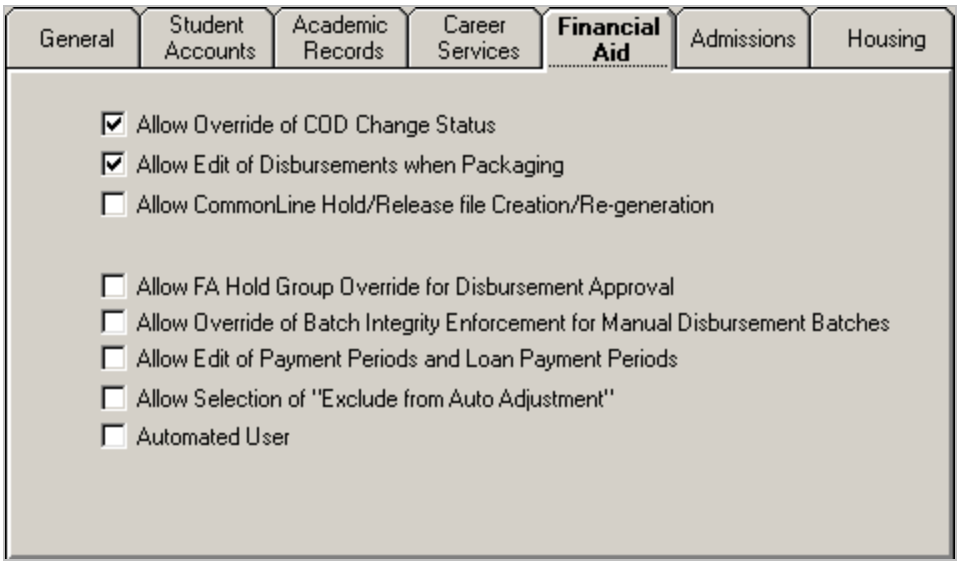


Field Descriptions

Field	Description
Allow User to Edit Placement Employer Primary Contact.	Select this option to allow the staff member to edit the primary contact for placement employers. If this option is cleared (default setting), the staff member/group cannot change the primary contact.
Allow User to Override Duplicate Employer Check	Select this option to allow the staff member to override the check for duplicate employers. If this option is cleared, the staff member/group cannot override the duplicate employer check.
Allow User to Edit the Job Type for a Placement Record	Select this option to allow the staff member to edit the "Job Type" field in the student's placement record. If this option is cleared, the staff member cannot edit the student's "Job Type" field in the placement record.
Allow User to Associate Employer with Campuses outside of the assigned Campus Group.	Select this option to allow the staff member to associate an employer with campuses outside of their assigned campus group. If the setting is enabled and the staff member is assigned as a Career Services Advisor, the staff member can edit existing employers and associate them with campuses outside their assigned campus group. See also Employers.

User Info Financial Aid Subtab

The Financial Aid subtab on the User Info tab of the Staff Information form and Setup Template form contains configuration settings that give staff members and/or staff groups permissions to perform functions within the Financial Aid module.

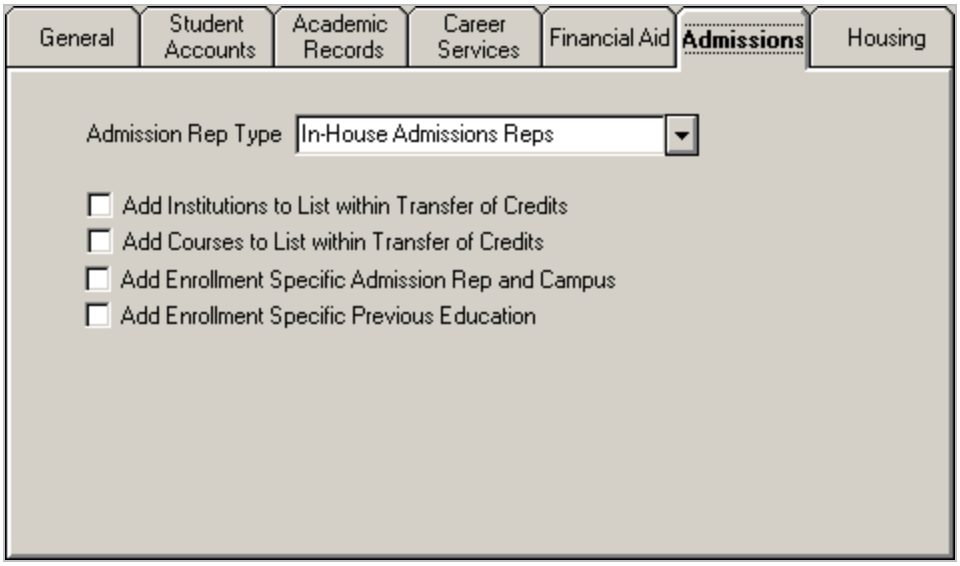


Field Descriptions

Field	Description
Allow Override of COD Change Status	Select this option to allow the staff member to override the Common Origination and Disbursement (COD) change status.
Allow Edit of Disbursements when Packaging	Select this option to allow the staff member to edit disbursements when packaging financial aid.
Allow FA Hold Group Override for Disbursement Approval	Select this option to allow this staff member to allow a FA Hold Group Override for disbursement approval. This allows an override to be applied for future terms, and allows an override for a disbursement from an existing term. By default, this option remains cleared.
Allow Override of Batch Integrity Enforcement for Manual Disbursement Batches	Select this option to allow this staff member to override the batch integrity tracking for an individual manually created batch. By default, this option remains cleared.
Allow Edit of Payment Periods and Loan Payment Periods	Select this option to configure staff members with security access to the payment period button on the Academic Year form. Administrators thus control which staff members can add or edit payment periods from the payment period form.
Allow Selection of "Exclude from Auto Adjustment"	Select this option to allow the staff member to exclude specific academic years and payment periods from being adjusted as the result of Student Pace Evaluation. See also Locking/Unlocking Start and End Dates.
Automated User	Select this option to specify that the staff member is an Automated User.

User Info Admissions Subtab

The Admissions subtab on the User Info tab of the Staff Information form and Setup Template form contains configuration settings that give staff members and/or staff groups permissions to perform functions within the Admissions module such as adding institutions or courses to lists within transfer of credits.



Field Descriptions

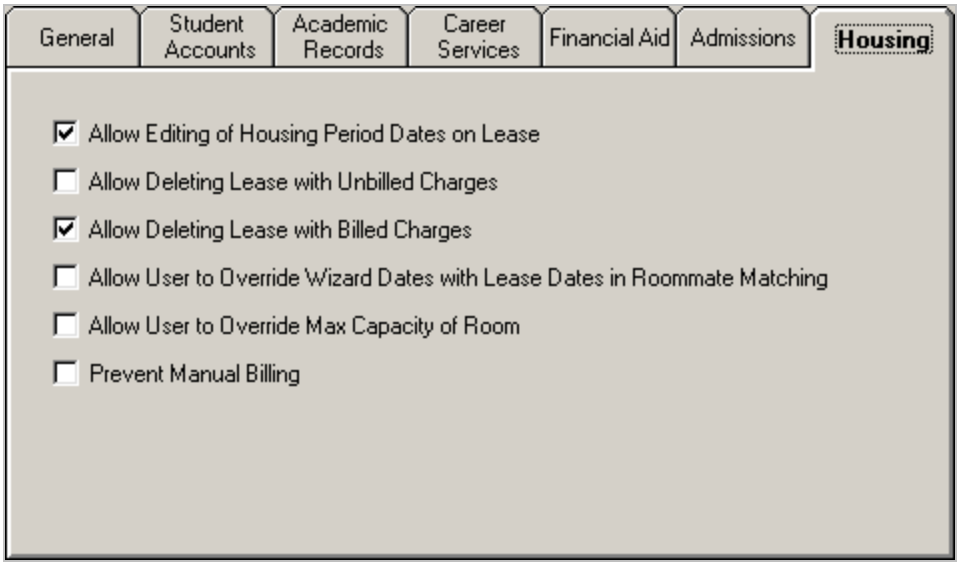
Field	Description
Add Institutions to List within Transfer of Credits See Notes 1 and 2.	When *only* the 'Add Institutions to List Within Transfer of Credits' is selected, the Transfer Credits form displays the Add Institution button, but *not* the Add Courses button. The staff member can add institutions to the existing list, but has to select courses from the existing list of courses using the Search icon.
Add Courses to List within Transfer of Credits See Notes 1 and 2.	When *only* the 'Add Courses to List within Transfer of Credits' is selected, the Transfer Credits form displays the Add Courses button, but *not* the Add Institution button. The staff member can only select available institutions using the Search icon. After selecting an institution, the Add Courses button is enabled and courses can be added by clicking the Add Courses button.

Field	Description
Notes: 1. When *both* 'Add Institutions to List within Transfer of Credits' and 'Add Courses to List within Transfer of Credits' are selected, the Add Institution and Add Courses buttons on the Transfer Credits form are enabled. The selected staff member will have permission to add institutions and courses to the list of acceptable institutions and courses that may be transferred. First click the Add Institution button to add a new institution. Once the institution is added, the Add Courses button is enabled. Click the Add Courses button to select the course. 2. When *neither* 'Add Institutions to List within Transfer of Credits' *nor* 'Add Courses to List within Transfer of Credits' is selected (both check boxes cleared), the Transfer Credits form displays only the Search icons, but not the Add Institutions or Add Courses buttons. Staff members can neither add new institutions nor courses to the existing lists. Instead, staff members can only select from the existing list of institutions and courses using the Search icons.	
Add Enrollment Specific Admissions Rep and Campus	Select this option to allow the staff member to assign an enrollment specific Admissions Rep and Campus while enrolling a student into a program. **Note**: The Admissions Rep and Campus are tied together in a single permission property to prevent the staff member from changing the Campus when the currently selected Admission Rep is not a member of the new Campus selection (which would result in a blank Admission Rep because the Admission Rep is driven off of the Campus selection). This scenario would prevent the staff member from proceeding further in the enrollment process.
Add Enrollment Specific Previous Education	Select this option to allow the staff member to assign enrollment specific Previous Education during the enrollment process.

User Info Housing Subtab

The Housing subtab on the User Info tab of the Staff Information form and Setup Template form contains configuration settings that give staff members and/or staff groups permissions to perform functions within the Housing module.

The Housing sub-tab is only visible when Housing is enabled in CampusNexus Student.



Field Descriptions

Field	Description
Allow Editing of Housing Periods on Lease	Select this option to allow the staff member to edit the Housing Period on housing lease.
Allow Deleting Lease with Unbilled Charges	Select this option to allow the staff member to delete a lease with unbilled charges through View > Housing > Application/Lease > Lease (button) Delete (button). The default for this option is cleared.
Allow Deleting Lease with Billed Charges	Select this option to allow the staff member to delete a lease with billed charges through View > Housing > Application/Lease > Lease (button) Delete (button). The default for this option is cleared.
Allow User to Override Wizard Dates with Lease Dates in Roommate Matching	Select this option to allow the staff member to place a student in a room based on individual lease dates via the Roommate Matching Wizard (Daily > Housing > Roommate Matching). The default for this option is cleared.
Allow User to Override Max Capacity of Room	Select this option to allow the staff member to place a student in a room regardless of maximum occupancy via the Roommate Matching Wizard (Daily > Housing > Roommate Matching). Staff member will also be authorized to update lease if room is overbooked. The default for this option is cleared.
Prevent Manual Billing	Select this option to prevent the staff member from saving changes or billing selected charges on the Charge Schedule (View > Housing > Application/Lease > Lease > View/Edit Charge Schedule (button) > Save (button) > Bill Selected Charges (button)) and (View > Housing > Application/Lease > Lease > Bill Outstanding Charges (button)). The default for this option is cleared.

Managing Staff Groups

Staff members are organized into groups for administrative purposes. Typically, the groups are based on departments and job functions. You can add or edit and delete staff groups; however, system staff groups may not be deleted from CampusNexus Student.

System Staff Groups

Staff Group Name	Group Code
1098-T Utility Batch Options	1098TUDB
1098-T Utility Cleanup Wizard	1098TUCL
1098-T Utility Lock 1098-T Batch	1098TULK
1098-T Utility Process 1098-T's	1098TUPR
Academic Advisor	ACAD
System Administrators	ADMIN
Director of Admissions	DA
DSO/RO Group	DSORO
Financial Aid Advisor	FAADV
High School Advisor	HSADV
LMS Process	LMSPROC
Placement Officer	PL
Career Services Advisor	PLADV
Admissions Rep	REP
AD-SAP Linked Enrollment	SAPLNKEN
Instructors	TEACH
Portal Console Admin	WPADMIN
Portal Configuration	WPCONFIG

Note: If your school admits nonimmigrant (international) students, create an International Advisor Group, and assign it the NI Advisor Code.

Advisors

Students have many advisors while enrolled at a school. You can store the student's various departmental advisors in CampusNexus Student. When advisor information changes, you have easy access to the student's list of advisors.

System staff groups are assigned to the various advisor types. The Staff Group detail form includes an Advisor Code list. For each of your advisor groups, select one of the advisor codes. When you assign a staff member to one or more of these staff groups, the staff member appears in the drop-down list for that advisor type. Do not select an advisor code for non-advisor staff groups.

Advisor Type Codes

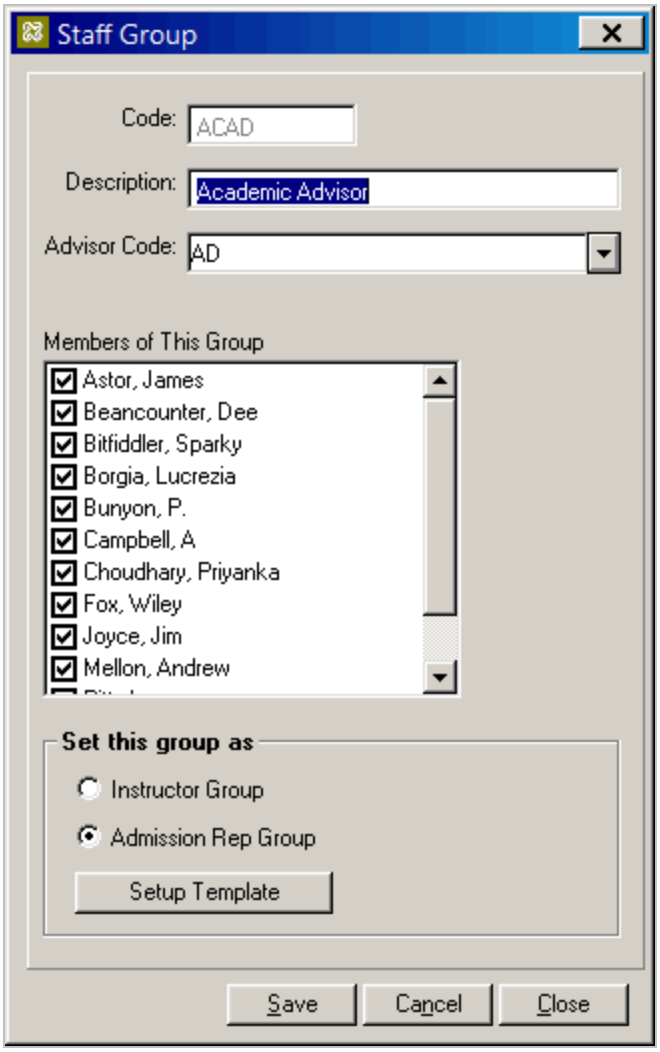
Code	Description
AD	Academic Records
AL	Alumni
AM	Admissions
AP	Automated Processes
BS	Book Store
CM	Contact Manager
FA	Financial Aid
HS	Housing
LM	Loan Management
NI	International
ORGLSN	Organization Liaison
OTH	Other
PL	Career Services
SA	Student Accounts
SS	Student Services
SY	System

See the topic on Security to add security parameters to your new group.

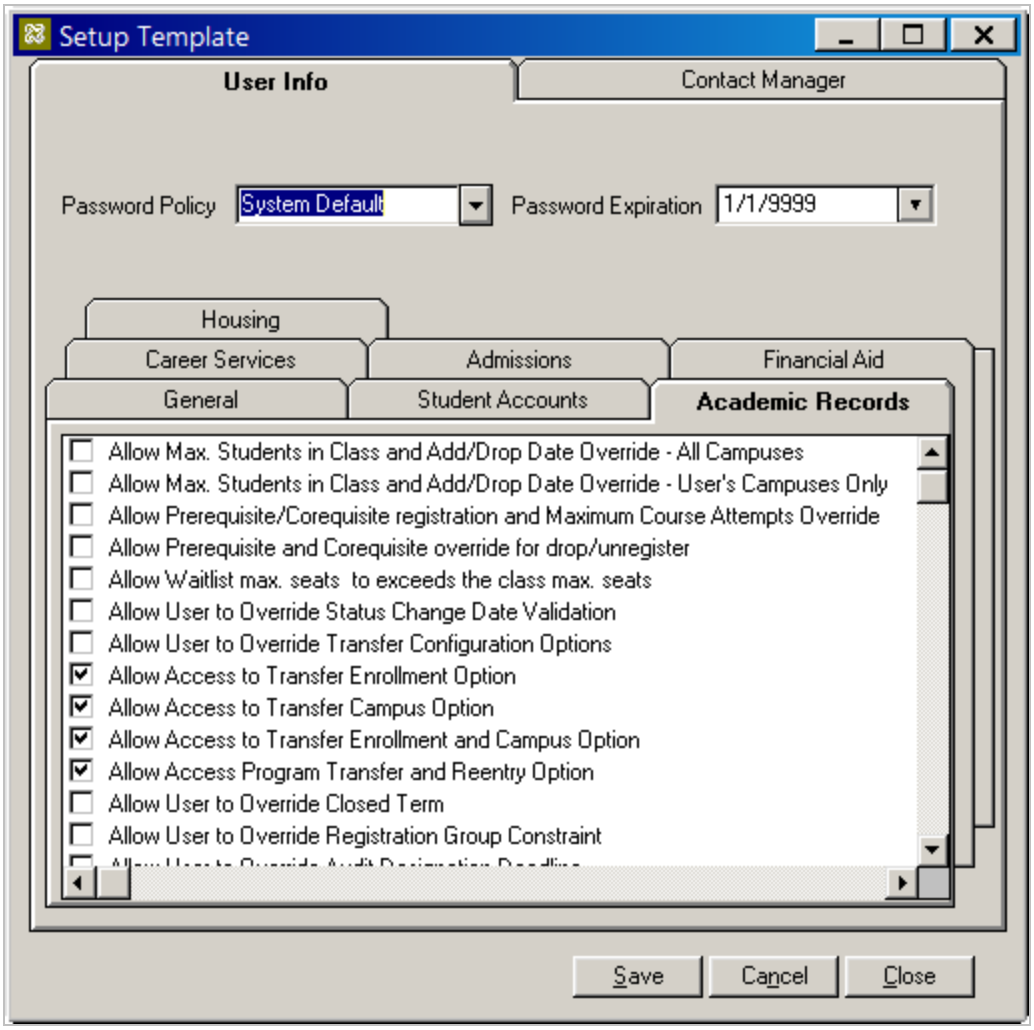
To add or edit a staff group:

1. Navigate to **Setup > Staff**. The Staff Maintenance form is displayed.
2. Select the **Staff Groups** tab. A list of all Staff Groups that have been configured is displayed.
3. Click **Add**, or select a record and click **Edit**. The Staff Group form is displayed.

   Note: A system staff group can be identified by its dimmed, non-editable Code on the Staff Group form.



4. Specify a unique **Code**.
5. Enter a **Description**.
6. Select an **Advisor Code** if necessary. Refer to Advisors.
7. Select the **Members of This Group**. To add all staff members to the group, click **All**. To clear all staff members from the group, click **None**. When adding a new staff group, the check boxes next to the staff members are cleared by default.
8. Select **Admissions Rep Group** or **Instructor Group** option.
9. Click **Setup Template**. The Setup Template form is displayed.



10. In the Setup Template form, select the values to be associated with a new staff member created from the Daily menu. The User Info tab of the Setup Template form is displayed with subtabs for configuration and override permissions settings. The Contact Manager tab allows you to define the Contact Manager Security Policies.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.
12. When you establish a new staff group, during initial system setup or later during ongoing operations, you must open a **Student Master**, navigate to **Setup > Field Level Security**, and select the new group.

    The field level security settings for each field are initially displayed as *Update*. To trigger a security record for each field for each staff group, you must select a field, choose an option from the drop-down list (*Update, Display, None*), even if it is the same (*Update*) option. When the form is closed, the necessary field-level security records for the group are written to the database. This procedure must be followed for every staff group to establish the baseline field level security records.

Deleting a Staff Group

When you delete a staff group, you are not deleting staff members. If you delete the only group to which a staff member belongs, that staff member can no longer log in to CampusNexus Student. Staff groups that are required by the system may not be deleted; however, there is no requirement that you must assign a person to these groups.

To delete a staff group:

1. Navigate to **Setup** > **Staff**. The Staff Maintenance form is displayed.
2. Select the **Staff Groups** tab.
3. Select the staff group to be deleted and click **Delete**..
4. A confirmation message is displayed. Click **Yes**. The group is removed from the list of staff groups.

Setup Template Form

Use this form to define the values to be associated with a new staff member created from the Daily menu. To enable the daily staff maintenance features by accessing the Admissions Rep Maintenance form or Instructor Maintenance form, a template must be created to define default setup configurations for information that may be sensitive.

The User Info tab displays subtabs of override permissions settings. The Contact Manager tab provides Contact Manager security settings. Once a template is created, the group is available to add new members through the Daily path. Only one Setup template can be defined per staff group.

Upon adding or editing a Staff Group, the user may define the Staff Group as an Admissions Rep Group or an Instructor Group.

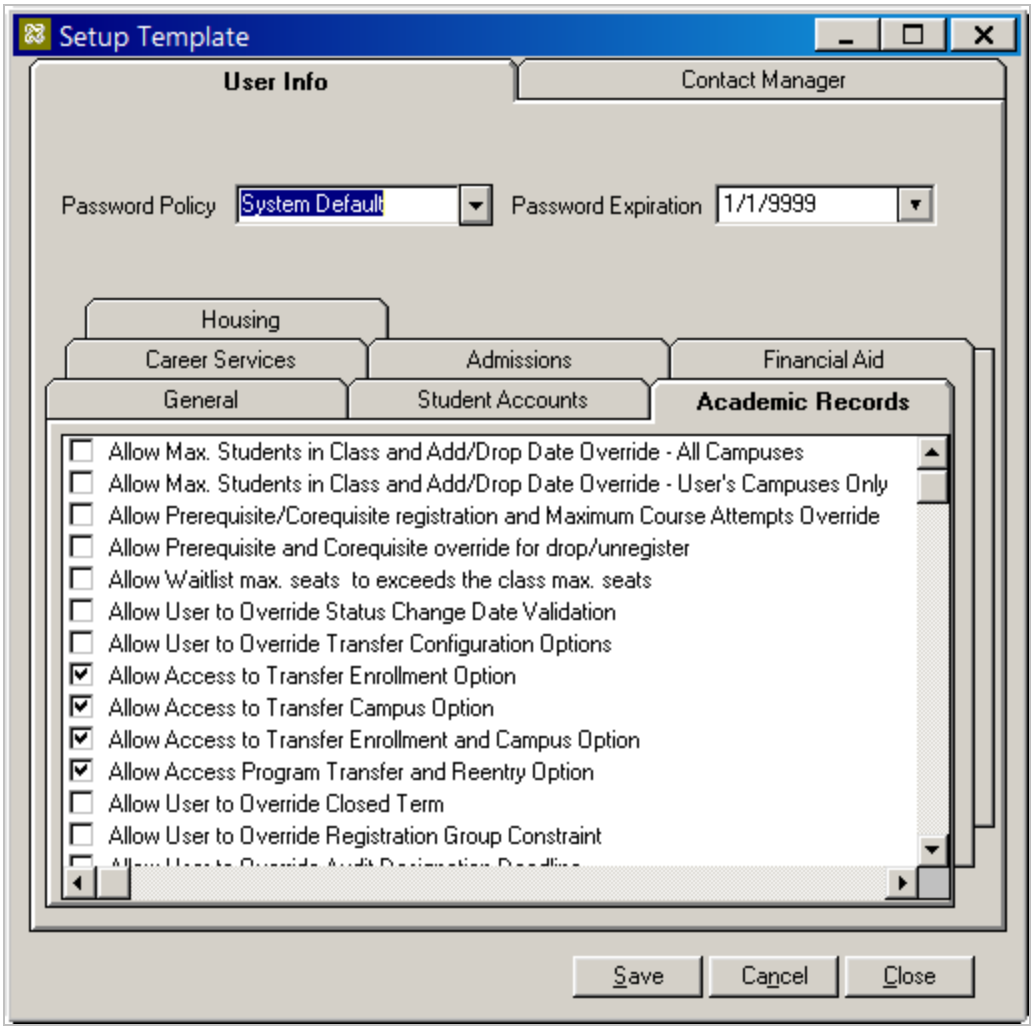
Notes:

- Prior to initial use of the path Daily > Admissions > Admissions Rep Maintenance, you must first define a Setup Template for the group ID with the *REP* code.
- Prior to initial use of the path Daily > Academic Records > Instructor Maintenance, you must first define a Setup Template for the group ID with the *TEACH* code.
- All the options on the Setup Template can be accessed through the Staff Information form and set as needed. Admissions Reps and Instructors have access to the Daily menu and do not see any of the options.
- To change the User Info or Contact Manager tab information, the user must access the staff member through the Staff Maintenance form. These fields are unavailable through the Daily menu option.

To set up the staff group permissions template:

1. Navigate to **Setup > Staff**. The Staff Maintenance form is displayed.
2. Select the **Staff Groups** tab. A list of all Staff Groups that have been configured is displayed.
3. Click **Add** to add a new staff group or select a group or click **Edit** to view or edit an existing group. The Staff Group form is displayed.

4. Click **Setup Template**. The Setup Template form is displayed.



5. Select appropriate **Password Policy** and **Password Expiration** options.
6. Select appropriate options on the **User Info** and **Contact Manager** tabs.

   The User Info subtabs (see Reference topics) contain permissions pertaining to General settings, Student Accounts, Academic Records, Career Services, Financial Aid, Admissions, and Housing (if Housing is enabled in CampusNexus Student). With the exception of the Financial Aid subtab, the configuration options on the User Info subtabs for Staff Groups are the same as for Staff Members.

Field Descriptions: Financial Aid Subtab

Field	Description
Allow Override of COD Change Status	Select this option to allow the staff group to override the Common Origination and Disbursement (COD) change status.
Allow Edit of Global Exception Details	Select this option to allow the staff group to edit Global Exception details.

Field	Description
Allow FA Hold Group Override for Disbursement Approval	Select this option to allow this staff group to override specific hold groups. This will allow designated staff to override financial aid holds for specific groups, and also enable the Approve Disbursements for Pay logic to use student groups as an additional criterion when evaluating financial aid disbursement approvals.
Allow Override of Batch Integrity Enforcement for Manual Disbursement Batches	Select this option to allow this staff group to override manual disbursement batches.
Allow Edit of Payment Periods and Loan Payment Periods	Select this option to allow this staff group to edit payment periods and loan payment periods.
Allow Selection of "Exclude from Auto Adjustment"	Select this option to allow this staff group to exclude academic year, payment period, loan period, and loan payment period from auto adjustment.

The Contact Manager tab contains configuration settings for Contact Manager functions. The options are the same as for staff member configurations (see Assigning Contact Manager Options), but apply to staff groups.

7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Password Profiles

Password profiles provide basic password functionality such as password expiration, password reset, and password rules. Much of the system security for CampusNexus Student is based on the parameters set up in this profile. A staff member is assigned a User ID and a Password. Other information about the staff member (user) is also recorded. Certain default options are assigned for each user. Each staff member must be assigned to at least one campus group.

All existing staff and any new staff added are assigned the system default password profile. The system default password profile is editable (the associated record is stored in a database table with a System Code of 1, but it cannot be deleted from the system. The system default profile has the following restrictions:

- Does not allow staff to change their passwords
- Requires at least one character in the user's password
- Does not require numeric characters in the password
- Does not enforce password expiration
- Does not allow the user name and password to be the same

As system administrator, you can deny or grant users permissions to change their own passwords. Users associated with password profiles where Allow User Change is set to N are not allowed to change their passwords, and therefore, the Change Password button on session parameters is disabled.

Whenever the administrator changes a user's password, an option forces the user to change the password the next time the user signs into CampusNexus Student. If the administrator selects the option to force the user to change the password, the password expiration date is set to the current system date. If the administrator does not force immediate user password change, the expiration date is not modified, and the following message is displayed: "*Require user to change password on next login?*"

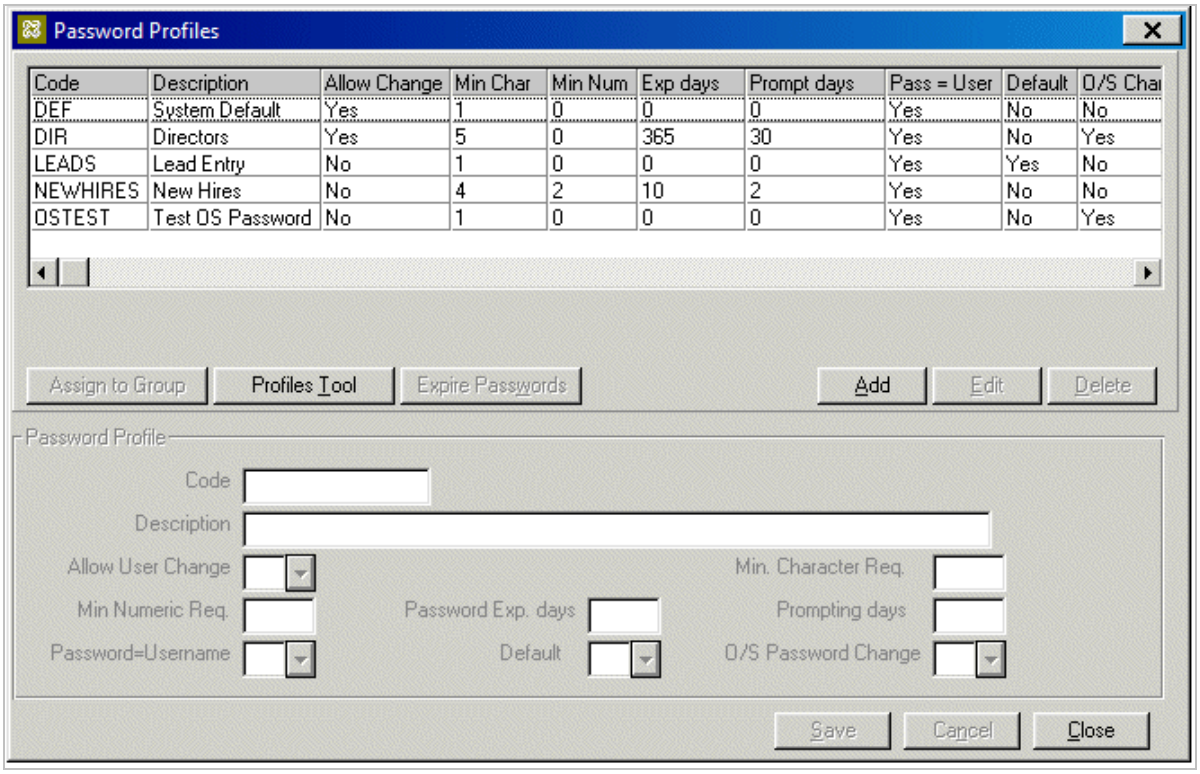
Administrators can lock and unlock staff access to CampusNexus Student at anytime. By default all staff access is not locked. Staff members with locked access receive the following message when signing into CampusNexus Student: "*Your account is locked, please contact your administrator.*" When unlocked staff members sign into CampusNexus Student, they forced to change their passwords.

Changes to password profiles (for example, changing the minimum password length) take effect the next time when users assigned to the affected group change their passwords.

Note: A password profile is not used for the Administrator login. This ensures that the Administrator is not accidentally locked out of CampusNexus Student.

To manage password profiles for staff members and groups:

1. Navigate to **Setup > Staff**. The Staff Maintenance Form is displayed.
2. On the Staff Maintenance form, click the **Password Profiles** tab. The Password Profiles form is displayed.



3. Click **Add** to create a password profile, or select a staff member from the list and click **Edit** to modify a password profile.
4. Click **Delete** to remove a password profile that is not in use.
5. Click **Expire Passwords** to force passwords to expire the next day.
6. Click **Assign to Group** to assign a profile to a staff groups .

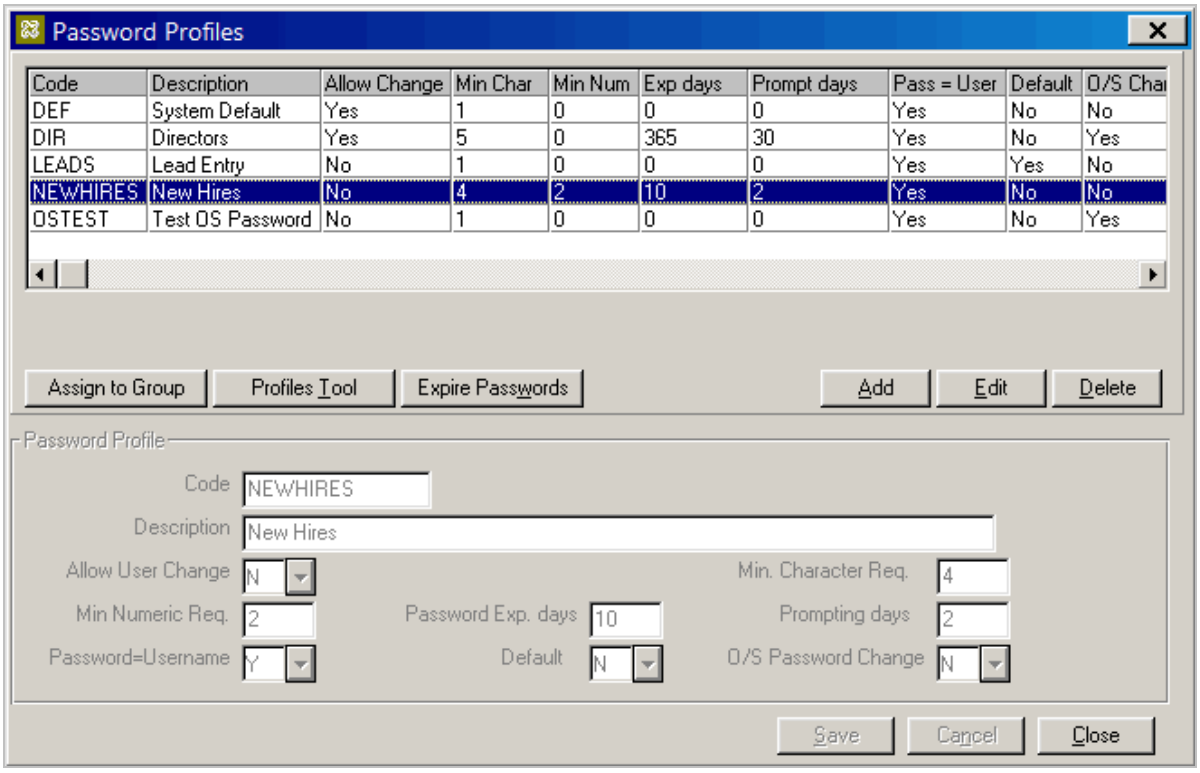
Note: When you edit or delete a password profile, all changes are audited. Audit verifications are handled at the database level only and performed through appropriate SQL queries.

Adding Password Profiles

The Password Profiles form under Setup > Staff enables the system administrator to create and customize password profiles to apply different sets of password rules to different users.

To add a password profile:

1. Navigate to **Setup > Staff > Password Profile**. When the Password Profiles form is displayed, only the System Default profile is displayed until you create new profiles.



2. Click **Add** to enable the fields in the lower section of the form.

3. Enter the information in the fields as follows:

Field Descriptions

Field	Description
Code	Enter an 8-character code for the password profile. This value appears in the Code column on the Password Profiles form.
Allow User Change	Select Y to permit users associated with the profile to modify their own password or select N prevent users from modifying their passwords.
Description	Enter a name or description (up to 40 characters) to uniquely identify the profile. This value appears on the Assigned Staff panel in the Profiles Tool.
Min. Character Req.	Enter integer values from 1 to 60 to specify the minimum number of characters required for a valid password.
Min Numeric Req.	Enter integer values from 1 to 60 to specify the minimum number of numeric characters required to be included for a valid password.
Password Exp. days	Enter integer values from 0 to 365 to specify the number of days a user's password is valid before the password expires. Setting this field to zero (0) allows the passwords of all users associated with this password profile to never expire. In this case the Password Expiration Date for such staff is "01/01/9999." This field is updated whenever a user changes a password. The Password Expiration Date is set to the system date when any user (staff) is created by an administrator and associated with a password profile where Allow User Change is set to Y. This forces new users to change their passwords upon first signing into CampusNexus Student. Users who get an expiration notification have the option of selecting Change Password to invoke the change password form or canceling the notice. When the Password Expiration Date is the same as the System Date, the user is forced to change the password when signing in to CampusNexus Student.
Prompting days	Enter integer values from 0 to 365 to specify the number of days to prior to password expiration to begin displaying reminder messages to the user that the password will expire unless it is changed.
Password=User name	Select **Y** to allow the password to be the same as the user name. otherwise select **N**.
Default	Select **Y** to allow the password profile to be assigned as the system-wide default for any users not assigned to a staff group with a default password profile. Only one password profile may have this setting. The **N** option assigns the system profile as the default.
O/S Password Change	Select **Y** to allow changing a user's operating system password to match the CampusNexus Student password when the CampusNexus Student password is changed. If set to**N**, only the CampusNexus Student password will be changed.

4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Viewing and Searching Password Profiles

The system administrator can view staff and associated password profiles and search for a staff member in the profiles tool

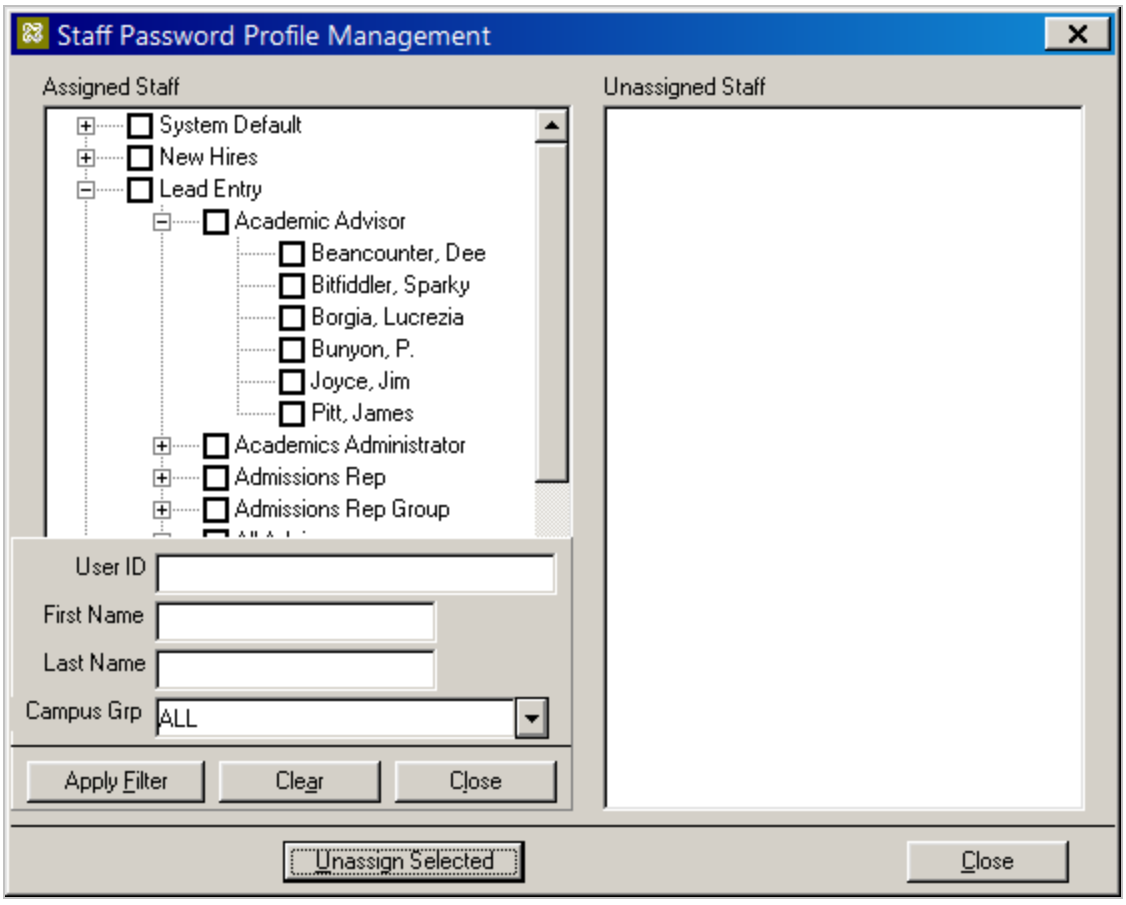
To view staff and associated password profiles:

1. Navigate to **Setup > Staff > Password Profiles** (tab).
2. Click the **Profiles Tool** button. The Staff Password Profile Management form is displayed.
3. Choose the staff group or password profile to view by using the scroll bar to navigate to the profile listed by its name (derived from the Description field on the Password Profiles form) in the Assigned Staff panel.
4. Click the plus sign **+** to expand a staff group to view profiles for its members. All group members share the same password profile.

   Any staff members who do not have a password profile assigned appear in the panel in the Unassigned Staff panel.

To search for a staff member in the profiles tool:

1. In the Staff Password Profile Management form, click the **Assigned Staff Filter** button. The search tool is displayed at the bottom of the Assigned Staff panel.



2. Enter your search criteria in the fields that apply.
3. Click **Apply Filter** to search for staff members who meet the search criteria.

When a search is executed, the Password Profile trees in the left panel is filtered to show only the profile and staff groups associated with the members who satisfy the search criteria.

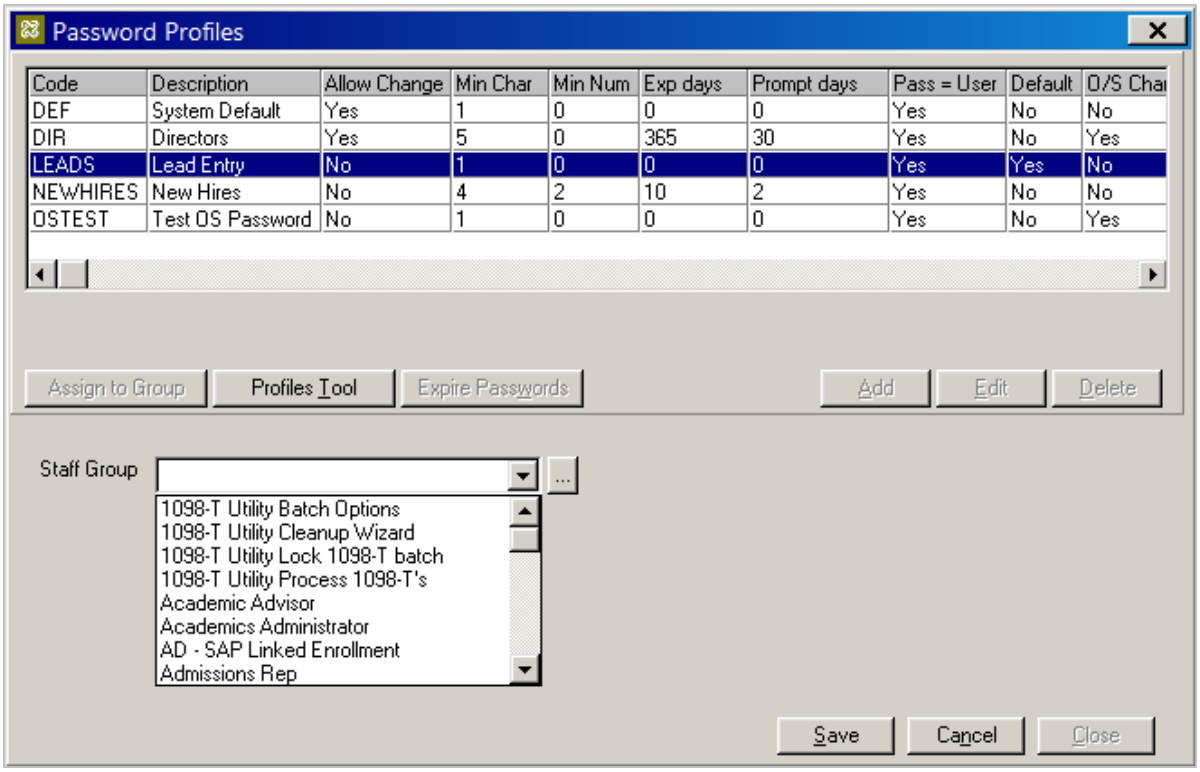
Assigning Password Profiles

The system administrator can assign password profiles to:

- Staff groups
- Unassigned staff groups
- Individual staff members

To assign a password profile to a staff group:

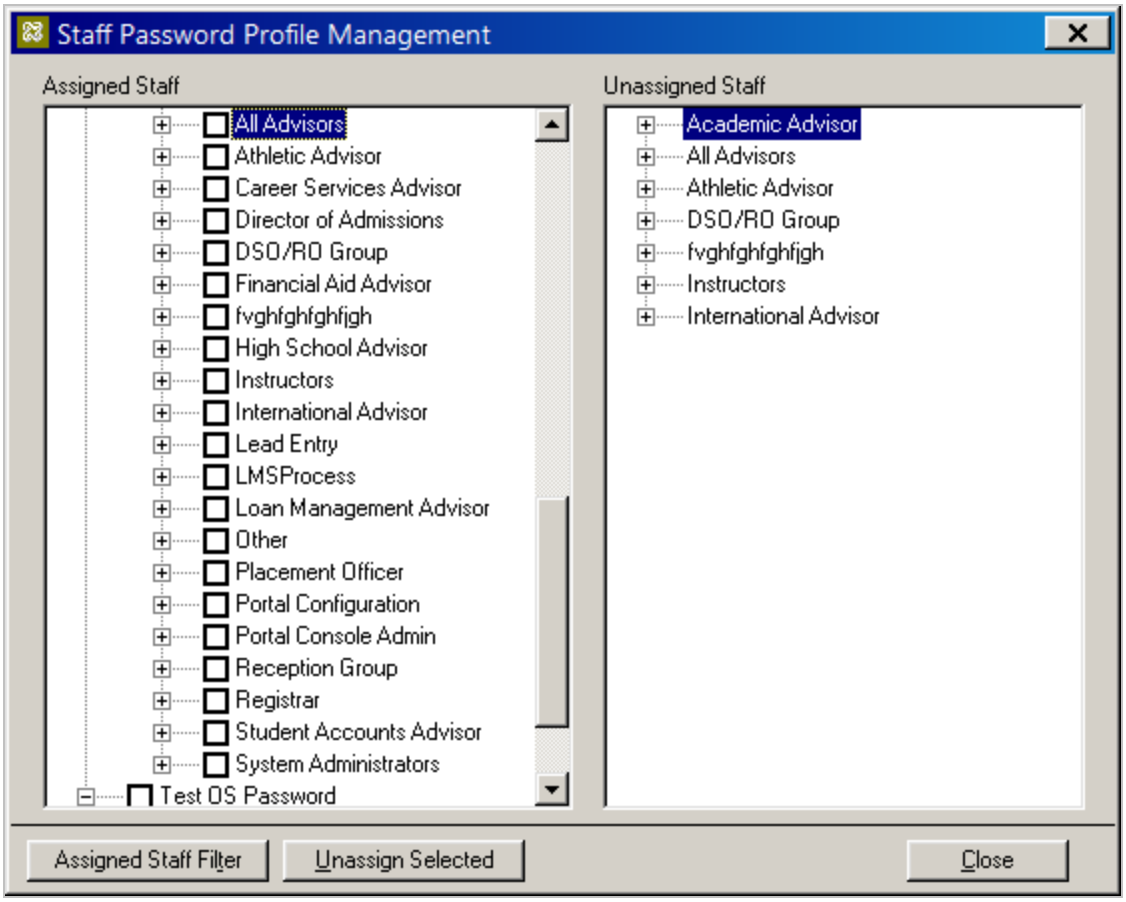
1. Navigate to **Setup > Staff**. The Staff Maintenance form is displayed.
2. On the Staff Maintenance form, click the **Password Profiles** tab. The Password Profiles form is displayed.
3. Select a password profile.
4. Click **Assign to Group** and select the staff group to be assigned this profile from the **Staff Group** list.



5. Click **Save** to assign the password profile to the staff group, or **Cancel** to discontinue the changes.

To assign a password profile to an unassigned staff group:

1. Navigate to **Setup > Staff**. The Staff Maintenance form is displayed.
2. On the Staff Maintenance form, click the **Password Profiles** tab. The Password Profiles form is displayed.
3. On the Password Profiles form, click **Profiles Tool**. The Staff Password Profile Management form is displayed.

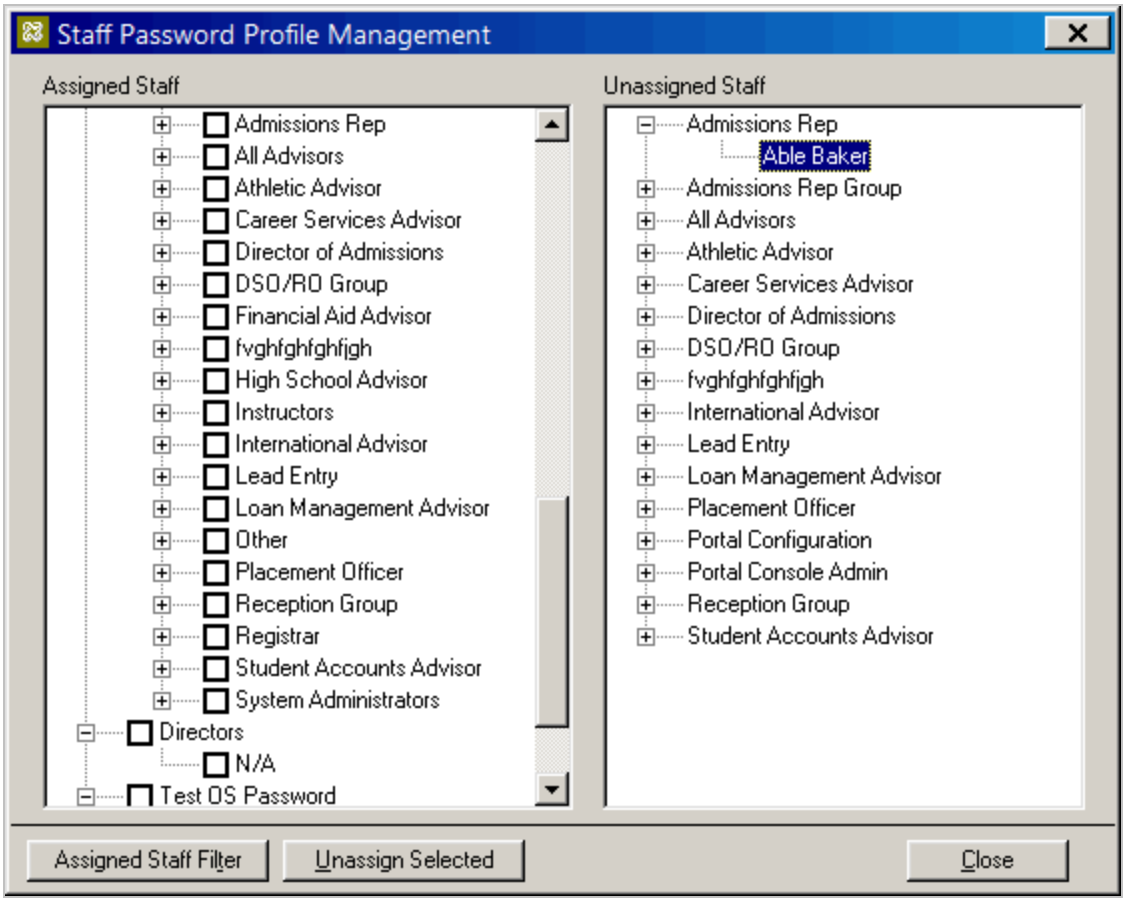


4. Select an unassigned staff group from the **Unassigned Staff** panel, and drag and drop the unassigned staff group over the desired password profile in the **Assigned Staff** panel.

   The form is refreshed with the new information, and the tree is displayed in its collapsed form. To view the changes, click the plus sign **+** to expand the view. All staff within the group is assigned the selected password profile.

To assign a password profile to a staff member:

1. Navigate to **Setup > Staff**. The Staff Maintenance form is displayed.
2. On the Staff Maintenance form, click the **Password Profiles** tab. The Password Profiles form is displayed.
3. On the Password Profiles form, click **Profiles Tool**. The Staff Password Profile Management form is displayed.
4. Select an unassigned staff member from the **Unassigned Staff** panel, and drag and drop the unassigned staff over the desired password profile in the **Assigned Staff** panel.

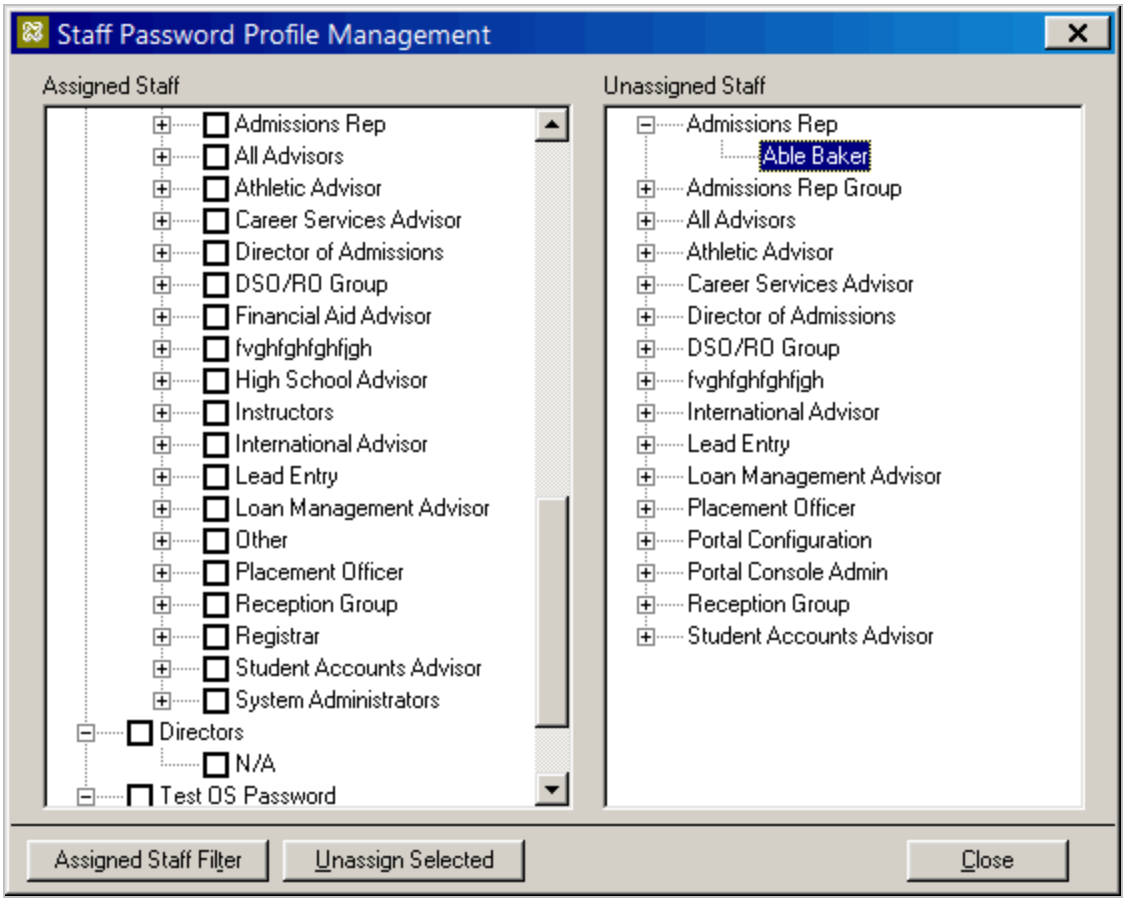


The form is refreshed with the new information, and the tree is displayed in its collapsed form. To view the changes, click the plus sign **+** to expand the view. The staff member is assigned the selected password profile.

Removing a Password Profile

To remove a password profile from a staff member:

1. Navigate to **Setup > Staff**. The Staff Maintenance form is displayed.
2. On the Staff Maintenance form, click the **Password Profiles** tab. The Password Profiles form is displayed.
3. On the Password Profiles form, click **Profiles Tool**. The Staff Password Profile Management form is displayed.



4. In the **Assigned Staff** panel, select the staff member to be unassigned.

   To unassign other members or groups continue selecting staff members and groups by selecting the check boxes next to each name.

5. Click **Unassign Selected**.

   When you confirm the action by clicking **Yes** in the confirmation box, all selected staff members appear in the **Unassigned Staff** panel listed in every group to which that the staff member belongs.

   When you unassign a staff group, all the members of that group, plus all the groups to which all the members belong, are listed on the **Unassigned Staff** panel.

Note: You cannot exit the Profile Management tool without reassigning a profile to all unassigned members.

Modifying Your Password

Passwords can be set by the system administrator to expire after a prescribed number of days, or at the next sign-in. If your password expired, you are prompted to change it. Enter a new password and save the change. CampusNexus Student will launch and the new password will be in effect the next time you sign in.

You can also change your password at any other time. To change your own password, your profile must allow it. This is enabled by the system administrator through Setup > Staff on the User Info tab of the Staff Information form for individual staff members, or it can be managed for staff groups using the Password Profile management tool.

To change your password:

1. Double-click the **Campus ID** field on the status bar below the CampusNexus Student work area.
2. When the Session Parameters dialog is displayed, click **Change Password**.

   If your system administrator has not configured your profile to allow you to change your password, the Change Password button will not be available on the Session Parameters dialog, and you will be unable to sign into CampusNexus Student until the system administrator supplies you with a valid password.
3. When the User Password Change dialog is displayed, enter the new password in the top field, and reenter the new password in the bottom field to confirm the exact characters. The passwords are masked by asterisks for privacy.

   CampusNexus Student passwords are not case sensitive and may be required to contain numeric characters. If you enter a password with upper and lower case characters and the O/S Password Change option is set to Y on your password profile, the O/S password will be case sensitive, but the CampusNexus Student password will remain case insensitive. For example, if you enter AbCd as a password, the O/S password will be AbCd, however, the CampusNexus Student password will be accepted with upper or lowercase as long as the characters are in the correct sequence. All case combinations of those characters are accepted as valid CampusNexus Student passwords: ABcD, ABCD, AbCD, aBCD, aBCd, ABcd, AbCd, AbcD, aBCd, aBcD, abCD, Abcd, aBcd, abCd, abcD, abcd, and AbCd.

   Note: If your password profile has the OS Password Change option set to Yes, and if your OS password does not match the old CampusNexus Student password, the message "*Old password does not match current network password. Please enter your current network password.*" is displayed. Click **OK** to display the Password Change form and enter the old password in the Domain Password field and click **OK** to apply the change. The password change sets the new OS password to match the CampusNexus Student password just entered.

   When signing into the remote server using a local user account (as opposed to a user account on the remote server's domain), and the OS password is not successfully applied when entering the new CampusNexus Student password, a Domain/Remote Server field is displayed to allow you to specify the domain or the remote server where your user account is located when changing the associated OS password. This field defaults to the domain or remote server name depending on how you signed in. If you signed into the server using a local account, the server name will be the default. If you signed into a domain account, the server's domain name is the default. If you signed into the remote server using a local account, enter two backslashes immediately prior to the server name, for example: `\\servername`.

   The first attempt made to change the user's OS password uses the server's domain as the place to locate the user account to change. A user who is signing into the remote server using a local account (where the password profile is set to change the OS password) will always receive an initial error message when changing the password in CampusNexus Student.
4. **Save** the changed password.

Central Security Application

The Central Security Application is accessible to system administrators through a Setup menu option. The application allow system administrators to set up and control security requirements for users for all Anthology Inc. products in one location. CampusNexus Student, and at least one other Anthology Inc. product must reside on the same server, otherwise the Central Security Application is not accessible in CampusNexus Student.

CampusNexus Student provides features that manipulate data entered so that the business rules for each application are followed. For example, the lengths of Staff Codes across applications are not the same; therefore, the system checks the lengths of Staff Codes for the application, and then alerts the system administrator when a Staff Code is entered with a length greater than the maximum length allowed for the application.

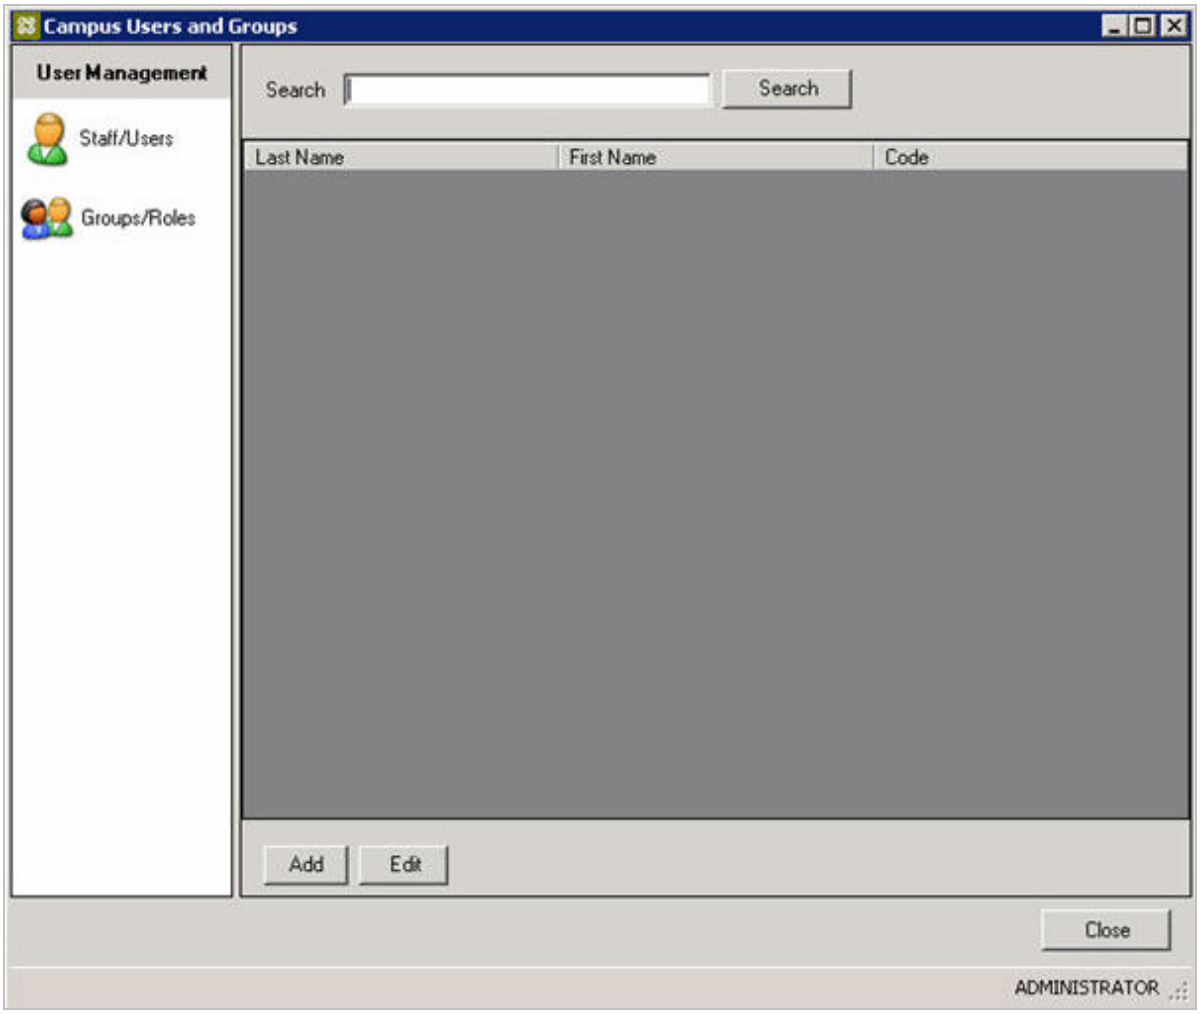
Integration with Active Directory

CampusNexus Student integration with Active Directory for faculty staff members involves authentication and authorization. Authorization and authentication are two of the elements of a framework that controls access to the application resources. The system enforces security policies to ensure that each user has enough rights to carry out his/her daily tasks.

Authentication defines a way to identify a single user. This is done by matching a user name and password with a faculty member's staff member record in the Staff Information form. If the user provides valid credentials, the access is granted.

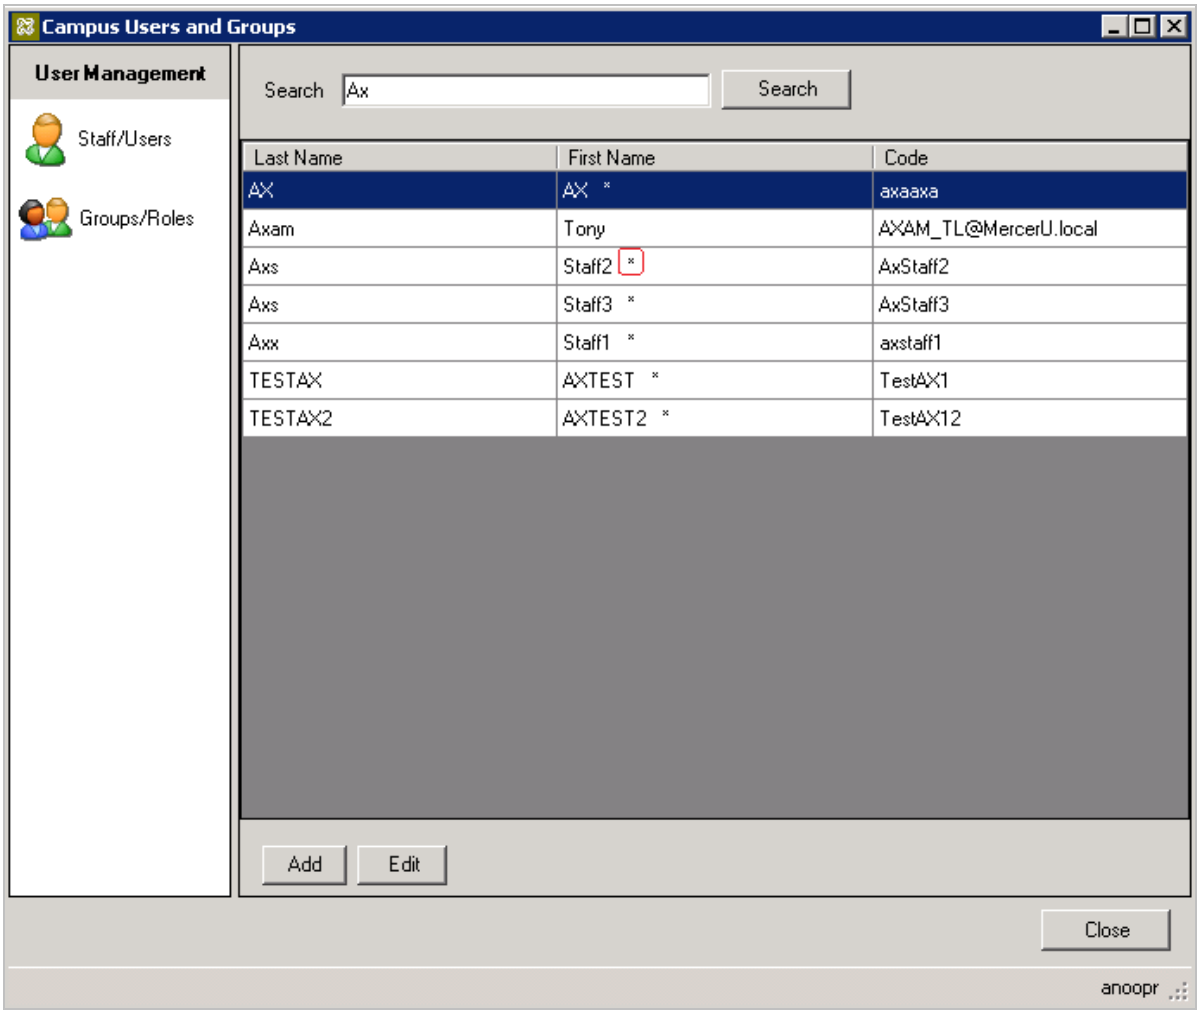
To set up access to Anthology Inc. products:

1. As a system administrator, navigate to **Setup > Central Security**. The Campus Users and Groups form is displayed.



2. Click the **Staff/Users** option and then click **Search**. The user's Last Name, First Name, and Codes are listed. The Code column contains the Staff Code of the user.

   If Faculty Management Integration for CampusNexus Finance, HR & Payroll is enabled (see Academic Records Settings - General Tab), instructors created in CampusNexus Finance, HR & Payroll are marked with an asterisk (*) as shown below. These instructors must be assigned to Campus Groups in CampusNexus Student. See Assigning Staff Permissions.



3. Click **Add** to add a new user, or select an existing staff member and click **Edit**.

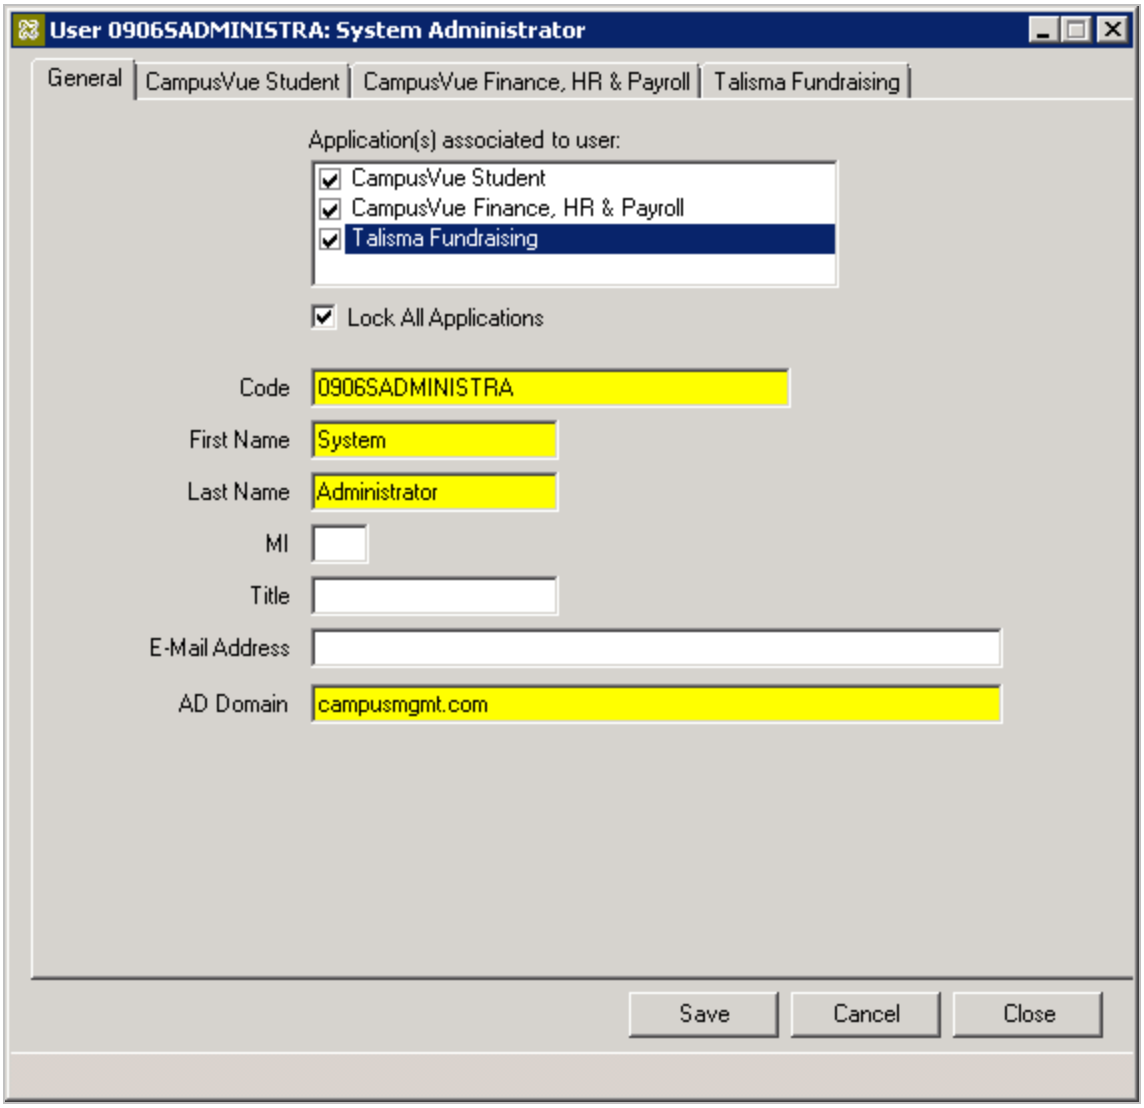
   If Active Directory is enabled:

   - The Change Password button is not displayed.
   - The Password fields is not displayed.
   - The **AD Domain** field is required.

   Assign new users to the applications that they will use on a regular basis by selecting appropriate applications.

   The applications selected dictate which tabs are enabled. If all Anthology Inc. products are used, the form contains the following tabs:

   - General
   - CampusNexus Student
   - CampusVue Finance, HR & Payroll
   - Talisma Fundraising
   - Portal



4. On the **General** tab, select the **Lock All Applications** option to disable all tabs within the form and thereby lock all end-users out of all applications.

   Select applications and assign login codes that enable the Administrator to access the applications.

   - For Talisma Fundraising, the login code can have up to 15 characters.
   - For CampusVue Finance, HR & Payroll, the login code can have up to 25 characters.
   - For CampusNexus Student, the login code can have up to 50 characters.

   If more than one application is selected, the code is limited to the minimum length of the selected applications. Therefore, if all three are selected, the Login Code can be no longer than 15 characters.

   Since the application adds only Staff members to Portal, the 50-character limit is enforced. Students continue to be added via Portal.

   This information can be edited from the Central Security Application, but is displayed in read-only mode on the application-specific maintenance screens.

5. On the **CampusNexus Student** tab, assign staff groups, change passwords, and lock users out of CampusNexus

Student.

When the Central Security Application is used, the Staff Information form contains only General, User Info, and Contact Manager tabs.

When CampusVue Finance, HR & Payroll is used with CampusNexus Student, an upgrade script creates the new users in CampusVue Finance, HR & Payroll. Only the users that will be using CampusVue Finance, HR & Payroll should be included in the list of end-users.

6. On the **CampusVue Finance, HR & Payroll** tab, administer primary menus and navigation groups, change passwords, and lock the end-user out of the application.

   Note: The User Profile form in CampusVue Finance, HR & Payroll is displayed in read-only mode when the Central Security Application in CampusNexus Student is used. The Set Password and Navigation Groups fields are not displayed.

7. On the **Talisma Fundraising** tab, assign users to a Talisma Fundraising security group, change their passwords, and lock them out of the application.

8. On the **Portal** tab, assign users to roles and change passwords.

9. **Groups and Roles** vary between Anthology Inc. products. The Groups and Roles options are displayed in read-only mode and may not be edited within the Central Security Application.

Setup > Security

Security in CampusNexus Student is managed at several levels. You can designate the access level by staff group or menu (View, Lists, Daily, Reports, Tools, Setup). You can also designate the access level for each menu item to control access to certain menu functions based on group membership.

The access levels are None (system default), Full, Display, Edit, Add, Delete, and Print.

- "None" means that the members of the group cannot access menu options, forms, buttons, and so on.
- "Full" means that the members of the group can display, add, edit, delete, and print data for the full-access menu options. If you do not want to grant full access to certain parts of the system, you can select among the add, edit, delete, and print options.

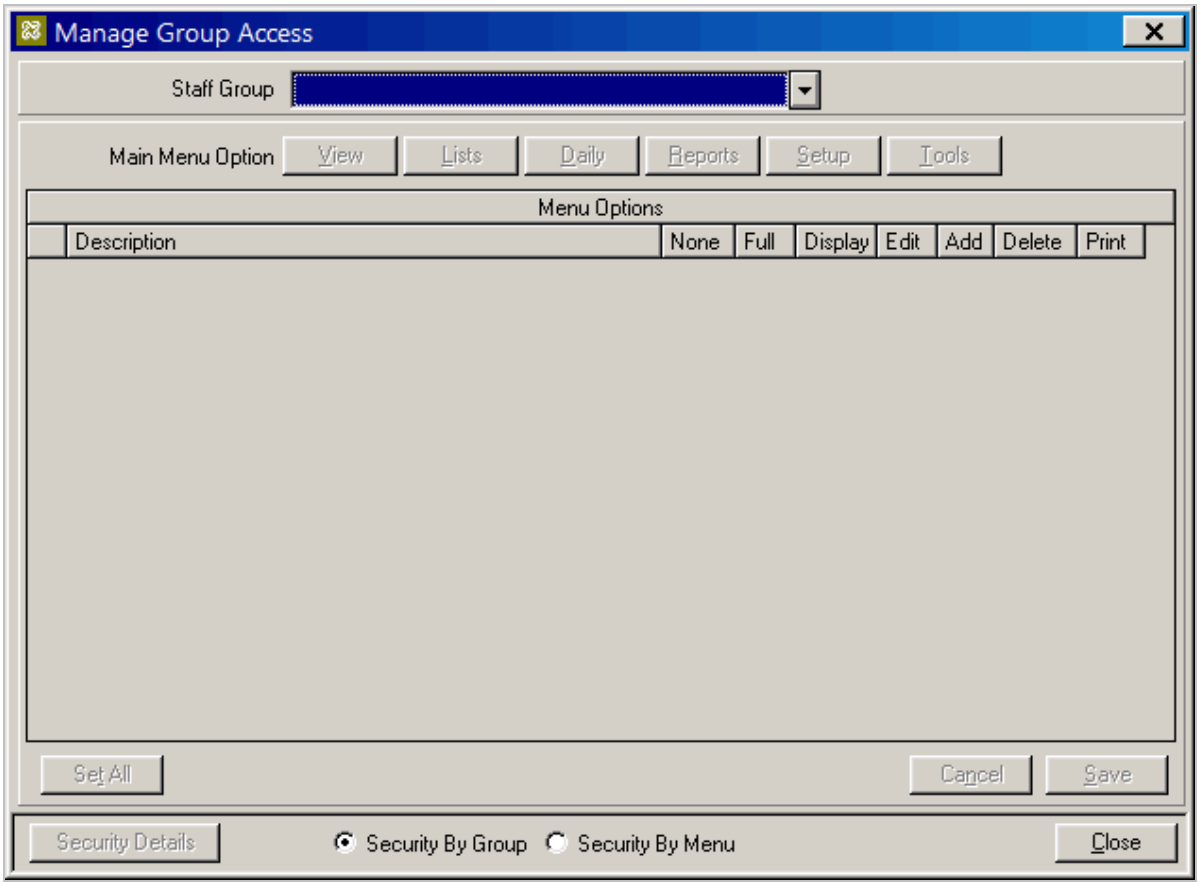
The system administrator has full access. Other groups may have full access to some menu options but lower levels of access to other menu items.

When a staff person is a member of more than one group, that person's security level is governed by the group that has the most access. For example, Able Baker is in the instructor group and the advisor group. Instructors cannot see the Lists menu, but advisors have full access to it. Able Baker has full access to the Lists menu.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

To manage security access:

1. Navigate to **Setup > Security**. The Manage Group Access form is displayed.



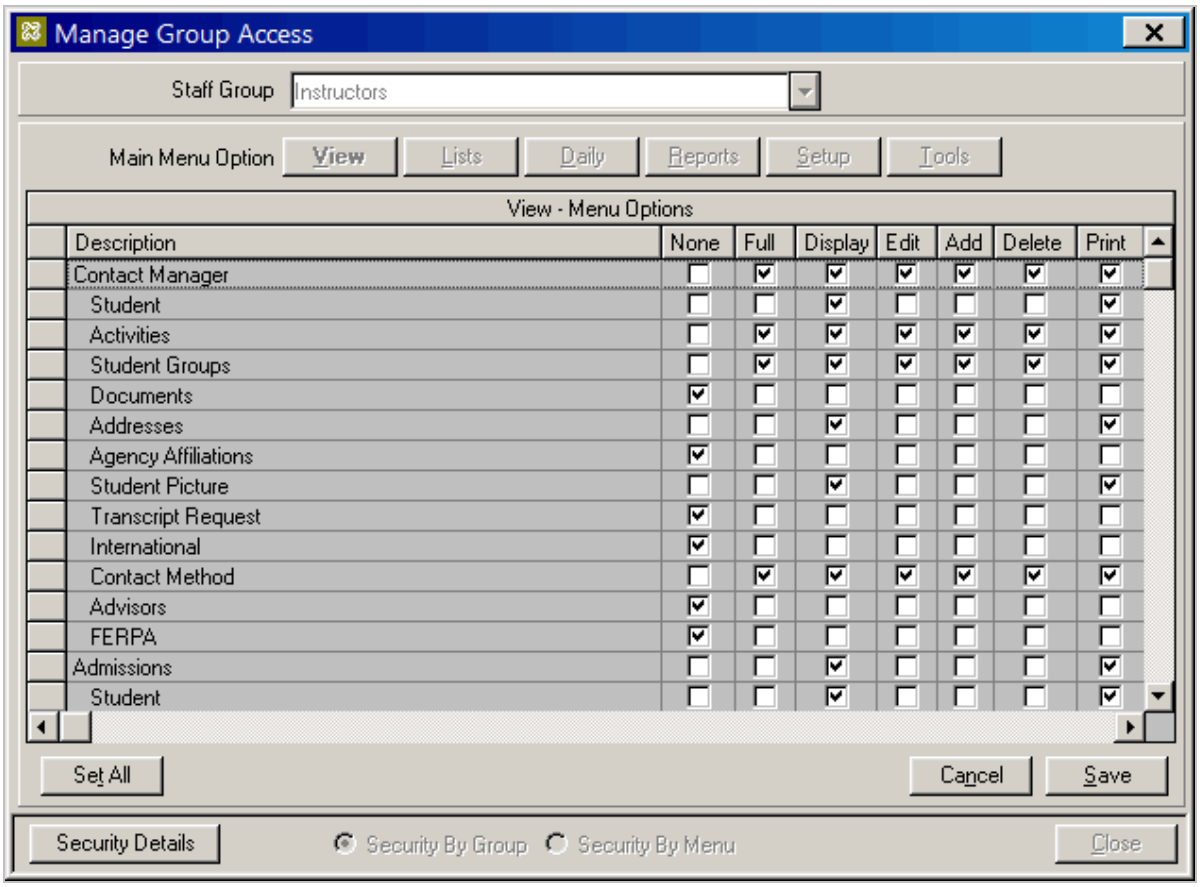
Note: When you edit a security settings, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Continue with the following instructions as appropriate:

- To set up access by staff group:
- To set up access by menu:
- To set up access for shared groups:
- To set up delete letter permission by staff group:
- To set up delete letter permission by menu option:
- To run the Security Details report:

To set up access by staff group:

2. Select **Security By Group**.
3. Select the **Staff Group** for which you want to set up security.
4. Click each of the **Main Menu Options** and select the level of access for each menu option. The levels are None, Full, Display, Edit, Add, Delete, and Print.



When you select a security option for a high-level menu option, the selected security option is applied to the lower-level menu options. You can change the lower-level menu options to a security option lower than the high-level menu options, but you cannot change a low-level option to a security option higher than the menu option above it. In the example, instructors have full access to all the Contact Manager View options. You could not give the instruct-

ors Full access to Student fields under Admissions because they only have Display access to the Admissions module.

5. (*Optional*) Click **Set All** to apply the selected level of access to all staff groups. For example, if you click Full for View Contact Manager and then click Set All, all menu options on the View menu are set to Full.
6. Click **Save**.

To set up access by menu:

2. Select **Security By Menu**.
3. Click the appropriate Main Menu Option button (**View**, **Lists**, **Daily**, **Reports**, **Setup**, or **Tools**).
4. Select the **Menu Options** from the drop-down list.
5. Select each of the **Staff Groups** and select a **level of access** for each group. The levels are None, Full, Display, Edit, Add, Delete, and Print.
6. (*Optional*) Click **Set All** to apply the level of access to all staff groups.
7. Click **Save**.

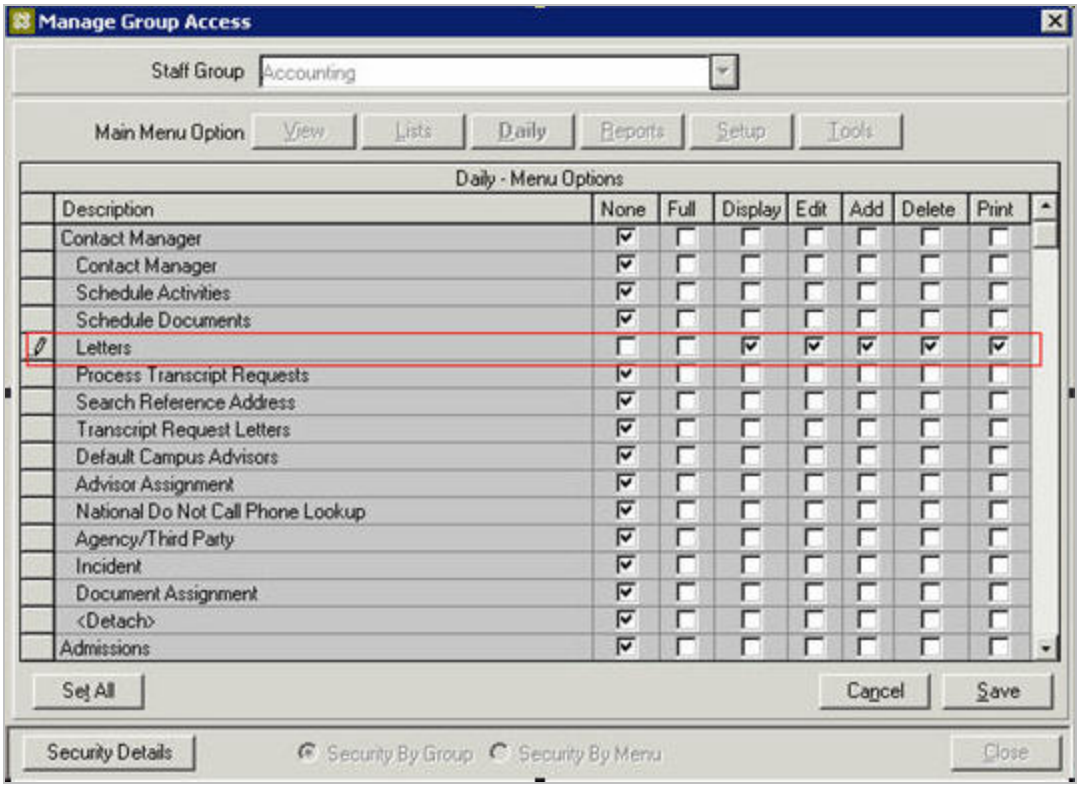
To set up access for shared groups:

There is sometimes a need to allow security rights across separate staff groups. For example, the **Progress Report** provides Financial Aid and Academic Records information for multiple student's. To allow printing of the Progress Report for both the Financial Aid and Academic Records Groups:

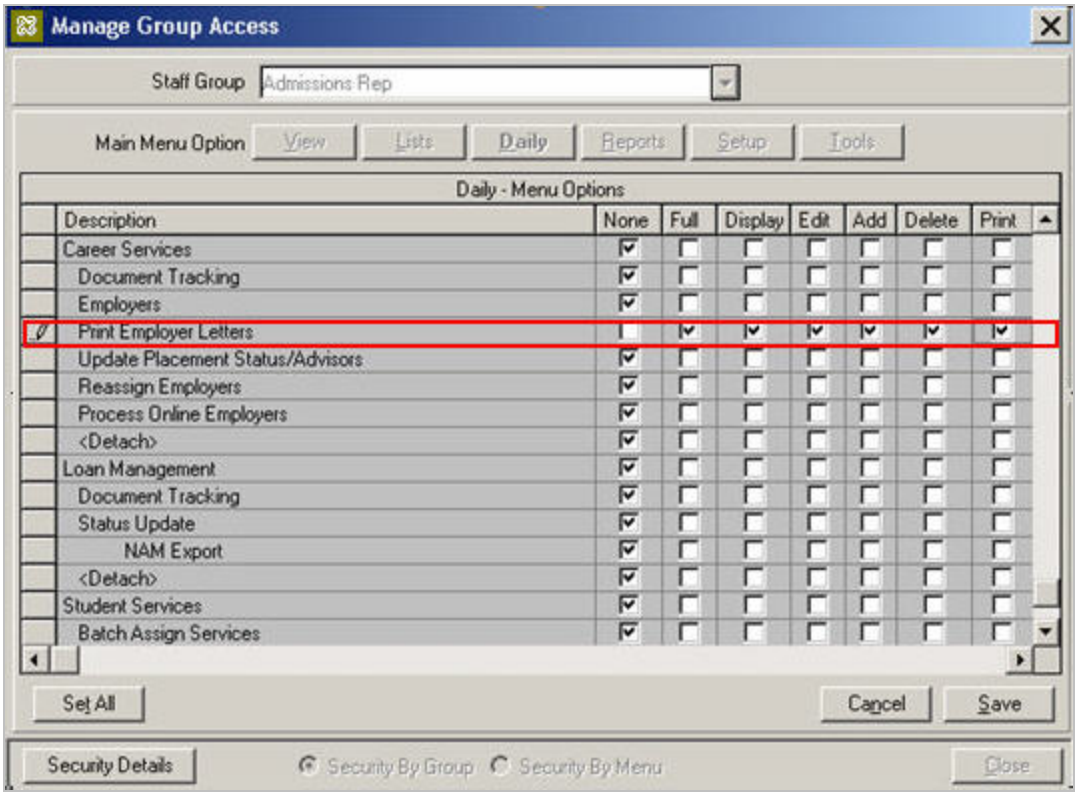
2. Select **Security By Group**.
3. Select a **Staff Group**.
4. Click the **Reports** Main Menu Option.
5. Select the **Print** check box to the right of the Progress Report listing.
6. Click **Save**.
7. Repeat these steps for Staff Groups associated with Academic Records that also have permission to print the Progress Report.

To set up delete letter permission by staff group:

2. Select the **Security By Group** option.
3. Select a **Staff Group**.
4. Click the **Daily** button.
5. In the Contact Manager section, line item Letters, select the **Delete** column.

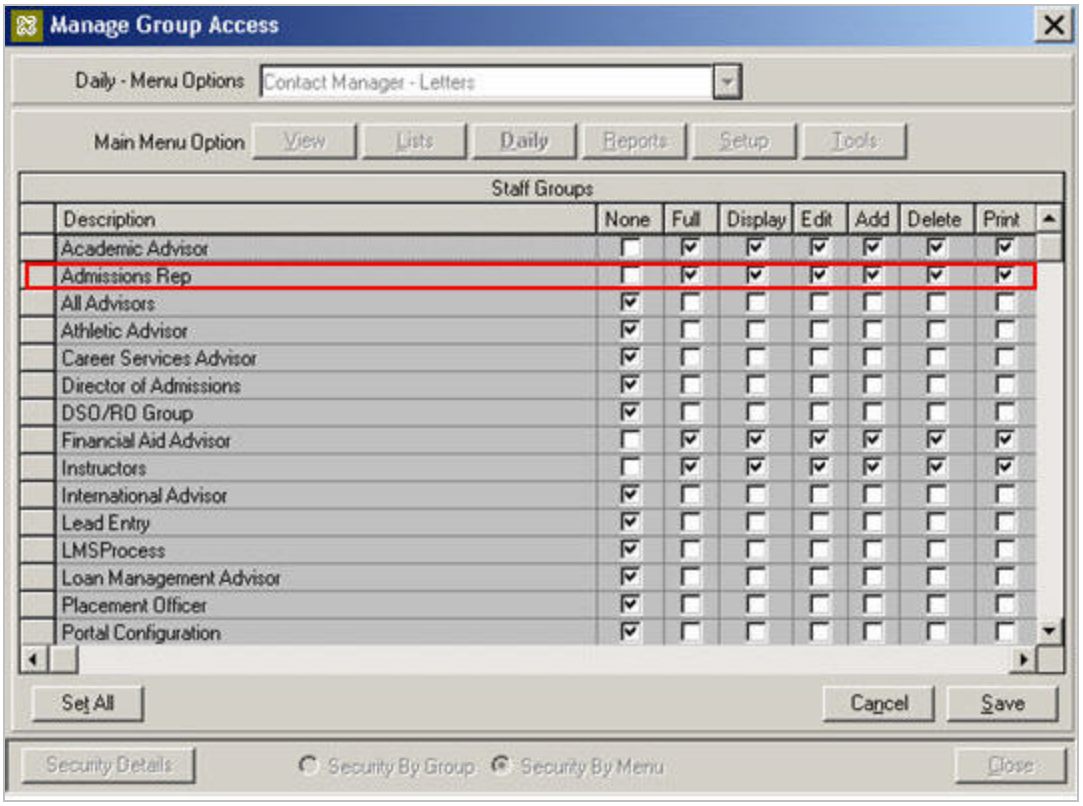


6. Repeat these steps for each staff group that you would like to give permission to delete form letters.
7. In the Career Services section, line item Print Employer Letters, select the **Delete** column.

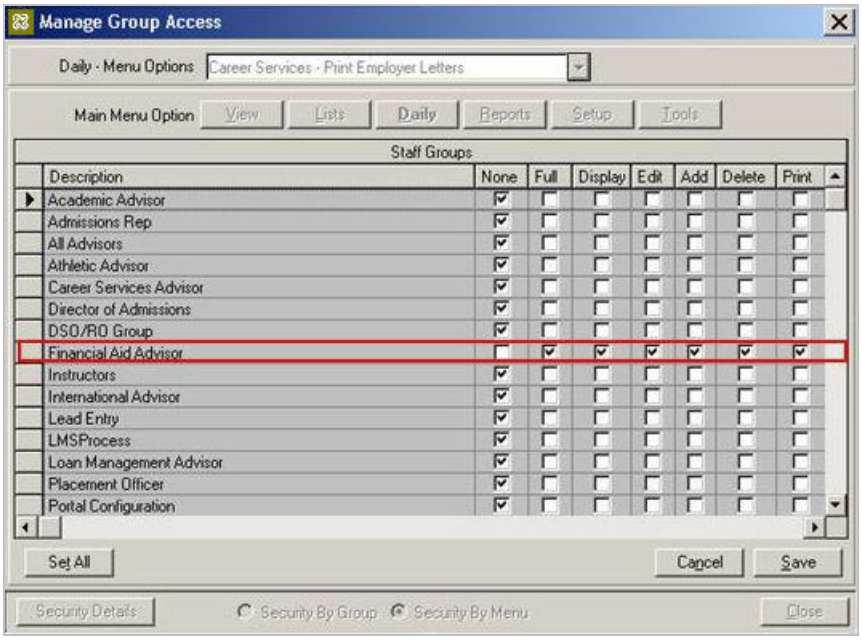


To set up delete letter permission by menu option:

2. Select the **Security By Menu** option.
3. Click the **Daily** button.
4. The Daily - Menu Options drop-down contains a list of Daily menu options. Select **Contact Manager - Letters** from the list. A list of staff groups is displayed.



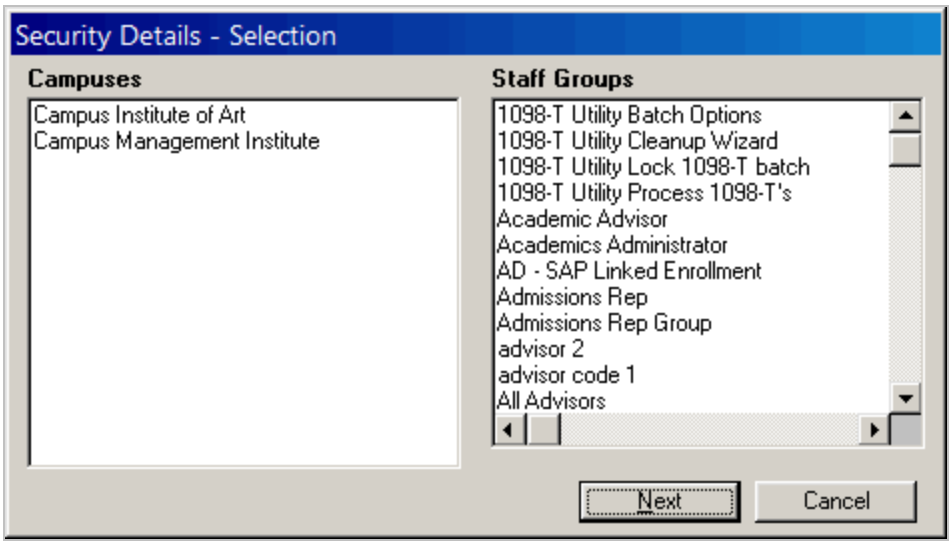
5. For each staff group that you want to give permission to delete form letters, select the **Delete** column.
6. Repeat these steps for each staff group that you would like to give permission to delete form letters.
7. For Employer form letters repeat these steps, but select **Career Services - Print Employer Letters** from the **Daily - Menu Options** drop-down list, and then assign permission to the staff group.



8. Repeat these steps for each staff group that you would like to give permission to delete form letters.

To run the Security Details report:

2. Select **Security By Group**.
3. Select a **Staff Group**.
4. Select a **Main Menu Option**.
5. Click **Security Details**. The Security Details - Selection form is displayed.



6. Select the **Campuses** and **Staff Groups** for which to run the report.
7. Click **Next**. The list of users in the previously selected campuses and groups is displayed.
8. Select the **Users** to be included in the report.

9. Click **OK**. CampusNexus Student extracts the security data for the selected users. Progress messages appear in the status bar of the main window. When the data extraction is complete, CampusNexus Student opens Microsoft Excel and loads a worksheet with the extracted data.

Legend: F = Full access, P = Print (display) access, and X = No access (none).

Sign In

Before you can use the system, CampusNexus Student must know who you are. It must set up your "profile". Staff members, known as "users", use CampusNexus Student for differing purposes. To make the appropriate data available to you as a "user", the system administrator (SA) assigns you an identifier code and password. The system administrator also assigns you to one or more groups of users with common characteristics and data needs. Security and access to data in CampusNexus Student is based on these staff member user groups.

CampusNexus Student provides the following authentication modes:

- Use CampusNexus Student Database
- Use Windows Login (Non-AD)
- Use Active Directory
- Use Active Directory (single sign on)

In Use CampusNexus Student Database or Use Windows Login (Non-AD) authentication mode, the Sign In form prompts the user for the CampusNexus Student user name and password.

Use CampusNexus Student Database Sign In

If the system is in Use CampusNexus Student Database authentication mode, the User Name field is *enabled* and the **User Name** and **Password** may be entered according to the staff maintenance form or central security application for CampusNexus Student.

Use Windows Login (Non-AD) Sign In

Some system administrators set up the CampusNexus Student security system so that if you can log in to the school's computer network, you can start CampusNexus Student without further identification. This is referred to as using Windows security for user identification. In this case, you are not required to enter your user ID and password. Otherwise, follow the sign in (or log in) instructions.

To sign in (or log in) to CampusNexus Student:

1. Double-click the CampusNexus Student icon on your desktop. The **CampusNexus Student Sign In form** is displayed.

   Note: If the CampusNexus Student icon is not on your desktop, ask your system administrator to install the CampusNexus Student client software.

2. Enter the **User ID** provided by your system administrator. Upper case, lower case, or mixed case letters are permissible.

3. Enter your **Password**. Upper case, lower case, or mixed case letters are permissible. The password will not be shown in clear text on the form. Asterisks (*) will be substituted for the characters of your password.

   Note: For information on changing your password, see Modifying Your Password.

4. Press **Enter** or click **Sign In**. CampusNexus Student initialize values needed for processing while you are working in the system.

5. If you entered a user ID and/or password that CampusNexus Student does not recognize, you are prompted to re-enter your credentials.

6. Once the initialization values are loaded, the main window is displayed on your desktop.

7. Depending on your individual user setup parameters, you may see your session parameters form. You can change the default Campus, Term, Financial Aid Year, and Change Password before continuing to open CampusNexus

Student.

Note: To change your own password, the system administrator must modify your profile.

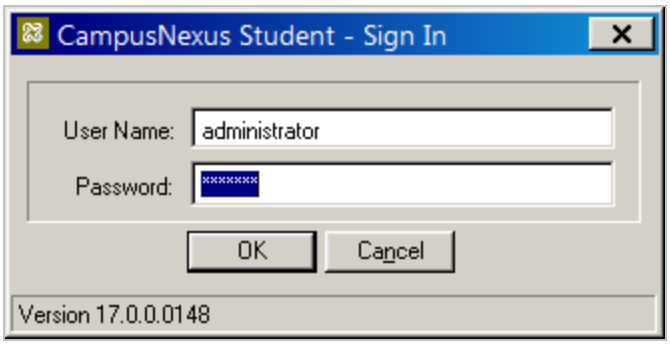
8. If you decide not to sign in after opening the Sign In form, click **Cancel** to close the form and return to your desktop.

Note: If you need to know about the system you are logging into before you do so, press **Ctrl+I** while the **CampusNexus Student Sign In form** is open. An information window is displayed. Click **OK** to close the window.

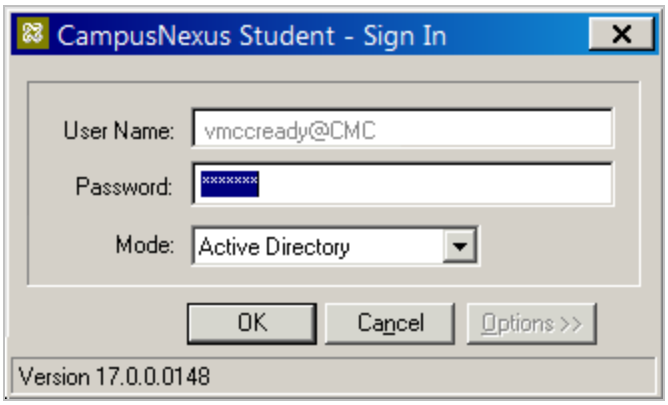
Use Active Directory Sign In

When Use Active Directory authentication mode is enabled, the domain User Name field is *disabled* when the user logs into CampusNexus Student. The user only needs to enter the Password.

For Active Directory Sign In, the user needs to enter the domain password to sign in. The user can also click the Options >> button and select the Use CampusNexus Student Database option to switch authentication modes. This allows the user to use the "Administrator" account. The Administrator will not be a domain account, and remains a CampusNexus Student database account. Using the Options >> button, and selecting the Use CampusNexus Student Database option, is the only way to sign in as Administrator when Active Directory is *enabled*. The user will not see the Sign In form, and will be presented with the Main CampusNexus Student form instead when in Active Directory mode.



Click **Options>>** to change the current authentication mode to Use CampusNexus Student Database.



If you cannot access CampusNexus Student in Active Directory mode, click **Options>>** , select the Use CampusNexus Student Database option from the **Mode**, enter the CampusNexus Student user name and password, and click **OK**.

Use Active Directory (single sign on) Sign In

When Active Directory is *enabled* (single sign on or otherwise), the user is prompted with the user's Windows ID including the @domain. The User Name is disabled. For single sign on, the form attempts to validate the user@domain, and if valid, the form is hidden, and the main CampusNexus Student form is displayed. This allows the user to use the "Administrator" account. The Administrator will not be a domain account and remains a CampusNexus Student database account. Using the Option "CampusNexus Student Database Mode" is the only way to sign in as Administrator when Active Directory is enabled. The user will not see the Sign In form and will be presented with the Main CampusNexus Student form.

Setup > Status Codes

Status codes are essential in tracking the progress of a student through your institution by using CampusNexus Student. At each step of the student's processing, the student is changed from one status to the next in an orderly fashion. Initialize your student tracking feature by setting up the necessary user-defined status codes under Setup > Status Codes. The form contains the following tabs:

- Status Codes
- Status Changes
- Colors

Additional settings related to status codes are configured under Setup > Academic Records.

To set up tracking for non-degree seeking students, see Tracking Non-Degree-Seeking (NDS) Students.

Status Codes - Status Codes Tab

CampusNexus Student provides the status categories and system statuses, but you must create the status codes for your institution.

Definitions:

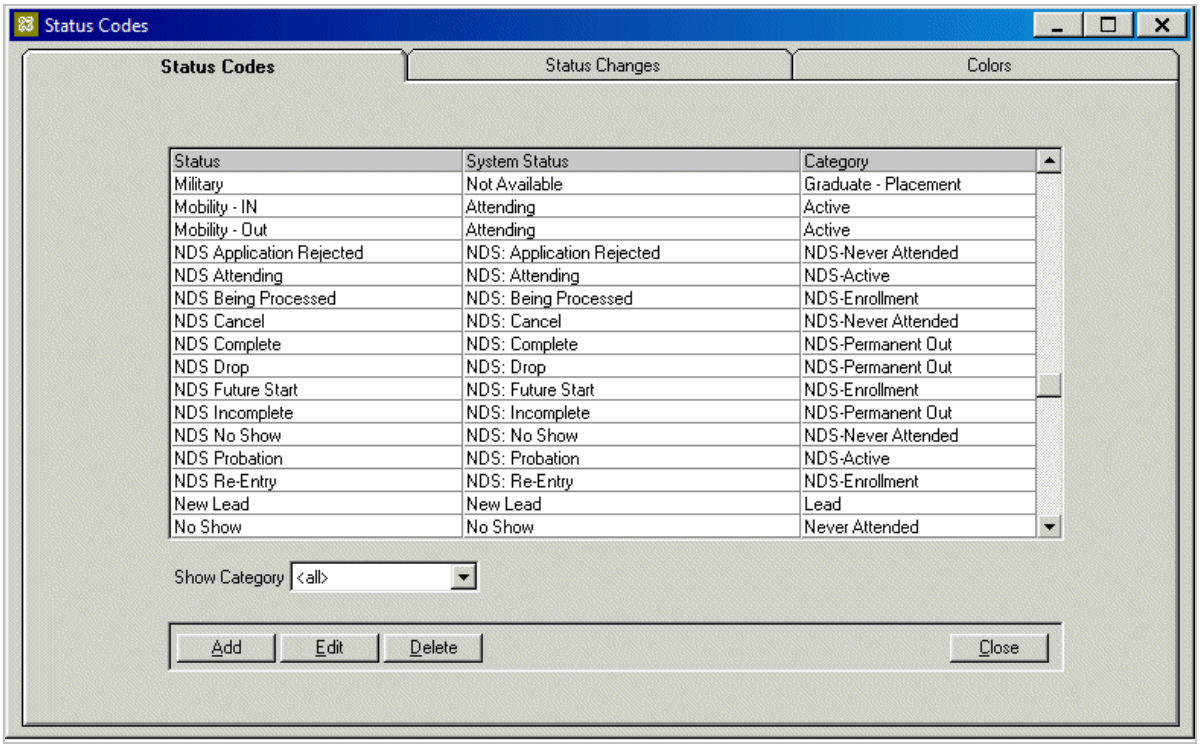
- **School Status** or **Student Status** – defined by an institution to represent their terminology as it relates to the various stages of the student life cycle.
- Status Category – hard-coded value that cannot be changed. Each system status rolls up to a pre-determined category.
- System Status – hard-coded value that cannot be changed. Each school status must be assigned to the appropriate system status. The hierarchy logic (see Status Hierarchy) determines which school status will be considered the default when multiple school status records exist.

The system administrator (SA) can edit the school-defined status codes and descriptions. They are shown in the left-hand column on the Status Codes form. The SA can also edit the descriptions of default codes to fit the terminology of your institution. New codes can be added and unused codes can be deactivated or deleted. See Manage School Statuses.

Study your school-defined status code schema carefully before you set it up. Once you begin using CampusNexus Student and students migrate from one status to another, it becomes very difficult to change the precedence of the status codes. Especially, do not change a school-defined status code from one category to another after students have been assigned the status. In this case, deactivate the old status code under the first category and create a new status code under the second category.

Status Codes for Non-Degree Seeking Students

You must initialize your NDS Student tracking feature by setting up the necessary user-defined status codes. CampusNexus Student provides the status categories and system statuses, but you must create (add) the status codes for your school. The illustration below shows some of the user-defined NDS status codes in a sample database.



Status Category

At the very foundation of the status code system are the status categories. Status categories are fixed in CampusNexus Student so that the system will always understand in which category each lead or student is classified at any given time.

The status categories ares:

- **A** - Active
- **C** - Applicant Processing
- **E** - Enrollment
- **G** - Graduate - Placement
- **I** - InSchool - Placement
- **L** - Lead
- **N** - Never Attended
- **P** - Permanent Out
- **T** - Temporary Out
- **W** - NDS - Never Attended
- **X** - NDS - Enrollment
- **Y** - NDS - Active
- **Z** - NDS - Permanent Out

System Status

The system statuses are at the intermediate level of the status code hierarchy. Each system status is related to a status category. Any one status category can be related to one or many system statuses. For instance, the system statuses: New Lead, Interview Scheduled, and Interviewed are all related to the Lead category.

System statuses and their relationships to categories are defined by CampusNexus Student to maintain consistency throughout the system. Many displays and reports are based on these relationships.

Relationship between System Status and Status Category

System Status	Status Category
Application Not Accepted	Never Attended
Application Received	Applicant Processing
Attending	Active
Being Processed	Enrollment
Cancel	Never Attended
Complete	Permanent Out
Currently Placed	Graduate - Placement
Drop	Permanent Out
Future Start	Enrollment
Graduate	Permanent Out
In School Not Available	InSchool - Placement
In School Not Yet Placed	InSchool - Placement

System Status	Status Category
In School Placed	InSchool - Placement
Incomplete	Permanent Out
Interview Scheduled	Lead
Interviewed	Lead
Leave of Absence	Temporary Out
NDS: Application Rejected	NDS - Never Attended
NDS: Attending	NDS - Active
NDS: Being Processed	NDS - Enrollment
NDS: Cancel	NDS - Never Attended
NDS: Complete	NDS - Permanent Out
NDS: Drop	NDS - Permanent Out
NDS: Future Start	NDS - Enrollment
NDS: Incomplete	NDS - Permanent Out
NDS: No Show	NDS - Never Attended
NDS: Probation	NDS - Active
NDS: Re-entry	NDS - Enrollment
New Lead	Lead
No Show	Never Attended
Not Available	Graduate - Placement
Not Yet Placed	Graduate - Placement
Pending Applicant	Applicant Processing
Probation	Active
Re-Entry	Enrollment
Standard Period of Non-Enrollment	Temporary Out
Transfer from Other Campus	Enrollment
Transfer from Other Program	Enrollment
Transfer to Other Campus	Permanent Out
Transfer to Other Program	Permanent Out

Status Hierarchy

CampusNexus Student has built-in hierarchy logic to determine which school status will be considered the default when multiple school status records exist. As a result, the student master form will display the school status based on this logic. In addition, the default enrollment and/or applicant record will be pre-selected when multiple enrollment and/or application records exist for a student record.

When multiple school statuses exist for a student's record, the school status associated with a system status with the lower hierarchy value will be considered the default record. For example, a student that has graduated and is also currently applying for a new program has the following school statuses:

School Status	System Status	Category
Graduated	Graduate	Permanent Out
Application in Progress	Application Received	Applicant Processing

The school status reflected on the student master form would be Application in Progress based on the table below since the system status assigned to it has a value of 16 which is lower than the Graduated school status which has a value of 19. Forms that display enrollment/application records will default based on this hierarchy; the other record would need to be manually selected to display the associated data.

The following table represents the hard-coded hierarchy value associated with each system status:

System Status	Hierarchy Value
New Lead	0
Interview Scheduled	0
Interviewed	0
Not Yet Placed	0
Currently Placed	0
Not Available	0
Attending	1
NDS: Attending	2
Probation	3
NDS: Probation	4
Leave of Absence	5
Standard Period of Non-Enrollment	7
Future Start	9
NDS: Future Start	10
Being Processed	11
NDS: Being Processed	12

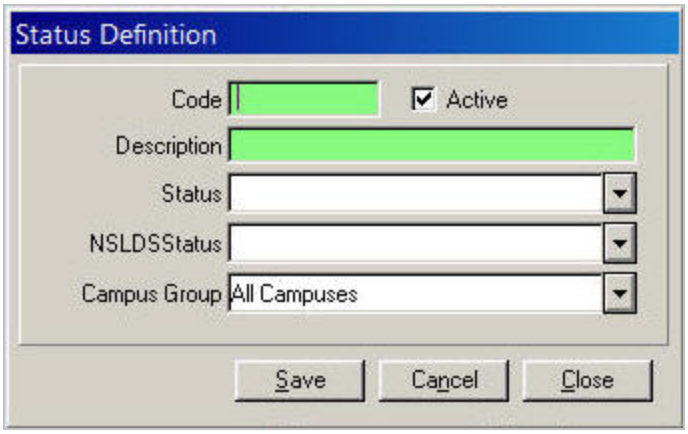
System Status	Hierarchy Value
Re-Entry	13
NDS: Re-Entry	14
Application Received	16
Pending Applicant	17
Graduate	19
Complete	21
NDS: Complete	22
Incomplete	23
NDS: Incomplete	24
Drop	25
NDS: Drop	26
Application Not Accepted	31
NDS: Application Rejected	32
No Show	33
NDS: No Show	34
Cancel	35
NDS: Cancel	36
Transfer To Other Program	37
Transfer To Other Campus	37
Transfer From Other Program	37
Transfer From Other Campus	37
InSchool Placed	38
InSchool Not Yet Placed	39
InSchool Not Available	40

Manage School Statuses

Add or edit a status code and definition

1. Navigate to **Setup > Status Codes**. The Status Codes form is displayed.
2. Select the **Status Codes** tab.

3. Click **Add**, or select a record and click **Edit**. The Status Definition form is displayed.



4. Specify a unique **Code**.
5. Enter a **Description**.
6. Select a **System Status**.
7. Select an **NSLDS Status** that will be associated with the **System Status**. The status is assigned by the National Student Loan Data System (NSLDS) to be used for SSCR Processing.
8. Select a **Campus Group**.
9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
10. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Deactivate a school-defined status code definition

Deactivating a status code definition is the preferred method of dealing with a code that is no longer needed at your institution. For the purposes of record keeping and historical accuracy, deletion of a code that has been used in the past is not a wise thing to do.

1. Navigate to **Setup > Status Codes**. The Status Codes form is displayed.
2. Select the **Status Codes** tab.
3. Select the **Status Code Description** to be deactivated.
4. Click **Edit**. The Status Definition form is displayed with the current definition data.
5. Clear the **Active** check box.
6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Delete a school-defined status code definition

Note: The preferable method of dealing with status definitions that are no longer need is to deactivate them. When deactivated, they remain on file for historical reference. You can delete Status Code Definitions, but the System Statuses and System Categories associated with them will not be deleted.

1. Navigate to **Setup > Status Codes**. The Status Codes form is displayed.
2. Select the **Status Codes** tab.
3. Select the **Status Code Description** to be deleted.

4. Click **Delete**.
5. A confirmation message is displayed. Click **Yes**. The status definition is removed from the list.

Status Codes - Status Changes Tab

The system administrator (SA) can control which status changes can occur in your institution and which groups of staff members can initiate them. The rules in this table control which current status can be changed to which new status. Each from/to change can be controlled individually. You can allow all groups of staff members to initiate a status change or limit the change authority to one group.

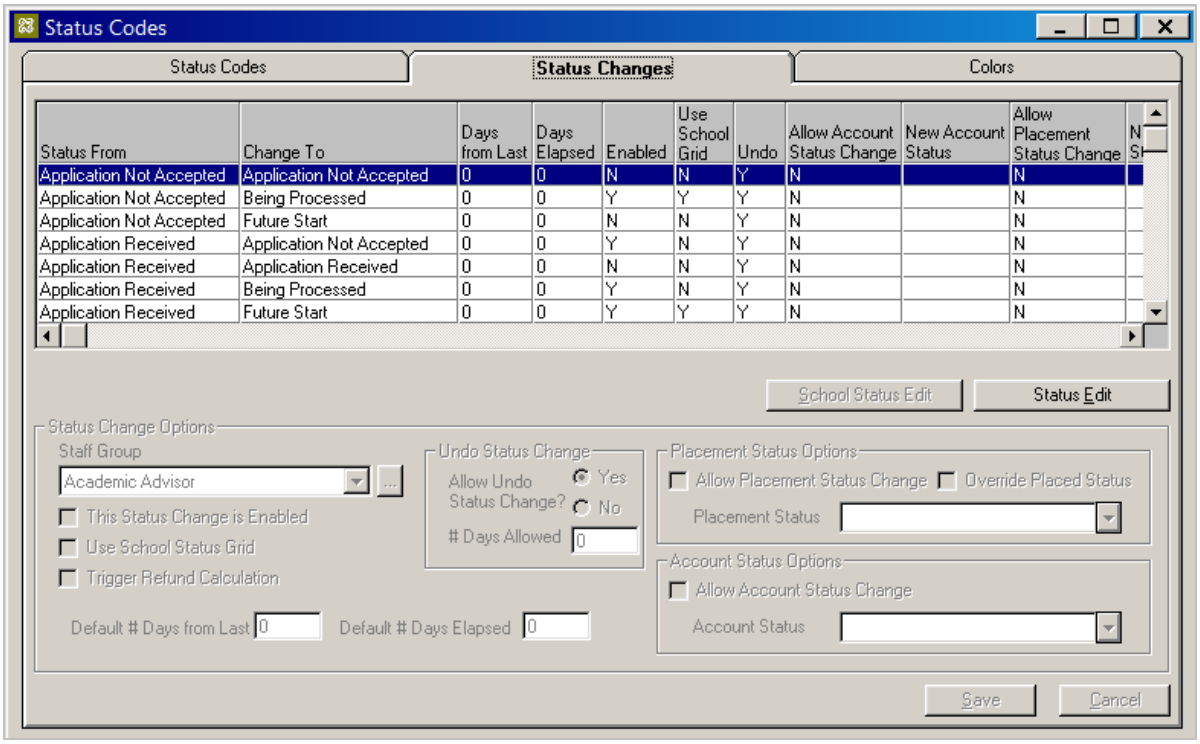
For example, a student whose current status is 'Attending' can be changed to a new status of 'Probation', 'Complete', 'Drop', 'Graduate', and so on. Only one group of staff members can trigger the change, for instance, Academic Records staff members.

Users who have access to modify the setup of status changes can specify a placement status for each school status listed. When a school status change is performed, the student enrollment's placement status is also changed if a placement status has been associated with the school status that the enrollment record was changed to. This enables users to more easily differentiate enrollment records when working in the Career Services module and reduces the risk of associating a student placement record with the incorrect enrollment record.

To edit the status change rules:

1. Navigate to **Setup > Status Codes**. The Status Codes form is displayed.
2. Select the **Status Changes** tab.

   This tab displays System Status codes that can be interchanged. For example, the system status 'NDS: Attending' can be changed to another School Status code having a System Status of ' NDS: Attending', or to any of the other NDS codes (Cancel, Complete, Drop, Incomplete, No Show, or Probation).
3. A default set of allowed NDS status changes is provided in the system conversion procedure. To disable one or more of the allowed changes, select the changes to be disallowed. For each selected status change, clear the check box **This Status Change is Enabled**. You can also select a Staff Group that is authorized to initiate the selected status change.



4. Select the Status Change rule to be edited and click **Status Edit**.
5. Select **This Status Change is Enabled** to enable or disable the status change.
6. Select a **Staff Group** or **Groups** that can initiate this status change. A blank value in the Staff Group text box means that there are no restrictions for that status change.
7. Select **Use School Status Grid** to control this change item with school statuses instead of system statuses. Once this option is selected and saved, you can click **School Status Edit** to continue with school statuses. See below.
8. Select **Trigger Refund Calculation** to trigger a hypothetical refund calculation record to be added to the student. This check box is only enabled if the status in the 'Change To' column is a Permanent Out or Never Attended status (categories P, Z, N, W); these status codes are not included in the status codes that allow the trigger to be set (with the exception of the TOCAMP and TOPROG status codes).
9. *Optional*: Enter a value in **Default # Days from Last.** This is the number of days from the student's last status change in which this status transition is allowed. The date involved is the effective date of the enrollment status change. Once the number of days elapsed from the last status change has exceeded this setting, this status transition is no longer allowed. A zero in this field indicates that this criteria is not used on this transition.
10. *Optional*: Enter a value in **Default # Days Elapsed.** This is the number of days from the student's last status change that have had to elapse before this status transition is allowed. The date involved is the effective date of the enrollment status change. If the number of days elapsed from the last status change is less than this setting, this status transition will not be allowed. A 0 in this field indicates that this criteria is not used on this transition.

    As an example of the usage of the two fields above, let us say the change is from Attending to Drop. The Default #of Days from Last is 5 and the Default # of Days Elapsed is 15. This means that you have a range of 10 days in which to make this change. The change cannot be made for at least 5 days after the student's last enrollment status change. Then you have until 15 days after the student's last enrollment status change to make the change from Attending to Drop.
11. The Undo Status Change feature enables users to reverse a particular status change. Use the radio buttons to select **Yes** or **No**. If you select **No**, the user cannot undo a status change. If you select **Yes**, the **#Days Allowed** field becomes enabled. Enter the school-defined number of days during which a status may be undone. Leaving this field blank or setting it to zero indicates that the undo functionality is available indefinitely. A user might want to undo a status change due to an input error or to change a status from **Drop** to **Cancel** if it is within the allowable time.

    Note: The Undo Status feature enables you to change only the last status in the student's status history. You cannot undo previous statuses.
12. Placement Status Options enable you to decide if you want the student's placement to automatically change to the defined status even if the student is currently in a system status of Placed.
    - Select **Allow Placement Status Change** and then select a **Placement Status** from the drop-down menu to enable the following:
        a. A placement status to automatically change when an enrollment record is changed to the school status.
        b. The student enrollment record's placement status to automatically change to the specified placement status.
    - Select **Override Placed Status** to override the placed status that a student is in.

- Select a new **Placement Status** from the drop-down menu to undo a status change; if that school status change caused a placement status change, the placement status change will also be undone provided it is the most recent placement status change on file for the student enrollment record. If another placement status change has been done subsequent to the placement status that resulted from the school status change, the placement status caused by the school status change will not be undone.

13. **Account Status Options** enable you to select the system status for which account status changes will automatically be enabled. If you select the **Use School Status Grid** option, you can edit account status from that grid or from the fields listed under Account Status Options.

    Automatic student account status changes require that the student enrollment campus be in the campus group mapped to the system status or school status which is also mapped to an account status. Also, the student enrollment school must be a campus location at which the mapped account status is active.

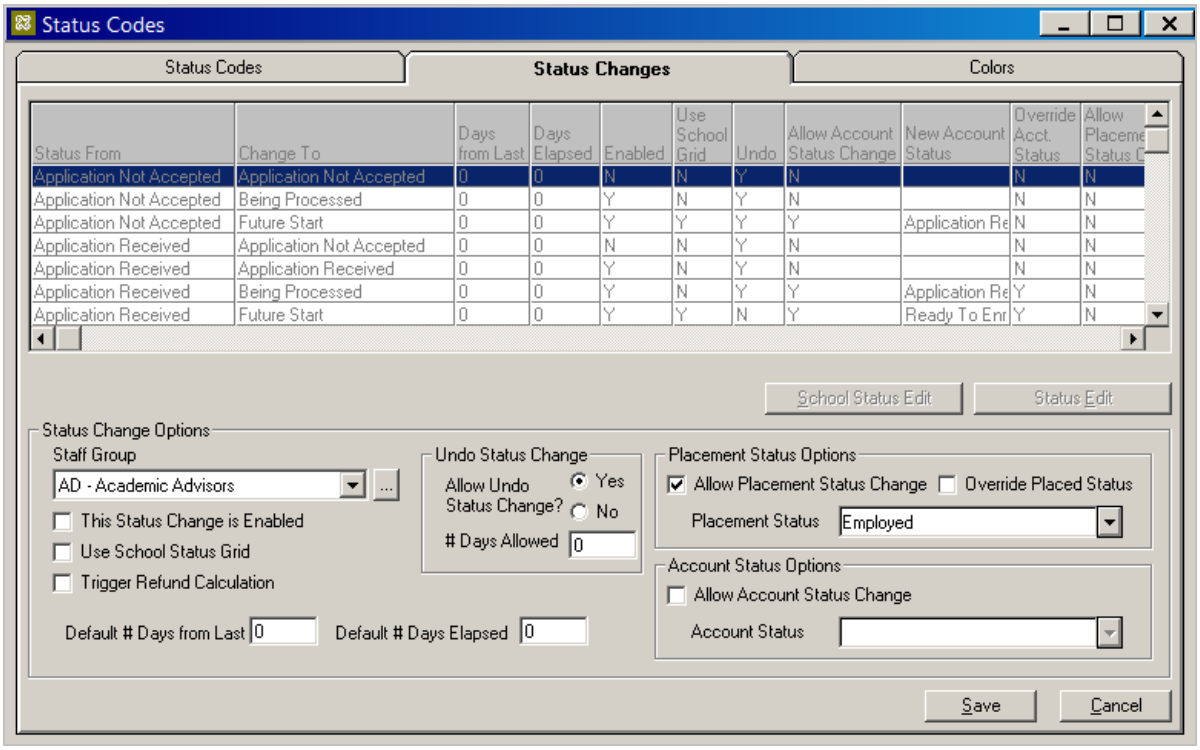
    - Select **Allow Account Status Change** to enable the automatic account status change feature. The **Allow Account Status Change** column displays Y, upon selecting Save, to show account status is modifiable.
    - Select an **Account Status** that will be automatically applied when the student status changes to the selected system status. The **New Account Status** column displays the selected default account status.

    Note: If 'Account Statuses' codes are configured (Lists > Student Accounts > Account Statuses) as 'Account' or 'Both', they are modifiable to be automatically updated. If an account status is configured as 'Collections', it cannot be modified for automatic updating.

14. Click **Save**.
15. Click the **Status Codes** tab and click **Close** to close the Status Codes form.

To change the values of School Status:

1. Select a Status Change row and select **Use School Status Grid** to base the possible changes on your school-defined statuses rather than the system statuses.
2. Click **School Status Edit**. The **School Status Grid** is displayed. On this form, the statuses are based on your school's descriptions.



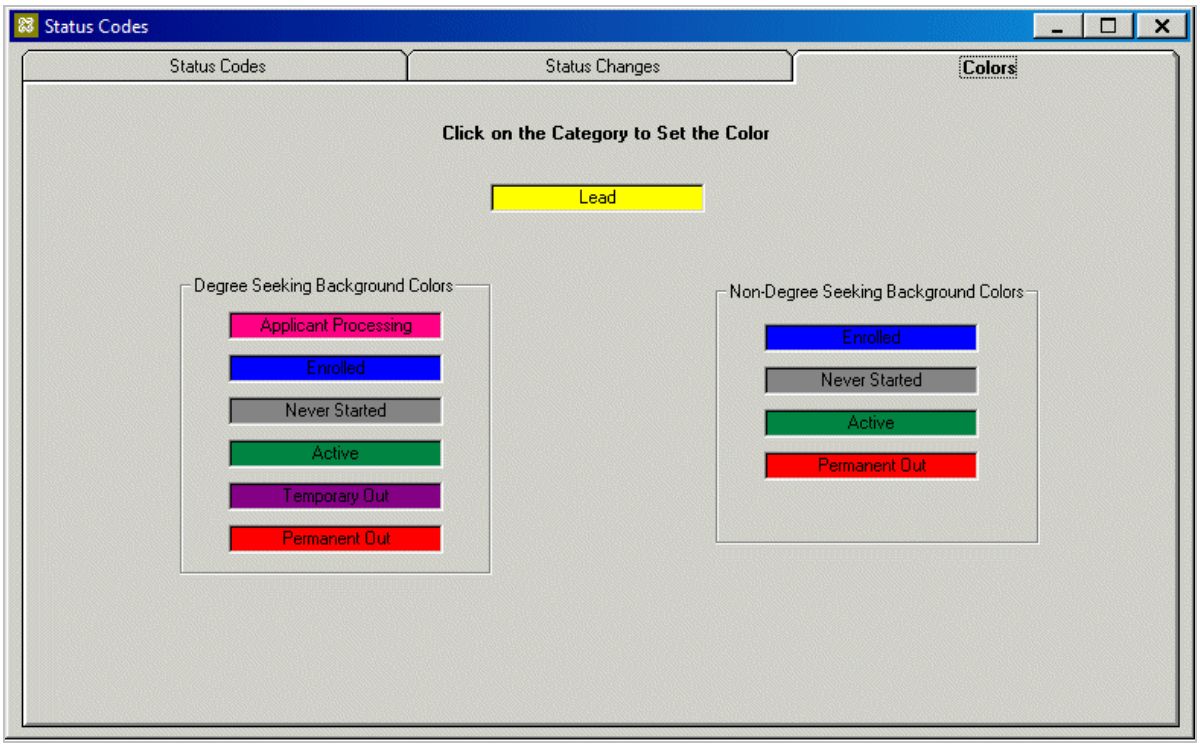
3. Select a row and click **School Status Edit** to change the values.
4. *Optional*: Select a **Staff Group** or **Groups** that can make this status change.
5. *Optional*: Enter a value in **Default # Days from Last**. This is the number of days from the student's last status change in which this status transition is allowed. Once the number of days elapsed from the last status change has exceeded this setting, this status transition is no longer allowed. A zero in this field indicates that this criteria is not used on this transition.
6. *Optional*: Enter a value in **Default # Days Elapsed**. This is the number of days from the student's last status change that have had to elapse before this status transition is allowed. If the number of days elapsed from the last status change is less than this setting, this status transition will not be allowed. A 0 in this field indicates that this criteria is not used on this transition.
7. If it has been previously set, the **Undo Status Change** feature indicates whether a status change can be undone and the number of days after the change that an undo is allowed by your school. If these fields are enabled, you can make changes to the **Undo Status Change** fields in this form.
8. Click **Save**.
9. Click **Close** to close the form. You are returned to the Status Changes form.

Status Codes - Colors Tab

You can change the background color of student forms to emphasize the status category of the current student. See also Status Codes, Status Changes, and Tracking NDS Students.

To edit the student status background colors:

1. Navigate to **Setup > Status Codes**. The Status Codes form is displayed.
2. Select the **Colors** tab.



3. You can assign colors for status categories of Degree Seeking and Non-Degree Seeking students. Select a background color by double-clicking on the category box. The color selection form is displayed.

4. Select one of the **Basic colors** and click **OK**. The color appears in the Status Colors form.

   OR

   a. Click **Define Custom Colors** to open the color palette. From the color palette, you can slide the indicators until you find a color suitable for your needs.

   b. Click **Add to Custom Colors** and click **OK**.

      The custom color appears in the Status Colors form.

5. Change any other status category colors in the same manner.

6. Close the Status Codes window by clicking the **X** in the upper right corner of the window.

Tracking Non-Degree-Seeking (NDS) Students

Many institutions offer courses or programs for students who are not seeking a degree. CampusNexus Student has features to help those institutions track non-degree-seeking (NDS) students separately from regular, degree-seeking students. The key to this tracking process is a separate set of codes for the status of the NDS students.

Non-Degree-Seeking (NDS) status codes have been added to the system status table. These codes enable your institution to define an alternate path for status changes for students enrolling into non-degree-granting or single-subject programs. The program versions have also been modified to indicate that the program is a degree or non-degree program. Once a student is enrolled into a non-degree program, the status change logic is determined by the institution's configuration of the NDS status codes. These separate codes facilitate elimination or separation of non-degree students on reports.

NDS Setup

First, determine whether your campus offers courses or programs for non-degree-seeking students. If not, there is nothing you need to do. CampusNexus Student defaults its setup options to consider all students as seeking a degree.

If your campus does offer courses or programs for NDS students, complete the setup steps described below.

Status Category table (SyStatusCategory)

Code	Description
X	NDS-Enrollment
Y	NDS-Active
Z	NDS-Permanent Out
W	NDS-Never Attended

Status table (SyStatus)

Code	Description	Category	System Code	Hierarchy	Active
NDS-ATT	NDS: Attending	Y	1	2	1
NDS-PROB	NDS: Probation	Y	1	4	1
NDS-FUT	NDS: Future Start	X	1	10	1
NDS-BP	NDS: Being Processed	X	1	12	1
NDS-RE	NDS: Re-Entry	X	1	14	1
NDS-COMP	NDS: Complete	Z	1	22	1
NDS-INC	NDS: Incomplete	Z	1	24	1
NDS-DROP	NDS: Drop	Z	1	26	1
NDS-NO	NDS: No Show	W	1	34	1
NDS-CAN	NDS: Cancel	W	1	36	1
NDS-REJ	NDS: Application not Accepted	W	1	32	1

See Status Codes for Non-Degree Seeking Students, Status Changes Setup, Status Colors to configure status codes for non-degree-seeking students.

Configure the following NDS-related options on the Academic Records tab of the Campus Information form:

- Allow Non-Degree Programs
- Default Active Status
- Default NDS Active Status

NDS Programs and Courses

You may want to set up your new NDS courses or programs with codes that indicate that they are NDS-related.

Note: Before setting up a new NDS program, consider adding some NDS-related codes to the lists referred to (required) on the Program Version form: Degree, Program Group, and Grade Scale. "SAP Table" is not a required field for NDS program versions.

The "Program Type" option on the **Program Version form** allows **Degree** or **Non-Degree**. The default for a new program version is **Degree**.

When loading data into the form for editing, if there are any enrollments assigned to the program version, CampusNexus Student will disable the Program Type option buttons. Once students are enrolled in a program version, the Program Type cannot be changed.

Enrollment

If the campus at which the student is enrolling allows for non-degree programs, CampusNexus Student adds a "Program Type" prompt above the Status field in Step 2 of the Enroll Student wizard. Select "Degree" or "Non-Degree". If the campus does not allow NDS enrollments, the program disables the options and selects the "Degree" option.

The Program Version and Status List boxes will be filtered based on the Program Type selection.

For Degree programs:

- The Status list will remain the same. The program will list the institution-defined status codes in category "E - Enrollment".
- The Program Version list will show only Degree program versions.

For Non-Degree programs:

- The Status list will show only the NDS - Enrollment institution-defined status codes. SyStatus.Category = "X".
- The Program Version list will show only Non-Degree program versions.

Status Changes

Individual Status Changes

The prompts on the Status Change form for various dates and other information are based on the type of status change that is taking place. NDS status codes and categories appear as required throughout CampusNexus Student.

Standard status changes and changes to NDS enrollments are similar.

Enrollment Statuses

Non-Degree-Seeking Enrollment Status	Degree-Seeking Enrollment Status
NDS-DROP	DROP
NDS-INC	INC

Non-Degree-Seeking Enrollment Status	Degree-Seeking Enrollment Status
NDS-COMP	COMPLETE
NDS-NO	NOSHOW
NDS-CAN	CANCEL
NDS-REJ	APPREJ
NDS-ATT	ATT
NDS-RE	REENTRY
NDS-BP	BP
NDS-FUT	FUT

Batch Status Changes

The prompts on the Batch Status Change form for various dates and other information are based on the type of status change that is taking place. We modified the logic to include the new NDS status codes and categories when setting the prompts.

Standard status changes and changes to NDS enrollments are similar.

Student Enrollment Information

When the enrollment selected in the list at the top of the Enrollment form belongs to a program that is defined as a non-degree program, the **Transfer** button is not available.

Transfer Enrollment

On the Transfer Enrollment form), transfers will not be allowed to or from an NDS Enrollment. In the list of "Transfer to Enrollments", enrollments in a Non-Degree program (AdProgramVersion.DegreeProgram = 0) are not included.

Report Selection

Any report that displays the Report Selection form and has status selection will include the degree-seeking and the NDS Status codes. When Status Categories are available for selection, the NDS Status Category codes will also be included.

Refund Calculation

The Refund Calculation form includes the NDS Status codes when checking the enrollment status.

Status Codes

Degree-Seeking	NDS
ATT	NDS-ATT
PROB	NDS-PROB
DROP	NDS-DROP
COMPLETE	NDS-COMP
FUT	NDS-FUT

Degree-Seeking	NDS
BP	NDS-BP
NOSHOW	NDS-NO
CANCEL	NDS-CAN
APPREJ	DS-REJ

Setup > Contact Manager

When you navigate to Setup > Contact Manager, the Contact Manager Setup form is displayed. The form contains the following tabs:

- Activity Policies
- Document Policies
- E-mail
- FERPA Groups
- Staff Groups Permissions
- Activity Settings

A Contact Manager Security Policy is applied to a staff member. It gives the staff member privileges defined by you to assign (or not assign) activities to others, to read activities assigned to others, to edit activities assigned to others, and to close activities assigned to others. Here is where you define the mix of staff groups, activity types, and functions.

If you choose not to create such policies, a user can only view, edit, and close activities assigned to him or her, and add new activities only for himself or herself. You can add, edit, delete, assign, select staff members to whom the policies are assigned, or print the policies within the tabs.

Contact Manager Setup - Activity Policies Tab

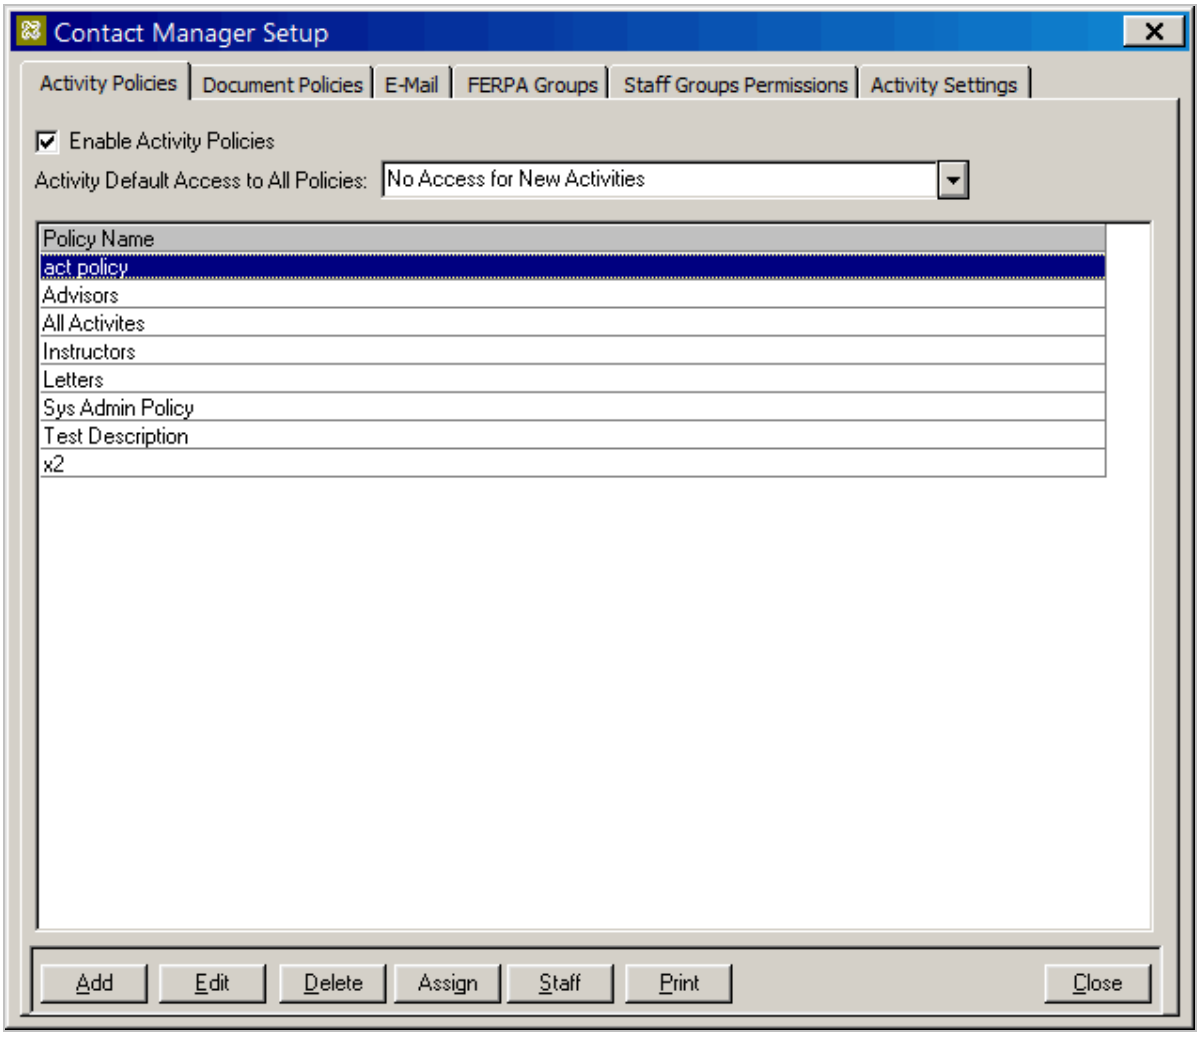
Activity Policies in Contact Manager Setup determine which users can assign, read, edit, and close particular kinds of activities. An Activity Policy is applied to a staff member. It gives the staff member privileges defined by the system administrator to assign (or not assign) activities to others, to read activities assigned to others, to edit activities assigned to others, and to close activities assigned to others.

An Activity Policy is set up by a combination of Activity Types and by staff groups. A policy indicates how each activity type (meeting, letter, phone call, and so on) can be viewed or modified by users to which the policy is assigned. The policy also indicates how users to which the policy is assigned can manipulate the activities of other staff members.

After setting up an Activity Policy, the policy can be applied to staff members by clicking the Staff button on the Contact Manager Setup form or Staff Contact Manager tab.

To add or edit a Contact Manager Activity Policy:

1. Navigate to **Setup > Contact Manager**. The Contact Manager Setup form is displayed with the Activity Policies tab.



2. Select or clear the **Enable Activity Policies** check box. It is not necessary for this option to be enabled to add or

edit a policy. It must be enabled before a policy becomes effective.

3. After you enable or disable this option, you must exit CampusNexus Student and log in again to see the result of the change.
4. Select the **Activity Default Access to All Policies**. The following options are available:
    - Full Access for New Activities

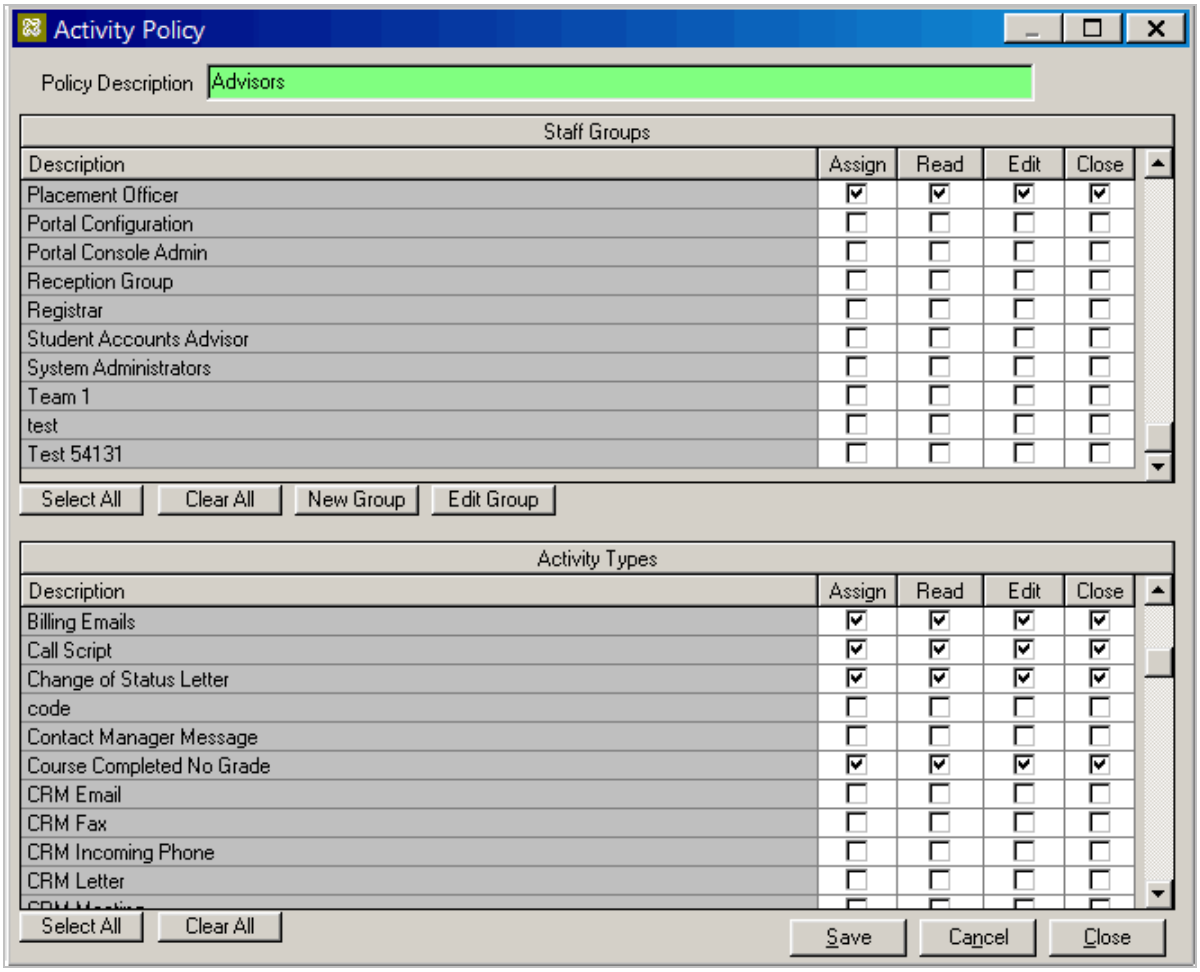
      This option lets the system administrator grant all user's equal activity access.
    - No Access for New Activities

      This option lets the system administrator select the security group to be assigned the new activity. T the system administrator selects the Staff Groups and Activity Types to define the Contact Manager Policy. Specific security group users then have access to the new activity according to their Contact Manager Policy.
    - Use Author's Access for New Activities

      This option lets the system administrator verify the Author's actions. The system administrator navigates to Setup > Contact Manager and selects the Author's policy. The system administrator verifies that no changes have been made to the Staff Group selection and sees the new activity on the Activity Types portion of the policy window.
5. These actions are taken once the Author has added the new activities.

To add or edit an Activity Policy:

1. Click **Add** to add a new Contact Manager Activity Policy, or select an existing policy on the grid and click **Edit** to view or change the details. The Activity Policy form is displayed.



2. Enter or edit the **Policy Description**.
3. Click **New Group** to add a new staff group. You must have access to the Staff Setup form to add or edit staff member groups on this form.
4. Select a group and click **Edit Group** to edit the members of the group.
5. Select one or more Staff Groups. A person to whom this policy is applied can manipulate the activities of the selected group(s). Use the **Select All** or **Clear All** buttons under the Staff Groups Grid to select or clear all the Assign, Read, Edit, and Close options. Double-click a Staff Group row to select all the options or clear all the options on the row. Otherwise, select or clear the options individually.
6. Select the Activity Types and functions that can be used by a person to whom this policy is applied. Use the **Select All** or **Clear All** buttons under the Activity Types Grid to select or clear all the Assign, Read, Edit, and Close options. Double-click a row to select all the options or clear all the options on the row. Otherwise, select or clear the options individually.
7. Click **Save** to save your Contact Manager Activity Policy.

Contact Manager Setup - Document Policies Tab

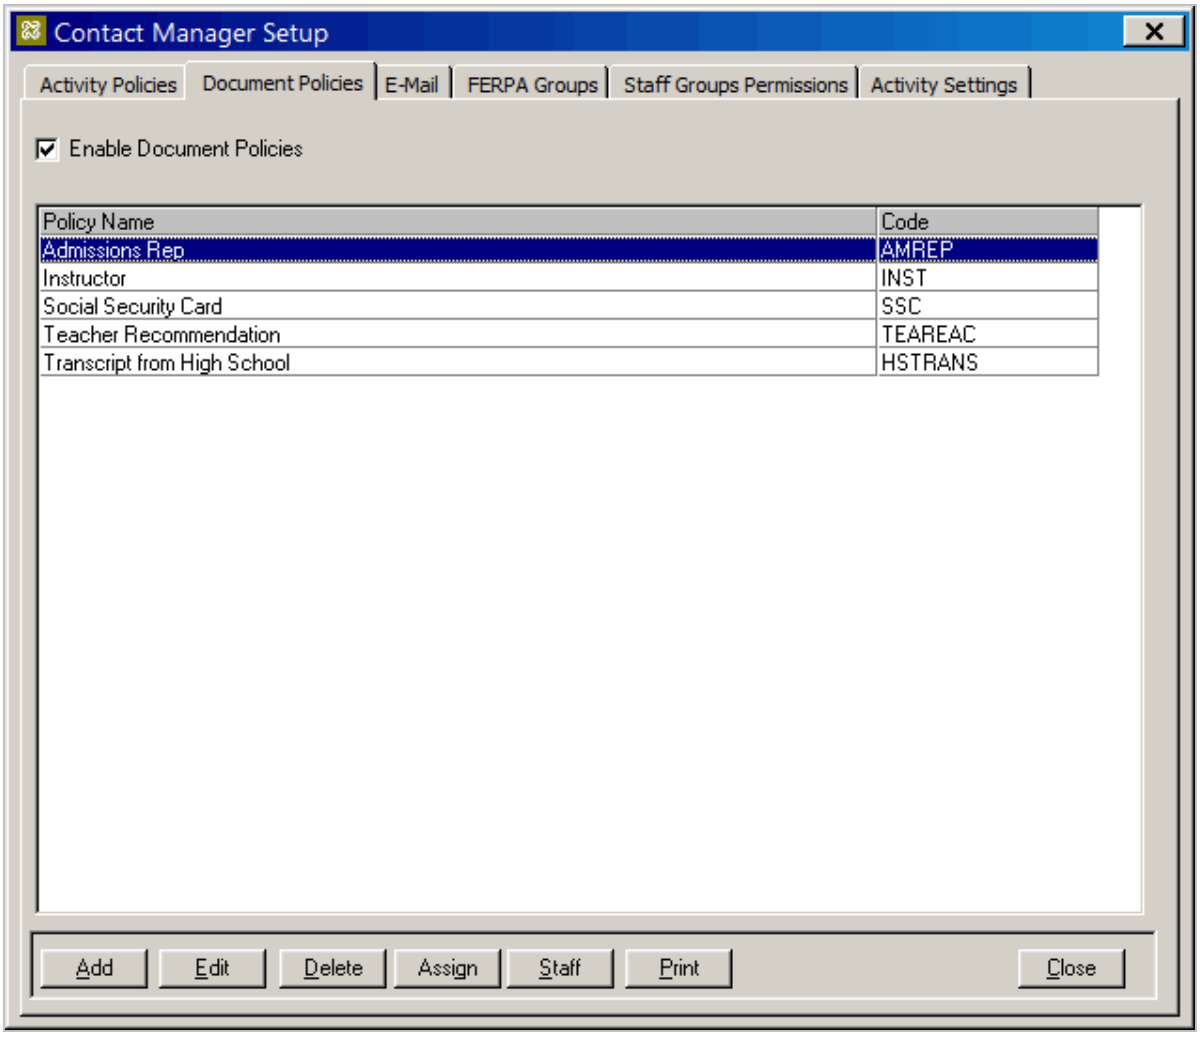
Document Policies in Contact Manager Setup determine which users can assign, read, edit, and close particular kinds of documents. A Document Policy is applied to a staff member, or a staff member can be assigned to a Document Policy. It gives the staff member privileges defined by the system administrator to assign, report, attach, edit, and delete documents.

A Document Policy is set up by a combination of document types and staff members/groups. A policy indicates how each document type (resume, transcript, driver license, FAFSA, etc.) can be viewed or modified by users to which the Document Policy is assigned. The policy also indicates how users to which the policy is assigned can manipulate the activities of other staff members.

After setting up a Contact Manager Document Policy, the policy can be applied to staff members individually, by clicking the Staff button on the Contact Manager Setup form or under Setup > Staff > Contact Manager. The policy can also be applied to staff members as a group or individually by clicking the Assign button on the Contact Manager Setup form.

To set up or edit Document Policies:

1. Navigate to **Setup > Contact Manager**. The Contact Manager Setup form is displayed.
2. Select the **Document Policies** tab.

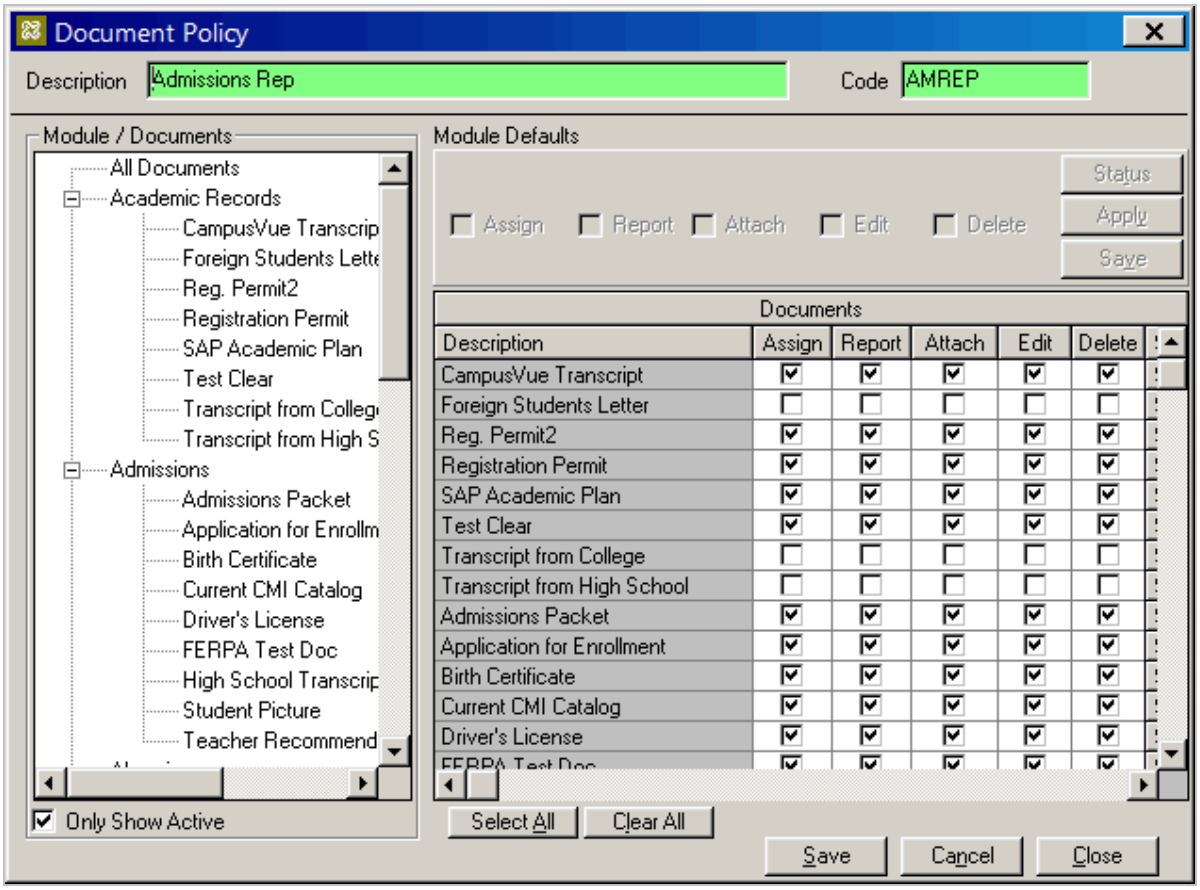


3. To enable or disable Contact Manager policies, select or clear **Enable Document Policies**. It is not necessary for this flag to be selected to add or edit a policy. It must be selected before a policy becomes effective.

You can now add, edit, delete, assign a staff member, or print a Document Policy.

To add or edit a Document Policy:

1. Click **Add** to add a Document Policy, or select a policy and click **Edit** to modify a document policy. The Document Policy form is displayed.



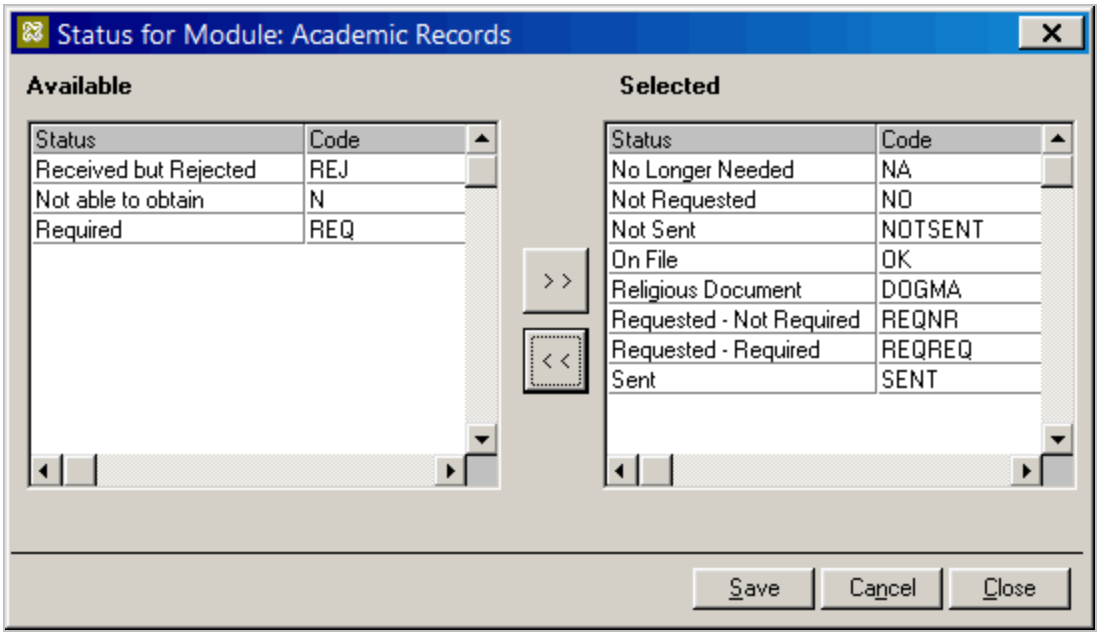
2. Enter a **Description**.
3. Specify a unique **Code**.
4. The **Module/Documents** panel is a directory tree that represents all modules and all documents associated with each module. Click on a module, such as Admissions or Academic Records. The module name is displayed in the **Module Defaults** panel of the screen.
5. Select or clear the **Only Show Active** check box to view only active or both active and inactive documents in the Module/Documents panel.
6. Use the **Module Defaults** panel to set up policies for new documents or all documents within the module. The default values, represented by check boxes are Assign, Report, Attach, Edit, and Delete. If all check boxes are enabled, the staff members (whom you have not yet identified) are permitted to do the following:

- Assign: Add a document to a student's document folder and assign a status to a document. See Document Tracking by Student.
- Report: If this is selected, the Document Tracking Report shows documents based upon the Reporting policy versus the Assign policy.
- Attach: Scan and display documents attached to a student's document folder.
- Edit: Enter information and comments about a document in the Document Detail tab of the Student Document folder and update the statuses and dates for the documents in the Document Tracking form in the Daily menu for the following modules: Admissions, Financial Aid, Academic Records, Student Accounts, Loan Management, and Career Services.
- Delete: Remove from a Student Document folder a document that is no longer needed.

7. Click **Apply** to apply the values selected in the Module Default panel for Assign, Report, Attach, Edit, Delete and "Selected" statuses to all documents in this module . CampusNexus Student prompts you to verify that you want to apply these values to all documents in the module. Click **Yes** to save your changes.

   Note: To save the new default values for future documents to be created from the Documents tab, click **Save** on the Module Defaults panel. **DO NOT** click **Apply**.

8. After you have set and saved the default values for the selected module, the values can be set individually for each document. Click **Save** on the bottom of the form to save changes for individual documents in all modules. CampusNexus Student prompts you to verify that you want to apply these values to all documents in the module. Click **Yes** to save your changes.
9. Click **Save** to update the document policy based upon the changes you have made to the default values. A confirmation message is displayed. Click **OK**.
10. Click **Status** to get a list of statuses to select from all available statuses. The Status for Module form is displayed. Use the arrow buttons to choose Selected statuses. These statuses are displayed in a drop-down list when you click on the status field next to a document name.



11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

12. The Documents panel of the **Document Policy** form contains a list of all documents associated with the module named. Use this panel to configure policies for each individual document. Click **Select All** to enable all check boxes or **Clear All** to disable all check boxes.
13. Click the **Save** button at the very bottom of the Documents panel to save changes you have made in that panel only. A confirmation message is displayed. Click **OK**.

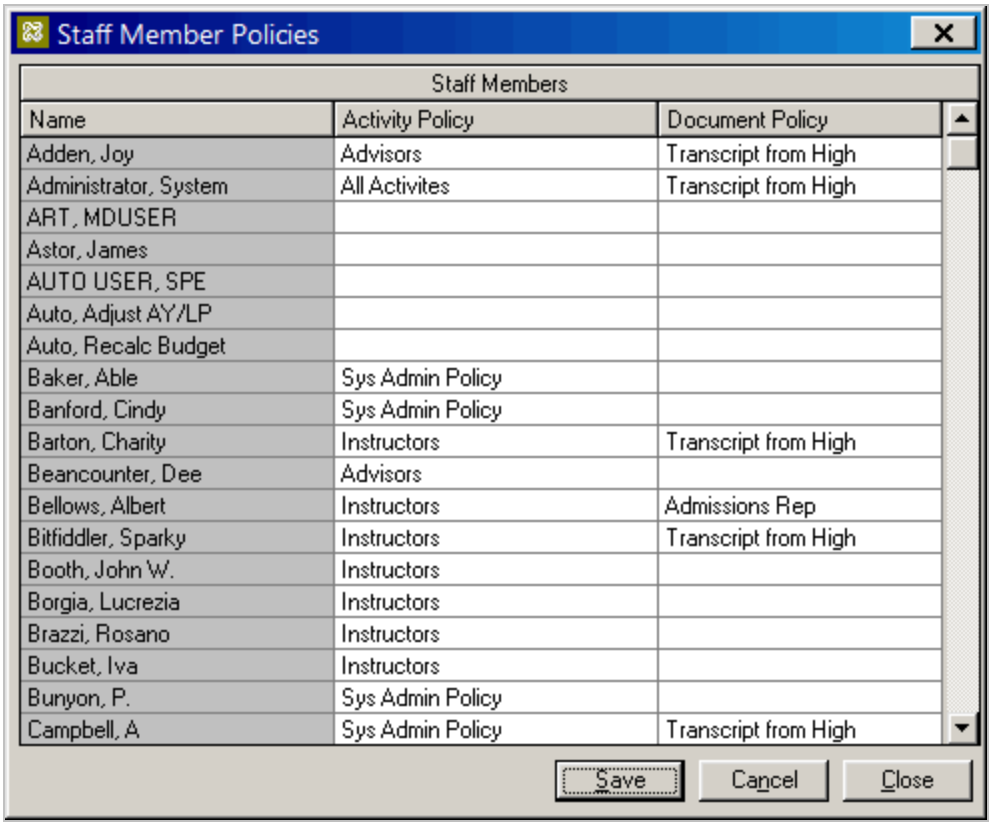
To delete a Document Policy:

Select a document policy and click **Delete**.

To assign a Document Policy to staff members or staff groups:

After a policy is created, it must be assigned to staff members, as individuals or groups.

1. Navigate to **Setup > Contact Manager**. The Contact Manager Setup form is displayed.
2. Select the **Document Policies** tab.
3. Click the **Staff** button. The Staff Member Policies form is displayed. In this form, staff members can be assigned to policies and groups individually.



4. To assign or re-assign a staff member to and Activity Policy or a Document Policy, click inside a cell of the appropriate column. An arrow indicating a drop-down list is displayed. Click the arrow and select an option.
5. Click **Save**.

To print a Document Policy:

Click **Print** in the Contact Manager Setup form. CampusNexus Student generates the Document Policy Report.

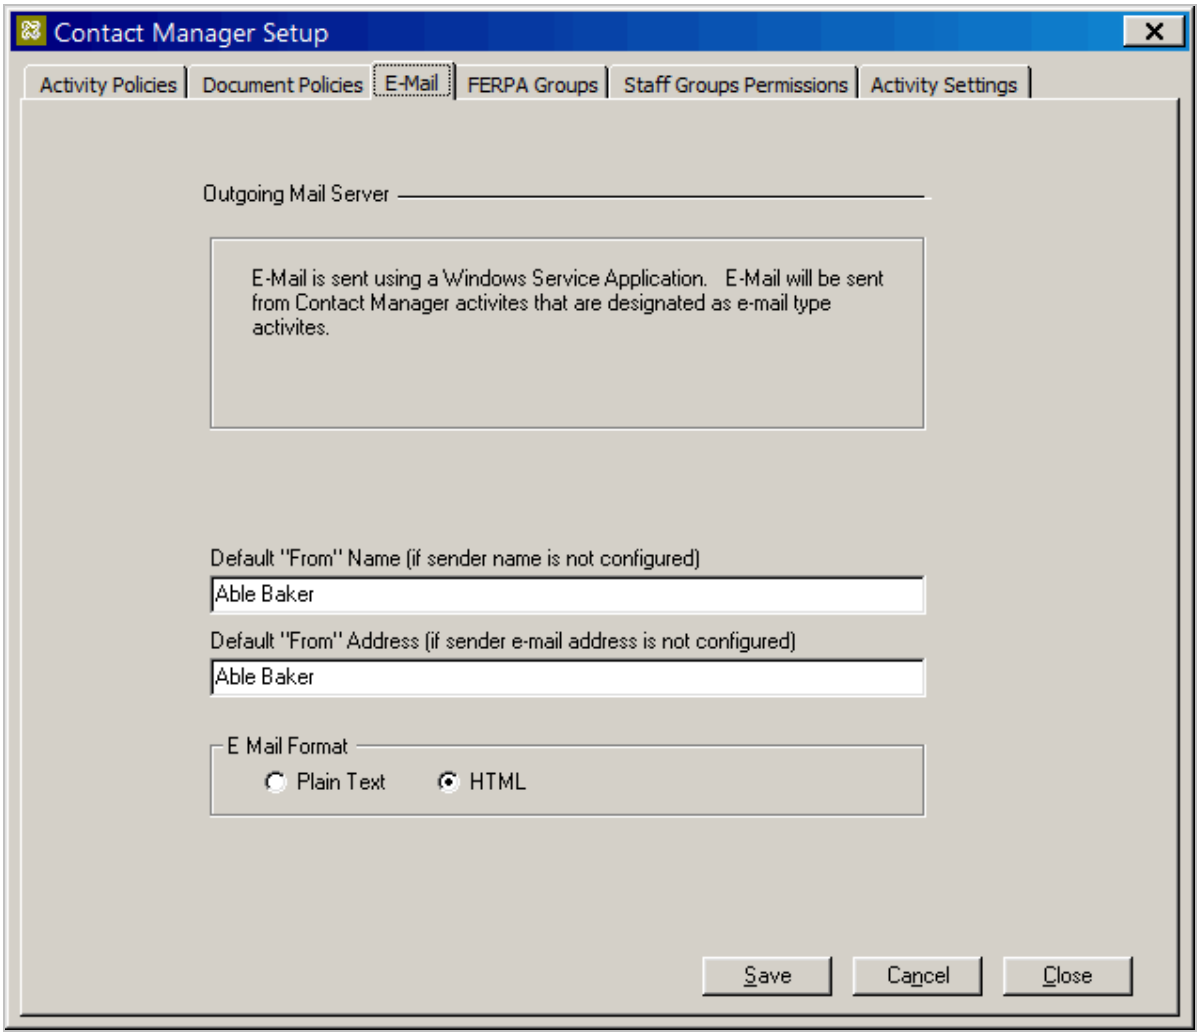
Contact Manager Setup - E-Mail Tab

Use the E-Mail tab on the Contact Manager Setup form to specify parameters for e-mail messages. After setting up these parameters, you can set up student or staff e-mail activities in Lists > Contact Manager > Activities and set up automatically scheduled activities to trigger e-mail messages.

To set up e-mail:

1. Navigate to **Setup** > **Contact Manager**. The Contact Manager Setup form is displayed.
2. Select the **E-mail** tab. The Outgoing Mail Server field describes how e-mail is sent. The mail server is configurable from the Windows service configuration files to users having the appropriate levels of permission.



3. In the **Default "From" Name** field, specify the name that is displayed in the From field of e-mails received.
4. In the **Default "From" Address** field, specify the e-mail address that is associated with the Default "From" Name.
5. Select an **E-Mail Format**. If you choose to use HTML, you can insert HTML formatting codes. You can even use an external HTML editor to create a message that can be cut and pasted into your student e-mail message.
6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Contact Manager Setup - FERPA Groups Tab

The Family Educational Rights and Privacy Act (FERPA) is a federal law that protects the privacy of student education records. The law applies to all institutions that receive funds under an applicable program of the U.S. Department of Education. FERPA gives eligible students certain rights with respect to their education records.

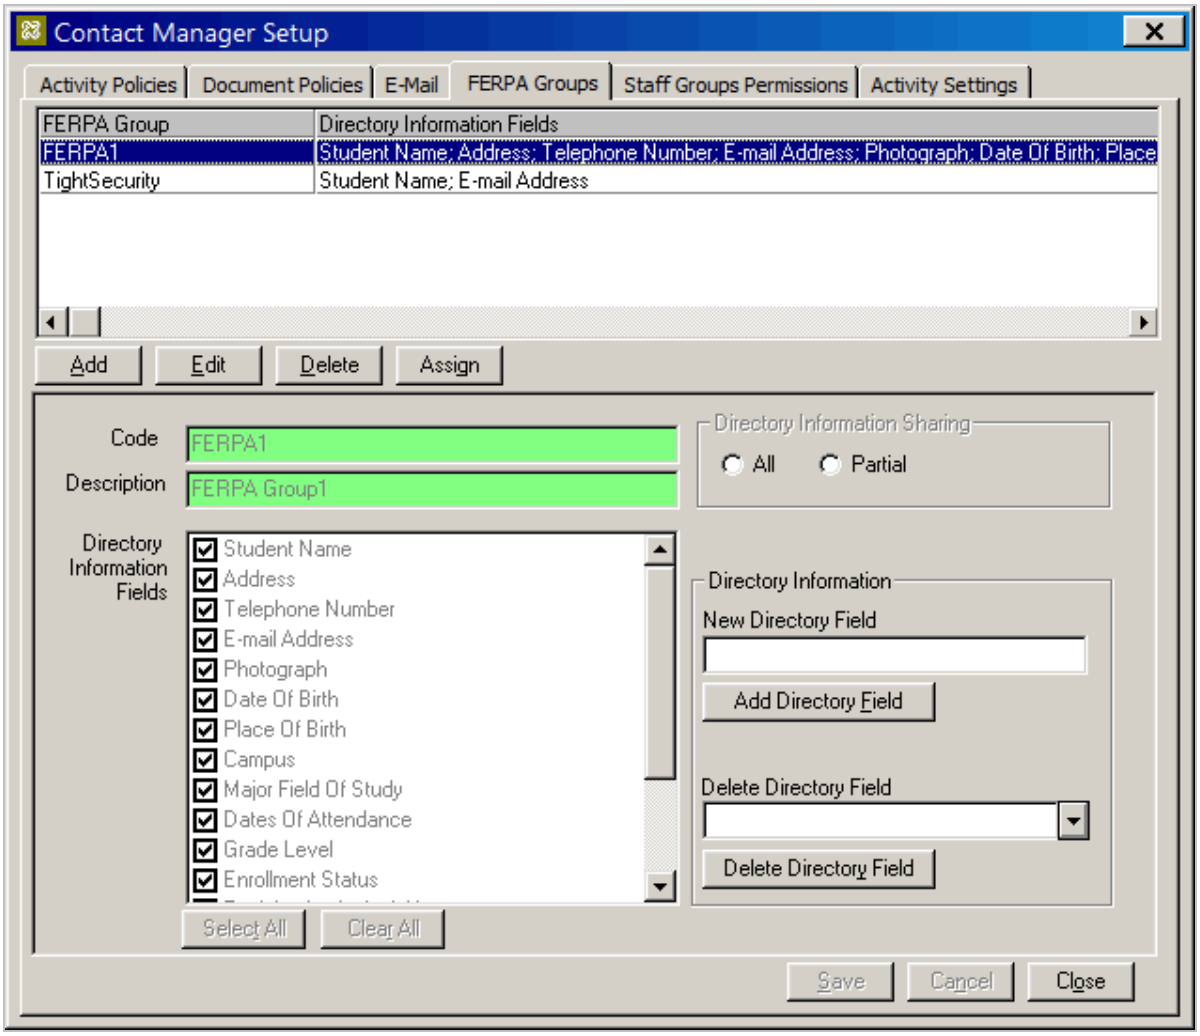
For instance, institutions are required to notify students annually of specific directory information – such as student name, address, telephone number, email address, etc. – that can be disclosed to individuals outside of institution employees or designees. Institutions must give students a reasonable amount of time to opt out of this disclosure. Unless students opt out, institutions may disclose this directory information without the students' consent; if students opt out of disclosure, the institution must obtain consent from the students before releasing the information.

CampusNexus Student enables you to perform the following tasks:

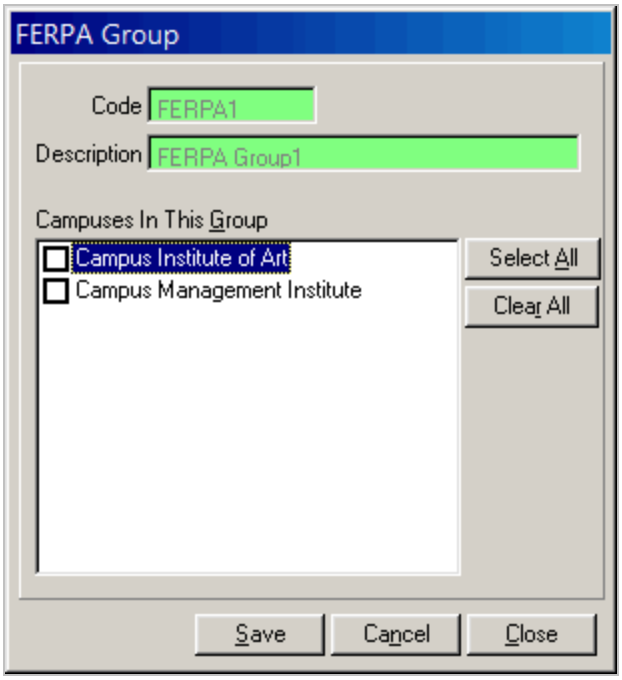
- Create FERPA directory information groups and assign them to campuses. See Campus Allow.
- Notify students when their FERPA information is changed.
- Configure release permissions and designations for student FERPA directory information and academic Information.
- Generate the FERPA Opt-out report.
- Allow students to view the FERPA directory information and academic Information.

To create a FERPA directory group:

1. Navigate to **Setup > Contact Manager > FERPA Groups** (tab).



2. Specify a unique **Code**.
3. Enter a **Description**.
4. Select the **Directory Information** fields to configure the release permissions and designations for your institution.
5. Click **Save**. Your fields selections are saved as a group that can be assigned to individual campuses.
6. Click **Assign**. The FERPA Group form is displayed.



7. Select the **Campuses** that you want to associate with your FERPA Group.

   When your FERPA group is assigned to campuses, site administrators can configure by campus whether CampusNexus Student prompts the user with the student document form after changing FERPA information. For this to occur, you must select **Yes** in the FERPA Document? field on the System Settings > General tab. If you select Yes, all changes to FERPA designations for students, both directory and academic, cause a document form to be displayed.

8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When you edit a campus, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.

Contact Manager Setup - Staff Group Permissions Tab

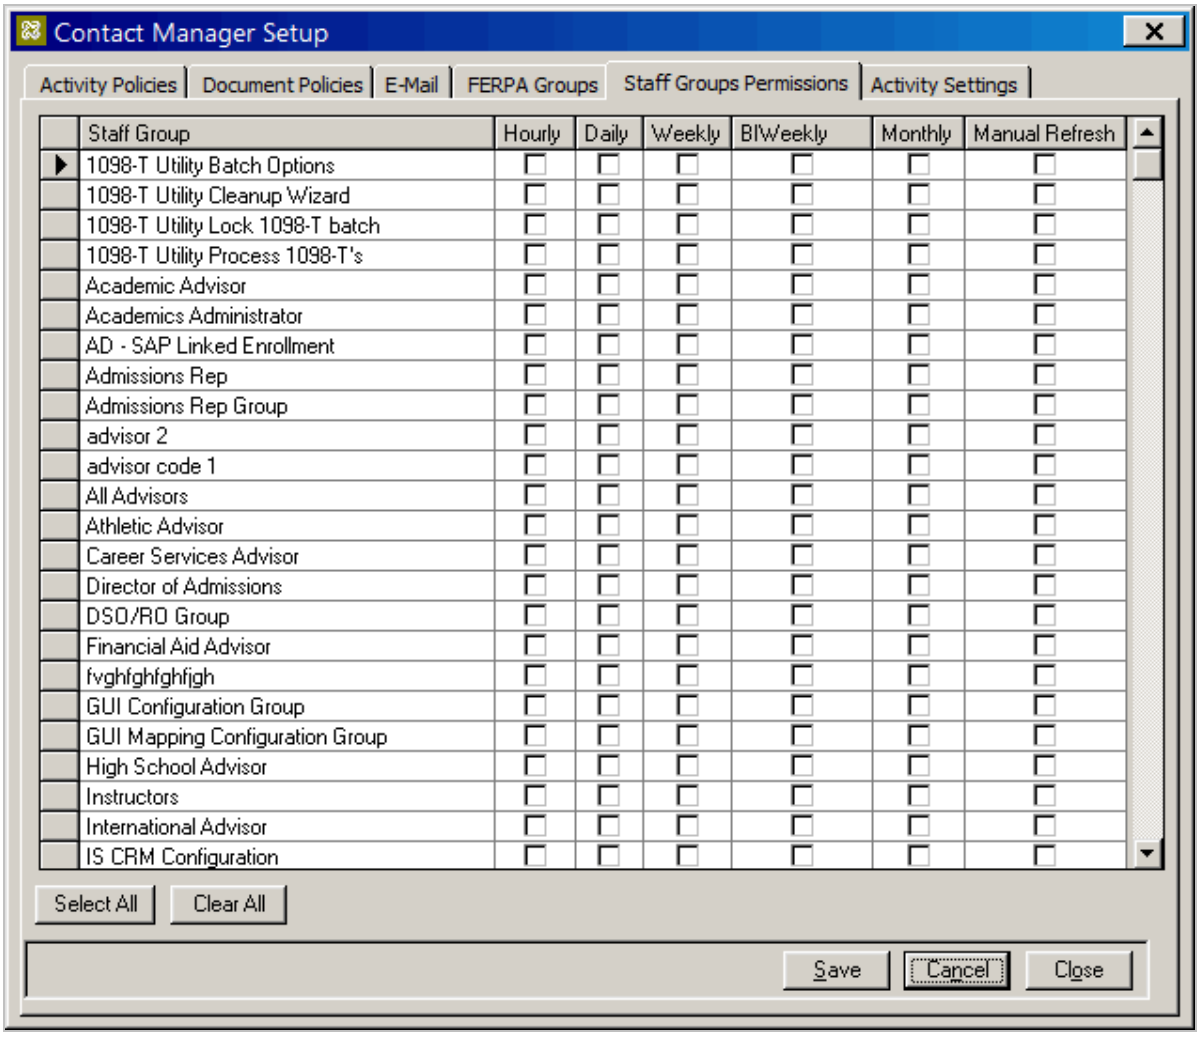
A Contact Manager security policy is assigned (applied) to a staff member. It gives the staff member privileges to assign (or not assign) activities to others, to read activities assigned to others, to edit activities assigned to others, and to close activities assigned to others. The "other" staff members referred to here are members of staff groups.

A staff member can always add, edit, and close activities assigned to him/herself. (Assuming the staff member is granted access to Contact Manager by the security feature of CampusNexus Student.)

There are two avenues to assign Contact Manager security policies to individual members of the school staff. One is via the Contact Manager Tab on the Staff Member Setup form. The other is via the Contact Manager Setup form which is described here.

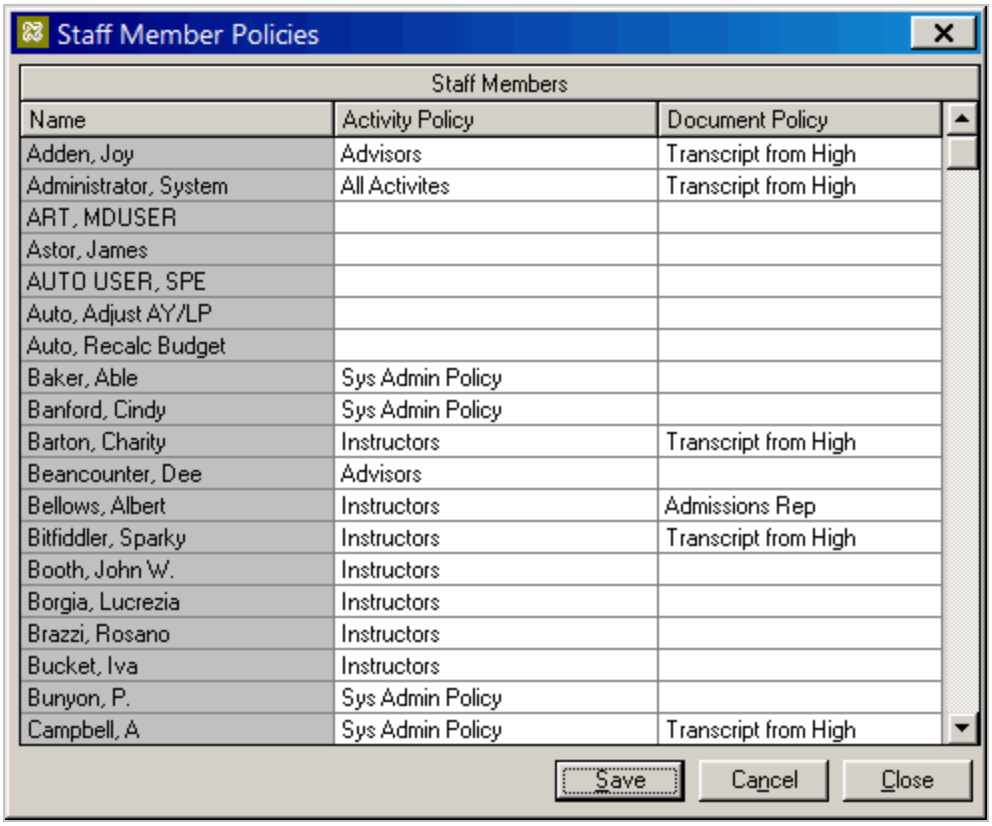
To assign a Contact Manager Security policy to a staff member:

1. Navigate to **Setup** > **Contact Manager**.The Contact Manager Setup form is displayed.
2. Select the **Staff Groups Permissions** tab.



3. See Allow Dynamic Group settings.
4. Click the **Staff** button on the Activity Policies tab or Document Policies tab. The Staff Member Policies form is

displayed.



5. Select the **Staff Member** to whom you want to assign a Contact Manager security policy.
6. To assign or re-assign a staff member to and Activity Policy or a Document Policy, click inside a cell of the appropriate column. An arrow indicating a drop-down list is displayed. Click the arrow and select an option.
7. Select other staff members and policies as required.
8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

After you select the policies to be assigned to staff members, the staff members must log out of CampusNexus Student and log in again to see the effect of the policy assignments.

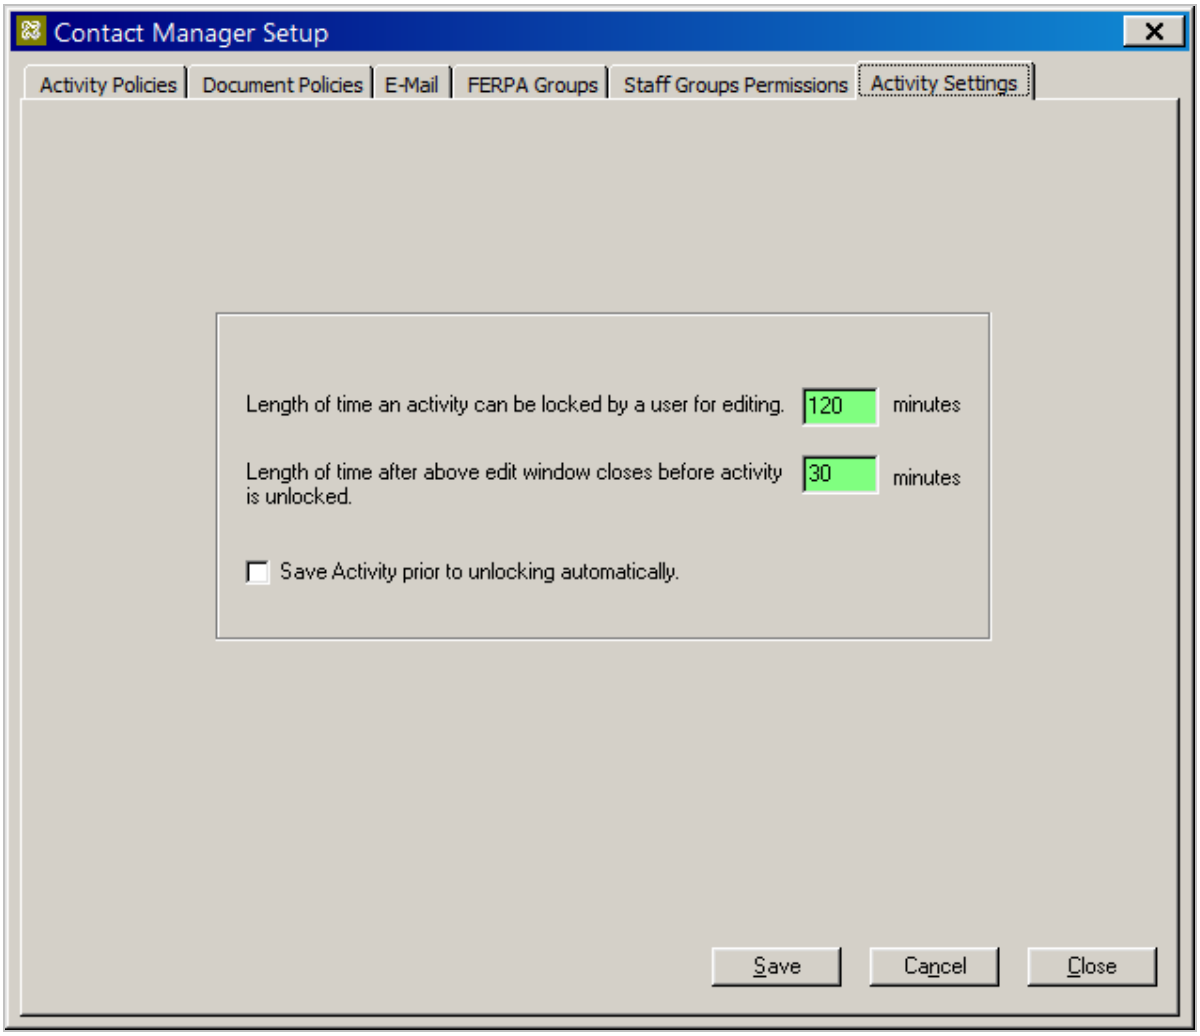
Contact Manager Setup - Activity Settings Tab

Activity Settings in Contact Manager Setup determine how CampusNexus Student handles users who have opened an activity for editing but have not completed editing for a lengthy period of time. Since activity records that are being edited are locked and unavailable to other users, it is necessary to unlock records after they have been open for a while.

The settings on this form determine how long an activity may be open (locked) before a warning message is displayed, before the activity is closed (unlocked) by the system, and whether any edits the staff member had performed are saved when the activity is closed by the system.

To change the Contact Manager Activity Settings:

1. Navigate to **Setup > Contact Manager**. The Contact Manager Setup form is displayed.
2. Select the **Activity Settings** tab.



3. The **Length of time an activity can be locked by a user for editing** determines the length of time an activity may be locked before a message is displayed warning that the activity has been open for a lengthy period of time. This message has a 'Continue' button that the staff member editing the message may click to indicate that he or she is

still working with the activity. If the 'Continue' button is clicked, the activity may continue to be edited for another time period equal to the defined setting. The default setting is 120 minutes.

4. The **Length of time after the above edit window closes before activity is unlocked** setting determines the length of time between the warning message being displayed and CampusNexus Student terminating the activity. When CampusNexus Student ends the activity, the record is unlocked. The default setting is 30 minutes.
5. If **Save Activity prior to unlocking automatically** is selected, CampusNexus Student saves the contents of the form on the staff member's computer before closing the record.
6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup > Admissions

When you navigate to Setup > Admissions, the Admissions Settings form is displayed. The form contains the following tabs:

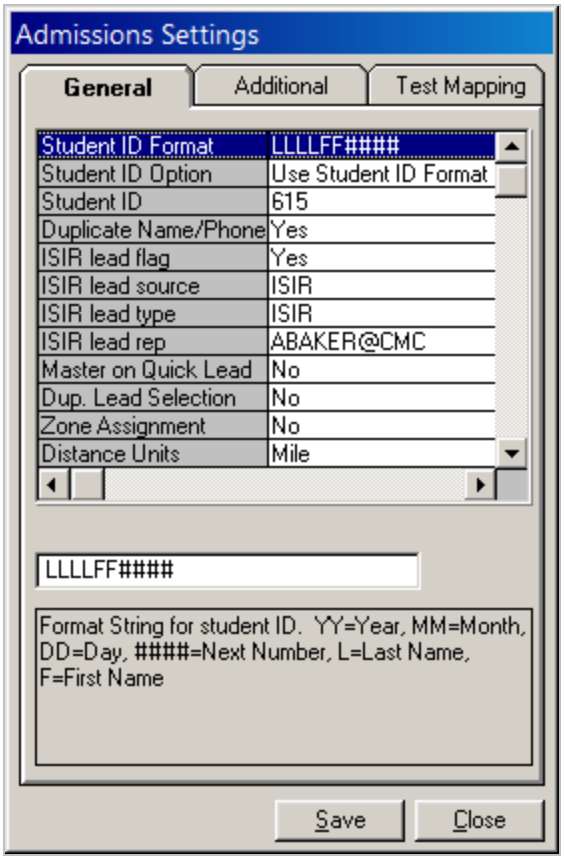
- General
- Additional
- Test Mapping

Admissions - General Tab

Use the General tab of the Admissions Settings form to specify various settings related to admissions, e.g., the formatting of your student identification number, options related to imported ISIRs, options related to imported Entrance Tests, and so on.

To configure general admissions settings:

1. Navigate to **Setup > Admissions**. The Admissions Settings form is displayed.



2. Select the **General** tab and complete the fields as appropriate. See Field Descriptions.
3. Click **Save**.
4. Click **Close** to close the form.

Field Descriptions

Field	Description
Student ID Format	Set up a format for your institution's Student ID. The ID is displayed on the Student Master form and in the Recent Students list at the top of the main window. • If you select 'Use Student ID Format' in the Student ID Option field, compose your format in the text box below the option window. *Examples*: ◦ LL = first two letters of the student's last name ◦ F = first letter of the student's first name ◦ YY = last two digits of the lead entry year ◦ MM = month of the lead entry ◦ DD = day of lead entry ◦ #### = last four digits of the system-generated sequential number • If you choose the 'Sequential Number' option, enter a value to be incremented for the next sequential number to be assigned to a student.
Student ID Option	Choose one of the following options for your institution's Student ID: • **Sequential Number**. CampusNexus Student maintains a sequential number which is assigned to each new lead when it is entered. This number is never duplicated and can be used as a unique ID for a student. • **Use Student ID Format**. Select a combination of characters from the student's name, the date that the lead was created, and the sequential number to form a student ID. For example, a format of YYMM###### includes the year and month that the lead was created and six digits of the sequential number. • **Do Not Generate**. This option implies that the institution keeps track of student IDs manually (IDs are entered on the Student Master form for new leads. CampusNexus Student does not allow a duplicate ID to be assigned to a student. (CampusNexus Student maintains an internal identifier for each new lead to insure that lead records are unique. Users rarely, if ever, see the internal lead/student identifier.)
Student ID	This field displays the next available Student ID.
Duplicate Name or Phone	If you select **Yes**, CampusNexus Student checks for duplicate entry of leads immediately after you enter a lead name and telephone number. If you select **No**, CampusNexus Student waits until you save the lead entry form to check for duplicates.
ISIR Lead Flag	If you select **Yes**, CampusNexus Student creates a new lead/student master record for any ISIR imported by CampusNexus Student that does not match an existing student record. The lead's Social Security Number (SSN) is used as the matching criteria. If you select **No**, data from unmatched ISIRs is ignored and the other three ISIR-related options below have no affect on the system.

Field	Description
ISIR Lead Source	Select a lead source to be assigned to leads entered from imported ISIRs. (Set up a special lead category and lead source for this purpose.) If the ISIR Lead Flag is set to Yes, this lead source is entered in the new Student Master record. If the ISIR Lead Flag is set to No, this option has no affect on the system.
ISIR Lead Type	Select a lead type to be assigned to leads entered from imported ISIRs. (Set up a special lead type for this purpose.) If the ISIR Lead Flag is set to Yes, this lead type is entered in the new Student Master record. If the ISIR Lead Flag is set to No, this option has no affect on the system.
ISIR Lead Rep	Select an admissions rep to be assigned to leads entered from imported ISIRs. If the ISIR Lead Flag is set to Yes, this admissions rep is entered in the new Student Master record. If the ISIR Lead Flag is set to No, this option has no affect on the system.
Master on Quick Lead	This is option controls whether the Student Master is displayed after saving a new quick lead. If you select **Yes**, the check box to open the Student Master after clicking Save on the quick lead form is selected. If you select **No**, the check box is not selected.
Dup. Lead Selection	This option controls whether admissions staff can select a duplicate lead/student record from other campuses while entering a lead. If you select **No**, the rep can select duplicates only from campuses to which the rep has access. If you select **Yes**, the rep can select duplicates from any campus in the database.
Zone Assignment	This option controls whether the combo box to assign zones based on the student's address ZIP code or campus ZIP code is displayed on the Inquiry or Applicant forms and on the user's customizable toolbar.
Distance Units	Select the base unit used in calculating distances: **Mile** or **Kilometer**.
Web Account Mode	This option defines how web accounts are managed in Online Applicants Dups. Select **New Account**, **Old Account**, or **Multiple Accounts**.
Create Lead from Test	If this option is set to **Yes**, the Import Test Scores process creates new leads for unmatched records. If this setting is **No** (default), the unmatched records will be left unmatched.
Test Lead Campus	Which campus would you like your new lead test records to be created into? If a student test record does not have a school code defined, this setting uses the campus code defined here as the default campus to create a new lead record.
Test Lead Source	This option defines the Lead Source for all new leads being created from the test import. The default is **.UNK**.
Test Lead Type	This option defines the Lead Type for all new leads being created from the test import.
Test Lead Rep	This option defines the Lead Rep for all new leads being created from the test import. Test Lead Rep should belong to the campus configured under Test Lead Campus. **Note**: Default configurations are blank for all newly added configuration settings for the following settings: Test Lead Campus, Test Lead Type, and Test Lead Rep.

Admissions - Additional Tab - Quick Lead Form Design

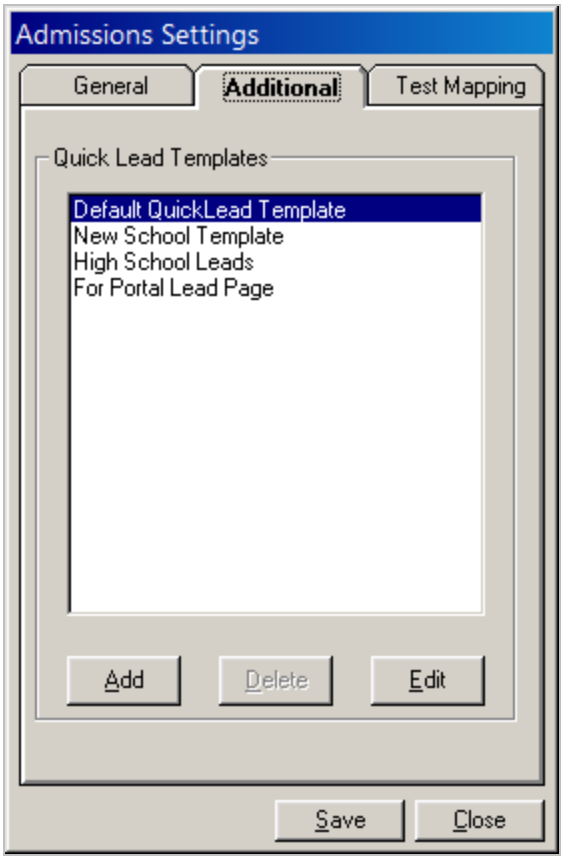
Use the Additional tab of the Admissions Settings form to select a template for the design of your Quick Lead form. Use this feature to design forms that gather the information necessary to quickly enter new leads in CampusNexus Student.

The system administrator can select which fields are to be accepted on the Quick Lead form. Institutions can select the fields from the Student Master and Admissions School-Defined fields lists. The order in which the fields appear on the right selection box is the order that they will be presented on the Quick Lead form. The Quick Lead form can be modified at any time. The changes take effect the next time that the Quick Lead form is opened.

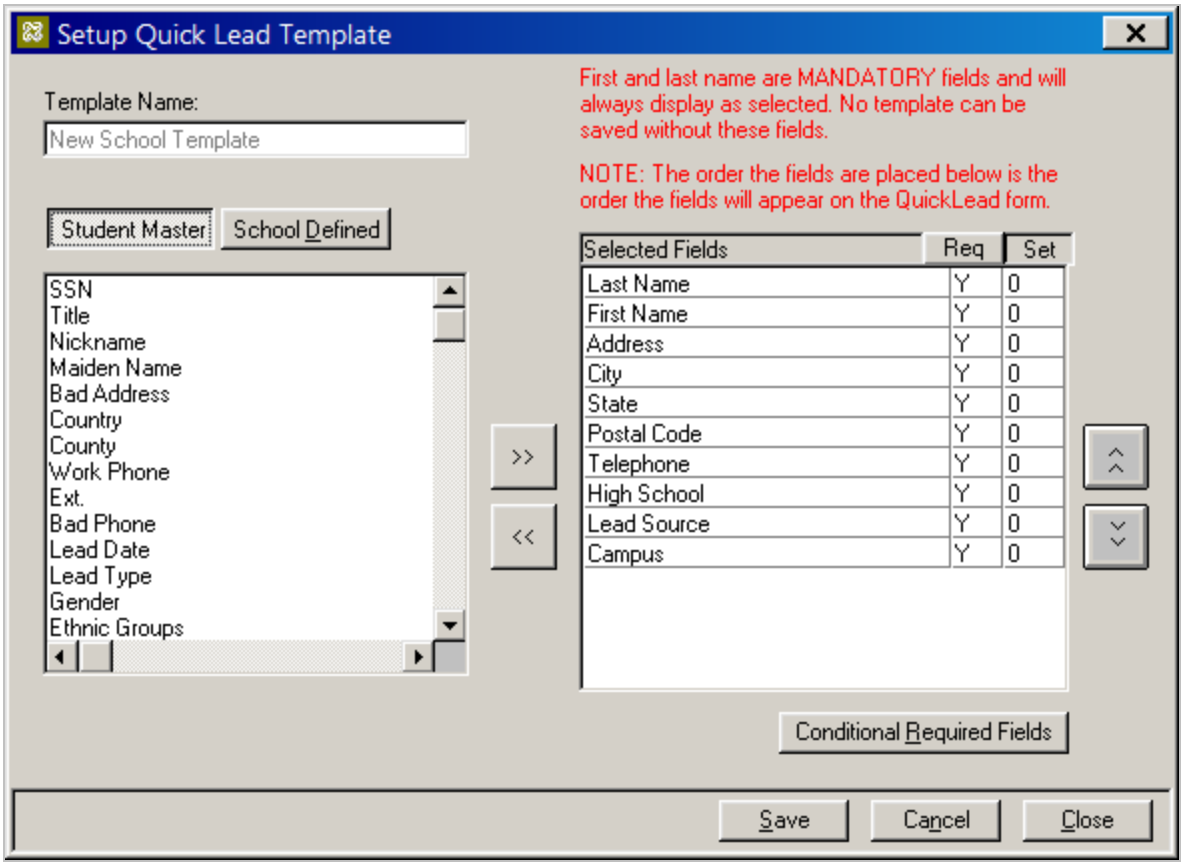
The form load procedure determines whether your institution is accepting international students when loading available fields from the student master record. If so, CampusNexus Student also loads the appropriate SEVIS data fields.

To configure additional admissions settings:

1. Navigate to **Setup** > **Admissions**. The Admissions Settings form is displayed.
2. Select the **Additional** tab. This tab displays a list of Quick Lead Templates. The Admissions department can select from these lead entry forms when entering different types of new leads.



3. Click **Add** to add a new form design to the list, or select an existing form design and click **Edit** to view or change the details. The Setup Quick Lead Template form is displayed.



4. The panel on the left displays a list of fields that can be added to your quick lead form. Click **Student Master** or **School-Defined** above the left panel to change the list of student data fields from Student mater to School-Define or vice versa.

5. Select fields to appear on the quick lead form by clicking on a field name and then clicking >> in the middle of the dialog box. The selected field name is moved to the right-hand panel.

   Deselect a field by clicking the field name in the right-hand panel and then clicking << in the middle of the dialog box. The selected field name is moved to the left-hand panel.

6. Order the selected fields in the right-hand panel by selecting a field and clicking the up or down buttons to the right of the panel. The order of the fields on the list is the order in which they are displayed on the quick lead form.

   Notes:

   - If you place the Postal Code field above the City and State fields, CampusNexus Student searches the table and inserts the correct city and state when a user enters a postal code (U.S. postal codes only).
   - The layout of the Request Information page in Portal follows the layout of the Quick Lead form in CampusNexus Student. Portal allows the values of the labels for the City, State, ZIP Code, and Social Insurance Number to be customized to based on the value in the Country field. The label values may be formatted for US-English or Canadian English. For example, the label 'State' changes to 'Province' when Canada is selected. We strongly recommend that the Country field be moved to the top of the template so

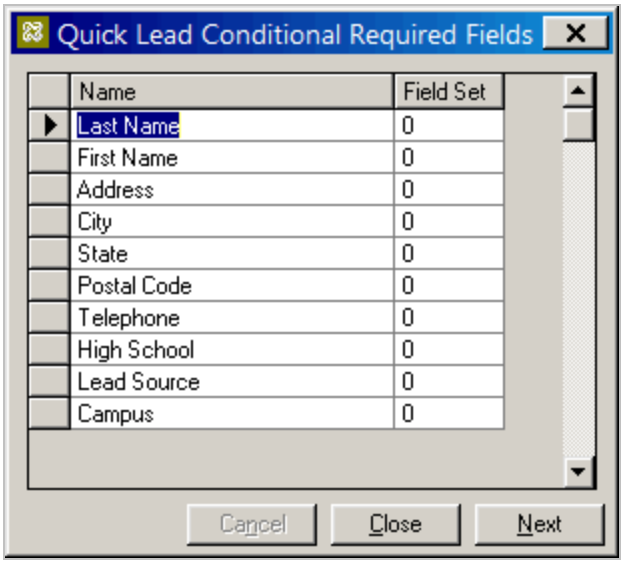
that the visual presentation of Canadian culture is consistent through all areas of Portal. When Canada is entered by a student using the Portal Request Information page, the remainder of the labels on the page are reformatted with Canadian nomenclature. Other country cultures will be implemented in future releases. Currently, they will use a default of US.

7. Select N or Y in the **Req** (required) column to indicate whether the data entry person is required to type information in the designated field.

   Note: Fields that are required on the quick lead form are not necessarily the same as those that are required on the Student Master form. Fields may also be required if they are so designated in the Data Dictionary.

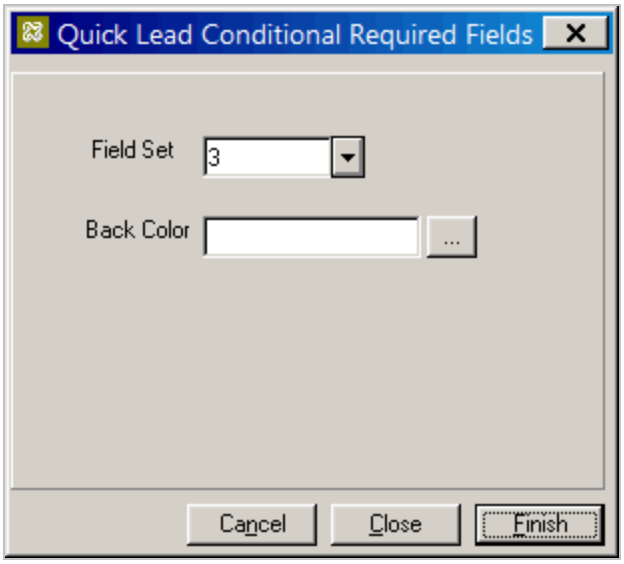
8. The **Set** column is related to the Conditional Required Fields button. It shows the fields (if any) that belong to one or more sets of conditional fields.

   Click **Conditional Required Fields** to designate sets of fields in which one data entry is sufficient for each set. CampusNexus Student displays a form similar to this one. This form displays a grid of all the fields where the **required column is set to yes**.



9. Specify **Field Set** numbers (0 - 99) to indicate which fields are part of each set. Zero in the Field Set column indicates that the field is not part of a set. Multiple sets can be defined.

   Click **Next**. Each Field Set number defined is listed on the second page.



10. For each number, click ... to select the back-ground color for the fields in the set. This background color helps to identify which fields are part of the set.

    After selecting a background color for the set, click **OK** to close the color selection form.

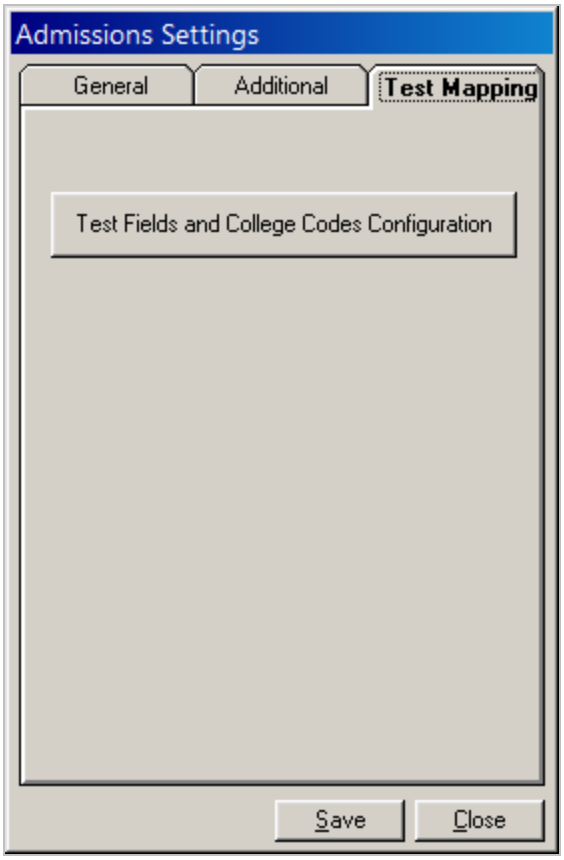
11. Click **Finish** to close the Conditional Required Fields form. The Selected Fields list is refreshed to show the Field Set numbers. The Field Set background colors are saved when you click Save on the Quick Lead Setup Form.
12. Click **Save**. Your Quick Lead Form design is saved.
13. Click **Close** to close the form.
14. Click **Save** and **Close** to close the Admissions Settings form.

Admissions - Test Mapping Tab

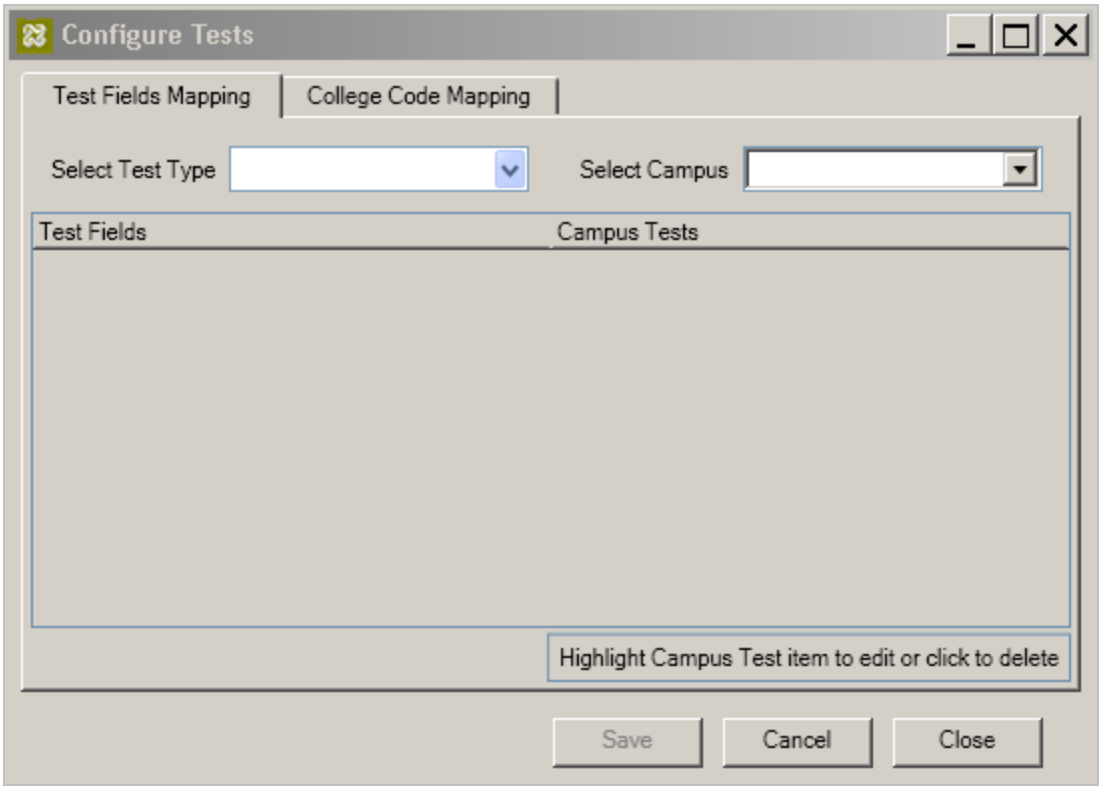
Use the Test Mapping tab of the Admissions Settings form to configure Test Fields and College Code on a campus level. The campus is determined by matching the specified tests and college code in the test import file to the campus where that code is specified as the default college code.

To configure the test mapping settings:

1. Navigate to **Setup** > **Admissions**. The Admissions Settings form is displayed.
2. Select the **Test Mapping** tab.



3. Click the **Test Fields and College Codes Configuration** button. The Configure Tests form is displayed.



4. On the Test Fields Mapping tab, select test types and campuses.

    a. In the **Select Test Type** field, select the test types to be imported into CampusNexus Student. Currently, CampusNexus Student supports the importing of the following entrance tests:

    SAT - (Scholastic Aptitude Test) - is a standardized test for college admissions in the United States.

    ACT - (American College Test) - a college entrance exam in the United States.

    CAAP - (Collegiate Assessment of Academic Proficiency) - is the standardized, nationally named assessment program from ACT that enables postsecondary institutions to assess, evaluate, and enhance the outcomes of their general education programs.

    COMPASS - (Computer-Adaptive Placement Assessment and Support System) - is a comprehensive software package developed by ACT to help postsecondary institutions to place students into appropriate course levels.

    b. In the **Select Campus** field, select the campus to map the Campus Tests to actual Test Fields at the campus level.

    Note: One test type can be configured differently for multiple campuses; however, only one campus can use one configuration per test type.

5. After the Test Type and Campus options are selected, the test fields related to the selected test type are displayed in the first column of the Test Fields grid. In the second column, **select the campus tests for each Test Field**. For each field, the drop-down of the Campus Tests column contains all campus tests related to the campus selected in the Select Campus field.

    Note: You cannot map any one campus test with two test fields.

You can select a campus test other than the default. You can also delete the campus test. Test fields without a matching campus test result in the tests not being imported during the Import Test Scores process.

6. On the College Code Mapping tab, **select test types for college code mapping**. The list of test types only displays the entrance tests types that can be imported into CampusNexus Student.

   After the test type is selected from the Select Test Type drop-down field, a row is displayed in a grid under the College Code and Campus fields.

   a. Double-click the row in the grid under the College Code column. Use this option to enter a new college code manually. You can enter a college code and select a campus in the Campus column to map the college code to the campus.

      To modify a College Code or Campus, double-click on the row within the grid.

      To delete a College Code or Campus, use the Delete key on your keyboard.

   b. The Campus column allows you to map a campus to a College Code. You can configure multiple college codes for one campus, but only one campus for a specific college code.

Setup > Financial Aid

When you navigate to Setup > Financial Aid, the Financial Aid - Settings form is displayed. Use this form to configure packaging options for financial aid, detail and summary award letters, receipt notifications, direct loan setup, disbursing of financial aid funds, hold codes, and Clearinghouse processing. The form contains the following tabs:

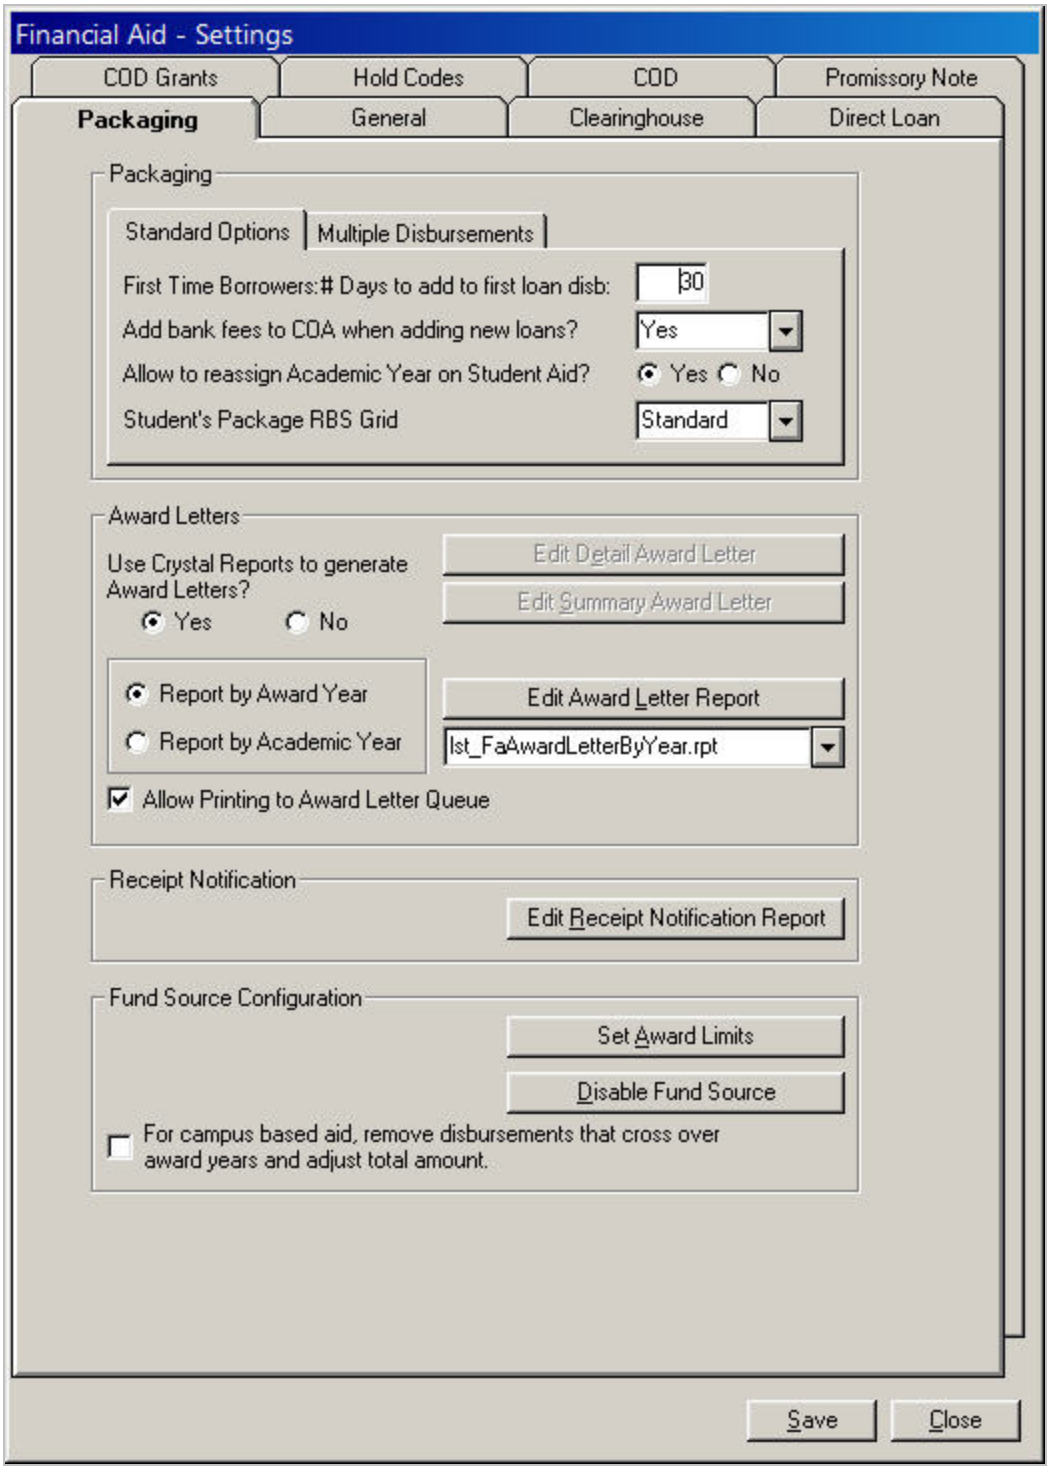
- Packaging
- General
- Clearinghouse
- Direct Loan
- COD Grants
- Hold Codes
- COD
- Promissory Note

Financial Aid Settings - Packaging Tab

Use the Packaging tab of the Financial Aid Settings form to configure various packaging features.

To set up financial aid packaging options:

1. Navigate to **Setup > Financial Aid**. The Financial Aid Settings form displays the **Packaging** tab.



2. Specify appropriate options. For more information, see Field Descriptions.
3. Click **Save**.
4. Click **Close** to close the form.

Field Descriptions

Field	Description
Packaging - Standard Options Subtab	
First Time Borrowers	Specify the number of days to add to the first loan disbursement date for First Time Borrowers. See also Grade Level and First Time Borrowers when enrolling students, packaging, adding academic years, importing ISIRs, and approving disbursements to pay.
Add bank fees to COA when adding new loans?	This flag controls a user prompt and a procedure to add bank fees to the Cost of Attendance (COA) when loans are added in packaging. Select one of the following options: • Yes • No (default) • Prompt User
Allow to reassign Academic Year on Student Aid?	Select **Yes** to allow reassigning financial aid from one academic year to another. Select **No** to prevent reassigning financial aid from one year to another.
Student's Package RBS Grid	Select **Standard** to allow processing Financial Aid packages using the standard Financial Aid Packaging form. Select **Alternate** to use a user-specific Financial Aid Packaging form. For more information, see Packaging.
Multiple Disbursements Subtab	
Exclude Weekends	For more information, see Multiple Disbursement System Settings.
Exclude Holidays	
Use State from ISIR	
Award Letters	

Field	Description
Use Crystal Reports to generate Award Letters?	You can edit award letters in Microsoft Word or Crystal Reports. a. If you select **Yes** to use Crystal Reports, the options **Report By Award Year** (default) and **Report by Academic Year** are enabled. Select one of the options. Click **Edit Award Letter Report** to select an award letter from the list and open Crystal Reports. You must have the Crystal Reports application available on your workstation to edit these award letters. **Note**: The Truth in Lending Statement is a function of the Crystal Reports Award Letter. When a fund source type is Cash or Other, Crystal Reports prints out lending information associated with each specific fund source. Information includes: Annual Percentage Rate, Finance Charge, Amount Financed and Total Payments. b. If you select **No**, the **Edit Detail Award Letter** and**Edit Summary Award Letter** buttons are enabled. When you click either button, CampusNexus Student opens the award letter in Word. When you exit from Word after viewing or editing the letter, you are returned to CampusNexus Student.
Receipt Notification	
Edit Receipt Notification Report	Click this button edit the report produced when financial aid is received for a student. You must have access to Crystal Reports (R) to use this option. For more information, see Notifications of Receipt.
Fund Source Configuration	
For campus based aid, remove disbursements that cross over award years and adjust total amount	Select this option to configure CampusNexus Student to truncate campus-based aid awards during crossover periods.
Set Award Limits	Click this button to establish the maximum allowable award amounts for fund sources. For more information, see Award Year Settings and Fund Source and Campus Financial Aid and Packaging.

Field	Description
Disable Fund Source	Click this button to deactivate a fund source for an award year and campus. The Deactivate Fund Source By Award Year form is displayed.  1. Select the applicable **Award Years**, **Campuses**, and **Fund Source Types**. Click ... beside each field to make multiple selections. 2. Click the **Refresh Fund Sources** button. A list of fund sources to deactivate is displayed. 3. Select the fund source's **Select** check box or use **Select All** or **Clear All** to select all or clear all fund sources listed. 4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

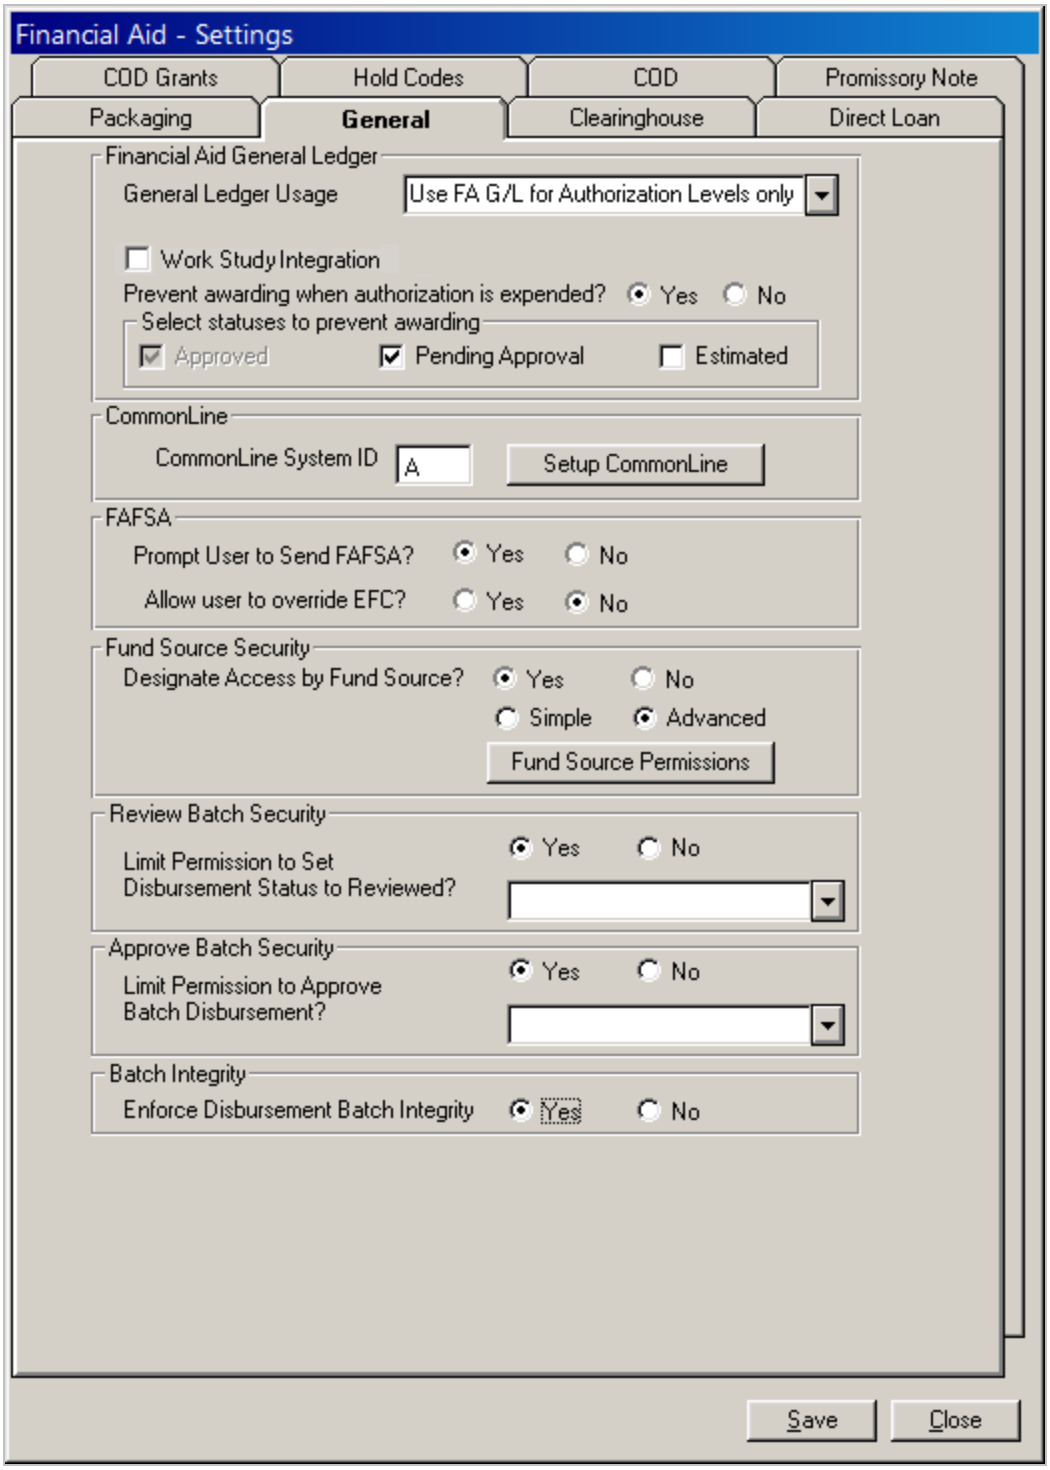
Financial Aid Settings - General Tab

Note: Please access Regulatory Help for the latest content about FAFSA, ISIR, and COD processing.

Use the General tab of the Financial Aid (FA) Settings form to specify the General Ledger (G/L) usage, FAFSA settings, fund source permissions, batch permissions, and CampusVue Finance, HR & Payroll settings for work study integration.

To set up general financial aid options:

1. Navigate to **Setup > Financial Aid**. Select the **General** (tab).



2. Specify appropriate options. For more information, see Field Descriptions.
3. If CampusVue Finance, HR & Payroll is installed, select applicable CampusVue Finance, HR & Payroll Work

Study Integration options.

4. Click **Save**.
5. Click **Close** to close the form.

Field Descriptions

Field	Description
Financial Aid General Ledger	
General Ledger Usage	Select the level of general ledger (G/L) integration for your system. The options are: • Use All FA G/L Functions • Use FA G/L for Authorization Levels Only
Campus Vantage Work Study Integration - OR - Work Study Integration	This check box is displayed only when CampusNexus Student is integrated with an accounting system. • If the accounting system is CampusVue Finance, HR & Payroll, the check box is labeled "Campus Vantage Work Study Integration". • If the accounting system is CampusNexus Finance, HR & Payroll, the check box is labeled "Work Study Integration". Select the check box to activate the Work Study Integration option. If the check box is selected for CampusNexus Finance, HR & Payroll, the *Add Payment* and *Delete Payment* buttons on the Work Study Payment form are disabled. If the check box is cleared (default), the Work Study integration is stopped, no records of work study awards are exchanged between CampusNexus Finance, HR & Payroll and CampusNexus Student, and the *Add Payment* and *Delete Payment* buttons on the Work Study Payment form are enabled. For more information, see CampusVantage_Work_Study_Integration.
Prevent awarding when authorization is expended?	Select **Yes** to prevent users from awarding funds from Title IV sources when the institution's authorized amount has been expended and select appropriate statuses to prevent the awarding of Title IV funds. Valid statuses are: • Approved (read-only) • Pending Approval • Estimated Based on the value of the check boxes, the *Packaged* amount for fund sources will be adjusted when awards are made with *Estimated* and *Approved* statuses. In earlier versions of CampusNexus Student, only awards with an *Approved* status affected this amount. New business rules consider both the *Estimated* and *Pending Approval* statuses.
FAFSA	

Field	Description
Prompt User to Send FAFSA	Select **Yes** to see a reminder to send the FAFSA each time it is saved. The default is No. **Note**: In Regulatory 9.0 and later, the user is no longer prompted to send the FAFSA when Yes is selected for this option. The FAFSA export functionality was deprecated because the Department of Education's FAFSA on the Web has become the recommended method of submitting application data. Use one of the following methods to submit application data: 1. Students can complete an application online at https://fafsa.gov/ and send it directly to the Central Processing System (CPS) - this is the Department's recommended method. 2. Financial Aid Administrators can submit a student's application data using FAA Access to CPS Online at https://faaaccess.ed.gov. 3. Students can print the FAFSA PDF and fill it out by hand, or they can type their data on the PDF before printing and mailing it. 4. Students who have limited or no Internet access can choose to complete and submit their application by calling 1-800-433-3243.
Allow user to override EFC?	Select **Yes** if you want the FAFSA calculation to prompt you to store the recalculated Expected Family Contribution (EFC) value. The default is No. The **Recalculated EFC** field allows you to enter an EFC value to be used in the remaining balance to schedule and auto-packaging functions. The Recalculated EFC is incorporated in several reports when the value of the setup flag is not NULL. In earlier versions of CampusNexus Student you were required to submit an ISIR correction to change an EFC. Some situations resulted in a need to change the EFC without requesting a new ISIR.
Fund Source Security	
Designated Access by Fund Source?	Select **Yes** if you want to set up permissions for each fund source.
Fund Source Permissions	Select **Simple** or **Advanced** and click Fund Source Permissions to set up permissions for each fund source.
Review Batch Security	
Limit Permission to Set Disbursement Status to Reviewed?	Select **Yes** to select a staff function that is given the corresponding permission.
Approve Batch Security	
Limit Permission to Approve Batch Disbursements?	Select **Yes** to select a staff function that is given the corresponding permission.
Batch Integrity	
Enforce Disbursement Batch Integrity	Select **Yes** to allow financial aid officers to move successful disbursement approvals to Student Accounts without sacrificing batch integrity and force reports to display the parent batch ID number when separate batches are created from a parent batch. The default is No.

CampusVue Finance, HR & Payroll Work Study Integration

Clients using CampusVue Finance, HR & Payroll may enter time cards in CampusVue Finance, HR & Payroll for students on Work Study if the Work Study integration feature selected. Once the time cards are entered, the information is fed into CampusVue Finance, HR & Payroll's payroll application, the funds are disbursed through the payroll system, and the disbursement is recorded in CampusNexus Student. This feature eliminates the need for CampusNexus Student users to enter gross amounts and hours to record Work Study hours performed by students to ensure the students do not work over the approved amount.

In CampusNexus Student, when Work Study is packaged with a status of *Approved*, the award amount and basic student information create a Work Study Document in the Document Approval Queue for payroll staff. If adjustments or cancellations occur on an existing Work Study award, the net change from the previous approved award amount is sent to CampusVue Finance, HR & Payroll.

The transactions sent to CampusVue Finance, HR & Payroll create documents that must be approved by payroll staff. Payroll staff sets up the student employee's personal information, including a Work Study Pay Type before being allowed to link the document to the new student employee and approve the document.

In CampusVue Finance, HR & Payroll, when time cards are entered, a drop-down list contains the possible Work Study awards associated with the student employee. CampusVue Finance, HR & Payroll verifies that the Work Study award is approved, and that the amount of the time card summed with any previous disbursements does not exceed the award amount before a time card can be entered or approved. This prevents disbursements from being sent to the payroll system if the student's award status has changed.

When time cards are approved in CampusVue Finance, HR & Payroll, records are created reflecting the date and hours the student worked and the gross amount for that approved time card. The amount disbursed is not updated until the payroll process has run.

On CampusNexus Student's Financial Aid Work Study form, if CampusVue Finance, HR & Payroll is installed, Work Study integration is turned on, and the Financial Aid Disbursement Check Number is blank, a message displays *Advisory: Time card is entered in payroll, but not yet paid.*

When the payroll process is run, CampusVue Finance, HR & Payroll records the disbursement check number and date, and amount disbursed to reflect the paid time cards. CampusVue Finance, HR & Payroll validates that the gross paycheck amount equals the sum of the financial aid disbursements records' gross amounts associated with the paycheck.

The Work Study award may ***not*** be deleted, however, it may be adjusted or canceled. In CampusNexus Student's Financial Aid Package form, if you attempt to delete a Work Study award, the following message is displayed: *This Work Study Award has been sent to Payroll and can not be deleted. You may adjust or cancel the record.*

If you attempt to cancel a Work Study award that is already associated with a disbursements, a message states that the award can only be *adjusted* down to the sum of the amount of the disbursements with and without check numbers.

If you edit a Work Study Award and click "Add Payment" or "Delete Payment", the Financial Aid Student Work Study form displays the message *Work Study Disbursements are entered via Continue with adding a disbursement?* Click **Yes** to continue adding the payment in CampusNexus Student, or click **No** to allow the payment to be maintained in CampusVue Finance, HR & Payroll.

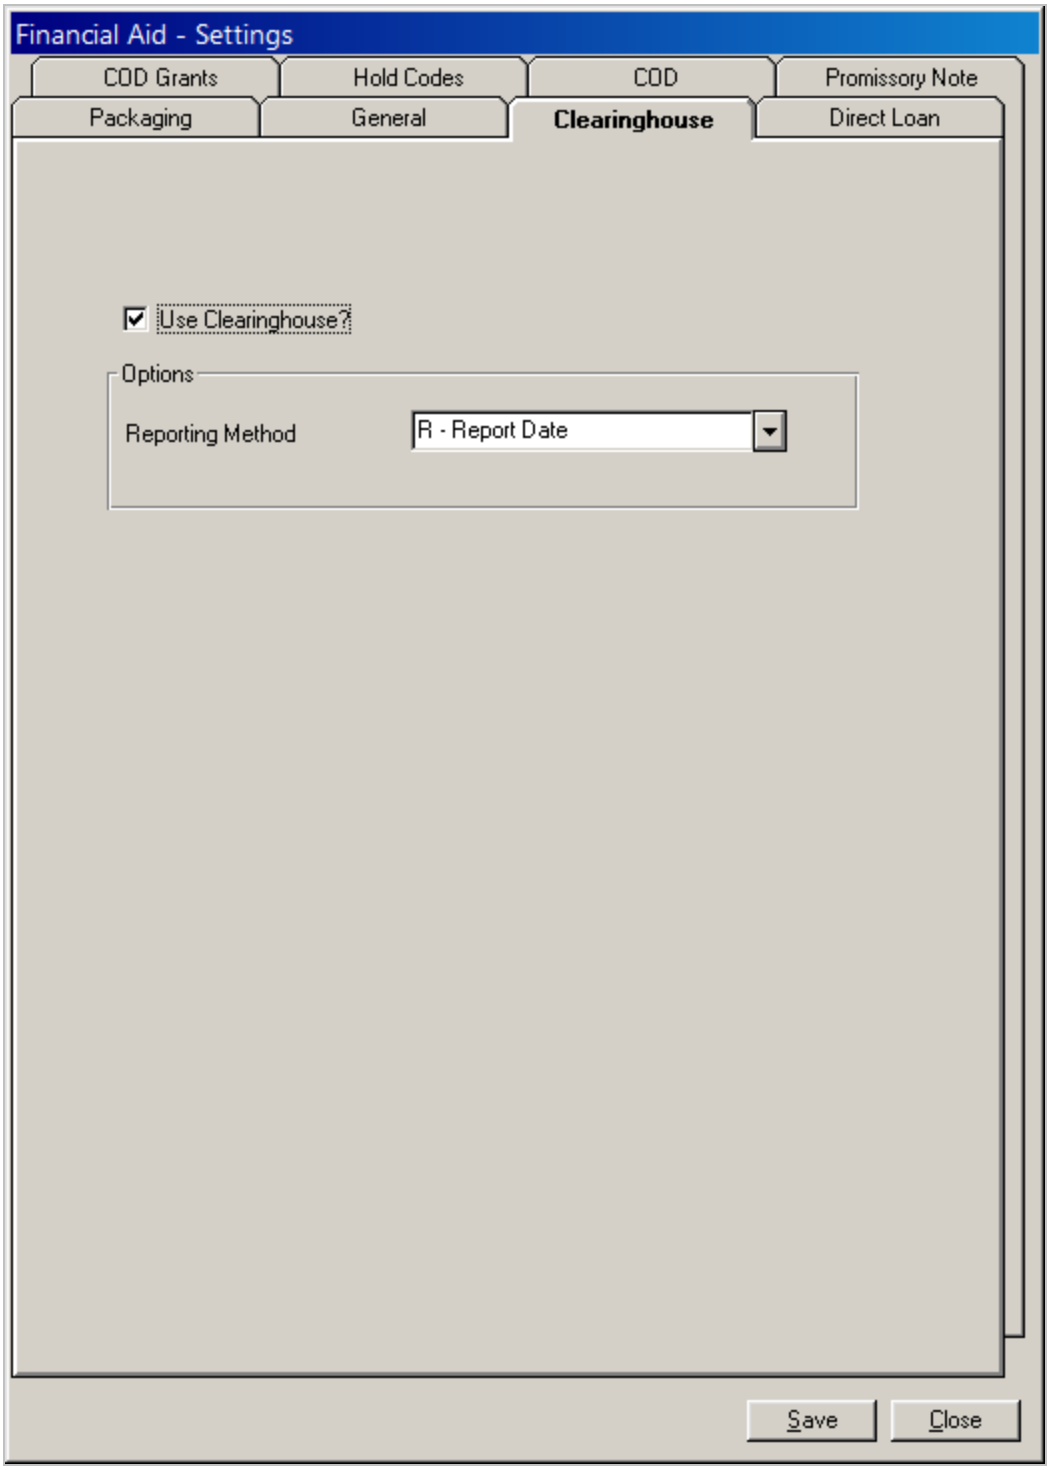
Financial Aid Settings - Clearinghouse Tab

Financial Aid Clearinghouse processing automates reporting, reducing the amount of time and money spent on SSCR records.

Note: Starting July 1, 2014, a new Clearinghouse Export file format was adapted, and the file format produced by using the Clearinghouse menu selection in CampusNexus Student is no longer valid. Please use the Clearinghouse (2014-2015 and later) menu option, and review Regulatory Help for content associated with this new feature. The options on the Clearinghouse tab are campus-specific. The settings are for your default campus. (The campus in which you are working at the time the options are set.) To select these options for multiple campuses, you must change your default campus before making the selections.

To set up financial aid Clearinghouse options:

1. Navigate to **Setup > Financial Aid**. Select the **Clearinghouse** tab.



2. To use the Clearinghouse, select the **Use Clearinghouse?** check box.
3. Select the Reporting Method **R - Report Date**.

Note: The T-Term option is no longer valid for Clearinghouse processing. This selection will be ignored if chosen.

4. Click **Save**.

Financial Aid Settings - Direct Loan Tab

Use this form to provide information required by Common Origination and Disbursement (COD) and CampusNexus Student when processing Direct Loans. In particular, you must indicate whether your institution is participating in the Direct Loan Program via CampusNexus Student.

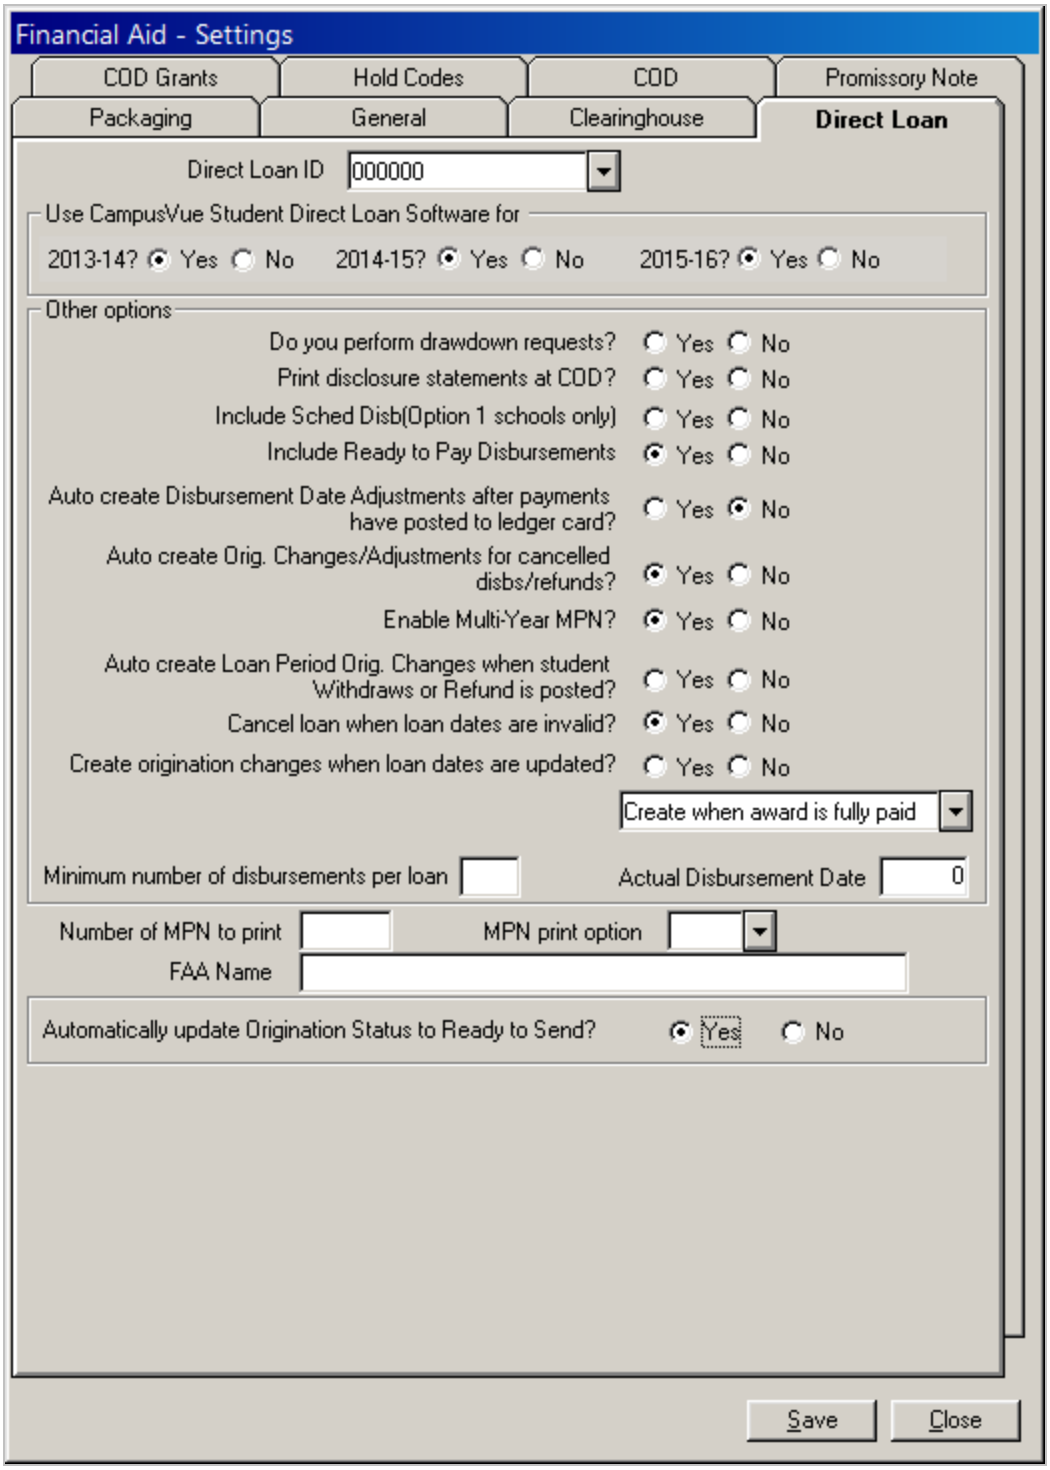
Note: Although not normally considered part of Application Processing, as part of the 2007-2008 Application Processing Update, CampusNexus Student must allow customers to award FFEL and Direct Loans based on the new origination fees defined when the first disbursement date of the disbursement is on or after July 1, 2008 and based on the current origination fees if the first disbursement date is prior to that date.

Fee Percentages per Disbursement Dates

Fee %	Earliest Disbursement Date Range
3.0	Prior to 2007-07-01
2.5	2007-07-01 to 2008-06-30
2.0	2008-07-01 to 2009-06-30
1.5	2009-07-01 to 2010-06-30
1.0	2010-07-01 and forward

To set up direct loan information for a campus:

1. Navigate to **Setup > Financial Aid**. Select the **Direct Loan** tab.



2. Specify appropriate options. For more information, see Field Descriptions.

3. Click **Save**.
4. Click **Close** to close the form.

Field Descriptions

Field	Description
Direct Loan ID	Select the Direct Loan ID to which the settings on this tab apply. If yours is a multi-campus institution, you may have more than one Direct Loan ID. Click here to configure them. If you have more than one Direct Loan ID, be sure to complete this form for *each* ID.
Use CampusNexus Student Direct Loan Software for	Select **Yes** to use the CampusNexus Student features for direct loan management in each award year, otherwise select **No**. If the servicer link is *enabled* by selecting a servicer, RFMS and Direct Loan must be *disabled* for the Direct Loan ID and Reporting Pell ID in the Campus Financial Aid Settings.
Do you perform draw-down requests?	Select **Yes** if your institution uses drawdown requests for direct loans; otherwise select **No**.
Print disclosure state-ments at COD?	Select **Yes** or **No** according to where your disclosure statements are printed.
Include Sched Disb. (Option 1 schools only)	Select **Yes** to include scheduled disbursements in the disbursement export file. If you elect to export scheduled disbursements, CampusNexus Student selects disbursements that are scheduled up to seven (7) days before the disbursement or thirty (30) days after the date of the export.
Include Ready to Pay Disbursements	Select **Yes** if this option is applicable for your institution; otherwise select **No**.

Field	Description
Automatically create Disbursement Date Adjustments after payments have posted to ledger card?	Select **Yes** if you want CampusNexus Student to compare reported direct loan scheduled payment dates received to the CampusNexus Student actual paid dates to assess if there is a difference. If there is a difference, the dates can be corrected to ensure the institution is in compliance with Federal Regulations that specify that the dates must match; otherwise select **No**. This option is only visible when FAA is enabled. Additionally, this option is only visible to users with the appropriate permissions. For Direct Loans, the settings for the Direct Loan tab are applied by the Direct Loan ID. A process validates disbursements that need disbursement date adjustments after payments have been posted to the ledger card. It validates if the disbursement date posted to the ledger card is not equal to the accepted disbursement date at COD. This process validates the dates for Pell, TEACH, and Direct Loans. If the transaction date of the accepted Pell / TEACH/DL disbursement record [fadldisb.transactiondate / fapelldisb.disbursementdate / FaCODGrantDisb.disbdate] does not match the date of the disbursement's ledger card posting date (satrans.date), a disbursement date adjustment record for the transaction is created and queued for export through the COD Export job. In each case above: • Disbursement date adjustment record is created in a status of Ready to Send, that would be sent to COD after the COD Export job ran successfully. • Adjustment record created at a minimum to comply with our current adjustment creation when adjustments are manually created in the Core product. • Adjustment record must comply with our current COD Export / Import formats. CampusNexus Student uses the existing Exception Management framework. CampusNexus Student does not create a new adjustment record if a pending adjustment exists. Instead, a new exception, CODEXPRT0059, is created that states '*Disbursement Date Adjustment Not Created. Disbursement has a pending adjustment. Transmit pending adjustment before continuing*'. The following steps resolve the exception: a. Navigate to **Daily > Automated Processes > Job Management**. b. Select the appropriate **COD Export Job**. c. Select **Run Now**.
Auto create Orig. Changes/Adjustments for canceled disbs/refunds?	Select **Yes** to automatically create origination changes for canceled disbursements and loan amounts when a student is moved to a Permanent Out category; otherwise select **No**.
Enable Multi-Year MPN?	Select **Yes** to enable the multi-year master promissory note (MPN) feature; otherwise select **No**.

Field	Description
Auto create Loan Period Orig Changes when student Withdraws or Refund is posted?	Select **Yes** to automatically create Origination changes for the Loan Period End Date; otherwise select **No**. This setting applies to Direct Loans that have an Origination status of Accepted or Batched to Send. The origination change record is created in the following scenarios: • When a student is moved to a Permanent Out Category after the first payment period and the following disbursements are canceled, an origination change is created to adjust the Loan Period End Date to the end of the payment period that has not been canceled. • When a disbursement after the first payment period is fully refunded, an origination change is created to adjust the Loan Period End Date to the end date of the last earned disbursement. Also, an origination change is created to adjust the award amount to reflect the amount for any refund that is posted.
Cancel loan when loan dates are invalid?	Select **Yes** to allow the Student Pace Evaluation (SPE) tool to cancel a direct loan or any remaining scheduled disbursements of the direct loan: • When the SPE update causes the loan's BBAY start date to be later than the Award Year's end date. - OR - • When the SPE update causes the BBAY end date to be earlier than the Award Year's start date. Otherwise select **No**. CampusNexus Student will also create Origination Changes for the cancellation if the **Auto create Orig. Changes/Adjustments for canceled disbs/refunds?** option is set to Yes. Additionally, you can configure CampusNexus Student to notify a staff member when a direct loan is cancelled or cannot be cancelled by SPE. See Auto Update Alert on the Financial Aid tab of the Campus Information form.

Field	Description
Create origination changes when loan dates are updated?	Select **Yes** if you want CampusNexus Student to automatically create origination change records when any of the following dates are updated for a Direct Loan (DIRSUB, DIRUNSUB, and DIRPLUS) by Academic related activities, such as adding or removing transfer credits, and the Student Pace Evaluation (SPE) tool adjusting the loan dates due to changes on the student's schedule, etc.: • Academic Year (AY) start/end dates • Loan Period (LP) start/end dates • Disbursement dates This setting has two options when turned on: • Select **Always create** if you want CampusNexus Student to immediately create origination change records when loan dates are modified by the SPE tool. • Select **Create when award is fully paid** if you want CampusNexus Student to verify that the award has been fully paid before creating origination change records. An award is fully paid if all disbursements have been released to COD. **Note**: Origination changes are created only for direct loans that have Origination Status of "Accepted" or "Batched to Send".
Minimum number of disbursements	Specify the minimum number of disbursements per loan.
Number of MPN	Specify the number of Master Promissory Note (MPN) to print.
MPN print option	For each loan in the MPN print option field, select the option type: • F - Print prom note at institution site • R - COD prints prom notes and returns them to institution • S - COD prints prom notes and sends the notes to the borrower • Z - Reprint at COD
FAA Name	Specify the name of your Financial Aid Administrator for Direct Loans.
Automatically update Origination Status to Ready to Send?	Select **Yes** to automatically promote the origination status from "Not Ready" to "Ready to Send" when a valid ISIR is on file for the student and the Direct Loan is in an Approved status; otherwise select **No**.

Financial Aid Settings - COD Grants Tab

The Department of Education requires certain information about your Financial Aid Department and your programs. The COD Grants tab of the Financial Aid Settings form is where you provide that information for CampusNexus Student to use when processing data for COD grants.

Notes:

- Since the ACG and SMART program was phased out, these fund sources no longer apply for the 2011-2012 award year. Accordingly, CampusNexus Student was updated so that these fund sources can no longer be packaged. The fund source type options still remain for fund source configuration at this time, but at a future date these options will be removed so no new additional award using this type will be created.
- For COD grants, CampusNexus Student builds the origination record when packaging from any method. The packaging process uses the student AY grade level to populate grade level information on the origination record. The validations within CampusNexus Student for the COD Grant awards inform the user if any required information is missing before the grants are exported to COD.

To set up general COD grant options:

1. Navigate to **Setup > Financial Aid**. Select the **COD Grants** (tab).

Field	Description
Attending Pell ID	This list shows all unique IDs on file. Select one.
Use CampusNexus Student Pell Software for 2010-11? 2011-12? 2012-13?	Select **Yes** or **No** for each year. If the servicer link is turned on by selecting a servicer (Setup / Campus Locations / Financial Aid), RFMS and Direct Loan must be turned off for the Direct Loan ID and Reporting Pell ID in the Financial Aid Settings.
FAA Name	Specify the name of your Financial Aid Administrator. This name is used on correspondence with the Department of Education
FAA E-mail	Specify the FAA's e-mail address.
FAA Phone and Extension	Specify the FAA's telephone number and extension.
FAA Fax #	Specify the fax telephone number for the FAA's office.
Default Academic Calendar	Select one of the following: • **1** Credit hours - non-standard terms • **2** Credit hours - standard terms of quarters • **3** Credit hours - standard terms of semesters • **4** Credit hours - standard terms of trimesters • **5** Clock hours • **6** Credit hours without terms
Default Payment Methodology	Select one of the following: • **1** Credit hour with standard terms in which Fall through Spring terms equal or exceed 30 weeks, or equal or exceed academic year with waiver (AC: 2,3,4) • **2** Credit hour with standard terms in which Fall through Spring terms are less than 30 weeks without waiver (AC: 2,3,4) • **3** Credit hour with standard or non-standard terms (AC: 1-4) • **4** Clock hour or Credit Hour without terms (AC: 5,6) • **5** Nonresidential portion of programs offered by correspondence without terms (AC: 1-4,6) **Note**: The options you will see in this field vary according to your choice of Academic Calendar.
Disbursement Option	Select 'Advanced Funding' or 'Just in Time'
Financial Control	Select Public, 'Private, nonprofit', or Proprietary
Default Credits/Hours in AY	Specify the default number of credits or clock hours in your school's academic year.

Field	Description
Institution Type	Select one of the following codes: • Less than one year • 1 year, less than two years • 2 years, less than three years • 3 years, less than four years • 4 years (baccalaureate degree only) • 5 years or more
Default Weeks in AY	Specify the default number of weeks in your school's academic year.
Include Disbursements at Status "Scheduled"	Select or clear this check box as required. Pell allows a school to report scheduled disbursements up to 7 days out from the reporting date.
DUNS Number	Specify the school's 9-digit DUNS number. The Data Universal Numbering System (DUNS) developed by the Dunn and Bradstreet Corporation is used to identify businesses in automated files.
Number of days past system date to include scheduled and ready to pay disbursements	Specify the number of days out from the current date (up to 30) for which scheduled disbursements are to be reported to Pell.
Is your institution ineligible?	Select **Yes** or **No**. Since 2001-02, if a school is ineligible, the only additional piece of information the school must report is the payment period begin date.
Actual Disbursement Date	Specify the actual date.

Field	Description
Automatically create Disbursement Date Adjustments after payments have been posted to ledger card	Select **Yes** or **No**. An automated solution compares reported COD scheduled payment dates at COD received to the CampusNexus Student actual paid dates. If there is a difference, the dates can be corrected to ensure the institution is in compliance with Federal Regulations that specify that the dates must match. You can configure an option to auto create disbursement date adjustments after payments have posted to the ledger card for COD Grants. This configuration is only visible when FAA is enabled. Additionally, this configuration is only visible to users with the appropriate permissions. For COD Grants, the settings for the COD Grants tab are applied by the Pell ID. A process validates disbursements that need disbursement date adjustments after payments have been posted to the ledger card. It validates if the disbursement date posted to the ledger card is not equal to the accepted disbursement date at COD. This process validates the dates for Pell, TEACH, and Direct Loans. If the transaction date of the accepted Pell / TEACH/DL disbursement record [fadldisb.transactiondate / fapelldisb.disbursementdate / FaCODGrantDisb.disbdate] does not match the date of the disbursement's ledger card posting date (satrans.date), a disbursement date adjustment record for the transaction is created and queued for export through the COD Export job. In each case above: • A disbursement date adjustment record is created in a status of Ready to Send, that would be sent to COD after the COD Export job ran successfully. • An adjustment record is created at a minimum to comply with our current adjustment creation when adjustments are manually created in the Core product. The adjustment record must comply with current CampusNexus Student COD Export / Import formats. CampusNexus Student uses the existing Exception Management framework. It will not create a new adjustment record if an existing pending adjustment exists. Instead, a new exception,CODEXPRT0059, is created that states 'Disbursement Date Adjustment Not Created. Disbursement has a pending adjustment. Transmit pending adjustment before continuing'. The following steps resolve the exception. a. Navigate to: Daily > Automated Processes > Job Management. b. Select the appropriate COD Export Job. c. Select Run Now.

Field	Description
Automatically update Origination Status to Ready to Send?	Select **Yes** or **No**. If you select Yes, the Grant Origination Status is automatically updated from Not Ready to Ready to Send when a valid ISIR is on file and the grant is in an Approved status. This option also updates the Origination Status to Ready to Send if currently Accepted and the award amount increases without prompting the user. The Origination record's current status is a consideration in the status update. The following rules apply: • **N** (Not ready to send) can be updated to **R**. • **E** (Errors/Rejected) can be updated to **R**. • **B** (Batch) indicates it has already been sent and school is awaiting response. It cannot be updated to **R**. • **A** (Accepted) can be updated to **R** only if data in the Origination record has been changed.
Re-Originate Pell when anticipated disbursement dates are updated?	Select **Yes** or **No**. For non-term institutions (Academic Calendars 5 and 6), CampusNexus Student automatically sets the Origination Status of an originated Pell award from "Accepted" or "Batched to Send" to "Ready to Send" when the anticipated disbursement date of a Pell disbursement is updated by the Student Pace Evaluation (SPE) tool. A disbursement date is considered an anticipated disbursement date if the disbursement has not been released to COD. This means the disbursement does not exist in the Disbursements at COD section of the award.

Financial Aid Settings - Hold Codes Tab

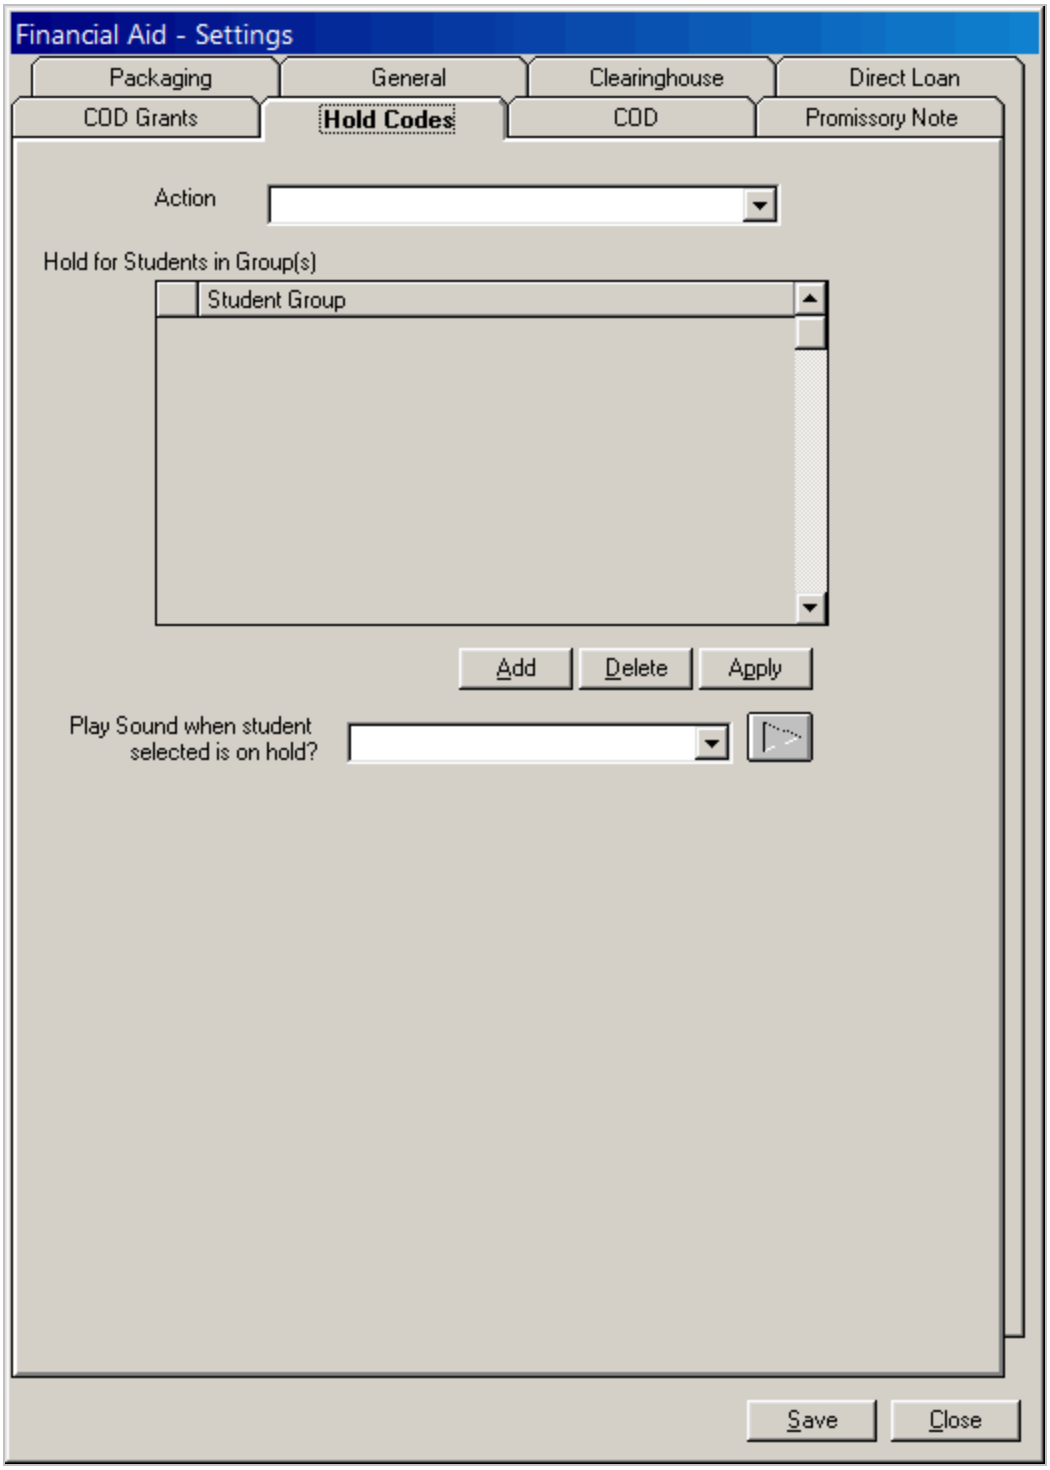
You can associate student groups with financial aid hold codes so that the following events occur while students are members of the designated groups:

- A red light icon is displayed on the CampusNexus Student main toolbar when the Student Master of a student in a hold group is displayed.
- A sound (.wav file) is played.

Note: Create the student groups to which holding actions are related before proceeding with the hold code setup.

To set up hold codes:

1. Navigate to **Setup > Financial Aid**. Select the **Hold Codes** tab.



2. Specify appropriate options. For more information, see Field Descriptions.

3. Click **Save**.
4. Click **Close** to close the form.

Field Descriptions

Field	Description
Action	Select the action to be blocked while a student is a member of the hold group. Hold actions include: • **Schedule Financial Aid**: Financial Aid may not be scheduled for students on hold. • **Disburse Financial Aid**: Financial Aid may not be disbursed for students on hold. • **Servicer SAP Financial Aid**: When a student is in this group, CampusNexus Student causes the flag to be set in the next weekly extract to Global indicating that the student is not making Satisfactory Academic Progress. When the student is removed from the group, the flag sent to Global indicates that the student is making SAP. • **Attendance Violation**: Institutions must have a process that prevents disbursements of financial aid funds to students who violated the institutions attendance policy. To accommodate the institutions that use Global, CampusNexus Studentincorporates the use of a student g Group in tracking students on attendance violation. When the Global Academic Extracts are created, CampusNexus Student flags students as being in violation of attendance if they are a member of this group. **Note**: Institutions must create their own attendance violation policy to evaluate these students. They can create their own stored procedures to evaluate their attendance policy, or add students who are in violation to the student group(s) manually. Whereas CampusNexus Studenttracks and flags the students in attendance violation, institutions must maintain the attendance violation student groups, not CampusNexus Student. When the attendance violation policy evaluation occurs, CampusNexus Student then adds or removes students from this group.
Hold for Students in Group(s)	Associate student groups with hold actions as follows: 1. Click **Add**. A new line appears at the bottom of the Student Group list. 2. Click in the new line and click to select a student group. 3. Select the **student group** to be associated with the hold action. The group is added to the list. Repeat the preceding steps as needed to associate additional student groups with the same FA hold action. 4. Click **Apply** to immediately flag the records of students who belong to the selected groups. Repeat the steps as needed to include other hold actions.

Field	Description
Play Sound when Student Selected is on Hold?	*Optional*. To alert users audibly when they are working with students in financial aid hold groups, select a sound (.wav) file to be played when the student's master record is displayed in CampusNexus Student. Sound files must be stored in the CampusNexus Student shared folder in the sounds subfolder. Sample ".wav" files are included. You can customize your "hold" sounds by placing additional ".wav" files into the CampusNexus Student share/sounds folder. (The sound feature may not be available to institutions using Citrix or terminal servers.) Click **Play** to hear the selected wave file.

Financial Aid Settings - COD Tab

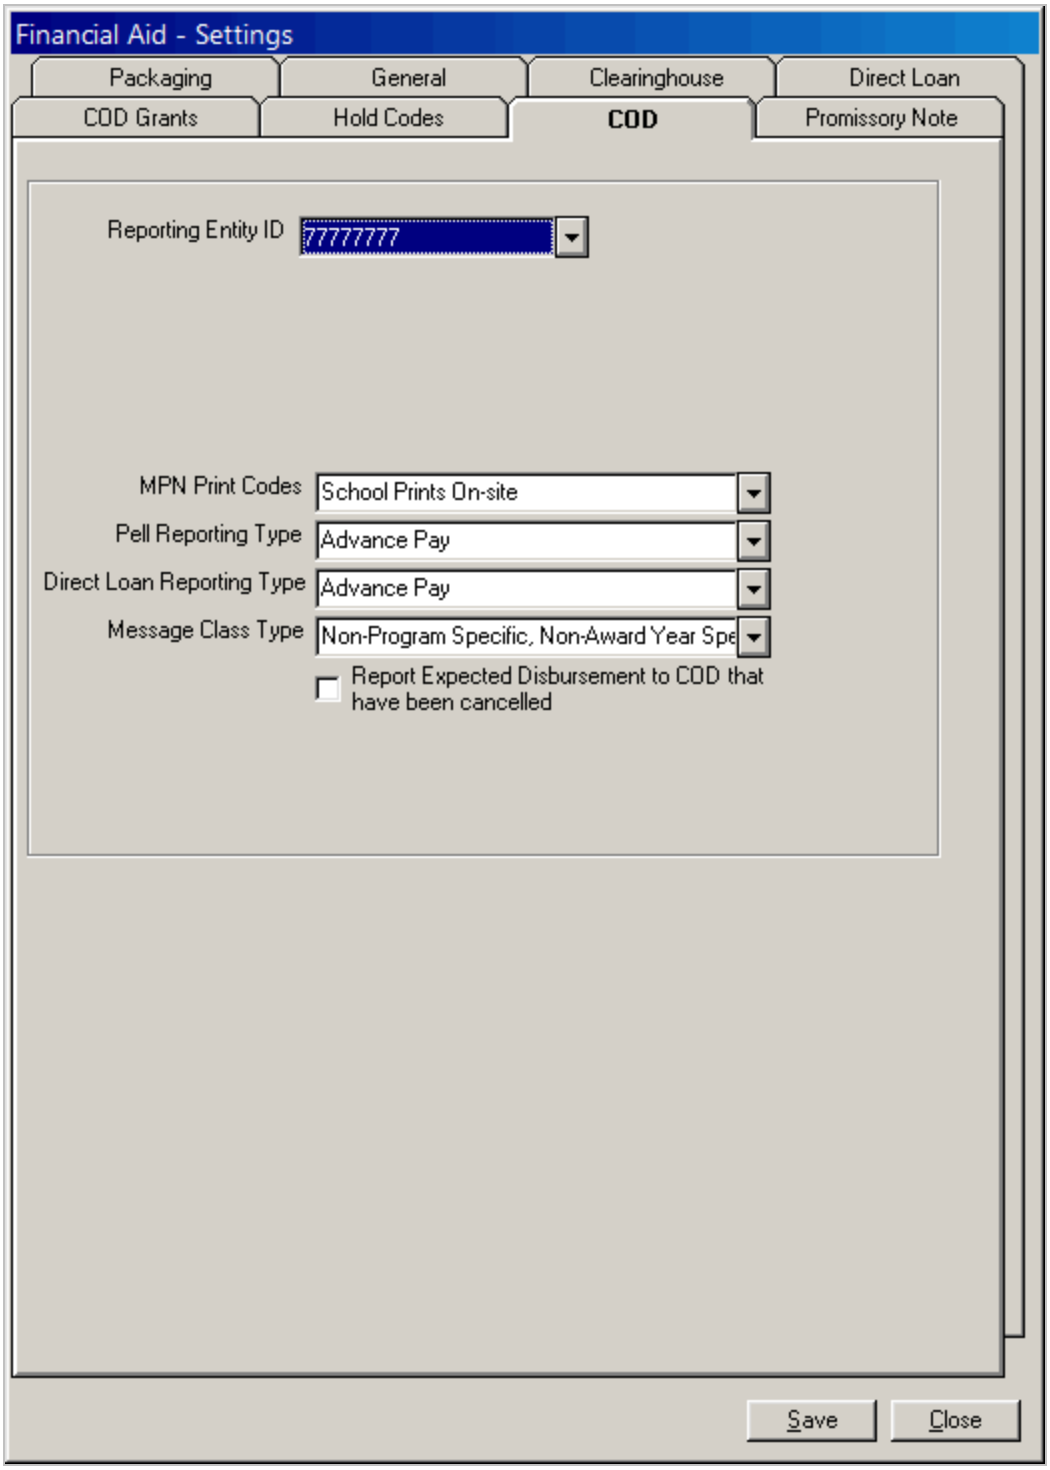
The Common Origination and Disbursement (COD) system was implemented in April 2000 by the Office of Federal Student Aid. All schools receiving Title IV Student Aid must be full participants in this program by the 2005-2006 Award Year. CampusNexus Student supports phase-in participants until that time. The COD tab on the Financial Aid Settings form is used to provide information required by the Common Origination and Disbursement (COD) program.

For more information, see COD Import, COD Export, COD Grants, COD Exceptions and Financial Aid Reports.

Prerequisites: The following steps require that entity ID numbers for Pell and Direct Loan (if applicable) have been set up properly.

To set up COD information for a campus:

1. Navigate to **Setup > Financial Aid**. Select the **COD** tab.



1. Specify appropriate options. For more information, see Field Descriptions.
2. Click **Save**.

3. Click **Close** to close the form.

Field Descriptions

Field	Description
Reporting Entity ID	Select a Reporting Entity ID from the list.
MPN Print Codes	Select one of the Master Promissory Note (MPN) print codes. The options are: • COD Prints and Sends to Borrower • COD Prints and Sends to School • COD Reprints and Sends to Borrower • COD Reprints and Sends to School • School Prints On-site
Pell Reporting Types	Select one of the following options: • Advance Pay • Pushed Cash • Cash Monitoring 1 • Cash Monitoring 2
Direct Loan Reporting Types	Select one of the following options: • Advance Pay • Pushed Cash • Cash Monitoring 1 • Cash Monitoring 2
Message Class Types	Select one of the following options: • Non-Program Specific, Non-Award Year Specific • Non-Program Specific, Award Year Specific • Program Specific, Non-Award Year Specific • Program Specific, Award Year Specific

Financial Aid Settings - Promissory Note Tab

Promissory notes are created for students who establish a student payment plan with a, institution. The note is a financial contract with the institution. The *Standard* Promissory Note is printed for any fund source set up to "Allow Printing of Promissory Note" (see Fund Source for setup instructions).

You may create *Custom* Promissory Note reports if the following conditions are met:

- The report must have been created from a copy of the Standard Promissory Note report.
- The report must use the same view as the Standard Promissory Note. (Do not add or remove fields from the standard view or use a custom view.)
- Changes on your Custom Report only consists of:
    a. Modifying the page layout;
    b. Suppressing (not deleting) certain fields from appearing on the report;
    c. Changing block text printed on the report; or
    d. Changing column heading text or field label text.
- The naming convention for the Crystal report filename is `cst_PN_*.rpt` where the asterisk (*) can be replaced with text of your choice such as `cst_PN_California.rpt`.
- The Crystal report file must be located in your Custom Reports folder (Setup > System - Custom Reports field). Also see Custom Reports.

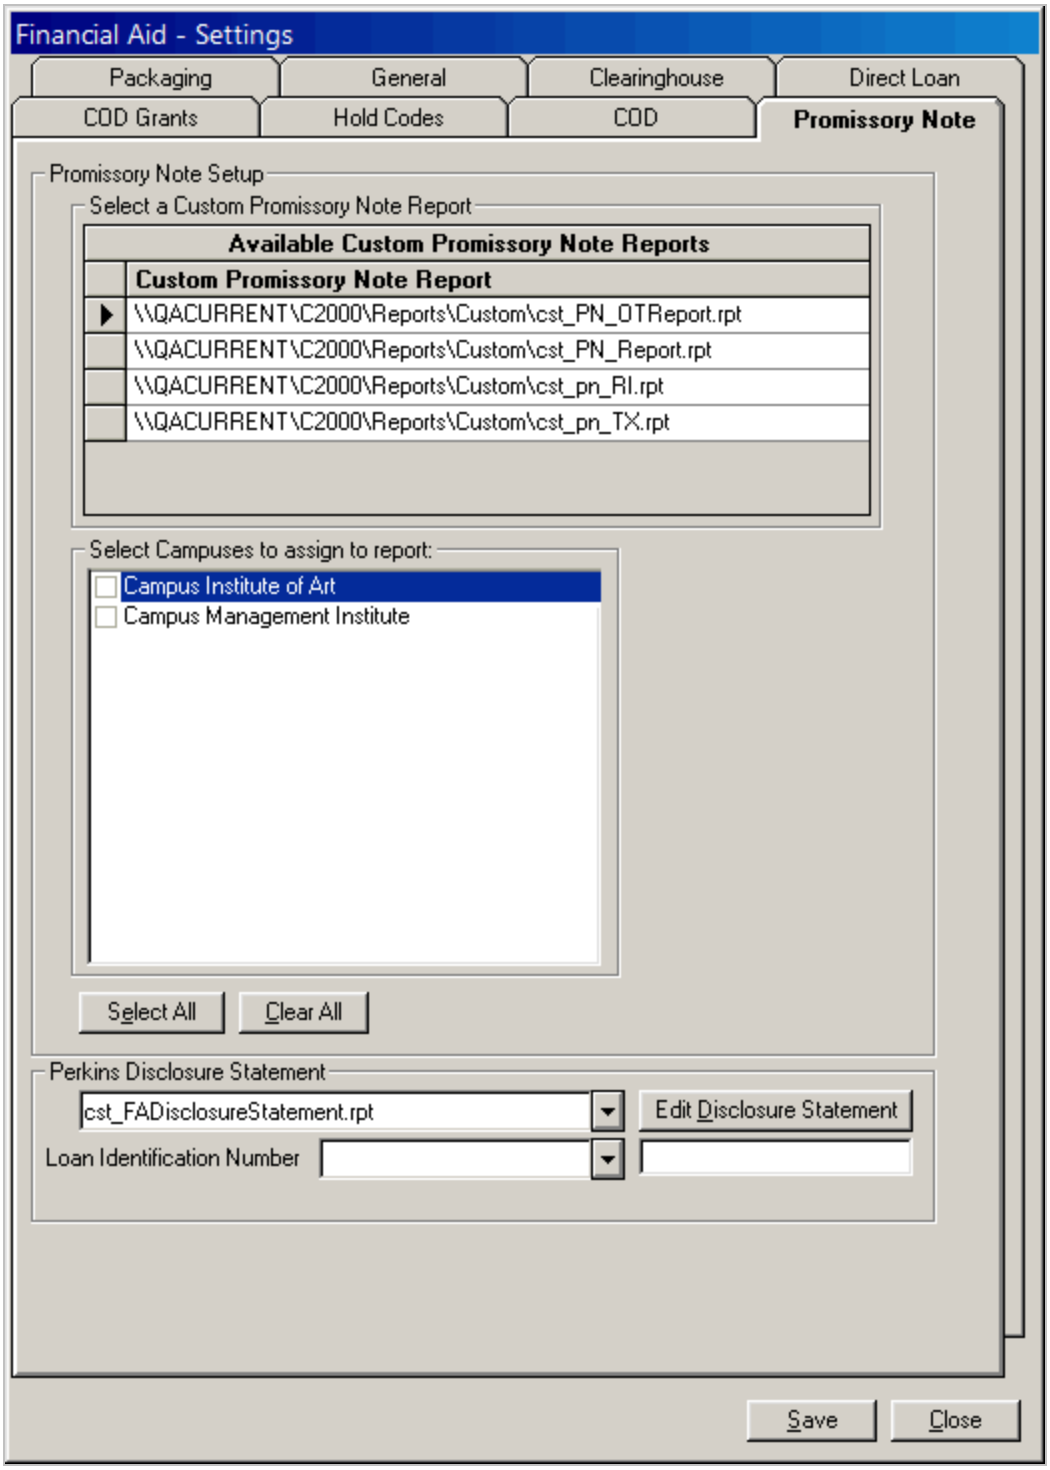
To set up a Promissory Note:

1. Navigate to **Setup > Financial Aid**. Select the **Promissory Note** tab.

    A list of available Custom Promissory Note reports and campuses is displayed allowing you to associate a campus with a Custom Promissory Note report.

    CampusNexus Student assumes that a campus will use the *Standard* Promissory Note report unless a *Custom* Promissory Note report is defined here for the campus.

    An information message is displayed upon clicking on the Promissory Note tab if you have not established a location for Custom Reports and subsequently no reports are displayed, otherwise a list of reports is displayed.



2. Select a Promissory Note Report from the **Available Promissory Note Reports** list. Once a campus is selected for a promissory note, it will not appear in the list because there can be only one promissory note assigned to any one campus.
3. A list of campuses appears under **Select Campuses to assign to report**. Select the campuses that you want to associate with the selected promissory note reports.
4. Select a **Perkins Disclosure Statement**.

5. If the disclosure statement needs to be edited, click **Edit Disclosure Statement**.
6. Select a **Loan Identification Number**. The options are:
    - SSN
    - Loan Identification Format
    - Student Number
    - Student ID
7. Click **Save**.
8. Click **Close** to close the form.

Fund Source Permissions

The Fund Source Permissions options allow staff members gain access to fund sources to post, add, edit, delete, and approve awards. To limit the users who can approve or post aid from certain fund sources, those users must first be isolated in a discrete staff group that can be selected from the drop-down menu.

Fund Source Security accommodates Financial Aid related activities that occur in Student Accounts. Distinct permissions can be set up for user access to create and process awards, create and process refunds, create and process stipends, and edit payees for particular fund sources. These types of security limitations may be required by an organization's internal compliance department or through implementing the separation of duties mandated by the Sarbanes-Oxley Act (SOX). This provides fund source level security for awards, refunds, stipends, and payments.

The following staff group permissions to perform one or more of the following actions for particular fund sources are available:

- *Award*: Add, Edit, Delete, Approve, View
- *Payment*: Post, Edit, Delete, Void
- *Schedule Refund/Stipend*: Schedule, Edit, Delete
- *Paid Refund/Stipend*: Post, Edit, Delete/Void
- *Schedule Refund*: Schedule, Edit, Edit Payee, Delete
- *Paid Refunds*: Post, Edit, Delete, Void
- *Schedule Stipends*: Schedule, Edit, Edit Payee, Delete
- *Paid Stipend*: Post, Edit, Delete, Void

Note: A staff member cannot perform any action for a fund source transaction unless the staff group to which the staff member belongs has been granted permissions for that action for the fund source.

To configure fund source permissions:

1. Navigate to **Setup > Financial Aid**. Select the **General** (tab).
2. In the Fund Source Security section, next to *Designate Access by Fund Source?*, select **Yes**. The *Simple* and *Advanced* options are enabled.
3. Select **Simple** or **Advanced** according to your institution's needs for FA fund source security. The *Advanced* option provides more granular configuration options.

   Simple/Advanced Configuration Options

Configuration	Tabs					
Simple	Awards	Payments	Schedule Refund/Stipend		Paid Refund/Stipend	
Advanced	Awards	Payments	Schedule Refunds	Schedule Stipends	Paid Refunds	Paid Stipends

4. Click **Fund Source Permissions**. The FA Fund Source Security form is displayed. The tabs on the form are determined by your selection of *Simple* or *Advanced* in the previous step.

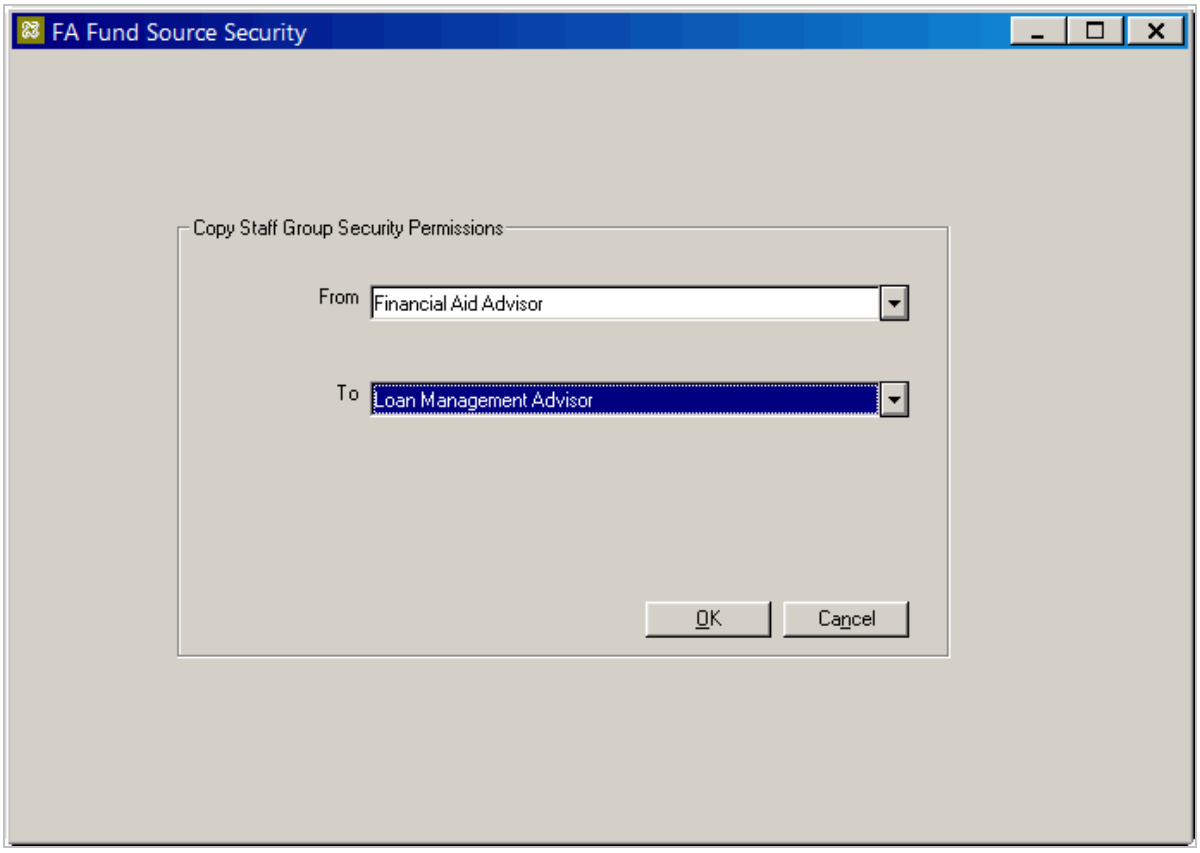
5. Select a **Staff Group**. This is the staff group you will be working with until you click **Save**.
6. Select appropriate security permissions for *each fund source* as they pertain to the staff group.
    - Select **None** to deny permissions.
    - Select **Full** to assign full permissions.
    - Select fields in the **Add**, **Edit**, **Delete**, **Approve**, and **View** columns to assign specific permissions.
7. Click **Select All** to select all fund sources listed.
8. Click **Clear All** to clear all the fund sources listed.
9. Click**Copy Security** to copy permissions from one staff group to another.
    a. Select the staff group who already has permissions from the **From** list, and then select the staff group from the **To** list that should have the same permissions.



b. Click **OK**.

c. A confirmation message is displayed. Click **Yes**.

10. Click **Save**.
11. Click **Close** to close the form.

Notifications of Receipt

By law, a student must be notified each time a financial aid disbursement is received by the institution on the student's behalf and credited to the student's account. CampusNexus Student can print notifications of receipt for each type of financial aid received. The receipt text varies depending on the type of funding.

Each fund source can have its own formatted receipt. Each receipt is created as a Crystal report. You can customize the layout of each of the receipts. **Your must have access to the Crystal Reports program to edit Receipt Notifications**.

The Notification of Receipt can be edited on the Fund Source Setup form and on the Financial Aid Settings form.

To edit notifications of receipt from the Financial Aid Settings form:

1. Navigate to **Setup > Financial Aid**. Select the **Packaging** tab.
2. Click **Edit Receipt Notification Report**. CampusNexus Student opens Crystal Reports.
3. Work in Crystal Reports to format the report(s) as required. See the discussion below for more details about the notifications of receipt and data that is available to be used in the reports.
4. Save your work and return to CampusNexus Student.

   Student data items available to be displayed on the receipt include the following:

   - Today's Date
   - Student name - SyStudent.Firstname + SyStudent.Lastname
   - Student's address - SyStudent.Addr1
   - Student's city - SyStudent.City
   - Student's state - SyStudent.State
   - Student's ZIP - SyStudent.Zip
   - Student's Phone number - SyStudent.Phone
   - Student's SSN - SyStudent.Ssn
   - Student's Enrollment Number - AdEnroll.StuNum
   - Student Number - SyStudent.Stunum
   - Student's Program Version description - AdProgramversion.Descrip
   - Student's Enrollment Current Account Balance - AdEnroll.ArBalance
   - Student's Overall Current Account Balance - SyStudent.ArBalance
   - Student's Campus Name - SyCampus.Descrip
   - Student's Campus Phone number(s) - SyCampus.Phone1, SyCampus.Phone2, SyCampus.Phone3

   Transaction-related data items available to be displayed on the receipt include the following:

   - Lender name - FaLender.Descrip
   - Lender address - FaLender.Addr1
   - Lender phone number(s) - FaLender.Phone, FaLender.Phone2
   - Lender fax number - FaLender.FaxNumber
   - Lender contact(s) - FaLender.Contact1Name, FaLender.Contact2Name
   - Fund source description - FaFundSource.Descrip
   - Fund source receipt notification comments - FaFundSource.ReceiptComment
   - Award year - FaStudentAid.AwardYear
   - Disbursement amount - SaTrans.Amount
   - Transaction date of disbursement - SaTrans.Date
   - Disbursement Check/EFT number - SaTrans.Checkno
   - Transaction reference - SaTrans.Ref
   - Transaction description - SaTrans.Descrip

- Transaction receipt number - SaTrans.ReceiptNo
- Term code disbursement was for - AdTerm.Code (Join AdTerm on SaTrans.AdTermID)

All of the above listed data items may not be included on each defined receipt. They are available to drop onto the report. In addition, you can specify any amount of free text on the receipt.

A column for Receipt Comment Text was added to the FA Fund Source table. Columns for Refund Letter Code and Receipt Letter Code were removed from this table. A column was to the FA Disbursements table for Date Receipt Printed.

Default Notification of Receipt

A default "Notification of Receipt" report is used as the default Notification of Receipt for each fund source unless you modify the layout for that fund source. The default layout is as follows:

Today's Date

School Name School Phone #

Student's Name
Student's Address 1
Student's Address 2
Student's City, State, and ZIP
Student's Phone #

Current Account Balance: $######.##

Fund Source: nnnnnnnnnnnnnnnnnnnn Award Year: ####-##
Disbursement Amount: ####.##
Disbursement Date: 99/99/9999
Check Number: nnnnnnnnn
Receipt Number: nnnnnnnnnnnnnn

Fund Source Receipt comments

This default receipt is named `lst_FaDefaultReceipt`. If the default receipt report is customized, it is saved as `cst_FaDefaultReceipt`. When a receipt is customized for a fund source, the resulting report name is `cst_Fannnnnnnn Receipt`, where `nnnnnnnn` is the fund source code.

Lists > Financial Aid > Fund Sources

Use the **Edit Receipt Notification** button on the FA Fund Source form to edit the Notification of Receipt layout for each fund source in Crystal Reports. CampusNexus Student first checks if a report exists for the selected fund source.

- If a report exists for the fund source (`cst_Fannnnnnnn Receipt`), that report is loaded.
- If a report does not exist for the fund source, the default receipt (`lst_FaDefaultReceipt`) is copied to `cst_Fannnnnnnn Receipt`.

  The `cst_Fannnnnnnn Receipt` is then loaded for editing.

View > Student Accounts > Ledger Cards

Use the **Print Receipt** button on the Student Accounts Ledger to print the Notification of Receipt for any FA disbursement received. This option generates a generic receipt for the currently selected transaction on the ledger card. If the selected transaction on the ledger card is an FA disbursement received, and the FA fund source type is not CASH, the corresponding Notification of Receipt is printed. To determine which Notification of Receipt report should be loaded when this option is selected, CampusNexus Student first checks for the existence of a receipt report for the fund source received.

- If `cst_Fannnnnnnn Receipt` exists (*nnnnnnnn* = Fund Source code), that report is loaded.
- If `cst_Fannnnnnnn Receipt` does not exist, CampusNexus Student looks for `cst_FaDefaultReceipt`. If it does not exist, `lst_FaDefaultReceipt` is loaded.

After the receipt is printed for the selected transaction, CampusNexus Student updates FaDisb.DateReceiptPrinted with the system date.

Note: A Date Receipt Printed property was added to payments on the student's ledger transactions. The date is populated when a receipt is printed. This date is also updated when the student views a receipt from Portal. Only the first receipt printed is recorded.

Daily > Student Accounts > Post FA Disbursements

The Student Accounts Post FA Disbursements form prints a Notification of Receipt for each FA disbursement received in the posted batch. The logic to determine which receipt report to use is the same as explained above. It is possible that a posted batch of FA disbursements includes disbursements for more than one fund source. This means that it is possible that more than one receipt report needs to be used when generating these receipts. The option to print the receipts is available after clicking Save to post the batch. A dialog box is displayed with the following text: "*Print receipt notifications for disbursements just posted?*"

Daily > Student Accounts > Post Payments

The Student Accounts Post Payments form prints a Notification of Receipt for any posted FA disbursement. You can print a receipt notification after clicking Save. If the payment posted was not a scheduled payment or the fund source type is CASH, a standard receipt will be printed. (The receipt notification is not printed.)

Setup > Student Accounts

When you navigate to Setup > Student Accounts, the Student Accounts Settings form is displayed. Use this form to set up options related to student account transaction activities. The form contains the following tabs:

- General
- Revenue
- Additional
- Hold Code
- Housing

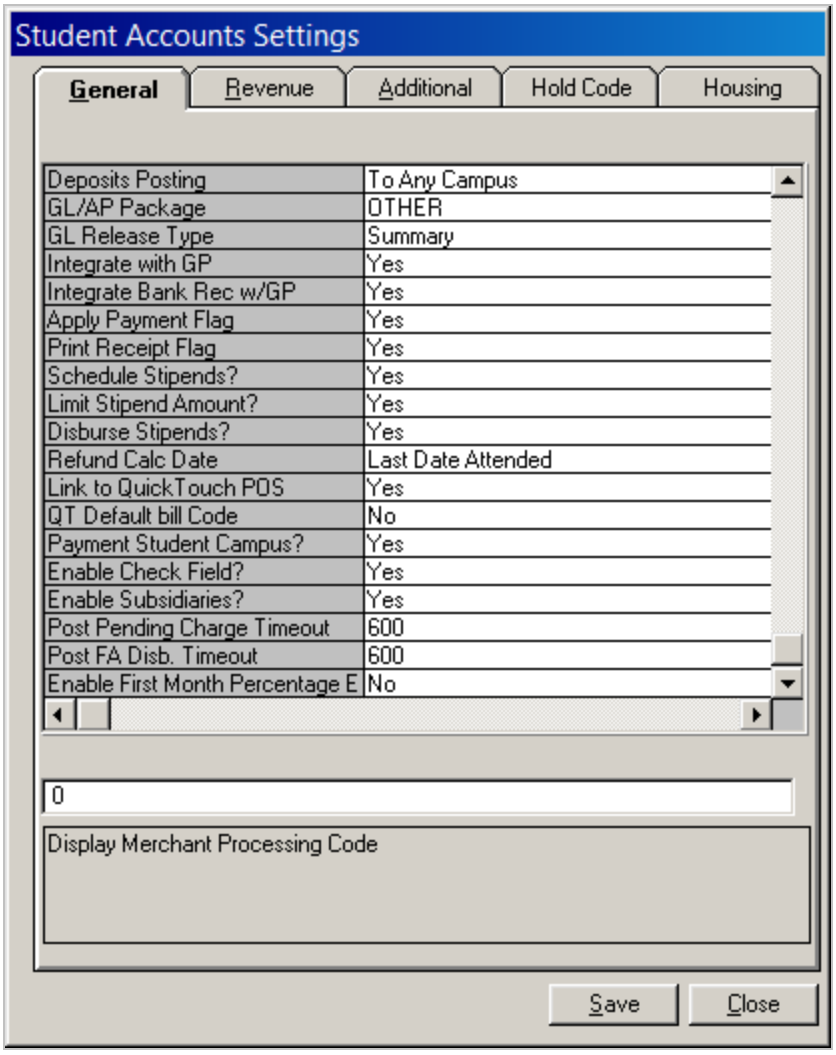
Additional settings are configured under Lists > Student Accounts.

Student Accounts Settings - General Tab

Use the General tab on the Student Accounts Settings form to set up general options related to student account transactions.

To set up general options for student accounts:

1. Navigate to **Setup > Student Accounts**. Select the **General** tab.



2. The fields on the General tab vary depending on the selected options. A choice must be made for each setting displayed. See Field Descriptions.

   If your campuses use Great Plains, see Settings for Great Plains.

3. Click **Save**.
4. Click **Close** to close the form.

Field Descriptions

Field	Description
Display Merchant Process	Display Merchant Processing Code
Edit Enrollment Fees	Allow the user to edit the tuition, books, fees, etc. when the enrollment record is added? Yes/No
Earnings Method	Select the method to be used for earning tuition, e.g., Monthly.
Require Term Codes	Require terms to be entered when posting charges and adjustments? Yes/No This option applies system-wide to all charges/adjustments. When posting certain transactions, a term code may not be relevant. For example, a "write-off" adjustment would write off a student's overall balance, regardless of the terms in which the balance was incurred. Previously, the system only allowed a transaction to be posted as an adjustment to charges up to the amount of those charges incurred for the term. For instance, if $5000 were charged in Term A, the system would not allow more than a $5000 credit. If a write-off exceeded this amount, and a term code was required, you would have to make several entries to accomplish the write-off. The Required Term Code Override allows an override on each transaction code. A school that requires term codes would want the rule to be enforced when posting a tuition credit, but may not want the rule enforced when posting a write-off. In this example, you would override the "required term flag" for the write-off transaction code. See Lists > Student Accounts > Transaction Codes . Transaction codes have a flag to "Override Required Term Code?" under the "Include in Title IV Inst. Charges" option. This option is enabled only if you selected Require Term Codes.
Delete Charges/Drop	Delete charges dated after drop date when dropping a student? Yes/No
Delete Charges/No Show	Delete charges from ledger card when student status set to No Show or Cancel? Yes/No
Revenue Ref #	Enter a number to be used as a reference with revenue recognition transactions. Once a month someone will run a revenue recognition calculation that creates general ledger transactions. This number will be incremented each month and assigned to the transactions.
G/L Format	Enter the format of your general ledger (G/L) account numbers. Use # to represent digits and insert hyphens as required to separate segments of the number. The maximum length for the G/L account number is 30 characters including digits and punctuation. The GL Company Number set up under Setup > Campus Locations is added to the beginning of this format by CampusNexus Student. This field is not displayed if CampusVue Finance, HR & Payroll is installed.
G/L Batch #	Enter a number to be incremented for each new general ledger (G/L) batch. This field is not displayed if CampusVue Finance, HR & Payroll is installed.

Field	Description
Allow Posting	Allow Posting of Student Ledger Card Transactions. The options are: • To Any Campus • To Current (Signed-in) Campus
Deposits Posting	Allow Posting of Admissions Deposits. The options are: • To Any Campus • To Current (Signed-in) Campus
GL/AP Package	Select the accounting package that is used in conjunction with CampusNexus Student. The options are: • Great Plains • Other • CampusNexus Finance (See Initial Configuration of CampusNexus Finance, HR & Payroll.) This field is not displayed if CampusVue Finance, HR & Payroll is installed.
GL Release Type	Select the type of transaction that is to be delivered to the accounting package. • Detail • Summary This field is not displayed if CampusVue Finance, HR & Payroll is installed.
Integrate with GP	Does your CampusNexus Student system share data with Great Plains, i.e., will CampusNexus Student validate GP account numbers, pass transactions to GP, get data from GP for CampusNexus Student reports, and so on? N/A, Yes, or No. Choose N/A if Great Plains is not installed. This field is not displayed if CampusVue Finance, HR & Payroll is installed.
Integrate Checks with GP	Does your CampusNexus Student system share data with Great Plains for printing accounts payable checks? N/A, Yes, or No. This field is not displayed if CampusVue Finance, HR & Payroll is installed.
Integrate Bank Reconciliation with GP	Are the refund and stipend checks printed in CampusNexus Student integrated into the Great Plains process for bank reconciliation? N/A, Yes, or No. If you select Yes, the Process Refunds/Stipends Checks form will include GP Checkbook and GP Check# columns. This field is not displayed if CampusVue Finance, HR & Payroll is installed.
Apply Payment Flag	Should CampusNexus Student apply a payment to outstanding charges? Yes/No • If you choose Yes, you can elect to not apply a payment at the time of the transaction. • If you choose No, you can elect to apply a payment at the time of the transaction.

Field	Description
Print Receipt Flag	Should CampusNexus Student print a receipt for payments received? Yes/No Select Yes to print a receipt by default. You can override the default at the time of the payment transaction. The receipt format for a receipt printed as a result of a transaction is: yy-ddd-nnnn. • yy – designates the current year, • ddd – designates the Julian date, • nnnn – represents the unique transaction number for the current day. For example, the first three transactions for today produce receipts numbered 03-295-0001, 03-295-0002, 03-295-0003.
Limit Stipend Amount?	Prevent Stipend amount scheduled from exceeding amount packaged for specified fund source? Yes/No The default is Yes, meaning that stipend disbursements are limited to the amount packaged. Select No if your institution wishes to schedule stipends without adhering to the business rules that require the net amount of stipends scheduled to be less than or equal to the amount packaged or the amount received for a fund source.
Schedule Stipends?	Prevent scheduling of stipends when institutional charges are greater than amount packaged? Yes/No You can allow stipends to be scheduled whether the institutional charges exceed the amount packaged. The default is Yes.
Disburse Stipends?	Prevent the issuing of stipend disbursements when funding has not been received? Yes/No. You can allow stipends to be posted and issued to the student before the funding is received on the ledger card. The default is Yes.
Refund Calc Date	Which date should be used as the effective date when calculating refunds? The options are: • Drop Date • Last Date Attended.
Link to QuickTouch POS	Link CampusNexus Student with the QuickTouch POS System? Yes/No
QT Default Bill Code	Assign default billing code to imported QuickTouch transactions that have no billing code specified? Yes/No
Payment Student Campus?	Associate payments with student's enrollment Campus regardless of where payment is made? Yes/No
Enable Check Field	Enable check field on adjustments for refunds? Yes/No
Enable Subsidiaries	Enable Subsidiaries? Yes/No Subsidiary ledgers are used to bill services not reflected in the student ledger card, for example, housing, meal plans, parking fees, etc.

Field	Description
Post Pending Charge Timeout	Number of seconds to wait for the post pending charges process.
Post FA Disb. Timeout	Number of seconds to wait for the post FA disbursements process.
Enable First Month Percentage	Earn a percentage of the total tuition charge in the first month of earning.
Max GP GL Account Search	This field is enabled only when Great Plains is selected in the GL/AP Package field. Use this field to specify the maximum number of records displayed in the search results page.
PayPal Credit Card Batch Timeout	Number of seconds to wait for the credit card batch process.

Settings for Great Plains

If your campuses use Great Plains, you must enable the following settings to use the Great Plains General Ledger Account search feature.

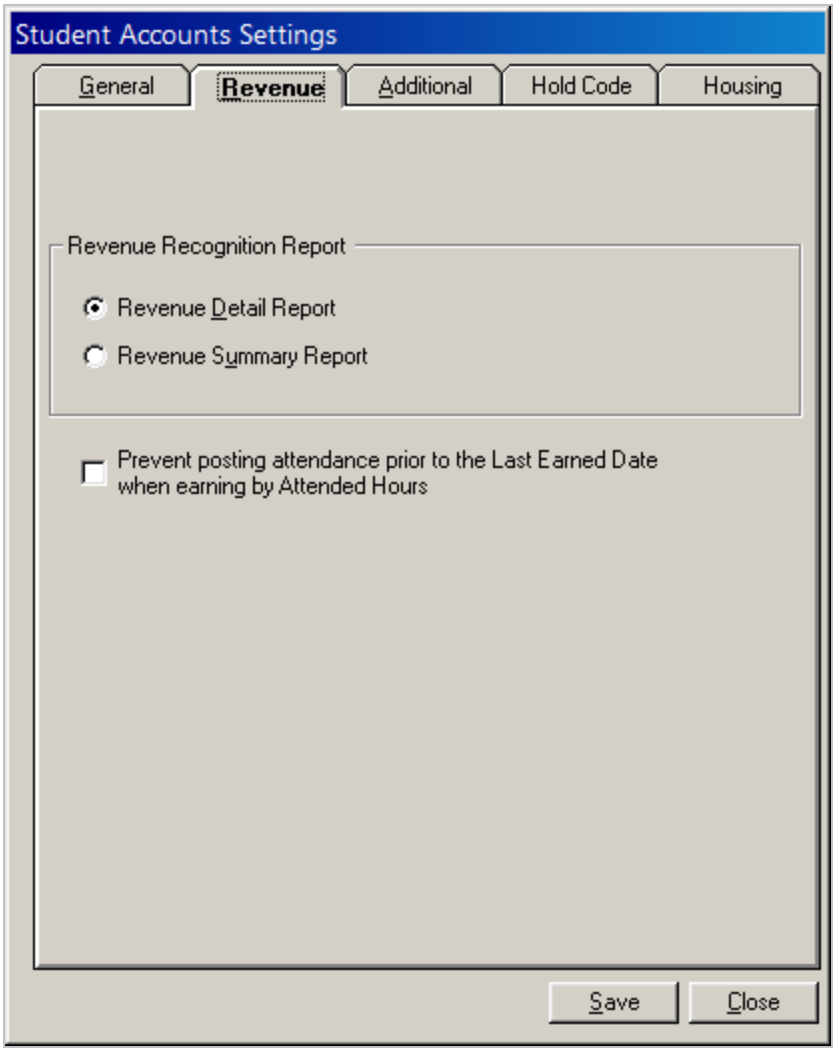
- On the Student Accounts > General tab (see above):
  - Set the **GL/AP Package** to GREAT PLAINS.
  - Set **Integrate with GP** to Yes.
  - Set **Integrate Bank Rec w/GP** to Yes if you want the Bank Reconciliation portion to be turned on; otherwise set it to No.
  - Set **Map GP GL Account Search** to any positive number from 1 to 50,000. This field specifies the number of records that the search results display in a page. The default number is 500.
- On the Accounting tab under Setup > Campus Locations > Add/Edit (button):
  - Set **GL System to Great Plains**.
  - Specify the connect string for the **Great Plains Dynamics DB**.
  - Specify the connect string for the **Great Plains Company DB**.
  - Specify a **Batch ID**. It is usually non-numeric, but it can be numeric. For example, if the Batch ID is set to "Austin", every batch starts with "Austin".

Student Accounts Settings - Revenue Tab

Use the Revenue tab of the Student Accounts Settings form to select the detailed or summary version of the Revenue Recognition Report and to enable or disable the posting of attendance before the Last Earned Date.

To set up the revenue options for student accounts:

1. Navigate to **Setup > Student Accounts**. Select the **Revenue** tab.



2. Select the Revenue report you want to have printed when the revenue calculation is performed (Daily > Student Accounts > Revenue Recognition). The options are **Revenue Detail Report** (default) and **Revenue Summary Report**.
3. Use the **Prevent posting attendance prior to the Last Earned Date when earning by Attended Hours** option for students enrolled in a "Earn by attended hours Program Version". This system-level configuration allows posting/editing to be turned on and off for "Earn by Attended Hours Program Versions". Select this option to restrict the posting/editing of attendance to dates prior to or equal to the Last Earned Date.

The default configuration is to allow posting of attendance for all dates for all Program Versions (check box cleared).

4. Click **Save**.
5. Click **Close** to close the form.

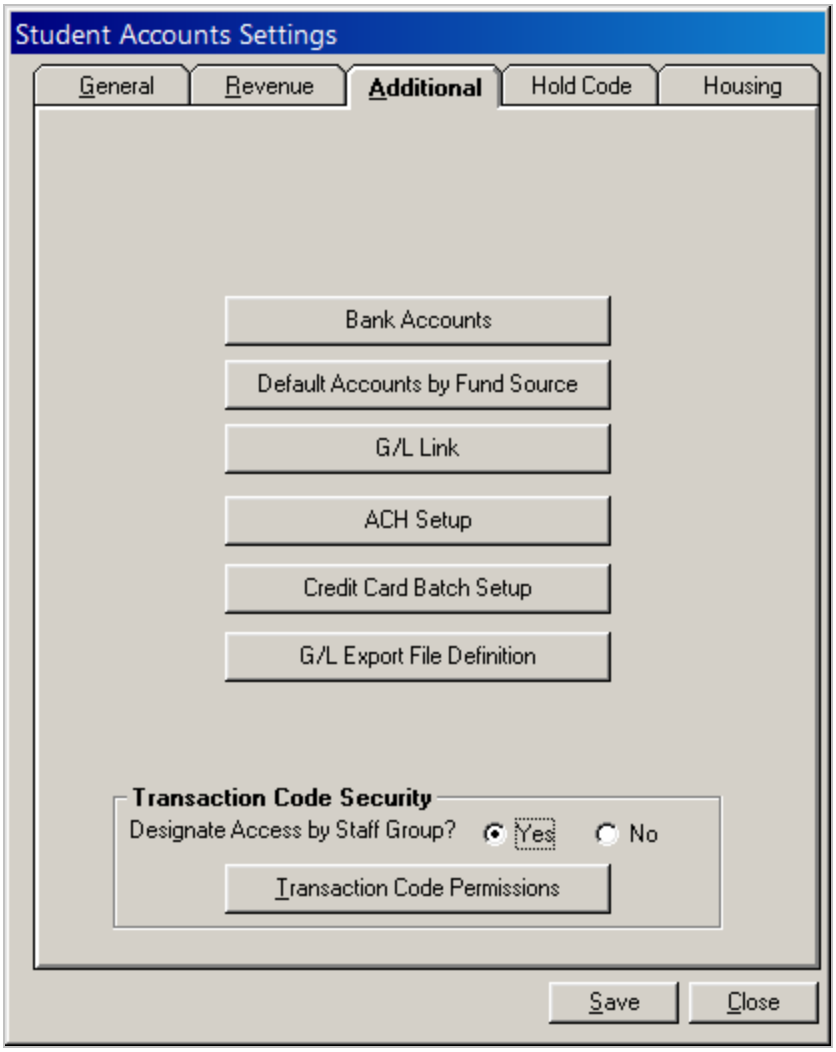
Student Accounts Settings - Additional Tab

Use the Additional tab on the Student Accounts Settings form to set up policies for the processing of funds for student accounts.

Note: If CampusVue Finance, HR & Payroll is installed, navigate to **Setup > CampusVue Finance > CampusNexus Student Journal Entry Group** to access the Journal Entry Group Setup form. Use this form to set up journal entry groups and associate them with CampusVue Finance, HR & Payroll Fiscal Year/Ledger combinations and Campus Groups.

To set up additional features for student accounts:

1. Navigate to **Setup > Student Accounts**. Select the **Additional** tab.



2. Click **Bank Accounts** to select the default bank accounts for each campus. These are the accounts to be used when bank deposits are processed. For more information, see Bank Accounts.
3. Click **Default Accounts by Fund Source** to select default bank accounts for various fund sources and payment types (cash, check, credit card, etc.) for the associated campuses. For more information, see Bank Accounts and Default Bank Accounts.
4. Click **G/L Link** to set up basic accounting relationships between CampusNexus Student and your general ledger

system. For more information, see GL Link.

Also see Initial Configuration of CampusNexus Finance, HR & Payroll.

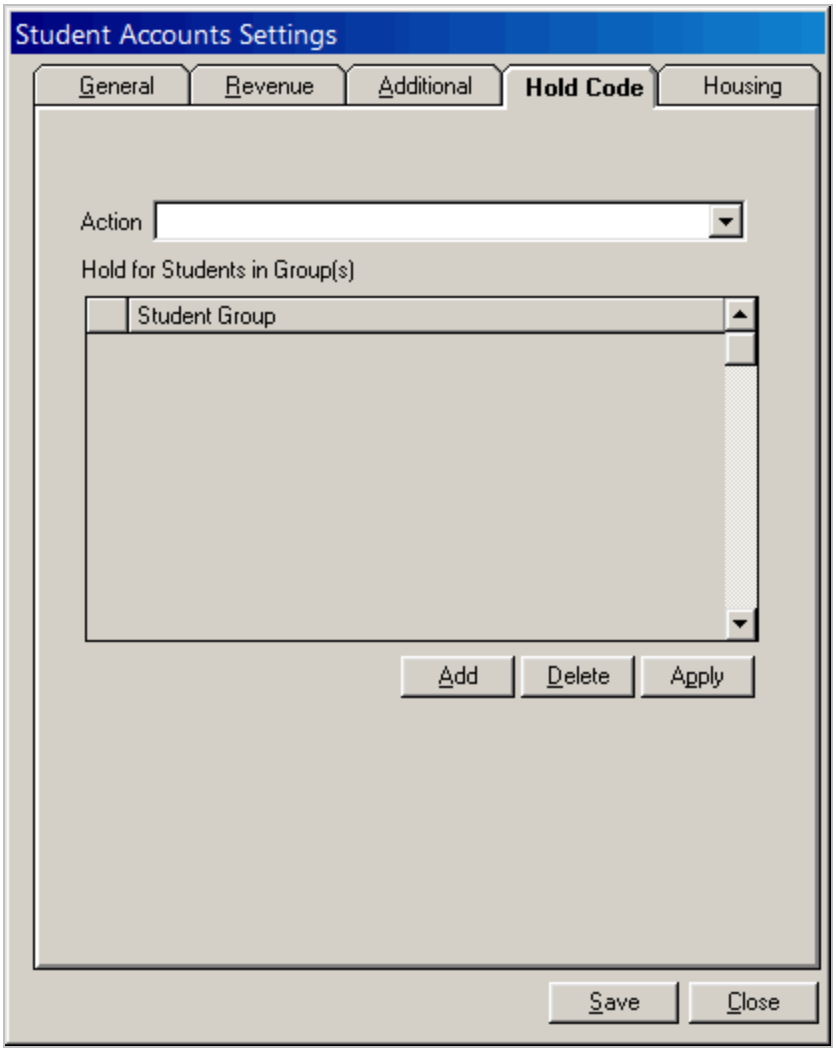
5. Click **ACH Setup** to set up Automated Clearing House (ACH) processing for your institution. For more information, see ACH Setup.
6. Click **Credit Card Batch Setup** to specify the description and code related to the credit card processor (e.g., VeriSign) and the configuration destination for batch files. For more information, see Credit Card Batch Setup .
7. Click **G/L Export File Definition** to configure the layout of a flat file that can be produced within the Release to General Ledger option in CampusNexus Student. You can define that flat file according to the specific needs of your institution's G/L package. For more information, see G/L Export File Definition.
8. In the Transaction Code Security section, select **Yes** to allow posting of transactions based on a staff member's transaction code security level, The **Transaction Code Permissions** button is enabled. For more information, see Transaction Code Security.

Student Accounts Settings - Hold Code Tab

Hold codes represent specific reasons why a student could be put on hold. A student could be put on ACH hold for an NSF payment, or some other reason. A student could be put on CC hold for an expired, or otherwise invalid credit card.

To set up hold for student accounts:

1. Navigate to **Setup > Student Accounts**. Select the **> Hold Codes** tab.



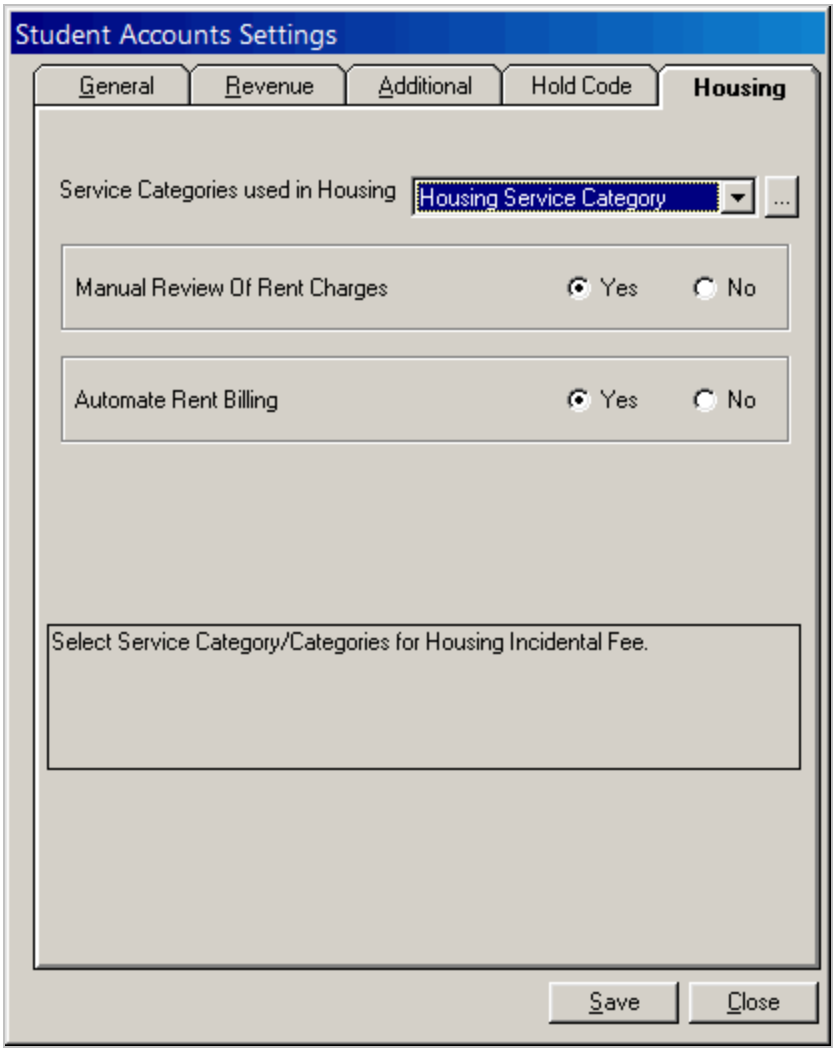
2. Select an **Action**. The options are **ACH Hold**and **CC Hold** (Credit Card Hold).
3. Click **Add** to select a Student Group to associate with the Action. A blank line appears in the Student Group grid.
4. Click in the blank line and click to select a student group.
5. Click **Apply**.
6. Click **Save**.
7. Click **Close** to close the form.

Student Accounts Settings - Housing Tab

The Housing tab on the Student Accounts Settings form contains option that enable users manage housing transactions pertaining to deposits, application fees, and rent charges.

To set up housing options for student accounts:

1. Navigate to **Setup > Student Accounts**. Select the **Housing** tab.



2. Select the appropriate values for the following fields:

   - Service Categories used in Housing

     Select the service categories available to Housing module users that will allow them to post incidental charges.

     Note: Service Categories listed in the Students Accounts Settings form are defined under Lists > Student Services > Services Categories.

- Manual Review Of Rent Charges

  Select **No** to post rent charges directly to the student ledger. Select **Yes** to set the rent charges pending for a manual review at a later date.

- Automate Rent Billing

  Select **Yes** to configure the system automate the rent billing process. Select **No** to enable manual billing of rent charges based on lease and charge schedule dates.

3. Click **Save**.
4. Click **Close** to close the form.

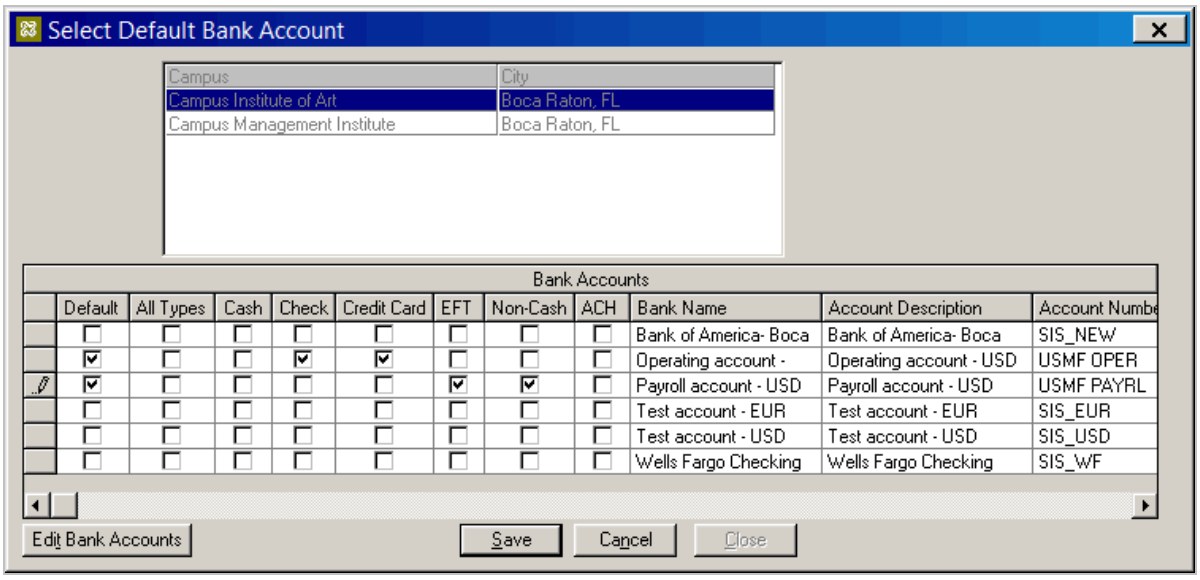
Bank Accounts and Default Bank Accounts

The Bank Accounts forms enable users with the appropriate permissions to set up bank accounts. Once a bank account is set up, the user can designate accounts as default bank accounts for various fund sources and payment types (cash, check, credit card, etc.).

When bank accounts are set up, staff can post payments using a specific fund source code or payment type, and have the bank account field populate automatically. This security feature prevents users from posting funds accounts set up to for other purposes.

To set up or edit a bank account:

1. Navigate to **Setup > Student Accounts**. Select the **Additional** tab.
2. Click **Bank Accounts**. The Select Default Bank Account form is displayed. The top part of the form lists all campuses associated with your institution. When you select a campus, the bottom part of the form displays the bank accounts associated with the selected campus.



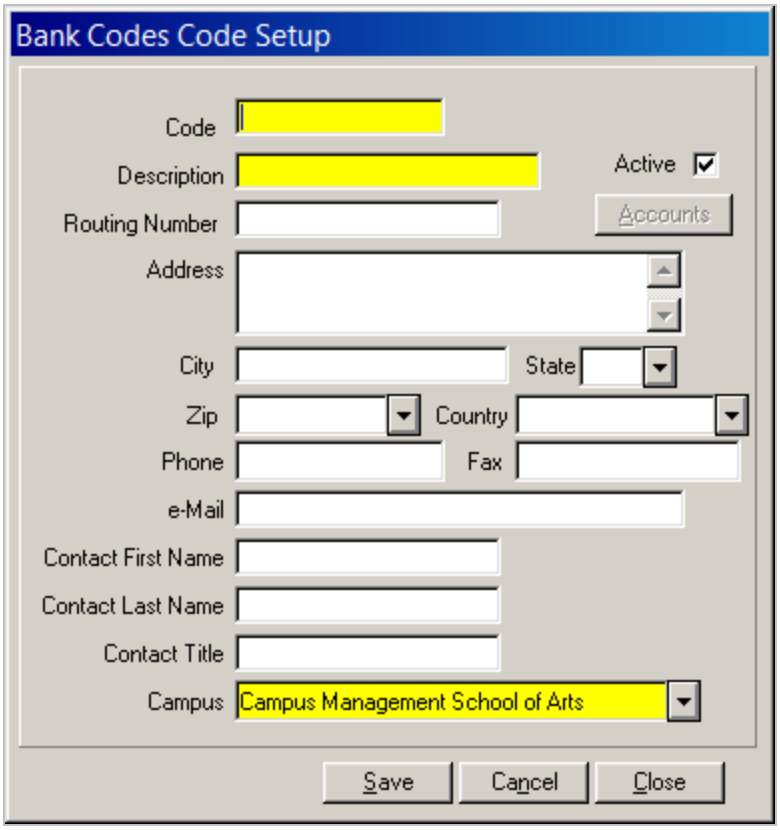
3. To set an account as a default bank account for a payment type, select the **Default** check box to indicate that the account is to be used as a default for a single payment type and/or for one or more fund sources. Accounting staff with the appropriate levels of permission can change the default for a special transaction, if necessary.

   Select the check box that corresponds to the payment type, e.g., **Cash**, **Check**, **Credit Card**, **EFT**, **Non-Cash**, and **ACH**.

   Use the **All Types** option for payment types not otherwise designated as defaults. You can select only one bank account as the default for a single payment type.

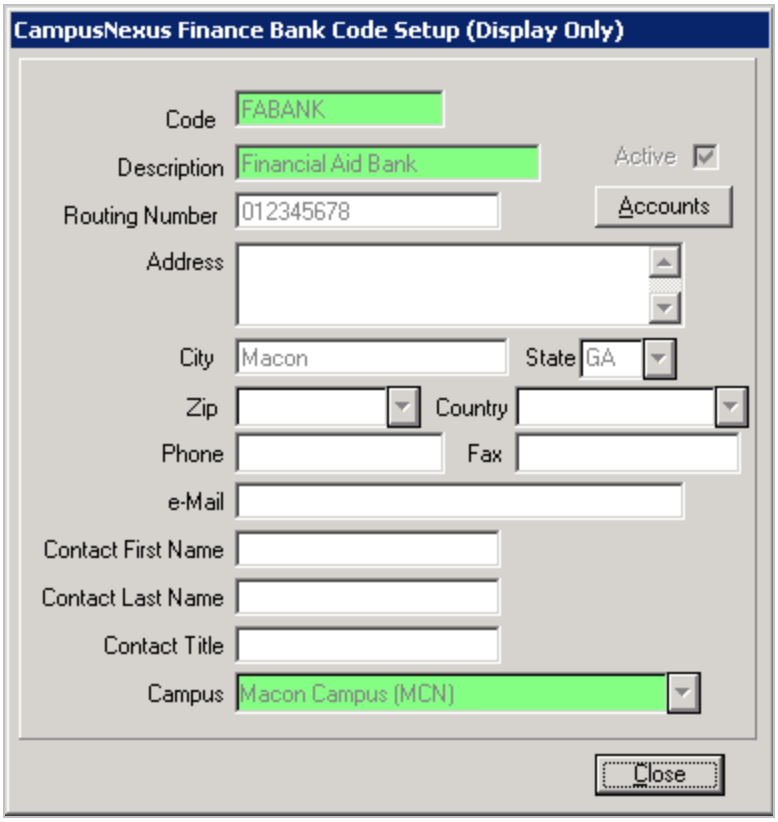
   Note: When CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll, bank accounts are set up in CampusNexus Finance, HR & Payroll, but can be edited in CampusNexus Student. In this configuration, the Select Bank Account form will display a button labeled **Edit Bank Accounts**; otherwise the button is labeled **Setup Accounts**.

4. To set up bank codes and associated bank accounts, click **Setup Accounts**. The Bank Codes Code Setup form is displayed.



When CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll, click **Edit Bank Accounts**. The CampusNexus Finance Bank Code Setup (Display Only) form is displayed. This form presents the bank information that was set up in CampusNexus Finance, HR & Payroll in read-only mode; however, you can click the **Accounts** button to view bank information created in CampusNexus Finance, HR & Payroll and to edit CampusNexus Student bank account specific fields.

The permissions assigned to the user in CampusNexus Finance, HR & Payroll determine which GL accounts the user can view in CampusNexus Student. The user can only see the Main Account with dimensions in the range that was established in CampusNexus Finance, HR & Payroll



For additional instructions on working with bank codes, refer to Lists > Student Accounts > Bank Codes.

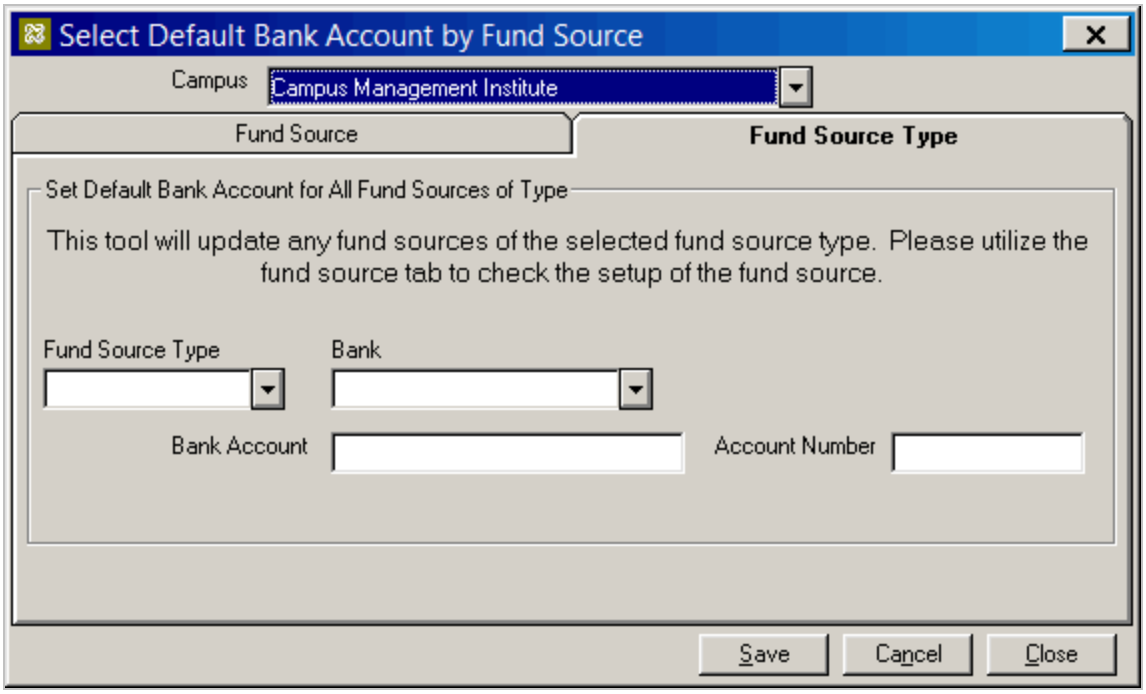
Note: Be sure your bank accounts all have designated general ledger accounts for deposits and withdrawals in the G/L link transactions.

Default Accounts by Fund Source

Once a bank account is set up, you can designate accounts as default bank accounts for various fund sources and payment types (cash, check, credit card, etc.). When bank accounts are set up, staff can post payments using a specific fund source code or payment type, and have the bank account field populate automatically. This security feature prevents users from posting funds accounts set up to for other purposes.

To set up a default bank account for each fund source type:

1. Navigate to **Setup > Student Accounts**. Select the **Additional** tab.
2. Click **Default Accounts by Fund Source**. The Select Default Bank Account by Fund Source form is displayed. You can define default bank accounts by Fund Source (tab) or Source Type (tab).



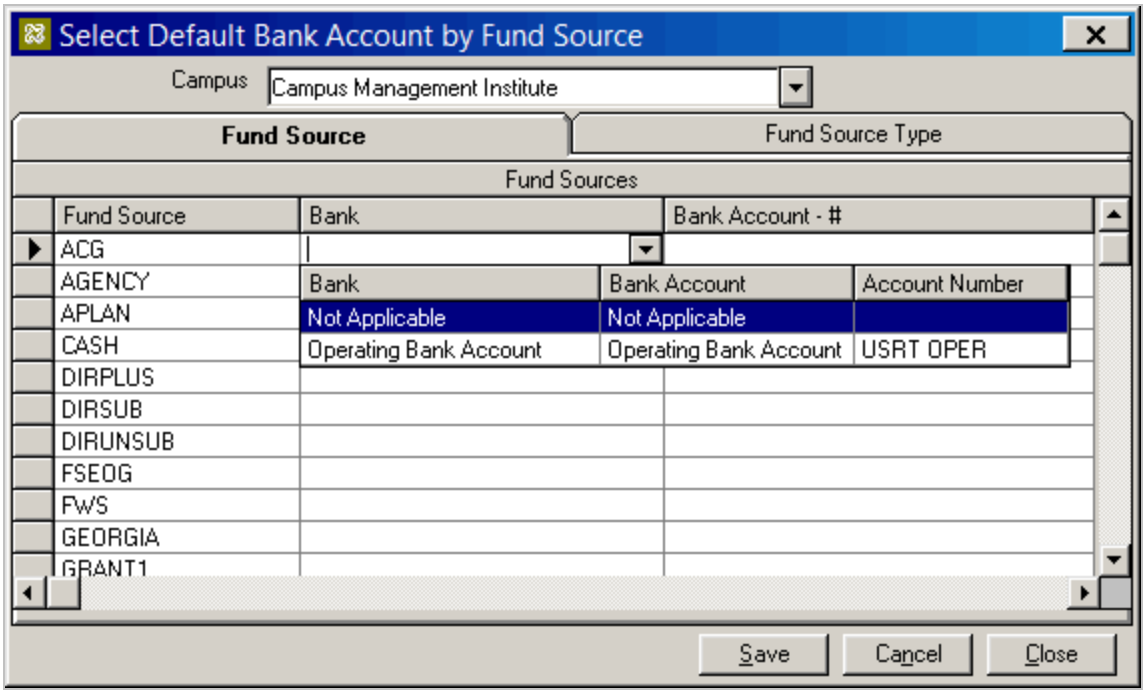
3. Select a **Campus**. All accounts associated with this campus are displayed in the Fund Sources grid.

   If multiple campuses use one account, repeat this process for each campus.

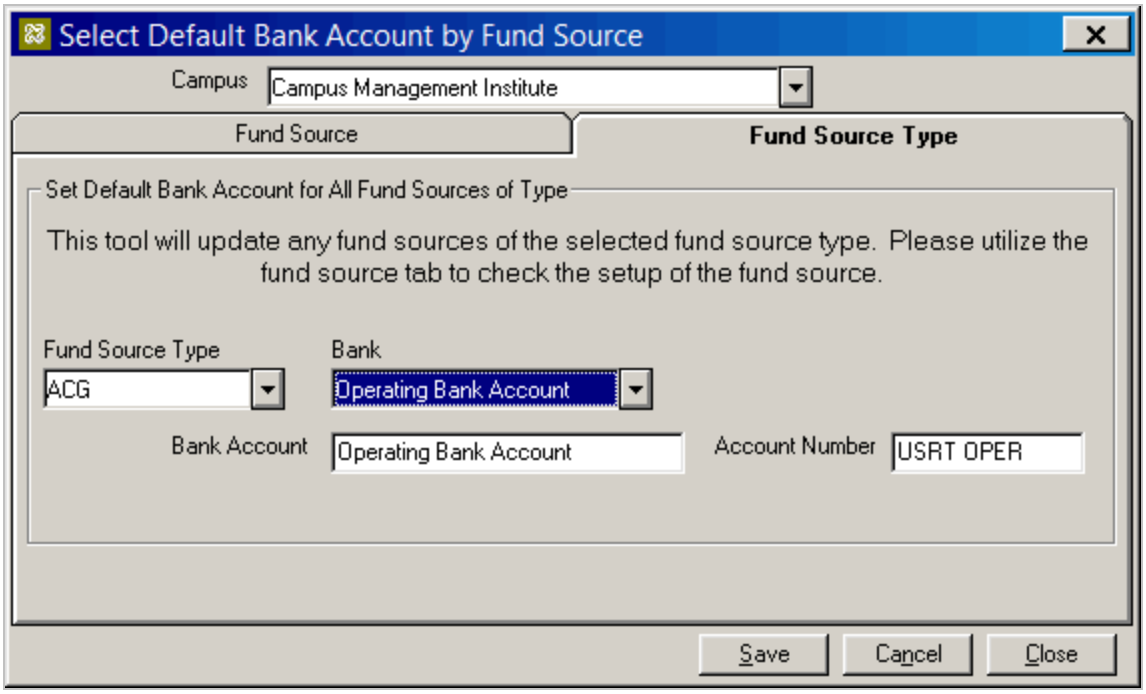
4. Associate a **Fund Source** with a specific bank account. To select a Fund Source, click the field to the left of the field that displays the code for the fund source. A right arrow marks your selection.

   The bank account for the Fund Source takes precedence over the bank account for the payment type. If no bank account has been set up for a payment type, or fund source, the account field auto-populates with the default bank account for the campus.

5. Click inside the **Bank** field. A drop-down list is enabled. Select a bank account from the list. The grid auto-populates the Bank, Bank Account and Account Number fields.



6. Click **Save** to assign the fund source to this bank account. CampusNexus Student displays a verification message indicating that the fund source bank account has been updated.
7. Click the **Fund Source Type** tab to set up default bank accounts for Fund Source Types.
8. Select a **Fund Source Type**. The options include Cash, Direct Unsubsidized Loan, Grant, etc..
9. Select a **Bank**. A drop-down list is displayed with all bank accounts listed. Select the appropriate account. The system populates the Bank Account and Account Number fields. These are read-only fields. They cannot be changed from this form.



10. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Student Accounts Settings form.

ACH Setup

In CampusNexus Student you can capture student bank account information and store it in a secure, encrypted format. If your institution and financial institutions are set up to provide files in standard Automated Clearing House (ACH) response file format, your institution can provide students with direct withdrawal of funds and direct deposit of third-party funds to student accounts.

Once a campus has been set up as an ACH processor, you must record and store the student's bank account information. Authorization for direct deposit must be obtained if the student wishes to receive refunds or stipends through ACH. Once a payment, refund, or stipend has been scheduled and approved, you select the ones to be sent to ACH through the Process Refunds/Stipends wizard and export payments, refunds, and stipends in the batch using the Process Electronic Draft wizard.

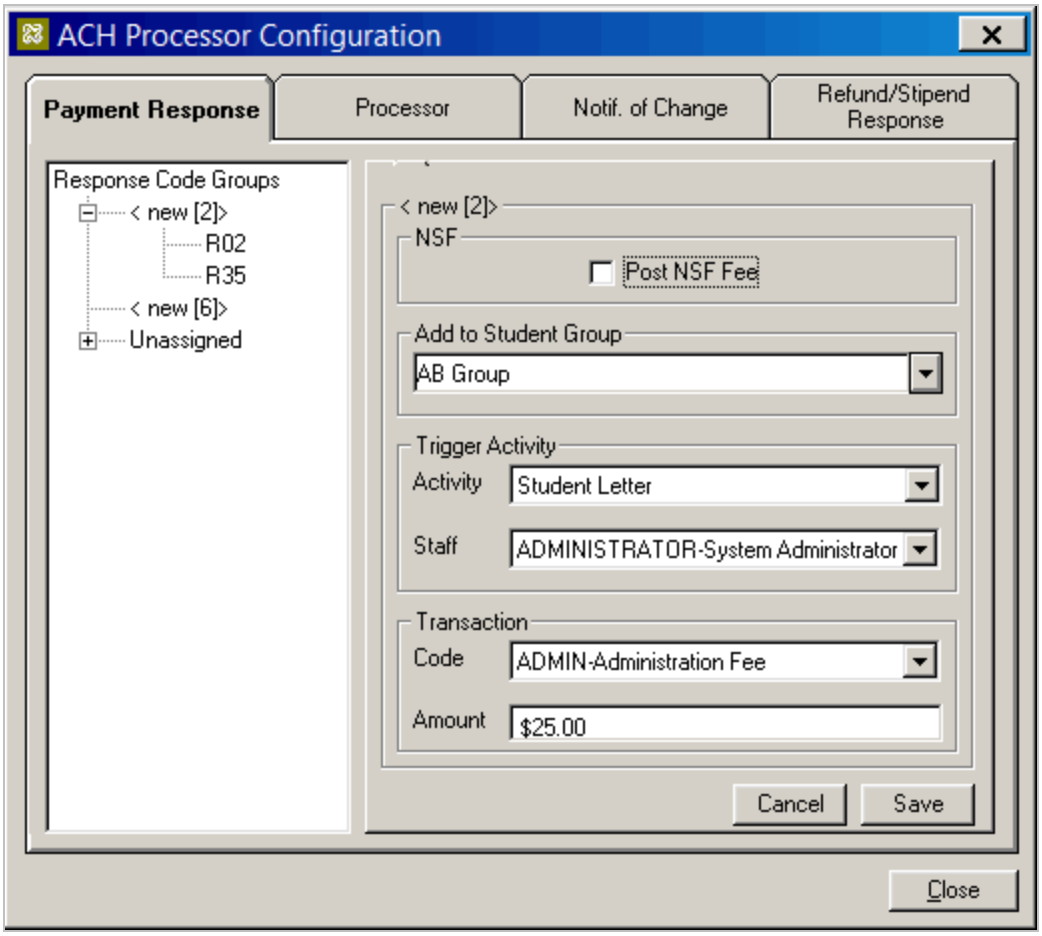
For detailed information on ACH rules and processing, contact the National Automated Clearing House Association, http://www.nacha.org.

To set up ACH processing for your institution:

1. Navigate to **Setup > Student Accounts**. Select the **Additional** tab.
2. Click **ACH Setup**. The ACH Processor Configuration form is displayed. The form has four tabs:
    - Payment Response
    - Processor
    - Notif. of Change
    - Refund/Stipend Response

ACH Payment Response Tab

The Payment Response tab defines your school's policy for payments in which the student's bank sent a response. The directory tree on the left side of the tab enables the authorized user to create groups and associate Response Codes with these groups. Unassigned groups and associated Response Codes are not processed through CampusNexus Student.

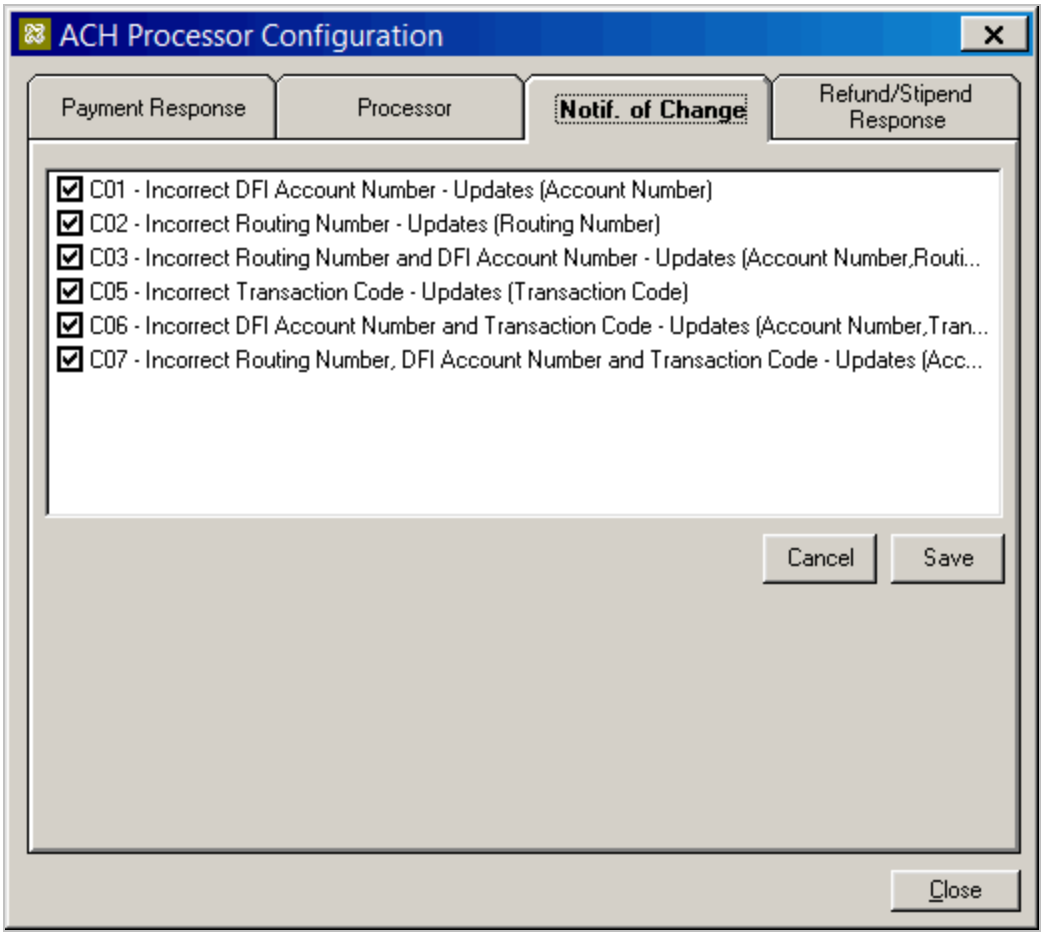


To add or remove a group with associated Payment Response Codes:

1. Place your cursor on the words "Response Code Groups" and right-click. A list is displayed with the options to add or delete a group. Click **Add Group** to add a group.
2. To delete a group, place your cursor on an existing group name and right-click. Select **Delete group** to remove it. Click **Delete Group**.
3. Select the **Post NSF** check box if your institution policy is to post an NSF to the student's Ledger Card when a payment was rejected. Most institutions charge a fee for non-sufficient funds (NSF) checks. The fee is applied automatically when an NSF is posted as a reverse payment. If you select Post NSF, the Transaction lists become disabled. This is because most schools that charge an NSF fee do not charge additional fees in conjunction with the transaction.
4. Use the list next to the **Add to Student Group** field to associate a Response Code Group with an existing campus group. For example, assign members of the NSF group to an existing Hold Group.
5. Select a **Trigger Activity** associated with the Payment Response Code Groups.
6. Select a **Staff** member associated with the trigger activity.
7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

ACH Notification of Change Tab

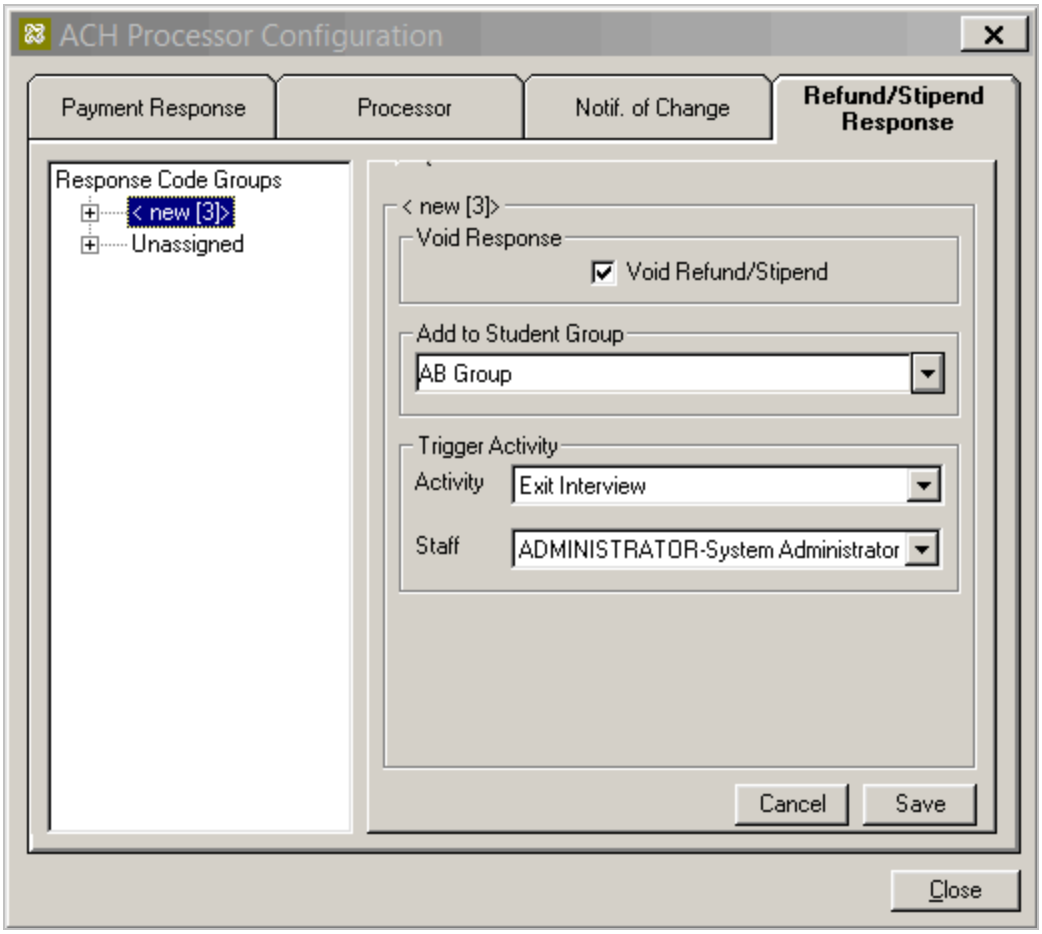
A Notification of Change (NOC) is created by a student's bank to notify the institution that previously valid information has become outdated. CampusNexus Student can update the file with the correct information if it is set up to do so from the Notification of Change tab.



Check boxes on this tab correspond to NOC Codes (C01, C02, etc.). Select as many as required. The student's record and all forms in CampusNexus Student in which this information is displayed are also updated. For example, if C02 (incorrect routing number) is selected, CampusNexus Student updates all student banking forms with the correct routing number.

ACH Refund/Stipend Response Tab

The Refund/Stipend Response tab defines your school's policy for refunds when the student's bank sends a response. The directory tree on the left side of the tab enables the authorized user to create groups and associate Response Codes with these groups. Unassigned groups and associated Response Codes are not processed through CampusNexus Student.



To add or remove up a new group with associated Refund Response Codes:

1. Place your cursor on the words "Response Code Groups" and right-click. A list is displayed with the options to add or delete a group. Click **Add Group** to add a group.
2. To delete a group, place your cursor on an existing group name and right-click. Select **Delete group** to remove it. Click **Delete Group**.
3. Select the **Void Refund/Stipend** check box if your institution policy is to post voided transactions to the student's Ledger Card when a refund transaction is voided. If reverse GL entries are required for refunds, select this option. This option may be assigned to individual response codes as necessary.
4. Use the list next to the **Add to Student Group** field to associate a Response Code Group with an existing campus group.
5. Select a **Trigger Activity** associated with the Refund Response Code Groups.
6. Select a **Staff** member that will be associated with the trigger activity.
7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To generate an ACH batch processing report:

Navigate to **Reports > Student Accounts > ACH Batch Report** and **Reports > Student Accounts > ACH Batch Detail**.

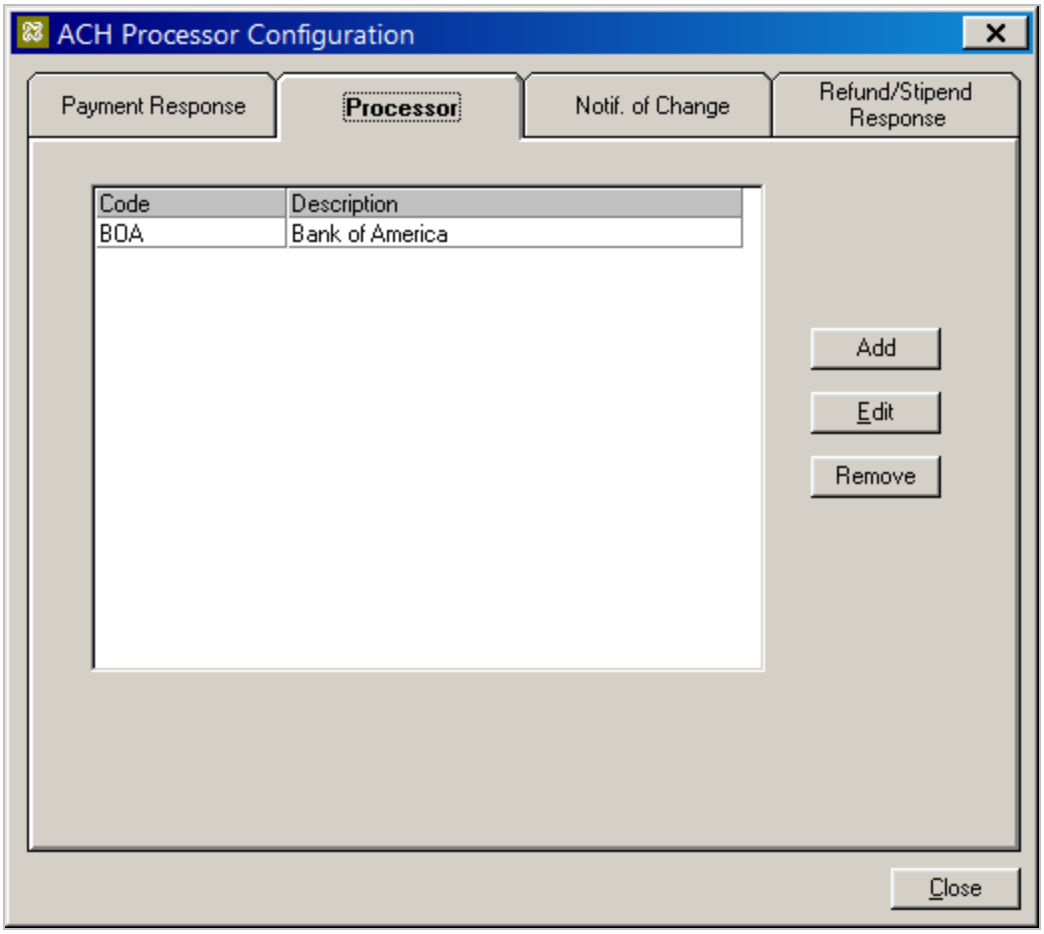
ACH Setup - Processors

CampusNexus Student allows you to configure multiple ACH processors. You can add, edit, and remove ACH processors on the Processor tab of the ACH Processor Configuration form.

Note: It is assumed that you have already set up default bank accounts for this purpose. See Payment Information for setting up the student's bank account information.

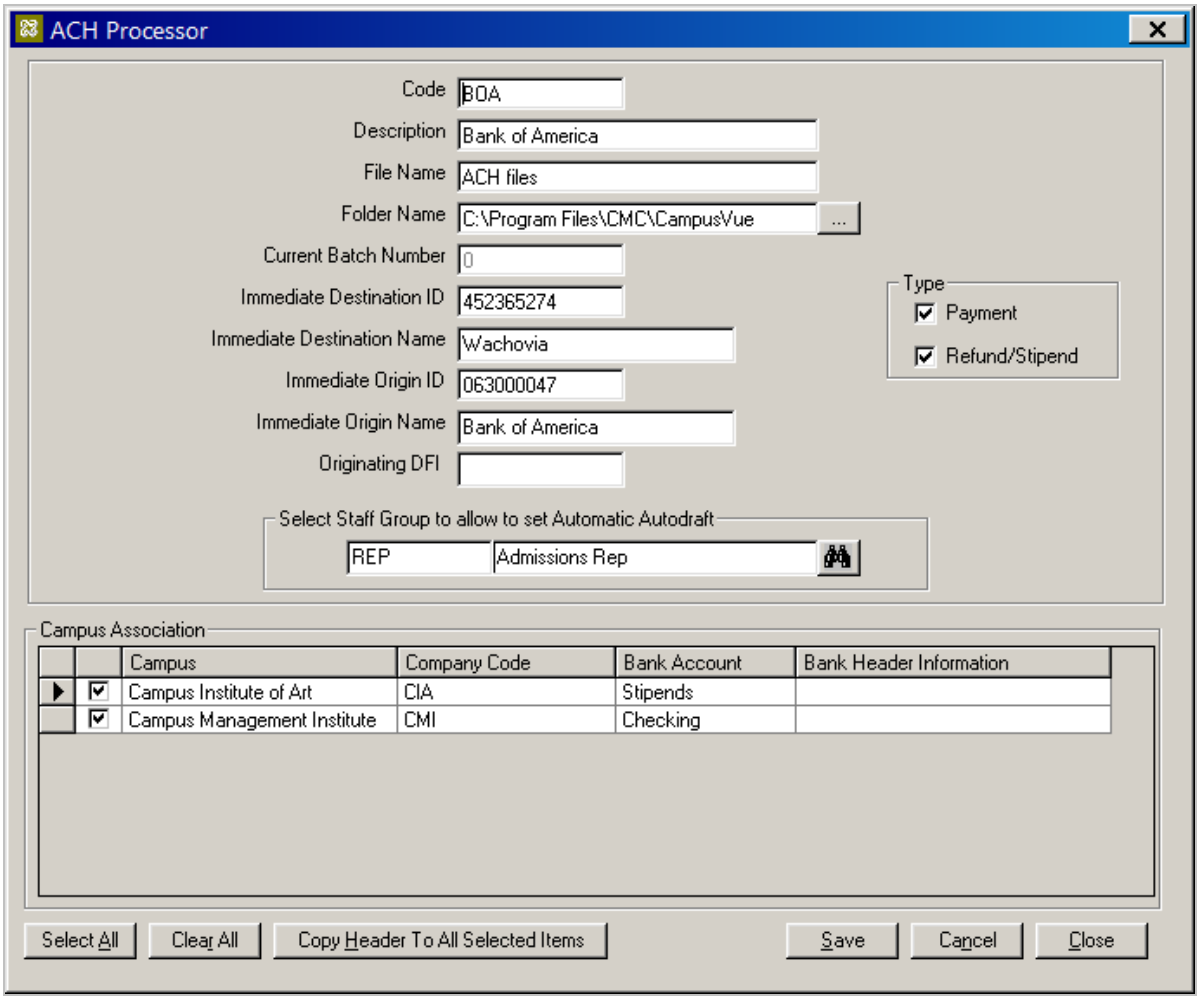
To add or edit ACH processors:

1. Navigate to **Setup > Student Accounts**. Select the **Additional** tab and click **ACH Setup**. The ACH Processor Configuration form is displayed. Click the **Processor** tab.



2. Click **Add**, or select a record and click **Edit**. The ACH Processor form is displayed.

   Note: If all campuses have been assigned an ACH processor, CampusNexus Student displays the following message: *All campuses have been assigned an ACH processor. Setup cannot continue.* Click **OK** to return to the ACH Processor form. Click **Close** to close the form.



3. Specify appropriate options. See Field Descriptions.

Field Descriptions

Field	Description
Code	School-defined Code name to serve as an abbreviation for the ACH
Description	Name of the ACH with some identifying information. For example, "Check-Kwik, New York" to indicate that this is the ACH processor your institution's New York campus uses.
File Name	Name of the file that is sent to the ACH for batch processing
Folder Name	File folder for the ACH information to be transmitted to the processor Click ... to select a disk drive and folder. You must select a folder that has already been created by a system administrator. You cannot create a new folder unless you have system administration privileges.

Field	Description
Current Batch Number	A unique identifier of this batch of transactions sent to the ACH.
Immediate Destination ID	10-character routing number of the ACH.
Immediate Destination Name	Name of the ACH.
Immediate Origin ID	9-character routing number of the "Sender", which is your institution.
Immediate Origin Name	Name used to define your institution (up to 10 alphanumeric character).
Originating DFI	Originating Depository Financial Institution used to identify a site as the DFI originating the entries. This optional field allows up to 8 numeric digits. If it is left blank, CampusNexus Student uses the Immediate Origin ID. You can enter the Originating DFI while configuring the ACH processor information, and once it is configured, it will be used in the ACH export file in field positions 80 to 87 of the 5 record and 8 record.
Select Staff Group to allow to set Automatic Autodraft	Click to search for the Staff Group that will be allowed to set automatic auto drafts.
Type	Type of transactions that this ACH processor transmits. The options are: • Payment (payments from the student) • Refund/Stipend (refunds to the student/stipends to the student).
Campus Association	Select the campuses that you want to associate with the new processor.You can set up multiple ACH processors per Campus.
Bank Header Information	Specify the Bank Header Information. CampusNexus Student produces an export file that the Automated Clearing House (ACH) uses to execute transactions between banking institutions and clients. Some banks may require a formatted header record to appear as the first record in the file for processing the export file correctly. It is time-consuming to manually insert the formatted header record into the export file each time you process an ACH transaction, considering that you may process several ACH file exports daily. Therefore, CampusNexus Student provides an automated process for adding the header records. When processing an ACH file through the Process Electronic Draft wizard, CampusNexus Student inserts the header records that you have set up and places the header in the exported ACH file.

4. Click **Select All** to highlight all records, or click **Clear All** to cancel the selection of all records.
5. To copy the text in the Bank Header Information column to other rows, click **Copy Header to All Selected Items**. The Bank Header Information value is copied and placed in the Bank Header Information field for all records that

were selected. An informational message is displayed if Bank Header Information already exists in any of the selected campuses. The message presents two options:

- Select **Copy Bank Header Information to blank column(s) only** to copy the Bank Header Information to the selected campuses that do not already have values in the Bank Header Information field.
- Select **Copy Bank Header Information to all column(s)** to override any values that were in the Bank Header Information field and replace them with the new Bank Header Information value.

You must click **OK** after selecting an option to trigger this automated feature. If you do not want any changes to occur, click **Cancel**.

If you are trying to copy a Bank Header Information value when the value is blank, an information message is displayed stating "*To copy Bank Header Information for all selected campuses, the Bank Header Information row must be populated*".

6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

ACH Response Codes

ACH Response Codes represent reasons for non-payment by the ACH Processor. Typical reasons are insufficient funds in the student's account (NSF), incorrect routing number, account closed, etc.

For detailed information on ACH rules and processing and detailed descriptions of response codes, contact the National Automated Clearing House Association, http://www.nacha.org.

Note: Response codes are assigned to groups in the Payment Response tab of the ACH Processor Configuration form. When you point over a Response Code in the left panel of this tab, a the Reason Name is displayed.

ACH Response Codes

Response Code	Reason Name	Reason Description
R01	Insufficient Funds	The available and/or cash reserve balance is not sufficient to cover the dollar value of the debit entry
R02	Account Closed	A previously active account has been closed by action of the customer or the RDFI
R03	No Account/Unable to Locate Account	The account number structure is valid and it passes the check digit validation, but the account number does not correspond to the individual identified in the entry or the account number designated is not an open account.
R04	Invalid Account Number	The Account number structure is not valid. The entry may fail the check digit validation or may contain an incorrect number of digits
R05	Reserved	Reserved
R06	Return per ODFI's Request	The ODFI has requested that the RDFI return the ACH entry. If the RDFI agrees to return the entry, the ODFI must indemnify the RDFI according to Article Five (Return, Adjustment, Correction, and Acknowledgment of Entries and Entry Information) of these Rules.

Response Code	Reason Name	Reason Description
R07	Authorization Revoked by Customer (Adjustment Entries)	The RDFI's customer (the Receiver) has revoked the authorization previously provided to the Originator for this particular transaction. The Receiver may request immediate credit from the RDFI for an unauthorized debit. The request must be made in writing within fifteen (15) days after the RDFI sends or makes available to the Receiver information pertaining to that debit entry. The Receiver must also provide the RDFI with a written statement under penalty of perjury that the authorization for the debit entry has been revoked by the Receiver. The RDFI must return the rescinded transaction to its ACH Operator by its deposit deadline for the adjustment entry to be made available to the ODFI no later than the opening of business on the banking day following the sixtieth calendar day following the Settlement Date of the original entry. This code and related Operating Rule provisions apply to Consumer entries only. (Note: This Return Reason Code may not be used for POP entries, Single-Entry WEB entries, or TEL entries.)
R08	Payment Stopped	The Payment of a debit transaction has the right to stop payment on any specific ACH debit.
R09	Uncollected Funds	Sufficient book or ledger balance exists to satisfy the dollar value of the transaction, but the dollar value of transactions in process of collection brings the available and/ or cash reserve balance below the dollar value of the debit entry.
R10	Customer Advises Not Authorized, Notice Not Provided, Improper Source Document, or Amount of entry Not Accurately Obtained from Source Document	
R11	Check Truncation Entry Return	This Reason is only used if no other return reason code is applicable. The addenda Record should specify the reason for return. (i.e., "exceeds dollar limit").
R12	Branch Sold to another DFI	A Financial institution may continue to receive entries destined for an account at a branch that has been sold to another financial institution. Because the RDFI no longer maintains the account and is unable to post the entry, it should return the entry to the ODFI.
R14	Representative Payee Deceased or Unable to Continue in that Capacity	The representative payee is a person or institution authorized to accept entries on behalf of one or more other persons. The representative payee is deceased or unable to continue in that capacity. The beneficiary is not deceased.

Response Code	Reason Name	Reason Description
R15	Beneficiary or Account Holder (other Than a Representative Payee) Deceased	(1) The beneficiary is the person entitled to the benefits and is deceased. The beneficiary may or may not be the account holder or (2) The account holder is an owner of the account and is deceased.
R16	Account Frozen	The Funds in the account are unavailable due to specific action taken by the RDFI or by legal action.
R17	File Record Edit Criteria	Some Fields that are not edited by the ACH Operator are edited by the RDFI. The fields causing the processing error must be identified in the addenda record information field of the return.
R20	Non-Transaction Account	The ACH entry destined for non-transaction account, as defined in Regulation D, would include an account against which transactions are prohibited or limited or a pass-through where the entry is for a credit union or thrift organization and Regulation E descriptive requirements cannot be met.
R21	Invalid Company Identification	The identification number used in the Company Identification Field is not valid. This Return Reason Code is normally used on CIE transactions
R22	Invalid Individual ID Number	In CIE and MTE entries, the Individual ID Number is used by the Receiver to identify the account. Receiver has indicated to the RDFI that the number with which the Originator was identified is not correct.
R23	Credit Entry Refused by receiver	The Receiver may return credit entry because one of the following conditions exists: 1. A minimum amount required by the Receiver has not been remitted. 2. The exact amount required by the Receiver has not been remitted. 3. The account is subject to litigation and the Receiver will not accept the transaction. 4. Acceptance of the transaction results in an overpayment. 5. The originator is not known by the Receiver; or (6) the Receiver has not authorized this credit entry to this account.
R24	Duplicate Entry	The RDFI has received what appears to be a duplicate entry; i.e., the trace number, date, dollar amount and /or other data matches another transaction. This code should be used with extreme care. The RDFI should be aware that if a file has been duplicated, the Originator may have already generated a reversal transaction to handle the situation
R29	Corporate Customer Advises Not Authorized	The RDFI has been notified by the Receiver that a specific transaction has not been authorized by the Receiver

Response Code	Reason Name	Reason Description
R31	Permissible Return Entry (CCD and CTX only)	N/A
R33	Return of XCK Entry	The RDFI determines at its sole discretion to return an XCK (Destroyed Check Entry).
R37	Source Document Presented for Payment	The source document to which an ARC entry or a POP entry relates has been presented for payment. The Receiver may request immediate credit from the RDFI for an ARC entry or a POP entry for the reason described above. The request must be made in writing within fifteen (15) days after the RDFI sends or makes available to the Receiver information relating to that debit entry. The Receiver must also provide the RDFI with a written statement under penalty of perjury that the source document was presented for payment. An RDFI using this return reason code must transmit the return entry by its ACH Operator's deposit deadline for the return entry to be made available to the ODFI no later than the opening of business on the banking day following the sixtieth calendar day following the Settlement Date of the ARC entry or the POP entry.
R38	Stop Payment on Source Document	The RDFI determines that a stop payment order has been placed on the source document to which the ARC entry relates. An RDFI using this Return Reason Code must transmit the return entry by its ACH Operator's deposit deadline for the return entry to be made available to the ODFI no later than the opening of business on the banking day following the sixtieth calendar day following the Settlement Date of the ARC entry to which the source document relates.
R40-47	Codes to be Used by Federal Government Agencies Returning ENR Entries (Automated Enrollment Entry)	
R50-53	Codes to be Used for the Return of RCK Entries (Re-presented Check Entry)	
R80-84	Codes to be Used for the Return of CBR and PBR Entries (Corporate or Consumer Cross Border Payments)	
	Codes to be Used by ACH Operator	

Response Code	Reason Name	Reason Description
R13	Receiving DFI Not Qualified to Participate	RDFI not qualified to participate or the Routing Number is not valid
R18	Improper Effective Entry Date	The effective entry date for credit entry is more than two banking days after the banking day of processing as established by Originating ACH Operator
R19	Amount Field Error	• Amount Field is non-numeric • Amount Field is not zero in an entry other than a pre-notification, DNE, ENR, Notification of Change, Refused Notification of Change, or zero dollar entry • Amount field is zero in an entry other than a pre-notification, DNE,ENR, Notification of Change, Refused Notification of Change, Return, Dishonored Return, Contested Dishonored Return, or zero dollar entry
R25	Addenda Error	
R26	Mandatory Field Error	
R27	Trace Number Error	
R28	Routing Number Checking Digit Error	
R30	RDFI Not participant in Check Truncation Program	
R32	RDFI Non-Settlement	
R34	Limited Participation DFI	
R35	Return of Improper Debit Entry	
R36	Return of Improper Credit Entry	
C01	Incorrect DFI Number	
C02	Incorrect Routing Number	
C03	Incorrect Routing Number & Incorrect DFI Account Number	
C04	Incorrect Individual Name/Receiving Company Name	Correct Individual Name/Receiving Company Name is displayed in first 22 positions of the Corrected Data Field.
C05	Incorrect Transaction Code	
C06	Incorrect DFI Account Number and Incorrect Transaction Code	

Response Code	Reason Name	Reason Description
C07	Incorrect Routing Number, Incorrect DFI Account Number and Incorrect Transaction Code	Correct Routing Number (including Check Digit) is displayed in the first nine positions of the Corrected Data Field -- correct DFI Account Number is displayed in the 10th through 26th positions of the same field -- and correct Transaction Code is displayed in the 27th and 28th positions of the same field.
C09	Incorrect Individual Identification Number	
C13	Addenda Format Error	CBR, PBR: This change code should not be used for outbound cross-border entries due to field length limitations.

Credit Card Batch Setup

CampusNexus Student offers the means to set up automated payment schedules for students and process these payments in batches. Once batches have been processed, the program automatically updates the Student Ledgers and Payment Information folders to reflect payments made. To set up web payments, see Campus Electronic Processing.

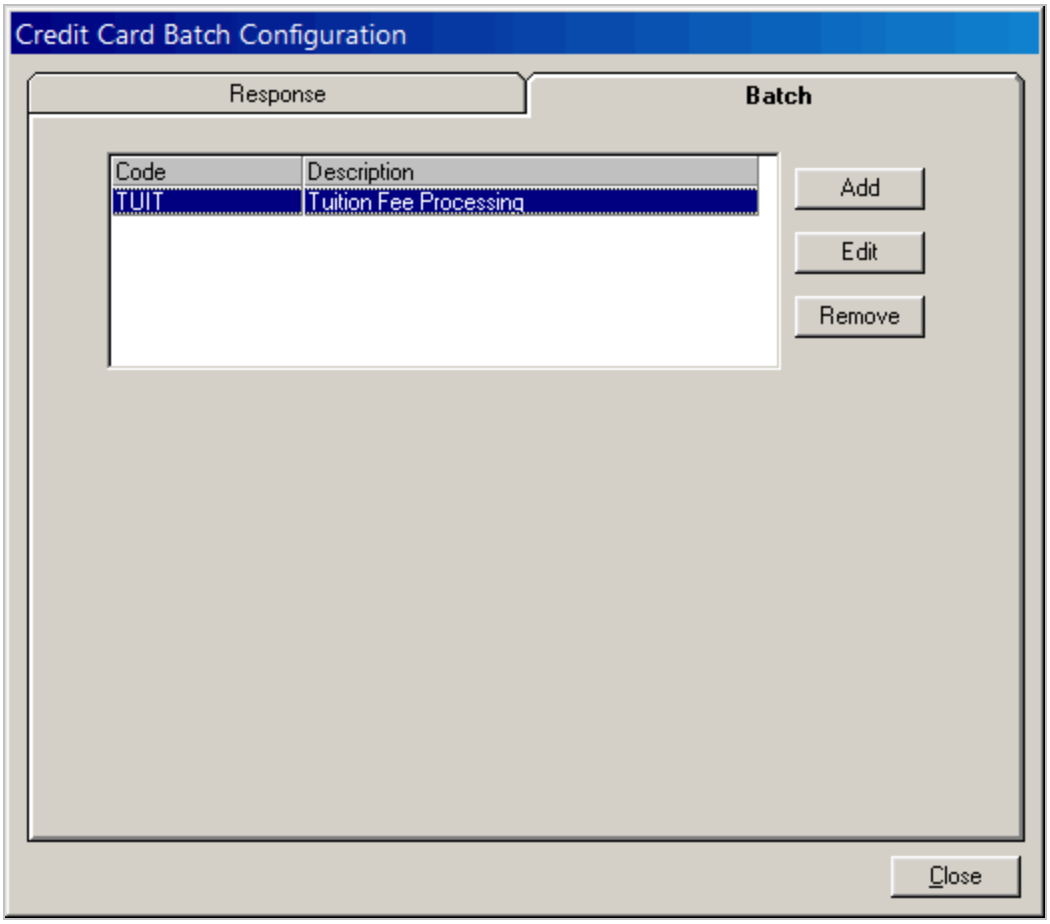
Note: Currently, CampusNexus Student supports only Verisign for credit card processing. Institutions must select Verisign as their processor and purchase Payflow Pro from VeriSign. The client must be installed on the server, allowing for the secure connection between the server and VeriSign. All transmission data are encrypted for security.

To set up credit card batch processing:

1. Navigate to **Setup > Student Accounts**. Select the **Additional** tab.
2. Click **Credit Card Batch Setup**. The Credit Card Batch Configuration form is displayed. The form has two tabs:
    - Batch
    - Response

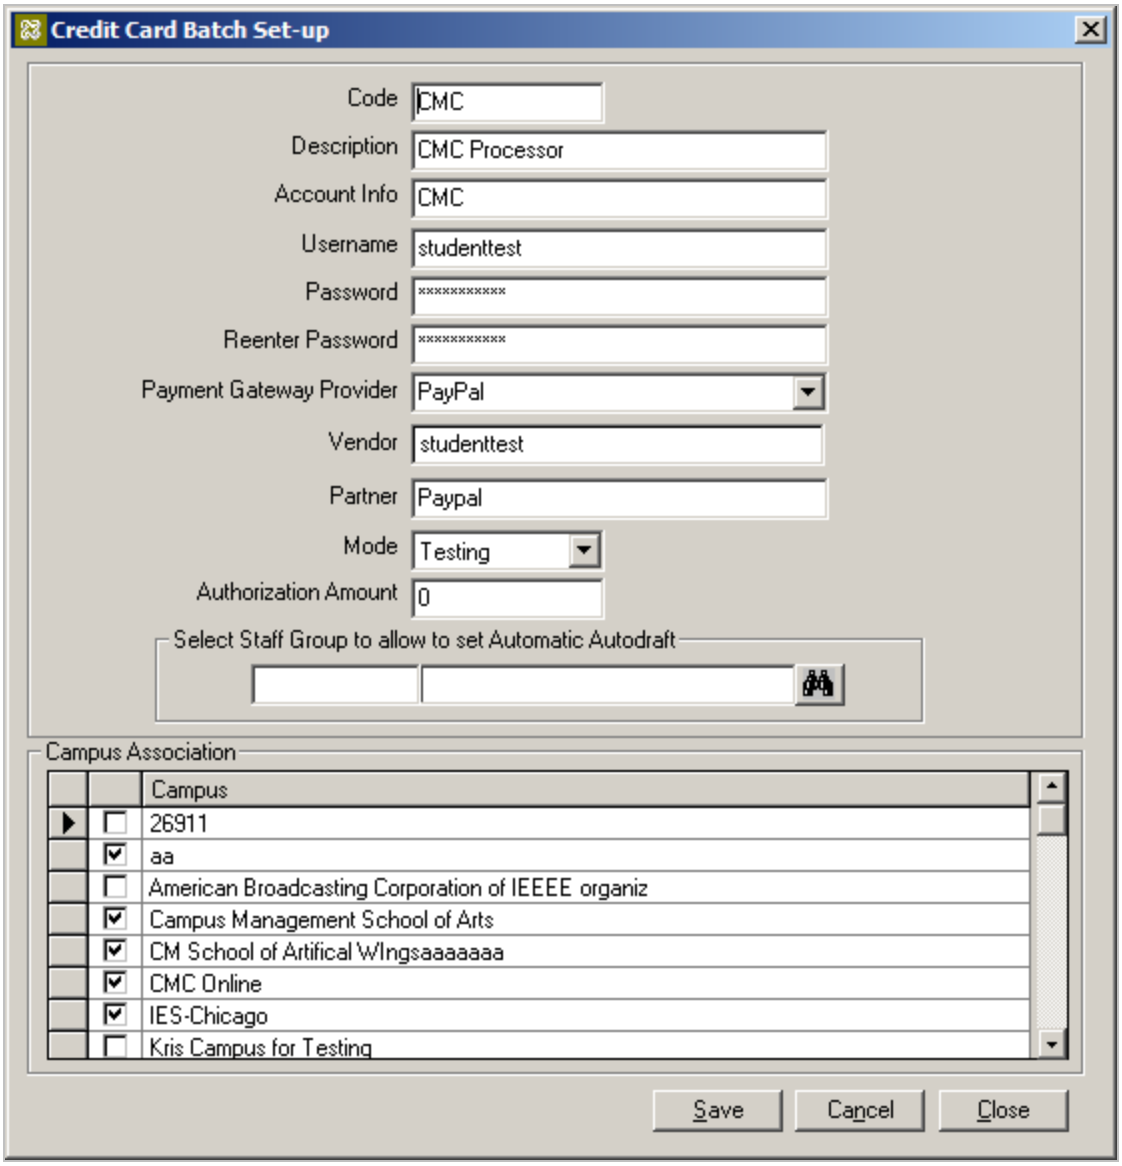
Batch Configuration

The authorized administrator sets up the batch configuration and sets permission for a staff group to work with auto drafts and the campuses to associate with this account.



To add or edit a credit card batch:

1. Click **Add**, or select a record and click **Edit**. The Credit Card Batch Set-up form is displayed.

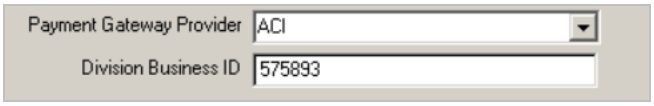


2. Specify a unique **Code**.
3. Enter a **Description**.
4. Specify the account number used for processing this batch in the **Account Info** field.
5. Specify the **User name** assigned to this account by the payment gateway provider.
6. Specify the **Password** assigned to this account by the payment gateway provider.
7. Re-type the password in the **Reenter Password** field for confirmation.

8. Select a **Payment Gateway Provider**. Currently, CampusNexus Student supports only PayPal or ACI.
9. Specify the **Authorization Amount** being used to authorize the credit card when adding a new credit card. This amount can be changed based on the requirements of the credit card processor, as some credit card processors do not allow an authorization amount of $0.00.
10. Click to select the staff group that is permitted to create batches of automated credit card payments from the **Select Staff Group to allow to set Automatic Autodraft** field.

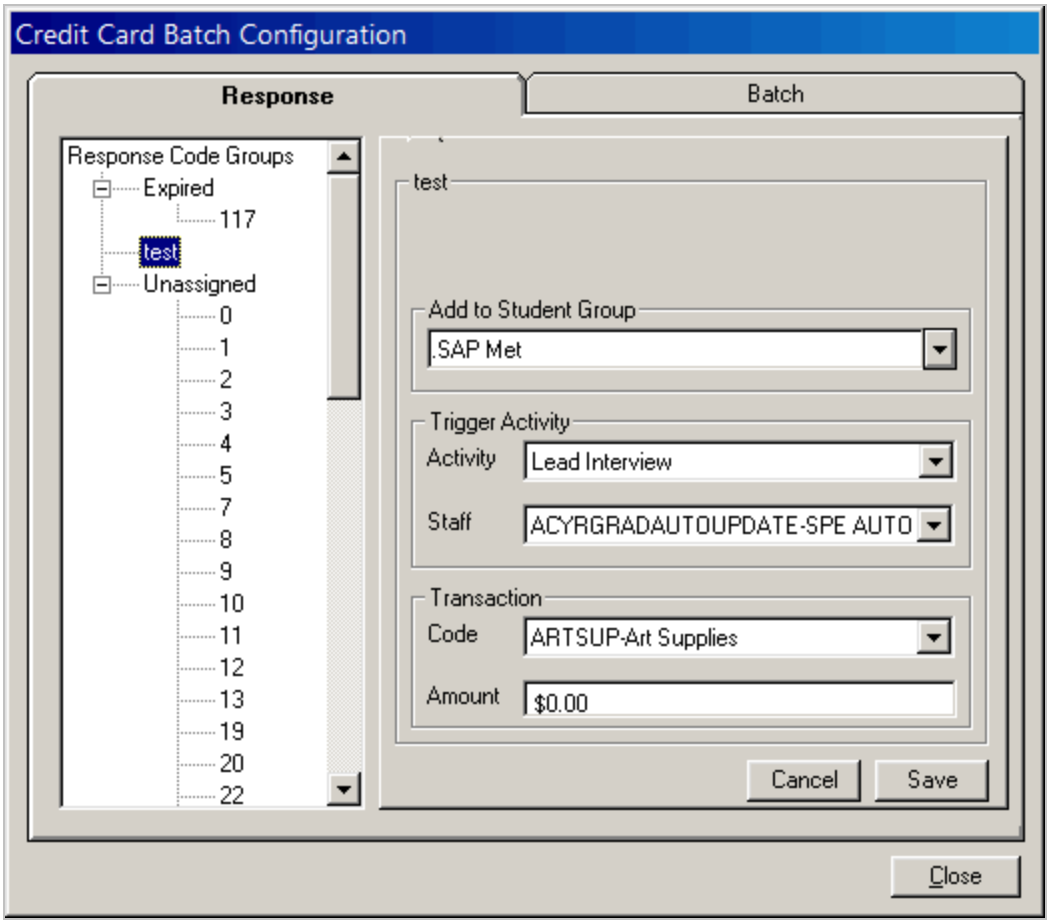
    Note: This staff group must have been set up in Setup > Staff > Staff Groups.
11. In the Campus Association section, select the **Campus**(es) associated with this processor.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When the **Payment Gateway Provider** is set to ACI, the **Vendor** field is changed to the **Division Business ID** field. Also, the **Partner** field is not displayed, as it is not applicable for ACI.



Response Configuration

The Response tab is used to configure response codes for failed transactions to associate with actions the institution will take when such failures occur. The functionality is the same as the existing ACH response codes functionality. CampusNexus Student can generate reports of failed transactions. See View Rejected Report for this information.



Response codes must belong to a named group, which you add by right-clicking on Response Code Groups and selecting Add Group. Edit the name of the new group by clicking on the name field and editing the text. Move Response Codes to a named group by highlighting the code and then dragging and dropping it into the desired group. The Unassigned group is a place-holder and cannot be configured.

To configure credit card batch processing response codes:

1. Click on an unassigned Response Code within a Response Code Group.
2. From the **Add to Student Group** list select a student group with which to associate this Response Code .
3. From the **Activity** list select a Contact Manager activity that is triggered when the select Response Code occurs. The trigger activities are Contact Manager activities that are specified under Lists > Contact Manager > Activities.
4. From the **Staff** list, select a staff member that CampusNexus Student will contact when the trigger activity occurs. The staff in the list are those specified at Setup > Staff.
5. From the **Code** list select a transaction code.
6. Specify a dollar **amount** which will be charged and posted to the student's Ledger Card when this Response Code occurs.
7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

GL Link

The General Ledger Link form is used to set up basic accounting relationships between CampusNexus Student and your general ledger system. The links are on a campus-by-campus basis.

You select which general ledger accounts are to be affected when posting transactions to Student Ledger Cards. The accounts are set up by campus and can use the same account number for all programs and program versions or separate account numbers for each program or program version.

If your CampusNexus Student system is integrated with an accounting system, see Integrated Accounting.

For information on setting up GL accounts for fund sources, subsidiaries, and miscellaneous receipts refer to the following topics:

- Fund Source GL Accounts/Refunds/Stipends
- Subsidiaries
- Miscellaneous Receipts

To define the G/L links for each campus between CampusNexus Student and your general ledger system:

1. Navigate to **Setup > Student Accounts**. Select the **Additional** tab.
2. Click **G/L Link**. The Student Accounts - General Ledger Link form is displayed.
3. Select the **Campus** for which you want to set up the G/L accounts.
4. The **Default A/R Account** for the selected campus displayed. All debits and credits to Student Ledger Cards are associated with this account.

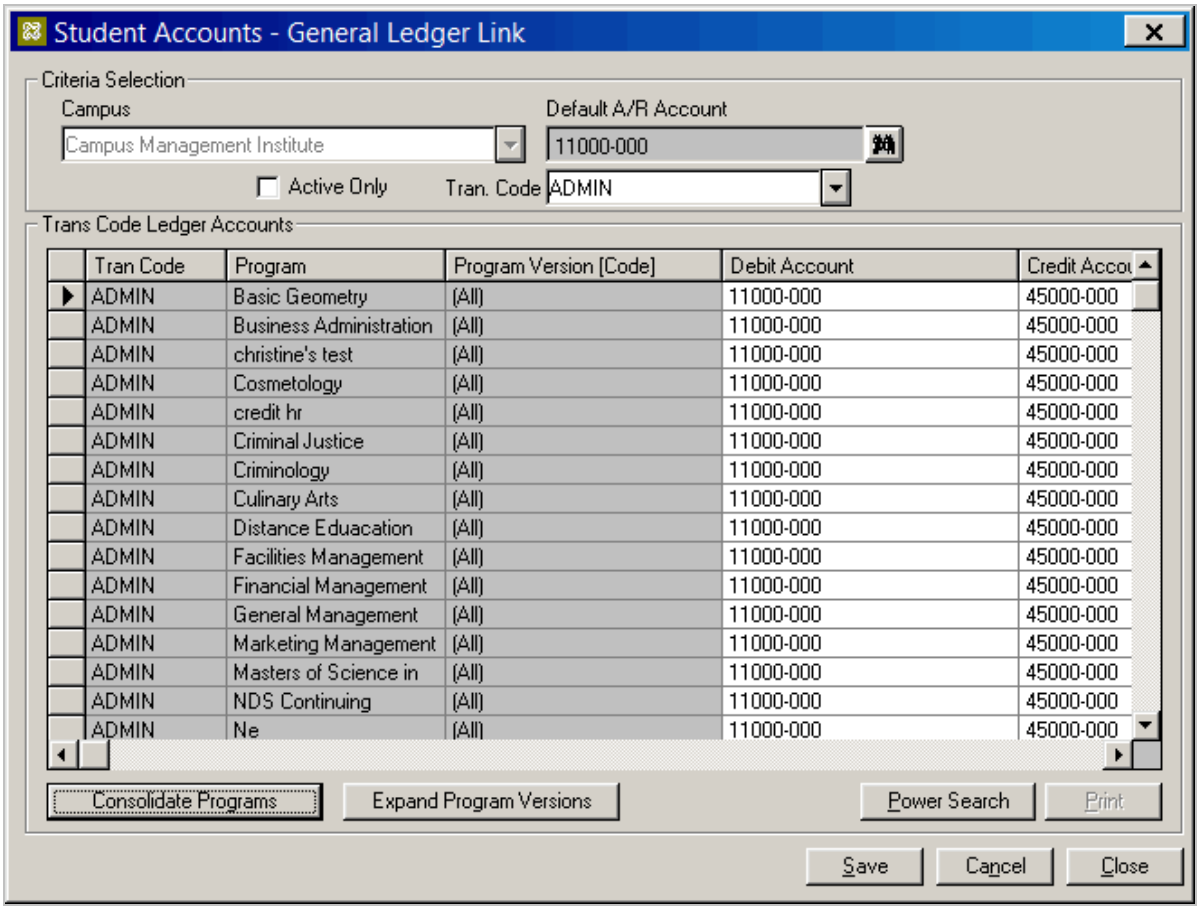
   See Initial Configuration of CampusNexus Finance, HR & Payroll.
5. Select **Active Only** to see only the active Transaction Codes.
6. Select a **Transaction Code**. The grid is populated with the appropriate general ledger record.

   Note: The Tran. Code list is populated with the transaction codes for the selected campus. See Lists > Student Accounts > Transaction Codes for information on setting up transaction codes.
7. Click **Expand Programs**. The label on the button changes to **Consolidate Programs**. CampusNexus Student expands the list to show each Program and Program Version offered by the selected campus.

   Enter appropriate debit, credit, and revenue account numbers for each program version.

   Note: When the **Consolidate Programs** button is clicked, any account numbers that are blank at the time are populated with the account numbers from the row that is selected at the time of clicking the button.

   - If you click **Save** while the programs are consolidated, all account numbers will be overwritten.
   - If you consolidate and expand without clicking **Save**, the numbers previously populated will be preserved. You can **Save** after the programs are in the expanded state. This is useful when adding programs. You may have different account numbers for each program and bill code combination.



8. Select a **Program** and click **Expand Program Versions**. The label on the button changes to **Consolidate Program Versions**.

   If you click **Consolidate Program Versions** while the cursor is on an expanded transaction code, CampusNexus Student reduces the transaction code list that has been split by program version to the current line with the account numbers entered on that line. All program versions will be associated with those account numbers.

9. For each **Transaction Code** on the grid, enter a **Debit Account** and a **Credit Account**. Click on a cell and click **F2** to edit it. When you change a cell, the **Save** and **Cancel** buttons are enabled.

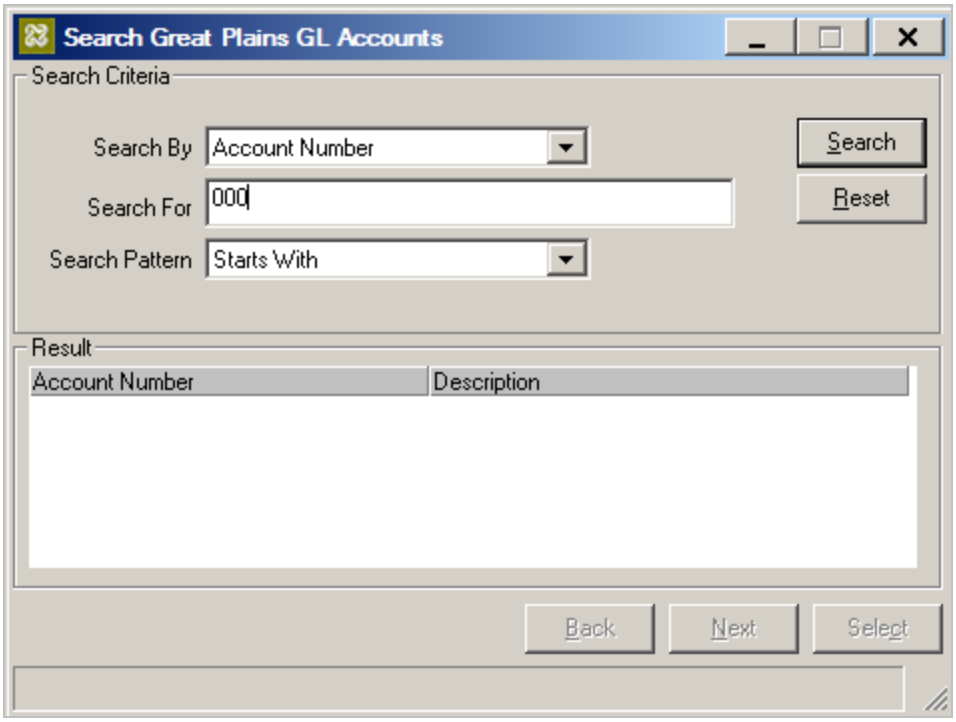
   If the transaction code is flagged as a deferred revenue account (for example, tuition), enter a **Revenue Account** number. (You may not see this column on the grid until you select a transaction code that is deferred.)

   Transaction codes such as Tuition are usually set up as deferred revenue transactions. This means that when they are posted to a student's ledger card, an A/R account is debited and a deferred revenue account is credited. When you perform the monthly Revenue Recognition procedures, the deferred revenue account is debited and the revenue account is credited.

   - If the Great Plains search feature is enabled, select a row, and click the **Great Plains Search** button to search for Debit Account or Credit Account numbers in the Great Plains GL.

     a. In the Search Great Plains GL Accounts form, click the **Search By** list. Search for GL Accounts using the **Account Number** or **Description**.

Note: These searches also return Stipend Account information when you have set up separate debit and credit account numbers for stipends.



b. In the **Search For** field, enter the account number or description.

c. Specify the **Search Pattern**. The Search pattern works as follows:

- “Starts With” finds an exact match on data that starts with the characters you specify.

  Enter dashes when using this method. For example, if you have a mask that uses ###-####-## and you enter 0000, you will not get any matches. You must enter 000- or 000-0 to get matches, where the first four digits in the account number are zeros.

- "Contains" finds any value that contains what you have entered.
- "Wildcard" searching uses % for any string that follows what is entered. The "_" only replaces a single character.
- "Exact Match" must contain everything you enter. There cannot be additional characters before or after what was entered. If you are not sure of the exact wording, choose “Contains”.

d. Click **Search**. All GL Accounts that meet the specified criteria are displayed in the result grid.

Based on the value specified in the Max GP GL Account Search field, the results grid displays the data in one page or across many pages. If there are more records than the default number of rows, CampusNexus Student displays:

- Number of records displayed.
- Total number or records matched.
- A Next button to display the next records matched.

e. Double-click the applicable row, or click **Select** to add the account details to the Debit Account or Credit Account field.

f. Click **Save**. CampusNexus Student saves all records for all campuses that use Great Plains, that contain both a valid Debit and Credit Account or both the Debit and Credit accounts are blank. An error message is displayed if any campus that uses Great Plains is using an incorrect Debit and/or Credit account.

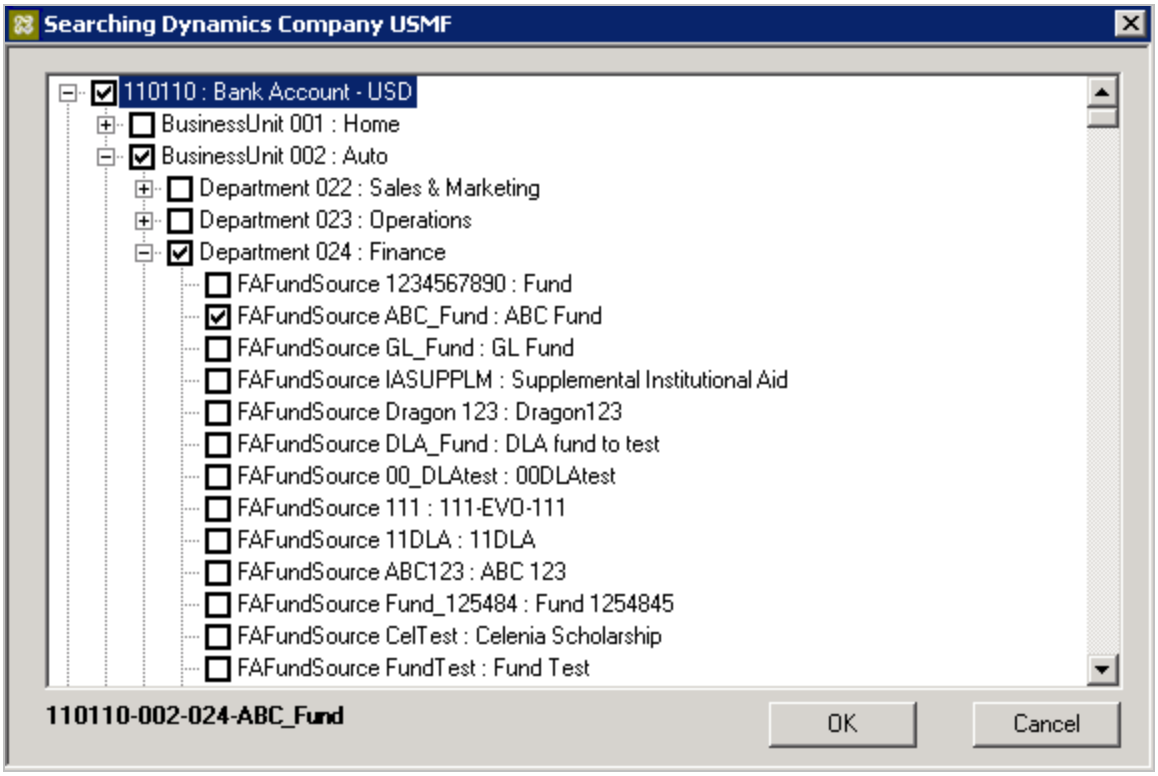
   The **Reset** button on the Search GP GL accounts form clears the fields for a new Search.

- If CampusNexus Student is integrated with CampusVue Finance, HR and Payroll or CampusNexus Finance, HR and Payroll, select a row and click the **Power Search** (for CampusVue Finance, HR and Payroll) or **Select GL Account** (for CampusNexus Finance, HR and Payroll) button to search for the appropriate GL Debit and GL Credit accounts.
  - If using CampusVue Finance, HR & Payroll, select the appropriate Ledger Account and click **OK**.
  - If using CampusNexus Finance, HR & Payroll, select the appropriate dimension attribute and click **OK**.

Note

- Your permissions in the accounting system determine which GL accounts you can view and select in CampusNexus Student.
- The Main account node can be displayed at any level in the account hierarchy. This is based on the account structure setting that is configured in Microsoft AX. For information about this setting, your administrator must see Microsoft AX Help.

When you click **Save** after selecting the account, the system validates your selection against the account structure setting in Microsoft AX. This validation also occurs when transactions are released to G/L.



10. Click **Expand Programs** while you are on a transaction code that you want to split out by program. CampusNexus

Student expands the list to show each program offered by the selected campus. Enter the appropriate debit and credit, and revenue account numbers for each program.

11. Click **Print** to view or print a list of your G/L Link Accounts. The report is in HTML format and looks similar to the following example:

Tran Code	Program	Debit Account	Credit Account	Revenue Account
BOOK	(All)	11000-000	45000-000	
EXAMR	(All)	11000-000	45000-000	
EXTCRSE	(All)	11000-000	45000-000	
EXTLSN	(All)	11000-000	45000-000	
LAB	(All)	11000-000	45000-000	
LESSONR	(All)	11000-000	45000-000	
REG	(All)	11000-000	45000-000	
SFEE	(All)	11000-000	45000-000	
SUP	(All)	11000-000	45000-000	
TOOL	(All)	11000-000	45000-000	
TRAINING	(All)	11000-000	55000-000	45000-000
TUIT	(All)	11000-000	55000-004	45000-000
UNIFORMS	(All)	11000-000	55000-000	45000-000
VEND	(All)	11000-000	45000-000	

12. Click **Save**.

Integrated Accounting

When CampusNexus Student is integrated with an accounting system such as CampusVue Finance, HR & Payroll or CampusNexus Finance, HR & Payroll, all general ledger account references in CampusNexus Student can look up information that is set up in the accounting system in a real-time manner. In CampusNexus Student a user can set up general ledger accounts from a master Chart of Accounts (COA) list and select valid ledger accounts whenever they are needed. The user does not need to know the ledger account numbers from memory, or scan through a printed list. Instead, the information is stored and accessible when needed.

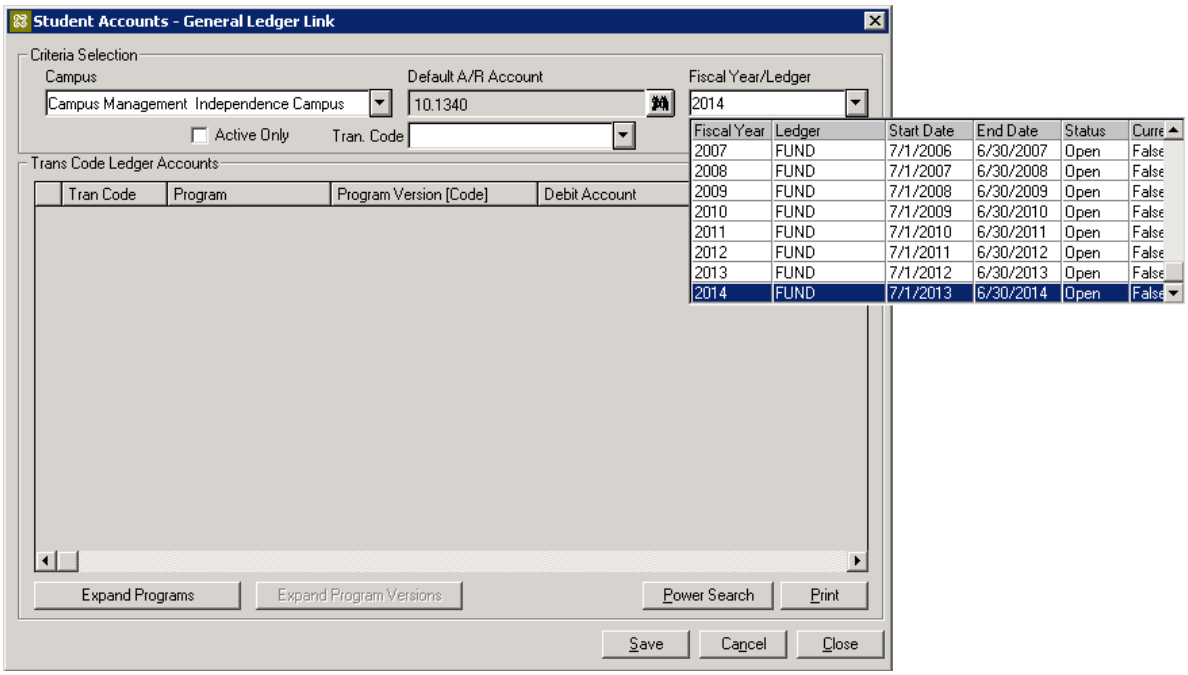
CampusVue Finance, HR & Payroll users can also set up Cost Accounts using the Cost Chart of Accounts. The user can view account information, but cannot save modifications to accounts if they are not in the master Chart of Accounts list. If a GL account number is incorrect, the user can choose a valid account from the list, enter a valid account, or clear an incorrect value.

When CampusNexus Student is integrated with CampusVue Finance, HR & Payroll, the Student Accounts General Ledger Link form includes a Fiscal Year/Ledger list, containing the fiscal years associated with Journal Entry Groups. The fiscal year determines what General Ledger Links the user can configure and which ledger accounts are visible when Power Search is used to link ledger accounts.

If a user is set up as a user in CampusNexus Student and in the accounting system, the security settings in the accounting system determine the GL accounts the user can view and use in CampusNexus Student.

To set up general ledger links when CampusNexus Student is integrated with an accounting system:

1. Navigate to **Setup > Student Accounts**. Select the **Additional** tab.
2. Click **G/L Link**. The Student Accounts - General Ledger Link form is displayed.
3. Select a **Campus**.
4. Select a **Fiscal Year/Ledger**. (CampusVue Finance, HR & Payroll only)



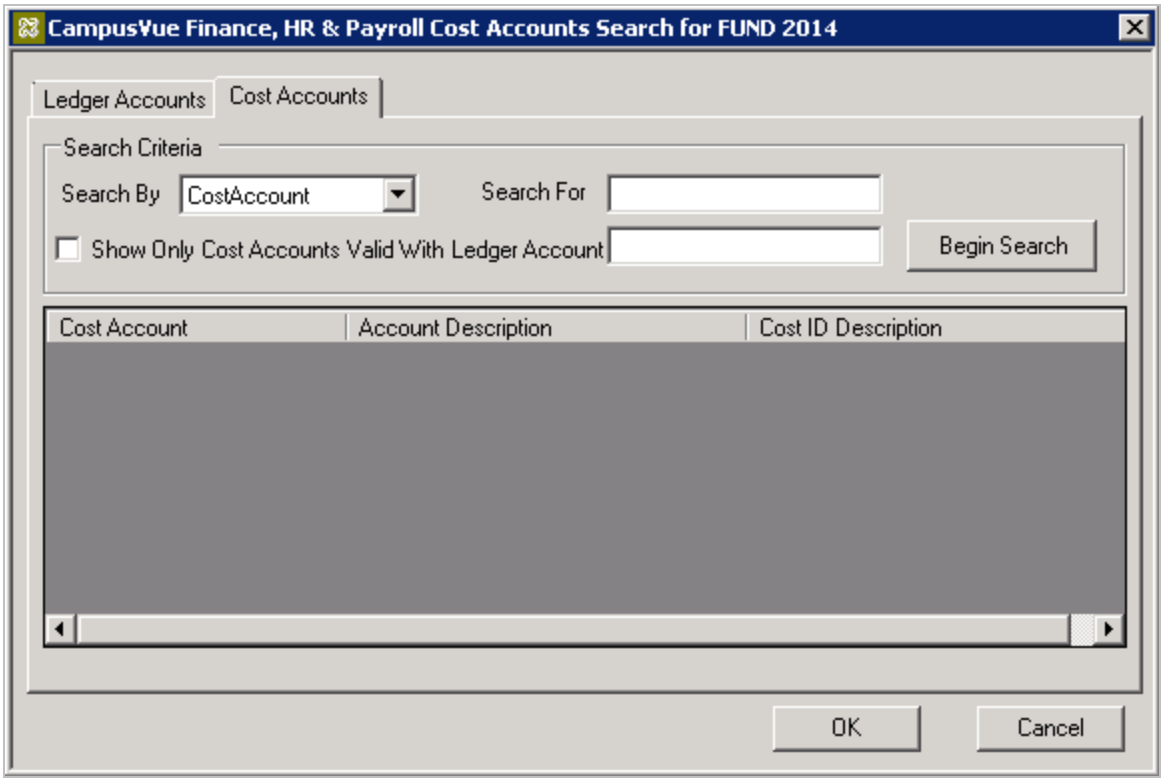
5. Select **Active Only** to see only active Transaction Codes.
6. Select a **Transaction Code**. The grid is populated with the appropriate general ledger record.
7. To search for an account and link the account to the general ledger, click **Power Search** or click **Select GL Account** for CampusNexus Finance, HR & Payroll.

   The power search form is displayed.

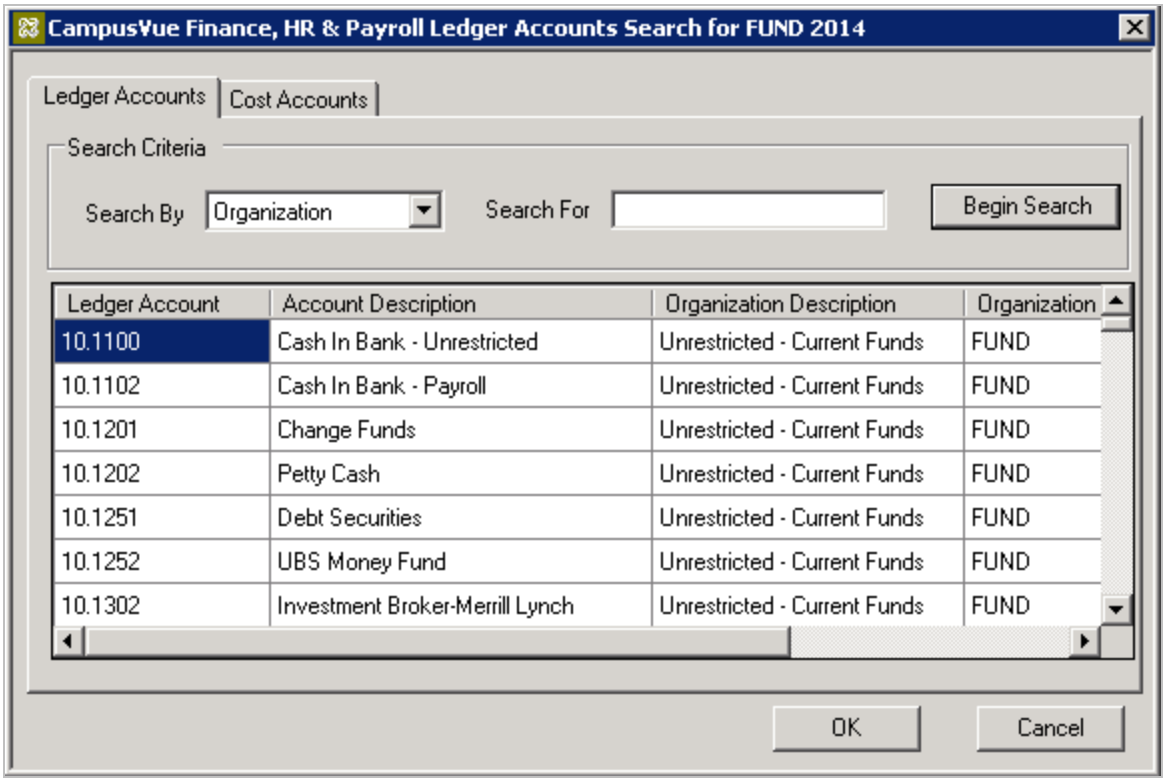
   - Click the **Ledger Accounts** tab to search by *Ledger Account*, *Account*, *Organization*, *Organization Level*, or *Account Description*. (CampusVue Finance, HR & Payroll only)
   - Click the **Cost Accounts** tab to search by *Cost Account*, *Account Description*, or *CostIDDescription*. Limit your search by selecting **Show only Cost Accounts Valid with Ledger Account**. (CampusVue Finance, HR & Payroll only)

   Click **Begin Search**.

   Your security permissions in CampusNexus Student and in the accounting system determine which GL account you can view.



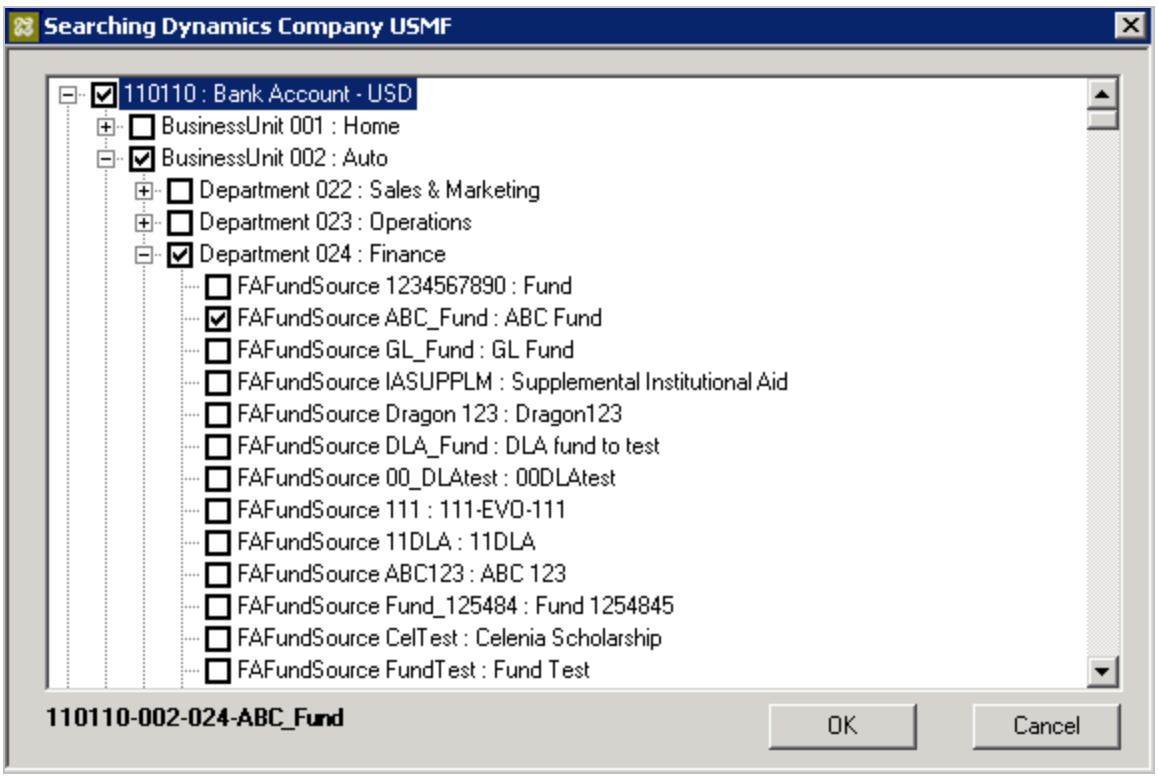
When you click "Begin Search" and leave the "Search For" field blank, CampusNexus Student returns all accounts for the appropriate ledger or cost account. (CampusVue Finance, HR & Payroll only)



If the "Search For" field is populated, CampusNexus Student searches for the entered value only in the column chosen in the "Search By" field and returns the desired record as well as all values that follow that record. For example, if you search by ledger account for 10.1202, the results show 10.1202 and all ledger accounts that come after 10.1202 in ledger account order.

You can use the % wildcard to search more effectively. For example, when you can enter 11% into the "Search For" field, the search returns only accounts that begin with 11.

A hierarchy of account dimensions is displayed with information about the Main Account being displayed at any level in the hierarchy. Expand the dimension at a parent level and then select the appropriate attribute.



Click **OK** after you have made your selection from the search result. The search form is closed.

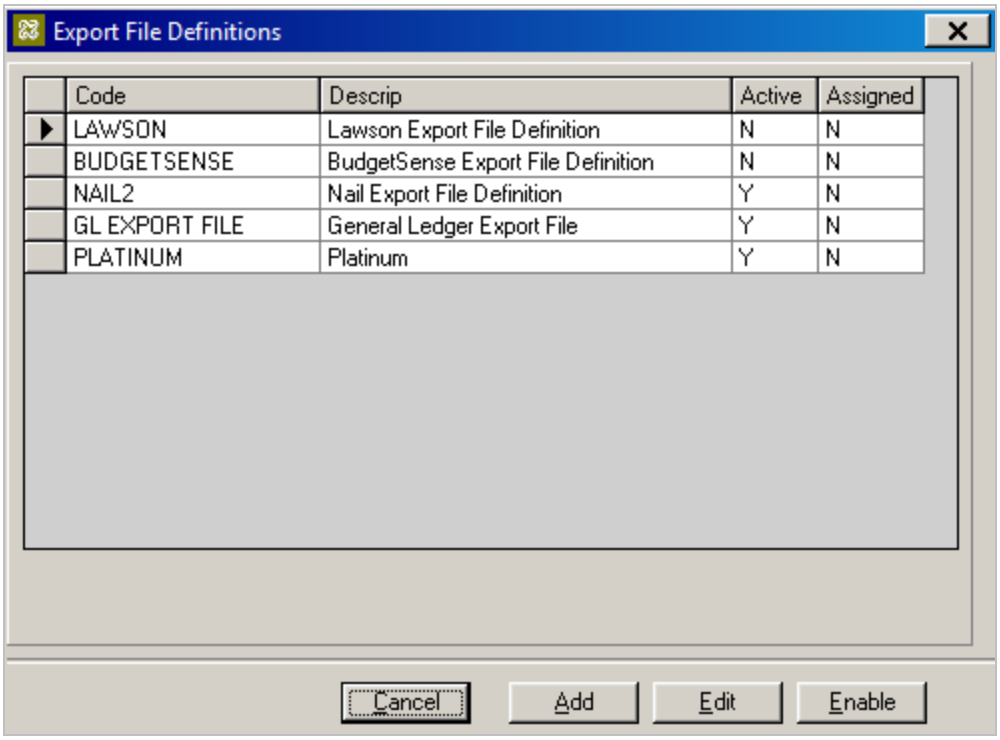
8. Click **Save**.

G/L Export File Definition

Almost all G/L packages can import a file created from an external source that will post journal entry transactions to the General Ledger. In CampusNexus Student you can configure the layout of a flat file that can be produced within the *Release to General Ledger* option. This enables you to define the flat file according to the requirements of your G/L package. Additionally, system administrators can define whether the *Export to Third Party Server* option is to be enabled system-wide, and to set up system-level configuration settings such as transport format and location.

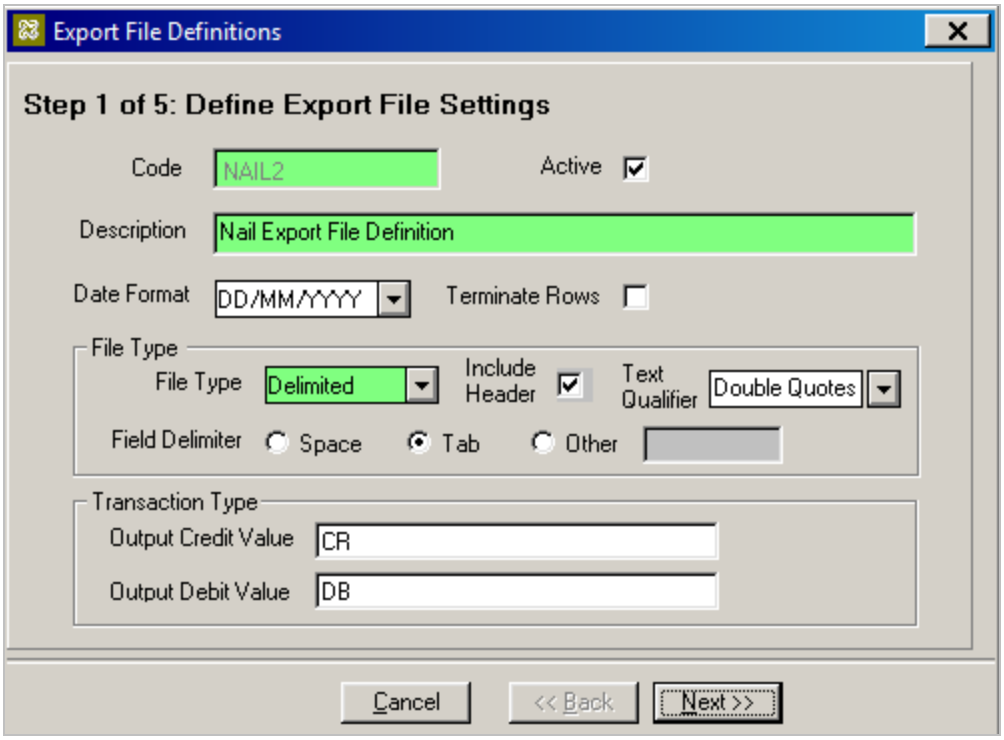
To configure files for export:

1. Navigate to **Setup > Student Accounts**. Select the **Additional** tab.
2. Click **G/L Export File Definition**. The Export File Definitions form is displayed. The form displays Lawson and BudgetSense, the two default export file definitions.
3. To use another accounting package, click **Add**.



4. You must assign **Active** and **Assigned** statuses to the default packages. Active means that the package is available as a choice when you set up Accounting procedures for your school from Setup > Campus Locations > Campus > Accounting tab > G/L Export. Assigned indicates that the package is designated as one your institution uses. Click inside the fields to switch from **Yes** to **No**, for both these options, as required.
5. To see the details of an existing export file definition, a default or one already created by your institution, click **View**. CampusNexus Student displays a read-only wizard with all necessary fields populated.

6. To create a file definition, click **Add**. Step 1 of the Export File Definitions wizard is displayed.

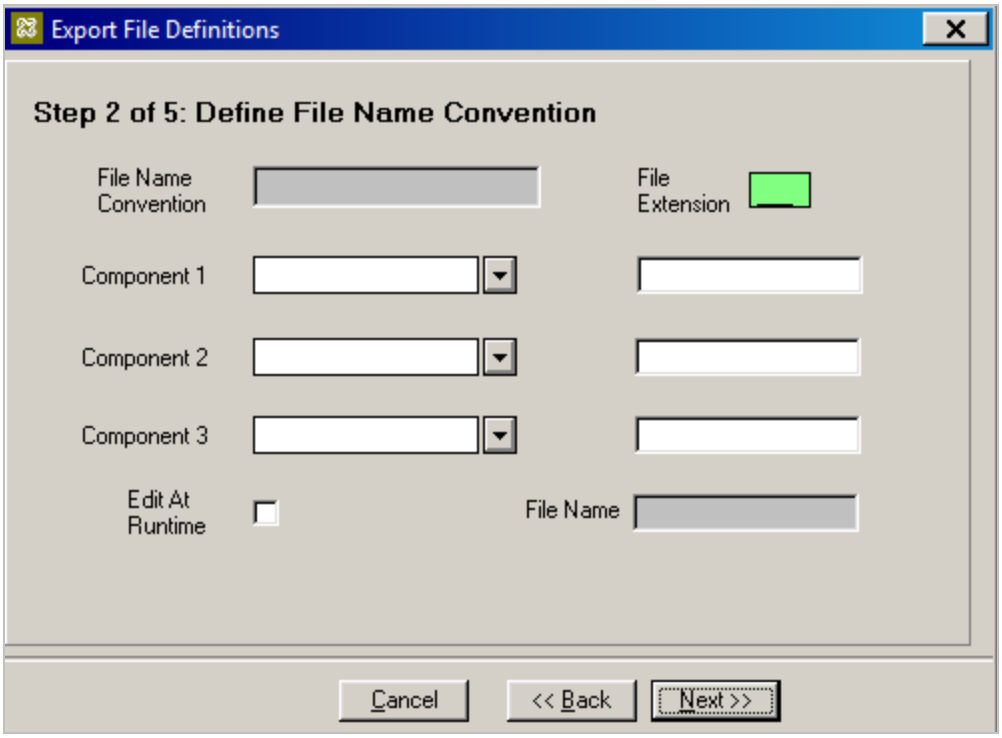


Export File Definitions - Step 1

Field	Description
Code	Specify a Code of up to 16 alphanumeric characters for the export file definition.Choose a Code that is similar to name of the product.
Description	Specify the Description of the export file definition.
Active	Select this check box if the new file definition is Active. If it is Active, it will appear as an option in the Accounting Setup form.
Date Format	Select a format from the drop-down list, for example DD/MM/YYYY. This date format is used in the Release to G/L export file and in the Description field when using a Lawson file type. If you do not select a date format, dates are displayed based on your current Microsoft Windows regional settings.
Terminate Rows	Select this check box if the new file definition requires a carriage return at the end of a record.
File Type	File types are as follows: • **Delimited**: Fields are separated with user-defined characters or sets of characters. • **Fixed Length**: Each field is determined by a configurable number of characters.
Include Header	Select this check box if the name of each field is to be displayed at the top of the file. This option is used for Delimited files only.
Text Qualifier	Select **Single Quotes** or **Double Quotes** to indicate a text field.

Field	Description
Field Delimiter	Select **Space**, **Tab** or **Other**. If you select **Other**, specify the symbol in the text field.
Transaction Type	Specify the abbreviations you will use for Credit and Debit, for example, CR and DB.

7. Click **Next** and enter information in Step 2 as follows:

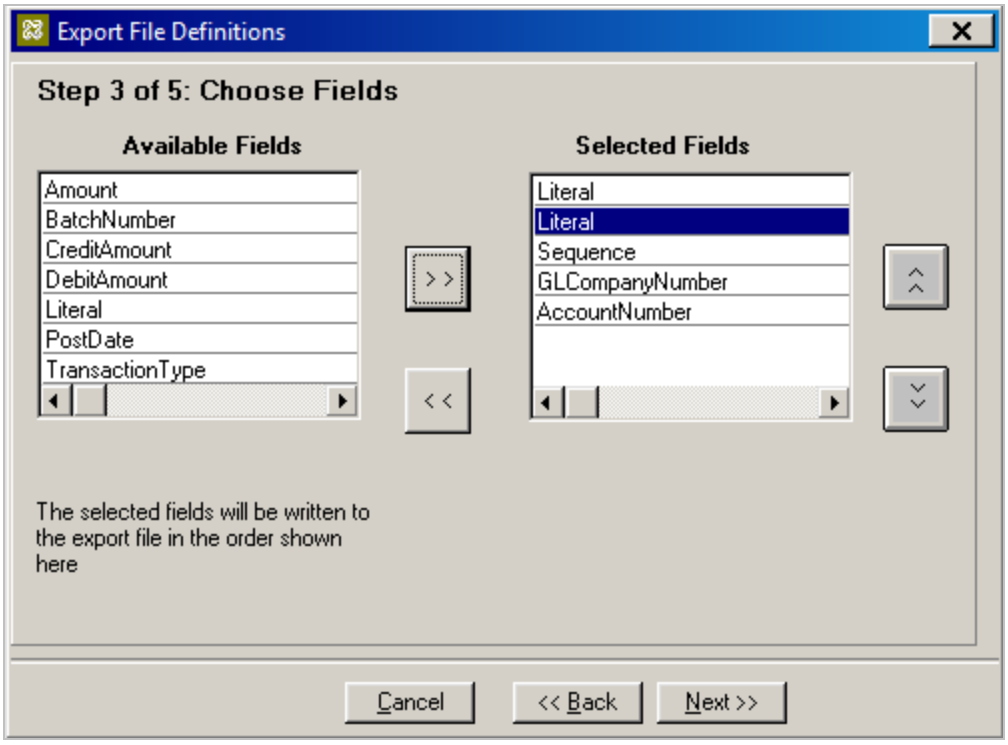


Export File Definitions - Step 2

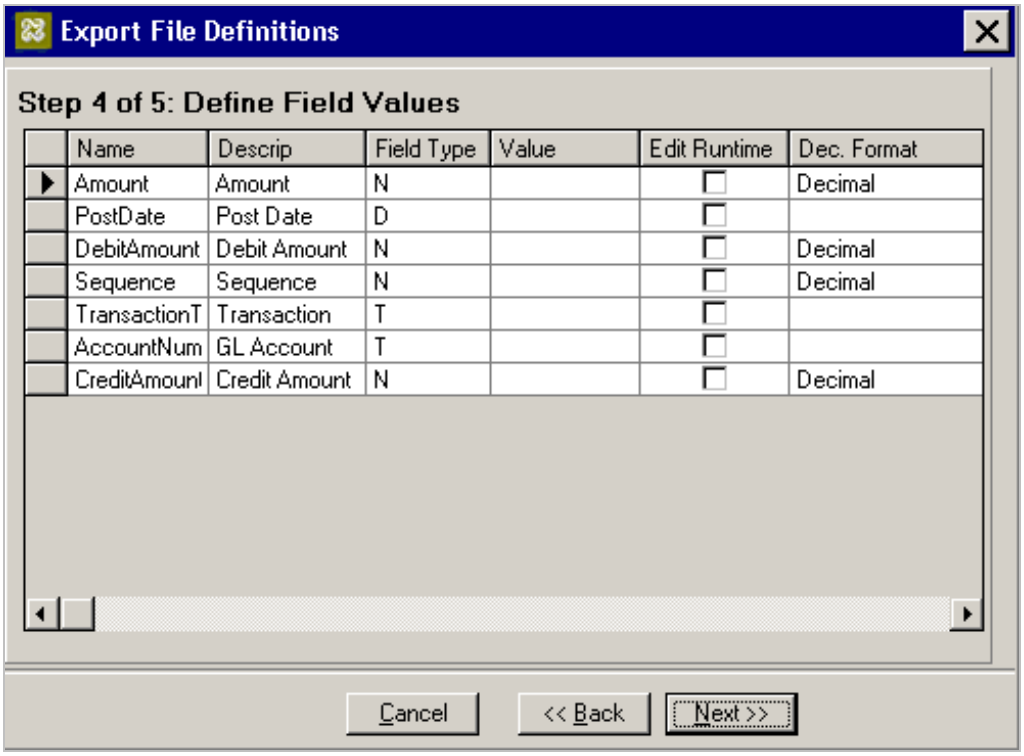
Field	Description
File Name Convention	This read-only field displays Components 1-3.
Components 1-3	Use the drop-down lists to define each of the three components.
Edit at Runtime	If you select this check box,CampusNexus Student will prompt you to enter the file name. If this check box is selected, you cannot set a file extension in this form.
File Extension	Specify a valid file extension.
File Name	Enter the default file name.

8. Click **Next** and enter information in Step 3 as follows:

   a. From the list of available fields, use the horizontal arrows to add fields to and remove fields from the Selected Fields grid. Selected fields are those that will be included in the file.
   b. Use the vertical arrows to change the order of fields, as required. The order of the fields in the Selected Fields grid is the order in which fields will appear in the file.



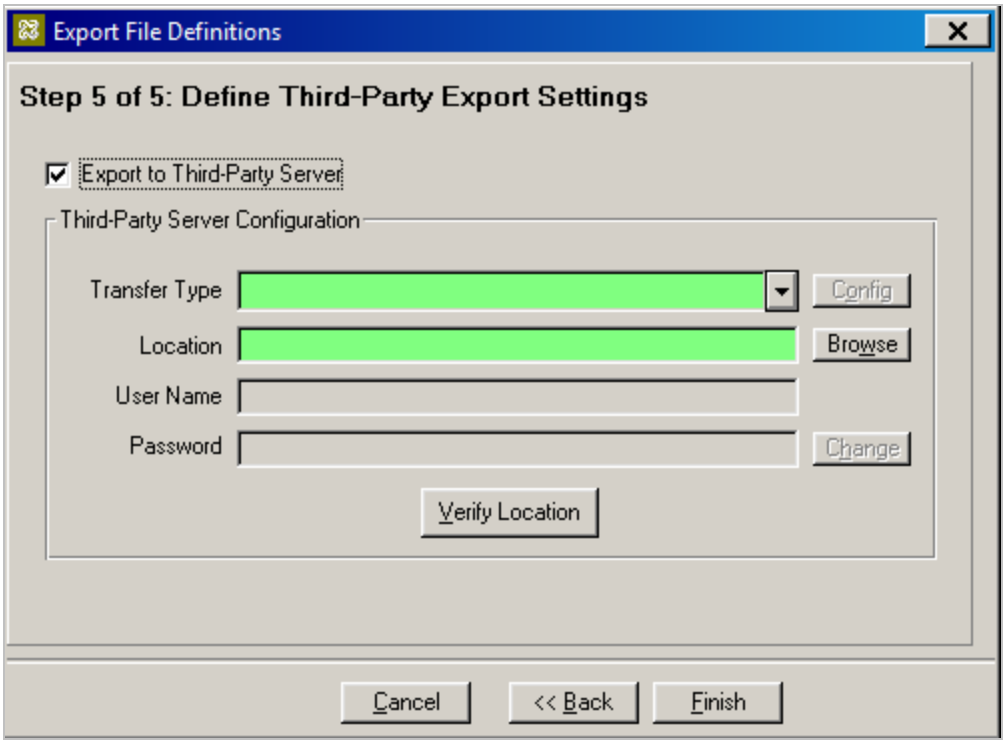
9. Click **Next** and enter information in Step 4 as required. This shows some of the values you have set in previous steps as read-only fields, except for Dec. Format and Dec. Implied.



Export File Definitions - Step 4

Field	Description
Description	This component was set up in Step 2.
Field Type	This is a read-only field except for Literals, set up in Step 2.
Value	This component was set up in Step 2.
Edit Runtime	This check box is selected if you chose to name the file in Step 2.
Dec Format	This field is for numeric values only. Only if the decimal is Included will the file will have the decimal point in the number. Options are **Decimal Included** and **Decimal Implied**. If you choose **Decimal Implied**, the Decimal Implied column becomes enabled.
Dec. Implied	If you selected **Decimal Implied** in the column to the left of this one, specify the number of places from right to left that are required to get the actual value.

10. Click **Next** and enter information in Step 5 (optional) as follows:



Export File Definitions - Step 5

Field	Description
Export to Third-Party Server	Select this check box to export this to a third-party server and complete the configuration by entering information in the fields listed below.

Field	Description
Transfer Type	Select one of the following options: • **Local/Mapped Drive** (for example, H:\folder\subfolder\) • **Network Location** (for example, \\name\folder\subfolder\) • **FTP** (for example, ftp://ftp.sitename.com/folder/subfolder/). If you choose **FTP**, click **Config** to configure the FTP.
Location	Used for local or mapped drives and network location transfer types. Specify a location or click **Browse** to navigate to the location where G/L files that are successfully transmitted will be saved.
User Name	Enter the user name that will be the shared account to access the third-party server and/or software.
Password	Enter the password that will be the shared account to access the third-party server and/or software. Passwords will be encrypted.
Change	Use this field to change the password. When you click **Change**, a new reusable / generic password form is displayed and you are prompted for the old password and the new password. If you are entering a password for the first time, the old password text box is disabled.
Verify Location	Click **Verify Location** to test the configuration. A confirmation notification should be returned. If an error notification is returned, then the export location, the archive location, or the account information could not be verified.

11. Click **Finish** to return to the G/L Export Definition form. Your new file definition is displayed in the grid.

Transaction Code Security

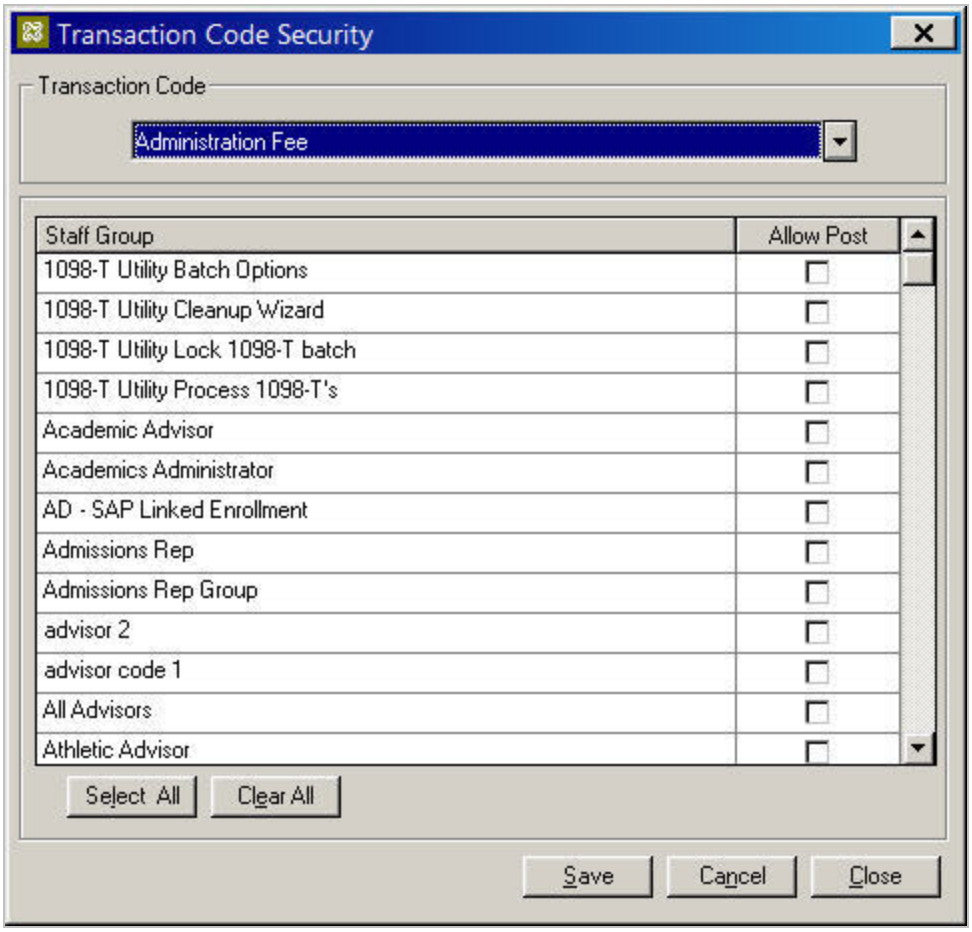
The Transaction Code Security form allows schools to configure transaction code permission to staff groups. The selected staff groups may post the selected transaction code. See also Transaction codes.

CampusNexus Student determines which staff members may access a transaction based on their transaction code security level. Before the transaction code drop-down list is presented to the staff member, CampusNexus Student verifies that the staff member has permission to process the transaction. Additionally, when the staff member clicks on the 'Transaction Search', 'Post Charges', or 'Adjust Transaction' buttons anywhere in the application, the permissions are checked.

Note: Users are often associated with multiple staff groups. It is likely that one staff group linked to a user is allowed to use a transaction code, yet another staff group associated with the same user is not allowed to use a transaction code. In these cases, the "least restrictive" approach is used, meaning that the user is allowed to post to the transaction code if the user is linked to at least one staff group that is allowed to use a particular transaction code.

To configure transaction code security for staff groups:

1. Navigate to **Setup > Student Accounts**. Select the **Additional** tab.
2. Select **Yes** for the Transaction Code Security.
3. Click **Transaction Code Permissions**. The Transaction Code Security form is displayed.



4. Select a **Transaction Code** from the drop-down list.
5. (*Optional*) Click **Select All** to select all staff groups listed.

6. Select the **Allow Post** check box for each staff group that will have permission to post or adjust the selected transaction.
7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Repeat these steps until all transactions codes have been associated with the intended staff groups.

Setup > Academic Records

When you navigate to Setup > Academic Records, the Academic Records Settings form is displayed. Use this form to configure system wide settings related to academic records. The form contains the following tabs:

- Enrollment
- General
- Hold Codes
- LMS Configuration
- OMR Scanning
- SAP
- Settings
- Transcripts

Additional settings are configured under Lists > Academic Records.

Academic Records Settings - Enrollment Tab

Use the Enrollment tab on the Academic Records Settings form to select optional steps that can be included in the student enrollment process.

The first five options are required:

- Student Selection
- Program Selection
- Term and Billing Method
- Enrollment Dates
- Enrollment Number/Description

Other items are optional:

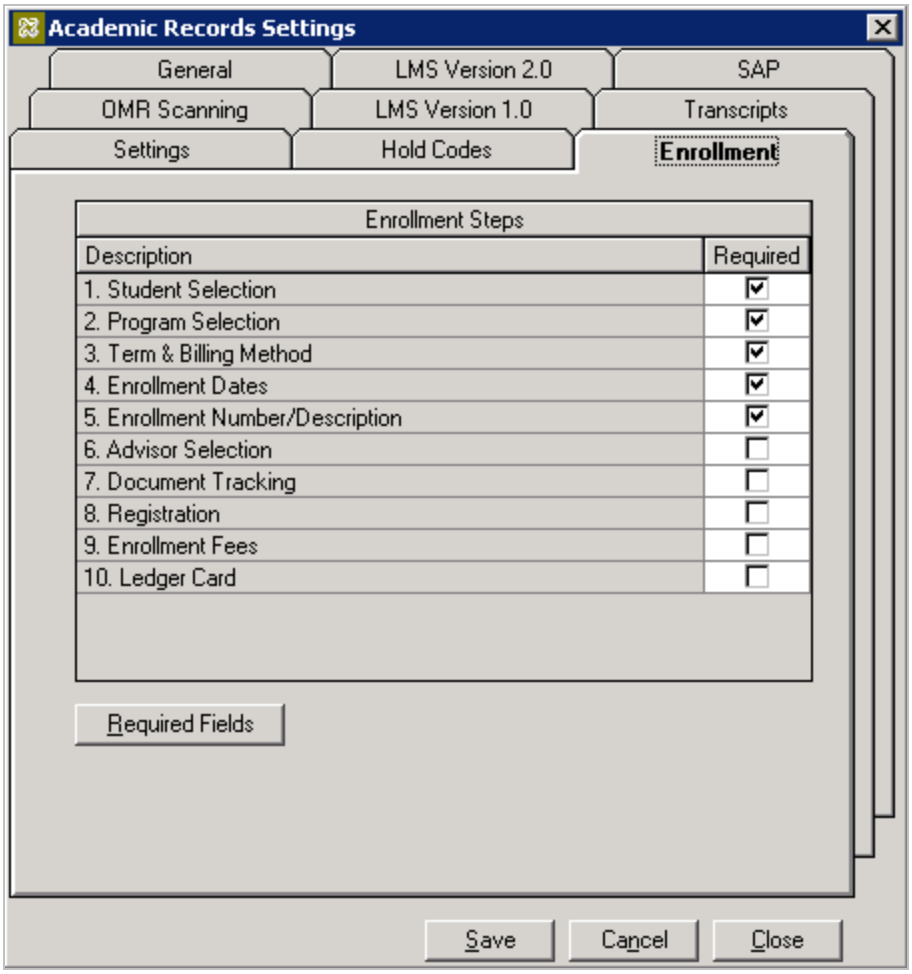
- Document Tracking
- Registration
- Enrollment Fees
- Ledger Card

The Required Fields button enables you to select fields that must be completed in the student master table before enrollment can proceed.

If CampusNexus Student is configured to gather additional information, the optional items are displayed and you cannot exit the enrollment wizard until you have viewed the required forms. You do not need to edit the form, but you must loaded and review the forms.

To select optional steps for the enrollment wizard:

1. Navigate to **Setup** > **Academic Records**. The Academic Records Settings form is displayed. Select the **Enrollment** tab.



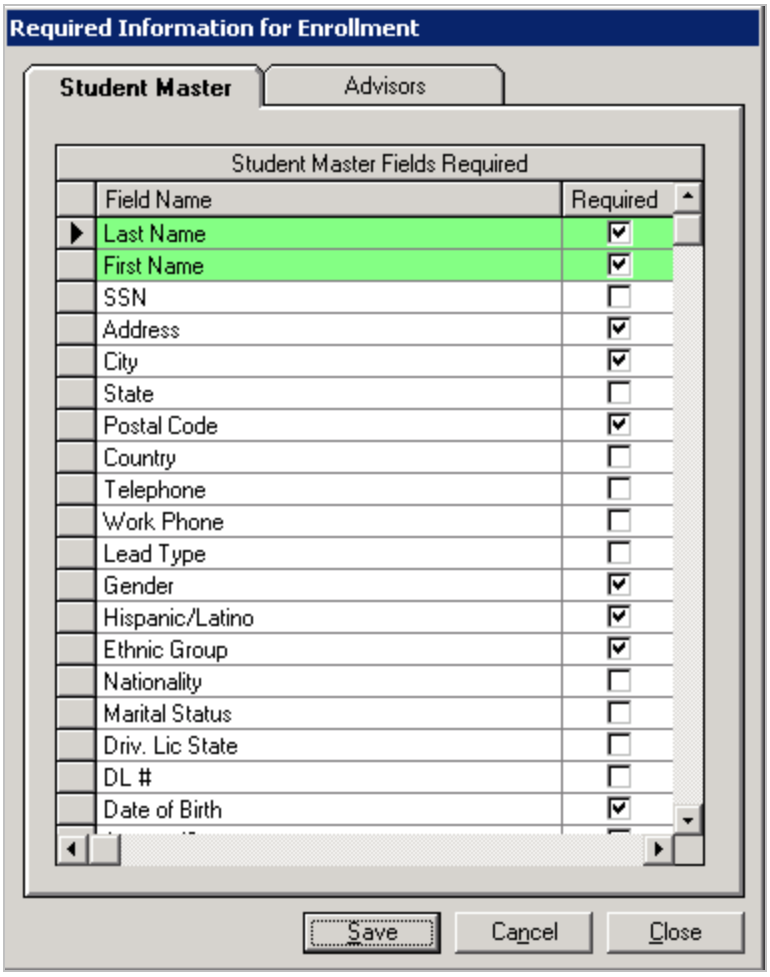
2. Select or clear the **Required** check boxes in rows 6 through 10 as needed. Rows 1 through 5 are required and cannot be cleared.

   Select **6. Advisor Selection** if you want a page added to the enrollment form on which you can select all the student's advisors at the time of enrollment.

   If you clear option 6 on the Enrollment tab, CampusNexus Student automatically clears the Required Advisor Types on the Advisor tab of the Required Information for Enrollment form described below.

3. Click **Save**.

4. Click **Required Fields** to display the Required Information for Enrollment form.



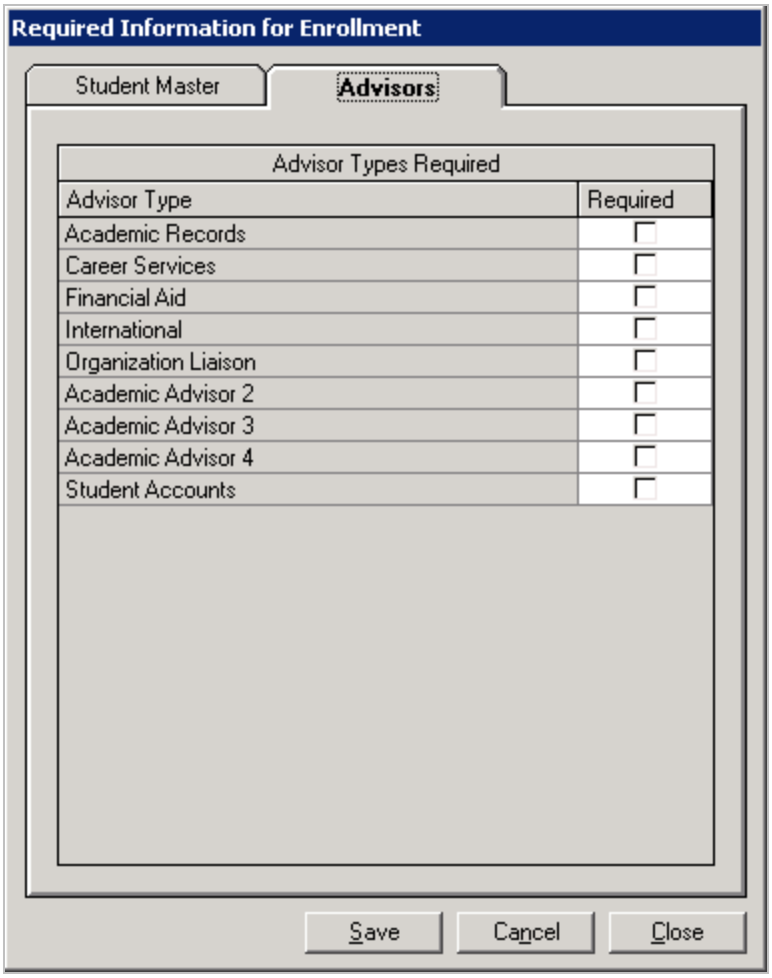
5. On the Student Master tab, select the **Required** check box for each field that you want to designate as a required field on the Student Master form.

   Fields that are not designated as required on the Student Master form can be selected as required for enrollment.

6. Click **Save**.

7. On the Advisors tab, select the **Required** check box for each Advisor Type that you want to designate as a required field at the time of enrollment.

   When you select Required Advisor Types on this form, CampusNexus Student automatically selects option 6. Advisor Selection on the Enrollment tab.



8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Academic Records Settings - General Tab

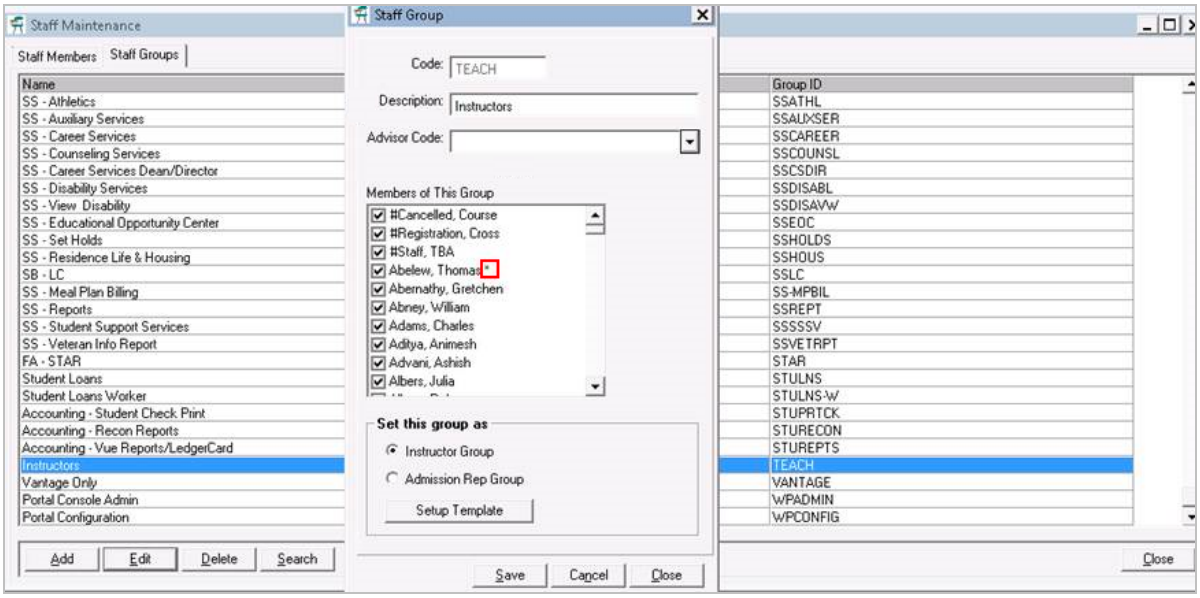
Use the General tab of the Academic Records Settings form to configure the following:

- Staff groups with permissions to modify a student's Last Day Attended (LDA) when changing a student's status to Drop. Depending on the setting, LDA changes are permitted or prevented when changing the student's enrollment status (Daily > Academic Records > Status Change) or batch status (Daily > Academic Records > Batch Status Change).
- Faculty Management Integration for CampusNexus Finance, HR & Payroll. This global option is available only if integration with CampusNexus Finance, HR & Payroll is enabled (see GL/AP Package). Faculty Management Integration enables you to synchronize instructor information for Campus Groups set up under Central Security in CampusNexus Student with CampusNexus Finance, HR & Payroll in all corresponding legal entities. When Faculty Management Integration is enabled, the following properties are synchronized between CampusNexus Student and CampusNexus Finance, HR & Payroll whenever associated data is created or updated in either system:
    - First Name
    - Last Name
    - Address
    - Phone Numbers
    - Email addresses
    - Employee ID
    - Active status

  If the global Faculty Management Integration option is enabled, you cannot edit information that originated from CampusNexus Finance, HR & Payroll in the Staff Maintenance form of CampusNexus Student.

  The global Faculty Management Integration option can be used in conjunction with the campus-level Faculty Management Integration option on the Others subtab of the Campus Information - Academic Records tab. The campus-level integration option enables you to limit the synchronization of faculty data to specific campuses.

  An Instructor created in CampusNexus Finance, HR & Payroll is created as an Instructor in CampusNexus Student but is not associated with any Campus Groups. An Instructor who does not have an association with a Campus Group is marked with a visual indicator (*) as shown below:

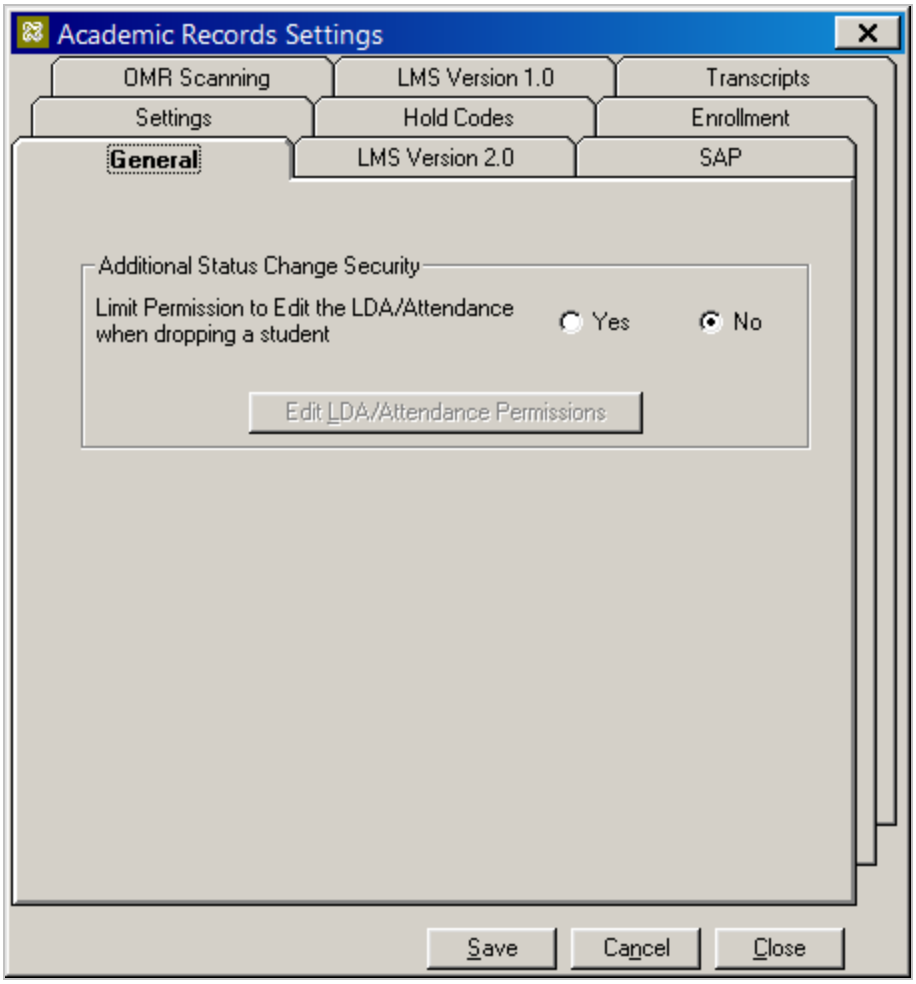


When the Campus Group is assigned to the Instructor in CampusNexus Student, the related Campuses are sent to CampusNexus Finance, HR & Payroll and are updated for that Instructor.

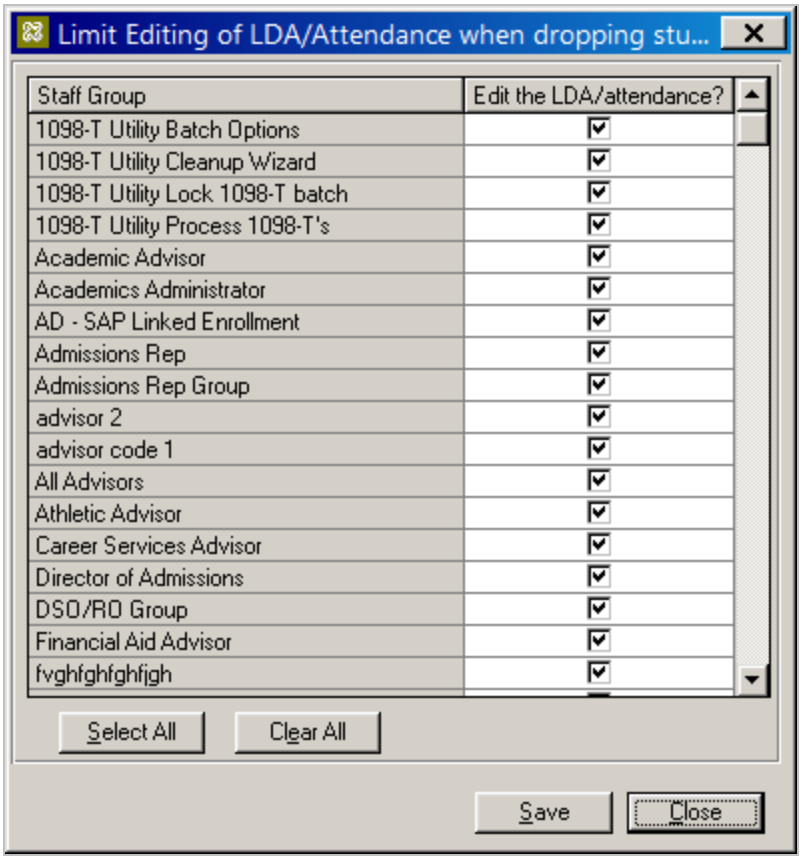
When the global Faculty Management Integration option is enabled, you cannot create Instructors directly in CampusNexus Student. Hence, when an instructor Group is assigned to a Staff created in CampusNexus Student, the following message is displayed: "*Cannot create Instructor. The Instructor must be created in the Faculty Management or HR module of CampusNexus Finance, HR & Payroll.*"

To set permissions for changing the LDA:

1. Navigate to **Setup** > **Academic Records**. The Academic Records Settings form is displayed. Select the **General** tab.



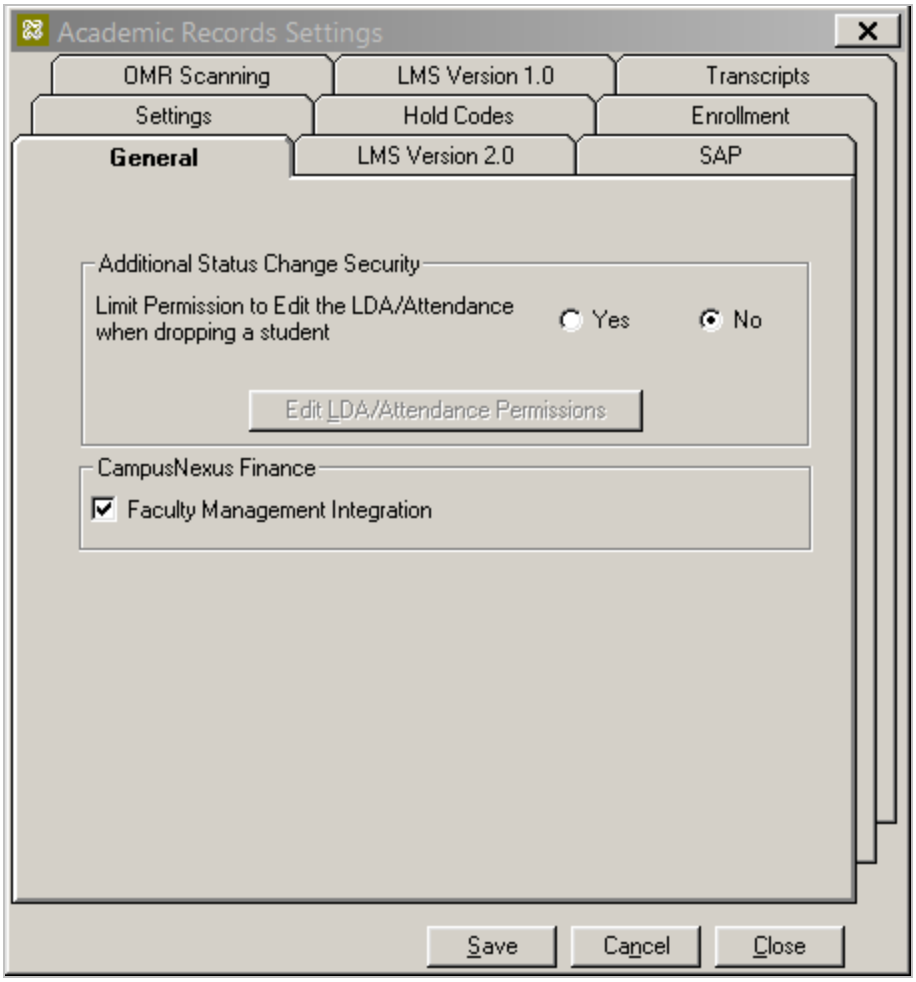
2. Select **Yes** for the Limit Permission to Edit the LDA/Attendance when dropping a student option. The Edit LDA/Attendance Permissions button is enabled.
3. Click **Edit LDA/Attendance Permissions**. The Limit Editing of LDA/Attendance when dropping student form is displayed.
4. Select or clear the check boxes in the **Edit the LDA/attendance?** column associated with each staff group to allow or deny each staff group to alter the LDA. Click **Select All** to allow access permissions to all staff groups or **Clear All** to deny permissions to all the listed staff groups.



5. Click **Save**.
6. Click **Close** to close the form.
7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To enable Faculty Management Integration:

1. Navigate to **Setup** > **Academic Records**. The Academic Records Settings form is displayed. Select the **General** tab.



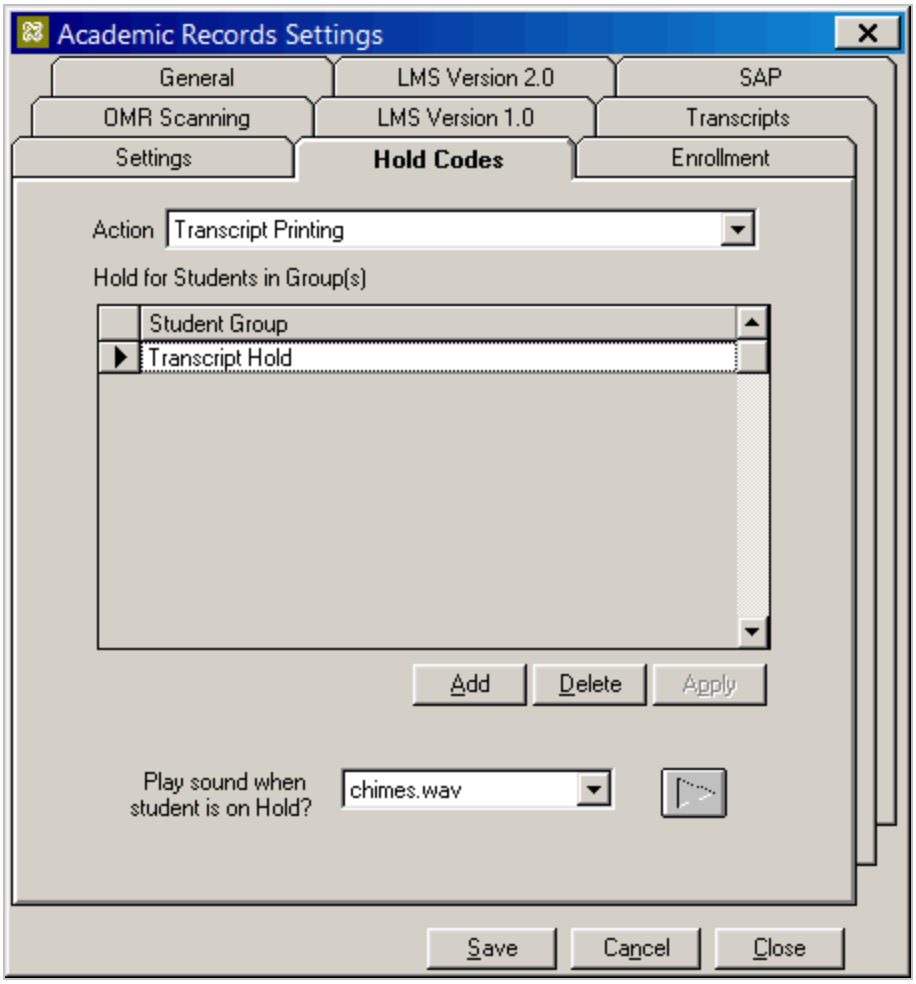
2. Select the **Faculty Management Integration** option.
3. Click **Save**.
4. Click **Close** to close the form.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Academic Records Settings - Hold Codes Tab

You can set up hold codes based on student groups. In this scenario, if a student belongs to a selected group, the student is prevented from registering in class sections or from having transcripts printed. Class registration are prevented on both the View > Academic Records > Schedule and Daily > Academic Records > Registration forms.

To set up a hold codes:

1. Navigate to **Setup** > **Academic Records**. The Academic Records Settings form is displayed. Select the **Hold Codes** tab.



2. Select the **Action** to be blocked:

Field Descriptions

Action	Description
Registration	Prevents the student from registering for courses.

Action	Description
Transcript Printing	Prevent transcripts for the student from being sent from the campus. The transcript printing hold prevents the transcript from being printed from the View > Academic Records > Final Grades form. It does not prevent a transcript from being printed from the Reports > Academic Records > Transcript option.
Online Schedule	Prevents students from accessing their class schedule online.
Academic Graduation	Prevents changing the student's status from enrollment to graduation.
Student Print Schedule	Prevents a student's schedule from being printed from the student schedule form. It is used to put a student on an academics schedule hold so that the student's schedule cannot be printed from Student Bar > Academics Record > Schedule > Print; however, it can still be printed via the Reports > Academic Records > Student Schedule (provided the user has the proper privileges). The Hold Light indicator changes to red to indicate that a student is on hold, and the description of the hold light is presented indicating that the student is on Print Schedule Hold.
Bookstore	Prevents students from ordering books. The Bookstore hold flag is transmitted along with each student's data record to indicate to the bookstore vendor not to supply books for the applicable student.

3. Click **Add** to select a Student Group to associate with the Action. A blank line is displayed in the Hold for Students in Group(s) grid.

   Note: Private Hold Groups in the Groups for Student form can be viewed, but editing of those groups is allowed by the owner of that group or the system administrator only.

4. Click in the blank line and click to select a student group.

5. If you want a sound to be played when the student master for a student on hold is displayed, select a sound (.wav) file from the **Play sound when student is on Hold?** list.

   Click the **Play** button to hear the selected wave file.

   Sound files must be stored in the CampusNexus Student shared folder in the sounds subfolder. Sample ".wav" files are included. You can customize your "hold" sounds by placing additional ".wav" files into the CampusNexus Student share/sounds folder. (The sound feature may not be available on schools using Citrix or terminal servers.)

   When working with student records, the hold sounds will be audible only when the student's master record is opened.

6. Click **Apply** to save your hold code selections.

7. Click **Delete** to remove a group from the list of hold groups.

8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

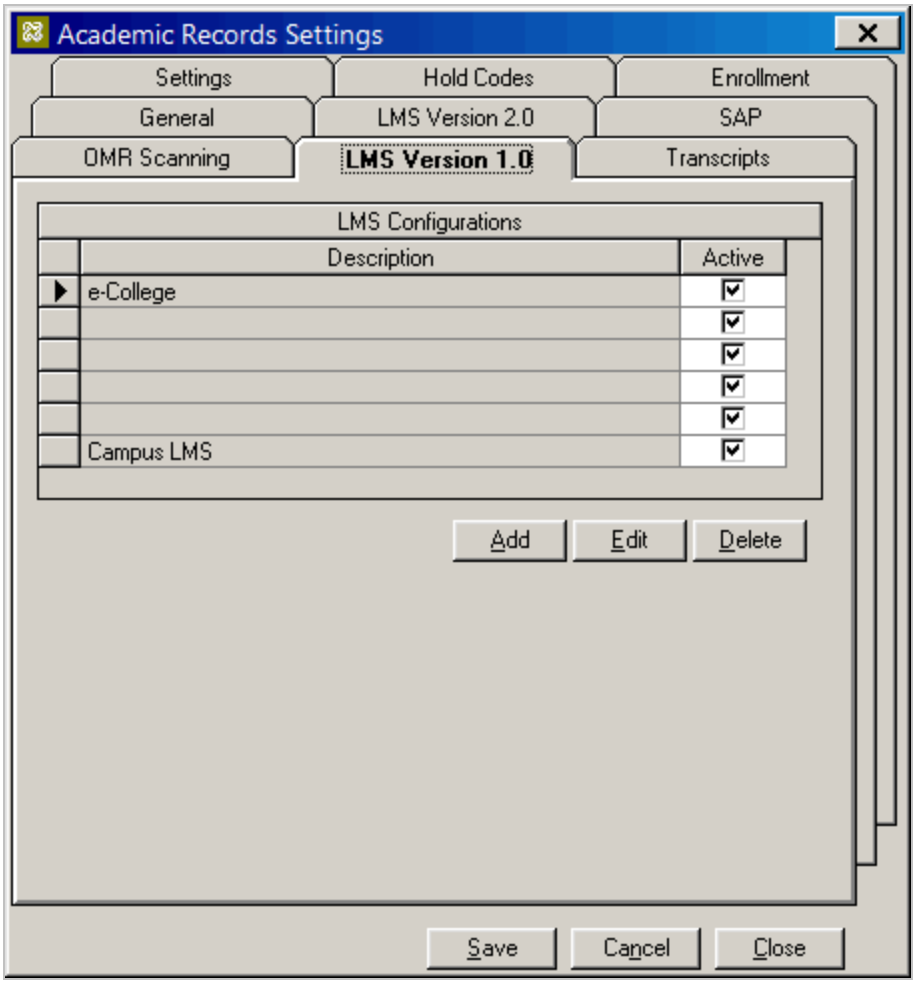
Academic Records Settings - LMS Configuration Tab

Use the LMS Version 1.0 and 2.0 tabs on the Academic Records Settings form to configure the Learning Management System (LMS).

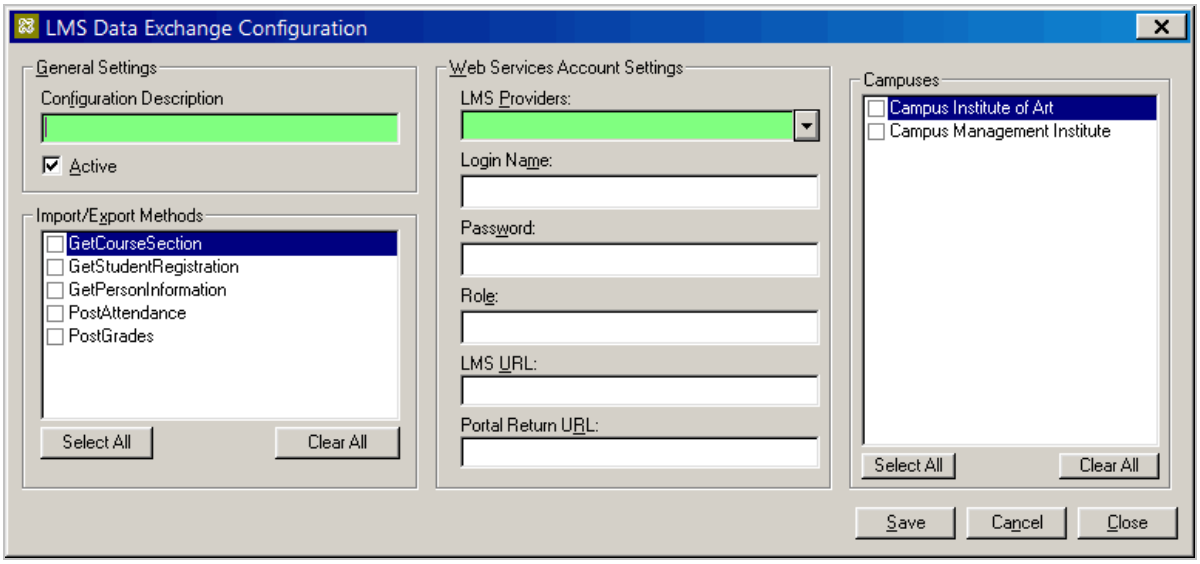
- On the LMS Version 1.0 tab, configure the LMS Data Exchange.
- On the LMS Version 2.0 tab, configure the LMS Vendor.

To configure the LMS Data Exchange:

1. Navigate to **Setup** > **Academic Records**. The Academic Records Settings form is displayed. Select the **LMS Version 1.0** tab.



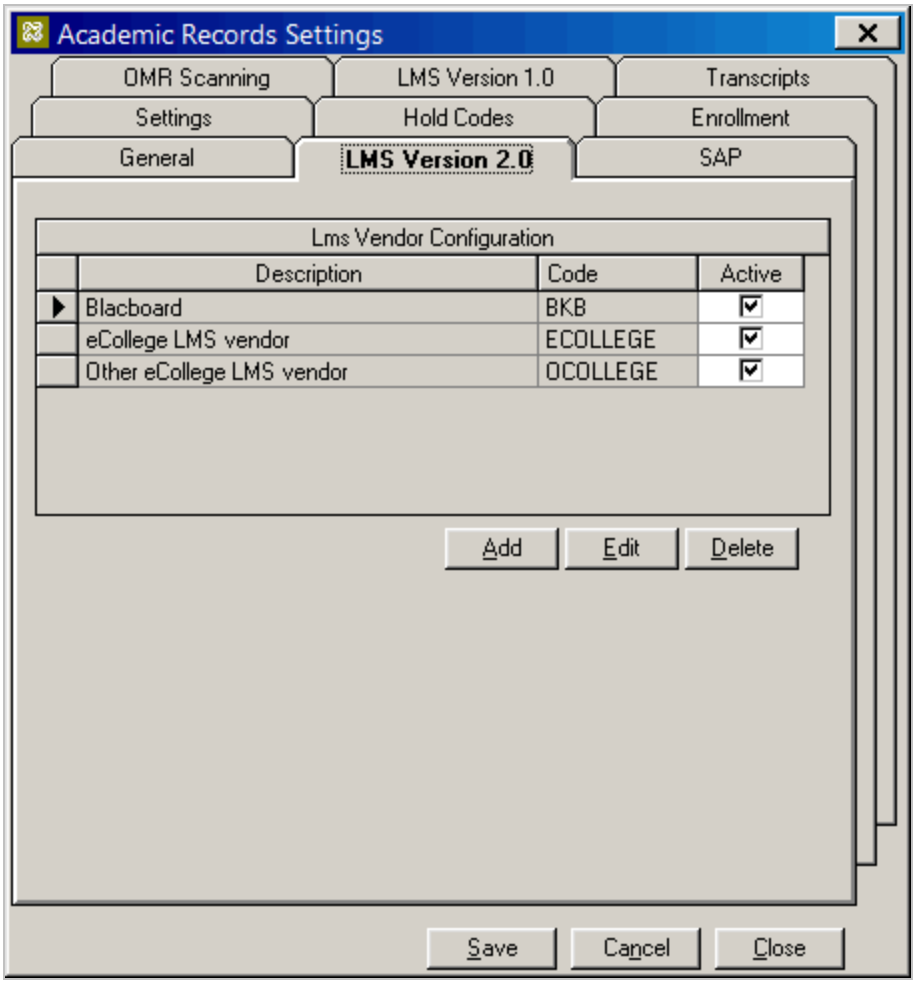
2. Click **Add**, or select a record and click **Edit**. The LMS Data Exchange Configuration form is displayed.



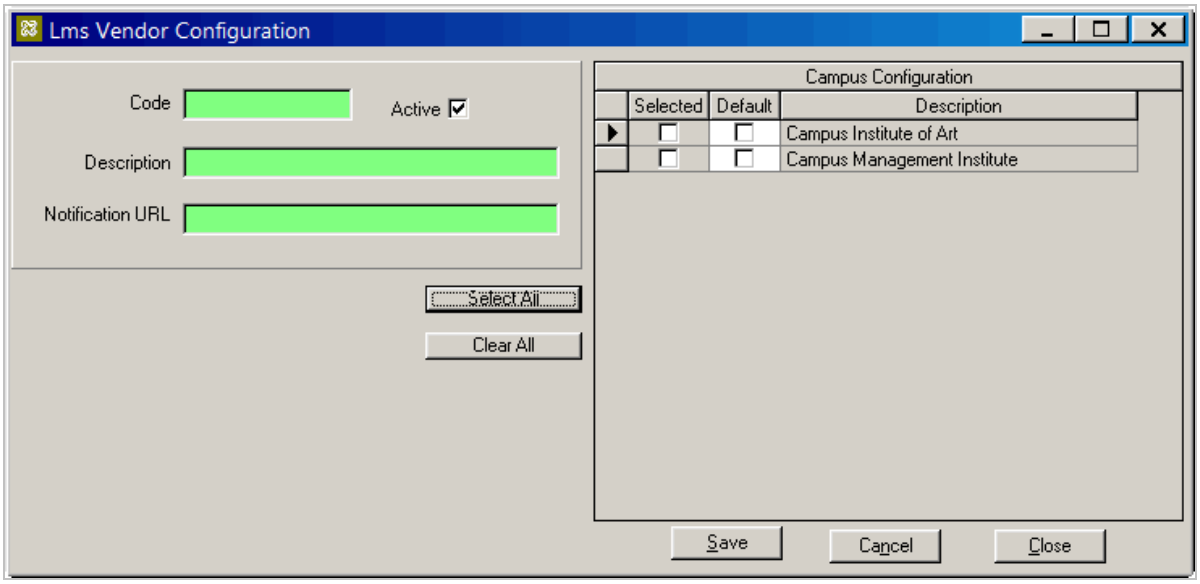
3. In the **Configuration Description** field, specify a unique description to identify this configuration.
4. Select the **Import/Export Methods** to be used for this configuration.
5. From the **LMS Providers** list, select the LMS provider.
6. Specify the **Login Name** used for this provider. Enter the name exactly as it is used to log into the LMS provider account.
7. Specify the **Password** used for the login name above.
8. Specify the **Role** for this account.
9. Specify the **LMS URL** for this account.
10. Specify the **Portal Return URL** for this account.
11. Select the **Campuses** that will use this configuration.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To configure the LMS Vendor:

1. Navigate to **Setup** > **Academic Records**. The Academic Records Settings form is displayed. Select the **LMS Version 2.0** tab.



2. Click **Add**, or select a record and click **Edit**. The **LMS Vendor Configuration** form is displayed.



3. Specify a unique **Code**.

4. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
5. Enter a **Description**.
6. In the **Notification URL** field, enter any text. This field cannot be left blank.
7. In the **Campus Configuration** area, select the applicable check boxes.
8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Academic Records Settings - OMR Scanning Tab

Use the OMR Scanning tab on the Academic Records Settings form to configure CampusNexus Student for scanning of printed and marked class section rosters containing attendance and final grades. The forms, manufactured by SCANTRON™, are used by CampusNexus Student to print class section rosters, which are then read by the ScanMark™ Optical Mark Reader (OMR) or an NCS Pearson device. CampusNexus Student accepts data from the OMR during the scanning procedure and updates student records with the attendance and grade data.

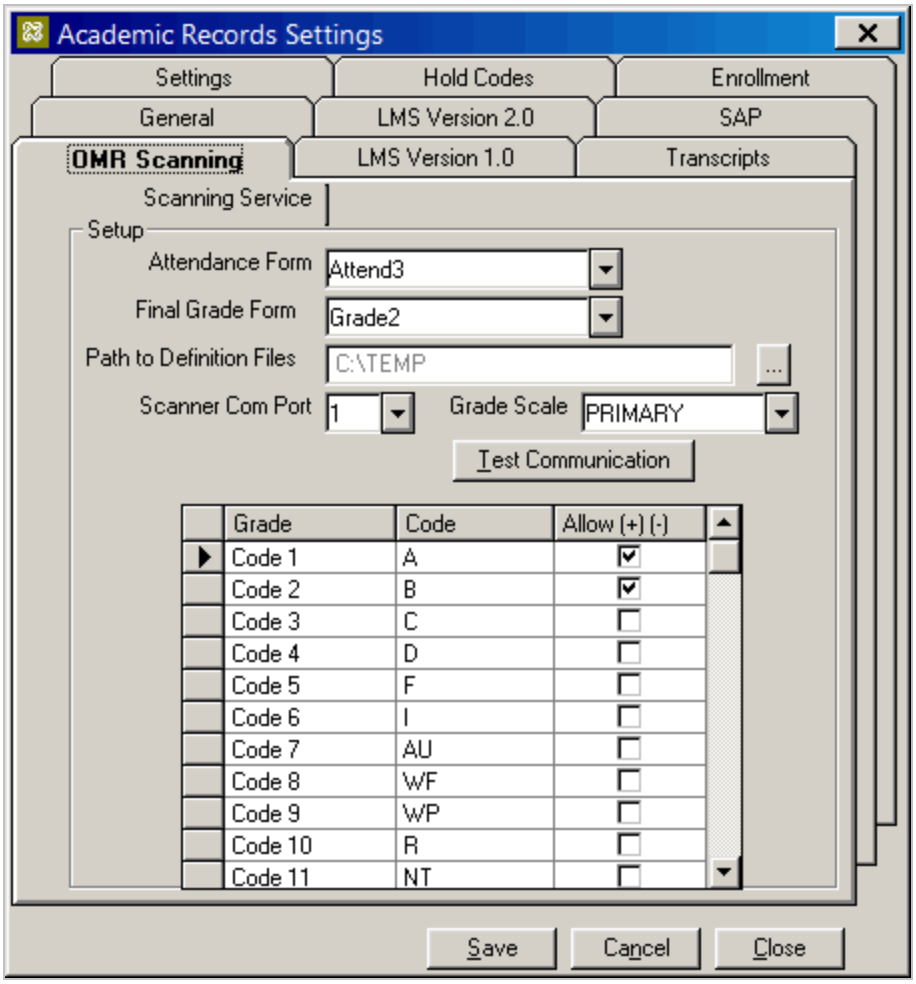
SCANTRON™ and ScanMark™ are registered trademarks of SCANTRON Corporation.

Note: Please read "Scantron Overview" for an overall review of the CampusNexus Student/SCANTRON™ Interface.

For this system to work, you must provide the information on the setup form. See also Test Communication button.

To enter the Scantron system settings:

1. Navigate to **Setup** > **Academic Records**. The Academic Records Settings form is displayed. Select the **OMR Scanning** tab.



2. Select the **Scanning Service**.
3. Select an **Attendance Form**. Multiple forms are printed for class sections having more than the number of

students that can be printed on one form.

- Form No. F-10873-CMC-L. In addition to the class section identification data, this form contains 45 roster lines, each of which is formatted with 9 columns of attendance data. Each column contains 2 bubbles, one for absent and one for tardy. A student is assumed to be present if no bubble is marked for a given date on the form. Use of this form requires that you enter a value in the **Tardiness Absent Percent** field. For instance, a 10 entered in this field indicates that you will deduct 10 percent of the class meeting time from the minutes scheduled when marking a student as tardy. Values in this field can have two decimal places, i.e., 12.25 is twelve and one quarter percent.
- Form No. F-15174-CMC-L. This form is similar to the F-10873-CMC-L form. The principal difference is that it has a Present column for each meeting date. It contains data for 46 students and 7 meeting dates. The instructor must mark each student listed on the form as present, absent, or tardy. You must enter a percentage in the **Tardiness Absent Percent** field for use in calculating minutes to be deducted from scheduled class time.
- Form No. F-15175-CMC-L. This form can contain data for 22 students and 5 meeting dates. For this form, you must set up a code table to represent the bubbles on the form. You can designate meanings for 10 bubbles for each student. You can code a bubble to mean present, absent, excused absence, and/or several degrees of tardiness.

  Example:

  - Attendance Code 1, representing bubble number 1 on the form, can be set up to indicate that the student is present in class.
  - Code 2 can indicate that the student is absent.
  - Code 3 can indicate that the student's absence was excused.
  - Code 4 can indicate that the student was 10 minutes tardy.
  - Code 5 can indicate 20 minutes tardy.
  - Code 6 can indicate 40 minutes tardy, and so on.

  You can only enter values in the Minutes Tardy column on rows that have been selected as Tardy. The codes you set up are printed at the bottom of the form for easy reference by the instructors.

  Keep in mind that the same table values apply to all class sections regardless of their duration in minutes. A 60 minute class and a 120 minute class will be treated the same. A mark in the Code 4 bubble on the form means 10 minutes tardy in both classes.

  Click **Save** after you set up or change your code table.

4. Select a **Final Grade Form**. Multiple forms are printed for class sections having more than the number of students that can be printed on one form.

   - Form No. F-10871-CMC-L. On this form, the grading options are preprinted. The form contains rows for 45 students. Your grading scale must contain these 13 grading options, or you must require that the instructors not use the grades that are not in your grading scale. The grades on the form are A, A-, B+, B, B-, C+, C, C-, D, F, I, W, and P.
   - Form No. F-15173-CMC-L. This grading form may be used for midterm or final grades. The form contains rows for 45 students. If you do use it for midterm grades, each class section to be graded must have a lesson defined with a code of MIDTERM. The form contains twelve columns for grades and columns to indicate plus (+) or minus (-).

5. Use the **Grade**, **Code**, and **Allow (+)(-)** grid to assign your grading scale to the bubbles on the form. Code 1 represents bubble number 1, Code 2 represents bubble number 2, and so on. Click in the Code column and click

to select a grade. The grades come from the grading scale you select. If a grade has plus or minus suffixes in the grading scale, CampusNexus Student checks the settings in the Allow (+)(-)column.

6. Click **Save** after you set up or changed your code table.
7. Specify the **Path to Definition Files**. This path refers to the location of scanning form definition files for attendance and final grade forms. These files are static and do not change during processing. These files should reside on the local hard drive of the workstation that will process the scanning portion of the Scantron Interface. The form definition files are uploaded to the OMR from the workstation when scanning begins. The "Path to SCANTRON files" must be on the PC to which the SCANTRON optical mark reader (OMR) is attached. The scanning process does not work reliably when these files are transferred during scanning from a network server through the PC to the OMR because the OMR frequently times out before the file transfer from the server is completed.

   Note: The scanning form definition files are required to reside in the target folder for proper operation and these files are provided with CampusNexus Student in the default folder `C:\Program Files\CMC\CampusVue`.

   Copy the following scanning form definition files to the folder where the scanning output will be targeted:

   - `Attend.800`
   - `Attend2.800`
   - `Attend3.800`
   - `Grade.800`
   - `Grade2.800`
   - `Z001.sds`
   - `Z002.sds`
   - `Z004.sds`

   The SCANTRON files are installed at `C:\Program Files\CMC\CampusVue`. (This implies that you can attach the Scantron unit to any PC running CampusNexus Student.) You can use this path or you can copy the files to a separate SCANTRON directory, for example, `C:\Scantron`.
8. Select the **Scanner COM Port** to which the OMR is attached on the workstation. See Scantron Overview for more details about setting up the connection between the workstation and the OMR.
9. Select the **Grade Scale**.
10. If you are using form 10873 or form 15174, you must enter a **Tardiness Absent Percent**. This is the percentage of the total class meeting time to be deducted if a student is tardy. For example, if the Tardiness Absent Percent is 10, when a student is tardy, 6 minutes are deducted for a class that meets for 60 minutes. On the Attendance Detail Report, this shows up as 54 minutes present and 60 minutes scheduled.
11. Click **Test Communication** to check the communications between the workstation and the OMR. CampusNexus Student sends a signal to the OMR and the OMR returns a signal to CampusNexus Student. You can see this signal transfer by watching the receive and transmit lights on the OMR control panel.

    - If the communications test is successful, a confirmation message is displayed.
    - If your CampusNexus Student/SCANTRON interface is not properly configured, an error message is displayed. To troubleshoot the issue:
      - Verify that you followed the setup instructions in SCANTRON Overview.
      - Contact your network system administrator.
      - Contact SCANTRON Corporation or its sales representative.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

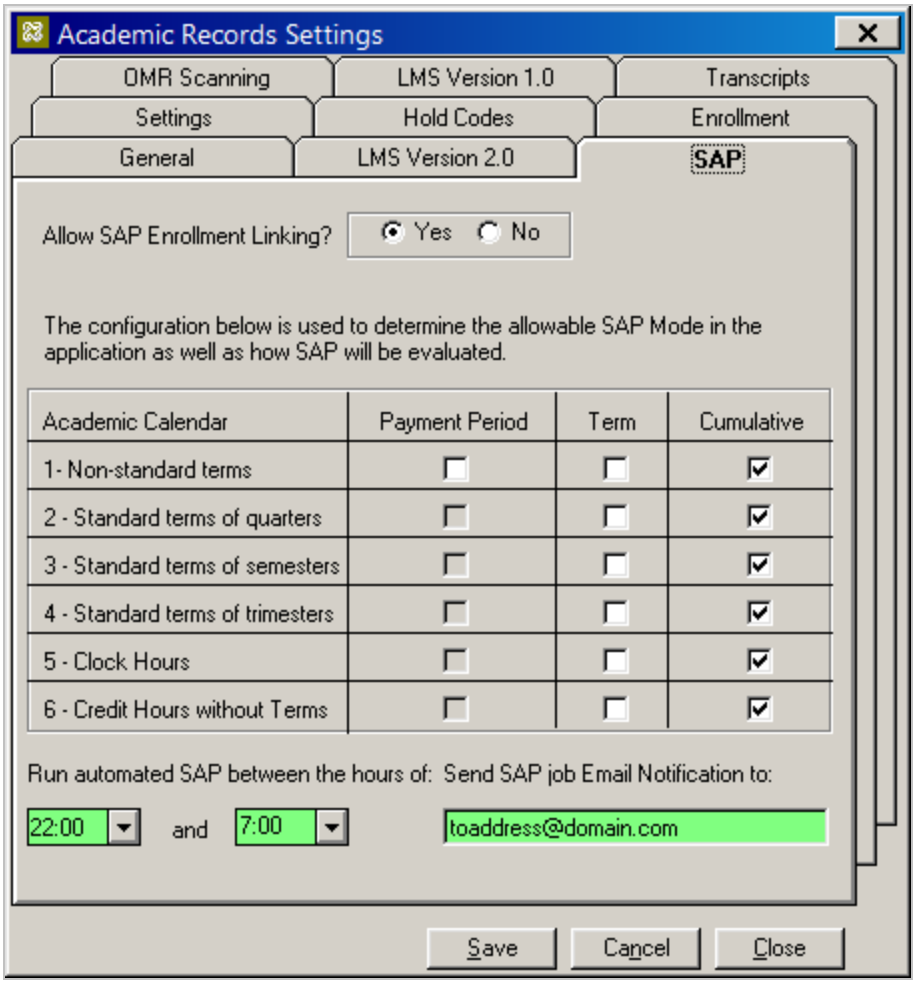
Academic Records Settings - SAP Tab

Academic advisors use the SAP tab of the Academic Records Settings form to configure academic calendars so that the Satisfactory Academic Progress (SAP) process selects appropriate SAP modes (Payment Period, Term, or Cumulative) when evaluating students.

Note: These configuration settings apply to all program versions. If Academic Calendar 1 is configured to use both Term/Cumulative and Payment Period SAP, the academic advisor can configure Academic Calendar 1 for a specific program version.

To configure SAP settings:

1. Navigate to **Setup** > **Academic Records**. The Academic Records Settings form is displayed. Select the **SAP** tab.



2. Select **Yes** to Allow SAP Enrollment Linking. This option allow previous permanent out enrollments to be linked to subsequent enrollments for SAP calculations. This setting allows users to link enrollments using the Enrollment Wizard and the Re-Entry Wizard, as long as the user is also configured as a member of the Staff Group AD - SAP Linked Enrollment.

   When No (default) is select, only enrollments from the Enrollment folder can be linked.

3. Select appropriate check boxes to define the **SAP modes** that SAP calculations can be run in CampusNexus

Student. The following modes are available:

- All
- Term Only
- Cumulative Only
- Term and Cumulative
- Payment Period Only
- Payment Period and Term
- Payment Period and Cumulative

The SAP mode setting changes the availability of the 'Term Based' and 'Cumulative' radio buttons on the Satisfactory Academic Progress Calculation form when processing SAP.

Notes:

- On Academic Calendar 1, all check boxes are enabled and available for selection.
- On Academic Calendars 2, 3, and 4, Payment Period is disabled; only Term and Cumulative are enabled and available for selection.
- On Academic Calendars 5 and 6, if Payment Period is selected, Term and Cumulative are disabled. If Term or Cumulative is selected, Payment Period is disabled.

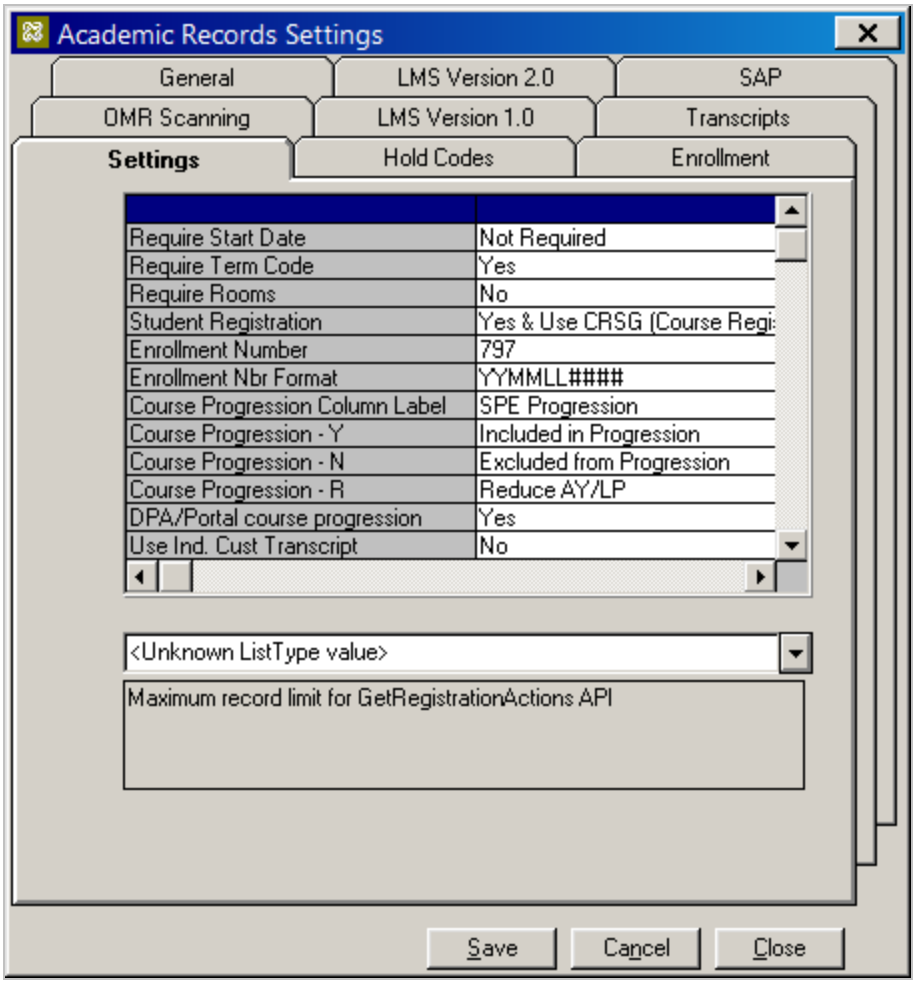
4. Specify the **hours** when the SAP can be run and the **email address** for the SAP job notification.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Academic Records Settings - Settings Tab

The Academic Records Settings form is used to determine certain procedures required by your institution. Set these parameters according to the way your institution operates. The first tab displayed is the Settings tab.

To set these parameters:

1. Navigate to **Setup** > **Academic Records**. The Academic Records Settings form is displayed. Select the **Settings** tab.



2. Click on the setting you want to configure and select an appropriate value from the list below the list of settings. Notice the instructions at the bottom of the form.. For more information, see Field Descriptions.

3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Field Descriptions

Field	Description
Require Start Date	Does your institution require validation of student start dates according to your program version start dates? Must a student start on a given program version start date? Select one of the following values: • Required and Not Modifiable • Required and Modifiable • Not Required The setting you choose affects the expected start date, mid-point date, and expected graduation dates on the Enrollment Wizard and Student forms.
Require Term Code	Does your institution require class schedules to be associated with a specific term? Select Yes or No.
Require Rooms	Does your institution require rooms to be assigned when setting up class schedules? Select Yes or No.
Student Registration	The values for this field are: • Yes • No • Yes & Use CRSG (Course Registration Sharing Groups) When Yes is selected, only courses offered at the student's campus are displayed. When No is selected, the previous logic listing all courses offered within the defined campus group is used. When Yes & Use CRSG (Course Registration Sharing Groups) is selected, course sections are shared with other campuses giving students additional options to register for course sections that may be filled at their home campus. The sponsoring campus owns the course and determines which campuses to share that course section. Students at these campuses can then register into these course sections at either campus. Any campus with CRSG enabled will be available to any other campus (provided the user has access rights to both campuses). To prevent sharing course sections with other campuses, select No. **Note**: The CRSG feature works concurrently with the course cross-referenced option, where students take courses at the same campus or a different campus with a different course number, using this course to fulfill the degree requirements.
Enrollment Number	Specify a number representing the most recent enrollment number assigned to any student. The next student to enroll will be assigned an enrollment number that is one greater than the number entered here. CampusNexus Student automatically increments the enrollment number as numbers are assigned to students. Do not confuse the enrollment number with the Student ID which is automatically assigned by CampusNexus Student to each new lead. The Student ID and enrollment number are used for different purposes and may only coincidentally be the same value for a given student. The Student ID is set up under Setup > Admissions.

Field	Description
Enrollment Number Format	You can control the format for enrollment numbers. Once you determine the format of the enrollment number, CampusNexus Student can automatically assign a unique enrollment number to each new enrollment. The enrollment number is assigned at the time the student enrolls in a program version. If a student enrolls in two program versions, the student will have a different enrollment number for each program. The current format is displayed in the text box under the settings list. Notice the instructions below the text box. Use the codes in the instruction box to form your own enrollment number format by entering them in the text box. The maximum length of the student number is ten (10) characters. You can combine the codes in any order. The codes are as follows: • YY - low order two digits of the year in the current system date • MM - month digits in the current system date • DD - day digits in the current system date • # - digit in a sequential number assigned by CampusNexus Student to each student enrollment. Include at least 3 digits in this portion of the enrollment identifier. *Example*: Your sequential numbers have reached 12,784, and you have #### as this portion of the format. The enrollment number will show 2784. • L - letter in the student's last name. *Example*: You include LL as part of your student ID format. A student whose last name is Smith would have SM in the enrollment number. • F - letter in the student's first name. *Example*: You include FF as part of your student ID format. A student whose first name is John would have JO in the enrollment number.
Course Progression Column Label	This option enables system administrators to specify the text of the column label for course progression values in the Degree Progress Audit (DPA).
Course Progression - Y	The text associated with this setting is displayed in the Legend whenever course progression is turned on. Customizable field.
Course Progression - N	The text associated with this setting is displayed in the Legend whenever course progression is turned on. Customizable field.
Course Progression - R	The text associated with this setting is displayed in the Legend whenever course progression is turned on. Customizable field. For more information about the Course Progression settings, see Allow courses to be exempt from progression.

Field	Description
Custom Transcript	Select the file to be used when printing a transcript by clicking in the text box under the settings list. By default, the text box is empty. Click None to clear a previously selected custom transcript. **View > Academic Records > Final Grades**. When the Transcript option and Print button are selected, CampusNexus Student checks for a custom transcript file. If there is no custom transcript, CampusNexus Student uses the generic transcript report. **View > Contact Manager > Transcript Request**. When the Transcript option and Print Transcript button are selected, CampusNexus Student checks for a custom transcript file. If there is no custom transcript,CampusNexus Student uses the generic transcript report. **Daily > Contact Manager > Process Transcript Request**. When the Transcript option and Print Transcripts button are selected, CampusNexus Student checks for a custom transcript file. If there is no custom transcript, CampusNexus Student uses the generic transcript report.
Use Ind. Cust Transcript	Select whether to use a custom transcript for individual students.
Use Batch Cust Transcript	Select whether to use a custom transcript for student batches.
Allow Transfer Reverse	Select whether to allow reverse transfer.
Allow Enrollment Re-Entry	Select whether to disable the use of the Re-Entry button on the enrollment form.
Degree Progress Audit	Specify whether to enable the Degree Progress Audit. The following values are available: • No • Yes, with Course Level GPAs • Yes, without Course Level GPAs Choose between the existing Degree Audit only, the existing Degree Audit and the new Degree Audit with course level G Pa's, or the existing Degree Audit and the new Degree Audit without course level GPAs. **Important Note**: The 'Yes' options are available only if the API Web Services have been configured. When the setting is changed to either one of the 'Yes' options, CampusNexus Student displays a login screen for access to the API Web Services. Once the user has been authenticated, CampusNexus Student verifies that the API Web Services have been properly configured to run the Degree Progress Audit. If the configuration is verified, the setting is changed to 'Yes'. Otherwise the setting is reset to 'No' and following message is displayed: *"Authentication was not provided or one or more of the API web services necessary to use the Degree Progress Audit is not installed or not configured properly. As a result, the Degree Progress Audit cannot be turned on at this time."* If this message is displayed, configure the API Web Services before attempting to enable the Degree Progress Audit.

Field	Description
Student Degree Evaluation	Select whether to allow the Student Degree Evaluation Report to be run. When set to No, the Student Degree Evaluation Report print button is hidden on the Student Enrollment form and from the reports menu.
Degree Audit Label	The text entered in this field appear as a heading on the Degree Progress Audit form and on its printout. It does not affect the Menu, Title Bar, or Student Bar captions.
Scanning Service?	Select the scanning devices used at your institution. The options are: • Scantron • NCS Pearson • None
Allow Cross-Referencing?	Select Yes (default) to enable cross-referencing of courses.
Allow Course Substitution	Select Yes to enable course substitutions during scheduling. When a user registers a student into a course that has a substitution pool, the user can select a course from the substitution pool during the registration process started at the student's Schedule form. The default setting is No.
Audit Course Registration	Select Yes to enable audit course registration for students. The default setting is No.
Campus for add/drop?	Use this option to configure which campus is used to determine the add/drop configuration. The options are: • Student's enrollment campus (default) • Course section's campus
Copy Class Schedule Batch Size	Use this option to specify the number of classes to be copied in a single batch.

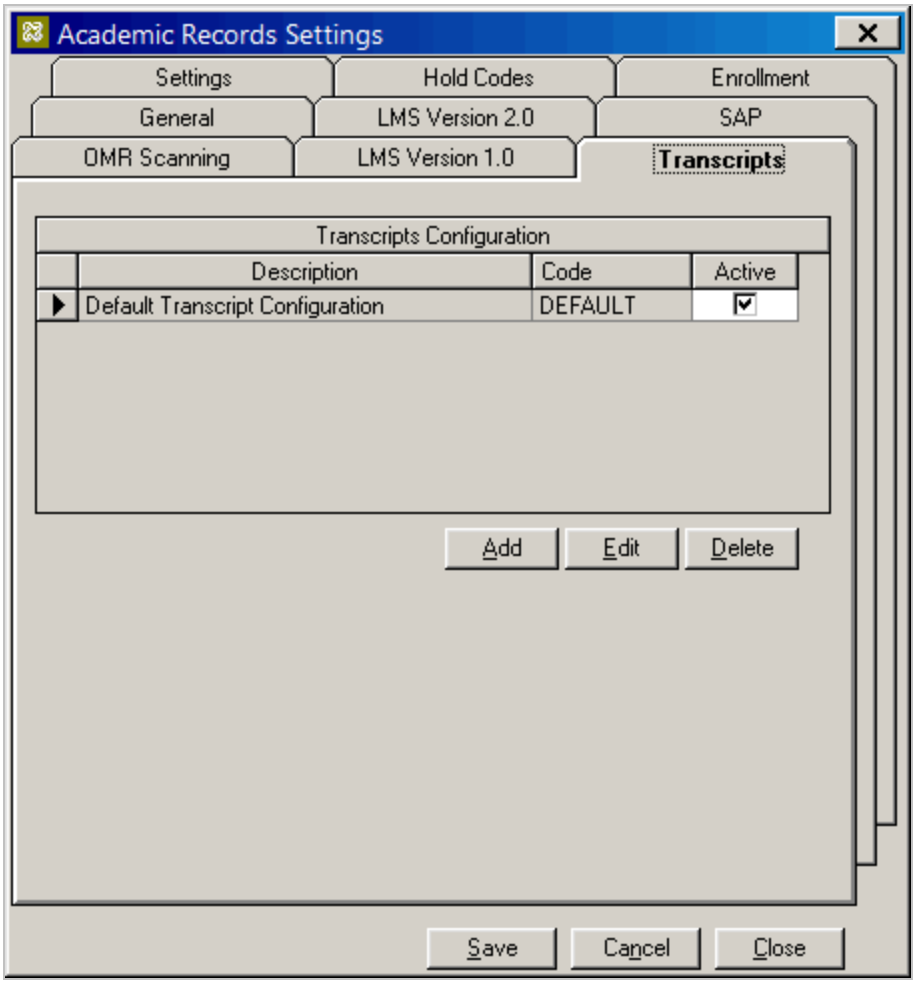
Academic Records Settings - Transcripts Tab

Use the Transcripts tab of the Academic Records Settings form to configure how transcripts are handled.

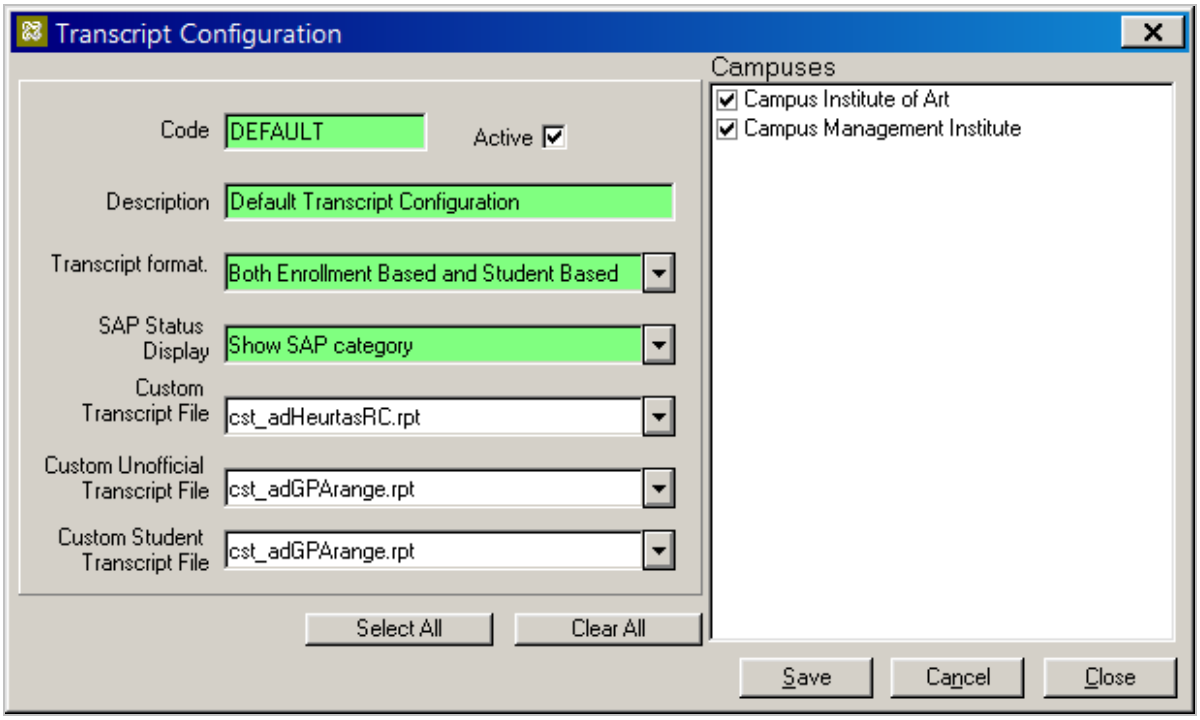
For more information, see Final Grades, Academic Records Hold Codes Setup, User Info Academic Records, Academic Records Reports.

To configure transcripts:

1. Navigate to **Setup** > **Academic Records**. The Academic Records Settings form is displayed. Select the **Transcripts** tab.



2. Click **Add**, or select a record and click **Edit**. The Transcript Configuration form is displayed. Use this form to define custom transcripts by campus, institution brand, or for all campuses.



3. Specify a unique **Code**.
4. Enter a **Description**.
5. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
6. Select the **Campuses** for which this transcript configuration applies. The list of campuses displayed are those to which the user logged on has access.
7. Select the **Transcript Format**. The options are:
    - Student Based – transcripts that list courses for all student enrollments grouped by term code in chronological order by term start date.

      Enrollment and degree information appears at the end of the report. The GPA, Credits, and Hours for courses taken in the same term, but at different institutions, are summed and presented as a single set of totals for the term. Custom student-based transcripts can also be defined on a per campus basis.
    - Enrollment Based – transcripts that list courses for the selected enrollment.
    - Both Enrollment and Student Based – allows you to select whether to print an enrollment based or student based transcript for each student.
8. Select the **SAP Status Display** to print on the transcript. The options are:
    - Show All
    - Show None
    - Show Pass SAP statuses only
    - Show Fail SAP statuses only
    - Show SAP category

When you select 'Show SAP category', "SAP Met" or "SAP Not Met" is displayed on the transcript at the end of each term.

9. If a **Custom Transcript File** is to be used, select the rpt file. Otherwise, select None (default).
10. If a **Custom Unofficial Transcript File** is to be used, select the rpt file. Otherwise, select None (default).

    This file selection is only available for Enrollment Based transcripts. Unofficial transcripts are clearly labeled as "Unofficial Transcript".
11. If a **Custom Student Transcript File** is to be used to view and print student based transcripts using a customized report, select the rpt file. Otherwise, select None.

    This option is only enabled when Transcript Format is Student Based or Both Enrollment and Student Based.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

    Note: You can customize your transcripts with the transferring college's course and college information.

Setup > Distance Education

When you navigate to Setup > Distance Education, the Distance Education Setup form is displayed. Use this form to configure pay rates and hold criteria related to distance education. The form contains the following tabs:

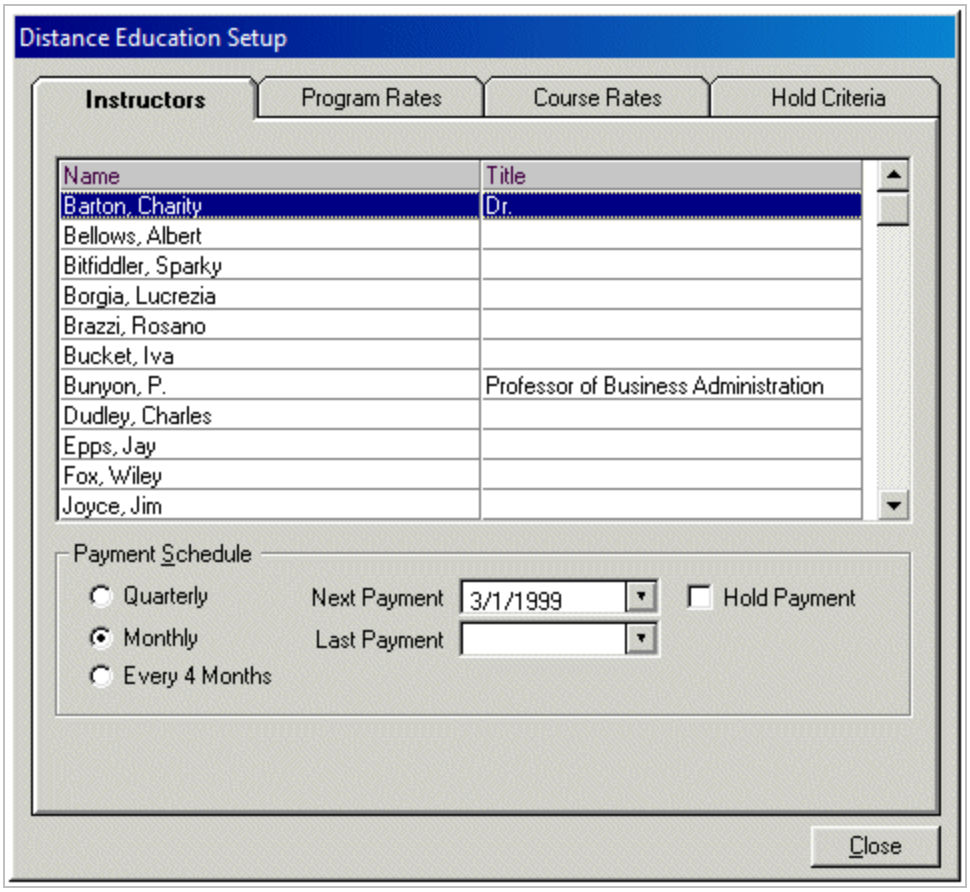
- Instructors
- Program Rates
- Course Rates
- Hold Criteria

Distance Education Setup - Instructors Tab

Use the Instructors tab on the Distance Education Setup form to set up the payment schedule for distance education instructors. If necessary, you can put a hold on payments.

To set up an instructor for distance education procedures:

1. Navigate to **Setup > Distance Education**. The Distance Education Setup form is displayed.
2. Select the **Instructors** tab. The list of available instructors (from Staff setup) is displayed.



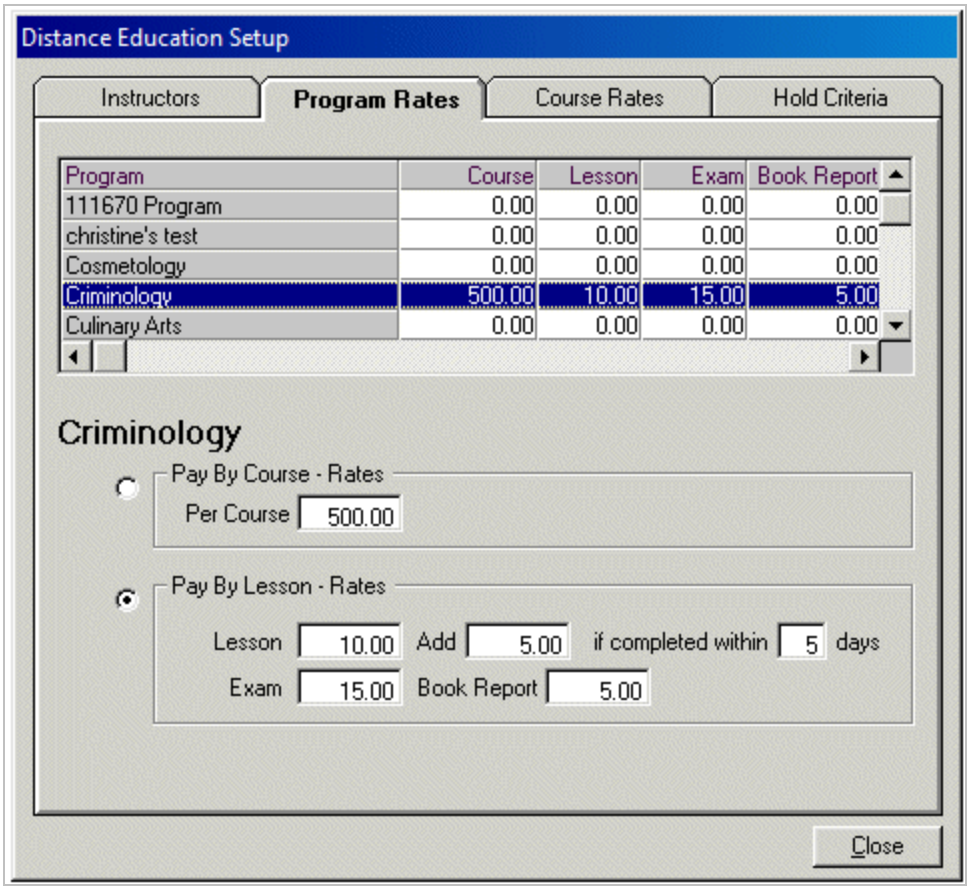
3. Select an **instructor**.
4. Select appropriate **Payment Schedule** options.
5. Select or clear the **Hold Payment** check box
6. Click **Close** to close the form.

Distance Education Setup - Program Rates Tab

Use the Program Rates tab on the Distance Education Setup form to set up pay rates for distance education instructors at the program level.

To set up a pay rate schedule at the program level:

1. Navigate to **Setup > Distance Education**. The Distance Education Setup form is displayed.
2. Select the **Program Rates** tab. The list of available programs is displayed.



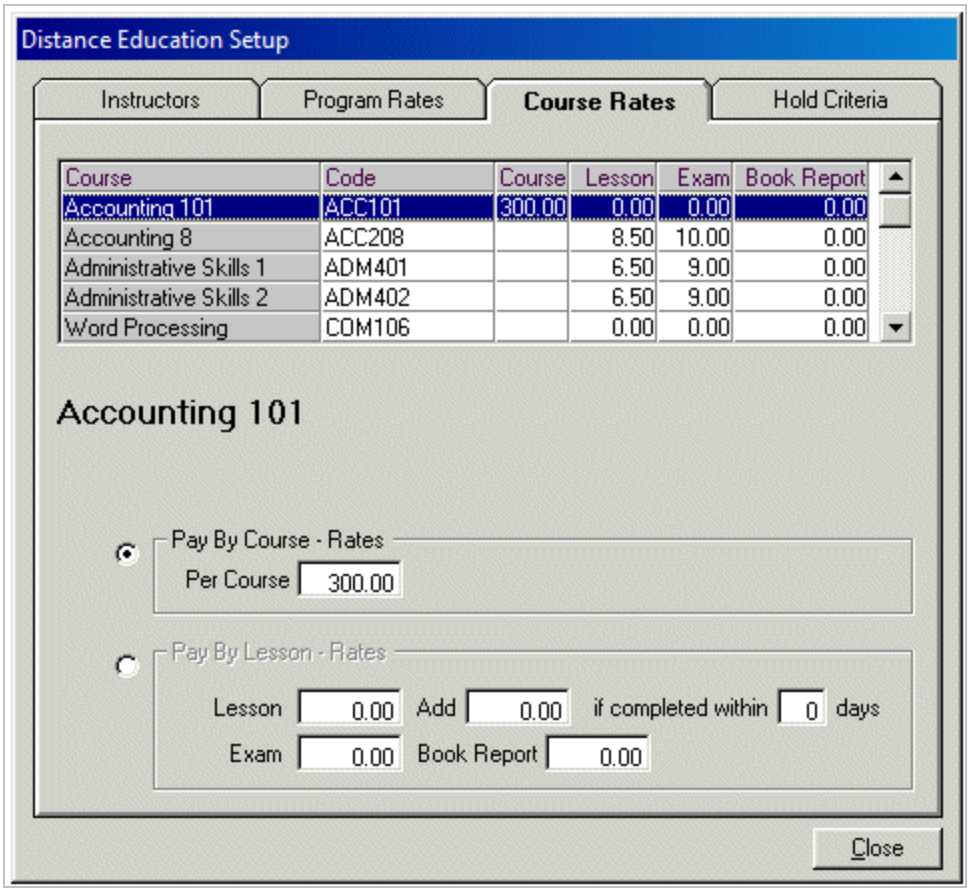
3. Select a **Program**. The bottom of the form displays fields to configure the rates for the selected program.
    - If the instructor is to be paid once for each course, select the option to **Pay by Course**. Enter the amount per course within the program.
    - If the instructor is to be paid once for each lesson, exam, and book report, select the **Pay by Lesson** option. Enter the pay amount for a lesson (and additional amount if completed within a specified number of days), exam, and book report.
4. Click **Close** to close the form. .

Distance Education Setup - Course Rates Tab

Use the Course Rates tab on the Distance Education Setup form to set up pay rates for distance education instructors at the course level.

To set up a pay rate schedule at the course level:

1. Navigate to **Setup > Distance Education**. The Distance Education Setup form is displayed.
2. Select the **Course Rates** tab. The list of available courses is displayed.



3. Select a **Course**. The bottom of the form displays fields to configure the rates for the selected course.
    - If the instructor is to be paid once for each course, select the option to **Pay by Course**. Enter the amount per course within the program.
    - If the instructor is to be paid once for each lesson, exam, and book report, select the **Pay by Lesson** option. Enter the pay amount for a lesson (and additional amount if completed within a specified number of days), exam, and book report.
4. Click **Close** to close the form.

Distance Education Setup - Hold Criteria Tab

Use the Hold Criteria tab of the Distance Education Setup form to select a group of students for which to hold lesson receipts. A student might appear in such a group if, for instance, the student's account balance is unacceptable. If a student appears in one or more of the groups listed on this tab, you cannot post the receipt of a lesson or exam from the student. The condition which caused the student to appear in the group(s) must be cleared before lessons can be received. This method of designating holds on lesson receipts is best suited for "batch processing of holds" as opposed to selective holds on specific lessons.

Note: Using the "hold" mechanism to block the receipt of lessons is not the same as placing a lesson on hold in the procedure under View > Academic Records > Lessons. Also, lessons that are placed on hold using this method do not appear with hold flags on the Distance Education > Lesson Tracking Report.

To designate a student group as a hold group:

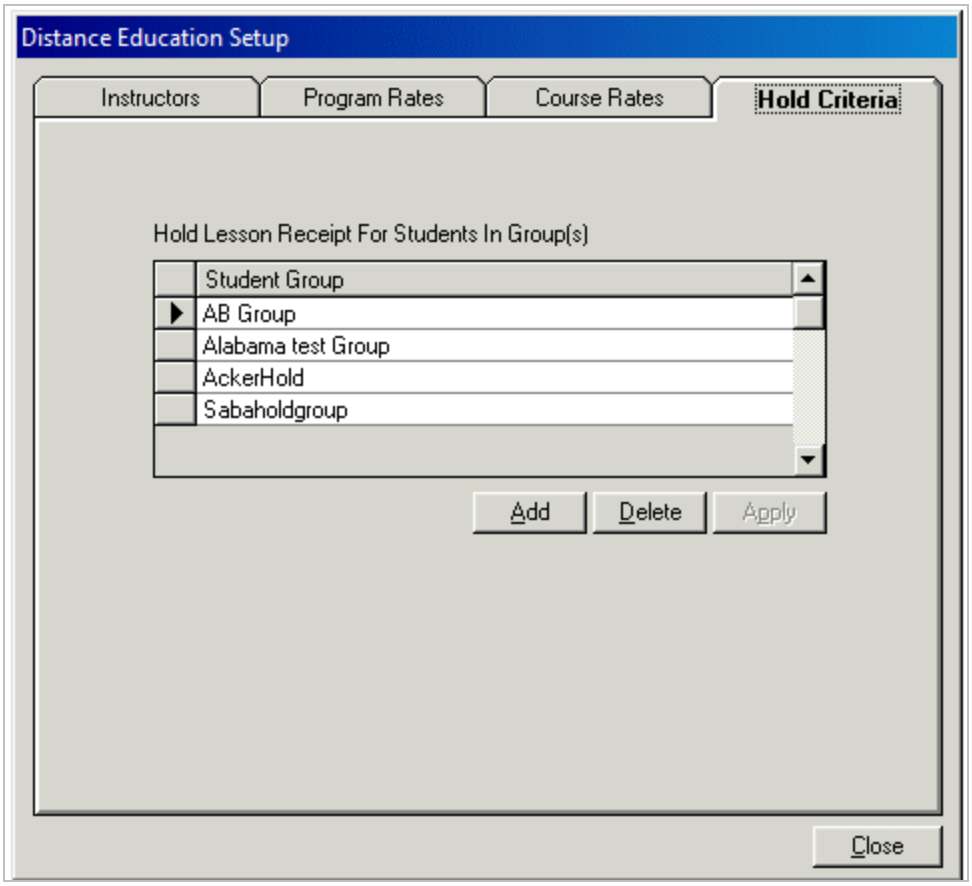
1. Determine that the group you want to use as a hold group has been created.

   A student group is defined in several methods in CampusNexus Student:

   - You can set up a student group under Find > Student Groups > Add (manually controlled group only).
   - You can also create a student group under Find > Student (Search).
   - You can create a group from a report that lists students having common characteristics. For instance, you could run an Account Balance report for students with a balance over $100.00 and create a group from the report results.

   How ever you create the group, it must be available before you label it as a hold group in this procedure.

2. Navigate to **Setup > Distance Education**. The Distance Education Setup form is displayed.
3. Select the **Hold Criteria** tab. Existing student groups are displayed. Review the list of groups to be sure the group to be added is not already listed.



4. To add a group, click **Add**. A blank line appears at the bottom of the list.
5. Click in the blank line and click to select a student group.

   To associate several student groups with the hold action, repeat the preceding steps as needed.
6. Click **Apply** to save your hold code selections.
7. Click **Delete** to delete a group.

   Note: Deleting a student group from this list does not delete it as a viable student group.
8. Click **Close** to close the form.

Setup > Career Services

When you navigate to Setup > Career Services, the Career Services - Settings form is displayed. Use this form to configure placement settings, fields to be included in the placement wizard, and hold codes related to career services. The form contains the following tabs:

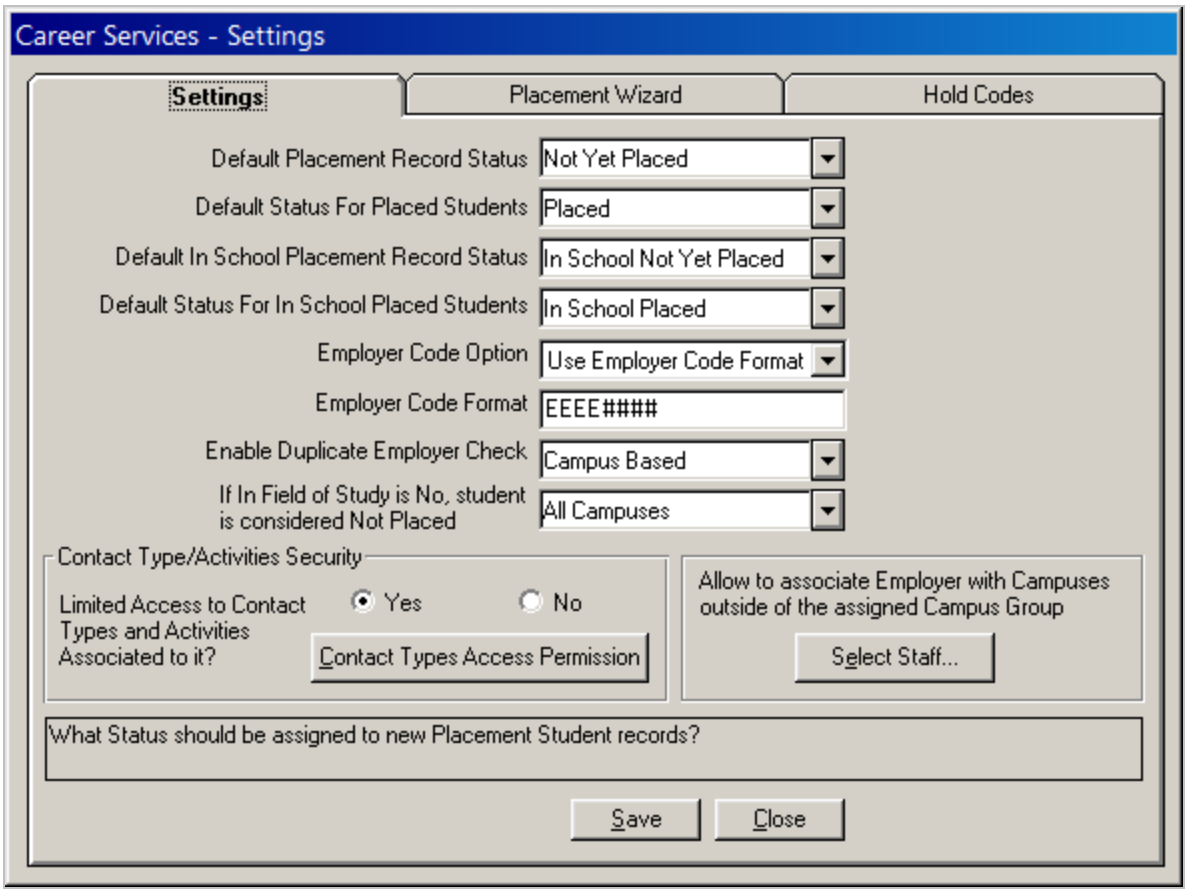
- Settings
- Placement Wizard
- Hold Codes

Career Services Settings - Settings Tab

Use the Settings tab of the Career Services Settings form to configure options such as the default status to be assigned to a new placement record when it is created, the default status to be assigned to the placement record when a student is placed, employer codes, and staff permissions related to career services.

To configure career services settings:

1. Navigate to **Setup** > **Career Services**. The Career Services - Settings form is displayed. Select the **Settings** tab.



2. Specify appropriate options. See Field Descriptions.
3. Click **Save**.
4. Click **Close** to close the form.

Field Descriptions

Field	Description
Default Placement Record Status	This status is assigned to each new placement record at the time it is created (at the time of each enrollment). The options are: • Not Yet Placed – This is the default for new students. • Part Time Placed – Use this option when the student has been placed in part time position
Default Status for Placed Students	This status is assigned when the student has been placed. The options are: • Currently Attending – Student is still in school and placed. • Placed – Student is out of school and placed. • Previously Placed – Student is in school and has been previously placed.
Default In School Placement Record Status	The assigned status is: • In School Not Yet Placed.
Default Status For In School Placed Students	The assigned status is: • In School Placed.
Employer Code Option	Select one of the following options: • Manual Entry – Requires a user-entered code to be used. • Use Employer Code Format – A system-generated code can be applied to each employer .
Employer Code Format	The format used by CampusNexus Student to generate employer codes (Employer Code Option must be set to Employer Code Format to enable this feature). Valid Employer Codes consist of at least 6 characters and no more than 16 characters. Define the format of the code by using the following values: • YY = Year • MM = Month • DD = Day • #### = Next Number • EEEE = Employer's Name The last four characters must be the #### symbols for generating the unique number. *Example*: *EEEE####* generates an employer code consisting of the first four characters of the employer's name followed by a unique 4-digit number generated by the system.

Field	Description
Enable Duplicate Employer Check	Select one of the following options: • No – (default) to disable the checking, • Global – check for duplicates across all campuses, • Campus Based – check for duplicates within the selected campuses.
If in Field of Study is No, student is considered Not Placed	Select one of the following options: • No – Select this option to *disable* listing a student record as Placed; if this option is chosen the student is considered Not Placed. • All Campuses – Select this option to *enable* listing a student record as Placed; if this option is chosen the student is considered Placed for all Campuses. • Campus-Based – Select this option to *enable* listing a student record as Placed; if this option is chosen the student is considered Placed for the selected Campuses only. **Note**: Notice the message when selecting the Campus-Based option: *'Select this option to enable or disable listing a student record as Placed if In Field of Study is Yes or Related or Student Attestation only.'* Student Attestation treats a student's placement the same as 'placed in a related field' or 'placed in field', yet distinguishes it so that accurate placement in the system can be demonstrated.

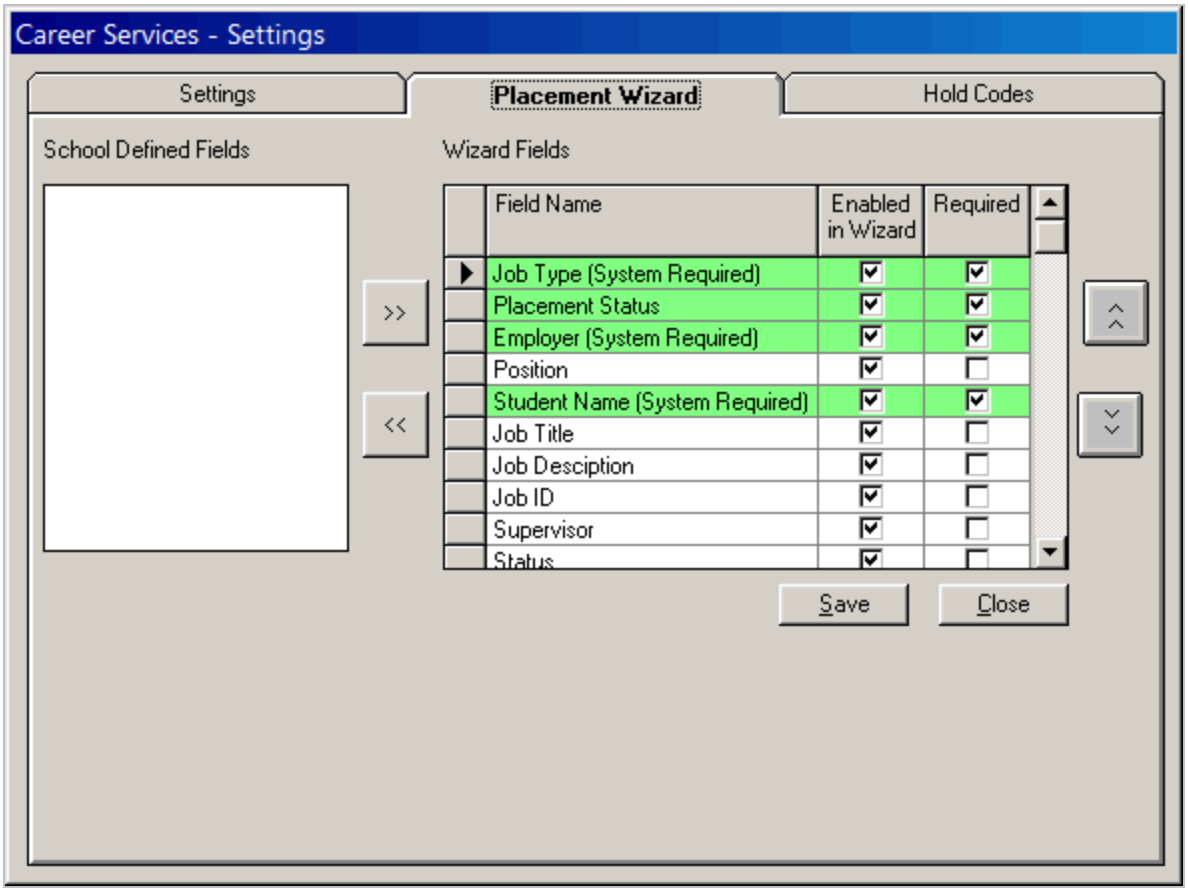
Field	Description
Limited Access to Contact Types and Activities associated to it?	To assign security levels for contacts based on staff group permissions, select **Yes** and click the **Contact Types Access Permission** button. The Contact Type Security form is displayed.  1. Select a **Staff Group**. 2. Assign security levels for the contact Types. 3. Click **Save** and **Close** the Contact Type Security form.
Select Staff	Click this button to allow staff members to associate employers with campuses outside their assigned campus group. See Staff To Associate Employer With Other Campuses for instructions.

Career Services Settings - Placement Wizard Tab

Use the Placement Wizard tab of the Career Services Settings form to customize the Student Placement Wizard for your institution.

To configure the placement wizard:

1. Navigate to **Setup** > **Career Services**. The Career Services - Settings form is displayed. Select the **Placement Wizard** tab.



2. The Wizard Fields area lists the field names included in the wizard forms. Each field can be enabled for selection in the wizard and set to require. Select appropriate options in the **Enabled in Wizard** and **Required** columns..

   The following fields are required by the system and are marked "System Required":

   - Job Type
   - Employer
   - Student Name
   - Date Placed
   - Start Date

   Fields which are required by the Data Dictionary are unmarked, but if you attempt to change their settings, a message state that the field is required by the Data Dictionary.

3. Click

<< and >> to move fields to and from the Wizard Fields section and School Defined Fields section. When you add a school-defined field to the wizard, a separate form is displayed during the wizard operation that allows the user to enter the corresponding field information.

4. If your campus uses more than one school-define field, click and to arrange the order of the school-defined fields as they appear on the third form of the Placements Wizard.
5. Click **Save**.
6. Click **Close** to close the form.

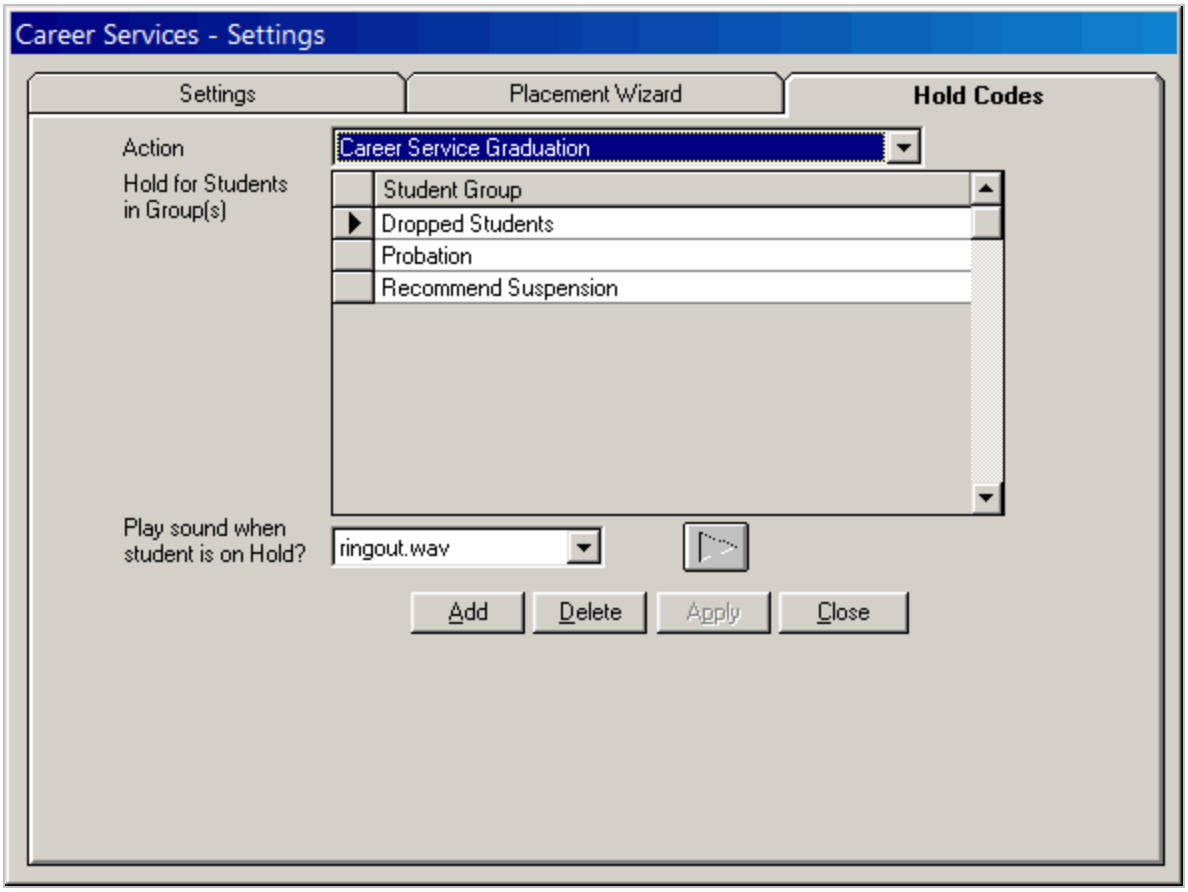
Career Services Settings - Hold Codes Tab

Students are placed on hold if some required documents are missing or some obligations of the student has not been fulfilled. It is at the discretion of the staff member to make the association. Place a student or group of students on hold for graduation or placement. Users can place a group on hold, or add student to a hold group, or place a student on hold.

Use the Hold Codes tab of the Career Services Settings form to associate hold actions with student groups.

To associate a hold action with a student group:

1. Navigate to **Setup** > **Career Services**. The Career Services - Settings form is displayed. Select the **Hold Codes** tab.



2. Select an **Action**:
   - Career Service Graduation - This option prevents changing the student's status from enrollment to graduation.
   - Career Service Placement - This option prevent adding a placement record for the student. Students with this hold will not appear when a staff member or an employer does a candidate search.
3. To add a group, click **Add**. A blank line appears in the Student Group area.
4. Click in the blank line and click to select a student group.
5. If you want a sound to be played when the student master for a student on hold is displayed, select a sound (.wav)

file from the **Play sound when student is on Hold?** list.

Click the **Play** button to hear the selected wave file. Sound files must be stored in the CampusNexus Student shared folder in the sounds subfolder. Sample ".wav" files are included. You can customize your "hold" sounds by placing additional ".wav" files into the CampusNexus Student share/sounds folder. (The sound feature may not be available on schools using Citrix or terminal servers.)

When working with student records, the hold sounds are audible only when the student's master record is opened.

6. Click **Apply** to save your hold code selections.
7. Click **Delete** to remove a group from the list of hold groups.

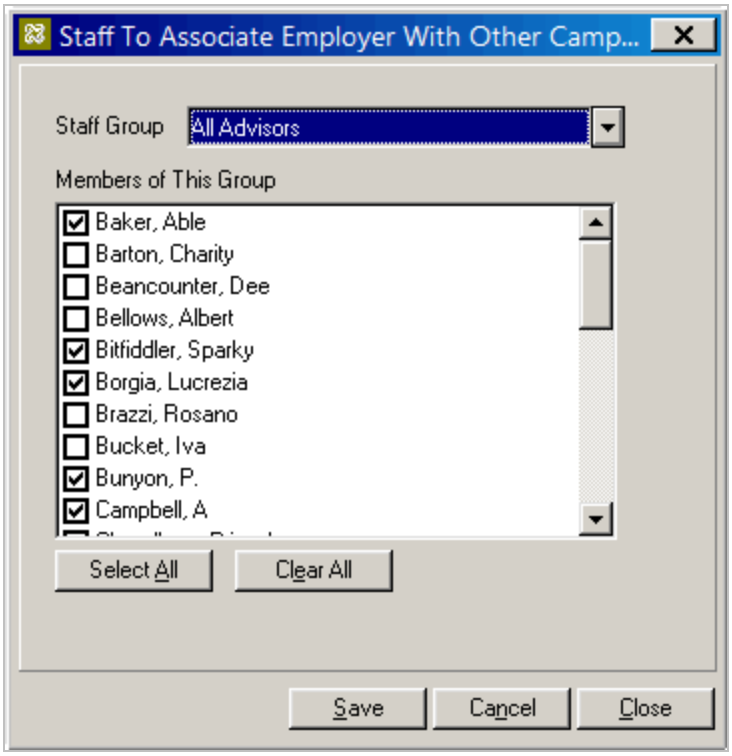
   Note: Deleting a student group from this list does not delete it as a viable student group.
8. Click **Close** to close the form.

Staff to Associate Employer with Other Campuses

Use this form to associate employers with campuses outside the staff member's normally accessible campus group. See also Employers.

To allow a staff member this security right:

1. Navigate to **Setup** > **Career Services**. The Career Services - Settings form is displayed. Select the **Settings** tab.
2. Click the **Select Staff** button. The Staff To Associate Employer With Other Campuses form is displayed.



3. Select the staff member's **Staff Group** from the drop-down list.
4. To allow the majority of the members within the Staff Group, click **Select All** and then clear the check boxes for those staff members that *will not* have permissions.
5. If only a few members will have permission, click the **Clear All** and then select the staff members that you want to have permissions.
6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup > Housing

When you navigate to Setup > Housing, the Housing - Setup form is displayed. Use this form to set up validation rules for room occupancy and student eligibility and hold codes related to housing. The form contains the following tabs:

- General
- Hold Codes

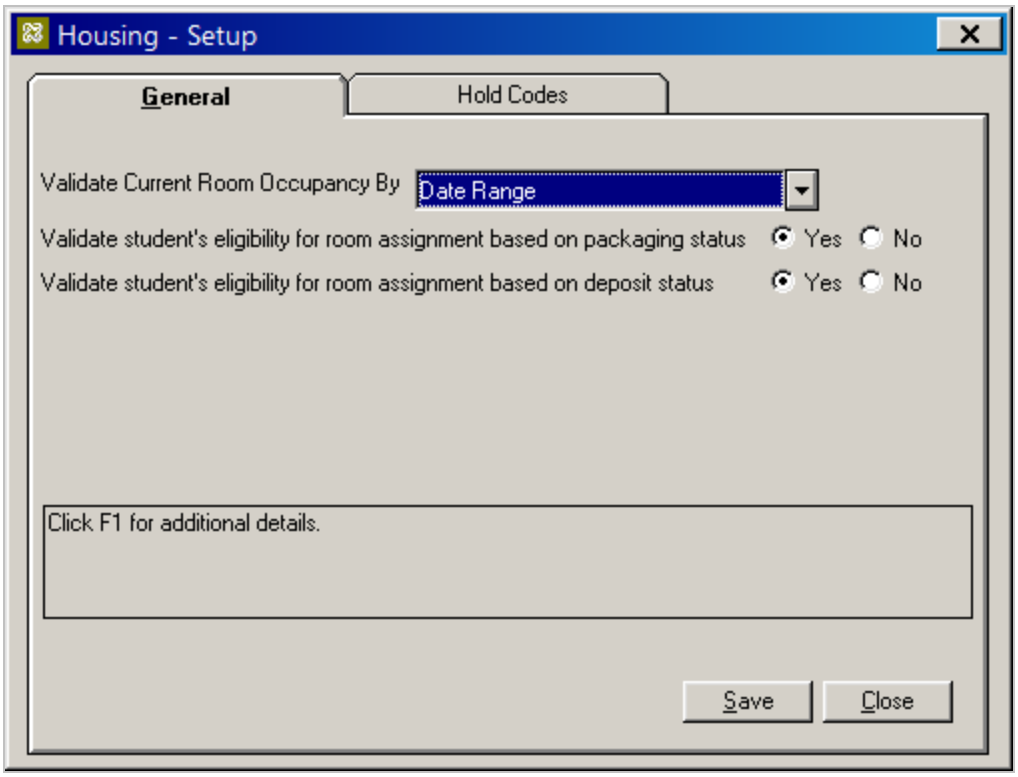
Additional settings related to student housing are configured under Lists > Housing.

Housing Setup - General Tab

Use the General tab of the Housing - Setup form to configure the functionality that validates current room capacity when placing a student in a room or updating the housing period. This configuration affects Roommate Matching, Switch Room, Change Graduation Dates, Update Housing Period, and Renew Lease.

To configure settings on the General tab:

1. Navigate to **Setup** > **Housing**. The Housing - Setup form is displayed. Select the **General** tab.



2. In the **Validate Current Room Occupancy By** field select one of the following options:
   - End Date (default) – This option validates the number of students in a room based on the End Date specified in the Roommate Matching Wizard.
   - Date Range – This option validates the number of students in a room based on the whole lease period specified in the Roommate Matching Wizard.
3. Select Yes (default) or No for the **Validate student's eligibility for room assignment based on packaging status** option. This is a system level override of the student validation for Packaging Status in the Roommate Matching Wizard.
4. Select Yes (default) or No for the **Validate student's eligibility for room assignment based on deposit status** option. This is a system level override of the student validation for Deposit in the Roommate Matching Wizard.
5. Click **Save**.
6. Click **Close** to close the form.

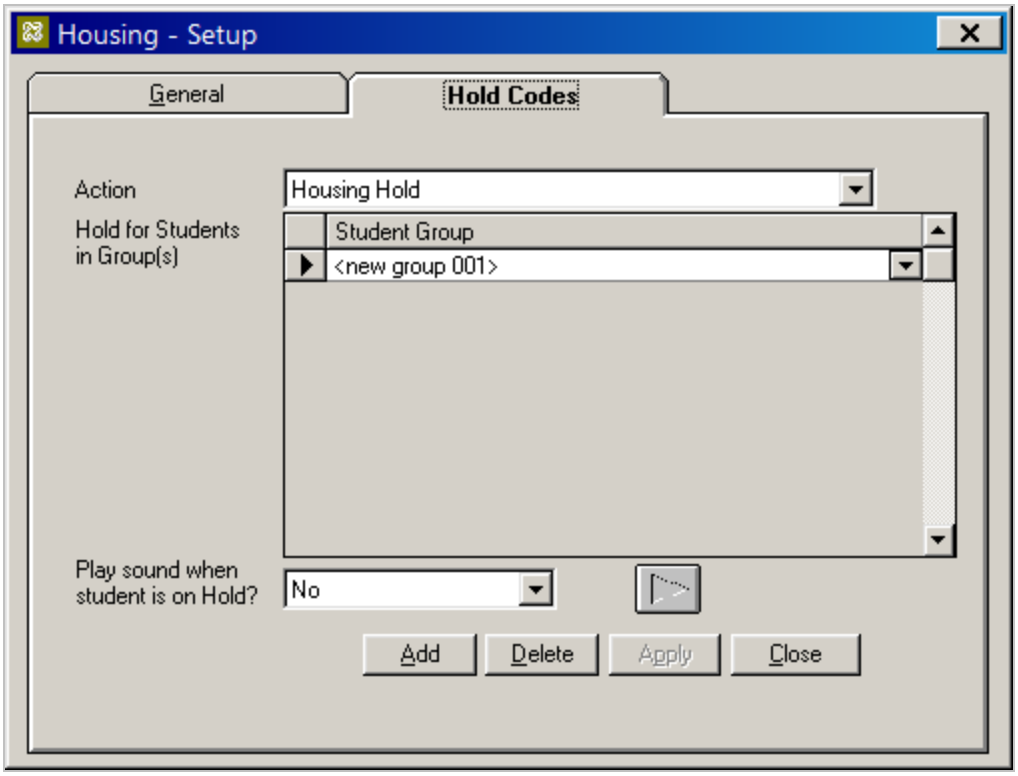
Housing Setup - Hold Codes Tab

Student groups that are put on hold will not be matched with roommates or placed into rooms. However, you can still manually place individual students (who are part of a group that you place on housing hold) into rooms using the Roommate Matching Wizard (Daily > Housing > Roommate Matching).

Note: Create the student groups to which hold actions will be related before proceeding with the hold code setup.

To associate a hold action with a student group:

1. Navigate to **Setup** > **Housing**. The Housing - Setup form is displayed. Select the **Hold Codes** tab.



2. Select an **Action**. The only option is 'Housing Hold'.
3. To add a group, click **Add**. A blank line appears in the Student Group area.
4. Click in the blank line and click to select a student group.

   To associate several student groups with the hold action, repeat the preceding steps as needed.
5. If you want a sound to be played when the student master for a student on hold is displayed, select a sound (.wav) file from the **Play sound when student is on Hold?** list.

   Click the **Play** button to hear the selected wave file. Sound files must be stored in the CampusNexus Student shared folder in the sounds subfolder. Sample ".wav" files are included. You can customize your "hold" sounds by placing additional ".wav" files into the CampusNexus Student share/sounds folder. (The sound feature may not be available on schools using Citrix or terminal servers.)

When working with student records, the hold sounds are audible only when the student's master record is opened.

6. Click **Apply** to save your hold code selections.
7. Click **Delete** to remove a group from the list of hold groups.

   Note: Deleting a student group from this list does not delete it as a viable student group.
8. Click **Close** to close the form.

Setup > CampusVue Finance

When CampusNexus Student is integrated with CampusVue Finance, HR & Payroll, system administrators can configure journal entry groups and ledger copies using the Setup > CampusVue Finance menu options:

- Journal Entry Group
- Ledger Copy/Validate

If CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll, refer to Initial Configuration of CampusNexus Finance, HR & Payroll.

Journal Entry Group

Journal Entry Groups are used to configure how transactions from various CampusNexus Student functional areas are grouped together into journal entries in CampusVue Finance, HR & Payroll.

You can set up Journal Entry Groups and associate them with campus groups and CampusVue Finance, HR & Payroll ledgers from CampusNexus Student. You can also set up and copy fiscal years through the Journal Entry Groups in CampusNexus Student and then verify that the ledgers inCampusVue Finance, HR & Payroll reflect the fiscal years through G/L account look-up in CampusNexus Student.

CampusVue Finance, HR & Payroll provides functionality to copy the Chart of Accounts (COA) and a ledger from one fiscal year to the next. All general ledger account references CampusNexus Student look up information that is set up in CampusVue Finance, HR & Payroll in a real-time manner. This applies to Subsidiaries GL Setup, Fund Sources - G/L Accounts and Refunds, and Student Accounts GL Link.

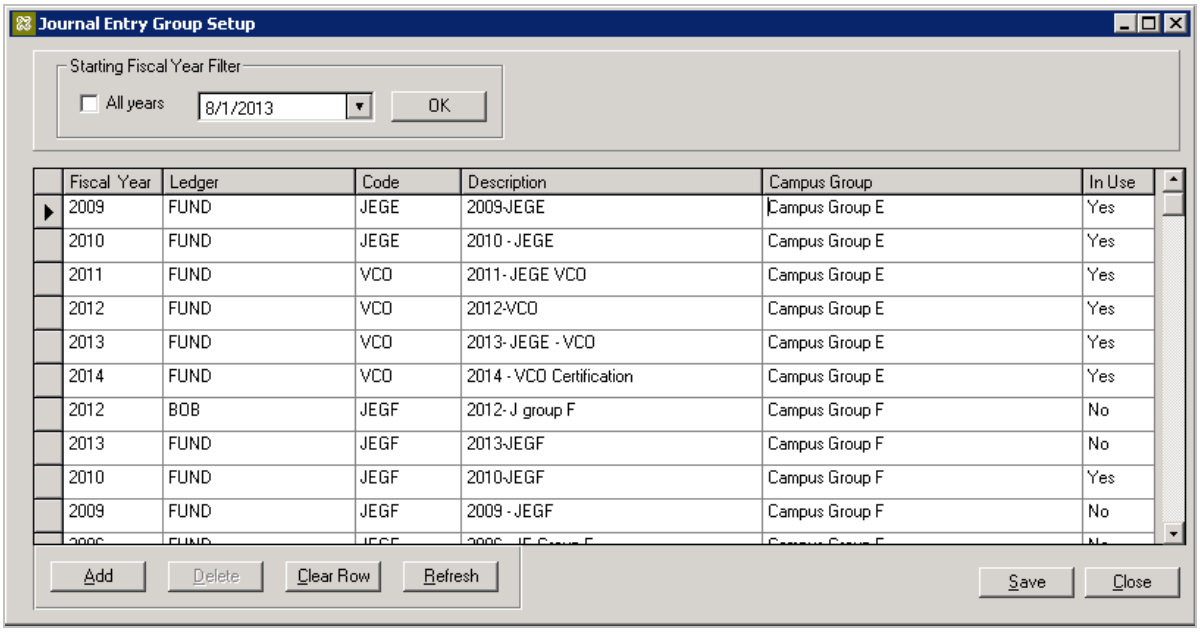
In addition, any other GL Account look-up uses today's date to determine the fiscal year and ledger needed for the appropriate campus. This allows users to manage fiscal years in CampusNexus Student and then verify that the ledgers have been copied in CampusVue Finance, HR & Payroll by accessing GL Account look-up forms in CampusNexus Student's setup forms.

You can copy GL accounts in CampusVue Finance, HR & Payroll to prepare the next fiscal year when the end of a fiscal year is approaching. Once this is done, go to the Journal Entry Group Setup form in CampusNexus Student and add a new Journal Entry Group record. The Fiscal Year drop-down list displays the available fiscal year/ledger combinations which allows users to verify that the Ledgers have been copied in CampusVue Finance, HR & Payroll and are available for GL Account lookups in the CampusNexus Student setup form, such as Student Accounts GL Link. However, having a Fiscal Year of 2007 does not keep transactions from being entered and affecting the 2006 Fiscal year based on the transaction dates.

Note: Adding as many Journal Entry Groups as necessary is permitted, provided that a list of all the campuses assigned to each of the campus groups only appears once per fiscal year.

To set up Journal Entry Groups:

1. Navigate to **Setup > CampusVue Finance > CampusNexus Student Journal Entry Group**. The Journal Entry Group Setup form is displayed. Use this form to set up Journal Entry Groups and associate them with Campus Groups and CampusVue Finance, HR & Payroll Ledgers. See also G/L Link.



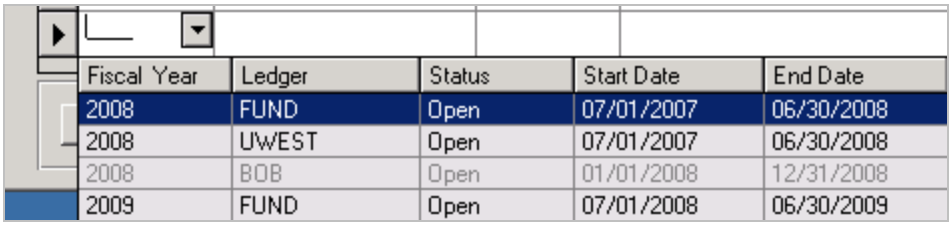
Note: You can add as many Journal Entry Groups as necessary provided that a list of all the campuses assigned to each of the Campus Groups only appears once.

2. Select the **All years** check box to search for all fiscal year listings, or choose a fiscal year from the **Fiscal Years** list and click **OK** .
3. Click **Add** to add a new Journal Entry Group; **Delete** to remove a Journal Entry Group, or **Clear Row** to remove the information for a Journal Entry Group so that you can replace the existing information with updated information.
4. Click **Refresh** to receive the search results again.
5. Click **Save**.

To add Journal Entry Groups:

1. Click **Add**. A new row is added to the bottom of your list.
2. Enter or select a **Fiscal Year**.

   Note: When you select the drop-down in the **Fiscal Year** row, a list of current fiscal years with associated **Start Date** and **End Date** is displayed.



Fiscal Year	Ledger	Status	Start Date	End Date
2008	FUND	Open	07/01/2007	06/30/2008
2008	UWEST	Open	07/01/2007	06/30/2008
2008	BOB	Open	01/01/2008	12/31/2008
2009	FUND	Open	07/01/2008	06/30/2009

3. Assign a CampusVue Finance, HR & Payroll **Ledger** to the Journal Entry Group based on a distinct list from CampusVue Finance, HR & Payroll's Ledger Definition table. The distinct list is needed to exclude duplicates for different Fiscal Years.
4. Enter a **Code** and **Description** for the Journal Entry Group.
5. Select a **Campus Group** from the drop-down list to associate with the Journal Entry Group.

   Note: Campus Groups with the same campuses may not be linked to different Journal Entry Groups with the same fiscal year. For example, if a Journal Entry Group is configured (JEGA) for fiscal year 2007 containing the Campus Group A which contains the Ft. Lauderdale Campus, and the user tries to add Campus D to JEGD for fiscal year 2007 which also contains the Ft. Lauderdale Campus, the following message is displayed: "*This Campus Group contains one or more campuses already included in an assigned Journal Entry Group for the same Fiscal Year. Please make a different selection.*"

To delete Journal Entry Groups:

Select the row to delete and click **Delete**. The row will appear in red once you go to another row. If you click on the row again, a message will ask if you want to edit the record and remove the delete flag. Otherwise, once you click **Save**, the record is deleted.

Note: Any row flagged as **In Use** cannot be deleted because transactions have been released toCampusVue Finance, HR & Payroll. When In Use = Yes, the only field that can be edited is the Journal Entry Group Description field because the Description field does not get passed to CampusVue Finance, HR & Payroll.

To clear Journal Entry Groups:

Select the row to clear and click **Clear Row**. Use this feature when a row has been added but not yet saved, and your want to clear out all fields in the row and start over.

Ledger Copy/Validate

CampusVue Finance, HR & Payroll clients can copy their ledger account/cost account setups in CampusNexus Student from one fiscal year to the next if the ledger accounts/cost accounts do not change dramatically. This allows the set up of ledger accounts/cost accounts in CampusNexus Student for the next fiscal year to be much easier than re-configuring the GL accounts/cost accounts for the next fiscal year manually.

A validation report is available to identify invalid ledger accounts/cost accounts before transactions are released to CampusVue Finance, HR & Payroll. The errors can be corrected and the report can then be run again.

Note: CampusNexus Student versions 14.0 and later enable users to copy and validate stipends in the same way they could validate other credit and debit account numbers in Fund Sources GL Account Setup.

The following GL account setups need to be copied from one fiscal year to another:

- General Ledger Link Setup
- Fund Sources GL Account Setup
- Subsidiary GL Account Setup

Ledgers in CampusVue Finance, HR & Payroll need to be copied in CampusVue Finance, HR & Payroll, as well as the Journal Entry Group Setup for the destination fiscal year in CampusNexus Student, prior to coming to the report form because the validation report requires that the ledger exist in CampusVue Finance, HR & Payroll. If these requirements are not met, the new fiscal year will not appear in the fiscal year drop-down list, meaning it cannot be copied.

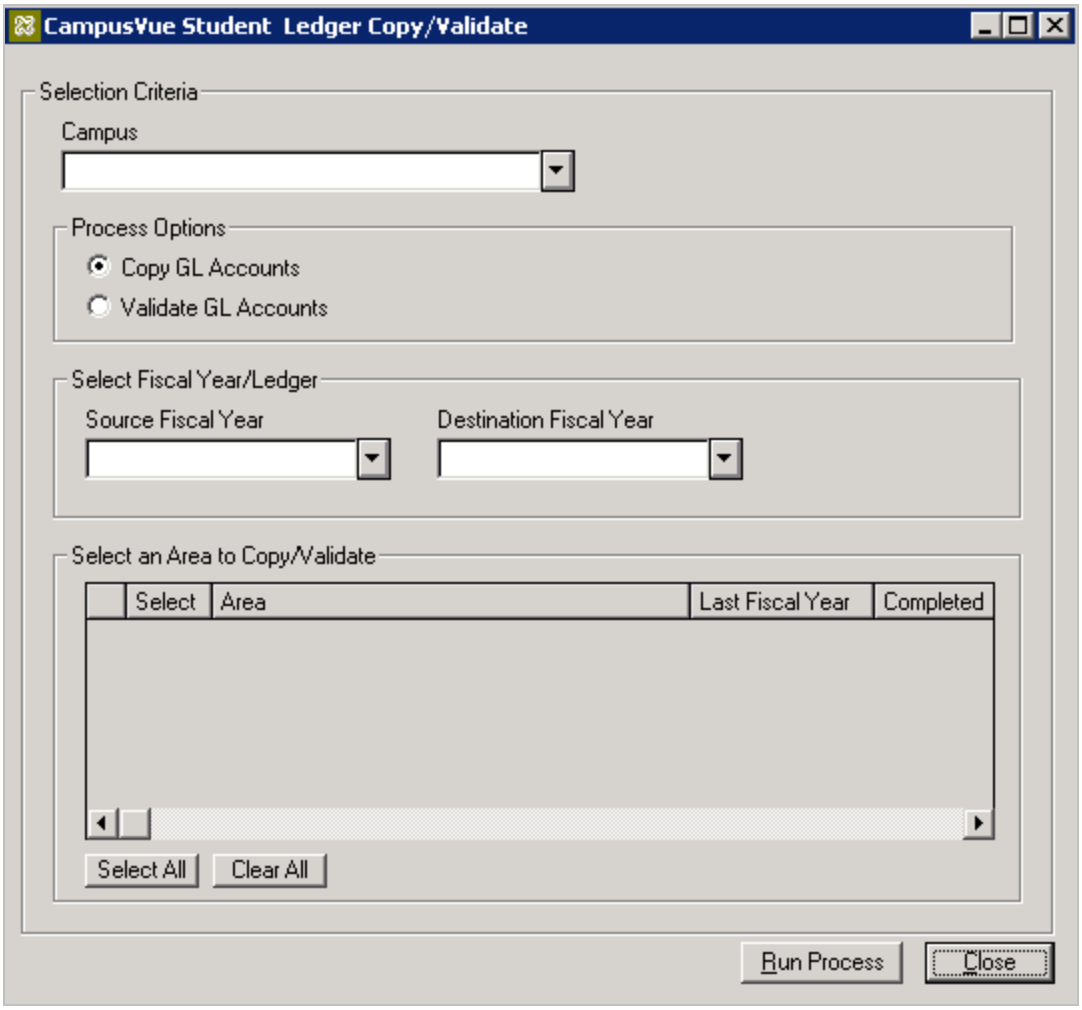
Note: This feature is only available to users with CampusVue Finance, HR & Payroll Integration who have security rights for the Student Accounts GL Link, Fund Sources, and Subsidiaries functionality.

To copy GL Account setups configured in one fiscal year to another for a specific campus:

1. Navigate to **Setup > CampusVue Finance > CampusNexus Student Ledger Copy/Validate**. The CampusNexus Student Ledger Copy/Validate form is displayed.

   Note: The following prerequisites must be met before proceeding further:

   - CampusVue Finance, HR & Payroll Windows Registry flag must be turned on.
   - Ledgers need to be configured in CampusVue Finance, HR & Payroll for the destination fiscal year.
   - Campus being copied must be associated with a journal entry group.



2. Select a **Campus**t. Only the campuses that you have access to are displayed.
3. Select **Copy GL Accounts**.
4. Select the **Source Fiscal Year**. The source year is limited to fiscal years currently set up in CampusNexus Student.
5. Select the **Destination Fiscal Year**. The destination year is limited to fiscal years that exist in CampusVue Finance, HR & Payroll and do not exist in CampusNexus Student for the areas being copied. This is to prevent the setup from being copied more than once for a particular fiscal year.
6. In the Select an Area to Copy/Validate section, select one area, all three areas, or any combination of areas to copy. You can only select multiple areas if the Last Fiscal Year matches. This is because the source fiscal year will be the same for all selected areas; the same is true for the destination fiscal year.

   You can select each area or click **Select All** to choose all three areas; likewise, you can clear each area or click **Clear All** to clear all three areas.
7. Click **Run Process**. The copy process copies all records in the relevant tables linked to the source fiscal year to the destination fiscal year. This occurs even if GL accounts are incorrect.

When the copy process is finished, a check mark will appear in the Completed column for the areas chosen (i.e., General Ledger Link Setup, Fund Sources GL Account Setup, and Subsidiary GL Account Setup).

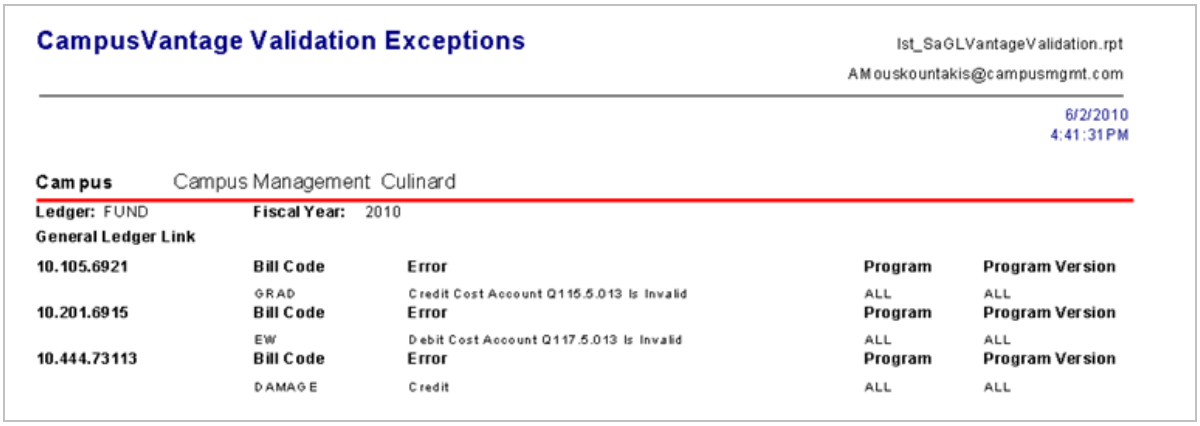
Records will be copied in Fund Sources and all GL accounts in the Source Fiscal Year chosen will be visible for the Destination Fiscal Year chosen for the same campus.

Validation Report

Once the copy process is complete and all records are committed, the CampusVantage Validation Exceptions report is displayed, displaying any errors that need to be corrected.

Each area (i.e., General Ledger Link Setup, Fund Sources GL Account Setup, and Subsidiary GL Account Setup) has its own section on the report because different information. If you choose to validate one area, the report displays errors pertaining to only that one area; if you choose all three areas for validation, a single report is displayed containing three sections, one for each area.

The errors in each area provide enough detail to allow you to navigate to the appropriate item and make the necessary corrections.



CampusVantage Validation Exceptions

Campus Campus Management Culinard

Ledger: FUND **Fiscal Year:** 2010

General Ledger Link

10.105.6921	**Bill Code**	**Error**	**Program**	**Program Version**
	GRAD	Credit Cost Account Q115.5.013 Is Invalid	ALL	ALL
10.201.6915	**Bill Code**	**Error**	**Program**	**Program Version**
	EW	Debit Cost Account Q117.5.013 Is Invalid	ALL	ALL
10.444.73113	**Bill Code**	**Error**	**Program**	**Program Version**
	DAMAGE	Credit	ALL	ALL

To correct errors in the General Ledger Link Setup:

1. Navigate to **Setup > Student Accounts**.
2. On the Additional tab, click **G/L Link**.
3. Select the appropriate campus and the appropriate fiscal year.

The following items are displayed: Fiscal Year, Campus Description, Transaction Code, Program, Program Version, and Reason.

To correct errors in the Fund Sources GL Account Setup:

1. Navigate to **Lists > Financial Aid > Fund Sources**.
2. Select the appropriate **Fund Source**.
3. Click **G/L Accounts/Refunds**.

The following items are displayed: Fiscal Year, Campus Description, Fund Source Code, Disbursements, Refunds, or Stipends, and Reason.

To correct errors in the Subsidiary GL Account Setup:

1. Navigate to **Lists > Student Accounts > Subsidiaries**.
2. Select the appropriate **Subsidiary**.

3. Click **G/L Setup**.

The following items are displayed: Fiscal Year, Campus Description, Subsidiary Code, GL Accounts or Refund GL Accounts, and Reason.

To run the validation report:

After you correct the errors, you can re-run the validation report to verify that the previously listed errors have been corrected.

1. Navigate to **Setup > CampusVue Finance > CampusNexus Student Ledger Copy/Validate**. The CampusNexus Student Ledger Copy/Validate form is displayed.
2. Select the **Areas** to validate (i.e., General Ledger Link Setup, Fund Sources GL Account Setup, and Subsidiary GL Account Setup).
3. Select a **Source Fiscal Year**, select **Validate GL Accounts**, and click **Run Process**. The validation report is displayed. Corrected items will no longer appear on the report.
4. Repeat Steps 2 -3 as needed.

Initial Configuration of CampusNexus Finance, HR & Payroll

To configure CampusNexus Student for integration with CampusNexus Finance, HR & Payroll:

1. Select Dynamics AX as the accounting system.

   Navigate to **Setup > Student Accounts > General tab**.

   a. In the GL/AP Package field, select CampusNexus Finance.

2. Select Main Accounts and dimension values so that transactions are appropriately recorded in the accounting system.

   Navigate to:

   a. **Setup > Students Accounts > Additional (tab) > GL Link (button)**.

      i. For each Campus, select the Default A/R Account.

      ii. Use Select GL Account to select Credit and Debit accounts for each Program/Program Version (Code).

   b. **Lists > Financial Aid > Fund Source (tab) > GL Accounts/Refunds/Stipends** and specify appropriate G/L accounts.

   c. **Lists > Student Accounts > Subsidiaries (tab)** and specify appropriate G/L accounts.

   d. **Lists > Student Accounts > Bank Codes (tab)** and specify appropriate bank codes and accounts.

   e. **Daily > Student Accounts > Miscellaneous Receipts** and use Power Search to select appropriate GL Debit and GL Credit accounts.

3. Create Financial Campus Groups in CampusNexus Student.

   Navigate to **Setup > Campus Locations > Campus Groups** and select the campuses that belong to a Financial Campus Group.

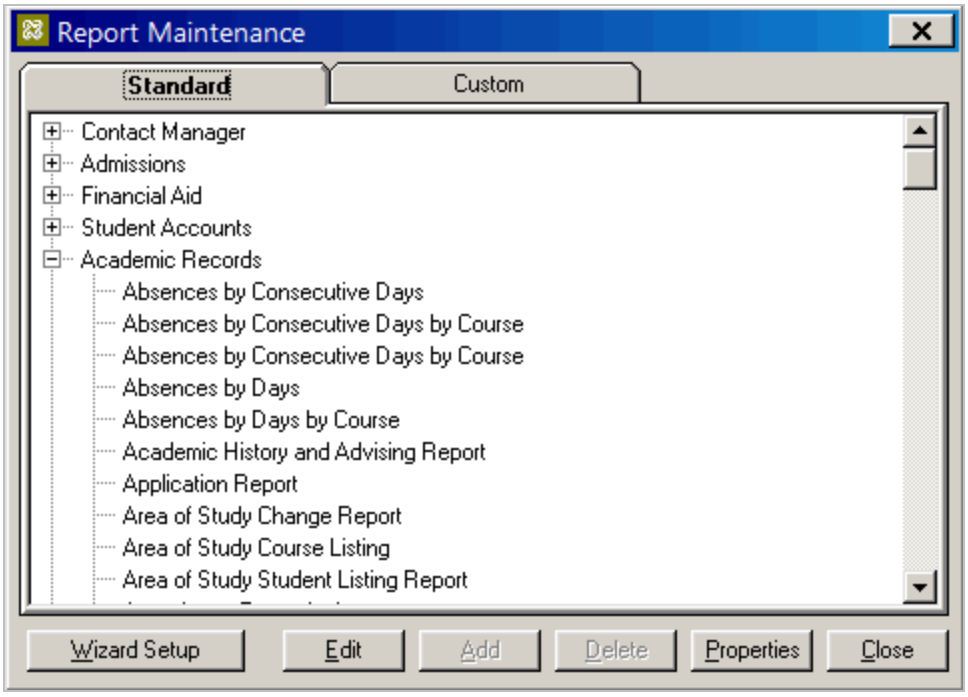
Setup > Report Maintenance

Crystal Reports software enables you to maintain and customize CampusNexus Student reports. You can change the layout of a standard report to add, move, or remove data from the reports. Your customized reports can be added to the Reports menu. When you modify a standard report, you make a copy of it and save it as custom report. The standard report is not modified.

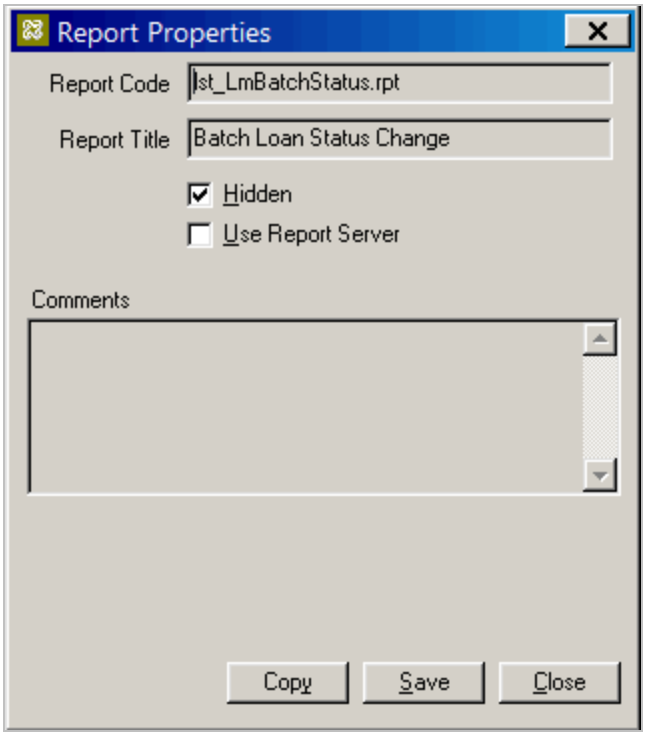
Note: The System Administrator must set up security rights to view, print, or export reports. Staff members and staff groups must be given security rights to view, print, and/or export reports. This does not apply to custom reports.

To prepare a report for customization:

1. Navigate to **Setup** > **Report Maintenance**. The Report Maintenance form is displayed. Select the **Standard** tab.
2. Click ⊞ to expand the appropriate report module.

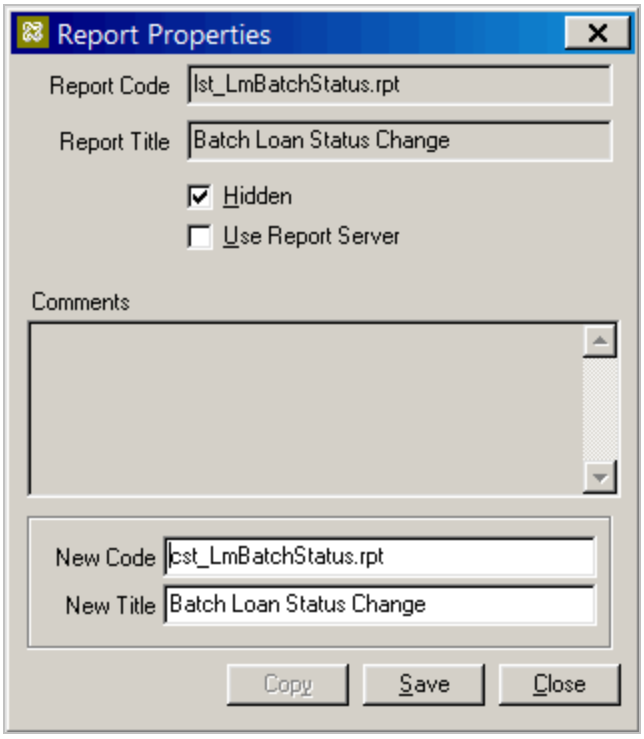


3. Double-click a report. The Report Properties form is displayed.



4. To remove the report from the Reports menu, select **Hidden**.
5. To automatically send the selected report to your alternative server, select **Use Report Server**.

   Note: The Report Server must be set up under Setup > Campus Locations > Campus Information > Options.
6. Click **Copy**. The New Code and New Title fields appear at the bottom of the form. The New Code prefix `cst_` marks the report as a custom report.

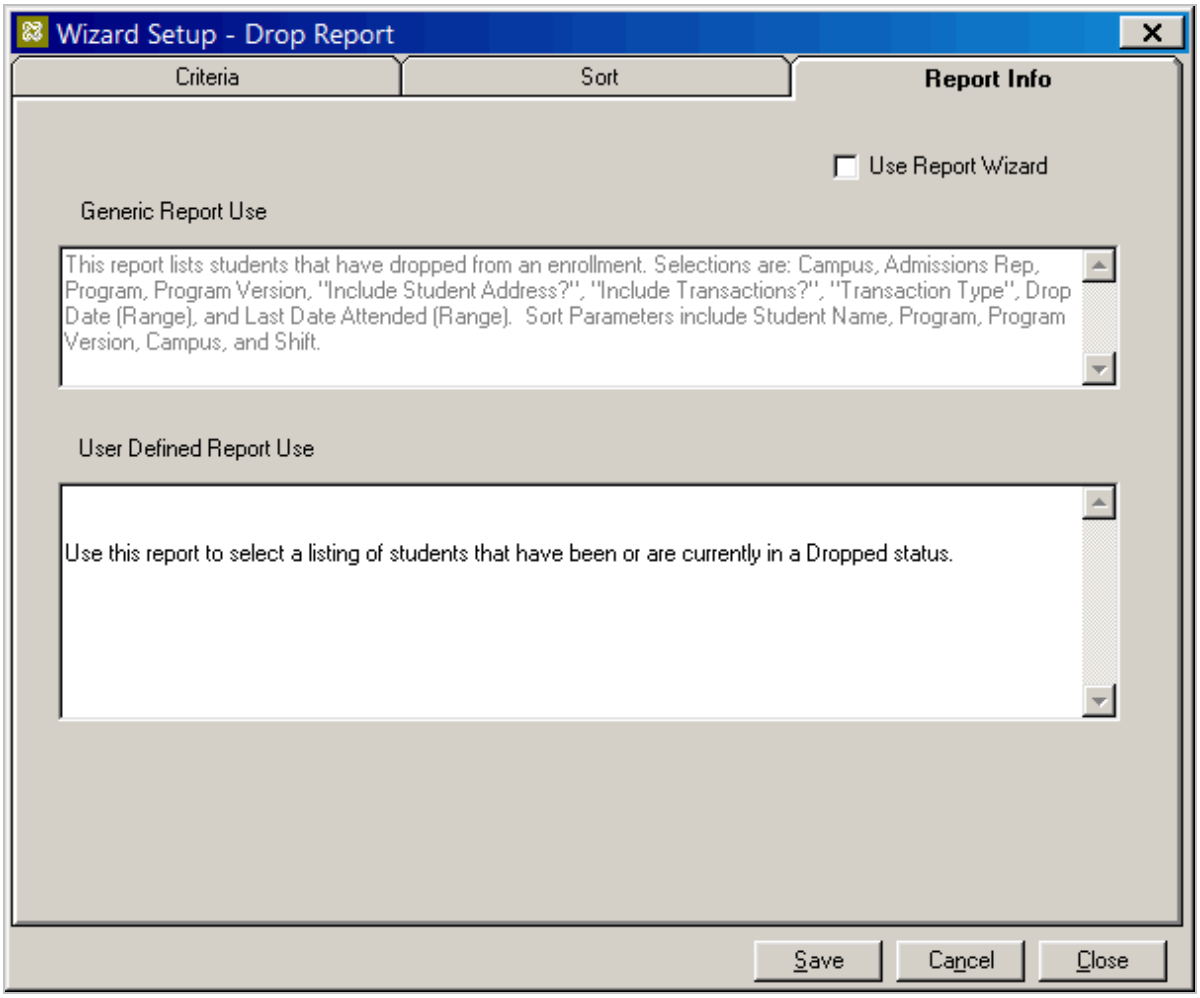


7. Modify the **New Code** and **New Title** as needed.
8. Click **Save**.

   The report is saved under the menu option Reports > Custom. You can modify the custom report with Crystal Reports software.

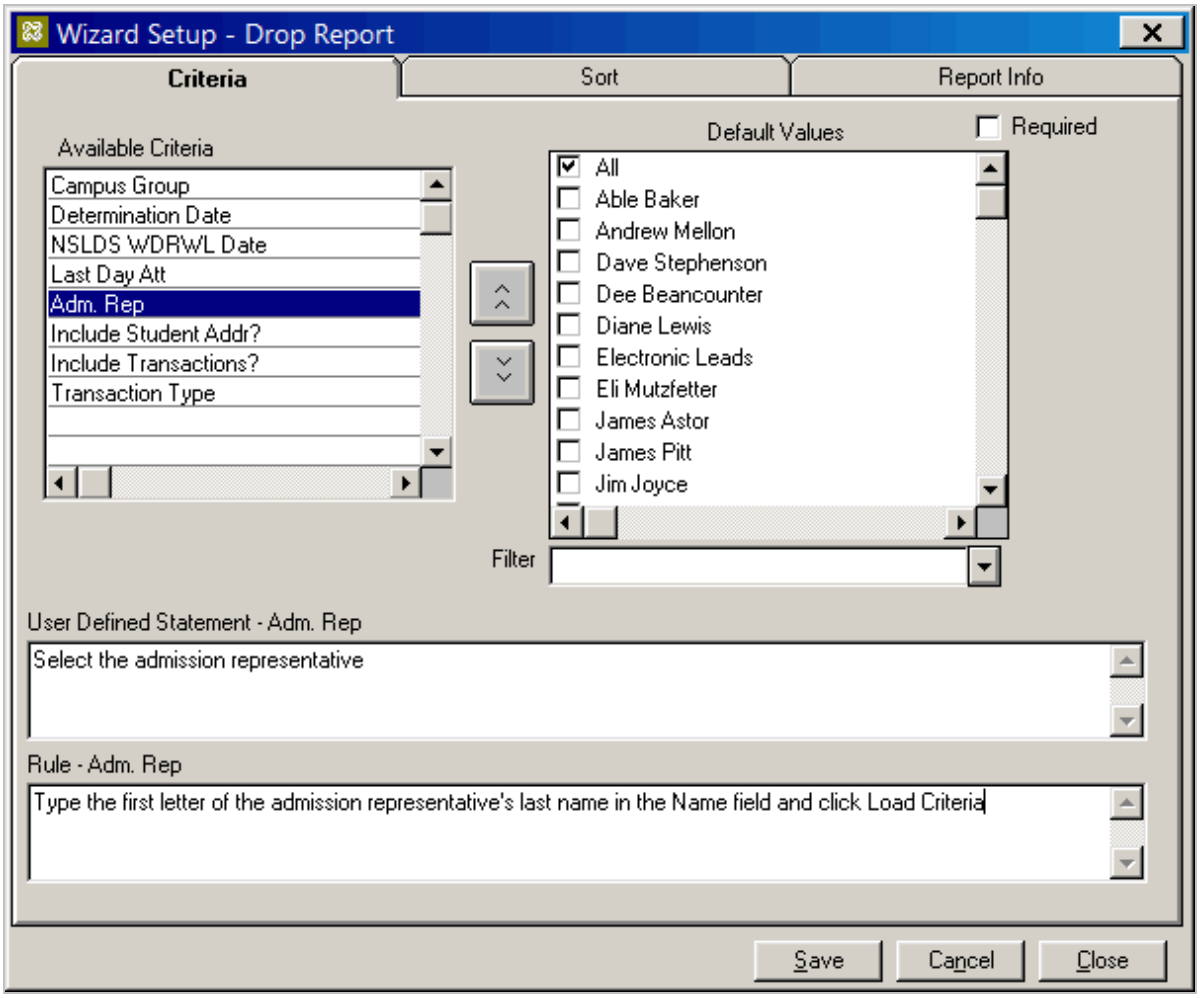
To add a custom report to the Report Wizard:

1. Navigate to **Setup** > **Report Maintenance**. The Report Maintenance form is displayed.
2. Click ⊞ to expand the appropriate report module.
3. Highlight a report and click **Wizard Setup**. The Wizard Setup form for the selected report is displayed.

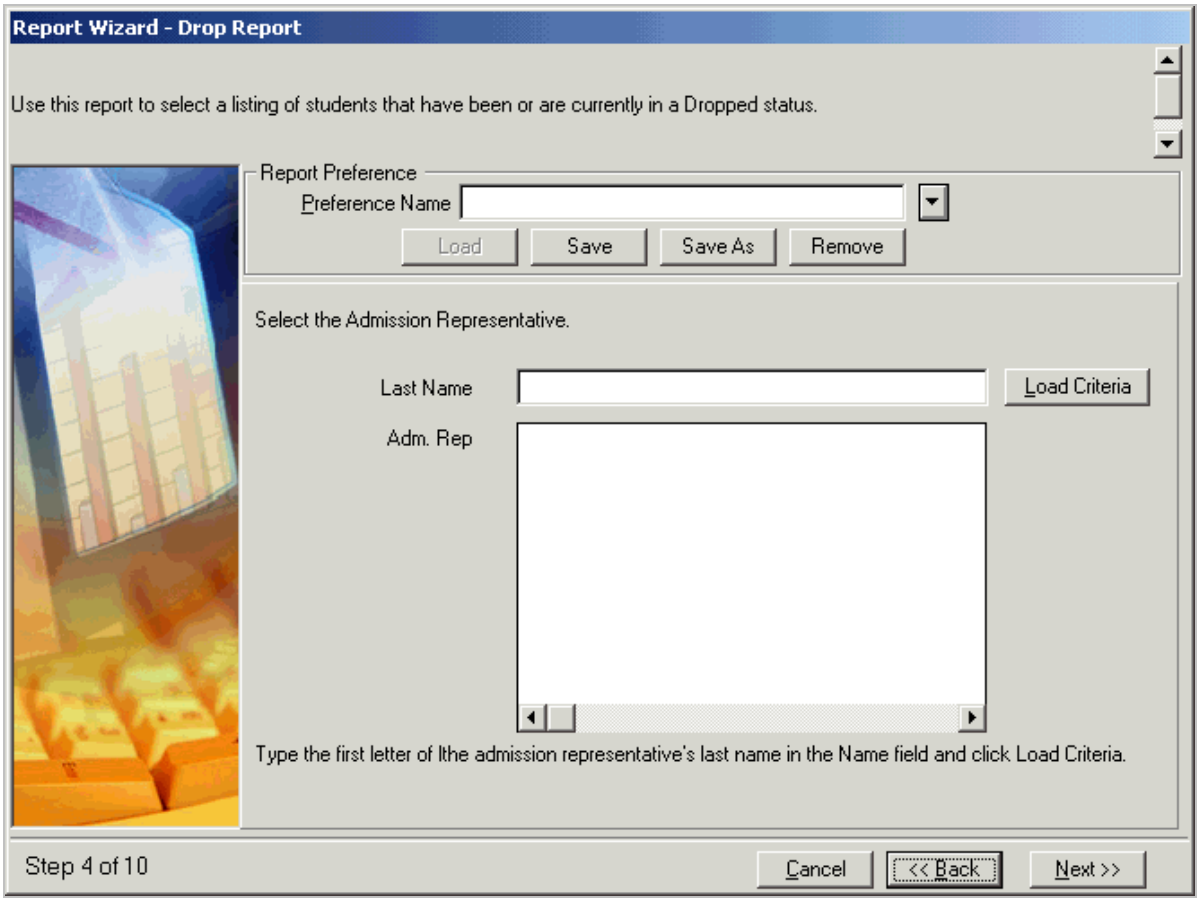


4. On the Report Info tab, select the **Use Report Wizard** check box.
5. In the **User Defined Report Use** box, specify the information that you want to be displayed at the top of the Wizard when the report is run.
6. On the Criteria tab, from the Available Criteria list, select the item that you modified in your custom report and specify a **User Defined Statement** for that item. Repeat this step for each modified item.

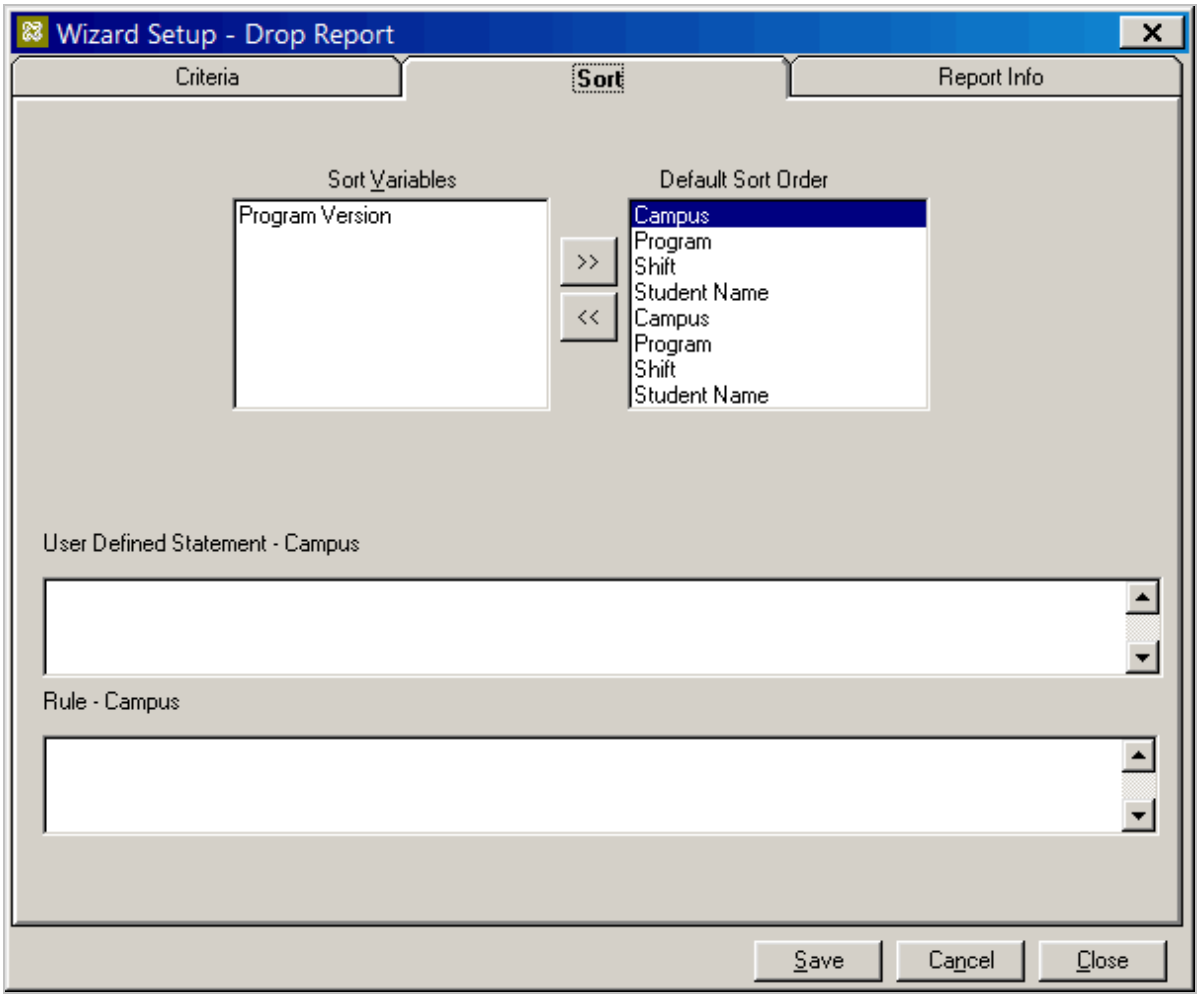
   In our example, we associated a user-defined statement with Adm Rep. Since we have many admission representatives, we added a filter to speed up the search. We chose the last name as our filter and added a rule comment to explain the filter.



When the Report Wizard is run, the last name filter is displayed as shown below.



7. On the Sort tab, select a variable in the **Sort Variable** list and click >> to move the variable to the Default Sort Order list.



8. Click **Save**.
9. A confirmation message is displayed. Click **OK**.

Setup > Web Interface (Legacy)

The CampusNexus Student Web Interface gives your school a means to let students, staff members, and employers access the system via the Internet. After the interface is configured, students, staff members, and employers can access system data. Access to the Web Interface is secured by Student IDs and PIN numbers for students, user codes and passwords for staff members, and Employer Codes and PIN number for employers.

Anthology Inc. has prepared a white paper titled *Web Interface Setup for CampusNexus Student*. We recommend that you read this document before attempting to set up your Web Interface. If you have any questions about the setup procedure, please consult with our support department.

When you navigate to Setup > Web > Web Interface (Legacy), the Web Interface form is displayed. It contains the following tabs:

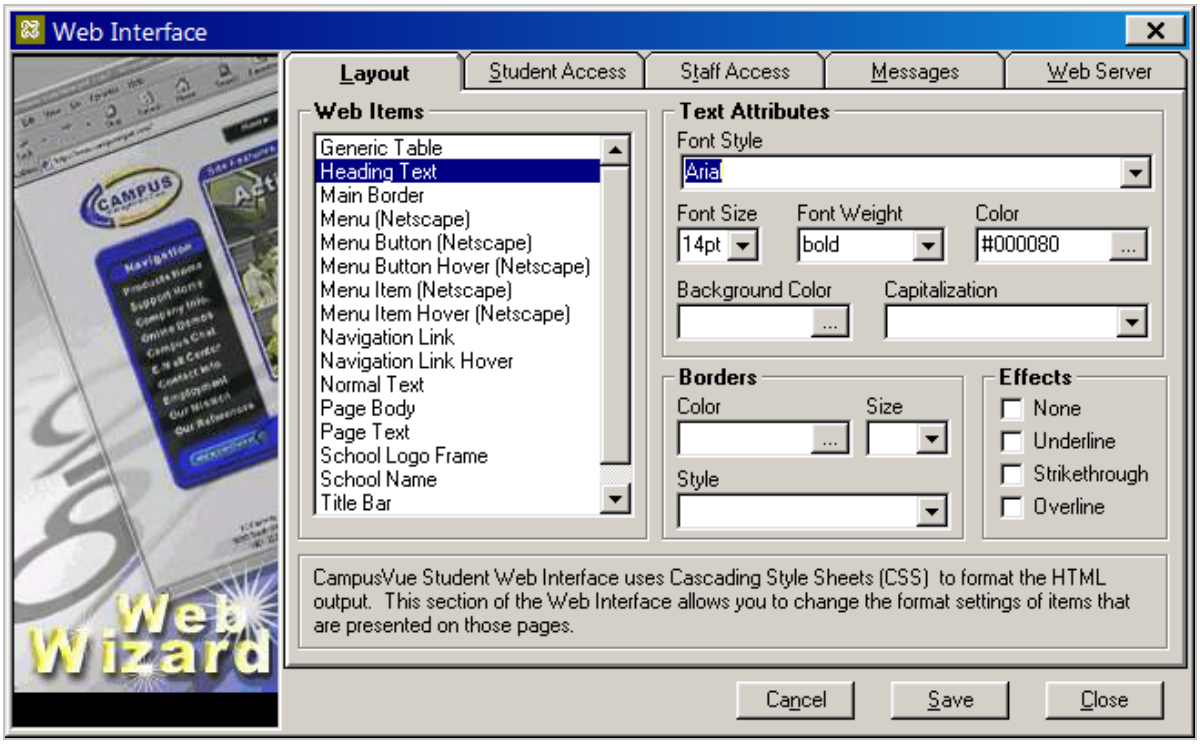
- Layout
- Student Access
- Staff Access
- Messages
- Web Server

Web Interface - Layout Tab

Use the Layout tab of the Web Interface form to select the items used on your website and to define text attributes, borders, and effects for the items. The selected settings are saved in a Cascading Style Sheet (CSS).

To specify the layout of your website:

1. Navigate to **Setup > Web > Web Interface (Legacy)**. The Web Interface form is displayed. Select the **Layout** tab.



2. Select an item in the **Web Item** list box. The attributes that apply to the selected web item are enabled.

Web Item Attributes

Web Item	Attributes
Text Attributes	Font Style
	Font Size
	Font Weight
	Color
	Background Color
	Capitalization

Web Item	Attributes
Borders	Color
	Size
	Style
Effects	None
	Underline
	Strikethrough
	Overline

3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.
4. Select the **Web Server** tab and click **Build Pages** to update your website.
5. Click **Close** to close the form.

Note: The Cancel button applies only to the Layout tab of the Web Interface form. If you edit the form and attempt to close it without saving, CampusNexus Student prompts you to save.

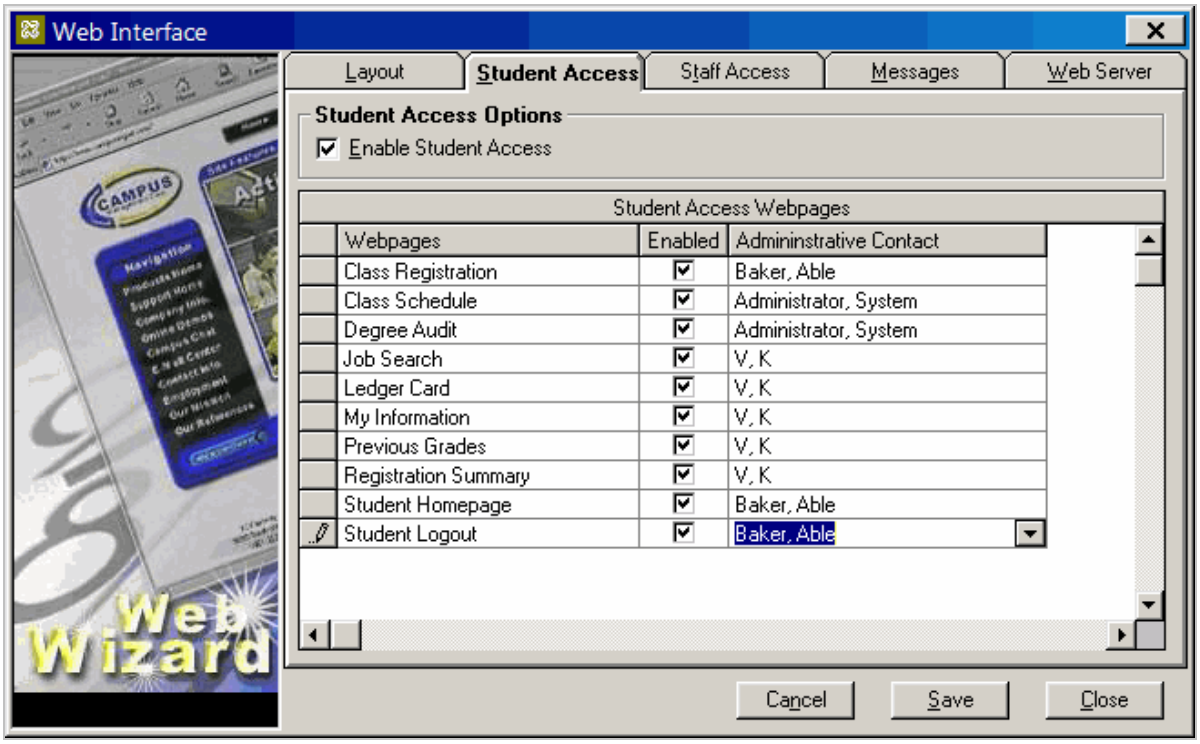
Web Interface - Student Access Tab

Use the Student Access tab of the Web Interface form to specify whether you want to provide students with online access to some their information in CampusNexus Student. If you choose to allow students some access to their information, you can then select which information they can view or change.

If you choose any of the student access options, students must login to your website with a Student ID and a PIN. If a student forgets the Student ID or PIN, a method is available online for the student to supply sufficient identity information to have the credentials e-mailed to the student.

To configure student access for your website:

1. Navigate to **Setup > Web > Web Interface (Legacy)**. The Web Interface form is displayed. Select the **Student Access** tab.



2. Select or clear **Enable Student Access**.
3. Select or clear **Enabled** on each row of the grid.
4. Click in the **Administrative Contact** fields of each row and click to select a contact.
5. Click **Save**.
6. Select the **Web Server** tab and click **Build Pages** to update your website.
7. Click **Close** to close the form.

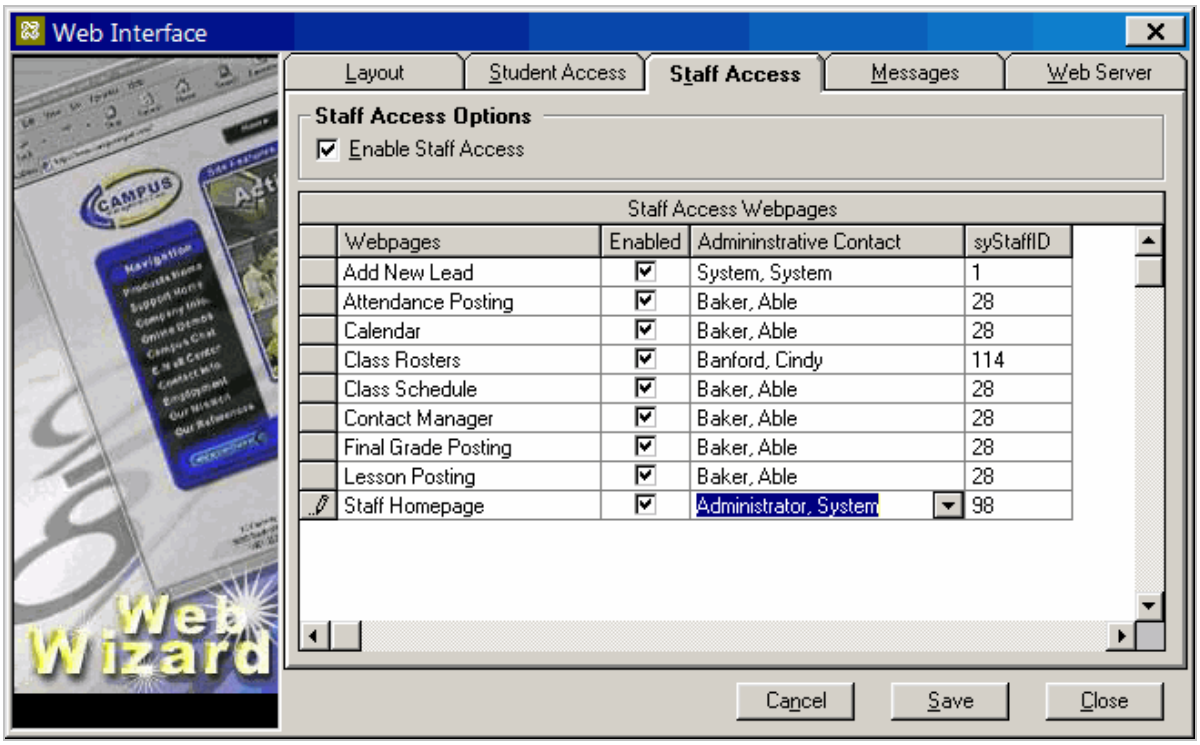
Note: The Cancel button applies only to the Layout tab of the Web Interface form. If you edit the form and attempt to close it without saving, CampusNexus Student prompts you to save.

Web Interface - Staff Access Tab

Use the Staff Access tab of the Web Interface form to specify whether you want to provide staff with online access to information in CampusNexus Student. When staff access is enabled, each staff member can log in to your website by entering the same user ID and password that he or she uses when logging in to CampusNexus Student.

To configure staff access for your website:

1. Navigate to **Setup > Web > Web Interface (Legacy)**. The Web Interface form is displayed. Select the **Staff Access** tab.



2. Select or clear **Enable Staff Access**.
3. Select or clear **Enabled** on each row of the grid.
4. Click in the **Administrative Contact** fields of each row and click to select a contact.
5. Click **Save**.
6. Select the **Web Server** tab and click **Build Pages** to update your website.
7. Click **Close** to close the form.

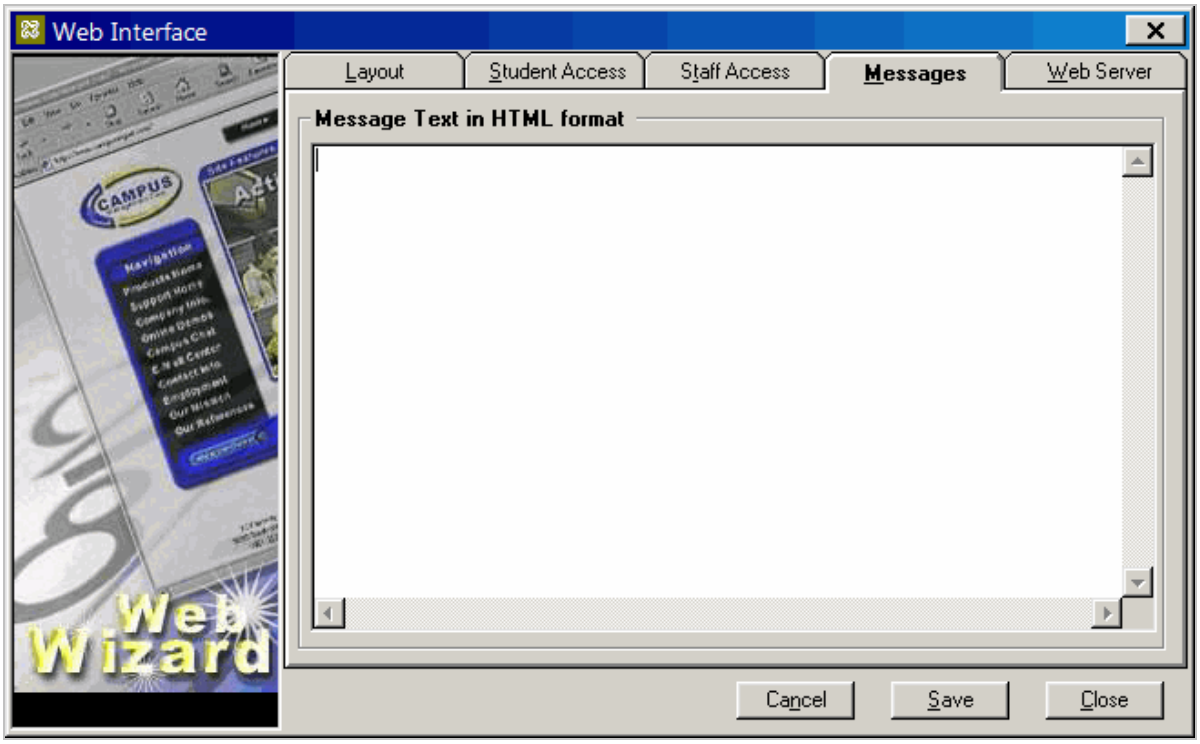
Note: The Cancel button applies only to the Layout tab of the Web Interface form. If you edit the form and attempt to close it without saving, CampusNexus Student prompts you to save.

Web Interface - Messages Tab

Use the Messages tab of the Web Interface form to create general messages for display on the home page of your website.

To create a home page message for your website:

1. Navigate to **Setup > Web > Web Interface (Legacy).** The Web Interface form is displayed. Select the **Messages** tab.



2. Type the text of your message in the text box on the form. Use standard HTML coding to control the appearance of your message when it is viewed by visitors to your website's home page.
3. Click **Save**.
4. Select the **Web Server** tab and click **Build Pages** to update your website.

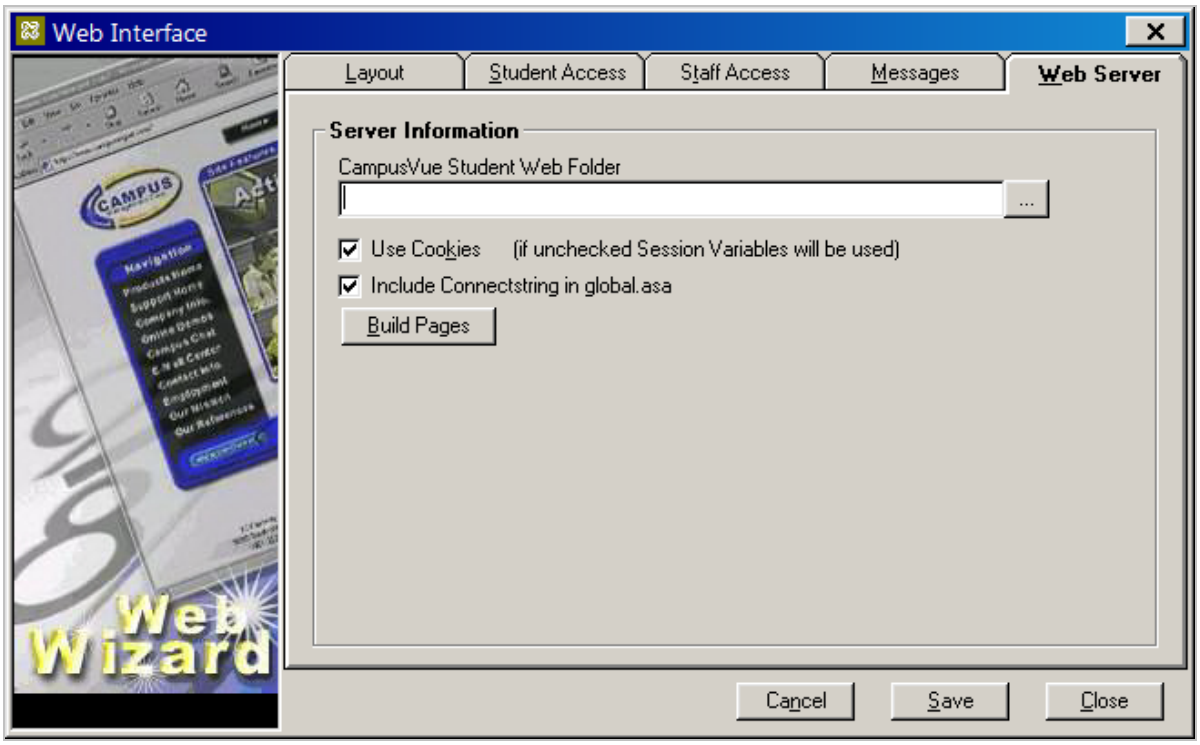
Note: The Cancel button applies only to the Layout tab of the Web Interface form. If you edit the form and attempt to close it without saving, CampusNexus Student prompts you to save.

Web Interface - Web Server Tab

Use the Web Server tab of the Web Interface form to designate the location of your CampusNexus Student Web Folder and to select whether cookies and connect strings are used. This tab also contains the build tool that creates Cascading Style Sheets (CSS) and HTML pages for your website.

To designate the location of your web folder and build your web pages:

1. Navigate to **Setup > Web > Web Interface (Legacy)**. The Web Interface form is displayed. Select the **Web Server** tab.



2. Click ... to navigate to the CampusNexus Student Web Folder.
3. Select or clear **Use Cookies**.

   The CampusNexus Student Web Interface is initially configured to use session states to maintain "state" (keep track of who is doing what). We recommend that you select this option if you have a web server farm.
4. Select or clear **Include Connectstring in global.asa**.

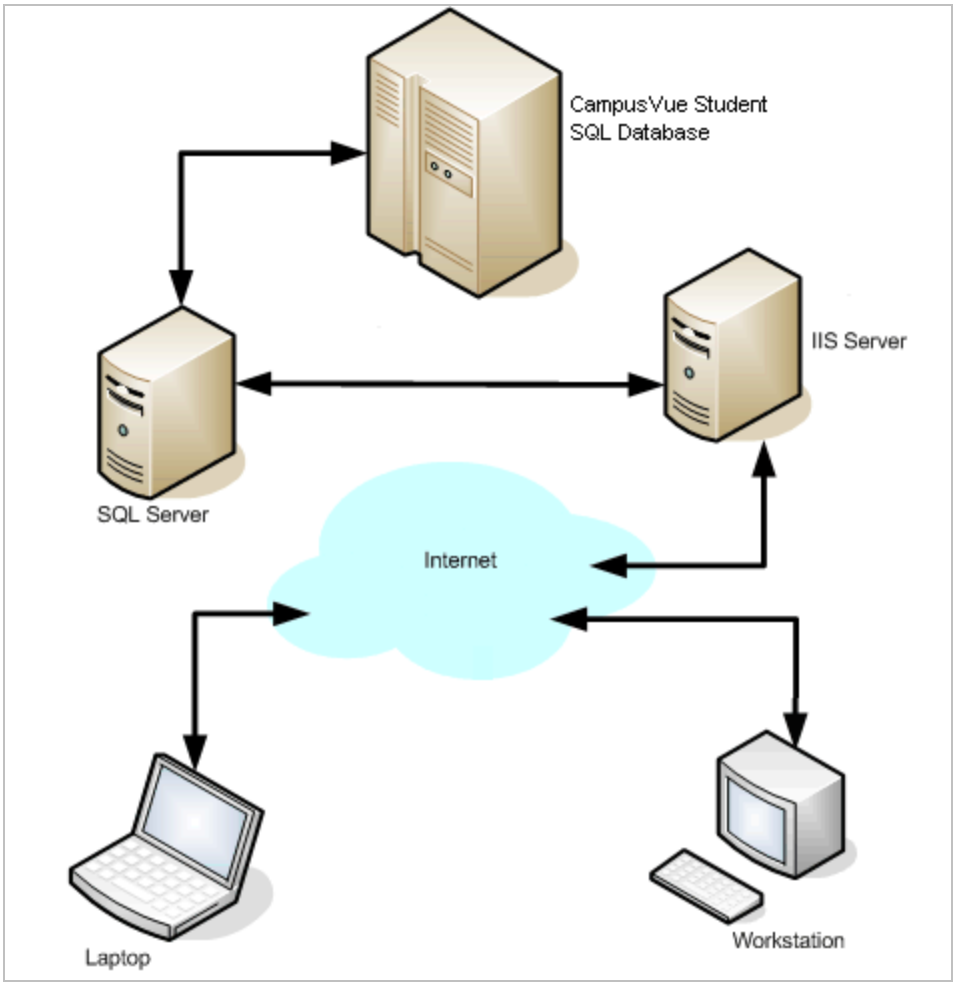
   Among other variables in the global.asa file, the Connectstring contains the location of the CampusNexus Student SQL database. If this option is cleared,CampusNexus Student uses the database key contained in the server registry instead of the connect string. This enhances the security of the web Interface by keeping this database location information hidden from users. This option is selected by default. We recommend that you clear this option.
5. Click **Save**.
6. Click **Build Pages** to convert the design parameters for your website into CSS and HTML files.
7. Click **Close** to close the form.

Note: The Cancel button applies only to the Layout tab of the Web Interface form. If you edit the form and attempt to close it without saving, CampusNexus Student prompts you to save.

Web Interface Concepts

The web interface for CampusNexus Student generates web pages that contain student, staff, and employer information from the CampusNexus Student database. The system administrator sets up your web pages under the Setup > Web Interface (Legacy) menu option in CampusNexus Student.

Students, staff members, and employers connect to your web pages via the Internet using an address that your institution provides. All users require user IDs and passwords or PINs to access to these pages. Some of the CampusNexus Student data is for display only, but under controlled circumstances, some data may be added, changed, and deleted by all three types of users.



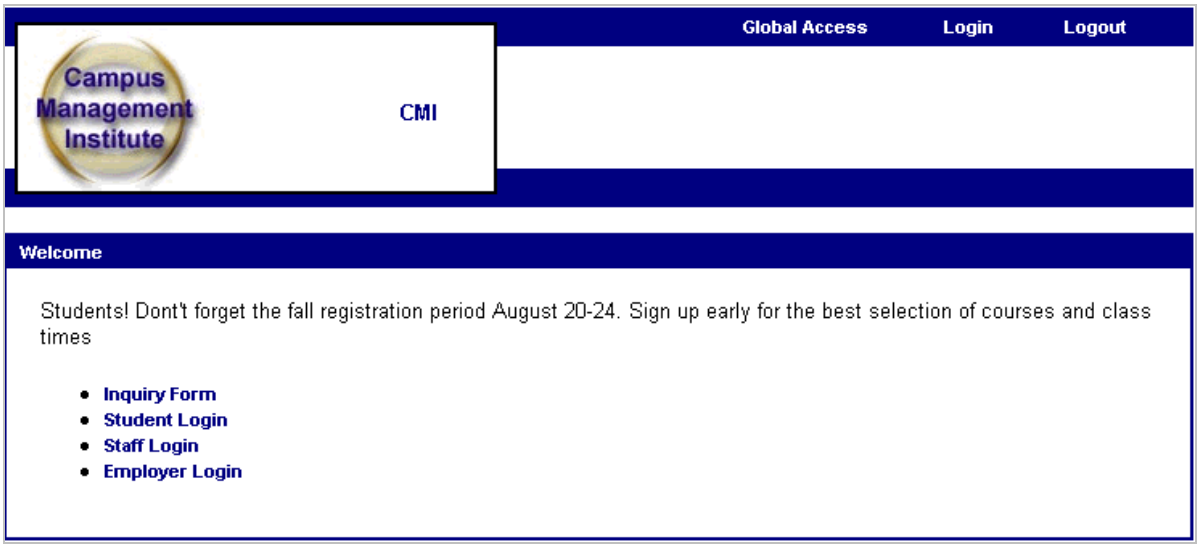
Web Interface Security

The security features that are used in CampusNexus Student are implemented for the web interface. For staff access to the web interface, the pages are controlled by the same security settings as in CampusNexus Student.

All staff web pages are linked to a CampusNexus Student menu option. If the user (staff member) does not have access to a menu option in CampusNexus Student, the link is not added to the user's web page. The display, add, edit, and delete options are used to control the web interface menu and forms that are displayed for each user.

Home Page

All users of your website are directed to the home page. For more information, see Home Page.



Inquiry Form

Persons requesting information about your institution can enter demographic information such as name, address, and area of interest on this page. The submitted data is placed in a file of electronic leads that can be viewed and processed by your Admissions department. For more information, see Web Inquiries.

Staff Services

Staff services include features that are commonly used by staff members when they are working directly with CampusNexus Student. Staff services include attendance posting, class rosters, class schedules, final grade posting, staff calendar, student information, and Contact Manager. For more information, see Staff Services.

Student Services

Student services include features that are useful to your students. The web-based student services include the menu options My Information, Online FAFSA, Class Registration, Class Schedule, Degree Audit, Ledger Card, Previous Grades, and Registration Summary. For more information, see Student Services.

Employer Services

Employer services consist mainly of allowing the employers used in your Career Services Department to update their job listings to add, edit, and delete jobs available to your graduates, externs, interns, and volunteers. For more information, see Employer Services.

Universal Fonts Now Available for all Web Interface Users

Anthology Inc. provides a font list for all users regardless of user printer drivers. The list is universal, containing the common available Windows fonts.

Internet Information Server (IIS)

Before the members of your institution can take advantage of the CampusNexus Student web interface, you must set up the Microsoft Internet Information Server (IIS). Follow the steps to initialize IIS for use with CampusNexus Student. You must be a system administrator to perform these steps.

Examples of the setup procedure use `AppServer` as the name of the server where CampusNexus Student resides and `WebServer` as the name of the server where IIS resides. Substitute the names of your application server and web server for these names.

Note: Refer to the Product Compatibility matrix at http://www.mycampusinsight.com/Releases/Pages/Compatibility.aspx to identify supported versions of the SQL and IIS servers.

To initialize IIS for use with CampusNexus Student:

1. On `AppServer`, install the CampusNexus Student business objects.
2. Install the Microsoft SQL database. It can be installed on `AppServer` or a different server.
3. Install IIS on `WebServer`. The process of installing IIS creates a folder named `\\WebServer\C$\Inetpub\wwwroot\`. The CampusNexus Student web application can reside in this directory. Otherwise, you can create another virtual root directory to contain your website.
4. In the virtual root folder on `WebServer`, create a `_temp` folder with full permissions for an anonymous user.

   Example: `\\WebServer\C$\Inetpub\wwwroot\_temp\`.

   The CampusNexus Student Web application writes temporary files to this folder.
5. From `WebServer`, run `\\AppServer\c2000\ComPlus\CampusVue.msi`.
6. From `WebServer`, run `\\AppServer\c2000\ComPlus\c2000IIS.msi`.

These steps prepare the web server to receive the web pages from the CampusNexus Student application. Continue the setup process from within CampusNexus Student. For more information, see Setup > Web Interface.

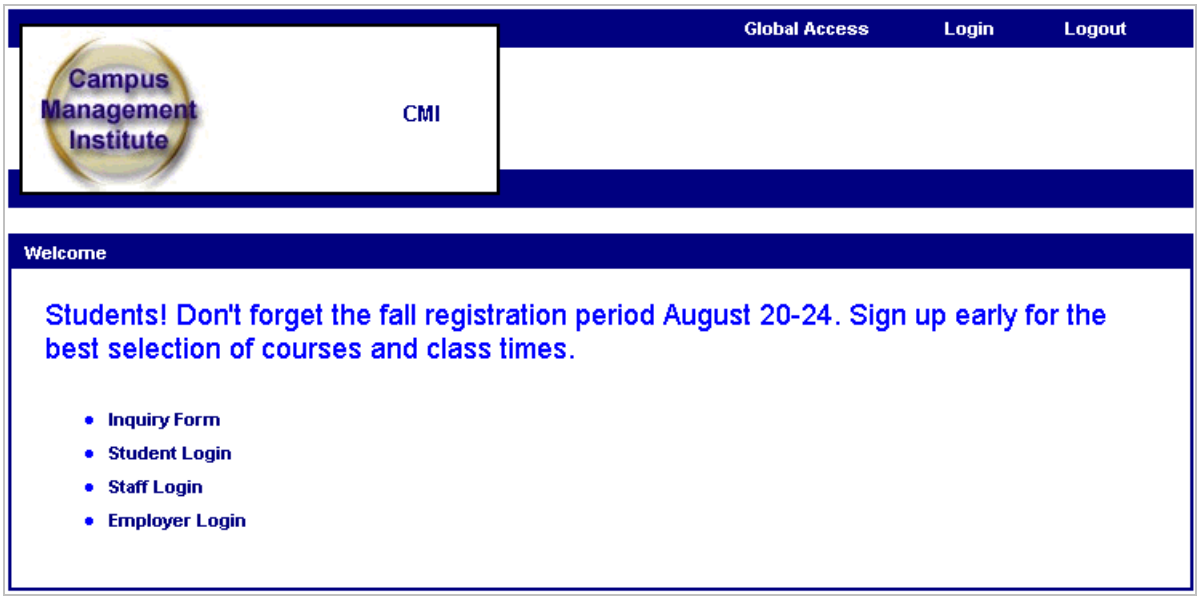
Important Operations Note

Each time you receive an update of CampusNexus Student (new release or service pack), steps 5 and 6 of the procedure above must be executed again. You must also run the Build Pages command on the Web Interface - Web Server Tab.

Home Page

From within CampusNexus Student, you can design a set of web pages for your institution that provide access to information contained in your databases. Your faculty and staff members, students, and employers can gain access, in a secure environment, to data related to their activities. All who have access to your web pages must log in with an identifier and a password or personal identification number (PIN). Once a website visitor has logged in, and depending on the role in which he or she logged in that person can view, and in some cases update, data in CampusNexus Student. The design of your web pages is controlled through the Web Interface - Layout Tab.

When a visitor gets to your home page, several access options are available.



Global Access

The Global Access menu contains options that do not require a login. The Welcome Page option returns the user to the home page of the website. The Inquiry Form option opens a form with which the user can submit a request for information about your institution.

Login

The Login menu offers an alternative method of selecting a login page. There are login options for students, staff members, and employers.

Logout

The Logout option on the main menu is used to terminate the user's activity and return to the Welcome (home) page.

Note: A user will be automatically logged out after 20 minutes of inactivity on any web page controlled by this system. The user is returned to the website home page.

Welcome Page

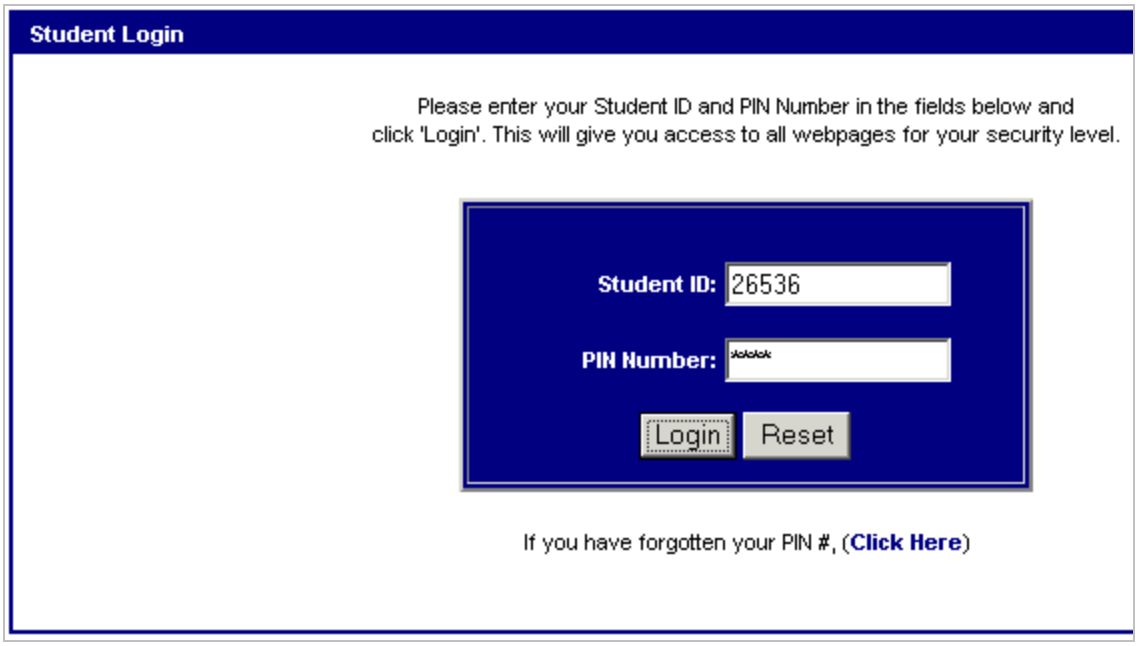
The Welcome page contains broadcast messages. Bulletin-board style messages are shown on your home page. The messages are entered in HTML format via the Web Interface - Messages Tab.

Inquiry Form

This option opens a form with which interested parties can inquire about your institution. When the form is processed, an electronic lead record is created in CampusNexus Student's database. This is not the same thing as a "New Lead" which is entered manually through CampusNexus Student. The electronic lead records are reviewed by an Admissions Department representative before a student (new lead) record is created. For more information, see Web Inquiries.

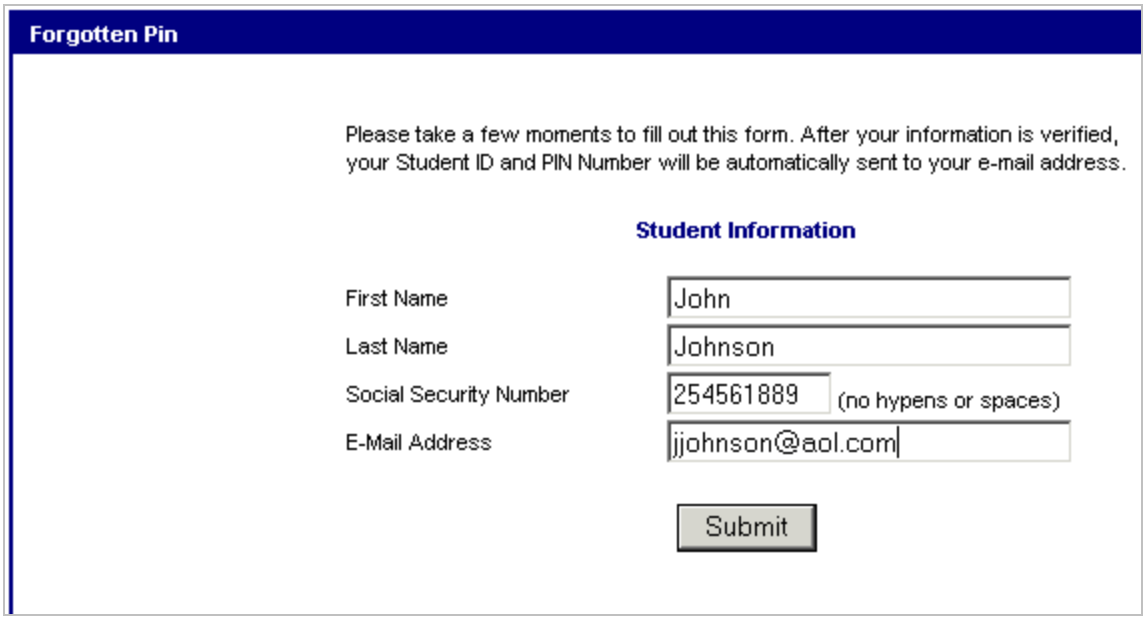
Student Login

The Student Login option leads to a login form for students.



Once a student has logged in using a Student ID and PIN, the Student Services home page opens with additional menu options. Your institution controls the options that appear on the Student Services page via the Web Interface - Student Access Tab. For more information, see Student Services.

If a student forgets his or her ID and PIN, the student submits the form below. If the data on the form matches the student's data in the CampusNexus Student database, an email message containing the ID and PIN is sent to the student.

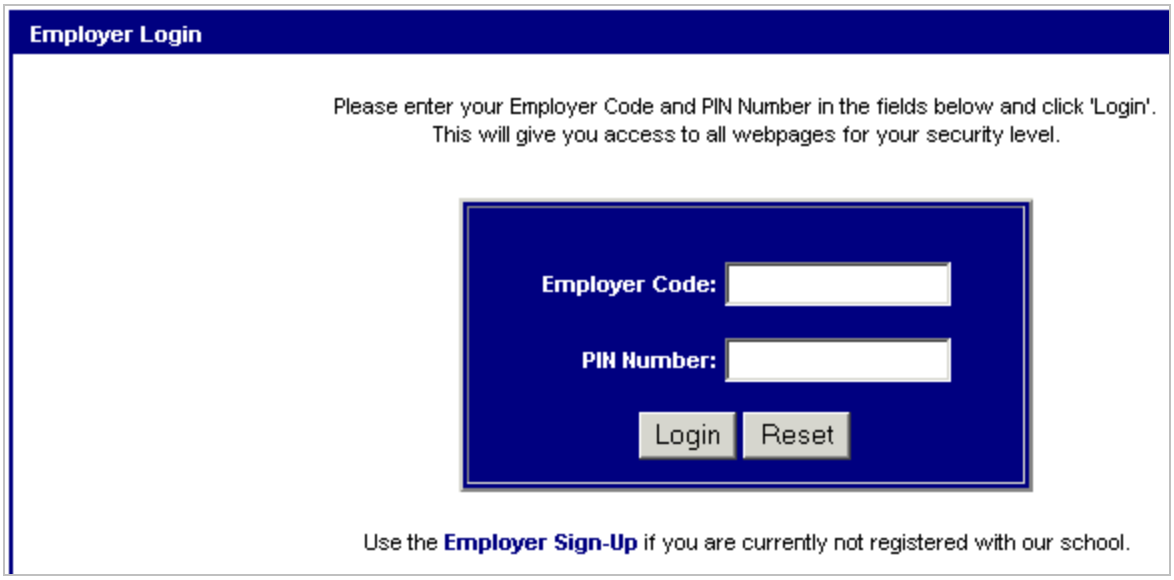


Staff Login

The Staff Login option leads to a login form for staff members. Once a staff member has entered a user ID and password (the same codes used to enter CampusNexus Student through a workstation), the Staff home page opens with additional menu options. Your institution controls the options that appear on the Staff home page via the Web Interface - Staff Access Tab. For more information, see Staff Home Page.

Employer Login

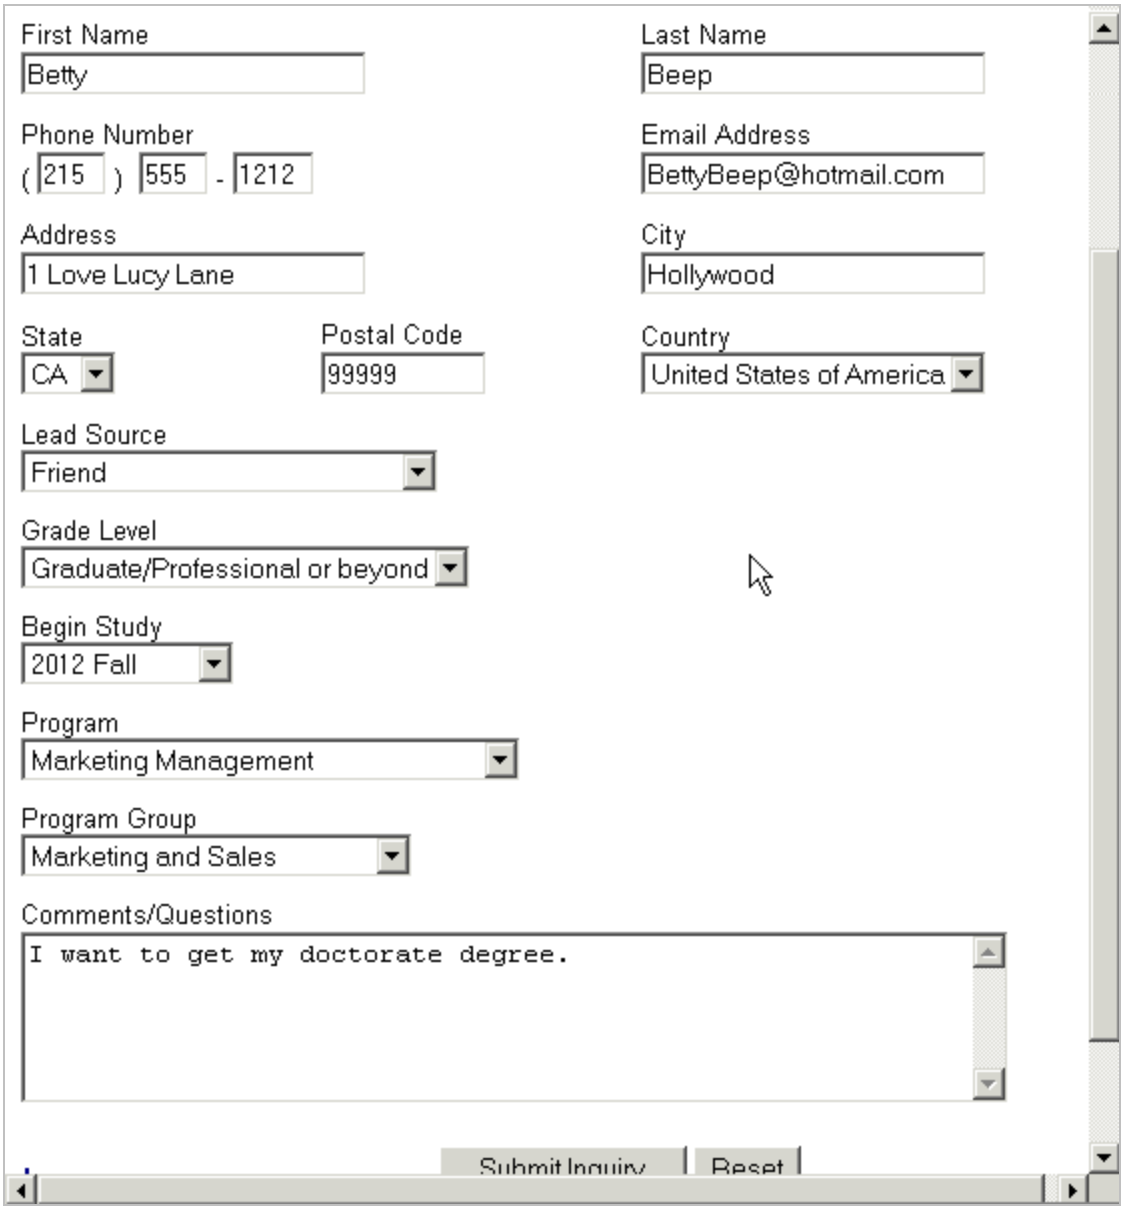
The Employer Login option leads to a login form for your employers. The employer needs an Employer Code and a PIN (assigned by your institution) to gain access to the Employers home page. From the Employer home page, an employer can add or edit available jobs. For more information, see Employer Home Page.



Employer Login
Please enter your Employer Code and PIN Number in the fields below and click 'Login'.
This will give you access to all webpages for your security level.
Employer Code:
PIN Number:
Login
Reset
Use the Employer Sign-Up if you are currently not registered with our school.

Web Inquiries

The Inquiry option opens a form with which interested parties can inquire about your institution. When the form is processed, an electronic lead record is created in the CampusNexus Student database. This is not the same thing as a "New Lead" entered manually through CampusNexus Student. The electronic lead records are reviewed by an Admissions Department representative before a student record is created. Refer to the example below.

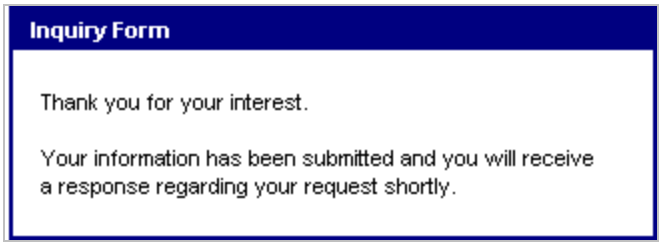


The list boxes on the Inquiry form contain data from CampusNexus Student list tables.

- State
- Lead Source
- Grade Level
- Begin Study (The terms listed are controlled in Term Code Setup.)
- Program (desired major)
- Program Group (Interests)
- Comments

The Reset button on the Admissions Inquiry form clears any entered data but leaves the form open for new data.

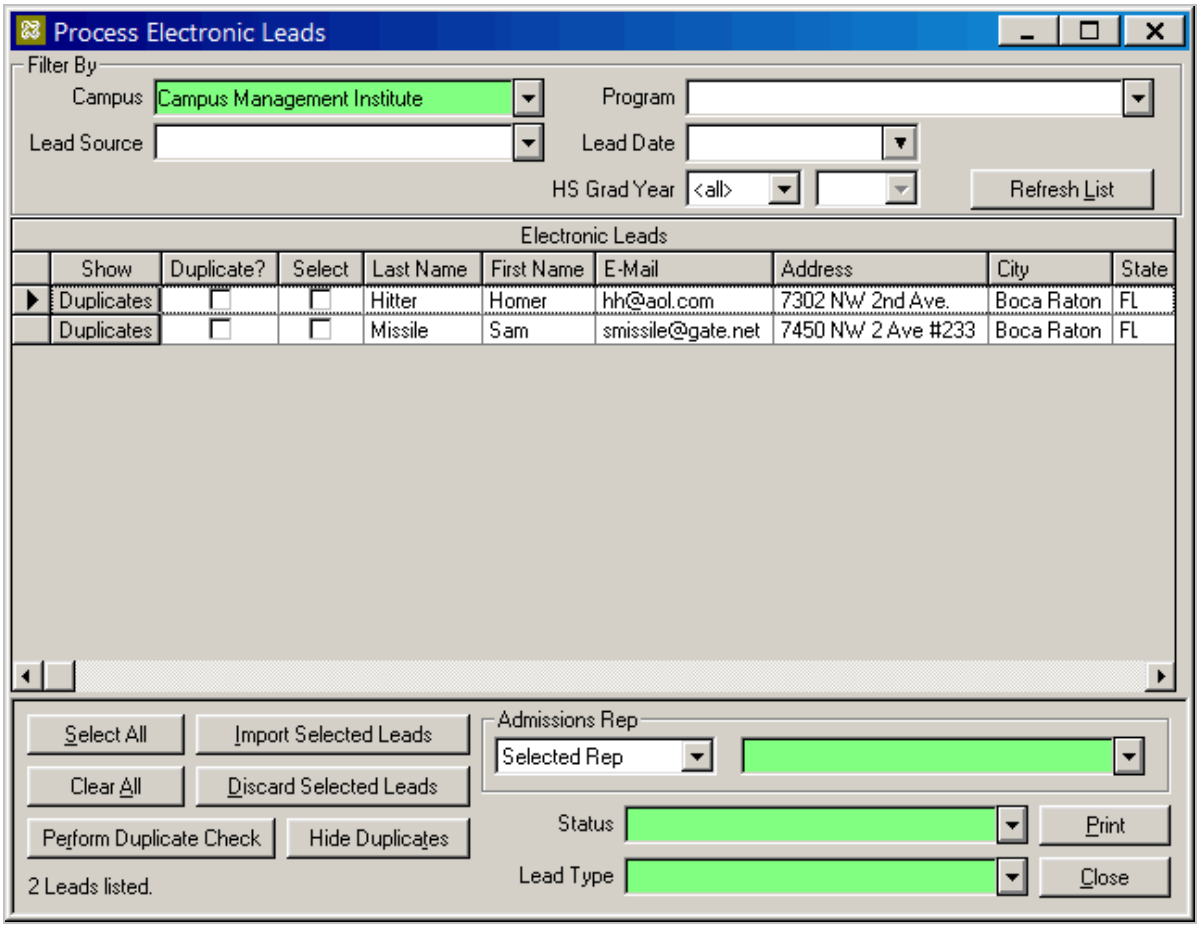
When the inquiry is submitted, the information is captured in the electronic lead records table, and a confirmation message is displayed.



The person making the inquiry can then return to the website home page by clicking Welcome Page on the Global Access menu.

Processing Electronic Leads

A staff member in the Admissions Department must regularly review entries in the electronic leads table to ensure a prompt response. In CampusNexus Student, the electronic inquiries are accessed through Daily > Admissions > Process Electronic Leads. The staff person may choose to contact the inquirer or convert the inquiry data to a new lead in CampusNexus Student. The inquirer then enters the institution's normal lead-processing cycle.

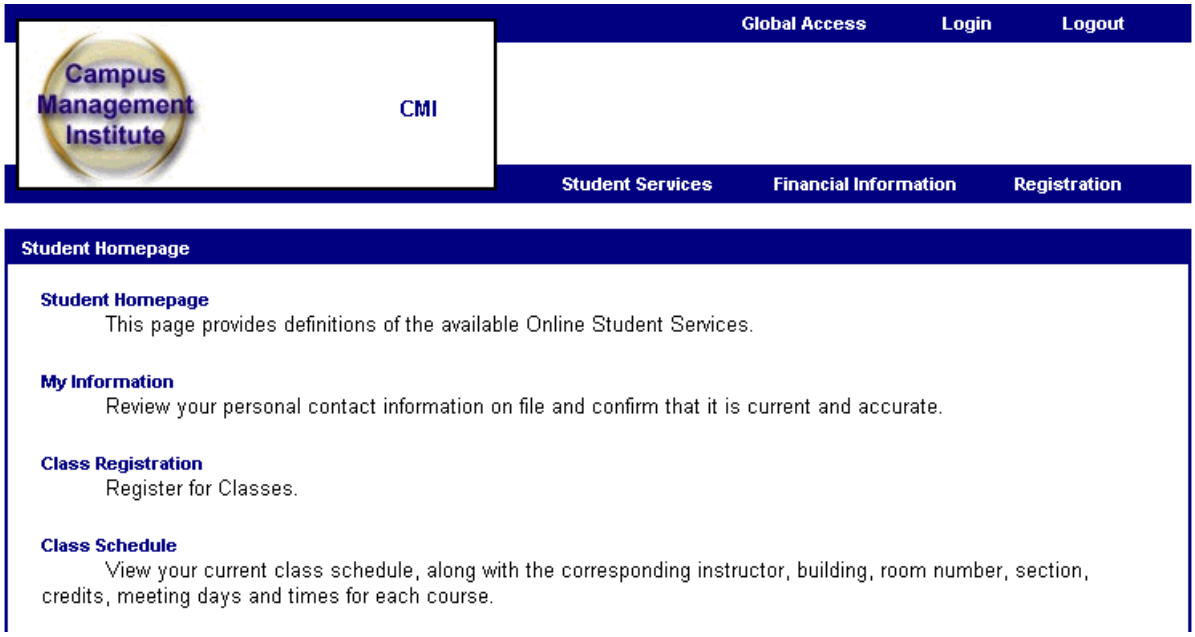


Student Home Page

Once a student has logged on using a student ID and PIN, the Student Services home page opens with several additional menu options. Your institution controls the options that appear on the Student Services page via the Web Interface - Student Access Tab in CampusNexus Student. The options may include:

- My Information
- Ledger Card
- Class Registration
- Registration Summary
- Class Schedule
- Degree Audit
- Previous Grades
- Online Payment

In addition, there are some useful utility resources on this page such as a weather site, search engines, and www.amazon.com.



All of the options that are listed and described in the Student Home Page window are also represented on the three menus of the student menu bar. A student can select any of these options to go to the appropriate student-specific web page.

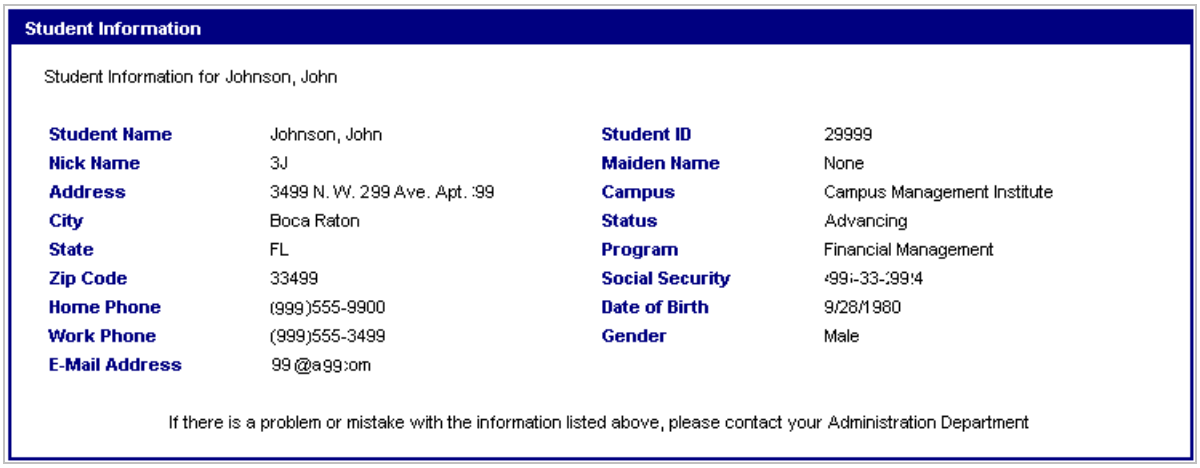
Student Services Menu

Financial Information Menu

Registration Menu

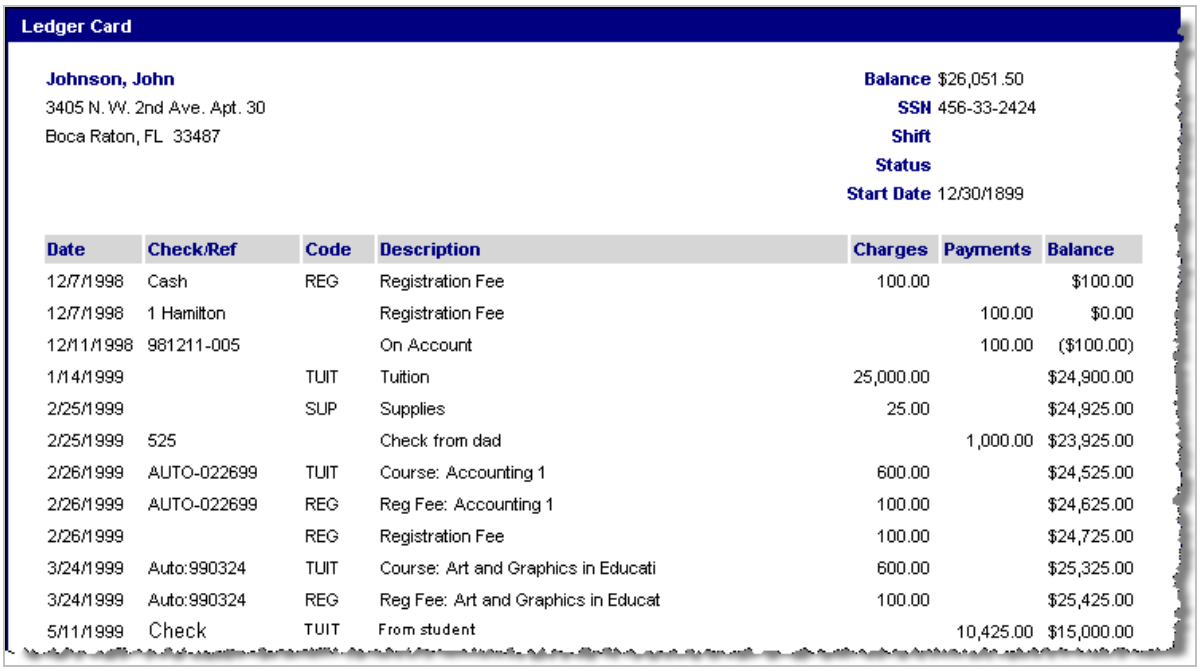
My Information

This is a read-only form. The student can view information that is currently on file at the institution. If the student notes anything on the form that needs a change, the student needs to contact the institution's Administration Department to have the information corrected.



Ledger Card

This option displays the student's ledger card in read-only format. The student's current balance is shown in the upper right corner of the page.



Ledger Card

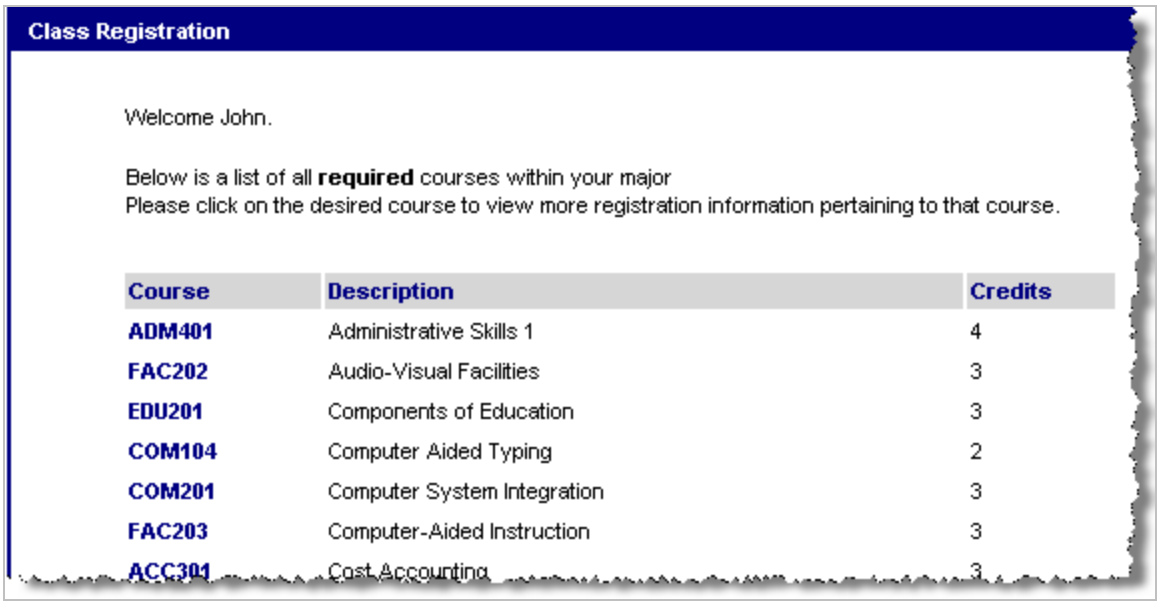
Class Registration

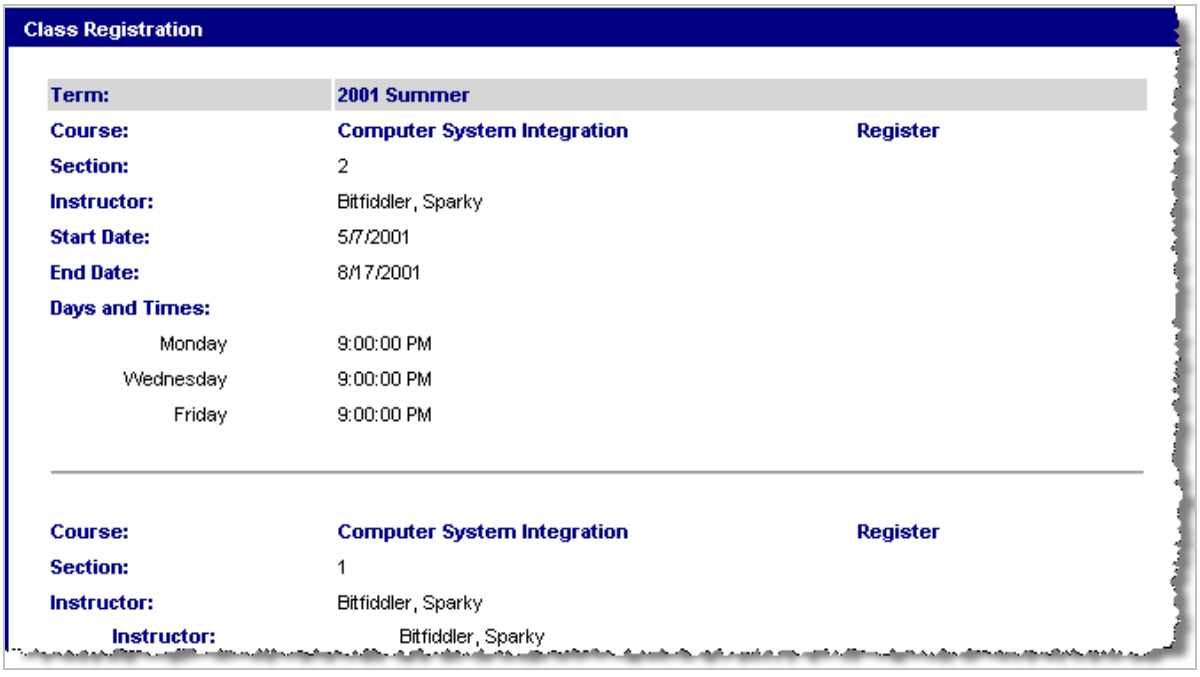
Class Registration is available only during periods of time controlled in CampusNexus Student under the Term Code Setup function. If a student attempts to register for a class in a term that is not open for registration, a message indicates that the term is not available at this time.

When the student displays the Class Registration page, a form similar to the one below is displayed.

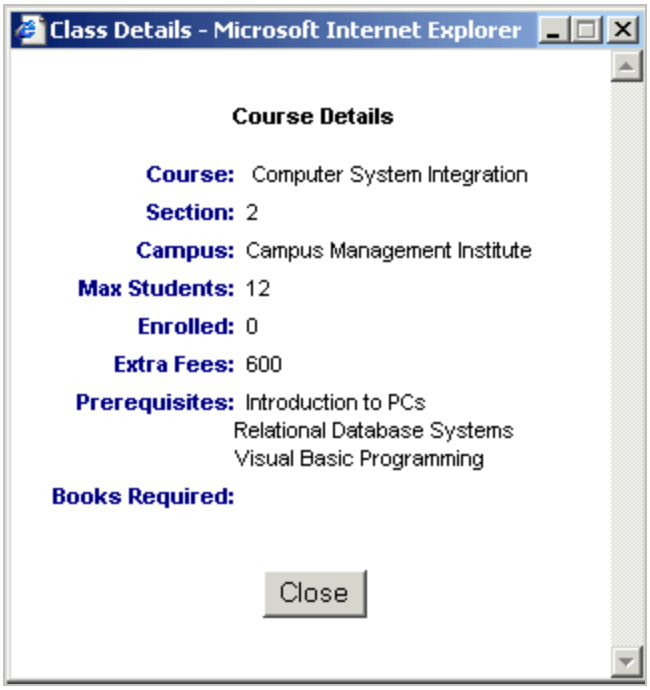
List of Student's Required Courses



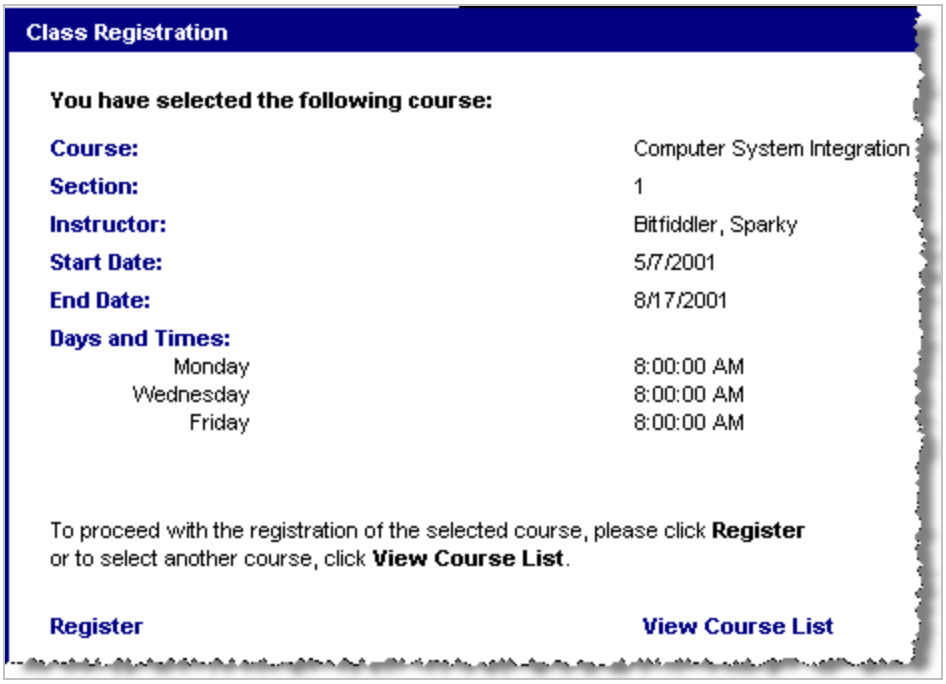
When a course is selected for registration, additional information is displayed.



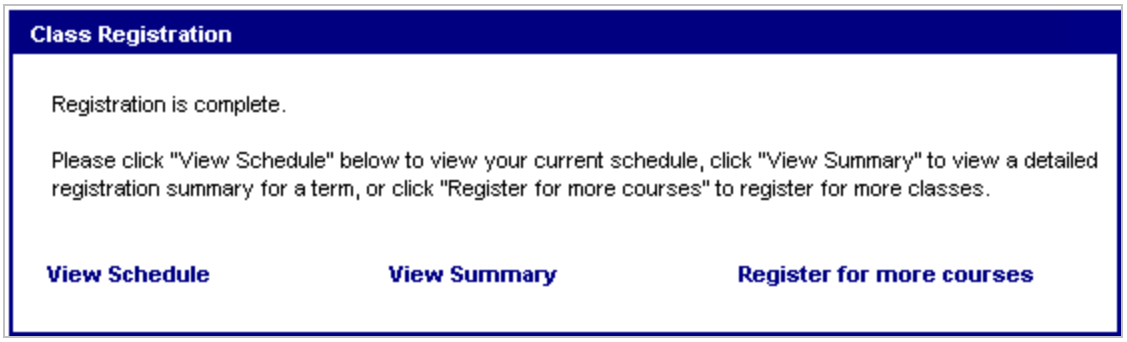
The student can click the Course Name to see more details about the course. The Class Details are displayed in a separate window.



When the student clicks Register on the Class Registration page, the program displays the page below.



If the student registers for the class section, the message below is displayed.



The View Schedule and View Summary links display the forms below; the Register for more courses link displays the course list.

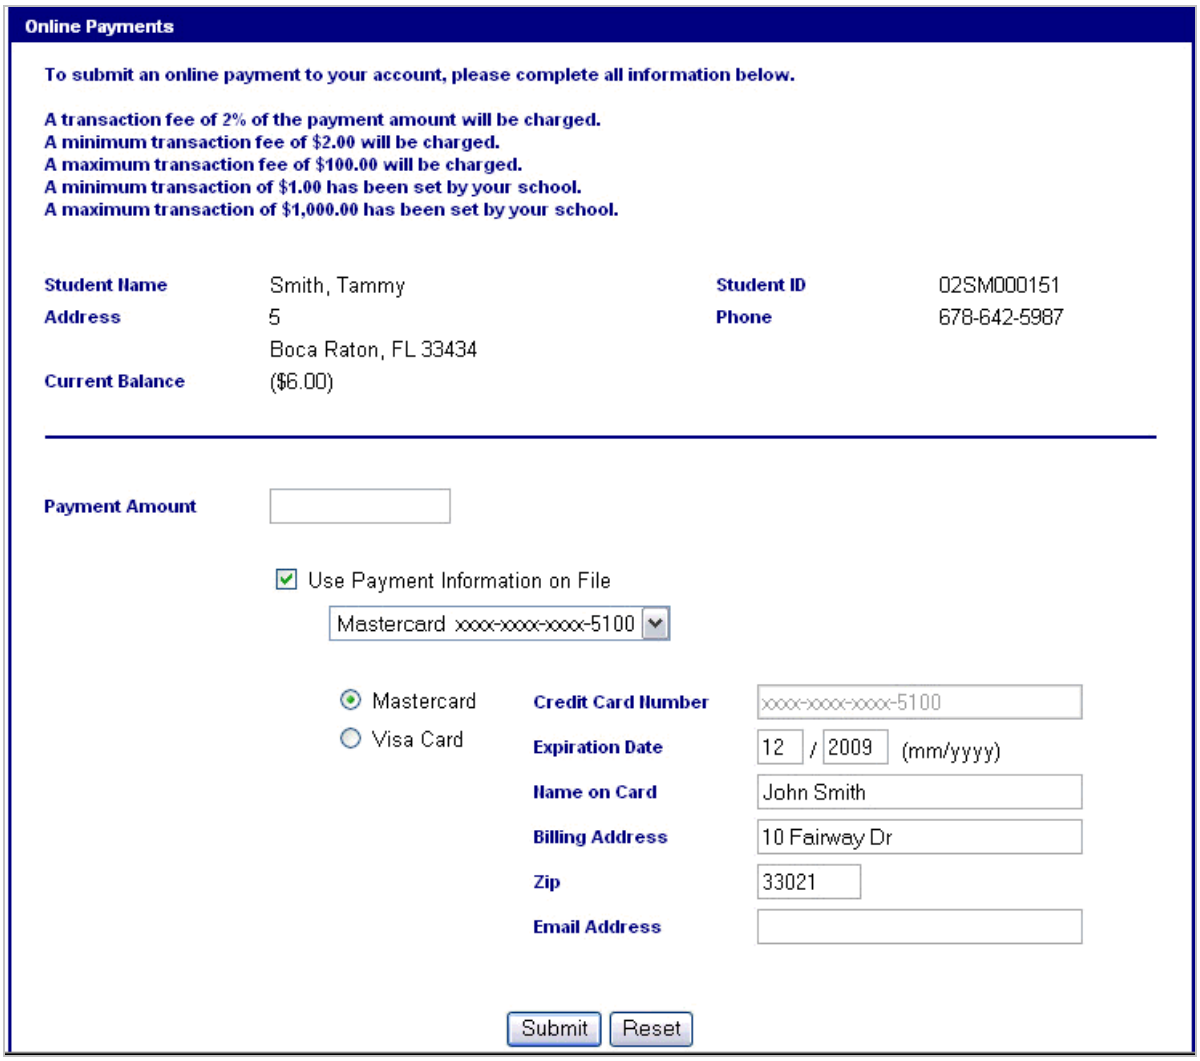
Online Payment

Students can post payments to their account online. The form can display the transaction fees and the payment guidelines that have been set up.



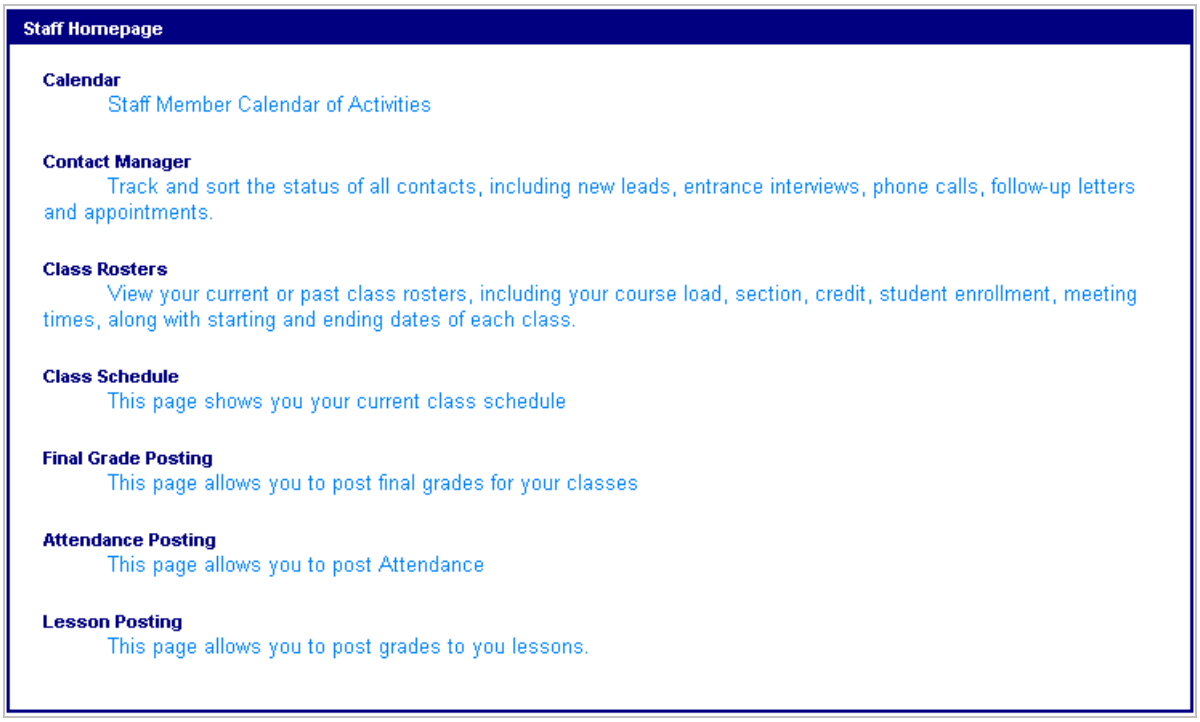
Staff Home Page

The Staff Login option on the home page leads to a login form for staff members. Once a staff member has entered a user name (ID) and password (the same credentials used to access CampusNexus Student), the Staff home page is displayed. Your institution controls the options that appear on the Staff home page via Web Interface - Staff Access Tab in CampusNexus Student.

Staff services include several features commonly used by staff members when they are working directly in CampusNexus Student. Staff services include:

- Calendar
- Contact Manager
- Class Schedules
- Class Rosters
- Attendance Posting
- Final Grade Posting
- Student Information

An alternative method of selecting staff services is from the drop-down menu on the Staff main menu bar.

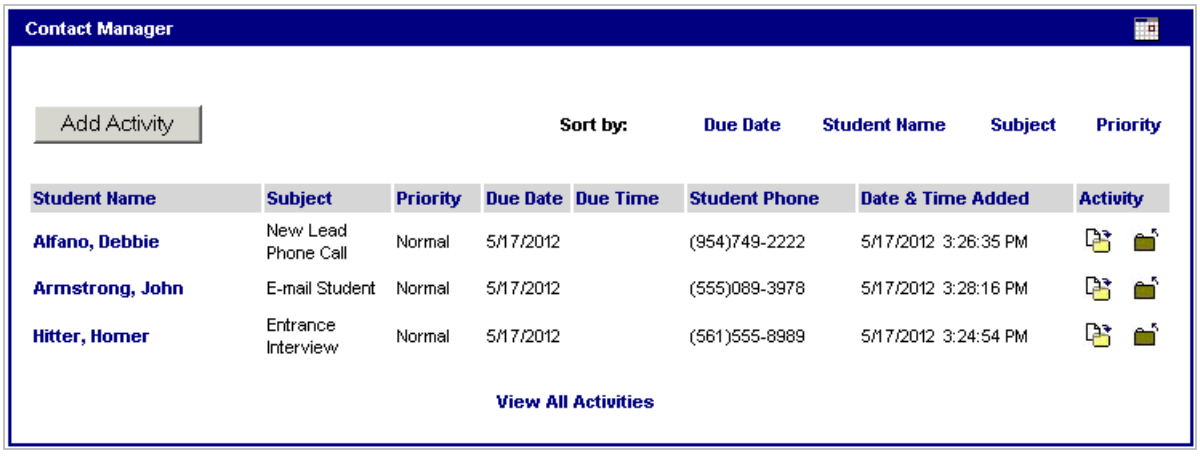


Calendar

The Calendar page displays a monthly calendar on which days with activities are shaded.

The activities on this page are the same activities that CampusNexus Student displays when you are working in Contact Manager. After selecting a date on the calendar, you can display, edit, and close the activities for that date.

If you click on a shaded date, a list of activities for that day is displayed. The page below shows all outstanding activities for a selected day.



Click a student's name to display the Student Information in a separate browser window.

Click the **Calendar** icon in the title bar of the Activity List to see the monthly calendar showing all days on which you have activities scheduled.

Click **Add Activity** to add a new activity. Refer to Add Activity.

Click one of the **Sort by:** options to rearrange the activity list. You can sort by Due Date (default), Student Name, Subject, or Priority.

Click **View All Activities** to expand the list to include all outstanding activities regardless of date.

Edit Activity

On an activity row, click to edit the selected activity. The Edit Activity page is displayed in a separate browser window. Refer to Edit Activity.

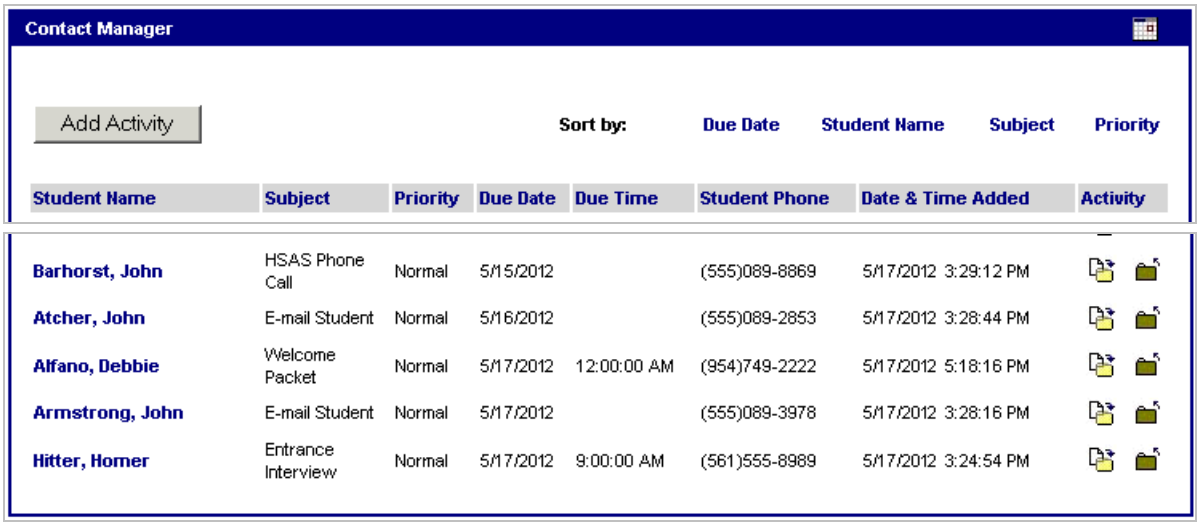
Close Activity

On an activity row, click to close the selected activity. The Close Activity page is displayed in a separate browser window. Refer to Close Activity.

Contact Manager

You can view your Contact Manager activity list from the Contact Manager web page. This feature has much of the functionality of the corresponding feature in CampusNexus Student. It uses the same security settings.

From this web page, you can add an activity, edit an activity, or close an activity.



Click in the title bar of the Activity List to see a monthly calendar showing all days on which you have activities scheduled. For more information, see Staff Calendar.

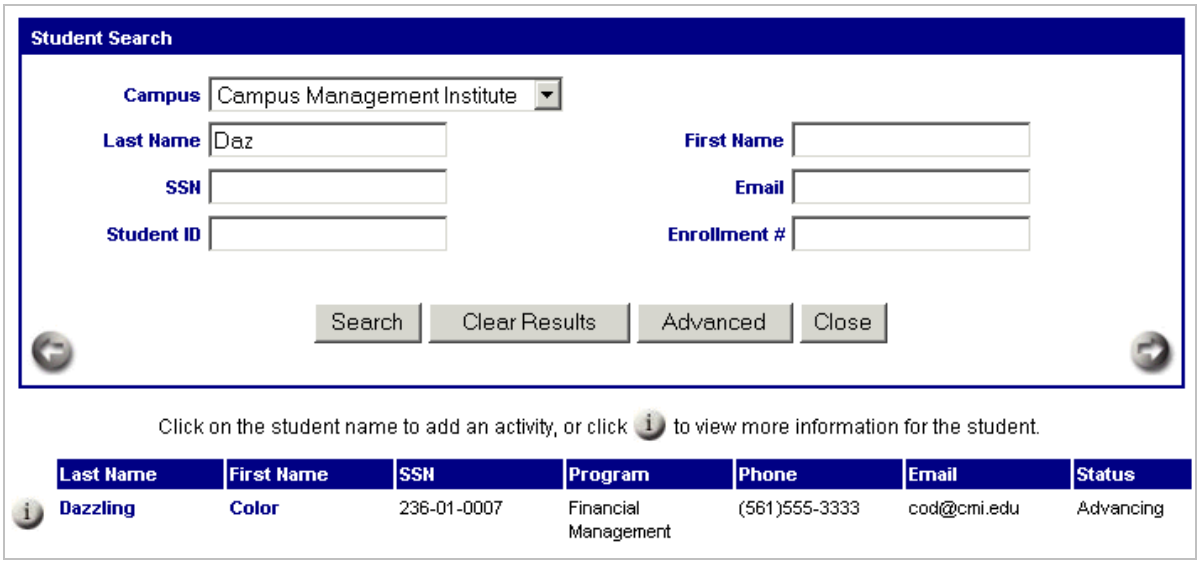
Click one of the **Sort by:** options to rearrange the activity list. You can sort by Due Date (default), Student Name, Subject, or Priority.

Click the **student's name** to display the Student Information page in a separate browser window.

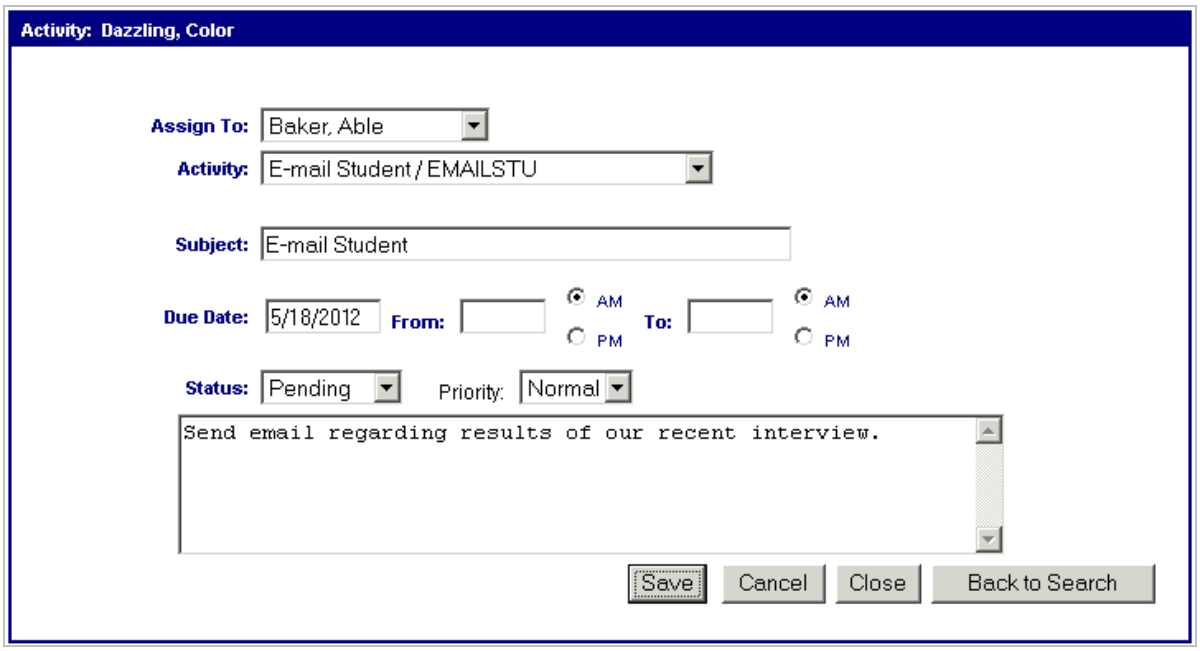
Add Activity

Click **Add Activity** to add a new activity. The Student Search page is displayed. Enter enough data to find the student for whom you want to add an activity.

Click **Search** to display a list of students meeting your search criteria.



Click the Name of the student for whom you want enter a new activity. The Add Activity page is displayed.



Enter the necessary data for the activity.

Click **Save**.

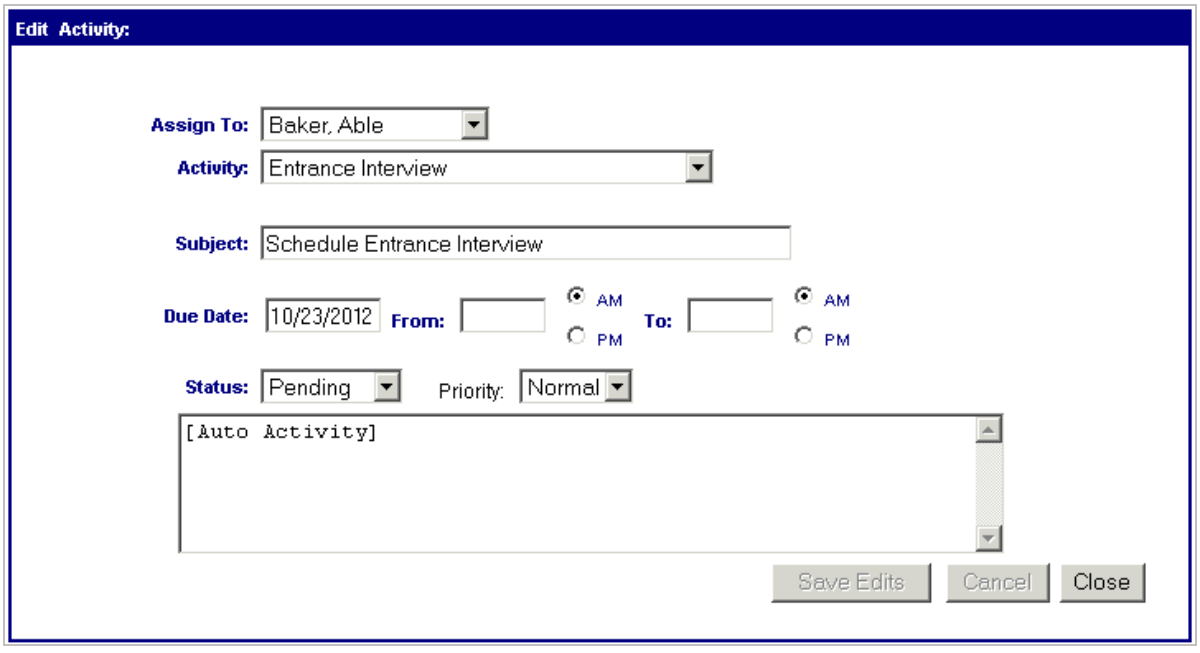
Click **Back to Search** to return to the Student Search page.

Click **Cancel** to cancel the addition of the new activity.

Click **Close** to close the form.

Edit Activity

On an activity row, click to edit the selected activity. The Edit Activity page is displayed in a separate browser window.



You can change any activity data that you could change if you were working in CampusNexus Student.

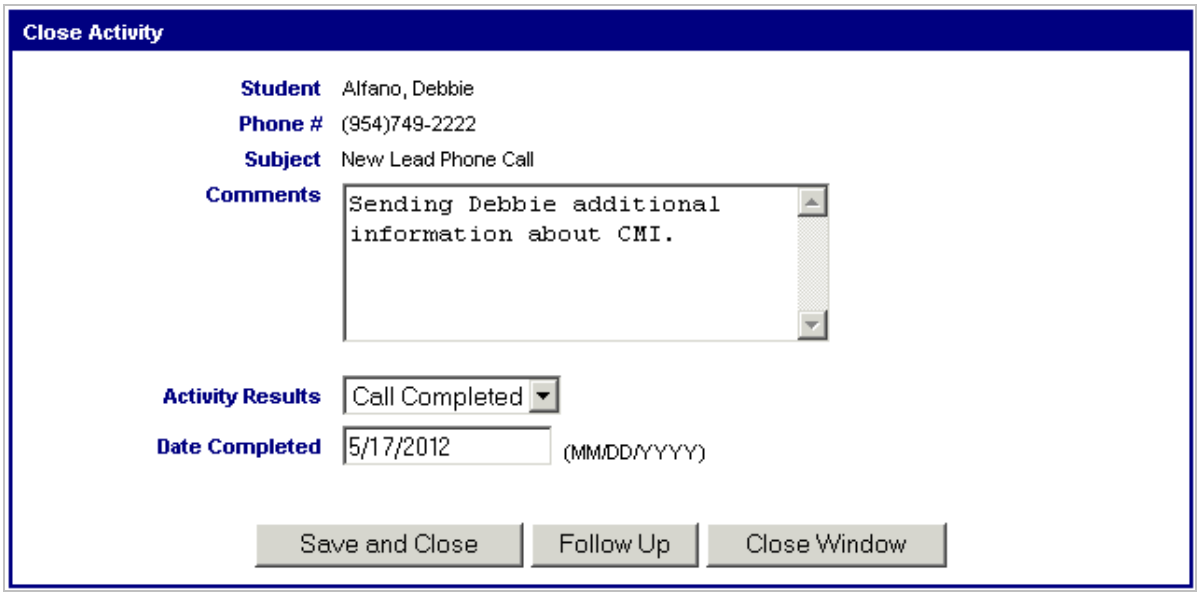
Click **Save Edits** to save any changes you make to the activity. The browser window is closed during the save process.

Click **Cancel** to cancel any changes.

Click **Close** to close the Edit Activity browser window without saving changes.

Close Activity

On an activity row, click to close the selected activity. The Close Activity page is displayed in a separate browser window.



Enter any **Comments** about the activity.

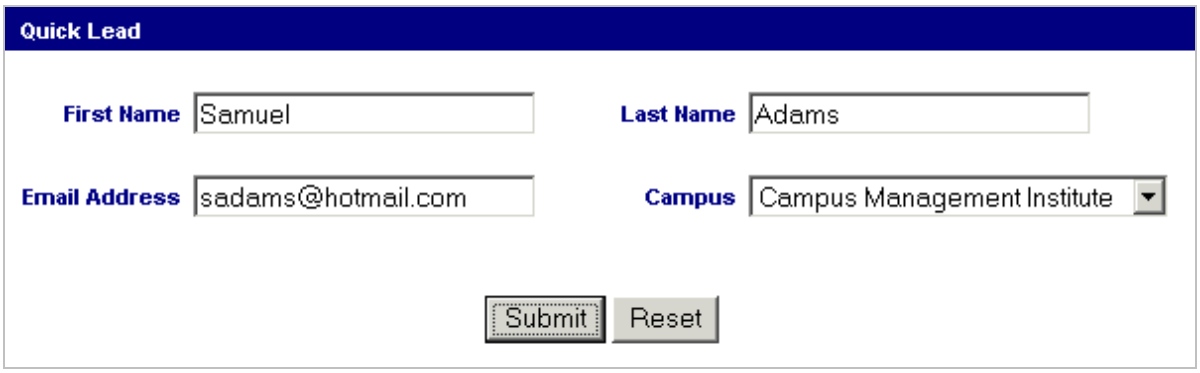
Select an option from **Activity Results**.

Accept or enter the **Date Completed**.

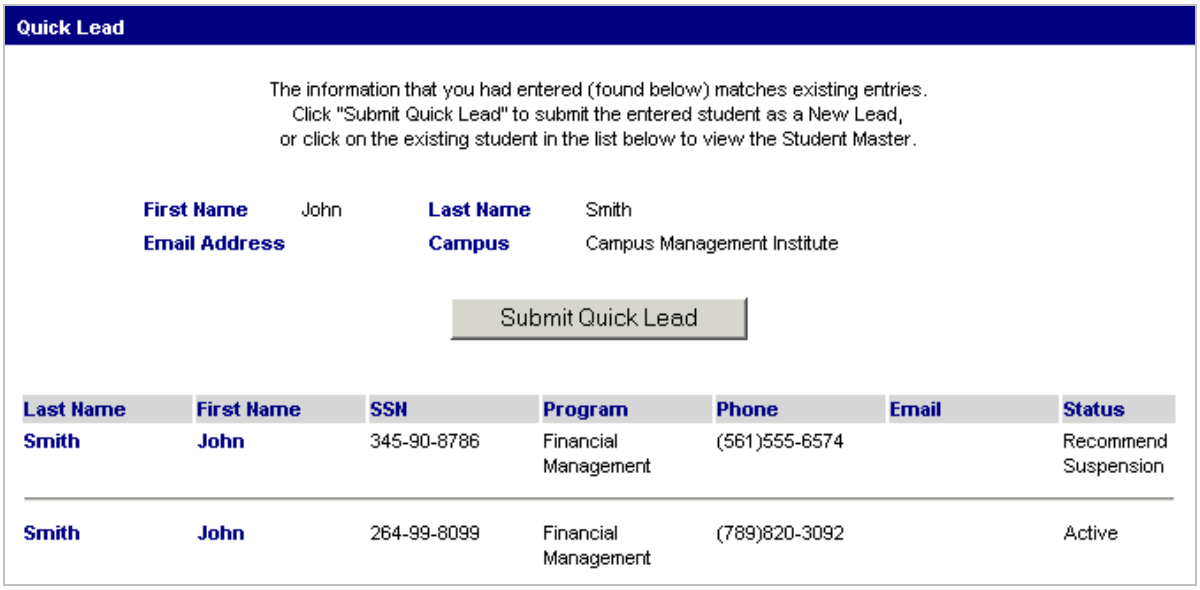
Click **Save and Close** or **Follow Up** as required. If you click Follow Up, the Add Activity page is displayed with the student's data filled in. Complete the follow-up activity and save it.

Add New Lead

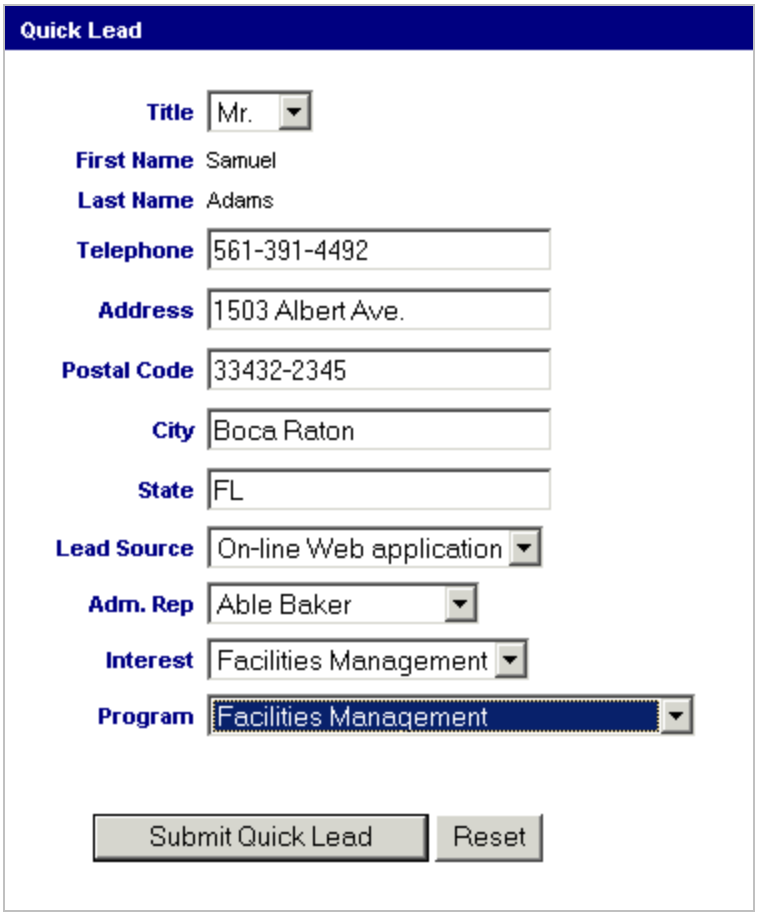
Staff members can submit new leads to CampusNexus Student by entering some basic information. When you click on the Add New Lead menu option, an initial form is displayed.



Enter the lead's name, email address, and the campus in which the lead is interested. Click Submit. CampusNexus Student checks for duplicates in the database. If the new lead data matches one or more students in the student master table, the list of possible duplicates is displayed.



From the list of possible duplicates, you can click on a student name to see more information in a separate browser window. If none of the possible duplicates is displayed to match the new lead, click Submit Quick Lead in the duplicates window. The Quick Lead data entry page is displayed. The data entry boxes on this form correspond to your custom designed Quick Lead form in CampusNexus Student.

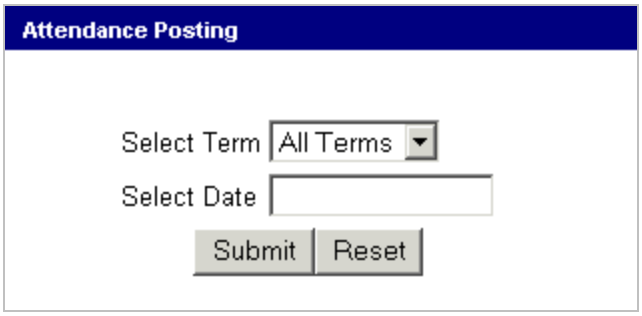


After entering or selecting the required data, click Submit Quick Lead. A confirmation message is displayed.

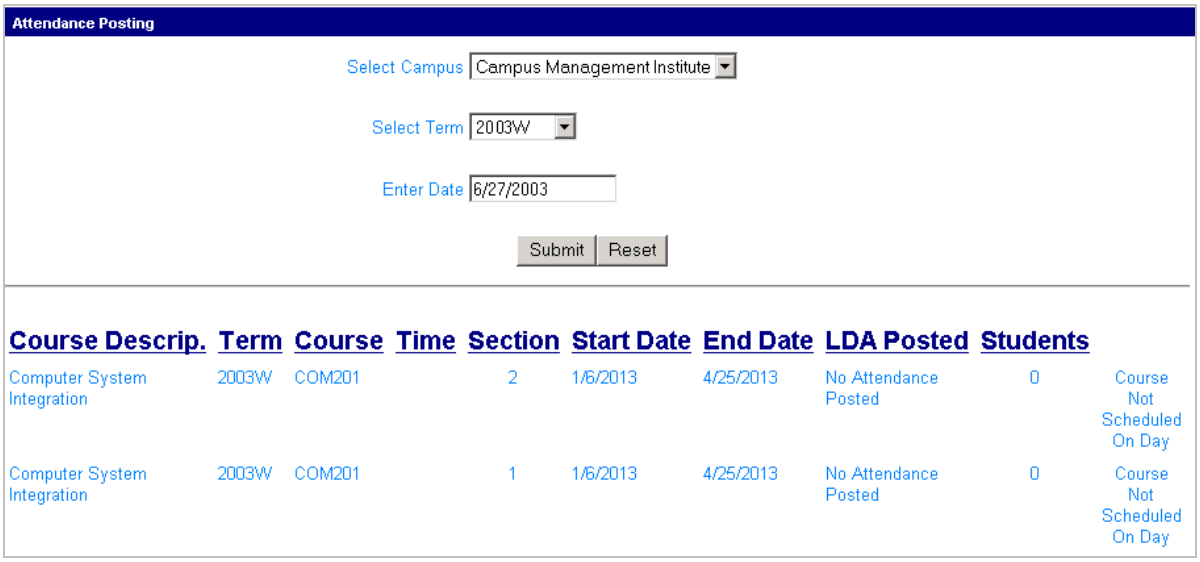
Click Return to Quick Lead Entry to start another new lead or click Staff Home Page.

Staff Attendance Posting

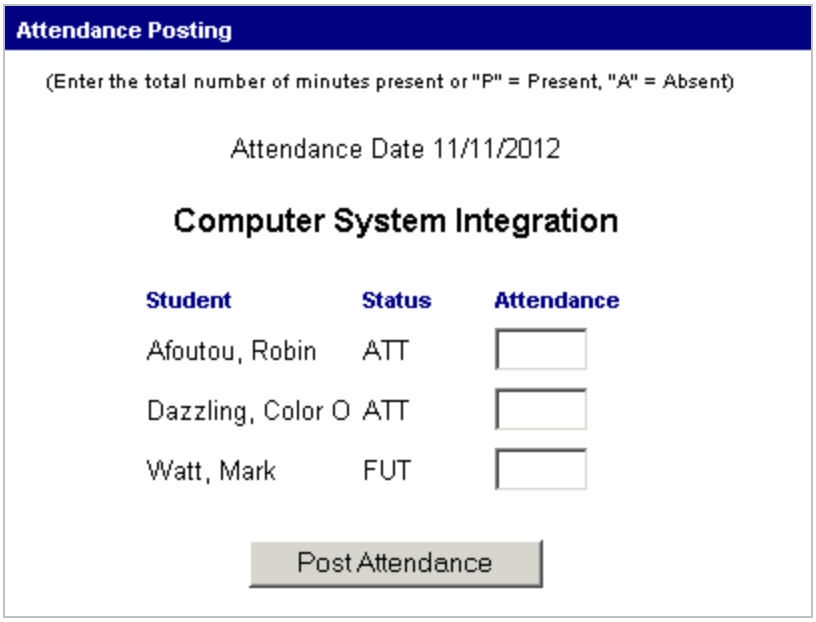
You can view a list of class sections for which to post attendance. The list includes only your courses.



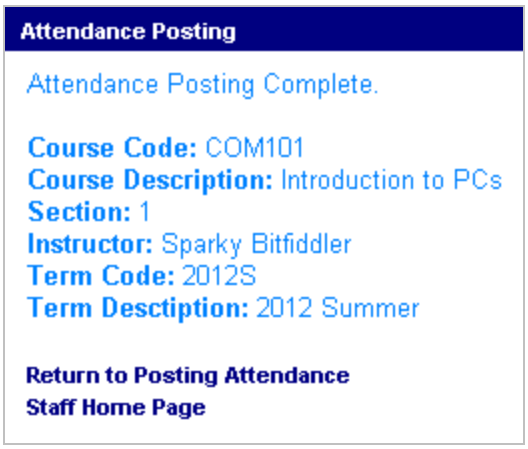
Select Term and select (enter) a date for which to post attendance.



After entering the date, select a course by clicking the Course Description. A class section roster is displayed. Enter the time each student attended. You must make an entry for all students to indicate that they are present (enter the total minutes scheduled for the class section or **P**), tardy (enter less than the total minutes scheduled), or absent (enter zero minutes attended or **A**).



Click Post Attendance. The attendance is posted to the students' records. A confirmation message is displayed when the posting is complete.

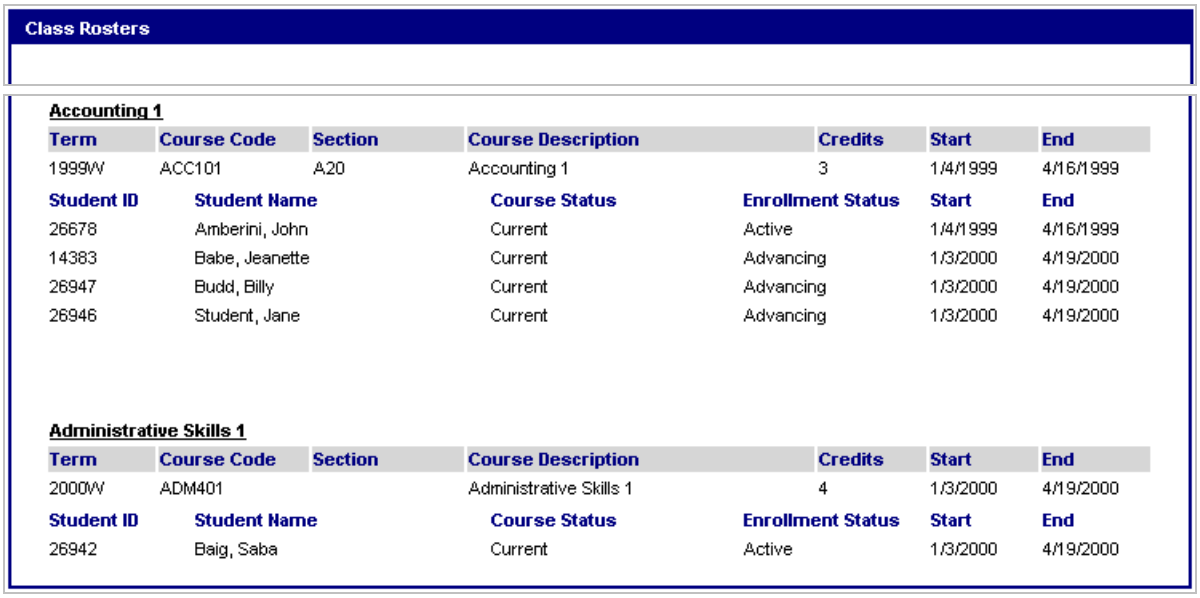


From the confirmation message, Return to Posting Attendance or return to the Staff Home Page.

Class Rosters

You can view your class rosters from this read-only page. It shows rosters for all class sections you are scheduled to teach.

The data for each class section includes the Description, the Course Code, Section Code, Credits, Start Date, and End Date. For each student on the roster, the display shows the Student ID, Student Name, Status in the Course, Enrollment Status, Start Date, and End Date.



Class Rosters

Accounting 1

Term	Course Code	Section	Course Description	Credits	Start	End
1999W	ACC101	A20	Accounting 1	3	1/4/1999	4/16/1999

Student ID	Student Name	Course Status	Enrollment Status	Start	End
26678	Amberini, John	Current	Active	1/4/1999	4/16/1999

26942	Baig, Saba	Current	Active	1/3/2000	4/19/2000

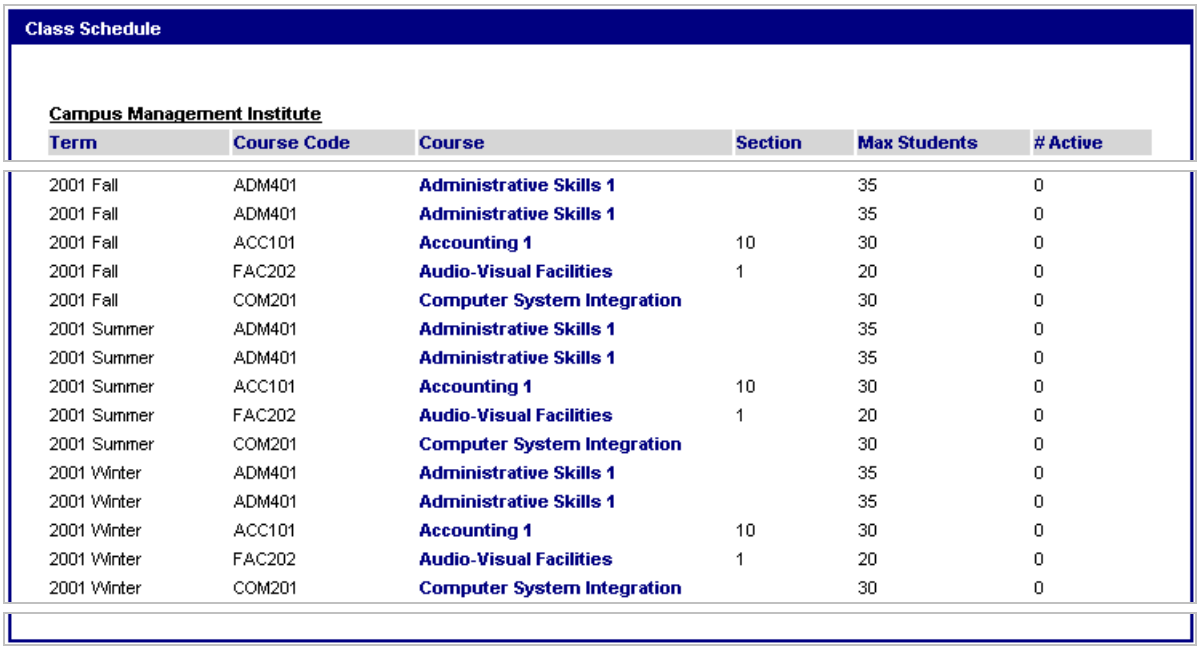
Use the menu options on the main menu bars to navigate to other Staff Services pages from the Class Rosters page.

Class Schedule

You can access a read-only list of your scheduled classes. The class schedule is grouped by campus. For each class, the page displays the Term, Course Code, Description, Section Code, Maximum Students, and Active Students.

When you click a course description, the Class Roster page is displayed. All classes having registered students have a class roster.

Right-click on the Class Roster page and select the Back option to return to the Class Schedule page.



Class Schedule

Campus Management Institute

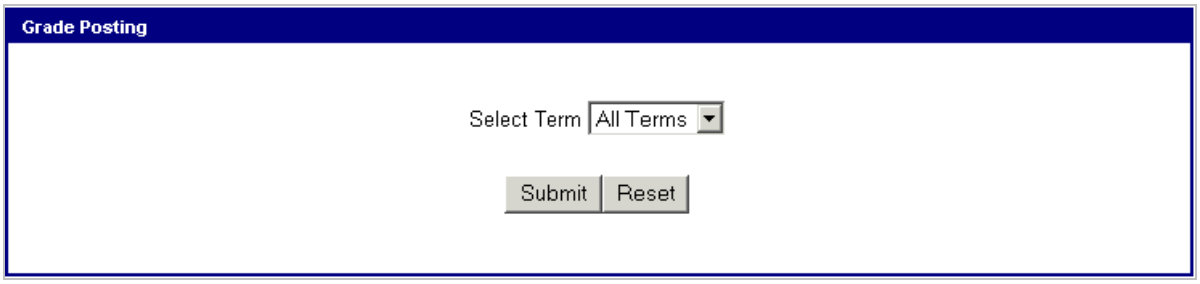
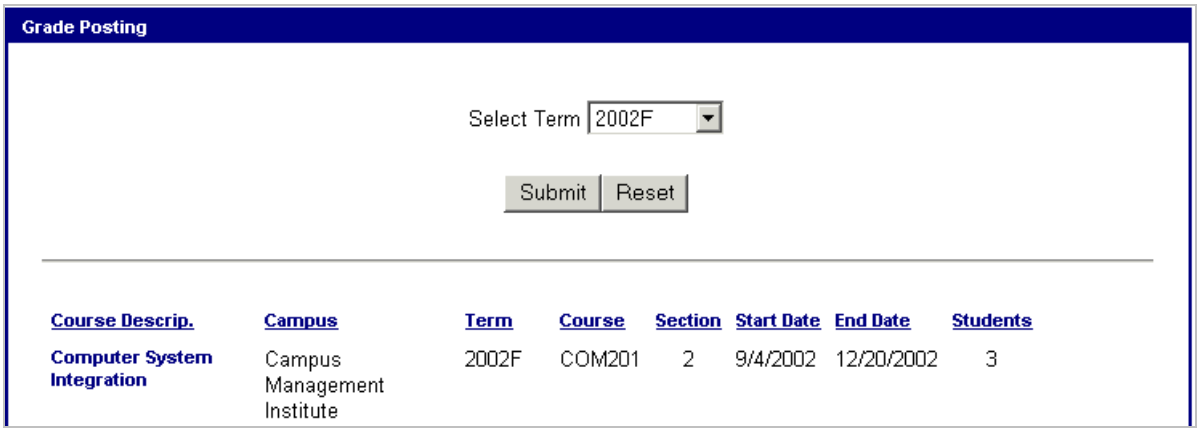
2001 Winter	COM201	Computer System Integration		30	0

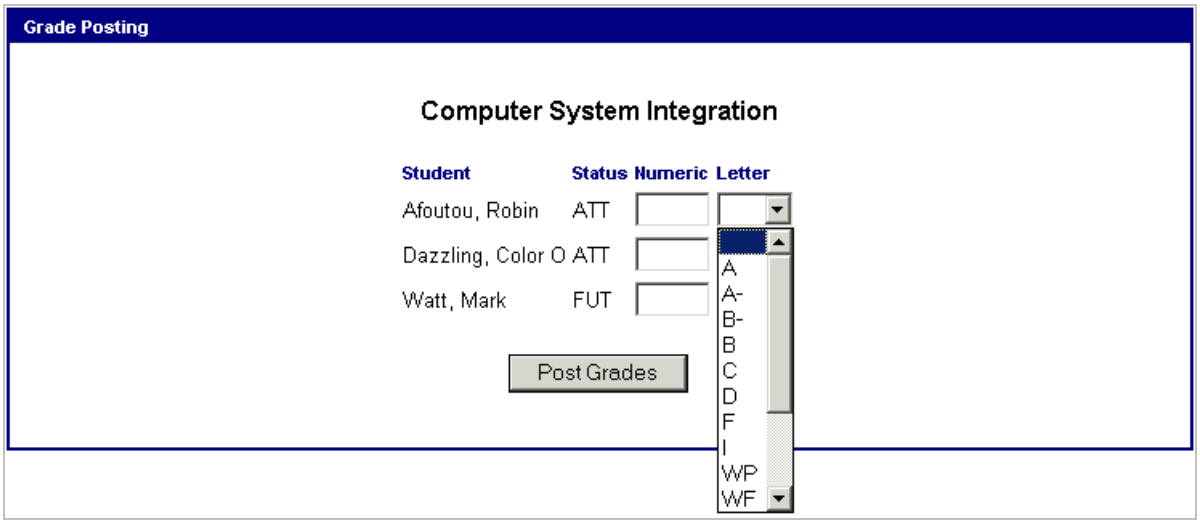
Final Grade Posting

You can select a course for which to post final grades. The Grade Posting page lists all courses that you are scheduled to teach.



Select the Term and click the Course Description to select a course. The class section roster is displayed for grade entry.





Enter Numeric grades if your institution uses them for determining the student's final grade. Numeric grades are converted to letter grades according to the grading scale used for the course.

Click to open the letter grade list.

Click Post Grades to post the final grades for the class section. The grades are posted to the CampusNexus Student database. A confirmation message is displayed after the posting process.

Right-click on the Grade Posting Roster page and select Back to return to the course list page.

Student Information

You can display the Student Information web page from most of the Staff Services web pages. Typically, wherever you see a list of students, you will see the Student Information icon next to the students' names. Click the icon to view a student information page. From this page, you can view a history of Contact Manager activities or a list of student-related documents. You can also add a new activity.

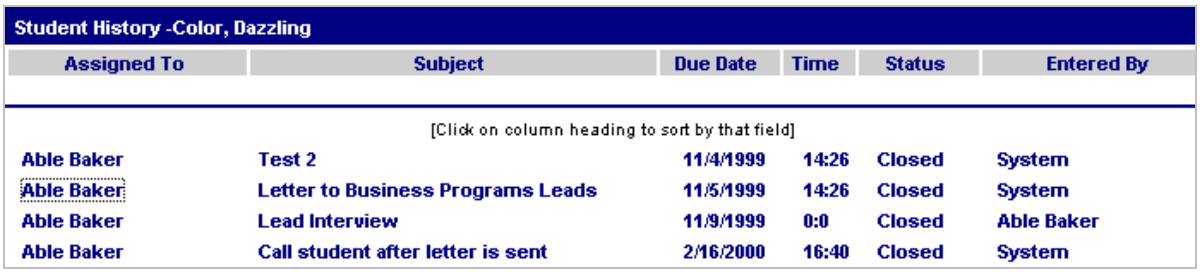
Click Back to return to the web page from which you came.

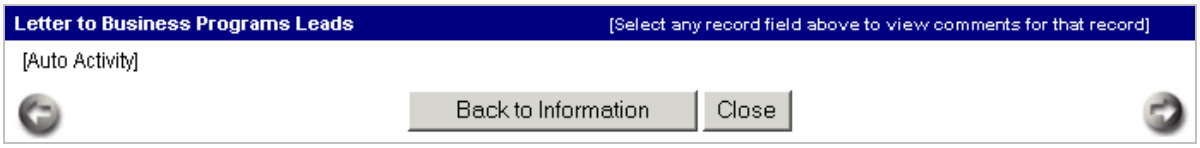
Click Add Activity to add an activity for this student in Contact Manager.

Click Close to close the Student Information page.

Student History

Click to see a history of Contact Manager activities for the student.





Click on a column heading to sort the activities list by the selected values.

Click a row in the activities list to see any comments on file for the selected activity. As you click on the rows, the program will tell you if the activity was assigned via an automatic activity.

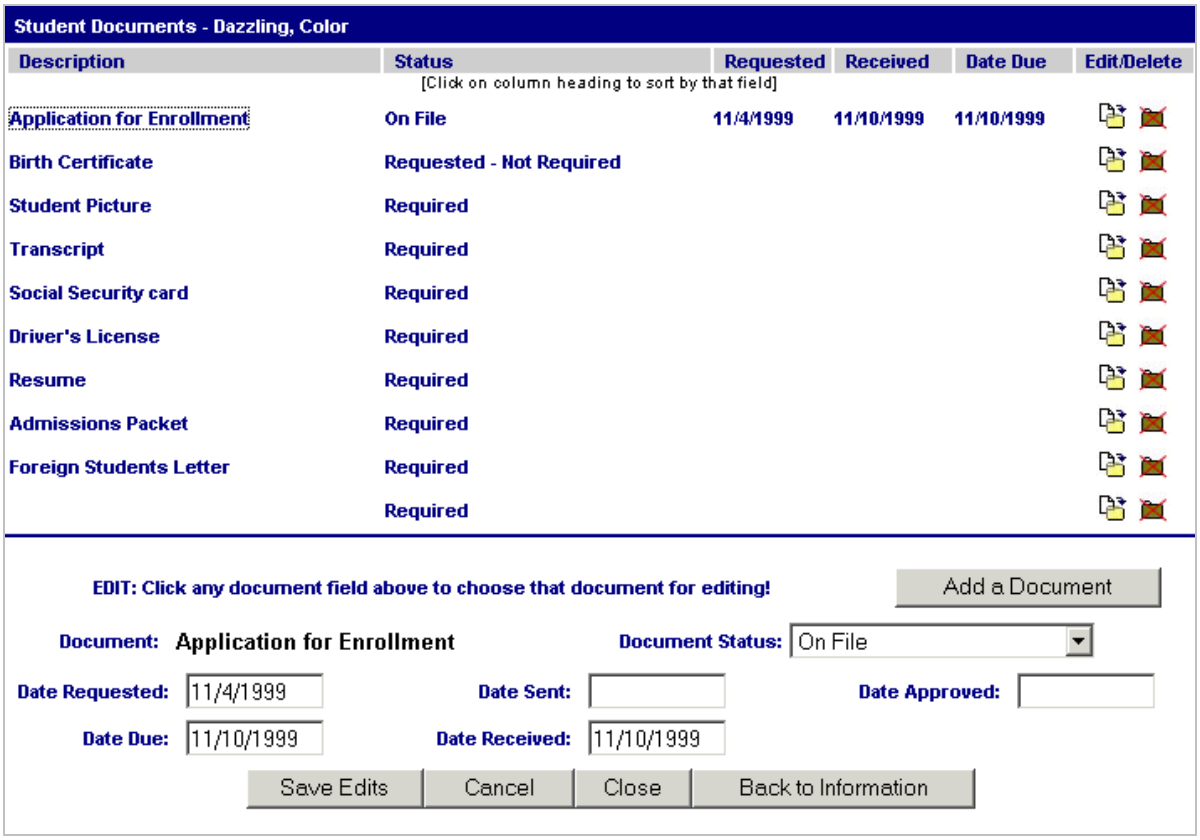
Click to return to the previous page.

Click to go to a more recent page.

Click Back to Information to return to the Student Information page.

Student Documents

Click to see a list of documents related to the selected student. From this page you can see and edit the document tracking data. You can also add a new document to the list.



Click Add a Document to add a new document to the student's list. See the "Add Activity" procedure under "Contact Manager" earlier in this document.

Click on a column heading to sort the activities list by the selected values.

Click a document in the list to choose it for editing. The program will display the document tracking data in the fields at the bottom of the form. You can also click the Edit icon to the right of the document to be edited.

Click to delete a document.

Change the Document Status, Date Requested, Date Sent, Date Approved, Date Due, and/or Date Received as required.

Click Save Edits to save any changes you have made.

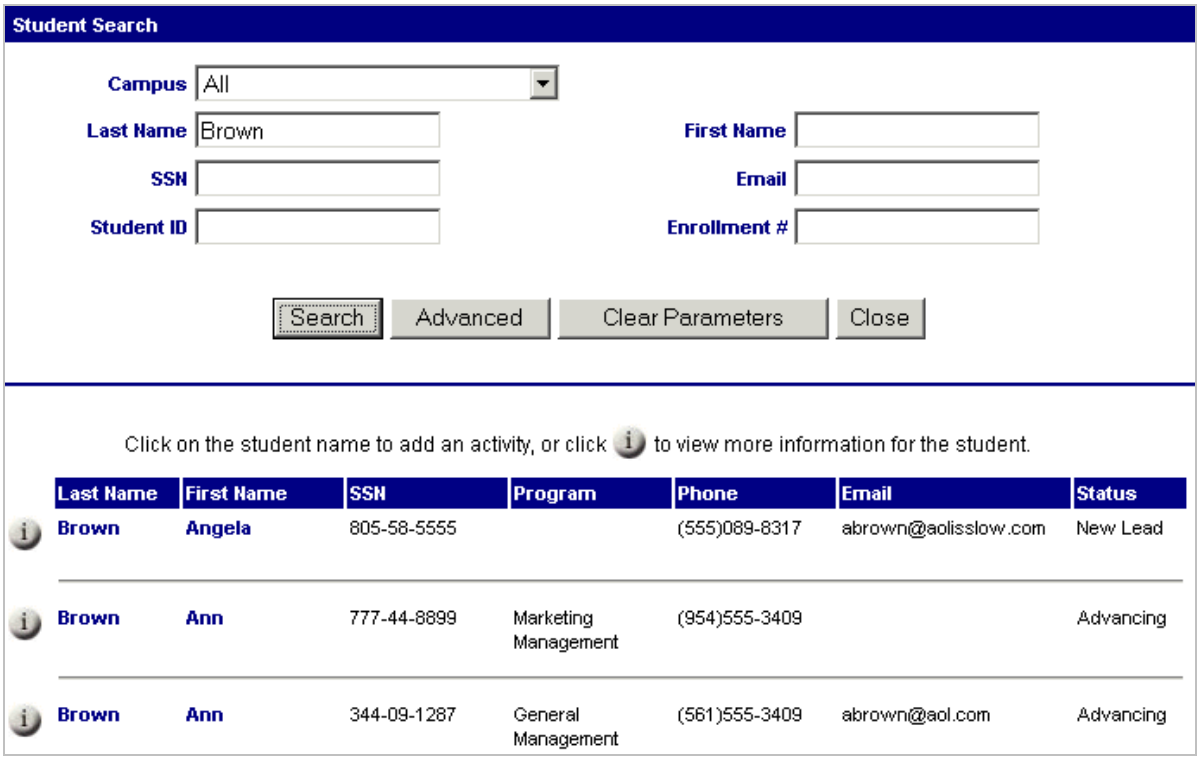
Click Cancel to cancel any data changes you have made.

Click Back to Information to return to the Student Information page.

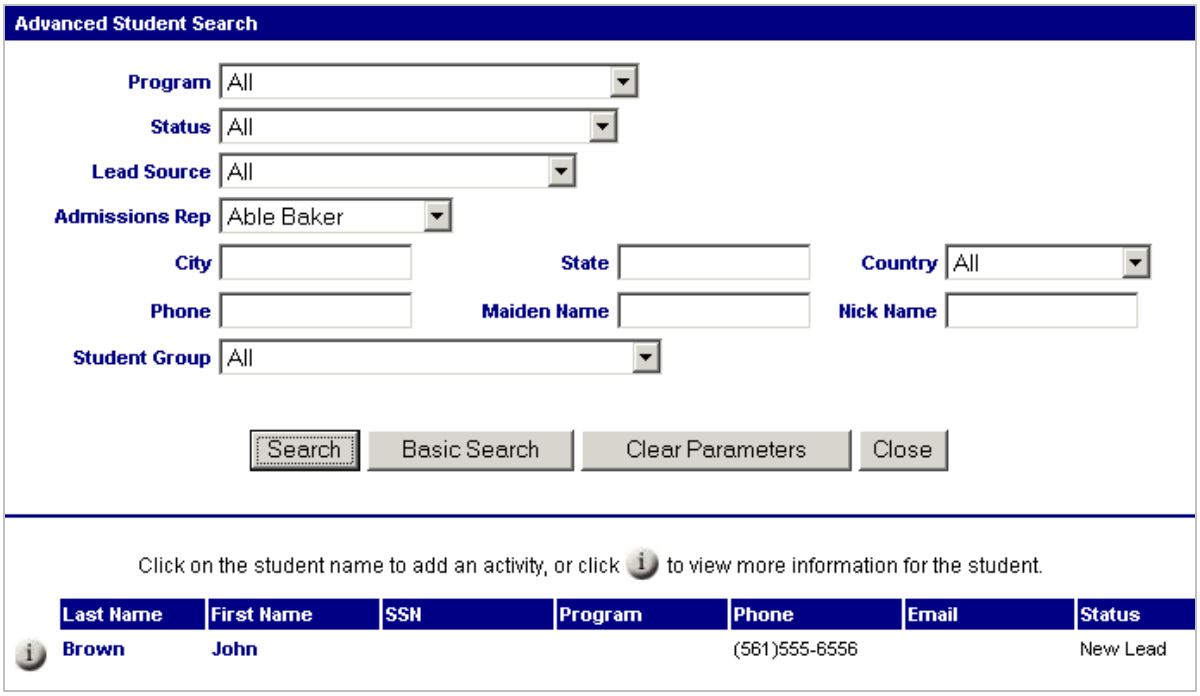
Student Search

The Student Search page offers the same searching features found in CampusNexus Student. The CampusNexus Student security provisions apply here as well.

1. Click **Student Search** from any staff web page. The Student Search page is displayed.



2. Enter the necessary data to find one or more students.
3. If necessary, click **Advanced** to use the advanced search criteria. If you are on the Advanced Student Search page, click **Basic Search** to display the Basic Student Search page. The Basic search parameters and the Advanced search parameters work together as they do in the CampusNexus Student search tool.

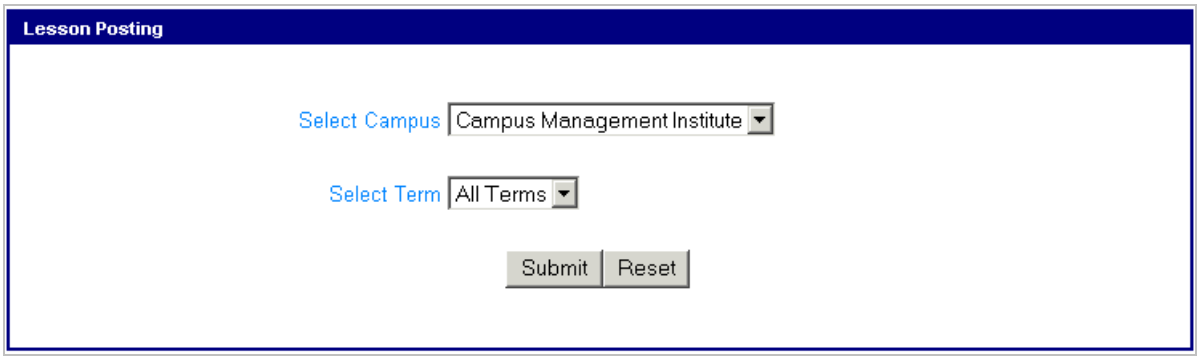


4. Click **Search**. The search tool will find all students in the CampusNexus Student database that match your search criteria.
5. Click beside a student's name to see that student's information page.
6. Click the student's **Name** to add an activity in Contact Manager.

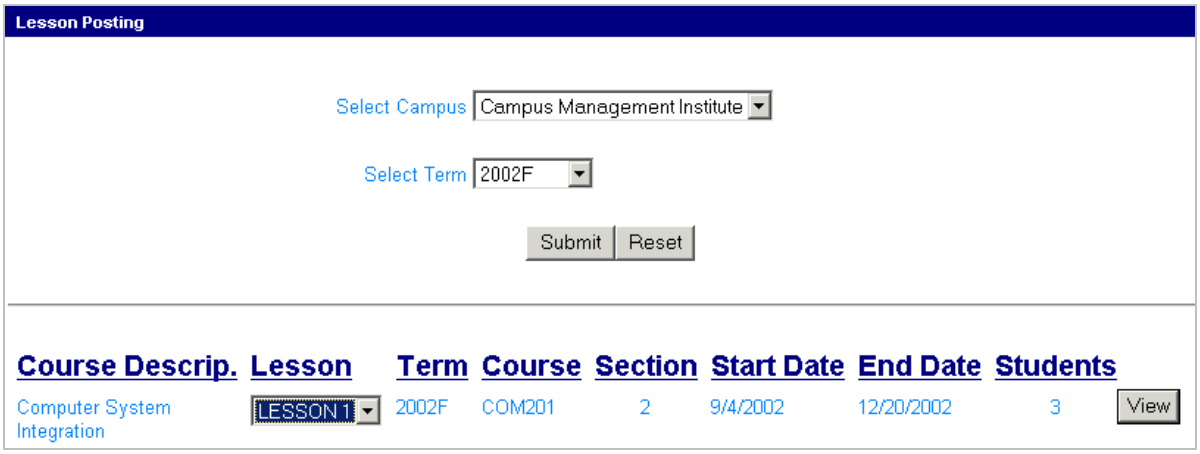
   If the student's name is not highlighted, you do not have permission to add an activity. Contact your system administrator if you need to add student-related activities in Contact Manager.
7. Click **Clear Parameters** to clear the returned student list and the search criteria.
8. Click **Close** to close the search pages.

Lesson Posting

You can view a list of class sections for which to post lessons. The list includes only your courses.

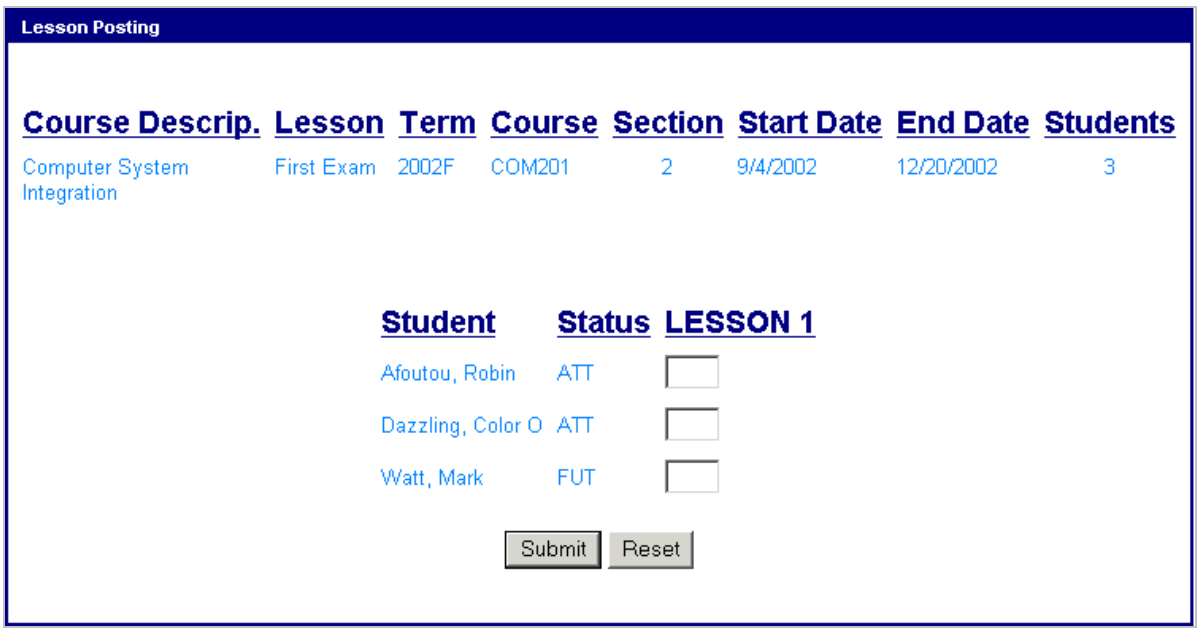


Select a **Campus** and **Term** and click **Submit**. The following form is displayed.



Select the **Lesson** and click **View**.

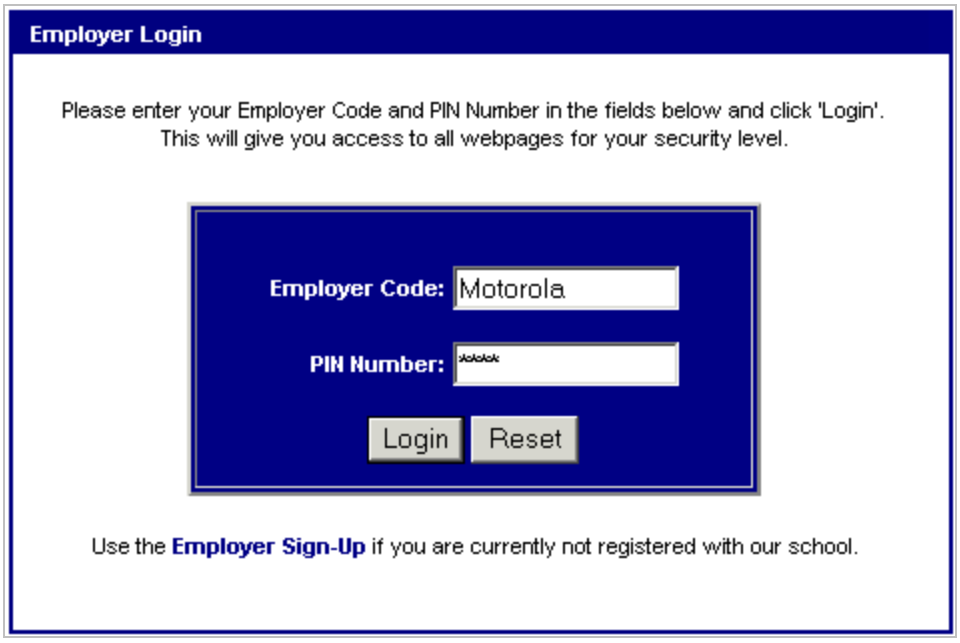
Note: To work with closed terms, select All Terms in the Select Term field.



Enter the lesson **grades** for each student and click **Submit**.

Employer Home Page

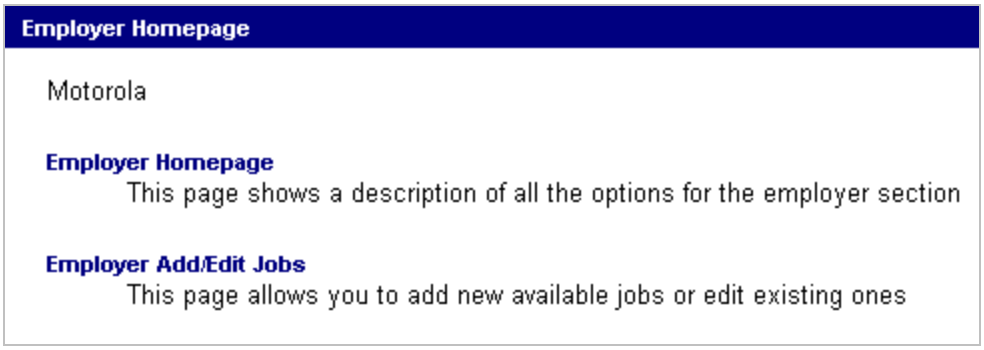
The Employers Login option leads to a login form for your employers.



The Employer Code and PIN are assigned by your institution. If an employer is not currently on the institution's list, the employer can sign up. For more information, see Employer Sign-Up.

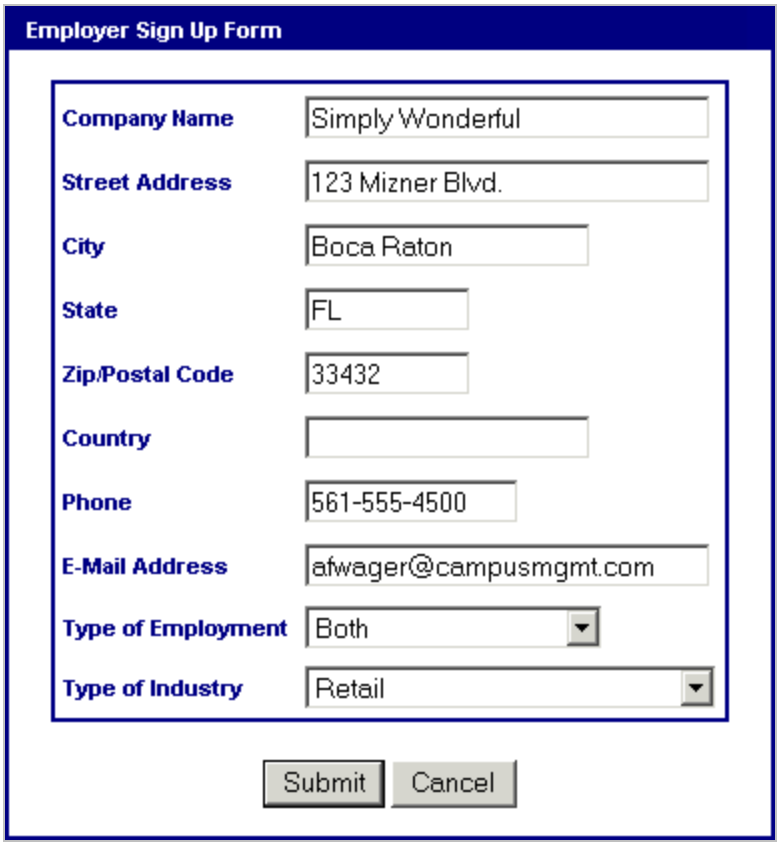
Once an employer has logged in, the Employer Homepage is displayed. Employer services consist of allowing the employers used in your Career Services department to update their job listings–to add, edit, or delete available jobs for graduates, externs, interns, and volunteers.

The Employer Homepage displays the employer's name along with the options for employer activities.



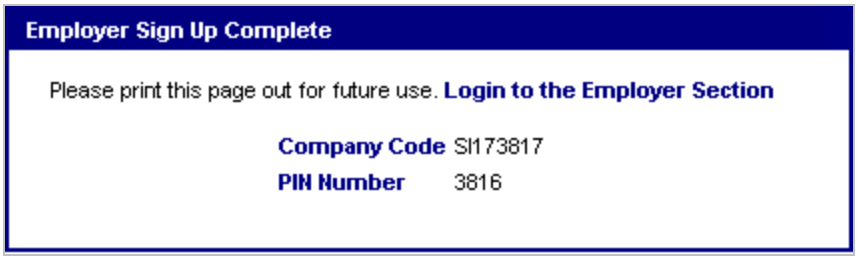
Employer Sign Up

When a new employer clicks **Employer Sign Up** on the login page, the Employer Sign Up Form is displayed.



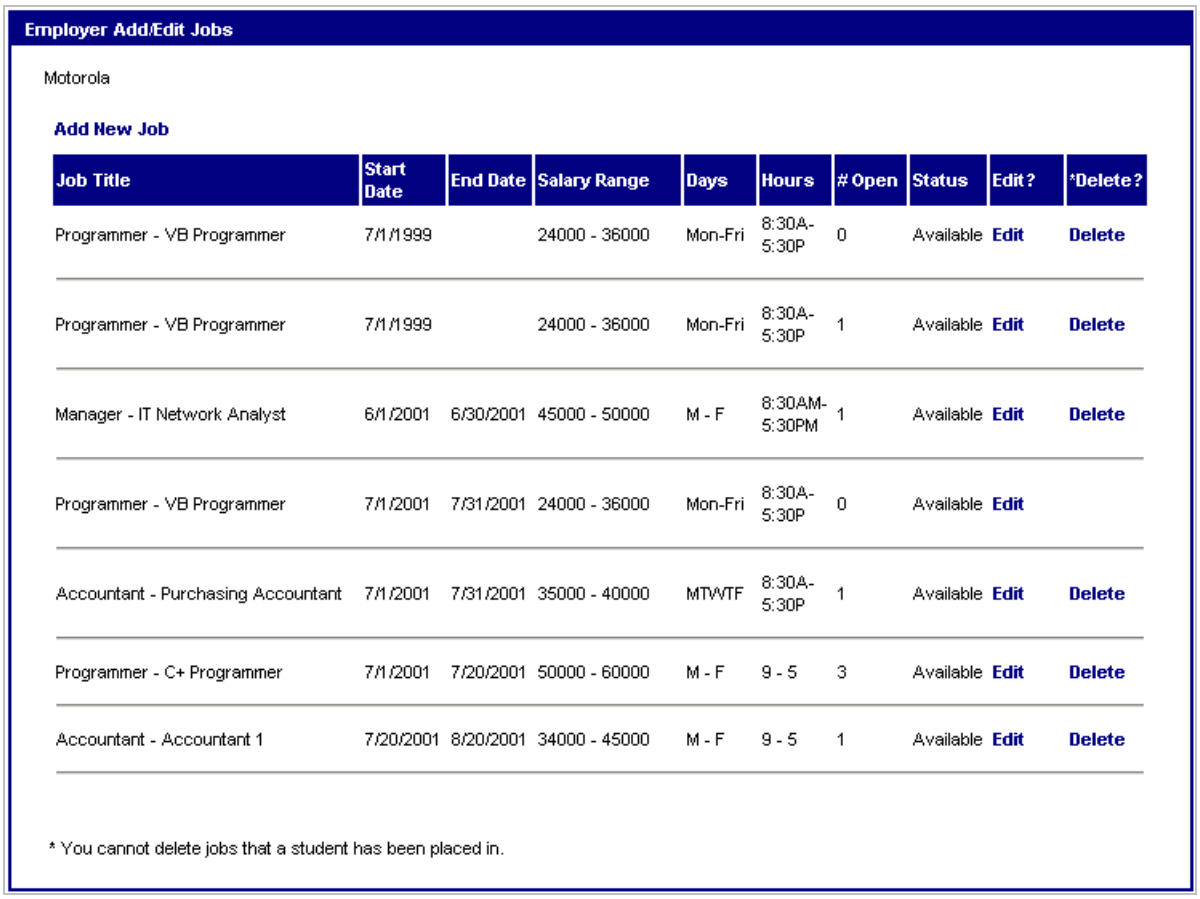
When the employer completes and submits the form, a new employer master record is added to the CampusNexus Student database.

When the data is recorded in the CampusNexus Student Employer database, the new employer's Company Code and PIN are displayed.



Employer Jobs

When the employer selects the Add or Edit Jobs option, a list of jobs from the CampusNexus Student database is displayed. The employer can add new jobs to the listings, edit jobs already on the list, or delete jobs in which students have not been placed.



Employer Add/Edit Jobs

Motorola

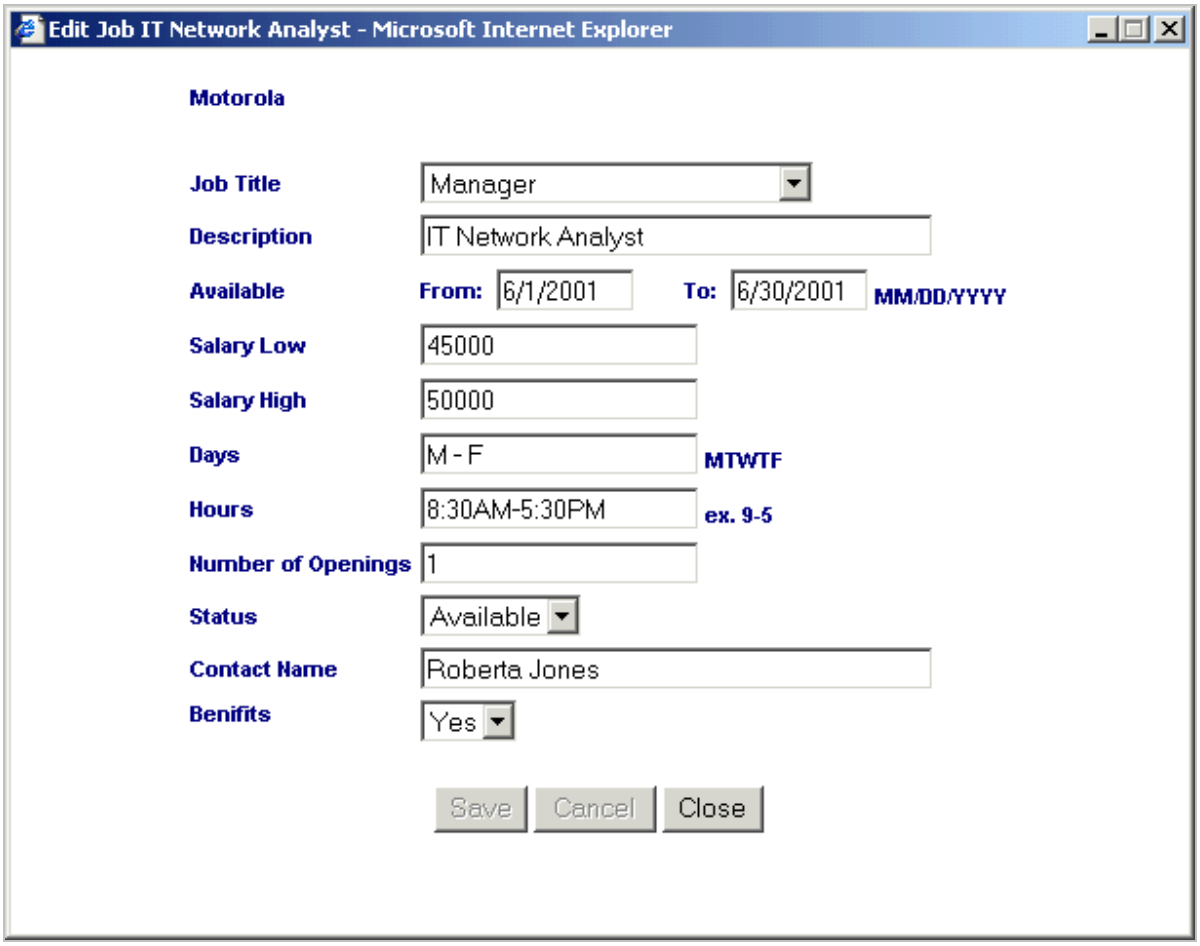
Add New Job

Job Title	Start Date	End Date	Salary Range	Days	Hours	# Open	Status	Edit?	*Delete?
Programmer - VB Programmer	7/1/1999		24000 - 36000	Mon-Fri	8:30A-5:30P	0	Available	Edit	Delete
Programmer - VB Programmer	7/1/1999		24000 - 36000	Mon-Fri	8:30A-5:30P	1	Available	Edit	Delete
Manager - IT Network Analyst	6/1/2001	6/30/2001	45000 - 50000	M - F	8:30AM-5:30PM	1	Available	Edit	Delete
Programmer - VB Programmer	7/1/2001	7/31/2001	24000 - 36000	Mon-Fri	8:30A-5:30P	0	Available	Edit	
Accountant - Purchasing Accountant	7/1/2001	7/31/2001	35000 - 40000	MTWTF	8:30A-5:30P	1	Available	Edit	Delete
Programmer - C+ Programmer	7/1/2001	7/20/2001	50000 - 60000	M - F	9 - 5	3	Available	Edit	Delete
Accountant - Accountant 1	7/20/2001	8/20/2001	34000 - 45000	M - F	9 - 5	1	Available	Edit	Delete

* You cannot delete jobs that a student has been placed in.

Add or Edit Job

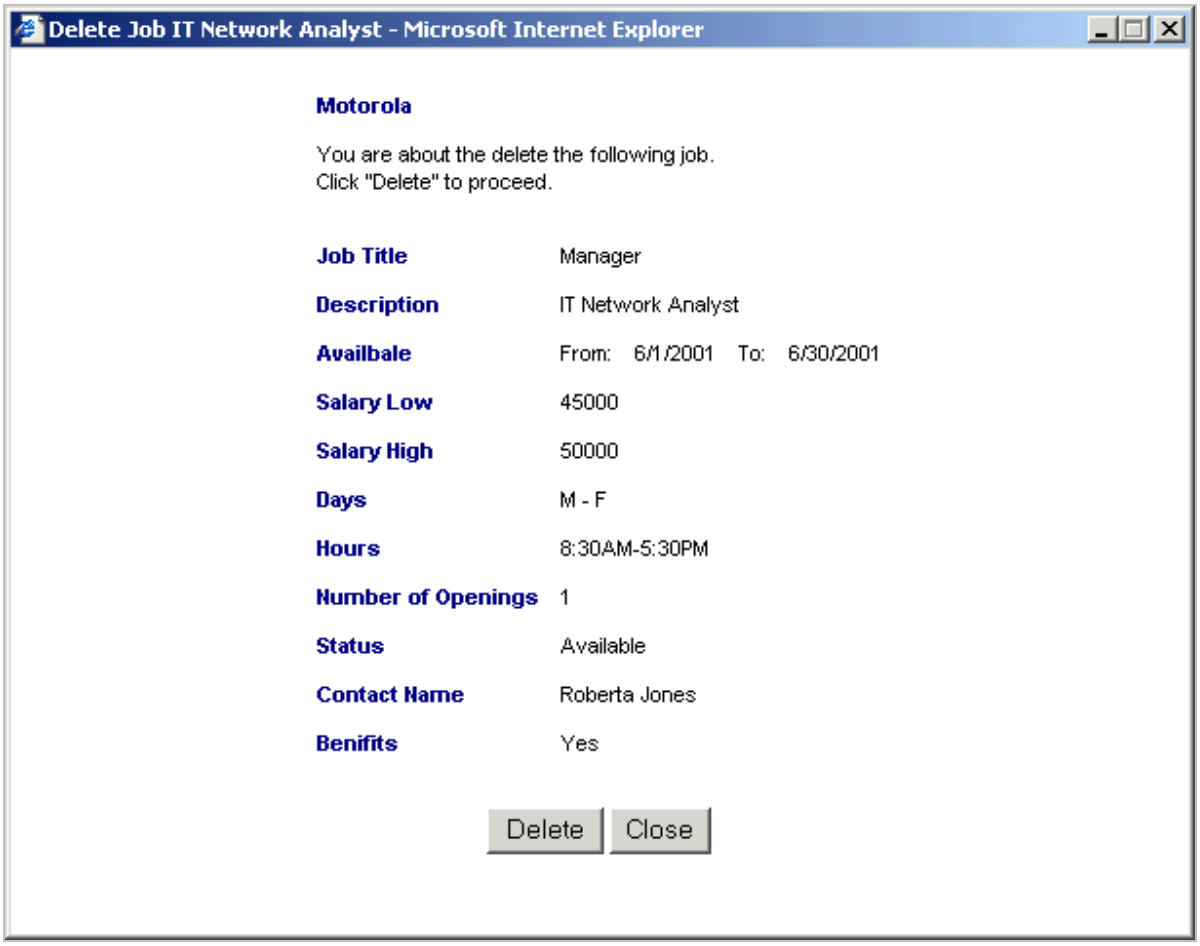
The employer can click **Add New Job**. A blank job editing form is displayed. Otherwise, the employer can click **Edit** on the row of a listed job to view or edit the job details.



The employer completes the job form and clicks **Save** to post the new or edited job. The **Available From and To Dates** refer to the length of time that the job will be open for applicants to apply, not the duration of the job itself.

Delete Job

The employer can **Delete** a job only if a student has not yet been placed in the position. The employment positions have been filled on rows that do not show the Delete option.



Click **Delete** to remove the job opening from the CampusNexus Student database.

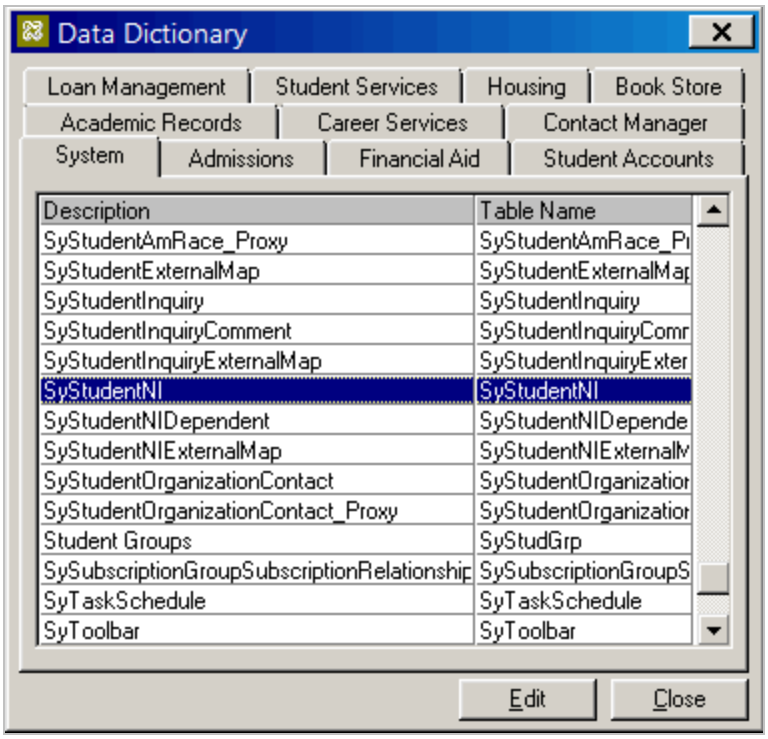
Setup > Data Dictionary

The data dictionary contains descriptions of all data elements used in CampusNexus Student. Each module (e.g., Academic Records, Career Services, etc.) has a list of tables. For each table, there is a list of all columns. For each column, you can control several parameters. You can use the information in the data dictionary when designing custom reports for your institution.

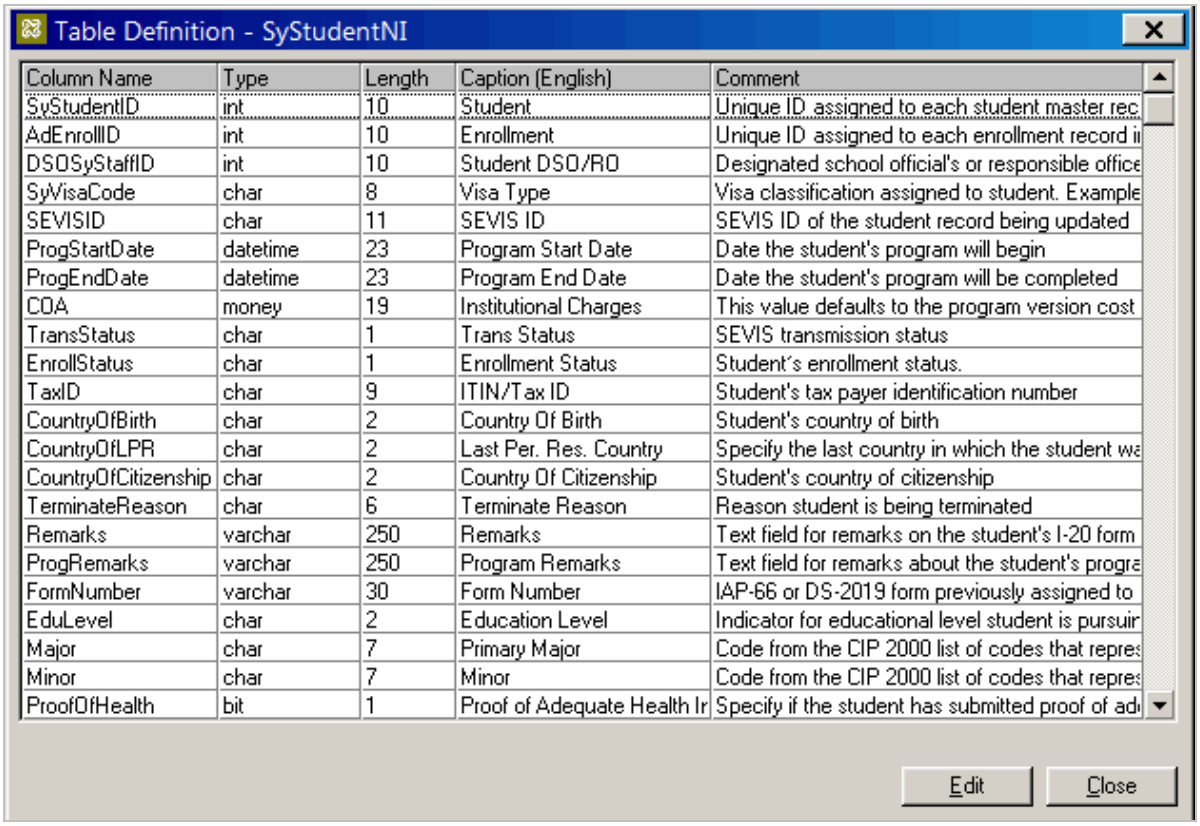
To customize the data dictionary:

1. Navigate to **Setup > Data Dictionary**. The Data Dictionary form is displayed containing a tab for each module.

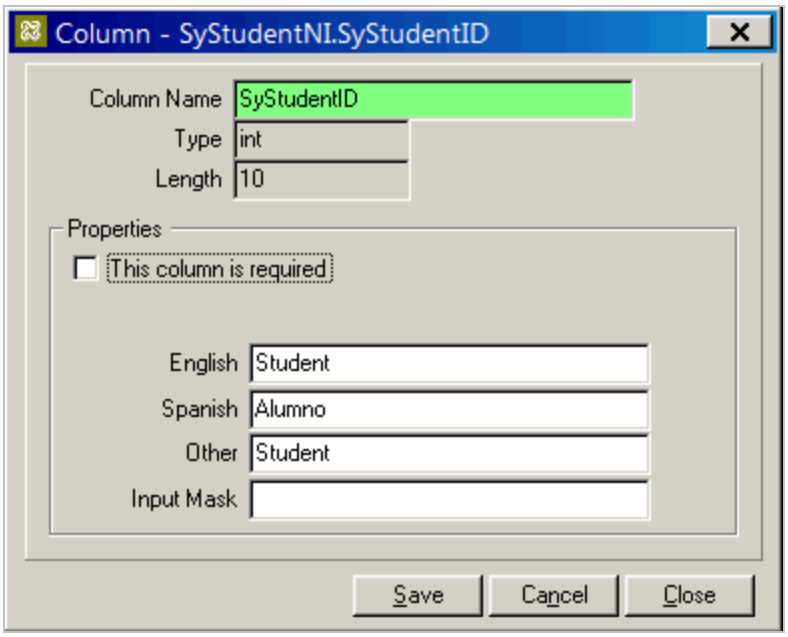
   Each tab represents a list of the tables originated in the module. Tables are only listed once in the data dictionary. If you cannot find the one you are looking for under one tab, check the other tabs. Each tab contains Description and Table Name columns. Click the column headers to sort the fields.



2. Double-click on a **Description**. The Table Definition form for the selected Description is displayed. The form displays the Column Name, Type, Length, Caption, and Comment for each data field. For more information about the data types, see SQL Data Types.



3. Double-click on a row in the Table Definition. The Column definition form is displayed.



4. Specify appropriate options. For more information, see Field Descriptions: Column Definition Form.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Field Descriptions: Column Definition Form

Field	Description
Column Name	This is the name by whichCampusNexus Student identifies this column. It cannot be changed.
Type	This is the type of data stored in this column. It cannot be changed.
Length	This is the length of the column in characters. It cannot be changed.
This column is required	Indicates that the data in this column is required by your institution. If this check box is selected, users must enter information in this column wherever it is displayed in the system. The "required" property can also be specified at the form level. You can change this if necessary.
English Caption	This is the English language caption that is displayed on forms where this column is displayed. You can change the caption if necessary. The language to be used for captions on forms is determined in the System setup form.
Spanish Caption (Español)	This is the Spanish language caption that is displayed on forms where this column is displayed. You can change the caption if necessary.
Other	This is the Other language caption that is displayed on forms where this column is displayed. You can change the caption if necessary.
Input Mask	The input mask determines the format in which data is entered and displayed on forms. An input mask consists of a string of predefined mask characters and literals. Each mask character represents a position in which the user can type a character. Different mask characters allow certain types of input. See the following table for functions of mask characters. The input mask should contain the same number of characters as the length of the field. In the illustration above, the length of the field is 25. Therefore, any mask for this field should contain 25 mask characters. In the case of numeric fields, you want to be sure the mask contains the maximum number of digits that the field can contain. • # - Allows numbers only • & - Allows any character • ? - Allows letters only • A - Allows numbers and letters • U - Allows letters only and makes them uppercase • L - Allows letters only and makes them lowercase • H - Allows hexadecimal values (0-9, A-F only) • \ - Defines a predefined mask characters as a literal • 0-9 - Reserved for user-defined mask characters defined using the **MaskChar** property. A literal is a character or symbol that the user cannot type over. For example, this mask is for a telephone number. (###)###-#### In this example, the parentheses and the dash are literals; they help cue the user about what kind of data to enter. To contain this mask, the field must be a character (varchar) field with a length of at least 13 characters.

SQL Data Types

The Data Dictionary is based on Microsoft's SQL Database Management System. When you access the Data Dictionary and drill down to individual data items, you will see a reference to one of the data types listed in the following table.

SQL Data Types

Type of Data	Base Data Type	Synonyms	Range/Domain	Storage Size
Integer	int	integer	Whole numbers from -2,147,483,648 to 2,147,483,647	4 bytes
Integer	smallint		Whole numbers from -32,768 to 32,767	2 bytes
Integer	tinyint		Whole numbers from 0 to 255	1 byte
Packed Decimal (exact numeric)	numeric (p,s) decimal (p,s)	dec	Whole or fractional numbers from -10^38 to 10^38	2-17 bytes, depending on specified precision, p, which can range to 38 digits. On average, 1 byte of storage is required per every 2 digits of precision.
Floating point (approximate numeric)	float (15-digit precision)	float(n), where n is between 8 and 15 Double Precision	Approximations of numbers from -1.79E308 to 1.79E308 Positive range: 2.23E-308 to 1.79E308 Negative range: -2.23E-308 to -1.79E308	8 bytes
Floating point (approximate numeric)	real (7-digit precision)	float(n), where n is between 1 and 7	Approximations of numbers from -3.40E38 to 3.40E38 Positive range: 1.18E-38 to 3.40E38 Negative range: -1.18E-38 to -3.40E38	4 bytes
Character (fixed length)	char(n)	character (n) character (character without a specific size is synonymous to a 1-character field, char(1))	Up to 255 characters, as designated by the n, of the installed character set	1 byte per character n declared, even if partially unused.
Character (variable length)	varchar(n)	character varying (n) Char varying (n)	Up to 255 characters, as designated by the n,of the installed character set	1 byte per character stored. Declared but unused characters do not consume storage.

Type of Data	Base Data Type	Synonyms	Range/Domain	Storage Size
Monetary	money		Numbers with accuracy to one ten-thousandth of a unit (four decimal places), typically used to store currency values. From -922,337,203,685,477.5808 to 922,337,203,685,477.5807	8 bytes
Monetary	smallmoney		Numbers with accuracy to one ten-thousandth of a unit (four decimal places), typically used to store currency values. From -214,748.3648 to 214,748.3647	4 bytes
Date and Time	datetime		Combined date and time representation. (SQL Server does not have separate DATE and TIME data types.) Date part: 01-JAN-1753 to 31-DEC-9999. Time part: Number of milliseconds since midnight of the given date	8 bytes
Date and Time	smalldatetime		Combined date and time representation. Date part: 01-JAN-1900 to 06-JUN-2079 Time part: Number of minutes since midnight of the given date	4 bytes
Binary (fixed length)	binary(n)		Any binary representation (bit patterns) up to 255 bytes	n bytes, even if n is partially unused.
Binary (variable length)	varbinary(n)	binary varying	Any binary representation (bit patterns) up to 255 bytes	The number of bytes actually stored. No storage for space declared but not used.

Type of Data	Base Data Type	Synonyms	Range/Domain	Storage Size
Long text/BLOB	text and image		Text: Character data up to 2 gigabytes (GB). Image: Binary data up to 2 GB. The text and image data types are always variable length.	If not null, a 16-byte pointer is used on the data page, plus however many 2-KB pages are required to store the actual length. Text and image pages cannot be shared. A single byte entered in a text or image column requires its own 2-KB page (most being unused).
Boolean	bit		0 or 1	Bit data types share a byte with other bit columns of the same table. Hence, 8-bit columns of the same table use one byte of storage. If the table has only 1-bit columns, it still uses 1 byte, although 7 more such columns could be added "for free."

Setup > School Defined Fields

The Setup > School Defined Fields menu option enables system administrators to configure school-defined fields for the following areas:

- Student – Select this menu option to create school-defined fields related to Student records in the following modules:
    - Academic Records
    - Admissions
    - Career Services
    - Financial Aid
    - Housing
    - Loan Management
    - Student Accounts
    - Student Services
- Entity – Select this menu option to create school-defined fields related to the Course entity.

School Defined Fields > Student

You can define data fields that are unique to your operations. Users with appropriate permission can view or edit the student data in school-defined fields by navigating to View > (select a module, e.g., Admissions) > School Fields.

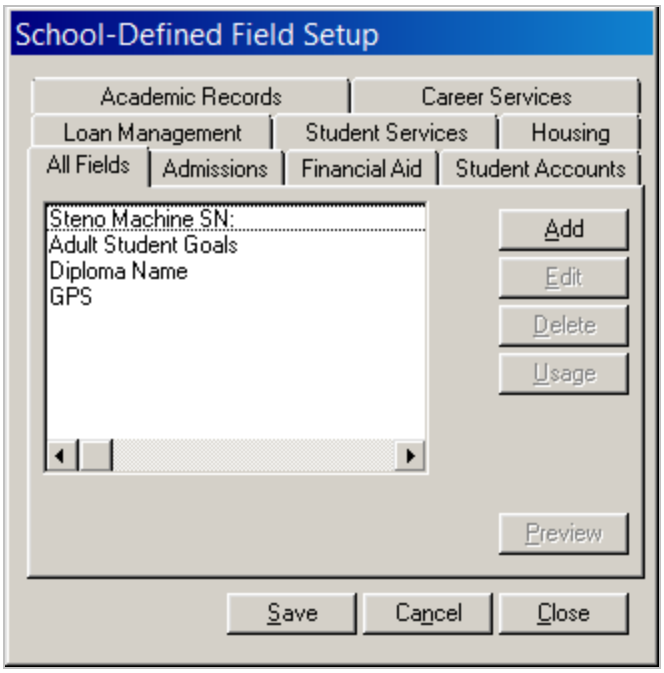
Note: While CampusNexus Student can record your school-defined data, there are no built-in reports for data in school-defined fields. It is your responsibility to create custom reports using Crystal Reports or other tools such as Word and Excel.

To add a school-defined field:

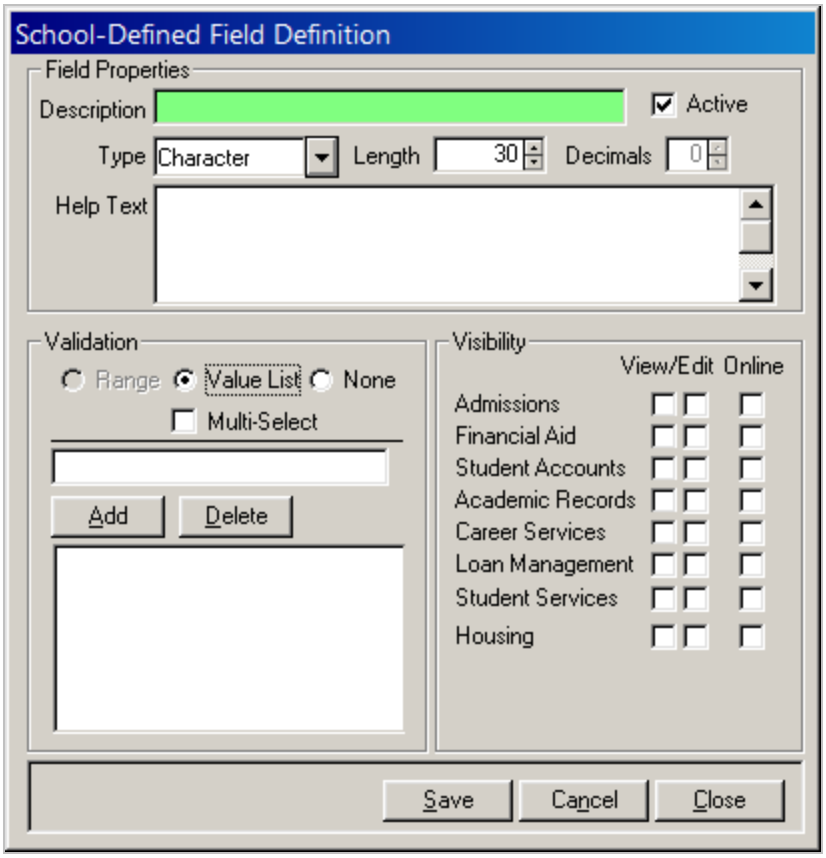
1. Navigate to **Setup > School Defined Fields > Student**. The School-Defined Field Setup form is displayed.

   The All Fields tab lists all fields for all modules. Review this list before setting up a new field to check if it has already been set up.

   Note: The Housing tab is visible only when Housing is enabled in CampusNexus Student.



2. Select the tab of the module for which the new field is being established, e.g., Admissions.
3. Click **Add** or press **Ctrl+N**. The School-Defined Field Definition form is displayed. It contains default values for status (Active), data Type (Character), Length (30), and Validation (None).



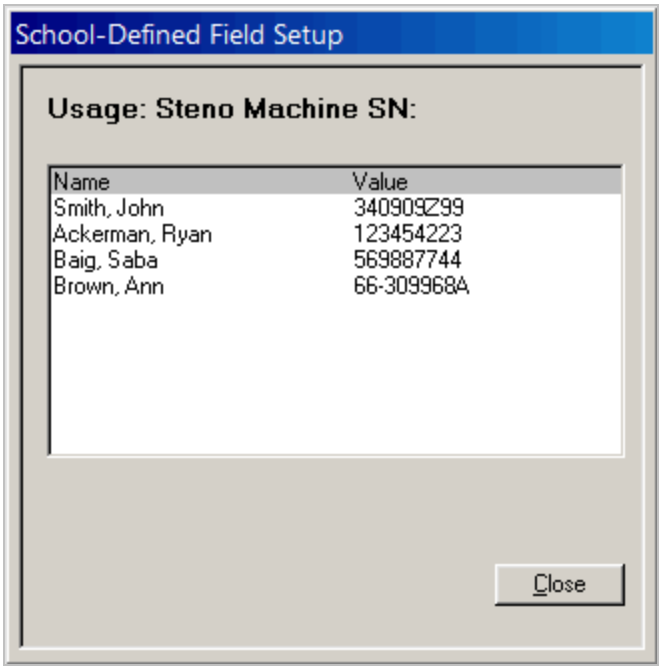
4. Specify appropriate options.

Field Descriptions

Field	Description
Description	Description of the school-defined field.
Active	Indicates whether the field is active.
Type	The following data type options are available: • Character – any alphabetic, numeric, or punctuation character. Maximum length: 4000 characters. • Numeric – only numbers and the plus (+) or minus (-) sign. Maximum length: 12 digits. Maximum decimal places: 4. • Date – automatically set up for 8 characters. You can enter dates in any date format, for example, 11/15/2001.
Length	Specify the length of the school-defined field.
Decimals	Specify the number of decimal places for a numeric field.

Field	Description
Help Text	Help text that is displayed when the field "has focus" on a form. **Note**: The French Student Master uses some of the Help Text fields for customized program purposes. These can be recognized by their *InitCapNoSpaces* syntax. Modifying these Help Text fields causes the French Student Master to work improperly. This is not a problem for Long or Short Student Masters.
Validation	The following validation options are available: • Range – This option is available for numeric values. Specify the lower limit in the **From** box and upper limit in the **To** box. • Value List – Specify a value in the text box and click **Add** to add it to the list of acceptable values. To remove a value from the list, select the value and click **Delete**. • If Value List is selected, the Multi-Select option is enabled. The Multi-Select Value List allows you to select more than one item from the list defined for the school-defined field. • None – Select this option if validation is not required.
Visibility	Select appropriate check boxes to make the field viewable and/or editable and to make the field available online from Portal.

5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the School-Defined Field Setup form.
6. Click and to adjust the position of the fields on the form. The position of a field may vary according to the module from which it is being viewed.
7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.
8. Click **Preview** to preview how the field will look on the data entry form.
9. Click **Usage** to view how a field is being used in CampusNexus Student.
10. A confirmation message is displayed. Click **Yes**. A detailed list of the students who have data in the selected school-defined field is displayed.



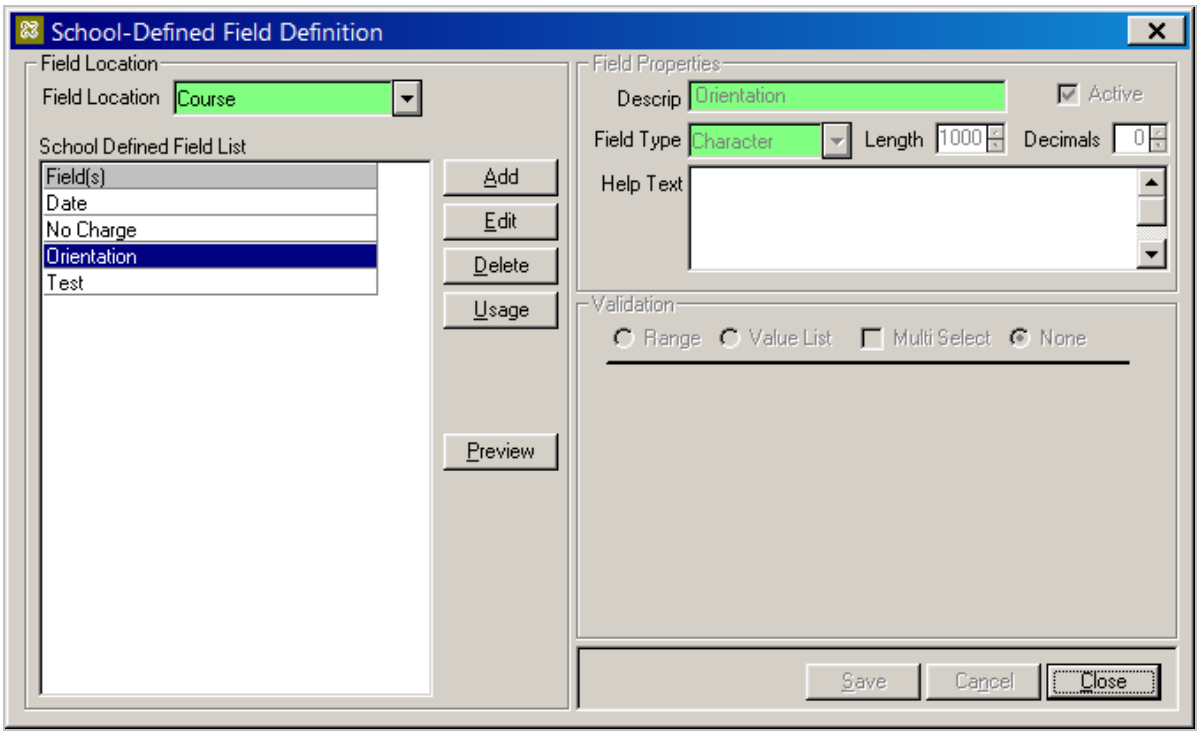
11. Click **Close** to close the form. You are returned to the School-Defined Field Setup form.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

School Defined Fields > Entity

The School-Defined Field Definition form enables system administrators to configure school-defined fields for the Course entity. The school-defined fields will appear on the Other Info tab of the Courses Code Setup form (Lists > Academic Records > Courses > Add/Edit > Courses Code Setup).

To configure a school-defined field for the course entity:

1. Navigate to **Setup > School Defined Fields > Entity**. The School-Defined Field Definition form is displayed.



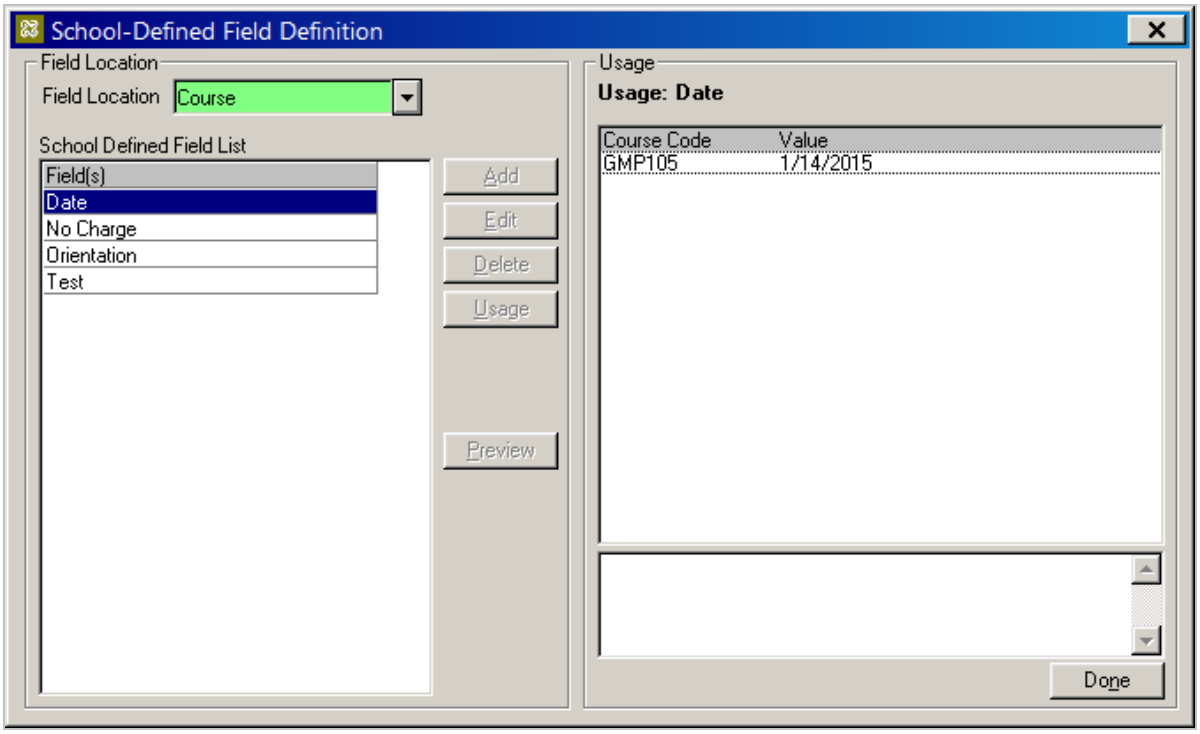
2. The **Field Location** field currently contains only one option: Courses.
3. Click **Add** to add a field.
4. Enter a **Description**.
5. Select the **Field Type**. The options are:
   - Character – any alphabetic, numeric, or punctuation character. Maximum length: 1000 characters.
   - Numeric – only numbers and the plus (+) or minus (-) sign. Maximum length: 9 digits including decimals.
   - Date – automatically set up for 8 characters. You can enter dates in any date format, for example, 11/15/2001.
6. Select the **Validation** method. The options are:
   - Range – This option is available for numeric values. Specify the lower limit in the **From** box and upper limit in the **To** box.
   - Value List – Specify a value in the text box and click **Add** to add it to the list of acceptable values. To remove

a value from the list, t, select the value and click **Delete**.

- If Value List is selected, the Multi-Select option is enabled. The Multi-Select Value List allows you to select more than one item from the list defined for the school-defined field.
- None – Select this option if validation is not required.

7. Specify **Help Text** that is displayed when the field "has focus" on a form.
8. Click **Save**. . Notice that your new school defined field is now displayed in the School Defined Field List.
9. Select the field in the School Defined Field List and click **Usage**.

   If the field is used, you are prompted to view the details. When you select Yes, the records using this field and associated values are displayed. Click **Done** to return to the previous form.



10. Select the field in the School Defined Field List and click **Preview**.

    The Preview form displays the location of the controls for the fields added under the specific field location. Click **Close** to return to the previous form.

11. Manage the saved fields on this list by using the **Edit** and **Delete** buttons.

    If you try to edit or delete one of the listed saved fields, and that field is used by any course, a warning message is displayed. If you choose to continue with the action, the saved field's values are also edited or deleted from its related field locations.

Setup > Required Fields

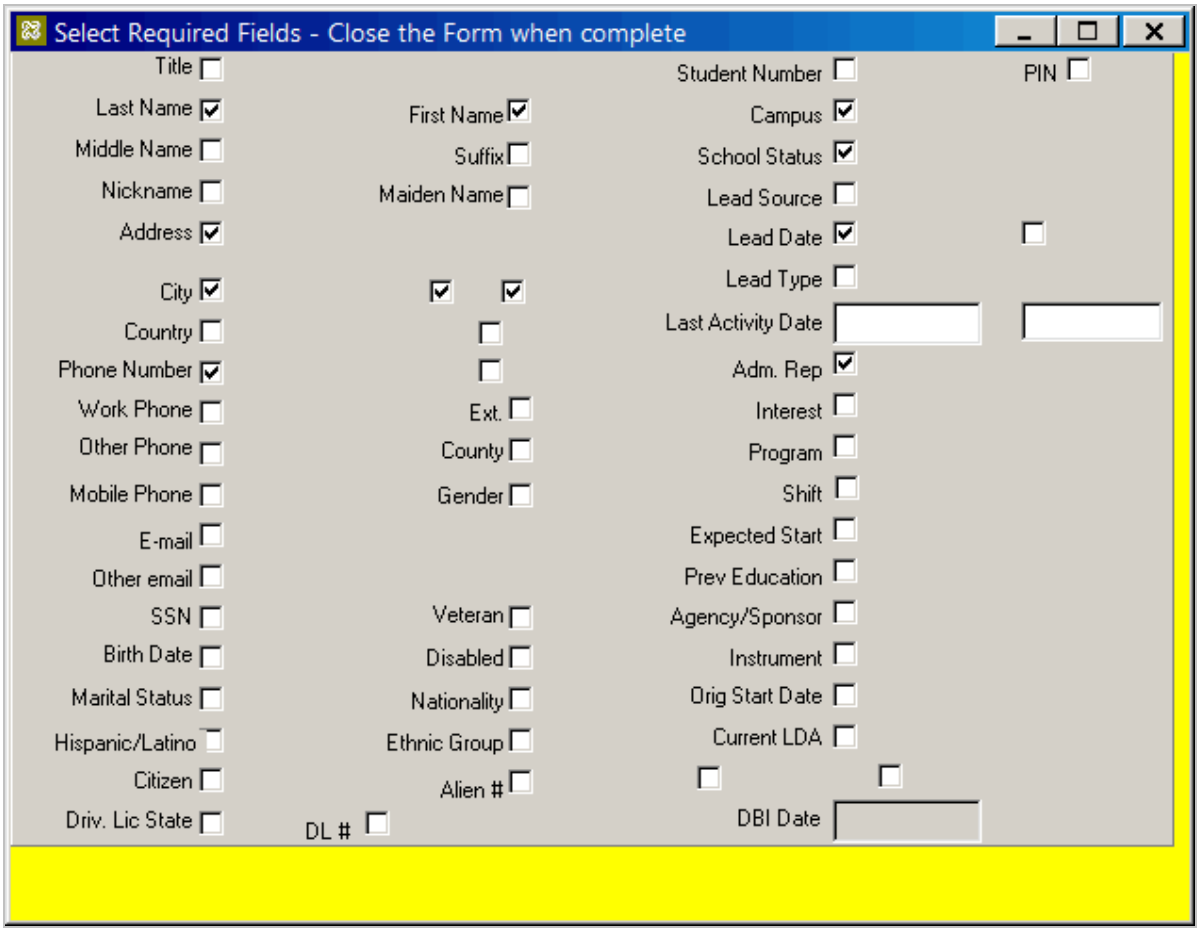
CampusNexus Student contains three kinds of required fields:

1. Fields that are required by CampusNexus Student for proper operation. You cannot change the characteristics of these fields or to make them optional.
2. Fields that are marked as required by your institution in the Data Dictionary. These fields are required to have data in them no matter where they are used.
3. Fields that are marked as required by the institution on certain data entry forms. For instance, those that are required on the Student Master form, but not on the Quick Lead Form. You can mark data entry fields, for example, telephone numbers, date-of-birth, ethnic group, etc., as being essential to your operations even though they are not required for basic CampusNexus Student operation.

This topic covers the third kind of required field.

To set up required fields on a form:

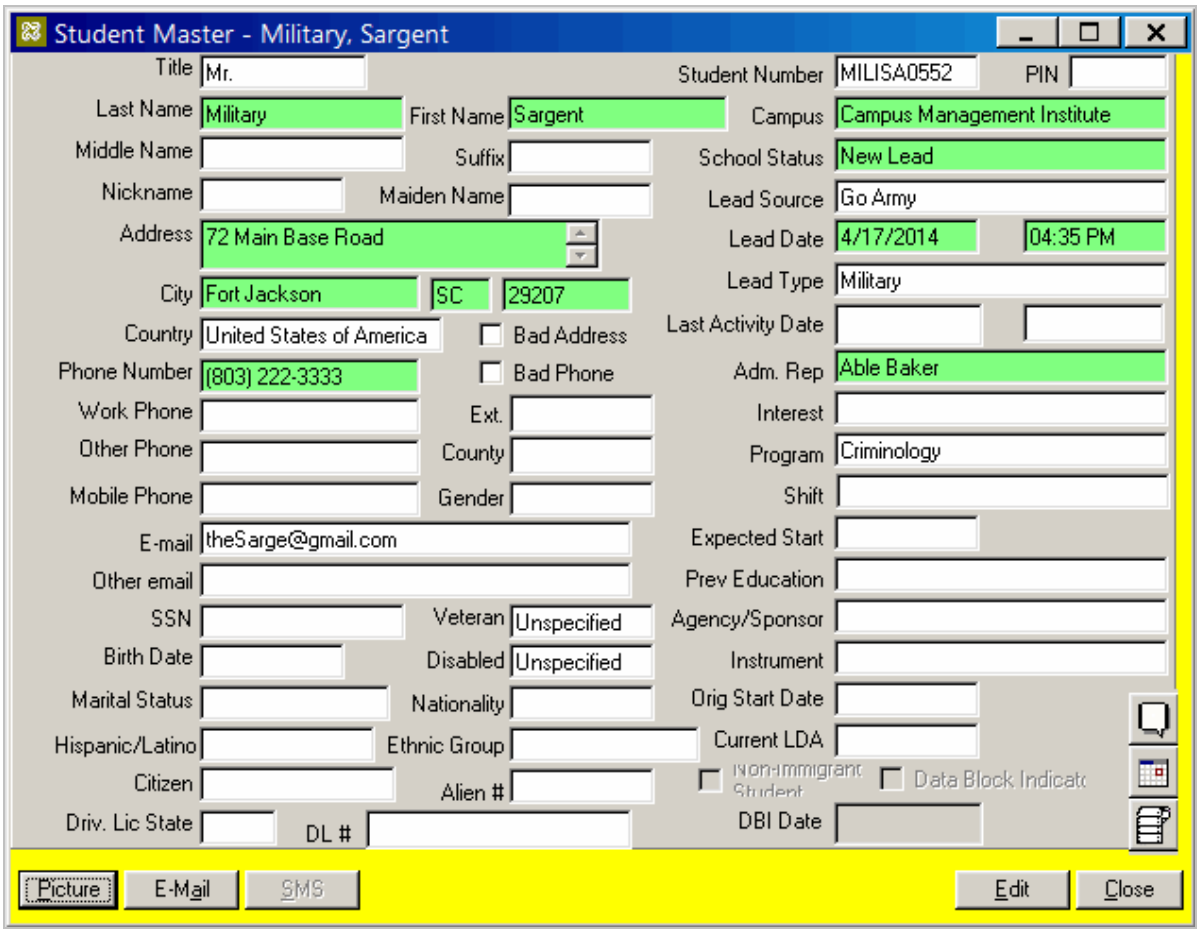
1. Open the desired form. For example, open the Student Master form for any student, or press **Ctrl+N** to open a blank one.
2. Navigate to **Setup > Required Fields**. The Select Required Fields form is displayed. It contains a representation of the selected form showing check boxes for each field.



3. Select the fields you want to be required. A check mark next to a field name means that when the form is being edited, the field must have data in it before the form can be saved. Unless other specific validation rules apply, any non-blank character(s) in the field are enough to satisfy this requirement. In the example, the Postal Code and Telephone (home) have been selected.

   Note: By requiring the Postal (ZIP) Code you will automatically also get the City and State because CampusNexus Student will fill them in when the ZIP code is entered.

4. When you have selected or cleared the necessary fields, click ☒ to close the form and save your settings. The next time the form is opened the required fields will have a colored background.



Notes:

- Set up a background color to identify the required fields on all forms by navigating to Setup > System > General tab. Double-click Required Fields Color to access the color selection dialog box.
- The required fields on the Quick Lead form are not necessarily the same as those on the Student Master form. See the Quick Lead Form Design feature under Setup > Admissions.

Setup > Field Level Security

Field level security enables you to control who can view and/or change fields on the forms. If you choose not to expose some data to certain persons in your organization, you can establish a staff group for those persons. Then, you can designate certain fields to be unavailable to members of that group. Such fields will be blank when viewed by members of the group. No indication as to the length or content of the data in the field will be visible.

Comparison of security between field level security and the primary security feature:

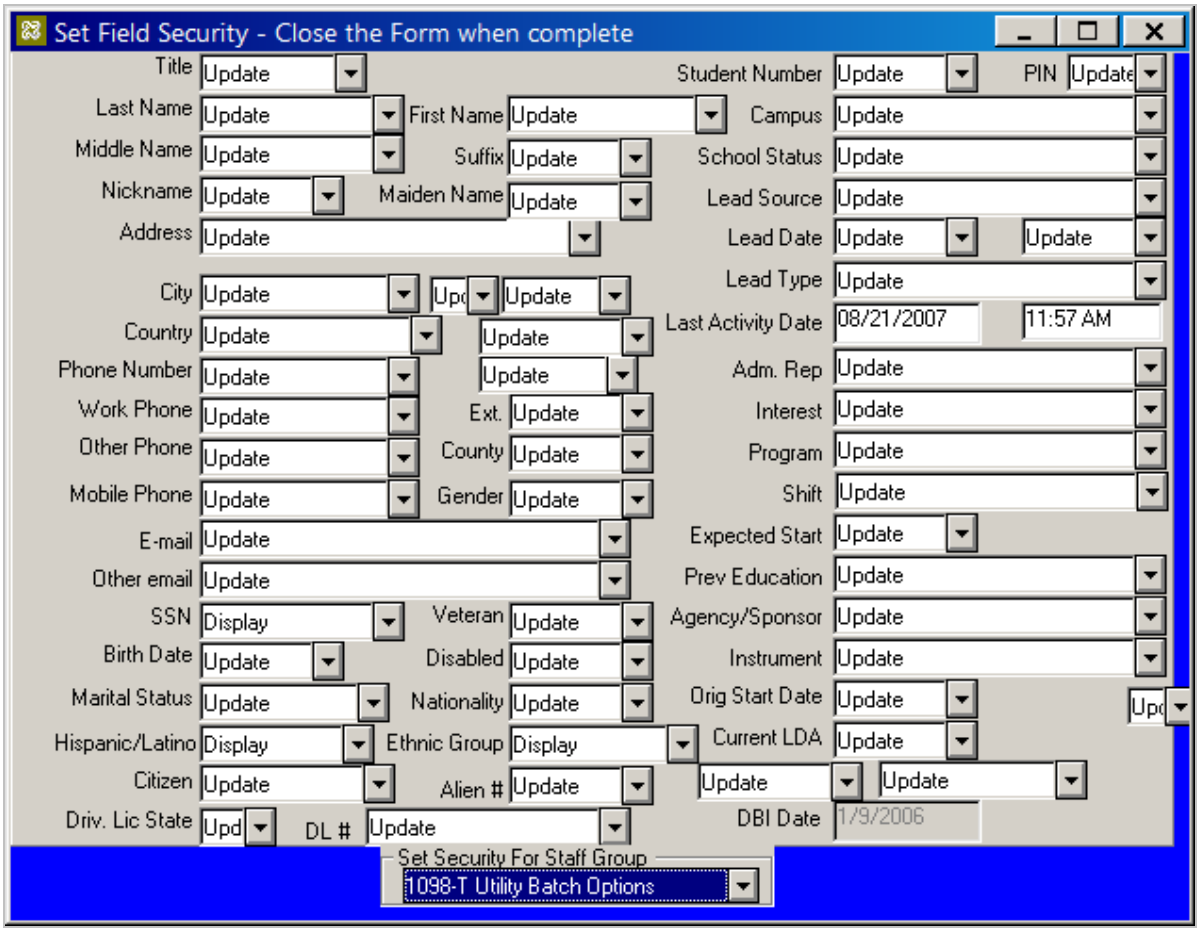
- **Setup > Security**: Users assigned to multiple groups receive the **least** restrictive level of security granted in any group to which they have been assigned. For example, a staff member who has read-only capability in the instructor group and edit capability in the advisor group, will have edit capability in the instructor group.
- **Setup > Field Level Security**: Users assigned to multiple groups receive the **most** restrictive level of security granted in any group to which they have been assigned. For example, a staff member who has read-only capability in the instructor group and edit capability in the advisor group will have read-only capability in the instructor group.

The 'Field Level Security Mode' setting on the System Settings form determines how field level security behaves when a user belongs to more than one staff group and each group has different levels of field-level access.

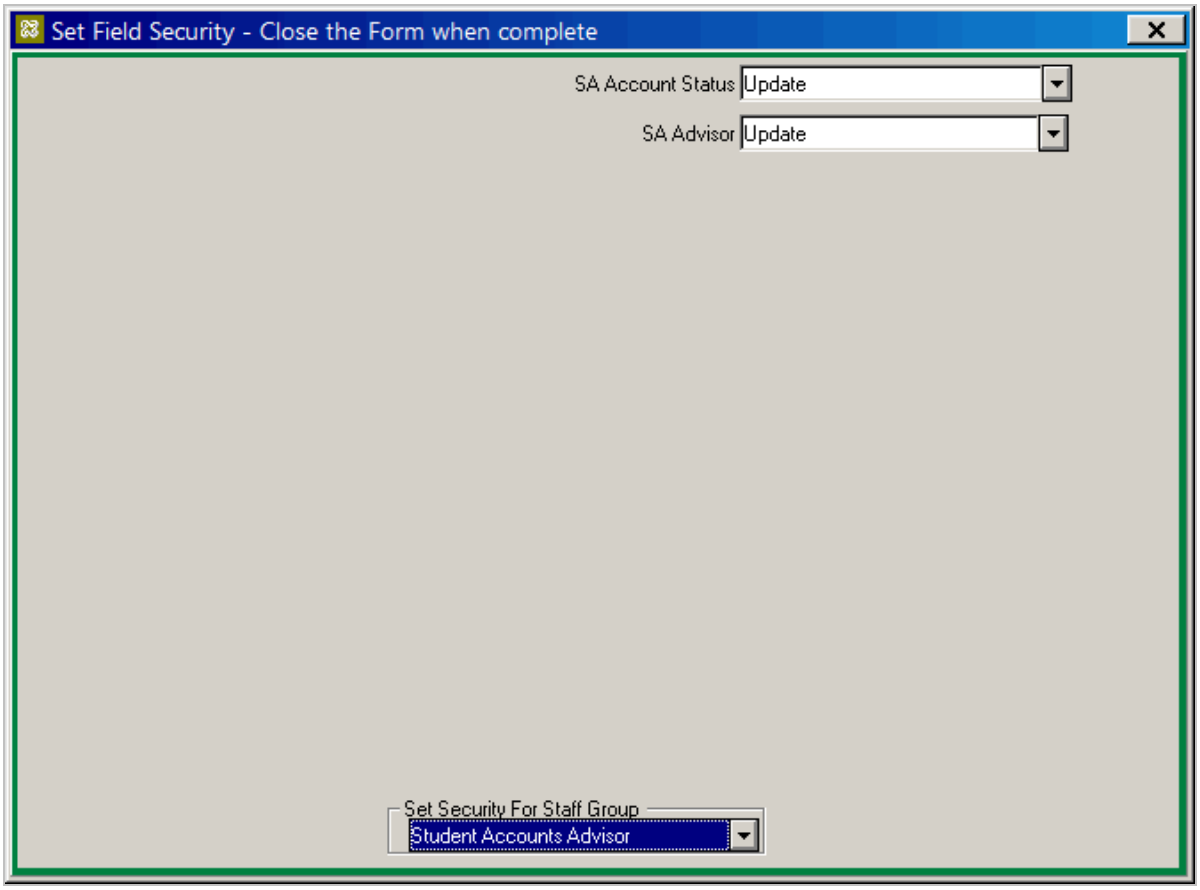
To configure field level security:

1. Open the desired form, for example, Student Master.
2. Navigate to **Setup > Field Level Security**. The Set Field Security form is displayed. It contains a representation of the selected form showing list boxes for each field and a list of staff groups in a list box. The settings for each field are initially displayed as *Update*.

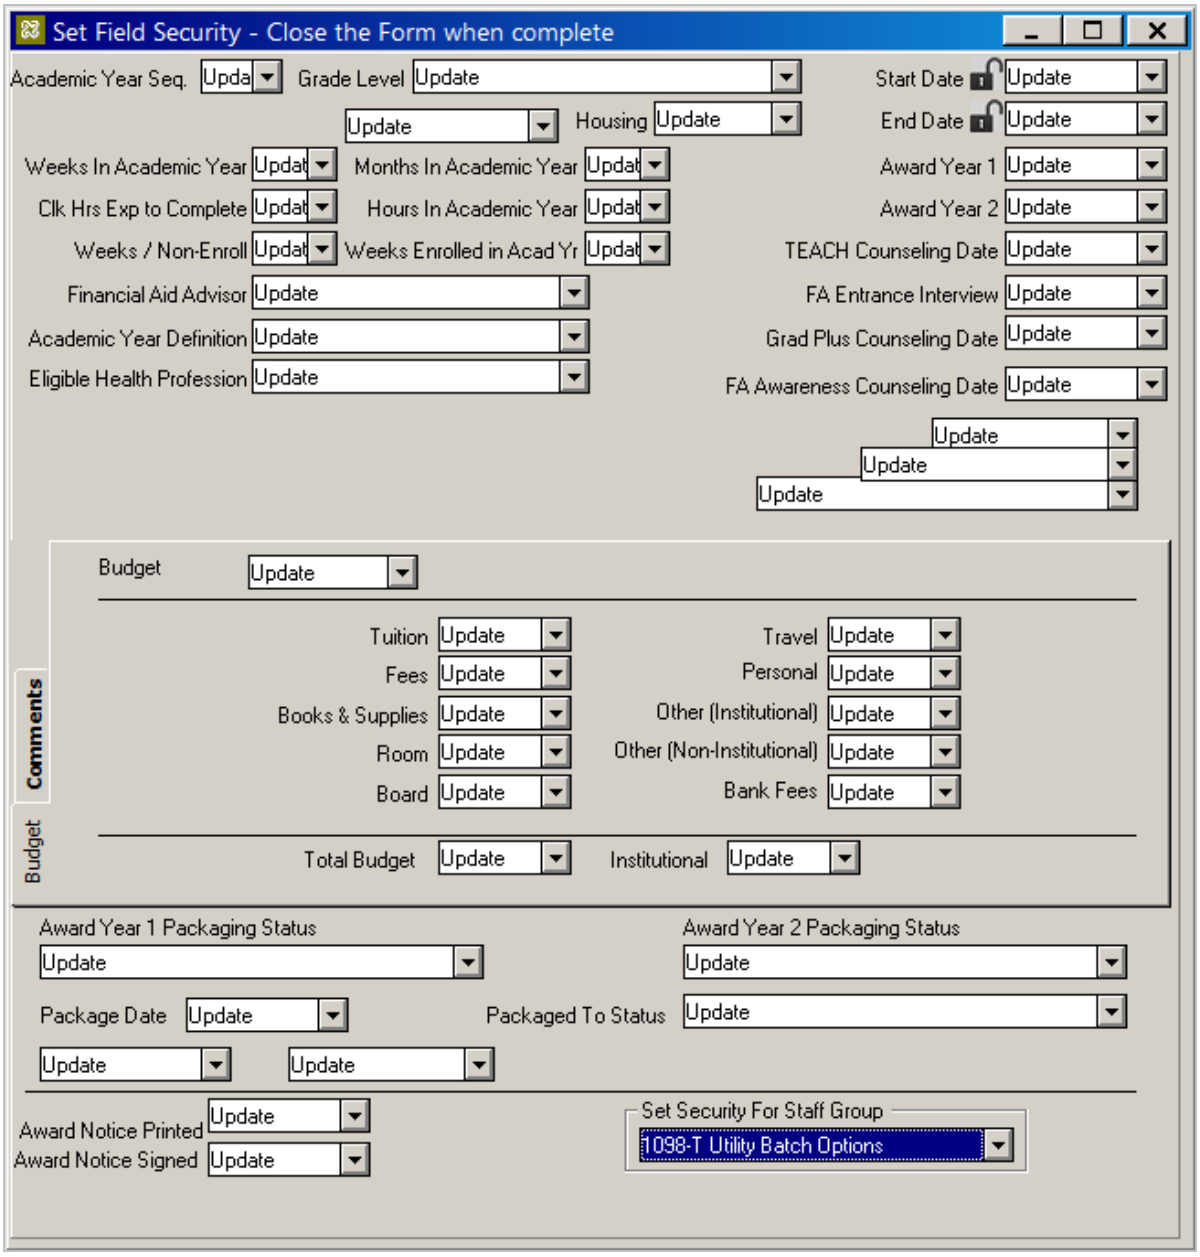
Field level security for Student Master form



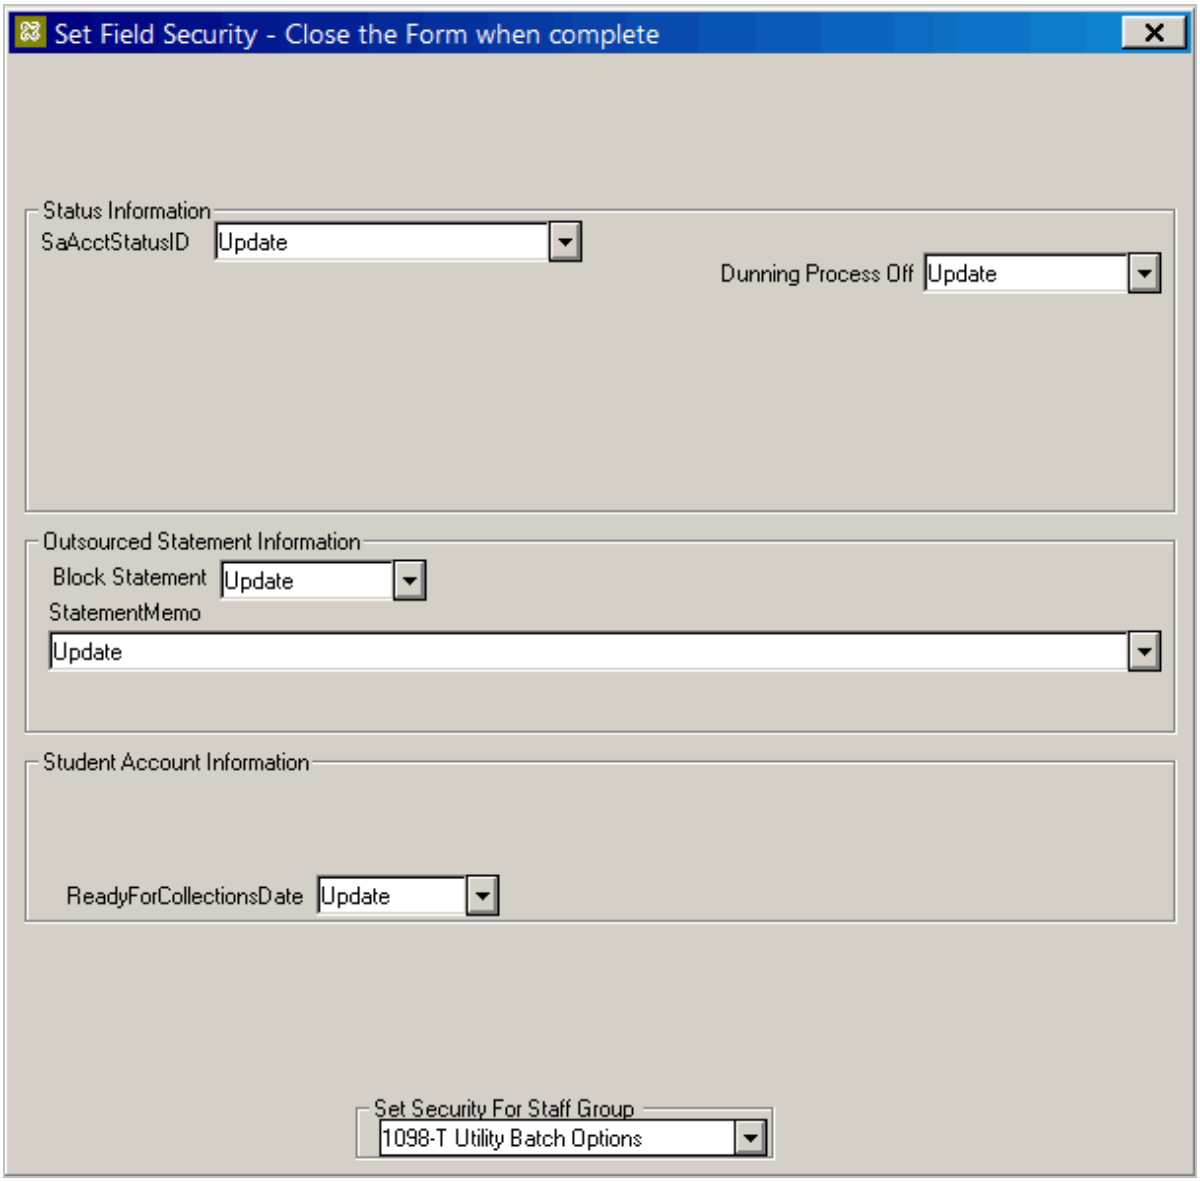
Field level security for Student Ledger Card form



Field level security for Financial Aid Academic Year form



Field level security for Collections form



3. From the **Set Security For Staff Group** list, select the staff group for which you want to set field level security.
4. Select one of the following permissions for each field:
   - **Update**: The field can be displayed and changed by the members of the selected group.
   - **Display** (default): The field can be displayed but not changed by the members of the selected group.
   - **None**: The field cannot be displayed or changed by the members of the selected group.
5. When you have set the security options for the necessary fields and for each staff group, click to save your settings. When the form is closed, the field level security records for the group are written to the database.

Follow this procedure or every staff group to establish the baseline field level security records.

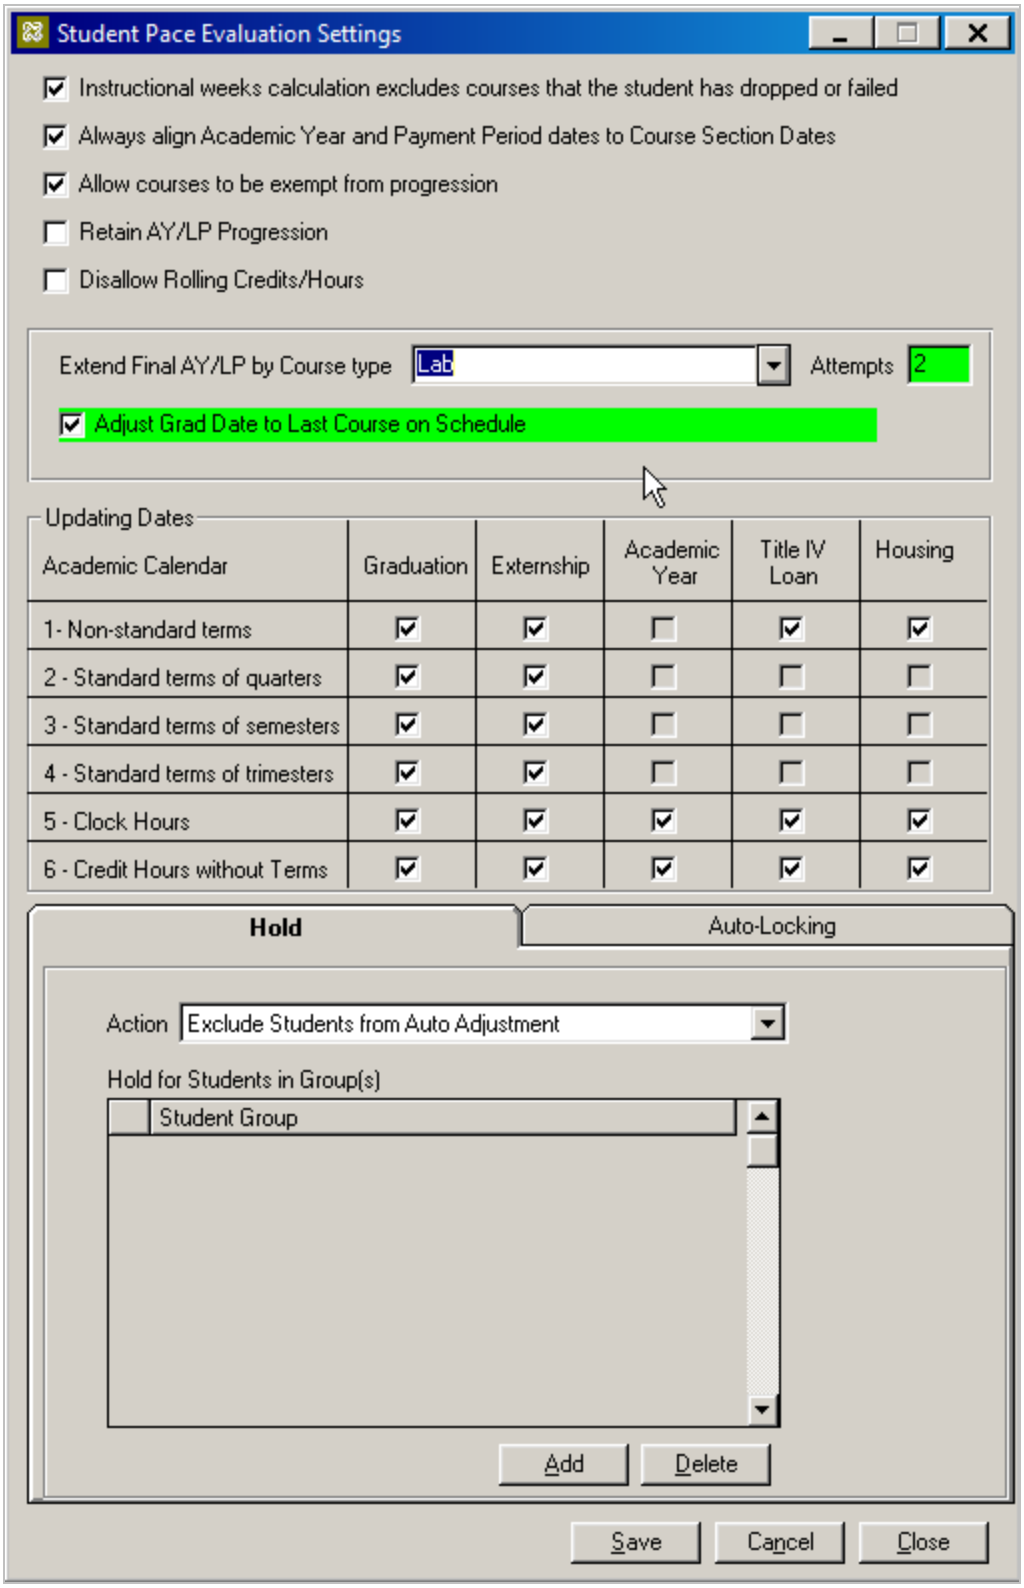
Setup > Student Pace Evaluation Settings

The Student Pace Evaluation Settings form is a central location for all date configurations the Student Pace Evaluation (SPE) tool uses when updating student dates. The dates affected include:

- Graduation
- Externship
- Academic Year
- Title IV Loan Period
- Housing Lease

To configure student pace evaluation settings:

1. Navigate to **Setup > Student Pace Evaluation Settings**. The Student Pace Evaluation Settings form is displayed.



2. Specify appropriate options. For more information, see Field Descriptions.
3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Field Descriptions

Field	Description
Instructional weeks calculation excludes courses that the student has dropped or failed	When this option is selected, a student's dropped or failed courses are not included in the Instructional Weeks (IW) calculation.
Always align Academic Year and Payment Period dates to Course Section Dates	When this option is selected, the payment period ends on the course section end date, and the next payment period start on the next day if a course is current. If no course is current, the next payment period starts on next course start date. A retake course is allowed to start a subsequent payment period even if the prior instance of the course earned the credits or hours; however, the credits or hours and weeks would not count toward progression of the payment period.

Field	Description
Allow courses to be exempt from progression	This configuration allows the SPE tool to measure student progression using only courses that are part of the program version course list and meet a minimum grade point if configured. If no minimum grade point is configured, a course with a posted grade uses the “Credits Earned” flag to determine if the course meets progression requirements. Financial Aid officers will see that non-term Students can now register for courses outside their program requirements without affecting the timing of Title IV disbursements. **Important Note**: With this flag enabled, CampusNexus Student uses the Enrollment Status Credits (Hours) value instead of the Credit or Hours value of the course. This applies to transfer credits, CLEP courses, etc. when building remaining academic years and loan periods to complete the program version requirements. CampusNexus Student tracks an SPE start date which is the latest of the following dates (Program Version Start Date (if blank, Exp. Start Date), Area of Study (AOS) transfer complete, Reentry > 180). There is an SPE flag on the student schedule where CLEP or Transfer credits/hours, as well as associated course work with passing grades and meeting any minimum grade point requirements that are before the SPE start date, are flagged as “R” which reduces the number of credits needed to complete after the SPE start date. Associated course work after the SPE start date and any courses on the schedule that meet the program requirements are used for progression “Y”. Courses not meeting program requirements are flagged as “N”. When this feature is enabled on the SPE tool and a student takes a course that is not configured in the Program Version Course List to apply to the pace progression criteria, the SPE tool ignores the course when calculating academic year (AY) and payment period (PP) dates, and makes adjustments based on the information associated with the next scheduled course that applies to the student's program version. Also, if a posted final grade for a course does not meet the minimum grade point criteria established on the Program Version Course List, the course is not considered when progressing the student through the student's program version. CampusNexus Student also uses this criterion when determining the graduation date for the student. **Note**: • Registrars with permissions on the User Info tab - Academic Records can override the system evaluation of these courses, regardless of the course category or minimum grade point requirements. • You can change a Course Category using the DPA fulfillment logic and move a course to Taken Not Applied to change how the SPE tool evaluates the course. See Working with the Degree Progress Audit (Edit Mode). After the "Allow courses to be exempt from progression" check box is selected, the following message is displayed: *The system has detected auto locking is not enabled. Enabling Course Progression could affect the dates of completed Academic Years and Loan Periods. It is strongly recommended that all prior completed Academic Years and Loan Periods be locked prior to enabling this feature. For more information, please read Help for configuring the "Auto Locking" feature.*

Field	Description
Retain AY/LP progression	This setting indicates that confirmation is to occur on Academic Year/Loan Period (AY/LP) sequence attributes (credit/hours and weeks). When "Allow courses to be exempt from progression" is enabled, AY/LP evaluation logic **must use the enrollstatuscredits/hours value** from all course work linked to the enrollment that would reduce the credits/hours needed to complete the enrollment. Performing an Area of Study change that would not include course work from the prior Area of Study (AOS) or Program Version (PV) that resides in a completed payment period. The "Retain AY/LP progression" check box must be selected to initiate this logic. The AY/LP logic uses a centralized function to determine if a course is used to progress the student for the PV/AOS of the new enrollment after a transfer or the new AOS when an AOS change is performed. When Course progression is turned on Total credits completed = course work that would progress the student (function returns “R” and uses Enrollment Status Credits value) + transfer credits(also use enrollment status credits) + CLEP courses (also use enrollment status credits). The number of AY/LP sequences needed is adjusted to meet Credits Required - total enrollment status credits completed.
Disallow Rolling Credits/Hours	When this option is selected, schools can progress the Academic Year (AY) and associated Payment Periods using the same logic as the Loan Period (LP) and associated Loan Payment Periods. This means the dates for Academic Years will align with dates of Loan Periods throughout the students’ life cycle. The centralized logic in CampusNexus Student can calculate Academic Year dates in this fashion even if the student has no loan periods. **Note**: Extra credits and weeks earned by a student during an AY or LP will not roll over into a subsequent AY or LP.
Extend Final AY/LP by Course type	This setting allows you to extend a final AY/LP date by the length of specified course type when schools require students to show competency in their degrees. CampusNexus Student also allows you to configure a specific number of attempts to extend the final AY/LP date.
Adjust Grad Date to Last Course on Schedule	This setting allows the SPE to extend the graduation date to the last course on the schedule even if it does not apply to the student's chosen area of study. This setting is not optional if "Extend Final AY/LP by Course type" is configured.
Updating Dates	This grid of configurable options allows you to specify which student dates should be updated by the Student Pace Evaluation (SPE) tool based on the program version academic calendar.
Graduation	Configure the updating of Graduation date for academic calendars 1 through 6.
Externship	Configure the updating of Externship date for academic calendars 1 through 6.
Academic Year	Configure the updating of Academic Year date for academic calendars 5 and 6. **Note**: The check boxes for academic calendars 2, 3, and 4 are always disabled.

Field	Description
Title IV Loan	Configure the updating of Title IV Loan Period date for academic calendars 5 and 6. When a student fails to progress as expected, this may cause their Loan Period to be extended. Should the Loan Period be extended, SPE will make the corresponding adjustments to the BBAY Start and End Dates by extending the BBAY Start and End Dates by the same number of days the Loan Period Start and End Dates have extended. In order for the Loan Period dates and BBAY dates to be adjusted by the SPE evaluation process, the Title IV Loan configuration must be enabled on the SPE settings or checked at the time of SPE evaluation.
Housing	Configure the updating of Housing Lease date for academic calendars 1 through 6. **Note**: All check boxes in the Updating Dates grid default to the selected state, except for the six (6) check boxes that are always disabled (for Academic Year and Title IV Loan dates).
Hold Tab	Use this tab to create a Hold Group containing students that will be excluded from the Student Pace Evaluation. **Note:** If a student is a member of an SPE Hold group, SPE will restrict modification to the any of the student's dates. Use the **Action** list to designate an action that will prevent a Student Group from being evaluated by the Student Pace Evaluation tool, i.e., prevent any dates from being updated for the student. Upon clicking an Action in this list, the corresponding Student Group(s) are displayed in the grid. 'Exclude Students from Auto Adjustment' is currently the only Action available for selection. The **Hold for Students in Group(s)** grid displays the Student Groups that have been configured to be excluded from the Student Pace Evaluation. Click **Add** to add a Student Group to the grid; click **Delete** to remove a selected Student Group from the grid.

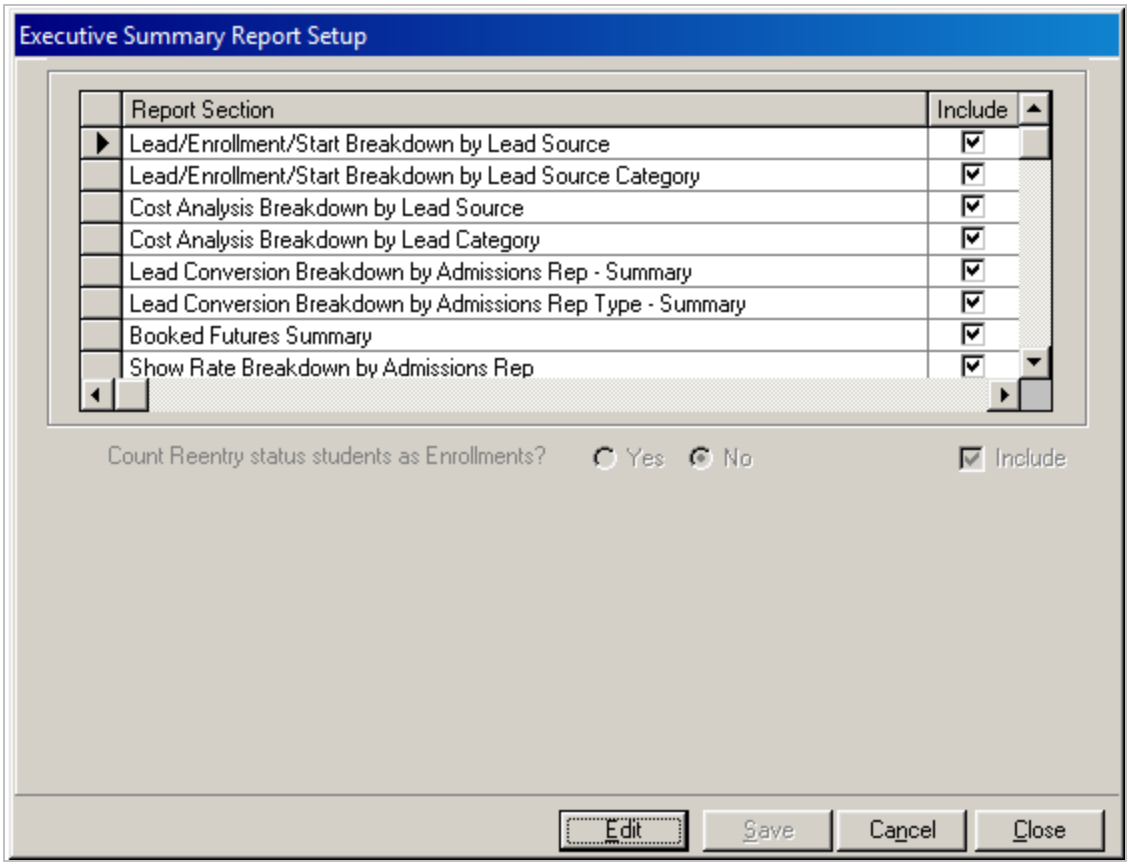
Field	Description
Auto-Locking Tab	Use this tab to enable the 'System Auto-Locking Logic'. This option creates an automated process that locks past and current payment periods of students with a Last Date of Attendance (LDA) greater than 180 days. When an academic year sequence begins, CampusNexus Student locks the start date and thus locks all previous academic year start dates in non-term programs. Financial Aid and Student Account offices may require the auto-lock option to prevent CampusNexus Student from updating the start dates of the academic year or payment period for enrolled and active students. **Note**: If the Allow courses to be exempt from progression is selected, auto-locking should be enabled. Always configure auto-locking and course exemption from progression before running a Student Pace Evaluation job.  When you select **Enable System Auto-Locking**, you must specify how many days after the begin date of the academic year or loan period you want CampusNexus Student to lock the start date of the academic year and/or loan period. Enter a numeric value between 1 and 999 (days) in one or both of the following conditionally required fields: • **Lock the Start Date of the Academic Year ___ Days After Current Academic Year Begin Date** • **Lock the Start Date of the Loan Period ___ Days After Current Loan Period Begin Date** Click **Save** to save the auto-lock configuration. CampusNexus Student captures the number of days entered and locks the Academic Year and/or Loan Period accordingly. Click **Cancel** to return to the previous settings.

Setup > Executive Summary Report

The Setup menu provides the option of customizing the report preferences for each of the sections in the Executive Summary Report so that the default options are closer to the report preferences that are typically run.

To customize the Executive Summary Report:

1. Navigate to **Setup > Executive Summary Report**. The Executive Summary Report Setup form is displayed.



2. Select the report section that you want to modify.
    - Click **Edit** to activate the form and then enable, disable, or modify options as required.
    - Select the **Include** check box to include the report section in the Executive Summary Report.
    - Click **Save** to retain your choices or **Cancel** to close the form without saving any changes.

    Repeat this step for each report section.
3. Click **Close** to close the form.

Help Menu

The Help menu options are as follows:

- Contents
- Regulatory Help
- Automated Processes Help
- Custom Help
- Help on the Web
- About

The links for Regulatory Help and Automated Processes Help are enabled only if you have access to these features.

Contents

The main Help system consists of many topics covering every aspect of CampusNexus Student operations. To open the Help system, select **Help** > **Contents** or press the **F1** key. Use the *Contents* or *Search* tabs to find information.

Tabs

The tabs in the left pane of the Help system provide the following tools:

- **Contents** – The table of contents shows book and topic page icons. When you double-click a book icon, the book is opened and a list of topic pages is displayed. Click the plus (+) symbol beside any book icon to expand the list associated with it. Click a topic icon to open the topic in the main help window.
- **Search** – The search tool provides a way to find words or phrases in any topic of the Help system. Click this tab and enter the search text. To search for a phrase that contains spaces, enclose it within quotation marks (for example, "available jobs").

  After you entered the search text, press **Enter** or click **List Topics**. The Help system displays a list of all topics that contain the search text. Double-click a topic title to view the related topic page. You can also click a topic title and then click **Display**.
- **Favorites** – Use the Favorites tab to bookmark your frequently visited Help topics. Click **Add** to add the currently displayed topic to the Favorites. Use **Display** to jump to any selected topic from the list. Click **Remove** to remove a selected item from the Favorites list.

Toolbar Descriptions

Tool	Description
Hide	Hides the left pane of the help window. The button changes to Show. Click **Show** to bring back the left pane.
Locate	Locates the position of a topic in the table of contents. (The topic location is also indicated by the bread-crumbs at the top of the topic page.)
Back	Goes back to the topic you previously viewed.
Forward	Goes forward to a topic you previously viewed.

Tool	Description
Refresh	Refreshes the current Help topic. For example, if you searched a term and the search highlights are on, click Refresh to remove the search highlights.
Home	Goes to the home page.
Font	Increases or decreases the font size of the Help system.
Print	Prints the current topic.
Options	Click this button to access the following options: • hide/show the left pane • go backward/forward in the list of topics you have viewed • go to the home topic • stop viewing the Help system • refresh the help window • print topic • turn off/on search highlights.

Shortcut Menus

When you right-click in the left pane, the **Print** option is displayed.

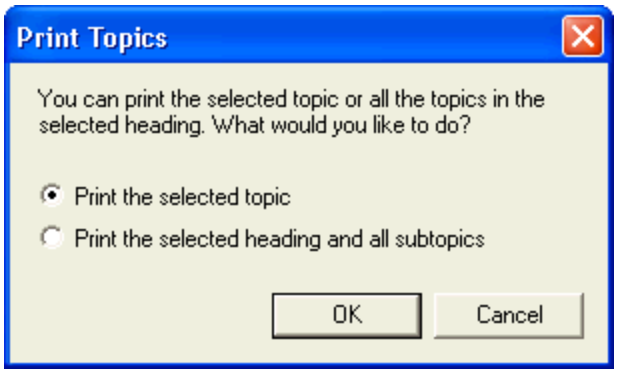
When you right-click in the right pane, a shortcut menu with the following options is displayed:

- **Back** – Takes you back one topic.
- **Forward** – Takes you forward one topic.
- **Select All** – Selects all text and graphics in the current topic.
- **View Source** – Displays the HTML source code for the current topic page.
- **Print** – Prints the current topic.
- **Refresh** – Refreshes the current topic on your screen.
- **Properties** – Displays the properties of the current HTML page.

Printing Topics

You can print any displayed topic by clicking the **Print** icon at the top of the Help window, or right-click on the topic text and select **Print** from the shortcut menu.

In the Contents panel, you can right-click a book icon or a topic icon and choose the **Print** option from the shortcut menu. If you then choose **Print the selected heading and all subtopics**, all the pages for all topics that are subordinate to the selected book are printed. Click **Print the selected topic** to print the page for a single topic.



⚠ Use caution when choosing to print one of the first-level "books". Some of them have hundreds of pages.

Custom Help

The Help system delivered with CampusNexus Student includes a means by which you can add your own notations or topics at your discretion. Navigating to **Help** > **Custom Help** opens a file named *Private_Help.html* that is located in the same directory as the CampusNexus Student Help system. By editing and saving this file, it can serve as the home page for your own customized notes, or as a link to a more extensive internal Help system located elsewhere.

To implement Custom Help, use any standard HTML editor to edit the *Private_Help.html* file (or replace this file with your own file of the same name).

Note: Renaming the *Private_Help.html* file -- or removing it from the CampusNexus Student Help System directory -- breaks the **Help > Custom Help** link and your access to any customized Help you may have added. It's a good idea to make a backup copy of the *Private_Help.html* file and keep in a different directory. While CampusNexus Student updates will not overwrite the file once it has been installed on your system, if someone at your site accidentally removes the file, you can replace it with the backup copy.

Help on the Web

From the CampusNexus Student Help menu, select **Help on the Web** to go to ServiceDesk, and log on with your user name and password. If you don't have this information, call us at **800-483-9106**.

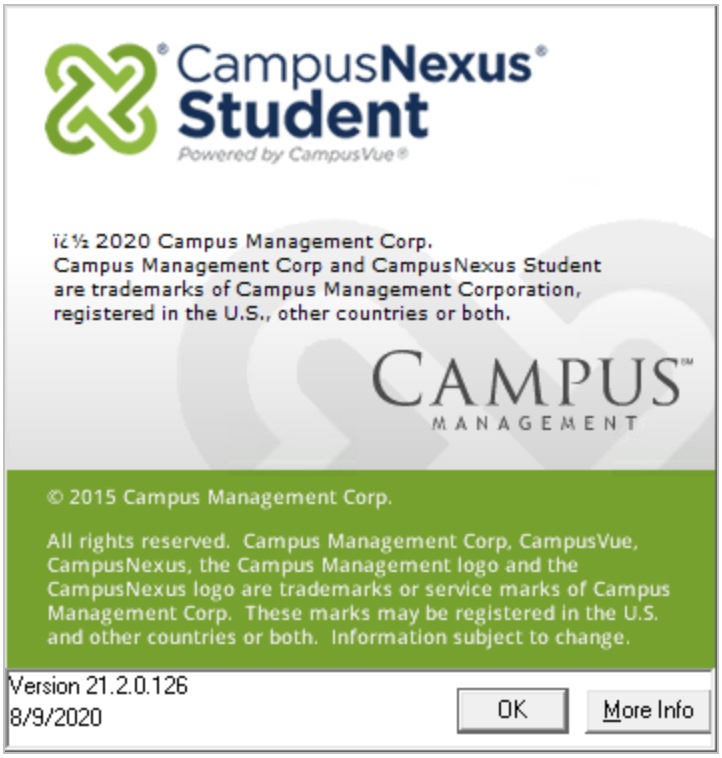
The email address for our Support department is support@campusmgmt.com. Clicking this link opens your email client with this address as the destination of a new message.

A setting in the System Settings form controls the use of the *Help on the Web* option. When the **Prevent Web Access** option is set to **Yes**, the *Help on the Web* option is removed from the *Help* menu. The default setting is **No**.

About

Basic version and environment information about your Anthology Inc. product is available in the About window.

1. From the Main Menu, navigate to **Help** > **About**. Depending on your license, the CampusNexus Student or CampusNexus® Student version information is displayed.



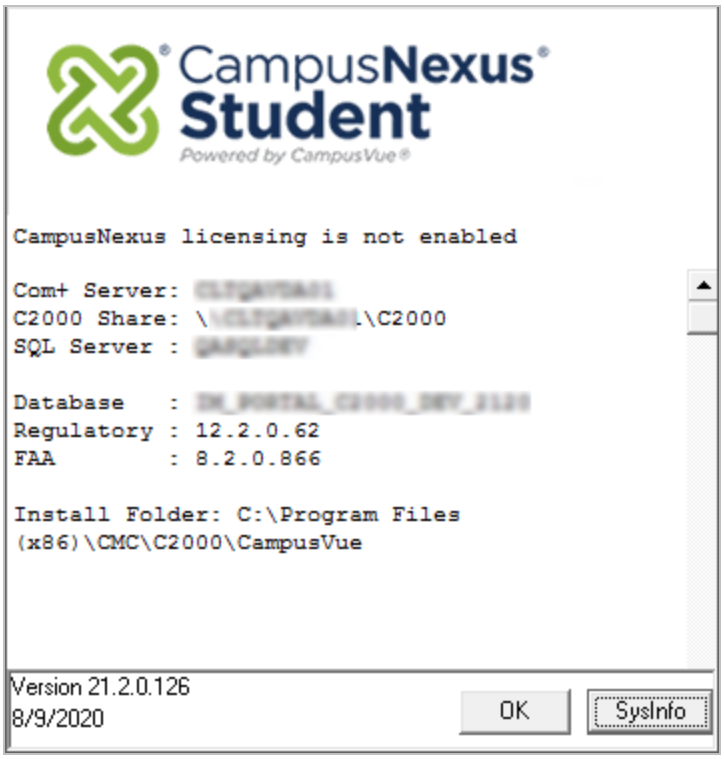
Releases are numbered using the following format: **Major.Minor.Patch.Build**

A **Full Version Name**, for example **CampusNexus Student 16.0.1.0017**, adheres to the following naming conventions:

Full Version Name Example

Version #	Version Type	Description
21	Major	Incremented for releases that contain significant API or architectural changes.
2	Minor	Incremented for releases containing bug fixes and new features.
0	Patch	Incremented for releases containing only bug fixes.
126	Build	Incremented each time the product is compiled by an internal build server.

2. Click **More Info** for information about the *Com+ Server, C2000 Share (drive), SQL Server, Database, Regulatory, FAA* , and *Install Folder* that you are currently using. Anthology Inc. Support may also need to know these details.



3. Click **SysInfo** for information about the names of your *Transaction Server* and *SQL Server*. Select **File** > **Exit** to close the window.
4. Click **OK** to exit the About window.
