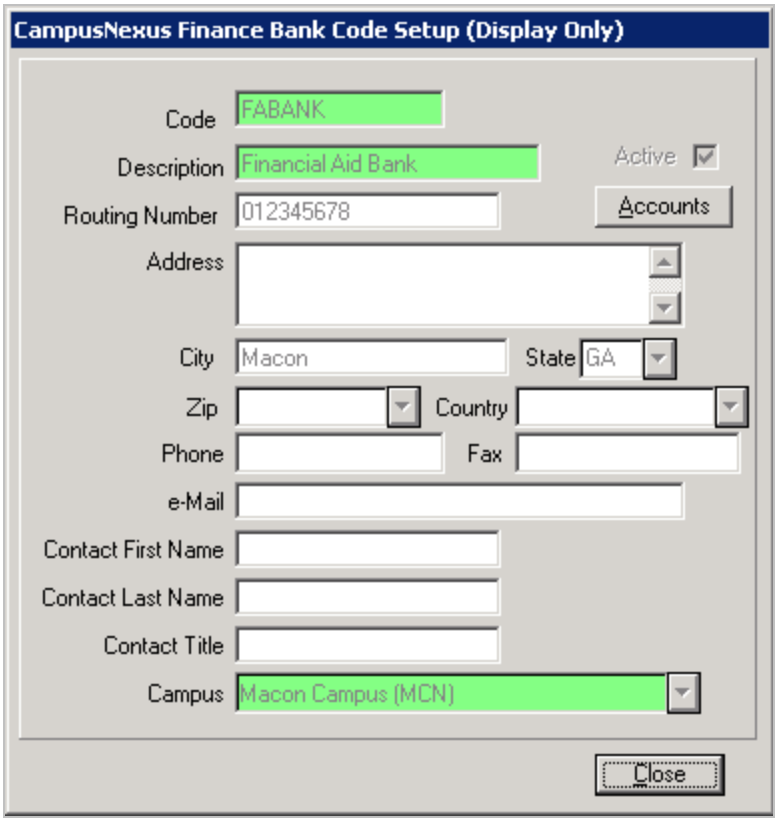
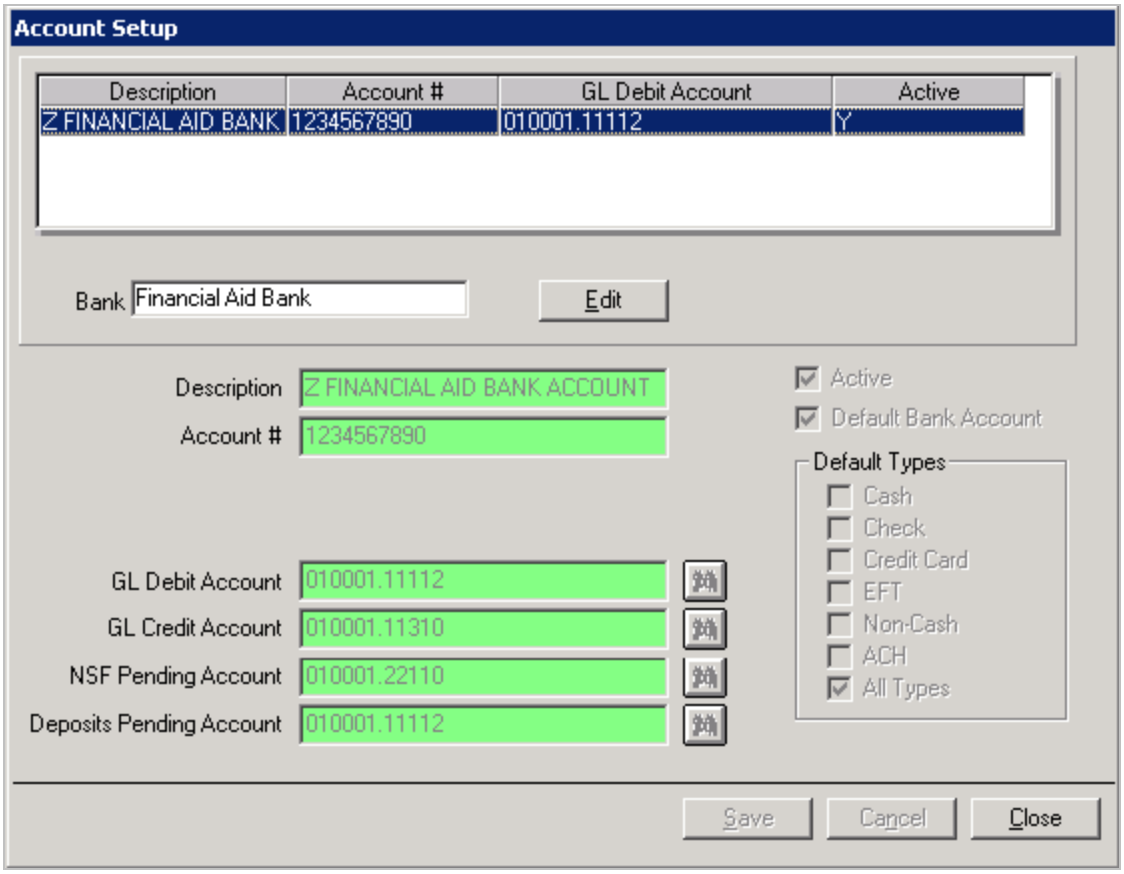
2. Select an account and click **Edit**. The CampusNexus Bank Code Setup (Display Only) form is displayed. This form presents read-only bank information that was set up in CampusNexus Finance, HR & Payroll.



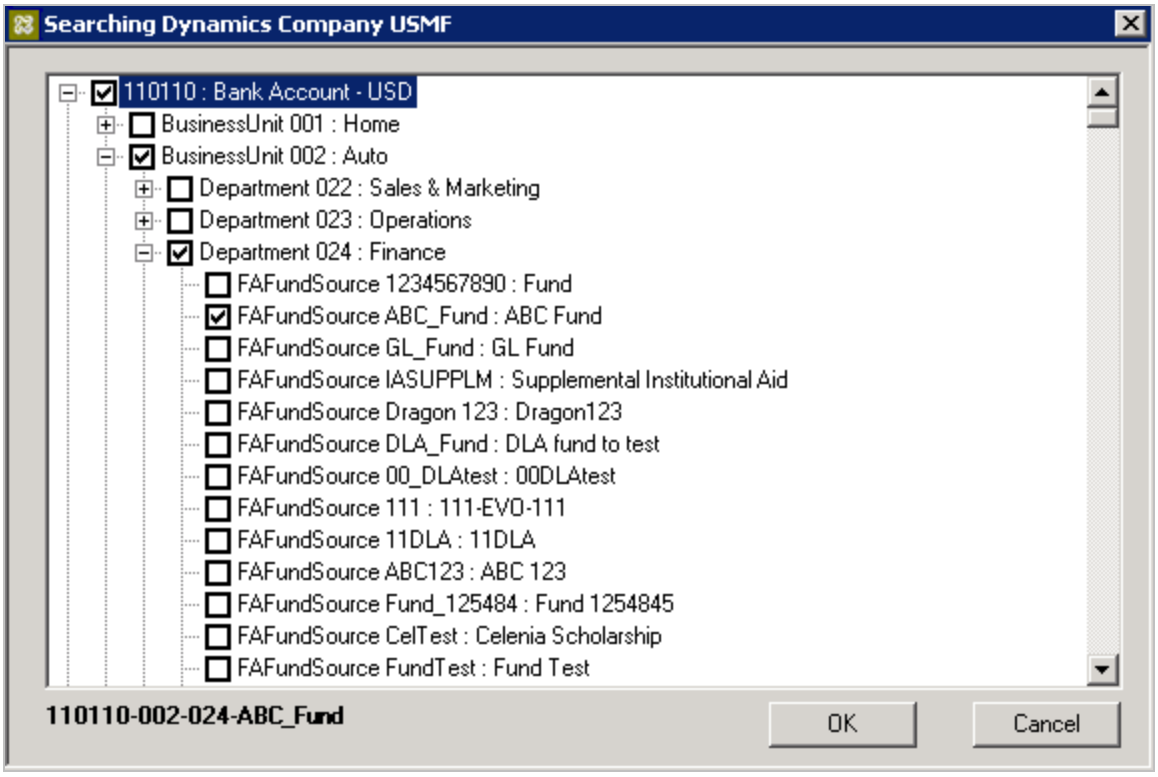
3. Click the **Accounts** button. The Account Setup form is displayed.



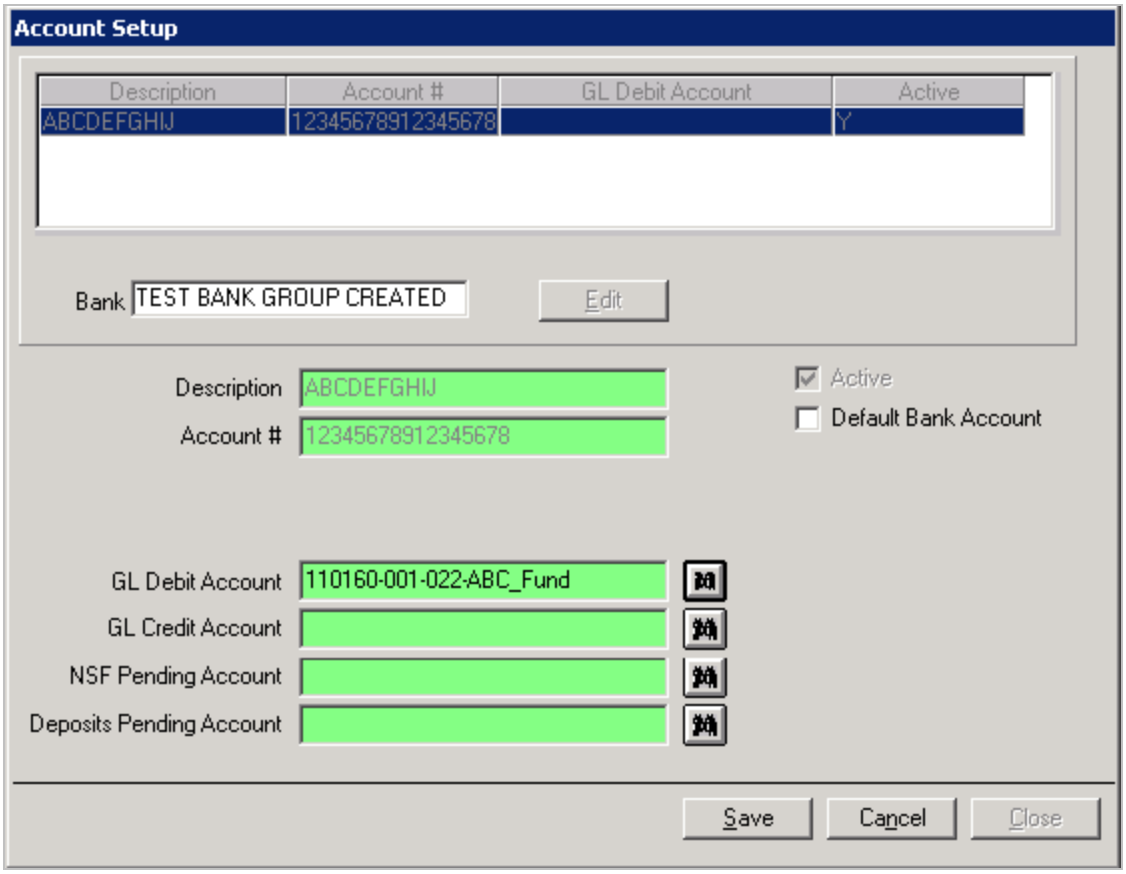
4. To edit the account information, click **Edit** and click the **Find** icon next to an account field. CampusNexus Student performs a power search and retrieves a list of GL accounts that can be associated with the account fields.

   The permissions assigned to the user in CampusNexus Finance, HR & Payroll determine which GL accounts the user can view in CampusNexus Student. The Main account node can be displayed at any level in the account hierarchy. This is based on the account structure setting that is configured in Microsoft AX. For information about this setting, your administrator must see Microsoft AX Help.

   When you click **Save** after selecting the account, the system validates your selection against the account structure setting in Microsoft AX. This validation also occurs when transactions are released to G/L.



5. Select a GL Account string combination from the list and click **OK**. The GL account string for the selected entity is displayed in the Account Setup form. If applicable, select the **Default Bank Account** check box.



6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: When CampusNexus Student and CampusNexus Finance, HR & Payroll are integrated, CampusNexus Finance, HR & Payroll populates the GL Debit Account field in CampusNexus Student automatically when a bank account is added or updated in CampusNexus Finance, HR & Payroll. Since this data originates in CampusNexus Finance, HR & Payroll, the actual GL Debit Account field is therefore uneditable when reviewed in CampusNexus Student.

Setup - Student Account Lists [Billing Methods]

CampusNexus Student offers several methods for billing students for tuition and other charges. You can set up billing variations if you have different methods for different programs. If working with Dual or "Connected" Enrollments, please see Dual Enrollment Automated Rate Schedule Billing Setup for Tuition.

The billing method setup allows rate schedules to be specified for each billing code. In addition, rate schedules can be defined for each campus. These features provide maximum flexibility for multi-campus institutions when billing their students. The billing logic in CampusNexus Student allows a student to be billed for the same term at multiple campuses. Ledger cards can be filtered by campus. Deferred revenue is also campus-specific. One student may be earning revenue concurrently at multiple campuses.

The billing grid displays the number of units "over" value. This value is used when billing by credits or hours as the units. For example, the institution charges a flat rate of $1000.00 plus $150.00 for each credit over 12 credits.

Under certain circumstances, you can turn on automatic billing. That is, when the student is enrolled in a program version or when the student is registered for a course, the cost can be automatically billed to the student. For the other billing methods, you must use the Registration Billing wizard.

Billing methods can be based on Program / Enrollment, Academic Year, Term / Quarter, Course and Payment Period. In addition, some methods can use the rate table approach, wherein you provide ranges of credits, hours, numbers of courses, or levels of courses. You can enter a flat dollar amount and/or an amount per unit (credit, hour, or course) within the range.

The Billing Methods Code Setup form enables you to set up different costs per campus, transaction type, and course level. You can select how the costs for the billing method will be entered, "All Campuses / Same Rates" or "Specify Campus". Once this is established, the setting will affect all costs entered for each transaction code.

Note: When "By Campus" is selected, any change to this setting affects ALL billing codes for the billing method. Select this option only once and do not change it. If it is changed, you need to re-enter all cost grids for each billing code.

A list box of all the billing codes is included. This list box defaults to TUIT when you are adding a new billing method. You can edit the amounts for the tuition and then save. After saving, you can select a different billing code and set up the costs associated with that code. Click Save to save the costs for that code.

When you begin to edit the costs grid, the Save and the Cancel buttons are enabled and the Close button is disabled. You must save or cancel the edit before you select a different billing code.

The billing methods you set up for your institution using these procedures are used in the other Student Accounts list "Programs". In the "Programs" list, you select a billing method for each program version and enter any additional charges (books, supplies, and so on).

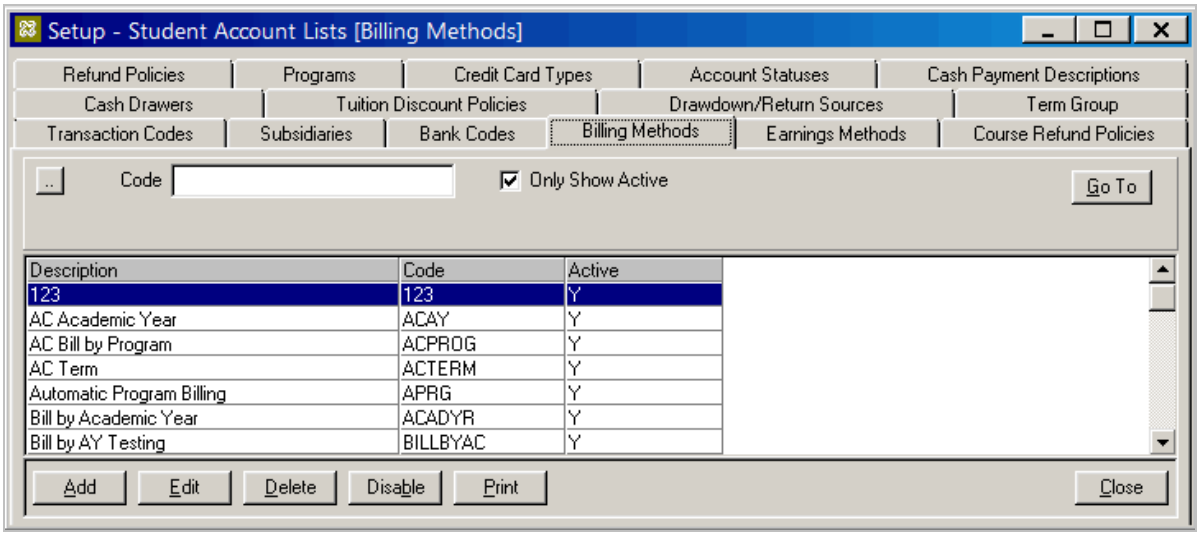
The billing method you select determines how your revenue is recognized (See also Reverse Revenue Recognition.) If your Revenue Basis (Earning Unit) is *months*, the following values apply:

- If you are Billing by Term, the Total Earning Units are Months in the Term.
- If you are Billing by Credits, the Total Earning Units are Number of Credits in the Program.
- If you are Billing by Hours, the Total Earning Units are Hours in the Term.

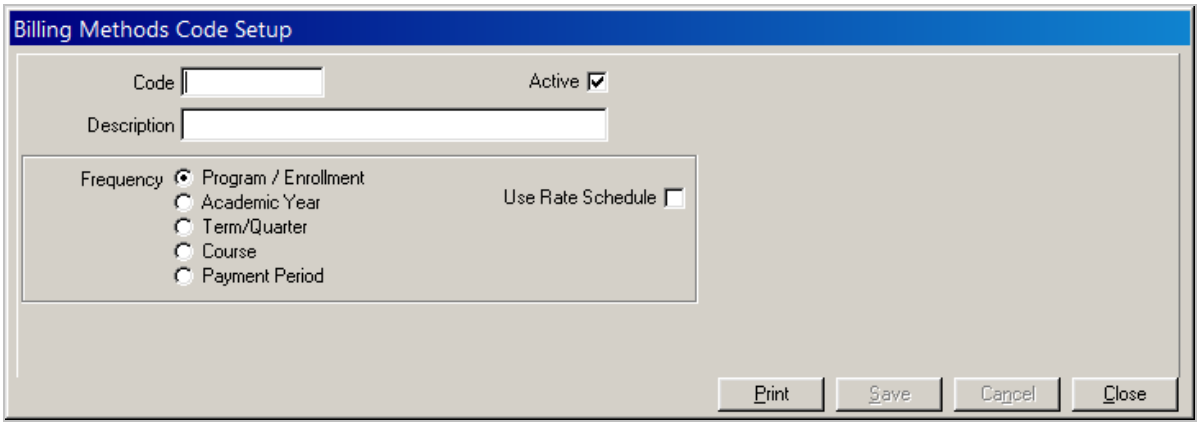
You may add or edit billing methods. See also Earning Methods.

To add a billing method code:

1. Navigate to **Lists** > **Student Accounts**. The Setup - Student Accounts Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Billing Methods**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**.
6. If you selected the **Add** option to add a new billing method, only the top portion of the Billing Methods Code Setup form is displayed. The bottom portion of the form is displayed only when the Use Rate Schedule check box is selected.



7. Specify a unique **Code**. The Code can be up to eight alphanumeric characters.
8. Enter a **Description**. The Description can be up to 22 alphanumeric characters.
9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
10. Select the **Frequency** of the billing. Each Frequency option has certain characteristics associated with it. See

Program / Enrollment, Academic Year, Term / Quarter, Course, and Payment Period for additional information.

11. Click **Save** if you are not using a rate schedule for the billing method.
12. When you select the **Use Rate Schedule**check box, the bottom section of the form is displayed, where you select additional settings depending on the Frequency option selected. Select the check box if the billing method is based on the rate schedule. See the Use Rate Schedule below.
13. After you have specified the campus, transaction code selection, rate schedule information and clicked Save, you can print a report by clicking the **Print** button.
14. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To edit a billing method code:

1. Navigate to **Lists > Student Accounts > Billing Methods >** select a billing method > **Edit** (button).
2. If you selected the **Edit** option to modify an existing billing method, both sections of the form are displayed containing the previous selections. See Program / Enrollment, Academic Year, Term / Quarter, and Course for the applicable Frequency selection, and the Use Rate Schedule sections below.
3. Change the information as desired, and then click **Save**.
4. When you select the **Use Rate Schedule** check box, the bottom section of the form is displayed, where you select additional settings, depending on the Frequency option selected. Select the check box if the billing method will be based on the rate schedule. See the Use Rate Schedule below.
5. Click **Print** to print a report.

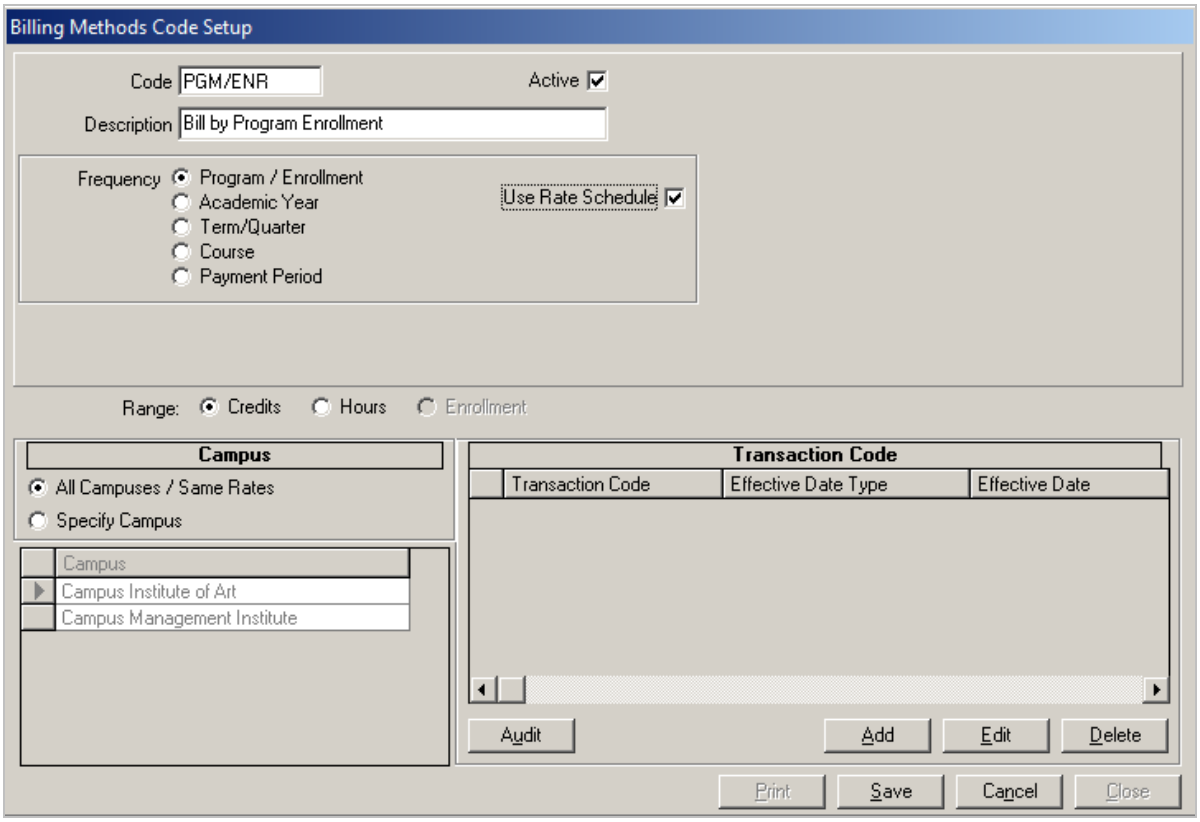
Program / Enrollment

If you do not use the rate schedule, the charge for the billing comes from the program version record. In either case, the charge is entered on the student's Ledger Card when the enrollment is processed. The rate schedule will be used in this example.

1. Select **Program/Enrollment**.
2. Select **Use Rate Schedule** if the billing method will use a rate schedule. Range options are Credits or Hours.

   Selecting Use Rate Schedule on the Billing Methods Code Setup form enables and displays the bottom section of

the form, where you can make additional selections, depending on the Frequency option selected.



Academic Year

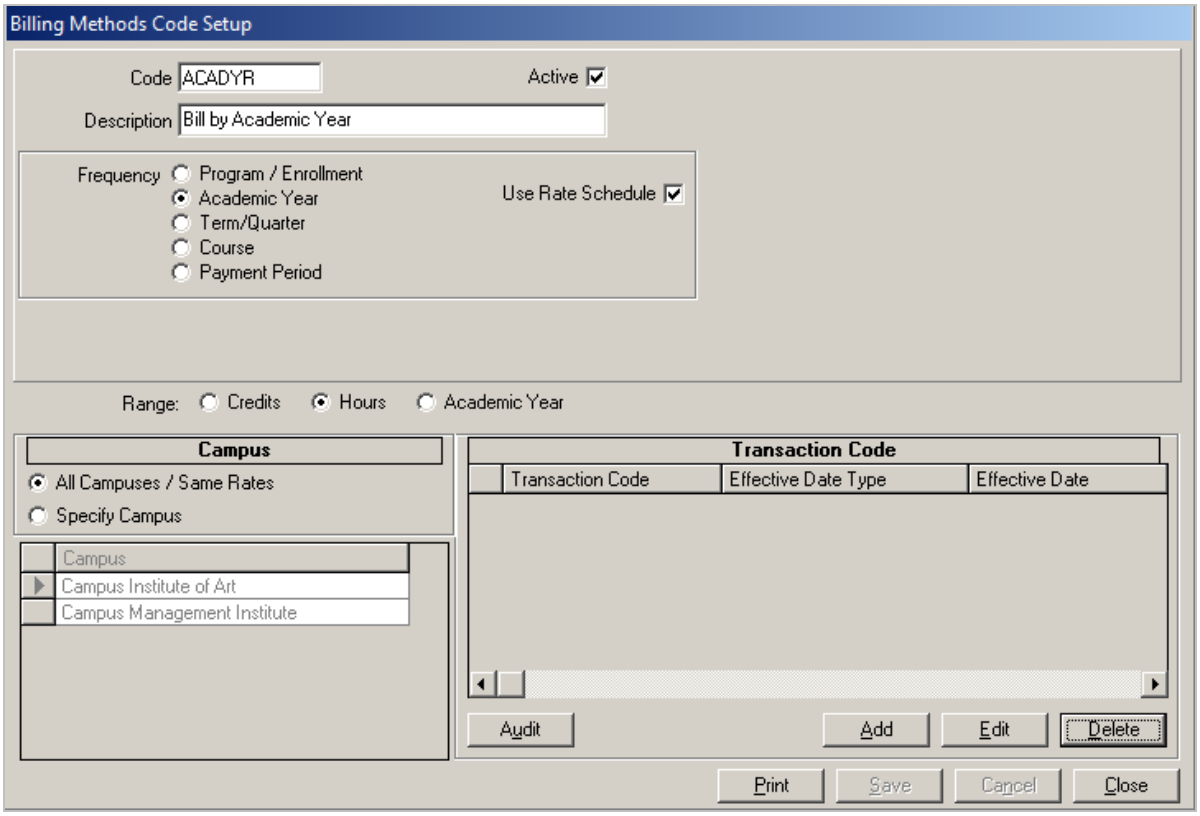
The Academic Year option **requires** the use of the rate schedule.

Note: When a program version is set to earn by academic year, you can configure the number of units to earn throughout each academic year. CampusNexus Student performs the revenue recognition process ignoring the usual calculation of units and using the override to earn as configured.

1. Select **Academic Year**.
2. Select **Use Rate Schedule**. Range options are Credits, Hours, and Academic Year.

   Selecting Use Rate Schedule on the Billing Methods Code Setup form enables and displays the bottom section of

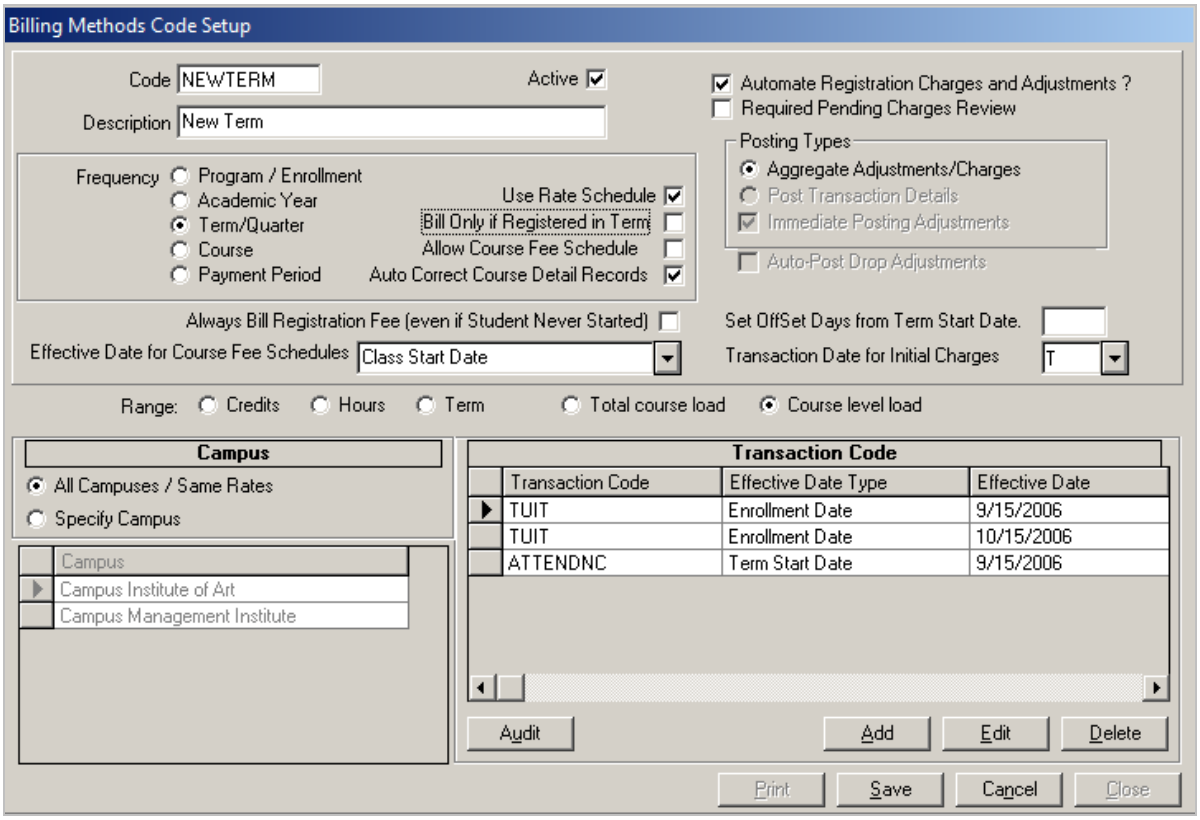
the form, where you can make additional selections, depending on the Frequency option selected.



Term / Quarter

If you selected the Use Rate Schedule option, the Automate Registration Charges and Adjustments? check box is enabled and the bottom section of the Billing Methods Code Setup form is displayed, where you may make additional selections depending on the Frequency option selected. With automation turned on and using a rate schedule, users can bill a student more than once per term. If a student is billed more that once per term and the billing method is a rate schedule using flat amounts, the billing details tab are updated upon registration for any transaction code if the overall amount of the flat fee does not change. This is to break down the amount of the overall charge per course.

If you do not select Use Rate Schedule, the cost to be billed to the student is taken from the student's enrollment fee schedule.



1. Select **Term/Quarter** in the Frequency section.
2. Select **Use Rate Schedule** if desired. Range options are Credits, Hours, Term, Total Course Load, and Course Level Load.
3. Select **Bill Only if Registered in Term** if desired. When selected, only students who have classes registered for the term being processed are billed.
4. Select **Allow Course Fee Schedule** to determine if a fee schedule can be selected when registering students for classes. The check box is hidden if the Frequency methods are Program / Enrollment or Academic Year. Selecting this check box allows the Registrar to select a course fee schedule while registering a student for a course.

   If this check box is not selected, the Registrar cannot select a fee schedule during registration. The ability to specify a fee schedule for a course section exists (provided more than one fee schedule is configured for a course), regardless of the configuration of the Allow Course Fee Schedule check box on the billing method.

   System administrators can designate that a billing method allows a course to be billed using a course fee schedule. The Allow Course Fee Schedule check box in only available for billing methods using the frequency Term/Quarter, with a rate schedule and Course (**Lists** > **Student Accounts** > **Billing Methods** > **Add/Edit** > **Billing Methods Code Setup** > select **Term/Quarter** > select **Use Rate Schedule**).

   When the billing method is configured to use fee schedules,CampusNexus Student can bill a course using both the fee schedule and the rate schedule with the fee schedule having precedence over the rate schedule.

   The billing method feature follows a hierarchy system to accommodate the default fees found on the Course Section, Rate Schedule, and Course Fee forms.

   Hierarchy when using Frequency of Term/Quarter and Use Rate Schedule:

a. Section or Course Fee Schedule assigned at Course Registration - student
b. Rate Schedule
c. Course Fee Schedule assigned as the default on the course

For example, prior to billing a student who has Term/Quarter and Use Rate Schedule configured, CampusNexus Student compares the transaction codes on the course section fee schedule, the rate schedule, and the course fee schedule. If the same transaction code is found on all three forms, CampusNexus Student uses the transaction code charge specified on the course section fee schedule, and then ignores the transaction code charge found on the rate schedule and course fee schedule. While comparing transaction codes, if a transaction code exists on the default course fee schedule but does not exist on the default course section fee schedule or rate schedule (because this fee is a unique transaction code), CampusNexus Student bills the unique transaction code charge found on the default course fee schedule. When calculating the rate charge for the transaction code using the rate schedule, CampusNexus Student omits that course from the rate schedule calculations.

Hierarchy when using Frequency of Course:

a. Section or Course Fee Schedule assigned at Course Registration - student
b. Course Fee Schedule assigned as the default on the course

Prior to billing a student who has **Course** configured, CampusNexus Student compares the transaction codes on the course section fee schedule and the course fee schedule. If the same transaction code is found on both of the two forms, CampusNexus Student uses the transaction code charge specified on the course section fee schedule, and then ignores the transaction code charge found on the course fee schedule. While comparing transaction codes, if a transaction code exists on the default course fee schedule but does not exist on the default course section fee schedule (because this fee is a unique transaction codeCampusNexus Student bills the transaction code charge found on the default course fee schedule.

Using the hierarchy system mentioned above, the system administrator can prevent a fee from being charged by adding the same transaction code with a zero amount in a higher level of the hierarchy.

5. Select **Auto Correct Detail Course Records** if applicable (check box is cleared by default). Selecting this option enables an automated procedure (auto correct job) that assesses the total amount billed for bill codes set up on the rate schedule and adjusts/creates detail support records per course for the courses comprising the charge.

   Notes:

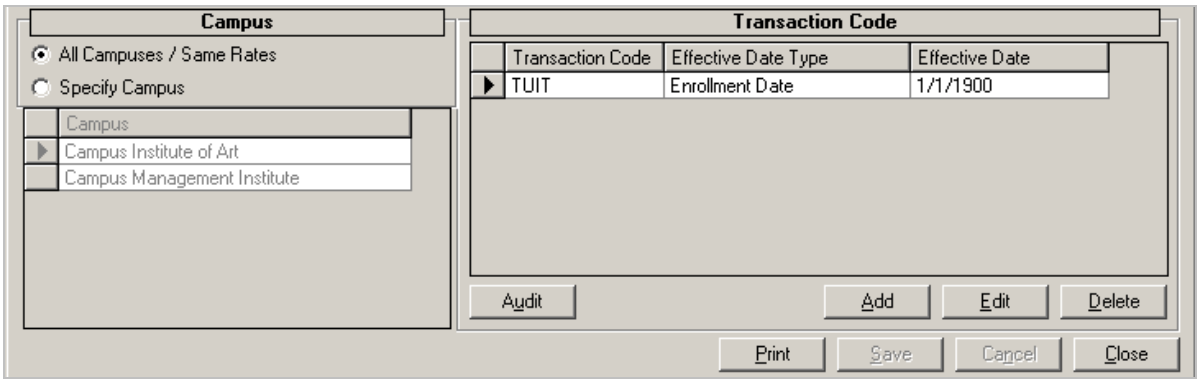
   - This check box is only visible for payment period or term billing methods that Use Rate Schedule and that do not Post Transaction Details (i.e., aggregate billing methods).
   - Billing methods with this check box selected are used in the auto correct job. After a register/unregister/drop operation, an item is added to the queue so that it is processed by the job.
   - Selecting this check box disables the Immediate Posting Adjustments check box and sets its value to selected. This is because the billing methods that are included in the auto correct job **must** have auto-posting of register records after a rebilling.
   - If both Auto Correct Detail Course Records and Required Pending Charges Review are selected, you will only be able to review the initial posting of charges for the selected time frame; subsequent reviews of pending charges will not be possible.

6. Select the **Effective Date for Course Fee Schedules** to be used for evaluating Course Fee Schedules and Course Fees that are not set up on a rate schedule. If Student Enrollment Date is selected, CampusNexus Student only bills students based on fees that are configured with an effective date prior to the student's enrollment date. If Class Start Date is selected, CampusNexus Student only bills students based on the fees configured with an effective date prior to the student's class start date.

Institutions can configure multiple fee schedules for a course. Each fee schedule consists of multiple individual course fees. If the institution previously defined any fees for the course prior to implementing this new feature, CampusNexus Student moved all fees into one new fee schedule and labeled it as the Original Fee Schedule. The default sort order on this form is the Fee Schedule Code. When a course fee schedule is highlighted,CampusNexus Student displays all fees assigned to that fee schedule.

7. Select **Always Bill Registration Fee (even if Student Never Started)** if desired. When selected, this causes the REG bill code to be charged to students who have school statuses of **N** or **W**, provided the REG bill code is set up as part of the rate schedule OR is set up in the students' fees folders

Use Rate Schedule

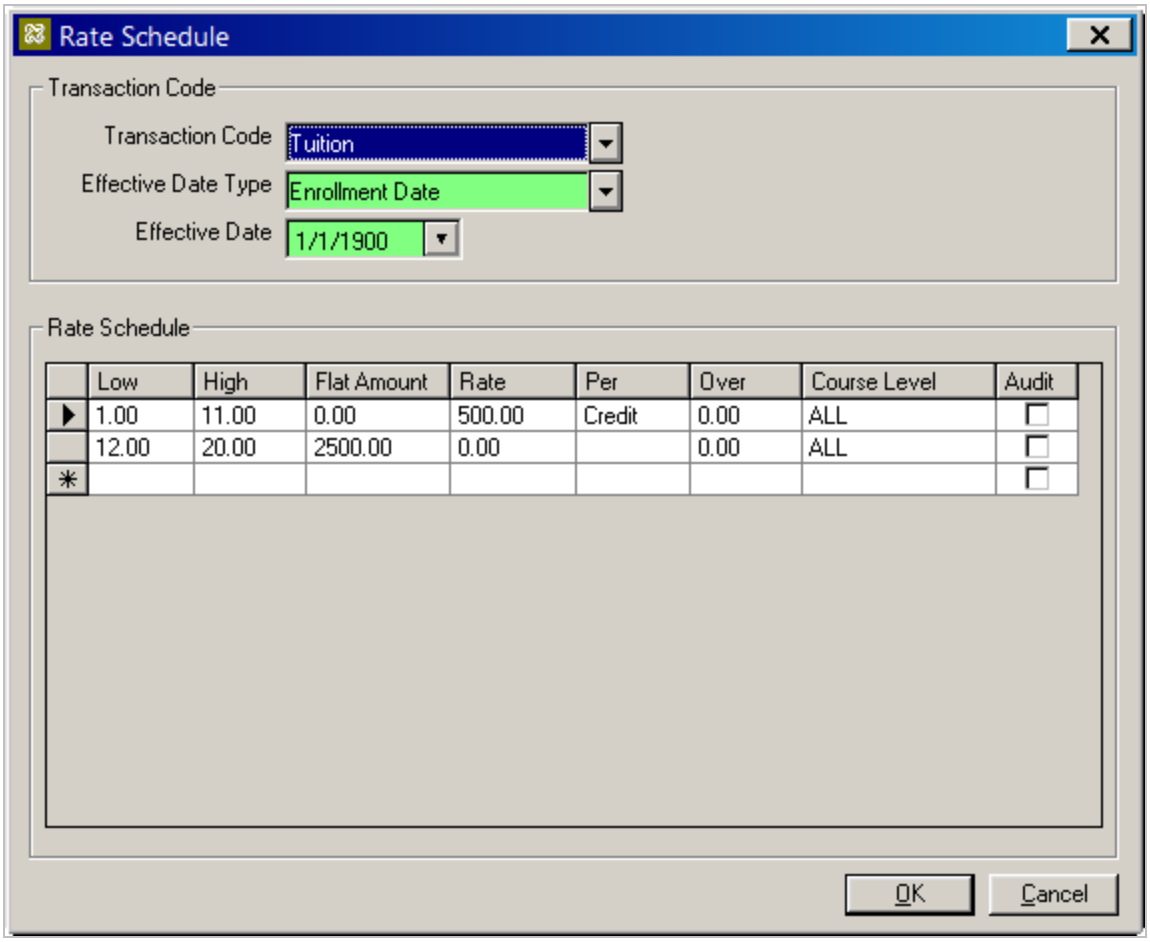


1. Campus - Select **All Campuses / Same Rates** or **Specify Campus**. If you select **Specify Campus**, click the campus to which the rates apply.
2. Transaction Code - Click the **Add** button to add a transaction code, or select an existing transaction code and click the **Edit** button to make changes, or select an existing transaction code and click the **Delete** button to remove a transaction code. Set the rate schedule for each transaction code as required.
3. When you click **Add** or **Edit**, the Rate Schedule form is displayed.
4. Click **Audit** to review or monitor changes made to the rate schedules.

Rate Schedule Form

The Rate Schedule form is displayed when Add or Edit is clicked on the Billing Methods Code Setup form. Multiple rate schedules may be set up per transaction code, and each rate schedule is defined by an effective date type and effective date. Registration Billing and Process Pending Charges/Adjustments evaluate the effective date types and effective dates for rate schedules.

To use the effective date type/effective date configuration, select an Effective Date Type and Effective Date from the respective drop-down lists; otherwise, the default for the Effective Date Type is Enrollment Date and the Effective Date is set to 01/01/1900.



1. From the **Transaction Code** list, select a transaction code.
2. From the **Effective Date Type** list, select an effective date type. The options are:
   - Code E - Enrollment Date
   - Code S - Expected Start Date
   - Code T - Payment Period Start Date
   - Code R - Class Start Date

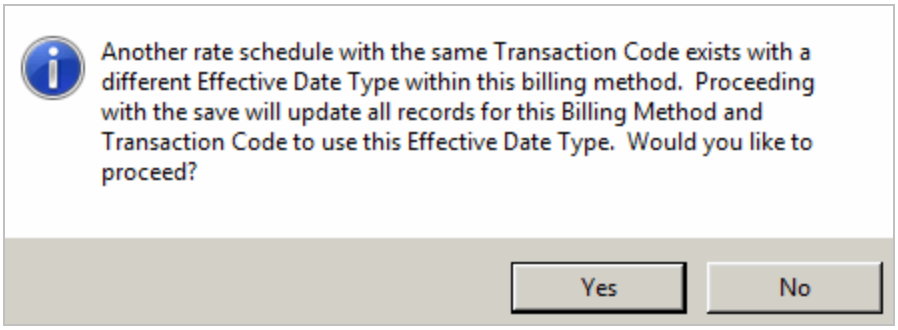
   Note: The Class Start Date option is available only for non-term payment period (detailed) billing; it does not apply to billing by term or academic year (aggregate billing).

   CampusNexus Student evaluates the effective date type/rate schedule configuration to determine which rate schedule to use, based on effective date when billing the student.

   Note: Multiple rate schedules may be set up per transaction code. Each rate schedule is defined by an effective date type and effective date. However, the following rules apply:

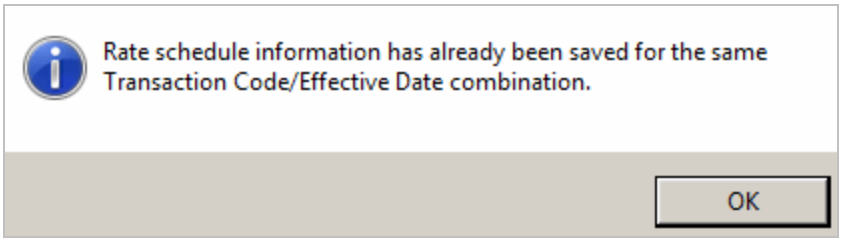
   - Only one effective date type can be defined per transaction code.
   - If more than one rate schedule is defined for a transaction code, all rate schedules for that transaction code must use the same effective date type.
3. The following message is displayed when you attempt to edit an **Effective Date Type** for one of the rate schedules associated with the transaction code. If you select **Yes**, all rate schedules for the transaction code are updated to

the new effective date type; otherwise, you are returned to the Rate Schedule form, and the new Effective Date Type is not saved.



4. Select or enter an effective date in the **Effective Date** field.
5. In the Rate Schedule grid, enter appropriate data:
    - **Low** - the low end of the range of units (credits, hours, or courses).
    - **High** - the high end of the range of units.
    - **Flat Amount** - An amount to be added to the value of Rate multiplied by units.
    - **Rate** - A dollar amount to be multiplied by the number of units.
    - **Per** - The units by which the Rate is multiplied to get the amount to be charged. Units can be credits, hours, or courses.
    - **Over** - The value to be used when billing by credits or hours as the units. For example, the institution charges a flat rate of $1000.00 plus $150.00 for each credit over 12 credits.
    - **Course Level** - This drop-down list box shows all defined course levels for the institution.
    - **Audit** - Specify whether the rate schedule is applicable for course Audit course, by selecting or clearing the check box. You can set up a flat rate or schedule for the course taken as Audit, as is done with a Full Credits course.

Note: If you attempt to create the same Transaction Code/Effective Date combination, the following message is displayed. Click **OK** and select another Transaction Code/Effective Date combination to continue processing.



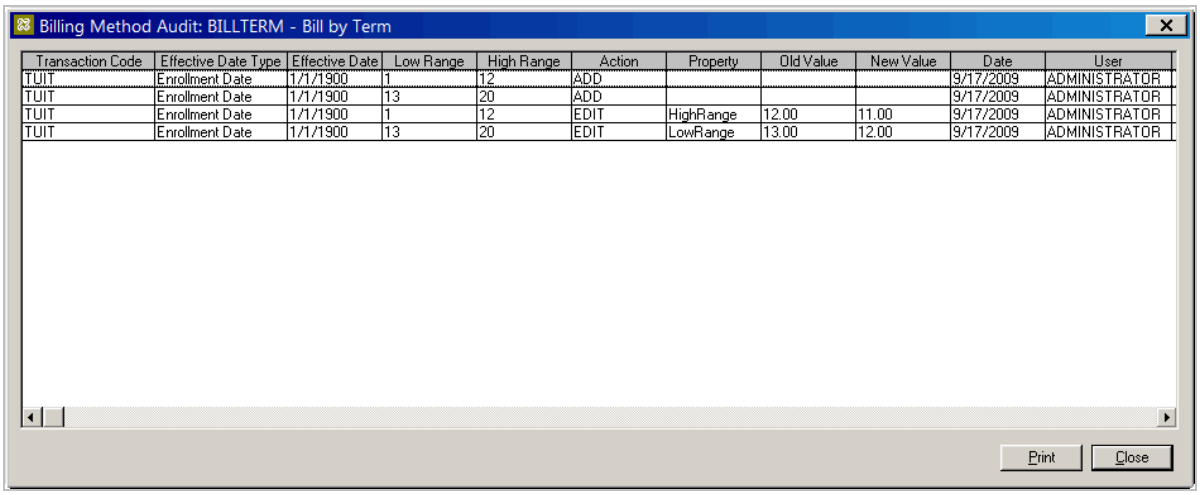
Note: The Flat rate is not applied to billing by **Term/Quarter** with a rate schedule charged on Attendance; rather, the 'Per' unit must be the same for all rate schedules. For example, credits, hours, or courses for the ranges must be used with this feature.

When the billing method frequency is set to Payment Period and Post Transaction Details is selected, data entry on the Rate Schedule form is restricted because tiered rate schedules are not supported for this billing method configuration.

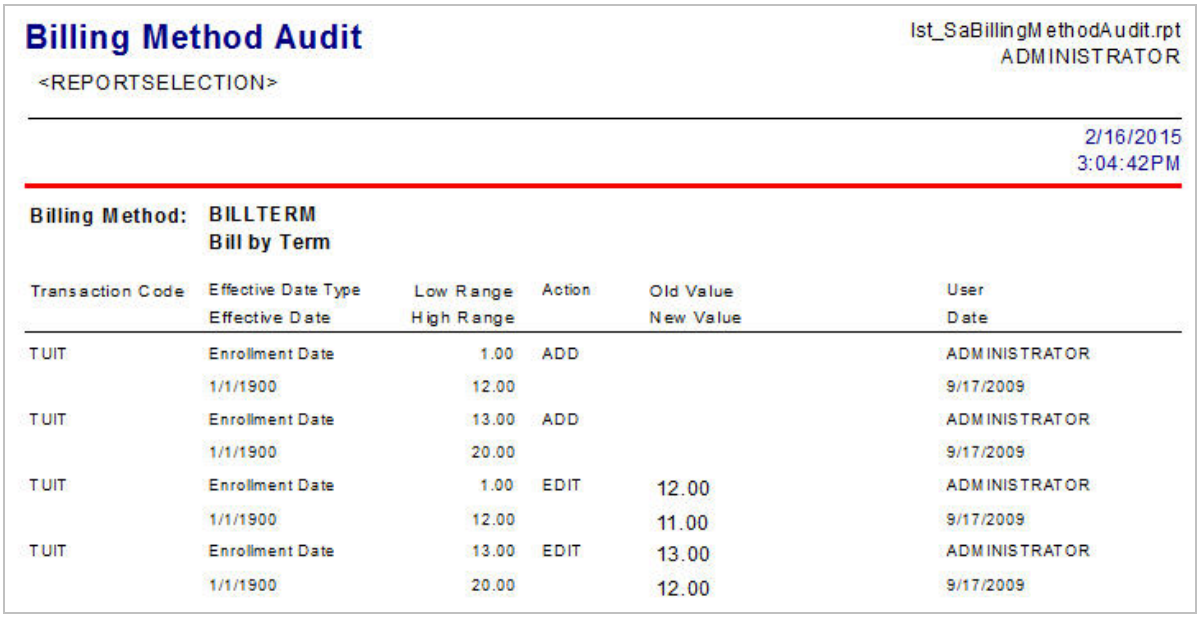
- The High and Low columns will be disabled and data locked to 1 to 999 regardless of the unit selected.
- The Flat Amount column will be locked and the value defaulted to zero.

Audit Rate Schedules

Click the **Audit** button. The Billing Methods Audit form is displayed. Any changes to a rate schedule are posted here where they may be monitored.



Click the **Print** button to view the Billing Method Audit report.



Billing Method Audit

Important Information

Course Level Load: Course Level Load allows you to charge courses at the Level selected on the course and defined on the rate schedule. Multiple course levels can be defined along with the 'ALL' level (the system default). When setting up a rate schedule using Course Level Load, the 'ALL' level will include all courses set at 'ALL' level as well as any other course levels not defined on the rate schedule.

For example, the rate schedule has an entry for the 'ALL' level as well as an entry for the 100 Level. A student is taking three 4-credit courses: BIO101 with a course level of '100', ENG101 with a course level of '200', and MATH101 with a level of 'ALL'. In this example, BIO101 will bill using the rate schedule entry for the '100' level that encompasses 4 credits while the courses

ENG101 and MATH101 will use the rate schedule entry for the 'ALL' level that encompasses 8 credits (4 credits on 2 courses) to calculate charges. **Note**: The 200 course level is not defined on the rate schedule and therefore will use the 'ALL' level entry.

Total Course Load: Total Course Load expands upon Course Level Billing in that the total number of credits registered is used to determine the entry on the rate schedule but then uses that rate for the credits registered for that level. In the above example, the courses are still using the same levels on the rate schedule, however each level will use the dollar amount entry that encompasses 12 credits, then multiply the dollar amount by the number of credits in that level.

Billing Example

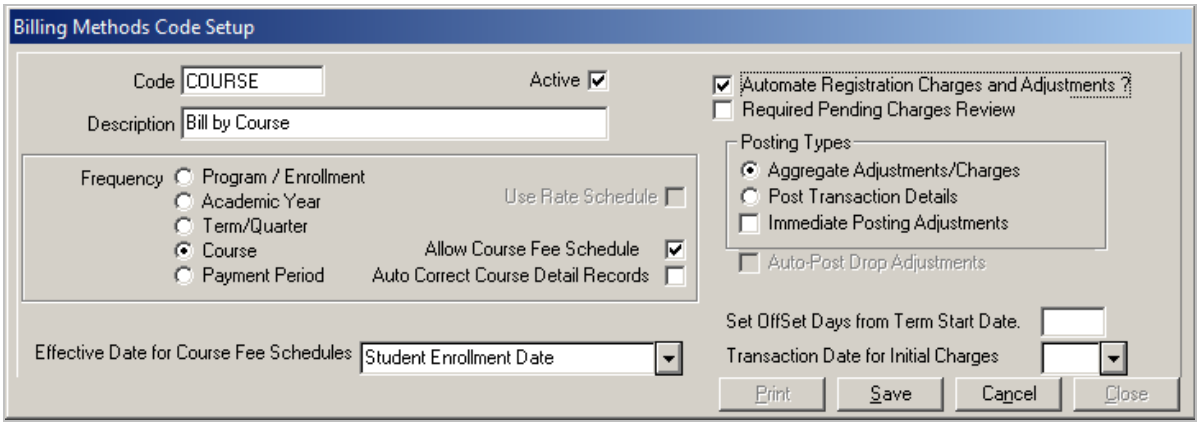
'100' Level	'ALL' Level
1 - 6 credits @ $300	1 - 6 credits @ $310
6 - 12 credits @ $290	6 - 12 credits @ $295

For Total Course Load the student would be billed 4 credits @ $290 for the '100' level, and 8 credits @ $295 for the 'ALL' level.

Note: Courses billed from a course fee schedule would not be used in rate schedule billing.

Course

This option can be billed automatically. This means that as soon as the student registers for the course (class section), a charge is posted to the student's ledger card. The rate is taken from the fees set up in the Courses list.



1. Select the **Course** option in the Frequency section. Notice the Allow Course Fee Schedule check box is displayed.

   Select the Allow Course Fee Schedule check box to determine if a fee schedule can be selected when registering students for classes. The check box is hidden if the Frequency methods are Program / Enrollment or Academic Year. Selecting this check box allows the Registrar to select a course fee schedule while registering a student for a course. If this check box is not selected, the Registrar cannot select a fee schedule during registration. The ability to specify a fee schedule for a course section exists (provided more than one fee schedule is configured for a course), regardless of the configuration of the Allow Course Fee Schedule check box on the billing method.

   System administrators can designate that a billing method allows a course to be billed using a course fee schedule. The Allow Course Fee Schedule check box is only available for billing methods using the frequency Term/Quarter, with a rate schedule and Course (Lists > Student Account > Billing Methods > Add/Edit > Billing Methods Code Setup > select Term/Quarter > select Use Rate Schedule).

   Hierarchy when using Frequency of Course:

   a. Section or Course Fee Schedule assigned at Course Registration - student
   b. Course Fee Schedule assigned as the default on the course

Prior to billing a student who has **Course** configured, CampusNexus Student compares the transaction codes on the course section fee schedule and the course fee schedule. If the same transaction code is found on both of the two forms, CampusNexus Student uses the transaction code charge specified on the course section fee schedule, and then ignores the transaction code charge found on the course fee schedule. While comparing transaction codes, if a transaction code exists on the default course fee schedule but does not exist on the default course section fee schedule (because this fee is a unique transaction code), CampusNexus Student bills the transaction code charge found on the default course fee schedule.

Using the hierarchy system mentioned above, the system administrator can prevent a fee from being charged by adding the same transaction code with a zero amount in a higher level of the hierarchy.

2. Select the Automate Registration Charges and Adjustments? check box to enable all fields on the right side of the form.
3. Select an **Effective Date for Course Fee Schedules** from the drop-down list. The available options are Student Enrollment Date and Class Start Date.
4. The **Automate Registration Charges and Adjustments** field is enabled when you select **Term/Quarter** or **Course** for Frequency. You must select the check box to enable automatic registration billing and automated adjustment of fees in the Student Ledger card. If you select this option, any time a student is registered or unregistered from a course, the change is displayed in the Student Ledger as a pending charge/adjustment.

   An SQL job, Process Automated Registration Billing, posts pending charges/adjustments to the Ledger Card. This job runs every two hours by default. If you select Required Pending Charges Review, the SQL job does not post charges or adjustments automatically.

   If effective date types and effective dates are used, they will be considered during the billing process.
5. Select the **Required Pending Charges Review** check box to Process Pending Charges/Adjustments before they are posted to the Student Ledger card.

Posting Types:

Automated posting of charges and adjustments to the **Ledger Card** is accomplished by an SQL job, Process Automated Registration Billing, that runs every two hours by default. Posting types are based on school-defined preferences.

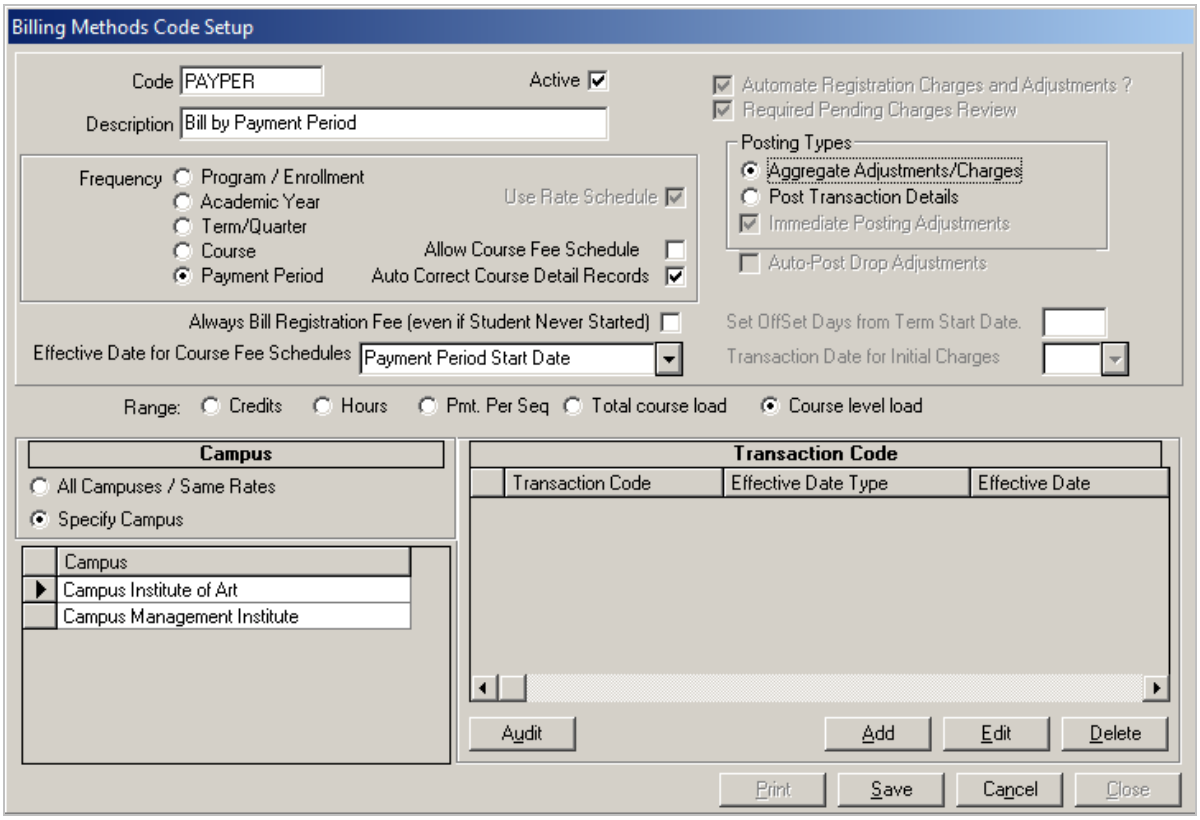
6. Select the **Aggregate Adjustments/Charges** check box to see one record per bill code per term in the Student Ledger Card. If this feature is enabled, details can be viewed in the View > Student Accounts > Ledger Card > Transaction Detail button > Other Information tab. If the Immediate Posting Adjustments option is not selected, the adjustments are posted at the end of drop/add. If drop/add is not being used, the adjustments are posted at the end of the term. The benefit of this type of posting is a "less cluttered" Ledger Card.
7. Select the **Post Transaction Details** check box to see all records per bill code per term in the Student Ledger card. CampusNexus Student posts all details simultaneously at the end of the Add/Drop period. This is not an option if you are billing by Term/Quarter.

   Note: Selecting the Post Transaction Details option and a frequency of Payment Period enables payment period billing with course transaction details.
8. The **Immediate Posting Adjustments** check box is used after the initial billing for a time frame has occurred. Select this check box if the adjustments are to be posted to the ledger card immediately. If you do not select this option, the adjustments remain pending until the next time the SQL job runs. If you are using automated posting without a review, it is recommended that this check box be selected to ensure accurate course amount details.

   Note: The time period between SQL jobs defaults to two hours, but this can be reconfigured by CampusNexus Student Technical Support and your system administrator, according to your institution's requirements.

9. In the **Set Offset Days from Term Start Date** field enter the number of days before or after the start of the term that the institution wishes to perform initial registration billing. For example, type **-2** to indicate two days before the start of the term, and **2** to indicate two days after the start of the term. Enter **0**, the default value, in this field to perform initial registration billing on the term start date. If this field is left blank, initial registration billing occurs on the add/drop date defined at the term level. If there is no add/drop date defined at the term level, registration billing occurs at the end of the term.
10. The **Transaction Date for Initial Charges** list is displayed only when you bill by Course or Term/Quarter. This field determines which date is posted for registration billing on the student's ledger. The options are:
    - **S** - Use System Date
    - **T** - Use Term Start Date

Payment Period



Payment Period frequency forces Use Rate Schedule and Automate Registration Charges and Adjustments? selections to be enabled. The bottom section of the Billing Methods Code Setup form is enabled and displayed where you may make additional selections. With automation turned on and using a rate schedule, users can bill a student more than once per payment period. If a student is billed more than once per payment period and the billing method is a rate schedule using flat amounts, the billing details tab is updated upon registration for any transaction code if the overall amount of the flat fee does not change. This is to break down the amount of the overall charge per course.

1. Select **Payment Period** in the Frequency section.
2. Select **Allow Course Fee Schedule** to determine if a fee schedule can be selected when registering students for classes. Selecting this check box allows the Registrar to select a course fee schedule while registering a student for a course. If this check box is not selected, the Registrar cannot select a fee schedule during registration. The ability to specify a fee schedule for a course section exists (provided more than one fee schedule is configured for a

course), regardless of the configuration of the Allow Course Fee Schedule check box on the billing method.

When the billing method is configured to use fee schedules, CampusNexus Student can bill a course using both the fee schedule and the rate schedule with the fee schedule having precedence over the rate schedule.

The billing method feature follows a hierarchy system to accommodate the default fees found on the Course Section, Rate Schedule, and Course Fee forms.

Hierarchy when using Frequency of Payment Periods and Use Rate Schedule:

a. Section of Course Fee Schedule assigned at Course Registration - student
b. Rate Schedule
c. Course Fee Schedule assigned as the default on the course

For example, prior to billing a student who has Payment Period and Use Rate Schedule configured, CampusNexus Student compares the transaction codes on the course section fee schedule, the rate schedule, and the course fee schedule. If the same transaction code is found on all three forms, CampusNexus Student uses the transaction code charge specified on the course section fee schedule, and then ignores the transaction code charge found on the rate schedule and course fee schedule. While comparing transaction codes, if a transaction code exists on the default course fee schedule but does not exist on the default course section fee schedule or rate schedule (because this fee is a unique transaction code), CampusNexus Student bills the unique transaction code charge found on the default course fee schedule. When calculating the rate charge for the transaction code using the rate schedule, CampusNexus Student omits that course from the rate schedule calculations.

Hierarchy when using Frequency of Course:

a. Section or Course Fee Schedule assigned at Course Registration - student
b. Course Fee Schedule assigned as the default on the course

Prior to billing a student who has **Course** configured, CampusNexus Student compares the transaction codes on the course section fee schedule and the course fee schedule. If the same transaction code is found on both of the two forms, CampusNexus Student uses the transaction code charge specified on the course section fee schedule, and then ignores the transaction code charge found on the course fee schedule. While comparing transaction codes, if a transaction code exists on the default course fee schedule but does not exist on the default course section fee schedule (because this fee is a unique transaction code), CampusNexus Student bills the transaction code charge found on the default course fee schedule.

Using the hierarchy system mentioned above, the system administrator can prevent a fee from being charged by adding the same transaction code with a zero amount in a higher level of the hierarchy.

3. Institutions can configure multiple fee schedules for a course. Each fee schedule consists of multiple individual course fees. If the institution previously defined any fees for the course prior to implementing this new feature, CampusNexus Student moved all fees into one new fee schedule and labeled it as the **Original Fee Schedule**. The default sort order on this form is the **Fee Schedule Code**. When a course fee schedule is highlighted, CampusNexus Student displays all fees assigned to that fee schedule.
4. Select **Auto Correct Detail Course Records** if applicable (check box is cleared by default). Selecting this option enables an automated procedure (auto correct job) that assesses the total amount billed for bill codes set up on the rate schedule and adjusts/creates detail support records per course for the courses comprising the charge.

   Notes:

   - This check box is only visible for payment period or term billing methods that Use Rate Schedule and that do not Post Transaction Details (i.e., aggregate billing methods).

- Billing methods with this check box selected are used in the auto correct job. After a register/unregister/drop operation, an item is added to the queue so that it is processed by the job.
- Selecting this check box disables the Immediate Posting Adjustments check box and sets its value to selected. This is because the billing methods that are included in the auto correct job **must** have auto-posting of register records after a rebilling.
- If both Auto Correct Detail Course Records and Required Pending Charges Review are selected, you can only review the initial posting of charges for the selected time frame; subsequent reviews of pending charges will not be possible.

5. Select **Always Bill Registration Fee (even if Student Never Started)** if desired. When selected, this causes the REG bill code to be charged to students who have school statuses of **N** or **W**, provided the REG bill code is set up as part of the rate schedule OR is set up in the students' fees folders.

Automate Registration Charges and Adjustments

This field is enabled when you select **Payment Period** frequency. This option enables automatic registration billing and automated adjustment of fees in the Student Ledger card. Any time a student is registered or unregistered from a course, the change is displayed in the Student Ledger as a pending charge/adjustment.

An SQL job, Process Automated Registration Billing, posts pending charges/adjustments to the Ledger Card. This job runs every two hours by default. If you select Required Pending Charges Review, the SQL job does not post charges or adjustments automatically.

If effective date types and effective dates are used, they are considered during the billing process.

Required Pending Charges Review

This check box enables you to Process Pending Charges/Adjustments before they are posted to the Student Ledger card. For Payment Period frequency, this option is automatically enabled.

Posting Types

Automated posting of charges and adjustments to the **Ledger Card** is accomplished by an SQL job, Process Automated Registration Billing, that runs every two hours by default. Posting types are based on school-defined preferences.

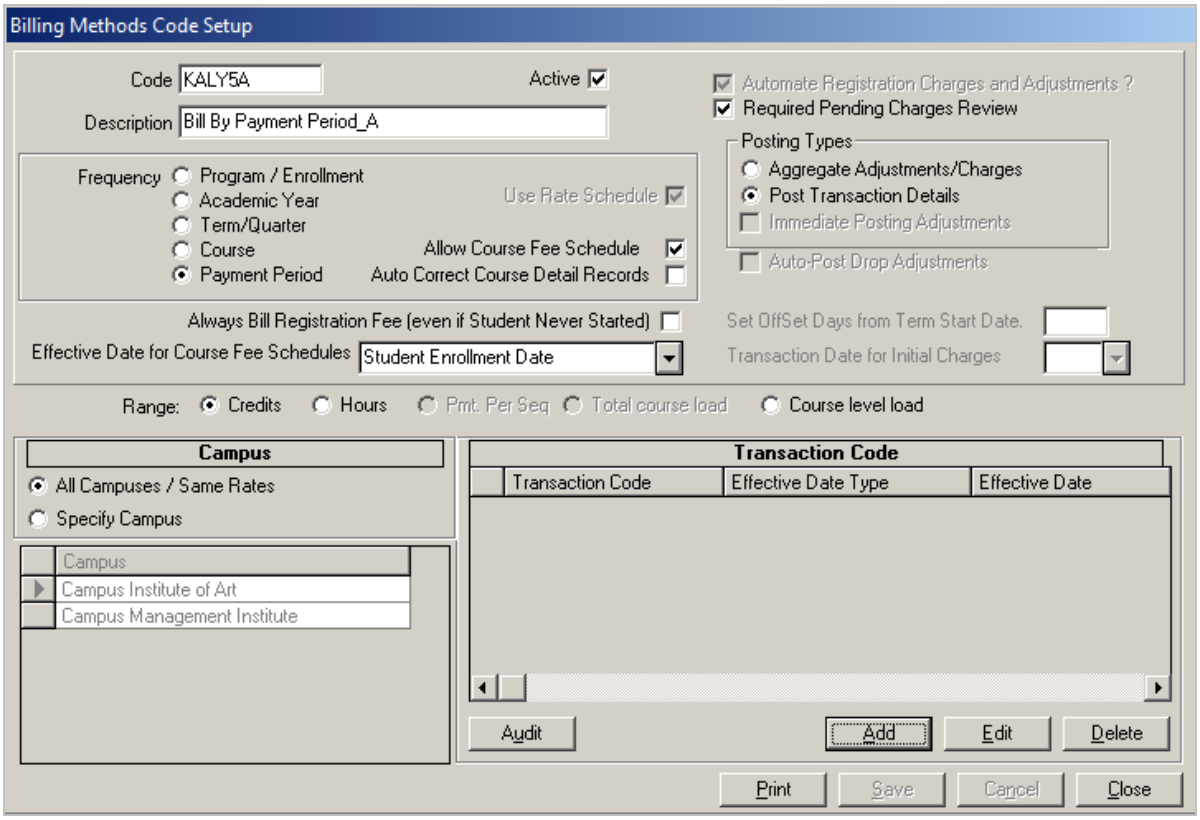
Aggregate Adjustments/Charges

This option enables you to see one record per bill code per payment period in the Student Ledger Card. For Payment Period frequency, this option is automatically enabled. When this feature is enabled, details can be viewed in the View > Student Accounts > Ledger Card > Transaction Detail button > Other Information tab. If the Immediate Posting Adjustments option is not selected, the adjustments are posted at the end of drop/add. If drop/add is not being used, the adjustments are posted at the end of the payment period. The benefit of this type of posting is a "less cluttered" Ledger Card.

Post Transaction Details

When a course is registered, if the billing method is configured with a frequency of Payment Period and Post Transaction Details is selected, a pending charge is created for every transaction code configured in the rate schedule. Each ledger entry contains a field for course, section and payment period.

When the frequency of Payment Period is selected, the option for Post Transaction Details is enabled. Selecting this option and a frequency of Payment Period enables payment period billing with course transaction details. This allows users to bill by payment periods but at the same time display separate transactions per each course bill per transaction code. This new billing method is only available for students enrolled in non term programs.



Note: When the frequency of Payment Period is selected, the Payment Per Sequence and Total Course Load are disabled if Post Transaction Details is selected.

When Post Transaction Details is selected for a billing method, the automated billing logic posts changes for a course upon the first instance of attendance being posted for the course. Additionally, when Post Transaction Details and automated billing is in use for a billing method, student accounts administrators can see that the transaction date for each registration billing charge in the payment period is equal to the course section date.

When rebilling a course in the payment period, attendance has to be posted for the charges pending in the payment period.

Set Offset Days from Term Start Date

Enter the number of days before or after the start of the payment period that the institution wishes to perform initial registration billing. For example, type **-2** to indicate two days before the start of the term, and **2** to indicate two days after the start of the payment period. Enter **0**, the default value, in this field to perform initial registration billing on the payment period start date. If this field is left blank, initial registration billing occurs on the add/drop date defined at the payment period level. If there is no add/drop date defined at the payment period level, registration billing occurs at the end of the payment period.

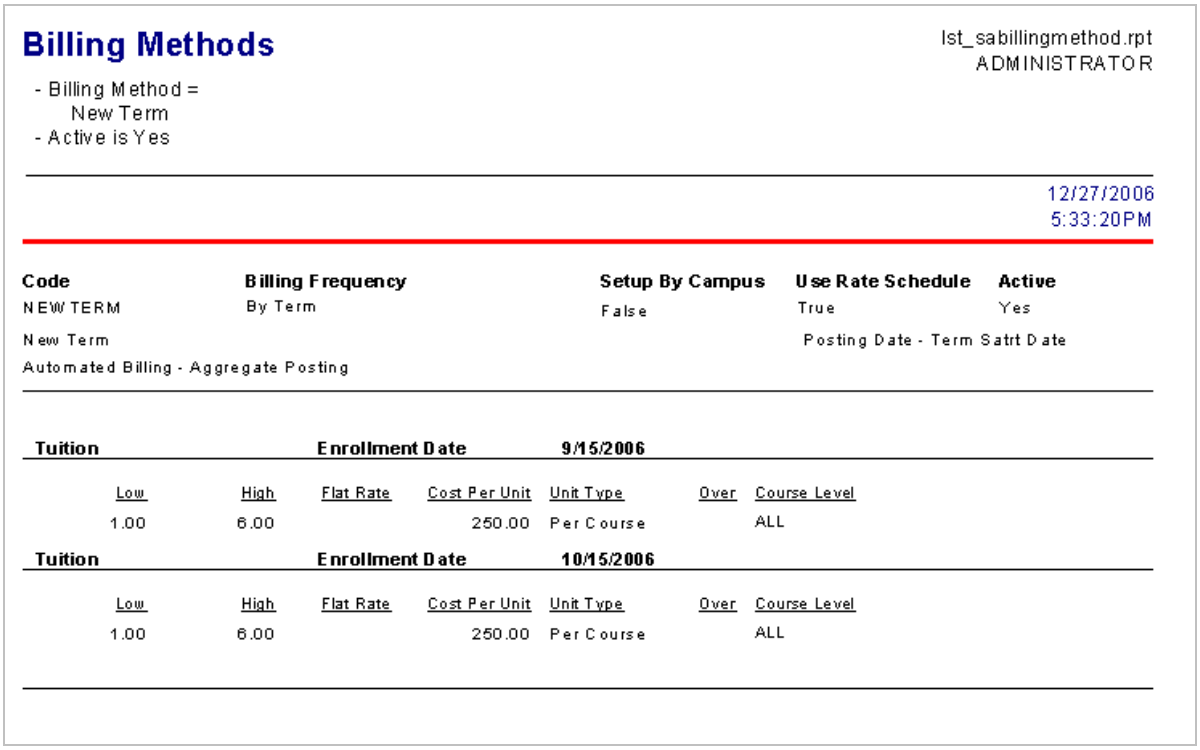
Transaction Date for Initial Charges

This field determines the date posted for registration billing on the student's ledger. The options are:

- **S** - Use System Date
- **T** - Use Term Start Date

Billing Method Report

Click **Print** on the Setup - Student Accounts Lists [Billing Methods] tab, to view a Billing Methods report. This example uses the Term/Quarter frequency with a rate schedule that is using the Effective Date Type of Enrollment Date.



Billing Methods

lst_sabillingmethod.rpt
ADMINISTRATOR

- Billing Method =
  New Term
- Active is Yes

12/27/2006
5:33:20PM

Code	Billing Frequency	Setup By Campus	Use Rate Schedule	Active
NEW TERM	By Term	False	True	Yes
New Term			Posting Date - Term Satrt Date	
Automated Billing - Aggregate Posting				

Tuition **Enrollment Date** **9/15/2006**

Low	High	Flat Rate	Cost Per Unit	Unit Type	Over	Course Level
1.00	6.00		250.00	Per Course		ALL

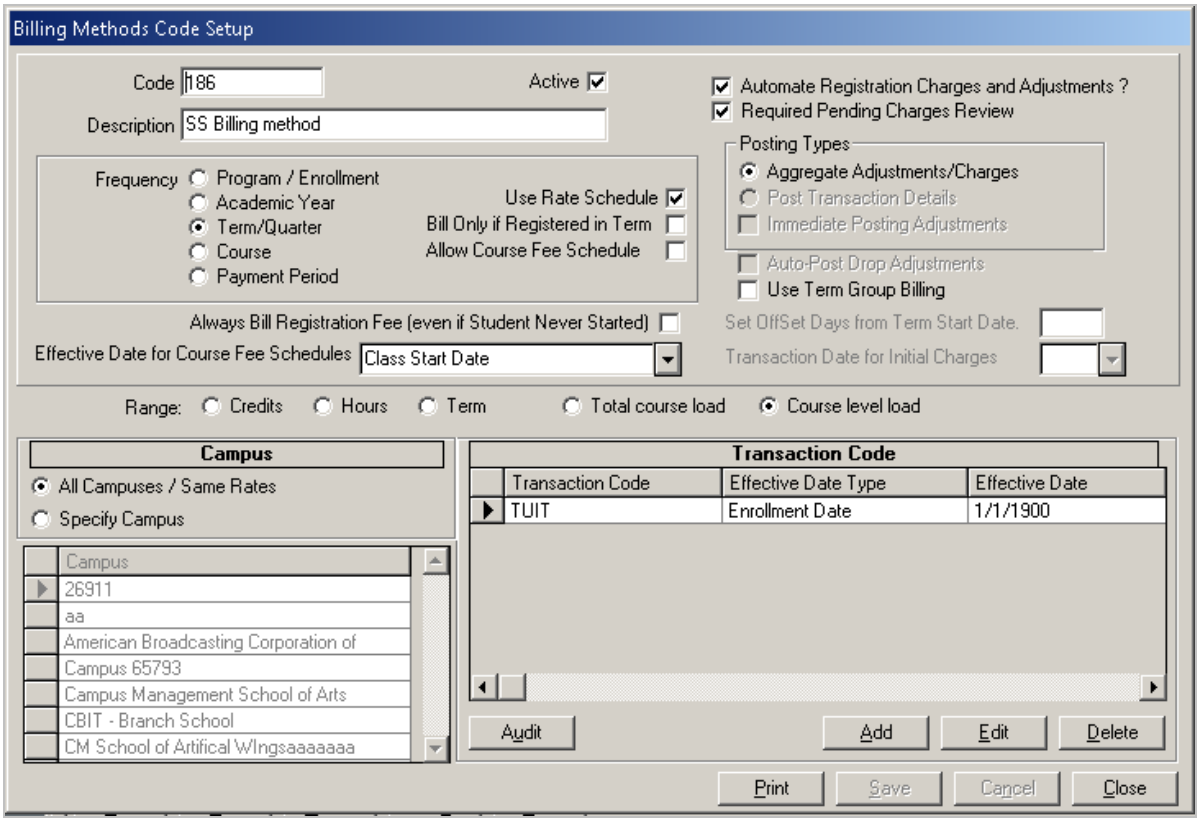
Tuition **Enrollment Date** **10/15/2006**

Low	High	Flat Rate	Cost Per Unit	Unit Type	Over	Course Level
1.00	6.00		250.00	Per Course		ALL

Dual Enrollment Automated Rate Schedule Billing Setup

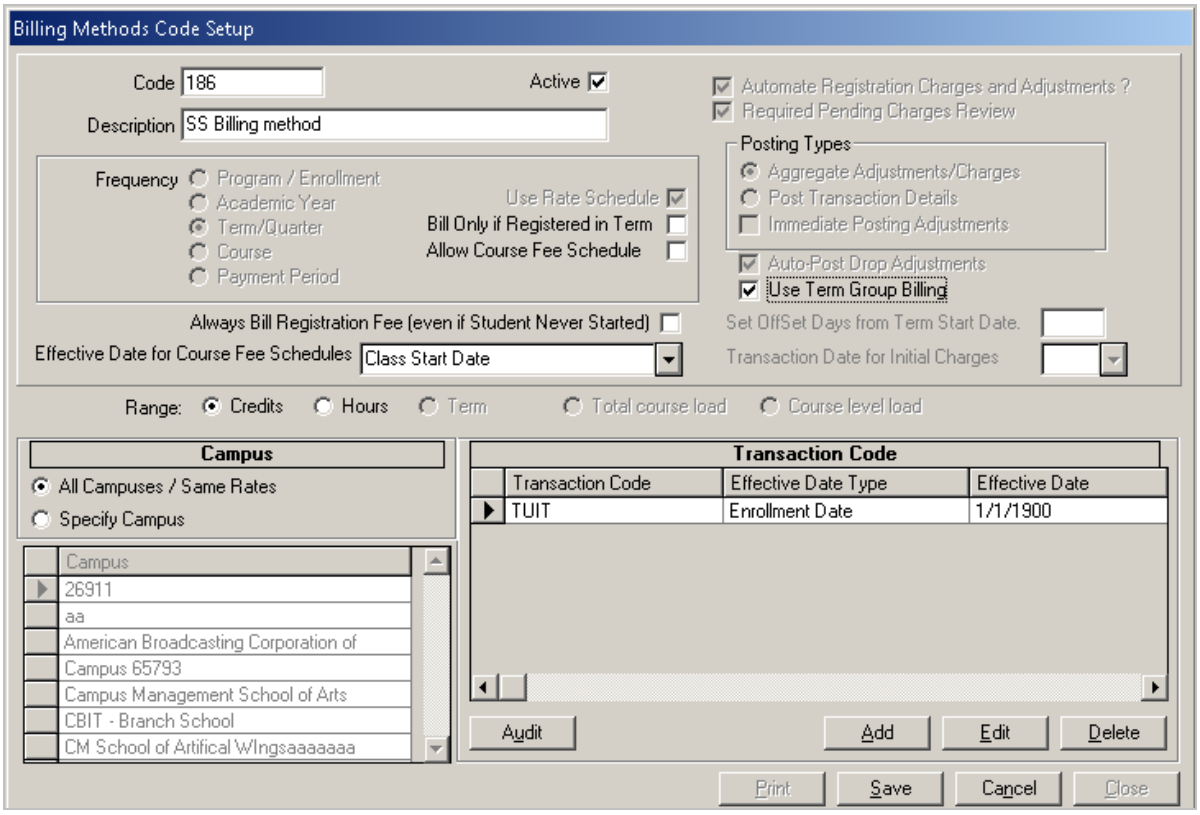
For Student Accounts Billing Method, a new range called 'Use Term Group Billing' is available for this feature to work only if the following five options are selected:

1. Frequency - Term/Quarter
2. Use Rate Schedule
3. Automate Registration Charges and Adjustments
4. Required Pending Charges Review
5. Posting Types - Aggregate Adjustments/Charges



Once 'Use Term Group Billing' is selected, the 'Auto-Post Drop Adjustments' option will be automatically selected. Furthermore, the following six selection boxes cannot deselect until 'Term Group' is deselected.

1. Frequency - Term/Quarter
2. Use Rate Schedule
3. Automate Registration Charges and Adjustments
4. Required Pending Charges Review
5. Posting Types - Aggregate Adjustments/Charges
6. Auto-Post Drop Adjustments



Select the 'Use Term Group Billing' option to ensure when billing student fees, that credits are aggregated across all terms in a group, across connected enrollments and charged against the default billing term at the default connected enrollment.

Only when the Billing Method Code is the same for both connected enrollments and the 'Use Term Group Billing' option is selected, will the credits get aggregated across enrollments for tuition charges.

If the Billing Method Code is not the same for both connected enrollments and the new 'Use Term Group Billing' option is selected, the credits aggregate for the term group within the enrollment but not across the enrollments.

Setup - Student Account Lists [Cash Drawers]

The cashiering function keeps track of money taken in and paid out by various departments or campuses in an institution. This feature functions much the way that cash drawers do in retail businesses. Cash drawers ensure that payments get posted to a student's Ledger Card properly, even if the student made a payment at a campus other than the one in which the student is enrolled. Examples are the Admissions Office, Book Store, Activities Office, etc. For example, a student at South Campus of State University might make a payment at North Campus. The payment will be deposited in North Campus' dedicated account, but the payment will be reflected in the student's ledger card as if the payment were made from South Campus.

Cash drawers require the following:

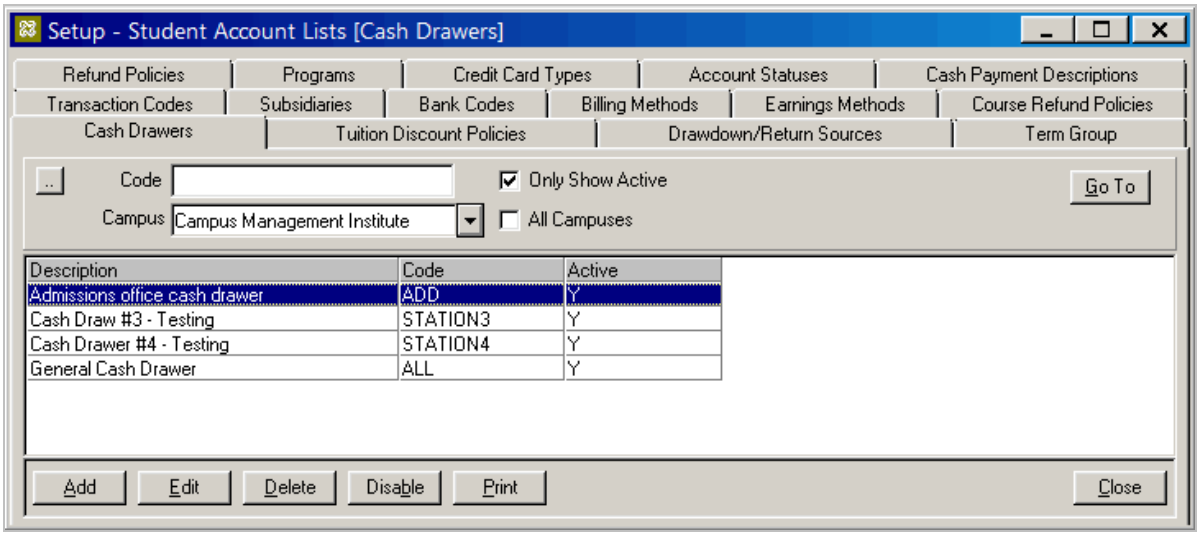
- The cashiering function must be enabled (Setup > Campus Information > Allow).
- Staff members must be designated as cashiers. A cashier is a staff member who receives payments of any kind from students. Each cashier is responsible for his/her own cash drawer. At the end of each business day, each cashier reconciles his/her cash drawer(s) outside the system. That is, the cashier adds up the total dollars, checks, and receipts received and reconciles with the system transaction records. The bursar or other designated administrative staff then consolidates the total receipts from each drawer into the daily deposit for the institution.
- The institution must have set up dedicated bank accounts for this purpose.

For security purposes, institutions can set limits on the amount of money, including checks, EFT vouchers, credit card receipts etc., that a cashier may have in his/her drawer during a session. As the user approaches this amount, the system displays a warning message. When a user accepts a payment that puts the dollar amount at or over the school-defined limit, the system will no longer accept payments. The cashier must then open another drawer. Money, checks and receipts in the "drawer" must then be deposited in the appropriate office. This is a school-defined procedure.

All cash drawers are managed by the authorized user who consolidates all funds from all cashiers into one bank deposit.

To add or edit a list of cash drawers codes:

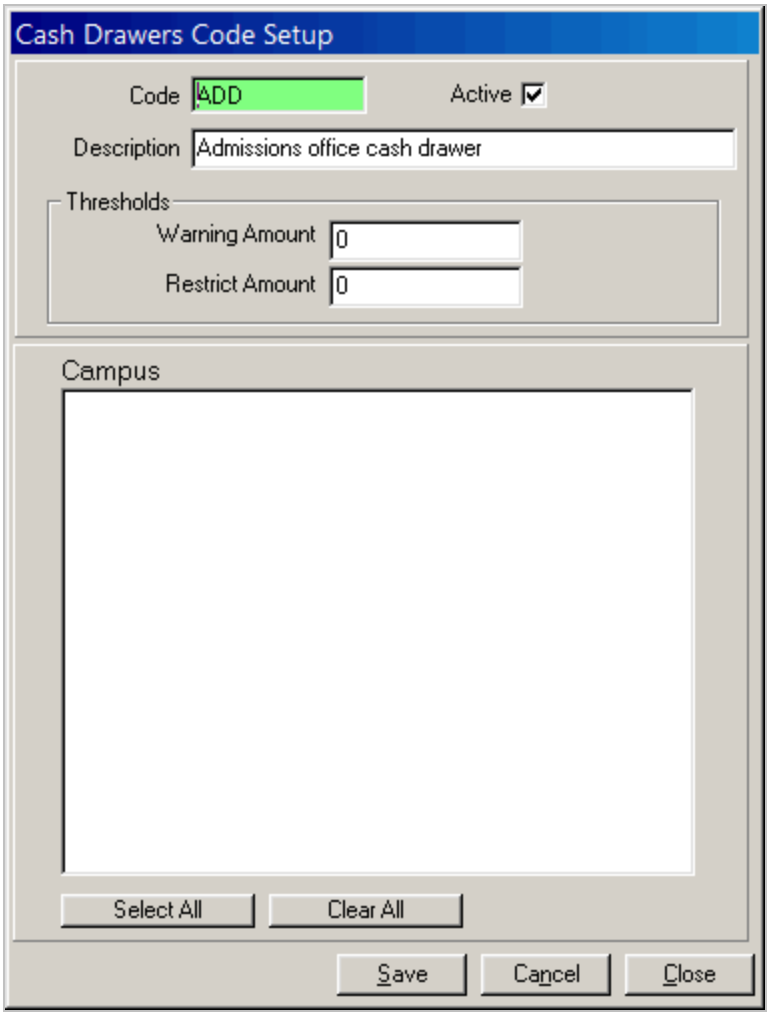
1. Navigate to **Lists** > **Student Accounts**. The Setup - Student Accounts Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Cash Drawers**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in

the text box and press **Enter** to view the corresponding record in the list.

4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Cash Drawers Code Setup form is displayed.



7. Specify a unique **Code**. It should be intuitive and easily recognizable.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.
10. Under Thresholds enter dollar amounts for threshold values associated with this cash drawer.
    - The **Warning Amount** is an amount that triggers a message indicating that the cashier is approaching the allowable limit for total transactions in this cash drawer for each session.
    - The **Restrict Amount** is the allowable limit for transactions in this cash drawer for each session. The

system will not process further transactions when the amount in the cash drawer is equal to or exceeds this amount.

Note: When the cash draw reaches its school-defined limit, the user must open a new drawer or remit the contents of the "full" drawer to the appropriate office. This is a school-defined operating procedure.

11. Select a campus or campuses associated with this drawer. Add or remove campuses individually or use the **Select All** and **Clear All** buttons.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

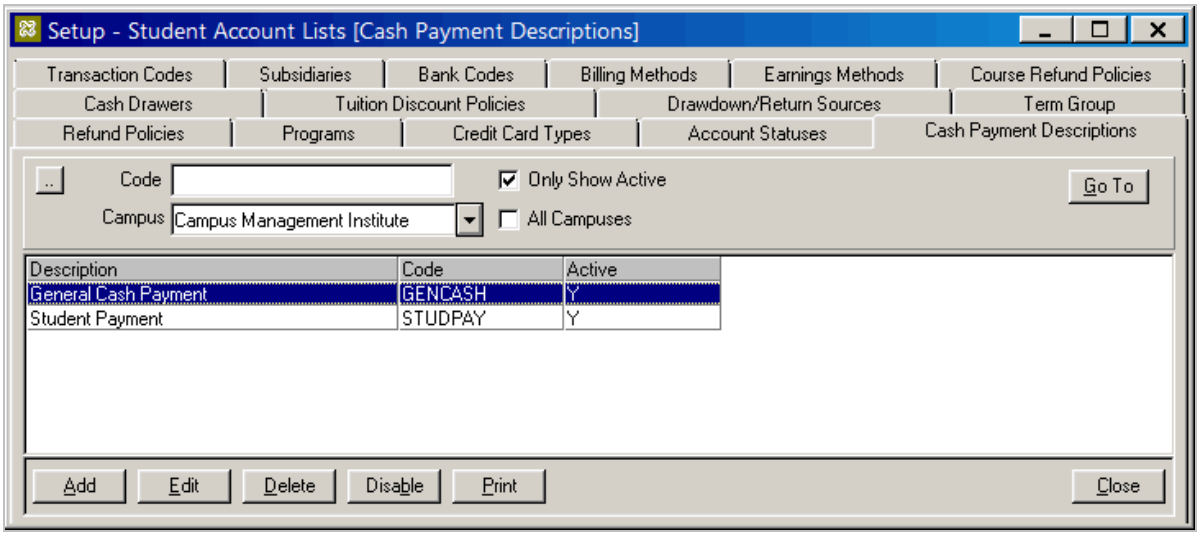
Setup - Student Account Lists [Cash Payment Description]

This form contains a table with all cash payment descriptions configured for the selected campus. All payment descriptions consist of the following:

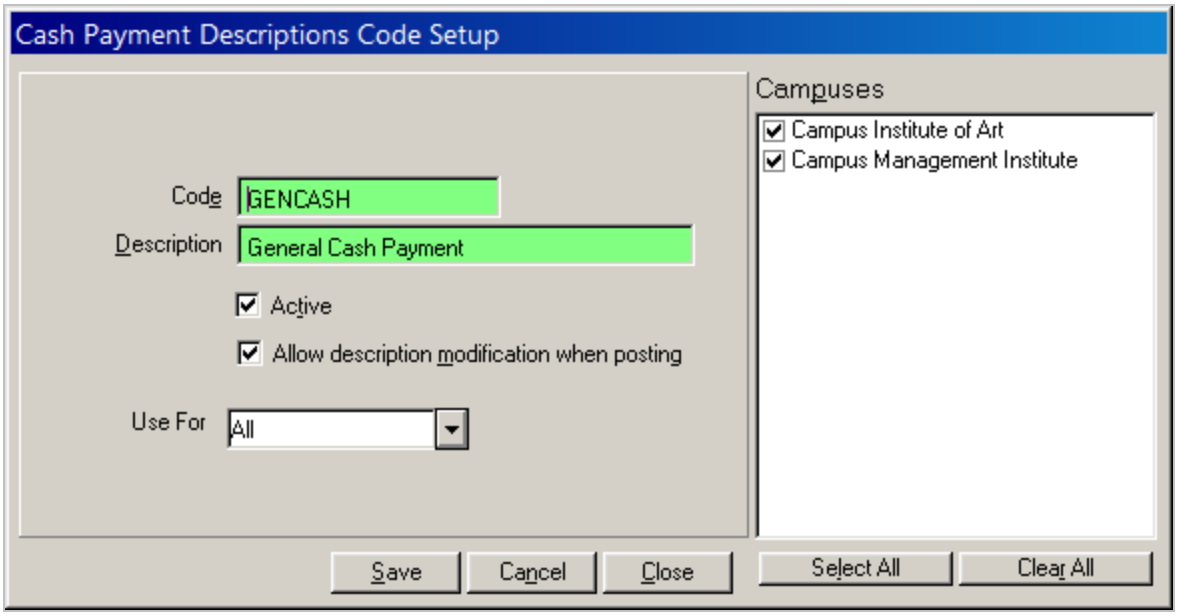
- Description – a text field for displaying all payment descriptions.
- Active – a user-selectable Yes/No option to indicate if the eligible description is active or inactive.
- Editable – a user-selectable Yes/No option to signify if the description can be modified by the user.
- Use – a user-selectable option to indicate whether the description is to be used for Student Ledger, Subsidiary Ledger, or both.

To add or edit a list of cash payment descriptions codes:

1. Navigate to **Lists** > **Student Accounts**. The Setup - Student Accounts Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Cash Payment Descriptions**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Cash Payment Descriptions Code Setup form is displayed.



7. Specify a unique **Code**.
8. Enter a **Description**.
9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
10. Select **Allow description modification when posting** if the description can be edited after being selected during a cash payment process.
11. In the **Use For** field, select a ledger. This option filters the descriptions when posting a payment on the main ledger and on a subsidiary ledger.
12. Select one or more **Campuses**.
13. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

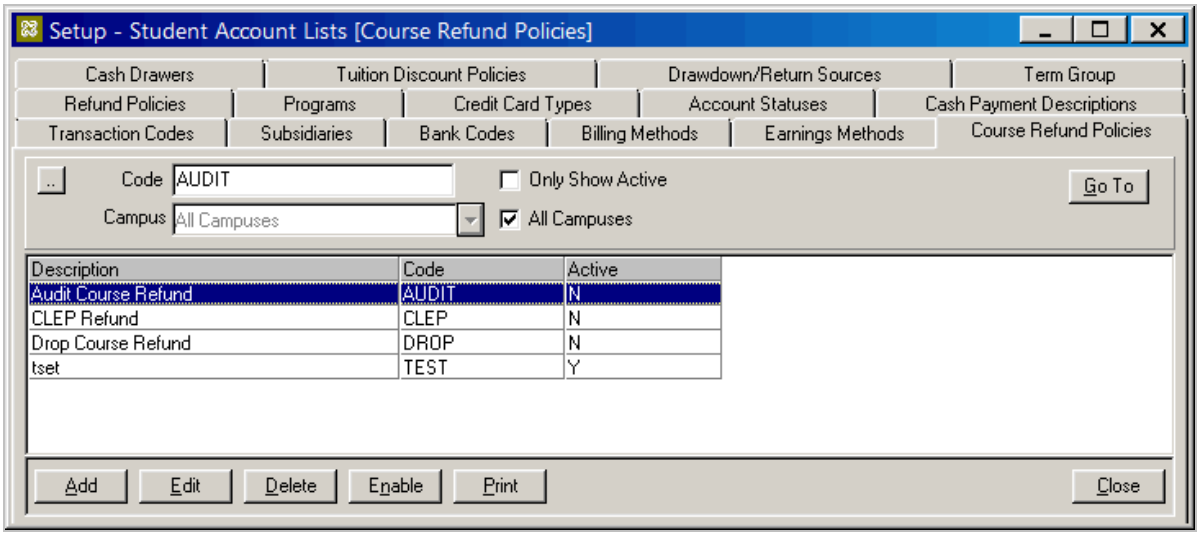
Setup - Student Account Lists [Course Refund Policies]

The U.S. Department of Education, your state's department of education, and your institution's administration may have different policies and procedures for refunding money to students when they leave school before completing their programs. Typically, the refund policy that is most advantageous to the student must be the one selected at the time the calculation is made. Refund calculations are triggered for a given student.

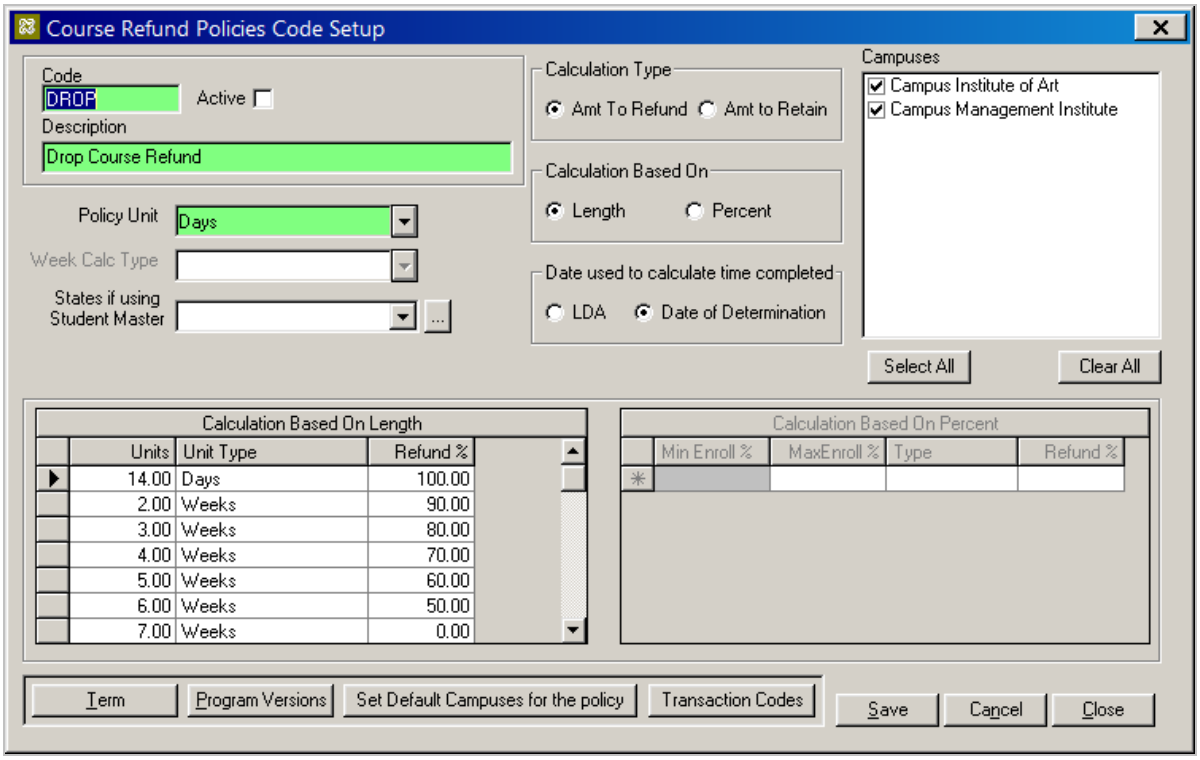
The refund calculation in CampusNexus Student supports straight pro rata refund policies. That is, calculations are based on the number of days or weeks completed by the student for the enrolled course. You may need to set up several refund policies from which to select in different circumstances.

To add or edit a list of course refund policies codes:

1. Navigate to **Lists** > **Student Accounts**. The Setup - Student Accounts Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Course Refund Policies**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Course Refund Policies Code Setup form is displayed.



7. Specify appropriate options. See Field Descriptions.

   Note: The refund calculations are first based on the Calculation Based on Length grid, then on the Calculation Based on Percent grid. You can use either or both of these grids to define your refund policy.

8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Field Descriptions

Field	Description
Code	Enter a code for this refund policy.
Active	Select or clear the Active flag as required. Clear the flag if this is no longer an active refund policy.
Description	Enter a description for this refund policy.
Campuses	Select the campuses to which this policy applies. Multiple campuses can be related to the same refund policy. At least one campus must be selected before a new refund policy record can be saved.
Policy Units	This field determines how the refund relates to time spent. The values are Weekly (default) and Daily.
Weeks Calc Type	This field is enabled only if the Policy Units is Weeks. Use the drop-down list to select how your institution defines a week. Options are Calendar Days or Scheduled Instruction Days. • Scheduled Instruction Days calculates the number of weeks based on at least one class session per calendar week (Sun-Sat). • Calendar (default) totals the number of days in the time period calculation minus holidays -if that option has been enabled- divided by seven.

Field	Description
States if using Student Master	This field allows your institution to specify the states to which the course refund policy applies. If the course refund policy (see Delivery Methods) is to be based on the student's state of legal residence, the state stored with the address in the student master record is compared against the states selected for each configured refund policy. The course refund policy used will be the one where one of the states selected for the policy matches the state stored with the address in the student master record. **Note**: Any course refund policy that does not have states selected as a filter continue to be used with existing logic, i.e., it is selected as the default for campus, term, or program version. Validation is in place that does not allow a state to be associated with more than one course refund policy for the same campus.
Calculation Type	Select Amt to Refund or Amt to Retain.
Calculation Based On	Select Length or Percentage.
Calculation Based On Length	This grid is considered first. • Units Attendance - Enter the number of attendance units for this row. • Unit Type - The Attendance Units column is used to determine what unit the Length condition applies to. Valid values are Weeks, Days, During Add/Drop • Refund (Retain) Percentage - Enter the percentage to refund or retain for this row. • Max Earn - Enter the maximum amount that can be earned at this level of policy units completed.
Calculation Based on Percent	This grid is considered second. • Minimum Enroll Percentage - Enter the minimum percentage of the enrollment completed by the student. • Maximum Enroll Percentage - Enter the maximum percentage of the enrollment completed by the student. • Type (Refund Percent Flag) - Valid values are Pro Rata or Percentage. The Type (Refund Percent Flag) column determines if the percentage to refund/retain comes from the Refund Percent field or if the percentage to refund or retain is the actual percentage completed by the student. For straight pro rata policies, the percentage of tuition earned by the institution correlates exactly to the percentage of the program the student completed. For example, if the student completed 47 % of the program before dropping, the institution would retain 47 % of the tuition. • Refund (Retain) Percentage - Enter the percentage of funds received to be refunded or retained.
Date used to calculated time completed	Use these buttons to specify which date to use when evaluating time completed for a given course. Select LDA (Last Date of Attendance) or Date of Determination. The LDA option is the last date of positive attendance.

Field	Description
Program Versions	This button is enabled after you save a new course refund policy and when you edit an existing policy. When you click this button, the Attach Course Refund Policy To Program Versions form is displayed.  Select or clear the check boxes to associate or disassociate the course refund policy with the program versions.

Field	Description
Term	This button is enabled after you save a new course refund policy and when you edit an existing policy. When you click this button, the Attach Course Refund Policy To Terms form is displayed.  Select or clear the check boxes to associate or disassociate the course refund policy with the terms.

Field	Description
Set Default Campuses for the policy	This button is enabled after you save a new course refund policy and when you edit an existing policy. When you click this button, the Set Default Campuses for Policy form is displayed.  Select or clear the check boxes to associate or disassociate the course refund policy with the campus.

Field	Description
Transaction Codes button	This button is enabled after you save a new course refund policy and when you edit an existing policy. When you click this button, the Course Refund Policy Transaction Codes form is displayed.  In the displayed grid of active billing codes, each code can be configured individually by clicking in the Action column to open a combo box with the following options for course refund adjustment: • Reverse (default): Reverse the charge on the student's ledger card (net to zero) before the refund is calculated. The full amount of the original charge is refunded. • Earn: The charge is 100% earned when charged (0% refund). The institution retains the original charge amount for the specified billing code. • Calc: Include the charge in refund calculations. A percentage of charges earned for the dropped course is determined based on the course refund policy associated with this transaction code.

Setup - Student Account Lists [Credit Card Types]

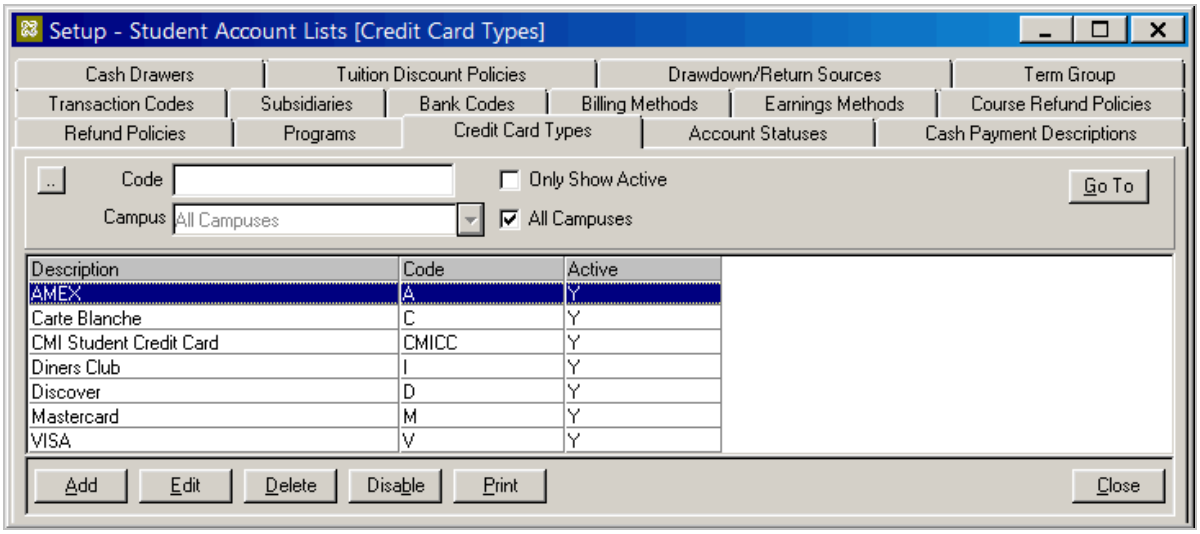
Set up the credit card types accepted by your institution. On reports of Admissions Deposits, Cash Receipts Detail, and Credit Card Transactions, the descriptions for credit cards are taken from the Credit Card Types list. See also Add/Edit Credit Card Information and Payment Information.

When you accept a credit card for a deposit or agency/student payment, CampusNexus Student validates the credit card number only if the credit card type is one of the following:

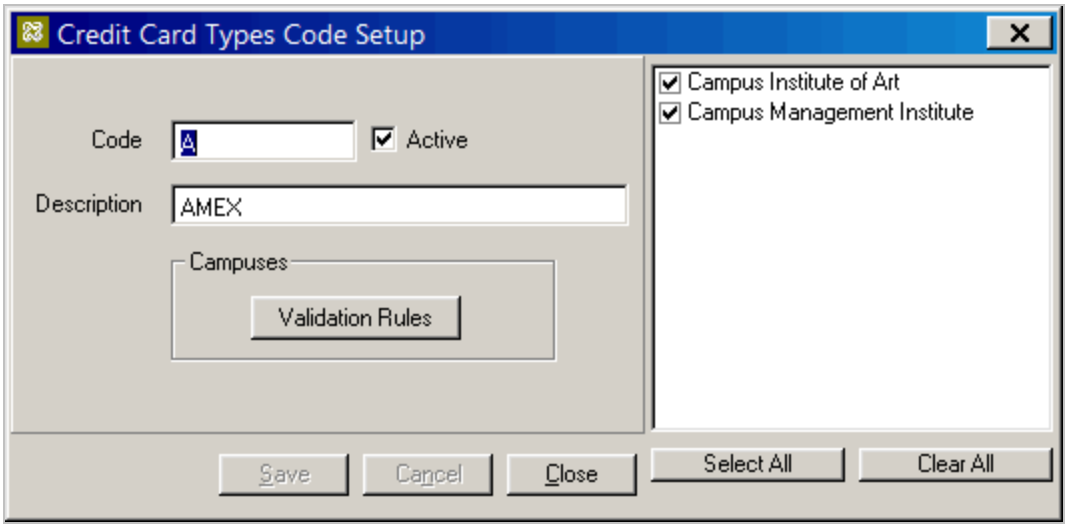
- A - American Express
- C - Carte Blanche
- D - Discover
- I - Diners Club
- M - MasterCard
- V - Visa

To add or edit a list of credit card types codes:

1. Navigate to **Lists** > **Student Accounts**. The Setup - Student Accounts Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Credit Card Types**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Credit Card Types Code Setup form is displayed.



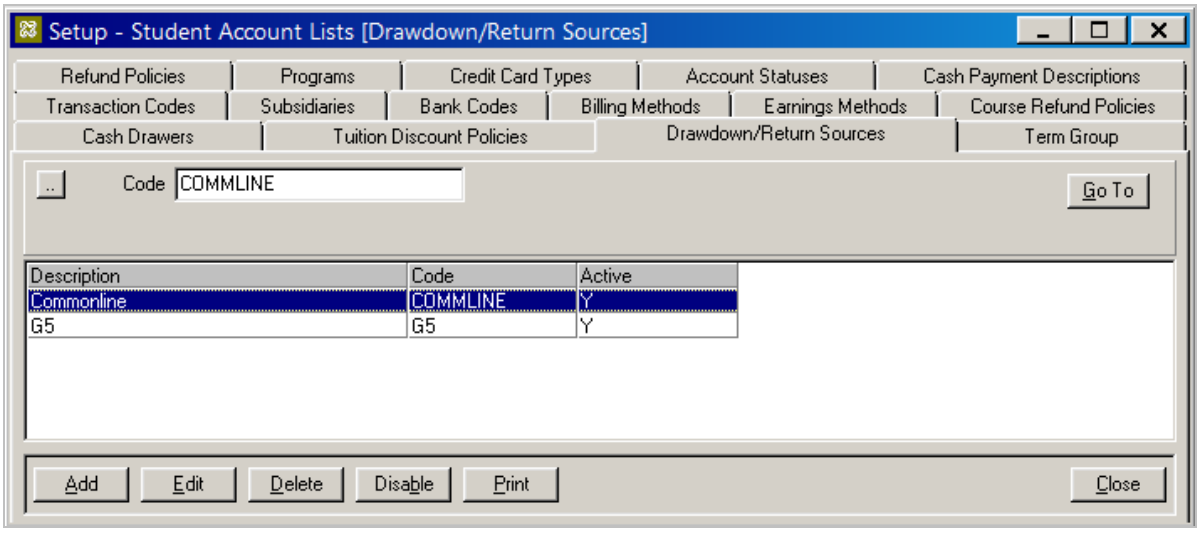
7. Specify a unique **Code**.
8. Enter a **Description**.
9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
10. Select one or more **Campuses**.
11. Click **Validation Rules**. CampusNexus Student displays a list of campuses associated with your institution. Select the campuses that require validation of credit cards with payments. When you select a campus, that campus enforces validation rules with each credit card payment.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Student Account Lists [Drawdown/Return Sources]

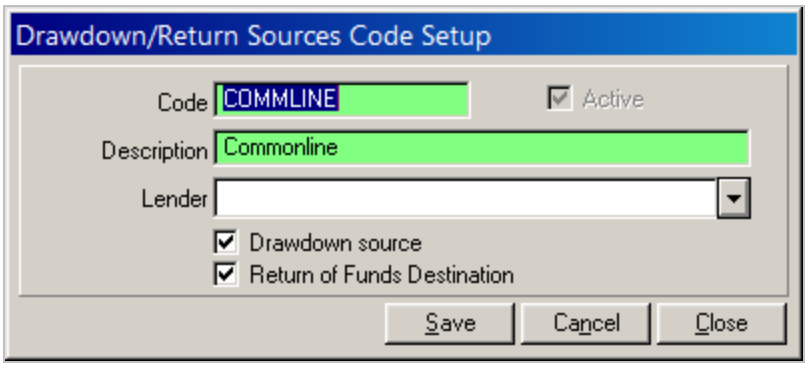
You can set up drawdown/return sources for student accounts.

To add or edit a list of drawdown/return sources codes:

1. Navigate to **Lists** > **Student Accounts**. The Setup - Student Accounts Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Drawdown/Return Sources**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Drawdown/Return Sources Code Setup form is displayed.



7. Specify a unique **Code**.
8. Enter a **Description**..
9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.

10. Select the **Lender**.
11. Select the **Drawdown Source** check box if the code applies to drawdowns.
12. Select the **Return of Funds Destination**check box if the code applies to the return of funds.
13. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Student Account Lists [Earnings Methods]

This procedure establishes the methods by which your institution records its tuition and other deferred earnings. Transaction codes can be set up to be deferred earnings transactions.

Several options are available for earnings calculations. You probably need only one or two of these options, depending on the nature of your institution. Perhaps, you need one method for traditional in-the-class-room programs and one method for distance education programs. While we illustrate only a few of the options here, you can design other variations from the components available in this procedure.

Note: Institutions that are publicly-held corporations or that are required by another state or accrediting entity must report up-front fees (like registration fees) over the life of the program. Proprietary institutions do not need to earn reg fees over the life of the program. Refer to the Staff Accounting Bulletin No. 101 (SAB101) document from the Securities and Exchange Commission (https://www.sec.gov/interps/account/sab101.htm) for more information on revenue recognition.

If your Revenue Basis (Earning Unit) is months, the following information applies. The revenue basis is set up under Billing Methods.

- If you Bill By Term, the Total Earning Units are Months in the Term
- If you Bill by Program, the Total Earning Units are Months in the Program
- If you Bill by Credit Hours, the Total Earning Units are Months in the Program
- If you Bill by Academic Year, the Total Earning Units are Months in the Academic Year.

You will select one of these earnings methods when you set up Program version financial parameters.

Revenue Recognition Options

Revenue Recognition allows for setting parameters on how to earn on the First and Last months of the Earnings period. This only applies to earnings methods that use Months as the Earning Unit. These parameters determine if a student earns a Full Month, Half Month, or Nothing at all in the First and Last months of the Earnings period.

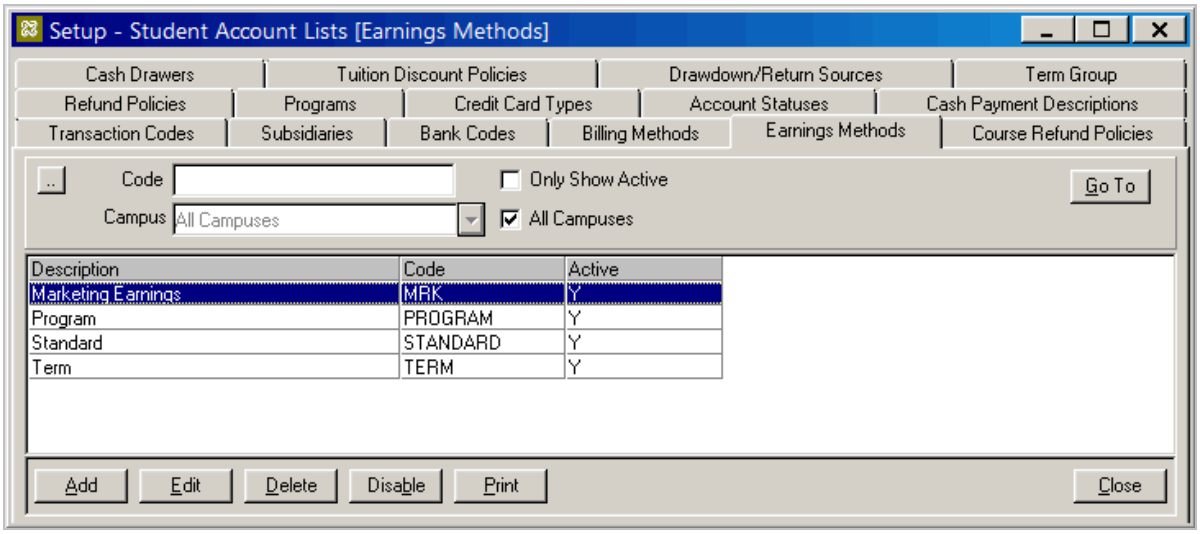
The Revenue Recognition/Earnings Method setup and calculation allows for earning ½ month of revenue on the First and/or Last month of Enrollment. You can configure the Earnings Policy to earn ½ month in the first and last months using two separate and unrelated days.

Example:

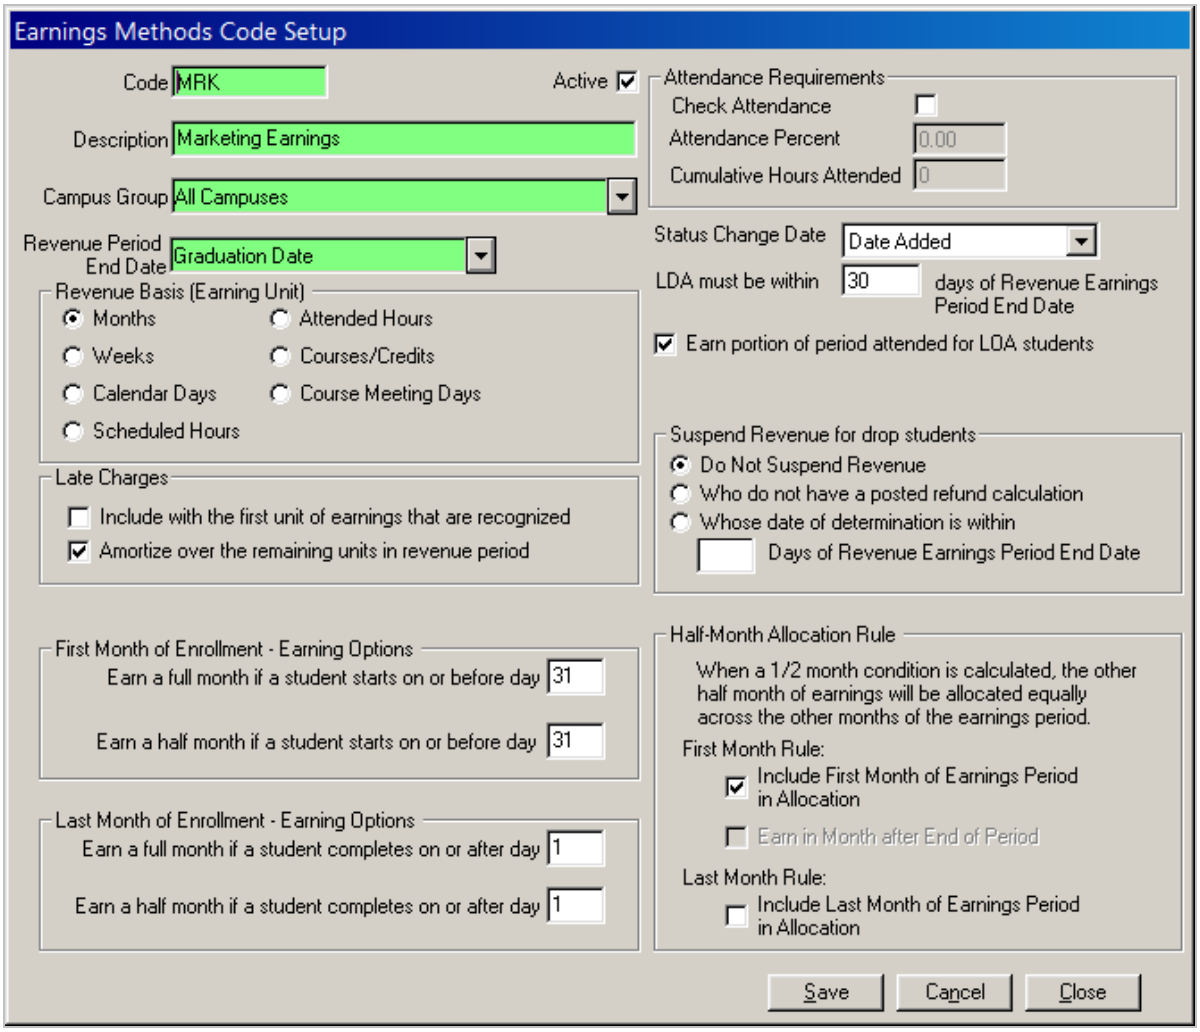
An institution may want to earn a full month on the first month of enrollment regardless of the day of the month that the student starts, and earn a full month on the last month of enrollment only if the student ends after the 15th of the month. Configure the first month as "On or before the 31st of the month, and the last month as on or after the 15th of the month). See also Reverse Revenue Recognition.

To add or edit a list of earnings methods codes:

1. Navigate to **Lists** > **Student Accounts**. The Setup - Student Accounts Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Earnings Methods**.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Earnings Method Code Setup form is displayed.



7. Specify a unique **Code**.
8. Enter a **Description**.
9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
10. Select a **Campus Group** that will use this earning method.
11. Select the date to use as the **end of the revenue period** to correctly calculate earnings for programs that are earned by program:
    - **Graduation Date** (default) - end of the revenue period is the student's graduation date.
    - **Extern Begin Date** - The end of the revenue period is the date when the externship begins. The Extern Begin Date is the revenue period end date only when an enrolled student is in a program version where the billing method is based on program or based on term. If an enrolled student is in a program version that earns by program or by term and the program version uses the earning method defined to use Extern Begin Date, CampusNexus Student uses the Extern Begin Date as the revenue period end date. If the student's program or term meets the above criteria and has a blank or null in the Extern Begin Date field, the student's record will appear as an exception on the Revenue Exception Report.
12. Select an **Attendance Requirements** option if applicable:

- **Check Attendance** - Check this box if student attendance in class is required to earn tuition and other deferred charges. If the check box is selected, enter a value in the Attendance Percent, the Cumulative Hours Attended, or both fields below.
- **Attendance Percent** - Optional. If attendance is required, enter the minimum percentage of attendance required by each student to justify earned tuition for the student. If you do not use a minimum percentage, enter zero.
- **Cumulative Hours Attended** - Optional. Enter the minimum number of cumulative hours per month required to justify a month of earned tuition. Enter zero if no minimum number of hours is required.

13. Select Date Added or Effective Date in the **Status Change Date** field.
14. The **LDA must be with (X) days of Revenue Earnings Period End Date** field controls the length of time from the student's Last Date of Attendance (LDA) to the time that earnings are frozen for the student and the student is placed on the exception report. In the example, if a student's Last Day of Attendance is longer than 45 days prior to the run date of the revenue program, the student will be noted as an exception. This will help forecast revenue. This rule will only be relevant on students in an active or probation status.
    - You can specify the number of days to check the LDA. Zero (0) indicates that the LDA is not to be checked. NULL also indicates that the LDA is not to be checked. One (1) indicates that the LDA must be greater than or equal to the As Of date of the revenue calculation. That is to say, the number of days is inclusive of the Day that the revenue is run. If revenue is run on April 30, 2002, and this setting is set to 7 days, then the student would have to have an LDA of April 24, 2002 or after.
    - Verbiage on the message says "*LDA not within xx days of revenue start date*" where xx represents the # of days set up in Lists.
15. Select **Earn portion of period attended for LOA student** to indicate that revenue will be earned for students who attended a portion of the revenue period but have a school status of LOA as of the end of the revenue period.
16. Select a Revenue Basis (Earning Unit) option. Select a Late Charges (Revenue Recognition) option if offered.
17. Select a Suspend Revenue for drop students option.
18. Select a Half-Month Allocation Rule option if offered.
19. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.
20. Click **Print** on the Setup - Student Account Lists (Earning Methods] tab to get a list of your earnings methods.

Revenue Basis (Earning Unit)

Note: When a program version is set to earn by academic year, you can configure the number of units to earn throughout each academic year. CampusNexus Student performs the revenue recognition process ignoring the usual calculation of units and using the override to earn as configured. This only works if you select the Revenue Basis as Earn by Months, Weeks or Calendar.

- Select **Months** if you earn tuition on a monthly basis.
- Select **Weeks** if you earn tuition based on weeks attended.
- Select **Calendar Days** if you earn tuition based on calendar days.
    - Select the **Adjust Earned/Total Units for Holidays** option, if you would like holidays to be removed from earned or total days. The following options are available when selecting this option.

- Select **Earn on Child Terms** to bill by Parent Term, but earn by Child Term. Your institution must be setup to use Term Relationships before you can use this feature. Refer also to Revenue Recognition.

- Select **Scheduled Hours** if you earn tuition based on scheduled hours. For more information, see Billing Methods. Also see Suspend Revenue for drop students for information on the available selections under this section when Scheduled Hours is selected.
- Select **Attended Hours** if you earn tuition based on attended hours.
- Select **Courses/Credits** if you earn tuition based on courses or credits. When a student starts a course, the tuition for the course/credits is 100 percent earned. For instance, if a student starts courses sequentially (one after the other) tuition for each course is earned as each course is started. If a student starts three courses at the same time, tuition for all three courses will be earned at the same time.
- **Course Meeting Days** - Specifies that there will be one unit earned for each day the class meets. Therefore, the total units for the earning period is the total number of times the class meets. When specifying the revenue period (Lists > Student Accounts > Programs > Program Version), there are several requirements.

  a. The billing method must be by course set to automated and you must select the setting to 'Post Transaction Details'.
  b. The earnings method must be set to use a basis of Course Meeting Days.

  With those settings, the only revenue time frame available will be to earn by transaction code. The **TUIT** code will NOT appear in the list as it is hard coded to earn over the Course Section. You can select other time frames for any of the other transaction codes set to defer. The transaction codes set to defer over other time periods will earn by a basis of days.

  If a transaction code is selected to earn by Course Meeting Days, the entry on the ledger card must be linked to the course section. If it is not, the transaction will not earn and an exception of "X" will be returned on the exception report. The link can be made by selecting 'Adjust Transaction' and selecting the course that the fee is associated with.

Late Charges Revenue Recognition

- **Include with the first unit of earnings that are recognized** - revenue will be included during the first unit of earnings that are recognized
- **Amortize over all units in the revenue period** - revenue will be amortized over all units of earnings in the revenue period. If this option is selected, then the Earn in Month after End of Period option under the First Month Rule section within the Half-Month Allocation Rule section will be disabled.

Suspend Revenue for drop students

Depending on when a student drops out of school, necessary charge adjustments may not yet be posted to the student's ledger card before month end processing. If revenue is calculated prior to adjustments being posted, you can over-recognize revenue for the student. In CampusNexus Student the adjustments are posted when the Refund Calculation is posted. To help manage this process, these configuration settings will be used to earn Revenue for drop students, according to the configuration setting selected.

This option is enabled for all Earning Units, and set to **Do Not Suspend Revenue** unless you select another option here. Each option is mutually exclusive.

- Select **Do Not Suspend Revenue** if you do not want to collect revenue for drop students
- Select **Who do not have a posted refund calculation** to suspend revenue for drop students who do not have a refund calculation posted in their Refund Calculation folder for the appropriate enrollment period.
- Select the third option to suspend revenue for drop students whose **date of determination is within 'n' number of**

days of the Revenue Earnings Period End Date. This data entry field is enabled only when this option is selected. CampusNexus Student expects a numeric value between 0 and 999. A zero (0) value is acceptable, and indicates that the date of determination and the revenue earnings period end date are the same. The 'n' number of days will represent the number of days that you want to suspend revenue, from the last day of the month entered in the Revenue Recognition wizard. For example, to run the wizard for the month of March, and you entered March 31st as the end of the revenue earnings period, this number will represent n number of days before the 31st. If the number entered is 15, CampusNexus Student will subtract 15 days from the 31st, which will be March 16th, therefore the revenue will be suspended from March 17th until March 31st.

Half-Month Allocation Rule

When a 1/2 month condition is calculated, the other half month of earnings will be allocated equally across the other months of the earnings period. These options are only available when 'Months' is selected as the Revenue Basis (Earning Units).

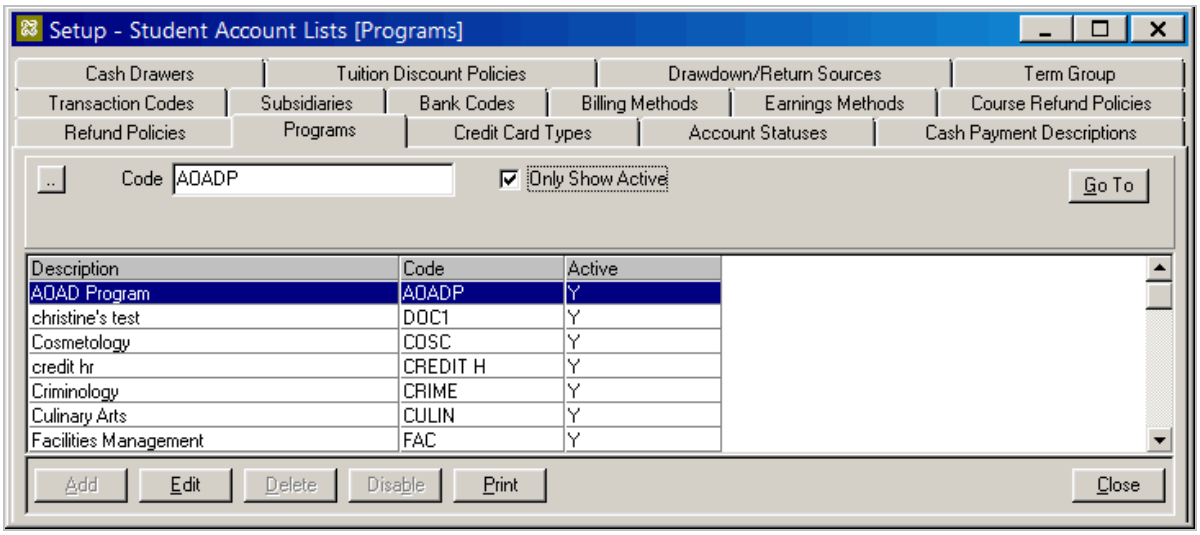
- First Month Rule - select one:
  - Include First Month of Earnings Period in Allocation
  - Earn in Month after End of Period - If this option is selected, the 'Amortize over all units in the revenue period' option under the Late Charges section is disabled.
- Last Month Rule
  - Include Last Month of Earnings Period in Allocation

Setup - Student Account Lists [Programs]

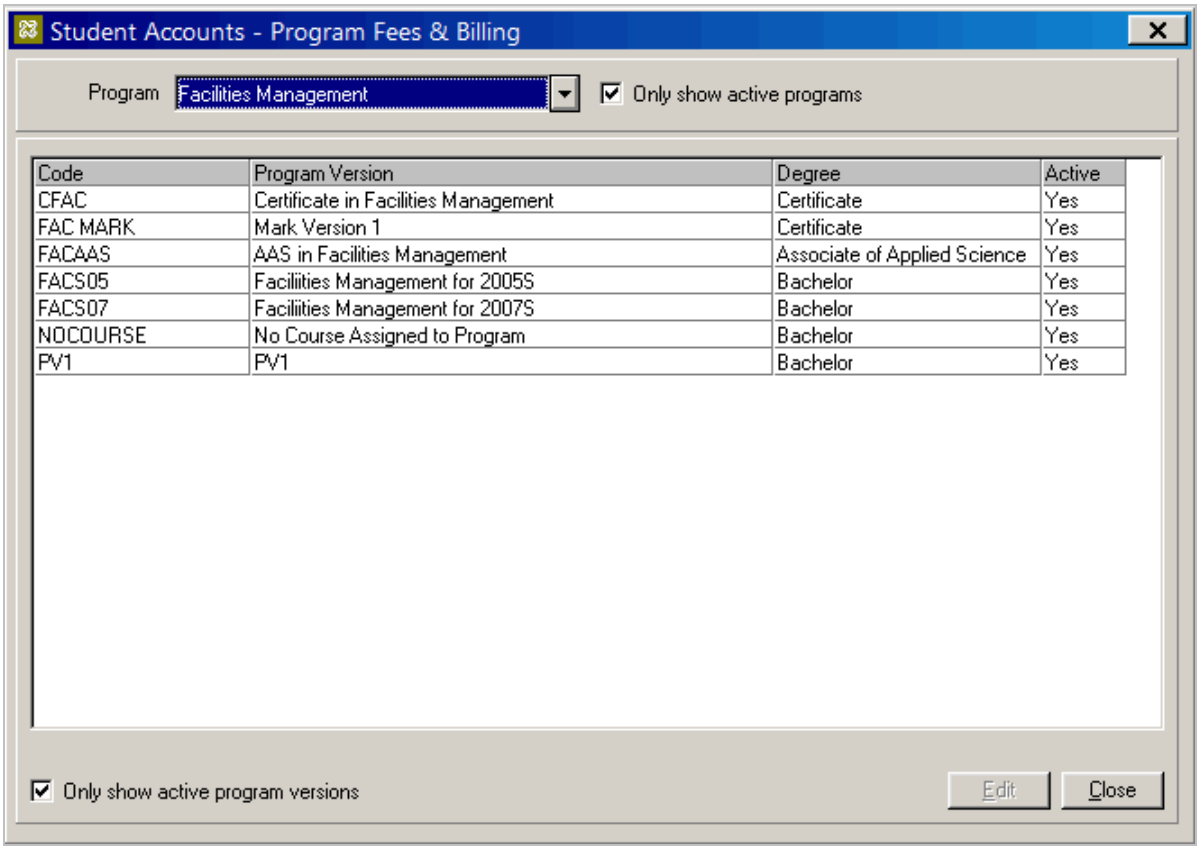
Use the Setup - Student Account Lists [Programs] list to establish tuition and other fees to be billed to the student for each program version. Prior to this setup, review the setup for billing methods and earnings methods, both of which will be used in this procedure.

To add or edit a list of program fees and billing codes:

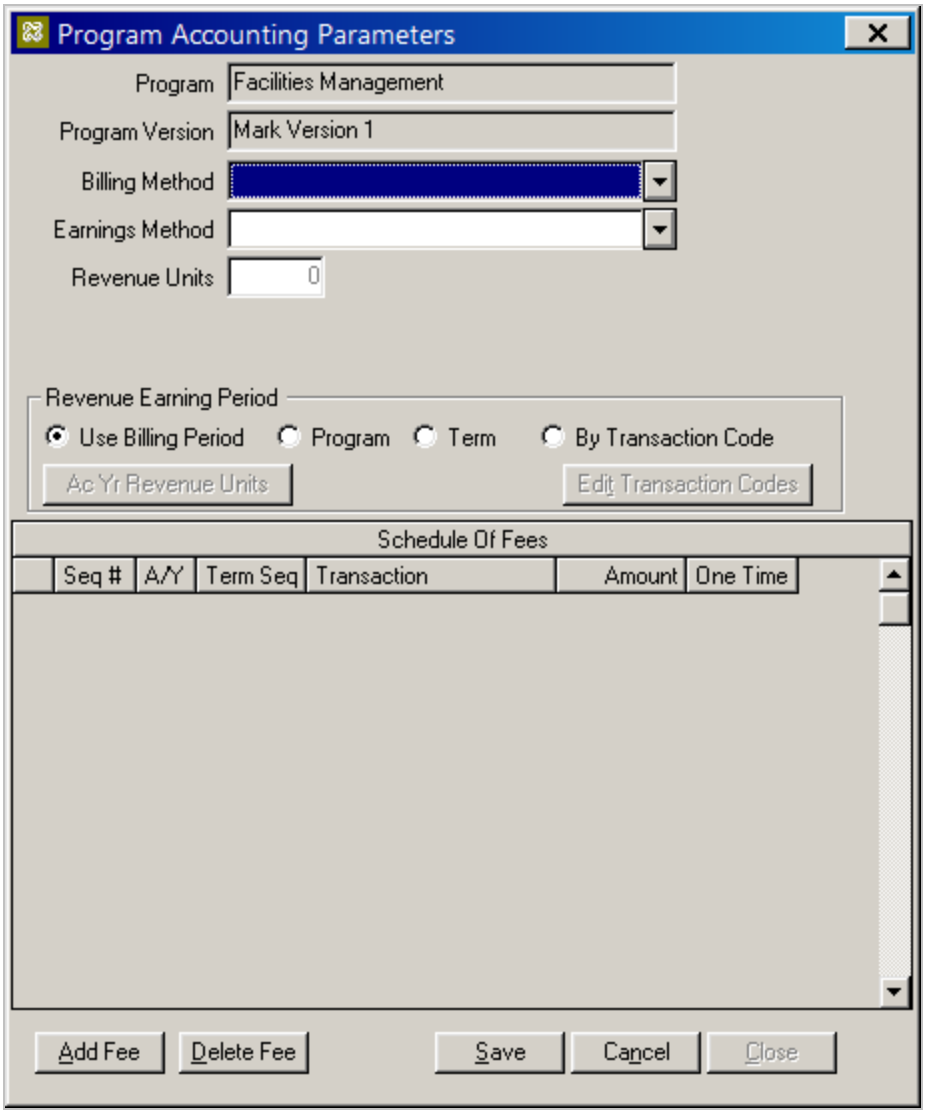
1. Navigate to **Lists** > **Student Accounts**. The Setup - Student Accounts Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Programs**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Student Accounts - Program Fees & Billing form is displayed. It lists all versions of the selected program.



6. Select the **Program Version** for which you want to set up the accounting parameters and click **Edit**. The Program Accounting Parameters form is displayed.



7. Click **Add Fee** to add a fee. You can add several fees in a row before saving them.

   Note: The TUIT code must be used to bill tuition via Registration Billing. Unless an unbilled TUIT item appears in a student's Fees folder, the student will not be gathered in the list of students to bill.

8. Specify appropriate options. For more information, see Field Descriptions - Program Accounting Parameters Form.

Field Descriptions: Program Accounting Parameters Form

Field	Description
Program	Read-only. This is the program you selected.
Program Version	Read-only. This is the program version selected.

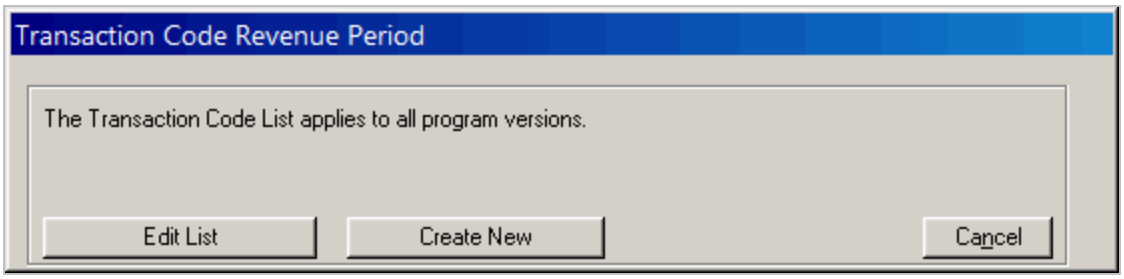
Field	Description
Billing Method	Select a billing method. Billing methods are set up under Lists > Student Accounts > Billing Methods. When the Billing Method for the program version is based on Term, CampusNexus Student prompts for the option of 'Revenue Earning Period'. For all other billing methods, this option is disabled and set to 'Use Billing Period. Specific requirements apply to Program Versions with Billing Method set to Academic Year.
Earnings Method	Select an earnings method from the list. Earnings methods are set up under Lists > Student Accounts > Earnings Methods.
Revenue Units	This field is optional . If the value is greater than zero and the revenue method is by Scheduled or Attended Hours, the revenue calculation uses this number for the total number of hours in the program. This is necessary because institutions may want to earn revenue on a different number of hours than the total hours for the program. For example, an institution has an Externship at the end of the program and wants to include the Externship in the total Program hours, but not in the revenue hours. **Note:** If the Program Accounting Parameters are set to 'Use Billing Method' for Revenue Earnings, the Revenue Units option is ignored.
Revenue Earning Period	Select one of the following options: • Bill by Academic Year • Program • Term • By Transaction Code If you select, By Transaction Code, CampusNexus Student enables the 'Edit Transaction Codes' button so you can select how each transaction code is to be earned. See the procedure to edit transaction codes. When the Billing Method is based on Academic Year, the 'Ac Yr Revenue Units' button is enabled to allow earning by Academic Year. When the Billing Method for the program version is based on Term, CampusNexus Student prompts for the option of 'Revenue Earning Period'. For all other billing methods, this option is disabled and set to 'Use Billing Period'.
Schedule of Fees: Enter any version-level charges in the Schedule Of Fees grid. Click **Add Fee** to add a new charge.	
Seq #	The Seq.# column is used to sort the program fees shown on the grid.
Term Seq	When saving the fees, if the billing is by Term, CampusNexus Student saves the value of the second column to the AdProgramFee.TermSequence column.
A/Y	The Academic Year (A/Y) column is always enabled. If the Bill method is dependent on term, the A/Y and term columns are displayed on the list, otherwise only the A/Y is displayed.

Field	Description
Transaction	Click in the Transaction field to enable the button. Select a transaction description from the list.
Amount	Specify the amount of the charge.
One Time	Select this option to indicate that the charge is one-time-only when a student is enrolled in the program version.

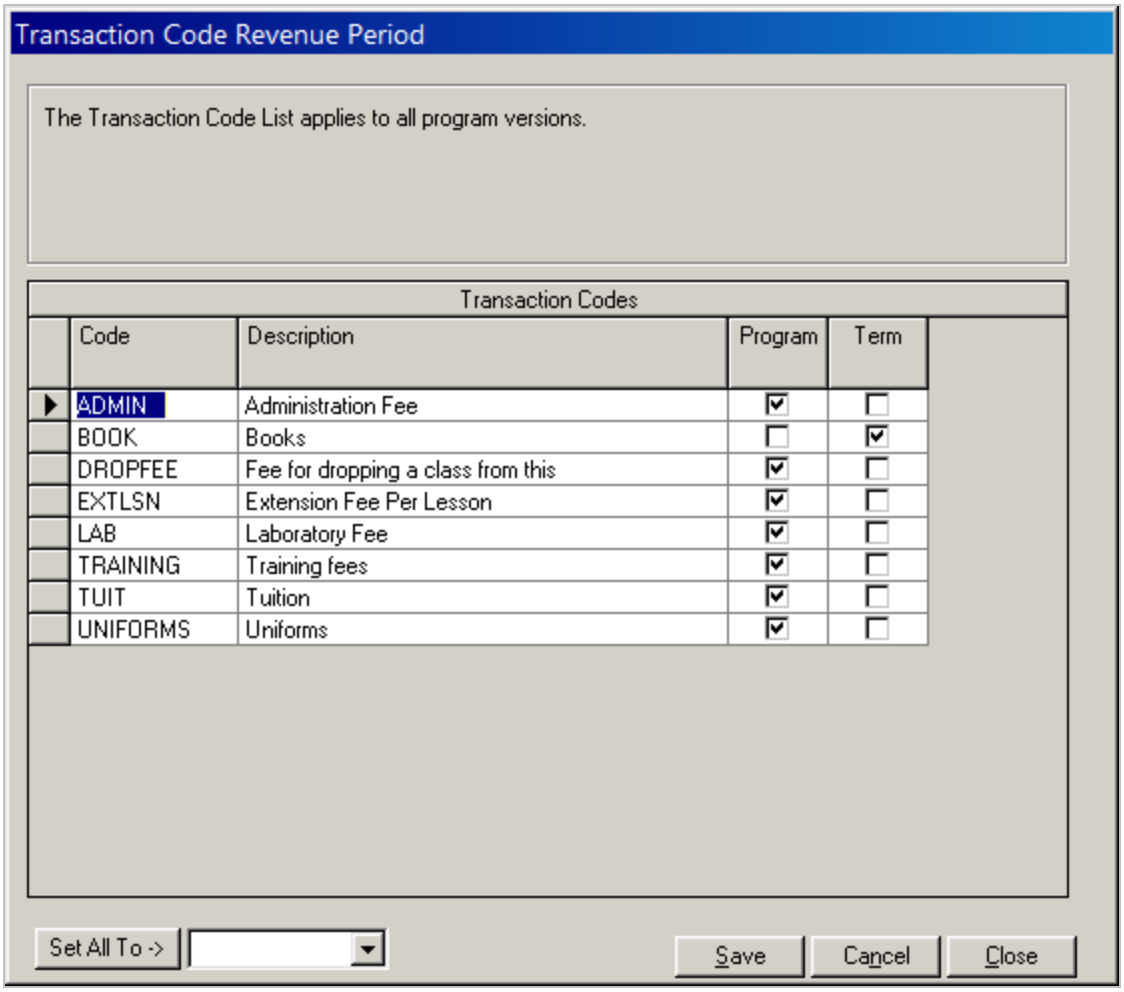
9. To delete a fee on the grid, select it and click **Delete Fee**. A confirmation message is displayed. Click **Yes**.
10. Click **Save**.

To edit transaction codes:

1. Click **Edit Transaction Codes**. The Transaction Code Revenue Period form is displayed.



2. Click **Create New** to add a transaction revenue period or **Edit List** to modify an existing one. The Transaction Code Revenue Period form is displayed.



Notes:

- The earning period labeled **Course Section** refers to the time frame for which the course is scheduled. In this configuration the TUIT code is not displayed in the list because it is hard coded to earn over the Course Section.

  You can select, by transaction code, how each code is to be earned. Click **Set All To** to set all transaction codes to the value select from the drop-down list. The values are Program and Term.

- When editing the transaction codes, the Earning Period (Program or Term) for each transaction code affects every program version in the system. (The Earning Period for each transaction code is stored in SaBillCode).

  Only transaction codes marked as "deferred earnings" transactions are listed in the grid. See Transaction Codes.

- When Billing Method frequency is set to Payment Period (E) and the Earnings Method unit is set to Days (D), an additional column labeled Payment Period is displayed and the Term grid is hidden.

  If Payment Period is selected, the value E is saved to the revenue period.

- When Billing Method frequency is set to Payment Period (E) with Post Transaction Details selected (both

located on the Billing Methods Code Setup form) and Earnings Method is set to Days, an additional labeled Course Section is displayed.

3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Program Versions with Billing Method Set to Academic Year

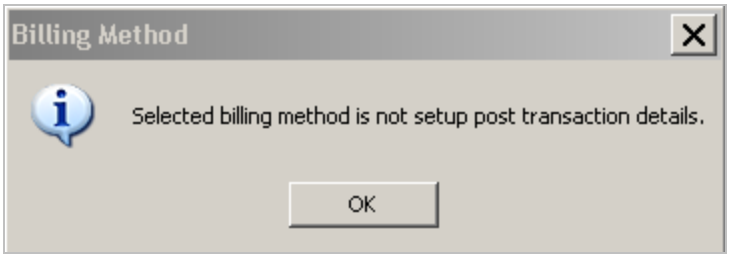
When a program version is set to earn by academic year, you can configure the number of units to earn throughout each academic year. CampusNexus Student performs the revenue recognition process ignoring the usual calculation of units and uses the override to earn as configured. This option works only under the following conditions:

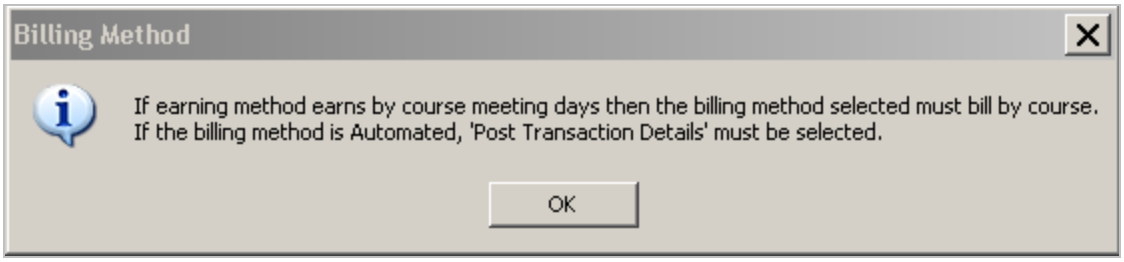
- Billing Method is set for Academic Year
- Earnings Method is Earn by Months, Weeks, or Calendar
- Program Accounting Parameters are set to 'Use Billing Period' for Revenue Earnings.

To check these settings, navigate to Lists > Academic Records > Programs > select a program > Program Versions > Add/Edit > Student Accounts > Associate Billing/Earning Methods > Program Accounting Parameters form.

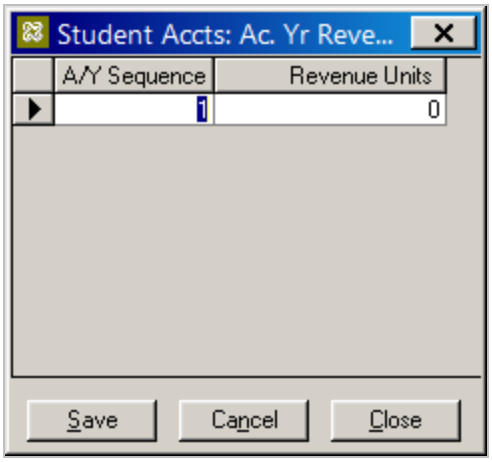
When the Billing Method is 'Bill by Course' and the Earnings Method is 'Course Meeting Days', only the 'By Transaction Code' option is available under Revenue Earning Period. The Billing Method must be 'Bill by Course', Automated with a Pending Charge Review that posts transaction details.

The following messages are displayed if the Billing Method is not configured properly:





The Ac Yr Revenue Units button is enabled which allows for earning revenue by Academic Year. When you click on the Ac Yr Revenue Units button, the Sequence and Revenue Units are displayed. These are the parameters specific to earning by Academic Year.



First Month Percentage Earnings

This feature allows a percentage of the total tuition charge to be configured to earn in the first month of revenue earning. You can set up each program version to earn a percentage of the total tuition charge. When revenue is run, the system earns the configured percentage in the first earning month for the student, allowing a higher amount of the student's tuition revenue to be recognized to cover some of the cost of a high drop rate.

By using an earnings calculation that allows institutions to recognize a higher amount of the student's tuition up front, the institution earns the configured percentage of the total tuition for the program in the first revenue period, with the remaining percentage earned over the remaining months of the program based on the number of calendar days that the institution is in session during the billing period.

Note: This feature assumes that the student is billed by program earning over the length of the program. Additionally, Configured Units on the program version are not allowed, and Tuition is the only transaction code that will be earned at 10% in the first month.

To configure first month percentage earning:

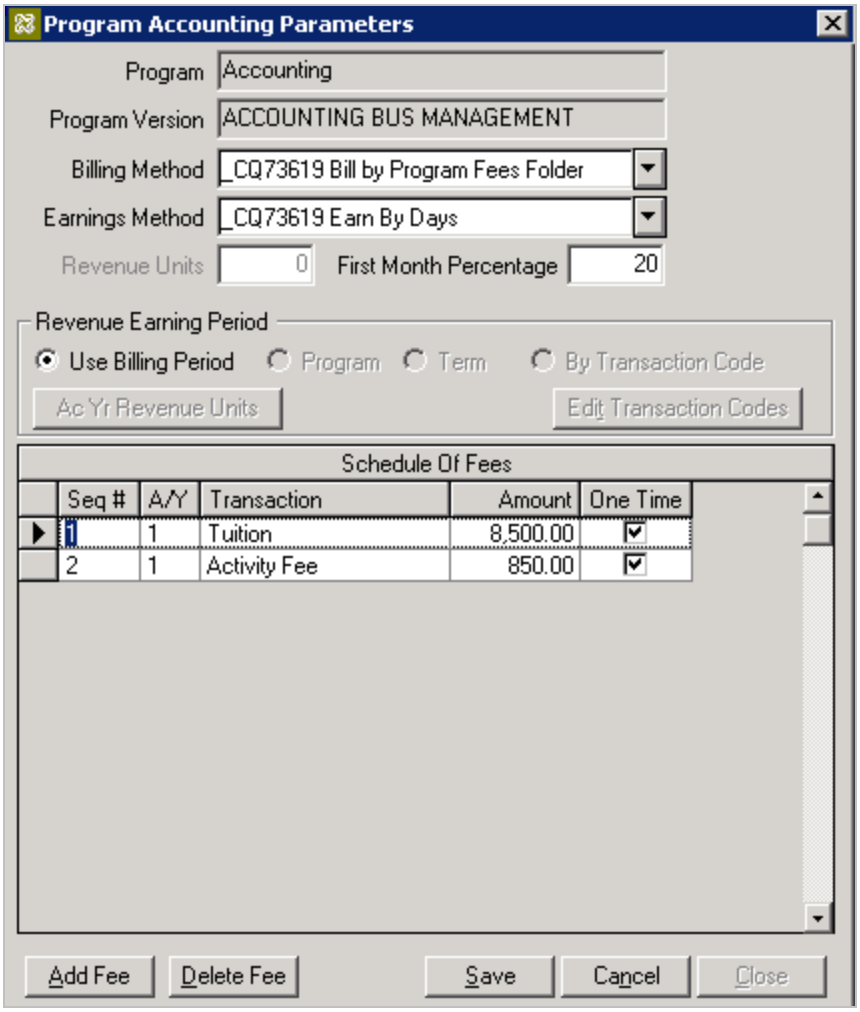
1. Navigate to **Setup > Student Accounts > General** (tab). The Student Accounts Settings form is displayed.
2. Select Yes for **Enable First Month Percentage** to allow the institution to earn a percentage of the total tuition charge in the first month of earning.

   This setting allows the registry Key for Percentage based earning to be set to "1" when the following conditions are true:

   - Registry key for first month Percentage value is set to ‘1’;
   - Billing method assigned to the Program Version is set to use a frequency of ‘Program;
   - Revenue Period is set to "Use Billing Period";
   - Earning method assigned to the program version is set to"Days",
   - Earning method Late Charge earning option is set to Amortize over the remaining time in the period.

   The system will earn the percentage configured of the total charge in the first month of earning for the Revenue Period only. After the first month of earning, the system will amortize the unearned remaining amount equally over the remaining time in the earning period.

   When the above conditions are met, the Program Accounting Parameters form is displayed.
3. In the **First Month Percentage** field of the Program Accounting Parameters form set up a first month's earning percentage on tuition. The value in this field must be a numeric value no greater than 100 percent.



4. To view the earning on a standard student using percentage earning in the first month and amortizing over the remaining revenue period for subsequent months, run **Revenue Recognition** (Daily > Student Accounts > Revenue Recognition).

   Notice that the first month percentage is greater than zero and that it is a TUIT charge. When revenue is calculated, any charge with a First Month Percent Earn Charge = 1 will earn the percentage of the total charge in the first month of earnings and amortize the unearned remaining amount equally over the remaining time in the earning period.

   - If student is a re-entry into the same program version, the student will not earn the percentage again. The units for the revenue earning period are calculated from the re-entry date to the Revenue Period End Date configured in the earning method. If the student re-enters into a different program version, a new enrollment is created and new charges earn the percentage in the first month of earning.
   - If a student is transferred into a program version that is configured to earn percentage in the first month, and the student has already earned the percentage in the old enrollment, the unearned revenue amount transferred from the old enrollment will not earn the percentage in the first month of earning under the new enrollment. If the student has not earned the percentage in the old enrollment, the unearned revenue amount transferred from the old enrollment will earn the percentage in the first month of earning under the new enrollment.

Setup - Student Account Lists [Refund Policies]

The U.S. Department of Education, your state's department of education, and your institution's administration may have different policies and procedures for refunding money to students when they leave the institution before completing their programs. Typically, the refund policy that is most advantageous to the student must be the one selected at the time the calculation is made. Refund calculations are triggered for a given student.

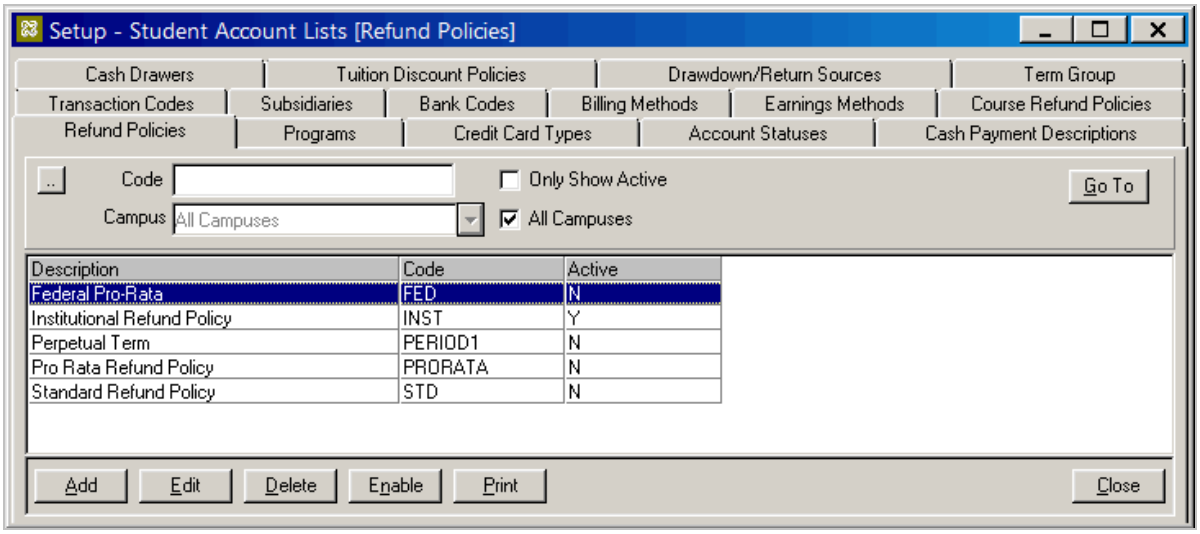
The refund calculation in CampusNexus Student supports straight pro-rata refund policies.

The refund policy allows the length conditions to be based on different units than the policy itself. Many refund policies have an initial condition that is based on withdrawing in the 1st week of class; however, the remaining conditions are based on scheduled hours. You may need to set up several refund policies from which to select in different circumstances.

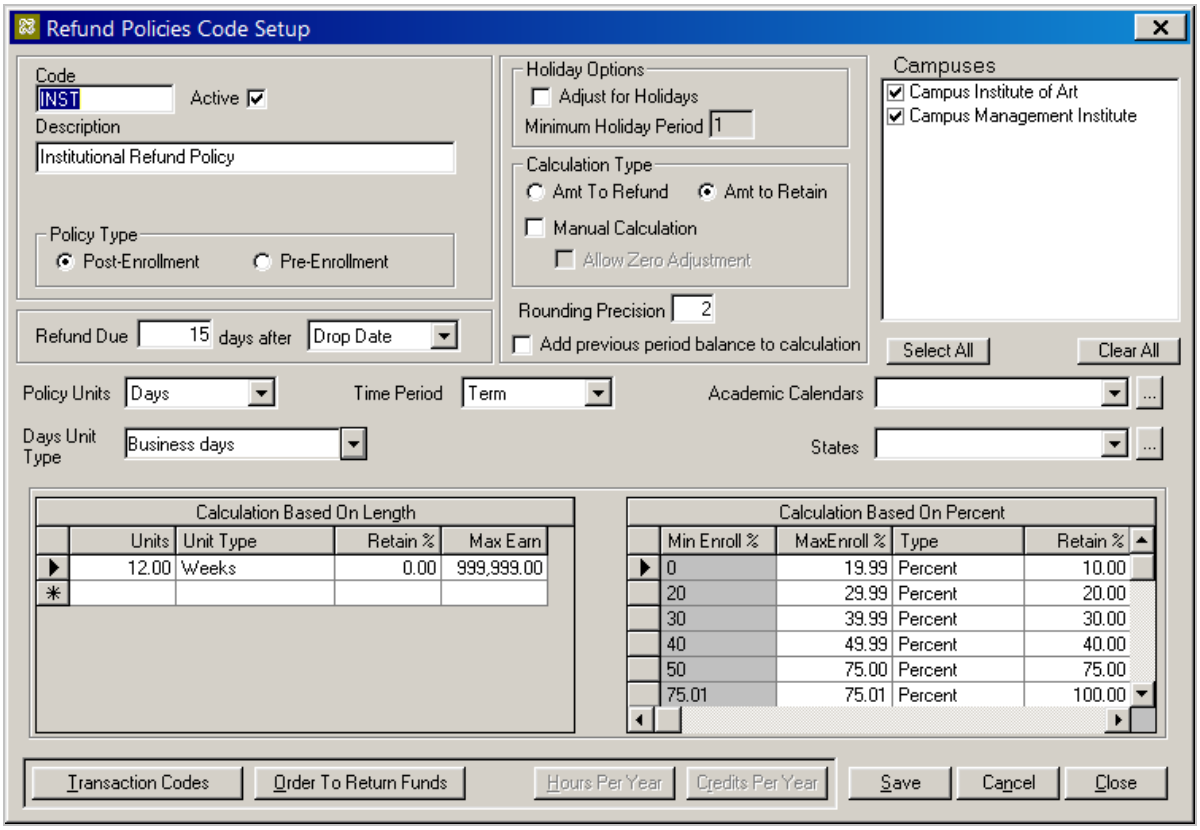
Best Practice: If an existing refund policy ever needs to be changed, mark the existing refund policy as “Inactive” and create a new refund policy containing the changes. This allows for all details of the inactive refund policy to be viewed at a later point in time if auditing a refund calculation that was done on that policy.

To add or edit list of refund policies codes:

1. Navigate to **Lists** > **Student Accounts**. The Setup - Student Accounts Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Refund Policies**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Refund Policies Code Setup form is displayed.



Note: The refund calculations are first based on the Calculation Based on Length grid, then on the Calculation Based on Percent grid. You can use either or both of these grids in defining your refund policy.

7. Specify appropriate options. See Field Descriptions.
8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Field Descriptions

Field	Description
Code	Enter a code for this refund policy.
Active	Select or clear the Active flag as required. Clear the flag if this is no longer an active refund policy.
Description	Enter a description for this refund policy.
Policy Type	Select Post-Enrollment or Pre-Enrollment.
Campuses	Select the campuses to which this policy applies. Multiple campuses can be related to the same refund policy. At least one campus must be selected before a new refund policy record can be saved.
Refund Due X days after	The option is dependent on the list selection. The refund may be paid x days after the refund is calculated, at Last Date of Attendance, or the student's Drop Date. Specify a whole number.

Field	Description
Policy Units	Select Weeks, Scheduled Hours, Hours Attended, or Days.
Time Period	This field determines the basis of the refund. The options are: • Use Billing Method (on enrollment) • Program • Term, • Academic Year • Calendar Year. Institutions can indicate whether tuition charges included in their refund policy's institutional charges are derived from the values posted: a. To student's ledger b. To Student Fees Folder c. From the total program charges configured on the Financial Aid (FA) Program Version when Program is selected for the refund policy's time period. If Program is selected, the default option is to use Tuition Charges from the Ledger Card. Selecting Program displays the Tuition Charges text box with Ledger Card as the default. Other options are FA Program Setup and Student Fees Folder, which determine how the tuition component of the Refund Calculation's Institutional Charges are calculated if the institution bills by term; however, the refund calculation is based on the entire program. **Note**: The FA Program Setup option and the Student Fees Folder option are only be enabled if the refund policy's selected time period is Program. CampusNexus Student determines the tuition charges included in the institution charges based on the method selected by the institution: • If Net Amount from Ledger Card is selected, the calculation uses the amounts posted to the student's ledger. • If From Student Fees Folder is selected, the tuition and all other institutional charges are derived from those populated in the Student Fees Folder. • If Tuition from FA Program Version is selected, tuition that is included in the institutional charges is determined as follows: ◦ The tuition amount used is the same value populated in the Tuition column of the grid on the Program Costs tab of the FA Programs Code Setup form. ◦ The effective date is used to determine which tuition amount to use if there are multiple tuition amounts configured for the program version by comparing the student's start date to the effective date that applies to that student's start date. ◦ The effective date is used to determine which tuition amount to use if there are multiple tuition amounts configured for the program version by comparing the student's start date to the effective date that applies to that student's start date. The current method for determining other components of the institutional charges such as fees is preserved, that is, only the method for determining the tuition component of the institutional charges is being discussed.

Field	Description
Academic Calendars	This field determines the type of academic calendars that apply to your institution. Select an option from the list. If your institution uses multiple academic calendars, click ... and select as many academic calendars as needed. The options are: • Non-standard terms • Standard terms of quarters • Standard terms of semesters • Standard terms of trimesters • Clock Hours • Credit hours without terms
Weeks Calc Type	This field is enabled only if Policy Units is Weeks. Select how your institution defines a week. • Scheduled Instruction Days calculates the number of weeks based on at least one class session per calendar week (Sun-Sat). • Calendar Days (default) totals the number of days in the time period calculation minus holidays—if that option has been enabled—divided by seven.
Adjust for Holidays	Select this option if you want CampusNexus Student to adjust for holidays.
Minimum Holiday Period	Specify the minimum number of days that can be considered holiday time.
Calculation Type	Select Amt to Refund or Amt to Retain.
Manual Calculation	Institutions can manually enter refund calculations into students' Refund Calculation folders, and then have CampusNexus Student update the calculated values in the database so that these values can be displayed in Refund Reports, enabling institutions to report on the timeliness of refund calculations for their entire portfolio of institutions; even if these calculations were not made in CampusNexus Student. Select this option to manually enter refund calculations. The two grids on the bottom of the screen are disabled. • If there is no record in the Calculation Based On Length and Calculation Based On Percent grids and Manual Calculation is selected, you can save the policy when editing a refund policy. • If there is a record in one or both grids and Manual Calculation is selected, both grids are disabled. When you try to save the policy after editing it, a message states that selecting Manual Calculation for this policy will remove any data in both grids. ◦ If you choose not to continue, the data on the grids remains, the grids are disabled, and the Manual Calculation check box is selected. Closing the form and reopening it again will show the Manual Calculation check box as cleared with both grids enabled. ◦ If you choose to continue, any data in the grids is removed, the two grids are disabled, and the Manual Calculation check box is selected. Closing the form and reopening it again will show the Manual Calculation check box as selected with both grids disabled.
Allow Zero Adjustment	This option allows 0.00 tuition adjustments to be posted. This check box is only enabled when Manual Calculation is selected. By default, this check box is disabled.

Field	Description
Rounding Precision	This field determines how the refund amounts are calculated. This field is used with the Policy Units field. It determines how many decimal places to use in the results of calculations using Policy Units.
Add previous period balance to calculation	Select this option to include the previous term balance in the refund calculation.
Calculation Based On Length	This grid is considered first. • Units Attendance - Enter the number of attendance units for this row. • Unit Type - Attendance Units. Valid values are Weeks, Hours Attended, Hours Scheduled, Days. The Attendance Units column is used to determine what unit the Length condition applies to. • Refund (Retain) Percentage - Enter the percentage to refund or retain for this row. • Max Earn - Enter the maximum amount that can be earned at this level of policy units completed.
Calculation Based On Percent	This grid is considered second. • Minimum Enroll Percentage - Enter the minimum percentage of the enrollment completed by the student. • Maximum Enroll Percentage - Enter the maximum percentage of the enrollment completed by the student. • Type (Refund Percent Flag) - Valid values are Pro Rata or Percent. The Type (Refund Percent Flag) column determines if the percentage to refund/retain comes from the Refund Percent field or if the percentage to refund or retain is the actual percentage completed by the student. For straight pro rata policies, the percentage of tuition earned by the institution correlates exactly to the percentage of the program the student completed. For example, if the student completed 47% of the program before dropping, the institution retains 47% of the tuition. • Refund (Retain) Percentage - Enter the percentage of funds received to be refunded or retained.

Field	Description
Trans-action Codes	This button is enabled after you save a new course refund policy and when you edit an existing policy. When you click **Transaction Codes**, the Transaction Code Refund Setup form is displayed.  Indicate which transactions are involved in the refund. For each transaction code, select one option under **Action**: • Calc - include the charge in refund calculations. • Earn - charge is 100 percent earned when charged. • Reverse - reverse the charge on the student's ledger card (net to zero) before refund is calculated. • N/A - the charge is not applicable to the refund calculation. Select or clear the **Adm Fee** check box beside each transaction to indicate that an administration fee will be charged for this transaction. If you select a check box, enter the amount of the fee under **Fee Amount**. Select a row under the **Adjustment Code** column to map/assign an adjustment (transaction) code to a **Transaction Code**. A pre-populated drop-down list appears displaying Transaction Codes that meet the following conditions: a. Active b. Associated with campuses that belong to the Refund Policy c. Bill Type is "S" for Student or "B" for Both. By default this column is populated with "N/A" for those Transaction Codes which have not been assigned. "N/A" appears in the drop-down list as an option because this will be needed should you need

Field	Description
	to remove an existing mapping. An Adjustment Code can also be used as a standard Transaction Code on the Student Ledger as users may want to post manual adjustments.
Order To Return Funds	This button is enabled after you save a new course refund policy and when you edit an existing policy. When you click **Order To Return Funds**, the Fund Source - Refund Order form is displayed.  Arrange the listed fund sources in the order that you want funds returned. When the refund calculation is made, the amount to be refunded is applied to each source in turn until the calculated amount is exhausted. For example, the refund calculation determines that a total of $2,000.00 is to be refunded to the various fund sources. The student received a $1,000.00 Pell Grant, $2,000 was disbursed from a subsidized Stafford loan, and the student paid $500.00 in cash. Of the calculated refund amount, $1,000 would be refunded to the Pell Grant program, $1,000.00 would be refunded to the Stafford loan source, and nothing would be refunded to the student. To move a fund source closer to the top of the list, click the fund source to be moved, then click the up arrow button repeatedly until the fund source appears in the correct position. To move a fund source down in the list, click the fund source to be moved, then click the down arrow button repeatedly until the fund source appears in the correct position. When the **Exclude** check box is selected, the Fund Source is excluded from the refund.

Field	Description
Hours Per Year	This button is available only if you selected Hours Attended or Hours Sched for Policy Units and Calendar for the Time Period. When you click **Hours Per Year**, the Program Version Hours Per Year form is displayed. This form displays the total number of hours required for each program version and enables the authorized user to set a number of hours for each year of the program. Credits Per Year	This button is available only if you selected Hours Attended or Hours Sched for Policy Units and Calendar for the Time Period. When you click **Credits Per Year**, the Program Version Credits Per Year form is displayed. This form displays the total number of credits required for each program version and enables the authorized user to set a number of credits for each year of the program. 
Setup - Student Account Lists [Subsidiaries]

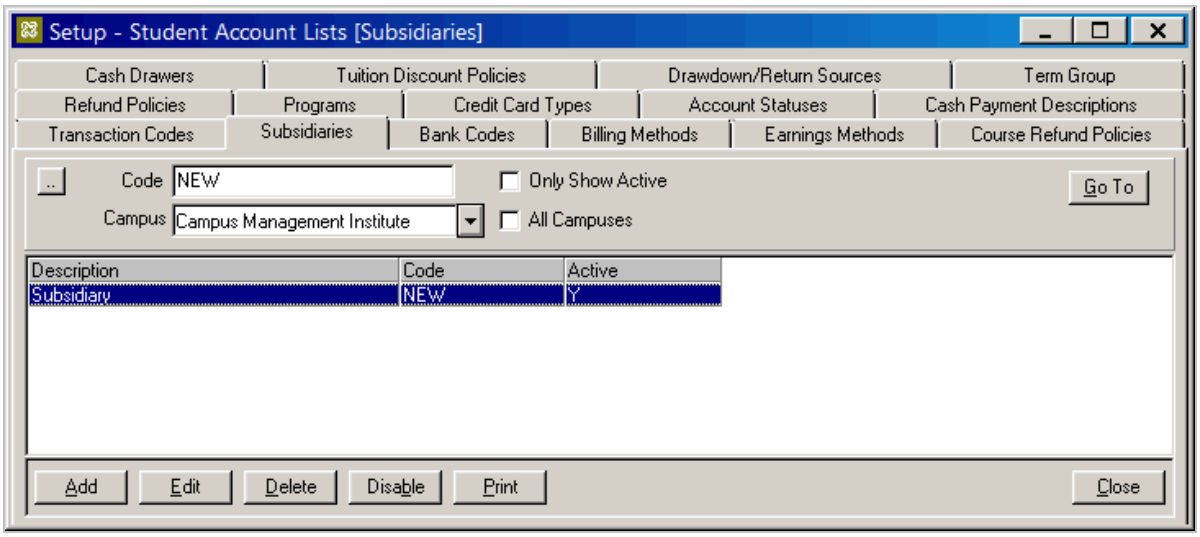
Subsidiary ledgers are used to bill services not reflected in the student ledger card, for example, housing, meal plans, parking fees, etc. Money added to the subsidiary must be recorded on the general ledger and be accessible to ensure that a student has funds in the account. This functionality allows any number of subsidiary accounts to be created with transaction codes linked to them. These transactions will not affect the student ledger card balance but will affect the balance of the subsidiary.

If CampusNexus Student is integrated with an accounting system, see Student Accounts - General Ledger Link Form.

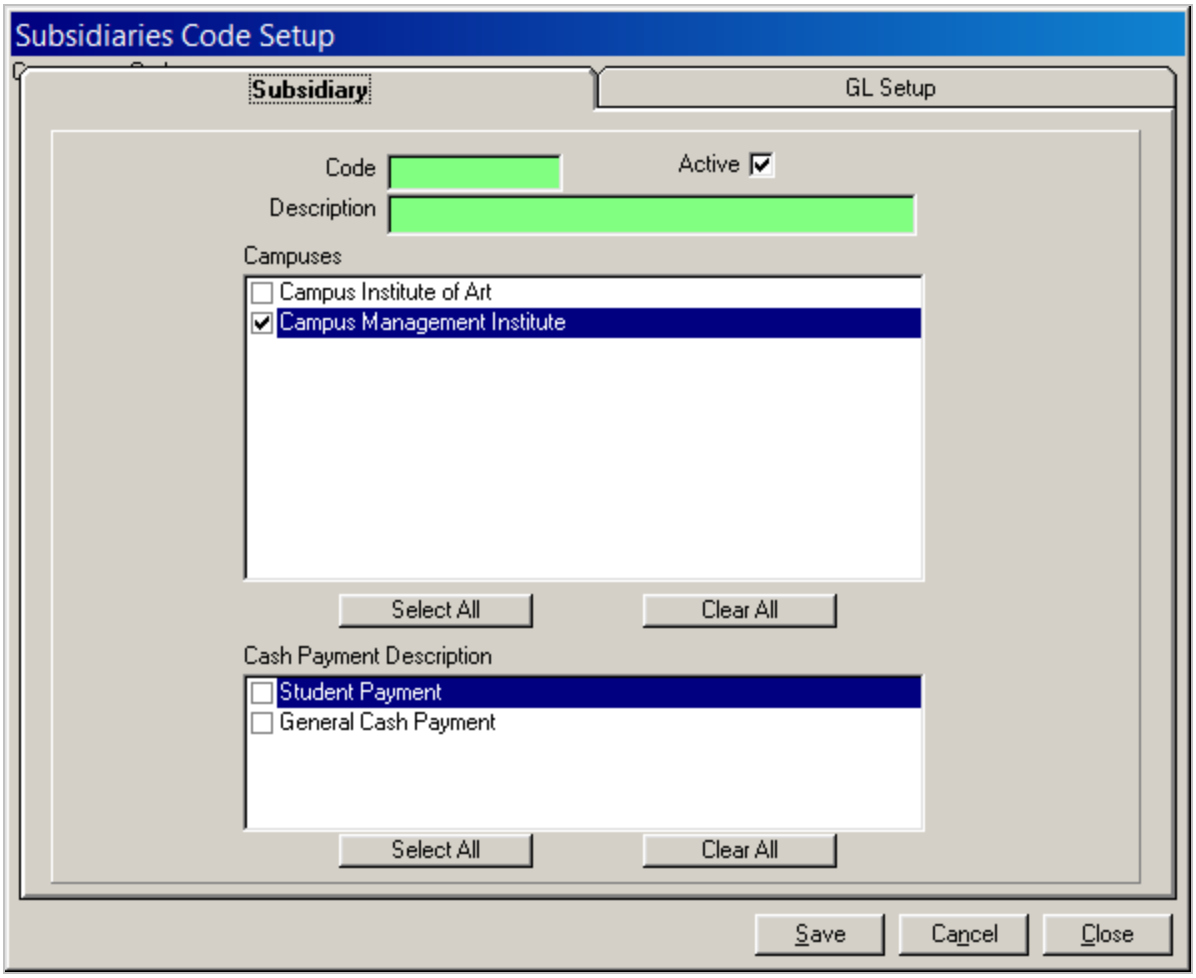
Funds can also be released from a subsidiary to the student general ledger card to address situations that arise, such as when a student pays a housing deposit and then must be charged for damages out of that deposit.

To add or edit a list of subsidiaries codes:

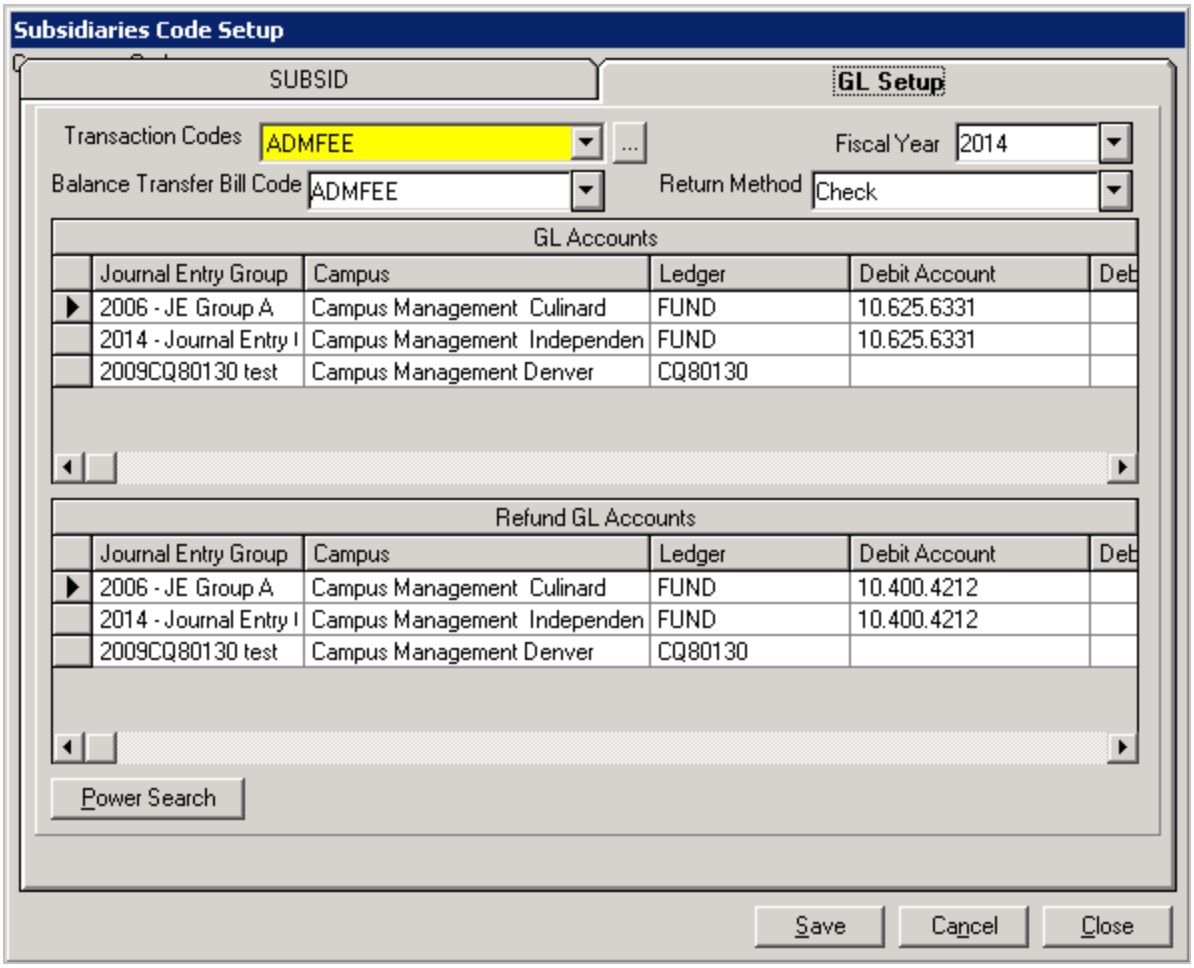
1. Navigate to **Lists** > **Student Accounts**. The Setup - Student Accounts Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Subsidiaries**.



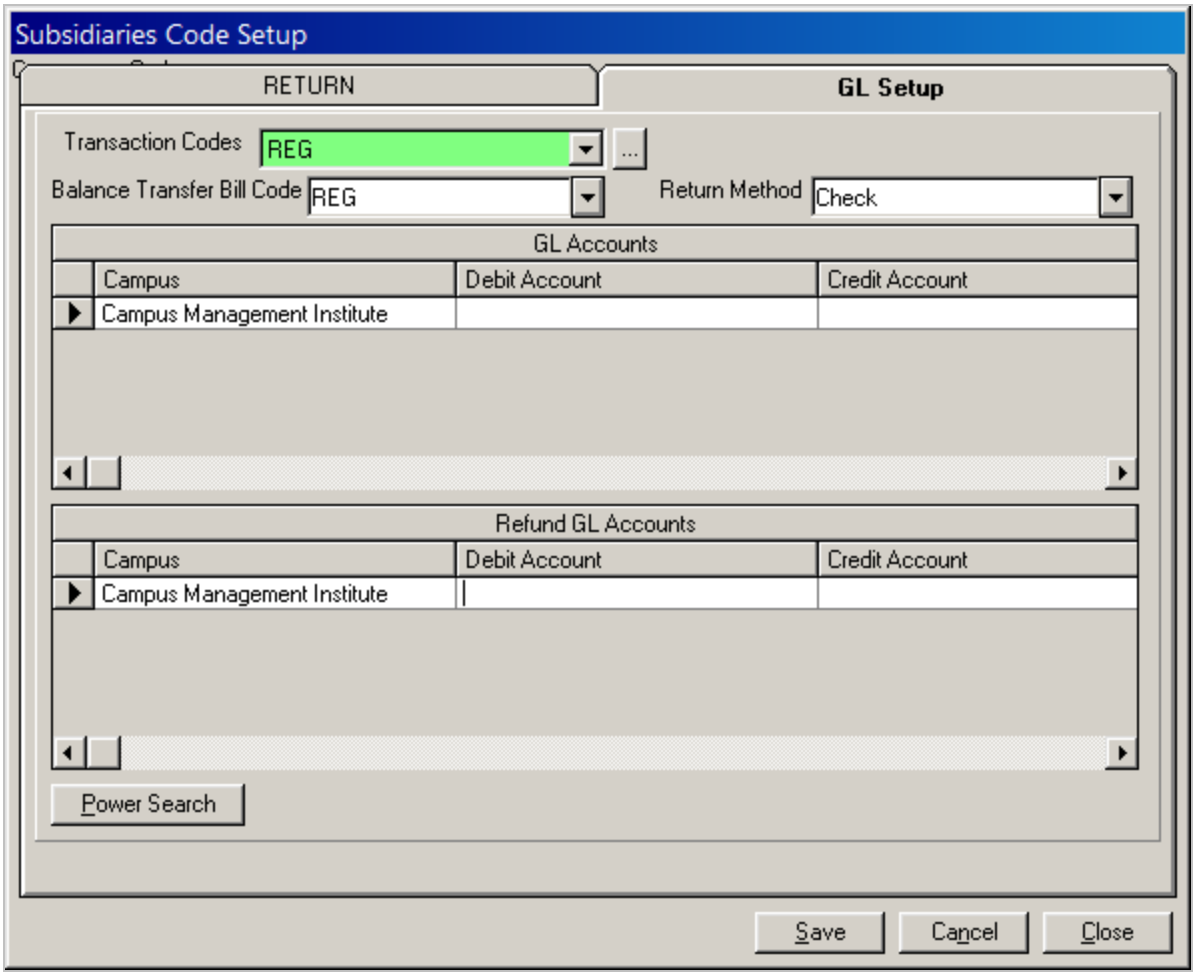
3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Subsidiaries Code Setup form is displayed.



7. Specify a unique **Code**.
8. Enter a **Description**..
9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
10. Select one or more **Campuses**.
11. Select the **Cash Payment Description**(s) which will be the default when posting payments to the subsidiary.
12. Click the **GL Setup** tab.



When CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll, the GL Setup tab provides Debit Account and Credit Account fields for GL Accounts and Refund GL Accounts for the selected Campus. You can create subsidiary transactions and release subsidiary transactions to CampusNexus Finance, HR & Payroll. Subsidiary transactions include Subsidiary Charges, Subsidiary Payments, and Subsidiary Refunds. You can set up accounts from a master Chart of Accounts (COA) list and select valid ledger accounts whenever they are needed. For more information, see GL Link.



13. Specify the Transaction Codes associated with the subsidiary. You can select multiple transaction codes. The transaction code list is filtered to include only active transaction codes and only those transaction codes whose campus list is included in the campus list associated with the subsidiary.

    CampusNexus Student validates that a transaction code is linked to only one subsidiary. If a transaction code that is linked to a subsidiary is selected to be linked to another subsidiary, a warning message is displayed. If you proceed, the transaction code will be unlinked from the other subsidiary.

    You can associate a transaction code with multiple subsidiaries.

    Note: A transaction code used in a subsidiary will not be available for use in the Student Ledger, even though all transaction codes are in the same tab as those for Miscellaneous Receipts and Student Ledger transactions.

14. Specify the **Balance Transfer Bill Code** to be associated with the Subsidiary. From all the Transaction Codes you selected, select one which will be used as the default if a subsidiary balance is transferred through the Daily menu (Daily > Subsidiaries > Schedule Refunds/Transfer Balance).

15. Specify the **Return Method** to be associated with the Subsidiary as the default when a refund is processed through Daily > Subsidiaries > Schedule Refunds/Transfer Balances.

16. Specify the G/L account numbers associated with this subsidiary to ensure payments to the subsidiary are applied to the correct G/L account.

To view the GL Accounts and Cost Accounts that relate to the transaction code, go to the GL Link transaction code record for that campus and fiscal year (**Setup > Student Accounts > Additional** (tab) > G/L Link (button)).

- If the Great Plains search feature is enabled, select a row, and click the **Great Plains Search** button to search for Debit Account or Credit Account numbers in the Great Plains GL.

    a. In the Search Great Plains GL Accounts form, click the **Search By** list. Search for GL Accounts using the **Account Number** or **Description**.

    Note: These searches also return Stipend Account information when you have set up separate debit and credit account numbers for stipends.

    b. In the **Search For** field, enter the account number or description.

    c. Specify the **Search Pattern**. The Search pattern works as follows:

        - “Starts With” finds an exact match on data that starts with the characters you specify.

          Enter dashes when using this method. For example, if you have a mask that uses ###-####-## and you enter 0000, you will not get any matches. You must enter 000- or 000-0 to get matches, where the first four digits in the account number are zeros.

        - "Contains" finds any value that contains what you have entered.
        - "Wildcard" searching uses % for any string that follows what is entered. The "_" only replaces a single character.
        - "Exact Match" must contain everything you enter. There cannot be additional characters before or after what was entered. If you are not sure of the exact wording, choose “Contains”.

    d. Click **Search**. All GL Accounts that meet the specified criteria are displayed in the result grid.

Based on the value specified in the Max GP GL Account Search field, the results grid displays the data in one page or across many pages. If there are more records than the default number of rows, CampusNexus Student displays:

- Number of records displayed.
- Total number or records matched.
- A Next button to display the next records matched.

e. Double-click the applicable row, or click **Select** to add the account details to the Debit Account or Credit Account field.

f. Click **Save**. CampusNexus Student saves all records for all campuses that use Great Plains, that contain both a valid Debit and Credit Account or both the Debit and Credit accounts are blank. An error message is displayed if any campus that uses Great Plains is using an incorrect Debit and/or Credit account.

The **Reset** button on the Search GP GL accounts form clears the fields for a new Search.

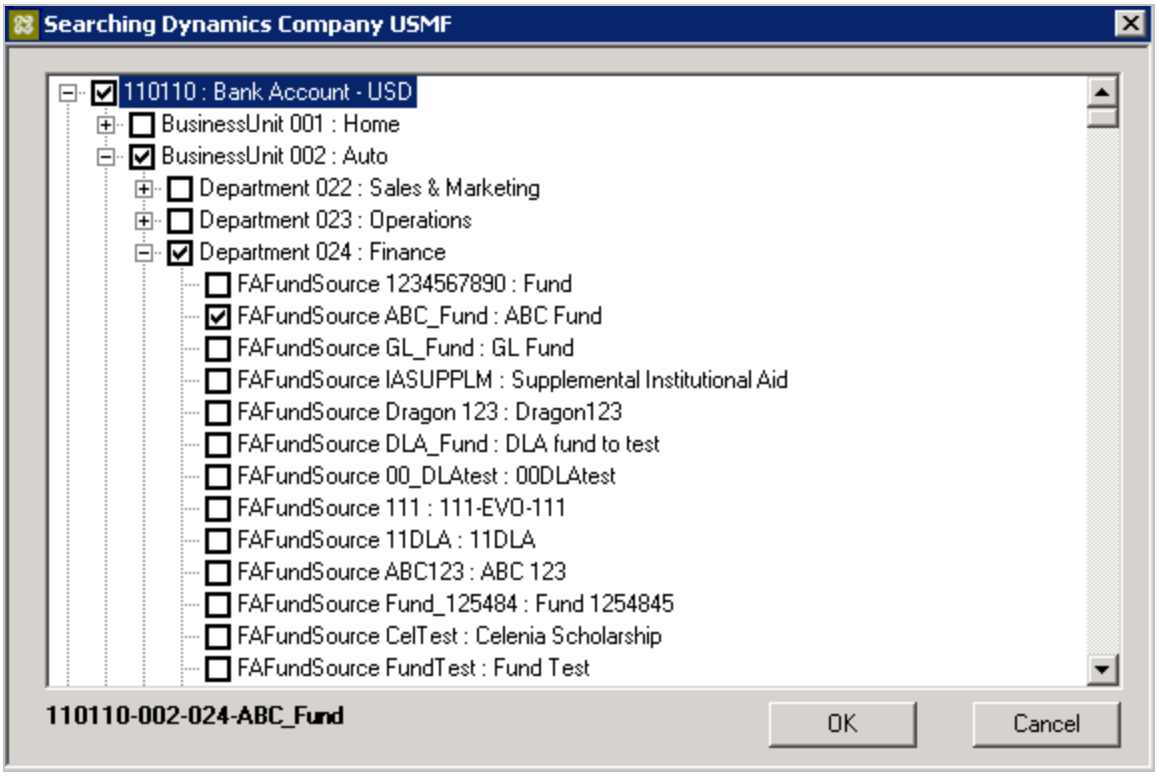
- If CampusNexus Student is integrated with CampusVue Finance, HR and Payroll or CampusNexus Finance, HR and Payroll, select a row and click the **Power Search** (for CampusVue Finance, HR and Payroll) or **Select GL Account** (for CampusNexus Finance, HR and Payroll) button to search for the appropriate GL Debit and GL Credit accounts.
  - If using CampusVue Finance, HR & Payroll, select the appropriate Ledger Account and click **OK**.
  - If using CampusNexus Finance, HR & Payroll, select the appropriate dimension attribute and click **OK**.

Note

- Your permissions in the accounting system determine which GL accounts you can view and select in CampusNexus Student.
- The Main account node can be displayed at any level in the account hierarchy. This is based on the account structure setting that is configured in Microsoft AX. For information about this setting, your administrator must see Microsoft AX Help.

When you click **Save** after selecting the account, the system validates your selection against the account structure setting in Microsoft AX. This validation also occurs when transactions are released to

G/L.



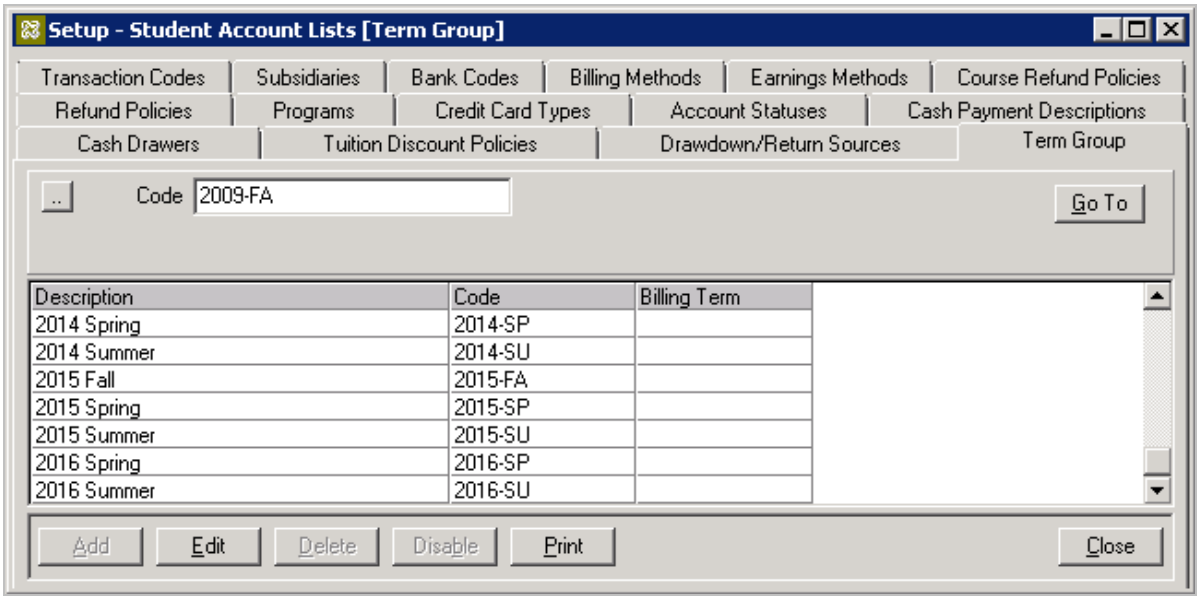
17. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Student Account Lists [Term Group]

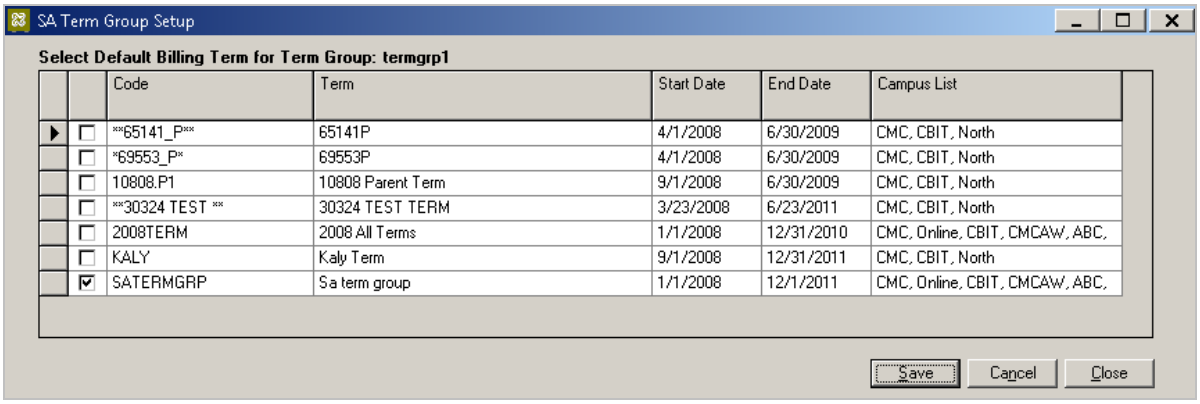
Use the Setup - Student Account Lists [Term Group] form to select a default billing term from within a term group or another student account term with applicable start and end dates. When aggregating credits across a term group, the charges are posted against the default billing term. The default billing term must be shared amongst all campuses in the term group and can be associated with only one term group at a time.

To add or edit a list of term group codes:

1. Navigate to **Lists** > **Student Accounts**. The Setup - Student Accounts Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Term group**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Click **Add**, or select a record and click **Edit**.



5. Select a **Default Billing Term**.
6. Click **Save**.

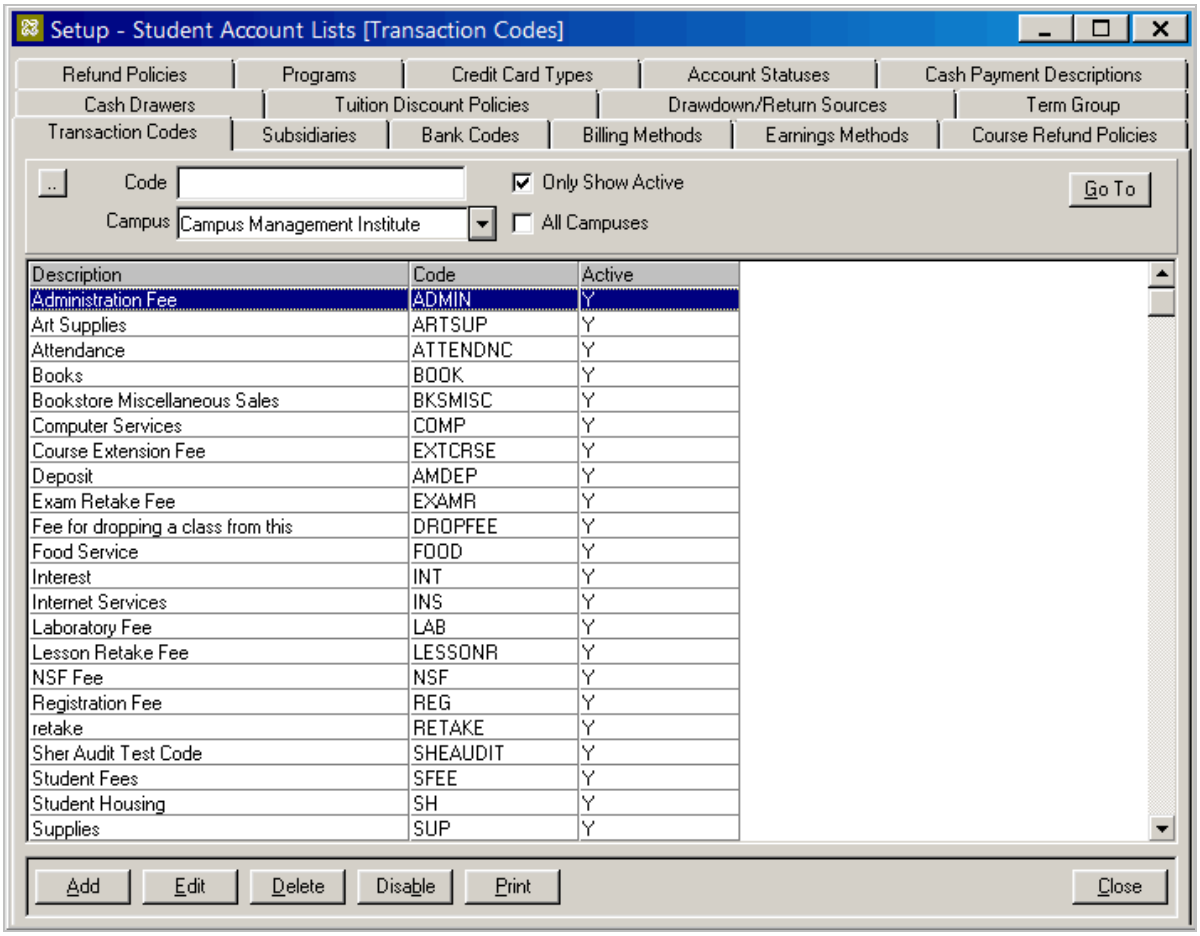
Setup - Student Account Lists [Transaction Codes]

The Transaction Codes list defines the transactions that affect the student ledger and the posting of related entries in the General Ledger. The following transaction codes are required by CampusNexus Student:

- BOOK = Books
- EXAMR = Exam Retake Fee
- EXTCRSE = Course Extension Fee
- EXTLSN = Lesson Extension Fee
- INT = Interest
- LESSONR = Lesson Retake Fee
- REG = Registration Fee
- TUIT = Tuition

To add or edit a transaction code:

1. Navigate to **Lists** > **Student Accounts**. The Setup - Student Accounts Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Transaction Codes**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in

the text box and press **Enter** to view the corresponding record in the list.

4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Transaction Codes Code Setup form is displayed.

   Note: If you receive the following message when editing a Transaction Code, *"This transaction code is being used as an Adjustment transaction code and cannot be edited at this time."*, navigate to **Lists** > **Student Accounts** > **Refund Policies** (tab) > **Transaction Codes** (button) and remove the Adjustment Code from its mapping to the Transaction Code.

   Note: The TUIT code must be used to bill tuition via Registration Billing. Unless an unbilled TUIT item appears in a student's Fees folder, the student is be gathered in the list of students to bill.

7. Specify appropriate options. See Field Descriptions - Transaction Codes Code Setup Form.
8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Field Descriptions: Transaction Codes Code Setup Form

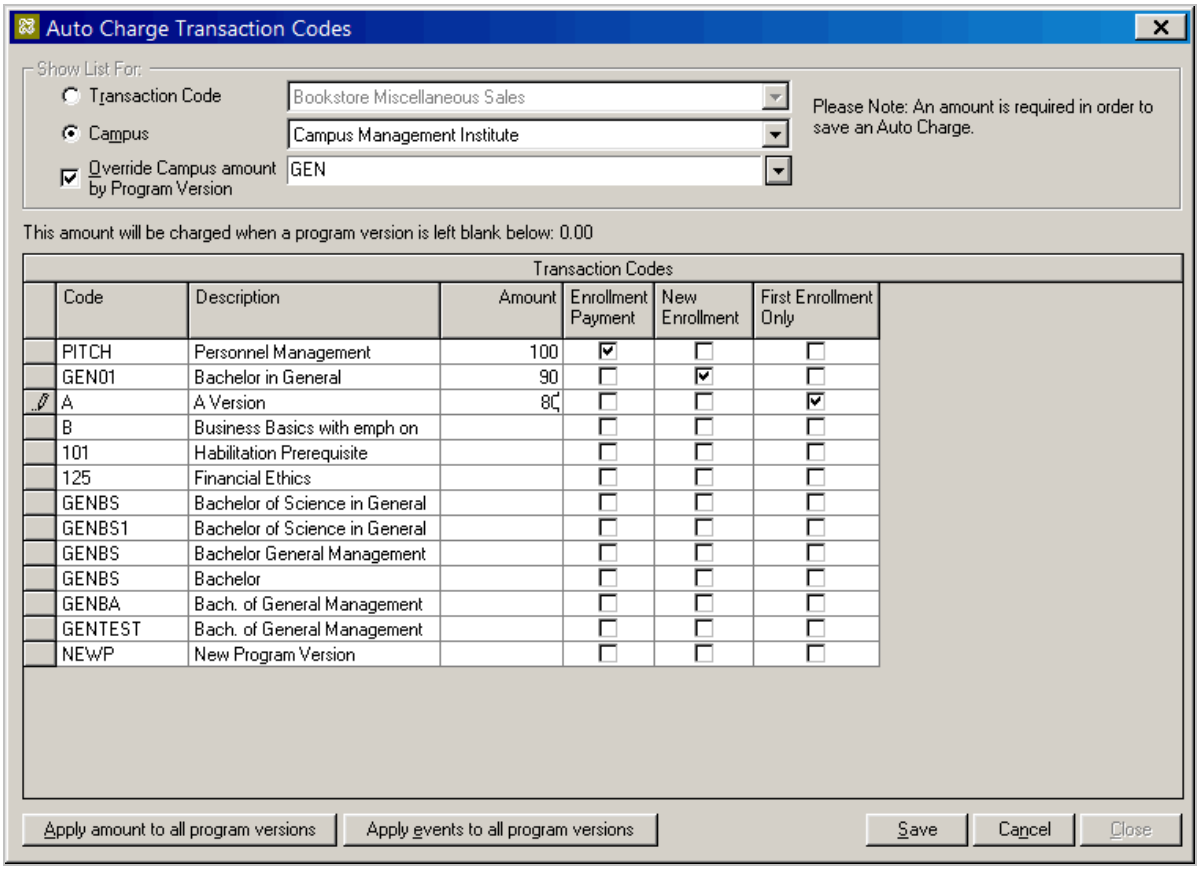
Field	Description
Code	Specify a unique **Code**.
Description	Enter a **Description**.
Active	Select or clear the **Active** check box to designate the record as active or inactive, respectively.
Campuses	Select one or more **Campuses**.
Bill Type	Indicate if the transaction applies to Students only, Miscellaneous Receipts only, or Both.
Defer Earnings	If this check box is selected, the procedures for deferring earnings apply to this type of transaction. For more information, see Earnings Methods, Revenue Recognition, and Student Accounts Programs.
Earn Neg. Revenue	Select in of the following methods for calculating negative deferred revenue: • **In Month Posted** - CampusNexus Student applies the entire amount in the month during which the transaction is posted. • **Amortize over Earning Period** - CampusNexus Student amortizes the transaction over the entire earning period (Program, Academic Year, Term, and so on). For more information, see Revenue Recognition.
Retake Fee	Select this option to mark a transaction code as a retake fee. Note that the Bill Type for Retake Fee can be set to Students only, Miscellaneous receipts only, or Both.
Include in Revenue Recognition	Select this option to include a transaction code in Revenue Recognition.
Include in Title IV Institutional Charges	Select this option if the charge is to be included in the Title IV refund institutional charges calculation. This option must be selected if this transaction code represents a charge to be evaluated.
Always allow Title IV to pay charge	Select this option for transaction codes such as tuition, fees, and room and board since the Title IV disbursement may be used by the institution without obtaining a waiver from the student or parent. Clear this option for transaction codes such as books/supplies since a waiver must be obtained before Title IV disbursements may be used to pay these types of charges.
Override Required Term Code?	Select this option to allow a transaction to be posted without a term code. This could include Registration fees and other transactions not tied to a term.
Allow Edit Misc Cash G /L Account	Select this option to enable the authorized user to specify a General Ledger account when posting miscellaneous cash receipts or override the G /L Account numbers for the transaction code. This option is disabled for Bill Type Student.

Field	Description
Include Bill Code on 1098-T calculations	Select this option if the code represents an activity that is an eligible 1098-T expense (e.g., tuition and books).
Include as School Activities Revenue in 90/10	Select this option to include income from eligible school activities in the 90/10 calculation. This feature is available only if the Bill Type is Misc Receipts or Both. This option is disabled for Bill Type Student. **Note**: In calculating revenues generated by school activities, an institution may include only revenue generated by the institution from activities it conducts, that are necessary for its students' education or training. The activities must be conducted on campus or at a facility under the control of the institution; performed under the supervision of a member of the institution's faculty; and required to be performed by all students in a specific educational program at the institution. Examples include beauty/barbering schools providing haircuts; culinary institutes operating restaurants, and trade schools providing equipment repairs. For more information on eligible activities, refer to https://ifap.ed.gov/ifap/.
Accept Deposits	Select this option to indicate that your institution will/cannot post charges to a subsidiary ledger using this transaction code. Subsidiary ledgers are used for student services that are handled outside the student's account balance. Examples of charges to a subsidiary ledger are housing, meal plans, parking, etc.
Student Fee	Dual (Connected) Enrollment Student Fee with Terms not shared Select this option to designate whether fees should be charged once based on the student's overall level of enrollment for the time frame being billed when term group billing is configured for Connected enrollments. For more information, see Billing Methods. This option is ONLY applicable for billing connected enrollments with Automated Registration Billing set up with a Term frequency.
Auto Charge	See Auto Charge Transaction Codes. The Auto Charge option is not available if the Bill Type is Misc. Receipts.

Auto Charge Transaction Codes

You can auto charge transactions by Transaction Code, Campus, or Program Version. When the student enrolls, the enrollment is subject to application and other fees. These fees are automatically charged to the student and become transactions recorded in the Student Ledger Card.

1. Click **Auto Charge** to automatically post a charge. The Auto Charge Transaction Codes form is displayed.



2. Specify appropriate options. See Field Descriptions - Transaction Codes Code Setup Form.
3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Field Descriptions - Auto Charge Transaction Codes Form

Field	Description
Show List For	Select Transaction Code or Campus.
Transaction Code	If you selected to view the list by Transaction Code, select a Transaction Code.
Campus	If you selected to view the list by Campus, select a Campus.

Field	Description
Override Campus amount by Program Version	If you selected to view the list by Campus and you want the program version amount to override the campus amount of the transaction, select the Override Campus amount by Program Version check box. A list of program versions becomes available for selection. Select a program version from the list. CampusNexus Student provides the capability of automatically charging fees when different programs charge different Application Fees. The feature also allows users to set up Auto Charges based on Program and associated program version. When charging application fees to a student when enrolling, CampusNexus Student charges the program version amount if an application fee applies. When charging application fees to student ledger cards, users often have problems with incorrect amounts being charged. On some campuses, application fees do vary from program to program, and therefore the fees are dependent on the student's enrollment program. When the student enrolls, or is charged the application fee, the staff member may not always be aware of the current fee amounts. Automating the charges for application fees by program increases productivity and prevents data entry errors. You cannot select the following options to apply the auto charges to: • Student Payment • Require Housing • Return Check Fee CampusNexus Student auto charges amounts by student when the specified event occurs. • If an amount exists for program version, auto charge that amount. • If no amount exists for program version, use amount defined for campus if one exists. Notice the message: *"This amount will be charged when a program version is left blank below."* The amount represents the Campus amount assigned to the fee.
Student Payment	Select this option to configure an automatic charge to be generated when a student payment is made prior to enrollment. Only Student or Enrollment Payment may be selected (selecting one will clear the other).
Enrollment Payment	Select this option to configure an automatic charge to be generated when a student payment is made following enrollment. Only Student or Enrollment Payment may be selected (selecting one will clear the other).
New Enrollment	Select this option to configure an automatic charge to be generated when student enrollment is completed. New Enrollment can be selected in conjunction with Student or Enrollment Payment.
First Enrollment Only	Select this option to configure an automatic charge to be generated only once, during the student's first enrollment. Typically used for enrollment and application fees that are not charged again if a student enrolls in another program.
Require Housing	Select this option to configure an automatic charge to be generated for a housing deposit when housing is required for a student.

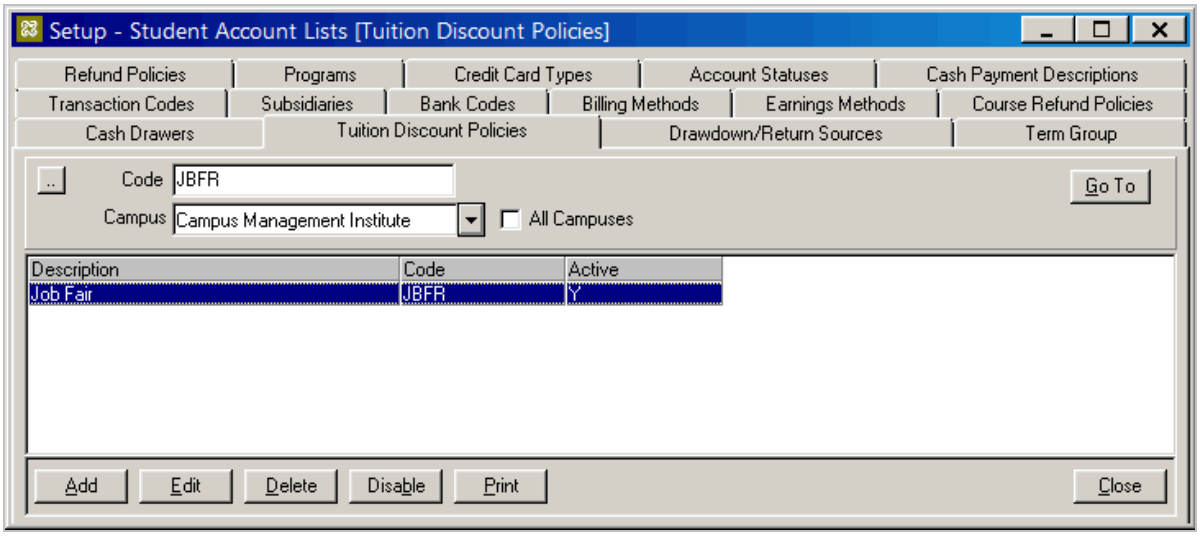
Field	Description
Returned Check Fee	Select this option to configure an automatic charge if a check for a student payment is returned by the bank for non-sufficient funds (NSF).
Apply amount to all program versions (button)	This button is enabled when 'Campus' and 'Override Campus amount by Program Version' are selected and an amount is specified for a program with multiple program versions. When you click the button, CampusNexus Student places the same amount in all subsequent program versions rows.
Apply events to all program versions (button)	This button is enabled when 'Campus' and 'Override Campus amount by Program Version' are selected and an amount is specified for a program with multiple program versions. When you select an event such as 'Enrollment Payment', 'New Enrollment', or 'First Enrollment Only' and then click the button, CampusNexus Student applies the event selection to all subsequent program versions rows.

Setup - Student Account Lists [Tuition Discount Policy]

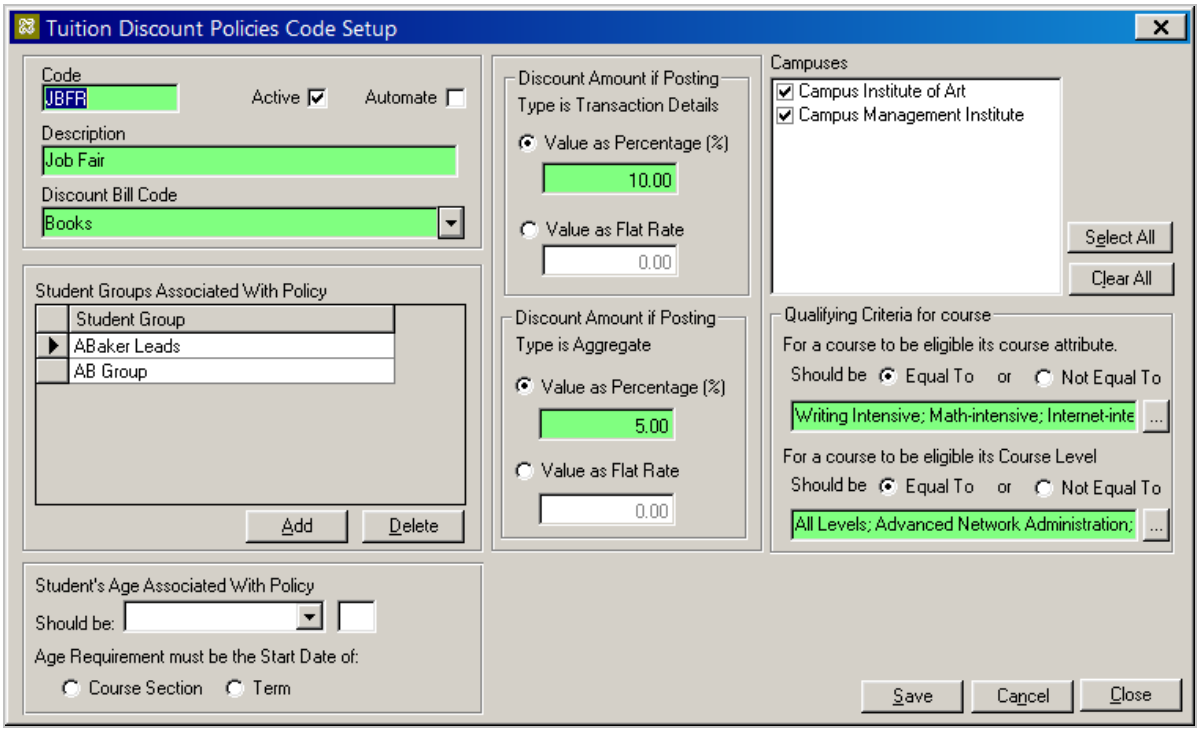
The Tuition Discount Policy list defines the policies used to apply a discount to the tuition rates for eligible students.

To add or edit a list of tuition discount policies codes:

1. Navigate to **Lists** > **Student Accounts**. The Setup - Student Accounts Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Tuition Discount Policy**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Tuition Discount Policy Code Setup form is displayed.



7. Specify appropriate options. See Field Descriptions.

   Note: It is not recommended to change discount percentages or flat rates on a Tuition Discount Policy once discounts have been posted for a given policy.

8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

   The following occurs when you click Save:

   - If the tuition discount policy is automated and the campus selected has not been configured for the tuition discount posting order, a message is displayed advising you to configure the posting order; if it is more than one campus, a list of the campuses not configured for the discount posting order is displayed. To configure the Posting Order, see Campus Accounting.
   - If you do not configure a posting order found for the campus, the automated tuition discount policy will not calculate a discount for the policy that is set up.

Field Descriptions

Field	Description
Code	Specify a unique **Code**.
Description	Enter a **Description**.
Active	Select or clear the **Active** check box to designate the record as active or inactive, respectively.

Field	Description
Automate	Select this check box to automate the tuition discount with a posting order and calculate the discount up to 100% of the course charge. When automated, the pending tuition discount transactions are posted to the student's Ledger Card automatically when TUIT charges are posted. Otherwise, the pending tuition discount transactions is deleted when TUIT charges are posted. Tuition discounts then have to be processed manually through View > Student Accounts > Tuition Discounts or through Daily > Student Accounts > Process Tuition Discounts. The manual tuition discount process also allows you to use the tuition discount posting order and to calculate the discount up to 100% of the course charge. If pending charges exists for the student, CampusNexus Student checks if any pending discounts are available, and if so, displays them on the Ledger Card, Ledger Card Report, Registration Bill Summary, and Registration Bill Details.
Discount Bill Code	Select a bill code for the tuition discount policy. **Notes**: • Different tuition discount policies should not share the same tuition discounts bill code. • The TUIT transaction code does not appear in the list because the tuition discount should not be posted against the same bill code to which it was charged.
Student Groups Associated With Policy	To associate a student group with the new tuition discount policy, click **Add**. This adds a row in the Student Group list. Click in the new row and select the student group to associate with the policy. **Note**: Different tuition discount policies should not share the same student group. If a student is eligible for multiple tuition discount policies, add the student to the appropriate student groups that are associated with those tuition discount policies.
Student's Age Associated With Policy	Use the 'Should be' field to define the age criteria for the Tuition Discount Policy. Select one of the following values: • Equal To • Greater Than • Greater Than Or Equal To • Less Than • Less Than Or Equal To • Between **Notes**: • If Between is used, the 'and' label and a second age box are displayed. If you use this value, make sure the second text box age number is greater than the first. • All age boxes must have numeric values. Select Course Section or Term for the 'Age requirement must be the Start Date of:' option.

Field	Description
Discount Amount if Posting Type is Transaction Details / Discount Amount if Posting Type is Aggregate	Specify the amount of tuition charge to be discounted for each course as a percentage in the Value as Percentage (%) field or as a flat rate in the Value as Flat Rate field. The Value as Percentage (%) field allows two decimal places. Specify this discount under 'Discount Amount if Posting Type is Transaction Details' (see also Post Transaction Details) or under ' Discount Amount if Posting Type is Aggregate' based on the billing method selected for the tuition discount policy. **Note**: It is not recommended to change discount percentages or flat rates on a Tuition Discount Policy once discounts have been posted for a given policy.
Campuses	Select one or more **Campuses**.
Qualifying Criteria for course	Select the criteria that a course must meet to qualify for the tuition discount. The qualifying criteria available are Course Attribute and Course Level. Select 'Equal To' or 'Not Equal To' and select the course attribute and level that a course's should be equal to or not equal to in order to be eligible for the tuition discount policy. Click to select multiple attributes or levels.

Lists > Academic Records

When you navigate to Lists > Academic Records, the **Setup - Academic Records Lists** form is displayed. From this form, you can add, edit, delete, enable, disable, copy, and print Academic Records lists using the following tabs:

- Areas of Study
- Buildings/Rooms
- Calendar
- Catalog (This tab appears only if Enable Catalog is selected on the Campus Information - Academic Records tab).
- Course Attributes
- Course Categories
- Course Groups
- Course Levels
- Course Reason
- Course Type
- Courses
- Degree
- Delivery Methods
- Enrollment Status
- GPA
- Grade Level
- Grade Level Promotion Rules
- Grade Scale
- Honors
- Instructor Attributes
- Lesson Types
- Period
- Program Group
- Programs (Also see Program Versions and CIP Code.)
- Reasons
- Registration Groups
- Requirement Rules
- Resources
- SAP
- Start Date
- SAP Reason
- SAP Status
- Shifts
- Term
- Term Groups

See Maintaining Lists for instructions on adding, editing, deleting, disabling, enabling, and printing lists.

Setup - Academic Records Lists [Areas of Study]

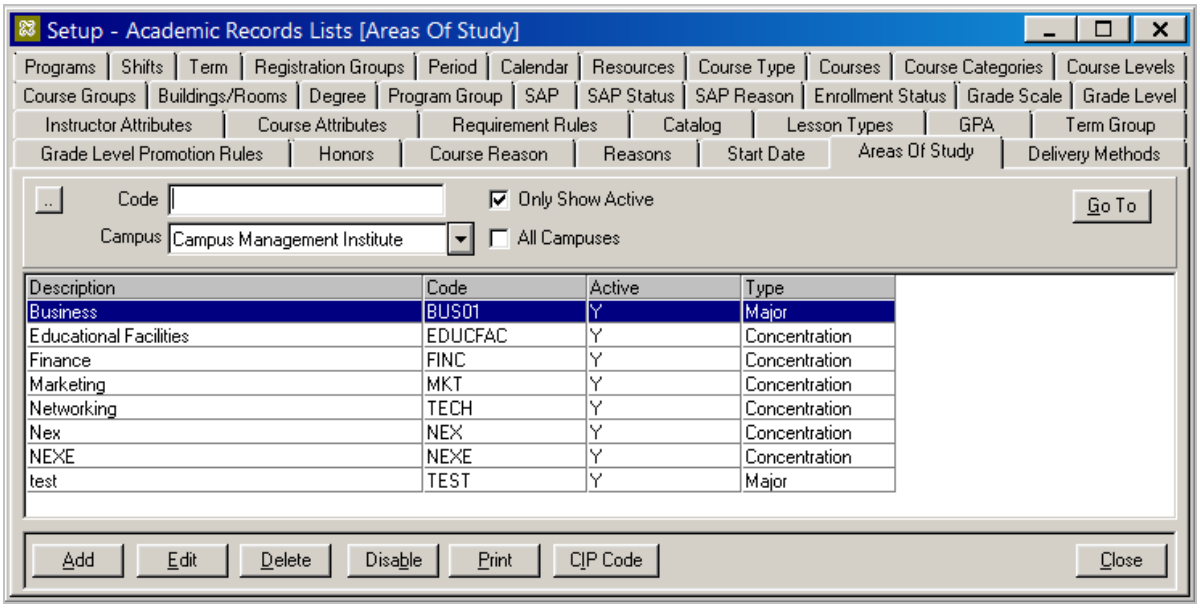
Use the Setup - Academic Records Lists [Areas of Study] form to define areas of study for your institution. The attributes of an area of study include code, description, type (major, minor, or concentration), CIP code, and campus association. You can also select requirement rules and create a course list. The selected courses must comply with the minimum GPA and the number of required credits defined for the area of study.

An area of study is selected as part of a student's enrollment. The area of study can be added to the enrollment through the Enrollment Wizard under View > Admissions > Enroll Student. The area of study can also be declared post enrollment by editing the Enrollment Information tab under View > Academic Records > Enrollment .

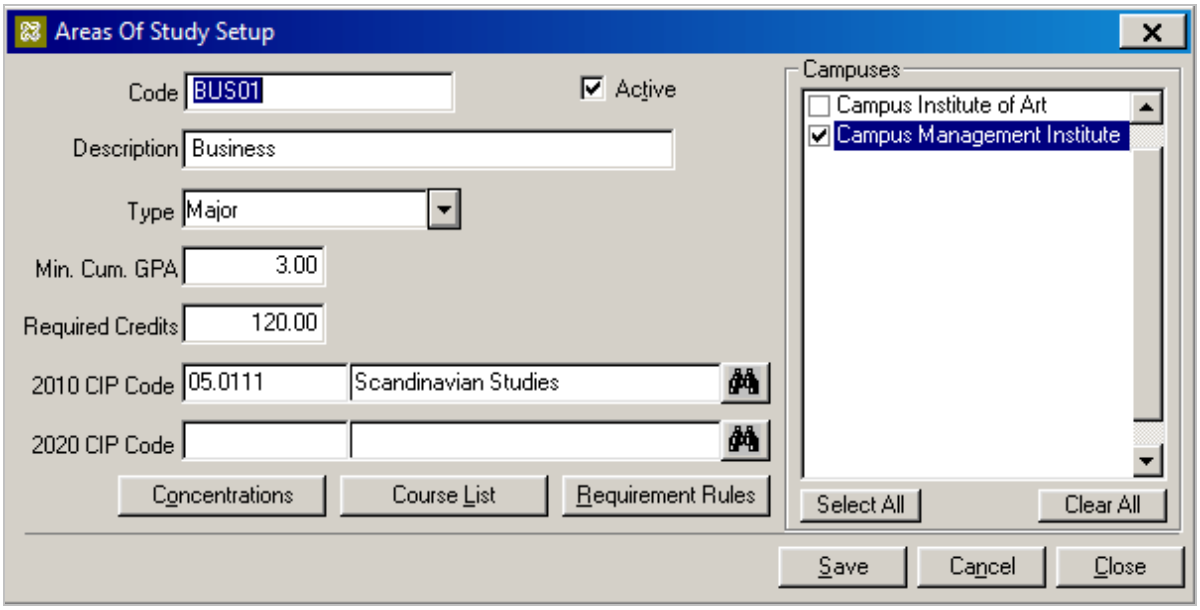
Areas of study are assigned to specific Program Versions under Lists > Academic Records > Programs > Versions. For more information, see Program Versions and Areas of Study.

To add or edit a list of areas of study codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Areas of Study**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Areas Of Study Setup form is displayed.



7. Specify appropriate options. See Field Descriptions.

Field Descriptions

Field	Description	
Code	Specify a Code of up to eight characters.	
Active	Select or clear the Active check box to designate the record as active or inactive.	
Description	Enter an appropriate description.	
Type	Select one of the following options: • Concentration • Major • Minor	
Min. Cum. GPA	Specify the minimum cumulative grade point average needed for this Area of Study.	**Note**: The Min. Cum. GPA and Required Credits values are used to create a relationship between the degree, core courses, and grades required to attain the degree. CampusNexus Student checks continually to ensure that students meet their degree requirements.
Required Credits	Specify the number of credits required for this area of study.	
Campuses	Select the campuses where this area of study is available.	
2010 CIP Code	Click to search for a 2010 Classification of Instructional Program (CIP) code to be associated with the area of study. For more information, see Associate CIP Code with Area of Study or Program.	
2020 CIP Code	Click to search for a 2020 Classification of Instructional Program (CIP) code to be associated with the area of study. For more information, see Associate CIP Code with Area of Study or Program.	

8. The Concentrations button is enabled when Major is selected in the Type field.

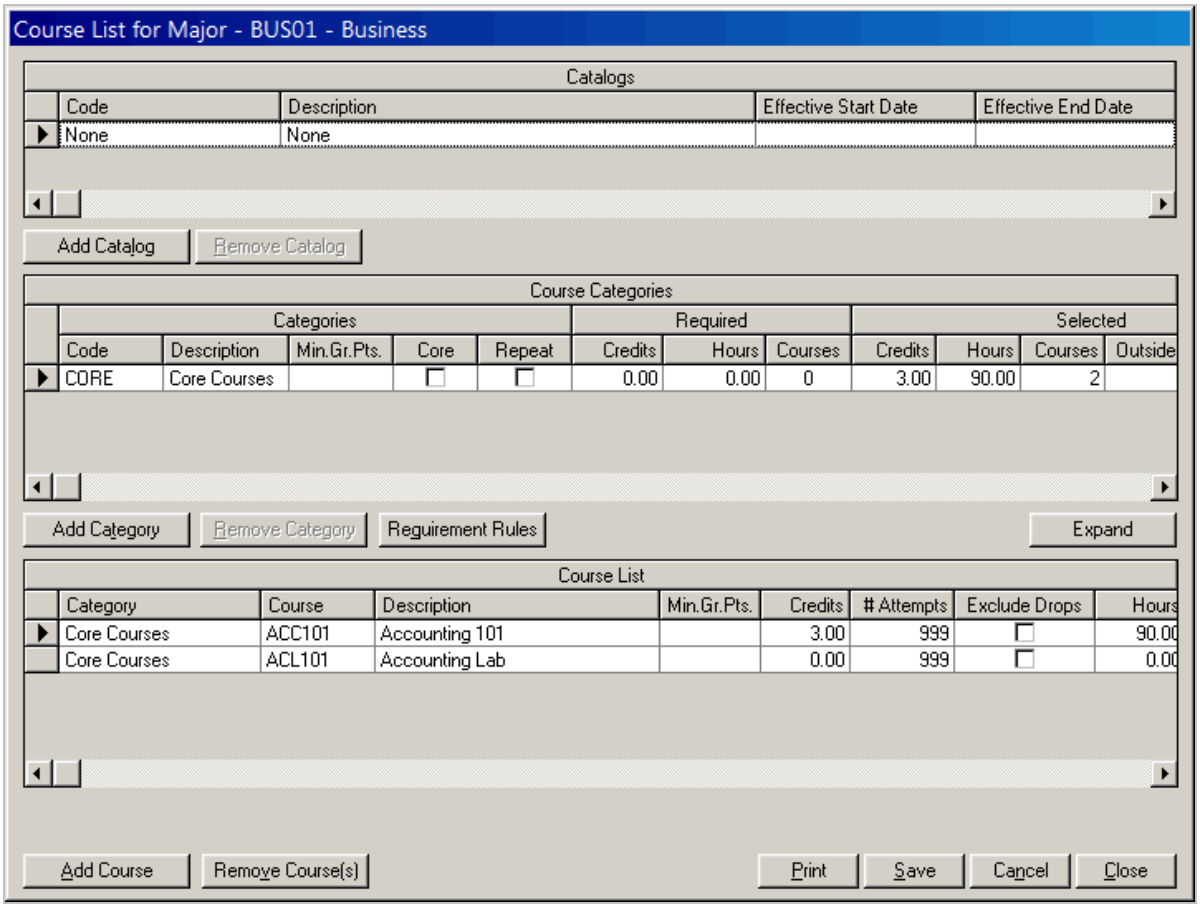
    a. Click the **Concentrations** button to add previously defined Concentrations to the Major. The Concentration List form is displayed.

    b. Select an item from the **Available Concentrations** list and click >> to create a list of Selected Concentrations. (Click << to remove a selected item from the Selected Concentrations list.)

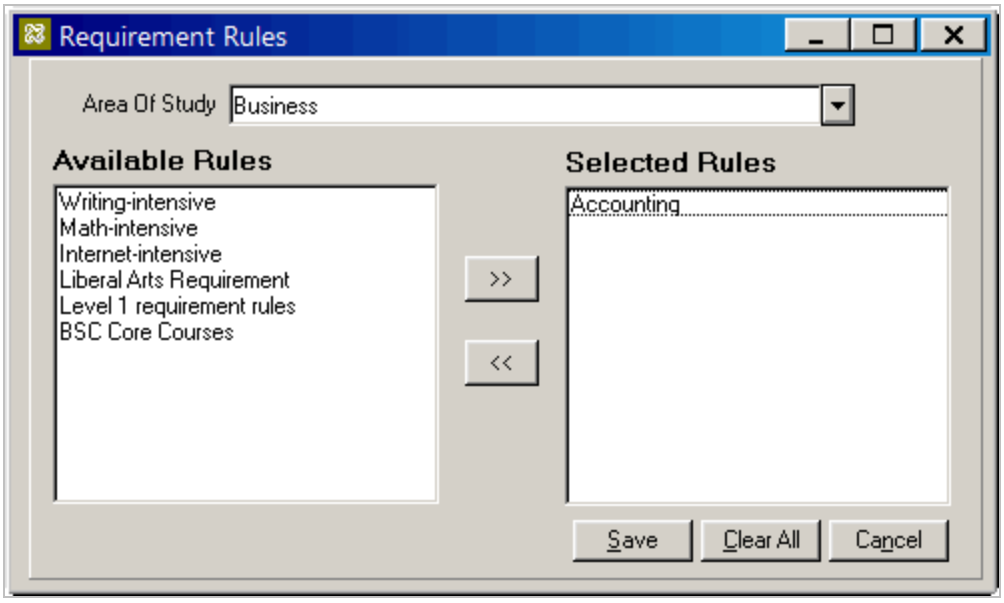
    c. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You care returned to the Setup - Academic Records Lists [Areas of Study] form.

9. Click the **Course List** button to build a list of courses required for the area of study. The Course List for Major form is displayed.

    This form is similar to the one used to build a course list for a Program Version. For more information, see Course List.



10. Click the **Requirement Rules** button to select requirement rules for the area of study. The Requirement Rules form is displayed.



Note: Rules are created on the Setup - Academic Records Lists [Requirement Rules] form. For supplemental information, refer to:

- Assign Rules to Course Category
- Assign Rules to Program
- Add an Elective to the Program Version Course List

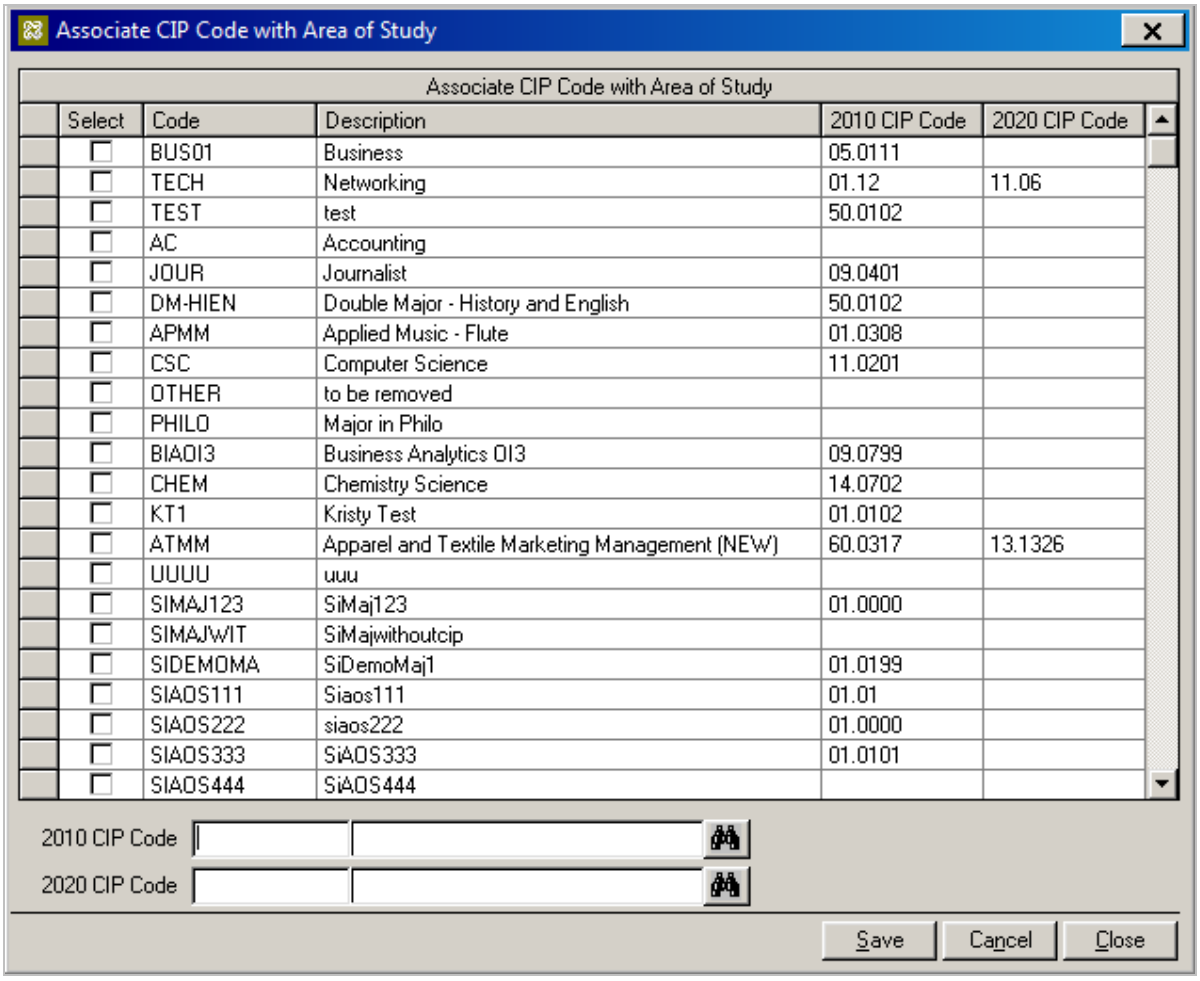
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Associate CIP Code with Area of Study or Program

Institutions must report Classification of Instructional Program (CIP) codes to COD and NSLDS. These codes are defined by the National Center for Education Statistics (NCES), and until the HERA regulation, were used primarily for IPEDS reporting. Institutions may select the CIP codes, associate them with areas of study or programs, and subsequently export them to COD.

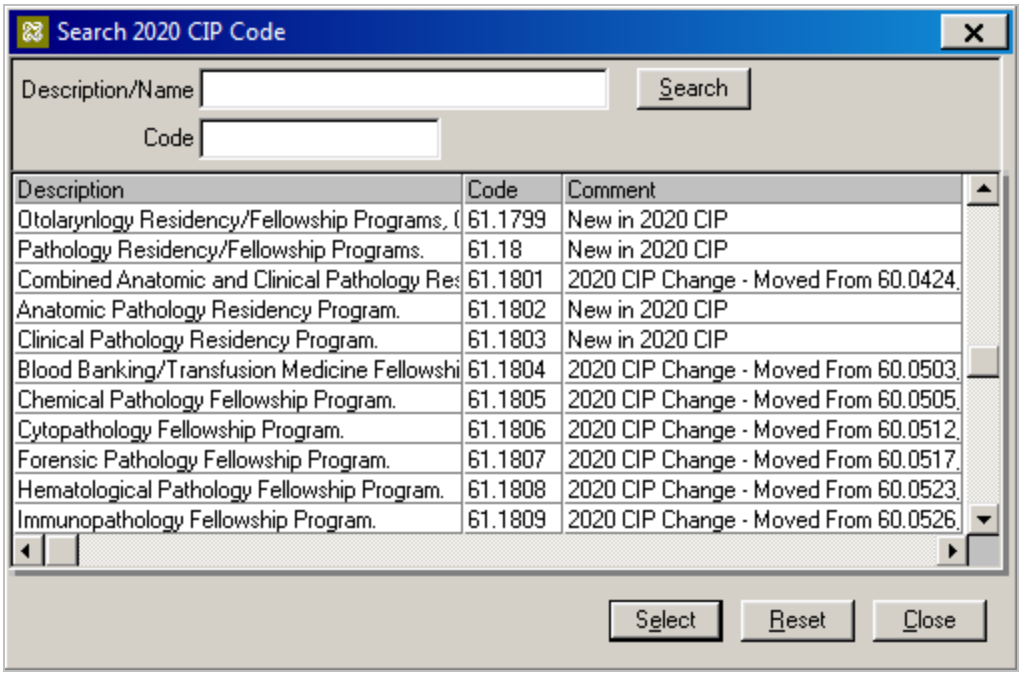
To associate a CIP code with an area of study or program:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the **Areas Of Study** tab to associate a CIP code with an area of study.
   - OR -
   Select the **Program** tab to associate a CIP code with a program.
3. Click **CIP Code**. The Associate CIP Code with Area of Study or Associate CIP Code with Program form is displayed.



4. Select the **Select** check box for Code and Description that you would like to associate with the CIP code.
5. To search for a CIP code, click next to the **2010 CIP Code** or **2020 CIP Code** text box. The Search 2010 CIP Code form or Search 2020 CIP Code form is displayed.

Note that the Comment column in the Search 2020 CIP Code form indicates whether a CIP code is new, changed, or moved.



a. Specify the **Description/Name** of the CIP code or click the **Search** button

b. Select the applicable **Description** and **Code**.

c. Click the **Select** button to select the CIP code, or select the **Reset** button clear the list of CIP codes so that you can select the Search button again.

d. Click the **Close** button.

The selected CIP Code/Description is inserted into CIP Code/Description fields of the form where the CIP code search was initiated.

6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Academic Records Lists [Buildings/Rooms]

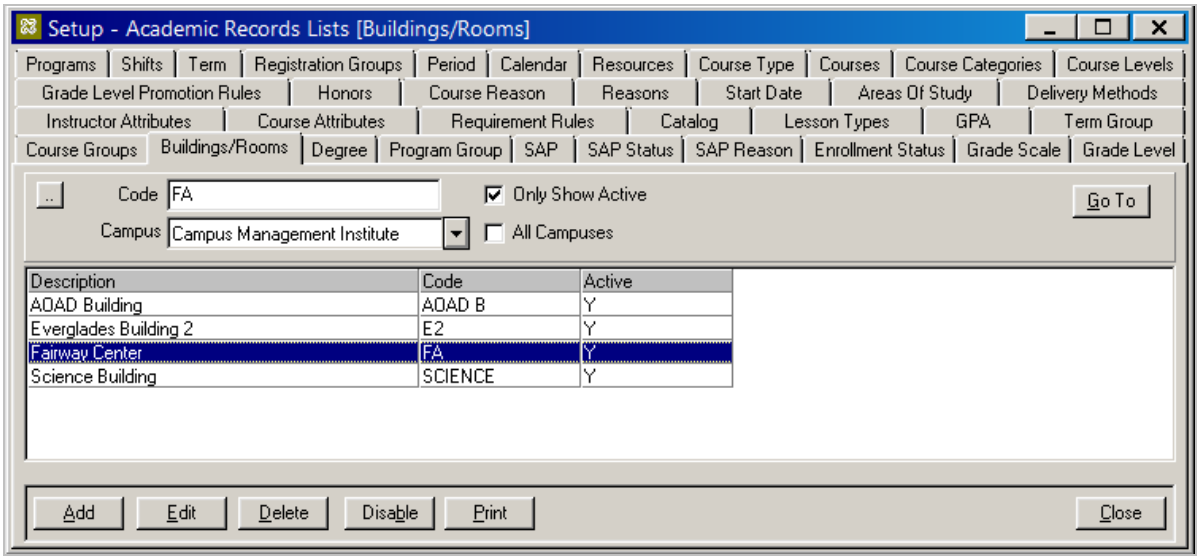
Use the Setup - Academic Records Lists [Buildings/Rooms] form to provide basic information about each building and classroom. Rooms are associated with a building and buildings are associated with a campus. Rooms can be associated with resources such as computers, projectors, and so on.

Prerequisite: Resource codes must be set up under Lists > Academic Records > Resources before they can be assigned to a room.

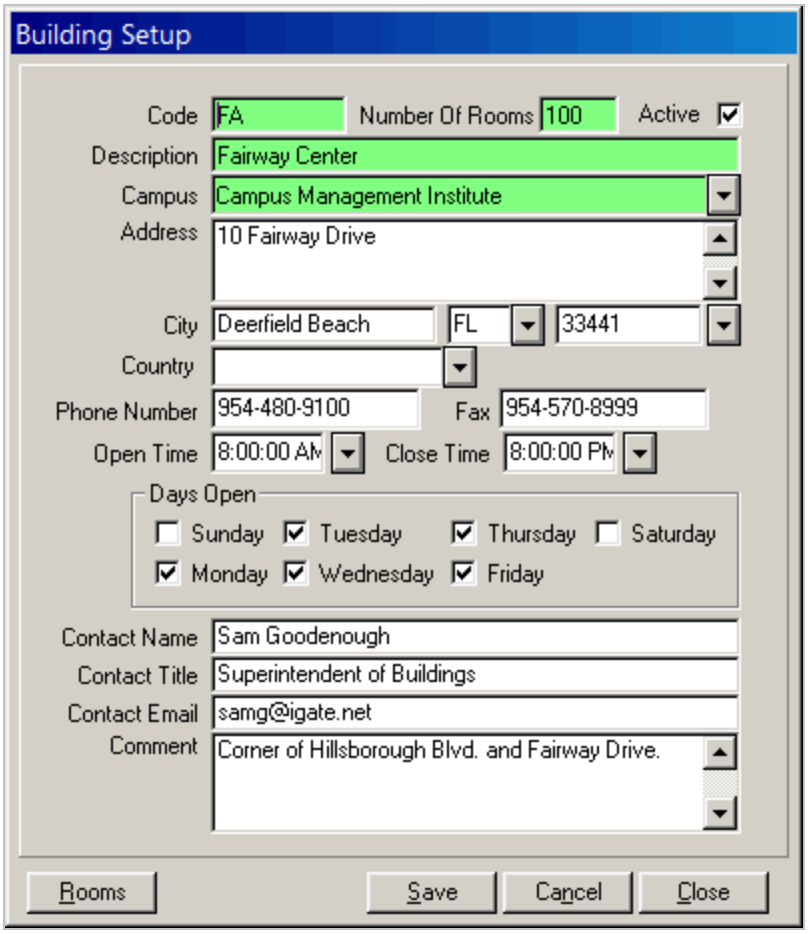
Note: You cannot delete a building if class sections are scheduled in it.

To add or edit a list of buildings/rooms codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Buildings/Rooms**.

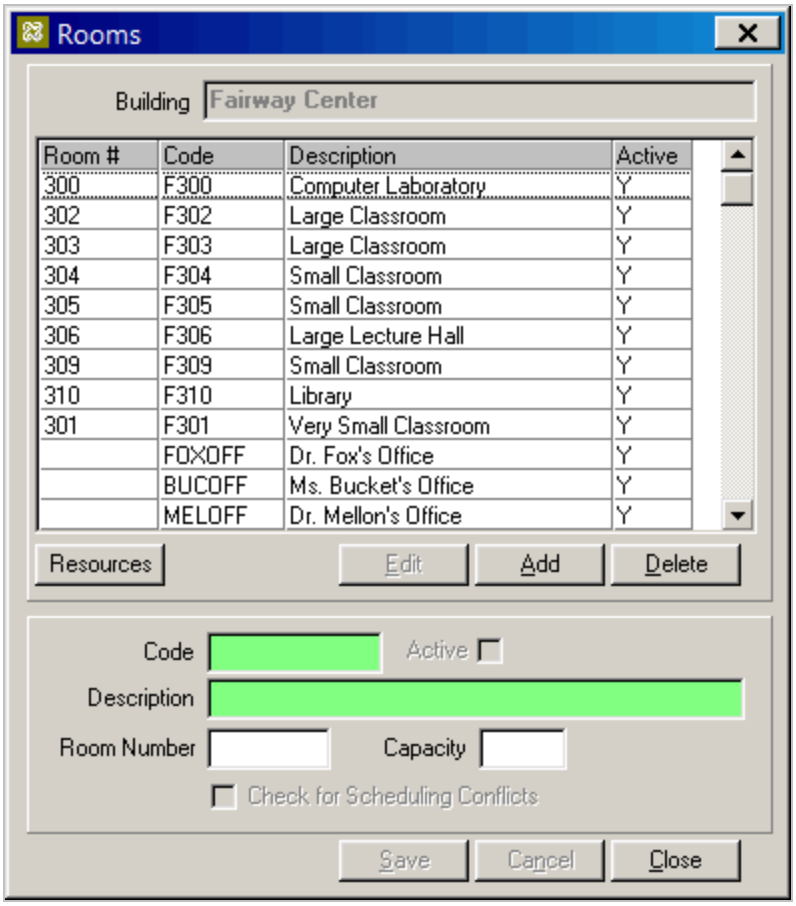


3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Building Setup form is displayed.

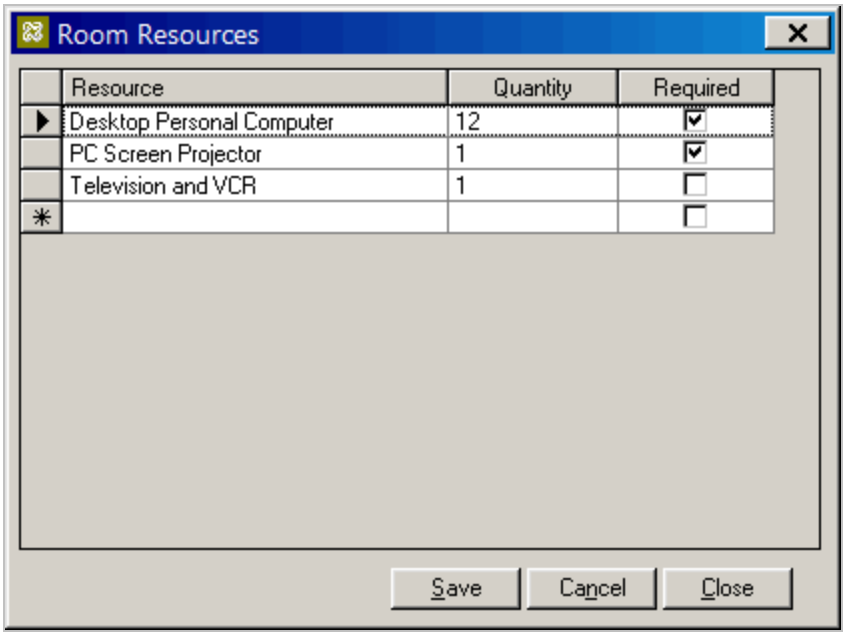


7. Specify a unique **Code**.
8. Specify the **Number of Rooms** (class rooms, labs, and so on).
9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
10. Enter a **Description**.
11. Select the **Campus** at which the building is located.
12. Specify the address, telephone, and fax information.
13. Specify the hours and days of the week the building is available for classes.
14. Specify the contact information of the person who deals with building-related issues on a daily basis.
15. Enter any comments in the **Comment** field.
16. Click **Save**.

    Note: Save a new building record before attempting to add rooms to it.
17. To add or edit rooms in this building, click **Rooms**. The Rooms form is displayed.



18. Click **Add**, or select a record and click **Edit**.
19. Specify a unique **Code**.
20. Enter a **Description**. Include the room code and/or building in the description if several rooms may have the same description. In some cases, the room description instead of the room code is displayed on reports or option lists.
21. Specify a **Room Number**.
22. In the **Capacity** field specify the number of students that can be seated in the room.
23. Select or clear the **Check for Scheduling Conflicts** box. This check box indicates whether conflict checking should be enabled for the selected room. Clear this box to disable conflict checking for this room.
24. Click **Save**.
25. Click the **Resources** button to specify a list of resources provided in the room. The Room Resources form is displayed.



26. Click in a blank **Resource** field and click to select a resource from the previously established list of resources (see Lists > Academic Records > Resources).
27. In the **Quantity** field, specify the number of resource units.
28. Select or clear the **Required** check box to indicate that the resource is required in this room.
29. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Rooms form.
30. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Building Setup form.
31. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Setup - Academic Records List [Buildings/Rooms] form.

Setup - Academic Records Lists [Calendar]

Use the Setup - Academic Records List [Calendar] form to set up your institution's calendar of holidays and other non-attendance days that are important in the posting of attendance. Each record can be related to a specific campus or all campuses. It is not necessary to enter weekend dates, unless you normally schedule classes on weekends. It is also not necessary to enter dates between the end of one term and the beginning of the next term.

If a non-attendance day is added, edited, or deleted, the class schedules are updated to add, change, or remove the holiday status (H) from the class attendance days (see Add/Drop Dates of Existing Course Sections). Class schedules are also updated if the campus selection is changed from one campus to another or from all campuses to a specific campus.

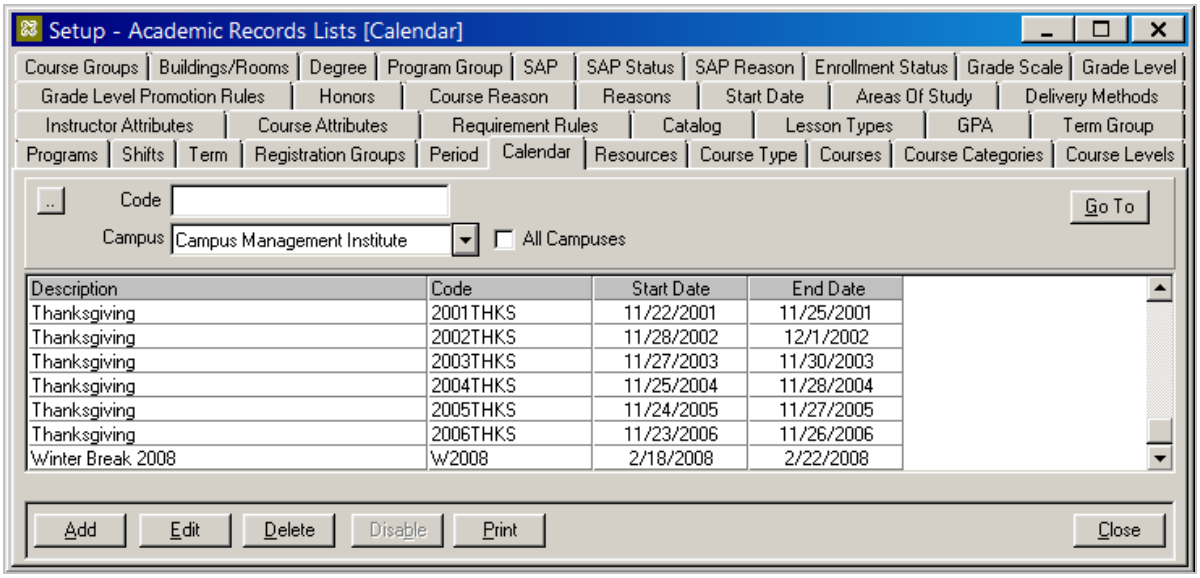
The process for saving campuses to a holiday period validates that the campuses selected are not already in a similar holiday period. The campus code, holiday codes, and date range for the holiday period are displayed in a warning message. Check the returned holiday code to make sure the campuses selected are not already in that holiday period.

Note: Avoid conflicting and overlapping holidays. If yours is a multi-campus institution with different holidays for different campuses, do not use the All Campuses option. Set up each holiday for each campus.

An example of what not to do: ABC institution has three campuses, A, B, and C. Two campuses have a full week off at Thanksgiving and the third campus allows only Thursday and Friday off. To save some data entry, the system administrator sets up Monday through Friday of Thanksgiving week as the holiday period for ALL institutions. The system administrator then sets up the third campus-specific (C) holiday period as Thursday through Friday of Thanksgiving week. When attendance is posted, and in other calculations, CampusNexus Student considers campus C as having the same five days off as campuses A and B because Monday through Wednesday are covered under the ALL holiday entry.

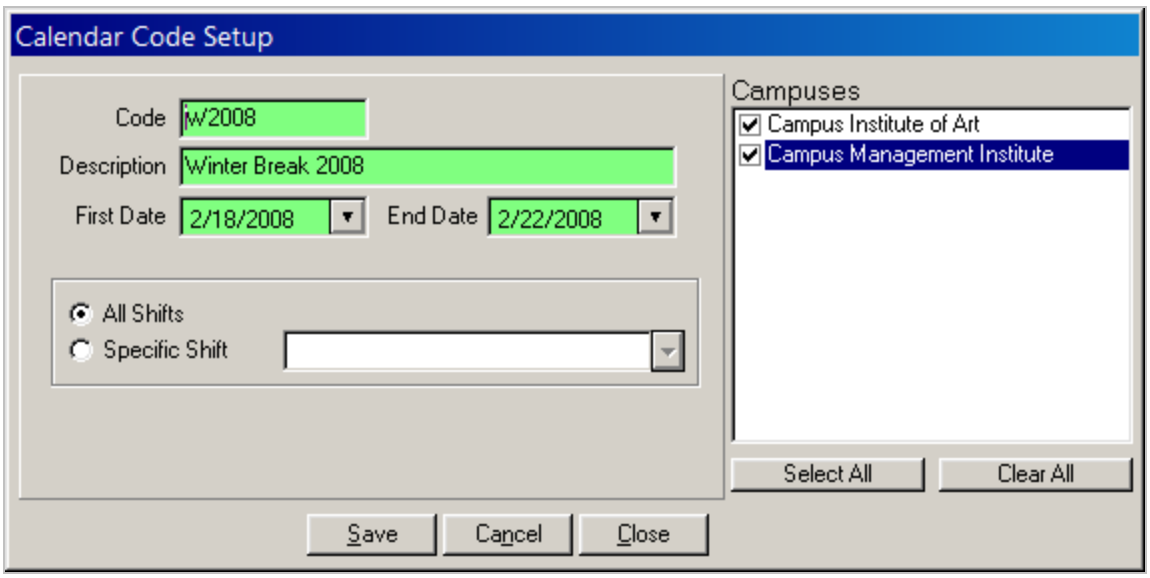
To add or edit a list of non-attendance days (calendar codes):

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Calendar**. A list of holidays is displayed. By default the list is sorted in descending order by the End Date. Change the sort order by clicking the column headers.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.

4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Click **Add**, or select a record and click **Edit**. The Calendar Code Setup form is displayed.

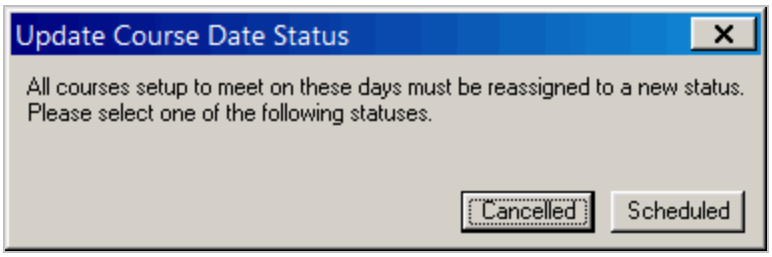


6. Specify a unique **Code**.

   Always use unique codes. Adding or editing holiday periods with the same codes can lead you to add campuses that already exist on another holiday period with the same code. If a warning message states the holiday period and campus is duplicated, check the holiday period and adjust as needed or re-evaluate the current holiday period.
7. Enter a **Description**.
8. Specify the **First Date** and **End Date** for the holiday period.
9. Select **All Shifts** or **Specific Shift**. If you select Specific Shift, choose a shift from the list.
10. Select one or more **Campuses**.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To delete a non-attendance day:

1. On the Setup - Academic Records Lists [Calendar] form, select the calendar record and click **Delete**.
2. A message is displayed indicating that all courses set up to meet on the scheduled date must be reassigned to a new status. Depending on the status you want to assign to the courses, click **Cancelled** or **Scheduled**.



Add/Drop Dates of Existing Course Sections

In the following situations, a message is displayed indicating that any addition, modification, or deletion of a calendar entry may affect the add/drop date of existing course sections. Decide if you want CampusNexus Student to recalculate and update the add/drop date of any affected course sections.

- A calendar entry is added or edited. Based on the date range of the calendar entry, it may affect the add/drop date of at least one existing course section that is using the Add/Drop Flag configured as Course Section Enforced.
- A calendar entry is deleted. Based on the date range of the calendar entry, it may affect the add/drop date of at least one existing course section that is using the Add/Drop Flag configured as Course Section Enforced.

You have the option to have the system recalculate and update the add/drop date of any affect course section. Only add/drop dates that were calculated by the system are recalculated/updated. Add/Drop dates that were manually entered are not recalculated/updated.

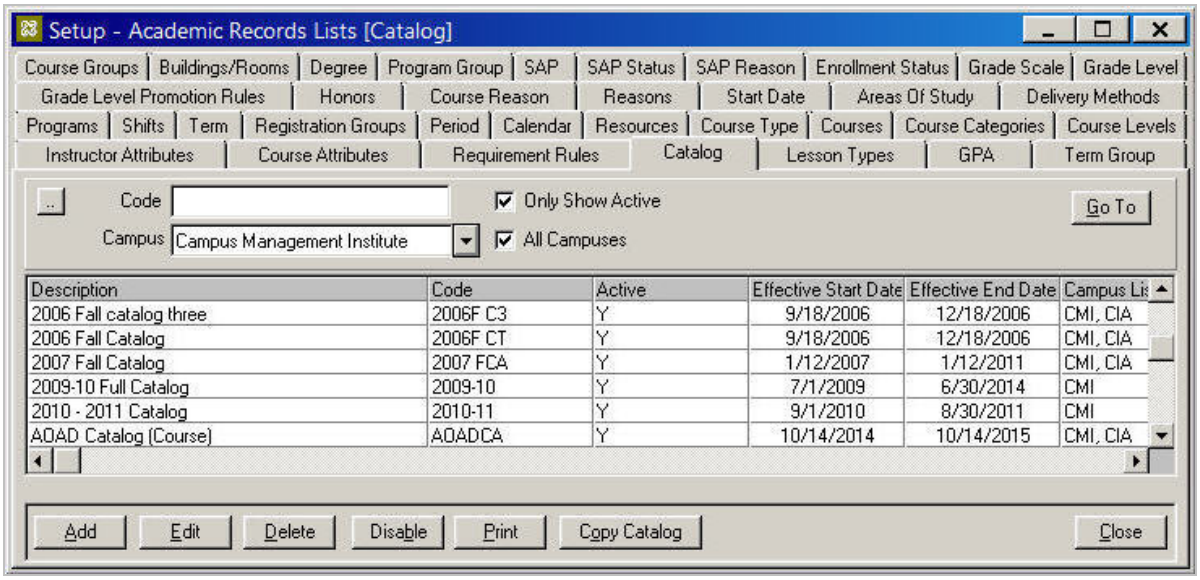
Setup - Academic Records Lists [Catalog]

Courses can be associated with the program versions catalog for a campus so that institutions can track which courses are required for a program in a given catalog. By default, students are assigned to the catalog that is active when they start a program. Students may choose between any of the catalogs that were published during the time they attended the institution. By changing to a different catalog, students can meet the requirements outlined for their program in the catalog. The catalog settings can be assigned to Program Versions and Areas of Study.

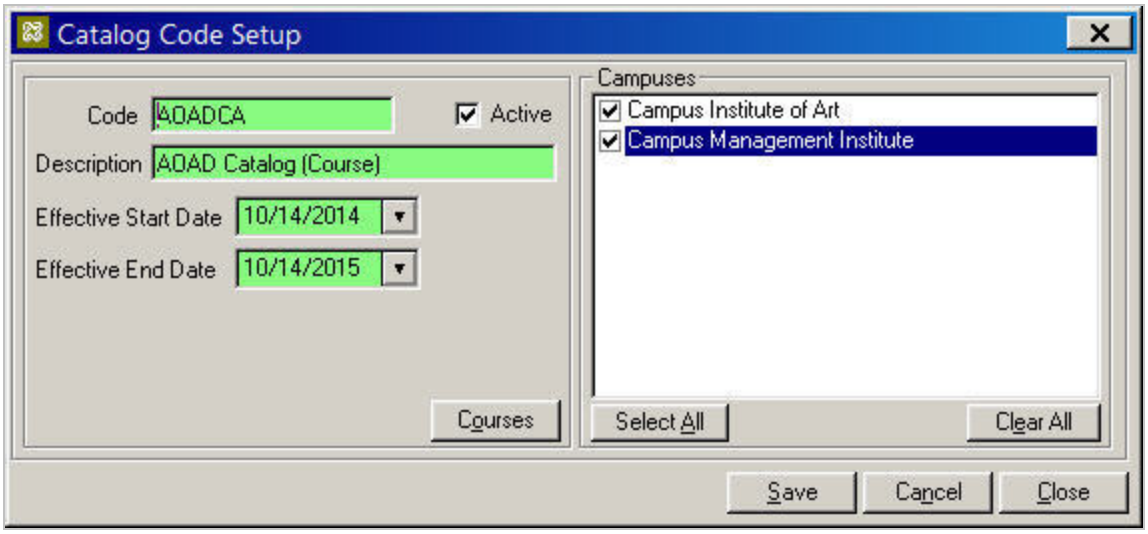
Note: The Setup - Academic Records Lists form contains a Catalog tab only when the catalog is enabled for the campus (see Enable Catalog on the Setup > Campus Information - Academic Records tab).

To add or edit a list of catalog codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Catalog**.

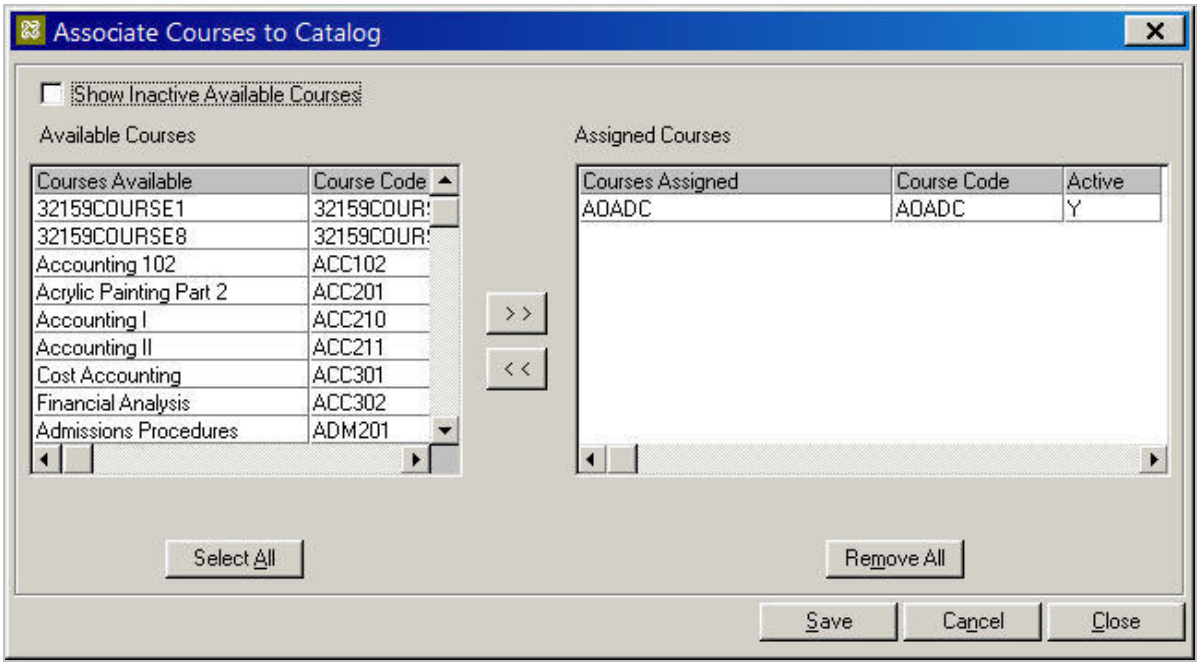


3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Catalog Code Setup form is displayed.



7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.
10. Select one or more **Campuses**.
11. Select the **Effective Start Date** for the catalog.
12. Select the **Effective End Date** for the catalog.

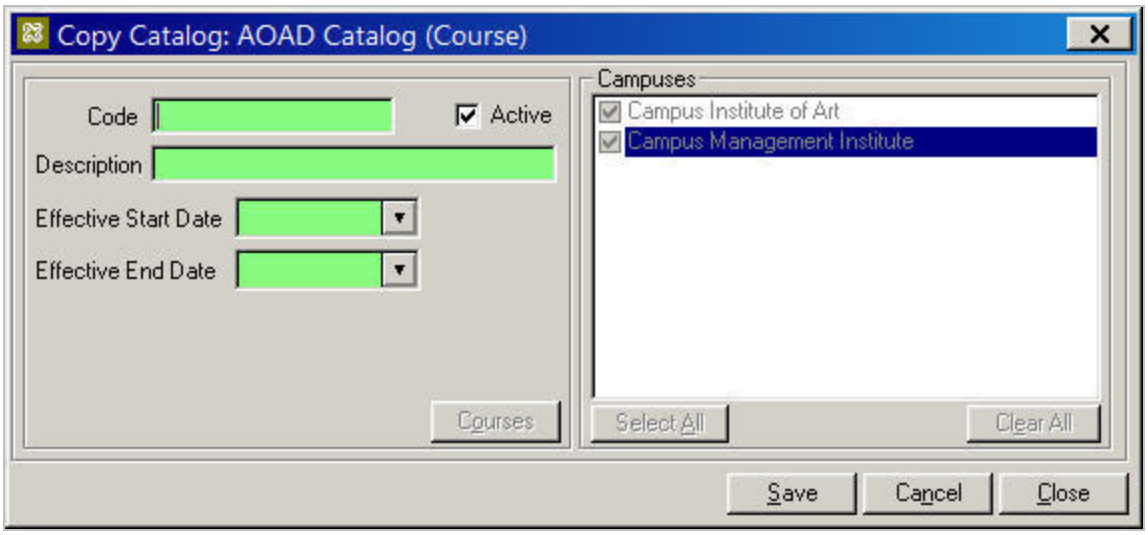
    Note: The Courses button remains disabled until all required fields have been entered and saved.
13. Click **Save**.
14. Click **Courses** to select the Courses associated with the Catalog. The Associate Courses to Catalog form is displayed.



15. By default only active courses are listed. To view inactive courses in the list of Available Courses, select **Show Inactive Available Courses**.
16. Select specific courses in the Available Courses list, or click **Select All**.
17. Click >> to assign the selected courses to the catalog. Click << to remove selected courses from the list of Assigned Courses, or click **Remove All**.
18. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To copy a catalog:

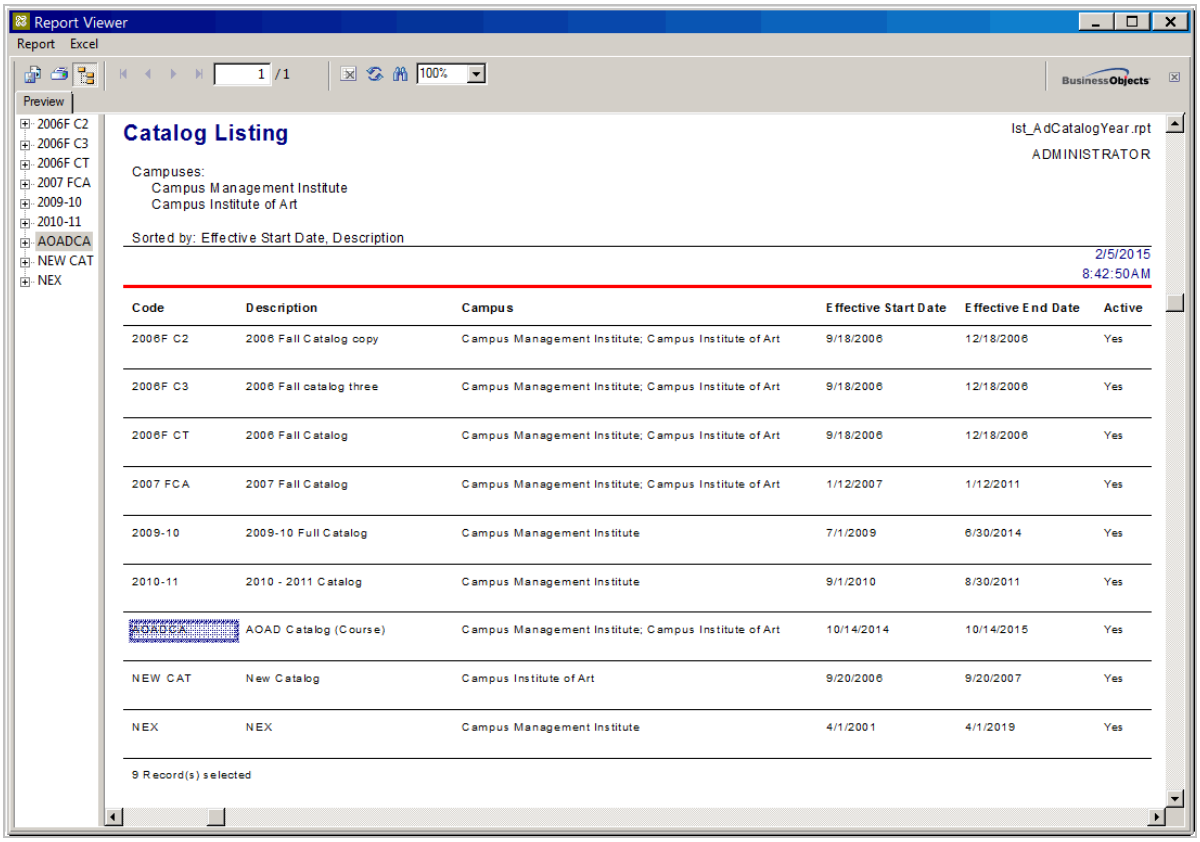
1. On the Setup - Academic Records List [Catalog] form, select a catalog to use as a template to create a new catalog, and click **Copy Catalog** . The Copy Catalog form is displayed. The Campuses fields are disabled since you are copying a catalog that is already associated with one or more campuses. You can modify the campus association after the required fields are completed and saved.



2. Specify the required values for the catalog copy (as if you were creating a new catalog, instead of copying a catalog).
3. Click **Save**. The Courses button is enabled.
4. Click **Courses**. The courses that were selected in the copied catalog are listed in the assigned courses list. Remove or assign any courses as needed.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To print a catalog list:

1. On the Setup - Academic Records List [Catalog] form, click **Print**. The Report Selection form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.
4. Click **Preview**. The report is assembled and displayed in the Report Viewer.

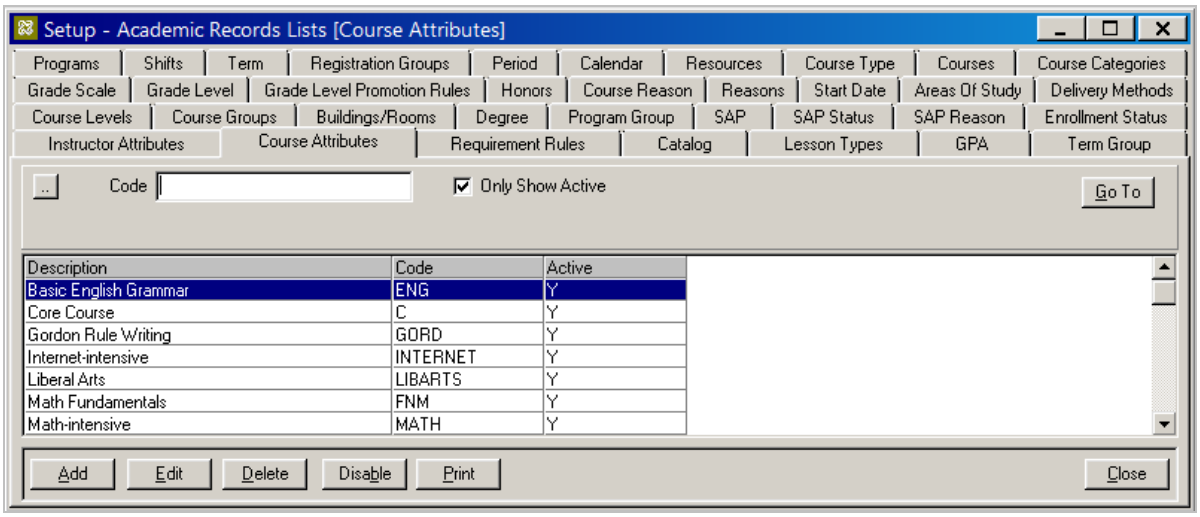


Setup - Academic Records Lists [Course Attributes]

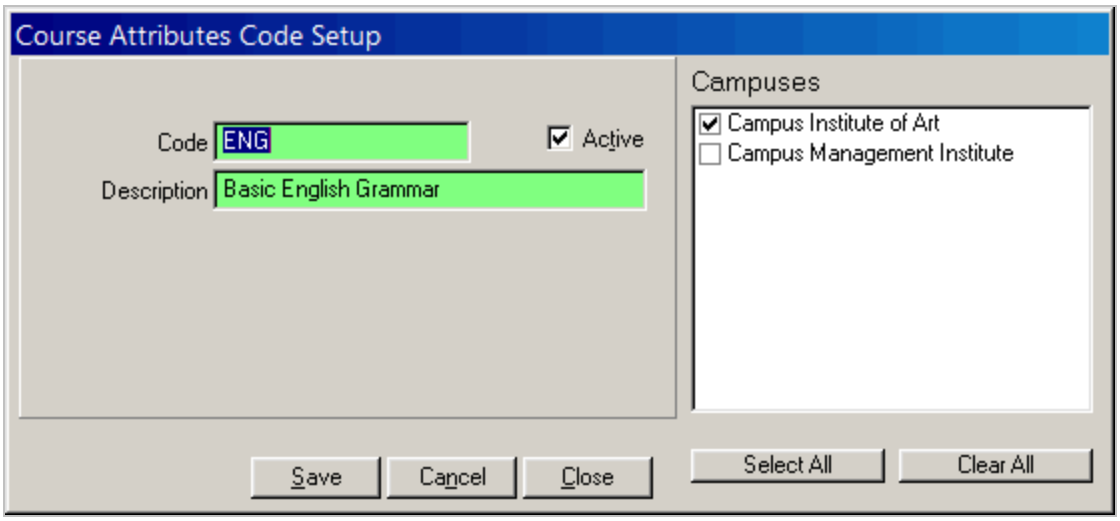
You can set up a list of attributes to be associated with courses at the course list level. These attributes allow you to categorize courses on the course list level in addition to the course level and course type.

To add or edit a list of course attributes codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Course Attributes**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Course Attributes Setup form is displayed.



6. Specify a unique **Code**.

7. Enter a **Description**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Select one or more **Campuses**.
10. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

After the Course Attribute has been saved, if a user enters a duplicate course attribute Code, CampusNexus Student displays a warning message and does not save the duplicate Code.

Setup - Academic Records Lists [Course Categories]

The Course Categories table summarizes the required courses for each program version by category. It is referenced when building course lists for program versions. The Course Categories table holds one record for each category of courses.

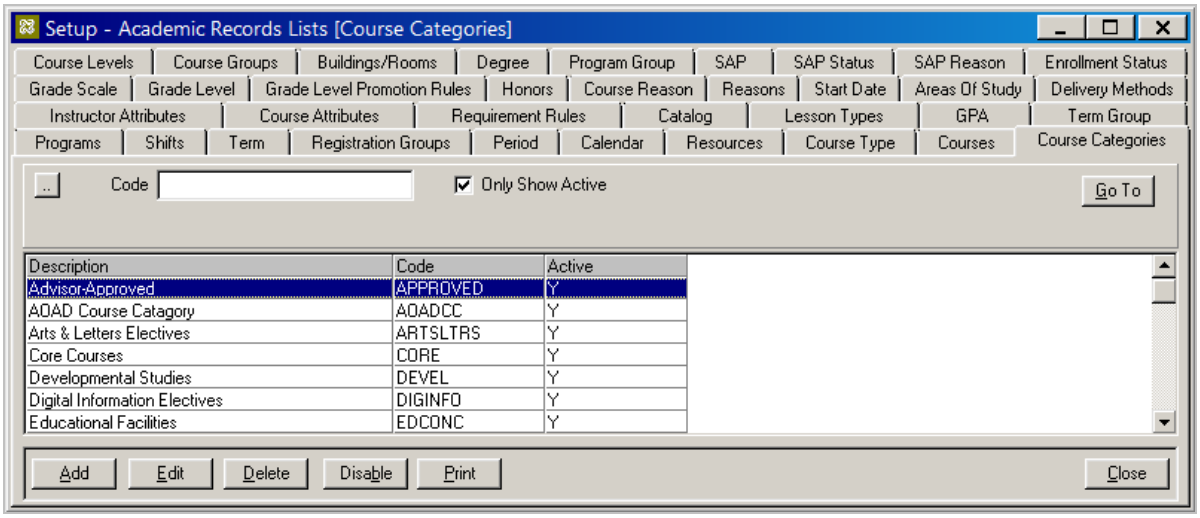
Using the categories, an institution can define the requirements for each program version.

Course Categories Example

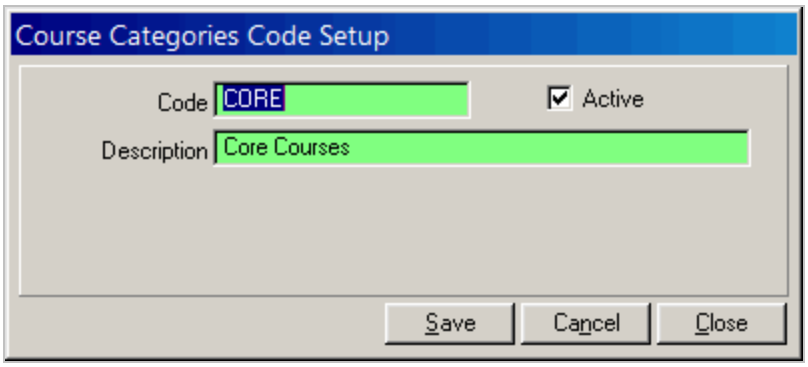
Program Version		Associate of Applied Science Business	Credits
Category		**Core Curriculum**	**20**
	Courses	ACC100 Accounting	4
		BUS101 Introduction to Business	4
		BD122 Keyboarding	4
		CO155 Business Communication	4
		IS122 Introduction to Computers	4
Category		**Mathematics/Science**	**12**
	Courses	EN111 Principles of Algebra	4
		EN202 Intermediate Algebra	4
		ELECT	4
Category		**Humanities**	**16**
	Courses	EN100 Composition	4
		EN150 Speaking	4
		EN160 Essay	4
		ELECT	4

To add or edit a list of codes for Course Categories:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Course Categories**.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Course Categories Code Setup form is displayed.



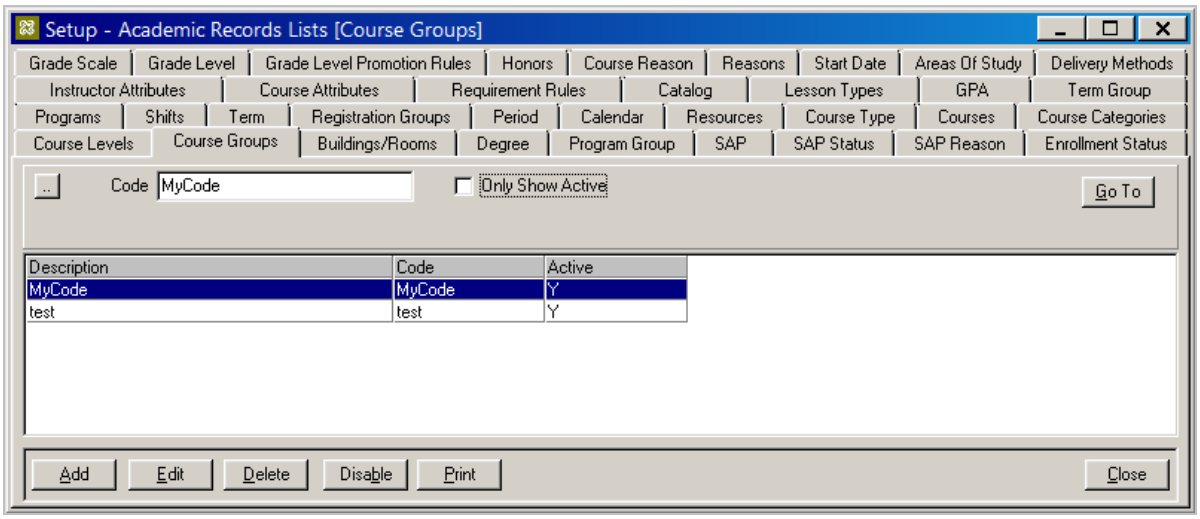
6. Specify a unique **Code**.
7. Enter a **Description**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Academic Records Lists [Course Groups]

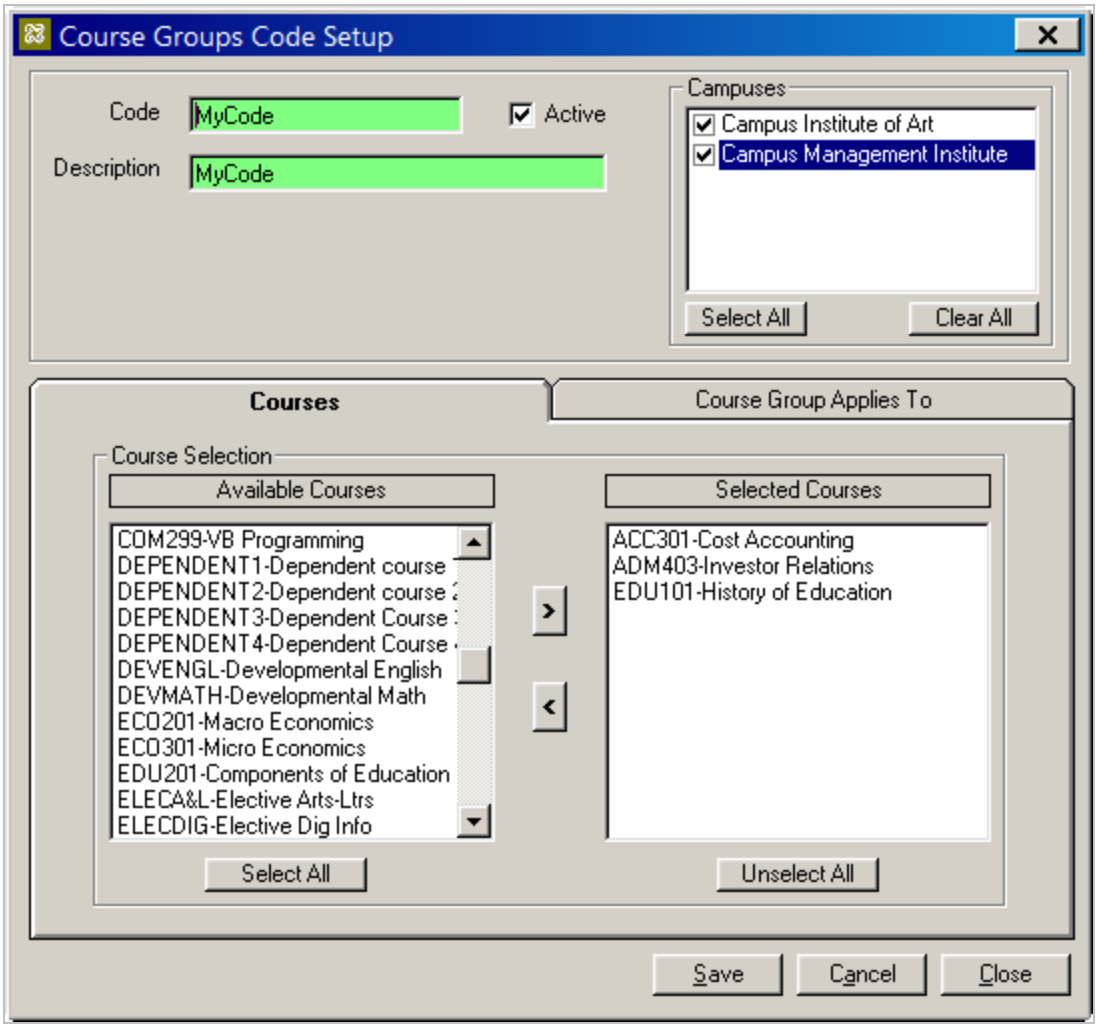
Institutions create course groups to set up a predefined list of elective or substitution courses. Once a course group has been defined, you can assign all the courses contained in a course group to a course's elective/substitution pool, rather than having to assign each course individually.

To add or edit a course group:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Course Groups**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Course Groups Code Setup form is displayed.

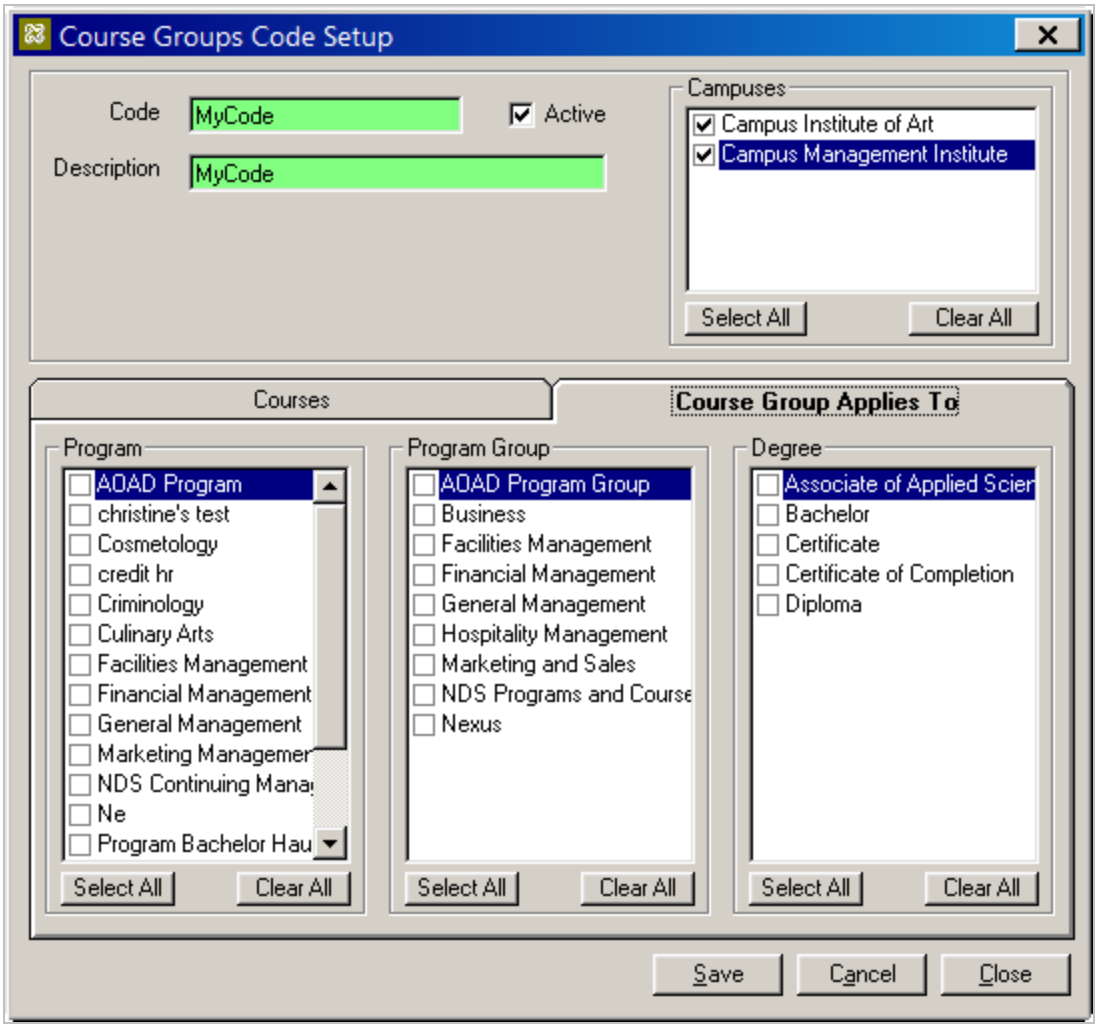


6. Specify a unique **Code**.
7. Enter a **Description**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Select one or more **Campuses**.

   The campus list associated with the course group record controls the filtering of courses that can be selected for inclusion in the course group.

   The filtering of course groups available for selection when creating a required course list for a program version is based on the campuses associated with the course group.
10. On the **Courses** tab, select the courses to be included in the course group from the **Available Courses** list; click > to move the courses to the **Selected Courses** list.

    Note: The list of Available Courses is filtered based on the campus selection.
11. Click the **Course Group Applies To** tab.



12. Select the appropriate filters for **Program**, **Program Group**, or **Degree**. You can select multiple filters for the course groups being defined. These filters separate course groups into logical categories and limit the course groups available for selection within the required course list configuration to only those course groups that are applicable to the program version for which the required course list is being created. The course groups are only available when adding substitution pools to courses in program versions whose attributes satisfy the specified filter criteria.

13. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Academic Records Lists [Course Levels]

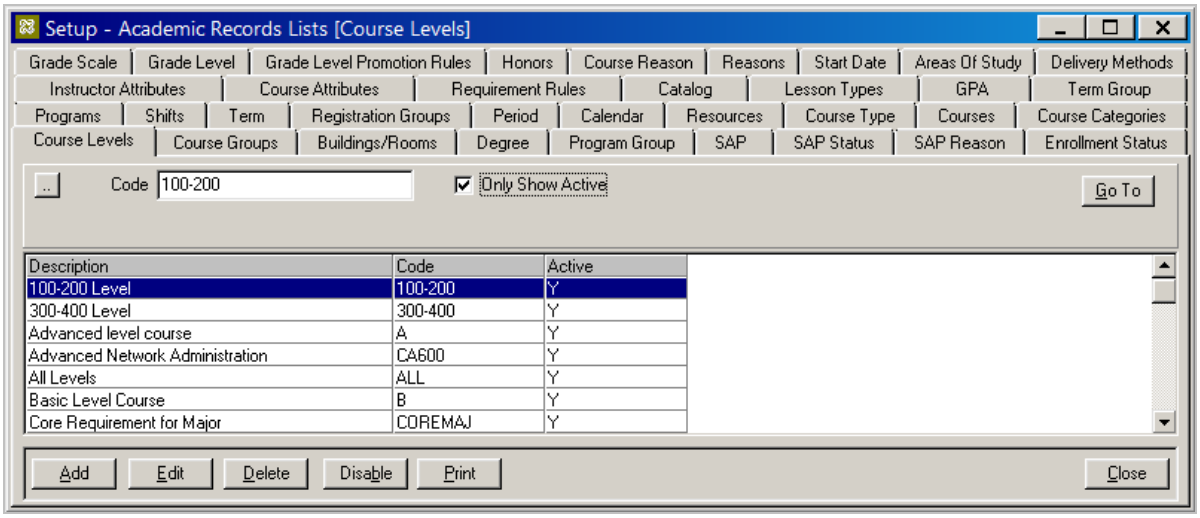
Course level codes are assigned for billing purposes. Certain graduate level courses, for example, might cost more than under-graduate courses.

Note: The course level code could be useful in preparing your school catalog.

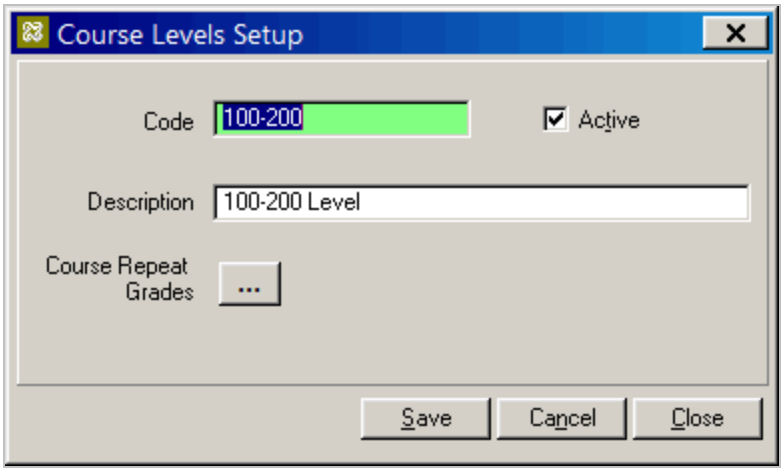
Only the system administrator (SA) can add or edit course levels.

To add or edit a course level:

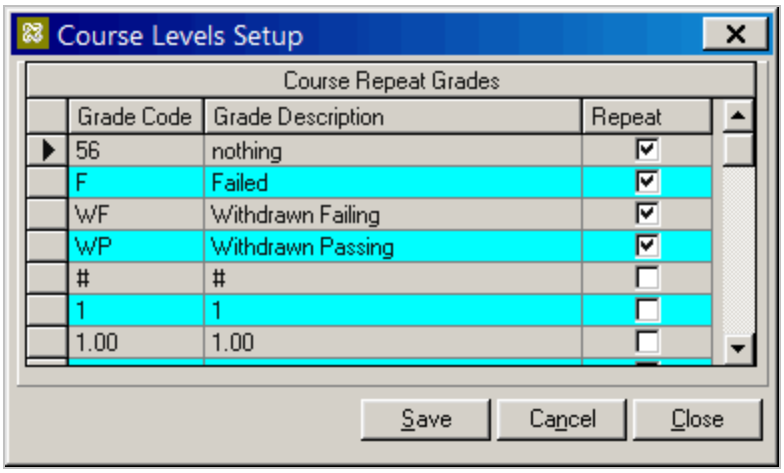
1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Course Levels**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Course Levels Setup form is displayed.



6. Specify a unique **Code**.
7. Enter a **Description**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Click ... next to Course Repeat Grades. The Course Levels Setup - Course Repeat Grades form is displayed.



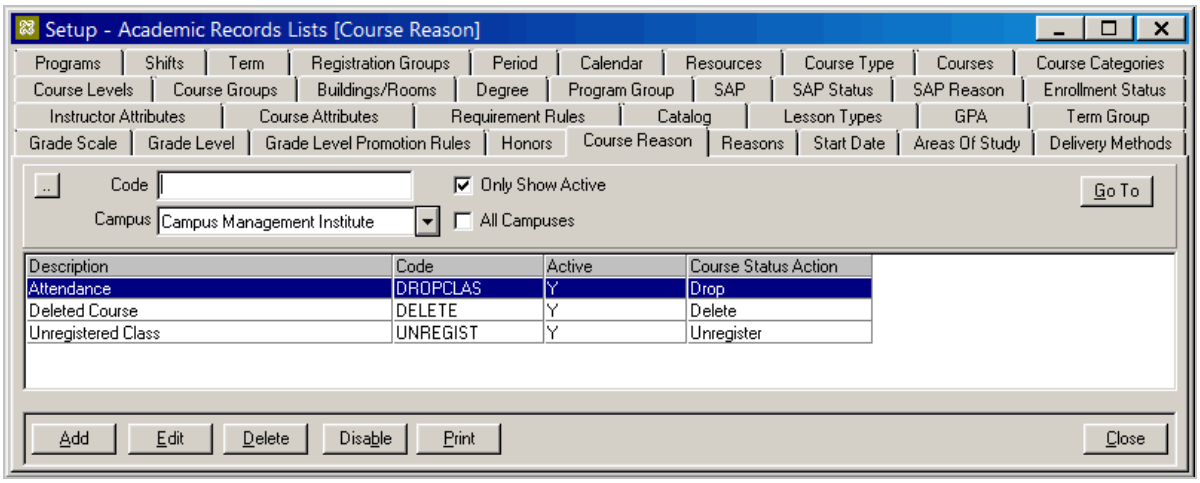
10. Select the **Repeat** check box for each grade code that causes the course to be added back to the student's schedule and flagged for repeating.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Academic Records Lists [Course Reason]

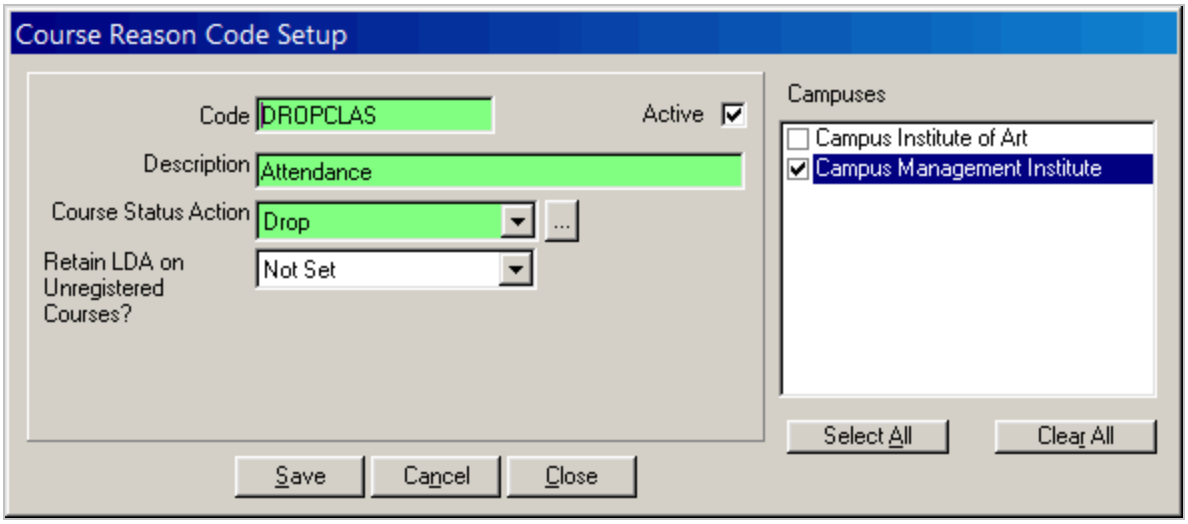
The Course Reason list contains common reasons for a change in school status. Using this list, you can track possible reasons for students dropping a course within the first eight days of the class schedule. The list helps you maintain a history of course status changes for each student.

To add or edit reasons for course status changes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Course Reason**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Course Reason Code Setup form is displayed.



7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.
10. Select one or more **Campuses**.
11. Select a **Course Status Action**. Available options include:
    - Unregister
    - Drop
    - Delete
12. Select one of the following options from the **Retain LDA on Unregistered Courses** list:
    - Select **Yes** to keep the Last Day Attended (LDA) for the specific course even though the attendance is being removed.
    - Select **No** to discard the LDA from the student's attendance records for the unregistered course. The LDA is reset to the last date the student was in attendance in courses other than the unregistered course.
    - Select **Not Set** to allow the LDA to be modified depending on the 'Retain LDA on Unregistered Courses' setting at the term or campus level.
13. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Academic Records Lists [Course Type]

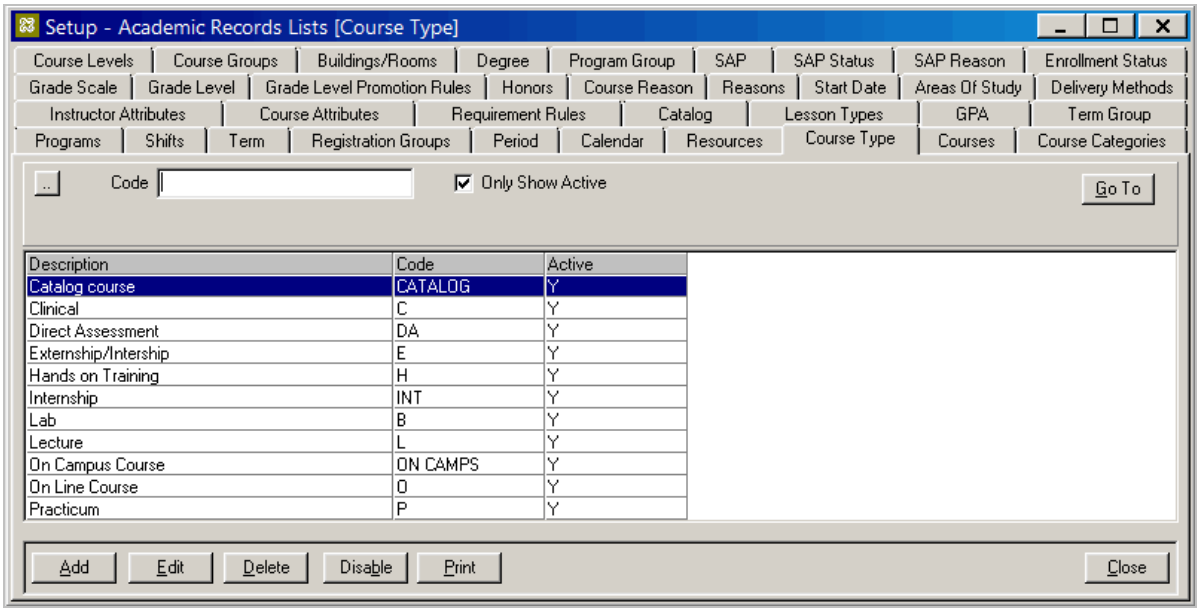
The Course Type list contains descriptions and codes for specific types of courses, for example, lecture, laboratory, internship, and so on. A course type is associated with each course that you offer in your programs of study.

Some course types are system-defined and cannot be edited or deleted. For system-defined course types, the Active field is selected and set to read-only mode. Examples of system-defined course types include:

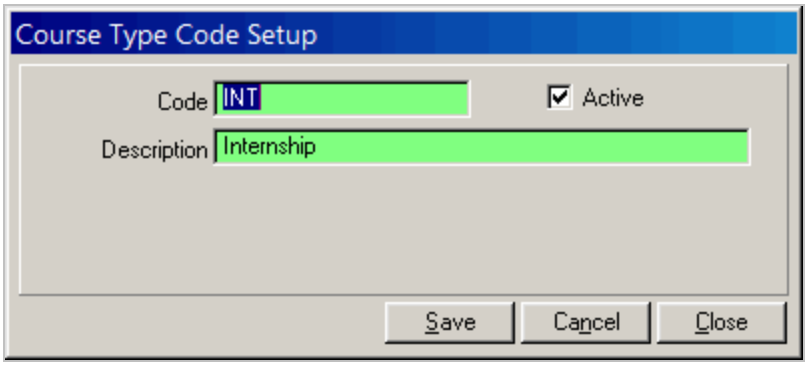
- Externship/Internship
- Online Course Type - This course type is used with the Auto Create Course Section feature.

To add or edit a course type:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Course Type**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Course Type Code Setup form is displayed.



6. Specify a unique **Code**.
7. Enter a **Description**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

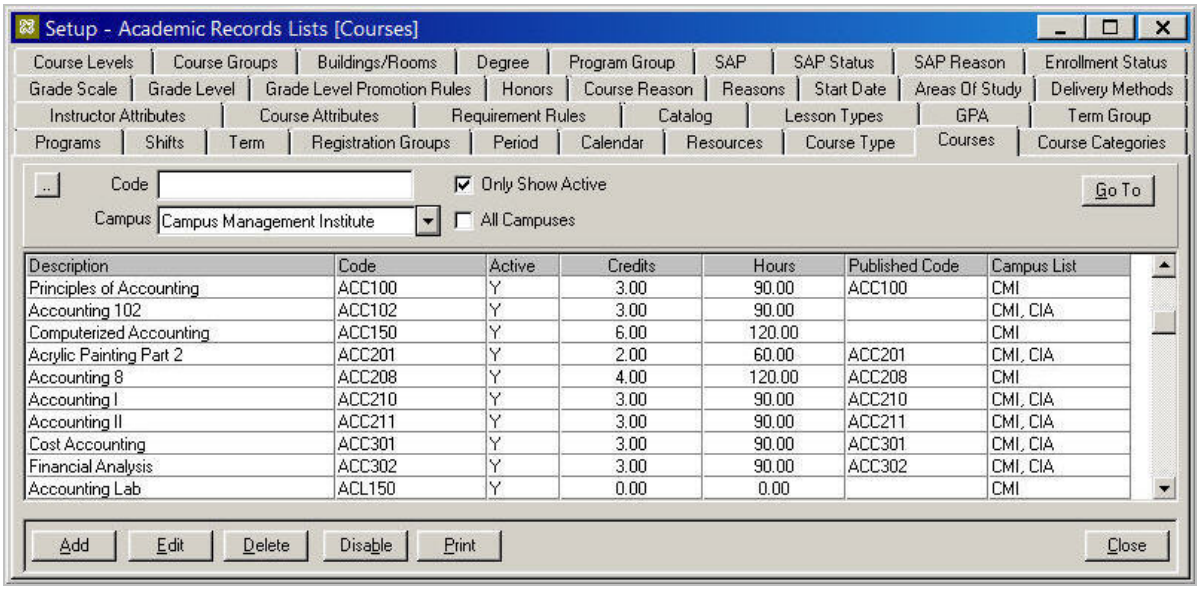
Setup - Academic Records Lists [Courses]

The Setup - Academic Records Lists [Courses] form is used to define course codes and properties, such as title, type, credits, grade levels, pass/fail settings, prerequisites, fees, etc., for every course offered in every program in your institution.

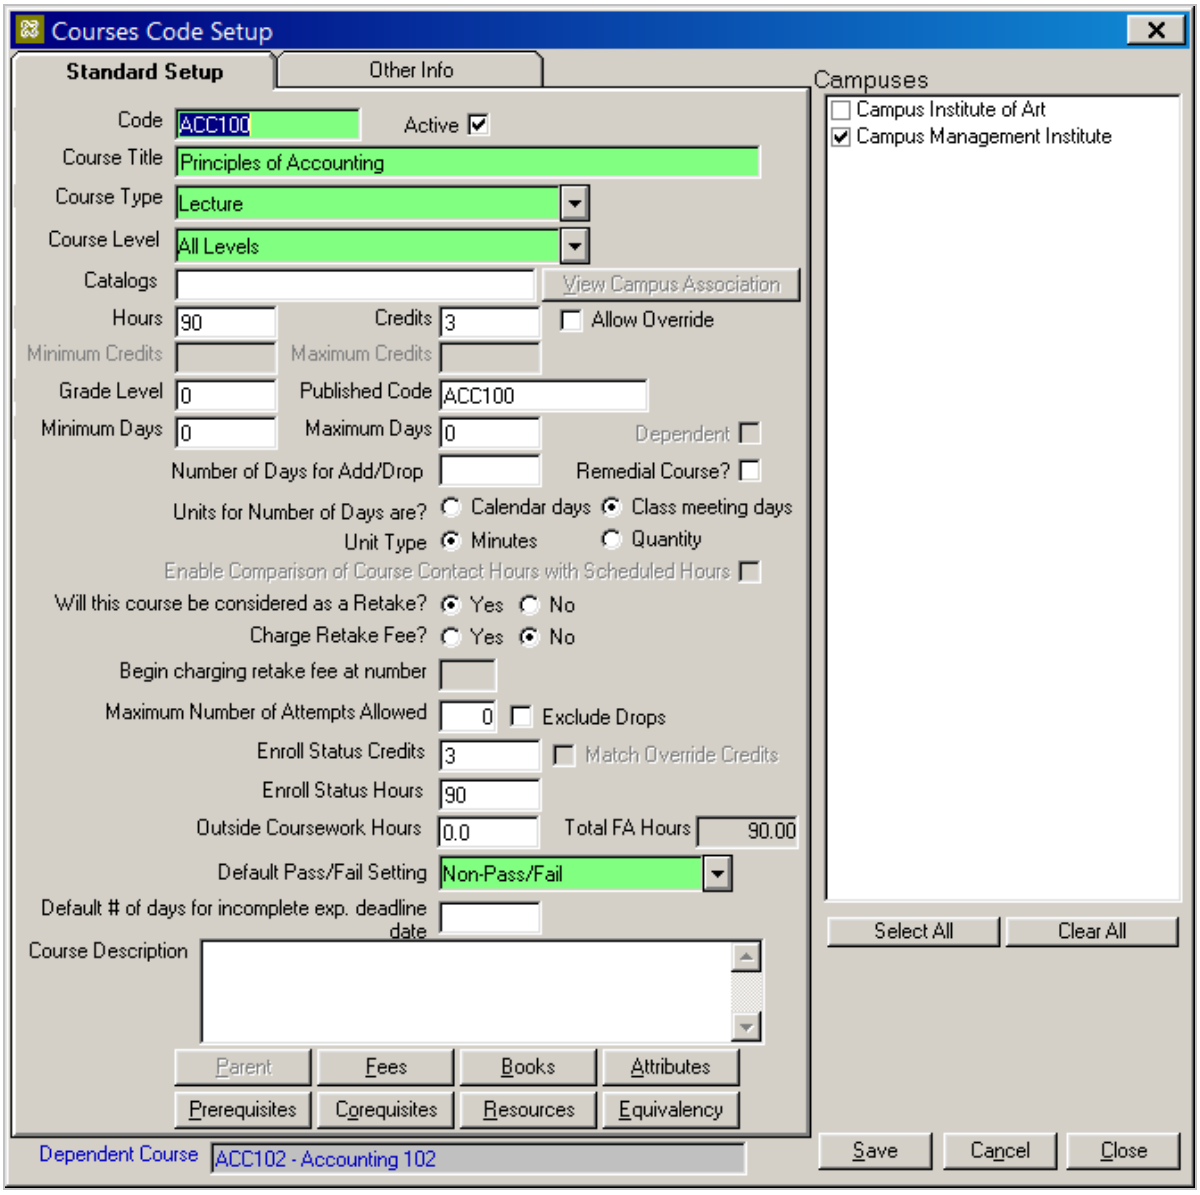
Note that courses are offered to students and scheduled in class sections. For more information, see Class Schedule.

To add or edit a course:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Courses**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Courses Code Setup form is displayed.



7. Specify appropriate options on the Standard Setup tab. See Field Descriptions - Standard Setup Tab.
8. The Other Info tab is populated with school- defined fields based on the settings in School Defined Fields > Entity . If school-defined fields exist, specify appropriate options.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Field Descriptions: Standard Setup Tab

Field	Description
Campuses	Select the campuses that offer (share) this course. If you do not have access to a campus in the list, the campus name is enclosed in brackets [ ]. Note that you are selecting individual campuses, not campus groups. When saving the record, a campus group is dynamically created or updated for all campuses selected. The campus group type is set to "C" for the new campus group.
Code	Specify a unique code up to 12 characters in length. (This is in contrast to most other codes in CampusNexus Student, which are 8 characters long.) We recommend that you do not include the section number as part of the course code. When setting up class sections, provision is made for a unique section number for each section of a class. Many CampusNexus Student features depend on section numbers to identify class sections as differentiated from courses.
Active	Select or clear the **Active** check box to designate the record as active or inactive, respectively.
Course Title	Specify the Course Title.
Course Type	Select a Course Type. If 'On Line Course' is selected, the course may be configured to automatically generate a new course section when the remaining seats threshold has been reached.
Catalogs	If a campus configures program versions using catalogs and a school-defined catalog has been set up for the course, it is displayed in the Catalogs field, and the View Campus Association button is enabled.
View Campus Association (button)	Click the View Campus Association button, if enabled, to view the course's catalog-campus association. Hours	Enter the number of hours for the course. If the Dependent course check box is selected, the Hours field is disabled. This field is not applicable for a dependent course.

Field	Description
Credits	Enter the number of credit hours for the course. If the Dependent course check box is selected, the Credits field is disabled. This field is not applicable for a dependent course.
Allow Override	Select this check box if the user who registers a student in the course is allowed to override the number of credits and hours awarded upon successful completion of the course. When Allow Override is selected, the Minimum Credits and Maximum Credits fields and the Match Override Credits check box are enabled. **Note**: If student registration lock configuration is enabled, upon checking the Allow Override check box, the Registration Locks are evaluated when you change the course values for Credits and/or Hours. If such changes are made on a course that is in a status other than Future, it may affect the configured registration locks.
Minimum Credits	For variable credit courses, enter a value representing the minimum number of credits a student could elect to receive when taking the course. If the Minimum Credits and Maximum Credits fields are blank, staff and students may enter any credit value during course registration.
Maximum Credits	For variable credit courses, enter a value representing the maximum number of credits a student could elect to receive when taking the course. If the Minimum Credits and Maximum Credits fields are blank, staff and students may enter any credit value during course registration.
Grade Level	Select a Grade Level to indicate the grade at which the student typically takes this course. The grade level corresponds to Freshman, Sophomore, Junior, Senior, Post Graduate, etc. (This is not the same "Grade Level" indicator that is asked for when completing the FAFSA).
Minimum Days	For distance learning, enter the minimum number of days the student must spend on this course.
Maximum Days	For distance learning, enter the maximum number of days the student can spend to complete the course.
Dependent	Leave the Dependent check box cleared (default when adding a course) if the course is a parent course. A parent course can have only one dependent course. Select the Dependent check box if the course is a dependent course. In this case the Credits, Hours, Enroll Status Credits, and Enroll Status Hours fields are disabled and the Parent button is enabled so that you can select one or more parent courses. See Parent Course Setup. **Note**: CampusNexus Student prevents you from disabling or deleting a dependent course until you first remove the parent association. When you delete a dependent course, the relationship to the parent course is removed. The parent course can be used for a new dependent course. If you disable the dependent course, the relationship is maintained. You must manually remove a parent course from a disabled dependent course. This prevents any conflict if the disabled course is later enabled.

Field	Description
Remedial Course?	When adding a new course, this field is cleared by default. Select this check box if the course is a remedial course. Remedial courses can be assigned to a student based on failing test grades. Entrance tests can be established for programs, program versions, or agencies. You can specify a course to add to a student's program or program version if the student's test score falls below the minimum score defined. When you enter test scores, CampusNexus Student checks for a passing score, and if not achieved, adds the specified course to the student's course schedule in a Future status if it is not already included on the student's course list. If the student scores at or above the required minimum score for a program version, the course is not added to the student's schedule. A course can only be designated as remedial on the Course Code Setup form. This setting does not impact CampusNexus Student elsewhere. The remedial designation prevents students from modifying courses identified as remedial on their schedule through Online Registration in Portal.
Number of Days for Add/Drop	The Number of Days for Add/Drop represents the number of calendar days or class meeting days (depending on the Units for Add/Drop), starting with the course section's start date, that is allowed for add/drop. It is not a required field. The default value is blank.
Units for Number of Days are?	Specify if the number of days value represents 'Calendar days' or 'Class meeting days'. **Note**: The 'Number of Days for Add/Drop' field and the radio buttons (Calendar days and Class meeting days) in the 'Units for Numbers of Days are?' field are visible only if at least one campus associated with the course is configured with the campus Add/Drop Flag set to 'S' (see Course Section Enforced) at Setup > Campus Locations > Add/Edit > Acad. Records (tab) > General (subtab).
Unit Type	Select Minutes or Quantity as the units in which attendance is measured. Use Minutes for traditional class room situations. Use Quantity for quantifiable goals such as the number of tasks completed.

Field	Description
Will this course be considered as a Retake?	Select Yes (default) to mark the course as one that is affected by your institution's retake procedures. If No is selected, users can indicate whether the course will be considered as a retake when a student is registered in the course. For example, a student must take Physical Education once each semester. The grade received by the student in each occurrence of Physical Education is counted in the student's GPA rather than being run through the retake logic applied to other retaken courses. **Note**: Enrollment status credits from the student's schedule are used to determine a student's enrollment status for financial aid purposes. If a student is enrolled in a term based program version and the course is being registered as a retake, and this is the second retake of the course, then CampusNexus Student validates that the course being registered is a second retake of a passed course and populates the Enrollment Status Credits field with '0' on the student's schedule folder. CampusNexus Student flags the course as a second retake of a passed course and audits the change in the Enroll Status Credits. The Audit folder is updated whenever the enroll status credits are set to '0' as a result of the course retake regulation. The reason filed in the audit folder are updated to indicate why changes were made to the enroll status credits. For example, a student registers in ENG 101 the first time and passes it, and then retakes ENG 102 (which is an equivalent of ENG 101) the second time and passes it, and then retakes ENG 101 or ENG 102 once again; the Enrollment Status Credits field should be populated with '0'. This logic applies across all the enrollments. For example, a student has multiple enrollments. Math 101 is required in all the enrollment program versions. Math 101 is completed and passed as part of one enrollment. If the student decides to take the same course again as part of another enrollment, then it will also be considered as a retake. Upon registration, if the course being registered gets flagged as a retake, and this course was previously retaken twice, and the retaken courses satisfy the criteria below, the enroll status credits of the course being registered are set to '0'. By setting the enroll status credits to '0', this course is not counted in the enrollment status calculation. Criteria: • Course has been passed two times and credits have been earned. • Course has been failed the first time and passed two times after failing it. • Course has been passed the first time and failed the second time. • Course has been dropped two times. • Course has been passed the first time and dropped the second time. • Course has been dropped the first time and passed the second time. • Course has been was passed the first time and placed in current status the second time. • Course has been dropped the first time and placed in current status the second time. **Note**: If a student drops or fails a course twice, they can take the course a third time and the enrollment status credits will NOT be set to zero. A course has to be registered as a retake to apply the retaking course work regulation, which is setting the enrollment status credits to '0' to ensure that the enroll status credits from a course that is being retaken for a second time is not considered if credit has been previously earned in

Field	Description
	calculating enrollment status that is used for determining Title IV eligibility. CampusNexus Student does not allow a student to have credits for a second retake counted for the course for determining the student's enrollment status for Title IV aid. This rule applies to the second retake of a course that the student has already passed and been given credit; it also applies to the third (or greater) time the student is taking the course. For example, consider a course that has been registered in term 1, passed, and earned credits. Then this course is registered as a retake in term 2, passed and earned credits. The same course gets registered as a retake the second time in Term 3, which is when the enroll status credits is set to '0', so that the enroll status credits of this course do not get included in the enrollment status calculation of term 3. An institution may pay a student one time for retaking previously passed coursework (except not if due to the student failing previous courses). For example, a student is retaking the course because he or she needs to meet an academic standard for that particular course, such as a minimum grade. An institution may not pay a student for retaking previously passed courses if the student is required to retake those courses because the student failed a different course in a prior term. For example, if a student enrolls in four classes in the fall semester and passes three of them, the institution could require the student to retake the failed class and also require the student to retake the other three classes because of failing the one class. If the student retakes the four classes in the spring semester, the failed class would be included in the student's enrollment status, but the three classes passed in the fall would not, for Title IV purposes. Title IV funds may be paid for only one retake of a course. The Course Retake logic ensures that credit associated with a course is only counted once for determining whether a student has successfully completed previous term payment periods and is therefore eligible to receive the next disbursement. Students who fail a course in a term based program may still be paid multiple times for retaking that course in subsequent terms; however, students who have previously passed a course and received credit may be paid for retaking that course, for example, to receive a better grade. A course being registered is flagged as a current retake if the previous retaken course is a dropped with the drop grade, and the drop grade is configured to 'Include in the GPA' on the grade scale. Cross-reference courses are also flagged as retakes. LOA classes are not impacted by because the student should have completed all the courses that are in LOA before registering into any new courses to be eligible for the Title IV funds. **Note**: This only applies to term based program versions, which means that the program version's academic calendar is configured as 1, 2, 3, or 4.
Charge Retake Fee?	Use this option when courses require a retake fee. This field is enabled only when 'Will this course be considered as a Retake?' is set to Yes. The default is No.
Begin charging retake fee at number	If a course has a retake fee, use this setting to define on what number of retake attempts a retake fee is charged. This field is enabled only when 'Charge Retake Fee?' is set to Yes. The default value for this option is blank. If Yes is selected, you must enter a value greater than 0. Otherwise, the following message is displayed: *"Begin charging retake fee at number must be a number greater than zero."*

Field	Description
Maximum Number of Attempts Allowed	This field specifies the default value for the 'Maximum Number of Attempts Allowed' when a course is added to a required course list. When a student is being registered for a course that is not required (i.e., it does not appear on the student's required course list), CampusNexus Student uses this value to enforce the maximum number of attempts allowed. The default value is 999. **Note**: The 'Begin charging retake fee at number' value cannot be greater than 'Maximum Number of Attempts Allowed'. If the value is exceeded, the following message is displayed: *"Value of 'Begin charging retake fee at number' cannot be greater than 'Maximum Number of Attempts Allowed'."*
Exclude Drops	This option specifies the default setting to use when a course is added to a required course list. When a student is being registered for a course that is not required, CampusNexus Student uses this setting to determine whether to count dropped courses towards the maximum number of attempts allowed.
Enroll Status Credits	If your institution offers 0 credit courses that cannot be taken for academic credit, but can be used to calculate a student's enrollment status for financial aid purposes, enter the number of credits that can be used for this course towards the calculation of a student's enrollment status. These courses can include, for example, graduate level internships that are a required part of the academic program but do not earn academic credit hours and do not contribute towards academic progress calculation. The number entered in this field is used in enrollment status calculations and automated disbursement approval for credit hour programs. If this field is left blank, CampusNexus Student populates it with the value saved in the Credits field. **Note**: If this is a dependent course, the Enroll Status Credits field is disabled.
Match Override Credits	This check box is enabled only if the Allow Override check box is selected. When this option is selected, the Enroll Status Credits field in a student's course information record always contains the same value as the Credits field. If a student taking a variable credit course elects to take a different number of credits than is standard for the course, the Enroll Status Credits field receives the number of credits that the student selected. If Allow Override is not selected, the Enroll Status Credits field in a student's course information record always contains the same value as is defined in the Courses Code Setup form.

Field	Description
Enroll Status Hours	If your institution offers 0 hour courses that cannot be taken for academic credit, but can be used to calculate a student's enrollment status for financial aid purposes, enter the number of hours that can be used for this course towards the calculation of a student's enrollment status. These courses may include, for example, remedial courses that are part of the academic program but do not earn academic clock hours towards graduation and do not contribute towards academic progress calculation. The number entered in this field is used in enrollment status calculations and automated disbursement approval for clock hour programs. If this field is left blank, CampusNexus Student populates it with the value saved in the Hours field. **Note**: If this is a dependent course, the Enroll Status Hours field is disabled.
Outside Coursework Hours	Specify the number of outside coursework hours. Enter in 5 minute increments as expressed in hour decimals (e.g., 10 minutes is 0.17 hours).
Total FA Hours	This read-only field displays the Sum of Academic Hours/Enroll Status Hours and Outside Coursework Hours. • If Allow Courses to be exempt from progression configuration is ON on the Student Pace Evaluation setting form, Total FA Hours = Enroll Status Hours + Outside Coursework Hours; • If Allow Courses to be exempt from progression configuration is OFF on the Student Pace Evaluation setting form, Total FA Hours = Hours + Outside Coursework Hours.
Default Pass/Fail Setting	Select one of the following system-defined values that is most applicable to the course's grade scale: • Non-Pass/Fail (default) – indicates that the course is graded on a letter grade basis. • Pass/Fail (Required) – indicates that all students taking the course receive a pass/fail grade. • Student's Choice – indicates that students may elect to receive a pass/fail grade.
Default # of days for incomplete exp. deadline date	Enter the number of days past the course section end date on the course for calculating the expiration deadline date.
Course Description	Enter a full description of the course, such as the description in your catalog.
Parent (button)	This button is enabled when the Dependent check box is selected. See Courses > Parent.
Fees (button)	See Courses > Fees.
Books (button)	See Courses > Books.
Attributes (button)	See Courses > Attributes.
Prerequisites (button)	See Courses > Prerequisites.
Corequisites (button)	See Courses > Corequisites.

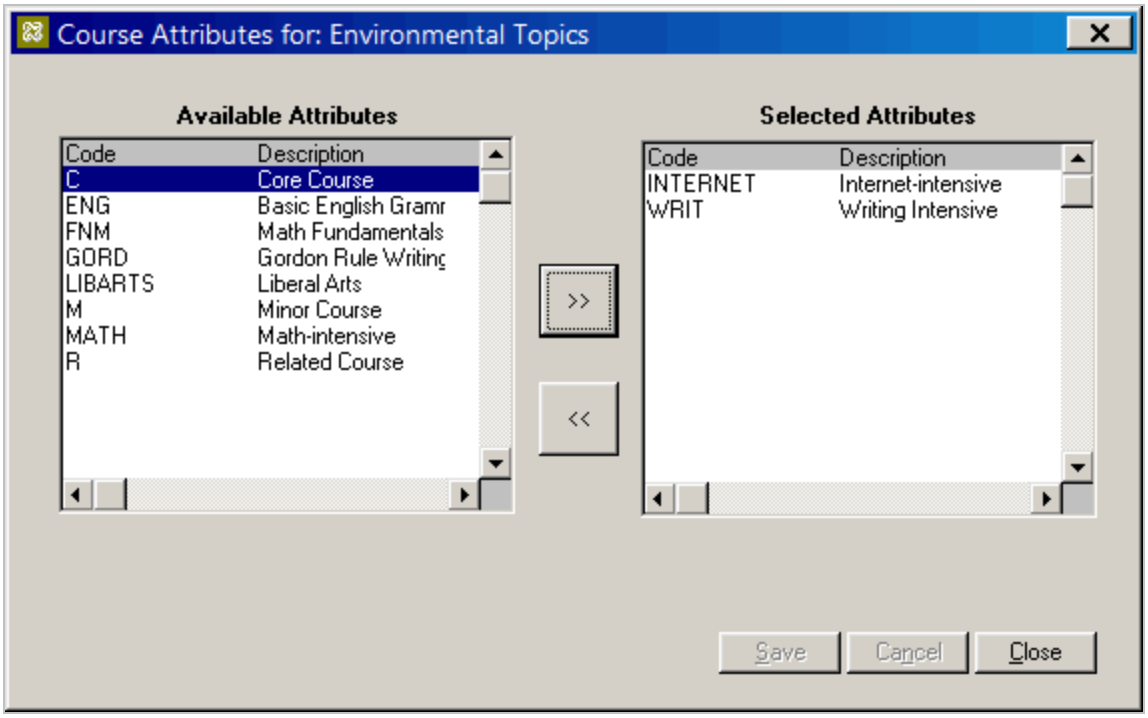
Field	Description
Resources (button)	See Courses > Course Resources. **Note**: You can associate course sections by cross-listing them to the instructional resources. Cross-listed courses are courses where two different course sections are using the same instructional resource, for example, sharing the same faculty member, or using the same room at the same time.
Equivalency (button)	See Courses > Equivalency. **Note**: The Equivalency form is also used to select cross-referenced courses if Cross Registration Sharing Groups have been set up for the campus.

Courses > Attributes

When you set up a course on the Courses Code Setup form, you can associate one or more course attributes with the course. Course attributes offer an additional categorization for courses at the course list level.

To assign attributes to a course:

1. On the Courses Code Setup form, click the **Attributes** button. The Course Attributes for: <Course Name> form displays all course attributes that are assigned to the same campus list to which the course is assigned.



2. In the **Available Attributes** list, double-click an attribute (or select an attribute and click >>).

   The selected attribute is moved to the Selected Attributes list. Repeat this step to select additional attributes.

   To undo your selection, double-click an attribute in the Selected Attributes list.

3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

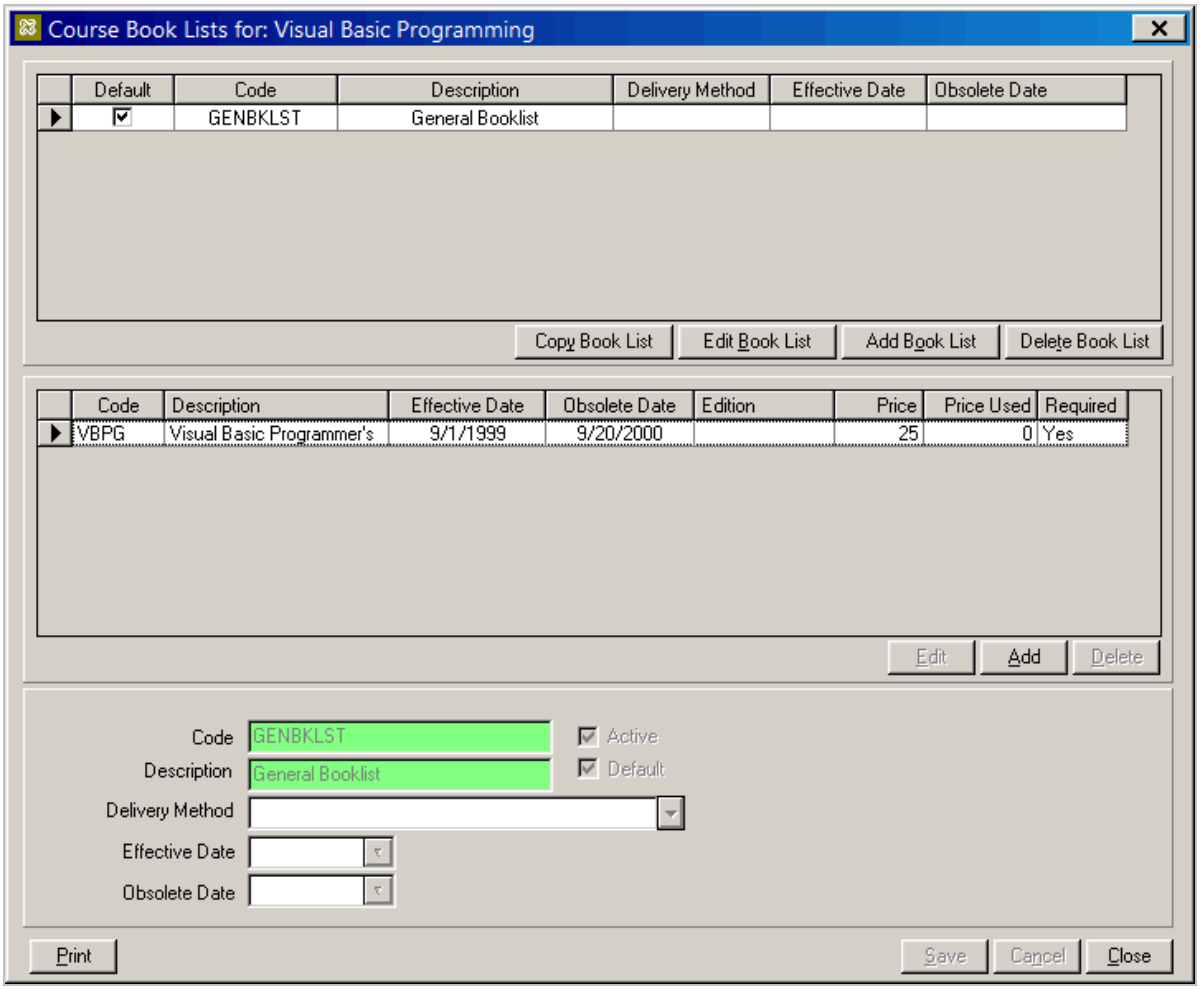
Courses > Books

Course book lists specify books and other materials that are required or recommended for a course. Multiple book lists may be created for a single course. The book lists are used by academic staff members scheduling classes to assign books to class sections.

Prerequisite: Books/items that can be selected on the book list form must first be set up under Lists > Book Store.

To add or edit a book list:

1. On the Courses Code Setup form, click the **Books** button. The Course Book Lists for: <Course Name> form is displayed.



2. Click **Add Book List**, or select a book list record in the top pane and click **Edit Book List**. The pane at the bottom of the form is enabled.
3. Specify a unique **Code**.
4. Select or clear the **Active** check box to designate the record as active or inactive, respectively.

   Note: When the Active check box is cleared, the book lists remains associated with the course but is not available when scheduling new class sections.
5. Enter a **Description**.

6. Select the **Default** check box to assign the associated books automatically to new class sections.

   When scheduling new class sections, CampusNexus Student only assigns books from book lists if the following conditions are true:

   - The book list is configured as 'Default'.
   - The class section start date falls between any Effective/Obsolete dates associated with the book list or book.
   - The book list delivery method is unspecified or matches the delivery method on the class section.

   Note: If the 'Default' setting is changed, scheduled future class sections could be affected. A message is displayed giving you the option to apply the changes to future class sections. You can select a future date to be used to determine which class sections should be updated. For more information, see Book List Updates of Course Sections.

7. Select a **Delivery Method**. The options are Classroom and Online.

   Note: If the Delivery Method setting is changed, scheduled future class sections could be affected. A message is displayed giving you the option to apply the changes to future class sections. You can select a future date to be used to determine which class sections should be updated. For more information, see Book List Updates of Course Sections.

8. *Optional*: Specify an **Effective Date** and **Obsolete Date** for the book list.

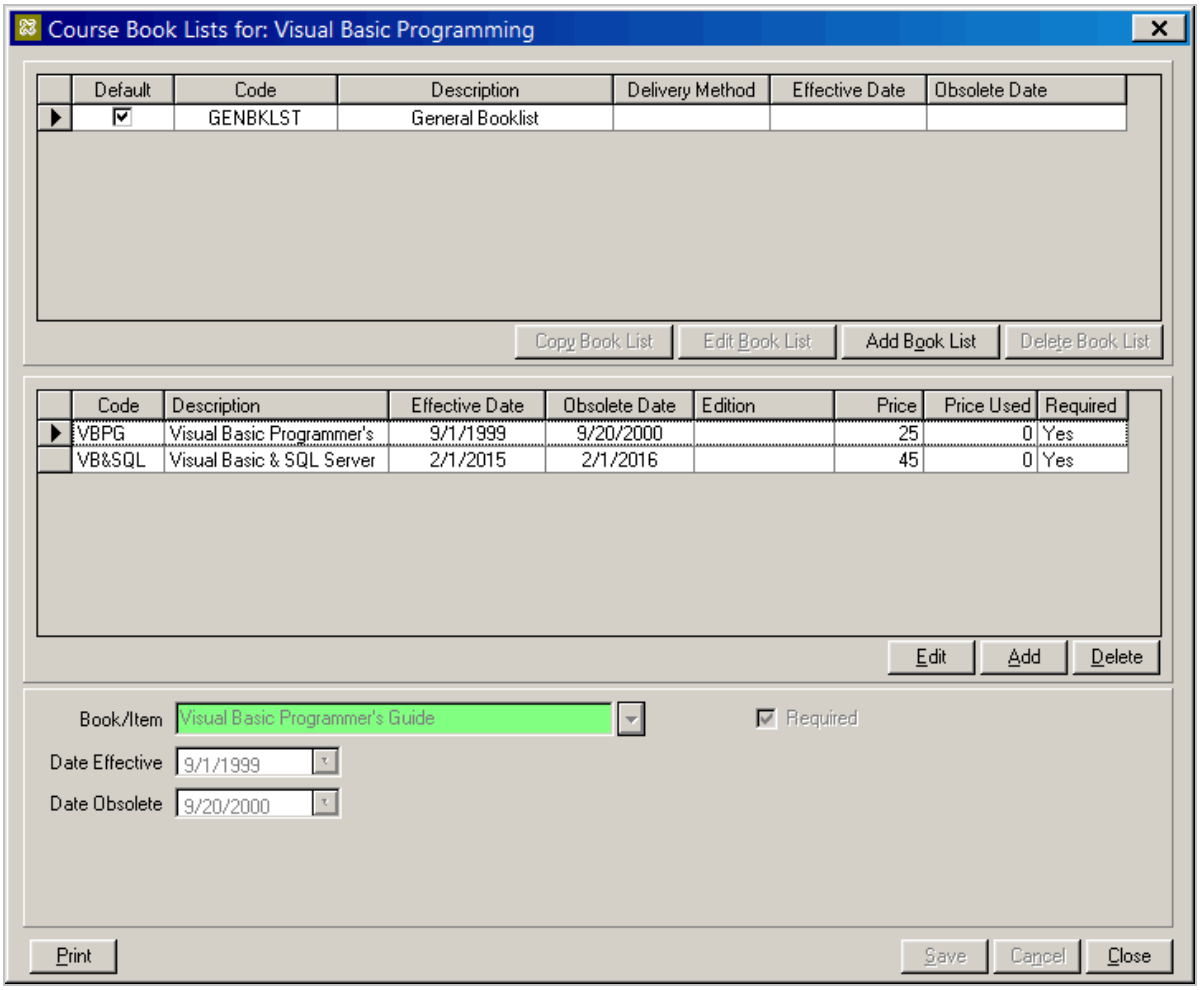
   These dates are used to filter the book lists that are available for selection when scheduling class sections. If the start date does not fall between the book list's Effective and Obsolete dates, the book list and its associated books will not be available for selection, and in the case of default book lists, will not be automatically assigned to the class section.

   Note: If the Effective Date or Obsolete Date is changed, scheduled future class sections could be affected. A message is displayed giving you the option to apply the changes to future class sections. You can select a future date to be used to determine which class sections should be updated. For more information, see Book List Updates of Course Sections.

9. Click **Save**. The Book List entry appears in the top pane of the form.

To add or edit a book list item:

1. To add an inventory item to a book list, select the book list in which the item will be placed.
2. Click **Add**, or select a record in the middle pane and click **Edit**. The pane at the bottom of the form is enabled.



3. Select an item from the **Book/Item** inventory list.
4. Select **Required** if the book is required for the course.
5. Specify the **Date Effective** and **Date Obsolete**. The dates are optional but may be used to designate when books should be available for assignment in future class sections. For more information, see Book List Updates of Course Sections.
6. Click **Save**.

   If a book/item is added and future course sections of the course are scheduled, the following message is displayed: *"Assign the book to future course section(s) through the selected book list? (Yes/No)"*. If you answer Yes, you are prompted to enter an update date. Any relevant course sections that start after the update date are updated with the newly added book. For more information, see Book List Updates of Course Sections.
7. Click **Close** to close the form.

To copy a book list:

1. Select a book list.
2. Click the **Copy Book List** button.

3. Specify a unique **Code**.
4. Click **Save**.

The copied book list is added with the same properties as the original book list and can be selected for editing.

To delete a book list

1. Select a book list.
2. Click the **Delete Book List** button.

   If the book list is assigned to any class sections, the following message is displayed: *"The book list is associated with course section(s). Deleting the book list will also delete the book list and its associated books from the course section(s). Do you want to continue? (Yes/No)".*

   - Click **Yes** to remove the book and its associated assigned books from all class sections to which it was previously assigned.
   - Click **No** to cancel the delete process.
3. Click **Save**.

Book List Updates of Course Sections

CampusNexus Student uses book lists and their associated effective/obsolete dates to assign book requirements for course sections. When a new course section is created, the book list for the course will be available on the new section based upon the Delivery Method, Date Effective, and Date Obsolete specified for the book list. If a book list was configured to be a 'Default' book list, the books associated with the default book list are assigned to the class section. If a book list is edited after being assigned to a class section, the list of books required in future course sections may need to change.

The following rules apply when a book list is modified:

When you edit the code, description, effective date, obsolete date, default, or delivery method of a book list, a message indicates that the book/book list assignment of future class sections can be updated. If you specify an update date in response to the message, that date determines which class sections are affected based upon the course start date. The following occurs:

1. The book list and associated/books are unassigned from all the future class sections if any of the following edits occur:
   a. The default flag is changed from selected to cleared and the class section is using the same delivery method as that of the book list.
   b. The effective or obsolete dates are changed, causing the class section's start date to no longer fall between the effective and obsolete date.
   c. The delivery method is changed and the class section is using the old delivery method.
2. The book list and associated books are assigned to class sections that do not already have this book list assigned if any of the following edits occur:
   a. The default flag on the book list is changed from cleared to selected.
   b. The course section has the same delivery method as that of the book list.
   c. The course section's start date falls between the effective and obsolete dates of the book list.

The following rules apply when a book record (within a book list) is modified:

When you edit a book record with changes to the effective date, obsolete date, or required field, a message indicates that the book assignment of future class sections can be updated. If you specify an update date in response to the message, that date determines which class sections are affected based upon the course start date. The following occurs:

1. The book is unassigned from all future class sections that have this book's book list assigned if effective or obsolete date change results in the class section's start date no longer falling between the effective and obsolete date.
2. The book is assigned to all the future class sections that have this book's book list assigned if effective or obsolete date change results in the class section's start date falling between the effective and obsolete dates.

   If the book is assigned to the section, the required flag of the book on the class section is updated to whatever the user selected at the book level.

Courses > Fees

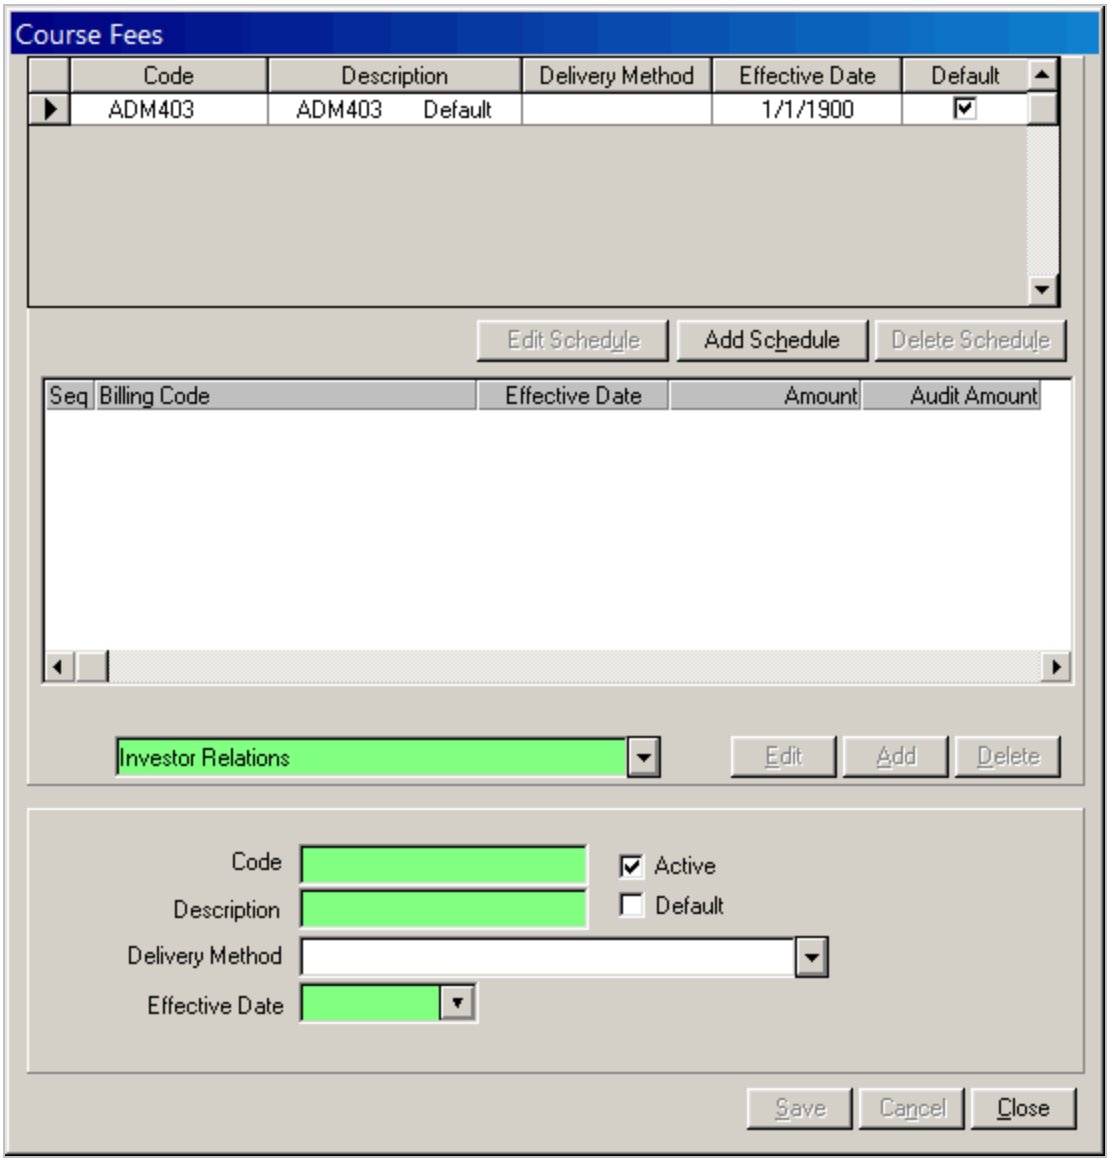
The Course Fees form is used to set up the fees students are charged when they sign up for a course. A course can have multiple fee schedules, for example, different fees for different delivery methods or effective dates.

- If you do not need multiple fee schedules, the top portion of the form contains a single default fee schedule, and the associated set of fees is shown in the middle of the form.
- If multiple fee schedules are defined, the list of fee schedules appears at the top of the form, and the fees associated with the default fee schedule appear in the middle of the form.

Prerequisite: Charge codes that can be selected on the Course Fees form must first be set up under Lists > Student Accounts > Transaction Codes.

To add or edit a course fee schedule:

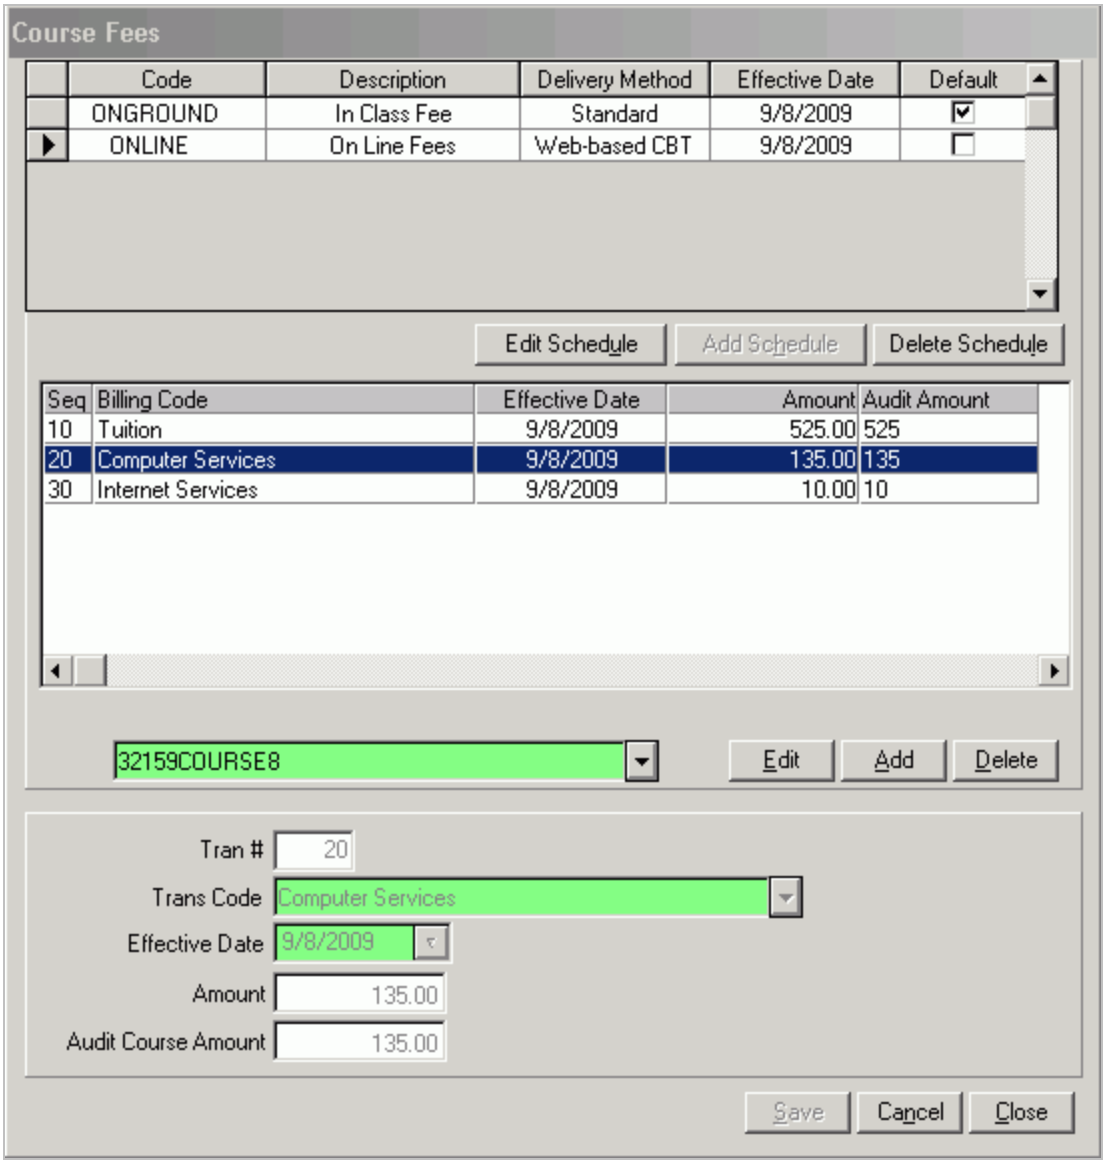
1. On the Courses Code Setup form, click the **Fees** button. The Course Fees form is displayed.



2. Click **Add Schedule**, or select on an existing fee schedule and click **Edit**.
3. Specify a unique **Code**.
4. Enter a **Description**.
5. Select a **Delivery Method**. The options are Classroom and Online.
6. Specify an **Effective Date**. This date is used in conjunction with the Student Accounts Billing Method when the method is "Bill by Course". The latest effective date for the fee is used when billing the student. The effective date is compared to the Enrollment Date or the Term Start Date, depending on which date was selected for the billing method.
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. For multiple fee schedules, select the one that will be the default and select the **Default** check box.
9. Click the **Save** button to save the fee schedule.

To add or edit the fees associated with a fee schedule:

1. Select the fee schedule to be edited.
2. Click **Add**, or select an existing charge and click **Edit**.



3. In the **Trans#** field, enter a Transaction (sequence) Number for the charge.
4. Select a **Trans Code** (Transaction Code) from the drop-down list.
5. Specify an **Amount**.
6. If the course billing method is course-based, CampusNexus Student calculates the **Audit Course Amount** for the course when taken as Audit.
7. Click **Save**.

Courses > Corequisites

Corequisites are courses that must be taken in conjunction with another course. CampusNexus Student verifies during registration that corequisite requirements are met and prevents a student from unregistering or dropping courses that are corequisites to a course in which the student is registered or currently taking. If the student wishes to drop a course that has corequisites, the student will have to drop all corequisite courses together. A student may do this when unregistering via Portal. Since CampusNexus Student does not allow unregistration or dropping of multiple courses at the same time, specific users may be given permission by the system administrator to override prerequisite and corequisite rules when registering, unregistering, or dropping student courses.

Example

An institution uses parent-child terms with the parent term having two child terms. One corequisite course is offered in Child Term 1. The second corequisite course is offered in Child Term 2. If a student is registered for the corequisite course in Child Term 1, CampusNexus Student notifies the registrar that the course is a corequisite and that the other corequisite must be completed at the same time (Child Term 1). If the administrator has override authority, the administrator may override the corequisite requirement and register the student in the course.

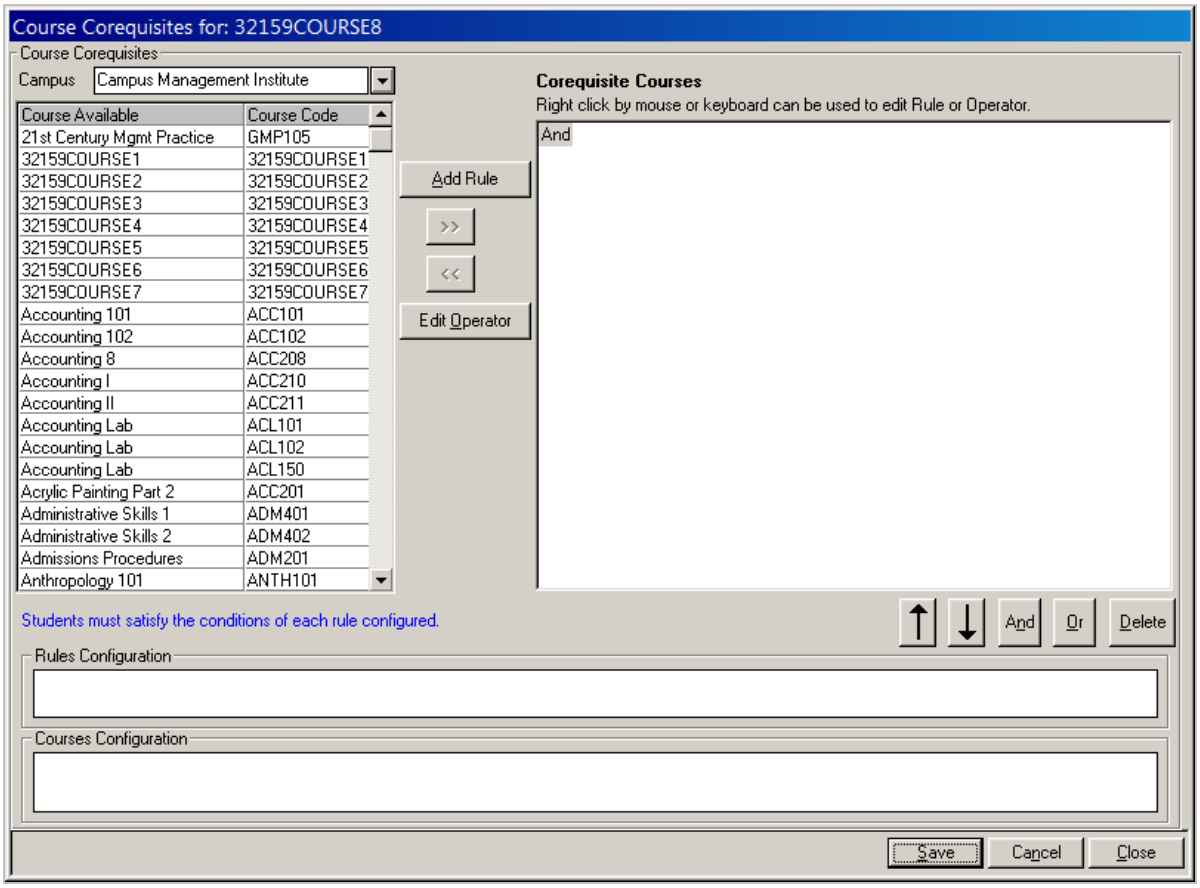
You can configure complex rules with corequisites that contain multiple conditions separated by AND and OR statements similar to the following statement:

PSY 230, Criminal Psychology
- AND -
PSY 245, Deviant Psychopathology
- OR -
SOC 260, Criminal Behavior

The corequisite rules entered on the Course Corequisite form are visible as shown in the Corequisite Courses pane to staff registering students in CampusNexus Student and students registering in Portal.

To set up corequisites for a course:

1. On the Courses Code Setup form, click the **Corequisites** button. The Course Corequisites for: <Course Name> form is displayed.



2. Determine if your corequisite rules include an AND or an OR operator.
    - If you need an OR operator (Course 1 OR Course 2), right-click on the “And” operator node in the Corequisite Courses field and select “Or”. The "And" operator is replaced with "Or".
    - If you need an AND operator (Course 1 AND Course 2), proceed to the next step.
3. Click the **Add Rule** button.

    The following message is displayed: *"How many courses are required for this rule?"*
4. Enter a number greater than 0 and click **OK**.

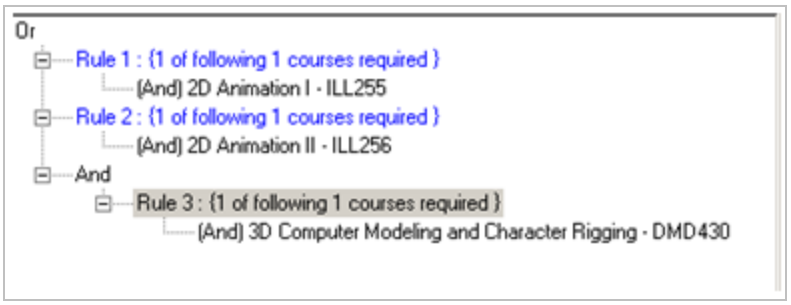
    Rule 1 is added to the operator node in the Corequisite Courses field.

    Note: The Number of Required Courses you previously entered appears at the beginning of the rule.
5. To designate a course as a corequisite, select a course in the **Course Available** list and click .

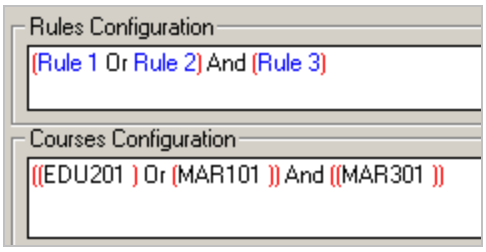
    The course is moved to the node structure in the Corequisite Courses field.
6. To create a corequisite rule with an OR operator, right-click the “And” operator node and select the “Or” operator.

    Add two rules, each one with one of the courses that can be taken to satisfy the OR condition.

7. Build the tree containing the And/Or operators and rules with required courses.



The bottom of the form contains two areas which display details of the corequisite courses being configured. The **Rules Configuration** area shows the logical relationship between each of the rules while the **Courses Configuration** area shows the relationship between the courses.



8. To change the order of rules, statements, or courses in the Corequisite Courses field, select the item and click .

9. To remove a corequisite course, select the course in the Corequisite Courses field and click .

10. To remove a rule, select the rule in the Corequisite Courses field and click **Delete**.

    A confirmation message is displayed. Click **Yes**.

11. To remove an 'And' or 'Or' operator, select the operator and click **Delete**.

    A confirmation message is displayed. Click **Yes**. All rules associated with the operator will be removed.

12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Courses > Equivalency

Equivalent courses are courses with different course numbers that institutions designate as equivalent, allowing students to take a course equivalent to a course listed in their programs, but with different course numbers, for example, ENG 101, English 101, is equivalent to LIT 101, Literature 101.

If a course code changes, you can designate that the new course code is equivalent to the old one. The GPA calculation takes into account the change in codes when processing the retaken courses for the student. The degree audit takes into consideration where the new course code fits into the student's degree requirements.

Cross-referenced Courses

Courses may be cross-referenced using the Equivalency form. Cross-referenced are course sections that a sponsoring campus can offer to students from other campuses. The sponsoring campus determines which other campuses can offer the course and when students can register into the course sections. This function, called Cross Registration Sharing Groups, is set up system-wide under Setup > Academic Records > Settings (tab) > Student Registration. CampusNexus Student records the course number that the student registers into and the original course required by the student's program.

Once a course has been cross-referenced with another campus, the academic administrators at the campuses the course is cross-referenced to can view and register the students into the cross-referenced course. Academic administrators at the campuses to which the course is cross-referenced do not have change to their own campuses schedule to register their students in to the course. Only students in campuses that the course is cross-referenced to can enroll in the cross-referenced courses.

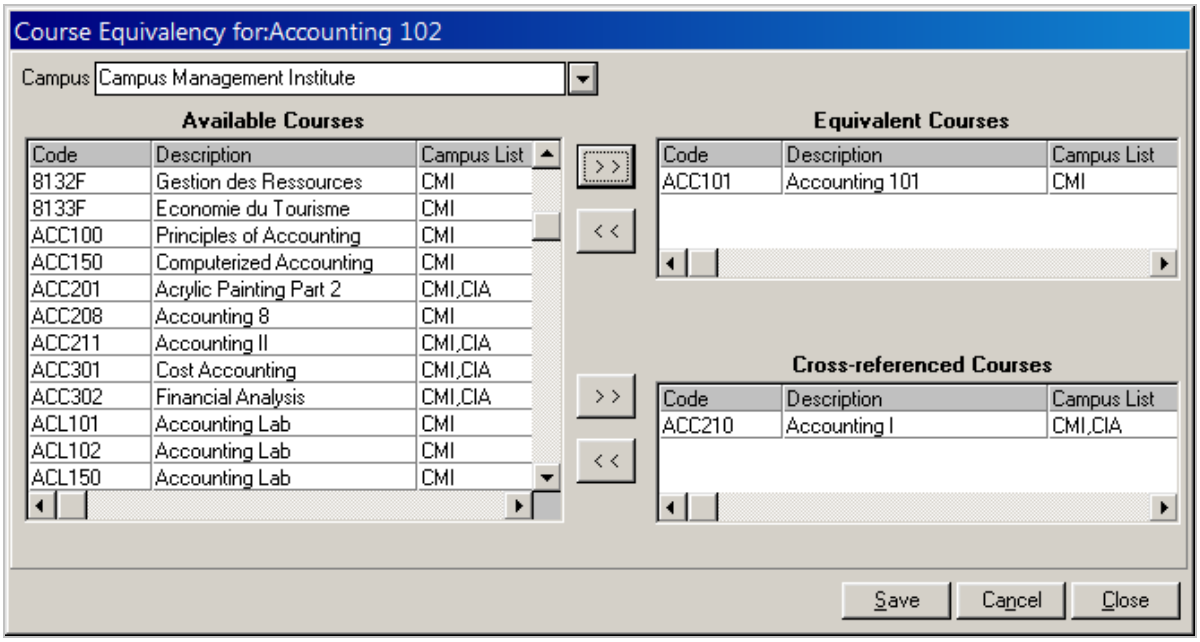
Several student forms and documents display the cross-referenced course that the student actually registers into but also reference the original course required by the student's program. These forms and documents include:

- Schedule
- Final Grades
- Degree Audit
- Report Card
- Transcript

Note: CampusNexus Student does not allow a course to be equivalent and cross-referenced at the same time.

To select equivalent or cross-referenced courses:

1. On the Courses Code Setup form, click the **Equivalency** button. The Course Equivalency for <Course Name> form is displayed.



2. To set up an equivalent course, select a course in the **Available Courses** list, and click >> next to the Equivalent Courses field. The course is moved to the Equivalent Courses field. The grid displays the campuses associated with the course.

3. To set up a cross-referenced course, select a course in the **Available Courses** list, and click >> next to the Cross-referenced Courses field. The course is moved to the Cross-referenced Courses field. The grid displays the campuses associated with the course.

4. To remove an equivalent course or a cross-referenced course, select the course, and click <<. The course is returned to the Available Courses list.

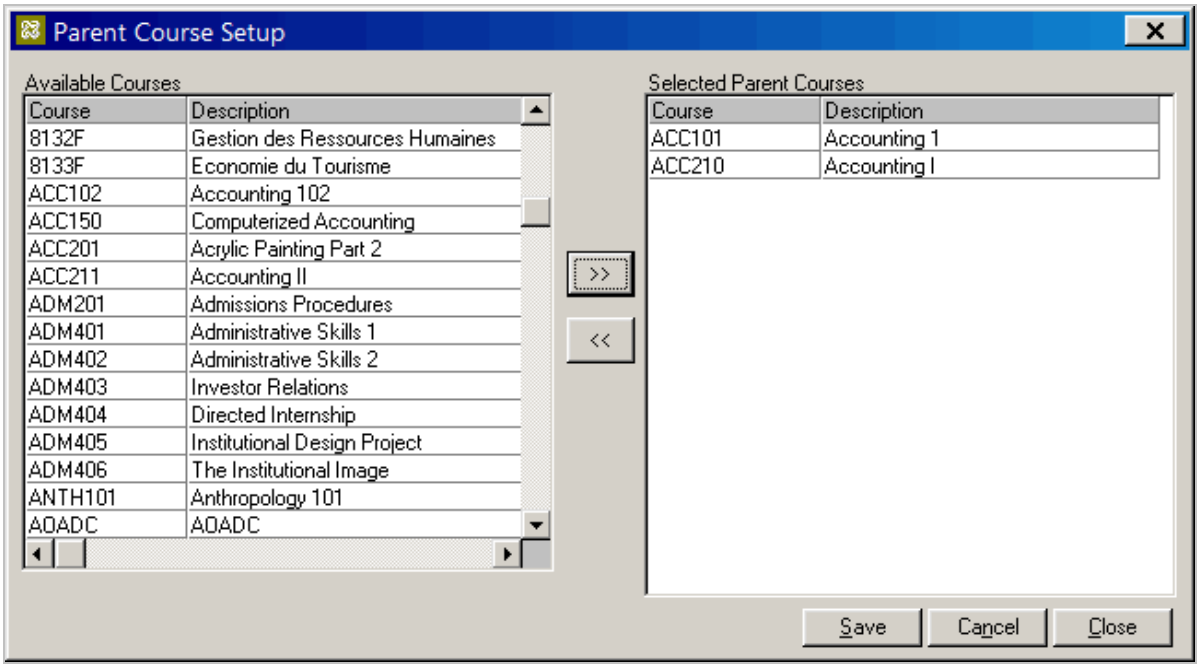
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Parent Course Setup

When a course is designated as a dependent course on the Courses Code Setup form, you can select associated parent courses. A dependent course can have one or more parent courses. A parent course can have only one dependent course.

To select one or more parent courses:

1. On the Courses Code Setup form, select the **Dependent** check box, and click the **Parent** button. The Parent Course Setup form is displayed. The Available Courses list displays all active parent courses.



2. In the **Available Courses** list, double-click a parent course, or select a parent course and click >>. The selected course is moved to the Selected Parent Courses list. Repeat this step to select additional parent courses.

   To undo your selection, double-click a course in the Selected Parent Courses list.

3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Courses > Prerequisites

Prerequisites are courses that must be completed before taking another course. A course may have one or more prerequisites. When checking prerequisite requirements, CampusNexus Student verifies that the section end date of the prerequisite course is in the past when compared to the section start date of the course that has the prerequisite requirement. During registration CampusNexus Student verifies that the prerequisites are met and prevents a student from unregistering or dropping courses that are prerequisites to a course in which the student is registered or the student is currently taking. Specific users may be given permission by the system administrator to override prerequisite rules when registering, unregistering, or dropping student courses.

A prerequisite course can have a minimum grade point requirement and other non-course prerequisites such as:

- Minimum credits earned or hours taken. Credits/hours must be completed before the start date of the course the student is attempting to register for.
- A minimum Financial Aid Academic Year Level (e.g., Junior or Senior).
- Completion of one or more tests with at least a specified minimum test score.

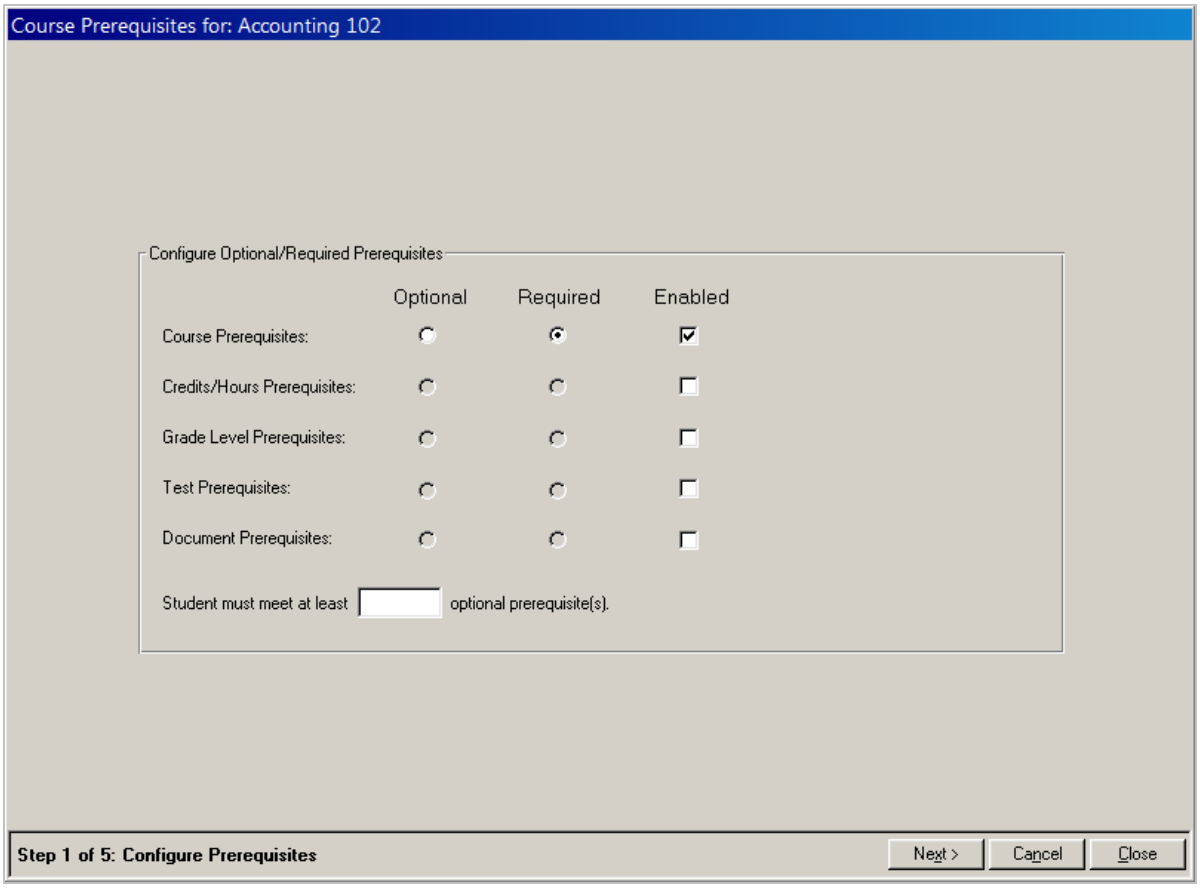
You can configure complex rules with prerequisites that contain multiple conditions separated by AND and OR statements similar to the following statement:

> HCE 110, Introduction to Pharmacology, with a grade of 'C' or higher
> - OR -
> HCE 111, Information Literacy and Health Care, with a grade point of '2.00' or higher, and Credit, with a grade point of '2.00' or higher
> - AND -
> BIO 260, Human Anatomy and Physiology, and Credit with a grade of '2.00' or higher

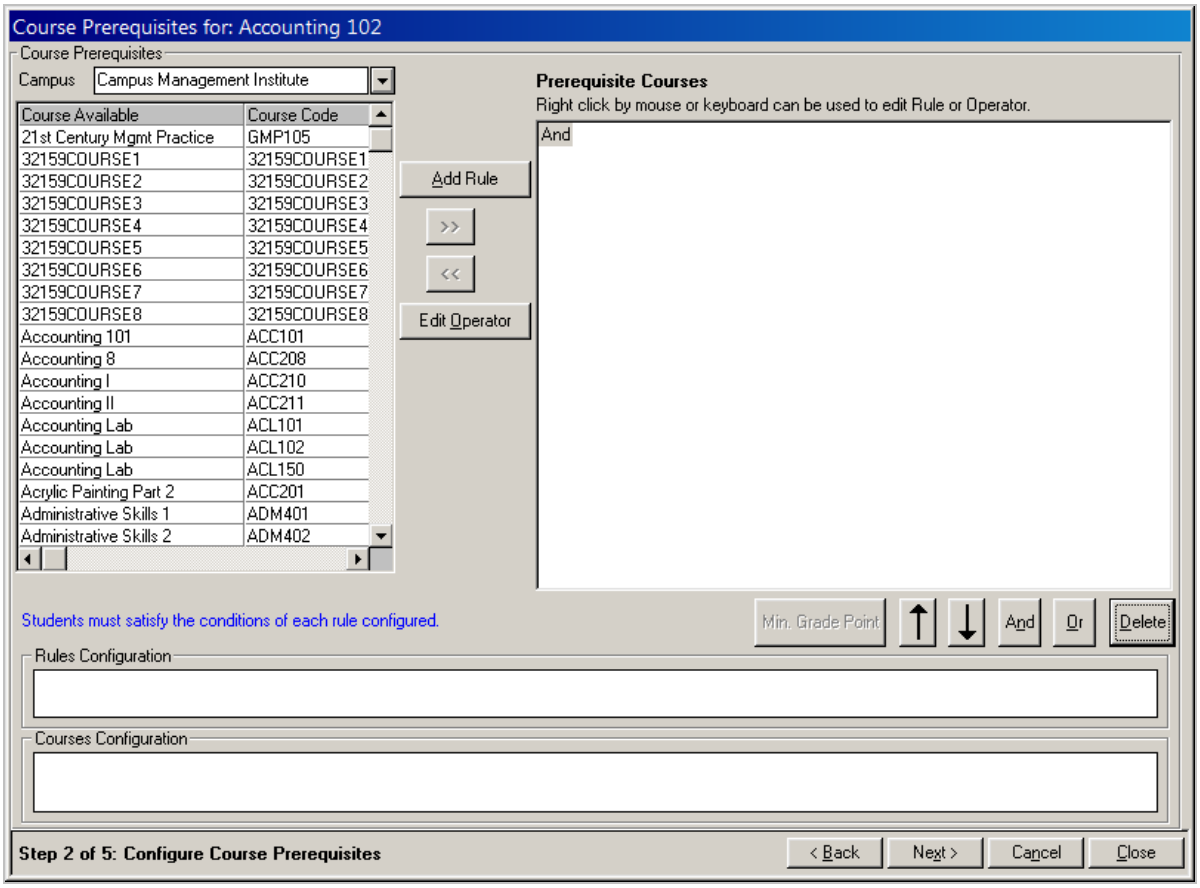
The prerequisite rules entered on the Course Prerequisite form are visible as shown in the Prerequisite Courses pane to staff registering students in CampusNexus Student and students registering in Portal.

To set up prerequisites for a course:

1. On the Courses Code Setup form, click the **Prerequisites** button. Step 1 of the Course Prerequisites for: <Course Name> form is displayed.



2. To enable a prerequisite, selected the **Enabled** check box on the row corresponding to the desired prerequisite. The **Optional** and **Required** options are enabled.
3. The **Required** option is selected by default. Click **Optional** if the prerequisite is optional.
4. Enter a number in the **Student must meet at least __ optional prerequisite(s)** field if the course requirements specify a number of minimum optional prerequisites.
5. Click **Next** to proceed.



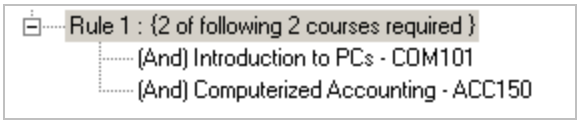
6. Determine if your rules include an AND operator or an OR operator.
   - If you need an OR operator (Course 1 OR Course 2), right-click on the “And” operator node in the Prerequisite Courses field and select “Or”. The "And" operator is replaced with "Or".
   - If you need an AND operator (Course 1 AND Course 2), proceed to the next step.
7. Click the **Add Rule** button.

   The following message is displayed: *"How many courses are required for this rule?"*
8. Enter a number greater than 0 and click **OK**. If a course has only a single prerequisite course, enter 1.

   Rule 1 is added to the operator node in the Prerequisite Courses field.

   Note: The Number of Required Courses you previously entered appears at the beginning of the rule.
9. To designate a course as a prerequisite, select a course in the **Course Available** list and click .

   The course is moved to the node structure in the Prerequisite Courses field.

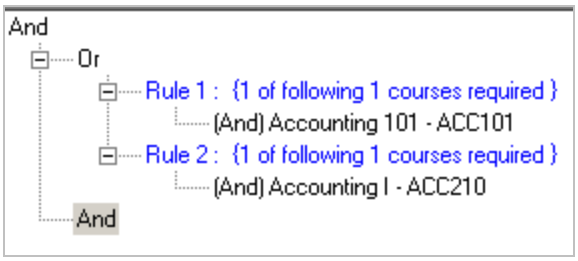


Note: A course may only appear in a rule once, but the same course may appear in different rules.

10. To create a prerequisite rule with an OR operator, right-click the “And” operator node and select the “Or” operator.

    Add two rules, each one with one of the courses that can be taken to satisfy the OR condition.

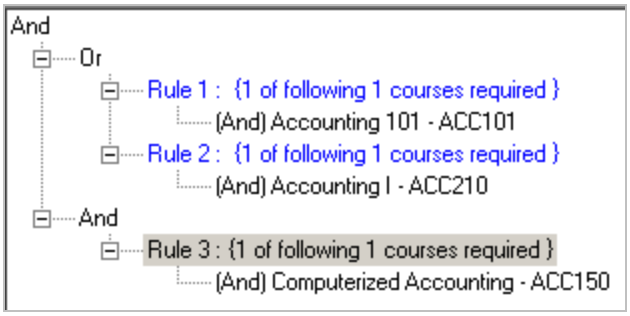
11. To add an operator, click on an existing operator and click one of the **And** or **Or** buttons. In most cases you will click on the existing 'And' operator in the Prerequisite Courses field. As you build the rules, a tree structure representing the rules and the prerequisite requirements is built.



Note: The rules below and to the right of an operator are the ones that will be affected by the operator. For example in the image above, Rule 1 and Rule 2 are connected by the OR operator so that Accounting 101 OR Accounting I will fulfill the requirement.

12. To add a rule, ensure that the operator in which the rule belongs is highlighted and click the **Add Rule** button. Each time you add a rule, you are prompted for the number of courses required for the rule. Enter a number and click **OK**.

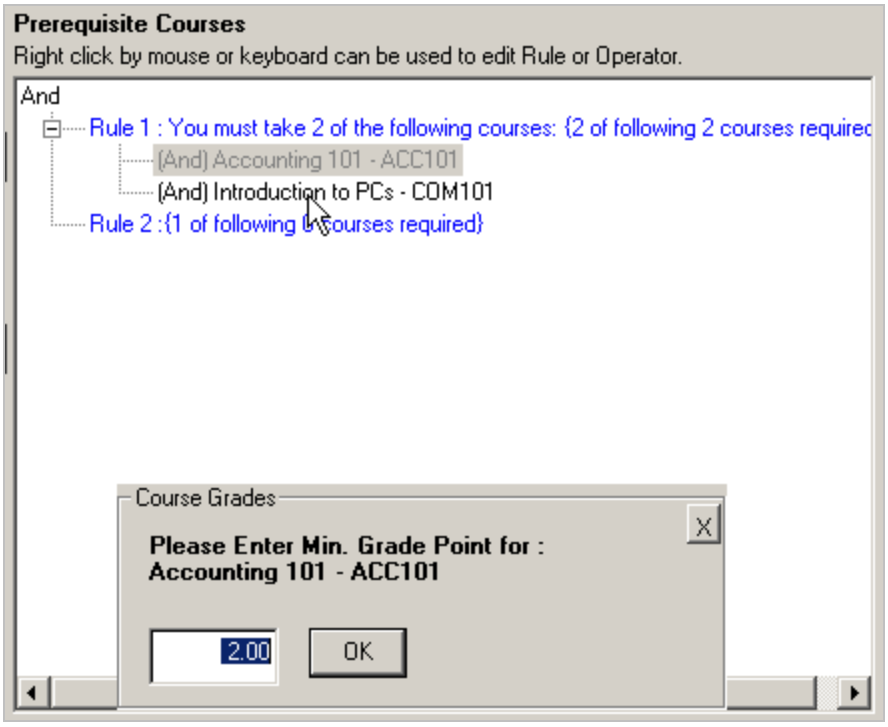
13. Build the tree containing the And/Or operators and rules with required courses.



14. To remove a prerequisite course, select the course in the Prerequisite Courses field and click .

15. If a prerequisite course within a rule requires a minimum Grade Point Requirement, select the prerequisite course in

the node tree and click the **Min Grade Point** button.



16. Specify the Minimum Grade Point (5 digits including 2 decimal positions) for the selected course and click **OK**.

    The Minimum Grade Point is displayed in the rule.

17. The text containing the rule is displayed when the prerequisites are viewed by staff during registration or students registering on Portal. To modify the text, select the rule to be edited and click **Edit Rule**. Enter the desired text after the colon located after the Rule # and before the text in the braces.

    Note: The generated text in between the braces remains after you have performed the edit.

18. To change the order of rules, statements, or courses in the Prerequisite Courses field, select the item and click  .

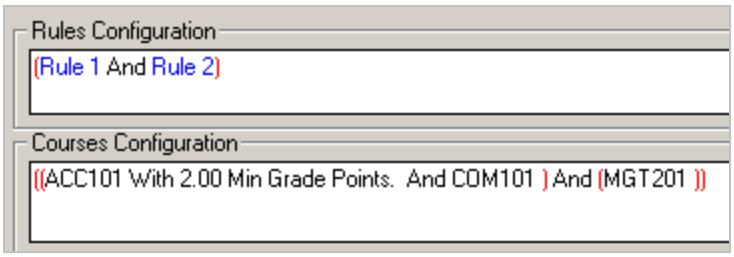
19. To remove a rule, select the rule in the Prerequisite Courses field and click **Delete**.

    A confirmation message is displayed. Click **Yes**.

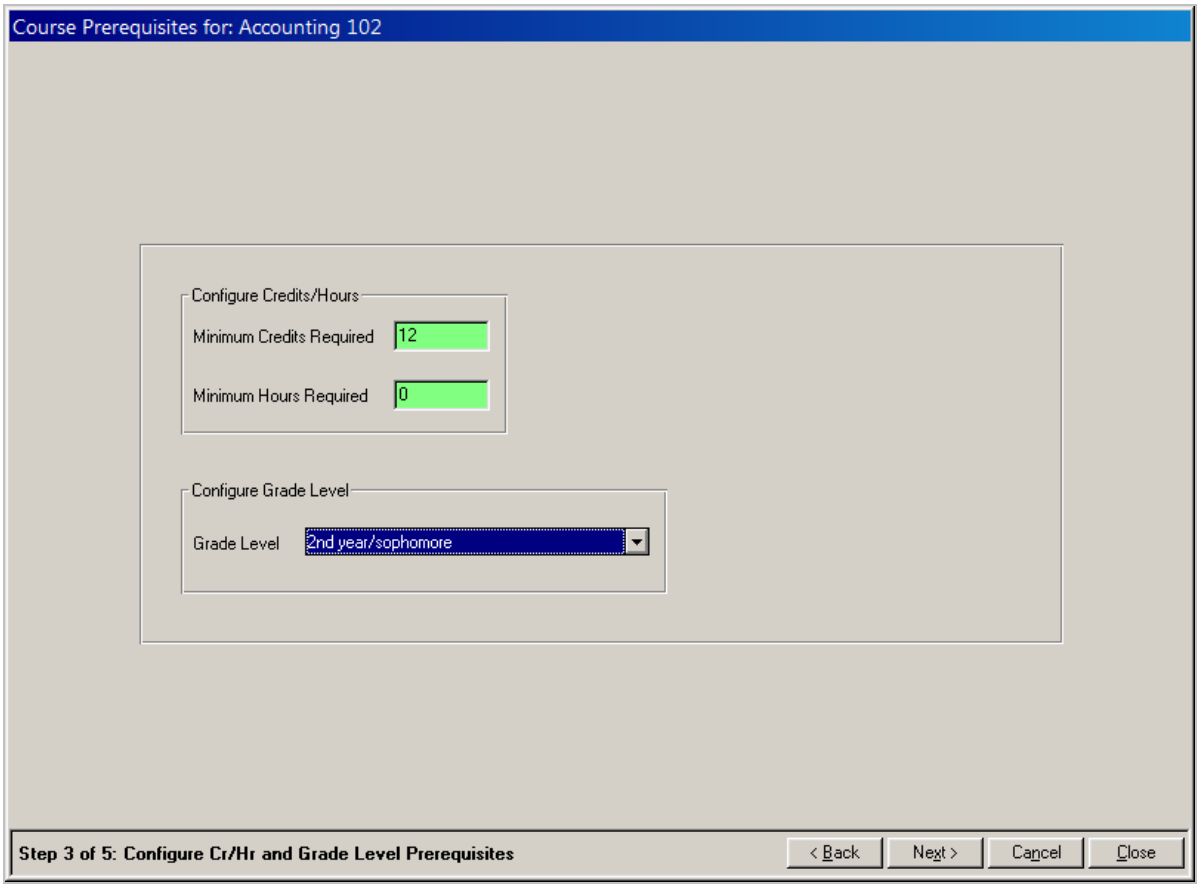
20. To remove an 'And' or 'Or' operator, select the operator and click **Delete**.

    A confirmation message is displayed. Click **Yes**. All rules associated with the operator are removed.

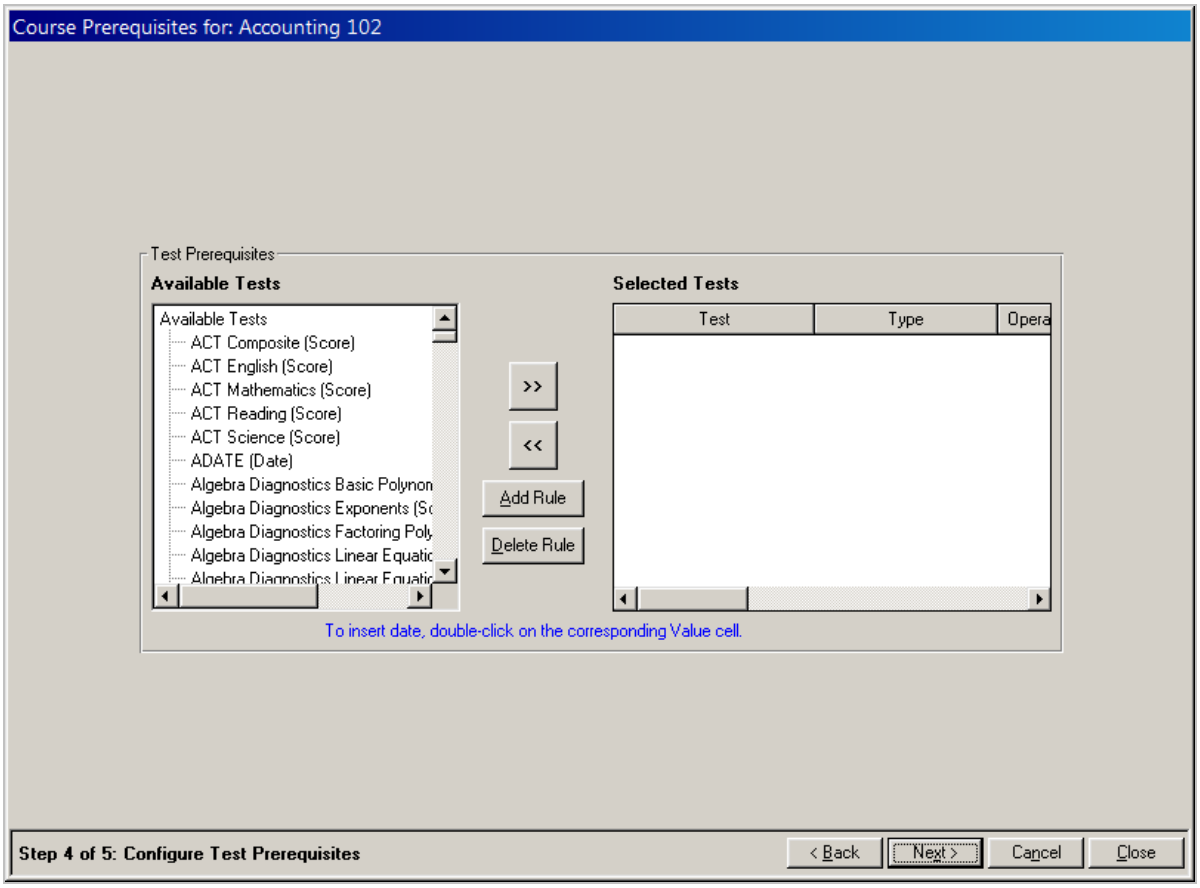
21. The bottom of the form contains two areas which display details of the prerequisite courses being configured. The **Rules Configuration** area shows the logical relationship between each of the rules, while the **Courses Configuration** area shows the relationship between the courses. These areas are not editable, but the text may be copied for inclusion in other applications.



22. Click **Next** to proceed.



23. If there is a prerequisite for credits, hours, or grade level, specify the values.
    a. Specify **Minimum Credits Required** or **Minimum Hours Required**.
    b. Specify **Minimum Hours Required**.
    c. Select the **Grade Level**.
24. Click **Next** to proceed.



25. If test prerequisites are required, add a rule, and specify the minimum test scores.

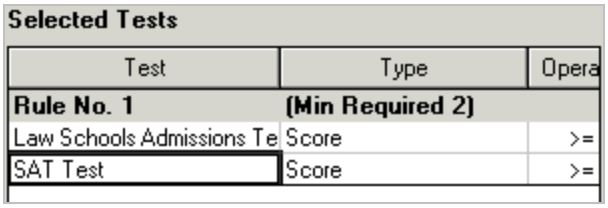
    a. To add a rule, click the **Add Rule** button.

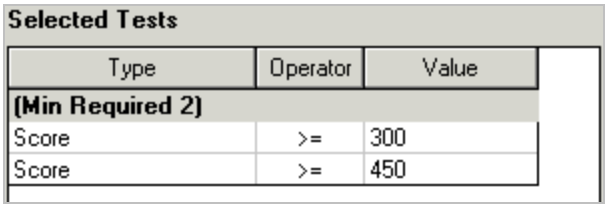
    The following message is displayed: *How many tests are required for this rule?*

    b. Enter a number greater than 0 and click **OK**.

    c. To add a test to the rule, select a test and click .

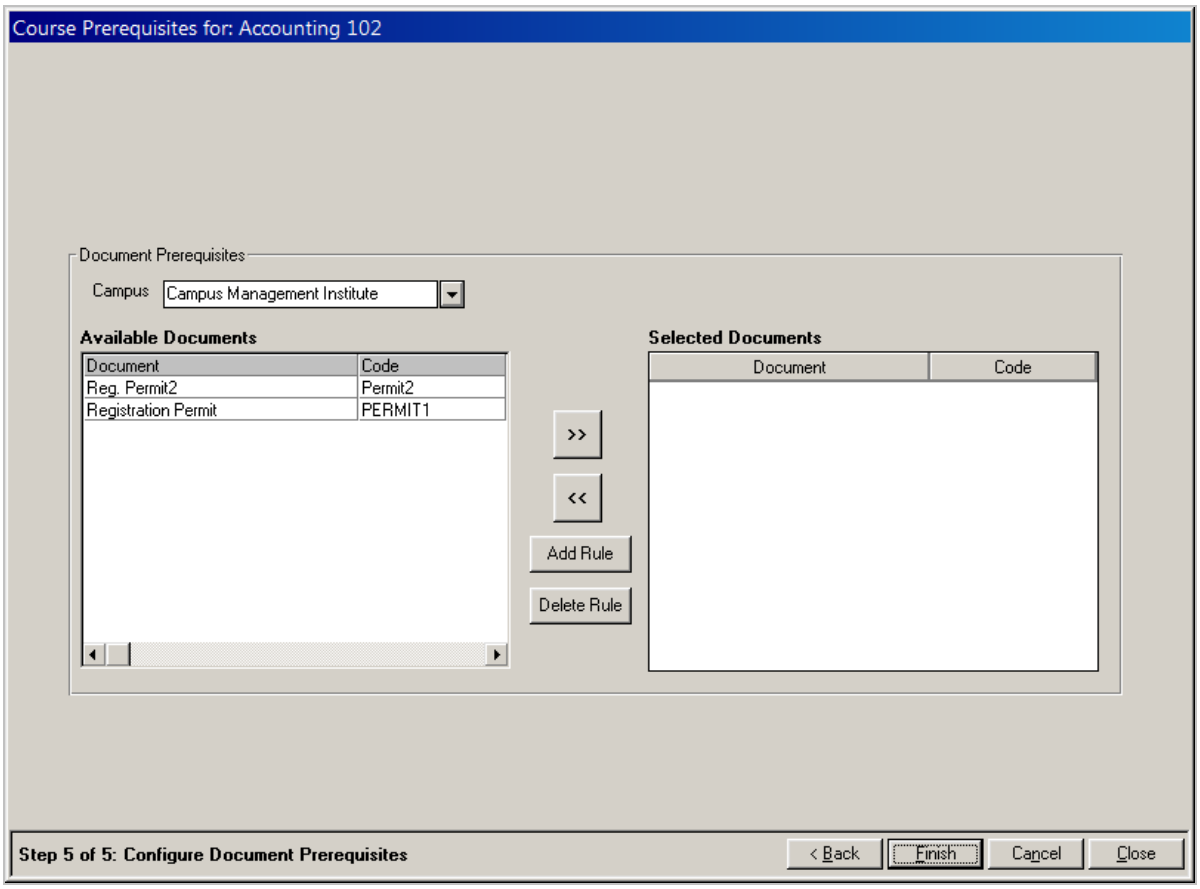
    d. For each test selected, enter a minimum score on the right side of the Selected Tests grid. Move to the right side of the grid to specify the minimum test **Value**.





e. Use the **Add Rule** and **Delete Rule** buttons to add or remove rules for test prerequisites.

26. Click **Next** to proceed.



27. If prerequisite documents are required for a course, add a rule and associate one or more documents with the rule.

    a. Select a **Campus**. The campus drop-down is populated from the selected limit on the Courses Code Setup form.

    b. Click the **Add Rule** button.

    The following message is displayed: *How many Documents are required for this rule?*

    c. Enter a number greater than 0 and click **OK**.

    d. To add a document to the rule, select a document and click .

Note: Add as many documents as needed, but the same document can only be added once for a specific rule.

e. Use the **Add Rule** and **Delete Rule** buttons to add or remove rules for Document Prerequisites.

28. Click **Finish** to save the Prerequisites and return to the Courses Code Setup form.

Courses > Course Resources

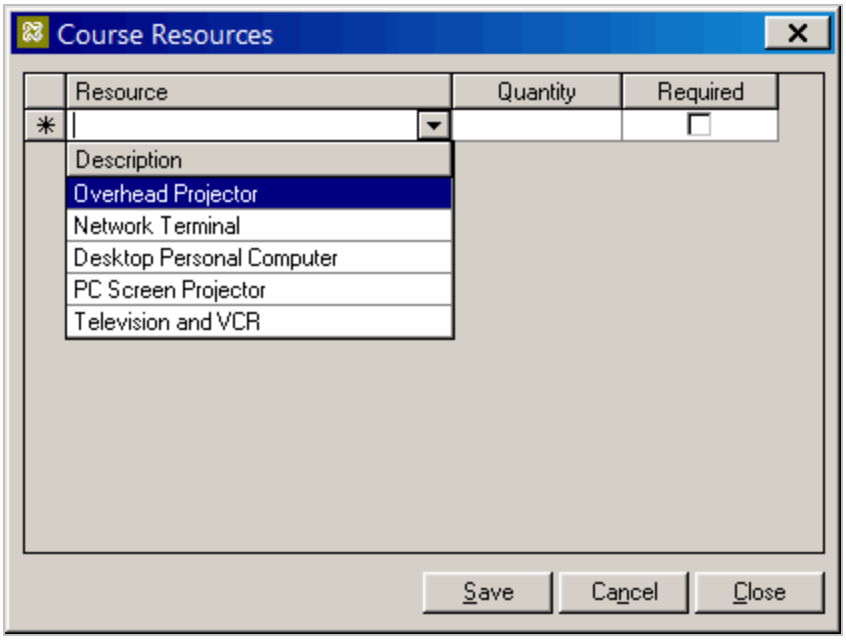
Use the Course Resources form to list the resources required or requested for teaching a course.

Cross-listed courses are courses where two different course sections are using the same instructional resource, for example, sharing the same faculty member, or using the same room at the same time. You can associate both course sections by cross-listing them to the instructional resource.

Prerequisite: Resources codes must be set up under Lists > Academic Records > Resources before they can be assigned to a course.

To select the resources for a course:

1. On the Courses Code Setup form, click the **Resources** button. The Course Resources form is displayed.



2. Click in the **Resource** field and select a resource.
3. Specify the number of resource units in the **Quantity** field.
4. Select or clear the **Required** check box to indicate that the resource is absolutely necessary or just nice-to-have.
5. Add more resources if needed.
6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

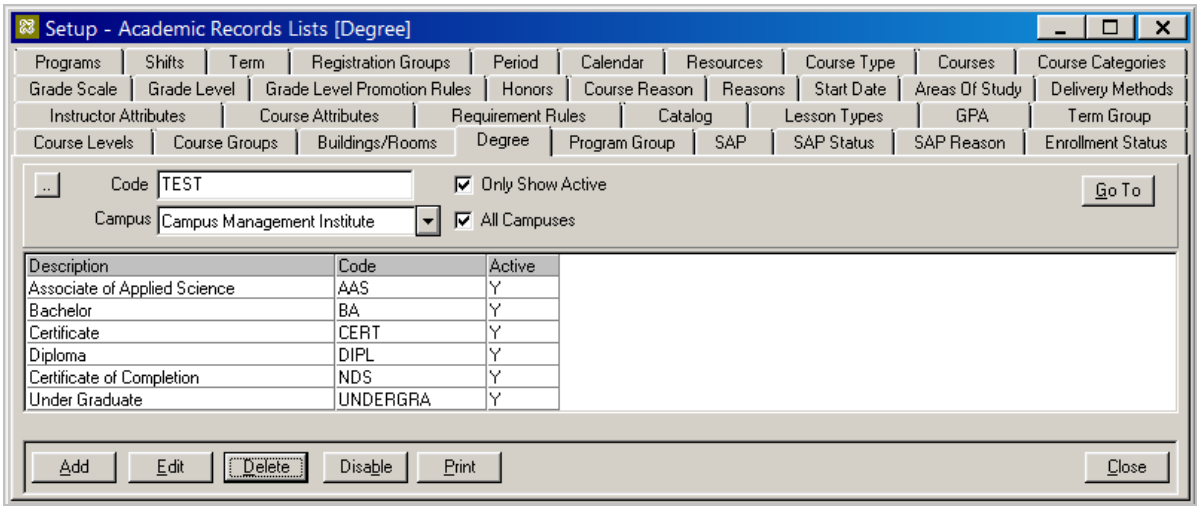
Setup - Academic Records Lists [Degree]

Use the Setup - Academic Records Lists [Degree] form to list descriptions and codes of the degrees, diplomas, and certificates offered by your institution. Each degree can be associated with all campuses or with a campus group. A degree code is related to each program version in the programs list.

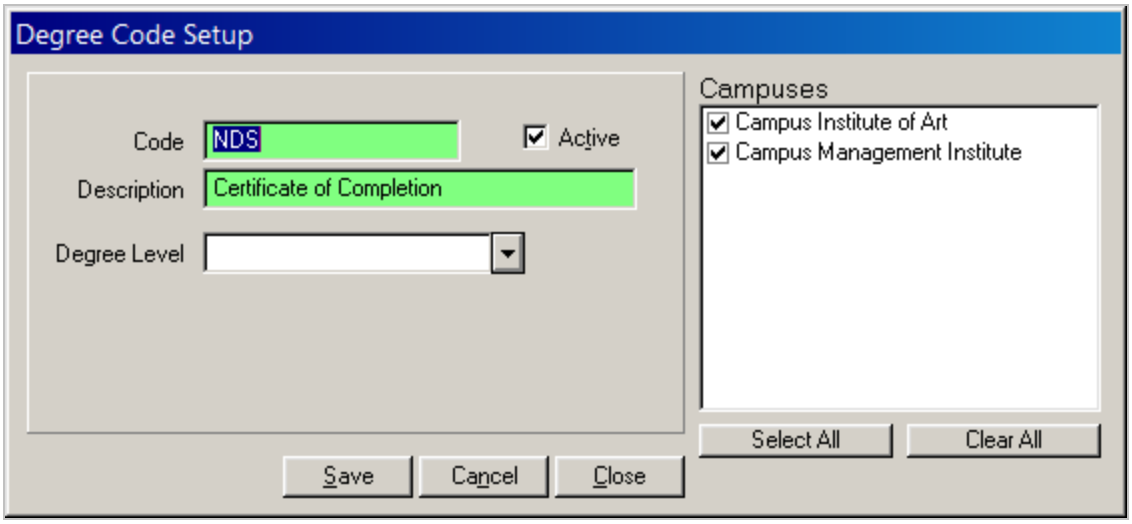
Note: A degree code cannot be deleted if it has been assigned to a program version.

To add or edit a list of degree codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Degree**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Degree Code Setup form is displayed.



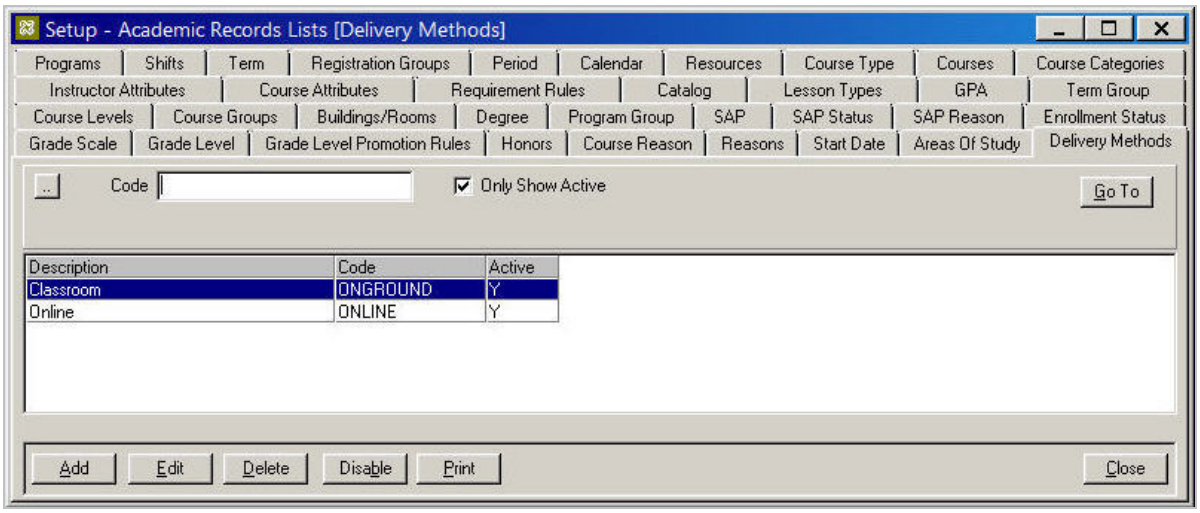
7. Specify a unique **Code**.
8. Enter a **Description**.
9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
10. Select a **Degree Level** (* = Graduate Level Degree):
    - Undergraduate (nonGE)
    - Graduate (nonGE)*
    - Professional (nonGE)*
    - Undergraduate Certificate
    - Associate's Degree
    - Bachelor's Degree
    - Post-baccalaureate Certificate
    - Master's Degree*
    - Post-master Certificate*
    - Doctor - Research/Scholarship*
    - Doctor - Professional Practice*
    - Doctor - Other *
    - First-professional Degree*
    - Graduate/professional certificate
    - Non-credential programs
11. Select one or more **Campuses**.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Academic Records Lists [Delivery Methods]

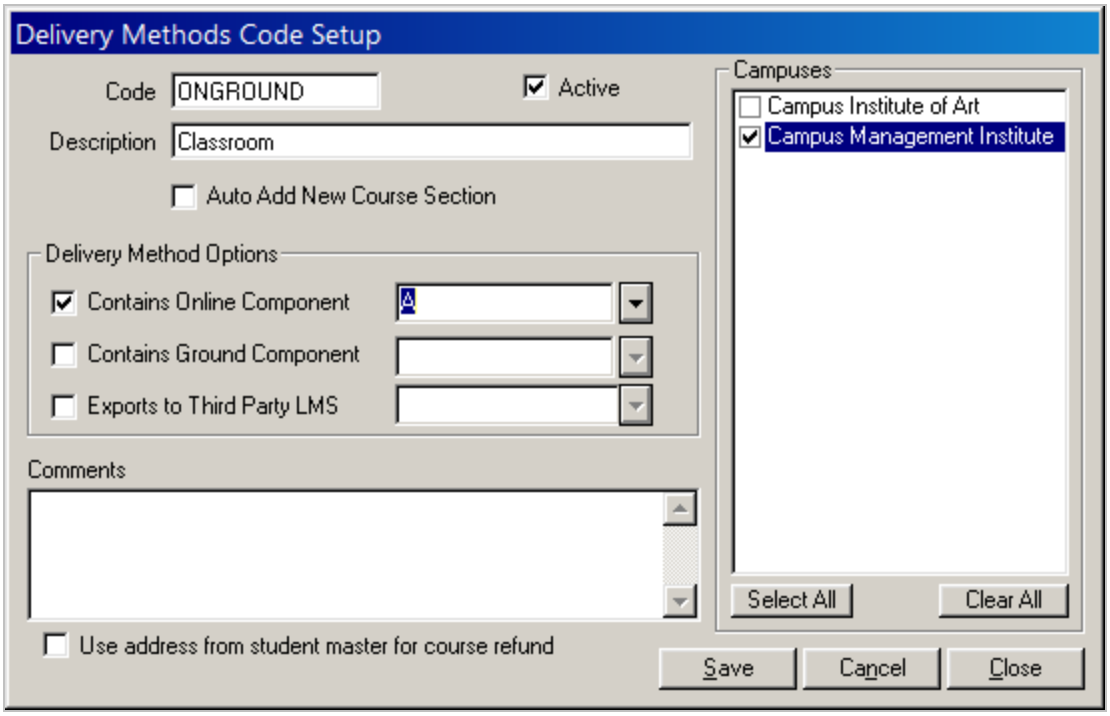
Use the Setup - Academic Records Lists [Delivery Methods] form to create a list of delivery methods for the courses offered by your institution.

To add or edit a list of delivery method codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed. .
2. Select the applicable **tab**, or click the **Go To** button, click and select **Delivery Methods**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Delivery Methods Code Setup form is displayed.



6. Specify a unique **Code**.
7. Enter a **Description**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Select one or more **Campuses**.

   When defining the delivery method for a class section, the Section Delivery Method list displays only delivery methods associated with the campus where the course is scheduled.
10. Select **Auto Add New Course Section** if your campus is configured to add course sections automatically. For more information, see Auto Add Course Section Setup.
11. Select applicable Delivery Method Options.

    - If the course contains an online component, select the **Contains Online Component** check box and select one of the following options:

      - **A** if the class meets at asynchronous times (students attend or log into the class resources at their convenience at various times).
      - **S** if the class meets at synchronous times (all students attend or log in at specific times).

      See Auto Add New Course Section to determine if your institution needs to implement this feature for online courses. An 'A' value in the Contains Online Component field is required for this feature. See also Attendance Rules and Student Specific Meeting Schedule for online courses.

      Note: Enabling an online component causes an icon to appear on the registration forms for students registering via Portal. Text typed into the Comments field is displayed in the Portal tool tip for the selected class.

    - If the course has a ground component, select the **Contains Ground Component** check box and select one

of the following options:

- **A** if the class meets at asynchronous times (students attend or log into the class resources at their convenience at various times).
- **S** if the class meets at synchronous times (all students attend or log in at specific times).

- Select the **Exports to Third Party LMS** check box if the associated course exports can be exported to an external Learning Management System (LMS).

12. Enter any comments in the **Comment** field.
13. Select **Use address from student master for course refunds** if the course refund policy is to be determined on the basis of the student's state of residence rather than the state where the course is offered.

    Note: If this options is selected, all states must be assigned to a policy for a refund to be calculated. If a Student Master has a state that is not configured, no Refund Policy is used for calculations.

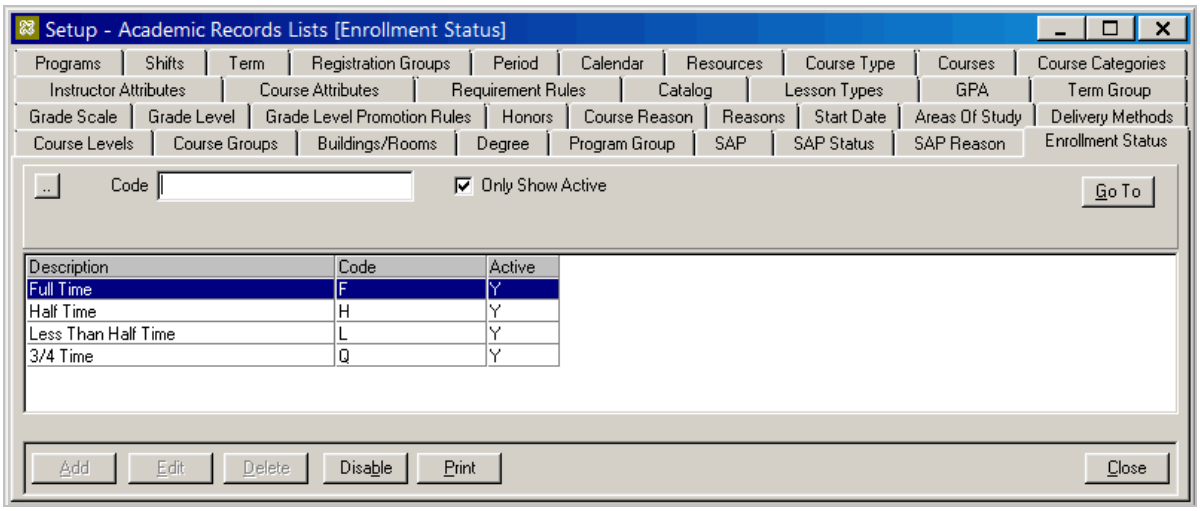
14. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Academic Records Lists [Enrollment Status]

The Setup - Academic Records Lists [Enrollment Status] form lists the standard enrollment statuses defined by the Department of Education. You cannot add or edit these statuses. You can use the disable/enable and print functions.

To disable or enable enrollment status codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Enrollment Status**.



3. Select **Only Show Active** to view only active records. Clear this check box to view all records.
4. Select a list item and click **Disable**. The Active column for the selected list item changes from 'Y' (yes) to 'N' (no). The Disable button changes to Enable.
5. Select a list item and click **Enable**. The Active column changes to 'Y'. The Enable button changes to Disable.
6. Click **Close** to close the form.

Setup - Academic Records Lists [GPA]

CampusNexus Student provides a list of system-defined Grade Point Averages (GPAs). The system GPAs only allow editing of the decimal settings (up to five places).

You can add school-defined or non-system GPAs (for example, an Honors GPA that includes grades from previous institutions or a HOPE Scholarship GPA for State reporting). When GPAs are added, by default CampusNexus Student calculates each new GPA cumulatively, with the ability to calculate the new GPAs by term. You can configure options for designating campus, retake methodology, weighting, which types of courses are included in the calculation of each newly created GPA, and where the new GPAs are displayed in CampusNexus Student.

GPA Calculation

The GPA calculation appears on many forms and reports and comprises important information regarding the student's progress.

The student's GPA may not be included in the GPA calculation if the Include in GPA flag is disabled for the letter grade assigned to the grade scale. See also Satisfactory Academic Progress (SAP) calculation.

GPA Calculation for Parent and Child Terms

GPAs are calculated for parent terms. Current GPAs for the parent term include all courses taken for the related child terms. Cumulative GPAs for the parent term are the same as the cumulative GPA of the last related child term.

The parent term GPAs are not printed on the transcript. The parent term GPAs are only visible on the Term Summary tab of the Enrollment form.

If a student is registered in a child term, all courses for the student should be in a child term and not in the child's parent term. The GPA calculation will not work correctly if there are courses in both the parent term and the child term of the parent term.

If a student is registered into CHILD SUMMER1 and CHILD SUMMER2, and also needs to take a third course that spans the entire summer, a third child term should be set up.

Example

- P2014SUMMER - Parent 2014 Summer Term (06/02/2014 thru 08/15/2014)

Child Terms (used for registration):

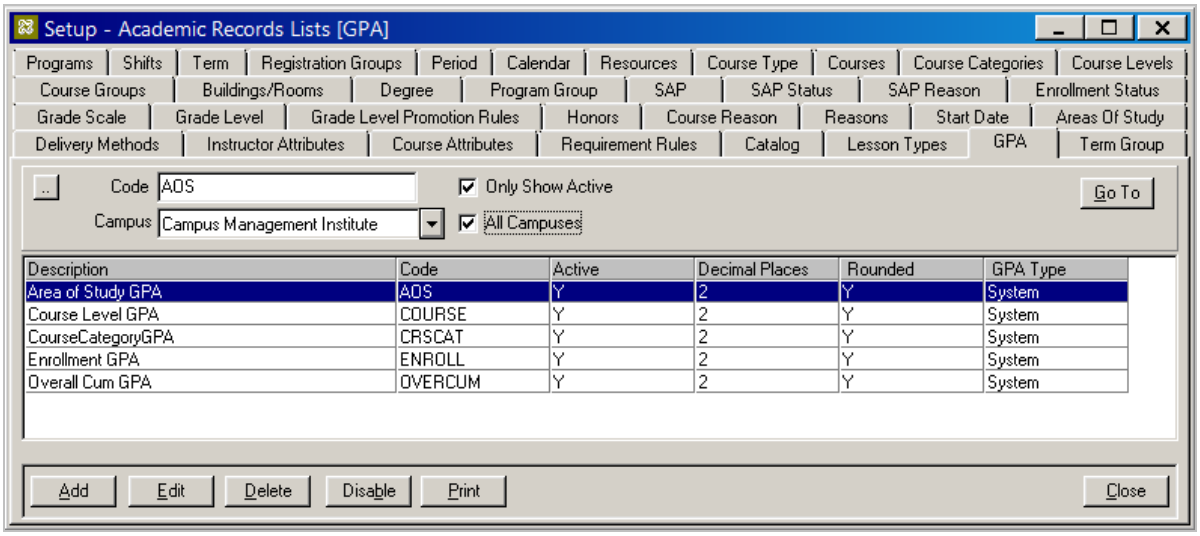
- C2014SUM1 – Child 1 (06/02/2014 thru 07/10/2014)
- C2014SUM2 – Child 2 (07/13/2014 thru 08/15/2014)
- C2014SUM_ALL – Child 3 (06/02/2014 thru 08/15/2014)

Child term C2014SUM_ALL needs to be set up if schedules are set up for the full length of the Parent 2014 Summer Term. Courses should not be scheduled or registered into the parent term:

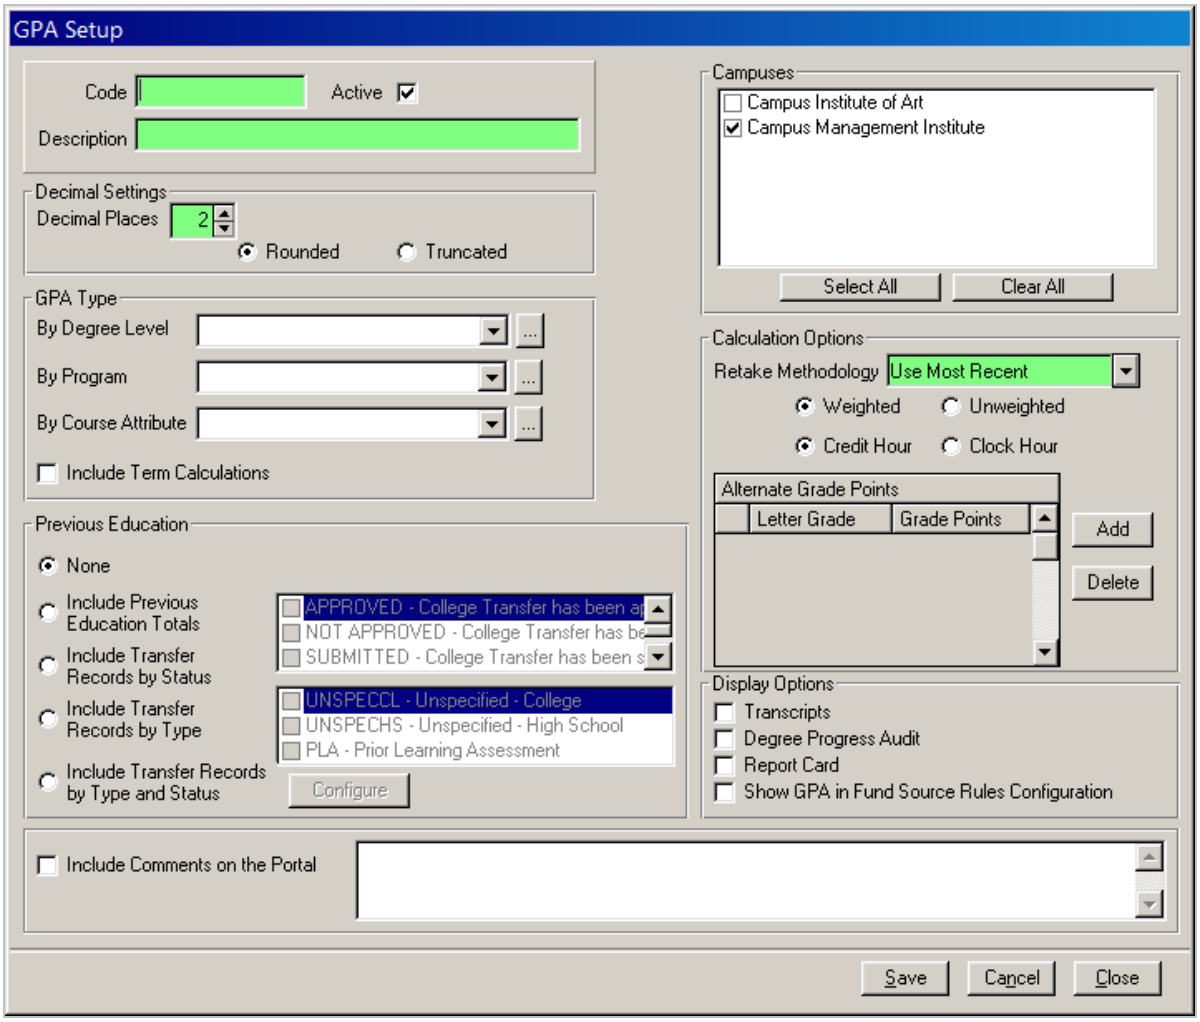
Note: The Term Relationships feature does not prevent registration into both a parent term and a parent's child term, but this scenario is not supported. If this is done, the GPA calculation will be inaccurate.

To add school-defined GPA codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **GPA**.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**. The GPA Setup form is displayed.



7. Specify appropriate options. See Field Descriptions.
8. Click **Save**. . A confirmation message is displayed. Another message informs you that the GPA calculations can take some time because CampusNexus Student gathers all active, enrolled, and temporary out students that meet the GPA criteria and passes them into an asynchronous queue for calculation.
9. Click **Close** to close the form. You are returned to the Setup Academic Records List form.

Repeat these steps until you have defined all your additional GPAs.

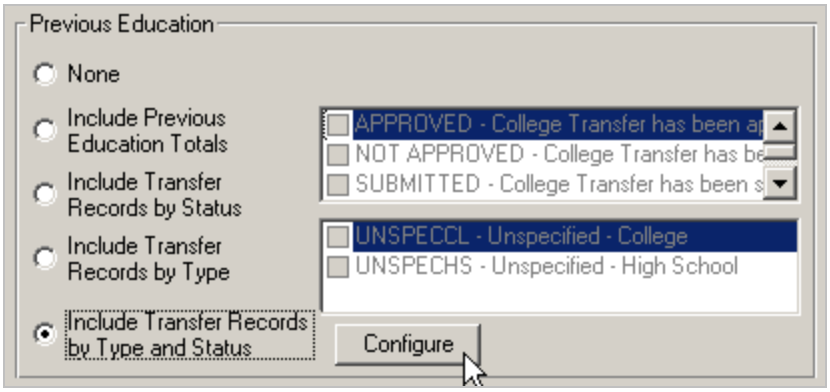
Field Descriptions

Field	Description
Code	Specify a unique **Code**.
Active	Select or clear the **Active** check box to designate the record as active or inactive, respectively. **Note**: When the Active flag is selected, the GPA is applied to all active, temporary out, future starts, and new enrollments. Inactive GPAs continue to be calculated for students who have a version start date less than the date the GPA became inactive. If the version start date and the date the GPA became inactive are equal, the deactivated additional GPA is not calculated for the student.

Field	Description
Description	Enter a **Description**.
Campuses	Select one or more **Campuses**.
Decimal Settings	Select the number of decimal places. Decimal places range from 0 to 5; by default rounding is with 2 decimal places. Select whether the GPA is to be **Rounded** or **Truncated**.
GPA Type	The GPA Type settings determine which courses are included in the GPA calculation by default. Select at least one of the following options: • **By Degree Level** - Courses from all enrollments with a specific degree level (multi-selectable option) • **By Program** - Courses from all enrollments that are common to a specific program (multi-selectable option; populated from a program, not a program version list; includes active and inactive programs) • **By Course Attribute** - Courses from all enrollments that share a specific course attribute **Note**: The GPA Type options are all multi-selectable . Within each one they function as an OR operator. For example, if Undergraduate and Graduate are selected for Degree Level, the school-defined GPA includes undergraduate OR graduate courses. However, amongst all three options they function as an AND operator. For example, if Undergraduate is selected for Degree Level and College of Liberal Arts is selected for Program, and Accounting is selected for Course Attribute, the new school-defined additional GPA includes only undergraduate courses from the Degree Level AND all courses from the College of Liberal Arts Program AND all courses that have the Accounting Course Attribute. • **Include Term Calculations** - The GPA calculations are broken down by term similar to the way the Term Summary works for system GPAs. Each term displays the term's GPA and the cumulative GPA as of the end of the term.

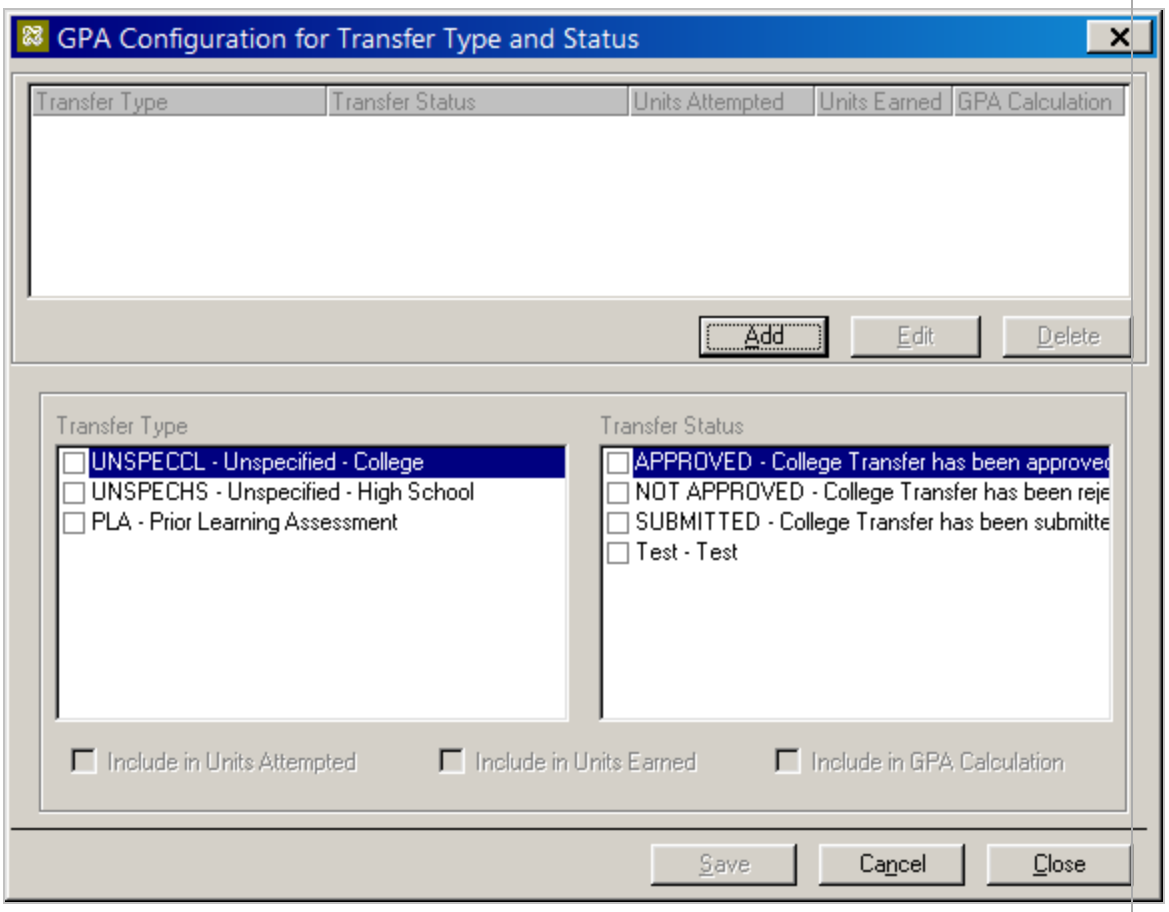
Field	Description
Previous Education	Select one of the Previous Education options: • **None** (default) – The GPA to excludes previous education records or courses from the Transfer Credit folder. • **Include Previous Education Totals** – The values stored on any and all previous college education records (if entered) are included in the GPA calculation. • **Include Transfer Records by Status** – The values from one or more specified transfer statuses are included in the GPA calculation. CampusNexus Student selects only the courses in the Transfer Credits folder that have the specified transfer status. • **Include Transfer Records by Type** – The values from one or more transfer types are included in the GPA calculation. CampusNexus Student selects courses in the Transfer Credits folder that have the specified transfer type. • **Include Transfer Records by Type and Status** – The values from one or more specified transfer statuses and types are included in the GPA calculation. Select a combination of transfer types and statuses using the **Configure** button. CampusNexus Student selects courses in the Transfer Credits folder that have the specified combination of type and status and includes them only in the specified calculations. **Note**: When one of the Transfer Records options is selected, CampusNexus Student uses the units and grade point values entered in the 'Details for Additional GPAs' on the previous institution course. ◦ If one of these values is not populated, the course is not included in the calculations. ◦ If the transfer record is graded with a campus transfer grade that is configured to be included in GPA calculations, the details from the campus course selected for the transfer credit are used. *Example 1* Select **Include Transfer Records by Status** and **College Transfer has been approved**.  *Example 2* a. Select **Include Transfer Records by Type and Status**.

Field	Description



b. Click **Configure** to designate the combination of type and status. The GPA Configuration for Transfer Type and Status form is displayed.

c. Click **Add** or **Edit** to define a new combination of transfer types/statuses or modify an existing combination of transfer types/statuses. The combination of one or more options for Transfer Type, Transfer Status, and 'Include in...' should be unique for every GPA configuration.



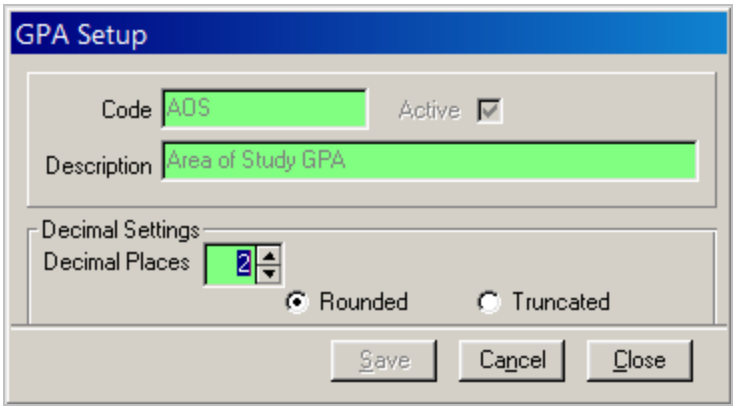
d. Click **Save**. All new combinations and changes to existing combinations are saved into memory temporarily. They are saved to the database when you click Save on the GPA Setup form.

Field	Description
Calculation Options	Select a **Retake Methodology** option: • Use Highest • Use Most Recent (default) • Average All • Include All Select from the following options: • **Weighted** - The GPA calculation uses quality points divided by credit attempted. For example, if a student takes four credit class and earns a letter grade of A, which is equal to 4 points, the student has 16 quality points. The quality points are divided by the total number of credits attempted to determine the GPA. To calculate a cumulative GPA (CGPA), the sum of all quality points the student earns is divided by the sum of all of credits attempted that affect the GPA (referred to as Quality Units). • **Unweighted** - The GPA calculation is based on the sum of grade points divided by the count of taken courses. For example, if a student takes two classes for a total of 8 credits and earns a letter grade of A (4 points) in one course and a letter grade of C (2 points) in the other course, the GPA is calculated as 6 points divided by 2 courses = 3.0 GPA. • **Credit Hour** - The units used in the GPA calculations are based on credits. • **Clock Hour** - The units used in the GPA calculations are based on a courses clock hours. **Note**: When creating a new school-defined GPA, the default values are Use Most Recent retake methodology, weighted calculations, and a credit hour curriculum standard.
Alternate Grade Points	Use this option when a GPA must be based on grade points that are different from standard grade scale configurations. An example is the HOPE Scholarship GPA. The regulations for awarding this scholarship state that a GPA must be monitored based on a straight 4.0 grade scale (A = 4, B = 3, C = 2, D = 1). This means that the GPA cannot be based on plus (+) or minus (-) grades. The Alternate Grade Points option allows you to override the grade points for plus and minus grades in your grade scale. Using the example of the HOPE Scholarship, you configure that an A- equates to 4 points in this GPA (when a standard scale may equate an A- to a 3.75). Therefore, you add an A- in the Letter Grade field and enter a 4.0 in the Grade Points field. CampusNexus Student checks for grades from courses taken at your institution that have a specified Alternative Grade Point value and applies the alternative points in that GPA calculation. Click **Add** to add an alternate grade or **Delete** to delete an alternate grade.
Display Options	Select the display options of the GPA on reports and forms. Each option has an 'Additional GPAs' section that lists the GPA description and the cumulative GPA. The options are: • **Transcripts** • **Degree Progress Audit** • **Report Cards** • **Show GPA in Fund Source Rules configuration** – recognizes the configured GPA as a potential GPA for you to select when creating auto awarding/fund source rules. **Note**: All currently stored system GPAs are available as selection criteria for auto awarding (with the exception of Course Categories and Course Level GPAs).

Field	Description
Include Comments on the Portal	Select this option to enter additional GPA comments for GPAs that are displayed to students on Portal. Enter a maximum of 2000 characters. When you click **Save**, the comments are saved and become visible on Portal.

To edit a GPA code:

1. Select a record in the grid of the Setup - Academic Records Lists [GPA] form.
2. Click **Edit**. The following form is displayed:



3. If necessary, edit the decimal places fields for the system GPAs. The change in decimal places applies to all campuses system-wide.

   If you Edit one of your school-defined additional GPAs, the original setup form is displayed; however, the fields you can revise are limited. The non-editable fields are disabled.

   You can only edit the configuration options that result in a recalculation of the GPA. CampusNexus Student does not allow changes to the configuration options that determine which courses are included in the GPA calculations. This ensures that the courses that are manually applied to a GPA are not removed and avoids a scenario that may cause confusion for students (for example, an undergraduate GPA being changed to include graduate coursework).

   If a school-defined GPA was configured incorrectly and needs to be revised, delete the incorrect GPA configuration and create a new GPA.

4. Click **Save** and **Close** to return to the Setup - Academic Records Lists [GPA].

   Note: When you change GPA settings (system GPA decimal settings included), CampusNexus Student only recalculates GPAs for Active, Enrolled, and Temp Out students. This ensures that the GPAs for graduates and students who are no longer attending your institution remain unchanged from when the students left. However, if changes are made to a permanent out students that would cause a GPA recalculation (such as changing a grade), those students would have their GPAs recalculated according to the current GPA settings.

5. Click **Delete** to remove your school-defined/additional GPA. Doing so removes the GPA from the list and from all student records. Before the GPA is deleted, a message alerts you of how many student records are impacted. Click **Yes** to proceed or **No** to cancel the deletion.
6. Click **Disable** if you want maintain the school-defined GPA for existing students, but no longer want to apply the school-defined GPA to incoming students.

Note: Only school-defined GPAs (not system GPAs) can be disabled.

7. To reactivate the GPA, click **Enable**. A 'Y' appears in the Active column, and the Enable button changes back to Disable.

   Note: Do not select 'Only Show Active' if you want to continue to see the disabled GPA on the grid with an 'N' in the Active column.

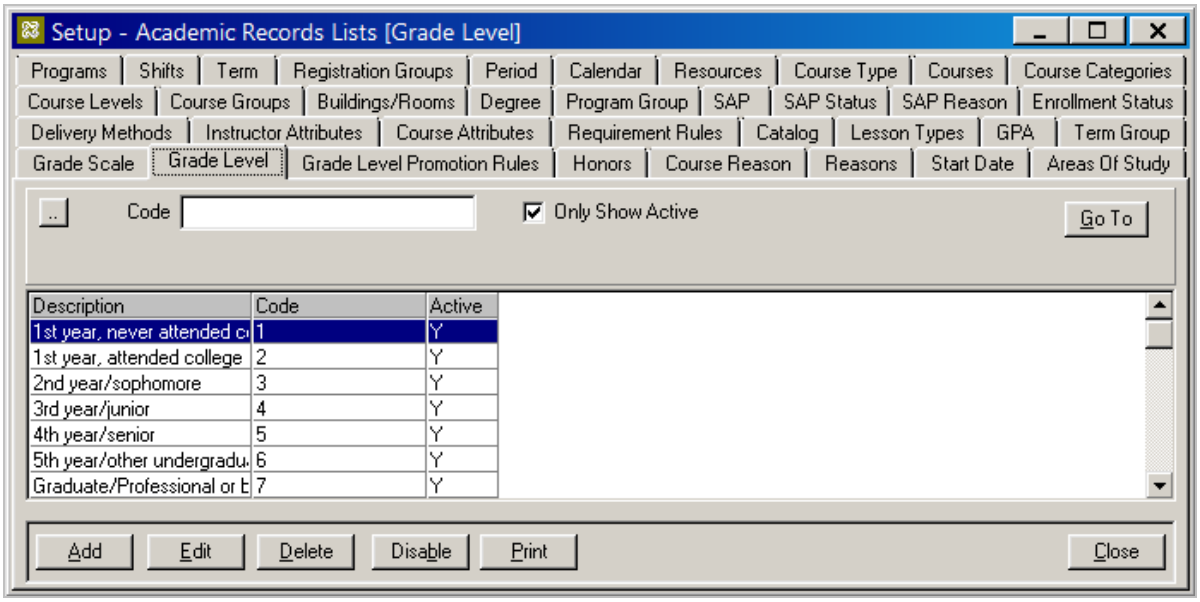
Setup - Academic Records Lists [Grade Level]

The grade level list contains descriptions for the grade levels of students enrolled in your institution. The list should reflect the codes that are used by the Department of Education to determine eligibility for financial aid. This table is used in preparing the FAFSA form.

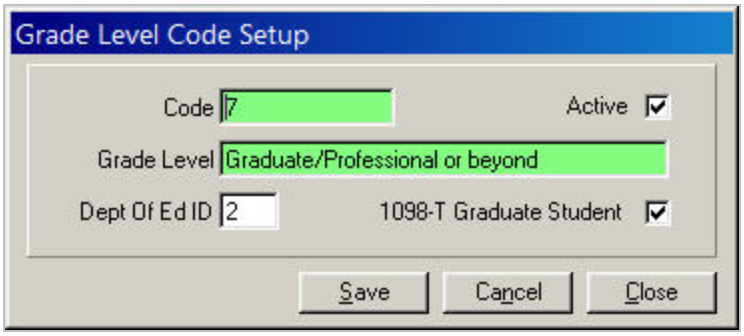
Note: If you change the Dept. of Ed ID on grade levels, the grade level ranges in Financial Aid Packaging Methods may need to be adjusted.

To add or edit a list of grade level codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Grade Level**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Grade Level Code Setup form is displayed.



6. Specify a unique **Code**.

7. Enter a **Description**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Specify the corresponding Department of Education grade level code by entering the appropriate number in the **Dept of Ed ID** field.

   The Department of Education assigned the following numbers to the grade levels:

   - 0 = 1st, never attended
   - 1 = 1st, attended before
   - 2 = 2nd year/sophomore
   - 3 = 3rd year/junior
   - 4 = 4th year/senior
   - 5 = 5th year or more undergraduate
   - 6 = 1st year graduate/professional
   - 7 = continuing graduate/professional
10. Select **1098-T Graduate Student** to designate that a grade level code is to be used in the graduate student calculation for 1098-Ts, and will be selected for codes flagged with a 'Dept Of Ed ID" of 5, 6, or 7.
11. A student is considered to be a **Graduate Student** based on the grade level being assigned a 6 or 7 in the Dept of Ed ID field if the new Department of Education configuration listed above is used.

    Note: When awarding manually or autopackaging a Grad PLUS loan, the grade level from the student's Financial Aid Academic Year form is checked.

    - If the grade levels for '1st year never attended', '1st year attended before', and '5th year undergraduate' are configured with codes 0, 1, and 5 respectively, CampusNexus Student considers the new Dept. of Ed. IDs to be in use, otherwise it considers the old configuration to be in use.
    - If the old configuration is in use, only the Dept. of Ed. ID number 7 are considered to be a graduate student grade level because the original/old Dept. of Ed. ID number 6 meant 5th year continuing undergraduate.
    - If the new configuration is in use, the Dept. of Ed. ID numbers 6 and 7 are considered to be a graduate student grade level.

    If the student is assigned to a grade level of '1st, never attended', CampusNexus Student considers the student a First Time Borrower and enables the First Time Borrower flag. Disable this flag when packaging the student for disbursements.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Academic Records Lists [Grade Level Promotion Rules]

CampusNexus Student packages subsidized and unsubsidized loans up to the maximum allocated within the packaging method assigned to the student's academic year and provides an accurate representation of the student's eligibility for subsidized and unsubsidized loans.

Users configure the maximum amounts for each fund source based on the student's eligibility and EFC as defined by the Department of Education for each program. The thresholds are based on the student's grade level for the current enrollment, therefore a student's loan eligibility changes as the student's grade level changes. The student is eligible as soon as the new grade level is reached. If the student was already packaged for a lower amount, the student can receive an additional amount in subsidized aid based on the new grade level.

While users can manually add this additional aid record to determine and manually update the grade level on the student's academic year record, they can also use Grade Level Promotion Rules to define a schedule for the number of credits needed to automatically advance a student's financial aid packaging and grade level promotion. If a student meets the defined threshold during the year, the student is automatically packaged for the additional eligibility loans to an estimated status, automatically promoted to the new grade level, and activities are triggered to the student's financial aid advisor to review the additional eligibility loan record to validate and approve eligibility.

Note: An activity must be scheduled in the activity scheduler by the user for the activity to be properly triggered. A sample activity might work like this:

- Code: ADDLOAN
- Description: Additional Loan Eligibility Notification
- Comments: *A grade level change to the student's academic year found additional loan eligibility. The loan has been added to the student's award record in an estimated status. Please evaluate the award to confirm eligibility. Activity is due on the day it is scheduled.*
- Activity Type: Message

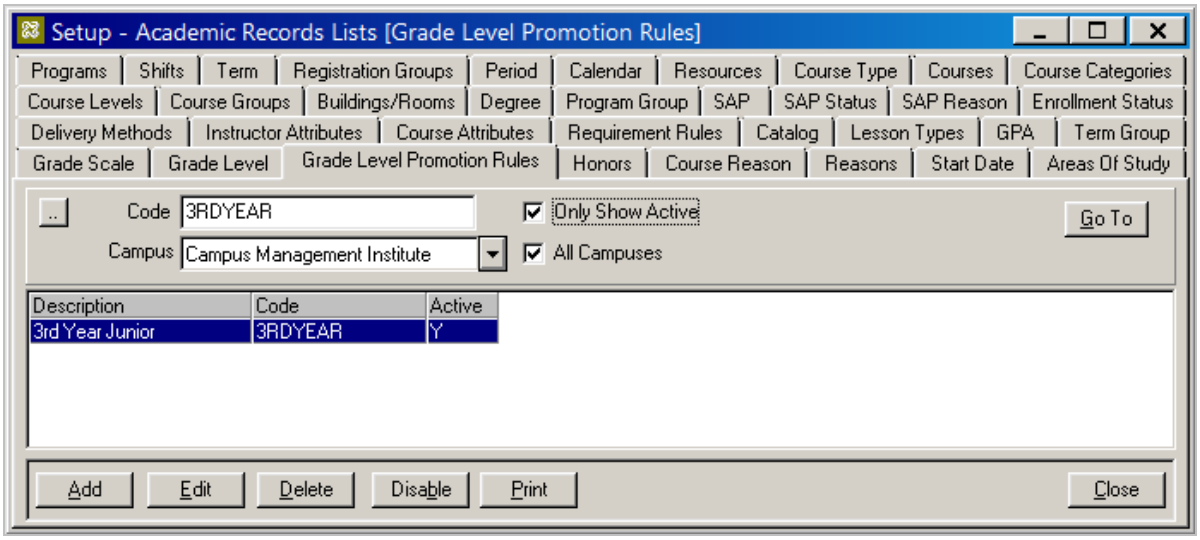
The user would then trigger this activity to occur when a loan is added using "Additional Loan Eligibility Added (Auto Change)" as a "When" condition in the Activity Scheduler.

Automatic Grade Level Promotion and Anticipated Grade Level Evaluation

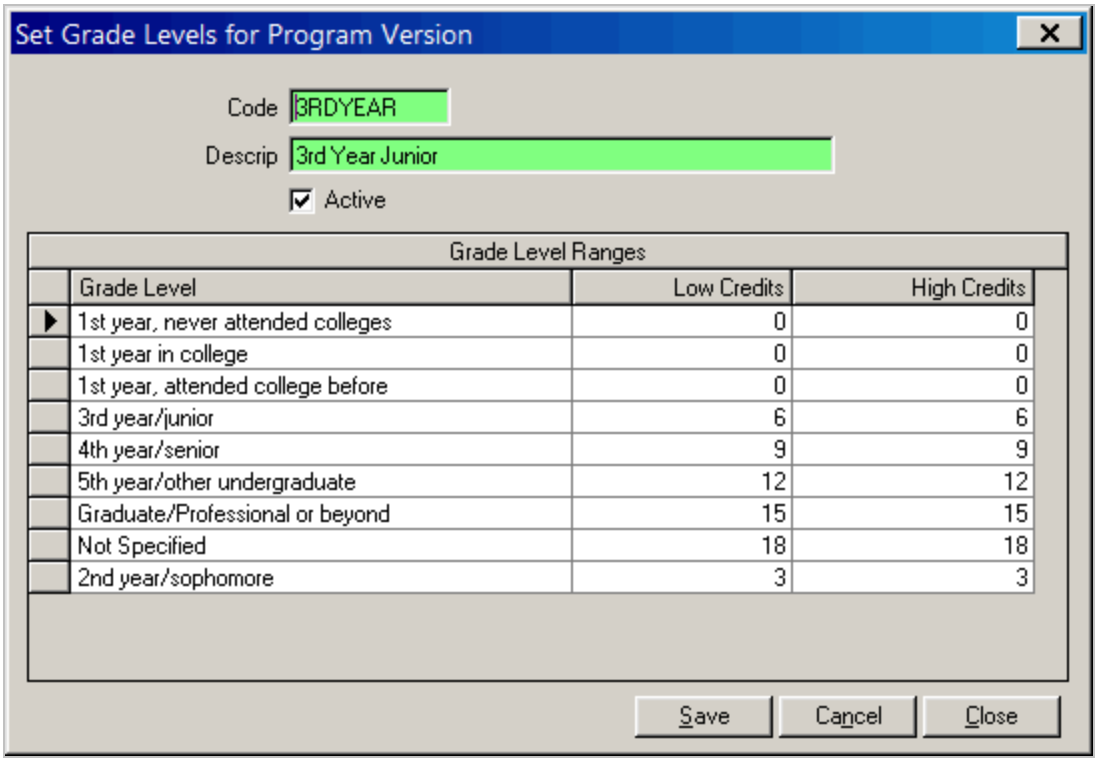
These options are enabled from the Setup menu and require proper privileges to change the settings. For more information, see Setup > Campus Locations > Options (tab) > Grade Level Promotion.

To add or edit a list of grade level promotion rules:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Grade Level Promotion Rules**.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Set Grade Levels for Program Version form is displayed.



7. Specify a unique **Code**.
8. Enter a **Description**.

9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
10. For each grade level that is affected by the current rule, select the Grade Level and specify the minimum number of credits required by that level in the **Low Credits** field. (Use the **Tab** key to advance to the next field.)
11. Specify the maximum number of credits allowed before the student is automatically advanced to the next level in the **High Credits** field. (When you click **Save**, zeroes are automatically inserted into any fields left blank.)
12. Continue to modify each grade level that is affected by this rule.
13. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

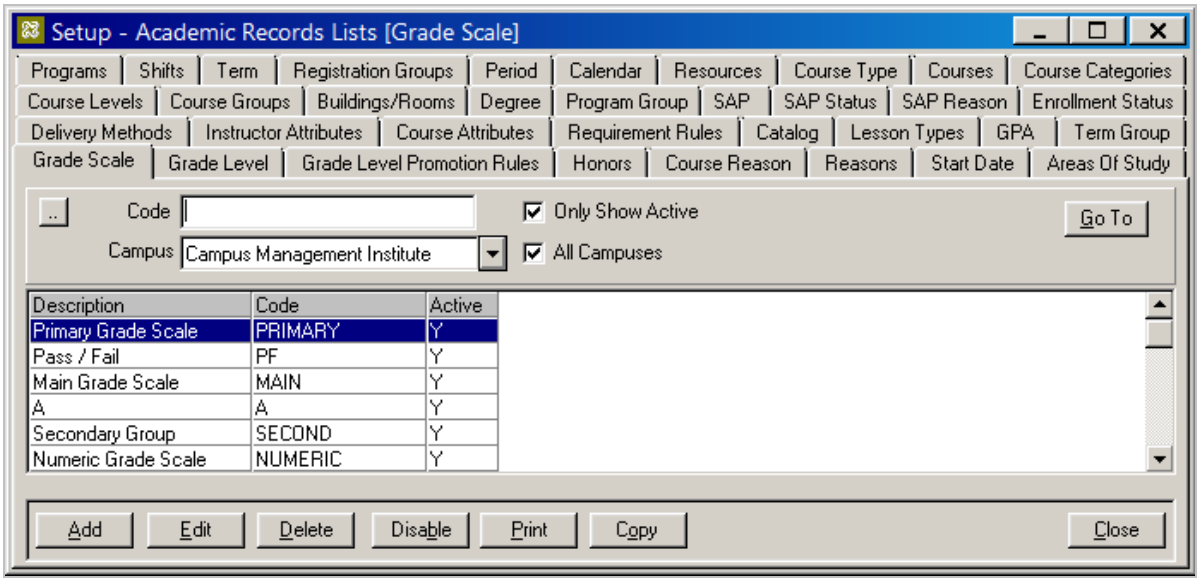
Setup - Academic Records Lists [Grade Scale]

The Grade Scale list establishes the grading parameters that your institution uses to evaluate the academic achievements of its students. An institution can have multiple grade scales. Each academic program has a grade scale related to it. Each grade scale is associated with all campuses or with a campus group.

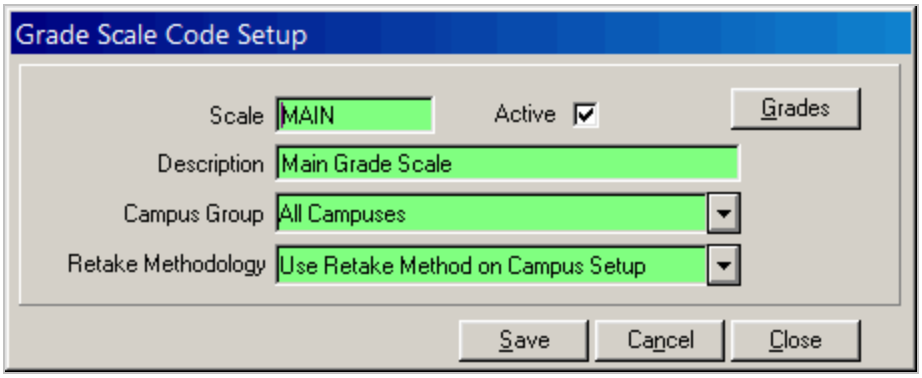
The attributes of a grade scale include a description, grade letters or numeric values, grade points, and indicators as to how the grade is treated in GPA calculations and academic progress.

To add or edit a list of grade scale codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Grade Scale**.



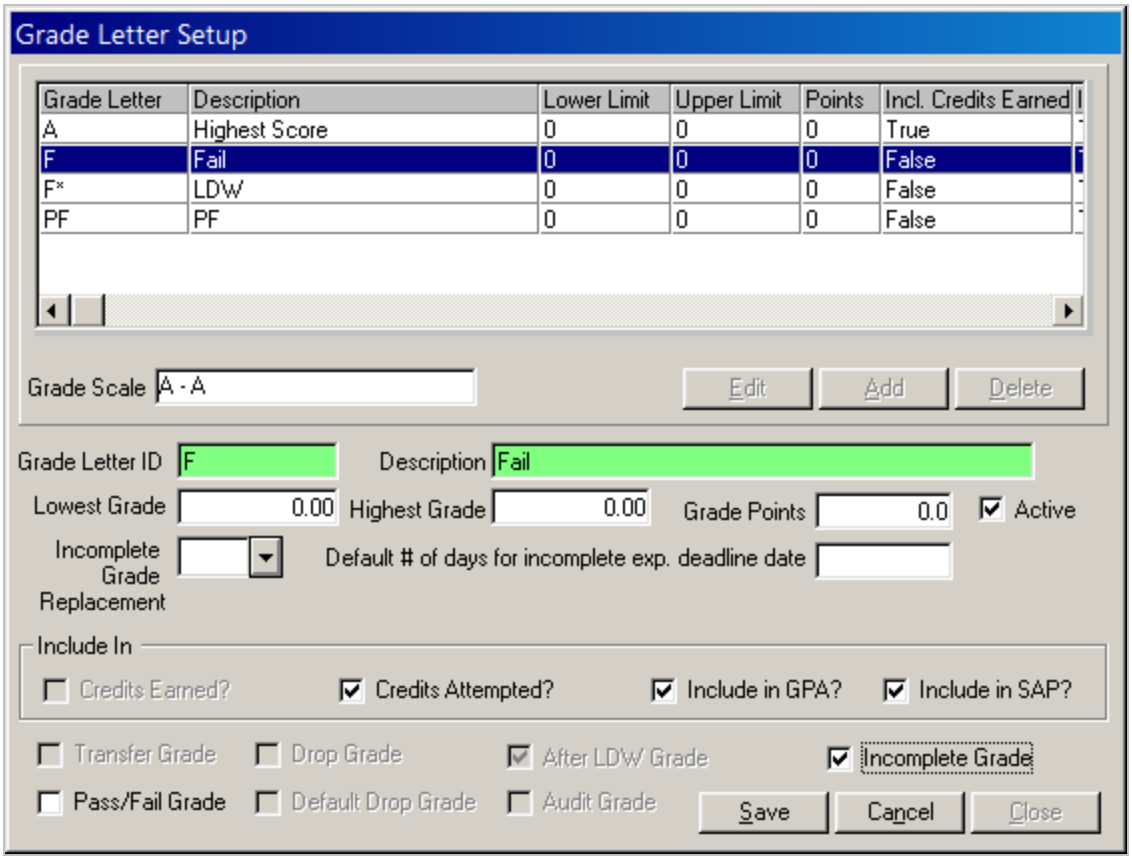
3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Grade Scale Code Setup form is displayed.



7. Specify a code for the grade scale in the **Scale** field.
8. Enter a **Description**.
9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
10. Select a **Campus Group**.
11. Select a **Retake Methodology**. The options are as follows:
    - 0 - Use Retake Method on Campus Setup (default)
    - 1 - Use Highest
    - 2 - Use Most Recent
    - 3 - Include All
    - 4 - Average Retakes
12. Click **Save**.

To add or edit letter grades in a grade scale:

1. Click the **Grades** button on the Grade Scale Code Setup form. The Grade Letter Setup form is displayed. The Grade Scale field shows the name of the grade scale being displayed.



2. Specify the **Grade Letter ID** and **Description**.

   For Pass/Fail grade letter systems, designate "P" for a passing letter grade and "F" for a failing grade.

3. Specify the **Lowest Grade** and **Highest Grade** if your institution uses numeric ranges to assign grades.

   If the Grade Scale is used in conjunction with Grade Book, the Lowest Grade (minimum) and Highest (maximum) values for the Pass grade assigned to the Pass/Fail Grade Scale MUST be entered.

4. Specify the **Grade Points** for the letter grade. This value is used in calculating grade point averages (GPAs).

5. Enable the **Active** check box to include this grade in the grade scale.

   The Active field on the Grade Letter Setup form is used to flag grades that are active and used within a grade scale. Making a grade inactive may cause ranges for the Lower Limit, Upper Limit, and Points to be excluded from the grade scale resulting in gaps for grade calculations.

   Note: Selecting the **Disable** button on the Grade Scale form deactivates this check box and the selected grade scale. Selecting the **Enable** button on the Grade Scale form activates this check box and the selected grade scale.

6. Select **Credits Earned?** to indicate that academic credit is earned when the student is awarded this grade.

   Select this option for a Pass/Fail grade scale.

7. Select **Credits Attempted?** to indicate that the student has officially attempted this course.

8. Select **Include in GPA?** to indicate that the point value of this grade is included in the student's GPA calculations.

Select this option if a passing grade for a pass/fail grade scale is assigned a specific letter grade, such as a C+, and counts toward the GPA Calculation.

9. Select **Include in SAP?** if you want this grade included in the calculation of satisfactory academic progress (SAP).
10. Select **Transfer Grade** if your institution transfers credits from other institutions. The typical method is to set up a "T" grade with the following parameters:

    - Lowest Grade = 0
    - Highest Grade = 0
    - Grade Points = 0
    - Credits Earned = True
    - Credits Attempted = False
    - Include in GPA = False
    - Include in SAP = False

    Note: When you mark a course with a "Transfer Grade", the course thus graded is not included in revenue recognition calculations.

11. Select **Drop Grade** to use this grade as a choice for assigning a final grade to a dropped course.

    This field is disabled by default and only appears if the campus grade scale requires a final grade for a dropped course.

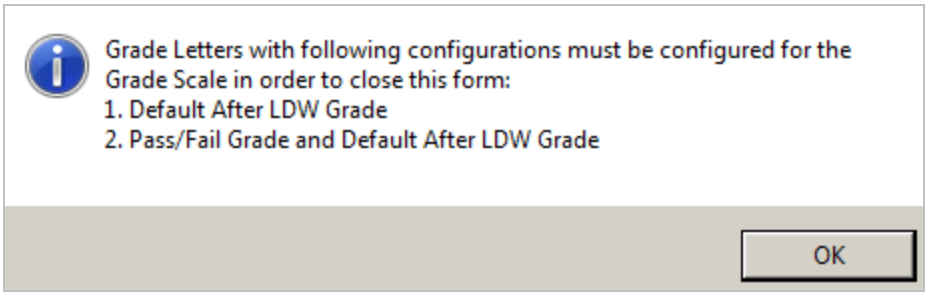
12. Select **Default Drop Grade** to designate the selected grade to be the default used for dropped courses during daily processes.

    You can define one default drop grade per grade scale. If the default drop grade is made inactive, you must select a new default drop grade before closing the Letter Grade Setup form. You cannot exit the Letter Grade Setup without defining a default drop grade. This field is disabled by default and only appears if the campus grade scale requires a final grade for a dropped course (see Setup > Campus Locations > Academic Records (tab) > Grade Entry for Dropped Course).

13. Select **After LDW Grade** to designate the letter grade as a default grade to be posted on courses automatically during a status change to a system status of 'Dropped'. The default After LDW Grade posted is posted only when the course section's Last Day to Withdraw date is in the past and a course withdrawal is therefore prohibited during status change processing.

    Important Note:

    If Enforce Last Day to Withdraw is enabled in Setup > Campus Locations > Edit/Add > Academic Records (tab) for any campus in the campus group associated with the grade scale, the After LDW Grade check box must be enabled on at least one standard non-drop grade (for ex 'F'), as well as one Pass/Fail grade. If After LDW Grades is disabled on a grade scale for a campus enforcing a last day to withdraw, you cannot save the grade scale changes. The following message is displayed:



14. Select **Audit Grade** to associate the grade letter only with the audit courses.

To convert a course to an audit course, use the Convert to Audit Course button on the Schedule form, or use another grade for this purpose that does not have the audit flag selected in the Grade Scale Setup form.

15. Select **Pass/Fail Grade** on the letter grades applicable to Pass/Fail course sections.

    Note: Pass/Fail grades must be configured for any campus that has courses designated as Pass/Fail Only or Pass/Fail by Student's Choice in Lists > Academic Records > Courses and Daily > Academic Records > Schedule Classes.

16. Select **Incomplete Grade** to designate a grade as an incomplete grade. The following fields are enabled:

    - **Incomplete Grade Replacement** - Select the grade that automatically replaces the incomplete grade after the expiration deadline date has passed. If the replacement grade is not configured, the incomplete grade is not automatically replaced past the expiration deadline date.
    - **Default # of days for incomplete exp. deadline date** - Specify the number of days added to the course section end date to calculate the expiration deadline date.
        - If this field is left blank, the logic goes to the next hierarchy levels to find this value, namely the Course and then the Campus Locations.
        - If the 'Default # of days...' is found to be blank at all three places, the expiration deadline date is populated with the current date.
        - If the replacement grade has been configured without configuring the 'Default # of days...' at any of the three hierarchy levels, the incomplete grade is replaced when the night job runs. The results of the night job are similar to those obtained if the 'Default # of days...' configuration was in place. The only difference is that the deadline date is set to the current date of grade posting.

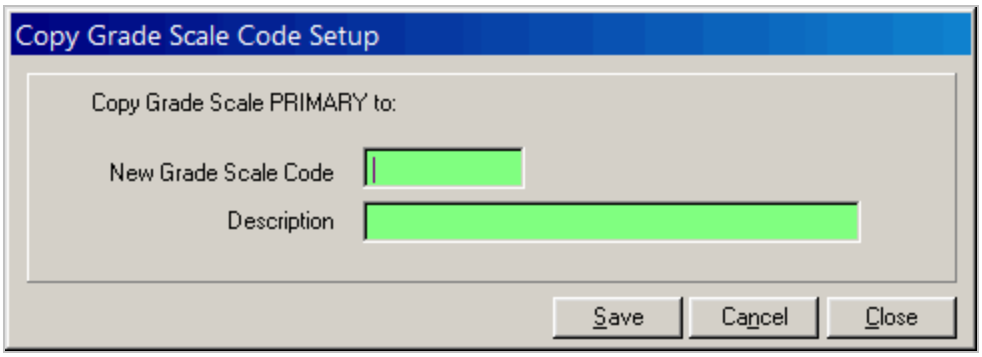
    Note: A grade designated as an incomplete and the replacement of an incomplete grade cannot be configured to be an audit, transfer, default drop grade,after LDW grade, or drop grade.

    Incomplete grade configurations are copied over as part of the grade scale if you are copying a grade scale.

17. Click **Save**.
18. Click **Close** to close the form. You are returned to the Grade Scale Code Setup form.

To copy a grade scale:

1. On the Setup - Academic Records Lists [Grade Scale] form, select the grade scale to be copied.
2. Click **Copy**. The Copy Grade Scale Code Setup form is displayed.



3. Specify a **New Grade Scale Code**.

4. Enter a **Description**.
5. Click **Save**. CampusNexus Student creates the new grade scale by copying all grades from the source grade scale.
6. Open the newly created grade scale and edit it using the add/edit procedure.

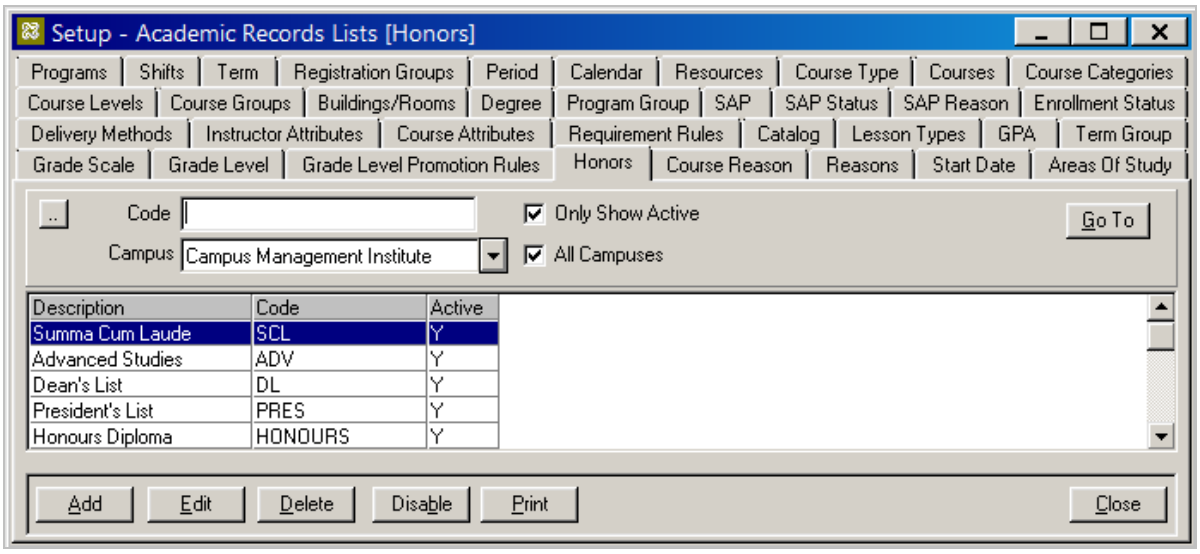
Setup - Academic Records Lists [Honors]

Use the Setup - Academic Records Lists [Honors] form to create honors codes. The codes can be assigned to student enrollment records.

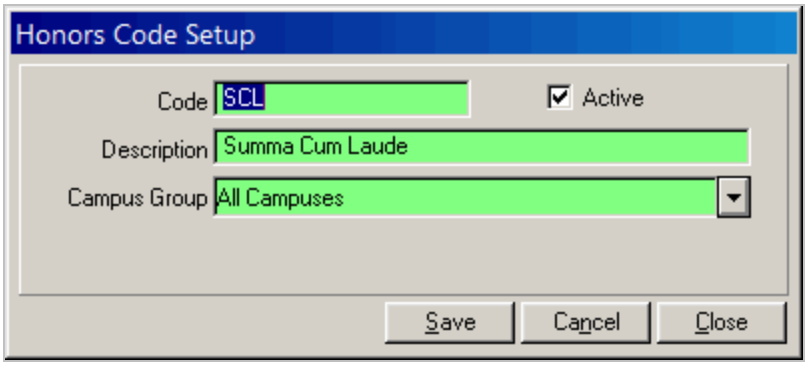
- See Daily > Academic Records > Honors for the wizard that assigns an honors code to an enrollment for a selected term.
- See View > Academic Records > Enrollment > Term Summary (tab) to assign an honors code to the student's term summary record.

To add or edit a list of honors codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Honors**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Honors Code Setup form is displayed.



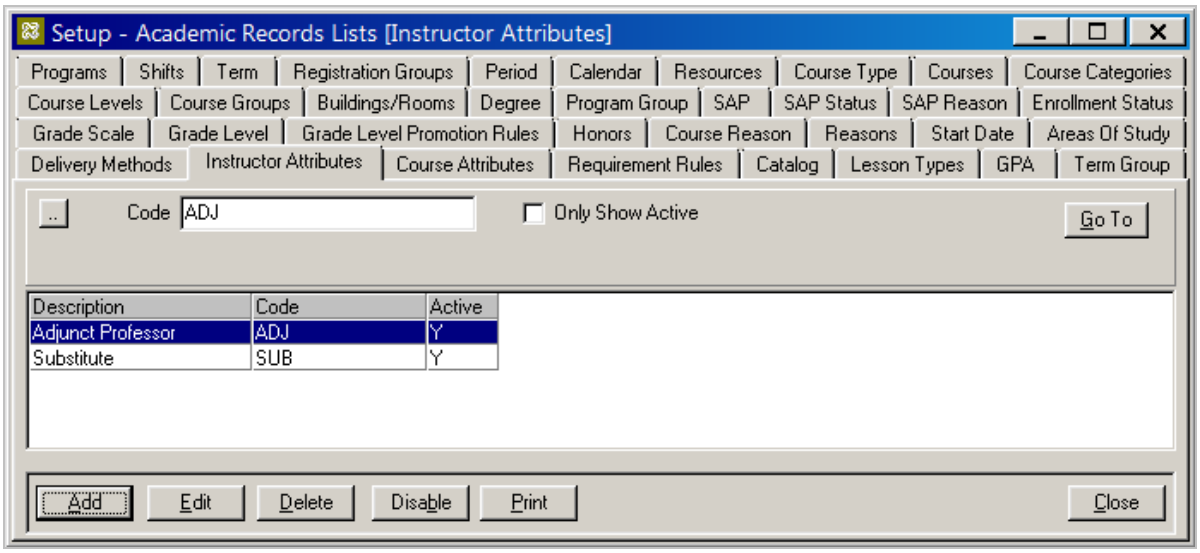
7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.
10. Select a **Campus Group**.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Academic Records Lists [Instructor Attributes]

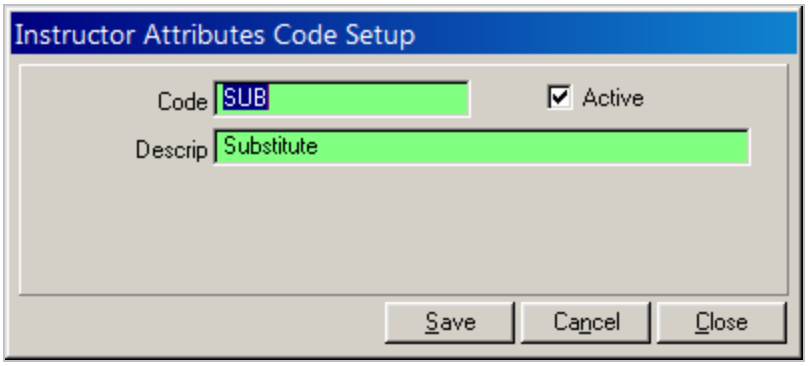
Use the Setup - Academic Records Lists [Instructor Attributes form to set up a list of attributes that can be associated with instructors at the course level.

To add or edit a list of instructor attributes codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Instructor Attributes**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Instructor Attributes Code Setup form is displayed.



6. Specify a unique **Code**.
7. Enter a **Description**.

8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Academic Records Lists [Lesson Types]

Lesson types are used to define the types of tasks, such as exam, book report, etc., a student must accomplish to complete a class section. Lessons are defined at the class section level and are used primarily with Portal Each lesson may account for a certain percentage of the tasks required to complete the course. When lessons are created for a course, each lesson must have a lesson type associated with it.

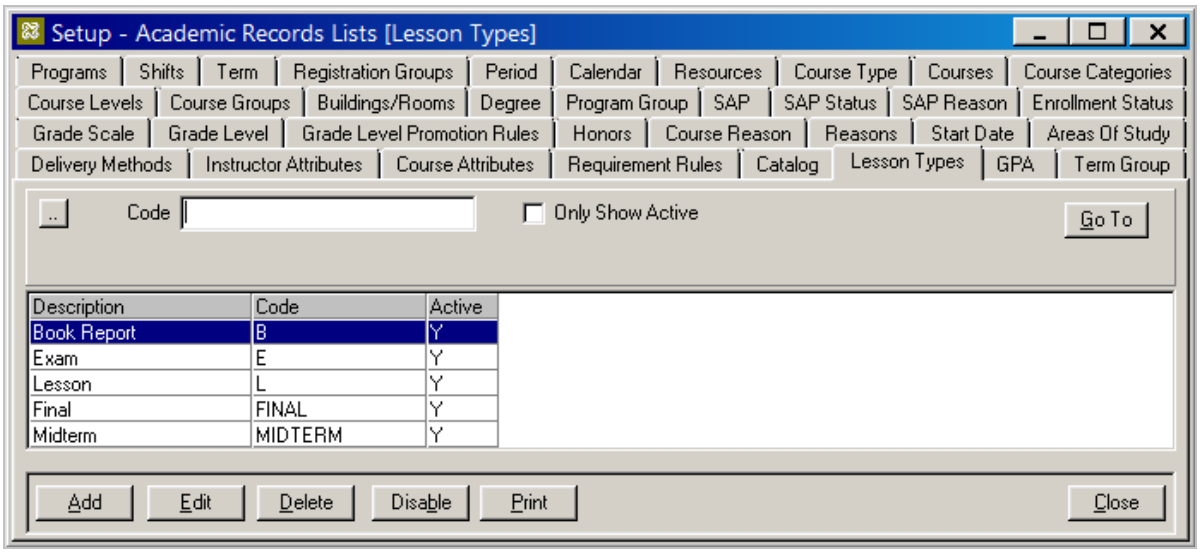
CampusNexus Student provides the following system-defined lesson types. Additional lesson types may be defined as required.

- Lesson
- Exam
- Book Report

Note: Course fees only charge for lessons whose lesson type is system -defined. They are not to be used for user-defined lesson types.

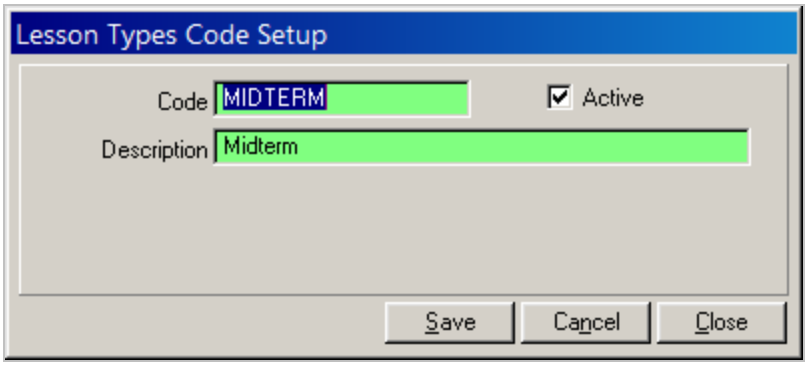
To add or edit a list of lesson types codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Lesson Types**.



Note: The system-defined lesson types are always displayed. They cannot be deleted, but can be set to inactive.

3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Lesson Types Code Setup form is displayed.



6. Specify a unique **Code**.
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. Enter a **Description**.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

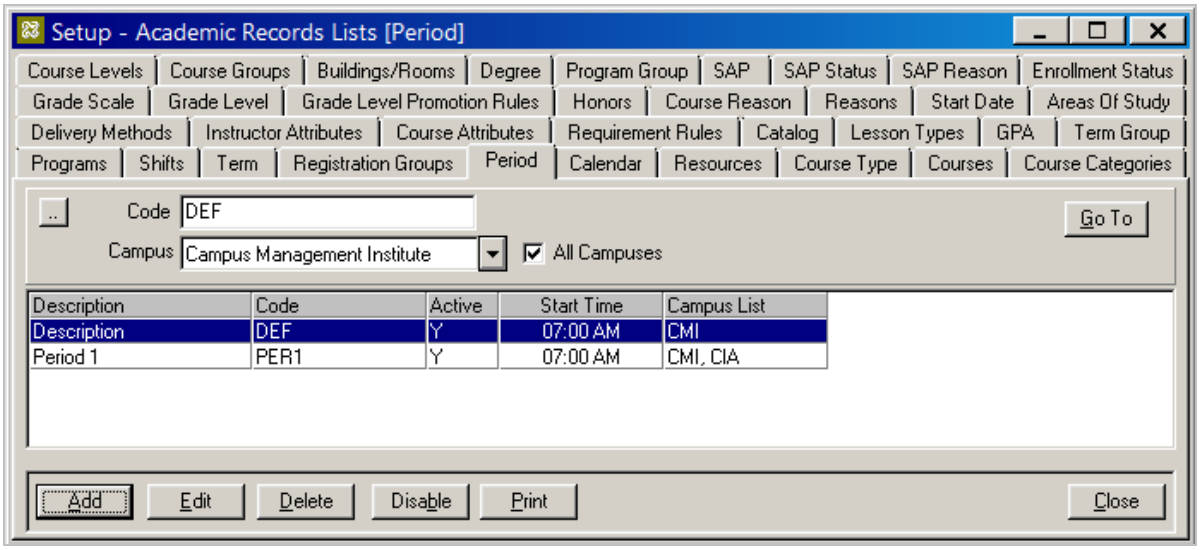
Setup - Academic Records Lists [Period]

Use the Setup - Academic Records Lists [Period] form to define the periods of time in which classes are scheduled at your institution. Each period on the list can be related to a start time, duration in minutes, and days of the week.

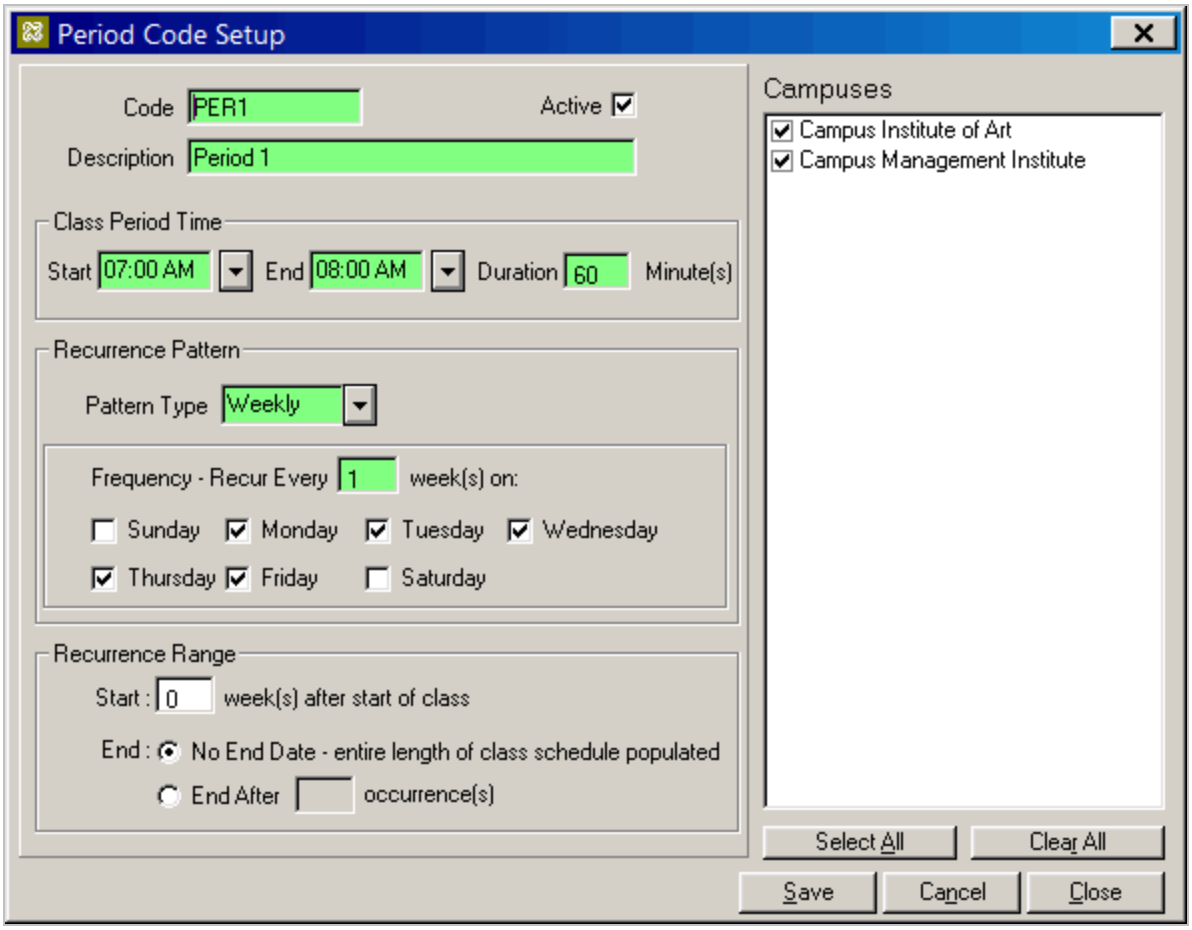
Codes from the Period table are associated with class section scheduling records. It is possible to design a pattern of periods covering multiple days of the week that can be used to fill in the schedule for a class section with one mouse click. On the other hand, it is not necessary to have period codes to fill in a schedule for a class section. This is especially true for situations in which classes meet at irregular times.

To add or edit a list of period codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Period**.

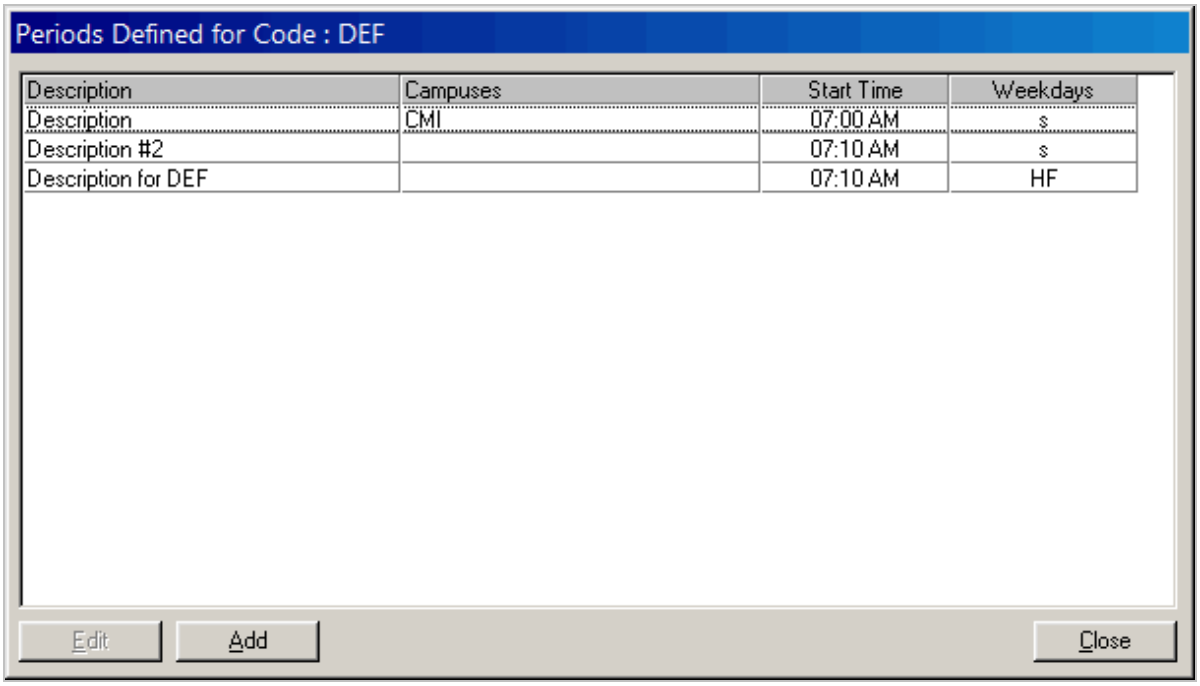


3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Click **Add**, or select a record and click **Edit**. The Period Code Setup form is displayed.



6. Specify a unique **Code**.

   It you enter a duplicate code, the Periods Defined for Code form is displayed listing all duplicate codes and the campuses for which they are defined.



a. To continue adding the new (duplicate) period code, click **Add** and complete the period data entry. The Periods Defined for Code form is displayed.

b. To edit a period on the list, click **Edit** and change the selected period data.

c. Click **Close** to close the form.

7. Enter a **Description**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Select one or more **Campuses**.
10. Select the **Start** and **End** times.
11. Specify the **Duration** in minutes. If a class meets for 50 minutes and there is a ten minute break between classes, the period duration is usually set up as 60 minutes to give the students credit for one hour of class time.
12. Select the **Pattern Type**. The options are Monthly and Weekly.
    - If you select a Monthly pattern type, specify the date and the day on which the monthly class meeting should recur.
    - If you select a Weekly pattern type, specify the day of the week and the number of weeks to after which the weekly class meeting should recur.
13. Specify the number of weeks after the **Start** of the class on which the recurrence meeting pattern is to be applied to generate the class schedule.
14. Select **No End Date** if the recurrence pattern for the class schedule is applicable for the entire term.

    - OR -

Select **End** and select the number of recurrences after which the recurrence pattern for a class schedule should end.

15. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

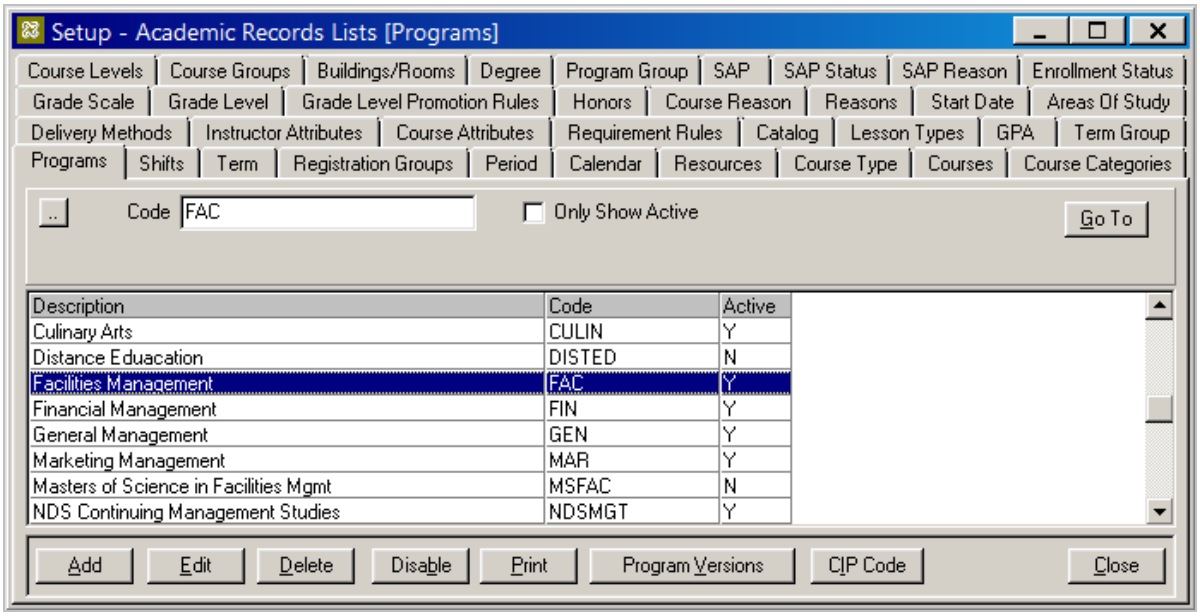
Setup - Academic Records Lists [Programs]

The Setup - Academic Records Lists [Programs] form is used to define attributes for programs. Programs are associated with program versions, entrance tests, documents required from students, and requirement rules. The costs associated with a program are set up under Lists > Student Accounts > Programs after you define the programs .

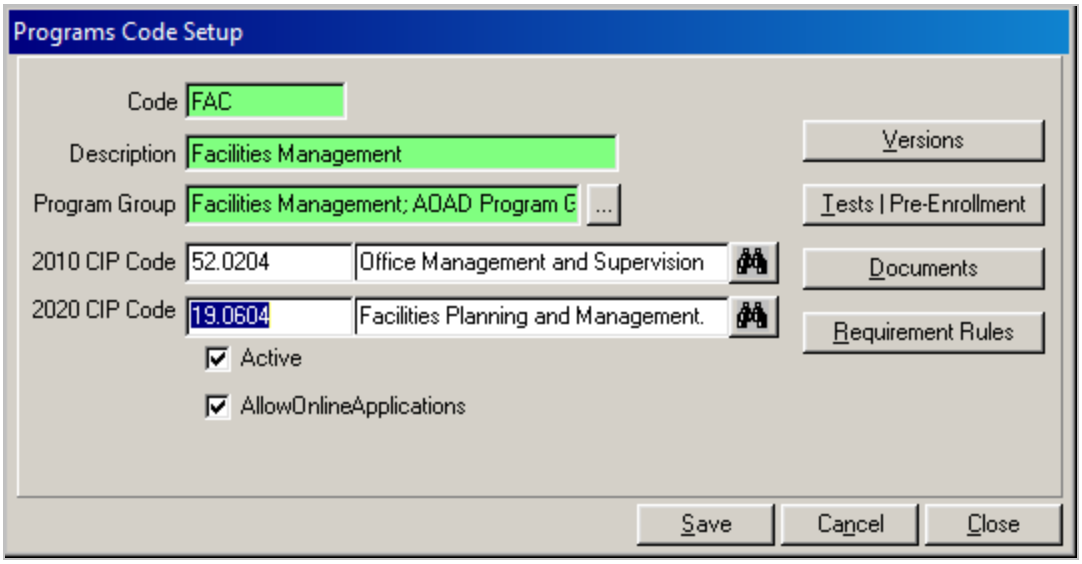
Students enroll in a version of the program. For each program version, you specify parameters such as program groups, credits required, hours required, grade scale, SAP table, campuses, and so on. Furthermore, a course list is assigned to the program version, along with dates for start, midpoint, expected graduation date, and maximum graduation date. More that one program version can be established to meet variable circumstances,

To add or edit a list of program codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Programs**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Programs Code Setup form is displayed.



6. Specify a unique **Code**.

   If you are entering a new program code, click **Save** to record the new code before proceeding to the Versions, Tests | Pre-Enrollment, Documents, or Requirement Rules setup.

   The following message is displayed: *Update program group changes to program versions?*

   Click **Yes** to update and save program group additions to the program and its respective program versions.

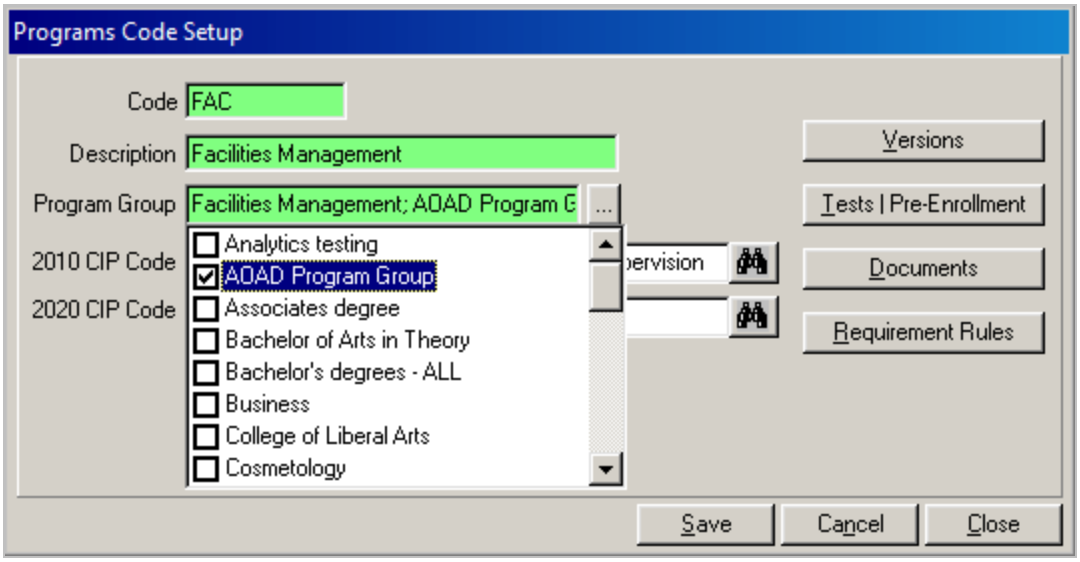
7. Enter a **Description**.

8. Multiple program groups can be associated with a program version. Since the multiple program group association occurs on the program level, program versions belonging to a program are automatically associated with a program group once it is associated with the program.

   By having the ability to group programs and program versions in a variety of methods using the program group, information can be easily extracted through reporting. The system reports Master Student Listing Summary and Lead Master Listing Summary include the selection criteria of program group. This allows the student population to be filtered by the program groups to which their enrollments or leads are associated.

   You can select one or more program groups within a program version and save the multiple selection of program group to the program version; you can remove one or more program groups from each program version.

   Click ... next to the **Program Group** field, select one or more Program Groups, and click **Save**.



The following message is displayed: *Update program group changes to program versions?*

Click **Yes** to update and save the program group selection to the program and its respective program versions. The Program Group field displays the program group associated with the program.

Note: The program groups displayed when you clicked ... are created in Lists > Academic Records > Program Group. Only program groups marked active on the Program Group form are displayed.

You can add program groups or remove (disassociate) one or more program groups from each program version. Additions and modifications are updates on the respective program versions.

To edit the existing association of a program group with a program, clear the check box of one or more program groups associated with the program.

The following message is displayed: *Update program group changes to program versions?*

Click **Yes** to update the disassociation from the respective program versions, or click **No** to update the dis-association from the program only.

Note: When all program groups are removed from the program.The following message is displayed: *Modifications will not be updated to the Program Versions. Do you wish to continue?*

Click **Yes** to apply changes to the program only, or click **No** to undo the changes.

9. Click to search for a **2010 CIP Code** or **2020 CIP Code**. The Search 2010 CIP Code or Search 2020 CIP Code form is displayed.

   See Associate CIP Code with Area of Study or Program.

10. Select or clear the **Active** check box.

    - If you select the Active check box, CampusNexus Student updates the Active flag on the program only, not the program versions.
    - If you clear the Active check box, CampusNexus Student updates all program versions and changes them to inactive.

11. Select **Allow Online Applications** to allow students to submit an online application for the program .

12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.
13. Continue with the setup for:
    - Versions
    - Tests | Pre-Enrollment
    - Documents
    - Requirement Rules

Programs > Program Versions

Program versions are used to distinguish between variations of a program. At least one program version must be defined for each program. The types of variations you might require include changes in the list of core and elective courses required to complete the program. Other variations might be the cost of the program or the length of time required to complete it. Each program version is likely to have different start and end dates.

An initial program version is defined and, as the parameters of the program are changed, such as course list, costs, start and end dates, etc., the changed program is assigned a new version number. Records are kept for each student to retain the program version number and parameters for which the student is enrolled.

Program versions make it possible for your institution to change the parameters of a program for new students without affecting the agreements you have with previously enrolled students. A program version can be marked as inactive when you are no longer accepting students for enrollment. Marking the program version as inactive does not impact any students that are already enrolled in it.

Create and update the program version information and related items (billing methods, revenue methods, and program budget) directly from the Program Version form. Permission to display, create, and update Financial Aid, Student Accounts, and Academic Records is required to use the program version method selections.

Notes:

- You cannot delete a program version if students enrollments are assigned to the program version.
- When two connected enrollments are configured with different enroll status minimums on the program versions, CampusNexus Student uses the program version settings of the default connected enrollment to calculate enrollment statuses on both enrollments.

Real Time Scheduling

Students can view their real time scheduled hours and attended hours for each class that they are currently registered in and have completed so that they know how many hours they have been scheduled for up to today and how many hours they have attended. Institutions can choose a course based on real time scheduled hours or on a student based scheduled hours calculation. The real time scheduling feature can be turned on or off at the system level. If it is turned on, any enrollments that are configured to use real time scheduling have their hours attempted and hours earned updated using the attendance data for any courses that are in a future or scheduled status.

When real time scheduling is enabled, it allows students with different scheduled hours to be enrolled in the same course section. Any course that has posted attendance will show real time scheduled hours and attended hours when real time scheduling is enabled; this includes current courses, LOA courses, and dropped courses. Courses that have no attendance posted and real time scheduling is enabled will show zero scheduled hours and attended hours; this includes future and scheduled status courses. Users can view hours attended and hours scheduled up to the LDA before the final grade is posted on the final grades folder.

CampusNexus Student sets the SAP Milestone date based on the scheduled hours using the projection logic (Attend Hours + Absent Hours) - Makeup Hours up to the LDA, going forward from the LDA date it uses scheduled period hours. The SAP milestone date is updated every time attendance is posted, so that SAP can be evaluated at the appropriate time. CampusNexus Student removes the SAP status for a student when a student's SAP milestone date has been moved to the future. The Attended Hours Basis value 'A' is 'Attendance Totals - Payment Period End Date' and 'M' is 'Attendance Totals - SAP Milestone.'

CampusNexus Student calculates scheduled hours for real time scheduling and percentage complete when executing the refund calculation process. A return to Title IV calculation for clock hour students removes holidays and canceled classes when determining the percentage of the period completed. CampusNexus Student prevents the earning method configuration for revenue to be set to scheduled hours when the student's program version is configured for real time scheduling, as real time scheduling is based on attendance and not scheduled hours.

When a student has multiple enrollments, a course that has been configured under a program version with real time scheduling cannot be reassigned to an enrollment that is not configured with real time scheduling. It can only be reassigned to another program version that uses real time scheduling. The same is also true for transfers. Associated courses follow the enrollment from which they are associated. For example, if the program version under which the courses were taken was a real time scheduled

program version, the courses continue to use the real time scheduling attribute. When a program version is configured for real time scheduling, users cannot configure an excused absence policy.

Users can cancel a class, yet still record attendance for anyone who may have attended prior to the class cancellation, so that every hour earned by a student is recorded in CampusNexus Student. Users can also reduce the scheduled hours for students who attend an event that is relevant to their learning so that students are not penalized for taking advantage of an educational opportunity.

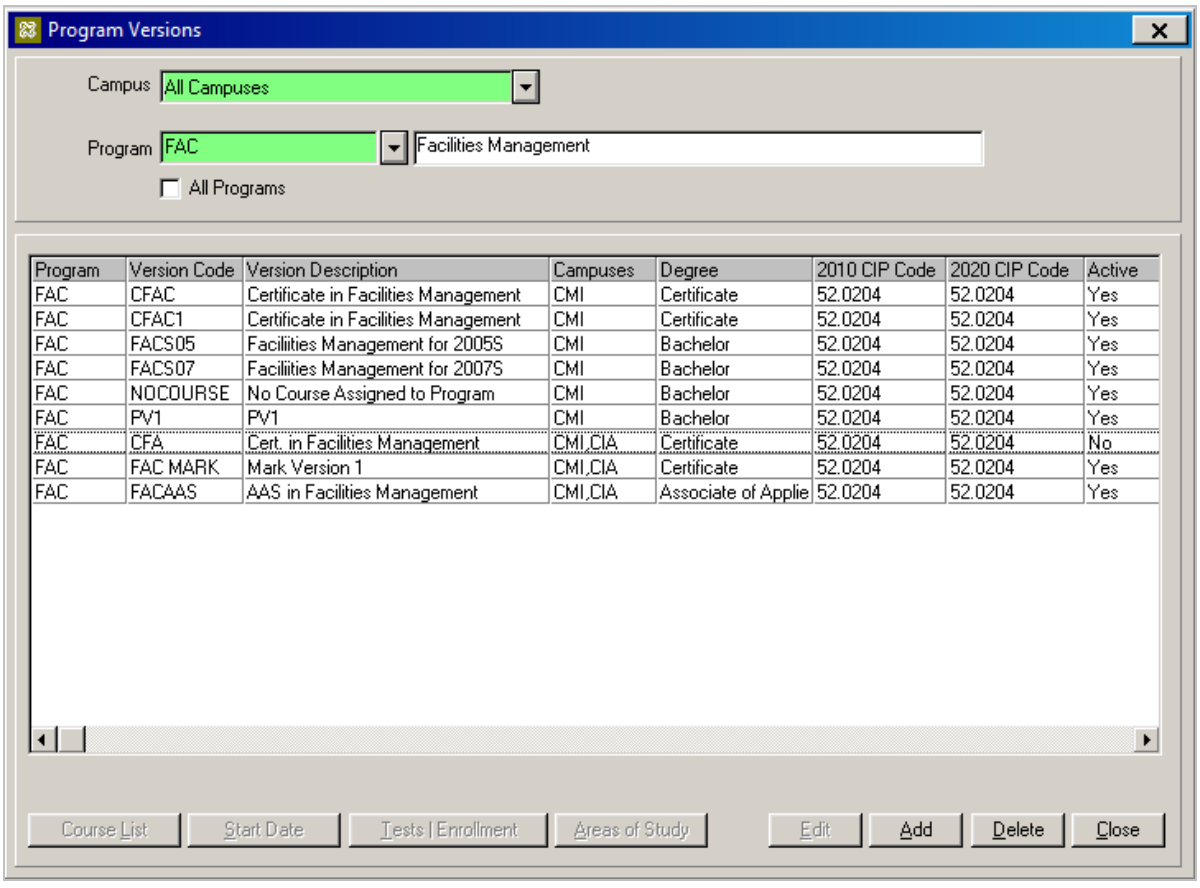
Note: If an attendance record is deleted, the attendance is recalculated, as is the SAP milestone date. Students who have their SAP Milestone date changed are re-evaluated by SAP and an entry in the SAP Audit appears notating that the SAP Evaluation date has changed since the last run of SAP, and it identifies any approved disbursements made prior to the new SAP Evaluation. Any time the status, grade, hours, hours attempted or hours earned fields are modified, CampusNexus Student calculates the actual attendance and updates the adenrollSched record. This action prevents any user from overriding the hours fields with erroneous data. The trigger always calculates the attendance for the hours fields.

Students can view their real time scheduled hours and attended hours on the Degree Progress Audit. When real time scheduling is configured, students can view their real time scheduled hours using the calculation (Attended Hours + Absent Hours) - Makeup Hours up to the Last Day of Attendance (LDA), and they can view their attended hours as of the last date of posted attendance for any course not in a future start or scheduled status.

The Attendance Summary by Program for Clock Hours report calculates real time scheduled hours when a student's program version is enabled for real time scheduling. The Attendance Detail and Attendance Summary reports can also be viewed to obtain information regarding a student's attendance when real time scheduling is enabled. Both reports calculate real time scheduled hours and attended hours. Total Scheduled Hours can be added to the custom user toolbar so that users can have a persistent view of their real time scheduled hours to-date.

To add or edit a program version:

1. On the Programs Code Setup form, click the **Program Versions** button. The Program Versions form is displayed.



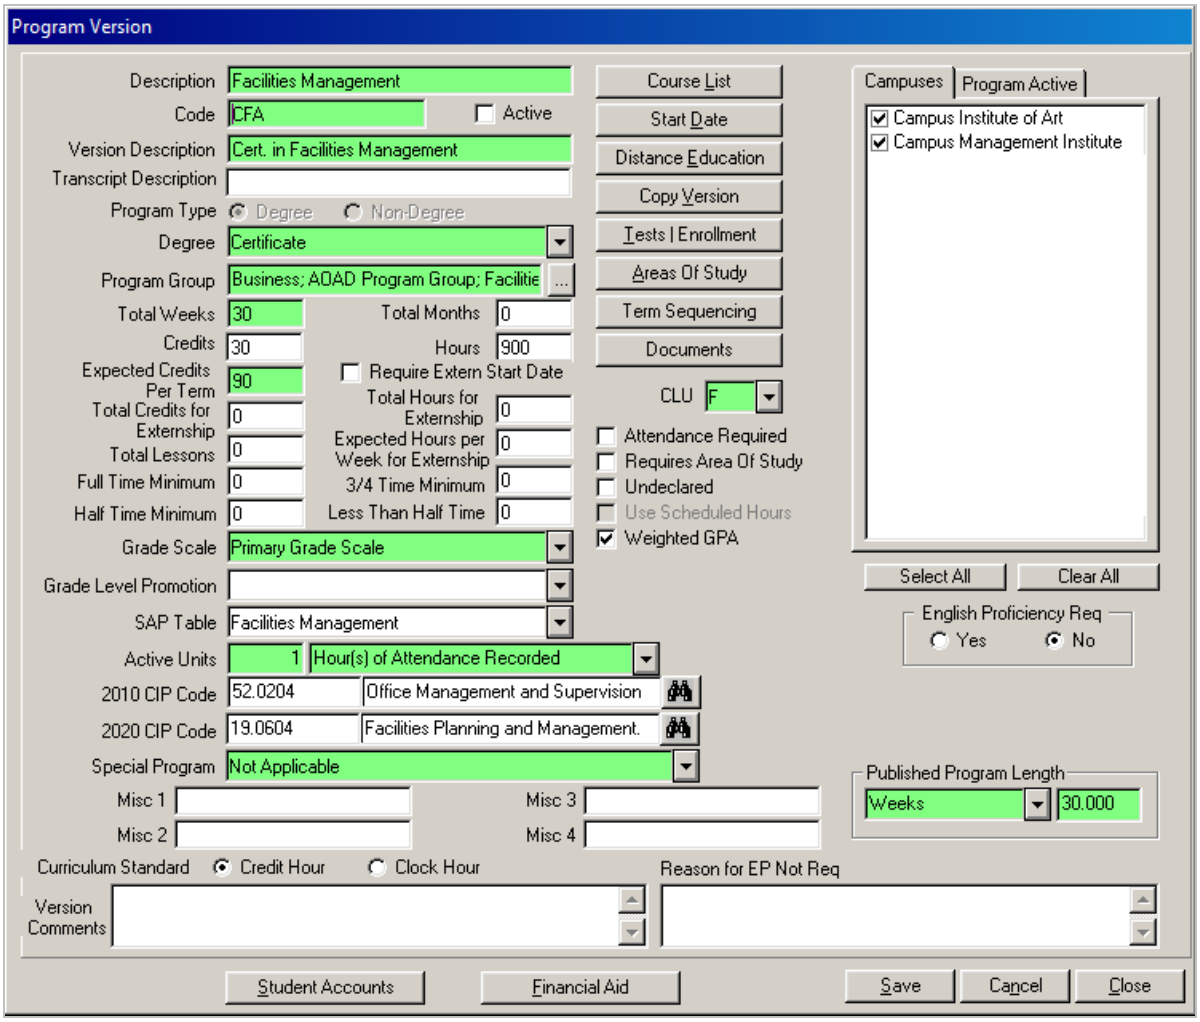
Program	Version Code	Version Description	Campuses	Degree	2010 CIP Code	2020 CIP Code	Active
FAC	CFAC	Certificate in Facilities Management	CMI	Certificate	52.0204	52.0204	Yes
FAC	CFAC1	Certificate in Facilities Management	CMI	Certificate	52.0204	52.0204	Yes
FAC	FACS05	Faciliities Management for 2005S	CMI	Bachelor	52.0204	52.0204	Yes
FAC	FACS07	Faciliities Management for 2007S	CMI	Bachelor	52.0204	52.0204	Yes
FAC	NOCOURSE	No Course Assigned to Program	CMI	Bachelor	52.0204	52.0204	Yes
FAC	PV1	PV1	CMI	Bachelor	52.0204	52.0204	Yes
FAC	CFA	Cert. in Facilities Management	CMI,CIA	Certificate	52.0204	52.0204	No
FAC	FAC MARK	Mark Version 1	CMI,CIA	Certificate	52.0204	52.0204	Yes
FAC	FACAAS	AAS in Facilities Management	CMI,CIA	Associate of Applie	52.0204	52.0204	Yes

2. Select a program from the **Program** drop-down list to view only the versions for the selected program.

   - OR -

   Select the **All Programs** check box to view all versions of all programs.

3. Click **Add**, or select a record and click **Edit**. The Program Version form is displayed.



4. Specify appropriate options. See Field Descriptions.

5. Click Course List to define the list of core and elective courses for the program version.

6. Click Start Date to set up the date parameters for the new program version.

   Note: When adding a program version, the Start Date button is disabled until you save the required information for the new program version.

7. Click Distance Education to set up the Minimum Number of Days Between Lessons and the Maximum Number of Course Extensions.

   Note: When adding a program version, the Distance Education button is disabled until you save the required information for the new program version.

8. Click Copy Version to copy the details of this program version to a new program version.

9. Click Tests | Enrollment to select entrance tests required for this program version.
10. Click Areas of Study to select areas of study for this program version.
11. Click Term Sequencing to define term sequencing.
12. Click Documents to specify any documents required from students enrolled in this program version.
13. Click Student Accounts to select from the following options.
    - **Lists > Billing Methods** - This option displays the Billing Methods Code Setup form.
    - **Lists > Earning Methods** - This option displays the Earning Methods Code Setup form.
    - **Associate Billing/Earning Methods** - This option displays the Program Accounting Parameters form.
14. Click Financial Aid to select from the following options:
    - **Lists > Budgets** - This options displays the Budget Code Setup form.
    - **Associate Budgets** - This option displays the Financial Aid Budgets & Packaging form.
15. Click **Save**.
16. Click **Close** to close the form.

Field Descriptions

Field	Description
Campuses	Select one or more **Campuses**. You are selecting individual campuses, not campus groups. When saving the record, a campus group is dynamically created or updated for the selected campuses. The campus group type is set to 'P' for the new campus group. If you do not have access to a campus in the list, the campus name is enclosed in brackets [ ] and you cannot select or deselect the campus.
Program Active (tab)	This flag controls which program version is available during the application and enrollment processes for the campus. Reports use the Program Active flag to determine whether to display the program versions. Institutions can have program versions that are shared at multiple campuses, and occasionally one of these campuses stops offering one of these versions. When this happens, select in which program version the students may enroll by selecting the applicable campus.
Description	This is the program description that you selected from the list or created on the Program Code Setup form. The program name cannot be edited on this form.
Code	Specify a code that your staff can recognize as representing this program version.
Active	Select or clear the Active check box to designate the record as active or inactive.
Version Description	Specify a description of this program version.
Transcript Description	Specify a description of the program version as is should appear on official and unofficial transcripts for internal or external use. If you do not specify a transcript description, the version description appears on the transcript.

Field	Description
Program Type	Select Degree (default for new program versions) or Non-Degree. Once students are enrolled in a program version, the Program Type options are disabled.
Degree	Select the degree or certificate to be awarded upon completion of this program version.
Program Group	Select one or more program groups to which this program version belongs. Since multiple program group association occurs on the program level, program versions belonging to a program are automatically associated with a program group once it is associated with the program. Program groups are labeled as 'Interest' on the Student Master form. **Note**: The program groups displayed when you click are created on the Setup - Academic Records Lists [Program Group] form. Only the active program groups are displayed.
Total Weeks	Specify the total number of weeks required to complete this program version.
Total Months	Specify the total number of months required to complete this program version.
Credits	Specify the total number of credits required to complete this program version.
Hours	Specify the total number of hours required to complete this program version.
Expected Credits Per Term	Specify the total number of credits the student is expected to complete per term. This value can also be entered for each enrollment in the Progress tab. This value is displayed in the Term Sequencing Enroll Course List form.
Require Extern Start Date	Select this option to include a field for Extern Start Date on several forms where other date information is required. See Start Date and Enroll Student.
Total Credits for Externship	Specify the total credits for any associated externship.
Total Hours for Externship	Specify the total hours for any associated externship. The value must be greater than the 'Expected Hours per Week for Externship'.
Total Lessons	Specify the total number of lessons associated with this program version. This optional field is related to distance education programs and is used in revenue calculations.
Expected Hours per Week for Externship	This field is only used in the graduation date calculation once the student is enrolled in an externship course. The value must be less than the 'Total Hours for Externship'. This value can also be entered for each enrollment in the Progress tab.
Full Time Minimum	Specify the minimum number of credits required for a student to be considered as full time.
3/4 Time Minimum	Specify the minimum number of credits required for a student to be considered as 3/4 time.
Half Time Minimum	Specify the minimum number of credits required for a student to be considered as half time.
Less Than Half Time	Specify the minimum number of credits required for a student to be considered as less than half time.

Field	Description
CLU	Select a Campus License Units (CLU) option: F - Full or H - Half. There are no limitations on full license units. A program version that is set up with half license units is usually for continuing education or distance education that does not require financial aid or degree audits. CampusNexus Student recognizes this lesser requirement and processes data accordingly. If a program version is set up with half license units, the Course List button is disabled.
Grade Scale	Select the grade scale to be used in this program version. When the grade scale for a program version is changed on this form and the Save button is clicked, CampusNexus Student checks for students who are currently enrolled in this program version. If any students are found, the following message is displayed: "*Grade Scale has been changed. There are* `nnn` *students who are Active, Enrolled, or Temporary Out categories in this program version. Do you want to update these students' records with the new grade scale?*" • If you select 'Yes', the enrollment grade scale is updated for each of the enrolled students with the new grade scale specified for the program version. • If you select 'No', the enrolled students continue to have the old grade scale attached to their records. **Note**: A degree seeking student is considered to be currently enrolled if the student's status category is E- Enrolled, A - Active, or T - Temporary Out. For non-degree seeking students, currently enrolled status categories are X - Enrolled and Y - Active.
Grade Level Promotion	Select the grade level promotion rules to be applied to this program version. You can associate grade level promotion rules with a program version independently of the setting to enable automatic grade level promotion for a campus. However, for a student to be automatically promoted based on the criteria defined in the requirements rules associated with a program version, automatic grade level promotion must be enabled for the campus where the student is enrolled .
Attendance Required	Select this option when attendance is mandated by an outside entity.
Requires Area Of Study	Select this option to indicate that students cannot graduate from the program version unless an area of study is declared. If this option is selected, the 'Undeclared' option is disabled.
Undeclared	Select this option to accommodate cases where students begin attending the institution but have not declared a area of study. The 'Undeclared' status serves as a placeholder for incoming students. If this option is selected, the 'Requires Areas of Study' option is disabled.

Field	Description
Use Scheduled Hours	Select this option to configure a clock hour program version to calculate a student's hours using real time scheduling. When a program version is configured for real time scheduling, you cannot configure an Excused Absence Policy. Excused Absence Policies only show program versions that are configured for clock hours. CampusNexus Student prevents users from configuring an Earning Method with a revenue basis of Scheduled Hours when the student's program version is configured for real time scheduling. This feature can only be turned on if no students are enrolled in the program version. Once it is turned on and students are enrolled, it can no longer be turned off. If the 'Use Scheduled Hours' option is not enabled, a tool tip states the reason why it cannot be selected. If real time scheduling is enabled, a weighted GPA cannot be used. **Note**: When this option is selected, the Payment Period Summary form displays the proper amount of time in the 'Hours Att' and 'Hours Sched' fields for students enrolled in clock hours programs. This information matches what is present on the Final Grades form once attendance is posted
Weighted GPA	Select this option if you are using a weighted grade point average to evaluate the student's work in this program version. In clock-hour institutions, CampusNexus Student uses clock-hours instead of credit hours in the weighted GPA calculation. If real time scheduling is enabled, a weighted GPA cannot be used.
SAP Table	Select the SAP table to be used in calculating satisfactory academic progress for this program version.
Active Units	Specify a numeric value in the text box (decimal values are not allowed) and select one of the following options: • Credit(s) have been Registered • Credit(s) Currently Taking • Hour(s) of Attendance Recorded • Lesson Grade(s) Recorded • Day(s) from Term Start Date
2010 CIP Code and 2020 CIP Code	Click to search for a Classification of Instructional Program (CIP) code. The Search CIP Code form is displayed. Select a CIP Code and description to associate with the program version. If a CIP Code was assigned via programs that are associated with the program version, this field is already populated.

Field	Description
Special Program	Select a value in this field to indicate whether the student is enrolled in a Special Program. Valid values are: • B - Bachelors Degree Completion Program • T - Non Credential Teacher Certification Program • N - Not Applicable • P - Preparatory Coursework Graduate Professional Program • U - Preparatory Coursework Undergraduate Program • A - Selective Admission Associated Program This field is displayed for award year 2014-15 and later.
Misc 1 through 4	These are optional fields that your institution can use for extra data collection. They are simple text fields that are not used or reported by the generic version of CampusNexus Student. Your system administrator can change the labels on these fields in the data dictionary under the Setup menu. Crystal Reports can be used to create a custom report to display or print data from these fields.
Curriculum Standard	Select C = Credit Hour or H = Clock Hour. The selected value is stored in the AdProgramVersion.ClockCredit column.
English Proficiency Required	This field accommodates a requirement of the Student and Exchange Visitor Information System (SEVIS) of the Immigration and Naturalization Service (INS). The field is displayed only if your institution accepts international (non-immigrant) students. Select Yes or No.
Reason for EP Not Required	If you select No in the 'English Proficiency Required" field, enter a reason why English language proficiency is not required for the program version. This is a SEVIS requirement.
Published Program Length	Select the measurement value for the program length. The numeric field on the right automatically populates with the total weeks for the existing program version. The drop-down menu can be used to change the program length from Weeks to either Months or Years. The associated numeric total for the new measurement value should then be entered in the numeric field and saved. **Note:** If a user changes the value in the numeric field after the program length is populated and saved, the program length value is not updated, but the user can manually update if needed.

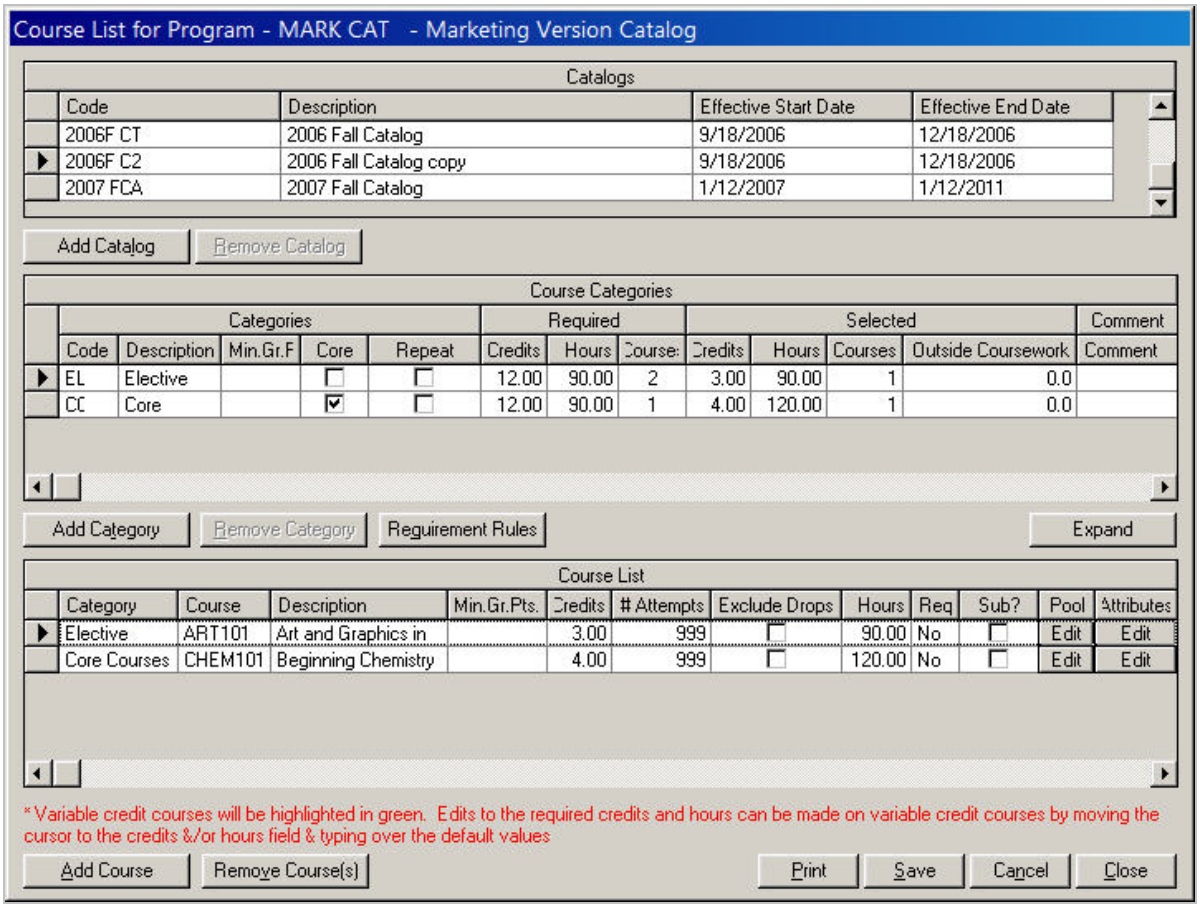
Program Version > Course List

The Course List establishes a list of core and elective courses required for a program version. Catalogs may also be associated with the courses. Courses are selected from a list of available courses for the program version.

Prerequisite: All catalogs, course categories, and courses needed in the program version must be set up.

To add or edit a course list for a program version:

1. On the Program Version form, click the **Course List** button. The Course List for <Program Version> form is displayed.



2. Click **Add Catalog** to associate a catalog with the course list. The catalogs that have been setup for the campus appear in the drop-down list. To set up catalogs, see Enable Catalog and Catalog. Click the **Remove Catalog** button to remove a catalog from the course list.
3. Specify the **Course Categories** for the program version in the middle section of the form.
    a. If the list of Course Categories exceeds the narrow window, click **Expand**.
    b. Click **Add Category** and select the category from the list. After selecting the category, you can edit the description of the category, the required credits, required hours, and required number of courses for the category.
    c. Select **Core** if this category is composed of core courses. The Core box, when enabled, provides a label on

the degree audit for core courses.

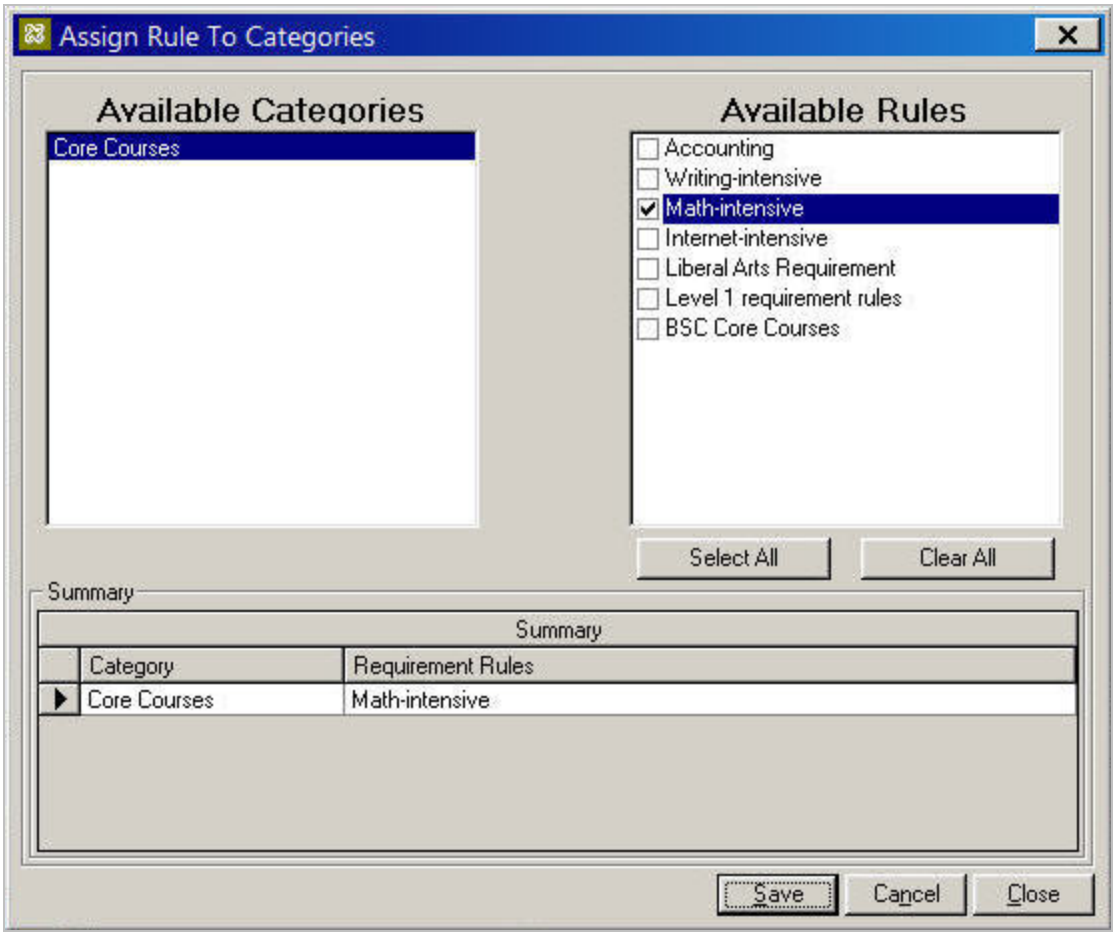
d. Select **Repeat** to flag this category to be added to a student's schedule as future status if dropped.

e. Specify the number of **Required Credits**, **Hours**, and **Courses**. CampusNexus Student fills in the **Selected Credits**, **Hours**, and **Courses** as you select them in the next part of the course list setup.

f. Enter any comments in the **Comment** field.

g. To remove an existing course category, select a category record and click **Remove Category**. When removing a category, if courses are defined for the category, you can remove the related courses or leave the courses on the list. If the courses are left on the list, the category for each course is changed to <unknown>. Each course then needs to be re-assigned to a different category.

h. Click **Requirement Rules**. If you configured Requirement Rules, the available rules are listed in the Assign Rule to Categories form. Select applicable rules.



Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Course List for <Program Version> form.

Note: The Degree Progress Audit enforces the rules on the program version's course list.

- When the audit encounters a rule assigned to only one category, only the courses from that category (including elective pool courses) are considered when evaluating the degree progress.

- When the audit encounters a rule across course categories, it checks all courses in those categories to determine eligibility for satisfying the rule.

4. Build the **Course List** for the program version in the bottom section of the form.

   As you add or remove courses, the cumulative totals (Selected Credits, Selected Hours, and Selected Courses) are incremented or decremented accordingly.

   a. Click the **Add Course** button. The Add Course form is displayed.

   b. Select a **Category**.

   c. Select a **Course**.

      Note: A course code of *ELECT* indicates that it is a "placeholder" for an elective course to be decided later. When selected, you can enter the credits and hours for the elective. On other courses, you cannot edit the credits or hours columns displayed in the Course List grid.

      Student take a certain number of courses from the elective's substitution pool so that the total credits of taken courses is equal to or greater than the elective course's credit value.

   d. The **Credits** and **Hours** are displayed in read-only mode, unless the course is a variable credit course.

      Variable credit courses are highlighted in green and allow edits to the Credits and Hours fields. Use the Courses Code Setup form to configure credits, hours, and whether the course is a variable credit course.

   e. In the **Max Attempts?** field, specify the maximum number of attempts allowed for this course. The default number is entered automatically.

   f. Select **Exclude Drops** if dropped courses should not be counted towards the maximum number of attempts allowed. You can select this check box on the Add Course form or on the Course List grid.

   g. Select **Allow Substitution** if another course can be substituted.

      Note: Course substitution can occur when viewing a student's degree audit. Each course on the degree audit that has not been scheduled or completed can be modified from the degree audit form by clicking on

the course code. The Degree Audit - Course Detail form is displayed. Substitute a different course (if the course setup on the program version course list allows substitution), select the course to be used for an elective or indicate that the student will be awarded transfer credit for the course. When selecting transfer credit, you can select the college where the student received the credit for the course (this is optional) and enter the transfer grade for the course (only grades that are identified as "transfer grade", under Grade Scale, are listed).

When setting up the courses required for a program version, if a course is an elective, set up the list of possible courses allowed for the elective. If a course is flagged as Allow Substitution, set up a list of courses that are allowed as substitutions for the selected course.

Note: If a student fails a substitute course, the original course is recorded as the failed course instead of the substitute course.

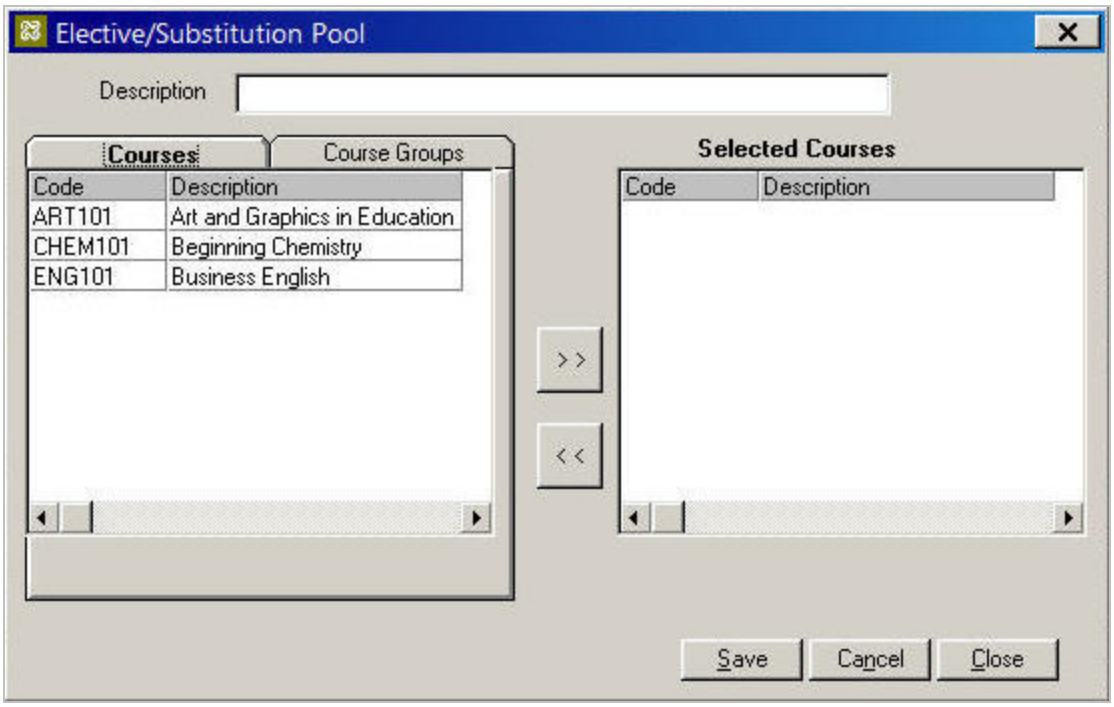
h. Select **Requires Advisement** if the course requires an advisor's intervention.

i. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Course List for <Program Version> form.

5. To set up a pool of elective courses, select the **Sub?** check box at the far right end of the Course List, and click **Save**.

When the 'Sub?' check box is selected, the Edit button in the **Pool** column on the selected row is enabled.

a. Click the **Edit** button. The Elective/Substitution Pool form is displayed. Use this form to set up the list of courses that are allowed for the elective pool. The form lists all active courses that are not dependent courses.



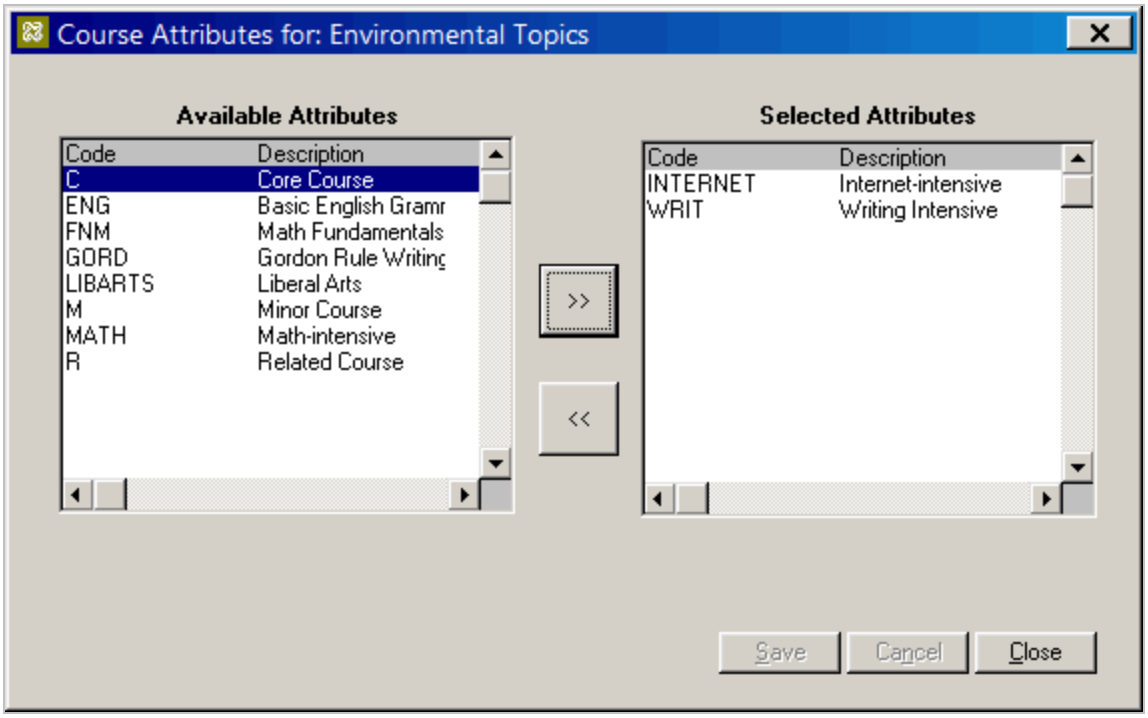
b. Enter a **Description**.

c. Select a course in the **Courses** list (use the **Ctrl** key for multiple selections) and click

>>. The selected courses are moved to the Selected Courses field.

d. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Course List for <Program Version> form.

6. To edit the course attributes, scroll to the **Attribute** column and click the **Edit** button. The 'Course Attributes for:' form is displayed. All attributes associated with the course at the course list level and attributes associated with the same campus and not associated with the course are listed.



a. Select an attribute from the list of **Available Attributes** and click >> move it to the Selected Attributes field. After saving the changes, the selected course attributes are associated with the course on the program version level.

b. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

7. Click **Remove Course(s)** to remove courses from the list. The totals at the top of the form for selected credits, hours, and courses are adjusted accordingly.

8. Click **Save** frequently while building your course list, but especially before you close the form. After saving a course category or a course in the course list, you are no longer able to modify the course category or the course code.

9. Click **Print** at any time to print a report of your program version course list.

10. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: On the Degree Progress Audit form, when selecting the course that the student elects to take, only courses identified as possible electives are displayed. If an elective does not have an elective pool set up, all courses are displayed. This form is displayed when you click on the course code on the Degree Progress Audit form. If the course is in an elective pool, the description of the elective pool is displayed for the course.

Program Version > Start Date

The Start Date Setup form is used to establish the date parameters related to a program version. More than one set of date parameters can be defined for a program version. You can require that students who enroll in a given program version begin the program on a listed start date. See 'Require Start Date' field Academic Records Setup.

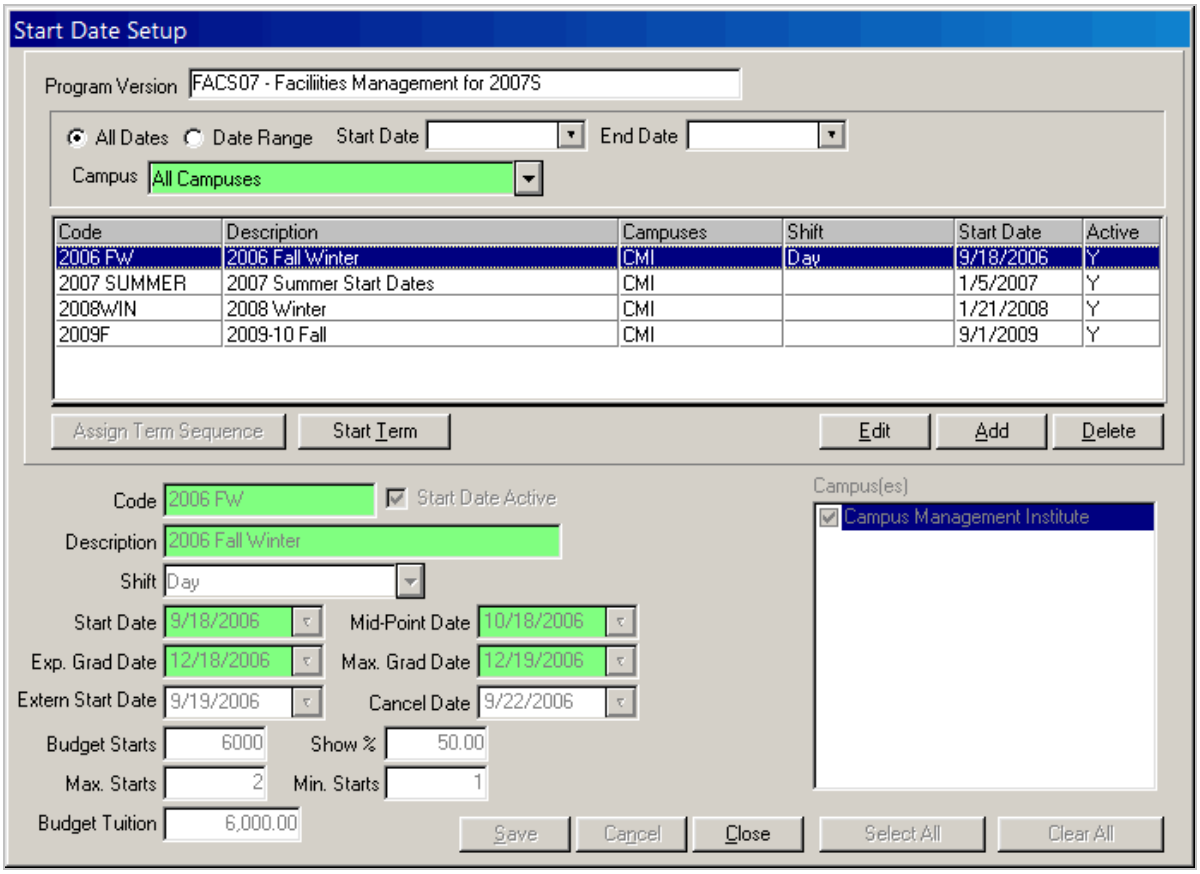
The dates you enter here are used when students are enrolled in the related program version. See the discussion of enrollment procedures for more on the use of these dates.

An additional feature of this form is the enrollment budget. You can enter the minimum number of students required to operate the program, the estimated number of students expected to enroll in the program on this start date, and the maximum number of students that can enroll in the program on this start date.

To add or edit a start date for a program version:

1. On the Program Version form, click the **Start Date** button. The Start Date Setup form is displayed.

   The Program Version field (read-only) displays the program version selected on the Program Version form.



2. Select **All Dates** to view all start dates for the program version.

   - OR -

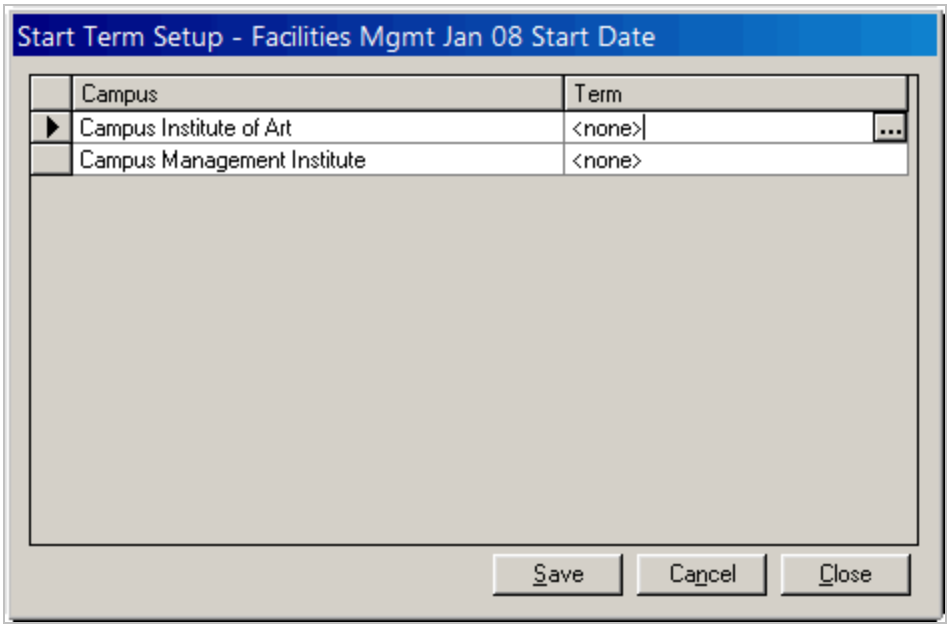
   Select **Date Range** and the applicable **Start Date** and **End Date** to view the dates that fall between the start and end dates selected.

3. From the **Campus** list, select 'All Campuses' or select a specific campus.

4. Click **Add**, or select a record and click **Edit**.

5. Specify a unique **Code**.
6. Select the **Start Date Active** check box to indicate that this start date is available for enrolling students. Clear the check box to deactivate a given set of date parameters when no more students can be enrolled.
7. Enter a **Description**.
8. From the **Shift** list, select the shift, such as day, night, weekend.
9. From the **Start Date** list, select the date on which students begin classes for this program version.
10. From the **Mid-Point Date** list, select the estimated midpoint date for students who enter the program version on the listed start date.
11. From the **Exp. Grad Date** list, select the expected graduation date for students who enter the program version on the start date.
12. From the **Max. Grad Date** list, select the maximum graduation date for students who enter the program version on the start date.
13. From the **Extern Start Date** list select the applicable date if the program version is set up to require an external start date.
14. From the **Cancel Date** list, select a date to stop enrollment for this start date in this program version. The date entered indicates that the program version is no longer offered on this start date. Any students thus far enrolled for this start date must be unenrolled or switched to another start date. This would be the case if you anticipated that you would not make the minimum number of enrollments to support the program version if it were to start on this date.
15. In the **Budget Starts** field, specify the estimated number of starts (enrollments) for this program version on this start date.
16. In the **Show %** field, specify the percentage of the students who said they would start on this date that you expect to actually start. For example, if out of 35 students who signed up to start, you think that all 35 will be in a classroom on this date, specify 100 in the field to represent 100%.
17. In the **Max. Starts** field, specify the maximum number of starts (enrollments) for this program version on this start date. This number indicates the capacity of your institution to accommodate students in this program who wish to start on this date.
18. In the **Min. Starts** field, specify the minimum number of starts (enrollments) required for this program version on this start date. If you do not make this number of enrollments, you may have to enter a cancel date and abort the start of the program version on this date.
19. The **Budget Tuition** number represents the total tuition revenue expected to be earned as result of enrollments for the selected start date. It is used to calculate the Budgeted Tuition on the Starts - Actual vs. Budget report. The default value for Budget Tuition is zero. The default is used if no value is entered.
20. Click the **Assign Term Sequence** button to assign a term sequence to the start date. You can configure only one term sequence per start date, regardless of the number of campuses associated with the start date.

    Note: The Assign Term Sequence button is enabled only if the program version at selected campus is configured to use term sequencing.
21. Click the **Start Term** button to display the Start Term Setup form.



22. In the Start Term Setup form, click the **Term** field for a specific campus and click ....
23. Select a **Term** associated with the campus to apply this start term to the program version start date.

    This start term becomes the first term on the Financial Aid disbursement schedule.
24. Click **Save**. A confirmation message is displayed. Click **OK**.
25. Click **Close** to close the form. You are returned to the Start Date Setup form.
26. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To delete a start date:

1. Select a start date from the Start Date grid and click the **Delete** button.

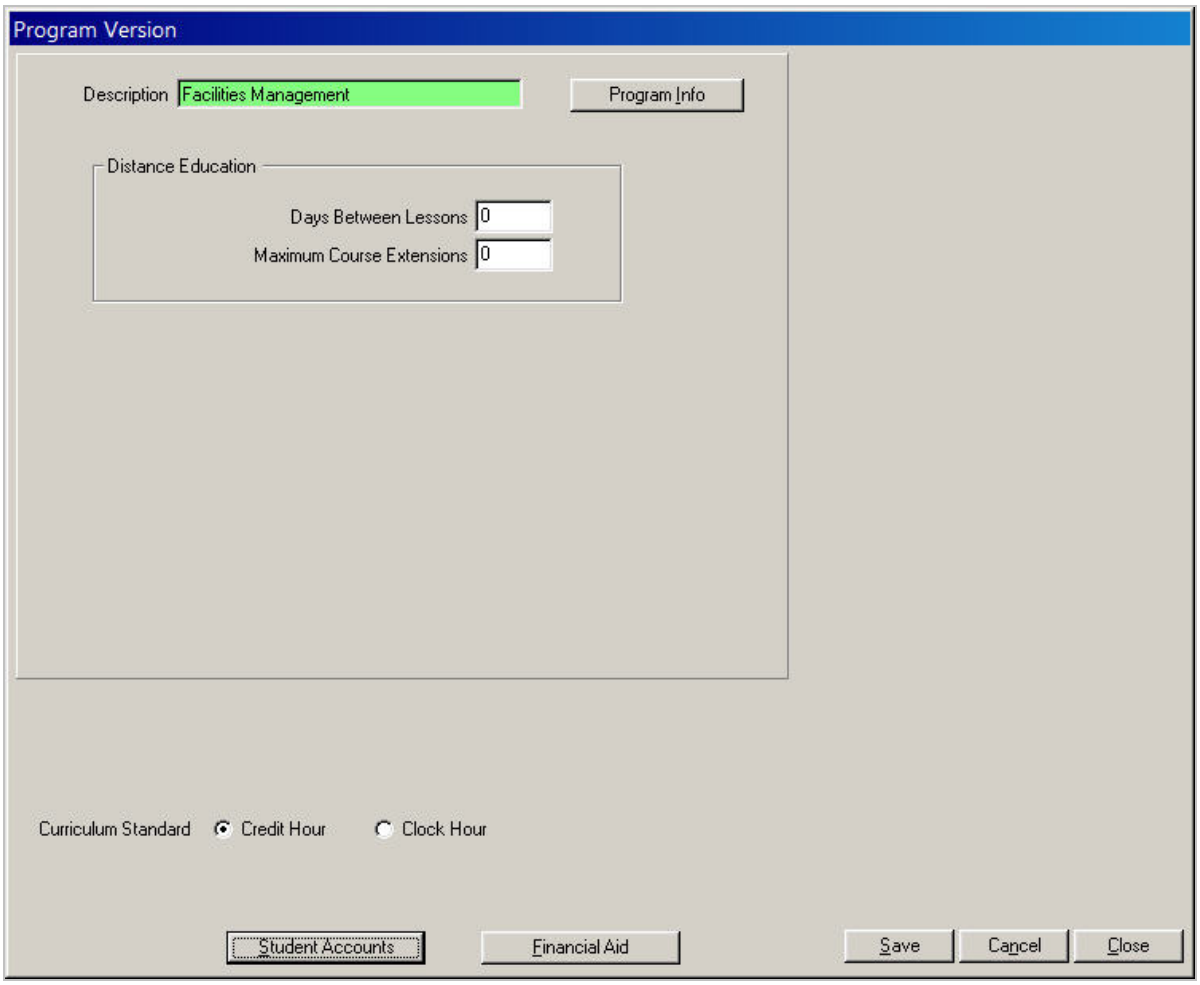
   Note: If students are enrolled in the program version with the selected start date, a message is displayed indicating that the start date cannot be deleted.
2. Click **OK** to return to the previous form.

Program Version > Distance Education

Lesson management in distance education is affected by the values defined for the days between lessons and the maximum course extension. This data is optional for programs that do not record lesson receipts or grant extensions on lesson completions. See also Student Accounts and Financial Aid.

To set the distance education variables:

1. On the Program Version form, click the **Distance Education** button. An extension of the Program Version form is displayed. The Description field (read-only) displays the name of the selected program.



2. Click the **Program Info** button to view the associated program version information. Click Distance Education to return to the previous form.
3. Specify the minimum **Days Between Lessons**.
4. Specify the **Maximum Course Extensions**.
5. Select **Credit Hour** or **Clock Hour** as the Curriculum Standard.
6. If applicable, click the **Student Accounts** and **Financial Aid** buttons for the Program Version > Method Selection.
7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

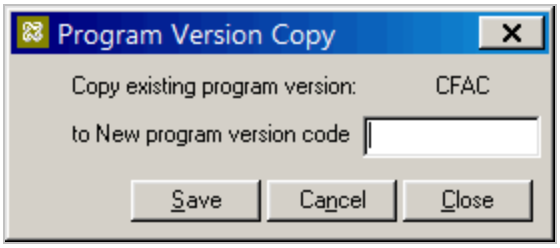
Program Version > Copy Version

You can copy a program version. The copied version is assigned a new program version code. You can edit the attributes of the copied version.

When copying a program version to another version code, a new campus group is created for the new program version code. This allows you to edit the campus list for the new version code without affecting the original program version.

To copy program version:

1. On the Program Version form, click the **Copy Version** button. The Program Version Copy form is displayed.



2. Specify a unique **Code**.
3. Click **Save**. A confirmation message is displayed. Click **Yes**.
4. The program version is copied. A confirmation message is displayed. Click **OK**.
5. To edit the copied program version, navigate to **Lists > Academic Records > Programs**, double-click the program record, and click the **Versions** button. Select the new program version and edit the description and other data as needed.

Program Version > Test | Enrollment

The test list for program versions is used to indicate that certain tests are required of students who enroll in the program version. Previous education can be used to qualify which tests and scores are required. You can select one or more tests from the list of tests and specify a required minimum score for each test.

This form is similar to the pre-enrollment Test List for programs. Differences include:

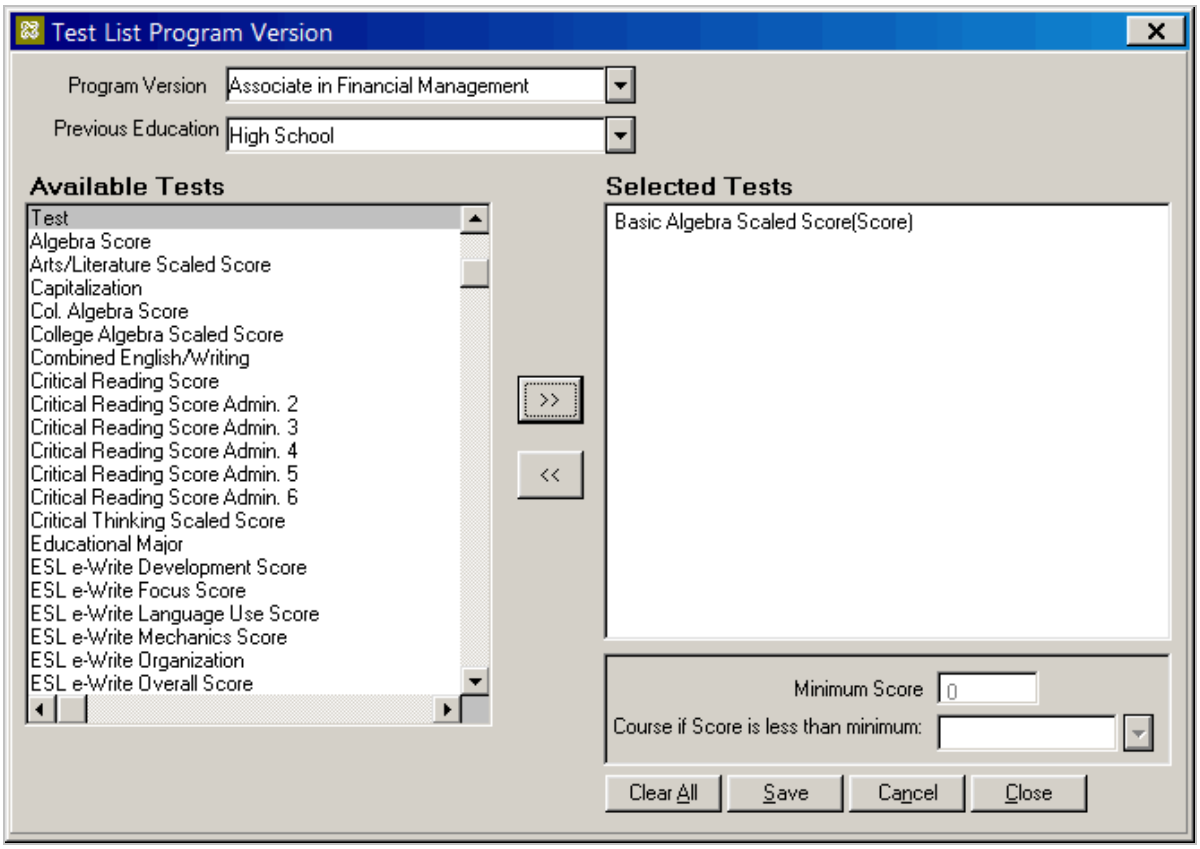
- There is no Campus Group field on this form.
- Program Version replaces Program.
- When updating the selected tests, CampusNexus Student populates the Test By Program Version table.

Prerequisite: The list of available tests must created. See Test Setup.

To add or edit a test list for a program version:

1. On the Program Version form, click the **Test | Enrollment** button. The Test List Program Version form is displayed.

   The Program Version field (read-only) displays the program version selected on the Program Version form.



2. Select a **Previous Education** option.
3. Select a test from the list of **Available Tests** and click >> to move it to the **Selected Tests** field.
4. Specify a numeric value for the acceptable **Minimum Score** for the test.

   Note: The Type of the test selected must be 'Score', otherwise the Minimum Score field is disabled.
5. In the **Course if Score is less than minimum** field, select a course to be assigned to any student who fails to

reach the minimum score on the selected test. The course will be added if the course is not already included in the student's course schedule when the student's score is below the minimum value.

Note: The Type of the test selected must be 'Score', otherwise the Minimum Score field is disabled.

6. Select additional test as needed and specify corresponding test score requirements.
7. To remove a test from the list, select it in the **Selected Tests** box, and click to move it back to Available Tests field.
8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Program Version > Areas of Study

A flag can be added on the program version level to indicate if the program version requires the student to select an area of study to graduate.

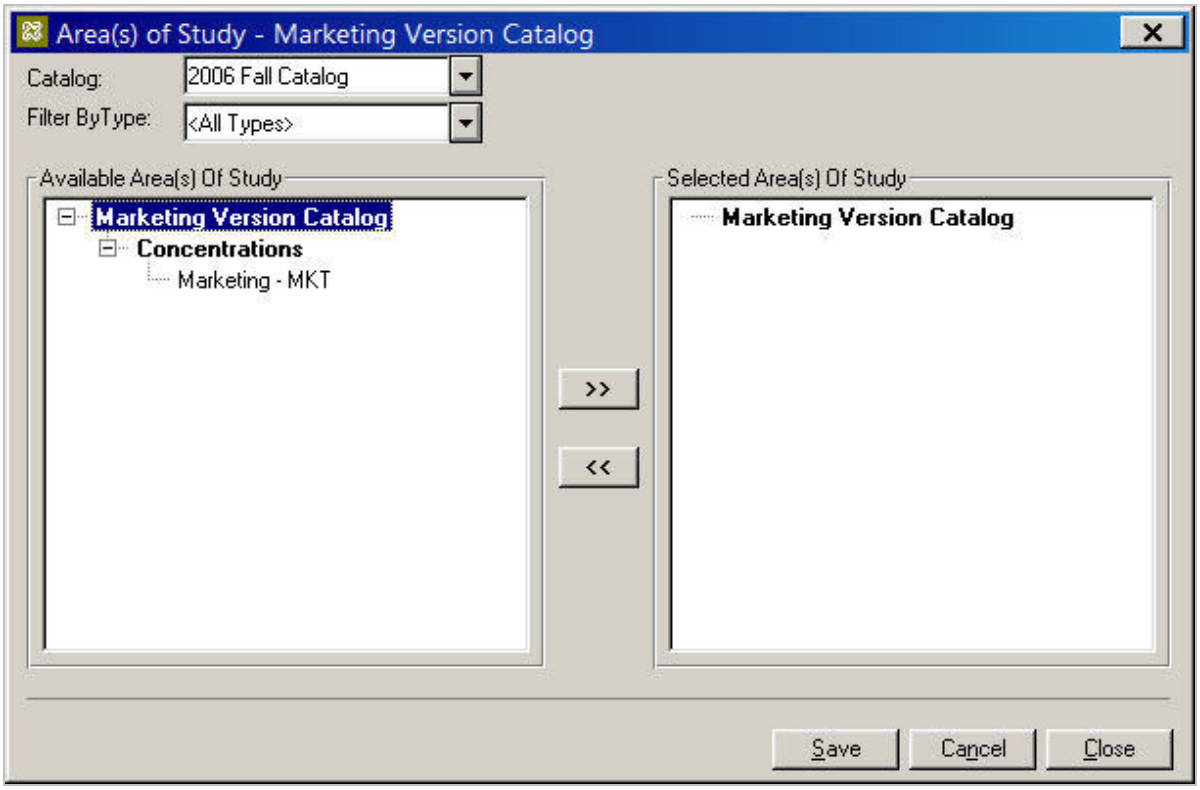
To configure a program version to require an area of study:

1. On the Program Version form, select the **Requires Area of Study** check box to if students need to declare an area of study to graduate from the selected program version.
2. Click **Save**.

To associate an area of study with a program version:

Students can select multiple majors, minors, and concentrations for their degrees. This configuration allows you to create a filter for which majors, minors, and concentrations can be associated with a student enrollment.

1. On the Program Version form, click the **Areas of Study** button. The Area(s) of Study form for the selected Program Version is displayed.



2. Select the **Catalog** associated with the program.
3. Use the **Filter by Type** field to configure areas of study allowed for students enrolled in the program version. Select components for the area of study.

   The form displays the filtered areas of study in a tree structure. If the component is of Type 'Major' and has concentrations attached, CampusNexus Student adds the concentrations to the tree automatically. In the tree view, the root is the student program version/degree; the branches are the areas of study.
4. Select the **Available Area(s) Of Study** to be associated with the program version and click

to move your selection to the Selected Area(s) Of Study field.

5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Program Version form.

To enroll a student into a program version:

At the time of enrollment a student may have selected a Major. If so, the Enrollment Wizard allows you to select the Area of Study to associate with the student's program version.

To transfer a student from an undeclared program to a declared program:

A student enrolled in a program version that is 'Undeclared' cannot graduate until being moved to a program version that is 'Declared'.

Navigate to the Enrollment form. See Transfer Enrollment for step-by-step instructions on completing the Transfer Enrollment Wizard. After the Transfer Process is completed, CampusNexus Student updates the Undeclared Program with the Declared Program.

Note: No new enrollment record is created.

Program Version > Term Sequencing

Sequencing a program allows an institution to organize a program version's courses and academic terms using a grid format to layout a suggested or required course order for students. When a student is enrolled, CampusNexus Student calculates the course sequence based on the program version course list configuration. You can edit the calculated course sequence for each enrollment if necessary.

You can specify the term sequence for each start date attached to a program version and specify the number of terms in an academic year. This data is used to calculate the academic year start and end dates for each academic year record created for a student at time of enrollment. Additionally, you can define the number of terms worth of courses to display for each program version during online registration.

You can set up the term sequence at the Program Version level and at the Program Version Start Date level.

a. The first level of sequence setup runs on the program version level, which allows the institution to set up a general course sequence within a specified number of placeholder terms. This course and generic term sequence (template) can be copied to the start date level where specific academic terms are selected. Term sequences and their courses can also be copied to other program versions and their start dates. The term sequence does not need to contain any or all courses for the program version.

b. The second level of sequence setup runs on the program version's start date level. The Program Version Sequence Template can be copied to the start date's sequence, allowing the generic placeholder terms to be converted to academic terms, while retaining the course selections made at the program version level. You can select the start term from a list of academic terms whose start dates are a configurable number of days prior to or after the program version start date.

Expected credits per term are defined for each sequence and are copied when a sequence is copied to a program version or to a start date. The total number of credits required to complete the program version can be viewed during term sequence setup, but they are not copied when the sequence is copied; this information is pulled from the program version configuration.

Once the academic term is defined, all subsequent terms are populated by campus based on total credits and expected credits per term. CampusNexus Student populates the placeholder terms with real academic terms that you can then modify.

The Term Sequencing Template displays the courses defined in the Program Version's Course List at the top of the pane. For each course, the Category, Course Code, Course Description, Credits, Hours, and Max # of Repeats are displayed.

Note: For variable credit courses, the Credit and Hours fields are populated from the program version course list instead of the Course Code Setup.

These courses can be dragged from the program version course list onto the grid area with the program version or start date level of sequencing. The Term Sequencing Template also contains placeholders for student electives, allowing all terms for the program version to be created and populated with credits even before the course name is known.

Institution can define the number of future courses (within the sequence) that are displayed to the student during online registration. They can also prevent registering students from deviating from the course and term order by selecting the 'Lock Courses in Horizontal/Vertical Track' check box. Additionally, institutions can enforce 'track' rules across terms on the sequence, so that a sequence has an order of terms and courses, with a track order to its courses.

- If students place out of one course (due to credits transferred or tests passed) in the track and therefore have a free slot in their term, they are required to take a specific course in the next term that is part of that same track.
- If they place out of two consecutive terms' worth of courses in a track, they have to take a track course in the second term from now rather than the next term from now.

Based on the assumption that one course per track is required per academic term, these tracks do not automatically override the prerequisite criteria set on a course.

When a student is enrolled (in a program version and start date), a copy of the program version's start date term sequence is copied to the student level for the student to handle any deviation from the default term sequence during course registrations. Changes made to the start date term sequence after this point have no effect on the student's term sequence.

CampusNexus Student can recalculate the student's term sequence at any point. If the student is registered into a locked vertical term sequence and the student registers for more or less credits than the 'Expected Credits per Term' configured on the program version, the following events trigger a recalculation of the student's term sequence:

- Student re-enters the program.
- Student's transfer credits are posted. CampusNexus Student removes credits required from the end of the program. Track rules, if selected by the institution, are enforced.
- Student tests out of a course.
- Student transfers into a program.
- Student registers for classes.

When any of the above conditions are met, CampusNexus Student recalculates the student's sequence of terms to reflect the new event, such as the re-entry date, etc. Viewing the student's term sequence from the student schedule will verify the recalculation.

If a student is not registered into a locked vertical term sequence and the student registers for more or less credits than the Expected Credits per Term configured on the program version, CampusNexus Student recalculates the term sequence and adds or subtracts terms at the end of the program if necessary. CampusNexus Student assume that all subsequent terms will contain at least the Expected Credits per Term as defined on the program version. Again, viewing the student's term sequence from the student schedule will verify the recalculation.

The Locked Term Sequence report (Reports > Academic Records > Locked Term Sequence Courses) can be generated to help the institution with scheduling by displaying which courses are expected in the next 'n' number of terms for a specific program version, provided that they have a locked courses sequence configured on the term sequence. The sequence will also recognize the same logic that is used by degree audits for repeats and course history.

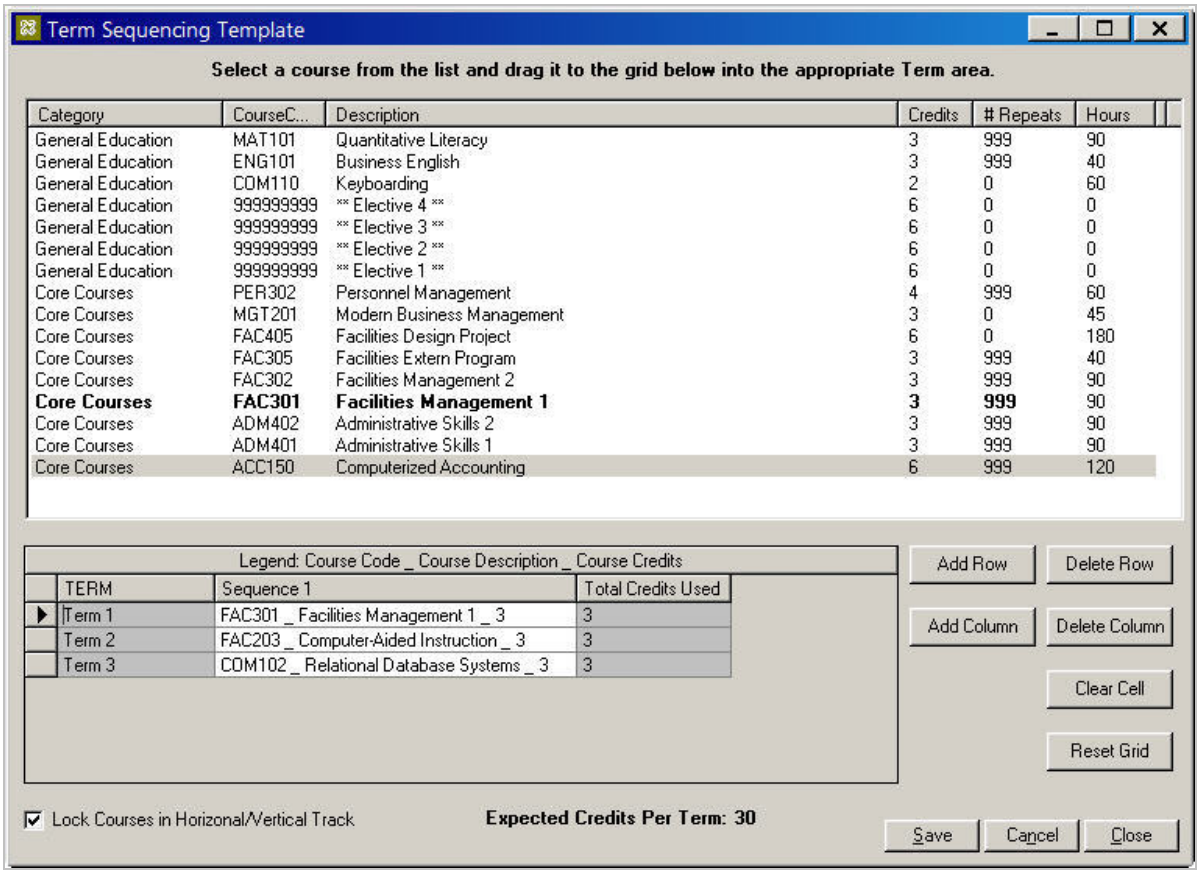
The following tasks are associated with term sequencing:

- Configure expected credits per term
- Assign a term sequence
- Create a term sequence
- Replace generic term placeholders with actual terms
- View a student's term sequence

To configure expected credits per term for a program version:

For term sequencing to work properly, you must define the expected credits or courses per term for a program version. CampusNexus Student calculates of the number of terms a student will be enrolled in based in this information.

1. On the Program Version form, specify the number of **Expected Credits per Term**.
2. Click **Save**.
3. Click the **Term Sequencing** button. The Term Sequencing Template is displayed. Notice that the bottom of the template displays the Expected Credits Per Term value entered on the Program Version form.



The Term Sequencing Template contains the placeholder term sequence for a program version. This sequence of terms does not contain school-defined terms but contains placeholder terms that represent the number of terms that a typical student enrolled in that program version uses to complete the program.

Term Sequences Not Associated With Courses or Parts of a Term

You can set up term sequences for programs without associating them with courses or parts of term. If you choose this option, the following applies:

- You can define program version term sequences without associating courses with a term.
- You can associate term sequences with program version start dates without courses.
- If Term Relationships are used, you can associate parent terms with term sequences associated with a program version start date.
- If term relationships are not used, all terms may be associated with a program version start date. CampusNexus Student displays all active academic terms when allowing users to select terms. In addition, all terms that are active and have the 'Registration/Attendance' usage selected may be associated with a program version start date if term relationships are not used.
- When a term sequence is associated with an enrollment record, the term sequence is evaluated first when determining the correct parent term to associate with a child term that is initially registered into for institutions where term relationships are configured. If a parent term for the child term registered into cannot be derived using the term sequence associated with the enrollment, existing logic for selecting the correct parent is executed.

Note: The parent term may be explicitly selected as part of the registration process in Portal and CampusNexus Student.

- The Rebuild Term Relationships option is modified to incorporate term sequences. When determining a parent for a child term, the configured term sequence for the enrollment record is evaluated first.
- When using Term Registration, if a student has term sequencing configured for the enrollment, the student should not be able to be registered into a Parent Term that is not included in the student's configured term sequence.
- When using Batch Registration, if a student has term sequencing configured for the enrollment, the student should not be able to be registered in to a parent term that is not included in the student's configured term sequence. Subsequently, an entry is made on the Batch Registration Exception report indicating that the student could not be registered.

Things you should know

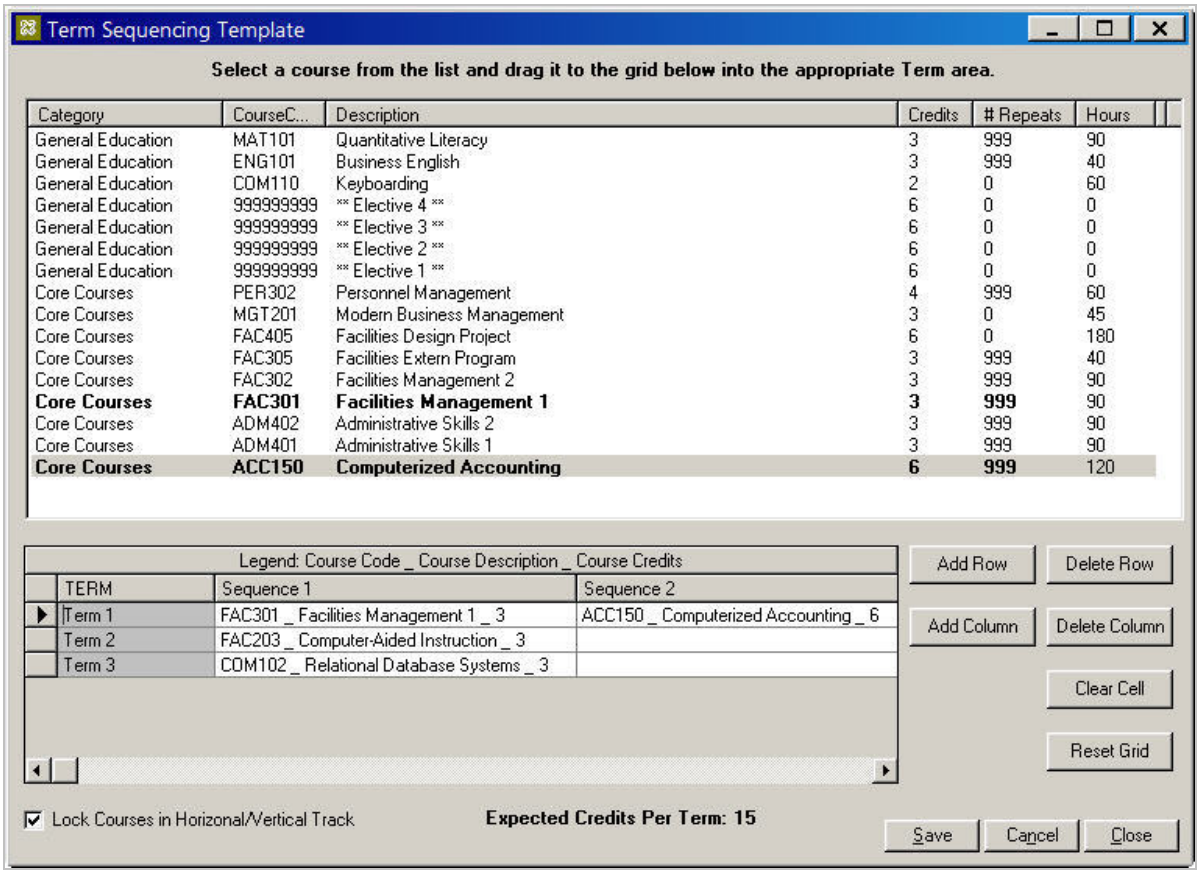
- Term sequences are not enforced within internal registration.
- If an institution uses term relationships, Financial Aid, Student Accounts, or Reporting terms are defined as parent terms, while Academic terms are defined as child terms. All child terms must have start and end dates falling within their parent terms.
- If an institution uses term relationships, the forms display only the parent terms.
- If an institution is not using term relationships, the forms display only the child terms.

To create a term sequence that is not associated with a course:

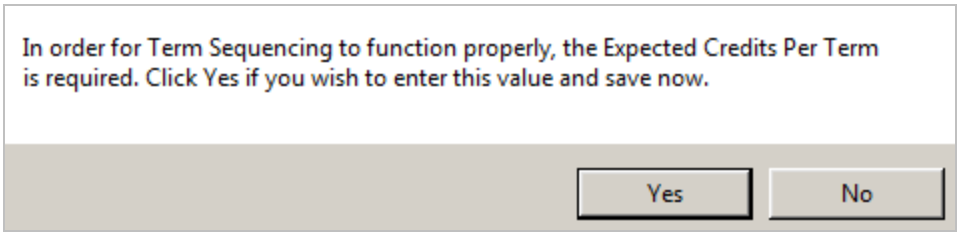
A program version is configured as follows on the Program Version form:

- 90 Credits
- 15 Expected Credits Per Term

The term sequence form presents the number of terms needed to meet the 90 credits and 15 expected credits per term. Once you have recorded the term sequence for the program, set up Start Dates for the program version.



You must enter both values before entering the Term Sequence Template form, otherwise CampusNexus Student displays the following error message.



Click the **Save** button to record the term sequence for the program.

To create a term sequence from the program version setup:

1. On the Program Version form, click the **Term Sequencing** button. The Term Sequencing Template form is displayed. The top pane displays all the courses in the program version's Course List.
2. Select a course in the top pane and drag it onto an empty cell in the term sequence grid. After the course has been added to the grid, it becomes bold in the top pane.

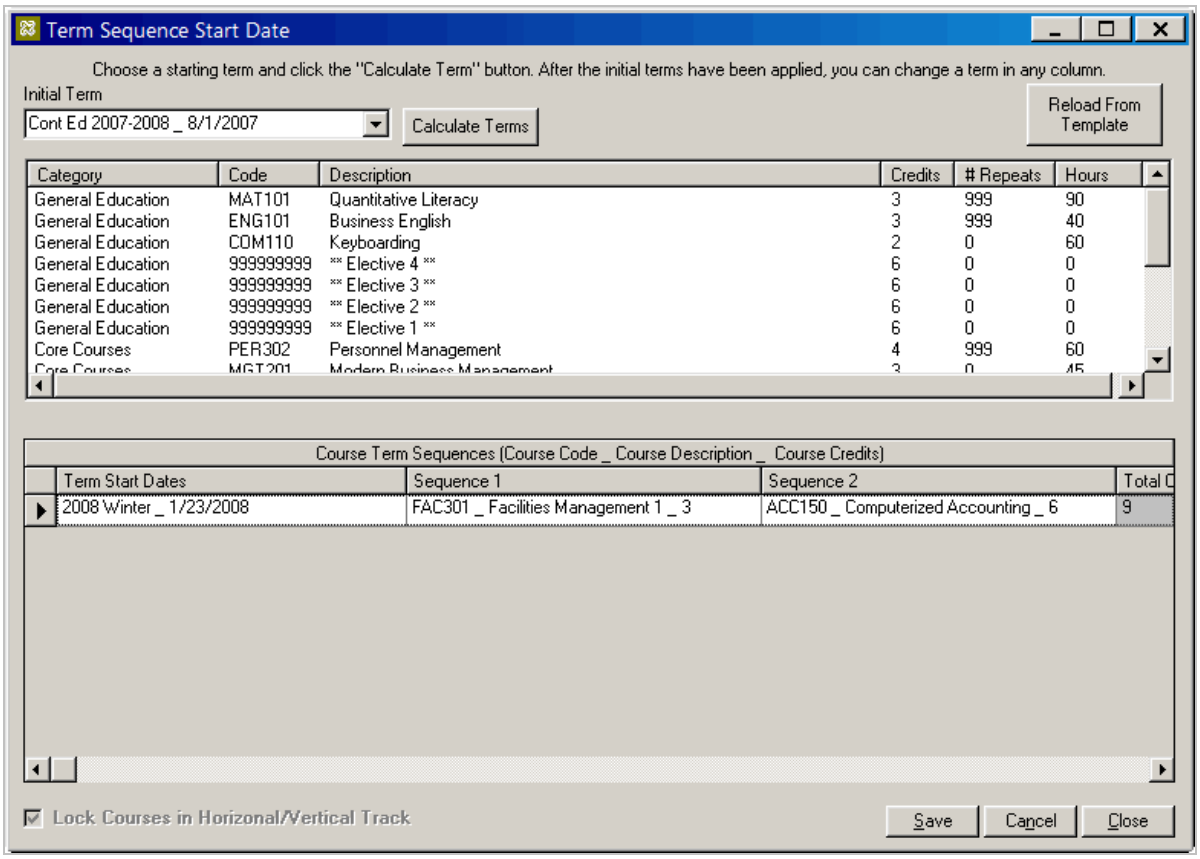
   When an elective course contains a credit value greater than the credit value of a term sequence cell, it can be moved to the grid. The elective course is still displayed in the top pane, but its credit value is debited the amount of one cell in the term sequence grid. This elective course remains in the top pane until all of its credits are debited.
3. Click **Add Row** to add a new Term row in the grid. Each row shows a running total of Credits added to the row. The

bottom of the form shows the number of Expected Credits Per Term as defined on the program version setup.

4. Click **Add Column** to add a new Sequence column in the grid.
5. Select and drag a course from the Term Sequence grid to the Course pane. Notice that the course disappears from the grid and appears in the Course pane.
6. Click **Delete Row** to delete a Term row in the grid. You must **Save** or **Cancel** any pending changes before attempting to delete a row or column.
7. Click **Delete Column** to delete a Sequence column in the grid. You must **Save** or **Cancel** any pending changes before to attempting to delete a row or column.
8. Click **Clear Cell** remove the contents of a cell in the grid. If a course populates the cell, it returns to the Course pane.
9. Click **Reset Grid** to clear the grid.
10. Click **Save** to save the Term Sequence created to the program version. The Term Sequence does not need to contain any courses or all courses for the program version.

To replace generic term placeholders in the term sequence with actual terms:

1. On the Program Version form, click the **Start Date** button. The Start Date Setup form is displayed.
2. Select a term and click **Assign Term Sequence**. The Term Sequence Start Date form is displayed. If no term sequence information was saved for the start date, the Term Sequence Start Date form is populated with the information present in the program version's term sequence.



3. Select a Term for the first row of the grid from a list of Active Terms for the campuses for the Program Version's Start Date. Only terms that are associated with all campuses for the program version are displayed.
4. Click **Calculate Terms** after the initial Term is selected. CampusNexus Student populates subsequent row headers with successive actual terms that do not overlap. The term sequence is populated with actual institution-defined terms along the vertical axis of the grid.

   CampusNexus Student always uses the first assigned term to calculate the population of subsequent rows. You can select alternate terms for any row header. Any subsequent terms are recalculated to not overlap or precede a previous term in the sequence.
5. Select **Lock Courses in Horizontal/Vertical Track** to set up vertical tracks for the Term Sequence.

   The Term Sequence has an order of terms and courses, but it also has a track order to its courses. If 'Lock Courses in Horizontal/Vertical Track' is selected, the following conditions apply if students place out of a course:

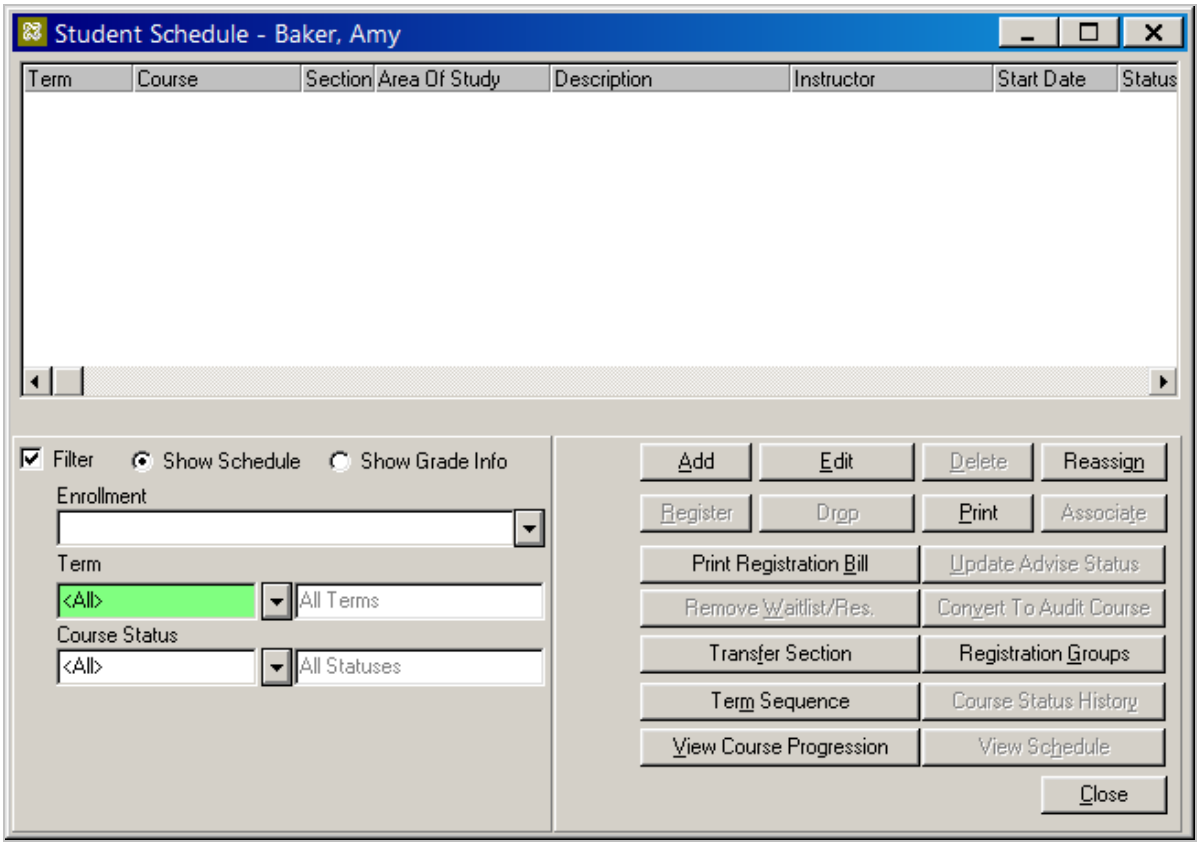
   - If students place out of one course (due to credits transferred or tests passed) in the track and therefore have a free slot in their term, they will have to take a specific course in the next term that is part of that same track.
   - If students place out of two consecutive terms' worth of courses in a track, they will have to take a track course in the second term from now rather than the next term from now.

   Based on the assumption that one course per track is required per academic term, these tracks will not automatically override the prerequisite criteria set on a course.
6. Click **Save**.

Note: When a student enrolls into a Program Version and is assigned a Start Date that has been configured with a Term Sequence, a copy of the Program Version's Start Date Term Sequence is copied to the student level. Changes made to the Start Date Term Sequence after this point will have no effect on the student's Term Sequence.

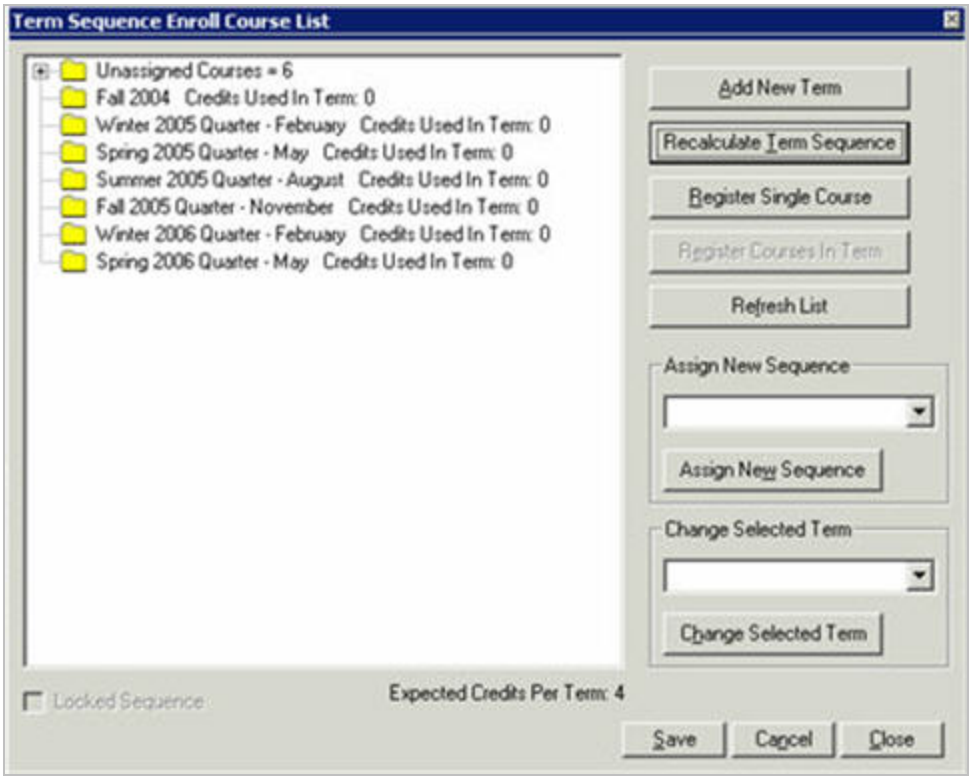
To view a student's term sequence:

1. Select your student and navigate to the student's schedule (**View** > **Academic Records** > **Schedule**). The student's schedule is displayed.



2. Click **Term Sequence**. The Term Sequence specific to the student is displayed. The grid is populated with the courses that the student has taken in the term. Information on the number of credits associated with each course in a term is gathered from the student's schedule.

   Note: The Term Sequence button is disabled if the student is enrolled in a program version that has no term sequence.



Courses are sorted in the order they appear on the student's Term Sequence beginning with the next available courses at the top. Courses can be moved on the grid if the student has not registered for them.

- **Add New Term** - Adds a term to the end of the current displayed sequence.
- **Recalculate Term Sequence** - Determines the total credits needed, credit completed, and adds terms to the sequence that are needed to complete the total credits.
- **Register Single Courses** - Initiates registration for a selected course; and class section can be chosen according to the offering for the Term Sequence.
    - If term relationships are not configured, the term drop-down list in the registration form default to the term highlighted.
    - If term relationships are configured, the parent term in the registration form defaults to the term highlighted. You can then select a child term. The Child Term list is filtered based on the parent term.
- **Register Courses in a Term** - Initiate registration for each course associated with the selected term and allows selection of the class section offered for the term sequence. This button is disabled if term relationships are configured.

  Notes:
    - If prerequisites or corequisites are required for the course being registered and they are not met, a failure message appears. Users who have override permission can override the prerequisite/corequisite rules.
    - If student registration lock configuration is enabled, while registering a student through term

sequencing using the Register Single Course button, upon clicking **Finish**, the Registration Locks are evaluated.

- **Refresh list** - Refreshes the list and shows all status changes that have occurred for each sequence
- **Assign New Sequence** - Assign a new term sequence to a selected sequence.
    - If a course has been completed or scheduled, it stays with its previously defined sequence.
    - If a course is not in the new sequence and it is in Future status, the course is reassigned to the unassigned list.
    - If a course is in the new sequence, but contained in the old sequence, it is reassigned to the appropriate term in the new sequence.
    - New courses defined in the new assigned sequence are assigned to the proper term, and if in unassigned state, are moved to the newly assigned sequence's proper sequential term.
- **Change Selected Term**

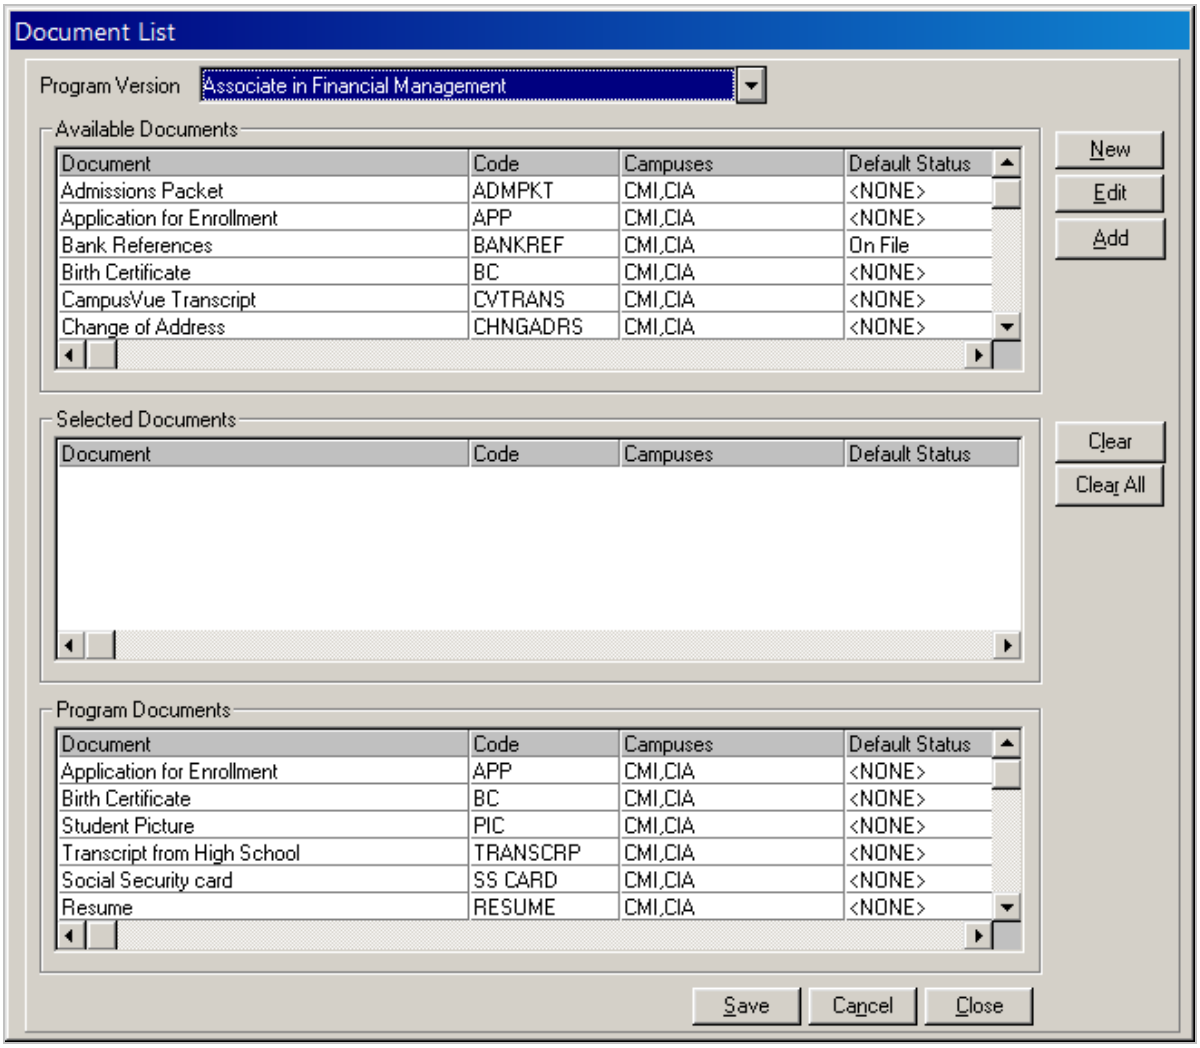
Program Version > Documents

Use the Document List form to assign one or more student documents as required for enrollment in a given program version.

Note: Documents available for selection must be configured before being displayed on the Document List form. Users with appropriate permissions (Lists > Contact Manager > Documents) can add documents and edit documents directly from the Document List form (including Campuses and Default Status). For more information, see Setup - Contact Manager Lists [Documents].

To add a document list to a program version:

1. On the Program Version form, click the **Documents** button. The Document List form is displayed.



2. From the **Program Version** list, select a program version that is part of the program.
3. Select a document in the **Available Documents** list and click **Add** to move the document to the Selected Documents field. Once documents are selected for the program version, the documents are tracked for a student who is enrolled in the program version and belongs to one of the campuses for which the document is set up (Campuses column).
4. Select a document in the **Selected Documents** list and click **Clear** to move a document back to the Available

Documents list. Click **Clear All** to remove all documents from the Selected Documents field.

5. Documents that were defined on the program level (Lists > Academic Records > Programs > Documents) are displayed in the **Program Documents** list. Compare the documents assigned to the program with the assignments for the program version to make sure there is no duplication.
6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Program Version > Method Selection

Method selections for program versions are related to Student Accounts and Financial Aid. You can select billing methods, earning methods, and budgets directly from the Program Version form. Permissions to display, create, and update Academic Records, Financial Aid, and Student Accounts are required to use this feature.

The Student Accounts button on the Program Version form provides the following options:

- Lists > Billing Methods
- Lists > Earning Methods
- Associate Billing/Earning Methods

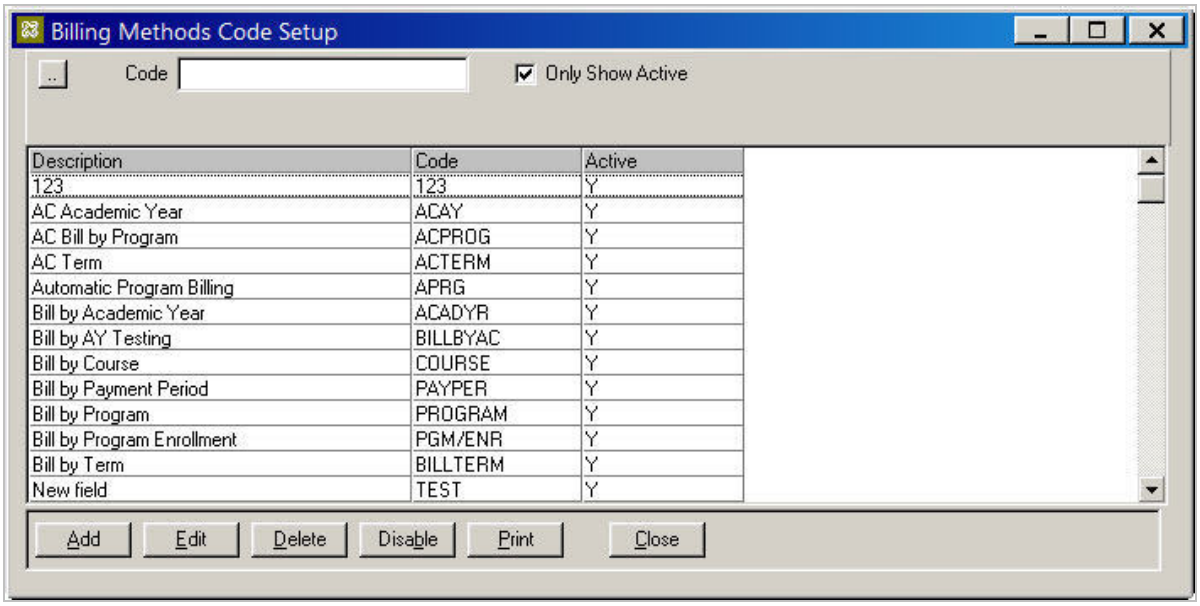
The Financial Aid button on the Program Version form provides the following options:

- Lists > Budgets
- Associate Budgets

Method Selection for Student Accounts

To set up a billing method for a program version:

1. On the Program Version form, click **Student Accounts**, and select **Lists > Billing Methods**. The Billing Methods Code Setup form is displayed.

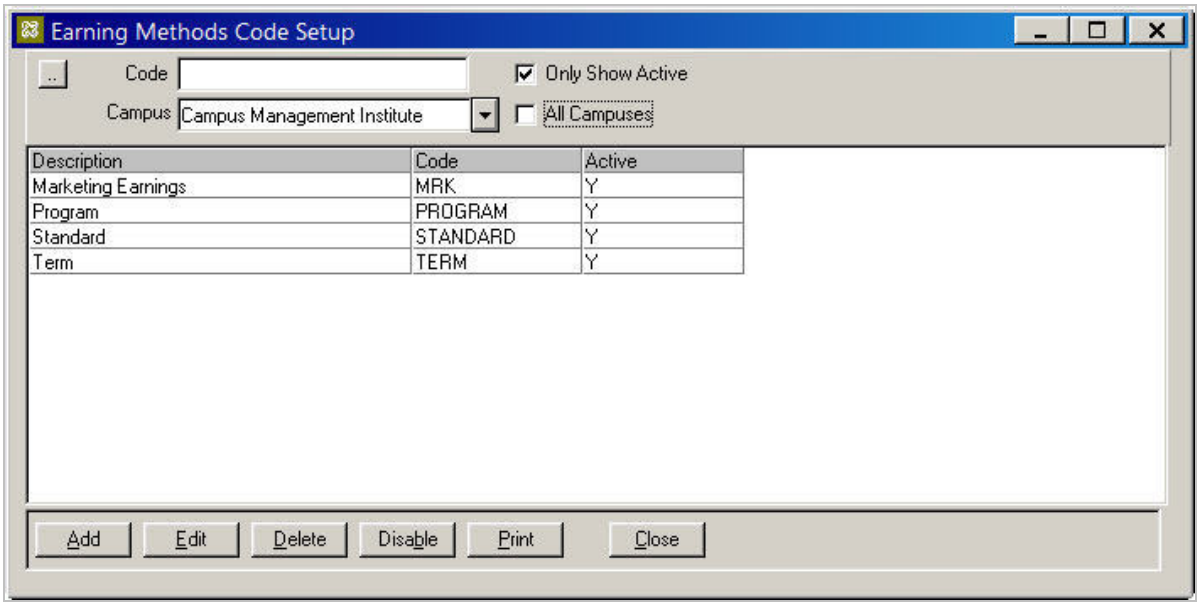


2. **Add**, **Edit**, **Delete**, **Disable**, or **Print** the billing methods for the program version from this form.

For more information, see Setup - Student Account Lists [Billing Methods].

To set up an earning method for a program version:

1. On the Program Version form, click **Student Accounts**, and select **Lists > Earning Methods**. The Earning Methods Code Setup form is displayed.

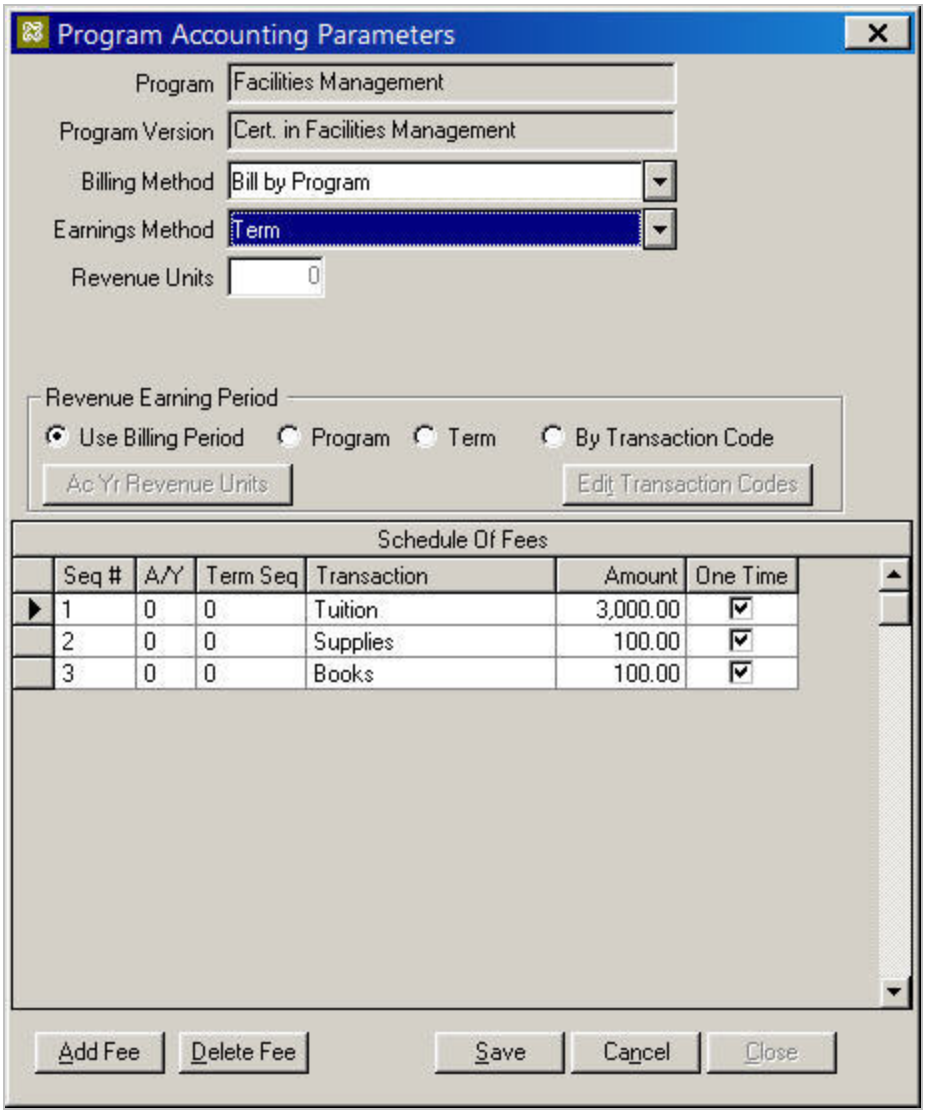


2. **Add**, **Edit**, **Delete**, **Disable**, or **Print** the earning methods for the program version from this form.

For more information, see Setup - Student Account Lists [Earnings Methods].

To associate billing/earning methods for a program version:

1. On the Program Version form, click **Student Accounts**, and select **Associate Billing/Earning Methods**. The Program Accounting Parameters form is displayed.



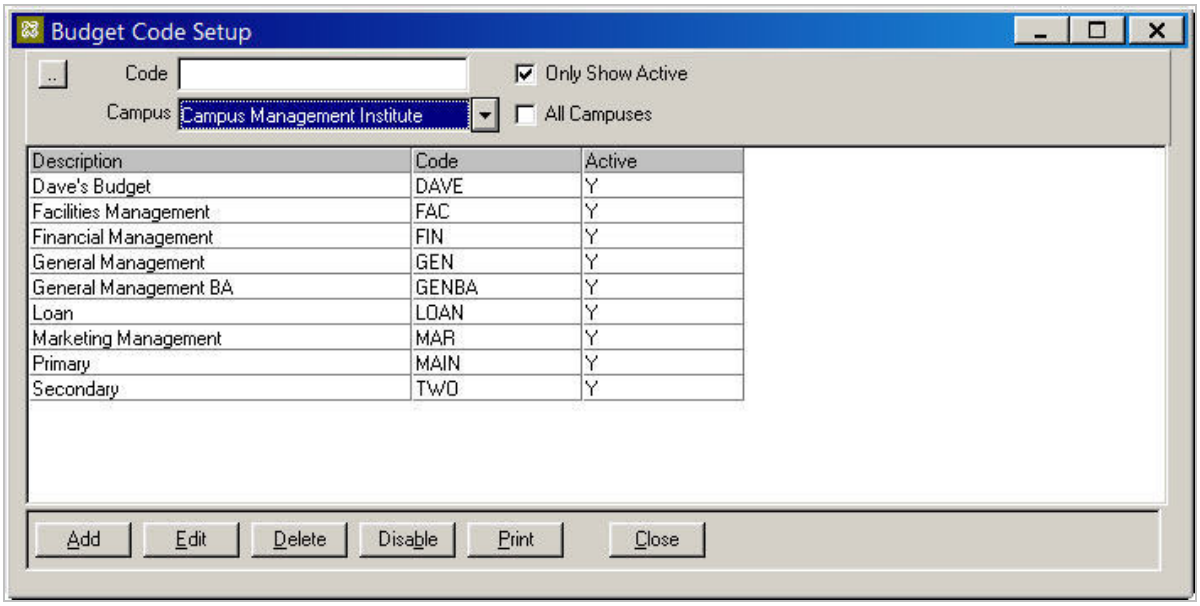
2. Select the Billing Method and Earnings Method, specify Revenue Unit and Revenue Earning Periods, and add or delete fees.

For more information, see Setup - Student Account Lists [Programs].

Method Selection for Financial Aid

To set up a budget for a program version:

1. On the Program Version form, click **Financial Aid**, and select **Lists > Budgets**. The Budget Code Setup form is displayed.

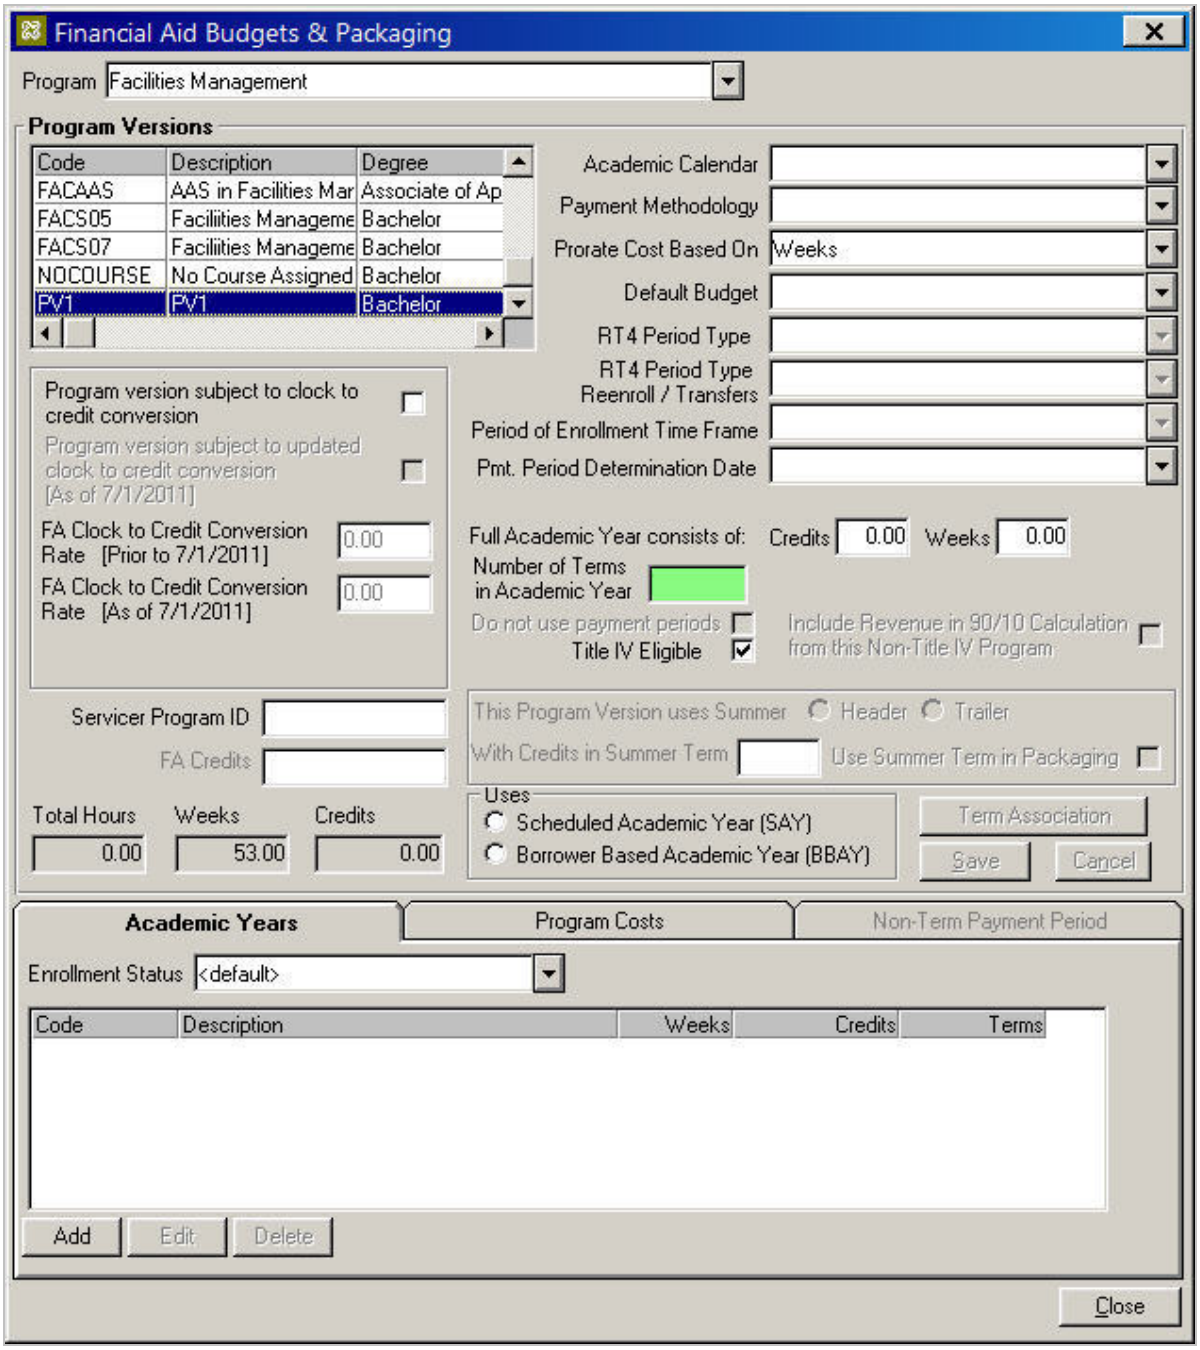


2. **Add**, **Edit**, **Delete**, **Disable**, or **Print** the budgets for the program version from this form.

For more information, see Financial Aid Lists [Budget].

To associate budgets for a program version:

1. On the Program Version form, click **Financial Aid**, and select **Lists > Associate Budgets**. The Financial Aid Budgets & Packaging form is displayed.



2. **Add**, **Edit**, **Delete**, **Disable**, or **Print** the budgets from this form.

For more information, see Programs in Financial Aid Lists.

Programs > Documents

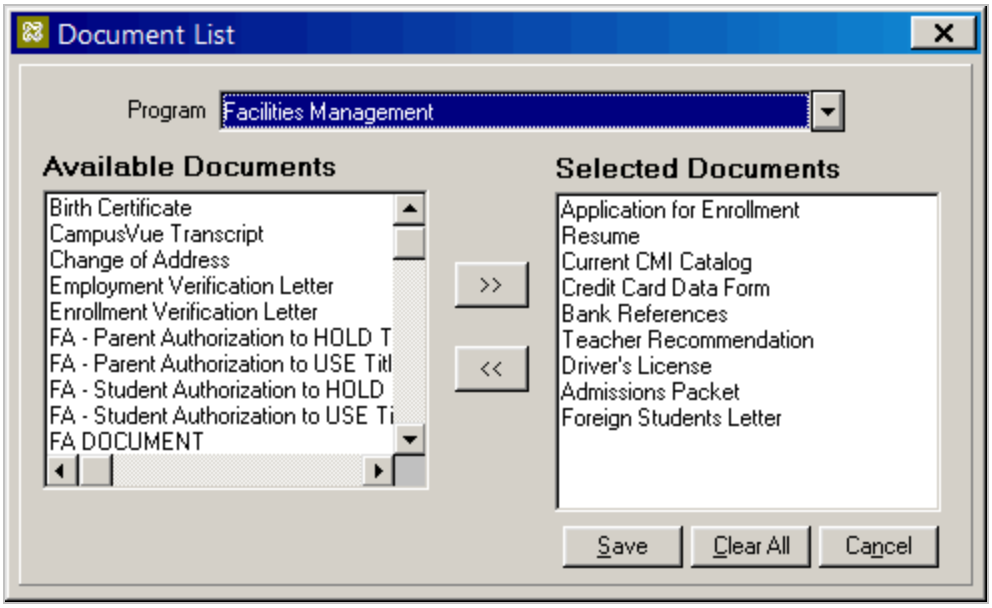
You can select one or more student documents to be required for enrollment in a given program. Documents such as letters of recommendation, driver's license, birth certificate, etc., can be selected.

The selected documents are tracked for any lead or student for whom the program is selected. If the program is selected for a new lead, the program-related documents are listed for tracking in the lead/student's document file. Enrollment in the program is not a requirement.

Prerequisite: Documents must be set up in CampusNexus Student before they can be selected for a program. For more information, see the Documents topic in Contact Manager Lists.

To add a document list to a program:

1. On the Programs Code Setup form, click the **Documents** button. The Document List form is displayed.



2. Select a document from the list of **Available Documents** and click >> move it to the Selected Documents field.
3. Select additional documents as required.
4. To remove a document from the Selected Documents field, select the document and click <<.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Programs > Tests | Pre-Enrollment

The test list for programs is used to specify entrance tests that are required of students who wish to enroll in a program. Previous education can be used to qualify which tests and scores are required. You can select one or more tests from the list of tests and specify a required minimum score for each test.

The selected tests are tracked for any lead or student for whom the program is selected. If the program is selected for a new lead, the program-related tests are listed in the lead/student's test file. Enrollment in the program is not a requirement for the tests to be listed in the lead/student file.

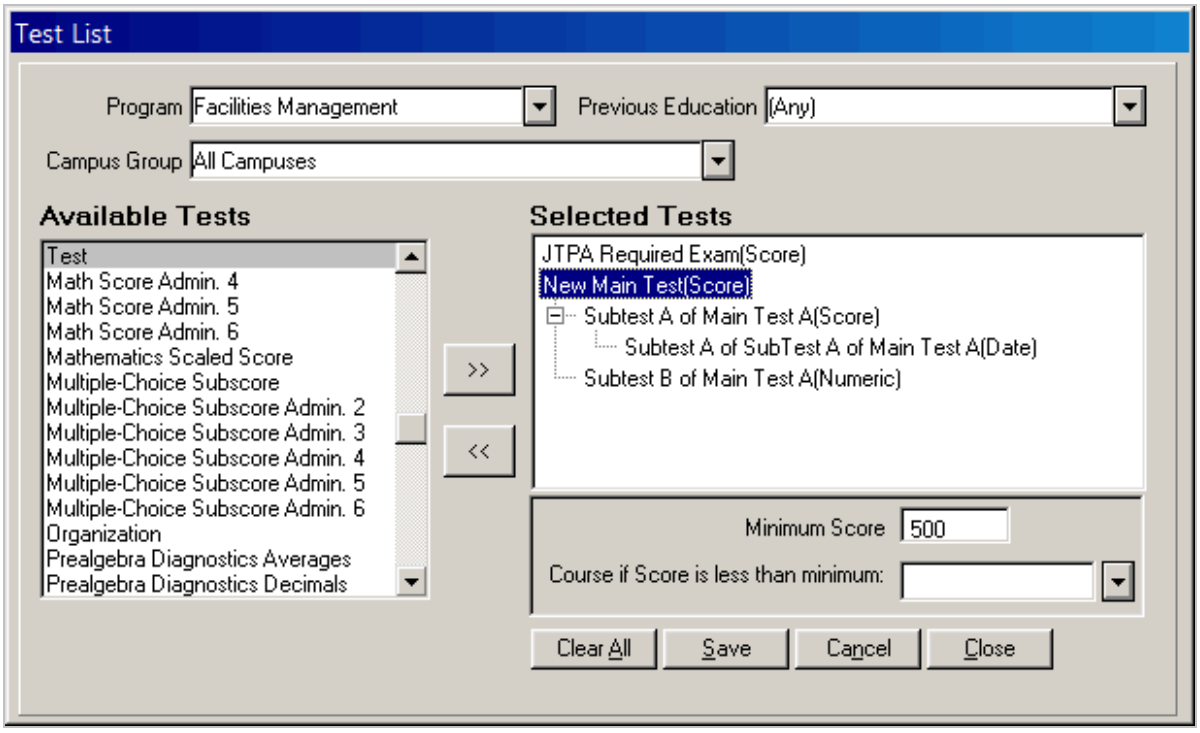
The "Selected Tests" list contains the hierarchical order of the tests, which includes the sub-fields. The field name is followed by its field type such as Score, Text, Date, or Numeric. When selecting a test, all sub-fields are also available for selection so that CampusNexus Student can compare the imported student's test score with the program's or program version's entrance test requirements. Only sub-fields that are of 'Score' type can be assigned a minimum score and remedial course requirement. Other types of sub-field appear disabled. The 'Available Tests' list contains only Main Tests.

Prerequisite: The list of available tests must created. See Test Setup.

To add or edit an entrance test list for a program:

1. On the Programs Code Setup form, click the **Tests | Pre-Enrollment** button. The Test List form is displayed.

   The Program field (read-only) displays the program selected on the Programs Code Setup form.



2. Select a **Campus Group**.
3. Select a **Previous Education** option.
4. Select a test from the list of **Available Tests** and click >> to move it to the Selected Tests field.
5. Specify a numeric value for the acceptable **Minimum Score** for the test.

Note: The Type of the test selected must be 'Score', otherwise the Minimum Score field is disabled.

6. In the **Course if Score is less than minimum** field, select a course to be assigned to any student who fails to reach the minimum score on the selected test or sub-field. The course will be added if the course is not already included in the student's course schedule when the student's score is below the minimum value.

   Note: The Type of the test selected must be 'Score', otherwise the Minimum Score field is disabled.

7. Select additional test as needed and specify corresponding test score requirements.

8. To remove a test from the list, select it in the **Selected Tests** field, and click to move it back to Available Tests field.

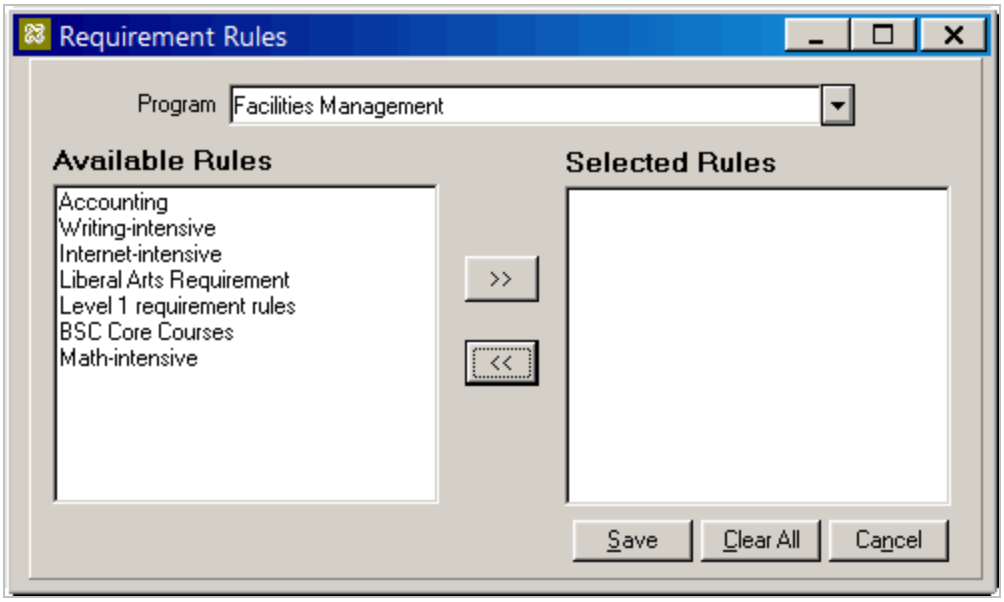
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Programs > Requirement Rules

You can assign requirement rules at the program level. All enrollments into the program's subsequent program versions must satisfy the conditions of the program's requirement rules.

To assign requirement rules to a program:

1. On the Programs Code Setup form, click the **Requirement Rules** button. The Requirement Rules form is displayed.



2. Select a rule from the list of **Available Rules** and click >> move it to the Selected Rules field.
3. Select additional rules as required.
4. To remove a rule from the Selected Rules field, select the rule and click <<.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

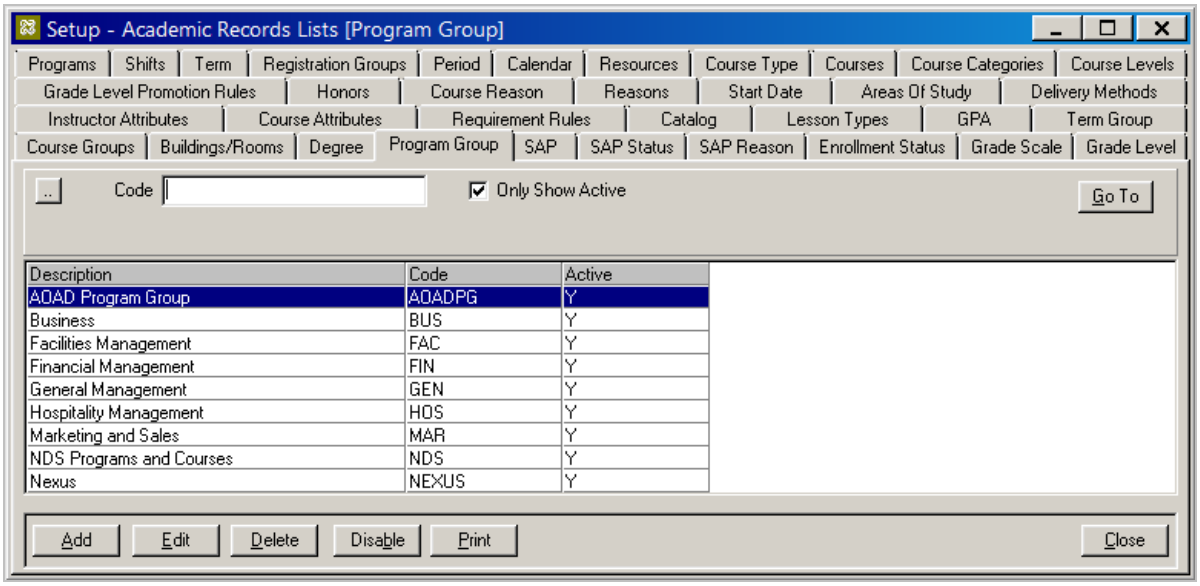
Setup - Academic Records Lists [Program Group]

Program groups classify program versions that have some common characteristic. A program group also serves to identify the interest of a lead for the Admissions department before the lead selects a program version. When you define a program version, you must specify a program group to which the version is related.

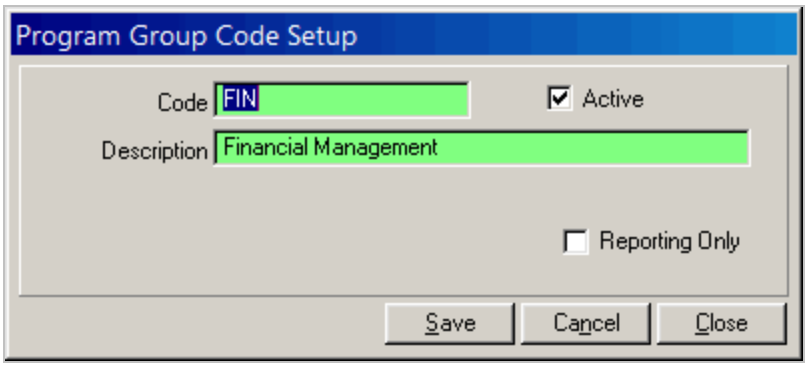
Note: A program group code cannot be deleted if it is assigned to a program version.

To add or edit a list of program group codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Program Group**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Program Group Code Setup form is displayed.



6. Specify a unique **Code**.

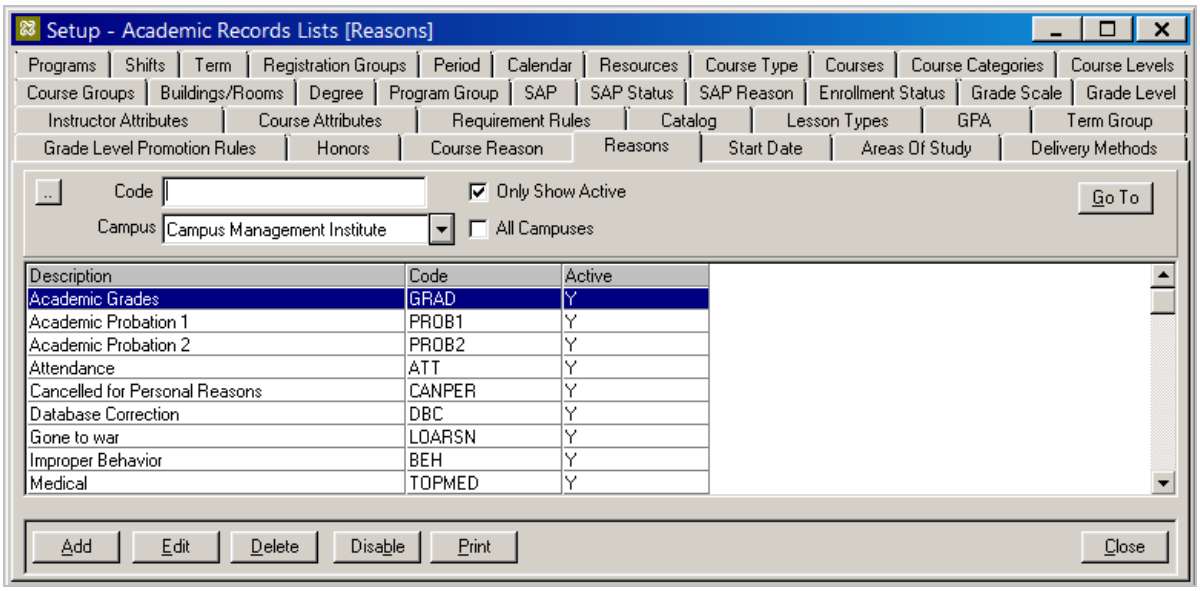
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. Enter a **Description**.
9. Select **Reporting Only** if the program group code is used for reporting purposes only.
10. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Academic Records Lists [Reasons]

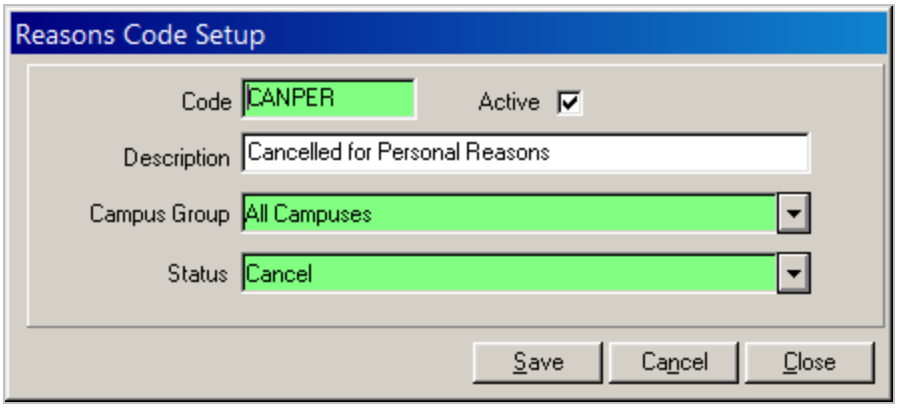
Reason codes can be assigned to student status changes. By relating a predefined reason code to a student status change, you can classify the changes into groups and analyze them with a report. The reason codes are related to specific status codes and campuses. A reason code can be included when making an individual or batch status change.

To add or edit a list of status change reason codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Reasons**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Reasons Code Setup Form is displayed.



7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.
10. Select a **Campus Group** to which the reason is related.
11. Select a **Status** (student/school) to which the reason is related.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Academic Records Lists [Requirement Rules]

Institutions can assign rules to course categories and to program versions that require students to complete a certain number of credits of a specific course level to meet degree requirements.

For instance, a student may need to complete 12 credits of the general studies category from courses that are defined as undergraduate or graduate level courses. This rule applies to a number of credits associated with a course category defined on the degree audit. Institutions can assign the same rule to a program, so that in addition to the 12 required undergraduate course requirements to meet the category conditions, the program requires 32 credits in undergraduate course work (in any category) to meet the degree requirements.

Attributes assigned to courses at the course level can be assigned to rules. When a course is assigned to a program version's course list, the course's attributes defined at the course level are copied to the program version course level. These attributes can then be edited on the program version course list level.

Requirement rules can also be created to dictate more granular conditions for satisfying a degree audit. Rules can be defined using the following criteria:

- Number of credits, hours, or courses.
- Number of credits, hours, or courses that are required from courses of a certain course level.
- Number of credits, hours, or courses that are required from courses having specific attributes.
- More than one course level can be used as criteria in a rule

Users can add individual required credit or hour values, or course quantities to each course level in a rule, or a total credit, hour value, or course quantity that a course from any specified course level can fulfill.

Example

- An institution uses multiple designations for undergraduate courses, such as '100 level' and '200 level'. The user can add those levels to a rule and assign a single credit value that courses from either level can satisfy.
- The same institution requires that within a course category, 10 credits must be from '100 level' courses and 10 credits must be from '200 level' courses. The user can add both course levels to the rule and assign 10 credits to each level.

More than one attribute can be used as criteria in a rule. A required credit or hour value or course quantity can be added to the attribute. For example, an institution may require 36 credits in the Core class category, 10 of which must be met by writing-intensive courses. The rule includes 'writing-intensive' as one of its attribute criteria, and assigns 10 credits to the attribute. For the student to satisfy the degree audit, courses belonging to the Core course category and having a property of 'writing-intensive' must account for at least 10 of the student's credits.

Rules can be set at the program level. Program level rules allow users to set the overall requirements for the number of credits/courses that must be satisfied by courses at a certain course level or with a certain attribute for a student to satisfy a program version's degree audit.

Rules can be set at the program version level on one or more course categories. When a single rule is set on multiple course categories, the student can select courses from multiple course categories to fulfill the rule.

Program version level rules that associate with a single course category require that courses eligible to satisfy the rule must come from within that category. If a program version's course category has a rule assigned to it, the degree audit must know that only courses in that category can satisfy it (given they meet the criteria of the rule).

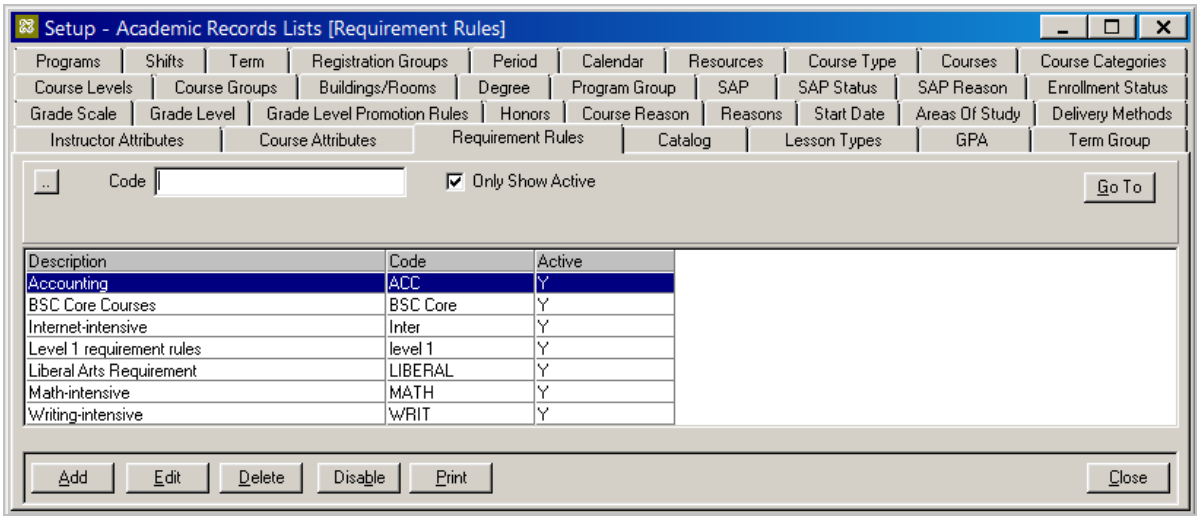
- If no rule is assigned to the course category, the degree audit behaves according to current functionality.
- If a rule is assigned across course categories (on a program or an area of study), the degree audit counts courses in any of those categories to determine satisfaction of the rule.

- If rules are assigned to a program and its program version course categories, the degree audit requires that conditions of all rules are met.

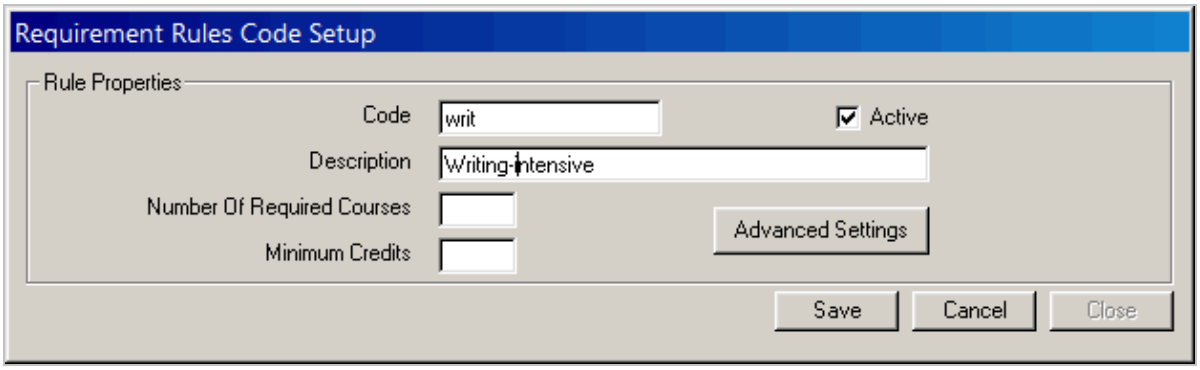
On the Degree Progress Audit section labeled 'Requirement Rules Summary', CampusNexus Student displays the rule name associated with the program, course category, and/or area of study and its criteria (course attributes with total credit or hours/-course values required, course levels with total credit or hours/course values), and how many courses/credits or hours have been taken to satisfy the conditions of the rule. The courses that were taken to satisfy the rule are also displayed. If more courses are taken than are needed to satisfy a rule, the summary displays only the required amount of courses taken (chronologically, starting with the first course taken).

To add a list of requirement rules codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Requirement Rules**.



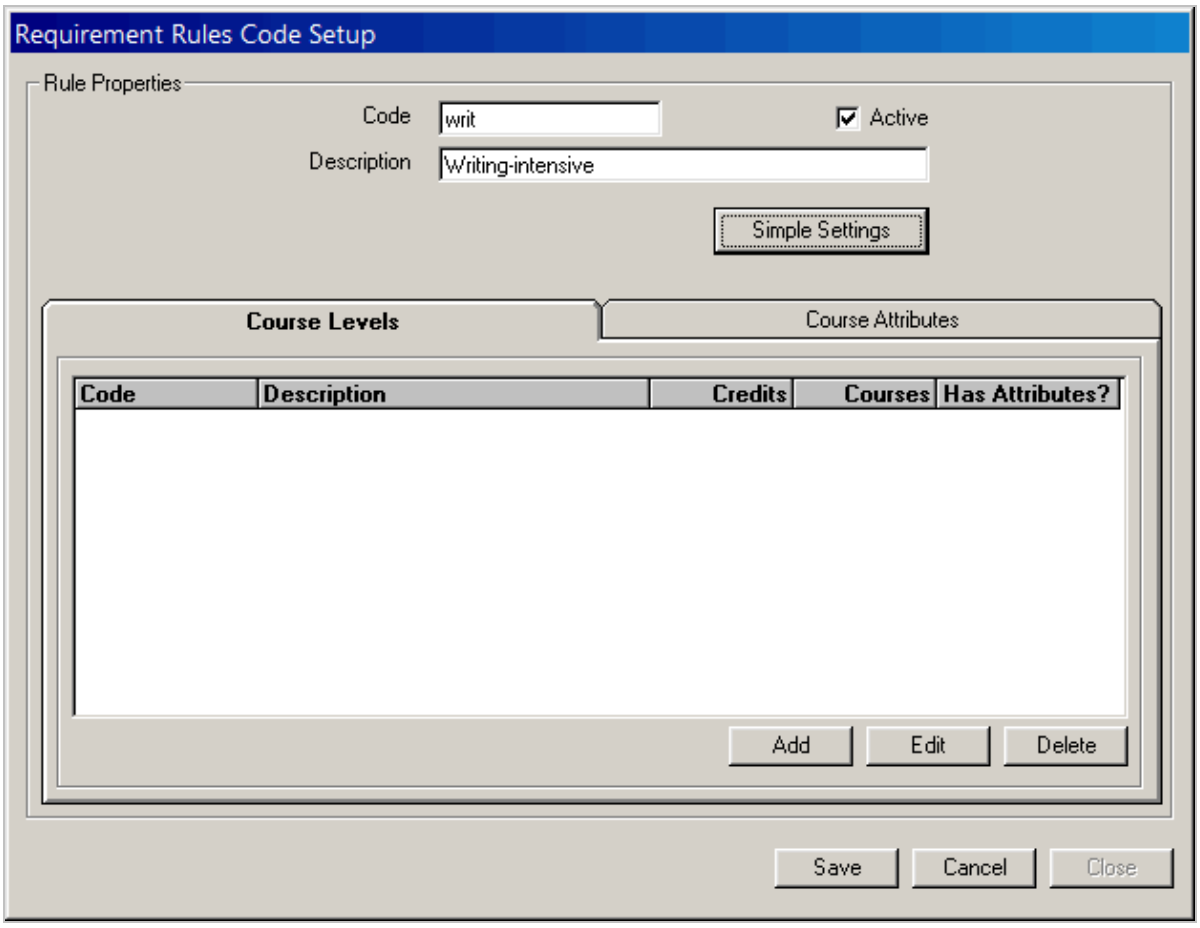
3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**. The Requirement Rules Code Setup form is displayed.



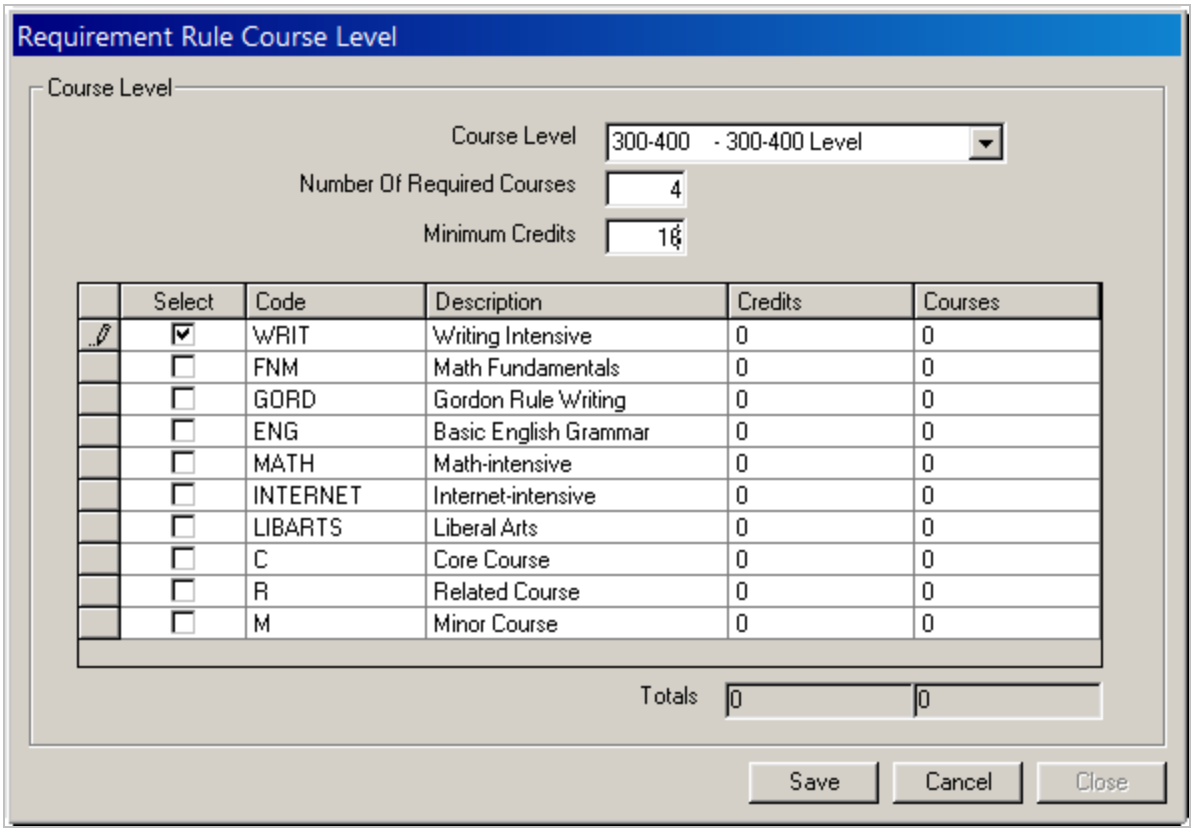
6. Specify a unique **Code**.
7. Enter a **Description**.

8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Specify the **Number of Required Courses** or credits for the rule. If you add a value to this field, you cannot add credit or course values to individual course categories or attributes, and you can skip to the last step.

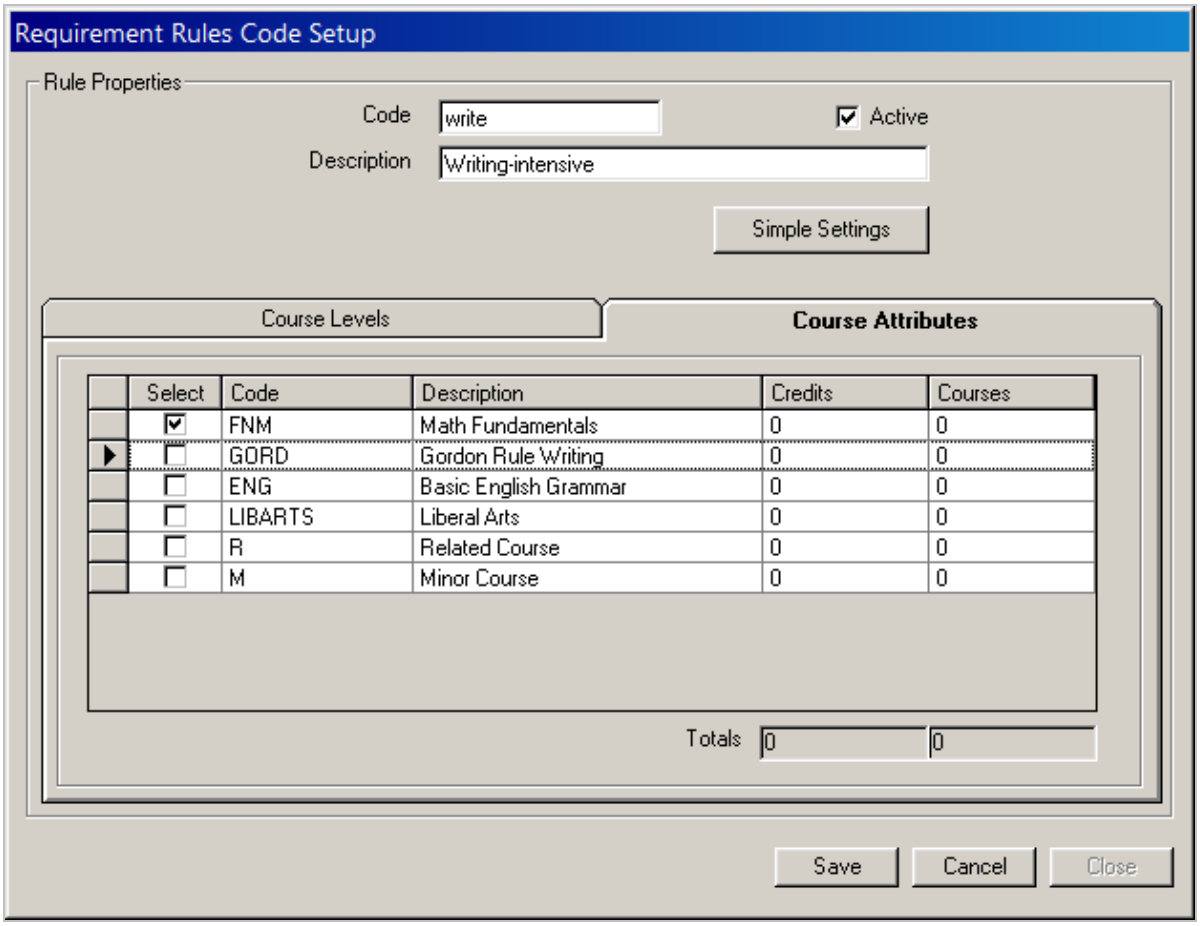
   If you do not specify the number of required courses or credits for the rule, click the **Advanced Settings** button and continue with the next step.



10. :Click **Save**.
11. Click **Add** on the Course Levels tab and assign a count of credits or courses required from each course level to satisfy the rule.



12. Click the **Course Attributes** tab to assign a count of credits or courses required from courses having each attribute to satisfy the rule.



13. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

After the rule is saved, the rule is applied, and the criteria set in the steps above will be factored in when CampusNexus Student determines completion of a student's enrollment.

Satisfactory Academic Progress (SAP)

Accreditation bodies require institutions to calculate each student's academic progress based on a defined measure of time, typically every grading period, such as a term. Students must maintain satisfactory academic progress to continue as students and to remain eligible for financial assistance. SAP is determined by measuring the student's cumulative grade point average (CGPA) and the student's rate of progress toward completion of his or her academic program.

SAP can be automatically calculated by CampusNexus Student. This calculation is based on one or more tables of parameters against which student progress is measured. It is possible to have a different SAP table for each program (see Grade Scale). Enrollment status is also taken into account. You can have different criteria (in the same table) for students who are full time, 3/4 time, half time, etc.

Before the SAP tables (SAP Codes) can be set up, you need to define school status codes for a recommended suspension and probation. CampusNexus Student can change the status of a student who fails to meet the SAP criteria (SAP Details). If you do not want the student status to be changed, you can cause a note to be listed with the student recommending manual action to be taken.

You also need to define student groups for recommended suspension and probation. Students who fail to meet the SAP criteria are assigned to the groups you select. From these groups, the appropriate reports can be generated.

Example: The total allowable credits (maximum program length) (150 % of 120) of a program is 180. The midpoint of the maximum program length (50% of 180) is 90. The three-quarter point of the maximum program length (75% of 180) is 135. Total credits required are 120. We'll use a table to help us set up our SAP table for the program.

SAP Example

Total Number of Credits Attempted	Probation If CGPA is Below	Recommend Suspension If CGPA is Below	Recommend Suspension If Percent of Credits Completed to Credits Attempted is Below
1 - 16	1.50	1.00	50%
17 - 32	1.50	1.20	60%
33 - 64	1.65	1.30	65%
65 - 90	1.80	1.50	67%
91 - 135	2.00	1.75	67%
136 - 180	2.00	2.00	67%

Each line in the table results in two conditions in our new table. The conditions should start with the lowest number of credits attempted and the lowest CGPA first.

For the first line we create a condition (01) for 1 - 16 credits attempted, a CGPA of less than 1.00, and a completion ratio of 50% of credits attempted. If this condition is met by the student's record, we will change the school status to *Recommend Suspension* and suspension will be recommended in the manual action note. (The status labeled *Recommend Suspension* is still an active status because we don't want to automatically set the student's status to a temporary or permanent out category without a staff member review.)

The condition (02) is for 1 - 16 credits attempted and a CGPA of less than 1.50. If the student's record exceeds condition 01 but fails condition 02, CampusNexus Student changes the student's status to *Probation* (also an active status) with a time limit that we set for 120 days.

SAP Calculation

CampusNexus Student's Satisfactory Academic Progress (SAP) wizard automates the calculation of a students' academic progress. The SAP wizard calculates the student's academic progress based on tables that have been previously set up, the student's academic progress, and whether enrollments are linked. SAP can be calculated at any time. SAP calculations can be performed for a student group or an individual student.

The main part of any SAP calculation is based on cumulative calculations of SAP detail conditions. For example, if SAP is calculated for a term that occurred two terms ago, the cumulative calculations (Credits Attempted/Credits Earned, cumulative GPA, etc.) are calculated as of the selected term's end date, not as of the system date.

The SAP calculations are date sensitive when the calculation is processed for a historical term. The pertinent data fields used in the calculation are calculated as of the end date of the term being evaluated. For instance, when SAP is calculated for a prior term, the user is given the option to recalculate SAP for all subsequent terms, since a change in SAP status in the term for which the grade was edited may cause a change in the SAP statuses for subsequent terms.

SAP calculation supports processing of historical terms on an individual student basis only. Users are guided through SAP calculations for all subsequent terms with completed classes as part of the process of calculating SAP for a historical term. The calculation processes the historical term up to the most recently completed term. Each term included in the SAP processing is evaluated and the resulting SAP statuses posted for each term.

When a SAP evaluation is done and a student's school status is moved to *Drop* as a result, the *Date of Determination* and *NSLDS Withdrawal Date* fields are automatically populated with the date the SAP evaluation was performed.

The SAP wizard allows automated school status changes to take place *only* when SAP is being calculated for the most recently completed term.

Each student's GPA and Credits Attempted/Credits Earned are calculated as of the end date of the term the SAP calculation is being processed for. CampusNexus Student updates the records of the affected students with the results of the latest calculation. Depending on the setup in the SAP tables, some students' statuses may be changed to Probation or Recommend Suspension. The indicator in a student's record is simply a Yes (making SAP) or No (not making SAP). The SAP indicator for a selected student can be seen in the Date-Status tab of the student's Enrollment folder.

Changes to the student's SAP calculation or status, along with all SAP failed reasons are recorded in the SAP audit records. The Student Master record contains any School Status changes, and the Progress tab of the student's Enrollment folder contains the SAP Status for each historical term.

Performing a term-based SAP evaluates all students who have hours attempted in that term, regardless of their status. If the term on which the SAP calculation is based is a parent term, all related child terms are included in the SAP calculation.

If a student has attempted more than the configured maximum time frame (MTF) of the required credit or clock hours for a program version, the student's SAP status and school status can be changed to a specified status and can also be added to a specified group. See also SAP Maximum Time to Complete.

A student who exceeds the configured maximum time frame of credit/clock hours criteria configured for the SAP Policy is evaluated, even if the student has already failed one criterion within the SAP Policy.

SAP can be automatically performed on a student when the student's school status changes to Drop. CampusNexus Student determines the student's LDA and calculates SAP for the corresponding term.

GPA Criteria and Letter Grades

Developmental courses are normally taken in a student's first term because the student is not usually eligible to enroll in regular undergraduate courses until the student has successfully completed all developmental courses. These courses are not normally a part of a student's GPA. They are graded with letter grades set up not to affect GPA. However, the letter grades used are set up to be included in the SAP calculation because some schools count the courses toward the student's rate of progress. These cases are handled as follows in CampusNexus Student:

- SAP does not evaluate any GPA criteria for students who receive letter grades that are not configured to be included in the GPA calculation, for all courses taken during the SAP evaluation period (Term or Cumulative).
- SAP evaluates all non-GPA related criteria for students who receive letter grades that are not configured to be included in the GPA calculation, for all courses taken during the SAP evaluation period (Term or Cumulative).
- When SAP is run by Term and the student Term GPA is 0.00 due to the courses not affecting GPA, SAP ignores the Term GPA criteria.

- When SAP is calculated, students who receive letter grades that are not configured to include GPA show a SAP Status of *SAP Met* if they passed all non-GPA related SAP requirements.

SAP Maximum Time to Complete

The maximum time frame (MTF) rule for SAP requires schools to dismiss students permanently when it becomes mathematically impossible to earn the remaining required credits within the remaining allowable attempted credits (maximum allowable attempted credits = X% of the program's required credits or hours). The SAP calculation identifies a student as exceeding MTF when the projected total attempted (actual attempted + remaining credits to earn) exceed the maximum credits allowed to complete. The SAP calculation also takes into consideration transferred credits to determine if the credits should be included when determining a student's MTF.

If a student fails the SAP calculation due to the MTF rule, the SAP failure reason states: *'Student cannot complete the required (credits or clock hours) (# of required credits or clock hours) within the maximum allowable time frame, due to remaining required (credits or clock hours) (# of remaining required credits or clock hours for student) exceeding the allowable attempts remaining (# of allowable attempts remaining).'* (The student's actual values replace the text in parentheses).

Example: Using 150% as the configured maximum time frame, a student started with 92.5 required credits, 77.5 remaining required credits, and 46.25 allowable attempts remaining. The student failed the SAP calculation due to the maximum time frame rule. In this case the message may state: *'Student cannot complete the required credits (92.5) within the maximum allowable time frame, due to remaining required credits (20) exceeding the allowable attempts remaining (14.25).'*

Note: During SAP processing, if the status of a student is changed to *Drop* as a result of the *Validate for maximum timeframe of X%* rule or failing a particular sequence within the SAP detail configuration, one or more courses from the enrollment may be dropped. For each course that is dropped, CampusNexus Student checks the add/drop date configuration to determine if the drop occurred before or after the add/drop date. If the **Add Drop Flag** is configured to **S - Course Section Enforced** for the course section's campus, the add/drop date at the course section level is used.

Configurable Option for MTF

CampusNexus Student provides a configurable option for setting the maximum time frame value used to evaluate a student's SAP. Selecting the *Validate for maximum timeframe of* % check box and typing a figure enables users to configure any value up to 255% for the MTF on the **SAP Setup** form. If users select anything over 150%, a message is displayed at Save, informing them that the Department of Education has published the value to be 1.5 times the program length for undergraduate programs. CampusNexus Student calculates the specified MTF percentage in the SAP calculation for all methods of running SAP (Term, Cumulative, Payment Period, Automated Term, and Automated Payment Period) using a new merge field for the criteria selected in the SAP table, including Credits, Hours by Attendance, and Clock Hours by Course.

Users can select clock hours or credit hours in the *Exceed Allowable Time Frame* reason for students who cannot complete required credits within the MTF. The merge field *Based on* then replaces with credit hours or clock hours as specified in the SAP Policy set up when used in the *Exceed Allowable Time Frame* reason. The SAP Code List report displays the MTF percentage and configuration fields. The MTF and the option to *Exclude Transfer Credits* can be enabled or disabled for the report.

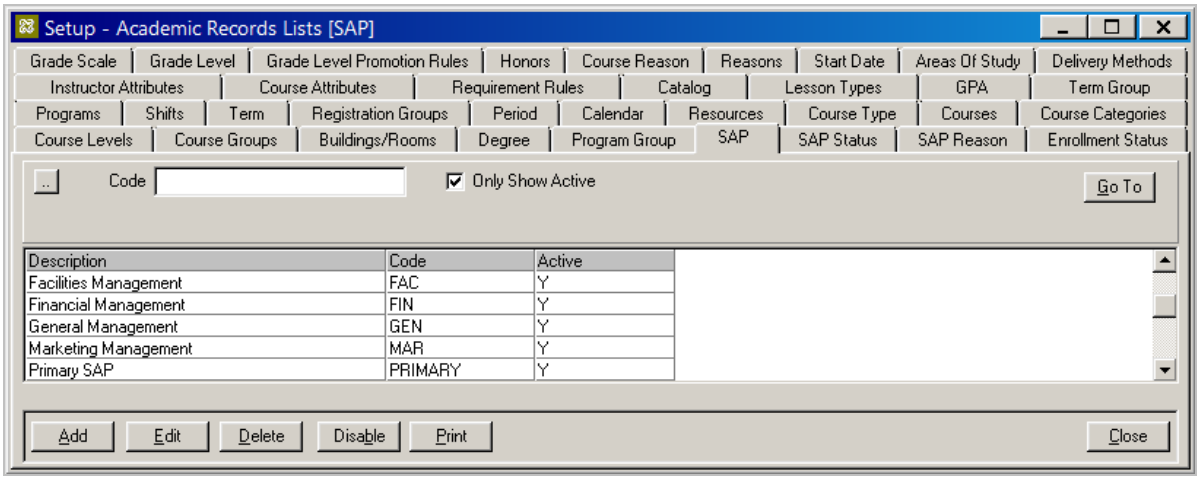
The new MTF % configured on the SAP policy is an available merge field for SAP reasons schools can use in messages sent to students when they fail to achieve SAP on this criterion. The message in the SAP reason can be customized according to the criteria used, so that students know what percentage they are being evaluated against (Credits, Hours by Attendance, or Clock Hours by Course).

Setup - Academic Records Lists [SAP]

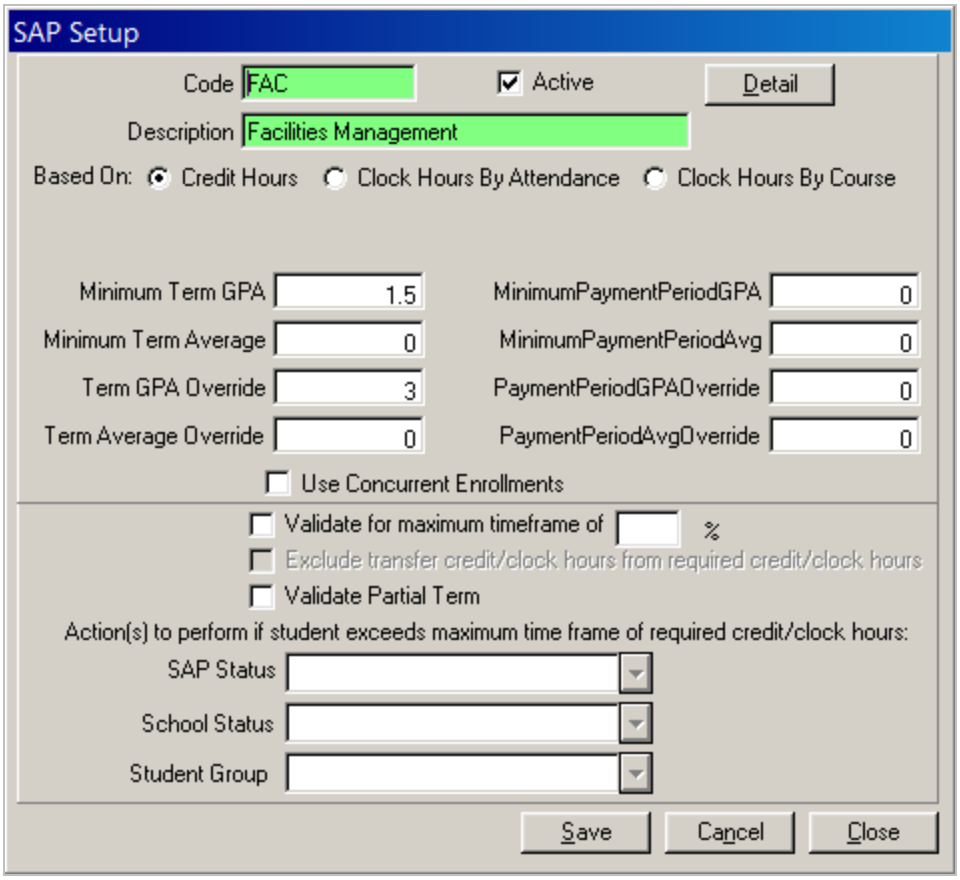
In CampusNexus Student, Satisfactory Academic Progress (SAP) tables are referred to as SAP codes. Use this procedure to add or edit a SAP code.

To add or edit a list of SAP codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **SAP**.



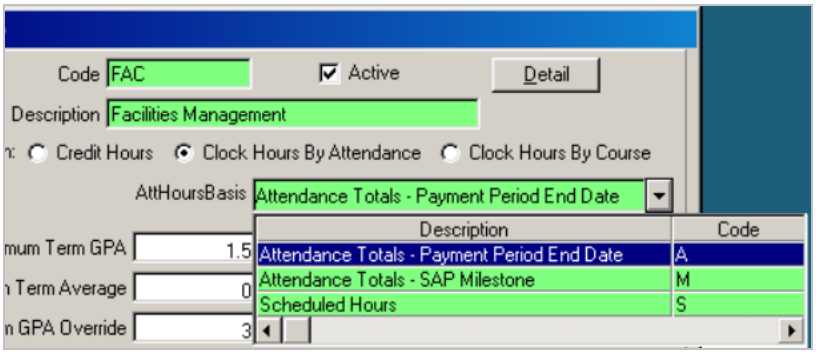
3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The SAP Setup form is displayed.



6. Specify a unique **Code**.
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.

   Note: The Detail button is used to set up the SAP criteria. For more information, see SAP Detail.
8. Enter a **Description**.
9. The SAP Calculation is based on the selection made from the **Based On** options. The option chosen here determines how the overall SAP evaluation works for a given student who is associated to this SAP policy. This selection is also important because it affects how your institution validates the 150% rule requirement for SAP.

   - If **Credit Hours** is selected, the SAP calculation is based on the total number of credit hours a student attempted versus earned in a program for the time period SAP is run for.
   - If **Clock Hours By Attendance** is selected, the **Attempted Hours Basis** (**AttHoursBasis**) field is displayed. The Attempted Hours Basis field provides the **Attendance Totals** options (two selections) and a **Scheduled Hours** option. **Attendance Totals** is the default when a new SAP code is added for institutions currently evaluating SAP based on Clock Hours by Attendance.



- **Attendance Totals - Payment Period End Date** uses the end of the payment period date to evaluate SAP and counts hours as the sum of the attended and absent totals from the student's attendance records. The system design includes hours for courses in progress and makes the assumption that the student is passing the course and hours can be applied. As no final grade is present, the course in progress does not apply within the GPA computation.
- **Attendance Totals - SAP Milestone** uses the end of the SAP milestone date to evaluate SAP and counts hours as the sum of the attended and absent totals from the student's attendance records.

  This configuration is used to allow schools more granular control of the attendance used in the SAP evaluation for each individual student. (e.g. A school is experiencing a snow day where one student is able to make it to school and gain attendance, however another student is unable to make it to school. The student that makes it to class would have their attendance used in the SAP evaluation.)
- **Scheduled Hours** uses the SAP milestone date for SAP evaluation and evaluates when the scheduled hours for the payment period have elapsed. (After selecting Scheduled Hours, the Minimum Term GPA, Minimum Term Average, Term GPA Override, and Term Average Override fields become disabled.)

- If **Clock Hours By Course** is selected, the SAP calculation is based on how many clock hours are attempted versus the number of clock hours earned by a student for completed courses. This is only when it is run by term or payment period.

Note regarding an evaluation using the SAP Milestone date: When SAP is run for a student in a clock hour program, the hours attended / earned and hours scheduled / attempted are calculated based solely on the defined hours required for that given payment period. (Note that the hours attended / earned are only gathered from courses with a posted grade.) This evaluation spans the first day of the payment period up until the exact hour on the SAP milestone date where the student is scheduled to meet the threshold for the hours of that payment period.

10. **Minimum Term GPA** - If a student satisfies the SAP table requirements, but receives a term GPA below the value in this field, the student is not making SAP. Leave this value at zero (0) if it is not applicable.

    This field is disabled if Scheduled hours is selected for the Attempted Hours basis when the SAP Policy is Based on Clock Hours by Attendance.

11. **Minimum Term (Numeric) Average**- If a student satisfies the SAP table requirements, but receives a term numeric average below the value in this field, the student is not making SAP. Leave this value at zero (0) if it is not applicable.

    This field is disabled if Scheduled hours is selected for the Attempted Hours basis when the SAP Policy is Based on Clock Hours by Attendance.

12. **Term GPA Override** - If a student does not satisfy the SAP table requirements, but receives a term GPA that

meets or exceeds the value in this field, the student is making SAP. Leave this value at zero (0) if it is not applicable.

This field is disabled if Scheduled hours is selected for the Attempted Hours basis when the SAP Policy is Based on Clock Hours by Attendance.

13. **Term (Numeric) Average Override**- If a student does not satisfy the SAP table requirements, but receives a term numeric average that meets or exceeds the value in this field, the student is making SAP. Leave this value at zero (0) if it is not applicable.

    This field is disabled if Scheduled hours is selected for the Attempted Hours basis when the SAP Policy is Based on Clock Hours by Attendance.

14. **Minimum Payment Period GPA** - If a student satisfies the SAP table requirements, but receives a payment period GPA that falls below the value in this field, the student is not making SAP. Leave this value at zero (0) if it is not applicable.

15. **Minimum Payment Period Average** - If a student satisfies the SAP table requirements, but receives a payment period numeric average below the value in this field, the student is not making SAP. Leave this value at zero (0) if it is not applicable.

16. **Payment Period GPA Override** - If a student does not satisfy the SAP table requirements, but receives a payment period GPA that meets or exceeds the value in this field, the student is making SAP. Leave this value at zero (0) if it is not applicable.

17. **Payment Period (Numeric) Average Override** - If a student does not satisfy the SAP table requirements, but receives a payment period numeric average that meets or exceeds the value in this field, the student is making SAP. Leave this value at zero (0) if it is not applicable.

18. Select **Use Concurrent Enrollments** to indicate the SAP calculation combines the results of all concurrent enrollments when determining the SAP. The term and payment period fields become disabled when this option is selected.

19. Select **Validate for maximum time frame** to check if students have exceeded the maximum time frame (MTF) of required credit hours or clock hours. Students who can no longer complete their program within the required X% time frame are identified on the SAP calculation grid. This is evaluated using credit or clock hours.

    An additional business rule that is included in the X% validation is the SAP Maximum Time to Complete. If students exceed the limit, the fields under **Actions(s) to perform if student exceeds maximum time frame of required credit/clock hours** must be completed. The % field can be configured to contain a value up to 255, but if a value over 150% is entered, the user receives a message.

    Note: SAP should be evaluated for Maximum Time Frame as established on the front form of the SAP Policy regardless of the detail line that the individual student would fall under at each evaluation point, or even if the student does not meet a specific detail line.

    If the student fails MTF and not on a specific detail line, the audit, the Daily> SAP > Review results, and the Failed sequence number read 999.

20. **Exclude transfer credits/clock hours from required credit/clock hours** - If the **Validate for maximum time frame** option is selected, this option becomes enabled. Select this option to exclude transfer credits/clock hours from required credits/clock hours as part of the validation rule.

21. **Validate Partial Term** - This field indicates a student's terms should be checked to determine whether partial terms exist, and if found, not include them in the student's SAP calculation.

22. **Action(s) to perform if student exceeds maximum time frame of required credit/clock hours** - The following

fields are used to determine the action taken if a student exceeds the validation limit:

- SAP Status – This required field indicates the SAP Status to be assigned if the student fails SAP checking.
- School Status – Select a school-defined status to which the student is changed if the student fails the criteria specified in this condition.
- Student Group – Select a student group to which the student is assigned if the student fails the criteria in this condition. Only Manual Group types are available for selection here. You cannot select Dynamic, Static, or Frozen Groups.

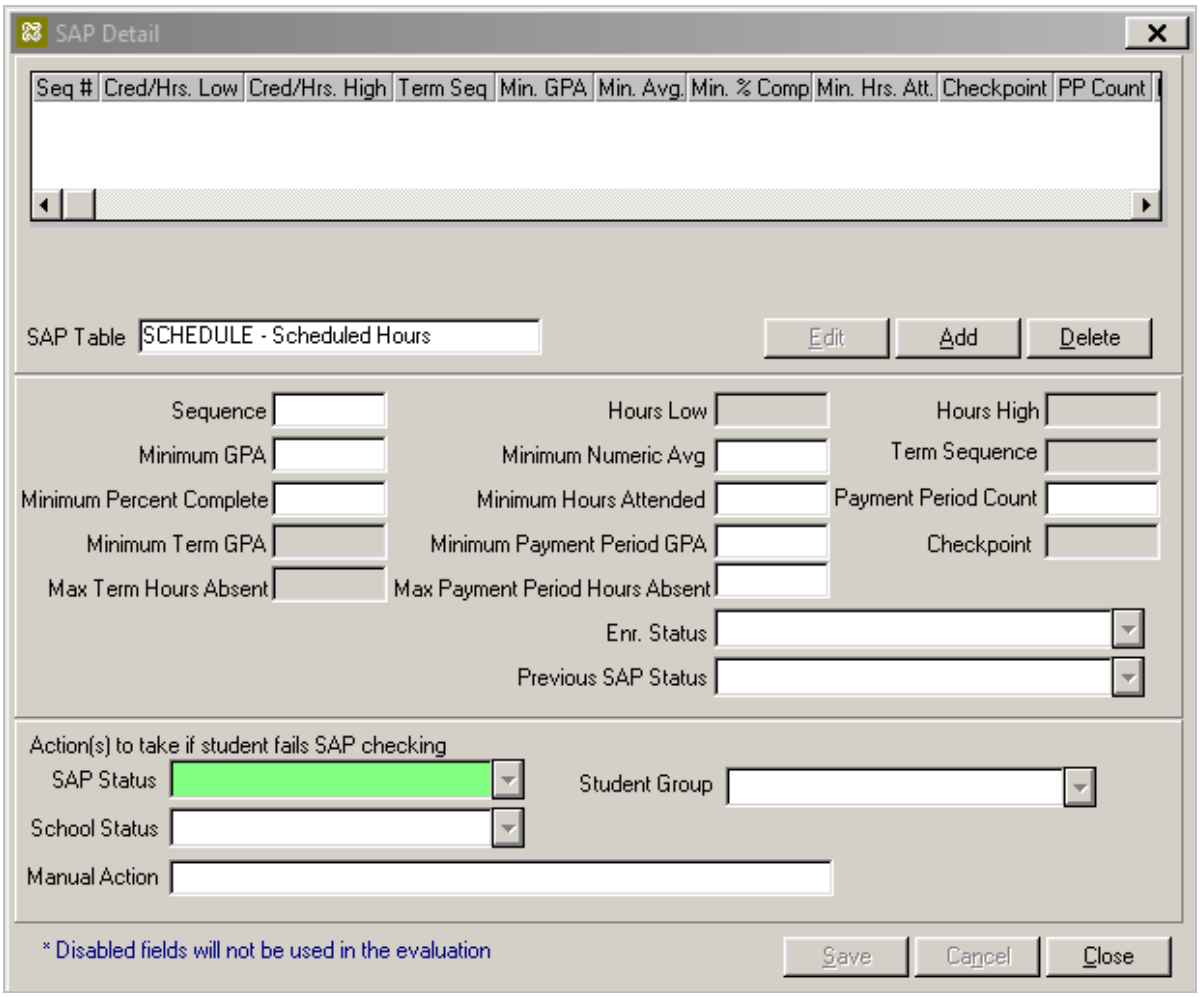
23. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

SAP Detail

The SAP calculation evaluates the student's academic progress based on the detail selections. All detail criteria entered or selected are evaluated. If the student fails any of the criteria, the SAP calculation reports all failed reasons.

To add or edit SAP details in the SAP table:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **SAP**. The existing SAP codes are displayed on the grid.
3. Click **Add** to start a new SAP table or **Edit** to edit an existing table. The SAP Code Setup form is displayed. Enter the necessary information according to the SAP Codes procedure and click **Save**.
4. Click **Detail** on the SAP Code Setup form. The SAP Detail form is displayed.



The SAP Table field reflects the current SAP table associated with current SAP Details listed on the form.

5. Click **Add**, or select a record and click **Edit**.
6. In the **Sequence** field, enter a value to set the order in which the conditions in the SAP table are evaluated.

7. Enter unit values in the **Hours Low** and **Hours High** fields. The units are defined through the Based On option on the SAP Code Setup form; i.e., Credit Hours, Clock Hours By Attendance, or Clock Hours By Course.

    - Hours Low - Students are tested for a condition only if their credits attempted or hours scheduled are above or equal to the Hours Low value entered.

      This field is disabled if Scheduled hours is selected for the Attempted Hours basis when the SAP Policy is Based on Clock Hours by Attendance.

    - Hours High - Student are tested for a condition only if their credits attempted or hours scheduled are less than or equal to the Hours High value entered.

      This field is disabled if Scheduled hours is selected for the Attempted Hours basis when the SAP Policy is Based on Clock Hours by Attendance.

    Notes:

    - If SAP is based on Credit Hours, it evaluates the credits attempted based on the course credits attempted as seen in the student's final grades folder.
    - If SAP is based on Clock Hour by Attendance, Attempted Hours Basis of Attendance Totals, it calculates the hours Scheduled range from the student's detailed attendance records by adding up all present and absent attendance.
    - If SAP is based on Clock Hour by Attendance, Attempted Hours Basis of Scheduled Hours, it calculates the hours Scheduled from the Scheduled Period Hours for the classes that the student attempted.
    - If SAP is based on Clock Hour by Course, it evaluates the hours attempted based on the course hours attempted as seen in the student's final grades folder.

8. If a student is tested for this condition and the student's cumulative GPA is below the **Minimum GPA** value entered, the student is not making satisfactory academic progress.
9. If a student is tested for this condition and the student's cumulative numeric average is below the **Minimum Numeric Avg** value entered, the student is not making satisfactory academic progress.
10. If the units of the SAP table are **Credit Hours**, a student is not making satisfactory academic progress when the student's percentage of credits completed to credits attempted falls below the **Minimum Percent Complete** value entered.

    If the units of the SAP table are **Clock Hours**, a student is not making satisfactory academic progress when the student's percentage of hours attended to hours scheduled falls below the **Minimum Percent Complete** value entered.

11. If the units of the SAP table are **Clock Hours**, a student is not making satisfactory academic progress when the student's hours attended falls below the **Minimum Hours Attended** value entered.
12. Enter the **Term Sequence** number of the term to which this detail listing belongs. For instance, the student's third term in school would have a term sequence of 3. The Term Sequence is not required, and a null value is populated with a zero. You can specify a term sequence and to leave zeros in the credit **Hours Low** and **Hours High** columns.

    This field is disabled if Scheduled hours is selected for the Attempted Hours basis when the SAP Policy is Based on Clock Hours by Attendance.

    Note: Evaluation of Term Sequence works with linked enrollments.

13. The **Payment Period Count** field (**PP Count** column in grid) is used to designate whether this SAP detail line

should be evaluated for the student. For example, if the student was in AY 2 PP 2 count 4 and this detail line count was set to 1, the student would not be evaluated for this detail line.

PP Count Example

AY/PP	Count
AY 1 PP 1	1
AY 1 PP 2	2
AY 2 PP 1	3
AY 2 PP 2	4

14. The student fails the SAP evaluation if the student's term GPA is less than the value specified in the **Minimum Term GPA** field.
15. The student fails the SAP evaluation if the student's payment period GPA is less than the value specified in the **Minimum Payment Period GPA** field.
16. Select the enrollment status (full time, 3/4 time, half time, less than half time) to which these conditions apply in the **Enr. Status** field. If the student's enrollment status matches this selection, the student's progress is compared to this condition when calculating SAP. If you do not select an enrollment status (and it is left blank), the conditions in the detail line apply to all student enrollment statuses.
17. The student fails the SAP evaluation if the student's number of hours missed for the term exceeds the maximum value specified in the **Max Term Hours Absent** field.
18. The student fails the SAP evaluation if the student's number of hours missed for the payment period exceeds the maximum value specified in the **Max Payment Period Hours Absent** field.
19. The optional **Previous SAP Status** field indicates that the SAP sequence is conditional on the student's previous term SAP status being equal to the SAP status defined here. If a student's previous term record does not equal the status defined here, the condition is not met. The drop-down list includes all active SAP statuses.

    Note: Evaluation of Previous SAP Status works with linked enrollments. If this field is left blank, Previous SAP Status is no longer considered an evaluation criterion for SAP; it does not mean that the student has a blank previous SAP status.
20. Enter a value for the **Checkpoint** field, if applicable. The following rules apply when considering SAP checkpoints:
    - This field cannot be used with Payment Period SAP. It only works with term based SAP.
    - SAP details may be configured with the ability to set up checkpoints. The checkpoint value consists of a number between 1 and 255. A zero value indicates that there is no checkpoint associated with the SAP detail.
    - When calculating SAP for individual students or student groups or in a batch mode, the SAP evaluation includes checkpoint evaluation only on SAP sequences where a checkpoint number is specified.
    - When evaluating checkpoints, the SAP evaluation is modified to determine the student's previous checkpoint value that was determined the last time SAP was executed on the student.

      Note: Checkpoints are evaluated across linked enrollments.
    - When executing SAP, evaluation ignores sequences in the SAP table that have a checkpoint greater than 0, but less than or equal to any previous checkpoints evaluated.

- Upon completion and update of the SAP evaluation, the checkpoint value is stored to the SAP Audit table to indicate the last checkpoint evaluated.
- A student is only evaluated if the student details meet the SAP evaluation criteria, and the student has not previously been evaluated for the sequence checkpoint.
- If the students are not evaluated due to not meeting any of the checkpoints, they are still evaluated for the items on the **SAP Code Setup** form, such as maximum tine frame validation and maximum attempts.
- The SAP checkpoint information is displayed on the SAP Report, Student SAP Audit Report, and SAP Audit Report.

21. Select **Action(s) to take if student fails SAP checking**:
    - Select a **SAP Status** that is assigned to the detail criteria when the student fails the SAP evaluation process. The drop-down list includes all active SAP statuses.
    - Select a **School Status** that is assigned to a student when the student fails the criteria specified above. These values are school-defined.
    - Select a **Student Group** that the student will be placed in when the student fails the SAP detail criteria outlined in your selection in the **SAP Detail** form.

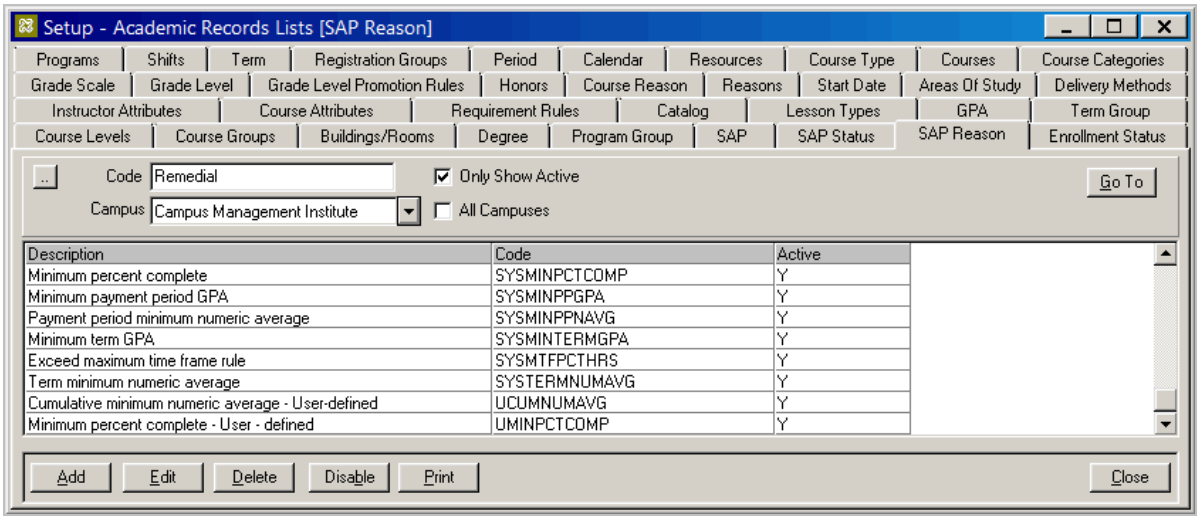
    Note: Only Manual Group Types are available for selection. You cannot select a Dynamic, Static, or Frozen Group for the **Student Group** field.
22. Enter a note in the **Manual Action** field that describes any manual action that needs to be taken when a student fails the SAP evaluation process.
23. Continue adding detail listings and saving them until all SAP parameters are entered for the SAP table.
24. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Academic Records Lists [SAP Reason]

Satisfactory academic progress (SAP) failure reasons can be customized for all SAP criteria defined on the SAP policy (see SAP Codes). Merge fields can be used in defining the failure reason description. If custom failure reasons are defined, CampusNexus Student uses them instead of the system-defined reasons when evaluating SAP criteria (see SAP Details). Letter activities can be created using SAP failure reasons as merge fields, which can be assigned to students who do not meet SAP.

To add or edit a list of SAP reason codes:

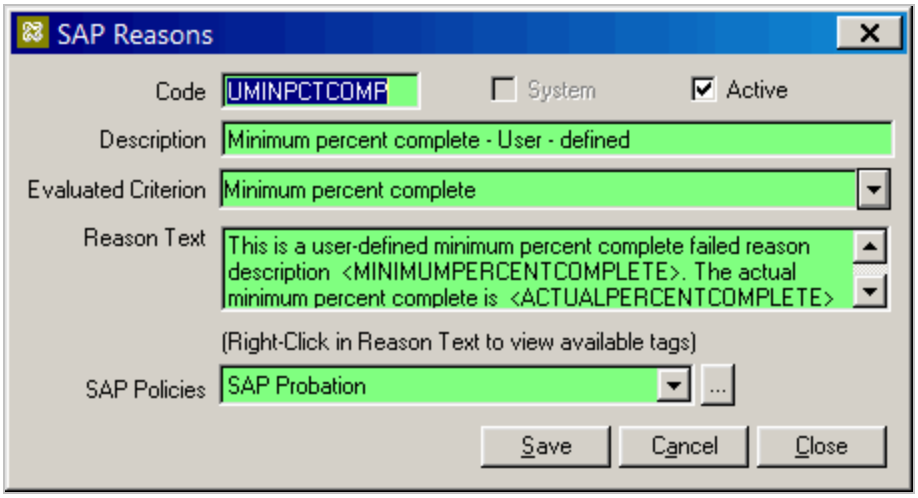
1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **SAP Reason**.



Note the following about SAP reason codes:

- SAP reason codes can be system-defined or user-defined (custom).
- System-defined SAP reason codes begin with *SYS*.
- System-defined SAP reason codes are always active.
- System-defined SAP reason codes cannot be edited or added.

3. Click **Add**, or select a record and click **Edit**. The SAP Reason Code Setup form is displayed.



4. Specify a unique **Code**.

   Since system-defined SAP reason codes begin with SYS, we recommend that you do not use this prefix for the Code field of a user-defined SAP reason code.

   When you add or edit a SAP reason code, the **System** check box, which identifies system-defined SAP reason codes, is always disabled.

5. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
6. Enter a **Description**.
7. From the **Evaluated Criterion** list, select a criterion to assign it to the SAP reason code that you are adding or editing. The system-defined SAP criteria (SAP Details are evaluated during the SAP calculation process.

   The same Evaluation Criterion can be assigned to multiple SAP policies. But when an Evaluation Criterion has already been assigned to a SAP policy, and you try to create a new SAP reason code for the *same* policy, an error message is displayed because each Evaluation Criterion can only be assigned to a SAP policy once.

8. In the **Reason Text** field, type the text to include in letters sent to students who do not meet the specified SAP criteria for the SAP failure reason.

   You can also insert variables that are used as mail merge fields. Right-click the Reason Text field to select a variable. Only one variable at a time may be selected; however, multiple variables may be included in the Reason Text field.

The value of the selected variable is displayed in the letter sent to the student. (Note the name of the variable enclosed by the <> symbols.)

The variables represent the SAP criteria values. The calculated values of the variables are used in the SAP calculation for each student.

8. From the **SAP Policies** drop-down list, select the SAP policy (SAP Codes) associated with the SAP failure reason.

   Note: For system-defined SAP reasons, the SAP Policies field is always blank because system-defined SAP reasons can be assigned to any SAP Policy.

9. Set up a new Letter Activity for the letters sent to students who failed to meet the SAP criteria for this SAP failure reason.

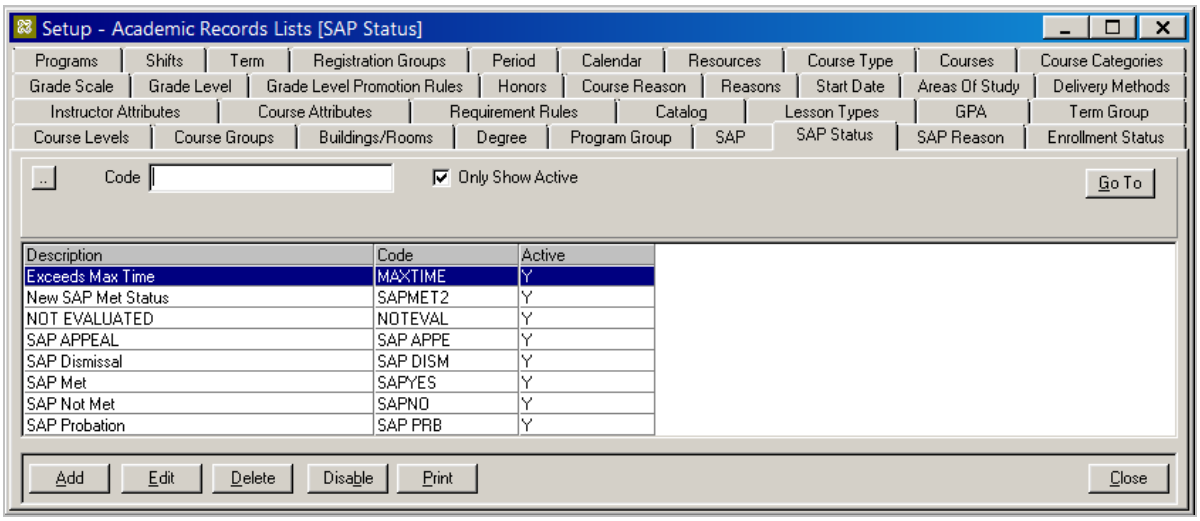
If letter activities are assigned during the SAP calculation process, each student not meeting SAP is assigned a pending letter activity that is posted in the student's activities folder and the faculty member's Contact Manager folder. Once the letters are printed, the activity is closed. CampusNexus Student assigns a completion date at that time and assigns it to the student's activity.

Setup - Academic Records Lists [SAP Status]

SAP status codes are used to indicate whether a student is making Satisfactory Academic Progress (SAP). You can add SAP status codes to indicate conditions under which the student is not making satisfactory academic progress.

To add or edit SAP status codes and associate student groups with SAP status codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **SAP Status**.



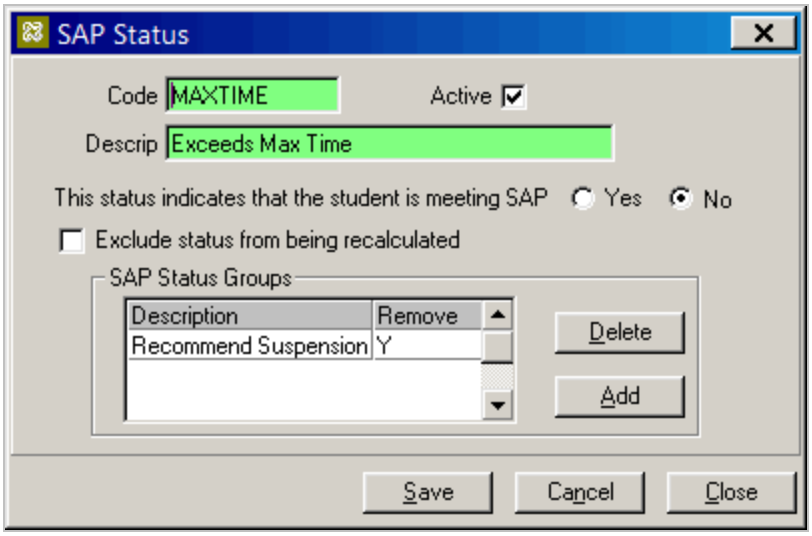
CampusNexus Student provides two system-defined SAP status codes and descriptions:

- The SAPYES code is assigned to the 'SAP Met' description field. You can add more 'SAP Met' codes and descriptions. Students meeting SAP are assigned to this SAP status code by default.
- The SAPNO code is assigned to the 'SAP Not Met' description field. You can edit the system-defined description.

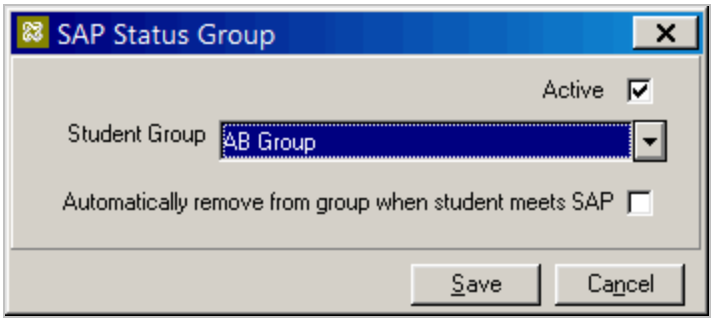
A warning message is displayed if you attempt to delete a SAP status code that is already associated with SAP Detail criteria. The message reads as follows, and no action occurs: *'This SAP Status is in use, delete cancelled'.*

You can add or edit SAP Status codes for Satisfactory Academic Progress (SAP Met) and Non-Satisfactory Progress (SAP Not Met) statuses.

3. Click **Add**, or select a record and click **Edit**. The SAP Status Code Setup form is displayed.



4. Specify a unique **Code**.
5. Enter a **Description**.
6. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
7. For the option **This status indicates that the student is meeting SAP**, select Yes or No as applicable.
8. Select **Exclude status from being recalculated** if this status is to be excluded from recalculation in manual and automatic SAP processing.
9. Click **Save**. If you attempt to create a SAP Status that already exists, a message informs you that the code exists and the save operation is cancelled. Click **OK**.
10. To associate student groups with the SAP Status, click **Add** in the SAP Status Group area. The SAP Status Group form is displayed.



11. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
12. Select a **Student Group**.
13. Select the **Automatically remove from group when student meets SAP** check box if applicable.
14. If you attempt to assign a student group to a SAPYES status, a message informs you that you cannot add student groups when the status is SAP Met. Click **OK**.
15. To remove a Student Group from the list, select the Student Group, and click **Delete**.
16. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

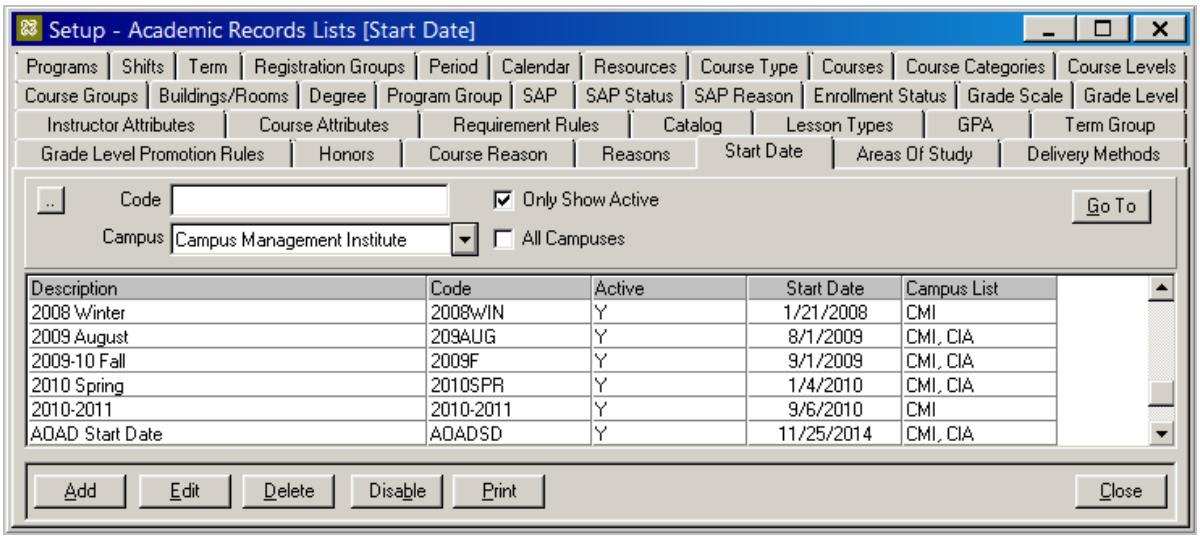
Setup - Academic Records Lists [Start Date]

Start dates are related to program versions. One or more program versions start on the dates entered in this table. After setting up a start date, you can select the program versions that start on that date. This is an efficient method of setting up a start date for multiple program versions without opening each program version setup record individually.

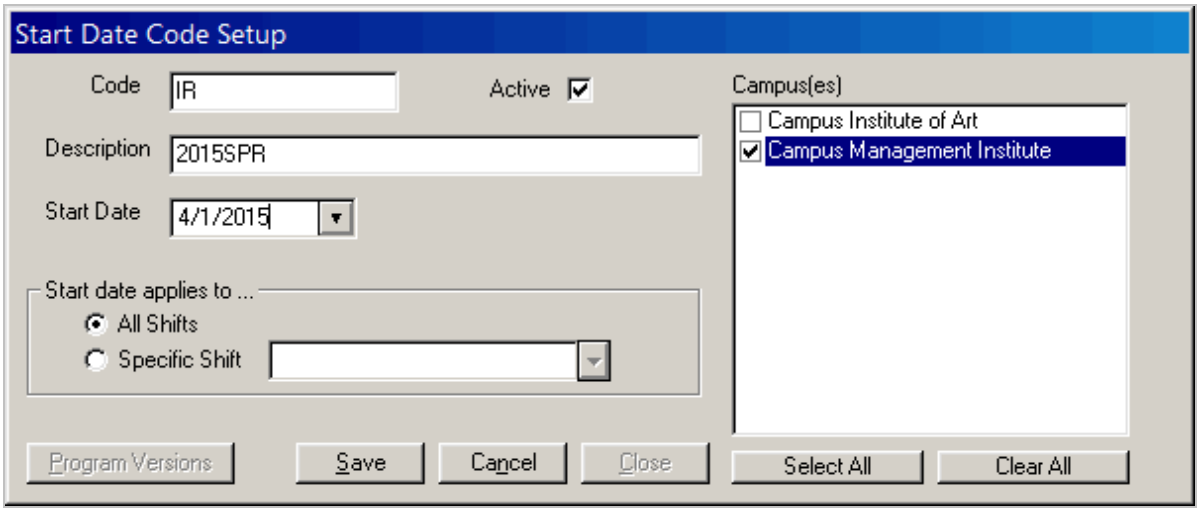
Note: When you delete a record from the start date table, any program version relationship to the start date is also deleted. The program version setup is not deleted.

To add or edit a list of start date codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Start Date**.

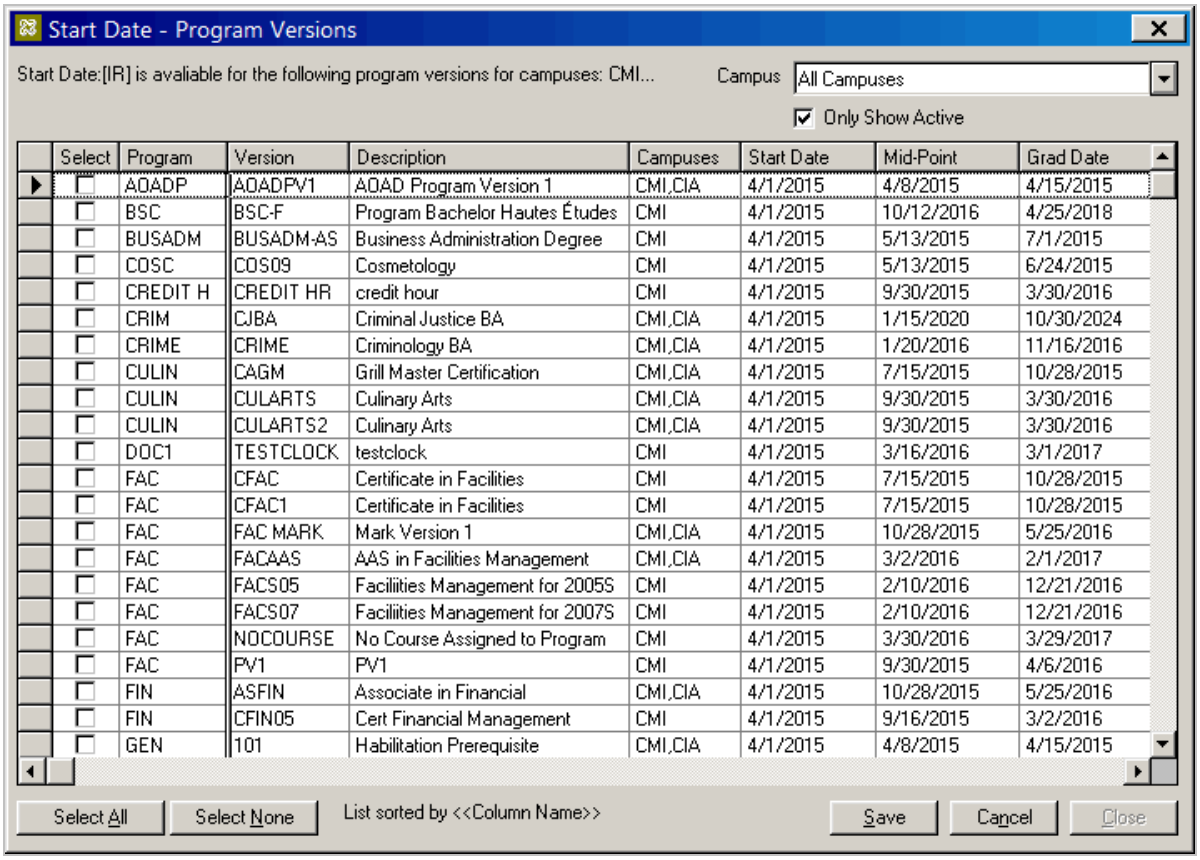


3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Start Date Code Setup form is displayed.



7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.

   When you select or clear the start date Active flag, all related program version selections are set to match. (Only the relationship records linking the start date to the program version are affected, not the program version setup.)
9. Enter a **Description**.
10. Select one or more **Campuses**.
11. Enter the **Start Date** or click to select the date from the calendar.
12. Select one of the "Start date applies to" options.
    - If you select **All Shifts**, CampusNexus Student stores a zero to the Shift ID field.
    - If you select a **Specific Shift**, click to select a shift. CampusNexus Student stores the Shift ID from the list selection.
13. Click **Save**.
14. Click **Program Versions**. The Start Date - Program Versions form is displayed. It lists all program versions that you can associate with the new start date.



Select	Program	Version	Description	Campuses	Start Date	Mid-Point	Grad Date
☐	AOADP	AOADPV1	AOAD Program Version 1	CMI,CIA	4/1/2015	4/8/2015	4/15/2015

☐	FIN	CFIN05	Cert Financial Management	CMI	4/1/2015	9/16/2015	3/2/2016
☐	GEN	101	Habilitation Prerequisite	CMI,CIA	4/1/2015	4/8/2015	4/15/2015

Note: Only program versions that meet the following conditions are listed based on the selected campuses :

- Their start date is associated with the selected campuses and the user has permissions to the campuses.
- The start dates are associated only with the campuses listed, which met condition # 1.

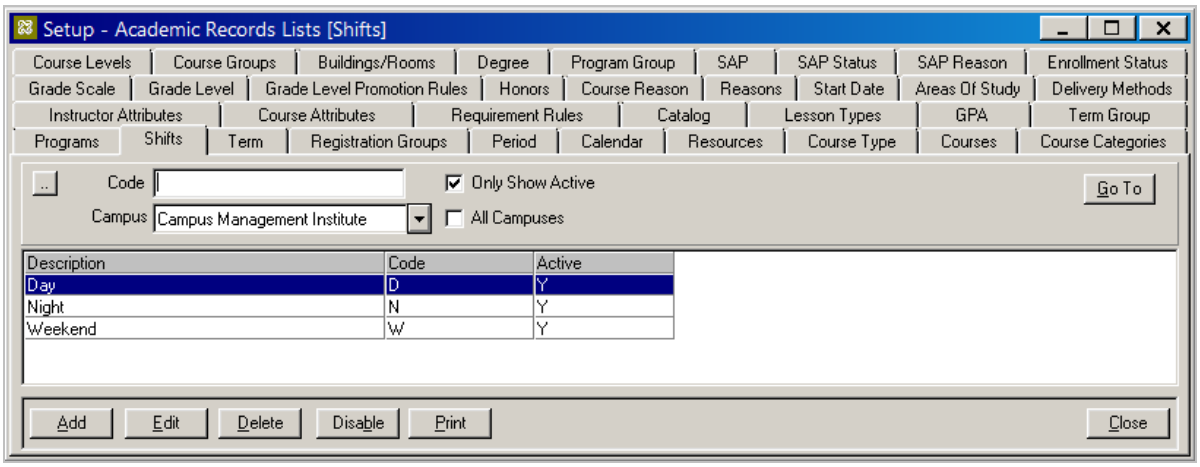
15. In the Select column, select the **Program Versions** that start on the date you entered in the Start Date Code Setup form. You can clear any program version that was previously selected. Click **Select All** or **Select None** to select or clear all program versions listed.
16. Scroll the grid horizontally to view all columns. Program, Version, Description, Campuses, and Start Date are read-only fields.
17. Click the **Mid-Point** field to display a calendar. Double-click a date to post it to the **Grad Date** field.
18. Click the **Grad Date** field to display a calendar. Double-click a date to post it to the **Max End Date** field.
19. Click the **Max End Date** field to display a calendar. Double-click a date to post it to the **Extern Start Date** field.
20. Edit the **Max. Starts**, **Min. Starts**, and **Budget Starts** fields if needed.
21. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Academic Records Lists [Shifts]

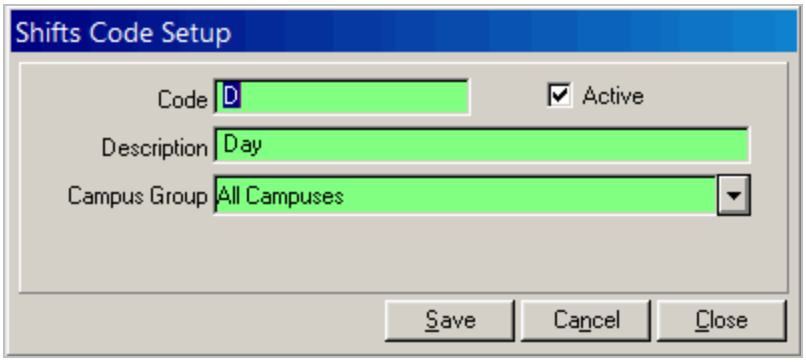
The Shifts list is used to define the blocks of time during which classes are conducted in your institution. Shifts are used in the definition of terms and program versions (start dates). Each shift code can be associated with all campuses or with a campus group.

To add or edit a list of shift codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Shifts**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Shifts Code Setup form is displayed.



7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.

10. Select a **Campus Group**.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

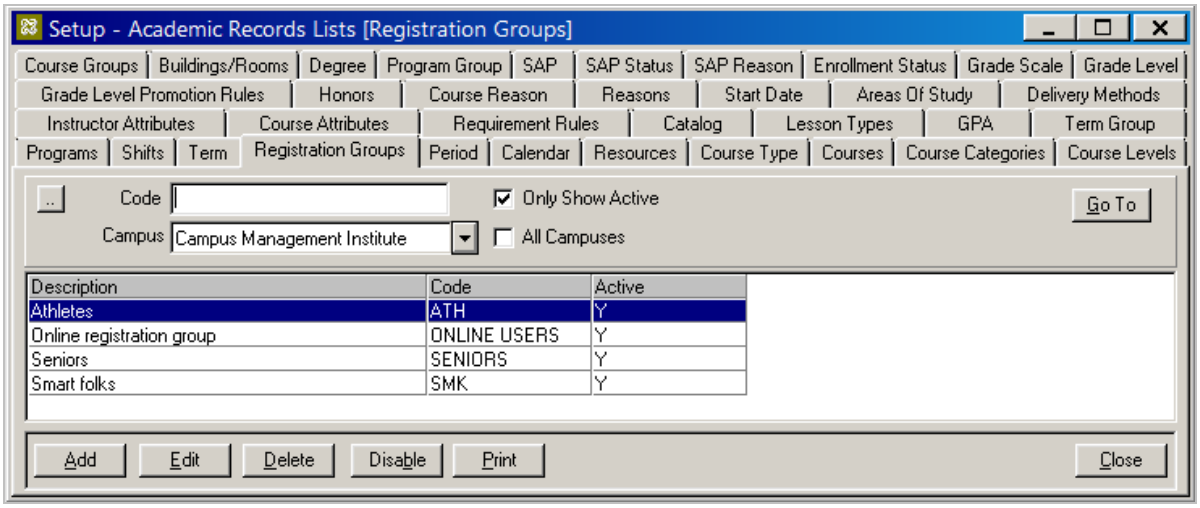
Setup - Academic Records Lists [Registration Groups]

To enhance the registration capabilities in CampusNexus Student, registration groups are used to set priority among registering students, control advisement, and set other rules that may govern a student's registration schedule. If a campus decides to use registration groups, registration groups need to be set up under Academic Records > Lists. Once they are set up, they appear in drop-down lists throughout CampusNexus Student.

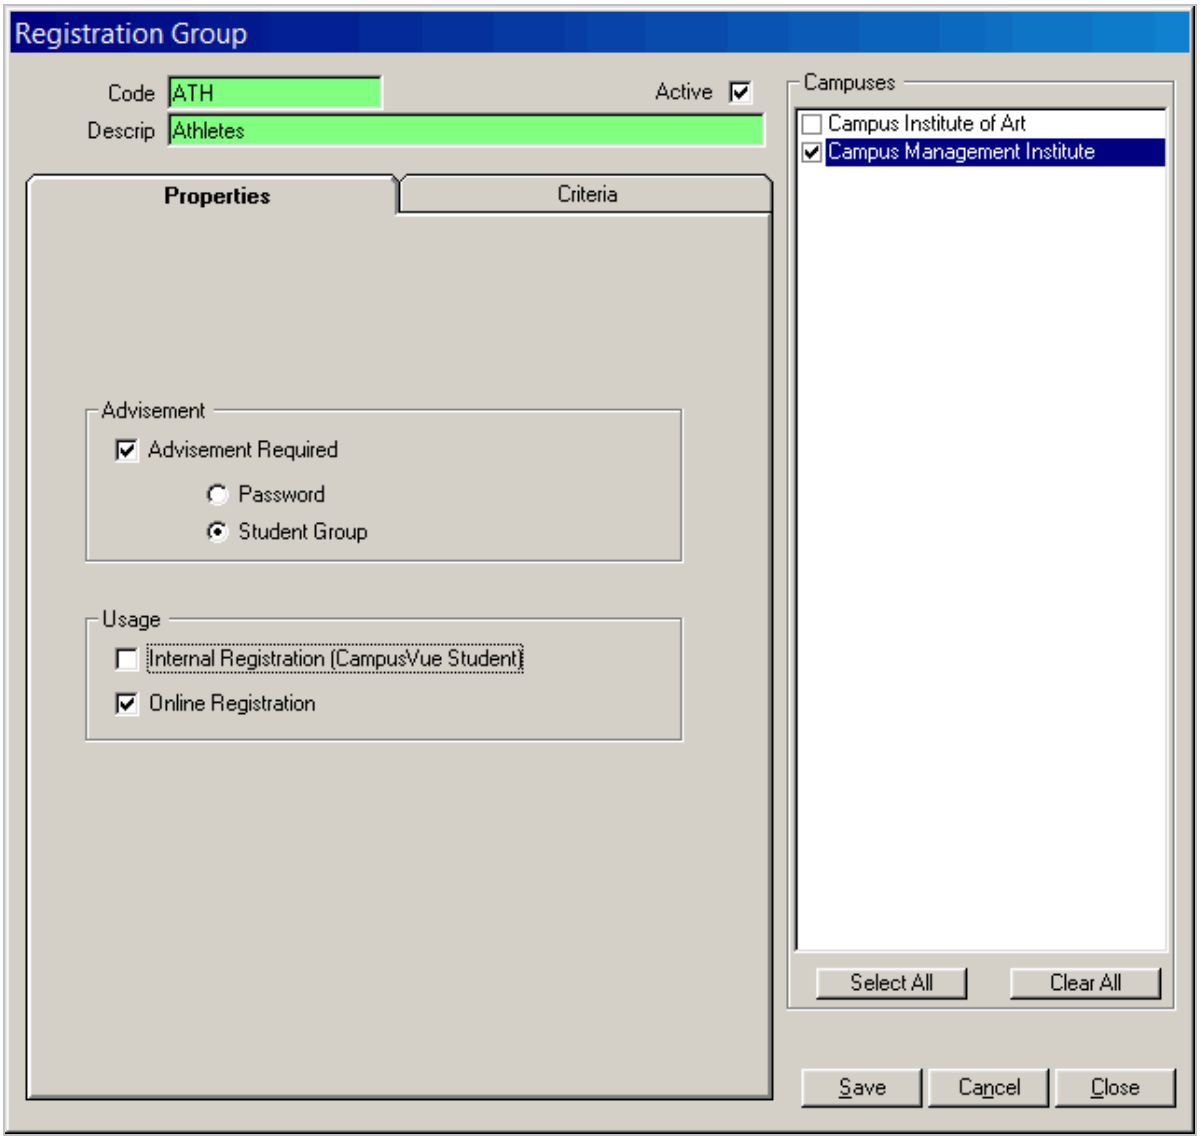
Using Define Term Registration Group procedure, you can assign groups and their priorities to the term to be enforced during manual registration or online registration.

To add or edit a list of registration groups codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Registration Groups**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Registration Group form is displayed.

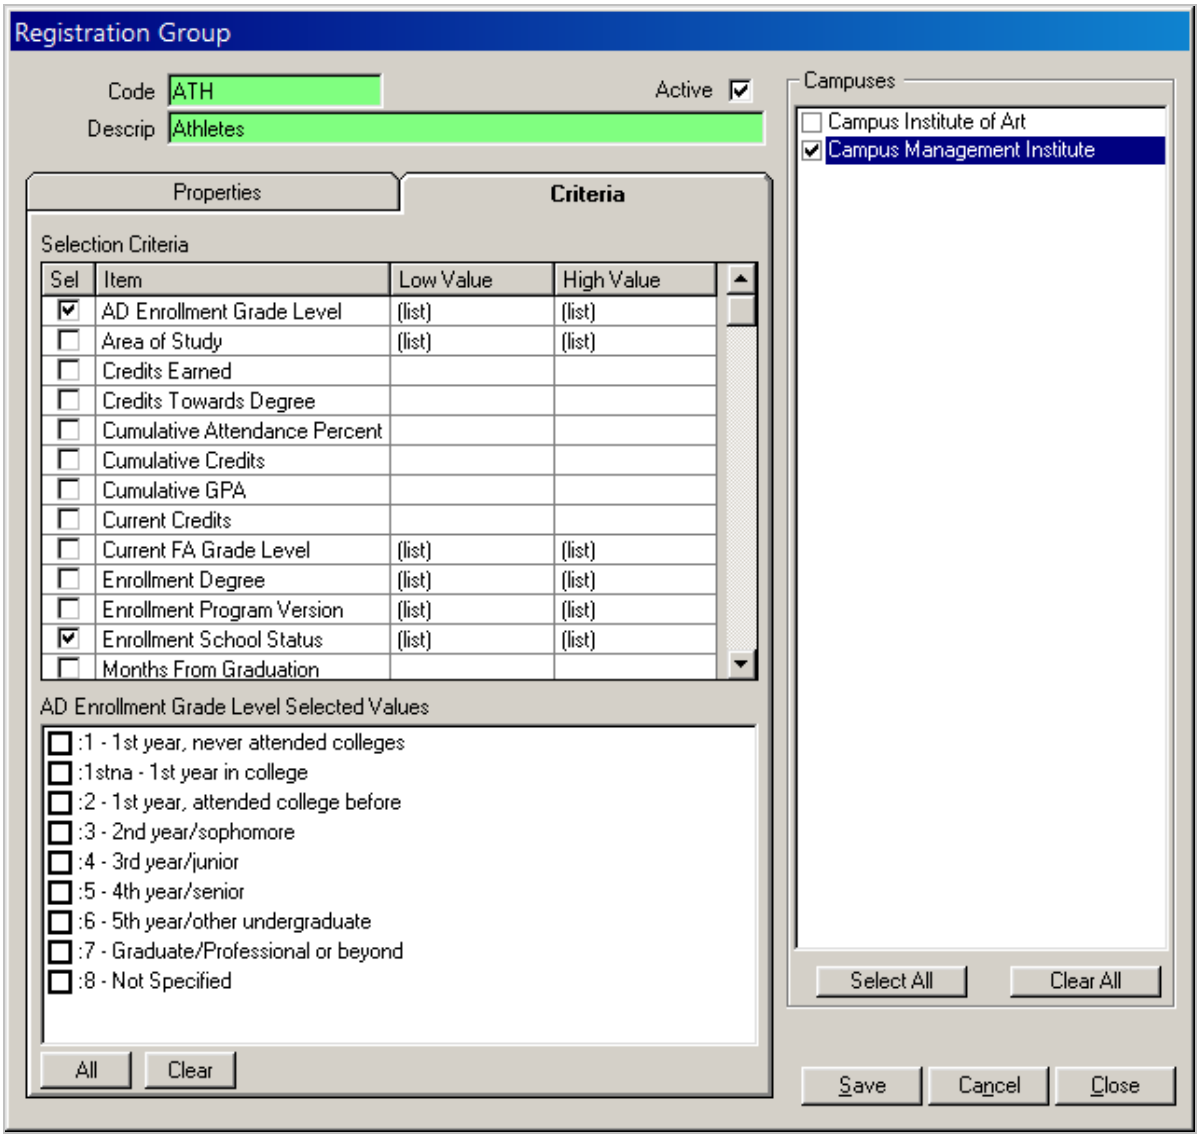


7. Specify a unique **Code**.
8. Enter a **Description**.
9. The **Active** check box is selected by default. This makes the registration group available when registration groups are assigned to a term. Clearing this check box allows you to disable a group without deleting its options.
10. Select one or more **Campuses**.
11. Select appropriate options in the Properties tab:
    - Select **Advisement Required** to automatically place an advisement hold on any student in this group. Two methods of hold are provided:
        - The student can obtain a randomly generated **Password** and provide this to the Advisor to release the hold and continue enrollment.

- The student is held by being a member of this **Student Group**. The hold is lifted when the student is no longer a member of the group (the student has satisfied the restrictions).

- Select **Internal Registration (CampusNexus Student)** to register students through CampusNexus Student.
- Select **On-Line Registration** to allow students to register online using Portal.

12. Select appropriate options in the Criteria tab (see Registration Group Criteria). All students who meet the requirements set by the criteria for a registration group are allowed to register (online or internally, as enabled in the Properties tab).



Registration Group Criteria

Criteria	Description
AD Enrollment Grade Level	Select from a list displayed at the bottom of the form.
Area of Study	When selected, a list of available areas of study is displayed at the bottom of the form. Select one or more areas of study.
Credits Earned	Total of completed credits. Specify low and high values.
Credits Toward Degree	Completed credits that apply to degree. Specify low and high values.
Cumulative Attendance Percent	Specify low and high values.
Cumulative Credits	Completed Credits + Scheduled/Current Credits. Specify low and high values.
Cumulative GPA	Specify low and high values.
Current Credits	Total number of credits in Current Status at time of Registration. Specify low and high values.
Current FA Grade Level	Select from a list displayed at the bottom of the form.
Enrollment Degree	Select from a list displayed at the bottom of the form.
Enrollment Program Version	Select from a list displayed at the bottom of the form.
Enrollment School Status	Select from a list displayed at the bottom of the form.
Months from Graduation	Specify low and high values.
Remaining Credits to Graduate	The number of credits required for the student to receive a degree. Specify low and high values.
Scheduled Credits	Total number of credits in Scheduled or Current Status at time of Registration. Specify low and high values.
Student Groups	When selected, a list of active available student groups is displayed at the bottom of the form. Expired student groups may be selected. Select one or more student groups.
Student Last Name	Specify the first three letters of the student's last name.

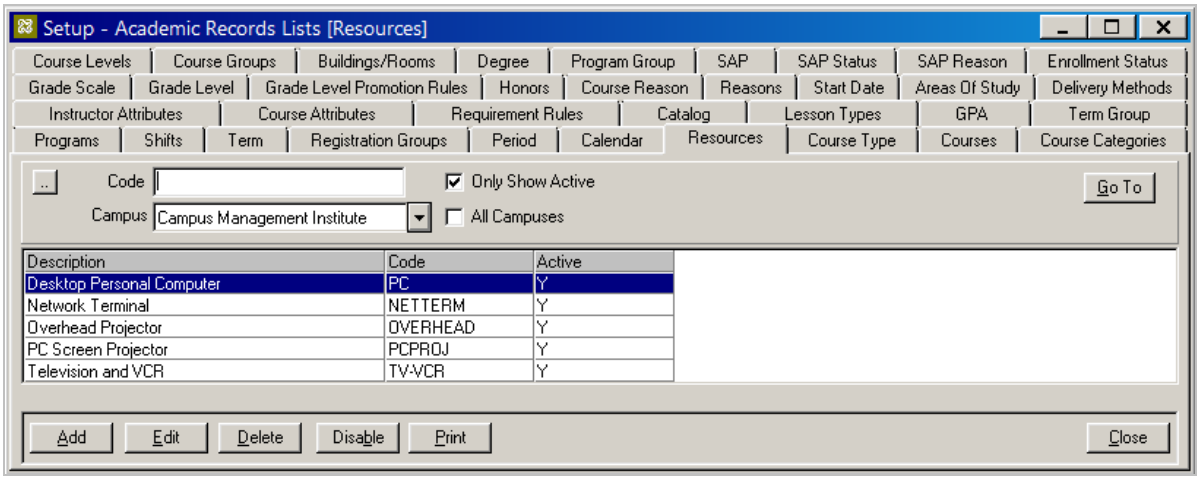
13. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Academic Records Lists [Resources]

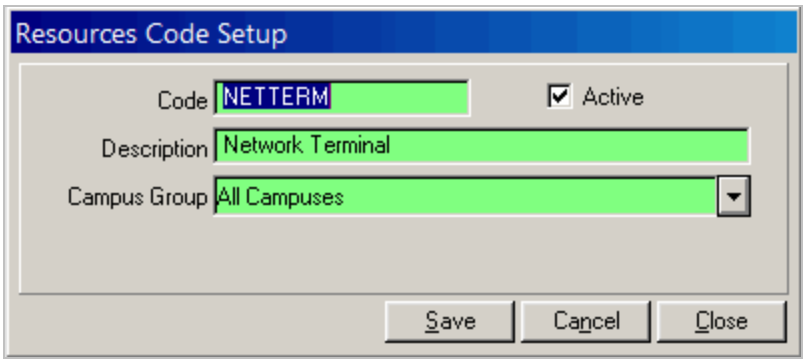
Resources are items that can be related to classrooms or courses. For example, a projector may be assigned to a classroom used for teaching English. The same item can also be related to a course that teaches German. When resources are related to a course, you can enter the number of resource units and indicate whether the units are required or optional. When resources are related to a room, you can specify the number of units in the room.

To add or edit a list of resources codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Resources**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Resources Code Setup form is displayed.



7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.

9. Enter a **Description**.
10. Select the **Campus Group** that uses the resource.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

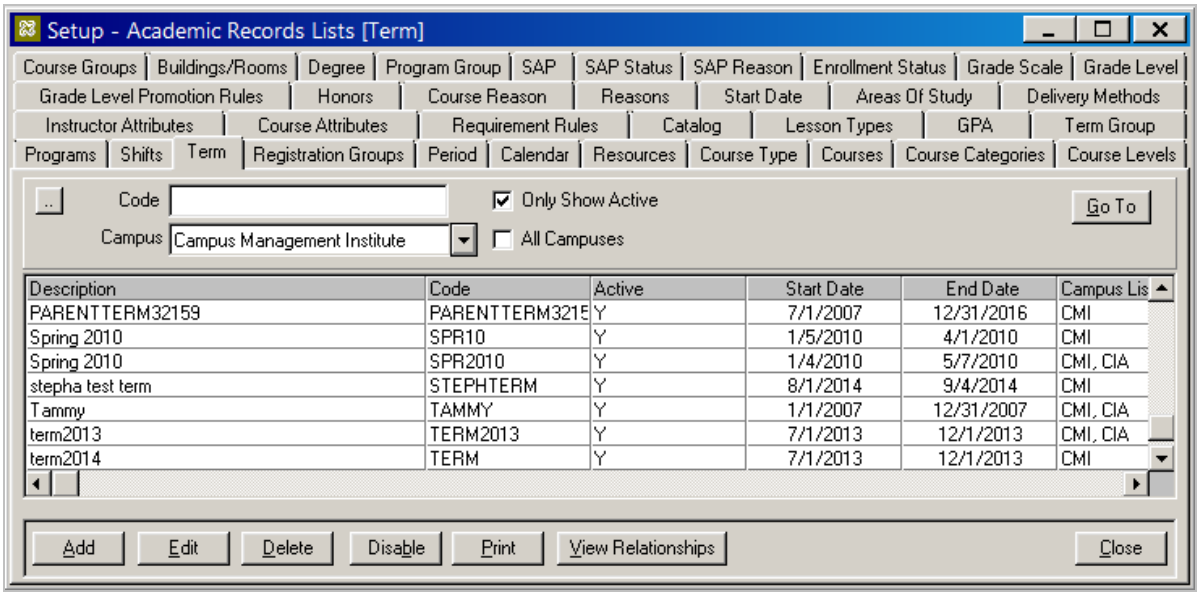
Setup - Academic Records Lists [Term]

The Term list establishes the beginning and ending dates of your institution's academic terms. Each term listed can be assigned to one or more campuses and to a shift such as day, evening, or weekend. A term can also be marked as a Global Extract term (if your institution uses Global as an FA servicer).

Note: You cannot delete a term when classes or ledger card entries are assigned to the term.

To add or edit a list of term codes:

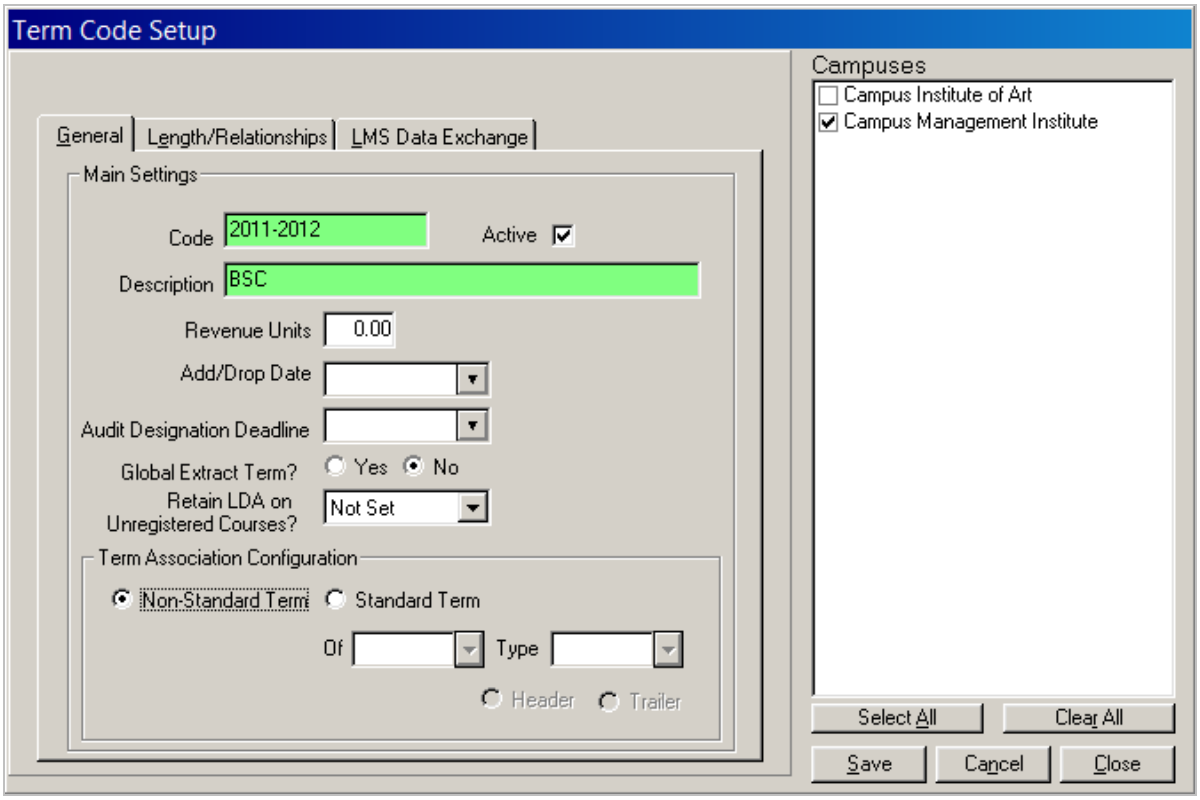
1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Term**. The list of existing term codes is displayed. By default the list is sorted in descending order by the End Date. Click the column headers to change the sort order.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **View Relationships** to see terms related to a selected term.
7. Click **Add**, or select a record and click **Edit**. The Term Code Setup form is displayed. Complete the following tabs as applicable:
    - General
    - Length/Relationships
    - Web Registration
    - LMS Data Exchange

To complete the General tab:

1. Click the **General** tab on the Term Code Setup form.



2. Specify a unique **Code**.

   If the term code you enter is already on file, a form lists duplicate codes and campuses to which they are assigned. After reviewing the list, to continue adding the duplicate term code, click **Add**. The Term Code Setup form is displayed again, after eliminating all campuses that are already using the duplicate term code. Complete the entry of the form parameters, including the selection of campuses that offer the term, and save the new record.

3. Enter a **Description**.

4. Select or clear the **Active** check box to designate the record as active or inactive, respectively.

5. Select one or more **Campuses**. You cannot save the term record without selecting at least one campus.

   You are selecting individual campuses to which the term code applies, not campus groups. If you do not have access to a campus in the list, the campus name is enclosed in brackets [ ]. When saving the record, a campus group is dynamically created or updated for all campuses selected. The campus group type is set to 'T' for the new campus group.

6. Depending on a term's start and end dates, the revenue calculation calculates that a term is N.5 months long. Some institution want to earn only N months of revenue. Enter **Revenue Units** to override the term length calculation. This setting only applies to institutions that bill by term and earn by month.

7. Select the **Add/Drop Date**, which is the last date when students are allowed to modify their schedule for this term.

8. Specify the **Audit Designation Deadline** based on the term associated with the course. You cannot register a

student for a course as Audit after this date. If the date entered is not a valid date, an error message is displayed.

9. If your institution is set up to send data to a third party servicer such as Global, the option **Global Extract Term?** is displayed. Select Yes or No as required.

   Note: The flag that determines whether this field is displayed is selected under Setup > Campus Locations > Campuses > Financial Aid (tab). CampusNexus Student determines if any campus in the selected campus group is set up to extract to Global. If a record is found where SyCampus.ServicerLink = 'G', CampusNexus Student displays the Global Extract term? field.

10. Select one of the following values from the **Retain LDA on Unregistered Courses** list:

    - Not Set - Allows the LDA to be modified depending on the 'Retain LDA on Unregistered Courses' setting at the campus level. This setting is in effect only for this term unless overridden by a similar 'Retain LDA on Unregistered Courses' setting contained within a specific course reason code.
    - No - Allows the student's attendance records for the unregistered course to be lost and the LDA reset to the last date the student was in attendance in courses other than the unregistered course.
    - Yes - Keeps the LDA for the specific course, even though the attendance records are removed.

11. In the **Term Association Configuration** area:

    - Select **Non-Standard Term** when FA Academic Calendar 1 (non-standard terms) is selected in the FA Program Version Setup (this option disables the Standard Term button and drop-down lists).
    - Select **Standard Term** and **Type** when configuring scheduled academic years (SAYs). Terms that are configured with these options are used in SAYs.

    When **Standard Term** is selected the following options are available:

    - **Of** - Quarter, Semester, and Trimester
    - **Type** - Fall, Winter, Spring, and Summer

12. You can specify a Standard Term to be a **Summer** (Type) **Header**, or **Trailer**, or neither. The Summer Header or Trailer options are enabled only for the Standard Term of Type Summer. Choose only one of the Header or Trailer options for the Summer Term.

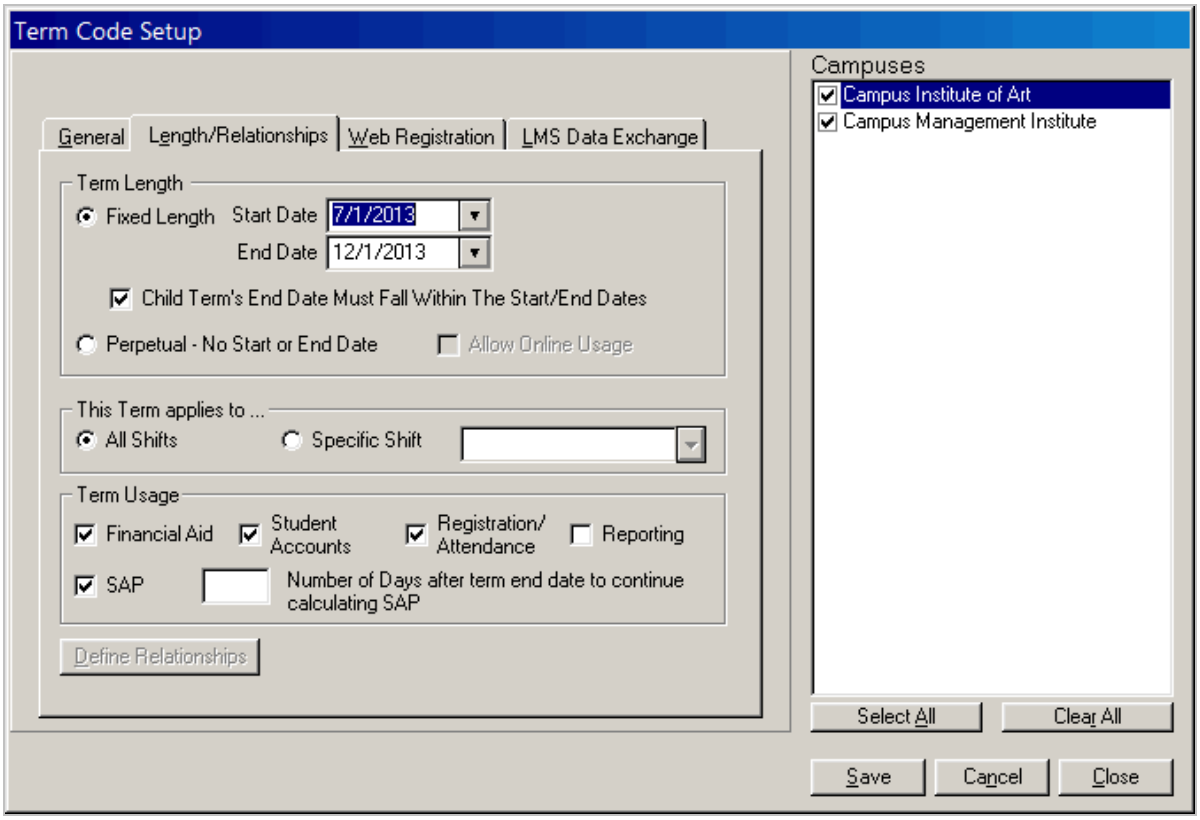
    To clear a previously selected Header or Trailer option, use the Delete key. (This applies only to Header or Trailer options.)

    By configuring a Summer term to be a Header or Trailer in the SAY, student financial aid packaging can be done for all possible terms at once, allowing students to plan their schedules for the year based on the availability of funding for each semester. For example, students can budget using all their annual funds by allocating the extra funds from the Fall and Spring semesters to the Summer semester to make up for any shortage of funds.

13. Click **Save**.

To complete the Length/Relationships tab:

1. Click the **Length/Relationships** tab on the Term Code Setup form.



2. For Term Length, select **Fixed Length** or **Perpetual - No Start or End Date**.

   If you select Fixed Length, specify the **Term Start Date** and **Term End Date**.

   Note: If you have overlapping start and end dates for multiple terms at the same campus and on the same shift, you may run into conflicts when scheduling classes and instructors in rooms and students in class sections. Be sure you do not have resource conflicts if you overlap term dates.

3. If this is a perpetual term without a start or end date, the **Allow Online Usage** check box is enabled. Select this check box if you want this perpetual term to appear in Portal.

4. Select the option of enforcing whether the end date for any of the term's child terms must fall within the start and end dates of the parent term. To enforce the rule, select **Child Term's End Date Must Fall Within The Start/End Dates**.

   This check box is disabled if the term is set to Perpetual - No Start or End Date.

5. Select **All Shifts** or **Specific Shift**.

   If you select Specific Shift, select the **Shift** to which this term applies.

6. For Term Usage, select one of the options to determine how this term is used.

   - Select **Financial** if the term is used for scheduling financial aid.
   - Select **Student Accounts** if the term is used for posting financial aid or billing.

- Select **Registration/Attendance** if the term is used for registration and attendance.
- Select **Reporting** if the term is used for reporting only.

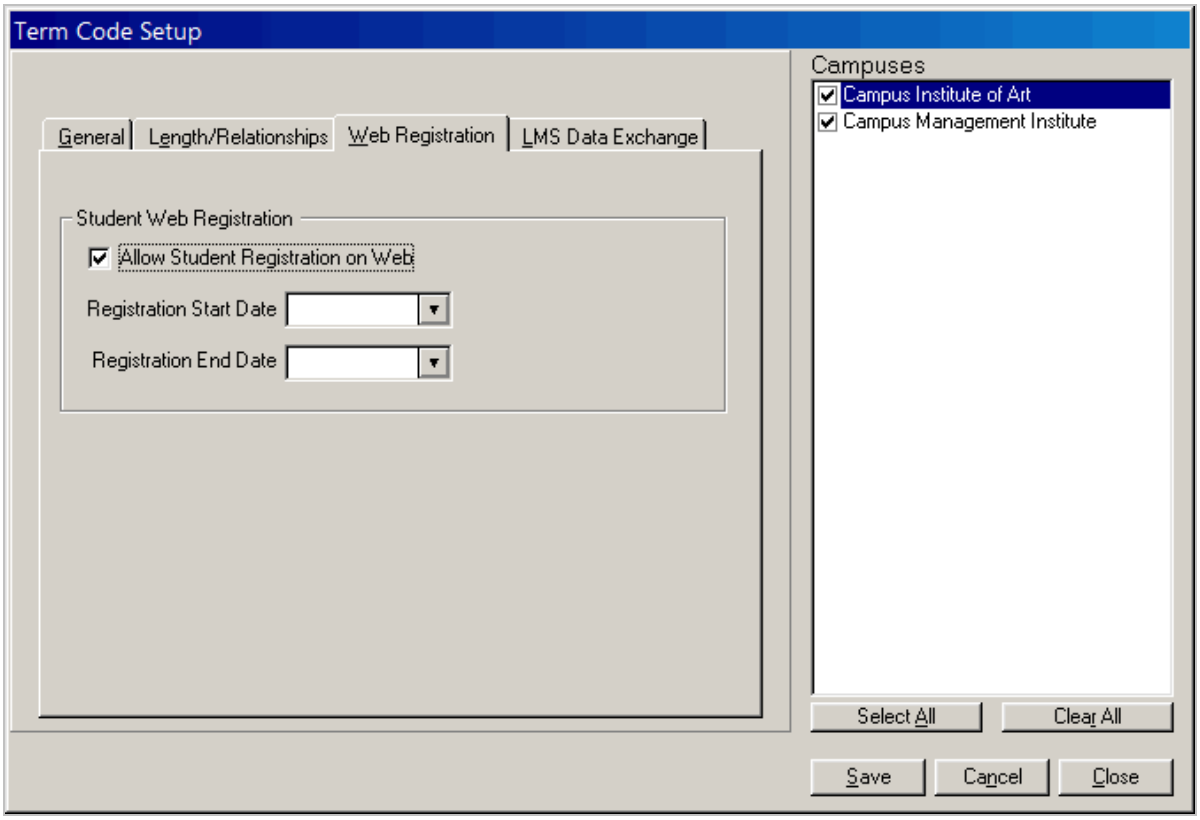
7. Select **SAP Term** when editing or adding a term. The SAP Calculation form lists only terms that have this check box selected and meet other criteria to retrieve the terms, such as campus.
8. If the campus uses Automated SAP Calculation processing, you may override the campus default value for the **Number of Days after term end date to continue calculating SAP** by entering a new value. The new value adjusts the number of days after the end of this term during which Automatic SAP Calculations takes place. If this field is left blank, when Automatic SAP calculations are performed, CampusNexus Student uses the value entered for the campus to determine if processing will occur.
9. Click **Save**.

Once you have defined a term, you can define relationships to other terms by clicking the **Define Relationships** button. For more information, see Term Relationships.

To complete the Web Registration tab:

The Web Registration tab only is displayed if you are using the legacy CampusNexus Student Web Interface and the Use Portal? option is disabled. If your institution permits students to register for classes via the legacy Web Interface, set up the terms that are active for web registration.

1. Click the **Web Registration** tab on the Term Code Setup form.

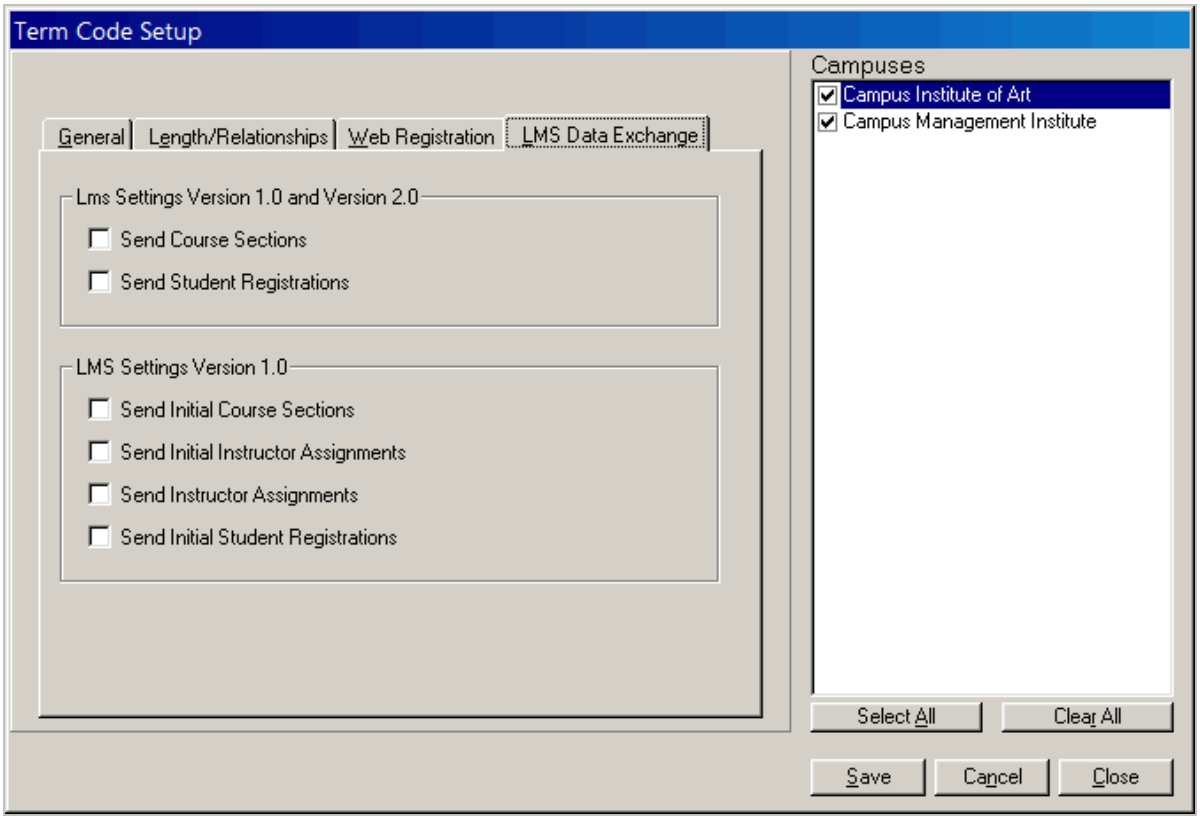


2. Select **Allow Student Registration on Web** to allow students to register online for this term.
3. Select the **Registration Start Date**.

4. Select the **Registration End Date**.
5. Click **Save**.

To complete the LMS Data Exchange tab:

1. Click the **LMS Data Exchange** tab on the Term Code Setup form.



2. Select appropriate LMS Settings to exchange data pertaining to course sections, instructor assignments, and student registrations.
3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Term Relationships

Term relationships provide ability to schedule a class in more than one term (floating terms) with a single class roster. Term relationships allow multiple terms to be rolled up for scheduling, financial aid, and billing purposes. When a child term is defined as a part of a parent term, multiple start dates can be offered for the child terms while still being able to calculate financial aid and academic information for the parent term.

Note:

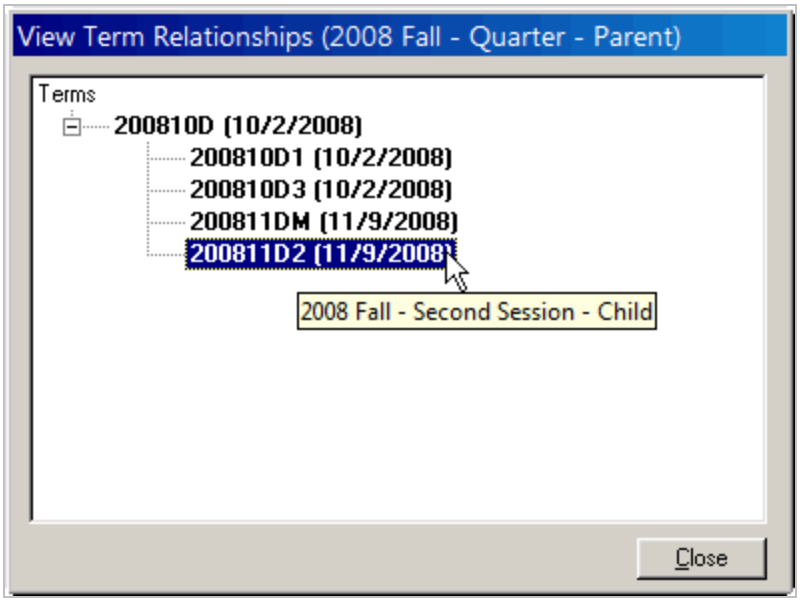
- A parent term can have many child terms.
- Child terms can be parent terms to other terms.
- A child term can have more than one parent term.
- A parent term cannot be selected as a child term for itself.
- A child term cannot be selected as a parent term for itself.

To view term relationships:

1. On the Setup - Academic Records Lists [Term] form, select a term and click **View Relationships**. The View Term Relationships form is displayed.

   The name of each term is displayed (along with its start date) in relation to its parent or children. When you hover over a term name, a pop-up displays the parent-child relationship.

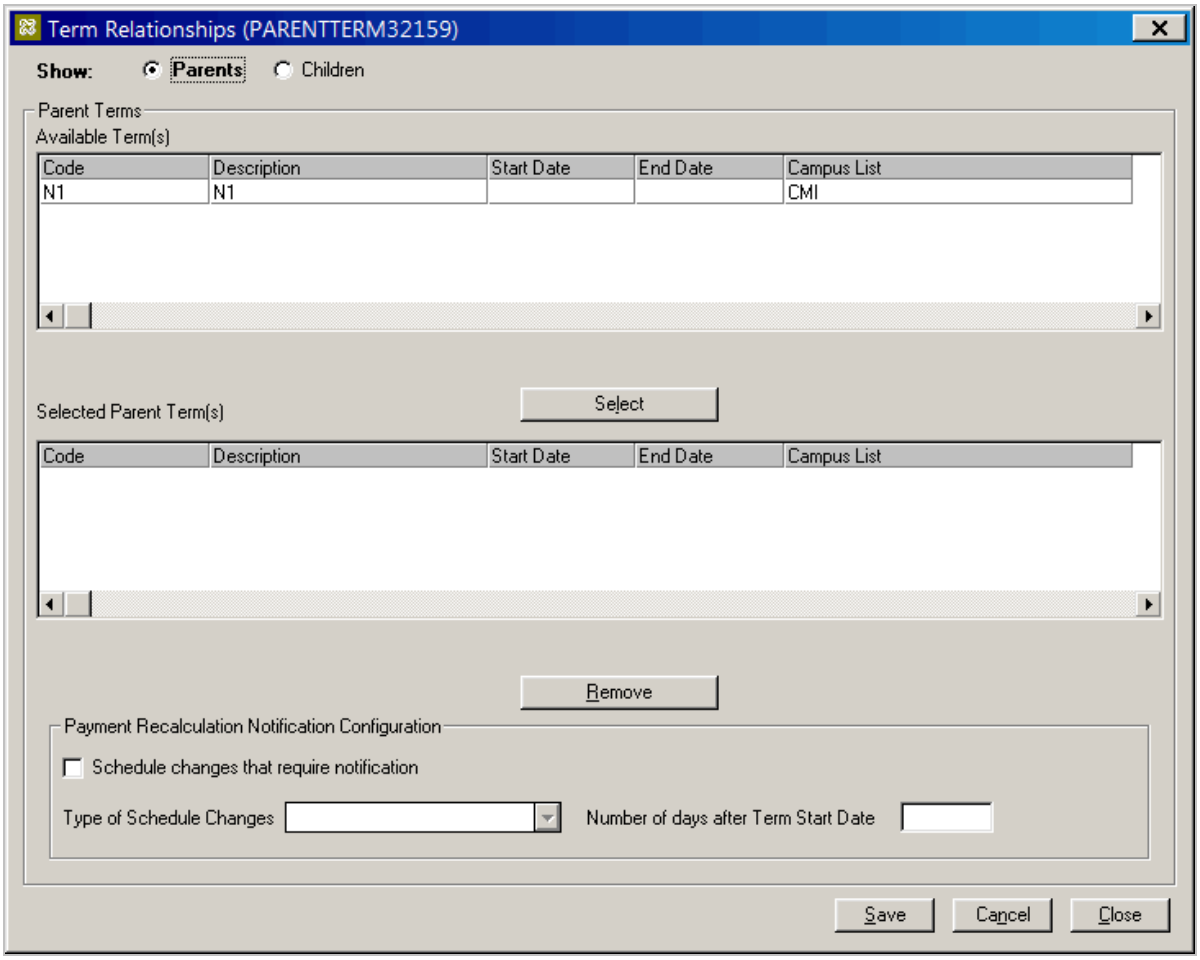
   All terms related to the term selected on the Setup - Academic Records Lists [Term] tab when the View Relationships button was clicked are displayed in the tree, including active, inactive, and reporting only terms.



2. Click the plus (**+**) and (**-**) signs to expand or collapse the tree branches.
3. Click **Close** to close the form.

To define term relationships:

1. On the Length/Relationships tab of the Term Code Setup form, click **Define Relationships**. The Term Relationship form is displayed. The name of the selected is appended to the form title. If any parent or child terms are defined, they are listed on the form. Only available terms (depending on what filters are active at the time), are listed.



2. Select a **Show** option: Parents or Children.
3. To assign a child to the selected term, select a term from the list of available child terms, and click **Select**.

   Note: When editing a term, if students are registered for classes in the selected term, neither child nor parent terms are allowed to be associated with the selected term. A child term cannot be removed from the parent term if students are scheduled for classes in the child term.

   CampusNexus Student checks if relationships exist for the term being modified. Reporting terms do not apply. If non-reporting relationships exist, the following message is displayed: *"This term has term parent or child terms associated with it. Please verify that Financial Aid, Student Accounts, and Registration/Attendance terms exist for each family of terms."*
4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Payment Recalculation Notification Configuration

The bottom section of the Term Relationship form is used to set up Payment Recalculation Notification -- which is part of the Global Weekly Extract -- to include students who changed their course load in a child term after a defined period of time and whose type of schedule change matches a defined type.

The Payment Recalculation Notification section is used to configure the child terms used for payment recalculation. The section is enabled only if:

- The term is a child term
- The term is used for Global Campus.

- At least one parent term associated with the child term is designated as a Global term.

To configure the payment recalculation notification:

1. Select the **Schedule changes that require notification** check box to enable payment recalculation.
2. Use the **Type of Schedule Changes** options to determine the kinds of schedule changes that will trigger a payment recalculation notification. The options are:
    - Decreases Only (default)
    - Increases Only
    - Increases & Decreases
3. Specify a numeric value in the **Number of days after Term Start Date** field. Payment recalculation notification information is sent when a student's schedule changes and the Global Weekly Extract is performed on or after the specified number of days has elapsed after the term start date.
4. Click **Save**.

While generating the Global Weekly Extract, CampusNexus Student uses the following criteria to determine when the Enrollment Status flag in the extract should be populated with an asterisk (*).

a. Notification of Payment Recalculation must be selected as an option when processing the Weekly Extract.
b. Payment Recalculation Notification must be enabled for at least one child term as shown by the 'Schedule Changes Require Payment Notification' check box having been selected on the 'Define Relationships' form for that term.
c. The configured number of days after the term start date must have elapsed for the child term.
d. The stored scheduled hours for the child term (used in calculating Current Scheduled Hours) must be different than the value last reported for the student for the child term.
e. If the stored scheduled hours (from item d above) are different the difference must be of the Type of Schedule Change (Increases Only, Decreases Only, or Increases & Decreases) defined for that term.

If all criteria are met, the Estimated Enrollment Status field in the Weekly Extract is populated with an asterisk (*).

Pre-Pull/Add-Drop Automation Configuration

This function is used only in conjunction with Pre-Pull/Add Drop Automation.

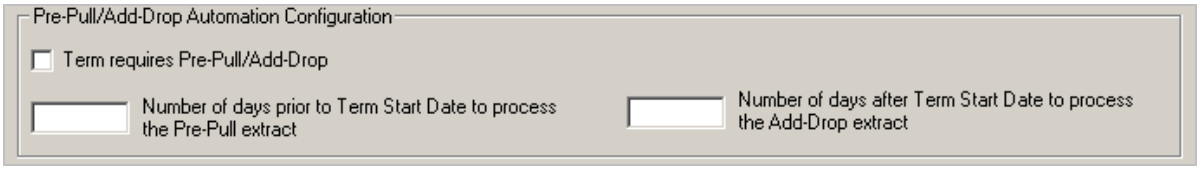
Note: Configuring this option has no effect on CampusNexus Student functions, unless the institution uses Pre-Pull/Add-Drop Automation.

This option is available only if the term meets the following conditions:

- The term is used by a Global Campus.
- The term is not a child term.

To configure Pre-Pull/Add-Drop Automation:

1. Select **Term requires Pre-Pull/Add-Drop** to indicate that this term should be included in the automated Pre-Pull/Add-Drop process.



2. The automated Pre-Pull extract for this term occurs over a time period specified by the institution that runs from a

specified period before the term starts to the Term Start Date. To define the time period before the Term Start Date during which Pre-Pull extracts occurs, enter a number representing the **Number of days prior to Term Start Date to process the Pre-Pull extract**.

3. The Add-Drop extract occurs beginning on the Term Start Date and runs for a specified number of days after the Term Start Date. Define the period after the Term Start Date during which Add-Drop extracts occurs by entering a number representing the **Number of days after Term Start Date to process the Add/Drop extract.**
4. Click **Save**.

Setup - Academic Records Lists [Term Group]

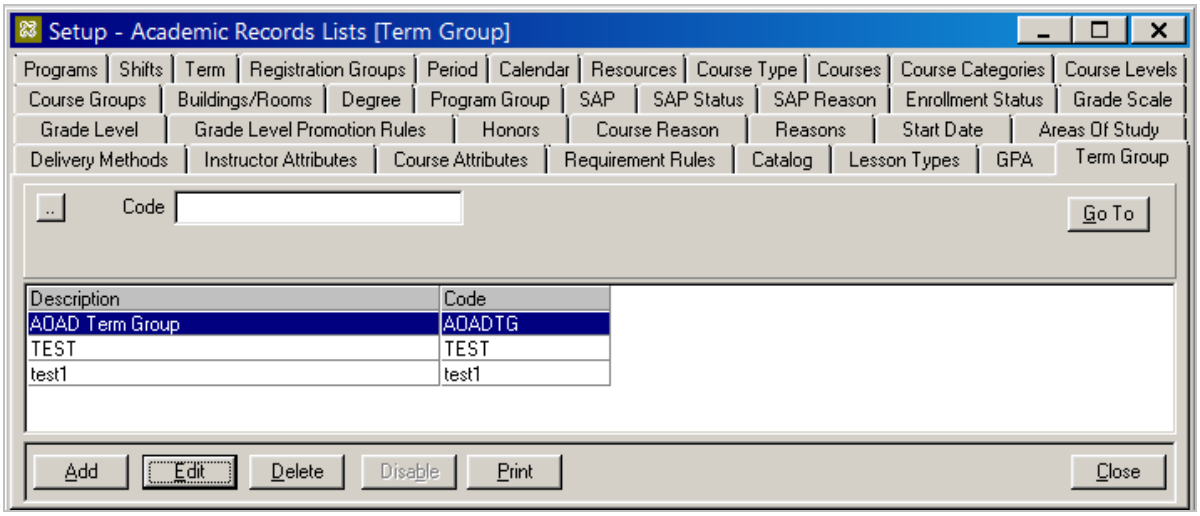
Term groups can be created to connect terms that are not shared. Administrators group a set of registration or attendance terms that can be used to present an overall enrollment status for a student. Term groups allow CampusNexus Student to calculate the aggregation of credits/hours and track enrollment status for students who may be attending multiple institutions concurrently with different academic calendars.

A term can be added to or removed from a group even if registration has already occurred in the term. Administrators can see when the overall enrollment status for a student is recalculated including any changes that are made to the term groups.

Note: A term can be placed in one term group only.

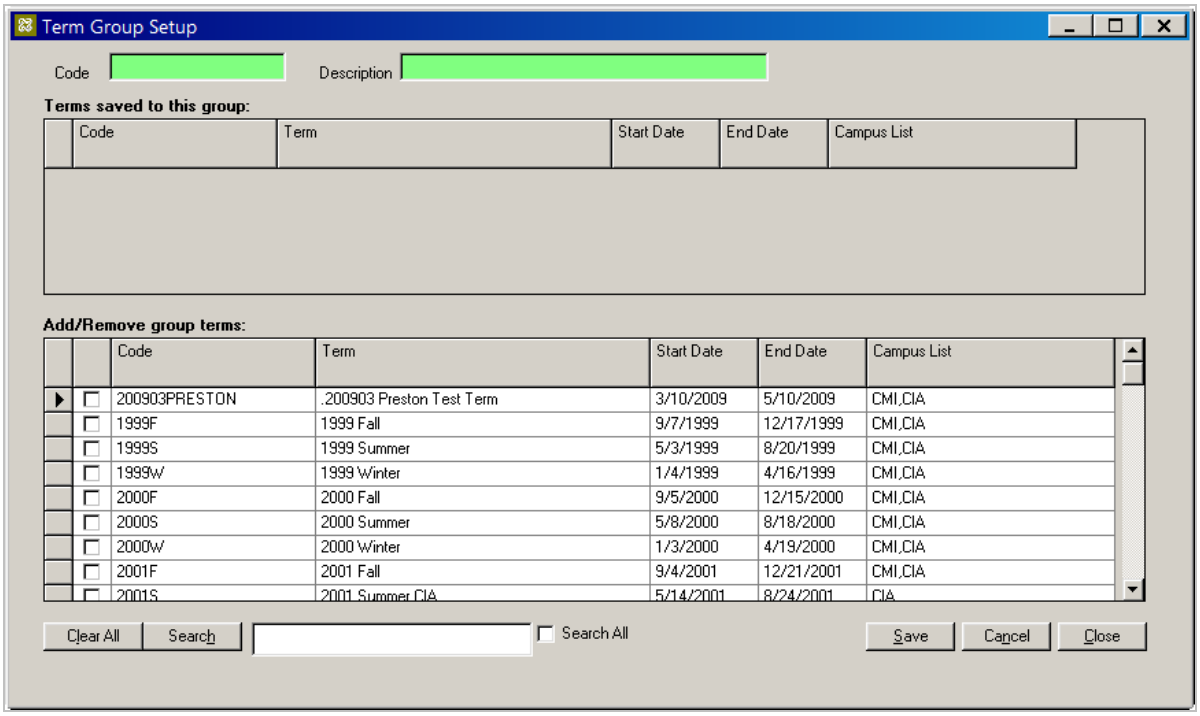
To add or edit a list of term group codes:

1. Navigate to **Lists** > **Academic Records**. The Setup - Academic Records Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Term Group**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Click **Add**, or select a record and click **Edit**. The Term Group Setup form is displayed.

   The top grid consists of terms that have been saved to the term group. The bottom grid consists of terms that are available to be added or removed from the term group. Since terms can cross campuses, the Campus List is included to allow users to differentiate between terms that may have been named the same.

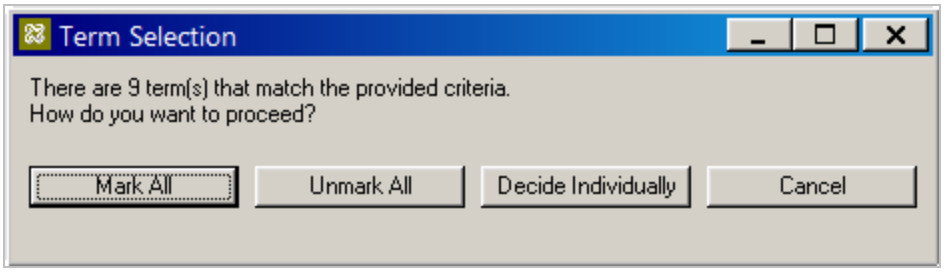


5. Specify a unique **Code**.

   Note: Terms available for selection must be Parent or Standard terms (terms with no relationships). Both types of terms should not have "reporting only" set as their term usage. A term group can mix terms from different campuses. You cannot select a term that is already associated with another term group.

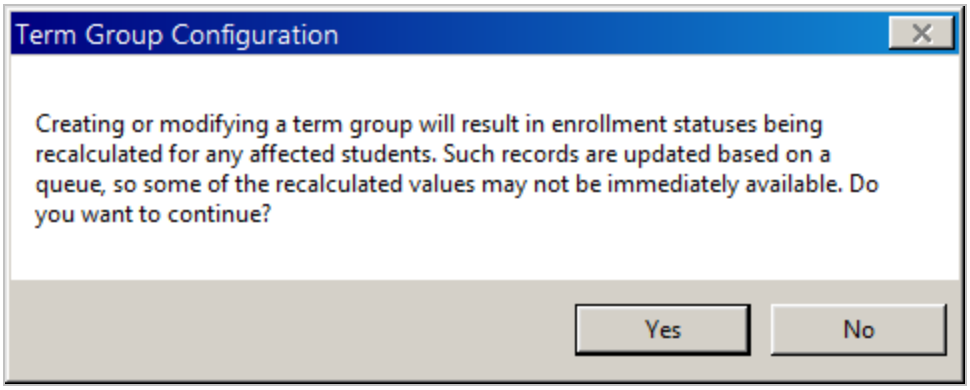
6. Enter a **Description**.

7. Select **Terms** in the bottom grid. Scroll through the list or click **Search** to find applicable terms. The search result provides the option to select all terms found or to decide individually.



8. Click **Save**. Any changes made to a term group cause a recalculation of the overall enrollment status for students.

9. The Term Group Configuration message is displayed. Click **Yes** to proceed.



10. Click **Delete** to remove a term group. When you delete a term group, a message indicates if there are associated terms.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Note: Calculated enrollment statuses based on term groups are viewable at the enrollment and term levels. Navigate to View > Academic Records > Enrollment for more information.

Lists > Career Services

When you navigate to Lists > Career Services, the Setup - Career Services form is displayed. Add, edit, delete, enable, disable, and print Career Services lists from the following tabs:

- Career Fields
- Certifications
- Contact Type
- Corporate
- Employer Contact Attributes
- How Placed
- Industry
- Job Benefits
- Job Category
- Job Source
- Job Title
- Job Type
- Location
- Reasons
- Salary Type
- Skills

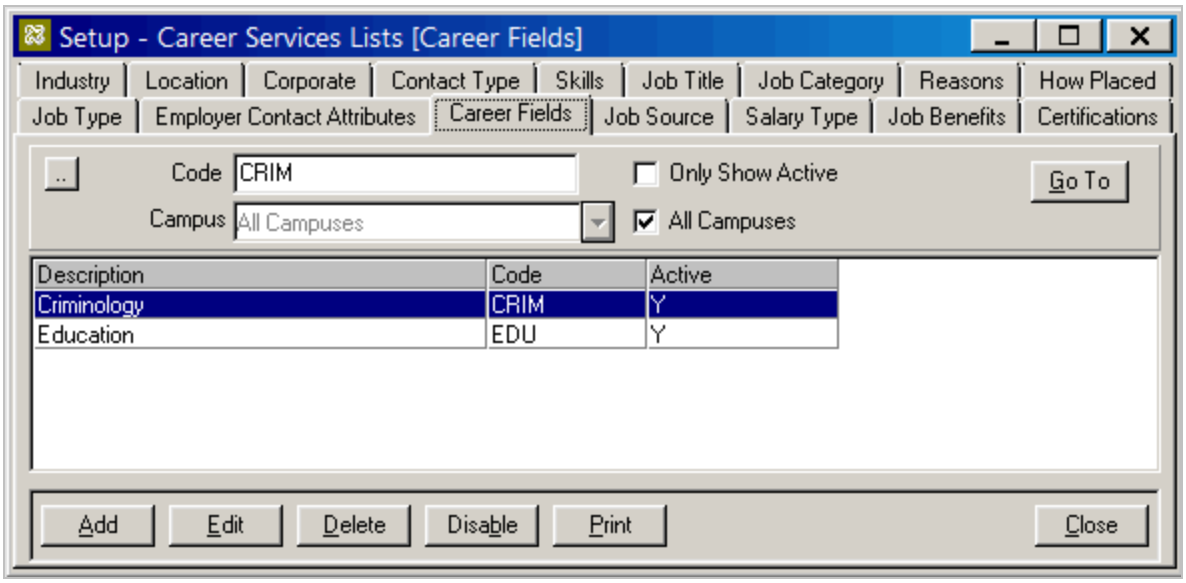
See Maintaining Lists for instructions on adding, editing, deleting, disabling, enabling, and printing lists.

Setup - Career Services Lists [Career Fields]

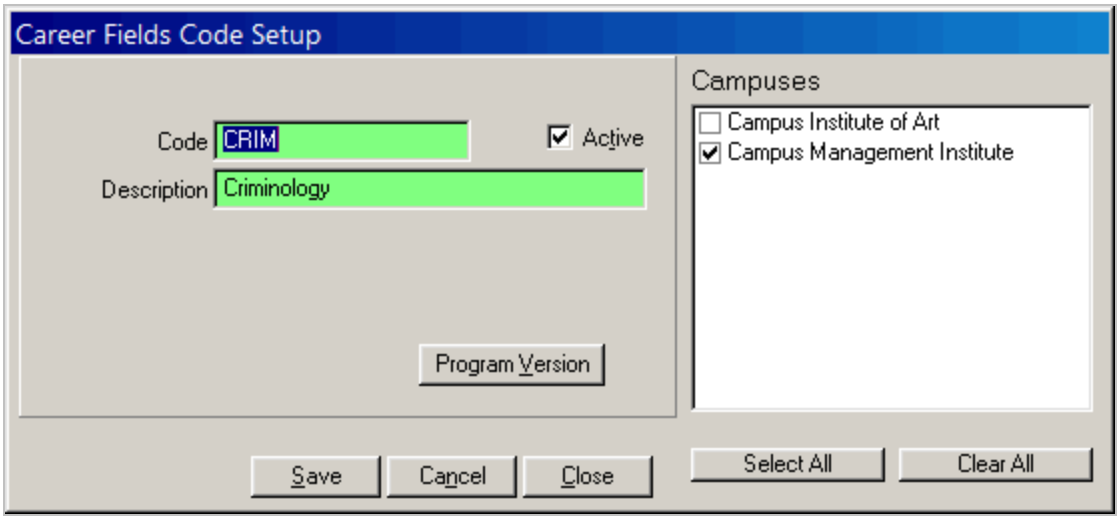
You can define codes to for different career fields.

To add or edit a list of career field codes:

1. Navigate to **Lists** > **Career Services**. The Setup - Career Services Lists form is displayed.
2. Select the **Career Fields** tab.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Career Fields Code Setup form is displayed.



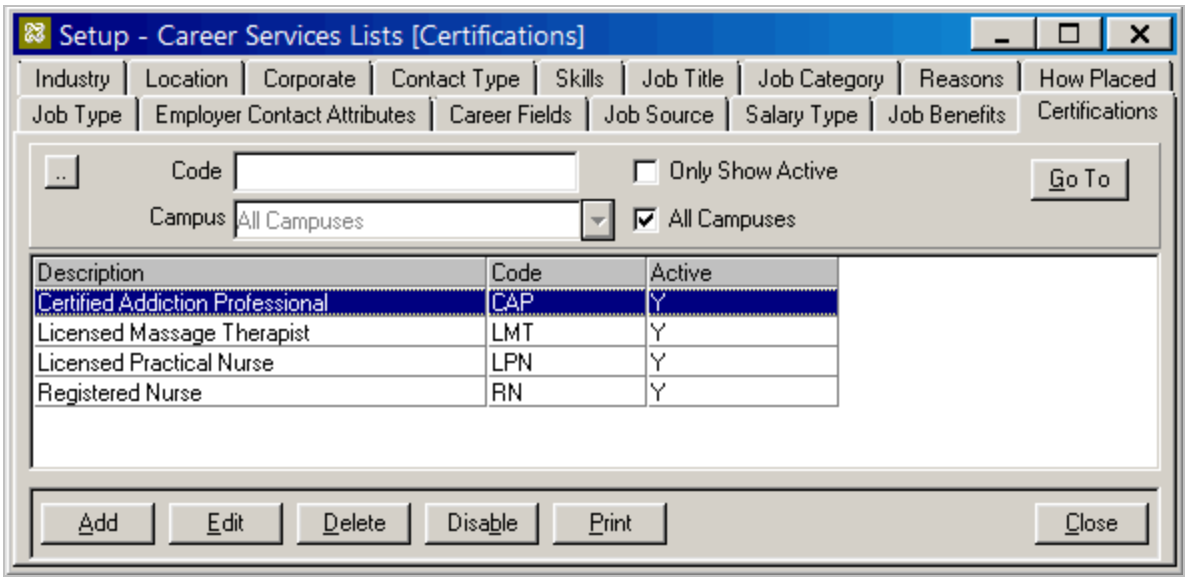
7. Specify a unique **Code**.
8. Enter a **Description**.
9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
10. Select one or more **Campuses**.
11. Click **Program Version** to associate program versions with this career field. For more information, see Associate Job Skills with Program Versions.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Career Services Lists [Certifications]

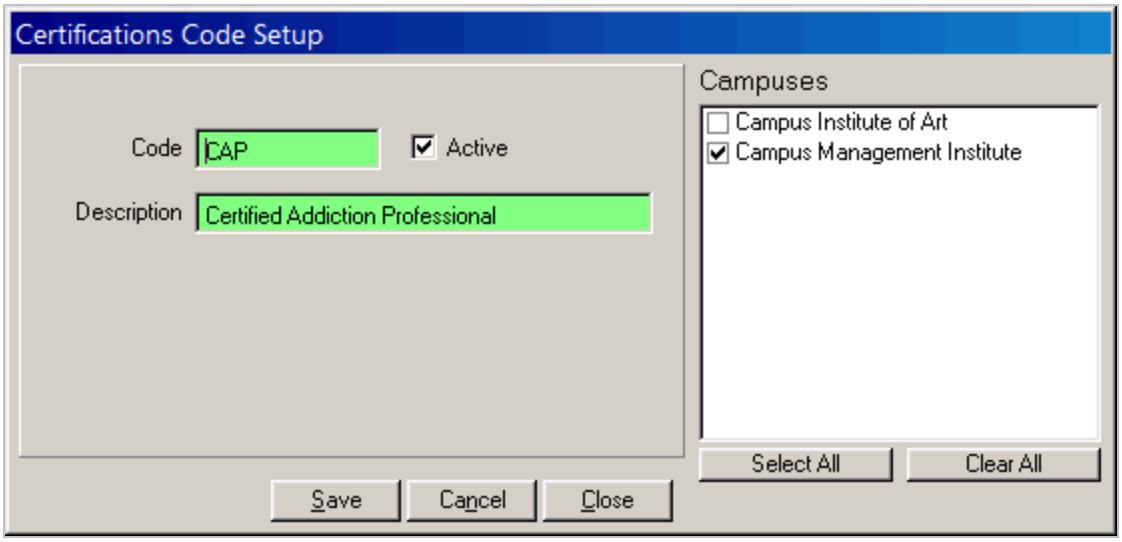
Certifications codes are linked to students who have achieved special certifications or licensing.

To add or edit a list of certification codes:

1. Navigate to **Lists** > **Career Services**. The Setup - Career Services Lists form is displayed.
2. Select the **Certifications** tab.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Certification Code Setup form is displayed.



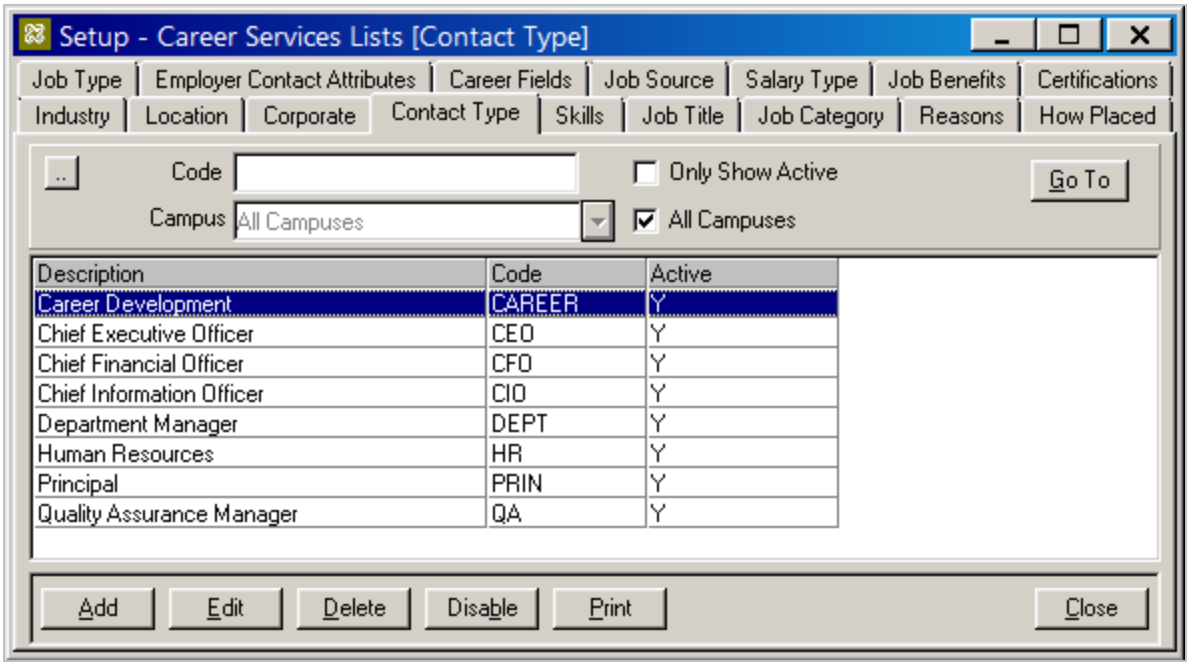
7. Specify a unique **Code**.
8. Enter a **Description**.
9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
10. Select one or more **Campuses**.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Career Services Lists [Contact Type]

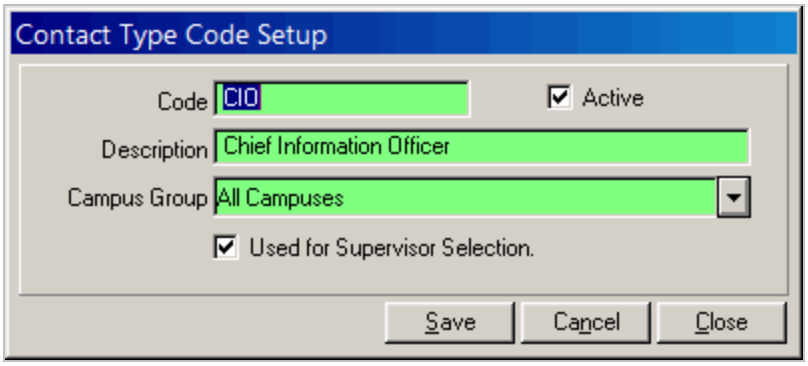
Contact types are used to categorize the contacts within an employer's organization. The Contact Type code is linked to individual contact records which are, in turn, linked to employer records.

To add or edit a list of contact type codes:

1. Navigate to **Lists** > **Career Services**. The Setup - Career Services Lists form is displayed.
2. Select the **Contact Type** tab.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Contact Type Code Setup form is displayed.



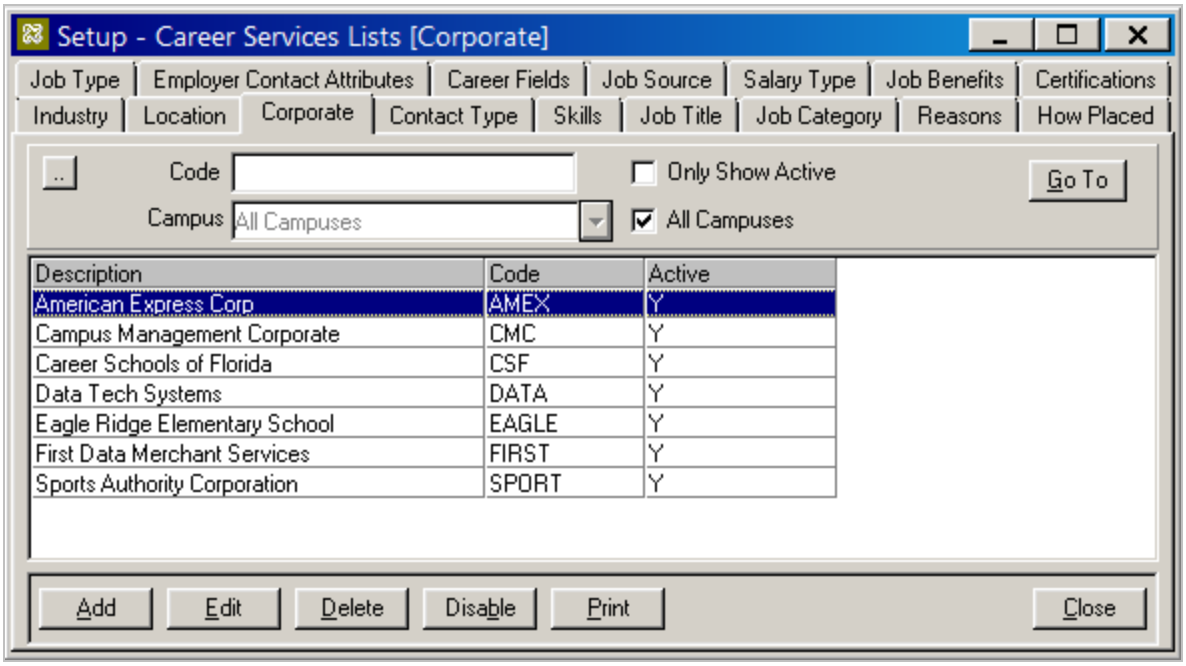
7. Specify a unique **Code**.
8. Enter a **Description**.
9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
10. Select the **Campus Group** to which the Contact Type code applies.
11. Select the **Used for Supervisor Selection** check box if this Contact Type is used for supervisor selection.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Career Services Lists [Corporate]

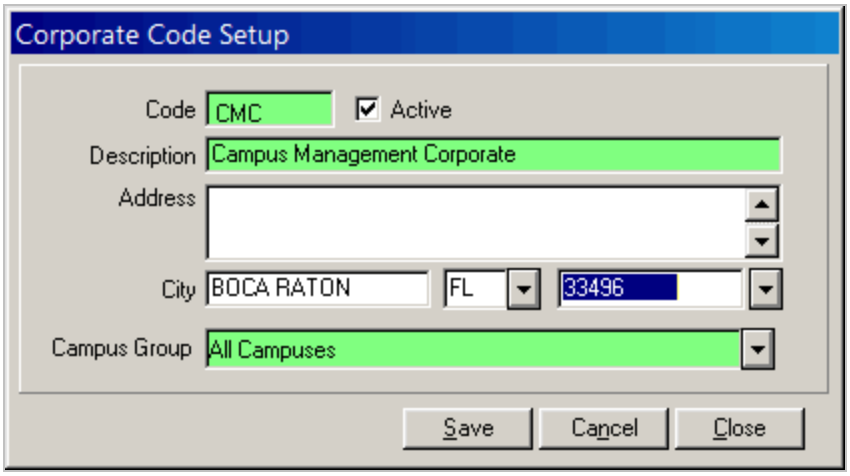
Entries on the Corporate list represent the corporate headquarters or consolidation point for employers that have more than one branch office or location. You can relate all the branch locations to the main headquarters for reporting and analyzing Career Services at the enterprise level.

To add or edit a list of corporate codes:

1. Navigate to **Lists** > **Career Services**. The Setup - Career Services Lists form is displayed.
2. Select the **Corporate** tab.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Corporate Code Setup form is displayed.



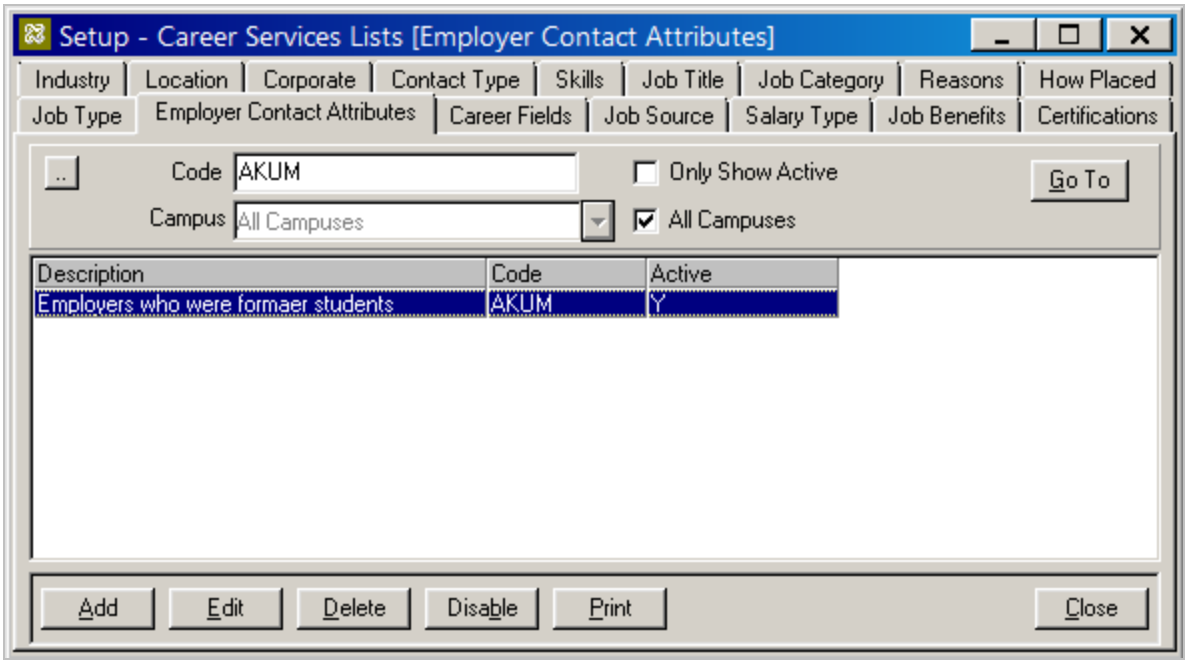
7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.
10. *Optional*: Specify an **Address**, **City**, **State**, and **ZIP** code.
11. Select the **Campus Group** to which the corporate record applies.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Career Services Lists [Employer Contact Attributes]

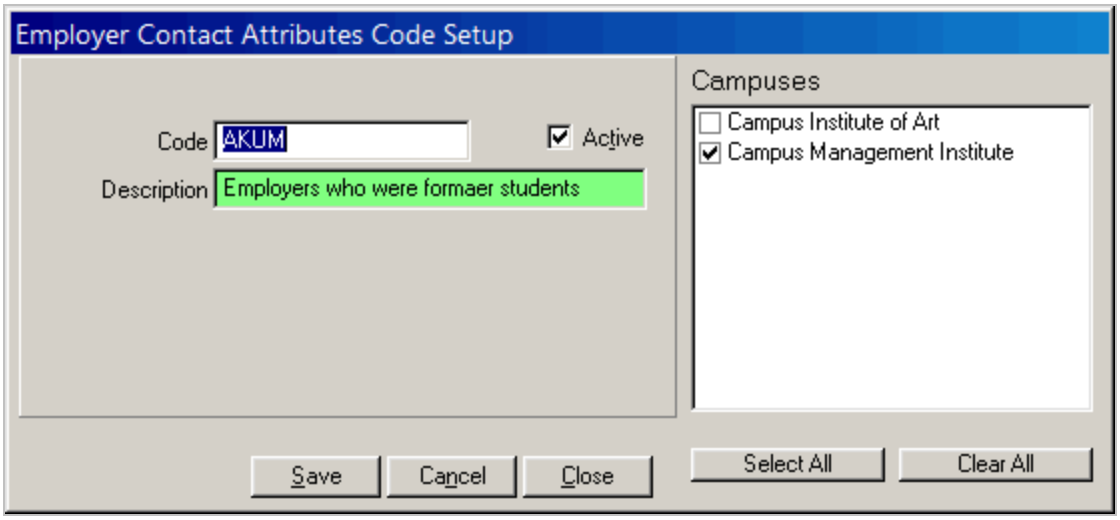
Employer Contact Attributes are used to group characteristics for employer contacts.

To add or edit a list of employer contact attribute codes:

1. Navigate to **Lists** > **Career Services**. The Setup - Career Services Lists form is displayed.
2. Select the **Employer Contact Attributes** tab.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Employer Contact Attribute Code Setup form is displayed.



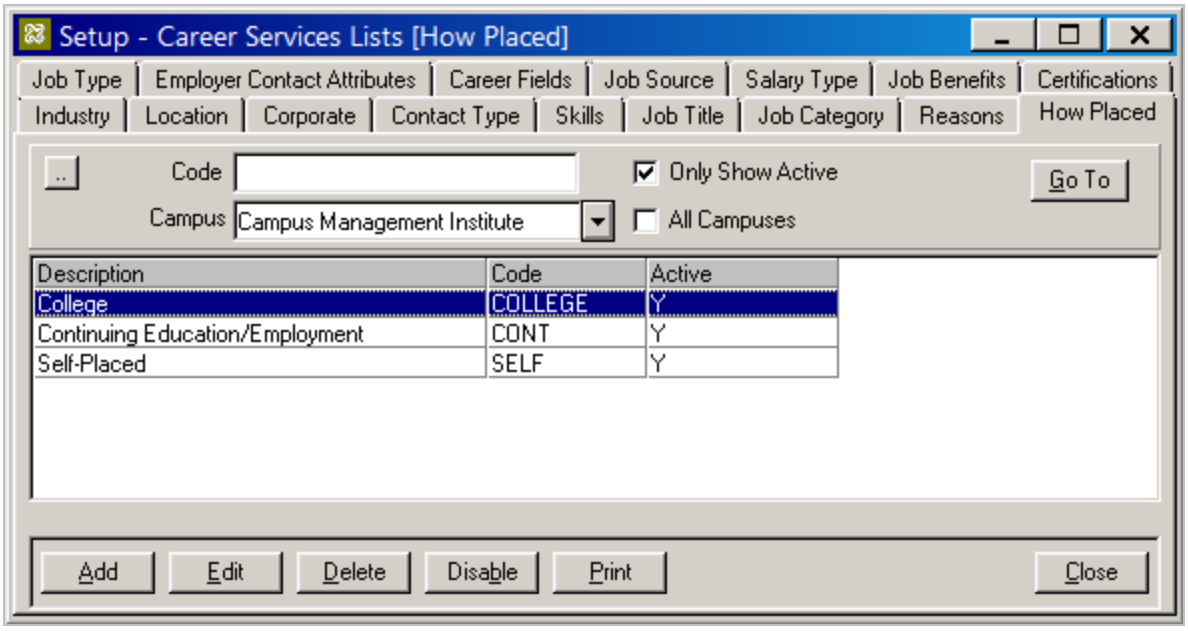
7. Specify a unique **Code**.
8. Enter a **Description**.
9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
10. Select one or more **Campuses**.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Career Services Lists [How Placed]

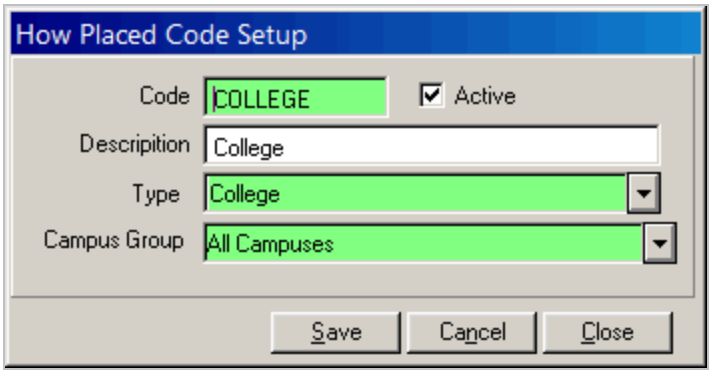
You can add three types of user-defined how-placed statuses. The types are system codes that cannot be modified.

To add or edit a list of how placed codes:

1. Navigate to **Lists** > **Career Services**. The Setup - Career Services Lists form is displayed.
2. Select the **How Placed** tab.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The How Placed Code Setup form is displayed.



7. Specify a unique **Code**.

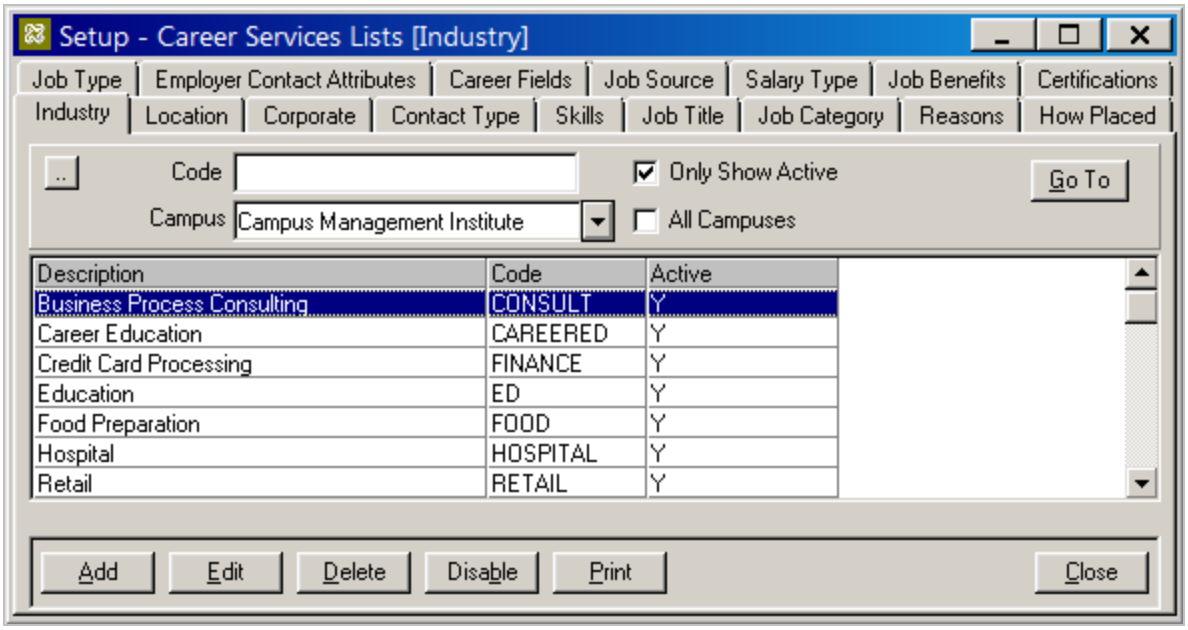
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.
10. Select a **Type**. The Type list provided by CampusNexus Student includes:
    - C - College
    - S - Self
    - O - Continuing Employment/Education.
11. Select the **Campus Group** to which the How Placed Code applies.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Career Services Lists [Industry]

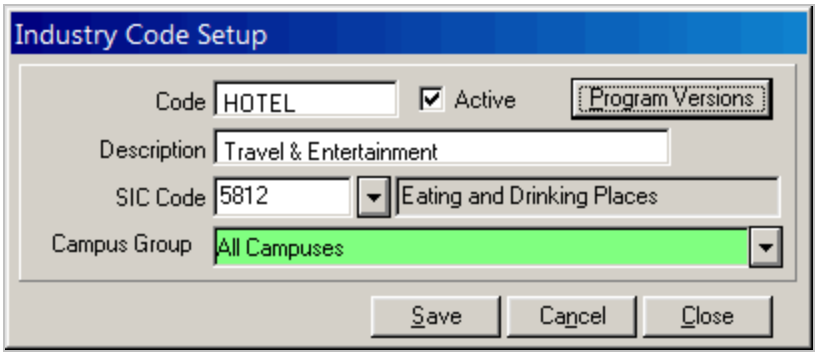
The industry code list describes sectors of the economy in which your students is placed. You can associate industry codes with Department of Labor (OSHA) Standard Industrial Classification (SIC) codes. The industry codes are linked to employers and program versions.

To add or edit a list of industry codes:

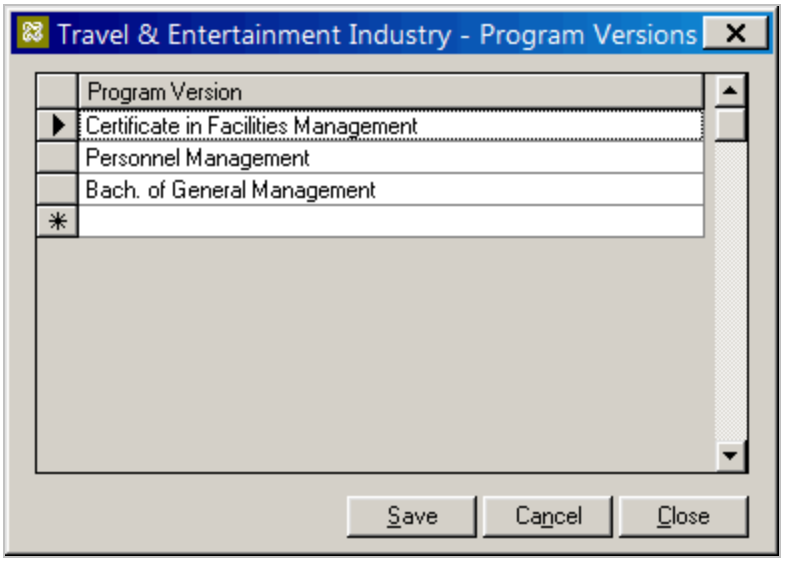
1. Navigate to **Lists** > **Career Services**. The Setup - Career Services Lists form is displayed.
2. Select the **Industry** tab.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Industry Code Setup form is displayed.



7. Specify a unique **Code**.
8. Enter a **Description**.
9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
10. *Optional*: Select a **SIC Code** that applies to this industry. The description of the selected code is displayed.
11. Select the **Campus Group** to which the Industry code applies.
12. If you are entering a new industry code, click **Save**. A new code must be saved before you can select the related Program Versions.
13. Click the **Program Versions** button. The subject Program Versions form is displayed.



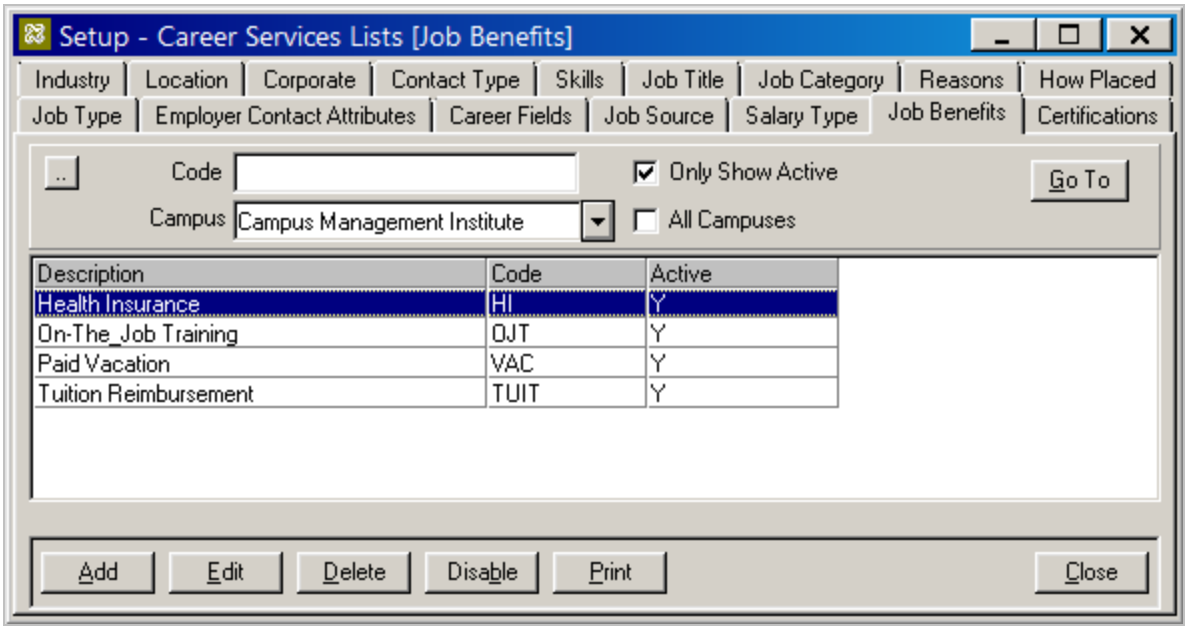
14. To add a program version, click the blank line next to the asterisk (*), click , and select a program version.
15. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Industry Code Setup form.
16. Click **Close** to close the form.

Setup - Career Services Lists [Job Benefits]

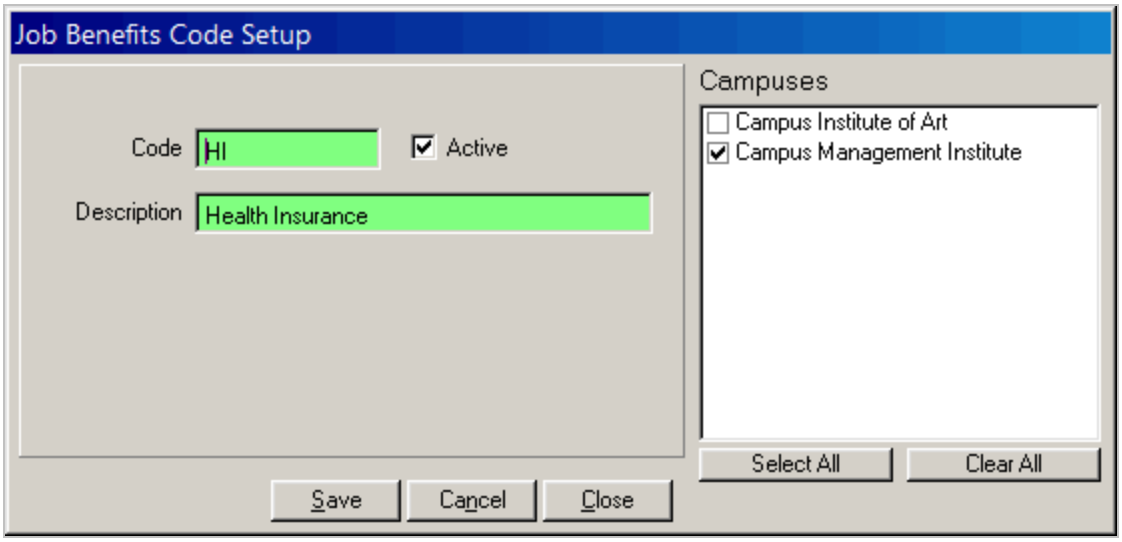
Job Benefits are used to categorize the employee benefits that are provided with some jobs.

To add or edit a list of job benefit codes:

1. Navigate to **Lists** > **Career Services**. The Setup - Career Services Lists form is displayed.
2. Select the **Job Benefits** tab.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Job Benefits Code Setup form is displayed.



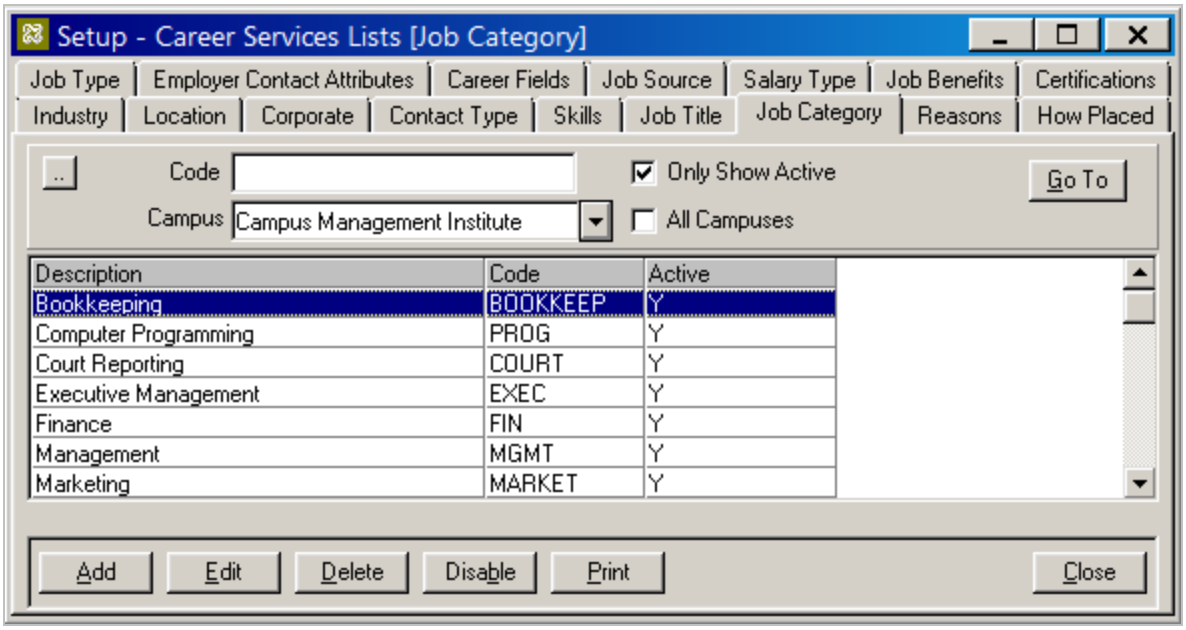
7. Specify a unique **Code**.
8. Enter a **Description**.
9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
10. Select one or more **Campuses**.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Career Services Lists [Job Category]

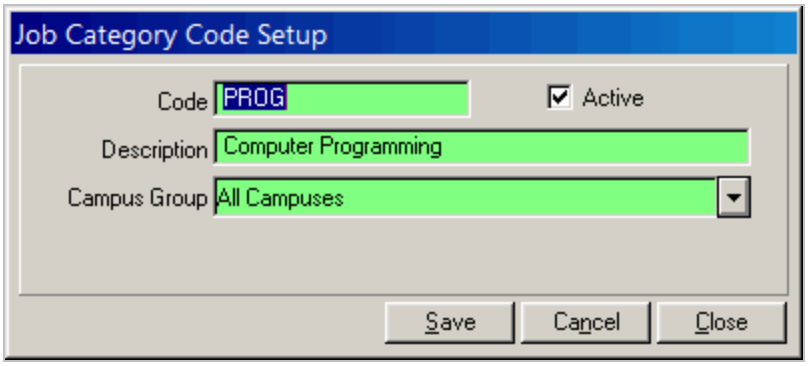
Job categories are used to group job titles that have common characteristics such as executive, accounting, programming, and so on. Job titles are generally provided by employers when jobs are offered.

To add or edit a list of job category codes:

1. Navigate to **Lists** > **Career Services**. The Setup - Career Services Lists form is displayed.
2. Select the **Job Category** tab.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Job Category Code Setup form is displayed.



7. Specify a unique **Code**.
8. Enter a **Description**.
9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.

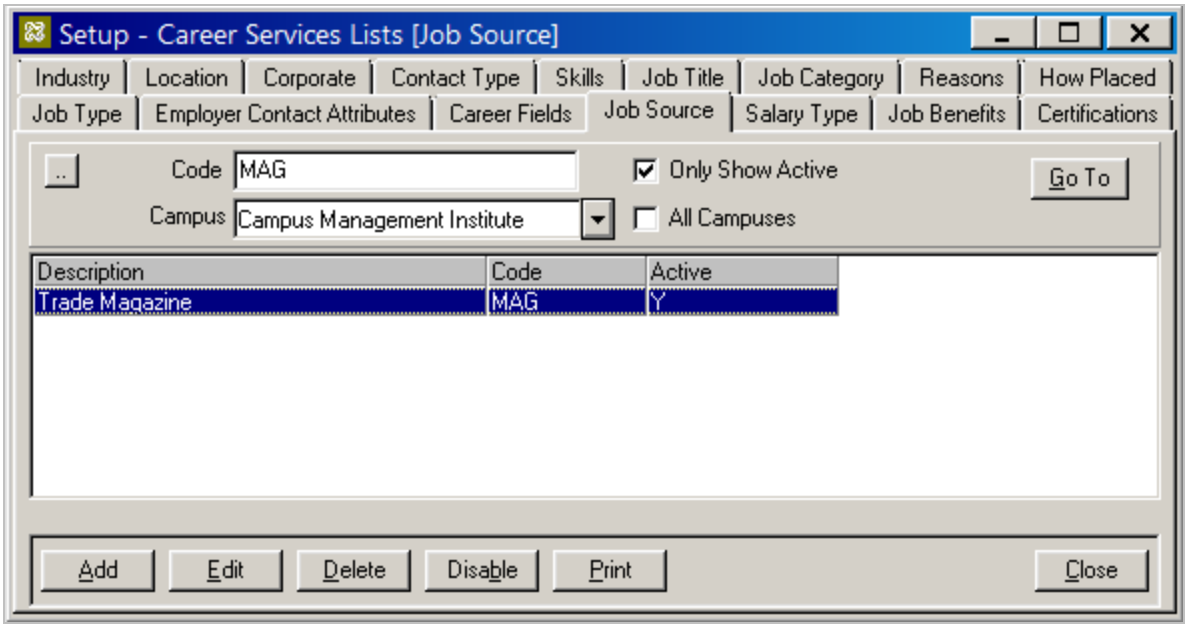
   Note: When you click the **Delete** or **Disable** button or clear the **Active** check box, CampusNexus Student checks for Job Titles associated with the Job Category. If there are Job Titles associated with a Job Category that you are trying to deactivate, a warning message is displayed. CampusNexus Student provides a list of active Job Categories to associate with the Job Titles that were previously assigned to the Job Category that you are attempting to remove or deactivate.
10. Select the **Campus Group** to which the Job Category applies.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Career Services Lists [Job Source]

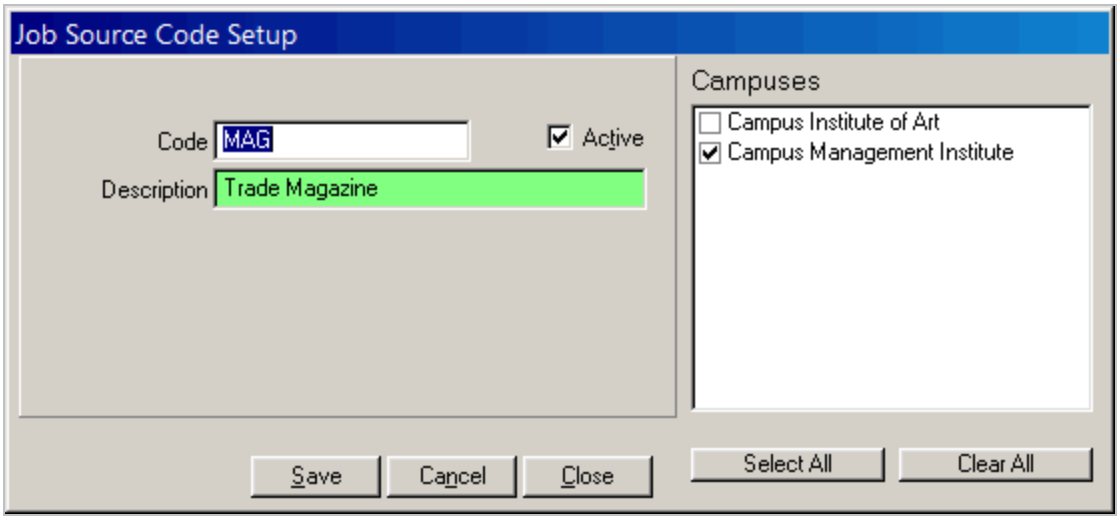
Use the Job Source tab of the Setup - Career Services Lists form to specify codes for job sources (e.g., newspaper, radio, web-sites, mailings). The Job Source field is saved for all new jobs and used to track where the job opening was discovered. Users enter job source information as part of the Placement Wizard for jobs that are not selected from an existing job opening.

To add or edit a list of job source codes:

1. Navigate to **Lists** > **Career Services**. The Setup - Career Services Lists form is displayed.
2. Select the **Job Source** tab.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Job Source Code Setup form is displayed.



7. Specify a unique **Code**.
8. Enter a **Description**.
9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
10. Select one or more **Campuses**.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

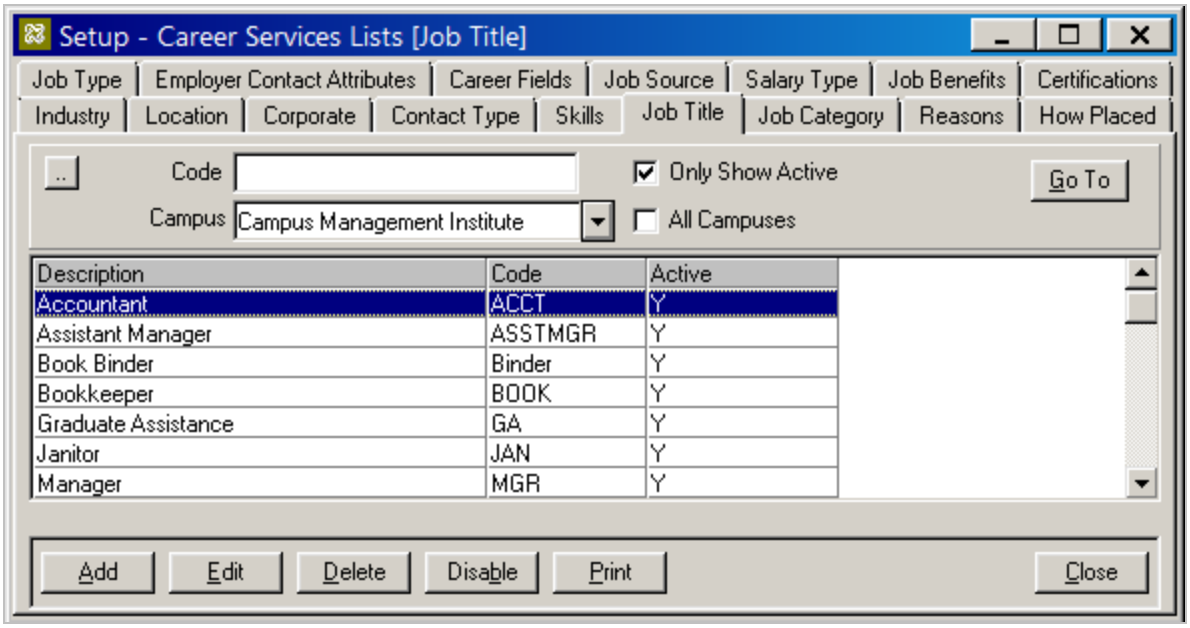
Setup - Career Services Lists [Job Title]

The Job Title list is used to group available jobs and jobs in which students have been placed according to the titles of the positions. Job titles are generally provided by the employers when jobs are offered. A Job Title is further related to a Job Category. Job categories are groups of Job Titles that have common characteristics such as executive, accounting, programming, and so on.

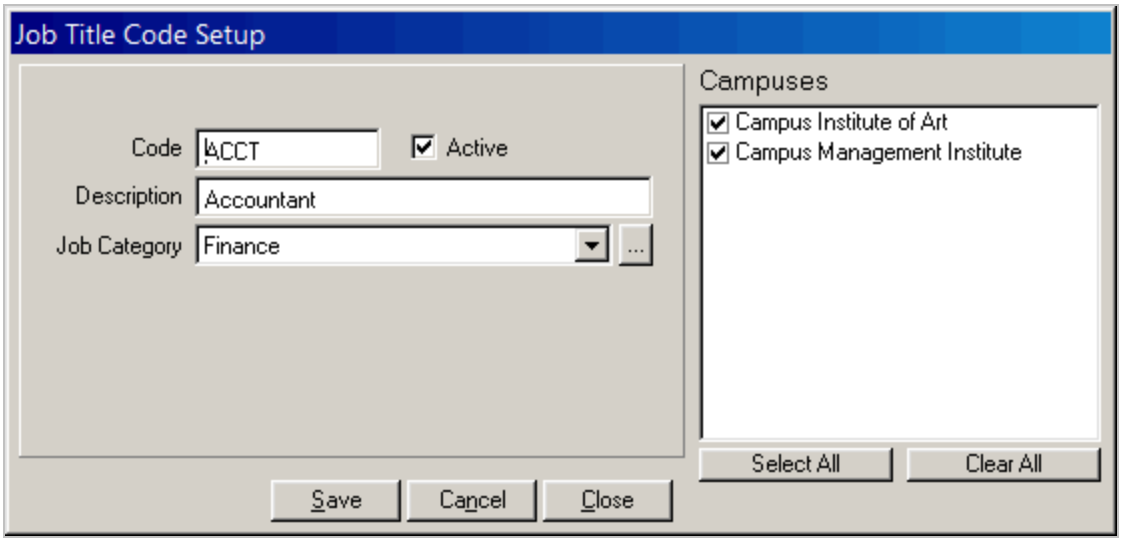
Note: The job category to which a new job title is related must be set up before adding the job tile.

To add or edit a list of job title codes:

1. Navigate to **Lists** > **Career Services**. The Setup - Career Services Lists form is displayed.
2. Select the **Job Title** tab.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Job Title Code Setup form is displayed.



7. Specify a unique **Code**.
8. Enter a **Description**.
9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
10. Select the **Job Category** to which the Job Title is related. Click ... to select multiple Job Categories.

    Note: You cannot select a Job Category associated with a campus if you do not have permissions for that campus.
11. Select one or more **Campuses**.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

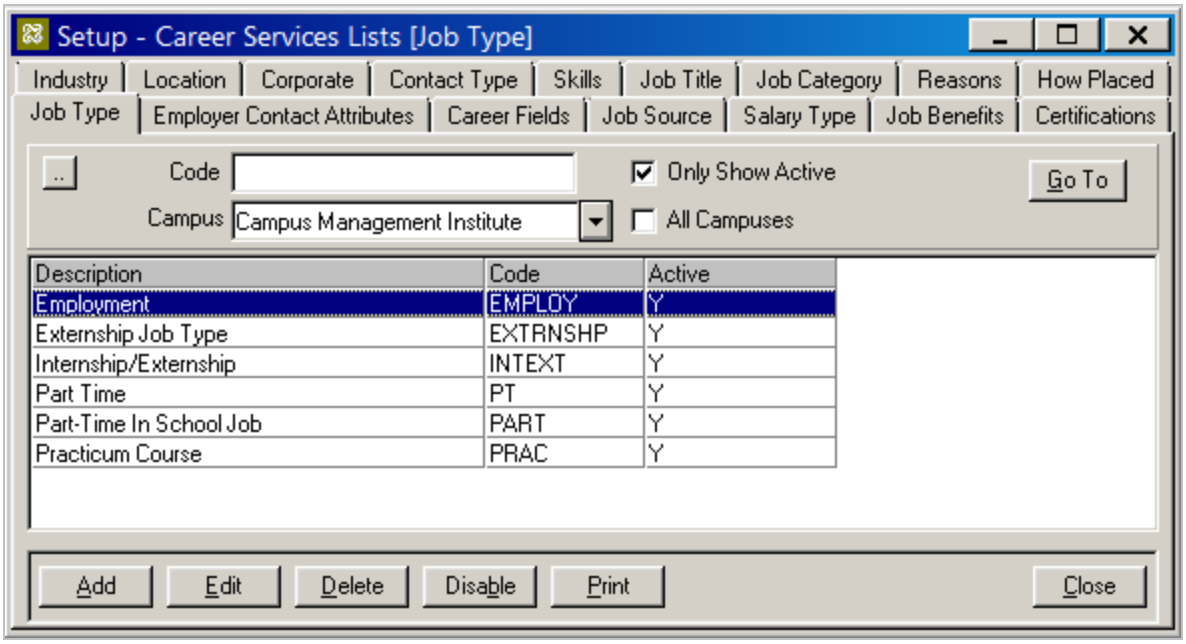
Setup - Career Services Lists [Job Type]

You can add three types of user-defined job type codes. The three types (E - Employment, I - Internship/Externship, and S - In School) are system codes that cannot be modified.

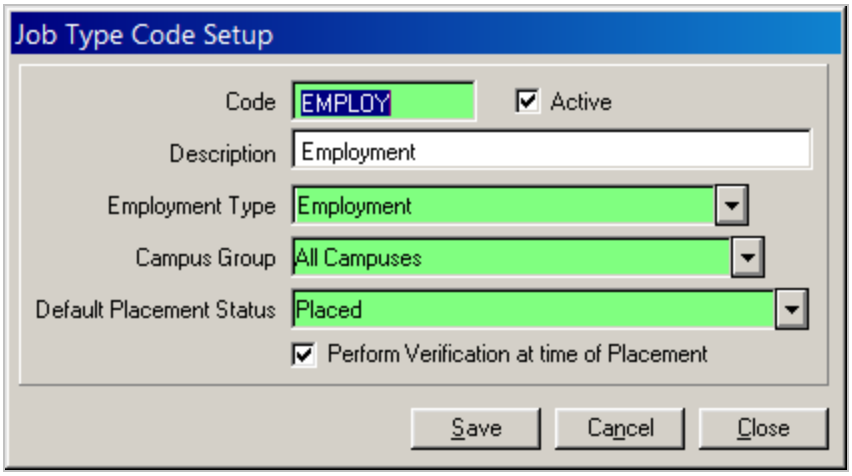
Note: You can designate a user-defined job type as In School to specify that the job type is not a placement for a graduating student.

To add or edit a list of job type codes:

1. Navigate to **Lists** > **Career Services**. The Setup - Career Services Lists form is displayed.
2. Select the **Job Type** tab.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Job Type Code Setup form is displayed.



7. Specify a unique **Code**.
8. Enter a **Description**.
9. Select an **Employment Type**. The default types are:

    - E - Employment
    - I - Internship/Externship
    - S - In School.

    You must be authorized to enter Job Type descriptions, codes, and active. See User Info Career Services sub-tab to set up permissions for individual staff members or staff groups.
10. Select a **Campus Group** to which the Job Type applies.
11. Select a **Default Placement Status** to be used as the default.
12. Select the **Perform Verification at time of Placement** check box to cause the verification form to be displayed as part of the Placement Wizard.

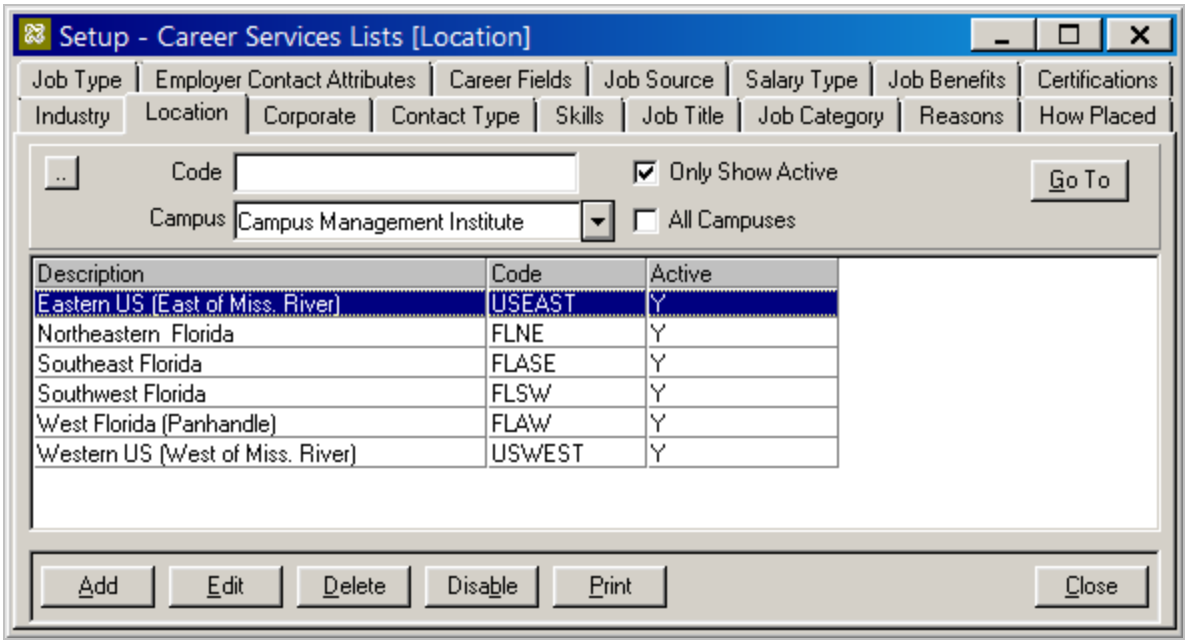
    Note: Edit the Job type and select "Perform Verification at the time of Placement". When this check box is selected, you can add placement verification data through the placement wizard. To capture and store multiple verification records associated with a single placement record, navigate to View > Career Services > Placements.
13. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Career Services Lists [Location]

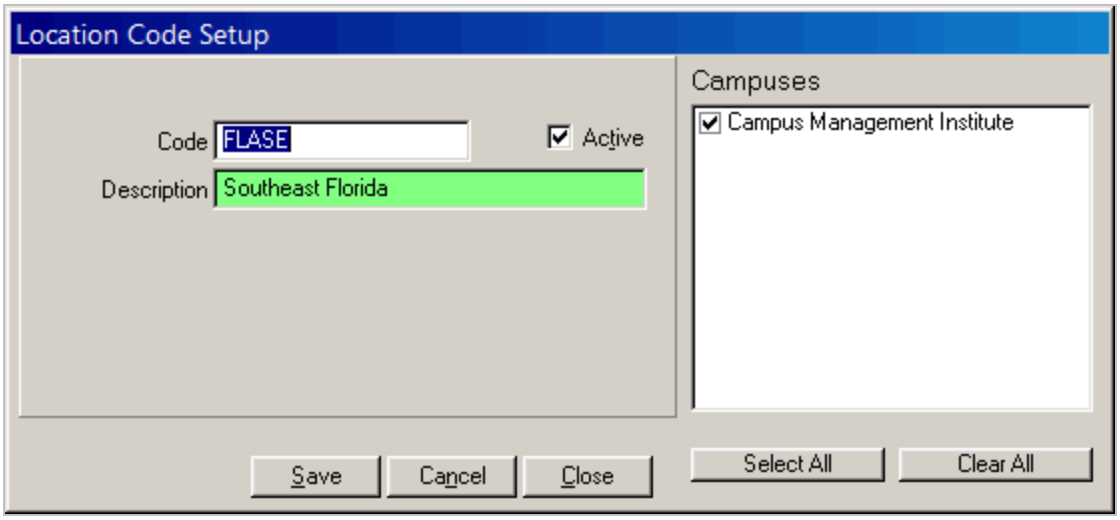
Location codes identify the areas in which employers and jobs are located. Location codes are linked to employers when their records are entered. If an employer has multiple job locations, set up a separate employer record for each location.

To add or edit a list of location codes:

1. Navigate to **Lists** > **Career Services**. The Setup - Career Services Lists form is displayed.
2. Select the **Location** tab.



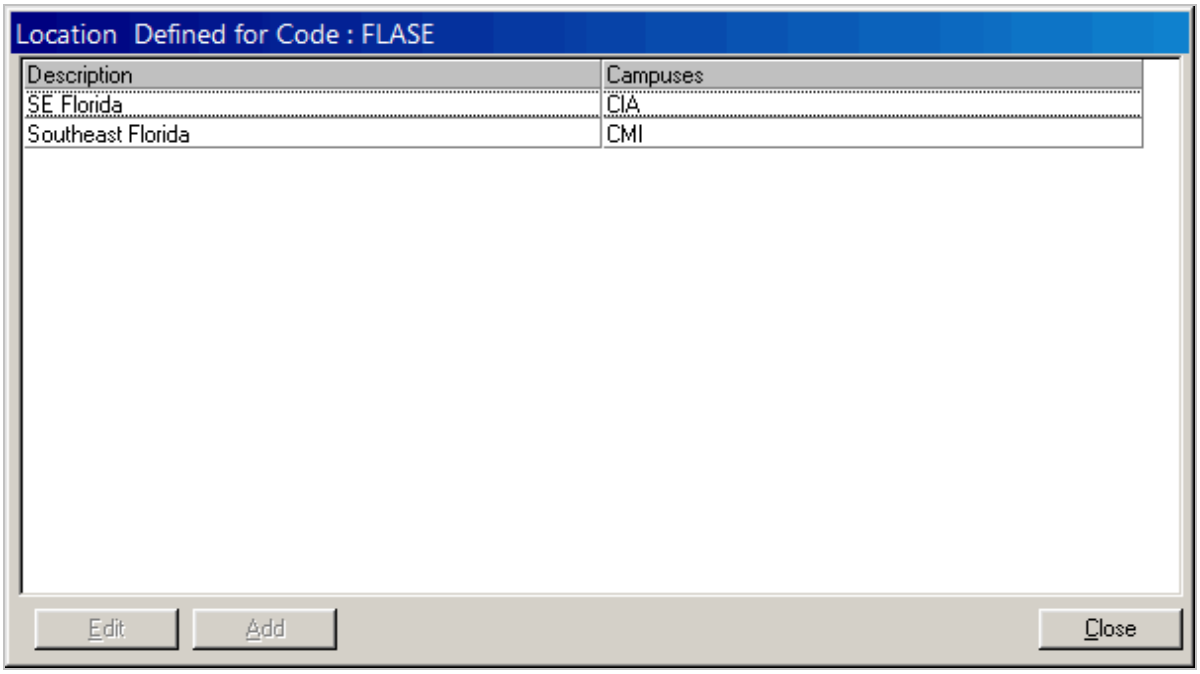
3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Location Code Setup form is displayed.



7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.
10. Select one or more **Campuses**.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Duplicate Codes

If you add a code to the database that duplicates a code already on file, the Location Defined for Code form is displayed. It lists all location records that have the same code. The rows on the grid include the location description and the campuses to which the code is assigned.



Select a row and click **Edit** to change the record.

If you do not see a row for the campus you want to work with, click **Add** to return to the Location Code Setup form.

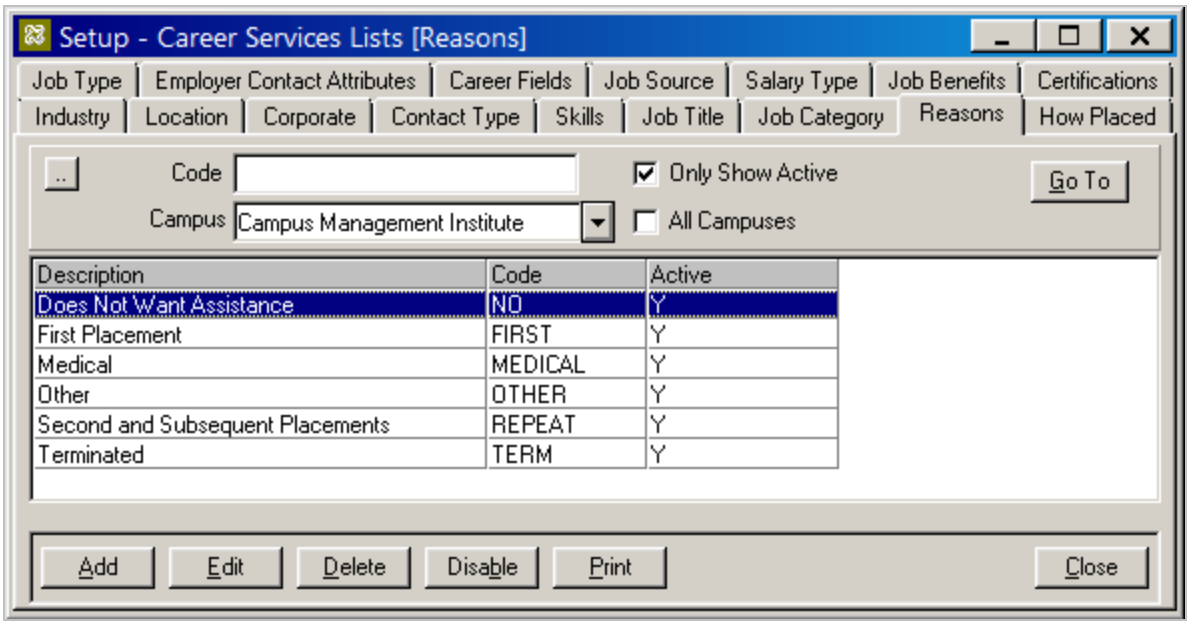
The **Add** button is not available if all campuses to which you have access already have the code. When you go back to the Add form, all campuses that already have the code assigned are eliminated from the list of campuses. You can assign the duplicate code to any or all remaining campuses.

Setup - Career Services Lists [Reasons]

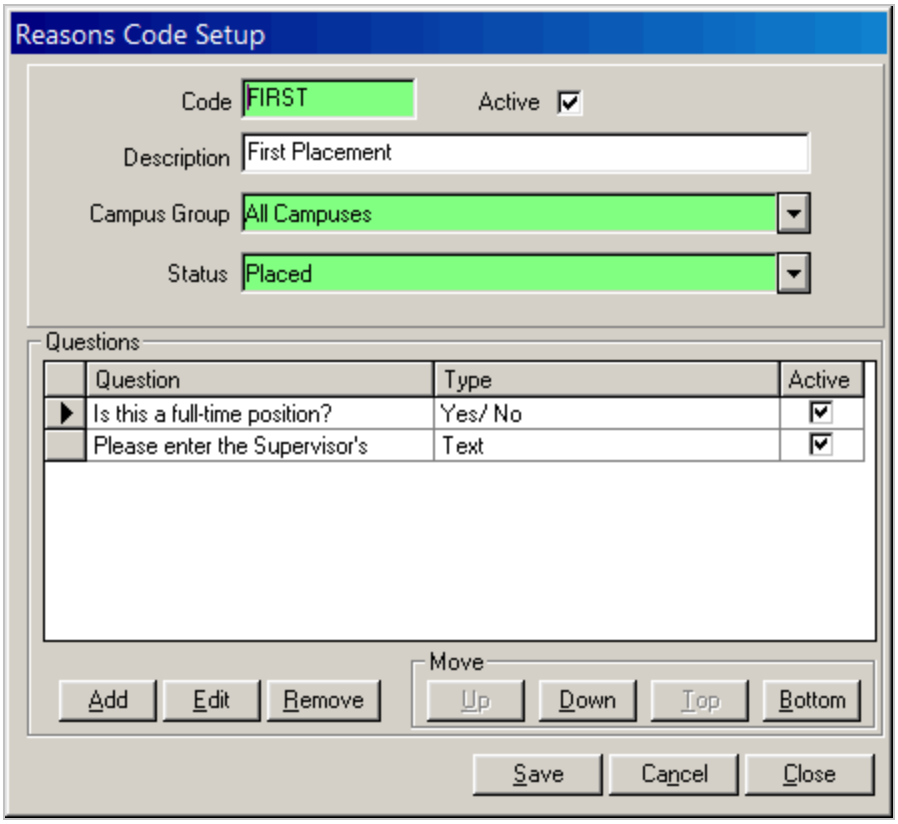
The campus-specific Reasons code list enables you to attach a reason to each change of placement status for each student at each campus. A Reason code can be included when making an individual or batch status change. By relating a predefined Reason code to a student status change, you can classify the changes into groups and analyze them with a report. Reason codes cannot be deleted if they are used in the Student Placement table; however, you can change the code to inactive so that it cannot be used in the future.

To add or edit a list of reason codes:

1. Navigate to **Lists** > **Career Services**. The Setup - Career Services Lists form is displayed.
2. Select the **Reasons** tab.



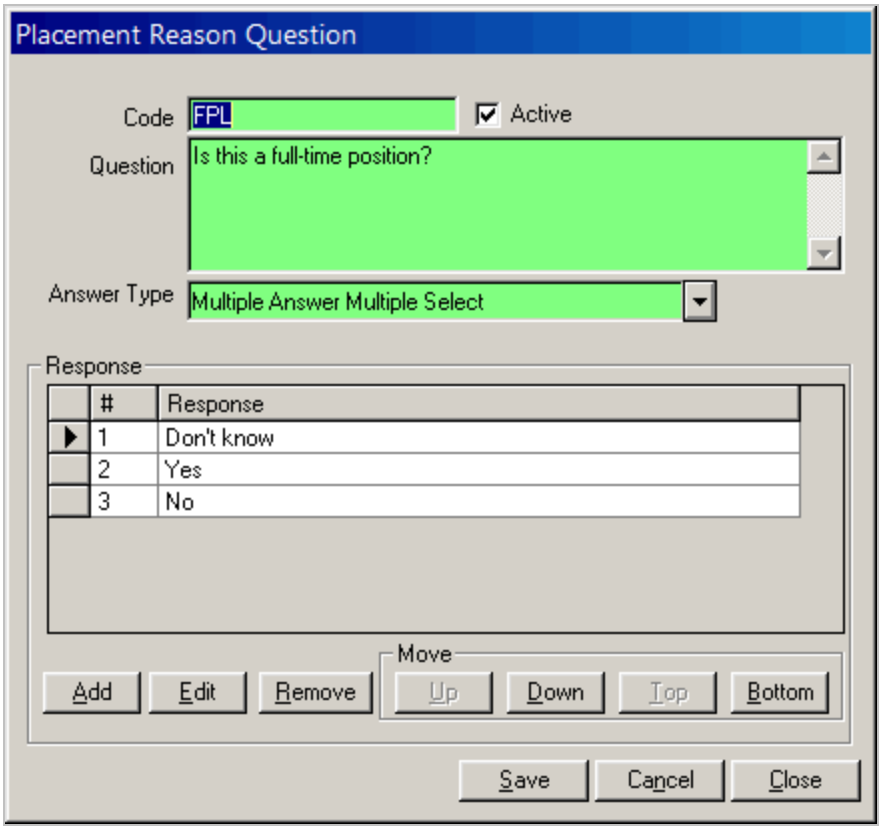
3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Reasons Code Setup form is displayed.



7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.
10. Select a **Campus Group** to which the Reason Code applies.
11. Select a **Status**. The list values are obtained from status codes of the Graduate - Placement category. Your can add statuses to the list under Setup > Status Codes. The following is a sample list of placement status codes:

Status	System Status	Category
Military	Not Available	Graduate - Placement
Ineligible	Not Available	Graduate - Placement
Not Available	Not Available	Graduate - Placement
Currently Attending	Currently Placed	Graduate - Placement
Previously Placed	Currently Placed	Graduate - Placement
Does Not Want Assistance	Not Available	Graduate - Placement
Not Yet Placed	Not Yet Placed	Graduate - Placement

12. In the Questions grid: Click **Add**, or select a record and click **Edit**. The Placement Reason Question form is displayed.



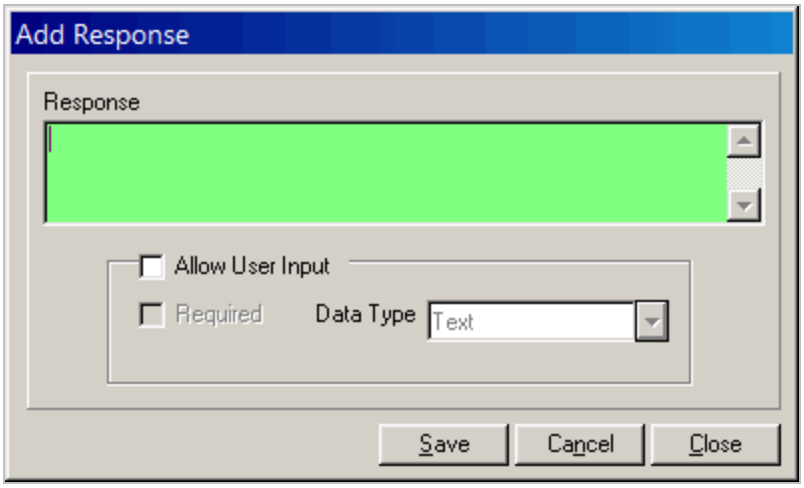
13. Specify a unique **Code**.
14. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
15. Enter the **Question** as you want it to appear to the user when the reason is chosen.
16. Select the **Answer Type**. The options are:

    - Multiple Answer Multi Select (M)
    - Multiple Answer Single Select (S)
    - Text (X)
    - True/False (T)
    - Yes/No (Y)

    For Text, True/False, and Yes/No questions, the Response frame remains disabled.

    For Multiple Answer Single Select (S) or Multiple Answer Multi Select (M), you can add, edit, and remove responses.

    When you click **Add** or **Edit**, the Add Response form is displayed.



a. Specify the **Response**.

b. Select **Allow User Input** if you want the user to be able to provide any more information related to the response you have provided.

c. Select **Required** if you want the user response to be a required field.

d. Select the **Data Type**. The options are: Date, Integer, and Text.

e. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Placement Reason Question form.

17. To change the sequence of questions, use the **Up**, **Down**, **Top**, and **Bottom** buttons.

18. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Reasons Code Setup form.

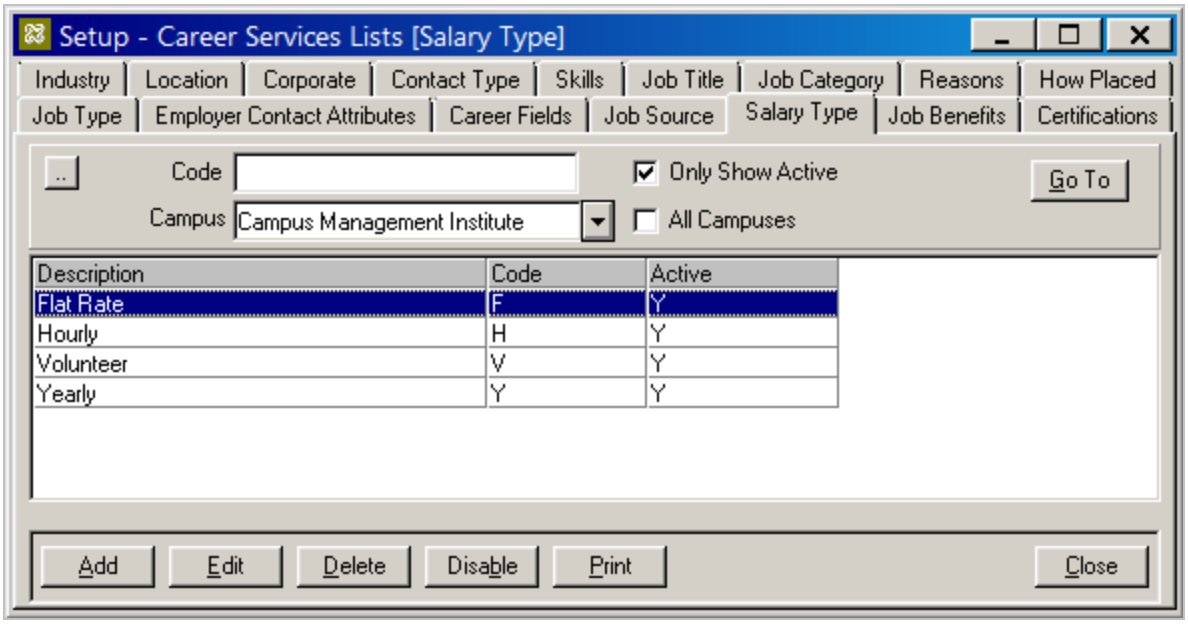
19. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Career Services Lists [Salary Type]

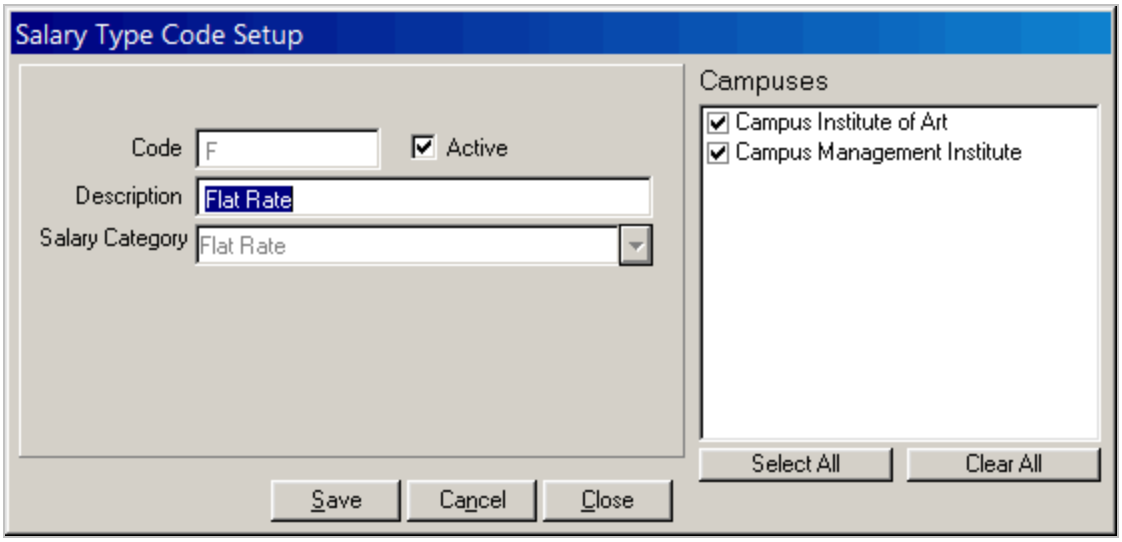
Salary Types are user-defined codes to distinguish different kinds of payments for jobs. Each salary type can apply to one or more campuses. Each salary type is associated with one of the salary categories (Flat Rate, Hourly, Volunteer, or Yearly).

To add or edit a list of salary type codes:

1. Navigate to **Lists** > **Career Services**. The Setup - Career Services Lists form is displayed.
2. Select the **Salary Type** tab.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Salary Type Code Setup form is displayed.



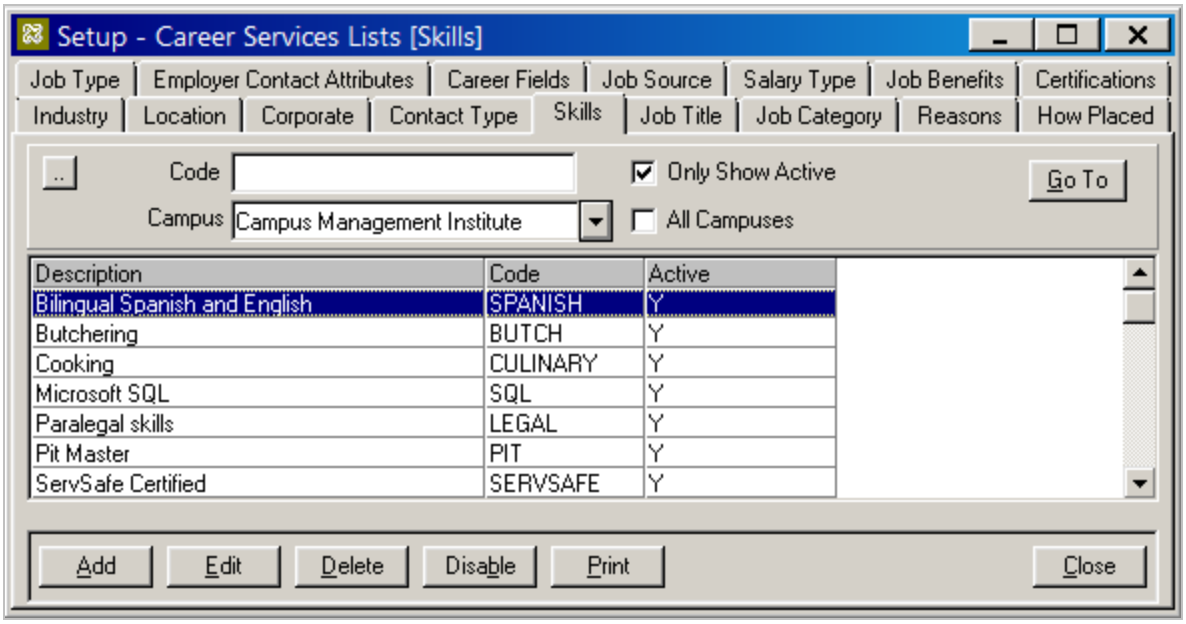
7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.
10. Select a **Salary Category**. The categories are system-defined and include:
    - Hourly - payment of wages is based on the number of hours worked.
    - Yearly - payment of wages is based on an annual amount.
    - Volunteer - payment of wages is optional. The Volunteer salary category counts as a placement for an institution; however, when calculating the average salary information on the Placement Stats/Misc Breakdown report, the number of graduates used to calculate the averages will not include those in a Volunteer salary category.
    - Flat Rate - payment is a discrete amount such as a bonus or a commission given to a student by his or her employer. This salary category is included when calculating the student's overall salary for the placement.
11. Select one or more **Campuses**.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Career Services Lists [Skills]

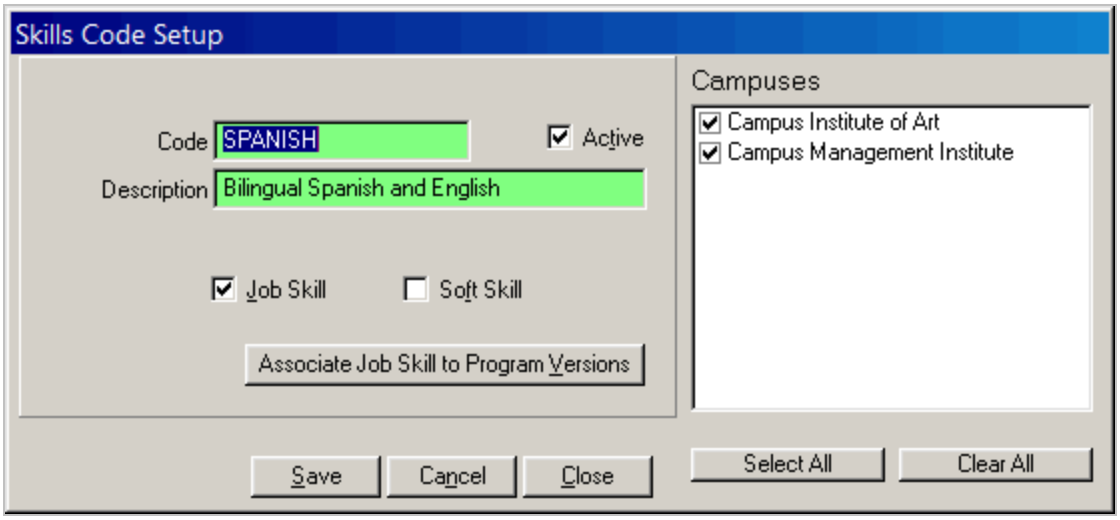
The Skills code list is used to identify special skills exhibited by your students. Skills from the student's Placement master record can be matched with skills required by employers for available jobs.

To add or edit a list of skill codes:

1. Navigate to **Lists** > **Career Services**. The Setup - Career Services Lists form is displayed.
2. Select the **Skills** tab.



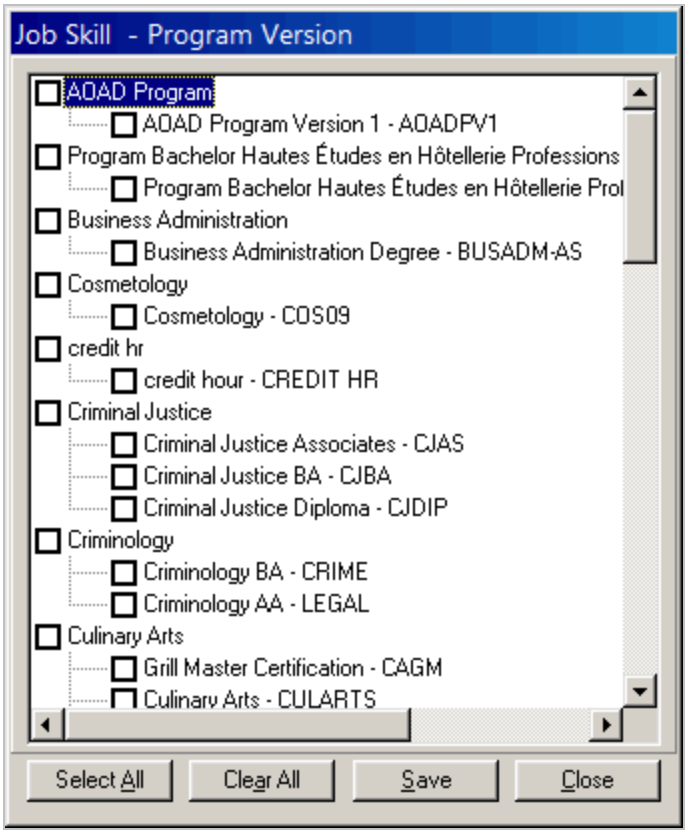
3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Skills Code Setup form is displayed.



7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.
10. Select one or more **Campuses**.
11. Select the **Job Skill** check box if the skill is used as a job requirement for employers.

    Employers hire students from different program versions. An employer may not hire students from all programs offered at a given institution. By associating skills sets from program versions with an employer, advisors can identify employers that they can contact when trying to place a graduate from a particular major.
12. Select the **Soft Skill** check box if the skill is to be used as a job requirement for employers.

    Employers often require soft skills not related to a student's program version. For example, if the employer's clients are in Belgium, the employer may want to interview only candidates who speak Flemish.
13. Click **Associate Job Skill to Program Versions** to match job skills to program versions. The Job Skill - Program Version form is displayed.



14. To associate a skill with a **program version**, select the check box next to the program version label.

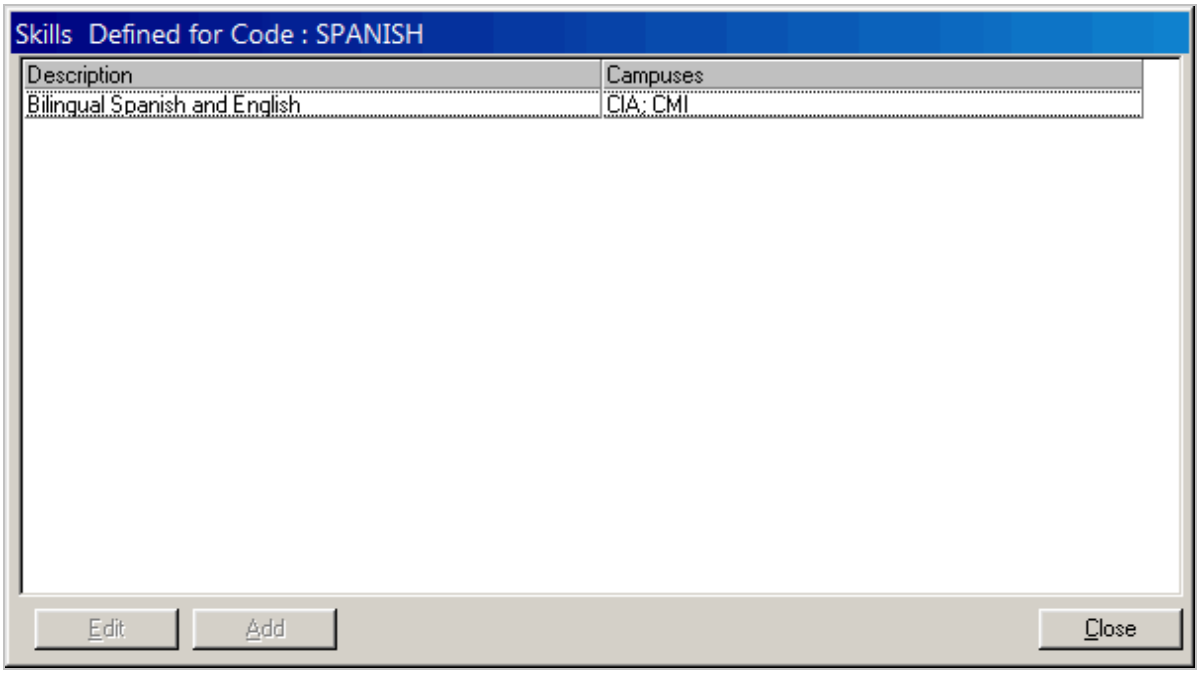
    To associate a skill with a **program**, select the check box next to the program label.

15. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Skills Code Setup form.

16. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Duplicate Codes

If you add a code to the database that duplicates a code already on file, a form listing the duplicate codes is displayed. The rows on the grid include the skill description and the campuses to which the code is assigned.



Select a row and click **Edit** to change the record.

If you do not see a row for the campus, click **Add** to return to the Skill Code Setup form.

The **Add** button is not available if all campuses to which you have access already have the code. When you go back to the Add form, all campuses that already have the code assigned are eliminated from the list of campuses. You can assign the duplicate code to any or all remaining campuses.

Occupation Insight Skills

Skills codes from the Occupation Insight (OI) product can be imported and stored in CampusNexus Student. These imported skills are stored with the record noting the Source of the skill (OI) and whether the skill is currently Active with the Source. These skill codes are separate from the standard Career Services (CS) skill codes.

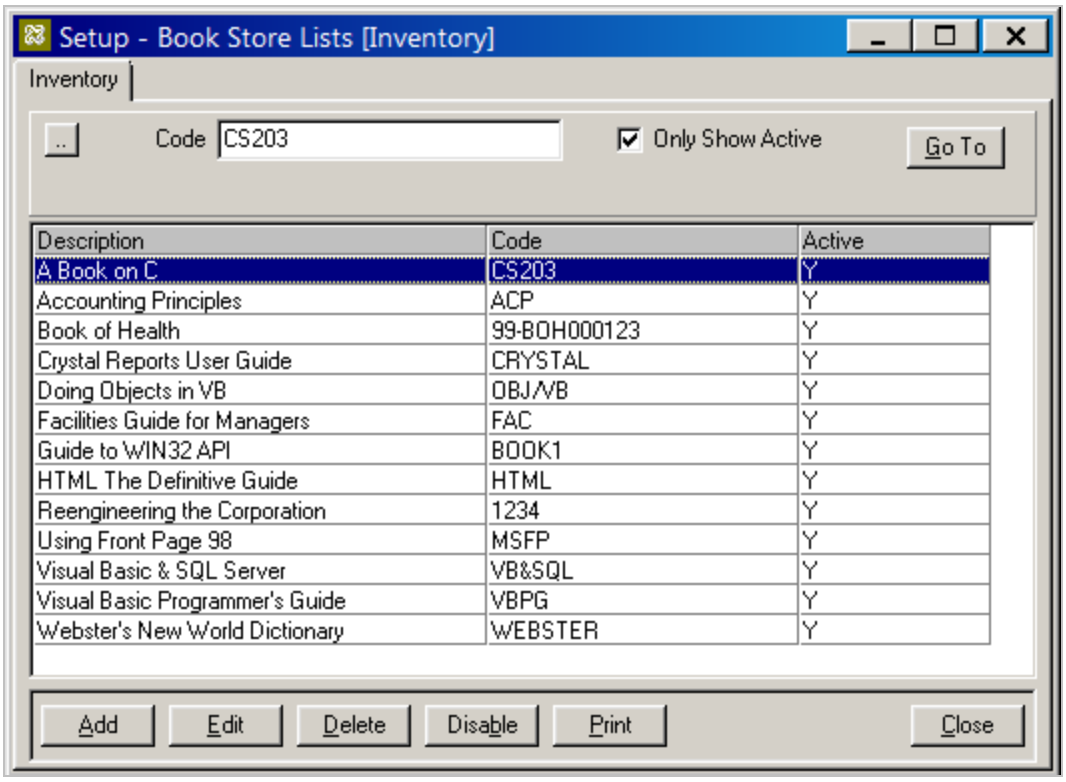
When an OI code is reviewed in the Skills Code Setup form, the Code and Description fields are not editable. All other fields for the codes can be updated.

Lists > Book Store

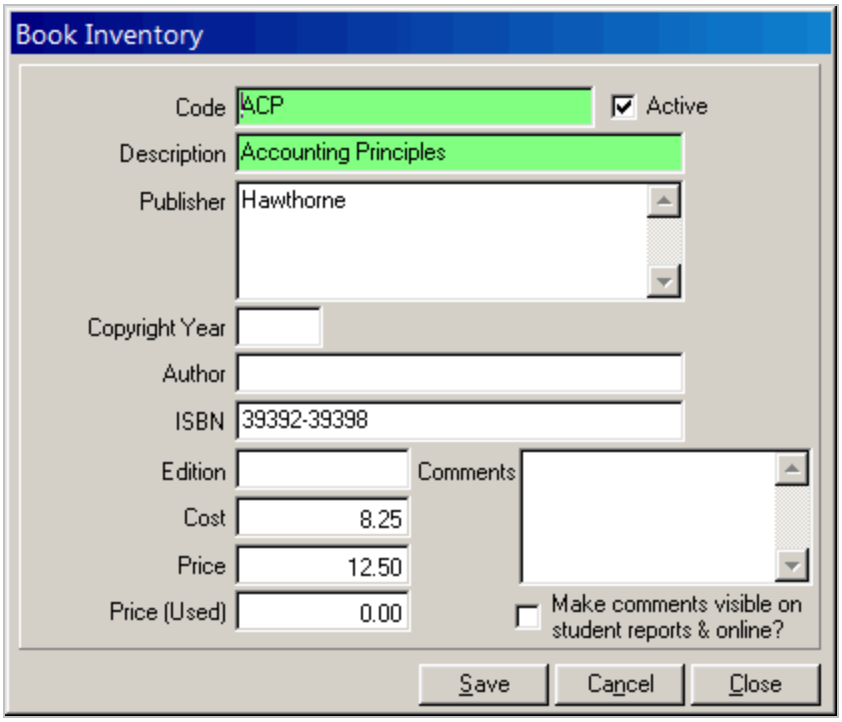
The Book Store inventory system is used to manage books, supplies, and other items that are required by the faculty of your institution. The inventory is related to the courses offered. When you set up a course to be offered at your institution, you can assign text books from the inventory list by creating book lists. The book lists are available when scheduling course sections as a method of assigning text books and other course materials to a specific course section. You must enter books and course materials in the inventory list before you can select them for a course.

To add or edit a list of book store inventory codes:

1. Navigate to **Lists** > **Book Store**. The Setup - Book Store Lists form is displayed. The Inventory tab is displayed by default and any existing inventory codes are listed.



2. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
3. Select **Only Show Active** to view only active records. Clear this check box to view all records.
4. Click **Add**, or select a record and click **Edit**. The Book Inventory form is displayed.



5. Specify appropriate options.

Field Descriptions

Field	Description
Code	Enter a code of up to 20 characters for this inventory item.
Active	Select or clear the Active check box to designate the record as active or inactive. **Note**: Disabling an Inventory item ensures that the item cannot be assigned to new book lists or class sections; however it is not removed from existing course book lists or class sections.
Description	Enter the title of the book or description of other items.
Publisher	Enter the name of the book publisher.
Copyright Year	Enter the year the book was copyrighted.
Author	Enter the name of the author(s) of the book. Enter the first author's last name first to facilitate a search.
ISBN	Enter the ISBN book identifier number.
Edition	If applicable, enter the Edition.
Cost	Enter the dollar amount of the item cost.
Price	Enter the dollar amount of the item sales price.
Price (Used)	Enter the price for the item in used condition.

Field	Description
Comments	Enter any desired comments.
Make comments visible on student reports & online	Select the check box to indicate if the comment field is to be included in student facing reports and online in Portal.

6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Setup - Book Store Lists form.
7. To remove a book from the lists, select the book in question and click **Delete**.

   Note: A book may not be deleted if it is attached to a Course Book list or Course Section.
8. To print a list of the books in the Book List Inventory, click **Print**.

   Note: All Inventory details are included in the printed report including comments, regardless of whether the "Make Comments Visible on student reports & online" option is selected because this report is not considered to be student facing.

Lists > Loan Management

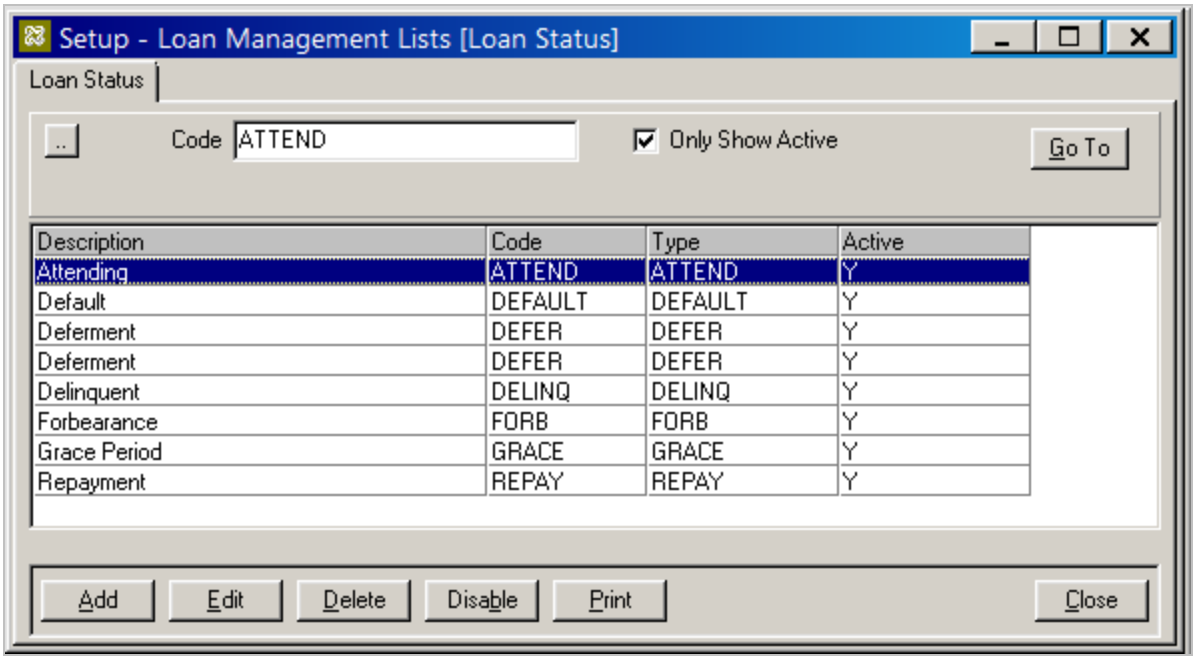
Use the Setup - Loan Management Lists form to define loan status codes. The list is pre-loaded with the following statuses:

- Attending
- Default
- Deferment
- Delinquent
- Forbearance
- Grace Period
- Repayment

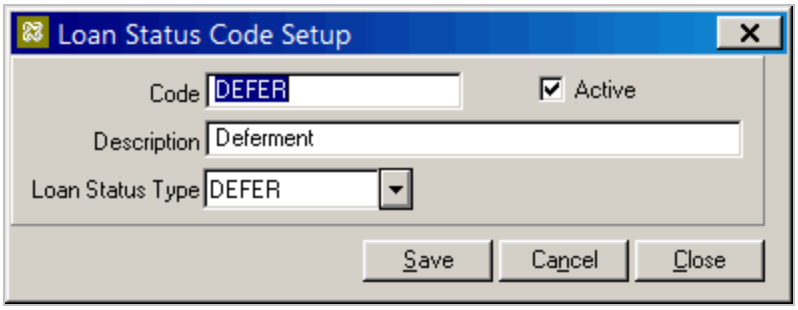
Attending, Grace, and Repayment are system codes which cannot be edited or deleted. Other loan status codes can be edited. You can add school-defined loan status codes.

To add or edit the list of loan status codes:

1. Navigate to **Lists** > **Loan Management**. The Setup - Loan Management Lists form is displayed.



2. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
3. Select **Only Show Active** to view only active records. Clear this check box to view all records.
4. Click **Add**, or select a record and click **Edit**. The Loan Status Code Setup form is displayed.



5. Specify a unique **Code**.
6. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
7. Enter a **Description**.
8. Select a **Loan Status Type**. Loan Status Types are codes that can be assigned to new Loan Statuses. Loan Status Types are provided by CampusNexus Student as system codes. The Loan Status Types are:

    - ATTEND *
    - DELINQ
    - DEFAULT
    - DEFER
    - FORB
    - GRACE *
    - REPAY *

    * Indicates System Code. No additional Loan Statuses are permitted for this type.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Lists > Student Services

Student Services are non-academic items that are part of the student life cycle. When you navigate to Lists > Student Services, the Setup - Student Services Lists form is displayed. Add, edit, delete, enable, disable, and print Student Services lists from the following tabs:

- Athletic Status
- Disability Services Status
- Disability Type
- Location
- Recruitment Type
- Room Type
- Services
- Service Billing Method
- Service Categories
- Sports
- Veterans Affairs Benefit
- Veterans Affairs Certification Type
- Veterans Affairs Code

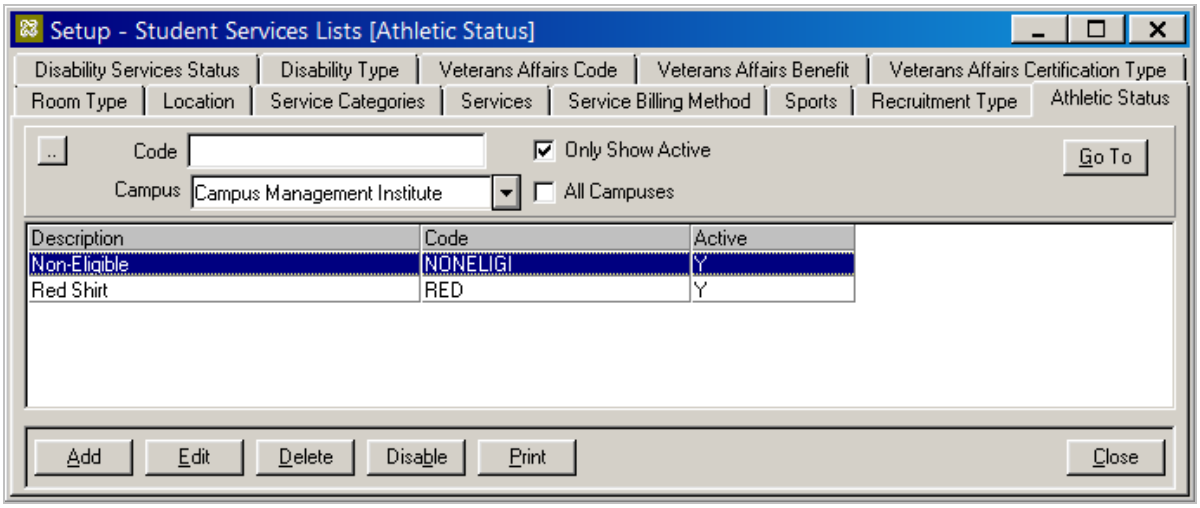
See Maintaining Lists for instructions on adding, editing, deleting, disabling, enabling, and printing lists.

Setup - Student Services Lists [Athletic Status]

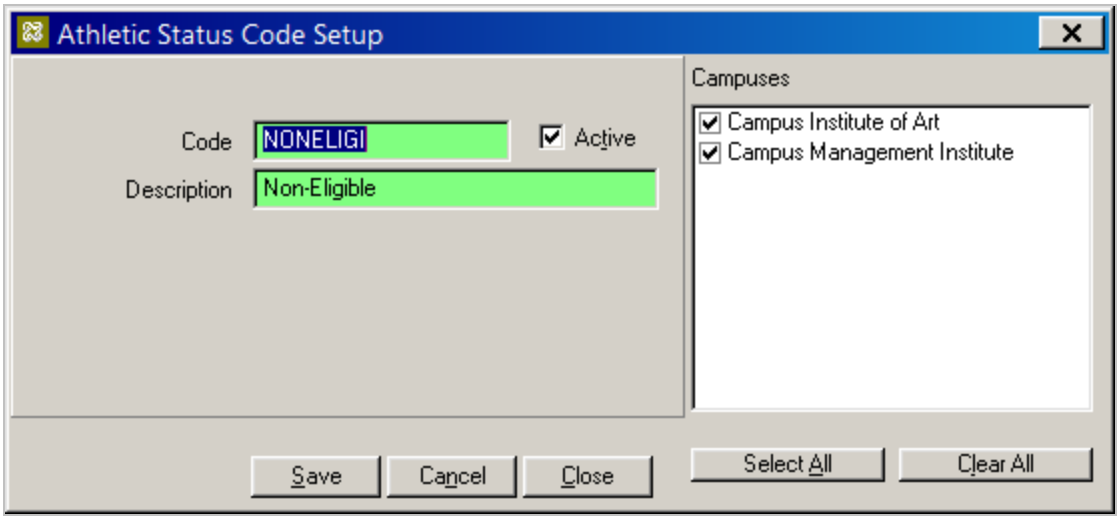
You can create a list of statuses that represent the current athletic status of athletes. Each status contains a code and a description.

To add or edit a list of athletic status codes:

1. Navigate to **Lists** > **Student Services**. The Setup - Student Services Lists form is displayed.
2. Select the **Athletic Status** tab.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Athletic Status Code Setup form is displayed.



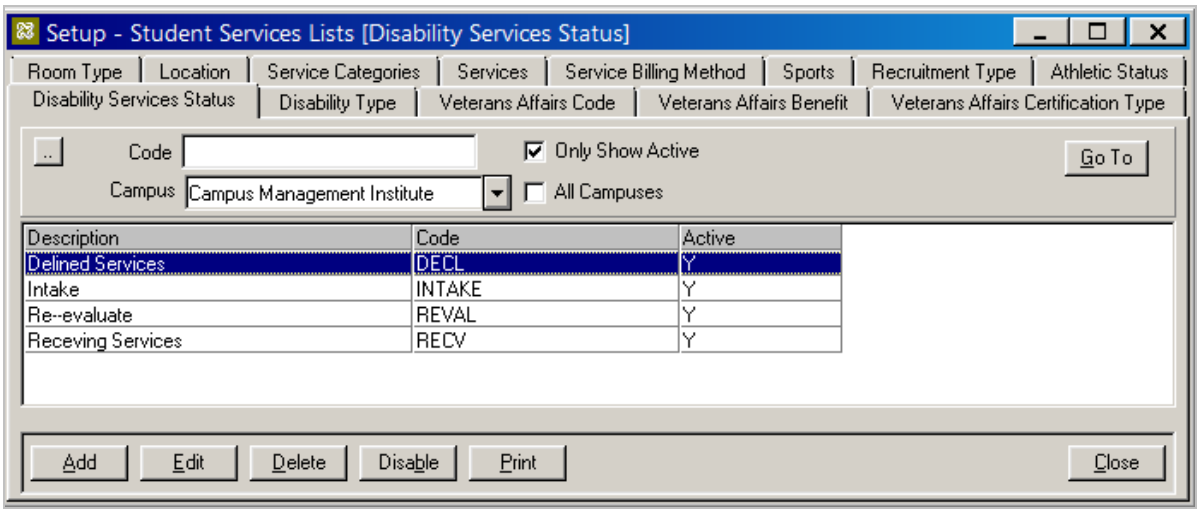
7. Specify a unique **Code**.
8. Enter a **Description**.
9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
10. Select one or more **Campuses**.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Student Services Lists [Disability Services Status]

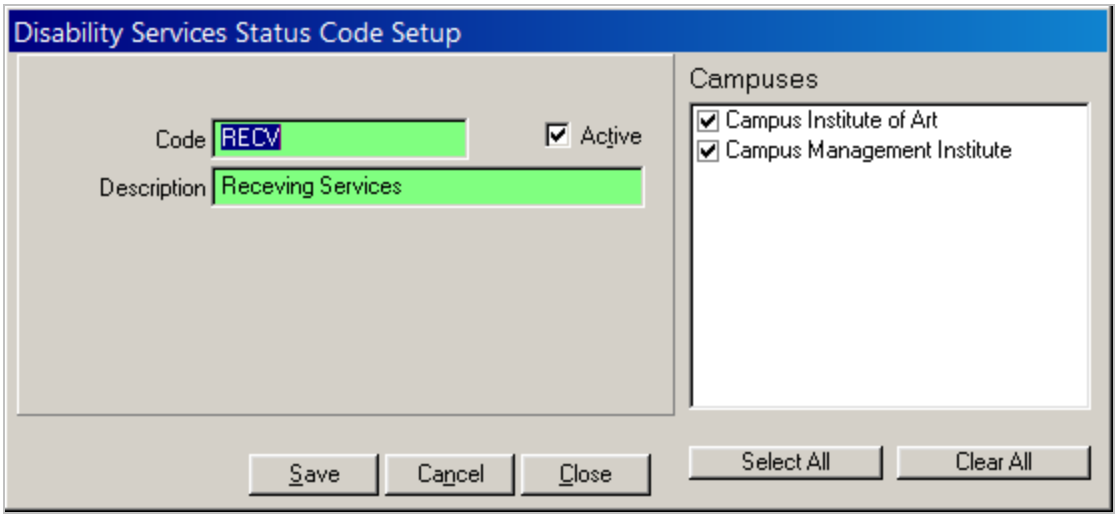
You can define statuses for use within the Disability Services Office.

To add or edit a list of disability services status codes:

1. Navigate to **Lists** > **Student Services**. The Setup - Student Services Lists form is displayed.
2. Select the **Disability Services Status** tab.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Disability Services Status Code Setup form is displayed.



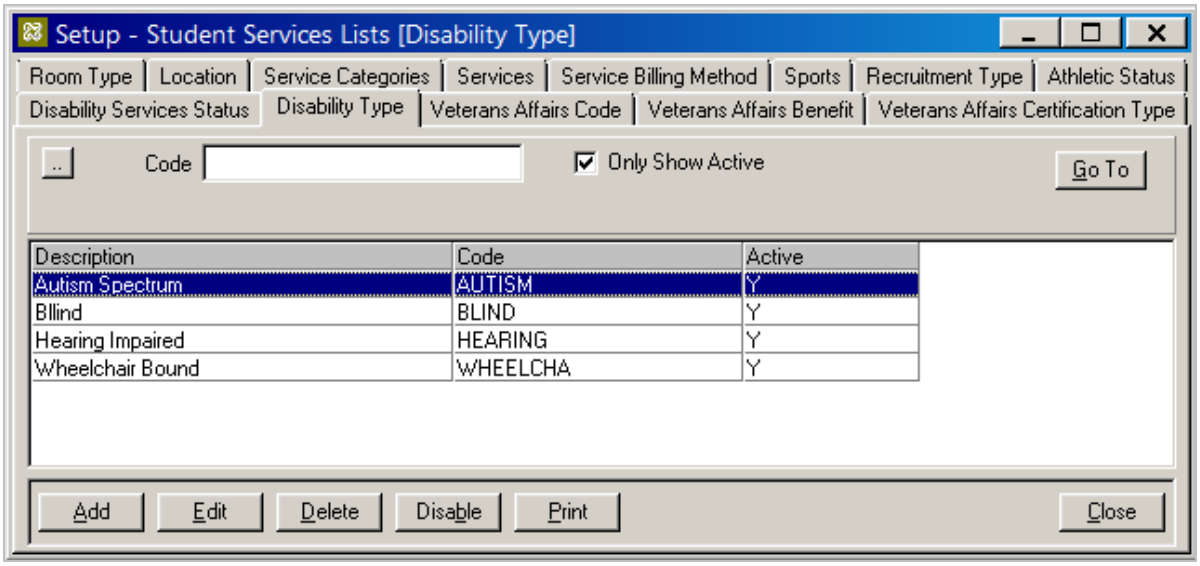
7. Specify a unique **Code**.
8. Enter a **Description**.
9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
10. Select one or more **Campuses**.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Student Services Lists [Disability Type]

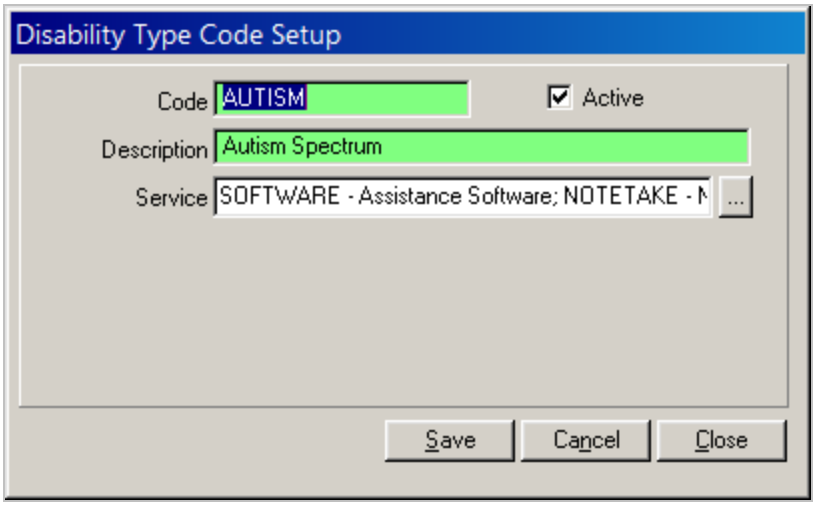
You can define disability types, e.g., hearing impairment or physical impairment, and associate services like assistive devices or wheel chairs, with a disability type.

To add or edit a list of disability type codes:

1. Navigate to **Lists** > **Student Services**. The Setup - Student Services Lists form is displayed.
2. Select the **Disability Type** tab.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Disability Type Code Setup form is displayed.



6. Specify a unique **Code**.

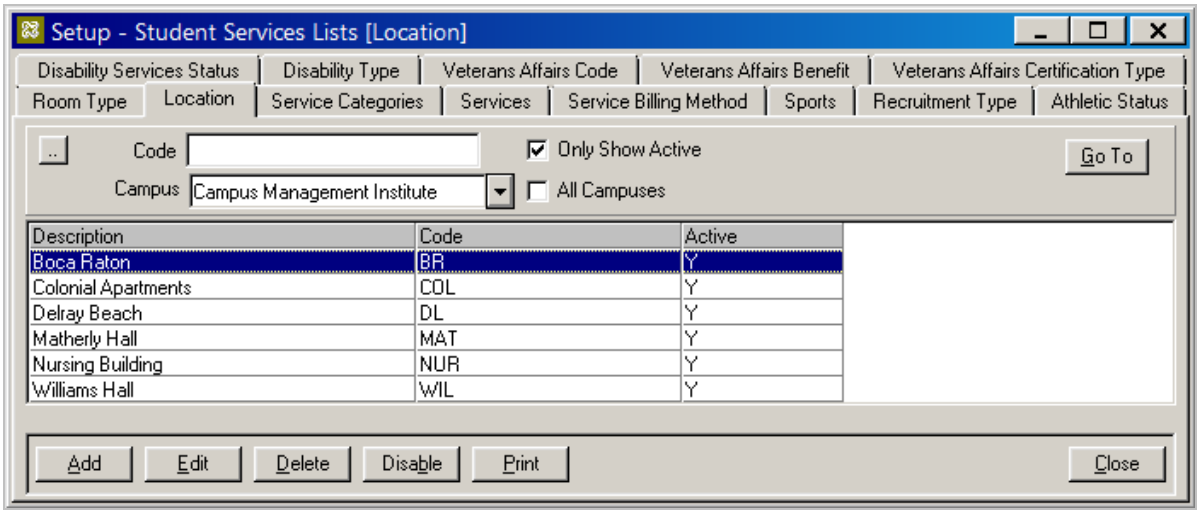
7. Enter a **Description**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Select the appropriate **Services**. Click to select multiple services that have previously been configured.
10. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Student Services Lists [Location]

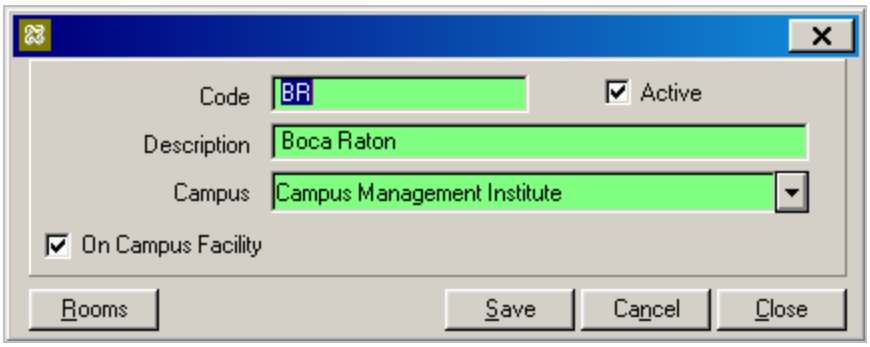
You can set up a list of locations for student services and events at your institution.

To add or edit a list of location codes:

1. Navigate to **Lists** > **Student Services**. The Setup - Student Services Lists form is displayed.
2. Select the **Location** tab.

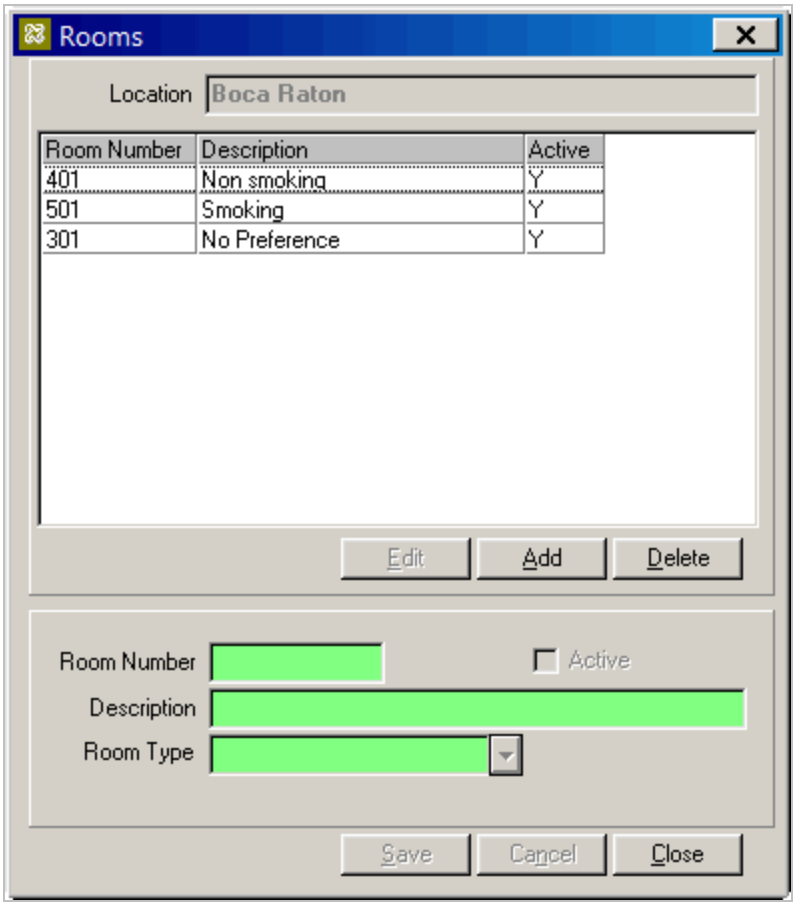


3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Location Code Setup form is displayed.



7. Specify a unique **Code**.
8. Enter a **Description**.
9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
10. Select a **Campus**.

11. If the location is considered 'On Campus', select the **On Campus Facility** check box so that the location value populates the Report Incident form as 'On Campus'. If this check box is cleared, the location is displayed within the Report Incident Non-Campus Property drop-down selection.
12. Click **Save**.
13. Click **Rooms**.



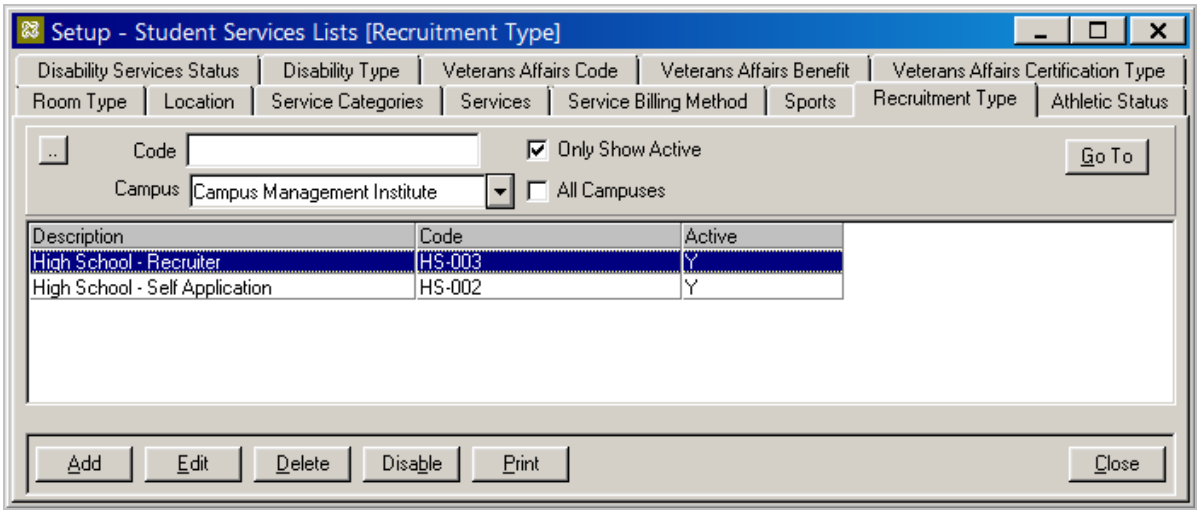
14. Click **Add**, or select a record and click **Edit**.
15. Specify a **Room Number**.
16. Enter a **Description**.
17. Select a **Room Type**.
18. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
19. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Student Services Lists [Recruitment Type]

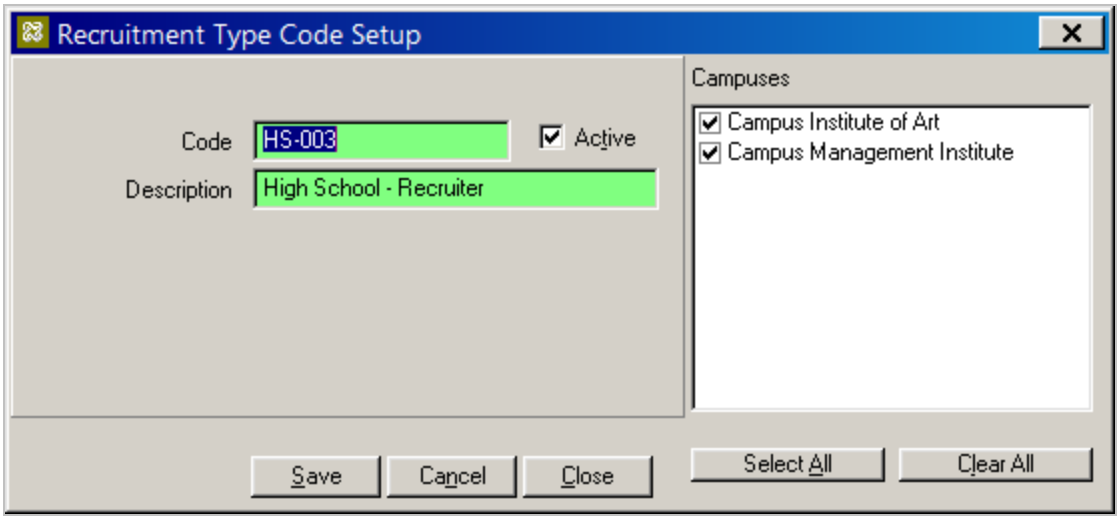
You can create a list of codes and descriptions indicating the type of recruitment and when the student athlete was recruited into the Athletic Association (for example, First Year Recruited, Second Year Walk In).

To add or edit a list of recruitment type codes:

1. Navigate to **Lists** > **Student Services**. The Setup - Student Services Lists form is displayed.
2. Select the **Recruitment Type** tab.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Recruitment Type Code Setup form is displayed.



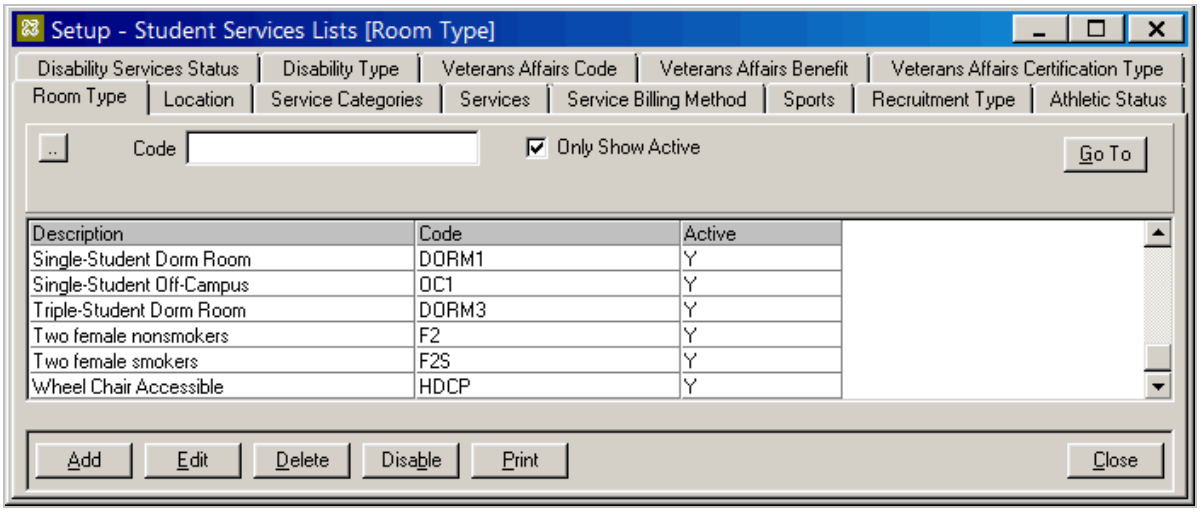
7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.
10. Select one or more **Campuses**.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You will be returned to the Setup - Student Services Lists [Recruitment Type] form.

Setup - Student Services Lists [Room Type]

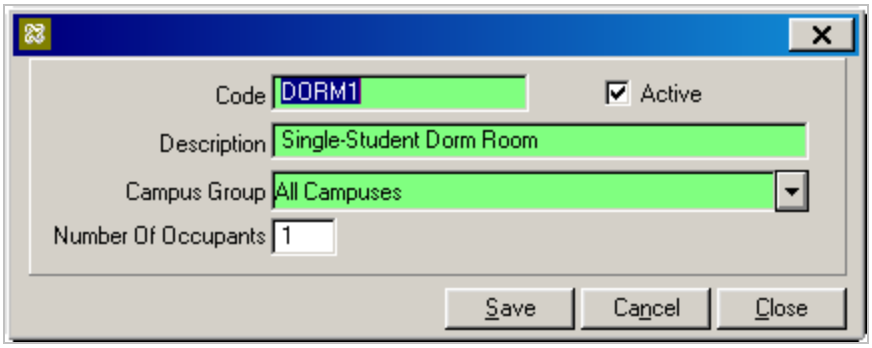
You can define a room type list for student services as needed at your institution.

To add or edit a list of room type codes:

1. Navigate to **Lists** > **Student Services**. The Setup - Student Services Lists form is displayed.
2. Select the **Room Type** tab.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Room Type Code Setup form is displayed.



6. Specify a unique **Code**.
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. Enter a **Description**.
9. Select a **Campus Group**

10. Specify the **Number of Occupants**.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Student Services Lists [Services]

Use the Services tab of the Setup - Student Services Lists form to configure billable services and their campus associations. The Service Billing Method must have been previously defined.

Services are grouped by categories. For example, Cable TV or Parking fees can be grouped in the Housing Service Category. Service Categories must be set up before Services can be assigned to Service Categories.

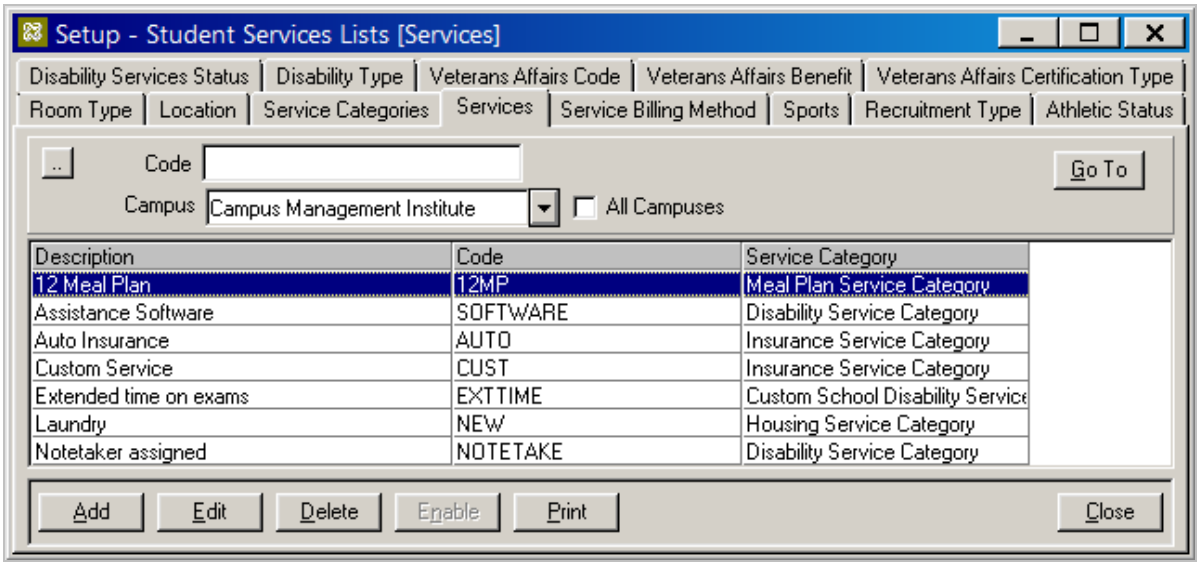
Once set up, the Student Services module enables you to define a student as requiring housing assistance for example, along with names of requested roommates, actual roommates, roommate gender preference, smoking preference, room type preference, location, room assigned, move in and move out dates, and monthly fees. Included in this setup are data typing, validation lists, and detailed field descriptors. Staff can also add more data to a Student Service through user-defined fields.

Services can be applied to more than one student at a time using the batch option under Daily > Student Services > Batch Assign Services. Filtering criteria are Start Date, Program Version, Status, and Charge Amount.

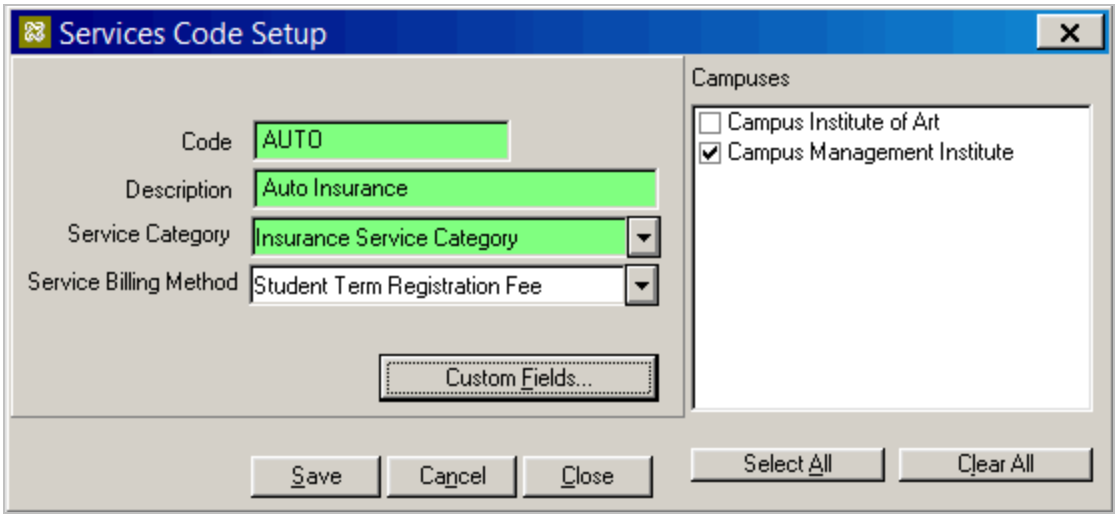
Custom fields can be created to accommodate special services for your institution.For more information, see Custom Fields for Student Services.

To add or edit a list of student services codes:

1. Navigate to **Lists** > **Student Services**. The Setup - Student Services Lists form is displayed.
2. Select the **Services** tab.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Click **Add**, or select a record and click **Edit**. The Services Code Setup form is displayed.



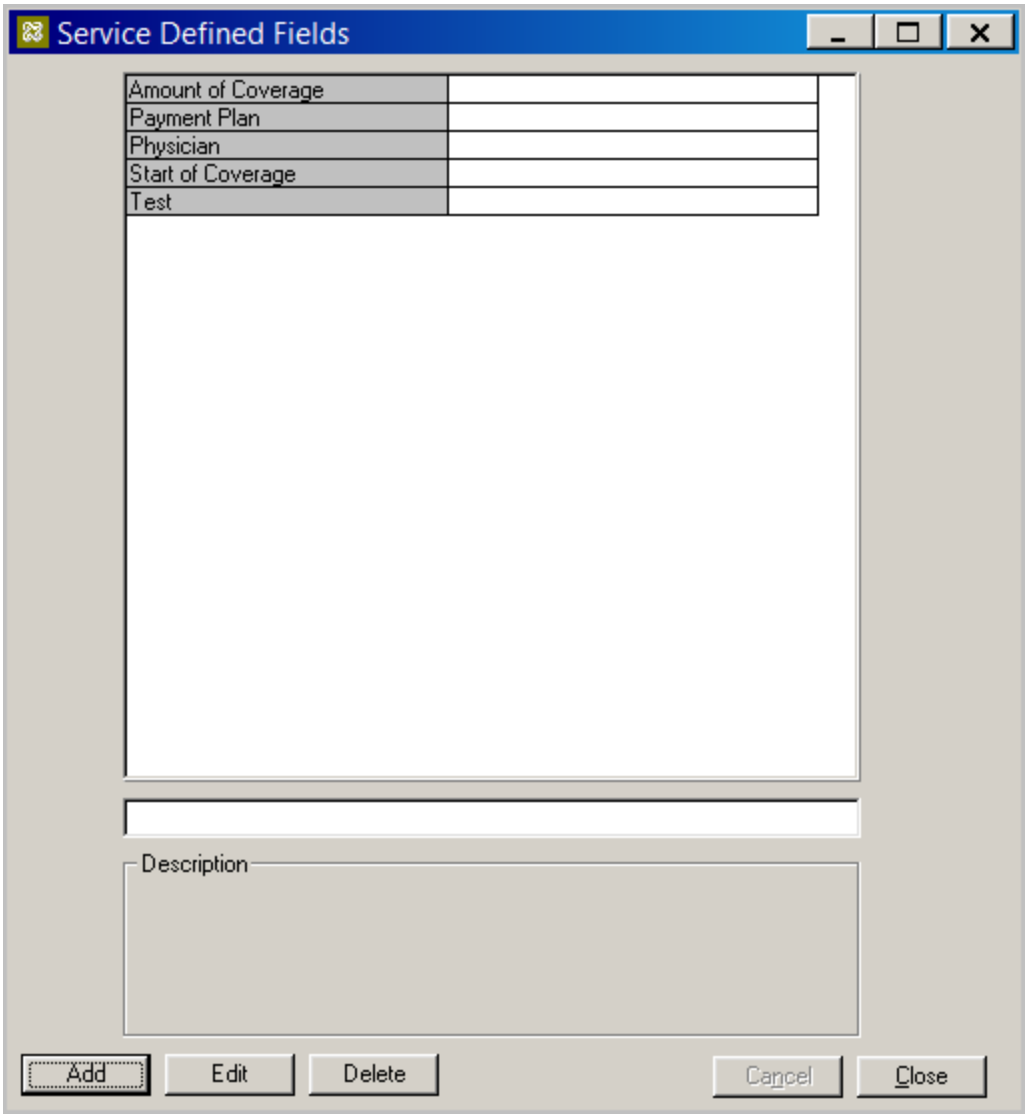
6. Specify a unique **Code**.
7. Enter a **Description**.
8. Select the **Service Category**. System service categories include:
    - Housing Service Category
    - Insurance Service Category
    - Meal Plan Service Category
    - Disability Service Category
    - Other categories can be added by the system administrator at your institution.
9. Select a **Service Billing Method**.

    Note: Some service categories, for example the Disability Service Category, cannot be associated with a billing method.
10. Select one or more **Campuses**.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

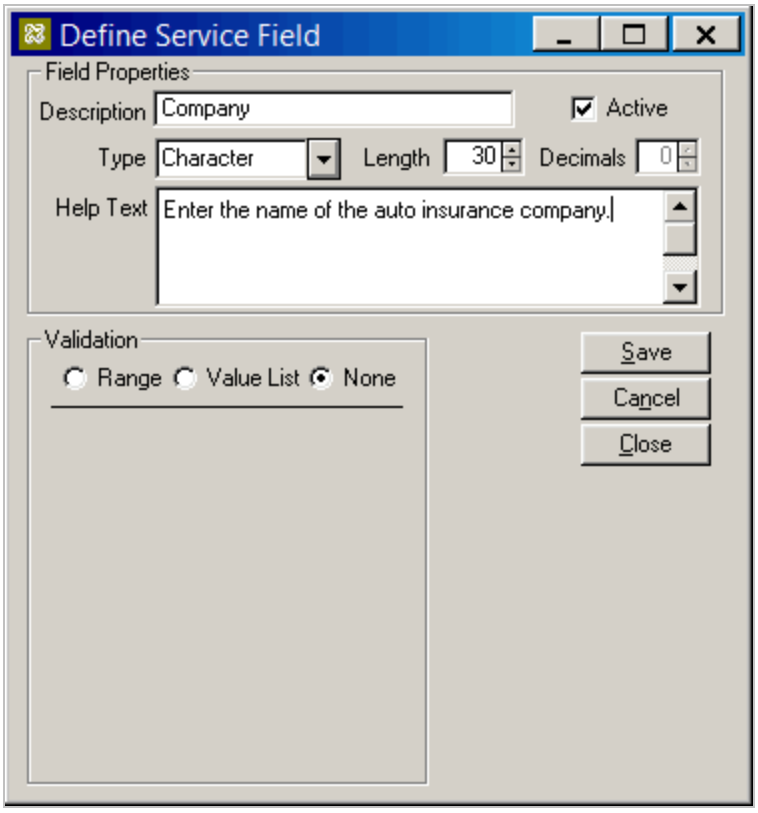
Adding Custom Fields for Student Services

For billable school services that are not included in those provided by CampusNexus Student, you can add school-defined services and associate custom fields with a Student Service. You can enter values in the custom fields when they are added to a student record. CampusNexus Student stores these values on each instance of a service per student.

1. Navigate to **Lists > Student Services**, and select the **Services** tab.
2. Select the service for which you want to add custom fields, and click **Edit**. The Services Code Setup form is displayed.
3. Click **Custom Fields**. The Service Defined Fields form is displayed showing the existing custom fields (if any).



4. Click **Add**, or select a record and click **Edit**. The Define Service Field form is displayed.



5. Enter a **Description**.
6. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
7. Select the data **Type**. Type options include:
   - Character- any alphanumeric characters (numbers, letters, or symbols up to a maximum length of 99).
   - Numeric - numbers only. Numeric fields can use range, value list, or no validation. You can specify two decimal places.
   - Date - dates only.
8. Specify the **Length** of the custom field.
9. In the **Help Text** box, specify any comments you want displayed in the **Description** field of the Service Defined Fields form when the field is selected .
10. Select the **Validation** used for the custom field. The available validation options depend on the Type:
    - Character- Value List or no validation.
    - Numeric - Range, Value List, or no validation.
    - Date - Range or no validation.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

    Your custom fields appear in the Service Defined Fields form.

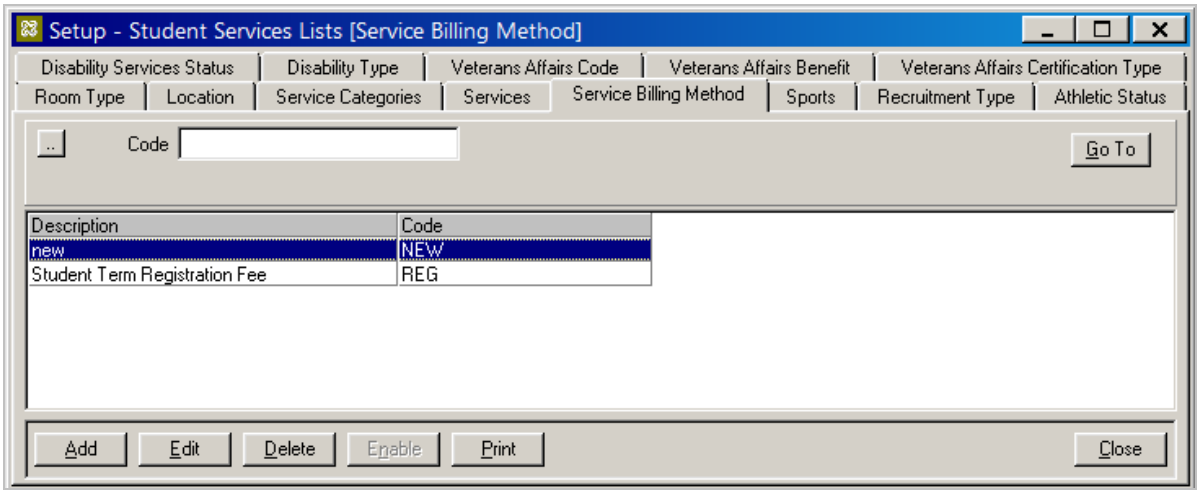
Setup - Student Services Lists [Service Billing Method]

Use the Service Billing Method tab of the Student Services Lists form to designate fees for services using a combination of flat rates and calculated rates based on student characteristics. Provide a Code, Description, Transaction Code (for tracking charges in Accounting), and other information to set up billing for a student service.

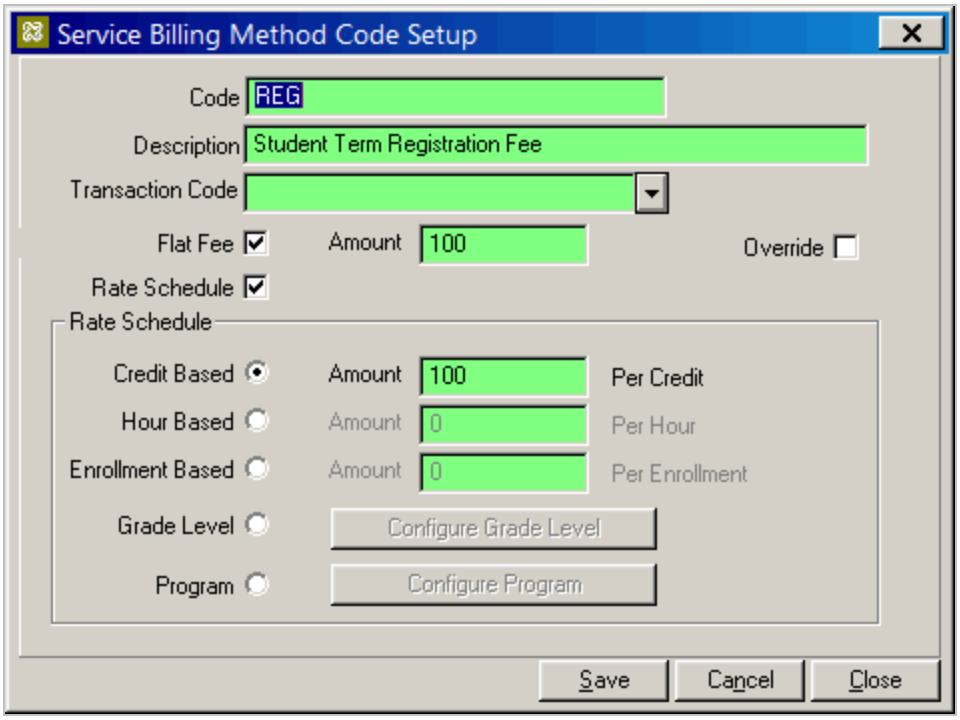
Service Billing Methods and Service Categories must be set up before Services can be configured.

To add or edit a list of service billing method codes:

1. Navigate to **Lists** > **Student Services**. The Setup - Student Services Lists form is displayed.
2. Select the **Service Billing Method** tab.

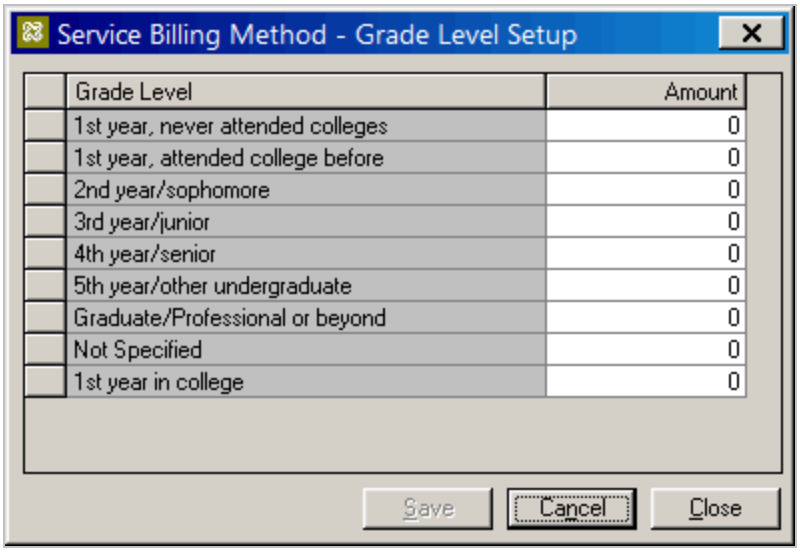


3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Service Billing Method Code Setup form is displayed.

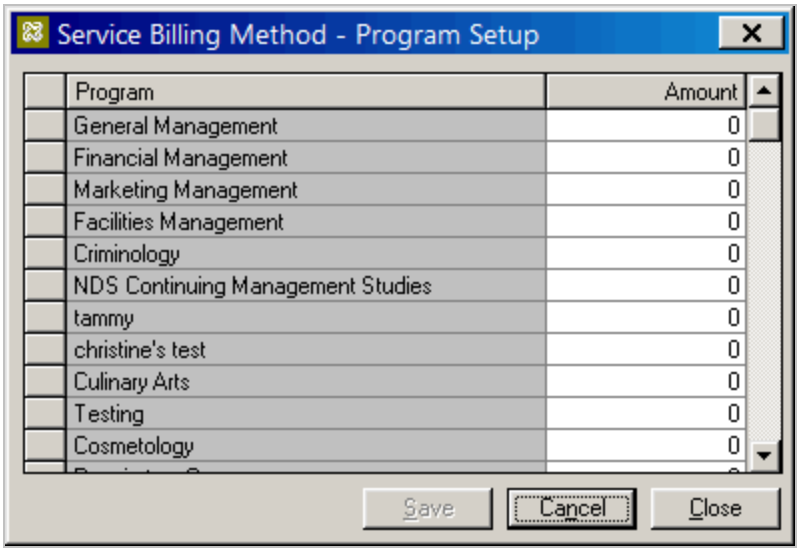


7. Specify a unique **Code**.
8. Enter a **Description**.
9. Select a **Transaction Code**. Examples of Transaction Codes are Course Extension Fees, Computer Services, Art Supplies, Lab Fees, etc.

   Transaction Codes are not Service Categories. They are generally fees for specific services that comprise Service Categories.
10. Select **Flat Fee** if applicable. If you select Flat Fee, specify the dollar amount of the fee.
11. If you select **Rate Schedule**, additional forms appear in which to configure amounts applicable to each grade or program, as follows:
    - Credit Based - Specify the dollar amount per credit.
    - Hour Based - Specify the dollar amount per hour
    - Enrollment Based - Specify the dollar amount per enrollment
    - Grade Level - Click **Configure Grade Level**. The Service Billing Method - Grade Level Setup form is displayed. Enter the amount by Grade Level. These settings may be saved or canceled.



- Program Level - Click **Configure Program**. The Service Billing Method - Program Setup form is displayed. Enter the amount by Program. These settings may be saved or canceled.



12. Select or clear **Allow Override**. If you select this option, the flat fee can be overridden and alternate amount can be applied at the time of association with the Service.
13. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

See the Lists > Student Services form to add, delete, and edit services associated with the student.

Setup - Student Services Lists [Service Categories]

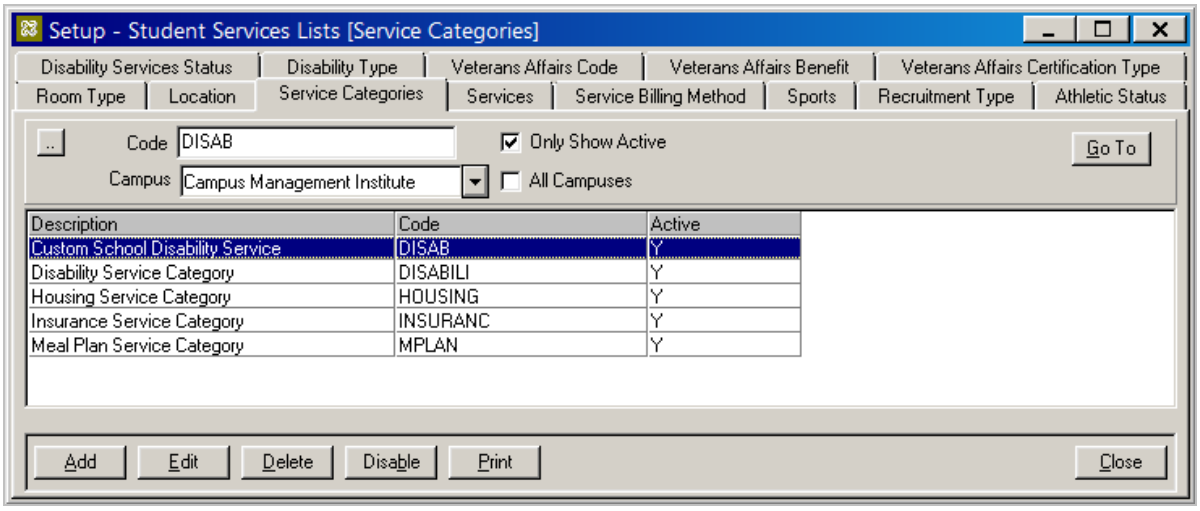
Institutions need the ability to assess fees for housing, meal plans, insurance, fines, etc. Some of these fees are picked up during registration billing, and some occur during a term. If a fee is charged after registration billing, Student Accounts staff should review and then post or reject the charges.

Fees for services are classified under broad associations of services called Service Categories. The default categories are Housing, Insurance, and Meal Plan. You can add additional categories as required. Billable services typically fall under one of these three service categories. For example, billable services associated with the Housing category could include cable TV in student housing and assigned parking spaces.

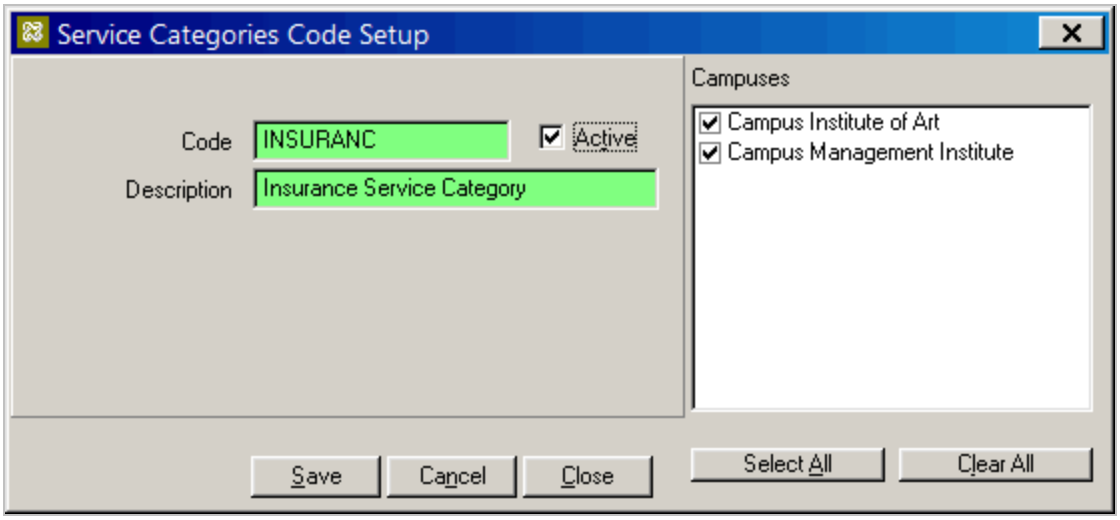
Other service categories, for example, the Disability Service Category, are used for configuring services and equipment, such as auxiliary aides, but are not used to attach any billing methods to these types of services. The Disability Service Category is a system-defined service category that cannot be changed and is available for use by all active campuses.

To add or edit a list of service categories codes:

1. Navigate to **Lists** > **Student Services**. The Setup - Student Services Lists form is displayed.
2. Select the **Service Categories** tab.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Service categories Code Setup form is displayed.



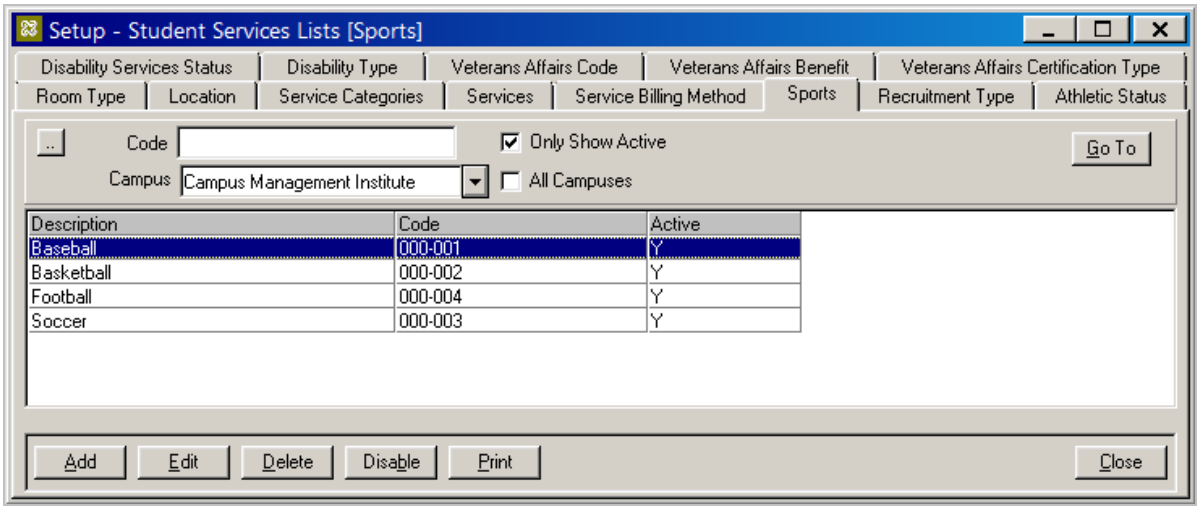
7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.
10. Select one or more **Campuses**.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Sports

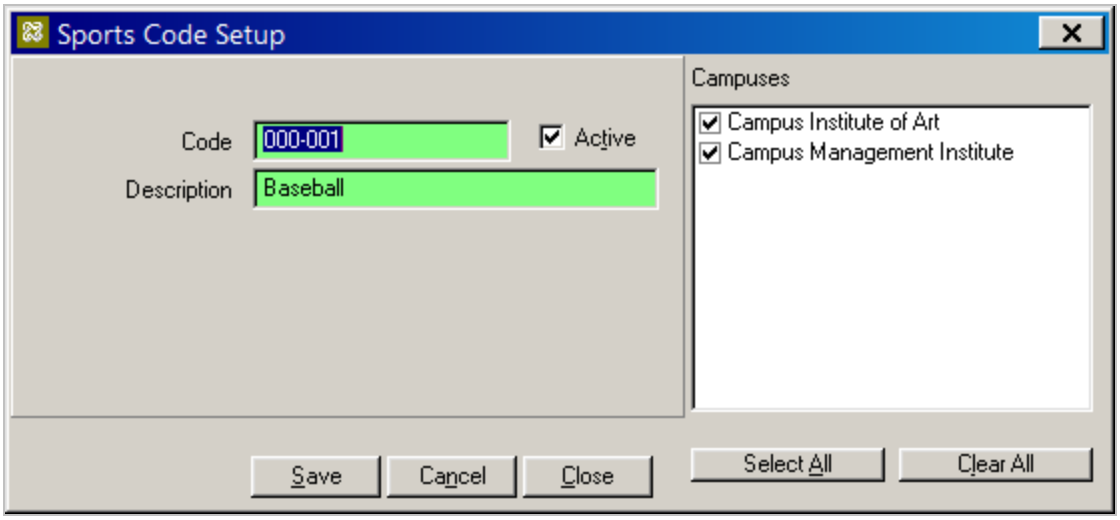
You can create a table of all sports in which your institution participates and the associated sports code of the Athletic Association to which the institution belongs.

To add or edit a list of sports codes:

1. Navigate to **Lists** > **Student Services**. The Setup - Student Services Lists form is displayed.
2. Select the **Sports** tab.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Sports Code Setup form is displayed.



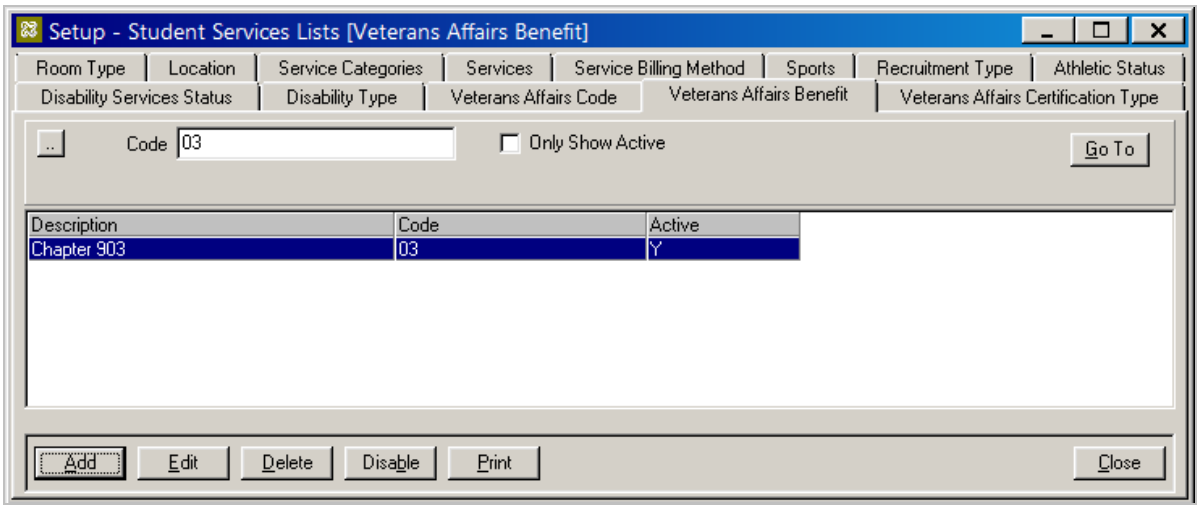
7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.
10. Select one or more **Campuses**.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Setup - Student Services Lists [Sports] form.

Setup - Student Services Lists [Veterans Affairs Benefit]

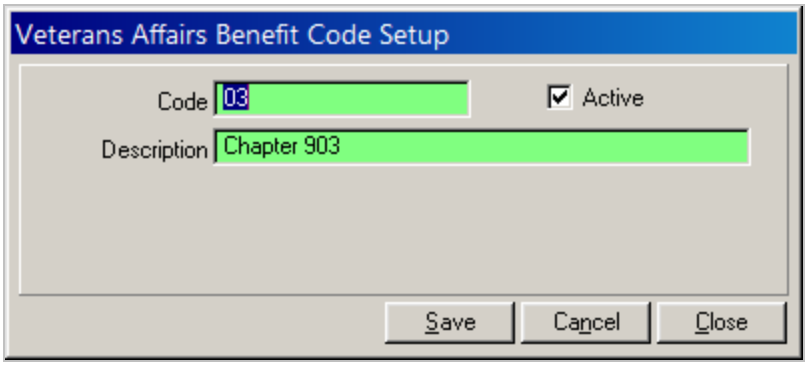
Use the Veterans Affairs Benefit tab of the Setup - Student Services Lists form to create a list of veteran affairs benefit codes.

To add or edit a list of veterans affairs benefit codes:

1. Navigate to **Lists** > **Student Services**. The Setup - Student Services Lists form is displayed.
2. Select the **Veterans Affairs Benefit** tab.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Veterans Affairs Benefit Code Setup form is displayed.



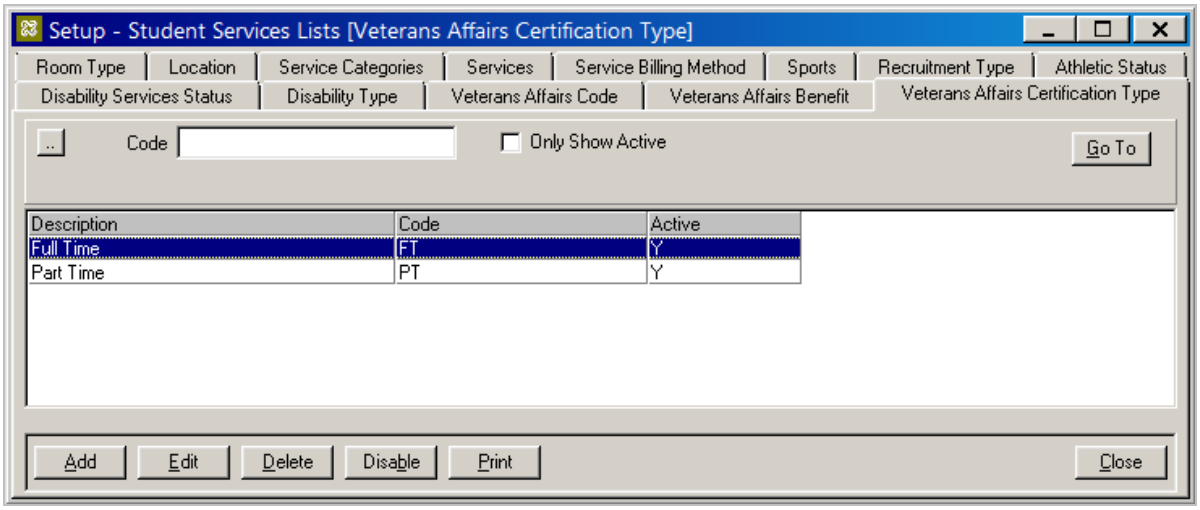
6. Specify a unique **Code**.
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. Enter a **Description**.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Student Services Lists [Veterans Affairs Certification Type]

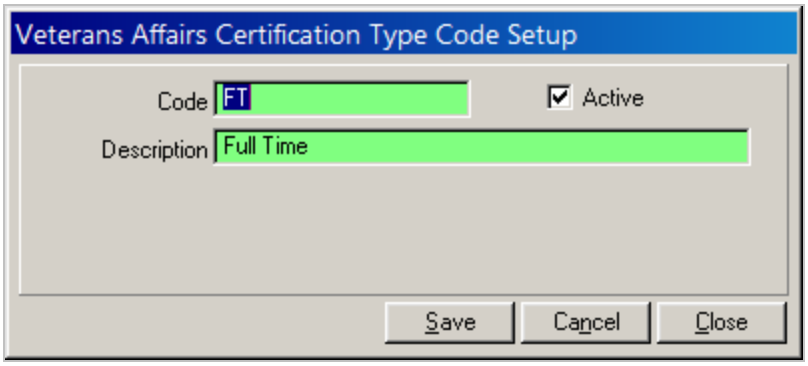
Use the Veterans Affairs Certification Type tab of the Setup - Student Services Lists form to create a list of veteran affairs certification type codes.

To add or edit a list of veterans affairs certification type codes:

1. Navigate to **Lists** > **Student Services**. The Setup - Student Services Lists form is displayed.
2. Select the **Veterans Affairs Certification Type** tab.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Veterans Affairs Certification Type Code Setup form is displayed.



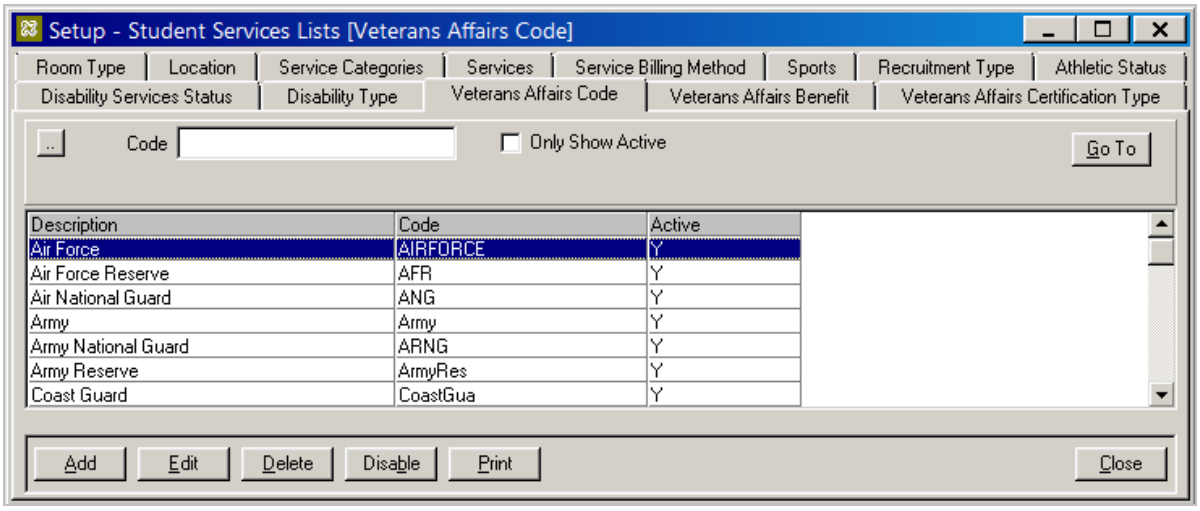
6. Specify a unique **Code**.
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. Enter a **Description**.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Student Services Lists [Veterans Affairs Code]

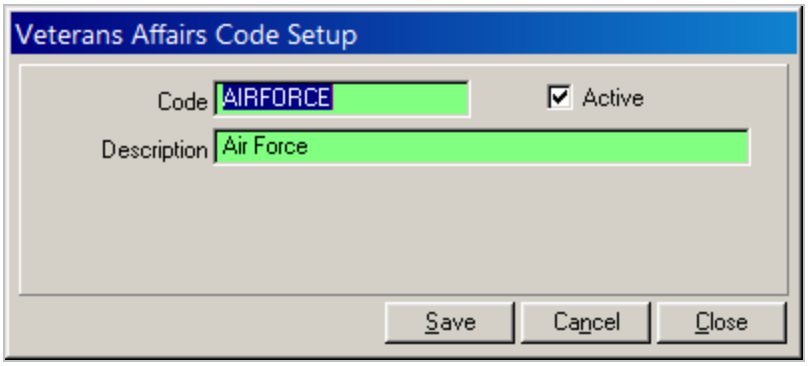
Use the Veterans Affairs Code tab of the Setup - Student Services Lists form to create a list of veteran affairs codes.

To add or edit a list of veterans affairs codes:

1. Navigate to **Lists** > **Student Services**. The Setup - Student Services Lists form is displayed.
2. Select the **Veterans Affairs Code** tab.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Veterans Affairs Code Setup form is displayed.



6. Specify a unique **Code**.
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. Enter a **Description**.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Lists > Housing

The Housing module is used to track information related to student housing. Users can not only manage housing locations, room types, and housing assistance information for students, but also track all the housing facilities available to institutions and concurrently manage the applications, allocation, and billing of housing services using the Housing module. Housing applications (defined by campus), room assignments, financial transactions including deposits and application of deposit fees, cross campus housing requests, and necessary reporting requirements are supported.

To set up data for the housing services offered by your institution, navigate to Lists > Housing. The Setup - Housing Lists form is displayed. Add, edit, delete, enable, disable, and print Housing lists from the following tabs:

- Application
- Building
- Building Categories
- Housing Amenities
- Housing Dates
- Room Categories
- Suite Categories

See Maintaining Lists for instructions on adding, editing, deleting, disabling, enabling, and printing lists.

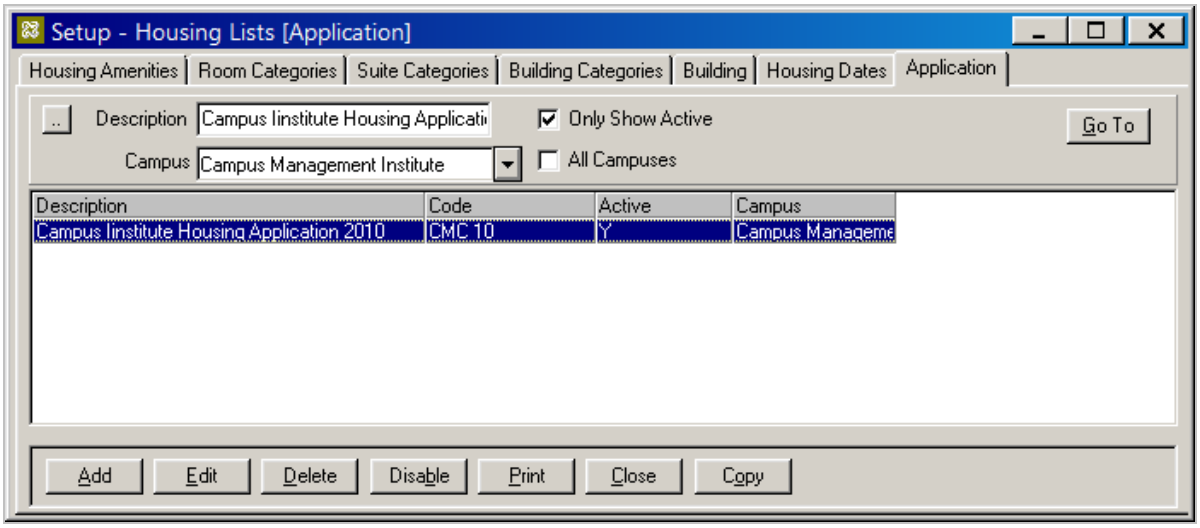
Setup - Housing Lists [Application]

Use the Application tab of the Setup - Housing Lists form to maintain applications that the students seeking housing facilities can use to apply for housing. You can perform the following tasks from the Application tab:

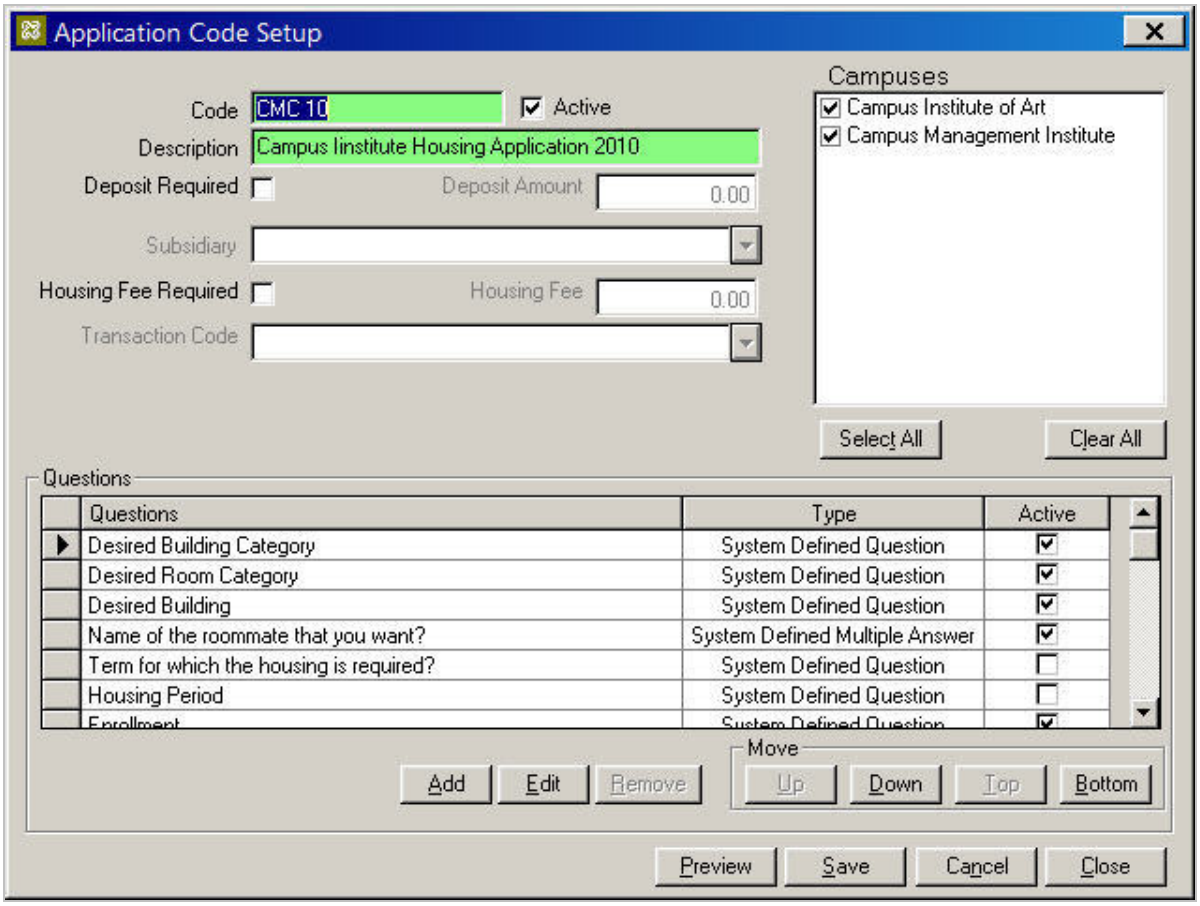
- Add or edit a housing application
  - Edit system defined questions
  - Add questions to a housing application
- Preview or print a housing application
- Copy a housing application
- Print a list of housing applications

To add or edit a list of housing application codes:

1. Navigate to **Lists** > **Housing**. The Setup - Housing Lists form is displayed.
2. Select the **Application** tab .



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Application Code Setup form is displayed.



7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.
10. If a student needs to provide a deposit fee with the application, select **Deposit Required** and specify the **Deposit Amount**.
11. Select the **Subsidiary** to which the deposit is applied. Subsidiaries must be set up previously.
12. If a student needs to provide a housing fee with the application, select **Housing Fee Required** and specify the amount in the **Housing Fee** field.
13. Select the **Transaction Code** to which the housing fee is applied. Transaction Codes must be set up previously.
14. Select **Housing Fee Subsidiary** from the list of subsidiaries with which the selected transaction code is associated. This field is populated when the transaction code selected for Housing Fee is associated with subsidiary.
15. Select the **Campuses** associated with this housing application.

    Note: Only one active application can be associated with a campus.
16. The **Questions** frame lists questions that appear on the application form.

    When a housing application is added, **System Defined Questions** appear in the list of questions. This question type includes the following questions:

- Desired Building Category *
- Desired Room Category *
- Desired Building *
- Name of roommate that you want *
- Term for which housing is required
- Housing Period
- Enrollment *
- Academic Year for which housing is required

Note: Items with an asterisk (*) default to an active status.

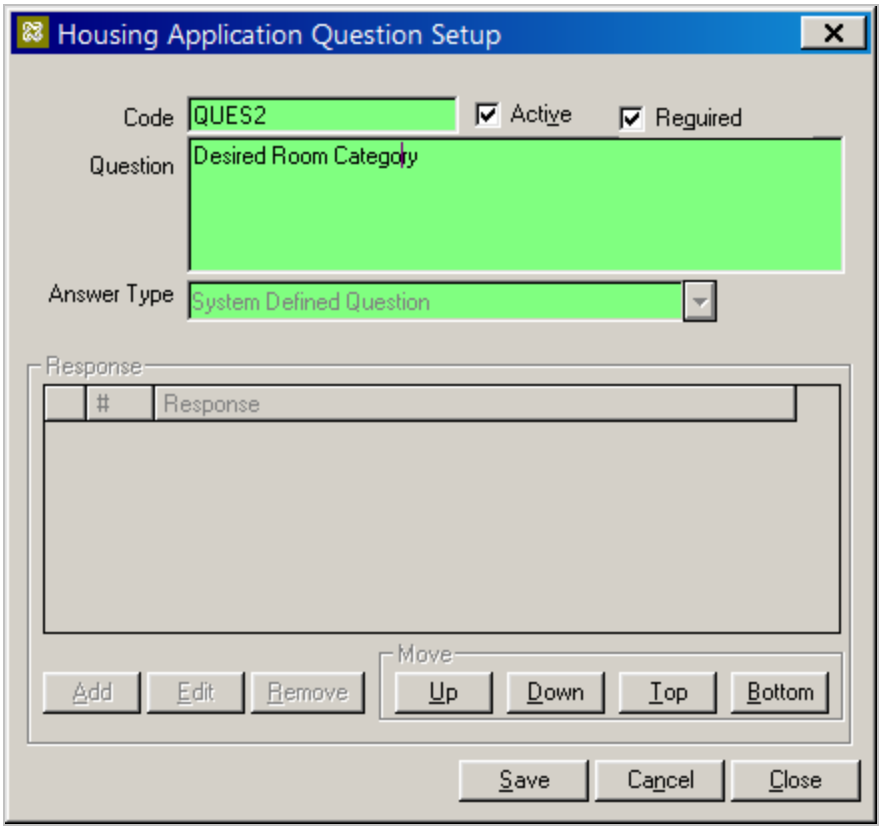
Only questions whose associated **Active** check box is selected are displayed to students as they fill in the application. Each question has list boxes or radio buttons populated with information contained in the CampusNexus Student database. For example, the questions pertaining to the Building Category, Room Category, and Building containing entries entered under Lists > Housing for Building Categories, Building, and Rooms. Other items, such as the Required Term or Academic Year questions, use information contained in the student's record. The Enrollment list is populated with the default enrollment.

Important: Only one of the questions relating to the time period when the student will require housing must be set to an active status. One of the "Academic Year", "Housing Period", or "Term" questions must be active. If the "Academic Year" question is active, the "Enrollment" question is automatically active.

Note: When selecting Academic Year based application, rooms must be defined with a billing frequency other than Term (e.g., Daily, Monthly).

To edit system defined questions:

a. Select a question and click **Edit**. The Housing Application Question Setup form is displayed.



b. Specify a unique **Code**.

c. Enter the text of the **Question**.

d. Select or clear the **Active** check box to designate the record as active or inactive, respectively.

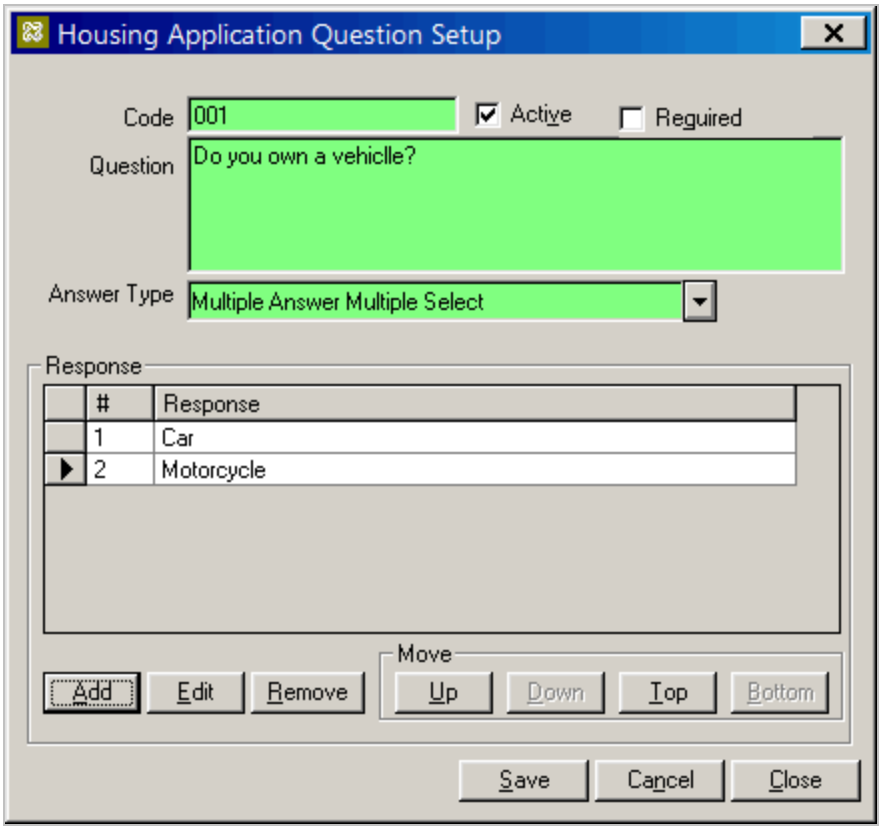
e. Select **Required** if you want to the question to be mandatory.

f. The Answer Type and Response fields are system defined and cannot be edited.

g. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To add questions to the housing application:

a. Click **Add** in the Questions field of the Application Code Setup form. The Housing Application Question Setup form is displayed.



b. Specify a unique **Code**.

c. Select or clear the **Active** check box to designate the record as active or inactive, respectively.

d. Select **Required** if you want to the question to be mandatory.

e. Enter the text of the question in the **Question** field.

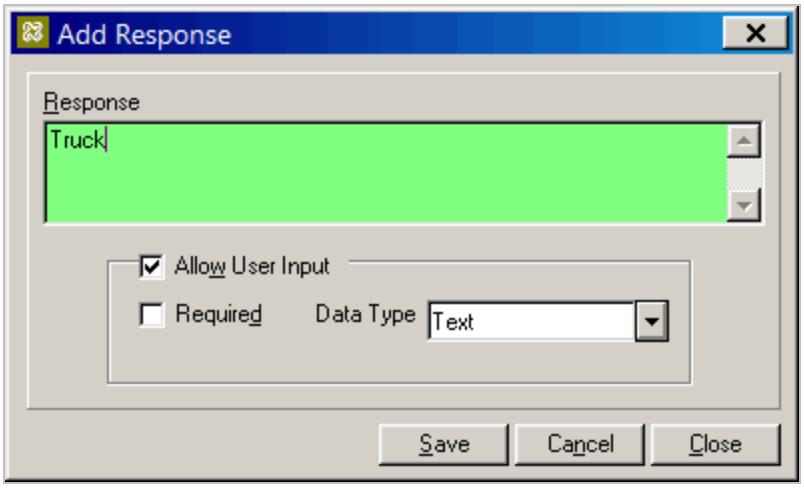
f. Select the **Answer Type**. The answer types available are:

- Multiple Answer Multiple Select
- Multiple Answer Single Select
- Text

- True/False
- Yes/No

g. Click **Save**. The Response frame is activated after you save the question. This field is activated only for Multiple Answer Multiple Select and Multiple Answer Single Select answer types.

h. If you selected **Multiple Answer Multiple Select** or **Multiple Answer Single Select** as the answer type, click **Add** in the Response frame to add the response options for the question. The Add Response form is displayed.



i. Add the response text in the **Response** field. The response is an option that the student can select on the application.

j. Select **Allow User Input** if you want the user to be able to provide more information related to the response you have provided.

k. Select the **Data Type**. The options available are:

- Date
- Integer
- Text

l. Select **Required** if you want the user response to be a required field in the housing application.

m. Click **Save**.

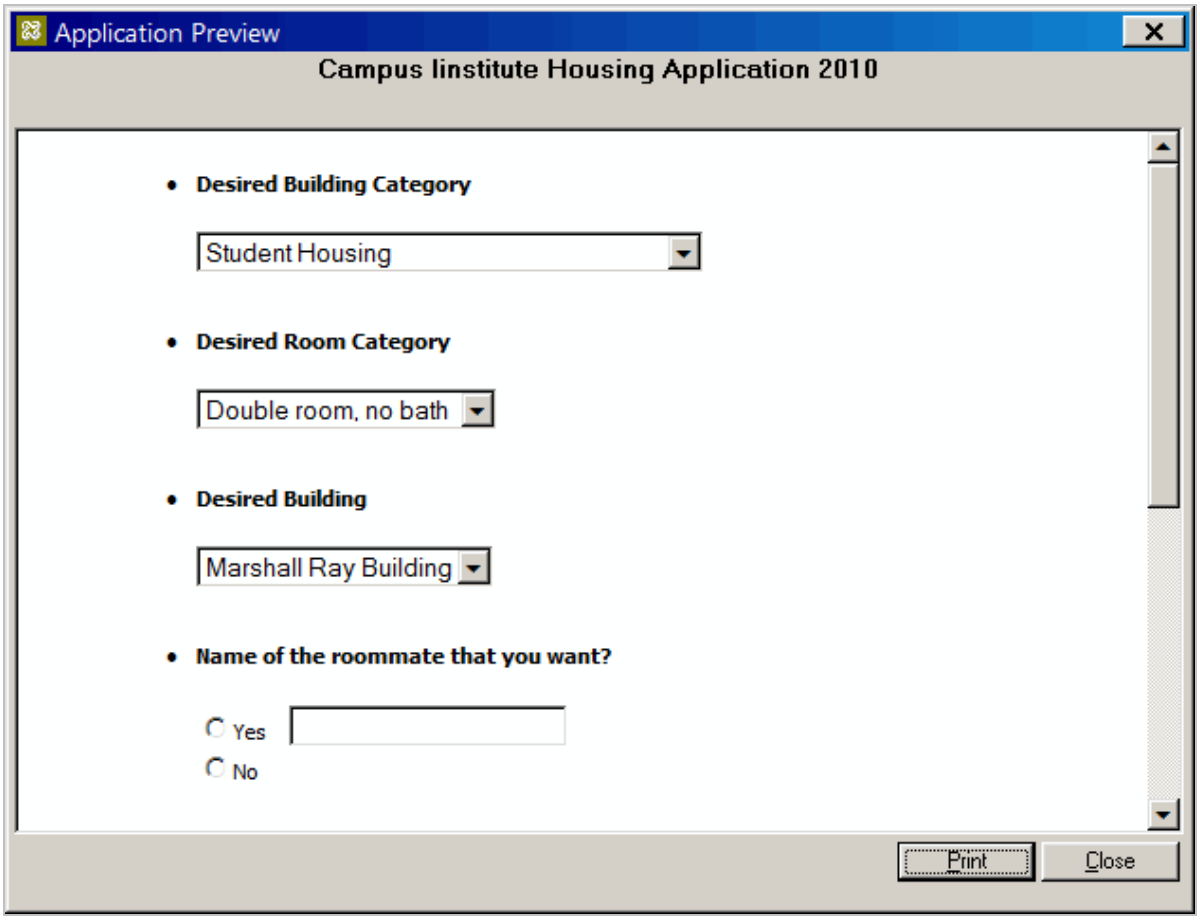
n. Repeat the preceding steps to add more response options for the **Multiple Answer Multiple Select** or **Multiple Answer Singe Select** answer types.

o. The added responses appear in the Response list in the Housing Application Question Setup form. Use the **Up**, **Down**, **Top**, and **Bottom** buttons to change the order of the responses in the application.

p. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To preview or print a housing application:

1. Click **Preview** on the Application Setup form, or select an application from the Setup - Housing Lists [Application] tab and click **Print**. The Application Preview form is displayed. Only questions that are saved with the status 'Active' are displayed in the preview.



2. Click the **Print** button on the Application Preview form.
3. Click **Close** to close the form.

To copy a housing application:

1. On the Setup - Housing Lists [Application] tab, select the housing application to copy , and click **Copy**.
2. Specify a unique **Code**.
3. Click **OK** to copy the application.
4. The status of the copied application is 'inactive' by default. Clear the **Only Show Active** check box on the Application tab (in case it is enabled) to view the copied application in the list.

   Note: There cannot be more than one active application related to a campus.
5. To edit the copied application, select the application and click **Edit**, specify your changes, and click **Save**.

To print a list of housing applications:

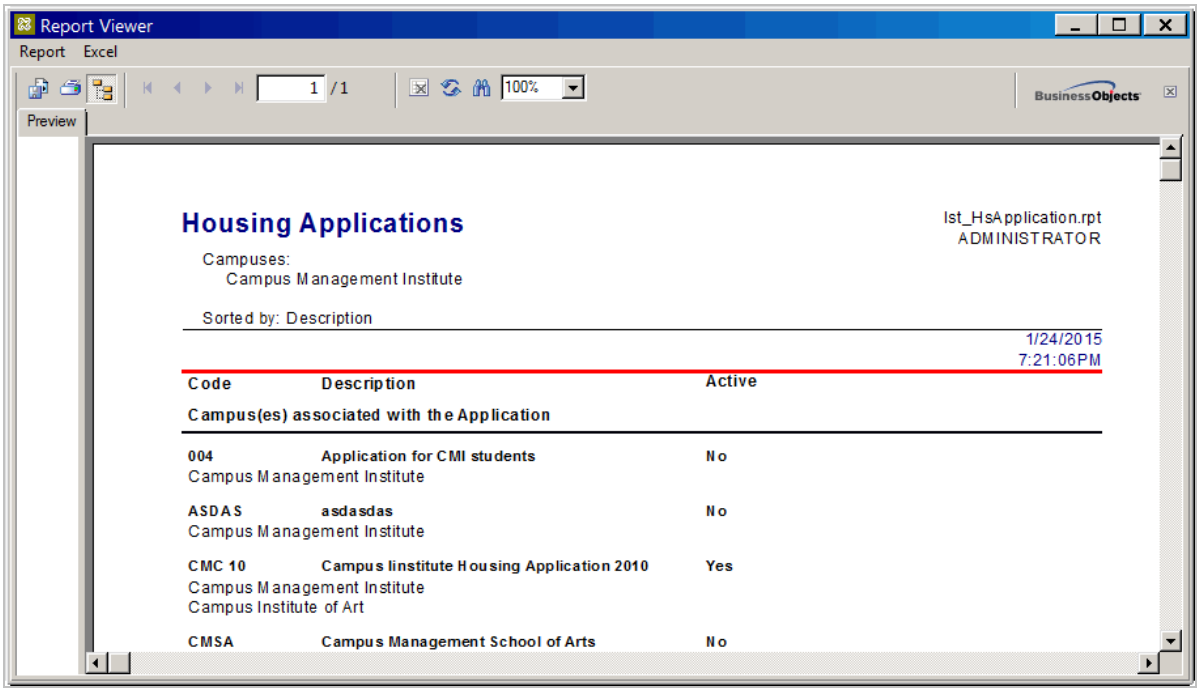
1. On the Setup - Housing Lists [Application] tab, click **Print**. The Report Selection form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

Select or clear **Yes** or **No** next to the Active label. If you select Yes, active records are listed on the report. If you select No, inactive records are listed. If you select both, active and inactive records are listed.

If no records match the selection criteria, the message *"No records selected for the report"* is displayed.

Sort the Housing Applications report by **Code** or **Description**.

4. Click **Preview**. The report is assembled and displayed in the Report Viewer. The report contains the Code, Description, and Active indicator.



5. See Report Viewer for instructions on printing or exporting the report.

Setup - Housing Lists [Building]

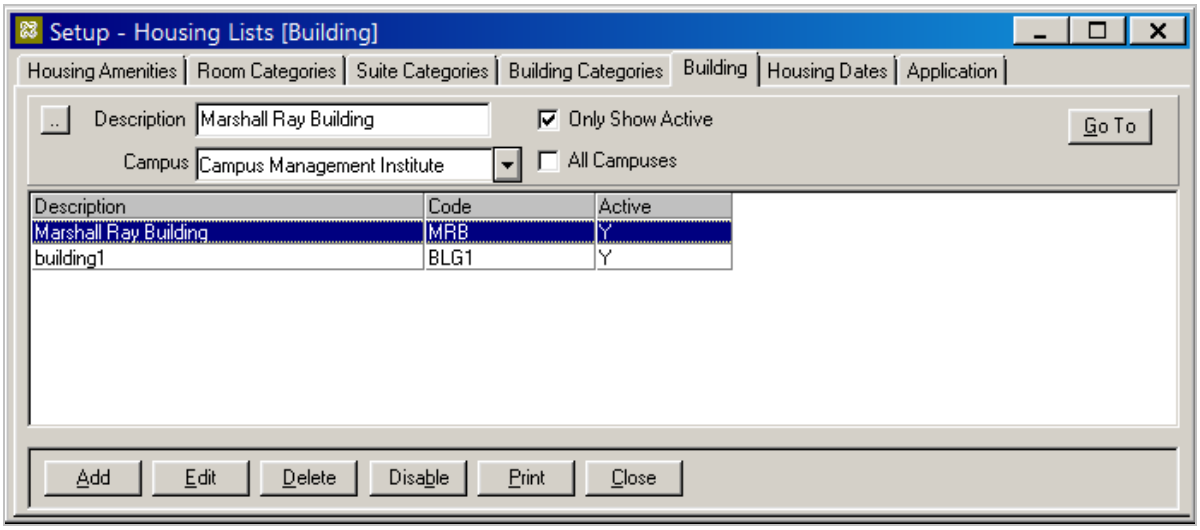
Use the Building tab of the Setup - Housing Lists form to maintain the details of buildings for student housing. A building is a collection of rooms or suites, or both. Using this tab you can associate suites and rooms, and the details of these, with a building.

You can perform the following tasks from the Building tab:

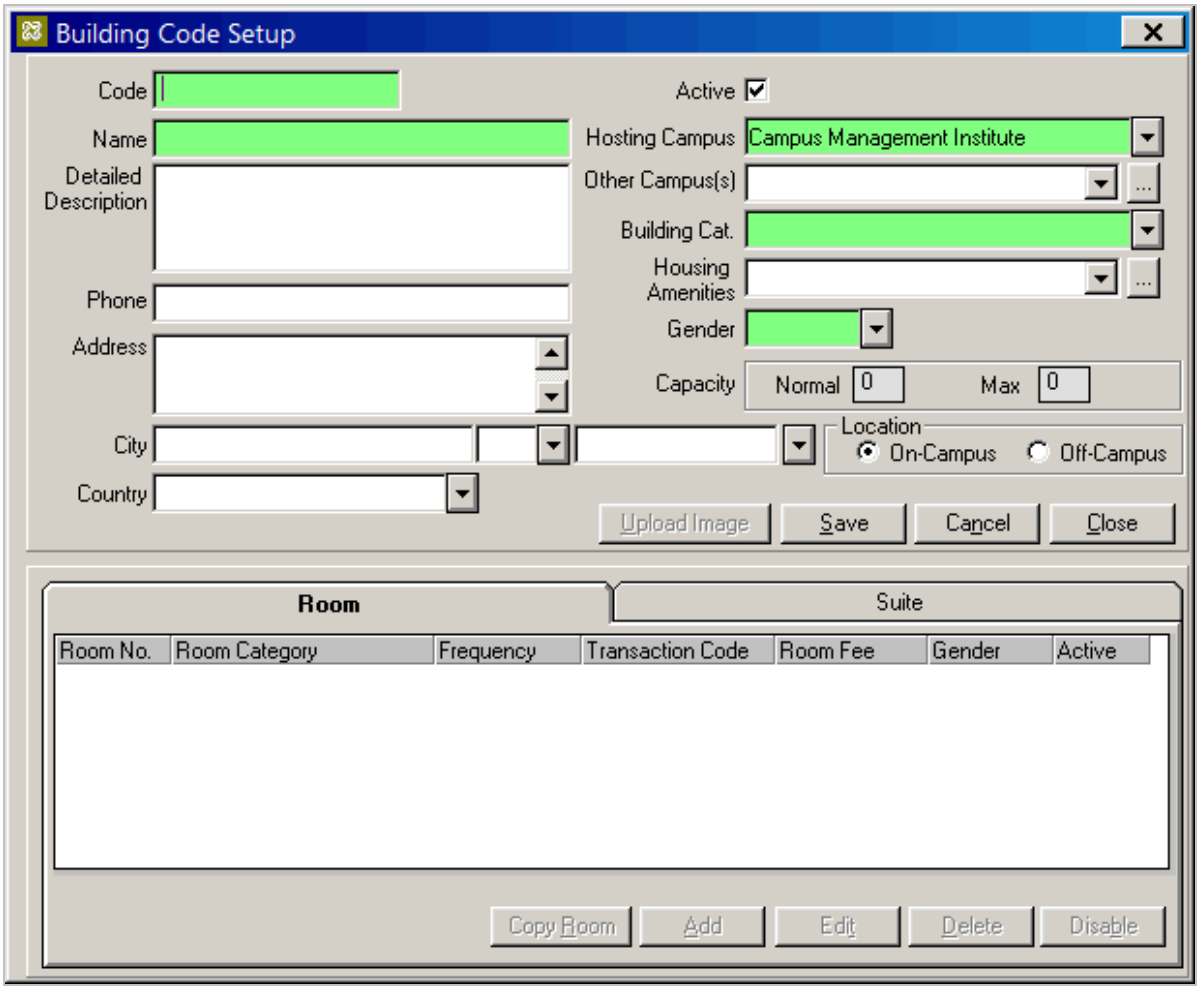
- Add or edit a building
- Associate suites with buildings and add rooms to a suite
- Associate rooms with buildings
- Delete a building
- Disable or enable a building
- Print a list of the buildings

To add or edit a list of building codes:

1. Navigate to **Lists** > **Housing**. The Setup - Housing Lists form is displayed.
2. Select the **Building** tab.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Building Code Setup form is displayed.



7. Specify appropriate options. For more information, see Field Descriptions.
8. Click **Save**.

Note: The Add, Edit, and Delete buttons on the Building Code Setup form are enabled after the building details are saved.

Field Descriptions

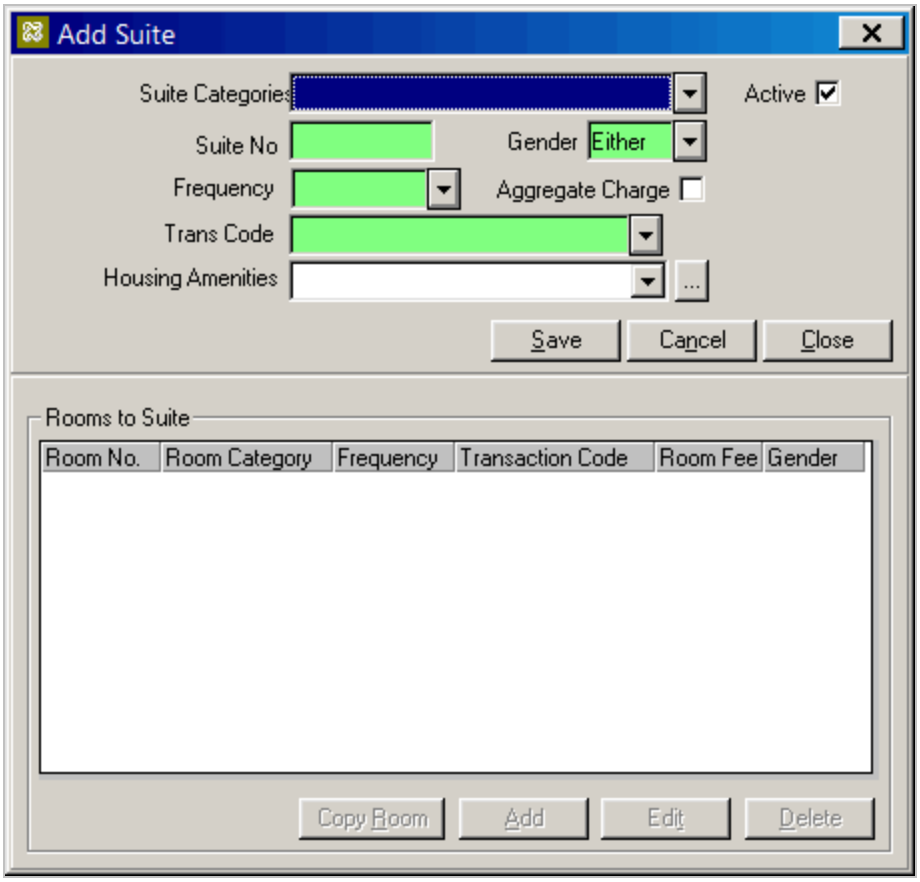
Field	Description
Code	Code of the building.
Active	Select or clear the Active check box to designate the record as active or inactive.
Name	Name of the building.
Detailed Description	Detailed description of the building.
Building Category	Building category for the building.
Address	Address of the building.
City	City where the building is located - State - ZIP code

Field	Description
Country	Country where the building is located.
Hosting Campus	Campus to which the building is associated.
Other Campuses	Select the campus from where student will also have access to the building. Click ... to select multiple campuses.
Housing Amenities	Housing amenities available in the building. Click ... to select multiple amenities.
Gender	Gender of the students to be accommodated in the building. The options are: • Co-ed • Either • Female • Male.
Phone	Telephone number of the building.
Location	Location of the building, On-Campus or Off-Campus.
Capacity	The Normal and Maximum fields are calculated fields. The value is 0 at form load and is updated when suites and/or rooms are added to the building.

To associate suites with buildings:

Before associating suites with buildings, suite categories must be set up under Lists > Housing > Suite Categories.
Before associating rooms with suites, room categories must be set up under Lists > Housing > Room Categories .

1. Select the **Suite** tab on the Building Code Setup form and click **Add**. The Add Suite form is displayed.



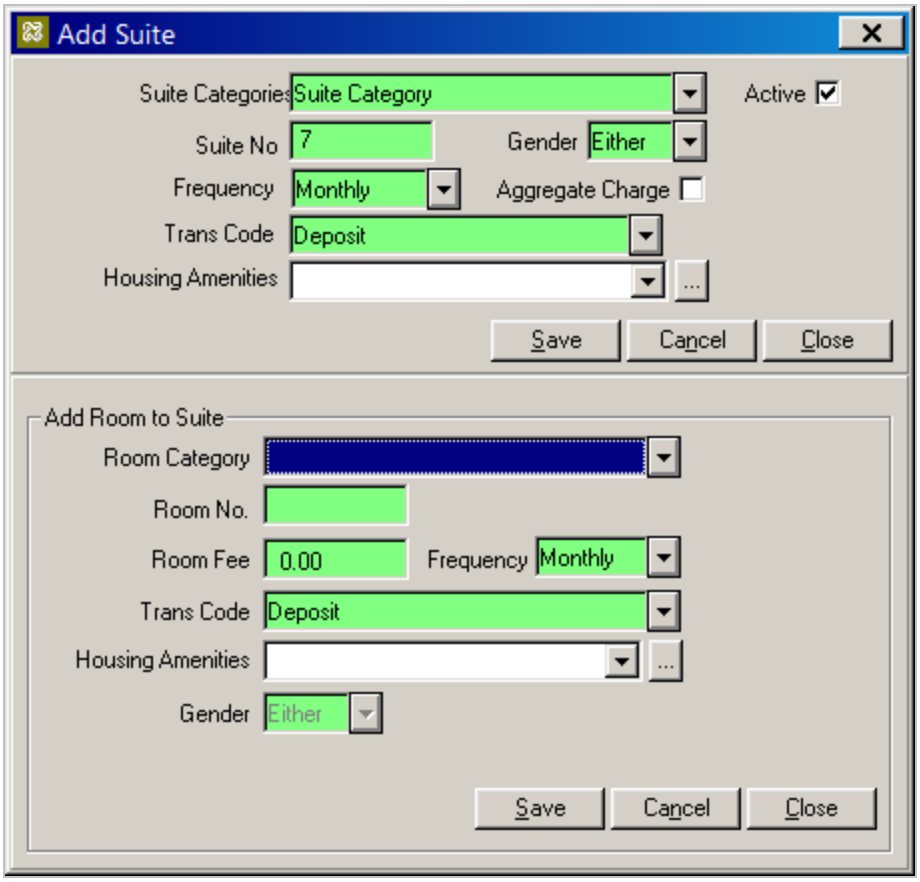
2. Select the **Suite Category**.
3. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
4. Specify the **Suite No**.
5. The **Gender** field is populated with the gender selected for the building. This field is editable if you selected **Co-ed** or **Either** as the gender for the building.
6. By default, the **Housing Amenities** field is populated with the housing amenities selected for the building; however, you can update the selection of amenities.
7. Click **Save**.

   Note: The Add, Edit, and Delete buttons on the Add Suite form are enabled after the suite category details are saved.

To add rooms to a suite

Transaction Codes and Housing Amenities must be set up before adding rooms to the suite.

a. Click **Add** on the Add Suite form. The Add Room to Suite frame replaces the Rooms to Suite frame.



b. Select the **Room Category**.

c. When you select a Room Category, the fields for **Room Fee**, **Frequency**, **Trans Code**, and **Housing Amenities** are populated with the values (if any) saved for the category in the room category master. You can change the information in these fields.

d. Specify the **Room No**.

e. The **Gender** field is populated with the gender selected for the building. This field is editable if you selected **Co-ed** or **Either** as the gender for the building.

f. Click **Save**. The added room is now displayed in the Rooms to Suite list in the Add Suite form.

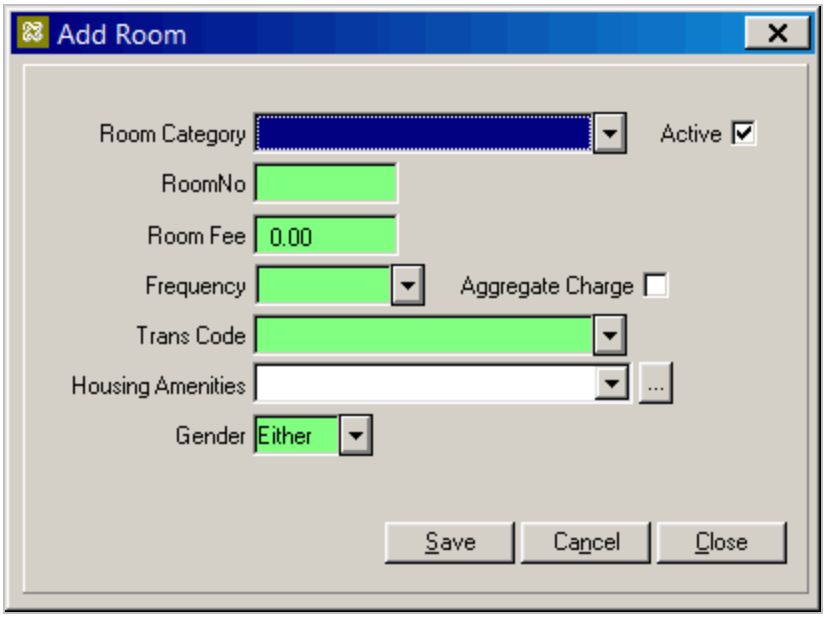
g. Click **Close** to close the form. The added suite is now displayed in the Suite list in the Building Code Setup form.

To associate rooms with buildings:

A building may contain rooms that are not part of suites. Use the following steps to associate rooms with buildings.

Before adding a room, room categories must be set up under Lists > Housing > Room Categories.

1. Select the **Room** tab on the Building Code Setup form and click **Add**. The Add Room form is displayed.



2. Select the **Room Category**.
3. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
4. Specify the room number in the **Room No**. field.
5. Specify the **Room Fee** (in numbers) for the room.
6. Select how often the student pays the room fee from the **Frequency** list.
7. Select the general ledger transaction code from the **Trans Code** list.
8. Select the **Housing Amenities** associated with the room.
9. The **Gender** field is populated with the gender selected for the building. This field is editable if you selected **Co-ed** or **Either** as the gender for the building.
10. Click **Save**. A new Add Room form is displayed where you can associate another room with the building.
11. Click **Close** to close the form. The added room is now displayed in the Room list in the Building Code Setup form.

To delete a building:

Click **Delete** on the Setup - Housing Lists [Building] tab.

To disable or enable a building:

The Disable/Enable buttons toggle, depending on whether the selected record is active or not.

- When you click **Disable**, an 'N' appears in the Active field to indicate that the record is inactive.
- When you click **Enable**, a 'Y' appears in the Active field to indicate that the record is active.

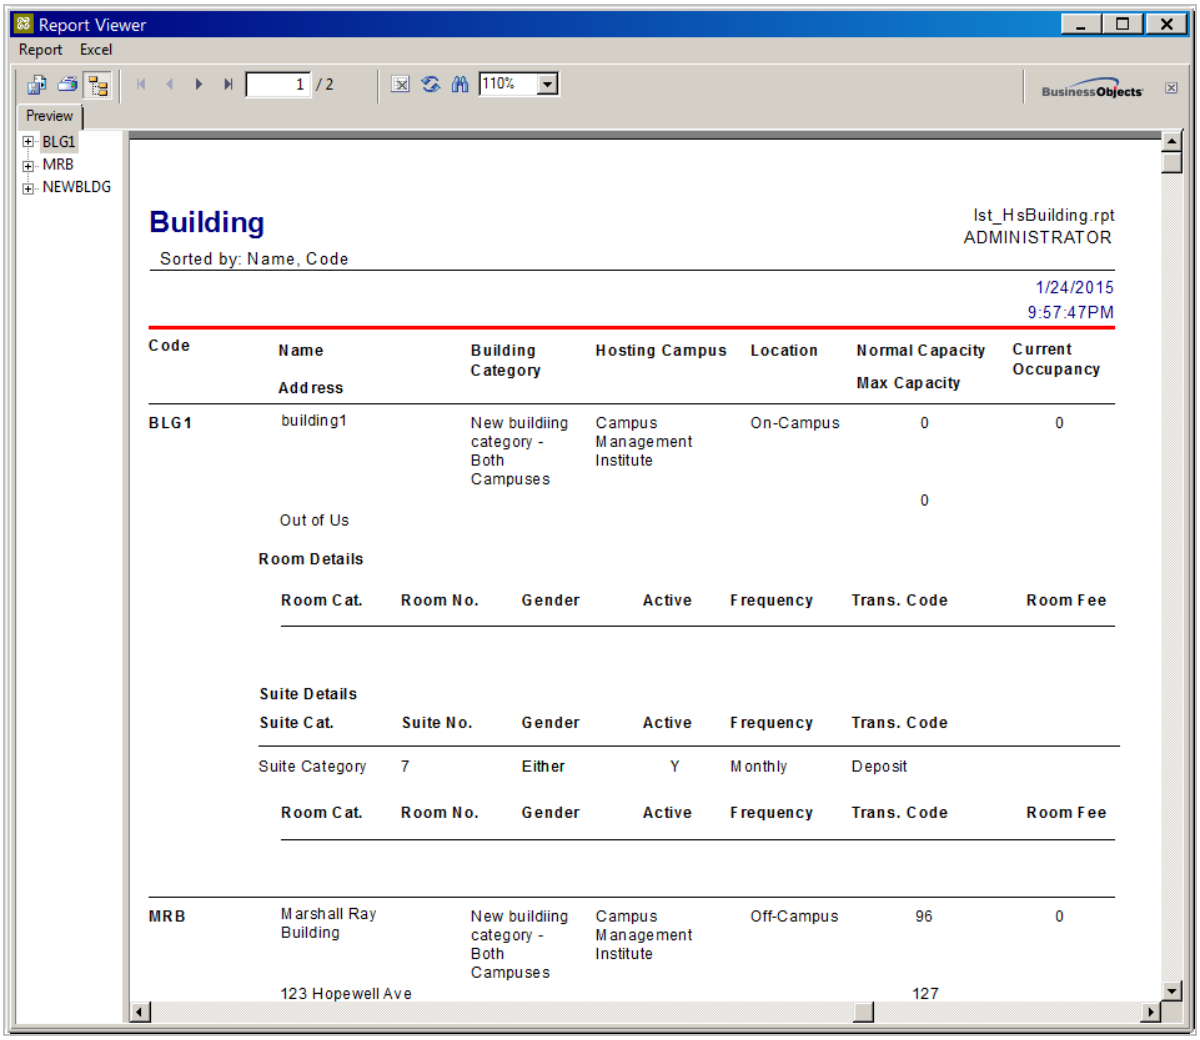
To print a list of buildings:

1. On the Setup - Housing [Building] tab, click **Print**. The Report Selection form is displayed.
2. Select or clear **Yes** or **No** next to the Active label. If you select Yes, active records are listed on the report. If you

select No, inactive records are listed. If you select both, active and inactive records are listed.

If no records match the selection criteria, the message *"No records selected for the report"* is displayed.

3. Click **Preview**. The report is assembled and displayed in the Report Viewer. The report contains the building code, name and address, category, hosting campus, location, normal capacity, current occupancy, max capacity, and Active indicator. The room and suite information is listed for each building and indicates whether the rooms or suites are active.



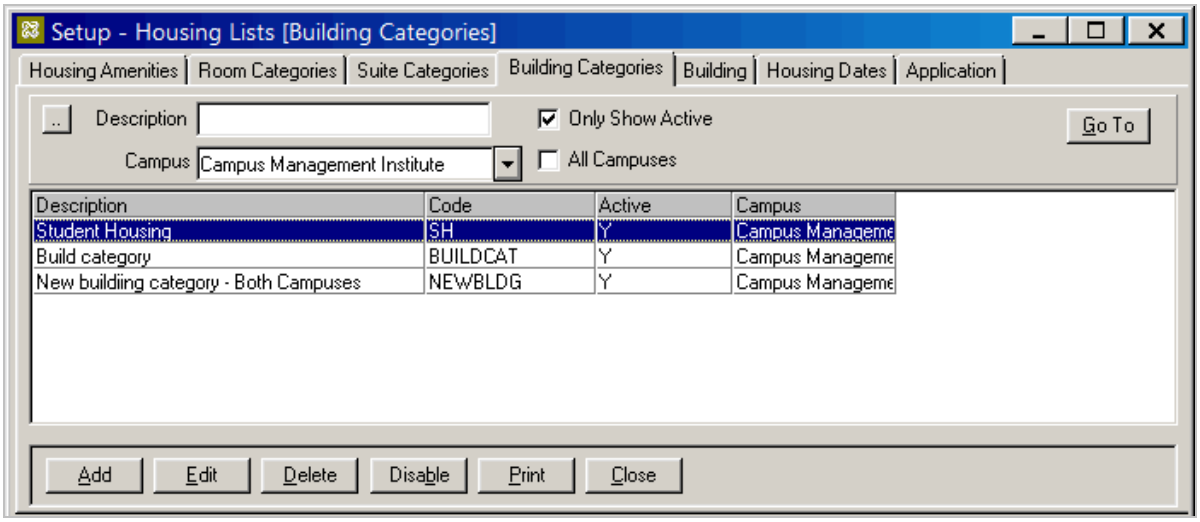
4. See Report Viewer for instructions on printing or exporting the report.

Setup - Housing Lists [Building Categories]

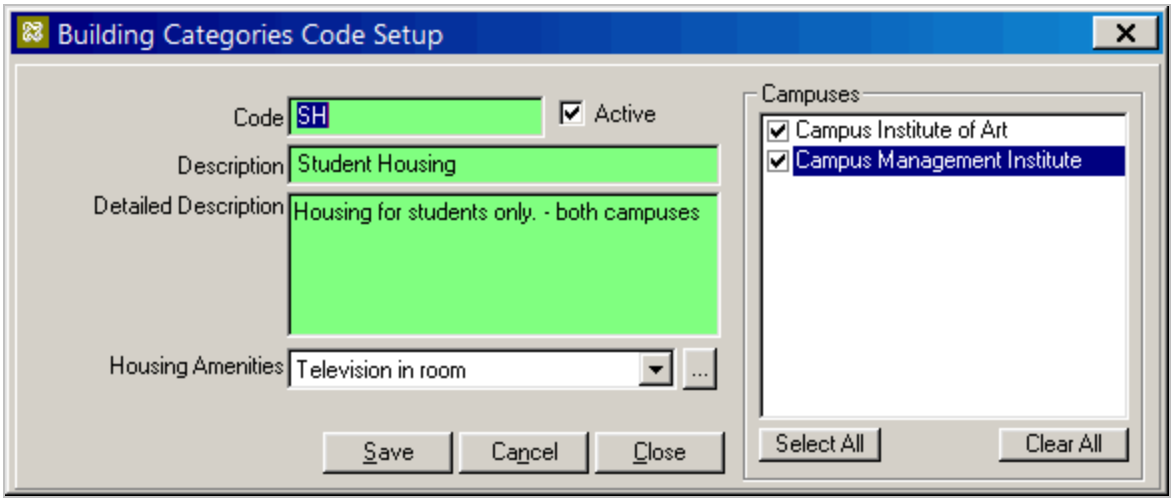
Use the Building Categories tab of the Setup - Housing Lists form to classify the buildings available for student housing into various categories.

To add or edit a list of building category codes:

1. Navigate to **Lists** > **Housing**. The Setup - Housing Lists form is displayed.
2. Select the **Building Categories** tab.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Building Categories Code Setup form is displayed.



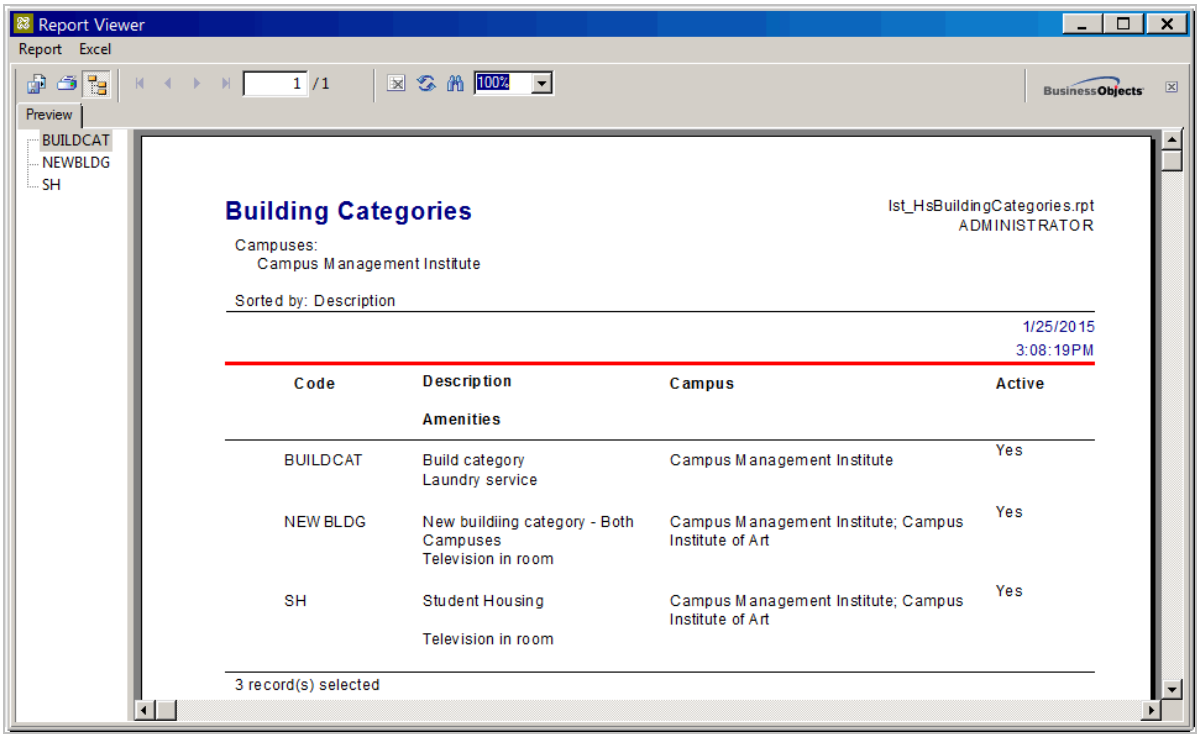
7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.
10. Specify a **Detailed Description**.
11. Select the **Housing Amenities** available in the building category. Click ... to select multiple housing amenities.
12. Select the **Campuses** that use the building category.
13. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To print a list of building categories:

1. Click **Print** on the Setup - Housing Lists [Building Categories] tab. The Report Selection form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Select or clear **Yes** or **No** next to the Active label. If you select Yes, active records are listed on the report. If you select No, inactive records are listed. If you select both, active and inactive records are listed.

   If no records match the selection criteria, the message *"No records selected for the report"* is displayed.
4. Click **Preview**. The report is assembled and displayed in the Report Viewer. The report contains the Code, Description, and Active indicator.



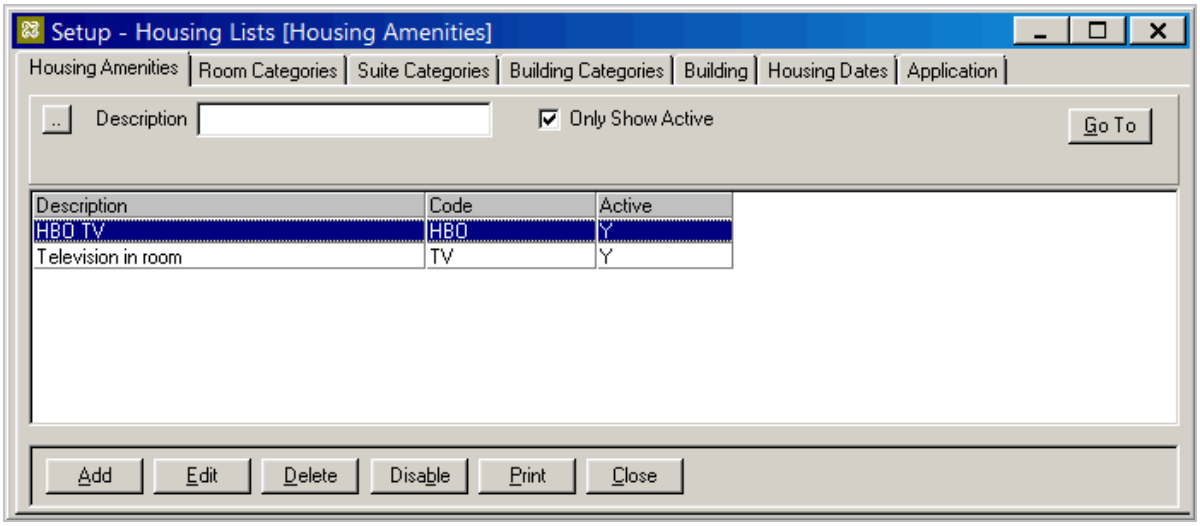
5. See Report Viewer for instructions on printing or exporting the report.

Setup - Housing Lists [Housing Amenities]

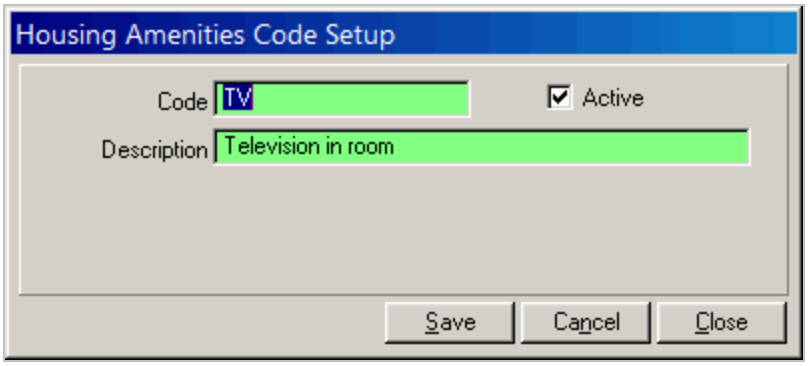
Use the Housing Amenities tab of the Setup - Housing Lists form to maintain a list of amenities in buildings, suites, or rooms available for student housing.

To add or edit a list of housing amenities codes:

1. Navigate to **Lists** > **Housing**. The Setup - Housing Lists form is displayed.
2. Select the **Housing Amenities** tab.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Housing Amenities Code Setup form is displayed.



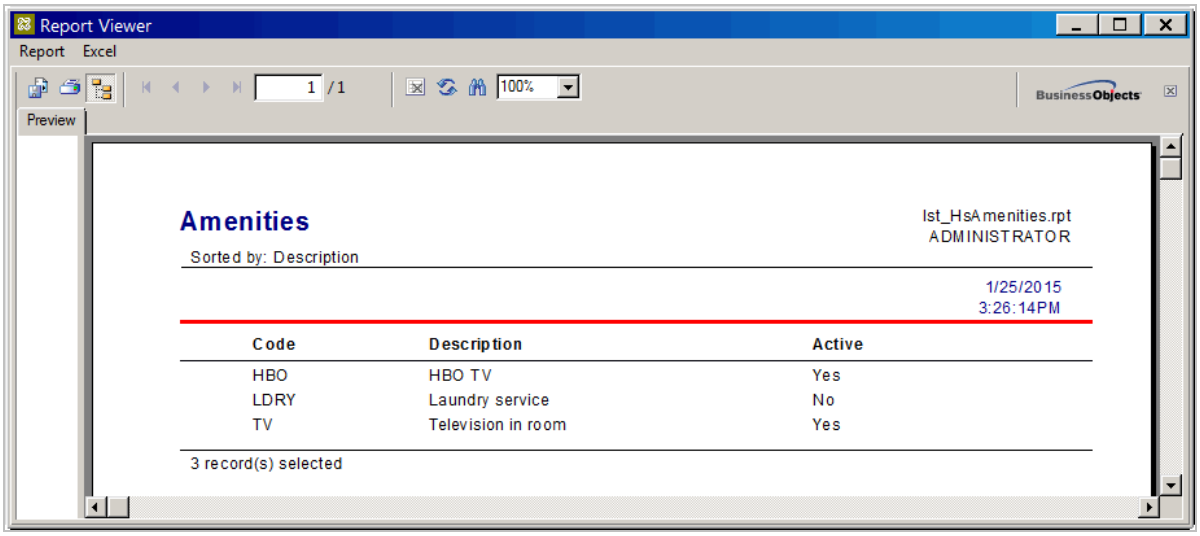
6. Specify a unique **Code**.
7. Enter a **Description**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To print a list of housing amenities:

1. Click **Print** on the Setup - Housing Lists [Housing Amenities] form. The Report Selection form is displayed.
2. Select appropriate options on the Selection tab.

   Select or clear **Yes** or **No** next to the Active label. If you select Yes, active records are listed on the report. If you select No, inactive records are listed. If you select both, active and inactive records are listed.

   If no records match the selection criteria, the message *"No records selected for the report"* is displayed.
3. Click **Preview**. The report is assembled and displayed in the Report Viewer. The report contains the Code, Description, and Active indicator.



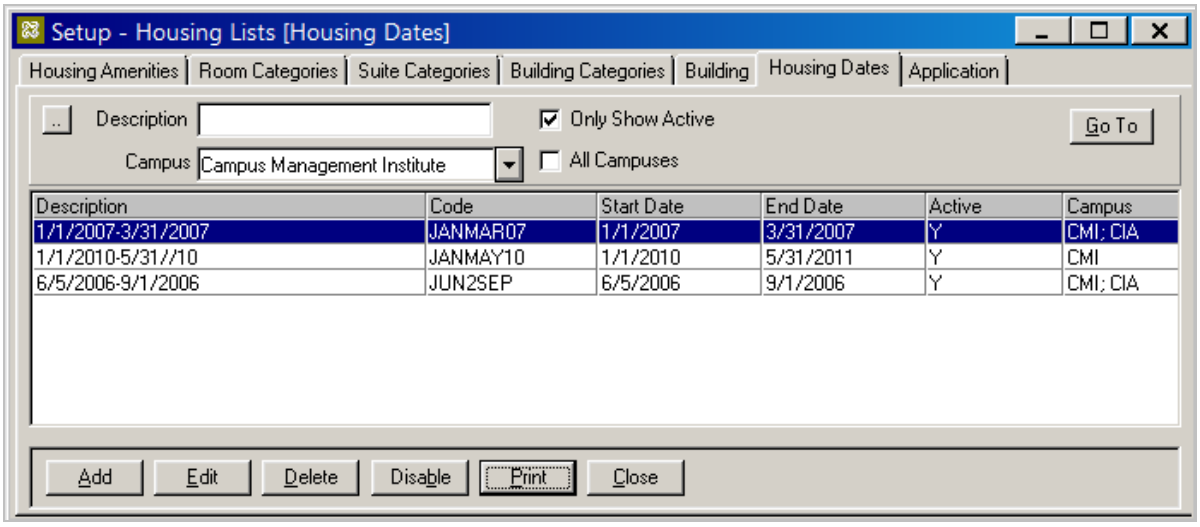
4. See Report Viewer for instructions on printing or exporting the report.

Setup - Housing Lists [Housing Dates]

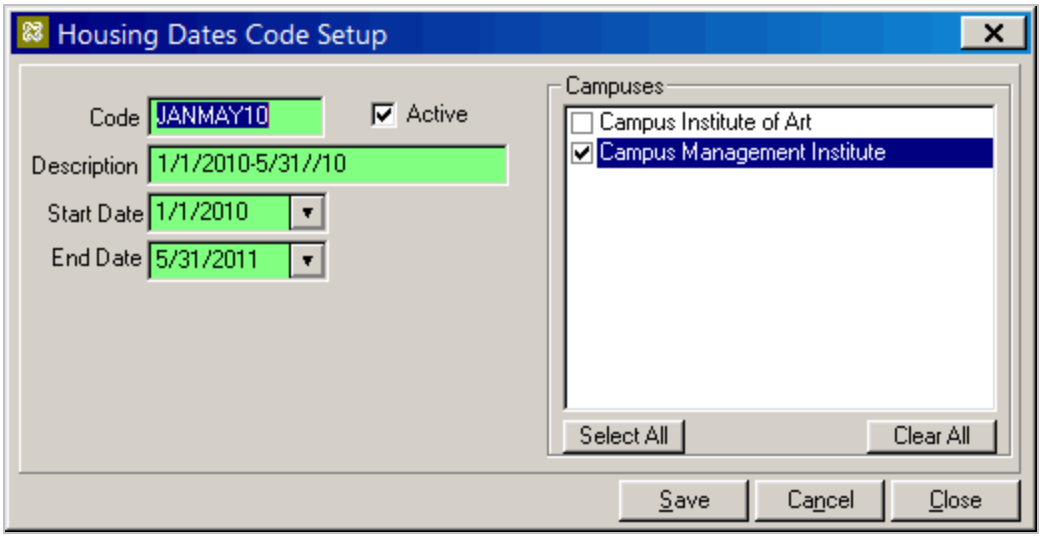
Use the Housing Dates tab of the Setup - Housing Lists form to view and define date ranges for housing. These date ranges are used in housing applications, roommate matching, and housing leases. The housing dates may be associated with a specific campus.

To add or edit a list of housing dates codes:

1. Navigate to **Lists** > **Housing**. The Setup - Housing Lists form is displayed.
2. Select the **Housing Dates** tab.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Housing Dates Code Setup form is displayed.



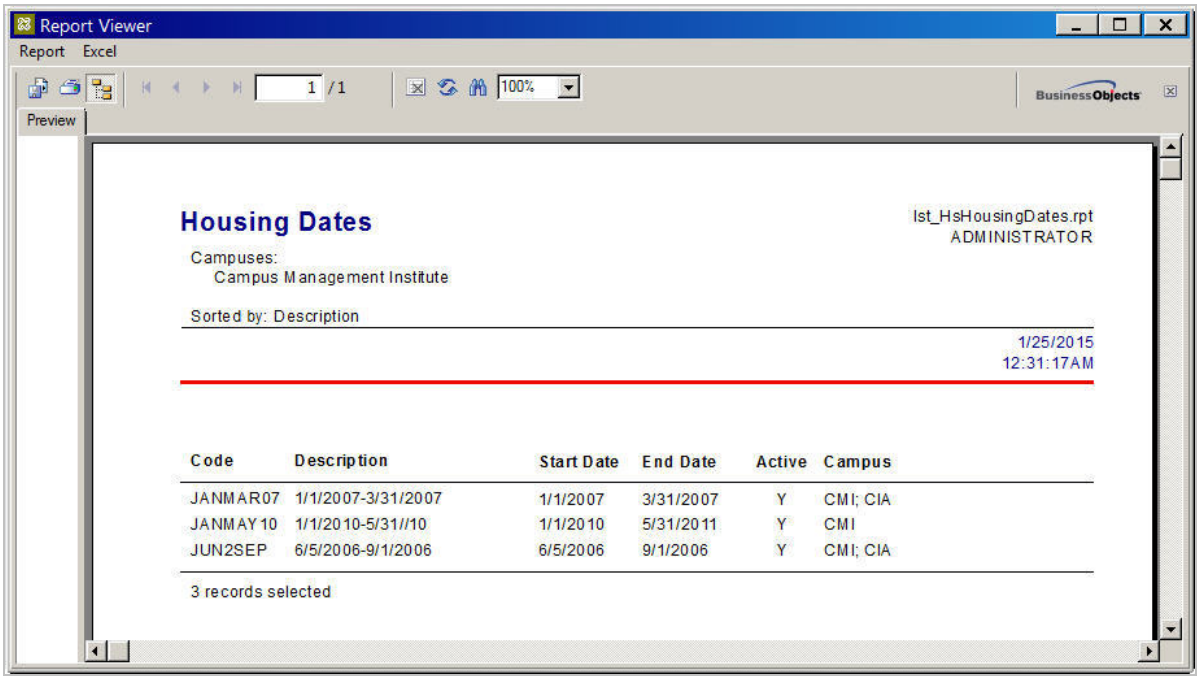
7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Select the **Campuses** that will be associated with the housing dates.
10. Select the **Start Date** and **End Date** for the date range.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To print a list of housing dates:

1. Click **Print** on the Setup - Housing [Housing Dates] tab. The Report Selection form is displayed.
2. Select appropriate options on the Selection tab.

   Select or clear **Yes** or **No** next to the Active label. If you select Yes, active records are listed on the report. If you select No, inactive records are listed. If you select both, active and inactive records are listed.

   If no records match the selection criteria, the message *"No records selected for the report"* is displayed.
3. Click **Preview**. The report is assembled and displayed in the Report Viewer. The report contains the Code and Description for each Housing Date configured.



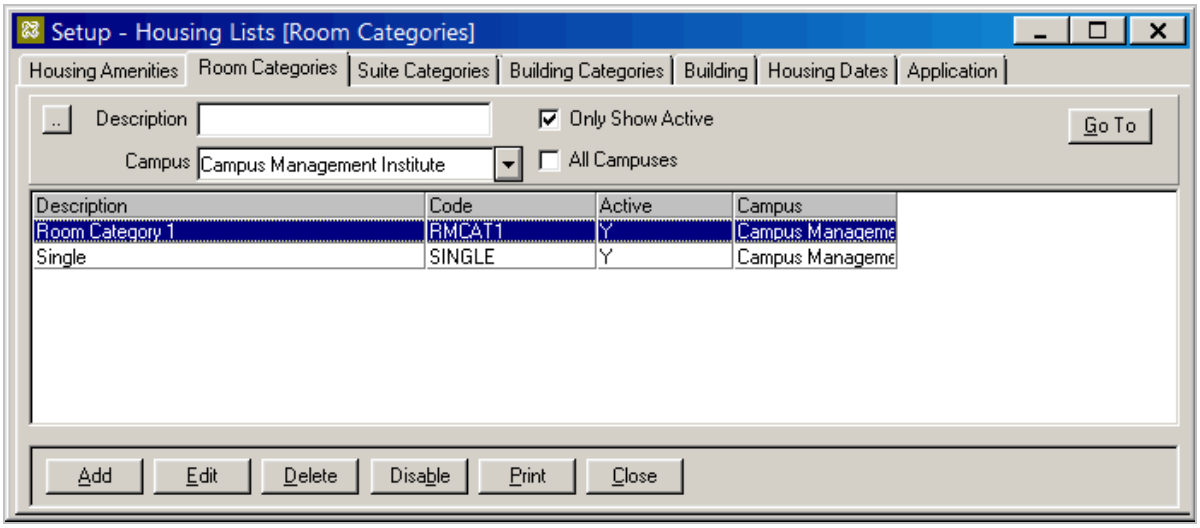
4. See Report Viewer for instructions on printing or exporting the report.

Setup - Housing Lists [Room Categories]

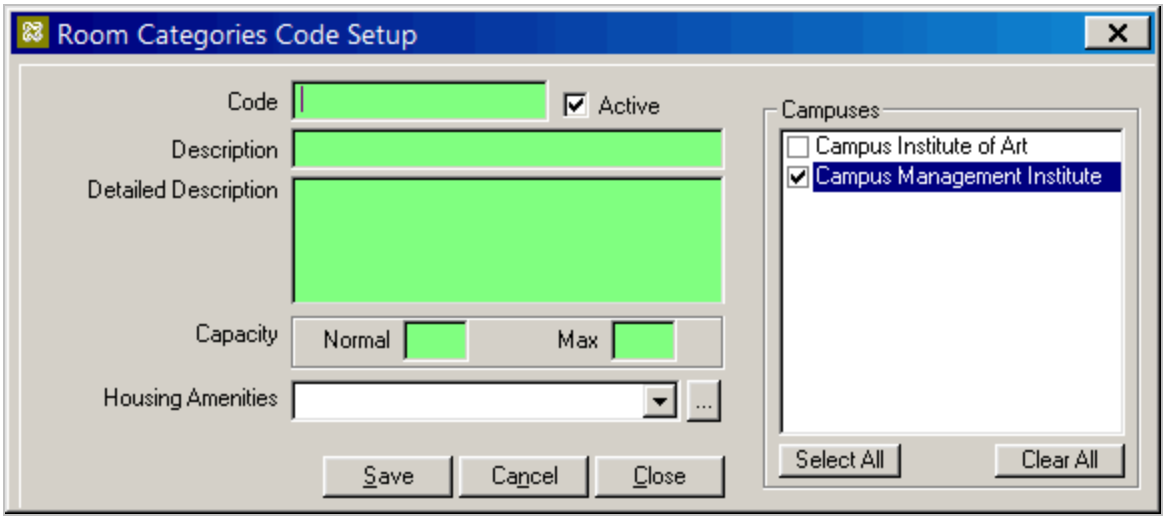
Use the Room Categories tab of the Setup - Housing Lists form to classify the rooms available for student accommodation into various categories.

To add or edit a list of room categories codes:

1. Navigate to **Lists** > **Housing**. The Setup - Housing Lists form is displayed.
2. Select the **Room Categories** tab.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Room Categories Code Setup form is displayed.



7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.
10. Specify a **Detailed Description**.
11. Select the **Campuses** associated with the Room Category.
12. Enter the **Normal** and **Max** occupant **Capacity** of the room category.
13. Select the **Housing Amenities** available in the room category from the drop-down list. Click ... to select multiple housing amenities.
14. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

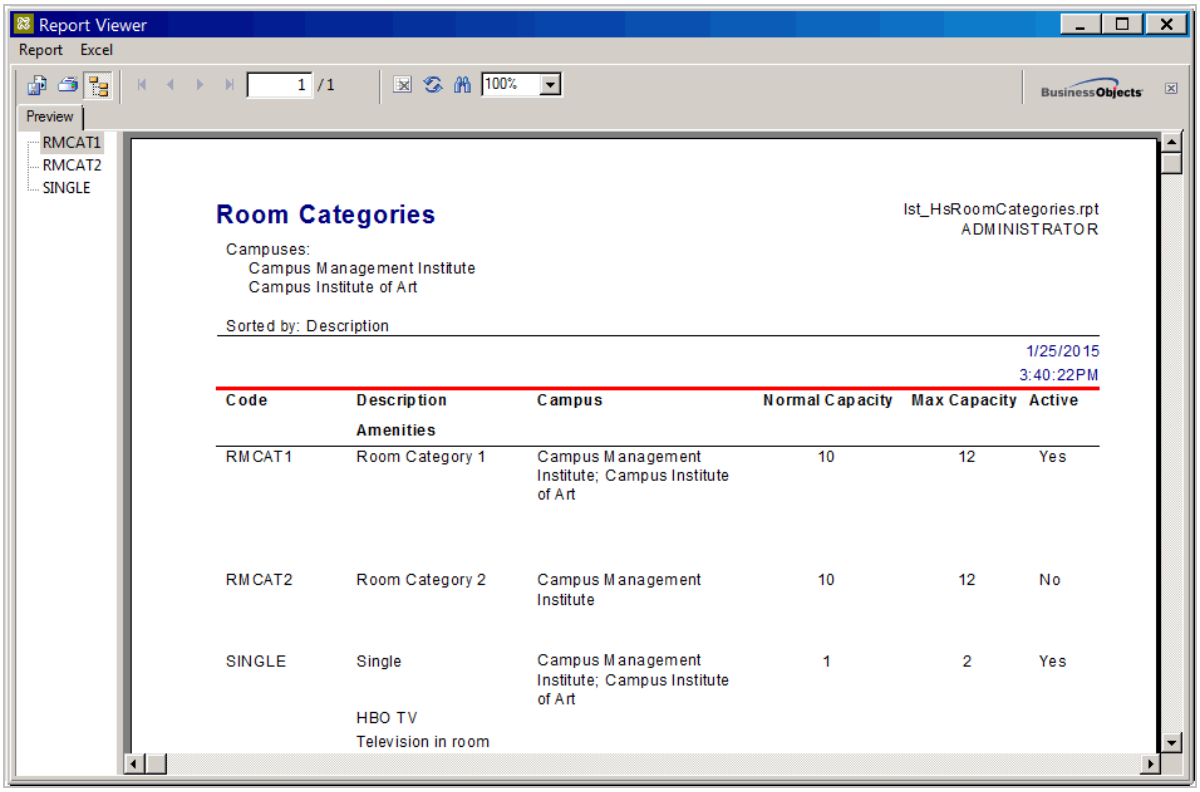
To print a list of room categories:

1. Click **Print** on the Setup - Housing Lists [Room Categories] tab. The Report Selection form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Select or clear **Yes** or **No** next to the Active label. If you select Yes, active records are listed on the report. If you select No, inactive records are listed. If you select both, active and inactive records are listed.

   If no records match the selection criteria, the message *"No records selected for the report"* is displayed.

   Sort the Room Categories report by Code or Description.
4. Click **Preview**. The report is assembled and displayed in the Report Viewer. The report contains the Code, Description, and Active indicator.



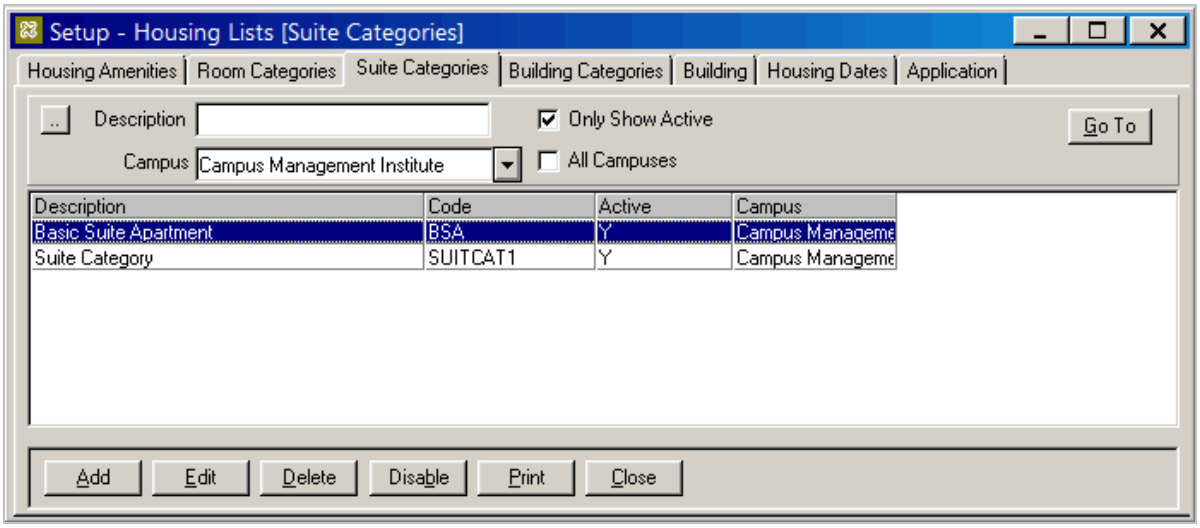
5. See Report Viewer for instructions on printing or exporting the report.

Setup - Housing Lists [Suite Categories]

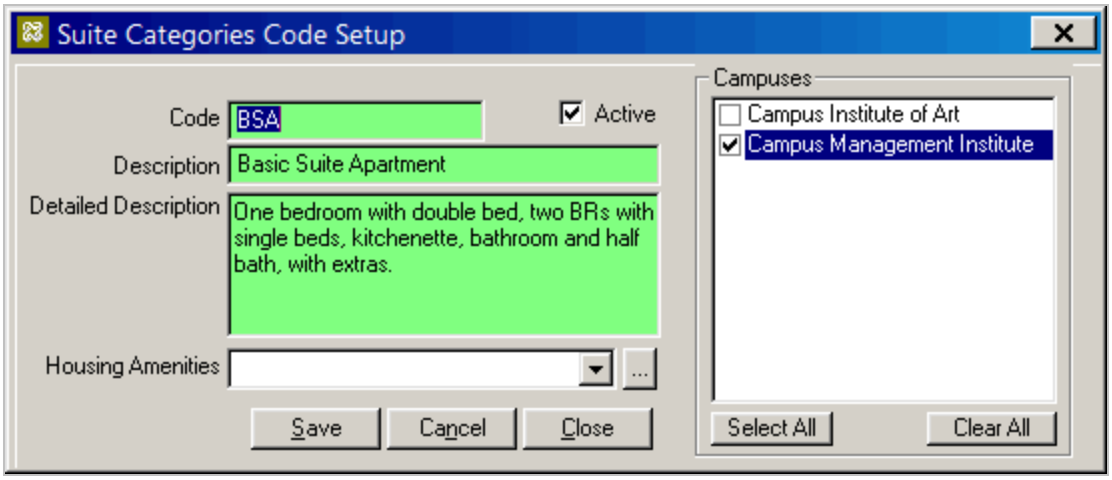
A suite is a collection of rooms. Use the Suite Categories tab of the Setup - Housing Lists form to classify the suites available for student accommodation into various categories.

To add or edit a list of suite categories codes:

1. Navigate to **Lists** > **Housing**. The Setup - Housing Lists form is displayed.
2. Select the **Suite Categories** tab.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
5. Select **Only Show Active** to view only active records. Clear this check box to view all records.
6. Click **Add**, or select a record and click **Edit**. The Suite Categories Code Setup form is displayed.



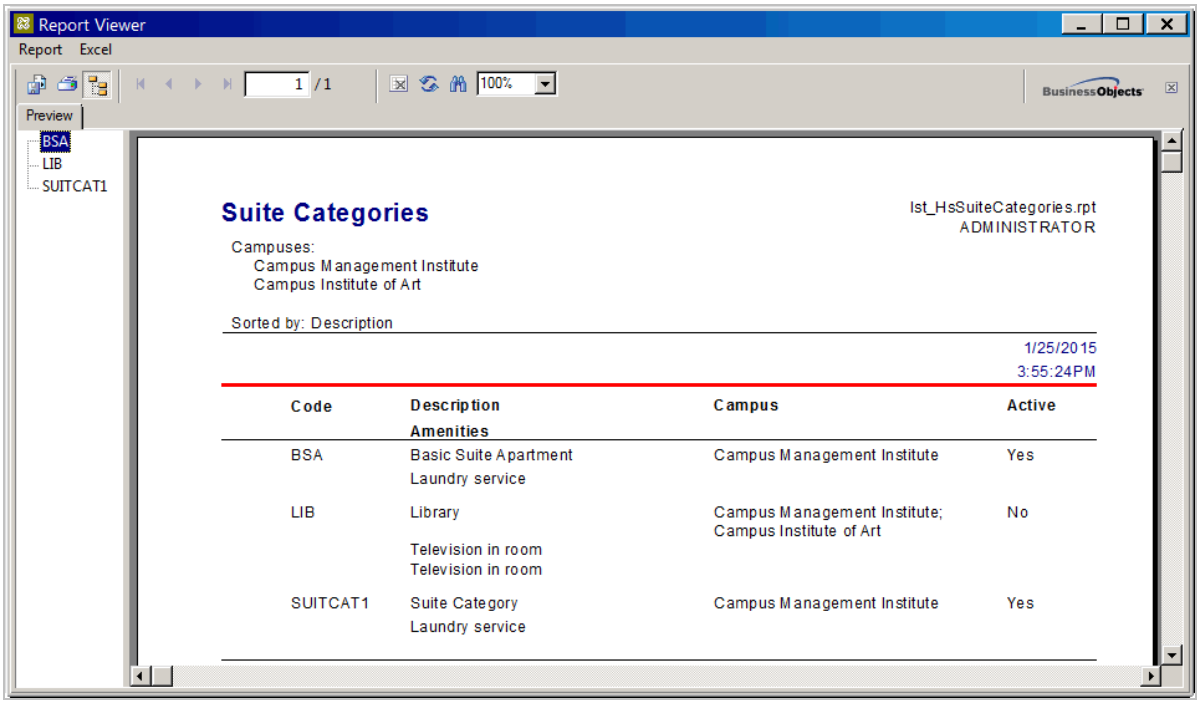
7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.
10. Specify a **Detailed Description**.
11. Select the **Campuses)** associated with the Suite Category.
12. Select the **Housing Amenities** available in the suite category. Click ... to select multiple housing amenities.
13. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To print a list of suite categories:

1. Click **Print** on the Setup - Housing Lists [Suite Categories] tab. The Report Selection form is displayed.
2. On the Campus Selection tab, select appropriate options and click **Continue**.
3. Select appropriate options on the Selection tab.

   Select or clear **Yes** or **No** next to the Active label. If you select Yes, active records are listed on the report. If you select No, inactive records are listed. If you select both, active and inactive records are listed.

   If no records match the selection criteria, the message *"No records selected for the report"* is displayed.
4. Click **Preview**. The report is assembled and displayed in the Report Viewer. The report contains the Code, Description, and Active indicator.



5. See Report Viewer for instructions on printing or exporting the report.

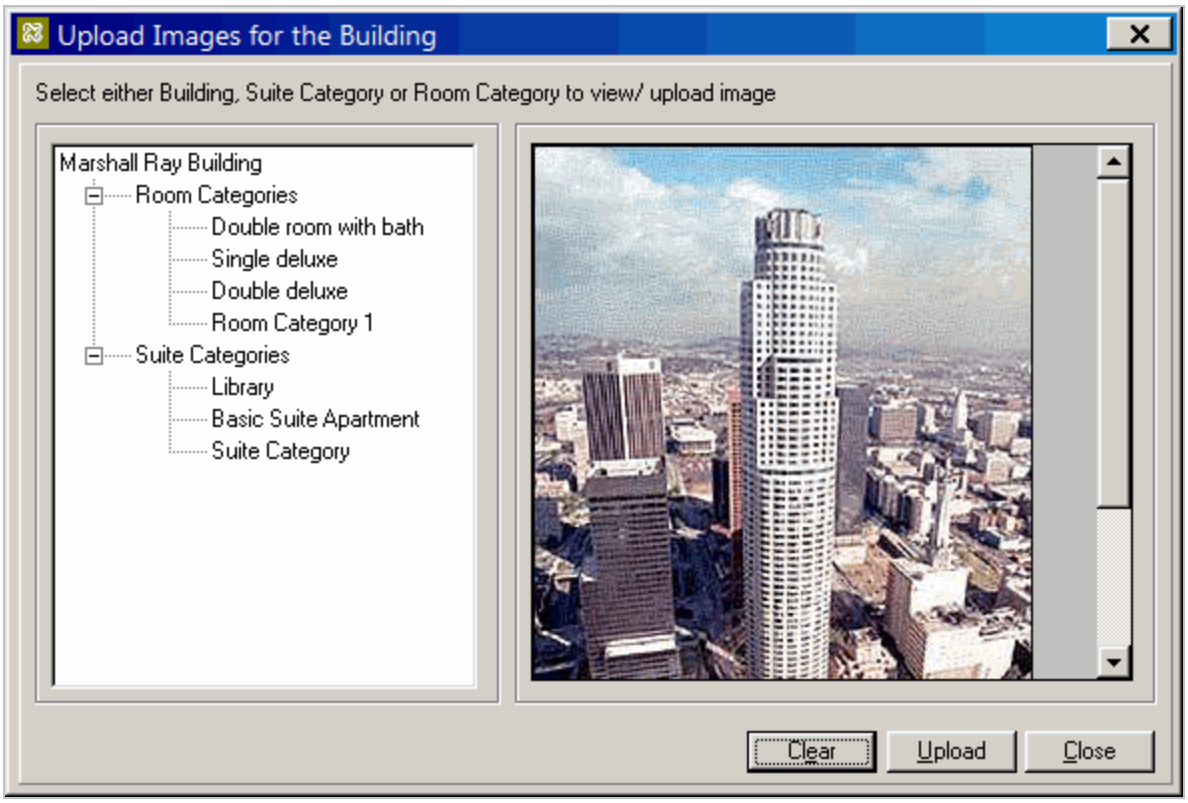
Uploading Building Images

You can import images of buildings, suite categories, and room categories into CampusNexus Student and display them when needed. The pictures are stored in a CampusNexus Student database.

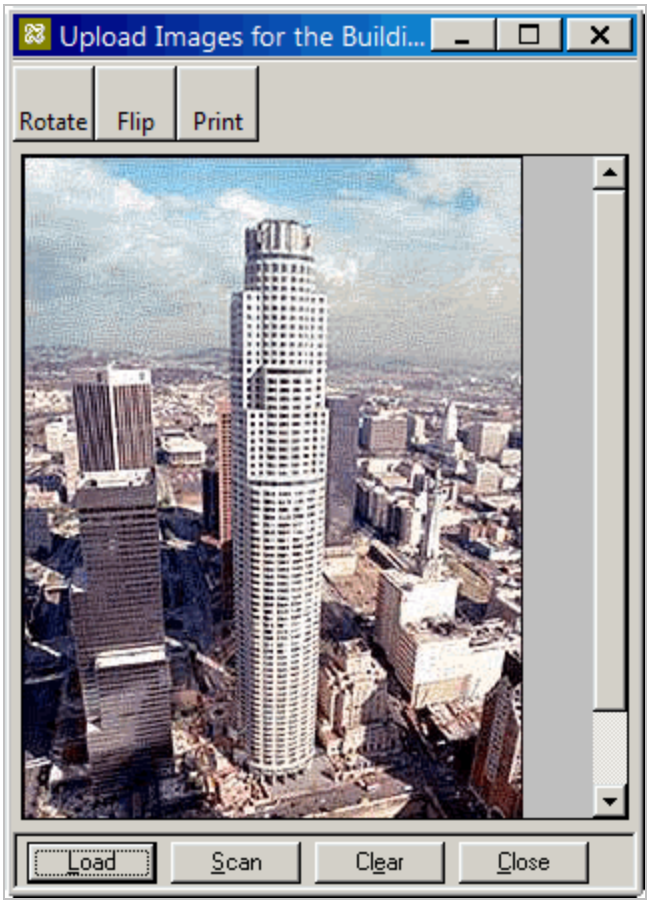
To upload images of the building, suite, and room categories:

1. Navigate to **Lists** > **Housing**. The Setup - Housing Lists form is displayed.
2. Select the **Building** tab.
3. Select a record and click **Edit**. The Building Code Setup form is displayed.
4. Click **Upload Image**. The Upload Images for the Building form is displayed.

   Note: The Upload Image button is enabled only after the details of the building are saved.



5. From the tree view, select the building name, room category, or suite category for which you want to upload an image, and click **Upload**.
6. Another Upload Images for the Building form is displayed. If a picture has already been imported, it is displayed on this form.



7. Click **Load** to import a picture from a file on disk. CampusNexus Student displays a directory search form. Use it to find the image you want to import.
8. Click **Scan** to open your scanner software and import an image directly from a scanner attached to your computer or on your network.

   When you click Scan, CampusNexus Student checks for "Twain" compliant applications. If there is more than one, choose one. When the image is scanned, select an option in the scanner application to export the scan to CampusNexus Student.

   Edit, crop, and size the picture before you load the image file into CampusNexus Student. Once it is imported, you cannot change anything except its orientation.
9. Click **Rotate** to rotate the image on the form 90 degrees.
10. Click **Flip** to "turn the picture upside-down". This is the same as rotating it 180 degrees.
11. Click **Print** to print the picture. The picture is enlarged to just fit on an 8.5" x 11" sheet of paper.
12. Click **Clear** to clear an existing picture from the form and from the database.
13. Click **Close** to close the form. Changes you have made are saved. The picture box in the previous Upload Images for the Building form shows the selected image.
14. Click **Close** to close the form.

Daily Menu

This menu leads to functions that are performed frequently during everyday operation of your institution. There is a submenu related to each department with options pointing to its own daily procedures. The Daily menu options include:

- Contact Manager
- Admissions
- Financial Aid
- Student Accounts
- Academic Records
- Distance Education
- Career Services
- Loan Management
- Student Services
- Housing

Daily > Contact Manager

The Daily > Contact submenu options include:

- Contact Manager
- Schedule Activities
- Schedule Documents
- Letters
- Process Transcript Requests
- Search Reference Address
- Transcript Request Letters
- SEVIS Transmission
- PDSO SEVIS Review
- Default Campus Assignment
- Advisor Assignment
- National Do Not Call Phone Lookup
- Agency/Third Party
- Incident
- Document Assignment
- Modify Batch Activities
- General Public
- Batch Update School Fields
- <Detach> (This options detaches the submenu.)

Contact Manager Form

Contact Manager is a tool for managing your appointments, events, and activities related to leads, prospects, students, and employers. In fact, just about any contact related to your work can be recorded and tracked by the Contact Manager. You can see your "Daily Schedule" at a glance. Activities could include entrance interviews, incoming and outgoing telephone calls, meetings, and other events that affect your work day.

Staff members with the appropriate permissions can add activities and messages to the Contact Manager files for other staff members. For instance, a person in the Admissions Department may be assigned to record new leads and assign them to Admissions Reps for follow-up.

Some "automatic activities" such as "call student", "set up an entrance test", "arrange entrance interview", may be assigned to you based on events that are monitored by the system. These "automatic" items that you might suddenly find on your list of things to do result from decisions that have been made by your institution's management. They may decide that when a student is placed on probation, the student's counselor gets an activity added to his or her calendar to call the student to set up an appointment for an in-person interview. This could result in a message for the rep to call "John Smith" at his home telephone to arrange for the appointment. The rep, in turn, would then indicate that the call had been placed, and that an appointment was set for next Monday.

Since much of the information displayed in the Contact Manager is related to students, provision is made in CampusNexus Student for you to see all the contact activity related to a given student. This is available from the Activities option on the View/Contact Manager menu, the "Student Bar" located to the left of the work area, and by clicking the Contact History button on the Toolbar. You must be logged in to CampusNexus Student as the person to whom an activity is assigned to edit or close it.

When students are imported into CampusNexus Student as a "New Lead" lead source from the Internet in **Daily > Admissions > Process Electronic Leads**, an activity is created in the **Daily > Contact Manager > Contact Manager > Activities** tab for any student that has been created or changed to "New Lead".

Lead Source and **State** are displayed on the grid when activities relate to students.

When you select a sort order by clicking a column header on the Activities grid, the list is first sorted by the column you click, and then by the student's name field. For instance, if you click the Due Date column, the list is sorted by student name within each due date. As you work with the Contact Manger form, click **Refresh** at any time to update the display with any changes you may have made.

You can sort the Contact Manager list of activities by **Activity Category** or **Status** in ascending or descending order for all activities.

Please read the Contact Manager Security Policy.

To manage activities in the Contact Manager:

1. Navigate to **Daily > Contact Manager > Contact Manager**. The Contact Manager form is displayed.

   Note: The current session default Campus and Staff Member are displayed.

2. Select the **Campus**. The list shows only those campuses which the logged in user is authorized to access. When the campus is selected, the Staff Member list shows only those staff members associated with the selected campus.

3. Select the **Staff Member**.

   Note: If <Unassigned Activities> is selected, activities are listed that are not assigned to a staff member and that adhere to the Contact Manager policy associated with the logged in user.

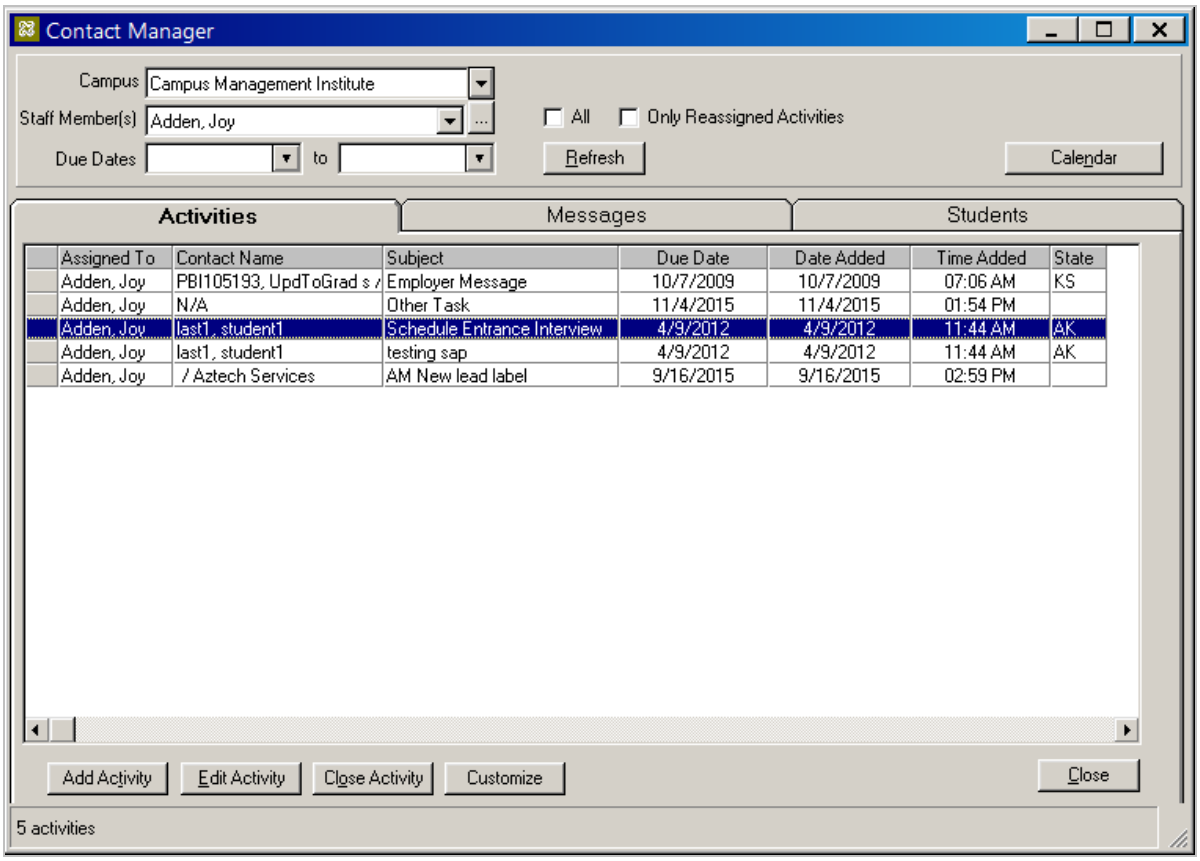
   An unassigned activity is listed only when the user has Read and Assign permissions for the activity type associated with the activity specified within the Contact Manager policy associated with the logged in user. Users with

these permissions can access the unassigned activities and reassign them to active staff members by selecting an activity and clicking **Edit Activity**. On the form that opens, the **Assign To** field will be blank and the user can assign this activity to a staff member and save it.

4. Confirm that the correct **Due Dates** are displayed, otherwise select due dates. If you changed the due dates, click **Refresh**. CampusNexus Student adjusts the list of activities to reflect the modified due dates.

5. The **Activities** tab displays a list of activities based on Staff Member and Due Dates. You can add, edit, or close an activity from this form by clicking one of the buttons at the bottom of the form.

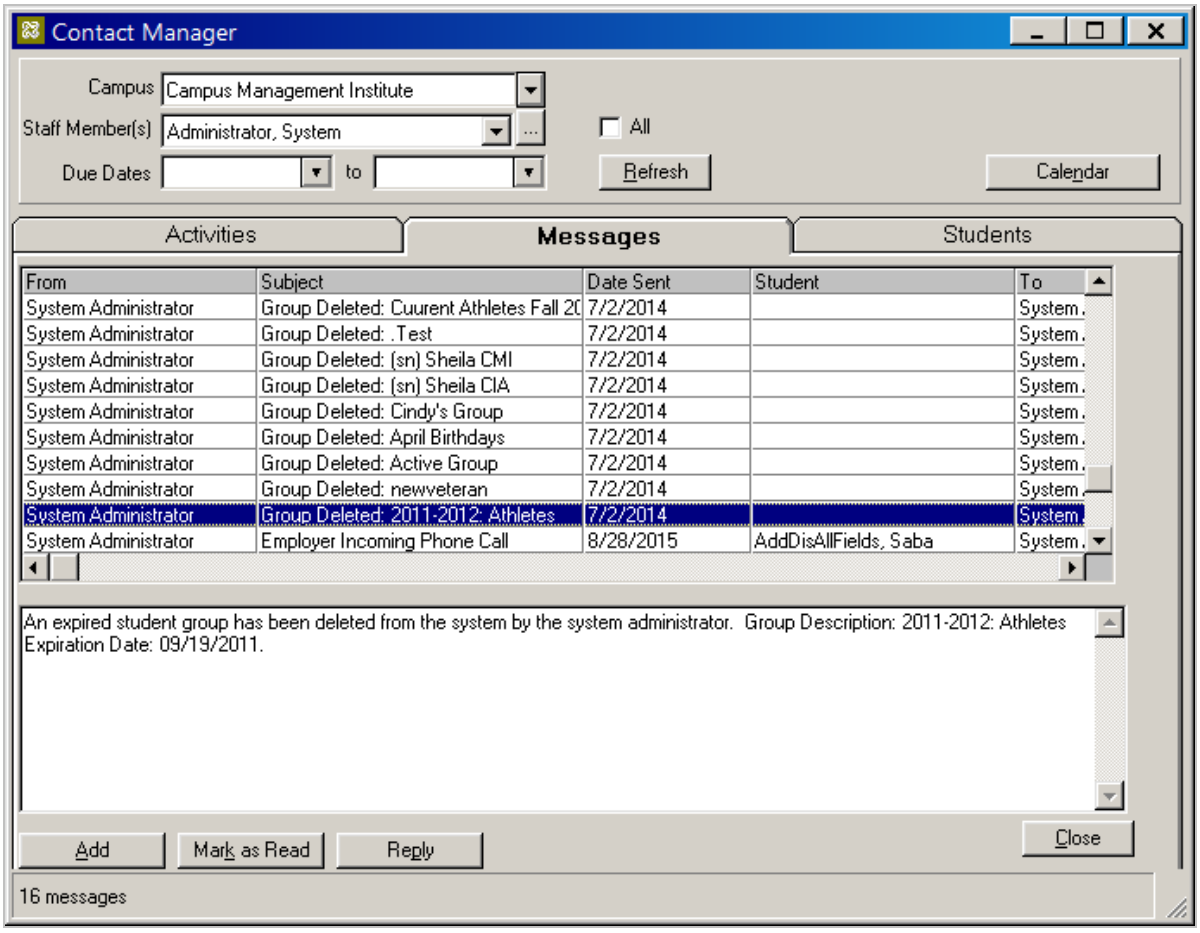
   The **Calendar** button displays all your activities with time of day. For an activity to appear on the daily schedule form, it must have a beginning and ending time.



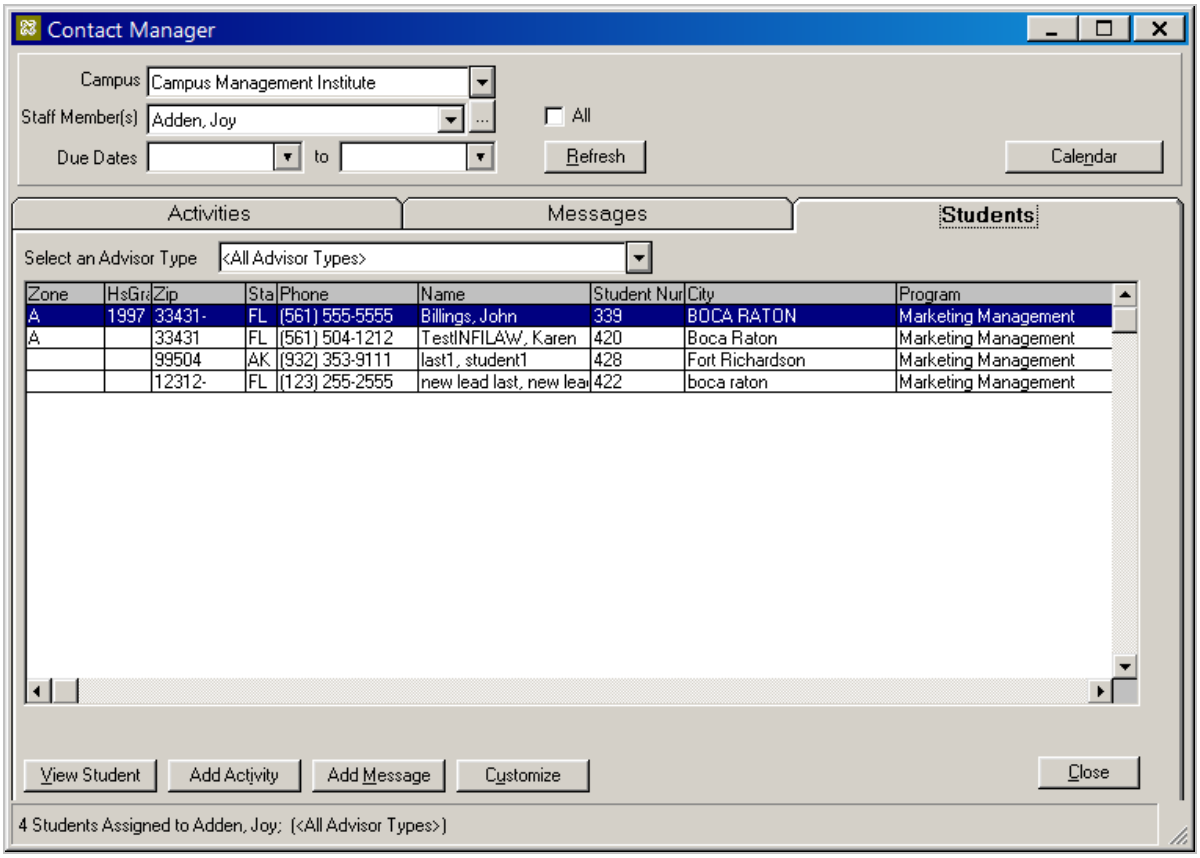
6. Click **Customize** to customize columns displayed on the Activities tab.

   Note: The "Time Zone" field can be selected only to hide/show on the Activities tab. The position of the column cannot be rearranged (i.e., the column remains between the "Time" and "Student Phone #" columns).

7. The **Messages** tab displays a list of messages and provides add, delete, or reply options. For more information, see Messages Tab.



8. The **Students** tab displays a list of students that are assigned to the Staff Member. For more information, see Students Tab.



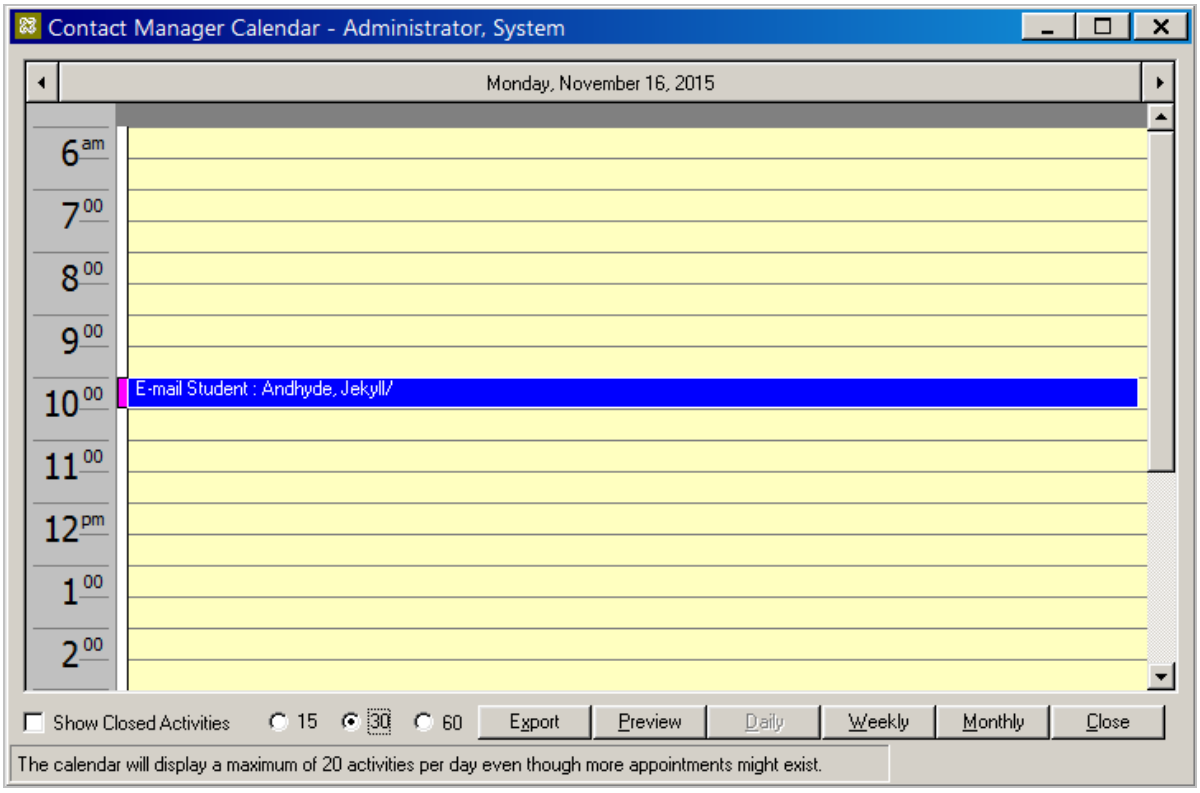
9. Click Calendar to access the Calendar form. For more information, see Activity Calendar.
10. Click **Close** to close the form.

Activity Calendar

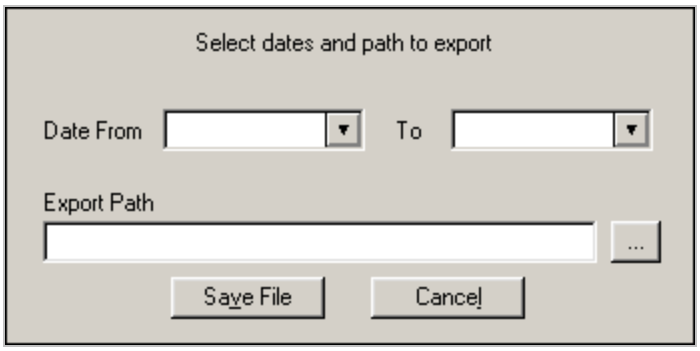
Activities that have been assigned to a user can be viewed in a daily (default), weekly, or monthly calendar. New activities can be added while viewing the calendar. The daily calendar can be printed. Activities can also be exported to iCalendar files, vCalendar files, or imported in to Microsoft Outlook® Calendar.

To use the activity calendar:

1. Navigate to **Daily** > **Contact Manager** > **Contact Manager**. The Contact Manager form is displayed.
2. Click **Calendar**. The Calendar form is displayed. Activities that have been assigned are shown in blue next to the time for which they are scheduled.



3. By default, the daily view of the calendar is displayed. Click **Weekly** or **Monthly** to change the view.
4. Click and to view a different day, week, or month.
5. Select **15**, **30**, or **60** at the bottom of the form to view the calendar with the time divided into 15 minute, 30 minute, or 60 minute increments,
6. Double-click a time slot in the calendar to **add an activity**. The Activity form is displayed. Enter the required information and click **Save**. The activity is saved and added to the calendar.
7. In the Daily calender view, click **Preview** and then click **Print** to print the calendar.
8. Click **Export** to export the calendar information for use with other programs. The Select dates and path to export form is displayed.



9. Specify the **Date From** and **To** dates to designate the date range to export.
10. In the **Export Path** field, select the location of the export file.
11. Click **Save File**. A confirmation message is displayed. Click **OK**.
12. Click **Close** to close the form.

Activity Form

The Activity form is used to add or edit activities related to a student. To close an activity, see Closing an Activity.

When an activity record is being edited by a staff member, it is locked and cannot be viewed by other staff members. If you attempt to edit an activity that is being edited by another user, the following message is displayed: *[Staff Member Name] is currently working on this activity. Please try later.*

If you are editing an activity for a long period of time, you may see the message *This activity is set to unlock automatically within [NNN] minutes. Click Continue if you wish to continue.* If you do not acknowledge the message, CampusNexus Student will eventually end your editing session, and you may lose any changes you have made to the activity.

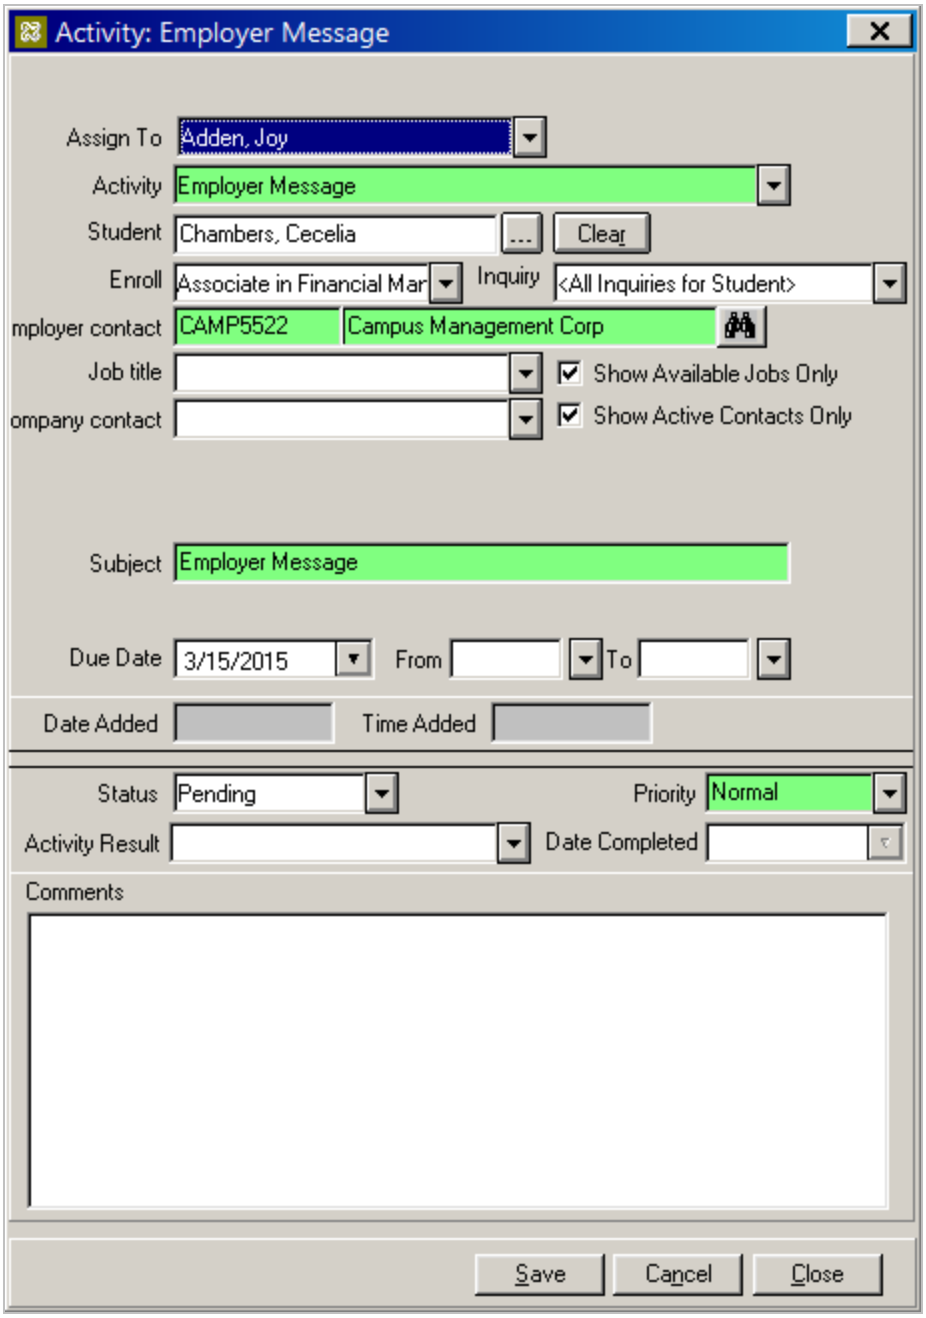
If you select an activity such as a letter with attachments that is a duplicate of an activity already on file with a status of pending, CampusNexus Student does not allow the duplicate activity to be added. (Some institutions refer to this as a duplicate fulfillment request.)

Please read the Contact Manager Security Policy before continuing.

To add or edit an activity:

1. Navigate to the Activity form using one of the following options:

   - **Student Master** > **Add Activity** (icon at the bottom right of the Student Master form). The Activity form is displayed.
   - **View** > **Contact Manager** > **Activities**. The Contact History form is displayed. Click **Add Activity** or **Edit Activity** to add or edit an activity for an individual student. The Activity form is displayed.
   - **Daily** > **Contact Manager** > **Contact Manager**. The Contact Manager form is displayed. Click **Add Activity** or **Edit Activity** to add or edit an activity on the Contact Manager List. The Activity form is displayed.



2. From the **Assign To** list, select the staff member to whom the activity is assigned. By default CampusNexus Student selects the person who is logged in. If you are authorized to assign activities to others, their names are listed.

   Permissions for activity assignments are set up by the system administrator under Setup > Staff > Activity Group Access.

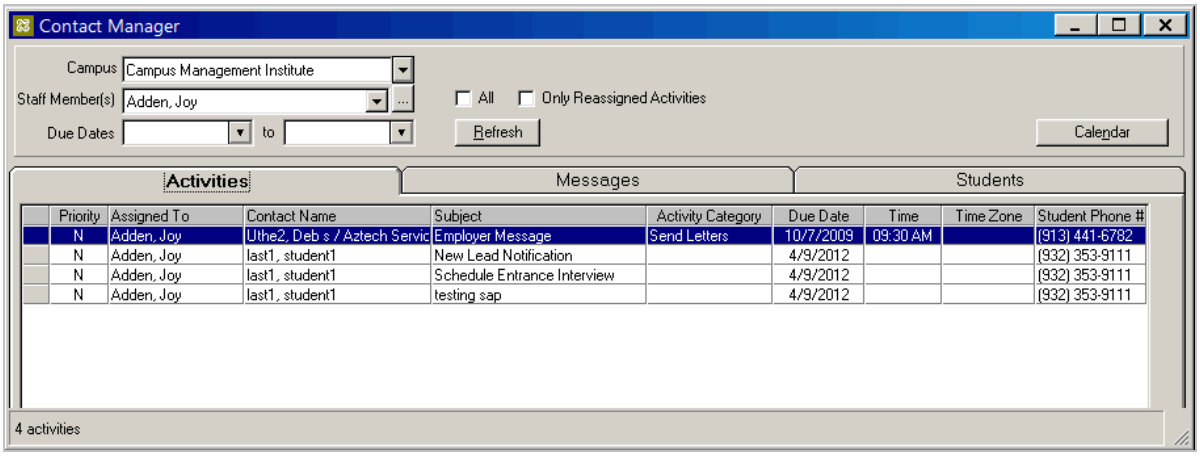
   ### Reassigning Activities

   When activities are reassigned from one staff member to another staff member, the message *Activities have been reassigned to you. Would you like to view them now?* is displayed when the staff member logs in to CampusNexus Student. This message is displayed only once. Likewise, when activities are reassigned to multiple staff members,

the message is displayed once to all members with the reassigned activities when they log on to CampusNexus Student. This is also true for multiple activities being reassigned to the same staff member, only one notification message is sent.

If activities are reassigned while the staff member is logged in, the staff member will see the activities without logging off. The notification message is not displayed the next time the staff member logs on to CampusNexus Student.

When the notification message is presented, the staff member can view the newly assigned activities. If the member decides not to view the reassigned activities and clicks **No**on the message, the Contact Manager form displays a list of all activities.



Note: By default, the **Only Reassigned Activities** check box on the Contact Manager form is cleared. When selected, the check box is displayed only when the staff member selects the Activities tab. Scroll to the right on the Activities tab to view the 'Reassigned Date'.

3. On the Activity form, select an appropriate **Activity**.
4. When the activity is selected, CampusNexus Studententers the Activity description in the **Subject** field. Change the text in the Subject field if necessary.
5. Select the **Student** to whom the activity is related. If necessary, click ... to the right of the student field and use the **Search** tool to find the student.

   Click **Clear** to change the student for this activity or to remove a previously selected student.
6. If the student enrolled in a program, select the student's enrollment from the **Enroll** list. The student's enrollments (Lists > Academic Records > Program Versions button) appear in the Enroll list. The Enroll field is not displayed for a student who has not yet enrolled.
7. If the Activity involves a student's previous inquiry about a program, select an item from the **Inquiry** list.
8. If the Activity was defined as requiring that an employer be contacted, enter an **Employer**. Search for the employer using the icon.
9. If the activity was defined as an employer-related activity, optional or required, select a **Job** and **Contact**. Select **Show Available Jobs only** to show only available jobs in the list. Likewise, select **Show Active Contacts only** to display only active contacts.
10. A **High School** field is displayed under certain conditions (see Note). When the field is visible, enter or edit the

High School.

Note: Activities involving an organization (High School) only display the High School information when accessed by navigating to:

- View > Admissions > Education > Activities (High School)
  - OR -
- Daily > Admissions > High School > Search > Edit > Activities > Add Activity.

The High School and Organization ContactID are not displayed when the activity is accessed any other way.

11. If the High School field is displayed, an **OrganizationContactID** field is also displayed (see Note). The list displays the contacts for the selected high school.
12. *(Optional)* Specify the **Due Date**, **From**, and **To** time. The 'From' and 'To' fields contain 15-minute increments between 7:00 AM and 10:45 PM. If an activity is assigned with the same date and time as a previously saved activity, a warning message is displayed when you click Save.
13. **Date Added** and **Time Added** are read-only fields.
14. *(Optional)* Select the activity **Status**.The options are:
    - Pending (default)
    - Cancelled
    - Closed
    - Follow Up
15. Select the activity **Priority**. The options are:
    - Normal (default)
    - Low
    - High
16. If the activity status you selected in the Activity Status list is considered a closed activity, select an activity result from the **Activity Result** list.
17. Enter any **Comments** about the activity.
18. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. The new activity appears on your main Contact Manager Activities list.

    Note: If an activity is scheduled at the same time as a previously entered activity, a message is displayed warning of the conflict and asking if you want to proceed.

    - When you select **Yes**, the activity is saved and both activities are scheduled at the same time.
    - When you select **No**, the Activity form is re-displayed with the information originally entered. Enter a new time to avoid a scheduling conflict.

Closing an Activity

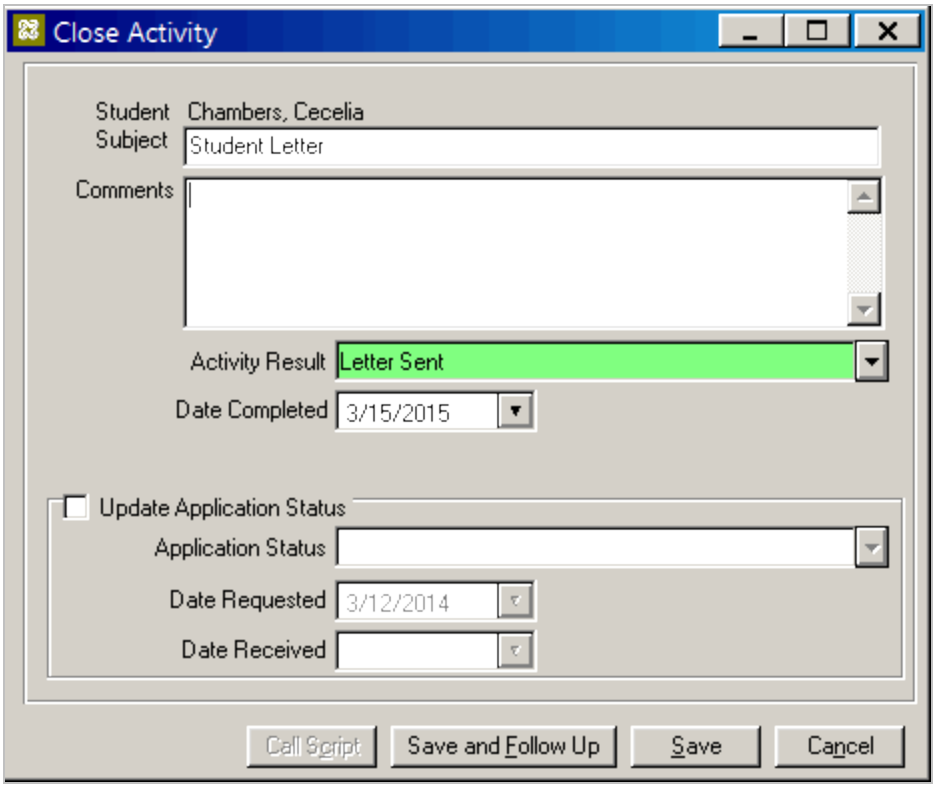
You can close a Contact Manager activity and, if necessary, assign a follow up activity using the Close Activity form.

Activities can be edited or closed only by the person to whom they are assigned. You must be logged in to CampusNexus Student as the person to whom an activity is assigned to edit or close it.

Please read the Contact Manager Security Policy before continuing.

To close an activity:

1. Navigate to **Daily > Contact Manager > Contact Manager**. The Contact Manager form is displayed.
   - OR -
   Navigate to **View > Contact Manager > Activities**. The Contact History form is displayed.
2. Select the activity to be closed.
3. Click **Close Activity**. The Close Activity form is displayed.



4. Select the **Activity Result** and edit the information related to the activity, such as comments, date completed, and so on.
5. If appropriate, click **Change Student Status** and select the correct status.

   Note: The Change Student Status check box on the Close Activity form is disabled if the student has been enrolled.
6. If appropriate, click **Update Application Status** and select the correct application status.
7. If necessary, enter the **Requested** and **Received Dates** for the application.
8. To add a follow up activity, click **Save and Follow Up** before you close the activity. Enter the information for the

follow up activity in the same manner that activities are added or edited.

9. **Save** your follow up activity before closing the current activity.
10. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Messages Tab

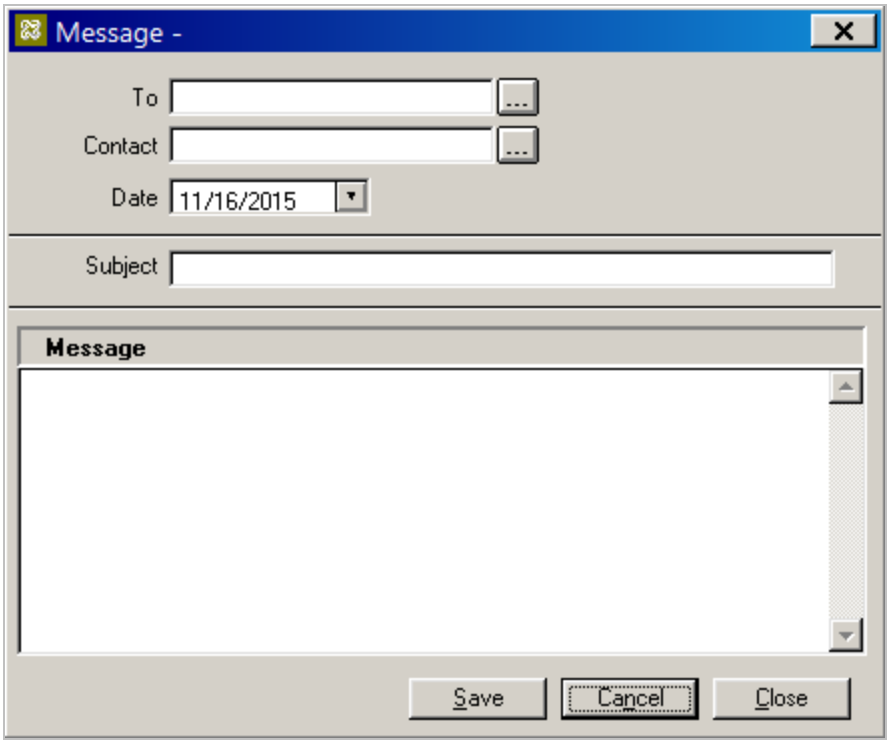
In Contact Manager, you can perform the following tasks related to messages:

- Add a message
- Reply to a message
- Mark a message as read (delete a message)

To add a message in Contact Manager:

You can send messages to yourself (as a reminder) or to other staff members.

1. Navigate to **Daily > Contact Manager > Contact Manager**. The Contact Manager form is displayed.
2. Click the **Messages tab**. The form displays a list of messages for the selected staff member. The top of the Contact Manager form indicates from whom the message is being sent. If the message is a reminder to yourself, your name is displayed in the staff member field
3. Click **Add**. The Message form is displayed.

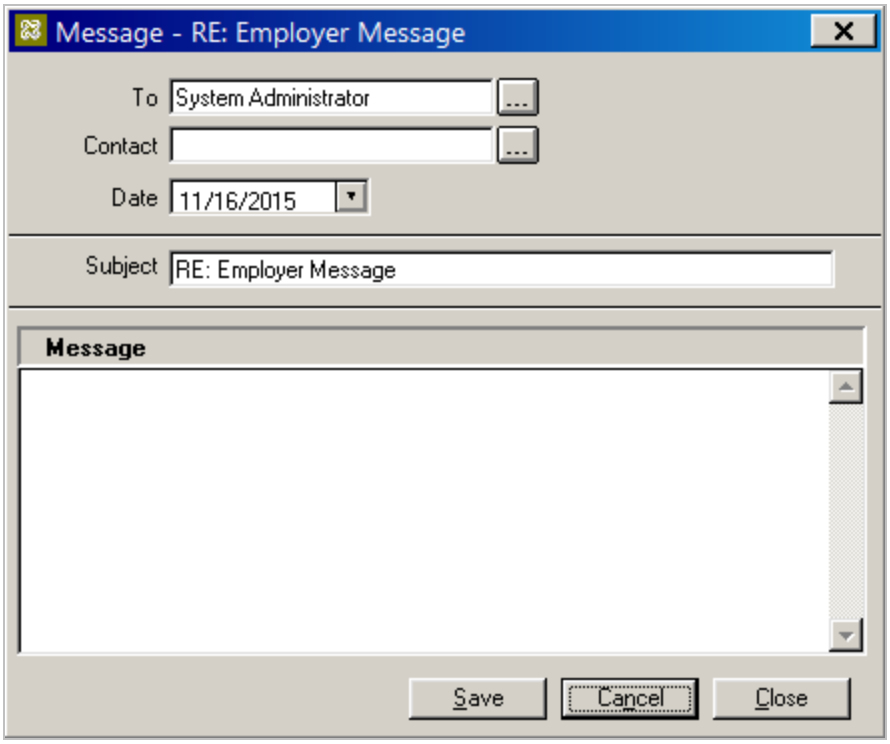


4. Click ... to the right of the **To** field to select the recipient of the message. You will see only staff members from the campuses to which you have access. If the message is a reminder to yourself, click your own name.
5. Click ... to the right of the **Contact** field to select the student to be contacted.
6. Enter the **Date** of the message.
7. Enter the **Subject** of the message.
8. Enter the **Text** of the message.

9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. CampusNexus Student adds the message to the recipient's message list.

To reply to a message in Contact Manager:

1. Navigate to **Daily > Contact Manager > Contact Manager**. The Contact Manager form is displayed.
2. Select the **Staff Member** for whom messages are to be listed. You can only reply to messages sent to you.
3. Click the **Messages tab**. A list of messages (if any) is displayed.
4. Select a message and click **Reply**. The Message form is displayed.



5. Click ... to the right of the **To** field to select the recipient of the reply. By default, the name of the message sender is indicated.
6. Click ... to the right of the **Contact** field to select the student to be contacted.
7. Enter the **Date** of the reply. By default, the current date is displayed.
8. Enter the **Subject** of the reply. By default, the subject line of the original subject is displayed.
9. Enter the **Text** of the reply in the Message field.

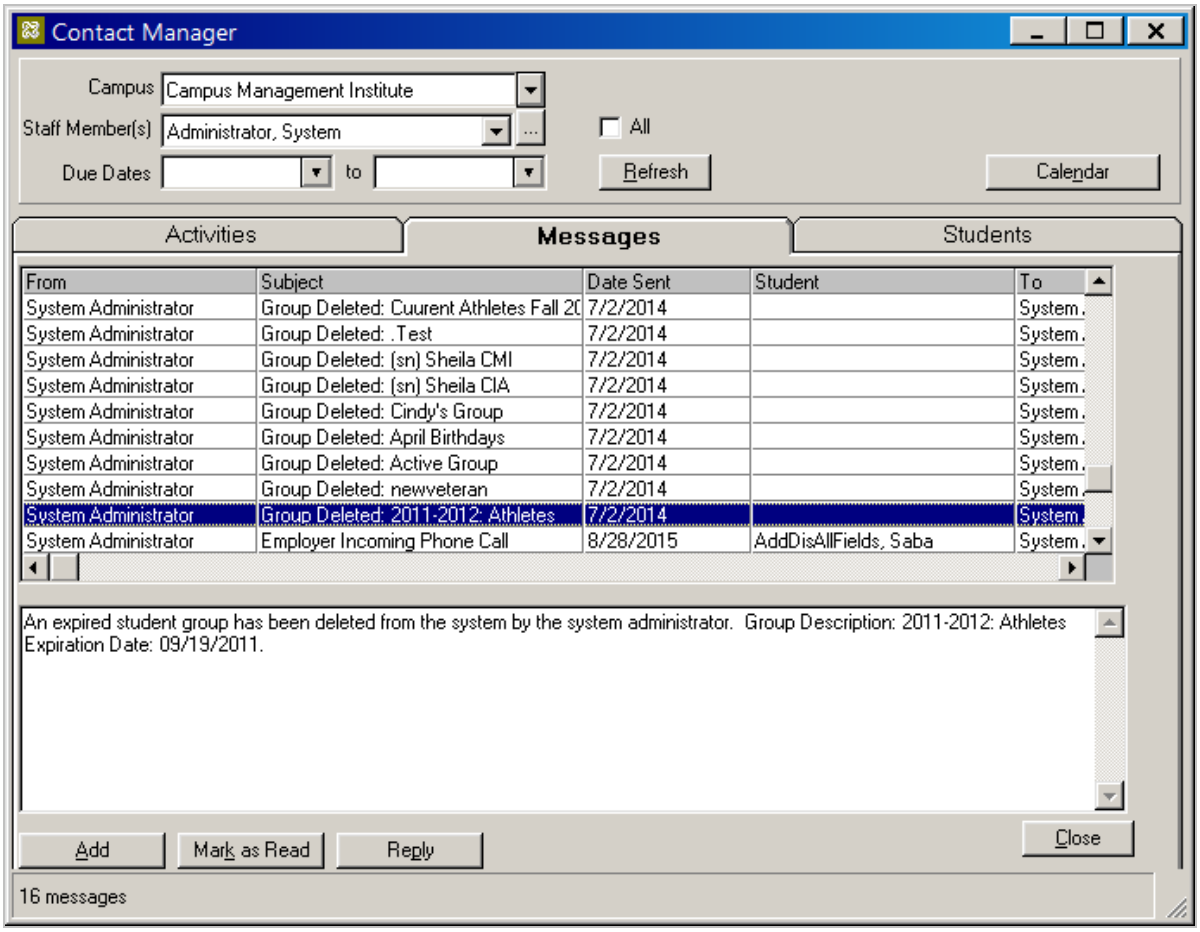
To mark a message as read in Contact Manager (Delete a Message):

When you have read your message, you can mark it as having been read. This results in the message being removed (deleted) from the list. It cannot be recalled after it has been marked as read. While you can view the messages of other staff members, you can only mark your own messages as read.

1. Navigate **Daily > Contact Manager > Contact Manager**. The Contact Manager form is displayed.
2. Select the **Staff Member** whose messages you want to see. If the message is a reminder to yourself, your name

appears in the Staff Member field.

3. Click the **Messages tab**. A list of messages for the selected Staff Member is displayed.



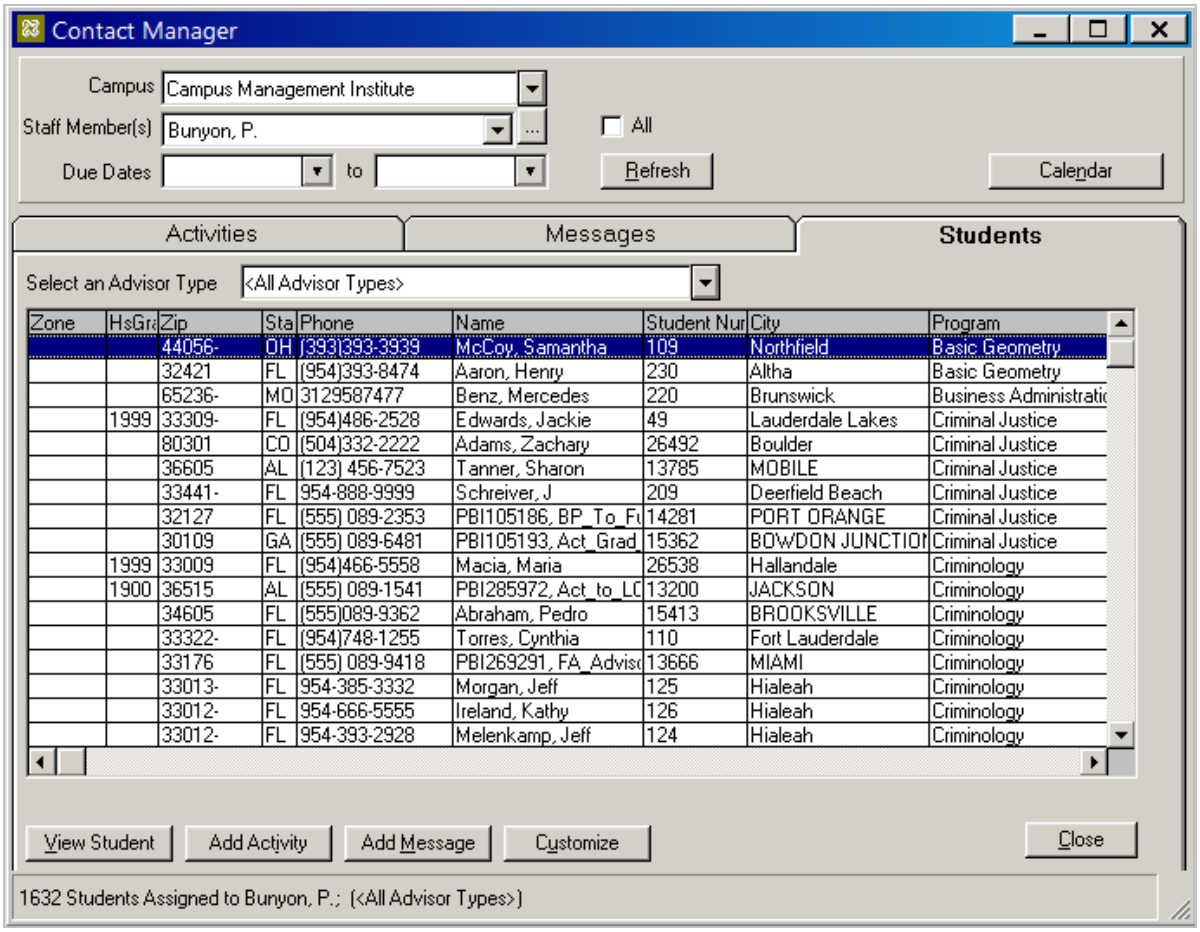
4. To filter the message list, specify a date range in the **Due Dates** fields.
5. If you change the filter criteria, click **Refresh**.
6. On the list of messages, click the message to be marked as read (deleted).
7. Click **Mark as Read**. The message is removed from the list of messages.

Students Tab

The Students tab on the Contact Manager form displays a list of students assigned to you. These are students for whom you are the Admissions Rep, Academic Advisor, and so forth. From this form, you can view a selected student's personal data form, add an activity related to a selected student, create a message related to a selected student, and customize the way the student list is displayed. You can also filter the list to see only students with specific characteristics.

You can adjust the width of a column on your student list by positioning your pointer on the vertical line that separates the column headers.

1. Navigate to **Daily > Contact Manager > Contact Manager**. The Contact Manager form is displayed.
2. Select the **Students** tab.
3. To filter the list of students, select an **Advisor Type**.



To view a student:

1. Select a student.
2. Click **View Student**. The Student Master form is displayed.
3. View or edit the student data as you require.

To add an activity

1. Select a student.
2. Click **Add Activity**. The Activity form is displayed
3. Enter the activity data. See Activity Form for more details.
4. Click **Save** to record the activity.

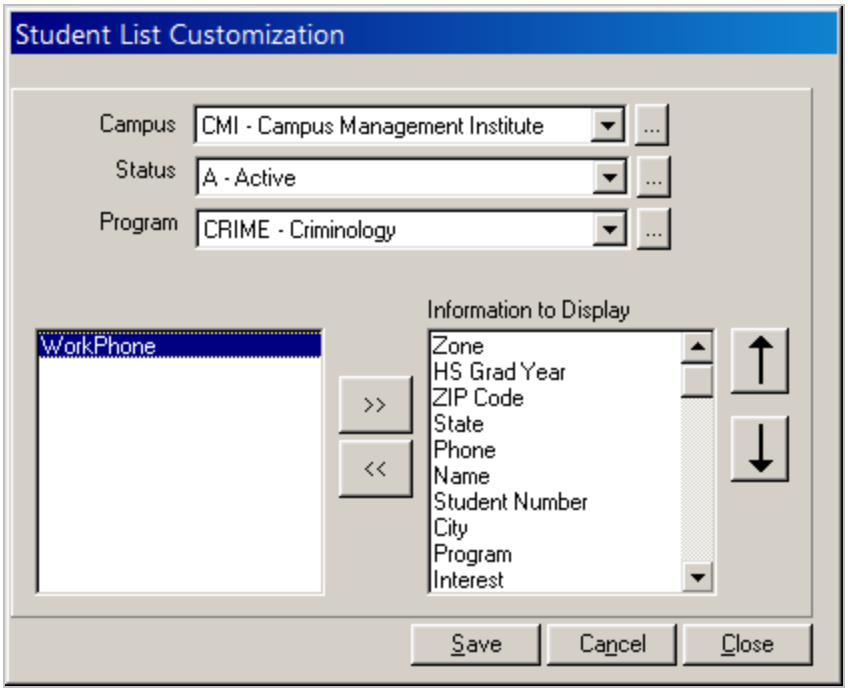
To add a message:

1. Select a student.
2. Click **Add Message**. The message form is displayed.
3. Enter the message data. See Add a Message in Contact Manager for more details.
4. Click **Save** to record the message.

To customize your student list:

1. Click **Customize**. The Student List Customization form is displayed.
2. Select the **Campus**, **Status**, and **Program**.

   When you select one or more **Status** values from the drop-down list, only the selected statuses appear in the Students tab's listings of the Contact Manager form.



3. To add an item of student data to your student list, select the item in the left-hand window and click to add the item to the **Information to Display** list.
4. To remove an item of student data from the **Information to Display** list, select the item in the right-hand window

and click .

5. To arrange the Information to Display items in a different order, select an item and click the up or down arrow button.
6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.
7. Click **Refresh** on the main **Contact Manager** form to refresh the list of students. A message reminds you that filters have been set.

Activity Scheduler Overview

Administrators can automatically assign activities to staff members. Activities can include emails, follow up telephone calls, letters to enrolled and prospective students, and more.

For instance, administrators can automatically schedule a phone call or email to occur when a student's Leave of Absence is about to expire, eliminating the need to do a manual search in CampusNexus Student to find students with expired LOA dates.

Administrators can choose a description of these activities, specify what change in status should trigger the activity, which students or lead types should be targeted, and select a date for these activities to be assigned.

To add an automatically assigned activity:

1. Navigate to **Daily > Contact Manager > Schedule Activities**. The Activity Scheduler form is displayed.

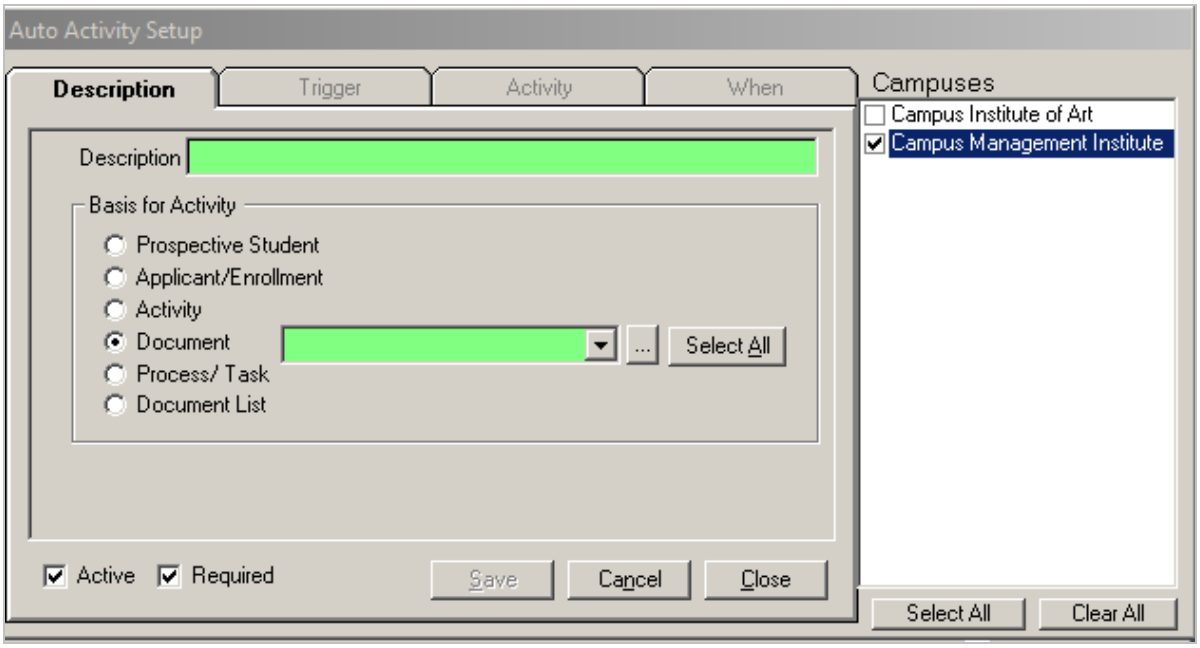
   You can add, edit, or delete an activity that will be automatically assigned to staff members based on events associated with Prospective Students, Applicant/Enrollment, Activity, Document, or Process/Task.

2. Select the **Campus** to which the activity applies and click **Add**, **Edit**, or **Delete** as appropriate.
3. Select the **Show Inactive** check box to display inactive activities.
4. Select one of the following **Basis for Activity** options:

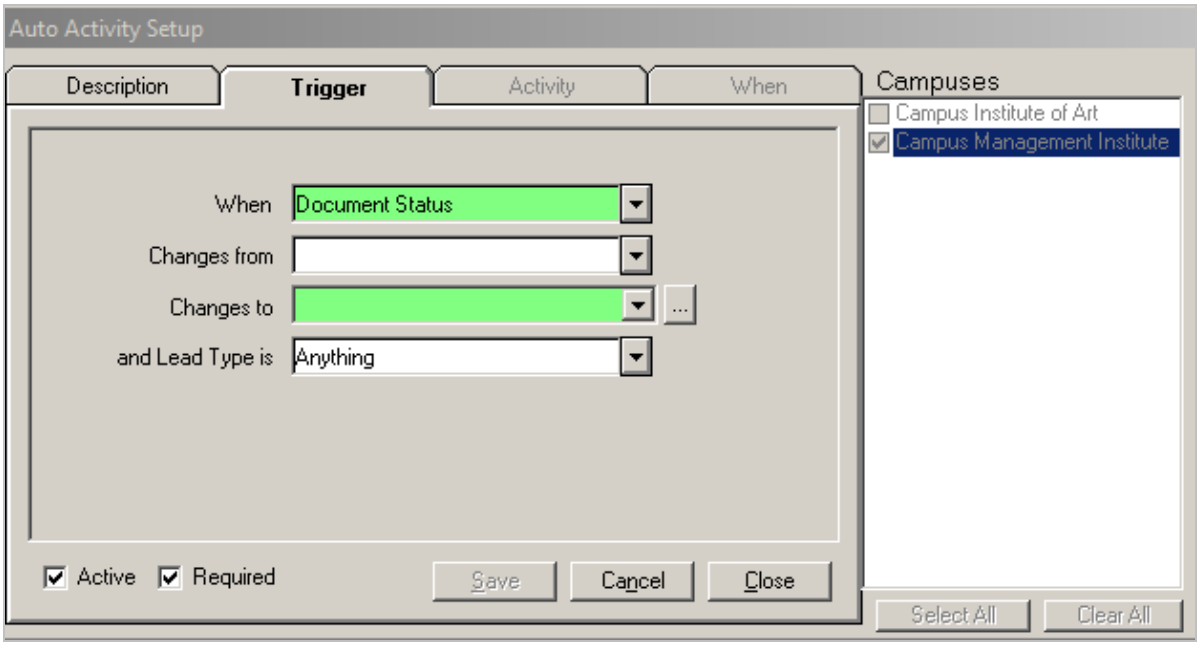
- **Prospective Student** - enable this option to display the automatic activities that are based on student status changes.
- **Applicant/Enrollment** - enable this option to display the automatic activities that are based on enrollment status changes.
- **Activity**- enable this option to display activities that are based on the status or results of other activities.
- **Document** - enable this option to display the automatic activities that are based on document changes.
- **Process/Task** - enable this option to display activities that occur as part of a process or a task.
- **Document List** - enable this option to schedule an activity based on the Document List (a group of documents). The activity will be triggered when all the documents have the same status and not for all the documents.

Activity Scheduling on the Basis of Document List

1. On the Activity Scheduler form, select **Document List** and click **Add**. The Auto Activity Setup form is displayed.



2. Select the **Document** option. A list is displayed next to the Document option. The list has the value of Document List based on the logged in user.
3. In the Document field, click and select a document.
   - OR -
   Click and select multiple documents.
   - OR -
   Click **Select All**to select all the documents on the list. The caption of the Select All button changes to **Clear All**.
4. In the **Description** field, enter a description for the auto activity.
5. Click on the **Trigger** tab.



6. Select appropriate values from the drop-down lists.

   The 'Changes From' drop-down list is used in conjunction with the 'Changed To' drop- down list.

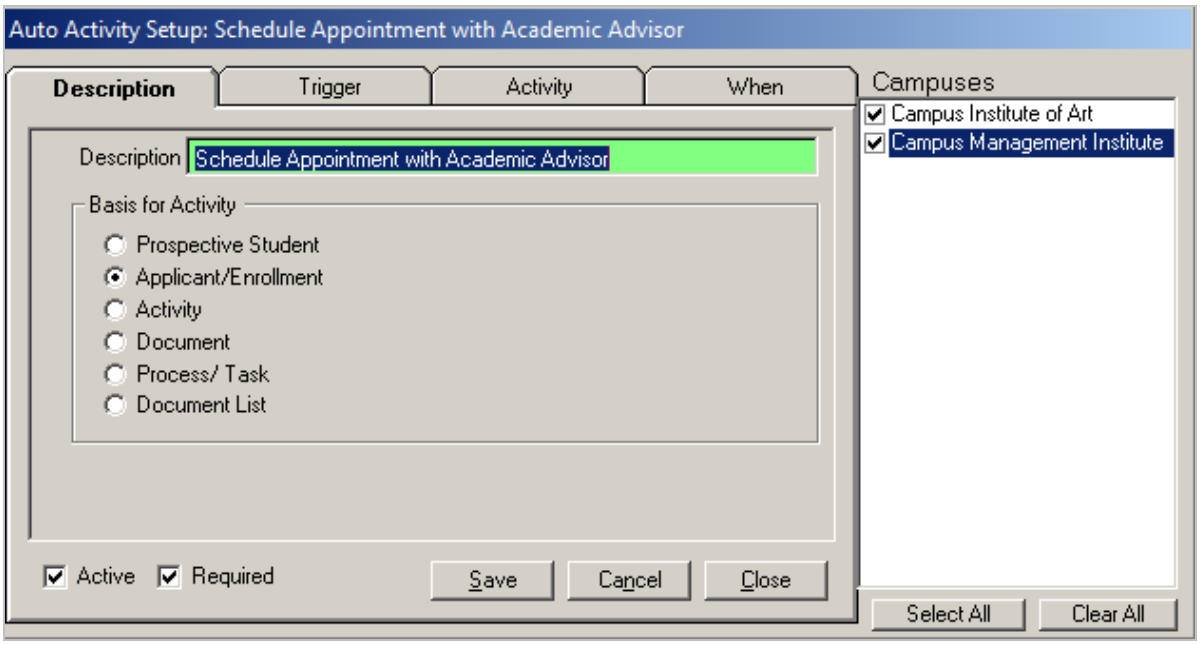
   Conditions when 'Changes From' is Enabled/Disabled

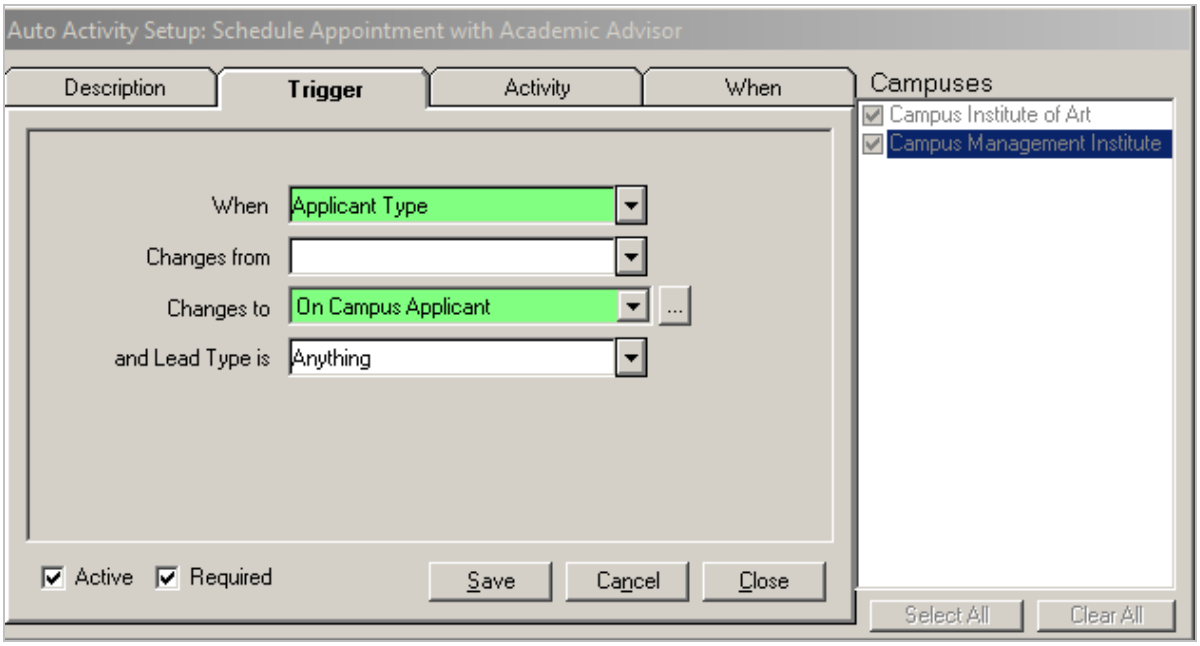
Activities For	When	Changes From - Enabled
Prospective Student	Status Lead Type SEVIS Transmission Status VISA Type	Yes Yes No No
Applicant Enrollment	Status Enroll Grade Level - (Auto Change) FA A/Y Grade Level - (Auto Change) Enrollment Status Change Enrollment status changes to Leave of Absence Account Status Added Ledger Transaction Added Payment Posted Collection Status Added	Yes Yes Yes Yes No - Because system allows multiples Yes No No No
Activity	Status Result	Yes Yes
Document	Document Status	Yes
Process /Task	Process / Task occurs	No

7. Click **Close** to close the form.

Activity Scheduling on the Basis of Applicant Type

1. When you select the **Applicant/Enrollment** option on the Description tab and then click on the Trigger tab, Applicant Type is displayed in the 'When' drop-down. If you select this value in the drop-down, the 'Changes From' and 'Changes To' fields have the corresponding value.
2. When you create a schedule activity for Applicant Type and the Applicant Type of the applicant is changed, that activity is triggered.



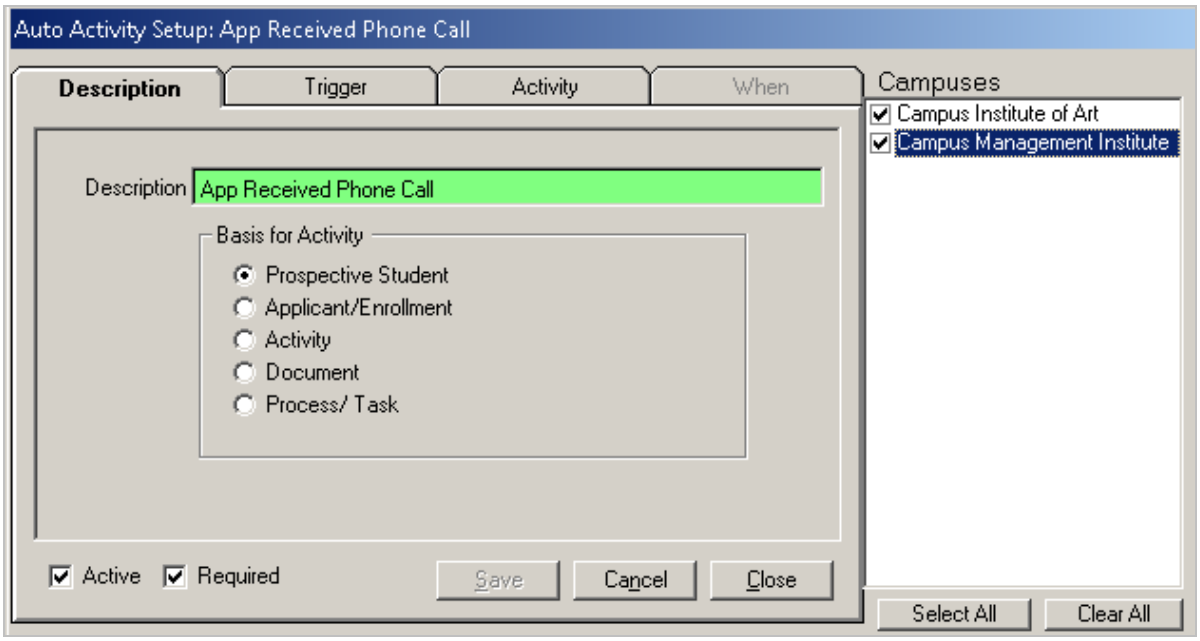


Adding an Auto Activity

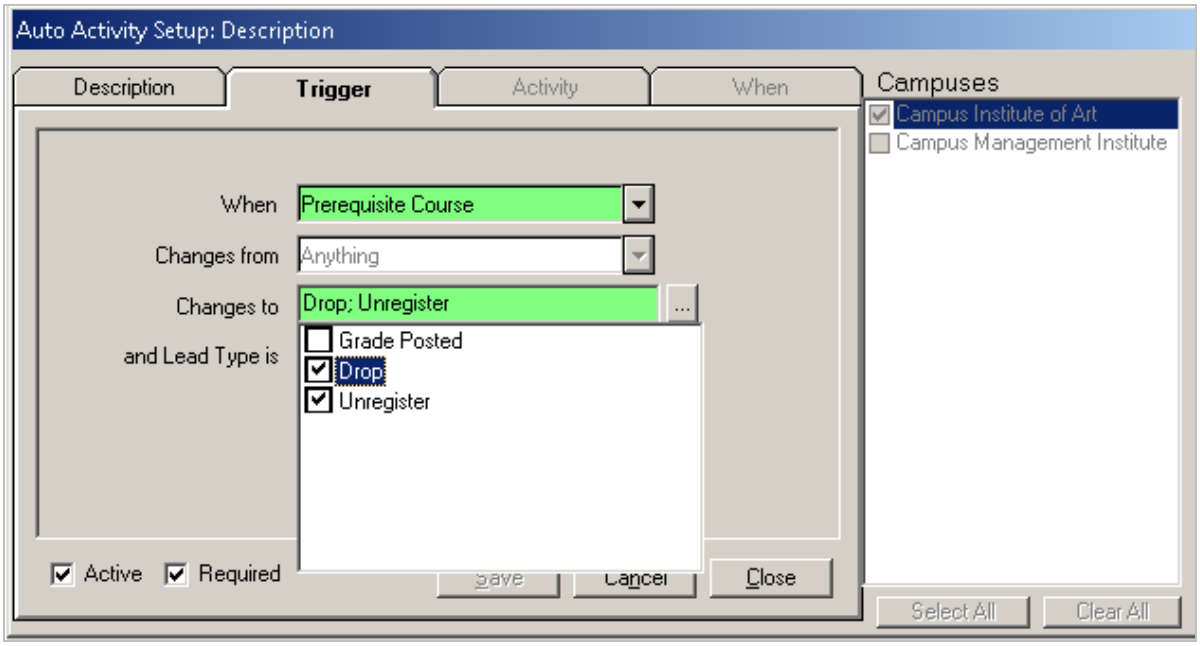
To add a new automatically assigned activity to the Contact Manager module:

1. Navigate to **Daily > Contact Manager > Schedule Activities**. The Activity Scheduler form is displayed.
2. Click **Add** to begin a new automatic activity. The Auto Activity Setup form is displayed.

   When you add a new automatic activity, only the Description tab is available. After you complete the entry and selections on the Description tab, the Trigger tab becomes available. After you complete the Trigger tab, the Activity tab becomes available. After you complete the Activity tab, the When tab becomes available.



3. On the **Description** tab, enter a description of the new activity. Select one of the **Basis for Activity** options. In most cases, this will be the Prospective Student option because things that are related to the student are most often the cause of actions taken by staff members. Click on the **Active** and **Required** check boxes as necessary.
4. The **Campuses** panel of this tab indicates the campuses to which you may assign activities. Check the box to which your activity applies. You have permission to schedule activities only to the campus(es) that appear here.
5. On the **Trigger** tab, select values from each list box: **When**, **Changes From**, **Changes to**, and **Lead Type is**. Triggers based on Enrollment Status take effect at 11 p.m. on the date that the trigger was set, unless the school chooses a different time. You can change Enrollment status more than once daily, but the Enrollment status that is displayed at 11 p.m. is the status that is updated.



Note regarding use of the Prerequisite Course trigger (basis for activity Applicant/Enrollment):

Selecting the Prerequisite Course option for When disables the Changes from field (Anything option appears dimmed), and also makes available the options Grade Posted, Drop and Unregister for the Changes to field. This allows an Academic Administrator, for example, to schedule an Activity that is triggered when a grade is posted that causes a prerequisite rule to fail, or when a prerequisite course is dropped or unregistered. The new merge field Prerequisite Course can be used when configuring the activity to be triggered.

Note: A trigger for an activity regarding an Incomplete will be based on the configuration for number of days before or after the expiration deadline date. For triggering the activity, select Grades for When, and Incomplete Grade for Changes from (Changes to is not needed because the activity needs to be triggered off whenever the incomplete grade is changed). Upon posting (manually or automatically) the replacement grade, the activity will be triggered.

6. On the **Activity** tab, select one of the activity options. Also select a **Template** and an **Assign to** person as necessary. If you select **Advisor Group** or **Staff Member**, a list box will appear beside your selection. Select an advisor group or staff member.

   Activities that cannot be assigned to the specific advisor for a student will be assigned to the default campus advisor, and the activity can then be reassigned to the appropriate person on campus.

   When assigning activities to default advisors, the following advisor group codes apply:

   - FA - Default 'Financial Aid Advisor'
   - SA - Default 'Student Accounts Advisor'
   - AD - Default 'Academic Advisor'
   - PL - Default 'Career Services Advisor'
   - LM - Default 'Loan Management Advisor'
   - NI - Default 'International Advisor'
   - OTH -Default 'Additional Advisor'.

   For automatically triggered activities that are assigned to an advisor group: when the student's record does not contain the appropriate advisor, the system will assign the activity to the advisor configured as the default advisor for that campus, according to the advisor group code.

When an advisor of the type specified on the scheduled activity does not exist for the student and a default advisor for the applicable type is not configured for the campus, then the system will assign the activity to the student without an associated advisor or staff member.

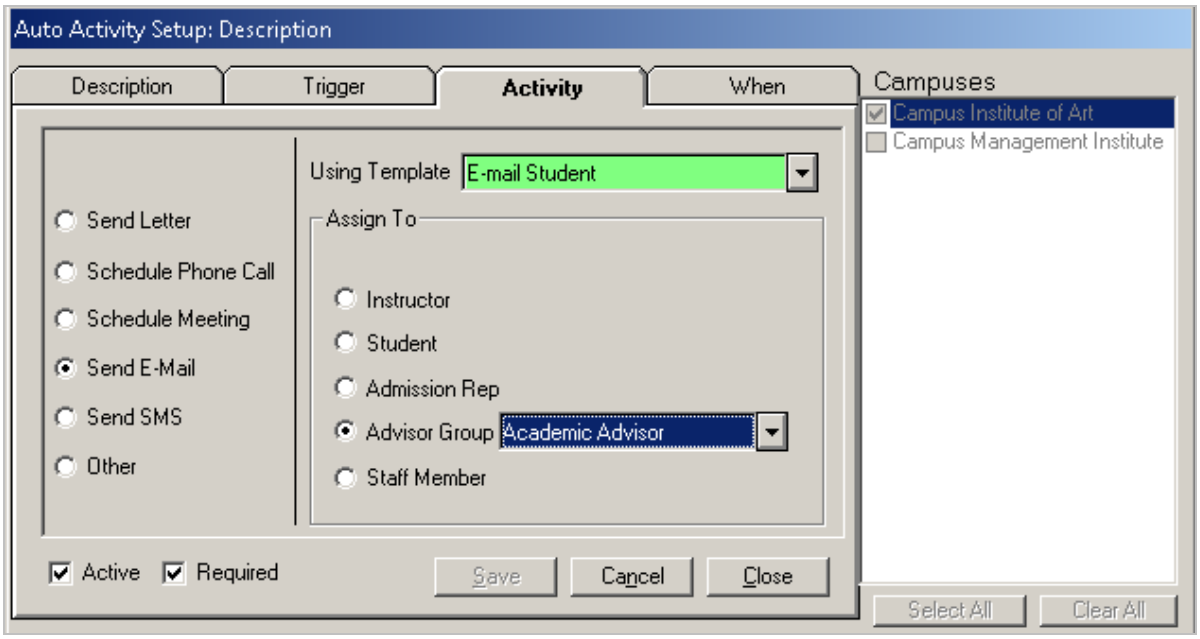
For automatically triggered activities that are assigned to an advisor group, the system will verify that the student's assigned advisor is an active staff member. When the staff member is inactive, the activity will be assigned to the advisor configured as the default advisor for that campus, according to the appropriate advisor group code.

When an advisor of the type specified on the scheduled activity is an inactive staff member or its account status is locked and the default campus advisor is an inactive staff member or is not configured, the system will assign the activity to the student without an associated advisor or staff member.

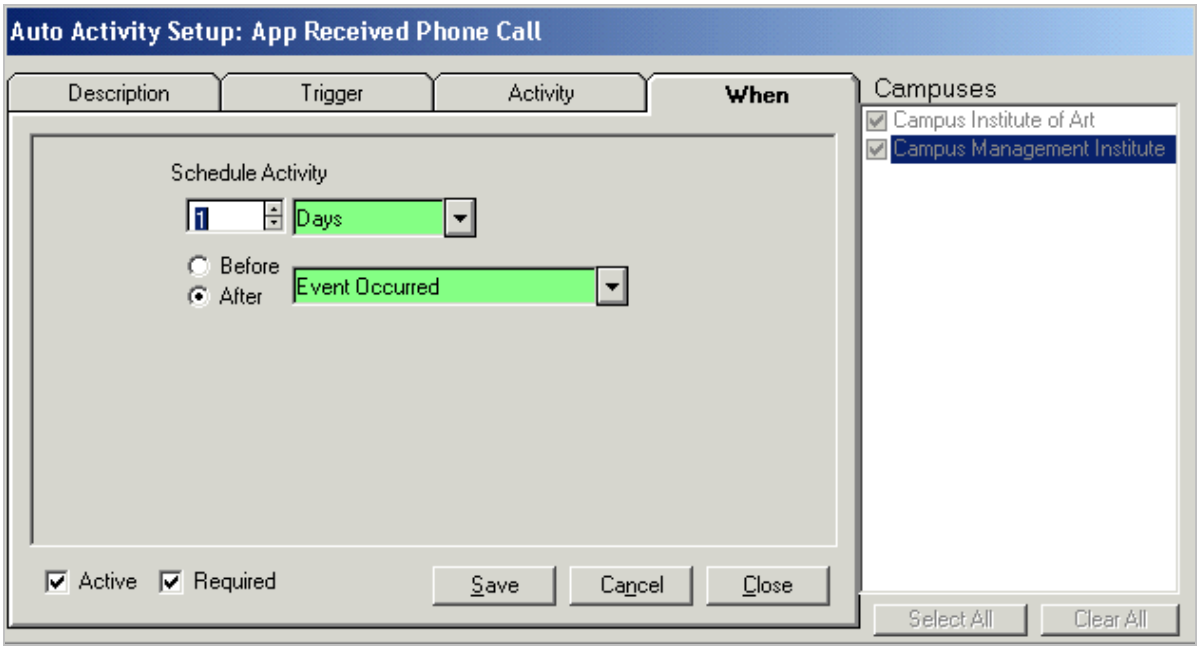
When advisor is not assigned to a student at the time of enrollment and the default advisor for that campus is different from the advisor for which activity is scheduled, then the system will check if the default campus advisor is active (not inactive or locked) before the activity is assigned to that default campus advisor for that particular module.

When an advisor assigned to a student is inactive or the account status is locked, and the default advisor for that campus is different from the advisor for which activity is scheduled, then the system will check if the default campus advisor is active (not inactive or locked) before the activity is assigned to the default campus advisor for that particular module.

When an advisor assigned to a student is inactive or the account status is locked, and the default advisor for that campus is different from the advisor for which activity is scheduled, then the system will check if the default campus advisor is inactive or locked before the activity is assigned to the student without an associated advisor or staff member for that particular module.



7. On the **When** tab, select parameters for the due date of the automatic activity. Select a **Control Event**.



Complete the entry or selection of the automatic activity parameters on the When tab.

8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Notes:

If you are scheduling automatic activities based on when a student's **Leave of Absence** is scheduled to end, you can choose to schedule activities a specific number of days before or after the LOA return date.

Certain actions are restricted based upon activities that have been associated with a trigger, but have not been assigned to a student. To prevent these actions for unused activities with associated triggers, the following rules apply:

- An activity cannot be deleted or made inactive if it is associated with at least one active scheduled activity trigger.
- A trigger cannot be reactivated if the associated activity is not active.
- A campus cannot be disassociated from an activity if a scheduled activity trigger is associated with that activity and campus.

Editing an Auto Activity

To edit an automatically assigned activity in the Contact Manager module:

1. Navigate to **Daily** > **Contact Manager** > Schedule Activities option. The Activity Scheduler form is displayed.
2. Select an automatic activity in the list and then click **Edit**. Alternatively, you can simply double-click an activity in the list to open it for editing. The **Auto Activity Setup** dialog box will appear. There are four tabs in this dialog. They are labeled as Description, Trigger, Activity, and When.
3. Click the **Description** tab and edit the description if necessary. Select one of the four **Basis for Activity** options. In most cases, this will be the **Prospective Student** option because things that are related to the student are most often the cause of actions taken by staff members. Click the **Active** and **Required** check boxes as necessary.
4. The **Campuses** panel of this tab indicates the campuses to which you may assign activities. Check the box to which your activity applies. You have permission to schedule activities only to the campus(es) that appear here.
5. Click the **Trigger** tab. Change the selections in the **When**, **Changes From**, **Changes to**, and **Lead Type is** list boxes if necessary. Triggers that are based on Enrollment Status take effect at 11 P.M. on the date that the trigger was set, unless the school chooses a different time. Users can change Enrollment status more than once daily, but the Enrollment status that appears at 11 P.M. is the status that is updated.
6. Click the **Activity** tab. Select one of the activity options. Select a **Template** and an **Assign to** person, as necessary. If you select **Advisor Group** or **Staff Member**, a list box will appear beside your selection. Select an advisor group or staff member from the list.

   Activities that cannot be assigned to the specific advisor for a student will be assigned to the default campus advisor, and the activity can then be reassigned to the appropriate person on campus.

   When assigning activities to default advisors, the following advisor group codes apply:

   - FA - Default 'Financial Aid Advisor'
   - SA - Default 'Student Accounts Advisor'
   - PL - Default 'Career Services Advisor'
   - LM - Default 'Loan Management Advisor'
   - NI - Default 'International Advisor'
   - OTH -Default 'Additional Advisor'.

   For automatically triggered activities that are assigned to an advisor group; when the student's record does not contain the appropriate advisor, the system will assign the activity to the appropriate advisor configured for that campus' default advisor according to the advisor group code.

   When an advisor of the type specified on the scheduled activity does not exist for the student and a default advisor for the applicable type is not configured for the campus, then the system will assign the activity to the student without an associated advisor or staff member.

   For automatically triggered activities that are assigned to an advisor group, the system will verify the student's assigned advisor is an active staff member. When the staff member is inactive, the activity will be assigned to the appropriate advisor configured for that campus' default advisor according to the appropriate advisor group code.

   When an advisor of the type specified on the scheduled activity is an inactive staff member or its account status is locked and the default campus advisor is an inactive staff member or is not configured, the system will assign the activity to the student without an associated advisor or staff member.

When advisor is not assigned to a student at the time of enrollment and the default advisor for that campus is different from the advisor for which activity is scheduled, then the system will check if the default campus advisor is active (not inactive or locked) before the activity is assigned to that default campus advisor for that particular module.

When an advisor assigned to a student is inactive or its account status is locked, and the default advisor for that campus is different from the advisor for which activity is scheduled, then the system will check if the default campus advisor is active (not inactive or locked) before the activity is assigned to the default campus advisor for that particular module.

When an advisor assigned to a student is inactive or its account status is locked, and the default advisor for that campus is different from the advisor for which activity is scheduled, then the system will check if the default campus advisor is inactive or locked, before the activity is assigned to the student without an associated advisor or staff member for that particular module.

7. Click the **When** tab. Select the appropriate parameters for the due date of the automatic activity. Select a **Control Event** from the list box.
8. When you complete the entry or selection of the automatic activity parameters on the When form, click **Save** to save your new automatic activity. Click **Close** to close the form.

   Note: Business rules are incorporated to restrict certain actions upon activities that have been associated with a trigger, but have not been assigned to a student. To prevent these actions for unused activities with associated triggers, the following rules apply:

   - An activity cannot be deleted or made inactive if it is associated with at least one active scheduled activity trigger.
   - A trigger cannot be reactivated if the associated activity is not active.
   - A campus cannot be disassociated from an activity if a scheduled activity trigger is associated with that activity and campus.
   - When an activity result change triggers a new activity that is assigned to a nonexistent Admissions Rep, the new activity will be assigned to the CMHOLD staff member. CMHOLD is made available upon installation of CampusNexus Student. You can filter activities in Contact Manager by CMHOLD and then reassign the activity to an Admissions Rep.

Deleting an Auto Activity

To delete an automatically assigned activity in the Contact Manager module:

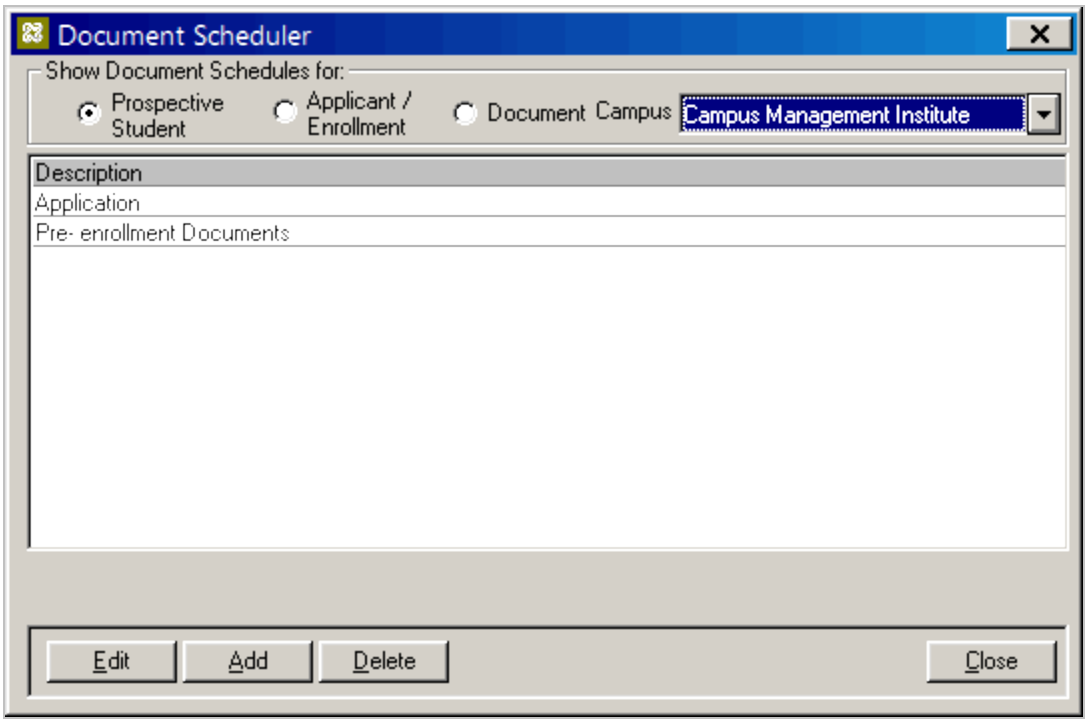
1. Navigate to **Daily** > **Contact Manager** > **Schedule Activities**. The Activity Scheduler form is displayed.
2. Select the automatic activity in the list that you want to remove and then click **Delete**.
3. Click **Yes** on the confirmation message.

Scheduling Documents

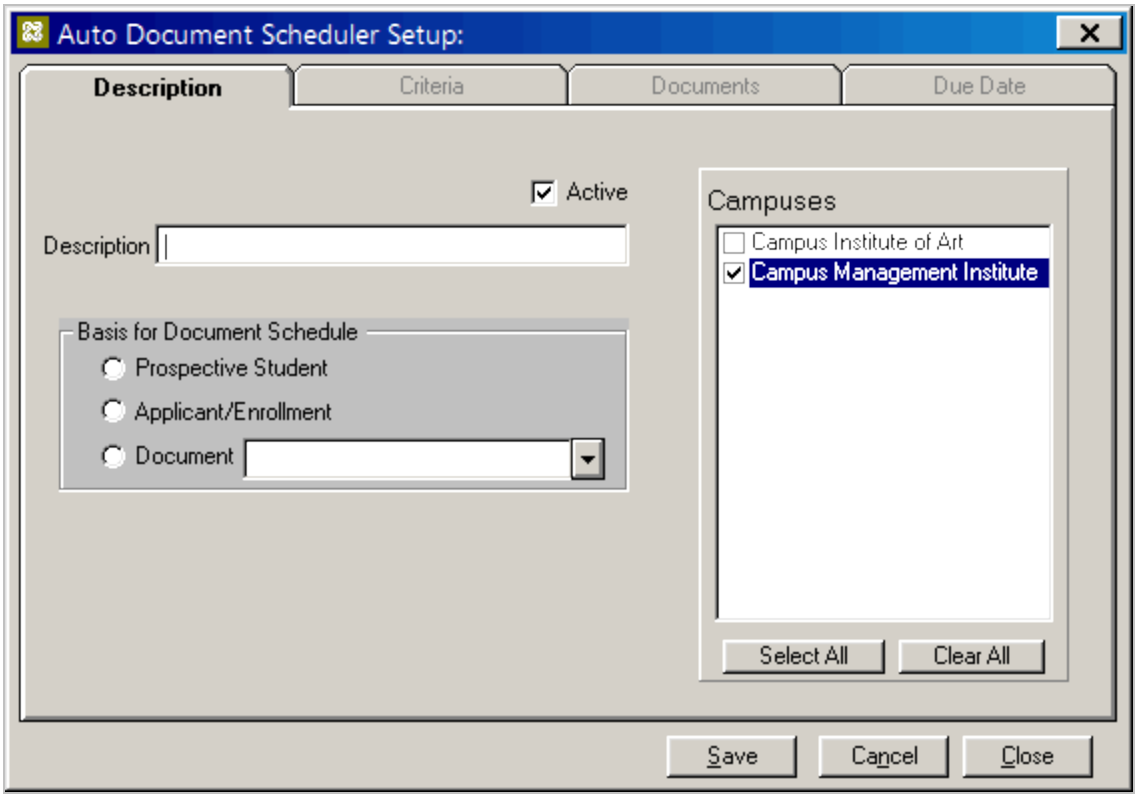
You can add, edit, and delete document schedules. The process flow is similar to the "Schedule Activities" option. Scheduling of documents can be based on pre-enrollment, enrollment, student housing requirements, and document-related events. You can select individual documents to schedule or lists of documents to schedule. You can also select the criteria by which the documents are scheduled and the date when the documents are due to be received by your school.

To add or edit document schedules:

1. Navigate to **Daily > Contact Manager > Schedule Documents**. The Document Scheduler form is displayed.



2. In the *Show Document Schedules for:* area, select **Prospective Student**, **Applicant/Enrollment**, or **Document**.
3. Select a **Campus**.
4. Click **Add** to add a new Document Schedule, or select a row on the grid and click **Edit** to view or change the details. CampusNexus Student displays the Auto Document Scheduler Setup form (frmCmDocSchedDetail).



a. In the *Basis for the Document Schedule* area, select **Prospective Student**, **Applicant/Enrollment**, or **Document**.

b. Select the **Campuses** to which this document apply. The only campuses displayed in this field are those for which you are authorized to schedule documents. You can add and remove campuses one-by-one, or use the **Select All** and **Clear All** buttons.

c. When you select **Document** as the basis for the document schedule, the drop-down list to the right of the Document option is enabled. Select the document that triggers the scheduling of the documents that will be attached to this document schedule in a later step.

All fields on this form are required and cannot be left blank.

If you are adding a document schedule, the **Description** tab of the form must be completed and saved before you can proceed to the **Criteria** tab.

5. Click **Save**. The Document Schedule (CmDocSchedule) table is updated.
6. Click the **Criteria** tab.
7. Enter your criteria selections according to the descriptions below.

   When you select the **Criteria** tab, the resulting form's appearance depends on the basis for the document schedule selected in the preceding form.

   Note the two tabs at the bottom of the page: **Edit Selection** and **View All Selection Criteria**. Start with **Edit Selection**. The **View All Selection Criteria** sub-tab is shown later in this topic.

There are three choices for the basis of the document schedule: **Pre Enrollment**, **Enrollment**, and **Document**. Selection options for each choice are as follows.

Prospective Student

Field	Description
Dependency Status	Based on the dependency status that is evaluated as a result of entering a FAFSA or importing an ISIR for your student. The Choices options are Dependent and Independent.
ISIR Comment Code	This information comes from the comment codes on ISIRs you import into CampusNexus Student. When you select this criterion, you must specify an award year prior to the choices list being built. If a document schedule is being edited, the award year field will be pre-populated with the Award Year. Once the award year is specified, the choices list is built by querying the Comments table. All rows where the Type is "ISIR" and the Award Year equals the award year specified by the user are included in the Choices list.
ISIR Verification Group	This information comes from the comment codes on ISIRs you import into CampusNexus Student. For the Verification Group code list to appear, you must specify an award year prior to the choices list being built. Select the ISIR Verification group and Verification Group options V1-V5 appear. These options have the same behavior as the ISIR Comment codes and SAR C flag. If the ISIR meets the proper criteria, it triggers the configured documents. The Verification Groups are populated on ISIRs with an Award Year of 2013-14 and greater.
SAR C Code set to Y	This information comes from the SAR C flag value from ISIRs you import into CampusNexus Student. When you select this criterion, you must specify an award year prior to specifying the criteria in the choices list. The choices for a SAR C flag are Y or blank. This will not come from any table.
Student Status	When used in a pre-enrollment document schedule, this information is based on what is displayed in the "Status" field in the Student Master. When you select this option, the Choices section lists all rows from SySchoolStatus where SyStatus.Category is L, N, E, A, T, or P, and the campus group criteria matches the campus group specified on the document schedule. If the document schedule is being edited, the CampusNexus Student checks all statuses that currently make up the specified status criteria for this document schedule.

Applicant/Enrollment

Field	Description
Applicant Type	When you click on the Criteria tab of Document Scheduling, Applicant Type is available under the Items List. Clicking on Applicant Type displays the corresponding values in the Values section, where you can then select one or more of the values displayed.
Dependency Status	Based on the dependency status that is evaluated as a result of entering a FAFSA or importing an ISIR for your student. The Choices list options are Dependent and Independent.

Field	Description
Enrollment Status	Based on the value in the "Enroll Status" column on the "Date/Status" tab in the Enrollment folder for the student enrollment. When you select this option, the Choices section lists all rows from the Attendance Status table. If the document schedule is being edited, CampusNexus Student checks all statuses that currently make up the specified enrollment status criteria for this document schedule.
FA Fund Source	Based on the individual package details in the Packaging folder for the appropriate Award Year and student Enrollment. You can see this value in the Fund Source column. When you select this option, the Choices section lists all rows from the Fund Source table where the campus group criteria matches the campus group specified on the document schedule. If the document schedule is being edited, CampusNexus Student checks all statuses that currently make up the specified FA fund source criteria for this document schedule.
FA Packaging Status	Based on the status information in the Packaging folder for the appropriate Award Year and student Enrollment. You can see this value in the "Package Status" column. When you select this option, the Choices section lists all rows from the Packaging Status table. If the document schedule is being edited, CampusNexus Student checks all statuses that currently make up the specified FA packaging status criteria for this document schedule.
Housing Required	Based on the value for "Housing Required" in the Housing Information form of the Student Bar. When you select this option, you can trigger documents based on a student's Housing record being updated to indicate Housing is required. For example, you can trigger documents such as proof of immunizations, and proof of student health insurance,
ISIR Comment Code	This information comes from the comment codes on ISIRs you import into CampusNexus Student. When you select this criterion, you must specify an award year prior to the choices list being built. If a document schedule is being edited, the award year field will be pre-populated with the Award Year. Once the award year is specified, the choices list is built by querying the Comments table. All rows where the Type is "ISIR" and the Award Year equals the award year specified by the user will be included in the Choices list.
ISIR Verification Group	This information comes from the comment codes on ISIRs you import into CampusNexus Student. For the Verification Group code list to appear, you must specify an award year prior to the choices list being built. Select the ISIR Verification group and Verification Group options V1-V5 appear. These options have the same behavior as the ISIR Comment codes and SAR C flag. If the ISIR meets the proper criteria, it triggers the configured documents. The Verification Groups are populated on ISIRs with an Award Year of 2013-14 and greater.
Placement Status	Based on the value in the "Placement Status" field on the "Exit Interview" tab of the Placement folder for the appropriate student Enrollment. When you select this option, the Choices section lists all rows from the School Status table where the Status Category is G and the campus group criteria matches the campus group specified on the document schedule. If the document schedule is being edited, CampusNexus Student checks all placement statuses that currently make up the specified placement status criteria for this document schedule.

Field	Description
Placement Skills	Based on the value in the "Skills" column on the "Student Job Skills/Titles" tab of the Placement folder for the appropriate student Enrollment. When you select this option, the Choices section lists all rows from the Skills table. If the document schedule is being edited, CampusNexus Student checks all placement skills that currently make up the specified skills criteria for this document schedule.
SAR C Flag	This information comes from the SAR C flag value from ISIRs you import into CampusNexus Student. When you select this criterion, you must specify an award year prior to specifying the criteria in the choices list. The choices for a SAR C flag are Y or blank. This will not come from any table.
Student Status	When used in a enrollment document schedule, this information is based on what is displayed in the "School Status" column in the Enrollment folder. When you select this option, the Choices section will list all rows from SySchoolStatus where SyStatus.Category is L, N, E, A, T, or P, and the campus group criteria matches the campus group specified on the document schedule. If the document schedule is being edited, CampusNexus Student checks all statuses that currently make up the specified status criteria for this document schedule.

Documents

Field	Description
Document Status	Based on the information in the "Status" column in the Document folder for the student. When you select this option, the Choices section lists all rows from the Document Status table. If the document schedule is being edited, CampusNexus Student checks all document statuses that currently make up the specified document status criteria for this document schedule.

8. Click the **Documents** tab. The system displays the **Auto Document Scheduler Setup** form for the specific document.
9. Select the **Documents** or **Document Lists** to be automatically scheduled.

   The next step in the wizard is to specify which documents will be scheduled for a student if the student's data satisfies the criteria specified in the previous form.

Document Sub-Page

When this form is initially activated, the **Document** sub- tab is selected by default. The list displayed below includes all rows from the Document Type table that satisfy the campus group criteria and are not already included in the selected document list. Highlight a document in the left box and click **Select** to add it to the Selected Documents list. Highlight a selected document in the right box and click the **Remove** button to remove it from the Selected Documents list.

Document List Sub-Page

If you select the Document List Sub-Page, the drop-down list below changes from a listing of all documents on file to a list of all Document Lists on file that satisfy the campus group criteria for the document schedule. Highlight a

Document List in the left box and click **Select** to add the listed documents to the Selected Documents list. Highlight a selected document in the right box and click **Remove** to remove it from the Selected Documents list.

The only exception to this is if a document contained in the Document List already is in the Selected Document list. When you click Save, the CmDocScheduleDocuments table is updated.

10. Click the **Due Date** tab. The Document Due Date text boxes appear.
11. Enter a numeric value and select a time frame (Days, Weeks, or Months).

    Specify the criteria to calculate the due date for each document scheduled for a student. These criteria are used only if no due date criteria exist on the individual document setup. When you select Save, CampusNexus Student updates the following columns in CmDocSchedule for the document schedule row being edited:

    DueDateType - A

    DueDateDays -

    - If you select **Days**, the number you enter.
    - If you select **Weeks**, the number you enter multiplied by 7.
    - If you select **Months**, the number you enter multiplied by 30.
12. Click **Save** to save your Document Schedule.
13. Click **Close** to close the form.

Letters Overview

Many procedures that you will encounter during your daily operations require that you send letters to one or more students or employers. You can establish form letters into which you can merge data from the students' or employer's records. Predefined automatic activities can be set up to trigger letter production.

Letter generation begins in the **Lists** menu under the **Contact Manager** option. From the Setup - Contact Manager Lists form, you can add new letter activities, edit existing ones, and delete or disable them. You can also print a list of the activities. Refer to Activities Codes and Activities for more detail about adding and maintaining letter activities.

Once a new letter sending activity has been added to the Contact Manager List, you must go to the **Daily** operations menu for **Contact Manager** to write the new form letter, or edit an existing one. Once you complete the form letter, you can schedule the letter to be sent to one student or employer, or a group of students or employers.

See Print Letters for detailed instructions for editing and printing of letters. See also Print Employer Letters, Letter Activity, System Settings for Letter Path.

Editing Letters

The Edit Letter functionality is accessible via the Print Letters screen. Follow the Print Letter instructions, and click **Edit Letter**. Follow the instructions below to modify a form letter.

See also Activities, Edit Employer Letter, Print Letter Overview, and Employer Letter Overview.

See Mail Merge Codes for more information about the data items that can be included with the various types of letters.

To edit a letter:

1. If your letter is new, CampusNexus Student starts Microsoft Word with a blank page with a file name based on the Code specified in the Activities setup procedure.

   If your letter is currently exists, CampusNexus Student starts Microsoft Word with the file you selected.

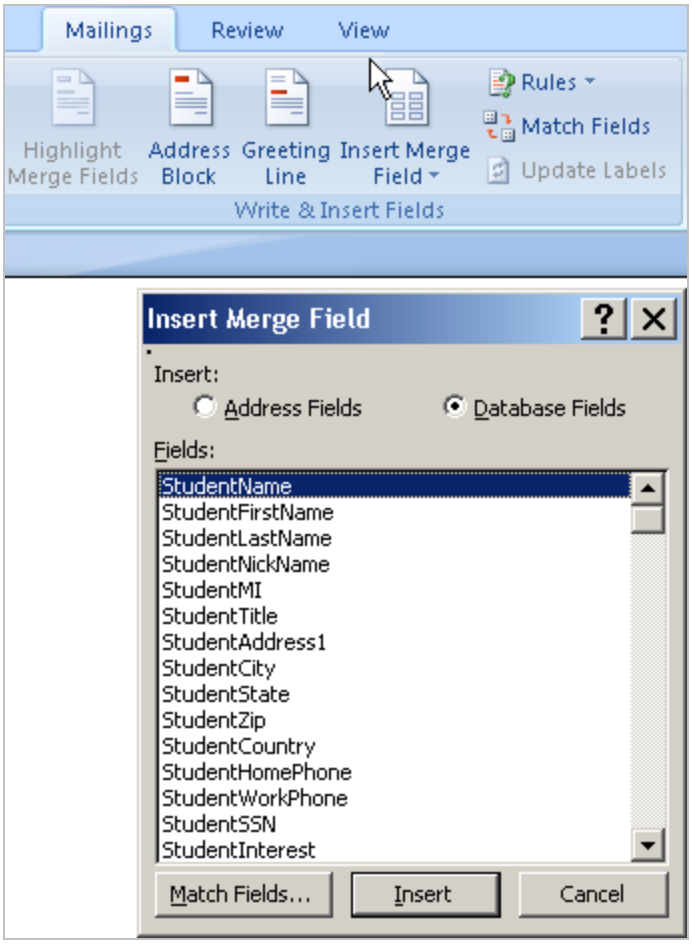
   Note: CampusNexus Student version 15.2 supports the `.docx` extension for Microsoft Word files.

   If you created a `.doc` file and `.docx` file for the same Activity Code, for example *Program_Start.doc* and *Program_Start.docx*, remove one of the files from the server where the files are stored to enable CampusNexus Student to open the correct file for the selected Activity code.

2. Work in the Word document just as you would if you were not coming from CampusNexus Student.

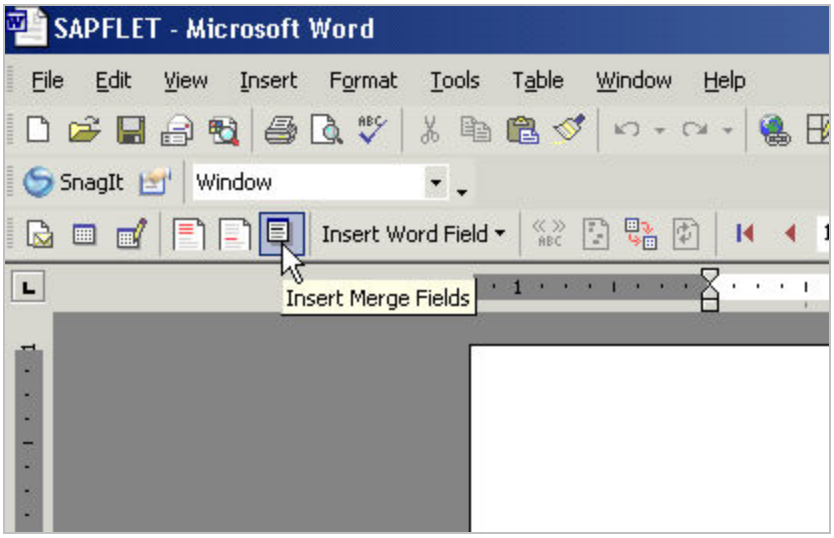
   When Word is started from within CampusNexus Student, the **Insert Merge Field** with a list of CampusNexus Student data fields is displayed in the **Mailings** tab, within the **Write & Insert Fields** group.

   The following example shows the Insert Merge Field with its list of CampusNexus Student data fields. These fields can be inserted at any point in your letter.



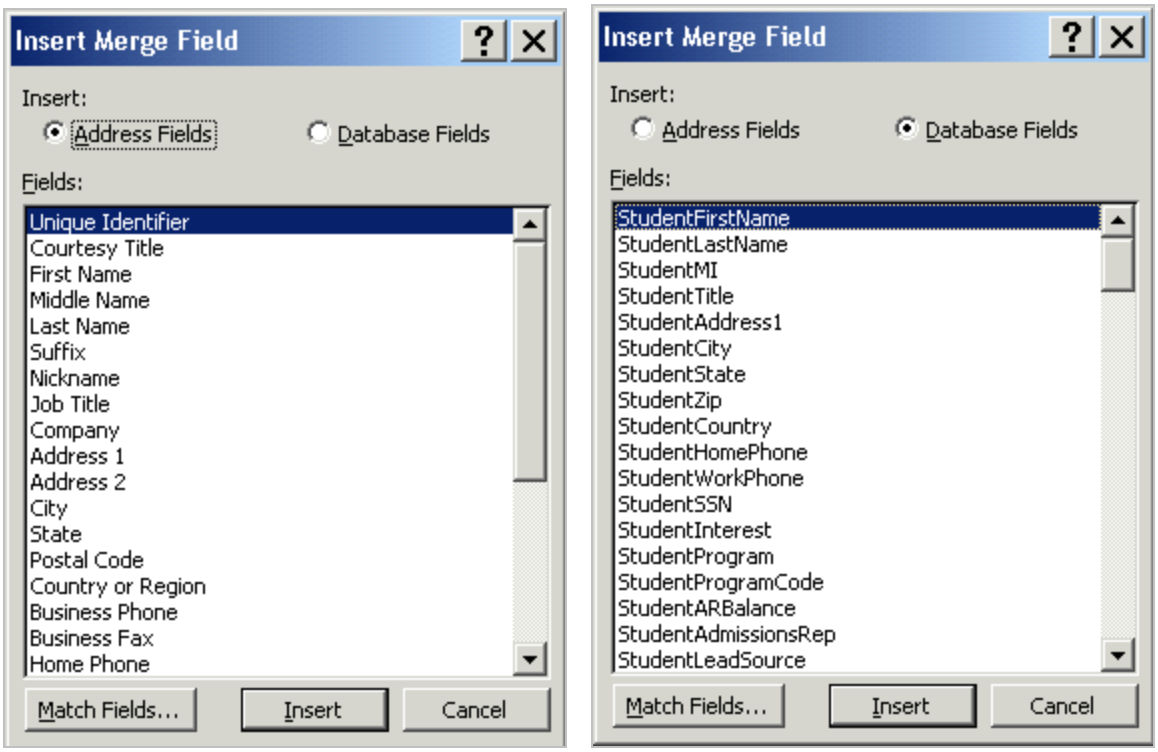
3. To insert a merge field in your letter, place the cursor at the location where the field is required. Click **Insert Merge Field** on the Word toolbar. The list of merge fields is displayed. Click the field on the list to insert it in the letter.

   When printing any information from the Enrollment table, only the information from the enrollment with the highest enroll date is printed.

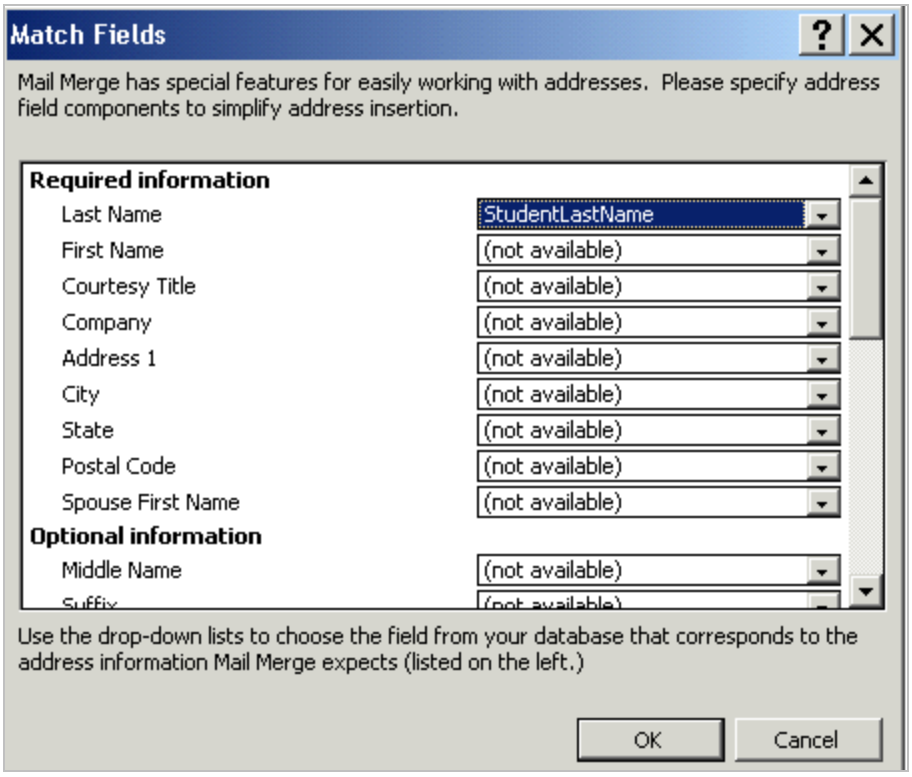


4. You can select as many merge fields as you like to incorporate into your letter. CampusNexus Student provides

address and database fields.

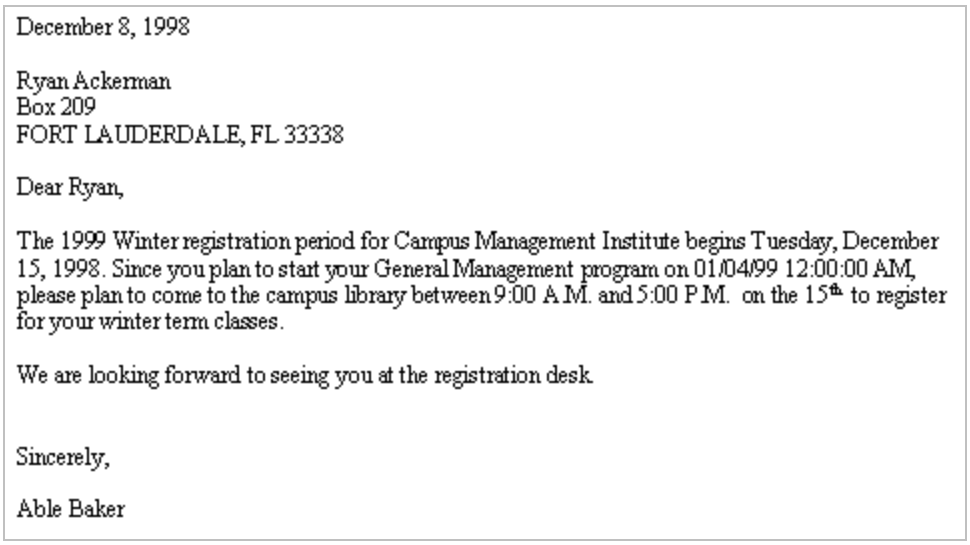


5. The **Match Fields** form is displayed when the **Match Fields** button is selected. Click next to your database field that you would like to associate with the mail merge field displayed on the left hand side of the screen. A list of database fields is displayed that you can select for each mail merge field listed. Click **OK** when all of your selections are made.



6. After you finish composing your form letter, **Save** your letter in Word. Then **Exit** from the Word program. You will be returned to CampusNexus Student.

The letter below is a product of merging data from the student database with the form letter in the previous Microsoft Word example.



December 8, 1998

Ryan Ackerman
Box 209
FORT LAUDERDALE, FL 33338

Dear Ryan,

The 1999 Winter registration period for Campus Management Institute begins Tuesday, December 15, 1998. Since you plan to start your General Management program on 01/04/99 12:00:00 AM, please plan to come to the campus library between 9:00 A.M. and 5:00 P.M. on the 15th to register for your winter term classes.

We are looking forward to seeing you at the registration desk.

Sincerely,

Able Baker

7. Review the letter. If the letter is correct, use the normal Word print functions to print your letter.
8. After you finish printing your form letter, **Exit** from the Word. Word will ask if you want to save the changes you made to the Form Letters file. This is the merged letter file. Answer **Yes** or **No**.
9. Word also asks if you want to save changes to the form letter file (one with the field codes). Answer **No**.
10. You are returned to Print Letters form in CampusNexus Student.

Using Ledger Merge Fields in Letter Activities

When one or more merge fields <<LedgerDate>>, <<LedgerAmount>>, and <<LedgerDescrip>> are used within a letter activity, all ledger transactions are listed, not just the last transaction. One, two, or all three ledger merge fields (description, amount, date) can be used in the template, and a specific table format is applied when the fields are replaced with data and the letters are prepared for printing. The location of the first ledger merge field in the template determines the start of the table in the printed letter, and the order of the columns, left to right, is always the same: Date, then Amount, then Description.

Examples

```
<<LedgerDate>> <<LedgerAmount>> <<LedgerDescrip>>
```

will show in the following table format:

```
Date Amount Description
```

```
<<LedgerDescrip>> <<LedgerDate>>
```

will show in the following table format:

```
Date Description
```

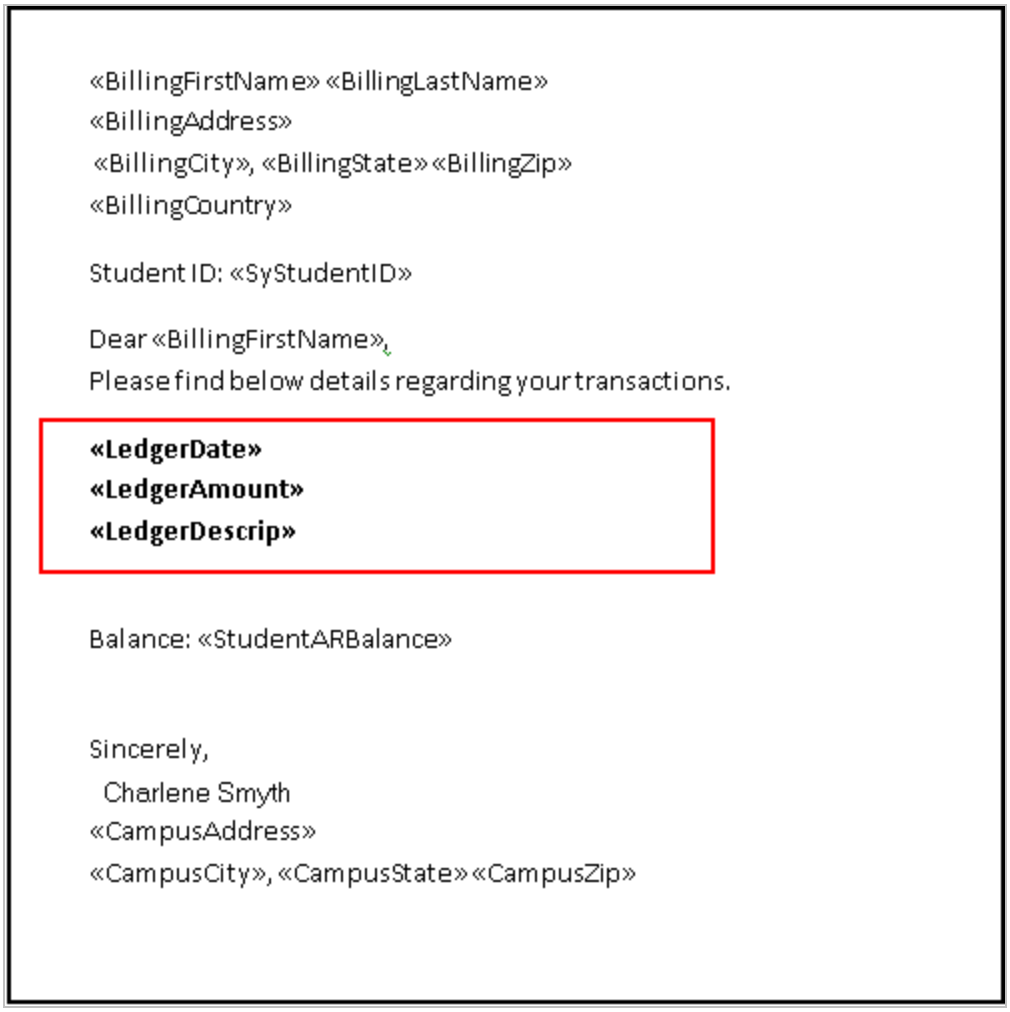
```
<<LedgerDescrip>>
```

will show in the following table format:

Description

Refer to the illustrations below for an example of a letter template containing ledger merge fields and the corresponding printed output.

Sample Template Containing Ledger Merge Fields



Sample Printed Letter Containing Merged Ledger Data

Sara Baig
1223 You Will Always Know St.
Ft. Lauderdale, FL 33318

Student ID: 26942

Dear Sara,
Please find below details regarding your transactions.

Date	Amount	Description
02/18/2000	200.00	Deposit Received
02/21/2000	6000.00	Tuition
02/21/2000	100.00	Student Fees
03/03/2000	-60.00	Refund - Student
05/31/2001	971.00	Federal Direct Subsidized Loan
06/11/2002	5.00	Deposit
06/27/2002	450.00	Art Supplies
03/26/2003	23.00	Food Service

(continued ...)

Balance: 19195.50

Sincerely,
Charlene Smyth

Boca Raton, FL 33431

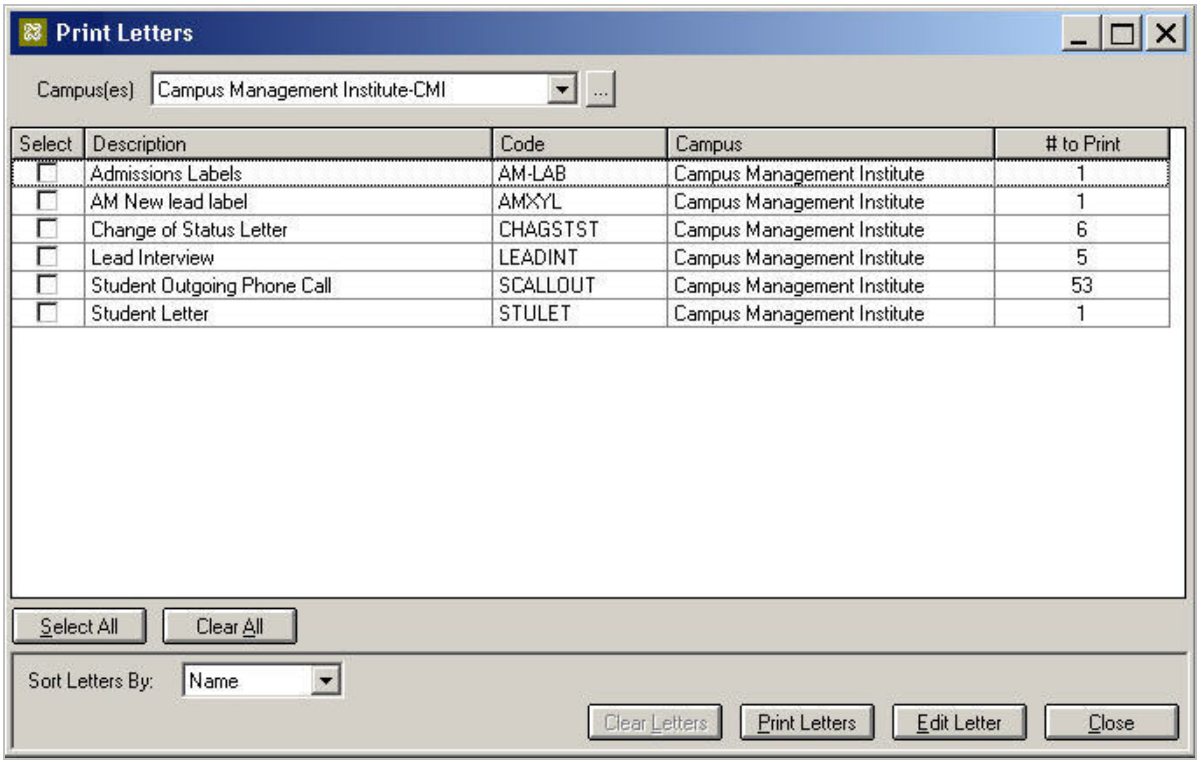
Printing Letters

You must configure letter activities before you can print form letters in a batch mode. You can then print the batch letters manually or automatically. See also Letter Activity, Print Letter Overview, Employer Letters Overview, Print Employer Letters, System Settings for Letter path, Edit Letter, Edit Employer Letters.

Note: When printing any information from the Enrollment table, only the information from the enrollment with the highest enroll date will be printed.

To clear, edit, or print Student form letters manually:

1. Navigate to Daily > Contact Manager > Letters or **Daily > Career Services > Print Employer Letters**. The Print Letters form is displayed.



2. Select a campus from the **Campus(es)** drop-down list or multiple campuses using the ... button for which letters are to be edited or printed. CampusNexus Student displays only the campuses to which you have access. Only active letters are displayed.
3. Choose one or more check boxes from the **Select** column to select one or multiple letters to print. You may also click the **Select All** or **Clear All** buttons to select/deselect the letters in this column.

   Note: The **Campus** column displays which campus the letter is associated with.
4. Click the **Print Letters** button to print the selected letter(s), or click the **Edit Letter** button to modify the letter.

   Note: When selecting the **Edit Letter** button, you can only select one letter at a time.

Clear Letters

Note: The Clear Letters button is only visible to users that have Delete letter permission.

1. Select a letter(s) from the list and click **Clear Letters**.
2. A warning message is displayed. Click **OK** to remove the letter(s) from the list. If **Cancel** is selected, the letter(s) will not be removed from the list.
3. You are returned to the **Print Letters** form.

Print Letters

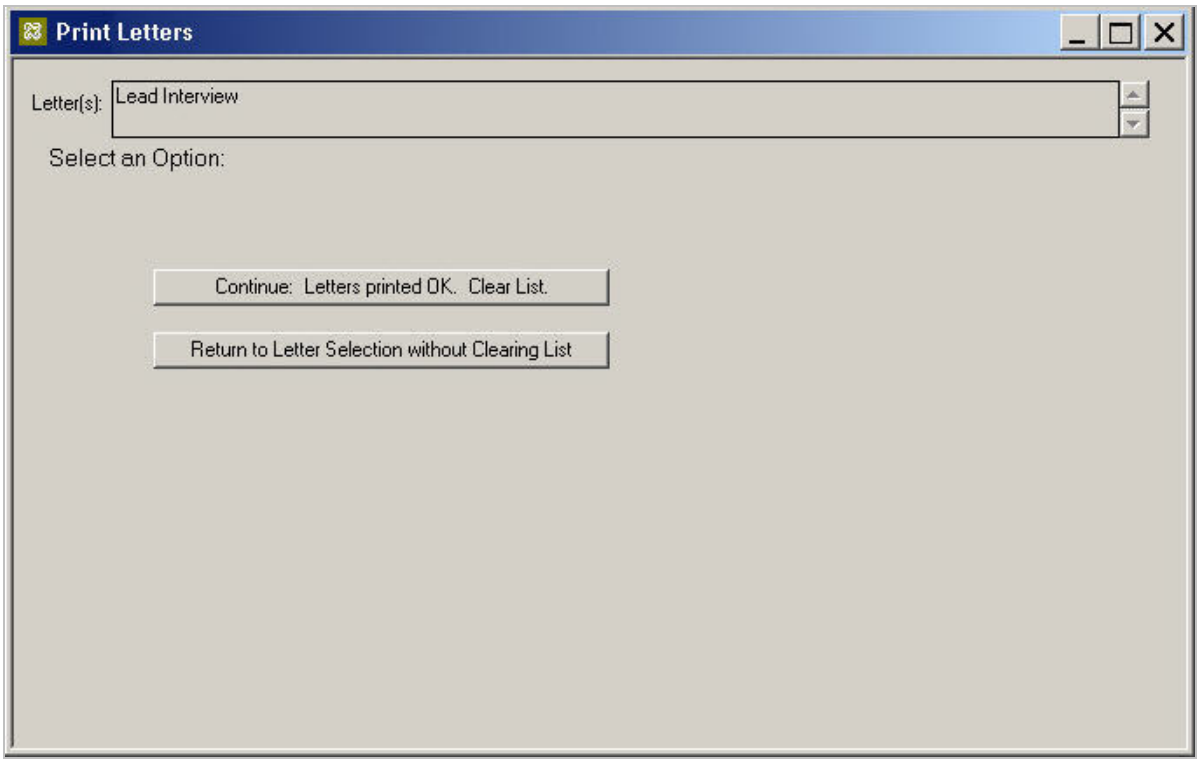
1. When the **Print Letters** button is selected, two Microsoft Word documents will open for each letter selected. One document contains the template and the other contains the actual contents of the letter(s). The document containing the contents will have the number of pages equal to the number in the **# to Print** column.

   Note: You can edit the template if you have Write access permissions to the path where the *.doc template file is located.

   The application will open Microsoft Word and will display your selected letters one after the other. If the letters appear to be correct, use the normal Microsoft Word print function to print the letters. Once you have finished printing, close the letters. The Microsoft Word application will prompt you to save any changes you may have made to the letters (these are the merged letter files). You may select **Yes** or **No**.

   Microsoft Word may prompt you with a message asking if you want to replace the Normal.dot template file. Select **No** if you use a different Normal.dot template file than CampusNexus Student does.

2. You will be returned to the following form. At the top of the form, a list of the **Letter(s)** that were selected to be printed is displayed, separated by semicolons.



3. Select **Continue: Letters printed OK. Clear List.** if you want different students or employers to receive this letter the next time it is printed.

   - OR -

Click **Return to Letter Selection without Clearing List** if you want the same students or employers to get this letter the next time it is printed.

4. You are returned to the Print Letters form.

Create Labels

This procedure is an easy way to create mailing labels with merge codes and postal bar codes. It is a three-part procedure involving both CampusNexus Student Contact Manager and the mail merge features of Microsoft Word.

- Part 1 - Assign an "Activity" Name to Your Label where you use Contact Manager to name an "activity" for your labels.
- Part 2 - Define the Labels with Merge Codes and Postal Bar Codes where you use Contact Manager to start the label definition process in Word, and then you use Microsoft Word to define the content of your label.
- Part 3 - Test Your New Mail Merge Labels where you test your work by printing some test labels for selected students.

Note: Because there are several steps in each part of this procedure, we suggest that you print this Help topic and keep the hard copy by your side while you work your way through it.

This procedure takes advantage of the Word feature that uses predetermined formats for **Avery Labels**. You can select the Avery mailing label that you use in your school. Determine which Avery Label format (number) you are going to use and how many lines of information can be printed on each label before you start the setup procedure.

For our example, we will set up a label format (Avery 5160) to be used on information packets that are sent to new leads.

Part 1 - Assign an "Activity" Name to Your Label

1. Navigate to **Lists > Contact Manager**. The Setup - Contact Manager Lists form is displayed. Click the Activities tab.
2. Click **Add** to add your new label.
3. When the **Activities Code Setup** form is displayed, enter the data for your label. We suggest that you use a prefix on the name to identify the department in which it is used. For Admissions, the prefix is "AM". Our example label will have a **Code** of AM-NL (up to eight characters in the code) and "AM-New Lead Label" for the **Description**.

   Department Prefixes

Prefix	Module
AD	Academic Records
AM	Admissions
BS	Bookstore/Inventory
CM	Contact Manager
DE	Distance Education
FA	Financial Aid
PL	Placement
SA	Student Accounts
SY	System

4. Select Letter for the **Event Type**.
5. Leave Duration at zero.

6. In the Contacts frame, enable the **Required** option for **Student**.
7. In the Send To box, select **Student**.
8. Click **Save** to save your new "activity" (label) and leave the form open for the next step.

Part 2 - Define the Labels with Merge Codes and Postal Bar Codes

1. Ensure that a folder exists to match the **Letter Path** setting in the **Setup > System > General** tab. If the folder does not exist, create one, or change the Letter Path setting to match a folder that does exist. The default path is `C:\Program Files\CMC\CampusNexus Student\Letters`.
2. Click **Edit Letter**. Because this is the first time we are accessing the "letter" file, the program has not yet created it. A message is displayed to ask you if you want to create one. Click **Yes** to create the letter file document **AM-NL.-doc** for our example and start your new label. CampusNexus Student displays a message in the lower left corner that says "Opening Word" until Word opens with a blank page. Be patient, it could take a few seconds.
3. If Word is not already maximized on your screen, maximize it (right-click on the task bar icon for the Word document and select **Maximize**).
4. From the Word menu, start the Mail Merge Wizard.
   Note: For Word 2003 or earlier: **Tools > Letters and Mailings > Mail Merge Wizard**; for Word 2007 or later: **Mailings > Start Mail Merge > Step-by-Step Merge Wizard**
5. When the Wizard is displayed, make sure that you are on **Step 1 of 6** (Step 1 of 6 is displayed unless the Wizard has been run before. If necessary, click **Previous** to return to Step 1 of 6.). Select **Labels** as the document type, and click **Next: Starting document** to continue.
6. When **Step 2 of 6** is displayed, click **Label options ...** to pick the label that your school uses in this situation. Select the **Tray** to be used on the printer. Click **OK** to accept the settings. Now you will see all your mail merge codes and bar codes formatted to your Avery label format. Then click **Next** to proceed to Step 3 of 6.
7. When **Step 3 of 6** is displayed, click **Next: Arrange your labels**. We will not be making any changes on Step 3 of 6.
8. When **Step 4 of 6** is displayed, place the cursor in the first label and click **Postal bar code**.
9. When the **Insert Postal Bar Code** form is displayed, select **StudentZip** from the drop-down menu, and click **OK** to save the change.
   Note: The message "ZIP code not valid!" indicates that the ZIP code data has not yet been loaded. This will happen during the merge process later.
10. Move the cursor to the second line on the first label. On the Mail Merge Wizard menu, click **More items**.
11. When the **Insert Merge Field** form is displayed, select a merge code for each field to appear in the label. For example, in the **Last Name** field, select the merge code **StudentLastName**. Continue to create the label format by adding the fields you require.
12. From the Mail Merge Wizard menu on **Step 4 of 6**, select **Update all labels** to duplicate the label format for every label, and click **Save** to save the changes.
13. **Save** and **Close** the document file **AM-NL.doc** and return to the CampusNexus Student **Activities Code Setup** form and click **Save** and **Close**.

You are ready to test your mail merge labels.

Part 3 - Test Your New Mail Merge Labels

To test your new labels, select a few leads or students and assign the "activity" that represents your new labels.

1. Select a student using the Recent Students list or the Search tool.
2. Select **View** > **Contact Manager > Activities**. The Contact History form is displayed.
3. Click **Add Activity** to open the Activity form.
4. Select the**Activity**from the drop-down list that represents your new label. In our example, this is "AM-New Lead Label".
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.
6. Repeat steps 1 through 5 for a few more students; at least enough students to fill a couple of rows of the label form so you can see how the spacing works out. When you have enough students (or leads) selected, go on to the next step.
7. Navigate to **Daily > Contact Manager > Letters**. The Print Letters form is displayed.
8. Select the grid line that describes your new labels. Under **# to Print**, you should see the number of student records you selected for the test. In our example, we will print labels for six (6) students.
9. Click **Print Letter**. CampusNexus Student calls Microsoft Word and Word opens the file containing the data for the selected students. The data is merged with the label format and displayed on your screen. This process could take a little while, depending on how many students you selected. Be patient.
10. Load your label forms paper into the printer tray you specified earlier.
11. From the Word menu, select **File > Print** (or press **Ctrl+P**) to print your labels.
12. Click **File > Exit** to close Microsoft Word and return to CampusNexus Student. Word asks a couple of questions about saving changes to the forms. You will normally click **No**to these questions.
13. When you return to CampusNexus Student, it will ask if you want to clear the student count for your label form. As with other letters or activities, you would normally say **Yes**. If you think you may have to reprint the labels for any reason, say **No**.

If you find that your labels need a little adjusting, go back to the beginning of Part 2. When you click **Edit Letter**, the program finds your label "letter" and starts Word with the formatted label document. You can edit the document just like you would any other letter. See your Microsoft Word manual for more details on editing mail merge documents.

Automatic Activity Scheduler

You can set up an automatic procedure to assign your new label "activity" to students based on some triggering condition. In our new lead example, you could cause the label to be printed for each new lead that enters the system. See the topics on Activity Scheduler for more information on this procedure.

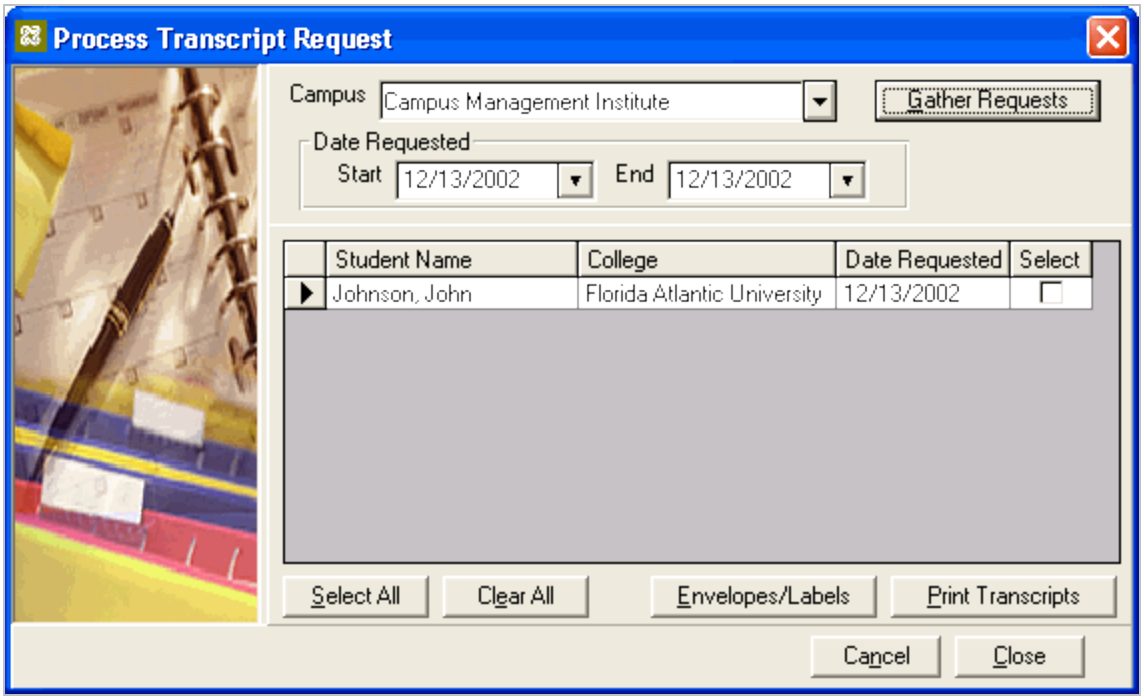
Processing Transcript Requests

You can use this form to process transcript requests that were entered under View > Contact Manager > Transcript Requests.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

To process transcript requests:

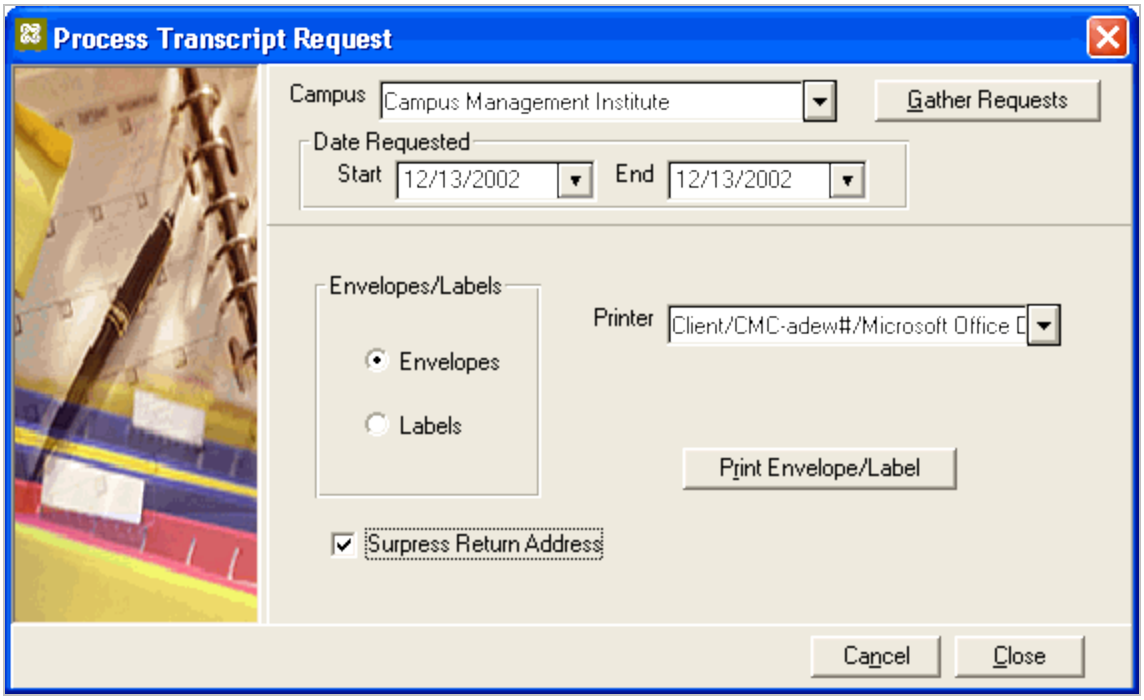
1. Navigate to **Daily > Contact Manager>Process Transcript Requests**. The Process Transcript Request form is displayed.



2. Select the **Campus** from which the transcripts will be issued.
3. Enter a date range from which to select the **Date(s) Requested**.
4. Click **Gather Requests**. CampusNexus Student looks for any transcript requests that match your campus and date range and display them in the grid. CampusNexus Student gathers all records where:
    - The campus in the Transcript Request table matches your selected campus
    - The Date Sent field is empty
    - The Date Requested is in your defined range, and
    - The students are not members of a group where transcript printing is on hold.
5. Review the list of transcript requests. You can click **Select All** to select all the listed requests for transcript printing. Click **Clear All** to clear the Select check box on all listed requests.
6. Click **Print Transcripts** to print transcripts for the selected requests. The Print Transcripts procedure also updates the date sent in the Transcript Request table with the system date. If you have created a custom transcript and you have entered the file name under Setup > Academic Records, the program uses your report instead of the generic

report.

7. Click **Envelope/Label**. CampusNexus Student displays a form from which you can print envelopes and/or labels. The labels are printed on the default label printer. You can select the envelope printer from a drop-down list of printers available to you.



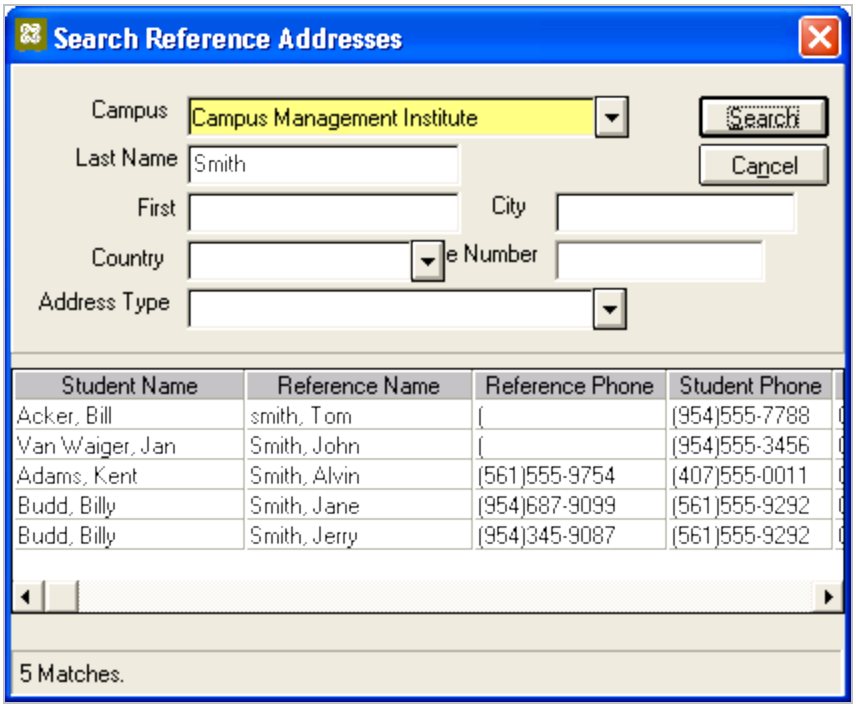
- Select **Envelopes** or **Labels**.
- Select or clear **Suppress Return Address** to stop the printing of the return address when using preprinted envelopes or labels.
- Click **Print Envelope/Label** to print the selected documents.

Searching for Reference Addresses

With this feature, you can search through all student addresses. The difference between this feature and View > Contact Manager > Addresses is that this option searches through all student addresses in the database (not just addresses with an Address Type of Reference). The View option displays the addresses for a selected student.

To search for an address in the student address records:

1. Navigate to **Daily > Contact Manager > Search Reference Address** or click the address search icon in the Contact Manager toolbar. The Search Reference Addresses form is displayed.



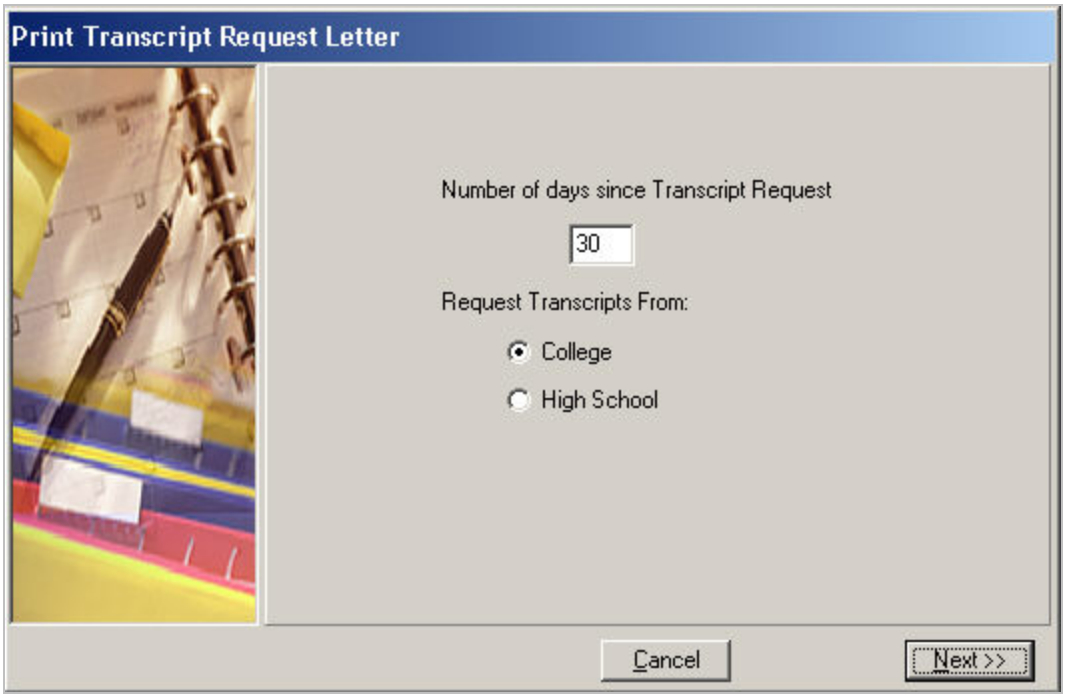
2. Select the **Campus** from which to search for the address(es).
3. Enter the search criteria. You can enter combinations of **Last Name**, **First Name**, **Phone**, and **City**.
4. Select an **Address Type** from the drop-down list to limit the search to a particular type of address.
5. Click **Search**. The program will find all the student addresses that meet your search criteria and display them in the grid..
6. Double click a listed reference to display the student master of the student to whom the address is related. From there, you can select **View > Contact Manager > Addresses** to see the details of the selected reference address.
7. Click **Cancel** to close the search form.

Printing Transcript Request Letters

You may print transcript request letters by following the instructions below. See also Process Transcript Requests.

To print transcript request letters:

1. Navigate to **Daily > Contact Manager > Transcript Request Letters**. The Print Transcript Request Letters wizard is displayed.



2. Accept the default for the number of days since the last request or enter your choice, select **College** or **High School** and click **Next** to continue.
3. The wizard displays a list of transcript requests sorted by school. Enable the **Select** box for the schools to receive letters, and click **Next** to continue.
4. When the wizard displays the option to continue and clear the list, or return to the letter selection, click **Continue** to complete the print operation, otherwise click **Return**.

Importing and Exporting SEVIS Data

To Export SEVIS data:

1. Navigate to **Daily > Contact Manager > SEVIS Transmission**. The SEVIS Transmission form is displayed.
2. Select the **Create/Regenerate Extract File** tab.
3. Select the **File Type** and click the **Gather Students** button. The system lists all students in the Ready to Send or Accepted category.

   You can select specific students from the list and remove them by clicking the **Remove Student** button. When you click **Create File**, the students in the list are written to an XML file for transmission to SEVIS.
4. Select the **SEVIS Transmission and Data Import** tab to view the batch(es) that are ready to transmit to SEVIS.
5. Click **Browse** and find the listed batch ID file.
6. Click **Export** to send the file.

To Import SEVIS data:

1. Navigate to **Daily > Contact Manager > SEVIS Transmission**. The SEVIS Transmission form is displayed.
2. Select the **SEVIS Transmission and Data Import** tab.
3. Select the file to import and click **Import** the student's transmission history is updated. The import also launches an unzip program for zipped files.

Reviewing PDSO SEVIS Data

The Principal Designated School Official (PDSO) is a member of the school administration whose compensation does not come from commissions for recruitment of foreign students. The PDSO is responsible for updating SEVIS to reflect the addition or deletion of all designated officials (DSO) on his or her associated campus. The PDSO also serves as the point of contact on any issues that relate to the school's compliance with customs regulations as well as any system alerts generated by SEVIS.

The PDSO SEVIS Review feature allows the PDSO to review SEVIS data to verify compliance with SEVIS regulations.

To review SEVIS data:

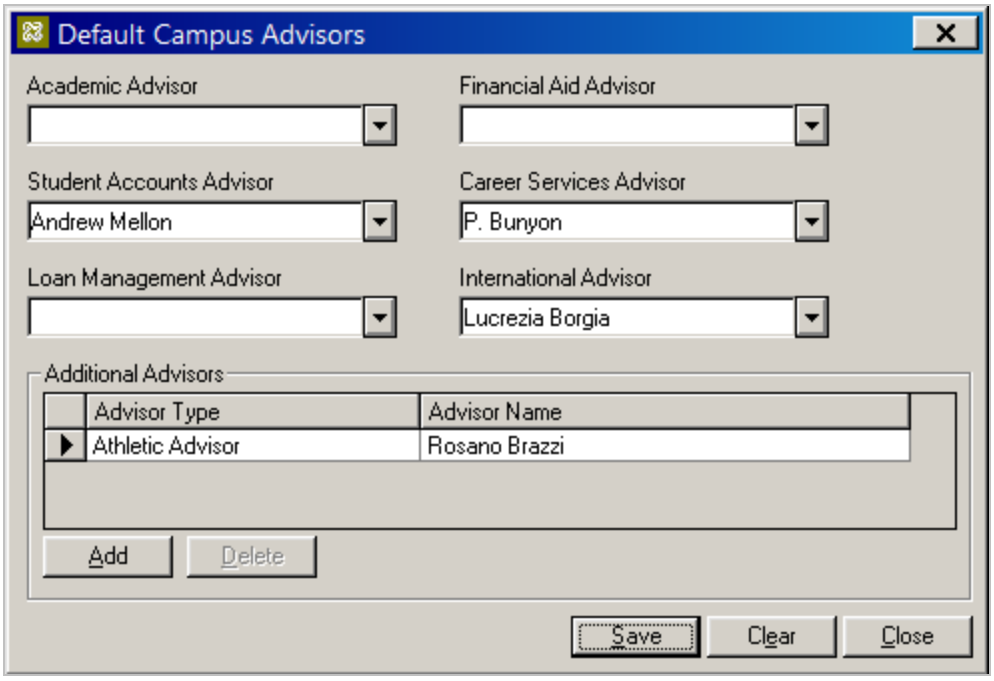
1. Navigate to **Daily > Contact Manager > PDSO SEVIS Review**. The PDSO SEVIS Review form is displayed.
2. Click **Detail** to view further details on the selected student record.
3. Use the **Accept** or **Reject** check boxes to include or exclude specific student records.
4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Designating Default Campus Advisors

Using the Default Campus Advisors form, you can designate a staff member to be the default advisor in each department of the school. When a student is enrolled, the default advisors will be listed on the advisors form. You can change the advisors during the enrollment process if necessary, and if you have the appropriate authority. The advisor drop-down lists are filtered by the student's enrollment campus.

To select default campus advisors for each department:

1. Navigate to **Daily > Contact Manager > Default Campus Advisors**. The Default Campus Advisors form is displayed.



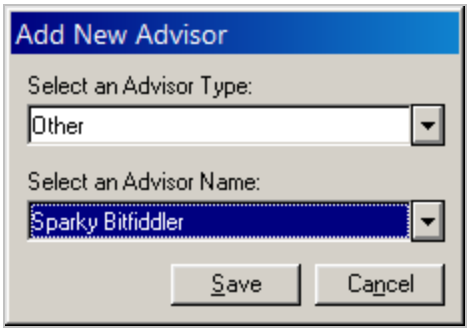
2. Select a staff member on each list.
3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Additional Advisors

The additional advisors come from groups having the Other Advisors Type Code (OTH) related to them. You can have as many additional advisor groups as you like.

To add an advisor:

1. Navigate to **Daily > Contact Manager > Default Campus Advisors**. The Default Campus Advisors form is displayed.
2. In the Additional Advisors frame, click **Add**. The Add New Advisor form is displayed.



3. Select an **Advisor Type**.
4. Select an **Advisor Name**.
5. Click **Save**. You are returned to the Default Campus Advisors form.

To delete an advisor:

1. Navigate to **Daily > Contact Manager > Default Campus Advisors**. The Default Campus Advisors form is displayed.
2. In the Additional Advisors frame, select the advisor row to be deleted.
3. Click **Delete**. The advisor is removed from the grid.

The Advisor Type Codes used in CampusNexus Student are as follows:

- AD
- AM
- FA
- LM
- NI
- OTH
- PL
- SA

Advisor Assignment

Use Advisor Assignment to assign or reassign a group of students to a new advisor. This is useful for allocating a large group of new students across multiple advisors, or to simply reallocate students assigned to an advisor who has left the campus to new advisors. The Contact Manager activities for the original advisor are set to a status of re-assigned, and activities are recreated for the new advisor.

Reassigning Activities

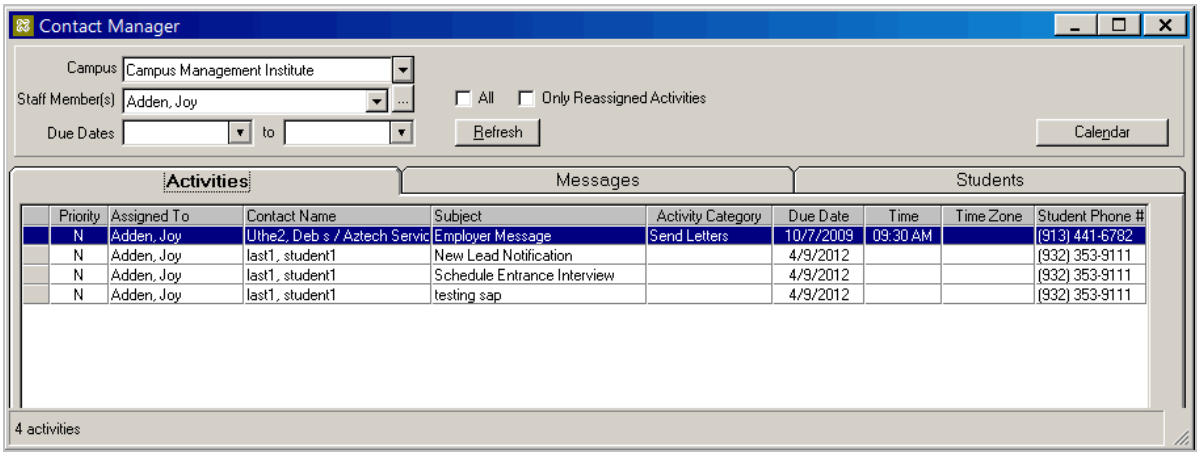
When activities are reassigned from one staff member to another, the new staff member will receive a notification indicating that new activities have been reassigned the next time the staff member logs onto CampusNexus Student.

The notification message, 'Activities have been reassigned to you. Would you like to view them now?' will display only once. Likewise, when activities are reassigned to multiple staff members, the notification message is displayed once to all members with the reassigned activities when they login to the system. This is also true for multiple activities being reassigned to the same staff member, only one notification message will be sent.

If the staff member is logged on to the system and activities are assigned to them and they see the activities without logging off, then the notification message will not display the next time they log on to CampusNexus Student. Finally, if there are no activities reassigned to the staff member, the notification message will not display for them.

When the notification message is presented, the staff member can view the newly assigned activities. If the member decides not to view the reassigned activities and clicks 'No' on the notification message, Contact Manager will display all the activities listed.

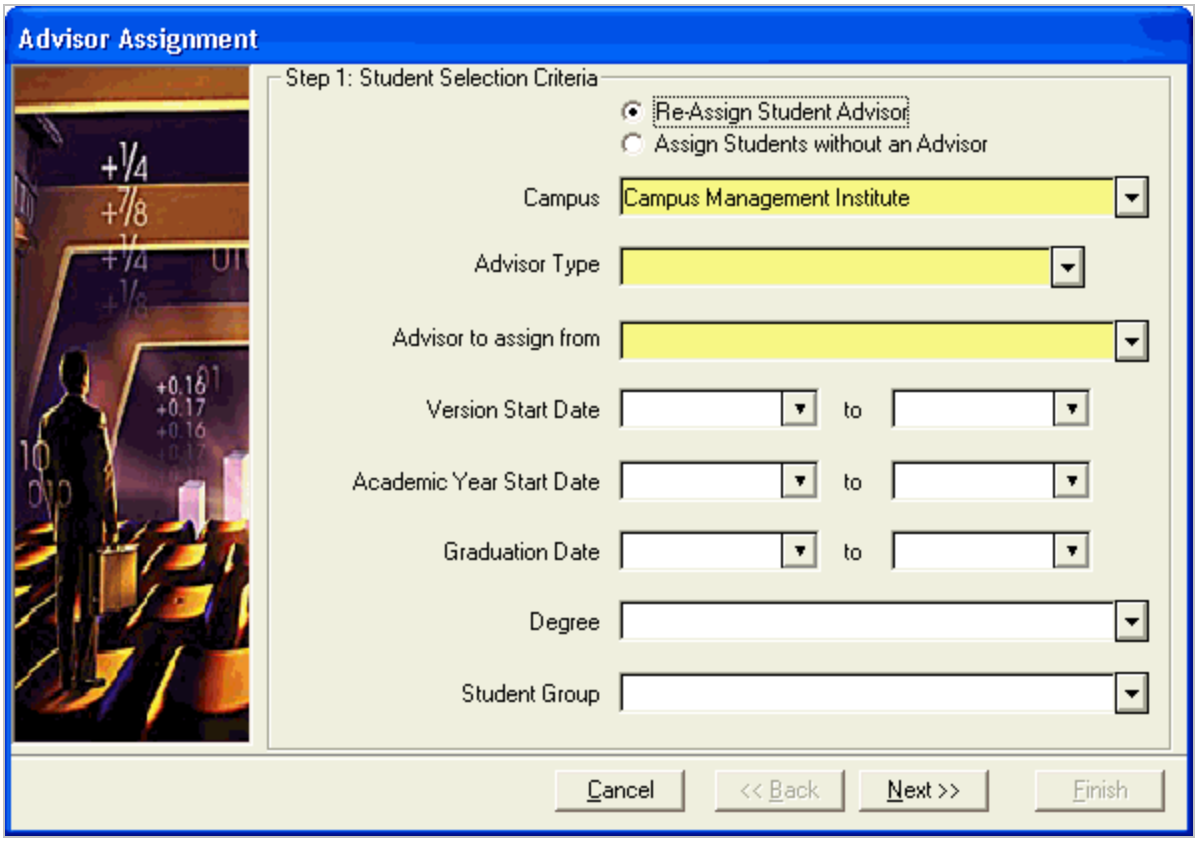
Note: By default, the Only Reassigned Activities check box is cleared. When selected, the check box is displayed only when the staff member selects the Activities tab. On the Activities tab, a new column 'Reassigned Date' has been added.



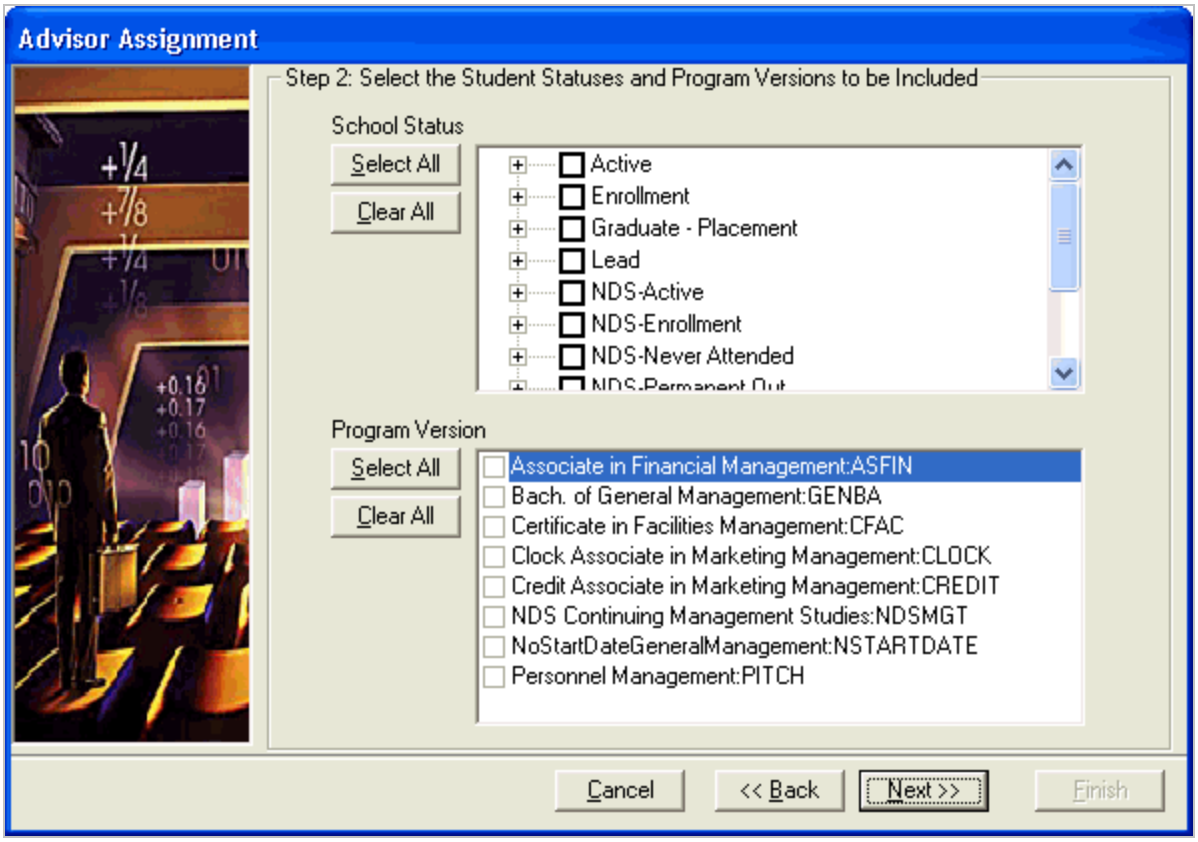
The system tracks all advisor changes to the Admissions audit folder for review. A printable report is available as part of the assignment process.

To assign advisors:

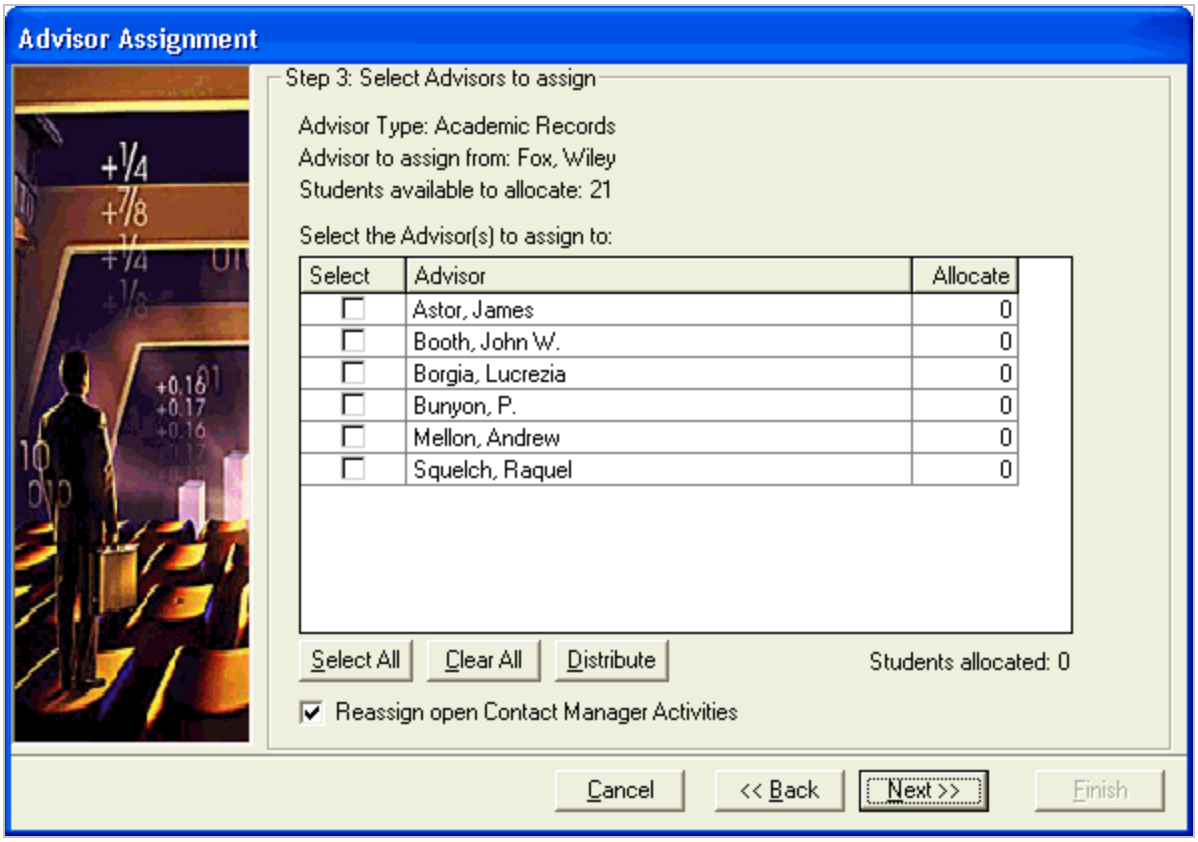
1. Navigate to **Daily > Contact Manager > Advisor Assignment**. Step 1 of the 5-step Advisor Assignment form is displayed. Enter the data on the five forms as required.



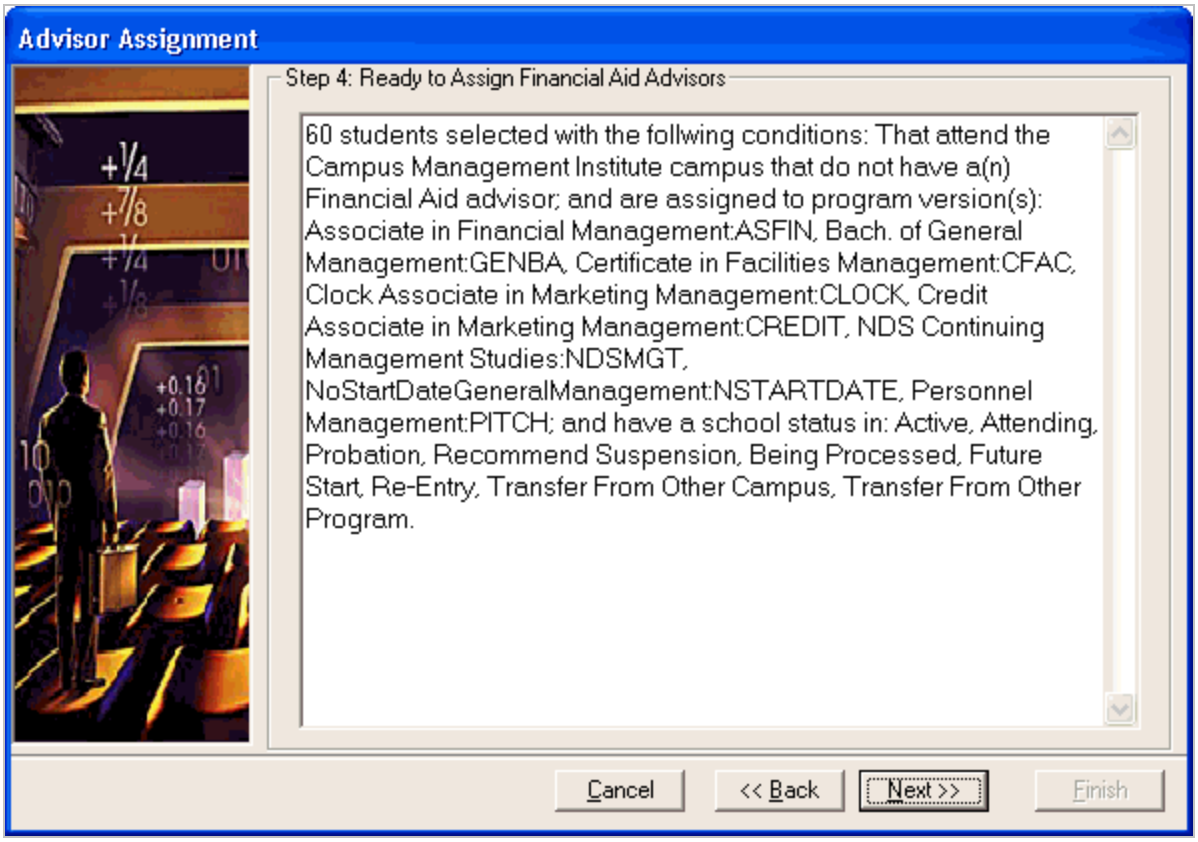
2. Click **Next** to proceed. In Step 2 filter the selected students by statuses and program versions. Click the check boxes to enable a criterion as a filter.



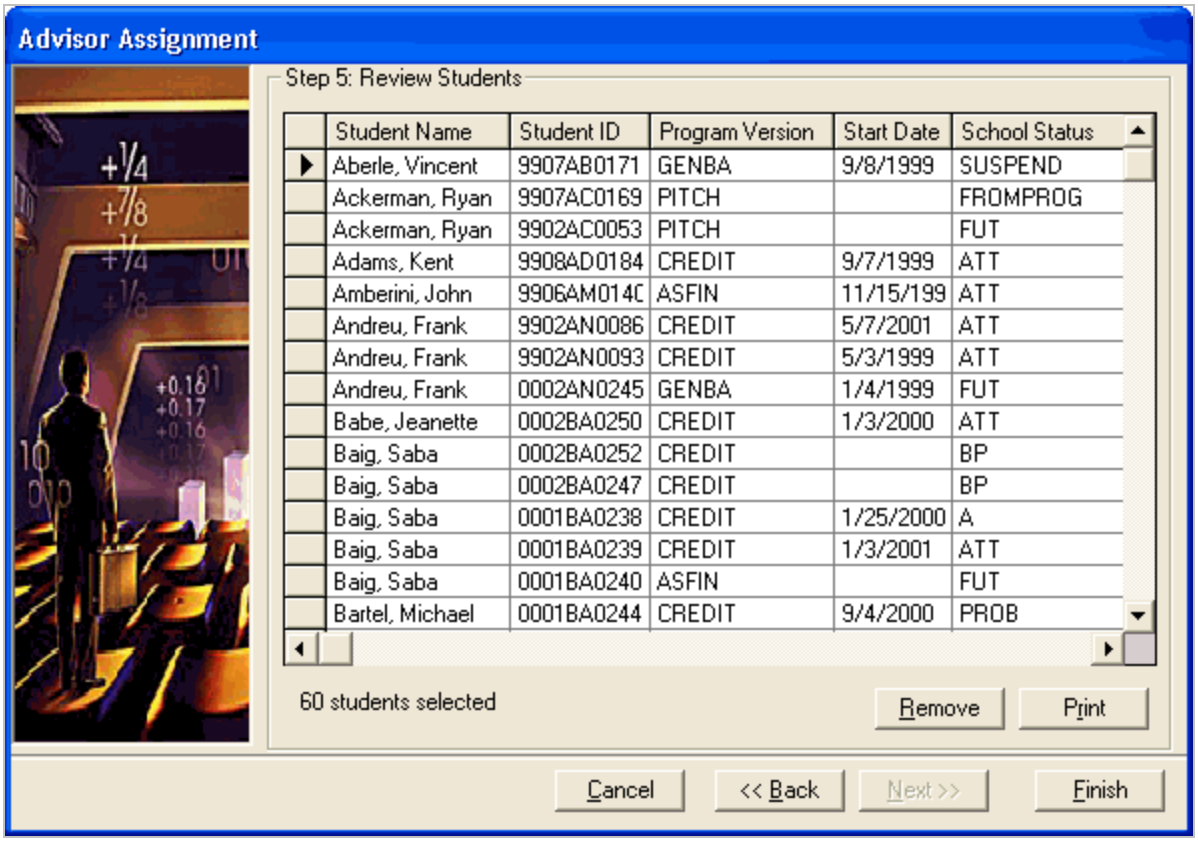
3. Click **Next** to proceed. In Step 3, choose how many students to allocate to each advisor. In the example below, there are 21 students. You could assign five students to each of the first four advisors, or assign all 21 to another advisor, or any other valid combination.



4. Click **Next** to proceed. Step 4 provides a summary of the changes that were made based on the condition chosen in steps 2 and 3. This is a good time to check that the criteria match your requirements. If they do not match what you intended, click **Back** to reset the options as needed.



5. Click **Next** to proceed. Step 5 provides a list of all the students being affected by this reassignment. If students are listed in this group that you do not want to reassign, select them and click **Remove** to remove the selected student from this list. The students' advisor assignment will not be changed.



6. Click **Finish** to complete the assignment process.

Field Descriptions for Advisor Assignment Form - Step 1: Student Selection Criteria

Field	Description
Re-Assign Student Advisor	Enable this option to change the advisors assigned to students.
Assign Students without an Advisor	Enable this option to assign advisors to students who have not yet had advisors assigned.
Campus	Select the campus for which this assignment applies.
Advisor Type	Select the type of advisors from the drop-down list.
Advisor to assign from	If you are assigning new students or student who have no assigned advisors, this field is not displayed. If your are reassigning a student advisor, this field selection is required. Select the individual advisor that is the original advisor whose students are being reassigned.
Version Start Date	Select a date range to filter the list of students by version start. Leaving this field blank excludes no students on the basis of their Version Start Date.
Academic Year Start Date	Select a date range to filter the list of students by Academic Year Start Date. Leaving this field blank excludes no students on the basis of their Academic Year Start Date.

Field	Description
Graduation Date	Select a date range to filter the list of students by Graduation Date. Leaving this field blank excludes no students on the basis of their Graduation Date.
Degree	Select a degree to filter the list of students by the selected Degree. Leaving this field blank excludes no students on the basis of their Degree.
Student Group	Select a student group to filter the list of students by the selected group. Leaving this field blank excludes no students on the basis of their group membership.

Looking Up DNC Numbers

Validate phone numbers by using the CampusNexus Student DNC database. This is helpful for referrals of new students from existing students. Referrals will not exist in the database; however, you can use the National Do Not Call Lookup form to see if a referral's phone number is on the National Do Not Call list.

To look up a referral's phone number:

1. Navigate to **Daily > Contact Manager > National Do Not Call Lookup**. The lookup form is displayed.

2. Type a phone number in the phone number field, and click **Search DNC**. Several results are possible:
    - Phone number does NOT exist in the CampusNexus Student DNC database. The user is advised that the number does not exist in the database. It is permissible to phone this person.
    - Phone number exists in the CampusNexus Student DNC database, but no associated student phone number was matched in CampusNexus Student. The user is advised that the phone number is on the DNC list, but that no associated student data is available. It is not permissible to phone this person using the phone number that appears on the DNC list.
    - Phone number exists in the CampusNexus StudentCampusNexus Student DNC database, and an associated student phone number was matched in CampusNexus Student. Then, one of two options occur:
        - If the student is a new lead and the new lead date is older than the 90-day FTC rule, it is not permissible to phone this person (the user is so warned).
        - If the student is enrolled, active, or on leave of absence (not a new lead), the user is so advised: it is permissible to phone this person.

    Other rules also apply to govern whether it is permissible to phone a student.

If the student has enrolled since the Lead Date, then that student qualifies as someone who is doing business with the school, the 18-month rule applies, and it is permissible to phone the student (even if that student is listed on the DNC list) for up to 18 months after the last voice contact with the student.

If the student has given permission to the school to be called, the student may be called (even if that student is listed on the DNC list).

If the student has not yet enrolled, and no voice contact has been made with the student in the past 90 days (check the Contact History in Contact Manager for that student), then it is not permissible to phone that student. This does not preclude contacting the student by other means (letter, email, house call, etc).

If the student has requested not to be called, then it is not permissible to phone that student.

Agency/Third Party

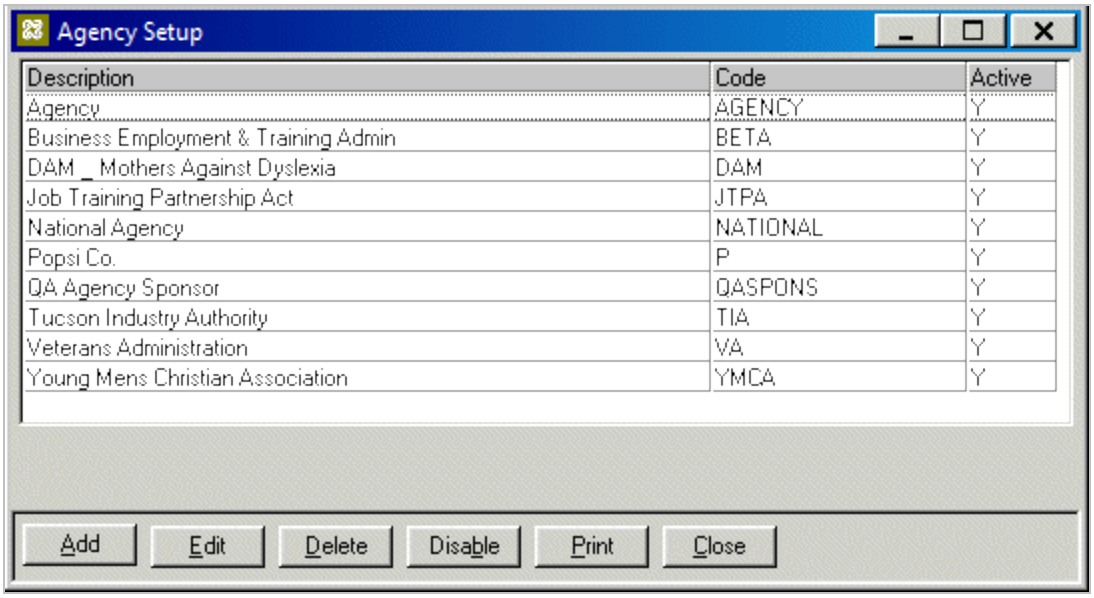
Agency sponsors or third party billing entities are organizations that provide assistance to students. A student may have some special qualification that makes him or her eligible for the sponsor's assistance. Students can be referred to your institution, or you may have special arrangements with agency sponsors to fund qualifying students. An agency or third party can be selected in the lead (student) record.

An agency may have one or more branches with which you school does business. You can set up Agencies and Agency Branches using the Agency Setup form and the Agency Branch Setup form.

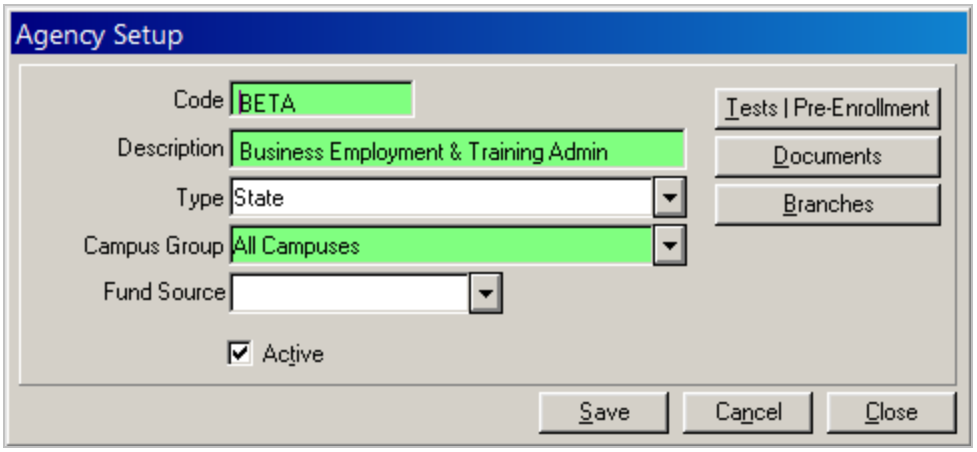
- Use the **Agency Setup** form for the following tasks:
  - Selecting one or more Entrance Tests that are required for enrollment by an agency.
  - Selecting one or more Documents required by an agency. The tracking facilities of CampusNexus Student track the required agency-third party documents.
  - Associating an agency with one or more Branches.
- Use the **Agency Branch Setup** form for the following tasks
  - Viewing, adding, or editing agency branch Contacts.
  - Setting up Payment Information.
  - Associating a list of affiliated Students with the Agency Branch.

To add or edit an Agency sponsor:

1. Navigate to **Daily > Contact Manager > Agency/Third Party**. The Agency Setup grid is displayed with a list of previously set up agencies.



2. Click **Add** to add a new agency sponsor, or select an agency and click **Edit**. The Agency Setup form is displayed.

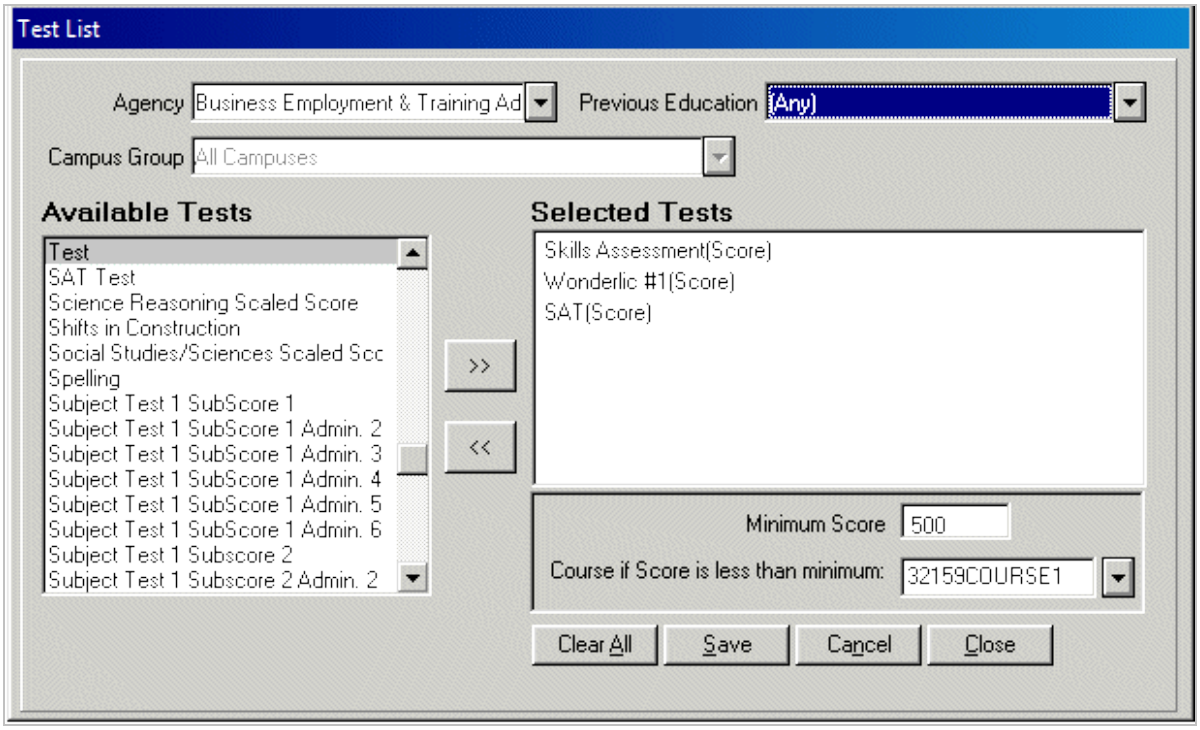


3. Specify a unique **Code**.
4. Enter a **Description**.
5. Select an Agency Type.
6. Select a **Campus Group** that will use the agency record.
7. Select a **Fund Source**. Fund Source is used to connect the agency to a fund source. This field is used to filter agencies when printing invoices.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Click **Save**.

Tests | Pre-Enrollment

To select entrance tests for the agency:

1. Open the Agency Setup form as described above.
2. Click **Tests | Pre-Enrollment**. The Test List form is displayed.



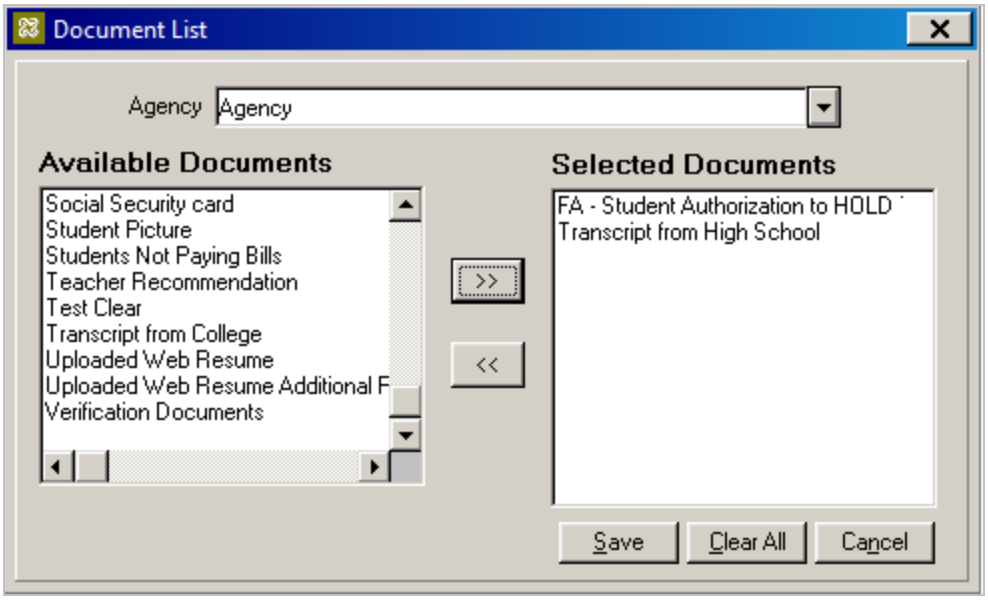
3. Check that the correct **Agency** is displayed in the Agency list box at the top of the form.
4. Select a **Previous Education** option.
5. Select the **Campus Group** if this field is enabled.

   If this form was activated from the **Agency/Third Party** form, the campus group field is disabled because a campus group has already been selected for the agency being edited on the Agency Setup form. The value for the campus group on this form defaults to the one specified on the Agency Setup form.

6. Select a test from the list of **Available Tests** and click to move it to the Selected Tests box.
7. Enter a numeric value for the acceptable **Minimum Score** for the test. The data type of the test selected must be *Score*, otherwise the field is disabled.
8. In the **Course if Score is less than minimum** field, select a course to be assigned to any student who fails to reach the minimum score on the selected test. The course will be added if the course is not already included in the student's course schedule, when the student's score is below the minimum value. The data type of the test must be *Score*, otherwise the field is disabled.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Documents

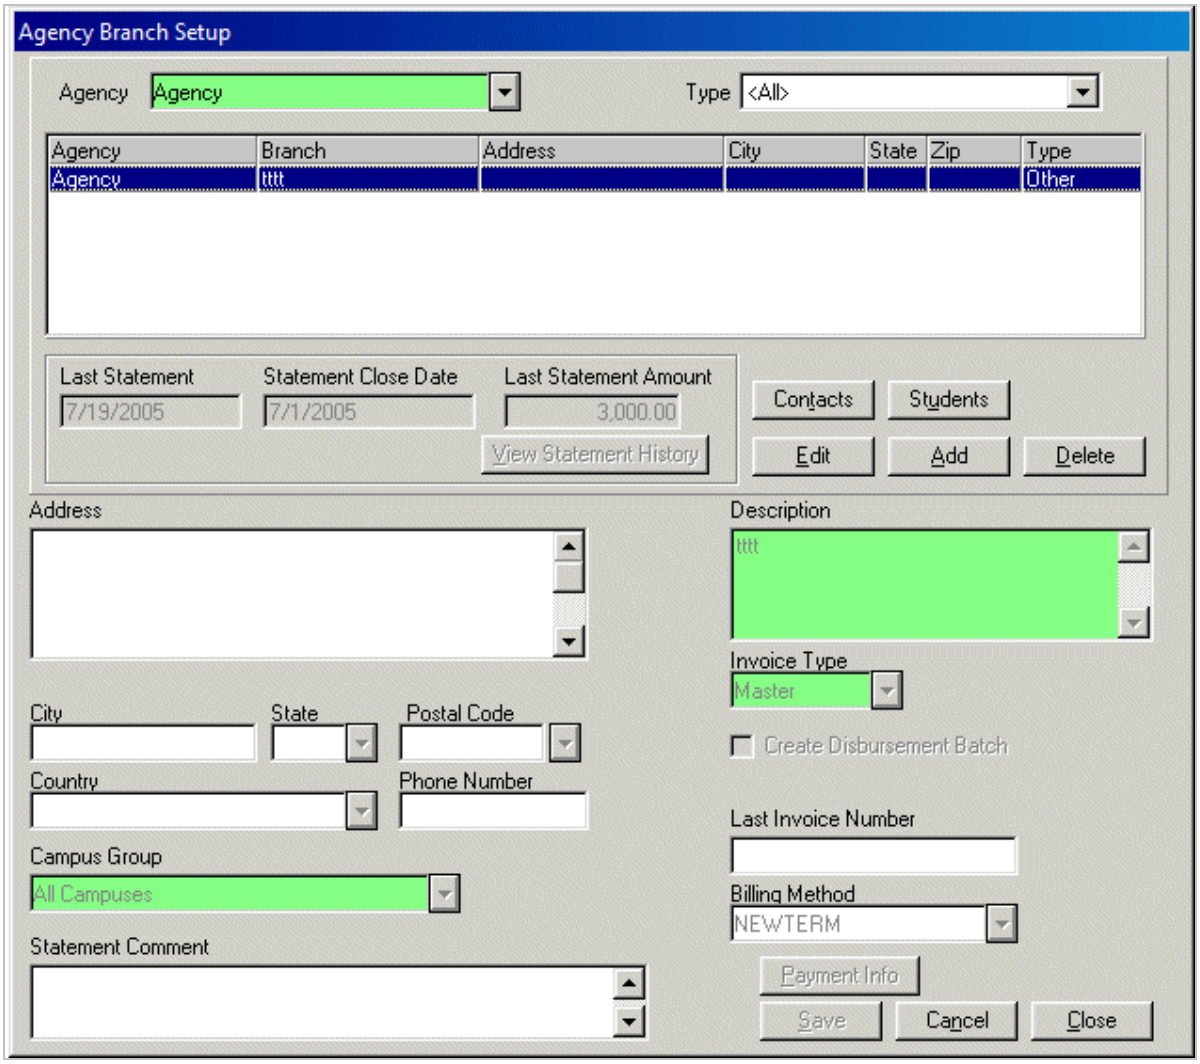
1. Open the Agency Setup form as described above.
2. Click **Documents**. The Document List form is displayed.



3. Check that the correct **Agency** is displayed in the Agency list box at the top of the form.
4. Select a document from the list of **Available Documents** and click to move it to the Selected Documents box.
5. Click **Save**. The Document List form closes.

Branches

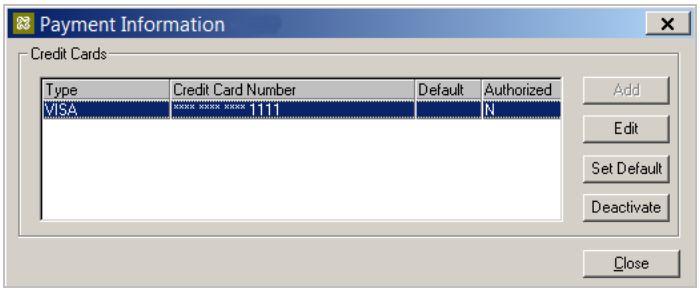
1. Open the Agency Setup form as described above.
2. Click **Branches**. The Agency Branch Setup form is displayed.



3. Check that the correct **Agency** is displayed in the Agency list box at the top of the form.
4. Select an Agency Type to filter the number of agencies displayed.
5. Click **Add** to add a new branch of the agency, or select a branch and click **Edit**.
6. Enter the necessary **Contact** and **Address** data.
7. Enter a **Description**.
8. Select an **Invoice Type** of *Individual* or *Master*. A Master Invoice indicates billing for all students associated with an agency on one invoice (similar to printing a master check).
9. If the agency branch is associated with a group of students and batch disbursements needed, select **Create Disbursement Batch**.
10. If applicable, enter the **Last Invoice Number**.
11. Select the **Billing Method** to be used as the default for any enrollment created from a student with this agency affiliation.
12. Select the **Campus Group** that will use this agency branch.

13. Enter text in the **Statement Comment** box. The text included here is displayed on statements printed for this agency branch.

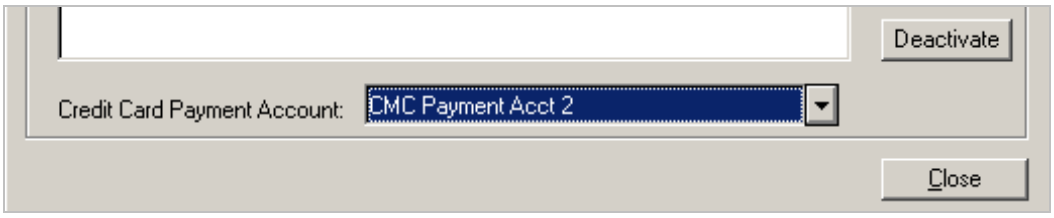
14. If applicable, click **Payment Information**. The Payment Information form is displayed.



The **Authorized** column indicates if a card has been authorized by a credit card processor.

15. On the Payment Information form, click **Add** or select a record and click **Edit**.

Note: If campuses within the campus group associated with the agency branch are configured to Verify Credit Card Payments Posted Using CampusNexus Student (Campus Information - Electronic Processing Tab) and all the campuses use the same payment account, when **Add** is clicked, the user is redirected to the payment gateway provider's hosted page to add the credit card. If the campuses of the campus group are using different payment accounts, you need to indicate which payment account to use to authorize the new credit card in the **Credit Card Payment Account** drop-down field before you can add a credit card.



Edit is disabled . When **Add** is clicked, the user is redirected to the payment gateway provider's hosted page to add the credit card.

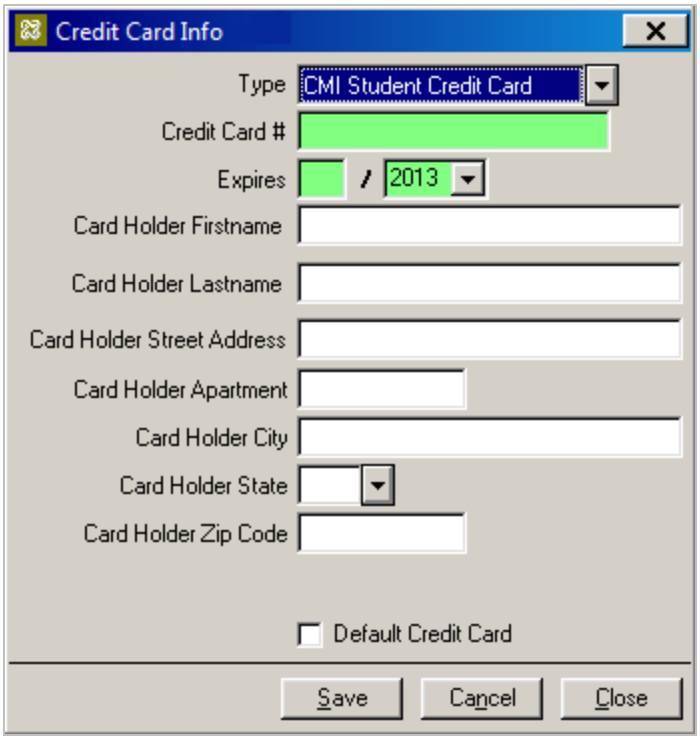
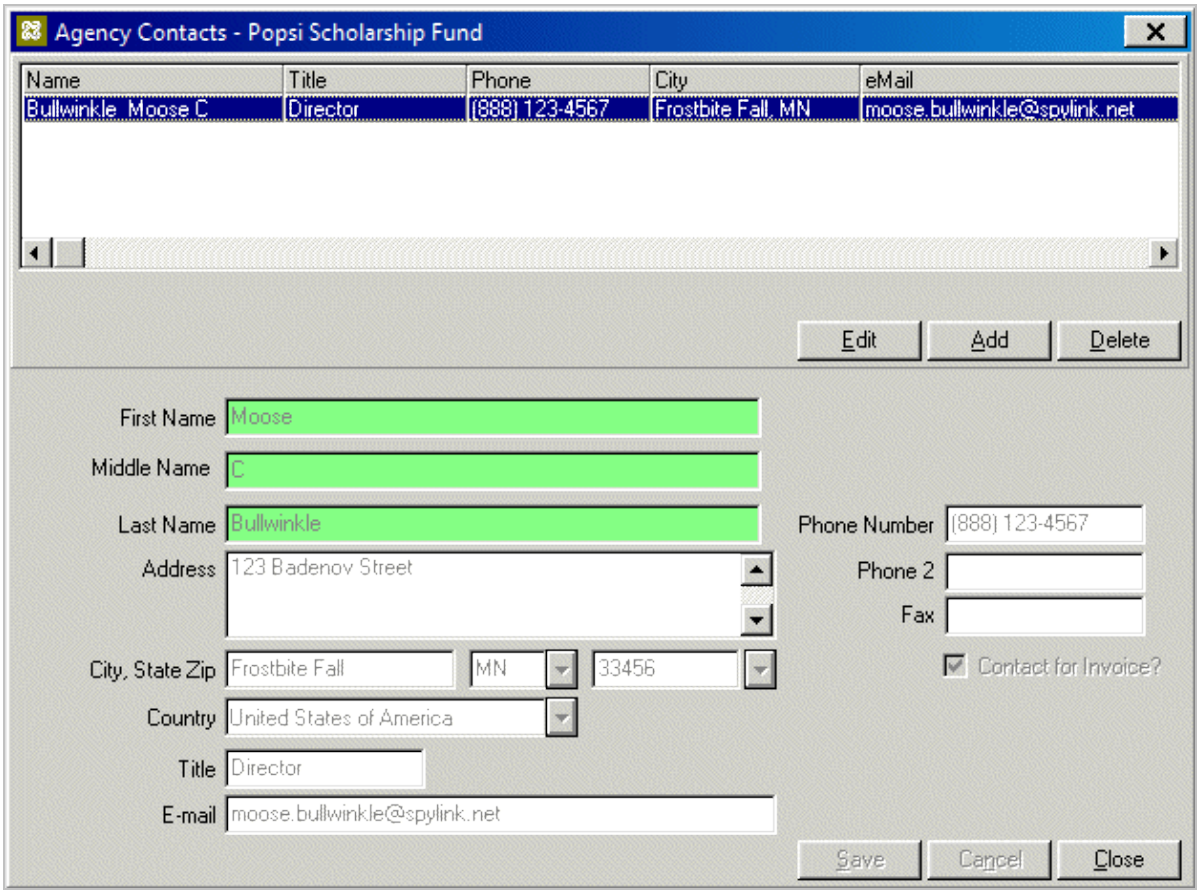
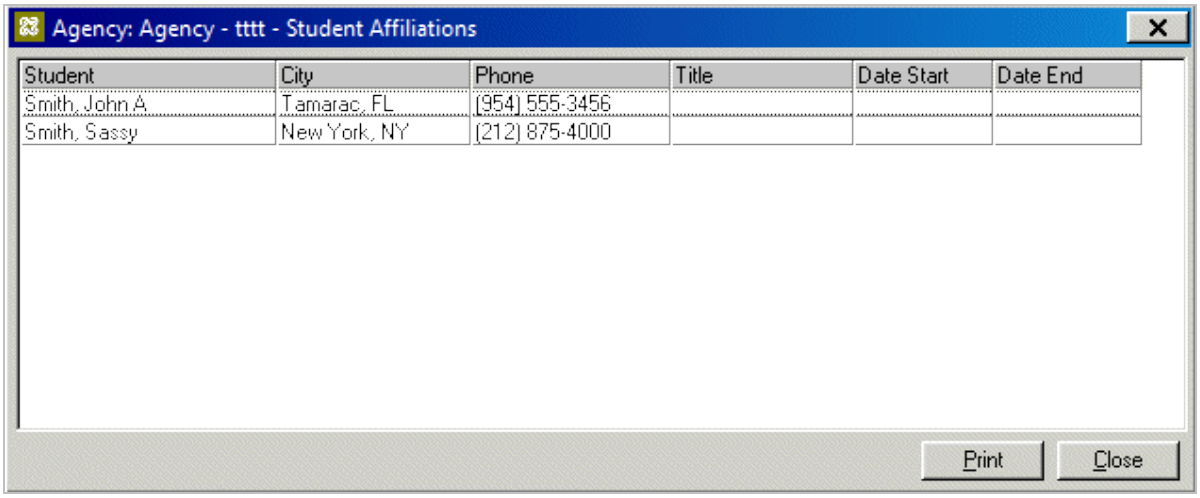
16. When you add or edit payment information for credit card payments, the following form is displayed. Agency payments may only be processed using a credit card. Enter the appropriate information.



17. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.
18. **Close** the Payment Information form to return to the Agency Branch Setup form
19. On the Agency Branch Setup form, click **Contacts**. The Agency Contacts form is displayed.



20. Click **Add**, or select a record and click **Edit**, and enter the appropriate information.
21. Select the **Contact for Invoice** check box if you want the contact name and address to be used on the agency invoice.
22. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Agency Branch Setup form.
23. On the Agency Branch Setup form, click **Students** to see a list of students affiliated with the selected Agency Branch.



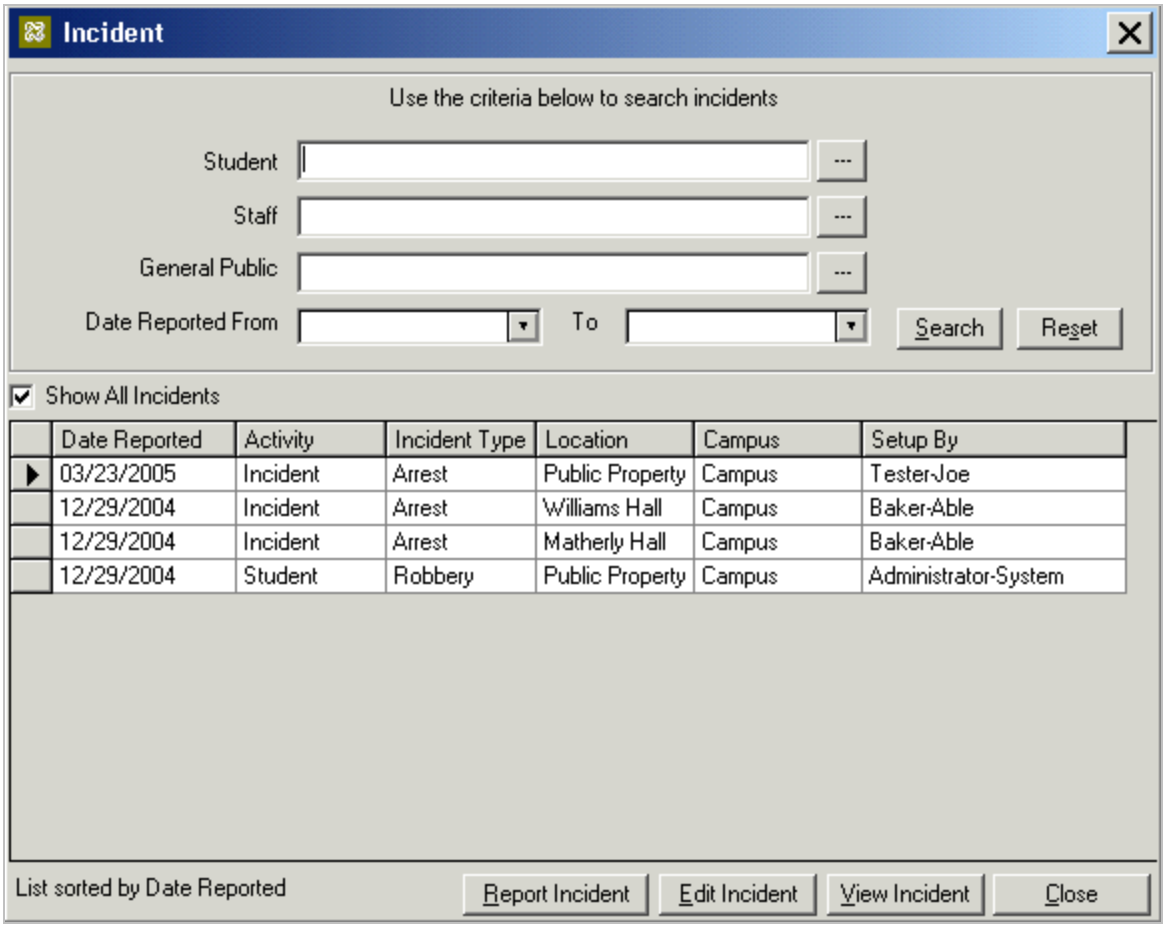
24. Click **Print** on the Agency - Student Affiliations form to print a list of affiliated students.
25. Click **Close** to close the form.

Viewing and Editing Incidents

Users can track student conduct violations that need to be included within the Jeanne Clery Campus Crime Report. You can use the system to view all reported incidents for a campus.

To view all reported incidents for a campus:

1. Log into the campus for which you want to view incidents.
2. Navigate to **Daily > Contact Manager > Incident**. The Incident form is displayed. It lists all reported incidents for the selected campus.



Note: By default, the incident list is sorted by the date when the incident was reported, with the most recently reported incident displayed first.

3. To search for specific incidents already reported, enter the search criteria into one or more of the following fields:

   Student, **Staff**, **General Public**, or **Date Reported From - To**. To select names for a field, click ... to the right of the desired field. A form will appear that will allow a search to be performed for the desired name. Once the name is located, it will be placed in the appropriate field on the **Incident** form.

   Once the search criteria have been entered, select the **Search** button. The incidents that match the search criteria are displayed on the form. You may then select the **Edit Incident** or **View Incident** buttons as desired.

4. Select Report Incident to report a new incident.

5. Select an incident and click **Edit Incident** to modify the details for the selected incident.
6. Select an incident and click **View Incident** to view the details for the selected incident.

Note: A report can be printed from **Reports** > **Contact Manager** > **Incident Details** to display the same information shown on the **Incident** form.

Editing an Incident

You can report incidents as well as edit details of existing incidents. However, a user's ability to report or edit incidents is determined according to the security permissions set by the system administrator.

To edit an incident:

1. Navigate to **Daily > Contact Manager > Incident**. A list of previously saved incidents is displayed.
2. From the list of incidents, select the incident that you want to edit or view.
3. Click the **Edit Incident** button. The Edit Incident button is enabled only when the user has edit permissions. If the Edit Incident button is enabled, clicking the button will display the Report Incident form in edit mode and display details of the selected incident.
4. Enter a **Comment**. Saving this form is allowed only after a comment has been entered. If the Comment field is left blank, then an error message is displayed, and saving will not be not allowed.
5. You can add a student, staff member or member of the general public by clicking on the relevant Search button. A search form is displayed for the entry of search criteria and the subsequent display of one or more names. After locating the desired individual, double-clicking on their name in the search screen will place their name in to the Incident Report.
6. Each Student, Staff or General Public member listed on the report has a check box to the left of their name. When their name was initially added to the report, the check box was selected by default. If the check box is subsequently cleared, the person's name will no longer appear on the printed incident reports.

   Note: A persons name, once saved, will always appear on the Report Incident form whether the check box next to the name is selected or cleared. A person whose name is cleared is no longer deemed to be on the Incident Report. The person's name will not appear on any hard copy reports produced by the Incident Reporting modules of CampusNexus Student. However, the person's name will still appear on the Incident form seen on the computer with the name check box cleared. Names may not be deleted from the Report Incident form at any time.
7. Click **View History** to view a report that summarizes the changes made to the incident report being edited. The report lists the date of each change, who made the change, and the comment entered at the time of the change.
8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

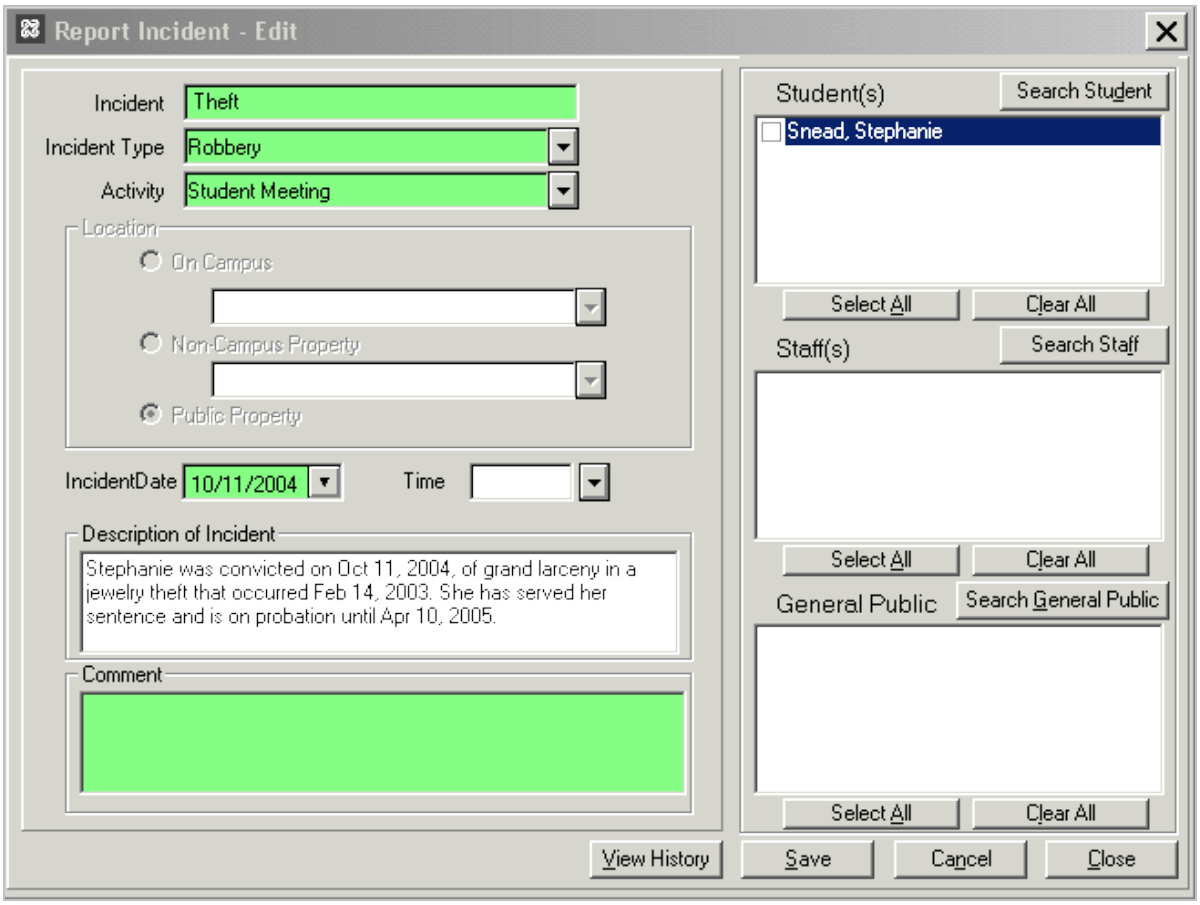
Reporting an Incident

Incidents tracked through the application reflect conduct violations that are periodically reported in the Jeanne Clery Campus Crime report. Users can report and track incidents involving more than one student, staff member or non-campus person (general public).

To edit or view existing incidents, see Viewing and Editing Incidents.

To report a new incident:

1. Select **Daily > Contact Manager** > **Incident**. The Incident form is displayed and displays a list of incidents in a particular campus.
2. Click the **Report Incident** button on the Incidents form. The Report Incident form is displayed.



Note: Create an activity (under Lists > Contact Manager > Activities) so that it appears on the Report Incident form (Activity list box) and can be selected thereafter.

3. Provide a code for the incident in the **Incident** field.
4. Select the **Incident Type** from the drop-down menu provided.
5. Using the radio buttons in the Location area of the form, chose one of **On Campus**, **Non-Campus Property** or **Public Property**. If Campus or Non-Campus Property are selected, chose an item from the associated drop-down box.

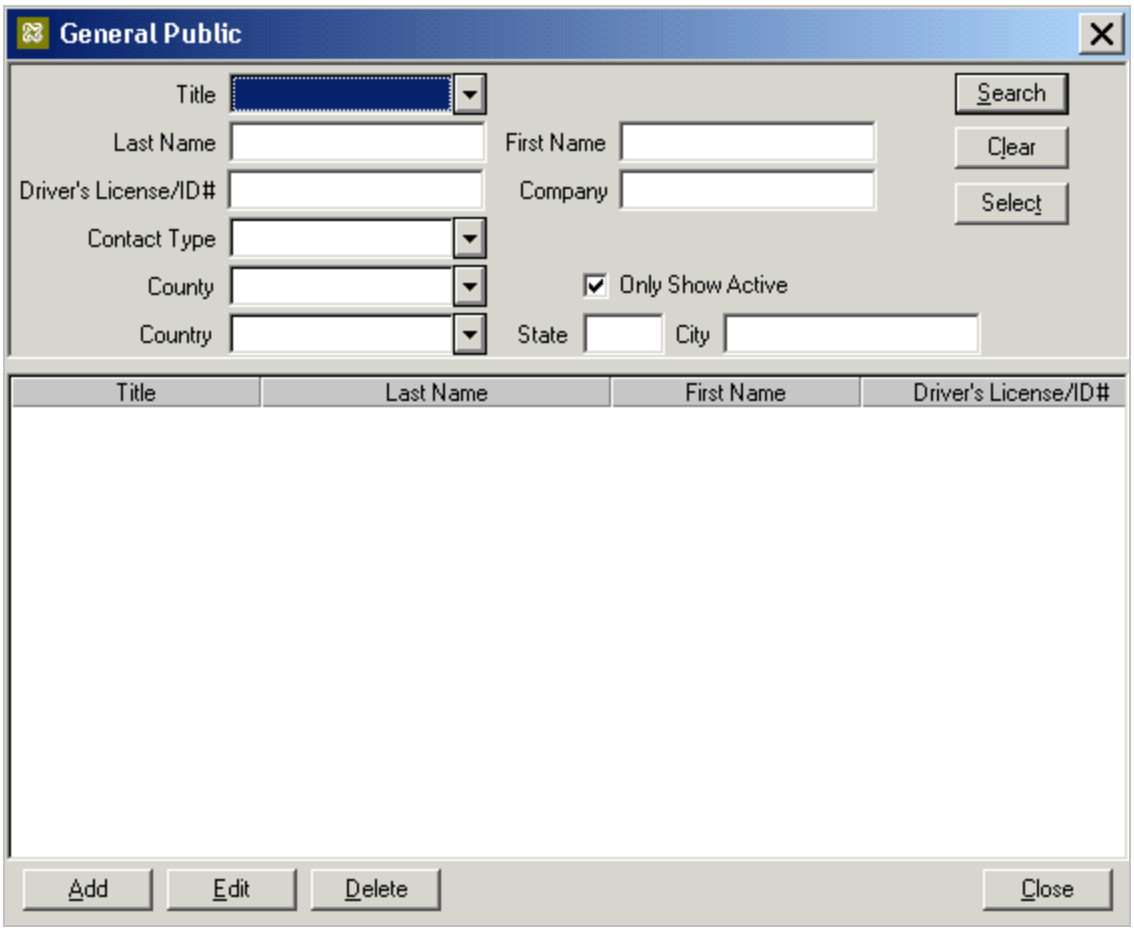
Note: To have the location drop-downs populated, you need to configure Lists > Student Services > Locations.

6. Select the date of the incident from the calendar provided in the **Date Start** field.
7. Select the **Time** that the incident occurred.
8. Provide a brief **Description of the Incident**.
9. Depending on the parties involved in the incident, click the **Search Student, Search Staff,** or **Search General Public** button(s) to find and then associate a student or students with the reported incident.

   The Search Student button displays the form that allows searches of all students:

   The Search Staff button displays the form that allows for staff member searches:

   The **Search General Public** button displays the form that allows a search of existing names contained in the General Public database.



10. For any of the search forms shown above, clicking on the name of a person found by the search will cause their name to be placed in to the Incident Report in the appropriate category (Student, Staff or General Public)
11. If, after searching the General Public database the individual is not found, click the **Add** button at the bottom of the General Public search form. A new form will appear in which information about the individual such as **Name**, **Title**, **Contact Type**, **Address**, **Drivers License** etc may be entered.

    Once the required information is entered it may be saved in to the database by clicking the **Save** button.

Note: Click **Select All** or **Clear All** to select or deselect all individuals listed on the incident report

12. Once names of students, staff or general public have been entered in to the report form ensure that the names have been selected by selecting the check box next to the name. If an individual should not be on the incident report the name may be cleared. When cleared, the name will remain on the incident report form but will not appear on any of the incident reports produced by CampusNexus Student.
13. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

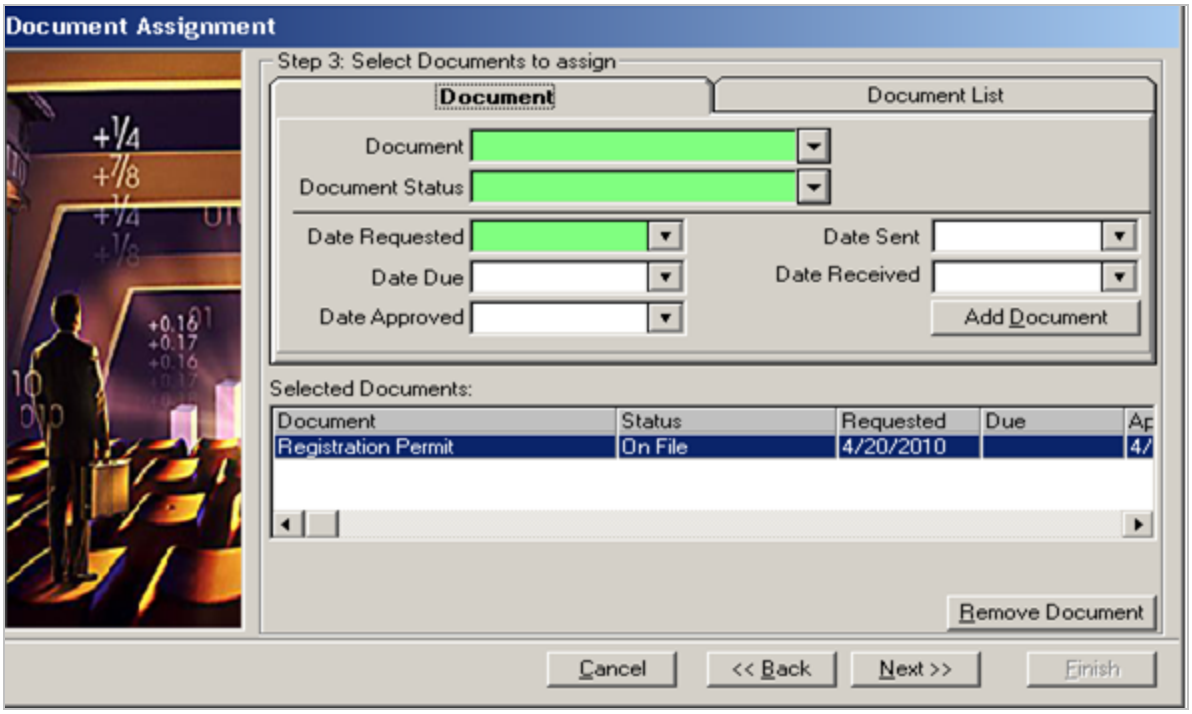
Assigning Documents

Required documents are assigned to students by program as part of the enrollment process. For details, please refer to Document Lists. Documents can also be assigned to groups of students at any time using the Document Assignment tool.

To assign documents to student groups:

1. Navigate to **Daily > Contact Manager > Document Assignment**. Step 1: Student Selection Criteria is displayed.
2. Use the drop-down lists to select a Campus, Version Start Date Range, Academic Year Start Date Range,, Graduation Date Range, Degree and Student Group.
3. Click **Next** to proceed. Step 2: Select the Student Statuses and Program Versions to be Included is displayed.

   Use the check boxes to select the School Statuses to include or click **Select All** or **Clear All**.
4. Use the check boxes to select Program Versions to include or click **Select All** or **Clear All**.
5. Click **Next** to proceed. Step 3: Select Documents to Assign is displayed.

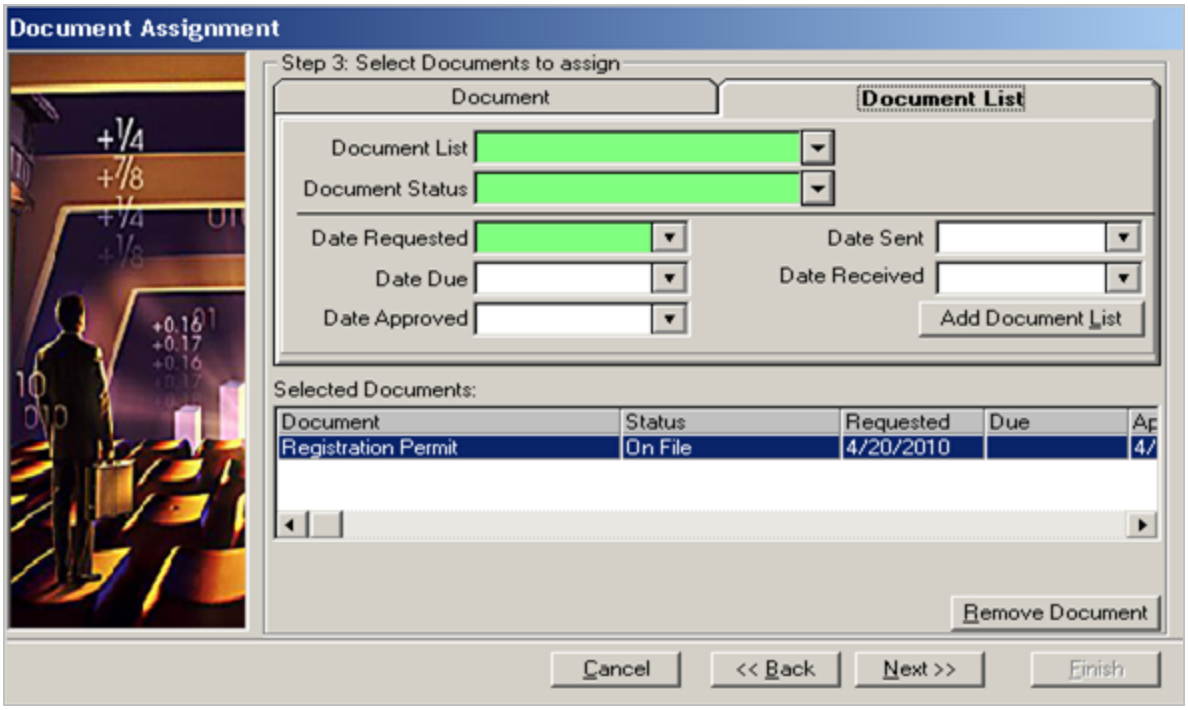


Complete the fields as follows:

- **Document**: Select a document to assign to the group.
- **Award Year**: This field is available only if the document you have chosen is an award-year specific Financial Aid document. Choose an award year from the list.
- **Document Status**: Choose the present status for the document. Options are On File, Required, and Received but Rejected.
- **Date Requested**: Select the date on which the document was requested.

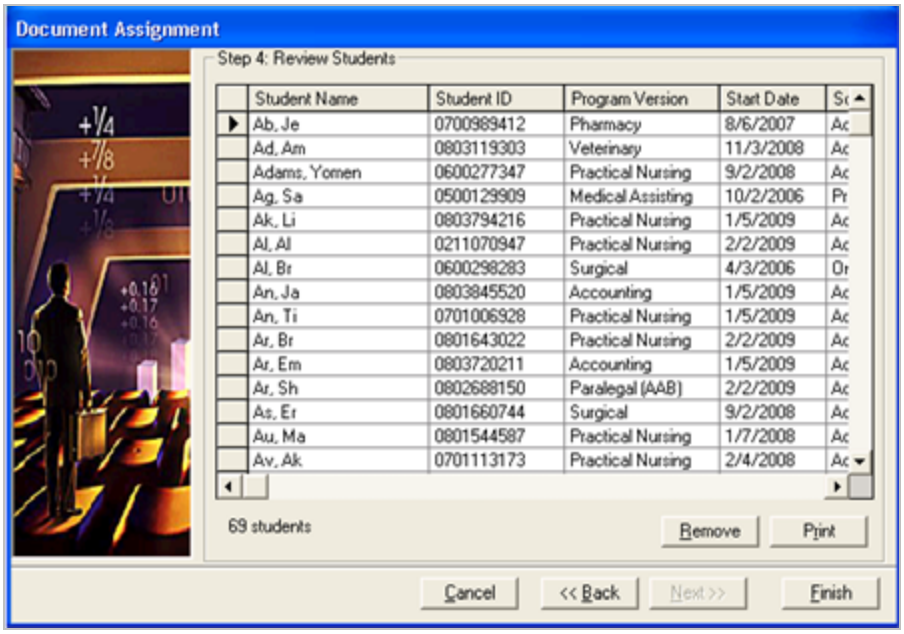
- **Date Sent**: Select the date on which the document was sent to your school.
- **Date Due**: Select the date on which the approved document must be on file with your school.
- **Date Received**: Select the date on which the document was received by your school.
- **Date Approved**: Select the date on which the document was approved by your school.

6. Click **Select Document**. The document is displayed in the Selected Documents grid.
7. To remove a document from the grid, select the document and click **Remove Document**.



This tab functions the same way as the Document Tab. The only difference is that the user can select a Document List. Document Lists are packages of documents, set up in Document Lists. Examples of document lists could be Financial Aid Documents or Enrollment Documents.

8. Click **Next** to proceed. Step 4: Review Students is displayed. The grid displays all students who meet the filtering criteria specified in previous steps. The number of students in this batch is displayed in the lower left of the form. To remove a student from this list, select the student in the grid and click **Remove**.



9. Click **Print** to generate the Document Report. This report features the Students' Names, ID, Program Version, Start Date and Graduation Date.
10. Click **Finish** to save your document assignments.

Modifying Batch Activities

You can modify batch activities in Contact Manager. You can also reassign activities from one staff member to one or more other staff members. You can change, delete or update activities, activity type, and/or activity status. A notification is displayed to the user to confirm the batch action in progress and offer an option to cancel out of the action.

Batches of activities may be selected for modification from multiple campuses. Students may be filtered on the basis of Student Groups, Zones and States.

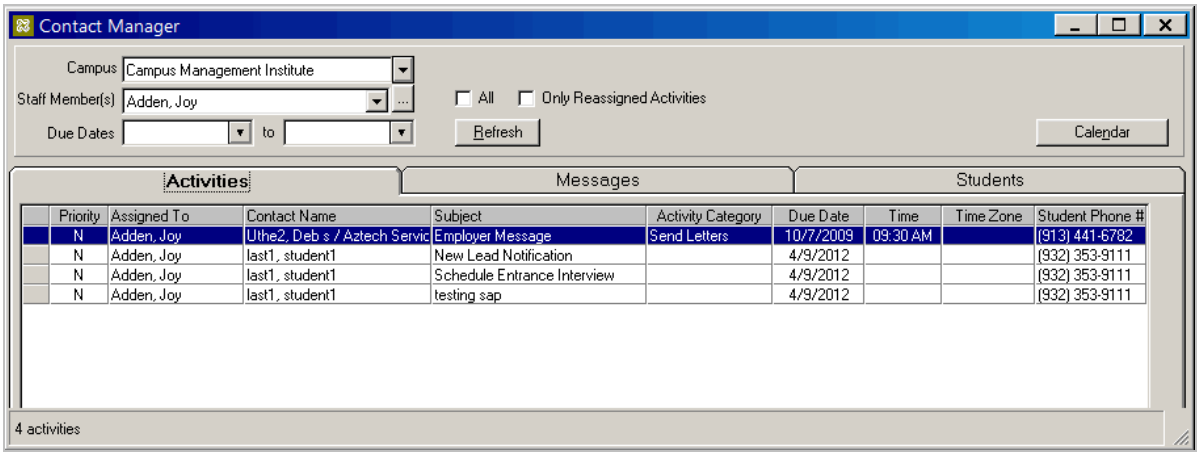
Note: To delete batch activities in Contact Manager, view this topic.

When activities are reassigned from one staff member to another, the new staff member receives a notification message. The notification message, 'Activities have been reassigned to you. Would you like to view them now?' is displayed only once when the staff member logs in to CampusNexus Student. Likewise, when activities are reassigned to multiple staff members, the notification message is displayed once to all members with the reassigned activities when they log in to the system. Only one message is displayed when multiple activities are reassigned to the same staff member.

If the staff member is logged on to the system and activities are reassigned, the staff member sees the activities without logging off. The notification message will not appear the next time the staff member logs on to CampusNexus Student. If no activities are reassigned to the staff member, the notification message is not displayed.

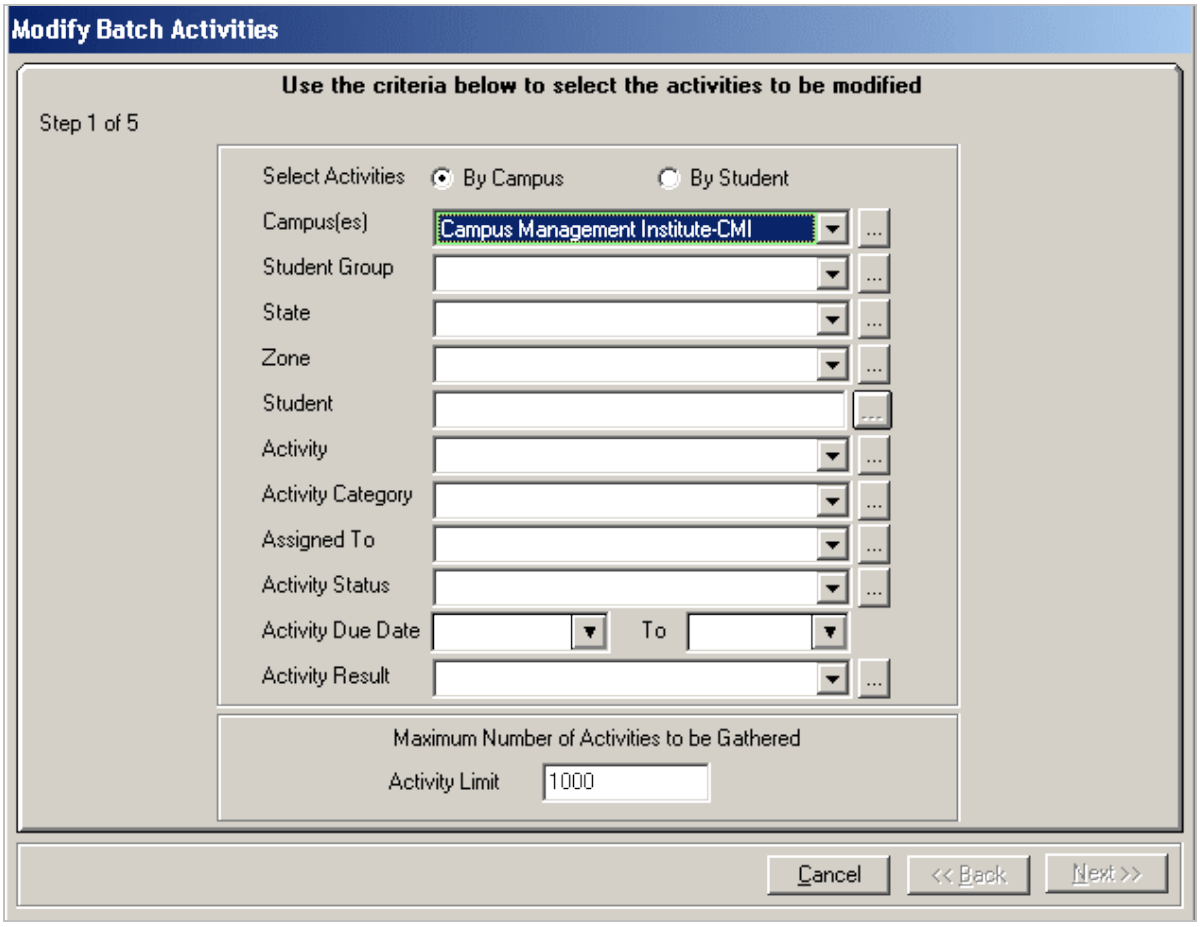
When the notification message is presented, the staff member can view the newly assigned activities. If the staff member decides not to view the reassigned activities and clicks 'No' on the notification message, Contact Manager displays all the activities listed.

Note: By default, the 'Only Reassigned Activities' check box is cleared. When selected, the check box is displayed only when the staff member selects the Activities tab. On the Activities tab, a new column 'Reassigned Date' has been added.



To modify activities in a batch mode:

1. Navigate to **Daily > Contact Manager > Modify Batch Activities**. The **Modify Batch Activities wizard** is displayed. Select the applicable option(s) to select the activities to be modified on the Step 1 form and click **Next**.



a. The **Select Activities** radio button allows activities to be selected **By Campus** or **By Student**. When **By Campus** is selected, the **Student** select box is disabled. When **By Student** is selected, the **Campus(es)**, Student **Group, Zone**, **State**, and **Zone** is disabled.

b. One or more **Campus** may be selected through the use of the multi select control. The list of campuses is populated based upon the campuses to which the user has been granted access.

c. One or more **Student Group** may be selected through the use of the multi select control.

d. One or more **State** may be selected through the use of the multi select control.

e. One or more active **Zone** may be selected through the use of the multi select control. The list of zones will be populated based upon the campus(es) which the user had previously selected.

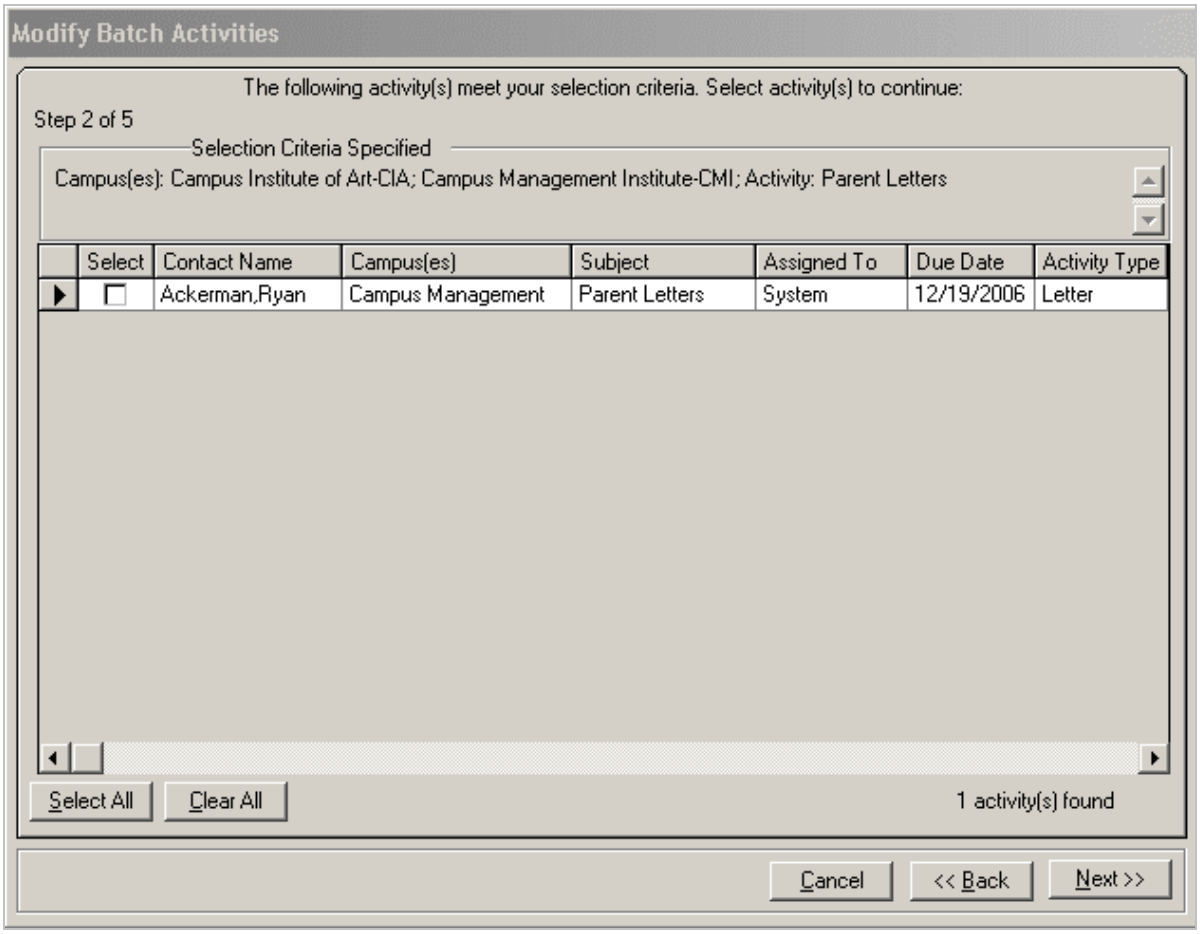
f. One or more **Activity** may be selected through the use of the multi select control. If the activities were selected **By Campus**, then the activities from the selected campuses are shown. If the activities were selected **By Student**, then activities for the selected student are shown. Only activities that are contained within the activity policy defined for the user are shown.

g. The **Assigned To** list is based upon the **Select Activities** choice. If **By Campus** was selected, only staff associated with the selected campus(es) is shown. If **By Student** is selected, only staff who have been associated with the student's activities are shown.

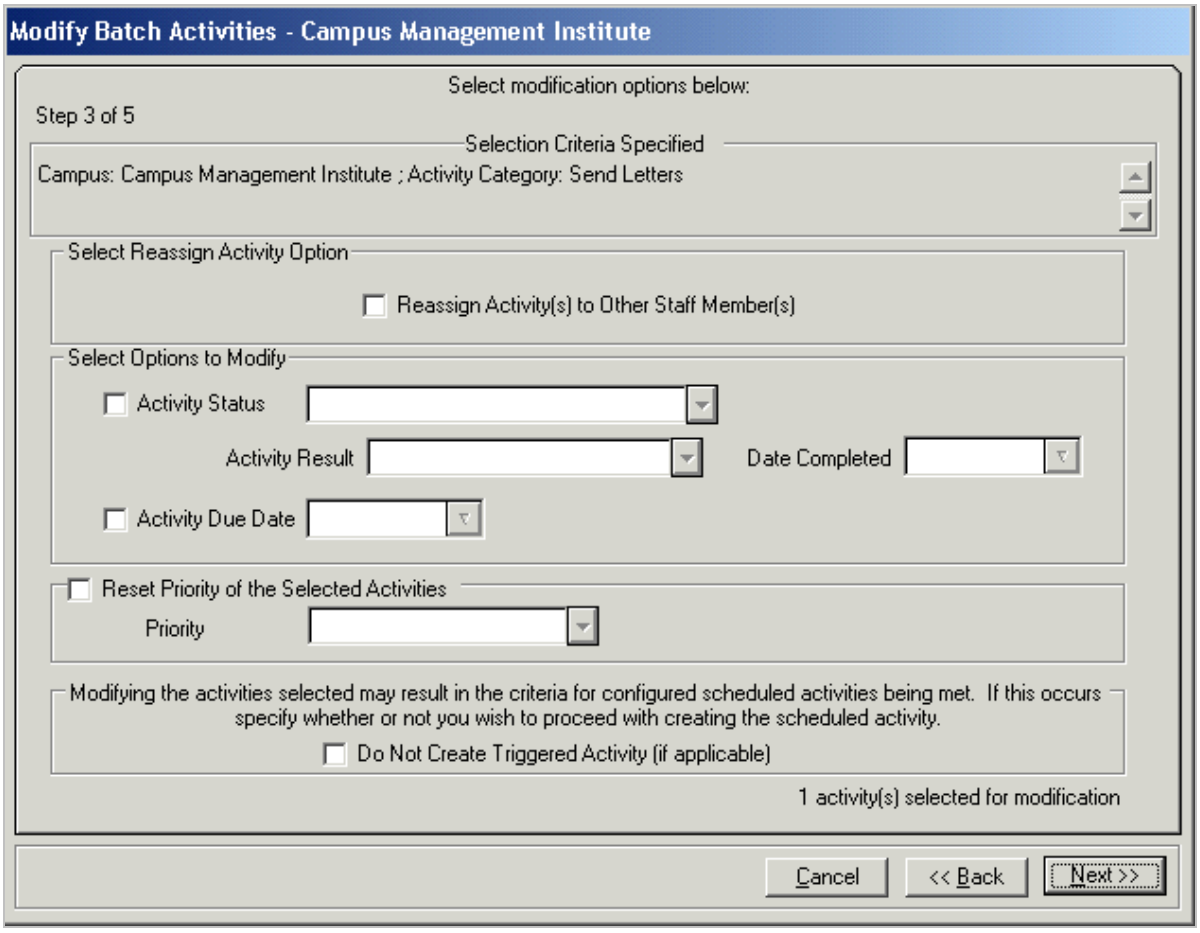
h. The **Activity Status** and **Activity Result** selection lists shows all available records when selecting activities

By Campus. If selecting activities **By Student**, records belonging to the activities of the selected student are shown.

2. Step 2 of the wizard is displayed. The entries displayed reflect the selections made from Step 1. Select the listing (s) to modify and click **Next**.

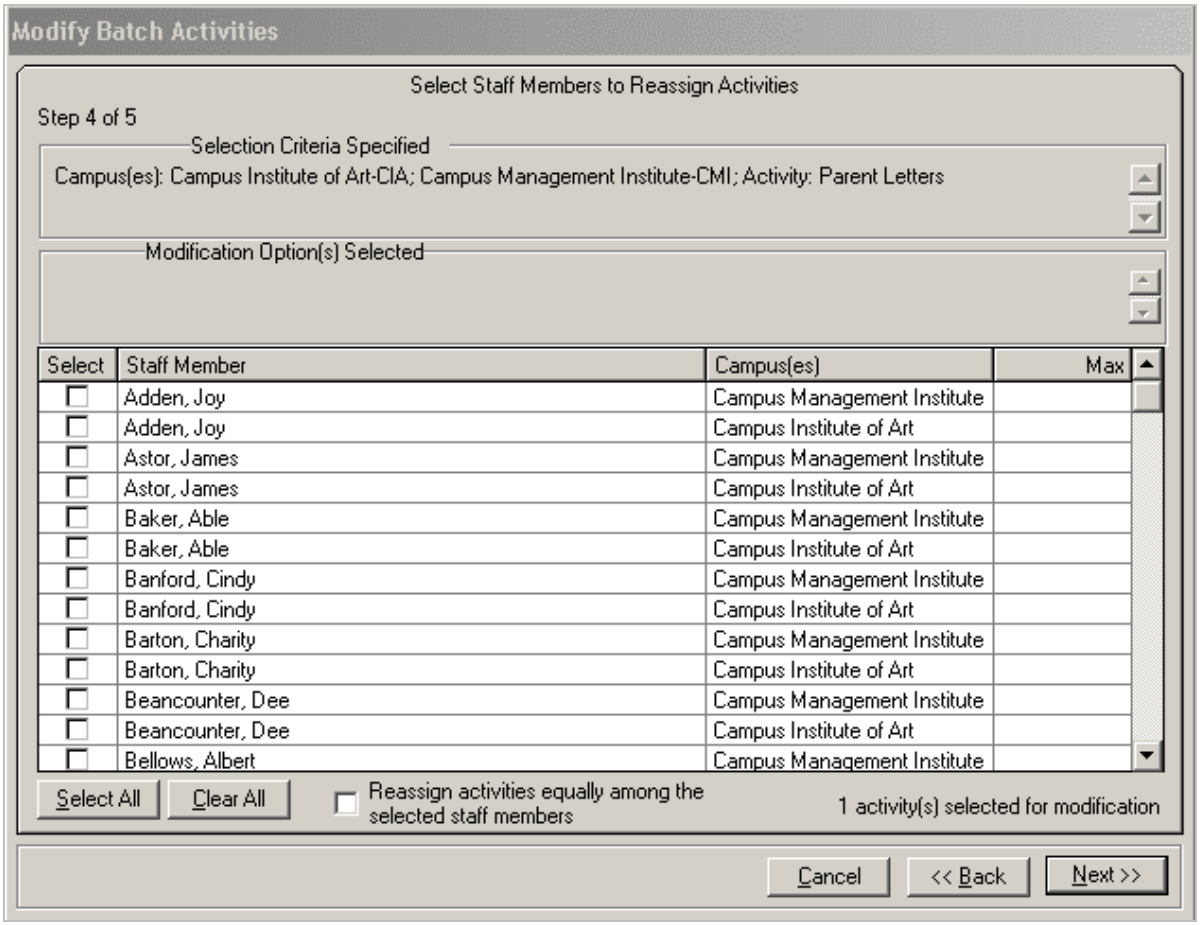


3. In Step 3 of the wizard, make your selection(s) and click **Next** .



4. Step 4 of the wizard is displayed, depending on the selection(s) made in Step 3.

   If the **Reassign Activity(s) to Other Staff Member(s)** option was selected in Step 3, a message is displayed stating *'You may specify other criteria and/or click Next to specify staff members to reassign activities to.'* Click **OK** and click **Next**. A list of Admissions Reps to whom activities may be reassigned and who belong to the campuses selected in Step 1 is displayed in Step 4. Select the staff member(s) to whom the activities are reassigned and click **Next**.

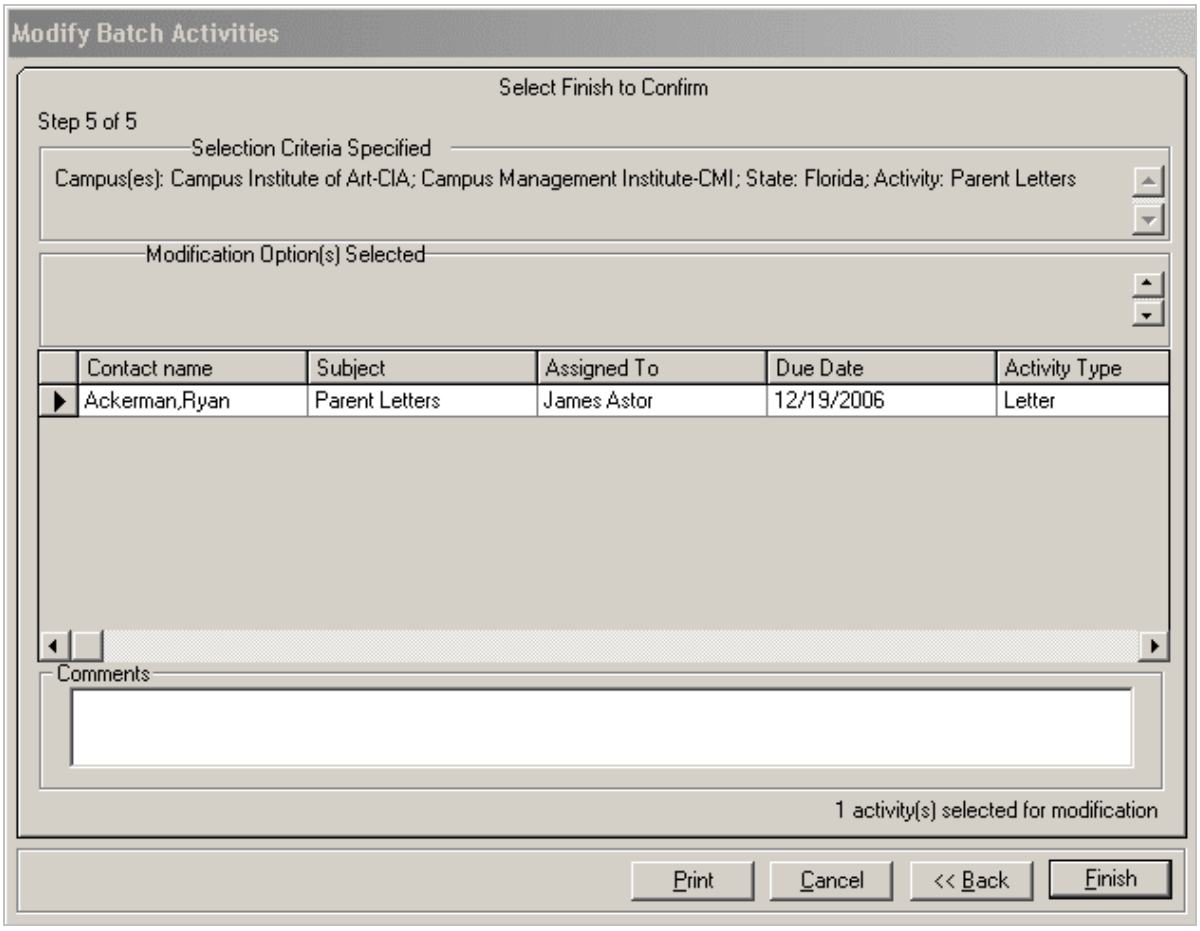


When the **Next** button is clicked, CampusNexus Student checks for:

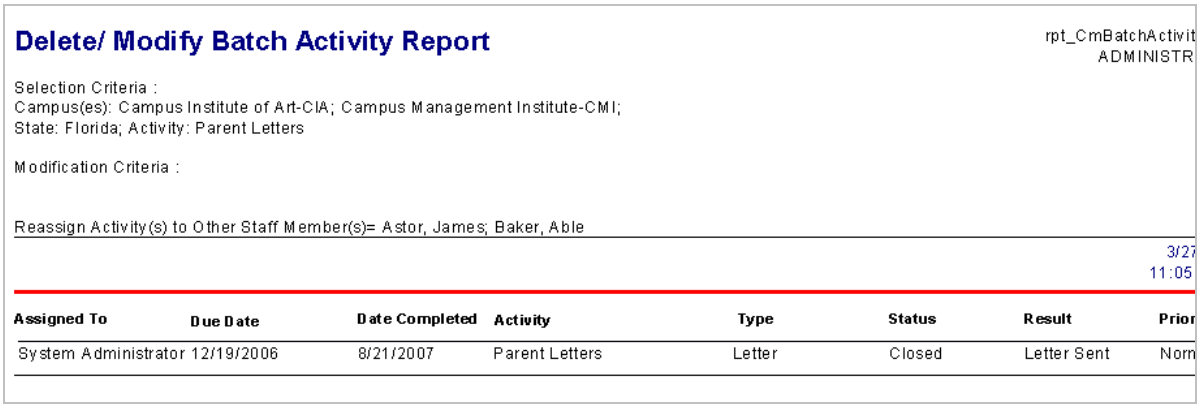
- at least one staff member selection
- comparison of total activities assigned and total activities selected
- any campus corresponding to which no assignment of staff is done OR
  fewer activities assigned to total staff members of corresponding campuses than the total activities for each campus.

If any of the checks above fail, the following message is displayed: 'Activities selected are more than the activities distributed among the selected staff member of selected activity's campuses. Please redistribute activities'.

5. If **Closed** was selected from the **Activity Status** drop-down list, the **Activity Result** and **Date Completed** fields become enabled, otherwise the **Activity Due Date** drop-down list becomes enabled and available for selection. Step 5 is displayed when **Activity Status** is selected in Step 3.
6. Select the **Reassign activities equally among the selected staff members** option if desired.
7. Step 5 of the wizard is displayed. Your selections appear on the top of the screen. Add any comments that you would like to make in the **Comments** field and click **Finish**, or click **Print** to print a report.



When you select the **Print** option, the following report is displayed.



Delete/ Modify Batch Activity Report

rpt_CmBatchActivit
ADMINISTR

Selection Criteria :
Campus(es): Campus Institute of Art-CIA; Campus Management Institute-CMI;
State: Florida; Activity: Parent Letters

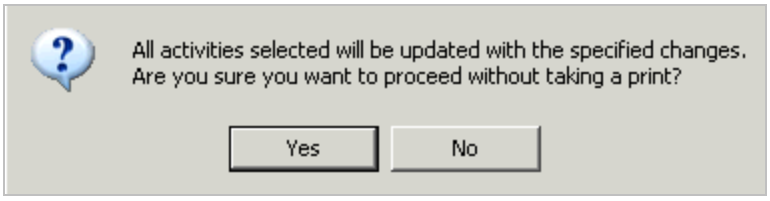
Modification Criteria :

Reassign Activity(s) to Other Staff Member(s)= Astor, James; Baker, Able

3/27
11:05

Assigned To	Due Date	Date Completed	Activity	Type	Status	Result	Prior
System Administrator	12/19/2006	8/21/2007	Parent Letters	Letter	Closed	Letter Sent	Norm

The following message is displayed.



Click **Yes** to continue processing, click or **No** to return to the previous screen and click **Print** to print the report.

8. When activities are being reassigned across multiple campuses, the system only reassigns activities to staff members of the student's campus only. When **Finish** is clicked and multiple campuses and staff are involved, the distribution occurs as follows:

Activities to be Modified

Activity	Student's Campus
A	1
B	2
C	3
D	1
E	2
F	3
G	1
H	2

Staff to be Reassigned

Staff ID	Campuses Selected	Max
1	1,2,3	4
2	1,2	3
3	3	1

Final Distribution made by 'Modify Batch Activities' wizard

Staff ID	Total Number of Activities	Logic
1	4 (A,B,C,D)	As Staff 1 is in 3 campuses, for each campus 1st activity is assigned to Staff 1
2	2 (E,G,H)	As Staff 2 is in 1 & 2 campuses only, activities from Campus 1 & 2 will be assigned. Since first activities for both campuses were assigned to Staff 1, the next activity for Campuses 1 & 2 will assigned to Staff 2.
3	1, (F)	As Staff 3 is in Campus 3, activity from Campus 3 will be assigned to Staff 3.

9. A confirmation message is displayed. Click **OK**.

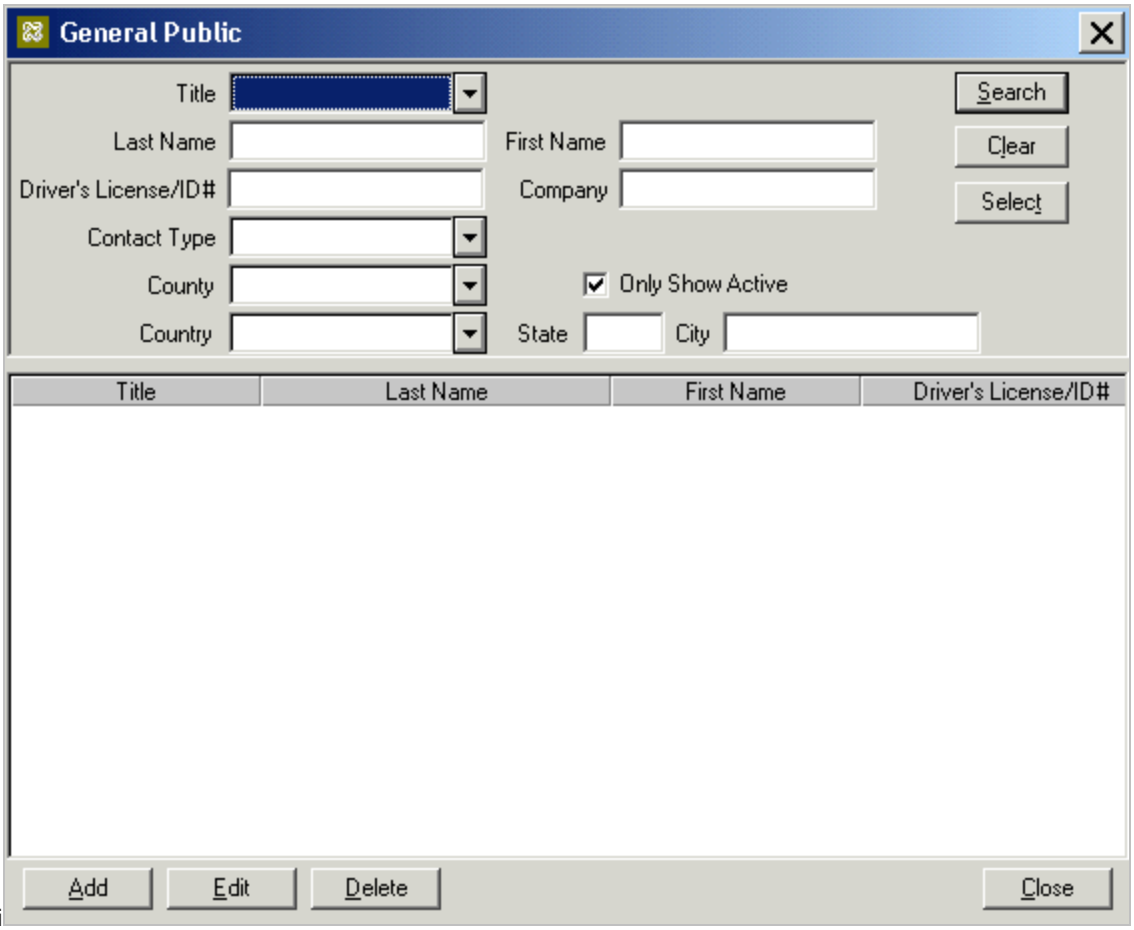
Working with General Public Data

The General Public form is used to search, add, edit or delete information about members of the General Public. This form is used in conjunction with the Incident Reporting form which records information about campus crime incidents that must be reported and published as required by the Jane Clery act.

Individuals whose information is recorded with this form are members of the general public who were involved in a reportable incident as required by the Jane Clery act. Names of individuals who are not already stored in CampusNexus Student as staff or students but were involved in an incident will be recorded using this form as part of the incident reporting process.

This form is part of the Incident Reporting process but may also be displayed by navigating to **Daily > Contact Manager > General Public**.

The form allows for searching, adding, editing or deleting of names and information about general public members.

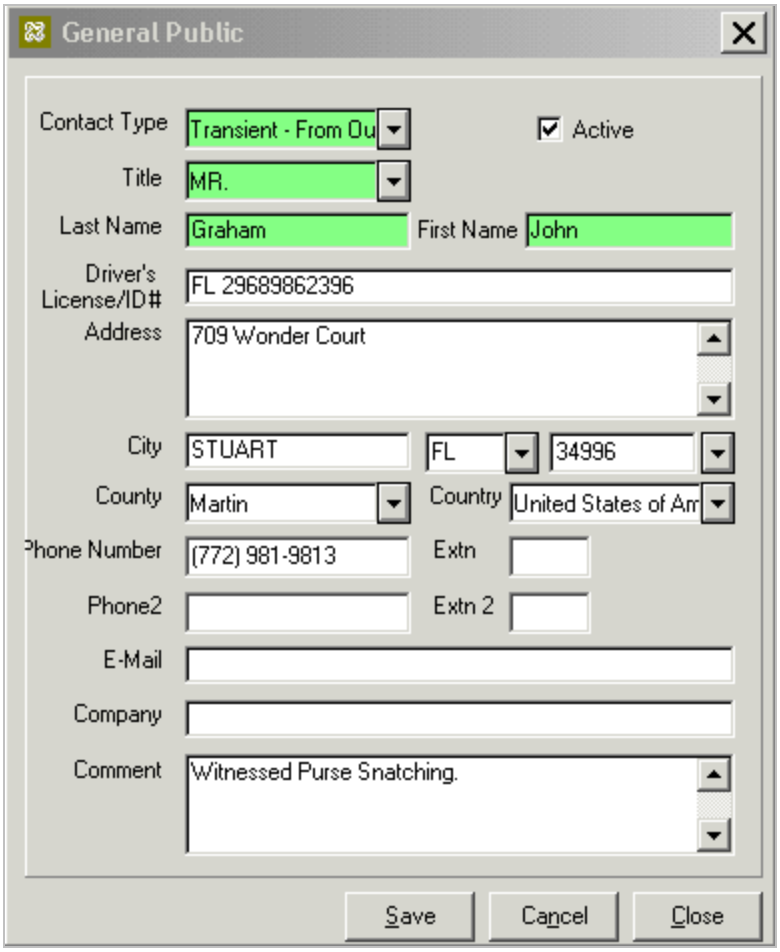


li

Searching for a Record

To Search for one or more individuals:

1. Enter one or more Search Criteria in any of the fields located in the top portion of the form.
2. Click **Search**. A list containing individual(s) names that match the search criteria is displayed on the form.
3. To display the individual's record, click on the row containing the desired name.



4. If desired, make changes to the information and click **Save**.
5. Click **Close** to close the form.

Adding a General Public Record.

To add a new member to the General Public database:

1. Click **Add** at the bottom of the General Public form.
2. In the **Contact Type** list, chose the desired contact type.

   Note: Contact Types should have previously been defined in Lists > Admissions > Contact Type.
3. Select the desired title from the **Title** list.
4. Enter the Last Name and First Name.
5. Enter information as required in to the optional fields: Driver's License, Address, City, State, ZIP Code, County, Country, Phone Numbers and Extensions, E-Mail, Company and Comment.
6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Editing an Existing General Public Record

To edit an existing record:

1. Perform a Search using the General Public form as described in the Search description above.
2. Double-click on the desired name in the list on the lower half of the form, or click the name once and then click **Edit**.
3. Update the fields in the record as required.
4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Deleting a General Public Record

Note: An existing record may not be deleted if the individual in that record is already associated with an Incident. If an attempt is made to delete a record that is associated with an incident, a message is displayed indicating that the record may not be deleted. The person named in the record may be disassociated from the incident from within the Incident Record. However, the record may still not be removed from the database since it has been previously associated with an incident.

To delete an existing record:

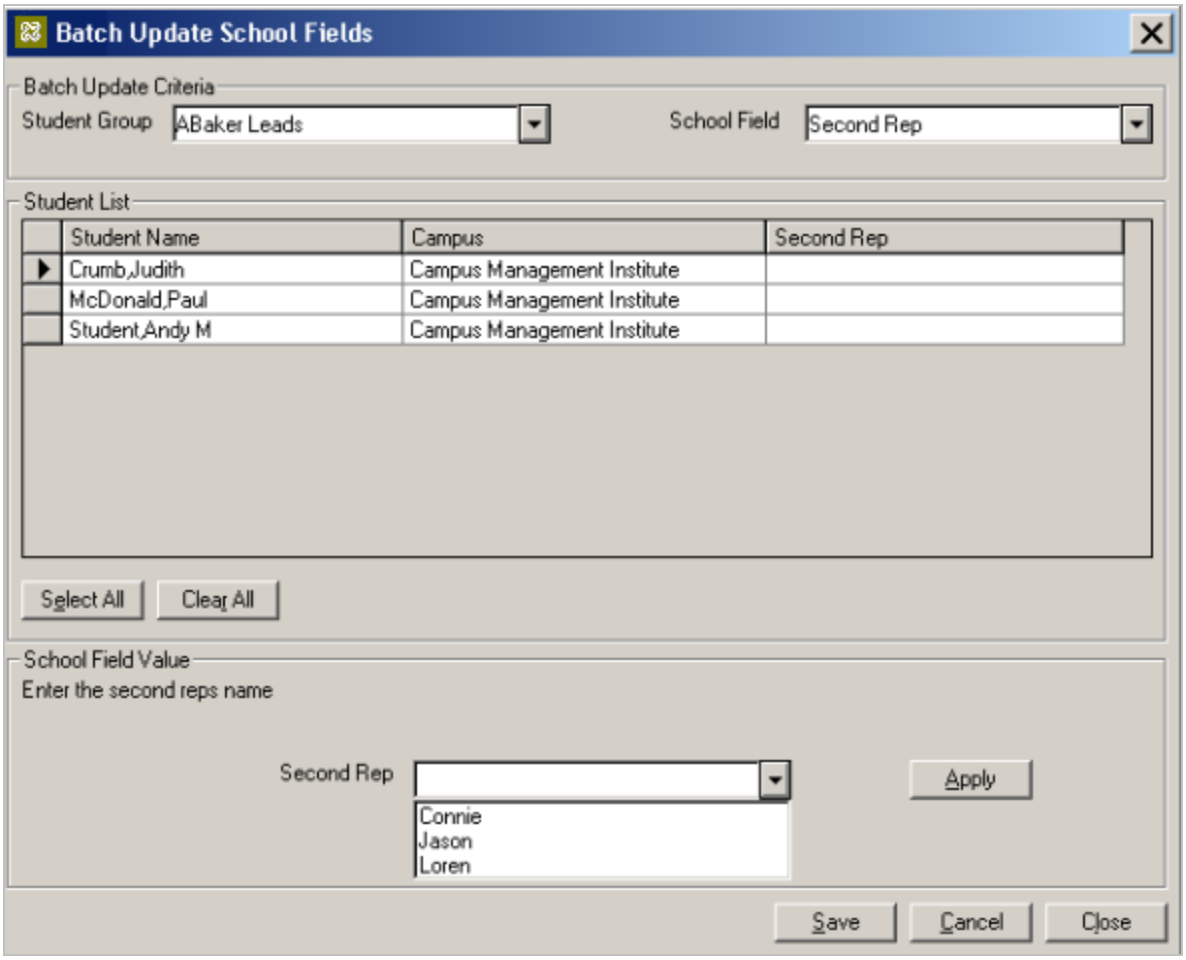
1. Perform a Search using the General Public form.
2. Click the name once and then click **Delete**. A dialog box is displayed asking if it is OK to delete information about the individual.
3. Click **Yes** to remove the record form the database.

Processing School Field Batch Updates

The Batch Update School Fields form enables you to update school-defined fields in a batch format, including the ability to blank out specific fields.

To process school field batch updates:

1. Navigate to **Daily > Contact Manager** > **Batch Update School Fields**. The following form is displayed.



2. The 'Student Group' drop-down field (in the Batch Update Criteria section) is prepopulated with student groups if the form is opened from View > Student Groups and the **Update School Fields** button is clicked. When this form is opened from Daily > Contact Manager > Batch Update School Fields, this field is not populated.

   In either case, you can select among all student groups (depending on your access permissions) from the **Student Group** drop-down list.

3. Select the school-defined field to be updated from the **School Field** list.

   Note: Once the Student Group and School Field fields are populated, the Student List section is populated with all students in the appropriate student group. Columns in the grid include: Student Name, Campus, and the value of the selected School Field.

4. Select one or more students from the grid to make your updates. For multiple 'consecutive' row selections, hold

down the **Shift** key and click on each applicable row. For 'non-consecutive' row selections, hold down the **Ctrl** key and click each applicable row. To select all students in the grid, click **Select All** or click **Clear All** to clear your selections.

5. Once you have made your student selections, select a new value in the **School Field Value** section and click **Apply**. The grid will refresh.

   Note: When School Defined Fields are configured, help text can be entered. This help text is displayed in the School Field Value section of this form.

6. Click **Save**.

Note:

The message *"School Defined Field Value(s) have been modified. Do you want to save?"* is displayed if you changed values and try to do any of the following operations before saving them:

- Change the value in the **Student Group** list.
- Change the value in the **School Field** list.
- Click **Cancel**.
- Click **Close** to close the form.

Daily > Admissions

The Daily > Admissions submenu options include:

- Process Electronic Leads
- Process Online Applicants
- Advertising Expenses
- Document Tracking
- Enroll Student
- Reassign Leads
- High Schools
- Allocate Budgeted Starts
- Transfer Credits
- Manage Course Relationships
- Batch Quick Lead Entry
- Admission Rep Maintenance
- Import Test Scores
- Match Test Scores
- <Detach> (This options detaches the submenu.)

Processing Electronic Leads

Leads can be imported from electronic sources outside of the system and displayed within the system as a list of all students in the Electronic Leads table (AmElectronicLeads). Leads can be added to the Electronic Leads table through Portal, the school's Web interface or any other third party process.

CampusNexus Student does not post leads to this table; it is the responsibility of the institution to design a method of posting to this table. For example, you may have an Internet application or other custom program that captures inquiries from persons interested in your school. If your system administrator, in-house data administrator, or programmer, can use the appropriate tools, he/she can insert data into the Electronic Leads table.

Refer to Web Interface Overview for more on setting up your school's website.

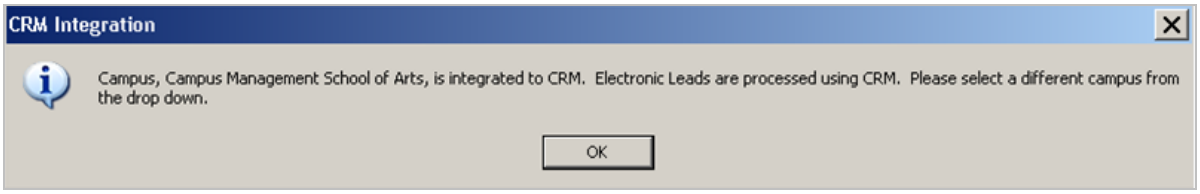
The system also enables authorized users to identify duplicate leads and process such leads according to school-defined rules.

See also Duplicate Lead Processing for setup and configuration information.

We recommend that you discuss your plan for importing electronic leads with Support (1-800-483-9106) before attempting to use this feature.

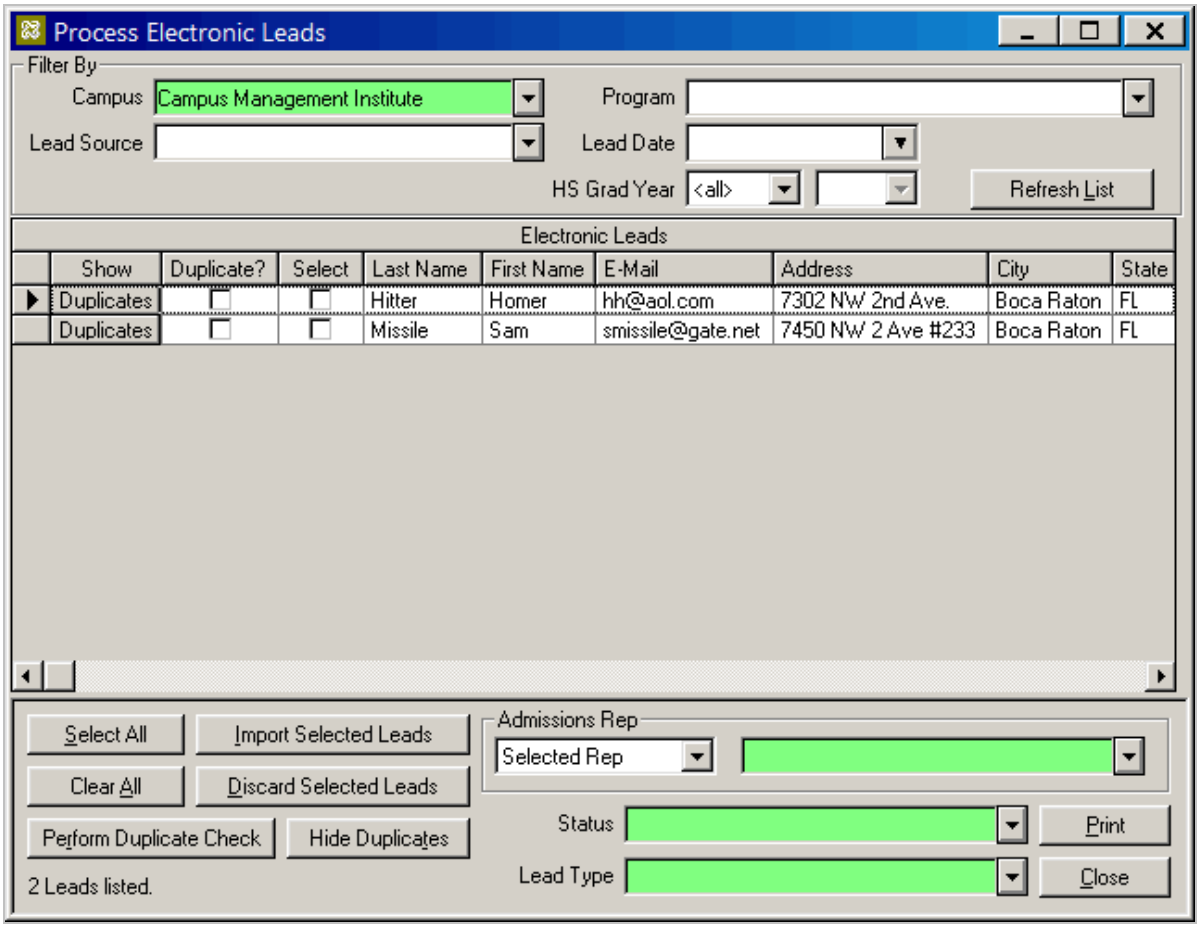
Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

When Processing Electronic Leads for the default campus and if both the (system level) **CRM Integration** and (campus level) **Enable CRM Integration** check boxes are selected, but the (campus level) **Enable new lead entry from CampusNexus Student when CRM is integrated** check box is cleared, the following message is displayed:



To process electronic leads:

1. Navigate to **Daily > Admissions > Process Electronic Leads**. The Process Electronic Leads form is displayed.



2. In the **Filter By** section, select the filtering criteria you want to use, including the **Campus(es)** and **Program** for which the electronic leads are to be processed; the **Lead Source** from which they were obtained, and the **Lead Date**.

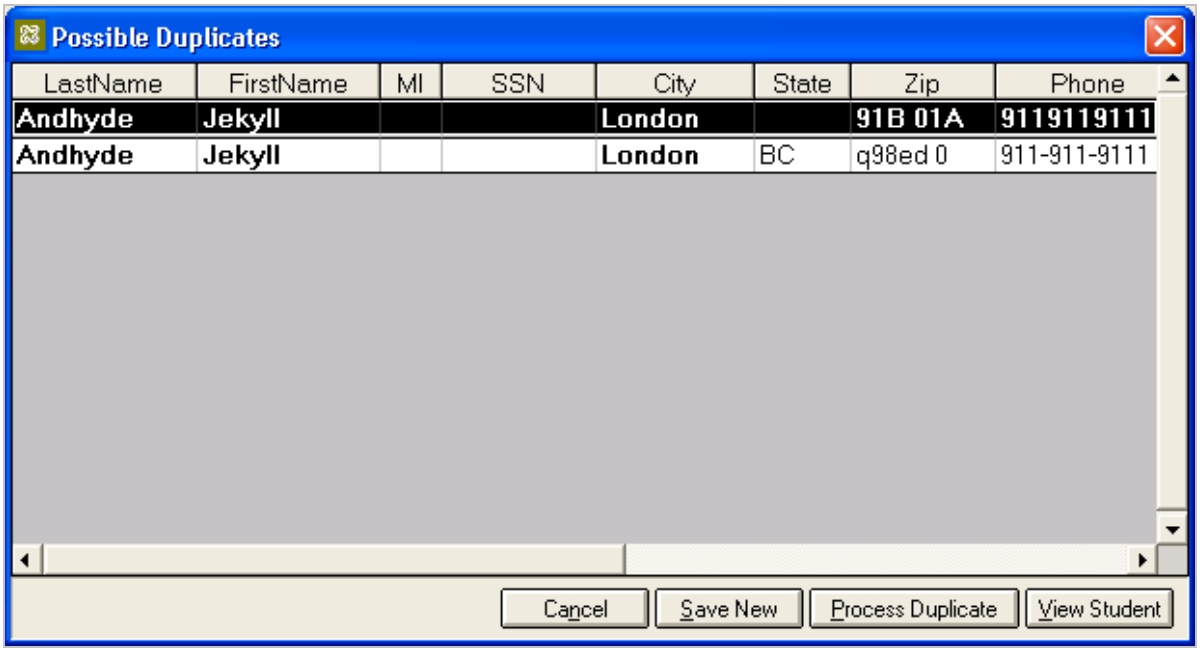
   Note: Select **All Campuses** to include leads with no campus designated and all campuses to which you have access. Otherwise, you can select a single campus from your campus list. Click **Select All** or **Clear All** and add/clear campuses individually for speed and ease of use.

3. Click **Refresh List**. Lead records that were identified as having possible duplicates on file when the lead information was initially captured will be loaded into the Electronic Leads grid. For each possible duplicate record already on file, the following information - if available - will be listed: first and last name, email address, street address, city, state, ZIP, phone, other phone, lead date, source, campus, program, interest, and comments, high school graduation year, and date of birth.

   Note: When Processing Electronic Leads for the default campus, if both the (system level) CRM Integration and (campus level) **Enable CRM Integration** check boxes are enabled, but the (campus level) Enable new lead entry from CampusNexus Student when CRM is integrated check box is disabled, and you have selected 'All Campuses' in the **Filter By** section, leads associated with the CRM enabled campus(es) will not be returned in the list for processing.

The active Admission school-defined fields associated with the electronic lead will be listed. When new student master records are created from the imported electronic leads, these fields are associated with the correct Student Master record. If the override option is selected, then the school-defined fields from the Electronic Lead process will override the student master record when processing duplicate leads.

4. Select the check box in the **Select** column for a particular record and click **Perform Duplicate Check**. If the new lead record is a duplicate of any of the possible duplicate records listed, a check mark is displayed in the **Duplicate?** cell that corresponds to that record.
5. Click the word **Duplicates** in the Show column that corresponds to a record to see all existing records for this New Lead.



Note: If the new lead record is a duplicate, the user can indicate that the system shall update the existing Student Master record with information from the latest Lead. It will be processed according to school-defined rules. If the user has duplicate override permission, the users can create a New Lead record even if possible duplicates are on file for the selected record. This action will trigger a preconfigured Contact Manager activity.

6. Click **Save New** to update the existing Student Master with data from the New Lead form.
7. Click **Process Duplicate** to update an existing record.
8. Click **View Student** to see the Student Master record for a selected New Lead.

If the new lead record is not a duplicate, you can import this lead, if you have override permission to do so.

- Select those leads that you want to import by checking the rows in the Select column. Note that you can click the Select All or Clear All button to assist in the selection process. Records that are deselected remain in the grid but are neither imported nor discarded.
- Specify the **Lead Source**, (school), and **Admissions Rep** who will be assigned to the lead.
- Click the **Import Selected Leads** button. If the lead is imported, then the new lead will be removed from the

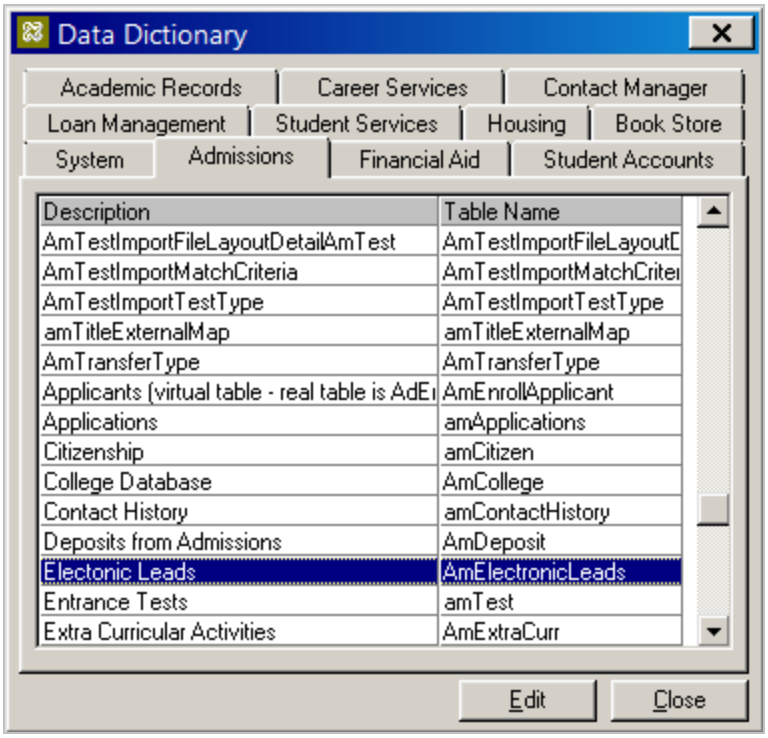
grid on the Process Electronic Leads form.

- If you decide not to import the lead on this form, then the check box will be selected for this new lead on the grid when you return to the Process Electronic Leads form.

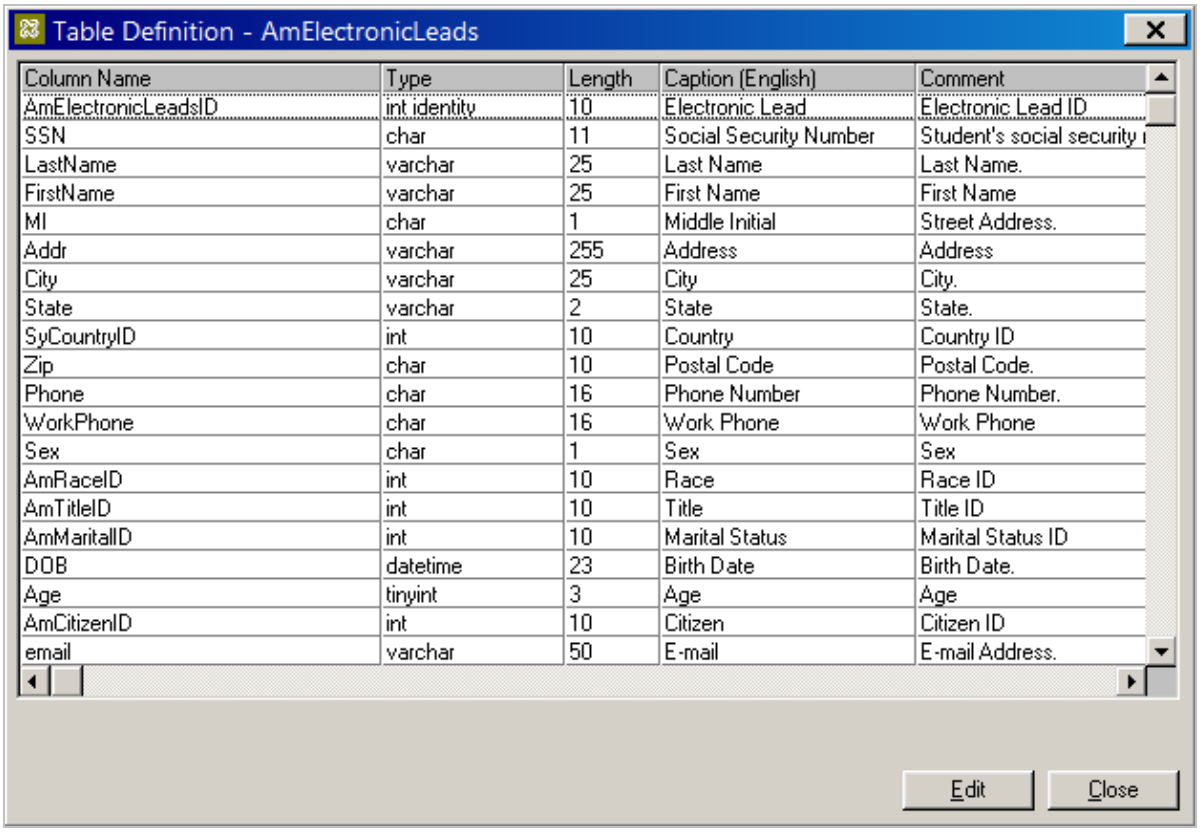
9. If there are leads that can obviously be discarded, for example those with insufficient or obviously invalid information, select the column and click **Discard Selected Leads**. The program will remove them from the table.
10. Click **Hide Duplicates** to have the program remove any rows that it determined to be possible duplicates from the screen. The program will not remove them from the table and they will be available for future sessions of processing electronic leads.
11. Click **Print** to print all selected records.

Electronic Leads Table

The Data Dictionary form is shown here with the Electronic Leads table highlighted. Click **Edit** to see the list of fields in the table.



Part of the Electronic Leads table is shown in the illustration below. This table contains the data elements that can to be captured for import into CampusNexus Student.



Column Name	Type	Length	Caption (English)	Comment
AmElectronicLeadsID	int identity	10	Electronic Lead	Electronic Lead ID
SSN	char	11	Social Security Number	Student's social security
LastName	varchar	25	Last Name	Last Name.
FirstName	varchar	25	First Name	First Name
MI	char	1	Middle Initial	Street Address.
Addr	varchar	255	Address	Address
City	varchar	25	City	City.
State	varchar	2	State	State.
SyCountryID	int	10	Country	Country ID
Zip	char	10	Postal Code	Postal Code.
Phone	char	16	Phone Number	Phone Number.
WorkPhone	char	16	Work Phone	Work Phone
Sex	char	1	Sex	Sex
AmRaceID	int	10	Race	Race ID
AmTitleID	int	10	Title	Title ID
AmMaritalID	int	10	Marital Status	Marital Status ID
DOB	datetime	23	Birth Date	Birth Date.
Age	tinyint	3	Age	Age
AmCitizenID	int	10	Citizen	Citizen ID
email	varchar	50	E-mail	E-mail Address.

Processing Online Applicants

The application process in Portal leverages features of CampusNexus Student that help to identify possible duplicate records. CampusNexus Student enables institutions to process the potential duplicate students whose application information has accumulated in the AmOnlineApplicants table associated with Portal. The authorized user must decide if the prospective applicant is really a duplicate of a student on file, and if so, merge the data and use the student record on file.

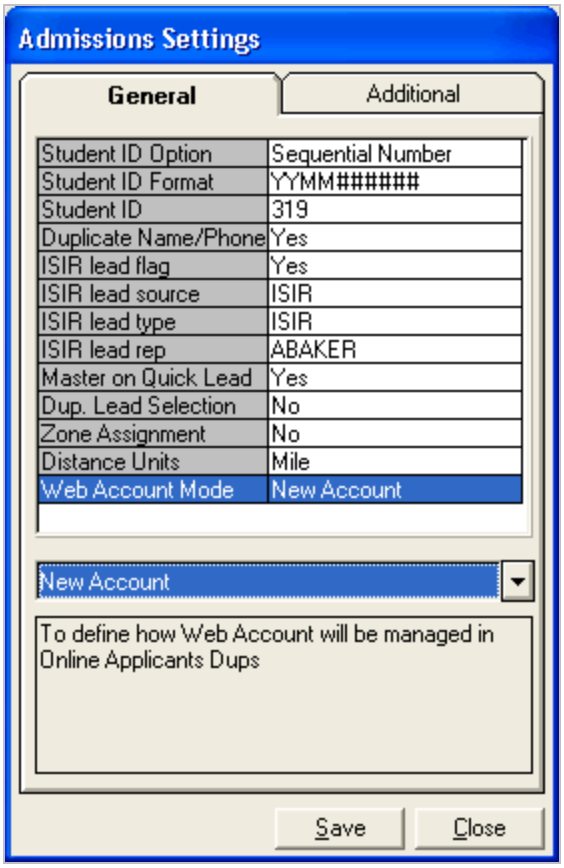
- If the prospective applicant is indeed a new student, the user must create a new student record accordingly.
- If the prospective applicant record is invalid, it can be deleted.

If the applicant is New or Existing, CampusNexus Student creates an Applicant or Enrollment record subsequently.

Note: This feature is enabled only if the institution uses Portal for online application. It is recommended that before enabling this feature, the campus process ALL duplicate records currently residing in the Process Online Applicants folder. All duplicates should be processed BEFORE disabling the feature.

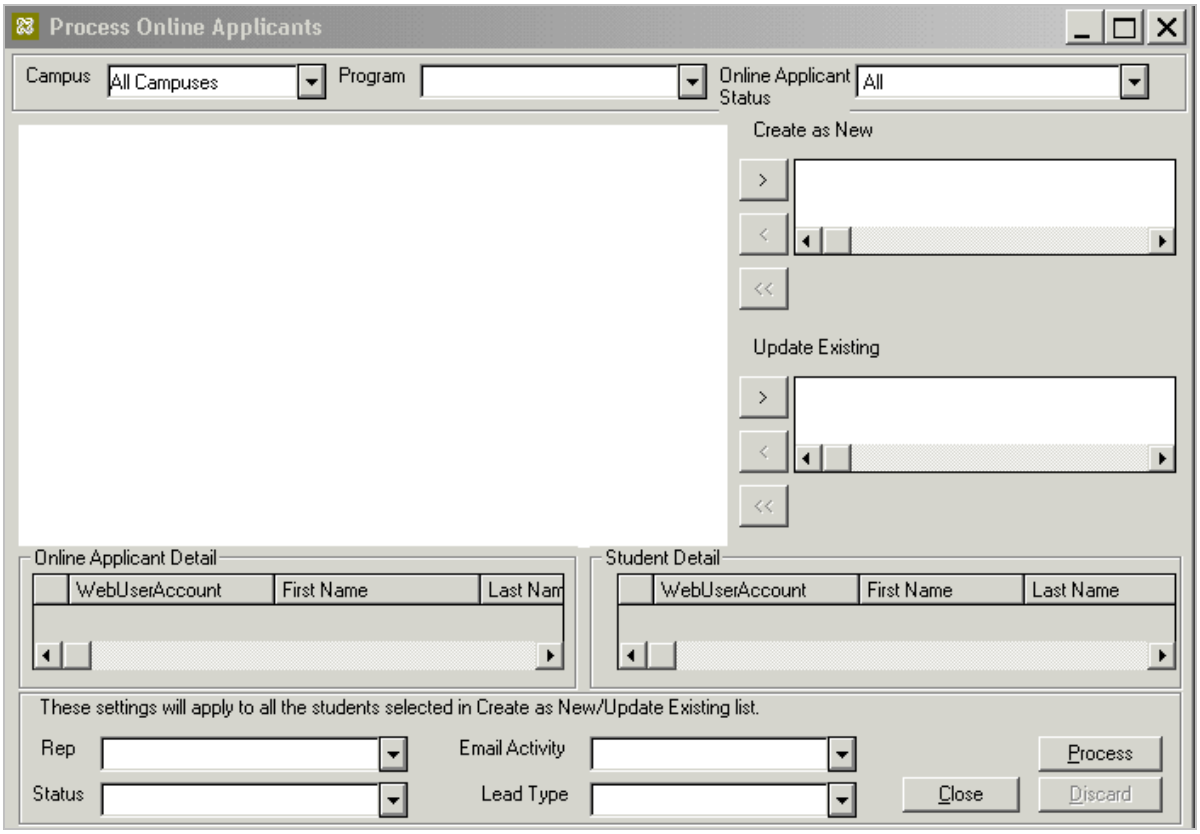
To view and resolve possible duplication in online applicants:

1. Navigate to **Setup > Admissions > General**. The Admissions Settings form is displayed. At the application level, the authorized user must indicate how Web accounts shall be managed. When there is a duplicate online applicant account, the administrator must indicate whether the institution will use the New Account, the Old Account, or allow Multiple Accounts. Select a mode and click **Save**.



Note: The Online Application Status History will be stored for duplicates and may be viewed via **View > Admissions > Status History**.

2. Navigate to **Daily > Admissions > Process Online Applicants**. The Process Online Applicants form is displayed.



Field functions are as follows:

- **Campus** - The drop-down list displays all campuses the user can access, and an All Campuses option. Select **All Campuses** to view all possible duplicate applicants. Actual processing must be done campus-by-campus.
- **Program** - The drop-down list displays all programs configured for the selected campus and an All Programs option.
- **Online Applicant Status** - Options in the drop-down list are "In Progress (Step 1)", up to, "In Progress (Step 8)", and final option of "Complete. These options correspond to values 1 through 8 (for Steps) and 999 (for Complete), of the ApplicationStatus column in WpUser table on the Portal database.
- **Student Display** - The main display area is a tree structure showing, at the first level, a list of Online Applicants (from the AmOnlineApplicant table). For each applicant, the system algorithm finds data when a node is clicked. For each possible duplicate student, enrollments for the student, if any, will be listed under the student.
- **Online Applicant Detail** - When you click on a student under an Applicant, the Online Applicant Detail area displays the applicant's details.

  When you click on an Enrollment under a Student, the Online Applicant Detail still displays, as does the Student Detail, with the addition of some detail fields in the Student Detail area which also display information for the enrollment.
- **Student Detail** - When you click on a student under an Applicant, the Online Applicant Detail area displays the applicant's details.

When you click on an Enrollment under a Student, the Online Applicant Detail still displays, as does the Student Detail, with the addition of some detail fields in the Student Detail area which also display information for the enrollment.

Processing

In the lower area of the form are four drop-down lists to choose options that apply when **Process** is clicked. The **Process** button becomes enabled when a student is moved into the New or Existing list. The user can assign an Admissions Rep, Email Activity, Status and Lead Type to an Applicant. These are required fields.

Note: As the label states on this area of the grid "These settings will apply to all the students selected in Create as New/Update Existing list".

Rep

This drop-down list displays all Admissions Reps associated with the campus chosen. Choose an Admissions Rep to assign to a new student record or applicant.

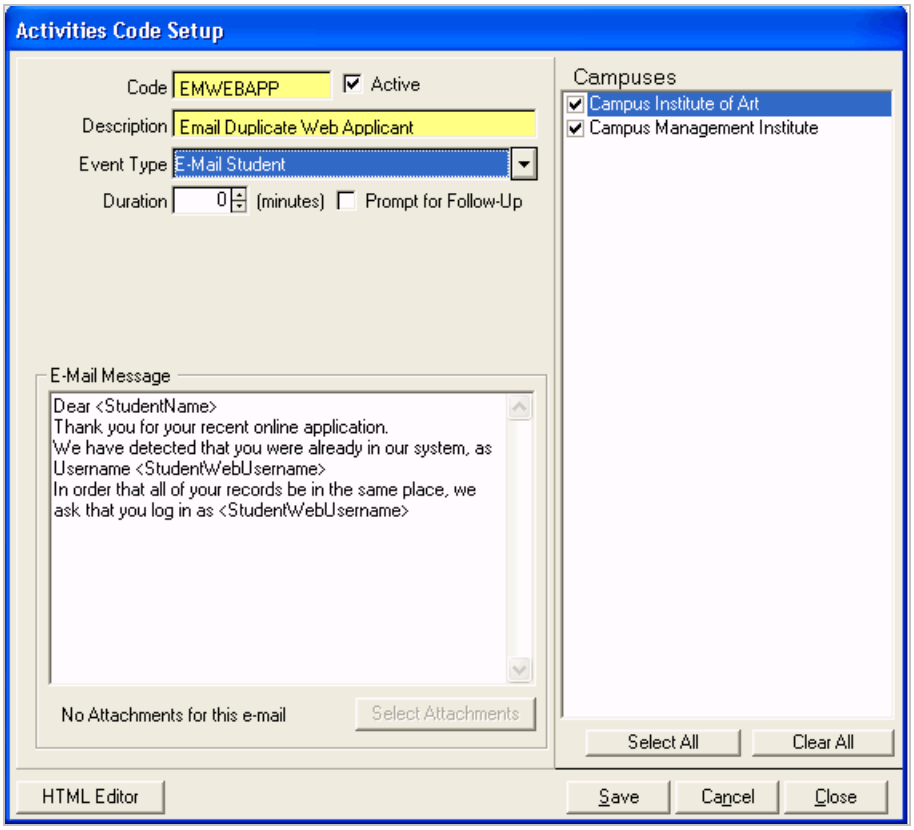
Note: When duplicate students are moved in 'Update Existing' and 'Do not update' is selected in the 'Rep' drop-down, then the Admissions Representative is not updated on the Student Master form as well as the Enrollment and Inquiry record. In addition if 'Do not update' is selected when a student is moved in 'Create as New' a popup box with a message stating: 'Do not update' option can only be selected for 'Update Existing' students.

Status

This drop-down list displays all statuses associated with the application process. Options are Interview Scheduled, Interviewed, New Lead, Application Accepted, Application Rejected, and Pending Applicant. Statuses are configured according to school-defined rules in the Status Code Setup form.

Email Activity

This drop-down list displays all Email Activities configured in Setup Contact Manager Lists (**Lists > Contact Manager > Activities > Add/Edit**) that are applicable to the Campus selected in the top Campus filter. The final step of online processing is the email sent to the student to confirm that his/her information was processed, and information regarding which web account (user name) to use in future transactions.



Lead Type

The Lead Type drop-down list displays all lead types configured in Setup Admissions Lists (**Lists > Admissions > Lead Type**). Lead types are not specific to a campus.

Process

Click the **Process** button after you have assigned an Admissions Rep, Status, Email Activity, and Lead Type and selected a Campus. (You must select a campus before you can move an applicant/student to the New or Existing list.) After processing is completed, the tree structure is refreshed. Processed applicants are no longer displayed in the tree structure. When processed successfully, they will have been removed from the online applicants database.

Note: When a duplicate application is processed, any previously recorded 'Ethnic Group' category information will be replaced with the new 'Ethnic Group' category information.

Discard

The **Discard** button becomes enabled only when the user selects an applicant.

If the user attempts to discard an applicant who has already made a payment, the system prompts the user to confirm this action.

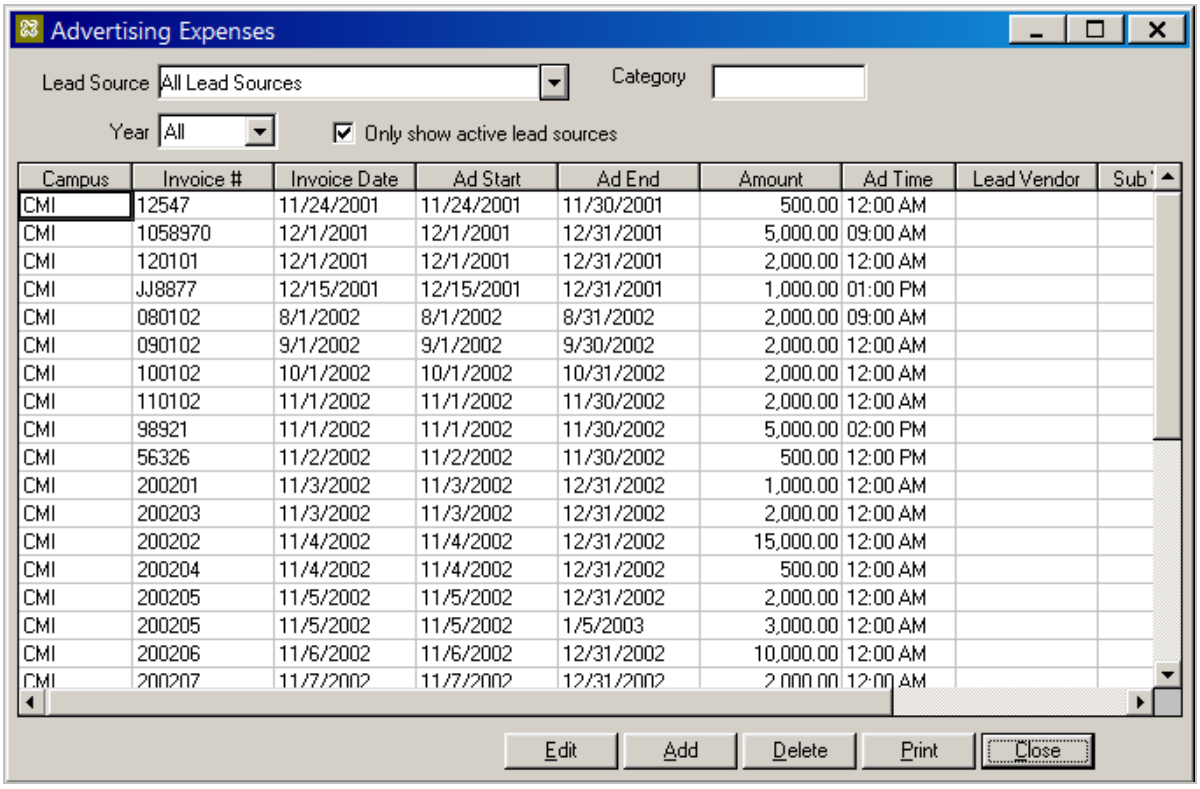
Note: In cases where records are still kept for auditing purposes, the user should perform a 'soft' delete.

If no payment had been made, then upon clicking **Discard**, the user is prompted for confirmation, and if confirms, the record is deleted from the table.

Enter Admissions Expenses

The expenses related to marketing, advertising and other efforts to recruit students can be recorded, tracked, and reported in CampusNexus Student. From the main menu, select the Daily Admissions Expenses option. The Advertising Expenses form is displayed. On this form, you can select the Lead Source and year for which to display a list of expenses. You can add a new expense, and edit or delete an existing expense. You can also print a report for the lead source and year that is active on the form.

The grid displays Campus, Invoice Number, Invoice Date, Ad Start Date, Ad End Date, Amount, and Ad Time (time that the ad occurs on radio or TV).



Campus	Invoice #	Invoice Date	Ad Start	Ad End	Amount	Ad Time	Lead Vendor	Sub
CMI	12547	11/24/2001	11/24/2001	11/30/2001	500.00	12:00 AM

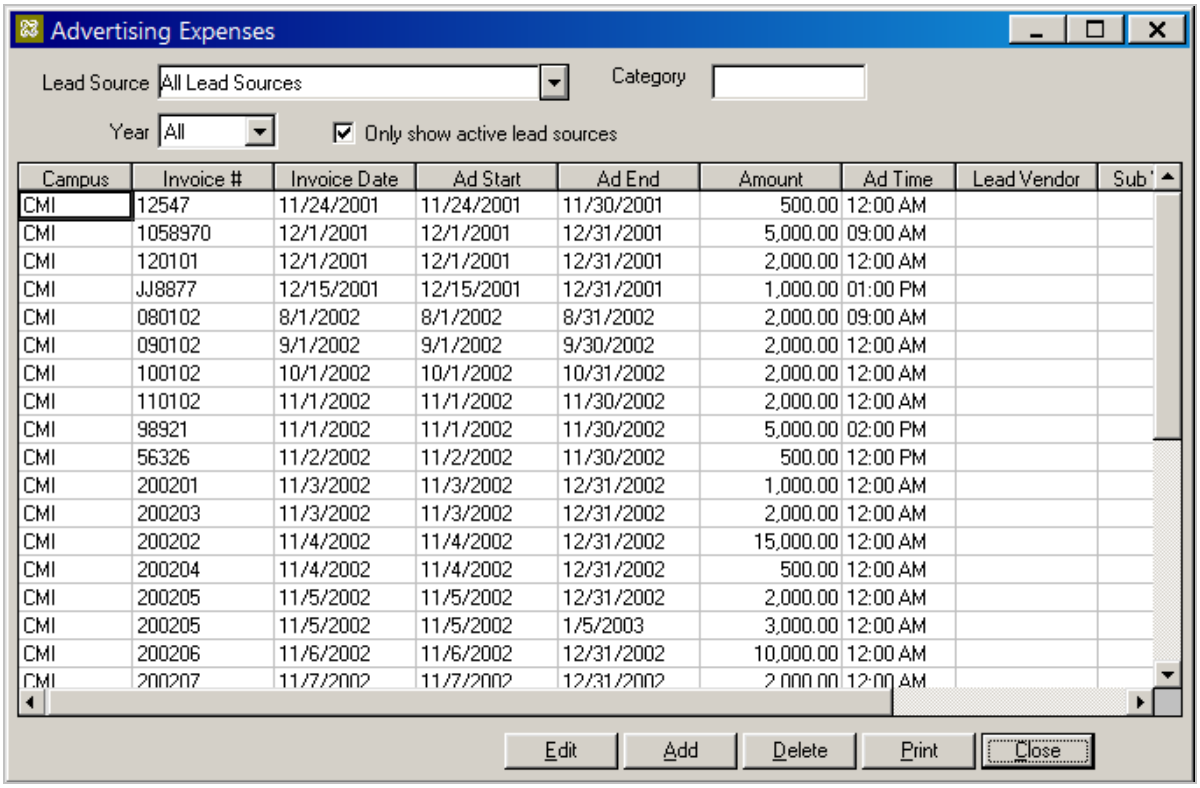
For additional information about Advertising Expenses, see Add Expense, Edit Expense, Delete Expense, and Print Expenses.

Add Expense

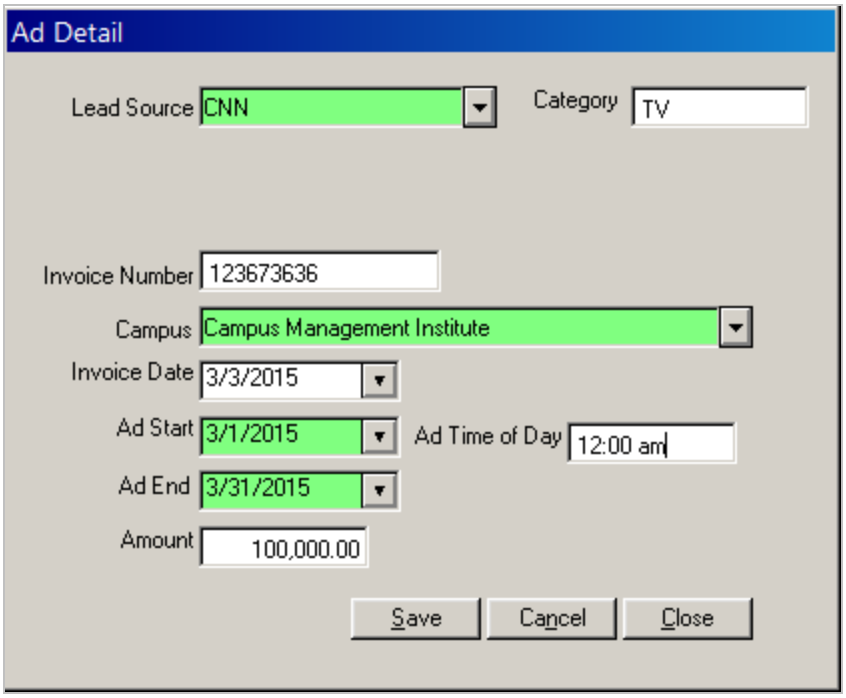
To add an expense in the Admissions module:

1. Navigate to **Daily > Admissions > Advertising Expenses**. The Advertising Expenses form is displayed.



2. Select the **Lead Source** and **Year** with which you want to work. If you like, you can select all years. A list of expenses that have already been recorded will appear. The Category code is displayed if you select a specific lead source.

3. Click **Add** to open a new expense form. You can also type the **Ctrl+N** key combination to open the new form. The lead source and current date will already be filled in.

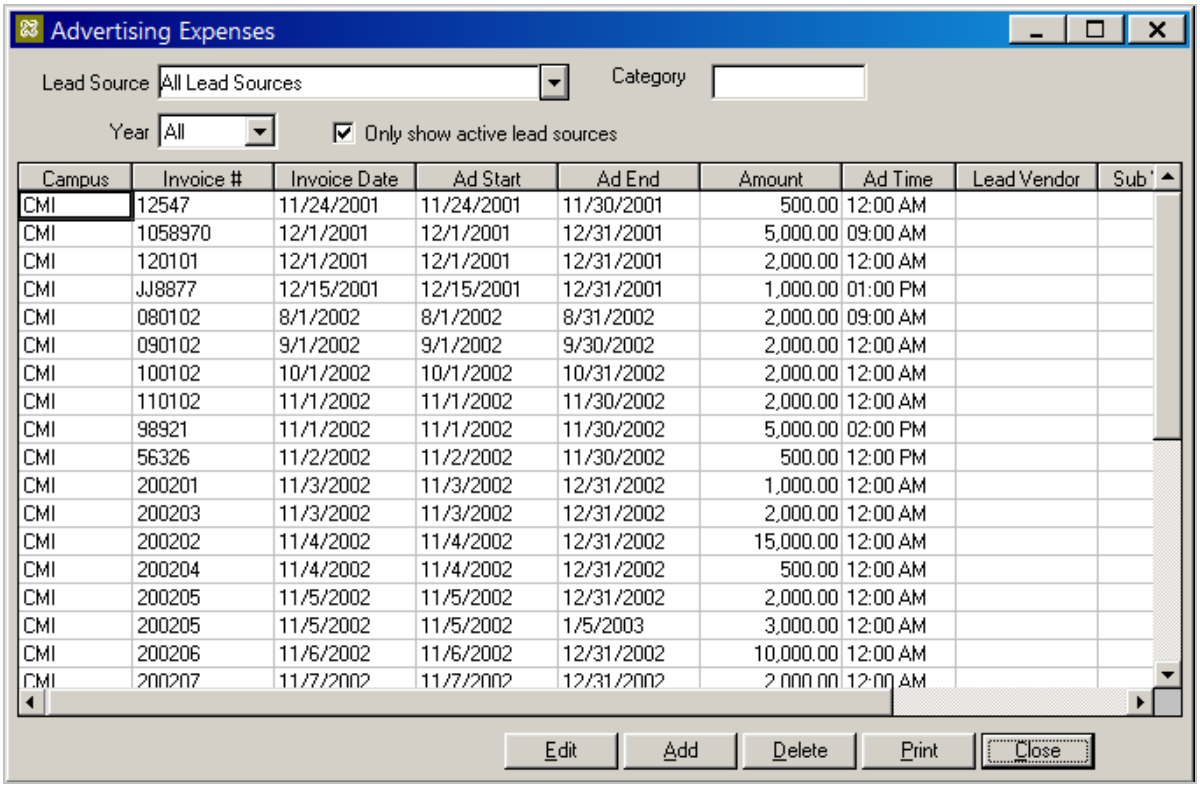


4. Complete the other data fields on the form. Lead Source and Campus are required fields.
5. Click **Save** or press **Ctrl+S** to save your entry and close the form.

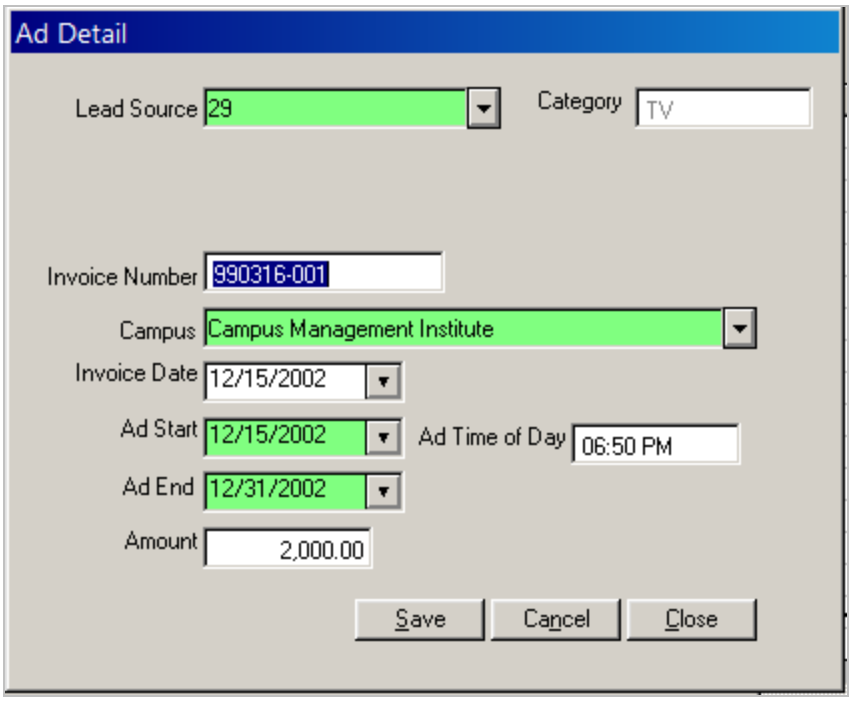
Edit Expenses

To edit an advertising expense in the Admissions module:

1. Navigate to **Daily > Admissions > Advertising Expenses**. The Advertising Expenses form is displayed.



2. Select the **Lead Source** and **Year** with which you want to work. If you like, you can select all years. A list of expenses will appear. Click (highlight) the invoice line you want to edit.
3. Click **Edit** to open the expense detail form.

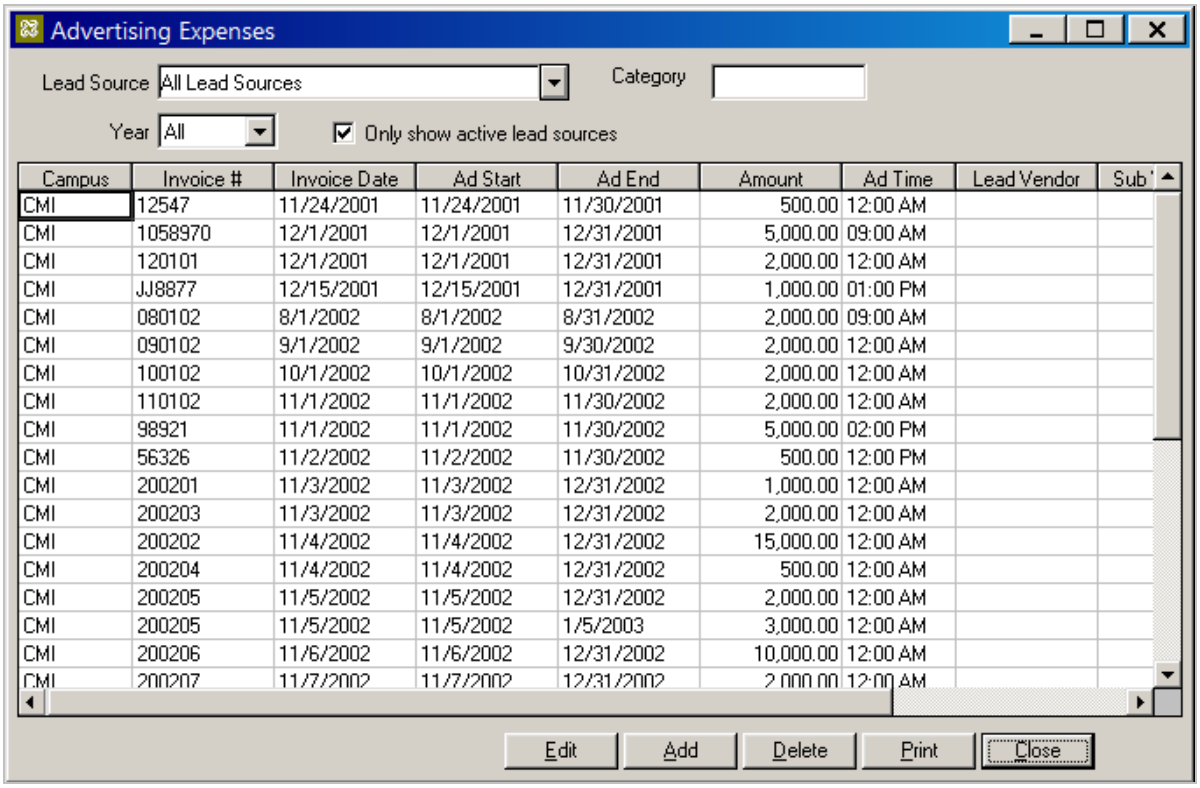


4. Edit the data fields on the form.
5. Click **Save** to save your entry and close the form.

Delete Expenses

To delete an advertising expense in the Admissions module:

1. Navigate to **Daily > Admissions > Advertising Expenses**. The Advertising Expenses form is displayed.

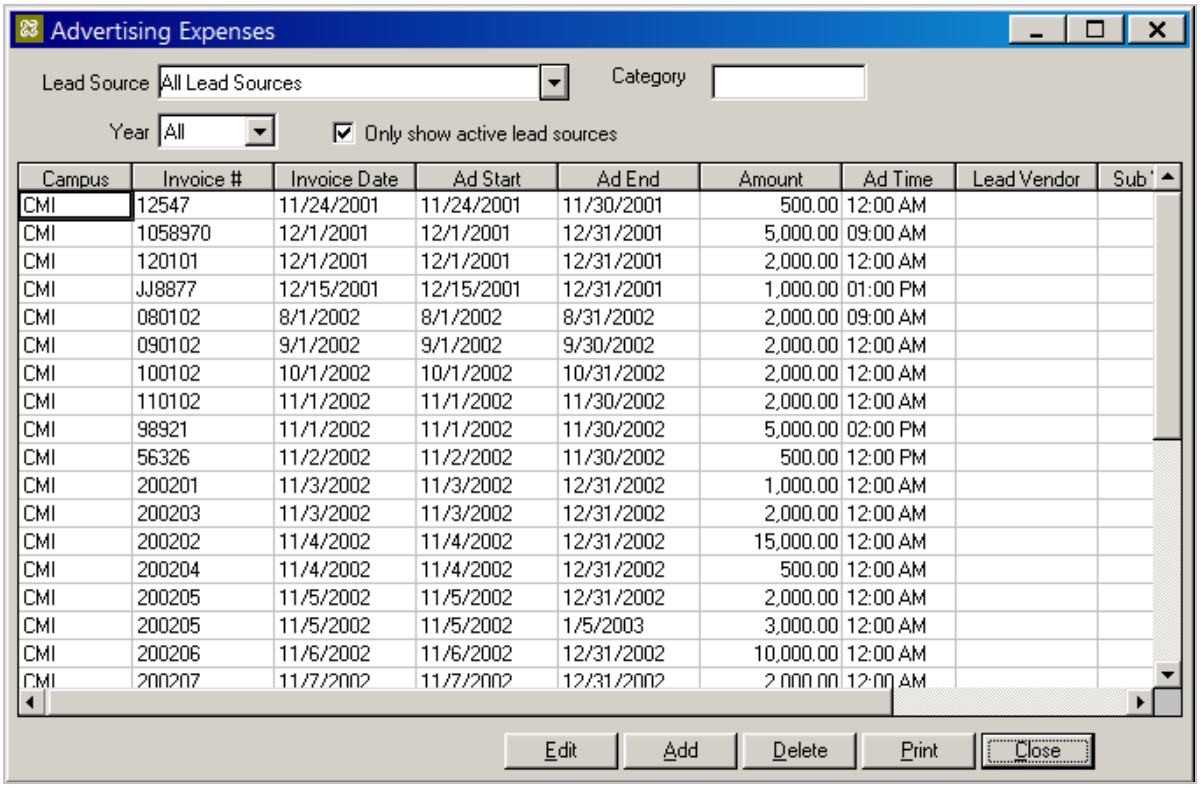


2. Select the **Lead Source** and **Year** with which you want to work. You can select all years. A list of expenses is displayed. Click the invoice line you want to delete.
3. Click **Delete**. A dialog box is displayed to confirm that you want to delete the selected invoice.
4. Click **Yes** to delete the invoice.

Print Expenses

To print advertising expenses for a selected lead source in the Admissions module:

1. Navigate to **Daily > Admissions > Advertising Expenses**. The Advertising Expenses form is displayed.



2. Select the **Lead Source** and **Year** that you want to print. You can select all years. A list of expenses is displayed.
3. Click **Print** to send the expense list to your printer.

   A more useful report can be obtained at Reports > Admissions > Lead Source Performance.

Document Tracking

Institutions request documents from students and persons or organizations connected with the student. Use Document Tracking to keep track of the documents that are necessary for processing student records in an orderly fashion.

Document Tracking is available in the following modules:

- Admissions - AM
- Financial Aid - FA
- Student Accounts - SA
- Academic Records - AD
- Loan Management - LM
- Career Services - PL

You can use the Daily > Document Tracking feature to look at all documents of a certain type to determine the document's status for each student.

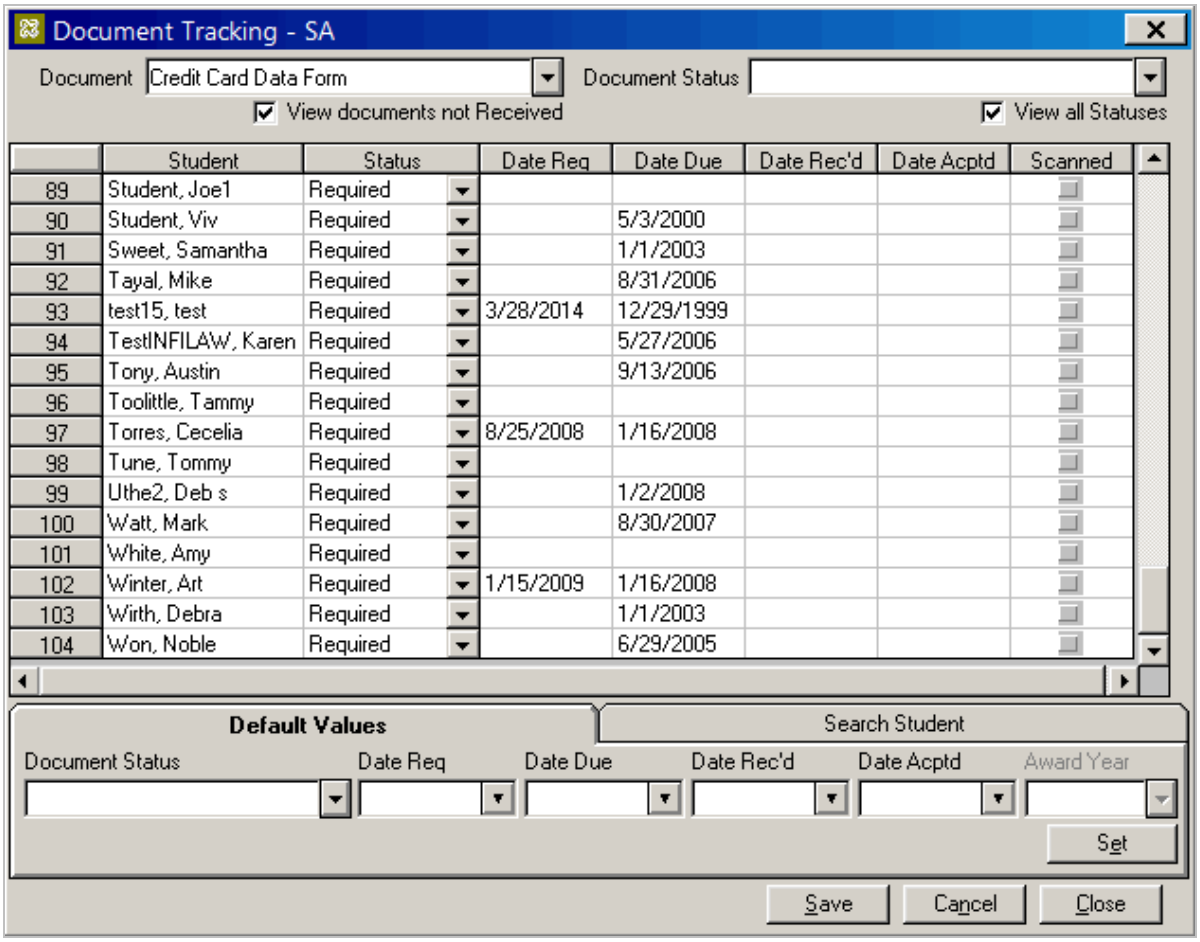
Several documents relate to academic or demographic history and your organization must have copies of them for each student. Examples are birth certificates, driver's licenses, transcripts, alien registration cards, social security cards, etc. Management policy determines which documents are important at your institution.

You can set up lists of these documents and assign them to each student record. You can then record the current status of the documents, the date you requested each document, and the date you received each document. You can also indicate that the document has been scanned into your electronic filing system.

Note: This approach differs from the Document Tracking option that you can access from the View > Contact Manager menu or Student Bar. When you access Document Tracking from the Student Bar, all documents related to a specific student as displayed. Here, you see all students related to a given document.

To edit tracking data for listed documents:

1. Navigate to **Daily > Admissions** (or other module) **> Document Tracking**. The Document Tracking form is displayed.



2. Select a **Document** from the list box at the top of the form. All students having the selected document related to their files are listed on the form.
3. Select or clear **View Documents Not Received**.
   - If the check box is selected, only those documents that have not been received are listed.
   - If the check box is cleared (default), all documents (subject to your Document Status selection) are listed.
4. For Document Tracking in Financial Aid - FA, select an **Award Year** to which the documents apply.

   Note: If you choose a Financial Aid document that does not have the "Award Year Specific" flag selected (indicating Yes) on the Document Setup, the form is displayed with the three Award Year fields disabled.
5. Select or clear **View All Statuses**.
6. Select an optional **Document Status**. If you select a document status, CampusNexus Student lists only the type of document you selected and only those that have the selected status.
7. From the displayed list, find a student document.
8. Click on a field in the row you want to update. You can update the following fields:
   - Status
   - Date Requested
   - Date Received
   - Date Due

- Date Accepted
- Scanned

Note: In date fields, you must enter the century along with the year. For example, 06/30/2000. If you just enter 99 instead of 1999, CampusNexus Student will reject it.

9. Click **Scanned**, if necessary, to indicate that you have scanned the requested document into your electronic filing system.
10. The **Default Values tab** enables you to update statuses and dates in batches.

    If you select a Status, or a Date Due, or Award year, for example, CampusNexus Student updates the values of all students whose names appear in the grid. Click **Set** to update the values and save your work.
11. The **Search Student tab** enables you to search a student using the Social Security Number (SSN) or Student ID.

    Type the SSN or ID and click **Filter**. CampusNexus Student finds the student associated with that number and displays only that student's name and information in the grid. Click **Clear Filter** to remove the filter. The grid revert to the previous display of students.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Enrolling a Student

The student enrollment process starts in the Admissions department. The Admissions Rep records the student's enrollment and passes the student on to the Academic Records department. From the time the enrollment is recorded, the Admissions department no longer controls the student's progress through the system. Admissions can continue to view the student's data but can no longer change the student's school status or other critical data elements.

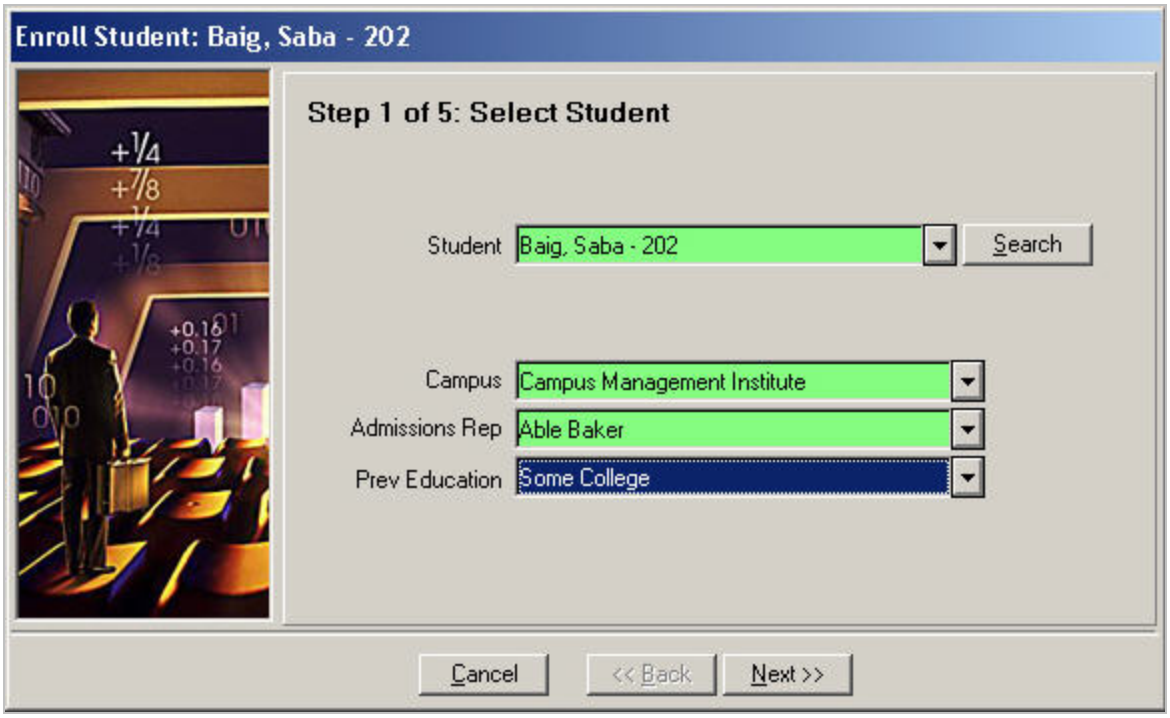
When you enroll a student, CampusNexus Student updates the Student Master record with the Program, Start Date, and Shift and copies the required and elective course list for the program version to the student's course schedule. All courses are set up with a status of Future. The fields in the Student Academic Years record - Weeks Enrolled in Academic Year and Credits/Hours in Academic Year - are set to the default values for the academic year.

Note:The number of steps necessary to enroll a student depends on the options chosen by your institution. For instance, the Advisor or Post-Enrollment Functions steps may not be used. Therefore, the numbering of the steps on the enrollment wizard form may vary. The procedure below describes the following steps:

1. Select Student
2. Select Program
3. Select Term & Billing
4. Enter Enrollment Dates
5. Select Advisors
6. Description & Comments
7. Post-Enrollment Functions

To enroll a student who has completed the Admissions process:

1. Navigate to **Daily** > **Admissions** > **Enroll Student**. Step 1 of 7: Select Student of the Enroll Student wizard is displayed.

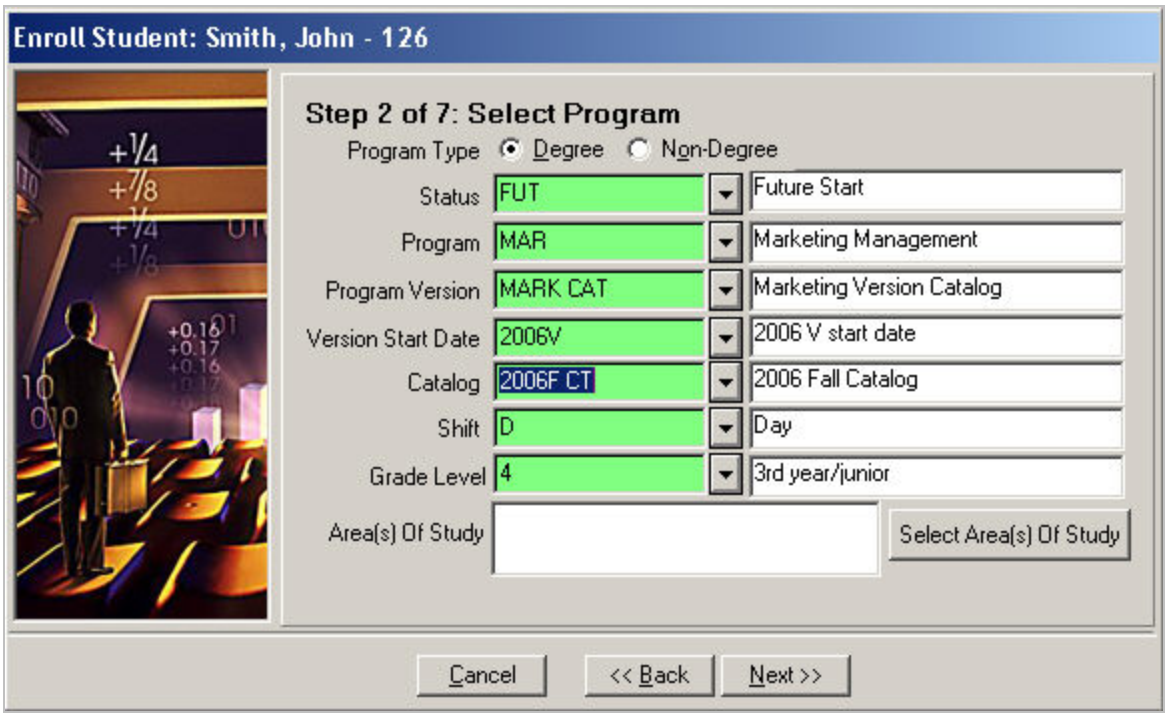


2. Select the **Student** to be enrolled or click **Search** to find the student.

After the student is selected, CampusNexus Student verifies that all required fields are populated before you can proceed to the next page. A message is displayed if data is missing for required fields.

CampusNexus Student fills in the **Campus**, **Admissions Rep**, and **Prev Education** fields. If you have appropriate permissions, you can modify these fields.

3. Click **Next**. Step 2 of 7: Select Program of the Enroll Student wizard is displayed.



4. If the campus at which the student is enrolling provides non-degree programs (NDS), a Program Type option is displayed above the Status field. Select **Degree** or **Non-Degree**. See also Tracking NDS students. If the campus does not allow NDS enrollments, CampusNexus Student automatically selects Degree.

   The lists of the Status and Program Version fields are filtered based on the Program Type selection.

   For Degree programs:

   - The Status list remains the same as in prior versions of CampusNexus Student. The Program field lists the school-defined status codes in category "E-Enrollment".
   - The Program Version field lists only Degree program versions.

   For Non-Degree programs:

   - The Status list shows only the NDS-Enrollment school-defined status codes. SyStatus.Category = "X".
   - The Program Version list shows only Non-Degree program versions.

5. The **Program** field defaults to the program on the Student Master form. If you select a Program, the Program Version field will list the versions for the selected program. If there is only one program version, it will be selected automatically.

6. If the **Program Version** was setup under a Catalog, the Catalog associated with the Program Version is displayed, otherwise the value None is displayed in the Catalog field.

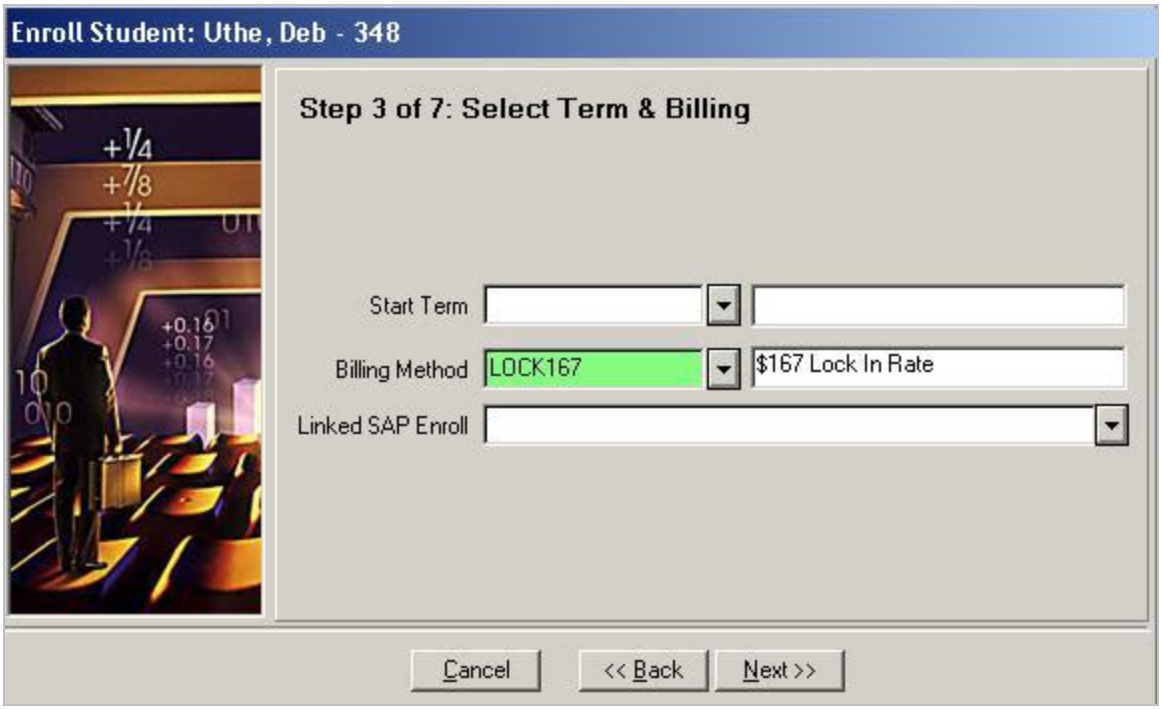
7. Specify the **Version Start Date** of the program version for the campus that the student is enrolling in.
8. The **Grade Level** drop-down list contains grade levels that are established by the Department of Education.

   Note: If the Grade Level is assigned as '1st time, never attended college', CampusNexus Student automatically considers the student as a First Time Borrower if the student has an ISIR or FAFSA for the same award year during the enrollment process. You can disable the First Time Borrower flag after the student is enrolled during the financial aid packaging process.
9. Click **Select Area(s) Of Study** to select components for the student's course of study. The available Areas of Study are displayed.

   Note: This button is used to associate a Major, Minor, and Concentration to the student's degree. The list of available Areas of Study will be filtered based on the Program Version selected in this step of the wizard.

   a. Select a **Catalog** (if applicable) and filter the Areas of Study by **Type** (if necessary).
   b. Click **+** to expand the folders in the Available Area(s) Of Study field.
   c. Click **>>** to select an Area of Study.
   d. Click **OK**.

   The selected Area of Study is added to the enrollment form.
10. If applicable, in the **Transfer credits to be used in academic year dates** field, specify the number of credits to be transferred. The total credits for the program that the student is being enrolled into will be reduced by the number of transfer credits.
11. If applicable, select **Transfer Student (for IPEDS reporting)** to designate that the transfer type is not to affect a student's transfer status in IPEDS reporting.
12. Click **Next**. Step 3 of 7: Select Term & Billing of the Enroll Student wizard is displayed.



13. Select the **Start Term**. The term list is set up under Lists > Academic > Records > Terms.

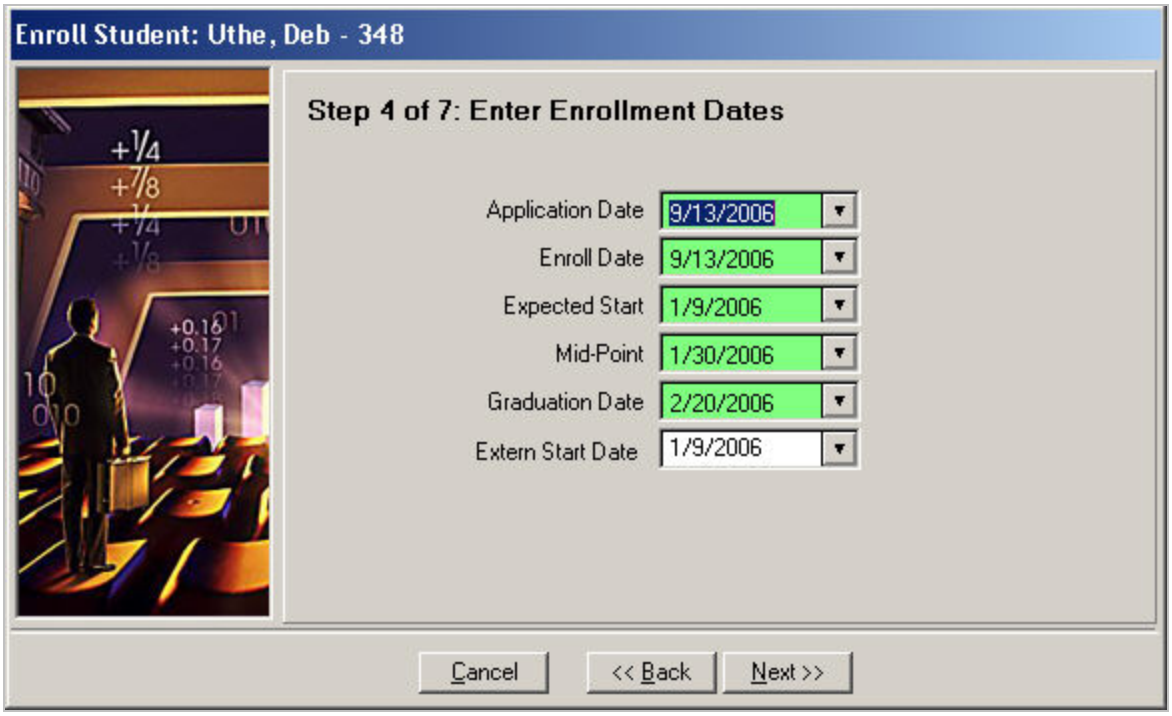
    If you did not select a start date on the previous page of the wizard, the term start date will be used as the student's start date for the enrollment.

14. Select the **Billing Method**. The billing methods are set up under Lists > Student Accounts > Billing Methods. The system defaults to the billing method for the student's primary Billing Affiliate.

15. Select any previous permanent out enrollment from the **Linked SAP Enroll** list to be linked with this new enrollment.

    Note: This field is displayed only if the system configuration for **SAP Enrollment Linking?** is set to Yes in Setup > Academic Records > Settings.

16. Click **Next**. Step 4 of 7: Enter Enrollment Dates of the Enroll Student wizard is displayed.

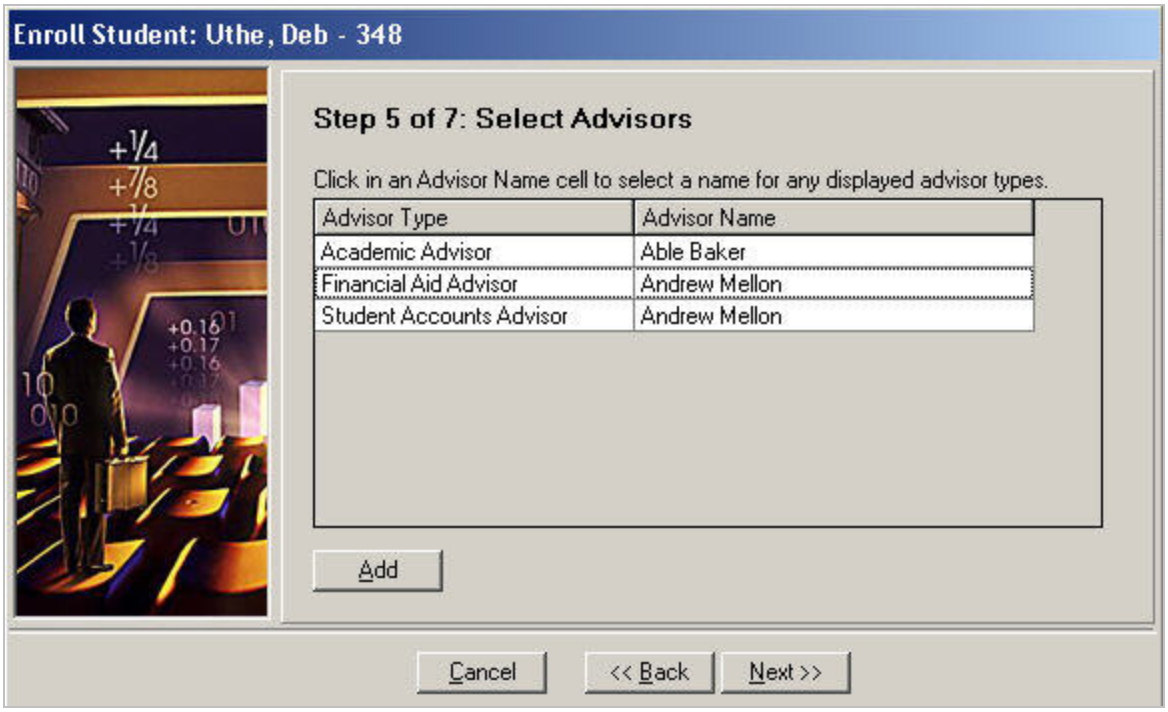


17. Enter appropriate dates for **Application Date**, **Enroll Date**, **Expected Start**, **Midpoint**, **Graduation**, and **Extern Start Date**. CampusNexus Student fills in these dates from the program version setup. You can change these dates only if they are set up to be modifiable.

    If the Program Version is set up to require an Extern Start Date, the field is required. Otherwise, it is optional.

    Note: The Expected Start date is displayed in Orig Exp Start Date of the Enrollment form under the Date/Status tab, once the student has been enrolled.

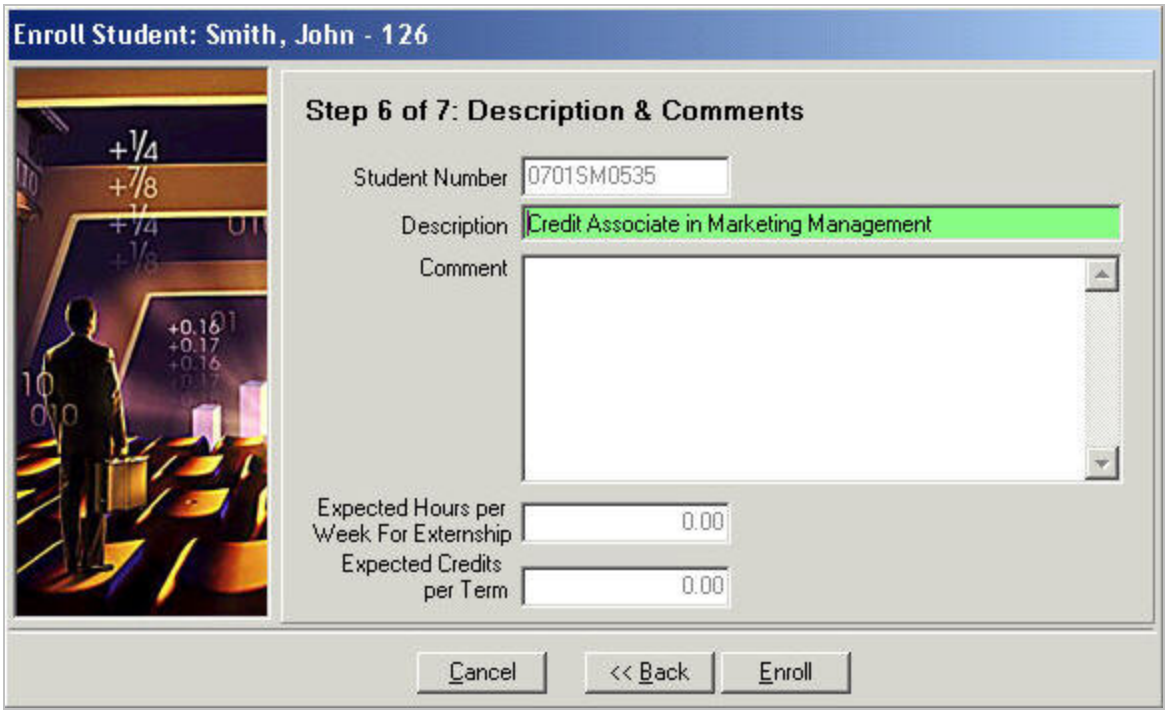
18. Click **Next**. Step 5 of 7: Select Advisors of the Enroll Student wizard is displayed.



19. Select the **Advisor Name** for each **Advisor Type** on the list.

    If necessary, click **Add** to add additional Advisor Types to the grid. On the Add New Advisor form, select the **Advisor Type** and **Advisor Name**, and click **Save**.

20. Click **Next**. Step 6 of 7: Description & Comments of the Enroll Student wizard is displayed.



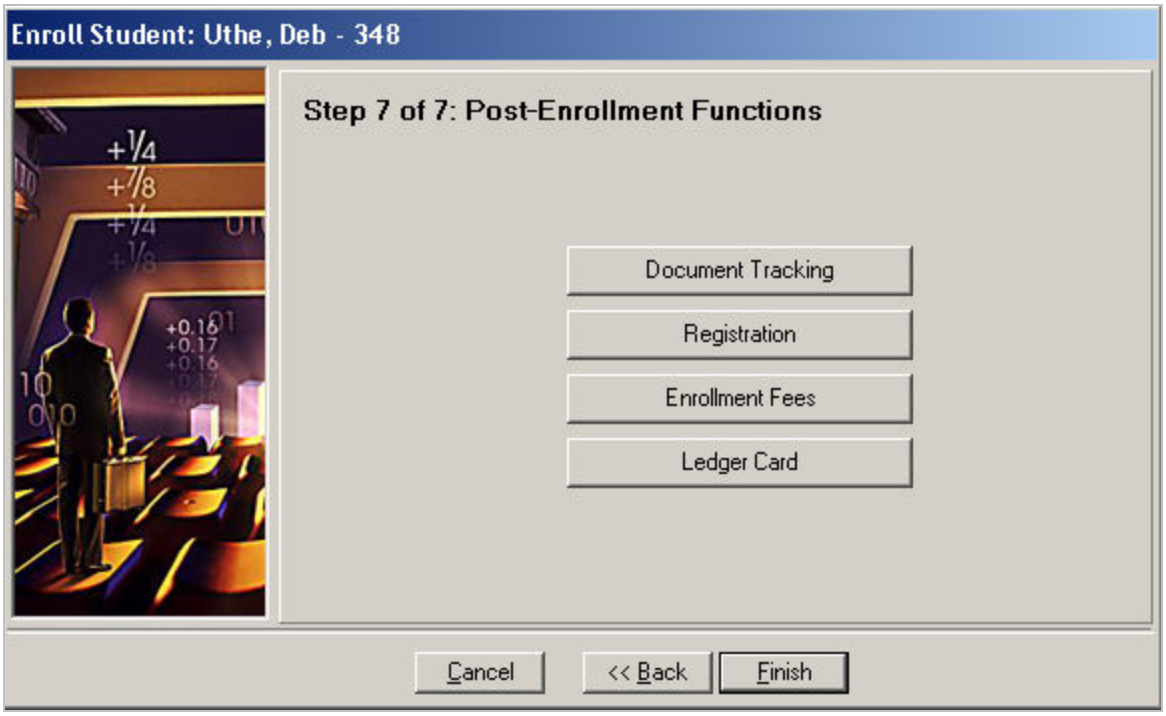
The **Student Number** field displays the student's ID. The **Description** field displays the program selected in Step 2.

The values displayed in Expected Hours per Week For Externship and Expected Credits per Term are assigned when setting up a program version or during individual student enrollment.

21. Enter any **Comments** about this enrollment.
22. Click **Enroll** to complete the enrollment.

    CampusNexus Student displays an confirmation message when the enrollment is successful.

    If entrance tests are attached to the program version in which the student is being enrolled, those entrance tests will be attached to the student's enrollment record. When the enrollment wizard is completed and the user adds the enrollment, CampusNexus Student populates the Prospect Test table with any rows that exist in the Test by Program Version table for the program version in which the student was enrolled.
23. Click **OK**. Step 7 of 7: Post-Enrollment Functions of the Enroll Student wizard is displayed.



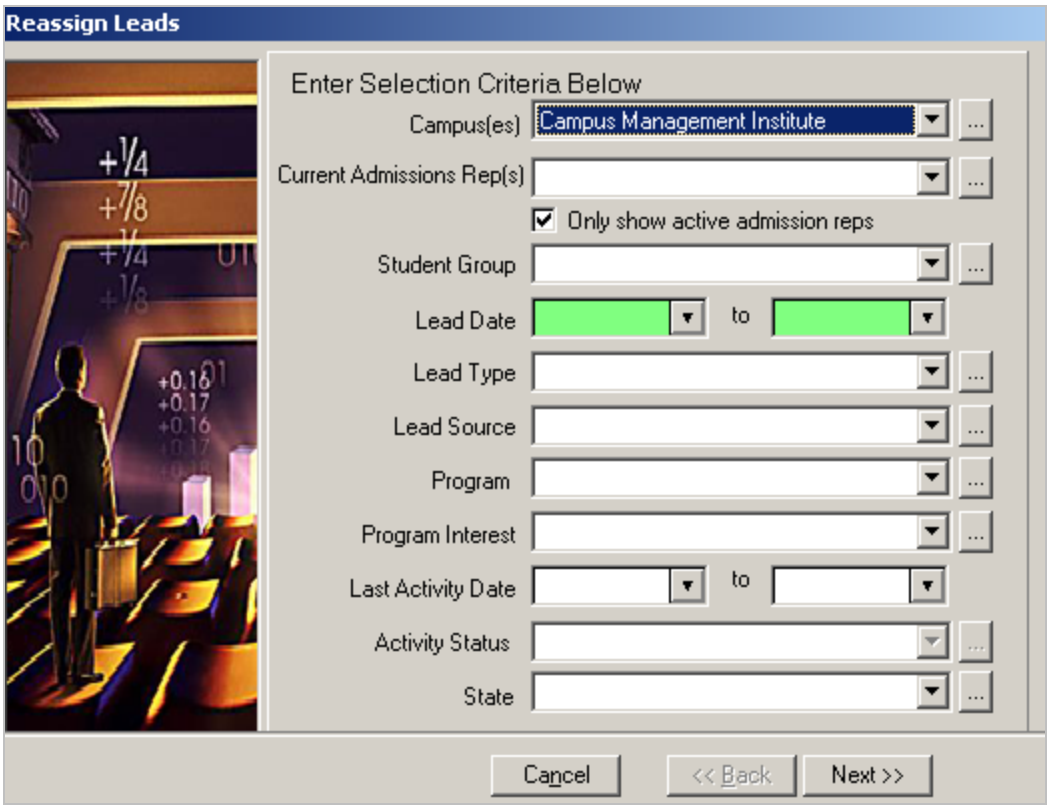
24. If your institution requires the person enrolling a student to review certain forms immediately after enrollment, CampusNexus Student display options to review the forms and perform the necessary actions. This form checks the setup flags for *Academic Records* (Enrollment). After enrolling, the items selected on the Academic Records Enrollment Settings form are displayed. You cannot exit the enrollment wizard until you have gone through the required forms. This procedure does not require you to edit anything on the forms, but it will display the data for your review. These items could include Document Tracking, Registration, Enrollment Fees, Auto Charge Transactions and Ledger Card.
25. After the forms are processed, click **Finish** to complete the enrollment process.

Reassign Leads

Sometimes, you may want to reassign leads to one or more different Admissions Representatives. The Reassign Leads wizard provides an efficient method for reassigning these leads to single or multiple Admissions Representatives, and to different, multiple campuses, depending on the needs of your institution.

To reassign leads to one or more new admissions representatives:

1. Navigate to **Daily** > **Admissions** > **Reassign Leads**. The Reassign Leads wizard is displayed.



2. Select one or more campuses from the **Campus** field. The list will display all campuses you can access.

   Note: If you do select to reassign leads to more than one campus, you will later only be able to select admissions reps, student groups, and lead sources shared by all selected campuses.

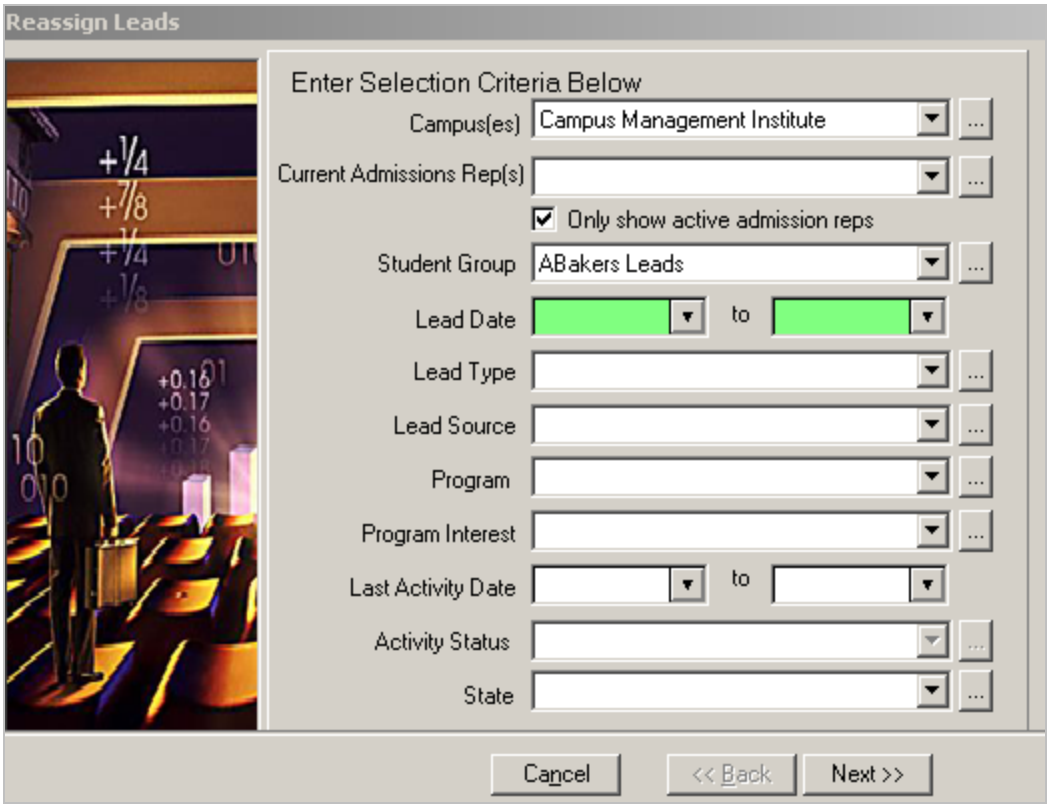
3. Select the **Current Admissions Rep(s)** from whom the leads are to be reassigned.

   - If **Only Show Active Admissions Reps** is selected, only **Active** current admissions reps are displayed in the drop-down list.
   - If **Only Show Active Admissions Reps** is not selected, the drop-down list displays **Active** and **Inactive** admissions representatives.

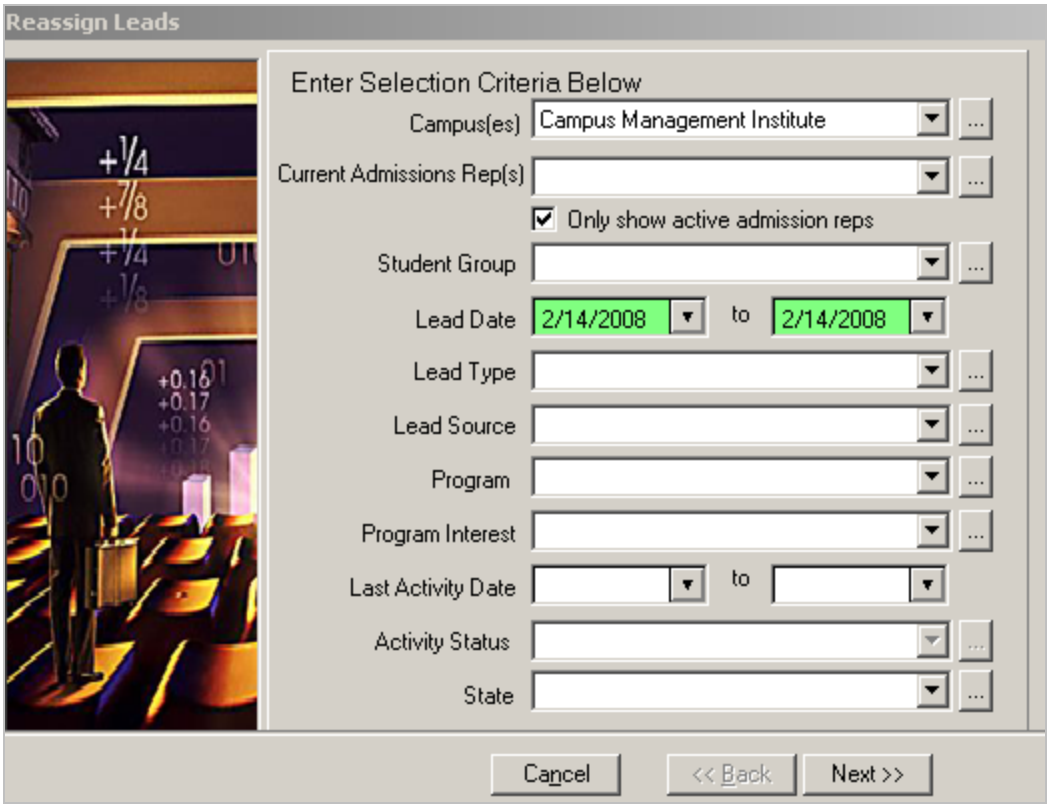
   Check or clear the check box accordingly.

4. Select a **Student Group** to reassign the lead. No other selection criteria are required to continue processing. You may, however, use the other selection criteria on the screen on an optional basis. If you do not need to use additional selection criteria, click the **Next** button and proceed to **Step 13.** Otherwise, continue making choices on this

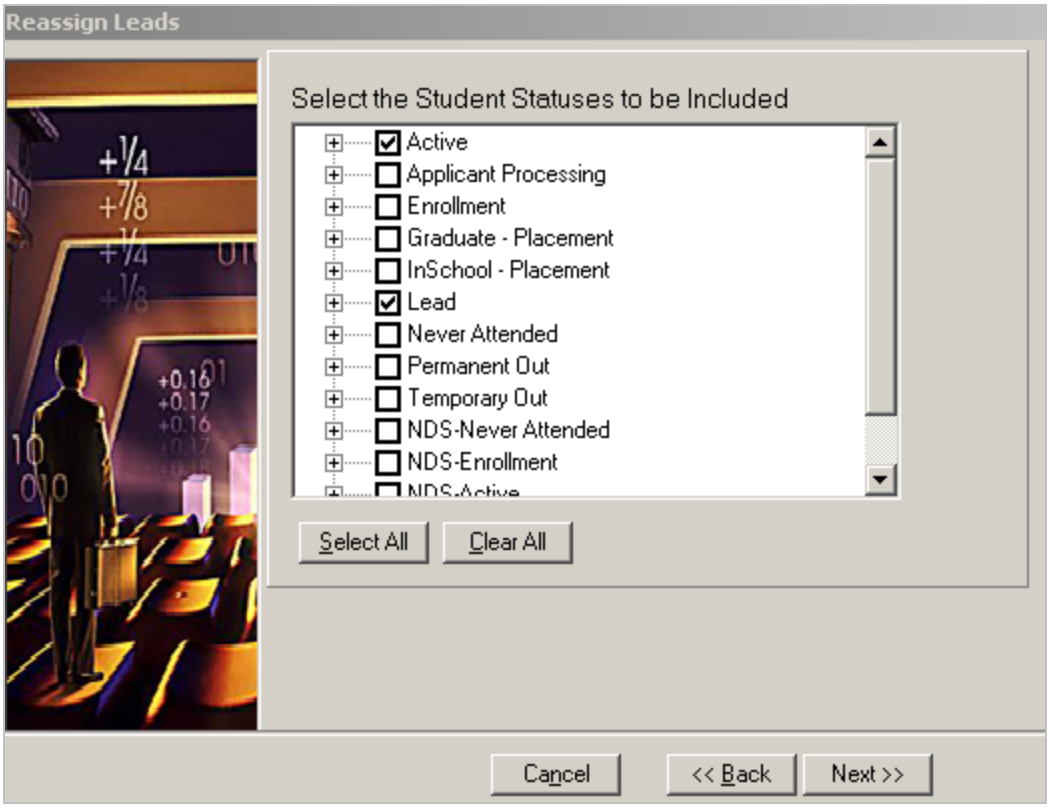
screen.



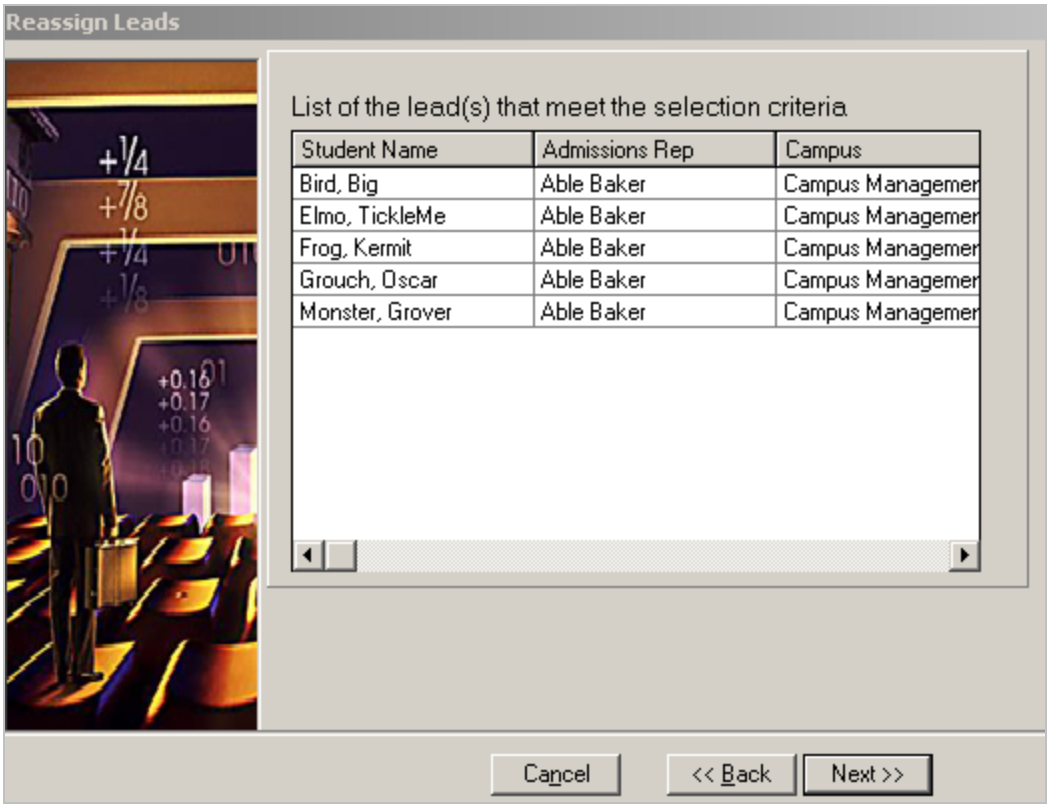
5. If you have selected a **Student Group**, the **Lead Date** is not a required field. If you have not selected a Student Group, or if you want to select only leads within a specific range of dates, enter or select the Lead Date range. The End Date of the date range is permitted to be the same date as the Begin Date, if necessary.



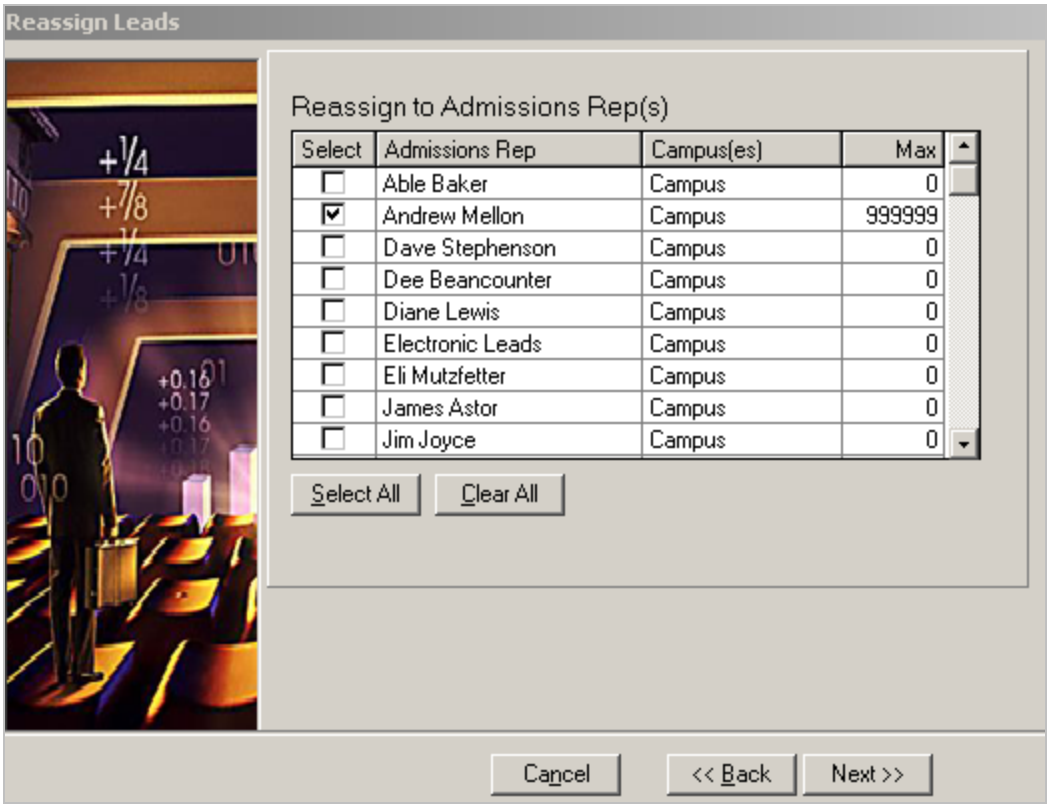
6. Select a **Lead Type** to be reassigned. If you leave **Lead Type** blank, *all* lead types will be reassigned.
7. Select a **Lead Source** to be reassigned. If you leave **Lead Source** blank, *all* lead sources will be reassigned.
8. Select a **Program** to be reassigned. If you leave **Program** blank, *all* programs will be reassigned.
9. Select a **Program Interest** to be reassigned.If you leave **Program Interest** blank, all program interests will be reassigned.
10. Enter or select the **Last Activity Date** range.
11. Select an **Activity Status** from the drop-down list.
12. Select a **State** from the drop-down list. If you leave **State** blank, all states will be reassigned.
13. Click **Next**.



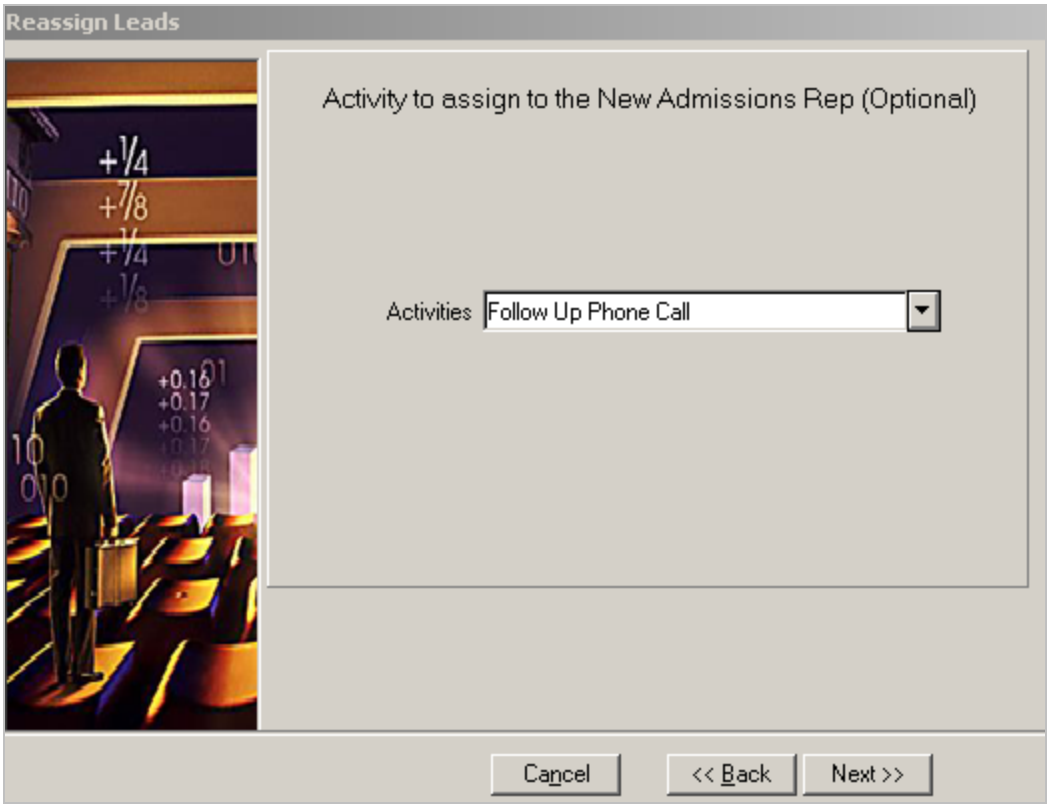
14. Select the **Student Statuses** to be included in the reassignment. Click the **plus signs** (+) to expand the list of statuses. Click the boxes beside the status descriptions to select them. If you select a high-level status, the lower-level statuses below it in the tree are also selected.
15. Click **Next**.



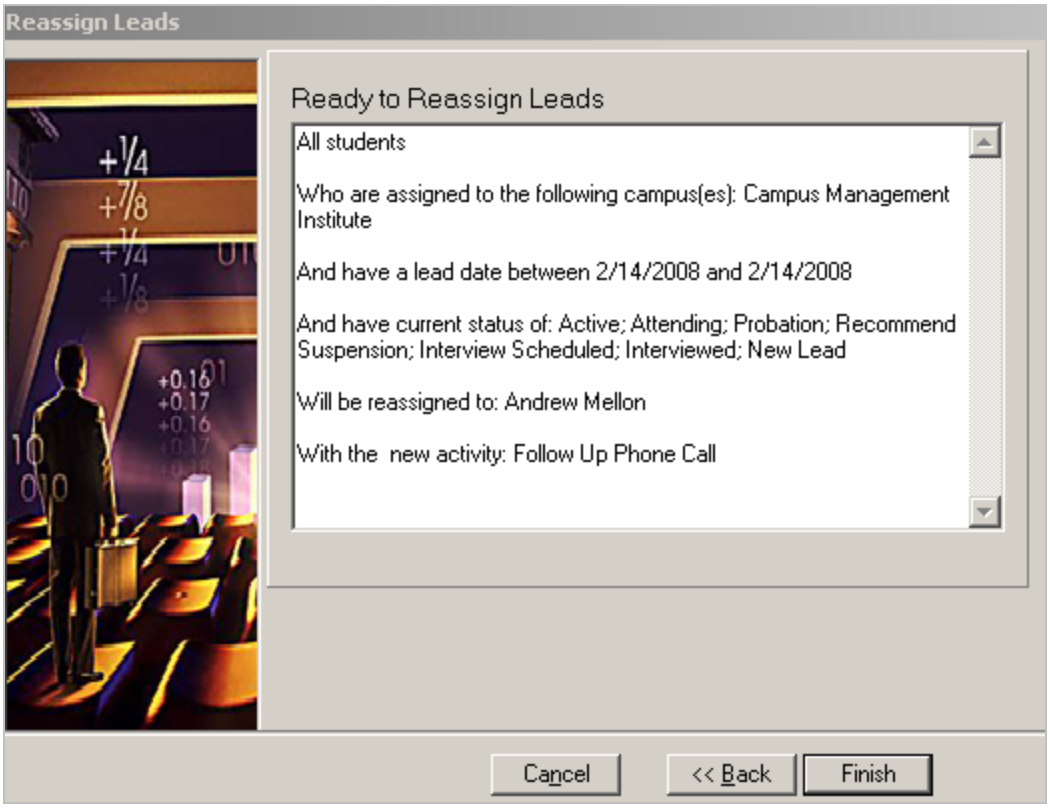
16. If these are the leads you want to reassign, click **Next**. Otherwise, click **Back** to enter revised selection criteria.



17. Select the **Admission Rep(s)** to whom the leads will be assigned. Click the box next to a rep's name to select or deselect a representative. A check mark in the box next to the representative's name means that the representative will share in the reassignment of leads. Click **Select All** or **Clear All** if necessary to help in the selection process. You can assign leads to one or more admissions representatives: to select more than one representative, check multiple boxes.
18. Enter the maximum number of selected leads to be reassigned to the selected **Admissions Rep**. **Note:** For selected reps, the program will default to a maximum of 999,999 leads. If you do not change this default, the first representative listed will receive all transferred leads.
19. Click **Next**.



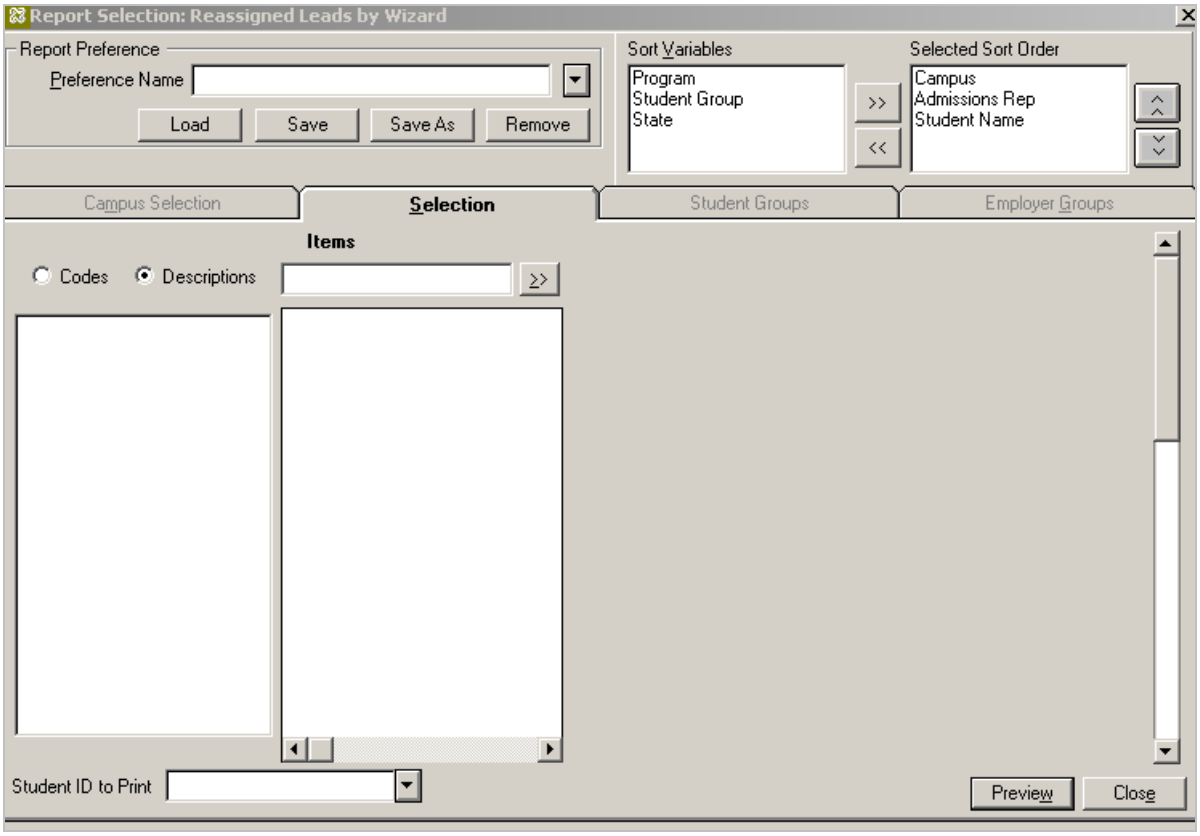
20. Select the **Activities** to assign to the new **Admissions Representative.**
21. Click **Next**.



Important: The program will display a description of the reassignment process it is about to perform. Read this statement carefully to ensure it is what you want to accomplish. If the statement does correctly describe your intentions, click **Finish** to continue the reassignment. If the statement does **not** correctly describe your intentions, click **Back** to go back and make any necessary corrections. If necessary, you can click **Cancel** here and start all over again.

When you click **Finish**, the program will change the lead records to reflect the reassignment of Admissions Rep(s):

22. A confirmation message is displayed when the process is complete.
23. Click **OK**. Click **Print** to review and/or print the reassigned leads:



Click **Preview** to see the report:

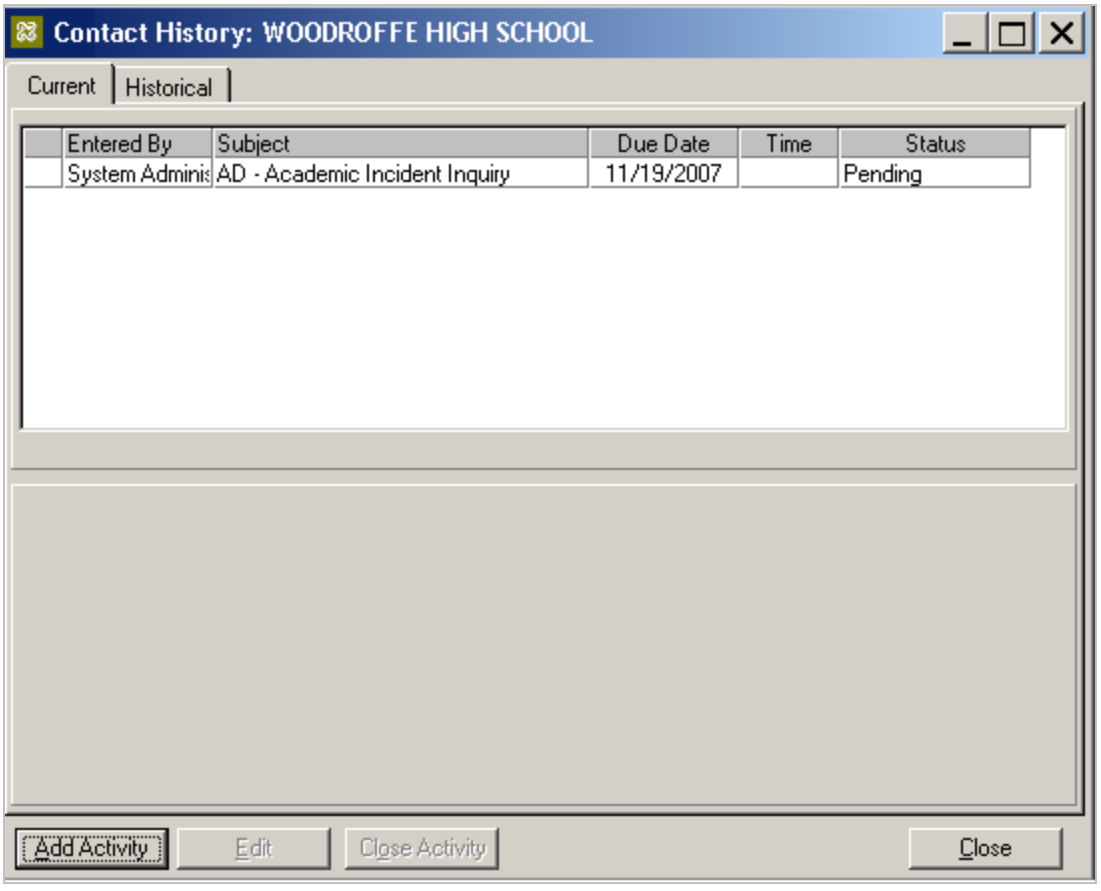
High School Activities

The High School Activities feature is very similar to student activities. You can maintain a list of activities related to a given high school. High school activities are assigned to specific staff members and can be related to specific students. It is not necessary to relate a high school contact to a student. Access to high school activities is through the High School form in the Admissions module.

Before you begin to use employer activities, set up high school-related activities under **Lists > Contact Manager > Activities**. You can set up outgoing and incoming phone calls, letters, meetings, and so on. High school-related activities will appear on the staff member's Contact Manager form and the Daily Calendar form.

To work with the high school activities forms:

1. Navigate to **Daily > Admissions > High Schools**. The High Schools form is displayed.
2. Search for a high school for which you want to view or add an activity. Search by entering one or more search criteria and click **Search** .
3. Once a high school is found, double-click the school name and click **Edit**.
4. Click **Activities**. The Contact History form is displayed. This form lists all activities related to the selected high school.

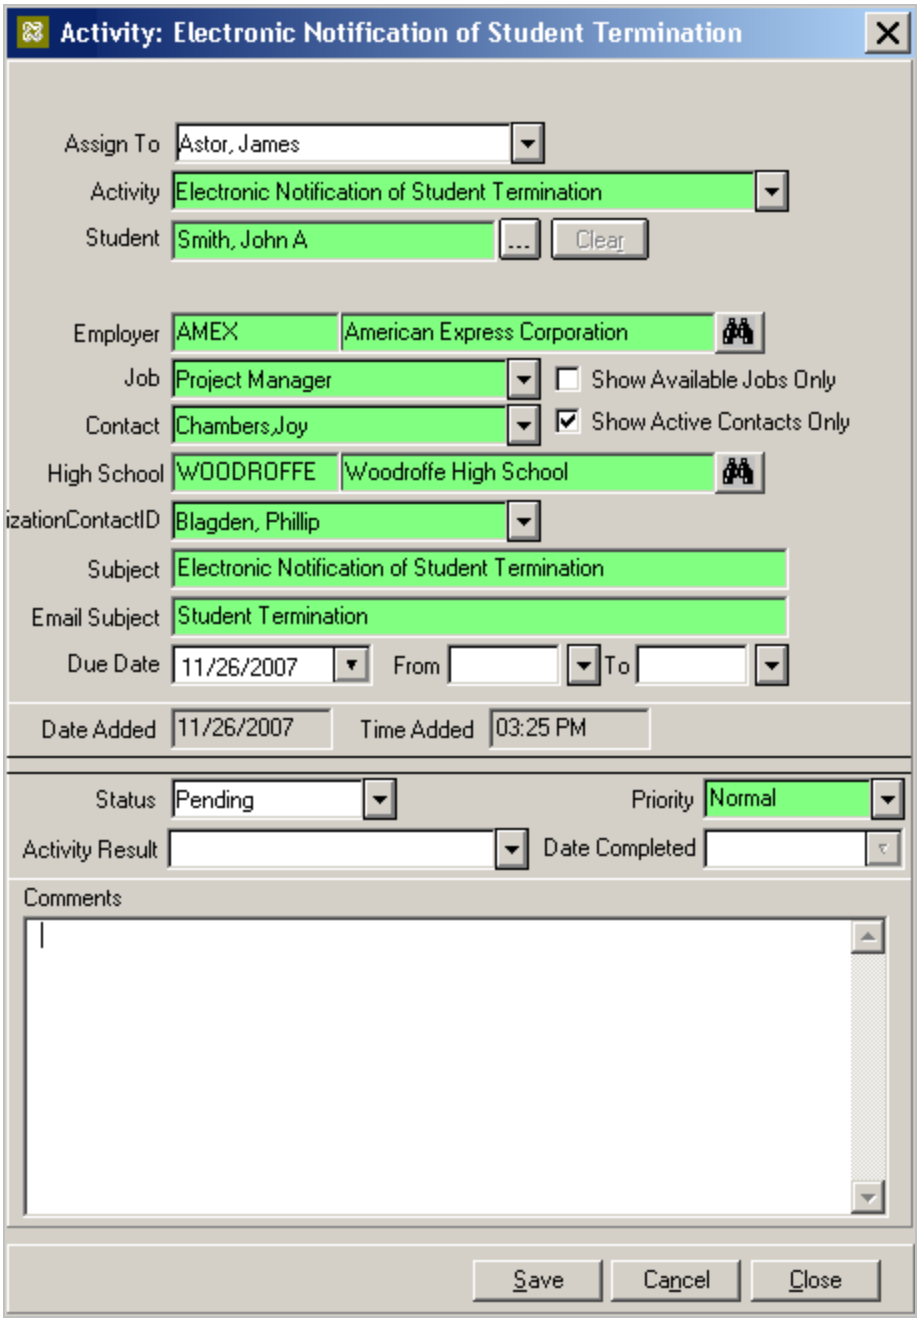


5. Click **Add Activity** to add a new activity, or select an activity on the grid and click **Edit** to see the details. The Activity form is displayed.

When adding an activity from the High School form, users will see the selected high school as the default in the High School field after clicking the high school search button on the activity form.

6. Enter or edit the activity data in the Activity form as required.

    - The **Assign To** field contains your name. If your system administrator has granted you permission, you may assign an activity to another person by using the drop-down list.
    - When adding a new **Activity**, you must select from the list of activities that have been previously set up under Lists > Contact Manager > Activities.
    - The **High School** shows the name of the High School previously selected on the High School form.
    - The **Subject** is a required field.
    - The **Due Date** and **From** and **To** times of the activity may be entered.
    - The **Status** defaults to *Pending*. Other status values may be selected from the list.
    - The **Priority** defaults to *Normal* but may be set to *Low* or *High* if required.
    - If the activity Status is entered as 'Closed', you must select and item from the **Activity Result** list.
    - When the activity is complete, the **Date Completed** field may be updated.

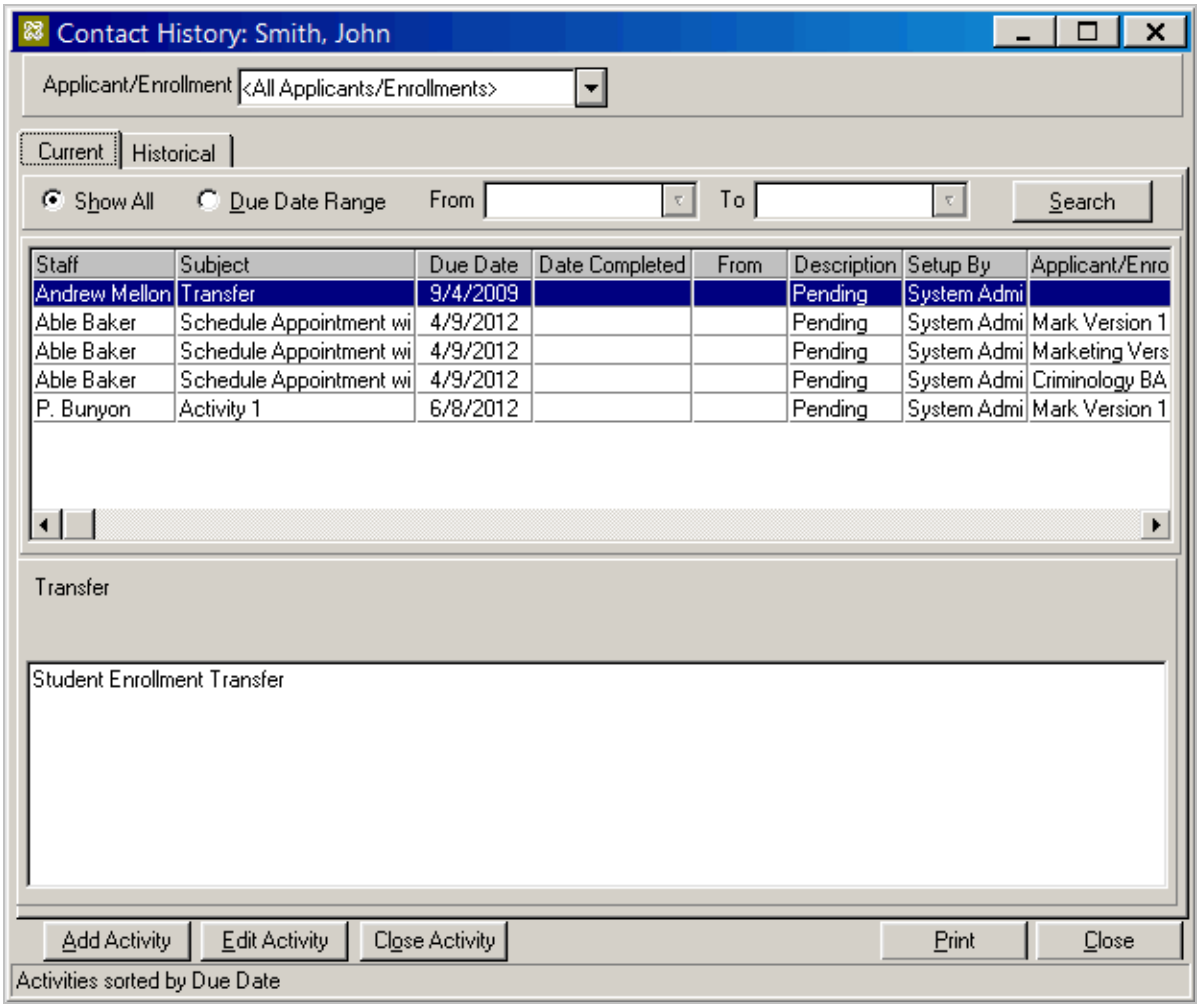


Note: When an activity record is being edited by a staff member, it is locked and may not be viewed by other staff members. When you finish editing the activity, the record is unlocked and may be accessed by another staff member. If you attempt to edit an activity that is already being edited by another user, you will see a message *[Staff Member Name] is currently working on this activity. Please try later.*

If you are editing an activity for a long period of time, you may see a message *This activity is set to unlock automatically within [NNN] minutes. Click Continue if you wish to continue.* Clicking **Continue** to continue editing the activity. If you do not acknowledge the message, the system eventually terminates your editing session and you may lose any changes you have made to the activity.

7. Click **Save** to save your new activity or changes to an existing activity. CampusNexus Student closes the Activity

form and adds the activity to the **Contact Manager Activities** list of the assigned staff member.



8. Click **Close** to close the form.

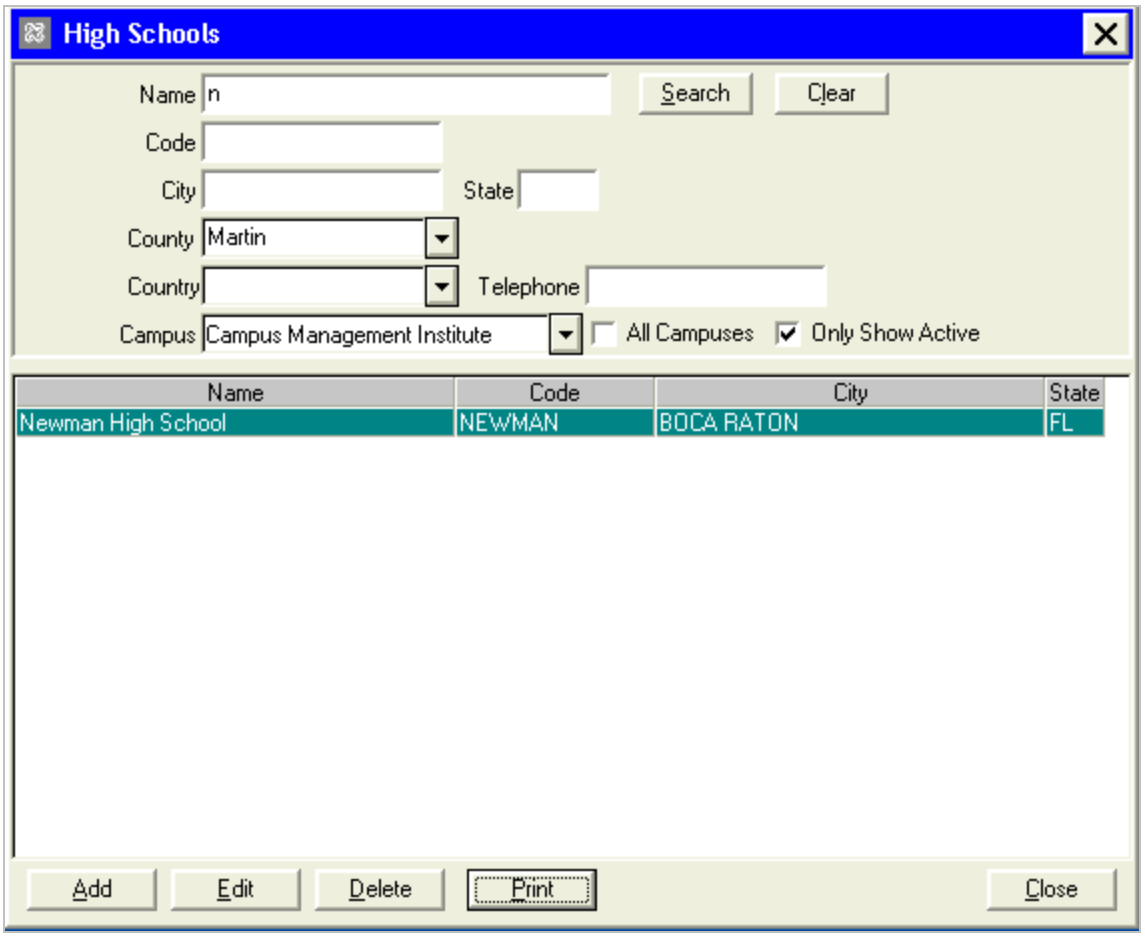
High Schools

The High Schools list contains high schools from which your students are drawn. Your institution may have special relationships with people at these schools such as principals, guidance counselors, and so on. Reports can be produced that indicate the number of students from each high school. The high school code is selected when you fill in the lead (student) record.

You can add an unlimited number of contacts to any high school record. Mailing labels can be printed for contacts at a selected high school. From the Reports menu, you can print contact labels for multiple schools.

To add or edit a high school:

1. Navigate to **Daily > Admissions > High Schools** . A Search form is displayed.



2. To find a high school that is already in the table, enter selection criteria and click **Search**. A list of all high schools meeting your search criteria is displayed. Click **Clear** to start a new search.
3. Click **Print**. The High School report displays a list of all high schools and their associated information as entered in the High School form.

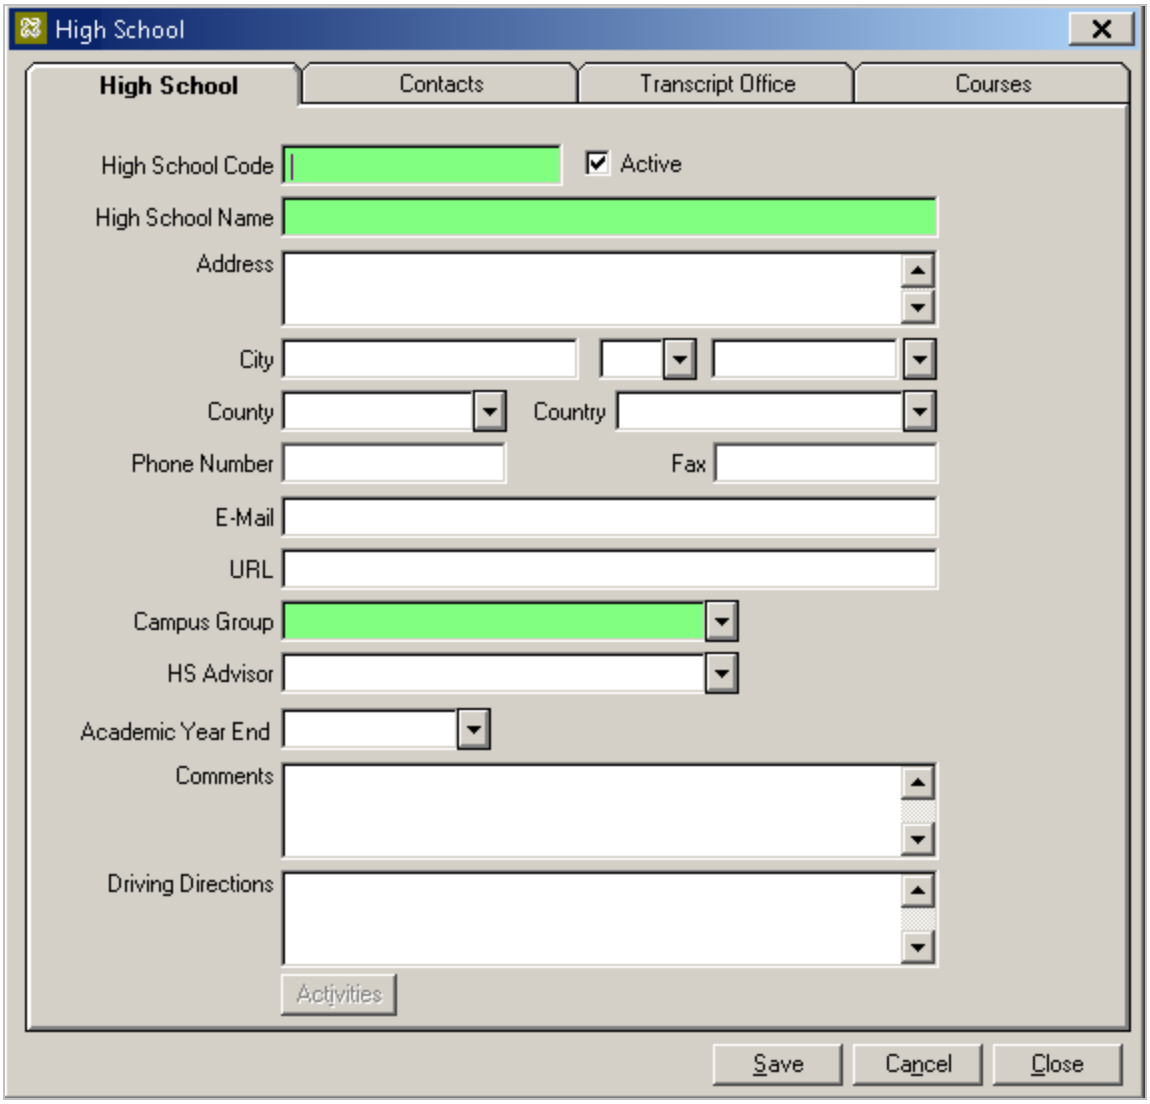
Sorted by: State, City, HS Description

2/15/2006
12:25:26PM

Code	Description	Active	Address	Contact Phone
FL				
Boca Raton				
BRHS	Boca Raton High School	No		Guidance Counselor (561)555-4000

4. Select the high school that you want to modify and click **Edit**. The High School form is displayed where you may enter your changes.
5. Click **Delete** to remove a High School. Click **Yes** to continuing deleting the school or click **No** to return to the High School search form.
6. Click **Add** to add a new high school. The **High School** form is displayed.



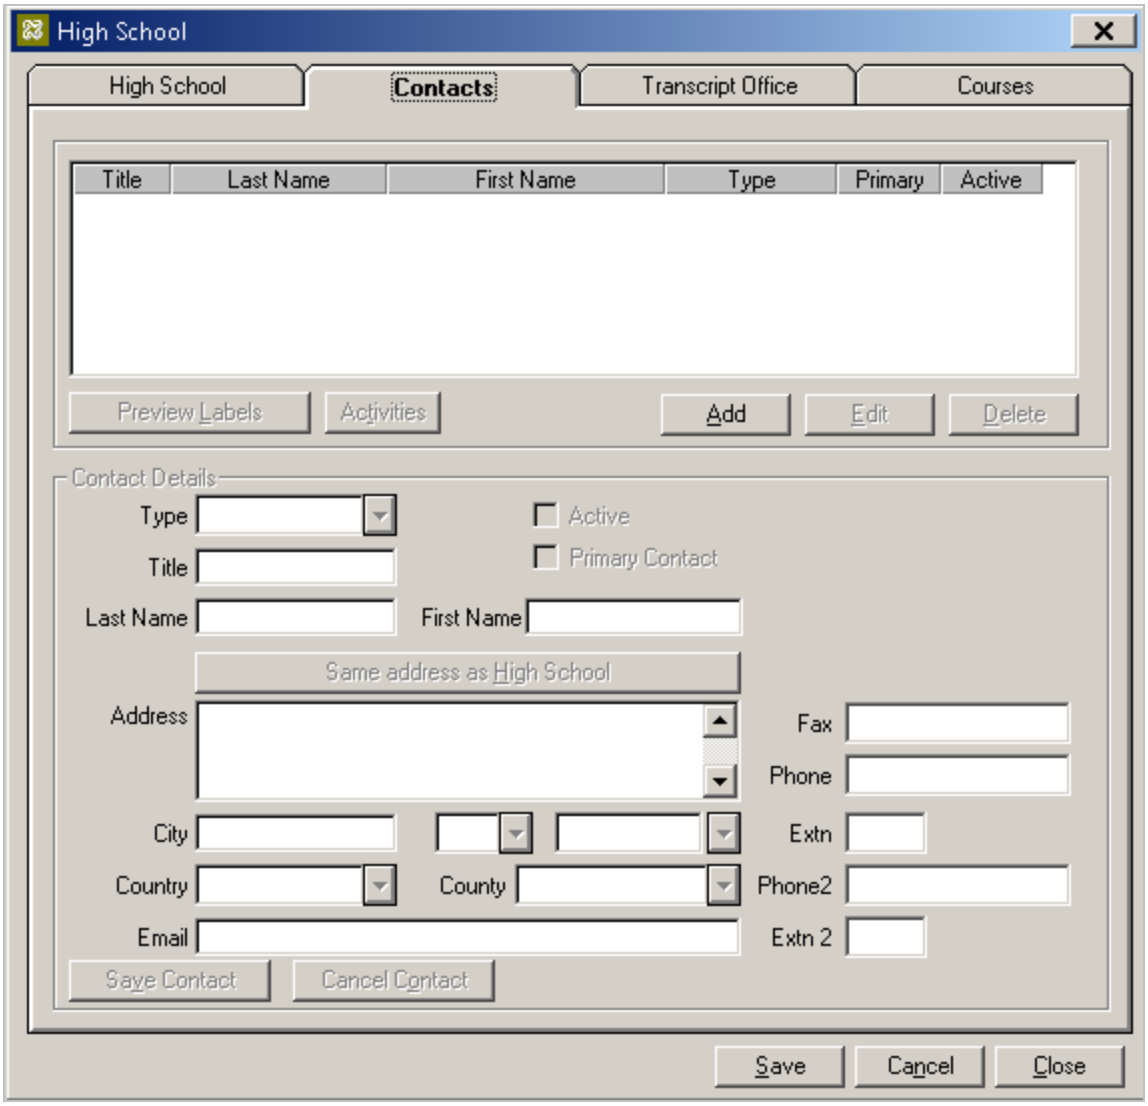
7. Enter the **High School Code**, **High School Name**, **State,Address**, and **City** for the High School.
8. Enter the **State** or select it from the list.
9. Enter the **ZIP Code** or select it from the list.
10. Select the **County**.
11. Select the **Country**.
12. Enter the **Phone** and **Fax** numbers for the High School.
13. Enter an **E-mail** address for the High School.
14. Enter the **URL** containing the web address for the High School.
15. Select the **Campus Group**.
16. Select the **HS Advisor**.

Note: The list shows those staff members who are members of the staff group associated with an advisor group or "Organization Liaison" are active.

17. Select the **Academic Year End**.
18. >Enter any **Comments** that pertain to the high school.
19. >Enter **Driving Directions** from the campus to the high school.
20. >Click **Activities** to open a form where you can add/edit activities associated with the high school.
21. Click **Save**.

Contacts tab

1. Click the **Contacts** tab.



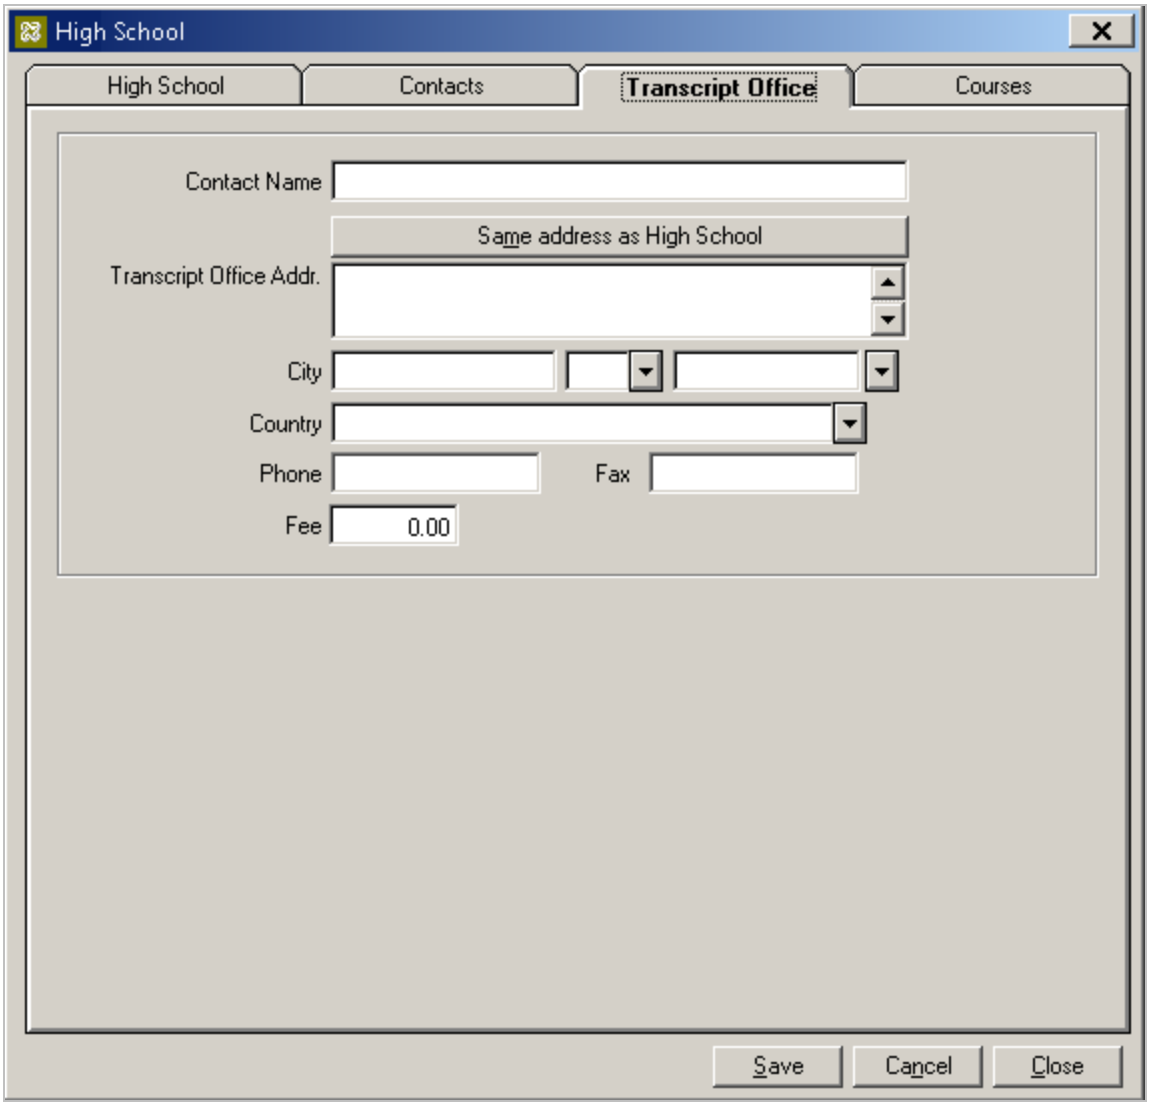
2. Click **Add** to add a new contact using the Contact Details fields.
3. Select an existing **Contact Type** from the list or enter a new contact type. When you add a new contact type, the

description is added to the High School Contact Type table.

4. Select **Active** to indicate that this contact is currently active.
5. Select **Primary Contact** to indicate that this is the primary contact for the high school.
6. Enter the name and address information for the contact. If the address information for the contact is the same as for the school, click **Same address as High School**. The school address information is copied to the contact form.
7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Transcript Office tab

1. Click the **Transcript Office** tab.

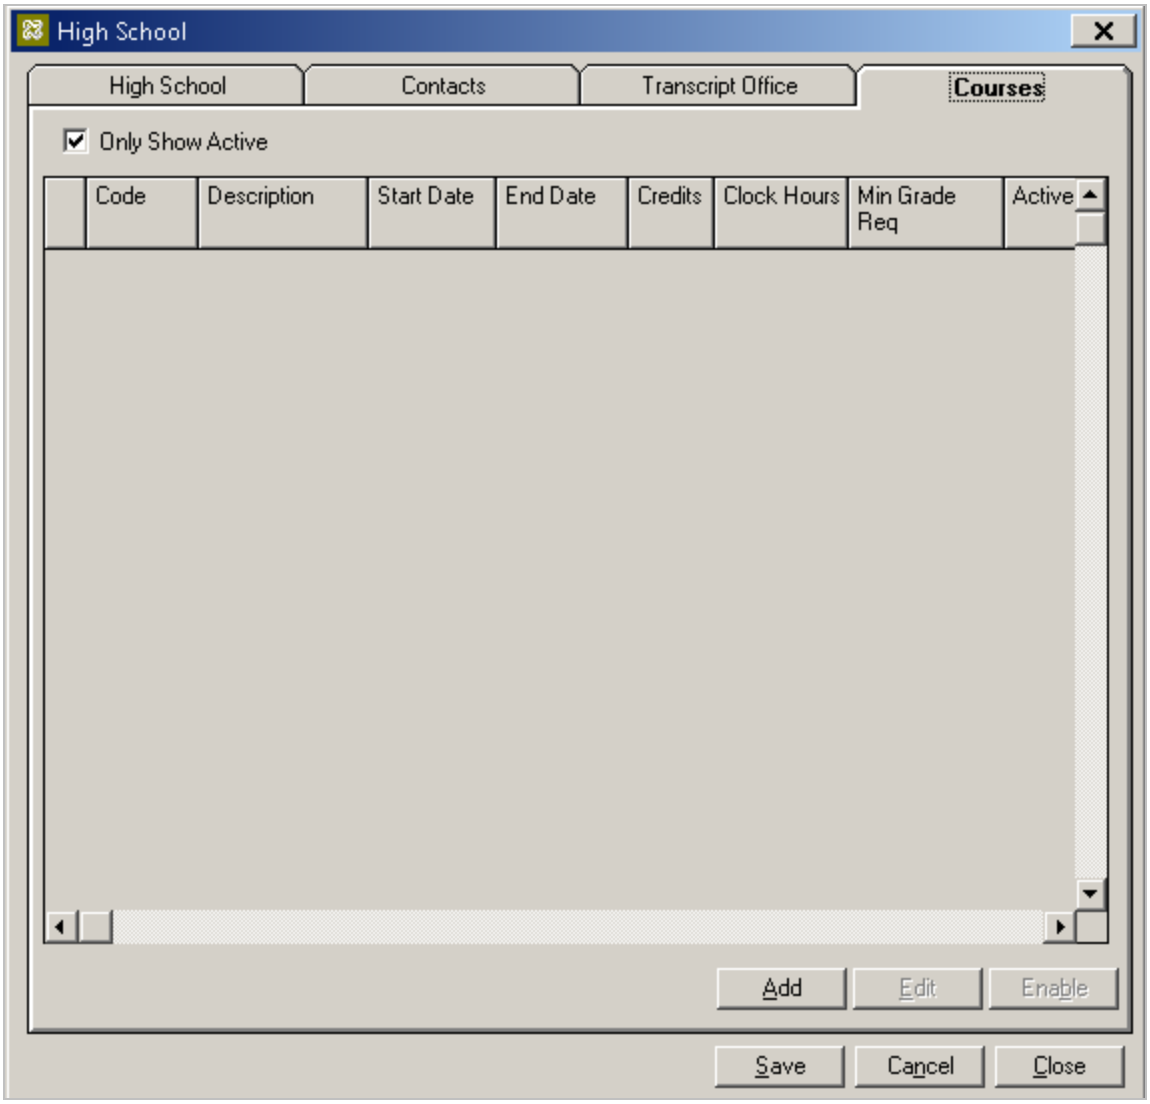


2. Enter the name and address information for the contact. If the address information for the Transcript Office is the same as for the school, click **Same address as High School**. CampusNexus Student copies the school address information to the form.

3. Enter the **Fee** associated with the transcript service.
4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

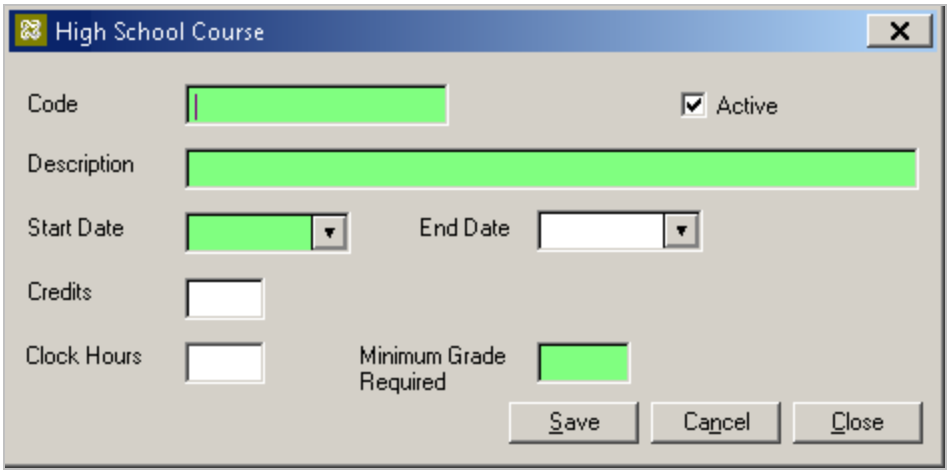
Courses tab

1. Click the **Courses** tab.



This tab allows you to associate and maintain courses with a high school (similar to the way courses can be associated and maintained with colleges).

2. Select the **Only Show Active** check box to display only the active courses for the high school.
3. Click **Enable/Disable** to enable or disable high school courses, respectively.
4. To add or edit a course in the grid, click **Add** or select a course in the grid and click **Edit**.
5. On the **High School Course** form, enter the following information for the high school course:



Field Descriptions

Field	Description
Code	Variable-length string with a maximum length of 16 characters.
Description	Variable-length string with a maximum length of 75 characters.
Start Date	Start date of the course in the form MM/DD/YYYY.
End Date	End date of the course in the form MM/DD/YYYY.
Credits	Numeric value for the course credits.
Clock Hours	Numeric value for the course clock hours.
Minimum Grade Required	Letter grade required as a minimum.

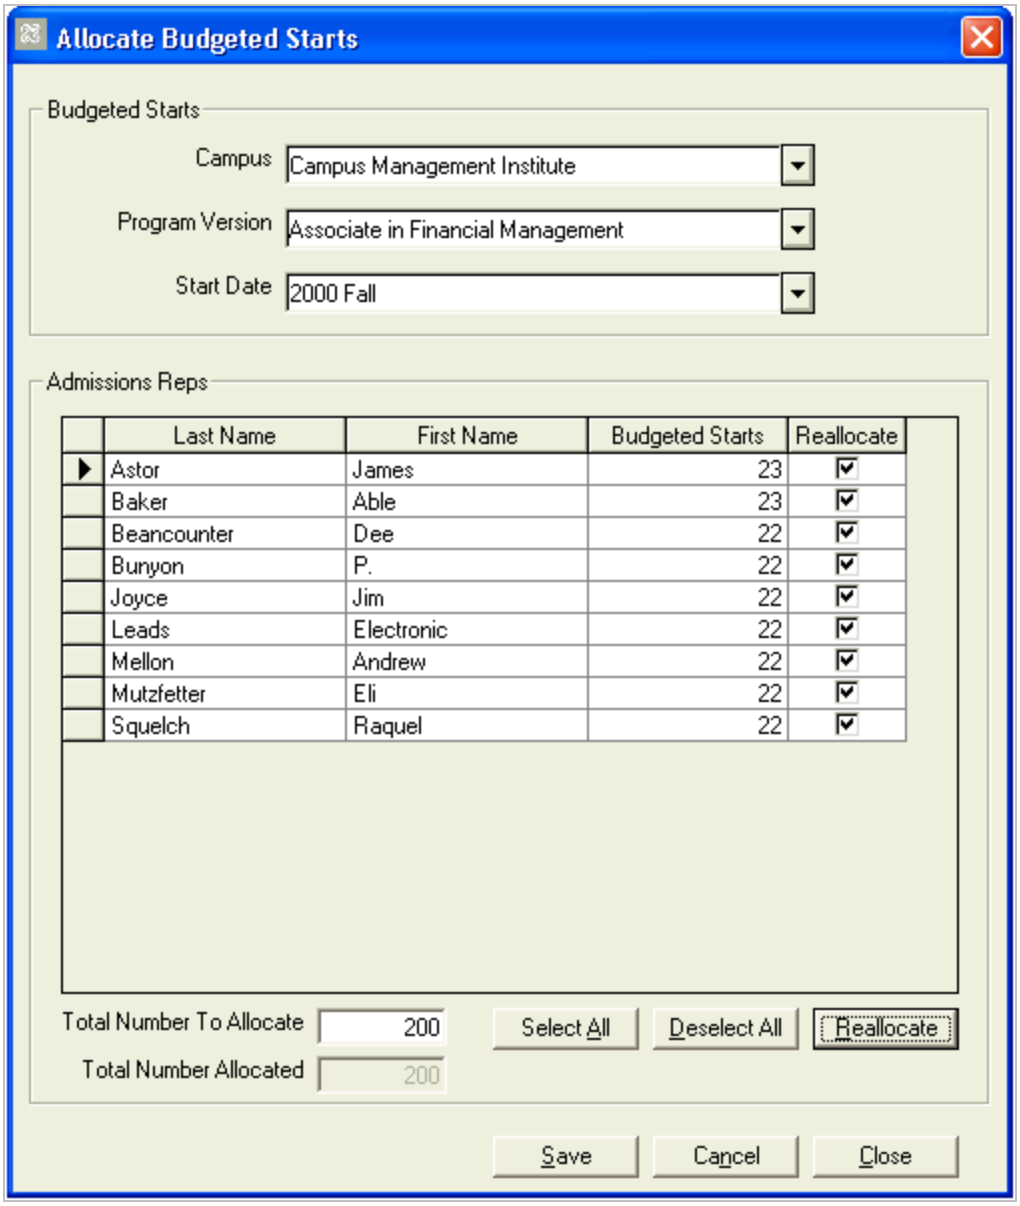
6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Allocate Budgeted Starts

CampusNexus Student maintains a budgeted start number for start dates and lead categories and tracks a budgeted start number for each admission representative. A daily process assigns a budgeted number of starts per admissions representative by program version and start date. You can enter numbers for each staff member, or you can automatically distribute a specified number of starts evenly across selected admissions representatives.

To allocate budgeted starts:

1. Navigate to **Daily > Admissions > Allocate Budgeted Starts**.
2. Select the Budget Starts options: **Campus**, **Program Version**, and **Start Date**.



3. The Admissions Reps area of the form displayed a list of admissions reps displayed, along with the number of any

allocated budgeted starts. Use **Select All** or **Deselect All** to include or exclude all reps, or use the check boxes in the Reallocate column to include or exclude individual reps.

4. Enter the number of starts to allocate into the **Total Number To Allocate** field. Or, enter specific numbers in the Budgeted Starts column for individual reps.
5. Click **Reallocate**. The budgeted starts are allocated across the selected reps evenly or as designated.
6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Transfer Credits

Staff members can review the list of courses transferred from other institutions, and add, view, or edit transfer credit information, and add course relationships.

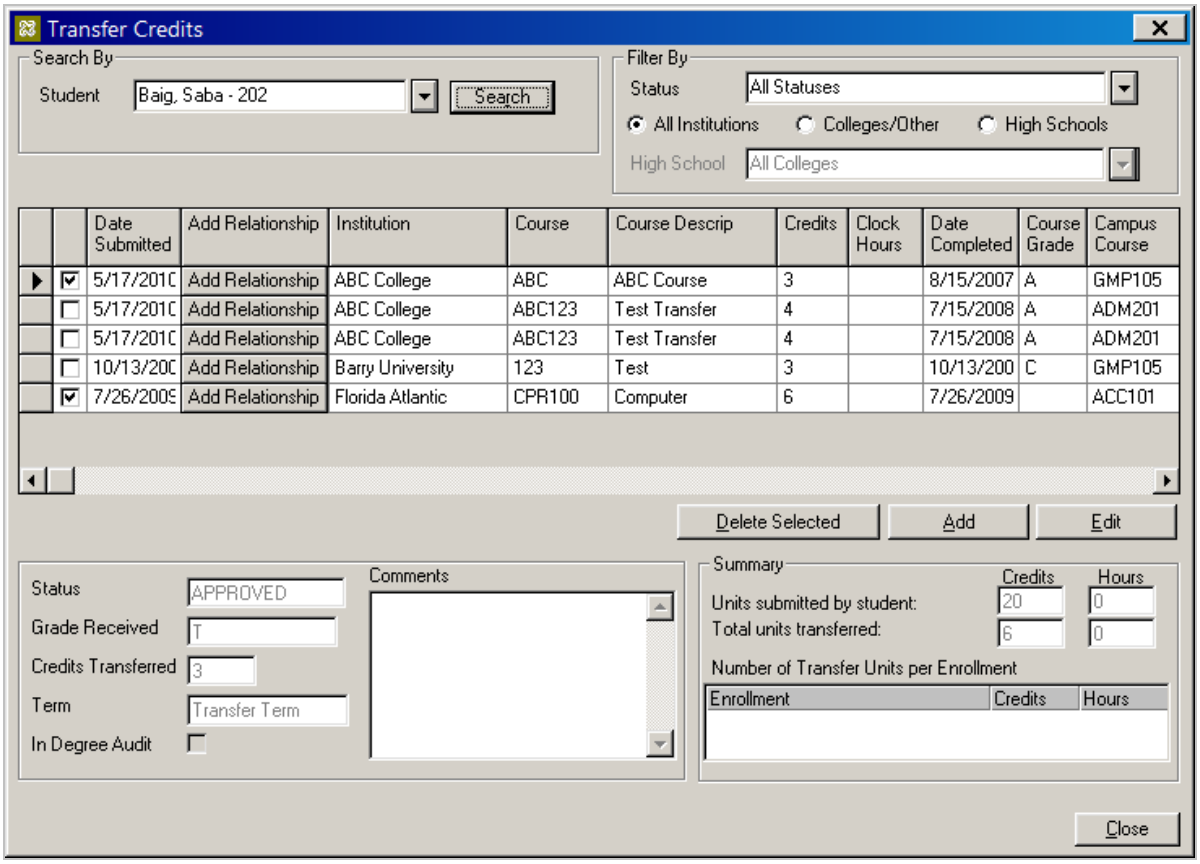
For program versions that use Academic Calendars 5 and 6 (non-term), CampusNexus Student automatically adjusts the Academic Year and Loan Period sequences and associated credits or hours and weeks as transfer credits are 'Approved' or changed from 'Approved' to a different status.

Approved transfer credits or hours in non-term configurations shorten the remaining course work that the student has to complete for the program version and is in direct relation to the academic year or loan period length and sequences. The "Credits in AY" ("Hours in AY") and "Weeks in AY" fields of the final academic year and loan periods are continually adjusted based on changes in the amount of transfer credits or hours.

When CampusNexus Student is enabled for Allow courses to be exempt from progression, the system uses the "Enrollment Status Credits (Hours)" of the linked course as the accepted value instead of the Credits or Hours value of the course on the student schedule when adjusting academic years and loan periods.

To transfer credits for an incoming student:

1. Navigate to **View > Admissions** or **Academic Records > Transfer Credits**.
   - OR -
   Navigate to **Daily > Admissions > Transfer Credits**. The Transfer Credits form is displayed.



Note: The options under **Filter By** allow you to view College transfer credit records, High School transfer credit records, or both (All Institutions). By default, **All Institutions** is selected and the drop-down lists to filter the records are unavailable.

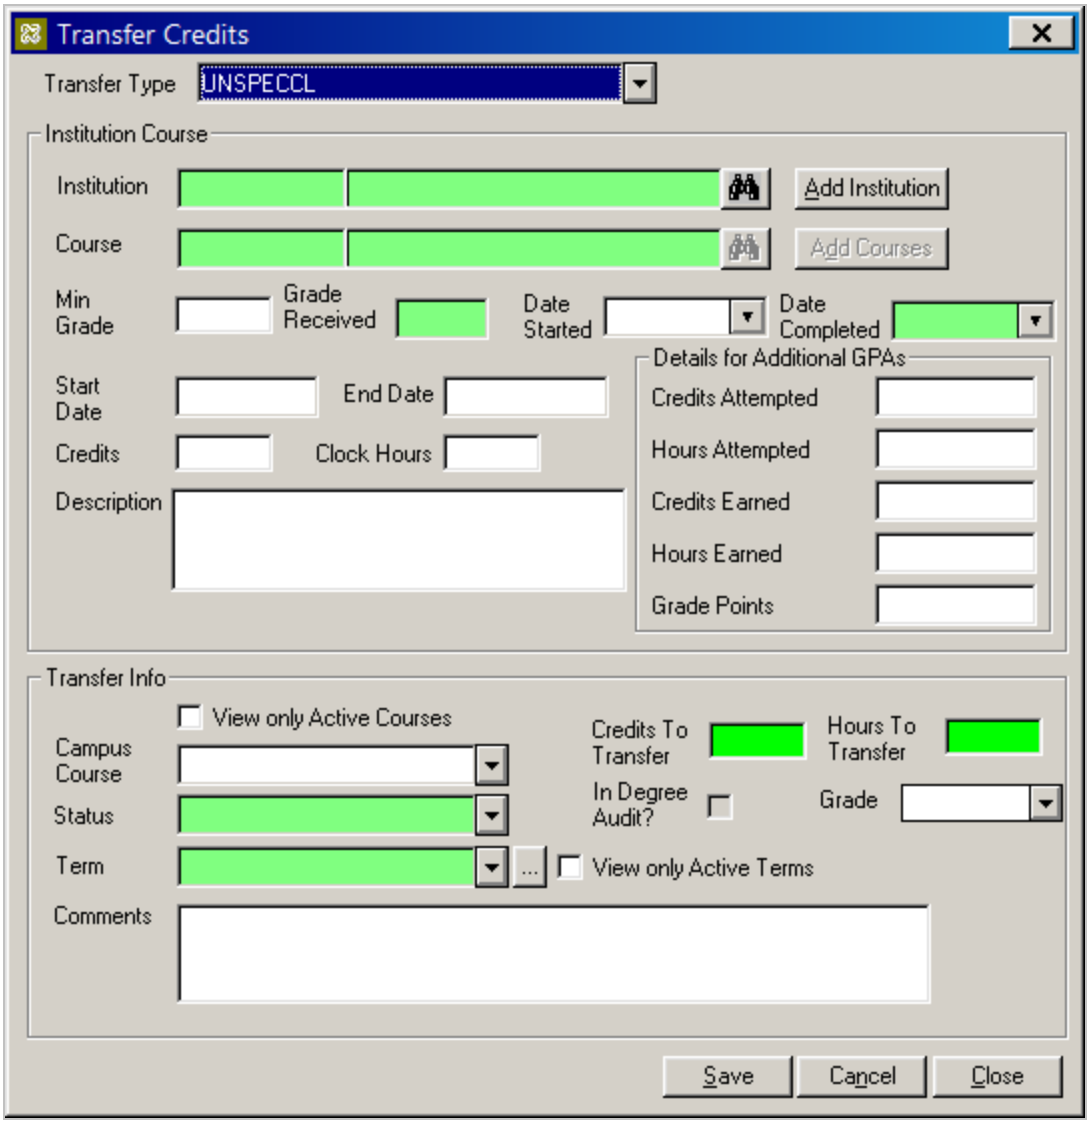
- If you select **Colleges/Other**, the College filter becomes available and only College transfer credit records get listed in the Transfer Credit grid.
- If you select **High Schools**, a High School filter becomes available and only High School transfer credit records get listed in the Transfer Credit grid. The list shows only those high schools for which Transfer Credit records are available.

Note regarding Number of Transfer Credits per Enrollment:

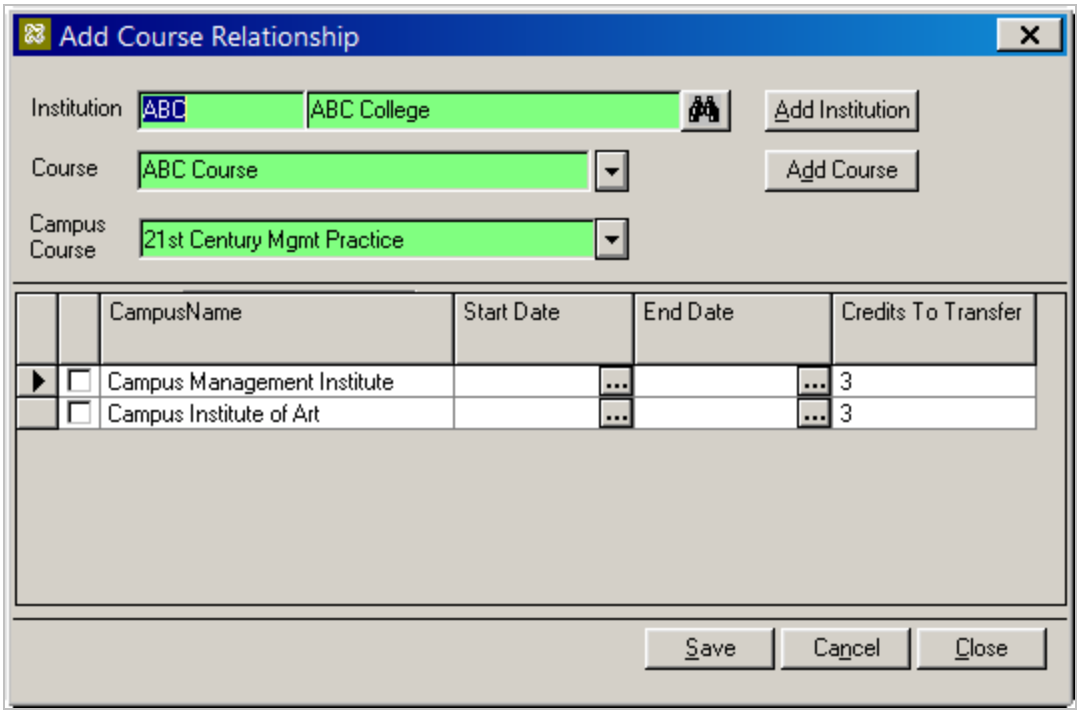
CampusNexus Student accurately tracks and updates the number of Transfer Credits on the student enrollment. If applicable, the following warning is displayed:

Transfer Credits entered exceed the number currently tracked on the enrollment. Automated processes or the academic year tool can be run to update the enrollment and Academic Years. If the student's current Academic Year is adjusted, the student should be repackaged according to the adjustment.

2. Click **Add**, or select a record and click **Edit**. The Transfer Credits form is displayed. The state (enabled/disabled) of **Add Institution** and **Add Courses** buttons depends on the staff member's Admissions security settings.



3. Complete the fields on this form as needed. See Field Descriptions.
4. To add a trans credit relationship to another campus, select a record and click **Add Relationship**. The Add Course Relationship form is displayed. Complete the fields on this form as needed.



5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Field Descriptions

Field	Description
Transfer Type	Use this drop-down list to select College or High School type of transfer credits. The list is populated with the entries available under Lists > Admissions > Transfer Type (tab). **Note**: The Institution Course frame and Transfer Info frame of the Transfer Credits form remain unavailable (dimmed) until you select a Transfer Type. If you select a College Transfer Type, you can Select/Add College and College Courses for transfer credit records. If you select a High School Transfer Type, you can Select/Add High School and High School Courses for transfer credit records.
Institution Course Fields	
Institution	Name of the institution (i.e., College/Other or High School) from where the course is being transferred is displayed in this field. You can use Search to select the institution using the Search College or Search High School forms. If the institution is not listed and you have proper access, click **Add Institution** to display a form with which to add the school.

Field	Description
Course	The name of the course being transferred is displayed in this field. You can select the course using Search. If the course is not listed and you have proper access, click **Add Courses** to display a form to add the course.
Min Grade	Minimum grade allowed for successful completion of the transferred course
Grade Received	Grade the student achieved
Date Started	Date when the student started the course
Date Completed	Date when the student completed the course
Start Date	Effective start date for the course
End Date	End date for the course
Credits	Number of credits the student earned at the institution where the course was taken
Clock Hours	Number of clock hours the student earned at the institution where the course was taken
Description	Brief description of the course
Transfer Info Fields	
View only Active Courses	Select this check box to filter terms by Active only.
Campus Course	Equivalent course offered by the selected campus
Credits to Transfer	Number of credits to transfer
Hours to Transfer	Number of clock hours to transfer
Status	Transfer status. A not yet **APPROVED** transfer status displays on the Degree Progress Audit only if a **Campus Course** is selected on the **Transfer Credits** folder. **Note**: If configured (Lists > Admissions > Transfer Status), the field displays course information on the Degree Progress Audit.
In Degree Audit?	This check box is enabled when the **Campus Course** selected is in the Program Version's required course list.
Grade	The student's grade to associate with the transferred course
Term	Term when the credits are applied **Note**: Non-term functionality in CampusNexus Student allows users to add transfer credits at any point during the student life cycle. Transfer credits adjust the academic year attributes and therefore the time it takes a student to complete the program.
View only Active Terms	Select this check box to filter terms by Active only. By default all terms, active and inactive, appear on the Term list.
Comments	Any related comments

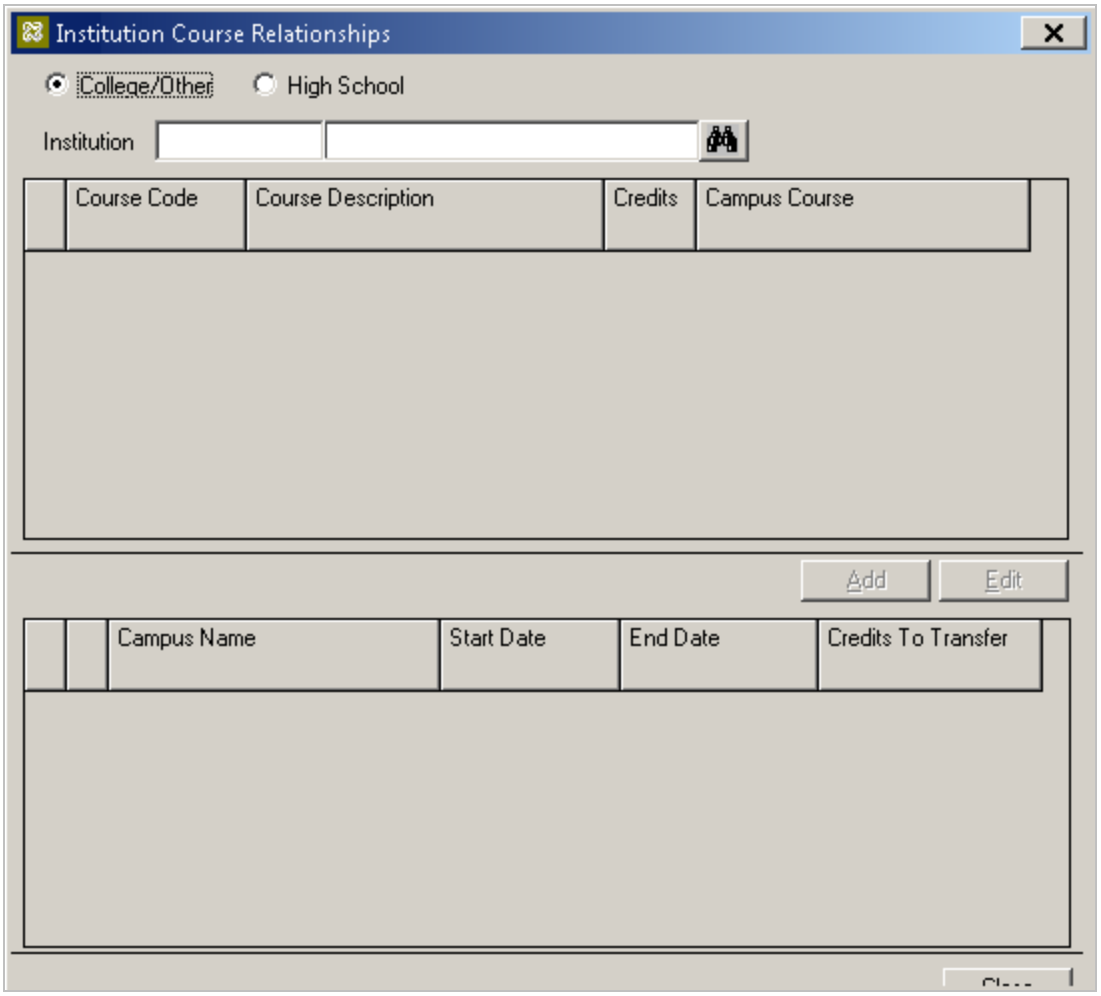
Field	Description
Details for Additional GPAs The fields **Credits Attempted**, **Hours Attempted**, **Credits Earned**, **Hours Earned**, and **Grade Points** capture the information from previous institutions so that you can include courses for students from other schools in a school-defined GPA calculation. See school-defined GPAs/Additional GPAs. When adding a new transfer credit record, the fields Credits Attempted, Hours Attempted, Credits Earned, and Hours Earned are populated from Course Credits and Course Clock Hours as soon as you select a course. If the school-defined GPA is configured to use transfer courses and is a weighted GPA, these grade points are multiplied by the credits attempted to get the quality points for the calculation.	
Credits Attempted	Number of Credits Attempted from the student's transcript
Hours Attempted	Number of Hours Attempted from the student's transcript
Credits Earned	Number of Credits Earned from the student's transcript
Hours Earned	Number of Hours Earned from the student's transcript
Grade Points	Number of Grade Points from the student's transcript

Manage Course Relationships

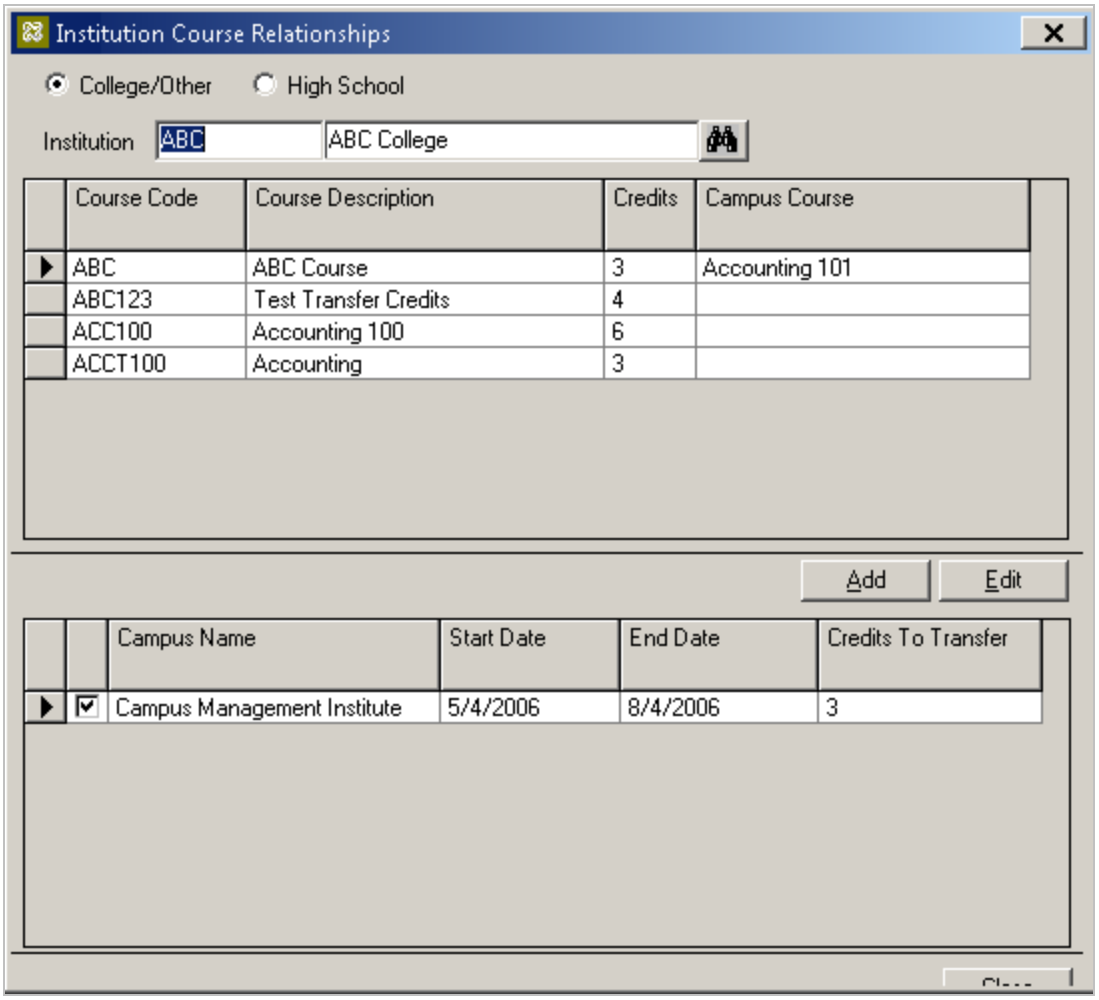
Courses offered at other institutions may resemble courses at your college. This feature allows you to manage the number of credits allowed for courses from other institutions when students transfer to your college.

To manage a course relationship:

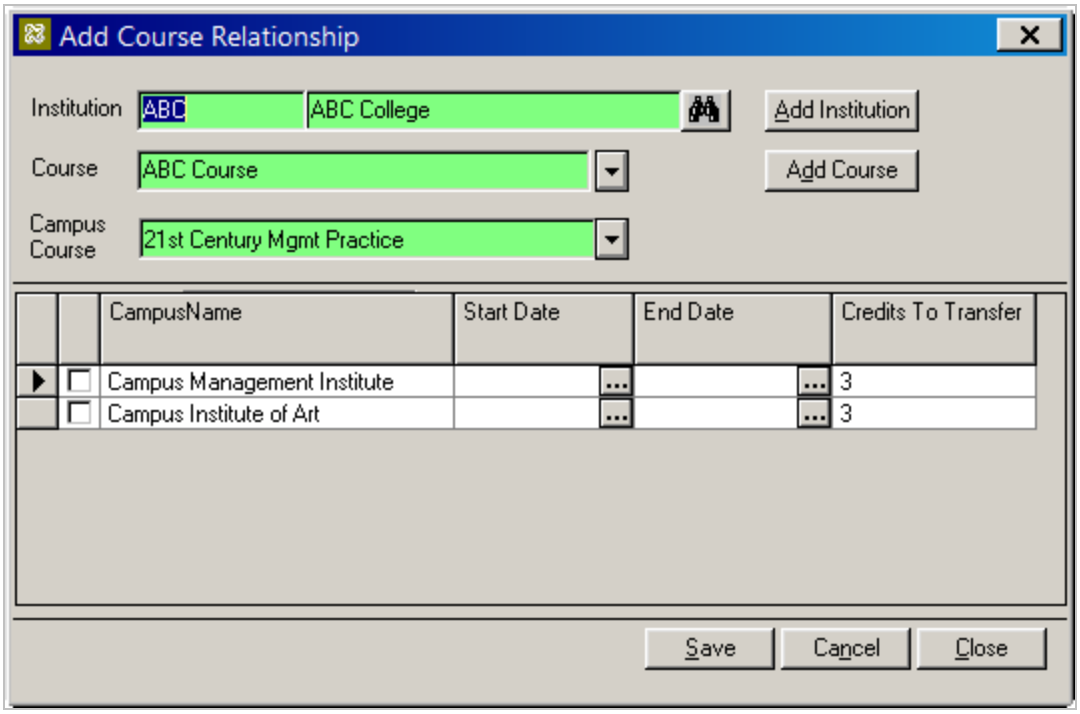
1. Navigate to **Daily > Admissions > Manage Course Relationships**. The Institution Course Relationships form is displayed.



2. Select **College/Other** or **High School** to indicate the type of institution that may be transferring students with courses that match courses from your college.
3. Click to the right of the Institution field to search for and select the institution from which course credits are to be transferred (the Search College form or Search High School form is displayed, corresponding to the option selected above).
4. Courses that have been entered for the selected institution are displayed. Click **Add** to add more courses for this institution, if applicable.



5. Select a listed course and click **Edit** to modify transfer information about that course. The Add Course Relationship form displays the **Course** to be transferred and the **Institution**.



6. From the **Campus Course** list, select a course from your college that corresponds to the course from the other institution.
7. Select a campus and enter the effective **Start Date** and **End Date** (if known), the number of **Credits to Transfer** for the selected course, and select the check box next to the **Campus Name** if this course relationship applies to the listed campus.

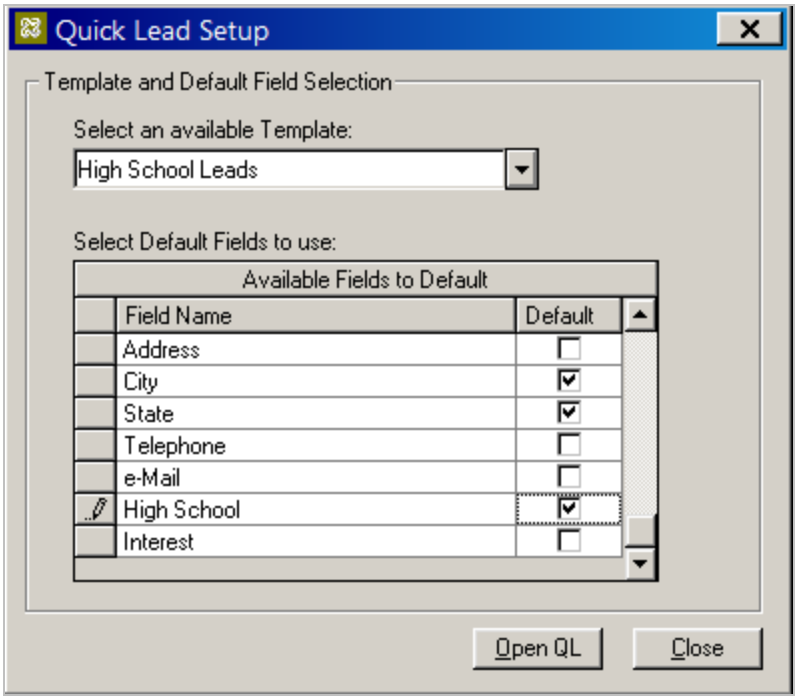
   Note: The date range entered when creating a course relationship is meant to be an effective date range for the course relationship that controls when the transfer credit can be approved. It is not a date range that is applied to course start dates to evaluate if the student took the course between certain dates.
8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Batch Quick Lead Entry

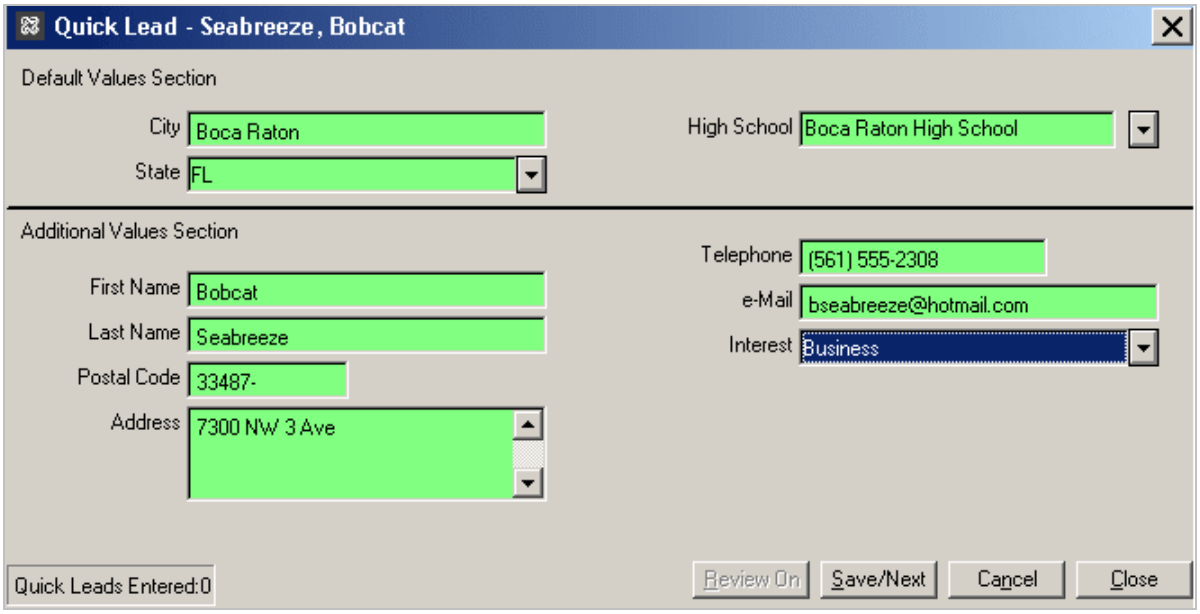
The Batch Quick Lead Entry form is used to quickly add leads to your student master database. You can implement forms for different types of leads. See Quick Lead Form Design for information about designing forms.

To work with the Batch Quick Lead Entry forms:

1. Navigate to **Daily > Admissions > Batch Quick Lead Entry**. The Quick Lead Setup form is displayed.



2. Select a **Template** for the lead entry process.
3. Select **Default** fields. These fields will appear the top of the lead entry form. See the example below.
4. Click **Open QL** to begin entering leads. The Quick Lead form is displayed with the selected default fields at the top.

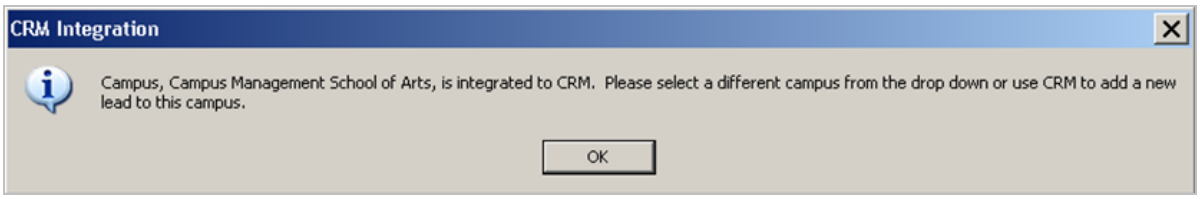


5. Fill in the default fields first. These fields are related to all subsequently entered new leads until you close the form. If necessary, change the data in the default fields to continue with a batch of leads without closing the form.
6. Fill in the remaining fields on the form for each new lead.
7. Click **Save/Next** to save a new lead and open the next new lead record. The non-default fields are cleared on the new form. The default fields are not cleared.

   The Quick Leads Entered count is incremented you save a new lead record. The counter resets when you close the form and reopen it for a different batch of leads.

   Optional: Click **Review On** to see the list of leads previously entered during this session. A pop-up window displays the names of the previously entered leads.
8. Click **Close** to close the form.

Note: When creating a Quick Lead for the default campus and if the (system level) **CRM Integration** and (campus level) **Enable CRM Integration** check boxes are selected, but the (campus level) **Enable new lead entry from CampusNexus Student when CRM is integrated** check box is cleared, the following message is displayed:



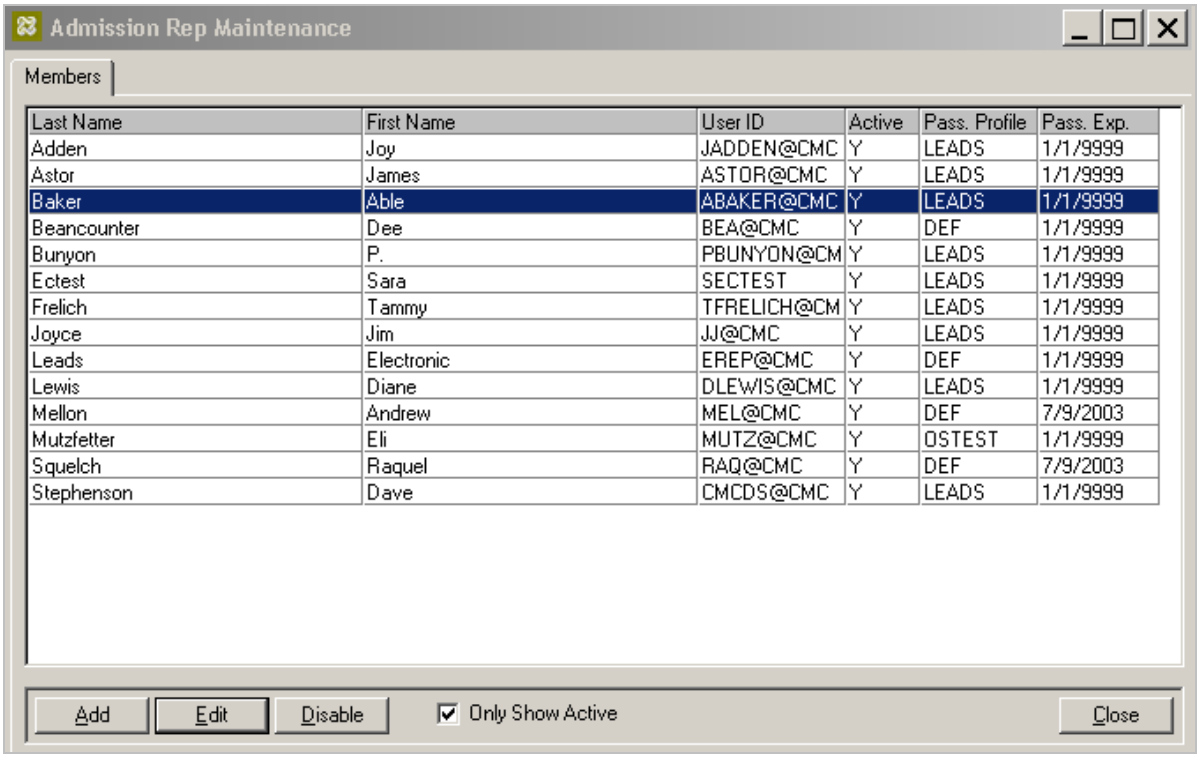
Note: For more information, see CampusNexus Student CRM Integration settings.

Admission Rep Maintenance

The daily maintenance function enables staff members at campus levels to add new admission reps and update information for existing staff members (of the Admissions Rep Group only).

This feature allows for limited access to staff member creation or edits from the Daily menu. However, if the user needs to access the User Info or Contact Manager Policy for the staff member, follow those instructions.

1. Navigate to **Daily > Admissions > Admissions Rep Maintenance**. The Admission Rep Maintenance form is displayed.



2. Upon creation of a staff member through the Daily menu, you will be prompted to enter the remaining user information, such as name, address, department, etc. All other required fields are gathered from the template and written to the new staff record when added.
3. Select the **Only Show Active** check box to display only active staff members.
4. Select a staff member and click **Disable** to deactivate a staff member or click **Enable** to activate a staff member that has been deactivated.
5. Click **Add** to add a new staff member, or select an existing staff member and click **Edit** to modify information.

   Note: Since CampusNexus Student allows you to change the staff member configuration through the Admissions Rep Maintenance form, all changes are audited. Audit verifications are handled at the database level only and are performed through appropriate SQL queries.
6. Click the **Members** tab to view or edit staff members associated with the Admission Rep group.

When you select a staff member to edit, the Staff Information form is displayed. The information on the Home Address tab, Work Address tab, and HR Info tab will be fully displayed.

The User Info tab allows for the Campus Group association, and the initial password creation (upon Edit, password options are hidden).

The Groups tab has the Admission Rep default group as a permanently selected group for the staff member. Additional groups can be assigned to the new staff member if the groups have been identified as Admission Rep groups within the new staff group attribute. The user may assign a Setup Template from the templates associated with the selected staff groups. The Setup Template defines the user-level permissions and Contact Manager policy for the staff member being created.

7. Click Picture to access the staff member's picture.
8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Import Test Scores

Within the Import Test Scores module, you can select the test type you want to import into CampusNexus Student. Your test file must be a flat file with the current file layout provided by the official testing centers. After test files are imported into CampusNexus Student, the system will archive the file name by renaming the file with a ".imp" file extension.

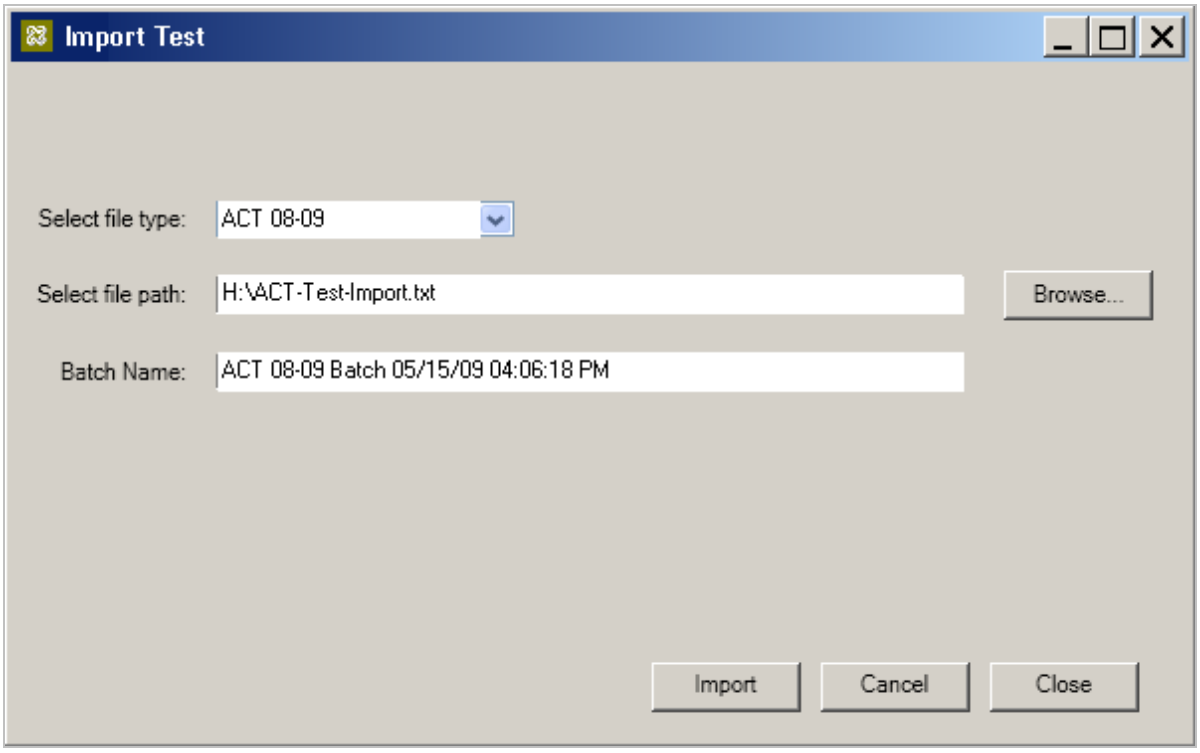
Note: Anthology Inc. no longer supports yearly updates for the admissions test, including SAT, ACT, CAAP. Likewise, the ability to modify current file layouts for yearly updates are also no longer supported. Institutions are now responsible for tracking changes to these tests and updating them in the CampusNexus Student database through the user interface provided.

Also, before using this feature for the first time, you need to perform a prerequisite configuration (a one time event) within the Test File Matching Criteria form in the standard interface (web client) of CampusNexus Student (Settings > Admissions > Test File Matching Criteria). Configure matching criteria settings for the test file to be used on a test import that includes a student's social security number as well as other student related fields.

This one-time configuration can also be done via a script. Please contact Anthology Inc. Support for more details.

To import tests:

1. **Select file type** to select a test type you will be importing into CampusNexus Student.
2. **Select file path** to specify the drive location where your test file is stored.
3. After the **Select file path** field is populated, the system will automatically create a **Batch Name** as follows: "<Test Type> Batch <Date and Time>". You can change the batch name if needed.



4. Click **Import** to start the process. The system will validate that the file selected has the correct file format for the file type selected.

Note: After the import completes, a message box with **Yes** and **No** buttons is displayed stating: "<Record Count> records imported successfully. Do you want to import another file?". If you click **Yes**, the form will be refreshed and will remain open to import another file. If you click **No**, the form will close. After the file is imported, the system will change the file extension to ".imp".

The system will automatically match test records to existing students if the SSN from the file matches a student record in the system. If such a match exists, all tests will be inserted under View > Admissions > Tests.

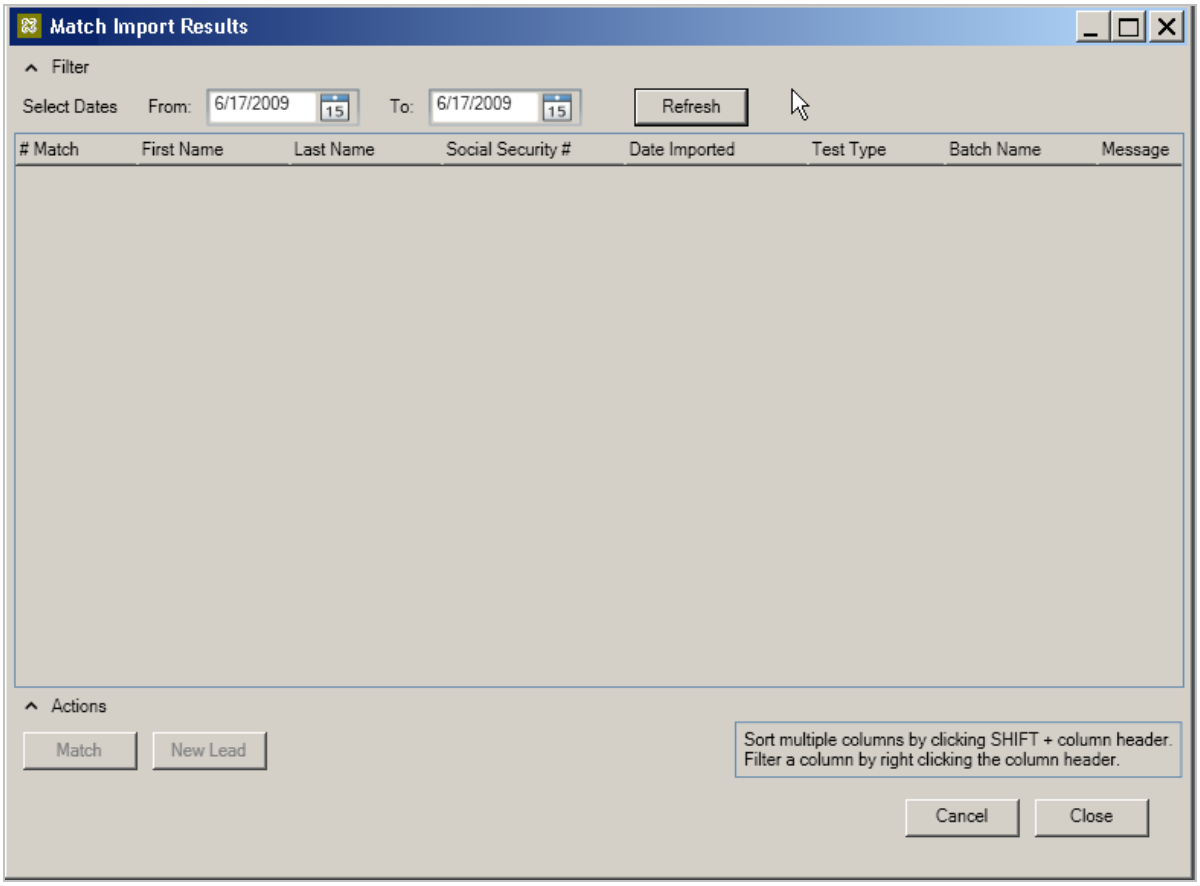
Note: Once the ACT test score is imported and populated for the student, the system will automatically display the '**Equivalent SAT Score**' on the student's **Entrance Tests** form (**View** > **Admissions** > **Tests**).

Match Test Scores

The Test Score Matching option enables you to manually match test scores to students that may not have been matched (because the Create Lead from Test option is off or because there was no record with a matching SSN). Initially, this form will be blank with no records. As soon as you select a date range, you can see all student records imported within that date range.

To view imported test records:

1. Enter the start date range of when the test file was imported into CampusNexus Student in **Select Dates: From**.
2. Enter the end date range of when the test file was imported into CampusNexus Student in **Select Dates: To**.



3. Click **Refresh** to update the list of records displayed on this form.

Note: If you select a student record that is unmatched, both the **Match** and **New Lead** buttons are enabled.

To Match Test Records:

1. Click **Match**. When you select a record where # Match is 0 (an unmatched record) and click **Match**, the student search form will open and you can search for a particular student. When the search form closes after selecting a student, the record in the grid will be matched to that student. This means that the scores of the student in the grid will be inserted into the student record selected. The # Match for the student in the grid will then change to 1 (1 matched test record).
2. Click **New Lead**. The New Lead button is only enabled if you have permissions set to create a new lead in

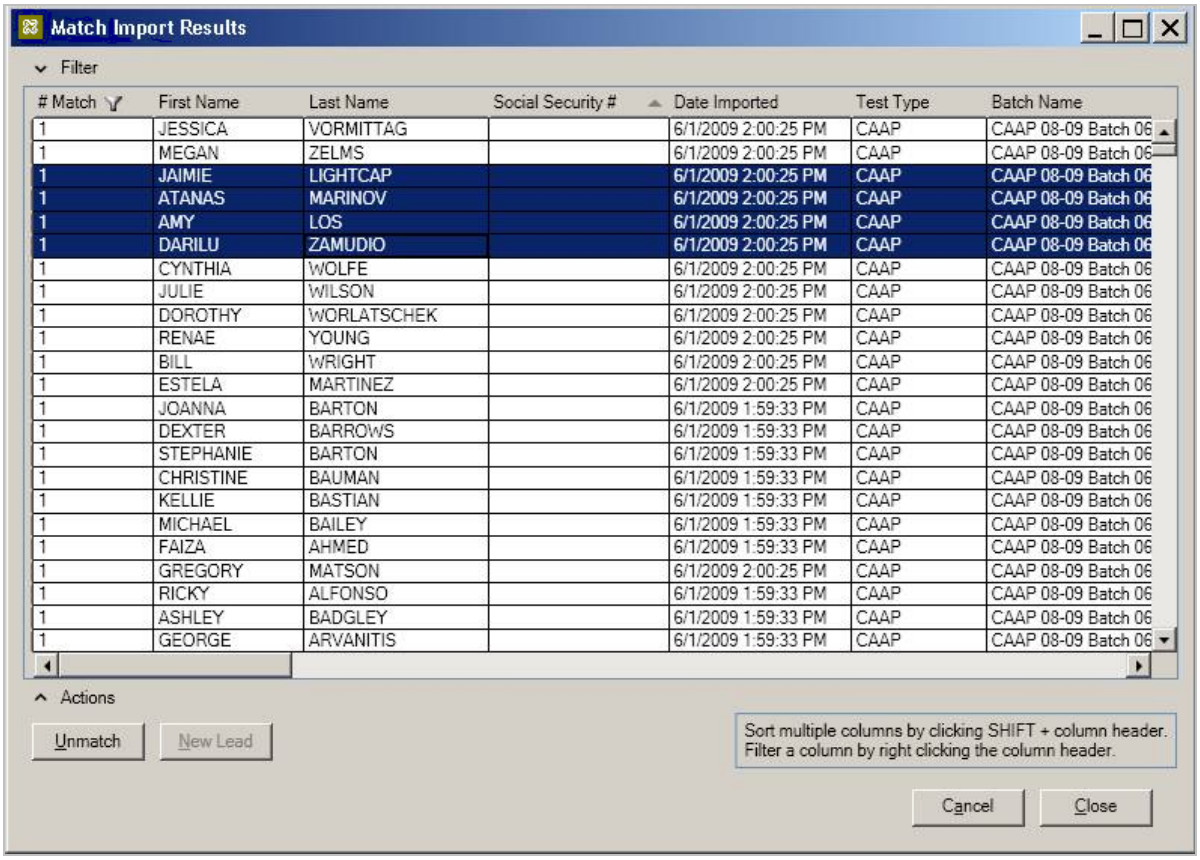
CampusNexus Student. When you select a record having # Match as 0 (an unmatched record) and click New Lead, the data of the student in the grid will be inserted into a new lead record. The scores of the student in the grid will also be inserted into the new students test folder. The # Match for the student in the grid will change to 1 (1 matched test record).

Note: When you try to create a new lead from an unmatched test record,CampusNexus Student checks for the setting **Allow Dup SSNs**. Based on this setting, you can create a new lead record or you will receive a message that you are not allowed to do so due to the following:

- No duplicates allowed in database
- No duplicates allowed in one campus

To Unmatch Test Records:

When you select a record in the grid on the **Match Import Results** form, which already had a **# Match** greater than 0, the '**Unmatch**' button will be enabled and the '**Match**' and '**New Lead**' buttons will be disabled.



When you click **Unmatch**, the test score data of the student in the grid will be removed from the student's test folder. The **# Match** for the student in the grid will change to 0 (an unmatched record).

Note: When you select a row on the grid, additional information about the selected record like Address, Email, Phone, etc. are displayed as a sub-row. You can filter the records on the grid for all the columns being displayed. For example, if you need to filter the records on the basis of the **Test Type** column, you would go to the Test Type column name and right-click. A popup text box will appear on the column header for you to enter the required test type. When you are finished, press the **Enter** key and the records on the grid will be filtered on that test type. This functionality is available for all the columns.

You can also sort by more than one column. To do this, click on the column header while holding down the **Shift** key. A small triangle on the column header is displayed to show that the column is sorted.

Daily > Financial Aid

The Daily > Financial Aid submenu options include:

- Document Tracking
- Approve Packaged Aid
- Approve Disbursements to Pay
- Batch Processing
- Post Work Study Disbursements
- SSCR Process
- Print ISIRs (Batch)
- Review/Print Multiple Batches
- Export Data
- Import Data
- ISIR Matching
- Print Queued Award Letters
- Enter Financial Aid G/L Transaction
- Clear Estimated Awards
- COD Exceptions
- <Detach> (This options detaches the submenu.)

Document Tracking

Institutions request documents from students and persons or organizations connected with the student. Use Document Tracking to keep track of the documents that are necessary for processing student records in an orderly fashion.

Document Tracking is available in the following modules:

- Admissions - AM
- Financial Aid - FA
- Student Accounts - SA
- Academic Records - AD
- Loan Management - LM
- Career Services - PL

You can use the Daily > Document Tracking feature to look at all documents of a certain type to determine the document's status for each student.

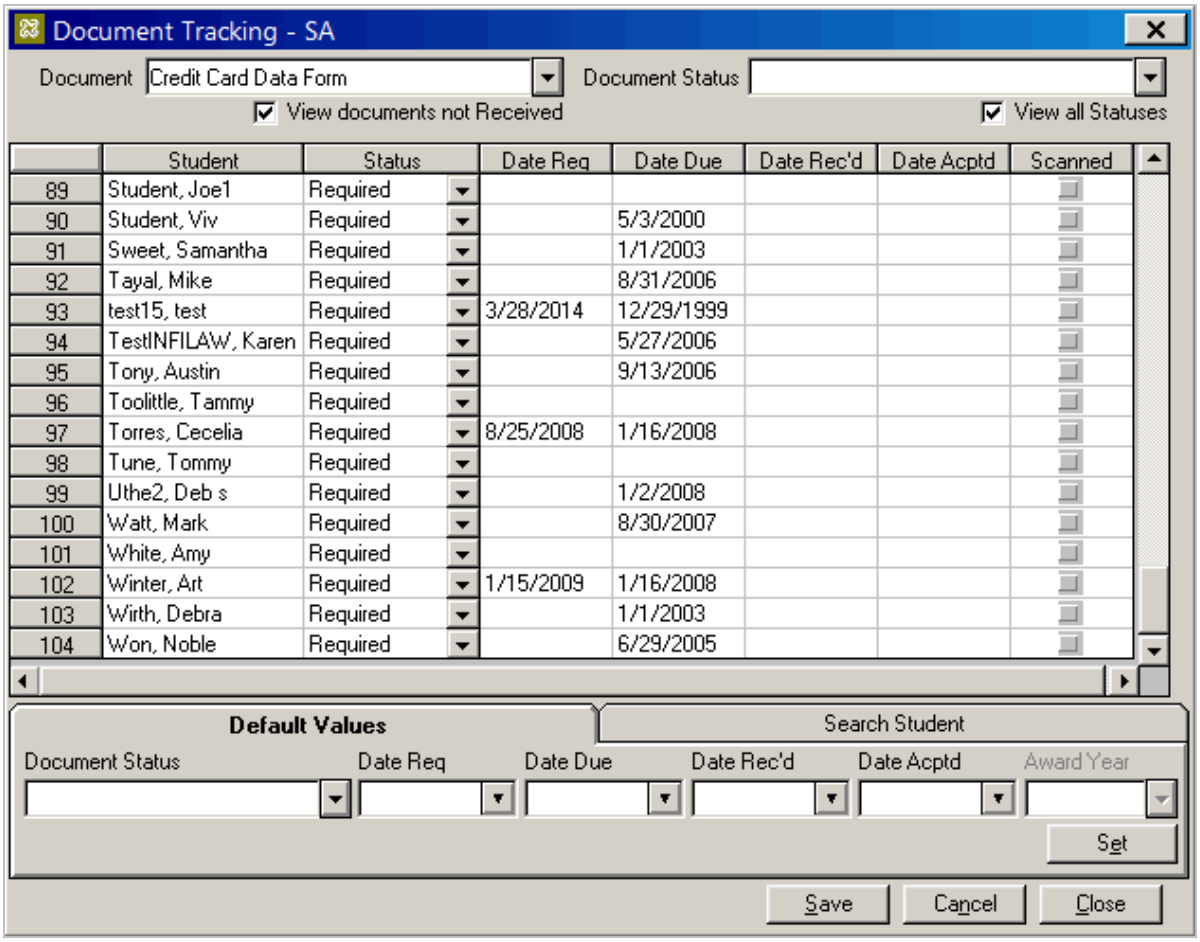
Several documents relate to academic or demographic history and your organization must have copies of them for each student. Examples are birth certificates, driver's licenses, transcripts, alien registration cards, social security cards, etc. Management policy determines which documents are important at your institution.

You can set up lists of these documents and assign them to each student record. You can then record the current status of the documents, the date you requested each document, and the date you received each document. You can also indicate that the document has been scanned into your electronic filing system.

Note: This approach differs from the Document Tracking option that you can access from the View > Contact Manager menu or Student Bar. When you access Document Tracking from the Student Bar, all documents related to a specific student as displayed. Here, you see all students related to a given document.

To edit tracking data for listed documents:

1. Navigate to **Daily > Admissions** (or other module) **> Document Tracking**. The Document Tracking form is displayed.



2. Select a **Document** from the list box at the top of the form. All students having the selected document related to their files are listed on the form.
3. Select or clear **View Documents Not Received**.
   - If the check box is selected, only those documents that have not been received are listed.
   - If the check box is cleared (default), all documents (subject to your Document Status selection) are listed.
4. For Document Tracking in Financial Aid - FA, select an **Award Year** to which the documents apply.

   Note: If you choose a Financial Aid document that does not have the "Award Year Specific" flag selected (indicating Yes) on the Document Setup, the form is displayed with the three Award Year fields disabled.
5. Select or clear **View All Statuses**.
6. Select an optional **Document Status**. If you select a document status, CampusNexus Student lists only the type of document you selected and only those that have the selected status.
7. From the displayed list, find a student document.
8. Click on a field in the row you want to update. You can update the following fields:
   - Status
   - Date Requested
   - Date Received
   - Date Due

- Date Accepted
- Scanned

Note: In date fields, you must enter the century along with the year. For example, 06/30/2000. If you just enter 99 instead of 1999, CampusNexus Student will reject it.

9. Click **Scanned**, if necessary, to indicate that you have scanned the requested document into your electronic filing system.
10. The **Default Values tab** enables you to update statuses and dates in batches.

    If you select a Status, or a Date Due, or Award year, for example, CampusNexus Student updates the values of all students whose names appear in the grid. Click **Set** to update the values and save your work.
11. The **Search Student tab** enables you to search a student using the Social Security Number (SSN) or Student ID.

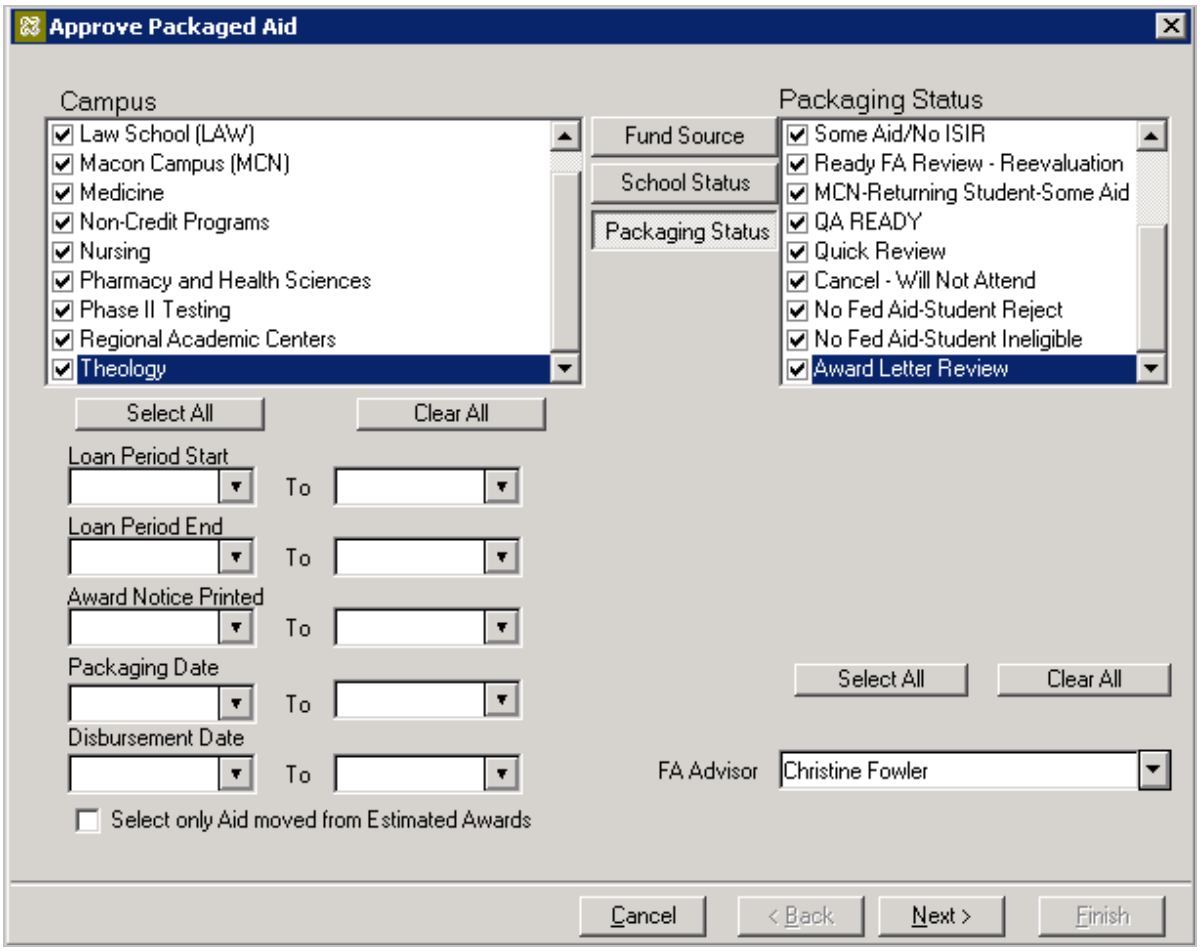
    Type the SSN or ID and click **Filter**. CampusNexus Student finds the student associated with that number and displays only that student's name and information in the grid. Click **Clear Filter** to remove the filter. The grid revert to the previous display of students.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Approve Packaged Aid

This is a batch routine for setting packaged financial aid to approved status. The Approve Packaged Aid wizard displays all financial aid grants and loans that have a status of **E - Estimated** and at least one disbursement is scheduled. You can approve the grants and loans using a grid. This option eliminates the need to access students one at a time to change the status of packaged FA from *Estimated* to *Approved*.

To work with the Approve Packaged Aid wizard:

1. Navigate to **Daily > Financial Aid > Approve Packaged Aid**. The first form of the wizard offers selection criteria for the aid to be approved.

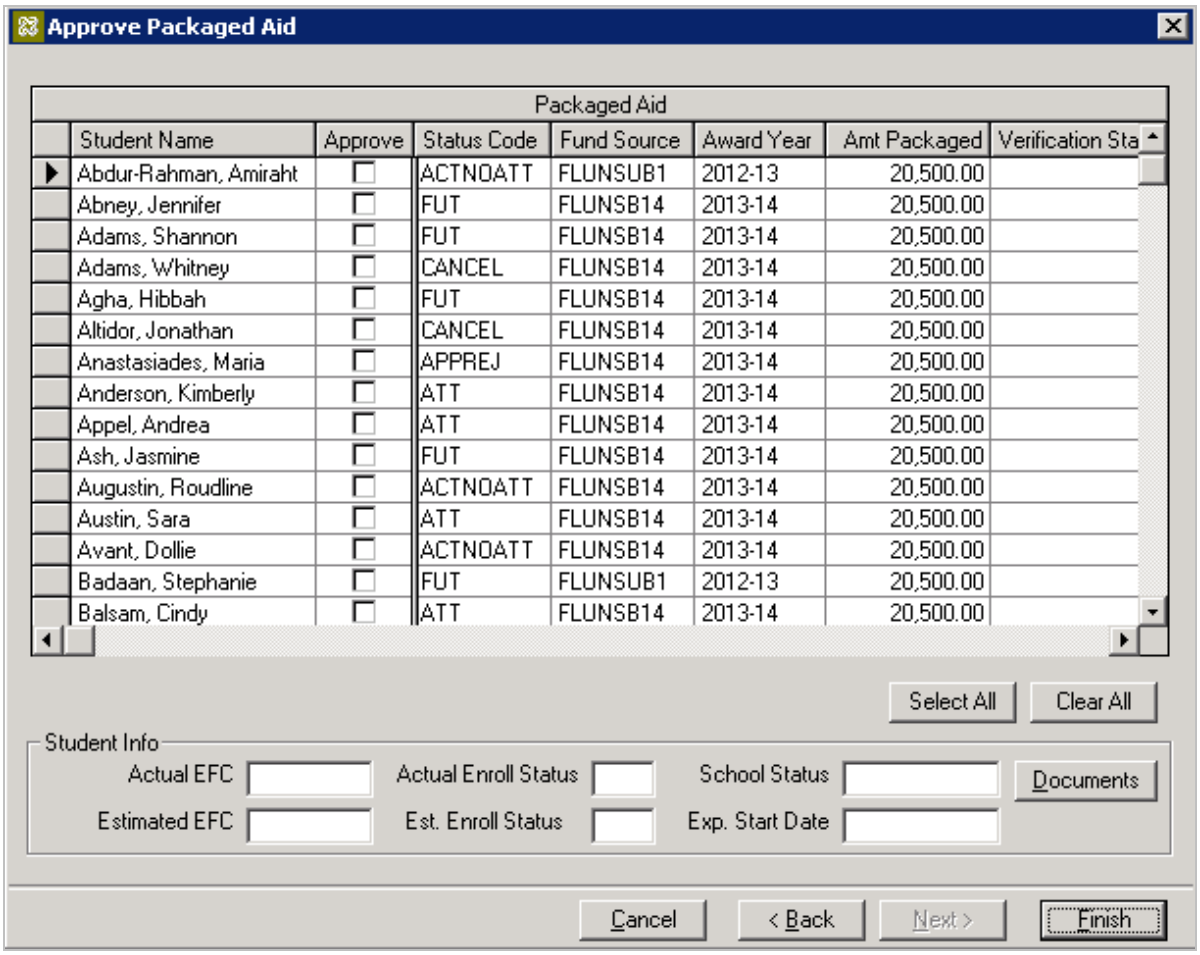


2. Choose appropriate options from the following fields:

   - **Campus** - Select one or more campuses or click **Select All**.
   - **Fund Source** - All fund sources will be listed. Select one or more fund sources or click **Select All**.
   - **School Status** - All School Statuses will be listed. Select one or more school statuses or click **Select All**.
   - **Packaging Status -** All packaging statuses will be listed. Select one or more packaging statuses or click **Select All**.
   - **Loan Period Start Date** - Enter a date range for the loan-period start date.
   - **Loan Period End Date** - Enter a date range for the loan-period end date.
   - **Award Notice Printed** - Enter a date range for the award-notice-printed date.

- **Packaging Date** - Enter a date range for the packaging date.
- **Disbursement Date** - Enter a date range for the disbursement date. This enables you to effectively gather grants.
- **Select only Aid moved from Estimated Awards** - Selected this option to select only those awards that were previously included in Financial Aid Estimates for the selected students.
- **FA Advisor** - To filter the aid packaged by a single, select the advisor from the drop-down list.

3. Click **Next**. The selected student aid awards are displayed in a grid.



A splitter holds the first two columns while you scroll to the right to see the other columns on the grid.

- Student Name
- Approve (Select or deselect each row as appropriate.)
- Status Code
- Fund Source
- Award Year
- Amount Packaged
- Verification Status
- Loan Period Start Date
- Loan Period End Date

4. Select a row on the grid to view **Student Information** in the lower portion of the form. The information displayed includes:

- Actual EFC (estimated family contribution)
- Estimated EFC
- Actual Enrollment Status
- Estimated Enrollment Status
- School Status
- Expected Start Date

5. Click **Documents** to view missing documents related to the student.
6. Select the **Approve** check box for one or more student aid awards or click **Select All**. Click **Clear All** to clear all Approve check boxes.
7. Click **Finish** to update the record set. For the records where you selected the Approve column on the grid, the Status values are set to **A - Approved**. A confirmation message is displayed.

   Note: If you click **Cancel**, the form is closed without saving status changes.

Approve Disbursements to Pay

The Financial Aid Office approves disbursements for payment based on the disbursement schedules of individual students, satisfactory academic progress (SAP), the receipt of funds from the fund sources, and other factors. CampusNexus Student provides an Approve Disbursements Wizard to aid in the approval process. Once the disbursements are approved, the wizard prepares a Disbursement Batch File for processing in the Student Accounts module. In Student Accounts, the Approved Disbursements are posted to the student ledger cards. See Daily > Student Accounts > Post FA Disbursements for more on the posting procedure.

Corporate offices can approve all Pell and Direct Loan Disbursement batches before exporting to the Department of Education (ED). These batches are created by the schools. The corporate office then gathers these disbursements to export to the ED. Once the acknowledgment file is received, rejected disbursements are manually removed from the batch, and the batch is approved and saved for posting by student accounts at the corporate office. This allows for each transfer of funds into the corporate office bank account from ED as a result of an acknowledged disbursement batch equal to the amount represented by the selected FA disbursement batch.

The Approve Disbursements Wizard gathers disbursement information from the disbursement schedules for your review and approval. Only the disbursements you approve are processed. Refer to Third Party or Agency Invoices Approval to approve agency disbursements.

When you approve Pell disbursements or they are actually paid, CampusNexus Student updates the Pell disbursement records as Ready to Send to COD.

If a student is enrolled as a non-term or clock hour student, CampusNexus Student uses different criteria for approvals and auto approvals of financial aid disbursements. Non-term and clock hour students are not eligible to receive financial aid until they have completed the credit hours/weeks attempted during the previous payment period. CampusNexus Student checks if students have completed these credit hours/weeks before allowing financial aid to approve financial aid disbursements and evaluates each payment period individually. This is an automated function in CampusNexus Student.

Disbursements for non-TIV awards can have a DAC policy configured to check for prior payment period completion or exclude the criteria check for prior payment period completion. This is done by enabling the check box for “FA Credits or Clock Hours Earned/Attempted” in conjunction with the corresponding radio button set to “FA Credits/Clock Hours: Earned”. This will allow the “Approve Disbursements to Pay” process to check for prior payment period completion before auto approving a non TIV disbursement that is associated to a payment period. If this setting is not enabled, non TIV disbursements associated to a payment period will not check for prior payment period completion.

In compliance with the regulations specified in the student FSA handbook, if a student is enrolled as a non-term or clock hour student and has a stub loan period (see Packaging for Overlapping Loans), CampusNexus Student does not use completed credits/hours and weeks as criteria when approving direct loan disbursements associated with the stub loan period. Disbursements for direct loans associated with a stub loan period are automatically approved regardless of how many clock/credit hours or weeks of instructional time have been completed (provided that all other criteria have passed validation). This rule does not apply to direct loan disbursements associated with subsequent loan periods. In other words, the student still needs to complete the required clock/credit hours or instructional weeks to receive the disbursements in subsequent loan periods.

For information regarding the updated clock to credit hour conversion rules effective as of July 1, 2011, see Impact of Clock to Credit Conversion Rate on Disbursement Approval.

Miscellaneous Information About Approving Disbursements to Pay

- You can change campuses between batches.
- A batch statistics message is displayed when you click Delete Batch. You can view the batch creation date, the user who last modified the batch, date last modified, disbursement quantity, and the amount approved in the batch. You must confirm batch deletions.
- CampusNexus Student makes the "Paid" column available to update on the Financial Aid Disbursement Batch Detail form immediately after the check box is selected. This saves the data while you are working on the batch

rather than waiting until the entire list has been resolved.

- You can open only one of these forms at a time.
- CampusNexus Student prevents multiple users from editing the same batch simultaneously and prevents the entire batch from being inadvertently deleted. For example, if there are no "approved" disbursements, CampusNexus Student will not clear the unapproved disbursements.
- If your campus is uses a servicer, this procedure prevents you from modifying a servicer disbursement batch (the file import type is S-Servicer). In other words, the flag at Setup > Campus Locations > Financial Aid > Servicer Configuration labeled "Prevent Users from Modifying Title IV Aid?" is set to Yes.
- CampusNexus Student prevents the creation of a new batch of Title IV disbursements if the Prevent flag is Yes. Title IV fund sources will be excluded from the selection list.
- The "Approve Disbursements to Pay" form checks each student selected for a financial aid hold before disbursing financial aid. After populating the grid, when an "on-hold" student is selected in the grid, CampusNexus Student indicates that the student is on "FA Hold" in the "Additional Information" tab. CampusNexus Student will not allow the Approved check box to be selected.
- CampusNexus Student does not allow the amount to be edited when the fund source type is Direct Loan. Verification of total amount packaged is "turned off" when the type is Direct Loan. CampusNexus Student also does not allow editing the amount of an approved FA disbursement when the fund source type is Direct Loan.
- The Disbursements wizard uses logic that compares the student's current enrollment status with the student's 'Packaged To' enrollment status stored in the student's Academic Year. If the two statuses are not equal, an exception occurs preventing a disbursement for the student. For setup information, see Disbursement Approval Criteria.
- The Disbursements wizard uses Enrollment Status Credits or Enrollment Status Hours from the students schedule to determine a student's enrollment status for financial aid purposes. In some cases, these credits or hours may be different than the academic credits or hours that a student has registered for. Additionally, credits associated with a second course retake are not used to determine the student's enrollment status; therefore, the student is not allowed to be paid for a second retake of a previously passed course.

  Example:

  A student is enrolled in 3 courses for the term associated with a Full-Time Payment Disbursement that is being evaluated for payment.

  The student is taking 3 courses in that term. Each course is 4 credits.

  The student previously took 1 one of the courses and was given credit for passing the course.

  The student took the course a second time in a prior term (1st retake) and is taking the course a third time for the term associated with the disbursement being evaluated for payment.

  Since the enrollment status of Full-Time associated with the Pell disbursement is being compared to only the credits associated with the 2 courses and the credits associated with the second retake are not considered, the disbursement fails the evaluation, i.e., the scheduled disbursement is based on a Full-Time status; however, the student's actual enrollment status is ½ time for Title IV aid because the student's actual enrollment status is based on only the 8 credits associated with the other 2 courses and not the retake.
- When a student is dropped from school, CampusNexus Student does not set a disbursement to cancelled status if it is included in an open batch. CampusNexus Student flags a batch as having dropped students and provides the following warning message when the batch is edited, *"This message is for informational purposes only. Students*

included in this batch have been changed to a Dropped status. You may continue to approve and pay these students in this process. Disbursements that are not paid must be manually changed to a ***Cancelled*** *status in the Financial Aid packaging screen."*

- Enrollment status is recalculated when a course gets dropped so that the dropped course is no longer included in the calculation. This is not done by changing the enroll status credits to '0, it is done based on the course status.
- Only students who have met the Financial Aid Document requirements where the document status is set to "approved" can receive Financial Aid disbursements. All Financial Aid documents that are required can be established by assigning the documents to the Financial Aid (FA) module. See Financial Aid Document for setup instructions. If the school has received all required documents (approved document status), CampusNexus Student determines that the student has met the Financial Aid Document requirements and the student can receive disbursements.
- When you create new disbursement batches, you can select Direct Loans based on different origination statuses and promissory note statuses. You can select or clear the following options:
    - Include originated loans only
    - Accepted / Batched
    - Include loans with accepted promissory notes

  These options are displayed for the Direct Loan Fund Type only.
- For fund source type Pell Grant only students whose Origination Status is A or B (originated) can be gathered. This affects schools using the Recipient Financial Management System (RFMS). Schools not using RFMS would leave this box cleared. For Pell Grants, the 'Include originated Pell Grants only' check box appears enabled. It can be disabled by clicking on the check box. The options Accepted and Batched are displayed for the Pell Grant fund type only.
- **Note**: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

Course Retake Logic and Non-Term Payment Periods

The Approve Disbursements to Pay logic ensures that credit associated with a course is only counted once for determining whether a student has successfully completed previous non-term payment periods and is therefore eligible to receive the next disbursement.

Example:

A student must complete 12 credits to advance to the subsequent payment period and takes 3 courses at 4 credits each.

If the student earns credit for the first 2 courses, but the 3rd course is a retake of one of those courses, the student is considered to have completed 8 (not 12) credits for Title IV purposes.

The Approve Disbursements to Pay logic does not allow a student to receive a disbursement for the next (13-24 credit) payment period until the student successfully completes another 4 required credits (in courses for which the student has not previously earned credit) and the weeks defined for the current payment period.

The Approve Disbursements to Pay logic also ensures that attendance associated with a retake course in which credit was previously earned is not used for determining whether a student has attendance in the non-term payment period and is therefore eligible to receive the next disbursement.

If a student is enrolled as a non-term or clock hour student and has a stub loan period, CampusNexus Student does not use completed credits/hours and weeks as criteria when approving direct loan disbursements associated with the stub loan period.

Course Retake Logic and Term Payment Periods

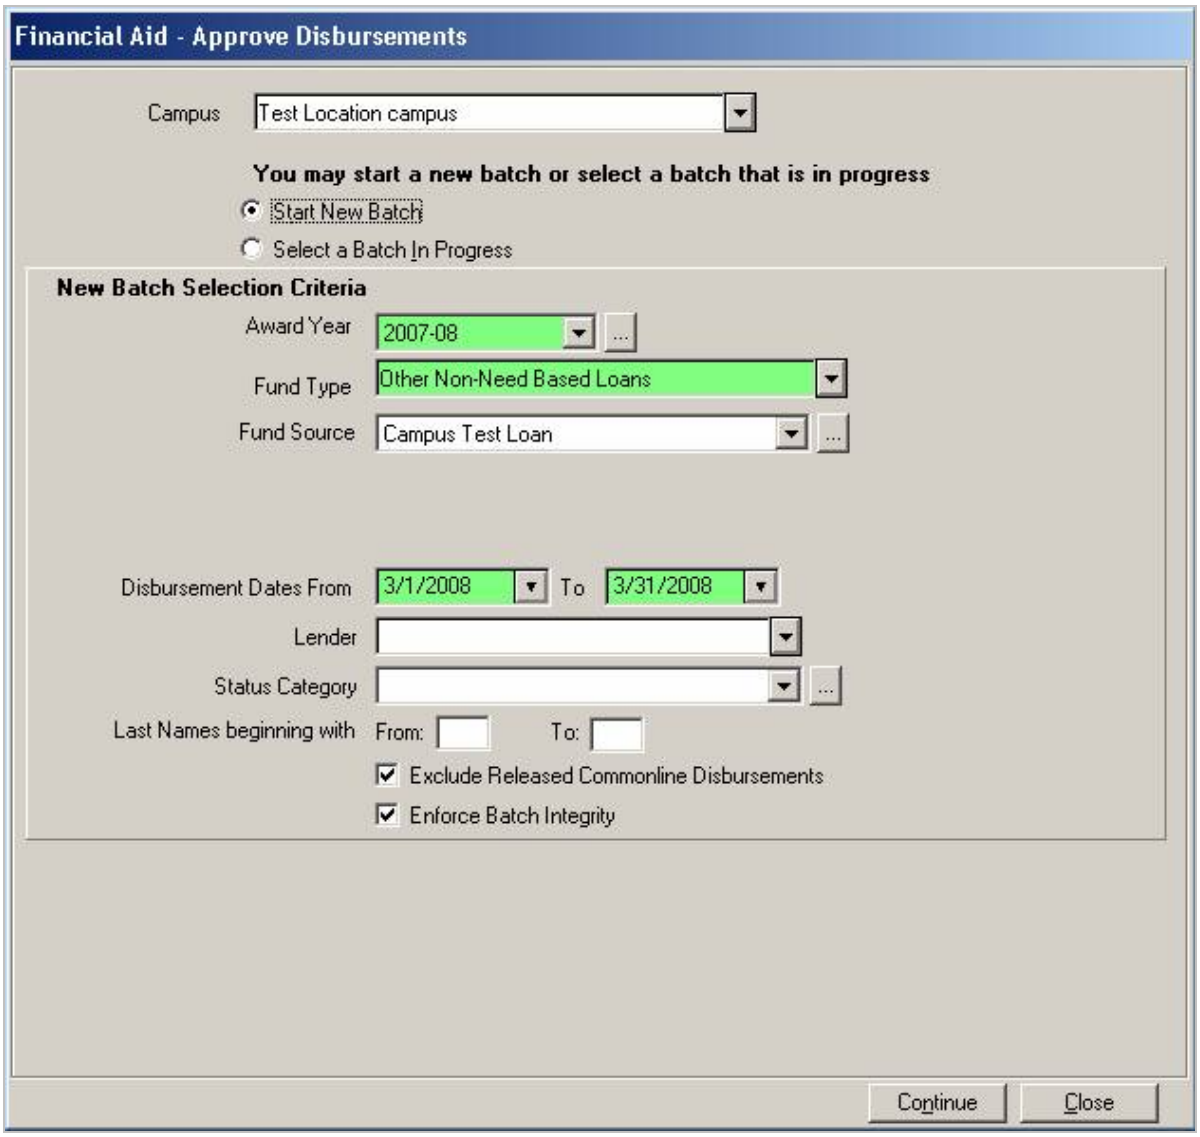
The Approve Disbursements to Pay logic ensures that credit associated with a course is only counted once for determining whether a student has successfully completed previous term payment periods and is therefore eligible to receive the next disbursement.

Credits associated with a second course retake are not used to determine the student's enrollment status. Therefore, the student is not allowed to be paid for a second retake of a previously passed course.

An institution may pay for unlimited retakes of failed classes in term based programs of study, but may not pay for courses for which a student has previously been given credit. An institution may pay for one retake of any previously passed course (except not if due to the student failing previous courses).

To Approve Disbursements to Pay:

1. Navigate to **Daily** > **Financial Aid** > **Approve Disbursements to Pay**. The Financial Aid Approve Disbursements wizard is displayed.



2. Select the **Campus** for which disbursements must be approved.

3. Select **Start New Batch** to create a new batch and proceed to the New Batch Selection Criteria instructions.
   - OR -
   Select **Select a Batch In Progress option** to process an existing batch and proceed to the Batch in Progress instructions.

New Batch Selection Criteria

You can filter the batch through the following options:

1. Select an **Award Year** or click to select multiple award years. If the selected award year is associated with a fund source that is deactivated, the fund source will not appear in the Fund Source drop-down list.
2. Select the **Fund Type**. The Fund Type option gives you the opportunity to approve all fund sources of a particular type. For instance, you can approve all Scholarships at once.

   Note: The Fund Type of **Other Outside Resources** is an option only if you selected **Reduces Remaining Balance to Schedule** in the Fund Source Code Setup form.
3. Select the **Fund Source**. You can select all fund sources for the type, or select a specific fund source.

   The Fund Source list contains the fund sources for the type selected. If there is only one fund source for the type, it is selected by default. If there is more than one fund source for a type, the default is to approve ALL fund sources of that type.

   The form displays different options depending on the Fund Type and Fund Source:

   - For a direct loan fund source, you can select **Include originated loans only**, **Accepted**, or **Batched**. When you clear the 'Include originated loans only' check box, the Accepted and Batched options are cleared automatically.
   - For loans with accepted promissory notes, you can select **Include originated loans only** and **Batched** status, and out of those, include only the loans with accepted promissory notes. When selecting a new fund source, you must click the **Award Year** field for these check boxes to display. All check boxes are selected by default.
   - For a direct loan fund source, you can select **Informed Borrower**. Selecting this ensures that the system gathers disbursements for Direct Loan awards (Direct Sub, Direct Unsub, Direct PLUS) where the student has Informed Borrower data saved in the system for award year 2020-21 or higher. If this check box is cleared, Informed Borrower details for Direct Loans are not referenced when the system determines which disbursements to include in the batch.
   - For a Pell Grant fund source, you can select **Include originated Pell Grants only**, **Accepted**, or **Batched**. When you clear the 'Include originated Pell Grants only' check box, the Accepted and Batched options are cleared automatically.
4. Select the **Disbursement Dates**. This is a required field.
5. Select the **Lender** or leave the field blank to include all lenders.
6. Select the **Status Category**. You can select one or more status categories (except **Applicant**, **Lead**, or **Placement**) to include in the batch. Only students having the selected status category or categories will be included in the batch.
7. Specify letters in the **From** and **To** fields to select a range of students whose last names begin with a letter that falls within the selected range.
8. Select **Enforce Batch Integrity** if you intend to create sub batches of disbursements, for example, if you plan to

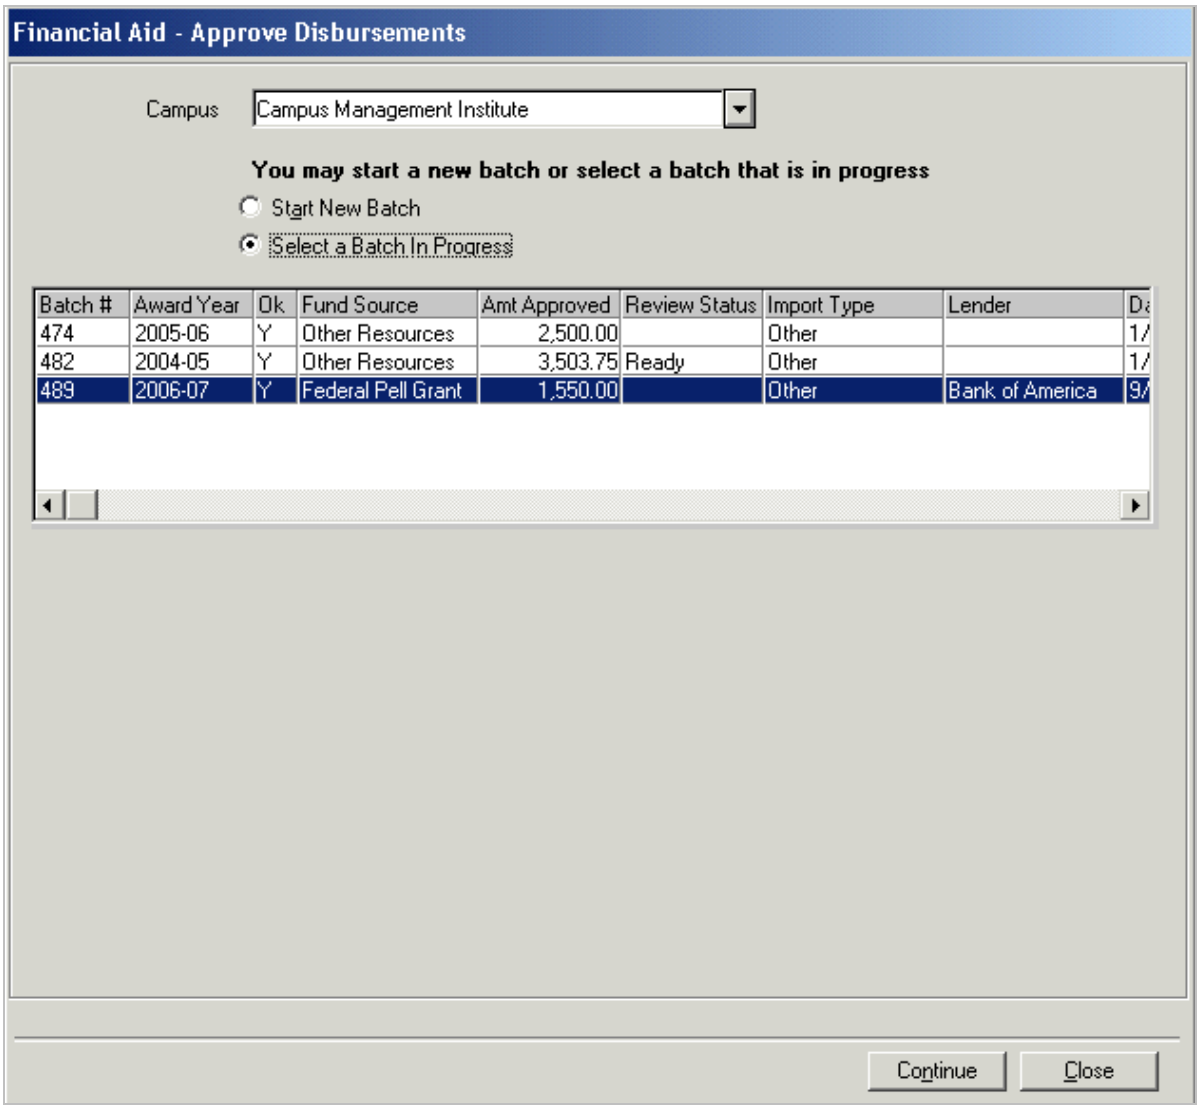
move successful approvals to Student Accounts as a separate batch but need to keep track of the original parent disbursement batch. When batch integrity is enforced, CampusNexus Student maintains a record of the initial contents of Financial Aid disbursement batches created from importing a Global payment (C2PA) file. This functionality is also available for manually created disbursement batches.

Note: The record of the initial contents of financial aid disbursement batches is separate from the record of the posting batch number assigned to the disbursements posted to student ledger cards.

9. Click **Continue**. Proceed to Approve Disbursements.

Batch in Progress

1. Select the batch by clicking a row in the grid and proceed to Approve Disbursements.

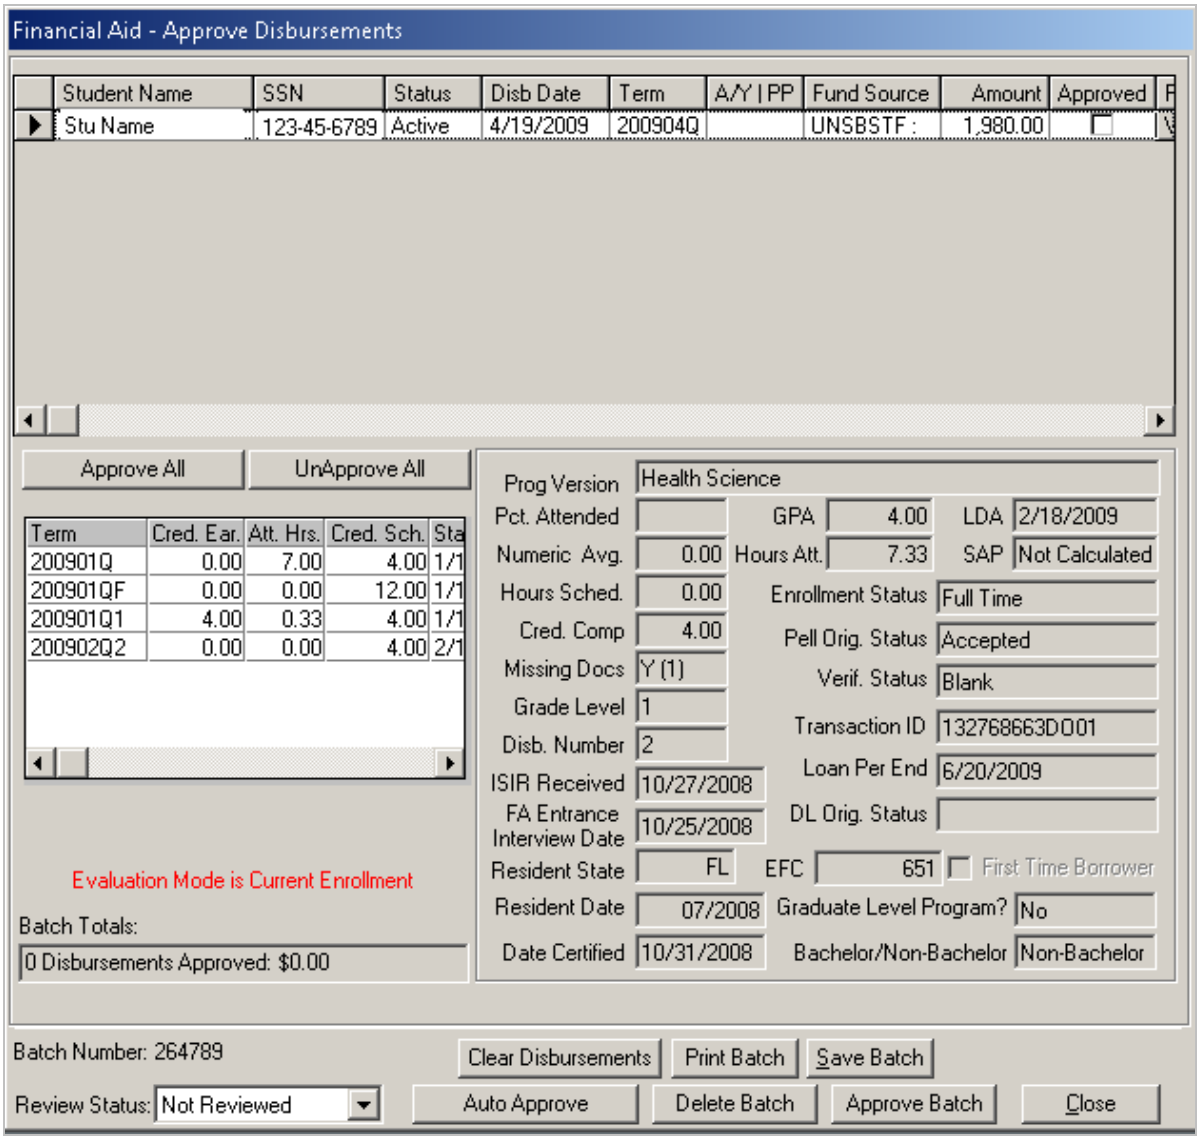


Approve Disbursements

The disbursement approval criteria rely on the Student Pace Evaluation (SPE) tool to manage the disbursement dates. The SPE tool adjusts the dates of a payment period and ensures that all credits/hours and weeks have been met before the next payment period starts for a student. The Approve Disbursements to Pay form approves the disbursement when the date of the disbursement is equal to the current date.

1. CampusNexus Student displays a list of students who are scheduled for a disbursement based on the criteria you selected in the previous steps. If no disbursements match the selection criteria, a message states that there are no disbursements, and the wizard displays the first page again.
2. Click a disbursement row in the grid to see details about the selected student. The form displays data about the student.

   'Evaluation Mode in Current Enrollment' is displayed in red as Current Enrollment or Term based on the approval criteria being used.



3. To approve disbursements manually, select a disbursement record in the grid and select the **Approved** check box for that record.

   To automatically approve the disbursements, click the **Auto Approve** button. If the button is not available, the campus, fund source, or disbursement approval criteria have not been configured. The Auto Approve functionality compares each disbursement against the associated disbursement approval criteria for the fund source. Auto Approve uses the payment periods at the individual student level to determine academic progress.

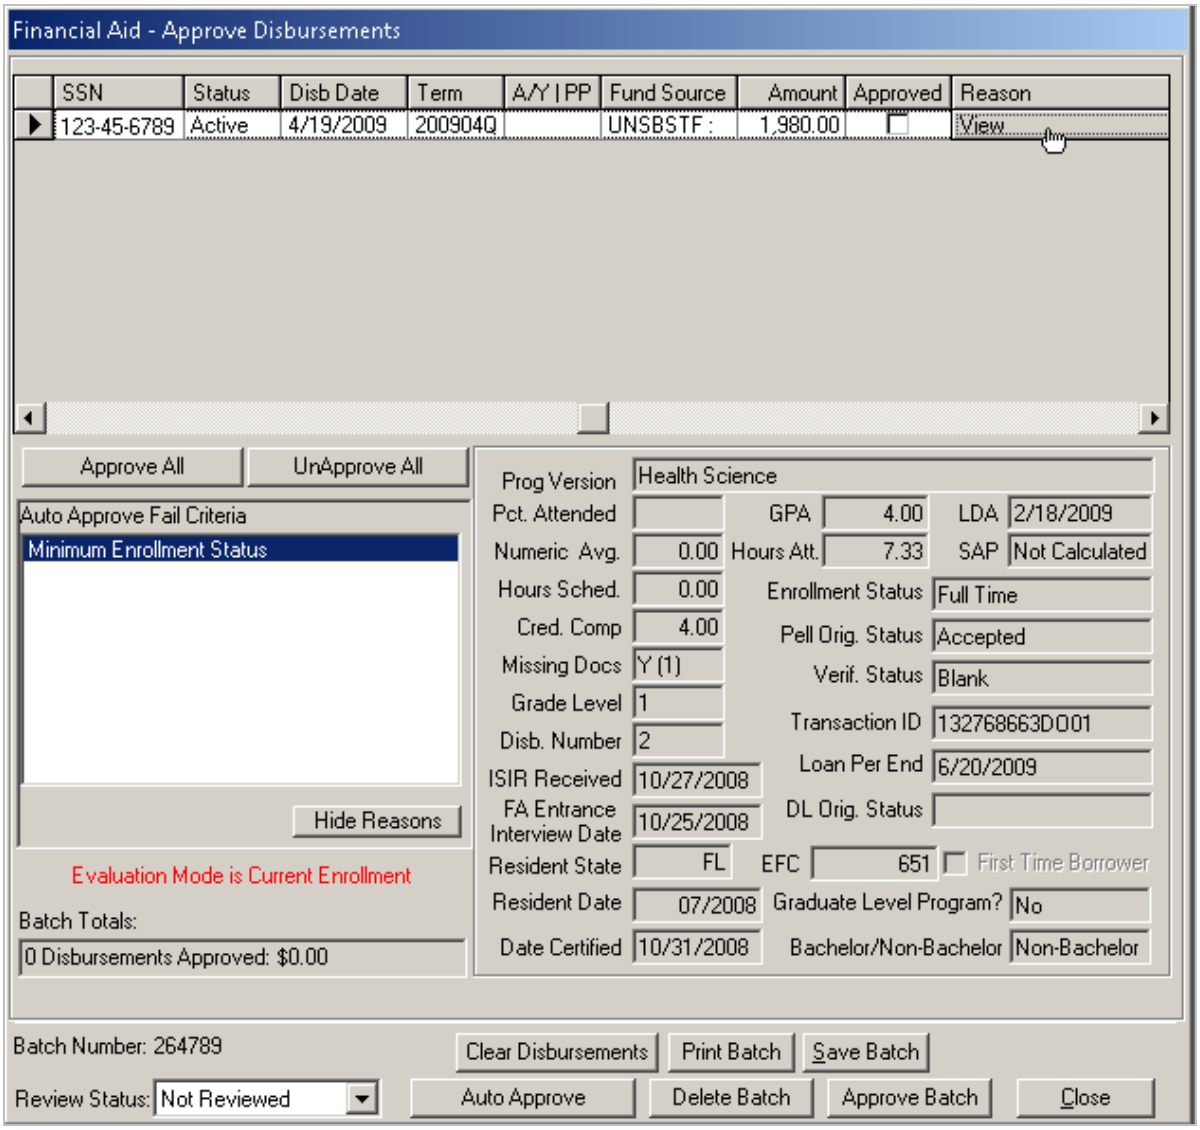
Auto Approve automatically selects the Approved check box for the records satisfying the approval criteria. If the check box is not selected, that record failed the approval criteria. The sum of the approved disbursements is displayed under Batch Totals along with the total number of approved disbursements.

Note: The Academic Year|Payment Period (A/Y|PP) column uses the following notation for Payment Periods: `A<n>|P<m>` where `<n>` is the academic year sequence number and `<m>` is the payment period sequence number.

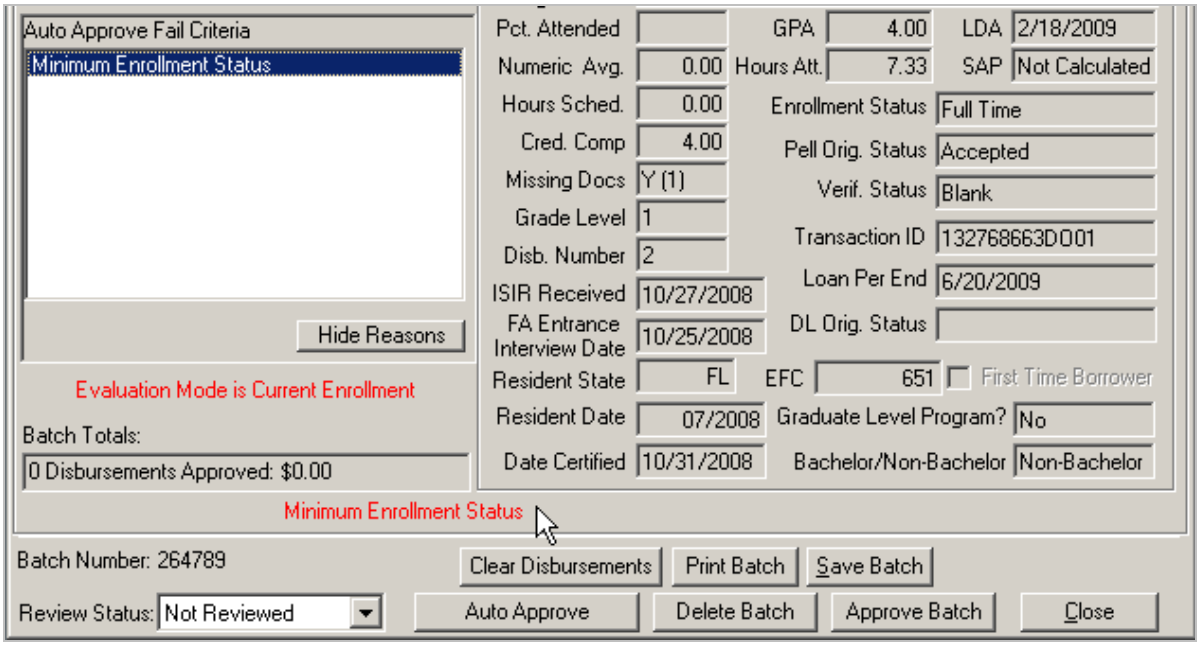
If a student is enrolled as a non-term or clock hour student and has a stub loan period, CampusNexus Student does not use completed credits/hours and weeks as criteria when approving direct loan disbursements associated with the stub loan period (see Packaging for Overlapping Loans).

4. If there are failed criteria, CampusNexus Student displays a Reason column to the right of the Approved column. Click **View** in the Reason column to see the reason(s) disbursement failed. A list of reasons is displayed in the Auto Approve Failed Criteria box.
5. When the Disbursement Approval Criteria flag "Originated/Certified before LDA" is activated, the "Date Certified" column header is displayed for Fund Source types: SUB, UNSUB, PLUS, PERKINS, LOANNB, and LOANNNB. "Orig. Extract Sent" is displayed as a column header for DIRSUB, DIRUNSUB, and DIRPLUS Fund Source types.

   If the Auto-Disbursement Approval criterion is configured for a loan that is being Auto-Approved, CampusNexus Student determines if a student withdrew before the loan was Originated/Certified. If this is true, the loan disbursement is *not* Auto Approved. The failed reason "Originated / Certified before LDA" is displayed in the Auto Approve Fail Criteria box.



Note: Click on a reason listed in the Auto Approve Fail Criteria box to view the full reason text in red in a label area spanning the full width of the form (see figure below). This is helpful when reason texts have been truncated due to space limitations.



Note 1: The Disbursement will fail if the Fund Source for the disbursement is not set up in the disbursement approval criteria. See Disbursement Approval Criteria for additional information.

Note 2: The Disbursements will fail for the "First Time Borrower 30 day rule", only under the following two conditions:

a. If the "First Time Borrower 30 day rule" from Disbursement Approval Criteria (DAC) configuration is on
   - AND the Fund Type is SUB,UNSUB, DIRSUB, DIRUNSUB
   - AND the student is a first time borrower
   - AND the valid term is associated with the disbursement that is being paid
   - AND the term is the first term of the enrollment
   - AND the disbursement is the first disbursement of the year
   - AND disbursement scheduled date is less than 30 days from student's academic year start date.

b. If no term is associated with the disbursement that is being paid.

When approving disbursements to pay for students, the **EFC** field in the detail section of the loan displays the Pell EFC from the award year associated with the fund source being disbursed.

The **Missing Docs** field displays **Y** or **N** to indicate whether the student is missing documents. If **Y**, the number of missing documents is displayed in parentheses. If the DAC policy associated to the fund source is not configured to check for “Missing Documents”, the field will report the Award Year specific documents for the student that are assigned a document status with the “Approved” flag = N. However the missing documents will not prevent the disbursement from auto-approving and will not report as a fail criteria. If the DAC policy associated to the fund source is configured to check for “Missing Documents”, the field will report the documents configured in the DAC policy “Missing Documents” form and are assigned a document status with the “Approved” flag = N for the student. The missing documents will prevent the disbursement from auto-approving and will report as a fail criteria.

An authorized user can specify the financial aid documents that will be checked when disbursements are evaluated against the Disbursement Approval criteria. Because different disbursement approval criteria can be associated with different fund sources, a school can have different lists of financial aid documents checked within the approval criteria for different fund sources when disbursements are auto-approved.

The **Approve All** button selects all student records in the disbursement form (this batch) for approval, and the **UnApprove All** button clears all students in the form (or batch). A check mark in the box next to each record indicates that the record is selected for the current batch. Batch totals for the total number of approvals and the monetary amount are updated to include the records selected.

Click **Lock Batch** to lock these students into a batch for batch integrity. The batch must be locked to activate Batch Integrity on a manually created branch. **Note:** You cannot unlock a batch once it has been locked, although you will still be able to run Auto Approve disbursements for these students.

Note 4: Once you have selected **Lock Batch**, the **Clear Disbursements** and **Delete Batch** options will be disabled.

6. Click **Clear Disbursements** to remove one or more unapproved disbursements from the batch. CampusNexus Student display a form to allow you to choose a single disbursement or all unapproved disbursements for clearing.
7. In the Clear Disbursements dialog box, select **Single Disbursement** to clear the disbursement in the text box or select **All Unapproved disbursements in the batch.** Click **OK** to confirm.
8. The Clear Disbursement button prompts you to clear the selected disbursement OR clear all unapproved disbursements in the batch. This eliminates the student record from the display and the record set so that the student is no longer associated with the batch. On Save, or Approve (where necessary), CampusNexus Student updates the totals to show the new record counts and amount totals. If a record already exists in the FA Disb Batch Detail table for the scheduled disbursement and Batch ID, CampusNexus Student deletes that record as well. CampusNexus Student also resets the status in the FA Schedule table to S.
9. Click **Print Batch** to print the FA Disbursements Batch Tracking report.

   Note: Since the FA Disbursement Batch Tracking report can include students from various campus locations, administrators can to view the summary total by campus location. In addition, the original batch total is provided on the report so that administrators can see that the original batch total included more disbursement records.

   Administrators may not view student disbursement records that are associated with campus locations to which they do not have permissions.
10. Click **Yes** when you are prompted to save the batch before printing the report,. Where a disbursement is not approved, all reasons for failure appear on the report.

    Details on this report include Campus, Award Year, Batch #, Lender, # Disb, Batch Amount, Amount Approved, Created By, Date Created, Date Posted, Posted By, Disbursement Number, Terms & Hours, and Additional Information.

    If any students in this batch are missing documents, a field labeled Missing Docs is included in the Additional Information area. Document Codes for all missing documents, by student, are shown in the Missing Doc Codes field. Report details can be exported to Excel.

    Unapproved batches appear as follows:

2 Batch Record(s) Selected

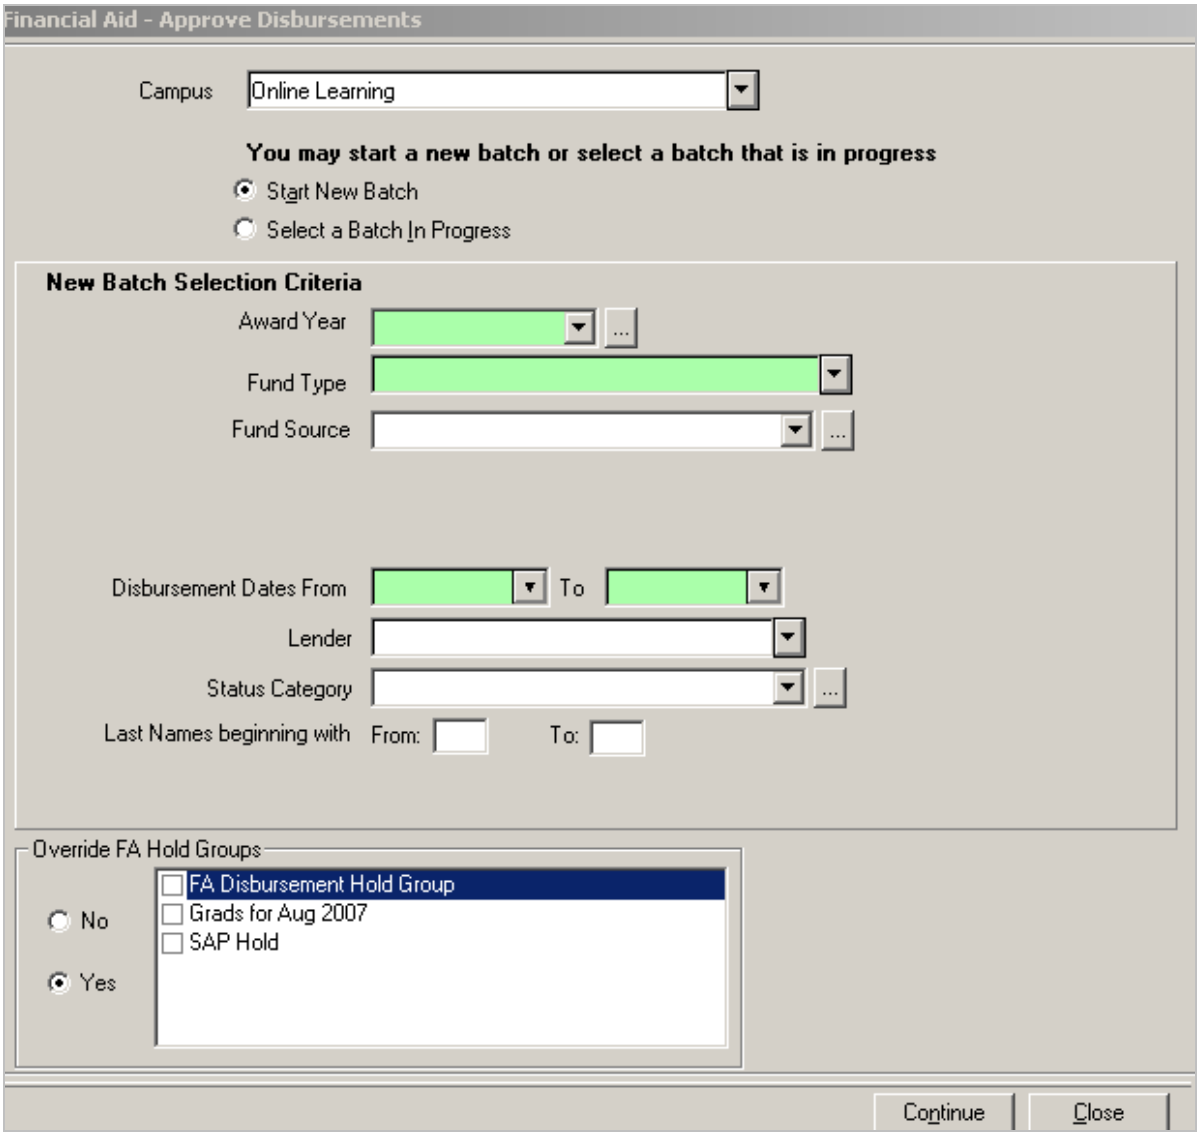
11. Click **Save Batch** to save the batch of disbursements for further review. You can revisit the batch later by selecting it in Step 7. A confirmation message is displayed.
12. Click **Cancel Batch** to abandon the disbursement approval process. The batch is discarded. You will have to start

over at a later date. A confirmation message is displayed.

13. Click **Approve Batch** to complete the processing of the current batch. CampusNexus Student prompts you to confirm the approval. Click **Yes**.
14. When CampusNexus Student finishes the approval processing, it returns to the first page of the wizard. From there you can change campus, start a new batch of approvals, select another batch, or **Close** the form.

Override FA Hold Groups

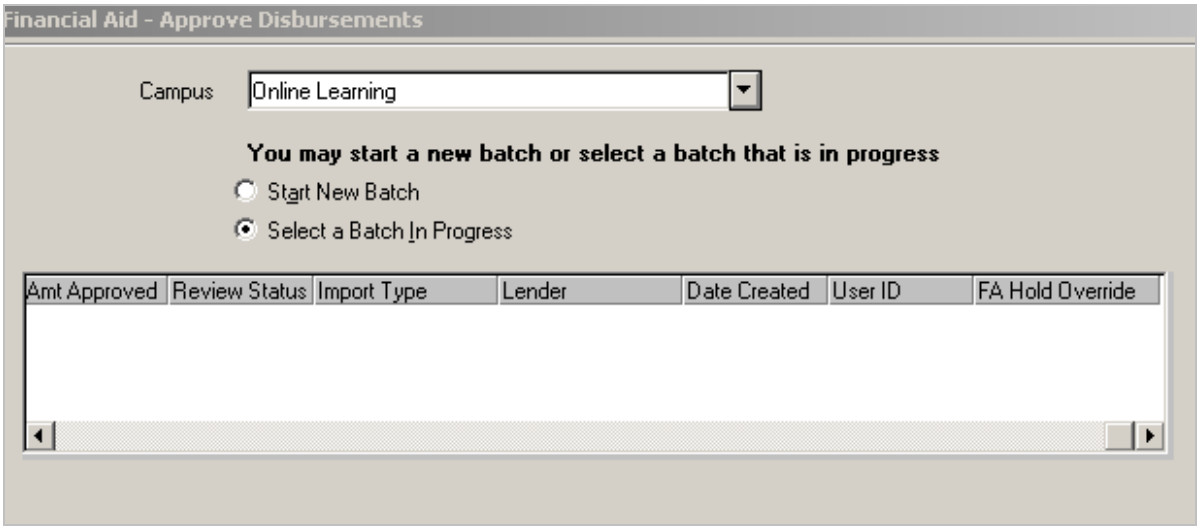
Designated financial aid officers can override FA Hold Groups to process disbursements for previous or future terms for students who may be failing disbursements. If this function has been enabled, the designated financial aid officers will see the option to override FA Hold groups at the bottom of the Approve Disbursements screen:



To approve disbursements without overriding Financial Aid holds, select **No**.

To approve disbursements for students in designated Financial Aid hold groups, select **Yes**, and select the hold groups to override. CampusNexus Student's Approve Disbursements for Pay logic evaluates students in those groups to determine whether their financial aid disbursements should be approved or disapproved for other reasons.

Note: If you choose to work on a batch in progress, the Override FA Hold Groups option will not automatically appear. The Override FA Hold Groups option is displayed **only** if you enter a **Y** in the **FA Hold Override column**, which is the final column option to the right when you **Select a Batch in Progress.**



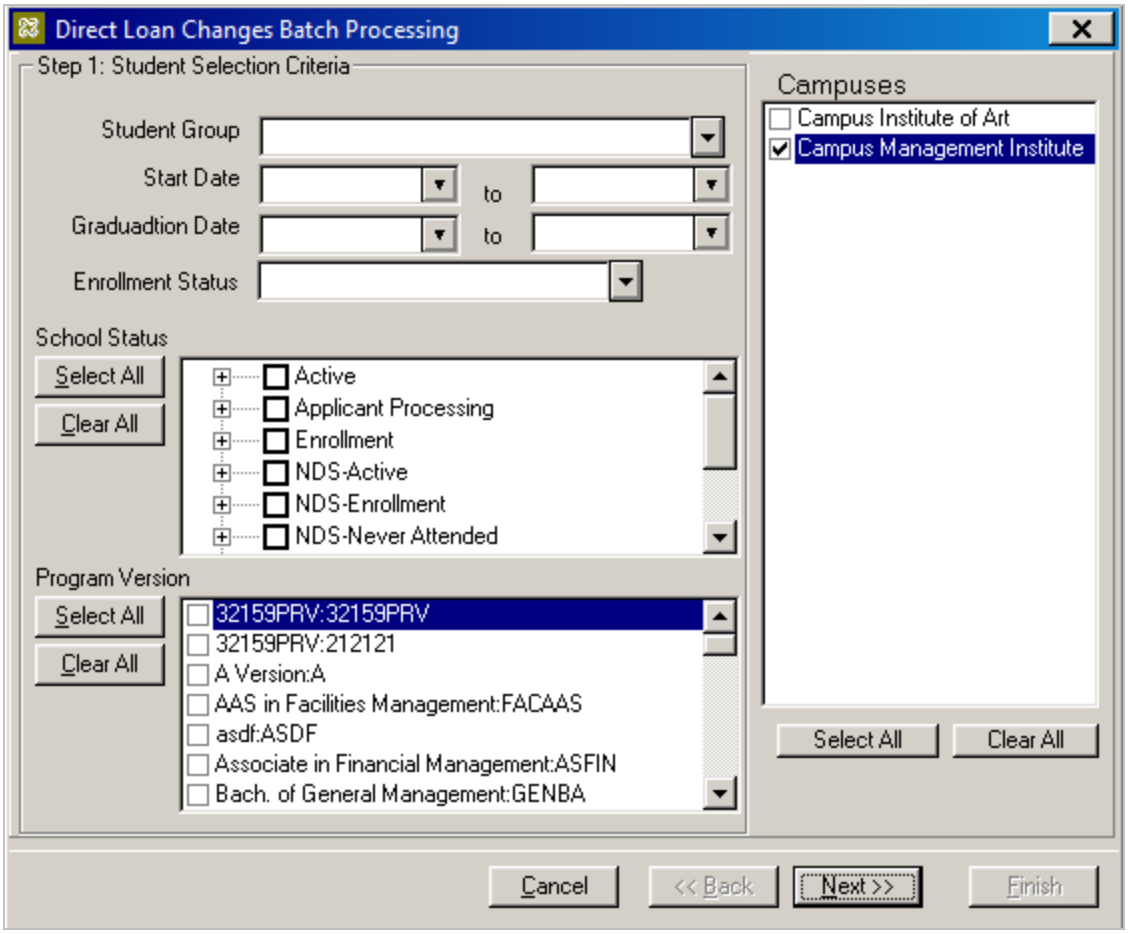
Direct Loan Changes Batch Processing

You may make changes to Direct Loans in a batch mode.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

To make changes to Direct Loans:

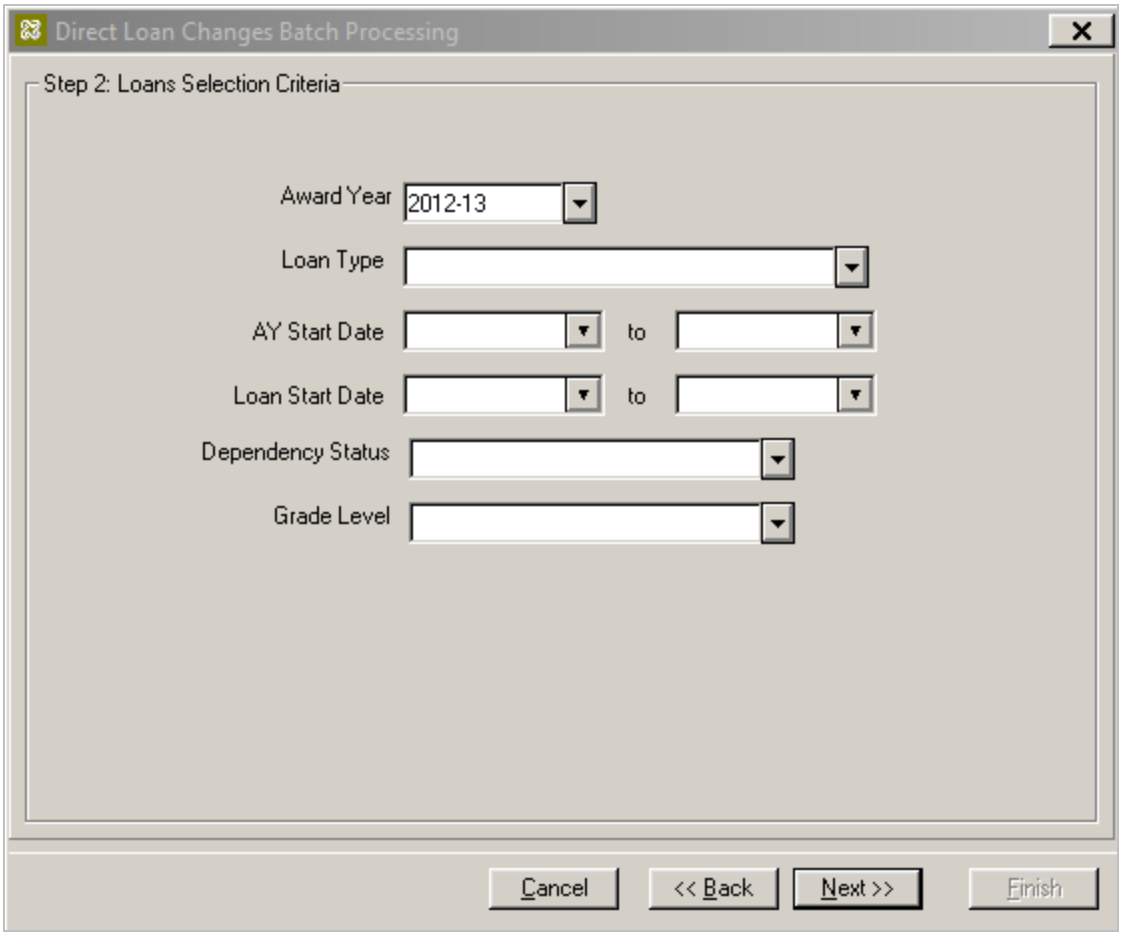
1. Navigate to **Daily > Financial Aid > Batch Processing > Direct Loan**. The Direct Loan Changes Batch Processing form is displayed on the Step 1: Student Selection Criteria page.



2. Select a **Student Group** from the drop-down list.
3. Select a **Start Date** and **to** date from the drop-down lists.
4. Select a **Graduation Date** and **to** date from the drop-down lists.
5. Select an **Enrollment Status** date from the drop-down list.
6. Select the applicable **Campuses**. Use the Select All button to select all campuses, or the Clear All button to cancel the selection of all campuses.
7. Select a **Program Version**. Use the Select All button to select all program versions, or the Clear All button to

cancel the selection of all program versions.

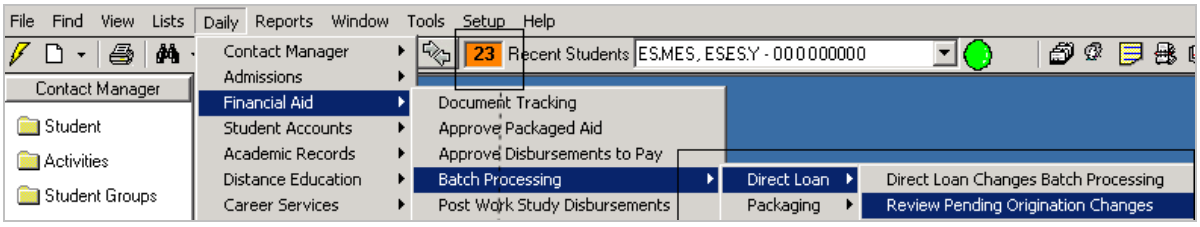
8. Click the **Next** button. The **Step 2**: **Loans Selection Criteria** form is displayed.



9. Select the **Award Year** from the drop-down list.
10. Select the **Loan Type** from the drop-down list.
11. Select an **Academic Year (AY) Start date** and **to** date from the drop-down lists.
12. Select a **Loan Start date** and **to** date from the drop-down lists.
13. Select the **Dependency Status** from the drop-down list.
14. Select the **Grade Level** from the drop-down list.
15. Click the **Next** button.
16. Follow the prompts until the **Finish** button becomes active to complete the process.

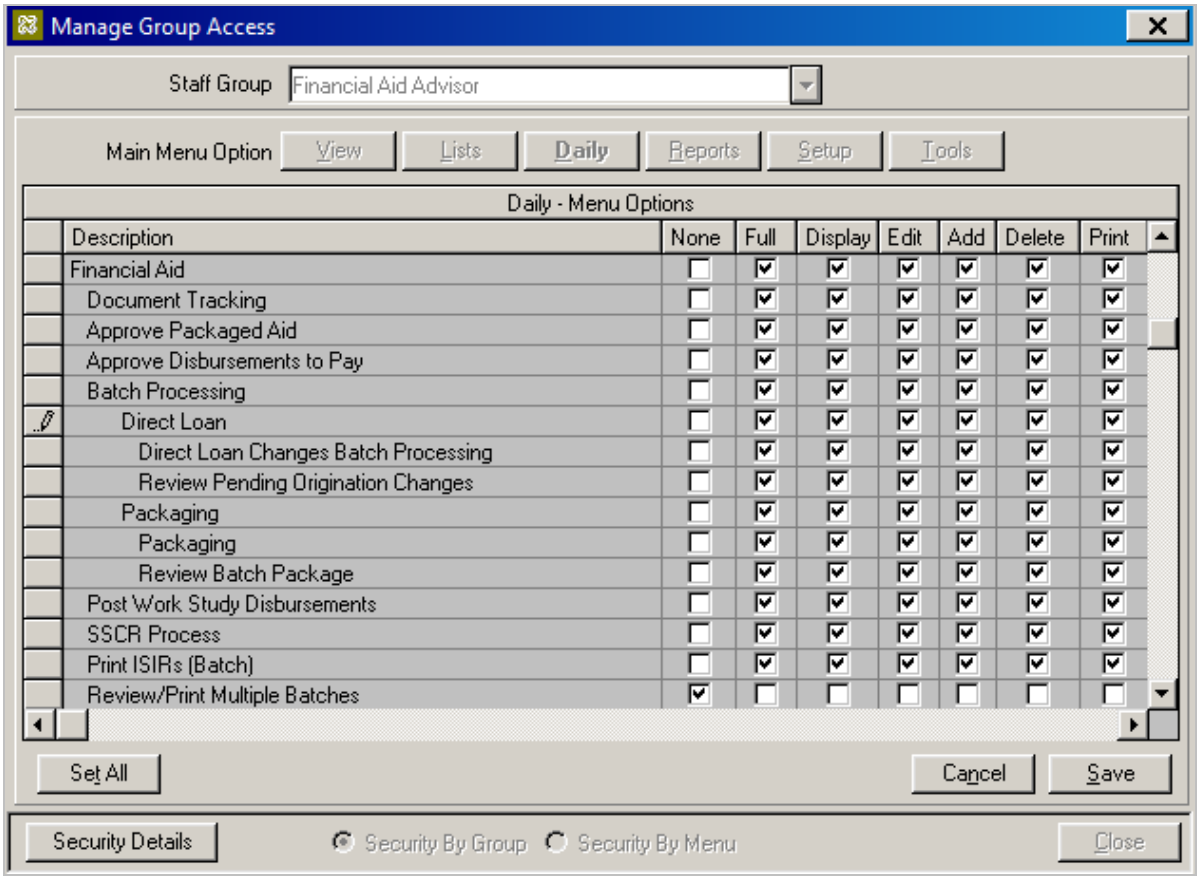
Review Pending Origination Changes

Navigate to **Daily > Financial Aid > Batch Processing > Direct Loan > Review Pending Origination Changes**. Notice that next to the Recent Students field a label with background color displays the number of pending origination change records. This number is based on the user's campus permission. This label is visible only if the Financial Aid Advisor Allow Origination flag is set to 'True' in the System Registry and the user has been set up to be notify of changes. If the user has no permission to the Review Pending Origination Changes form, then when the user clicks on the icon a pop up message box will appear stating 'You do not have permission to view this form. Please contact your system administrator.'



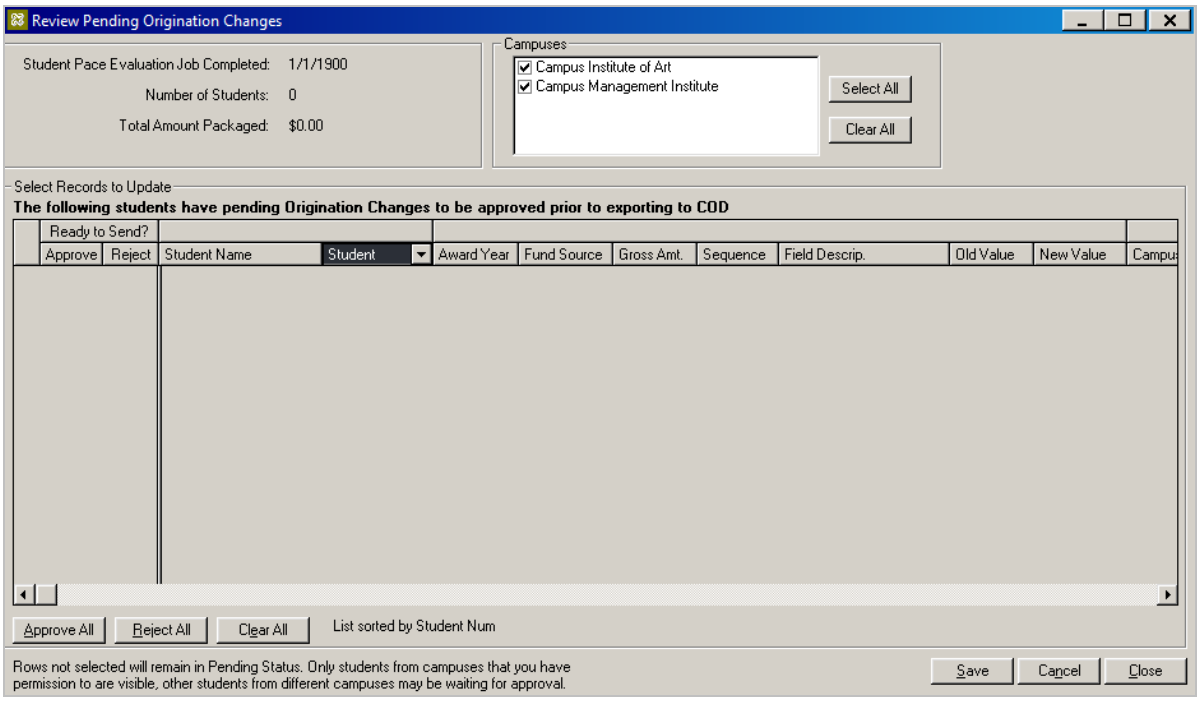
Security

Notice that the menu item 'Review Pending Origination Changes' is displayed under Direct Loan. Security was automatically added when the Review Pending Origination Changes menu was added. By default, security access defined for Direct Loan for all Groups has been applied to the Review Pending Origination Changes menu item. Additionally, the Direct Loan form configuration has been applied to the Review Pending Origination Changes menu.



Review Pending Origination Changes Form

When the Review Pending Origination Changes form opens, the top of the form displays the **Student Pace Evaluator Job Completed** date, **Number of Students** reported, and the **Total Amount Packaged** figure Campuses displayed in the **Campuses** section are only the campuses to which the user has access. The **Select All** button allows the user to select all campuses listed, and the **Clear All** button clears all the check boxes selected.



The **Select Records to Update** section displays all the pending origination changes done by the Student Pace Evaluator (SPE) in the grid. Each row in the grid represents an origination change, and it contains the following information about each origination change: Ready to Send? Accept and Reject check boxes, Student Name, Student Num, Award Year, Fund Source, Gross Amt., Sequence, Field Descrip, Old Value, New Value, Campus, Program Version Description, Start Date, and Date Added.

Note: Only students from campuses to which the user has permission will be visible. Students from different campuses may still be waiting for approvals.

Users can approve or reject the pending origination changes listed by selecting the **Approve** or **Reject** check box next to the student's name, and then clicking the **Save** button to keep their selections. Users can also click the **Approve All** button to select all pending origination changes in the grid to keep or click the **Reject All** button to reject all the pending origination changes in the grid. All Approved records are gathered and sent to COD in the next Export, whereas all the Rejected records are permanently removed from the list of Pending Origination Changes. Rows not selected will remain in Pending Status.

Clicking **Clear All**or **Cancel** resets all selections to their original settings. If the user clicks **Close**, the application will close; if this button is clicked while changes are being made, the user will have the opportunity to save the changes before closing.

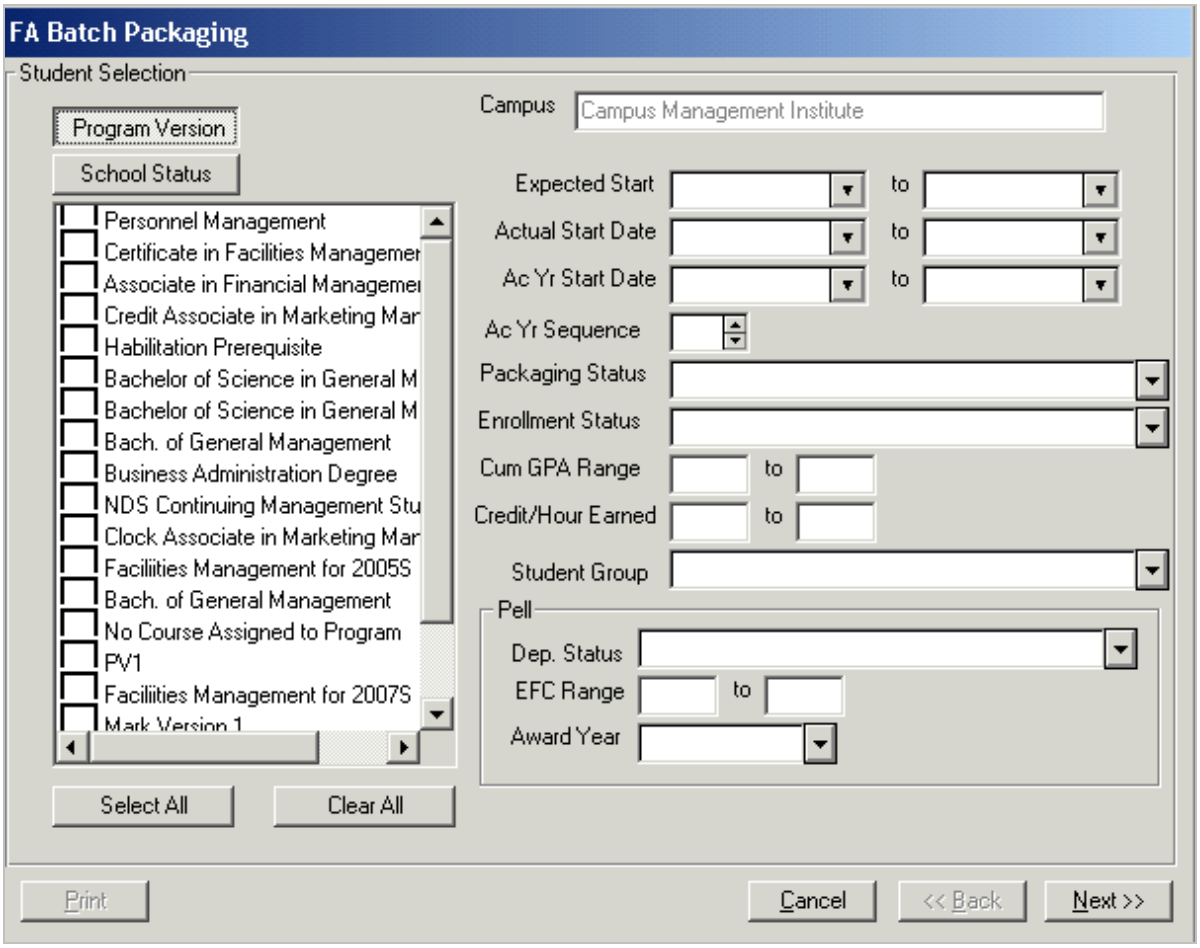
Packaging Financial Aid

FA Batch Packing involves two steps. First, you select the students and set up batch packing criteria. Then, you package the financial aid using one of two methods:

- Use Auto-Package
- Create FA Package

To set up batch packaging:

1. Navigate to **Daily** > **Financial Aid**, **Batch Processing > Packaging > Packaging**. The FA Batch Packaging form is displayed.



2. Select appropriate packing criteria:

FA Batch Packaging Criteria

Packaging Criteria	Selection
Program Version	From this list select all that apply.
School Status	From this list select all that apply.
Expected Start Date	From each of the menus select the from and to date range.
Actual Start Date	From each of the menus select the from and to date range.
Academic Year Start Date	From each of the menus select the from and to date range.
Academic Year Sequence Number	Choose the sequence number.
Packaging Status	The current packaging status of the students you are packaging.
Enrollment Status	The current enrollment status of the students you are packaging. • Q - 3/4 Time • F - Full Time • H - Half Time • L - Less than half time
Cum GPA Range	Enter the grade point average from and to range.
Credit/Hour Earned	Enter the credit or hour earned from and to range.
Student Group	Select a student group from the menu.
Dependency Status	Select Dependent or Independent.
EFC Range	Enter the expected family contribution (EFC) range.
Award Year	If an EFC range or Dependency status is used, the award year is required.

3. Click **Next**. The packaging methods are displayed. Select Use Auto-Package or Create FA Package.

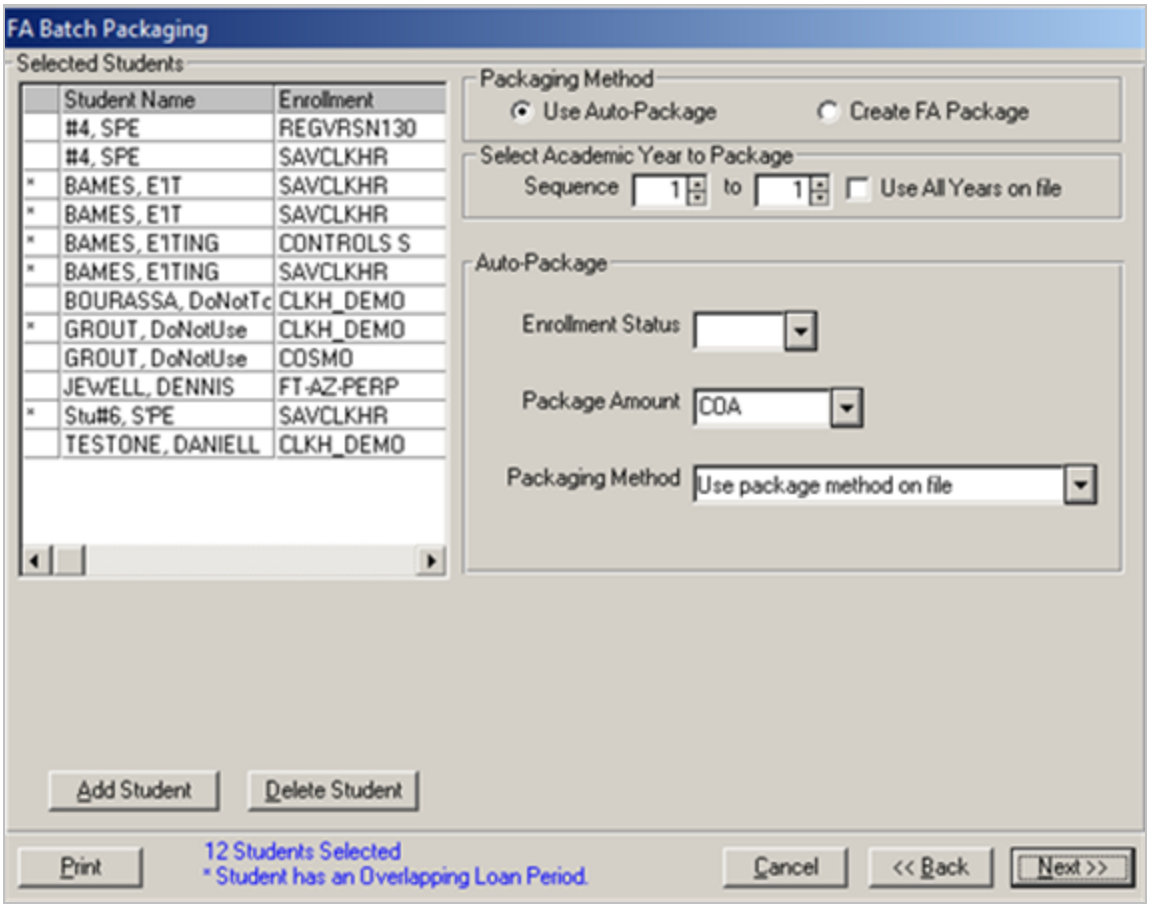
Use Auto-Package

When *Use Auto-Package* is selected and a disbursement schedule is configured as a required field, CampusNexus Student checks if a disbursement schedule exists for the selected Academic Year where the fund source has a 'Begin AY Start Date' and 'End AY Start Date'. If no disbursement schedule is found, the student is added to the exception report. The new exception is displayed in the Exception column.

You can create a new financial aid package for all students selected in the batch setup step above. The package can be assigned only to students in a specific AY Sequence or all AY Sequences on file by leaving the AY Sequence 0.

If any of the students gathered for batch packaging have an overlapping loan period for the academic years included, an asterisk is displayed in the first column next to each student's name and a message stating that the student has an overlapping loan period is displayed under the number of students selected.

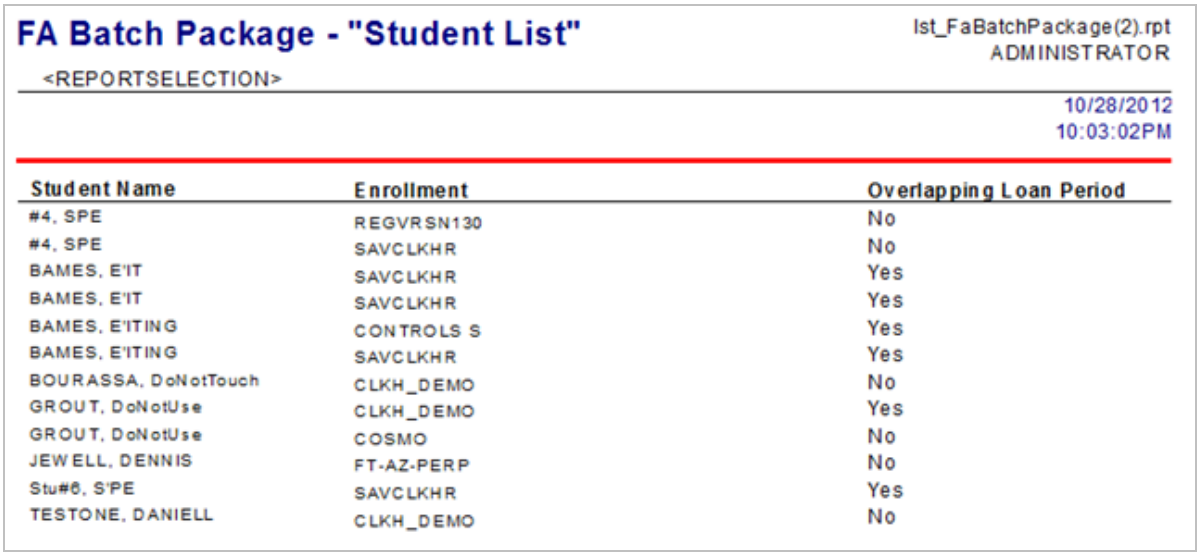
1. In the *Select Academic Year to Package* section, select a specific **AY** to package or select **Use All Years on file**.



2. Select the **Enrollment Status** for the financial aid package, such as:
    - X - Use Status on file.
    - Q - 3/4 Time
    - F - Full Time
    - H - Half Time
    - L - Less than half time
3. Select the **Package Amount**, such as:
    - Cost of Attendance (COA)
    - Institutional Charge
4. Select the **Packaging Method**, such as:
    - Use package method on file
    - Auto-Award - SFAA
    - FBF12 36CR/40WK/4PP - FBSF12
    - Manual
5. Click **Add Student** to add a student to the batch. If student who is being added to the list has an overlapping loan period, an asterisk (*) is placed next to the student's name in the first column of the grid.
6. Click **Delete Student** to remove the selected student from the batch.

7. Click **Print** to display the Report Selection: FA Batch Package - "Student List" form and select report criteria.

   The report displays the Student Name, Enrollment, and Overlapping Loan Period columns. For every student listed on the report, if the student has an Overlapping Loan Period, *Yes* appears in the Overlapping Loan Period column; if the student does not have an Overlapping Loan Period, *No* appears in the Overlapping Loan Period column.



FA Batch Package - "Student List"

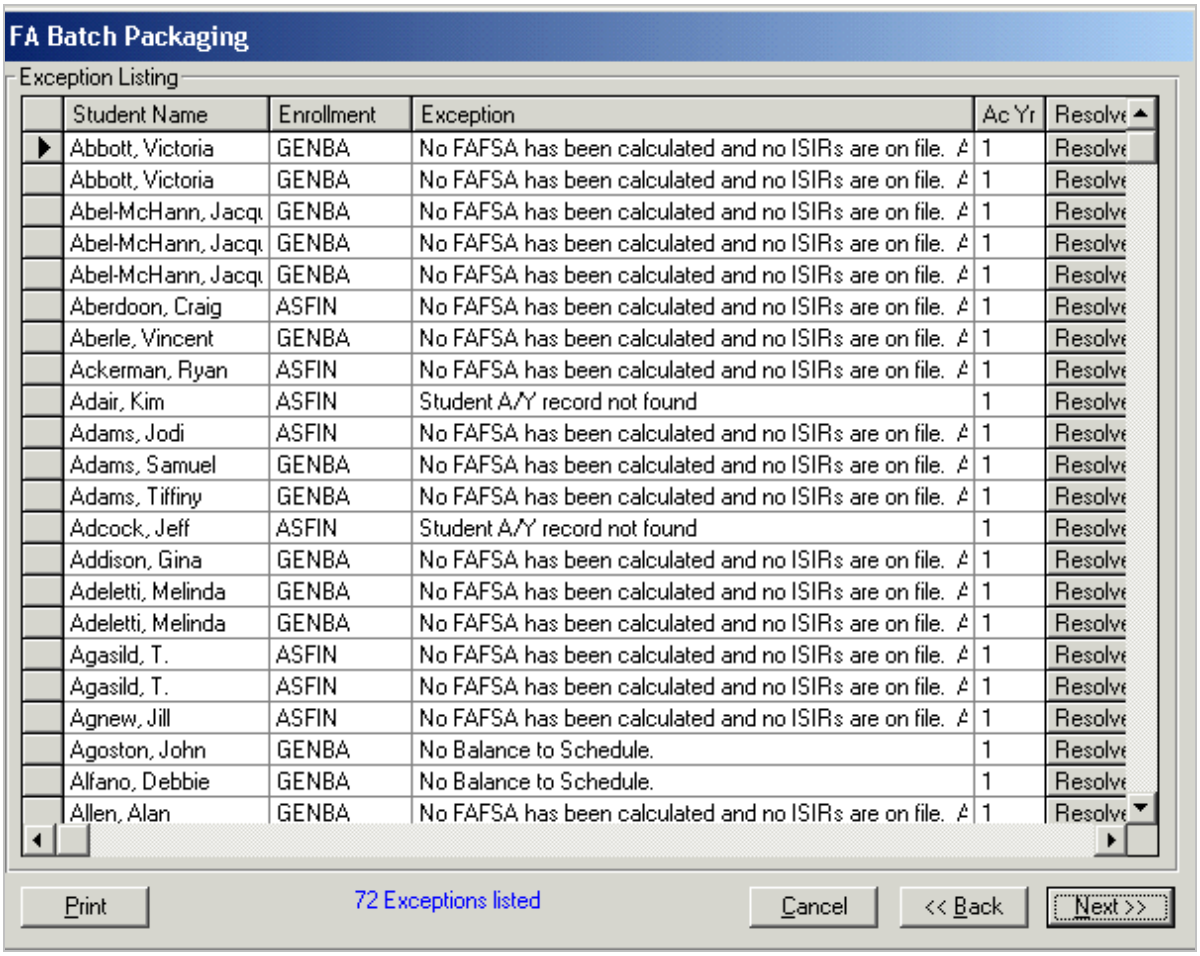
lst_FaBatchPackage(2).rpt
ADMINISTRATOR

<REPORTSELECTION>

10/28/2012
10:03:02PM

Student Name	Enrollment	Overlapping Loan Period
#4, SPE	REGVRSN130	No
#4, SPE	SAVCLKHR	No
BAMES, E'IT	SAVCLKHR	Yes
BAMES, E'IT	SAVCLKHR	Yes
BAMES, E'ITING	CONTROLS S	Yes
BAMES, E'ITING	SAVCLKHR	Yes
BOURASSA, DoNotTouch	CLKH_DEMO	No
GROUT, DoNotUse	CLKH_DEMO	Yes
GROUT, DoNotUse	COSMO	No
JEWELL, DENNIS	FT-AZ-PERP	No
Stu#6, S'PE	SAVCLKHR	Yes
TESTONE, DANIELL	CLKH_DEMO	No

8. Click **Next**. An Exception list shows students and the exceptions found. If no exceptions are found, the packing wizard moves to the next step.



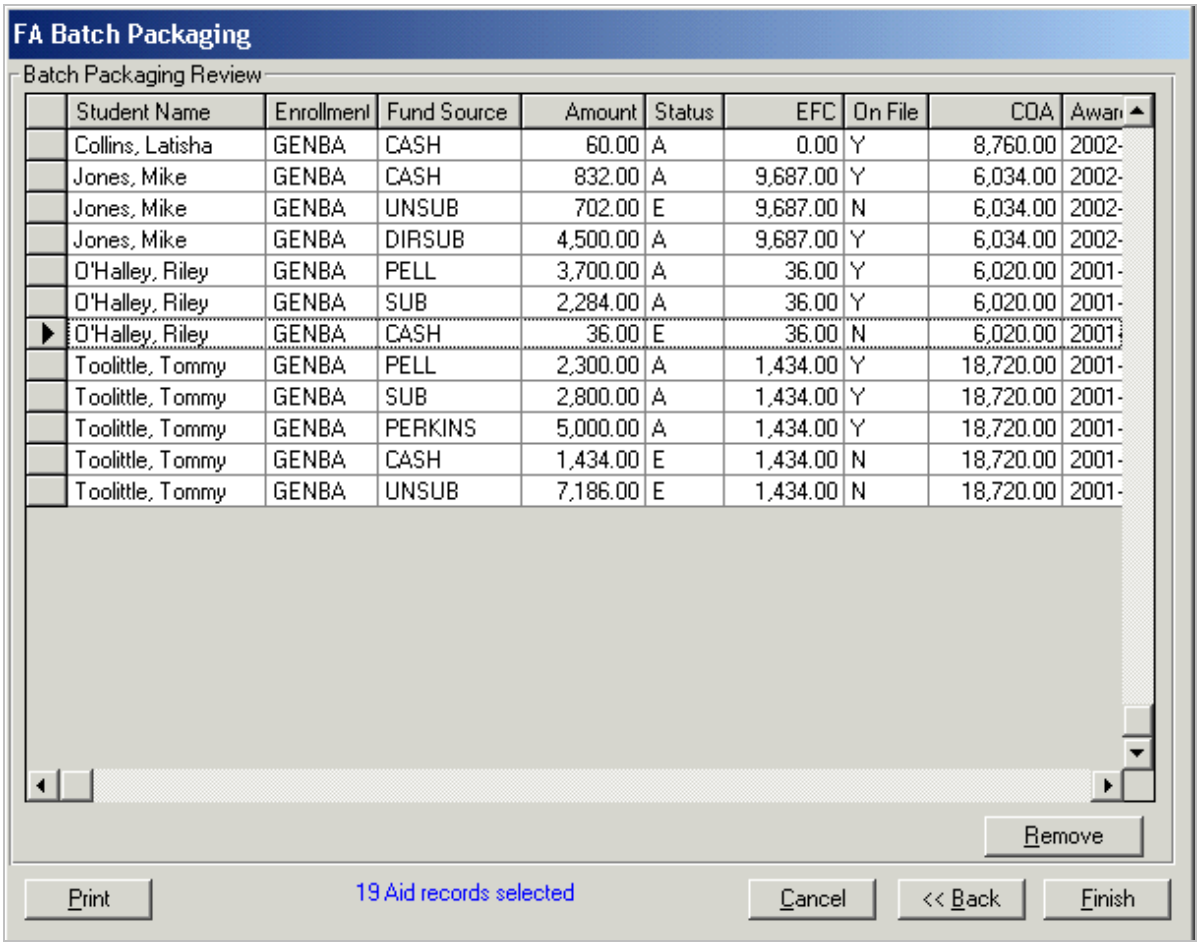
9. Click **Resolve** to resolve the exception for the student. The student is removed from the list after the exception is resolved.

   Note: When you batch package students with overlapping loan periods and the fields "Overlap Period Credits/Hours" and "Overlap Period Weeks" were not populated in the “NSLDS Loans / Overlapping Loan Periods” tab of the NSLDS Previous Institute Details form, exceptions are added. The exception text is "Credits/Hours and Instructional Weeks are required for the overlapping loan period. Please see the student's NSLDS Overlapping Loan information for details."

   When you click **Resolve** on this exception, you are taken to the Awards form. Navigate to the NSLDS form where you can enter the "Overlap Period Credits/Hours" and "Overlap Period Weeks" that are required to create loan periods to award direct loans for the overlapping loan period.

   You can also continue packing excluding the students listed on the exception list.

10. Click **Next**. The Batch Packaging Review list is displayed.



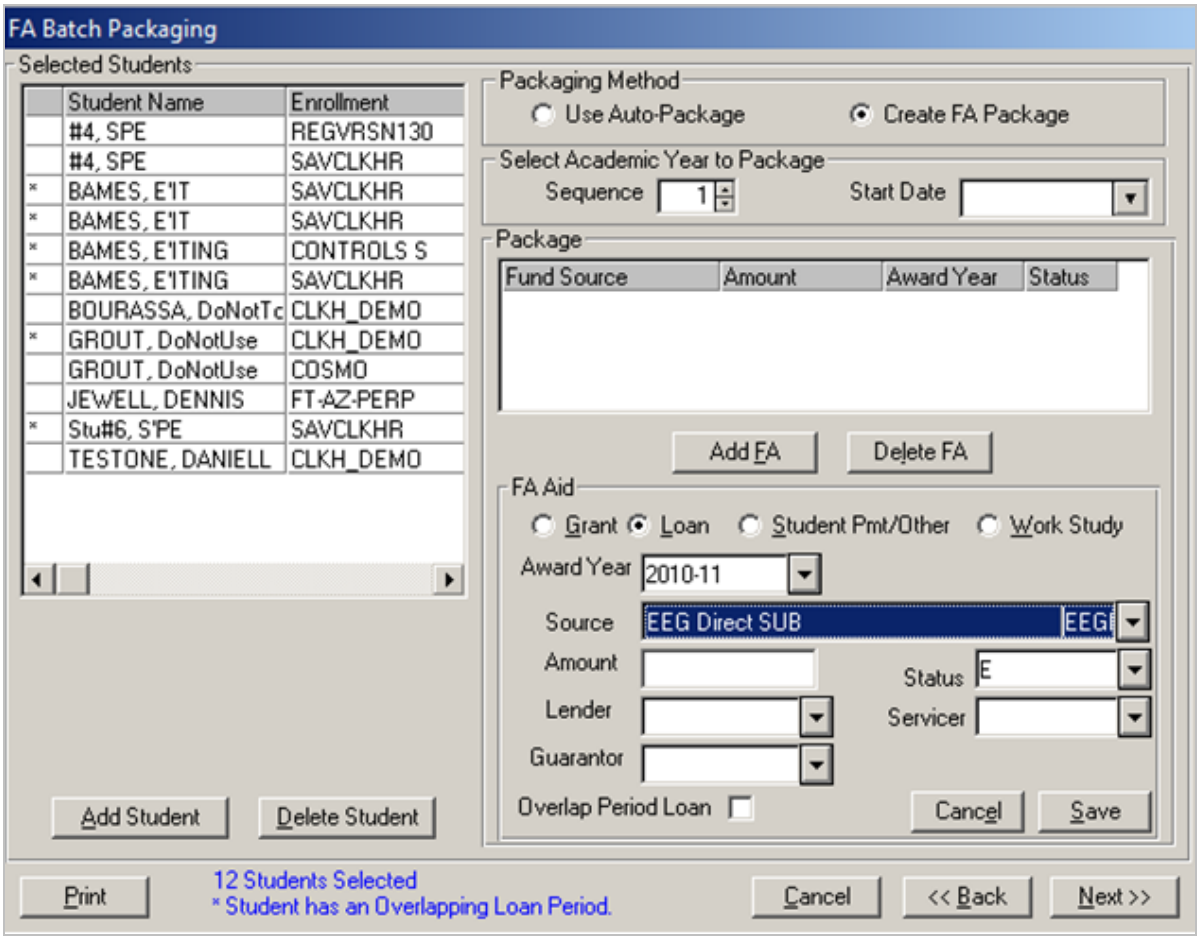
Note: If the **Unsupported Dependent** check box is selected, the student is accepted in the FA Batch Packaging process and awarded only Unsubsidized Stafford loans.

11. Click **Remove** to edit amounts for aid that is not on file and exclude aid. Auto-packaging uses the scheduled disbursements if defined or calculates the disbursements if scheduled disbursements are not defined. All aid is added on estimated status.
12. Click **Finish**. CampusNexus Student completes the aid package and a confirmation message is displayed.

Create FA Package

When you select the *Create FA Package* method, you can select an Award Year, a fund Source, Amount, and Status. For loans, the servicer, lender, and guarantor can be defined. Scheduled disbursements are used if defined.

When *Create FA Package* is selected, and the Academic Year Sequence is set to 1, a new Disb. Schedule menu is displayed. A deactivated fund source for the award year and campus may not appear in the source list.



Students with overlapping loan periods typically have two loan periods in the first Academic Year, a stub loan period and a full loan period that starts within the same Academic Year. Select the Overlap Period Loan check box to indicate whether the direct loan being added is for the stub loan period. A loan that is marked as Overlap Period Loan is assigned to the stub loan period. A loan that is not marked as Overlap Period Loan is assigned to the second loan period in the Academic Year.

Note: Institutions should only package students with stub loan periods together. Packaging students with stub loan period and students without stub loan periods in the same batch can cause undesirable results.

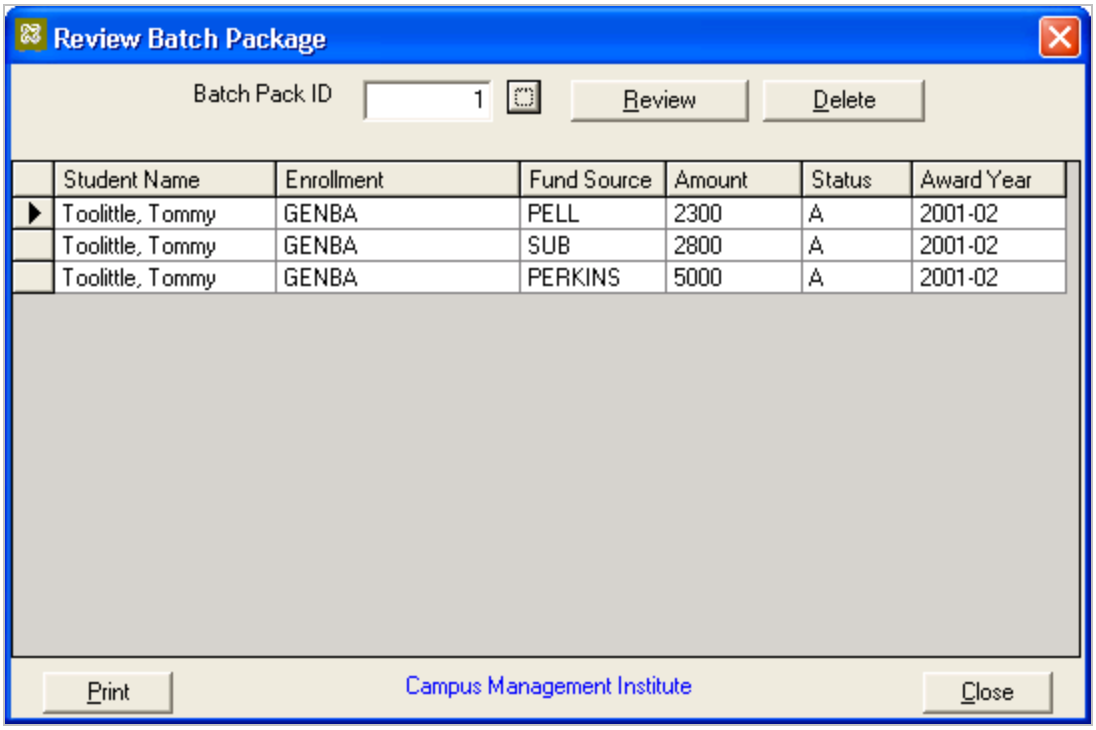
For more information regarding stub loan period and overlapping loan period, refer to Packaging for Overlapping Loans.

Review Batch Package

This feature allows you to review or print batch-packaged financial aid for students.

To review batch-packaged financial aid:

1. Navigate to **Daily** > **Financial Aid**, **Batch Processing > Packaging > Review Batch Package**. The Review Batch Package form is displayed.



2. Enter a Batch Package ID and click **Review** or **List Batches** to display a list of Batch Package IDs with the Number of Records, Date Added, and User for your session default campus.
3. Double-click a row on the list of batches to display the aid packaged in the batch. The grid displays the Student Name, Enrollment, Fund Source, Amount, Status, and Award Year. Also shown on the bottom of the form is your session default campus.
4. Select a batch and click **Delete** to delete all aid associated with the batch. If you elect to delete a batch, a message shows asking you to confirm the deletion. Aid with paid disbursements or Pell with origination statuses A or B will not be deleted.
5. Click **Print** to display a report listing the aid packaged in the selected batch.

Scholarship Processing

This is an outline of the procedure to set up a scholarship for a student. Some preliminary conditions must be in place. As with virtually all student financial aid, a FAFSA must be prepared for the academic year in which the scholarship is to be set up. After the FAFSA is on file, you can continue with the process described below.

To set up a scholarship:

1. Set up the Fund Source.

   Navigate to **Lists > Financial Aid >** Fund Source. Select the Fund Source Type "Scholarship".

2. Set up the Academic Year.

   Navigate to **Lists > Financial Aid >>** Programs.

   - Choose program and program version. Values for academic calendar, credits, and weeks are populated by CampusNexus Student.
   - Click **Add**.
   - Select a **Default Budget**
   - Click **New**.
   - Select **Other Grant**.
   - Select the Number of **Disbursements**.
   - Click **Save**.

3. Select the Student Master of the student to whom you wish to give the scholarship.

   Select **View > Financial Aid >** Packaging.

   - Select the **Enrollment**.
   - Click **Add**.
   - Select the **Academic Year**. (If the Academic Year is not displayed, a FAFSA must be added for the student).
   - Click **Package**.
   - Click **Add**.
   - In the new Source of Aid form, select the **Type of Aid**.
   - Select the Fund **Source**.
   - Enter the **Gross Amount**.
   - Choose a **Status**: A = Approved; E = Estimated; P = Pending.
   - In the Scheduled section, click **Add**.
   - Select or enter the **Exp Date** date in this format: MM/DD/YYYY.
   - Specify the **Exp Amount**. Specify one lump sum distribution or add several smaller amounts that add up to the gross amount.
   - Click **Save** and **Close**.
   - Close all windows.

4. Approve disbursements.

   Navigate to **Daily > Financial Aid > Approve Disbursements to Pay**.

   - Choose **Select a Batch In Progress**.
   - Select the **Award Year**, **Fund Source**, and **Disbursement Dates**.
   - Click **Continue**.
   - Select the **Approve** check boxes next to the amounts.
   - Click **Post Batch**.

5. Post disbursements.

Navigate to **Daily > Student Accounts >** Post FA Disbursements.

- Enter Check #, EFT (if applicable), and term.

6. Verify posting.

   To verify that the amount has been posted, go to the ledger card of the student.

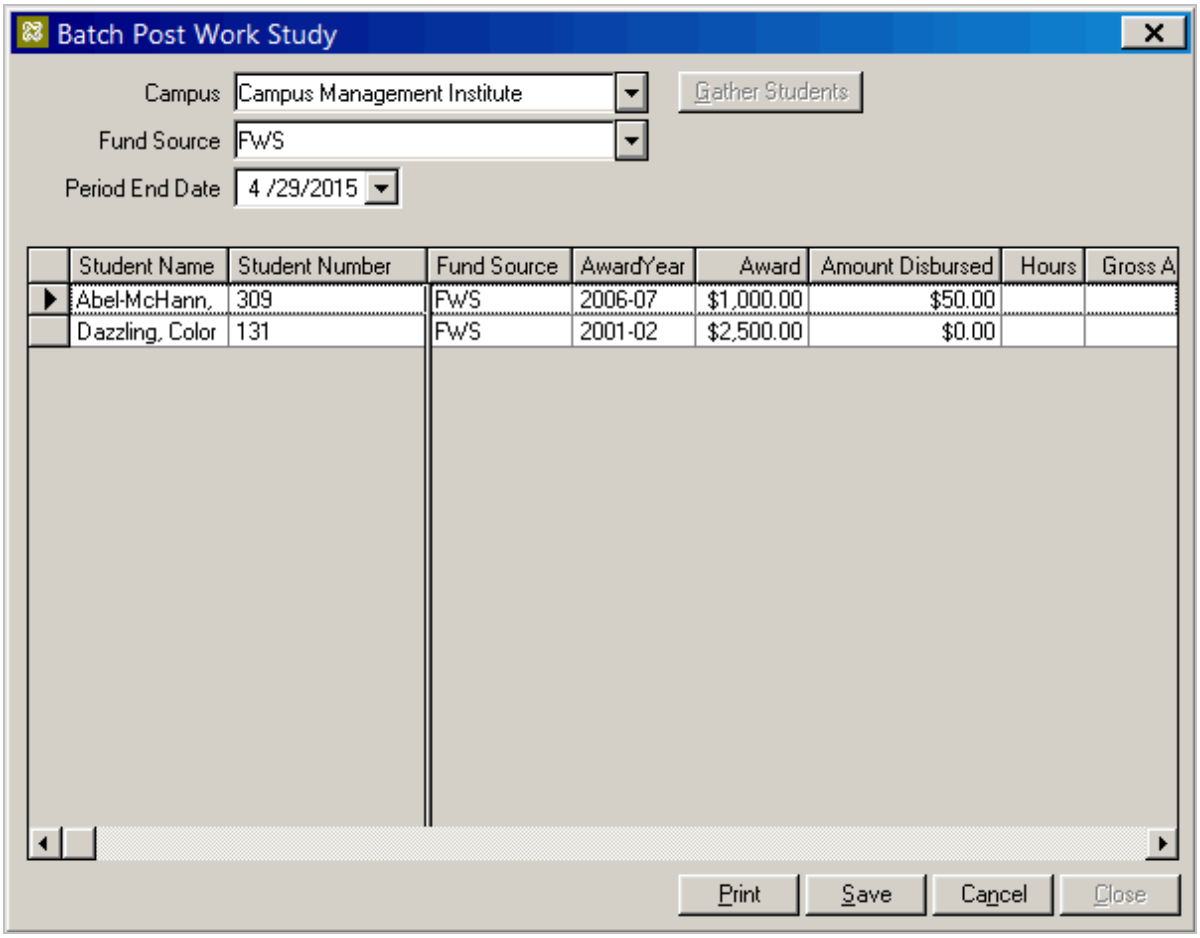
Post Work Study Disbursements

Use the Post Work Study Disbursements form to enter all work study disbursements made for a given pay period.

Note: When CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll, the batch post option for work study disbursements is disabled.

To post work study disbursements:

1. Navigate to **Daily > Financial Aid > Post Work Study Disbursements**. The Batch Post Work Study form is displayed.



2. Select a **Campus**.
3. Select a **Fund Source**. Select only fund sources where the Fund Source Type = WORKST. If you leave the field blank, all fund sources with Type = WORKST are included.
4. Select a **Period End Date**.
5. Click **Gather Students**. CampusNexus Student gathers all work study awards that meet the specified criteria, are for currently enrolled students, and have not been fully disbursed.

   CampusNexus Student displays the following information:

- Student Name
- Student Number
- Fund Source
- Award Year
- Award
- Amount Disbursed
- Hours (Worked) (You enter this.)
- Gross Amount Paid (You enter this.)
- Date Paid (You enter this. The system date is displayed by default.)
- Academic Year (You select this from a list of the academic year records for each student.) Each record includes the academic year number, academic year start date, and academic year end date. The student's current academic year is selected by default.
- Term (You select this from a drop-down list of active terms.) This column can be blank.
- Check Number (You enter this.)

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

6. For each student who is paid work study, enter the applicable information in the grid.
7. Click **Print**. CampusNexus Student generates a report listing the work study awards that are being disbursed. Only the rows on the grid where the Amount Paid is not equal to zero are listed. The total amount paid is listed at the bottom of the report.
8. Click **Save**. The data you entered is saved to appropriate database tables.
9. Click **Cancel** to undo the results of your search. The system returns the form to its blank state.

Another report is available at Reports > Financial Aid > FA Batch Posting Work Study. This report lists all work study payments made and offers criteria to filter on the date of disbursement.

SSCR Process

Note: Please access Regulatory Help for the latest content about FAFSA, ISIR, and COD processing.

Be sure to select the applicable Student Status Reporting and Default Withdrawal Date Settings options before processing the SSCR file.

Click the Process SSCR Roster File or Process Error Notification link to skip the overview and go right to the procedure steps.

See Status Codes to map school status to NSLDS statuses, and Date/Status tab of the Enrollment folder to verify that the statuses are mapped correctly. For more information, see SSCR Status Mappings.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

The **SSCR Processing wizard** uses the enrollment status credits or hours when calculating enrollment status (not the academic credits hours).

Portions of this topic are excerpts from the SSCR User's Guide 1998 published by the U.S. Department of Education. The excerpts contain the **SSCR Process Overview** and **SSCR Cycle** information, and should be read before processing SSCR Roster or Error files.

Process SSCR Roster file

To process the SSCR roster file:

1. Navigate to **Daily** > **Financial Aid** > **SSCR Process** or **SSCR Process (2014-15 and Later**. The SSCR Processing wizard is displayed.

   Note: New NSLDS Enrollment Reporting and Notification processes were introduced in July 2012 to be implemented prior to March 31, 2013. The file format associated with these updates must be used by all customers starting on April 1, 2013. Some customers still wish to use the old format and must work with NSLDS to accept those files. To enable users to have the choice of the old or new formats, the EnableSSCRFormatPost2013 regkey has been set to = 0. Setting this key to 0 changes the look of the SSCR Processing form, enabling customers to choose the Original Format File or the 2013 Enhanced Format File. Customers not wishing to can use the old format can contact Anthology Inc. Support to set regkey EnableSSCRFormatPost2013 = 1, so that the 2013 Enhanced Format File is the default and a choice is not longer available.

2. Select **Process SSCR Roster File** and select the Original Format File or 2013 Enhanced Format File option. If these options are not available, click **Next**.

3. Click **1. Find Roster File**.

4. The Select File to Import form is displayed with the default folder for import and export files selected. Files with the appropriate file name are displayed.

   Note: New NSLDS Enrollment Reporting and Notification processes were introduced in July 2012 to be implemented prior to March 31, 2013. CampusNexus Student updates have been made to replace the previous SSCR processing file layout formats and message classes with the new NSLDS Fixed Width file layout formats and message classes. The changes occur in the processing of SSCR Enrollment Roster Files and Error acknowledgement files.

   The processing of Error Notification files and Enrollment Roster files from NSLDS uses the message class name of EFRFLEOP that allows CampusNexus Student to generate files to be sent to NSLDS using the new message

class name of EFSFLEIN. The processing of the Error Acknowledgement file and the Enrollment Roster files continue to generate the backup file using BK (EFSFLEBK).While CampusNexus Student will continue to support the old file formats and message classes until March 31, 2013, after March 31, 2013, only the new file format and message classes will be supported.

For institutions that have not completed processing of SSCR files that use the old file format and message classes before March 31, 2013, it will be the sole responsibility of the institution to work directly with NSLDS to convert their files. For more information, pleae refer to the NSLDS Enrollment Reporting Guide, 2012.

5. Select the roster file to be processed and click **Open**. The selected File Name is displayed and the 2. Match Roster File button is *enabled*.

6. Click **2. Match Roster File** to start the matching process. CampusNexus Student examines the SSCR records from the NSLDS, comparing each one to the *existing* student master records in the CampusNexus Student database. When the processing is completed, a confirmation message is displayed.
7. Click **OK** to acknowledge the message and complete the process.

   Note: Be sure to write down the directory folder and file name for the correction file. Clicking OK will close the SSCR Processing wizard. (The Finish button is not used in this procedure.)
8. CampusNexus Student displays the **SSCR Import File Process Report**. The report shows any anomalies detected in the processing of the file. If you opted to *include new students* on the SSCR Roster File by selecting the Include New Students option, then they will be added to the SSCR Import File Process Report (denoted by *** ADDED TO FILE ***), as well as the Roster return file that is sent to NSLDS.
9. Use EDConnect to export the Roster return file to the NSLDS.

   When viewing the *report* generated by the CampusNexus Student:

   If school statuses have been mapped to NSLDS statuses, the appropriate 'Code for Enrollment Status' is recorded for each student in the 'New Status' column, and the 'Date of Anticipated Completion', and/or 'Date Enrollment Status Effective' is recorded for the student (if required for the particular Code for Enrollment Status) that is based on the mapped NSLDS status and not the Campus Status.

   When viewing the *text file* generated for the process:

   If school statuses have been mapped to NSLDS statuses, the appropriate 'Code for Enrollment Status' is recorded for each student in field position 290, and the 'Verify that the Date of Anticipated Completion (field position 139-

146)', and/or 'Date Enrollment Status Effective (field position 291-298)' is recorded for the student, if required for the particular 'Code for Enrollment Status' that is based on the mapped NSLDS status and not the Campus Status.

Process Error Notification

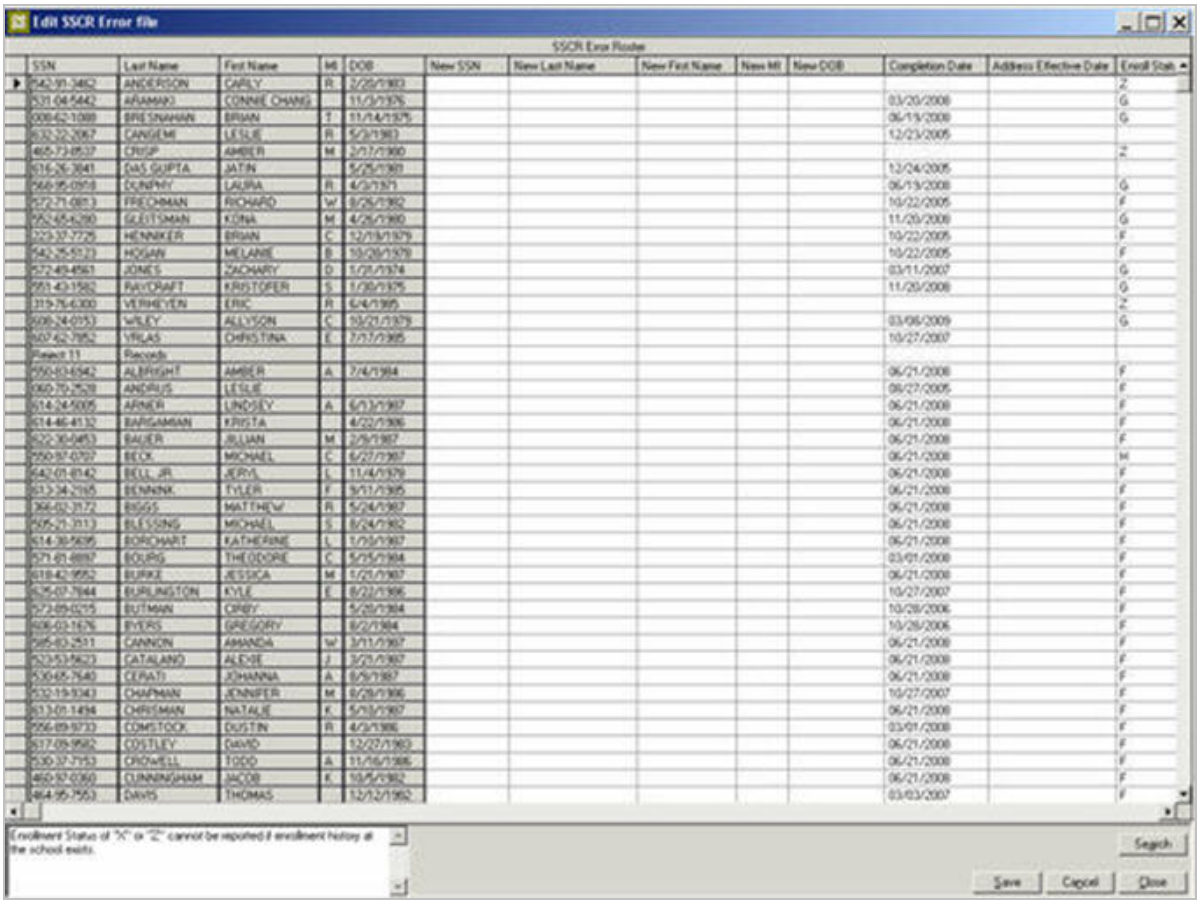
To process the SSCR Error Notifications:

1. Navigate to **Daily** > **Financial Aid** > **SSCR Process**. The SSCR Processing wizard is displayed.
2. Select one of the file formats, select **Process SSCR Error Notification**, and click **Next**. The Edit Error File form is displayed.
3. Click the **1. Find Error File** button and locate the error file in the default directory.

   Note: As stated above, new NSLDS Enrollment Reporting and Notification processes were introduced in June 2012 to be implemented prior to March 31, 2013. CampusNexus Student updates have been made to replace the previous SSCR processing file layout formats and message classes with the new Enrollment Reporting file layout formats and message classes. The changes occur in the processing of SSCR Enrollment Roster Files when exporting the files to the Clearinghouse, and the processing of SSCR Error Notification Files when regenerating the Extract File.

   The processing of Error Notification files from NSLDS using the new message class name of EFRFLEOP allows the Error Correction files to generate from NSLDS using the new message class name of EFSFLEIN. The processing of the Error Acknowledgement file continues to generate the backup file using BK (EFSFLEBK). It processes and generates the SSCR Error Correction files using the new file layout format as defined by NSLDS, including the new required data elements of Credential Level, Student Address, Term start and end dates, Anticipated Graduation Date (which uses new logic for less than half time status students and current logic for full or half time status students), and Full Middle Name. The Clearinghouse export file regenerates populating the newly required fields as designated by NSLDS and uses the new file format (A2) for the Clearinghouse as designated in the NSLDS Enrollment Reporting Guide 2012.

   For institutions that have not completed processing of SSCR files that use the old file format and message classes before March 31, 2013, they will have to select the old file format and will have to work directly with NSLDS to convert their files. For more information, refer to the NSLDS Enrollment Reporting Guide, 2012.
4. Select the file to be processed and click the **Open** button.
5. The 2. Match Error File button becomes enabled and the filename and file location are displayed. Click the **2. Match Error File**. The Edit SSCR Error File screen appears containing the records that were rejected by NSLDS.



6. The Edit SSCR Error file screen will:

    a. Group students with reject codes other than Reject 11 in the Error file alphabetically at the top of the list, and

    b. Group all students having only a Reject 11 record in the Error file at the bottom of the list. A separator line appears following the first group of students and just above the second group of students to differentiate the Reject 11 records.

7. Students who have only Reject #11 error records are *excluded* when building the outgoing error response file, so that they are never resubmitted in the response to the SSCR Error/Acknowledgement file. The trailer record layout of the SSCR export file is the same as the SSCR record layout.

8. This screen displays the values for the student's SSN, Last Name, First Name, Middle Name, Date of Birth, Completion Date, Enrollment Status Code, and Date Enrollment Status fields. The SSN through the Date of Birth fields *cannot* be edited, however, all other fields can be edited or new values assigned in the New SSN, New Last Name, New First Name, New Middle Name, New Date of Birth, or Address Effective Date.

9. You can also search for students using the Search button at the bottom right-hand corner of the screen.

10. Any **Reject 11** Records are listed following the **Reject 11 Records** header row.

    These records are returned from NSLDS when they do not have any information for new students. If you opted to include new students on the SSCR Roster File by selecting the Include New Students option, then when NSLDS does not have information on the new students, it will return the records as Reject 11 records. You do not need to

do anything to the reject 11 students within the error file itself. These are simply displayed as information to the institution that NSLDS does not have these students on file.

11. Make your corrections and click **Save** or click **Cancel** to discard any changes.
12. Click **Close** to exit the screen. If you click Close without saving or exporting the file, the following message is displayed: *Ok to close this form without saving and building Error Correction File?*

    Click **No** to return to the Edit SSCR Error File screen or **Yes** to exit without saving or building an Error Correction File.
13. If you select **Save**, CampusNexus Student creates an SSCRXXIN file that you can export.

    ⚠ Be sure to write down the directory folder and file name for the correction file.

    Click **OK** to continue.
14. Use EDConnect to send any correction file back to NSLDS.

Begin Excerpts

SSCR Process Overview

Since the passage of the Higher Education Act of 1965, schools have been required to confirm and report the enrollment status of attending students who receive federal loans. This reporting process is called Student Status Confirmation Report (SSCR). Because a student's enrollment status determines his or her deferment privileges and grace periods, as well as the government's payment of interest subsidies, SSCR is critical for effective administration of Title IV loans. It is the primary means of verifying students' loan privileges and the federal government's monetary obligations.

In 1994, the U.S. Department of Education (ED) began using the National Student Loan Data System (NSLDS) to track and monitor all student loan borrowers and grant overpayments. ED has incorporated SSCR into the NSLDS to centralize and fully automate the enrollment verification system.

Note: The logic that calculates enrollment statuses within the SSCR and Clearinghouse by Term processes also supports Term Groups.

The SSCR Cycle

SSCR processing through NSLDS significantly streamlines the entire enrollment confirmation procedure. At the same time, it can optimize the frequency of scheduled reporting cycles and, therefore, the timeliness of the data. The list below describes the entire activity, step by step, showing which participant is responsible for each step. Regardless of how many times you elect to report, each cycle must include the following steps:

1. **NSLDS**:
   A. Generates the SSCR Roster File for your school.
   B. Forwards the Roster File to you.
2. **Your School**:
   A. Receives the SSCR Roster file.
   B. Matches the Roster File against registration files.
   C. Updates each student's enrollment status and effective enrollment status date with valid codes on the

SSCR Roster File, as defined in chapter 5 of ED's User Guide.

D. Proposes changes to student identifiers (student's SSN, last name, first name, middle initial, and birth date) as needed.

E. Changes or adds student permanent address data as needed.

F. Adds a detail record to the file for each new student as needed.

G. Checks that the updated file contains valid data, as defined in Chapter Five of ED's SSCR User Guide, to reduce the likelihood that NSLDS will find errors.

H. Returns the updated SSCR Roster File, now called the SSCR Submittal File, to NSLDS within 30 days of the date it was sent to the school.

3. **NSLDS**:

   A. Receives the SSCR Submittal File.

   B. Edits (error-checks) the Submittal File contents.

   C. Updates the NSLDS database with enrollment status changes.

   D. Captures proposed student identifier changes and new or changed address data.

   E. Returns the SSCR Error Notification File, which includes any records containing errors, applicable error codes, and a count of accepted and rejected records, to your school for correction. If there are no errors, the file contains a count of accepted records and no detail records.

   F. Forwards the new and changed data to each affected data provider (such as GAs and Direct Loan Servicer).

   G. Monitors the timeliness of your school's response, following up if necessary.

4. **Your school**:

   A. Receives and saves the SSCR Error Notification File.

   B. If all records were accepted by NSLDS, considers the SSCR cycle complete. Corrects any records with identified errors.

   C. Returns the corrected records to NSLDS as the SSCR Error Correction File within ten days of the date it is sent to the school.

5. **If your school returned an SSCR Error Correction File, NSLDS**:

   A. Receives the returned SSCR Error Correction File.

   B. Edits the returned Detail Records.

   C. Repeats steps 3C through 3G for the returned Detail Records.

   D. Sends a revised SSCR Error Notification File to your school.

NSLDS begins the next cycle by generating a new **Roster File** reflecting all changes accepted from the last **SSCR Roster**, including unresolved errors from the previous cycle.

End Excerpts

SSCR Status Mappings

This topic describes the Enrollment Reporting (formerly known as SSCR) statuses. The table consists of SyStatusID status codes, their descriptions, and the status categories associated with each code, and how these codes are interpreted by NSLDS.

SSCR Status Mappings

SyStatusID	Code	Description	Status Category	NSLDS interprets this as:
1	NEW	New Lead	(L) Lead	n/a - no enrollment
2	SCHED	Interview Scheduled	(L) Lead	n/a - no enrollment
3	INT	Interviewed	(L) Lead	n/a - no enrollment
4	APPREC	Application Received	(C) Applicant Processing	n/a - no enrollment
5	FUT	Future Start	(E) Enrollment	(X) Never Attended
6	BP	Being Processed	(E) Enrollment	(X) Never Attended
7	REENTRY	Re-Entry	(E) Enrollment	Calculates Previous School Status
8	FROMPROG	Transfer From Other Program	(E) Enrollment	(X) Never Attended
9	FROMCAMP	Transfer From Other Campus	(E) Enrollment	(X) Never Attended
10	NOSHOW	No Show	(N) Never Attended	(X) Never Attended
11	CANCEL	Cancel	(N) Never Attended	(X) Never Attended
12	APPREJ	Application Not Accepted	(N) Never Attended	(X) Never Attended
13	ATT	Attending	(A) Active	Calculates Enroll Status
14	PROB	Probation	(A) Active	Calculates Enroll Status
15	LOA	Leave of Absence	(T) Temporary Out	(A) Approved Leave of Absence
16	SPN	Standard Period of Non-Enrollment	(T) Temporary Out	Calculates Enroll Status
17	GRAD	Graduate	(P) Permanent Out	(G) Graduated
18	COMPLETE	Complete	(P) Permanent Out	(G) Graduated
19	INC	Incomplete	(P) Permanent Out	Calculates Enroll Status
20	DROP	Drop	(P) Permanent Out	(W) Withdrawn

SyStatusID	Code	Description	Status Category	NSLDS interprets this as:
21	TOPROG	Transfer To Other Program	(P) Permanent Out	n/a - will find a more recent enrollment
22	TOCAMP	Transfer To Other Campus	(P) Permanent Out	n/a - will find a more recent enrollment
23	NP	Not Yet Placed	(G) Graduate-Placement	n/a - career services status
24	PLACED	Currently Placed	(G) Graduate-Placement	n/a - career services status
28	NA	Not Available	(G) Graduate-Placement	n/a - career services status
29	NDS-ATT	NDS: Attending	(Y) NDS-Active	Calculates Enroll Status
30	NDS-PROB	NDS: Probation	(Y) NDS-Active	Calculates Enroll Status
31	NDS-FUT	NDS: Future Start	(X) NDS-Enrollment	(X) Never Attended
32	NDS-BP	NDS: Being Processed	(X) NDS-Enrollment	(X) Never Attended
33	NDS-RE	NDS: Re-Entry	(X) NDS-Enrollment	Calculates Previous School Status
34	NDS-COMP	NDS: Complete	(Z) NDS-Permanent Out	(G) Graduated
35	NDS-INC	NDS: Incomplete	(Z) NDS-Permanent Out	Calculates Enroll Status
36	NDS-DROP	NDS: Drop	(Z) NDS-Permanent Out	(W) Withdrawn
37	NDS-NO	NDS: No Show	(W) NDS-Never Attended	(X) Never Attended
38	NDS-CAN	NDS: Cancel	(W) NDS-Never Attended	(X) Never Attended
39	NDS-REJ	NDS: Application Rejected	(W) NDS-Never Attended	(X) Never Attended
40	PENDAPP	Pending Applicant	(C) Applicant Processing	n/a - no enrollment
41	ISPLACED	InSchool Placed	(I) In School-Placement	n/a - career services status

SyStatusID	Code	Description	Status Category	NSLDS interprets this as:
42	ISNP	InSchool Not Yet Placed	(I) In School-Placement	n/a - career services status
43	ISNA	InSchool Not Available	(I) In School-Placement	n/a - career services status

Print ISIRs-Batch

Note: Please access Regulatory Help for the latest content about FAFSA, ISIR, and COD processing.

Review/Print Multiple Batches

This function serves three purposes.

1. Review financial aid data import batch files.
2. Review financial aid data export batch files.
3. Import groups of files into CampusNexus Student at the same time rather than individually.

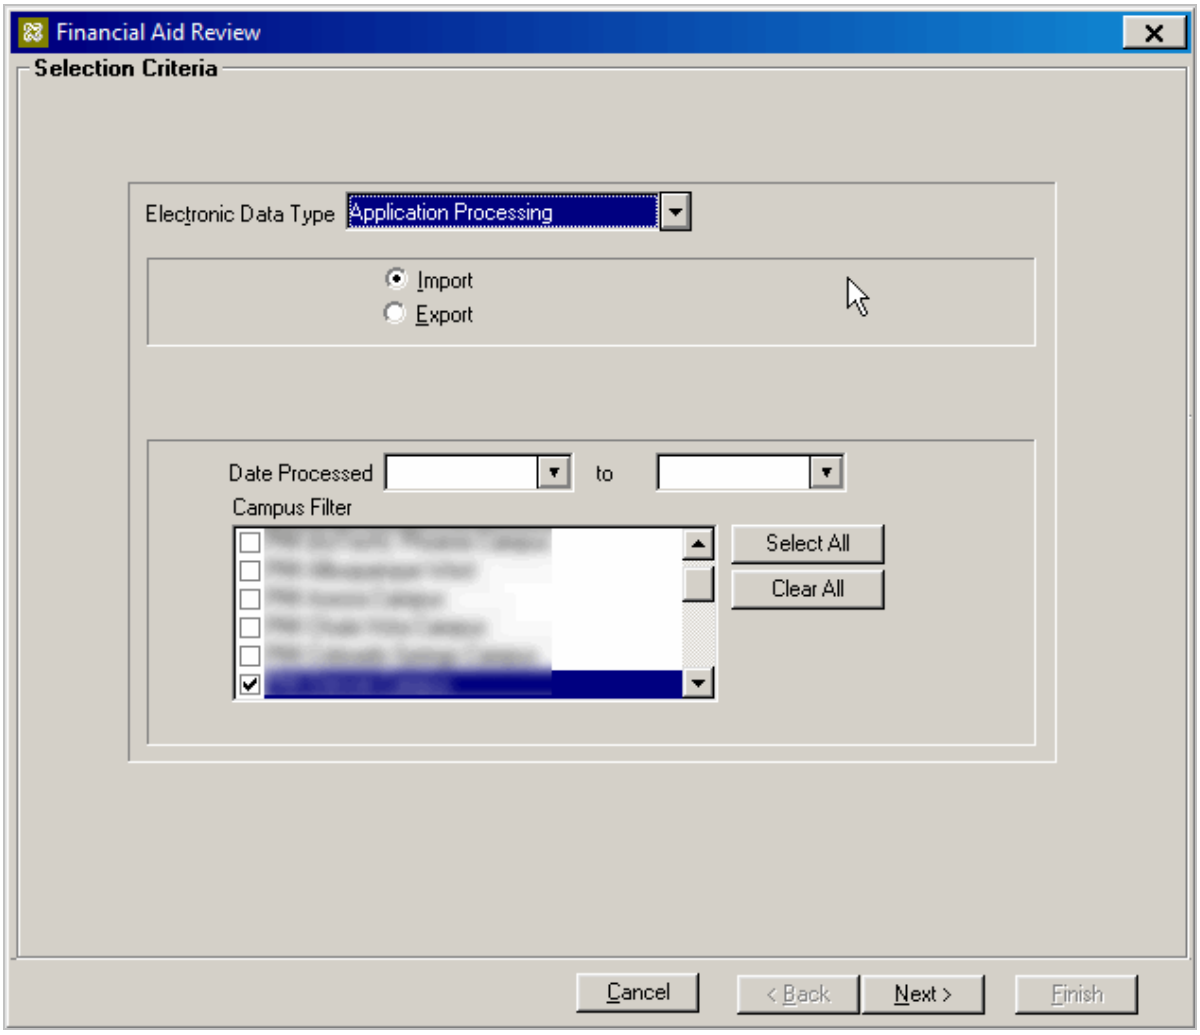
Review Import Batches

Import batches from the following sources can be reviewed:

- Central Processing System (CPS) - Application Processing
- Clearinghouse/National Student Loan Data System (NSLDS) - SSCR Roster Files
- Common Origination and Disbursement (COD) - Direct Loan Files, Program Files
- Recipient Financial Management System (RFMS) - Pell Grant Files

To review an imported batch file:

1. Navigate to **Daily > Financial Aid** > **Review/Print Multiple Batches**. The Financial Aid Review wizard is displayed.



2. Select the Electronic Data Type that you want to review. The options are:
    - Application Processing
    - Clearinghouse
    - Direct Loan
    - Pell / RFMS
    - COD
    - ACG Grants
    - SMART Grants
    - SSCR
3. Select a **Date Processed** range.
4. Select **Import** to import a file or **Export** to export a file. SSCR files can only be imported, so these options will not appear when SSCR is selected as the Electronic Data Type.
5. If the **Campus Filter** grid is presented, use the check boxes to select/ clear campuses. For speed and ease of use, use the **Select All** and **Clear All** buttons and add and delete campuses individually, if applicable.
6. Click **Next>**. The next page of the wizard, the Electronic Data for Application Processing Export Records form, presents a list of imported batches for the selected file types. In the **Batch Information** grid, you will see the Batch ID, School Id, File Type, Number of Records, Award Year, Date Added, File Name, Regeneration Flag, and Regenerated Batch ID.
7. Select the batch file that you want to review.
8. Click **Print to print a report of the batch you selected.** You cannot review a batch that has been regenerated. You can, however examine the file resulting from the regeneration. If the system is unable to print a report, a message will so indicate and provide the batch number by which it has been regenerated.
9. The Report Preview window is displayed for the batch selection made above. Browse or print it as you would any other report.
10. After closing the report viewer, click **Finish** to close the **Import and Review form** or select and review another batch.

Review Export Batches

The process for reviewing export batches is the same as for import batches.

Batch Import

(Import Multiple Batches.) At this time, the Batch Import function only works with Pell/RFMS files. Other file sets will be added in the future. Basically, you can select files from the list and import them in the appropriate order to be processed by CampusNexus Student. There are some caveats. For instance, if you select disbursement acknowledgments but do not select the corresponding origination acknowledgments, the disbursement records will not be posted.

Otherwise, the selected batch files will be processed just as if they were selected individually under the other Import Data menu options.

To import a group of files:

1. Navigate to **Daily > Financial Aid** > **Review/Print Multiple Batches**. The Electronic Data for Importing Batches wizard is displayed.
2. Select the **Electronic Data Type**, for example, Pell / RFMS.
3. Select **Import**. The Attending Pell ID list box appears.
4. Select the appropriate **Attending Pell ID**.

5. Click **Next**. A list of available batch files is displayed in a grid. The files are listed in the appropriate order for processing.
6. Click each of the files you want to import to select them.
7. Click **Batch Import**. CampusNexus Student processes each of the files from the top of the list to the bottom.
8. When the processing is completed, CampusNexus Student returns to the grid form and enables the **Print** button.
9. Click **Print** to print the appropriate report of the files you imported.

Export and Import File Types

The tables below list the files that CampusNexus Student exports to financial aid-related destinations and imports from these destinations.

- FAFSAs and ISIRs
- Direct Loans
- Pell Grants
- SSCR/Clearinghouse
- Third Party Servicers
- Import Attendance/Grades
- COD Export and Import

In the file names, the letters "*yy*" represent the financial aid award year in many file names. For instance, the award year 2015-2016 is represented as "*16*".

Note: You can generate a report that lists information about files that have been imported or exported for Application Processing, Clearinghouse, COD, Direct Loan, Pell/RFMS, SSCR and SSCE. For more information, see FA Export/Import Batch Tracking.

FAFSAs and ISIRs

CampusNexus Student exports files to and imports files from the Central Processing System (CPS).

- Export file names end in "IN".
- Import file names end in "OP".

The file names change periodically. For an up-to-date, downloadable table of FAFSA and ISIR file names, refer to "Message Classes" in the EDE Technical Reference at https://ifap.ed.gov/ilibrary/document-types/ede-technical-reference.

FAFSA and ISIR Files

File Name	From	To	Description
COREyyOP	CPS	School	Electronic correction errors file
CORRyyIN	School	CPS	Corrections to FAFSA/ISIRs; Duplicate Requests
EAPRyyOP	CPS	School	Electronic Application (FAFSA) rejects
EAPSyyIN	School	CPS	Initial Applications/Renewal Applications
EAPSyyOP	CPS	School	Electronic Application ISIRs from processed initial applications. May have reject codes included.
ESFNyyOP	CPS	School	Site Agency ISIR Non-Resident file
ESFRyyOP	CPS	School	State Agency ISIR Resident file
FDREyyOP	CPS	School	Error Report File
FDRFyyOP	CPS	School	Processed FDRs
IDAPyyOP	CPS	School	Daily ISIRs that are the result of Applications records submitted by the school
IDCOyyOP	CPS	School	Daily ISIRs that are the result of Correction Records submitted by the schools
IDSAyyOP	CPS	School	Daily ISIRs that are generated for all schools listed on the record

File Name	From	To	Description
IGCOyyOP	CPS	School	CPS pushed ISIR that are the result of Correction Records submitted by the school
IGSAyyOP	CPS	School	CPS pushed ISIR that are generated for all schools listed on the records
ISRFyyOP	CPS	School	ISRF requested directly from the ISIR Datamate
RAPRyyOP	CPS	School	Error File
REAPyyOP	CPS	School	Not supported after 2003
SARAyyOP	CPS	School	Automatic Institutional Student Information Records (ISIRs)
SAREyyOP	CPS	School	Electronic correction and duplicate request errors. Reject error report
SARRyyOP	CPS	School	ISIRs generated from corrections/duplicate records
SIGAyyOP	CPS	School	Signature correction errors file
SIGSyyIN	School	CPS	Signature corrections file
SYSGyyOP	CPS	School	System generated ISIRs resulting from CPS reprocessing, NSLDS Post-screening, or students being removed from a hold file
YTDOyyOP	CPS	School	Year-to-Date ISIR file
YTDRyyOP	CPS	School	State Agency YTD ISIR residential file

Direct Loans

CampusNexus Student exports files to and imports files from the the Common Origination and Disbursement (COD) system.

- Export file names end in "IN".
- Import file names end in "OP".

Direct Loan Files

File Name	From	To	Description
CRCSyyOP	COD	School	Credit Status Response
CRECMYOP	COD	COD	Direct Loan Entrance Counseling Acknowledgment
CRIByyOP	COD	School	Direct Loan - Informed Borrowing Response (Award Year 2020 and later)
CROFyyOP	COD	School	Origination Fee and Interest Rebate Percentage Response
CRSPyyOP	COD	COD	Direct Loan Plus Application Acknowledgment
CODRBFOP	LOC	School	Year-to-Date Rebuild
DECFyyOP	LOC	School	Entrance Counseling Results
DEPFyyIN	School	LOC	Loan Origination - PLUS
DERCyyIN	School	LOC	Loan Detail

File Name	From	To	Description
DESCyyIN	School	LOC	Loan Origination Changes
DESDyyIN	School	LOC	Disbursements
DESFyyIN	School	LOC	Loan Origination - Stafford
DIAAyyOP	LOC	School	Anticipated Disbursement Listing

Pell Grants

CampusNexus Student exports files to and imports grant files from the Common Origination and Disbursement (COD) system.

- Export file names end in "IN".
- Import file names end in "OP".

Pell Grant Files

File Name	From	To	Description
PGASyyOP	COD	School	Statement of Account Records
PGDAyyOP	COD	School	Disbursement Acknowledgment
PGDRyyIN	School	COD	Disbursement Records
PGIAyyOP	COD	School	Institution Data Acknowledgment
PGIDyyIN	School	COD	Institution Data Record (Discontinued as of award year 2002-03)
PGMRyyOP	COD	School	Multiple Reporting Records
PGOAyyOP	COD	School	Origination Acknowledgment
PGORyyIN	School	COD	Origination Records
PGPRyyOP	COD	School	Pell POP Report
PGRAyyOP	COD	School	Data Request Acknowledgment

File Name	From	To	Description
TGSDyyOP	COD	School	Test File; Same as PGSDyyOP
TGYRyyOP	COD	School	Test File; Same as PGYRyyOP

SSCR/Clearinghouse

CampusNexus Student imports Student Status Confirmation Report (SSCR) data from and exports student data to the Clearinghouse or directly to the National Student Loan Data System (NSLDS). In the table below, **yy** is used instead of a 2-digit year code. This is so the process can apply to multiple award years instead of individual award years.

SSCR/Clearinghouse Files

File Name	From	To	Description
SSCEyyOP	CPS	School	SSCR Error File
SSCMyyOP	NSLDS	School	Error/Notification File
SSCRyyIN	School	NSLDS	File generated as a result of ad hoc reporting
SSCRyyIN	School	NSLDS	Completed SSCR rosters
SSCRyyOP	NSLDS	School	Initial SSCR Roster File

Third Party Servicers

CampusNexus Student exports files to and imports files from the Global Financial Services.

The file naming convention is **nnYYMMDDxx.###**, where:

- **nn** is the file type (for example MA, DA, BR, etc.),
- **xx** is the file sequence number (01, 02, ..., thereby allowing multiple files of the same type to be sent on a given day), and
- **###** is the school code extension that matches the configuration on the campus level within CampusNexus Student.

Third Party Servicer Files

File Name	From	To	Description
AP	GLOBAL	School	GLOBAL R2T4 Refund File
AR	GLOBAL	School	GLOBAL Tuition Adjustment File
BR	GLOBAL	School	GLOBAL Budget File
CA	GLOBAL	School	GLOBAL Change File
CLFAFAID	GLOBAL	School	GLOBAL Identifier File. Used to match Global records with CampusNexus Student records
DA	GLOBAL	School	GLOBAL Scheduled FA Disbursements – Each MA file is accompanied by a DA file. You will not receive a DA file without a corresponding MA file.
EAPS	GLOBAL	School	GLOBAL forwards ISIRs to the school

File Name	From	To	Description
MA	GLOBAL	School	GLOBAL Scheduled FA Awards
PA	GLOBAL	School	GLOBAL Actual FA Disbursements
RE	GLOBAL	School	GLOBAL Refund File
SD	GLOBAL	School	GLOBAL Document File
SFnnnn	School	GLOBAL	Add-Drop Extract (nnnn is the school code)
SFnnnn	School	GLOBAL	Pre-Pull Extract (nnnn is the school code)
SFnnnn	School	GLOBAL	Weekly Extract (nnnn is the school code)

Import Attendance/Grades

All file types are supported.

COD Export and Import

COD Export and Import Files

File Name	From	To	Description
ATSDISPOP	COD	School	ATS Discharge length record layout.
COMRECIN	School	COD	Non-program specific and non-award years specific data.
COMRECOP	COD	School	Receipts from COD system to school for the incoming message classes COMRECIN, CRPGMYIN, CRDLMYIN, or CREDMYIN.
CRAAyyIN	School	COD	Common record documents containing data from any or multiple programs sent from school to COD system.
CRAAyyOP	COD	School	Responses sent from COD system to school for data received in the CRAA06IN message class.
CRAC1OOP	COD	School	TEACH Grant Counseling Acknowledgment.
CRATyyOP	COD	School	TEACH ATS Note Acknowledgment, Award Year Specific.
CRBNyyOP	COD	School	Booking notification.
CRCOyyOP	COD	School	Credit decision override.
CRDLMYIN	School	COD	Common record documents containing Direct Loan data from any or multiple award years send from school to COD system.
CRDLyyOP	COD	School	Responses sent from COD system to school for Direct Loan data received in the CRPAMYN message class.
CRNDyyOP	COD	School	Negative disbursement.

File Name	From	To	Description
CRPGMYIN	School	COD	Common record documents containing Pell Grant data from any or multiple award years sent from school to COD system.
CRPGyyOP	COD	School	Responses sent from COD system to school for Pell Grant data received in the CRPAMYIN message class.
CRPNyyOP	COD	School	Acknowledgment.
CRPSyyOP	COD	School	Payment to services.
CRRCyyOP	COD	School	Receipts sent from COD system to school for the incoming messages classes CRARyyIN, CRPGyyIN, and CRDLyyIN.
CRSGMYIN	School	COD	Common Record Documents containing National SMART data for any or multiple award years.
CRSGMYOP	COD	School	Responses sent from COD System to school for National SMART data received in the CRAGMYIN message class.
CRSGyyIN	School	COD	Common Record Documents containing National SMART data for the award year sent from school to COD System.
CRSGyyOP	COD	School	Responses sent from COD System to school for National SMART data for the award year received in the CRSG07IN message class.
CRTH09IN	School	COD	Common Record, TEACH, Award Year Specific.
CRTH09OP	COD	School	Common Record, TEACH, Award Year Specific.
CRTHMYIN	School	COD	Common Record, TEACH, Multi-Award Year.
CRTHMYOP	COD	School	Common Record, TEACH, Multi-Award Year
CRWByyOP	COD	School	Responses for activities performed on the COD website.
SGASyyOP	COD	School	SMART - Electronic Statement of Account.
SGMRyyOP	COD	School	SMART - Multiple Reporting Records.
SGPDyyOP	COD	School	SMART - Pending Disbursement List.
SGRAyyOP	COD	School	SMART - Data Request Acknowledgment.
SGRCyyOP	COD	School	SMART - Reconciliation File Acknowledgment.
SGYRyyOP	COD	School	SMART - Year to Date Records.
THIGPFOP	COD	School	TEACH Inactive Grants Report.
THMRyyOP	COD	School	TEACH Grant Multiple Reporting Record (MRR)
THPDyyOP	COD	School	TEACH Pending Disbursement List.
THRB1OOP	COD	School	TEACH REBUILD.

File Name	From	To	Description
THSMyyOP	COD	School	TEACH School Account Statement (Monthly).
THSNPFOP	COD	School	TEACH SSN/Name/Date of Birth Change Report.
THSYyyOP	COD	School	TEACH School Account Statement (YTD).

For information about the format of TQ.IMP files for COD Export jobs, see Record File Layout for TQ.IMP File.

Record File Layout for TQ.IMP File

The format of TQ.IMP files for COD Export jobs follows the record file layout specified by EDconnect.

For additional information regarding the record file layout, refer to the EDconnect 8.X Installation & User Guide.

Header Record

Field Number	Description	Type	Required	Length	Position
1	Serial Number	Numeric	No	4	1-4
2	Return Code	Numeric	No	4	5-8
3	Group ID	AlphaNum	No	50	9-58
4	Unattended User ID	AlphaNum	No	50	59-108
5	Encrypted User Password	AlphaNum	Yes	8	109-116
6	Response File Name	AlphaNum	Yes	260	117-377

Data Record

Field Number	Description	Type	Required	Length	Position
1	Serial Number	Numeric	No	4	1-4
2	Return Code	Numeric	No	4	5-8
3	Action	Alpha	No	1	9
4	Message Class	AlphaNum	Yes (Except for Action = T)	8	10-17
5	Fully qualified Path and File Name	AlphaNum	No	260	18-277
6	Batch Number	AlphaNum	No	50	278-327
7*	Mailbox	AlphaNum	No	7	328-334

* Ignored unless Servicer Mode is enabled. Contact the SAIG Help Desk to enable Servicer Mode if it is applicable to your institution.

Export Application Data

Note: Please access Regulatory Help for the latest content about FAFSA, ISIR, and COD processing.

Use the Export Data > Application Data menu option to prepare files to be exported to the Department of Education's (ED) Central Processing System (CPS). The files prepared here are related to Free Applications for Federal Student Aid (FAFSAs) and to Institutional Student Information Records (ISIRs). CampusNexus Student creates files in a directory that is available to EDconnect. EDconnect is a program provided by ED for transmitting and receiving files from the CPS.

Here, you can export FAFSAs, ISIR Corrections, Requests for Duplicate ISIRs, or Signature Update Files. You can import responses to these exported files (ISIRs, ISIR Corrections, and Duplicate ISIRs) from other options within CampusNexus Student. Refer to Export and Import Files for a list of the exported and imported file names.

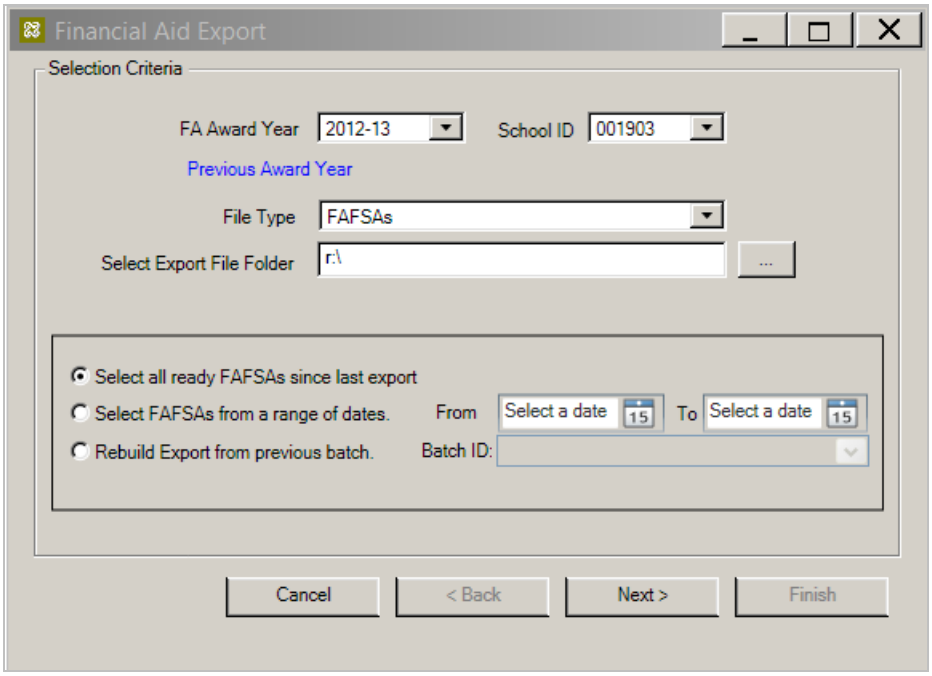
Note: The CPS requires a student's Data Release Number (DRN) on all exported records for ISIR Corrections or Requests for Duplicate ISIRs. Be sure this important data item is correct for each student being processed before you send corrections or requests to the CPS. The DRN can be found on the student's printed Student Aid Report (SAR) if his or her FAFSA has already been processed. The DRN is always included by the CPS on ISIRs you receive in response to FAFSAs you export.

This topic provides the following procedures:

- To export financial aid files for FAFSAs, ISIR Corrections, or Requests for Duplicate ISIRs:
- To export FAFSAs:
- To export ISIR corrections:

To export financial aid files for FAFSAs, ISIR Corrections, or Requests for Duplicate ISIRs:

1. Navigate to **Daily** > **Financial Aid** > **Export Data** > **Application Data**. The Financial Aid Export Wizard for 2012-13 (or 2013-14, depending on your default session settings) is displayed.



2. Click **Previous Award Year** to perform an export on years 2011-12 or before. Select the **Award Year**, **School ID**, and **File Type**. The file types are **FAFSAs** and **ISIR Corrections**. The bottom of the form changes depending on the file type you select.
3. CampusNexus Student displays the previously set up defaults for **Export File Drive** and **Export File Folder**. If

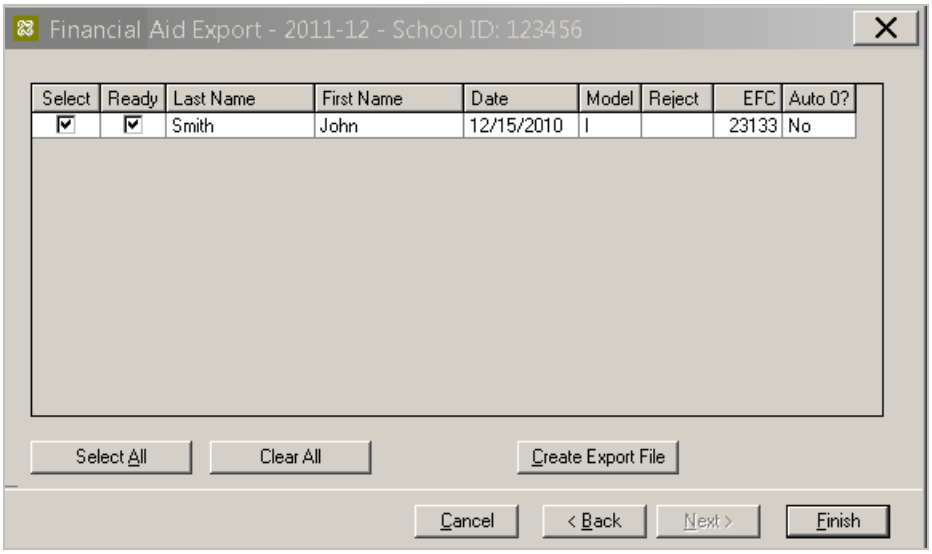
necessary, change them, but it is not recommended. If the directory as defined in the campus setup does not exist, an error message states that the directory does not exist on the specified drive.

4. Continue with the procedure according to the file type you selected in step 2. See the descriptions below for the three file types.

To export FAFSAs:

1. Complete Steps 1 through 4 above.
2. Select all FAFSAs that are ready - OR - FAFSAs from a range of dates.
3. Click **Next**.
4. The wizard shows a list of all the FAFSAs selected for export. The listed records should all display a status of **Ready**.

   Note: FAFSA with **Reject** code of 15 will be accepted for export to CPS.



5. Select any record on the list and disable the **Ready** check box to prevent it from being exported with the others.
6. Click **Select All** to select all the records for export.

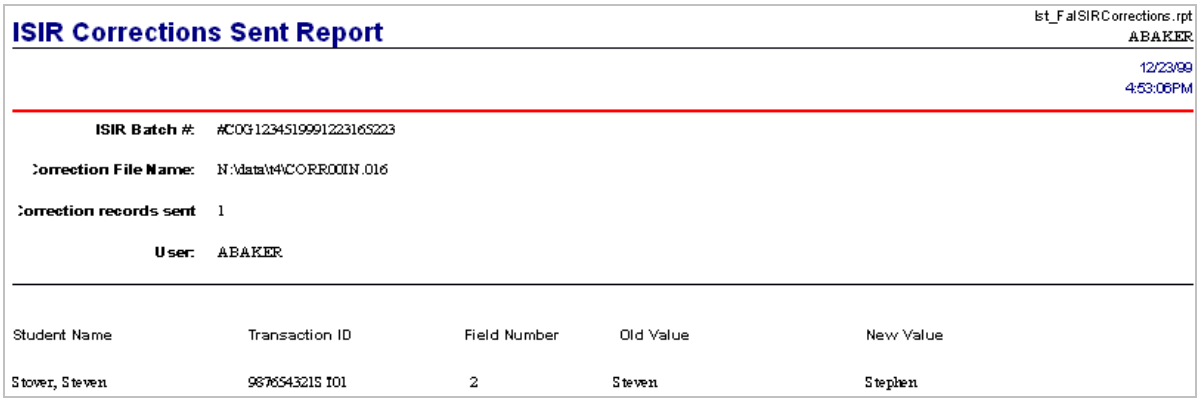
   To exclude a few records out of a long list, click **Select All**, then hold down the **Ctrl** key and click on the ones you do not want to export. They will be deselected.

7. Click **Create Export File**to process the selected records for export. When the export file has been created, CampusNexus Student displays a confirmation message that tells you the location and name of the export file. For example: N:\Data\t4\EAPS00IN.002. CampusNexus Student increments the file name extension each time you run the procedure. In our example, the next time you run the program, the file name will be EAPS00IN.003.
8. Click **OK** to close the message box and the wizard. The program displays a FAFSA Export Report listing the FAFSAs that were exported. Along with the list of FAFSAs, the report displays the details of the export batch: Batch ID, Export File Name, User Name, Date Exported, and Number of FAFSAs included. This report can be reproduced later from the **Reports** > **Financial Aid** menu.
9. If you click **Finish** before clicking **Create Export File**, the wizard closes without exporting any data.

To export ISIR corrections:

1. Complete Steps 1 through 4 above.
2. Select one of the two choices for picking the ISIR Corrections to be exported: **Create New Batch** or **Regenerate Batch**.
3. Click **Next**.
4. A message displays the number of records that will be extracted for export. Click **Yes** to continue or No to abort the extract procedure.
5. A message displays the directory path and name of the file containing the ISIR corrections, for example, N:\data\t4\CORR00IN.016. Click **OK** to acknowledge the message. CampusNexus Student increments the file name extension each time you run the procedure. In our example, the next time you run the program, the file name will be CORR00IN.017.

   Note that files for ISIR corrections and requests for duplicate ISIRs have the same name structure so their extensions are incremented in the same series.
6. The ISIR Corrections Sent Report is displayed.



ISIR Corrections Sent Report

lst_FalSIRCorrections.rpt
ABAKER
12/23/99
4:53:06PM

ISIR Batch #: #COG1234519991223165223
Correction File Name: N:\data\t4\CORR00IN.016
Correction records sent 1
User: ABAKER

Student Name	Transaction ID	Field Number	Old Value	New Value
Stover, Steven	9876543215 I01	2	Steven	Stephen

7. Print the report for future reference.
8. Note that in this case, the **Finish** button is not used. If you click Finish before clicking Create Export File, the wizard will close without exporting any data.
9. Click **Regenerate Batch** to regenerate a batch of ISIR corrections that was previously created. This may be necessary in the unlikely situation where something has happened to the previously created file which makes it unusable.
10. Click **Next**. A list of available batches is displayed.
11. Select the batch to be regenerated by clicking it on the list.
12. Click **Finish**. A message indicates how many records will be extracted.
13. Click **Yes** to continue. The ISIR Corrections Sent Report is displayed.
14. Print the report for future reference. When you close the report, the procedure is completed.

Clearinghouse Export (Pre-2014)

Note: Starting July 1, 2014, a new Clearinghouse Export file format was adapted, and the file format produced by using the Clearinghouse menu selection in CampusNexus Student is no longer valid. Please use the Clearinghouse (2014-2015 and later) menu option, and review Regulatory Help for content associated with this new feature.

Export Direct Loan

CampusNexus Student can prepare files containing Direct Loan information for export to COD. The files that are prepared by CampusNexus Student are placed in a directory of your choosing. Once placed in the designated directory, the files are ready for you to send to COD using the EDconnect software provided by the U.S. Department of Education (ED).

Direct Loans are processed through the COD Export wizard.

The types of files that are exported by CampusNexus Student include:

- Loan Origination (Subsidized and Unsubsidized)
- Loan Origination PLUS
- Loan Origination Changes
- Print Master Promissory Note Manifest
- Print PLUS Promissory Note Manifest
- Disbursements
- Loan Detail

The processing procedures for each of the file types is basically the same. You will select the appropriate options for each file type. The system will gather the necessary data, create the files using the record formats required by the COD, tell you when the files are completed, and where the files are located.

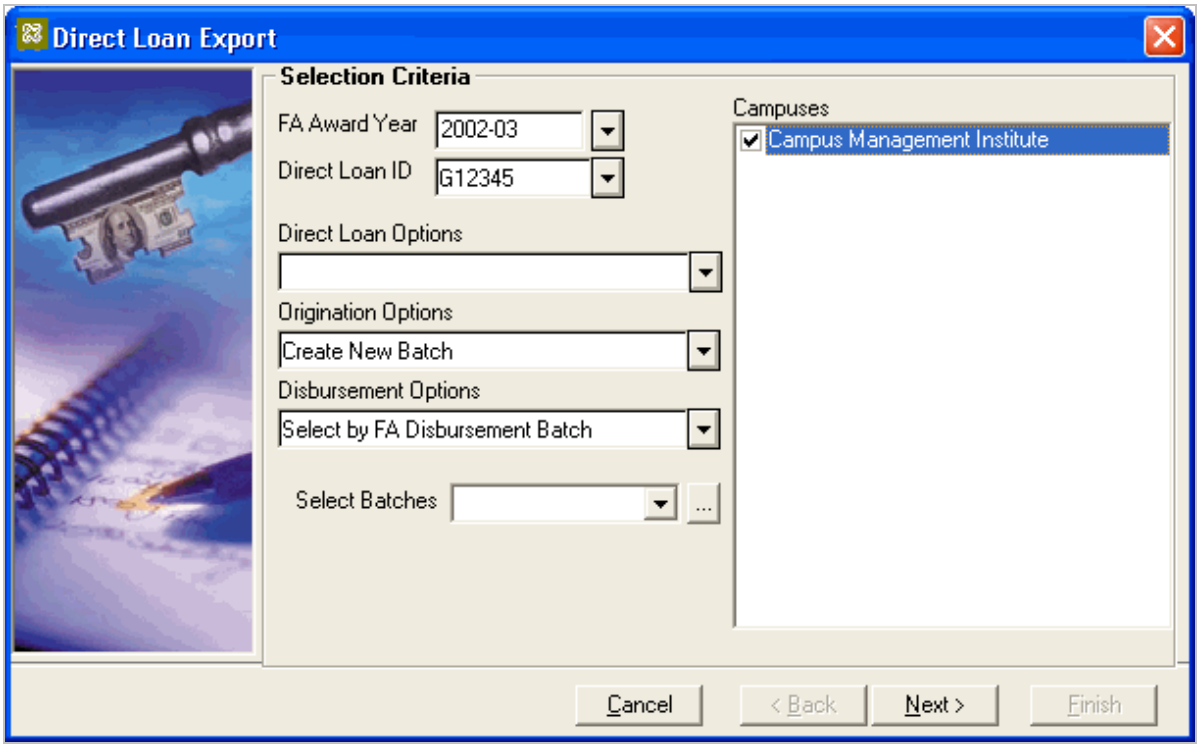
Loan Origination (Subsidized and Unsubsidized)

CampusNexus Student can be used to create the loan origination extract files for subsidized, unsubsidized, and PLUS loans for the 2000-01 award year.

CampusNexus Student can be used to extract the 2001-02 direct loan origination files for transmission to the COD. The forms for creating the 2001-02 origination extract file remain unchanged, as does the layout of the reports generated at the end of the extract. The only changes to the reports are the award-year-specific information.

To export subsidized and unsubsidized loan origination records:

1. Navigate to **Daily > Financial Aid > Export Data > COD**. The Direct Loan Export form is displayed.



2. Select the appropriate **FA Award Year**.
3. Select or verify the **Direct Loan ID**. If yours is a multicampus school, this ID may or may not be the same for all campuses.
4. Select the **Campuses** from which origination records are to be exported. From the campus list, you can specify the campuses for which to extract loans. Based on campus entries selected in the COD Export Wizard Rpt Entity ID field, CampusNexus Student gathers the Direct Loan ID. Only campuses that have the selected direct loan ID will be presented in the list. By default, All campuses will be selected. For example, the direct loan ID G01002 may be the direct loan ID for five campuses. You will then be able to specify which of the five campuses loans will be extracted for.
5. From the list of Direct Loan Options, select **Loan Origination - Sub/Unsub**.
6. From the **Origination Options**, select **Create New Batch** or **Regenerate Batch**.

   Create New Batch

   Direct Loans Added From - Date Added must be within the specified date range.

   Prom Note Status - Print Status must equal the status code specified.

   Expected Grad Date Range - Graduation Date must be within the specified date range.

   Dependency Status - The Student Pell Model must equal the dependency status specified. The model is stored as 1 - Dependent or 2 - Independent.

   College Grade Level - The student's academic year grade level must equal the grade level specified.

   Regenerate Batch If you select this option, you will be presented with a drop-down list showing all batches you can regenerate. When you click Create Export File, each selected loan will be validated according to the Direct Loan Technical Reference manual. Validation will be performed on all fields in the origination record. There are certain fields in the origination record, which, if not valid, will cause the origination record to be rejected at COD.

   Additional information concerning the loans has been added to the window showing direct loans selected for extract. The layout of the grid that is displayed after gathering the loans to extract has been modified. Campus, Last Name, First Name, Status, Loan ID, Type, and Loan Amount are displayed for each loan gathered.
7. Click **Next**. The wizard will display the next page of the procedure. The format of the next page will vary depending on the origination option you choose.
8. Select the next option, **Gather all direct loans with Ready to Send status** or **Gather direct loans that match specific criteria**. For our illustration, we will select the first option.

   Gather Loans Meeting Specified Criteria

   If this option is selected, you are presented with a screen to specify the criteria for which to gather loans. The previous criteria have been modified. The Select Prom Note Print Options has been deleted and replaced with "Prom Note Status". The Prom Note Print Options check box caption has been changed to "Prom Note Status". The drop-down list for Prom Note Status will have the following options:
   - R - Ready to Print
   - P - Printed/Request to Print sent to COD
   - S - Signed and Returned
   - A - Accepted by COD
   - E - Rejected by COD
   - X - Pending at COD
9. Click **Next**. The wizard will select and list direct loan records created since the last export.

10. Click **Add Loan** to add another loan to the list selected by CampusNexus Student. When you click this button, the program will ask for the direct loan ID number for the record you want to add.
11. Select a loan row on the grid and click **Extract?** to toggle the Extract? check box.
12. Once the list is prepared to your satisfaction, click **Create Export File** to create the file. CampusNexus Student will gather the data for the selected records and write the necessary records in the extract file.
13. When CampusNexus Student completes the export file DESF##IN.XXX (where ## is the award year and XXX is a sequential number), it will display a message telling you the directory in which the file was placed and the file name. Write this information down for use with your EDconnect procedure.
14. After the extract file has been prepared, CampusNexus Student produces the related report(s). An error report is generated after the validation is performed on the selected loans. All loans that fail the validation will be listed on the report with the reasons they failed. A report showing the loans included in the extract file will be generated.

    CampusNexus Student updates the appropriate tables after the extract file has been created
15. Click **OK** to close the message and the export wizard.

Loan Origination PLUS

Select this Direct Loan Option to export data concerning PLUS (parent) loans. The resulting file is DEPF##IN.XXX (where ## is the award year and XXX is a sequential number). The export wizard procedures are very similar to the sub/unsub export described earlier in this topic.

Loan Origination Changes

Select this Direct Loan Option to export data concerning loan origination changes. The resulting file is DESC##IN.XXX (where ## is the award year and XXX is a sequential number).

The data for each loan origination change is validated according to the valid field content documented in the Direct Loan Technical Reference manual for the appropriate award year.

Print Master Promissory Note Manifest

Select this Direct Loan Option to print a Master Promissory Note Manifest. This will list prom notes that have been printed and signed by the borrowers. This document certifies that each borrower named on the enclosed notes/disclosures is accepted for enrollment on at least a half-time basis and is making satisfactory progress in a program that is eligible for the loan types awarded. Other certifications are also included on the manifest. The manifest must be signed by the school's Financial Aid Administrator.

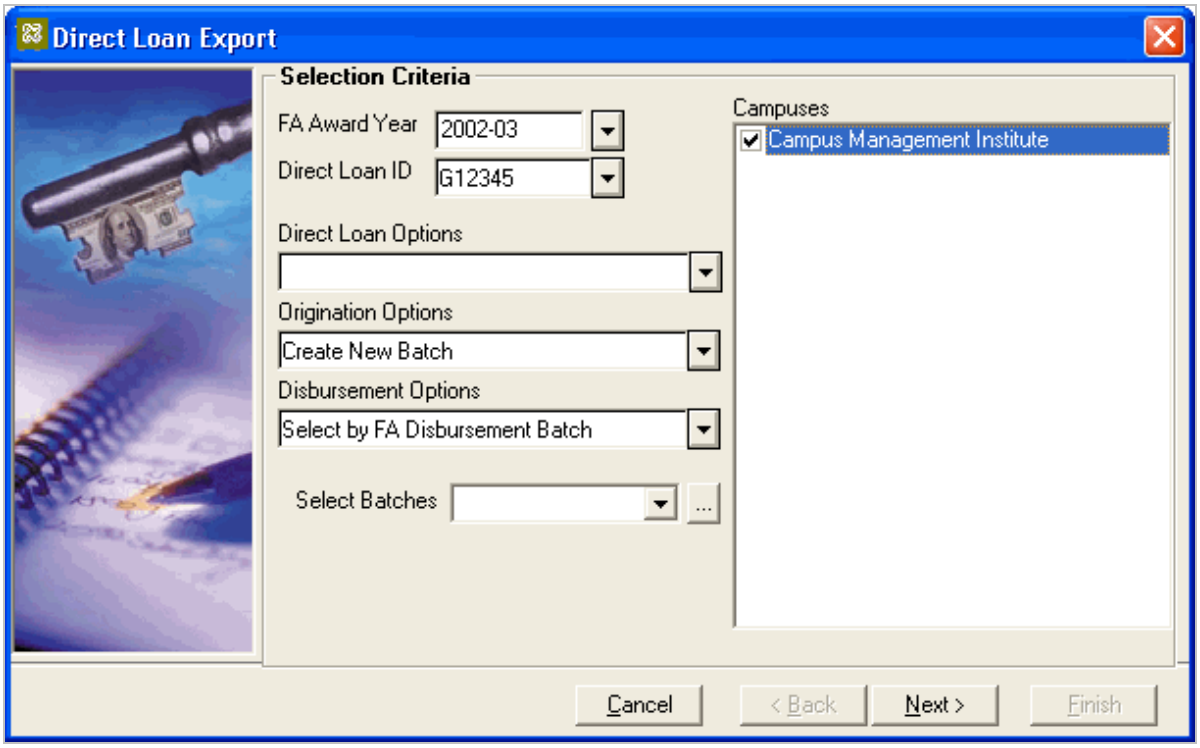
Print PLUS Promissory Note Manifest

Select this Direct Loan Option to print a PLUS Promissory Note Manifest. This will list prom notes that have been printed and signed by the borrowers. This document makes certain certifications and must be signed by the school's Financial Aid Administrator.

Disbursements

To export disbursements:

1. Navigate to **Daily > Financial Aid > Export Data > Export Direct Loan**. The Direct Loan Export form is displayed.



2. Select the appropriate **FA Award Year**.
3. Select or verify the **Direct Loan ID**. If yours is a multi campus school, this ID may or may not be the same for all campuses.
4. Select the **Campuses** from which origination records are to be exported. From the campus list, you can specify the campuses for which to extract loans. Only campuses that have the selected direct loan ID will be presented in the pick list. By default, All campuses will be selected. For example, the direct loan ID G01002 may be the direct loan ID for five campuses. You will then be able to specify for which of the five campuses loans will be extracted.
5. From the list of **Direct Loan Options**, select **Disbursement**.
6. From the **Origination Options**, select **Create New Batch**.
7. From the **Disbursement Options**, select **Select by FA Disbursement Batch**.
8. From the **Select Batches**, select the batches that you want to export.
9. Click **Next**.
10. Select a loan row on the grid and click **Extract?** to toggle the Extract? field.
11. Click **Create Export File**.
12. Click **Finish**.

Once the school has acknowledgement that a completed and signed promissory note is on file, and the borrower meets eligibility requirements, the school can make a loan disbursement to the student or parent (by check or by crediting the student's account). Schools submit a file, DESD##IN.XXX (where ## is the year code and XXX is a sequential number), containing disbursement activity by Loan ID. Each actual disbursement transaction is considered by the COD to be a unique transaction and is treated as such for reconciliation purposes. For example, once a disbursement has been submitted to the COD, any modification to the disbursement amount would require another disbursement record.

The COD edits the disbursement information against the loan origination record data stored on its system. The COD returns an acknowledgement file, DIOD##OP.XXX (where ## is the year code and XXX is a sequential number), to the school indicating whether each disbursement record has been accepted. The school may receive a record from the COD indicating the disbursement record has been rejected. The school needs to resolve the reject, and retransmit it to the COD.

In CampusNexus Student, disbursements must be approved by the Financial Aid department before they are exported to the COD. See Daily > Financial Aid > Approve Disbursements to Pay. The disbursements are actually credited to the students' accounts in the Student Accounts module. See Daily > Student Accounts > Post FA Disbursements.

Loan Detail

The Direct Loan Detail file is sent to COD for reconciling the school's DL records with the COD's. COD compares the data in this file to its database and produces a Loan Detail Exception Report that is sent back to the school. The file that is sent to COD is named DERC##IN.XXX (where ## is the year code and XXX is a sequential number).

Export Pell

Portions of the text in this topic are excerpts from "The Blue Book, Accounting, Recordkeeping, and Reporting by Postsecondary Educational Institutions for Federally Funded Student Financial Aid Programs", U.S. Department of Education, June 1999.

A school's financial aid office is responsible for determining student eligibility for Federal Pell Grants, awarding Federal Pell Grant funds, and authorizing the school's business office to disburse the funds to students or credit student's accounts. Once Federal Pell Grant funds have been disbursed or credited to a student's account, a school is responsible for reporting the student payment information to ED. This may be a function of a school's financial aid office or business office or both offices.

The school reports student payment information to ED through COD. COD enables ED to track a school's need form Federal Pell Grant funds and adjust the school's funding authorization. The system also provides documentation that allows the school to reconcile records of expenditures reported to ED with the school's records of payments made to students.

Once a Pell grant is approved and batched to send to COD, you cannot make changes that would affect the batched data.

Use the **CampusNexus Student Export Pell Wizard** to export all data and requests for data related to the processing of Pell grants for your students. This wizard handles the following types of Pell-related files:

- Origination Records
- Disbursement Records
- Institutional Data Records
- Data Request - Multiple Reporting
- Data Request - Statement of Account
- Data Request - Year to Date

A report of the exported data will be available after the export data is prepared by CampusNexus Student. The format of the report will vary depending on the type of file exported.

Pell grants are now processed through the COD Export wizard.

Origination Records

Origination records:

- include demographic data about the school and, if applicable, its branches,
- report to COD on expected award information about each student who may receive a Federal Pell Grant,
- contain the same information as the payment record,
- must be created before a disbursement can be made,
- may be sent with the initial disbursement record, and
- verify a student's eligibility for a specific annual award amount.

Origination records are not used to obligate funds or post transactions to the school's account. After exporting originations, the status will be set to B - Batched to Send. When a Pell Grant Origination status is "Batched", you will not be allowed to modify any of the information regarding the origination.

Error trapping has been added to check for and deal with fields that have null values.

The system asks if you would like to "include students who have had a change to their enrollment status since the last extract". The default is no. If you answer yes, the system will select only Pell records for the specified Pell ID.

Pell Enrollment Status of "Other"

The logic has been modified behind the question to "include all students where their enrollment status has changed since last being reported" to exclude students where the origination is accepted at a Pell enrollment status of "Other."

The logic used to include students where enrollment status has changed since "last reported" should only effect schools that have true semesters and operate in a college atmosphere where the students select courses at their own pace. This is not always relevant for the vocational schools where students are on a defined course track where credits may vary on a regular basis.

The previous logic selected students based on enrollment status changes that occur in Academic Records. It is not necessary to report these changes for students that have a Pell Enrollment Status set to "Other". The modification to skip students in an "Other" enrollment status will help to prevent sending student records unnecessarily.

The routine has been modified to check Pell Enrollment Status for "O - Other". If the status is "O", the student is not included in the list.

Batch Export Reports

Daily / Financial Aid / Export Data / Pell/COD / Origination Records

The Batch Detail report includes a count of disbursement records in the batch and a sum of the disbursement amounts.

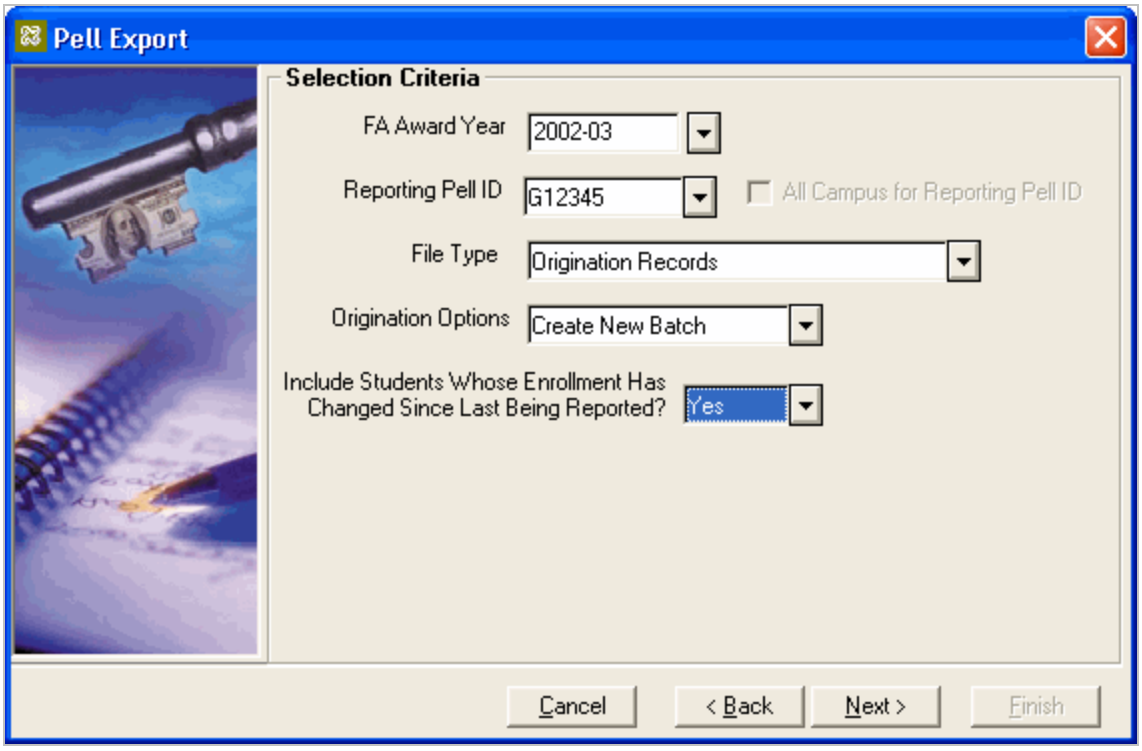
Daily / Financial Aid / Export Data / Pell/COD / Disbursements
Pell/COD Batch Detail Report and Pell/COD/Batch Reject Report

These reports are generated when the Pell/COD export procedure is run. If CampusNexus Student finds rejects, it prints the reject report. Then after finishing, the program prints a report to indicate students included in the batch. The student's campus has been added to the student detail record.

Export Origination Records

To export origination records:

1. Navigate to **Daily** > **Financial Aid** > **Export Data > COD**. The Pell Export wizard is displayed.



2. Select the **FA Award Year** and **Reporting Pell ID**.
3. Select/clear **All Campus for Reporting Pell ID**. This check box is available only when the File Type is Data Request - Reconciliation Record and Data Request - Year to Date. If selected, the main campus and all branches are included. If cleared, only the main campus is included.
4. Select the **File Type** "Origination Records".

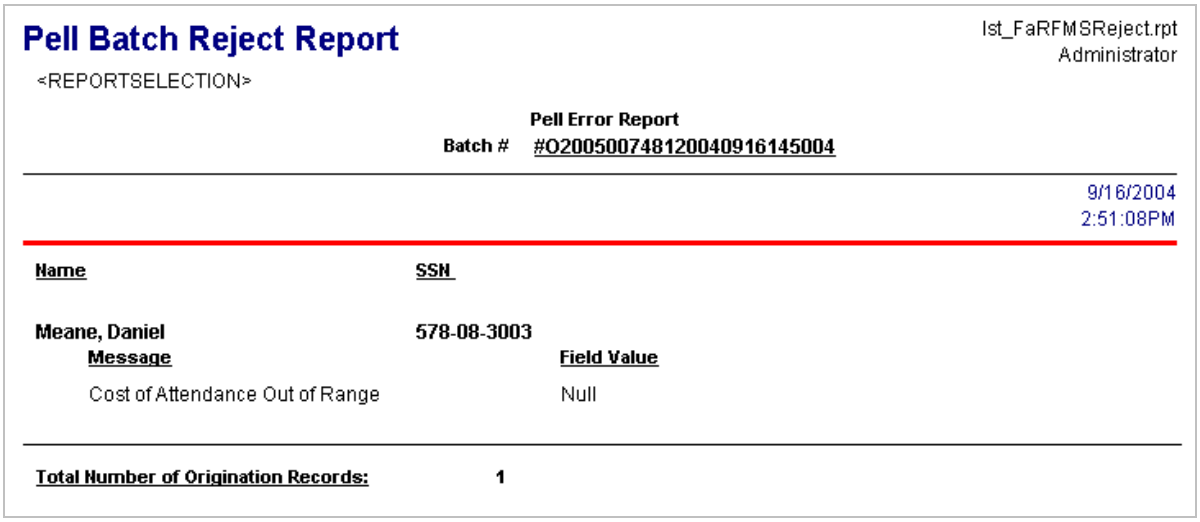
5. Select an **Origination Option**. Either Create New Batch or Regenerate Batch.
6. Answer the question "**Include Students Whose Enrollment Has Changed Since Last Being Reported?**" Yes or No.
7. Click **Next**. Page 2 of the wizard is displayed. It contains a list of the student origination records to be exported.

   On this form, you can add a student to the list, select all student records on the list, clear all records, and create the export file. Use the check boxes to clear students individually.
8. When the list is correct, in other words, contains only the student records for which originations are to be exported, click **Create Export File**.

   CampusNexus Student prepares the export records and store them in the designated System EDE path. If the Campus EDE path is not specified, C:\TEMP is used. A message is displayed to tell you the directory path and the name of the file. The file name will be PGOR##IN.XXX (where ## represents the last two digits of the award year and XXX is a sequential number). Write this information down for future reference.

   CampusNexus Student archives files periodically, based on school-defined rules, thus sparing you of the task of manually archiving after every thousand files. A folder based on date will be created under the system and campus path indicated at the frequency defined, and the files, beginning with the current date, will be moved to that folder.

   If the latest archive directory is older than the frequency setting (Archiving Frequency) in System Settings (e.g. if the setting is "Weekly" and the most recent archive directory is more than a week old, when compared with the current system date), a new archive directory will be created under the System EDE path, using today's date for the archive directory name. If no archive directories exist, the system creates a new one using today's date. All files in the System EDE directory will then be moved into the newly created archive directory.
9. Click **OK** to acknowledge the message. The grid field on the wizard form will be cleared and a **Print** button will be added to the form.
10. Click **Print**. CampusNexus Student prepares a **Pell Batch Reject Report** and a **Pell Batch Report**. Print the reports for future reference. When you close the reports, the export procedure for origination records is complete in CampusNexus Student. The student's campus has been added to the student detail record.
11. Refer to your EDconnect procedures for instructions on transmitting the export file to Pell.



Pell Batch Reject Report

lst_FaRFMSReject.rpt
Administrator

<REPORTSELECTION>

Pell Error Report

Batch # **#O2005007481200409161450O4**

9/16/2004
2:51:08PM

Name	SSN
Meane, Daniel	578-08-3003

Message	Field Value
Cost of Attendance Out of Range	Null

Total Number of Origination Records: 1

Other origination options in the Export Pell wizard are processed in a manner similar to the example above for Origination Records. Just choose the appropriate options for the type of record you want to export. Remember to write down the directory and name of the export files for use with your EDconnect software.

Here, we will describe purpose of the other Pell export options.

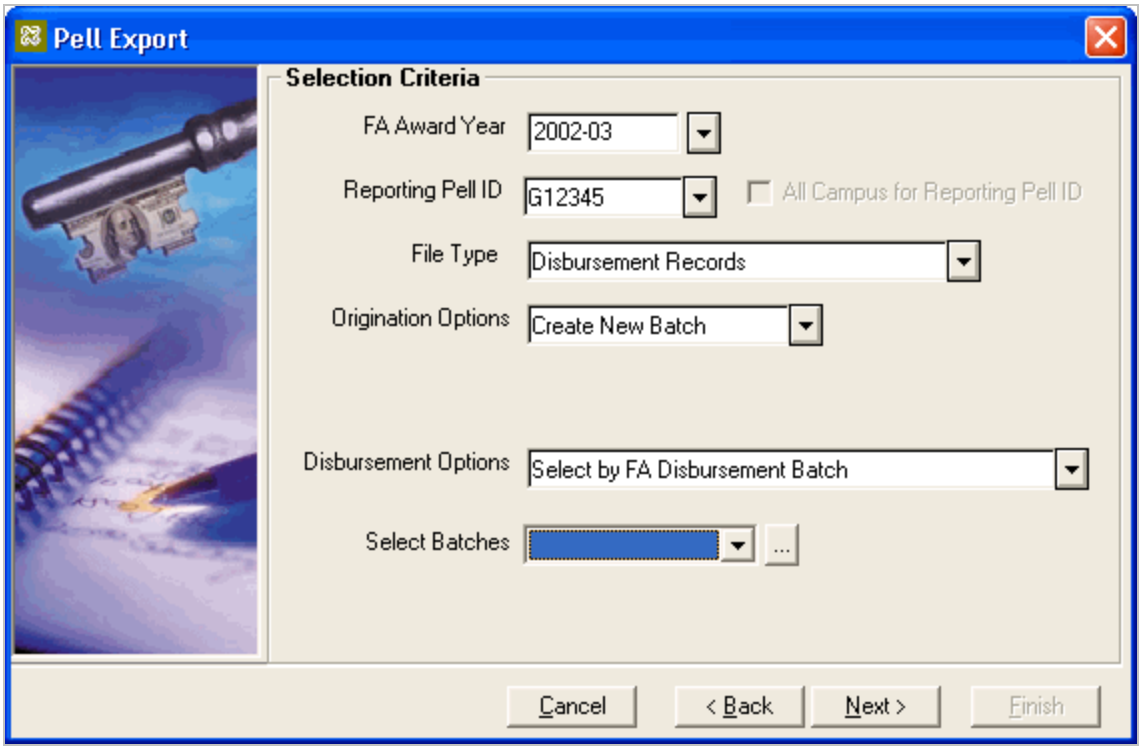
Disbursement Records

Disbursement records:

- report a disbursement, including the actual amount and date, or expected disbursement for each student,
- can be sent to COD up to 30 days before or any time after the actual disbursement (through the end of the award year),
- are submitted with or after the origination record, and
- drive the school's funding level in Grant Administration and Payment System (GAPS).

To export disbursements:

1. Navigate to **Daily** > **Financial Aid** > **Export Data** > **Pell**. The Pell Export wizard is displayed.



2. Select the appropriate **FA Award Year**.
3. Select or verify the **Reporting Pell ID**. If yours is a multi-campus school, this ID may or may not be the same for all campuses.
4. From the list of **File Type,** select **Disbursement Records**.
5. From the **Origination Options**, select **Create New Batch**.
6. From the **Disbursement Options**, select *Select by FA Disbursement Batch*.
7. From the **Select Batches**, select the batches that you want to export.
8. Click **Next**.

9. Select the students files to export.
10. Click **Create Export File**.
11. Click **Finish**.

In CampusNexus Student, the Financial Aid Administrator must approve disbursements to be paid. See Daily > Financial Aid > Approve Disbursements to Pay. The Student Accounts department actually posts the disbursements to the student's ledger card. See Daily > Student Accounts > Post FA Disbursements.

The export file name will be PGDR##IN.XXX (where ## in the award year and XXX is a sequential number).

Note: If the 'Round all Disbursements to whole dollars' check box on the Fund Source Configuration form is cleared and the registry key to allow Pell Cents is enabled, then the exact amount of cents is displayed and saved for the Pell origination amount. The Pell origination amount is processed and saved with the properly calculated amount of cents in regards to Year-Round Pell Additional Eligibility Indicator.

Institutional Data Records

The Institutional Data Record contains demographic information about your school and your Financial Aid Administrator. It can be sent to Pell any time the data changes. The file name will be PGID##IN.XXX (where ## in the award year and XXX is a sequential number).

Information contained in the Institutional Data record includes:

- Pell ID
- DUNS Number
- Institution street mailing address, city, state, and ZIP code
- FAA e-mail address
- Financial Aid Administrator's (FAA) name
- FAA telephone number
- FAA fax number
- Institution type
- Financial control
- Academic calendar
- Weeks of instruction time in program's definition of an academic year
- Credits or clock hours in program's definition of an academic year

Data Request - Multiple Reporting

Once a disbursement record is sent, a Multiple Reporting Record (MRR) is sent automatically (by COD to the school) if a Potential Overpayment Project (POP) or concurrent enrollment occurs.

- POP occurs when two or more schools send a disbursement record for a student and the percentage of the student's Federal Pell Grant eligibility used is greater than 100 percent.
- Concurrent enrollment occurs when two or more schools send in origination records for the same student with enrollment dates within 30 days of each other.

Schools can also request an MRR from COD to obtain information about any other schools that may have submitted origination or disbursement records for their students. Schools can request an MRR six ways:

1. OA - COD provides the school with information about all origination records it has received where the original Social Security Number (SSN) and name code match the origination records the school submitted. *OA* can also be used to find out if other schools have submitted origination records for the school's students.
2. OS - COD returns information about other schools that submitted origination records for selected students. Schools can use this option for transfer students.
3. OI - COD returns information about all students originated at selected schools. Schools might use this option to

specify all records from a school in its area that many of its students transfer to.

4. DA - RFMS provides the school with information about all the disbursement records it has received where the original SSN and name code match the disbursement records the school submitted.
5. DS - COD returns information about other schools that have submitted disbursement records for selected students.
6. DI - COD returns information about all students who had disbursement records submitted at selected schools.

The file name will be PGRQ##IN.XXX (where ## in the award year and XXX is a sequential number).

Data Request - Statement of Account

A school's authorization is the maximum amount of Federal Pell Grant funds it may draw down from the Grant Administration and Payment System (GAPS) to disburse to students. ED reports authorizations to schools in an electronic format called the Electronic Statement of Account (ESOA).

Schools receive an ESOA immediately after GAPS processes the authorization. The ESOA includes a summary with information such as current authorization amounts and year-to-date disbursement amounts. It also includes a status of the account when the last ESOA was sent to the school as well as a detail record that lists each transaction processed between RFMS and GAPS.

The file name will be PGRQ##IN.XXX (where ## in the award year and XXX is a sequential number).

Data Request - Year to Date

Institutions may request YTD records for all students or selected students that are specified in the data request record.

An institution can request YTD records for all the activity posted to the COD database up to the present. COD creates a set of records for every student the institution has reported for the award year. Each student has a year-to-date origination record and year-to-date disbursement record for each disbursement accepted.

YTD data provides summary statistics for:

- all recipients,
- all origination records,
- originations accepted,
- originations accepted with corrections,
- all disbursement records,
- disbursements accepted,
- disbursements accepted with corrections, and
- counts for rejects and warning codes.

The file name will be PGRQ##IN.nnn (where ## in the award year and nnn is a sequential number).

Export to Servicer

Student financial aid data is often processed by third-party providers known as "Servicers". These agents require that the school periodically send records about the current enrollment status of students requiring and receiving financial aid.

In CampusNexus Student, campuses that work with servicers are designated by selection of the servicer and entry of the campus's customer ID number. These entries are found on the Financial Aid tab of the Campus Information form.

Currently, Global is the only servicer to which CampusNexus Student can export enrollment data. As other servicer extract options are completed, the corresponding options will be added.

Global Exports

CampusNexus Student can create three files to be sent to the Global **Weekly Extract**, the **Pre-Pull Extract**, and the **Add-Drop Extract**. CampusNexus Student creates the files according to specifications received from Global.

Note: The global extract definition file contains the Attendance Flag field as a Yes or No field indicating if the student is within the attendance standards or not. This process has been enhanced to incorporate the attendance violation policy evaluation.
A validation has been added within the process that will update the attendance flag in the appropriate global extract files with the appropriate Yes or No value according to the attendance policy that has been pre-established.

While exporting the data, the Global **Weekly Extract**, **Pre-Pull Extract**, and **Add/Drop Extract** will flag a student as being in attendance violation within the extract file if the student is shown to be a member of the student group designated as the Global Attendance Violation group for the school.

This attendance violation lookup will be in effect only if the Attendance Violation Hold Code is configured and the current student under the extract process is the member of a Student Group under Attendance Violation hold. If an attendance violation student group does not exist or is not configured, the system will continue to follow the regular logic for populating the attendance filed in the file.

For the campuses that export data to Global, terms in which data is required to be exported are marked with a Global Extract Term indicator. See Term Code Setup for more information.

Select Global as the Servicer Link on the Campus Information Financial Aid form and enter the school's customer number.

The procedure determines term begin and end dates based on students' enrollment schedules (AdEnrollSched) when more than one term is selected. The weekly extract does not include students who are pre-pulled but not yet included in Add/Drop.

Note: If a Campus Group has more than one campus, students will be extracted from all campuses. In the file sent to Global, each student extracted will be identified by individual Global School ID.

To export data to Global:

1. Navigate to **Daily > Financial Aid > Export Data > Servicers > Global**. Select one of the three extract options: Weekly, Pre-Pull, or Add/Drop.

   #### Weekly Extract

   The Global extract process includes the following features:

   a. Enrollment and NDS-Enrollment status category students will be included in the Weekly Extract as a Future (Global status of 'F'), if they meet the following conditions:

      - They have courses in their student schedule with a course status other than Current, Posted, Dropped, or Scheduled; and
      - Their expected start date is between the minimum start date of the terms selected and the later of the two following dates:
        - Maximum end date of the terms selected, or
        - Date selected to use when calculating the futures to extract.

   b. Applicant Processing status category students will be included in the Weekly Extract as a Future (Global status of 'F') if their Expected Start Date is between the minimum start date of the terms and the later of the two following dates:

      - Maximum end date of the terms selected, or
      - Date selected to use when calculating the futures to extract.

   c. When a term start or end date cannot be determined for a student in an Enrollment or NDS-Enrollment

status category, the Term Start Date and Term End Date in the Global Weekly Extract will both be populated with the student's Expected Start Date.

d. When a term start or end date cannot be determined for a student in an Applicant Processing status category, the Term Start Date and Term End Date in the Global Weekly Extract will both be populated with the student's Expected Start Date.

e. When a term start or end date cannot be determined for a student in a Re-Entry or NDS-Re-entry system status, the Term Start Date and Term End Date in the Global Weekly Extract will both be populated with the student's Expected Start Date.

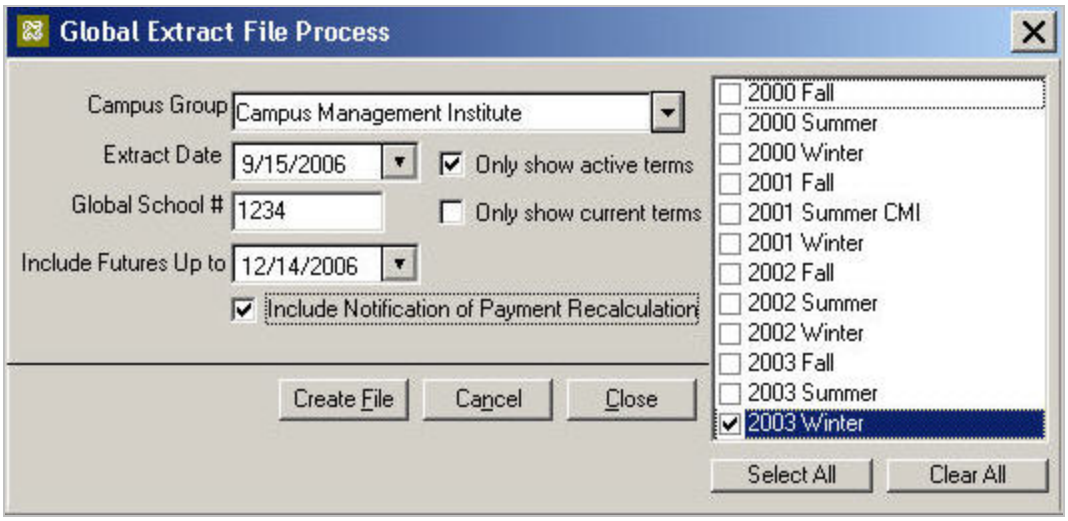
f. The Global Weekly Academic Extract will send a 'T' as the status for students with a System Status of Re-Entry, NDS-Re-Entry, and SPN.

g. The Global Weekly Academic Extract will send a 'T' as the status for students who have multiple enrollments, regardless of the status of the other enrollments.

Note 1: *For Weekly Extract Only:* Students who have a school status in the Enrolled or Applicant system status category will be included in the extract file if their expected start date falls between the earliest term start date and the latest term end date selected by the user. Field data included in the Weekly Extract for students with a school status in the Enrolled or Applicant system status category will be Name, SSN, and the student's Planned Start Date.

Note 2: The Global Weekly Extract will flag a student as being in attendance violation within the extract file if they are a member of the student group designated as the Global Attendance Violation group for the campus. If an attendance violation student group does not exist or is not configured the system will continue to follow the existing logic for populating the attendance filed in the file.

2. The Global Extract File Process form is displayed.



3. Select the **Campus Group** for which student financial aid data is to be extracted.

4. Enter the **Extract Date**.

5. Select the **Terms** for which data is to be exported. Use the "show" options to show the terms from which to select.

   The list of terms includes all records from AdTerm that are in the campus group selected, where the term is designated as a Global term.

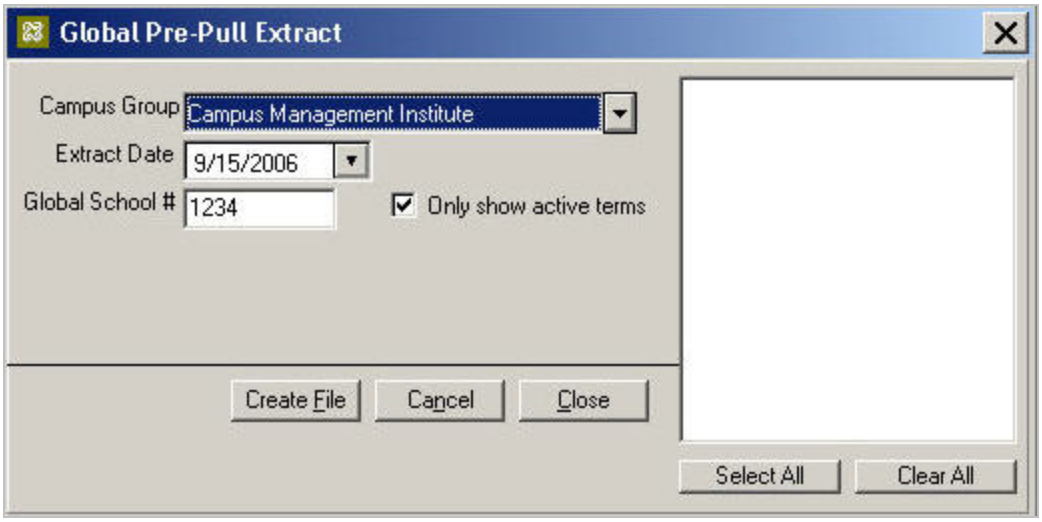
The option to show all current terms will find terms where the begin date is equal to or less than today's date and the end date is equal to or greater than today's date.

6. Enter the **Global School Number** by which Global recognizes data from the Campus Group.
7. Select a date from the **Include Futures Up to** drop-down list. Specify the date up to which the future students has to be extracted in weekly extract. When the Global Weekly Extract is created, CampusNexus Student will include only those future students whose expected start dates fall within that designated time frame. (i.e., between the Extract Date and Date up to which the future students has to be extracted). If the date selected is less than the Extract Date when the Create File button is selected, a message will be presented stating 'Include Futures Up to date should not be less than Extract Date'.
8. Select **Include Notification of Payment Recalculation**, if you want CampusNexus Student to place an asterisk (*) in the ESTES (Estimated Enrollment Status) field of the file. While generating the Weekly Extract file, the system will use the following criteria to determine when the Enrollment Status flag in the extract should be populated.
    a. Include Notification of Payment Recalculation check box must be selected.
    b. Payment Recalculation Notification must be enabled for at least one child term as shown by the 'Schedule Changes Require Payment Notification' check box having been selected on the 'Define Relationships' form for that term.
    c. The configured number of days after the term start date must have elapsed for the particular child term on the 'Define Relationships' form.
    d. The stored scheduled hours for the child term (used in calculating Current Scheduled Hours) must be different than the value last reported for the student for that particular child term.
    e. If the stored scheduled hours (from item d above) are different the difference must be of the particular type of schedule change (increases only, decreases only, both increases & decreases) defined for that term on the 'Define Relationships' form.
9. Click **Create File**. CampusNexus Student processes the extract file and displays a message containing the name of the file created. The file will be placed in the default directory for exporting and importing FA data. See Campus Information Financial Aid tab.
10. Click **OK** to acknowledge the message and finish the procedure. A report will be created to list the extracted data.
11. Follow the instructions provided by Global for transmitting the export file to their data center.

Pre-Pull Extract

The Pre-Pull extract will gather all students currently enrolled in school with a schedule for the selected upcoming terms. Data will be stored in a new table, and used in the subsequent "Add/Drop" Extract.

Note: The Global Pre-Pull Extracts will flag a student as being in attendance violation within the extract file if the student is a member of the student group designated as the Global Attendance Violation group for the campus.



The list of terms includes all records from AdTerm that are in the campus group selected, where AdTerm.GlobalExtractTerm is equal to 1 and AdTerm.StartDate is greater than today's date.

Only Show Active Terms: Check this box to filter the list of terms to include only the active ones.

Extract Date defaults to today's date.

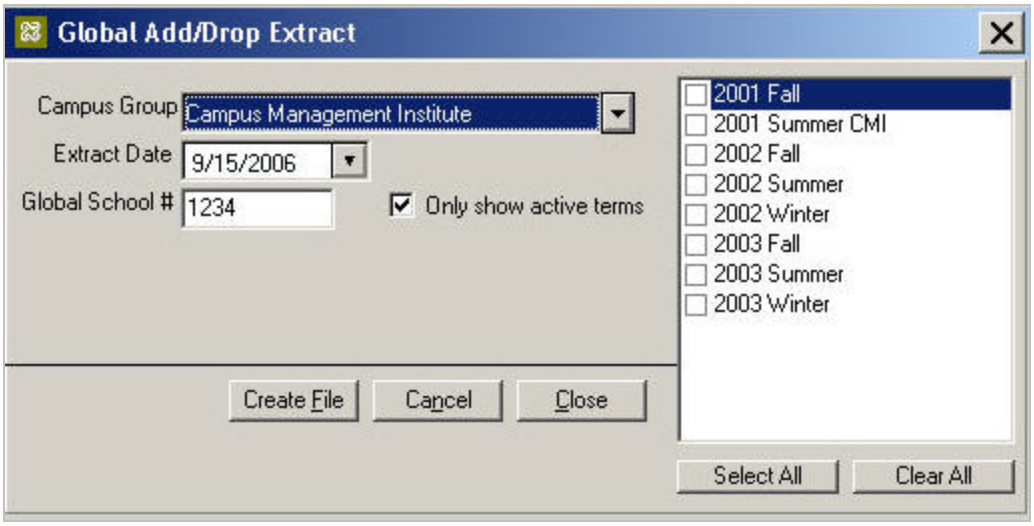
Global School Number defaults to the campus' Servicer School Number.

A report (rpt_FaGlobalPrepull.rpt) is available after the extract is completed. The report shows Student Name, Term Code, Term Begin Date, Term End Date, Start Date, Enrollment Date, Enrollment Status Code, and SAP Flag. At the top of the report it shows TermIDs, Extract Date, and File name.

Add-Drop Extract

The Add/Drop extract will gather all students previously extracted in the Pre-Pull file to submit an update of their enrollment status. The process will use FaGlobalExtractPP to determine which students to include. Terms available will be selected based on the add/drop date defined in the term file.

Note: The Global Add-Drop Extracts will flag a student as being in attendance violation within the extract file if they are a member of the student group designated as the Global Attendance Violation group for the campus.



Select the **Campus Group**. Select the **Terms** (required). The list of terms includes all records from AdTerm that are in the selected campus group, where the Global Extract Term is equal to 1 and today's date is greater than the term's Add-Drop date.

Only Show Active Terms: Check this box to filter the list of terms to include only the active ones.

Extract Date defaults to today's date.

Global School Number defaults to the campus' Servicer School Number.

A report (rpt_FaGlobalAddDrop.rpt) is provided by the extract process. The report shows Student Name, Term Code, Term Begin Date, Term End Date, Start Date, Enrollment Date, Enrollment Status Code, and SAP Flag. At the top of the report, it shows TermIDs, Extract Date, and File name.

State Reporting

The State Reporting menu provides access to the following options:

- Georgia HOPE Scholarship Configuration
- Texas ICUT Reports and THECB-Configuration

HOPE Scholarship Configuration

By default, the HOPE options are disabled. To provide access to users, configure the security options under both the **Daily** menu and the **Reports** menu.

The Georgia State Reporting options are available to users with the necessary security permissions. The **HOPE Scholarship** Program (Helping Outstanding Pupils Educationally) is a merit-based higher education scholarship. The student's ability to pay is not a factor; eligibility is based on the student's academic performance.

The requirements for the student include:

- Being a resident of the state of Georgia for at least one year.
- Graduating from high school with a 3.0 GPA.
- Maintaining a cumulative 3.0 GPA throughout college.

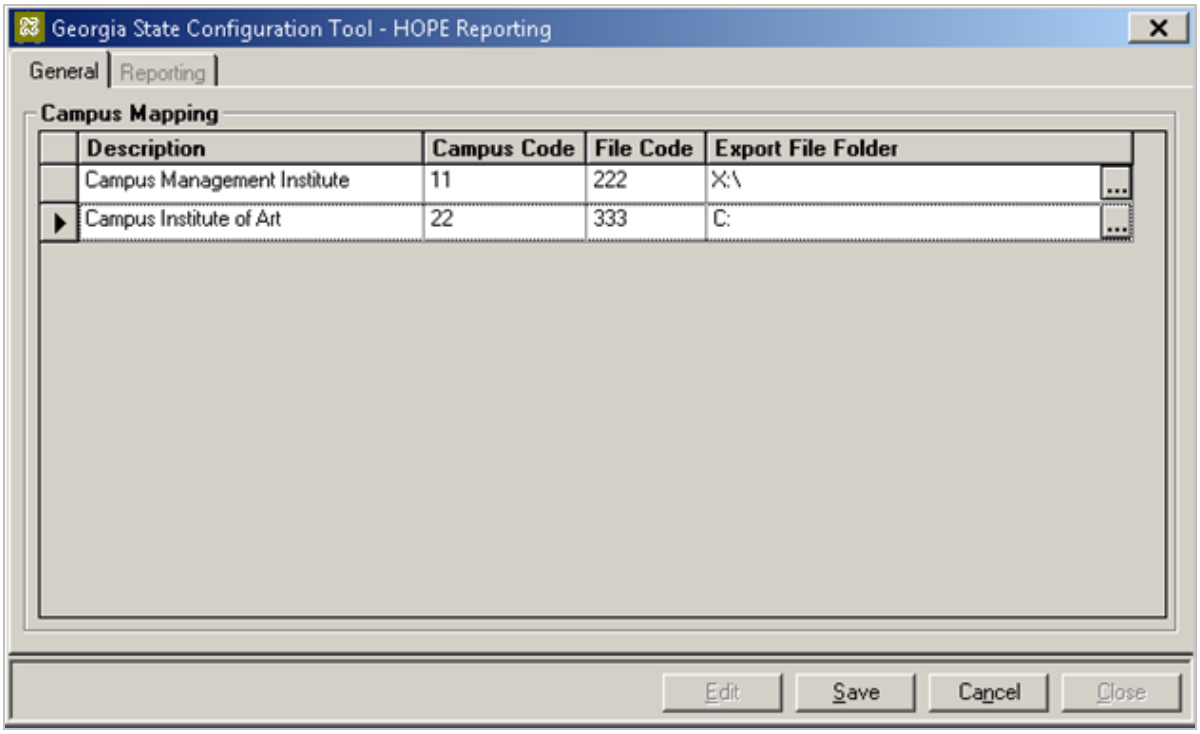
Configuring the HOPE Scholarship

To launch the configuration tool, navigate to **Daily > Financial Aid > Export Data > State Reporting > Georgia > HOPE Configuration**.

General Tab

Campus Mapping

Campus Mapping enables you to map the campuses to a specified file folder, where the export files will be extracted. The grid will only display the campuses where the campus address, configured under Campus Information, has a state equal to 'GA' for Georgia.



HOPE Extract with Campus Code

The State of Georgia has required that all extract files submitted for HOPE processing contain the school's State ID. The Financial Aid (FA) Administrator can enter and save a unique, two-digit state reporting Campus Code to the HOPE Configuration

Tool. This value is saved and stored in the Campus Code column. When the HOPE Extract report is generated the Campus Code is pulled into the HOPE Extract File for processing as required by the State of Georgia.

To configure Campus Mapping:

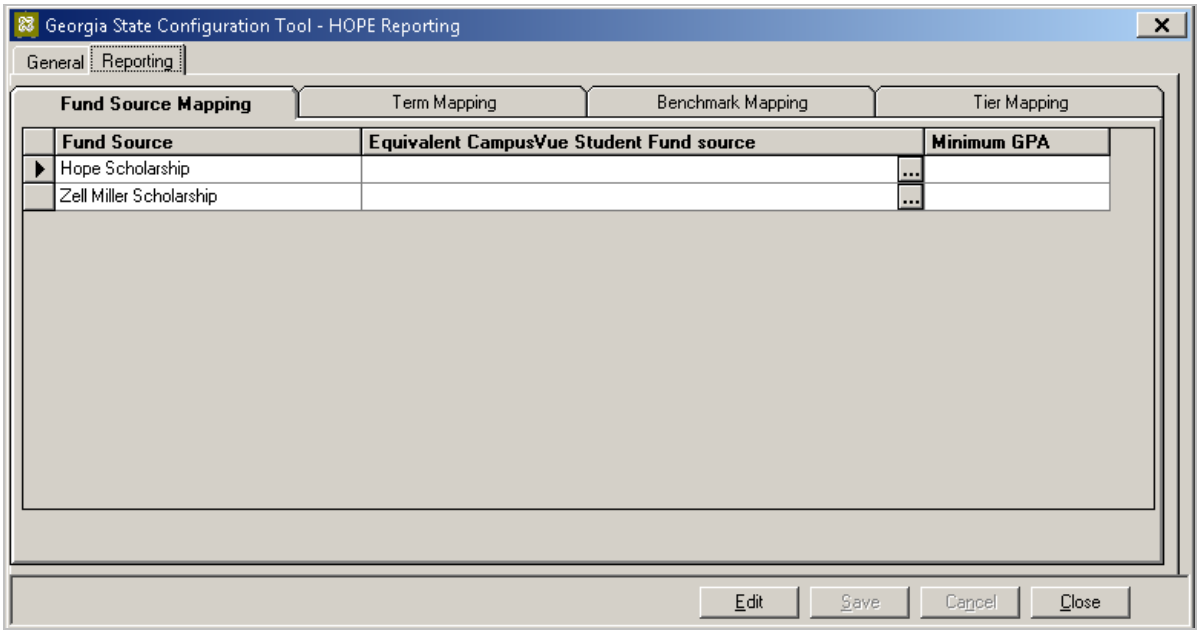
Select the campus to be configured and click the Edit button to allow the export file folder to be set for each campus. Click ... and select the desired folder.

The following buttons apply to all the tabs on this form:

- **Edit** allows you to change or modify the evaluation criteria.
- **Save** allows you to keep the configuration settings.
- **Cancel** enables you to eliminate any changes made.
- **Close** allows you to close the form. Click Save before closing the form to save the configuration settings.

Reporting Tab

Fund Source Mapping



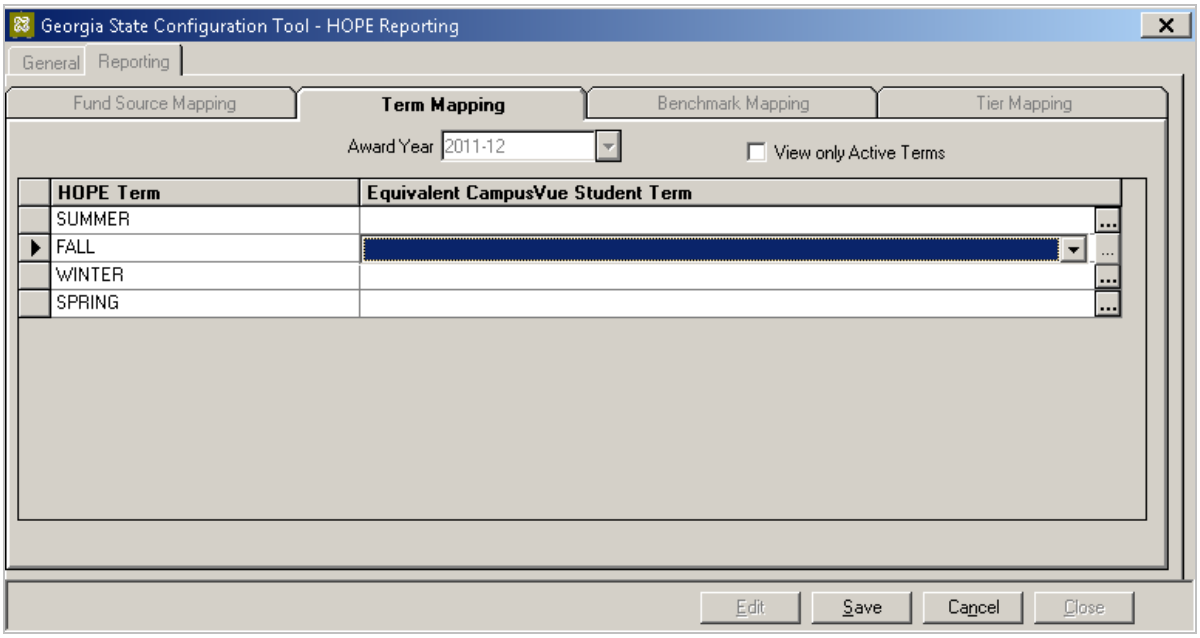
Fund Source Mapping enables you to map the Georgia HOPE Grant to your institution's unique fund source code.

Select the correct fund source and then click the Edit button to specify the fund source code used by your institution for the Georgia HOPE fund or the Georgia Zell Miller fund. Click ... to display a list box containing all fund sources and enter the desired code.

Enter in the Minimum GPA field for each fund source this value will be used to calculate the eligibility status for each fund source within the benchmark evaluation which is displayed on the State Report Evaluation form.

Then click the Save button to save the data.

Term Mapping

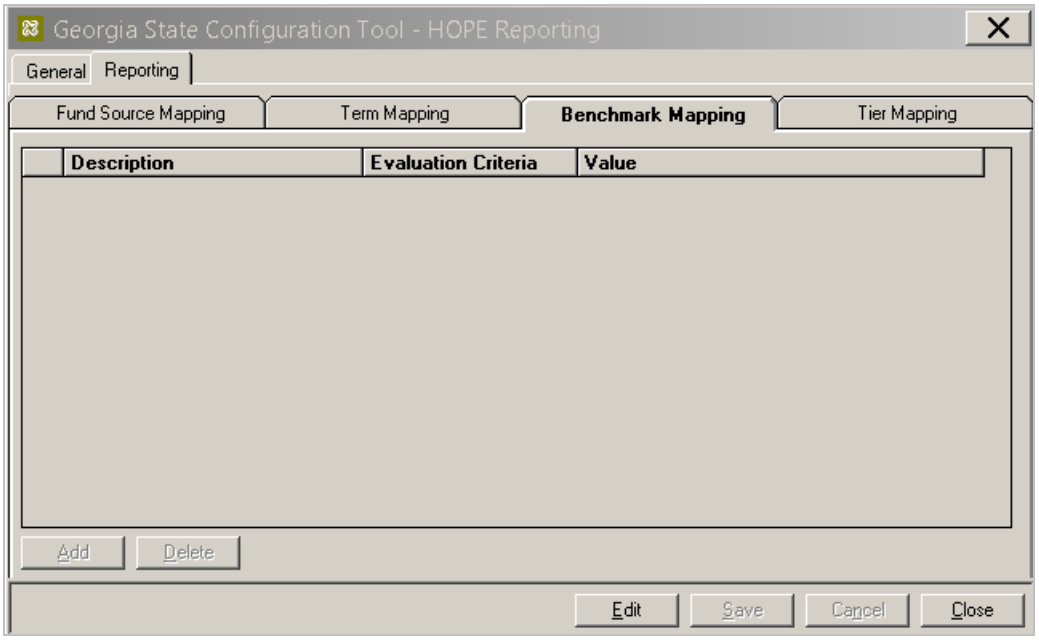


Term Mapping enables you to map the HOPE Term, by award year, to your institution's unique term codes.

Click the **Edit** button to specify the term code used by your institution for the HOPE term, and then click to display a list box containing active and inactive terms. Select the **View only Active Terms** check box to filter the available terms for selection. One or more terms may be selected for each HOPE term. The terms available are parent or standard terms. These terms should correspond to the terms in the HOPE GPA that has been configured. Select the desired terms and click the Save button to save the data.

Note: There are many regulations by the state that begin in Fall 2011. The term that is mapped as Fall 2011 will be used to begin supporting Learning Support Courses and modifications of the calculations of the HOPE GPA.

Benchmark Mapping



Benchmark Mapping enables you to configure Benchmark mapping evaluation criteria for HOPE. The evaluation of the HOPE criteria is at an overall student level, so it crosses all enrollments and campuses for the student.

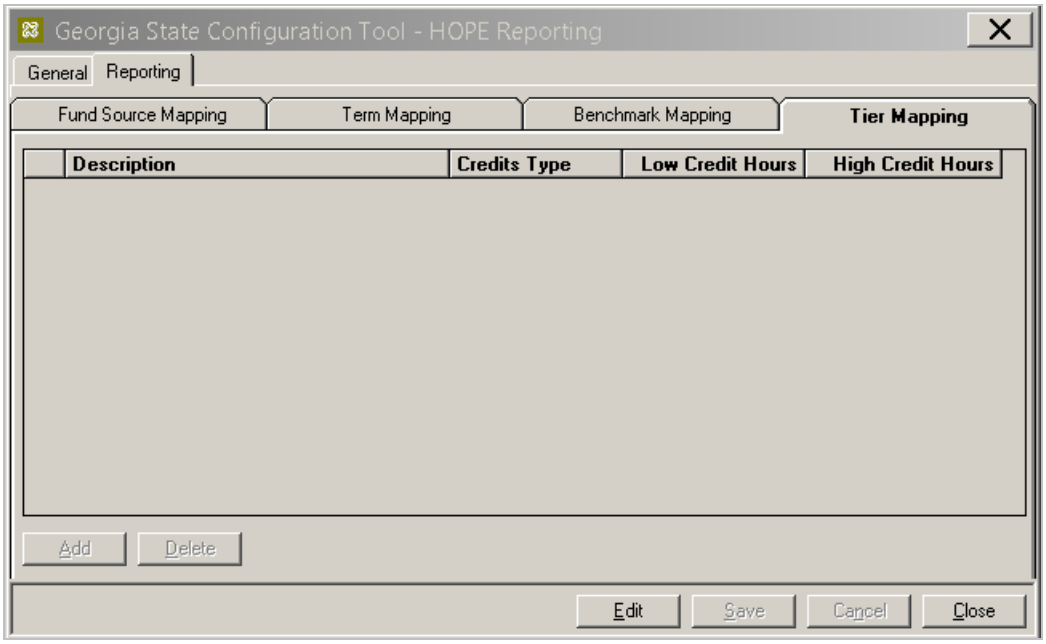
The Benchmark Mapping tab contains a grid consisting of three columns: Description, Evaluation Criteria, and Value.

- **Description** allows you to name the Benchmark.
- **Evaluation Criteria** allows you to select any criteria from the drop-down list, including Selected Terms, Earned Credit Hours, Attempted Credits Hours, Term Begin Date, Term End Date, and Dates.
- **Value** will be dynamically populated based upon your selected criteria in the Evaluation Criteria column. If you select the Term Begin Date, Term End Date, or Date, then you will only be able to enter a date value in the Value column. Likewise, if you choose Selected Terms, then a list of terms, including Summer, Fall, Winter, and Spring, will be populated in the Value column. If you select Earned Credit Hours or Attempted Credit Hours under Evaluation Criteria, then you will only be able to enter numeric values with a decimal in the Value column. The system will store the cumulative total for the credits attempted and the credits earned between each parent/standard term.

The Benchmark Mapping tab also has an **Add** button, which allows you to insert a blank row in the grid, and a **Delete** button, which allows you to remove a selected row from the grid.

To add a new row to the grid on the Benchmark Mapping tab, click the Add button. Enter a Description, select the Evaluation Criteria, and then enter a Value. Click Save to keep your settings.

Tier Mapping



Tier Mapping enables you to configure State Grant evaluation tiers for HOPE. You can configure the range of credits within each tier by credit hour ranges. The evaluation of the HOPE criteria is at an overall student level, so it crosses all enrollments and campuses for the student.

The **Tier Mapping** tab contains a grid consisting of four columns: Description, Credits Type, Low Credit Hours, and High Credit Hours.

- **Description** allows you to name the Tier.
- **Credits Type** allows you to select Attempted and Earned values from the drop-down list.
- **Low Credit Hours** allows you to enter only numeric values; the Low Credit Hours value cannot be greater than the

High Credit Hours value.

- **High Credit Hours** allows you to enter only numeric values.

To add a new row to the grid on the Tier Mapping tab, click the Add button. Enter a Description, select the Credits Type, and then enter the Low Credit range and High Credit range. Click Save to keep your settings.

HOPE Extract

HOPE Scholarship and Zell Miller Scholarship funds from the State of Georgia are disbursed to the school once the school has submitted an invoice to the Georgia Student Finance Commission through the SURFER (Scholarship Up-to-date Records for Electronic Reporting) application software.

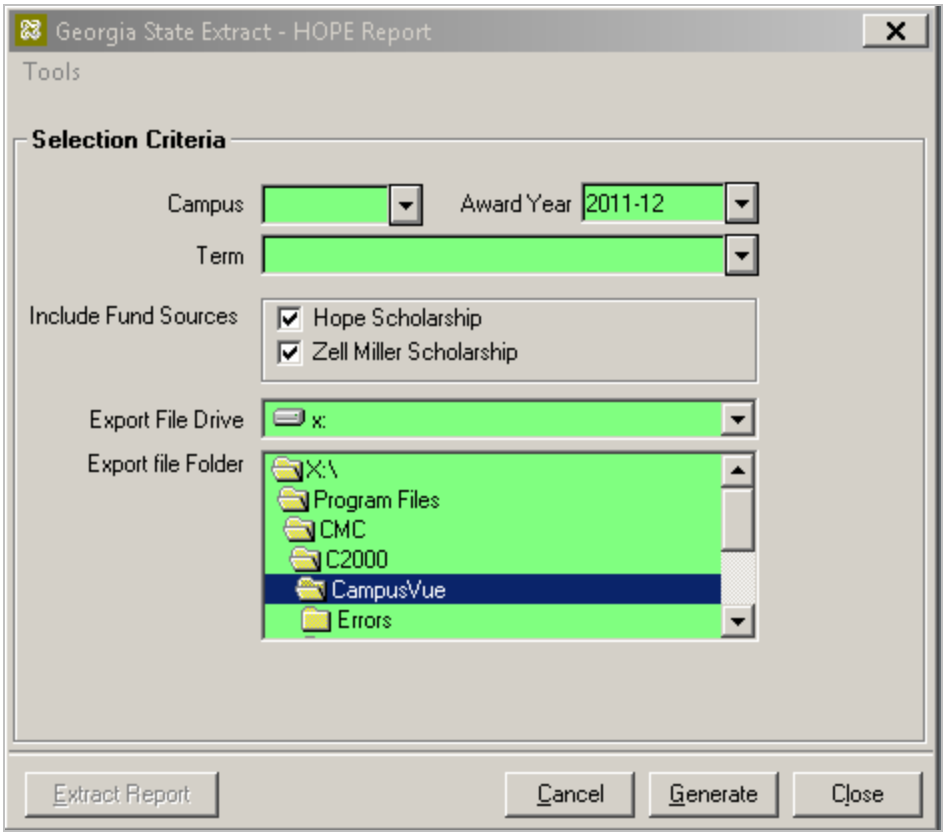
The Hope Extract file includes the Learning Support Hours field, which represents the courses that the student is taking after Fall 2011 that are remedial and are to be excluded for payment. These courses are identified by being configured as Remedial at the course level. The extract process validates if the student has registered for any of these courses for the selected term and, if so, then the credits for the courses are included in the Learning Support Hours field and they are excluded from the Paid Hours field for the selected term. The Learning Support Hours credit hours are then included in the Enrolled Hours field, that contains the total attempted hours for the selected term.

The Georgia State Extract form allows the user to select the awards that they would like included in the extract file that is going to be created. The selection options are: HOPE Scholarship and Zell Miller Scholarship.

CampusNexus Student's HOPE Extract functionality exports the required data fields to a text file. This electronic file is saved to your specified location with the name "INU###.TXT". The hash symbols (#) represent the three-digit code selected prior to export.

In general, there are three basic steps to a successful export:

- Select your criteria.
- Generate the file.
- Extract the data.



1. In the **Georgia State Extract** dialog box, select the following criteria:

    - **Campus**
      The Campus drop-down list displays the campus' File Code, Campus Code, and Campus.

- **Award Year**
  Choose an Award Year.
- **Term**
  Choose a term: Fall, Winter, Spring, or Summer.
- Include Fund Sources

Choose HOPE Scholarship, Zell Miller Scholarship, or both.

- **Export File Drive**
  Select a local or network drive location for the file.
- **Export File Folder**
  Select a folder from the drive selected above.

2. Click **Generate** to run the report based on your selection criteria. The student records are evaluated, extracted, and saved to an electronic file. If successful, a confirmation message displays on your screen.

   Note: The Extract Report button remains dimmed and unavailable until a file is successfully generated.

3. Click **Extract Report** to open the HOPE Extract Report in the report viewer on your screen. You can also open the file from the saved location on your local or network drive. The HOPE Extract report identifies all student records that were sent in the Extract file.

Processing correction record changes

CampusNexus Student will identify students who have had their **tier value changed** since the prior extract of the selected term.

In this situation, CampusNexus Student needs to create a **correction record** for the student for the selected term. The main purpose of the correction record is to adjust the information submitted prior under the old tier value for the student, since **the student should only have one tier value per term**.

Once the correction record has been created for the student, a new record is created within the same file to request the current disbursement amount at the new tier value.

Report Configuration Financial Aid THECB Reports

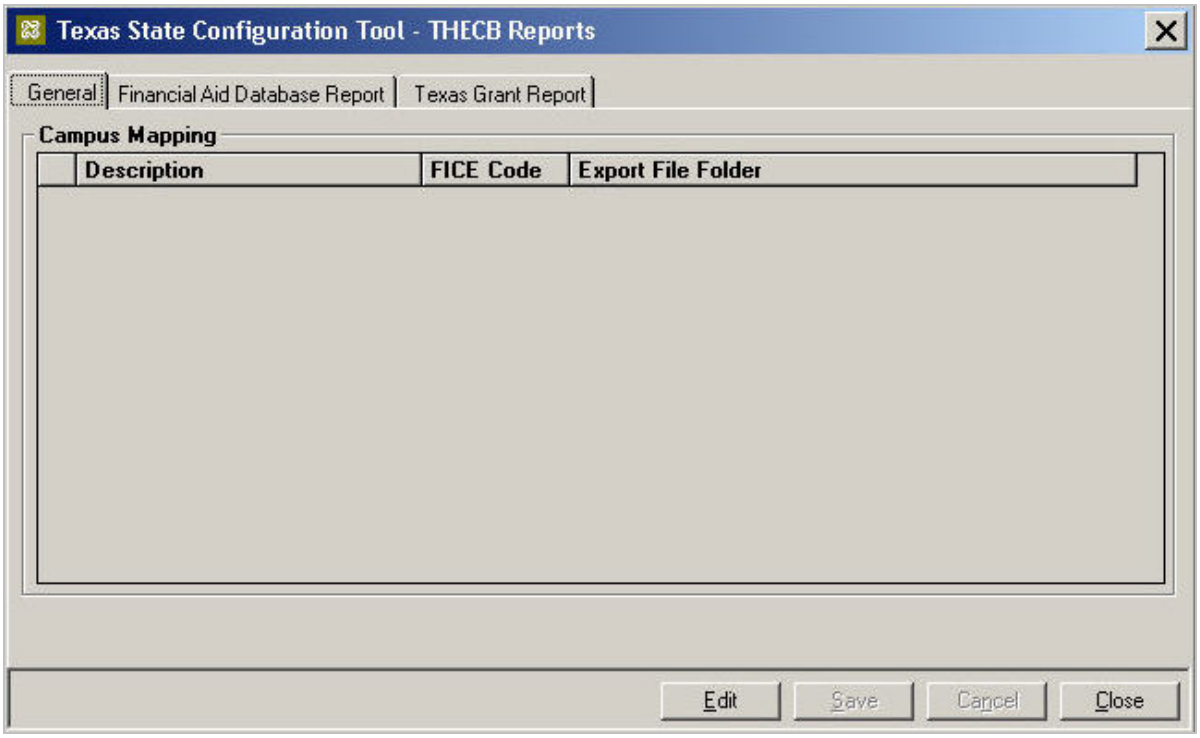
Texas has a Financial Aid Database (FADS) reporting requirement that each participating school must adhere to in order to be able to participate in these programs. The user is required to submit a Financial Aid Database Report to the Texas Higher Education Coordinating Board (THECB).

Texas has a Grant program that has reporting requirements that each participating school must adhere to in order to be able to participate in the grant programs. Clients are required to enter a Texas Grant Student-by-Student Summary Year-End Report to the Texas Higher Education Coordinating Board (THECB) by May 1st of that submittal year and subsequently certified by June 17th of that submittal year. This is a mandatory report entitled Texas Grant Report. Sanctions are imposed if the schools misrepresent information on the report or the report is filed late.

Each THECB report must be configured before it can be generated and extracted.

To configure THECB reports:

1. Navigate to **Daily > Financial Aid > Export Data > State Reporting > Texas > THECB-Configuration**.



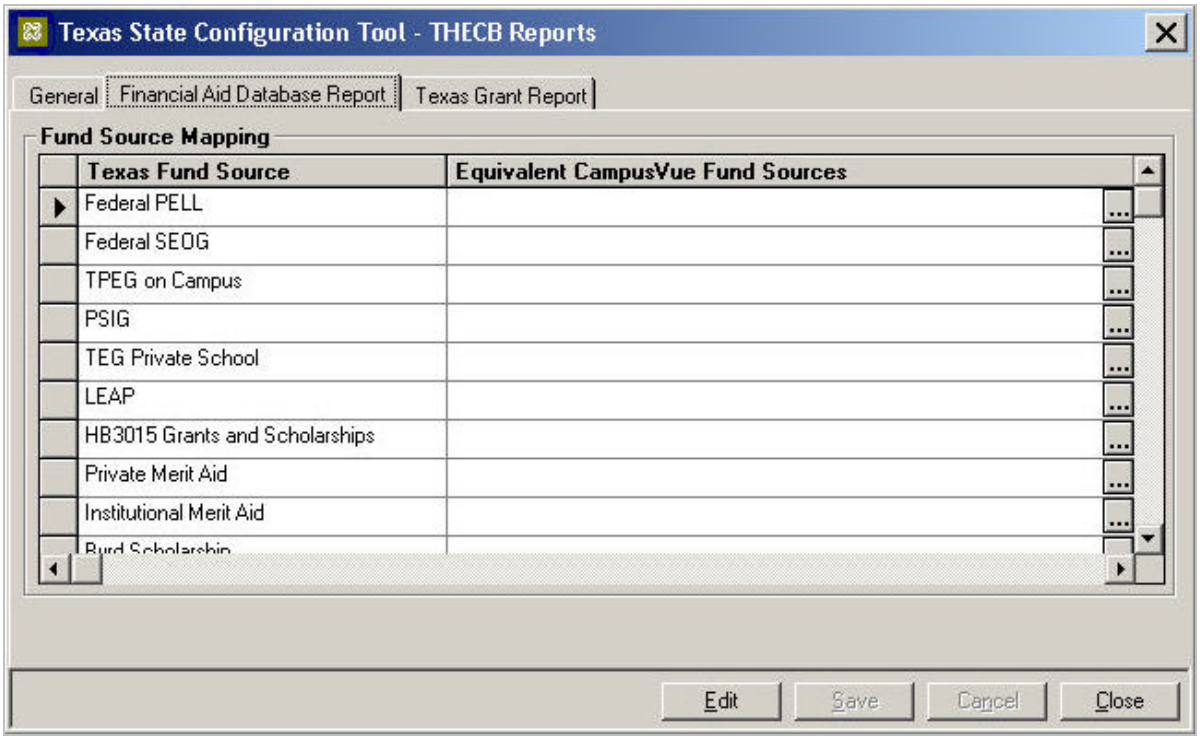
2. On the General tab, a list of campuses with their associated FICE Codes and Export File Folder is available for selection. Select the campus to map and click the **Save** button or you can click the **Edit** button to modify any of the Campus Mapping listings or click the **Cancel** to restore the information. More than one campus can have the same FICE code. Click ... to specify the path where the export file will be placed once it is generated.

   Note: An information message will appear if the FICE code is not numeric or the length of the FICE code that you entered is not six digits.

3. On the Financial Aid Database Report tab, select the appropriate fund source listed in the Equivalent CampusNexus Student Fund Sources in the right-hand column and match it with the appropriate "Fund Sources" for your state in the left-hand column. The same CampusNexus Student Fund Source can be mapped to different State Fund Sources. If there are no listings for Equivalent CampusNexus Student Fund Sources, click ... and

make a selection.

4. Click **Save** button to save the mapping between State Fund Sources and CampusNexus Student Fund Sources.

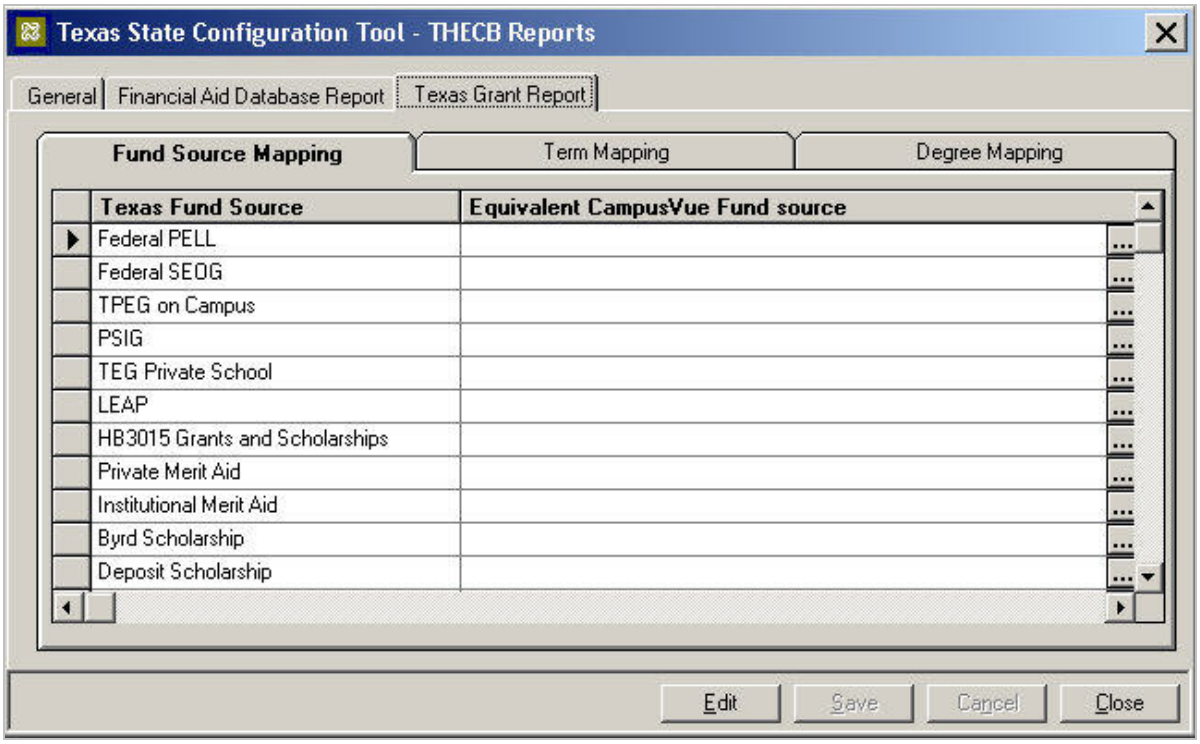


Note: A message will appear if you attempt to exit the window without associating at least one CampusNexus Student Fund Source with a State Fund Source. If you do not want to finish configuring the report, click **Cancel** and **Close**. To finish configuring the report, select the campus fund sources and associate them with the state fund sources.

Texas Grant Report

To Configure the Texas Grant Report:

1. On Fund Source Mapping tab, select the appropriate fund source listed in the Equivalent CampusNexus Student Fund Sources in the right-hand column and match it with the appropriate "Fund Sources" for your state in the left-hand column. The same CampusNexus Student Fund Source can be mapped to different State Fund Sources. If there are no listings for Equivalent CampusNexus Student Fund Sources, click and make a selection.



2. Click the **Term Mapping** tab to associate Texas Terms with equivalent CampusNexus Student Terms.
3. Select the **Award Year** that you would like to map.
4. Select the appropriate Term listed in the Equivalent CampusNexus Student Term in the right-hand column and match it with the appropriate Texas Term in the left-hand column. The same CampusNexus Student Term can be mapped to different Texas Terms. If there are no listings for Equivalent CampusNexus Student Terms, click ... and make a selection.
5. Click **Save** to save the mapping options selected.
6. Click the **Degree Mapping** tab to associate Texas Degrees with equivalent CampusNexus Student Degrees.
7. Select the **Award Year** that you would like to map.
8. Select the appropriate Degree listed in the Equivalent CampusNexus Student Degree in the right-hand column and match it with the appropriate Texas Degree in the left-hand column. The same CampusNexus Student Degree can be mapped to different Texas Degrees. If there are no listings for Equivalent CampusNexus Student Degrees, click ... and make a selection.
9. Click **Save** to save the mapping options selected.

   Note: A Warning! message will appear if you attempt to save mappings without associating at least one CampusNexus Student Degree with a

   - Texas State Fund Source,
   - Texas State Term, and
   - Texas State Degree.

If you do not want to finish configuring the report, click **Cancel** and **Close** to exit the window. To finish configuring the report, select a Texas State Fund Source, Term, and Degree.

See Report Extract Financial Aid THECB Reports for information regarding extracting and generating the Financial Aid Database report.

Report Extract Financial Aid THECB Reports

Texas has a Financial Aid Database (FADS) reporting requirement that each participating school must adhere to in order to be able to participate in these programs. The user was required to submit a Financial Aid Database Report to Texas Higher Education Coordinating Board (THECB).

Texas has a Grant program that has reporting requirements that each participating school must adhere to in order to be able to participate in the grant programs. Clients are required to enter a Texas Grant Student-by-Student Summary Year-End Report to the Texas Higher Education Coordinating Board (THECB) by May 1st of that submittal year and subsequently certified by June 17th of that submittal year. This is a mandatory report entitled Texas Grant Report. Sanctions are imposed if the schools misrepresent information on the report or the report is filed late.

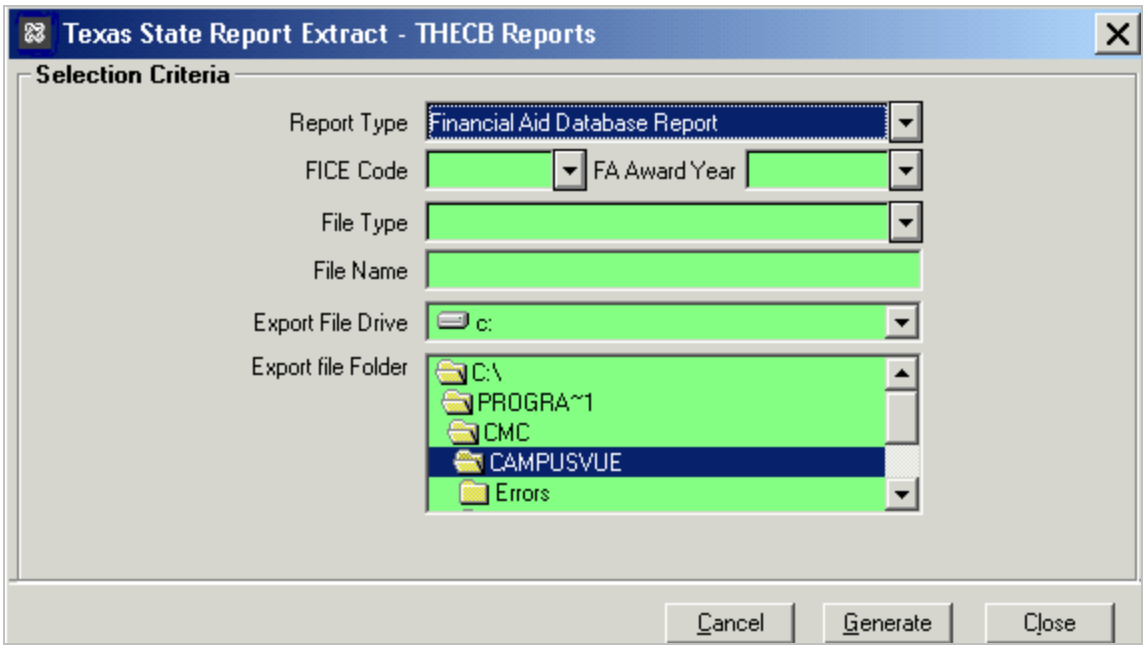
Each THECB report must be configured before it can be extracted and generated. Follow the Configuration for THECB Reports instructions before attempting to extract and generate ICUT reports.

The Report Extract tool can be accessed by selecting **Daily > Financial Aid > Export Data > State Reporting > THECB-Extract**.

The Texas State Report Extract - THECB Reports screen will appear.

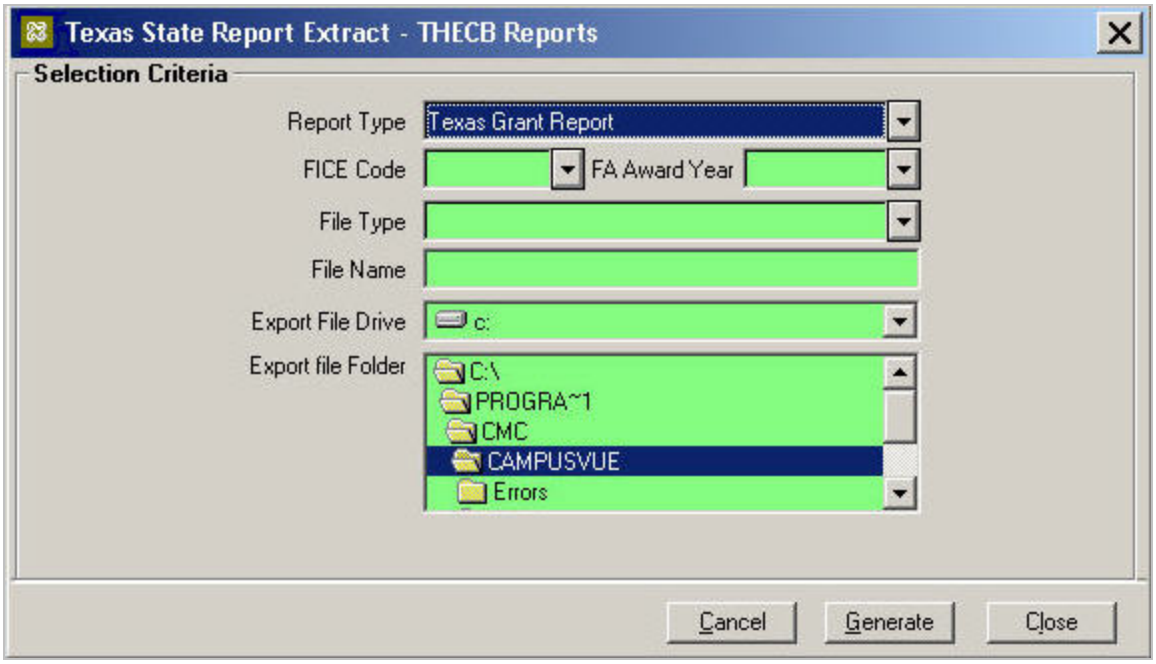
Financial Aid Database Report

1. Select the "Financial Aid Database Report" from the "Report Type" drop-down list.
2. Select the "FICE Code" from the drop-down list.
3. Select the appropriate "FA Award Year" dates from the drop-down list of dates.
4. Select the "File Type" from the drop-down list.
5. Enter the filename to indicate the location where the Financial Aid Database resides.
6. Select the appropriate "Export File Drive" from the drop-down list.
7. Select the appropriate "Export File Folder" from the drop-down list to indicate where you would like the report to be stored.
8. Click the "Generate" button to generate the report.



Texas Grant Report

1. Select the "Texas Grant Report" from the "Report Type" drop-down list.
2. Select the "FICE Code" from the drop-down list.
3. Select the appropriate "FA Award Year" dates from the drop-down list of dates.
4. Select the "File Type" from the drop-down list.
5. Enter the filename to indicate the location where the Financial Aid Database resides.
6. Select the appropriate "Export File Drive" from the drop-down list.
7. Select the appropriate "Export File Folder" from the drop-down list to indicate where you would like the report to be stored.
8. Click the "Generate" button to generate the report.



Click the **Close** button to exit the screen.

Note: Clicking the "Cancel" button will set the form back to its initially loaded state.

Report Configuration Financial Aid ICUT Reports

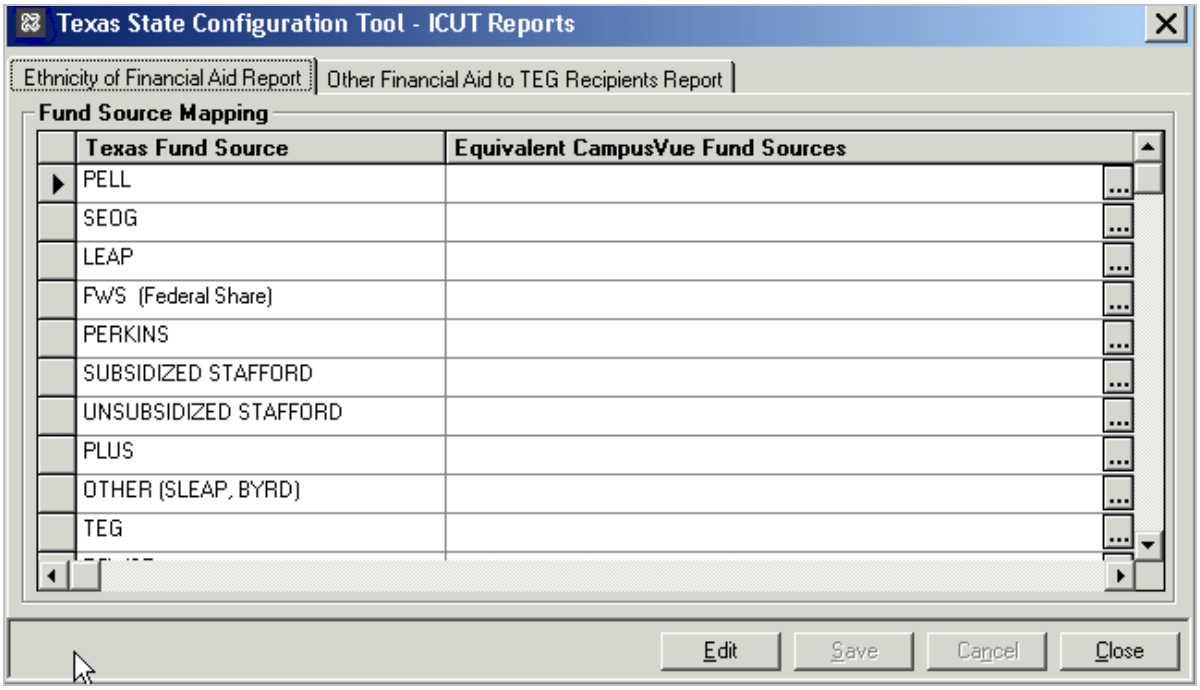
Each Financial Aid ICUT report must be configured before it can be generated. The configuration tool can be accessed by selecting **Daily > Financial Aid > Export Data > State Reporting > Texas > ICUT-Configuration**.

The configuration screen will provide tabs at the top of the screen. There should be one tab for each state report. Select the tab for the report you would like to configure.

Ethnicity of Financial Aid Report Configuration

To Configure the "Ethnicity of Financial Aid Report":

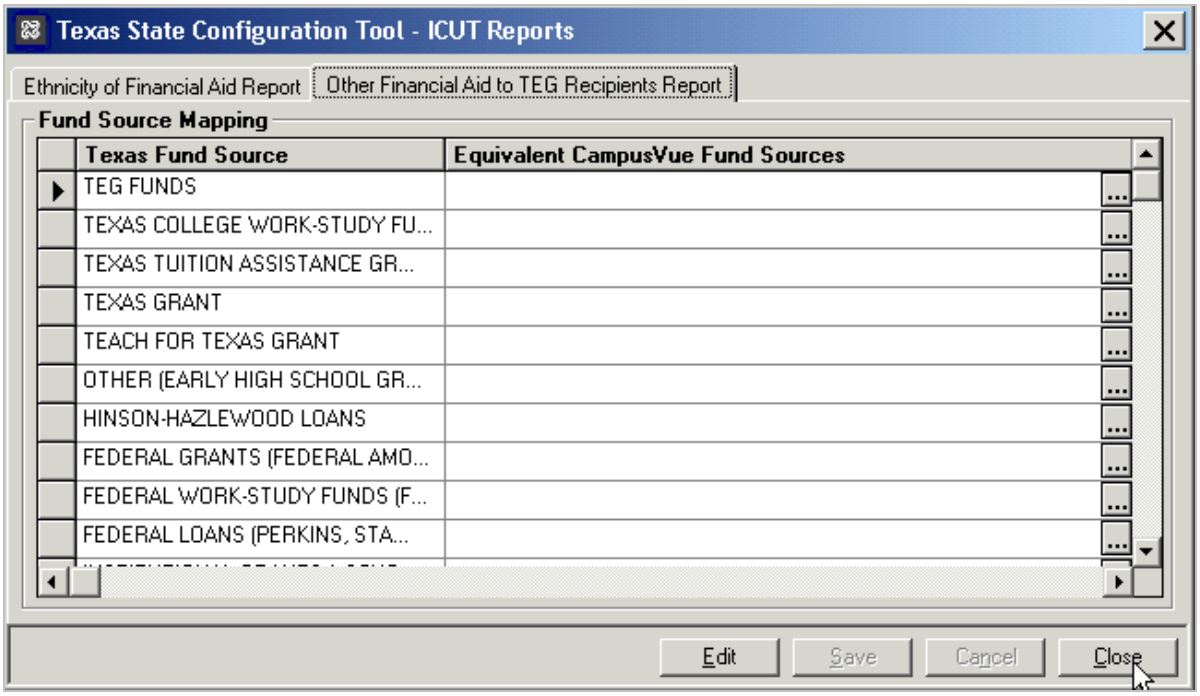
1. Select the appropriate fund source listed in the Equivalent CampusNexus Student Fund Sources in the right-hand column and match it with the appropriate "Fund Sources" for your state in the left-hand column. The same CampusNexus Student Fund Source can be mapped to different State Fund Sources. If there are no listings for Equivalent CampusNexus Student Fund Sources, click ... and make a selection.
2. Click **Save** to save the mapping between State Fund Sources and CampusNexus Student Fund Sources.



Other Financial Aid to TEG Recipients Report Configuration

To Configure the "Other Financial Aid to TEG Recipients Report":

1. Select the appropriate fund source listed in the Equivalent CampusNexus Student Fund Sources in the right-hand column and match it with the appropriate "Fund Sources" for your state in the left-hand column. The same CampusNexus Student Fund Source can be mapped to different State Fund Sources. If there are no listings for Equivalent CampusNexus Student Fund Sources, click ... and make a selection.
2. Click **Save** to save the mapping between State Fund Sources and CampusNexus Student Fund Sources.



Note: A message will appear if you attempt to exit the window without associating at least one CampusNexus Student Fund Source with a State Fund Source. If you do not want to finish configuring the report, click **Cancel** and **Close**. To finish configuring the report, select the campus fund sources and associate them with the state fund sources.

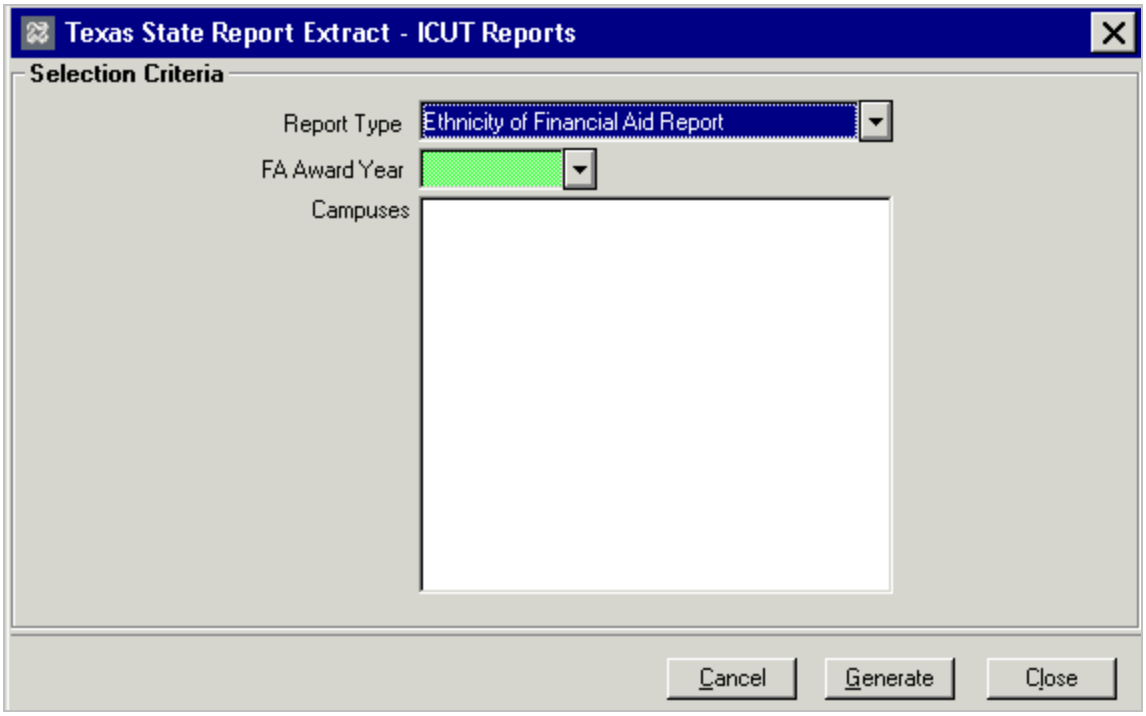
See Report Extract Financial Aid ICUT Reports for information regarding extracting and generating the Ethnicity of Financial Aid Report Configuration and Other Financial Aid to TEG Recipients Report Configuration reports.

Report Extract Financial Aid ICUT Reports

Each ICUT report for Financial Aid must be configured before it can be generated. Follow the Report Configuration Financial Aid ICUT Reporting instructions before attempting to extract and generate ICUT reports.

To access the Report Extract tool, navigate to **Daily > Financial Aid > Export Data > State Reporting > Texas > ICUT-Extract** .

The Texas State Report Extract - ICUT Reports form is displayed.



Ethnicity of Financial Aid Report

1. Select the "Ethnicity of Financial Aid Report" from the "Report Type" drop-down list.
2. Select the appropriate "FA Award Year" dates from the drop-down list of dates.
3. Select the campuses that you would like to be included in the ICUT report.
4. Click the "Generate" button to generate the Ethnicity of Financial Aid Report.

Other Financial Aid to TEG Recipients Report

1. Select the "Other Financial Aid to TEG Recipients Report" from the "Report Type" drop-down list.
2. Select the appropriate "FA Award Year" dates from the drop-down list of dates.
3. Select the campuses that you would like to be included in the ICUT report.
4. Click the "Generate" button to generate the Other Financial Aid to TEG Recipients report.

Note: Clicking the "Cancel" button will set the form back to its initially loaded state.

ICUT Reports

The Independent Colleges and Universities for Texas (ICUT) reports for Financial Aid must be configured before the reports can be extracted and generated.

To configure the ICUT reports:

1. Navigate to **Daily > Financial Aid > Export Data > State Reporting > Texas > ICUT Configuration**.
2. To extract and generate the reports, navigate to **Daily > Financial Aid > Export Data > State Reporting > Texas > ICUT Extract** .

See also Configuration Tools for ICUT Reporting and Report Extract Tool for ICUT Reporting for Financial Aid.

COD Export (2010-11 and prior award years)

Note: Please access Regulatory Help for the latest content about FAFSA, ISIR, and COD processing.

This form is used to provide information required by the Common Origination and Disbursement (COD) program **for award years 2010-11 and earlier**. See also COD, COD Import, COD grants, COD Exceptions, Pell Import, Pell Export, Direct Loan Import, Direct Loan Export, and Financial Aid Reports for additional information.

Note: For information on the legacy Pell and Direct Loan system and changes made for the current year including new edit codes and warning codes, refer to the FSA Technical Reference.

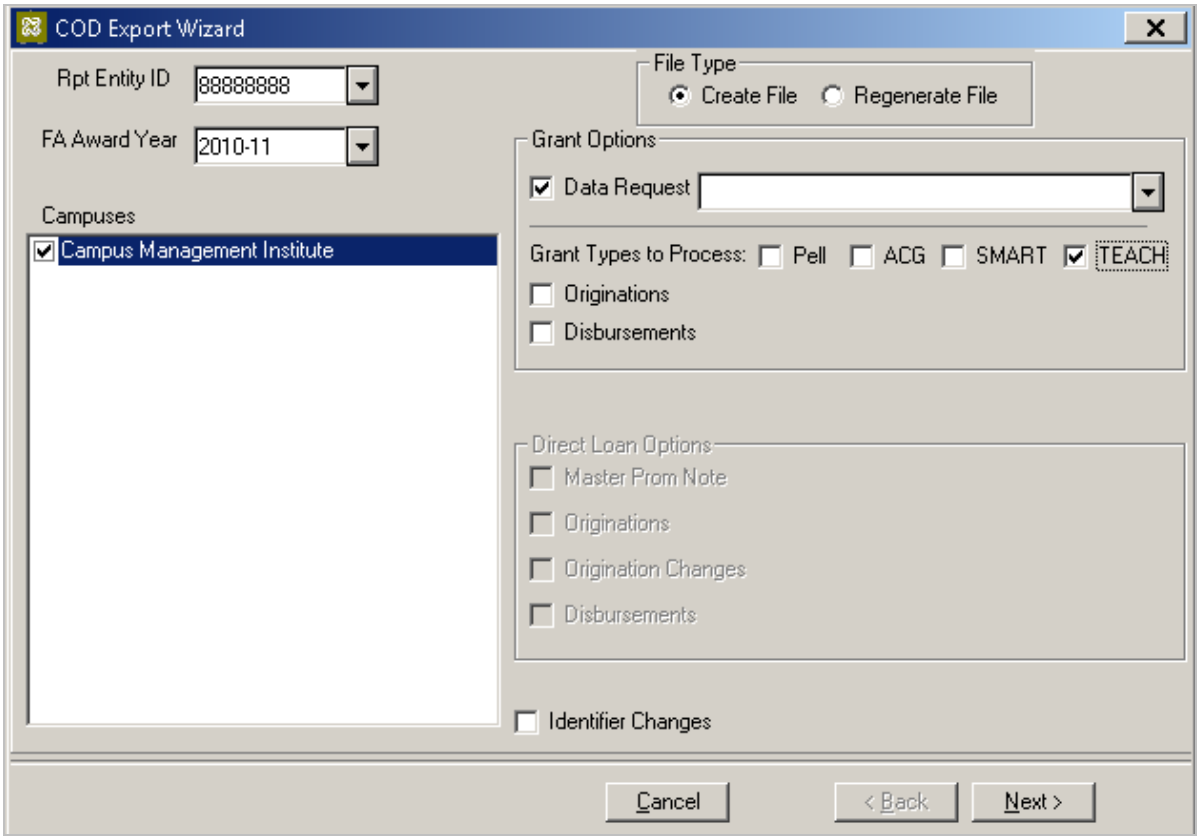
The **COD Export** of Pell verifies that the weeks defined for the program are within a valid range. For Clock Hour programs, the minimum value has been 30 weeks, or 26 weeks for award years 2006-07 and higher.

Note: When exporting Pell Originations to COD, CampusNexus Student validates if the Pell amount is greater than the 100% of the established Pell limit for those students marked as eligible for additional Pell funds (see Add'l Eligibility Indicator).

Data Requests and Import COD Reports for ACG, SMART, and TEACH grants can be processed, along with Pell. Refer to the 2010-2011 COD Technical Reference.

To export new files with combinations of Pell, ACG, SMART or TEACH Originations or Disbursements, or Direct Loan Options (Master Prom Note, Originations, Origination Changes, and Disbursement), and Identifier Changes:

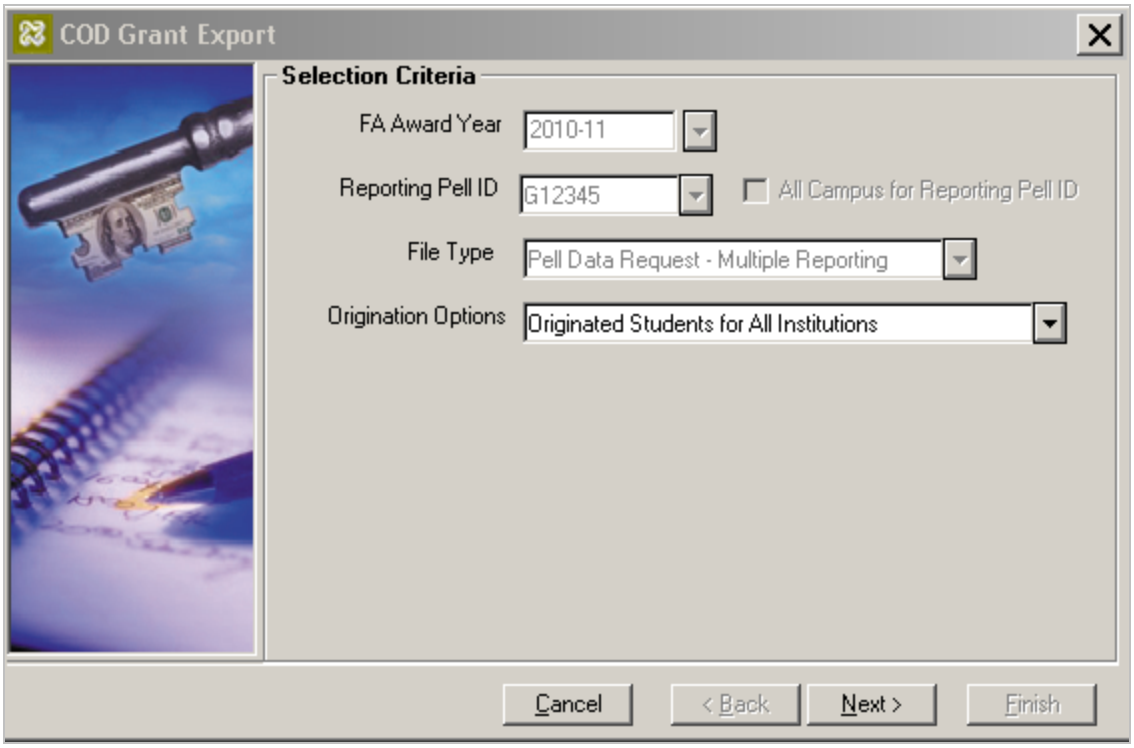
1. Navigate to **Daily** > **Financial Aid** > **Export Data > COD**. The COD Export Wizard is displayed.
2. The default response type selected for the **Rpt Entity ID** is chosen by the system, with an option for the user to override this choice. The **Full Response** type includes all the data elements that were sent by the school plus the rejected data elements and reason codes. The **Standard Response** Type only includes the rejected data elements and the reason codes.



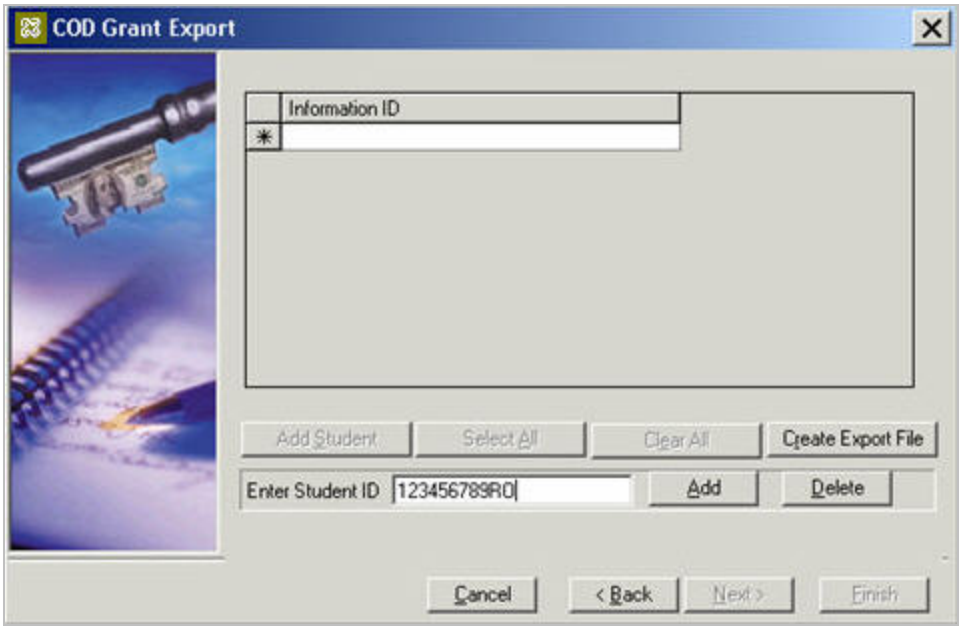
3. Select the desired **FA Award Year** and **Campuses** options.
4. Select **Create File** or **Regenerate File** from the **File Type** options.
5. Click **Create File** to create the **COD** file. A copy each in the **Campus** and System EDE Folders. Once the file has been successfully created, a report will be presented that will contain the extracted student's information.
6. The **Grant Options**, **Grant Types to Process**, and **Direct Loan Options** selections are mutually exclusive. Proceed to the Grant Options, Grant Types to Process, or Direct Loan Options sections below.

Grant Options

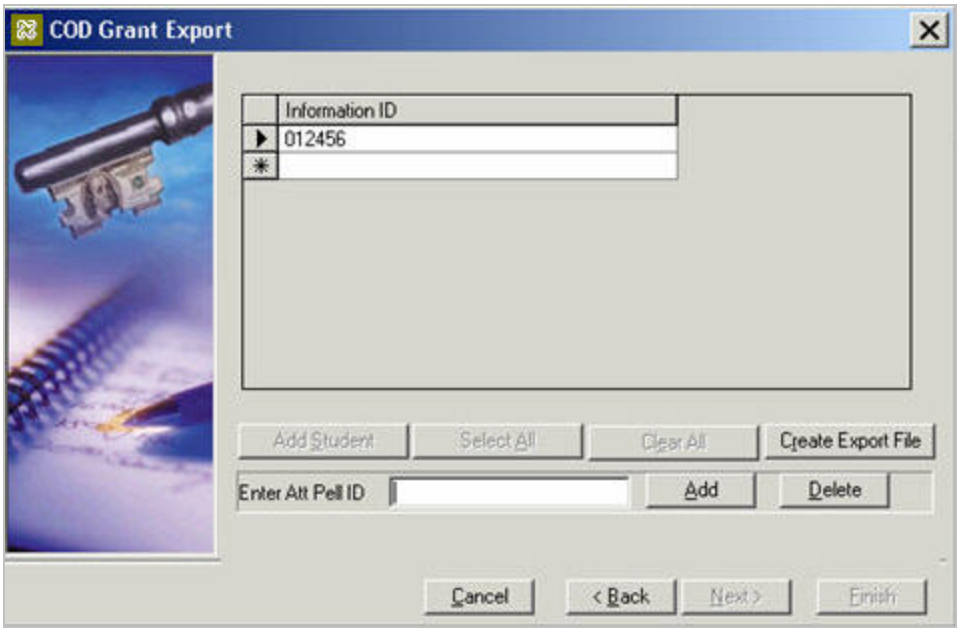
1. If **Data Request** is selected from the **Grant Options** section, select the applicable data request type for Pell, ACG, or SMART fund source. The options are *Multiple Reporting*, *Reconciliation Record*, *Statement of Account*, or *Year to Date* for each of the fund sources listed. Once you have made your **Data Request** selection for the applicable fund source, a message asks if you want to proceed with the selected data request. The **Identifier Changes** option is not available in conjunction with the **Grant Options**. Click **Yes** to continue or **No** to return to the form.
2. The **COD Grant Export** form is displayed next and contain only the fields that are needed to process the **Data Request** that you selected in the previous form. The illustration shows the fields needed for the *Pell Data Request - Multiple Reporting* selection. When the *Reconciliation Record, Statement of Account, or Year to Date* data request options are selected, this form does not present the **Origination Options** field. Click **Next >** to proceed.



3. If *Multiple Reporting* was selected with *Selected Originated Students* or *Selected Disbursed Students***Origination Options**, you can enter each student that had a multiple reporting request. If the **Enter Student ID** text box is *enabled*, enter the student's SSN and Name code (first two digits of the Last Name) for at least one student. Use the **Add** and **Delete** buttons to add or remove students.



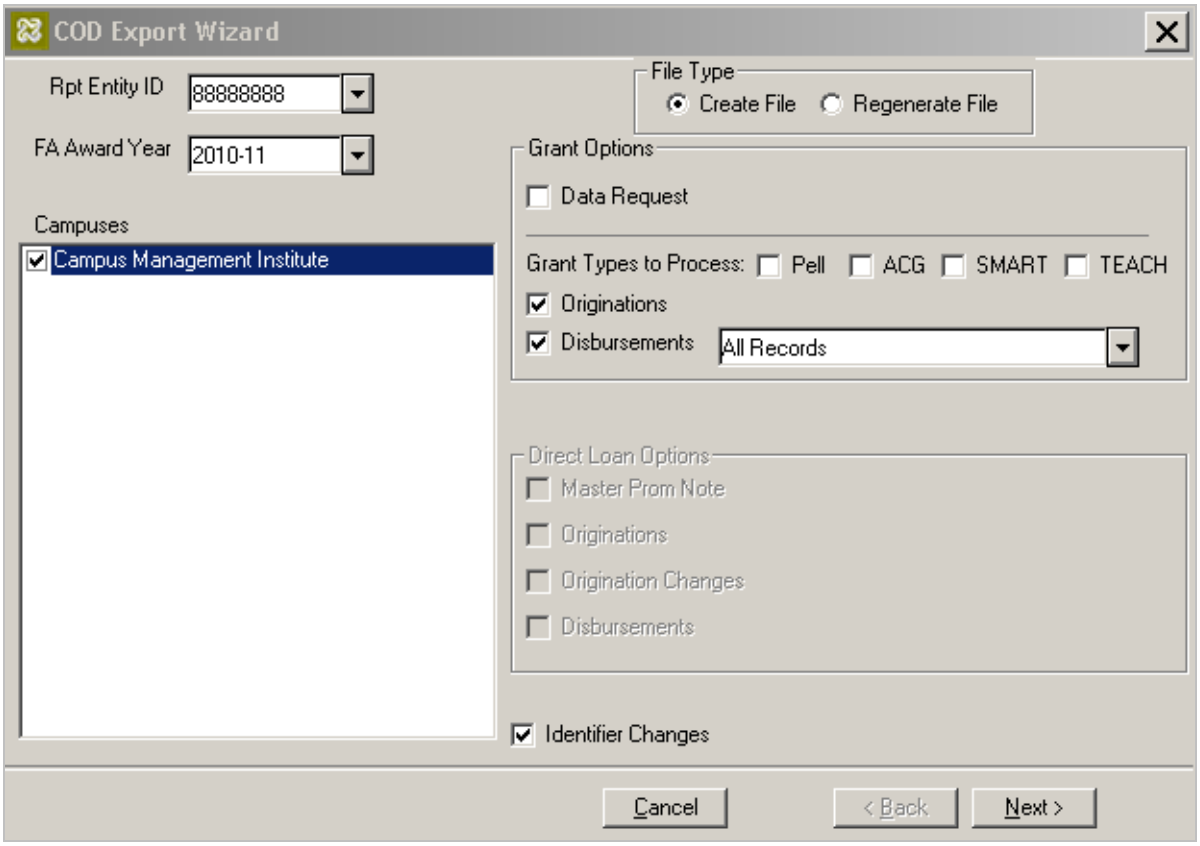
Note: If the *Originated Students for Selected Institutions* or *Disbursed Students for Selected Institutions***Origination Options** are selected, enter the institution code (s) for the multiple reporting record. In CampusNexus Student, this is the Attending Pell ID.



4. Click **Create Export File** to create the export file.
5. Click **OK** on the confirmation message.
6. Click **Finish** to return to the initial COD Export Wizard form.

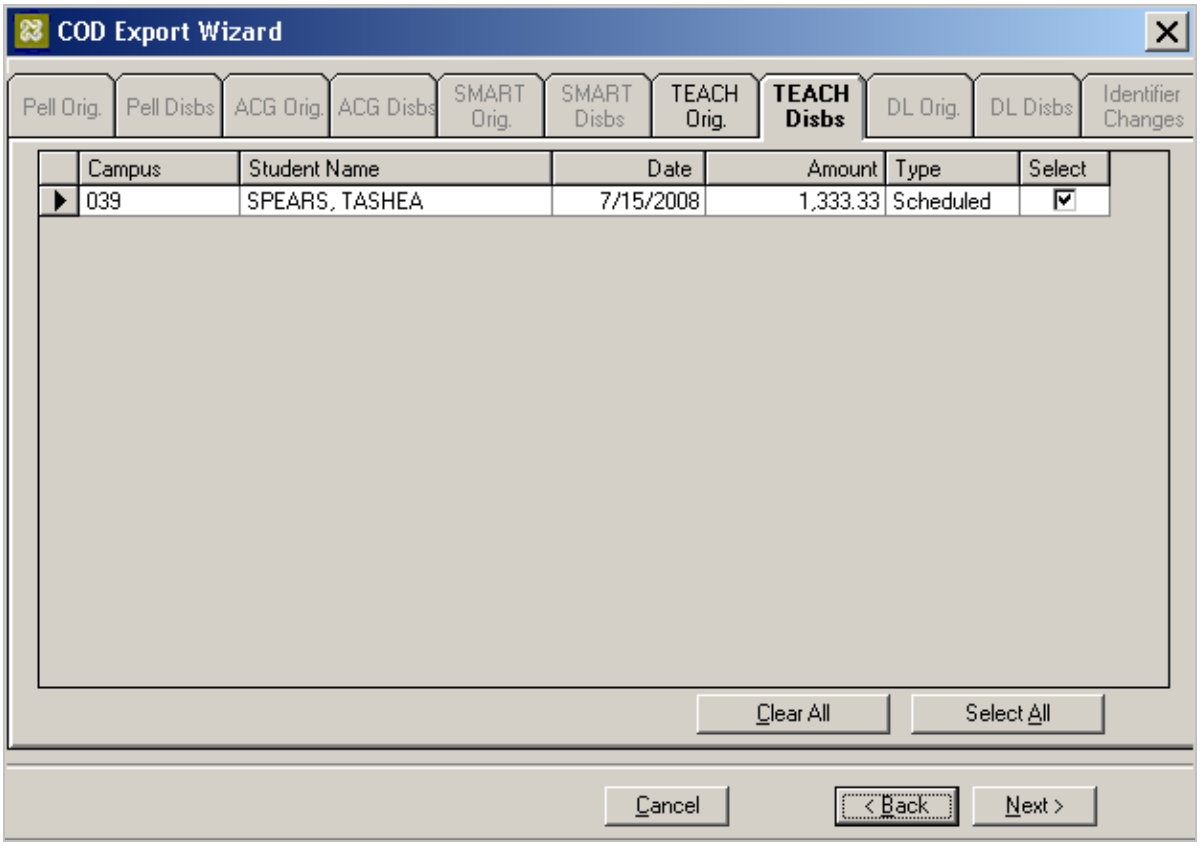
Grant Types to Process Option

1. The **Grant Types to Process** section offers **Originations** and **Disbursements** export options for **Pell**, **ACG**, **SMART**, and **TEACH** loans. **Identifier Changes** can also be selected. The fund sources can be exported all at once or separately, depending on your **Grant Types to Process** selection.



2. If the **Disbursements** option is selected, you can choose one of the following options: *All Records, Adjustments and Paid Disbursements, or Select by FA Disbursement Batch*. Once you have made your disbursement selection, an information message will appear letting you know which extract records will be gathered. Click **OK** to proceed.

3. The records for the selected **Grant Types to Process** options appear in the *enabled* tab(s). For example, if you opted to extract Pell origination, a list of students meeting the selection criteria for Pell is displayed in the **Pell Orig.** tab. The illustration demonstrates that **Pell**, **ACG**, **SMART** and/or **TEACH** grant(s) were selected for **Originations** and **Disbursements**, as well as **Identifier Changes**.

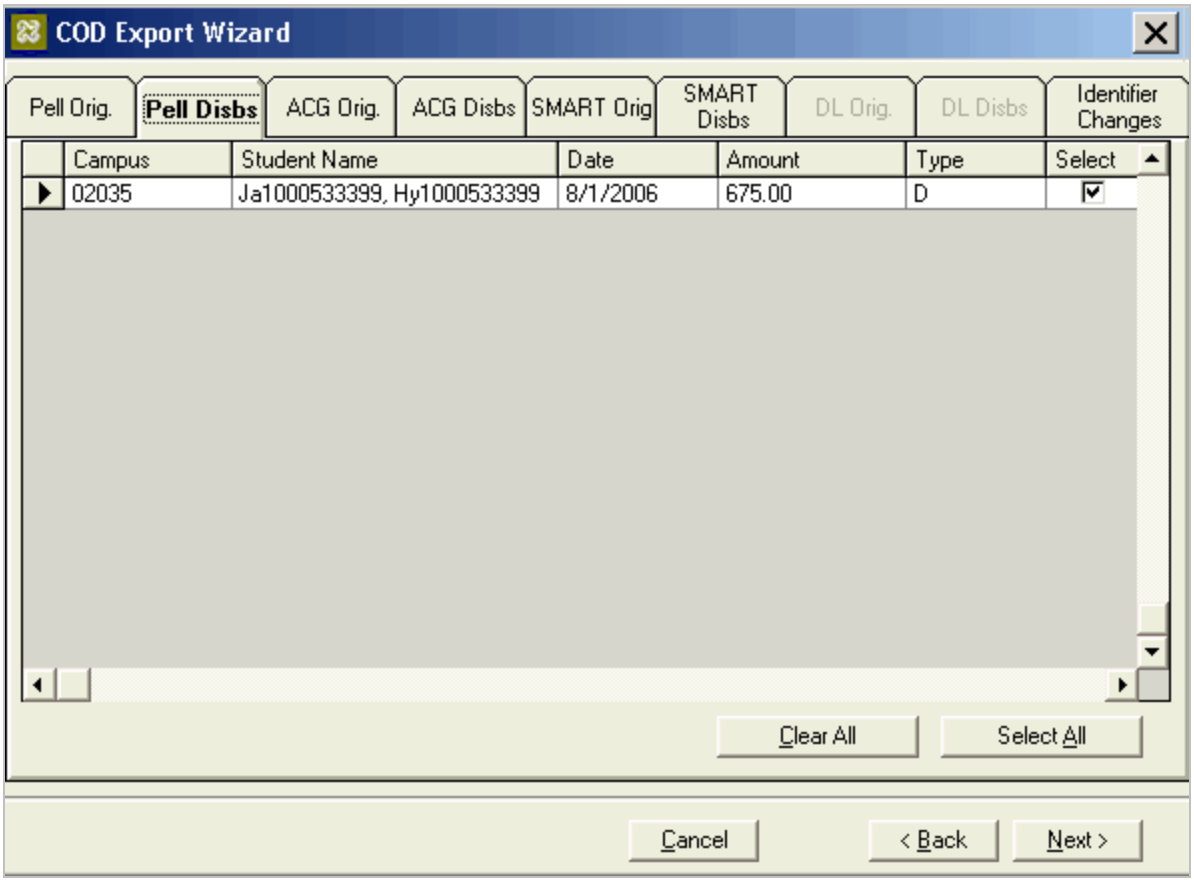


4. The **Validated** column in each row contains a **Yes** and a check mark is displayed in the **Select** check box for students with valid data to extract; otherwise, a **No** is displayed in the **Validated** column, and the check mark does not appear in the **Select** check box. If there are validation issues,CampusNexus Student displays them in the **Validation** comment box. You can select the **Validate** button, which will cause the system to display the student packaging award form. If all validation issues are solved for the student, CampusNexus Student places a **Yes** in the **Validation** column and a check mark in the **Select** check box for the student.

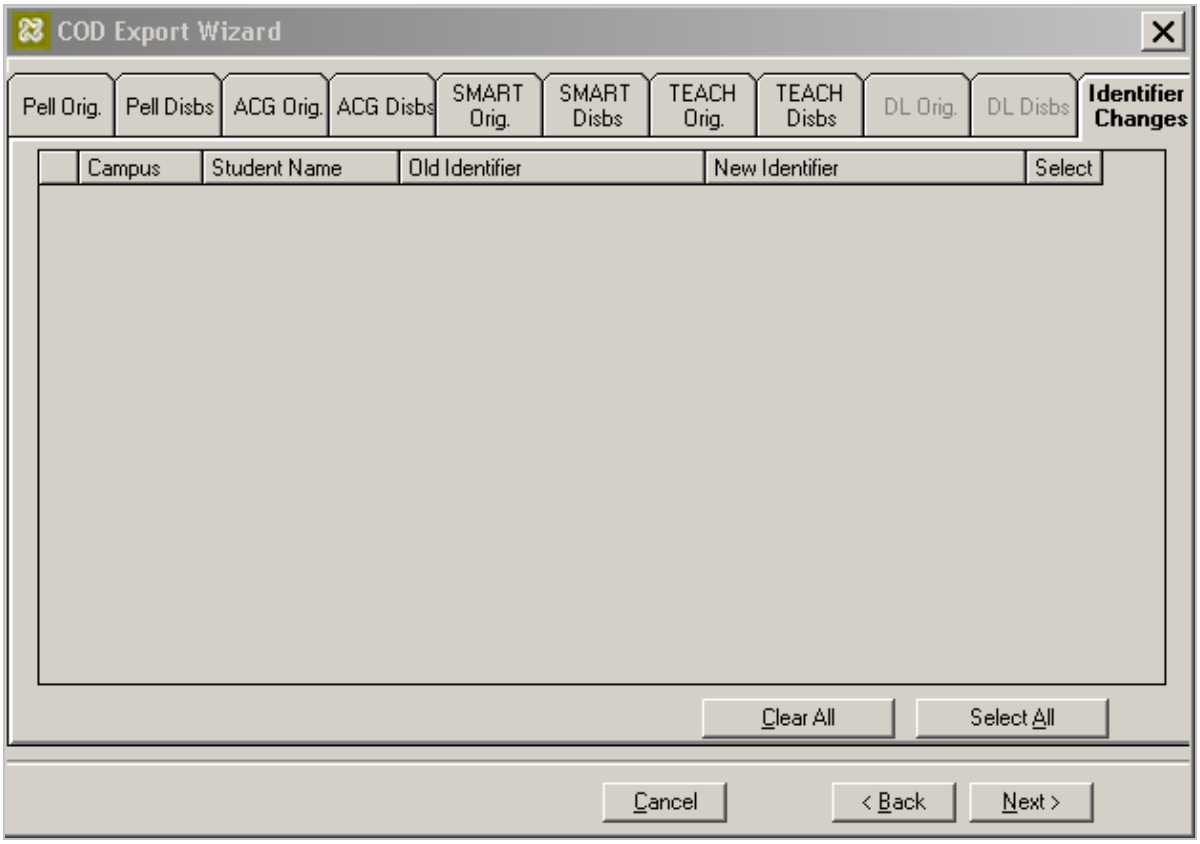
   Note: Only students with a check mark in the **Select** check box are exported.

5. You can use the **Clear All** button to exclude all records listed, **Select All** to include all records listed, or add students by clicking **Add Student**. If you select **Add Student**, you are prompted to enter the student's SSN number. CampusNexus Student adds the student and validate it if there is a student record that matches the SSN, Campus (es) selected and Award Year.

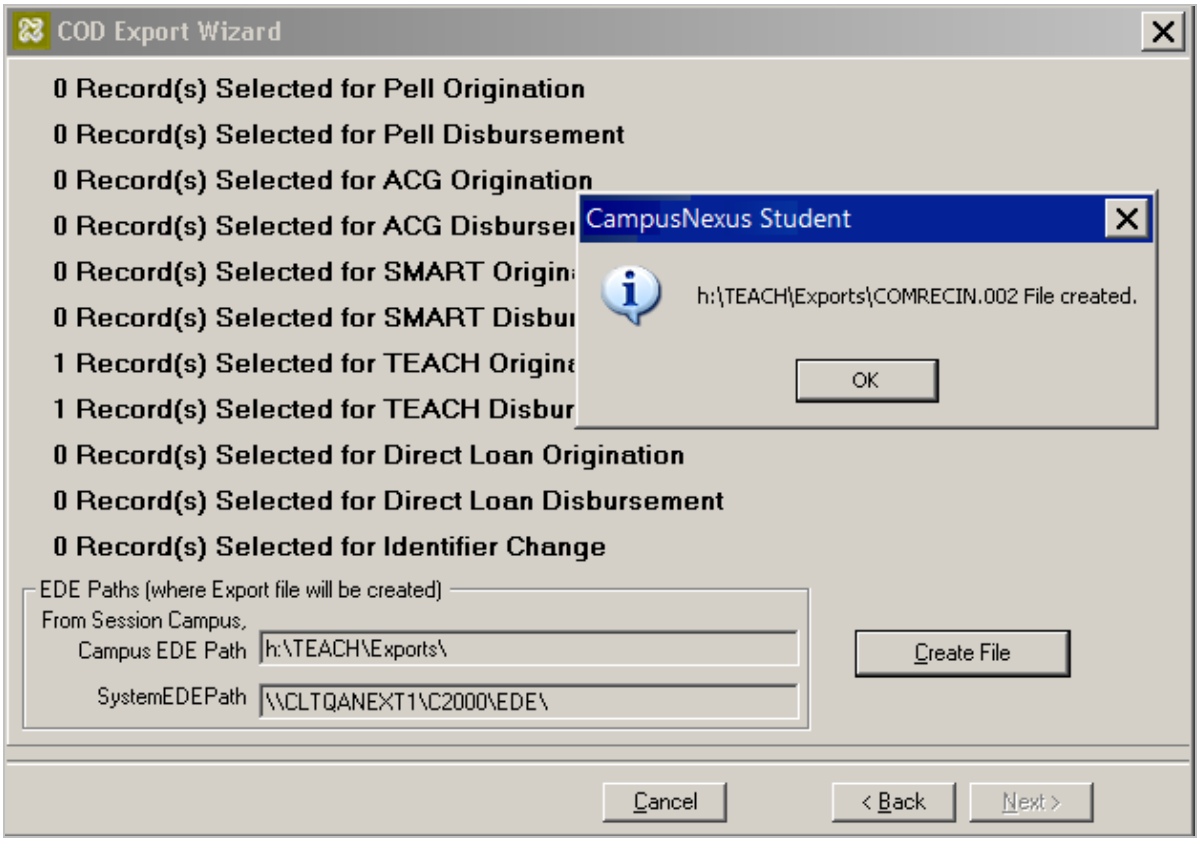
6. The **Pell Disbs** tab contains different fields for the Pell disbursements, but only the records that contain a check mark in the **Select** column will be exported.



7. The **Identifier Changes** tab contains the following fields, and also needs a check in the **Select** field.



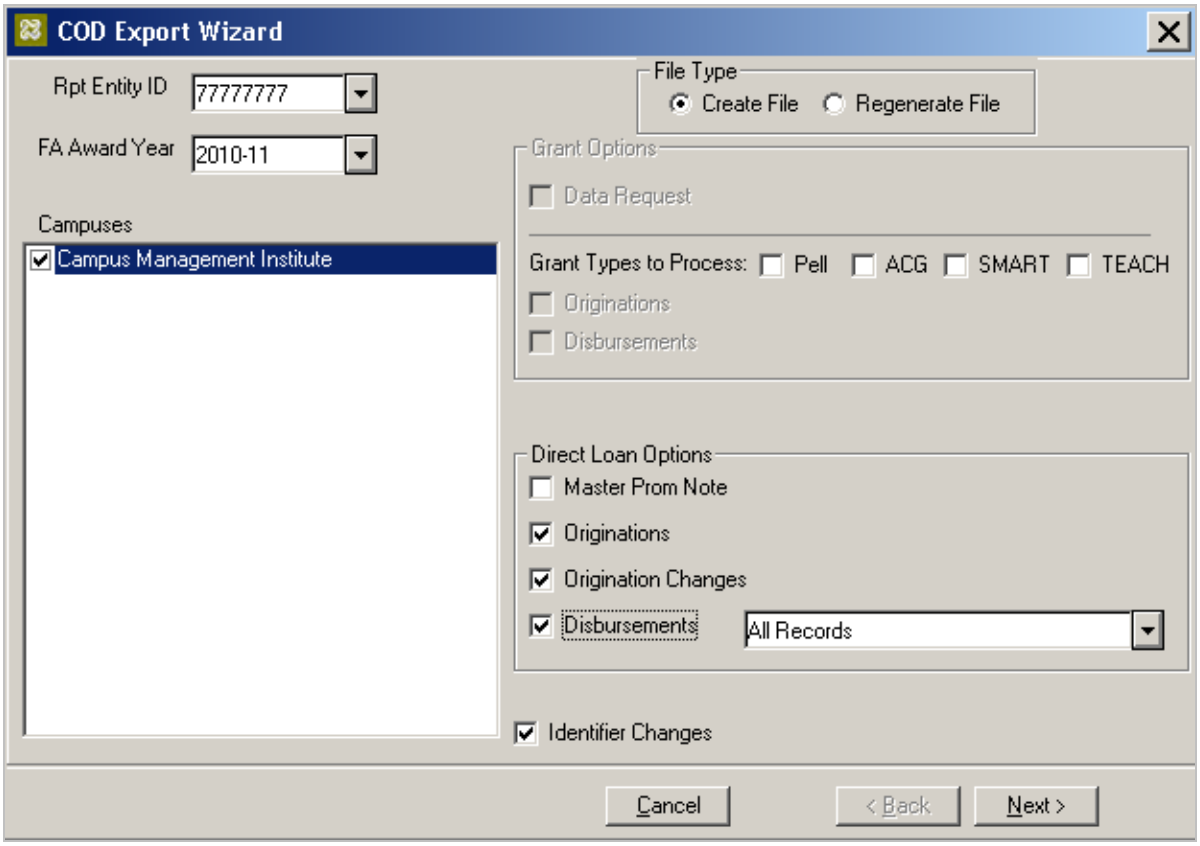
8. When **Next** is selected, a page is displayed listing information on the number of records of each loan category that have been selected for export. Select the **Create File** button. The system will present a confirmation message when an export file has been successfully created.



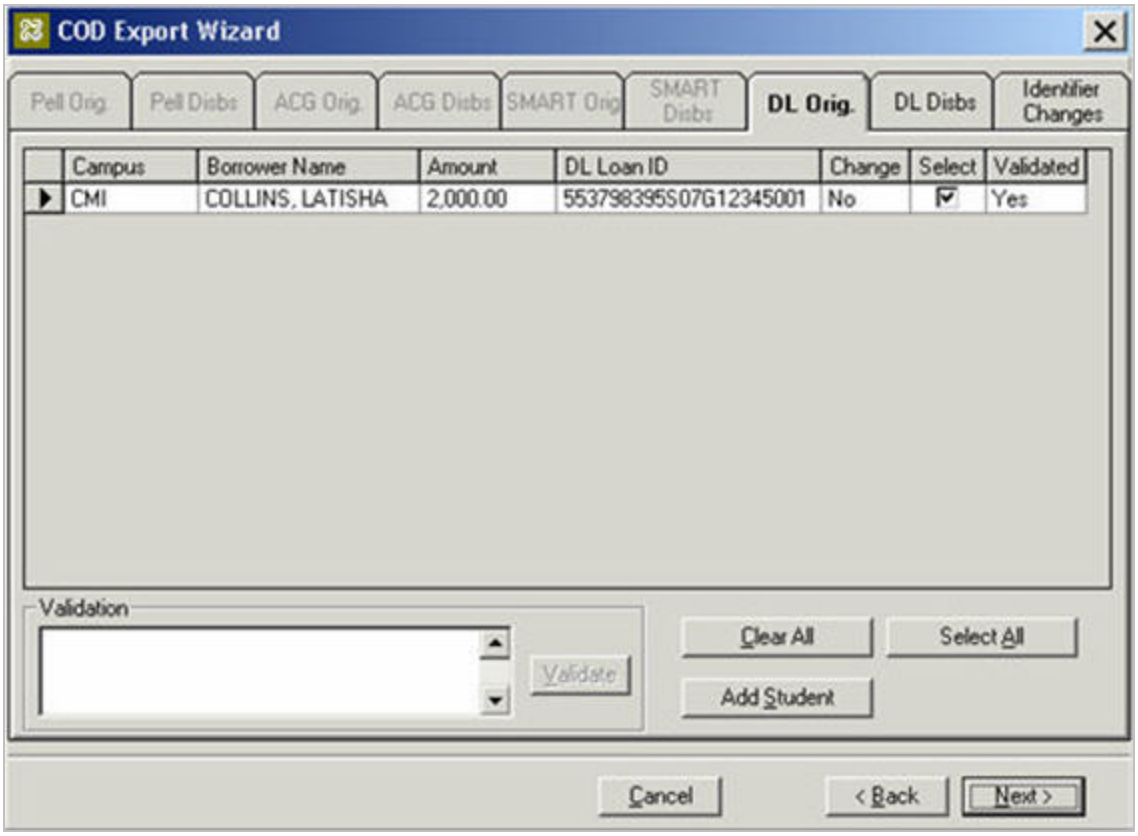
Direct Loan Options

1. If the **Rpt Entity ID** is for direct loans, then the system will enable the **Direct Loan Options** upon selecting the **Rpt Entity ID**.

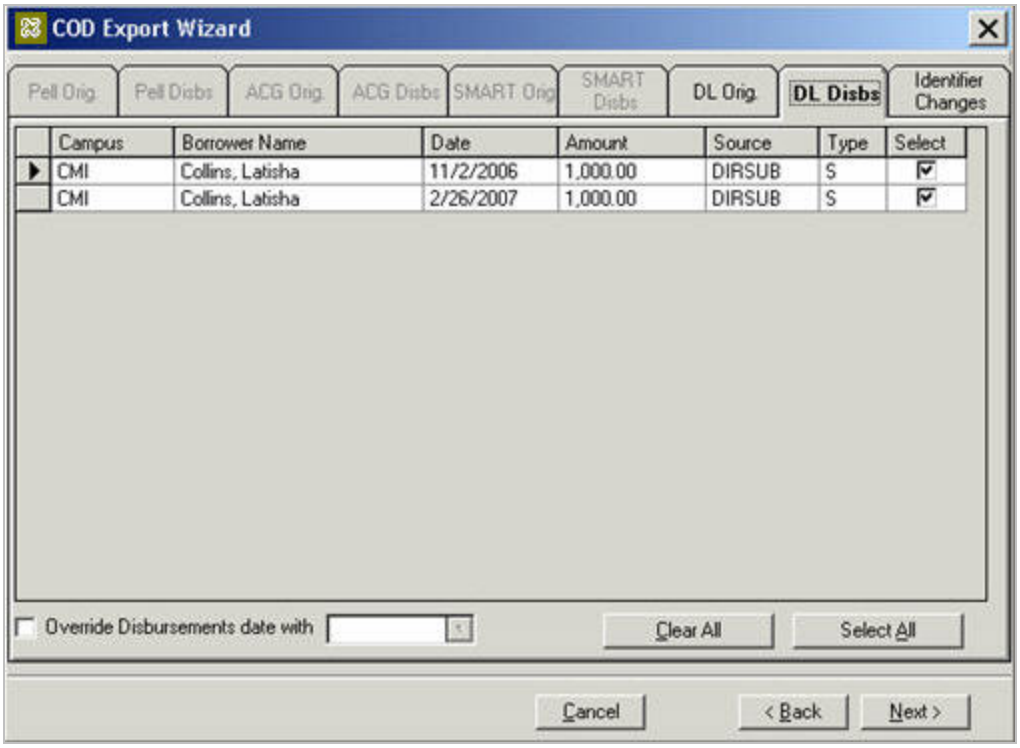
   Note: The Manual Dependency status/model, which allows a Direct PLUS loan to be awarded to a student's parent without requiring the student to complete a FAFSA or require the institution to have a valid ISIR on file for the student, can now be used for export of the Direct parent Plus loans to COD and for validation purposes.



2. Select one or more of the **Direct Loan Options**: Master Prom Note, Originations, Origination Changes, Disbursements, and Identifier Changes.
3. If you selected the **Master Prom Note** option, then proceed to the Master Prom Note instructions below.
4. If you selected **Originations**, **Origination Changes**, or **Disbursements,** and/or **Identifier Changes**, then click **Next >**. The **Disbursements** options are: *All Records, Adjustments, Date Changes and Paid Disb., or Select by FA Disbursement Batch*.
5. The applicable **Direct Loan** and/or **Identifier Changes** COD export tab(s) will be enabled. The user selected originations, origination changes, disbursements and identifier changes in this example.



6. You can use the **Clear All** button to exclude all the records listed, **Select All** to include all the records listed, or add students by clicking **Add Student**. If you select **Add Student**, you are prompted to enter the student's SSN number. CampusNexus Student then adds the student and validate if there is a student record that matches the SSN, Campus(es) selected, and Award Year.
7. The **DL Disbs** tab contains fields for the **Direct Loan** disbursements, but only the records with the **Select** check box selected are exported.

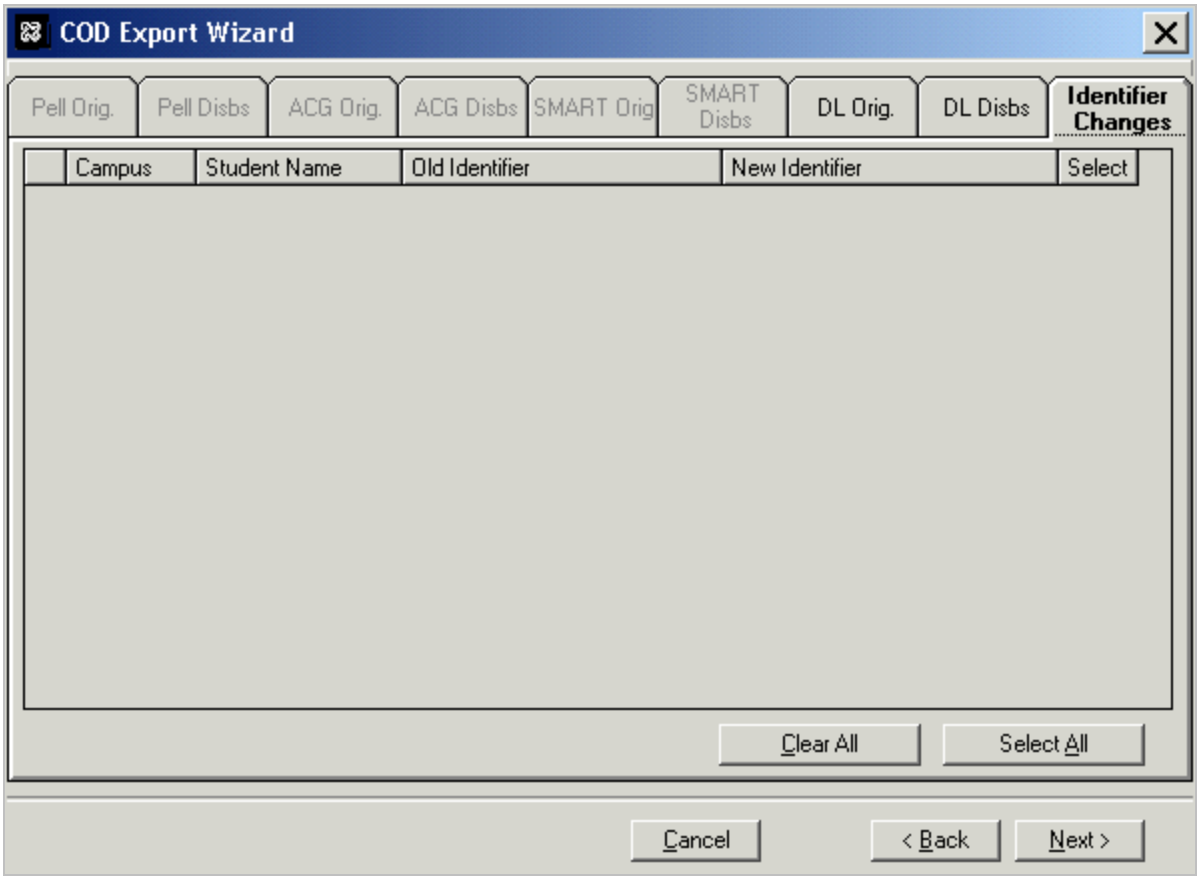


8. Optional: Select the **Override Disbursements date with** check box and select a date from the drop-down list.

   Note: If this option is selected, the Scheduled Disbursement tab in View > Financial Aid > Awards displays the updated disbursement date in a column labeled **Override Disb. Date**. See Scheduled Disbursements tab.

9. Select **Next** to proceed, **Back** to return to the previous form, or **Cancel** to disregard changes.

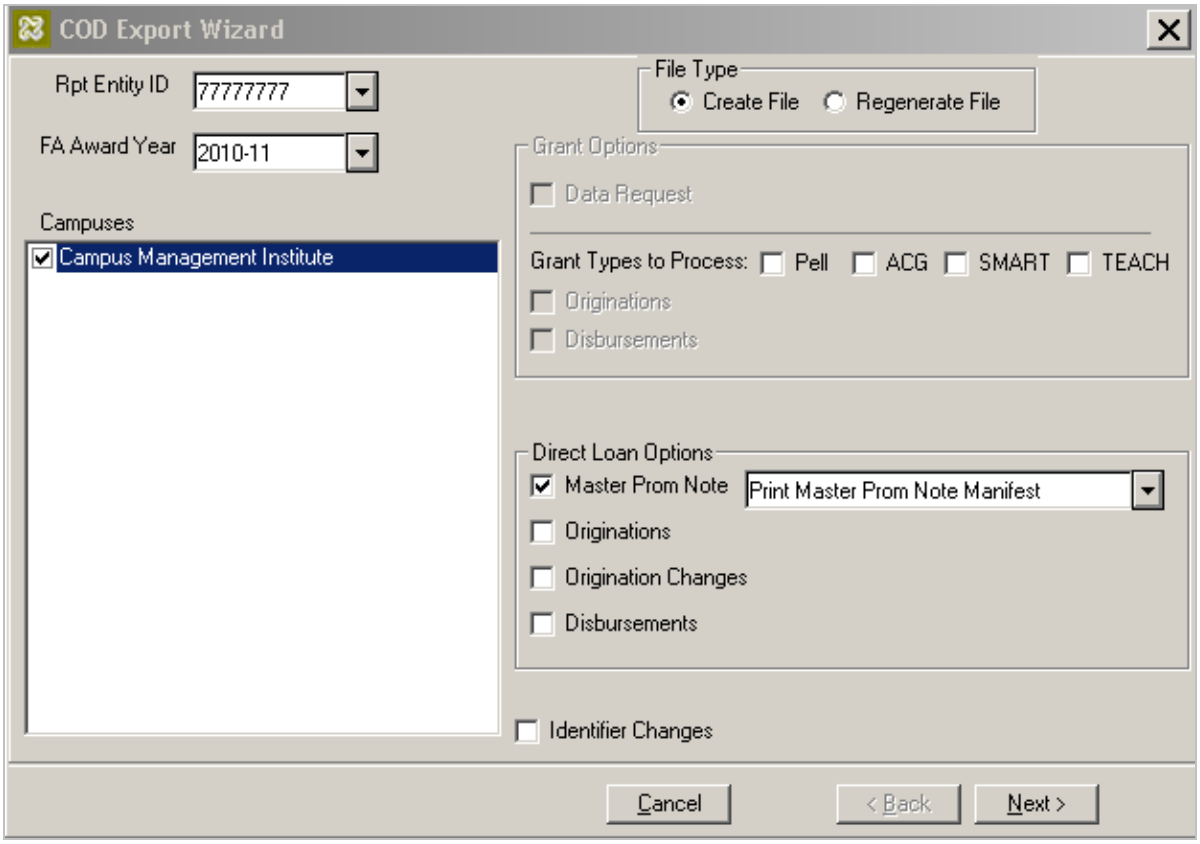
10. The **Identifier Changes** tab contains the following fields, and also need a check in the **Select** field to be exported.



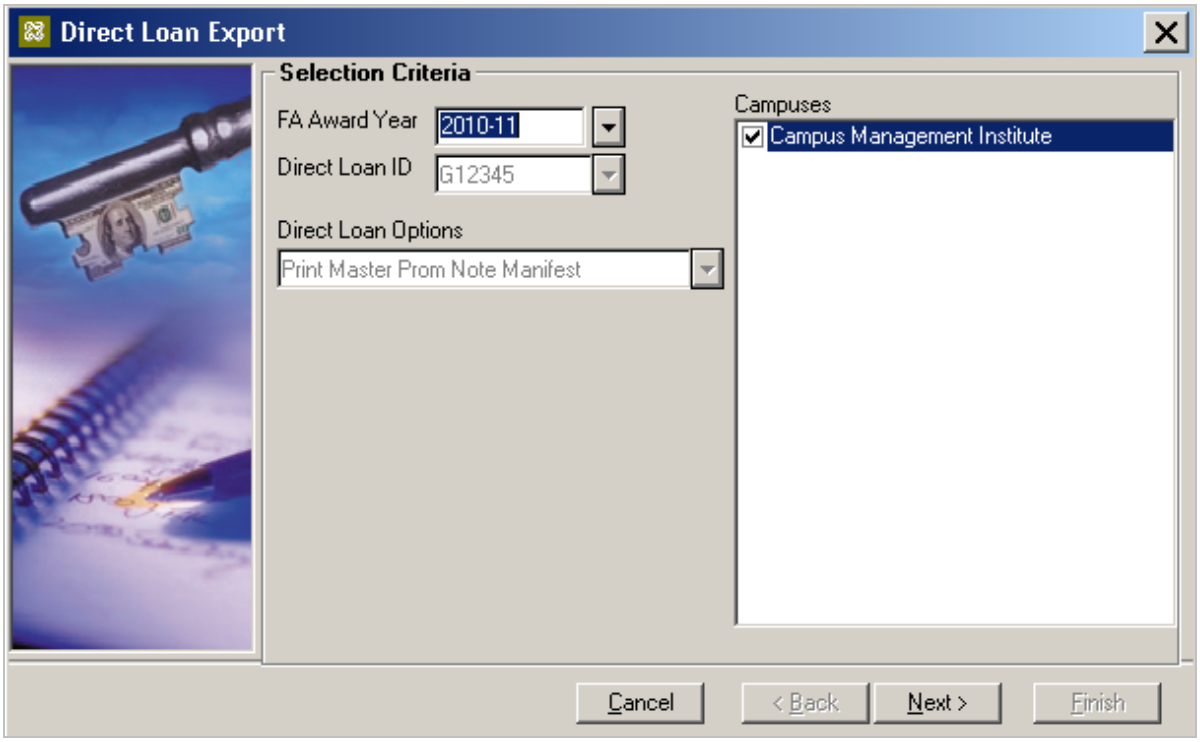
11. CampusNexus Student displays a message containing the number of originations and disbursements that can be exported, along with a **Create File** button, and the EDE paths for the campus and system. Click **Create File.** A confirmation message is displayed.

Master Prom Note

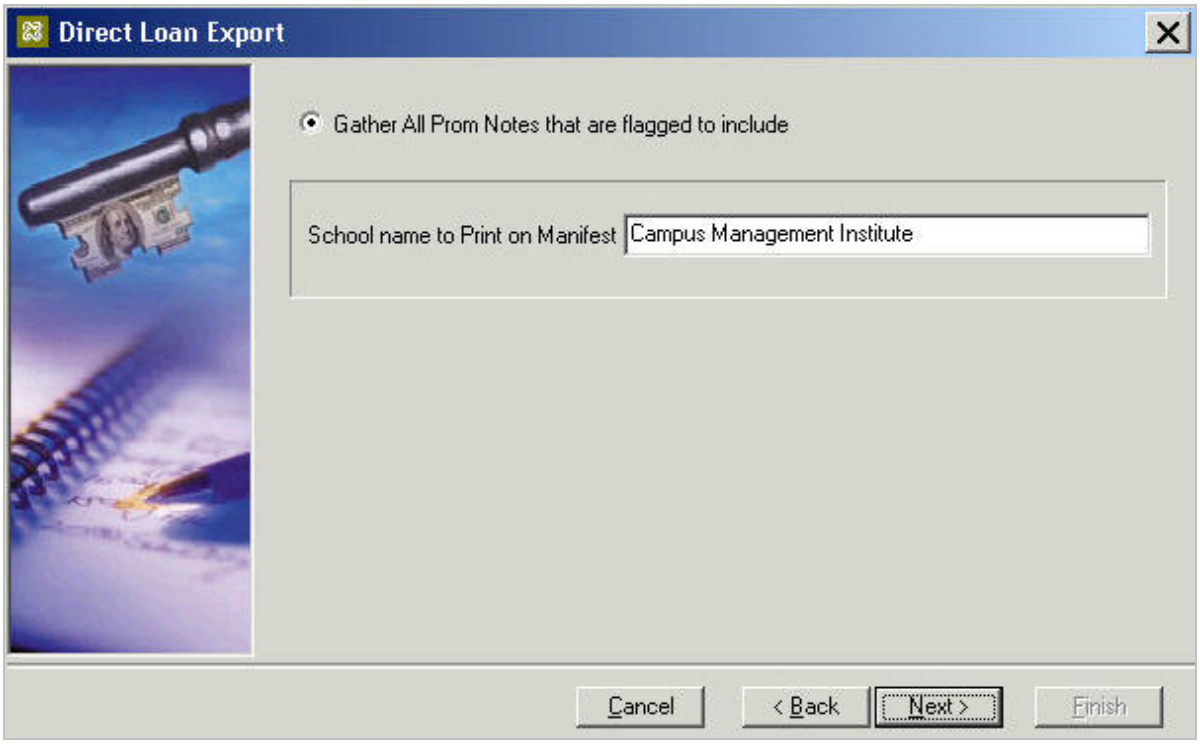
1. If you chose Master Prom Note, select the **Print Master Prom Note Manifest** or **Print PLUS Master Prom Note Manifest** option. You can alter the **FA Award Year** and **Campuses** selections before proceeding. Click **Next >** to proceed.



2. A message asks if you want to proceed with your selection. Click **Yes** to continue or **No** to return to the previous form.
3. The **Direct Loan Export** form is displayed.

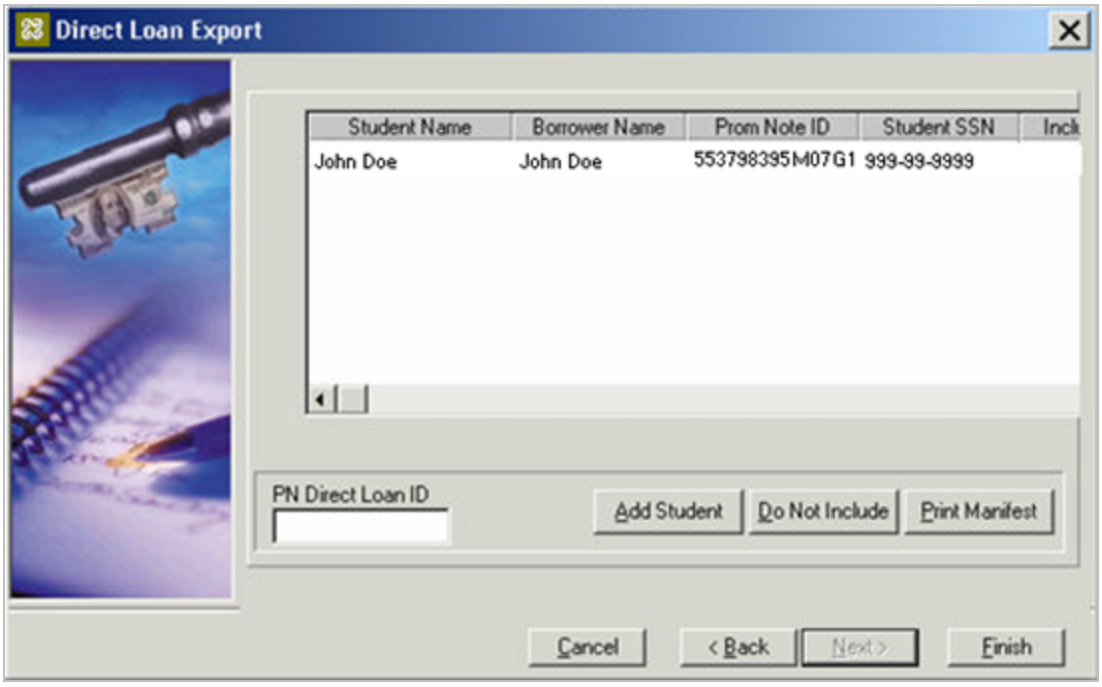


4. Click **Next** to proceed.



5. If there are loans selected in the Manifest, they will appear in the next form; otherwise, a message will appear stating that there are no loans in the Manifest and you will be returned to the previous form. Use the **Add Student** button to add students to the Manifest, **Do Not Include** button to remove students from the Manifest, and **Print**

Manifest button to print the manifest. Click **Next >** when you are ready to export.



6. Click **Print Manifest** to view the Manifest.

I hereby certify that each borrower named on the enclosed notes/disclosures is accepted for enrollment on at least a half-time basis and is making satisfactory progress in a program that is eligible for the loan type(s) awarded. I certify that each student is an eligible borrower in accordance with the Act. I further certify that each borrower's eligibility for a Pell Grant has been determined, that each borrower is not incarcerated, and that each borrower has been determined eligible for loan(s) in the amount(s) certified. I further certify that the disbursement schedules comply with the requirements of the Act and hereby authorize the Department of Education to adjust disbursement dates if necessary to ensure compliance with the Act. I further certify that, based on records available and due inquiry, each borrower has met the requirements of the Selective Service Act, that each borrower is not liable for an overpayment of any Federal Grant made under the Act, and that the information provided in the Borrower and the School sections of the promissory notes/disclosures (including information supplied in electronic format) is true, complete and accurate to the best of my knowledge and belief.

7. Click **Finish**.

Import Application Data

Note: Please access Regulatory Help for the latest content about FAFSA, ISIR, and COD processing.

Use this option to import Institutional Student Information Records (ISIRs) Error Reports and Signature Hold Files into the CampusNexus Student database. ISIR records are created as the result of FAFSA processing at the Central Processing System (CPS). Ordinarily, your school sends in new electronic FAFSAs or renewal FAFSAs for each student for each award year. When the CPS edits the FAFSAs, it accepts or rejects the data based on its editing criteria. When the FAFSAs pass the edit checks, an Expected Family Contribution is calculated and an ISIR record is created. Usually, you will send batches of FAFSAs to the CPS. CPS, in turn will send matching batches of ISIRs back to your school. If some of the FAFSAs do not pass the edit checks, the corresponding ISIR records will contain reject codes. The rejected data must be corrected and resubmitted to the CPS.

Beginning in FA Award Year 2005-06, schools can import multiple ISIRs as well as individual ISIRs. The process is slightly different. For import details, please refer to Import Application Data#Importing_ISIR_files_*prior*_to_FA_Award_Year_2005-06 or Import Application Data#Importing_ISIR_files_*for*_2005-06_and_later, as applicable.

Sometimes, there are more ISIRs returned than there were FAFSAs sent. A student may send in a paper FAFSA or an on-line FAFSA from the Internet with your school designated as an ISIR recipient. More than one school may receive copies of the same ISIR. In this case, CampusNexus Student can be set up to create new lead records for students whose FAFSAs are not already in your database.

CampusNexus Student verifies that the origination ID on the COD origination Record equals the transaction ID on the ISIR. This prevents issues where name changes result in the origination ID being different from the ISIR transaction ID due to the timing of the ISIR being sent, the name being changed in the database, and the Pell record being scheduled. Once an ISIR Transaction ID is assigned to a student by the issuing of an ISIR from the Department of Education, the student must be identified by this ID for the rest of the year. Therefore, the origination ID must equal the ISIR transaction ID in cases where spelling errors, typos, or name changes are relevant. Additionally, users still need to make corrections to an ISIR through the ISIR corrections option and to the student master when necessary.

The file types you can import with this option are ISIRs and Error Report Files. An error file is sent from the CPS to inform the school of any processing errors that took place for any application files submitted by the school. An error file may inform the school that an entire batch was rejected or any detail records that were rejected. If you import an error report file, CampusNexus Student will provide a report to list the contents of the file.

In conjunction with the Automatic Document Scheduler feature, document schedules based on "Pre-Enrollment" or "Enrollment" will be evaluated when ISIRs are imported. If the student's data matches the specified criteria for a document schedule where the criteria includes at least one of the ISIR data items (Comment Codes, SAR C flag, or Dependency Status), all documents attached to the document schedule that are not already scheduled will be scheduled for the student.

The program updates the Origination status to R when importing an ISIR where the ISIR Transaction ID is greater than the ISIR Transaction ID on file in the student's RFMS record, or the EFC is different than the EFC on File, AND the origination record is currently in an "E" (rejected) status. This occurs only when the Use COD flag is set to YES in Setup > Financial Aid > Pell.

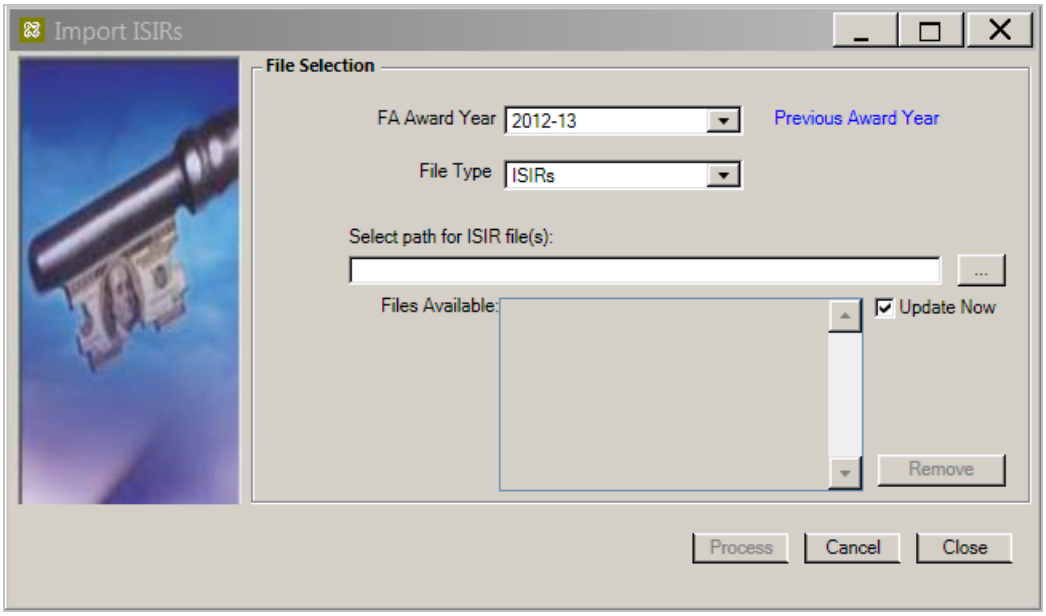
If a batch-level error report is being imported, an update will occur to the FA Batch Export Import table reflecting that the batch was rejected. If a record-level error report is being imported, each record in the file will update the CPS Status in the student FAFSA table reflecting that the FAFSA was rejected.

Beginning with the 2005-06 award year, ISIR files can be imported in batches. A new form is available when you select **FA Award Year 2005-06** or later.

When importing ISIRs, CampusNexus Student determines if the student's grade level is '1st year never attended college', and updates the student's Academic Year sequence 1 to indicate that the student is a 'First Time Borrower'.

To import ISIR files for FA Award Years 2012-13:

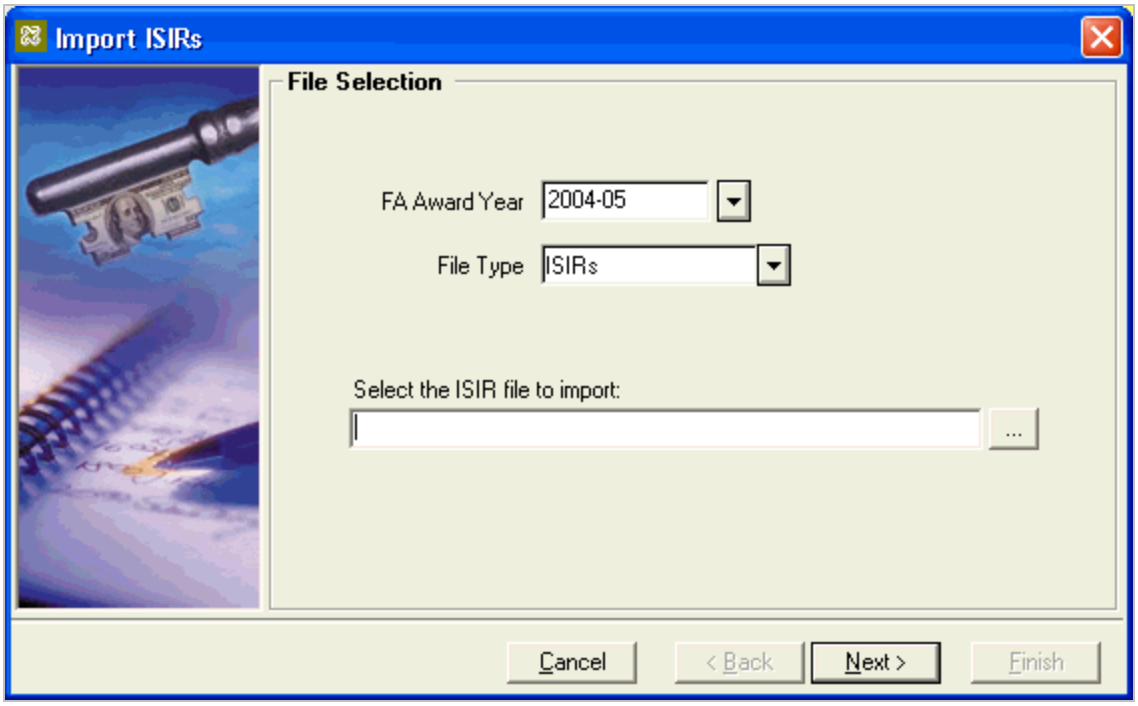
1. Navigate to **Daily** > **Financial Aid** > **Import Data** > **Application Data**. The Import ISIRs wizard is displayed.
2. To select a previous award year, click **Previous Award Year**.



3. Select the **File Type**. File types include **ISIRs** and **Error Report File**.
4. Select path for the ISIR file(s) by clicking ... and browsing to the location at which the file resides. A list of files populates the Files Available text box.
5. Select the file you want. The file name to look for is **EAPS##OP.nnn** where ## is the award year and nnn is a sequential number.
6. Click **Process**. The file is processed accordingly.

To import ISIR files for FA Award Years prior to 2005-06:

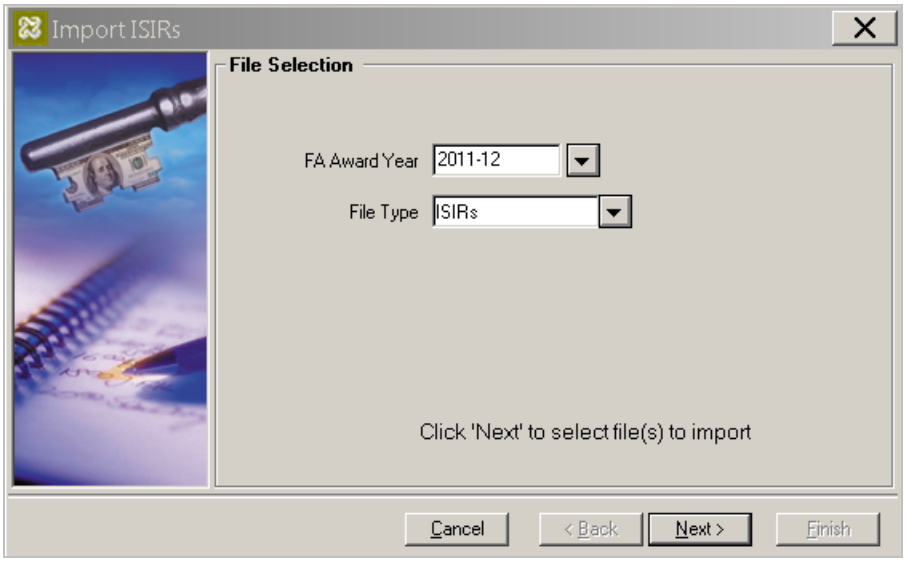
1. Navigate to **Daily** > **Financial Aid** > **Import Data** > **Application Data**. The Import ISIRs wizard is displayed.
2. Click **Previous Award Year**. The Import ISIRs dialog box is displayed.



3. Select the **FA Award Year** to be processed.
4. Select the **File Type**. File types include **ISIRs** and **Error Report File**.
5. Select the **ISIR file to import**. The file name to look for is **EAPS##OP.nnn**, where ## is the award year and nnn is a sequential number.
6. Click **Next**. If you have selected a file that has already been imported, you will get a warning message so indicating and a **Yes**/**No** prompt to overwrite the existing batch.
7. Click **Yes** or **No** as required. CampusNexus Student displays the list of students included in the ISIR batch file.
8. Click **Finish** to complete the import procedure. A confirmation message is displayed. Click **OK**.
9. CampusNexus Student responds with another message indicating that the ISIR report is printed. The report is displayed by the report previewer. This may take a few seconds. When you see the preview on your screen, click **Print**.
10. Click **OK** again to acknowledge the "report printed" message. CampusNexus Student closes the Import ISIR File wizard. A sample portion of one page of the ISIR report is shown at the bottom of this page.

To import ISIR files for FA Award Year 2005-06 and later:

1. Navigate to **Daily** > **Financial Aid** > **Import Data** > **Application Data**. The Import ISIRs wizard is displayed.
2. Click **Previous Award Year**. The Import ISIRs dialog box is displayed.



3. Select the **FA Award Year** to be processed. The year must be later than 2005-06.
4. Select the **File Type**. File types include ISIRs and Error Report File.
5. Select the **ISIR file to import**. The file name to look for is **EAPS##OP.nnn**, where ## is the award year and nnn is a sequential number.
6. Click **Next**. If you have selected a file that has already been imported, you will get a warning message so indicating. Otherwise, the **2005-06** (or other FA Award year) form is displayed. This form displays the path selected for ISIRs, if one has already been set. If not, click the **Search** tool to the right of the Select Path field to choose a drive and folders into which the system shall import the files.
7. All files available in the chosen folder are displayed in the Files Available field. Select a file and click **Remove** to prevent the system from importing a particular file. If you remove these files from the current batch, they are displayed the next time this form is opened.
8. Select **Update Now** to process the selected files immediately. If this box is not selected, the default setting, processing will occur during school-defined off hours, typically at night.

   WARNING! We recommend that you do not click **Update Now** unless you need to work with the student(s) today, or you are updating at the end of your shift. **Update Now** will tie up your workstation for the duration of processing.
9. Click **Process** to begin processing. Click **Print** to generate an ISIR Import report. Processing and printing functionality is the same as in previous in previous years.
10. Use the procedure described above to import the **Error Report File**. The file name to look for is **FDRE##OP.nnn**, where ## is the award year and *nnn* is a sequential number.

Note: If the 'Round all Disbursements to whole dollars' check box on the Fund Source Configuration form is cleared and the registry key to allow Pell Cents is enabled, then the exact amount of cents is displayed and saved for the Pell origination amount. The Pell origination amount is processed and saved with the properly calculated amount of cents in regards to Year-Round Pell Additional Eligibility Indicator.

To import Signature Hold Files:

Note: The Department of Education will discontinue Signature Hold Files beginning with the 2005-06 FA Award Year. Functionality will be the same for previous years.

1. Navigate to **Daily** > **Financial Aid** > **Import Data** > **Application Data**. The Import ISIR File wizard is displayed.
2. Click **Previous Award Year**. The Import ISIRs Previous Award Year dialog box is displayed.
3. For **FA Award Year**, select a year before 2005-06.
4. Select **Signature Hold File** File Type.
5. Select the **ISIR file to import**. The file name to look for is HOLD*nn*OP.
6. Click **Next** to show a detail report and a form with the list of students
7. Click **Finish** to complete the operation.

COD Import (2010-11 and prior award years)

This form is used to provide information required by the Common Origination and Disbursement (COD) program **for award years (AY) 2010-11 and earlier**.

Note: For information on changes made for Full Participants for the current year, including new edit codes, warning codes, and information about the legacy Pell and Direct Loan system, please refer to the FSA Technical Reference.

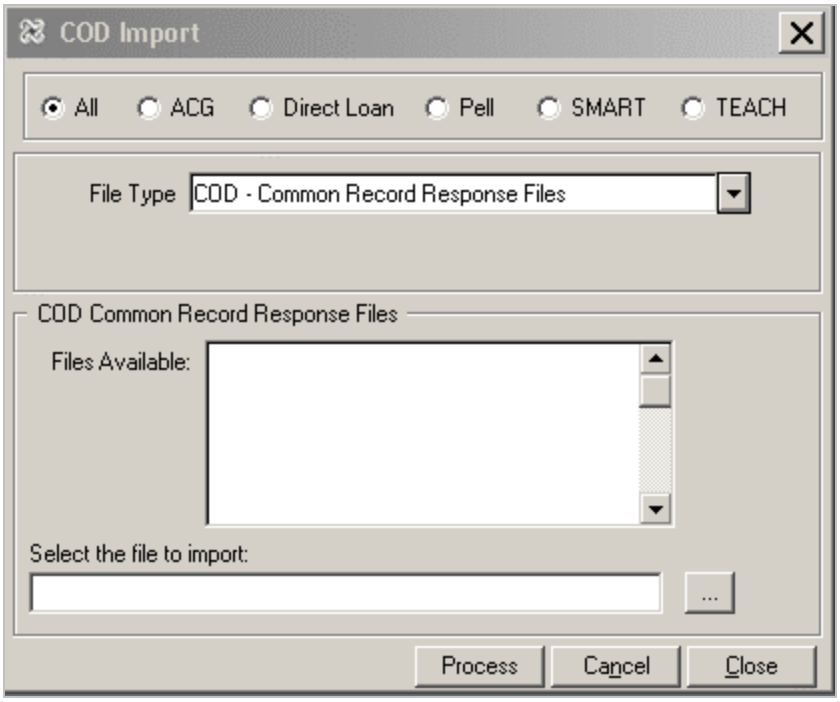
A Full Participant school can originate a loan, make changes to a loan, create disbursements, or change disbursements directly on the COD website. These actions on the COD website will generate a **Web Response** file that is sent to the school which can be imported.

Note: If the loan is not found, the disbursement information will not be added or updated.

CampusNexus Student will support and update the **Master Promissory Noteexpiration** data for **Direct Loan** awards, validate new message classes for 2008-09.

To import COD files:

1. Navigate to **Daily** > **Financial Aid** > **Import Data > COD**. The COD Import form is displayed.



2. Selecting **All** will allow you to select all files regardless of Award Type.
3. When the **Direct Loan** option is selected, you can select a Direct Loan **File Type**, or import **COD Common Record Response Files**.

   The Direct Loan import options are:

   - School Account Statement (SAS)
   - COD Generated Reports
   - YTD Rebuild
   - DL Entrance Counseling Results
   - DL Entrance Counseling Acknowledgement
   - MPN Discharge Report

- Expired MPN Report
- MPNs Due to Expire Report.

4. When the **Pell** option is selected, you can select a **Pell** file import, or import **COD Common Record Response Files**.

   The Pell import options are:

   - Electronic Statement of Account
   - Data Request Acknowledgement
   - Multiple Reporting Records
   - Year to Date Records
   - Reconciliation File Report
   - SSN/Name/DOB Change (ACG and SMART are included in this report)
   - POP/Pell Verification Status Report
   - Pending Disbursement List
   - Funded Disbursement List

   Note: When the Pell Award Year is 2009-10 or greater, the file type '**Funded Disbursement List**' will no longer be displayed as a Pell **File Type** option.

5. When the **ACG or SMART** option is selected, you can select an **ACG/SMART** file import, or import **COD Common Record Response Files**.

   The ACG and SMART import options are:

   - Electronic Statement of Account
   - Data Request Acknowledgement
   - Multiple Reporting Records
   - Year to Date Records
   - Reconciliation File Report
   - Pending Disbursement List

6. When the **TEACH** option is selected, you can select a TEACH file import, or import **COD Common Record Response Files**. The TEACH import options are:

   - ATS Note Acknowledgement - Award Year Specific
   - Multiple Reporting Records, School Account Statement
   - Pending Disbursement List
   - Inactive Grants Report
   - SSN/Name/DOB Change Report

7. You can select a **Receipt** file or **Response** file to import. In the list box titled **Files Available**, the system displays files named COMRECOP from the current directory. The system will only be able to import a response file one time, and import of a receipt file can be done multiple times. For the chosen file, the reporting entity ID in the file must match one that corresponds to a Campus for which you have access.

8. The system searches the database and updates loans or disbursements as necessary. When the process is completed a message is displayed indicating that the file has been imported.

   Note: COD edit codes associated with this import are described in this report.

9. Upon completion, reports are available to summarize results.

10. The **COD Import Notification** report summarizes the records that were imported.

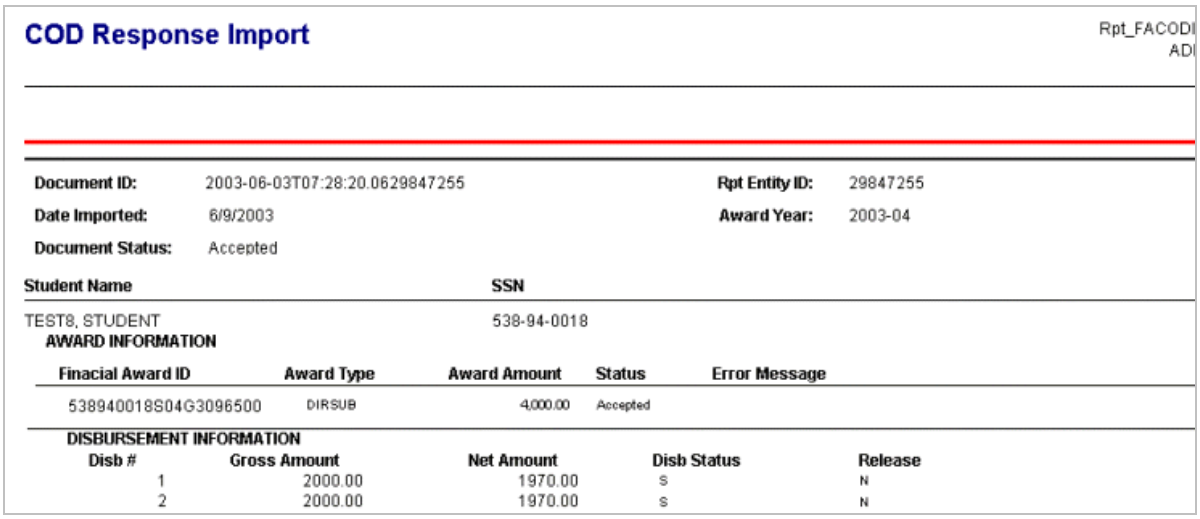
11. The **COD Import Reject** report summarizes the records that were not imported. If the system determines that

there is no student corresponding to the information in the document, the student information is presented on the COD Import Reject report labeled "No Student Found". If the system determines that there is no existing loan corresponding to the information for the student contained in the document, the loan and disbursement information is presented on the COD Import Reject report labeled: "No Loan Found for Student."

Three reports to help manage Master Promissory Notes are available:

- MPN Discharge Report
- Expired MPN Report
- MPNs Due to Expire Report

12. Run the COD Response Import report by navigating to **Reports > Financial Aid > COD Response Import** report. This report displays information on the import of response files like the one shown below.



COD Response Import

Import Direct Loan

The U.S. Department of Education's (ED) Common Origination and Disbursement (COD) System sends several direct-loan-related file types to your institution in response to files you export. Use this form to import these file types into CampusNexus Student. The files typically reside in the directory on your system that is shared with your EDconnect software. EDconnect is used to receive the files from ED. The default directory must be configured.

Direct Loans are processed through the COD Import wizard.

The file types that you can import using this form include ("yy" in the file name represents the award year):

- Common Record Response Files (COMRECOP, CRAAyyOP, CRDLMYOP, CRDLyyOP)
- School Account Statement (DSDFyyOP)
- COD Generated Reports
- YTD Rebuild (DLRBLDOP)
- DL Entrance Counseling Results (DECFENOP)
- DL Entrance Counseling Acknowledgement (CRECMYOP)
- MPN Discharge Report (MPNDISOP)
- Expired MPN Report (MPNINAOP)
- MPNs Due to Expire Report (MPNEXPOP)

The procedure for importing all file types is similar; the description below is a typical example.

To import Direct Loan files:

1. Navigate to **Daily** > **Financial Aid** > **Import Data** > **COD**. This opens the **COD Import** form.
2. Select the **Direct Loan** option.
3. Select the **File Type** to be imported (refer to the bullet list above for selection options).
4. Select the **FA Award Year** from the drop-down list and click **Next**.
5. Select the **File to import**. Click the browse button beside the text box to open a file selection form. The form will list only the files that are appropriate for the file type you selected.
   Select one of the listed files and click **Open** to choose it for the import process. The browse form will close and the directory path and file name will be entered in the text box on the wizard form.
6. Click **Process**. A confirmation message is displayed. Click **Yes**.
7. CampusNexus Student finishes importing the Direct Loan file and displays another confirmation message. CampusNexus Student also prepares a report listing the data that has been imported. It may take a few seconds for the report to appear in the preview window.
8. Click **OK** to acknowledge the confirmation/printing report message.
9. Preview and print the report for your files. Close the report preview window when you are done.

School Account Statement

The School Account Statement (SAS) file is sent by COD to the school. It lists the data and status of all direct loan records on file for the school. It includes cash summary, cash detail, and loan detail records. A report is prepared showing the results of the import.

To allow schools to reconcile the detailed information provided in the SAS import file with their system data, you can generate a report that compares the disbursement transaction details on file at COD against the paid disbursement information within CampusNexus Student. The Amt and Discrepancy Amt columns on the Disbursement Transaction Detail report, allow you to compare the data in the import file against the disbursement information in CampusNexus Student. This Reconciliation Process is

only applicable when importing the SAS (DSDF##OP.XXX) file. Additionally, the SAS file can be re-imported as needed to get a real-time comparison of the disbursement transaction details.

Note: We incorporated some changes from COD into the import for the School Account Statement. The changes were applicable beginning with the week of September 30, 2002 when the reports were distributed by COD. The message class affected is DSDF03OP.

YTD Rebuild

See Import Direct Loan YTD Rebuild for a discussion of this import file.

Import Direct Loan YTD Rebuild

Note: Please refer to Import Direct Loan for more information about importing direct loan data.

A "YTD Rebuild" option is included in the "File Type" drop-down list on the Direct Loan Import form. When you select this file type, and click , the file filter is set to "DLRB*.*".

For the 2002-03 award year, the message class is DLRBLDOP.XXX.

Direct Loan YTD Form

A new "Direct Loan YTD" form has been added for importing Direct Loan Rebuild files. This form is called from the Direct Loan Import form when the "YTD Rebuild" option is selected along with a DLRB*.* file.

Award Year - The selected award year is a read-only field. The award year has already been selected on the previous form (frmFaDirectLoanImport).

Campuses - select all that apply. The campuses displayed on the right side of the form depend on the Direct Loan ID from the header record AND the campuses to which the logged in user has access. The ability to specify All campuses or selected campuses is enabled ONLY if you answer yes to the "Update CampusNexus Student tables" question. If you answer no, the campus selection criteria is not applicable. The default answer to the "Update CampusNexus Student tables" question is no.

Direct Loan ID - The Direct Loan ID is a read-only field. The Direct Loan ID is determined from the header record in the import file.

Update CampusNexus Student Tables? - select **Yes** to update the tables, or select **No** to skip the update. If you choose to update the CampusNexus Student tables with the rebuild file, the program will populate the FaLoan and FaDIDisb tables with data from the rebuild file.

The three report questions give you the ability to generate a report showing the contents of the rebuild file. The default answer to the Generate Origination and Generate Disbursement report questions is no. The default answer to the Generate Origination/Disbursement report is yes. The three questions provide maximum flexibility to see Origination data only, Disbursement data only, or both on one report.

Generate Origination Report? - select **Yes** to update the tables, or select **No** to skip the update.

Generate Disbursement Report? - select **Yes** to update the tables, or select **No** to skip the update.

Generate Orig/Disb Report? - select **Yes** to update the tables, or select **No** to skip the update.

After you specify the criteria on this form and click Continue, validation will be performed. The program checks the rebuild file and verifies that there is at least one record for the award year specified. If no detail records are found that satisfy this criteria, the program displays the following message and ends the process.

"No detail records were found in the selected rebuild file for award year ####-##".

If you answered Yes to the "Update CampusNexus Student Tables" question, the program checks if the file has already been imported. If so, the program displays a warning message.

"WARNING! This file has already been imported and updated to the CampusNexus Student tables." Two buttons are in the message box: Continue and Cancel. If you click Cancel, the process ends.

The program provides a report–"Direct Loan Rebuild Import File"–that will list the results of the file import. This report will be generated automatically if you chose to update the CampusNexus Student tables with the rebuild file.

Import Pell

Go directly to the Pell import procedure.

The U.S. Department of Education's (ED) Recipient Financial Management System (RFMS) sends several Pell-Grant-related file types to your school in response to files you export. Use this form to import these file types into CampusNexus Student. The files will typically reside in the directory on your system that is shared with your EDconnect software. EDconnect is used to receive the files from ED. The default directory must be configured.

Pell grants are now processed through the COD Import wizard.

The file types that you can import using this form include:

- Origination Acknowledgement (PGOA##OP.XXX)
- Disbursement Acknowledgement (PGDA##OP.XXX)
- Special Disbursement Acknowledgement (PGSD##OP.XXX) (The Special Disbursement Acknowledgement option has been removed for 2001 – 02. It is no longer used.)
- Electronic Statement of Account (PGAS##OP.XXX)
- Institution Data Acknowledgement (PGIA##OP.XXX) (Discontinued for 2002 - 03 award year)
- Data Request Acknowledgement (PGRA##OP.XXX)
- Multiple Reporting Records (PGMR##OP.XXX)
- Year to Date Records (PGYR##OP.XXX)
- SSN/Name/DOB Change Report (PGSN##OP.XXX)
- Reconciliation File Acknowledgement (PGRC##OP.XXX)
- ACG - Electronic Statement of Account (AGAS##OP.XXX)
- Smart - Electronic Statement of Account (SGAS##OP.XXX)

The procedure for importing all of these file types is similar, so only the first type is illustrated here. Depending on which of the file types you import, a report of the imported data will be available after the file is processed.

Pell Processing for 2002 – 03

CampusNexus Student has been updated to handle Pell Processing for the 2002 – 03 award year. The changes touch several areas in the Financial Aid module. The changes reflect the on-going transition from the RFMS system to the COD system. One such change is the elimination of references to "RFMS" in documentation about the new award year. Following is a list of the import functions in CampusNexus Student affected by the Pell changes for 2002 – 03.

- To conform to the changes in Pell Processing for 2002 – 03, the term "RFMS" will no longer be used in CampusNexus Student to refer to Pell. The correct terminology on all reports and menus will be "Pell Processing". (If there is limited space "Pell" is acceptable).
- It is no longer possible to import the Institution Data Acknowledgement File. This is removed from the options on the Daily / Financial Aid / Import Data / Pell Processing file list.
- You can import the 2002 – 03 Origination Acknowledgement files using the new 2002 – 03 layout and generate a report of the imported acknowledgements. The imported file of Origination Acknowledgements contains a count of duplicate records. This data element will be added to the report. The procedure that imports the Origination and Disbursement Acknowledgement records will write the number of duplicate records to the FA batch export/import table. A report will be printed after processing with all accepted and rejected loans (with comments based on the reject code).
- The Origination Acknowledgement Import records will indicate a negative pending dollar amount that will be presented on the Origination Acknowledgement Report.
- You can import the new message class "PGSNOP03" file (SSN/Name/DOB Change Report) and generate a report that conforms to the technical reference specifications for 2002 – 03.
- The maximum Disbursement Reference Number that CampusNexus Student can assign to a disbursement in the

FA Pell Disbursements table has been changed from 89 to 65.

- You can import and print a statement of account (PGAS03OP) report.
- You can import PGMR03OP files (Multiple Reporting Records) for 2002 – 03 and generate a report.
- You can import the PGRC03OP file (Reconciliation) for 2002 – 03 and prepare a report.
- You can import the PGYR03OP file (Year-To-Date) for 2002 – 03 to update the CampusNexus Student database.

Reconciliation File Acknowledgement (PGRCXXOP)

When you select the Reconciliation File for import, the program displays some reporting options. You can:

- Print all students.
- Print only students where the origination amount is not equal to the amount in CampusNexus Student.
- Print only students where the YTD Disbursement Accepted is not equal to the amount in CampusNexus Student.
- Print only students where the POP flag is yes.

Determining if an entire batch was rejected:

The header record contains a field with batch reject reasons. An entire batch is rejected if there is at least one code in this field where Message Type = 'E'. If the Message Type = 'W', the code is only a Warning and does not mean that the batch was rejected.

Importing the YTD Pell File

You can specify all campuses or specific campuses to update. The default campus selection is All Campuses. The campuses listed will be the campuses to which you have access. The program will update only those students whose most recent enrollment record is attached to a campus that has been selected for the update.

A form is used to obtain the necessary parameters for the import. The form will be activated when the "Next" button is clicked. The campus selection form is displayed if you elect to update the CampusNexus Student tables with the YTD import file. The default answer for the Update CampusNexus Student RFMS Files question is no.

The logic for producing the reports at the end of the import remains unchanged. All records in the file will be included on the reports regardless of the campus criteria. The only change on the reports is the addition of the student's Campus code to each report.

The Transaction ID is shown on the Origination Acknowledgement Report.

When importing Pell YTD files, there are three reports generated:

- Origination Detail Listing
- Disb Detail Listing
- Summary

Totals on the reports include:

- A total for the Origination Listing from the detail on the report.
- A total for the Disbursement Listing from the detail on the report.
- Totals from the trailer record of the Summary Listing.

To import Pell grant files:

1. Navigate to **Daily** > **Financial Aid** > **Import Data** > **Pell**.

   You must now select **Daily > Financial Aid > Import Data > COD path** to import Pell. The Pell Import wizard is displayed.

2. Select the **FA Award Year**.
3. Select the **File Type** to be imported.
4. Select the **File Name**. Click ... beside the text box to open a file selection form. The form will list only the files that are appropriate for the file type you selected.
5. Select one of the listed files and click **Open** to choose it for the import process. The browse form will close and the directory path and file name will be entered in the text box on the wizard form.
6. Click **Import**. A confirmation message is displayed. Click **Yes**.
7. CampusNexus Student finishes importing the Pell grant file and displays another confirmation message. CampusNexus Student also prepares a report listing the data that has been imported.
8. Click **OK** to acknowledge the message. After the message is acknowledged, the **Print** button will appear on the Pell RFMS Import wizard form.
9. Click **Print** to print the report related to the file you imported. The sample report shown here is for the Pell Grant Origination Acknowledgement. The student's campus has been added to the student detail record.

   After printing the report, click **Finish** on the import wizard form to close it.

Disbursements

Note: When an entire batch of disbursements is rejected, the disbursement status for each disbursement will be set to "E - Error".

The Reject Code descriptions are shown on the report produced by this option.

Create Test Imports

This menu option is restricted to the CampusNexus Student System Administrator and the Financial Aid Administrator.

A significant challenge occurs when a new CampusNexus Student system is set up and it becomes necessary to test the financial aid import features of the system. To assist in this setup function, CampusNexus Student provides a means to create certain test files for imported FA data. The data for the import test files comes from the related export files. For example, when you export a group of FAFSAs, CampusNexus Student can use the export batch file, from which the EAPS##IN file export file is created, for data to create corresponding ISIR import records with the appropriate file name (EAPS##OP.CMC).

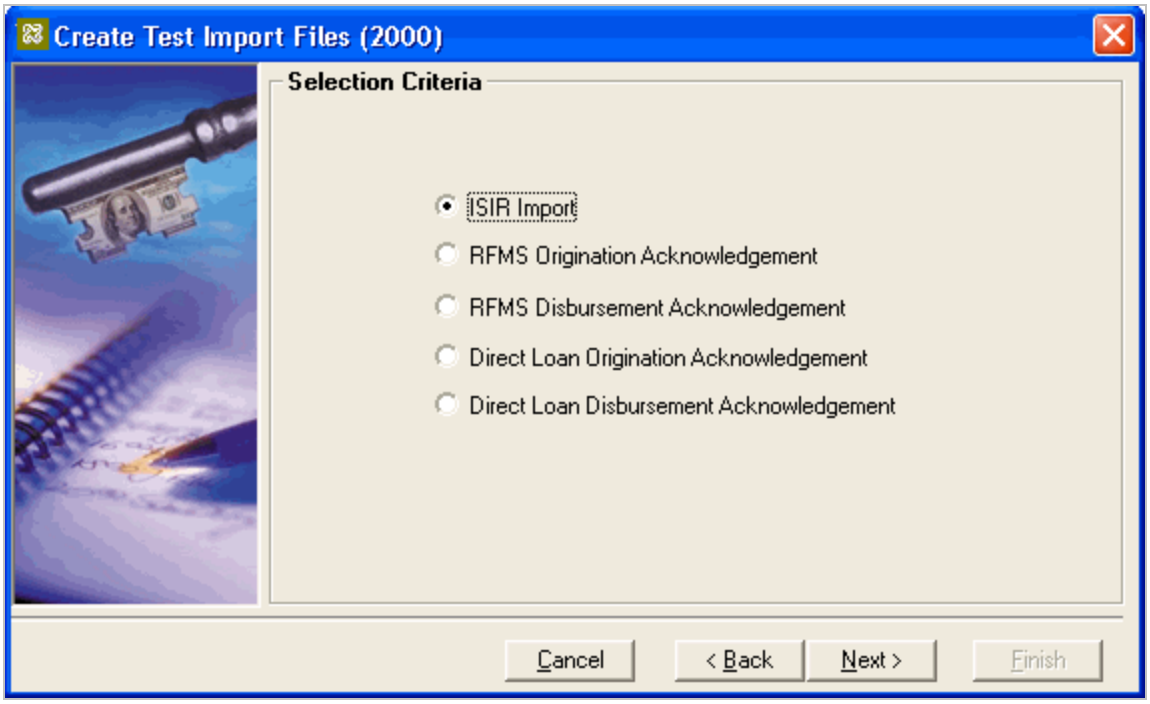
Note: For the latest content about FAFSA, ISIR and COD processing, access Regulatory Help.

At the time this topic is being written, five import file types can be created from 1999-00 export files. They include:

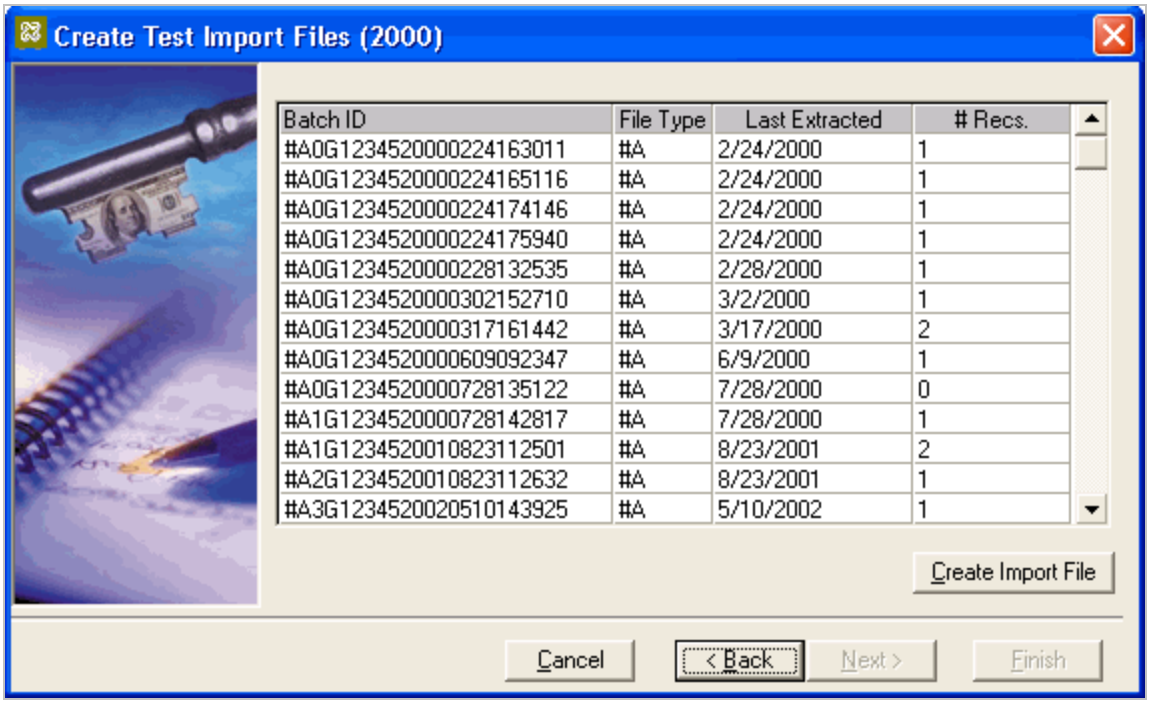
- ISIR Import (EAPS00OP.CMC)
- RFMS Origination Acknowledgement (PGOA00OP.CMC)
- RFMS Disbursement Acknowledgement (PGDA00OP.CMC)
- Direct Loan Origination Acknowledgement (DISF00OP.CMC)
- Direct Loan Disbursement Acknowledgement (DIOD00OP.CMC)

To create the test import files:

1. Navigate to **Daily > Financial Aid** > **Import Data** > **Create Test Imports**. The Create Test Import Files wizard is displayed.



2. Click one of the listed file types.
3. Click **Next**. The second page of the wizard is displayed.



4. Select one of the Batch ID records on the grid. If there are no batches listed, you have not yet exported a file of the type required for creating the import file.
5. Click **Create Import File**. CampusNexus Student examines the selected batch file and creates the import test file in the proper format. When the file creation process is finished, a confirmation message displays the directory path and name of the test file. All test files have a file extension of ".CMC". Write this information down for use when you work with the Financial Aid Import Data wizard.
6. Click **OK** to close the confirmation message.
7. Click **Finish to** close the wizard.
8. Click **Back** to go back to page 1. You can select a different file type and go through the process again.

When you are using the Financial Aid Import Data wizard after having created test import files, you can identify the test files by their ".cmc" extensions.

Import TEACH Grant

The U.S. Department of Education's (ED) Common Origination and Response (COD) System sends several grant file types (including the TEACH Grant) to your school in response to files you export. Use this form to import these file types into CampusNexus Student. These files will typically reside in the directory on your system that is shared with your EDconnect software. EDconnect is used to receive the files from ED. The default directory must be configured.

TEACH Grants are processed through the COD Import wizard.

The file types that you can import through this form are:

- ATS Note Acknowledgement Award Year Specific (CRAT##OP.XXX)
- Multiple Reporting Records (THMR##OP.XXX)
- School Account Statement - Monthly (THSM##OP.XXX)
- School Account Statement - YTD (THSY##OP.XXX)
- Pending Disbursement List THPD##OP.XXX)
- Inactive Grants Report (THIGPFOP.XXX)
- SSN/Name/DOB Change Report (THSNPFOP.XXX)
- Rebuild (THRB##OP.XXX)
- ATS Discharge Report (ATSDISPOP.XXX)
- Counselling Acknowledgement (CRAC##OP.XXX)

When the ATS (Agreement to Serve) Note Acknowledgement Award Year Specific file is imported from COD, the student's TEACH Grant records will be updated. The ATS Acknowledgement for a student may be viewed at **View** > **Financial Aid** > **Awards** > **Add/Edit** (button) > **ATS** (tab).

The COD system will accept and return TEACH Grant Data in TEACH specific message classes.

TEACH Message Classes

Input	Output	Description
COMRECIN	COMRECOP	Common Record, Non-Program Specific, Non-Award Year Specific
CRAAYYIN	CRAAYYOP	Common Record, Non Program Specific, Award Year Specific
CRTHYYIN	CRTHYYOP	Common Record, TEACH, Award Year Specific
CRTHMYIN	CRTHMYOP	Common Record, TEACH, Non-Award Year Specific
COMRECIN	COMRECOP	Receipt, Non Program Specific
CRAAYYIN/ CRTHYYIN	CRRCYYOP	Receipt, Award Year Specific

Note: When "YY" appears in the message class, it refers to the actual Award Year (that is, 10 for the 09/10 Award Year).

The following reports will be produced when an import of TEACH file is performed:

- Import & Export Reports
- COD Response Report
- Reject Report (if items rejected by COD)

To import TEACH grant files:

1. Navigate to **Daily** > **Financial Aid** > **Import Data** > **COD**. The COD Import wizard is displayed.
2. Click the **TEACH** radio button.
3. Select the **File Type** to be imported.

4. Select the **File to Import** from the **Files Available** list. Or, click beside the text box to open a file selection form. The form will list only the files that are appropriate for the file type you selected.
5. Select one of the listed files and click **Open** to choose it for the import process. The browse form is closed and the directory path and file name is entered in the text box on the wizard form.
6. Click **Process**. A confirmation message is displayed. Click **Yes**.
7. CampusNexus Student finishes importing the TEACH grant file and displays another confirmation message. The program also prepares a report listing the data that has been imported.

   Note: COD edit codes associated with this import are described in this report.
8. Click **OK** to acknowledge the message. After the message is acknowledged, the **Print** button is displayed on the **COD GRANT Import** wizard form.
9. Click **Print** to print the report related to the file you imported.
10. After printing the report, click **Finish** on the **COD GRANT Import** wizard form to close it.

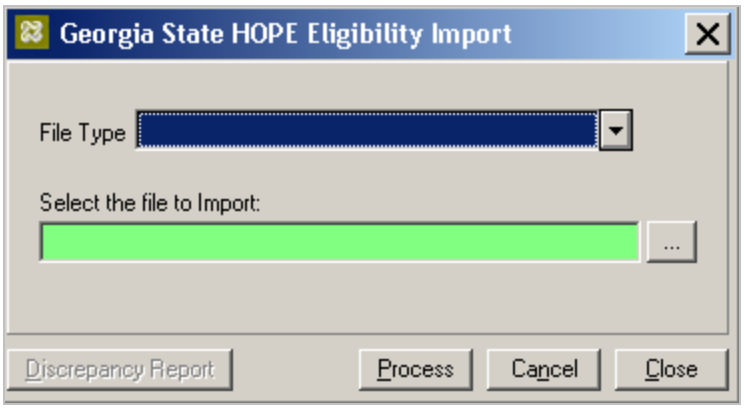
Note: Options may vary within the **COD GRANT Import** wizard depending on the file type selected.

HOPE Import

The HOPE data is imported and any discrepancies between the CampusNexus Student data and the data received from the State of Georgia can be evaluated within this feature. The imported data will appropriately update the student data, indicating which students are eligible, and which students are ineligible, for the funds.

To import the HOPE data:

1. Navigate to **Daily > Financial Aid > Import Data > State Reporting > Georgia > HOPE-Import**. The Georgia State HOPE Eligibility Import form is displayed.



2. Select the **File Type**. The available options are "Eligible File" or "Ineligible File".
3. To select the file to be imported, click ... next to the **Select the File to Import** field to navigate to the folder containing the file to be imported.
4. Click the **Process** button to import the file.
5. Once the file to be imported is selected and processed, the **Discrepancy Report** button can be clicked to create a report that can be viewed, printed and or saved to a specified location. The discrepancies between what is submitted by the state via SURFER, and what is contained in the CampusNexus Student database include:
    - Students that appear on the eligible list from the state but do not have a HOPE or Zell Miller Scholarship or Grant tied to their enrollment with a disbursement status other than Canceled.
    - Students that appear on the ineligible list from the state that have been incorrectly packaged for a HOPE or Zell Miller Scholarship or Grant. It also includes the award information.

These reports will not include students that appear in the file but were not found in CampusNexus Student.

Servicer Integration Overview

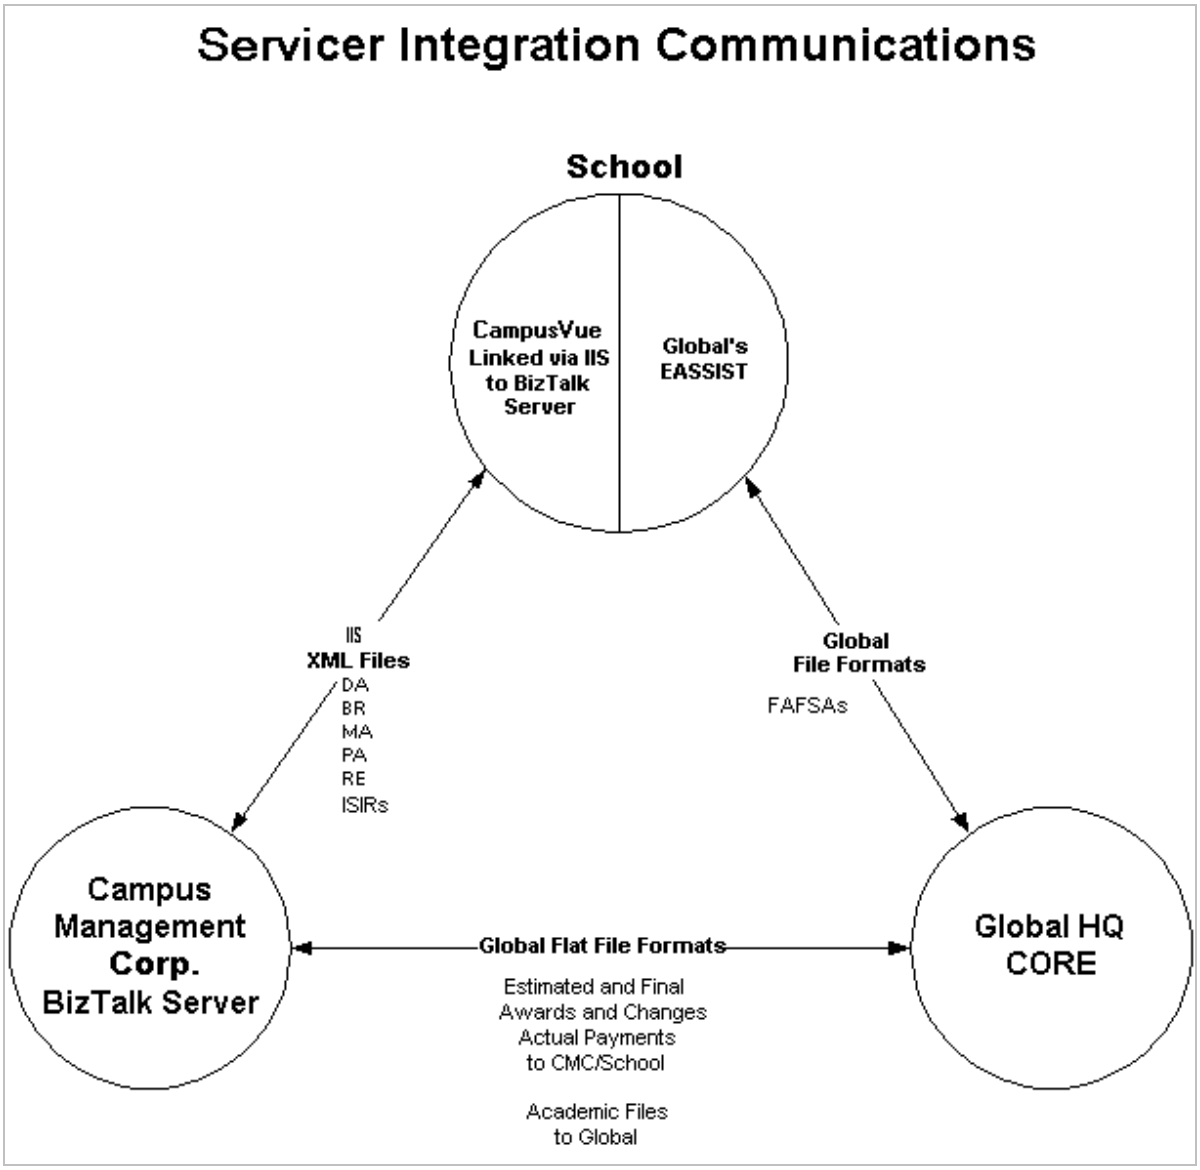
- Example Process
- Hardware Requirements
- Servicer Setup
- Servicer Processing Setup Procedures
- EASSIST
- File Transmission Setup and Testing
- Daily Processing
- Identifier Match
- Notifications
- Exception Resolution

CampusNexus Student provides servicer integration for financial aid processing to exchange data with Global. Interaction of school staff in the sending and receiving procedures is largely limited to supervision of the process and exception handling. Manual copying of data from one system into the other is greatly reduced.

The goal of the integration strategy between Global and Anthology Inc. is to minimize duplicate data entry and, in the future, offer real-time transactional financial aid processing. The exchange of data takes place on an ongoing basis, replacing the existing batch processes and eliminating the user interaction to import and export data files in batches.

The Global integration minimizes manual data entry in CampusNexus Student by importing Global data files directly into the CampusNexus Student database.

The existing formats of all of Global data files are in flat or database files. Anthology Inc. is committed to importing data only in the format of XML (eXtensible Markup Language). This eliminates the time required to develop several flat file imports from various sources. The Global files are translated to meet the CampusNexus Student XML import specifications using Microsoft's BizTalk to map and manage the various transactions that are transmitted between the school, Global, and CampusNexus Student.



Note: If your school uses a servicer link, you must disable it. Use RFMS and DL (select the No option) for all award years. All campuses sharing the same Reporting Pell ID or Direct Loan ID must use a servicer or CampusNexus Student. Schools sharing an ID cannot be split. For example, if two campuses share a reporting Pell ID, one cannot 'use RFMS' or Direct Lending in CampusNexus Student while the other is set up to use Global. Campuses in the same database can use different features, as long as they have different identifiers.

Files Imported from Global

File Name	Description
CLFAFAID	Identifier File
MA	Scheduled Awards*
BR	Budget File
DA	Scheduled Disbursements*

File Name	Description
PA	Actual Disbursements
CA	Change File
RE	Refund File
AR	Tuition Adjustments
AP	R2T4 Refunds

*Each MA file is accompanied by a DA file. You will not receive a DA file without a corresponding MA.

Note: The file naming convention is **nnYYMMDDxx.###**, where **nn** is the file type (for example MA, DA, BR, etc.), **xx** is the file sequence number (01, 02, ..., thereby allowing multiple files of the same type to be sent on a given day), and **###** is the school code extension that matches the configuration on the campus level within CampusNexus Student. For example, a file with the name PA10030902.112 would indicate the second Payment file sent for the school with code 112 on March 9, 2010.

Example Process

The typical Global/CampusNexus Student user, after phase one of the integration strategy, will be similar to this example:

Betsy is a FA Officer. She will key her student's FAFSA into EASSIST. The FAFSA will be transmitted to the Department of Education, and returned to Global's CORE system. Global analysts use the budget and disbursement information provided to them by the school, through the EASSIST application, to estimate the student's financial aid award. This information will be sent to Anthology Inc.'s BizTalk server in two files: MA (scheduled awards) and DA (scheduled disbursements).

BizTalk will translate the files to CampusNexus Student XML import specifications and transmit the XML files via HTTPS to an Internet Information Server (IIS) receive function located at Betsy's School. This receive function will call the CampusNexus Student Application Proxy to transmit the files to the physical location of the CampusNexus Student and database servers. The message will be validated, and imported into the CampusNexus Student database at Betsy's school. The records will be flagged with a UserID for Global. The student will have scheduled aid records (FaStudentAid and FaStudentPell when applicable), as well as scheduled disbursement records (FaSched). Using the predefined disbursement schedules, CampusNexus Student will validate the scheduled disbursement to the appropriate term when required.

The student academic extract information is manually sent to Global by the academic records staff at scheduled intervals. The academic extracts for Global include the Weekly Extract, Pre-Pull Extract, and Add/Drop Extract.

Once Global receives notification that the student is in attendance and has met the attendance requirements for disbursements, Global creates a PA file and transmits it to the Anthology Inc. BizTalk Server for translation and transmission to CampusNexus Student. The file will be verified by the BizTalk server and transmitted to CampusNexus Student. On import, CampusNexus Student will validate the financial aid identifier to the FaStudentAid record.

In addition, using the payment amount and disbursement date from the previously scheduled disbursement information, the PA file will be used to create an approved disbursement batch. These records will be marked with a Global user ID, and the FA and SA contact persons are notified of the import via Contact Manager. Disbursement exceptions that failed to import are held in a temporary file for user review and update. Exceptions must be resolved before the batch is posted by Student Accounts.

If the scheduled award for the student changes prior to actual disbursement, or between the first and second disbursements, Global's change file (CA) is sent, translated, and imported to CampusNexus Student. These changes are captured in the new FaAudit fields. The procedure that updates this file notifies the FA contact person on import.

If the student withdraws or reduces his or her credit load, and a refund is required, Global is automatically notified by the AR extract. A refund file (RE) is sent to the school. After translation, the file is used to create scheduled refunds in CampusNexus Student. When the RE file is imported, the FA and SA contacts are notified via Contact Manager.

Global's Budget Period Start Date equates to CampusNexus Student's Academic Year Start Date.

Hardware Requirements

BizTalk servers are required at Anthology Inc.

Schools will not have on-site BizTalk servers. For file receipt and transmission, the school may use an existing (or new) Internet Information Server, on which the receive functions and the CampusNexus Student Application Proxy reside. Global will not require a BizTalk server until their application is transactional and generates XML files.

Servicer Setup

Coming From Class

If your school is currently using Class, and you have been processing financial aid using the servicer links in Class:

1. Perform a Weekly Academic Extract on the final day before conversion to CampusNexus Student and Go Live. Deliver this file to your servicer as a standard Weekly Extract.
2. Complete the CampusNexus Student servicer processing setup procedures below.
3. Once you are live on CampusNexus Student and you have completed the setup procedures, perform a Weekly Academic Extract. This will include all students that are currently in attendance. The status should equal the status that the servicer currently has on file. Deliver this file to the servicer for confirmation that the student and status data are correct. This should be performed on your first day of Go Live, prior to resuming electronic communication with your servicer.
4. Request a YTD ISIR file from your servicer. This file will be imported into CampusNexus Student. The assigned FA contact person will be notified in Contact Manager when the file is imported.
5. Request an Identifier file from your servicer. The file will be automatically imported when it is received. Notification will be sent to the FA individual identified during setup. Use the reconciliation reporting option in CampusNexus Student to confirm that records are associated with a servicer. Perform the exception resolution where necessary.

Exception Resolution must be performed before resuming additional file imports.

Using a Servicer for the First Time

If this is the first time that you are using a Servicer:

1. Complete the CampusNexus Student Servicer Processing Setup Procedures below.
2. Perform a Weekly Academic Extract. Confirm this file includes your active student population.
3. Depending on your method of start-up, mid-year conversions may require an Identifier import. Schools starting at the beginning of an award year will begin with the standard daily imports as aid is scheduled.

Servicer Processing Setup Procedures

See Servicer Configuration.

EASSIST

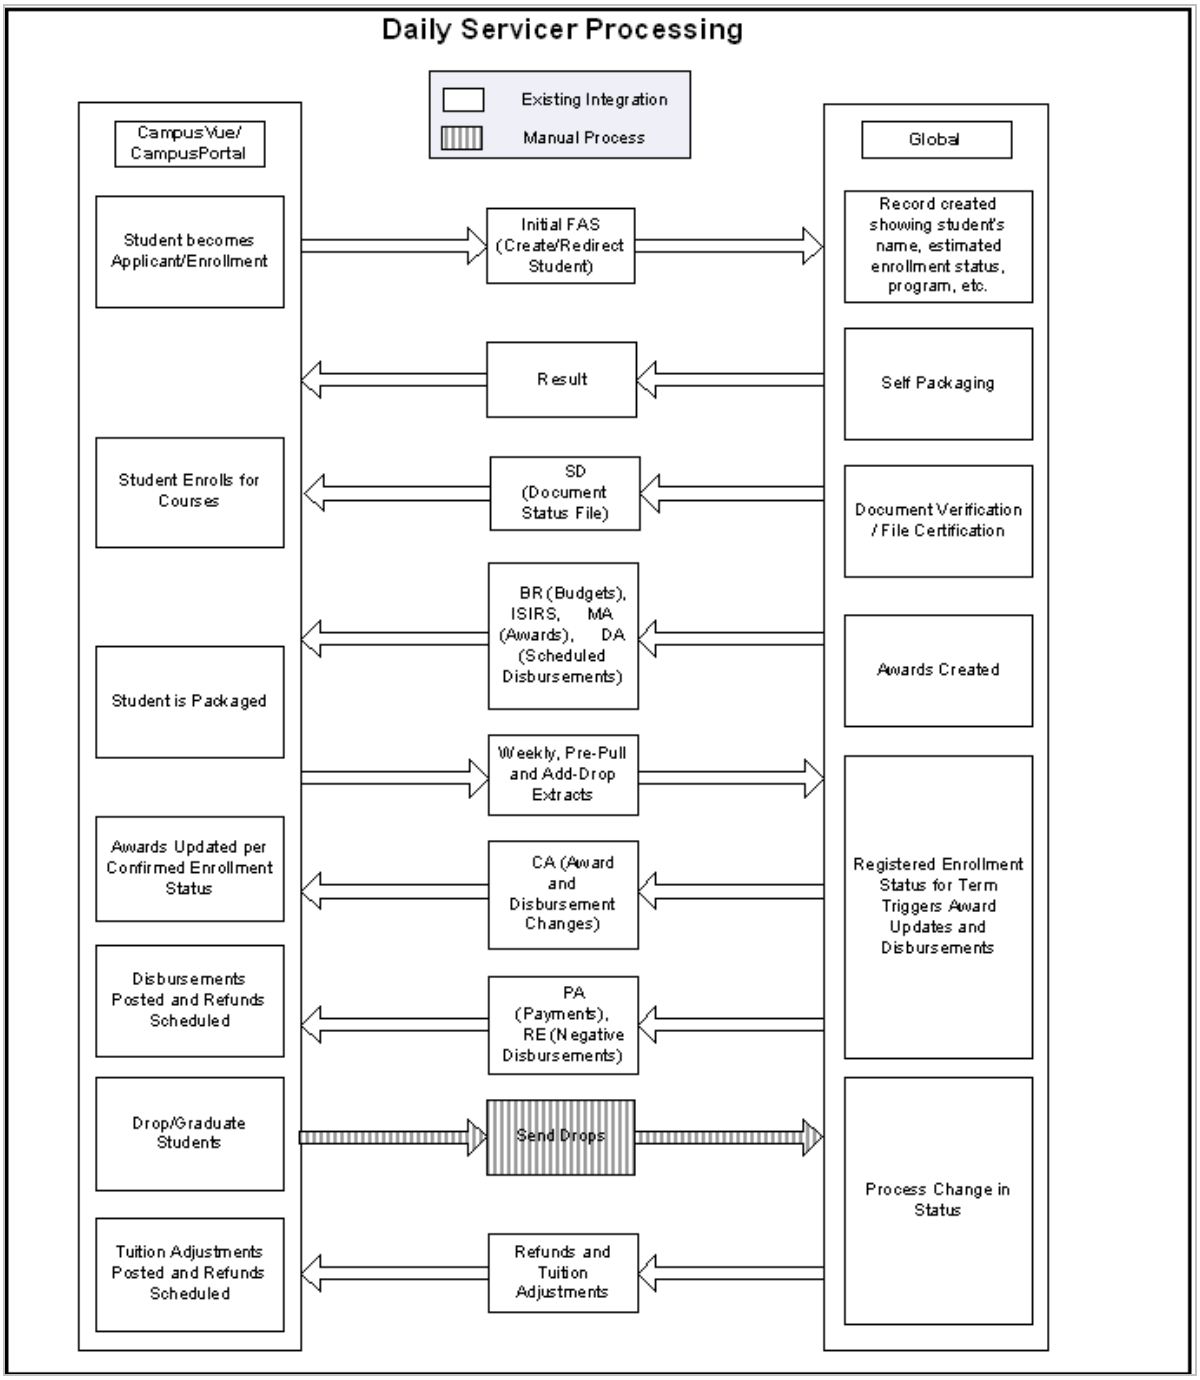
Complete all setup procedures in your servicer's application as defined by your servicer's setup procedures.

File Transmission Setup and Testing

Your servicer will need to notify Anthology Inc. of the Servicer School Code (three-digit File Transfer code) to map the BizTalk server to the school. Anthology Inc. will also need to know where on your Servicer's site the files will be pulled from and delivered to.

Anthology Inc. will need to verify, through tests, that we have access to the school's database and to the servicer delivery and retrieval sites. We will need to be in contact with your Information Technology (IT) team to get necessary addresses, and to resolve any potential network or fire wall issues that may arise.

Daily Processing in CampusNexus Student



Identifier Match

CLFAFAID Import

The purpose of the identifier match is to synchronize the aid on file in CampusNexus Student with the aid on file at your servicer. CampusNexus Student imports each record from your servicer and attempts to find the student based on his or her Social Security Number (SSN) within the campus identified in the import file. Once the student is found, it searches for the student's enrollment using the Start Date and Graduation Date from the import file.

Next, the program attempts to find the aid record. Using the Award Year, Amount (amount will always have a $1.00 tolerance), Fund Source, and Loan Period Start Date provided by your servicer, CampusNexus Student looks for an exact match on file. If no match is found, CampusNexus Student searches again for an exact match on all elements, allowing a thirty day discrepancy on the Loan Period Start Date. If no match is found on this attempt, one final attempt is made on an exact match for all data elements with the exception of the Award Year. If no match is found on this final attempt, a record is written to the exception file.

When a match is identified, it updates the unique Servicer Record ID to the data in CampusNexus Student so that future data elements imported for this scheduled aid will be associated with the record found. The amounts are never overwritten on an identifier import, and new records are not created as a result of this import. These changes, if necessary, can be handled during exception review.

Import Matching Logic

The following three tags have been added to the BR, MA, DA, PA, CA, and RE files to ensure all files coming from Global to CampusNexus Student match to the correct enrollments: Student ID, Enrollment ID, and Academic Year ID. The import matching logic will initially use the Student ID, Enrollment ID and Academic Year ID to locate the student for the BR and MA files. If no match is found, then the student will attempt to be located by SSN. When processing the DA file, these fields will be used to locate Disbursement Schedules for those who are configured to Require Terms on disbursements.

When importing the SD file, the logic must be able to match the document record by first attempting to use the Student ID and Enrollment ID that was sent in the SD file. If the match is not found, then an attempt will be made to locate the document record based on SSN.

Notifications

The staff member assigned as the Financial Aid contact will be notified via a predefined Contact Manager activity as each file is imported. The notification will include the type of file imported, the number of records, and the number of exceptions.

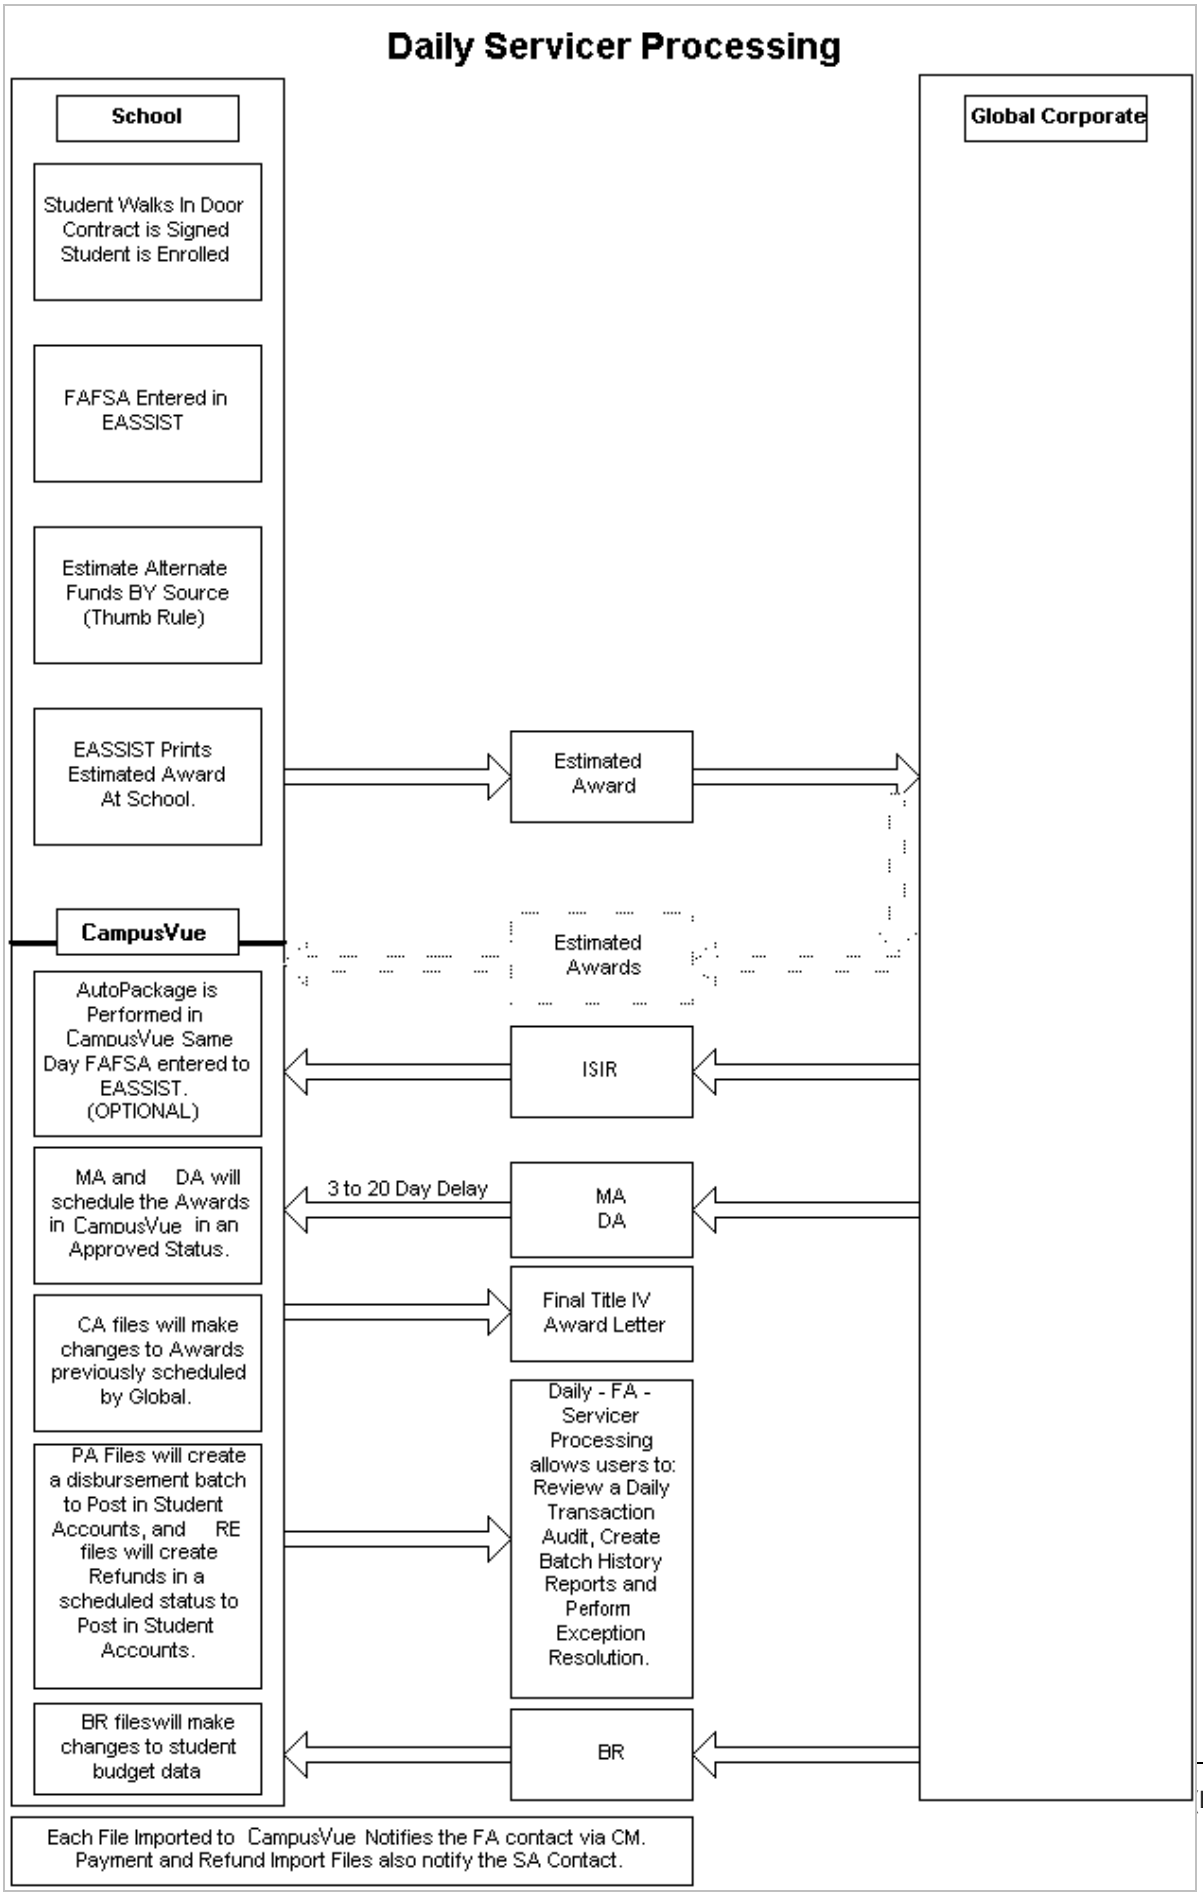
The staff member assigned as the Student Accounts contact will be notified with the same information when the file imported is a payment file (PA) or a refund file (RE).

Exception Resolution

This option is used to view and resolve exceptions found during the import process. This area will walk you through finding the resolution to update the records.

Note: This process should be performed daily.

When actual payments are received (PA files), exceptions must be resolved before the batch will be available to post in Student Accounts.



(Legacy Interface)

Servicer Daily Transaction Audit

This process is used to see a listing of aid records added by servicer import within a date range. You can also use it to produce a reconciliation report.

Servicer Batch History Report

With this option you can see a history of files imported and exported to and from your servicer.

Servicer Disbursement Batch Review

With this option, you can review all open disbursement batches created by a servicer import procedure. The program will show the amount of the approved disbursements. You can print a report of the accepted disbursements in the batch. The program will show you any exceptions found, and tell you if the batch is OK to post. Batches can be posted only when all exceptions are cleared through the Exception Resolution procedure. The printed reports will include only accepted disbursements, not those that are held in the exception file.

Any questions about the processes above should be communicated to Anthology Inc.

Servicer Batch History Report

The Servicer Batch History Report (rpt_FaServicerBatchHistory.rpt) is a listing of all import/export files transmitted to and from Global during the date range requested. If your campus is configured to enforce disbursement batch integrity, the report can be sorted using the **Parent Batch ID**, to allow you to track the parent disbursement batches.

The report selection criteria include:

- **Campus** - Shows a list of campuses where the user has access and SyCampus.ServicerLink is not equal to "N", "", or null.
- **Date Imported** - (Not Required) Enter a date range within which the files were imported XX/XX/XXXX to XX/XX/XXXX.
- **Date Exported** - (Not Required) Enter a date range within which the files were exported XX/XX/XXXX to XX/XX/XXXX.
- **Include Academic Record Extracts?** - Yes or No.

The report headings are School ID, File Type, File Name, Date Imported, Date Exported, # Records, # Records Accepted, # Records Rejected, and Batch ID.

- **School ID** - FaBatchExpImp.SchoolID
- **File Type** - FaBatchExpImp.FileType

  P - Actual Disbursement
  D - Scheduled Disbursement
  C - Change File
  M - Identifier File
  R - Refund File
  A - Scheduled Awards
  X - Unknown
  AR - Academic Records Extract
  T - Tuition Adjustments
  F - R2T4 Refunds

- **File Name** - If the File Type is not "AR", FaBatchExpImp.FileNameImported, otherwise it is the FileNameExported.
- **Date Imported** - FaBatchExpImp.DateImported.
- **Date Exported** - FaBatchExpImp.DateExported (AR Extract Only).
- **# Records** - FaBatchExpImp.BatchRecords
- **# Records Accepted** - FaBatchExpImp.RecordsAccepted.
- **# Records Rejected** - FaBatchExpImp.RecordsRejected.
- **BatchID** - FaBatchExpImp.FaBatchExpImpID .

The view selects records from FaBatchExpImp where ExtImpType is "SERVICER" and meets other conditions. The FaBatchExpImpID is equal to SchoolID and SyCampus.PellID.

If academic record extracts are included, the Date Imported will be Empty and the Date Exported will show data.

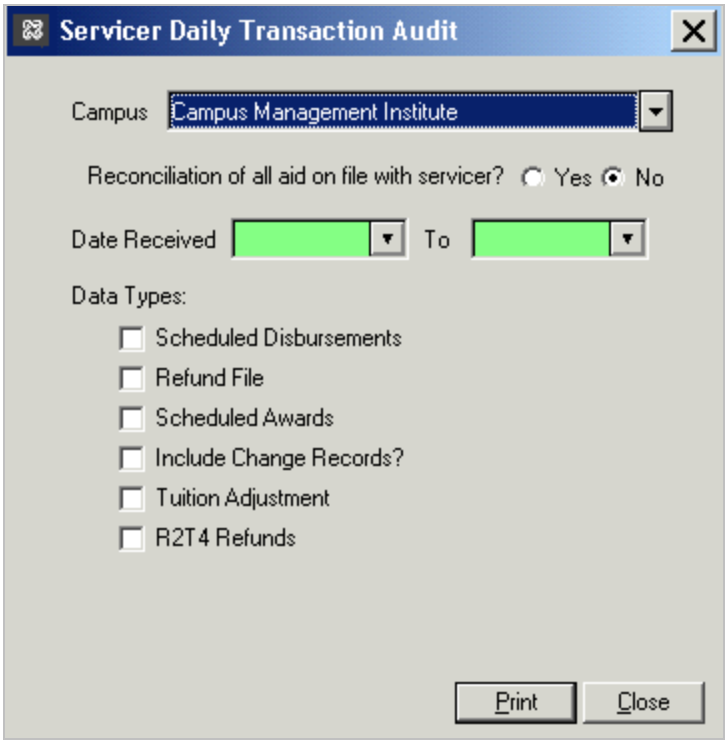
Servicer Daily Transaction Audit

The Servicer Daily Transaction Audit reports on all New Scheduled Awards, Scheduled Disbursements, or Scheduled Refunds received by servicer import in the date range requested. In addition, the user has an option of including change records received by the servicer in the same time frame. This report relies on the Global ID defined in Setup as the "Add User" of the record to determine which records were added in the dates selected. Another option on this report is to show a listing of all aid on file with a Servicer Record ID for reconciliation purposes.

Selecting the **Save Student Group** option from the Report Viewer menu options will invoke the system to display the 'Save New Group' screen. Students in the report can be saved to a Student Group by entering a 'Group Name', selecting a 'Group Type', indicate whether to make the group public by selecting the 'Make Group Public' check box, if applicable, and clicking the 'Save' button.

To perform the Servicer Daily Transaction Audit:

1. Navigate to **Daily > Financial Aid > Servicer Processing > Servicer Daily Transaction Audit**. The Servicer Daily Transaction Audit form is displayed. Use the filtering criteria on this form to generate a report as follows:



2. A list of campuses to which the user has access will appear in the Campus drop-down list.
3. The default for the Reconciliation of All Aid on File with Servicer? option is No. If yes, the program disables the rest of the selection criteria below and prompts for Award Year. The system will return all financial aid records for the servicer for the campus selected and a summary of each student's financial aid record including disbursements and refunds are displayed when the Print button is selected. If No, the Award Year prompt is disabled.
4. Users can enter a date range within which the files were imported in a XX/XX/XXXX or select date ranges from the Date Received drop-down lists. The field is required.
5. Place a check next to the applicable Data Types label. The data types options are Schedule Disbursements (D), Refund File (R), Schedule Awards (A), Include Change Records? (C), Tuition Adjustments (T), R2T4 Refunds (F).

Servicer Daily Transaction Audit Report

The report will sort by Campus and Student Name by default, and includes all data imported during the Date-Received date range and will display the following data elements by student for each type of record:

- FaStudentAid (A) – Fund Source, Award Year, AY Sequence #, Amount Packaged
- FaSched (D) – Date Scheduled, Net Amount, Term
- FaDisb (P) – Date Disb (As Date Paid), Actual Amount, Term
- FaRefund (R) – Date Due (As Due Date), Amount, Fund Source

The report will show all records added or modified by the Servicer imports. Report examples are provided for the following selections:

- Scheduled Awards and Include Change Records?
- Scheduled Disbursements and Include Change Records?
- Refund Files and Include Change Records?
- Tuition Adjustments and Include Change Records?
- R2T4 Refunds and Include Change Records?

Note: If you are enforcing batch integrity, and if a batch was broken into multiple batches, the **Scheduled Awards** and the **Scheduled Disbursement** sections of this report will display both the parent batch ID number and the batch ID number.

The report will show all records added or modified by the Servicer imports. The report example below reflects **Scheduled Awards** and **Include Change Records?** selected options.

Servicer Disbursement Batch Review

With the Servicer Disbursement Batch Review you can find all open disbursement batches created by a servicer import of actual disbursements. These batches will NOT be available through the standard Approve to Pay form. You can *not* edit the amount, dates, or number of disbursements in a batch sent by a servicer.

Batches created by a servicer import are available to view in summary and print a report of the **accepted** disbursements only. Disbursements not accepted on import are held in the Exception File until resolved. Batches viewed in this area may or may not be ready to post (as indicated on-screen). If a batch is not ready to post, the batch has exceptions that must be resolved. When exceptions are found, a message will appear on the screen and on the report printed from this form to indicate that the exceptions are still not resolved.

Once all exceptions are resolved, the disbursement batch indicates that it is OK to post. The batch is available to post.

This reporting option starts with a **Disbursement Batch Review** form showing a list of batches available for review. The columns include Disb Batch #, Date Created, UserID, # Disbursements, Batch Amount, and Import BatchID (from FaDisbBatch).

- **Disb batch #** – FaDisbBatch.FaDisbBatchID.
- **Date Created** – FaDisbBatch.DateAdded.
- **UserID** – FaDisbBatch.UserID.
- **# Disb** – FaDisbBatch.NumDisb.
- **Batch Amount** – FaDisbBatch.BatchAmount.
- **Import BatchID** – FaDisbBatch.FaBatchExpImpID.
- **# Exceptions?**
- **OK To Post?** – Yes if # Exceptions is equal to zero. Otherwise, no.

The program shows only batches where the Import File code is "S – Servicer", the batch is still open, and the user has access to the campus**. Print** and **Close** Buttons are included on the form. The layout of the report is the same as the **FA Disbursement Batch Tracking Report**.

When the number of exceptions is greater than zero, a comment is added to the top of the report to display the message: "Exceptions are on file for batch selected. Exceptions must be resolved prior to posting this batch."

Note: This message can be displayed only when the report is called from this form and the number of exceptions is greater than zero. This report is generically called from the reports menu and the Approve Disbursement Batch option in Daily > Financial Aid. This message does not appear when run from either of these areas.

Exception Review

CampusNexus Student immediately imports the servicer's financial aid data when files reach the school's server. When the data is imported, a notification is sent to the Financial Aid and Student Accounts administrators identified in Servicer Configuration (**Setup > Campus Locations > Financial Aid > Servicer Configuration**). The notification includes the total number of accepted records in the batch and the number of exceptions found.

If data fails to import, the records are held in the FA Servicer Exception table. You will use the Exception Review forms to resolve the exceptions.

Note: The Exception Review procedures are expected to be performed daily, so that data in CampusNexus Student remains recent and accurate for the processing of future imports.

Files Imported from Global - You will not receive a DA file without a corresponding MA file.

File Descriptions

File	Description
CLFAFAID	Identifier File
MA	Scheduled Awards (Each MA file is accompanied by a DA file.)
BR	Budget File
SD	Document Tracking
DA	Scheduled Disbursements
PA	Paid Disbursements
CA	Change File
RE	Refund File
AR	Tuition Adjustments
AP	R2T4 Refunds

Identifier Match

CLFAFAID Import

The purpose of the identifier match is to synchronize the aid on file in CampusNexus Student with the aid on file at your servicer. CampusNexus Student imports each record from your servicer and attempts to find the student based on his or her Social Security number (SSN) within the campus identified in the import file. Once the student is found, it searches for the student's enrollment using the Start Date and Graduation Date from the import file.

Next, CampusNexus Student attempts to find the aid record. Using the Award Year, Amount (amount will always have a $1.00 tolerance), Fund Source, and Loan Period Start Date provided by your servicer, CampusNexus Student looks for an exact match on file. If no match is found, CampusNexus Student searches again for an exact match on all elements, allowing a thirty day discrepancy on the Loan Period Start Date. If no match is found on this attempt, one final attempt is made on an exact match for all data elements with the exception of the Award Year. If no match is found on this final attempt, a record is written to the exception file.

When a match is identified, it updates the unique Servicer Record ID to the data in CampusNexus Student so that future data elements imported for this scheduled aid will be associated with the record found. The amounts are never overwritten on an identifier import, and new records are not created as a result of this import. These changes, if necessary, can be handled during exception review.

Import Matching Logic

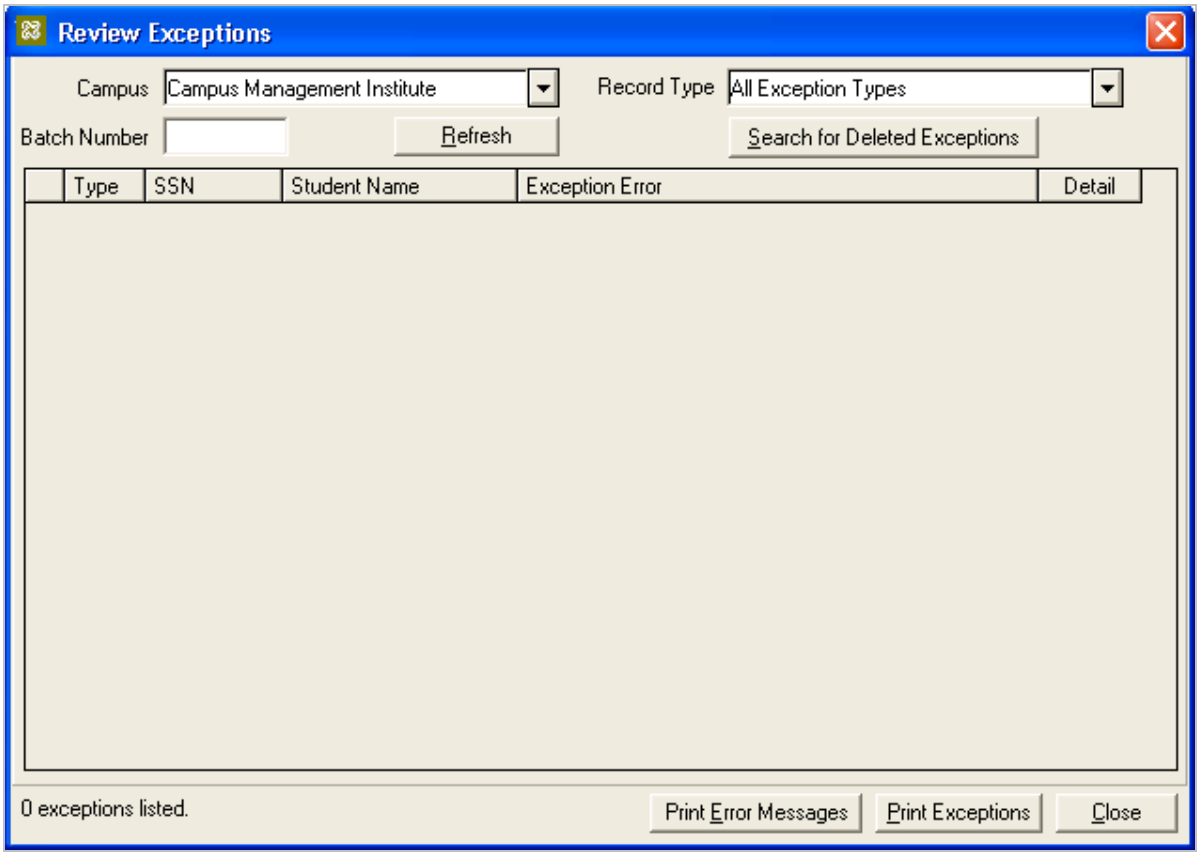
The following three tags have been added to the BR, MA, DA, PA, CA, and RE files to ensure all files coming from Global to CampusNexus Student match to the correct enrollments: Student ID, Enrollment ID, and Academic Year ID. The import matching logic will initially use the Student ID, Enrollment ID and Academic Year ID to locate the student for the BR and MA files. If no match is found, the student will attempt to be located by SSN. When processing the DA file, these fields will be used to locate Disbursement Schedules for those who are configured to Require Terms on disbursements.

When importing the SD file, the logic must be able to match the document record by first attempting to use the Student ID and Enrollment ID that was sent in the SD file. If the match is not found, then an attempt will be made to locate the document record based on SSN.

Exception Review Forms

To work with the Exception Review forms:

1. Navigate to **Daily > Financial Aid > Servicer Processing > Exception Review**.



2. Select the **Campus** and **Record Type** to be reviewed. Enter the **Batch Number** to filter the rows to list a single batch. Click **Refresh** to display the data in the grid. The form shows all records from the FaServicerException table where the reprocessed date is null.

   Note: If two users are logged in at the same time CampusNexus Student does not allow a user to view/edit details for a particular Global exception record if another user is viewing/editing the details for the same exception record. If the user attempts to view/edit details for an exception that another user already has open, CampusNexus Student notifies the user. CampusNexus Student does not allow a user to view/edit the details for a particular Global exception record if that user is already viewing/editing the details for the same exception record. Lastly, if a user

attempts to view/edit details for an exception that another users already has open, CampusNexus Student notifies the user attempting to view/edit details that the record is already in use.

3. Click **Search for Deleted Exceptions** to search by an individual student's SSN. CampusNexus Student displays a **Search** form in which you can specify an SSN and click **OK** to search.

   Exception Record Types

   - A - Scheduled Award Exceptions
   - B - Budget Exceptions
   - D - Scheduled Disbursement Exceptions
   - P - Paid Disbursement Exceptions
   - R - Refund Exceptions
   - C - Change Record Exceptions
   - M - Identifier Import Exceptions
   - S - Document Tracking
   - T - Tuition Adjustments
   - F - R2T4 Refunds

4. A table of Exception Error Codes is provided in a related Help topic, or in the form of a report that you can print by clicking **Print Error Messages**. From the error description on the grid, look up the cause and resolution recommendations in the table. Follow the recommendations in the help table to resolve each exception. This may involve changing one or more of the data elements listed on the Resolve Exception form.

5. Click the **Detail** button on each row. CampusNexus Student loads the **Resolve Exception** form (frmFaServicerResolve) and provides resolution data. Depending on the error code, the resolution options will vary. The **Field Name** column contains data elements that are pertinent to the selected exception and the **Value** column contains the data coming from the servicer. One or more of these data elements disagrees with the data in the CampusNexus Student database.

6. Click **FA Packaging** to open the selected student's packaging data. If your security profile allows changes to Title IV fund sources, make any necessary changes to match the packaging data to the data on the Resolve Exception form. After making the changes, click **Resolve** to see if you have solved the exception. If not, look for other discrepancies.

7. Click **Select Aid** to pick a financial aid record to which the Servicer Record ID can be applied. If you then click Resolve, CampusNexus Student will update the Servicer Record ID and retain the amounts already in the database. The Select Aid button will not appear on the form for some types of exceptions where the aid or academic year could not be determined. This can be done regardless of the Title IV change flag. (The example form is altered to conceal sensitive data.)

8. Click **Clear** to remove the selected exception record from the Global batch.

   This is a radical, dangerous action. This action implies that you are sure your CampusNexus Student data is correct and that the Global data is incorrect. You need to resolve the issue directly with Global and convince them to send you corrected data.

9. Click **Resolve** to call a procedure that attempts to repost the data.

   - If it succeeds, CampusNexus Student displays a message, "*Exception Reprocessed*", and updates the Reprocessed Date of the record in the FA Servicer Exception table.
   - If it fails, CampusNexus Student displays the message "*Failed to Reprocess (shows the new error code)*". The failure adds a new row to the FA Servicer Exception table and updates the Reprocessed Date of the

original exception record. Refreshing the list of exceptions will display the new error.

If the Resolve procedure fails, CampusNexus Student prompts you for the required missing data elements. Changes to the data on this form are stored in FaServicerException.CorrectedXML. The Reprocessed Date will be populated on the original record indicating the exception is "closed". This process continues until the exception is resolved.

10. Click **Close** to close the form.

The following change codes may appear in CA records imported from Global.

C - Change Disbursement Date/Amount

D - Delete Scheduled Disbursement

N - Add New Disbursement

X - Delete All Scheduled Disbursements for Aid

Note: Once you click the **Search for Deleted Exceptions** button the form for entering the Social Security Number (SSN) displays.

After the search, you can view the detail of a deleted exception in the same way that you currently view the detail of an unresolved exception. You can Clear the exception at this point. Clearing the exception would once again make it available to resolve using the current resolve exceptions process. You can clear any exception (CLFAID, MA, DA, CA, RE, PA) with one exception: You would not be able to clear a payment (PA) exception if it is part of a posted Financial Aid disbursement batch. This safeguard is necessary to protect the integrity of the batch. CampusNexus Student does not allow new batch detail records to be added to a posted batch. You can get back to the list of exceptions to resolve for all students by clicking the **List Deleted Exceptions** button that set the form back to the No deleted exceptions state.

Exception Review Reports

Error Code Report: Prints a list of all error codes and descriptions from FaServicerError.

Exception Report: Prints a list of the exceptions selected by the user. It displays the SSN, Name, Type, Error Code, and Date Added, where the Reprocessed Date is null.

Exception Error Codes

The following Exception Review error codes are used when importing financial aid data from servicers. See Exception Review for details about resolving FA import data exceptions. A current list of exception error codes can also be printed from a button on the **Daily > Financial Aid > Servicer Processing > Exception Review** form.

Error Code Descriptions

Error Code	Description	Cause/Solution
000001	Cannot Find Campus	The last 3 digits on the imported file (see batch history report) are not found in Setup > Campus Locations > Servicer Configuration > File Extension Identifier. This code is provided by your servicer. Once this data is populated, use the Resolve feature to process the file.
000002	Cannot Find Student	This error will occur when CampusNexus Student cannot locate the student by his/her Social Security Number or SYStudentID. The student is unable to be located by SSN/SYStudentID or is not enrolled on the matching campus of the file. Tor resolve this error you can: 1. Add the student record and enroll the student into the appropriate program on the matching campus; 2. Update the SSN in the exception details so that it matches the appropriate student in CampusNexus Student; 3. Update the SSN for the appropriate student so that it matches the SSN in the exception details; 4. Contact Global to send you a corrected record for the correct campus the student is attending for that enrollment.
000003	Servicer Fund Source Code Not Found in CampusNexus Student	The fund source code on the aid record is not found in CampusNexus Student. Your servicer defines a fund source code for each fund source. This code should be entered in the Fund Source Code form under the appropriate CampusNexus Student Fund Source code to map the servicer codes. Verify the code is set up correctly in CampusNexus Student and use the Resolve option to process the record.
000004	Cannot find Financial Aid Record for enrollment.	When importing an identifier record from your servicer, CampusNexus Student first checks if the student is already scheduled for the fund source, award year, gross amount and loan period dates (if relevant). CampusNexus Student is looking for an exact match on all data elements when the award is in an "Approve" status. Since the record is on file with your servicer, you need to associate the data with an existing record. Use the options to override and match to an existing record. The match is on fund source, award year, and enrollment academic year when the status is "Estimated".

Error Code	Description	Cause/Solution
000005	Aid Type Not supported for Servicer Import	The fund source code on the record is mapped an aid type that is not supported by the CampusNexus Student import logic. CampusNexus Student supports Title IV aid types only.
000006	Cannot Delete Disbursement, Disbursement is already Paid in CampusNexus Student.	Your servicer has sent a change record to delete a disbursement where the date and amount equals a disbursement on file for the fund source, but the disbursement is already in a paid status. If the disbursement was paid in error, a correction would need to be made to remove the disbursement from the ledger card. Otherwise, your servicer should send a negative disbursement instead of a change record. Change records can only affect scheduled disbursements.
000007	Cannot Find Academic Year.	The data sent by your servicer includes the start date for the students Academic Year or budget period. On import, CampusNexus Student locates the academic year record within the students enrollment by matching this date to the Academic Year start date in CampusNexus Student. The start date must be within 30 days of the date sent by the servicer. You will receive this message when an Academic Year does not exist for the students enrollment where the start date meets the 30 day criteria. To correct, update the start dates in CampusNexus Student to the appropriate start date, or notify your servicer that they have an incorrect budget period start date for this student.
000008	Scheduled Disbursement not found. Cannot add Actual Disbursement.	The actual disbursement file looks for a scheduled disbursement in CampusNexus Student for the fund source identified where the scheduled amount is equal to the amount sent in the actual disbursement file and the status of the disbursement is "Scheduled". These should always match since your servicer processes amount changes in a change file prior to submitting the actual payment record. If it does not match, changes to the scheduled disbursement record in CampusNexus Student to match the imported record will allow you to resolve the payment. Note: All payments must be resolved to post an actual payment batch.
000009	Cannot Update Disbursement, Scheduled Disbursement not found.	Your servicer has sent a change record to change a disbursement date or amount. CampusNexus Student is looking for a scheduled disbursement where the date scheduled and scheduled amount equals the original disbursement date and original disbursement amount included in the change file. A change to a scheduled disbursement in CampusNexus Student to match the original data elements provided by the servicer will allow the resolve function to complete.

Error Code	Description	Cause/Solution
000010	Cannot Remove Scheduled Aid, at least one disbursement has been paid.	Your servicer has sent a change record to delete an entire award and its associated disbursements. The aid can not be deleted because at least one disbursement was paid. If the disbursement was paid in error, a correction would need to be made to remove the disbursement from the ledger card. Otherwise, your servicer should send a negative disbursement instead of a change record. Change records can only affect aid when the disbursements are in a scheduled status.
000011	Aid Record is already on file and status is not "estimated".	When importing a new scheduled award record from your servicer, CampusNexus Student first checks if the student is already scheduled for the fund source, award year, gross amount, and loan period dates (if relevant). CampusNexus Student is looking for an exact match on all data elements. If a record is found, and the status is Estimated, CampusNexus Student will update the existing record with the servicer record ID and amount packaged. If the aid is in an approved status, the record will fall into the exception file to require a user to approve and override the match. Since the record is on file with your servicer, you need to associate the data with an existing record. Select an option to override and match the Servicer Record ID to an existing record, or if no payments are made, remove the scheduled award from CampusNexus Student and then post the resolution.
000012	School Code Not Found.	The last 3 digits on the file name imported (see batch history report) are not found in Setup > Campus Locations > Servicer Configuration > File Extension Identifier. This code is provided by your servicer. Once this data is populated, use the Resolve feature to process the file.
000013	Invalid Action Code.	Each file imported from a servicer is assigned an action code which identifies the file type. The action code assigned to this file is unknown. This may be caused by an invalid file name, or a file type that is not supported by CampusNexus Student. Please contact Support (1-800-483-9106).
000014	XML improperly formatted: No School Info tag found.	The XML imported to CampusNexus Student is not recognizable. Please contact Support (1-800-483-9106).
000015	XML improperly formatted: More than one School Info tag found.	The XML imported to CampusNexus Student is not recognizable. Please contact Support (1-800-483-9106).
000016	Disbursement is already scheduled. Duplicate Date and Amount.	Your servicer has sent a scheduled disbursement for a date and amount for the identified fund source that is already on file. If the record in CampusNexus Student is identical and was added manually, you can choose the option clear the disbursements. You may also choose to remove the scheduled disbursement in CampusNexus Student and post the resolution.

Error Code	Description	Cause/Solution
000017	Cannot Add Refund, Student Aid Record not found.	Your servicer has sent a negative disbursement record with a servicer record identifier that is not found in the scheduled aid file. It is possible that a previous exception is on file for this student that caused the record to not be updated. Confirm that all exceptions are resolved. If this issue is still not resolved, you may need to re-import an identifier file (year to date match file from your servicer). Please contact Support (1-800-483-9106).
000018	Servicer (Global) - Budget Period Start Date (positions 15-20) is not a valid date.	The servicer record identifier contains the start date of the students budget period (or academic year). This date is in an invalid format. Contact your servicer and request a new record with an accurate date for this student.
000019	Servicer Record ID not found in Student Aid Table.	A disbursement record was imported with a Servicer Record ID that is not found in the student aid file. It is possible that a previous exception is on file for this student that caused the record to not be updated. Confirm that all exceptions are resolved. If this issue will still not resolve, you may need to re-import an identifier file (year-to-date match file from your servicer). Please contact Support (1-800-483-9106).
000020	Terms are required for disbursements. Term could not be determined from servicer data.	Terms are required on all scheduled disbursement records in CampusNexus Student. A scheduled disbursement was imported from your servicer for which the appropriate term could not be determined. CampusNexus Student matches disbursement date, fund source, and academic year start date from the disbursement import file to a disbursement schedule in CampusNexus Student. Verify that a disbursement schedule exists in CampusNexus Student in which the academic year start date range matches the student's, the fund source matches, and the disbursement date matches.
000021	Servicer Record ID already on file and disbursements have been paid.	This error will result when you import a scheduled aid file (C2MA) for a record where the Servicer Record ID is already on file, and at least one disbursement has been paid. CampusNexus Student will update the amounts on the award if no disbursements are paid. However, to maintain the total disbursements equal to the total award, once a disbursement is in a paid status, the amount packaged will not be updated on import. If a change to the amount is necessary, change the data in CampusNexus Student and use the resolve option to post this entry.

Error Code	Description	Cause/Solution
000022	Disbursement on file for same date, but with a different amount	This error occurs when CampusNexus Student locates a disbursement it believes is a correct match, but the amount in CampusNexus Student is not the same as the amount in the exception details. To resolve this exception, you can: (1) Edit the amount through Financial Aid Packaging so that it matches the amount in the exception details; (2) Edit the amount in the exception details so that it matches the amount in Financial Aid Packaging; or (3) Contact Global to send you a corrected record.
000023	Disbursement already on file in same month. Cannot add disbursement	This error occurs when CampusNexus Student locates a disbursement it believes is a correct match, but the date in CampusNexus Student is not the same as the date in the exception details. To resolve this exception, you can: (1) Edit the date through Financial Aid Packaging so that it matches the date in the exception details; (2) Edit the date in the exception details so that it matches the date in Financial Aid Packaging; or (3) Contact Global to send you a corrected record.
000024	SSN not found for Document	This error will occur when CampusNexus Student cannot locate the student to update their document tracking with the information in the exception details. To resolve this error, you can: (1) Add the student record and enroll the student into the appropriate program; (2) Update the SSN in the exception details so that it matches the appropriate student in CampusNexus Student; (3) Update the SSN for the appropriate student so that it matches the SSN in the exception details; or (4) Contact Global to send you a corrected record.
000025	Document Mapping not found for Campus	This error will occur when CampusNexus Student cannot locate the Global document in the Servicer Configuration Document Mapping grid. To resolve this error: (1) Update the mapping for the document identified in the exception details; or (2) Contact your system administrator to update the configuration for you.

Error Code	Description	Cause/Solution
000027	The student identifier for this student does not exist in the database. Please contact your System Administrator for assistance with resolving this exception.	This exception will occur when the record being imported does not include enough information to locate the student. Look for one of the following conditions in the exception details: 1. The SchoolAcademicID field is 0 and the SSN field is blank. - OR - 2. The SchoolAcademicID field is not 0, but no student exists in the campus where studentID matches SchoolAcademicID. Steps to resolve: If the record meets condition #1, try to locate the student. If the student exists, update the SSN field in the exception details and attempt to resolve the exception again. If you cannot find the student, ask Global to send correct and resend the record. If Global resends the record, you will need to delete this exception when you receive the replacement record from Global. Identifier information cannot be added to student records directly from the CampusNexus Student interface, so records meeting condition #2 must be resolved with system administrator assistance. Your system administrator can contact Support (1-800-483-9106) for instructions on updating the record; or you can ask Global to correct and resend the record. If Global resends the record, you will need to delete this exception when you receive the replacement record from Global.

Error Code	Description	Cause/Solution
000028	The enrollment identifier for this student does not exist in the database. Please contact your system administrator for assistance with resolving this exception.	This exception will occur when the student is located, but the record being imported does not include enough information to identify the enrollment. Look for one of the following conditions in the exception details: 1. The EnrollmentID field is 0 and no enrollments exist for the student. - OR - 2. The EnrollmentID field is not 0, but the system cannot find an enrollment that matches the information in the EnrollmentID field. Steps to resolve: Identifier information cannot be added to enrollment records directly from the CampusNexus Student interface, so records with this exception error must be resolved with system administrator assistance. Your system administrator can contact Support (1-800-483-9106) for instructions on updating the record; or you can ask Global to correct and resend the record. If Global resends the record, you will need to delete this exception when you receive the replacement record from Global.

Error Code	Description	Cause/Solution
000029	The academic year identifier for this student does not exist in the database. Please contact your system administrator for assistance with resolving this exception.	This exception will occur when the academic year cannot be located. Look for one of the following conditions in the exception details: 1. The Academic_YR_ID field is not 0, but the system cannot find an academic year that matches the information in the Academic_YR_ID field. - OR - 2. Academic_YR_ID field is 0 and the BudgetPeriodStartDate field does not fall within the start and end dates of any academic year record for the student. - OR - 3. Academic_YR_ID field is 0 and the FundYear field does not match AwardYear1 or AwardYear2 on any of the academic year records for the student. Steps to resolve: Identifier information cannot be added to student records directly from the CampusNexus Student interface, so records meeting condition #1 must be resolved with system administrator assistance. Your system administrator can contact Support (1-800-483-9106) for instructions on updating the record; or you can ask Global to correct and resend the record. If Global resends the record, you will need to delete this exception when you receive the replacement record from Global. If the record meets condition #2 or #3, you can resolve the exception by making one of the following changes: A. Update the BudgetPeriodStartDate field so that it falls within the start and end date of the appropriate academic year record for the student. B. Update the FundYear field so that it matches AwardYear1 or AwardYear2 of the appropriate academic year record for the student.
000030	The financial aid award identifier for this student does not exist in the database. Please contact your system administrator for assistance with resolving this exception.	This exception will occur when the award record cannot be located in the academic year for the student. Steps to Resolve: Create the missing award.

Error Code	Description	Cause/Solution
000031	Terms are required for refund/tuition adjustment.	This exception will occur when the campus is set up to require term codes, and the system is unable to locate the term using the values in the file. 1. For the AP (Refund) file, the system looks for the most recent term (ending last) on the students Ledger Card for transactions meeting the following conditions: a. Transaction is a payment. b. The fund source for the transaction matches the FundType field. c. The Term Start or Term End date falls between the values in the TermStartDate field and the TermEndDate field. 2. For the AR (Tuition Adjustment) file, the system looks for the most recent term (ending last) on the Ledger Card for transactions meeting the following conditions: a. The Term Start or Term End date falls between the values in the TermStartDate field and the TermEndDate field. b. Source = R c. Type = C d. Code (Bill Code) = TUIT **Note**: In case point 1.c or 2.a fails, there is a tolerance of 1 month. It means, TermStartDate will be reduced by one month and TermEndDate will be increased by one month and #1.c or 2.a executed. If still system fails to find any error. This exception will occur. Steps to resolve: Adjust the values in the TermStartDate and/or TermEndDate fields on the import record so that they meet the conditions in 1.c. or 2.c. Alternatively, you can update the term code on the ledger card transactions so that they meet the same conditions.
000032	Unable to locate the original refund	This exception will occur when processing refund revisions (Withdrawalcode = WX). The OriginalAmount field for the revision does not match the amount on any ledger card transaction or refund for the fund source. Steps to Resolve: Locate the original transaction on the students ledger card. Update the OriginalAmount field so that it matches the amount of that transaction.

Error Code	Description	Cause/Solution
000033	Unable to locate the original tuition adjustment.	This exception will occur when processing tuition adjustment revisions (Withdrawalcode = WX). The OriginalAmount field for the revision does not match the amount on any ledger card transaction meeting the following conditions: a. The Term Start or Term End date falls between the values in the TermStartDate field and the TermEndDate field. b. Source = R c. Type = C d. Code (Bill Code) = TUIT Steps to Resolve: Locate the original transaction on the students ledger card. Update the fields mentioned above so that the transaction details match the exception details; or update the exception details so that they match the transaction details.
000034	Batch date in Servicer record data is less than the minimum transaction date set for the Campus	This exception will occur when the value in the GlobalBatchDate field is less than the minimum transaction date for the users default campus. The minimum transaction date is located in the Period End Dates form. Steps to Resolve: Modify the value in the GlobalBatchDate field so that it is greater than or equal to the minimum transaction date for the users default campus.
000035	Unexpected error has occurred while saving the record in database. Please contact your system administrator for assistance with resolving this exception.	This exception is rare, but occurs when a system related error has occurred. Steps to Resolve: Attempt to resolve the exception. If problem continues, contact your system administrator or Support (1-800-483-9106) for assistance.
000036	Refund Exceeds Amount Available	This exception occurs when the amount of the refund you are importing exceeds the total amount disbursed for the award year and fund source. Steps to Resolve: Contact Global to verify the amount of the refund. If the amount is incorrect, ask Global to send you a new record with correct amount. When you import the correct record from Global, delete this exception. As an alternative, Global can advise you to correct the amount in the exception details. You can then attempt to resolve the exception again.

Error Code	Description	Cause/Solution
000037	No Global Refund Policy Configured for Campus	This exception occurs when you import a Refund Calculation or Tuition Adjustment (AP or AR file). The system cannot find the refund policy assigned to the campus when creating the Global Refund Calculation. Steps to Resolve: Contact your system administrator to configure a refund policy to use with Global under the Global configuration settings for your campus.
000038	Revisions Not Allowed to Incomplete Refund Calculations	This exception will occur when you import a revision for a Global Refund, but the Global Refund Calculation is not posted. Revisions cannot be processed against incomplete refund calculations. Global may have sent this revision in error, may not have sent the original calculation to you, or an exception for the original calculation may have been deleted. Steps to Resolve: Delete the exception if it was sent in error. If Global is sending you the original calculation, you must import the original calculation prior to resolving this exception again. If you find that an exception for the original calculation was deleted, restore it, and resolve it prior to resolving this exception again. Note: When Global sends an original amount of zero (0), for Refund Revisions "zero drop" records are not sent, therefore the system *cannot* locate the original transaction for that Refund Revision. This only affects the C2AP files. Additionally, since a refund of zero (0) *cannot* be posted for a refund through the CampusNexus Student interface, the exception can never be resolved. Therefore, CampusNexus Student will not search or attempt to void/delete the original refund, when importing the AP file. Instead, the system will just create the new refund. In addition, when additions/updates against the refund calculation table, for 'WX' records with zero (0) original amounts, the record will be inserted, not updated.
000039	Document is Award Year Specific and the Award Year has not Been Supplied.	This document is configured as an Award Year Specific document in CampusNexus Student, yet no award year has been provided by the servicer. Steps to Resolve: Verify whether the CampusNexus Student document should be award year specific. If not, update the configuration and the record will match. If so, contact your servicer and have them resend the record to you with an award year. If Global resends the record, you will need to delete this exception when you receive the replacement record from Global.

Paid Disbursement Validation

With the Perform Paid Disbursement Validation form you can highlight a disbursement batch and then click **Refund Criteria** to run the Disbursement Approval process. The approval process uses the criteria that you set up for the fund source (**Lists > Financial Aid > Fund Source >** select a fund **> Disb Approval Criteria**). Once the approval process is finished, those disbursements that failed are displayed.

To work with the Paid Disbursement Validation forms:

1. Navigate to **Daily** > **Financial Aid** > **Servicer Processing > Paid Disbursement Validation**.
2. Highlight a batch on the form and click **Refund Criteria**.
3. For each student that you highlight, the bottom box will explain why the disbursement failed. You can edit the Amount field, check the Refund? box, Print, and Schedule Refunds on this form.
4. When you click **Schedule Refunds**, a scheduled refund will be processed for the students that have the Refund check box selected and the batch will no longer be accessible.

FAGL Overview

Financial Aid General Ledger Definition - Authorization Levels

The Financial Aid General Ledger (FAGL) facilitates tracking of authorization levels by fund source. There are four Title IV funds, Federal Pell Grant, Federal SEOG, Federal Work Study (FWS), and Perkins Loan, to which Levels of Funding are applied. For Pell, SEOG, and FWS, the level of funding is called "authorization level". For Perkins, it is called "level of expenditure".

All authorization levels cover a financial aid year (July 1 to June 30). The authorization level controls how much an institution will package and disburse from the fund in an award year.

- For **Pell**, the authorization level is increased or decreased during the award year based on the institution's level of disbursement (RFMS Disbursements Accepted).
- For **SEOG**, the authorization level is set at the beginning of the award year based on the prior year's FISAP report. It will very rarely change during the award year.
- For **FWS**, the authorization level is set at the beginning of the award year based on the prior year's FISAP report. It will very rarely change during the award year.
- For **Perkins**, the level of expenditure is controlled by the payment activity of the students with outstanding Perkins Loans. As existing loans are paid, the funds can then be lent out to other students.

Institutions can transfer authorization from Perkins to FWS or SEOG. They can also transfer funds from FWS to SEOG.

Institutions can also transfer up to 10% of the authorization for FWS and SEOG from one award year to the next.

You can use the FAGL system in CampusNexus Student to post increases and decreases to the authorization levels.

Pell grant authorization levels are assigned to the "Reporting Pell ID". An organization can have one or many campuses assigned to the same Reporting Pell ID. The authorization comes from the Department of Education (ED) under the Reporting Pell ID. When posted to CampusNexus Student, the institution posts the amount to the Reporting Pell ID. Each campus that belongs to the Pell ID has the authorization available for packaging and disbursing funds.

SEOG, FWS, and Perkins authorization levels are assigned to the **Campus-Based Serial Number**. This is a 6-digit number that is assigned by ED. An organization can have one or many campuses assigned to the same serial number. The authorization comes from ED under the serial number. When posting to CampusNexus Student, the institution has the option of posting the entire authorization amount to the serial number, or it can split the amount and post individual amounts to each campus within the serial number.

Setting Up the FAGL

Setup > Campus Locations > Campuses > Financial Aid

There is a text box the Campus-Based Serial Number on the Financial Aid tab.

Setup > Financial Aid > General

An option on this form controls the level at which the institution will be using the FAGL system. The options are:

- Use FA G/L for Authorization Levels Only
- Use ALL FA G/L Functions

Lists > Financial Aid > Fund Source

There is a check box for the **Allow Manual Post** flag. A drop-down list box shows the FAGL Fund selections.

Lists > Financial Aid > FA G/L Funds

This tab lists the FAGL Funds from the FAGL Fund table. When you edit or add a FAGL Fund, a form is displayed to enter the information related to the fund.

Daily Processing

Daily > Student Accounts > Post Payments

The Payment Posting form only lists fund sources where the "**Allow Posting Directly to Ledger Card**" field is Yes.

Daily > Financial Aid > Enter FA G/L Transaction

This option displays a submenu with two options:

- Authorization

  A form for displaying and updating Authorization Levels for FAGL Funds is displayed when you select the Daily > Financial Aid > Enter FA G/L Transaction > Authorization menu option. The form prompts for the Financial Aid Year and Fund. It then displays the current authorization levels for each Reporting Pell ID for Pell Grants. Depending on the Authorization Type for campus-based programs, the authorization levels are displayed by Serial number or Campus for campus-based programs. You can post increases and decreases to authorization, transfers of authorization, or carry-forward > carry-back transactions. Transfers of authorization can be entered for Perkins and FWS funds. Carry-forward > back transactions can be entered for FWS and SEOG funds.

- Journal Entry

  The Journal Entry option is not available if the "Authorization Only" option is selected under Setup/Financial Aid/General. If you change this option, log off and on to see the effect of the change. Otherwise, the form for entering FAGL journal entries is available from the Daily > Financial Aid > Enter FA G/L Transaction > Journal Entry menu option.

Commitment Levels

View > Financial Aid > Packaging

Typically, the commitment level for Pell grants is set to 100 percent. For Perkins loans, SEOG, and Federal Work Study, the commitment levels may be set higher than 100 percent because some students may not accept the aid offered under these programs.

Logic is included in the packaging forms to warn the user when the amount packaged for the fund source exceeds the allowable commitment level for the fund source. The program will check the FAGL Authorization table for the amount authorized for the award year and multiply this amount by the commitment level for the fund source. If the new packaging amount will exceed the commitment level, a warning message is displayed indicating that you have exceeded the level for the year. In addition, after a student is packaged, the program will update the amount-packaged column in the FAGL Authorization table.

FAGL logic is also included in the auto-packaging methodology. The program will check the commitment level for a fund source before adding the fund source to the student's scheduled aid. If the commitment level is exceeded, a message is displayed so you know why a particular fund source was not auto-packaged. If an FAGL-controlled amount is auto-packaged, the program will update the amount-packaged column in the FAGL Authorization table.

Reports > Financial Aid

The following FAGL-related reports are available:

- Financial Aid G/L Authorization Levels
- Financial Aid G/L Chart of Accounts
- Financial Aid G/L Transaction Detail
- Financial Aid G/L Trial Balance

Initialization of FAGL

- A Default Chart of Accounts is supplied with CampusNexus Student.
- Your institution must enter the Levels of Authorization for each Fund.

Miscellaneous FAGL Codes

FAGL Fund Types

G - GAPS
P - Federal Pell Grant
S - Federal SEOG
W - Federal Work Study
K - Federal Perkins Loan
D - Direct Loan - GAPS
L - Direct Loan - Program Fund
F - FFEL
O - Other (Non-Title IV Fund)
T - Federal TEACH Grant
I - IASG

FAGL Fund Authorization Types (Distribute Authorization)

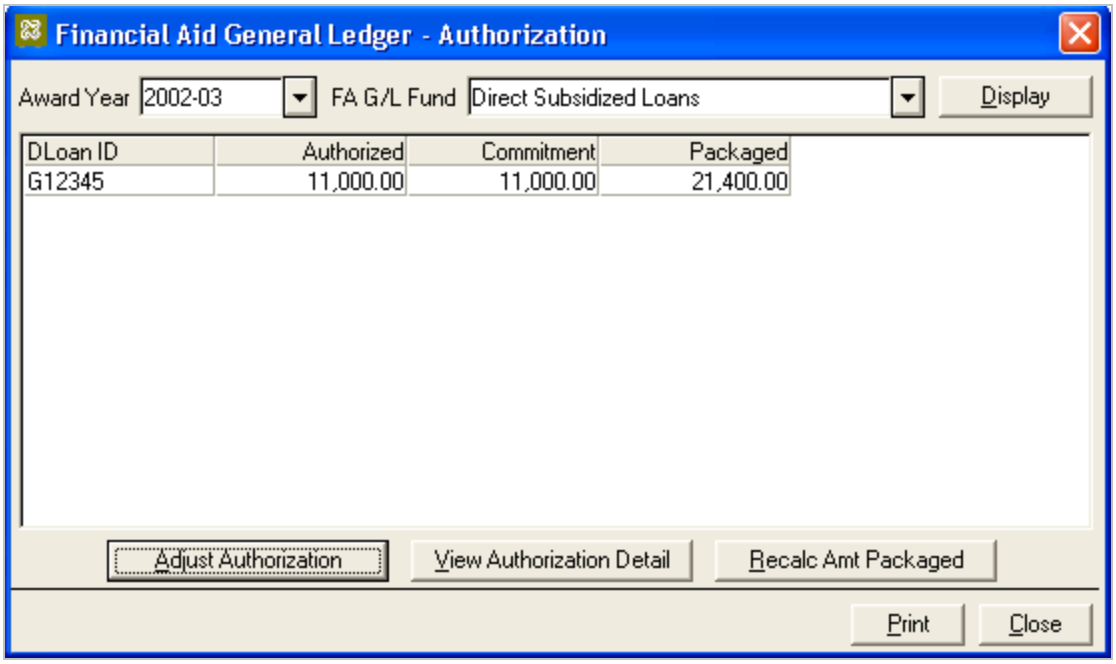
C - By Campus
D - By Direct Loan ID
S - By Serial Number

FAGL Authorization

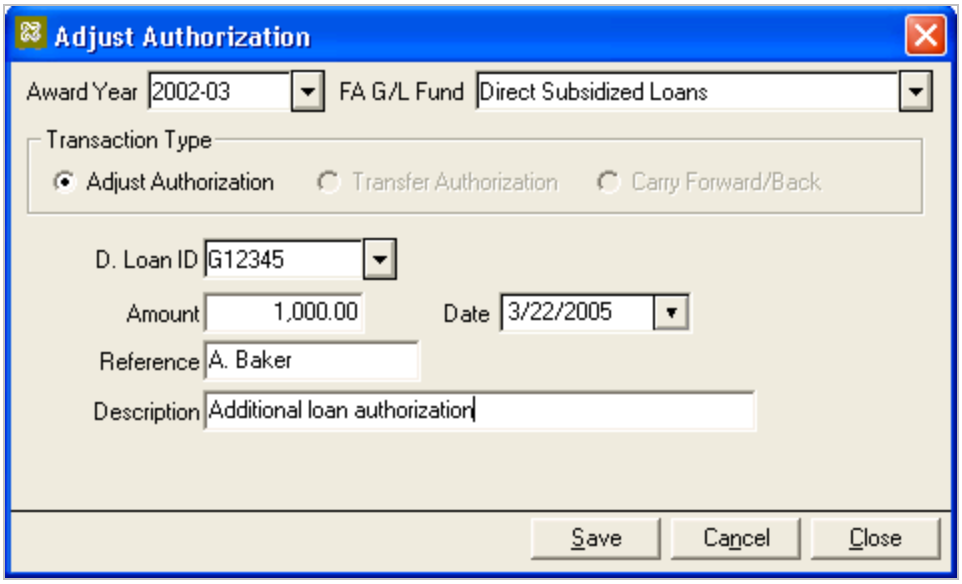
This form displays and updates Authorization Levels for Financial Aid General Ledger (FAGL) Funds. The form prompts for the Financial Aid Year and Fund. It then displays the current authorization levels for each Reporting Pell ID for Pell Grants and, depending on the Authorization Type for Campus-based programs, the authorization levels are displayed by Serial number or Campus for campus-based programs. You can then post increases and decreases to authorization, transfers of authorization, or carry-forward/carry-back transactions. The same authorization level for FA G/L funds functionality currently implemented for Pell Grants, has been extended to ACG and SMART grants. Students must be U.S. citizens and eligible for a Pell Grant to be eligible for a ACG or SMART grant.

To work with FAGL Authorizations:

1. Navigate to **Daily > Financial Aid** > **Enter FA G/L Transaction** > **Authorization**. The Financial Aid General Ledger - Authorization form is displayed.



2. Select an Award Year from the list box.
3. Select an FA G/L Fund from the list box.
4. Click **Display to** see all funds for the combination of award year and FAGL fund.

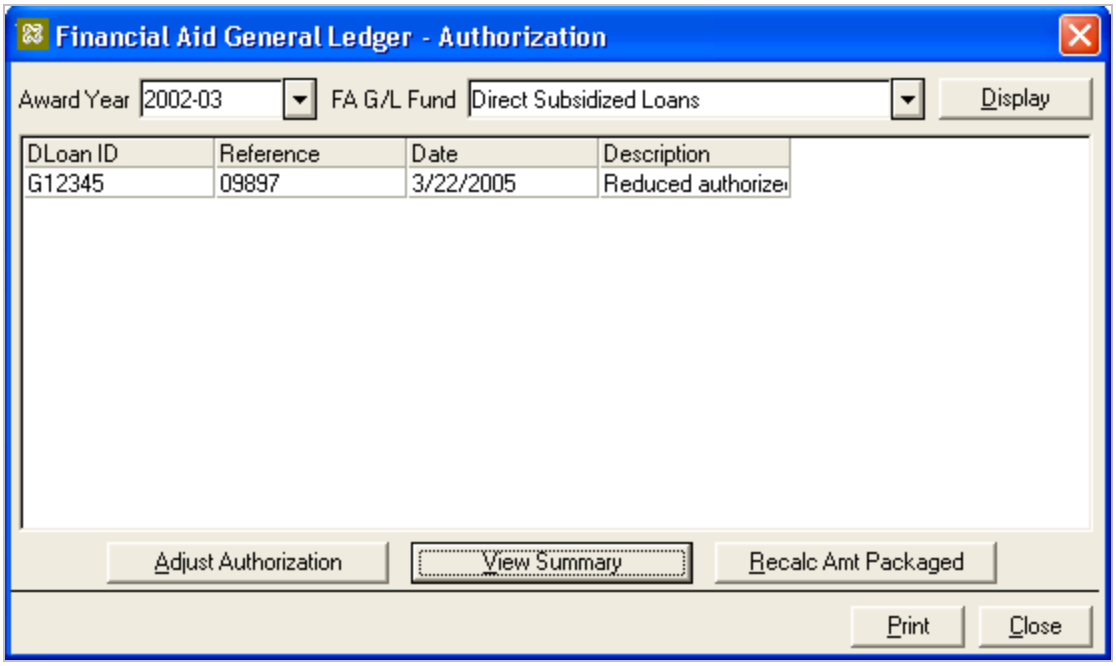


5. Select an Award Year from the list box.
6. Select an FA G/L Fund from the list box.
7. Select a **Transaction Type**. The options are:

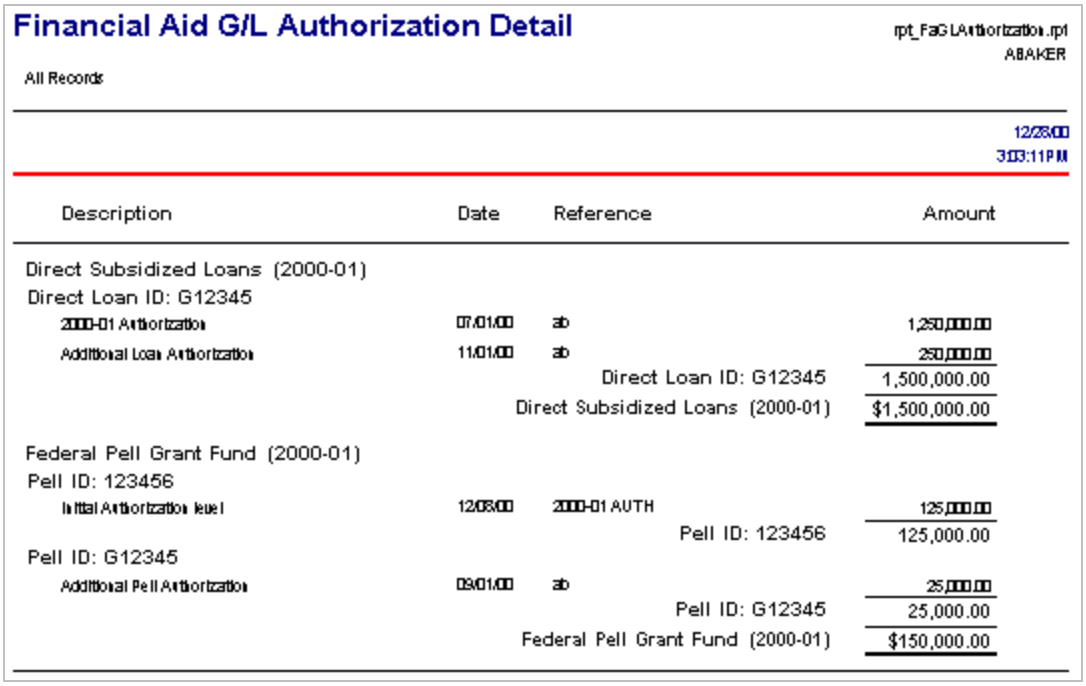
   - Transaction Types are Adjust Authorization
   - Transfer Authorization, and Carry Forward/Back

   Transfers of authorization are only allowed for Perkins and FWS funds.

   Carry-forward/back transactions are only allowed for FWS and SEOG funds.
8. Depending on the fund involved in your transaction, select the appropriate ID. In the illustrated example, it is the Direct Loan ID. The ID could be the Pell ID for Pell-related funds or an ED-assigned serial number (for Federal Work Study, for example).
9. Specify the **Amount** and **Date** of the adjustment.
10. Specify the **Reference** and **Description** for the transaction.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.
12. Click **Adjust Authorization** to enter an adjustment to an authorization level. The program will display the Adjust Authorization form.
13. Click **View Authorization** Detail to see a detailed list of adjustments to the selected fund. The program will display a grid similar to the one below. The column headers may vary depending on the type of fund.



14. Click **View Summary** to return to the summary view of the form.
15. Click **Recalc Amt Packaged** to recalculate the packaged amount after making adjustments.
16. Click **Print** to print the "Financial Aid G/L Authorization Detail Report". This report lists detailed transactions affecting the selected funds. You can select one or more funds, the award year, and a transaction date range.



Financial Aid G/L Authorization Detail

rpt_FaGLAuthorization.rpt
ABAKER

All Records

12/28/00
3:03:11 PM

Description	Date	Reference	Amount
Direct Subsidized Loans (2000-01)			
Direct Loan ID: G12345			
2000-01 Authorization	07/01/00	ab	1,250,000.00
Additional Loan Authorization	11/01/00	ab	250,000.00
		Direct Loan ID: G12345	1,500,000.00
		Direct Subsidized Loans (2000-01)	$1,500,000.00
Federal Pell Grant Fund (2000-01)			
Pell ID: 123456			
Initial Authorization level	12/08/00	2000-01 AUTH	125,000.00
		Pell ID: 123456	125,000.00
Pell ID: G12345			
Additional Pell Authorization	03/01/00	ab	25,000.00
		Pell ID: G12345	25,000.00
		Federal Pell Grant Fund (2000-01)	$150,000.00

17. Click **Close** to close the form.

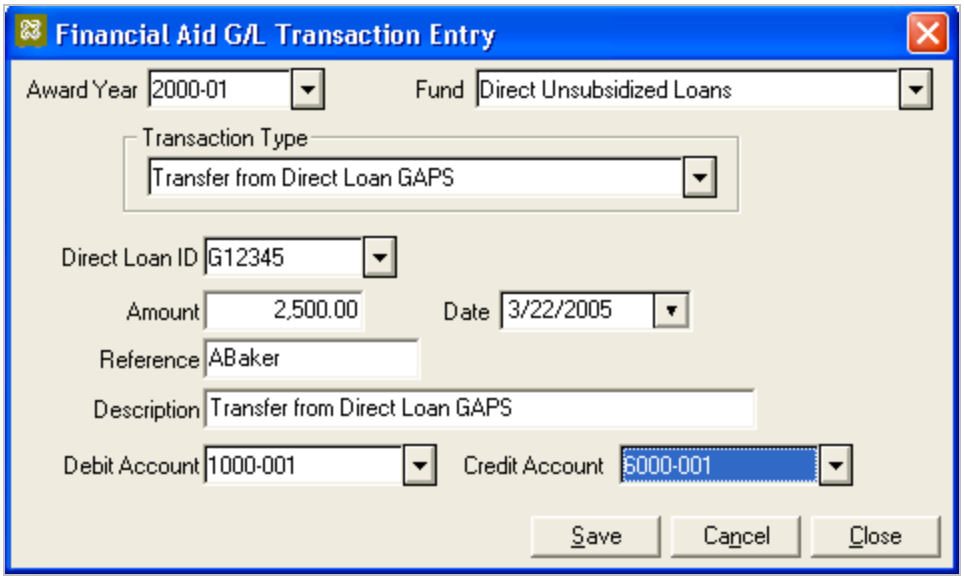
FAGL Journal Entry

Use this form to create journal entries for the CampusNexus Student Financial Aid General Ledger (FAGL) system. For more information, see FAGL Overview".

To create FAGL journal entries:

1. Navigate to **Daily** > **Financial Aid** > **Enter FA G/L Transaction** > **Journal Entry**. The Financial Aid G/L Transaction Entry form is displayed.

   The Journal Entry option is disabled if the "Authorization Only" option is selected under **Setup > Financial Aid > General**. If you change this option, log off and on to see the effect of the change.



2. Select the **Award Year** and **Fund**. Funds are set up under Lists > Financial Aid > FA G/L Funds.
3. Select the Transaction Type. The list of transaction types will vary depending on the fund you select. In the example transaction, the transaction types are:
   - Disburse to Student
   - Refund from Student Accounts
   - Transfer from Direct Loan GAPS
4. Select the ID of the fund to which the transaction applies. The label on the ID field will vary according to the fund you select. In the example transaction it is labeled **Direct Loan ID**. If the example was for a Pell Grant fund, the ID field would be Pell ID. For a Federal Work Study (FWS) fund, it would be Serial Number. Only those IDs that apply will be listed.
5. Specify the **Amount** and **Date** of the transaction.
6. Specify a **Reference** code.
7. Enter a **Description**.
8. Select the **Debit Account** and **Credit Account**. CampusNexus Student defaults these account numbers to the ones set up for the fund but you can select different accounts from the lists.

9. Click **Save**. CampusNexus Student saves the transaction and prepares the form for another entry.
10. Click **Close** to close the form.

Clear Estimated Awards

Use the Clear All Estimated Awards form to clear all remaining estimated awards for a selected award year.

Financial aid award estimates can be prepared for both prospective students (leads) and for enrolled students. Refer to View > Financial Aid > Financial Aid Estimates for more on the estimating procedure.

Some of the financial aid estimates will be converted to actual awards when students are enrolled. Estimated awards that are converted during enrollment are removed from the table of estimated awards. Those estimates that are not converted will remain in the table of estimated awards indefinitely unless they are cleared by using this procedure.

To clear all remaining estimated financial aid awards for a selected award year:

1. Navigate to **Daily** > **Financial Aid** > **Clear Estimated Awards**. The Clear All Estimated Awards form is displayed.
2. Select an **Award Year**.
3. Click **Clear**. CampusNexus Student deletes from the database all estimated Financial Aid awards for the selected award year in your session default campus.
4. Click **Close** to close the form.

Award Year Settings

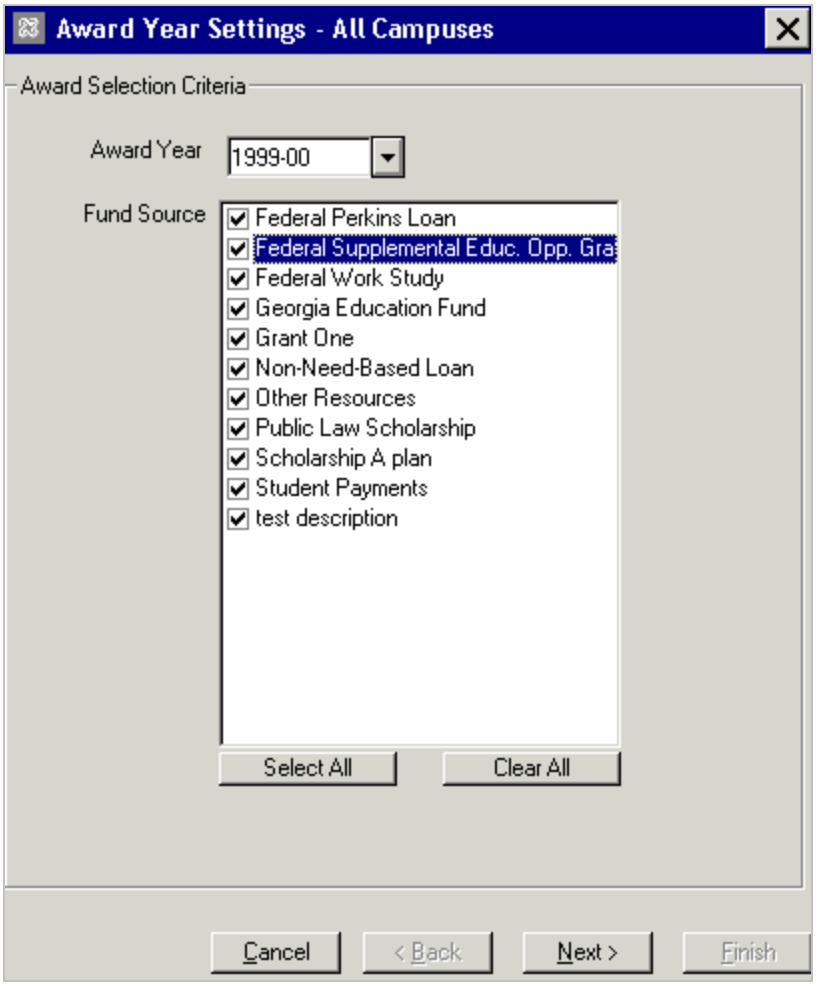
Students are packaged by the Academic Year in CampusNexus Student. Hence, the maximum award limits defined by Title IV regulations for Award Years are not taken into consideration. To prevent awarding more than one Pell grant during an award year and to designate a limit of one award per Award Year for other fund sources in the application, users can select an Award Year, select any of the fund sources normally available and set a maximum amount associated with the award.

To configure Award Year settings for individual or all campuses:

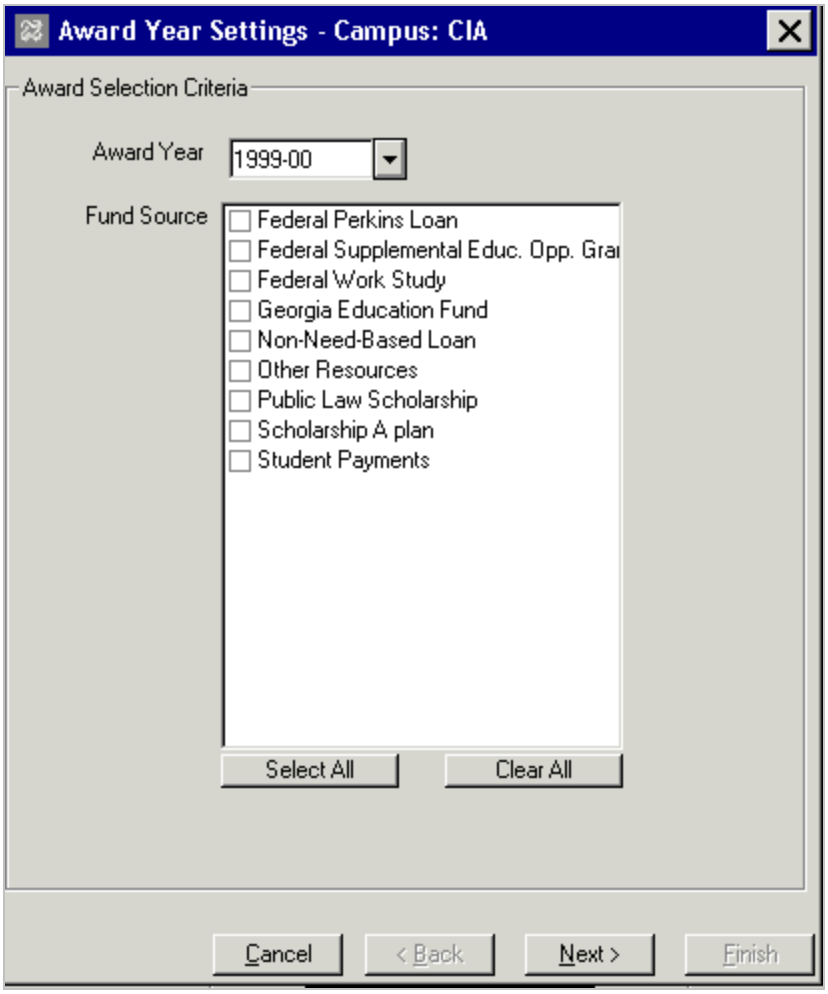
1. Navigate to the Award Year Settings form via one the following paths:
   - Setup > Financial Aid
   - Setup > Campus Locations > Financial Aid
   - View > Financial Aid > Awards > Auto-Package or Re-Package.
   - Lists > Financial Aid > Fund Source > Add/Edit > Fund Source Code Setup > Campus Configuration
2. Click **Set Award Limits** to configure each campus separately.

   The Award Year Settings form displayed on the left was accessed via the Setup > Financial Aid. The form on the right was accessed via the Setup > Campus Locations and Lists > Financial > Fund Source tab path. The fund sources are presented in a multi-select list. (Pell is not user-configurable for this enhancement, therefore the Pell fund source is excluded from this list). If you accessed the award year settings form through the Setup path, the selections made here only apply to the selected campus location.

Setup > Financial Aid



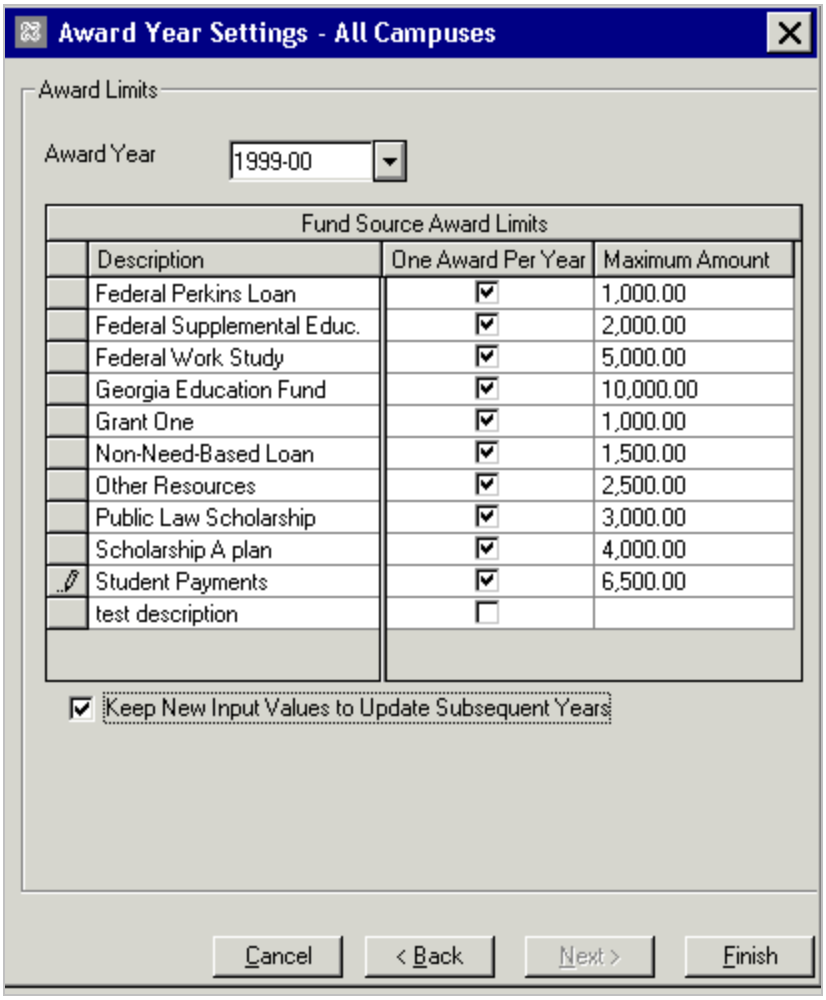
Setup > Campus Locations and Lists > Financial > Fund Source



3. Select the fund source(s). You can select sources individually or click **Select All** or **Clear All**.
4. Click **Next >**. CampusNexus Student displays the **Award Limits** form.
    a. Choose an **Award Year** from the drop-down list.
    b. Select or clear the **One Award Per Year** check boxes associated with the fund sources.

    If you indicate that only one award for a fund source for the Award Year is allowed, CampusNexus Student prevents users from adding additional awards for the fund source. Validation occurs at the student level rather than the enrollment level.

    c. Specify a **Maximum Amount** ($) for each fund source. The maximum limits are defined in the packaging method setup. If this feature is selected, it supersedes the maximum limit defined in the packaging method setup.



5. Select **Keep New Input Values to Update Subsequent Years** to apply the award year settings to subsequent award years. This makes configuration of subsequent award years easier after an initial award year has been configured. Otherwise, you need to configure award year settings for every award year.

Print Queued Award Letters in Batch Mode

Financial Aid Officers are constantly packaging students and printing award letters. Often these Officers will package a number of students during the day, but will prefer to print the letters in batch mode at the end of the day. Financial Aid Officers could be more productive if they could focus more on packaging during the work day and schedule the printing of the award letters at a later time.

Award letters printed on an individual basis may be printed from the Financial Aid Academic Year screen. You can select the award year, award letter and subsequently print the award letter as one process. The following provides you with the ability to print the award letters in a batch mode.

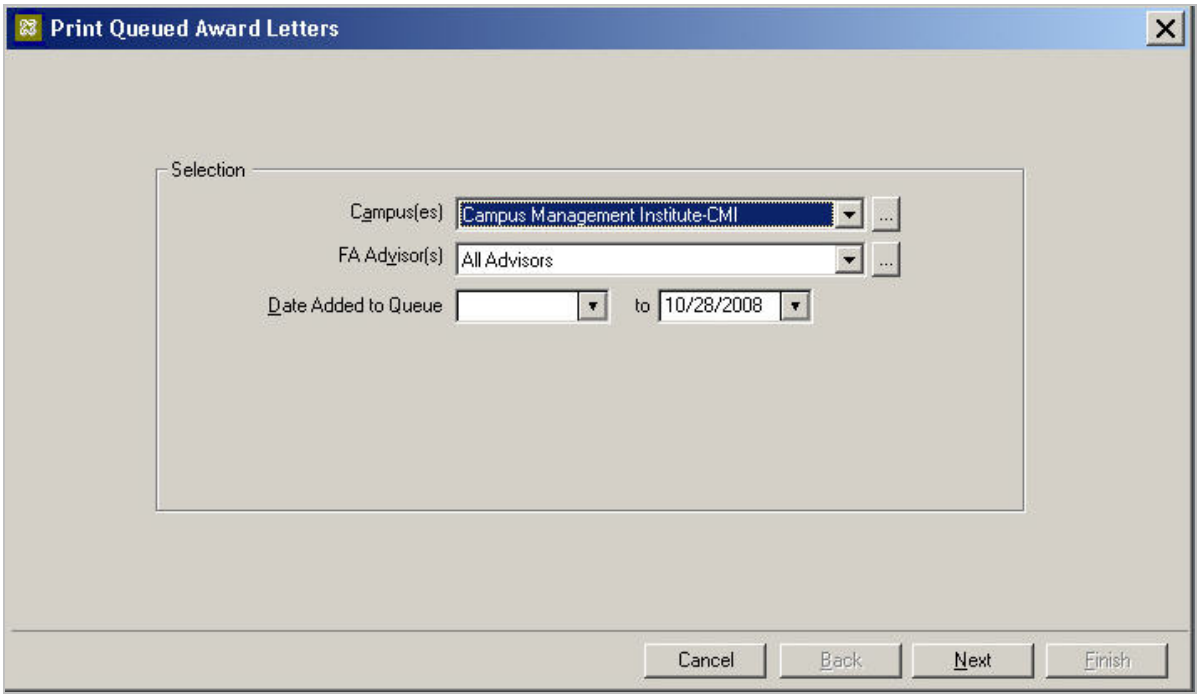
Security authorization will need to be setup for Staff Groups under the Setup > Security path. Select the "Financial Aid - Print Queued Award Letters option" from the Daily - Menu Options drop-down list and select the applicable Staff Group that will have authorization to print the award letters in a batch mode.

An option entitled "Allow Printing to Award Letter Queue" is located on the Financial Aid Settings form under the Packaging tab. Navigate to Setup > Financial Aid > Packaging tab to access this option. By selecting the check box, Financial Aid Officers can add Award Letters to a queue to be processed later or continue to print the award letters immediately.

You must have authorization to perform this task. This option will gather the queued letters, by Campus, Date Queued and Financial Aid Advisor. A list of students will appear and you can then print the award letters. The system will allow the award letters to be reprinted as needed.

To print a batch of Award Letters:

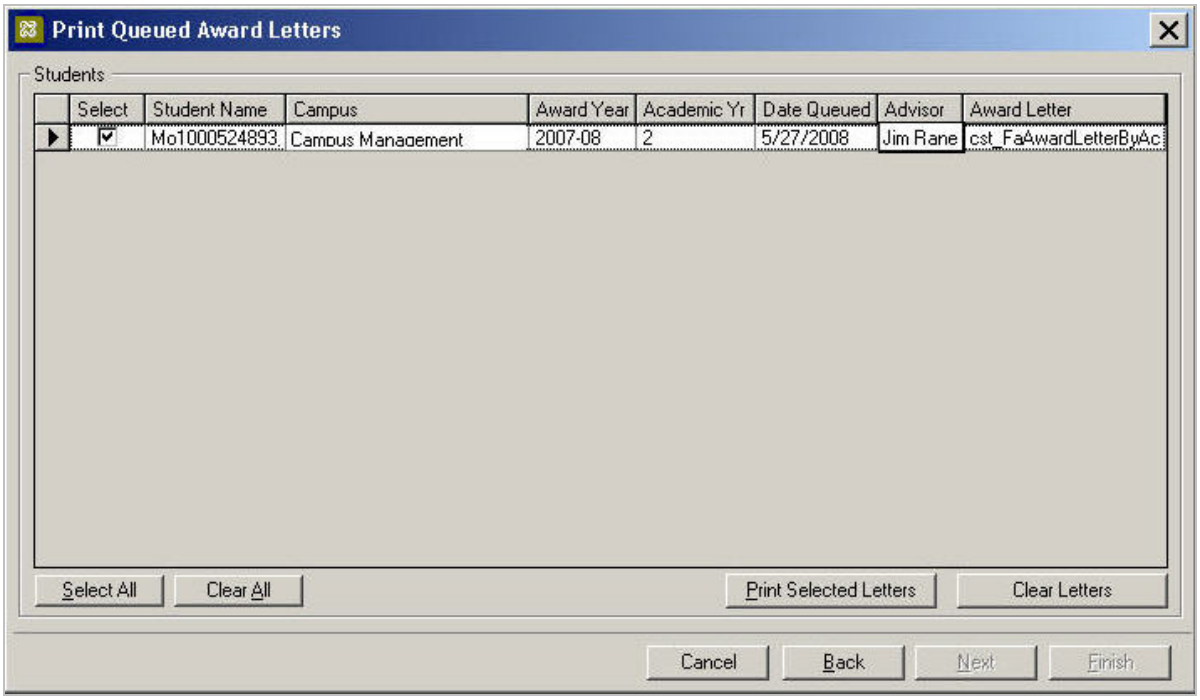
1. Navigate to **Daily** > **Financial Aid** > **Print Queued Award Letters**. The Print Queued Award Letters selection form is displayed.



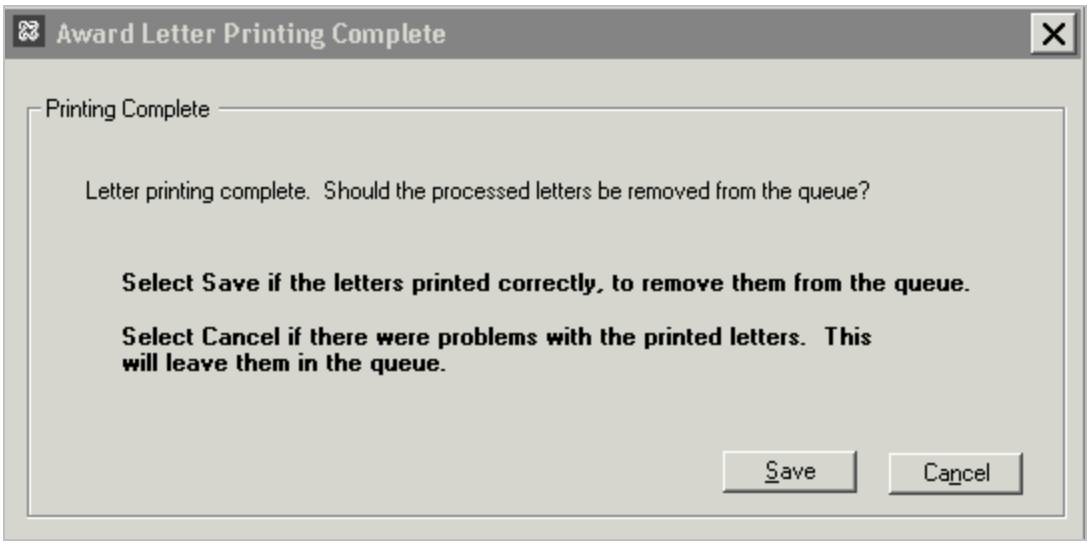
2. Select a campus from the **Campus(es)** list or multiple campuses using the ... button. CampusNexus Student displays only the campuses to which you have access.
3. Select a Financial Aid Advisor from the **FA Advisor(s)** list or multiple advisors using the

... button. **Note**: Financial Aid Advisors belonging to any of the selected campuses will be populated in this list.

4. Select start and end dates to reflect the date the award letters were added to the queue. Select a start date from the first **Date Added to Queue** list and end date from the last list.
5. Click **Next** to continue processing the batch. An informational message appears when there are no award letters queued that match the selection criteria. Click **OK** to change your selections.
6. A list of students is presented, along with the name of the campus the students are associated with. Click **Select All** to print award letters for all students listed, or click **Clear All** to not print any award letters.



7. Click **Print Selected Letters** once you have selected the student's queued award letters that you want to print.
8. Follow the instructions to remove the letters from the queue or leave them in the queue.



Note: If you click **Clear Letters** to remove all selected student's award letters from the print queue, the following message is displayed: *"OK to cancel the selected letters and remove them from the queue?"*

Click **Yes** to continue or **No** to cancel the request.

FAGL Campus Allocations

The Financial Aid General Ledger in CampusNexus Student allows users to track authorization, and create general journal entries.

Note: This topic deals with setting and monitoring allocations only. For detailed information on other aspects of FAGL Authorization, please refer to FAGL Authorization.

Institutions can input fund allocation amounts and amounts as percentages that CampusNexus Student will use to determine how much each campus can award and pay for each fund source. CampusNexus Student also tracks authorization for each of the aid fund sources; prevents users from packaging students for aid of a fund type when that fund's authorization has been expended; and provides a feature to deobligate aid.

When the aid is deobligated, the authorization for that fund source is automatically increased and available to be awarded to other students. This only applies to campus-based aid, Pell authorization is increased as Pell is requested, and schools do not receive FFEL authorization.

This feature is enabled in the General tab of the Financial Aid Setup form.

To set up campus allocations:

1. Navigate to **Daily > Financial Aid > Enter Financial Aid G/L Transaction > Authorization**.
2. In the **Financial Aid General Ledger - Authorization** form, select an Award Year and one of the following FA G/L funds:

   - Federal Perkins Fund
   - Federal SEOG Grant Fund
   - Federal Work Study Fund

   For information on **Adjust Authorization**, **View Authorization Detail** and **Recalc Amt Packaged** buttons, please refer to FAGL Authorization.
3. Click an authorization in the grid and click **Campus Allocation**. A Campus Allocation form is displayed. The heading shows the Fund Source, Award Year and Serial Number. The grid displays the campuses that comprise the school, the Code for each, the percentage of the funds the institution has allocated to this campus, and the dollar amount of funds that have already been packaged. You can specify the Allocation % column at any time. As students are awarded aid from this fund source, the awarded amount will subtracted from the campus' remaining authorization. The Packaged column will reflect these changes. The system will prevent the total amount packaged for the fund source from exceeding the campus' allocation.
4. Click the arrow in the leftmost column to select an authorization. Click **Remove Allocation** to set the percentage to 0.The total percentage of all campuses in the grid must add up to 100%. If it does not, you will be prompted to adjust the percentages.
5. When you cancel or delete a disbursement to a student in View > Financial Aid > Financial Aid Packaging, CampusNexus Student adds back the canceled disbursement amount to the campus. This amount will be available to be awarded to other students.
6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Daily > Student Accounts

The Daily > Student Accounts menu offers options related to financial matters for the student. The options on this menu apply to the student selected from the Recent Students list.

- Document Tracking

- <Detach> (This options detaches the submenu.)

Document Tracking

Institutions request documents from students and persons or organizations connected with the student. Use Document Tracking to keep track of the documents that are necessary for processing student records in an orderly fashion.

Document Tracking is available in the following modules:

- Admissions - AM
- Financial Aid - FA
- Student Accounts - SA
- Academic Records - AD
- Loan Management - LM
- Career Services - PL

You can use the Daily > Document Tracking feature to look at all documents of a certain type to determine the document's status for each student.

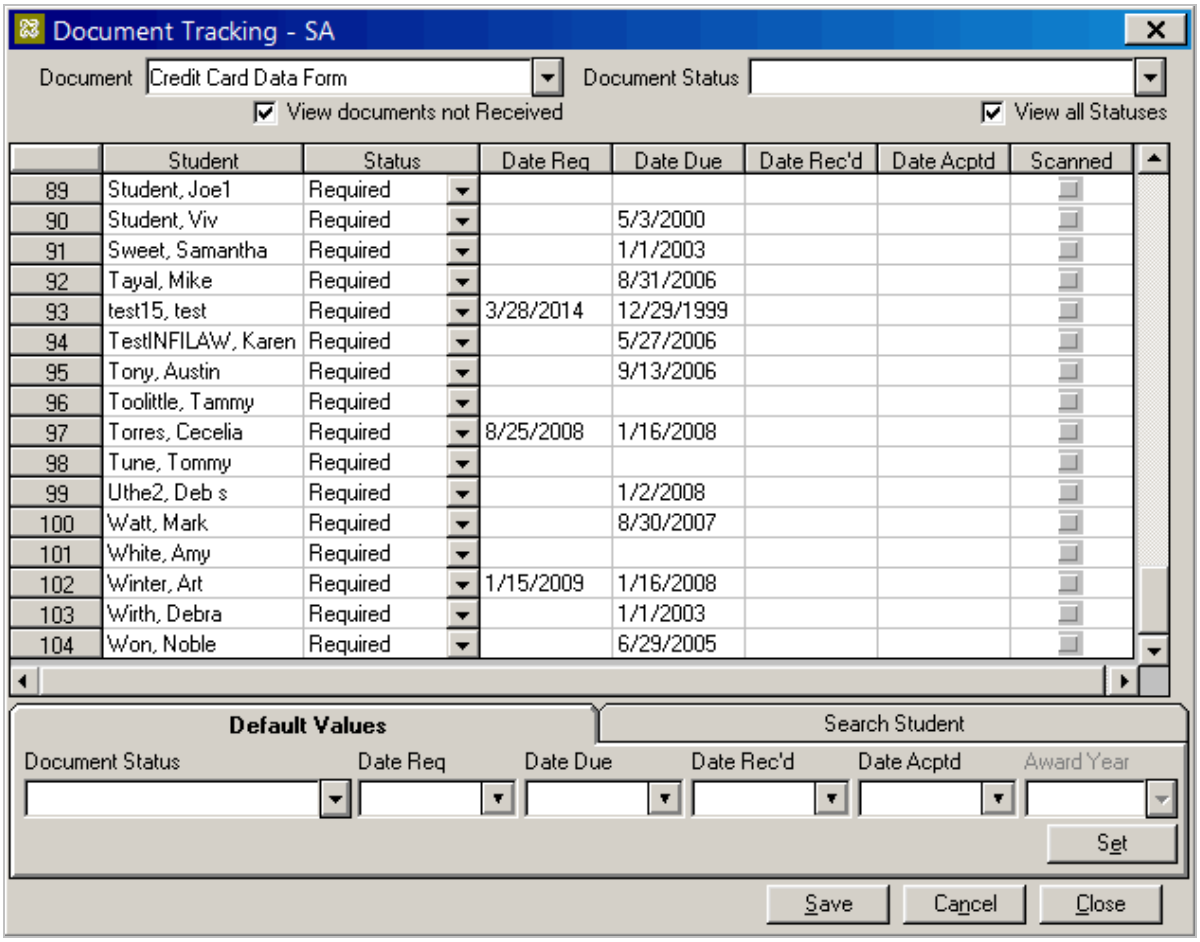
Several documents relate to academic or demographic history and your organization must have copies of them for each student. Examples are birth certificates, driver's licenses, transcripts, alien registration cards, social security cards, etc. Management policy determines which documents are important at your institution.

You can set up lists of these documents and assign them to each student record. You can then record the current status of the documents, the date you requested each document, and the date you received each document. You can also indicate that the document has been scanned into your electronic filing system.

Note: This approach differs from the Document Tracking option that you can access from the View > Contact Manager menu or Student Bar. When you access Document Tracking from the Student Bar, all documents related to a specific student as displayed. Here, you see all students related to a given document.

To edit tracking data for listed documents:

1. Navigate to **Daily > Admissions** (or other module) **> Document Tracking**. The Document Tracking form is displayed.



2. Select a **Document** from the list box at the top of the form. All students having the selected document related to their files are listed on the form.
3. Select or clear **View Documents Not Received**.
   - If the check box is selected, only those documents that have not been received are listed.
   - If the check box is cleared (default), all documents (subject to your Document Status selection) are listed.
4. For Document Tracking in Financial Aid - FA, select an **Award Year** to which the documents apply.

   Note: If you choose a Financial Aid document that does not have the "Award Year Specific" flag selected (indicating Yes) on the Document Setup, the form is displayed with the three Award Year fields disabled.
5. Select or clear **View All Statuses**.
6. Select an optional **Document Status**. If you select a document status, CampusNexus Student lists only the type of document you selected and only those that have the selected status.
7. From the displayed list, find a student document.
8. Click on a field in the row you want to update. You can update the following fields:
   - Status
   - Date Requested
   - Date Received
   - Date Due

- Date Accepted
- Scanned

Note: In date fields, you must enter the century along with the year. For example, 06/30/2000. If you just enter 99 instead of 1999, CampusNexus Student will reject it.

9. Click **Scanned**, if necessary, to indicate that you have scanned the requested document into your electronic filing system.
10. The **Default Values tab** enables you to update statuses and dates in batches.

    If you select a Status, or a Date Due, or Award year, for example, CampusNexus Student updates the values of all students whose names appear in the grid. Click **Set** to update the values and save your work.
11. The **Search Student tab** enables you to search a student using the Social Security Number (SSN) or Student ID.

    Type the SSN or ID and click **Filter**. CampusNexus Student finds the student associated with that number and displays only that student's name and information in the grid. Click **Clear Filter** to remove the filter. The grid revert to the previous display of students.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Post Deposits

You can review student deposits (that are not directly posted to the ledger) using the Post Deposits form. It is used to post admission and housing application fees and deposits.

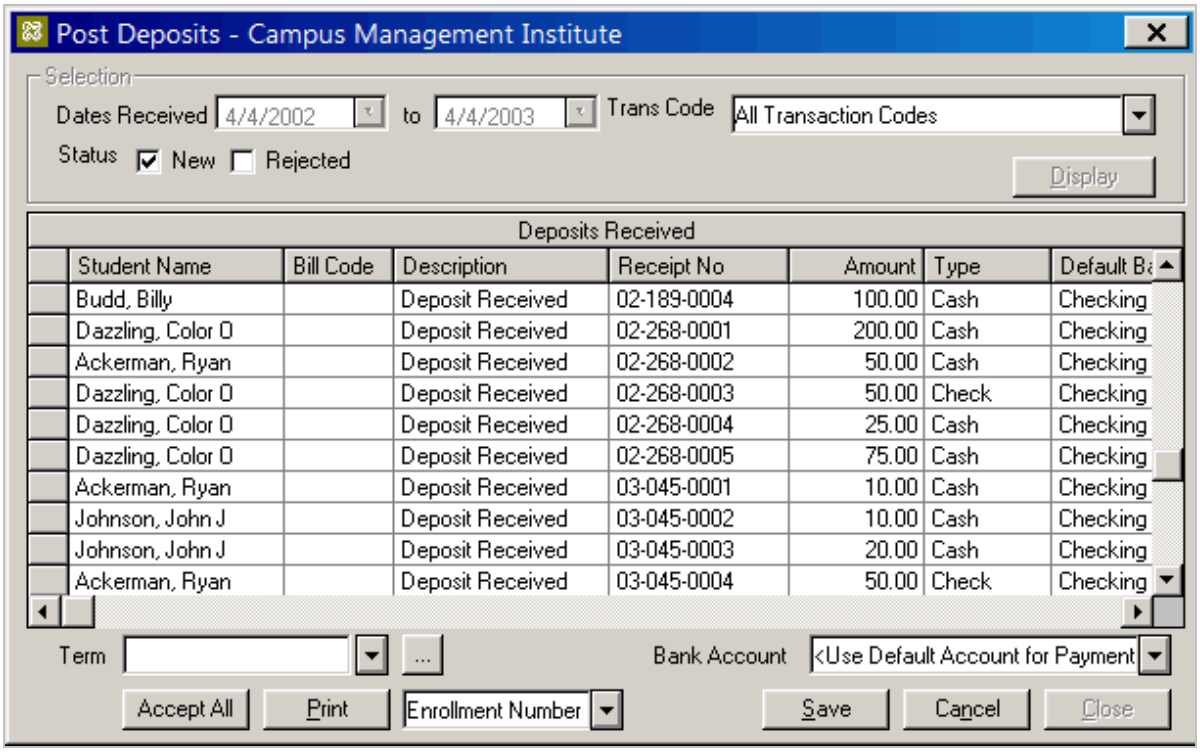
When Admissions department representatives collect deposits from students, they are held apart (in a separate file) from other financial transactions that are normally posted to ledger cards. If a deposit is to be posted as a credit to the student's ledger card and deposited in a bank account, use this procedure.

If transaction code permissions are used, only transactions that the staff member may process will appear in the **Trans Code** field.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

To post deposits from Admissions:

1. Select the student for whom the deposit is to be posted.
2. Navigate to **Daily** > **Student Accounts** > **Post Deposits**. The Post Deposits form is displayed.



3. Select the deposit **Status** you want to work with, **New**, **Rejected**, or both.
4. Click **Display**. The deposits are displayed in the grid.
5. Select a **Term** code for each transaction that is to be posted. You can select a term from the drop-down list that is displayed when the **Term** field is active. The term code is required only when the option in **Setup > Student Accounts > Require Term Codes** is set to **Yes**.

If **Require Term Codes** is set to **Yes**, and you want to do so, you can select a term from the (default) **Term**. If a term is selected, and you click **Save**, all deposit transactions that do not have a term selected from the grid will have the default term inserted prior to posting. If **Require Term Codes** is set to **No**, no term code will be inserted from the default term code, and if you want a term code included, you will have to manually select it for each transaction.

6. For deposits that are made by credit card, select **Post**.
7. When the **Authorized** or **Declined** box is displayed, enter the **Authorization/Declined** number.

   Note: You must select **Post** first before the **Authorize** or **Decline** boxes can be selected.
8. Click **Accept All** to accept all transactions on the list. To selectively post the transactions, check the **Post** option for the ones to be processed.
9. Select the **Bank Account** into which the funds are deposited.
10. Click **Print** to print a list of the transactions.
11. Click **Save** to post the transactions. The selected deposits are updated to the ledger card of the affected student.
12. Click **Close** to close the form.

Registration Billing

Registration Billing is the process of batch posting charges based on student registration and the billing method established by your institution. Billing Methods are set up under Lists > Student Accounts > Billing Methods. The billing method must be set up before you can select it here. You can set up billing methods based on Academic Years, Terms/Quarters, Programs/Enrollments, and Courses. Most likely, your institution uses only one or two of the methods available. The net result of the registration billing process is a distribution of charges to the students' ledger cards.

Note: The **TUIT** code must be used to bill tuition via Registration Billing. Unless an unbilled TUIT item appears in a student's Fees folder, the student will not be gathered in the list of students to bill.

To view the most recent date billed for a student navigate to View > Academic Records > Enrollment. Click the date information tab to see several important dates. If the student has never been billed, it will be indicated here. You can also see the last date billed for each enrollment by navigating to View > Financial Aid > Packaging.

Billing methods use the "By Campus" and "Transaction Code" values. The bill by Term, Academic Year, and Program billing methods use the values when looking up the costs. The "Over" column is displayed when billing by Unit. CampusNexus Student only bills the amount of "Units" over the number of "Units" specified.

Bill by Payment Period is only supported through Pending Charges review located at **Daily > Student Accounts > Process Pending Charges/Adjustments**.

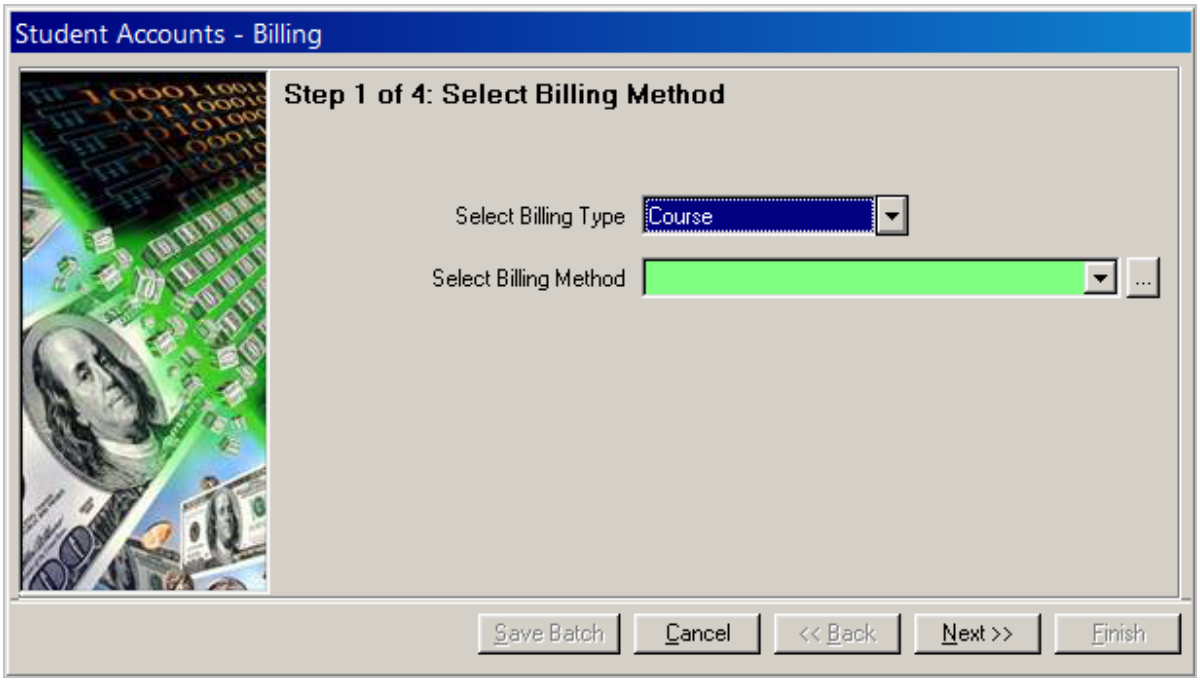
When billing methods are configured to **Payment Period**, charges calculated when registering for courses are associated with payment periods that exist in the Financial Aid module at **View > Financial Aid > Academic Year > Payment Period** (button).

Note: The end date of the course section must fall within the **Payment Period** dates to be associated with that payment period.

See also Registration Bill and Purge Billing Statement Records.

To run the Registration Billing wizard:

1. Navigate to **Daily** > **Student Accounts** > **Registration Billing**. Step 1 of the billing wizard is displayed.



2. Select the **Billing Type**. The selected billing type determines the layout of the following steps displayed by the wizard. The options are:

A. Course

When the you select Course as the Billing Type, status categories appear in Step 2, allowing you to gather only students who satisfy the status category criteria specified.

B. Term

Billing by Term bills only for the course being taken at the campus being billed. If a student takes courses at two campuses for the same term, the student will be billed for each campus separately when the billing method is run for each campus. Any additional fees (see View > Academic Records > Fees) are billed only when the enrollment is billed for the campus that matches the enrollment campus.

C. Academic Year

This feature requires the some setup. The program version must be defined correctly. The program version needs to be edited under Lists > Academic Records > Programs, Lists > Financial Aid > Programs, and Lists > Student Accounts > Programs.

Billing by Academic Year is based solely on the Student Academic Years table (`FaStudentAY`). If a institution is clock-hour based (Lists > Financial Aid > Programs > Academic Calendar = "Clock Hours"), billing will be based on the number of clock-hours attempted.

- **Example**: If a student enrolls in a 2300 clock-hour program and the academic years for the program are defined as 900 hours, 900 hours and 500 hours. The billing method prompts for a "number of hours range" to bill students. If you say "bill all students within 100 hours of starting the next academic year", a student in the 2300-hour program would be billed if:

    a. The student just started the first academic year and has never been billed before.
    b. The student has completed at least 800 hours and hasn't been billed for the second academic year yet.
    c. The student has completed at least 1700 hours and hasn't been billed for the third academic year yet.

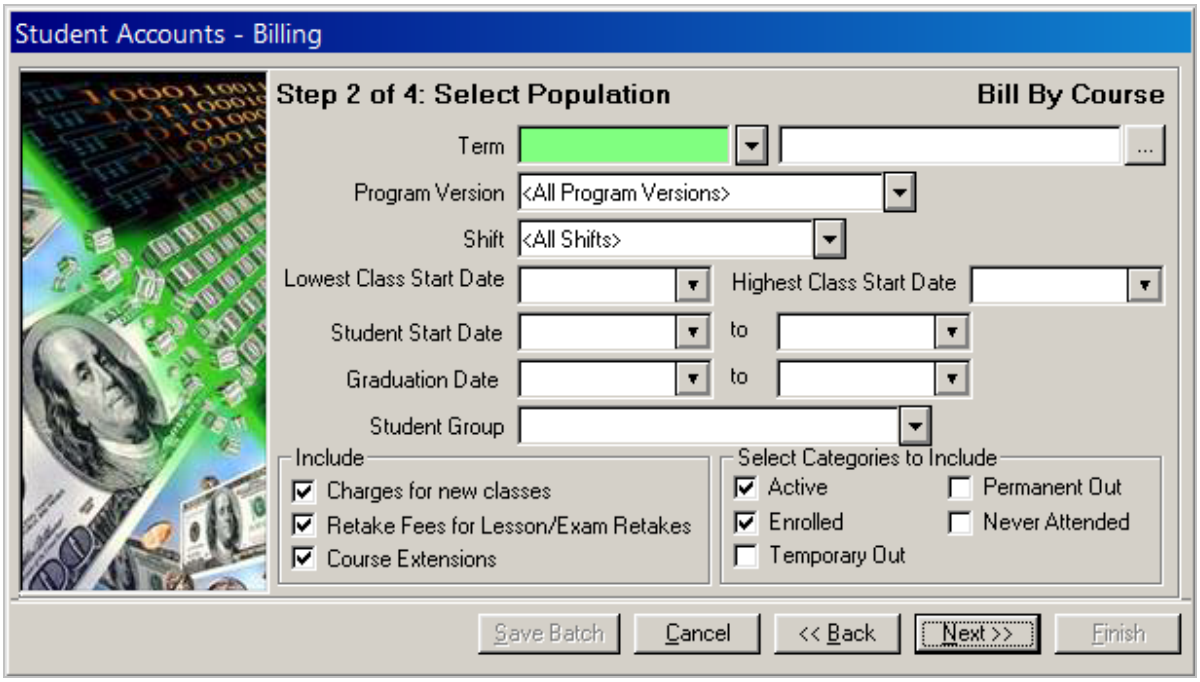
The amount to be billed is set up under Lists > Student Accounts > Billing Methods.

- When billing by academic year, the costs can be set by "Using a Rate Schedule" on the billing method, or on the Fee Schedule for the Program. The fee schedule for the program has been modified so that you can indicate to which academic year the fee belongs. If the academic year is left at zero (0), the fee will be billed every time that Registration Billing is run (provided the "one-time" option is not selected). If using a rate schedule, the student will be billed the current rate at the time that the billing takes place. If the costs are set up under the program version, the costs are established at the time of enrollment and are associated with the enrollment. Changing the costs will not affect current enrollments.

D. Program/Enrollment

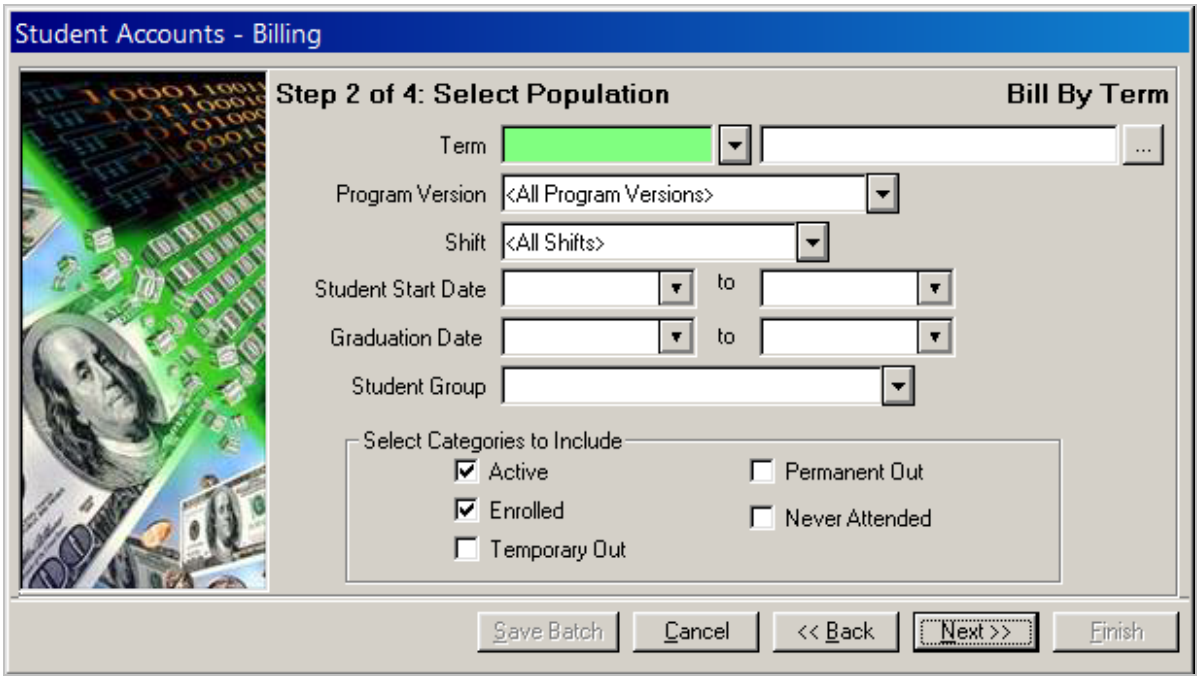
3. Select the **Billing Method**. Use the drop-down list or click to select a Billing Method.
4. Click **Next** to continue to Step 2 of the billing wizard.

A. If you selected **Bill by Course**, Step 2 is displayed as follows:



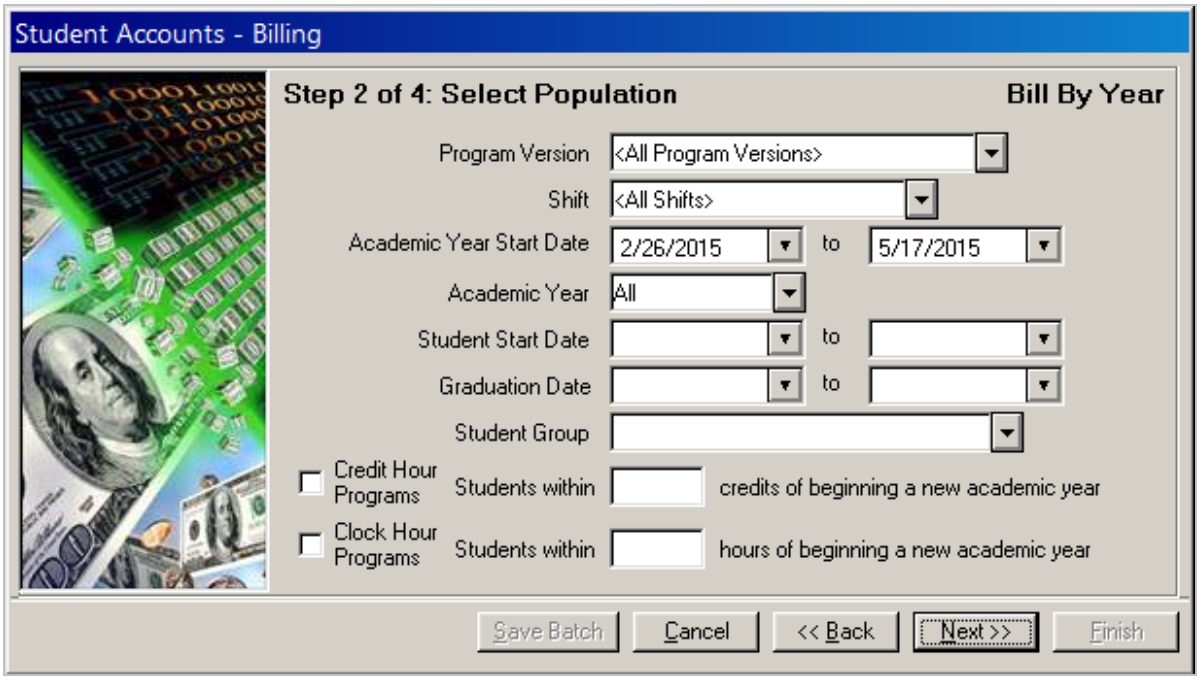
- Select the **Term** for which the billing is being processed.
- Select the **Program Version** or accept <All Program Versions> (default).
- Select the **Shift** or accept <All Shifts> (default).
- Optional: Select the **Lowest Class Start Date** and **Highest Class Start Date**
- Optional: Enter the **Student Start Date** range.
- Optional: Select a **Graduation Date** range.
- Optional: Select a **Student Group**.
- Select all charges/fees you want to **Include**.
- Select **Categories to Include**. Categories are student statuses that comprise the population.

B. If you selected **Bill by Term**, Step 2 is displayed as follows:



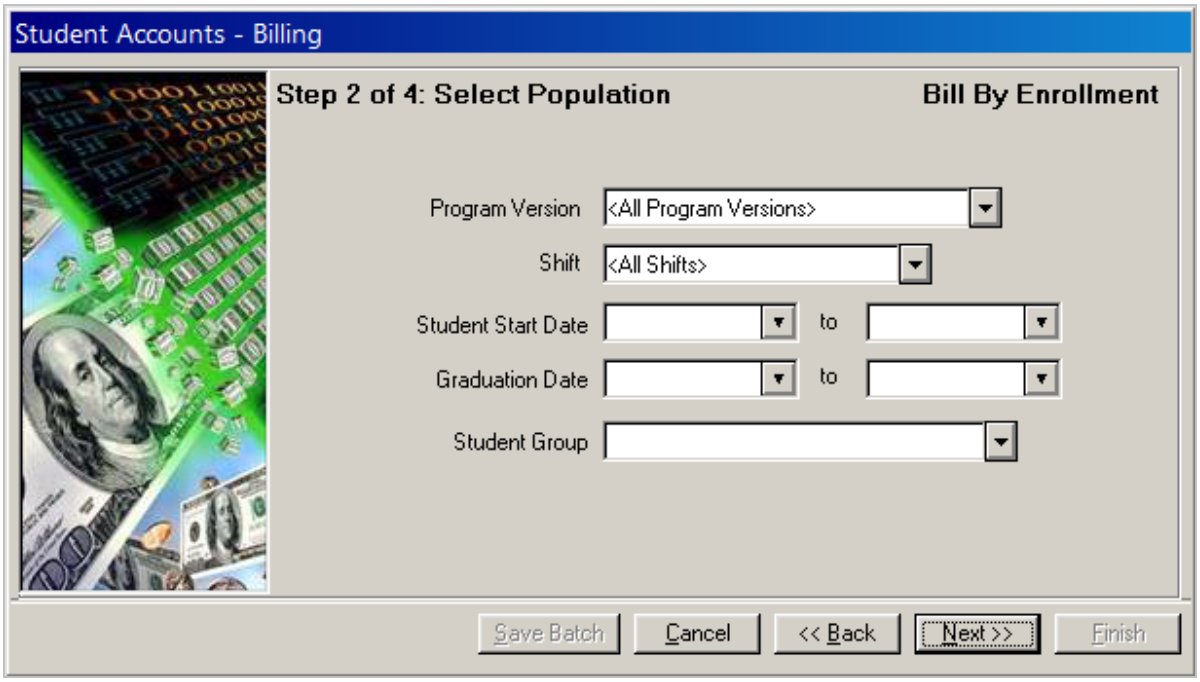
Select **Categories to Include**: All student statuses that comprise the population.

C. If you selected **Bill by Academic Year**, Step 2 is displayed as follows:

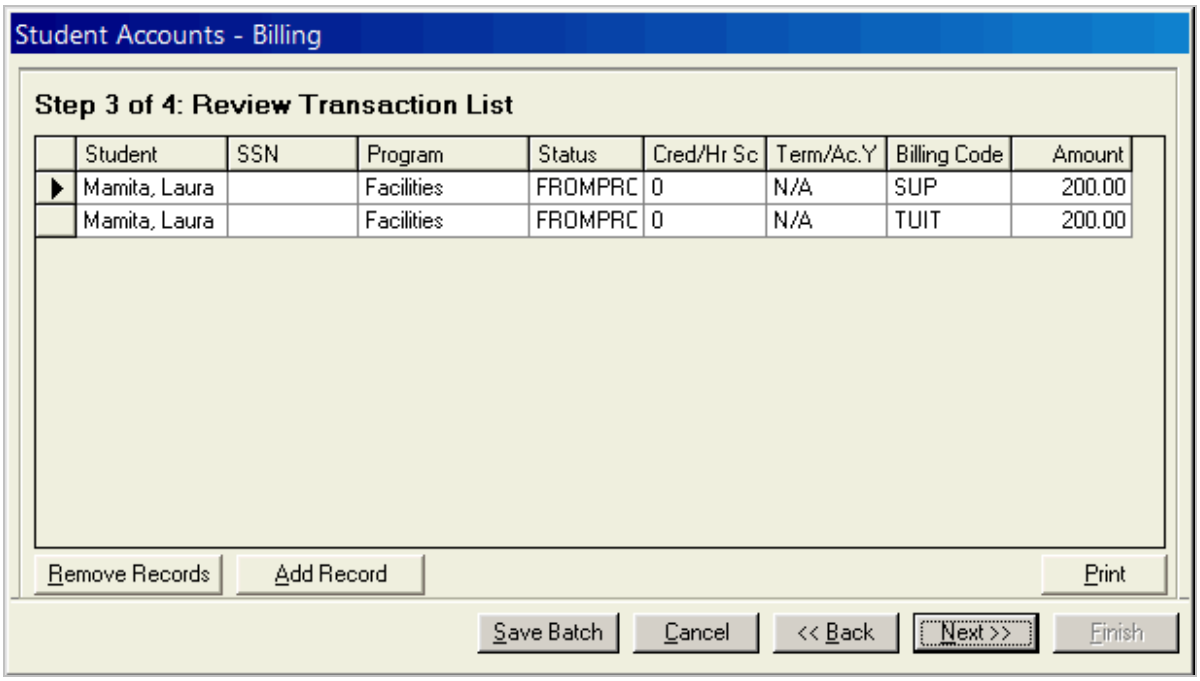


- Indicate if billing shall be by Credit Hour Programs, Clock Hour Programs or both.
- Specify the number of credits/hours to indicate students shall be included within this number of beginning a new academic year.

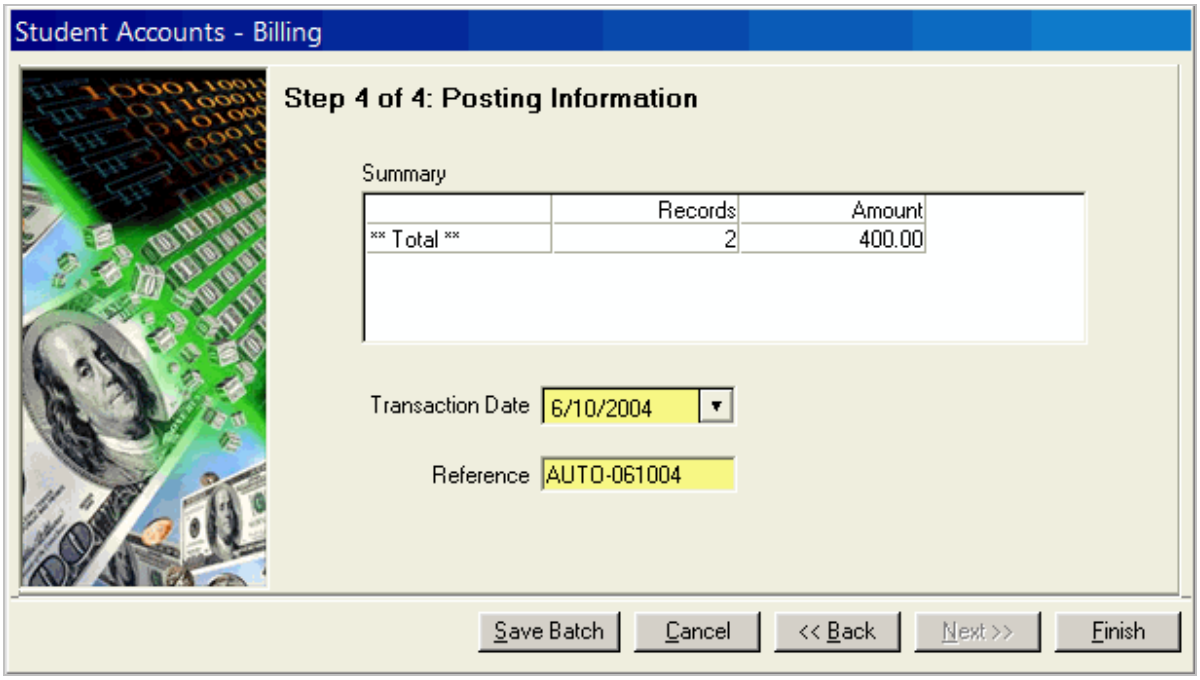
D. If you selected **Bill by Program/Enrollment**, Step 2 is displayed as follows:



5. Click **Next** to go to Step 3. The wizard gathers transactions to be processed in this billing. A grid displays the transactions to be posted to the Student Ledger cards. You can add a record, delete records, and save the batch.



6. Click **Print** to view and print a list of the transactions to be charged to your students. After printing your **Registration Billing Report**, you may want to **Cancel** the process and take time to review the report. If so, you can restart the wizard again after reviewing the report.
7. Click **Next** go on to Step 4. This page shows a summary of transactions to be posted.



8. Enter the **Transaction Date** to appear on each transaction that is posted.
9. The **Reference Number** is automatically generated by the wizard.
10. Click **Finish**. The charges are posted to the ledger cards.
11. A confirmation message is displayed. Click **OK**.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

Process Pending Charges/Adjustments

Pending charges result from schedule changes made between the time a student is billed for a term and the end of the add/drop period for that term. Pending charges are committed to the student's Ledger Card once the add/drop period expires. The Process Pending Charges/Adjustments form provides a convenient way to post, delete, print, recalculate a term or payment period's pending charges. Be sure to enable Required Pending Charges Review to review and process Pending Charges/Adjustments before they are posted to the student Ledger Card. To edit pending charges for a student, do so in the Student's Ledger Card.

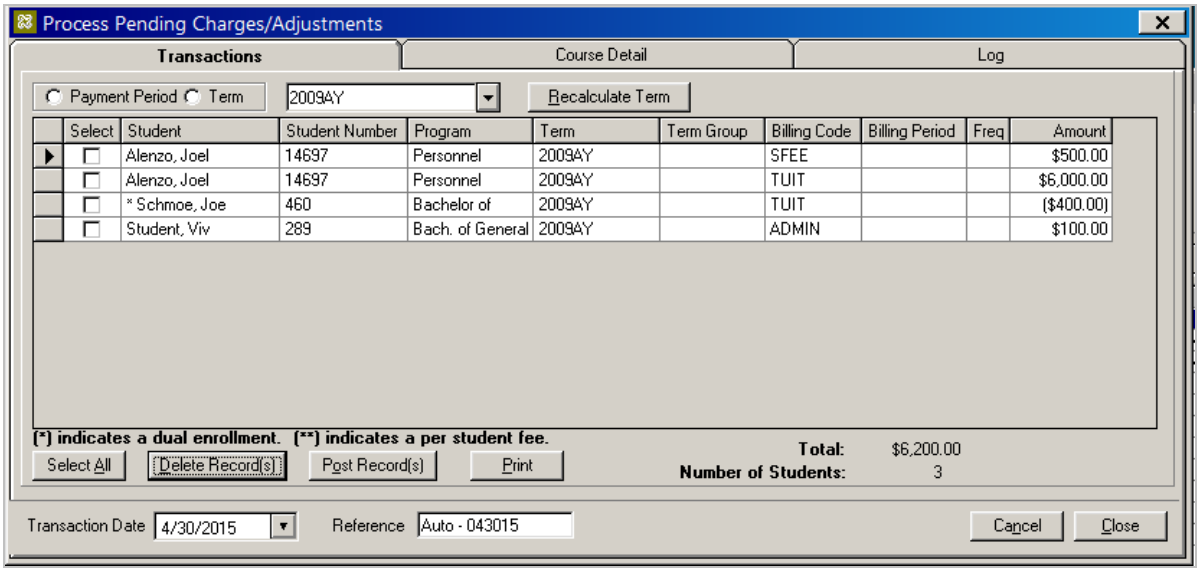
If a student is billed more than once per term and the billing method is a rate schedule using flat amounts, the billing details tab is updated upon registration for any transaction code if the overall amount of the flat fee does not change. This is to break down the amount of the overall charge per course.

Users can include or omit pending charges on Student Accounts reports, as required by the school.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

To see Pending charges for students by term:

1. Navigate to **Daily > Student Accounts > Process Pending Charges/Adjustments**. The Process Pending Charges/Adjustments form is displayed.
2. The Term option is selected by default. Select a **Term**. If there are no pending charges for the campus, an informational message appears, otherwise CampusNexus Student displays a list of student's that have pending charges that meet the following Term criteria:
    - The Term is active, open, and a Student Accounts term.
    - The Term must have students with billing methods configured for auto billing with manual review and courses with a scheduled or current status in an enrollment with a category of "active" or "enrollment".



3. To view pending charges/adjustments by payment period, select the **Payment Period** option. The following search fields are displayed:
    - **Select Billing Method**
    - **Ac. Year**

- **Pmt. Per.**
- **Pmt. Per. Start Date**

Specify appropriate values to search for associated pending charges.

When billing methods are configured to Payment Period, charges calculated when registering for courses are associated with payment periods that exist in the Financial Aid module at **View > Financial Aid > Academic Year > Payment Period** (button).

Note: The end date of the course section must fall within the Payment Period dates to be associated with that payment period.

4. To select all student's in the list, click **Select All**. A check mark appears in the **Select** field for all student's in the list.
5. To select specific student, select the **Select** field in the column to the left of the student's name.

   Note: Each record that is part of a connected enrollment is indicated by a check box in the connected enrollments column (second column from the left).
6. To delete pending charges, click **Delete Record(s)**. A confirmation message is displayed. Click **Yes**. The Delete Record(s) button is disabled if you do not have permission to delete individual pending charges within the "Post Pending Charges" option.

   If charges are deleted, you can select to "Recreate Pending Charges" for active/open terms only. Generally, institutions correct a pending charge, rather than deleting the charge. This adds increased security to the option.
7. To recalculate a term, click **Recalculate Term**. The following message is displayed: *"All students registered for courses in the selected term who have a billing method configured for auto billing will have their posted charges and pending charges/adjustments recalculated."*

   Click **Continue** to proceed or **Cancel** to quit. A confirmation message is displayed if the recalculation was successful, otherwise a message will state that no pending charges were created or modified. An entry will be recorded under the **Log** tab.

   Upon receipt of the *"Recalculation complete"* message, select the records you want to post to the students' ledger cards and click **Post Record(s)**.

   When recalculating a term, the automatic billing settings must be as follows: The Frequency must reflect Term/Quarter or Course, and the Automate Registration Charges and Adjustments field and Use Rate Schedule must be selected. See Billing Methods setup instructions for Term/Quarter before proceeding to recalculate a term.

   An institution may want to recalculate a term when the wrong billing method was assigned to the student or program version. If the error was not discovered before students were registered into courses, they will be charged the wrong amount. In this case, the billing method for each student needs to be changed and charges recalculated.

   Another reason to recalculate a term may be that the billing method was not updated to reflect a new rate increase when students registered for their courses. These pending charges or adjustments would need to be recalculated.
8. The label of the Recalculate Term button is changed to 'Recalculate Payment Period' when pending charges that contain a payment period are retrieved. When payment period billing is selected, including the Post Transaction Details under Lists > Student Accounts > Billing Methods, select the pending charges to recalculate and click **Recalculate Payment Period**.

   For a given payment period to be recalculated at least one pending charge that has a given payment period must be selected. Pending charges are posted to the ledger for those courses that are current and have attendance posted.

Course Retake Logic and Payment Period Billing

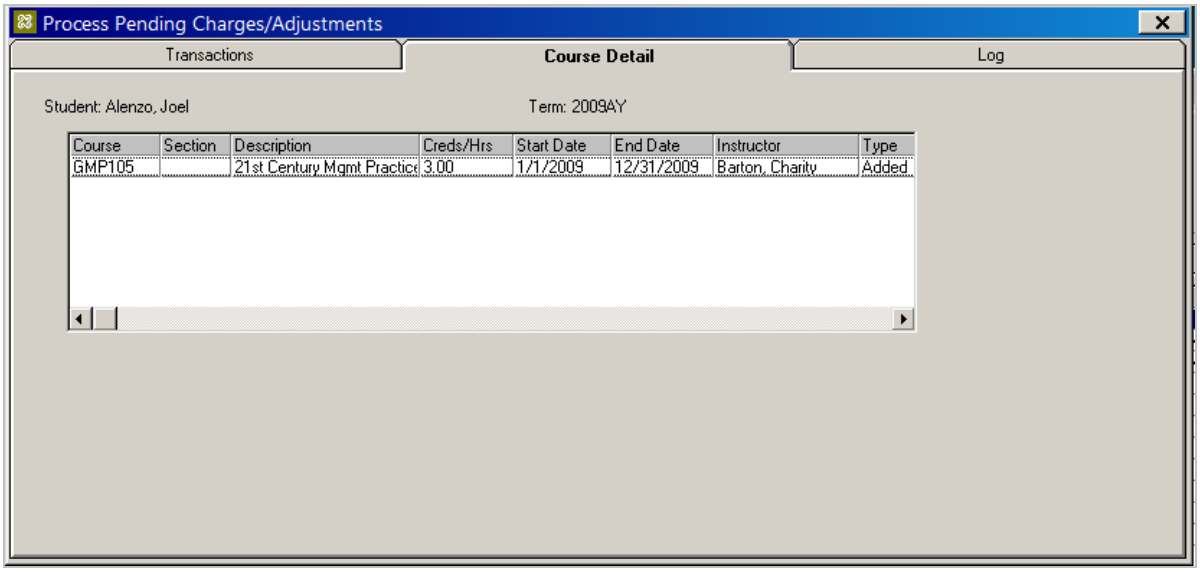
When students in non-term programs are billed for their courses, CampusNexus Student assigns the charges to the payment period where the course end date falls; however, if students are retaking a course for which they have previously earned credit, and they are not taking any other required courses, then the course will fall outside the payment period dates. In such cases, the billing functionality is such that the charges are assigned to the previous payment period.

During the registration process for a student being registered for a course retake (in which credit was already earned), CampusNexus Student displays the following message: *"This course is a retake for which credit was previously earned and will be billed to the previous payment period when there aren't any existing payment periods that encompass this course's end date."*

9. Click **Post Records (s)** to post the student's pending charges for the term to the student's ledger card. See View > Student Accounts > Ledger Cards > Adjustments tab to verify the pending charges are posted to the ledger card correctly.
10. Click **Print** to generate the **Pending Charge Review** report. The report contains the information displayed in the grid.
11. Select a **Transaction Date**. This date is displayed in the student's ledger. The date should reflect the same date as the transaction date on registration billing and post batch charges/adjustments.
12. If desired, change the **Reference Number** to a school-defined format. The default format is `Auto-ddmmyy`, where `ddmmyy` represents today's day, month, year. The Reference Number indicates that this batch for this term was processed by the Automatic Registration/Adjustment feature on this date.

    The **Total** field displays the total amount of pending charges for the student's listed.

    The **Number of Students** field indicates the number of students listed.
13. Select the **Course Detail** tab to view a list of all courses for which students registered in a particular term and information about the courses.



14. Select the **Log** tab to view a list of all pending charges changes for the term.

Post Batch Charges/Adjustments

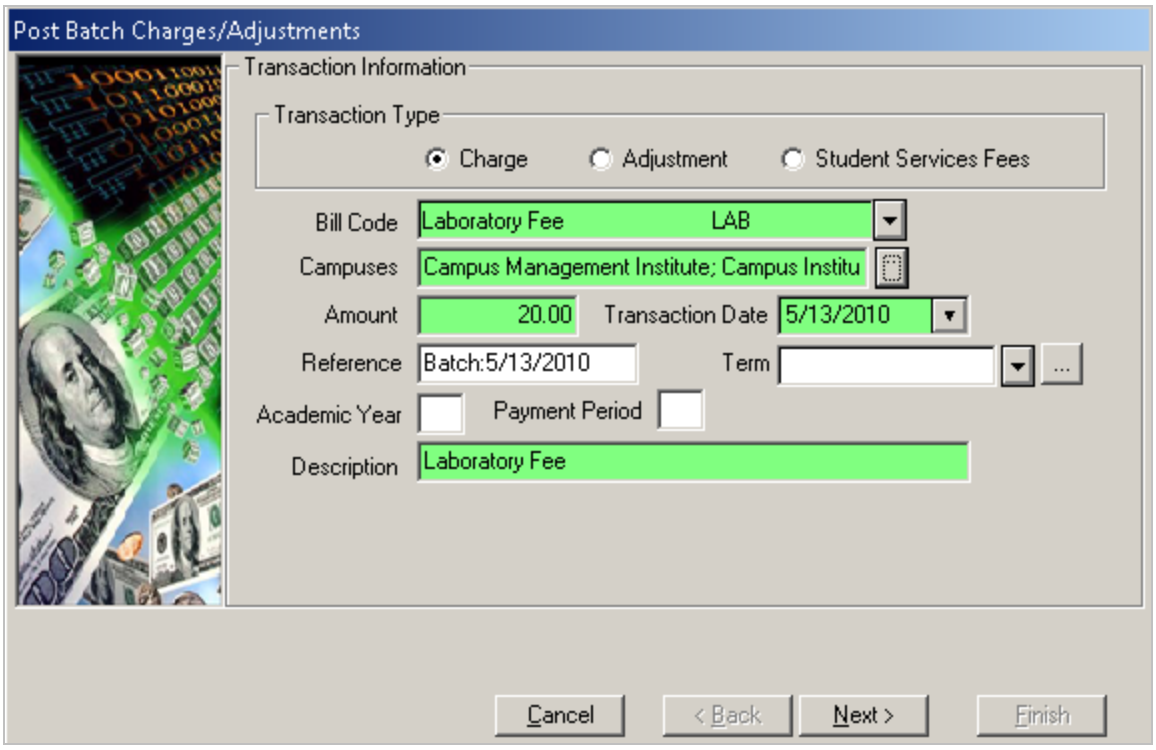
This feature is used to batch post charges and adjustments, outside of registration billing, to a defined group of students based on various selection criteria. This wizard consists of three form allowing you to define the transaction, select the criteria for gathering students, display and print a list of students and charges, and post the charges to the students' ledger cards. Posting rules are enforced, such as minimum transaction date, earning date, and last GL release date.

Note: This feature should be used in conjunction with registration billing, not as a replacement for billing tuition!

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

To post a batch of charges or adjustments:

1. Navigate to **Daily** > **Student Accounts** > **Post Batch Charges/Adjustments**. The Post Batch Charges/Adjustments wizard is displayed.



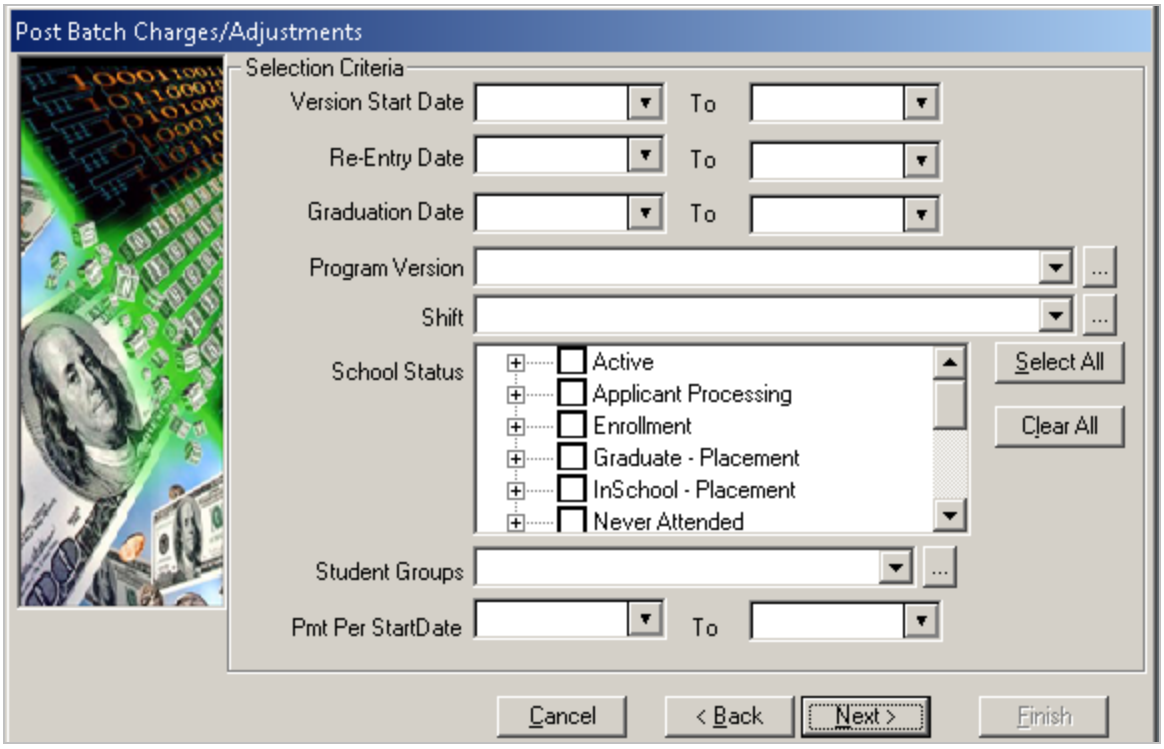
2. Select a **Transaction Type**: Charge, Adjustment, or Student Service Fees.
3. Select the **Bill Code** (Transaction Code) for the transactions to be posted. The bill code selection drives the campus selection.
4. Select the **Campuses** to which the transactions apply.

   Note: A bill code mapped to a subsidiary drives the campus selection to include only those campuses available for the subsidiary. A bill code not mapped to a subsidiary drives the campus selection to include campuses available for that bill code and will post to the student ledger.
5. Enter the **Amount** (default: 0.00), **Transaction Date** (default: today's date), and **Reference** (default: "Batch +

Today's Date"; up to 16 characters).

6. If earning method is by term, enter the **Term**.
7. Enter the **Academic Year** and **Description** (default: standard description).
8. For Student Services Fees transactions, select the **Service Category** and **Service**.
9. If earning method is by payment period, enter the **Payment Period**.

   Note: Either Term or Payment Period are required.
10. Click **Next**. The Selection Criteria form is displayed.



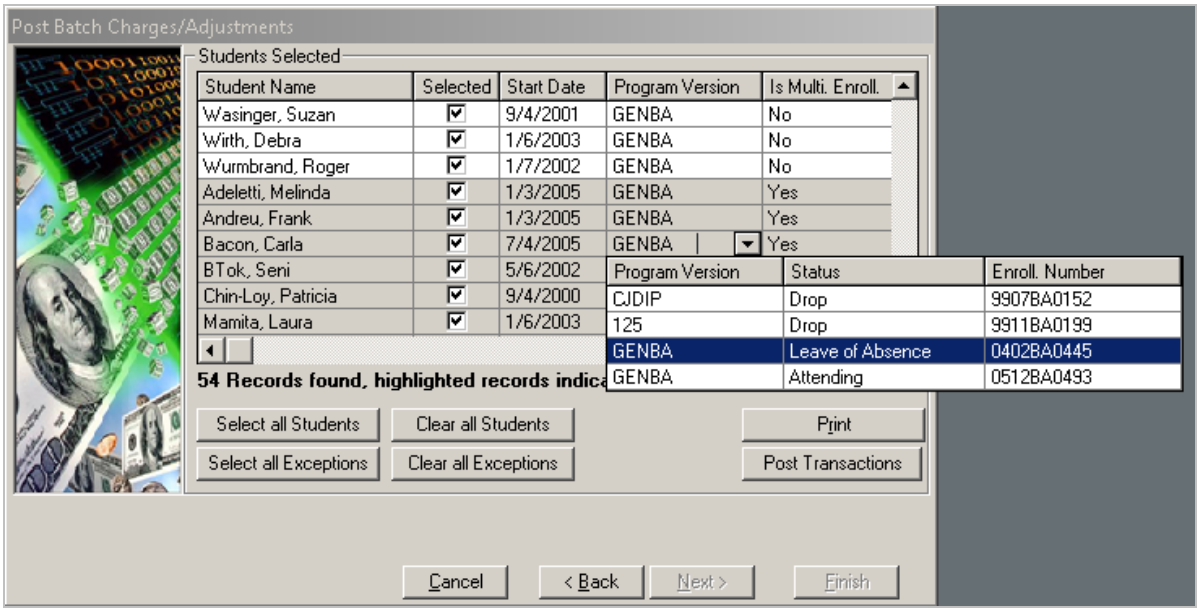
11. Select or enter the **Selection Criteria** as required. Click ... to select more than one value.

    - Version Start Date range
    - Re-Entry Date Range
    - Graduation Date range
    - Program Version
    - Shift
    - School Status
    - Student Groups (all active student groups; multiple Student Groups can be selected)

    To create additional selection criteria, generate a student group through the reporting functions.

    The Version Start Date Range selects students using their Expected Start Date if the student's Start Date is not populated. This allows students to be located who are currently in a non-attending enrollment and therefore do not have a value entered for their Start Date.

    The Pmt. Per Start Date range field is displayed if Payment Period was entered in the previous step.
12. Click **Next**. The Students Selected form is displayed.



13. Select the students to include or exclude by clicking the check box in the **Selected** column. You can also use the **Select All Students**, **Clear All Students**, **Select All Exceptions**, and **Clear All Exceptions** buttons to select records.

    A **Yes** in the **Is Multi. Enroll.** column means the student has multiple enrollments. For students with multiple enrollments, click in the **Program Version** column to select the enrollment to which the charge/adjustment will be posted.

    Note: The default enrollment in the drop-down list is selected on the basis of status hierarchy. If the same status is found for more than one enrollment, then the most recent enrollment is selected based on the enrollment number.

14. Click **Print**, before or after posting, to print a list of the transactions.

15. Click **Cancel** to close the wizard without saving or posting any transactions.

16. Click **Post Transactions** to post the charges or adjustments to the students' ledger cards.

17. A confirmation message is displayed. Click **OK**.

    When the transactions are posted, the Post Batch Charges/Adjustments form closes to prevent you from accidentally posting more than once.

    Note: The User ID of the user running the Post Batch Charges/Adjustments wizard is the ID stored with the transaction detail.

Generate Interest Charges

Some institutions charge students or third-parties interest on the balance of a student payment plan. You can run the Generate Interest Charges process once a month, once per term, or any other schedule, to calculate and post interest charges to the students' ledger cards. Student and third-party payment schedules are created when packaging financial aid or when completing the student payment schedules form.

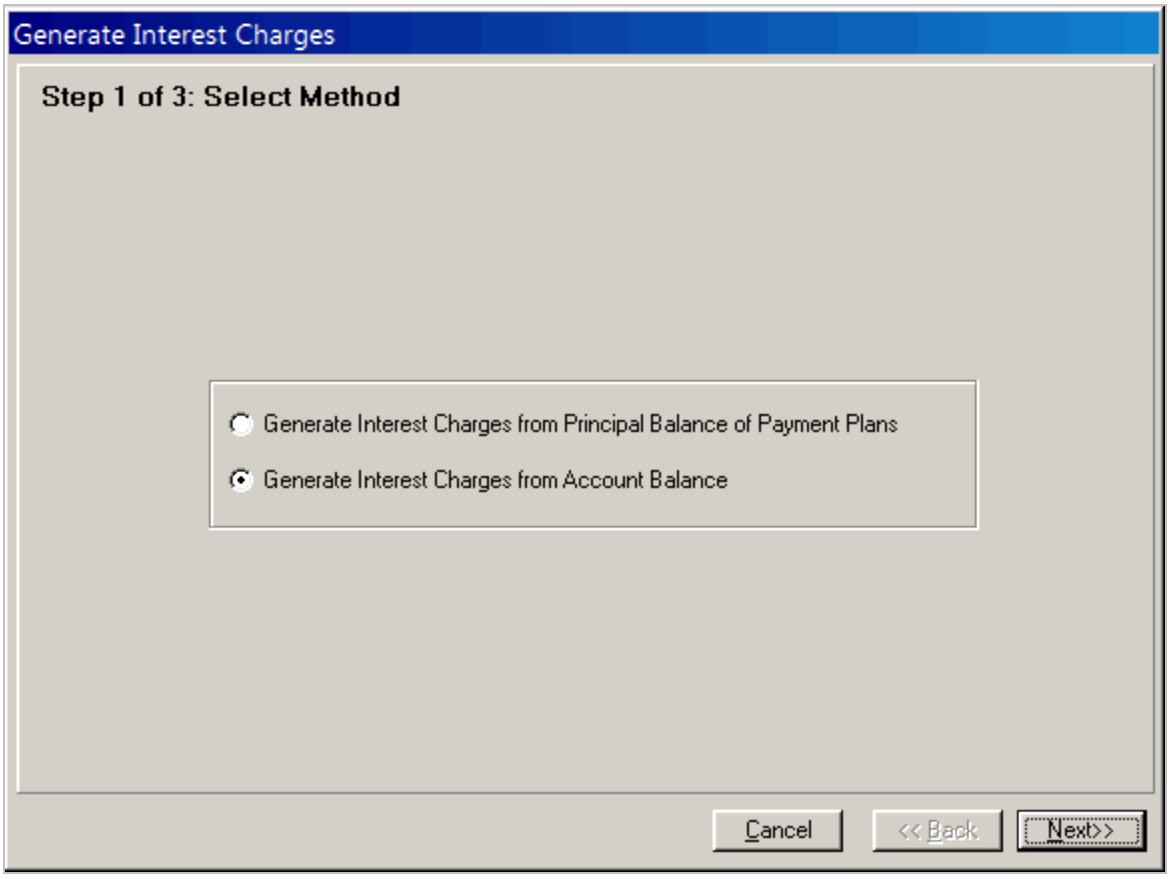
For example, a student and your institution have agreed that the student will pay $100.00 per month for 18 months at 5% interest to cover the cost of tuition. After making 3 payments the student owes $1,500.00. When you run the Generate Interest Charges process, CampusNexus Student calculates the interest due on the $1,500.00 balance and posts it as a charge to the student's ledger card.

Institutions can configure transaction codes as interest transactions and then select them from this wizard. The process uses the selected transaction code's interest when applying interest to student accounts.

You can filter by campuses, fund sources, terms, bill code, transaction date, and reference number. Specific school statuses can also be selected on a multiple or individual basis, similar to the Generate Principal Charges functionality. CampusNexus Student displays only *active* values in the drop-down lists.

To generate interest charges:

1. Navigate to **Daily** > **Student Accounts** > **Generate Interest Charges**. Step 1 of the Generate Interest Charges wizard is displayed.



2. Select the method for generating interest charges and click **Next**.
3. Depending on the method chosen, one of the following forms is displayed for Step 2.

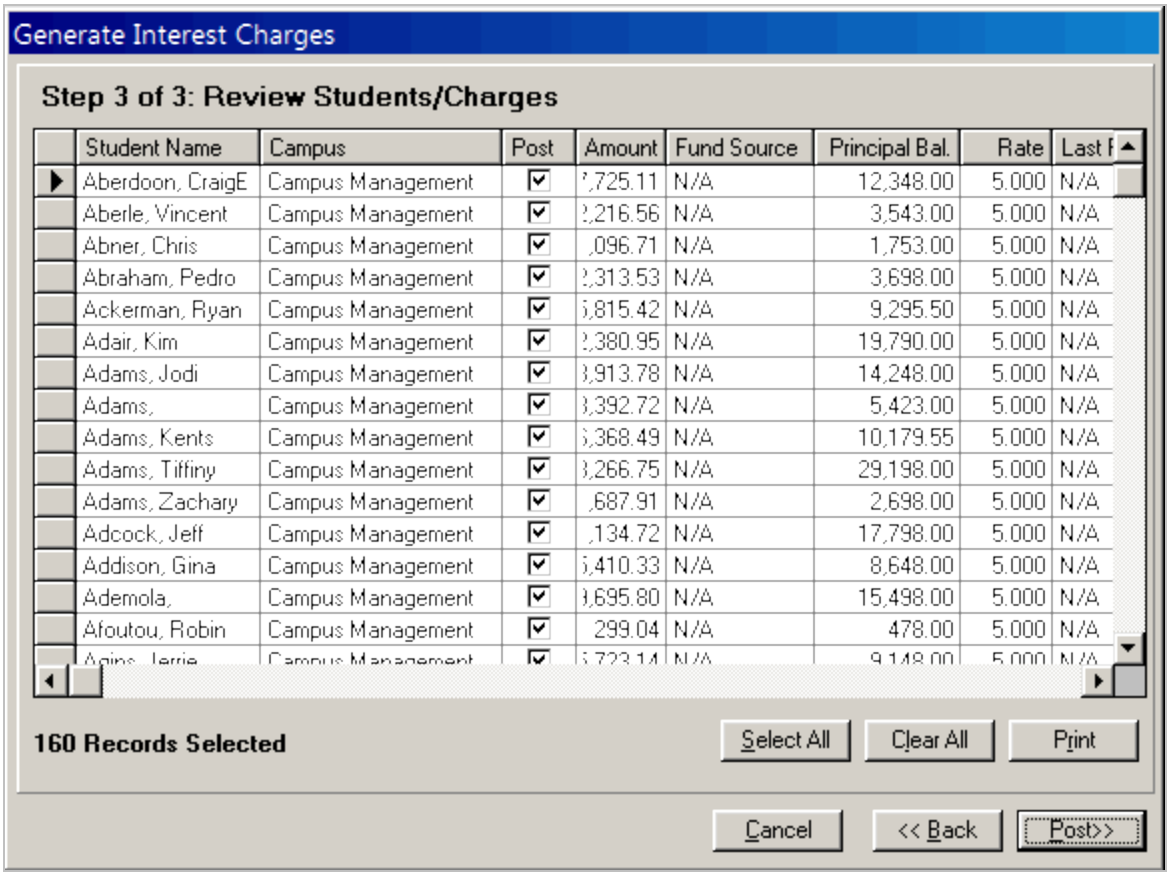
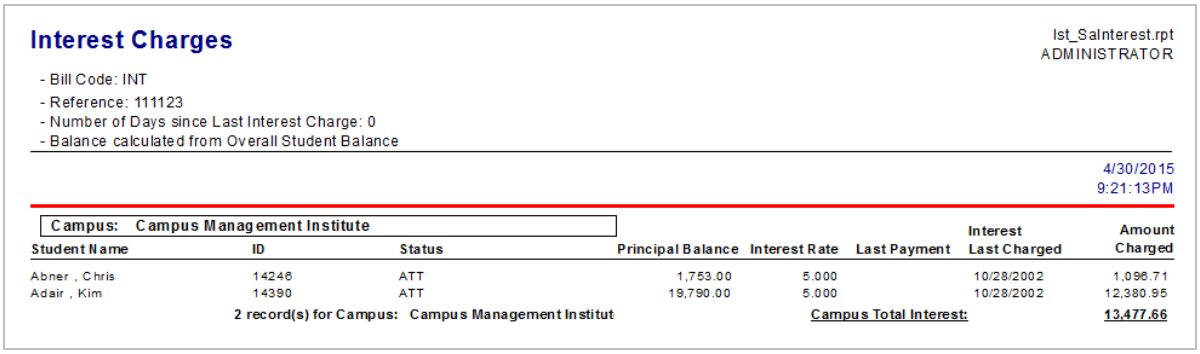
4. In the Generate Interest Charges from Account Balance form:
    - If you select **Reduce by incurred charges within date range**, you must specify values in the **From** and **To** fields.
    - If you select **Reduce by Expected Funding**, additional options become available. You can opt not to exclude any funding source.
    - If you select **Select fund sources to exclude**, CampusNexus Student displays a list of Fund Sources from which to select. Use the drop-down list to select one fund source, or click ... to select multiple Fund Sources.
5. Enter the **Interest Rate** if you are generating interest charges from the account balance.
6. Select a **Term**. CampusNexus Student checks for an Override Required Term indicator on the Interest transaction code (INT). This check is performed only if the Require Term Codes option has been selected. If term codes are required on transactions, and if the Interest transaction code has the Override Required Term indicator turned on, CampusNexus Student does not require a term code to post the transaction.
7. Specify the **# of days from Last Interest Charge**. CampusNexus Student gathers all students who have not been charged interest since this specified number of days has passed.
8. Enter the **Transaction Date**(default: current date).
9. Enter a **Reference Number**.
10. Click **Next**. The Review Students/Charges form is displayed.



Note: A column containing the student's enrollment campus was added to the Review/Student Charges page of the wizard, as well as the Interest Charges report.

11. Select or clear the applicable records in the Post column and click **Post**.
12. A confirmation message is displayed. Click **Yes**.
13. When the posting is complete, another confirmation message is displayed. Click **OK**.

A report displays the interest charges that were posted.



Post FA Disbursements

Use this procedure to post financial aid disbursements after they have been approved by the FA Department. CampusNexus Student finds the approved batches of FA disbursements and lists them prior to posting in the students' accounts.

Notification of Receipt

The Student Accounts Post FA Disbursements form prints a Notification of Receipt for each FA disbursement received in the posted batch. If FA disbursement received transactions are posted, and the FA fund source type is not CASH, the corresponding Notification of Receipt is printed.

To determine which Notification of Receipt report should be loaded when this option is selected, CampusNexus Student checks for a receipt report for the fund source received using the following steps:

a. If a cst_Fa*nnnnnnnn*Receipt exists (where *nnnnnnnn* = Fund Source code), that report is loaded.
b. If a cst_Fa*nnnnnnnn*Receipt does not exist, CampusNexus Student checks for a cst_FaDefaultReceipt.
c. If it does not exist, the lst_FaDefaultReceipt is loaded.

After printing the receipts for the selected transactions, CampusNexus Student updates FaDisb.DateReceiptPrinted with the system date.

Disbursements for More than One Fund Source

A posted batch of FA disbursements can include disbursements for more than one fund source. This means that it is possible that more than one receipt report needs to be used when generating these receipts. The option to print receipts is available after clicking Save to post the batch.

When Pell disbursements are posted to the students' ledger cards, the disbursement records are marked as Ready to Send to RFMS if they have not already been marked as such. This is only applicable if the fund source type is 'Pell'.

If the fund source for the disbursement being posted is a direct subsidized loan, direct unsubsidized loan, or direct PLUS loan, a record is written to the file containing the history of disbursements and refunds sent to COD. These records are transmitted to COD. On the Direct Loan form, you can see these history records on the Received and Refunds tab under "Disbursements at COD".

Direct Loan Disbursement File

CampusNexus Student updates the direct loan disbursement file when a batch of FA disbursements is posted to students' ledger cards. Each disbursement that is "paid" on a student's ledger card is reported to the Loan Origination Center. For each disbursement in the FA batch being posted, CampusNexus Student determines if a row should be added to the Direct Loan Disbursement table. A row will be added to the table if the all of the following conditions are met:

- The fund source type of the disbursement is DIRSUB, DIRUNSUB, or DIRPLUS.
- The Use Direct Loan flag is set to true for the student's campus.
- A row exists in the FA Loan table where the Student Aid ID equals the ID for the FA for which the disbursement is being posted.
- The Scheduled Disbursement Number is greater than zero for the row in FaSched that corresponds to the disbursement being posted.

Servicer Processing

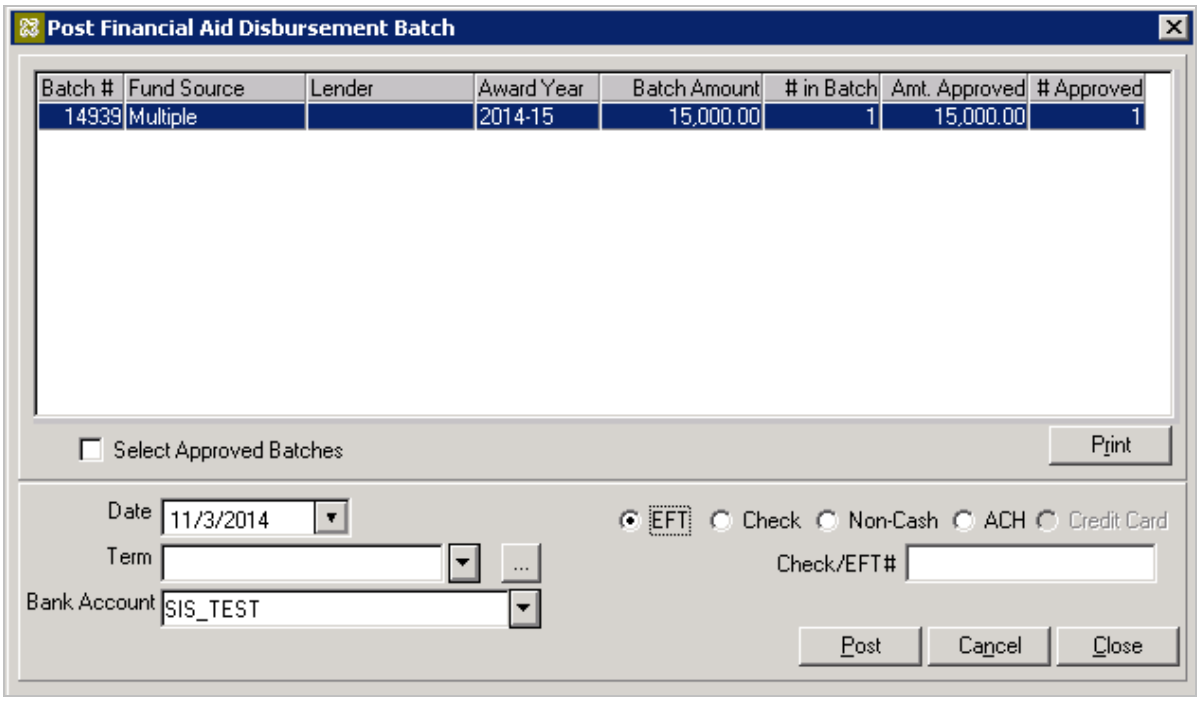
If your institution uses a servicer for processing FA, CampusNexus Student prevents users from posting a servicer disbursement batch if exceptions are found during the import process. If exceptions are found, the batch will not appear on the posting grid. Otherwise (no exceptions found), the batch is displayed normally as available for posting. The Fund Source reads "Servicer Import".

Dropped Students

When a student is dropped from school, CampusNexus Student does not set disbursements to a cancelled status if the disbursements are included in an open batch. CampusNexus Student flags a batch as having dropped students and provides the following message: *"This message is for informational purposes only. Students included in this batch have been changed to a Dropped status. You may continue to approve and pay these students in this process. Disbursements that are not paid must be manually changed to a* ***Cancelled*** *status in the Financial Aid packaging screen."*

To post FA disbursements:

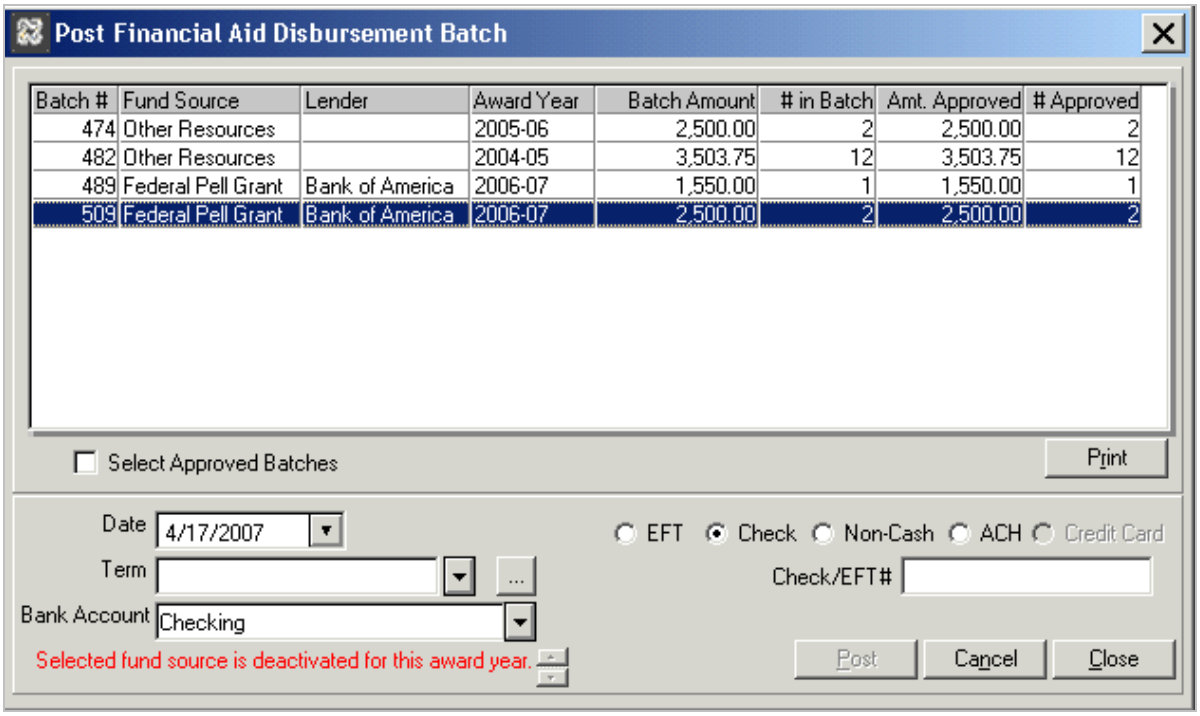
1. Navigate to **Daily** > **Student Accounts** > **Post FA Disbursements**. The Post Financial Aid Disbursement Batch form is displayed.



2. Select the batches to be posted. See Note below if the **Post** button is *disabled* or a red message is displayed.
3. Enter the **Date** of the disbursements.
4. Select the **Term** that applies to these disbursements.
5. Select the **Bank Account**from which the disbursements are distributed. (The bank account will be debited and the student ledger accounts will be credited.)
6. Select the type of payment for the disbursements: **EFT**, **Check**, **Non-Cash**, **ACH**, or **Credit Card**.
7. Enter the **Check Number** or **Electronic Funds Transfer (EFT) Number**.
8. Click **Print** to print the FA **Disbursement Batch Tracking** report.
9. Click **Post**. CampusNexus Student proceeds with the update. When the posting of the batches is completed, the following message is displayed: *"Print receipt notifications for disbursements just posted?"*

   Select **Yes**or **No**as required.
10. Select the **Select Approved Batches** check box to print receipts for previously approved batches. The form

changes as shown below.



11. Click **Print** to print receipts for the disbursements in the batch.

Note: If a batch includes a fund source that is deactivated, a message is displayed in red that contains the deactivated fund source for an award year. The **Post** button is *disabled* for these batches. If the batch contains multiple deactivated fund sources, scroll to see the list of fund sources that are deactivated for the applicable award year.

Posting Results

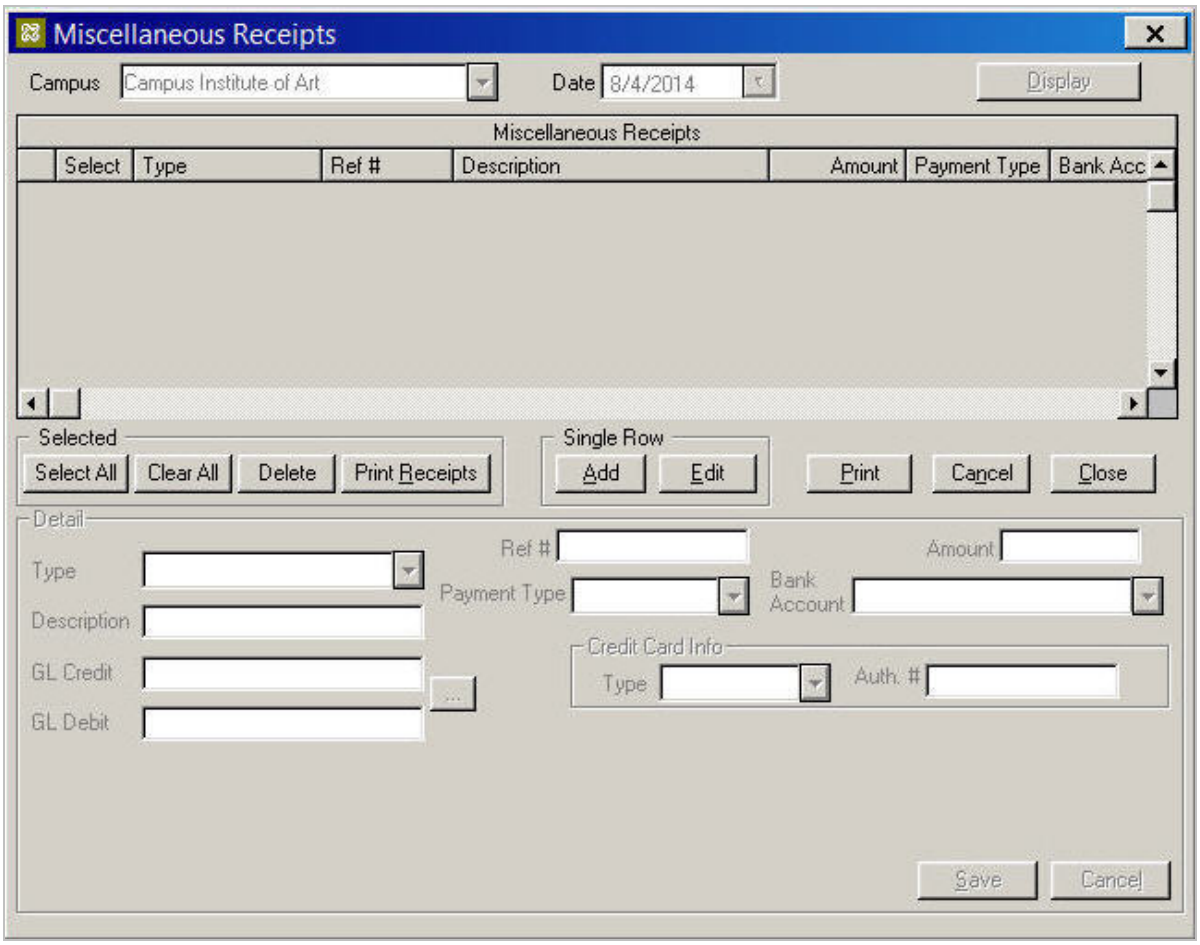
Each disbursement is posted to the appropriate student ledger card. For more information, see Transaction Detail - Detail Tab.

Miscellaneous Receipts

The Miscellaneous Receipts form is used to record, transactions that are not related to academic programs, for example, supplies, bookstore sales, vending machines, events, and so on. You can enter multiple transaction codes, descriptions, and amounts. After entering all transactions for the day, you can save and print the transactions.

To post miscellaneous receipts:

1. Navigate to **Daily** > **Student Accounts** > **Miscellaneous Receipts**. The Miscellaneous Receipts form is displayed.



2. Select the **Campus** for which transactions are to be posted or reviewed.
3. Select the **Date** of the transactions to be posted or reviewed.
4. To review transactions, click **Display**. CampusNexus Student displays the previously entered transactions.

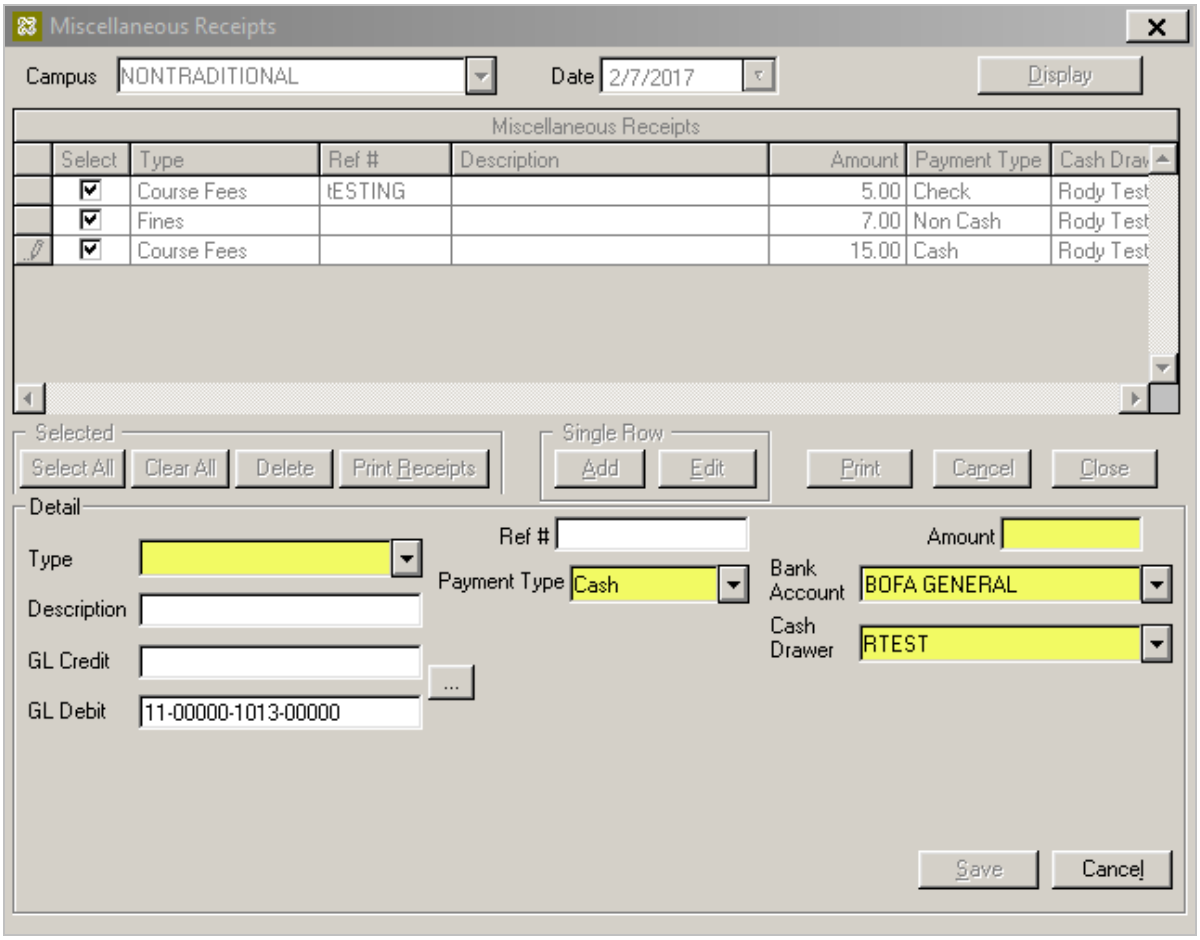
   When CampusNexus Student is integrated with an accounting system, the GL Accounts are verified as being valid GL Accounts by using the transaction date and campus to determine the appropriate fiscal year and ledger based on the journal entry group setup form.
5. Click **Add**, or select a record and click **Edit**.
6. Select the transaction **Type**.

Note: The transaction types available on this form come from Lists > Student Accounts > Transaction Codes. When the codes are set up, you must select a bill type indicator. Select **Misc. Receipts** or **Both** if the code is to be available for posting Miscellaneous Receipts.

7. Enter a reference number in the **Ref # field.**
8. Enter a value in the **Amount** field.
9. Enter a transaction description in the **Description** field.
10. Select a **Payment Type**.
11. Select a **Bank Account**.

    When posting a bank deposit, some of the transactions may come from miscellaneous receipts. They are identified with the description "Misc Receipt" and the student ID is zero.

    Note: If CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll and Cashiering is enabled, in addition to the Cash Drawer, you can also select a bank account to associate to the miscellaneous receipt. All active bank accounts appear in the Bank Accounts field drop-down list. This required field automatically populates with the default bank account for the selected payment type.



12. If the transaction code allows for entering the G/L numbers, CampusNexus Student enables two columns at the end of the grid allowing you to enter the **Debit** and **Credit** account numbers for the transaction.

- If the Great Plains search feature is enabled, select a row, and click the **Great Plains Search** button to search for Debit Account or Credit Account numbers in the Great Plains GL.

    a. In the Search Great Plains GL Accounts form, click the **Search By** list. Search for GL Accounts using the **Account Number** or **Description**.

    Note: These searches also return Stipend Account information when you have set up separate debit and credit account numbers for stipends.

    b. In the **Search For** field, enter the account number or description.

    c. Specify the **Search Pattern**. The Search pattern works as follows:

        - “Starts With” finds an exact match on data that starts with the characters you specify.

          Enter dashes when using this method. For example, if you have a mask that uses ###-####-## and you enter 0000, you will not get any matches. You must enter 000- or 000-0 to get matches, where the first four digits in the account number are zeros.
        - "Contains" finds any value that contains what you have entered.
        - "Wildcard" searching uses % for any string that follows what is entered. The "_" only replaces a single character.
        - "Exact Match" must contain everything you enter. There cannot be additional characters before or after what was entered. If you are not sure of the exact wording, choose “Contains”.

    d. Click **Search**. All GL Accounts that meet the specified criteria are displayed in the result grid.

    Based on the value specified in the Max GP GL Account Search field, the results grid displays the data in one page or across many pages. If there are more records than the default number of rows, CampusNexus Student displays:

- Number of records displayed.
- Total number or records matched.
- A Next button to display the next records matched.

e. Double-click the applicable row, or click **Select** to add the account details to the Debit Account or Credit Account field.

f. Click **Save**. CampusNexus Student saves all records for all campuses that use Great Plains, that contain both a valid Debit and Credit Account or both the Debit and Credit accounts are blank. An error message is displayed if any campus that uses Great Plains is using an incorrect Debit and/or Credit account.

The **Reset** button on the Search GP GL accounts form clears the fields for a new Search.

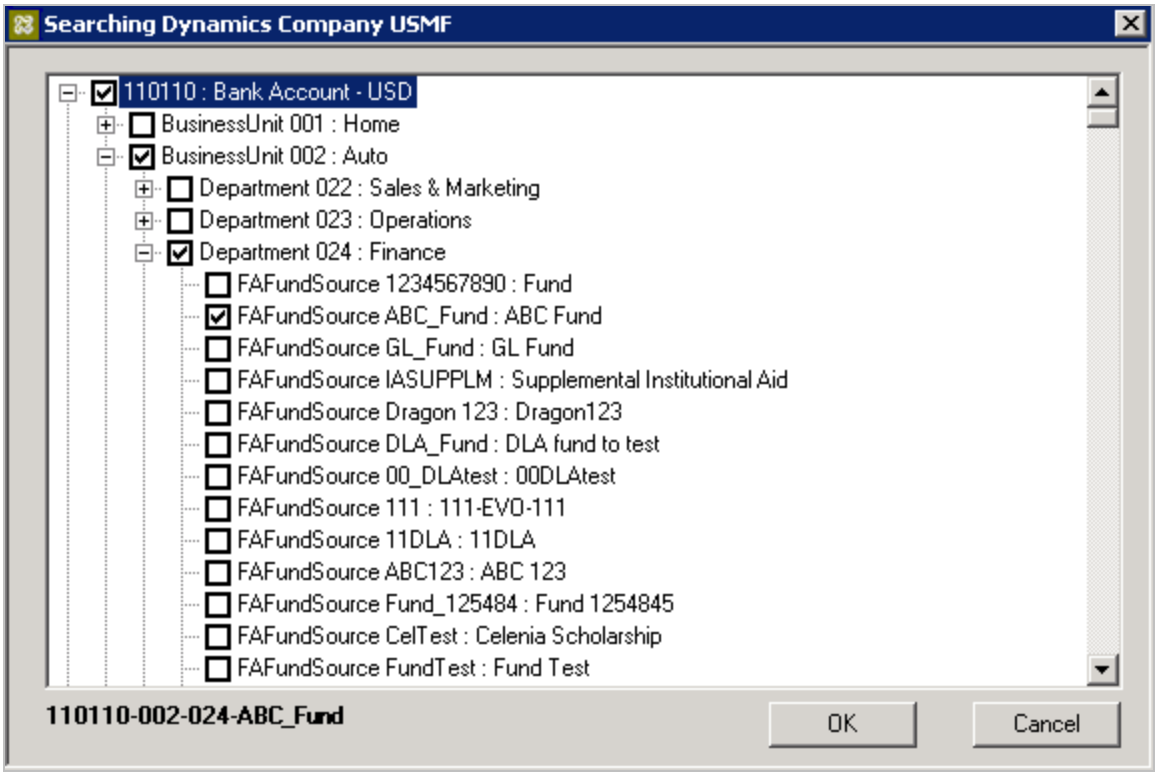
- If CampusNexus Student is integrated with CampusVue Finance, HR and Payroll or CampusNexus Finance, HR and Payroll, select a row and click the **Power Search** (for CampusVue Finance, HR and Payroll) or **Select GL Account** (for CampusNexus Finance, HR and Payroll) button to search for the appropriate GL Debit and GL Credit accounts.
    - If using CampusVue Finance, HR & Payroll, select the appropriate Ledger Account and click **OK**.
    - If using CampusNexus Finance, HR & Payroll, select the appropriate dimension attribute and click **OK**.

Note

- Your permissions in the accounting system determine which GL accounts you can view and select in CampusNexus Student.
- The Main account node can be displayed at any level in the account hierarchy. This is based on the account structure setting that is configured in Microsoft AX. For information about this setting, your administrator must see Microsoft AX Help.

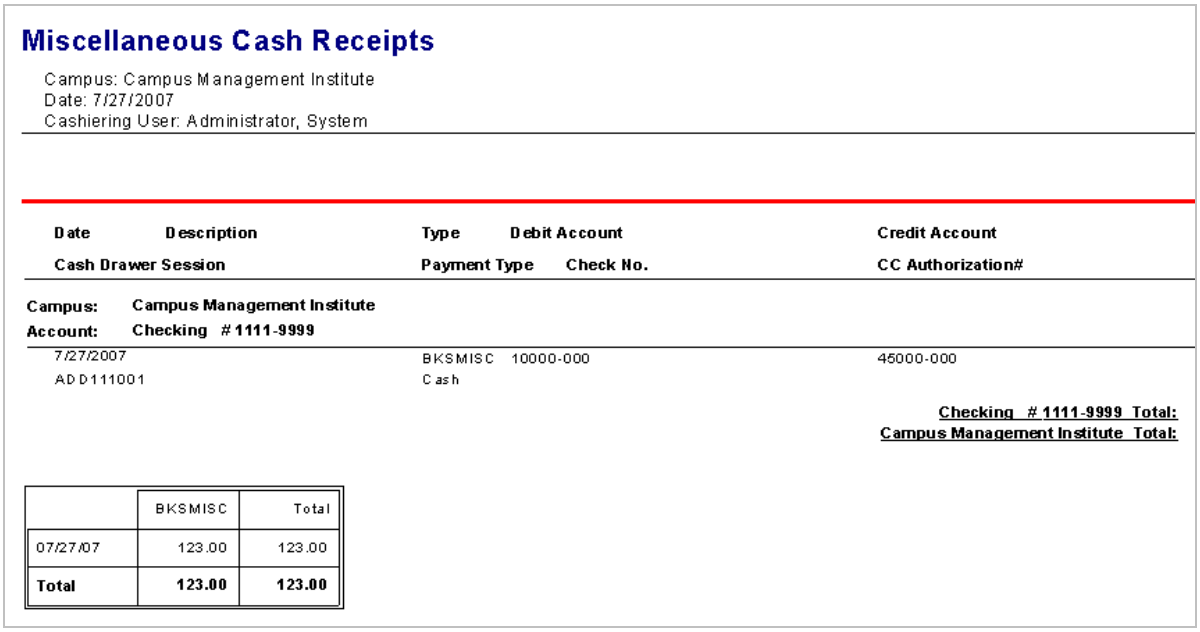
When you click **Save** after selecting the account, the system validates your selection against the account structure setting in Microsoft AX. This validation also occurs when transactions are released to

G/L.



13. Click **Save**. CampusNexus Student displays a confirmation message after saving the transactions. Click **OK**.
14. Click **Print** to print a list of the displayed transactions.

    The Miscellaneous Cash Receipts report is displayed.



Miscellaneous Cash Receipts

Campus: Campus Management Institute
Date: 7/27/2007
Cashiering User: Administrator, System

Date	Description	Type	Debit Account	Credit Account
Cash Drawer Session		Payment Type	Check No.	CC Authorization#
Campus:	**Campus Management Institute**			
Account:	**Checking # 1111-9999**			
7/27/2007		BKSMISC	10000-000	45000-000
ADD111001		Cash		

Checking # 1111-9999 Total:
Campus Management Institute Total:

	BKSMISC	Total
07/27/07	123.00	123.00
Total	**123.00**	**123.00**

To view the data in Excel spreadsheet format, from the Report Viewer in the upper left corner of the Miscellaneous Cash Receipts Report, select Excel > Export to Excel .

15. You can view report sorted by campus, transaction code, and date range by navigating to **Reports > Student Accounts >** Miscellaneous Cash Receipts.

Post Charges

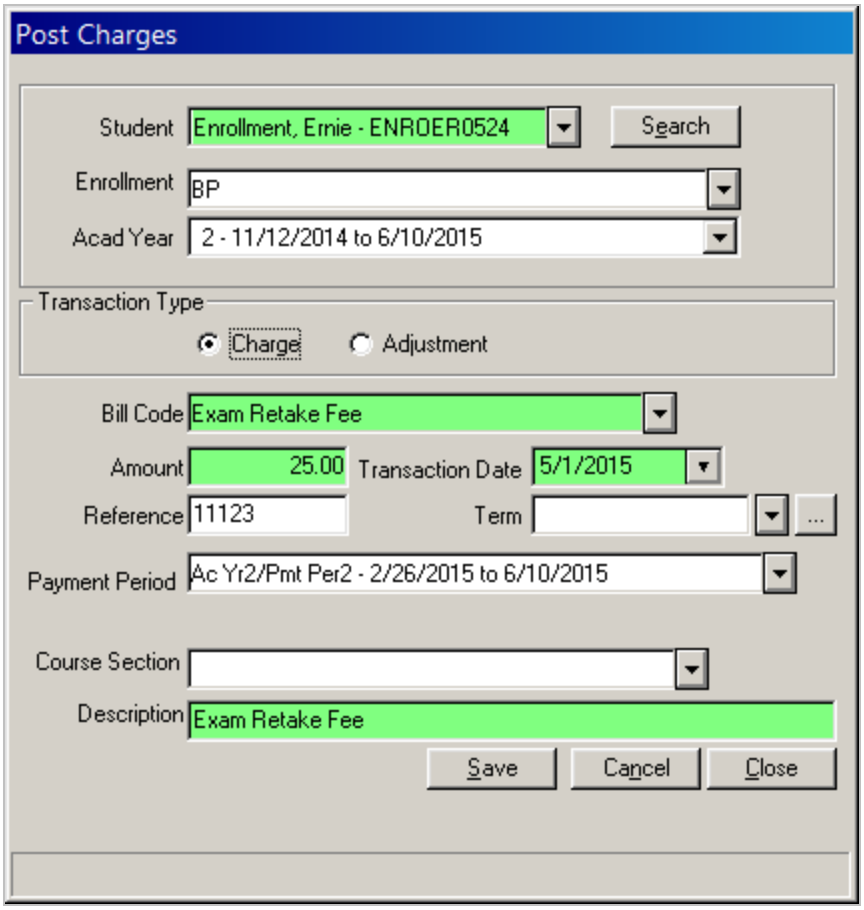
The Student Accounts Department uses this form to post charge transactions to students' accounts receivable. When you post charges to the main student ledger, the transaction code list will only include codes that are not associated with a subsidiary. Adjustment transactions can also be posted from this form.

If you use any of the posting options–payments, charges, or refunds–and the Posting Flag is set to "Current Campus", you can only post to an enrollment at the "Current Campus". If you try to post transactions for another campus, a message indicates that you are not signed into the campus and posting is not allowed. If the Posting Flag is set to "Any Campus", you can post transactions for a student at any campus.

If transaction code permissions are used, only transactions that the staff member may process appear in the **Bill Code** field.

To post a charge or adjustment transaction:

1. Select a student.
2. Navigate to **View > Student Accounts > Ledger Cards > Post Charges**.
   - OR -
   Navigate to **Daily >Student Accounts > Post Charges**. The Post Charges form is displayed.



3. Select the **Student** for whom the transaction is to be posted. Select from the list of recent students or search for the student.
4. Select the **Enrollment**.

5. Select an **Academic Year** to which the transaction is related.
6. Select the Transaction Type: **Charge** or **Adjustment**.

   Charges have an effect on the Student's Receivable account and some form of adjustment account. They show up in the Charges column on the Student Ledger Card.
7. Select a **Bill Code**. This list does not display transaction codes that have been linked to subsidiaries.
8. Enter the **Amount** of the transaction.

   The amount can be positive (debit adjustment) or negative (credit adjustment). In a Charge transaction, the amount is always entered as a positive (debit) value. In an Adjustment transaction, the amount can be positive (debit adjustment) or negative (credit adjustment). To enter a negative amount, type the minus sign (hyphen) in the amount field before you enter the amount.

   A negative value entered here results in a reduction of the student's account receivable and an increase in an adjustments account. It will appear in the Charges column of the student's Ledger Card. It does not ordinarily have any effect on the cash account or credit cards receivable account.
9. Enter or select the **Transaction Date**. The date cannot be earlier than the Minimum Transaction Date. (The Minimum Transaction Date is established for each campus to control the posting of transactions after accounting activity for a given period has been posted to the General Ledger.)
10. Optional: Enter a **Reference** value.
11. Select a **Term** to which the transaction belongs.

    CampusNexus Student checks for an Override Required Term indicator on the selected transaction code. This check is performed only if the Require Term Codes option has been selected in Setup > Student Accounts. If term codes are required on transactions and the selected transaction code has the Override Required Term indicator turned on, CampusNexus Student will not require a term code to post the transaction.

    Note: If the enrollment selected for posting a charge is registered in a program version this is non-term, the Term is no longer be required (but the fields is still be available).
12. If a payment period exists for an enrollment, use the **Payment Period** list to select the payment period which the transaction is linked.

    Note: If term is required and the selected enrollment has academic calendar 5 or 6, Payment Period is required instead of Term.
13. Enter a **Description**. The description defaults to the transaction description, but you can add to it or otherwise change it.
14. Click **Save** to post your transaction to the student ledger cards and clear the transaction fields.

    The student name, enrollment, academic year, transaction type, and date are not cleared in case you want to add another transaction for the same student. Be sure to change this data if you are entering data for another student.
15. Click **Close** to close the form.

Post Payments

You can post payments from students, third parties, and other fund sources, or apply payments to open items in the student ledger or subsidiary ledger. The Post Payments process can handle scheduled payments from various fund sources. Payments can be linked to enrollments, terms, and financial aid payment periods. See also Process Electronic Drafts and Posting Cash/Other Payment Plans (Reamortizing future payments).

Use the Post Payments form to post a scheduled payment or unschedule a payments before they are posted. See Campus Financial Aid - Auto Stipends for information regarding Title IV funds and associated waivers.

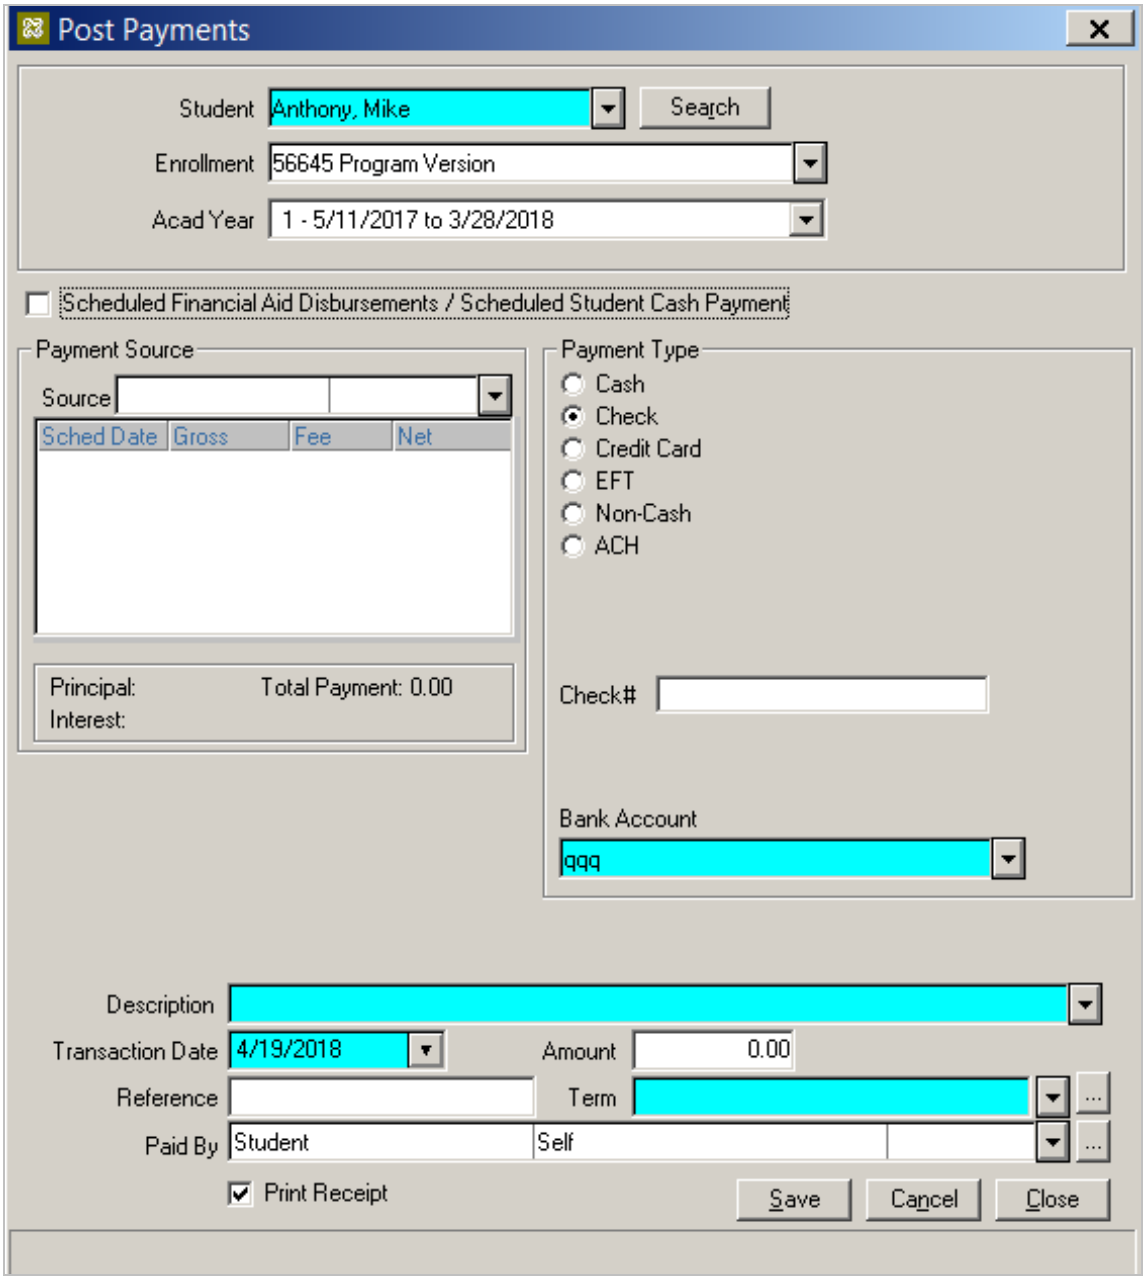
To post payments:

1. Click **Post Payments** on the student's ledger card.
   - OR -
   Navigate to **Daily > Student Accounts > Post Payments**. The Post Payments form is displayed.

   To post payments or charges for a subsidiary, click **Post Payments** on the Student Subsidiaries form or navigate to **Daily > Student Accounts > Post Payment**. For more information, see To post payments or charges to a subsidiary.

2. If the Cashiering feature is enabled, only users defined as cashiers can post payments. The Cashier ID Check form is displayed.

   
   Enter the cashier **User ID** and **Password**, and click **OK**. CampusNexus Student validates the information and, if a match is found, proceeds to the Post Payments form.



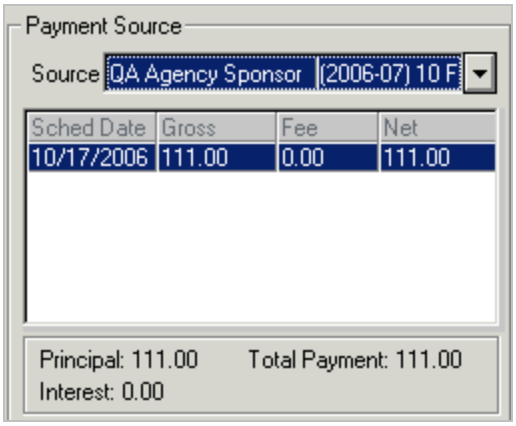
3. Select the **Student** for whom the payment applies. Select from the list of recent students or search for the student.
4. The **Applicant/Enrollment** field is populated automatically. Accept the default or choose another value from the list.
5. Select the **Academic Year** to which the payment applies.
6. The **Payment Period** combo box is displayed for program versions that can use it (program versions with academic calendars 1, 5, and 6). When Academic Year is selected, this combo box dynamically filters out academic years other than the selection. If the Academic Year field is cleared, all payment periods are available for selection. If no payment periods exist, the combo box is not displayed.

Conversely, when Payment Period is selected, the Academic Year is populated automatically. If Academic Year is modified after Payment Period is selected, this field is cleared and validated during save.

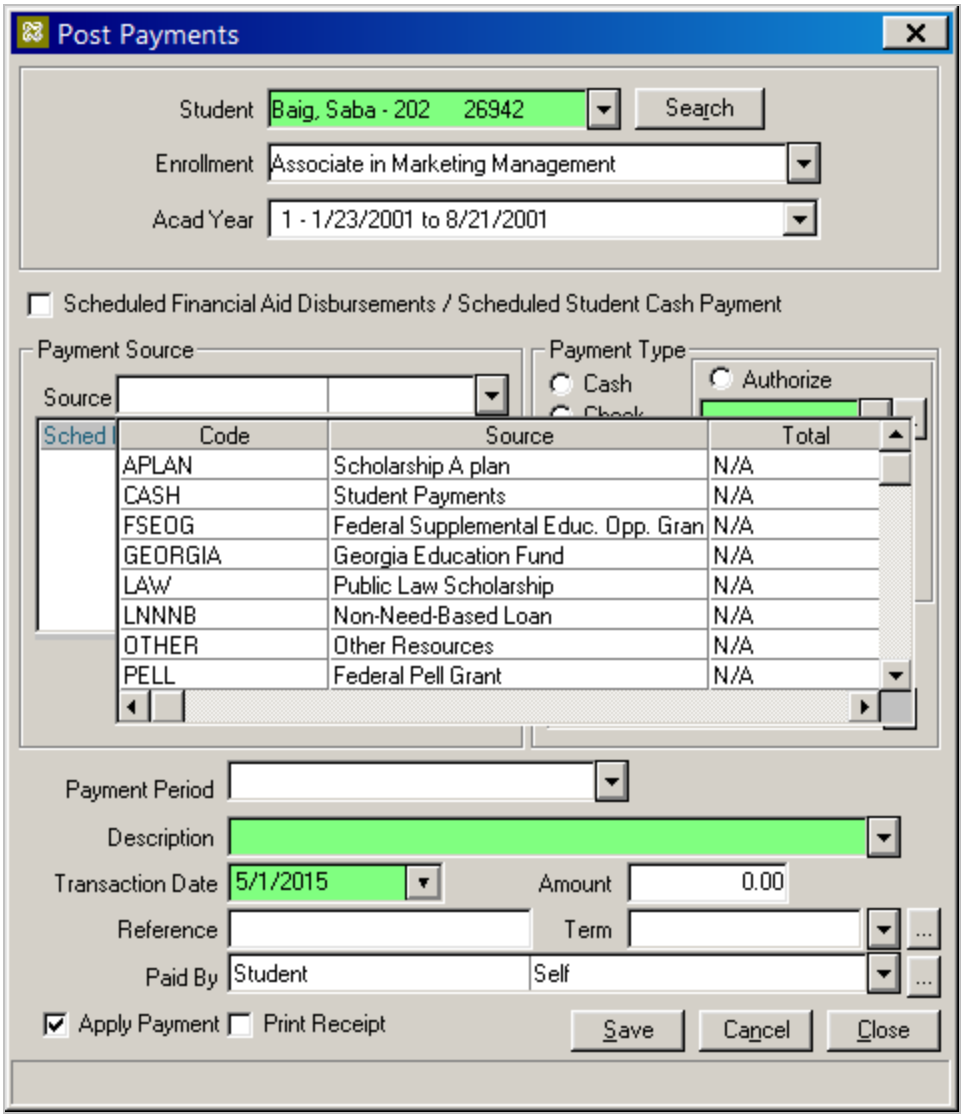
The notation for Payment Periods is `A<n>|P<m>` where `<n>` is the academic year sequence number and `<m>` is the payment period sequence number.

7. If the incoming payment is scheduled, select **Scheduled Financial Aid Disbursements/Scheduled Student Cash Payment**. The student's scheduled (unpaid) financial aid fund sources appear in the **Source** combo box.
   - If you select a fund source that is deactivated for an award year and campus, a message is displayed in red and you cannot continue processing the payment.
   - If any of the award year's fund sources are active, the fund source is displayed as a Source option.

   When a fund source and award year is selected from the Source list, the following information is displayed under the Source field.



8. If the **Scheduled Financial Aid Disbursements / Scheduled Student Cash Payment** check box remains cleared, a list of fund sources is displayed for selection in the **Source** list.



When you select a fund source, the Unscheduled Payment form is displayed, and you can schedule a payment to be posted. Fund sources are listed only when the Allow Posting Directly to Ledger Card option is enabled to allow manual posting.

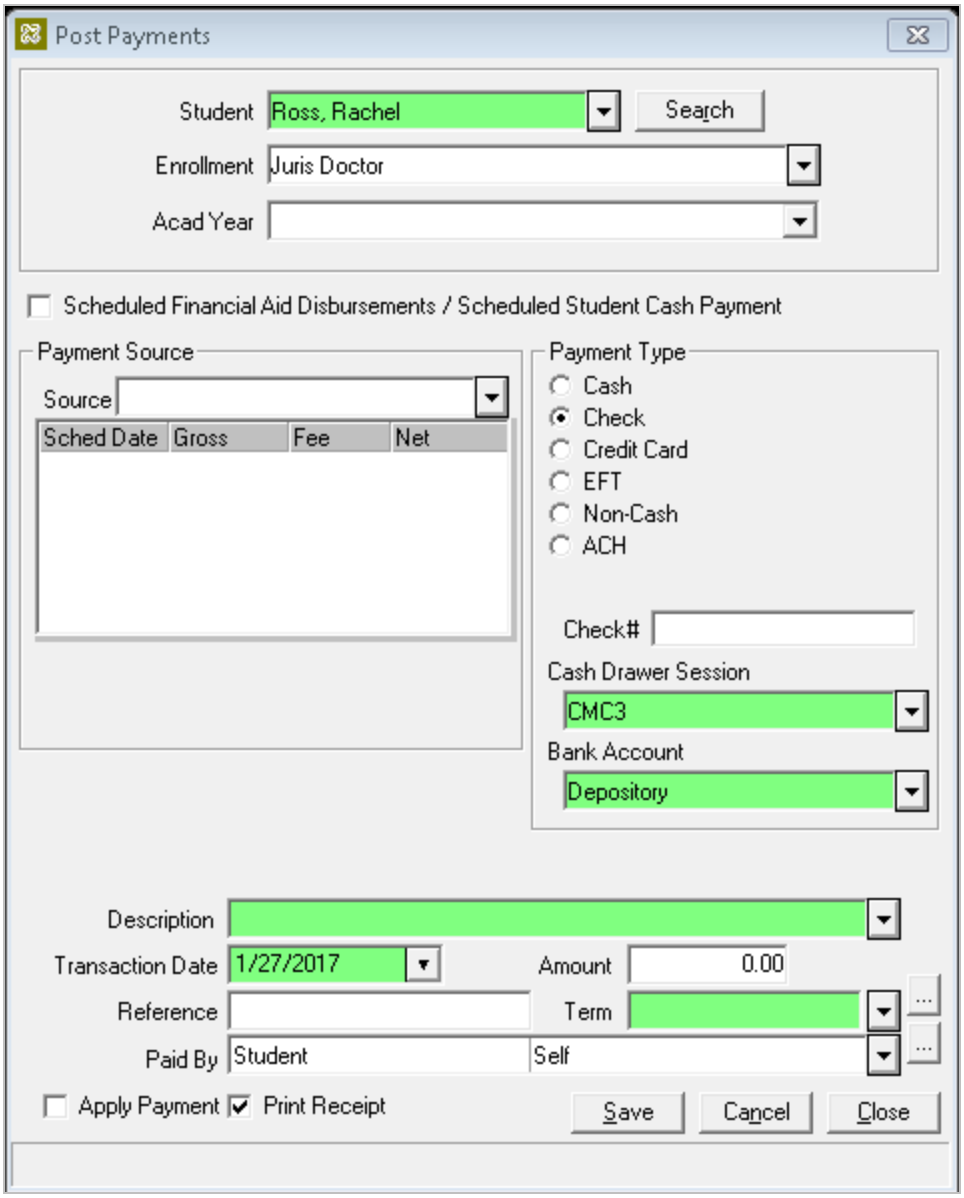
9. Select a **Payment Type**. The options are:

   - Cash
   - Check (default) - Enter a Check # when you select this option.
   - Credit Card
   - EFT (Electronic Funds Transfer)
   - Non-Cash (scholarships)
   - ACH

10. Select the **Cash Drawer Session**. Refer to Cash Drawers for detailed information.

    Note: If CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll and Cashiering is enabled, you can select a bank account to associate to the payment. All active bank accounts appear in the **Bank**

Accounts field drop-down list. This required field automatically populates with the default bank account for the selected payment type.



11. Select or enter the purpose of the payment in the **Description** field.
12. Select or enter the **Transaction Date** of the payment. This is the date that is considered in preparing the bank deposit.
13. Enter the **Amount** of the payment. You must enter a decimal point to separate pennies from dollars. If the amount is to be a debit to the student's account, enter a minus sign (hyphen) before the amount.
14. Optional: Enter any **Reference** data that you use to mark a payment.
15. Click or to select the **Term** to which this payment applies. (Whether you must select a term depends on a system setup flag controlled by your system administrator.)
16. In the **Paid By** list box, select the person who is making the payment. This list comes from the list of addresses in

the student's file.

If the person making the payment is not on the list, click . The Addresses form is displayed. Enter the new person and address. You can then select that person or entity as the "Paid By" option.

17. Select **Apply Payment** to apply the payment to a specific charge or multiple charges on the student's ledger. Refer to Payment Adjustments and Apply Payments to Charges for more information.

    Note: This option is available only if 'Auto Apply Using Hierarchy' is selected for 'How Should Payments Be Applied?' in Setup > Campus Locations > Add/Edit Campus > Accounting (tab).

18. Select **Print Receipt** to provide the student with a paper receipt for this transaction.

19. Click **Save**. CampusNexus Student checks the payment data and displays a message if editing rules have detected any problems. For example, the transaction date may be invalid if it is earlier than the earliest permitted transaction date.

    Note: If the fund source has been set up to apply payments to interest before principal, CampusNexus Student applies the payment to the interest of the selected scheduled payment followed by the principal. Additionally, CampusNexus Student applies overages to the interest of subsequent payments followed by the principal until the overage is exhausted.

20. Click **Cancel** to stop the posting transaction.

21. Click **Close** to close the form.

Posting Cash/Other Payment Plans (Reamortizing future payments)

Reamortizing future scheduled payments is necessary when you need to post a payment for a student and the amount paid is different than the expected amount. This includes receiving a scheduled payment that is less or more than the expected payment.

When you post a payment with an amount that is different than the scheduled payment amount, CampusNexus Student reamortizes and rebuilds the student's future payment schedule.

To have the student's payment plan reamortize and rebuild the remaining scheduled payments correctly when a payment is received that is different (over or under) than the expected scheduled payment, the following settings are necessary on the Fund Source Code Setup form.

1. The student's fund source type selected is **Cash-Other**.
2. The **Auto Post Interest Charges when Payment Made** is selected from the Interest Charges drop-down list.
3. Clear the **Recalculate Interest at time payment is made** check box or confirm that it is NOT selected.
4. Clear the **Apply over Payments to interest before principal** check box or confirm that it is NOT selected.
5. Select **Apply to First** for the Overpayments list.

This configuration keeps the interest that is charged to the student consistent with what was initially calculated when the payment plan was first built.

6. **Post a Payment in Sequence for Fund Source Type of Cash/Other**

   When posting a payment against a payment schedule for a fund source type of cash/other, and the payment is for a future payment rather than the current payment or is a past due payment, CampusNexus Student does not allow the payment to process.

   Note: This doesn't mean that students cannot prepay. Early payments are still permitted and applied to the current payment in the payment plan. A computation of accrued interest is stored with the student's payment plan whenever the actual payment amount received is less than the expected interest payment amount, where the Accrued Interest Amount = (Total Accrued Interest - Actual Payment Received) + Previous Accrued Interest Amount. At the time a payment is received, any outstanding accrued interest amount is fulfilled before applying the payment to any outstanding interest or principal amounts.

   Example: A student owes $100 in accrued interest but makes a payment before the next scheduled payment is due (the student is at the Bursar's office even though the student knows that $250 is due next week). The interest accrued for this payment schedule is $40. The total Accrued Interest Amount = (80-140) + 40 = 60 + 40 = $100.00. Therefore, $100 is the student's accrued interest amount. However, even though the student just paid $140, CampusNexus Student is only displaying that the student paid $100 since $40 equals the accrued interest amount and, even though this amount is stored in CampusNexus Student, it is not displayed for the student or bursar/FA advisor to view (as $100 being applied to the accrued interest amount).

   Additionally, the interest charge posted to the student's ledger will contain both the accrued and payment interest received in this transaction. Therefore, using the example above, $100 + payment interest for a total of X will be posted to this student's ledger.

   As mentioned above regarding a past due payment, at the time of a late payment, the past due scheduled payment records will be zeroed out. This is done to ensure that any refunds can be accounted for accurately. The total amount received less any accrued interest payment will be applied to the current payment in the payment plan with the amounts applied to both interest and principal payment amounts.

   Again, from the example given above, the total amount received from this student of $140 - $100 (the accrued interest) = $40 which will be applied to the current payment in the payment plan (with the amounts applied to both interest and principal payment amounts for this student).

7. If the **Restrict student scheduled payments based on Graduation date** check box is selected under Setup > Campus Locations > Add/Edit (button) > Allow (tab), the last scheduled payment does not go beyond the student's graduation date.

   Note: When configuring a payment schedule for a fund source type of cash/other and the payment frequency is set to the number of days between payments, the number cannot exceed 365 days. See Cash-Other Source Form.

Audit Features

The audit features for Student Accounts include:

- CampusNexus Student stores the name of the payee on each refund record, stipend record, and subsidiary refund so that it can be retrieved for reporting purposes.
- CampusNexus Student audits changes to the payee for refunds and stipends. Auditing occurs from the time the refund or stipend is scheduled to the time the refund or stipend is processed. The date changed, time changed, and the user who made the change are audited.
- Payee changes are audited for subsidiaries.

- Payee information for a stipend can be edited regardless of the fund source associated with the stipend. The payee changes are audited for all stipends.
- Your ability to edit a payee for a refund is dependent on the fund source associated with the refund. The payee changes are audited only for the fund sources that allow the payee to be changed.
- You can sort on different columns of the grids available in the Process Refunds/Stipends wizard.
- A student account administrator can define that the Reference information is printed on the check, below the address, or on the stub, or in both places.
- A student account administrator can view the ID of the user who scheduled the refund/stipend using the Ledger Card, Transaction Detail button.
- CampusNexus Student stores the user ID of the user who scheduled the stipend so that it does not get overwritten by the user ID of the user who posted the stipend.

Credit Cards

You can post payments and refund using the Payment Type options "Credit Card". CampusNexus Student provides a means of capturing the necessary data about credit cards used by the student.

When you accept a credit card for a student payment, CampusNexus Student validates the credit card number only if the type is:

- A - American Express
- C - Carte Blanche
- D - Discover
- I - Diners Club
- M - MasterCard
- V - Visa

To set up web payments, see Campus Electronic Processing.

See also Refund Payments with a Credit Card, Payment Adjustments, and Payment Information.

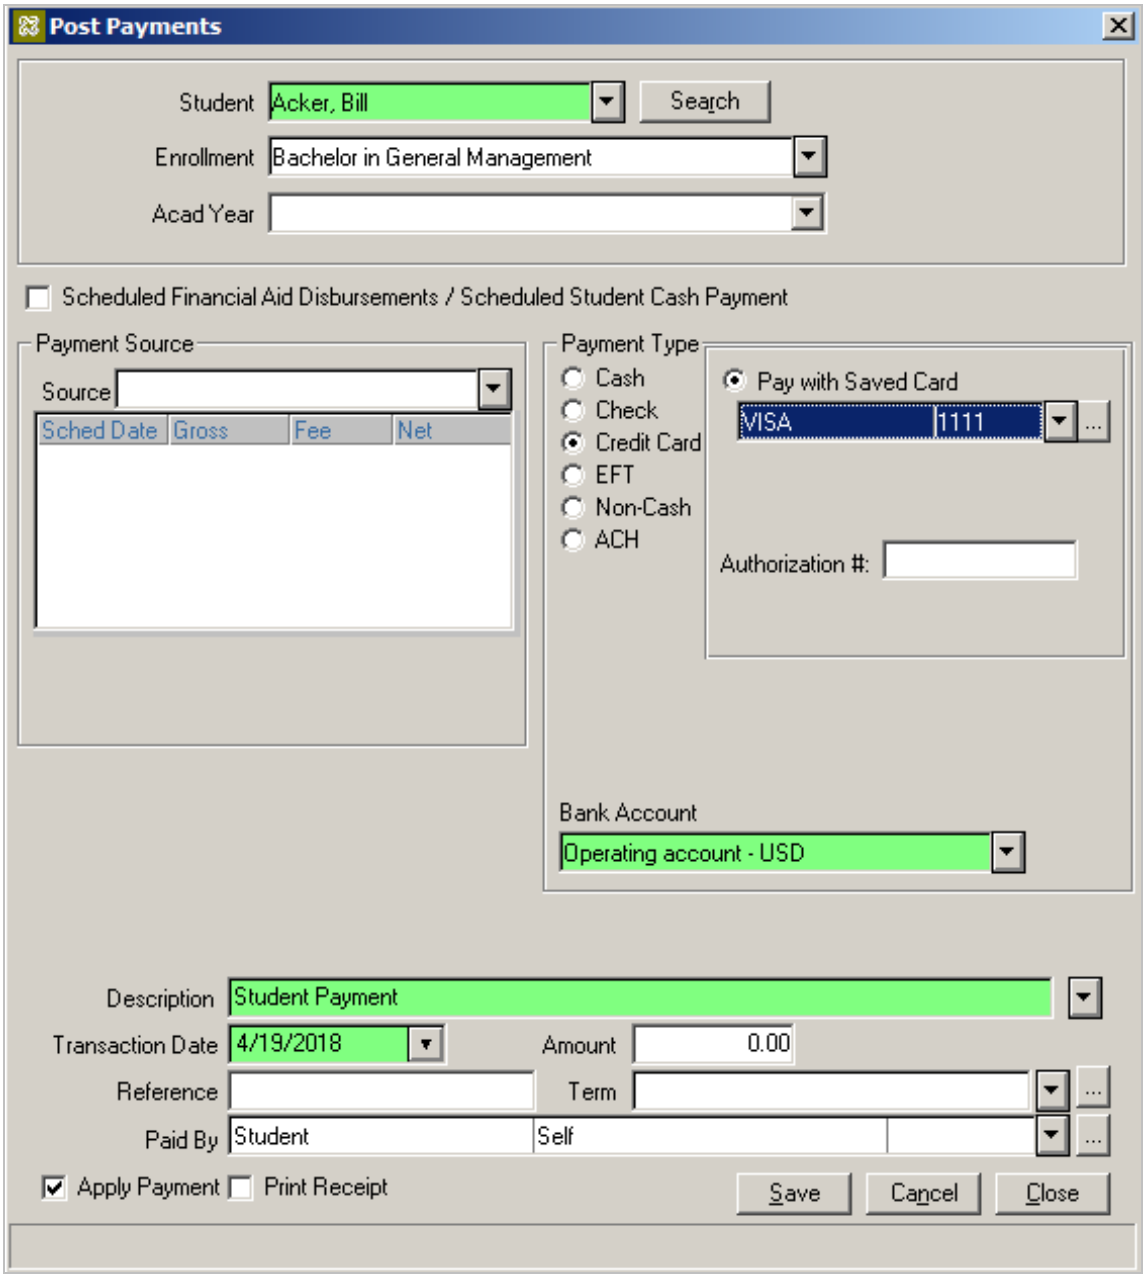
To post a payment with a credit card:

1. Click **Post Payments** on the student's ledger card.
   - OR -
   Navigate to **Daily > Student Accounts > Post Payments**. The Post Payments form is displayed.

   If the Cashiering feature is enabled, only users defined as cashiers can post payments. The Cashier ID Check form is displayed.

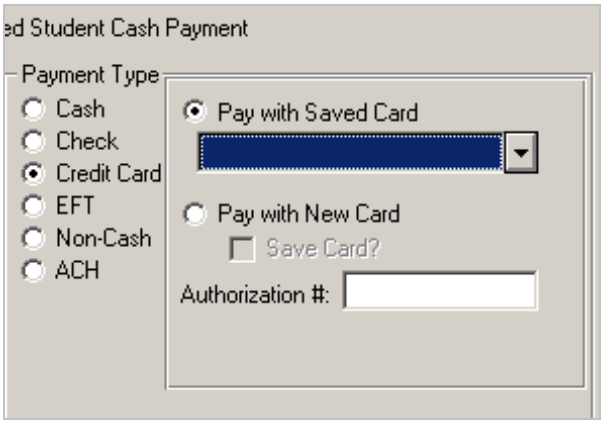
   Enter the cashier **User ID** and **Password**, and click **OK**. CampusNexus Student validates the information and, if a match is found, proceeds to the Post Payments form.

   Note: If the student's campus is not configured to Verify Credit Card Payments Posted Using CampusNexus Student (Campus Information - Electronic Processing Tab), the form only has a single option for Credit Card Payment Type: **Pay with Saved Card**.



Note: If the student's campus is configured to Verify Credit Card Payments Posted Using CampusNexus Student (Campus Information - Electronic Processing Tab), there are two options for Credit Card Payment Type:

- **Pay with Saved Card**
- **Pay with New Card**



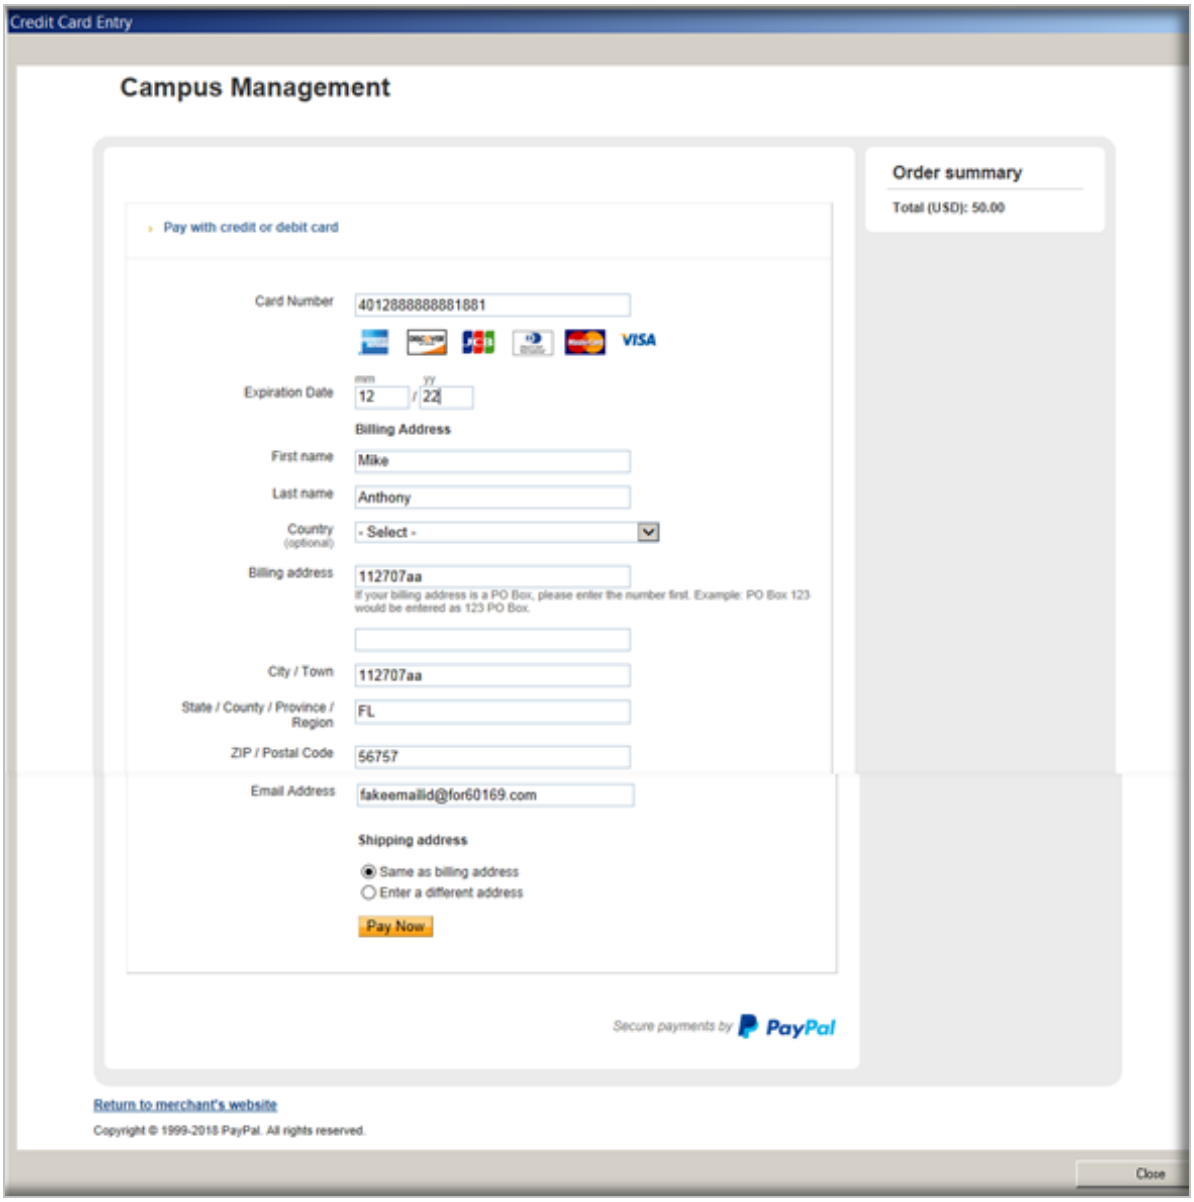
2. Select the **Student ID** for whom the payment is to be posted.
3. Select the **Enrollment** and **Academic Year**.
4. Select the **Scheduled Financial Aid Disbursement / Scheduled Student Cash Payment** option if applicable.
5. Select the source of the payment from the **Source** list.
6. Select **Credit Card** as the Payment Type. The credit card authorization fields are displayed.
7. When the **Pay with Saved Card** option is selected, you can select the saved credit card from the drop-down list.

   When the **Pay with New Card** option is selected, you will be redirected to the payment gateway provider's hosted page to enter credit card information to complete the transaction.
8. Complete the remainder of the Post Payment form as you would for any other payment type.
9. Click **Save** to save the payment to the student's ledger card.

   If you have selected the Pay with New Card option, you are redirected to the payment gateway provider's hosted page to enter credit card information to complete the transaction.

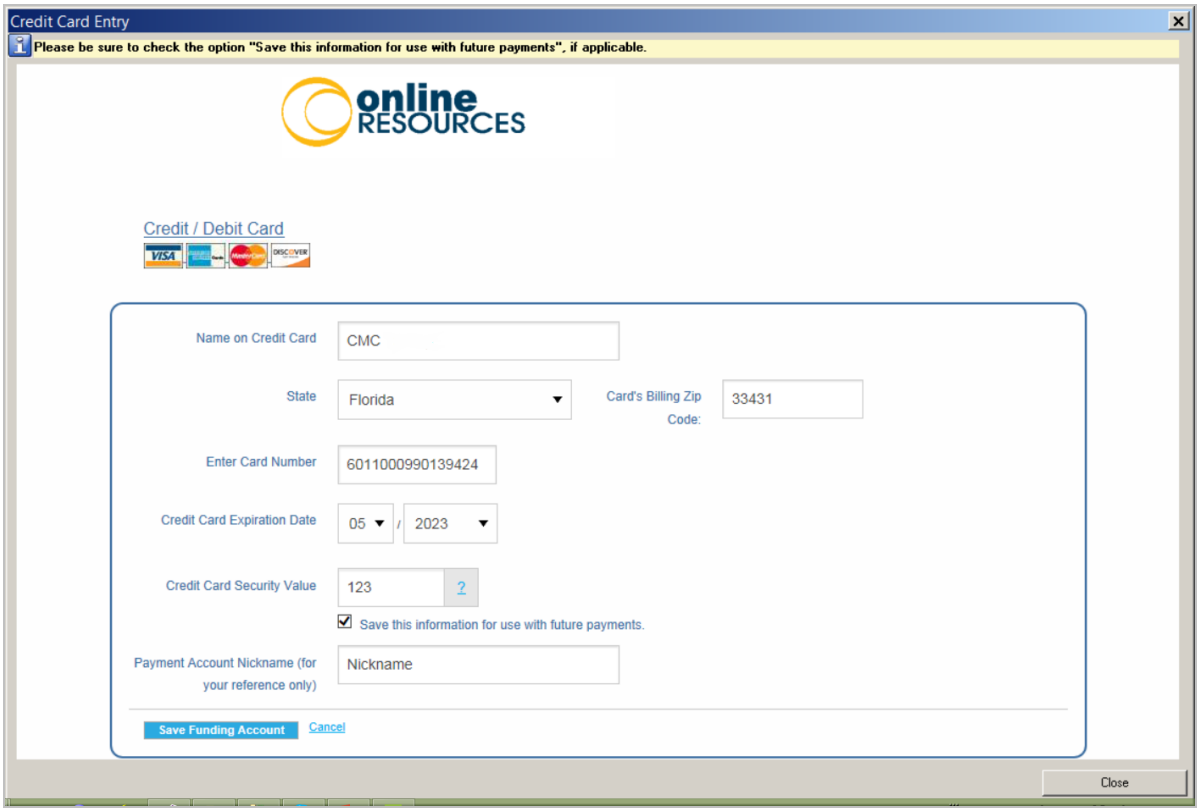
   Note: Selecting the **Save Card?** check box will save the new card to the database as Active for future transactions. If you do not save the card, the card will be saved but will be marked as Inactive and won't be available for selection for future transactions.

   PayPal



Details concerning properly configuring your PayPal Hosted Checkout page can be found here: PayPal Account Configuration

ACI



Note: When a credit card is added through a payment gateway provider's hosted page, a unique ID is stored in the CampusNexus Student database instead of the actual credit card number. This unique ID is used to communicate with the payment gateway provider to identify the student's correct credit card for processing credit card transactions.

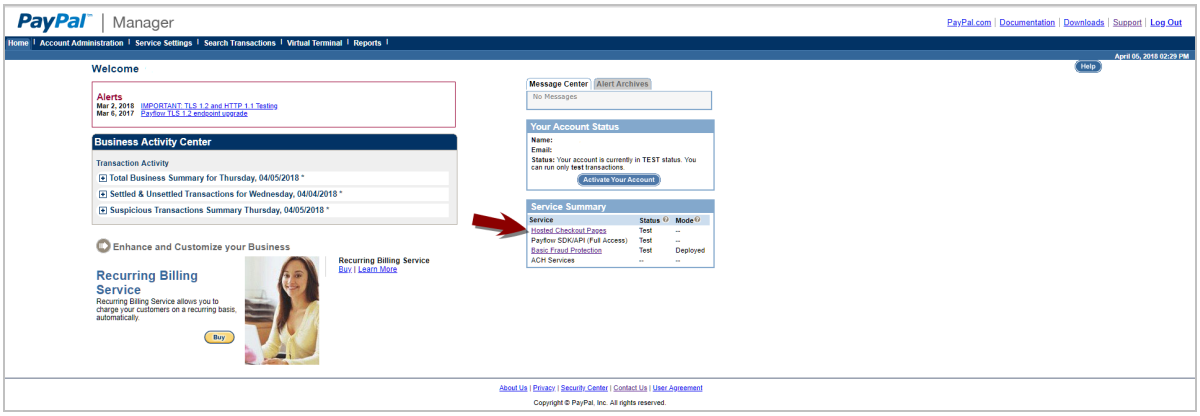
To post refunds with a credit card:

Open the **Post Refunds** form from the student's ledger card or from the Post Individual Refunds path. CampusNexus Student prompts for a cashier ID check. Specify your user name and password. If valid, CampusNexus Student allows you to schedule refunds through the Student Accounts - Refunds form.

PayPal Account Configuration

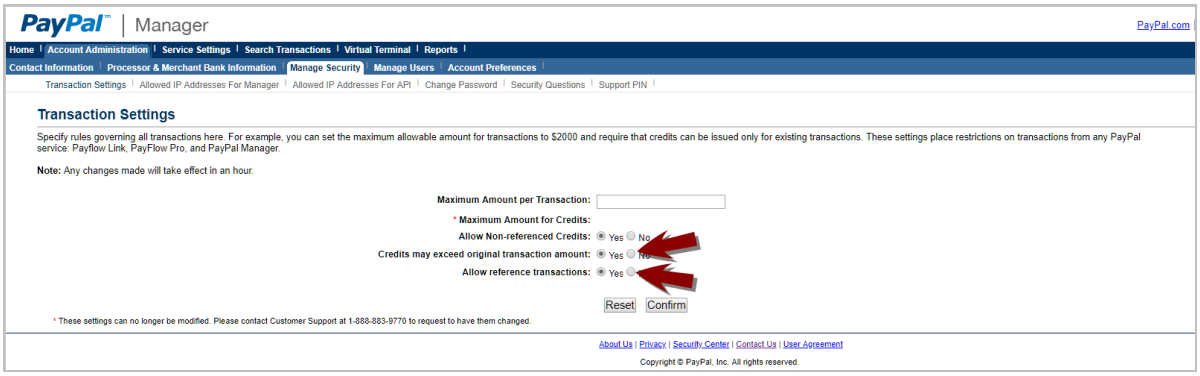
To ensure your PayPal payment gateway provider functions properly in CampusNexus Student, complete the following steps to configure your PayPal account:

1. Ensure you have the Hosted Checkout Pages feature enabled for the PayPal account. If the account does not have this service, you must contact PayPal to have this Hosted Checkout Pages feature turned on.



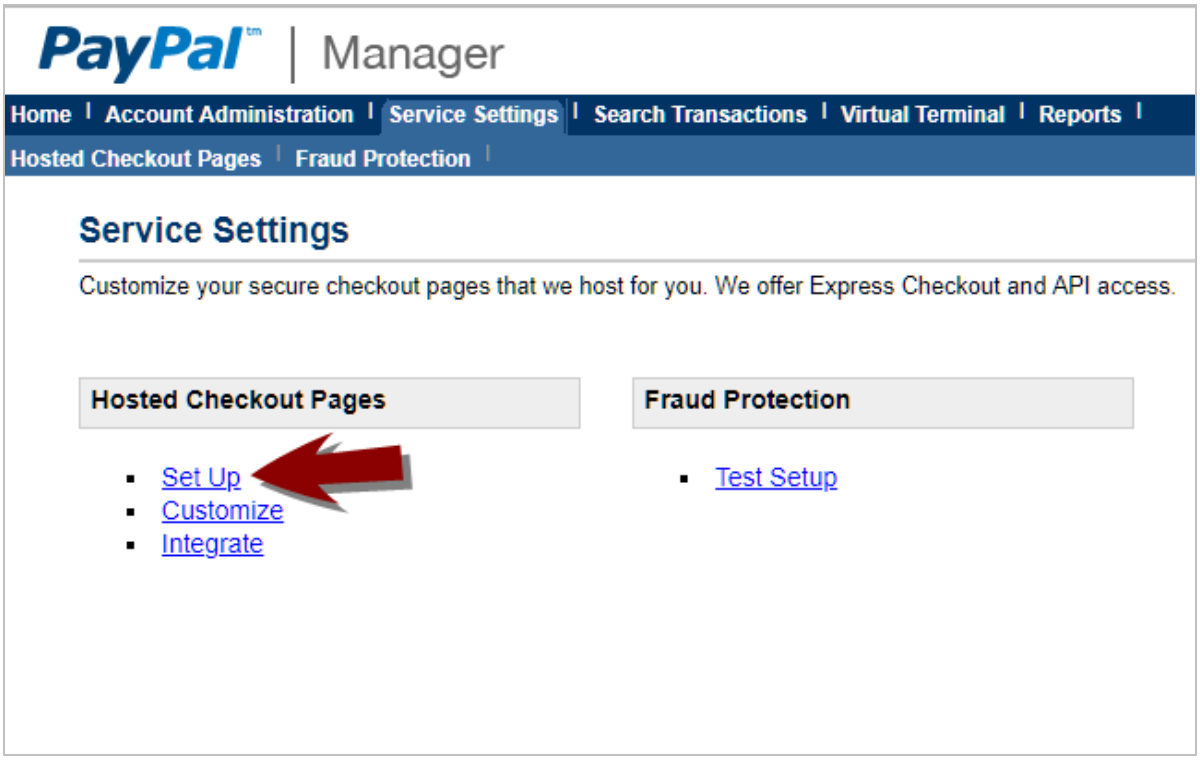
2. In PayPal Manager under Account Administration > Manage Security > Transaction Settings, the following settings must be set to **Yes**.
   - **Credits may exceed original transaction amount**
   - **Allow reference transactions**

   If the radio buttons cannot be selected, you must contact PayPal and request this setting change is made.

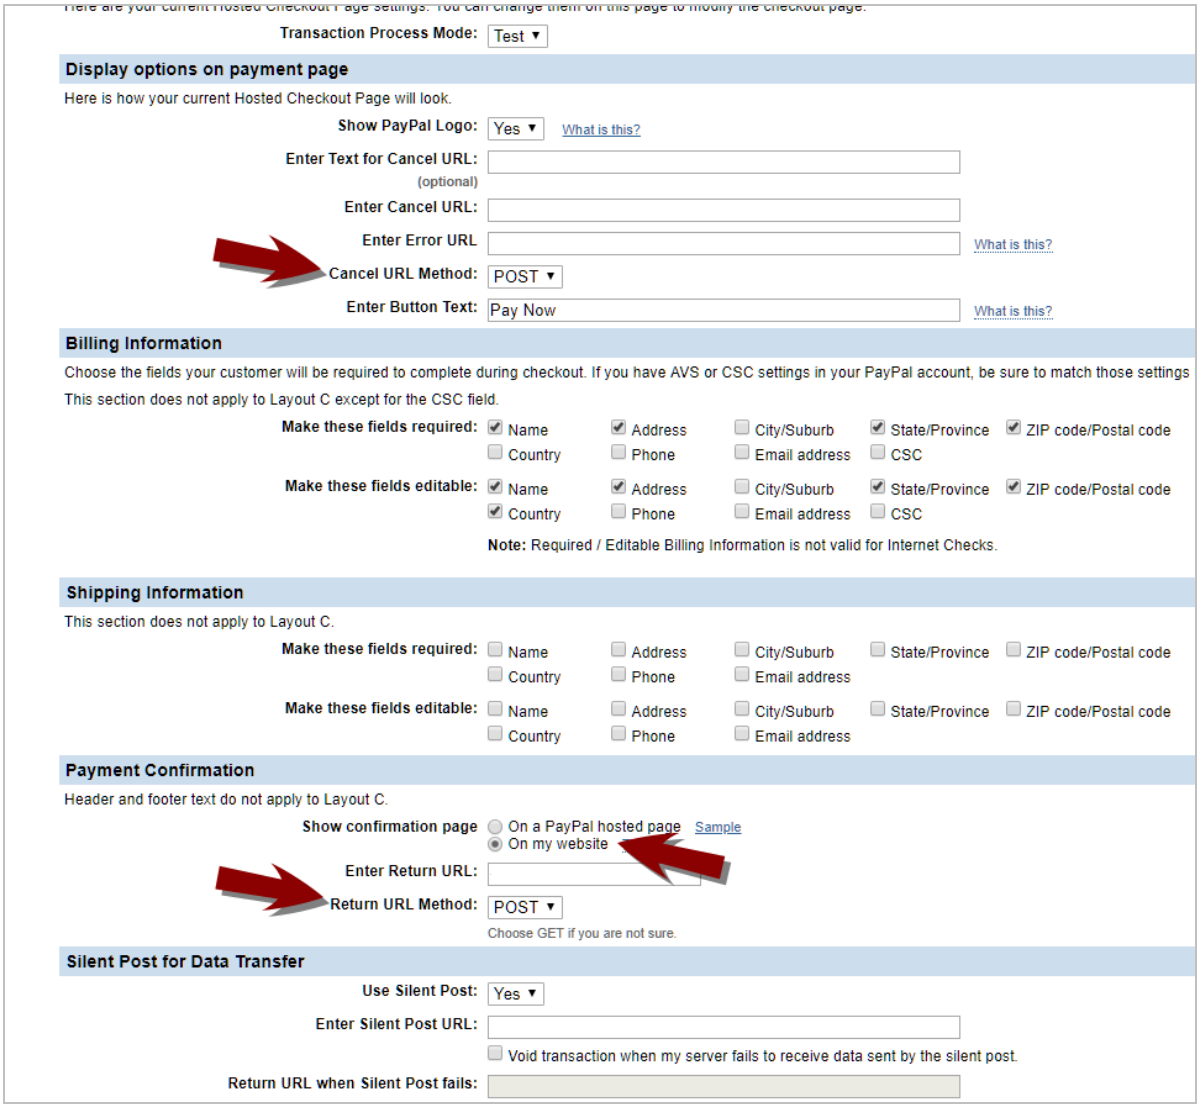


3. Once the Hosted Checkout Pages feature is turned on, the following settings must be configured for the hosted page though PayPal Manager:

   Under Service Settings > Under Hosted Checkout Pages, click **Set Up**.



- The **Cancel URL Method** must be set to POST.
- The **Return URL Method** must be set to POST.
- Setting the **Show Confirmation Page** option to **On my website** bypasses the verification page on the hosted page. If you wish to avoid this, you must configure the confirmation page to let the students know that they must click **Return** in order to finish the process.



Here are your current Hosted Checkout Page settings. You can change them on this page to modify the checkout page.

Post Individual Refunds

You can post individual refunds to student ledger cards. You must specify to which fund source the refund applies. All payment and refund transactions require a bank account for posting. CampusNexus Student processes refunds for enrolled students and new lead students that have not enrolled yet.

If you use any of the posting options–payments, charges, or refunds–and the posting flag is set to Current Campus, you can only post to an enrollment at the current campus. If you try to post transactions for another campus, a message indicates that you are not signed into the campus and posting is not allowed. If the Posting Flag is set to Any Campus, you can post transactions for a student at any campus.

The refund posting procedure uses the Agency description when posting refunds to third-party agencies. The descriptions on the disbursement transaction and the refund transaction will match.

See also Ledger Card and Process Electronic Drafts.

Updating the Direct Loan Disbursement File

CampusNexus Student updates the direct loan disbursement file when a refund is posted to a student's ledger card. Each refund that is posted to a student's ledger card is reported to COD (Common Origination and Disbursement). CampusNexus Student determines if a row should be added to the direct loan disbursement table. A row will be added to the table if all of the following conditions are met:

- The fund source type of the refund is DIRSUB, DIRUNSUB, or DIRPLUS.
- The Use Direct Loan flag is set to true for the student's campus.
- A row exists in the FA Loan table where the Student Aid ID equals the ID for the FA for which the refund is being posted.

If Auto create Loan Period Orig. Changes when student Withdraws or Refund is posted? is activated, an origination change is created for the following reasons during the posting of the refund:

- An origination change record is created to reduce the Award Amount to exclude the gross amount of the refund posted.
- For a fully refunded disbursement, an origination change record is created to exclude that disbursement’s payment period from the Loan Period, if the disbursement is in a payment period after the initial payment period on the loan.

If there are pending origination changes for the Award Amount or Loan Period End Date that have not yet been sent to COD, they will be updated with the corresponding information from the posted refund record.

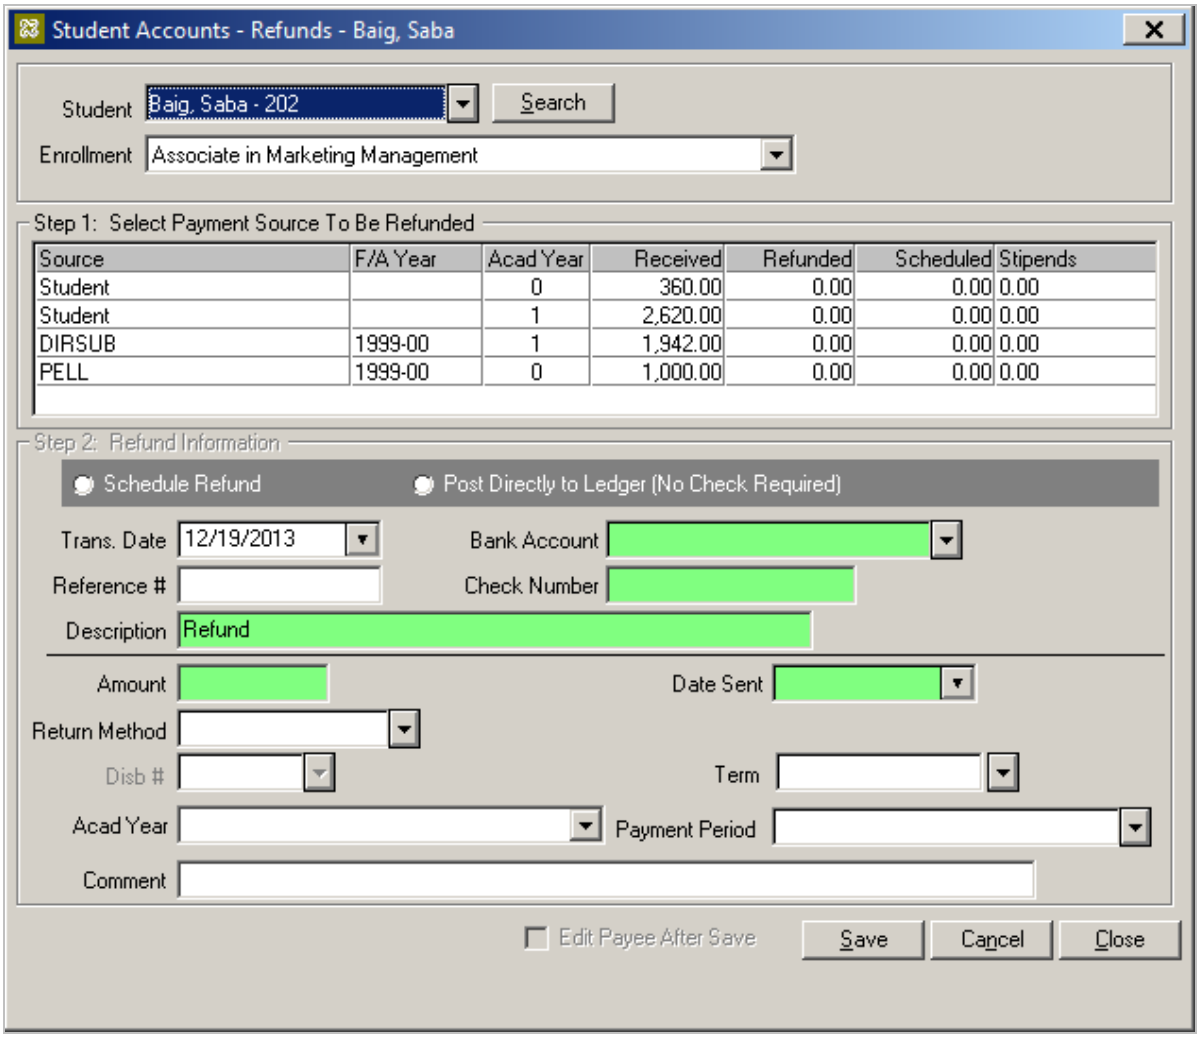
ACH Processing

CampusNexus Student updates the ACH export file when a refund is posted to a student's ledger card and the following applies:

- The fund source type of the refund is CASH.
- The Direct Deposit flag is set to true for the student's bank account.
- The student's institution uses ACH for refund/stipend processing.

To post a manual refund:

1. Navigate **Daily > Student Accounts > Post Refunds**. The Student Accounts - Refunds form is displayed.



2. Select the **Student** to whom the refund applies.
3. Select the **Enrollment** to which the refund applies.
4. Select the **Payment Source** to be refunded. If the selected fund source is deactivated, a message will appear in red and the refund may not be processed.

   If the Payment Source is Student, the Disb # field is disabled. If the Payment Source uses disbursements from an institution, the Disb # field is enabled.
5. Select **Schedule Refund** or **Post Directly to Ledger (No Check Required)**.
   - Select Schedule Refund to add a refund and not post it to the ledger by selecting. CampusNexus Student will add the refund to the "check to print" list via Print Checks functions (see Process Refunds/Stipends). This allows you to schedule refund checks outside of performing a refund calculation. The Schedule Refund option is enabled only if you have Schedule Refund permission.

- Select Post Directly to Ledger when a check has already been issued and you want to record it in CampusNexus Student. The transaction will be posted to the ledger card, but no check will be scheduled. The Apply Refund check box (if present) becomes enabled and can remain selected or be cleared, as needed. The Post Directly to Ledger (No Check Required) option is enabled only if you have Post Refund permissions.

6. Depending on your selection above, enter the **Trans. Date**, **Bank Account**, **Reference #**, and **Check Number**.

   When CampusNexus Finance, HR & Payroll is integrated with CampusNexus Student, the Check Number is required.

7. The **Refund's Description** that was entered when adding or editing the fund source is displayed if one was configured, otherwise the system-defined Refund Description is displayed. You can **override** the Description here. CampusNexus Student will add the fund source and financial aid year to the description entered. The maximum length of the field is 100 characters which includes the addition of the system defined values.

8. Enter the **Amount** to be refunded. Negative refund amounts are not permitted.

   Some refunds are mandatory. Institution are required to refund the funds, and they have to work directly with the student to recover a loss associated with a stipend. CampusNexus Student will allow a refund to be issued to a student for an amount greater than what was paid by the student on the ledger card. If there is a credit balance remaining after all money has been returned, the credit balance may be posted as a refund due to the student.

9. Enter the **Date Due**. Note that this date cannot be any earlier than the Minimum Transaction Date set in the Campus Information setup.

10. In the **Disb #** field, select or enter the disbursement number against which the refund is given. The disbursement number contains an amount that may or may not be equal to the amount being refunded. If the amount being refunded is more than already scheduled for the disbursement, the remainder will be drawn from other disbursements associated with the payment source and enrollment. This applies to DIRSUB, DIRUNSUB, DIRPLUS and Pell only, since the system does not currently create COD adjustments for TEACH refunds.

    A. If the amount is associated with a disbursement number, and the amount is more than the total already set for the disbursement, you are prompted to decide if you want to associate the excess refund amount with other paid disbursements.
    B. If you click No, the message is no longer displayed and you can specify a different total in the Amount field.
    C. If you click Yes, the Refund Assignment - Fund Source form is displayed.
    D. You can then adjust the amounts to be refunded against a disbursement number by changing the number in the Refund Amt. column.

    When a refund associated with a disbursement number is posted, CampusNexus Student flags an adjustment record to be sent to COD. This adjustment will contain the disbursement number that is associated with the refund. This information is exported to COD as an adjustment record with the correct disbursement number and sequence number.

11. Select the **Return Method** (Check, Master Check, EFT, Net, ACH).

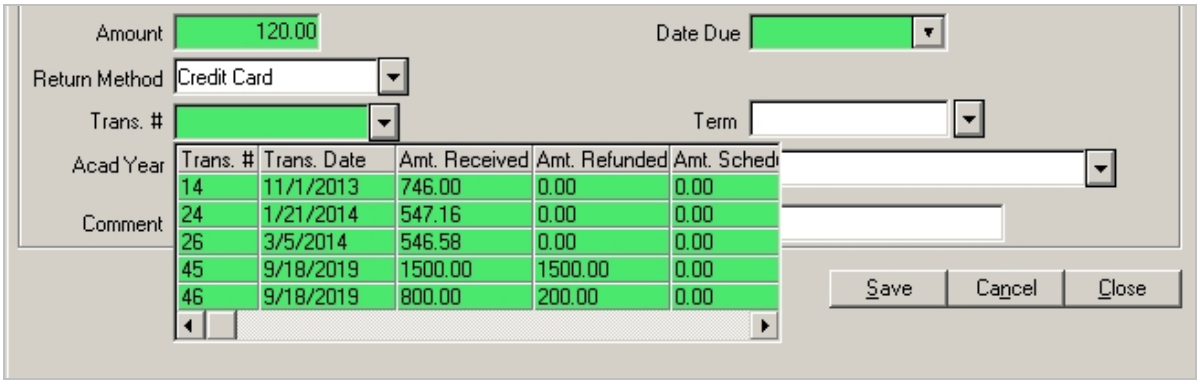
    If the Schedule Refund option is selected, the return method will default to ACH if the campus is configured for an ACH processor for refunds, and the student has at least one checking/savings account configured for direct deposit. ACH is allowed only if the fund source is CASH. If Post Directly to Ledger is selected, the ACH option will be disabled, even if these ACH conditions are met.

    When CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll the following conditions apply:

- When a subsidiary refund transaction is created, Return Method = 'Master Check' is not available.
- When a subsidiary refund transaction is created with Return Method = 'Check', the transaction cannot be voided in CampusNexus Student.

12. Select the Credit Card Type. This field is available when DIRSUB, DIRUNSUB, DIRPLUS and Pell are NOT selected. See also Credit Card and credit card batch setup.

    Note: When Credit Card is selected as the **Return Method** and the student's enrollment campus is configured to use ACI as the payment gateway provider, a required drop-down field appears under the **Trans #** field so you can select a specific transaction. All available credit card transactions associated with the selected payment source are listed with details such as the Transaction #, Transaction Date, Transaction Amounts (Received, Refunded, Scheduled), etc... Since the drop-down field is required, you must select a specific payment to post the refund against to proceed.



13. Enter the **Term**, **Academic Year**, **Payment Period**, and **Comment**.

    The Payment Period field is available (visible on the form) for program versions that can use it (program versions with academic calendars 1, 5, and 6). When Academic Year is selected, this combo box will filter out academic years other than the selection. If the Academic Year box is cleared, all payment periods will be available for selection. If no payment periods exist, the combo box will not be displayed.
    Conversely, when Payment Period is selected, the Academic Year will be auto populated. If Academic Year is modified after Payment Period is selected, this field will be cleared and validated during Save.

    The notation for Payment Periods is `A<n>|P<m>` where `<n>` is the academic year sequence number and `<m>` is the payment period sequence number.

14. Select **Edit Payee After Save** to change the payee information when processing a refund check.

    The Edit Payee After Save check box is disabled if the staff member does not have Edit Payee on Schedule Refund permissions.

15. Select or clear the **Apply Refund** as needed.

    This check box is visible and enabled only if the campus setting for 'How Should Payments Be Applied?' (Setup > Campus Locations > Edit (campus) > Accounting tab) is 'Manual/User Applied' **and** 'Post Directly to Ledger' is selected.

16. Click **Save** to save your refund. The refund will be posted to the student's ledger card.

When a Pell refund is posted to the student's ledger card and the school uses the Pell Processing system, CampusNexus Student will ask the following question: *"Mark this refund as Ready To Send to RFMS?"* If you answer Yes, CampusNexus Student finds the corresponding record in the FA Refund table. If the Pell grant disbursement status is not equal "S - Sent", the status code is replaced with "R - Ready to Send".

If the fund source for the refund being posted is a Direct Subsidized, Unsubsidized, or PLUS loan, a record will be written to the file containing the history of disbursements and refunds sent to COD. On the Direct Loan form, you would see these history records on the Received and Refunds tab under "Disbursements at COD". The View Refunds button is also displayed; users can click View Refunds to note what amounts are being refunded and what disbursements are being associated with those refunds.

After a refund selected for a single disbursement has been saved, it is displayed in the Student Ledger Card form as a refund, with the disbursement number noted in the Description field. It is also displayed in the Transaction Detail form with the total of the refund in the Amount field and the disbursement number associated with the amount in the Disb # field.

After the refunds across multiple disbursements have been saved, they appear on the Student Ledger Card form as a single refund amount with a Description field displaying the Disbursement numbers. It is also displayed in the Transaction Detail form with the total of the refund in the Amount field and the disbursement numbers associated with the amount in the Disb # field.

The disbursements will also properly appear on the Disbursements at COD section of the Rcvd Refund/Stipend tab of the Fund Source form.

Audit Features

The audit features for Student Accounts include:

- CampusNexus Student stores the name of the payee on each refund record, stipend record, and subsidiary refund so that it can be retrieved for reporting purposes.
- CampusNexus Student audits changes to the payee for refunds and stipends. Auditing occurs from the time the refund or stipend is scheduled to the time the refund or stipend is processed. The date changed, time changed, and the user who made the change are audited.
- Payee changes are audited for subsidiaries.
- Payee information for a stipend can be edited regardless of the fund source associated with the stipend. The payee changes are audited for all stipends.
- Your ability to edit a payee for a refund is dependent on the fund source associated with the refund. The payee changes are audited only for the fund sources that allow the payee to be changed.
- You can sort on different columns of the grids available in the Process Refunds/Stipends wizard.
- A student account administrator can define that the Reference information is printed on the check, below the address, or on the stub, or in both places.
- A student account administrator can view the ID of the user who scheduled the refund/stipend using the Ledger Card, Transaction Detail button.
- CampusNexus Student stores the user ID of the user who scheduled the stipend so that it does not get overwritten by the user ID of the user who posted the stipend.

Post Individual Stipends

You can post individual stipends to student ledger cards. When stipend schedules are set up, stipend disbursements are linked to packaged fund sources. When you select a student, enrollment, and academic year, CampusNexus Student displays the related stipend schedule. If the net amount received from the fund sources is less than zero, CampusNexus Student displays the message: *"The stipend amount to post exceeds the net amount received for the financial aid this stipend disbursement is linked to. This transaction cannot be posted."*

Scheduling and Disbursement

Using setup options under Setup > Student Accounts and Setup > Campus Locations, your institution can enforce rules when scheduling and disbursing stipends. The institution can allow stipends to be scheduled whether the institutional charges exceed the amount packaged. The institution can also allow stipends to be posted and issued to the student before the funding is received on the ledger card.

The following options can be configured using the Student Accounts Settings form and the Campus Information form (Stipends subtab):

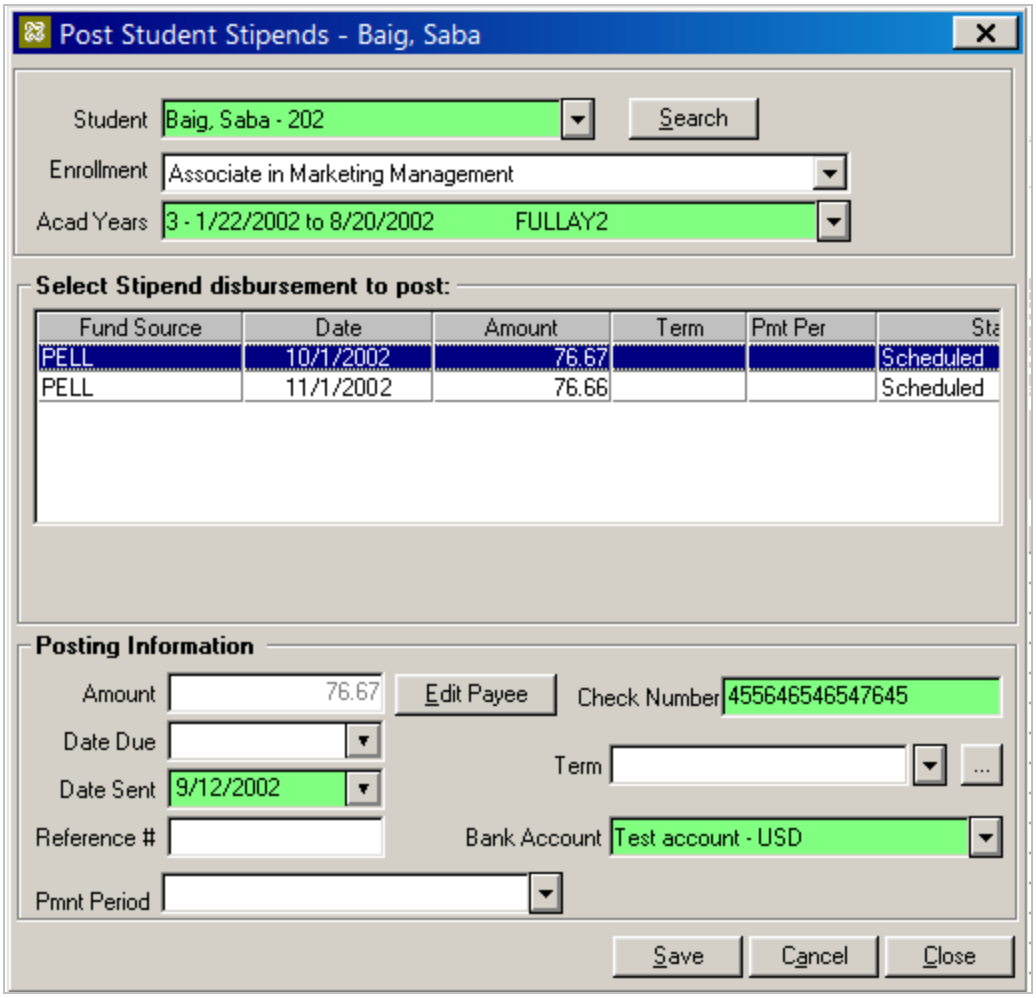
- Schedule Stipends: *Prevent scheduling stipends when institutional charges are greater than amount packaged?*
- Disburse Stipends: *Prevent issuing stipend disbursements when funding has not been received?*

If the setting is Yes (default for both options), CampusNexus Student displays a message and prevents you from scheduling the stipend. If the setting is No, CampusNexus Student allows you to schedule the stipends.

See also Ledger Card and Process Electronic Draft.

To post individual stipends:

1. Navigate to **Daily** > **Student Accounts** > **Post Individual Stipends**. The Post Student Stipends form is displayed.



2. Select the **Student** to whom the stipend will be paid.
3. Select the **Enrollment** to which the stipend applies. The default is the most recent enrollment.
4. Select the **Academic Year** to which the stipend applies.
5. Select the **Stipend Disbursement to Post**.
6. Specify the **Date Due**. This date cannot be earlier than the Minimum Transaction Date set in the Campus Information record.
7. Specify the **Date Sent**.
8. Specify the **Reference Number**.
9. Click **Edit Payee** to change the payee information when processing a stipend check. This option is enabled only if you have Edit Payee on Scheduled Refund and Edit Payee on Scheduled Stipend permissions. If you select a stipend to post, and do not have Post Stipend permissions, the Posting Information section is disabled.
10. Specify the **Check Number**.

When CampusNexus Finance, HR & Payroll is integrated with CampusNexus Student, the Check Number is required.

11. Select the **Term** to which the stipend applies.

    When you select a stipend from the grid, the term defaults to the Stipend Schedule Term. You can override this selection. When you save, CampusNexus Student writes the selected term to the Stipend Schedule Term, Transaction Term, and Refund Term.

12. Select a **Bank Account** from which the check will be drawn.

    Note: The Stipend's Description that was entered when adding or editing the fund source is gathered internally, if one was configured, otherwise the system-defined Stipend's Description is gathered and stored. This value is displayed on the student's ledger card for the fund source.

13. Click **Save**. CampusNexus Student posts the stipend and displays a confirmation message. Click **OK** to acknowledge the message.

14. Click **Close** to close the form.

Note: Since there are several places to access refunds and stipends in CampusNexus Student, multiple users might try to change one record at the same time. To prevent conflicts, CampusNexus Student locks the record being updated. If another user tries to access the record, a message indicates that the record is locked along with the name of the user. The lock is released when the user closes the form. In certain scenarios, a system administrator may need to clear a locked stipend or refund record. For more information, see Unlock Refunds/Stipends.

Audit Features

The audit features for Student Accounts include:

- CampusNexus Student stores the name of the payee on each refund record, stipend record, and subsidiary refund so that it can be retrieved for reporting purposes.
- CampusNexus Student audits changes to the payee for refunds and stipends. Auditing occurs from the time the refund or stipend is scheduled to the time the refund or stipend is processed. The date changed, time changed, and the user who made the change are audited.
- Payee changes are audited for subsidiaries.
- Payee information for a stipend can be edited regardless of the fund source associated with the stipend. The payee changes are audited for all stipends.
- Your ability to edit a payee for a refund is dependent on the fund source associated with the refund. The payee changes are audited only for the fund sources that allow the payee to be changed.
- You can sort on different columns of the grids available in the Process Refunds/Stipends wizard.
- A student account administrator can define that the Reference information is printed on the check, below the address, or on the stub, or in both places.
- A student account administrator can view the ID of the user who scheduled the refund/stipend using the Ledger Card, Transaction Detail button.
- CampusNexus Student stores the user ID of the user who scheduled the stipend so that it does not get overwritten by the user ID of the user who posted the stipend.

Transaction Search

This menu option displays a form that searches for ledger transactions (charges and payments) using various criteria. This is useful for users that are cleaning up data conversion or who want a quick query to find all transactions of a particular type.

Once the items have been listed, you may be able to do a transaction adjustment from this form. Transactions cannot be adjusted after they have been released to the general ledger. The transaction date cannot be changed to a date prior to the Minimum Transaction Date for your campus.

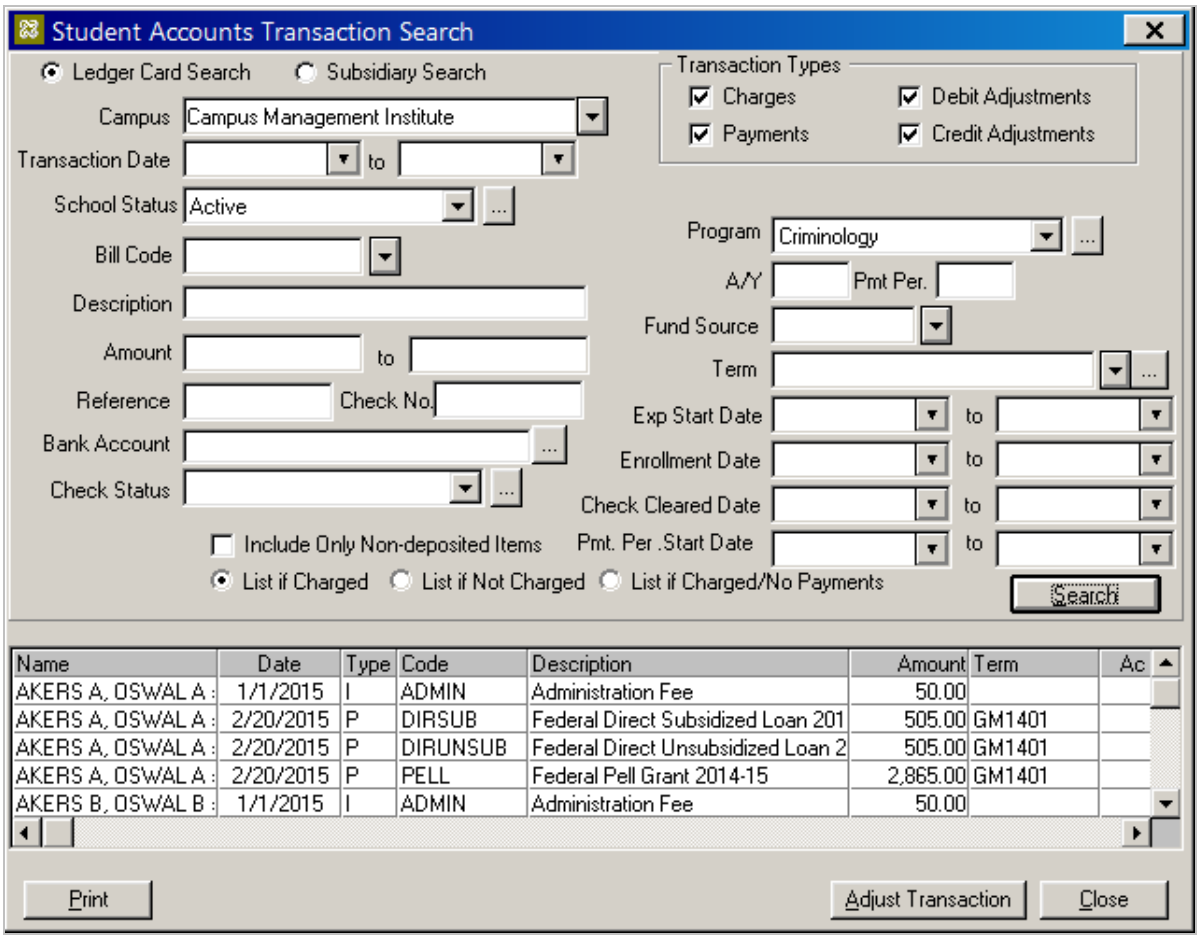
If you select a student (transaction item on the grid), you can click on any item on the student bar, and the information is displayed for the selected student.

If transaction code permissions are used, staff member security levels for the transaction are checked when the Adjust Transaction button is selected.

The Fund Source list contains only the fund sources that the staff member may *View*. The Adjust Transaction button is only enabled if the staff member has Edit Payment, Edit Schedule Refund, or Edit Scheduled Stipend permissions for the selected fund source.

To perform a transaction search:

1. Navigate to **Daily** > **Student Accounts** > **Transaction Search**. The Transaction Search form is displayed.



2. Select **Ledger Card Search** to search transactions from the student ledger card, or select the **Subsidiary Search**

to search for transactions from the subsidiary ledger.

3. Enter your search criteria.

Field Descriptions

Field	Description
Campus	Select the campus to which the required transactions are related.
Transaction Date (Range)	Enter the From and To dates for the transactions you want. • If you want only the transactions for a single day, enter the date in both fields. • If you want transactions beginning with a given date, enter the date in the first date field and leave the second date field blank.
School Status	Select one or more student statuses. Click ... to see all available statuses.
Bill (Transaction) Code	If you want transactions for a single bill (transaction) code, type the desired code or select it from the list.
Description	The Description field finds all transactions that contain the string entered. If you specify "Pell" (without quotes), the search will look for any transaction having Pell in the Description field.
Amount (Range)	Enter a low amount and a high amount if you want transactions with a range of amounts. • If you are looking for only one amount, enter it in both fields. • If you are looking for any amount higher than a given value, enter it in the first amount field. • If you are looking for an amount lower than a given amount, enter it in the second amount field.
Reference	Enter a reference value to look for transactions that match it.
Check Number	Enter a check number to look for transactions that match it.
Transaction Types	Select or clear the transaction types to look for charges, payments, debit adjustments, and/or credit adjustments.
Cash Drawer Session	Enter a Cash Drawer Session ID to search for transactions having Cash Drawer criteria.
Program	Select a program to look for transactions that match. To select multiple programs, click ... .
Fund Source	Select a fund source to find all transactions related to it.

Field	Description
Term	Select a term to see all the transactions related to it. Users must select a term when the transaction is posted for it to show up on the search results list. They do not always take the time to relate transactions to specific terms. There is an option to require term codes on all transactions in Setup/Student Accounts.
Academic Year (A/Y)	Enter a number from 0 to the number of academic years a student can attain at your school.
Expected Start Date Range	Enter a range of expected student start dates to see all the transactions for students starting in the range.
Include Only Non-deposited items	Select the Include Only Non-deposited items check box to look for transactions that have not been deposited yet. Clear the check box is you would like deposited and non-deposited results.
Enrollment Start Date Range	Enter a range of enrollment student start dates to see all the transactions for students starting in the range.
Pmt. Per. Start Date	Enter a range of payment period start dates to see all the transactions for students with payment periods in the range.
Bank Account	Select one or more Bank Accounts associated with the transaction.
Include Only Non-deposited Items	Select this check box to see only the items that have not been deposited yet; otherwise leave this field blank.
List if Charged List if Not Charged List if Charged/No Payments	List all students who have received a charge. List only students who have not received a charge. List only the students that have not paid a charge.

4. Click **Search** to begin the search for the transactions that meet your criteria.
5. The Transaction grid displays the following information:

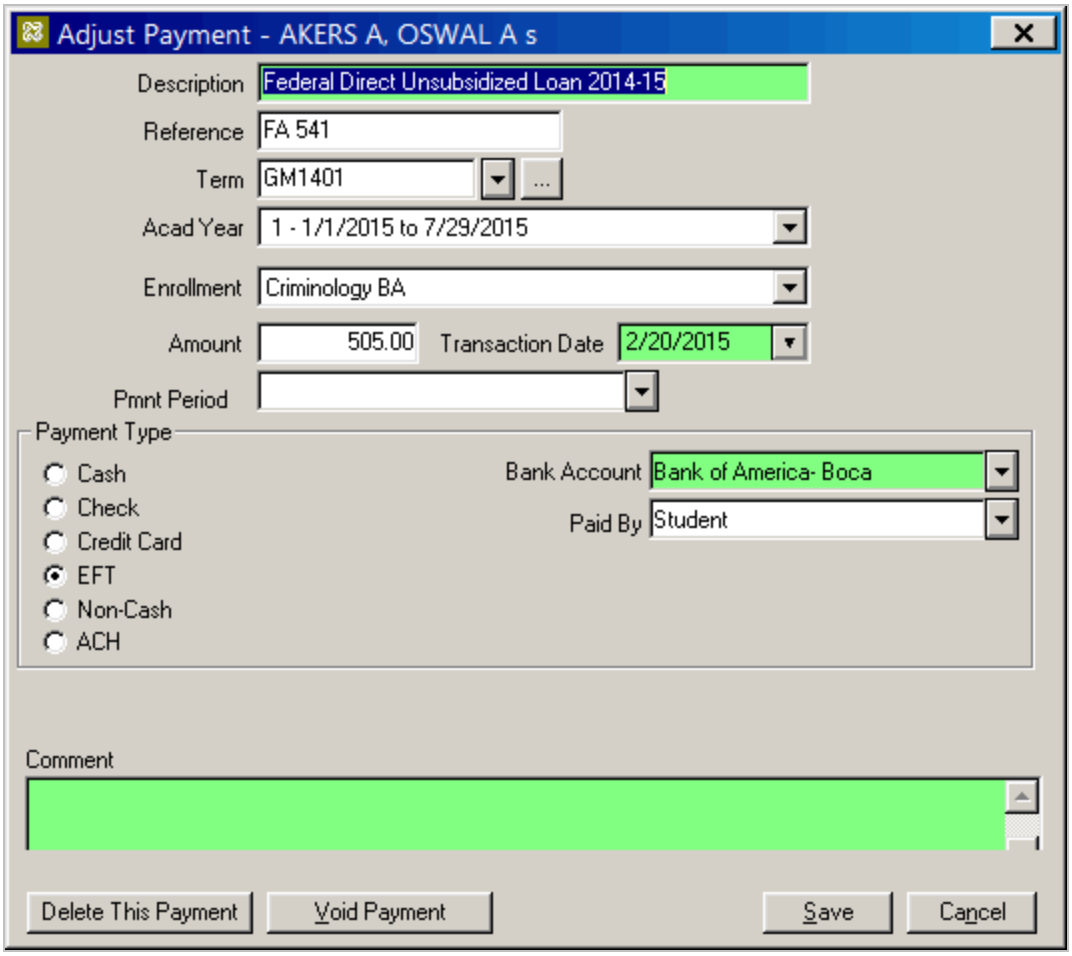
Field Descriptions

Field	Description
Name	The student to whom the transaction is related.
Date	The date of the transaction.
Type	The type of transaction. • **C** = Credits • **P** = Payments • **D** = Debits • **I** = Invoice
Code	The transaction code.

Field	Description
Description	The description of the transaction.
Amount	The amount of the transaction.
Term	The term to which the transaction is related.
A/Y	The academic year to which the transaction is related.

Click **Print** to get a report of the transactions returned by the search procedure. The report is the "Detail Transaction Register".

6. Select a transaction or payment on the grid and click **Adjust Transaction** to open the adjustment form.
7. Click **Search** to initiate the search for your requested transactions. It may take a few seconds to search the database so be patient. The transactions that fit the criteria you entered are displayed in the grid on the lower portion of the form.
8. If a transaction on the list must be adjusted, select it and click **Adjust Transaction**. The Transaction Adjustment form or the Adjust Payment form is displayed with the current data for the selected transaction or payment.



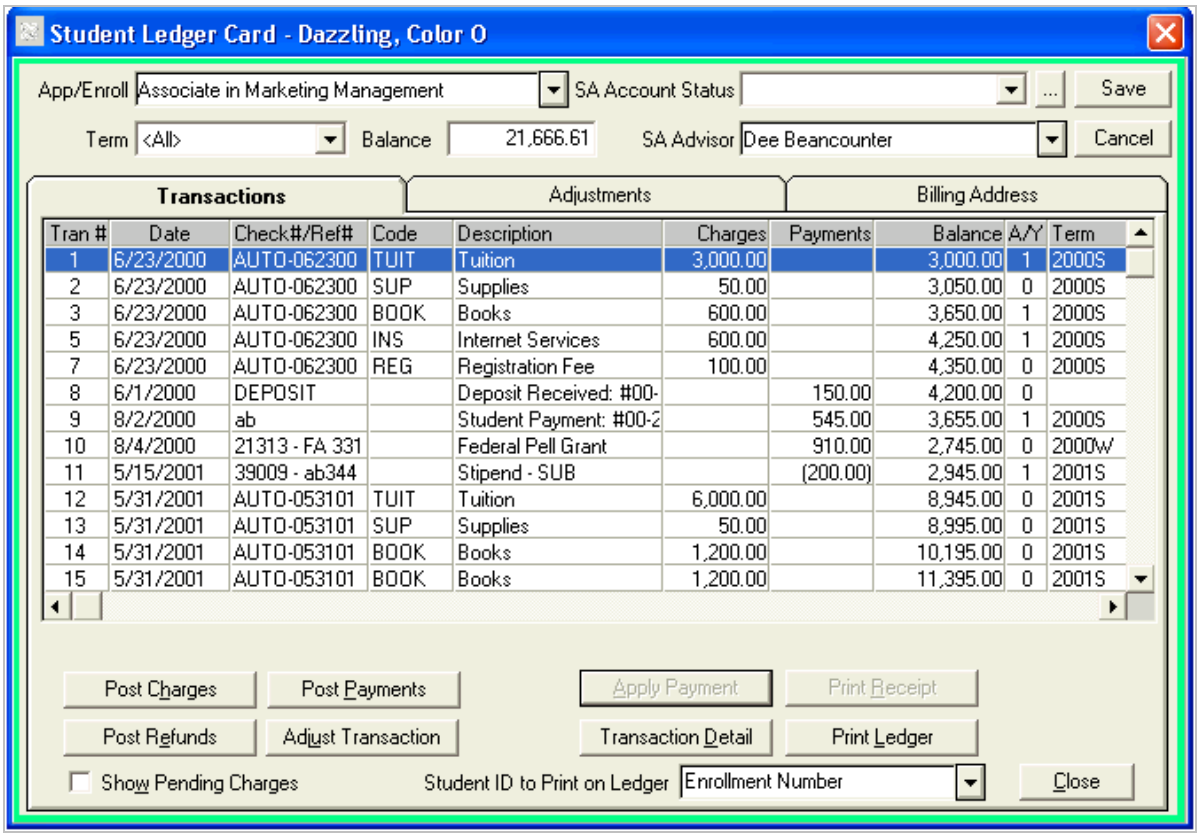
CampusNexus Student prevents the amount of a direct loan disbursement or refund from being edited if the disbursement or refund has been sent to Common Origination and Disbursement (COD).

If the amount field is edited and updated, the corresponding row in the Direct Loan Disbursements table is updated with the change. CampusNexus Student finds the row in the table and calculates the new disbursement gross amount, net amount, and fees.

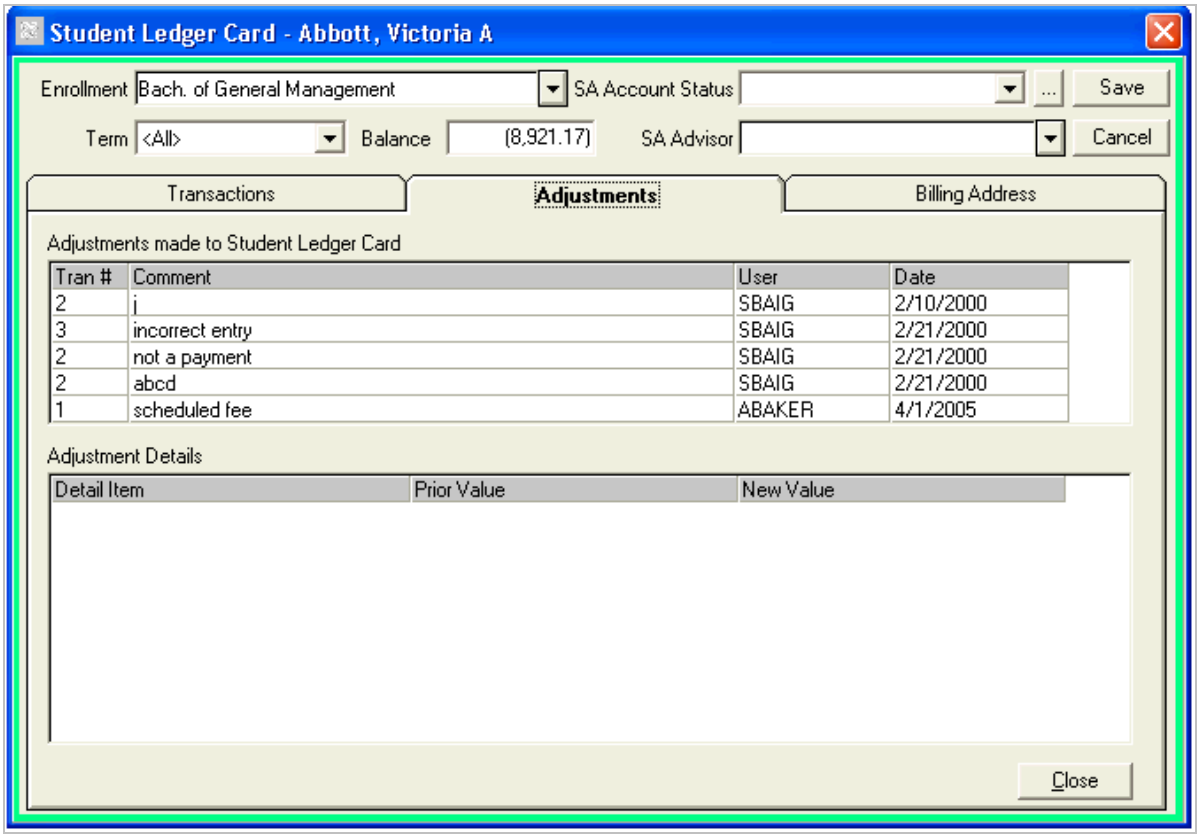
CampusNexus Student updates the direct loan disbursement file in the following cases:

- When adjusting the amount of a previously posted direct loan disbursement for a student.
- When deleting a previously posted direct loan disbursement from a student's ledger card.

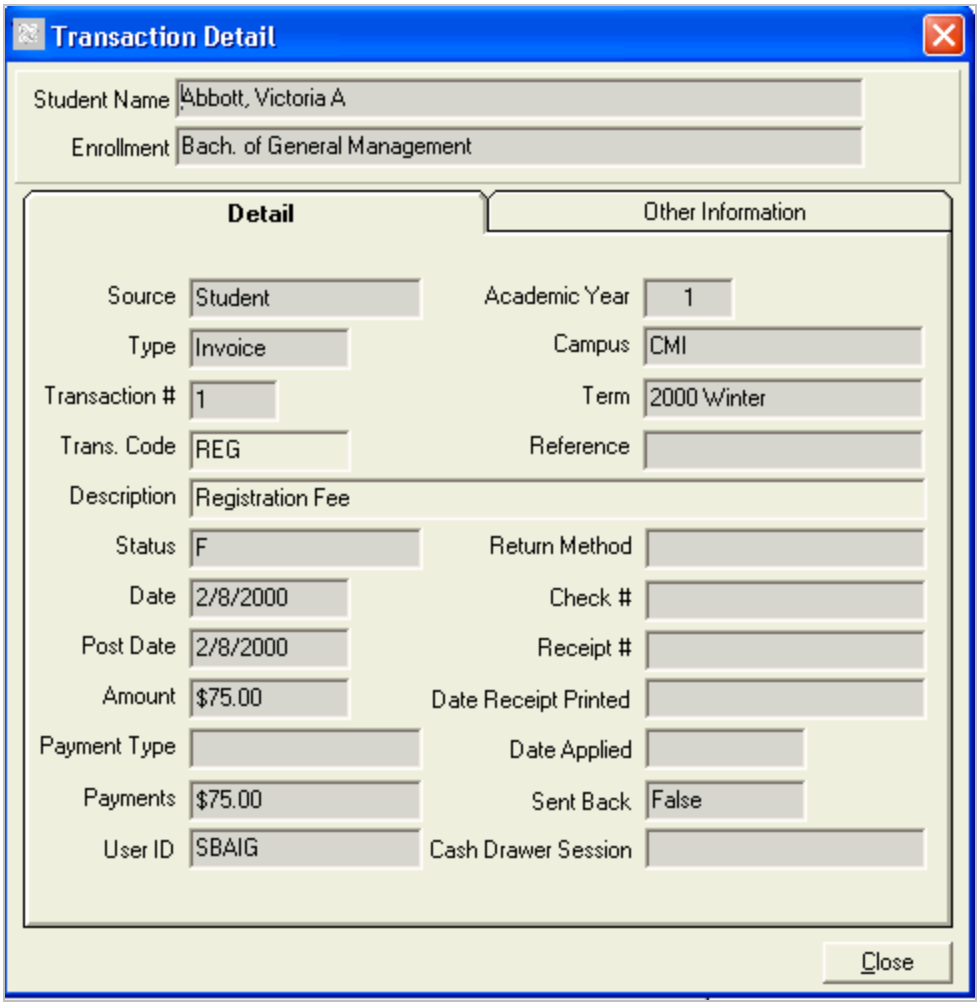
9. Edit the data for the transaction or payment to be adjusted. You are changing the selected transaction or payment. You are not entering an additional offsetting transaction. The transaction in its previous form will no longer appear on the student's ledger card. The adjusted form of the transaction will appear on the ledger card. There is, however, a record of the change. You can see it on the **Adjustments** tab of the student's ledger card. The illustration below shows the transaction after it has been changed.



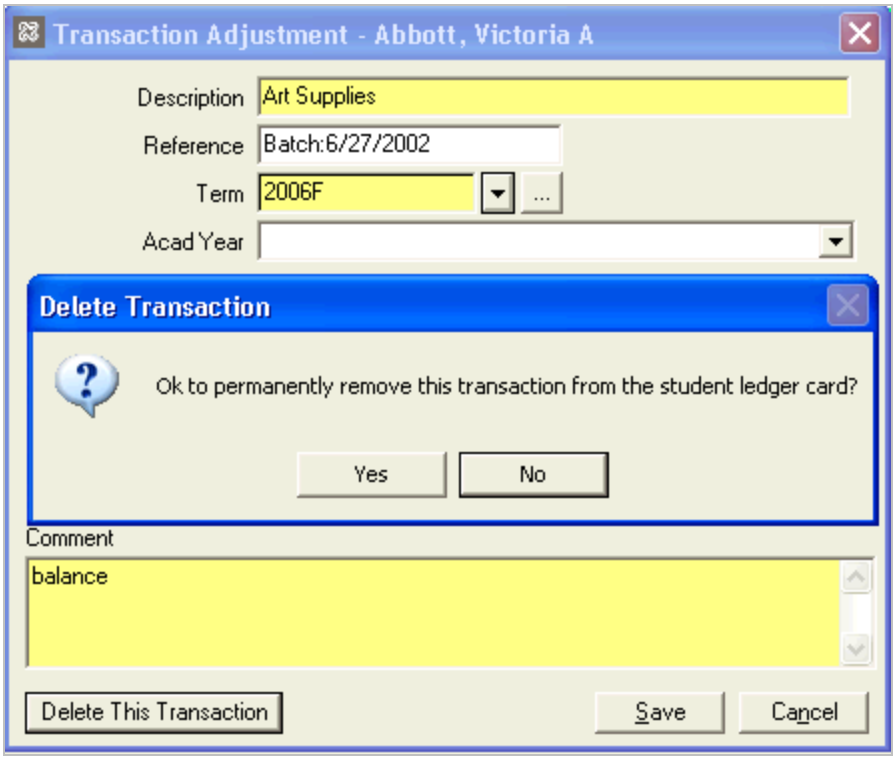
The illustration of the Adjustments tab on the ledger card shows the record of the changed transaction.



The Transaction Detail form shows the details of the transaction after the adjustment has been made.



10. Click **Save** to save any changes you have made to the transaction or payment.
11. Click **Delete This Transaction (or Delete This Payment)**to remove the charge or payment from the student's ledger card. CampusNexus Student displays a confirmation message.



12. Click **Yes** to confirm the deletion. The transaction or payment is permanently removed from the student ledger card. The Adjustments tab of the student's ledger card contains a record of the deletion.

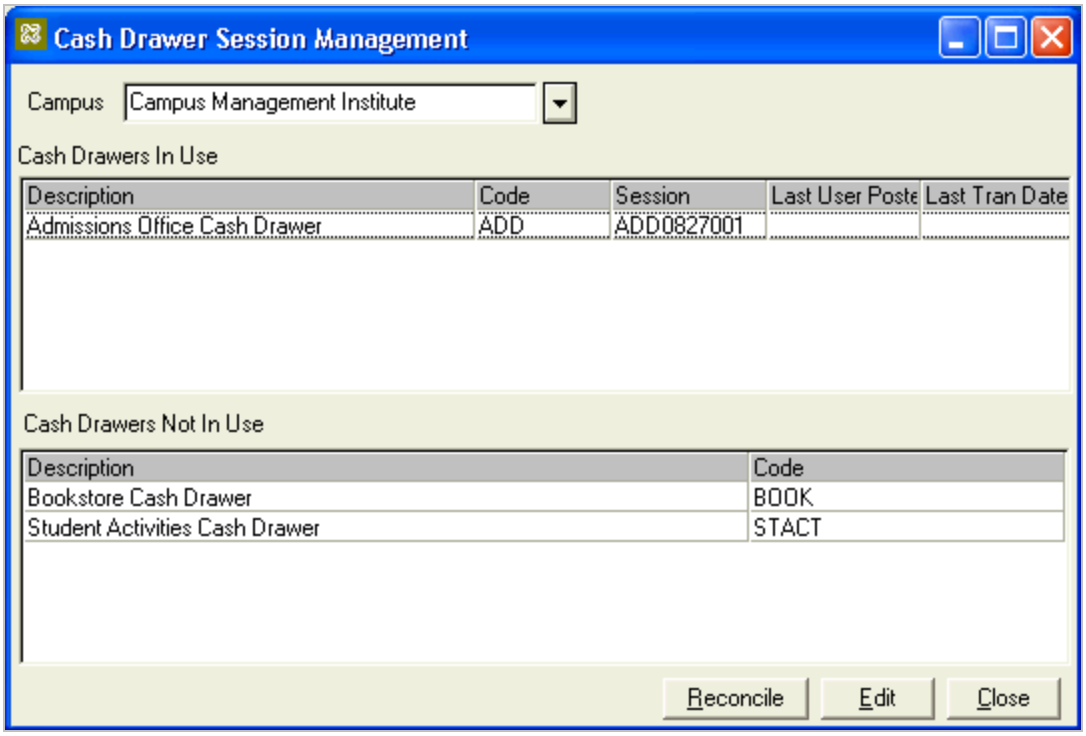
Cash Drawer Session Management

This feature enables authorized users to close and reconcile activity taking place in cash drawers throughout a campus or school. A Cash Drawer Session is a shift or other period during which one cashier opens a cash drawer and makes transactions. Typically, the cashier reconciles the drawer by adding up the receipts and including a calculator tape with the remittance. The administrator closes the drawer, formally reconciles the contents, and prepares a bank deposit. The Cash Drawer Session Management function also enables the authorized user to adjust transactions.

Cash drawers require the cashiering function to be enabled (Setup > Campus Information > Allow), staff members must be designated as cashiers, and the institution must have set up dedicated bank accounts for this purpose.

To perform management tasks with Cash Drawers:

1. Navigate to **Daily > Student Accounts > Manage Cash Drawer Sessions**. The Cash Drawer Session Management form is displayed.



Field Descriptions

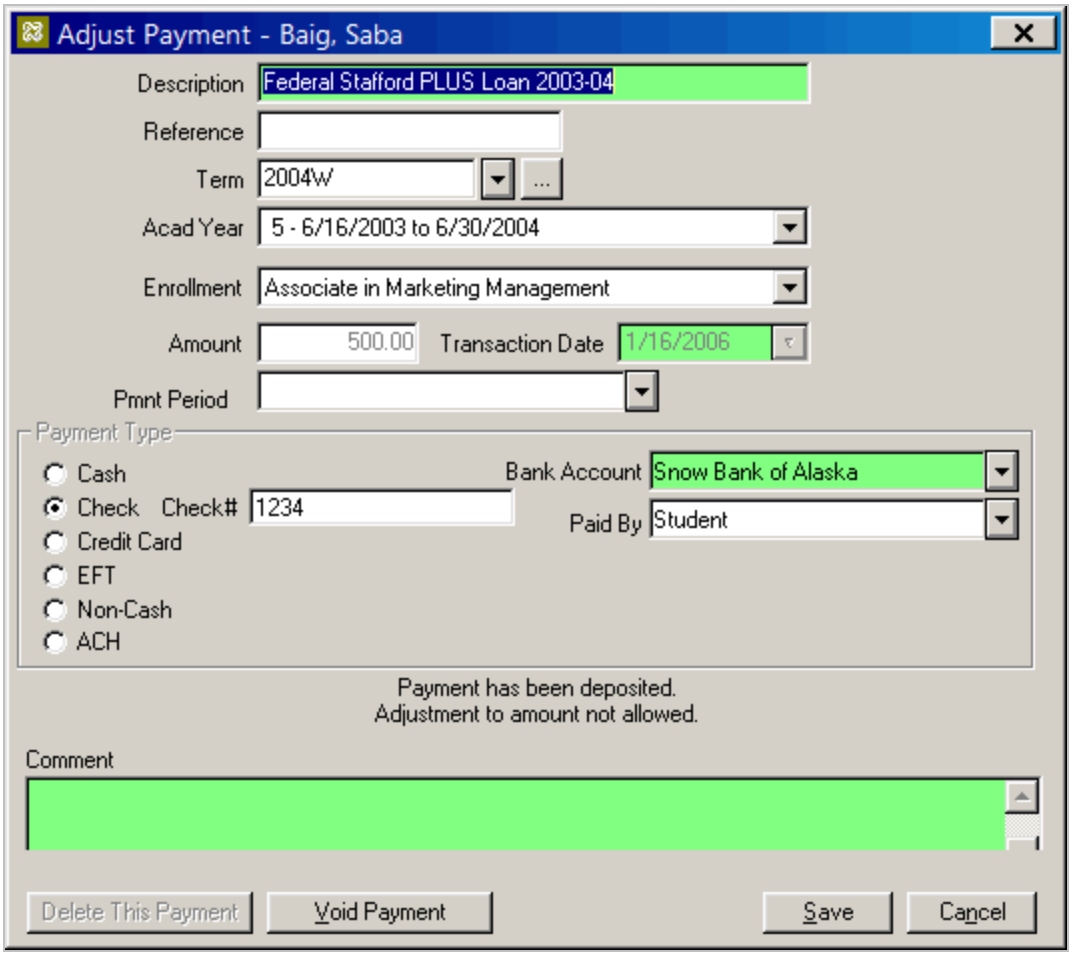
Field	Description
Campus	Choose the Campus to which this session applies.
Cash Drawers in Use	This grid lists all cash drawers that are currently open, that is, being used for transactions. The row for each Cash Drawer displays a description of the drawer, the Code assigned to it, and the Session ID. The Session ID is the Code, date (mmdd), and a sequential number.
Last User Posted	The staff member who was the last to use this drawer.
Last Tran Date	The date on which the last transaction took place.

Field	Description
Cash Drawers Not in Use	This grid lists all cash drawers that are active but not being used at this time. The row for each Cash Drawer displays a description of the drawer and the Code assigned to it.

2. **To change information about a session (drawer):**
    a. Select a session from among those In Use.
    b. Double-click the **Description** field or click **Edit**. The Cash Drawer Session Setup form is displayed. This form shows the Code Description and Opening Balance of this Drawer. The Opening Balance is not counted in the transaction limits. The Opening Balance is the "bank" from which the staff member makes change.
    c. Change information in any of the fields.
3. **To reconcile a session:**
    a. Select a session from those In Use.
    b. Click **Reconcile**. The Cash Drawer Session Reconcile/Close form is displayed. For more information, see Reconciling Cash Drawers.

Adjusting a Transaction

1. To adjust a transaction, select a transaction from the grid and click **Adjust Transaction**. The Adjust Payment form is displayed:



2. Click **Delete This Payment** to erase all records of this transaction from the student's Ledger. This feature is typically used if a payment is applied to the wrong student in error.
3. Click **Void Payment** to undo the transaction. A record of the transaction is displayed on the student's Ledger Card.
4. Click **Returned Check** to mark this check as Returned. The student's Ledger will be updated accordingly, and a fee will be applied if it is your school's policy to do so.
5. Click **Save** to retain your transaction adjustments.
6. Click **Cancel** to return to the previous form. Change any fields on this form. The **Comment** field is required. You must specify the reason for the adjustment.
7. Click **Close Drawer** to end the session. All types of receipts (including the cash Opening Balance) must all be confirmed to close the session. If you have not confirmed all payments, CampusNexus Studentprompts you to do so. When the drawer is closed, CampusNexus Student returns to the **Cash Drawer Session Management** form. The previously opened drawer is now displayed in the Cash Drawers Not in Use portion of the form.
8. Click **Print** to print a report of this transaction.

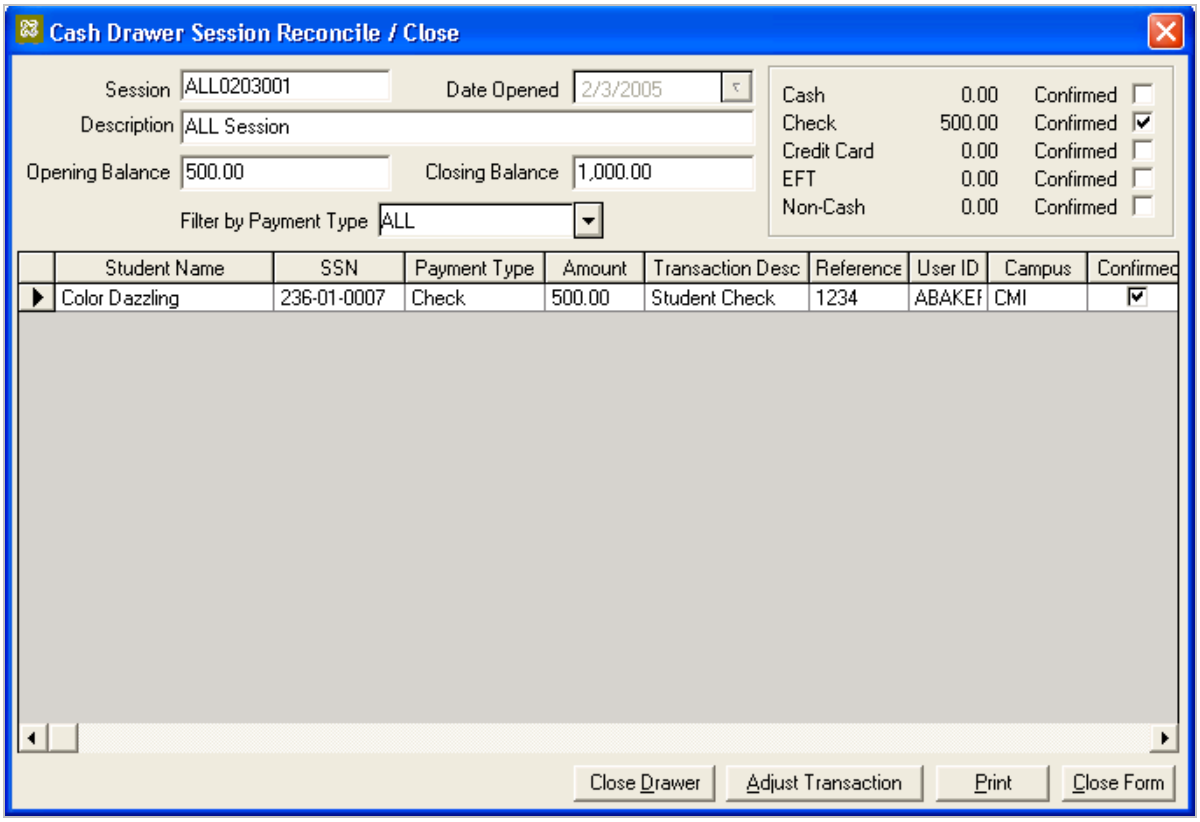
Reconciling Cash Drawers

Reconciling a cash drawer is the process of checking each transaction that has taken place during a cash drawer session and confirming it against physical evidence of the transaction (cash, checks, credit card receipts, vouchers). Typically, the cashier reconciles the drawer by adding up the receipts and including a calculator tape with the remittance. The administrator closes the drawer, formally reconciles the contents, and prepares a bank deposit. The Cash Drawer Session Management function also enables the authorized user to adjust transactions.

Cash drawers require the cashiering function to be enabled (Setup > Campus Information > Allow), staff members must be designated as cashiers, and the institution must have set up dedicated bank accounts for this purpose.

To reconcile a session:

1. Navigate to **Daily > Student Accounts > Manage Cash Drawer Sessions**.
2. Select a session from **Cash Drawers In Use**.
3. Click **Reconcile**. The Cash Drawer Session Reconcile/Close form is displayed. (For detailed information about closing a cash drawer, see Cash Drawer Session Management.)



Field Descriptions

Field	Description
Code	The Session ID

Field	Description
Date Opened	The date on which the staff member opened the Cash Drawer (session).
Description	The cash drawer being used
Opening Balance	The "bank" used to make change. This amount does not count toward restrictions and warnings.
Closing Balance	The "bank" plus all cash, checks and receipts received.
Confirmation Boxes	This area in the upper right corner of the form lists all types of receivables and the total for each type. As the user checks (confirms) receipt of each item in the grid below, these boxes are selected automatically. Likewise, when a check box in this area is selected, all transactions in the grid that fit that description (checks, cash, ACH, etc.), are confirmed (selected) in the grid. **Note**: Information about a student transaction displayed in the grid is read-only. Double-click on a cell to get Transaction Detail information.
Student Name	The student to whose Ledger the payment shall be applied (read-only)
SSN	The Social Security Number of the student to whose Ledger the payment shall be applied
Payment Type	Cash, Check, Credit Card, etc.
Amount	The amount of the transaction in US dollars.
Transaction Desc	The purpose of the payment.
Reference	The check number, credit card number or any information identifying the transaction.
User ID	The cashier who made the transaction.
Campus	The campus at which the payment was made. This is not necessarily the campus to which the payment is to be applied.
Confirmed	The authorized user's confirmation that the check, cash or receipt is included in the drawer.

4. Click **Close Drawer** to end the session. All types of receipts (including the cash Opening Balance) must be confirmed to close the session. If you have not confirmed all payments, CampusNexus Student prompts you to do so.

   When the drawer is closed, CampusNexus Student returns to the Cash Drawer Session Management form. The previously opened drawer is now displayed in the Cash Drawers Not in Use portion of the form.

5. Click **Print** to print a report of this transaction.

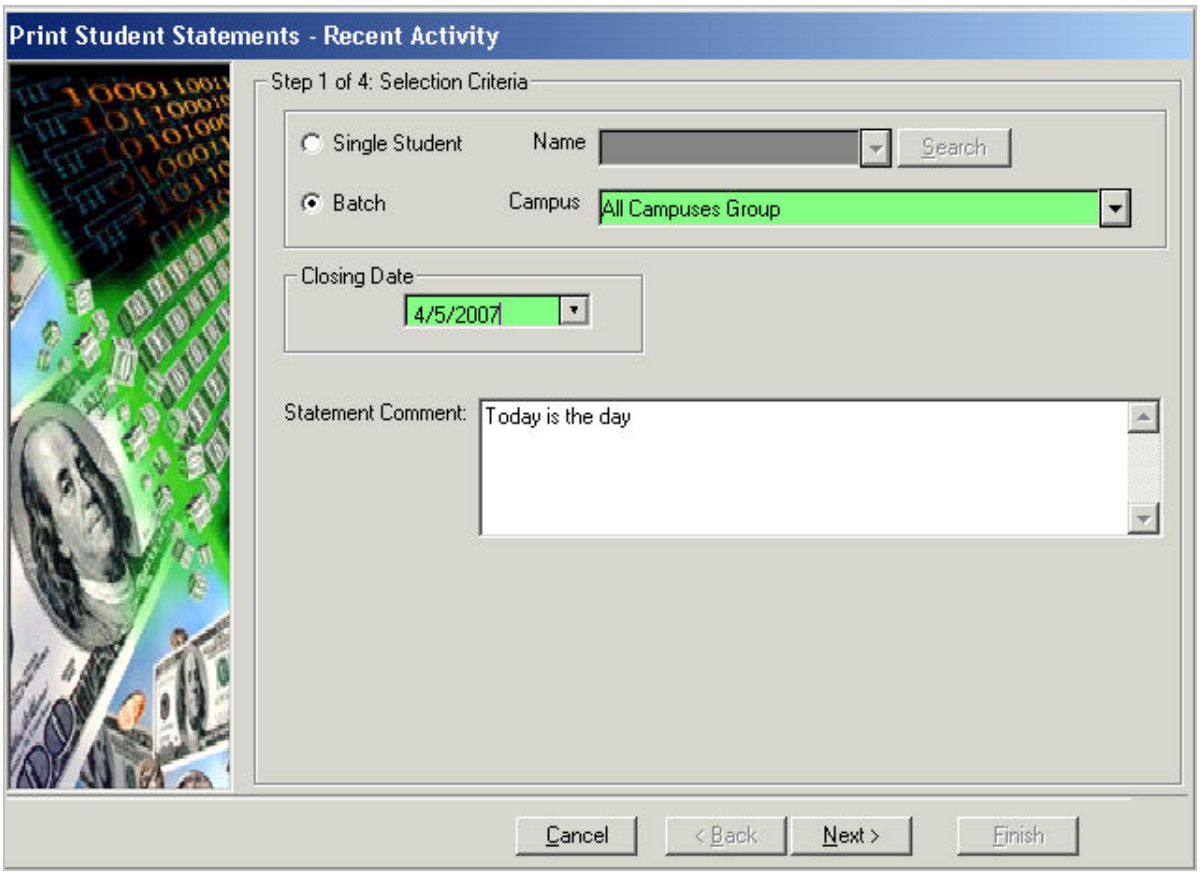
Student Payment Statements

CampusNexus Student can print periodic batches of students' accounts receivable statements. You can choose various criteria for selecting the students for whom statements will be printed.

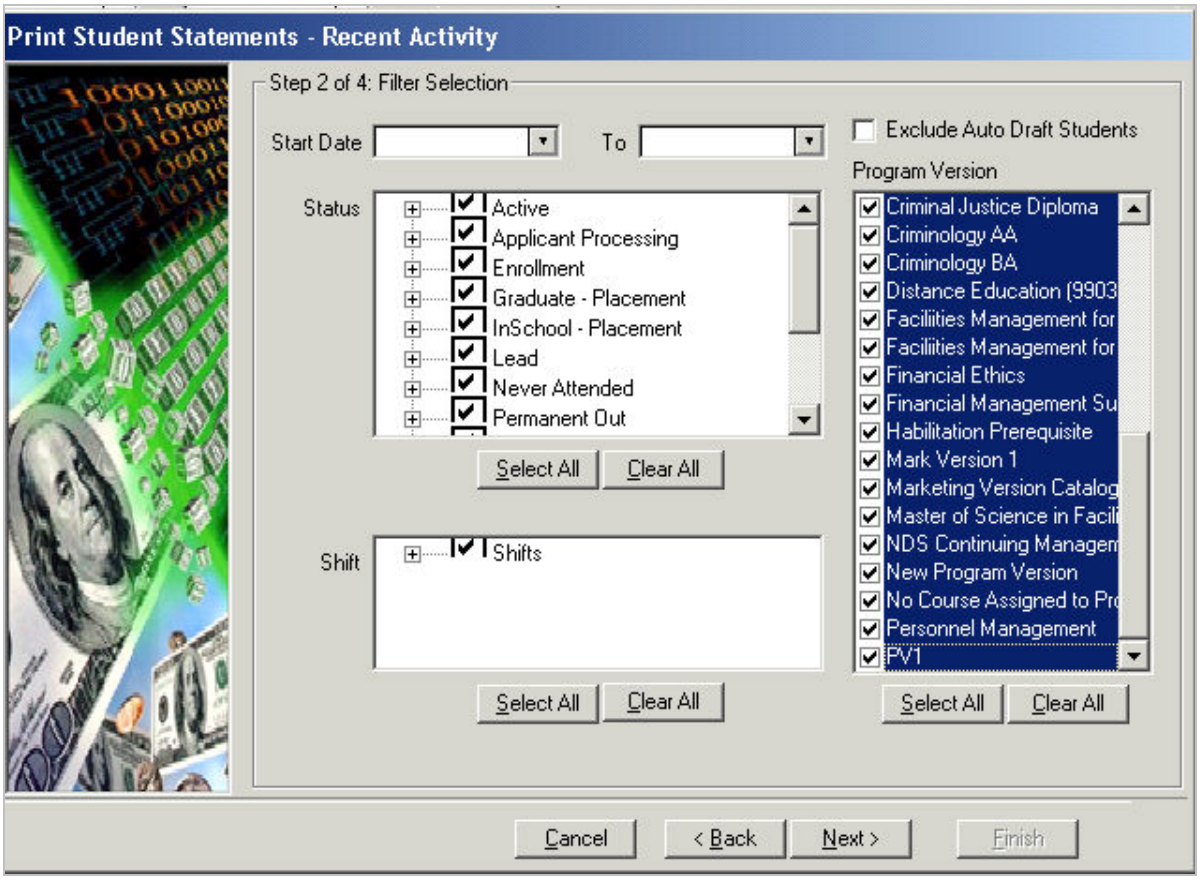
Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

To print student statements:

1. Navigate to **Daily > Student Accounts** > **Student Billing Statements** > **Student Payment Statements**. Step 1 of 4: Selection Criteria of the Print Student Statements wizard is displayed.



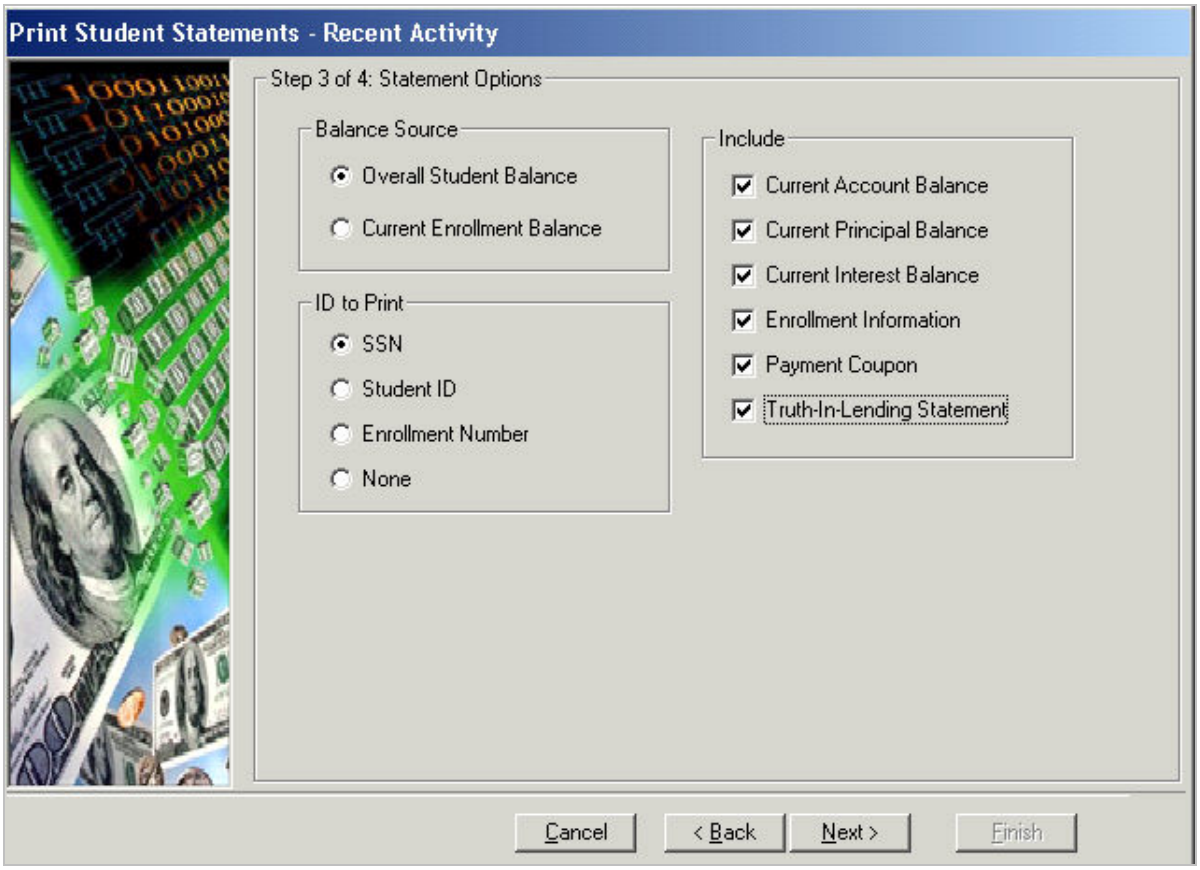
2. Select **Single Student** or **Batch** for which to print statements.
3. In the Campus field, select the **All Campuses Group** or select a specific campus.
4. Enter or select the **Closing Date**. After you print statements the first time, CampusNexus Student adds one month to the date and uses it as a default date the next time you run the statement wizard.
5. Optional: Enter a **Statement Comment** to appear at the bottom of each printed statement. You can prevent users from editing this field.
6. Click **Next**. Step 2 of 4: Filter Selection of the wizard is displayed.



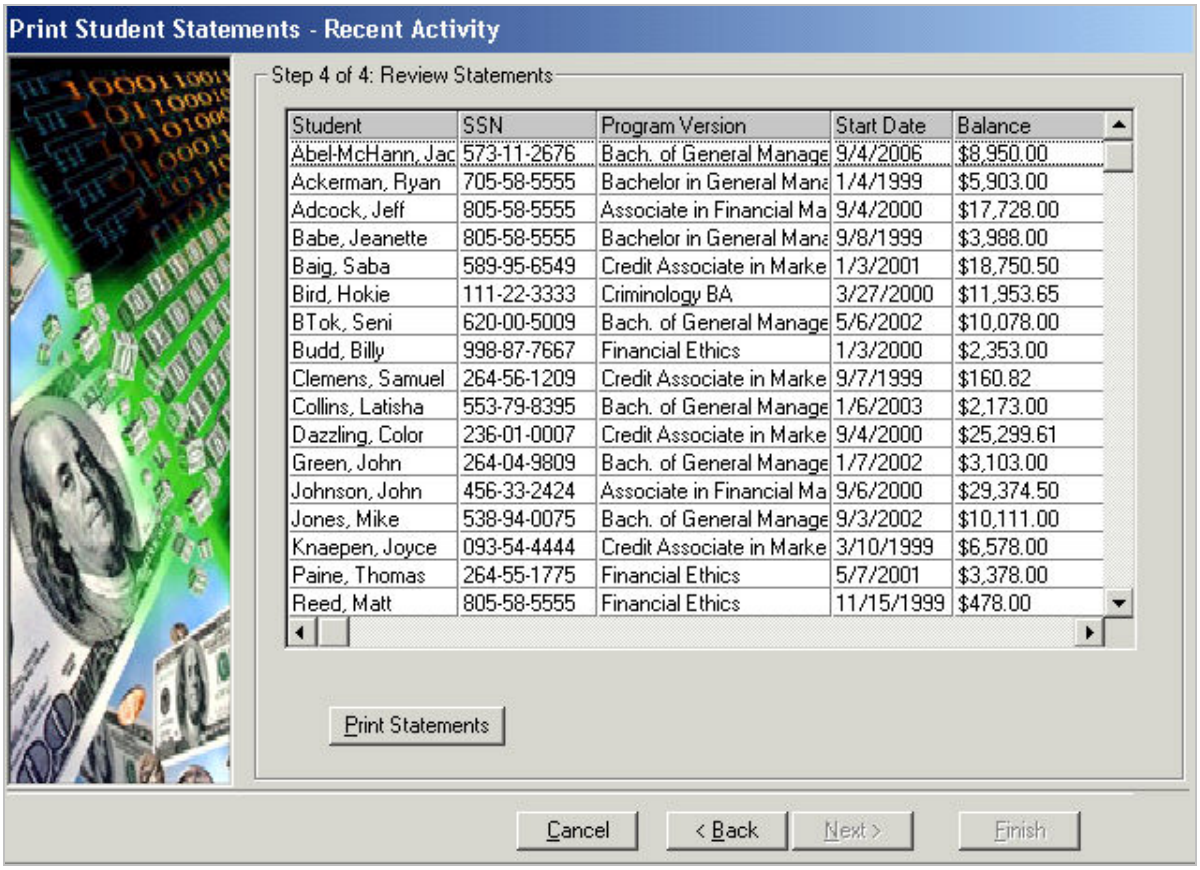
7. Select the **Start** and **To** date for your selection.
8. Select **Exclude Auto Draft Students** to exclude any student authorized for auto draft from this statement.
9. Select the student status criteria. Click **Select All** to select all student school statuses or **Clear All** to clear previous status selections, or select statuses individually using the check boxes.

   Click the **Plus** signs to expand the status categories to see more status detail. You must select at least one school status for statements to be printed.
10. Select the **Shift(s)** for which statements are to be printed. Use **Select All** to select all shifts or **Clear All** to clear previously selected shifts.

    Click the **Plus** signs to expand the shift list to see more status detail. You must select at least one shift for statements to be printed.
11. Select the Program Version criteria. Click **Select All** to select all program versions or **Clear All** to clear previous program version selections, or select versions individually using the check boxes. You must select at least one program version for statements to be printed.
12. Click **Next**. Step 3 of 4: Statement Options of the wizard is displayed.



13. Select the statement options that you would like printed. The **Remittance Address** is used on the return coupon, if configured, when the **Payment Coupon** option is selected.
14. Click **Next**. In Step 4 of 4: Review Statements, review the statements on this form.



15. Click **Print Statements.** The report form loads the statements in the Report Viewer. The statements are displayed by the Crystal Reports preview program. Review and print the statements as necessary. A sample statement is shown below. The Student's name and ID Number are pre-printed on the payment coupon.

    Note: All credit cards types supported by CampusNexus Student are printed on the payment coupon, regardless of whether your institution or campus accepts these cards.

16. Close the report preview form after you view and print your statements. The Print Student Statements form is still open in your work area.

17. Select the appropriate answer to the question, **Did statement(s) print okay?**. If your answer is **Yes**, when you click **Finish**, the wizard closes the procedure. If your answer is **No**, the wizard returns to the first page.

Note: To ensure that the Student Payment Statement is being sent out on a regular basis, the date that the last Student Payment Statement was printed for each payment plan is displayed in the Last Statement date field in the Last Statement column of the form. The Last Statement date field on the schedule is updated when the student statement process is completed. The Last Statement date field is only updated for Student and Agency Payments with a Fund Source type of 'Cash'. This date field is updated with the system date when the user confirms that the statements printed correctly and presses the Finish button in the Print Student Statements wizard. The user can then reference the Last Statement date field on the Payment Schedule form.

Student Account Balance Statements

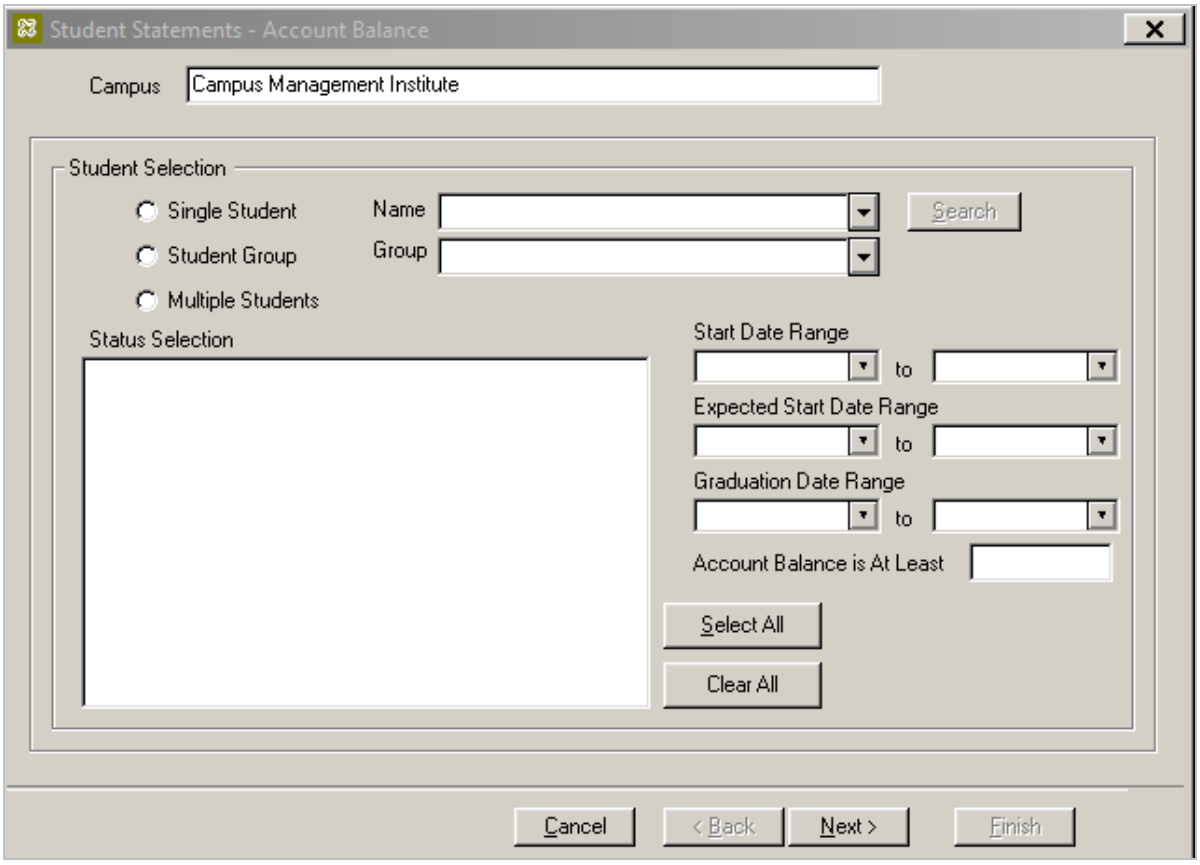
Student Account Balance Statements are printable accounts of financial activity sent to students monthly indicating the amount they are required to pay the institution.

When statements are generated by an institution, CampusNexus Student first determines if there are scheduled payments for the student. If no payment schedule is found, CampusNexus Student reviews the student ledger and reports the account balance as the amount due for the statement period.

If the student statement indicates that the overall balance on the student account is...
... a *credit*, no statement is generated.
... a *debit*, the statement indicates the debit balance in the Amount Due field of the statement.

To generate a Student Account Balance Statement:

1. Navigate to **Daily > Student Accounts > Student Billing Statements > Student Account Balance Statement**. The Student Statements - Account Balance form is displayed.



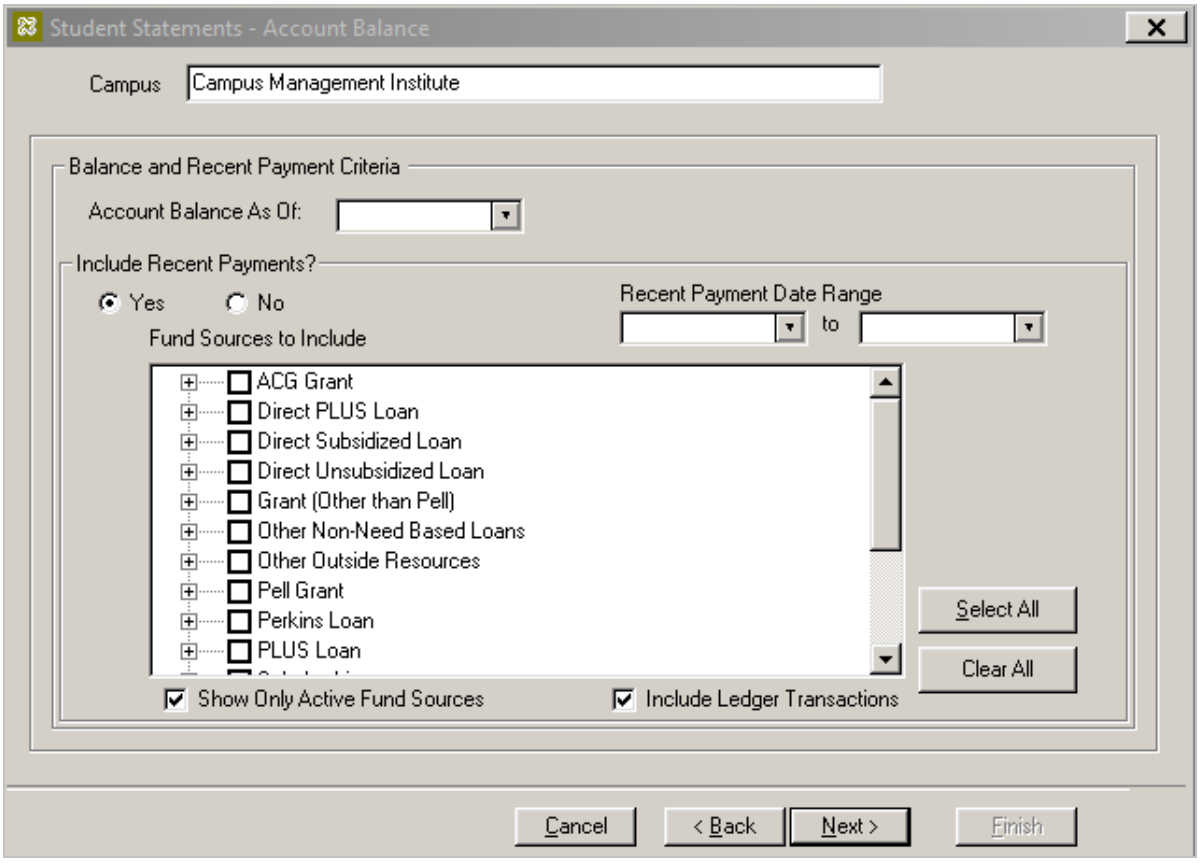
2. Complete the fields on this form as needed.

Field Descriptions

Field	Description
Campus	Select a campus.

Field	Description
Single Student	When you select this option, use the **Name** list to find the student's name, or click Search to find the student.
Student Group	When you select this option, use the **Group** list to choose a group.
Multiple Students	When you select this option, use the Status Selection list to select the statuses of the students. Click **Select All** to capture all statuses. Click **Clear All** and choose statuses individually. Other filtering criteria include: • Start Date Range • Expected Start Date Range • Graduation Date Range • Account Balance is At Least Select as many criteria as possible to narrow your search.

3. Click **Next** to proceed, **Back** to return to the previous form, or **Cancel** to quit the process.

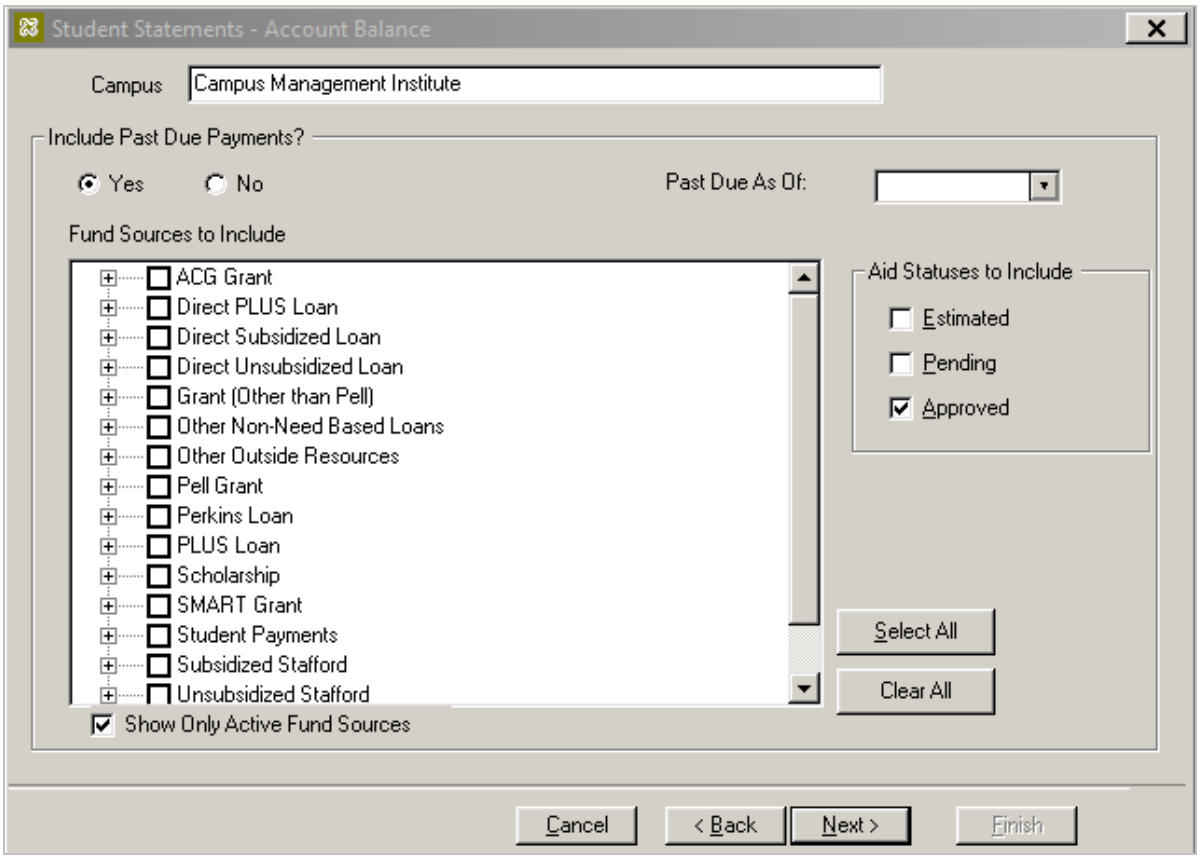


4. Complete the fields on this form as needed.

Field Descriptions

Field	Description
Account Balance As Of	Select a date.
Include Recent Payments?	Use the Yes/No options to indicate whether to include recent payments received (including refunds, stipends, and voids for the period) on the statement. If you select Yes, the **Recent Payment Date Range** fields become available. Select a date range.
Fund Sources to Include	Select the Fund Sources that you want to include for Recent Payments on the statements. Click **Select All** to capture all fund sources. Click **Clear All** and choose fund sources individually.
Show Only Active Fund Sources	Select this option if you want only active sources to appear in the list.
Include Ledger Transactions	Select this option if you want to include ledger transactions. The transaction date, description, and amount are displayed for each payment presented.

5. Click **Next** to proceed, **Back** to return to the previous form, or **Cancel** to quit the process.

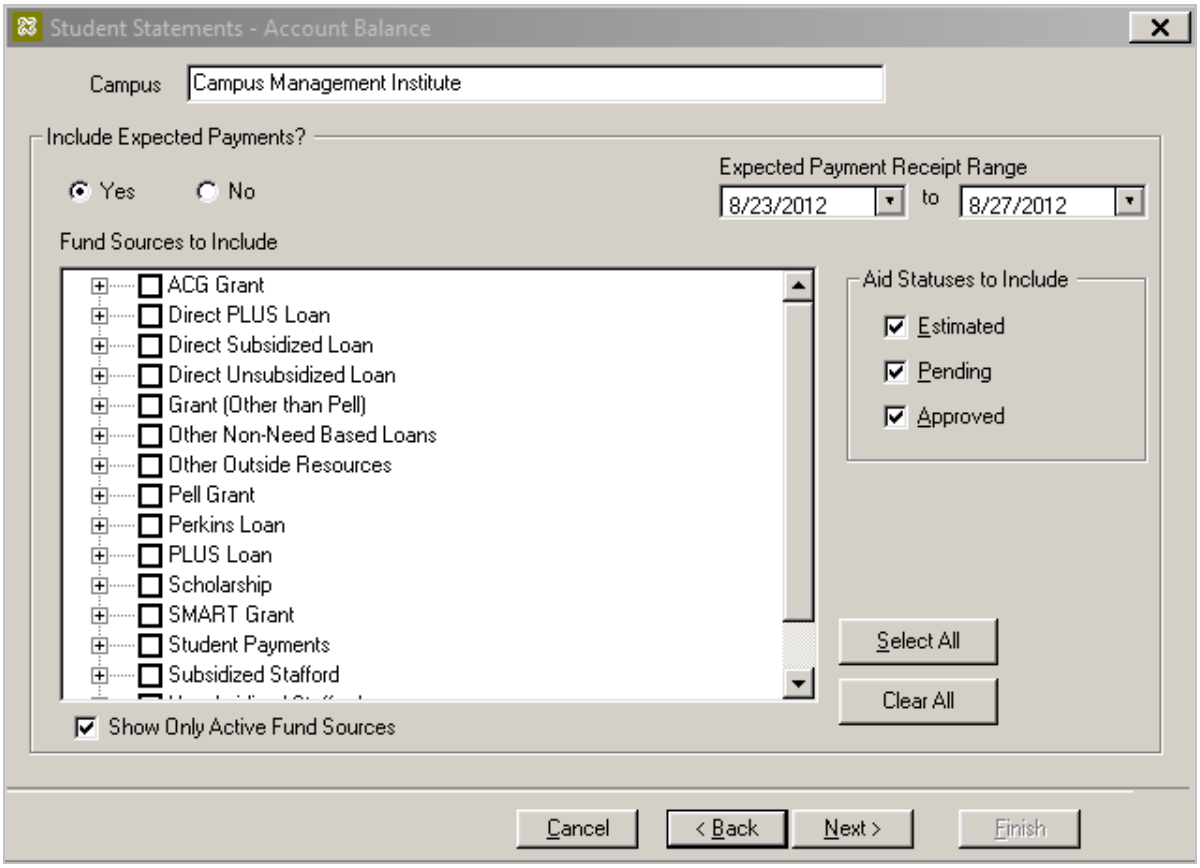


6. Complete the fields on this form as needed.

Field Descriptions

Field	Description
Include Past Due Payments	Use the Yes/No options to indicate whether to include past due payments on the statement. If you select Yes, the **Past Due As Of** field becomes available. Select a date.
Aid Statuses to Include	Select as many statuses as you want to include on the statement. Available statuses are: • Estimated • Pending • Approved
Fund Sources to Include	Select the Fund Sources you want to include for Past Due Payments on the statements. Click **Select All** to capture all fund sources. Click **Clear All** and choose fund sources individually.
Show Only Active Fund Sources	Select this option to view only active fund sources. The date scheduled, fund source description, and amount scheduled are displayed for each fund source included.

7. Click **Next** to proceed, **Back** to return to the previous form, or **Cancel** to quit the process.

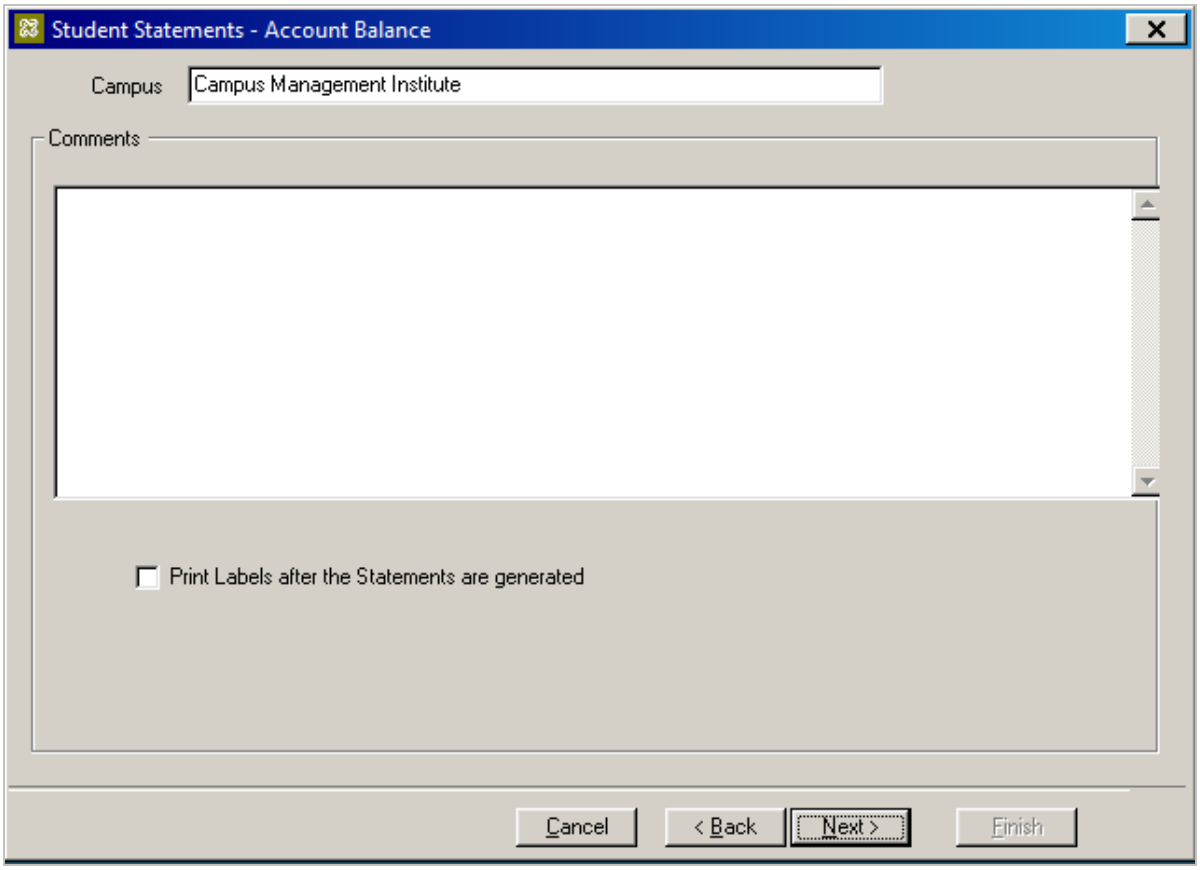


8. Complete the fields on this form as needed.

Field Descriptions

Field	Description
Include Expected Payments?	Use the Yes/No options to indicate whether to include expected payments on the statement. If you select Yes, the **Expected Payment Receipt Range** fields become available. Select a date range.
Fund Sources to Include	Select the Fund Sources you want to include for Expected Payments on the statements. Click **Select All** to capture all fund sources. Click **Clear All** and choose fund sources individually.
Aid Statuses to Include	Select as many statuses as you want to include on the statement. Available statuses are: • Estimated • Pending • Approved
Show Only Active Fund Sources	Select this option to view only active fund sources. The date scheduled, fund source description, and amount scheduled are displayed for each fund source included.

9. Click **Next** to proceed, **Back** to return to the previous form, or **Cancel** to quit the process.



10. Complete the fields on this form as needed.

Field Descriptions

Field	Description
Comments	Enter any comments that you want to include on the report.
Print Labels after the Statements are generated	Select or clear this check box to indicate if you want to print labels after the account balances are printed.

11. Click **Next** to proceed, **Back** to return to the previous form, or **Cancel** to quit the process.
12. This form is a read-only review of the selection criteria and other information to be printed on the report. Click **Finish** to proceed and print the report, **Back** to return to the previous form, or **Cancel** to quit the process.

Student Account Activity Statements

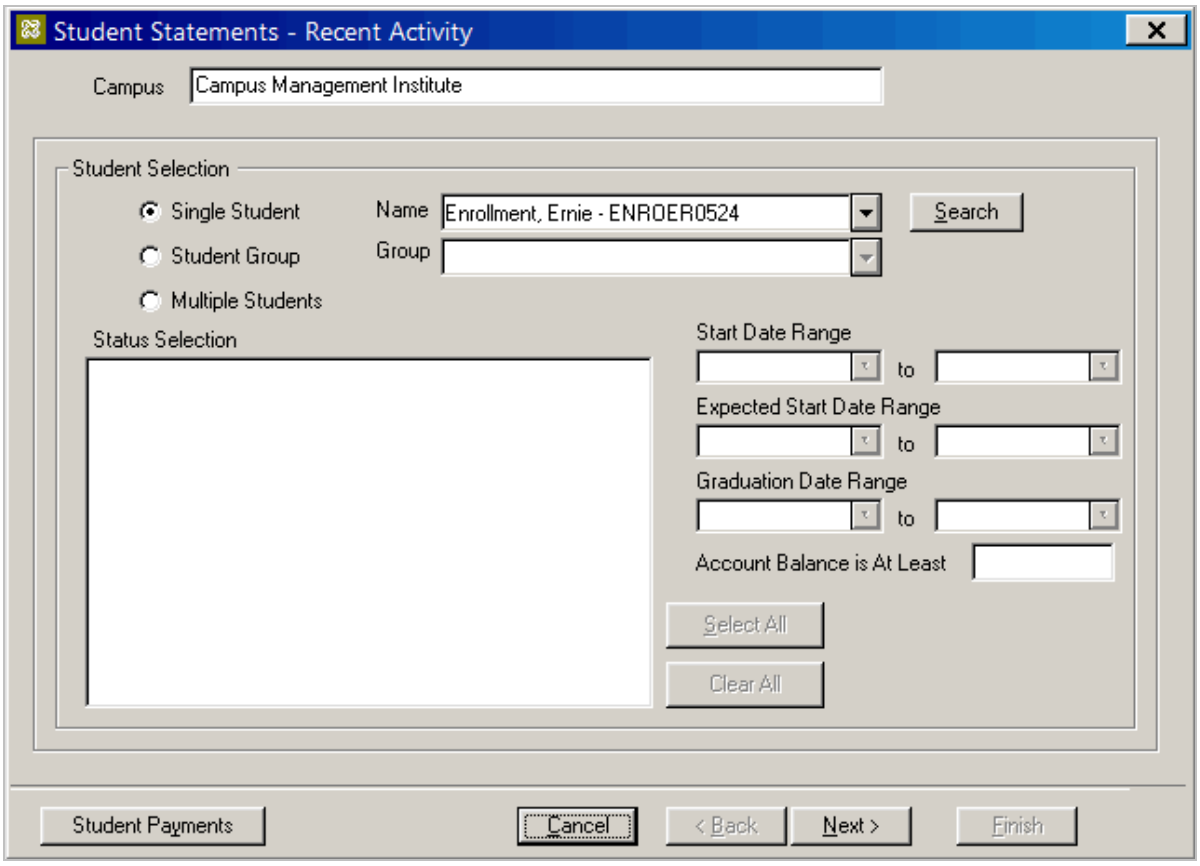
Student Account Activity Statements are printable accounts of financial activity sent to students monthly indicating the amount they are required to pay the school.

When statements are generated by an institution, CampusNexus Student first determines if there are scheduled payments for the student. If no payment schedule is found, CampusNexus Student reviews the Student Ledger and reports the account balance as the amount due for the statement period.

If the student statement indicates that the overall balance on the student account is...
... a *credit*, no statement is generated.
... a *debit*, the statement indicates the debit balance in the Amount Due field of the statement.

To generate a Student Account Balance Statement:

1. Navigate to **Daily > Student Accounts > Student Billing Statements > Student Account Activity Statements**. The Student Statements - Recent Activity form is displayed.



2. Complete the fields on this form as needed.

Field Descriptions

Field	Description
Campus	Use the drop-down list to select a campus.

Field	Description
Student Selection	
Single Student	When you select this option, use the Name list to find the student's name, or click Search to find the student.
Student Group	When you select this option, use the Group list to choose a group.

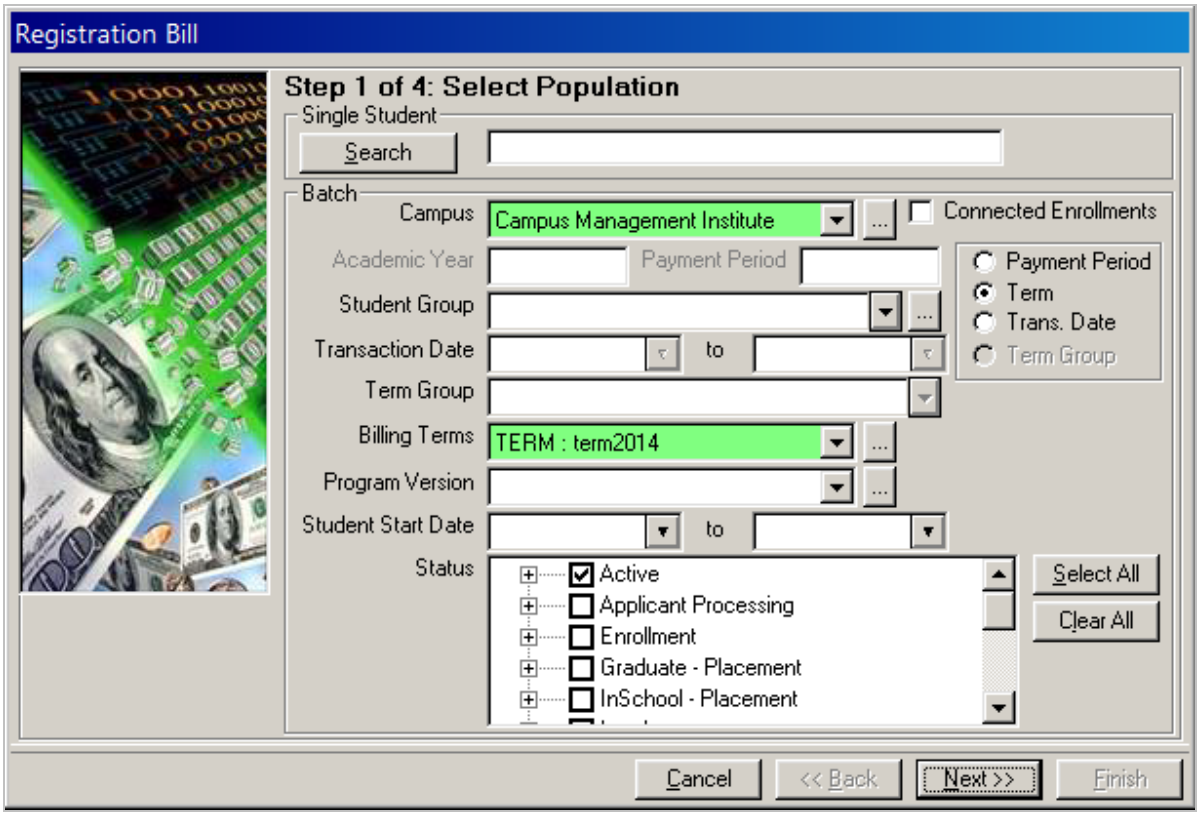
12. Click **Next** to proceed, **Back** to return to the previous form, or **Cancel** to quit the process.
13. This form is a read-only recap of the selection criteria and other information to be printed on the report. Click **Finish** to proceed and print the report **Back** to return to the previous form, or **Cancel** to quit the process.

Registration Bill

Use this form to produce student bills or a summary report. See also Registration Bill Defaults and Purge Billing Statement Records. The Registration Bill functionality was previously referred to as 'Registration Summary by Term'.

To run the Registration Bill wizard:

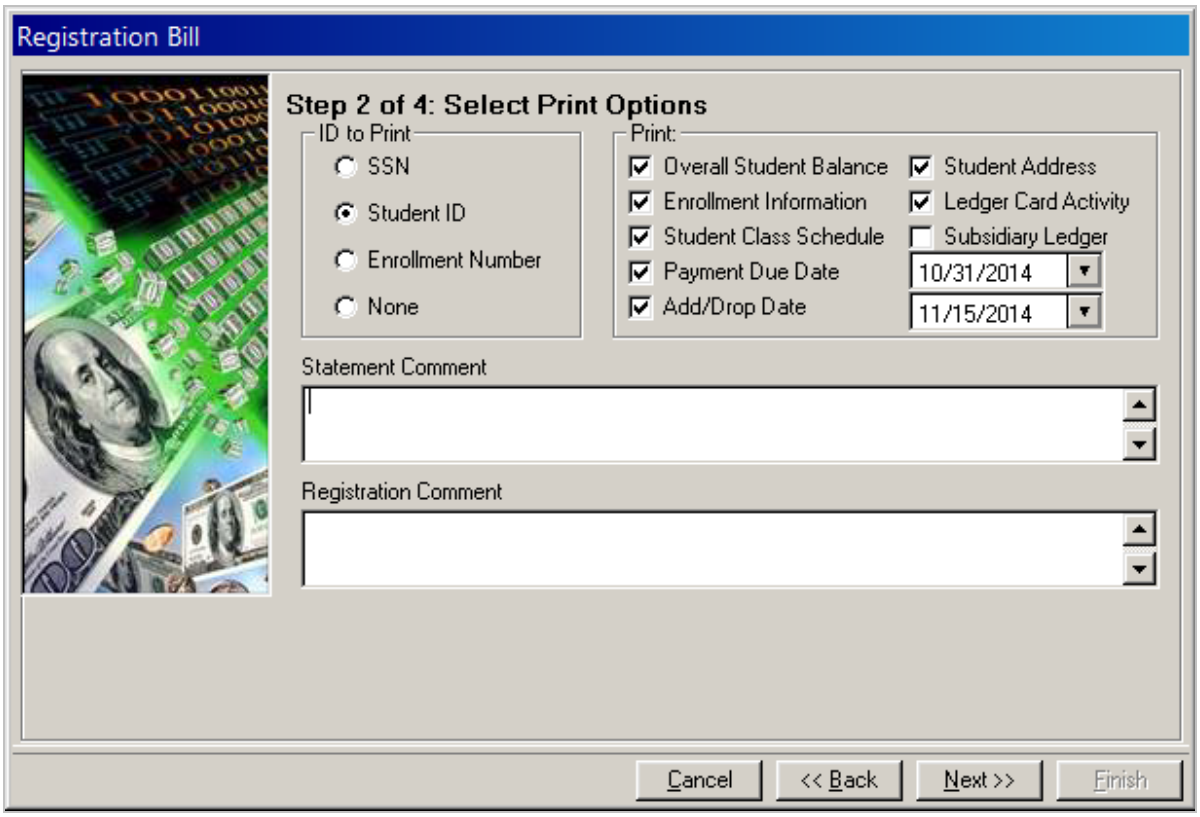
1. Navigate to **Daily** > **Academic Records > Registration Bill**.
   - OR -
   Navigate to **Daily > Student Accounts > Student Billing Statements > Registration Bill**. Step 1 of the Registration Bill wizard is displayed.



2. Search for a **Single Student** or specify selection criteria for a **Batch** of students. If you search for a single student, the batch selection options are disabled.
3. Select a billing period. The options are:
   - Payment Period
   - Term
   - Transaction Date
   - Term Group
4. If applicable, select **Connected Enrollments**. With this selection the options the following options enabled are: Term, Transaction Date, and Term Group.

You can print batch Registration Bills for connected enrollments, with combined detail and aggregated summary information. Connected enrollment information will be printed even if both of the connected enrollment's campus or program version is not selected.

5. Depending on your billing period selection, complete any other required fields.
6. Click **Next**. Step 2 of the Registration Bill wizard is displayed.



7. Select the ID to Print on the registration bill. The options are:

   - SSN
   - Student ID
   - Enrollment Number
   - None

   Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

8. Select additional information to print on the bill.

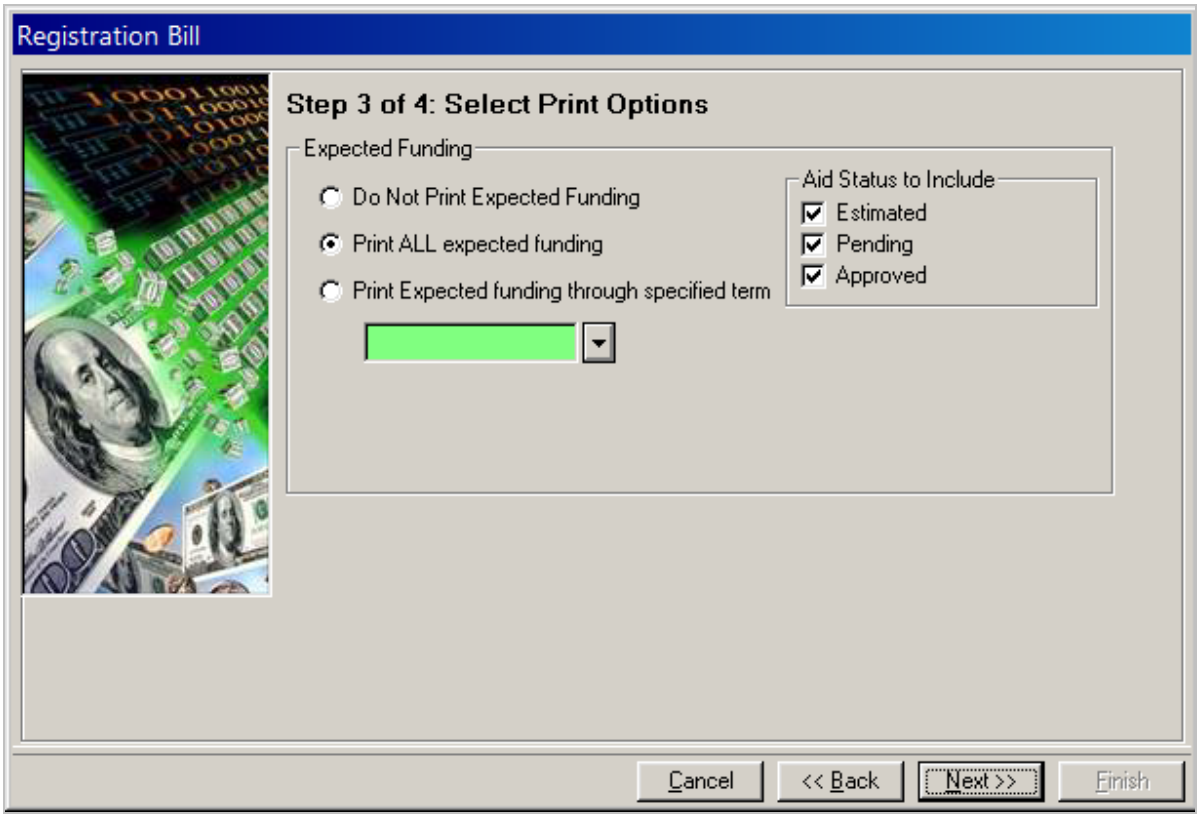
   If you select **Payment Due Date** and **Add/Drop Date**, specify the respective dates.

   Note: Student Class Schedule is enabled only if a single term was selected on the previous form.

9. *Optional*: Enter a **Statement Comment** and **Registration Comment** to print on the student bill. Do not use special characters like & and < in your comments.
10. *Optional*: Select **Subsidiary Ledger**. If this option is selected, the report will include a sub report showing the

subsidiary information for the enrollment. For single or multiple enrollments, the subsidiary ledger information is printed for the Summary Registration Bill and the Detail Registration Bill.

11. Click **Next**. Step 3 of the Registration Bill wizard is displayed.



12. Select appropriate funding and aid status options to print on the registration bill.

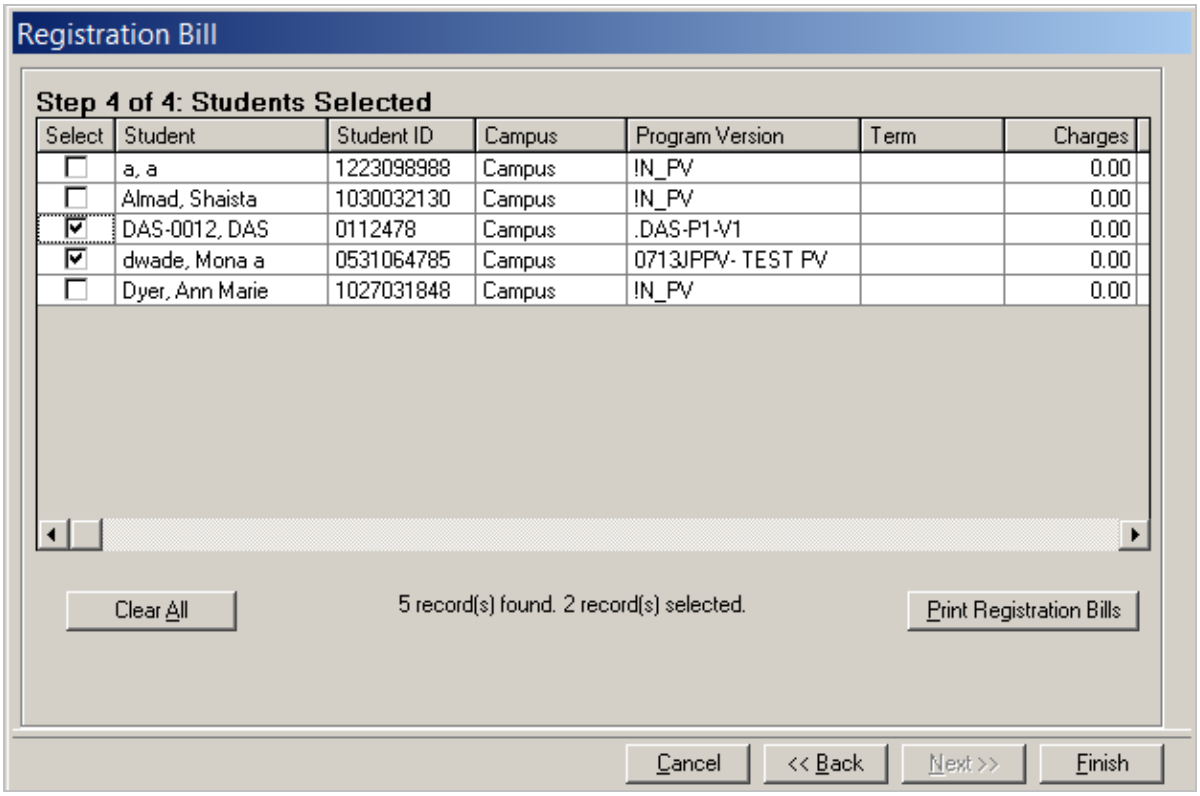
    The Billing Information group determines the charges source. Aid to be included is determined by the check boxes in this group.

    If you select **Print Expected funding through specified term**, you can specify only one term. CampusNexus Student gathers disbursements that have an expected date on or before the end date of the term selected.

    The Balance Options group allows you to specify whether the Summary and Detail reports are to be filtered based on positive, negative, and/or zero student balances.

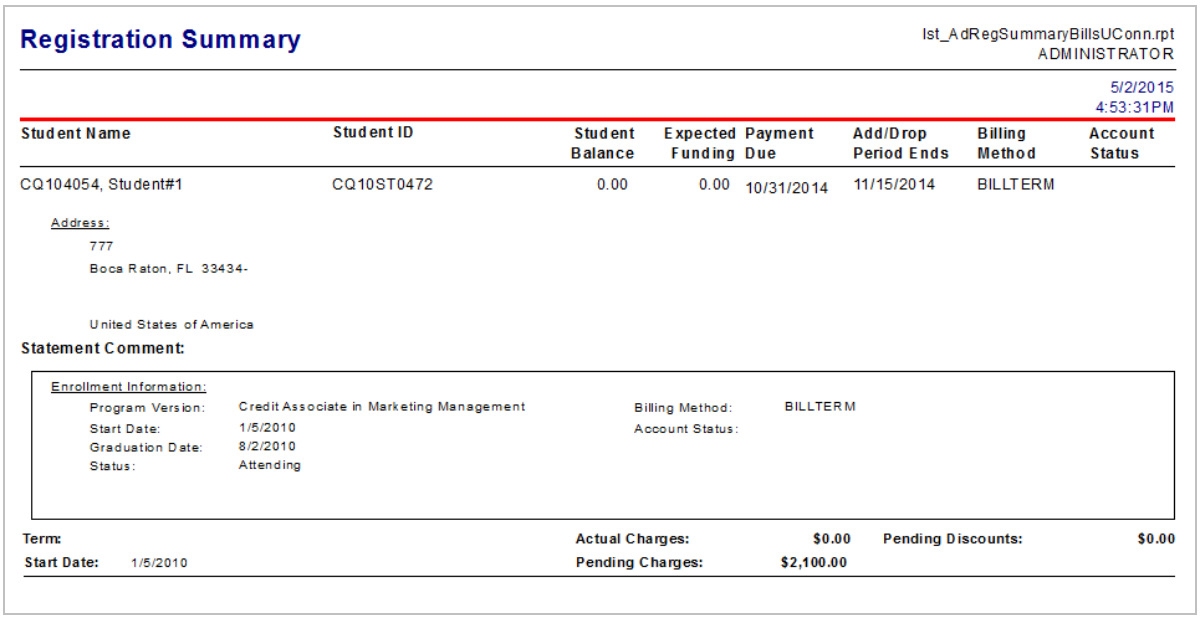
    Note: The configuration settings for Balance Options in the Registration Bill wizard override the settings in the Registration Bill Defaults.

13. Click Next. Step 4 of the Registration Bill wizard is displayed.



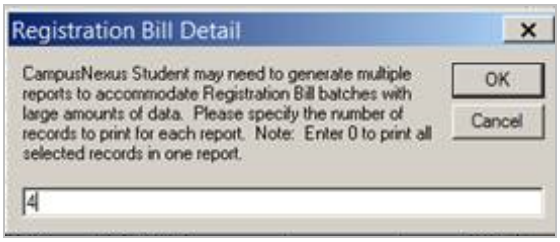
14. The Students Selected grid lists students, their enrollment, and charges. The charges column lists the Actual/Expected charges calculated for each student for the terms specified. Click the **Select** column for the students you want to include in the registration bill.

15. Depending on the settings in Registration Bill Defaults, you can print Summary or Detail bills. If only the Summary option or only the Detail option was configured in the default settings, the Print button is labeled **Print Summary Registration Bills** or **Print Detail Registration Bills**, respectively. If both Summary and Detail were configured as default settings, a pop-up menu appears when you click the Print button.



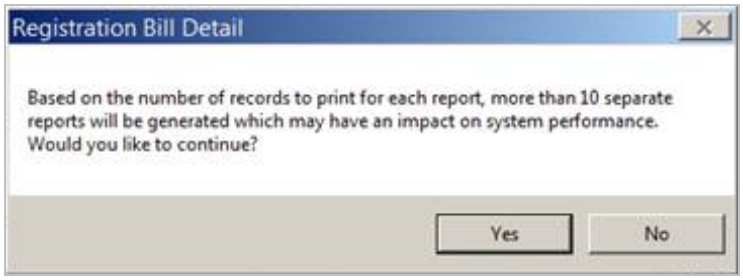
16. Click **Finish** or **Cancel** to close the form.

17. If you are printing **Detail Registration Bills**, after clicking **Print Registration Bills**, you have the choice to print all selected students to a single Crystal Report or to print the selected students in smaller batches as multiple reports. Printing multiple reports can avoid issues with system performance if the amount of selected data for a single report is extremely large.



Enter the number of desired records to be displayed on each generated report in provided field. This must be a whole number and not exceed the total number of records selected. Entering 0 prints all selected records in a single report.

If the number entered by the user generates more than 10 reports, a warning message is displayed:



Users can chose Yes and continue or chose No to cancel and re-enter a new number of records.

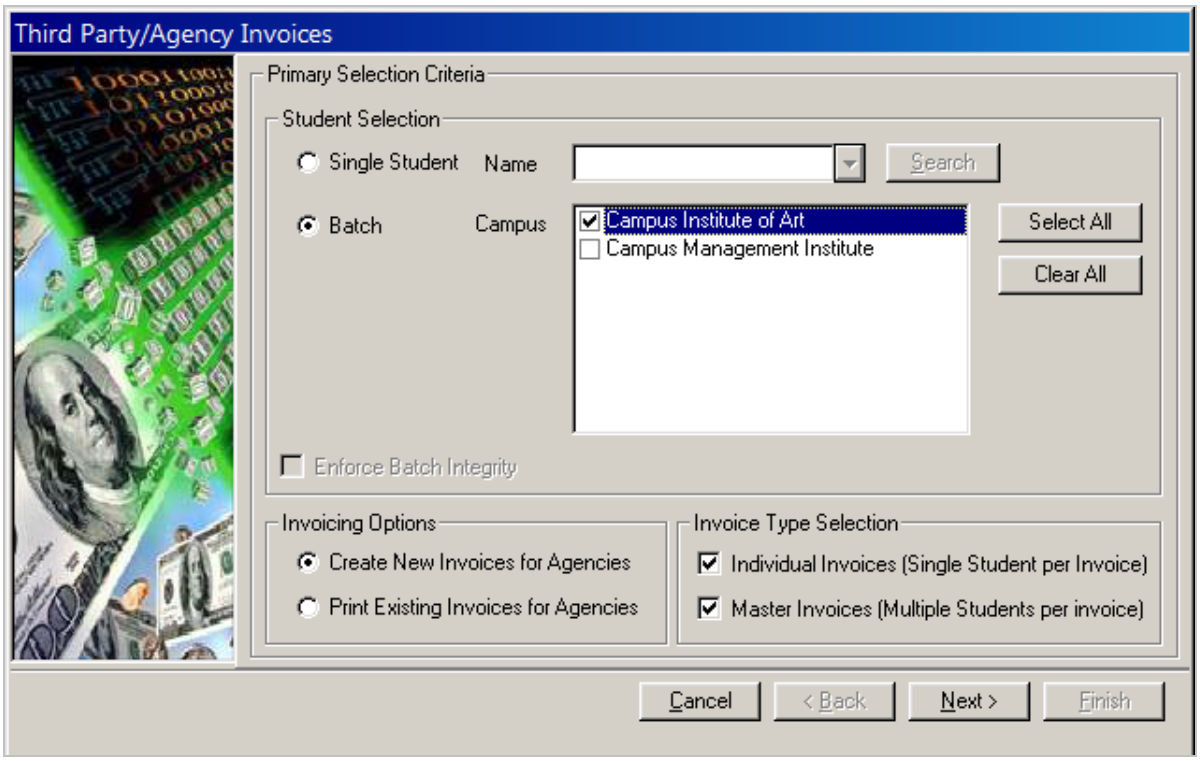
Third Party/Agency Invoices

Use this feature to generate invoices for third parties that have been set up as active agencies associated with your institution. You can generate invoices for more than once campus per agency, and post payments (after approved by Financial Aid) to multiple campuses if the batch contains disbursements generated from multiple campuses using the Third Party - Agency Invoices Approval wizard.

For details on setting up an agency, refer to Agency - Third Party.

To generate a third party invoice:

1. Navigate to **Daily > Student Accounts > Third Party/Agency Invoices**. The Primary Selection Criteria form of the Third Party/Agency Invoices wizard is displayed.



2. To generate invoices for a single student, select **Single Student** and specify the **Name** of the student..

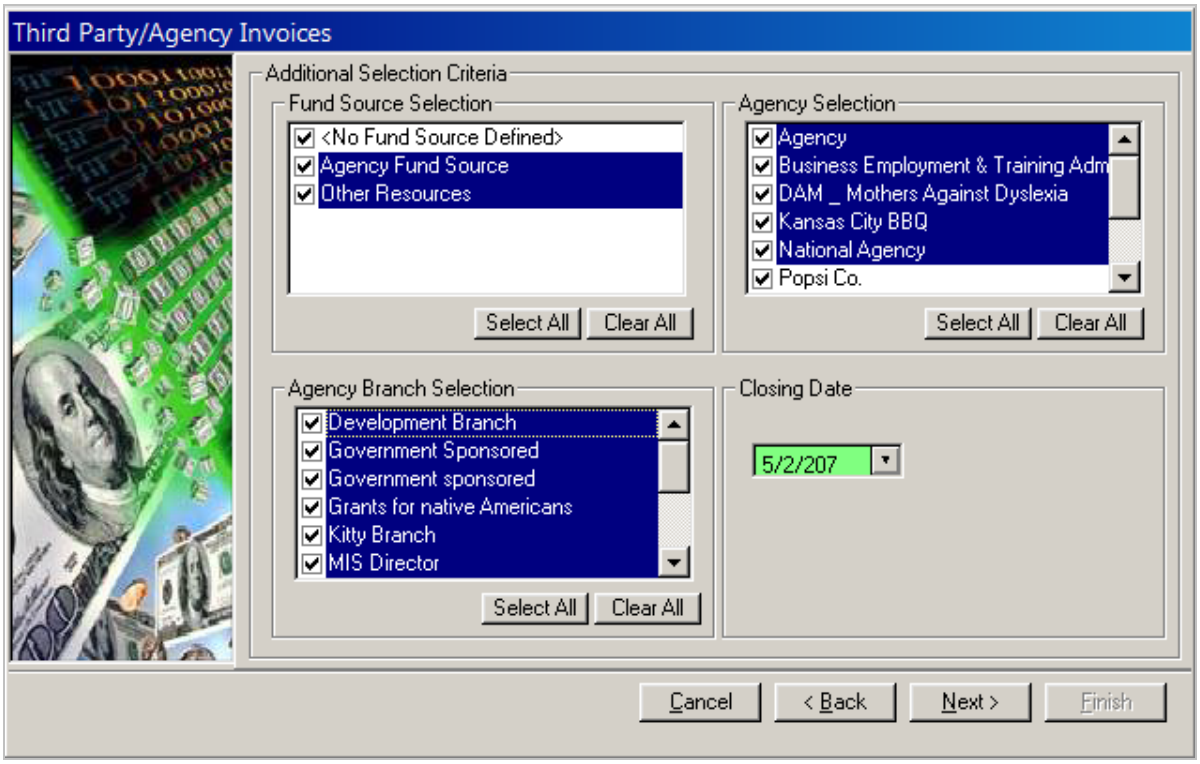
   If a student name appears in the Recent Students field, that student's name is displayed. If that student is not affiliated with an agency branch, a message is displayed. Click **Search** to find the another student.

3. To generate invoices for a multiple students, select **Batch** and select the applicable campuses from the **Campuses** list.

4. Select **Create New Invoices for Agencies** or **Print Existing Invoices for Agencies** from the Invoicing Options.

5. Select whether the invoice will be an **Individual** or **Master** invoice.

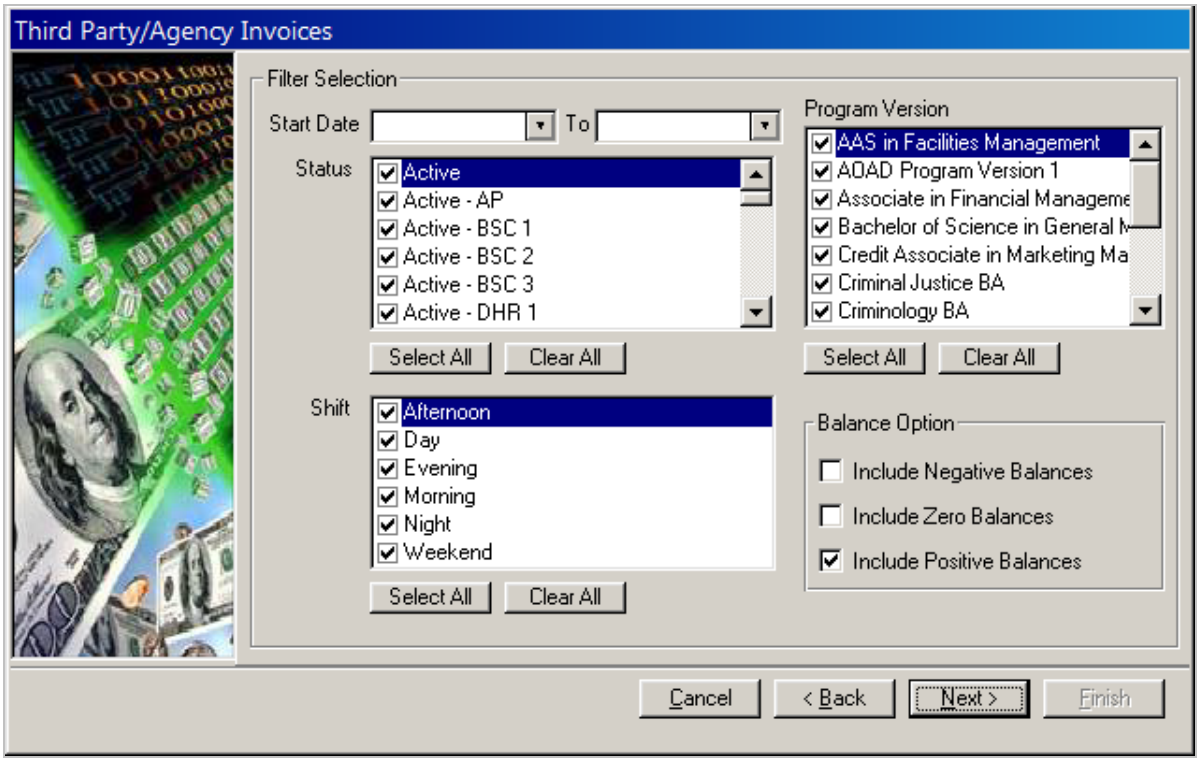
6. Click **Next**. The Additional Selection Criteria form is displayed.



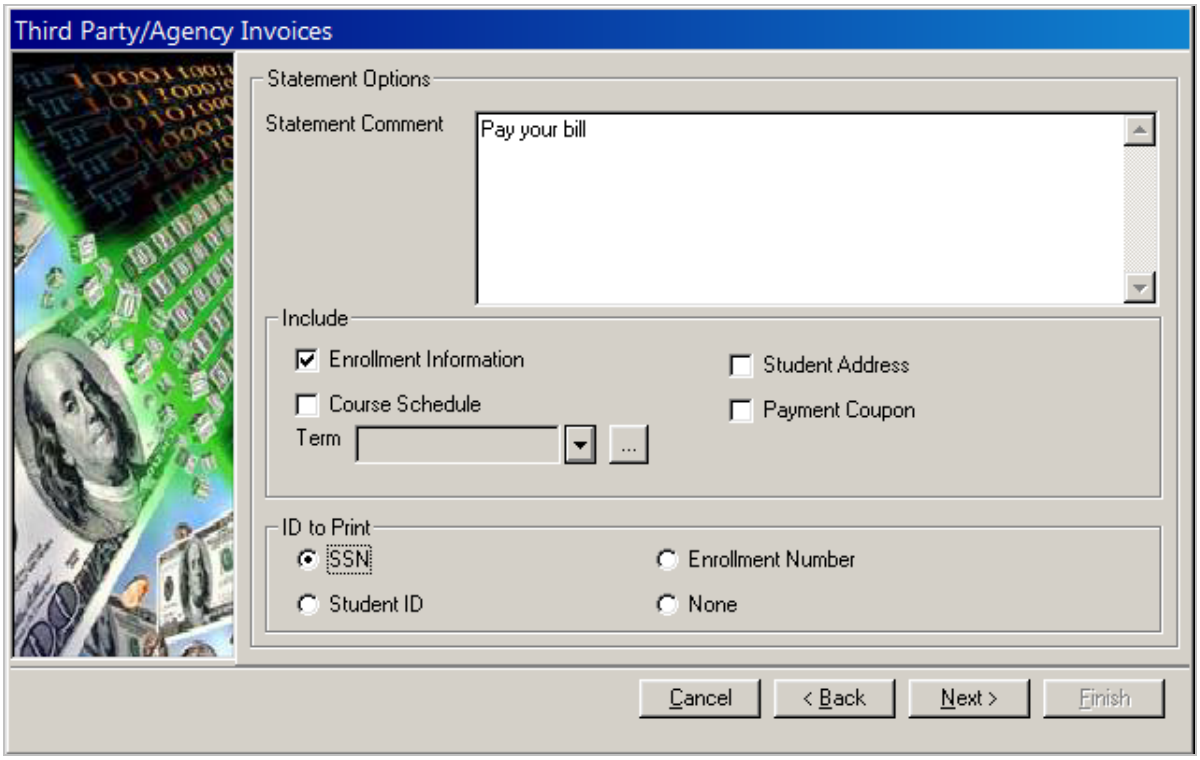
7. Select a **Closing Date**. This is the end date for billing.

   Note: Lists are filtered by the relationships set up between **Fund Source**, **Agency**, and **Agency Branch**. If you choose a fund source that has not been associated with any agencies, no options are displayed in the selections for **Agency** and **Agency Branch**.

8. Select a **Fund Source**. Select or clear all fund sources, or select individual fund sources.
9. Select an **Agency**. Select or clear all fund sources, or select individual fund sources.
10. Select an **Agency Branch**. When you select an agency that has branches, its branches are displayed in this field. If you choose an agency that has branches, you must choose specific branches. Select or clear all fund sources, or select individual fund sources.
11. Click **Next** or click **Back** to return to the previous form. The Filter Selection form is displayed.



12. Select the **Start** and **To** dates.
13. Select the **Statuses**you want to include in this billing.
14. Select the **Program Versions** you want to include in this billing. The list displays all available Program Versions at your institution.
15. Select the **Shifts** you want to include in this billing.
16. Select the **Balance options** you want to include in this billing. You may designate any combination of these options.
    - Include Negative Balances
    - Include Zero Balances
    - Include Positive Balances.
17. Click **Next**. The Statement Options form is displayed.



18. Enter a **Statement Comment**. This is any school-defined text that you want to appear on all invoices. You can prevent users from editing this field.

19. Use the Include check boxes to include or omit **Enrollment Information**, **Student Address**, **Course Schedule**, and **Payment Coupon**.

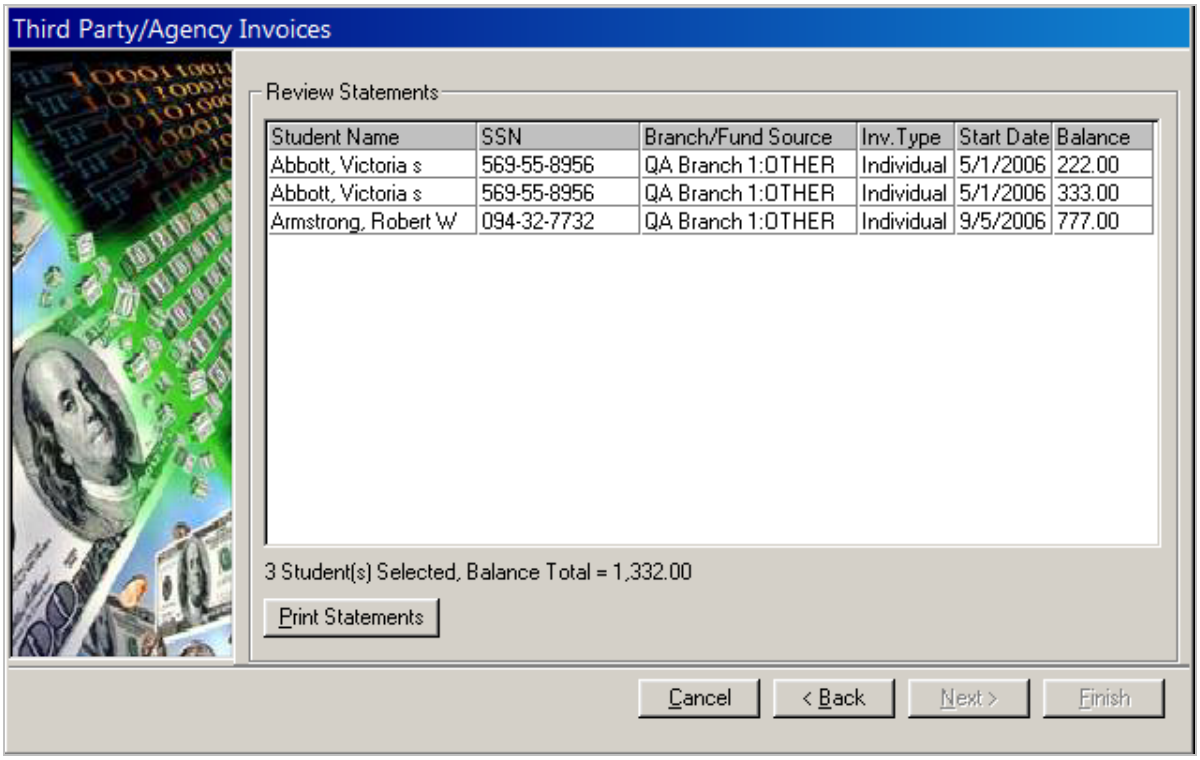
    The **Term** list is enabled when **Course Schedule** is selected.

    Only **Payment Coupon** is available when printing a master invoice. The **Remittance Address** will be used on the return coupon, if configured, when the Payment Coupon option is selected.

20. Select an **ID to print**. This is a school-defined way of identifying students.

    Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

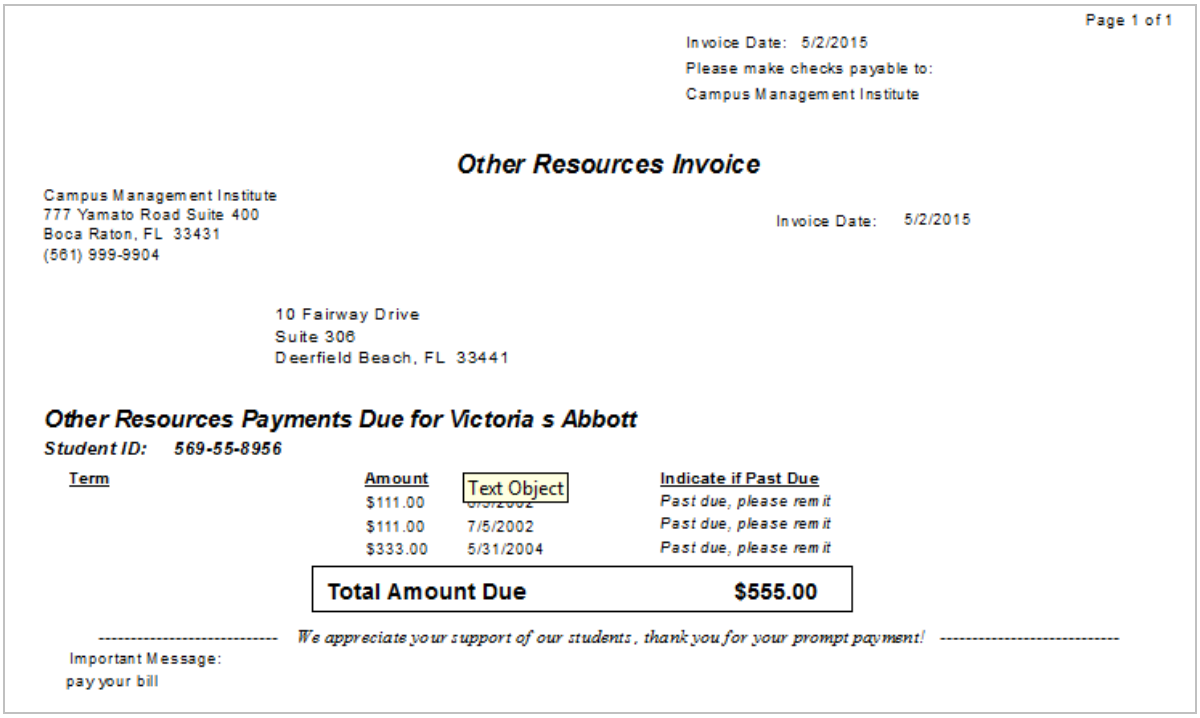
21. Click **Next**. The Review Statements form is displayed.



22. Click **Print Statements** to generate the invoices. (The button is disabled if no students meet your criteria for billing, the button is disabled.)

    Note: Printing an Agency Payment Invoice creates a Financial Aid batch that can be accessed by navigating to Daily > Financial Aid > Approve Disbursements to Pay. These payments can also be posted to student Ledger Cards after the invoice has been created and approved.

23. The invoice is displayed in the Report Viewer. Check the details of the invoice.



Page 1 of 1

Invoice Date: 5/2/2015
Please make checks payable to:
Campus Management Institute

Other Resources Invoice

Campus Management Institute
777 Yamato Road Suite 400
Boca Raton, FL 33431
(561) 999-9904

Invoice Date: 5/2/2015

10 Fairway Drive
Suite 306
Deerfield Beach, FL 33441

Other Resources Payments Due for Victoria s Abbott

Student ID: 569-55-8956

	$111.00		Past due, please remit
	$111.00	7/5/2002	Past due, please remit
	$333.00	5/31/2004	Past due, please remit

Total Amount Due **$555.00**

We appreciate your support of our students, thank you for your prompt payment!

Important Message:
pay your bill

24. In the Review Statements form, select **Yes** to indicate if the invoices printed correctly and click **Finish** to exit the wizard.

    If you select **No**, the **Print Statements** button and the **Back** button are enabled so that you can change the selections and print the invoice again.

Note: To ensure that the **Student Payment Statement** is sent out on a regular basis, the date that the last Student Payment Statement was printed for each payment plan is displayed in the **Last Statement Date field** in the Last Statement column of the form. The Last Statement date field on the schedule is updated when the student statement process is completed. The Last Statement date field is **only** updated for Student and Agency Payments with a Fund Source type of 'Cash'. This date field is updated with the system date when you confirm that the statements were printed correctly and click the **Finish** button in the Third Party/Agency Invoices wizard. You can then reference the Last Statement date field on the Payment Schedule form.

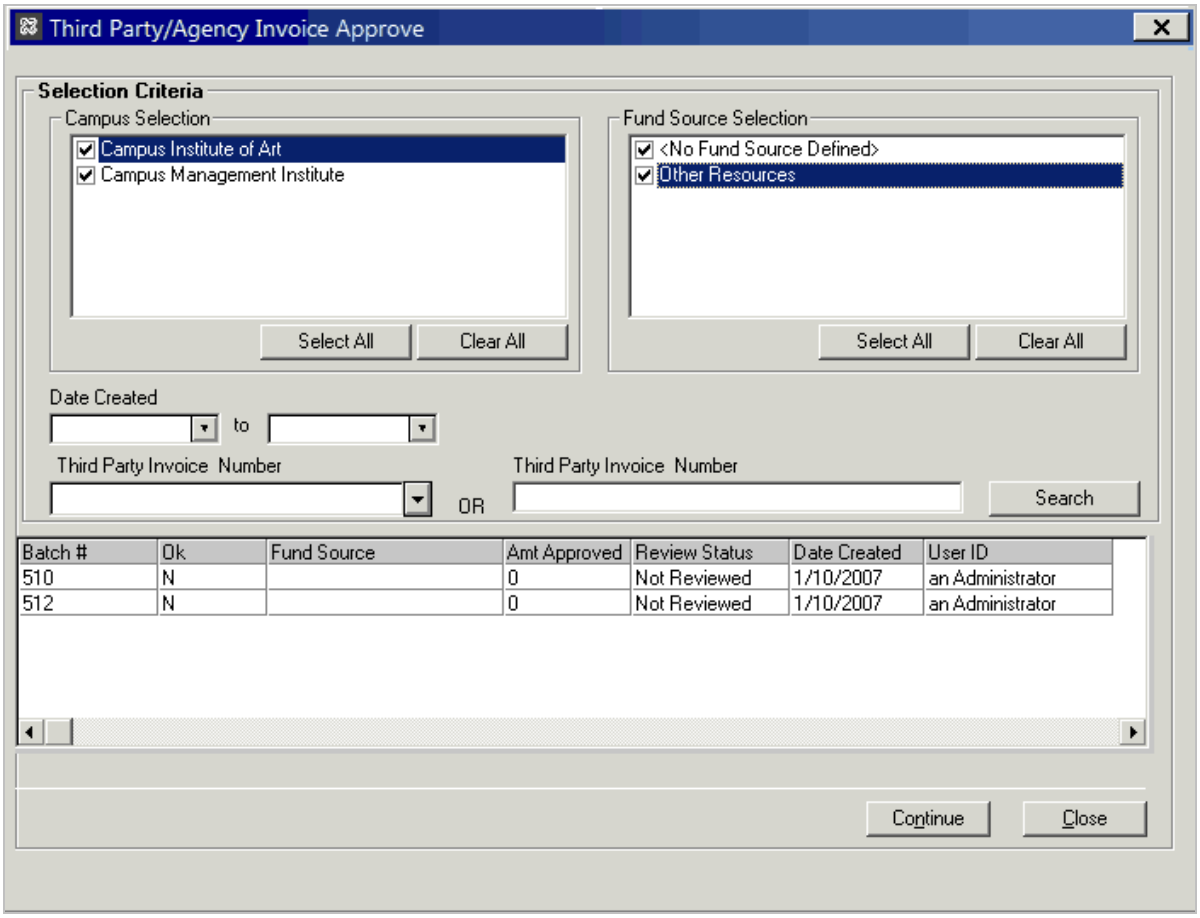
Third Party/Agency Invoice Approval

This feature enables users to approve invoices for third parties that have been set up as active agencies associated with your institution.

For details on setting up an agency, refer to Agency - Third Party. For details on generating invoices, see Third Party Agency Invoices.

To generate a third party invoice:

1. Navigate to **Daily > Student Accounts > Third Party/Agency Invoices Approval**. The Selection Criteria form of the Third Party/Agency Invoices Approve wizard is displayed.

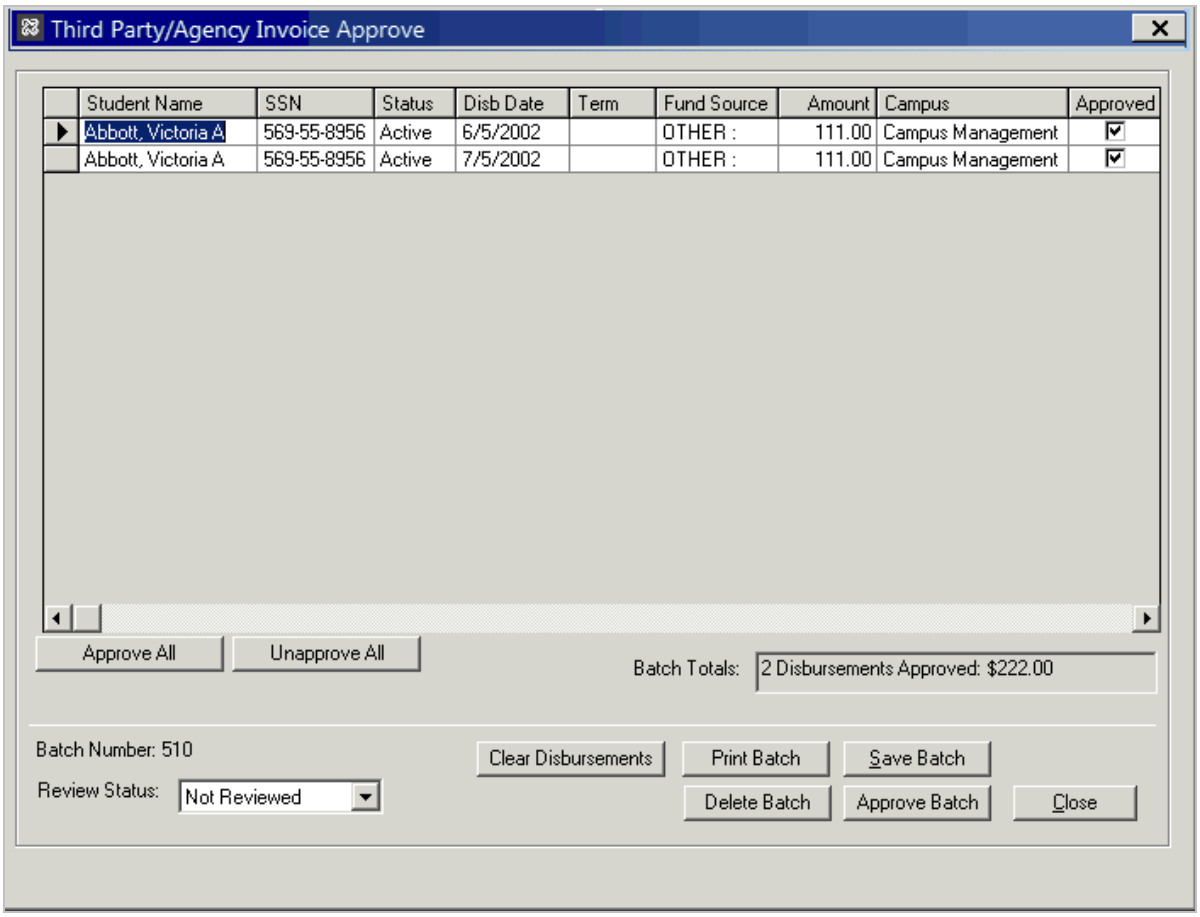


2. Select the applicable campuses from the **Campus Selection** area.
3. Select the applicable fund sources from the **Fund Source Selection** area.
4. Select a date range from the **Date Created** drop-down lists.
5. Select a **Third Party Invoice Number** from the drop-down list.
6. You can choose to enter a portion of a **Third Party Invoice Number** in the data entry field and click **Search**.
7. The Batch #, OK indicator, Fund Source, Amount Approved, Review Status, Date Created and User ID for each

agency invoice appear. Select an invoice to approve and click the **Continue** button.

8. The student's name, student ID, status, disbursement date, term, fund source, amount, campus are displayed, along with an **Approve** check box. Click **Approve All** or **Unapprove All** to approve or unapprove *all* invoices listed.

   Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.



9. Select a **Review Status**.

10. The **Clear Disbursements**, **Print Batch**, **Save Batch**, **Delete Batch**, and **Approve Batch** buttons work exactly the same as regular financial aid approve disbursements to pay buttons of the same name. Select the appropriate button.

    Notice that there is no Auto Approve functionality for agency disbursement approvals.

11. Click **Close** to return to the previous screen, where you may select another batch to process.

Bank Deposits

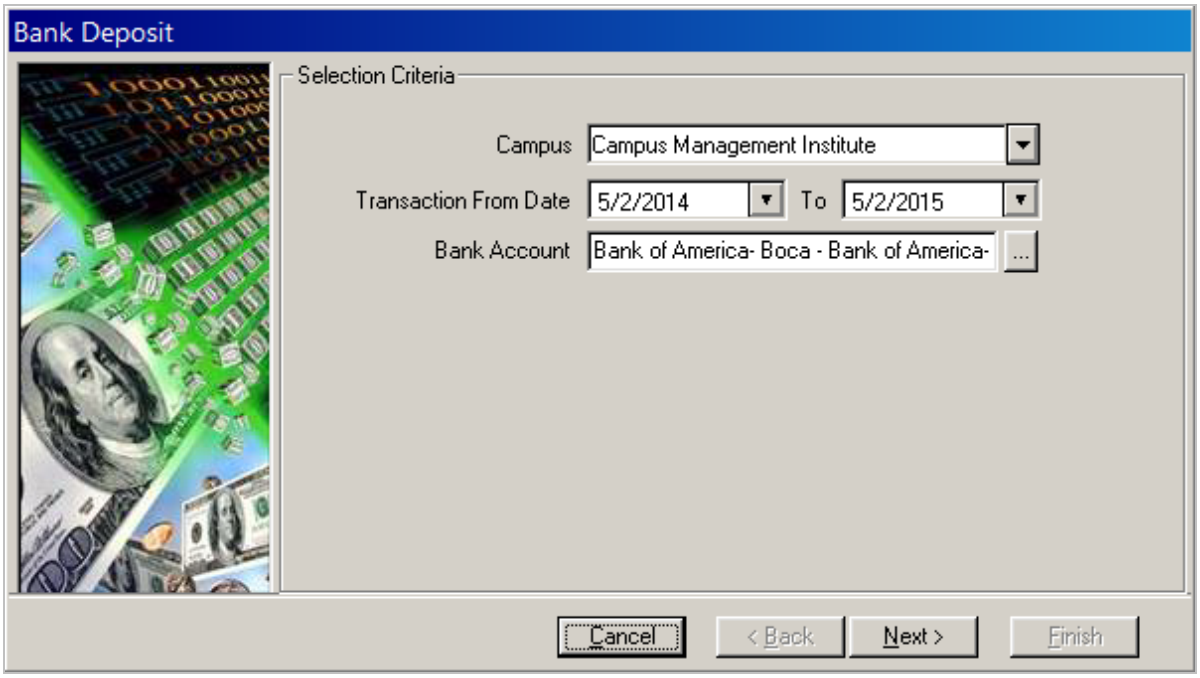
As you accept and post payments during your daily activities, CampusNexus Student keeps records to print a bank deposit report. At the end of the day, when the last payment transactions have been processed, you can run the Bank Deposit report to take to the bank with your receipts or to use for the preparation of a deposit slip.

If CampusNexus Student is integrated with an accounting system, refer to Release to Integrated Accounting System.

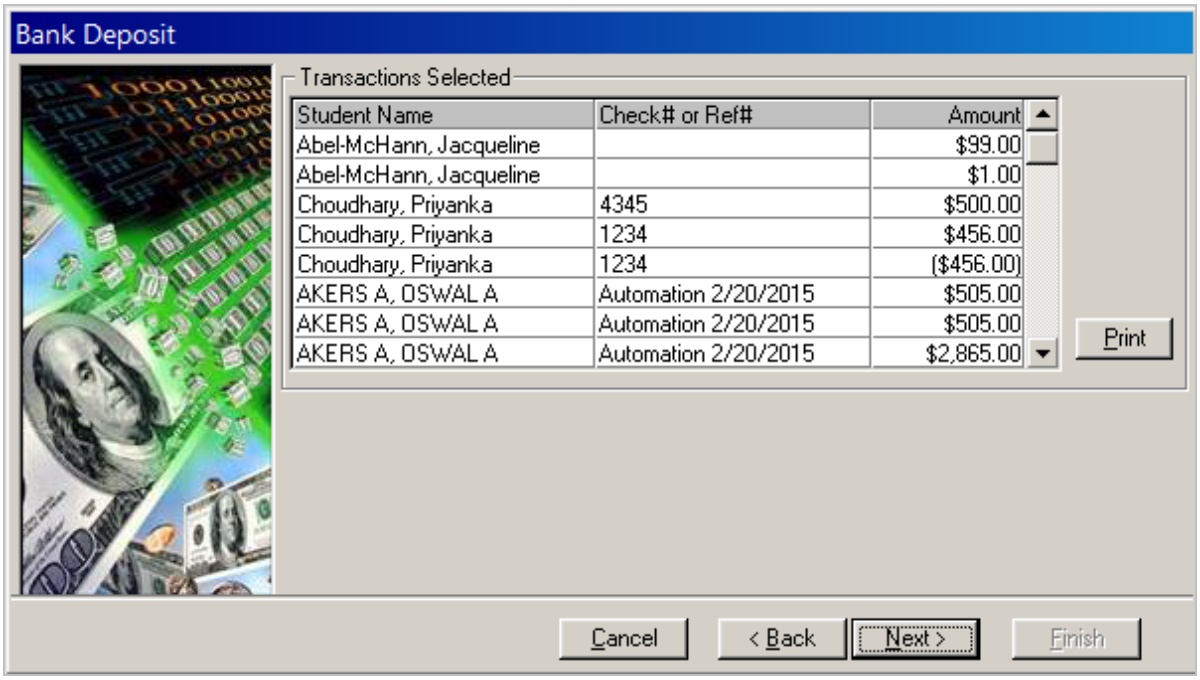
Note: It is not necessary to print the Bank Deposit Report every day. The triggering dialog gives you the opportunity to enter the beginning and ending dates of receipt transactions to be included in the deposit. CampusNexus Student does not list any receipt that has already been marked as deposited.

To prepare the Bank Deposit:

1. Navigate to **Daily** > **Student Accounts** > **Bank Deposits**. The Bank Deposits form is displayed.



2. Select the **Campus** for which the deposit is being prepared. CampusNexus Student selects the campus in which you are logged in as the default.
3. Enter or select the **Transaction From Date** range.
4. Select the **Bank Account** from the list or use the **Search** button.
5. If cashiering is in use, select a one or more cash drawers. This indicates that you want to deposit the contents of the cash drawers. For more details about managing cash drawers, refer to Cash Drawer Session Management.
6. Click **Next**. All transactions that qualify for the deposit will be selected, including any payments posted to sub-sidiaries, and listed on the next page of the form.



7. Click **Print** to print the Bank Deposit Receipts report. This report can serve as the deposit slip at some banks.

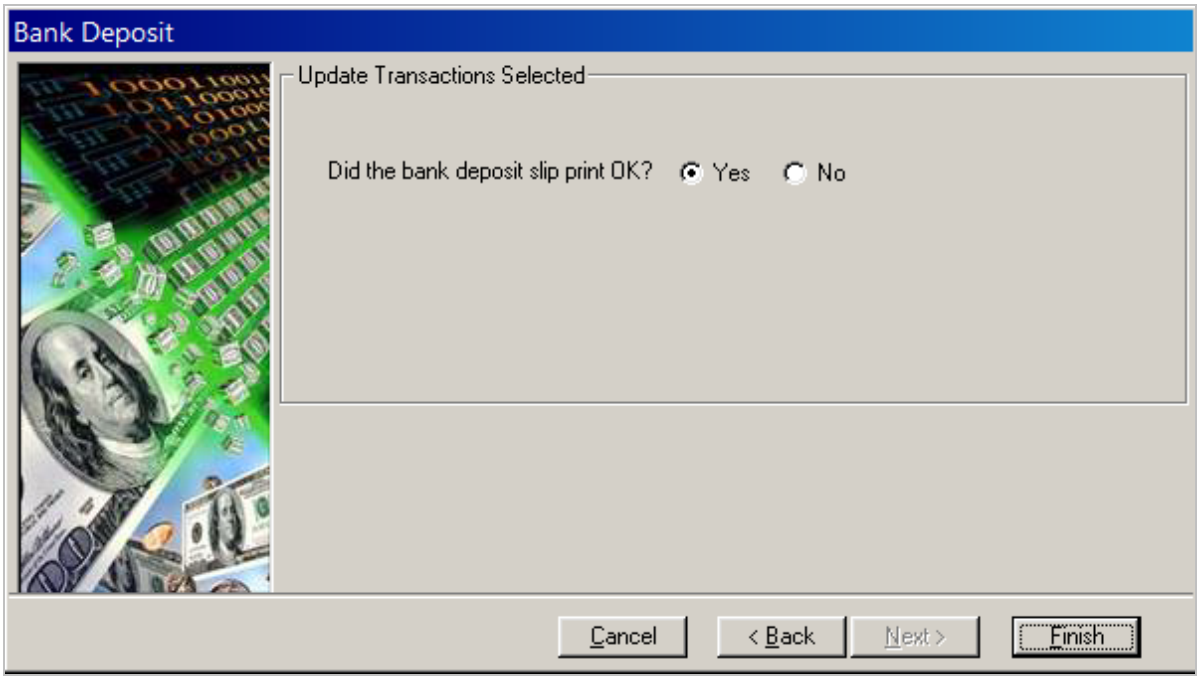
			Grand Total	**$6,648.00**

8. After printing the Bank Deposits report, close the report form.
9. Click **Next** on the Bank Deposit form. The last page of the wizard is displayed.



10. If you select **Yes** to answer to the question "Did the bank deposit slip print okay?" and click **Finish**, CampusNexus Student marks the listed transactions as deposited.

    If you select **No**, click **Finish** to end the procedure without depositing the transactions, or click **Back** to return to the previous page of the wizard.

Edit/Cancel Scheduled Refunds

The Edit/Cancel Scheduled Refunds form displays scheduled refunds and enables you to edit or delete them. You can set up and process refunds through ACH. Also see Process Refunds/Stipends, Process Electronic Drafts, Refund Policies, and Refund Check Registry.

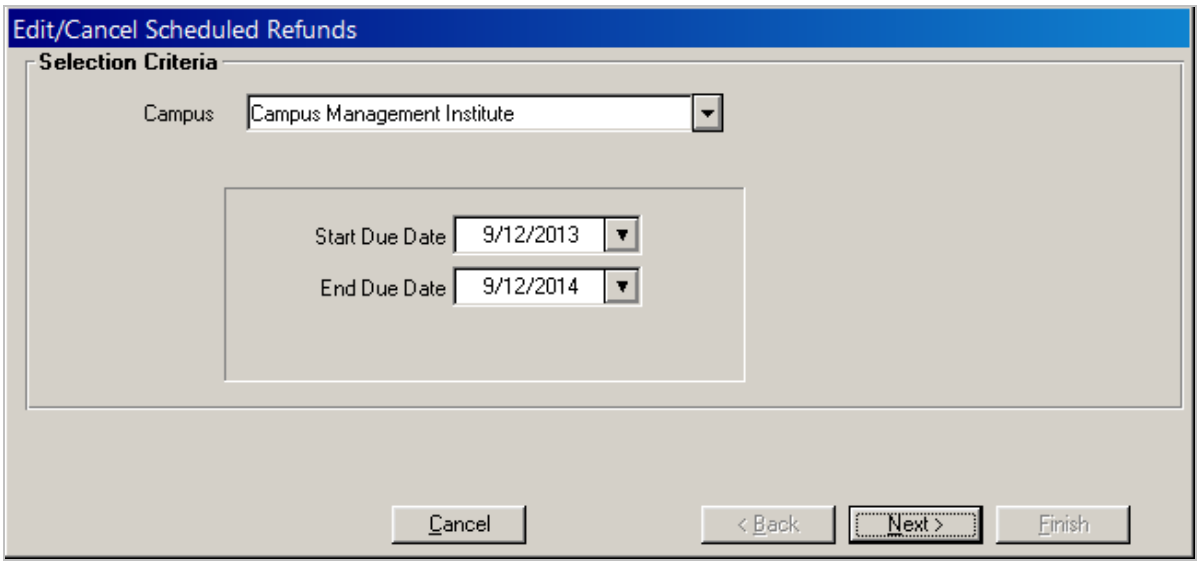
The scheduled refunds listed in this form are disabled if you do not have *Edit Scheduled Refund* permissions.

- The *Edit Payee* button is disabled if you do not have *Edit Payee on Scheduled Refund* permissions.
- The *Delete Refund* button is disabled if you do not have *Delete Schedule Refund* permissions.

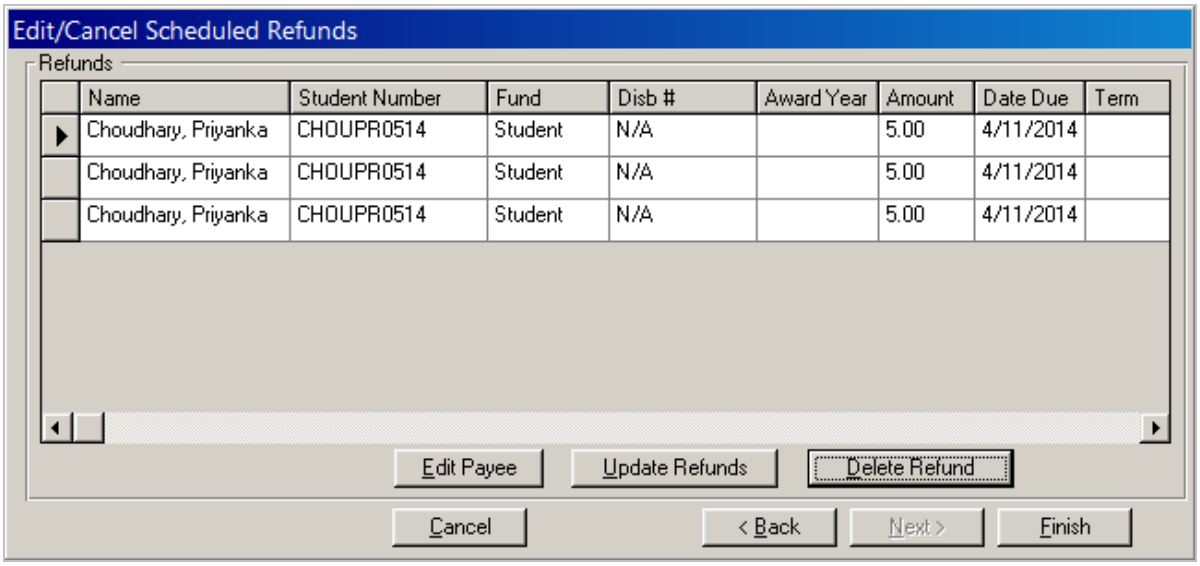
To edit or cancel scheduled refunds:

Note: Since there are several places to access refunds and stipends in CampusNexus Student, multiple users might try to change one record at the same time. To prevent conflicts, CampusNexus Student locks the record being updated. If another user tries to access the record, a message indicates that the record is locked along with the name of the user. The lock is released when the user closes the form. In certain scenarios, a system administrator may need to clear a locked stipend or refund record. For more information, see Unlock Refunds/Stipends.

1. Navigate to **Daily** > **Student Accounts** > **Edit/Cancel Scheduled Refunds**. The first page of the Edit/Cancel Scheduled Refunds wizard is displayed.



2. Select the **Campus** for which you want to edit or cancel refunds.
3. Select the **Start Due Date** and **End Due Date**.
4. Click **Next >** to continue. The second page displays all refunds that are scheduled for the Campus within the selected Due Date. Scroll to the right to see all columns of the grid.



Note: The combo box in the **Pmt Period** column is available for enrollments with program versions that can use payment periods (program versions with academic calendars 1, 5, and 6). The grid contains a visible column for Payment Period and a hidden column for Academic Year. The availability of the Payment Period combo box depends on the Academic Calendar of the current row. If the Academic Calendar on the selected row is not 1, 5, or 6, the control is locked. If there are no records for a given student, the column is disabled. The notation for Payment Periods is `AY<n>|PP<m>` where `<n>` is the academic year sequence number and `<m>` is the payment period sequence number.

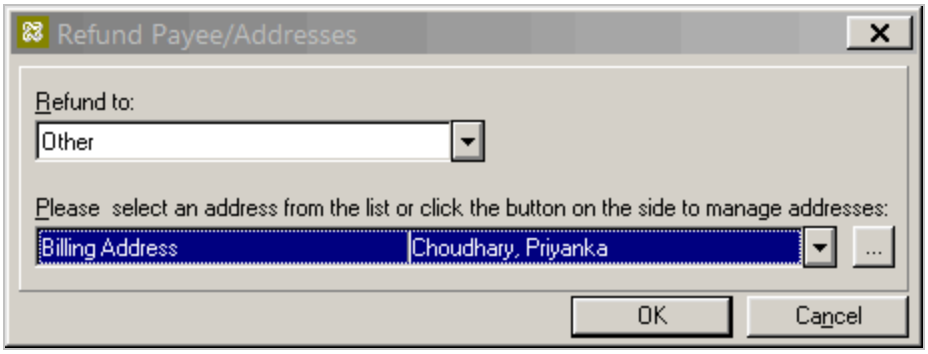
The Action Date is populated only for Direct Loans as Fund Source, and is calculated based on date of the disbursement + 120 days.

5. You can edit the **Amount**, **Due Date**, and **Return Method** of records in the grid.

   The available return methods are Net, EFT, Check, or Master Check. If the fund source is Student, the only return method available is Check.

6. Click **Update Refunds** and click **OK** on the confirmation message.

7. Click **Edit Payee** if you want to change the payee/address. Select appropriate values and click **OK** and confirm the change.



8. To remove the refund from the list, select a row, and click **Delete Refund**. A confirmation message is displayed. Click **Yes** to proceed.

9. Click **Finish** to complete the changes and update the affected tables.

Audit Features

The audit features for Student Accounts include:

- CampusNexus Student stores the name of the payee on each refund record, stipend record, and subsidiary refund so that it can be retrieved for reporting purposes.
- CampusNexus Student audits changes to the payee for refunds and stipends. Auditing occurs from the time the refund or stipend is scheduled to the time the refund or stipend is processed. The date changed, time changed, and the user who made the change are audited.
- Payee changes are audited for subsidiaries.
- Payee information for a stipend can be edited regardless of the fund source associated with the stipend. The payee changes are audited for all stipends.
- Your ability to edit a payee for a refund is dependent on the fund source associated with the refund. The payee changes are audited only for the fund sources that allow the payee to be changed.
- You can sort on different columns of the grids available in the Process Refunds/Stipends wizard.
- A student account administrator can define that the Reference information is printed on the check, below the address, or on the stub, or in both places.
- A student account administrator can view the ID of the user who scheduled the refund/stipend using the Ledger Card, Transaction Detail button.
- CampusNexus Student stores the user ID of the user who scheduled the stipend so that it does not get overwritten by the user ID of the user who posted the stipend.

Process Refunds/Stipends

The Process Refund/Stipend wizard is used to process scheduled refunds, stipends, and subsidiaries.

- Refunds are monies returned to government agencies and private agencies when a student is in school for a shorter time than the expected period for which the student is receiving a grant or loan.
- Stipends are monies from financial aid fund sources to the student to help with the living expenses related to attending an institution.
- Subsidiaries are monies designated for miscellaneous expenses such as meal plans, housing, parking, and so. These expenses are tracked on the subsidiary ledger.

Refund and stipend transactions are recorded on the student ledger. Refunds and stipends may be processed through the Automated Clearinghouse (ACH) if the campus is set up for ACH and the student elects Direct Deposit. Subsidiaries are transactions separate from the student ledger, such as housing deposits.

Integration with an Accounting System

If your CampusNexus Student system is integrated with an accounting system, please refer to Release to Integrated Accounting System for information on processing refunds, stipends, and subsidiaries.

Integration with CampusNexus Finance, HR & Payroll

When CampusNexus Finance, HR & Payroll is integrated with CampusNexus Student, the following applies:

- The check printing functionality for refunds, stipends, and subsidiaries is disabled in CampusNexus Student. For more information, see Stipend and Refund Check Printing (CampusNexus Finance, HR & Payroll).
- Negative amounts cannot be entered when payments or refunds are created or edited in CampusNexus Student.
- For the EFT or Net return methods for refunds and stipends such as grants, loans, or student payments that are scheduled (see To process scheduled stipends, refunds, or subsidiaries) or posted directly (see Post Individual Refunds and Post Individual Stipends).
    - CampusNexus Student disregards that the return method of Net uses check number 0 for stipends and refunds. A check number must be specified for individual stipends and refunds.
    - CampusNexus Finance, HR & Payroll does not treat the return as a pending check.
    - The return is posted to the A/R balance in CampusNexus Finance, HR & Payroll as soon as it is processed.
    - When a refund or stipend transaction with the return type of Net is released from CampusNexus Student, CampusNexus Finance, HR & Payroll creates the related vouchers, shows the transaction on the student ledger and under the bank against which the transaction was processed.
    - The payment method cannot be changed by a user in CampusNexus Finance, HR & Payroll.

      Note: CampusNexus Finance, HR & Payroll provides payment methods mapping for payments and disbursements in Accounts Receivable (AR). The mapped payment methods include:
        - Cash
        - Check
        - Credit Card
        - EFT

- Non-Cash
- ACH

For transactions which do not have a payment method mapping in CampusNexus Student, errors are displayed during Release to General Ledger (GL). Unmapped transactions are not created in CampusNexus Finance, HR & Payroll. The exceptions are logged in CampusNexus Student and in CampusNexus Finance, HR & Payroll. Users cannot remove or change the payment method mapping in the Setup screen if there are transactions marked for posting that correspond to that payment method.

CampusNexus Finance, HR & Payroll supports the integration of ACH and Credit Card Transactions from CampusNexus Student to CampusNexus Finance, HR & Payroll. ACH and Credit Card transactions created in CampusNexus Student will appear in CampusNexus Finance, HR & Payroll.

CampusNexus Finance, HR & Payroll enables you to print checks with a breakup of the check stub details. If multiple checks are identified in the print job, each check and its breakup can be printed separately.

The check stub details are printed in a tabular format containing the following columns:

- Check stub line number
- Student ID
- Student full name
- SSN (see **Note***)
- Fund source
- Amount

Note*: The social security number (SSN) field is shared when CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll. Permission is required to view the SSN in CampusNexus Finance, HR & Payroll. A user without view permission for the Personal Identification form cannot print a check stub with SSN. The SSN cannot be edited in CampusNexus Student.

A check box in the Report Parameter/Report Dialog window determines if the SSN is used for check stub printing. A user without permission to view SSN cannot print a check stub with SSN.

CampusNexus Finance, HR & Payroll supports mass printing of pending checks. You can select multiple transactions and print multiple checks all together in one batch. You can also group checks to generate a single check for multiple transactions to be paid to the same payee. Be careful to select and include only those transactions that belong to the same bank. Also note that 'Printer' as a destination is not supported with batch processing of checks.

When CampusNexus Student is configured to use the GL/AP Package 'CampusNexus Finance' (Setup > Student Accounts > General (tab)), the Return method of 'Master Check' is no longer available for Refund transactions (View > Student Accounts > Ledger Cards > Post Refunds); however, users, can create one check for multiple transactions for the same payee.

Since the Return method of 'Master Check' is not available when the systems are integrated, Master check transactions and voids of Master checks are not released to CampusNexus Finance, HR & Payroll. Users who have existing Master check transactions, need to void the Master checks in CampusNexus Student and create check transactions.

Refund Checks

After refund calculations are made and approved, refund checks need to be printed. CampusNexus Student can print the checks and post the transactions to the student's ledger cards. Two laser-printed check formats are available; stub-check-stub and check-stub-stub. Checks cannot be printed on continuous forms at this time.

CampusNexus Student updates the direct loan disbursement file when a batch of FA refunds is posted to student's ledger card using the Print Refund/Stipend Checks option. Each refund that is posted to a student's ledger card is reported to Common Origination and Disbursement (COD). The logic will apply only if you are printing refund checks, not stipend checks. The logic below will be executed as part of the table updates when you click the Post Checks button on the Print Checks form.

For each refund check being printed, CampusNexus Student determines if a row should be added to the direct loan disbursement table. A row is added to the table if the all of the following conditions are met:

- The fund source type of the refund is DIRSUB, DIRUNSUB, or DIRPLUS.
- The Use Direct Loan flag is set to true for the student's campus.

- A row exists in the FA Loan table where the Student Aid ID equals the ID for the FA for which the refund check is being printed.

If Auto create Loan Period Orig. Changes when student Withdraws or Refund is posted? is activated, an origination change is created for the following reasons during the posting of the refund:

- An origination change record is created to reduce the Award Amount to exclude the gross amount of the refund posted.
- For a fully refunded disbursement, an origination change record is created to exclude that disbursement's payment period from the Loan Period, if the disbursement is in a payment period after the initial payment period on the loan.

If there are pending origination changes for the Award Amount or Loan Period End Date that haven't yet been sent to COD, they will be updated to with the corresponding information from the posted refund record.

When the refund checks have been printed, the refund transactions appear in the payments column of the student Ledger Card.

Refer to the instructions on processing scheduled refunds and printing refund checks. For information about posting individual refunds, see Post Individual Refunds.

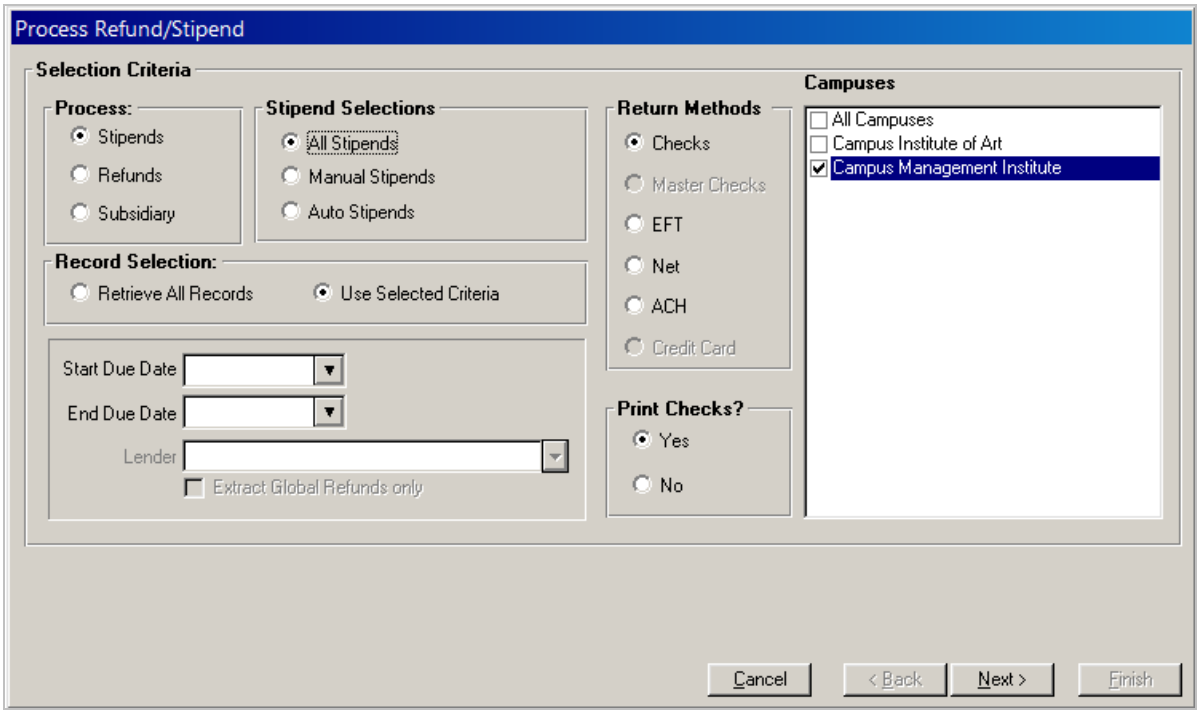
Stipend Checks

Periodically, the Student Accounts department needs to post stipend disbursements to students who are receiving financial aid. Refer to the instructions on processing scheduled stipends and printing stipend checks. For information about posting individual stipends, see Post Individual Stipends.

Note: Stipend schedules are cancelled when a student's status is changed to Drop. When the stipend schedule is cancelled, you can no longer post stipend disbursements to the ledger card.

To process scheduled stipends, refunds, or subsidiaries:

1. Navigate to **Daily** > **Student Accounts** > **Process Refunds/Stipends**. The Process Refund/Stipend wizard is displayed.



2. In the Process section, select **Stipends**, **Refunds**, or **Subsidiary**.

3. If you selected Stipends, in the Stipend Selections area, select **All Stipends**, **Manual Stipends**, or **Auto Stipends**.
4. In the Record Selection area, select **Retrieve All Records** or **Use Selected Criteria**.
    - If you selected Stipends and Use Selected Criteria, the Start Due Date and End Due Date fields are enabled. Specify applicable dates.
    - If you selected Refunds and Use Selected Criteria, the Start Due Date, End Due Date, Lender, and Extract Global Refunds only fields are enabled. Specify the applicable dates and lender. Select **Extract Global Refunds only** if, when a refund is due to SFA, Global shall be notified by CampusNexus Student.
5. In the Return Methods area, select an appropriate option:
    - **Checks** - generates one check for each student.
    - **Master Checks** - indicates that one check is issued to each financial institution for all students associated with that institution.
    - **EFT** (Electronic Funds Transfer) - indicates that the refund is sent to the financial institution electronically.
    - **Net** - designates that the process of returning the funds is handled in the draw down process for the Title IV fund.
    - **ACH** - is available only for students who have elected direct deposit of refunds/stipends directly to their accounts.
    - **Credit Card** - is available for refunds only.

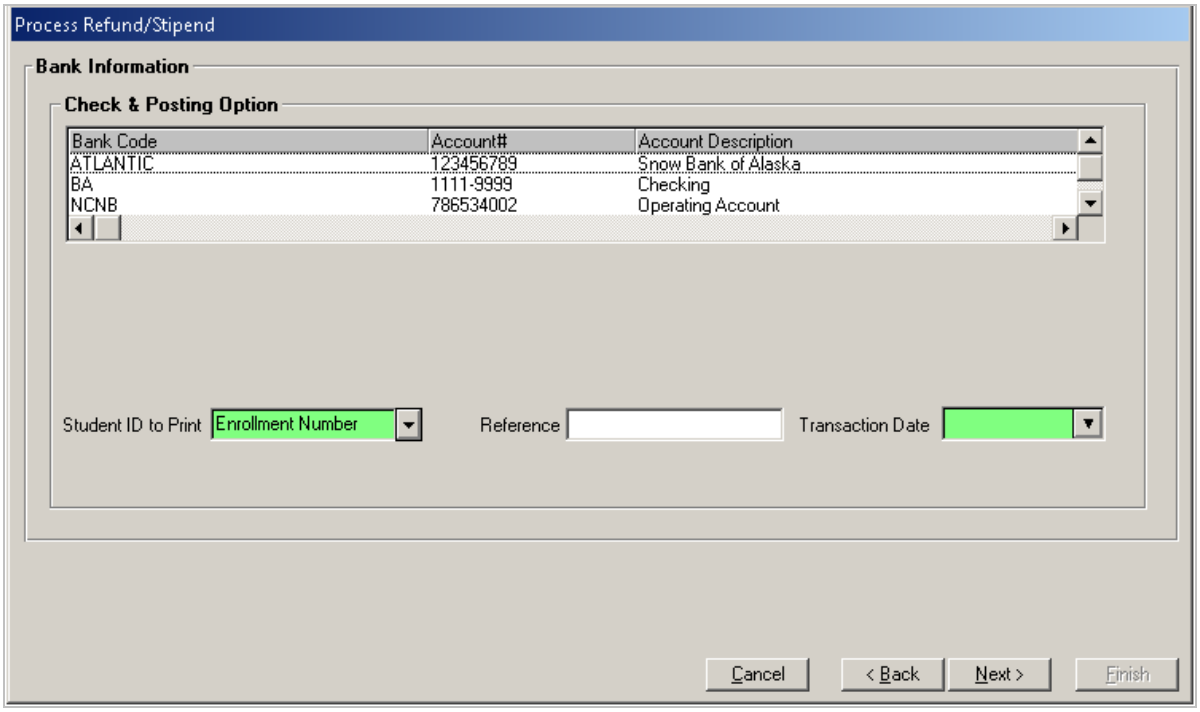
    Checks, EFT, Net, and ACH are enabled for stipends.
    Checks, Master Checks, EFT, Net, ACH, and Credit Card are enabled for refunds.
    Checks, Master Checks, EFT, and Net, are enabled for subsidiaries.

    Note: If a student is being issued more than one stipend, all stipends are consolidated into one check. This rule applies to stipends only; not refunds.
6. In the Print Checks? area, select **Yes** to print checks.

    Select **No** if you post the refunds or stipends in CampusNexus Student and print the checks in some other system such as an Accounts Payable program. This option becomes available if you selected Checks or Master Checks as a return method.

    All checks must pass validation before they are printed, and an exception message is displayed for each check that is not validated. You can access Exception Processing to resolve the issues associated with each check. To learn more about processing checks that fail validation, see Exception Processing Overview.

    Note: When CampusNexus Finance, HR & Payroll is integrated with CampusNexus Student, the check printing functionality for refunds, stipends, and subsidiaries is disabled in CampusNexus Student. For more information, see Stipend and Refund Check Printing (CampusNexus Finance, HR & Payroll).
7. Select appropriate **Campuses**.
8. Click **Next >** to proceed. All processes, except ACH, return the following Bank Information form:



9. Select a **Bank Account**.
10. Select a **Student ID to Print**. The options are Enrollment Number, SSN, Student ID, and None.

    Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.
11. For Master Checks, specify a **Reference** number. The Reference field is optional for other Return Methods.
12. Select the **Transaction Date**.
13. Click **Next>**. Stipend or refund transaction records are displayed.

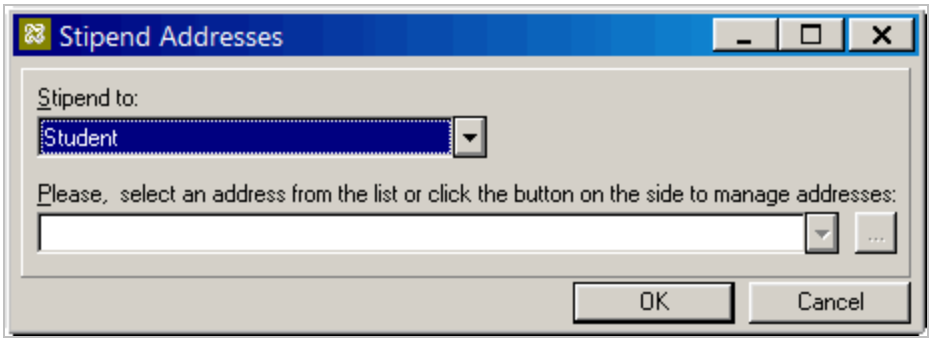
    Note: The notation in the Payment Periods (Pmt Per) column is: `AY<n>|PP<m>` where `<n>` is the academic year sequence number and `<m>` is the payment period sequence number.

    The records are filtered based on your fund source permissions. For example, refunds listed represent the refunds for the fund sources for which you have *Post Refund* permissions.

    Your permission also determine which functions are enabled on the form:

    - The Edit Payee button is enabled if you have Edit Payee on Scheduled Refund or Edit Payee on Scheduled Stipend permissions. When you click **Edit Payee**, the Refund Payee/Addresses, Stipend Addresses, or Subsidiary Payee/Addresses form is displayed depending on the process you selected. You can select the payee and the associated address.

      When refund checks are printed, if the refund is due to a fund source other than the student, CampusNexus Student uses the lender description as the payee on the check. Previously, CampusNexus Student used the student's name as the payee.



- The Delete Stipend button is enabled if you have Delete Scheduled Stipend permissions. Select a record and click **Delete Stipend**. Click **OK** to remove the scheduled stipend from the grid. The scheduled stipend record will still appear in the Student Stipend Schedule form.
- The Return Method fields can be modified if you have Edit Scheduled Refund or Edit Scheduled Stipend permissions.

14. Select the **Pay** check box to mark a transaction for payment. **Check All** selects all Pay check boxes for transactions which are eligible for payment. **Uncheck All** clears all Pay check boxes.

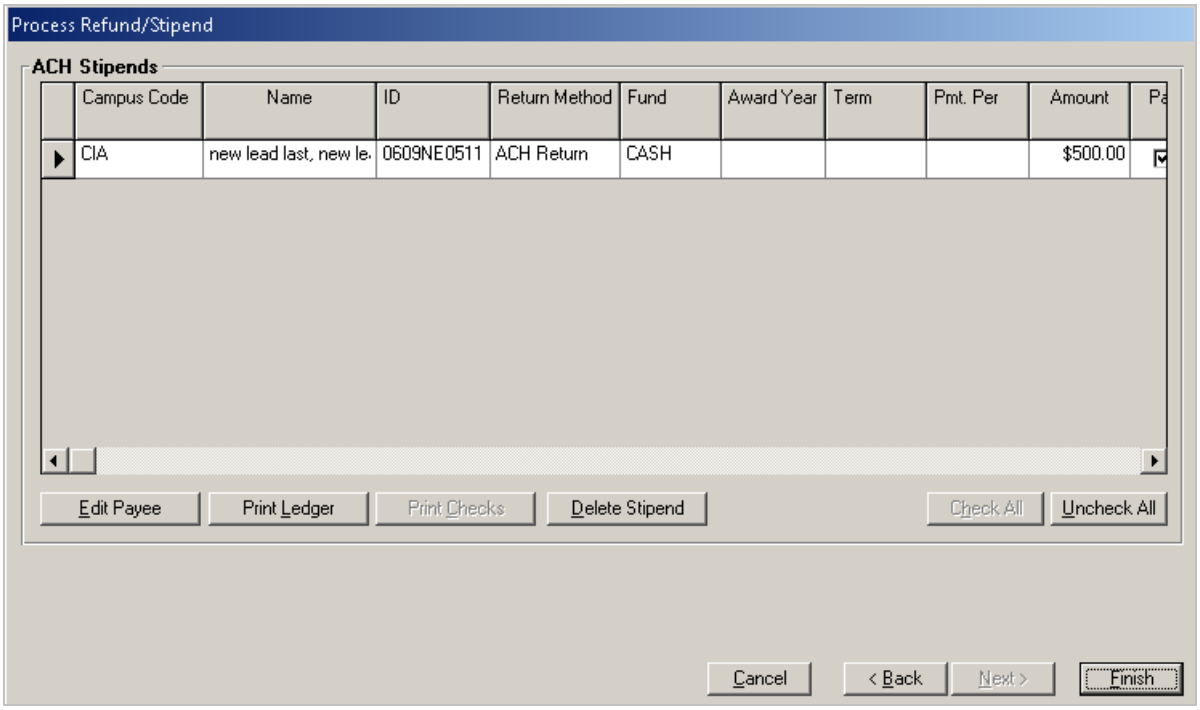
    If you select a fund source that has been deactivated, the Pay check box is cleared, you may not select the Pay field, you cannot process the refund, and a message in red indicates that the fund source has been deactivated.

    The following images show Process Refund/Stipend forms for different return methods for refunds and stipends:

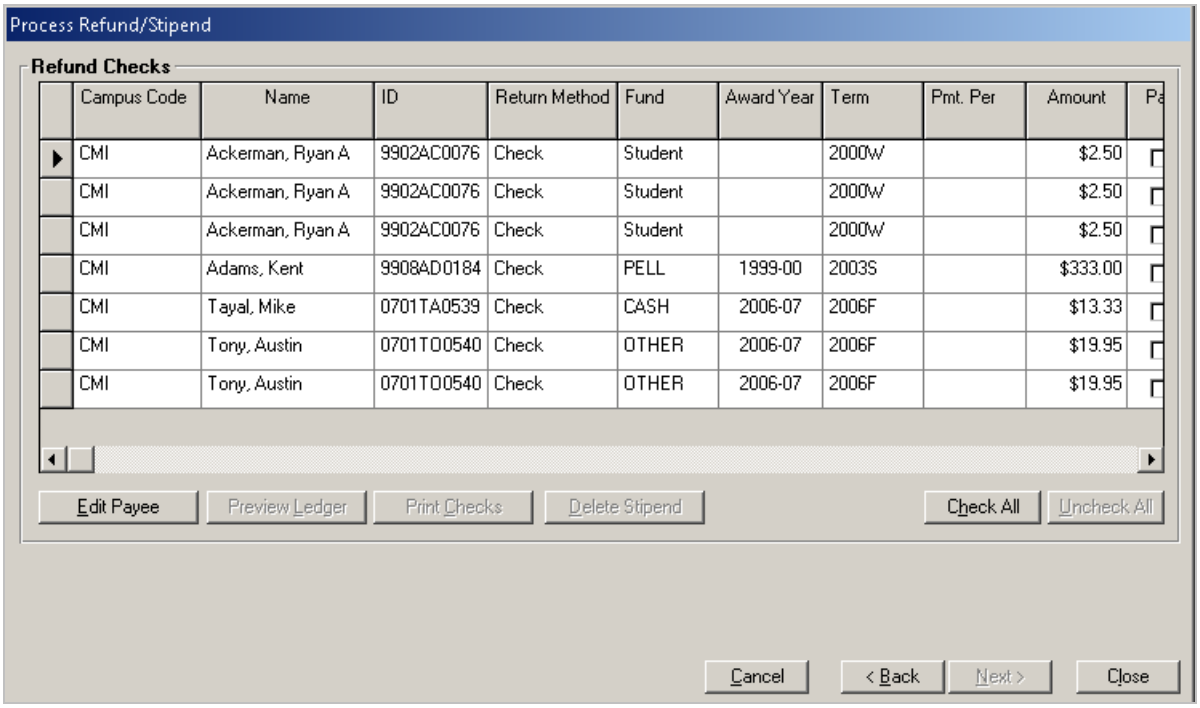
    ACH Refund

    The Delete Stipend and Print Checks buttons are disabled since they do not apply to refunds processed through ACH.

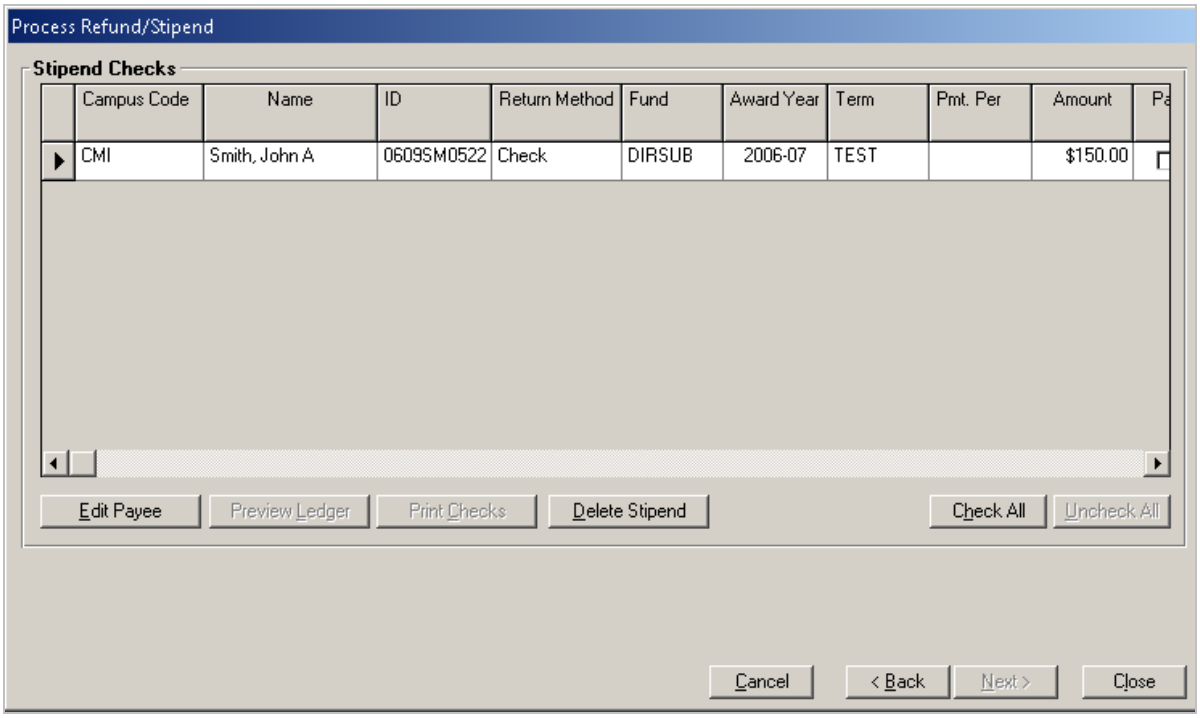
ACH Stipends



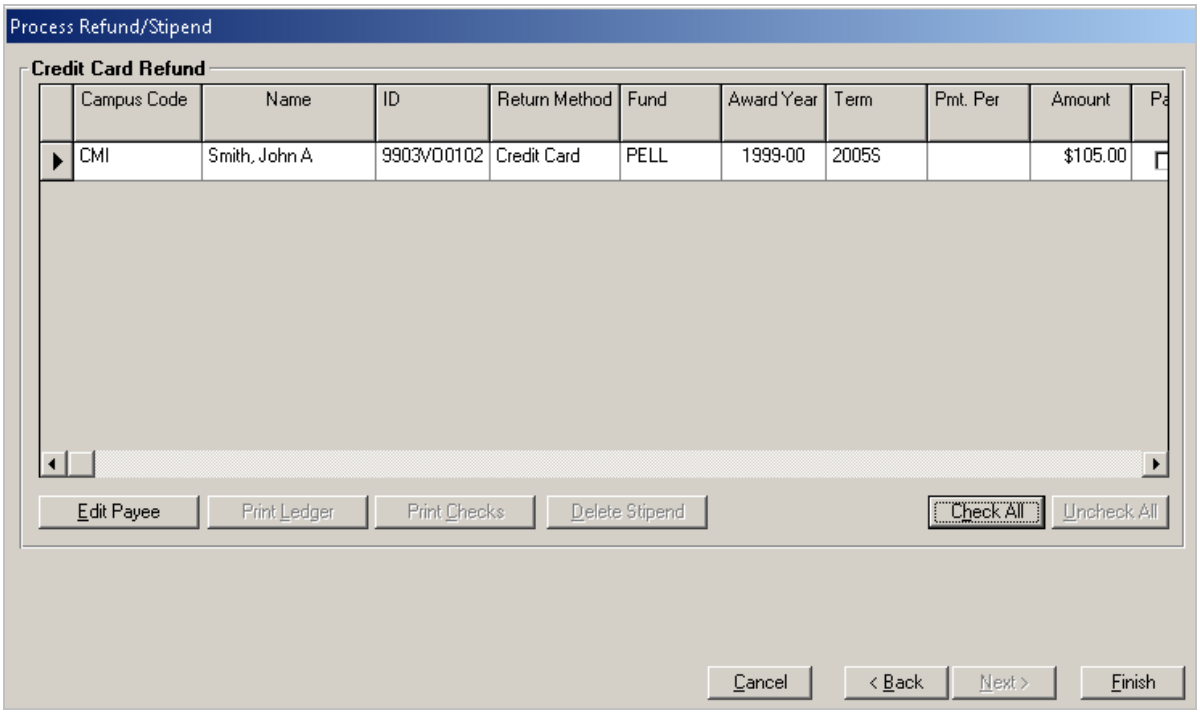
Refund Checks



Stipend Checks



Credit Card Refund



EFT or Net Stipends

Stipends selected for processing with EFT or Net return methods are picked up for processing as normal within the Process Refund/Stipend wizard. When the process is completed, the stipends are posted to the ledger card with

the corresponding return method on the transaction. Stipend processes with EFT or Net return methods do not include check printing or any functionality other than posting to the ledger card.

15. Click **Print Ledger** to view the Stipend/Refund Check Register report. The report shows details of all payments associated with a particular bank account.

    The following form is displayed for return methods other than ACH.

Student Name	Student ID	Payable To	Amount Paid	Check Date	Check #
Campus Management Institute					
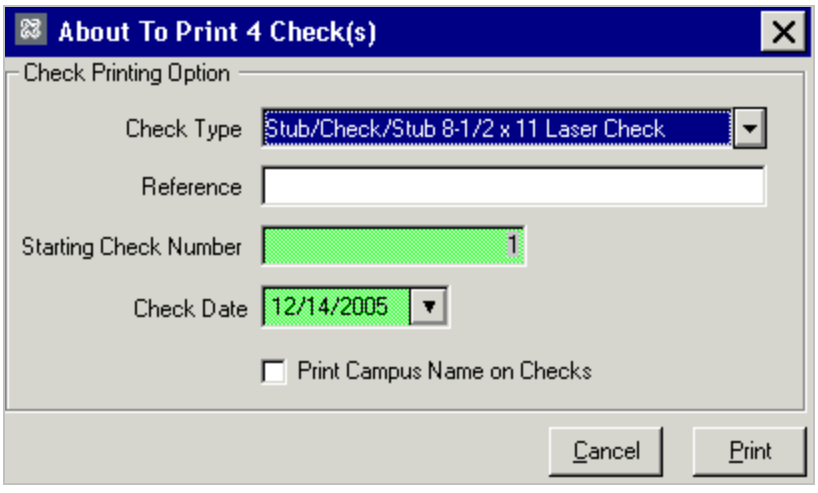
Smith, John A	9903VO0101	Smith, John A	200.00		ACH Return
		Total for Smith, John A	**$200.00**		
Total for Campus Management Institute			**$200.00**		
		Total Amount Paid	**$200.00**		

Note: The checks are printed on your default report printer. Load the checks in the printer before clicking Print Checks. Do not forget to remove the remaining checks from the printer before printing the register.

16. Click **Print Checks**. The About to Print <n> Check(s) form is displayed.

Note: This button is not available when processing ACH refunds or stipends.



Notice that the About to Print 4 Check(s) header indicates that four checks will be printed when you select the Print Campus Names on Checks check box. Verify that the number of checks indicated in the header is correct before proceeding.

a. Select the **Check Type**.

b. Enter a **Reference** number associated with the check.

c. Enter a **Starting Check Number**. For example, enter a '1' in this field to print check number 1, 2, 3, 4 when

four checks are about to be printed.

d. Select a **Check Date**.

e. Select the **Print Campus Name on Checks** to have the Campus Name appear on the check.

f. Click **Print** to continue or **Cancel** to discontinue processing.

17. Confirm whether the checks printed correctly.

18. Click **Post Checks**. CampusNexus Student posts the checks to the student's ledger cards and displays a confirmation message when the posting is complete. Click **OK** to acknowledge the message.

    Note: CampusNexus Student posts a stipend disbursement to the student's ledger card as a debit in the form of a negative payment. Given that financial aid has been received, or at least expected, in advance of the stipend disbursement, most likely there will be a credit balance in the student's account against which the disbursement will be applied.

19. For ACH processing, click **Finish**. A confirmation message is displayed when the refunds or stipends are scheduled and ready to be exported.

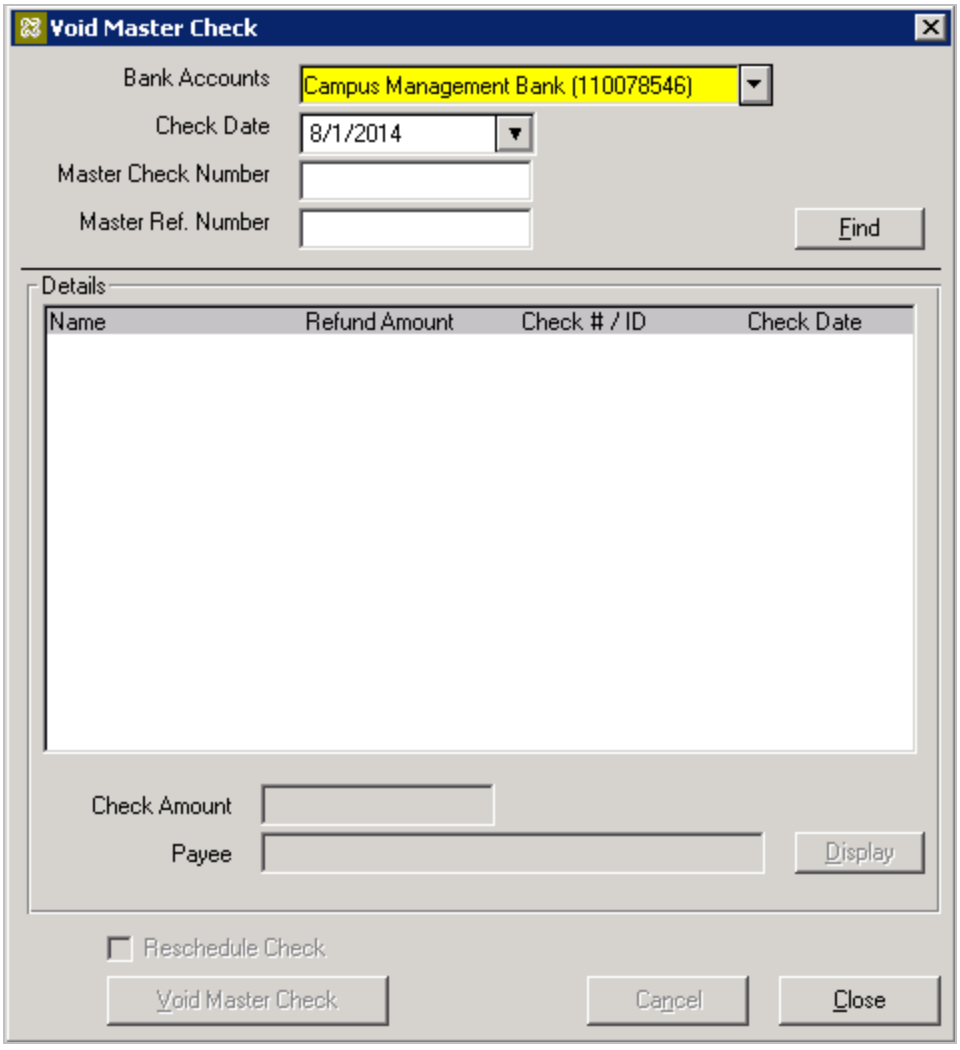
Void/Reschedule Master Checks

A staff member who has Void Paid Refund/Stipend and Schedule Refund/Stipend permissions can void or reschedule master checks for a fund source.

Note: When CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll, the Void/Reschedule Master Checks option is disabled.

To void or reschedule a master check:

1. Navigate to **Daily > Student Accounts > Void/Reschedule Master Checks**. The Void Master Check form is displayed.



2. Select the **Bank Account**.
3. Select the **Check Date**.
4. Click **Find**. CampusNexus Student displays paid refunds/stipends for the fund source for which you have Void Paid Refund/Stipend permissions.
5. Specify the **Master Check Number**. The form lists the students and refund/stipend amounts for each student.

6. Select **Reschedule Check** to reschedule the refunds/stipends associated with the master check.

   This option requires Schedule Refund/Stipend permissions for the fund source, .

7. Click **Void Master Check** to void the entire master check and cancel the refunds associated with the master check, or **Cancel** to discard the changes.

   This option requires Schedule Refund/Stipend permissions for the fund source.

Process Electronic Drafts

CampusNexus Student enables institutions to process credit cards and electronic drafts through an Automated Clearing House (ACH). Prerequisites for using this feature are:

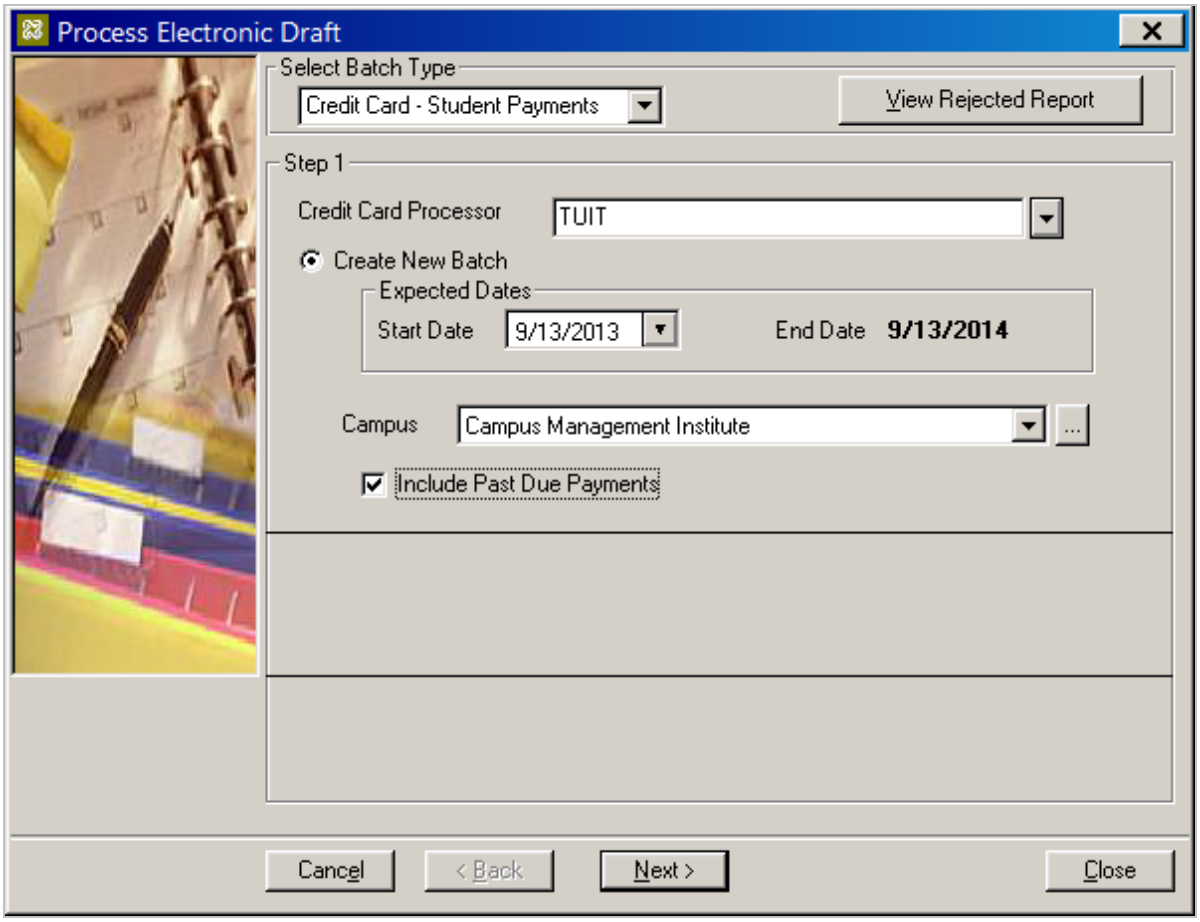
- The user must have appropriate permissions to process electronic drafts.
- The institution must have a relationship with a credit card processing company, such as VeriSign.
- The feature must be configured in the Credit Card Batch Setup.

To process (send) electronic drafts:

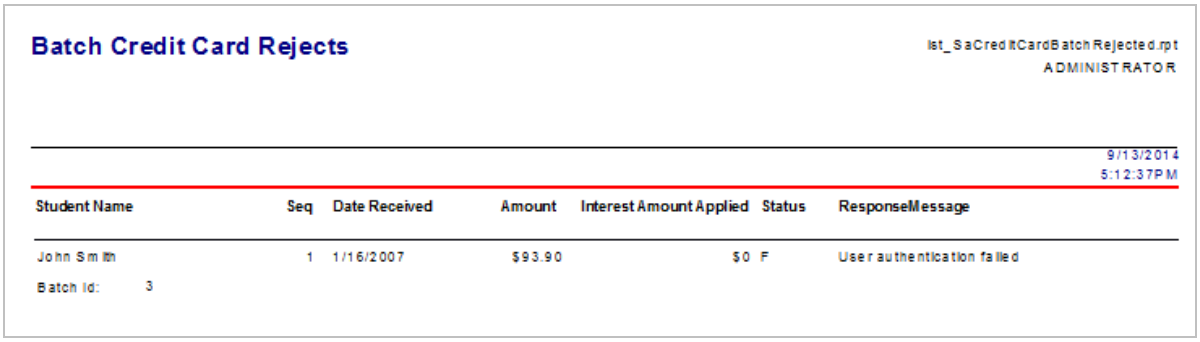
1. Navigate to **Daily > Student Accounts > Process Electronic Draft**. Step 1 of the Process Electronic Draft wizard is displayed.
2. Select a **Batch Type**. The options are:

   - Credit Card - Refunds
   - Credit Card - Student Payments
   - ACH Refunds
   - ACH Stipends
   - ACH Student Payments

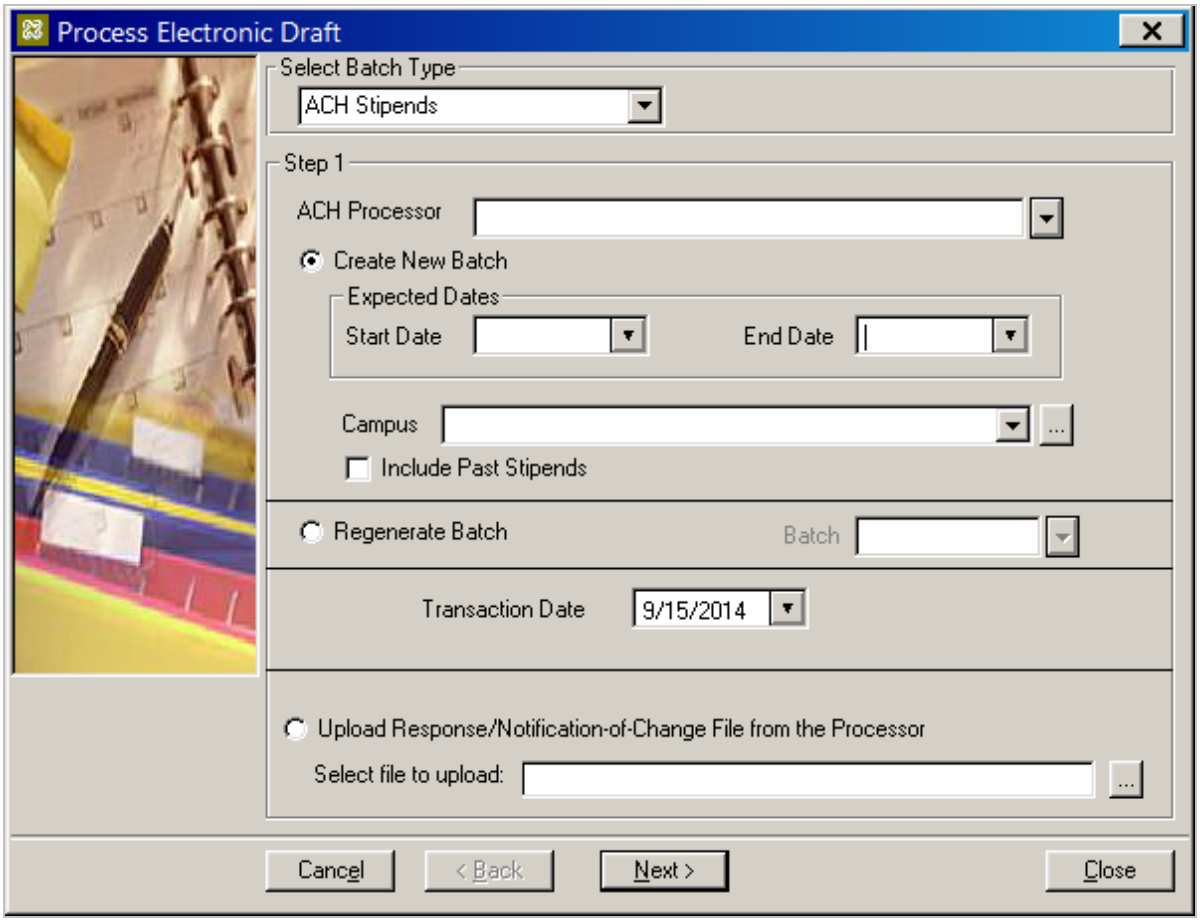
   For *Credit Card - Refunds* and *Credit Card - Student Payments* batch types, select a Credit Card Processor (see e Credit Card Batch Setup).



If the Batch Type you selected is not one of the ACH options, the **View Rejected Report** button is enabled. Click the button to view the report.



For ACH batch types, select an **ACH Processor**. The same ACH Processor can be set up to process payments, refunds, and stipends.



To receive electronic files:

a. Select **Upload Response/Notification-of-Change File from the Processor** to save to a local drive files sent to your institution by the processor. The *Select file to upload* field becomes available. See Response tab, Refund/Stipend tab, and Notif. of Change tab for additional information.

b. Click

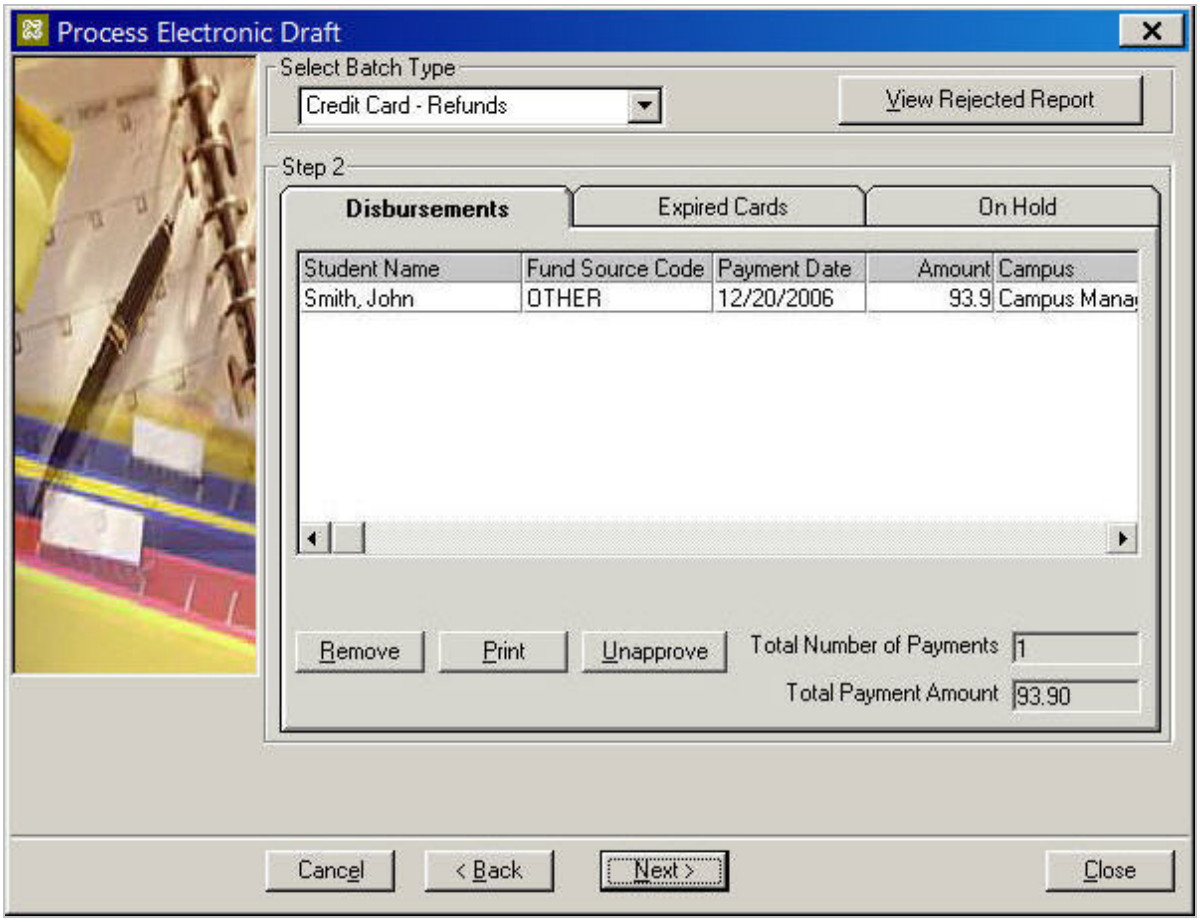
to select the location from which to upload files.

c. Click **Next** and follow the prompts to upload the file.

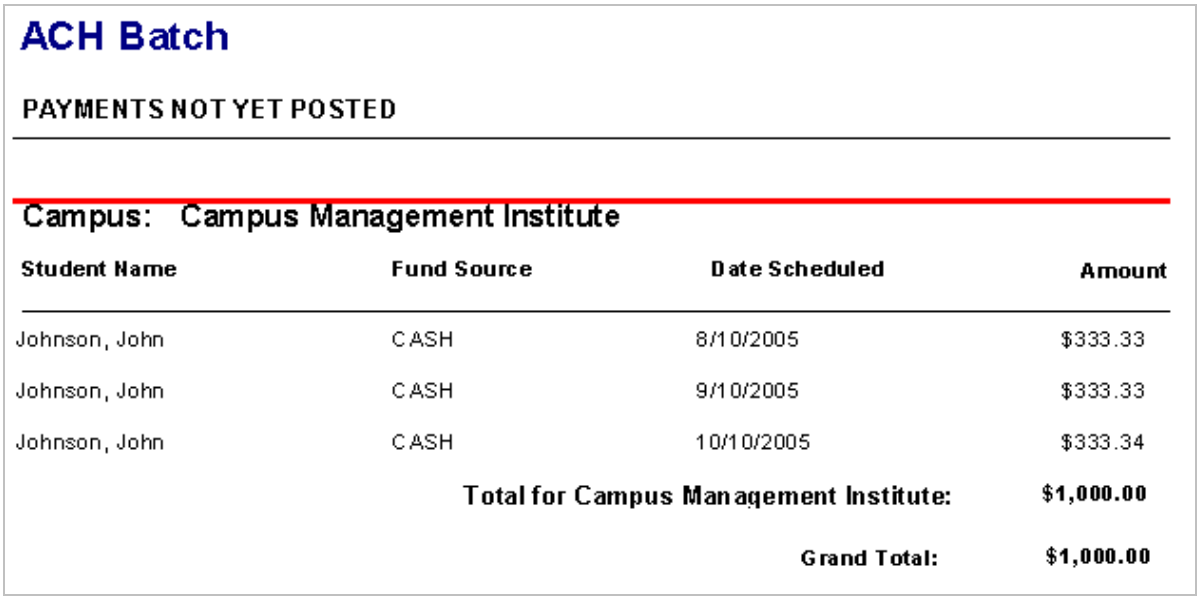
3. Select **Create New Batch**. The fields in the *Expected Dates* section are enabled.
4. Select a **Start Date**. Starting a new batch means that you are gathering all transactions that took place between the *Start Date* and *End Date* for the selected campus and are preparing to send the batch to the ACH for processing. CampusNexus Student populates the *End Date* with today's date.
5. Select a **Campus**. To select multiple campuses, click to the right of the Campus field. Select campuses you want to include in this batch.
6. Select **Include Past Payments/Refunds/Stipends** to include those in the batch.
   - If you selected a student payment options, the field is labeled *Include Past Due Payments*.
   - If you selected ACH Refunds, the field is labeled *Include Past Refunds*.
   - If you selected ACH Stipends, the field is labeled *Include Past Stipends*.
7. To view a batch of transactions previously sent, select **Regenerate Batch**. After a new batch is generated successfully, it appears in the *Batch* list.
8. Select the **Transaction Date**. CampusNexus Student populates this field with today's date. You can choose another date.
9. Click **Next**. Step 2 of the Process Electronic Draft wizard displays a summary of the transactions you are preparing to send, including the total number of payments/refunds/stipends in the batch and the total dollar amount of the payments, refunds, or stipends.

   CampusNexus Student generates an auto stipend, based on its configuration, when any ACH/Credit Card Student Payment is posted using the Process Electronic Drafts form. The trigger to perform the stipend calculation is based on any payment to the student ledger cards.

   - An auto stipend is created for ACH/Credit Card Student Payments only when both the tuition and posted payment are associated with same Payment Period or Term, or when both are not associated with any Payment Period or Term when the Credit Evaluation Time Frame is *Payment Period or Term*. CampusNexus Student first checks on the basis of Payment Period, and if none is found, it checks on the basis of Term.
   - An auto stipend is created for ACH/Credit Card Student Payments as per the auto stipend configuration when the auto stipend is turned ‘ON’ for the campus level.
   - A stipend is created only when the ACH/Credit Card Student Payments are associated with a payment source.
10. To delete the transaction from the batch, select a transaction and click **Remove**.



11. Click **Print** to generate the Batch report. This report is for an ACH Batch.



ACH Batch

PAYMENTS NOT YET POSTED

Campus: Campus Management Institute

Student Name	Fund Source	Date Scheduled	Amount
Johnson, John	CASH	8/10/2005	$333.33
Johnson, John	CASH	9/10/2005	$333.33
Johnson, John	CASH	10/10/2005	$333.34
		Total for Campus Management Institute:	**$1,000.00**
		Grand Total:	**$1,000.00**

12. To unapprove the transaction from the batch, select a transaction, and click **Unapprove**.
13. Click **Next**. Confirm that you want to generate a payment/refund/stipend or credit card transaction batch.

14. Click **Yes** to generate a batch file. A confirmation message indicates that the export file has been created.along with the batch ID number.

    Click **Ok**.

15. To prepare this batch for pickup by your ACH, click **Regenerate Batch**.

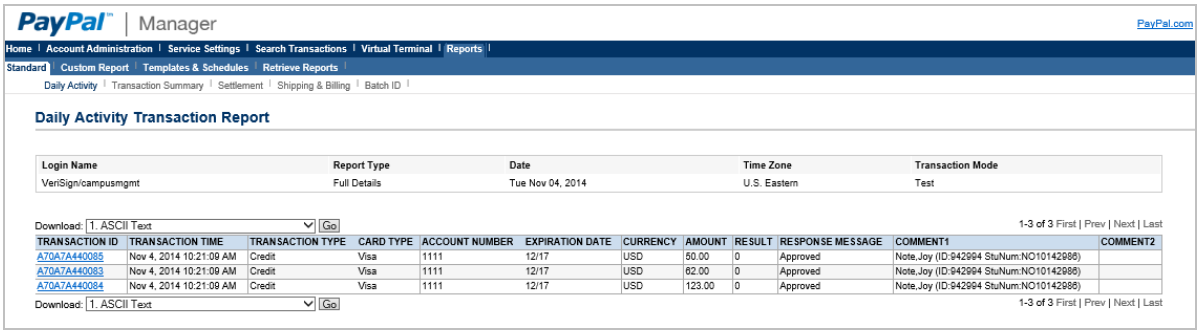
16. The file is sent to the dedicated folder that has been set up by the system administrator and CampusNexus Student for electronic pickup by the ACH for processing accessible via Setup > Student Accounts > Additional (tab) > ACH Setup (button).

17. If you selected *Credit Card - Student Payments* from the Batch Type field, selected a Credit Card Processor, and now want to generate a payment/refund/stipend or credit card transaction batch, confirm that you want to generate credit card transaction batches.

    Click **Yes** to generate the credit card transaction batches.

    A confirmation message is displayed identifying the type of transaction performed with the batch IDs.

As of CampusNexus Student 16.0, batch credit card payments and refunds sent to PayPal include the student name (last name, first name), student number, and student ID in addition to the amount paid. The student information appears in the COMMENT1 field when running the Daily Activity Transaction Report at PayPal Manager.



Process 1098-T (2007 and Prior)

Process your 2007 and previous tax year 1098-T by following the directions in this topic.

Year 2008 and later tax years use the CampusNexus Student 1098-T Processing Utility, which has its own Help system. For detailed information, instructions, and actions to be taken to implement this utility, please contact your Anthology Inc. Account Manager at 561-923-2500, or by email at AM@campusmgmt.com; or, go to our Customer Support Resource Center (CSRC).

2007 and Prior Award Year Processing

The Internal Revenue Service (IRS) requires institutions to file 1098-Ts for each student who meets certain requirements for the Hope credit or qualifies for the lifetime learning credit. From student records, CampusNexus Student determines which students need to be reported on 1098-Ts. The institution must print 1098-Ts to send to the qualified students. The institution can also create an electronic file with 1098-T data to transmit to IRS via the export feature. See also:

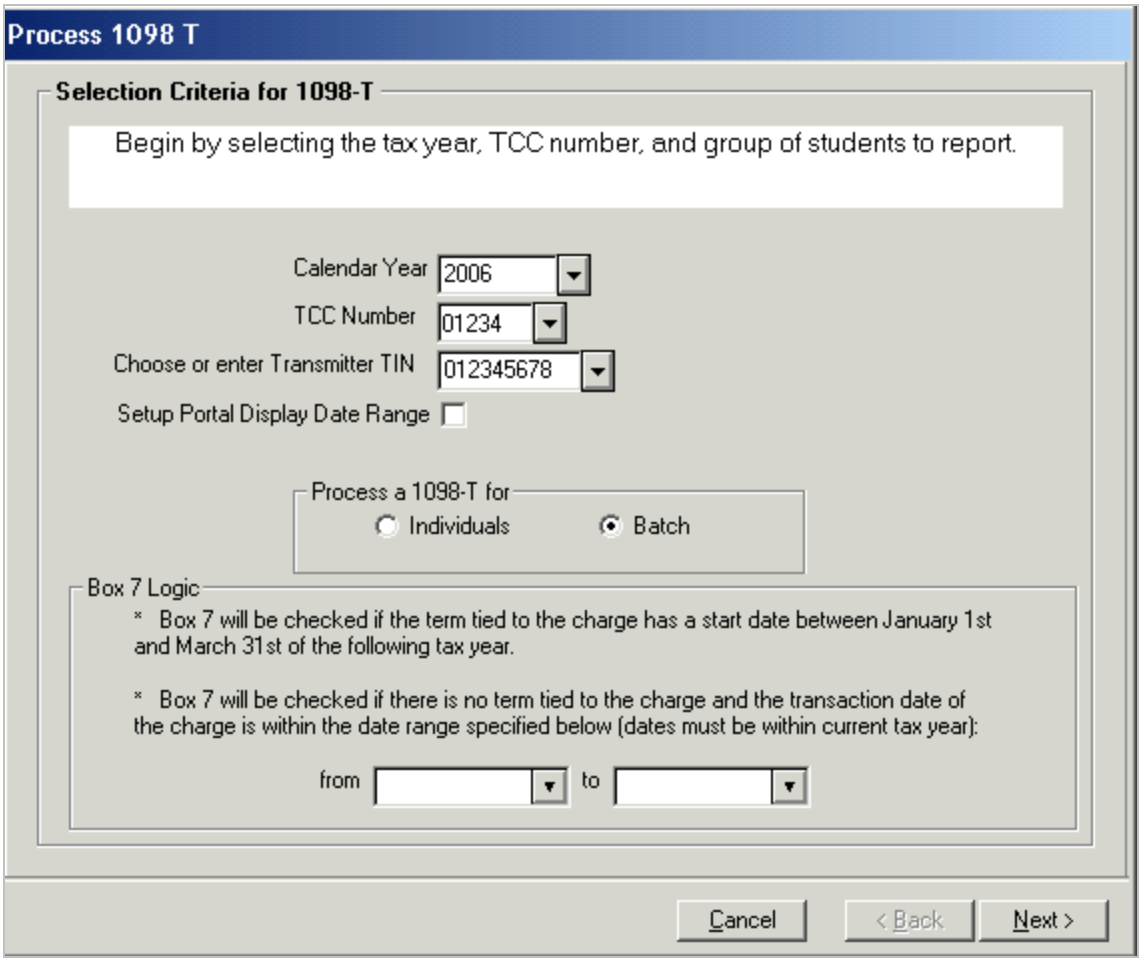
- 1098-T Setup
- Print 1098-Ts
- Export 1098-Ts
- 1098-T Reporting Methods
- 1098-T Summary Report (Select and appropriate option in the **Reports** menu.)
- Citizenship
- Grade Level
- Fund Sources
- Transaction Codes
- Ledger Cards
- IRS Website https://www.irs.gov/instructions/i1098et#d0e238

If your institution uses a third party servicer for processing and mailing 1098-Ts, you do not need to print 1098-T forms. Simply create the export file to send to the servicer.

Before you can print your 1098-Ts, you must obtain the necessary forms. The forms are for a laser printer. Thee forms are required for each student; one for Copy A (IRS), one for Copy B (Student), and one for Copy C (institution/filer).

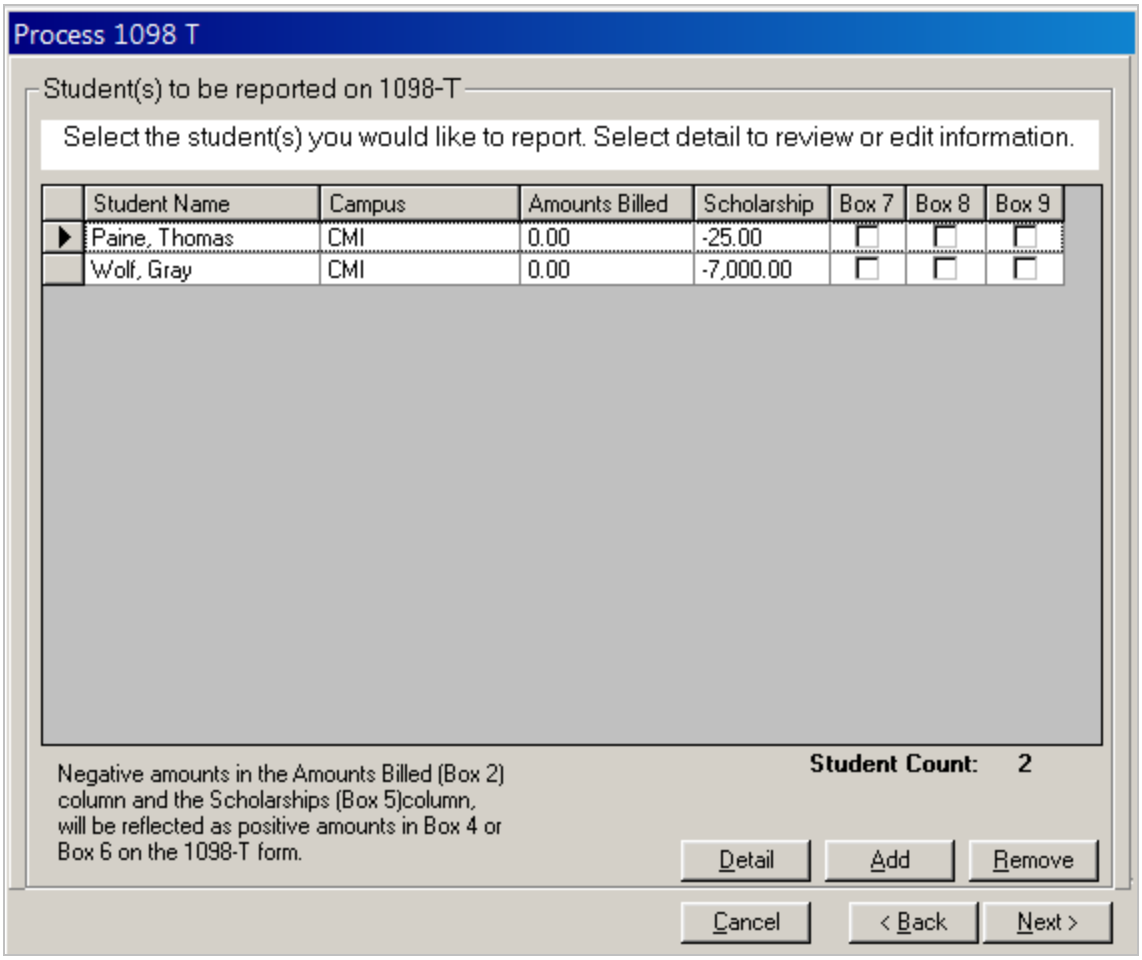
To process 1098-Ts for selected students:

1. Select **Daily** > **Student Accounts** > **Process 1098-Ts**. The Process 1098-T wizard is displayed.



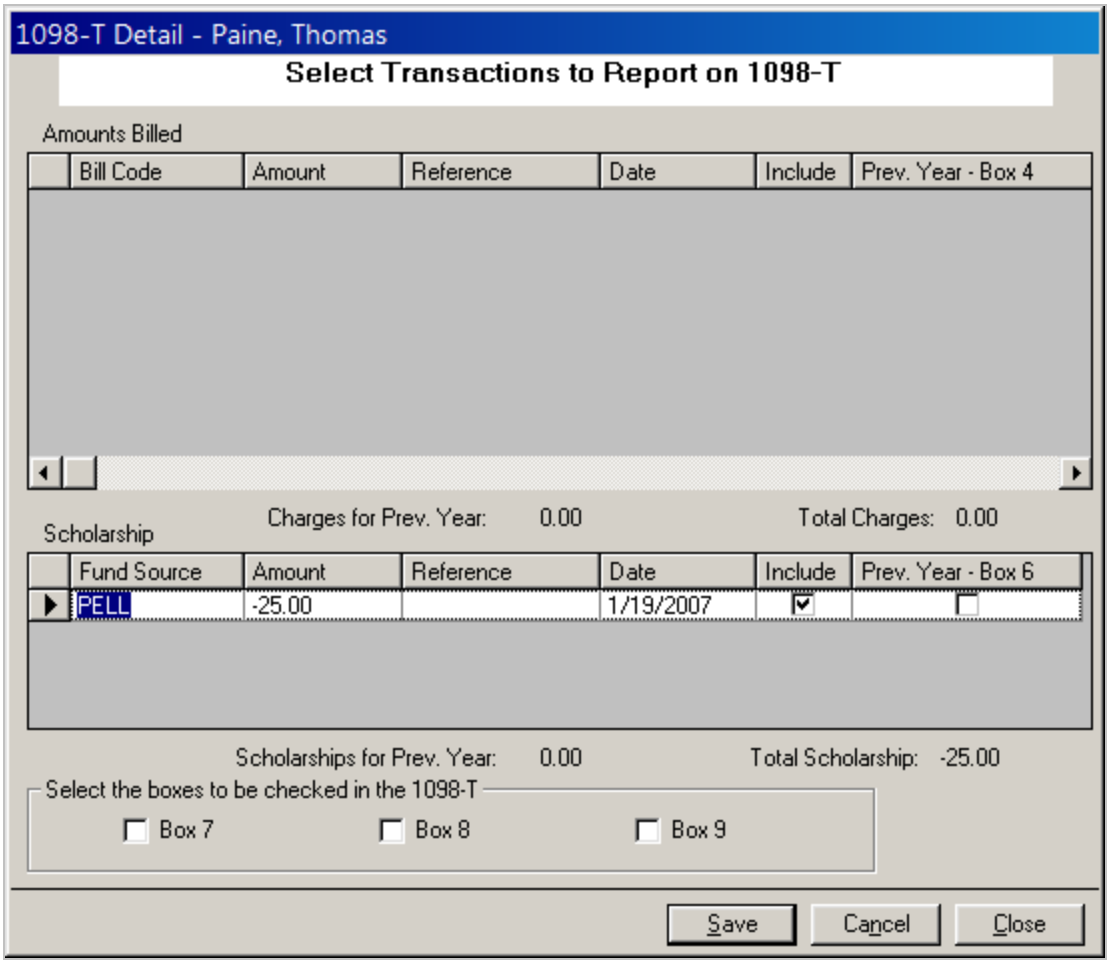
2. Select the **Calendar Year** for which the forms are to be printed.
3. Enter (or select) the **TCC Number** (Transmitter Control Code).
4. Enter (or select) the TIN (Transmitter ID number) in the **Choose or enter Transmitter TIN** field.
5. Select the **Setup Portal Display Date Range** check box if you want students to be able to view their 1098-Ts via Portal.

   When select the check box, two date fields appear. Select the beginning and ending online publish dates. If the dates represent the year following (or later) the student's tax year, they are stored upon completing the Process 1098-T process and retrieved by CampusNexus Student when determining whether to display the 1098-T page to the student through Portal.
6. Choose **Individuals** or **Batch**. If you select the **Individuals** option, and click **Next**, the student Search form is displayed where you can select specific students by name or filtering criteria.
7. To use the Billing Address on the 1098-T, select to include transactions for the current Year (through March), or select a date range.
8. Click **Next**. The students to be reported are listed.



9. Select any student and click **Detail** to view the transactions being reported for the selected student.

   Note: The blue text "Reporting Method Changed" appears if the campus has changed the 1098-T Reporting Method.



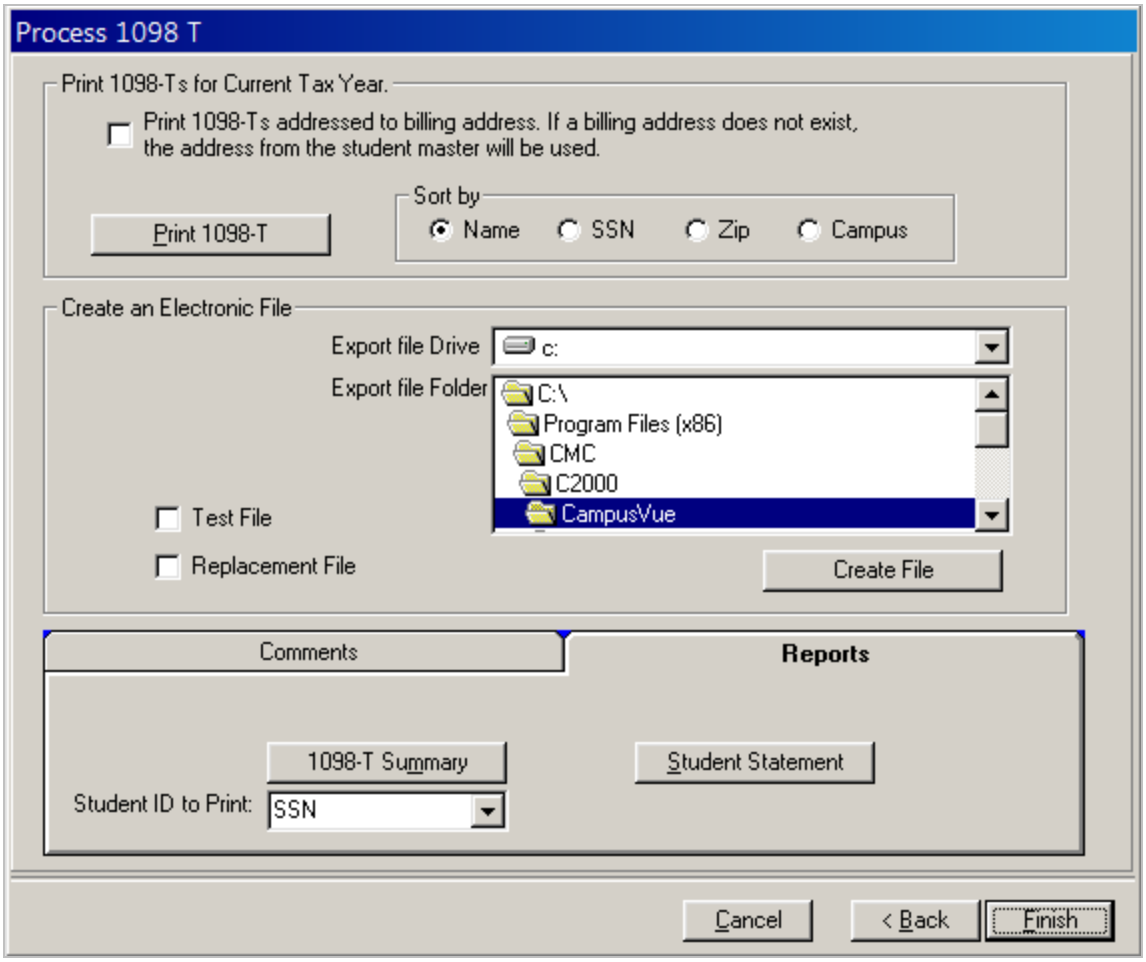
a. To include the transaction in the 1098-T, select the **Include** check box next to the transaction.

b. In the Amounts Billed grid section, you have the option of selected the Previous Year Box 4 (Box 4 on the 1098-T form). Select the check box only if the amount is a negative adjustment or a negative charge and the **Include** column is selected.

c. In the Scholarship grid section, select the Previous Year- Box 6 column (Box 6 on the 1098-T form) only if the amount is negative and the **Include** column is selected.

d. Click **Close** to close the form. You are returned to the Process 1098-T wizard.

10. Click **Next** to proceed. The print options form is displayed.



11. Use this form to print the 1098-Ts for the current tax year or create an electronic file for online processing.

    Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

1098-T Reporting Methods

The 1098-T reporting methods are 'Amounts Billed' and 'Amounts Paid'. Institutions that previously used the 'Amounts Paid' method but wish to use CampusNexus Student for the current year of 1098-T processing, must get permission from the IRS to change their reporting method to 'Amount Billed'. Once this is accomplished, CampusNexus Student may be configured to use this new feature to indicate that the reporting method has changed. If this is the case, CampusNexus Student places a check mark in Box 3 of the processed 1098-T forms.

Print 1098-Ts

To print 1098-Ts:

1. Run the Process 1098-T wizard as described above and select appropriate options. If the billing address is to be used to address the 1098-T forms, enable the **Print 1098-Ts addressed to billing address** check box. If this option is enabled and a billing address does not exist for a student, the address from the Student Master is used.
2. Select a sort option for the forms:

- Name
- Social Security Number
- ZIP Code
- Campus

3. Click **Print 1098-T**. The following message is displayed: *Print the 1098-T's Three (3) Times (For Copy A, B, and C).*

   Because three different forms have to be printed for each student (Copy A, Copy B, and Copy C), first load the printer with the forms for Copy A, print the report, then repeat this process for Copy B, and again for Copy C.

4. If 1098-Ts do not need to be run for the students you selected, CampusNexus Student indicates such.
5. Click **OK**. Run the report and display the preview.
6. Load the Copy A forms in the report printer and click to run the report. Copy A is for the Internal Revenue Service (IRS).
7. Load the Copy B forms in the report printer and click to run the report again. Copy B is for the student.
8. Load the Copy C forms in the report printer and click to run the report for the last time. Copy C is for the institution (filer).
9. Close the Report Preview window and close the form.

Note: When the 1098-T forms are printed, a message asks if they printed properly. If they did not, click **No** and CampusNexus Student will allow you to reprint the forms again, or just reprint a portion of the forms based on the sort order chosen in the wizard.

Export 1098-Ts

A Contact Name and Telephone are required in the 1098-T export record. The contact is assumed to be the person who is executing the export procedure. Not all fields are in the Staff table. CampusNexus Student uses the institution's campus information if the Staff information for the following fields are blank.

Field Positions and Titles

Field Pos	Field Title
304-343	Contact Name
344-358	Contact Phone (number and extension)

If the contact phone number is blank, CampusNexus Student uses the campus phone.

Vendor information is also required. CampusNexus Student populates the vendor information fields with Anthology Inc.'s name and address.

Field Positions and Titles

Field Pos	Field Title
519-558	Vendor Name
559-598	Vendor Mailing Address
599-638	Vendor City

Field Pos	Field Title
639-640	Vendor State
641-649	Vendor ZIP Code
650-689	Vendor Contact Name
690-704	Vendor Contact Phone (number and extension)
705-739	Vendor Contact Email Address

Hyphens, blanks, or alphabetic characters are not valid for the TIN field in the "A" records.

Field Positions and Titles

Field Pos	Field Title
12-20	TIN

To export 1098-Ts:

1. Run the Process 1098-T wizard as described above until the **Create File** option is available.
2. The default drive and folder path for exporting files is the path assigned in Setup > System > General tab > Enter EDE Path. At the time you export, you can select a different drive and path using the browse options on the form.
3. The default setting sends a file to the path selected. Select **Test File** to create a file for test purposes.
   - OR -
   Select **Replacement File** to replace an existing file that has not yet been transmitted.
4. When the options are set, click **Create File**.

A data file is created in the folder that you designated in step 2. CampusNexus Student names the data file automatically and displays a message to notify you of the file name when it is completed. This data file is the export record that can be sent to the IRS, or to a servicer if your institution uses one for this purpose.

Revenue Recognition

Note: If CampusNexus Student is integrated with an accounting system, refer to Release to Integrated Accounting System.

Revenue recognition is an accounting process in which tuition and other revenue is transferred from deferred income accounts to earned income accounts on a regular basis. This is necessary to match the income earned with the services provided to the student by the institution.

Note: Refer to the Staff Accounting Bulletin No. 101 (SAB101) document from the SEC for more information on revenue recognition. One of the main changes is that institutions must report up-front fees (like registration fees) over the life of the program.

The earnings method(s) to be used for your institution must be set up. Earnings methods are based on earning units: Months, Weeks, Calendar Days, Scheduled Hours, Attended Hours, Courses/Credits, and Course Meeting Days. A special case is set up if your institution bills by academic year. Refer to Examples of Revenue Recognition with Earnings Based on Academic Years.

If your institution uses Term Relationships, you can earn by Child Term. Refer to Example of Billed by Parent Term and Earned by Child Term .

Also set up your Billing Methods to work in conjunction with your earnings method(s). The billing method determines how your revenue is recognized. If your Revenue Basis (Earning Unit) is **months**, the following applies.

- If you bill by Term, the Total Earning Units is the time frame in the Term.
- If you bill by Program, the Total Earning Units is the time frame in the Program.
- If you bill by Payment Period, the Total Earning Units is the time frame in the Payment Period.
- If you bill by Credit Hours, the Total Earning Units is the time frame in the Term.
- If you bill by Academic Year, the Total Earning Units is the time frame in the Academic Year.

The reference number to be used for the revenue recognition transaction batch is set up. CampusNexus Student increments this number for each new batch.

As transaction codes are set up, codes such as TUIT (tuition) are marked as deferred revenue transactions. These are the transactions that the Revenue Recognition wizard looks for during the month-end process. General Ledger Account Numbers are associated with all transaction codes.

The revenue recognition routine defers revenue by campus. When a student has deferred revenue for more than one campus, the revenue recognition procedure earns each deferred balance separately.

Revenue recognition can only be run at the end of the month. When it is run, entries are made in the student's revenue ledgers. To view the revenue ledger of a student, select a student and access the student's Revenue Ledger form. You can adjust a student's revenue ledger. This might be necessary after an initial data conversion.

Revenue Recognition Options

Revenue Recognition allows for setting parameters on how to earn on the First and Last months of the Earnings Period. This only applies to earnings methods that use **Months as the Earning Unit**. These parameters determine if a student earns a Full Month, Half Month, or Nothing at all in the First and Last months of the Earnings Period.

The Revenue Recognition/Earnings Method setup and calculation allows for earning ½ month of revenue on the First and/or Last month of Enrollment. You can configure the Earnings Policy to earn ½ month in the first and last months using two separate and unrelated days. (Example: An institution may want to earn a full month on the first month of enrollment regardless of the day of the month that the student starts, and earn a full month on the last month of enrollment only if the student ends after the 15th of the month. You can configure the first month as "On or before the 31st of the month" and the last month as "On or after the 15th of the month").

You can calculate negative deferred revenue in the month in which it was posted or amortized through the revenue Earnings Period. Set this option for each bill code from the Transaction Codes Setup form.

Revenue Calculation Details

Various formulas are programmed into the earnings calculation function to properly calculate revenue based on these additional earnings units. The earnings scope is determined from the Billing Method Frequency. Each program version has a billing method selected. The frequency field contains one of the following values:

- **P** = Full Program
- **A** = Academic Year
- **T** = Term/Quarter
- **C** = Course (Frequency to use for earnings is Term/Quarter).
- **E** = Payment Period
- **X** = Course Section

Earnings Period Start Dates

The Earnings Period Start Dates are as follows:

- If P (Full Program), the Earnings Period Start Date is the Actual Start Date for the Enrollment.
- If A (Academic Year), the Earnings Period Start Date is the Start Date for the Academic Year.
- If T (Term), the Earnings Period Start Date is the Start Date for the Term.
- If C (Course), the Earnings Period Start Date is the Start Date for the Term where the course is scheduled.
- If E (Payment Period), the Earnings Period Start Date is the Start Date for the Payment Period.
- If X (Course Section), the Earnings Period Start Date is the Start Date of the Course Section.

The revenue calculation is always cumulative for the Earnings Period. This means that when calculating earned revenue, the calculation determines the total amount that should be earned to date. Then the calculation subtracts the total amount earned before this revenue recognition period. The result is the amount earned for this revenue recognition period.

The Revenue Recognition procedure always writes an earnings record for any Revenue Ledger that has a balance. If there is an exception, if for any reason the student is not to earn, the calculation writes an earning record (SaRevenueDetail - type 'E') with a zero amount. This is necessary, so that if the user cancels the revenue process, CampusNexus Student can reset the last earn date.

Earn on "Incompletes"

Some institutions have an "INC" SySchoolStatus Code that is assigned to the LOA system status code. Revenue Recognition earns on the "LOA" status code if the school status code is "INC". All other school status codes that are assigned to the "LOA" system status code do not earn revenue.

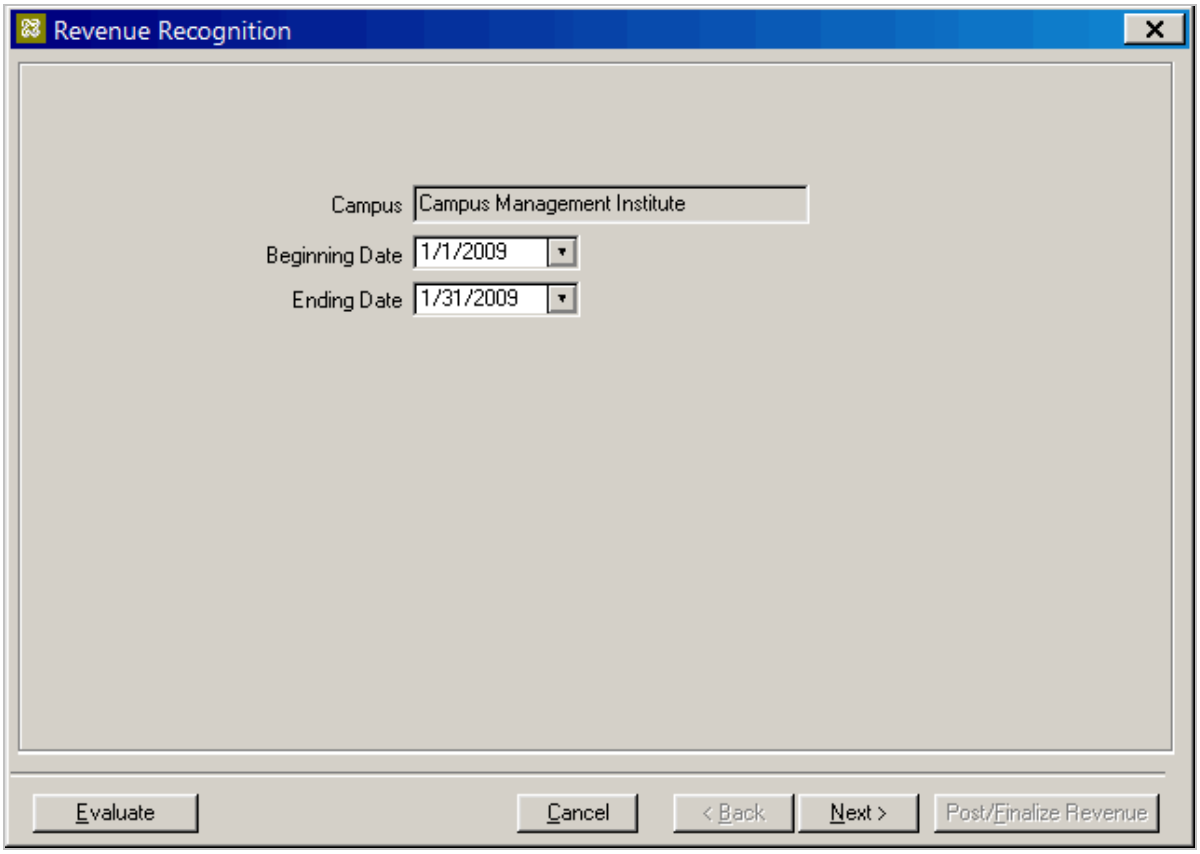
Revenue Recognition Exception Report

You can report on students that earned no revenue during a month, but had an unearned ending amount greater than zero from the previous month in addition to the following categories: Invalid Term ID, Term Has Not Started, Never Attended, LOA, Hasn't Attended Recently (setting), Required Attendance Percentage, and Hasn't Attended Minimum Hours Required. Any student not identified with an existing exception reason, is assigned to a new revenue exception of **Other exception**. This provides an audit report that is used to determine any students who should be earning revenue.

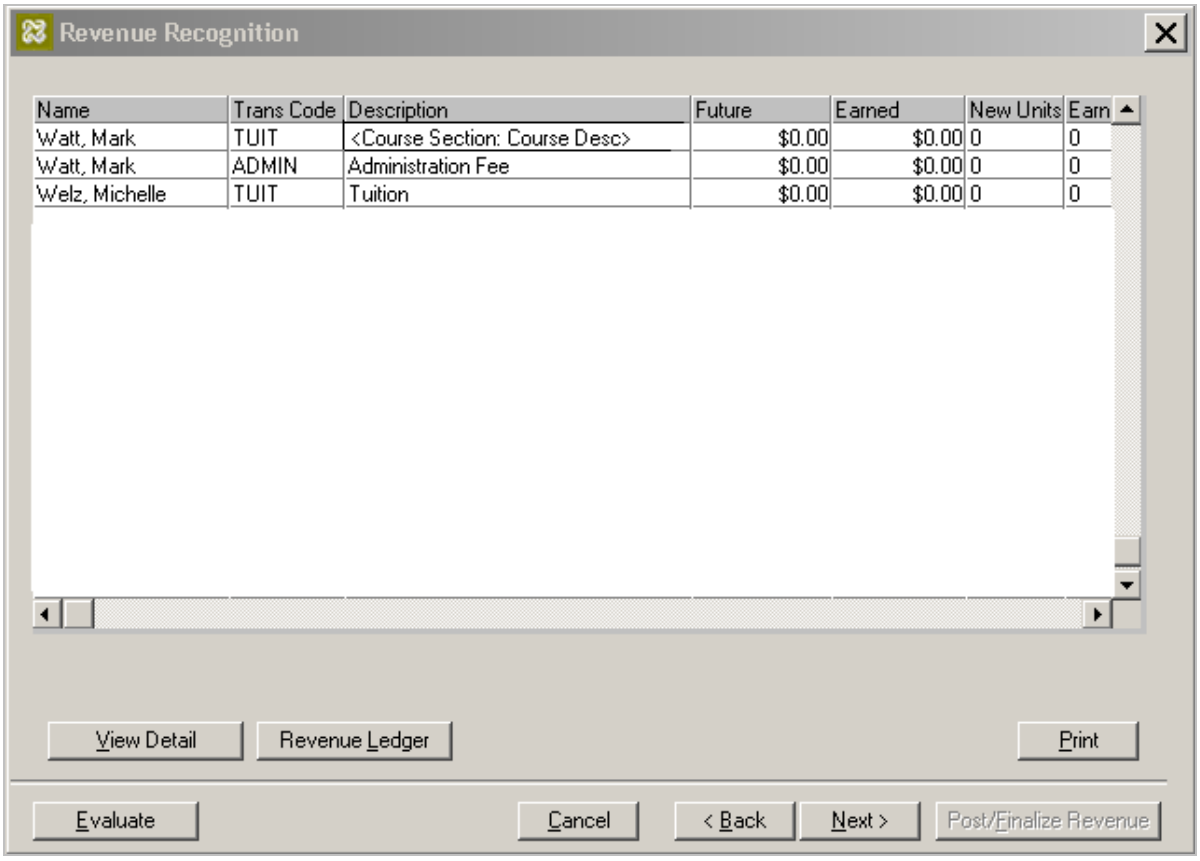
Revenue Recognition Wizard

To run the Revenue Recognition Wizard:

1. Set your default campus to be the one for which revenue recognition is to be processed.
2. Navigate to **Daily** > **Student Accounts** > **Revenue Recognition**. The Revenue Recognition wizard is displayed. The default campus is displayed on the first screen and disabled.



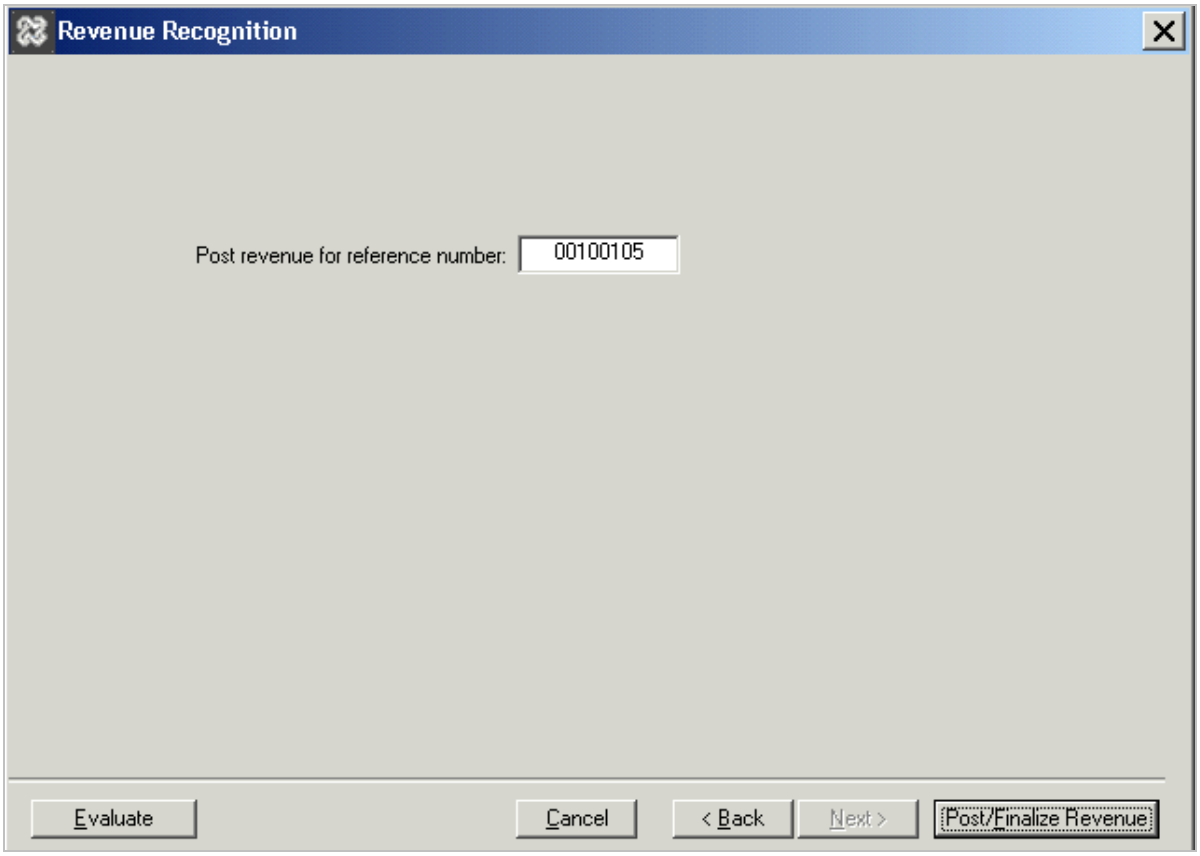
3. CampusNexus Student displays the appropriate **Beginning Date** and **Ending Date** through which the revenue recognition is to be run. You can change the date to an earlier month-end date if necessary by going to **Setup** > **Campus Locations** > **Accounting** tab. You would only do this during conversion and start-up activities; otherwise, you could "double up" your earnings records by going back to an earlier date.
4. Click **Next** to gather the revenue records to process, or Evaluate to see if there are any records with issues.
5. If you clicked Next, a message indicates if there are exception records. Click **Yes** to view the exception report, or **No** to continue.
6. If you selected **No**, the revenue records that can be processed are displayed.



Note: The Description column displays the Course Section: Description.

- When the student meets the criteria for recognizing revenue over the life of a course rather than the life of a term or any other revenue Earnings Period, and the TUIT charge is posted, the **Course Section: Description** is displayed.
- When the student does not meet the criteria for recognizing revenue over the life of a course and TUIT charges are posted, the description found on the SaBillCode record (e.g., Tuition) is displayed.
- When a bill code transaction is not setup to earn over the life of a course, the description found on the SaBillCode record (e.g., Administration Fee) is displayed.

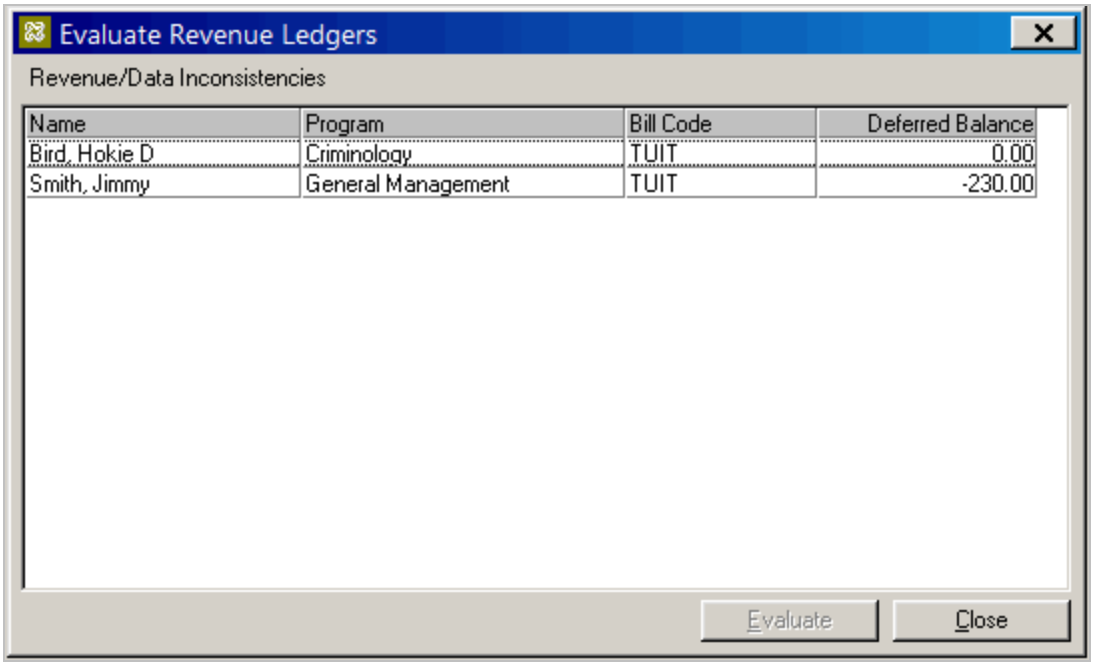
7. Select **Next** to proceed. Click **Evaluate** to resolved issues, **Back** to return to the previous screen, or **Cancel** to cancel the revenue recognition process.
8. CampusNexus Student assigns a reference number. Select **Post/Finalize Revenue** to post the revenue.



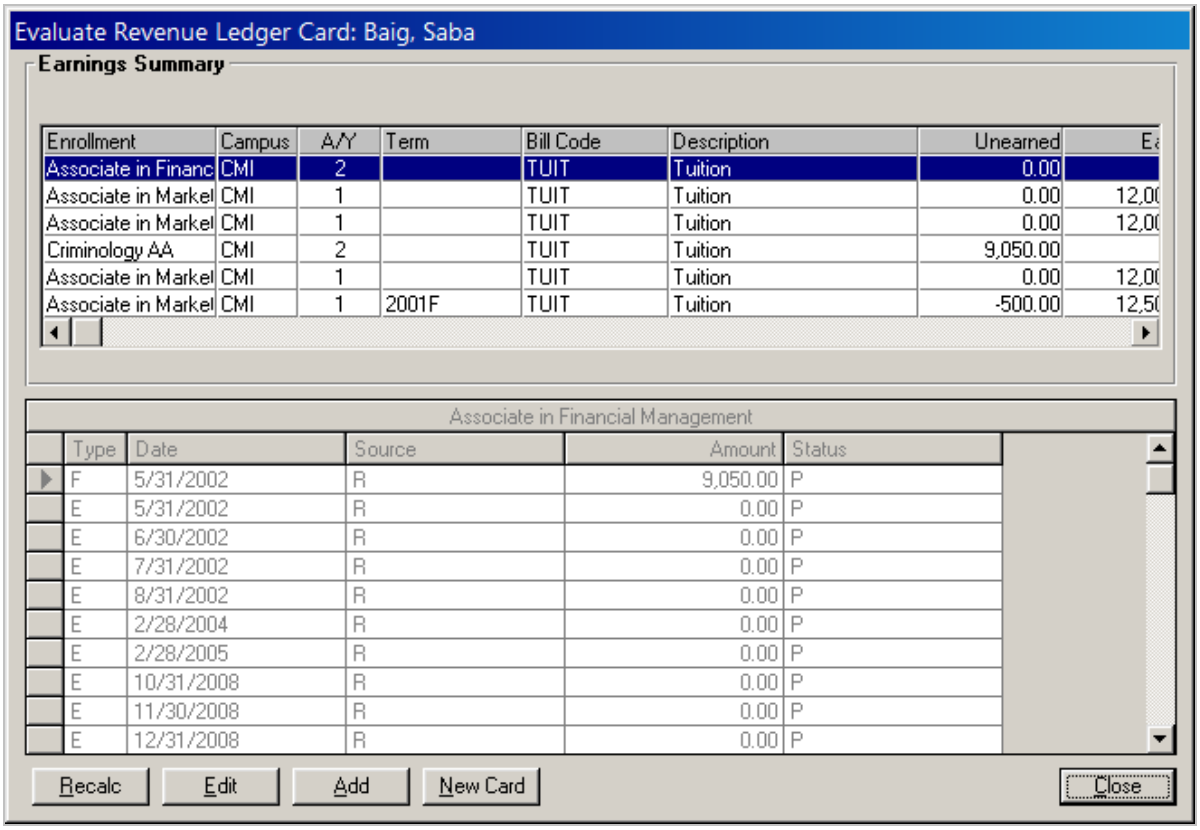
9. A confirmation message is displayed when the revenue has been successfully posted.

Evaluate

10. Click **Evaluate** to run a procedure that lists revenue ledgers with problems. If no problems are found, CampusNexus Student displays a completion message. If problems are found, the form lists all revenue cards where the enrollment revenue totals do not match the revenue detail calculated amounts. CampusNexus Student also lists revenue cards where the enrollment revenue Last Earn Date does not match the revenue detail calculated date.

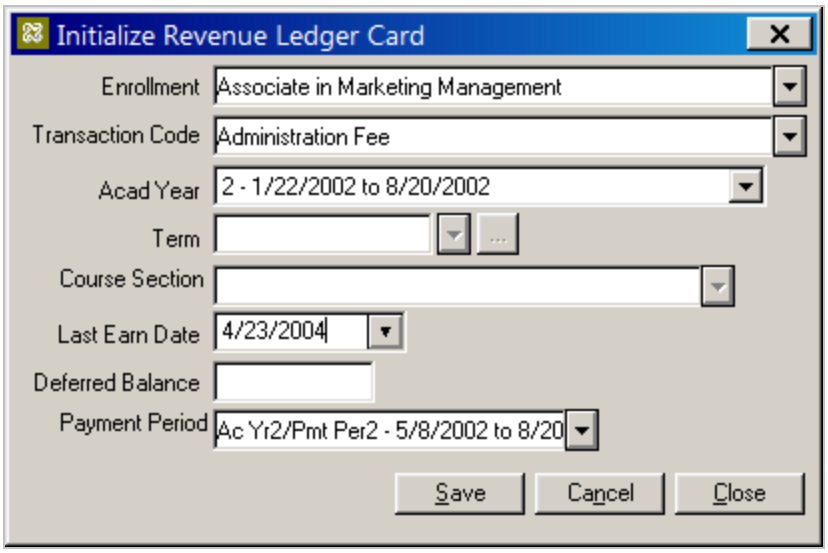


11. If exceptions are displayed, select a record and click **Evaluate** to see the student's Revenue records for each enrollment.



Note: When a bill code transaction is set up to earn over the life of a course, the Description column displays the Course Section: Description. If not, the description found in the SABillCode table is displayed.

12. Click an **Enrollment** and click **Recalc** to recalculate the revenue.
13. Click **Edit** to enable the bottom portion of the form. Edit the **Date**, **Source**, **Amount**, or **Status** fields and click **Save** to retain your changes.
14. Click **Add** to change the **Type** of revenue.
15. Click **New Card** to initialize an empty revenue ledger. CampusNexus Student displays the **Initialize Revenue Ledger Card** form.

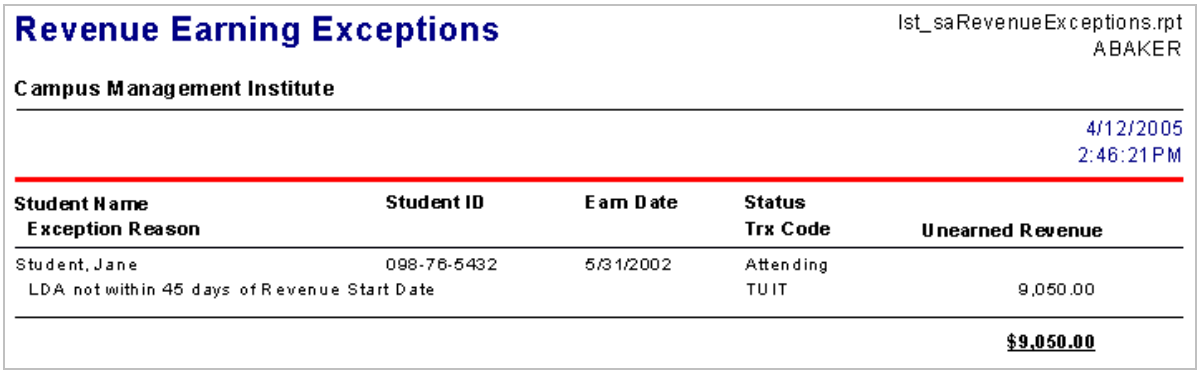


Note: The Course Section list is enabled when the following criteria are met:

- Billing Method is set to 'Bill by Course'.
- Earning Method is set to 'Course Section'.
- Transactions are posted to the ledger under a 'TUIT' code.

CampusNexus Student presents fields for Enrollment, Transaction Code, Course Section, and Last Earn Date and creates a new revenue ledger. The Acad Year and Term fields are controlled by the Billing Method for the Enrollment. If the enrollment is billed by Academic Year, the Acad Year field is enabled. If by Term, the Term field is enabled. If by program, Acad Year and Term are disabled.

16. Click **Next**. The wizard lists the students for whom revenue is recognized. If any exceptions are found, a message is displayed.
17. Click **OK** to list the exceptions. CampusNexus Student generates the Revenue Earning Exceptions report.



Revenue Earning Exceptions

21. Review the report and decide whether to continue with the process. If changes are required before the process is completed, click **Cancel** to stop the wizard.
22. Click **Next** to proceed to the next page of the wizard. CampusNexus Student displays the sequential reference number to added to the revenue transactions as they are posted.
23. Click **Post/Finalize Revenue** to complete the revenue recognition process. A confirmation message is displayed when the process is completed.
24. Click **OK** to acknowledge the message and close the procedure.

Example of Revenue Recognition with Earnings Based on Academic Years

If an institution bills by academic year, the revenue earnings are "isolated" by academic year.

If the institution has a 2300-hour program, 900 hours, 900 hours, and 500 hours;
and the "Months In Academic Year" set up under Lists > Financial Aid are 7 months, 7 months, and 3 months;
and the tuition costs are $10,500, $10,500, and $3,900;
the revenue earnings is as follows:

Example of Revenue Recognition

Academic Year	Month	Total	Earn Amount	Remaining Balance
1	1	10,500	1,500	9,000
1	2		1,500	7,500

Academic Year	Month	Total	Earn Amount	Remaining Balance
1	3		1,500	6,000
1	4		1,500	4,500
1	5		1,500	3,000
1	6		1,500	1,500
1	7		1,500	0
2	1	10,500	1,500	9,000
2	2		1,500	7,500
2	3		1,500	6,000
2	4		1,500	4,500
2	5		1,500	3,000
2	6		1,500	1,500
2	7		1,500	0
3	1	3,900	1,300	2,600
3	2		1,300	1,300
3	3		1,300	0

Example of Revenue Recognition with Carryover Units for Billed by Academic Year and Earned by Attended Hours

When an institution has a Program Version configured to bill by Academic Year earning by 'Attended Hours' over the Billing method or Academic Year time frame, CampusNexus Student accurately attributes the extra hours attended during one Academic Year to the revenue units earned in the first month of earning for the next Academic Year. This scenario occurs when the student reaches the hours attended threshold for an academic year as well as extra hours on the same day. For example, if an Academic Year consists of 900 hours and on the last day of the Academic year the student achieves 901 hours of attendance or more, the hours greater than 900 are assigned to the next Academic Year. This now enables institutions to report revenue in a real time fashion for this configuration.

Note: A report can be run to provide a list of students who have extra revenue earning units carried over from one Academic Year to the next Academic Year in a given month. Navigate to: Reports > Student Accounts > Revenue Earnings-Carryover Units and follow the standard report generation process to view the report. For more information see Revenue Earnings - Carryover Units Report.

"Term" code for Term-based institutions and "Months Remaining to Earn" for Program-based institutions are included on the report produced during the revenue calculation process.

The revenue earnings by program procedure checks the Extern Begin Date for the Enrollment. If there is an Extern Begin Date, the revenue is earned from the Start Date through the Extern Begin Date. If there is no Extern Begin Date for the enrollment, the revenue is earned through the Graduation Date.

When earning revenue, Standard Period of Non-Enrollment (SPN) students need to earn on the month that they started the SPN. LOAs do not earn on the first month of the LOA. If the enrollment status is an SPN status, CampusNexus Student earns revenue if the month being earned is the same month as the SPN start date. If the month being earned is after the SPN start date, CampusNexus Student does not earn revenue for the enrollment for the month.

If you cancel the revenue, the **Last Earn Date** is reset. In the revenue calculation procedure, even if $0 is calculated, a revenue detail record is written. This ensures that the revenue report prints all students with deferred balances.

Future Starts: If a student has transferred to or otherwise started another enrollment, CampusNexus Student uses the start date for the new enrollment if it is after the last earn date.

Depending on a term's start and end dates, the revenue calculation will calculate that a term is x.5 months long. Some institutions will want to earn only X months of revenue. They can set the **Revenue Units** field under Terms to override the term length calculation. This setting only applies to institutions that bill by term and earn by month. If the total number of credits scheduled for the Term that was billed is zero, nothing will be earned. You must update the total number of credits on the revenue header, or register the student for some courses to earn the revenue. This only occurs when earning by Term - Course/Credits.

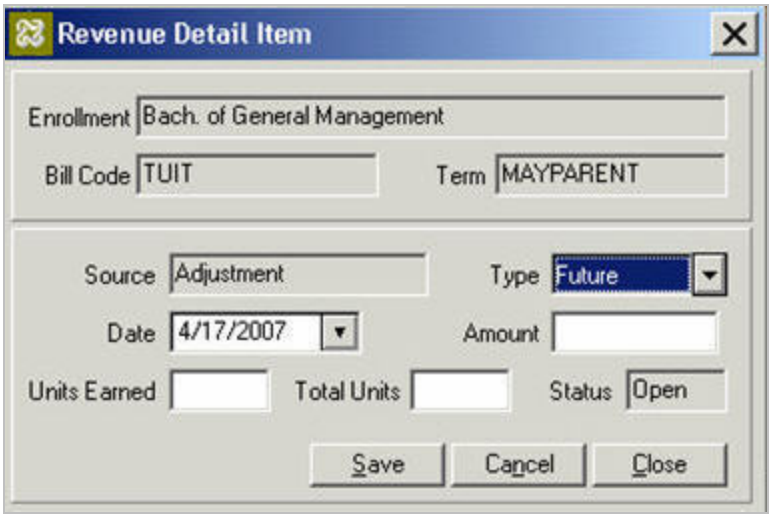
Examples of Billed by Parent Term and Earned by Child Term

1. Open a student's revenue ledger.
2. The **Deferred Revenue Balance** is calculated for each *Child* revenue record associated with the *Parent* Term that is charged on the ledger card, and then posted on the ledger card.
3. When the 'Adjust Earned/Total Units for Holidays' option is configured, the number of units to earn is reduced by the number of holiday days that are configured within the child term begin and end dates.
4. The number of units earned in the period is calculated using the child term begin date.
5. Revenue header information is tracked for the parent term associated with the charge on the ledger card as well. **Deferred Revenue Balances**, units to earn, total units earned and total revenue earned is rolled up from the child term revenue header records up to the parent term revenue header record.
6. The **Deferred Revenue Balance** allocation for child terms are recalculated each time the revenue calculation is run.

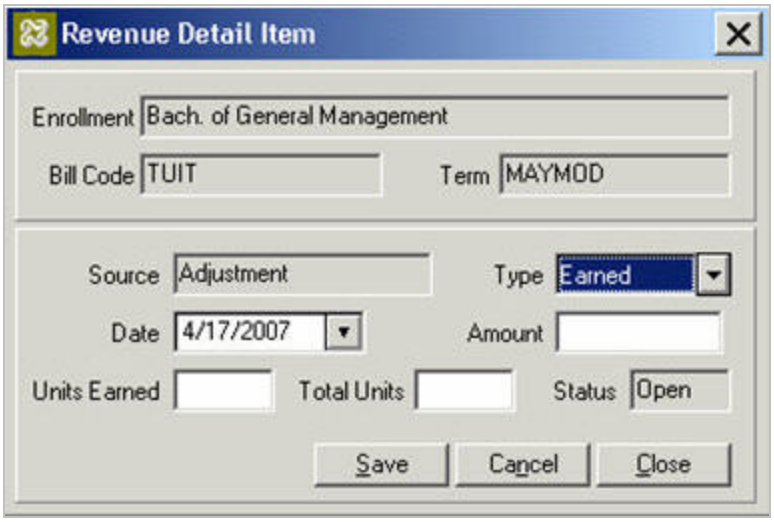
Add Adjustment

When adding an adjustment from the revenue ledger, you can select a child term when adding an adjustment. When calculating the revenue and a manual adjustment is found for the period being earned, CampusNexus Student adjusts the deferred revenue amount for the child revenue record (s).

1. Select the Type **Future** when adding an adjustment for a **Parent Term**.



2. Select the Type **Earned** when adding an adjustment for a **Child Term**.

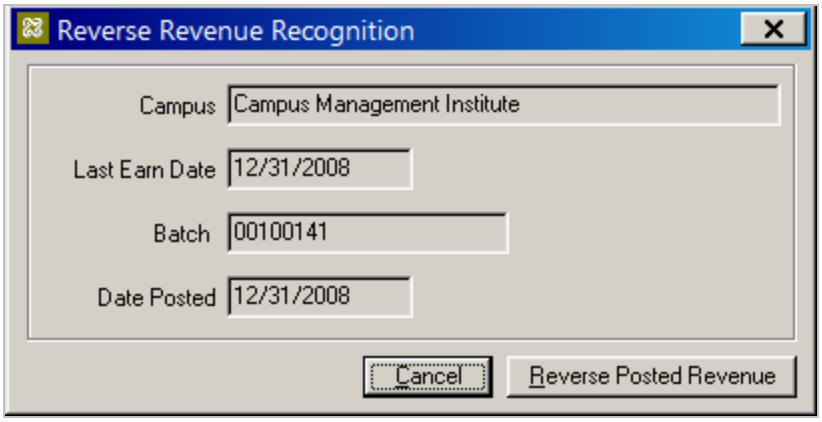


Reverse Revenue Recognition

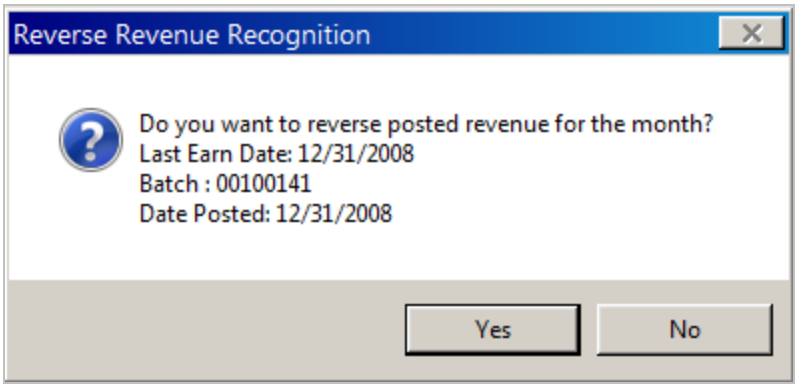
Use reverse revenue recognition to back out or reverse revenue recognition that has been performed in error. You can only perform this for the prior month and before the transaction has been released to the General Ledger.

To reverse revenue recognition:

1. Set your default campus to be the one for which reverse revenue recognition is to be processed.
2. Navigate to **Daily** > **Student Accounts** > **Reverse Revenue Recognition**. The Reverse Revenue Recognition form is displayed.



3. Click **Reverse Posted Revenue**. A confirmation message is displayed.



4. Click **Yes** to proceed. CampusNexus Student sets the record status to "O" (open), retrieves the posting date of the last posted revenue batch for the campus, deletes the posted revenue transactions for that batch from the student's revenue ledger cards, and recalculates the earned/unearned balance.
5. A confirmation message is displayed. Click **OK**.
6. Click **Close** to close the form.

CampusVue Finance, HR & Payroll Bank Reconciliation

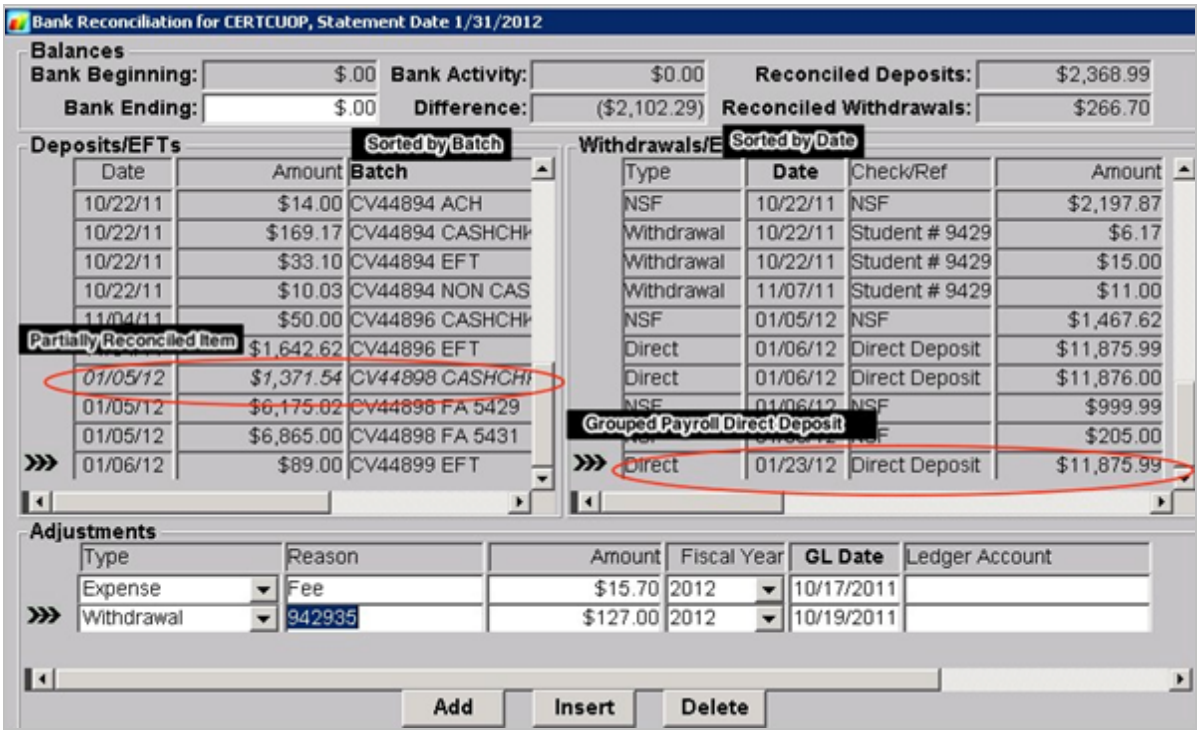
Beginning with CampusNexus Student Release 12.1.A, the Bank Reconciliation in CampusVue Finance, HR & Payroll has been improved to make comparing deposits from a bank statement to the bank reconciliation easier. The new items are:

- Columns can be sorted by clicking on the column headings.
- All Deposits from CampusNexus Student show the Batch ID followed by Type in the Batch column.
- Deposits and Withdrawals can be partially reconciled by right-clicking on the row and selecting items in the detail window.
- On the main Bank Reconciliation screen partially reconciled items are italicized.
- The "Search for" menu item has been added.

Users can search the Bank Reconciliation screen by the following items: Deposits/EFTs, Withdrawals/EFTs, Adjustments, and Repeat Last Search.

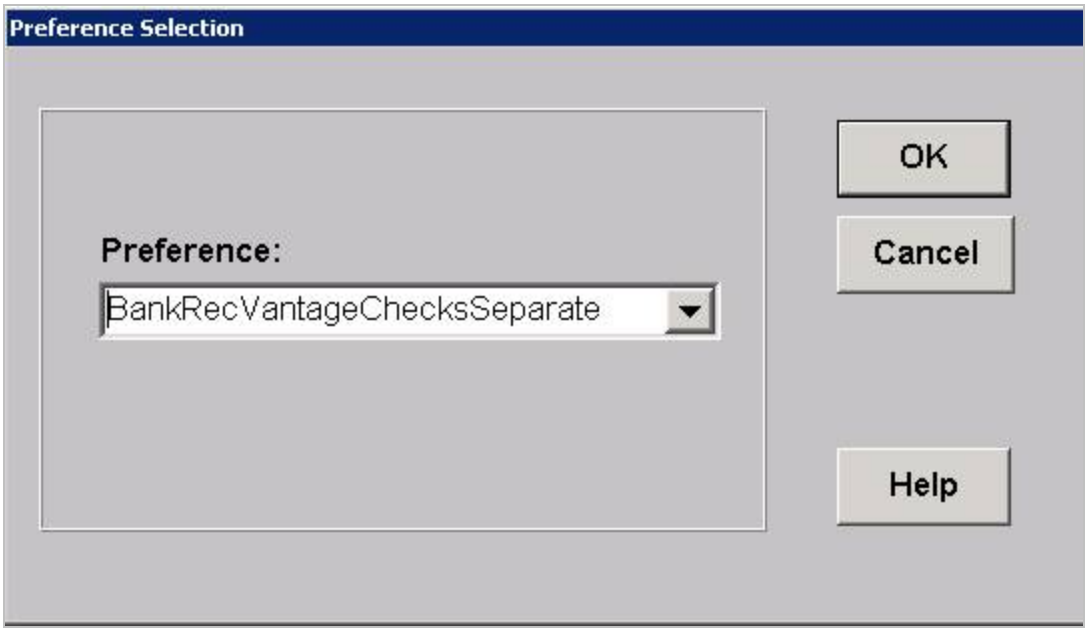
- Allowable search criteria for Deposits are Amount, Batch, and Date.
- Allowable search criteria for Withdrawals are Amount, Batch, Check/Ref, Date, Remarks, Source, and Type.
- Allowable search criteria for Adjustments are Amount, Cost Account, Fiscal Year, GL Date, Ledger Account, Reason, and Type.
- Clicking the F11 key will repeat the previous search.
- The Action Menu includes “Adjustment Column Edit” to auto fill multiple rows in the Adjustment window.
- The Cost Account, Ledger Account, and Reason columns can be edited by using the Adjustments Column Edit action. In addition, users can indicate the fill direction by choosing one of the following items from the Row Range drop-down:
    - All Rows
    - Current Row to Last Row
    - Current Row to First.
- A new preference, BankRecDDBatch, has been added that groups Payroll Direct Deposits by Batch ID on the main Bank Reconciliation screen with the ability to right-click and drill down to details.

New Bank Reconciliation Form

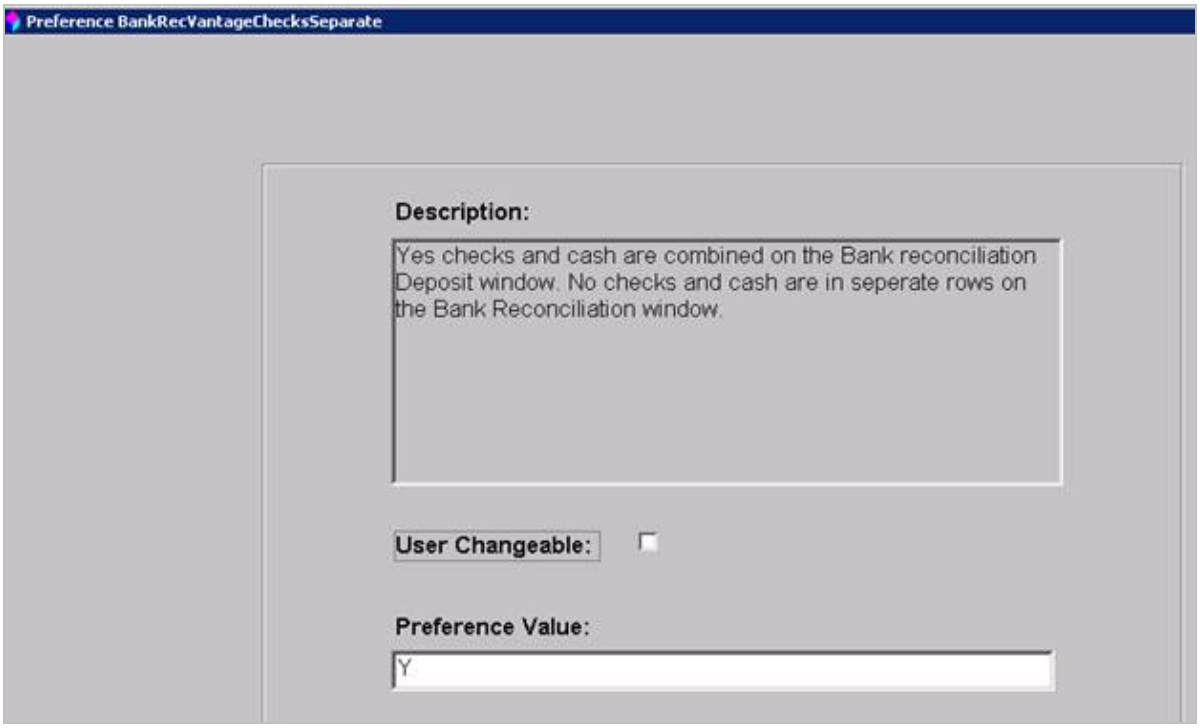


Admin Preferences

CampusVue Finance, HR & Payroll Admin Preferences contains a preference titled "BankRecVantageChecksSeparate".



There are two options available after you click OK. Y means that your Checks and Cash are separated. **N** means that you want the two combined.



Deposit Type Grouping on Bank Reconciliation Form

On Bank Reconciliation, the following types of deposits and how they are grouped will now appear on the bank reconciliation form.

Grouping of Deposit Types

Payment Type Abbreviation	Payment Type in words	Grouping	Exceptions/Comments
C	Cash ***	Grouped by Deposit ID and Date of Deposit ***	
H	Checks ***	Grouped by Deposit ID and Date of Deposit ***	Financial Aid Disbursement Check is recorded separately.
E	EFT	Individual item, includes EFT, Student ID and a unique identifier in the Batch column	Financial Aid Disbursement EFT is recorded separately.
I	ACH	Individual item, includes ACH, Student ID and a unique identifier in the Batch column	Financial Aid Disbursement ACH is recorded separately.
N	NON CASH	Individual Item. Includes NON CASH and a unique identifier in the Batch column	Financial Aid Disbursement for Non Cash is recorded separately.

Payment Type Abbreviation	Payment Type in words	Grouping	Exceptions/Comments
R	CREDIT CARD	Grouped by Deposit ID and Date of Deposit. Batch Column includes CCARD and CV + deposit id (from CampusNexus Student)	
H if Check, I if ACH, E if EFT	FA Disbursement	A separate line in the Batch field contains the letters FA and the Disbursement batch number	Can be a check, an EFT or an ACH

*** Cash and checks can be combined or displayed separately. If they are separate, the batch column will show CASH plus the associated CV Bank Deposit ID, and CHECKS plus the associated CV Bank Deposit ID. If they are combined, it will show CASHCHK plus the associated CV Bank Deposit ID.

If a student payment is later voided, it will appear on the Bank Reconciliation individually as an NSF Type in the Withdrawals portion of the Bank Reconciliation. On the Deposit portion of the Bank Reconciliation, a void of refund or stipend electronic payments will show as the Bank Alias and the date in YYYYMMDD format. If there is more than one refund or stipend voided for a given date, it will be combined. The details can be seen by right-clicking the Date on the Deposit portion of the Bank Reconciliation form for that line.

Deposit Line Item Details

The next table explains the detail that you can obtain for each individual item when you right-click a Deposit line.

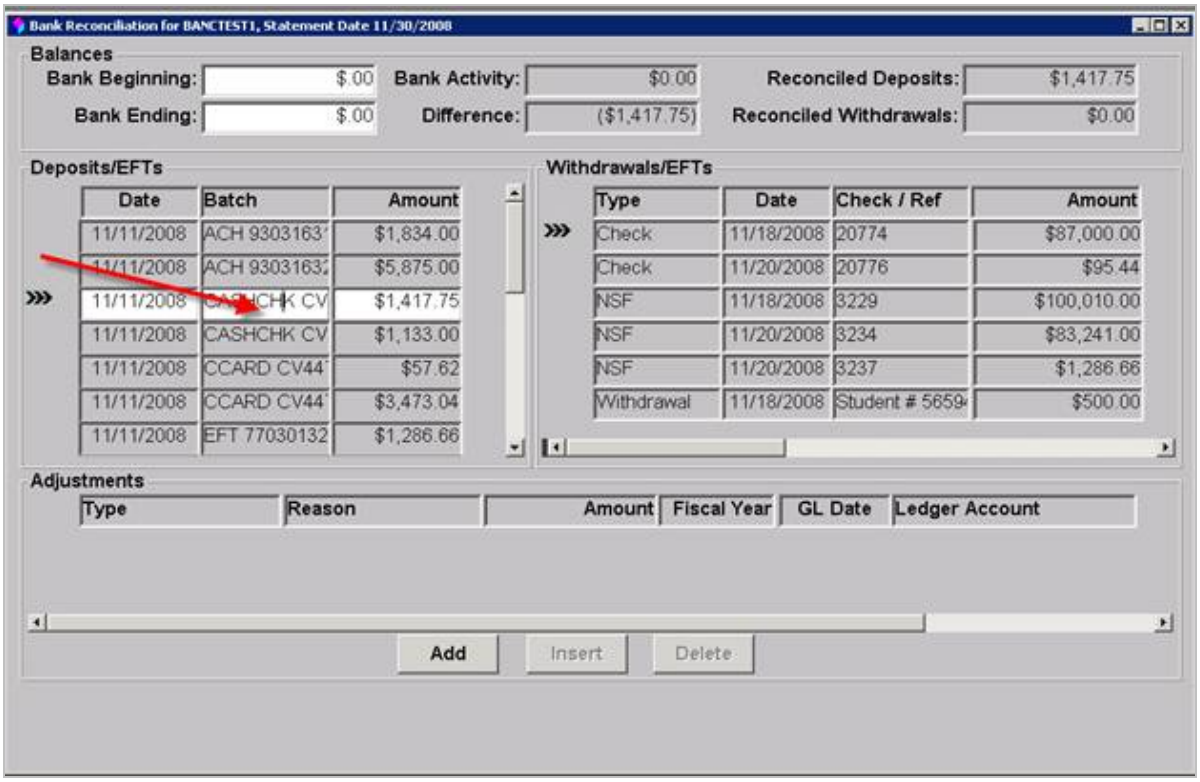
Deposit Line Items

Field Name	Explanation
Doc Class	CR for a Deposit, JE for a voided Electronic Refund or Stipend (EFT or ACH)
Document Type	C if it is a Deposit, CCA or ECA if it is a voided Electronic Refund or Stipend (EFT or ACH)
Document	Unique ID generated by CampusVue Finance, HR & Payroll if it is a Deposit. If it is a voided Electronic Refund or Stipend (EFT or ACH) it is a number that is generated from CampusNexus Student.
Amount	The amount of the item.
Reference	If this is a Miscellaneous Receipts or a Subsidiary transaction this is blank. Otherwise, this is the Student ID.
Remarks	If this is a deposit, this is the Payment Type Abbreviation (shown in the table above). If it is a voided Electronic Refund or Stipend (EFT or ACH) it will show a description of the transaction.
Reference2	If this is an FA Disbursement it will show the FA number. If it is a voided Electronic Refund or Stipend (EFT or ACH) it will show VOID. If this is any other type of Deposit it will be blank.
Document Date	The date the document was released to the General Ledger from CampusNexus Student.
Vue Deposit ID	If this is a deposit, this is the Deposit number generated by CampusNexus Student from the Bank Deposit Wizard. If this is a void it will show the Bank Alias plus the date in YYYYMMDD order.

Field Name	Explanation
Vue Deposit Date	Same as Document date (The date the document was released to the General Ledger from CampusNexus Student).
Document Source	If this is a deposit it is "Bank Dep CRC". If this is a voided Electronic Refund or Stipend (EFT or ACH) it is 'Bank Dep CCA or 'Bank Dep ECA'.
Check Number	If the Payment Type is H for Checks, this will show the Check Number.

Viewing the Batch ID

To see the full Batch ID, click on the Batch and scroll to the right.



Example Bank Reconciliation Forms

The following graphics demonstrate the Bank Deposit Wizard and the new Bank Reconciliation form with sample deposit detail for 11/11/2008. The details are:

- Bank Name – BANCTEST1
- Deposit Number – CV44728 and CV44729
- Deposits for – CV44728

Release to Integrated Accounting System

For clients who have selected CampusVue Finance, HR & Payroll or CampusNexus Finance, HR & Payroll as their accounting system, transactions such as miscellaneous receipts, student deposits, Student Ledger Card and Subsidiary Ledger entries and adjustments, Stipend and Refund Checks, Bank Deposits, and Revenue Recognition continue to be entered in CampusNexus Student, but will be sent to the integrated accounting system through the Web services to create journal entries in the integrated accounting system.

The same **Release to General Ledger** wizard for other accounting systems is used; however, some forms and functionality are modified for CampusVue Finance, HR & Payroll and CampusNexus Finance, HR & Payroll requirements.

- If using CampusVue Finance, HR & Payroll, transactions entered in CampusNexus Student and affecting the general ledger create multiple journal entries based on Journal Entry Groups in CampusNexus Student, by period, and by specific function. The following is a list of the journal entry groups that will be processed:
    - Revenue Recognition Journal Entry Groups
    - Bank Deposit Journal Entry Groups
    - Miscellaneous Receipts Journal Entry Groups
    - Stipend and Refund Check Printing
    - Ledger Cards
    - Subsidiary Transaction

- If using CampusNexus Finance, HR & Payroll, transactions entered in CampusNexus Student and affecting the general ledgers create multiple journal entries based on release date, time, journal entry type, and campus in CampusNexus Student. The following is a list of the journal entry types that will be processed:
    - Miscellaneous Receipts
    - Financial Aid Disbursements
    - Stipends
    - Refunds
    - Stipend and Refund Check Printing
    - Student Ledger Transactions
    - Subsidiary Transactions

  During release to general ledger, CampusNexus Student sends the Payee Type, Payee ID, name, and address for refunds, stipends, and subsidiary refunds to CampusNexus Finance, HR & Payroll. CampusNexus Finance, HR & Payroll uses the Payee information to update the Vendor or creates the Vendor (if not mapped) with the following details:
    - First Name
    - Middle Name
    - Last Name
    - Address Line 1
    - City
    - State
    - Zip Code
    - Payee Type
    - Payee ID

  CampusNexus Finance, HR & Payroll creates refund and stipend transactions using the Vendor sent by CampusNexus Student.

  If a user changes the Payee details in the Student Master after the transaction that uses the Payee is released to the General Ledger, the changes are not reflected in CampusNexus Finance, HR & Payroll until another release to general ledger involving the same Payee is done.

Any transactions that have not been previously released to the General Ledger in the integrated accounting system are gathered for release. Previously released transactions that were not successfully updated within the accounting system may also be gathered for release.

A functional area of a transaction (for example, financial aid, student accounts) dictates how the transaction is grouped into journal entries within the integrated accounting system. For example, transactions from similar functional areas should be grouped into common journal entries, which will make it easier for the users of the accounting system to understand where journal entries originated.

To control the number of journal entries sent to CampusVue Finance, HR & Payroll, the G/L Release Process/Service creates **one** journal entry at a time

- per Journal Entry Group
- per CampusNexus Student functional area
- per fiscal period

Detailed records in the same area that occur during the same fiscal period are combined into one journal entry per Journal Entry Group.

For journal entries sent to CampusNexus Finance, HR & Payroll, the G/L Release Process/Service creates **one** journal entry at a time

- per Campus
- per Journal Entry Type
- per release

Release to Integrated Accounting System Wizard

The Student Accounts - Release to CampusVue Finance, HR & Payroll wizard or Student Accounts - Release to CampusNexus Finance, HR & Payroll wizard can be used to perform the following tasks:

- Release transactions to the accounting system's general ledger
- Review and print batches that are processed
- Review the exception report when errors occur
- View/print GL Distributions (ledger entries)

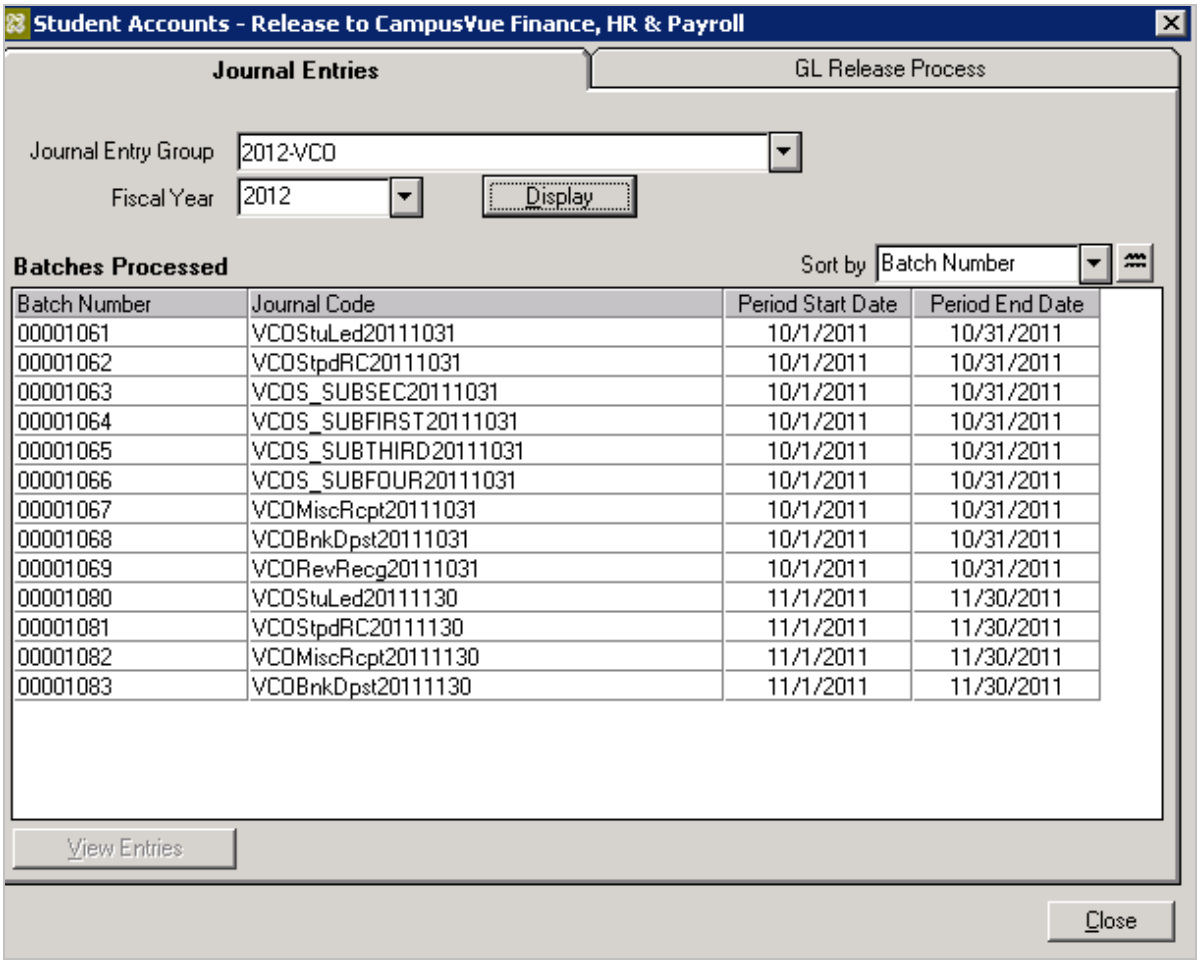
The fiscal period controls the frequency in which a new journal entry is created within the integrated accounting system.

For detailed instructions, refer to the following procedures:

- To release transactions to CampusVue Finance, HR & Payroll
- To release transactions to CampusNexus Finance, HR & Payroll

To release transactions to CampusVue Finance, HR & Payroll:

1. Navigate to **Daily** > **Student Accounts** > **Release to General Ledger**. The Student Accounts - Release to CampusVue Finance, HR & Payroll wizard is displayed. The wizard contains two tabs: Journal Entries and GL Release Process.



Note: If the message *...Automated Processing is currently suspended* is displayed on the bottom on the form, refer to Suspend GL Processing.

2. On the **Journal Entries tab**, you can review and print journal entries within the batch.

   Select specific journal entry groups and fiscal years to gather the desired processed batches or select **All** to produce a list of all journals for a fiscal year, or all journal entries for a journal entry group regardless of fiscal year.

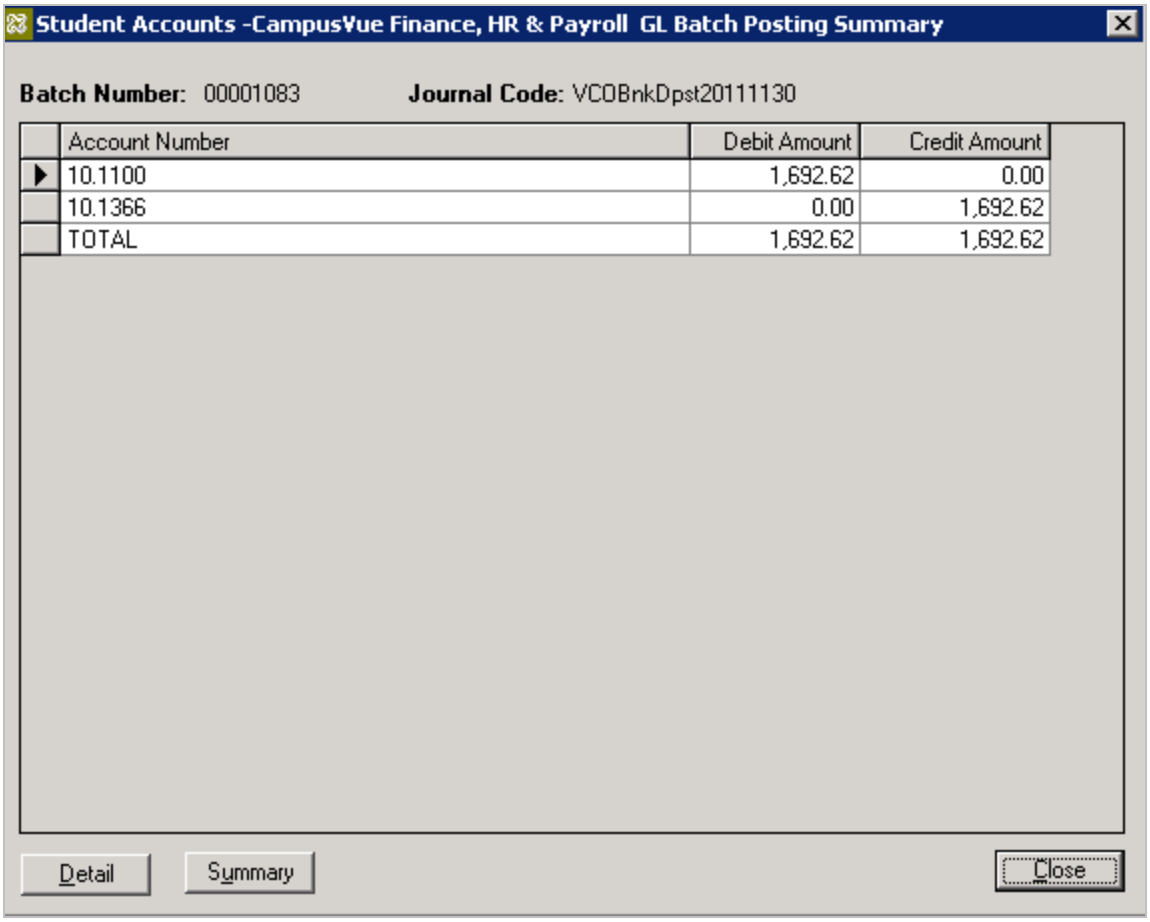
3. Click **Display** to produce a list of the batches processed based on the selections made from the **Journal Entry Group** and **Fiscal Year** lists.

4. In the **Sort by** list, select one of the following options:

   - Batch Number
   - Journal Code
   - Period Start Date
   - Period End Date

   The up arrow next to the **Sort by** list indicates that the list is sorted in ascending order; a down arrow indicates descending order.

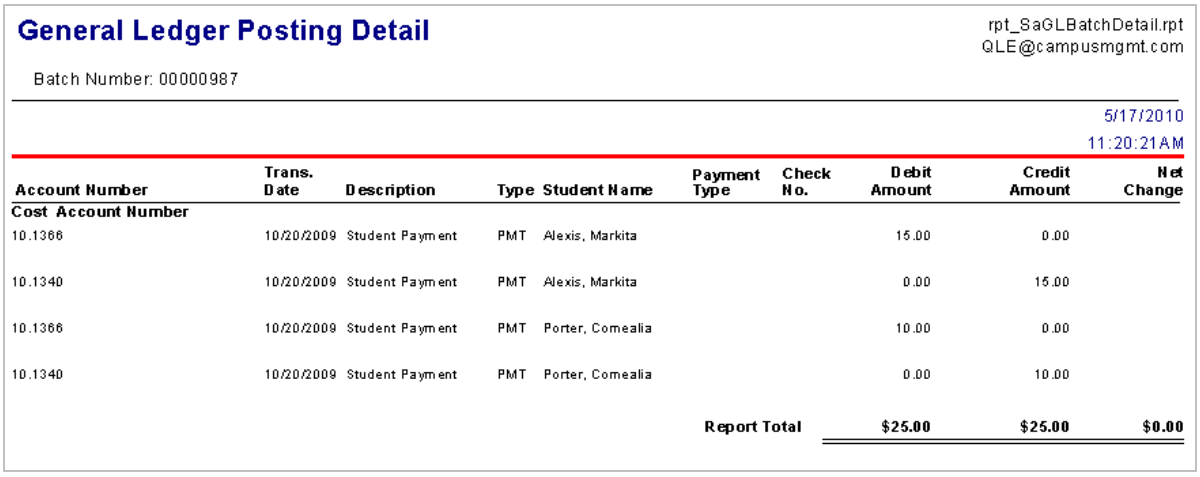
5. Select the batch from the list and click **View Entries**.



6. Click **Detail** to view the Report Selection form for the General Ledger Posting Detail report. Sort the report by campus, batch number, account number, debit amount, credit amount, transaction date, student name, transaction type, cost account, or description.

7. Click Preview to view the report.

   Note: Since journal entry groups can cross multiple campuses, the campus selection tab is disabled on the Report Selection form; however, the report can be sorted by campus.



General Ledger Posting Detail

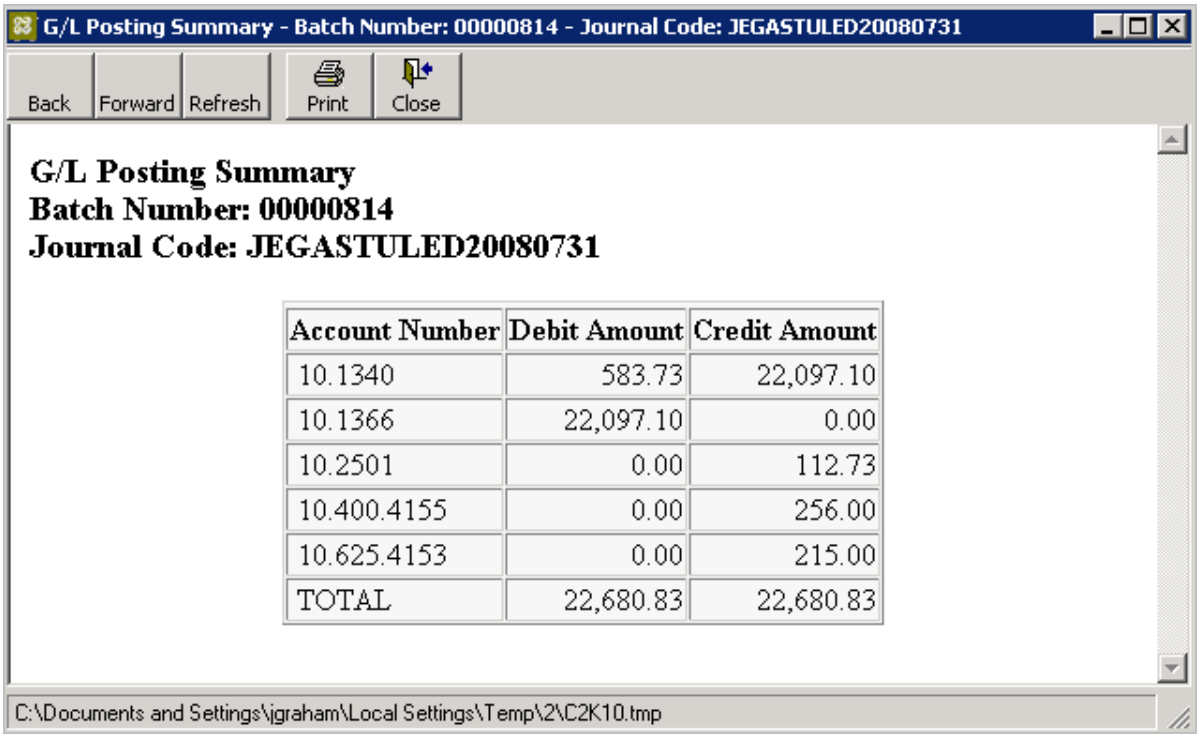
rpt_SaGLBatchDetail.rpt
QLE@campusmgmt.com

Batch Number: 00000987

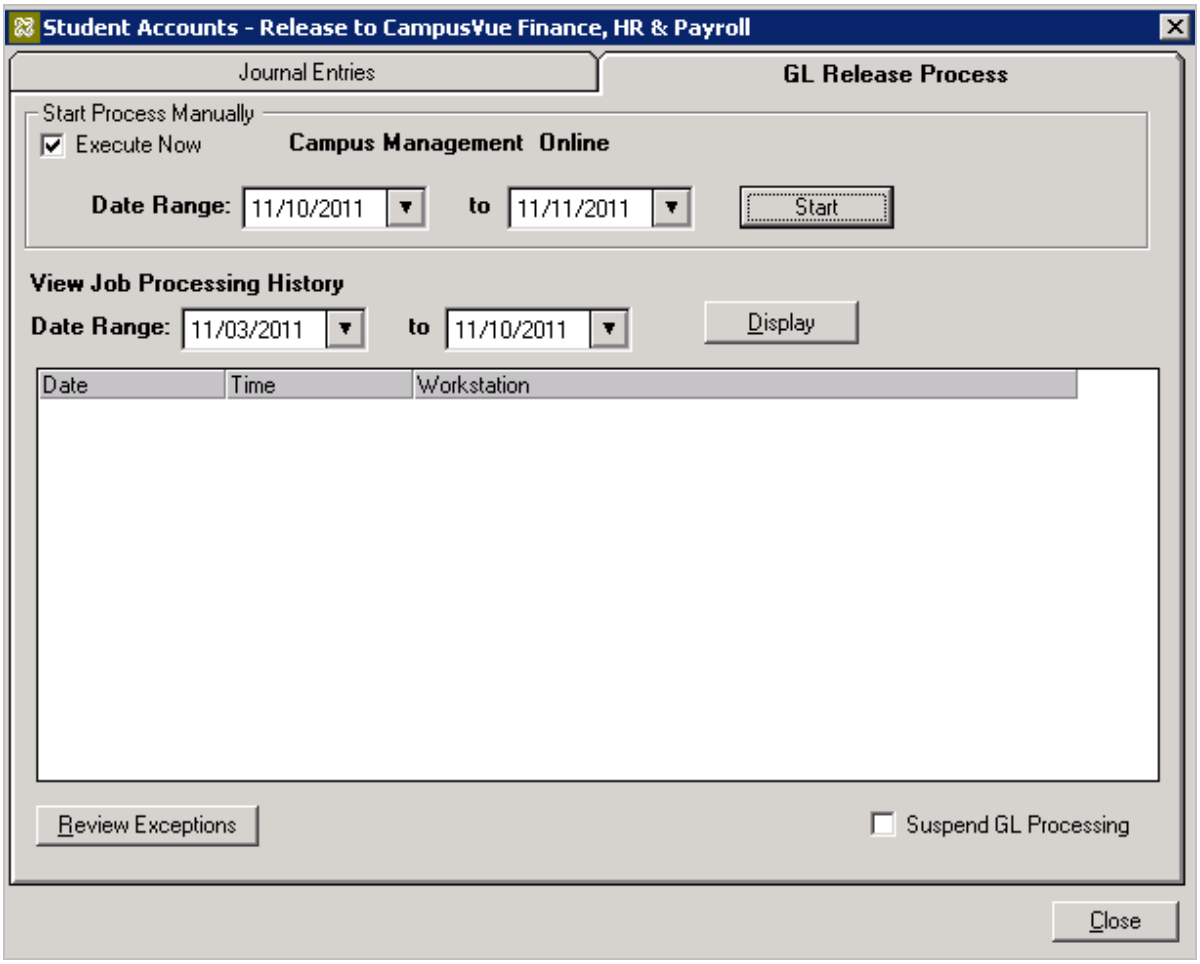
5/17/2010
11:20:21 AM

Account Number	Trans. Date	Description	Type	Student Name	Payment Type	Check No.	Debit Amount	Credit Amount	Net Change
Cost Account Number									
10.1366	10/20/2009	Student Payment	PMT	Alexis, Markita			15.00	0.00	
10.1340	10/20/2009	Student Payment	PMT	Alexis, Markita			0.00	15.00	
10.1366	10/20/2009	Student Payment	PMT	Porter, Comealia			10.00	0.00	
10.1340	10/20/2009	Student Payment	PMT	Porter, Comealia			0.00	10.00	
					Report Total		**$25.00**	**$25.00**	**$0.00**

8. Click **Summary** to view the summary information for the selected journal entry. Click **Back**, **Forward**, **Refresh**, and **Closed** to move from page to page, refresh the screen, print the summary, and close the form.



9. Click **Print** to view the printer dialog and select a local or network printer.
10. **GL Release Process** tab:



To manually release transactions to the general ledger of the integrated accounting system, select **Execute Now**, select a date range from the **Date Range** lists, and click **Start**.

To view the job processing history, select a date range from the **Date Range:** lists, and click **Display**. A list of journal entries per workstation by date and time is displayed containing information about when a batch was last run and who initiated the release to general ledger.

11. Once the process is complete, the Processing History in the lower part of the form is refreshed. Click Review Exceptions to display the exceptions that were not successfully added to the proper journal entry.

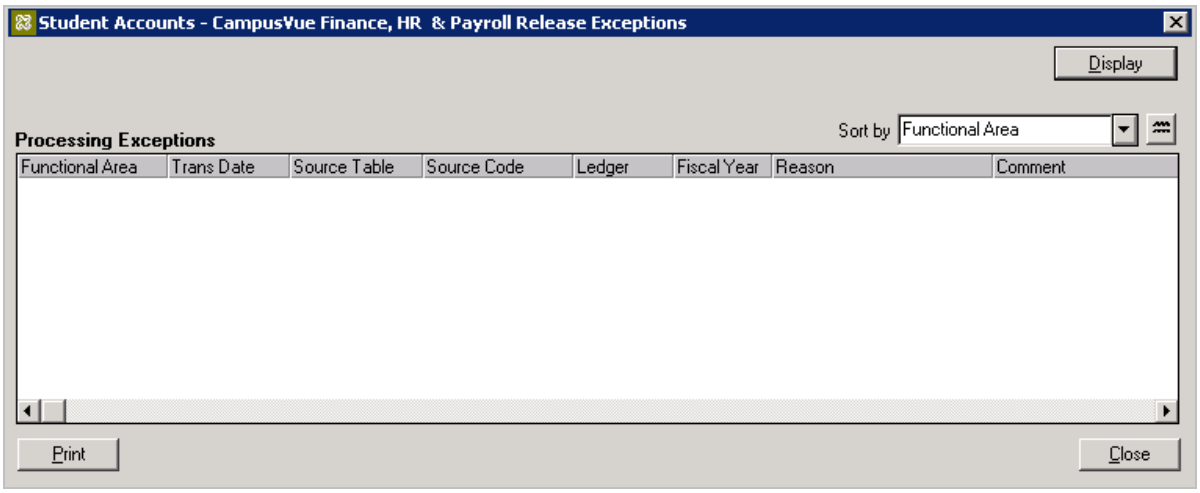
12. If the release process attempts to append transactions to a journal entry in the integrated accounting system, and the GL account and/or the cost account are invalid, the transaction is not added to the journal entry, and an entry is written to the error log.

    To view these processing exceptions, click **Review Exceptions**. The Student Accounts - CampusVue Finance, HR & Payroll Release Exceptions form is displayed.

    The individual responsible for reviewing the error log needs to correct invalid GL accounts and cost accounts. Once this is accomplished, access the Release to CampusVue Finance, HR & Payroll wizard and verify that the error was corrected and that the transaction was appended to a journal entry in the integrated accounting system.

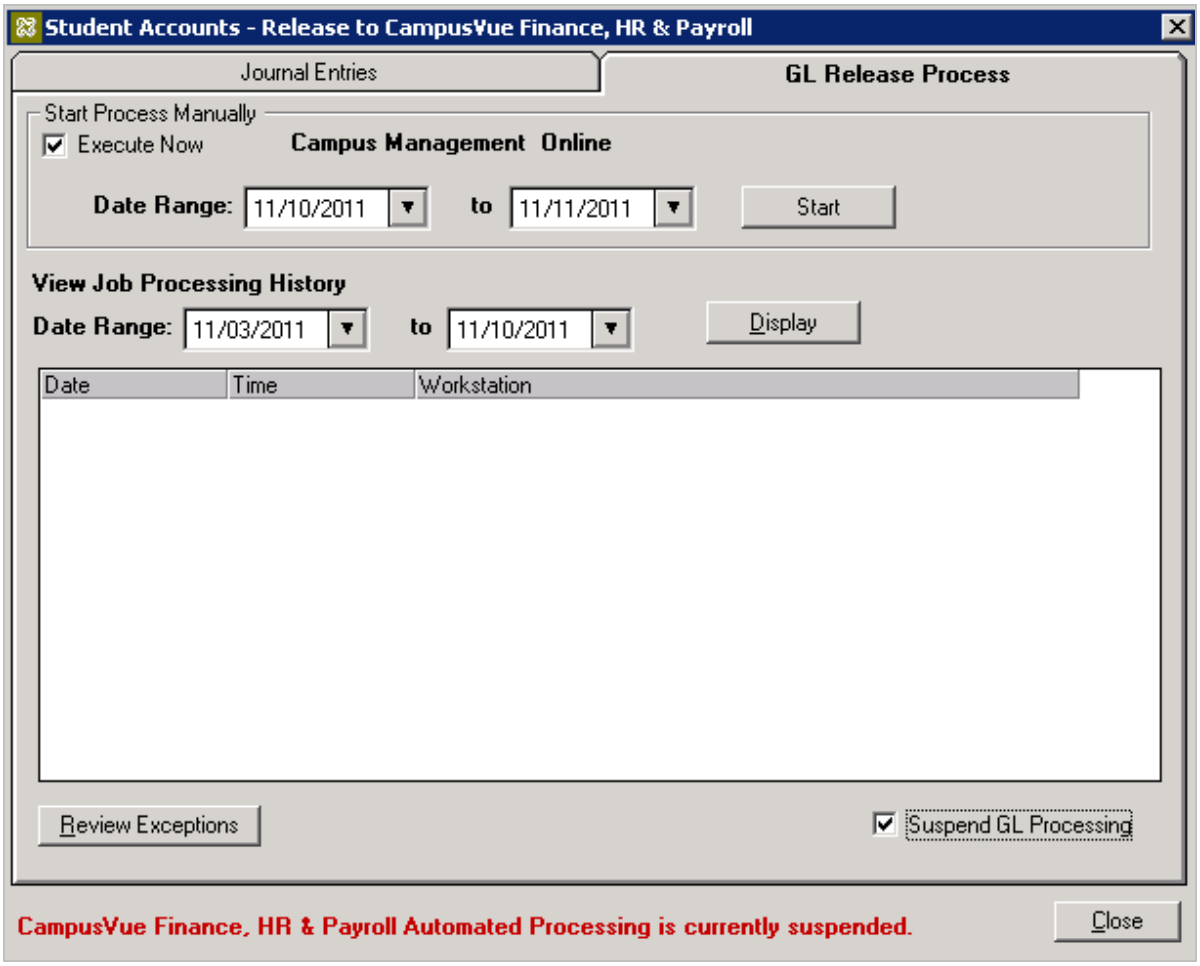
    Other exceptions can also appear in the error log. For example, an entry that is released for an item where the period in the integrated accounting system is closed would be in the log. For any campus using the same Fiscal

Year/Ledger, if errors previously existed in the error log, the period cannot be closed until those errors are fixed. CampusNexus Student attempts to send any transactions not already successfully sent on a previous run, and if successful, deletes the error log entry.



Click **Sort by** to sort the Processing Exceptions list by functional area, transaction date, source table, source code, ledger, fiscal year, reason, comment, or student. Click the up or down arrow to sort in ascending or descending order.

13. Click **Display** to display the latest errors and refresh the data.
14. If using Automated Release to GL, select **Suspend GL Processing** to stop the execution of the release to the accounting system. The message *... Automated Processing is currently suspended* is displayed in the bottom of the Journal Entries and GL Release Process tabs.



15. Clear the **Suspend GL Processing** check box to restart the process. Transactions that were not previously processed before the process was paused are released to the integrated accounting system's general ledger or the error log. The message *... Automated Processing is currently suspended* is removed from both tabs.

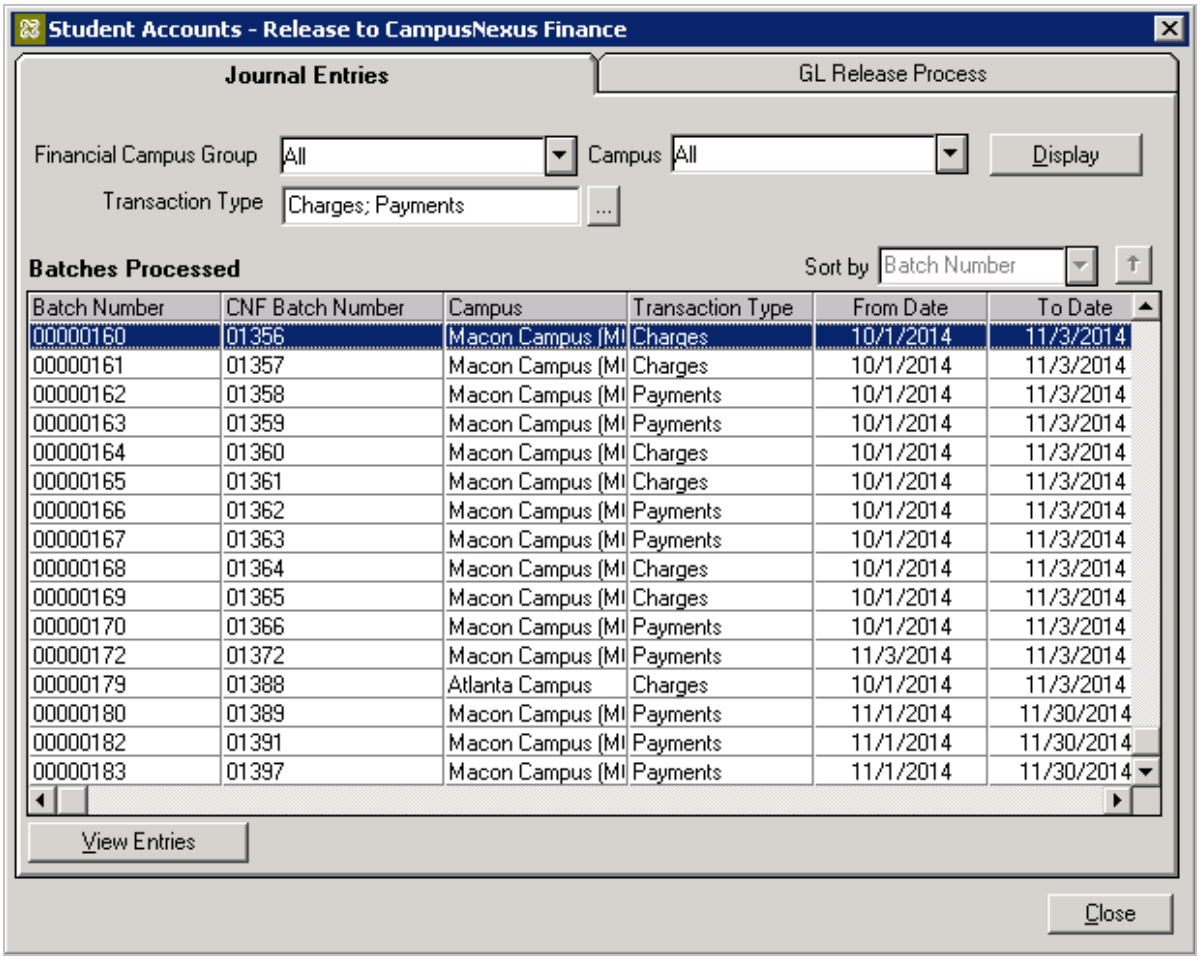
16. Select **Execute Now**, select a **Date Range**, and click **Start** to release transactions with dates in the date range provided in the Start Process Manually section of the form. The transactions in that date range that were not previously processed are released to the integrated accounting system's general ledger or the error log.

    Note: Warning messages are displayed if you attempt to enter a starting date that is below the *minimum* transaction date of the campus, or below the *Go-Live* date of the integrated accounting system. The Go-Live date is stored in the database as an added level of security to ensure transactions prior to the Go-Live date are not released even if the minimum transaction dates are incorrect.

To release transactions to CampusNexus Finance, HR & Payroll:

1. Navigate to **Daily > Student Accounts > Release to General Ledger**. The Student Accounts - Release to CampusNexus Finance, HR & Payroll wizard contains two tabs: Journal Entries and GL Release Process.

2. On the **Journal Entries** tab, you can review and print journal entries within the batch.



Select a **Financial Campus Group**, **Campus**, and/or a **Transaction Type**. The following Transaction Types are available:

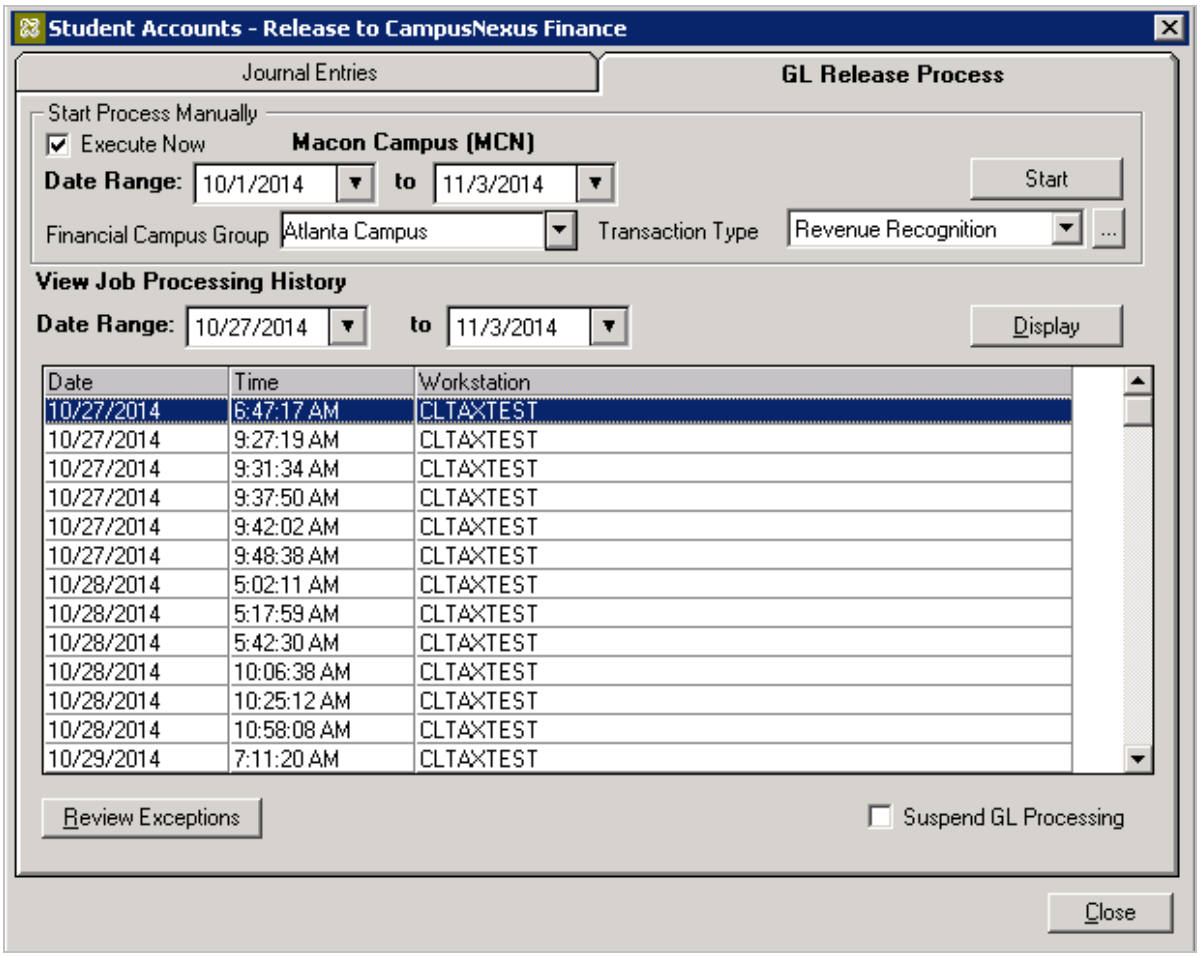
- Stipends
- Refunds
- Disbursements
- Payments
- Charges
- Subsidiary Ledger Payment
- Subsidiary Ledger Charges
- Subsidiary Ledger Refund

Note: When CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll, the Transaction Types 'Revenue Recognition' and 'Miscellaneous Receipts' are not available.

3. Click **Display** to produce a list of the batches processed based on the selections. The following columns are displayed:
   - Batch Number
   - CNF (CampusNexus Finance, HR & Payroll) Batch Number
   - Campus
   - Transaction Type
   - From Date
   - To Date
4. Select the batch from the list and click **View Entries**.

5. Click **Detail** to view the Report Selection form for the General Ledger Posting Detail report. Sort the report by campus, batch number, account number, debit amount, credit amount, transaction date, student name, transaction type, or description.
6. Click Preview to view the report.

   Note: Since Financial Campus Groups can cross multiple campuses, the campus selection tab is disabled on the Report Selection form; however, the report can be sorted by campus.
7. Click **Summary** to view the summary information for the selected journal entry. Click **Back, Forward, Refresh,** and **Closed** to move from page to page, refresh the screen, print the summary, and close the form.
8. Click **Print** to view the printer dialog and select a local or network printer.
9. **GL Release Process** tab:



To manually release transactions to the general ledger of the integrated accounting system, select **Execute Now**, select appropriate values from the following fields:

- **Date Range**
- **Financial Campus Groups**
- **Transaction Type** - The following Transaction Types are available:
  - Stipends
  - Refunds

- Disbursements
- Payments
- Charges
- Subsidiary Ledger Payment
- Subsidiary Ledger Charges
- Subsidiary Ledger Refund

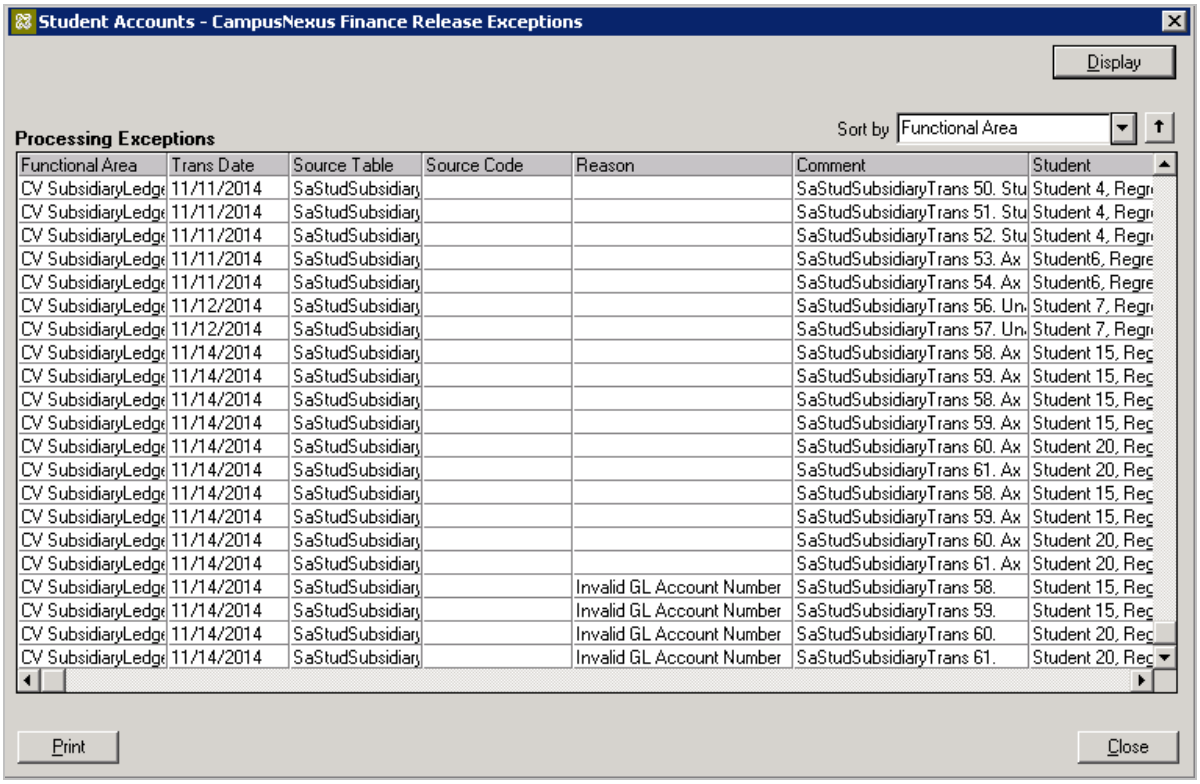
Note: When CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll, the Transaction Types 'Revenue Recognition' and 'Miscellaneous Receipts' are not available.

You can select to release by Financial Campus Group, Transaction Type, or both. By default, the release includes all Transaction Types for the current Campus if no Financial Campus Group or a particular Transaction Type is selected.

When releasing to GL by Financial Campus Group, you will see only those Financial Campus Groups for which you have permissions to all the campuses contained in that group.

10. Click **Start**. Once the process is complete, the Processing History in the lower part of the form is refreshed.
11. Click **Review Exceptions** to display the exceptions that were not successfully added to the proper journal entry.
12. To view the job processing history, select a date range from the **Date Range:** lists, and click **Display**. A list of journal entries per workstation by date and time is displayed containing information about when a batch was last run and who initiated the release to general ledger.
13. If the release process attempts to append transactions to a journal entry in the integrated accounting system, and the GL account is invalid, the transaction is not added to the journal entry, and an entry is written to the error log.

    To view these processing exceptions, click **Review Exceptions**. The Student Accounts - CampusNexus Finance, HR & Payroll Release Exceptions form is displayed.



Click **Sort by** to sort the Processing Exceptions list by functional area, transaction date, source table, source code, ledger, fiscal year, reason, comment, or student. Click the up or down arrow to sort in ascending or descending order.

The individual responsible for reviewing the error log needs to correct invalid GL accounts. Once this is accomplished, access the Release to CampusNexus Finance, HR & Payroll wizard and verify that the error was corrected and that the transaction appears in a journal entry in the integrated accounting system.

Other exceptions can also appear in the error log. For example, an entry that is released for an item where the period in the integrated accounting system is closed would be in the log. CampusNexus Student attempts to send any transactions not already successfully sent on a previous run, and if successful, deletes the error log entry.

Prior to CampusNexus Student version 17.1, details of all errors or warnings were displayed mostly in CampusNexus Finance, HR & Payroll, while exceptions in CampusNexus Student just displayed the message "*Please refer to exception log for details*." Now, all transaction exceptions are captured in both CampusNexus Student and CampusNexus Finance, HR & Payroll, and detailed information is displayed for exceptions related to Release and Posting of:

- Charges and Refunds
- Subsidiary Transactions
- Stipends

14. Click **Display** to display the latest errors and refresh the data.
15. Select **Execute Now**, select a **Date Range**, and click **Start** to release transactions with dates in the date range provided in the Start Process Manually section of the form. The transactions in that date range that were not previously processed are released to the integrated accounting system's general ledger or the error log.

    Note: Warning messages are displayed if you attempt to enter a starting date that is below the minimum transaction date of the campus, or below the Go-Live date of the integrated accounting system. The Go-Live date is stored in the database as an added level of security to ensure transactions prior to the Go-Live date are not released even if the minimum transaction dates are incorrect.

Creating Journal Entries for an Integrated Accounting System

The Release to CampusVue Finance, HR & Payroll OR Release to CampusNexus Finance, HR & Payroll service/job looks for transactions that have not been released to the integrated accounting system and creates a journal entry or appends the transactions to a current period's journal entry.

Revenue Recognition Journal Entry Groups

Clients continue to use the Revenue Recognition wizard in CampusNexus Student. The transaction date is used to determine the end date of the period in which revenue was calculated.

Bank Deposit Journal Entry Groups (CampusVue Finance, HR & Payroll)

Student deposits, payments to student ledger cards, and miscellaneous receipts continue to be entered through CampusNexus Student using the current functionality. Non-sufficient funds (NSF) transactions are not gathered or sent from CampusNexus Student to the integrated accounting system. They are reconciled through the accounting system.

Note: This means that users of the integrated accounting system are REQUIRED to use the Bank Deposits feature in CampusNexus Student.

The payments debit the new Deposits Pending account that is configured (Lists > Student Accounts > Bank Codes > Bank Accounts). These transactions continue to feed the Bank Deposit form (Daily > Student Accounts > Bank Deposit) in CampusNexus Student. Once a user enters a deposit in CampusNexus Student, successfully prints the bank deposit slip, and clicks the Finish button in the Deposit Posting wizard, a record is written to the Bank Reconciliation table in the integrated accounting system.

CampusNexus Student and the integrated accounting system continue to create banking transactions using their respective existing programs; however, to achieve a single bank register for reconciliation and auditing, CampusNexus Student provides the following:

- The Bank Deposit functionality in CampusNexus Student creates deposit transactions in the CampusVue Finance, HR & Payroll's bank register table, which interfaces detail transactions from the Student Ledgers and Miscellaneous Cash Receipts as individual accounting system bank transactions.
- A bank transaction is created for each student deposit and/or Miscellaneous Cash Receipts, and an accounting system General Ledger transaction. Student payments and Miscellaneous Cash Receipts are posted to the accounting system's General Ledger when the 'Release to CampusVue Finance, HR & Payroll' general ledger posting service runs. Those transactions credit an Accounts Receivable account, and debit a Deposits Pending account. When the deposit transactions are entered in CampusNexus Student and sent to the accounting system via the Release to GL, a debit to the bank's General Ledger Cash ledger account and a credit to the Pending Deposits ledger account are made in the Bank Deposit Journal Entry in the accounting system.
- All banking transactions in the accounting system require a Batch identifier for auditing. Therefore, CampusNexus Student uses "CV" concatenated with the SaBankDepID to populate the Batch identifier.

Bank Deposit Journal Entry Groups (CampusNexus Finance, HR & Payroll)

When CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll, bank deposits are done in CampusNexus Finance, HR & Payroll and the Bank Deposits functionality in CampusNexus Student is disabled.

Adjust Transaction (NSF - returned checks) (CampusVue Finance, HR & Payroll)

NSF transactions continue to be processed using the existing functionality in CampusNexus Student (View > Student Accounts > Ledger Cards > Adjust Transaction > Returned Check button), with the following exceptions:

- The transaction debits the Accounts Receivable Account, and credits the NSF Pending account. When the NSF transaction is recorded in the accounting system via the Bank Reconciliation, it credits the Cash account and debit the NSF Pending account. CampusNexus Student allows the NSF Pending account to be associated with each bank account. The NSF Pending account is set up via the (Lists > Student Accounts > Bank Codes > Bank Accounts) path.
- The transaction is available to be picked by the release to the accounting system process that references the accounts receivable and new NSF Pending account. The NSF transaction becomes part of the Bank Reconciliation function in the integrated accounting system.
- These types of transactions do not require a separate journal entry group, rather, it is part of the standard Student Ledger card journal entry.

CampusNexus Student and integrated accounting systems currently support NSF transactions. The timing of the client's notification of NSF checks is controlled by the bank. It may take the form of a letter, or discovered through the monthly bank statement, or during online bank reconciliation.

Regardless of the method and timing of notification, CampusNexus Student must create NSF transactions to update the Student Ledger and miscellaneous cash, while the accounting system must create an NSF bank transaction.

After entry into CampusNexus Student, the NSF transaction is sent to the integrated accounting system via the General Ledger interface. The 'Release to CampusVue Finance, HR & Payroll' service/job looks for transactions that have not been released to the accounting system and creates a journal entry or appends the transactions to a current period's journal entry.

The GL accounts of the NSF transactions should debit the student Accounts Receivable account and credit the Deposits Pending account configured on the Bank Account in CampusNexus Student. This transaction is associated with the appropriate Student Ledger Journal Entry in the integrated accounting system at the time of the Release to GL.

Releasing this NSF 'deposit' to the GL debits the Deposits Pending accounts and credits the NSF Pending account using the Student Accounts Journal Entry. Both these accounts are configured on the Bank Account in CampusNexus Student.

In addition to correcting the Student Ledger or Miscellaneous Cash Receipt, you can enter the NSF transaction through the accounting system's Bank Reconciliation Feature, which will credit the Cash account and debit the selected account (NSF Pending account).

Miscellaneous Receipts Journal Entry Groups

Miscellaneous receipts are grouped in their own journal entries. As with the other transactions, a service/job is scheduled to run on a continuing basis to pick up the transactions that have not been moved over to the appropriate journal entry in the accounting system.

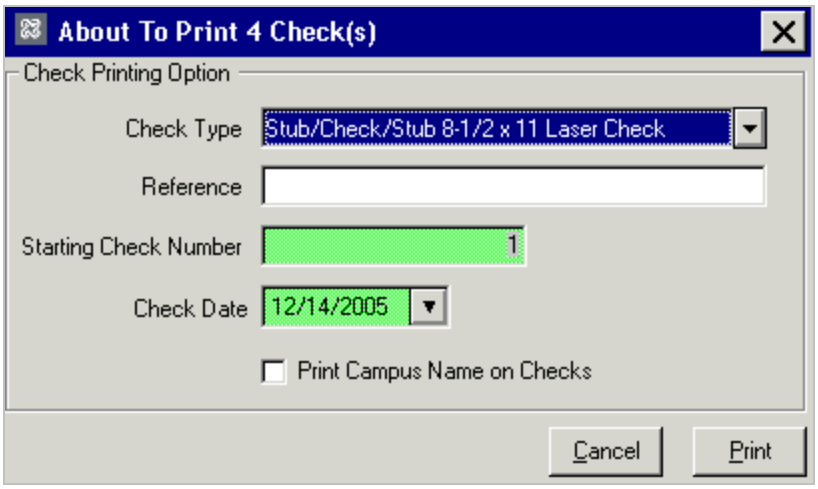
Because the Bank Deposit journal entries are responsible for transferring undeposited cash to the actual cash account when the deposit is made, the service/job sends Miscellaneous receipts to the Deposits Pending account (Lists > Student Accounts > Bank Codes > Bank Accounts).

Stipend and Refund Check Printing (CampusVue Finance, HR & Payroll)

The printing of stipend checks and refunds remains in CampusNexus Student (see Process Refunds/Stipend); however, transactions are sent to the integrated accounting system's Bank Reconciliation function. This includes EFT and ACH transactions and ensures that all transactions affecting the bank accounts are included in the bank reconciliation process in the integrated accounting system.

Note: Beginning with CampusNexus Student 14.0, you can set up unique debit and credit accounts for stipends so that you do not have to use the same accounts as your refunds.

When the Process Refunds/Stipends wizard is used to print checks, the *Starting Check Number* reflects the next available check number for the selected bank account. The check number is a default value that can be overwritten to a higher check number. To make the check number lower, navigate to Lists > Student Accounts > Bank Codes and update the last check number on the appropriate bank account.



Stipend and Refund Check Printing (CampusNexus Finance, HR & Payroll)

When CampusNexus Finance, HR & Payroll is integrated with CampusNexus Student, the check printing functionality is disabled in CampusNexus Student. Checks are printed only from within CampusNexus Finance, HR & Payroll.

CampusNexus Student sends the transaction details for refunds and stipends to CampusNexus Finance, HR & Payroll. The details include:

- Payee Name
- Payee Address
- Amount
- Bank Account
- Campus Name
- Fund ID
- Award Year

- Term
- Payment Period (if applicable)

For refund transactions with payment method 'Master Checks', CampusNexus Student sends the following information in addition to the transaction details to CampusNexus Finance, HR & Payroll for check printing:

- Reference Number
- Bank Account Number
- Payee Name
- Payee Address
- Student ID(s)
- Amount being refunded for each student

CampusNexus Student updates the transaction status in the student ledger to *Pending* once the information has been sent to CampusNexus Finance, HR & Payroll for check printing. The user can select *Show Pending AP Transactions* on the student Ledger Card.

When check printing is completed, CampusNexus Finance, HR & Payroll updates the transactions in CampusNexus Finance, HR & Payroll with the Check Number and Date Paid and sends the same information to CampusNexus Student.

Based on the information received from CampusNexus Finance, HR & Payroll, CampusNexus Student updates the Refund/Stipend transaction with the Check Number and the Date Paid.

In CampusNexus Student, the user can view the Check Number and Date Paid in the following locations:

- View > Student Accounts > Stipend Schedule
- View > Student Accounts > Ledger Card (Check #/Ref# column)

When processing refunds related to Master Checks, CampusNexus Student marks the transactions ready for Release to GL so that the transactions can be sent to CampusNexus Finance, HR & Payroll.

Processing Voids

Student Account administrators can void transactions in CampusNexus Student by using the Adjust Transaction function of the student Student Ledger Card. When a transaction is voided, CampusNexus Student reverses the Credit and the Debit accounts configured on the G/L Link form for charges or the Fund Source Code Setup form for payments for the transaction or fund source associated with the transaction.

Checks are voided and/or rescheduled using the Void Master Check form. The transactions are sent to the banking module of the integrated accounting system if configured to do so.

When CampusNexus Finance, HR & Payroll is integrated with CampusNexus Student, student transactions cannot be voided within CampusNexus Finance, HR & Payroll.

Ledger Cards (CampusVue Finance, HR & Payroll)

All student ledger entries continue to be entered in CampusNexus Student. These transactions need to hit the appropriate GL accounts based on how the transaction codes are configured. NSF transactions are not gathered or sent from CampusNexus Student to the integrated accounting system. They are reconciled through the accounting system.

Currently, an adjustment cannot be made to a transaction if it has already been released to the GL in CampusNexus Student. However, with the Service possibly running every 5 minutes, it would not be feasible to tell customers that they cannot do adjustments once the perpetual service already released the transaction. Therefore, CampusNexus Student allows adjustments to transactions even if the transaction has been released to the accounting system.

When adjustments are made, the integrated accounting system checks if the parent record being adjusted has been released to the GL of the accounting system. If so, the adjustment is also released.

Ledger Cards (CampusNexus Finance, HR & Payroll)

CampusNexus Student maintains the following ledgers:

- Main Ledger (charges, refunds, stipends, payments and related voids)
- Subsidiary Ledger(charges, refunds, payments and related voids)

CampusNexus Finance, HR & Payroll has only one ledger (Student Ledger) that shows the transactions from all CampusNexus Student ledgers and thereby includes all balances for calculating the ledger balance. In version 2.1 and later, CampusNexus Finance, HR & Payroll provides a filter that allows the user to view each of the CampusNexus Student ledgers separately. The default view is the Main Ledger. CampusNexus Finance, HR & Payroll calculates the balances depending on the selected ledger so that the balances can be reconciled with the separate ledgers in CampusNexus Student.

Subsidiary Transaction

CampusNexus Student allows adjustments to transactions even if the transaction has been released to the integrated accounting system because the perpetual service looks for transactions on a regular basis and posts them to the integrated accounting system. See also Student Subsidiaries.

When adjustments are made, CampusNexus Student checks if the parent record being adjusted has been released to the accounting system's GL. If so, the adjustment is also released when the service makes its pass on Subsidiary Adjustment Transactions.

For more information, see Adjust Transaction and Process Refunds/Stipends.

Configuring Automated Release to the Integrated Accounting System (CampusVue Finance, HR & Payroll)

The automated process is configured using a configuration file editor located in the CampusNexus Student folder `C:\ProgramFiles\cmc\CampusNexus Student\Cmc.CampusVue Finance, HR & Payroll.GL.ClientService.Configuration.exe`. Anthology Inc. Integration Service provides instructions on how to configure these options. The following types of options can be configured.

- Web Service URLs
- CampusNexus Student user name that is used as the login by the service to release records to the integrated accounting system
- Campuses which should automatically have transactions released to the integrated accounting system
- Polling interval indicating how often the service runs. Some clients may want the process running every 10 seconds, while others only want it running every 5 minutes (300 seconds).

Release to General Ledger

The General Ledger Release must include transactions that are tied to a subsidiary and payments that are made to a subsidiary. This option exports batches of the standard transactions, including summarized ledger card and revenue transactions, and the transactions held in the subsidiary transaction table, to your general ledger (G/L) system. G/L account numbers are associated with the transaction codes. The posting produces a summary and detail report. The user can also export the transactions, by account number, to a text file or HTML document. **The only proprietary transaction format supported at this time is Great Plains Software.** G/L transactions can be exported to other systems via generic flat files.

The release to G/L uses the Campus ID from the revenue ledger when looking up the G/L account numbers. An enrollment can have revenue entries for more than one campus. CampusNexus Student uses the Campus ID from the deferred revenue entry.

When you release transactions to the G/L, the related records in CampusNexus Student are marked as posted. Therefore, they will not be included in any future new batch. Be sure that you are ready to release the activity from CampusNexus Student to the general ledger system before you click OK at the end of this procedure.

It is possible to rebuild a previously released batch for recreating the export file. The same transactions are used with the same date and batch number.

Financial Aid Fund Sources

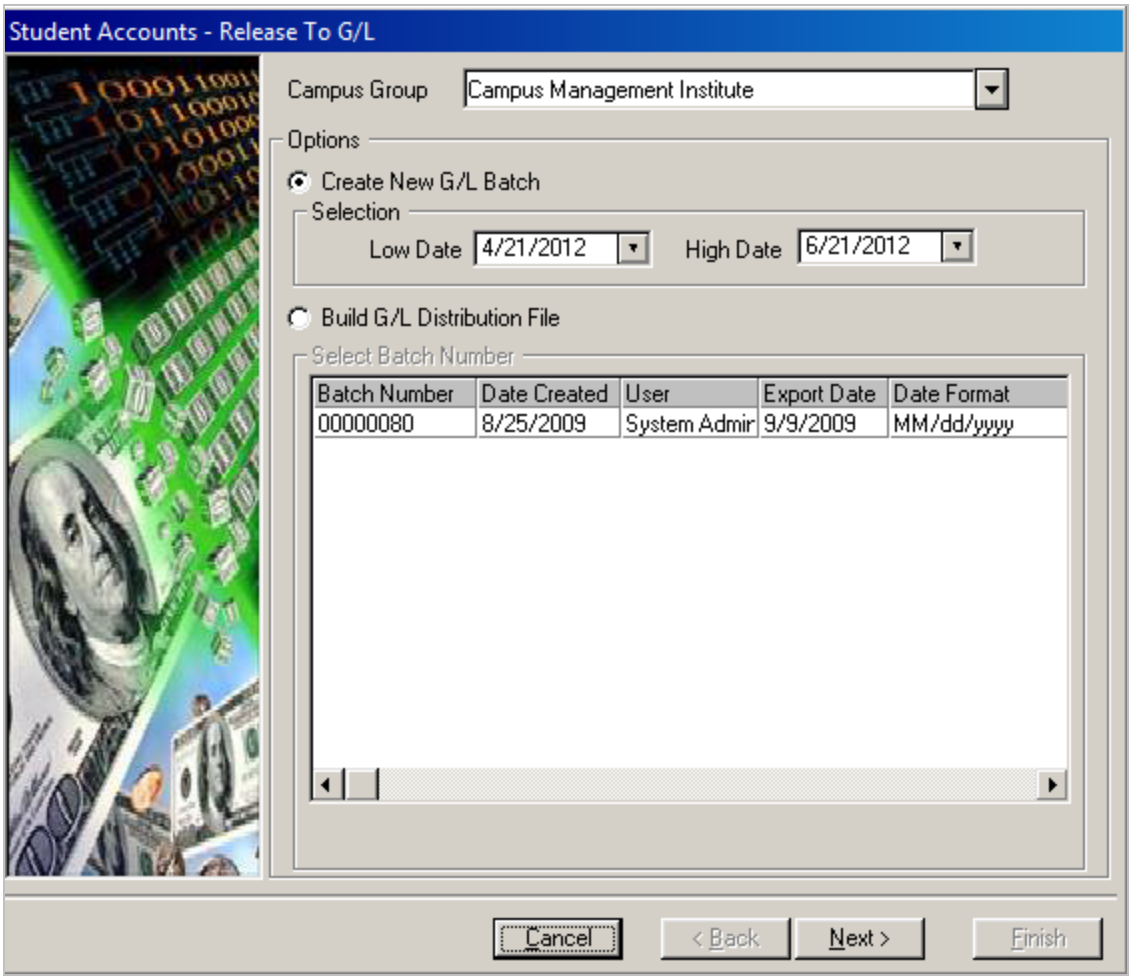
The Release to General Ledger option gathers the GL accounts for monies received from and refunded to FA fund sources. If GL debit and/or credit accounts are specified for a fund source, these accounts are used to post for this fund source as opposed to the default accounts used for cash received and refunded transactions. GL accounts are set up under Lists > Financial Aid > Fund Source.

Reports

The G/L Summary and Detail reports and the G/L Account code setup report are displayed in HTML. When viewing the summary, G/L accounts tied to subsidiaries are included. When viewing the detailed report of the G/L Release, you can see any transactions or payments made to subsidiaries as part of the overall journal entry that the G/L Release logic constructs. To print the HTML report, right-click on the report and select Print.

To release transactions to your G/L system (create a transaction list and file):

1. Navigate to **Daily** > **Student Accounts** > **Release to General Ledger**. The Student Accounts - Release to G/L wizard is displayed. The wizard defaults to the **Campus** in which you are currently working. If you are so authorized, the Campus Group list will be available and you can select another group.



2. Select **Create New G/L Batch** to start a new batch of general ledger transactions, or select **Build G/L Distribution File** to build another distribution file from a batch that was previously released.
3. If you selected the **Create New G/L Batch** option, enter the **Low Date** and **High Date** of transactions to be included in the batch.
4. If you selected the **Build G/L Distribution File** option, select the **Batch Number** for which a distribution file is to be built.
5. Click **Next**.

   CampusNexus Student gathers the appropriate transactions to be included in the batch and presents a **G/L Summary** in a grid format. The **Batch Number** will be shown at the bottom of the grid.
6. You can set the batch number to be assigned to the next G/L batch at **Setup > Student Accounts**.
7. To export the data to a file, click the **Export GL to File** button and select the format and path to save the file. The format and export path are set up in Setup > Student Accounts > Additional tab > G/L Export File Definition.

   Note: If the file export destination detail is configured in Setup > Student Accounts > Additional > GL Export File Definition:

- The message *"GL File will be exported to a specified location (include destination location in message) - select OK to continue."* is displayed. Click **OK** or **Cancel**.
- If you select **OK**, the Export GL File will automatically be transported to the destination defined via Setup > Student Accounts > Additional > GL Export File Definition.

If no file export destination detail is configured in Setup > Student Accounts > Additional > GL Export File Definition, CampusNexus Student provides the default mapped location that is configured in Setup > Campus Location > Accounting > GL Export, and you will receive confirmation notification that file was saved successfully.

8. Click **Detail** to view and/or print a Crystal report listing all the student transactions that make up the summary. The Company Number (for the campus) will be added to the GL account numbers in the exported transactions.

   This report can also be exported to Excel.

9. Click **Print**.
10. Click **Next**. The message *"OK to Post G/L Entries?"* is displayed. Be sure before you answer this question. Answer **Yes** to continue with the release procedure.

    CampusNexus Student disables "Next" if there is a problem with the GL Link setup, (for example, when an invalid account is found during the gather).
11. The wizard completes the posting procedure and displays a confirmation message. Click **OK** and continue.
12. The wizard prompts for some information to **Process G/L Distribution File**. Select your **General Ledger** system. Enter a **File Name** for the distribution file or browse to the directory location. Select a file **Format** for your distribution file.
13. Click **Build** to build the G/L Distribution File. When the file has been successfully created, the wizard displays a confirmation message. Click **OK** to acknowledge the message.
14. Click **Finish** to close the wizard.

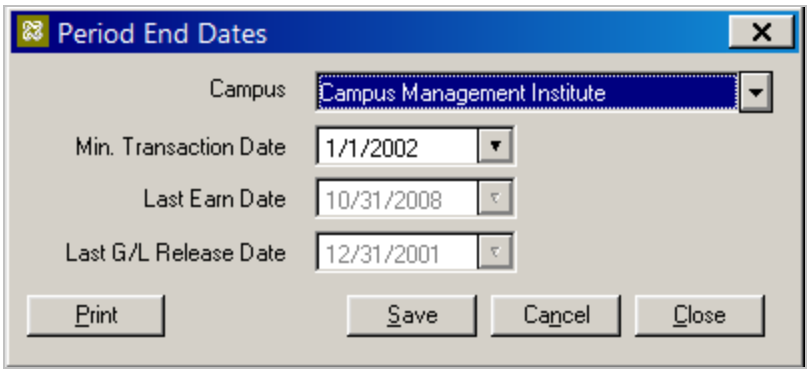
Period End Dates

Use the Period End Dates option to view significant dates in the periodic accounting activities of the institution. For campuses to which the user has access, the form shows the Minimum Transaction Date, the Last Earn Date, and the Last General Ledger Release Date. The dates are the same ones shown on the Accounting tab in the Campus Detail form. You can edit the Minimum Transaction Date.

Security for this form follows the normal CampusNexus Student security rules. If the menu option is not available on your screen, access has not been granted by the system administrator.

To change the Minimum Transaction Date:

1. Navigate to **Daily** > **Student Accounts** > **Period End Dates**. The Period End Dates form is displayed.



2. Select the **Campus** for which you want to change the Minimum Transaction Date.
3. Select the **Minimum Transaction Date**. This is the date before which ledger transactions will not be accepted. It is normally updated after you run the Release to General Ledger procedure. CampusNexus Student rejects transactions with dates earlier than this date.
4. Click **Print** to print a report of the dates on the form. For each campus, the report lists the Campus Code, Campus Name, Revenue Run date, GL Released date, and Minimum Transaction Date. You can export the reported information to Excel.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Student Subsidiaries

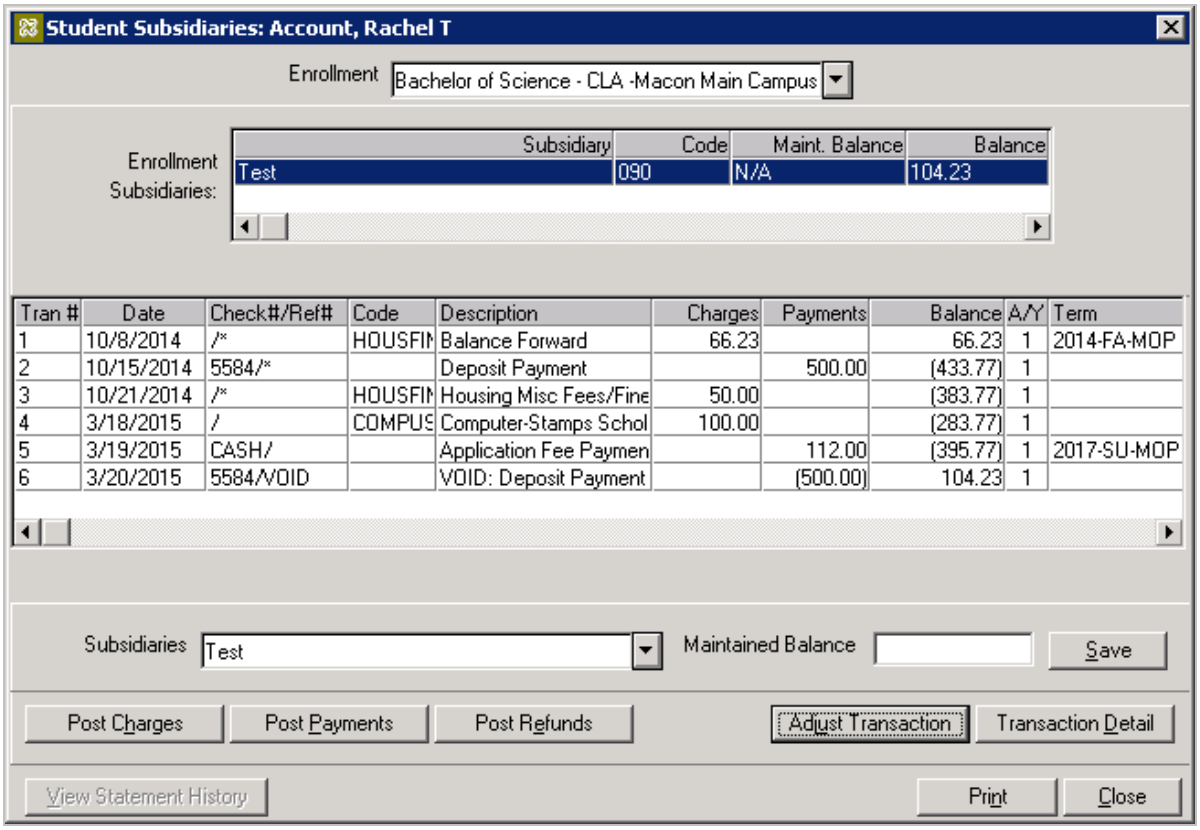
Transactions posted to a student's subsidiary account do not affect the student ledger card balance but affect the balance of the subsidiary. Funds can be released from a subsidiary to the student general ledger card to address situations that arise, for example, when a student pays a housing deposit and then must be charged for damages out of that deposit.

Refer to the following topics related to student subsidiaries:

- Creating a subsidiary
- Configuring a maintained balance
- Posting payments or charges to a subsidiary
- Posting refunds
- Processing refunds/stipends
  Refer to this topic for information about specific conditions that apply when CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll.
- Adjusting a transaction
  Refer to this topic for information about limitations that apply when adjusting a transaction and specific conditions that apply when CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll.
- Viewing transaction details
- Transferring subsidiary transactions upon an enrollment transfer

To create a subsidiary:

1. Select a student.
2. Navigate to **View** > **Student Accounts** > **Subsidiary**. The Student Subsidiaries form is displayed (if the 'Use Subsidiary' setup flag is True).



3. Select an **Enrollment**.
4. Select a subsidiary in the **Subsidiaries** field.
5. Enter the **Maintained Balance** amount for the selected subsidiary for that student. This is the balance the student must maintain in the subsidiary. This is entered in the form of a credit balance. For example, if a student must have $500.00 balance on file, that will reflect as a credit balance of -500.00 or be displayed as (500.00).
6. Click **Save**. The saved subsidiary appears in the Enrollment Subsidiaries section displaying the Subsidiary name, Code, Maintained Balance, and Balance. The balance is calculated using the same logic that is used for the regular ledger card. Payments create a negative balance, while charges increase the balance.

   As charges and payments are posted to the subsidiary, they appear beneath the Enrollment Subsidiaries section of the form, displaying details such as Transaction number, Date, Check number and Reference number, Code, Description, Charge amount, Payment amount, Academic Year, and Term.
7. Click **Print** to print a report of the charges and payments posted to the selected subsidiary.

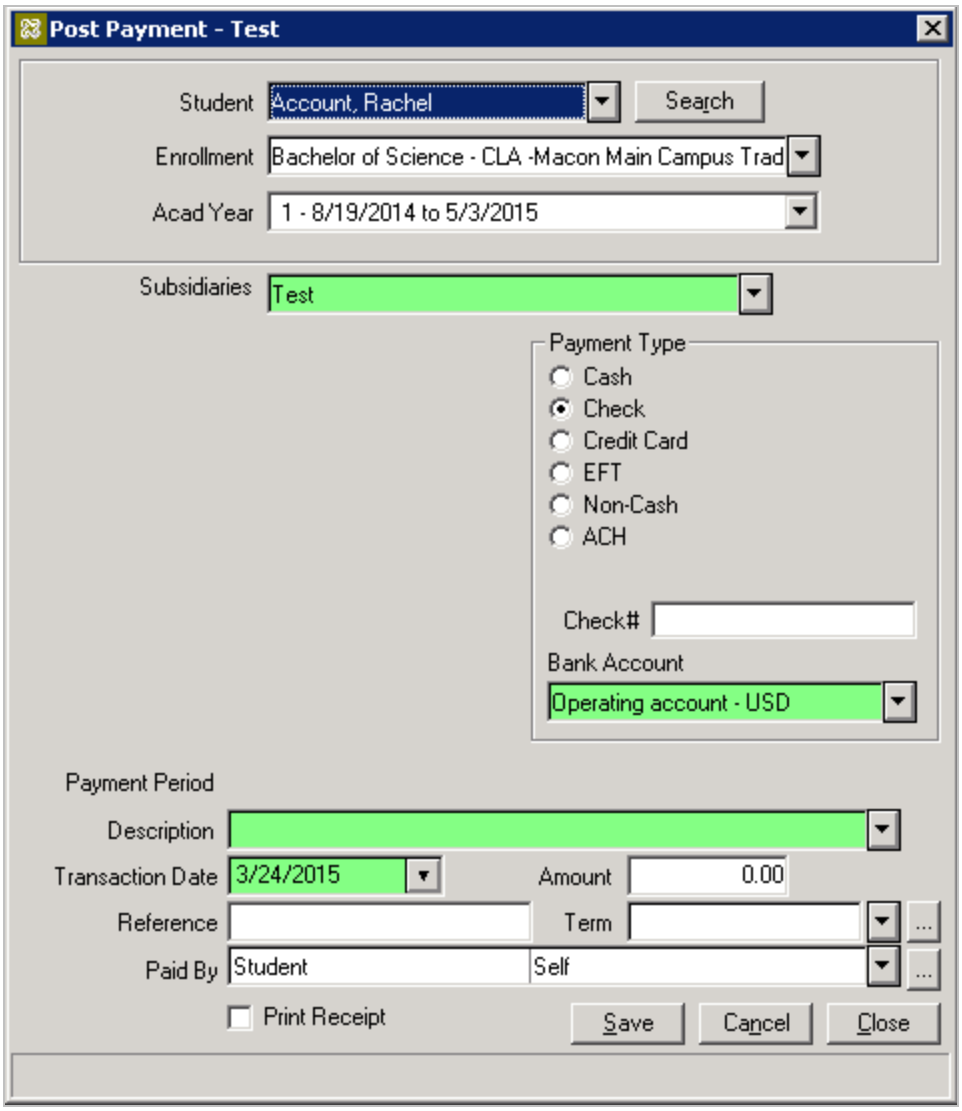
   Note: You can also print Subsidiary statements for 'All Enrollments' from the Subsidiary form.

To post payments or charges to a subsidiary:

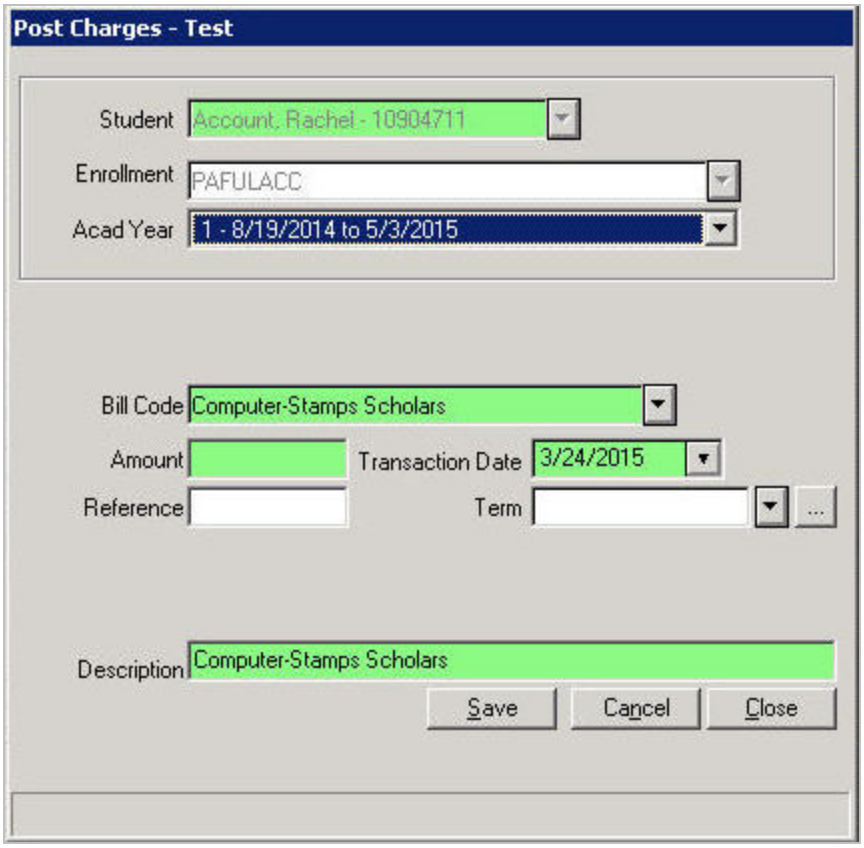
A new subsidiary can have payments and charges posted to it. Payments create a negative balance while charges increase the balance. You can designate to which subsidiary a payment is posted.

When a charge is posted with a transaction code that is associated with a subsidiary, the charge is posted only to the appropriate subsidiary without being reflected on the student ledger card. If the student has a credit balance in the subsidiary due to a deposit and that amount is not enough to cover the cost of the charge, there will be a positive balance on the subsidiary.

1. Navigate to **View** > **Student Accounts** > **Subsidiary**. The Student Subsidiaries form is displayed.
2. Select a subsidiary from the **Enrollment Subsidiaries**.
3. To post a payment, click **Post Payment**. The Post Payment form is displayed. The name of the selected subsidiary is displayed on the title bar.



4. To post a charge, click the **Post Charges** button. The Post Charges form is displayed. The name of the selected subsidiary is displayed on the title bar.



5. Complete applicable fields on the Post Payment or Post Charges form.
6. Click **Save**.
    - For a payment, only the balance on the subsidiary is affected.
    - For a charge, the balance on the subsidiary is increased.
7. Click **Close** to close the form. You are returned to the Student Subsidiaries form, which now displays the payment or charge you just posted.
8. Click **Print** to print a receipt for the payment or charge. You can view the receipt before it is printed.
9. Click **Close** to close the form.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

Audit Features

The audit features for Student Accounts include:

- CampusNexus Student stores the name of the payee on each refund record, stipend record, and subsidiary refund so that it can be retrieved for reporting purposes.
- CampusNexus Student audits changes to the payee for refunds and stipends. Auditing occurs from the time the refund or stipend is scheduled to the time the refund or stipend is processed. The date changed, time changed, and the user who made the change are audited.
- Payee changes are audited for subsidiaries.

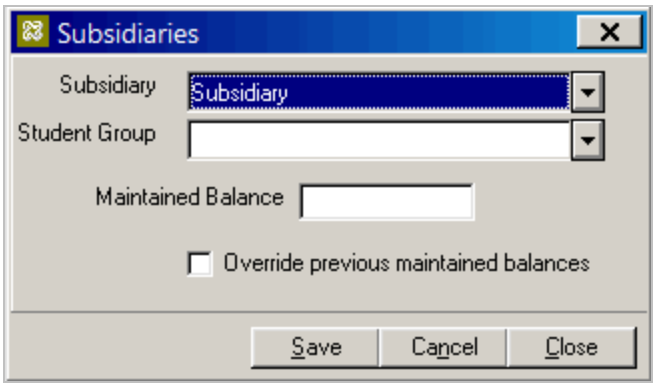
- Payee information for a stipend can be edited regardless of the fund source associated with the stipend. The payee changes are audited for all stipends.
- Your ability to edit a payee for a refund is dependent on the fund source associated with the refund. The payee changes are audited only for the fund sources that allow the payee to be changed.
- You can sort on different columns of the grids available in the Process Refunds/Stipends wizard.
- A student account administrator can define that the Reference information is printed on the check, below the address, or on the stub, or in both places.
- A student account administrator can view the ID of the user who scheduled the refund/stipend using the Ledger Card, Transaction Detail button.
- CampusNexus Student stores the user ID of the user who scheduled the stipend so that it does not get overwritten by the user ID of the user who posted the stipend.

Configure Balance

When a subsidiary is created, there is no maintained balance associated with it because this must be done at the student level. You can configure a maintained balance individually for a student or in batch for multiple students in a student group. The maintained balance is entered in the form of a credit balance. This balance is the minimum balance the student must maintain in the subsidiary, otherwise, the student is billed the difference between the current balance and the Maintained Balance. This amount can be different on a per-student basis.

To configure a maintained balance:

1. Navigate to **Daily** > **Student Accounts** > **Subsidiaries** > **Configure Balance**. The Subsidiaries form is displayed.



2. Select a **Subsidiary**.
3. In the **Maintained Balance** field, enter the dollar amount that must be maintained in the subsidiary.
4. Select the appropriate **Student Group**.
5. Select **Override Previous Maintained Balances** to change the maintained balance amount for any student in the student group who previously had a maintained balance. If you do not select this check box, students who already have a maintained balance in the selected subsidiary are not affected by any changes to maintained balances.
6. Click **Save** to update the maintained balance and click **OK** to confirm this action.
7. Click **Close** to close the form.

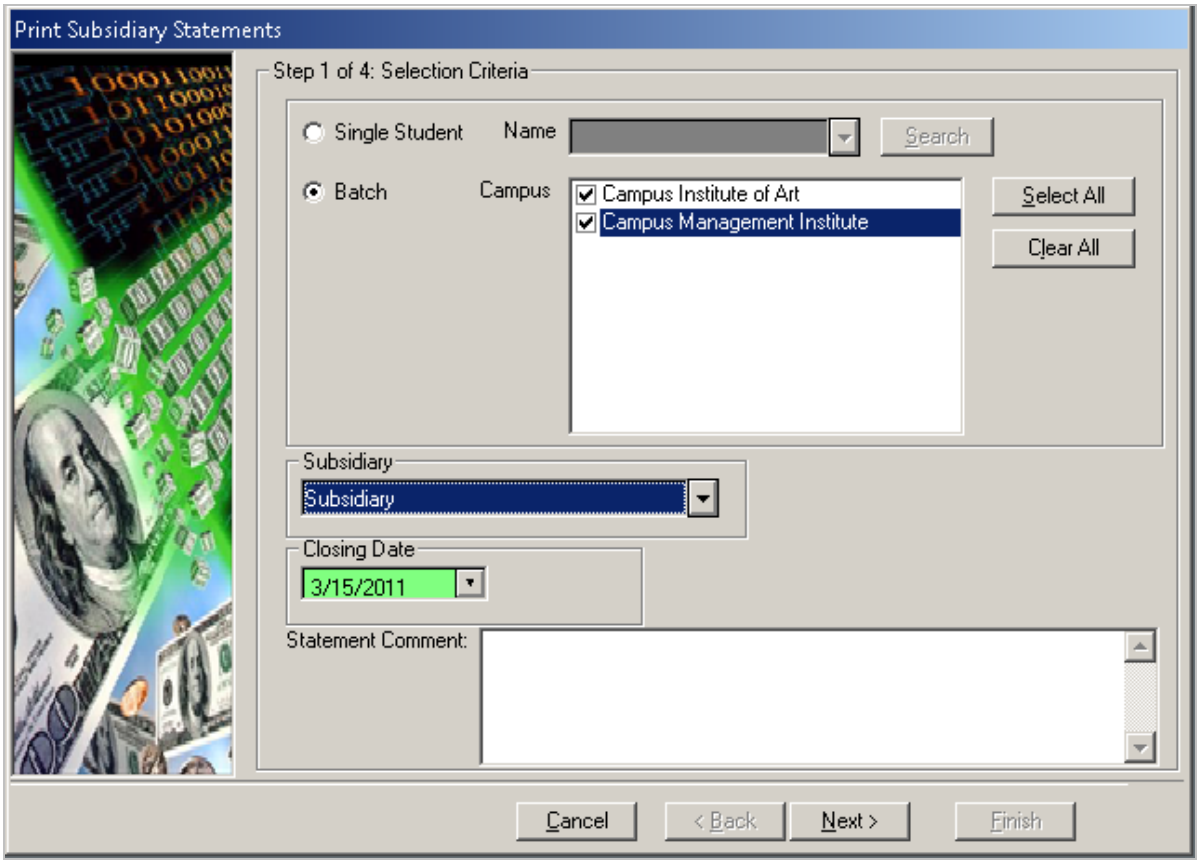
Subsidiary Statements

CampusNexus Student can be used to print subsidiary statements in batches or for individual students. Various filtering criteria are available to select the students for whom subsidiary statements will be printed.

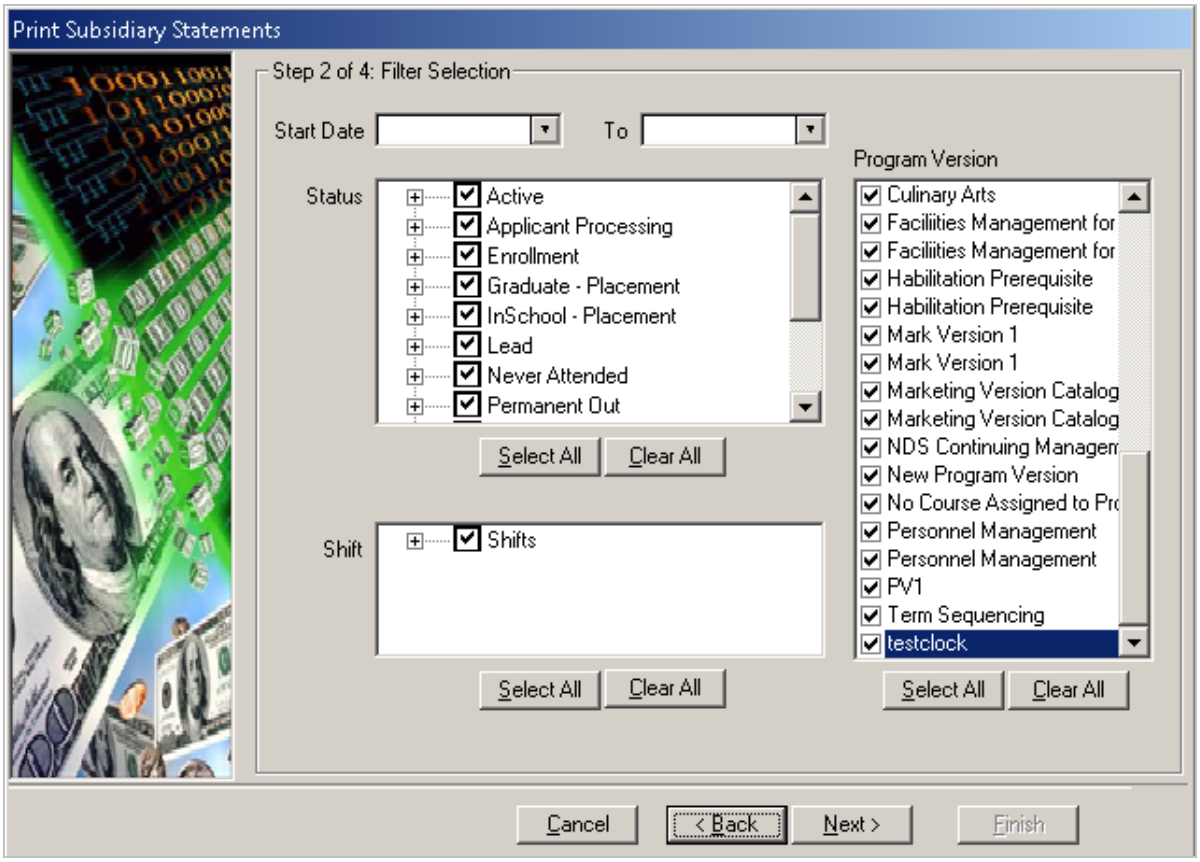
Note: To protect student privacy, staff member and staff groups are prevented from viewing, printing, or exporting student Social Security Numbers (SSNs) unless the system administrator has set up the necessary security rights to allow these functions. See Social Security Number Privacy for security rights instructions.

To print subsidiary statements:

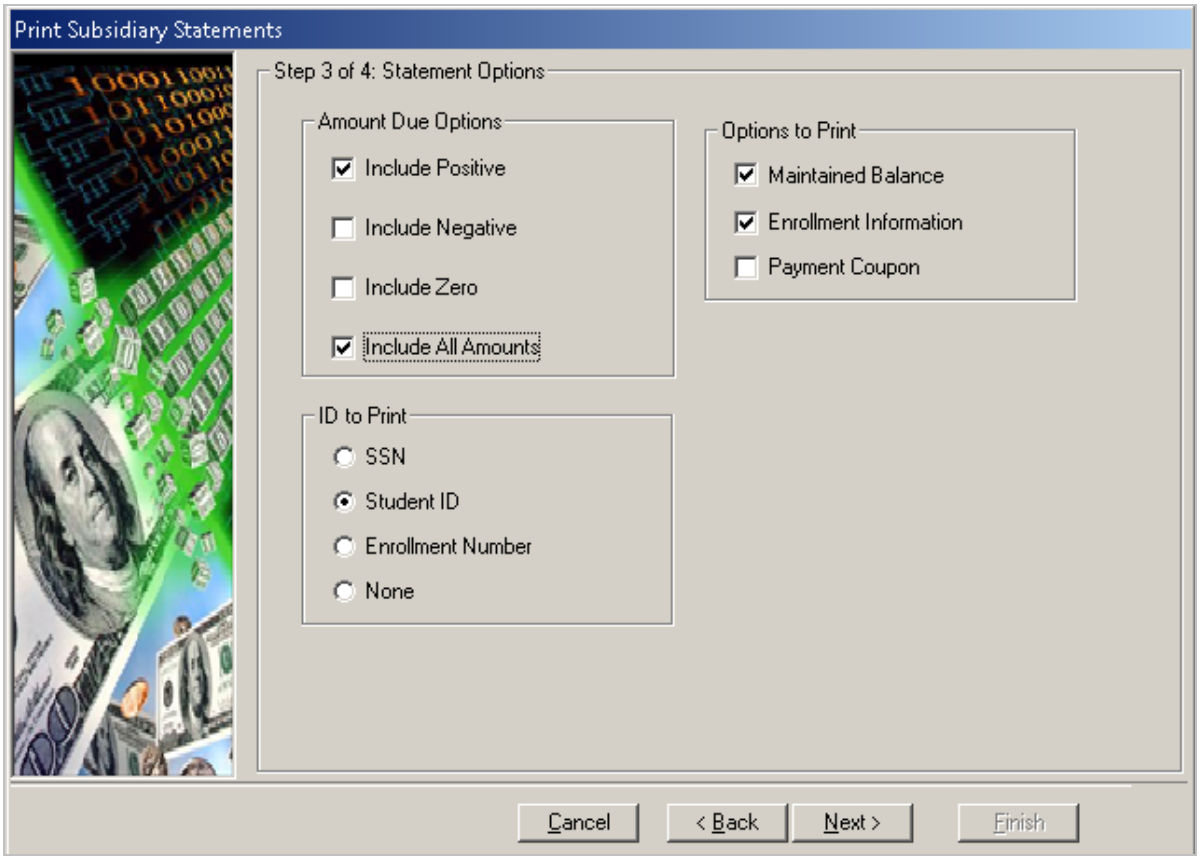
1. Navigate to **Daily > Student Accounts > Subsidiaries > Subsidiary Statements**. Step 1 of 4: Selection Criteria of the Print Subsidiary Statements wizard is displayed.



2. Select a **Single Student** or **Batch** for which to print statements.
3. In the **Campus** box, select one or more campuses for which to print statements. Use the **Select All** and **Clear All** buttons to select or clear all check boxes, respectively.
4. Select the **Subsidiary** account for which the statement will be generated.
5. Enter or select the **Closing Date**. After you print statements the first time, CampusNexus Student will add one month to the date and use it as a default date the next time you run the Print Subsidiary Statements wizard.
6. Enter an optional **Statement Comment** to appear at the bottom of each printed statement. You can prevent users from editing this field.
7. Click **Next**. Step 2 of 4: Filter Selection of the wizard is displayed.



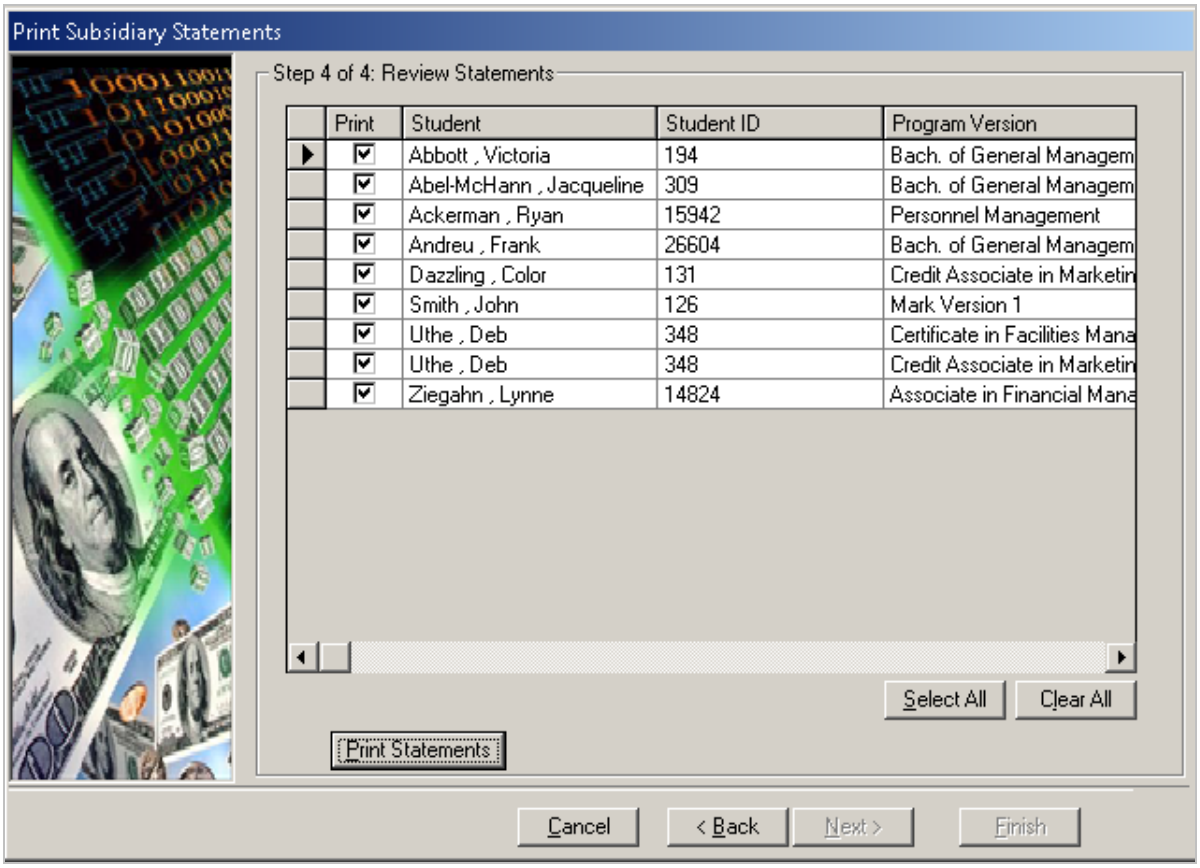
8. If applicable, select a **Start Date** and **To** date to specify a date range for your selection.
9. Select the student **Status** criteria. Click **Select All** to select all student school statuses or **Clear All** to clear previous status selections. Or, select statuses individually using the check boxes. Click the plus signs to expand the status categories to see more status detail. You must select at least one school status for statements to be printed.
10. Select the **Shift(s)** for which statements are to be printed. Use **Select All** to select all shifts or **Clear All** to clear previously selected shifts. Click the plus signs to expand the list items to see more detail. You must select at least one shift for statements to be printed.
11. Select the **Program Version** criteria. Click **Select All** to select all program versions or **Clear All** to clear previous program version selections. Or, select program versions individually using the check boxes. You must select at least one program version for statements to be printed.
12. Click **Next**. **Step 3 of 4: Statement Options** of the wizard is displayed.



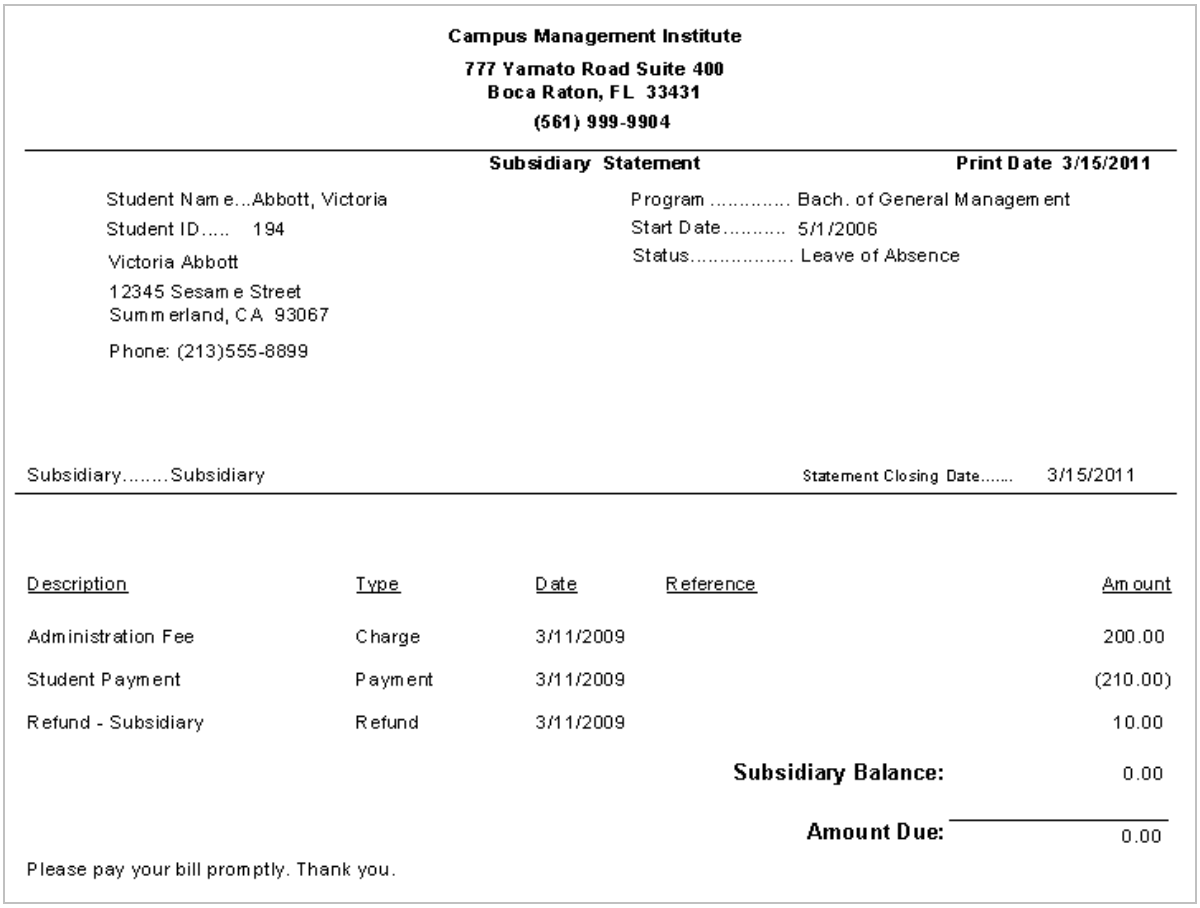
13. Select the **Statement Options** that you would like printed.

    Note: If the **Payment Coupon** option is selected, the configured **Remittance Address** will be used on the return coupon.

14. Click **Next**. In Step 4 of 4: Review Statements, you can review the listing of students for whom the statements will be printed. Use the check boxes in the **Print** column to include/exclude individual students from the listing. Use the **Select All** and **Clear All** buttons to assist you in your selection.



15. Click **Print Statements.** The report form will start and load a preview of the statements into the Report Viewer. From there, you may review and print the statements as needed. An example of a Subsidiary Statement is shown below.



Campus Management Institute
777 Yamato Road Suite 400
Boca Raton, FL 33431
(561) 999-9904

Subsidiary Statement **Print Date 3/15/2011**

Student Name...Abbott, Victoria
Student ID..... 194
Victoria Abbott
12345 Sesame Street
Summerland, CA 93067
Phone: (213)555-8899

Program ..... Bach. of General Management
Start Date..... 5/1/2006
Status..... Leave of Absence

Subsidiary.....Subsidiary — Statement Closing Date..... 3/15/2011

Description	Type	Date	Reference	Amount
Administration Fee	Charge	3/11/2009		200.00
Student Payment	Payment	3/11/2009		(210.00)
Refund - Subsidiary	Refund	3/11/2009		10.00
			Subsidiary Balance:	0.00
			Amount Due:	0.00

Please pay your bill promptly. Thank you.

16. After you view and print your statements, close the Report Viewer. The **Print Subsidiary Statements** wizard is still open in your work area.
17. Select the appropriate answer to the question **'Did statement(s) print okay?'**.
    - If your answer is **Yes**, the wizard closes when you click **Finish**.
    - If your answer is **No**, the wizard returns to **Step 1 of 4: Selection Criteria**.

Schedule Refunds/Transfer Balances

Institutions need to refund or transfer any credit balance from the subsidiary ledger when a student finishes a term, leaves the institution, or the student's housing status changes.

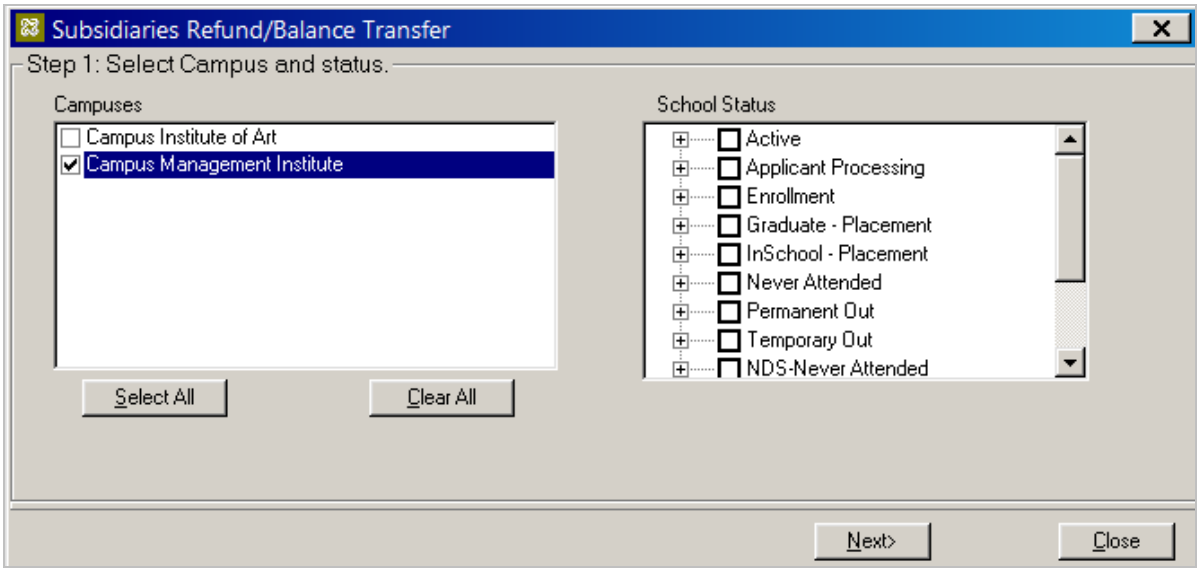
If the subsidiary balance is on a graduate status enrollment and the student has another enrollment with a future or active status when the student's subsidiary is loaded into the grid, the balance is transferred by default. This also applies to NDS statuses.

You can schedule subsidiary refunds for students with a credit balance or transfer the balance to another enrollment for a batch of students or for individual students.

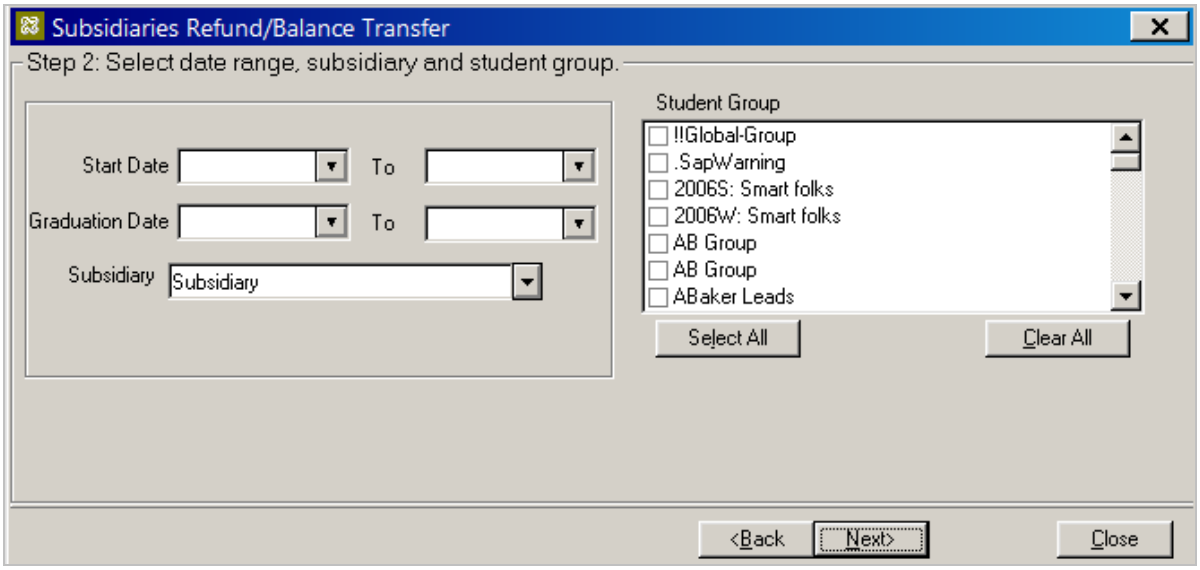
- To post refunds or transfer balances for groups of students, see Batch Process.
- To post refunds or transfer balances for individual students, select a student, navigate to **View** > **Student Accounts** > **Subsidiary**, select a subsidiary, and click **Post Refunds**. For more information, see Post Refunds.

Batch Process

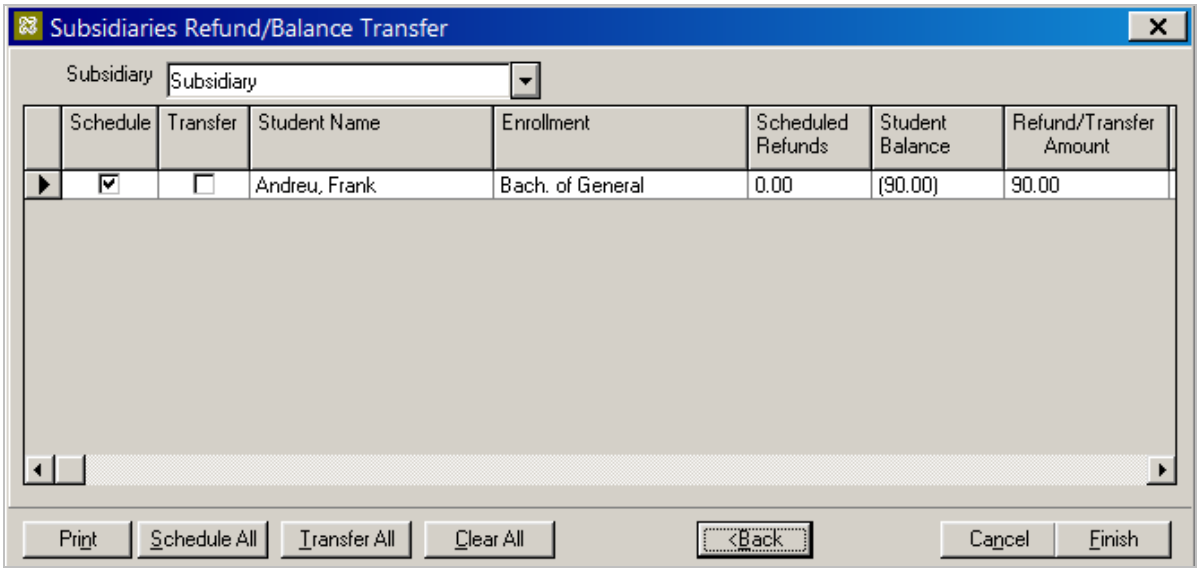
1. Select **Daily** > **Student Accounts** > **Subsidiaries** > **Schedule Refunds/Transfer Balances**. The Subsidiaries Refund/Balance Transfer form is displayed.



2. Select the **Campuses** and **School Statuses**.
3. Click **Next**. The Subsidiaries Refund/Balance Transfer Step 2 form is displayed.



4. Select a **Start Date** range or a **Graduation Date** range.
5. Select a **Subsidiary** to process.
6. Select the **Student Group**.
7. Click **Next**. Students with a credit balance in the selected subsidiary are listed. Select any or all students to receive the refund or transfer the balance.



Note: The default selection is 'Transfer' for students with a credit balance on a Grad enrollment and a Future or Active enrollment (including Non-Degree Seeking) outside the enrollment gathered by the selection criteria.

8. Click **Finish** to schedule the refund and transfer funds for the selected students.

   When a balance is transferred, the subsidiary ledger for the enrollment the balance was transferred to will contain one adjustment transaction in the amount that was transferred. The adjustment is posted using the default bill code configured for the selected subsidiary ledger.

Audit Features

The audit features for Student Accounts include:

- CampusNexus Student stores the name of the payee on each refund record, stipend record, and subsidiary refund so that it can be retrieved for reporting purposes.
- CampusNexus Student audits changes to the payee for refunds and stipends. Auditing occurs from the time the refund or stipend is scheduled to the time the refund or stipend is processed. The date changed, time changed, and the user who made the change are audited.
- Payee changes are audited for subsidiaries.
- Payee information for a stipend can be edited regardless of the fund source associated with the stipend. The payee changes are audited for all stipends.
- Your ability to edit a payee for a refund is dependent on the fund source associated with the refund. The payee changes are audited only for the fund sources that allow the payee to be changed.
- You can sort on different columns of the grids available in the Process Refunds/Stipends wizard.
- A student account administrator can define that the Reference information is printed on the check, below the address, or on the stub, or in both places.
- A student account administrator can view the ID of the user who scheduled the refund/stipend using the Ledger Card, Transaction Detail button.
- CampusNexus Student stores the user ID of the user who scheduled the stipend so that it does not get overwritten by the user ID of the user who posted the stipend.

Post Payments

You can post payments from students, third parties, and other fund sources, or apply payments to open items in the student ledger or subsidiary ledger. The Post Payments process can handle scheduled payments from various fund sources. Payments can be linked to enrollments, terms, and financial aid payment periods. See also Process Electronic Drafts and Posting Cash/Other Payment Plans (Reamortizing future payments).

Use the Post Payments form to post a scheduled payment or unschedule a payments before they are posted. See Campus Financial Aid - Auto Stipends for information regarding Title IV funds and associated waivers.

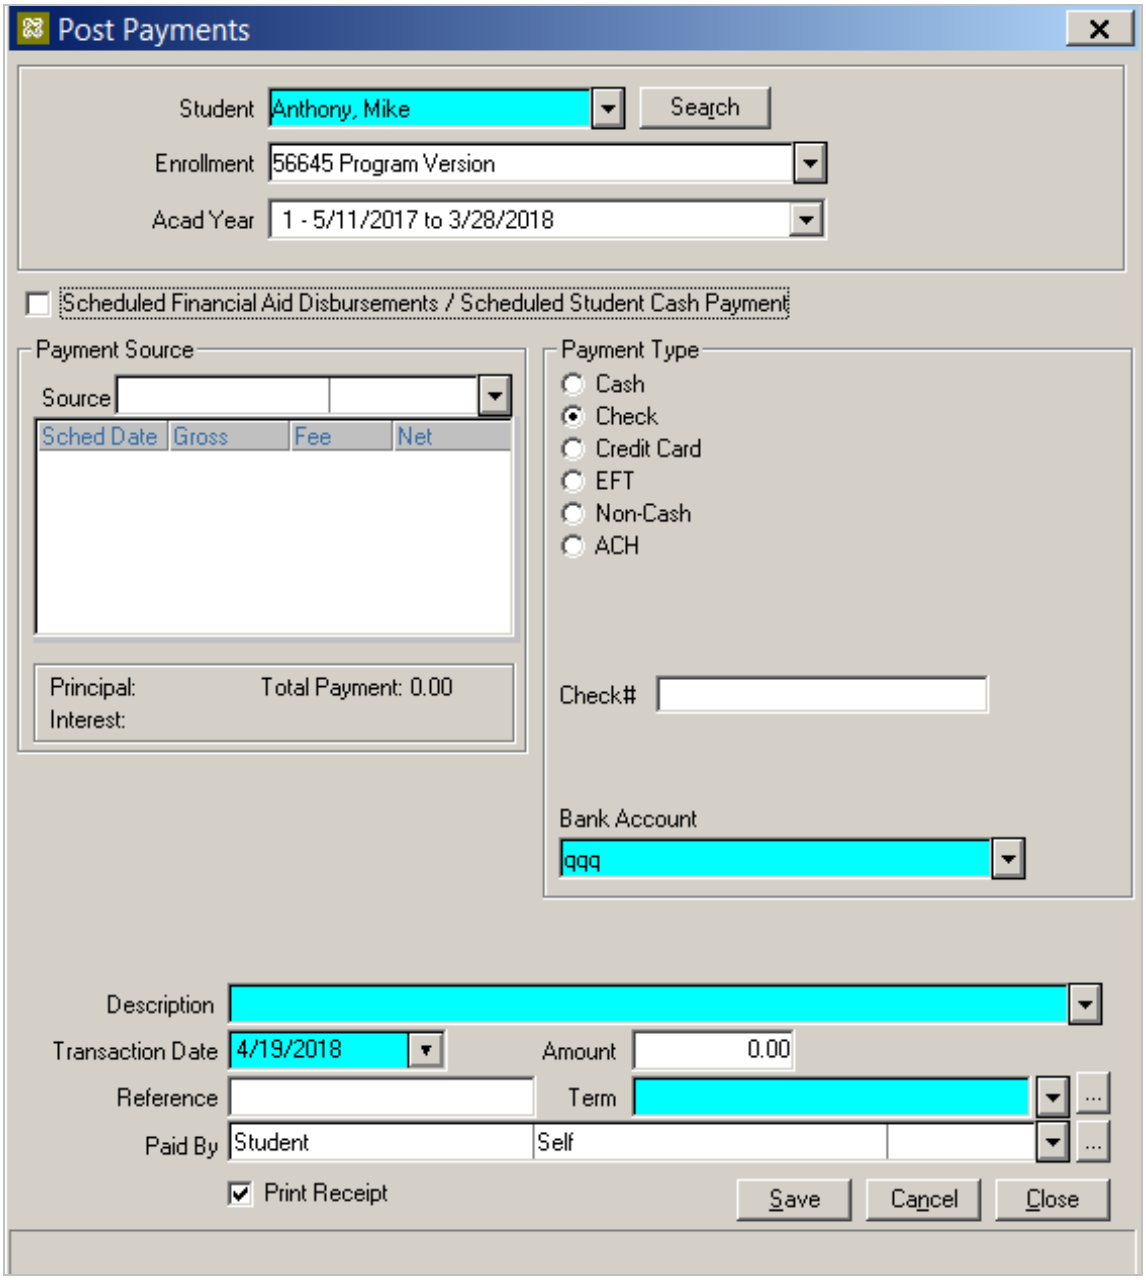
To post payments:

1. Click **Post Payments** on the student's ledger card.
   - OR -
   Navigate to **Daily > Student Accounts > Post Payments**. The Post Payments form is displayed.

   To post payments or charges for a subsidiary, click **Post Payments** on the Student Subsidiaries form or navigate to **Daily > Student Accounts > Post Payment**. For more information, see To post payments or charges to a subsidiary.

2. If the Cashiering feature is enabled, only users defined as cashiers can post payments. The Cashier ID Check form is displayed.

   Enter the cashier **User ID** and **Password**, and click **OK**. CampusNexus Student validates the information and, if a match is found, proceeds to the Post Payments form.



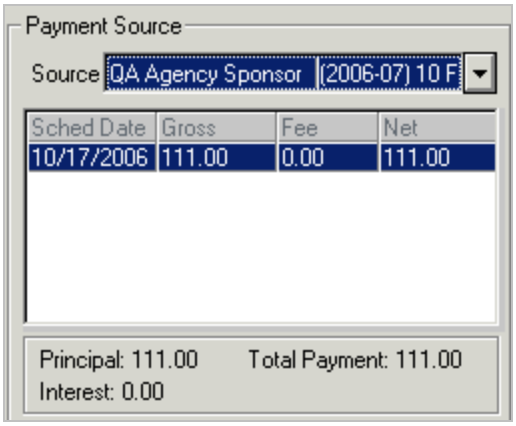
3. Select the **Student** for whom the payment applies. Select from the list of recent students or search for the student.
4. The **Applicant/Enrollment** field is populated automatically. Accept the default or choose another value from the list.
5. Select the **Academic Year** to which the payment applies.
6. The **Payment Period** combo box is displayed for program versions that can use it (program versions with academic calendars 1, 5, and 6). When Academic Year is selected, this combo box dynamically filters out academic years other than the selection. If the Academic Year field is cleared, all payment periods are available for selection. If no payment periods exist, the combo box is not displayed.

Conversely, when Payment Period is selected, the Academic Year is populated automatically. If Academic Year is modified after Payment Period is selected, this field is cleared and validated during save.

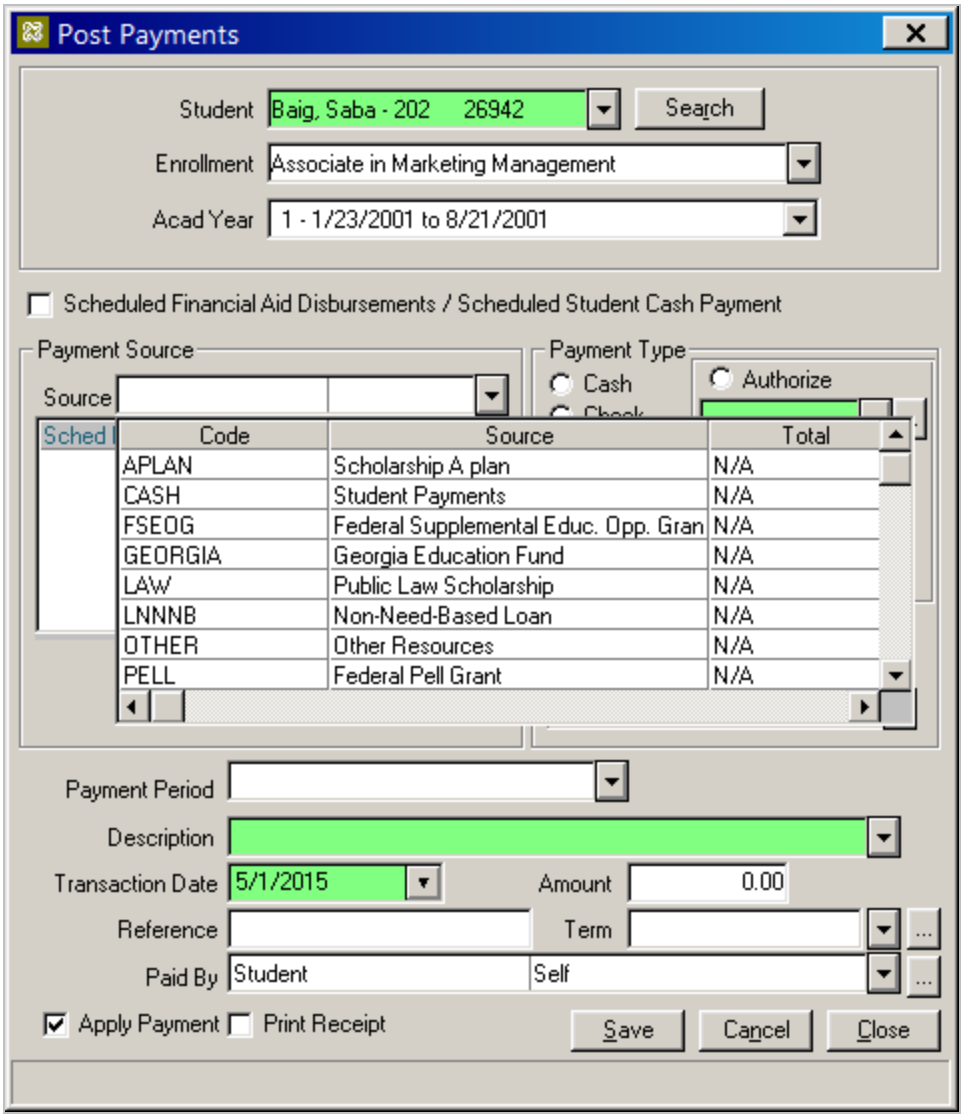
The notation for Payment Periods is `A<n>|P<m>` where `<n>` is the academic year sequence number and `<m>` is the payment period sequence number.

7. If the incoming payment is scheduled, select **Scheduled Financial Aid Disbursements/Scheduled Student Cash Payment**. The student's scheduled (unpaid) financial aid fund sources appear in the **Source** combo box.
   - If you select a fund source that is deactivated for an award year and campus, a message is displayed in red and you cannot continue processing the payment.
   - If any of the award year's fund sources are active, the fund source is displayed as a Source option.

   When a fund source and award year is selected from the Source list, the following information is displayed under the Source field.



8. If the **Scheduled Financial Aid Disbursements / Scheduled Student Cash Payment** check box remains cleared, a list of fund sources is displayed for selection in the **Source** list.



When you select a fund source, the Unscheduled Payment form is displayed, and you can schedule a payment to be posted. Fund sources are listed only when the Allow Posting Directly to Ledger Card option is enabled to allow manual posting.

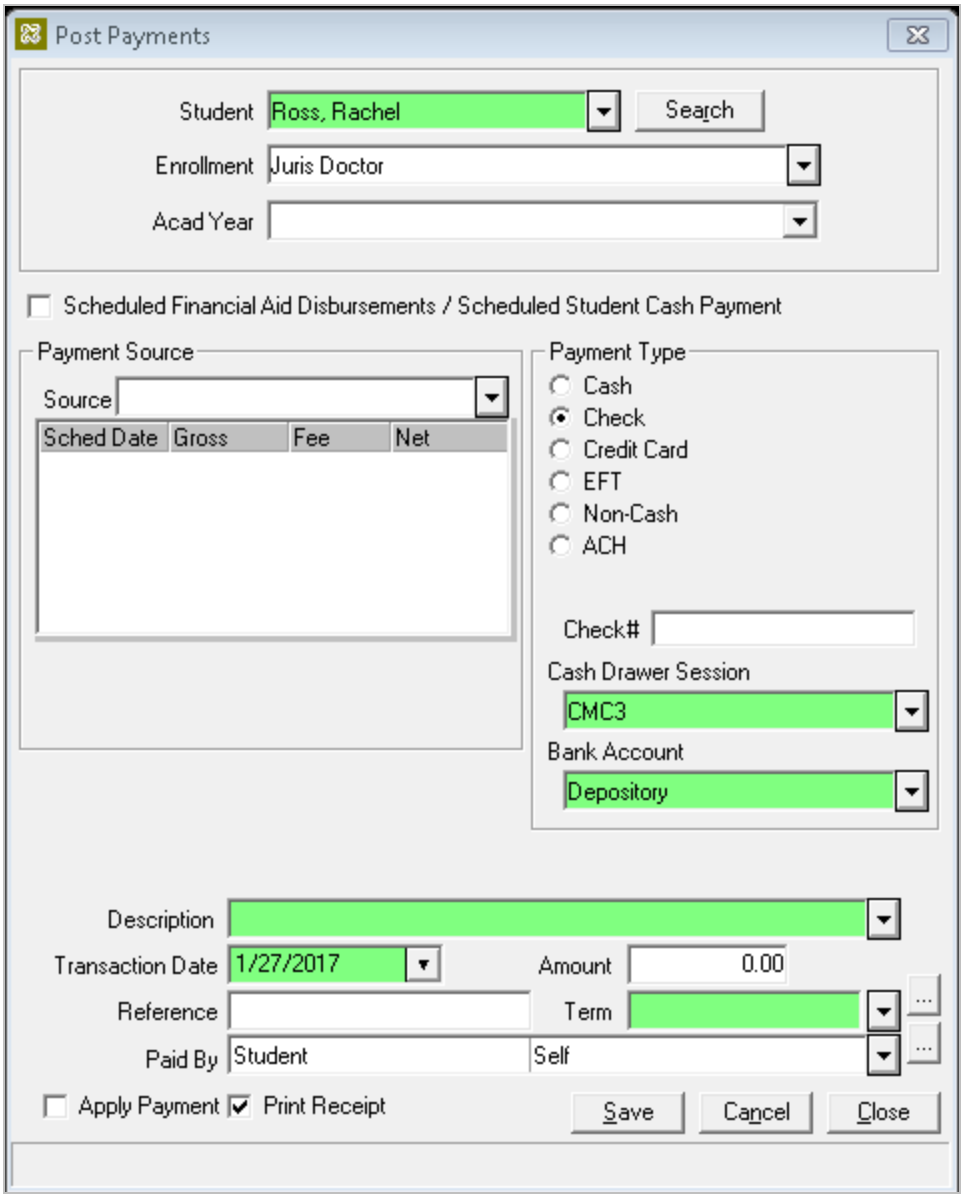
9. Select a **Payment Type**. The options are:

   - Cash
   - Check (default) - Enter a Check # when you select this option.
   - Credit Card
   - EFT (Electronic Funds Transfer)
   - Non-Cash (scholarships)
   - ACH

10. Select the **Cash Drawer Session**. Refer to Cash Drawers for detailed information.

    Note: If CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll and Cashiering is enabled, you can select a bank account to associate to the payment. All active bank accounts appear in the **Bank**

Accounts field drop-down list. This required field automatically populates with the default bank account for the selected payment type.



11. Select or enter the purpose of the payment in the **Description** field.
12. Select or enter the **Transaction Date** of the payment. This is the date that is considered in preparing the bank deposit.
13. Enter the **Amount** of the payment. You must enter a decimal point to separate pennies from dollars. If the amount is to be a debit to the student's account, enter a minus sign (hyphen) before the amount.
14. Optional: Enter any **Reference** data that you use to mark a payment.
15. Click or to select the **Term** to which this payment applies. (Whether you must select a term depends on a system setup flag controlled by your system administrator.)
16. In the **Paid By** list box, select the person who is making the payment. This list comes from the list of addresses in

the student's file.

If the person making the payment is not on the list, click . The Addresses form is displayed. Enter the new person and address. You can then select that person or entity as the "Paid By" option.

17. Select **Apply Payment** to apply the payment to a specific charge or multiple charges on the student's ledger. Refer to Payment Adjustments and Apply Payments to Charges for more information.

    Note: This option is available only if 'Auto Apply Using Hierarchy' is selected for 'How Should Payments Be Applied?' in Setup > Campus Locations > Add/Edit Campus > Accounting (tab).

18. Select **Print Receipt** to provide the student with a paper receipt for this transaction.

19. Click **Save**. CampusNexus Student checks the payment data and displays a message if editing rules have detected any problems. For example, the transaction date may be invalid if it is earlier than the earliest permitted transaction date.

    Note: If the fund source has been set up to apply payments to interest before principal, CampusNexus Student applies the payment to the interest of the selected scheduled payment followed by the principal. Additionally, CampusNexus Student applies overages to the interest of subsequent payments followed by the principal until the overage is exhausted.

20. Click **Cancel** to stop the posting transaction.

21. Click **Close** to close the form.

Posting Cash/Other Payment Plans (Reamortizing future payments)

Reamortizing future scheduled payments is necessary when you need to post a payment for a student and the amount paid is different than the expected amount. This includes receiving a scheduled payment that is less or more than the expected payment.

When you post a payment with an amount that is different than the scheduled payment amount, CampusNexus Student reamortizes and rebuilds the student's future payment schedule.

To have the student's payment plan reamortize and rebuild the remaining scheduled payments correctly when a payment is received that is different (over or under) than the expected scheduled payment, the following settings are necessary on the Fund Source Code Setup form.

1. The student's fund source type selected is **Cash-Other**.
2. The **Auto Post Interest Charges when Payment Made** is selected from the Interest Charges drop-down list.
3. Clear the **Recalculate Interest at time payment is made** check box or confirm that it is NOT selected.
4. Clear the **Apply over Payments to interest before principal** check box or confirm that it is NOT selected.
5. Select **Apply to First** for the Overpayments list.

This configuration keeps the interest that is charged to the student consistent with what was initially calculated when the payment plan was first built.

6. **Post a Payment in Sequence for Fund Source Type of Cash/Other**

   When posting a payment against a payment schedule for a fund source type of cash/other, and the payment is for a future payment rather than the current payment or is a past due payment, CampusNexus Student does not allow the payment to process.

   Note: This doesn't mean that students cannot prepay. Early payments are still permitted and applied to the current payment in the payment plan. A computation of accrued interest is stored with the student's payment plan whenever the actual payment amount received is less than the expected interest payment amount, where the Accrued Interest Amount = (Total Accrued Interest - Actual Payment Received) + Previous Accrued Interest Amount. At the time a payment is received, any outstanding accrued interest amount is fulfilled before applying the payment to any outstanding interest or principal amounts.

   Example: A student owes $100 in accrued interest but makes a payment before the next scheduled payment is due (the student is at the Bursar's office even though the student knows that $250 is due next week). The interest accrued for this payment schedule is $40. The total Accrued Interest Amount = (80-140) + 40 = 60 + 40 = $100.00. Therefore, $100 is the student's accrued interest amount. However, even though the student just paid $140, CampusNexus Student is only displaying that the student paid $100 since $40 equals the accrued interest amount and, even though this amount is stored in CampusNexus Student, it is not displayed for the student or bursar/FA advisor to view (as $100 being applied to the accrued interest amount).

   Additionally, the interest charge posted to the student's ledger will contain both the accrued and payment interest received in this transaction. Therefore, using the example above, $100 + payment interest for a total of X will be posted to this student's ledger.

   As mentioned above regarding a past due payment, at the time of a late payment, the past due scheduled payment records will be zeroed out. This is done to ensure that any refunds can be accounted for accurately. The total amount received less any accrued interest payment will be applied to the current payment in the payment plan with the amounts applied to both interest and principal payment amounts.

   Again, from the example given above, the total amount received from this student of $140 - $100 (the accrued interest) = $40 which will be applied to the current payment in the payment plan (with the amounts applied to both interest and principal payment amounts for this student).

7. If the **Restrict student scheduled payments based on Graduation date** check box is selected under Setup > Campus Locations > Add/Edit (button) > Allow (tab), the last scheduled payment does not go beyond the student's graduation date.

   Note: When configuring a payment schedule for a fund source type of cash/other and the payment frequency is set to the number of days between payments, the number cannot exceed 365 days. See Cash-Other Source Form.

Audit Features

The audit features for Student Accounts include:

- CampusNexus Student stores the name of the payee on each refund record, stipend record, and subsidiary refund so that it can be retrieved for reporting purposes.
- CampusNexus Student audits changes to the payee for refunds and stipends. Auditing occurs from the time the refund or stipend is scheduled to the time the refund or stipend is processed. The date changed, time changed, and the user who made the change are audited.
- Payee changes are audited for subsidiaries.

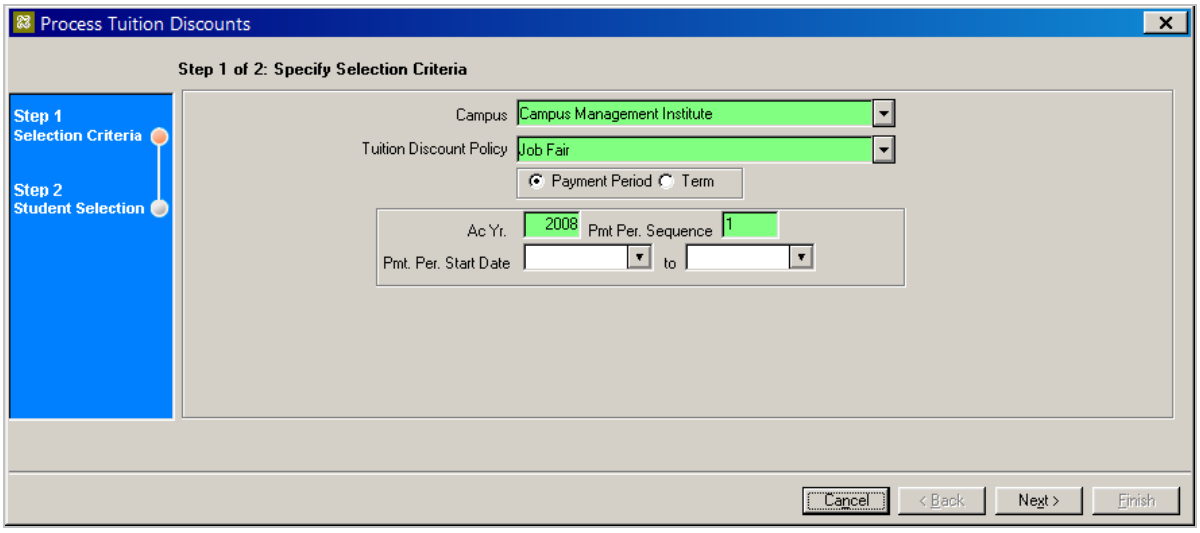
- Payee information for a stipend can be edited regardless of the fund source associated with the stipend. The payee changes are audited for all stipends.
- Your ability to edit a payee for a refund is dependent on the fund source associated with the refund. The payee changes are audited only for the fund sources that allow the payee to be changed.
- You can sort on different columns of the grids available in the Process Refunds/Stipends wizard.
- A student account administrator can define that the Reference information is printed on the check, below the address, or on the stub, or in both places.
- A student account administrator can view the ID of the user who scheduled the refund/stipend using the Ledger Card, Transaction Detail button.
- CampusNexus Student stores the user ID of the user who scheduled the stipend so that it does not get overwritten by the user ID of the user who posted the stipend.

Process Tuition Discounts

Use the Process Tuition Discounts batch process to post tuition discounts for student batches associated with a campus.

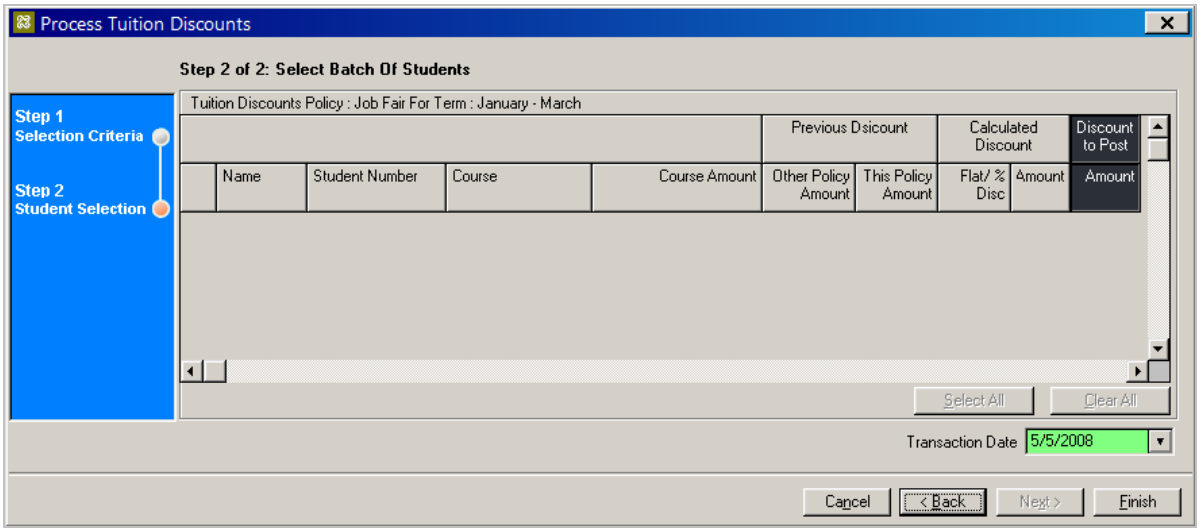
To post tuition discounts using the Process Tuition Discounts batch process:

1. Navigate to **Daily > Student Accounts > Process Tuition Discounts**. Step 1 of the Process Tuition Discounts batch process is displayed.



2. Select a **Campus**. Based on the campus selected, the tuition discount policies available for the campus are displayed in the **Tuition Discount Policy** list.
3. Select the **Tuition Discount Policy**.
4. Select the **Term** or **Payment Period** for which you want to process the selected discount policy.

   If you select Payment Period, specify the following criteria to search for the associated tuition discounts:
   - **Ac. Yr.** - Academic year
   - **Pmt Per. Sequence** - Payment period sequence
   - **Pmt. Per. Start Date** - Payment period start dates
5. Click **Next**. Step 2 of the Process Tuition Discounts batch process is displayed.



6. For each student in the campus who is eligible for the tuition discount policy, the following information is displayed:

Field Descriptions

Field	Description
Name	Name of the student.
Student Number	Number of the student.
Course	If the billing method for the tuition discount policy is **By Course**, the name of the course in which the student is currently enrolled is displayed. If the billing method for the tuition discount policy is **By Term**, the **Course** column has a **Details** button. Click this button to display all the courses taken by the student in the selected term, which qualify for the tuition discount policy.
Course Amount	The amount charged for the course.
Previous Discount - Other Policy Amount	The discount amount that has already been posted for the student according to a policy other than the tuition discount policy.
Previous Discount - This Policy Amount	The discount amount that has already been posted for the student according to the tuition discount policy.
Calculated Dis-count - Flat/% Disc.	The percentage of discount as defined in the tuition discount policy. In case the discount amount for the tuition discount policy has to be calculated on a flat rate basis, this column will be blank. **Note**: It is not recommended to change discount percentages or flat rates on a Tuition Dis-count Policy once discounts have been posted for a given policy.

Field	Description
Calculated Discount - Amount	The amount of tuition discount that should be paid to the student based on the tuition discount policy. **Note**:It is not recommended to change discount percentages or flat rates on a Tuition Discount Policy once discounts have been posted for a given policy.
Discount To Post - Amount	The difference between the amounts in the **Calculated Discount** and **Previous Discount** headings. The Discount To Post will be zero when 100% of the course charge has already been used for tuition discounts. This column can be edited.

7. Select the student(s) for whom you want to post the tuition discounts. Click **Select All** to select all students in the list. Click **Deselect All** to clear all students.

   Note: If a student cannot be selected, it is because the course is in a Drop status and you cannot select the course for posting.

8. If required, edit the discount amount to post for students in the corresponding **Amount** column (under **Discount To Post**).

9. Specify the **Transaction Date** to post the tuition discounts.

   Note: When automated billing is in use with the Post Transaction Details option selected, the **Transaction Date** for each tuition discount in the payment period will be equal to the course section date.

10. Click **Finish** to post the tuition discounts. After you confirm to post the discounts, the process ends.

California STRF Processing

The California's Student Tuition Recovery Fund (STRF) was designed by California's Bureau for Private Postsecondary and Vocational Education to offset economic losses experienced by the State. The fee is based on the amount of tuition charged and is processed every term.

CampusNexus Student users can automatically gather California students who were exempt from paying the STRF, or bill the STRF fee to those students who were not exempt. You can collect non-exempt students via reporting, generate a charge for the appropriate group of students based on California regulations, and batch-post the charge to the students' ledger cards.

Note: This option is only available if any campus in the active database lists "CA" as the State in the Address tab of the Campus Information form (under Setup > Campus Locations > Campus > Address tab).

To process students for STRF:

1. Navigate to **Daily > Student Accounts > California STRF Processing** to activate the STRF wizard.
2. Select a **Term**, **Enrollment Date** range, percentage of tuition to charge (in the **Dollar amount per $1000.00 of Tuition Billed** field), and a **Transaction Code** to associate with the STRF fee.
3. Enter a reference designation in the **Reference** field to identify this process batch (or accept the default) and click **Next**.
4. The wizard displays all student records that meet these criteria, fees already charged, and fees that are to be charged. You can add and subtract students from this list, edit proposed fee amounts, and print the list.
5. Click **Finish**. CampusNexus Student displays a confirmation message indicating that a fee of n% has been posted to the students' ledger cards, identified by the specified Transaction Code. The Proposed Fee Amount column displays the STRF fee amount that is calculated. If the students have already been charged a STRF fee for the selected time frame, CampusNexus Student factors that amount into the calculation and displays an appropriate charge or credit adjustment in the Proposed Fee Amount column.

Title IV Credit Balance

When a Title IV credit balance occurs, an institution has 14 days to return the credit balance to the student (parent for PLUS) unless the institution has obtained authorization to hold credit balances.

When the award year has expired (for Title IV Grants and Perkins), or the loan period has expired (for FFEL and Direct Loans), institutions must return the credit balance within 14 days, regardless of whether the institutions obtained authorization to hold credit balances.

Authorization Changes to Trigger Credit Balance Reevaluation

Stipends can adhere to the fund source order specified by the user and be scheduled against the fund source order configured for Title IV and Non-Title IV fund sources.

The Title IV credit balance must use only Title IV fund sources from the configuration to assign to a stipend. Overall, the credit balance for Non-Title IV and Title IV items must use fund sources in the order configured to assign to a stipend. Stipend amounts can be assigned to only the available amounts left for the fund source (amount disbursed minus existing refunds and stipends, which may be scheduled or posted). Stipends can be created from Title IV calculations and from overall calculations.

Multiple fund sources can be assigned to satisfy a credit balance.

Example

A credit balance is created for $1756. The fund source order for the stipend is Pell, Sub, and Unsub.

The available amounts remaining on each fund source are:

- Pell = 432
- Sub = 1000
- Unsub = 3500

The stipends created would include the remaining amounts for Pell and Sub ‘plus’ an Unsub of 324.

If there are not enough fund sources selected for assigning the stipend, a credit balance will remain.

Generating Stipends with a Non-Title IV Credit Balance Remaining

If a student has a credit balance consisting of Title IV or Non-Title IV fund sources and stipends are generated using the configured fund source order, the amounts for the stipends will not exceed the amount available for each fund source. If there are not enough fund sources configured to resolve the balance in full, a Non-Title IV credit balance will remain for the student.

Generating Stipends with a Title IV Credit Balance Remaining

If a student has a Title IV credit balance and stipends are generated using the configured fund source order, the amounts for the stipends will not exceed the amount available for each fund source. If there are not enough fund sources configured to resolve the balance in full, a Title IV credit balance will remain for the student.

Fund Source Order Configuration

If the Fund Source Sort order configuration has been turned on and the fund source sort order defined, CampusNexus Student evaluates the credit balances and assigns fund sources to the stipend based on the fund source order specified. See Use Fund Source Order (Setup > Campus Locations > select a campus > Add/Edit (button) > Refunds & Stipends (tab) > Stipends (subtab)).

If the Fund Source Sort order configuration is not turned on, CampusNexus Student continues to generate stipends using the current logic when evaluating credit balances.

Note: This logic does not apply to the Title IV credit balance wizard.

When a fund source order has been configured, CampusNexus Student evaluates Title IV credit balances using only the Title IV fund source and assigns it to the stipend, even if an available Non-Title IV fund source is higher in the sort order position. For

example, a sort order is designated as: State Grant, and Sub. The State Grant is higher in the sort order, and there are no previous stipends or refunds. Since CampusNexus Student is evaluating for Title IV, the SUB fund source is assigned to the Title IV stipend.

When a fund source order has been configured, CampusNexus Student evaluates an overall credit balance (Non-Title IV + Title IV) using the fund source order designated to assign a fund source to a stipend. For example, the Fund Source Order is State Grant, and Sub. There is a Non-Title IV credit balance and a Title IV credit balance to be evaluated. Title IV is evaluated first and the Sub fund source is assigned. Non-Title IV is evaluated second. CampusNexus Student first attempts to assign State Grant. If there is excess credit balance left, CampusNexus Student follows the sort order and attempts to generate another stipend assigning the Sub fund source.

When a fund source order has been configured, CampusNexus Student will not assign a stipend amount that would exceed the available amount left for the fund source (Amount Disbursed - Existing Refunds and Stipends that are posted). For example, if the fund source is $500 and the credit balance is 1500, CampusNexus Student can only assign a stipend amount up to $500 for the particular fund source. The remaining 1000 credit balance are evaluated for the remaining fund sources in the sort order. If there are no remaining fund sources, a credit balance remains.

When a fund source order has been configured, CampusNexus Student can assign multiple fund sources to satisfy a student's credit balance.

Example

A credit balance is 1756. The Fund Source Order is Pell, Sub, and Unsub.

The available amounts for each fund source is:

- Pell = 432
- Sub = 1000
- Unsub = 3500

The stipends created would include the remaining amounts for Pell and Sub + an Unsub of 324.

When the credit balance evaluation type is set to Student Level, CampusNexus Student deactivates the Fund Source Order configuration. All other evaluation types will have the fund source sort order configuration available.

A Non- Title IV credit balance remains for an evaluation period when the credit balance exceeds the available fund source amount or when there is a remaining credit balance and not enough fund sources are configured to resolve the balance in full.

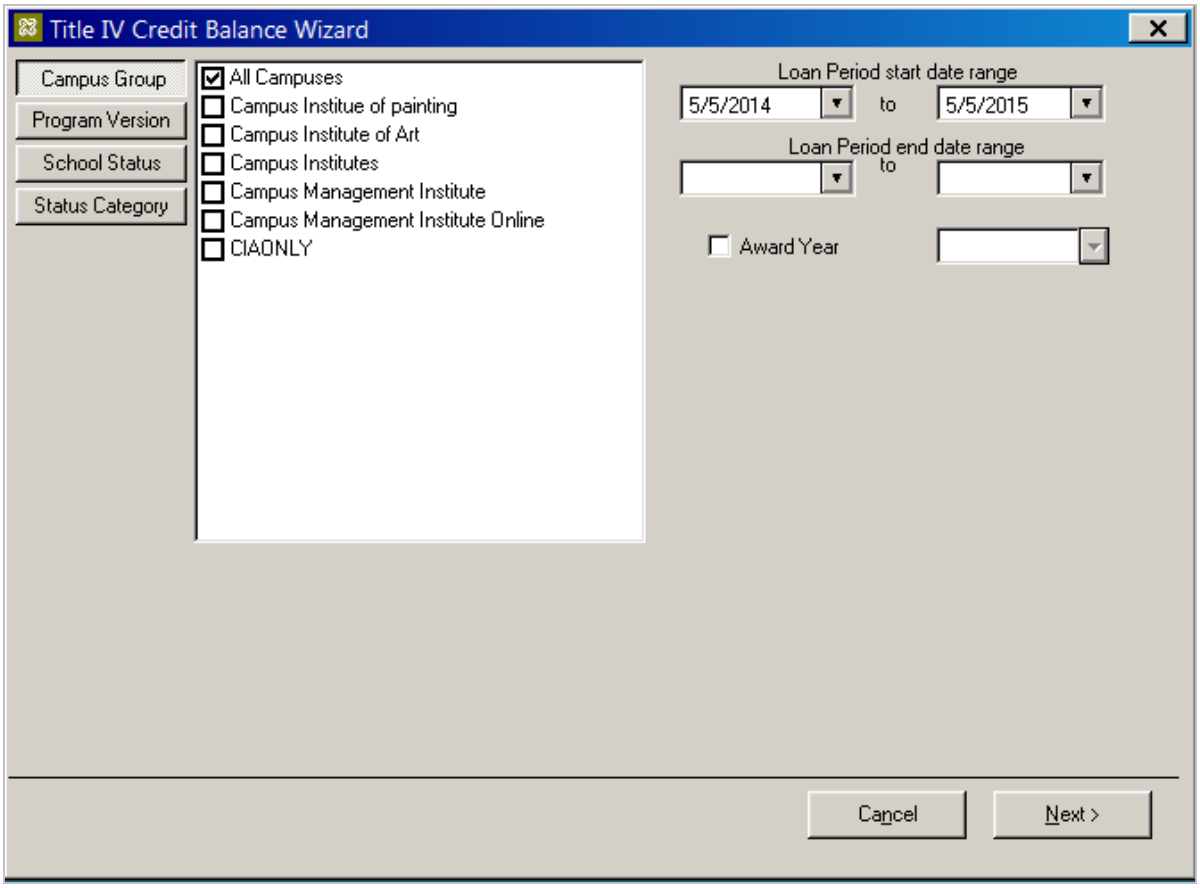
Title IV Credit Balance Wizard

The Title IV Credit Balance wizard allows authorized users to specify **Loan Period** date ranges, or an **Award Year** to schedule Stipends for Title IV credit balances. This wizard will assist campuses that do not have Auto-Stipends configured, but want to be in compliance.

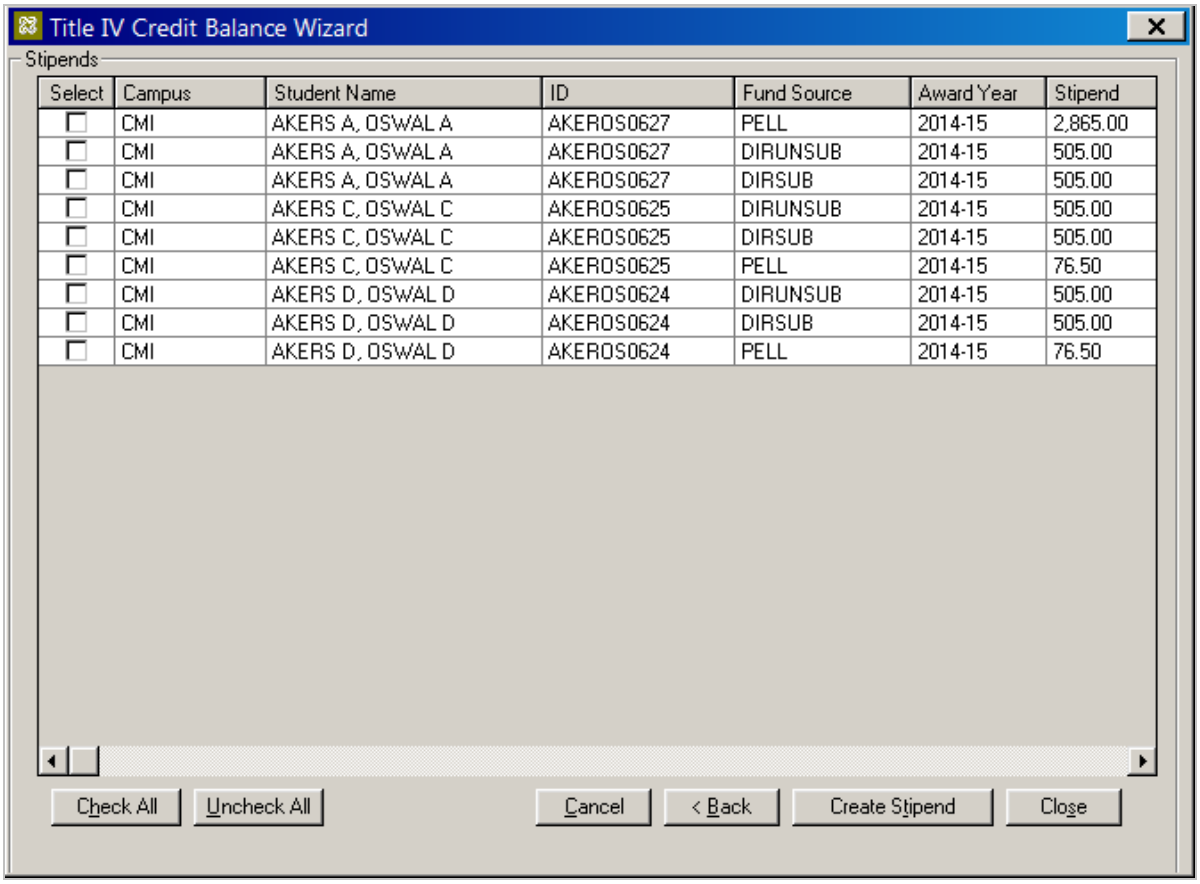
Note: When running the wizard, the stipend amount created on the award will correspond to the amount displayed on the Title IV Credit Balance Report. If the stipend amount on the Title IV Credit Balance report is greater than the amount available for the selected award, the stipend amount is distributed amongst the other awards within the reporting period. Also, for any students who are charged up front for multiple payment periods (e.g. for an entire program or academic year), Campus Nexus Student prorates the Title IV funds charges to determine the actual payment period (term / payment period) charges and calculate whether a Title IV Credit Balance has occurred. Details regarding the proration logic can be found in the Title IV Credit Balance Report topic under Proration Logic.

To open the Title IV Credit Balance wizard:

1. Navigate to **Daily** > **Student Accounts** > **Title IV Credit Balance**. The Title IV Credit Balance wizard is displayed.



2. Select one or more from the following: **Campus Group**, **Program Version**, **School Status**, and **Status Category**.
3. Select a **Loan Period** date range, an **Award Year**, or both, and click **Next**.
4. This step of the wizard displays those students who matched the criteria you selected in the first step and allows you to create stipends for students who have Title IV credit balances. The Stipend column displays the same results that would appear on the Title IV Credit Balance report.



5. Select one or all students and click **Create Stipend**.

   Note: This will schedule a stipend on the indicated fund source; it will not post the stipend for the student. You still have to process the stipends as normal.

6. A confirmation message is displayed. Click **Yes**.

7. A confirmation message is displayed. Click **OK**. The Title IV Credit Balance wizard closes.

Configure Payment Apply Order

Use the Configure Payment Apply Order form to define payment application hierarchies by campus or fund source. You can also copy a payment apply order from one campus to another campus or from one fund source to another fund source.

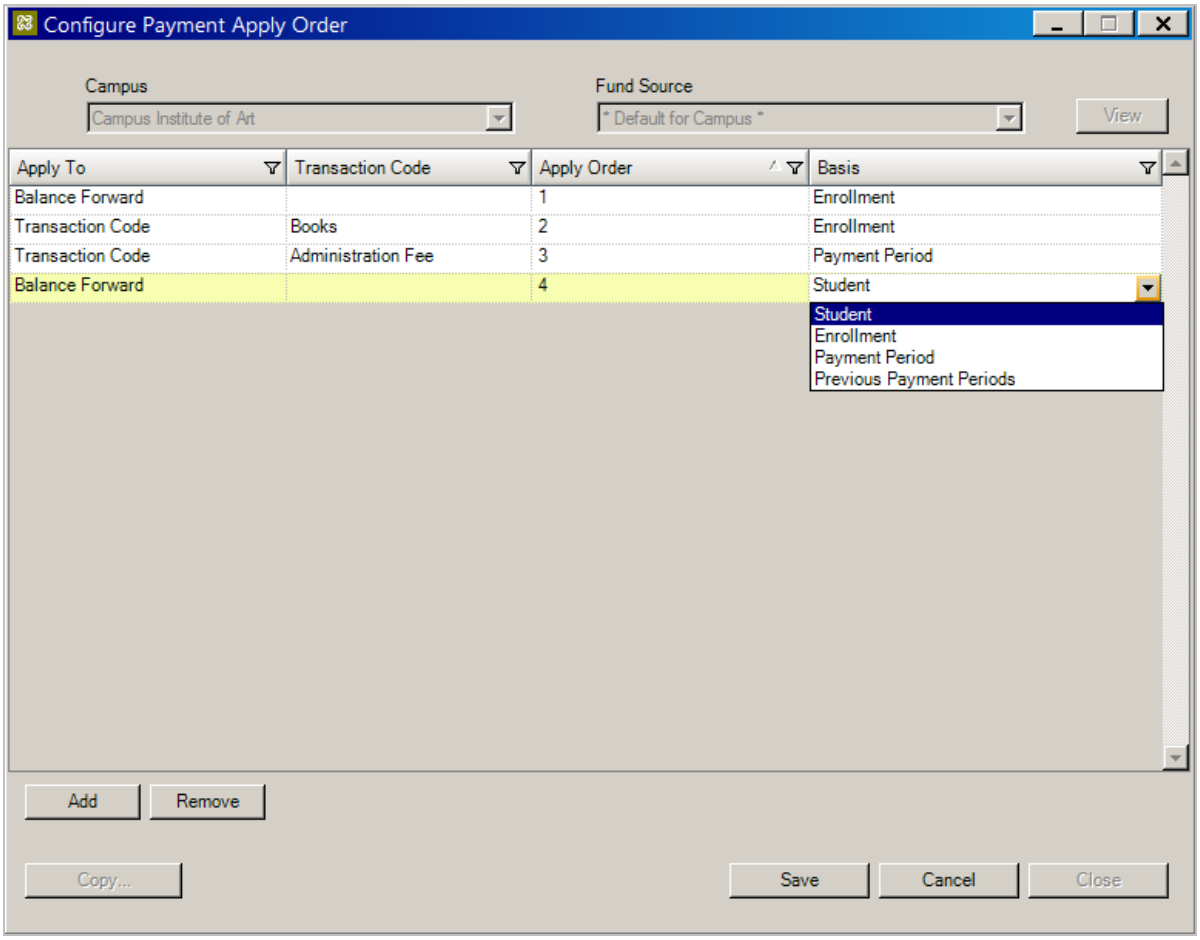
When a payment is a non-financial aid source, you can set up CampusNexus Student to use the default payment applications hierarchy for a campus. If there is no default payment apply hierarchy defined for the campus, the payment will be applied to all transaction code types starting with the oldest balances first.

When a payment is a fund source (such as a Scholarship), you can set up CampusNexus Student to use the application hierarchy for that fund source. Certain fund sources can be limited to paying only specific types of transaction codes while other fund sources can be applied to all charges on the ledger. For example, a Scholarship can be configured so that funds received from that source can only be applied to Tuition. If the fund source for the payment transaction is not defined in the hierarchy for the campus, the default payment apply hierarchy for the campus will be used.

See Setup > Campus Locations > Campuses > Accounting(tab) > Campus Accounting for information about configuring your campus to use the Auto Apply Using Hierarchy.

To configure a payment apply order:

1. Navigate to **Daily > Student Account > Configure Payment Apply Order**. The Configure Payment Apply Order form is displayed.
2. Select a **Campus** and click **View** or select a **Fund Source** and click **View**.
    - Sort the columns by clicking on the column headings.
    - Filter the data in the columns by clicking on the filter icon . A list of predefined filter fields and an option for custom filters is displayed.



3. Click **Add** to add a new row.
4. In the **Apply To** column, select one of the following options:
   - **Transaction Code** - Select this option to set up the payment apply hierarchy on the basis of transaction codes.
   - **Balance Forward** - Select this option to set up the payment apply hierarchy on the basis of the remaining balance forward.
5. In the **Transaction Code** column, select transaction codes (for example, Tuition, Books, etc.) to include in the auto-apply payment hierarchy.

   Note: You can select a transaction code only if you selected Transaction Code in the Apply To column.
6. In the **Apply Order** column, assign priority levels in the hierarchy to indicate how the payment should be applied to a transaction code or to the remaining balance forward.

   Example: To set up the hierarchy for Transaction Codes for Tuition first, Books second, and Administration Fees third, and the remainder to be on the basis of Balance Forward, you would set the Apply Order of Transaction Code for Tuition = 1, Books = 2, Administration Fee = 3, and Balance Forward = 4.
7. In the **Basis** column, for each Apply Order level, you can limit the basis of the payment application on the following:

   - **Student** - All debit transactions for the Student.
   - **Enrollment** - Debit transactions that were posted to the same Enrollment as the payment.

- **Payment Period** - Debit transactions that were posted in the same Payment Period as the payment.
- **Previous Payment Periods** - Debit transactions that were posted prior to the payment period of the payment.

8. Click **Save**.

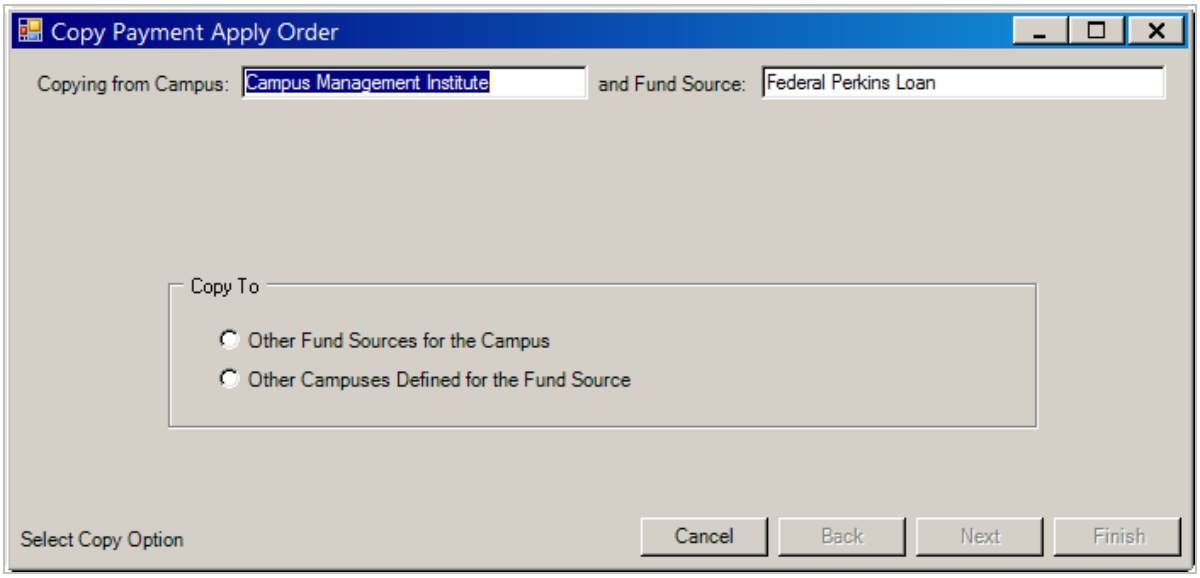
To copy a payment apply order:

1. Select a **Campus** or a **Fund Source** that you would like to copy in the Configure Payment Apply Order form.

   If you select a Campus , the payment apply hierarchy will be the default for that campus.

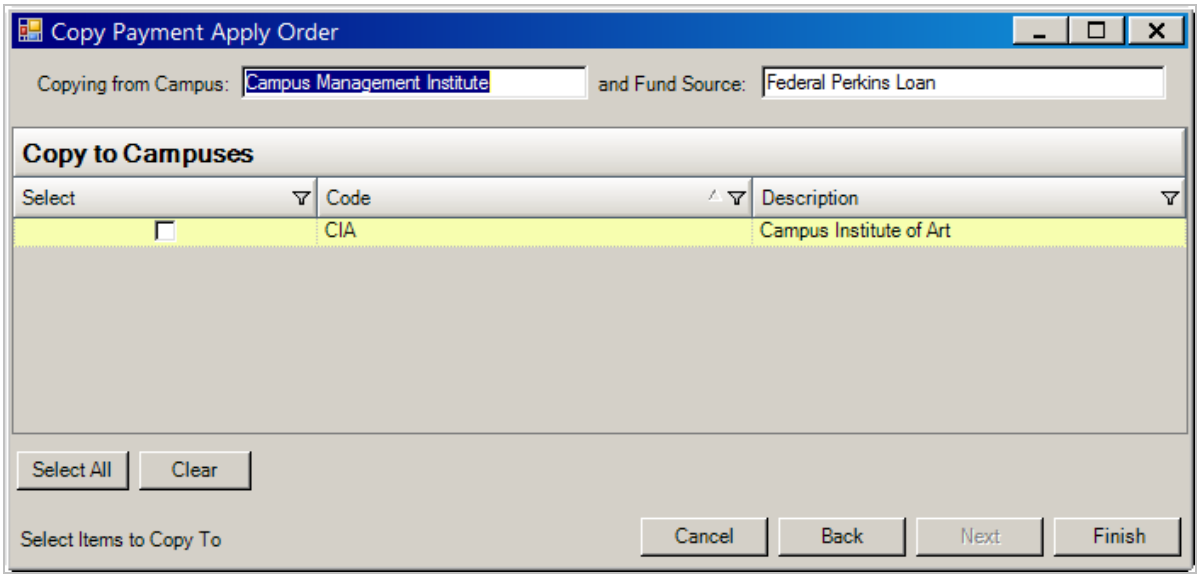
2. Click **Copy...** .

   The Copy Payment Apply Order form is displayed with the Campus or Fund Source you selected.



3. In the **Copy To** area, select one of the following options:

   - *Other Fund Sources for the Campus* - This feature allows you to select additional fund sources of the selected campus to which the selected hierarchy will be applied. Click **Select All** to copy the hierarchy to all the fund sources for the selected campus.
   - *Other Campuses Defined for the Fund Source* - This feature allows you to select additional campuses to which the selected hierarchy will be applied. Click **Select All** to copy the hierarchy to all the campuses.



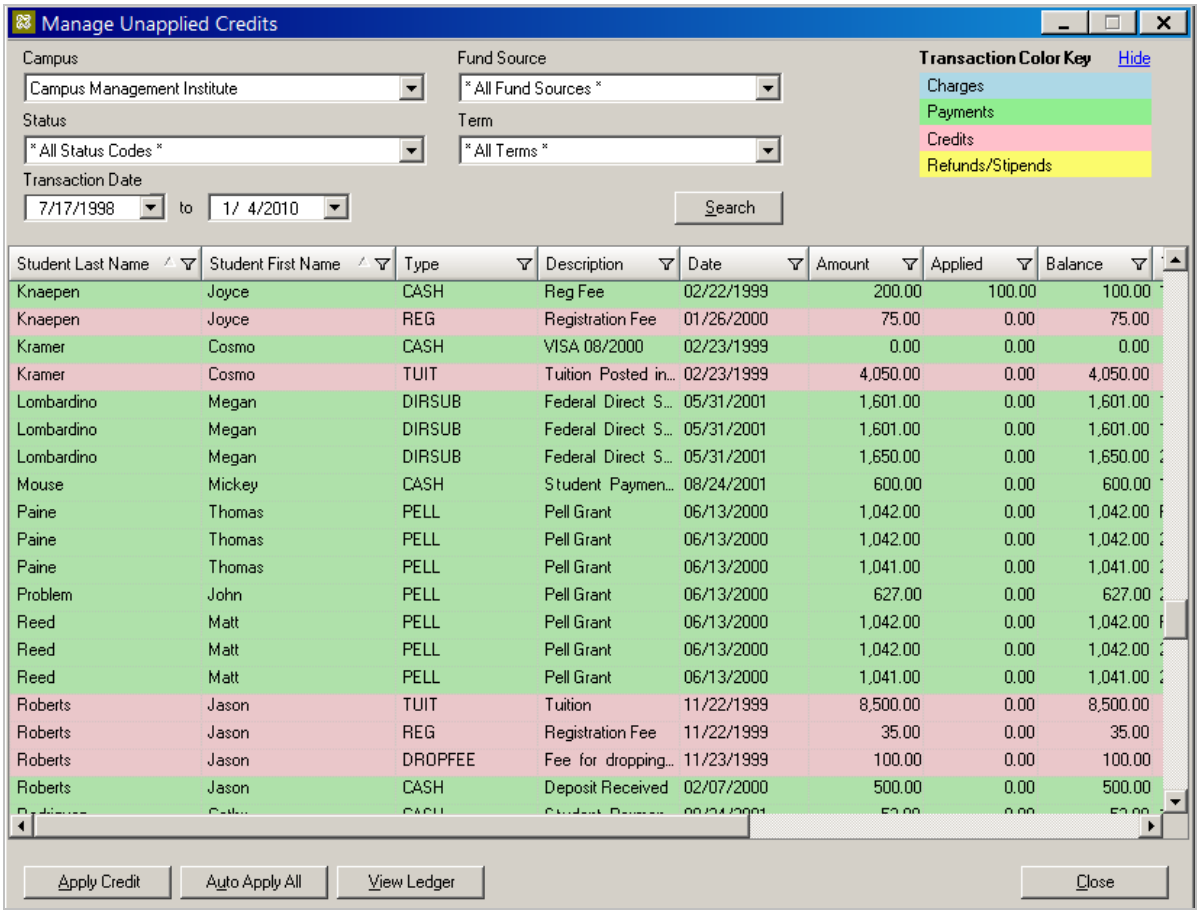
4. Click **Finish** when you have completed your selections.
5. A confirmation message is displayed. Click **OK**.

Manage Unapplied Credits

Use this form to locate credits that have a balance remaining to be applied and then select the debits with open balances to apply the credit to.

To manage unapplied credits:

1. Navigate to **Daily > Student Accounts > Manage Unapplied Credits**. The Manage Unapplied Credits form is displayed.



2. Select the unapplied credits you want to view by using from the following search criteria:
    - **Campus** - allows you to select which campus you would like to view
    - **Fund Source** - allows you to select unapplied credits from a particular fund source
    - **Status** - allows you to select only students with a particular enrollment status
    - **Term** - allows you to select unapplied credits that are associated with a particular term
    - **Transaction Date** - allows you to select only unapplied credits that fall within a particular transaction date range
3. Click **Search** to display the list of credits for the search criteria you entered. The form lists all transaction types.

Click **Show key** to view the Transaction Color Key. Note that credits are listed in pink.

Note: Sort the columns by clicking on the column headings. Filter the data in the columns by clicking on the filter icon . A list of pre-defined filter fields and an option for custom filters is displayed.

4. Click on the row of the credit you would like to apply.
5. Select one of the following actions:
   - Click **Auto Apply All** to auto-apply all unapplied credit transactions displayed based on the hierarchies configured in Configure Payment Apply Order.
   - Click **View Ledger** to view the Student Ledger Card for the student associated with the currently selected row in the grid. See Ledger Cards for more information.
   - Click **Apply Credit** to show the debits with open balances to apply the credit to. The Select Transaction(s) for Payment form is displayed.

   - The **Payment Amount** field shows the original payment.
   - The **Amount Left to Apply** field shows the remainder left from the **Payment Amount** that is available to be applied.
6. Select from the list displayed the debit(s) you would like to apply the credit to. If you select a debit that reduces the credit to $0 and try to select another debit to apply a credit to, the following message is displayed: *"The full amount*

of the transaction has been applied. No more items can be selected."

7. Click **Apply Balance**. The amount in the Amount Left to Apply field is reduced as you apply payments.
8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

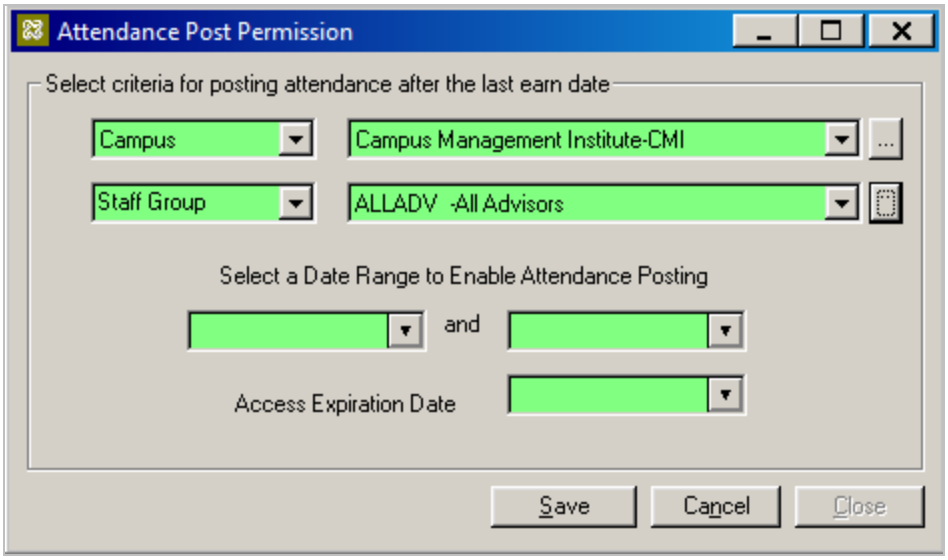
Manage Attendance Posting

A specified user/staff group can use the Manage Attendance Posting feature to define the parameters for posting/editing attendance for dates prior to or equal to the Last Earn Date.

Note: The Manage Attendance Posting menu item is disabled if the Preventing Attendance feature is turned off.

To manage attendance posting:

1. Navigate to **Daily > Student Accounts > Manage Attendance Posting**. The Attendance Post Permission form is displayed.



2. Select the **Campus** or **Campus Group**. The list displays only those campuses and campus groups to which the user has access **and** to which the Staff or Staff Group has access. For example, if the user has permission to access campuses A, B, C, and D, and the Staff Group has access to campuses B, D, E, and F, the list shows only campuses B and D.
3. Select the **Staff** or **Staff Group**. The list displays only Staff Members or Staff Groups that belong to the Campuses or Campus Groups selected.
4. Select a **Date Range to Enable Attendance Posting**. The begin and end dates must be prior to or equal to the Last Earn Date for all campuses included in the request.
5. Select the **Access Expiration Date**. The expiration date must to be greater than or equal to the system date.

Daily > Academic Records Options

- Generate Batch Transcripts
- <Detach> (This options detaches the submenu.

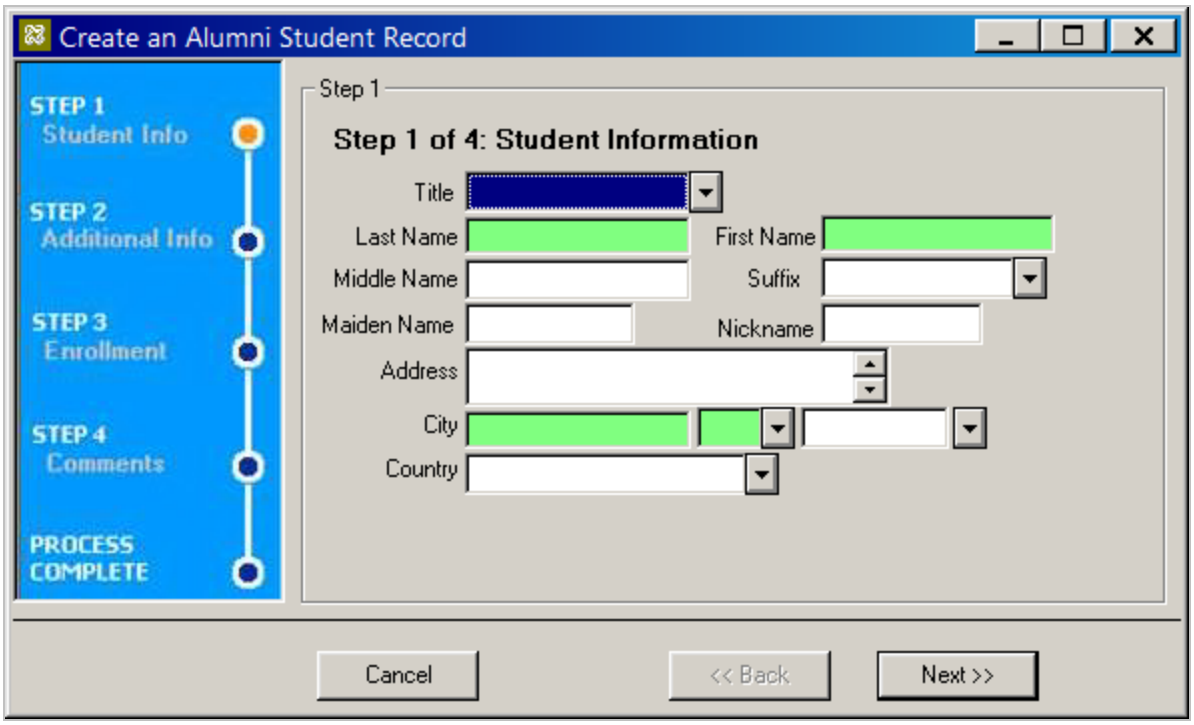
Create Student Alumni Record

CampusNexus Student enables authorized users to create master records in the CampusNexus Student database for students who graduated before the school migrated to CampusNexus Student. A record for the student may not exist in the database depending on how long ago the student graduated and how much historical data was included in the initial data conversion.

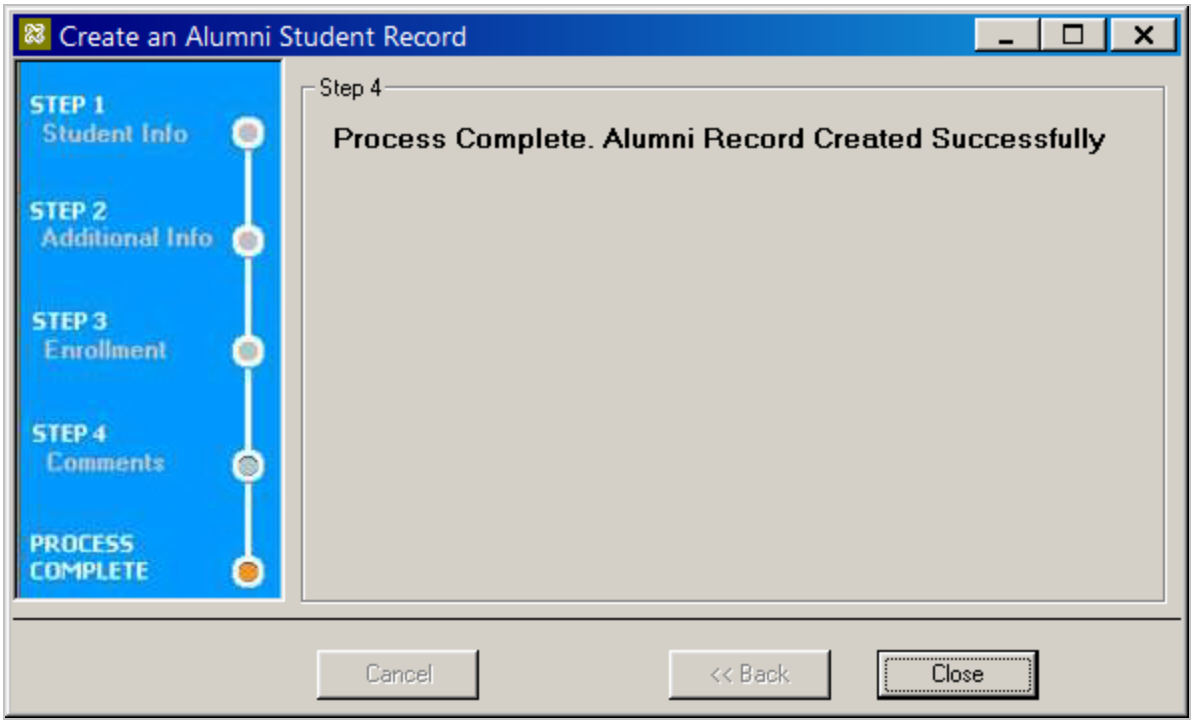
The new alumni record serves as a skeleton record for the student. It contains enough information to allow for the student record to be worked with further in the Career Services module.

To create an alumni student record:

1. Navigate to **Daily > Academic Records > Create Student Alumni Record**. The Create an Alumni Student Record form is displayed.



2. Complete applicable fields on Steps 1, 2, and 3 of form and click Next.
3. Step 4 displays a confirmation message. A Student Master record is created and the student can be found using the Student Search tool.



4. Click **Close** to close the form.

Document Tracking

Institutions request documents from students and persons or organizations connected with the student. Use Document Tracking to keep track of the documents that are necessary for processing student records in an orderly fashion.

Document Tracking is available in the following modules:

- Admissions - AM
- Financial Aid - FA
- Student Accounts - SA
- Academic Records - AD
- Loan Management - LM
- Career Services - PL

You can use the Daily > Document Tracking feature to look at all documents of a certain type to determine the document's status for each student.

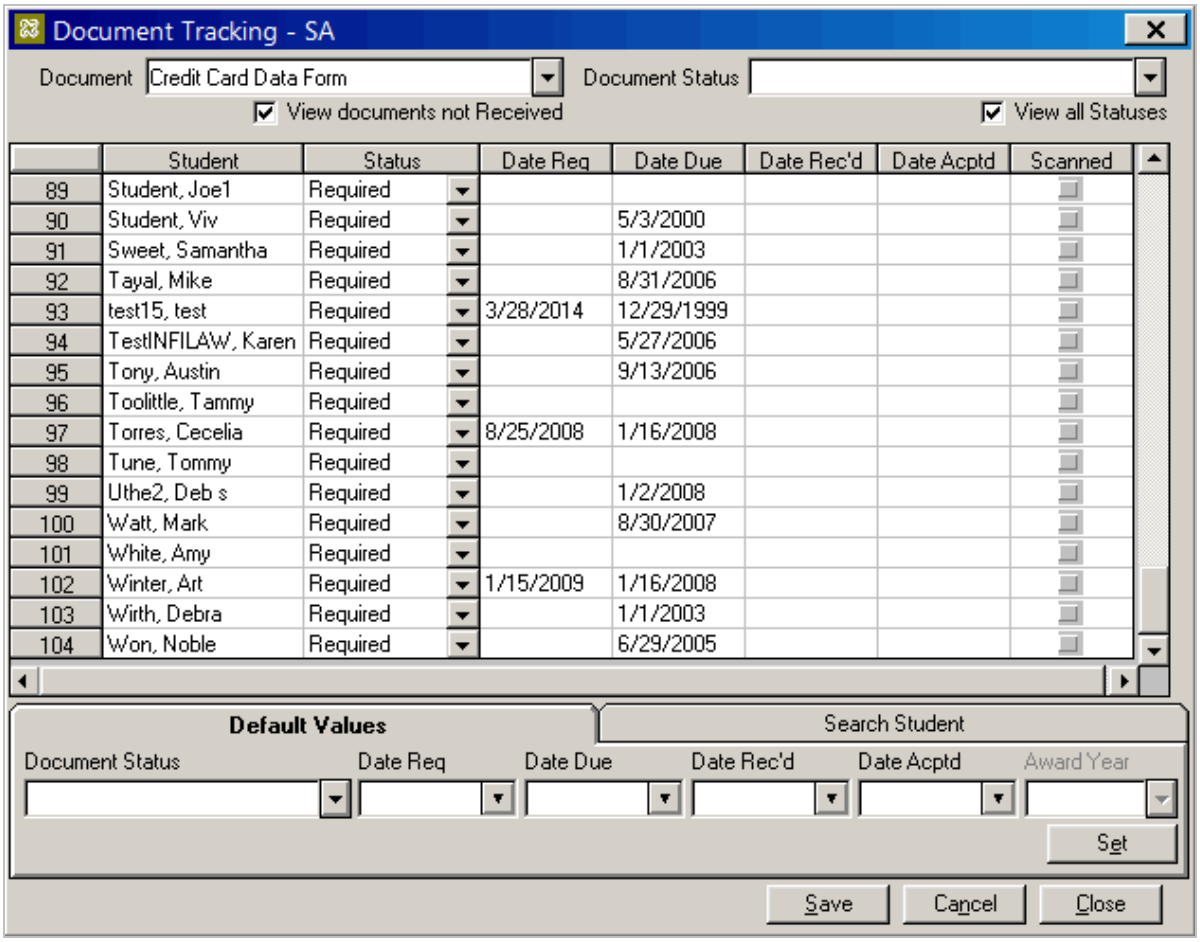
Several documents relate to academic or demographic history and your organization must have copies of them for each student. Examples are birth certificates, driver's licenses, transcripts, alien registration cards, social security cards, etc. Management policy determines which documents are important at your institution.

You can set up lists of these documents and assign them to each student record. You can then record the current status of the documents, the date you requested each document, and the date you received each document. You can also indicate that the document has been scanned into your electronic filing system.

Note: This approach differs from the Document Tracking option that you can access from the View > Contact Manager menu or Student Bar. When you access Document Tracking from the Student Bar, all documents related to a specific student as displayed. Here, you see all students related to a given document.

To edit tracking data for listed documents:

1. Navigate to **Daily > Admissions** (or other module) **> Document Tracking**. The Document Tracking form is displayed.



2. Select a **Document** from the list box at the top of the form. All students having the selected document related to their files are listed on the form.
3. Select or clear **View Documents Not Received**.
   - If the check box is selected, only those documents that have not been received are listed.
   - If the check box is cleared (default), all documents (subject to your Document Status selection) are listed.
4. For Document Tracking in Financial Aid - FA, select an **Award Year** to which the documents apply.

   Note: If you choose a Financial Aid document that does not have the "Award Year Specific" flag selected (indicating Yes) on the Document Setup, the form is displayed with the three Award Year fields disabled.
5. Select or clear **View All Statuses**.
6. Select an optional **Document Status**. If you select a document status, CampusNexus Student lists only the type of document you selected and only those that have the selected status.
7. From the displayed list, find a student document.
8. Click on a field in the row you want to update. You can update the following fields:
   - Status
   - Date Requested
   - Date Received
   - Date Due

- Date Accepted
- Scanned

Note: In date fields, you must enter the century along with the year. For example, 06/30/2000. If you just enter 99 instead of 1999, CampusNexus Student will reject it.

9. Click **Scanned**, if necessary, to indicate that you have scanned the requested document into your electronic filing system.
10. The **Default Values tab** enables you to update statuses and dates in batches.

    If you select a Status, or a Date Due, or Award year, for example, CampusNexus Student updates the values of all students whose names appear in the grid. Click **Set** to update the values and save your work.
11. The **Search Student tab** enables you to search a student using the Social Security Number (SSN) or Student ID.

    Type the SSN or ID and click **Filter**. CampusNexus Student finds the student associated with that number and displays only that student's name and information in the grid. Click **Clear Filter** to remove the filter. The grid revert to the previous display of students.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Schedule Classes

Before students can be scheduled in classes, you must develop a plan for the class room usage and schedule the classes for the various shifts. You would want to coordinate classes so that the classes for a given program are not offered at the same time on the same days of the week. Students must be able to use their time on the campus efficiently, scheduling a productive array of classes during the day, while allowing time to get from one class to the next.

Many variables go into making an efficient use of the class room space, the instructor time, and the student time. We cannot go into all the variables at your institution that influence how you arrive at the class schedule for a given term. We can only tell you how to add a new class to the list of classes available for a given term.

The Class Section Registration cube report (under Reports > Academic Records > Class Section Registration) can help you plan class schedules. The variables that go into the mix when planning the distribution of classes are available in this report. These variables include campuses, terms, class section codes, buildings, rooms, instructors, days of the week, periods, students, and others. You can combine and list these variables to view meeting patterns for your class schedules.

CampusNexus Student provides some conflict resolution features:

- A warning is displayed if you try to schedule a class in a room for which another class has already been scheduled at the same time. (If a room is used for more than one class at the same time, create two room IDs such as 304A and 304B.)
- A warning is displayed if you try to schedule an instructor for a class when the instructor is already scheduled for the same time period in another class.
- CampusNexus Student does not allow you to enter duplicate class codes for a course in the same term.

Variable Class Schedules

You can identify a class that meets at variable days and times. When posting attendance for such a class, specify the date for which you are posting attendance. This requires an expected day and time to be scheduled to maintain the printing of the student schedule. If you do not want it on the schedule, you do not have to specify days and times. Use the comment box (one line) next to the course on the student's schedule to enter comments, such as "By Arrangement" when a course with no days/times is specified. The Student Schedule report shows the comments.

Automatic Attendance Warnings and Drops

If the class setup indicates that a student is to be dropped from the class after too many absences, the Attendance Posting routine updates the student's class status by setting it to "D - Dropped" when absences exceed the set limit. This only works when adding NEW attendance. You can also set up a class to trigger a warning flag when absences exceed the set limit. The warning flag causes a message to appear on class rosters (**WARNING - excessive absences**).

Integration with CampusNexus Finance, HR & Payroll

When CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll and Faculty Management Integration is enabled for the campus, for any faculty member who has been assigned as a primary or secondary instructor CampusNexus Student sends the following information to CampusNexus Finance, HR & Payroll:

- Term
- Instructor ID
- Course Code
- Class Section

CampusNexus Finance, HR & Payroll sends updates to CampusNexus Student each time the following information about a Class Schedule is modified or deleted:

- Class Section or Description
- Course
- Term

- Instructor
- Instructor Designation
- Start Date or End Date
- Enroll Status Credit and Hours
- Associated Campuses
- Active flag
- Period

If an instructor is changed on a Class Schedule, the current Instructor is unassociated from the Class Schedule and the new instructor is assigned to the Class Schedule.

For all Class Schedules, CampusNexus Student sends CampusNexus Finance, HR & Payroll the value of the 'Maximum Students' field, including any updates to this field. CampusNexus Finance, HR & Payroll in turn displays the 'Maximum Students' configured for a Class Schedule.

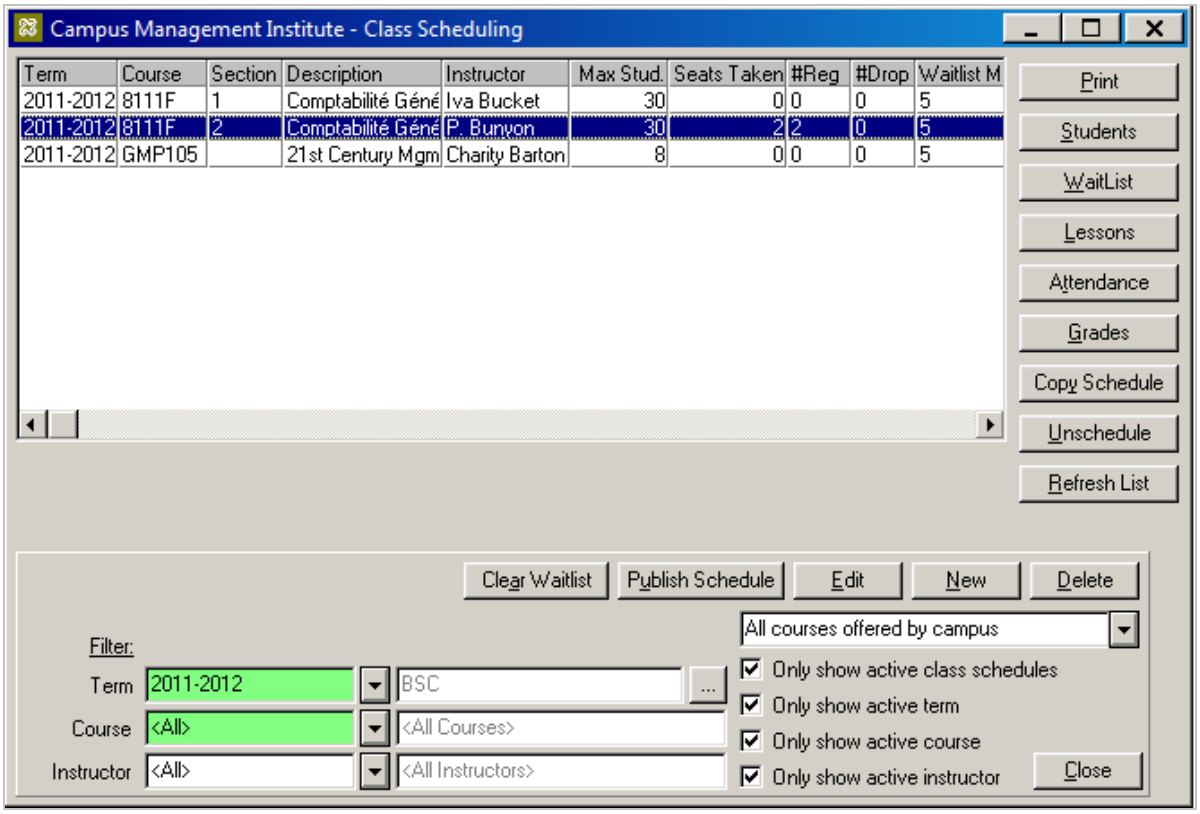
CampusNexus Finance, HR & Payroll notifies the user if this information was not successfully sent.

To add or edit a class schedule:

1. Navigate to **Daily** > **Academic Records** > **Schedule Classes**. The Class Scheduling form is displayed.
2. To speed program operation and to avoid the confusion of listing every course that your campus offers, the form first appears without any courses listed. Use the **Filter** options in the bottom of the form.
   - Term (Click to the right of the Term fields to view the Term Selection form.)
   - Course
   - Instructor

   Additional filter options include:
   - All courses offered by campus (default)
   - Only courses shared to other campuses
   - Only courses shared from other campuses

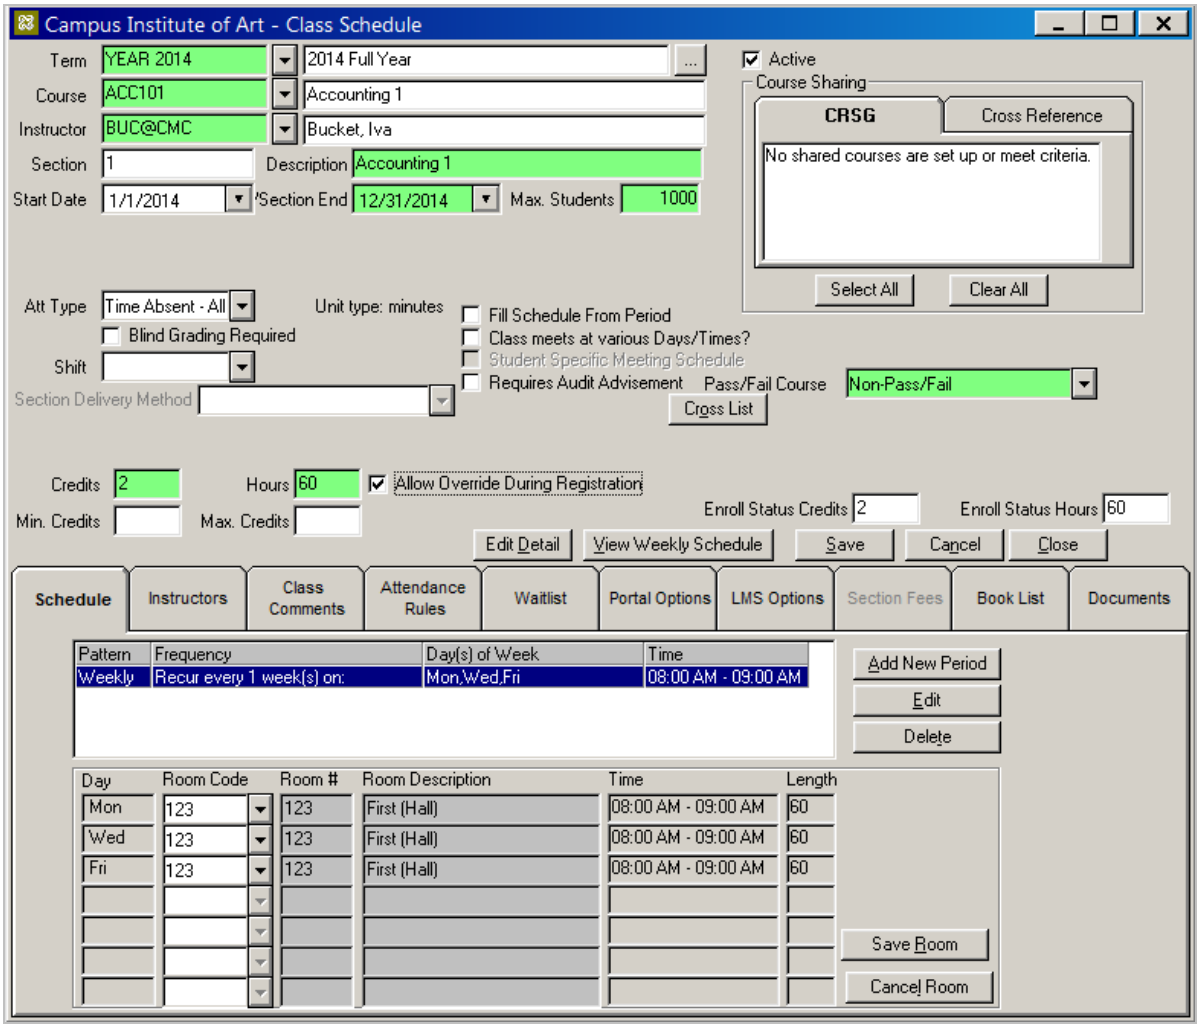
   The following filter options are selected by default:
   - Only show active class schedules
   - Only show active term
   - Only show active course
   - Only show active instructor



3. To add a class, click **New**. A blank Class Schedule form is displayed.

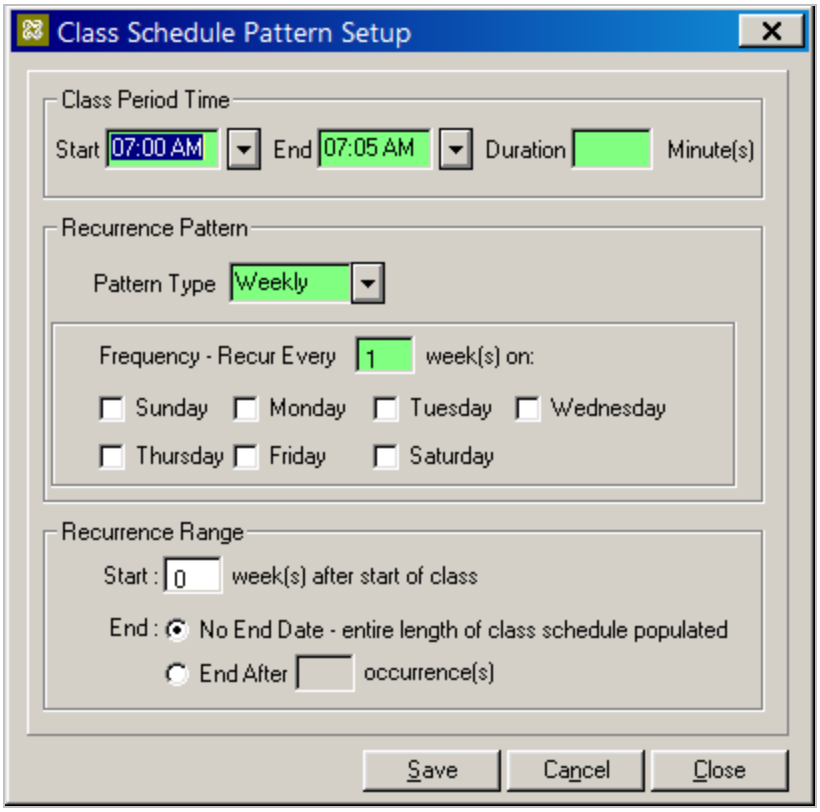
   Note: Business rules for the **New** button prevents a course from being scheduled for a term if it is a Dependent course and the defined Parent course has not been scheduled for the selected term. A message is displayed: "*There are no parent courses currently scheduled for the term for this course. This course cannot be added to the term class schedule until at least 1 parent course has been scheduled.*" Click **OK**.

   To edit a class, select a class and click **Edit**. A Class Schedule form containing the current data about the class is displayed.



4. Select or enter data according to Field Descriptions - Class Schedule Form.
5. Click **Edit Detail** to see the class schedule in a calendar format. For more information, see Class Scheduling and Attendance.
6. Click **Print** to run the Term Class Schedule report. The report is also available via Reports > Academic Records > Class Schedule.Students
7. Click **Students** to view a list of students scheduled in the selected class. You can select more than one class at a time.
8. Click **Waitlist** to view a Class Roster to see waitlist details for the selected class.
9. Click **Lessons** to view or set up lessons for the selected class.
10. Click to **Attendance** view or enter attendance for the selected class.
11. Click **Grades** to view or enter grades for students in the selected class.
12. Click **Copy Schedule** to copy one class to another (new) class, or copy an entire term to another term.
13. Click **Unschedule** to unschedule a selected class.
14. Click **Refresh List** to refresh the form with current data.

15. Click **Clear Waitlist** to reset all wait lists to zero.
16. Click **Publish Schedule** to view a form that allows you to configure when to publish the class schedule online.
17. Click **View Weekly Schedule** to view the weekly schedule.
18. Click **Add New Period** to add details for the class schedule by entering the values in the Class Schedule Pattern Setup form. This form is identical to the Period Code Setup form except that the fields Code and Description are not used here.



Note: When the Add New Period button has been selected, the 'Class meets at various Days/Times?' and 'Student Specific Meeting Schedule' options are disabled.

19. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Field Descriptions - Class Schedule Form

Field	Description
Term	Select the term in which the class is offered. If your institution is set up for floating terms, click **Browse** to select more than one term. This button is displayed only if your school uses floating terms. See Floating Term Class Scheduling for an overall view of this feature.
Course	Select the course that is being taught in the class.

Field	Description
Instructor	This field contains instructors for the course that were configured for the course. Select the instructor who will teach the course. You can assign additional instructors, or secondary instructors, for courses that are co-taught or have assistant instructors for lab sessions. Use the Secondary Instructors field. All courses with multiple instructors must designate a primary instructor. Courses may or may not have secondary instructors. **Note**: The primary instructor is used in all business logic selection criteria and sorting for instructors (for reports, posting attendance, printing rosters, etc.).
Course sharing	To allow students at other campuses to take this course, indicate which campuses are allowed to share this course and which campuses are allowed to cross-reference this course. If students at all campuses are allowed to take this course, click **Select All.**
Show All	The Show All check box appears if the override instructor course association option is enabled. If selected, all instructors are displayed.
Section	Enter the section number (alphabetic and numeric characters are permitted).
Description	The description of the course is displayed. You can change it if required.
Start Date	The date on which the class starts. The default is the term start date. You can change it if required. **Note**: The revenue earning period is equal to the Start Date.
End Date	The date on which the class ends. The default is the last day of the term. You can change it if required. **Note**: The revenue earning period is the End Date of the revenue earning period of the course.
Max. Students	Enter the maximum number of students allowed in the class. When students are registered for the class, this is considered the maximum limit. There is no override at the time of registration. The only way to override is to change this number.
Add/Drop Date	This field is only visible and required when the 'Add/Drop Flag' field is configured to "S" (Course Section Enforced) for the course section's campus. If the course section is shared with other campuses on the CRSG tab, the course section's campus is used to get the add/drop flag. The add/drop flag configuration of any of the shared campuses is not used. You can configure this date when the 'Manual Override' check box is selected. If the 'Manual Override' check box is cleared, the value in this field was calculated by CampusNexus Student. This date is automatically calculated and refreshed when you clear the 'Manual Override' check box. If changes are made to any of the following fields on this form, the 'Add/Drop Date' value is recalculated: • Course • Start Date / End Date • Shift • Fill Schedule from Period (check box) • Manual manipulation of the class schedule, using the 'Schedule' tab (i.e., Add New Period, Edit, and Delete) • Manual manipulation of the class schedule using the Class Schedule Calendar (i.e., adding or canceling class meetings) via the 'Edit Detail' button.

Field	Description
Manual Override (Add/Drop Date)	This check box is only visible when the 'Add/Drop Flag' field is configured to "S" (Course Section Enforced) for the course section's campus. When the value of this check box is selected, the course section 'Add/Drop Date' field is enabled to allow you to enter a date manually at any time, even after it has been automatically calculated; if cleared, the course section 'Add/Drop Date' field is disabled. **Note**: The default value of this check box when the form is first opened is as follows: • When adding a new course section, the default is cleared. • When editing an existing course section, the default of this check box is based on the existing value.
Last Day to Withdraw Date	This date is calculated on the basis of configurations for Enforce Last Day to Withdraw at the campus level (Setup > Campus Locations > Edit/Add > Academic Records (tab)). By default, this option is disabled. **Important Note**: Changes in Term, Start Date, and End Date force recalculation of Last Day to Withdraw Date.
Manual Override (Last Day to Withdraw Date)	This check box allows you to manually edit the Last Day to Withdraw Date. When the box is cleared, Last Day to Withdraw Date is not editable. By default, this option is disabled.
Att Type	The Attendance Type determines how attendance is maintained for the course. The options are: • Time Absent-All (default) • Time Present Only (Enter the number of units completed in the attendance posting procedure.) • Time Present-All (Enter the number of units completed and the system calculates the time absent.) • None (You can post the Last Date of Attendance (LDA) for students in the class under Daily > Academic Records > Attendance > Record Attendance Dates. However, you will not be recording, through the attendance procedures, the number of units completed.) **Note:** If the course is set up to measure the units completed instead of time (in other words, if the Unit Type is set to Quantity instead of Minutes on the Course Setup form), select Time Present Only or None here.
Unit Type	This is the type of unit used to record attendance. The options are Minutes or Quantity. Unit Type is determined in the Course Code setup.
Fill Schedule from Period	When 'Fill Schedule from period:' is selected, the class will meet at a predefined meeting time. This option allows you to predefine a session pattern for a class schedule that may be saved and used when setting up other course sections. If a period does not exist that meets the course needs, you can create a period under Lists > Academic Records > Period. If this option is selected, the options for 'Class meets at various Days/Times?' and 'Student Specific Meeting Schedule' are disabled.

Field	Description
Blind Grading Required	Enable this option if this class uses blind grade Ids to conceal student names for this class. A blind grade Id is a random number (of six or more digits) generated by CampusNexus Student when a student registers into the first course that requires blind grading within a term. This blind grade Id is used in place of the student's name and is displayed on the reports generated by the system.
Class Meets at Various Days/Times	Select this check box if the class does not have regular scheduled meeting dates and times. This option allows for a course section to have a class schedule dynamically created when there are no set dates or times, as with a predefined schedule. This option is generally used for courses that do not have a predefined meeting schedule and the instructor creates it with the class as it progresses. This has been used for independent studies. With this option selected, the options 'Fill Schedule from period:' and 'View Weekly Schedule' are disabled. The buttons for 'Edit Detail' and 'Add New Period' are also disabled. **Best Practices Note:** Users need to be aware that the selection of the **Class Meets at Various Days/Times** check box takes precedence over any configured schedule in the system. Using this check box along with a configured schedule should be avoided as it can cause unpredictable results in attendance.
Student Specific Meeting Schedules	When the 'Class Meets at Various Days/Times' check box is enabled, the 'Student Specific Meeting Schedules' check box is enabled and the Attendance Rules tab is displayed to allow you to enter the Default Time per Meeting numeric value between 1 and 999. This value is used when a 'P' is entered for the student's attendance for student specific meeting schedules. **Note**: The actual class schedule is used to determine the Course Section. See also Record Attendance.
Shift	Select the shift to be associated with the class schedule from the drop-down list. **Note**: Shifts that appear in the Shift list box are defined by users using (Lists>Academic Records>Shifts) form.
Requires Audit Advisement	Check this box if the student requires audit advisement.
Section Delivery Method	Identify the delivery method used for the selected class by selecting the method from the drop-down list. **Note**: This option is grayed out if the campus does not have delivery methods defined in **Lists > Academic Records > Delivery Methods**.
Pass/Fail Course	See Courses Code Setup (Default Pass/Fail Settings section) for definitions of the system-defined list options for this field. Select the applicable option.

Field	Description
Secondary Instructors	The instructors' names appear in the Teacher field. If the names of secondary instructors exceed the span of the field, you can use the cursor to scroll through the list. To assign secondary instructors: 1. Click ... to the right of the **Secondary Instructors** field to view a list of possible secondary instructors. 2. Select all instructors that pertain to this class. 3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.
Variable Credit Courses	The Credits, Hours, Min Credits and Max Credits fields and the Allow Override During Registration check box appear only if the Allow Override check box on the Courses Code Setup is selected. These fields are used when a Course is offered with a variable number of credits. Institutions offer variable credit courses in two ways. They may create multiple class sections with each individual class section having its own credit value or they may have class sections in which each students is allowed to select the credit value that suits their needs while registering. Credits	This field only appears when the Allow Override field on the Courses Code Setup form is selected. This allows the course to be scheduled with a variable number of credits. The Class Schedule form initially displays the Credits field with the value from the Course Code Setup form. This value can then be edited for the class section being created. You may want to do this if you have a variable credit course and want to offer different class sections with each one having its own credit value.
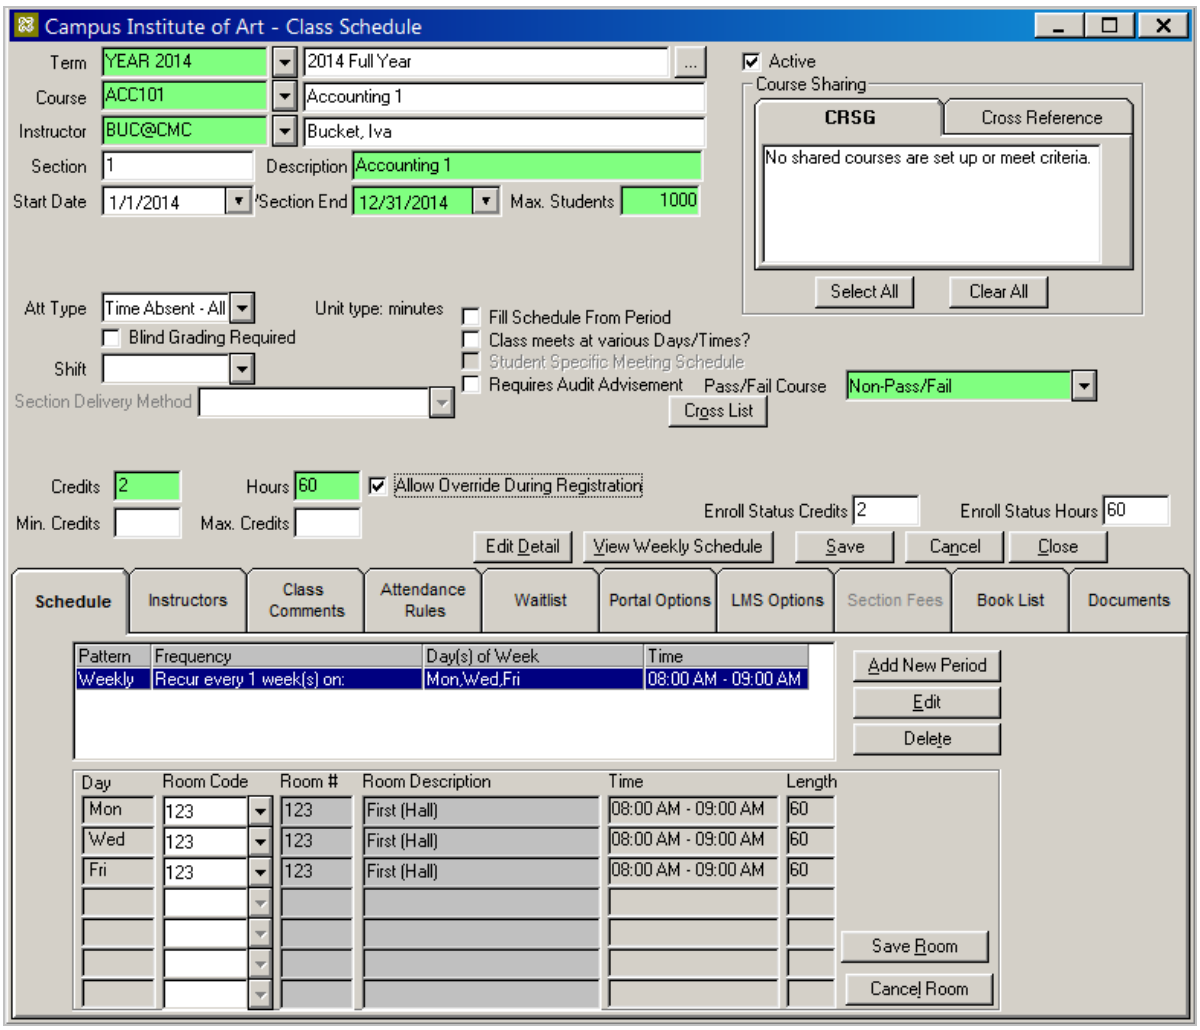
Hours	This field only appears when the Allow Override field on the Courses Code Setup form is selected. The Class Schedule form initially displays the Hours field with the value from the Course Code Setup form. This value can then be edited for the class section being edited. You may want to do this if you have a variable credit course and want to offer different class sections with each one having its own hours value. **Note**: If your campus is configured to compare Course Contact Hours with Class Schedule Hours, the hours specified on the class section are used in the comparison (instead of the course contact hours for variable credit courses
Allow Override During Registration	This check box only appears when the Allow Override field on the Courses Code Setup form is selected. When selected, students registering for the class section are allowed to select the number of credits they wish to attempt for the specified course section. If the check box is not selected, the Min Credits and Max Credits fields are disabled because students are not allowed to select the number of credits they will attempt when registering into this class section.

Field	Description
Min Credits	This field is only enabled if the 'Allow Override During Registration' check box is selected. A minimum credit value can then be entered. This value restricts students from selecting a lower credit value when registering into the class section. If this field is left blank, the minimum credit value defined on the Courses Code Setup form is used. If the value defined on the Course Code Setup form is blank, the student may elect any credit value.
Max Credits	This field is only enabled if the 'Allow Override During Registration' check box is selected. A maximum credit value can then be entered. This value restricts students from selecting a higher credit value when registering into the class section. If this field is left blank, the maximum credit value defined on the Courses Code Setup form is used. If the value defined on the Course Code Setup form is blank, the student may elect any credit value.
Enroll Status Credits	By default, this field is populated with the number of enroll status credits saved on the course setup. If students who register into this class section need a different enroll status credit weight to ensure accurate enrollment status calculations (for example at institutions who have modified enrollment status minimums for the summer term), enter the number of credits that can be used for this course towards the calculation of a student's enrollment status here. These courses can include, for example, graduate level internships that are a required part of the academic program, but which do not provide credits towards graduation and do not contribute towards academic progress calculation. The number entered in this field is used in enrollment status calculations and automated disbursement approval for the students registered into this section. Values entered in this field override any values that were received from the Course definition (Lists > Academic Records > Courses).
Enroll Status Hours	By default, this field is populated with the number of enroll status hours saved on the course setup. If students who register into this class section need a different enroll status hour weight to ensure accurate enrollment status calculations (for example at institutions who have modified enrollment status minimums for the summer term), enter the number of hours that can be used for this course towards the calculation of a student's enrollment status here. The number entered in this field is used in enrollment status calculations and automated disbursement approval for the students registered into this section. Values entered in this field override any values that were received from the Course definition (Lists > Academic Records > Courses).
Cross List	A message beside the Cross List button identifies the course as cross-listed. If the course is cross-listed, click the button to view information about the cross-listed courses on the Cross Listed Courses form.

Class Schedule - Schedule Tab

The Schedule tab on the Class Scheduling form provides an area to designate scheduling details for the class. You can select the class schedule attributes from the fields located in the top portion of the Class Schedule form, such as the Fill Schedule from period, Class meets at various Days/Times?, Last Day to Withdraw Date, Manual Override, and Student Specific Meeting Schedules options. The grid displays multiple class schedules that you have selected when using the Fill Schedule From Period option.



After you select a class schedule from the grid, the corresponding schedule is displayed as follows:

Field Descriptions

Field	Description
Pattern	This is the pattern of when the class meets. For example, daily, weekly, monthly.
Frequency	This field represents how often the class meets. For example, recur every 1(week) on:, recur at various times.
Day of Week	The day of the week is displayed automatically. This is a read-only field. You cannot modify or edit the day of the week.

Field	Description
Room Code	Select the room number for the class meeting from the drop-down list.
Room #	When you select the Room Code, the meeting room number is displayed automatically. The room is unique to the class. You can edit this field.
Room Description	The description for this room is displayed. If required, you can edit the description.
Time	The time of the class meeting is displayed. You cannot edit or modify the time of the meeting.
Length	The duration of the class meeting is also displayed automatically. This is a read-only field.

Edit/View button: Select a period from the grid and click this button to edit or view the details of a period associated with the class schedule. The button toggles between Edit and View depending on the period type. If the period is created through the List > Academic Records > Period form, the View button is displayed on the form to allow you to view the details of the period. You cannot edit the details using the View button. However, if you create a new period through the Add New Period, the Edit button is displayed allowing you to edit the details of the period.

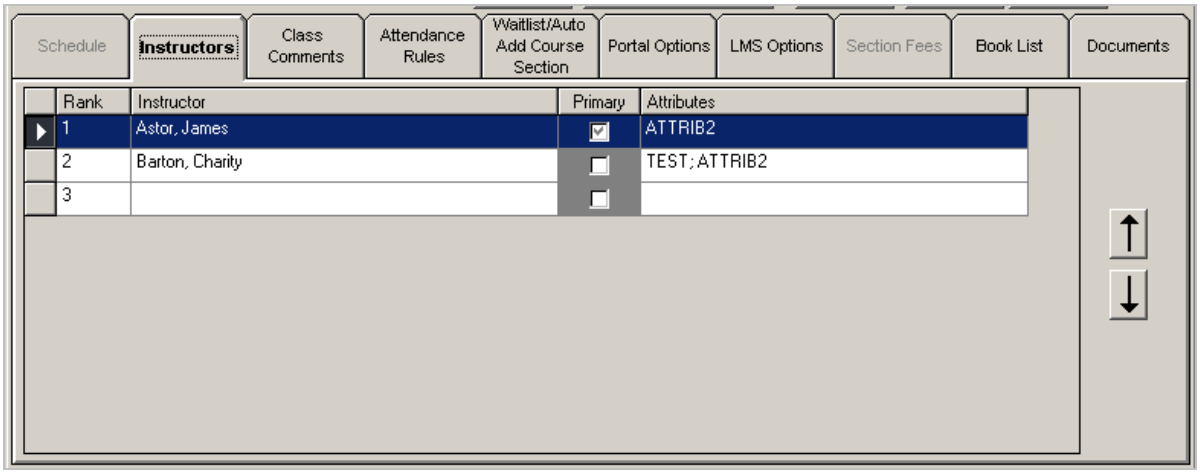
Delete button: Select a period from the grid and click this button to delete the association of the period with the class schedule. If you added the period using the **Add New Period** button, the period is also deleted from CampusNexus Student.

Save/Cancel Room buttons: Click this button to save or cancel the room associated with days in the bottom grid of the Schedule tab in the class schedule form.

Class Schedule - Instructors Tab

Use the Instructors tab to select or deselect attributes for instructors while creating a course section. These attributes serve different purposes depending on your institution's needs. For example, attributes may be used to generate custom reports to show how an instructor is paid or to track instructor utilization. Institutions can also assign attributes to instructors for courses that need to be designated for external reporting purposes and then run reports to provide to the external agencies.

All Active attributes created in Lists > Academic Records >Instructor Attributes are available for selection in the Instructors tab. Tthe Attributes field is populated automatically if an instructor was assigned attributes through Instructor Maintenance (Daily > Academic Records > Instructor Maintenance > HR Info (tab) > Instructor Attributes (button)) or Staff Maintenance (Setup > Staff > HR Info (tab) > Instructor Attributes (button)).



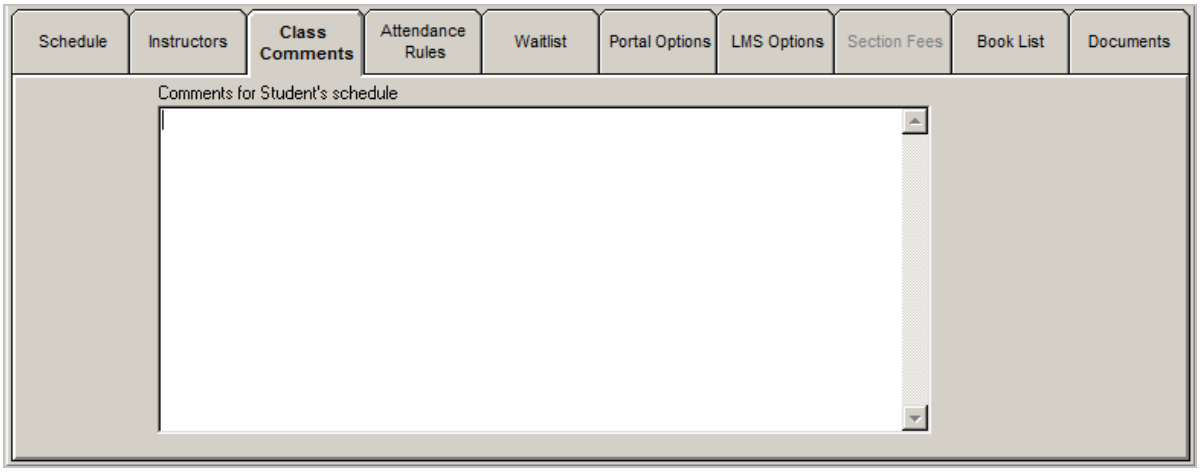
To assign attributes to an instructor:

1. Select the instructor from the **Instructor** column on the left.
2. Select one or more attributes from the **Attributes** column on the right.
3. If the instructor is designated as primary instructor, select the **Primary** check box..

   Note: Any instructor in the list not marked as primary is secondary by default.
4. To modify the instructor **Rank**, select the instructor row to be modified, and click the up arrow to raise the instructor's rank or click the down arrow to lower the instructor's rank.
5. Click **Save**.

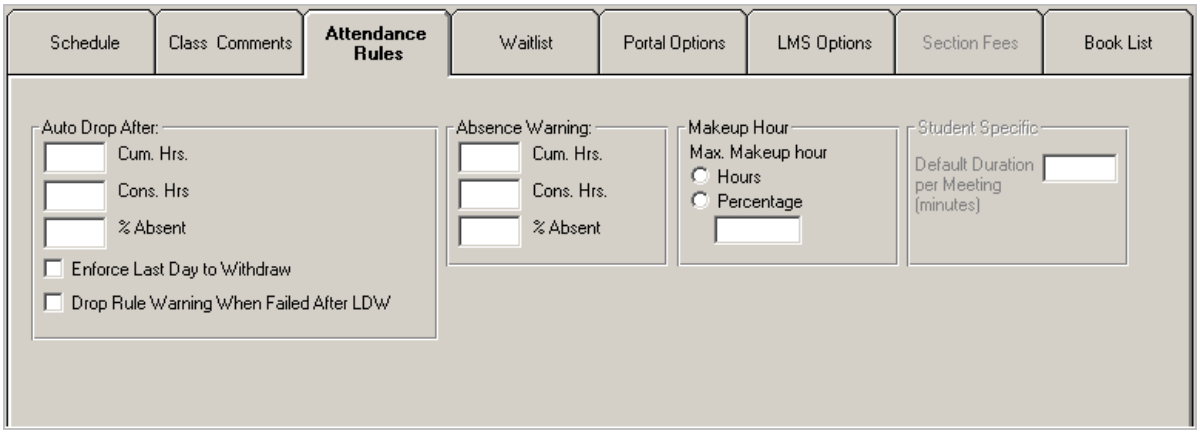
Class Schedule - Class Comments Tab

The Class Comments tab on the Class Scheduling form provides an area to store comments about the class that will appear on the student's schedule.



Class Schedule - Attendance Rules Tab

Use the Attendance Rules tab on the Class Scheduling form to configure auto drop rules, absence warnings, makeup hours, and student specific attendance rules for the class.



Auto Drop After

Use this option to configure Auto Drop settings that automatically cause students registered in a course section to be dropped if they reach the configured absence threshold. Enter any of the three comparison values:

- The number of **cumulative hours** absent that drop the student from the class.
- The number of **consecutive hours** absent that drop the student from the class.
- The **percent of hours absent** that drop the student from the class. This is a value from 000.00 to 100.00. If the value is zero, there is no warning level based on percentage.

The fields Enforce Last Day to Withdraw and Drop Rule Warning When Failed After LDW fields are available only if these options are enabled for the campus (see Campus Information - Academic Records Tab).

- Select **Enforce Last Day to Withdraw** to designate whether students should be automatically withdrawn from courses if they reach the configured absence threshold after the Last Day to Withdraw date. By default, this option is disabled so that the Auto Drop process continues to drop students from courses regardless of LDW date.
- Select **Drop Rule Warning When Failed After LDW** causes a warning to appear on the class roster reports, regardless of whether the student was dropped or not, if the attendance rule failed after the LDW date. By default, this option is disabled.

Note: The Auto Drop logic drops the course automatically on attendance posting if the student's absence time is greater than or equal to the time configured here. If this course is a prerequisite course, and if the campus is configured accordingly (see Description of Fields on the SAP/Grades/Registration Tab), conditional courses are automatically unregistered when this pre-requisite course is automatically dropped due to attendance rules that cause the prerequisite rule to fail. Excused absences are excluded from the auto drop process.

Absence Warning

Select any three of the comparison values:

- **Hours** - The number of cumulative hours absent that set a warning flag on the class section rosters.
- **Cons. Hrs.** - The number of consecutive hours absent that set a warning flag on the class section rosters.
- **% Absent** - The percent of hours absent that set a warning flag on the class section rosters. This is a value from 000.00 to 100.00. If the value is zero, there is no warning level based on percentage and rosters.

Makeup Hour

The Makeup Hour fields are available only if Allow Makeup Hours is enabled for the campus (see Attendance Configuration).

Select **Hours** or **Percentage** on which to base Maximum Makeup Hours:

- **Hours** - The maximum number of makeup hours permitted.
- **Percentage** - The maximum percentage of class time that may be counted toward makeup hours.

Student Specific

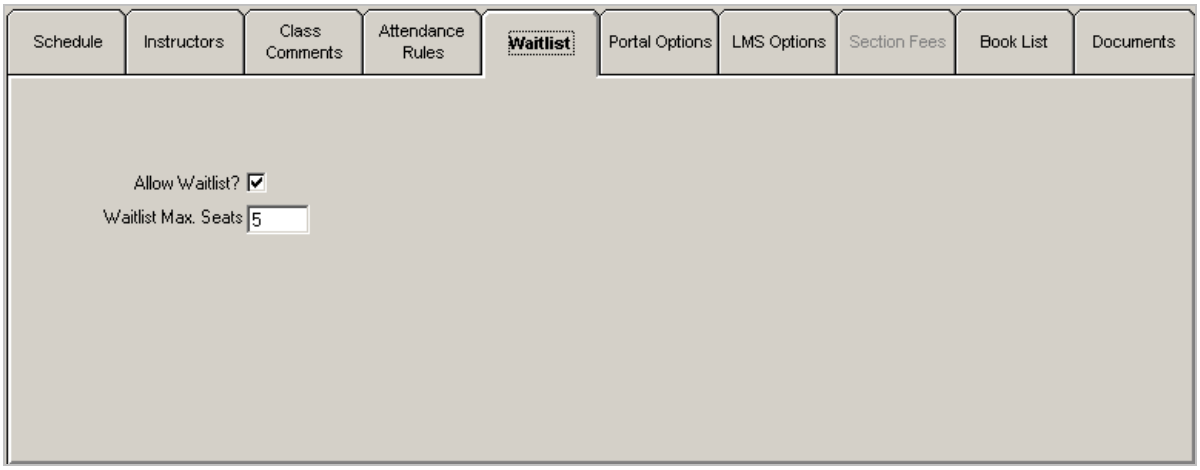
Enter a numeric value between 1 and 999 that represents the maximum number of minutes allowed as a **default time per meeting** for this class. This number represents a 'P' (present) value when posting attendance. See also Attendance, Online Delivery Method, Record Attendance and Record Attendance Dates.

Class Schedule - Waitlist Tab

When you select the Section Delivery Method from the drop-down list of the Class Schedule form, a Waitlist, Waitlist/Auto Add Course Section or Auto Add Course Section tab is displayed. You can configure options as they pertain to the specific tab as they apply to reservations and the automatic creation of new course sections. See also Courses, Course Types, Student Waitlist Defaults.

Waitlist Tab

The Waitlist tab is displayed if the course is not an online course. For example, a lab or lecture course displays the Waitlist tab.

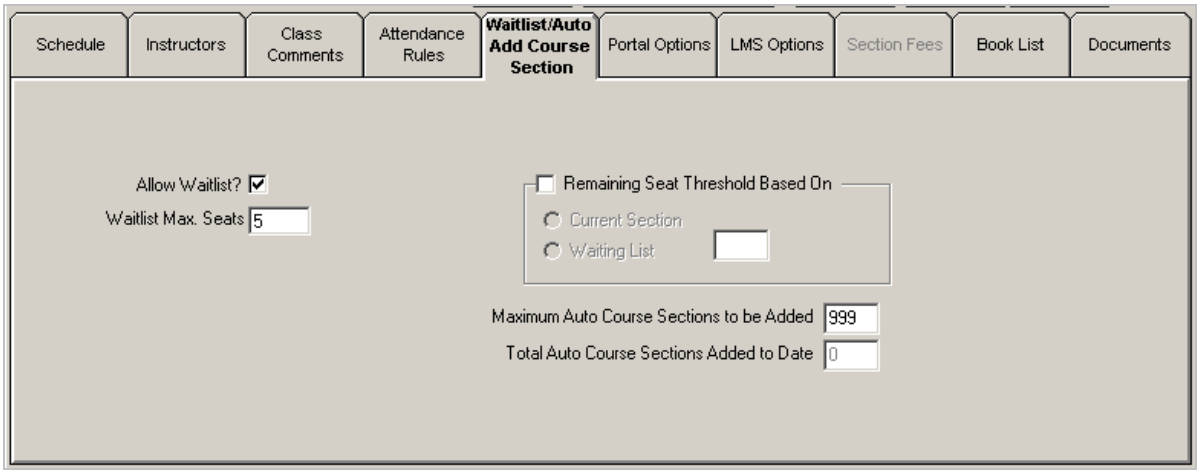


Waitlist Options

1. Select **Allow Waitlist?** if you want students to be placed on a waitlist.
2. Enter the maximum number of reservation seats allowed for the course in the **Waitlist Max. Seats** field.

Waitlist/Auto Add Course Section

If the course has been configured as having a delivery method of online, a course type of online, and the auto add new course section flag is enabled for the course, the **Waitlist/Auto Add Course Section tab** is displayed if the **Section Delivery Method** has been configured accordingly.



See Waitlist options above and set appropriately.

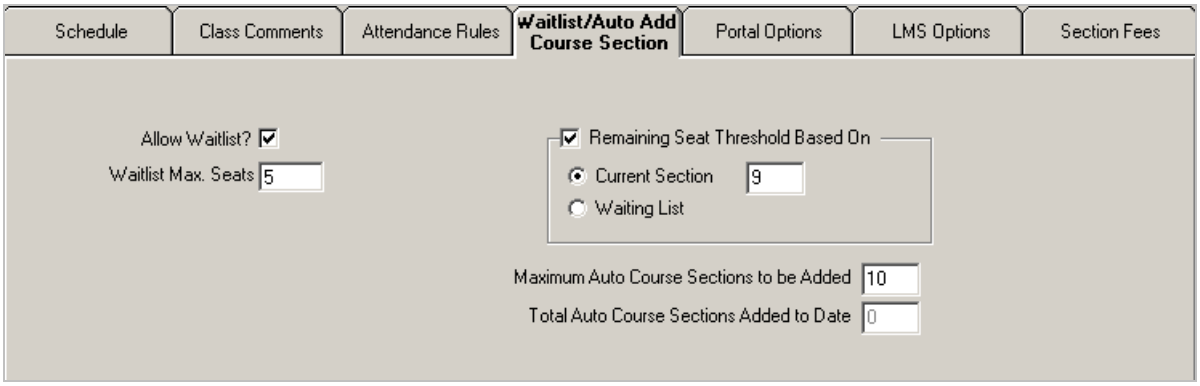
Auto Add Course Section options

1. Select the **Remaining Seat Threshold Based On** check box.
2. If the **Allow Waitlist?** option is enabled, the Remaining Seat Threshold Based On section contains two options: **Current Section** or **Waiting List**.

Current Section

To base the remaining seat threshold on the current section, select the **Current Section** option.

The field next to the Current Section option accepts values between 1 and 999. Enter a value that is less than the **Max. Students** value. An error message is displayed if a value is entered that is not less than the Max. Students field. An entry in the field is required.



Waiting List

- If the Allow Waitlist check box is selected as illustrated above, the Waiting List option is available for selection. Select the **Waiting List** option to base the remaining seat threshold on the waitlist.

  The data entry field to the right of the Waiting List option accepts values between 1 and 999. Enter a value that is less than the Waitlist Max. Seats value. An error message is displayed if a value is entered that is not less than the Waitlist Max. Seats field. An entry in the field is required.

  Note: If the 'Waiting List' threshold is met while registering a student, all students on the waiting list are moved into the new course section.

- If the Allow Waitlist check box is not selected, the Waiting List option is disabled.

3. In the **Maximum Auto Course Sections to be Added** field, enter a number between '0' and '999' representing the number of automatic course sections that may be created. A value of zero prevents any sections from being added automatically. A value of '999' allows an unlimited number of sections to be added automatically.
4. The **Total Auto Course Sections Added to Date** field is a read only field that displays the total number of sections that have been automatically added for this course. This count in this field does not include sections that were created by having been copied manually by staff authorized to do so.

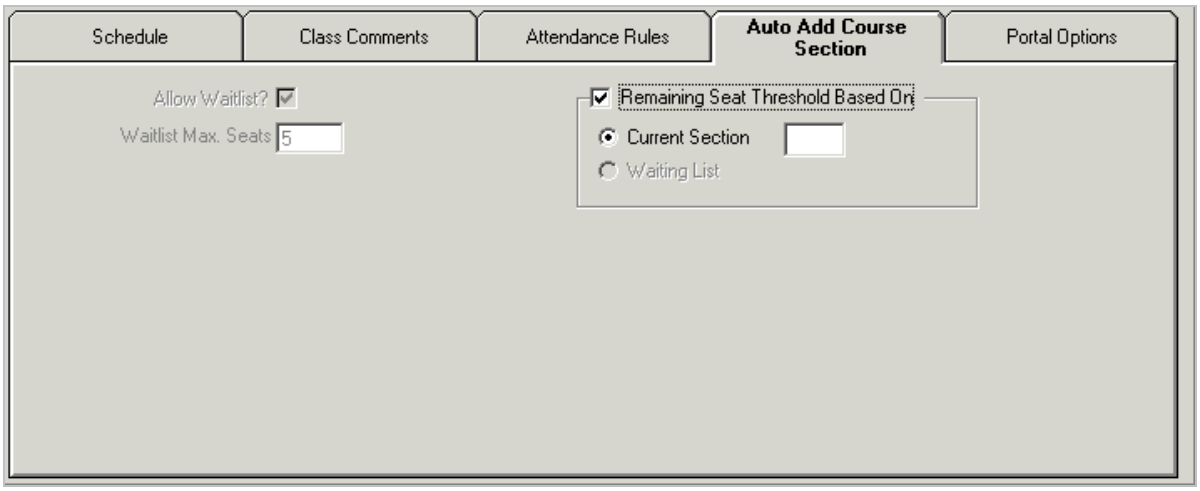
Note: If a section that was automatically added is subsequently deleted, the value in the Total Course Sections Added to Date field is reduced by one (1). The field is not changed if a section that was added manually is deleted.

Auto Add Course Section tab

If the Waitlists are not permitted at the campus, the Auto Add Course Section tab is displayed if this feature is selected when the delivery method is configured for the online course. In this case, the new course sections are added when the current section

reaches the number of students entered in the data entry field beside the **Current Section** radio button, if the **Remaining Seat Threshold Based On** check box is selected.

To enable the field, select the check box, the **Current Section** field becomes enabled, and a number may be entered in the data entry field.



The **Maximum Auto Course Sections to be Added** field represents the number of automatic course sections that may be created for this course. This file accepts values between '0' and '999'. A value of zero prevents any course sections from being automatically added. A value of '999' allows an unlimited number of course sections to be automatically added.

The **Total Auto Course Sections Added to Date** field is a read only field that displays the total number of sections that have been automatically added for this course. This count in this field does not include sections that were created by having been copied manually by staff authorized to do so.

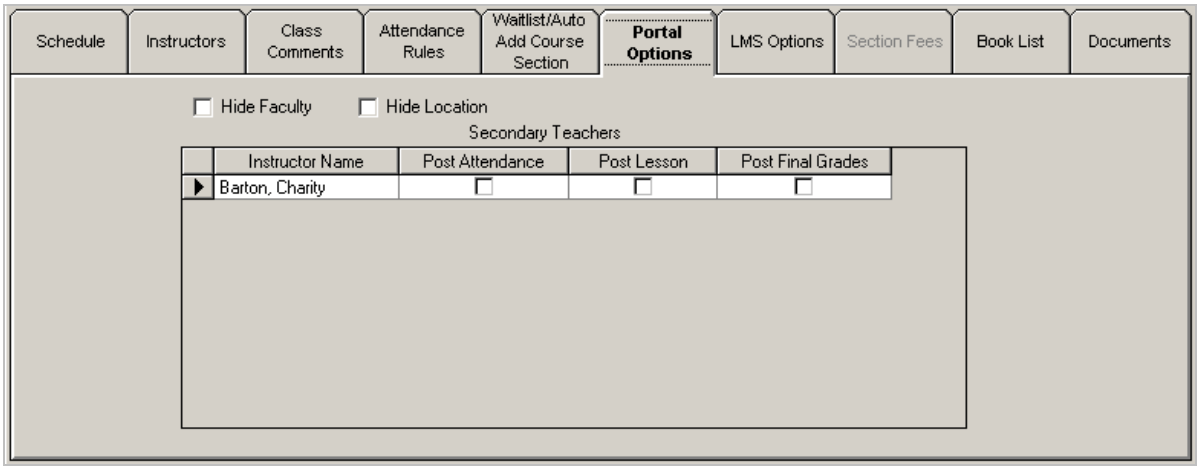
Important Notes

If a section that was automatically added to the system is subsequently deleted, the value in the Total Course Sections Added to Date field is reduced by one (1). The field is not changed if a section that was added manually is deleted.

When a new course section is automatically created, if the Enforce Last Day to Withdraw feature is part of the configuration for the existing course section's campus (**Setup > Campus Locations > Edit/Add > Academic Records (tab) > General (tab)**), the new course section is populated with the LDW date on the existing course section.

Class Schedule - Portal Options Tab

The Portal Options tab on the Class Schedule form provides an area to set options for Portal features.



Hide Faculty

Select this check box to prevent the faculty names for this class from appearing in online forms when using Portal.

Hide Location

Select this check box to prevent the location information for this class from appearing in online forms when using CampusNexus Student.

Note: If a class is copied using the Copy Section or Copy Class Schedule feature, the new class inherits the current settings for **Hide Faculty** and **Hide Location**. After that, each setting can then be changed individually for each class.

Secondary Teachers

The Secondary Teachers grid provides an area to specify the duties that each secondary instructor can perform. Check boxes exist for **Post Attendance**, **Post Lesson**, and **Post Final Grades**. Selecting a check box allows the instructor on that line to perform the task. Any combination can be used.

Class Schedule - Section Fees Tab

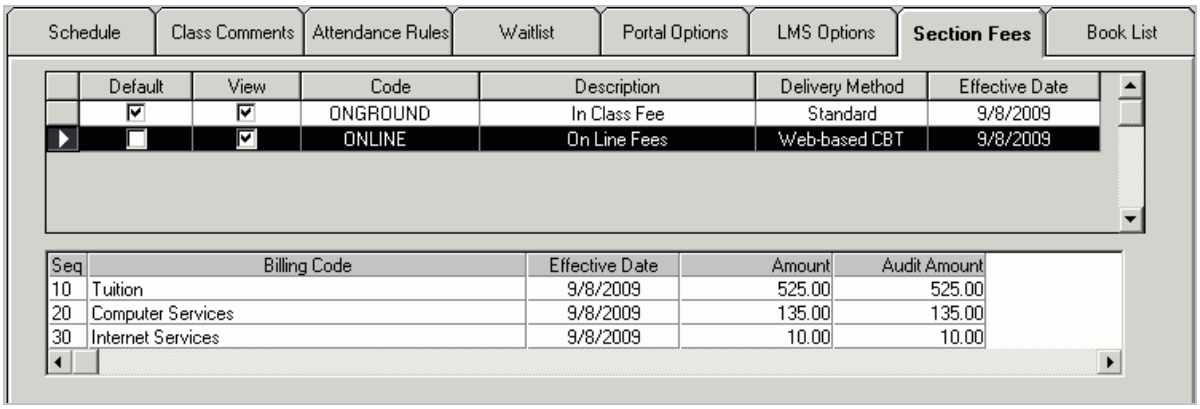
The Section Fees tab on the Class Schedule form is only available if at least one fee schedule configured for the course (Daily > Academic Records > Schedule Classes > Edit > Section Fees tab).

When scheduling a class section, CampusNexus Student allows the registrar to select which course Fee Schedules to use during registration. If multiple fee schedules are configured for the course, CampusNexus Student allows the registrar to select which fee schedules will be viewable during the registration process. The default fee schedule is initially carried over from the course fees folder. The registrar can change the default fee schedule if multiple fee schedules are configured for the course.

All Fee Schedules associated with the course are displayed; however, if a Delivery Method is selected for the Class Schedule, only Fee Schedules associated with the Course and Delivery Method are displayed.

To view the Fees Associated with a Fees Schedule:

Double-click the a Fee Schedule. The fees associated with the Fee Schedule are displayed on the Section Fees tab.



The tab lists all Fee Schedules with their associated course fees. From this tab, set a default Fee Schedule, which will be displayed as the default Fee Schedule when registering courses. You can also determine which Fee Schedules a user should have access to when registering courses.

The Section Fees grid is populated with all Fee Schedules associated with the course once a course is selected from the Course drop-down list. To provide further filtering, upon selection of a Section Delivery Method from the drop-down, the Section Fees tab displays only Fee Schedules associated with that Delivery Method. A fee schedule with a blank delivery method is displayed for all delivery methods.

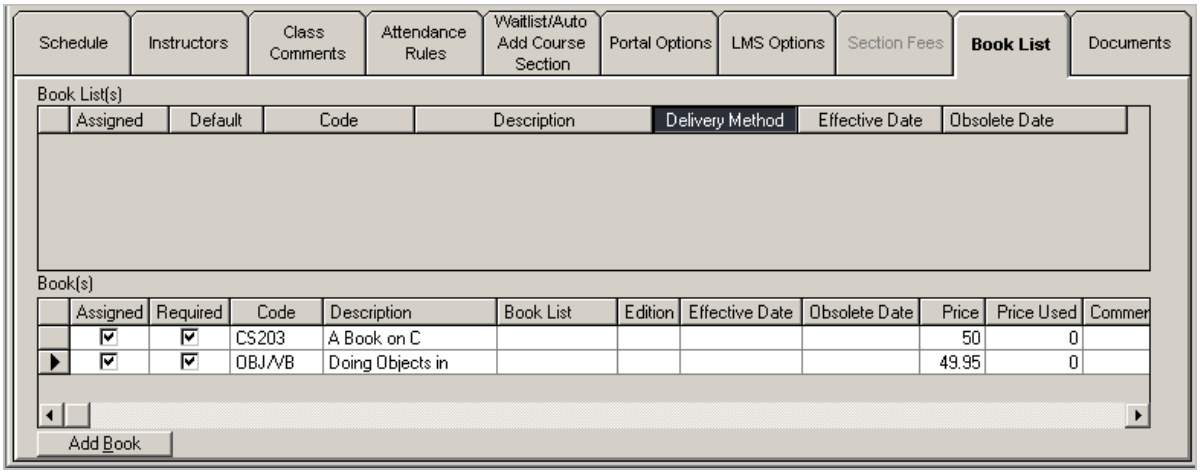
- **Default** – Select this check box to set the Fee Schedule as the default. The default is the first Fee Schedule selected when registering courses.
- **View** – This check box determines if a Fee Schedule is available for selection from the Fee Schedule drop-down list on the course registration wizard.

Class Schedule - Book List Tab

The Book List tabon the Class Scheduling form provides an area to view and update the book requirements for a class section. The book requirements are available to students on their schedules and online via Portal.

The Book List and associated books for the course section may be automatically populated if predefined Default book lists exist in the course configuration under Lists > Academic Records > Courses > Books. When a course section is created, all applicable book lists are displayed in the Book Lists portion of the form. If a book list in the course configuration is set up as a Default book list, the book list are assigned automatically and all applicable books associated with that book list are assigned in the Book(s) area.

Book lists that are not set up to be the default book lists are available for manual assignment to a course section. The Book List fields shown below are populated from the Course Book Lists.



All book lists available for the selected delivery method and those book lists which have the delivery method as blank are displayed. The Book Lists will only be gathered for inclusion in the section if the Start Date of the course section falls in between the Effective Date and Obsolete Date of the Book List, and at least one effective book is associated with the book list.

Note: If a user edits the start date and/or delivery method of the class section, a message will be shown: "The book lists available for selection have been refreshed. Please note, however, that the books assigned based on the previous start date or delivery method (depending on the change that was made) should be unassigned manually." In either of these instances any assigned book list(s) that is/are affected by the change are displayed with a Red background until they are manually removed by clearing the Assigned check box.

The **Assigned** check box in this grid will indicate whether the books associated with the Book List will be included in the **Book(s)** grid at the bottom of the form. The Assigned check box may be selected or cleared. Selecting or clearing the Assigned check box on a book list will select or clear the Assigned check box for all of the book lists associated books.

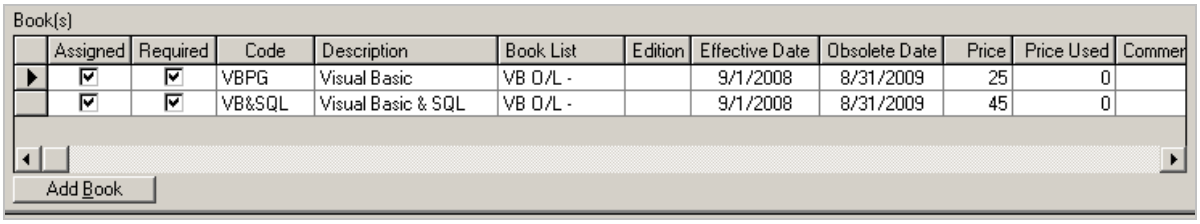
The **Default** check box is selected when the Book List is set up to be default book list in the course configuration. It may not be updated on this form.

Customizing Books for the Course Section

The **Book(s)** grid contains a list of all the books contained in any of the assigned book lists. The book assignments may be modified as required for the specific class section being edited. Any modifications made will only be in effect for the individual class section that is being modified. The specific modifications that can be made are as follows:

- Add an additional book to the class section.
- Unassign a book from the class section
- Select or clear the **Required** flag for a book.

If an institution is not using the predefined Book List functionality that is on the Course configuration, they may assign individual books directly to each individual course section by clicking the **Add Book** button below the Book(s) grid. This feature can also be used to assign additional ad hoc books to class sections that have book lists assigned.



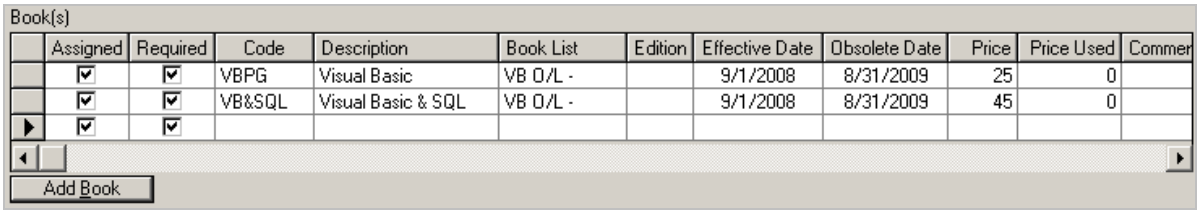
Important: Any modifications made will override information originally copied from the Book List on the course configuration. **Future changes made on the configured course book lists that could affect this course section could override changes that were manually entered in a class section if the user opts to update future class sections when they edit the courses book list configurations**. For example, if the Required flag on a book assigned to a class section is cleared on the class section form, this manual change would be overridden if the class section's course configuration (Lists > Academic Records > Courses > Books) was modified so that a change was made to the books effective or obsolete date in the book list that the book is associated with, and the user says "Yes" to updating future course sections with a date prior to the class section's start date.

Items in the **Book(s)** grid may have their **Assigned** and **Required** attributes modified by placing or removing check marks in the check boxes.

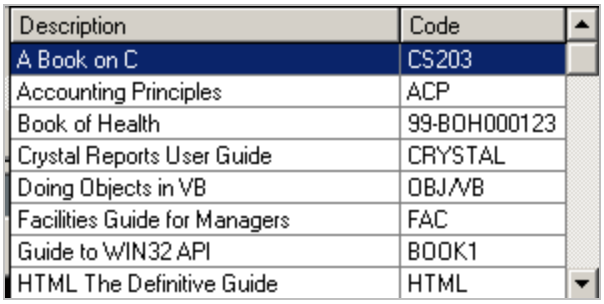
In addition a book may be added to the grid if required.

To add a book:

1. Click the **Add Book** button. A new row appears in the Book(s) grid. The **Assigned** and **Required** check boxes are automatically selected. If a book is to be recommended but not required, clear the **Required** check box.



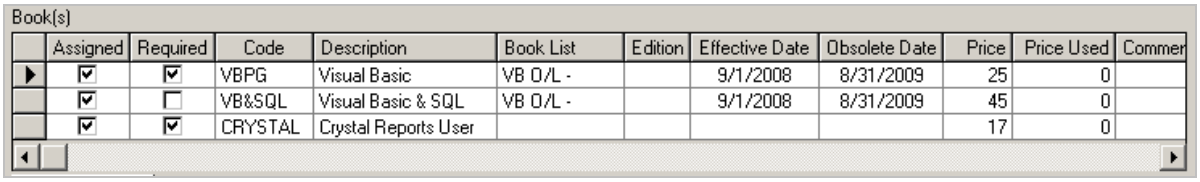
2. To select the Book for the new row, click the **Description** field. A list of books that are maintained in the Inventory table is displayed. This list is maintained by navigating to Lists > Bookstore.



3. Click on the desired title. The row is then populated and the new book information (i.e., Description, Edition, Effective and Obsolete Dates, Prices, Comments) is displayed in the row with the information from the Inventory table.

   Note: You cannot add a book that is already shown in the Book(s) grid. The same book cannot be shown twice.

   To remove a book that has been manually added, clear the Assigned check box on the book.



Book(s)

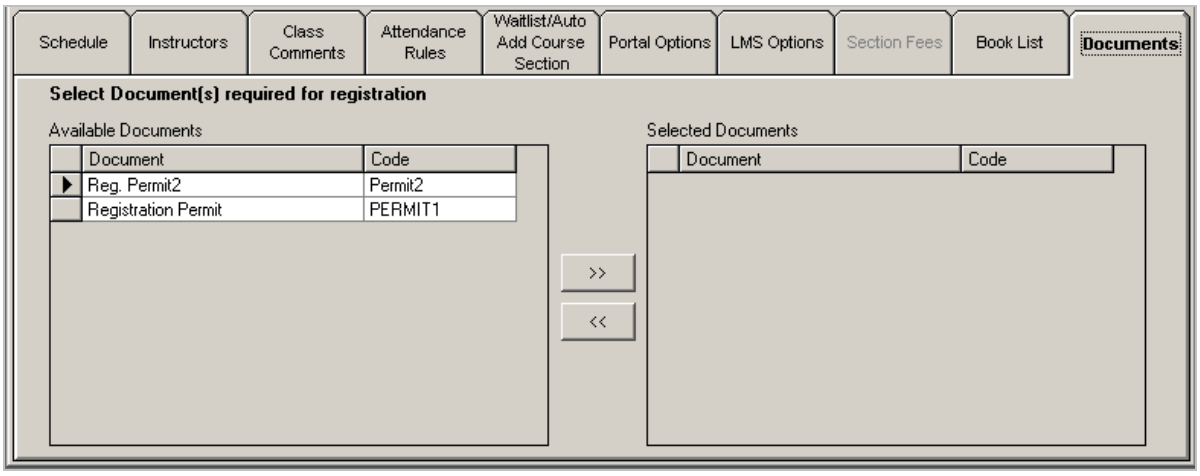
	Assigned	Required	Code	Description	Book List	Edition	Effective Date	Obsolete Date	Price	Price Used	Commer
▶	☑	☑	VBPG	Visual Basic	VB O/L -		9/1/2008	8/31/2009	25	0	
	☑	☐	VB&SQL	Visual Basic & SQL	VB O/L -		9/1/2008	8/31/2009	45	0	
	☑	☑	CRYSTAL	Crystal Reports User					17	0	

4. Click the **Save** button on the Class Schedule form before exiting.

Class Schedule - Documents Tab

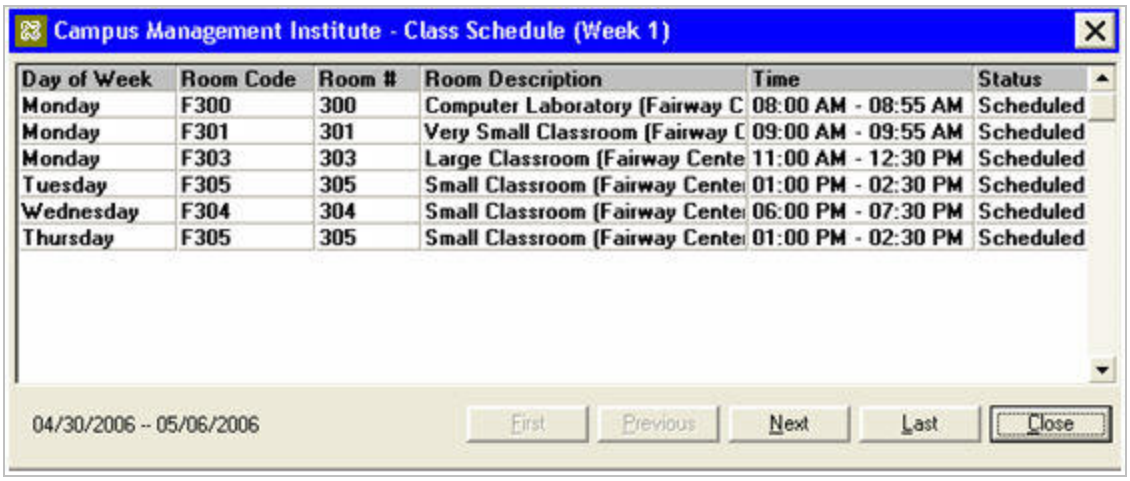
The Documents tab is displayed on the Class Scheduling form under Daily > Academic Records > Edit > Documents tab and provides an area to add and remove the documents required for a class section. Available Documents will be documents that are Active and are Registration Prerequisite documents and that are shared with the campus offering the section and all CRSG campuses. See Documents Code Setup.

Note: Document policy permissions will not apply to setting documents as a course prerequisite or course section level requirement.



View Weekly Schedule

You can click the **View Schedule** or **View Weekly Schedule** button from various locations in CampusNexus Student to access a weekly class schedule. The Class Schedule (Week n) form will appear containing the day of the week, room number, room code and description, the start and end time of the period and the status of the class meeting. See also Schedule Classes and Class Schedule for the locations of the buttons,



The buttons on the bottom of the page are for navigating between pages of schedules (**First**, **Previous**, **Next**, **Last**). The **First** button will return you to the first page, **Previous** button to the previous page, and so on.

Cross Listed Courses

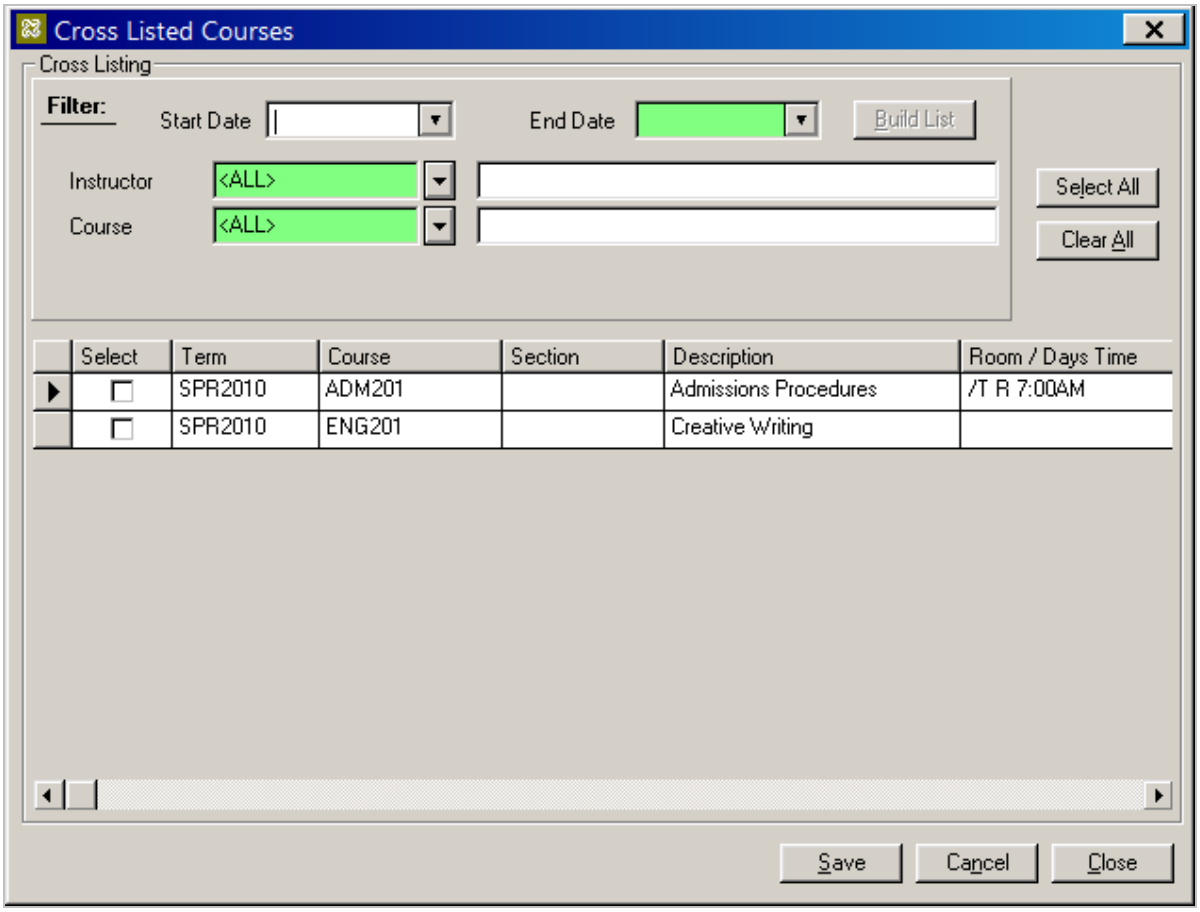
The Cross Listed Courses form displays a grid with all the course sections in the same Term as the current section that are in a campus with cross-listing enabled or are part of the same Course Registration Sharing Group.

Important notes about Cross Listed Courses:

- Maximum class registration is not enforced individually on Cross Listed Courses. When determining if a Cross Listed Course Section is full, the class maximum enforced is the largest value set on all the Cross Listed classes. CampusNexus Student compares this class max value to the total number of students registered in all Cross Listed classes. If the combined total number of students registered is greater than the largest class max setting, the Cross Listed Courses is considered full
- CampusNexus Student uses the same logic described above when determining if there are Waitlist seats available in Cross Listed Course Sections. The number of Waitlist reservations allowed will not exceed the max number of seats enforced for Cross Listed Courses

To cross list a course:

1. Navigate to **Daily > Academic Records > Schedule Classes**, select the course you want to cross list, and double-click it.
2. When the Class Schedule form is displayed, click **Cross List** to view the Cross Listed Courses form.



3. Select all the course sections that you want to cross list with the class you selected on the previous form. Do this

by enabling the check box in the **Select** column for the course sections you want to cross list.

4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Copy Class Schedule

Copy Class Schedule is available to perform two types of copying tasks:

- Copy all class sections in a source term to a destination term. CampusNexus Student will not insert duplicate class sections in the new term. If there is already an ACC101 Section 1 in the destination term, it will not copy another ACC101 Section 1 into it from the source term.
- Copy the data from one class section to a new class section within the same term.

Note: It is not possible to copy class schedules when using floating terms.

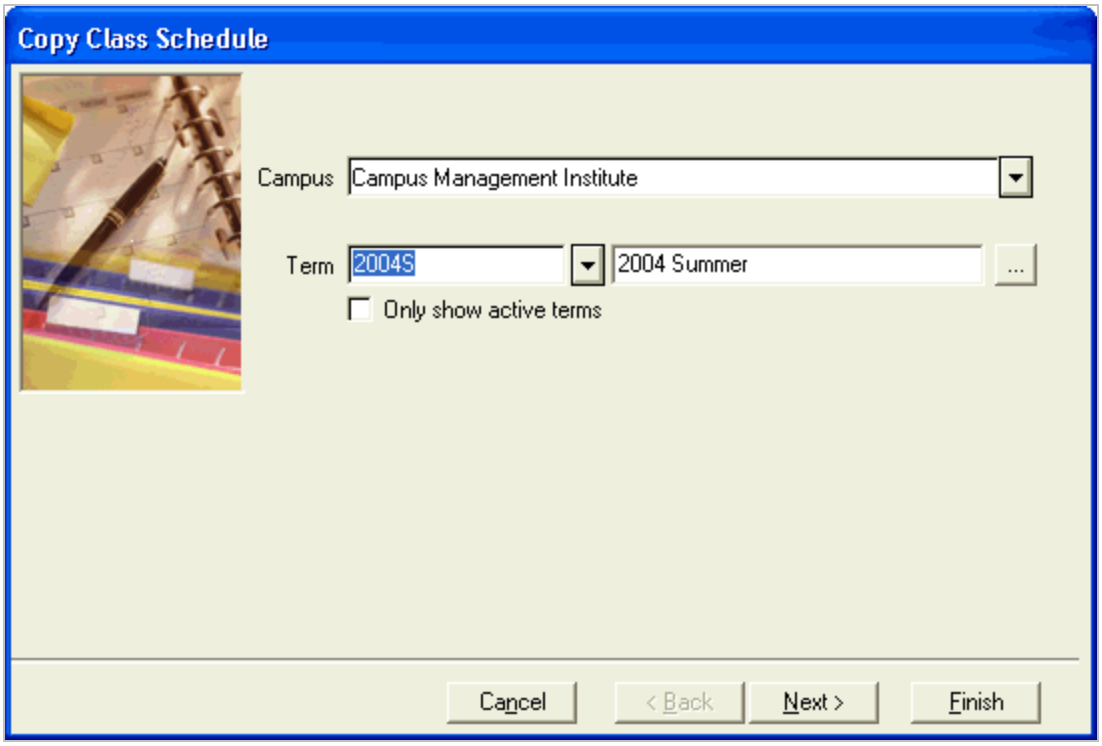
Copy Entire Term

This feature can save you a lot of data entry but once the copy process is completed, you will need to verify that dates, times, locations, and instructors are still valid for the new term.

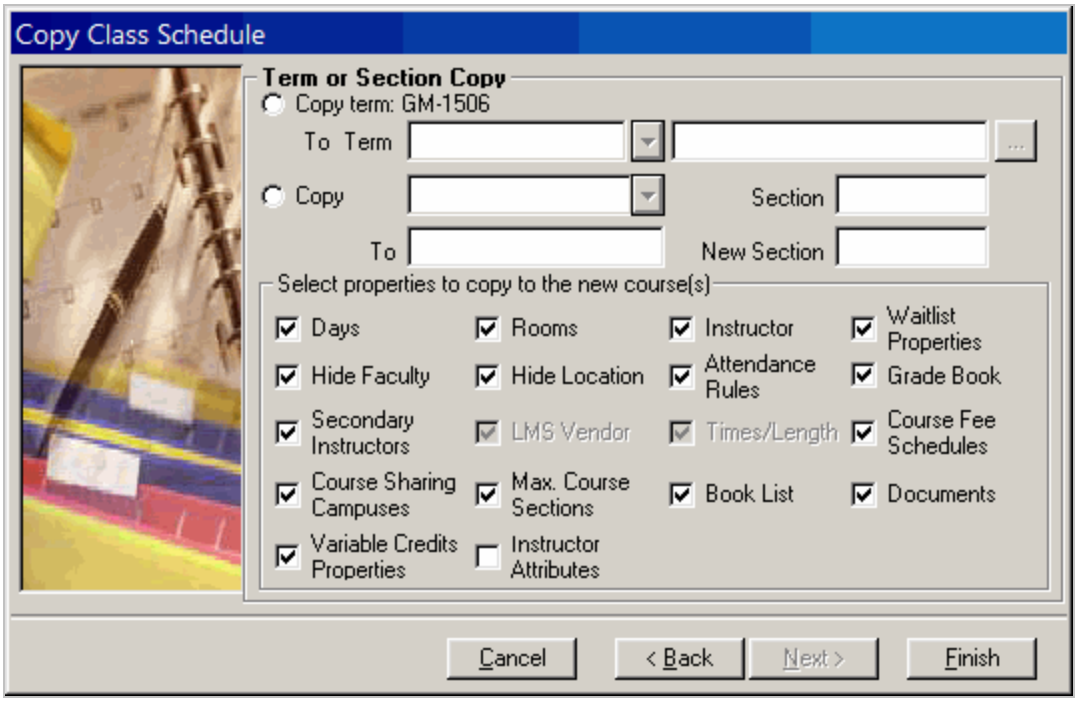
CampusNexus Student provides a wizard to help you through the process of copying one term schedule to another term.

To copy the class schedule from one term to another:

1. Navigate to **Daily** > **Academic Records** > **Copy Class Schedule**. The wizard is displayed.



2. On the first page of the wizard, select the **Campus** and the source **Term**.
3. Click **Next** to proceed. The second page of the wizard is displayed.



4. Click **Copy Term**.
5. Select the **To Term**.
6. Select the properties to be copied to the new courses. You can choose which properties are copied to the new courses and which are not by enabling or disabling the check boxes next to each property.
7. Click**Finish**. CampusNexus Student copies all class sections to the new term. After the copy procedure is complete, the program closes the wizard.

   Important Note:

   If the new term begin and end dates overlap another term, conflicts may occur in room and instructor scheduling. Error messages are displayed if this occurs. Conflicting class sections will not be copied to the new term.
8. Carefully review the beginning and ending dates of the class sections in the destination term. The program inserts the term beginning and ending dates in the new class sections. For example, the Winter 2000 term begins on Monday, January 7th, and ends on Wednesday, April 23rd. You might want to adjust the beginning and ending dates of a class that begins on Tuesday, January 8th, and ends on Thursday, April 24th.

   Important Note:

   When copying all course sections from one term to another, if the Enforce Last Day to Withdraw feature is part of the configuration for the existing course section's campus (**Setup > Campus Locations > Edit/Add > Academic Records (tab) > General (tab)**), the LDW date on all new course sections will be populated with the default LDW date determined in the campus configuration. Also review the locations, time of day, and instructors in the new class sections.

Copy Class Section

This feature can save you a lot of data entry, but once the copy process is completed, you will need to verify that dates, times, locations, and instructors are still valid for the new term.

Note: Multiple course sections can be copied from one term to another, as well as a single course section to another course section within the same term. Regardless of how class schedules are being copied, CampusNexus Student checks if the course section's campus has its '**Add/Drop Flag**' configured to '**S - Course Section Enforced**'. If so, the add/drop date for the new course section(s) will also get copied with the same '**Add/Drop Flag**' configuration and will get populated with a calculated date. In addition, the '**Manual Override**' check box (**Daily** > **Academic Records** > **Schedule Classes** > **New/Edit** button) will be cleared for the new course section(s) because the add/drop date was calculated.

CampusNexus Student provides a wizard to help you through the process of copying one class section to another term.

To copy data from one class section to another:

1. Navigate to **Daily** > **Academic Records** > **Copy Class Schedule**. The wizard is displayed.
2. On the first page of the wizard, select the **Campus** and the source **Term**. If you elected to copy a class section by highlighting a class section on the Class Scheduling form and clicked the **Copy Schedule** button, the Campus, Term, and Course information is entered by the chosen default values and the wizard will skip the first page and display the second page.
3. Click **Next**. The second page of the wizard will appear.
4. Click **Copy Section**.
5. Select the section to be copied.
6. Enter the **To Section** number or code.
7. Select the properties to be copied to the new courses.
8. Click **Finish**. CampusNexus Student copies the data from the "from" section to the new section. After the copy procedure is complete, the program closes the wizard.
9. Carefully review the beginning and ending dates of the destination class section. The program inserts the same beginning and ending dates in the new class section.

   Important Notes:

   When copying one course section to another within the same term, if the Enforce Last Day to Withdraw feature is part of the configuration for the existing course section's campus (**Setup > Campus Locations > Edit/Add > Academic Records (tab) > General (tab)**), the new course section will be populated with the LDW date of the existing course section.

   When copying one course section to another and the existing course section has Last Day to Withdraw Date Manual Override option enabled (**Daily > Academic Records > Schedule Classes > New/Edit**), the new course section's LDW date will not recalculate a default date.

   When a term is copied to a new term and LDW is configured on the campus, new LDW dates that correspond to the new term’s start and end dates will be populated in the LDW date field in the courses in the new term.
10. Also review the location, time of day, and instructor in the new class section.

Each of the course properties listed here can be copied (or not) independently of the other properties.

Course Property Details

Property	Description
Rooms	Select this check box to copy the Room information to the new course.
Wait List Properties	Select this check box to copy the Wait List Properties settings to the new course.

Property	Description
Grade Book	Select this check box to copy the lesson information to the new course.
Times/Length	Select this check box to copy the times or length information to the new course.
Hide Faculty	Select this check box to copy the Hide Faculty option setting to the new course.
Days	Select this check box to copy the date information (start date, end date, meeting dates) to the new course.
Hide Location	Select this check box to copy the Hide Location option setting to the new course.
Course Fee Schedules	Select this check box to copy the Course Fee Schedules to the new course.
Instructor	Select this check box to copy the Instructor information to the new course.
Secondary Instructors	Select this check box to copy the Secondary Instructor information to the new course.
Attendance Rules	Select this check box to copy the Attendance Rules settings to the new course.
LMS Vendor	Select this check box to copy the LMS Vendor information to the new course.This check box is displayed only if one or more LMS Vendors are configured for the Campus and the original course has an LMS Vendor selected.
Book List	If selected, this will copy the book list(s) and all assigned books on the existing course section and assign the exact book list(s) and books to the new course section. If the check box is cleared, only the default book list(s) and corresponding books contained in the course configuration will be assigned to the newly created course section.
Course Sharing Campuses	Select this check box to copy the Campuses that are shared to the new course.
Max Course Sections	Select this check box to copy the Max Course Sections to the new course.
Documents	Select this check box to copy the required documents to the new course.
Variable Credits Properties	Select this check box to copy the Variable Credits Properties such as Allow Override, Credits, Min Credits, Max Credits fields from the class section to the new class section. If this check box is not selected the properties contained in the Course Code Setup form will be copied to the new class section.
Instructor Attributes	If this check box is selected, instructor attributes will be copied to the new class schedule. If the Instructor and Secondary Instructors options are not selected, the Instructor Attributes check box will be disabled. By default, the Instructor Attributes option will be cleared.

Edit Class Scheduling and Attendance

Class schedules often change after the class has started. CampusNexus Student enables you to:

- Change the class schedule without losing any attendance history that may have already been posted to students in the class.
- Modify the start and end dates of the class. The modification to the class updates any students that are currently registered for the class.
- Define an "inconsistent schedule" to define each day that the class meets and the meeting time on that date.

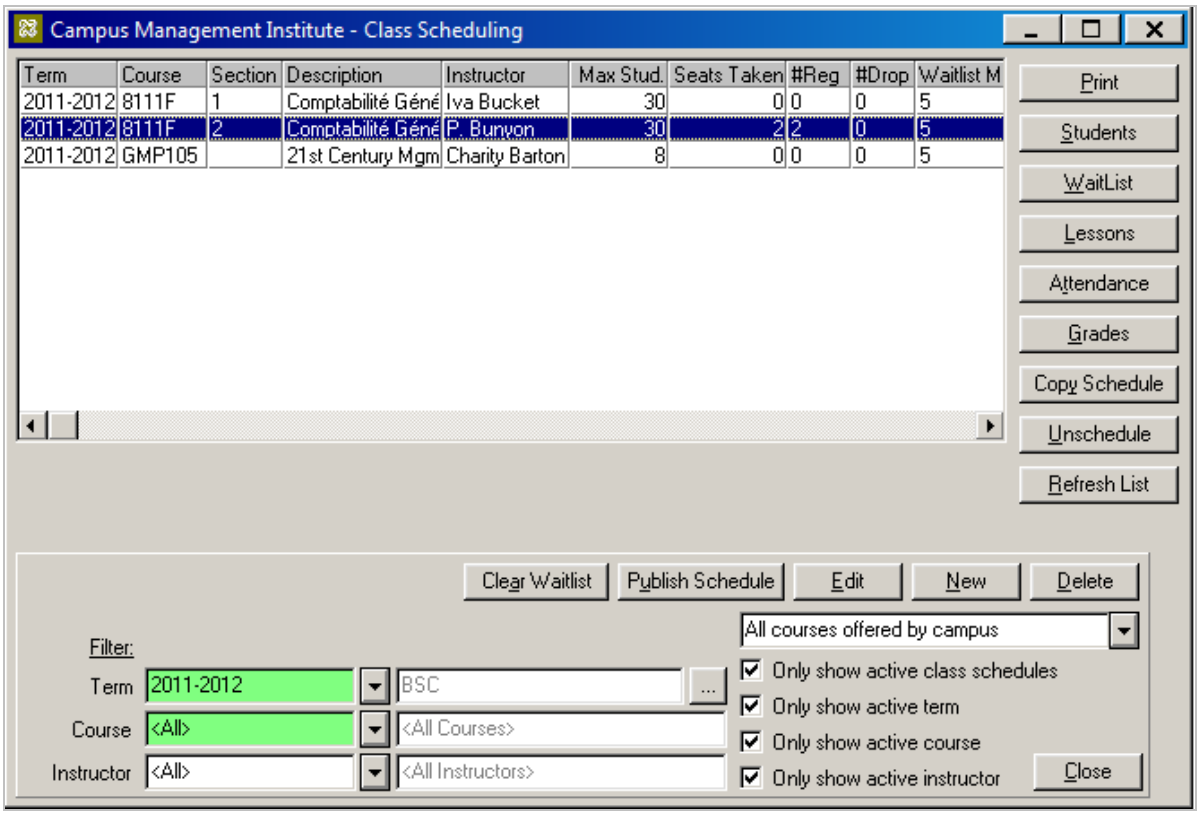
Each class date can be modified. Each class-meeting day for a scheduled class can have a different start time, class length, instructor, or room. When a class schedule is changed, any attendance that has already been recorded is retained.

When a class schedule is saved, the Class Attendance table is updated by adding a record for each meeting from the class start date to the class end date.

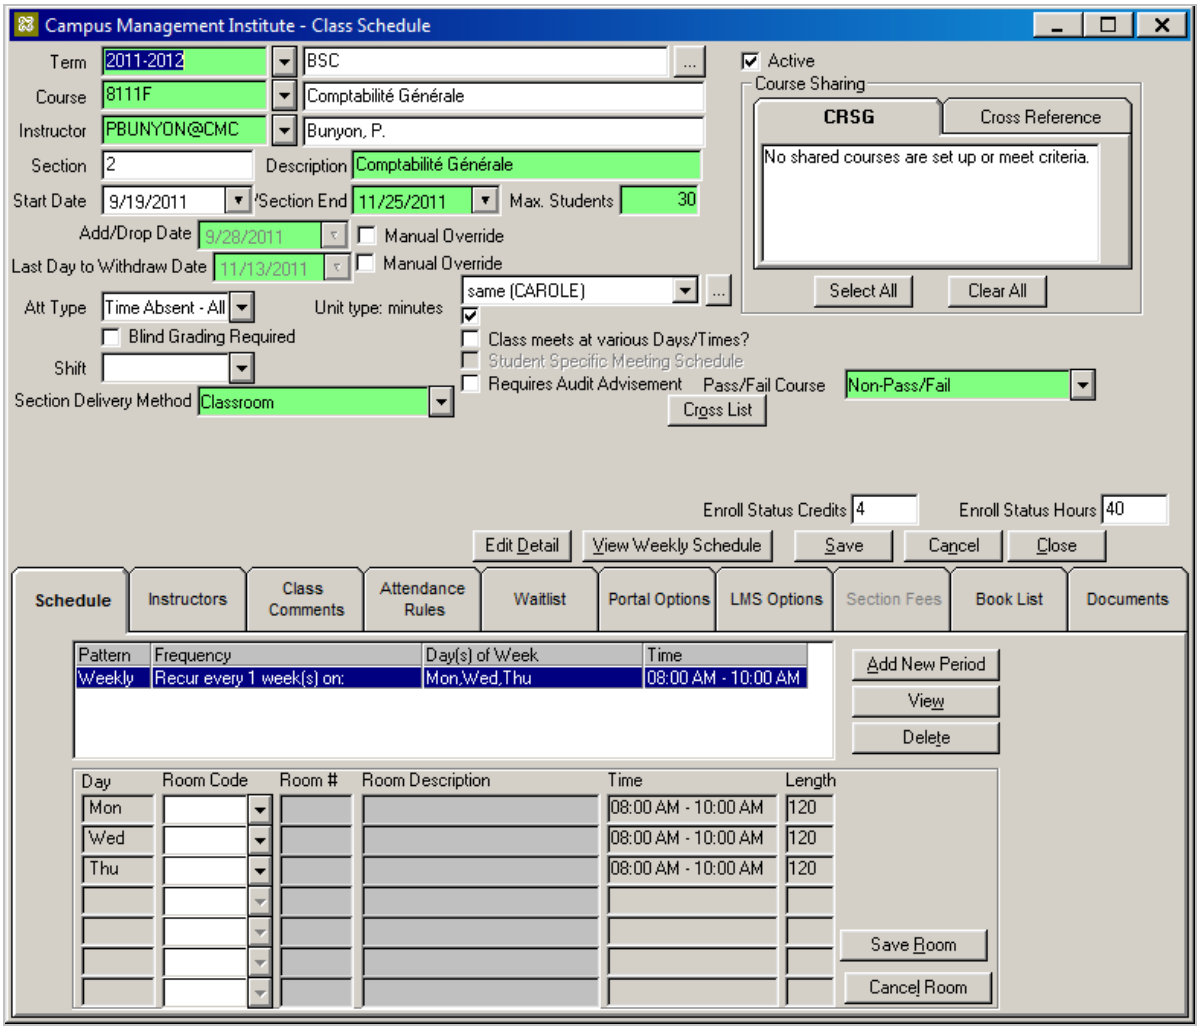
Calendar views are available on the Class Scheduling and Attendance recording forms.

To modify the detail schedule:

1. Navigate to **Daily > Academic Records > Schedule Classes**. The Class Scheduling form is displayed.

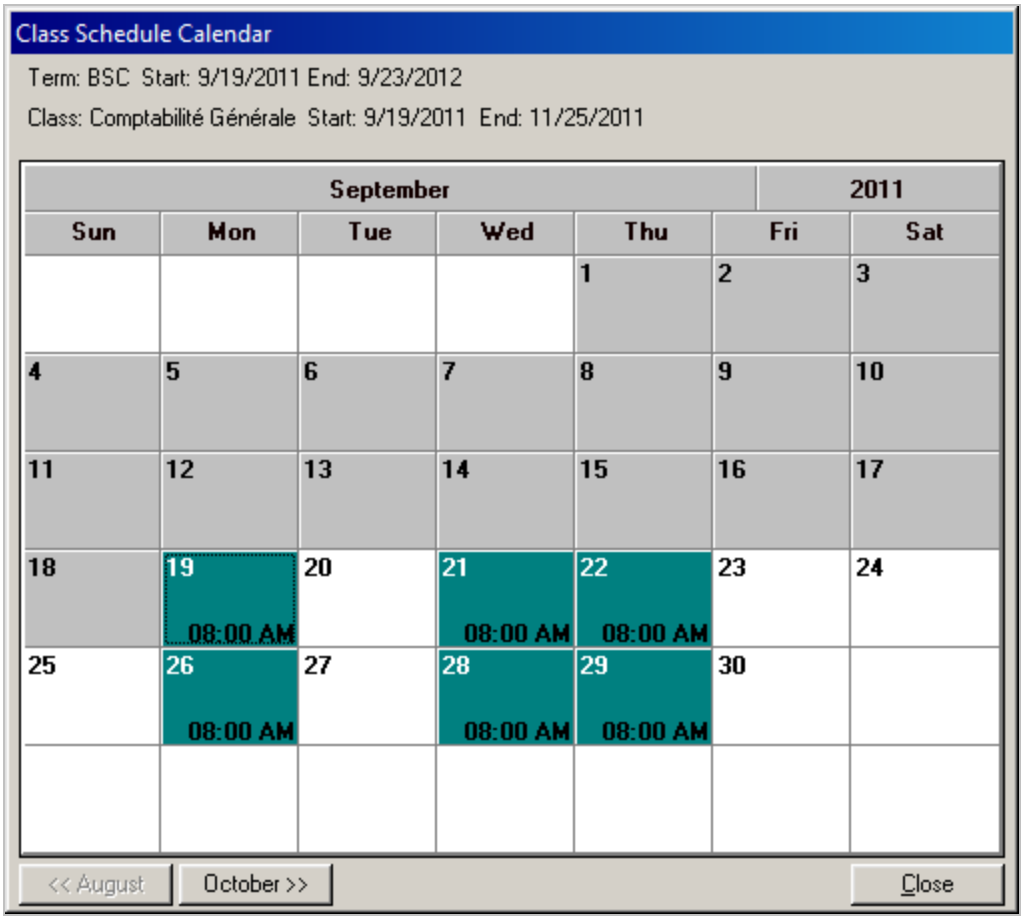


2. Select a **Term** and **Course** and click **Edit**. The Class Schedule form is displayed.

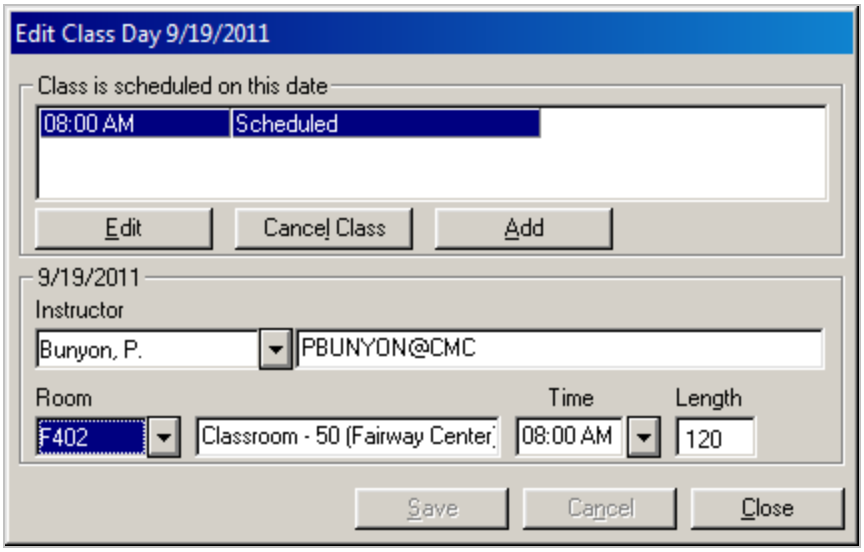


3. Click **Edit Detail**. The Class Schedule Calendar form is displayed. The calendar days are color-coded as follows:

   - GRAY - Date is outside of the Term Start/End Dates
   - GREEN - Attendance Not Recorded
   - YELLOW - Attendance has been recorded
   - BLUE - Holiday
   - WHITE - Class does not meet or was canceled



4. Double-click a date (that is not gray) to edit the schedule for the selected date. The Edit Class Day form is displayed.



5. Click the Edit, Cancel Class, or Add button and modify the schedule as needed.

   Note: You cannot add any class meeting times on holidays.

6. Click **Save**.

Any schedule changes will update the Class Attendance table as follows:

- Dates after the class Last Date Attended (LDA) (if attendance has previously been recorded), or all dates (if attendance has not been recorded) where the status is not "P", will be adjusted to match the new class schedule meeting times.
- If attendance has already been posted, a message indicates that the students for whom the attendance was posted will be changed to match the new date.
- If the class length is changed, CampusNexus Student adjusts the time attended and time absent to match the new class length.
- If a posted attendance date is canceled, a message indicates that the posted attendance will be deleted. If you continue, all attendance records for the selected attendance ID will be deleted, and each student's total attendance values and Last Date Attended (LDA) will be recalculated.

When you modify the scheduled start and end dates, CampusNexus Student updates any registered students where the student registration start and end dates match the old start and end dates.

- CampusNexus Student deletes any attendance that was recorded for dates no longer in the schedule.
- CampusNexus Student adds new Class Attendance records for meeting times that are added to the schedule.

The roster procedures use the Class Attendance table. This table contains all class meeting dates and times to print on the roster. The roster print form prompts you for a start date and end date to print. If you select a date range that has more than 10 meeting times, a message is printed on the attendance roster indicating that the class meets more than 10 times in the selected date range. (Printed rosters can only print up to 10 class-meeting times).

The routines for printing SCANTRON attendance rosters use the Class Attendance table when printing the rosters.

When attendance is posted, CampusNexus Student sets the Class Attendance Status to "P" and moves the Class Attendance ID to each Attendance record that is added or updated.

If a student is registered into a class with no start or end dates, CampusNexus Studentwrites Class Attendance records for each date for which the student is registered. This only occurs for classes that have no start or end date AND that have scheduled meeting times set up.

When a class section is copied, CampusNexus Student populates the Class Attendance table with the new dates for the new class being added.

Attendance recording no longer requires you to record the Next Day of Attendance. The Calendar button on the attendance form displays the calendar. Double-click on any of the "colored" dates (except gray) to view the list and highlight the selected day of the month.

The Unschedule button on the Class Schedule form updates the Class Attendance table and sets the status to "C - Canceled". If the attendance was previously recorded, the attendance is recalculated and the attendance totals and LDA for each student is updated.

Floating Term Class Scheduling

Floating term class scheduling means that one roster will be produced for students who are scheduled for the same class but attending under different terms. This accommodates schools that may have starts every 5 weeks but the semester length is 15 weeks.

This affects several functions in CampusNexus Student. The forms discussed in this topic show visible changes when floating terms are used. Please refer to the linked topics for specific instructions on how each form is used.

Setup > Campus Locations > Academic Records

A new field was added to the setup form that will specify whether the campus will use floating term scheduling or not. The new field is displayed directly underneath the "Re-take Methodology" field. The caption is "Use Floating Term Scheduling?" The options are Yes and No. No is the default. The value specified in this field is stored in SyCampus.FloatingTerm.

If a campus elects to use floating term scheduling, they will be allowed to attach a single class to multiple terms. If the campus is not using floating term scheduling, a scheduled class will be attached to only one term.

Daily > Academic Records > Schedule Classes

If the campus is set up to do floating term scheduling (SyCampus.FloatingTerm = 1), a Start Date column will replace the Term column.

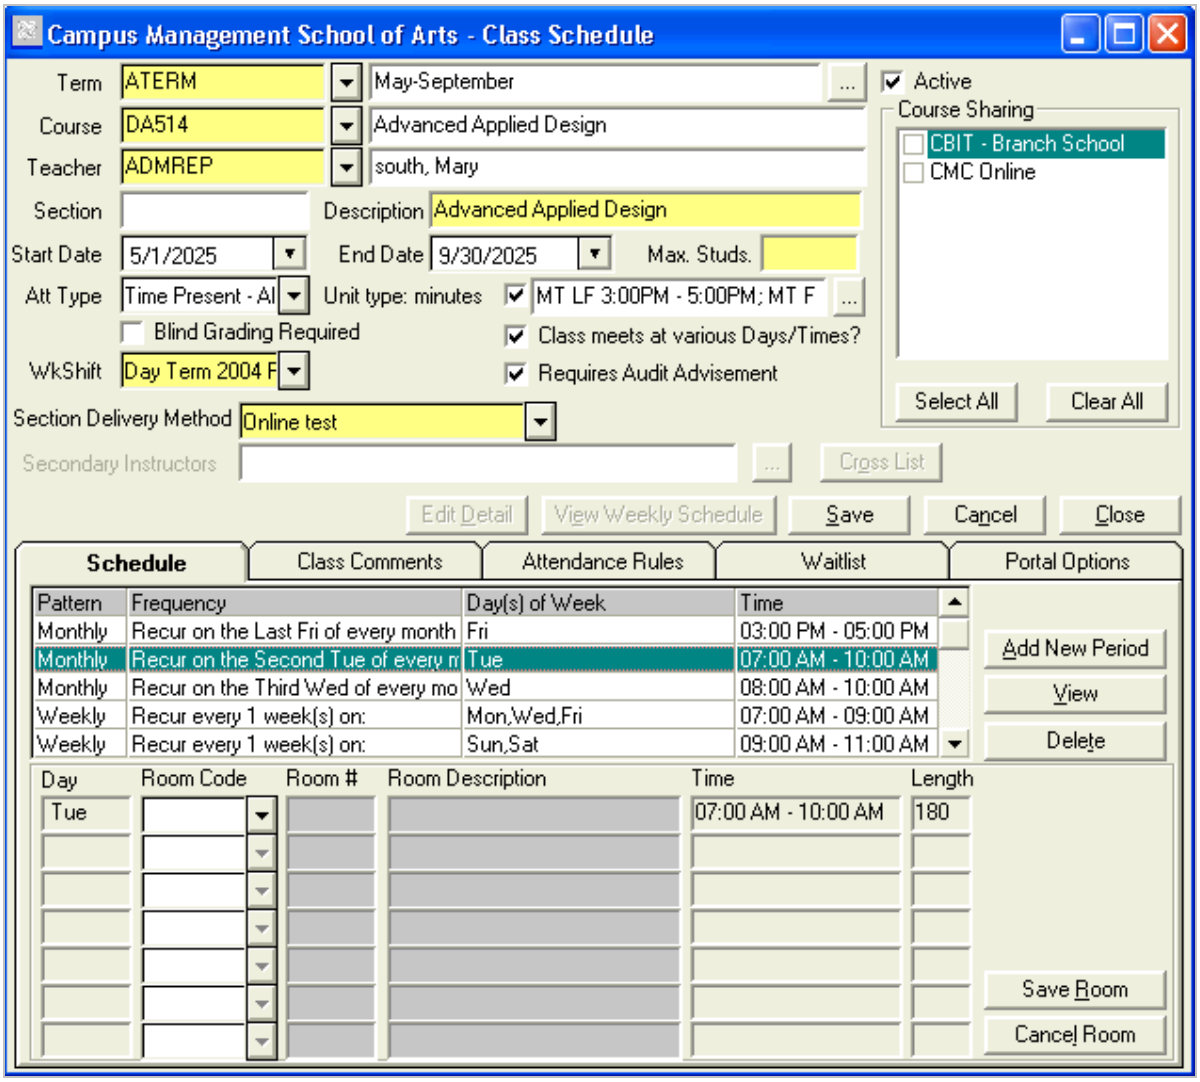
The start date for each course listed is pulled from AdClassSched.StartDate. If the campus is not set up to do floating term scheduling, the layout of the grid remains unchanged.

For campuses where the floating term scheduling flag is set to Yes, the filter on Term on form (frmAdClassSched) is replaced with a Start Date range filter. If the campus is not set up to do floating term scheduling, the logic of the filter section will remain unchanged.

Daily > Academic Records > Schedule Classes > New
Daily > Academic Records > Schedule Classes > Edit

If the campus is set up to do floating term scheduling, the ability to attach multiple terms to a scheduled class is added in the term class schedule form (frmAdClassSched).

A modification occurs in the Term selection. Previously, only one term could be selected. If the campus is doing floating term scheduling, the user is allowed to select multiple terms. If your school is set up for floating terms, you can click the button to select more than one term from the drop-down list. This button will appear on the form only if your school uses floating terms.



The logic for building the term drop-down list is the same. However, the following items should be noted:

1. Previously, a validation forced the class section start date and the class section end date to be within the term start and end dates. Since CampusNexus Student now allows multiple terms to be attached to the class section, this validation occurs for each term. The class section start and end dates must be within the date range of ALL terms attached to the class.
2. When updating, a row is added to AdClassSchedterm for each term attached to the class. This logic will be executed regardless of whether the campus is doing floating term scheduling. If the campus is not doing floating term scheduling, AdClassSched and AdClassSchedTerm will have a one-to-one relationship.
3. When editing a class section, and the terms attached to the class are edited, the program will not allow a term to be unselected if any students are scheduled for the class in the specified term.
4. If the term or terms attached to the class section are edited, the program deletes any row or rows from AdClassSchedTerm for terms that are no longer attached to the class section.

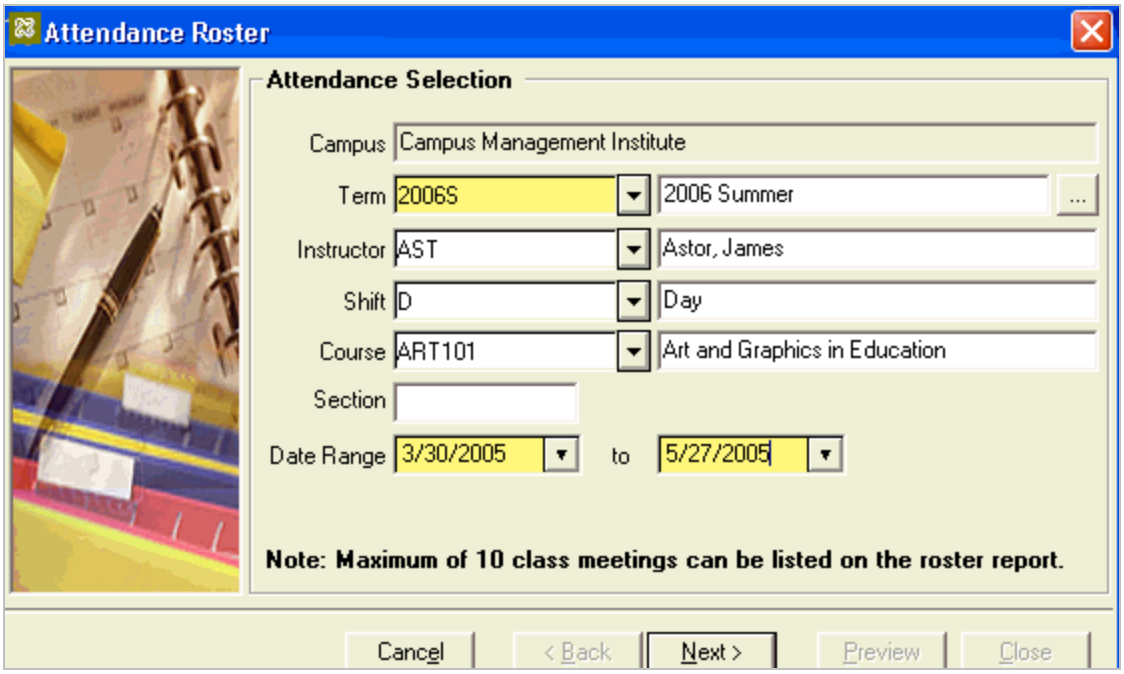
Daily > Academic Records > Schedule Classes > Print

The Schedule Classes form has a Print button on it that will generate a report of class sections scheduled based on the specified criteria. The queries on this report have been updated to correctly handle the new AdClassSchedTerm table. In addition, if the

campus is set up to do floating term scheduling, the filter criteria have been modified to select on start date range instead of a term.

Daily > Academic Records > Attendance > Rosters

When printing rosters for a campus where the floating term flag is set to Yes, the filter on Term is replaced by a filter on class start date.



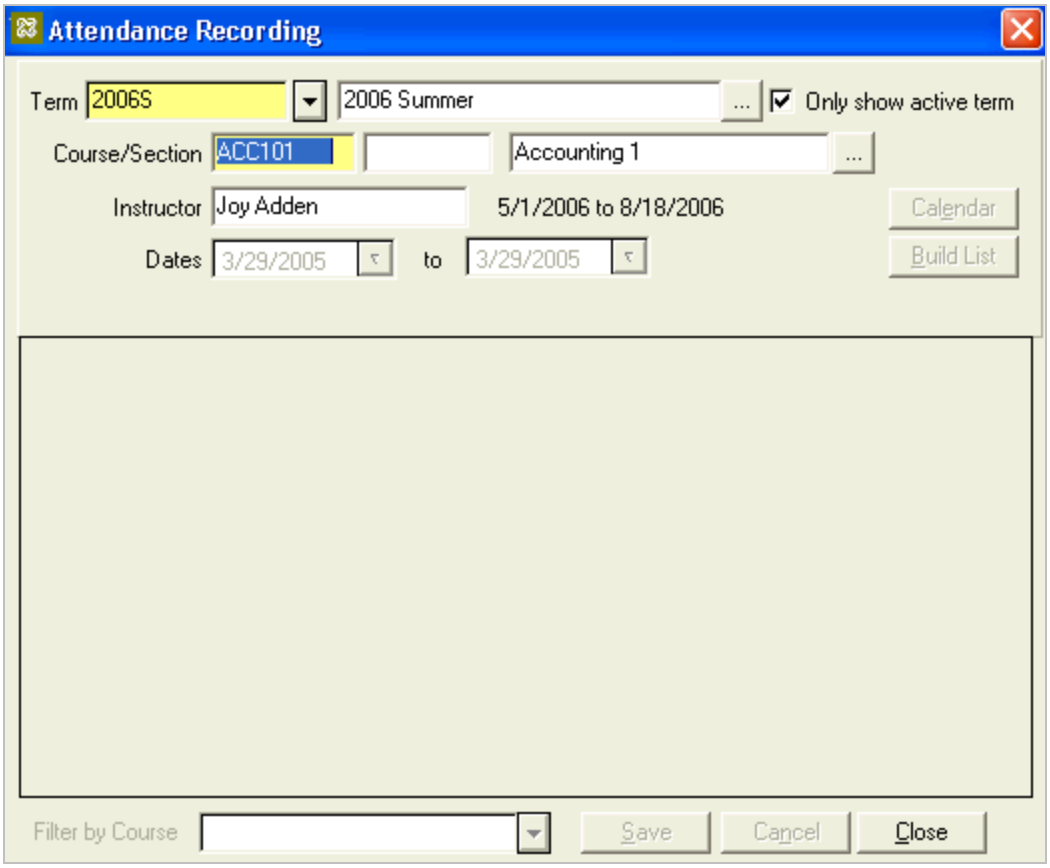
Regardless of whether the campus is using floating term scheduling, the query for gathering the rosters has been modified to use the AdClassSchedTerm table to determine the term for each class section. In addition, the query will filter on the start dates of the class sections if the Start Date range criteria apply. The start date of each class section is stored in AdClassSched.StartDate.

Daily > Academic Records > Attendance > Record Attendance

The filter on Term is replaced by a filter on class start date when recording attendance for a Campus that is set up to do floating term scheduling.

Previously, the user specified a term, which then built the class section pick list. From this list, the user could choose the class section for which to post attendance. If a campus is not set up to do floating term scheduling, the layout of this form remains unchanged. However, the query to build the class section pick list has been modified to use the AdClassSchedTerm table.

If a campus is set up to do floating term scheduling, the criteria portion of the form will appear as shown below.



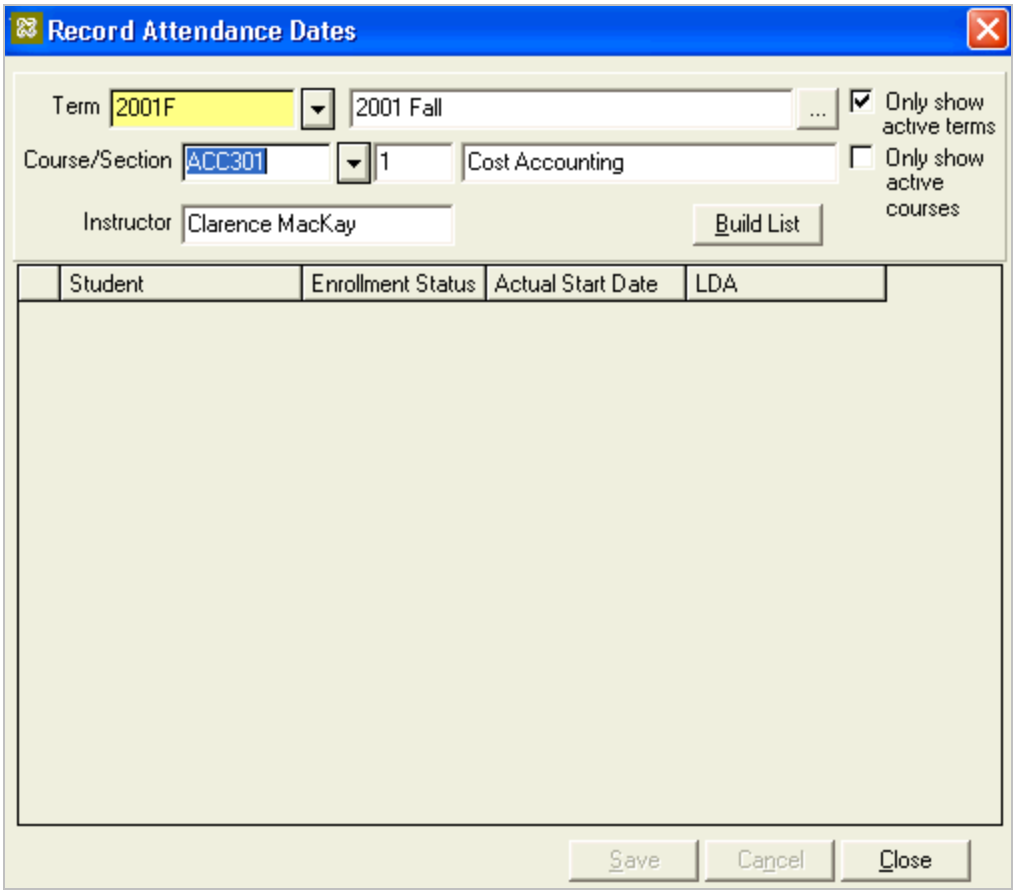
When the user specifies the start date range, all class sections will be added to the pick list where AdClassSched.SyCampusID matches the campus currently logged into AND AdClassSched.StartDate is within the specified date range.

Daily > Academic Records > Attendance > Record Attendance Dates

When recording attendance dates for a campus where the floating term flag is set to Yes, the filter on Term has been replaced by a filter on class start date.

Previously, the user specified a term, with which the program built the class section pick list. From this list, the user could choose the class section for which to record attendance dates. If a campus is not set up to do floating term scheduling, the layout of this form will remain unchanged. However, the query to build the class section pick list has been modified to use the AdClassSchedTerm table.

If a campus is set up to do floating term scheduling, the criteria portion of the form will appear as shown here.



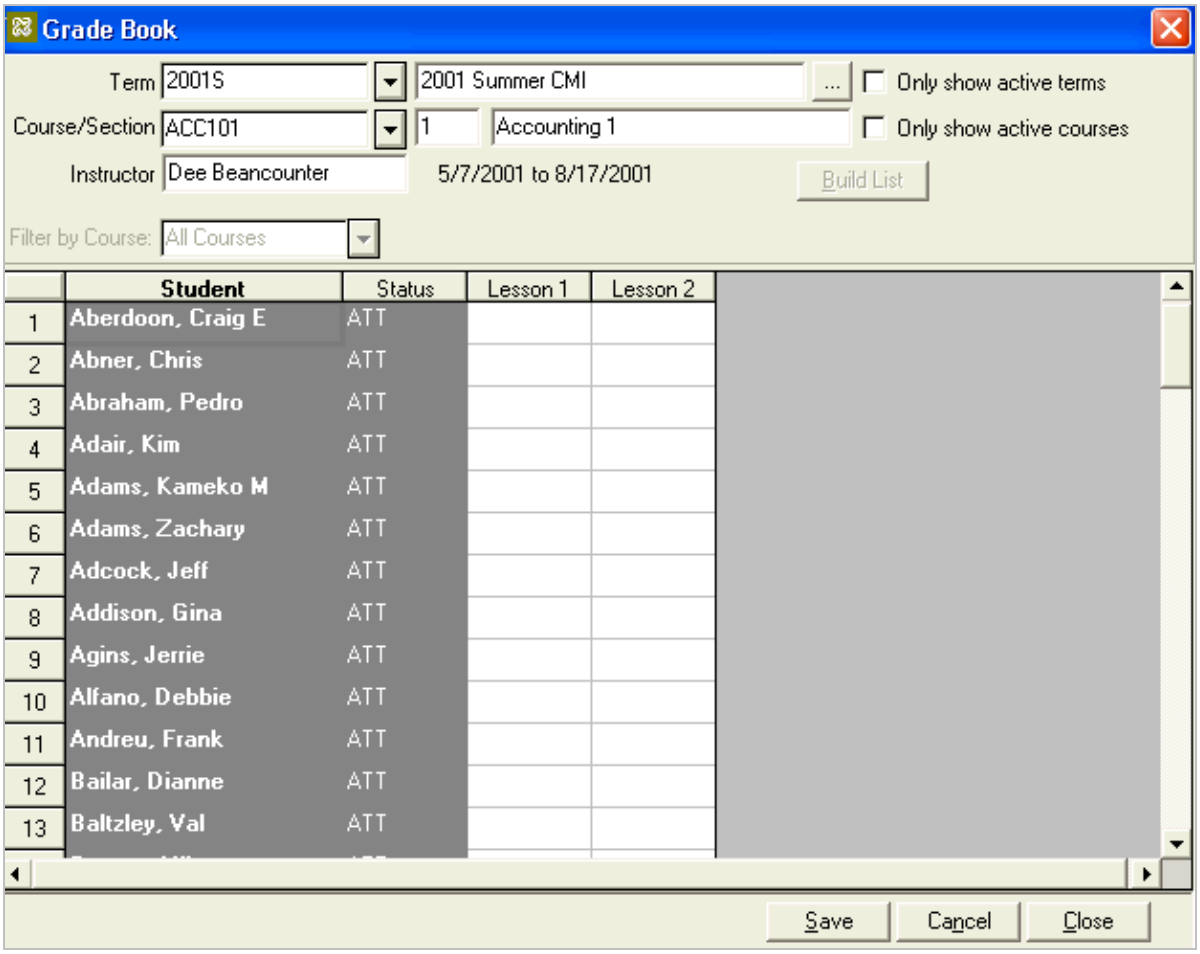
When the user specifies the start date range, all class sections will be added to the pick list where AdClassSched.SyCampusID matches the campus currently logged into AND AdClassSched.StartDate is within the specified date range.

Daily > Academic Records > Grade Book

For a campus where the floating term flag is set to Yes, the filter on Term will be replaced by a filter on class start date when entering lesson scores in the Grade Book.

Currently, the user specifies a term, which is used to build the class section pick list. The class section for which to enter lesson scores is chosen from this list. If a campus is not set up to do floating term scheduling, then the layout of this form will remain unchanged. However, the query to build the class section pick list has been modified to use the AdClassSchedTerm table.

If a campus is set up to do floating term scheduling, the criteria portion of the form will appear as shown here.



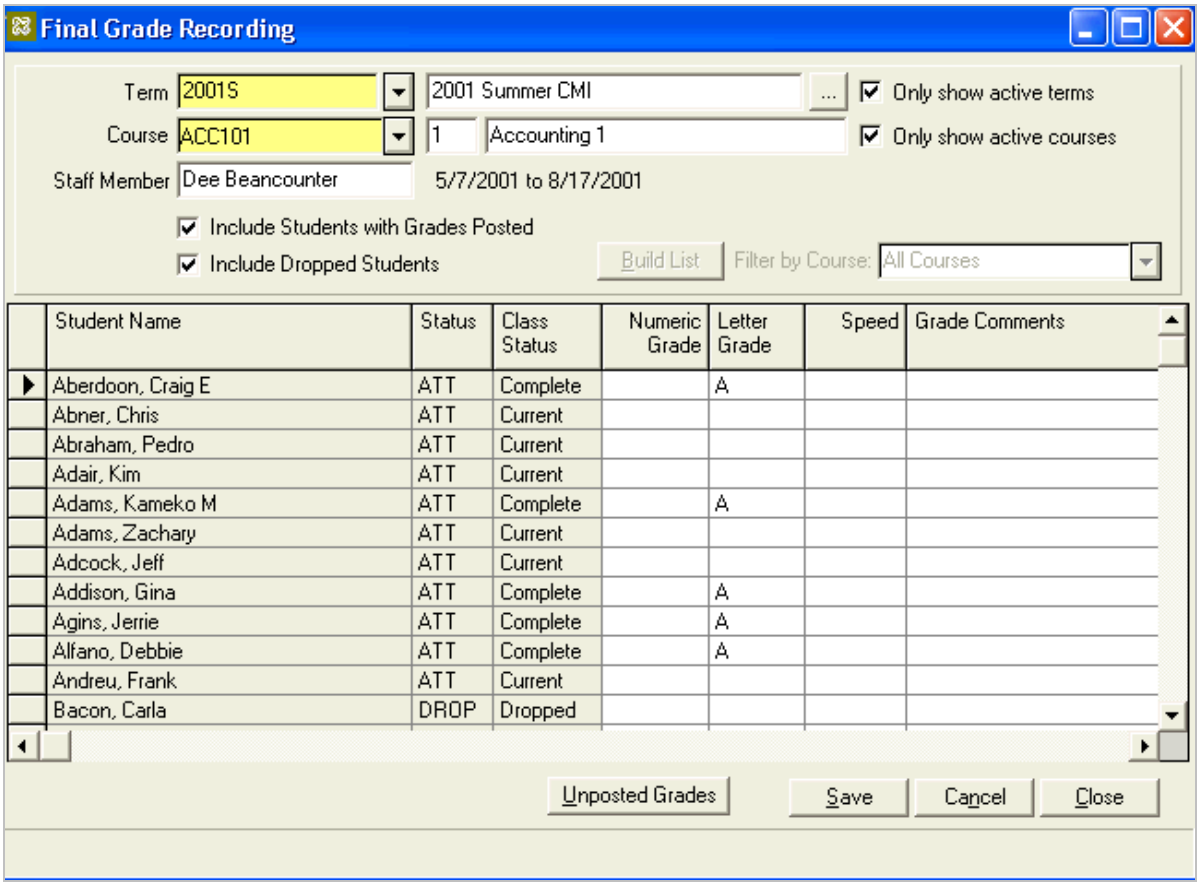
When the user specifies the start date range, all class sections will be added to the pick list where AdClassSched.SyCampusID matches the campus currently logged into AND AdClassSched.StartDate is within the specified date range.

Daily > Academic Records > Final Grades

For a campus where the floating term flag is set to Yes, the filter on Term will be replaced by a filter on class start date when recording final grades.

Previously, the user specified a term, which was used to build the class section pick list. The class section for which to post final grades was chosen from this list. If a campus is not set up to do floating term scheduling, then the layout of this form will remain unchanged. However, the query to build the class section pick list has been modified to use the AdClassSchedTerm table.

If a campus is set up to do floating term scheduling, the criteria portion of the form will appear as shown here.



When the user specifies the start date range, all class sections will be added to the pick list where AdClassSched.SyCampusID matches the campus currently logged into AND AdClassSched.StartDate is within the specified date range.

Daily > Academic Records > Final Grades > Unposted Grades

If the current campus has the floating term flag set to Yes, the logic for listing courses when the Unposted Grades button is clicked on the Final Grades form (frmAdFinalGrades) will be modified to use the class start date filter. This option produces a report showing class sections that have not yet had final grades posted. If the campus is set up to do floating term scheduling, the query for this report has been modified to filter against the start date criteria instead of a term.

Daily > Academic Records > Scantron > Print Scantron Rosters

For a campus where the floating term flag is set to Yes, the filter on Term will be replaced by a filter on class start date when printing rosters for SCANTRON®.

If a campus is set up to do floating term scheduling, a start date range will replace the term criterion.

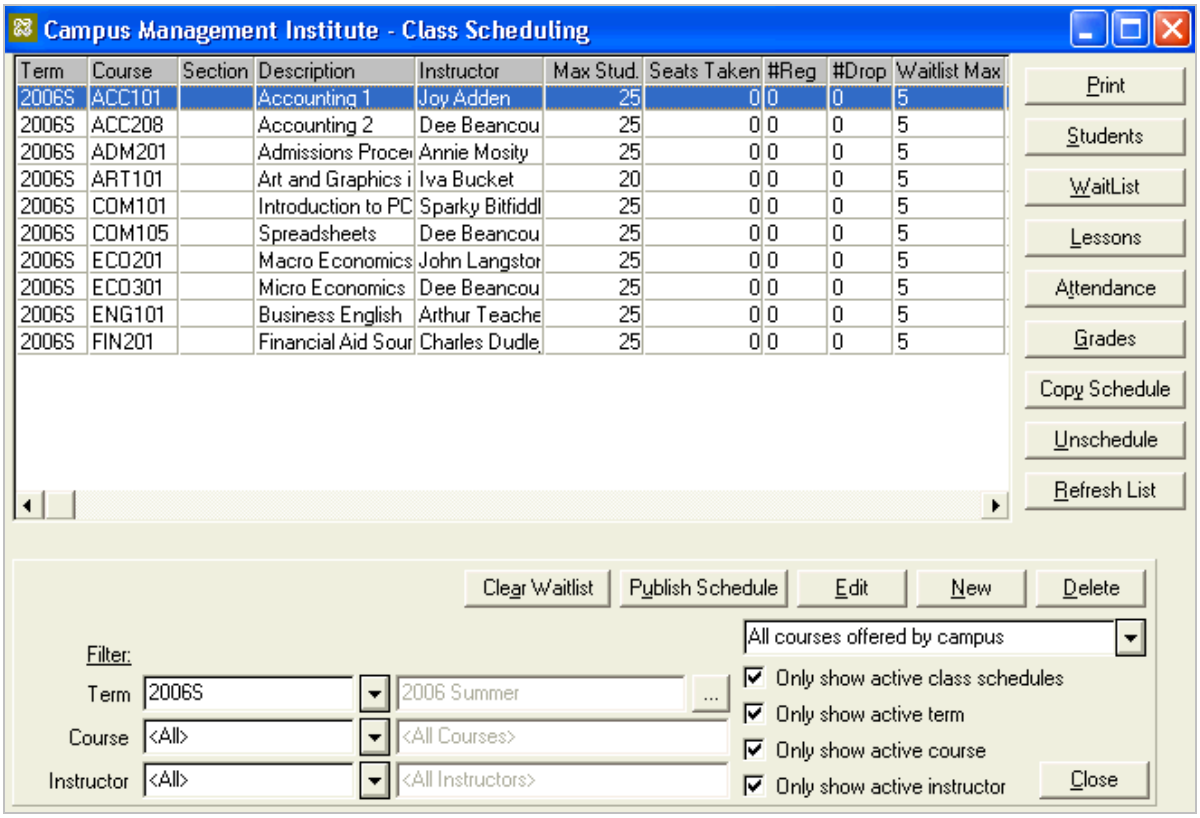
Students in Scheduled Class

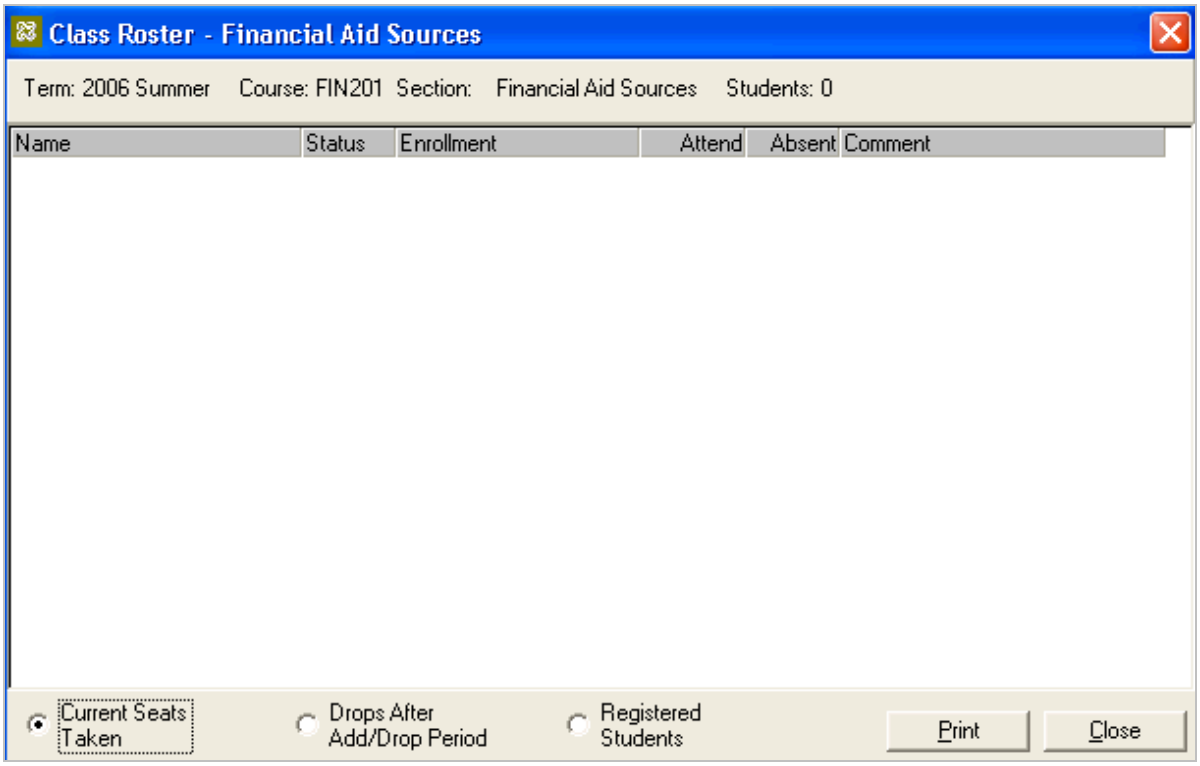
When you click the Students button on the Class Scheduling form, CampusNexus Student displays a form listing all students registered for the selected class section. The Print button on the form displays the Class Roster by Course report. CampusNexus Student displays students that are scheduled, current, LOA, dropped, or complete.

To display the roster for a class section:

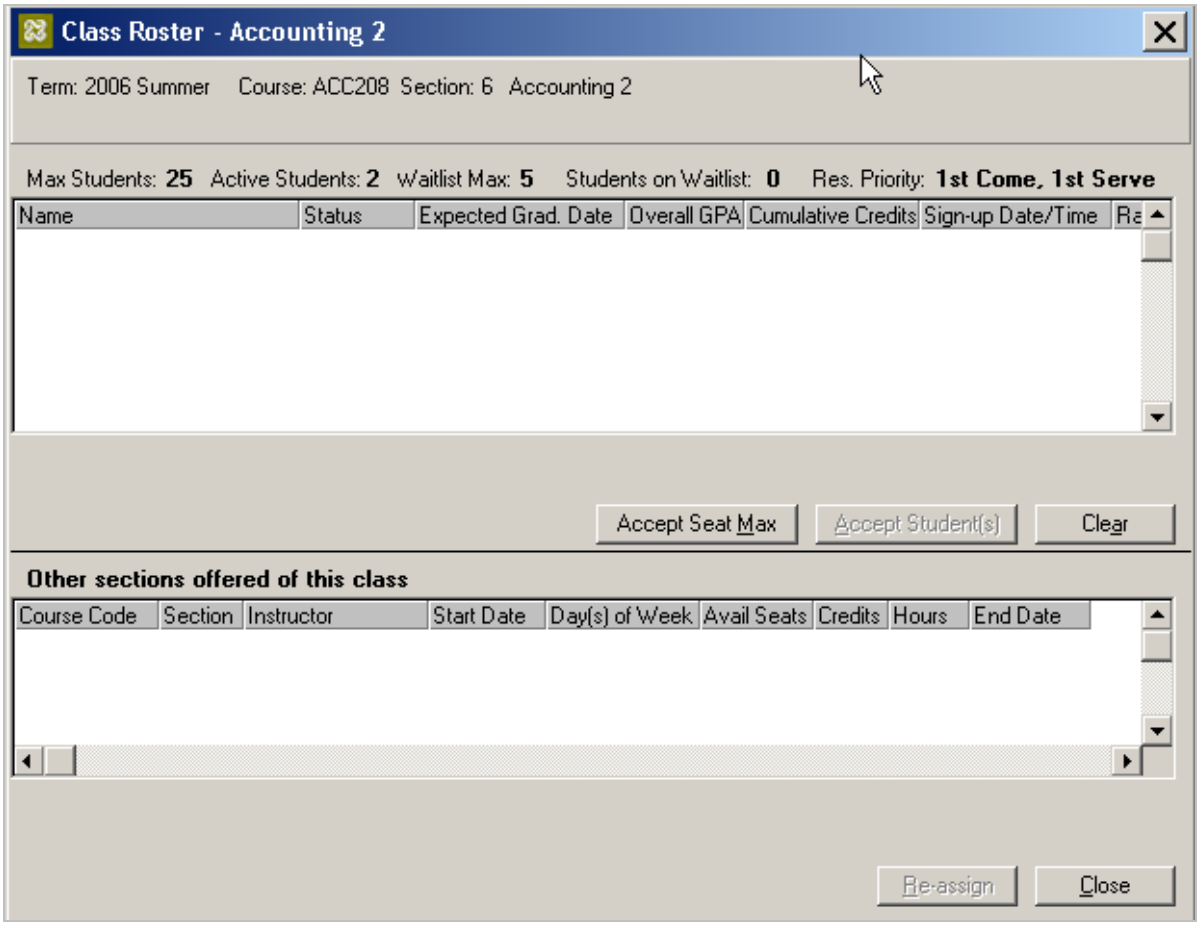
1. Navigate to **Daily > Academic Records > Schedule Classes**. The Class Scheduling form is displayed.



2. Select the **Term**, **Course**, and **Section** for which a roster must be displayed. You can select more than one class section at a time. To select a consecutive range of class sections, click on the first one, press the Shift key, and click on the last one. To select non-consecutive class sections, click the first one, press the Ctrl key, and click each one of the others.
3. Click **Students**. The Class Roster form is displayed.



4. Double-click on a **Student Name** to display the student's Student Master form.
5. Click **Print** to print the Class Roster by Course report. The students in the class section will be listed in name order.
6. Click **WaitList**. The Class Roster form for the course is displayed.



Note: If student registration lock configuration has been enabled, the Registration Locks will be evaluated when **Accept Seat Max**, **Accept Student(s)**, or **Re-assign** is clicked.

7. Click **Accept Seat Max** to accept students on the waitlist until the maximum student capacity is reached, and then register them in the class section. For example, if the maximum student capacity for this class section is 10, and 5 students are registered, this leaves 5 seats available. If there are 10 students on the waitlist, when the user clicks the Accept Seat Max button, the first 5 students on the waitlist will be registered in the class section.
8. Click **Accept Students** to select a specific student on the waitlist who needs to be registered in this class section. Clicking the Accept Student(s) button will select the student on the waitlist and register the selected student in the class section.
9. Click **Re-assign** to reassign a student to another section offered for this class. This button will be enabled if the staff member has permission to reassign the student to another section of the class.
10. Click **Close** to close the form. You are returned to the Class Scheduling form.

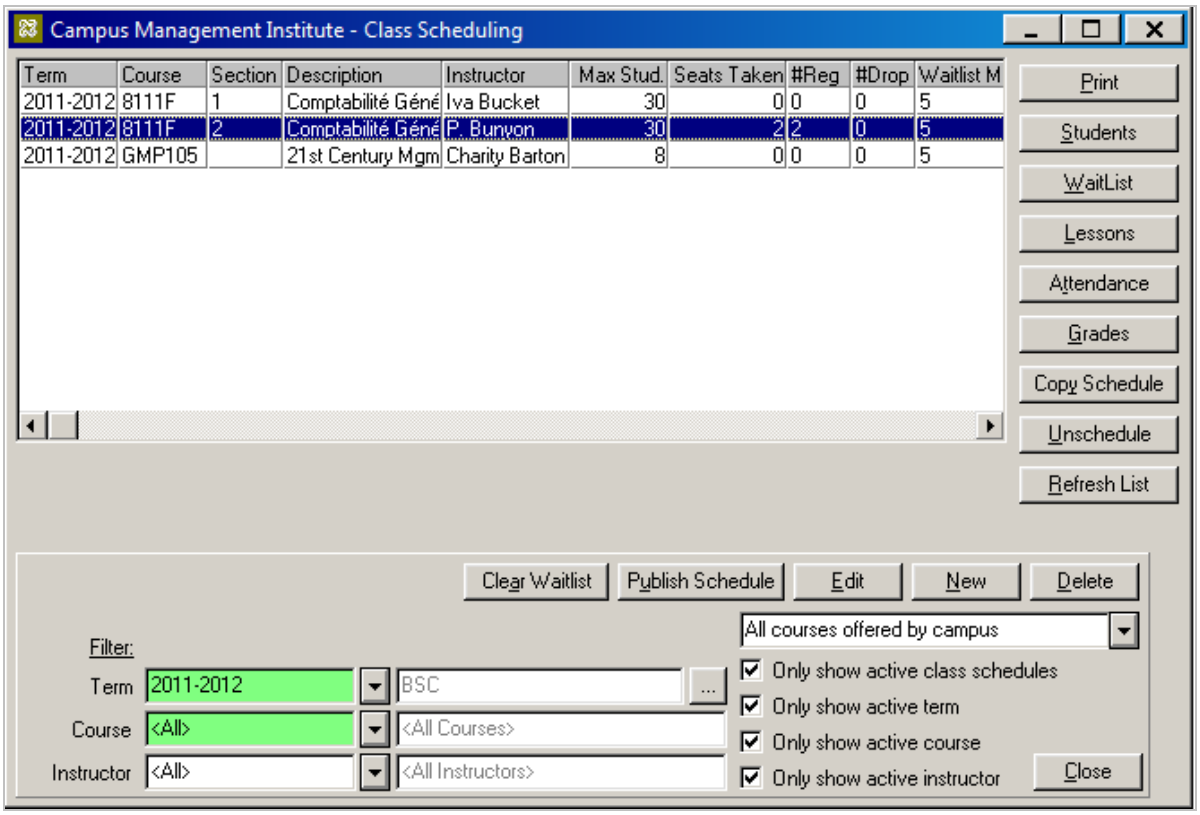
Lessons

The lessons feature of the class section definition is used to define a list of items that the student must accomplish to complete the class section. Since the lessons are defined at the class section level, different sections of the same course may have different lesson plans.

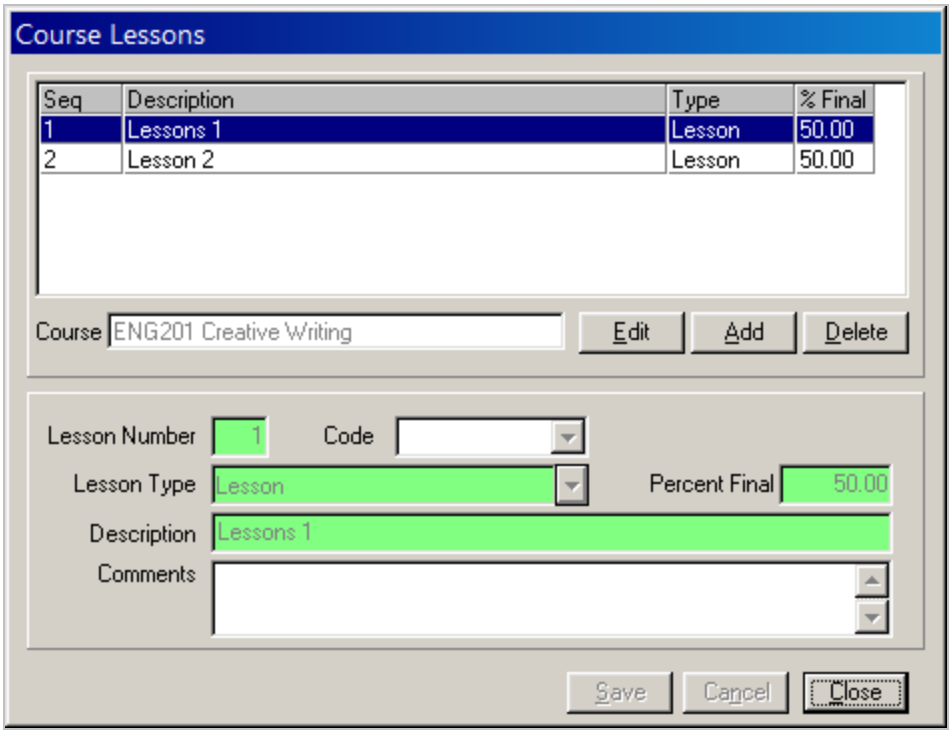
Lessons are classified by type. The default Lesson Types are: lesson, exam, or book report. To define additional lesson types for your institution, navigate to Lists > Academic Records > Lesson Types. The term "lesson" includes exams, book reports, and any other lesson types that have been defined.

To set up lessons for a class section:

1. Navigate to **Daily** > **Academic Records** > **Schedule Classes**. The Class Scheduling form is displayed.



2. Add or select the class section for which lessons are to be added or edited.
3. Click **Lessons**. The Course Lessons form is displayed. Lesson Types are available in the drop-down menu along with the Code and Description.



4. Click **Add**, or select a record and click **Edit**.
5. Enter the data that describes the lesson according to the field descriptions.

Field Descriptions

Field	Description
Lesson Grid	This is a list of the lessons for the selected class section.
Course	This is a display of the course code and description.
Lesson Number	Enter a number for the lesson. The lesson number is the sequence (order) in which the student must complete the lessons. Lessons must be received and graded in order.
Code	Enter a code for the Lesson, Exam, or Book Report. **Note**: The option to print and scan a roster to record midterm grades requires the use of form number F-15173-CMC-L. In addition, the class section must have a lesson set up with a code of MIDTERM. See "Scantron Overview".
Lesson Type	Select the lesson type for this lesson. The default options are Lesson, Exam, or Book Report. Additional lesson types may be selected if defined by your institution.
Percent Final	If you choose to assign a "weight" to this lesson, enter the value. Example: 25.00 for 25 percent of the final grade. The total of all lesson percentages must be 100%. This field retains four decimal places. For example, if enter a value in the Percent Final field such as 33.33 percent, the value is stored in the database as 0.3333. when a grade is posted to the last lesson, the program will automatically calculate and post the final grade for the course.

Field	Description
Description	Enter a description of the lesson.
Comments	Enter additional comments about the lesson.

6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Class Section Attendance

This is an alternative location from which you can enter attendance for a class section. The other location is under Daily > Academic Records > Attendance > Record Attendance . The same form is used in both locations. Attendance can also be posted for a selected student via View (Student Bar) > Academic Records > Attendance.

Attendance is recorded "by exception". In the scenario where you are recording "Time Absent", you need enter data only for those students who were absent or tardy. The other students will automatically be posted as present.

Note: When a section change is performed by a student using the Portal or a staff member using the Portal or through CampusNexus Student, all available classes are displayed and can be properly recorded before and after the change, including classes with multiple meeting periods scheduled on the same day. Class records are available for editing and display/reporting regardless of the student attending or not attending an available course section. All eligible classes from the original section the student transferred out of remain eligible for attendance, even if attendance has already been entered for one meeting period that day.

Posting Attendance for Unscheduled Classes

You can now identify a course that meets at variable days and times. When posting attendance for such a class, you can specify which date you are posting attendance for. This will require an expected day and time to be scheduled to maintain the printing of the student schedule. This is optional. If you do not want it on the schedule, you do not have to specify days and times. A comment box (one line) has been added that can be printed next to the course on the student's schedule. This will allow a course with no days/times specified to show a comment such as "By Arrangement." The Student Schedule report has been modified to show the comments.

Dependent Course

The logic for building the class roster for which to post attendance was modified when posting attendance for a course section where the course is a "Dependent" course.

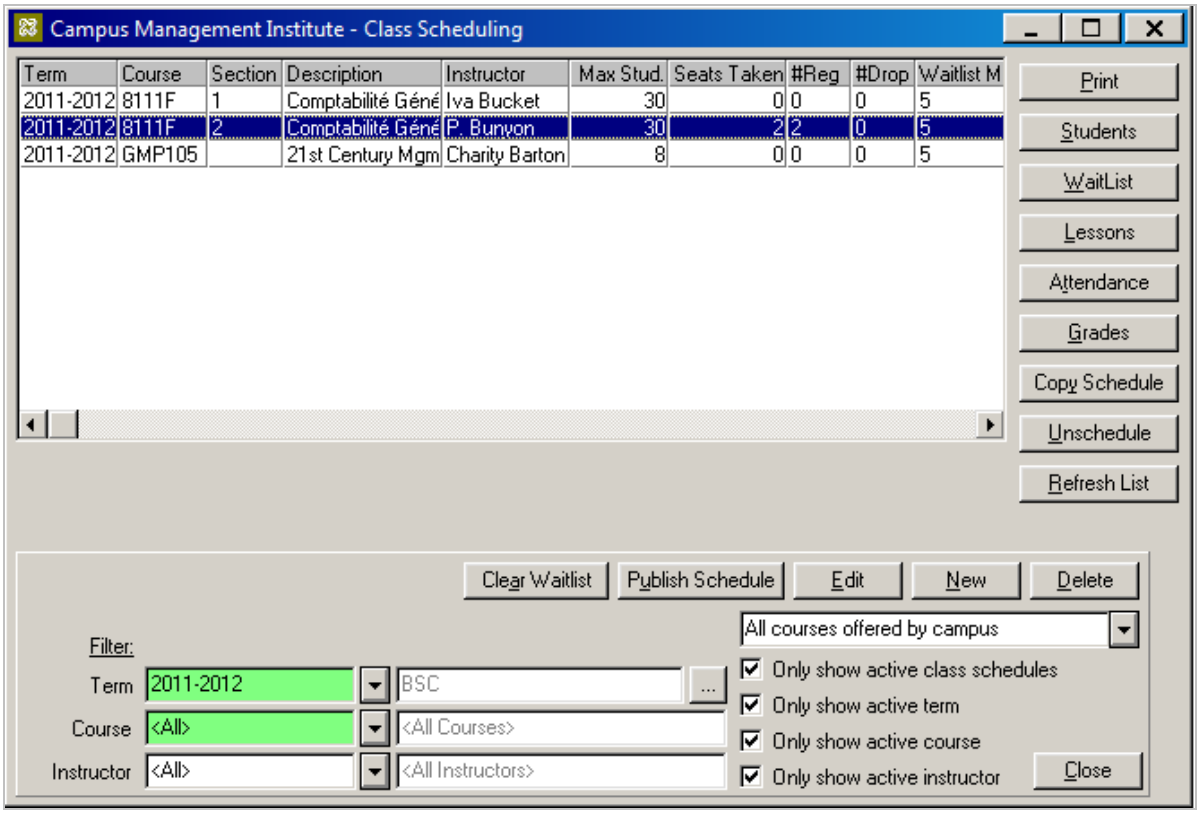
Attendance cannot be posted for dates beyond the current system date.

Attendance for a given class section can only be recorded for dates on or between the start and end dates. They are displayed beside the Instructor's name on the form. CampusNexus Student allows you to schedule more than one meeting of a class section on the same day. Each session will be represented by a different column on the grid. A total of 10 meetings may be scheduled in the same week.

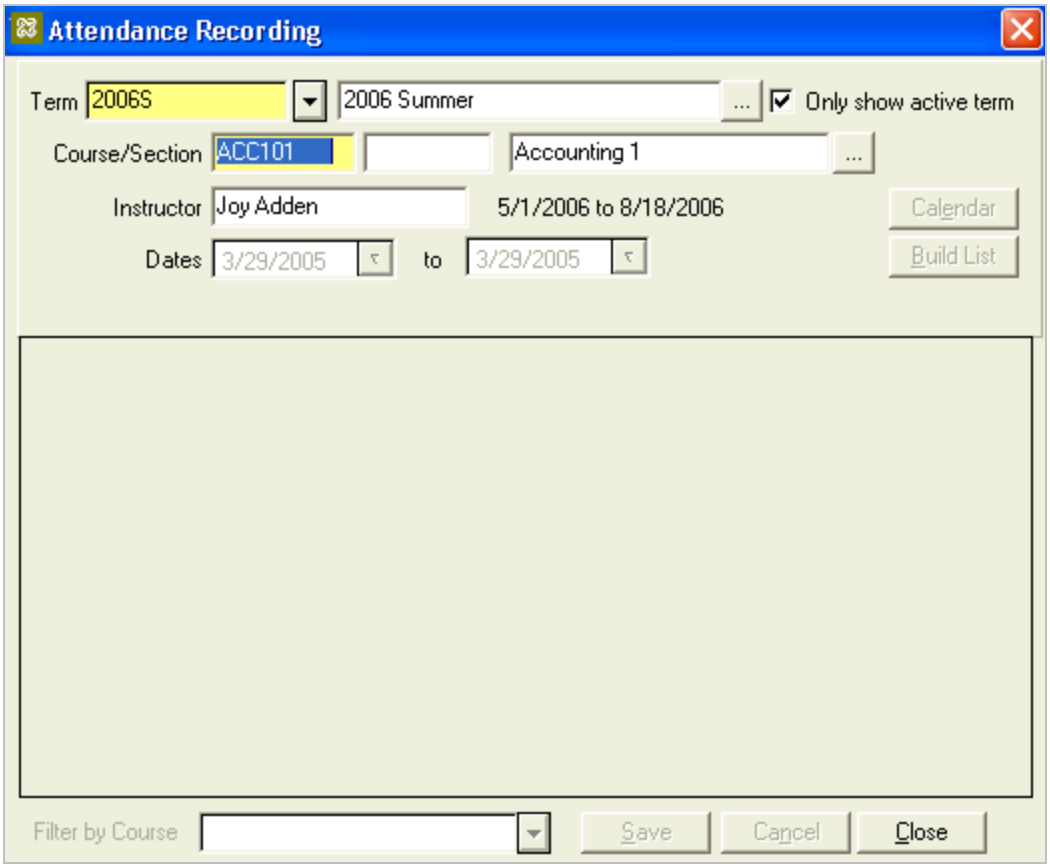
When you set up the class section, you tell CampusNexus Student how to interpret your entries. You can choose to (1) enter the time absent (in minutes), (2) enter the time present in minutes, or (3) enter a quantity of units completed by the student. A reminder of the expected entry is shown below the date range on the form. In the example, "**Enter Minutes Absent**". Note that CampusNexus Student also reminds you of the number of minutes scheduled in the lower left corner of the form (in this case, each meeting is scheduled for 60 minutes).

To enter attendance for a selected class section:

1. Navigate to **Daily** > **Academic Records** > **Schedule Classes**. The Class Scheduling form is displayed.



2. To reduce the length of the list through which you must search to find a particular class section, use the **Term**, **Course**, and **Teacher** filters.
3. Select the class section for which attendance is to be posted from the grid.
4. Click **Attendance**. The Attendance Recording form is displayed.



5. At the top of the form confirm that the correct class and section have been selected.
6. Enter the **Dates**in the date range for which attendance is to be posted. CampusNexus Student populates dates for one week after the **Last Date of Attendance**. You can change the date range to suit your need.

   CampusNexus Student remembers the date range and updates attendance for all students in the class through the end date when you save your entries. The next time you enter attendance for a class section that has been previously updated, CampusNexus Student assumes that attendance has been posted for all dates previously viewed. Students are credited with time in class up to and including the last date shown on the attendance grid.
7. Click **Build List**. CampusNexus Student displays a grid with one row for each student on the class section roster. (One extra row is displayed for technical reasons. You will not use this row.)

   Each row contains the student's status in the class and a cell for each meeting in the date range. Holidays are not displayed. (In the example, Monday, July 5, 1999, is a school holiday. The program did not display it as the default.)
8. Enter the time absent, time present, or units for each date for each student.

   If a student is absent, type an "A" (or a). CampusNexus Student converts your A to the number of minutes scheduled for the class. Alternatively, you can enter the number of minutes scheduled for the class.

   If a student has an excused absence, type an "E" (or e) to record an absence for the scheduled time of the class.

   To record a "tardy" in the "Time Absent" scenario, enter the number of minutes the student missed, e.g., if the student is 15 minutes late to class, enter 15.

If a student is present (in classes set up to record time present), type a P (or p) to record the minutes scheduled for the class. **Note that in the "time present" scenario, CampusNexus Student does not track time absent**.

To record the number of units completed by the student (such as experiments completed, welds made, and so on), enter the number.

9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the **Class Scheduling** form.

Attendance for Unscheduled Classes

You can identify a course that meets at variable days and times. When posting attendance for such a class, you can specify which date you are posting attendance for. This will require an expected day and time to be scheduled to maintain the printing of the student schedule. This is optional. If you do not want it on the schedule, you do not have to specify days and times. A comment box (one line) has been added that can be printed next to the course on the student's schedule. This will allow a course with no days/times specified to show a comment such as "By Arrangement." The Student Schedule report has been modified to show the comments.

The attendance-posting procedure has been modified. If the class meets at regular dates and times, the existing attendance logic will be followed. If the class does not meet at regular dates and times, CampusNexus Student will prompt you to enter the date for which attendance is being posted. The program defaults to the next date of attendance. Dates you enter must be on or after the class start date and on or before the class end date. If your entry fails to meet this test, a warning message is displayed indicating that the "Date is outside of Class start and end dates. Please re-enter date".

When you enter a date, the program checks for existing attendance records. If a record exists for this class section, date, and start time, this data will be loaded into the grid for editing. A message states, "Attendance already on file for entered class and date, enter new attendance hours? If you answer yes, the program will load the grid to add new attendance for the day and start time. If you answer no, the program will load existing data from the attendance table.

You will also be prompted to enter the time the class met and the length of the class. The program defaults to the start time from the schedule table.

When you click the "Build List" button, the students are gathered using the previous routine, but the program defaults the length in minutes to the value you entered. This procedure allows posting for only one date at a time, so the grid will display only the date specified.

When you save your entries, CampusNexus Student updates the next day of attendance based on the class schedule. If there is no record in the class schedule table for this course, the program defaults to the next calendar weekday.

Grades

You can use this form to post final grades for a selected class section. This is an alternative location for accessing this form. See also academic progress.

To post final grades for a class section from this menu option:

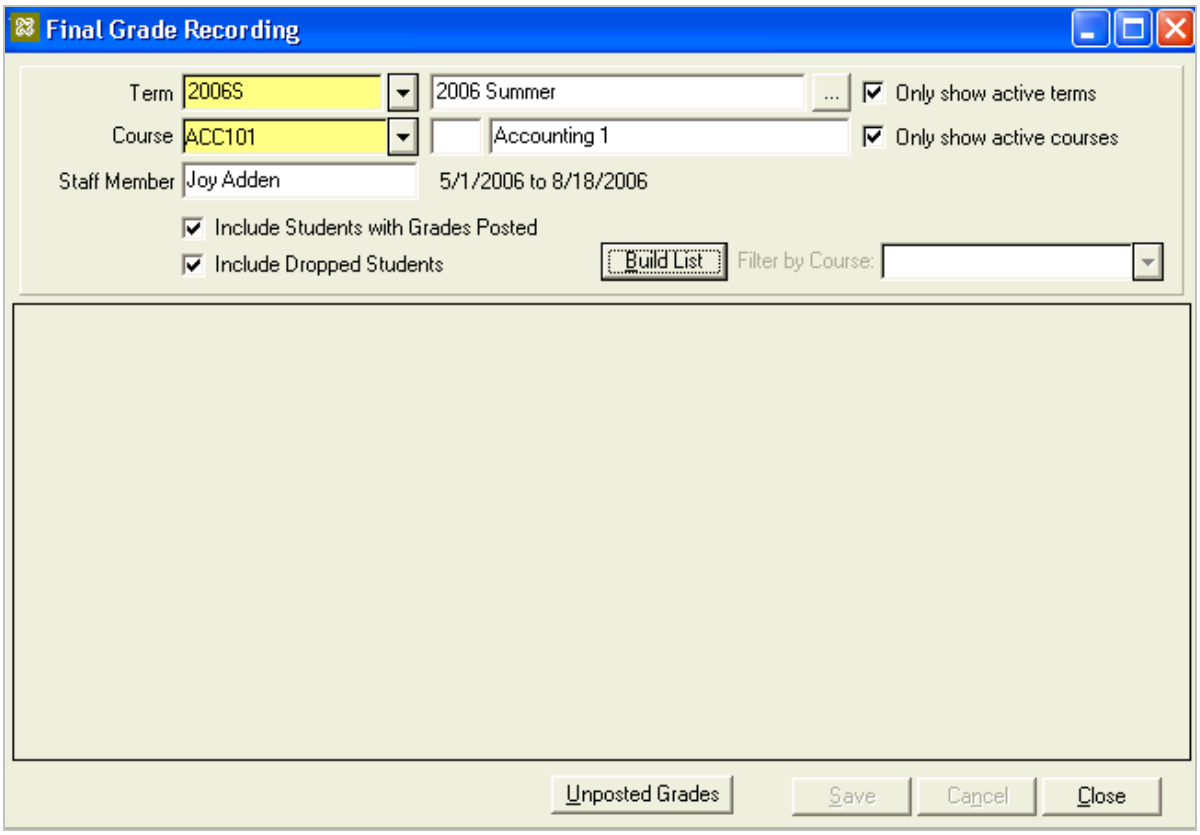
1. Navigate to **Daily > Academic Records > Schedule Classes**. The Schedule Classes form is displayed. Select a course and click **Grades**.

   - OR -

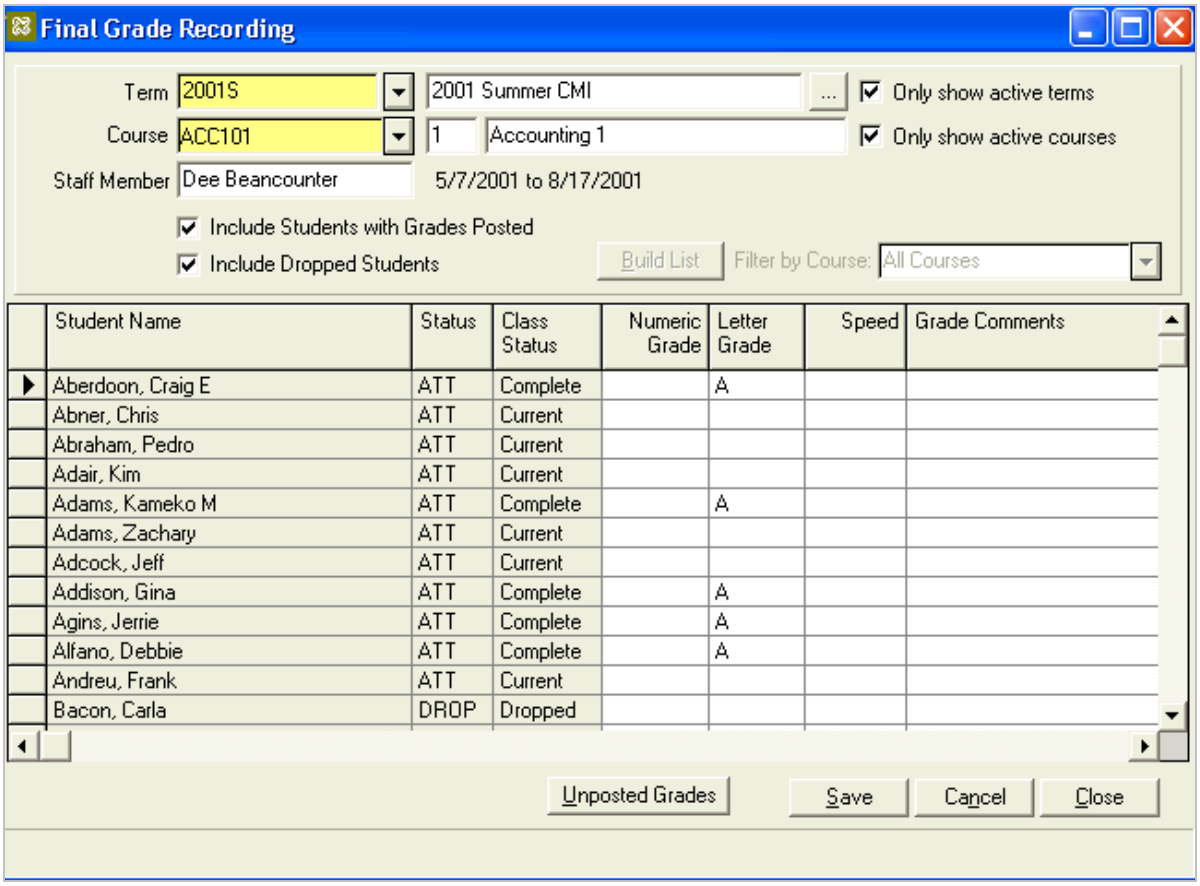
   Daily > Academic Records > Final Grades.

   The Final Grade Recording form is displayed.

2. Select the **Term** for which grades are to be posted. The term description is displayed.



3. Select the **Class Section** for which grades are to be posted. The class section description, instructor's name, and beginning and ending dates are displayed.
4. To include students whose final grade have already been posted, select **Include Students with Grades Posted**. The default is to show all students. Otherwise, leave the check box blank to see only students who have not had grades posted.
5. Click **Build List**. CampusNexus Student builds a grid using the class roster. The grid shows the Student Name, Numeric Grade, Letter Grade, Speed, and Grade Comments.



Field Descriptions

Field	Description
Student Name	The list of students depends on your choice to list all students or only those that do not have grades posted.
Numeric Grade	The numeric grade given to the student whose name is displayed on the row. If your institution does not record numeric grades, leave this cell blank.
Letter Grade	The letter grade given to the student whose name is displayed on the row. A numeric grade was entered is converted to a letter grade according to the grading scale associated with the student's program version. If numeric grades are not used, select a grade from the list that is displayed when you enter the letter grade cell. Otherwise, type the student's grade in the cell. Grades you type in the cells are validated in the program version grading scale that applies to the student. **Note**: Since grades depend on the grading scale associated with the student's program version, it is possible that two students with the same numeric grade receive a different letter grade if a different grade scale was chosen at the time of enrollment.
Speed	This field is used to record such data as typing speed or other "rating" values. It is a numeric field in which you can record anything you like.

Field	Description
Grade Comments	Use this cell to record instructor comments or other information regarding a student's grade. **These comments will be printed on the student's transcript.** **Note**: When assigning final grades to the students, you cannot edit the details of student who has taken the selected course as Audit.
DateGradePosted	This field is included with Final Grades for students. This date is the system date that the grade letter was recorded in CampusNexus Student. This date is used to produce daily grade reports.

6. Enter the **Numeric Grade** or **Letter Grade** for each student on the roster. It is not necessary to enter grades for all students in the same session. You can close the grading form and come back at a later date with more grades or with changes. If you do not enter numeric grades, you can select the letter grade from the list box that is displayed when the insertion point is in a letter grade cell.
7. Enter **Speed** if this value is appropriate for the class.
8. Enter **Grade Comments** as needed. **These comments will be printed on the student's transcript.**
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Copy Section

CampusNexus Student provides a means of copying the parameters of one class section to another. With a similar procedure, you can copy an entire term's class schedule to another term. Once you have completed either of the copy routines, you can access the new class section or new term schedule and modify it. Be sure to check the new dates, instructors, and room assignments.

In CampusNexus Student there is another location where you can also perform these copy procedures. Please refer to Daily > Academic Records > Copy Class Schedule for instructions on copying class schedules for an entire term.

Note: This procedure is used to copy a class section within a term. To copy class sections into another term, use the copy term procedure. CampusNexus Student does not copy any information about students in the class section you choose as the source class section for the copy.

Note: It is not possible to copy class schedules when using floating terms.

To copy a class section:

1. Navigate to **Daily** > **Academic Records** > **Schedule Classes**. The Class Scheduling form is displayed.
2. Click **Copy Schedule** and follow the steps described in the Copy Class Schedule procedure.

Unschedule Classes

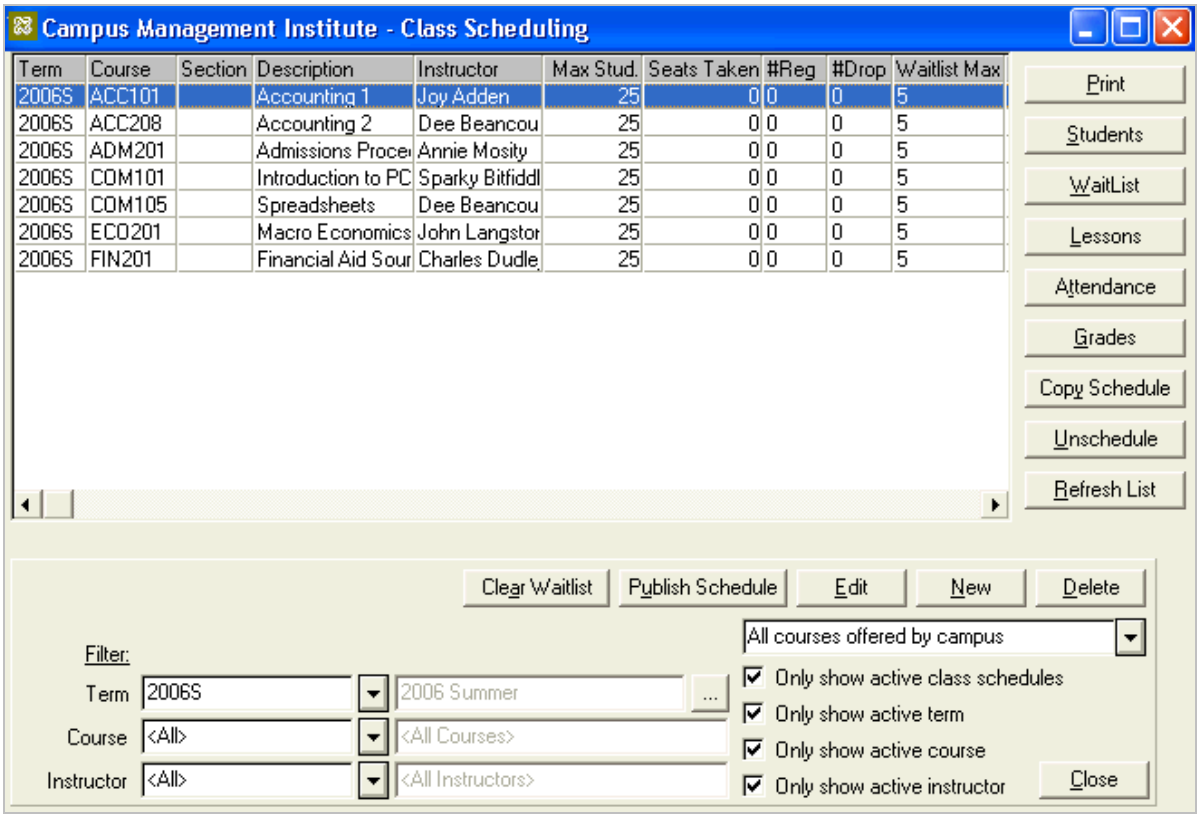
The Unschedule procedure is used to cancel selected class sections for a given date. This feature is used to cover the unexpected circumstances such as snow days, hurricanes, earthquakes, and so on that keep classes from meeting as previously scheduled. By using this procedure, you are excusing students from the selected class sections on the selected date. Attendance is treated as if the day was a Saturday or Sunday when classes are not in session.

Rather than simply treating the date as if all classes are called off, you can select the affected class sections because some sessions may be completed as scheduled on the selected date.

To unschedule selected class sections for a given date:

1. Navigate **Daily** > **Academic Records** > **Class Scheduling**. The Class Scheduling form is displayed.
2. Use the **Filter** options to narrow the list of class sections to be considered. In particular, select the affected **Term**.
3. Within the affected term, **select the class sections** to be cancelled.

   You can select a group of adjacent class sections on the list by clicking the first class in the group then, while holding down the **Shift key**, click the last class in the group. You can select multiple non-adjacent class sections on the list by holding down the **Ctrl key** while clicking the class sections on the list.
4. Click **Unschedule**. The Class Unschedule Date form is displayed.



5. Enter the **Date** for which classes are cancelled.
6. Click **Save** to unschedule the class section(s). If any of the selected class sections are not scheduled to meet on the selected date, you will see a message indicating that. Other selected classes are not affected by the message.

Dependent and Parent Courses

If a course is dependent, it will require a "parent" course code to be defined. The dependent course is a course (such as a lab) where students on the roster are linked to a parent course. This allows "child " rosters to be created from the parent roster. A common application of this is a lecture roster, which might hold 80 students. The lab portion of the lecture course meets at four different times with each lab roster being comprised of 20 students each. All attendance posted for the dependent course is included in the total hours of the parent course. The main benefit of this feature is that a school now can create multiple sub-rosters from a main parent roster without losing the ability to track hours attended and scheduled for the parent course.

Lists > Administration > Courses

You can indicate that a course is a "parent" or "dependent" course.

- If a course is defined as "dependent", you can select one or more courses that will be the course's "parent". A "dependent" course can have more than one "parent" course.
- If a course is defined as "dependent", the hours and credits fields will be disabled. These fields are not applicable for "dependent" courses.
- A parent course can have only one course designated as "dependent".

When the check box "Dependent Course" is selected, the course will be tagged as a "Dependent" course. If the box is cleared, the course will be tagged as a "Parent" course. When adding a new course, the default choice for this field is cleared.

If the dependent course check box is selected, the Credits and Hours fields are disabled. These fields are not applicable for a dependent course.

A button has been added to the left of the Fees button. If the dependent course check box is selected, the label for the button label will be "Parents".

When the button is clicked, a new form is displayed. The form will consist of two buttons and two list boxes.

There will be no tabs on the top of the form. The heading for the list box on the left is "Available Courses". If the "Dependent Course" check box is selected, the heading for the list box on the right is "Selected Parent Courses".

If the "Dependent Course" check box is selected, the "Available Courses" list box will be populated with all active "Parent" courses. The course code and description will display for each row presented in the "Available Courses" list box. Multiple parent courses may be specified for a dependent course.

Lists > Academic Records > Programs > Versions > Required Course List

The drop-down list of courses has been modified to exclude "Dependent" courses.

Daily > Academic Records > Registration

Note: For those schools that use track registration, students can only be registered in "Parent" courses. You can only register students in "Dependent" courses using term registration.

If you are registering students for a course defined as "Dependent", the criteria to display the available students on the registration form are modified. If the course selected in the opening form is defined as "Dependent", the available students selected for the list box will be all students who are currently registered for any course defined as the parent of the dependent course in the selected term.

A button has been added to the registration form to list the students already registered in the selected course section.

Two fields, "Max Students" and "# (Number) Registered", have been added at the top of the form to list the number of students currently registered for the course and the maximum number of students allowed to be registered for the course section. The number of students registered field will be redisplayed as students are selected for and deselected from the course section.

Before loading the registration form, the course section selected is evaluated to see if the course is defined as a "Dependent" course or a "Parent" course. If the course is a "Parent" course, the logic for populating the Students Available list box will remain the same. If the course is a "Dependent" course, the Students Available list box will be populated with students who are currently scheduled for any "Parent" course in the selected term.

A "Registered Students" button has been added on the bottom of the form. When you click this button, a form will be presented that lists the students who are already registered in the selected course section.

Daily > Academic Records > Attendance > Record Attendance Dates

An alert message has been added to the Record Attendance Dates form that will warn you if no course sections exist in the selected term that are set up with an Attendance Type of "None". When a term is selected from the drop-down list, the course drop-down list is built by selecting all rows from the class schedule where the attendance type is "None" for the selected term. If no rows are selected, an alert message is displayed as follows:

"There are no course sections on file for the selected term where the attendance type is None." Click OK. Upon exiting the alert message form, CampusNexus Student closes the form.

Logic has been added so that course sections where the course is defined as "Dependent" will be omitted from the course section drop-down list on this form.

If the "Parent" course is set up with an Attendance Type of "None", the last date of attendance will be tracked for that course only. A separate last date of attendance for the "Dependent" course will not be tracked.

View > Academic Records > Schedule

When you click Register on the Schedule form, an alert message will warn you if the selected course is not currently scheduled for any term. Previously, the subsequent Add Course form was loaded, but the term drop-down list was empty. The following alert message is displayed if the highlighted course is not scheduled for any terms. "The selected course is not currently scheduled for any terms." Click OK. The program returns to the Schedule form.

Daily > Academic Records > Schedule Classes

Logic has been added to the "Delete" button on the Schedule form to prevent a course section from being deleted from a term if it is a "Parent" course, has a course defined as it's "Dependent", and the "Dependent" course has at least one section scheduled for the selected term. A message is displayed: "This course section has a dependent course scheduled for the term. This course section cannot be deleted." Click OK.

Logic has been added to the "New" button on the Schedule form to prevent a course section from being scheduled for a term if it is a "Dependent" course and the defined "Parent" course has not been scheduled for the selected term. A message is displayed: "There are no parent courses currently scheduled for the term for this course. This course section cannot be added to the term class schedule until at least 1 parent course has been scheduled." Click OK.

Daily > Academic Records > Attendance > Rosters

Logic has been added to the printing of class rosters to properly select students when printing a roster for a course section where the course is defined as "dependent".

Daily > Academic Records > Schedule Classes > Attendance
Daily > Academic Records > Attendance > Record Attendance

The logic for building the class roster for which to post attendance has been modified when posting attendance for a course section where the course is a "Dependent" course.

View > Academic Records > Schedule > Print > Schedule
Reports > Academic Records > Student Schedule

The logic for the Student Schedule report has been modified to include "Dependent" course sections scheduled for a student.

Reports > Academic Records > Posted/Unposted Attendance

Logic has been added to this report to exclude course sections where the course is defined as a dependent course.

Reports > Academic Records > Detail Attendance

A comment field will be added to this report. If a detailed attendance record is for a "Dependent" course, the "Dependent" course description is updated to the comment field in the attendance table. The course description will be listed in the new column.

Reports > Academic Records > Class Roster by Course

The logic for listing the class roster has been modified to list the correct set of students when a class roster is for a course that is defined as "Dependent".

Reports > Academic Records > Class Roster by Instructor

The logic for listing the class roster has been modified to list the correct set of students when a class roster is for a course that is defined as "Dependent".

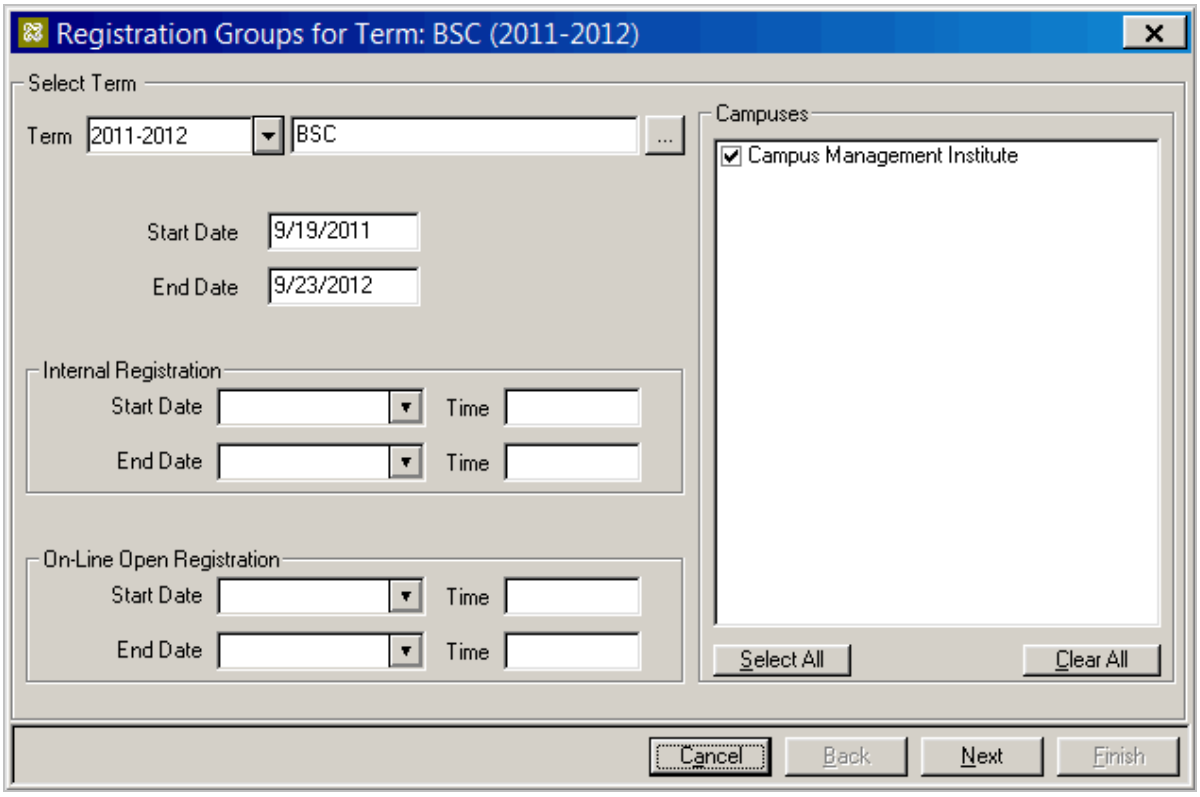
Define Term Registration Groups

The Term Registration Groups feature allows you to define groups of students for registration. This can be useful to divide the number of students to register for a term into three groups of students with last names beginning A through H, I through P, and Q through Z. By setting different term registration dates for these groups, you can avoid having all students trying to register at the same time and better control the numbers. You can also define a registration group of all students assigned to a particular Admissions Representative.

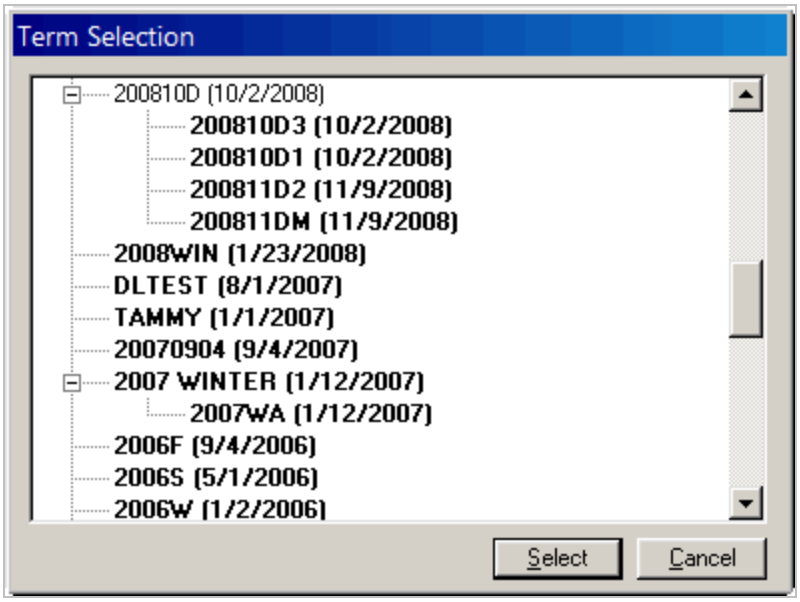
Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

To define a term registration group:

1. Navigate to **Daily > Academic Records > Define Term Registration Groups**. The first step of the Registration Groups for Term wizard is displayed.

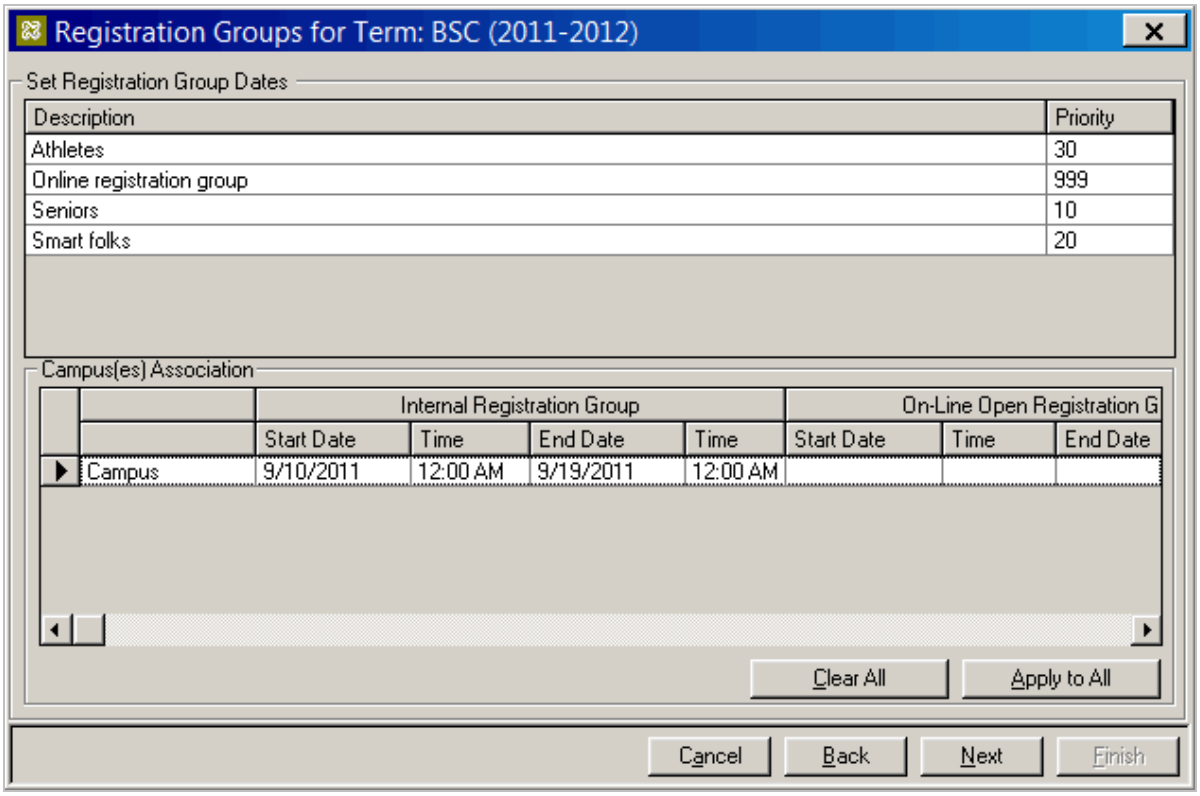


2. Select the term code in the **Term** field drop-down. You can also click ... to the right of the **Term** field to view the Term Selection form for term selection.



3. Once you have selected a term, their associated campuses appear in the **Campuses** list and the Term is displayed in the header of the form. Select all applicable campuses that are associated with the Registration Group for the term selected.
4. Specify the dates and times for the start and end of the registration periods for the selected term in the **Start Date** and **End Date** fields. You can do this for **Internal Registration** and **On-Line Open Registration** periods.
5. Click **Next**. You can prioritize the *display* of registration groups, using numeric values from 0 through 999. If you are dividing students into three groups based on first initial of their last name, for instance, you could have any one of the three groups displayed first, instead of always the A through H group.

   Note: The priority of registration (i.e., dates when a Registration Group can register) is determined based on the Start and End Dates entered for each group. The Priority field on this form does not affect the dates when a Registration Group is permitted to register.



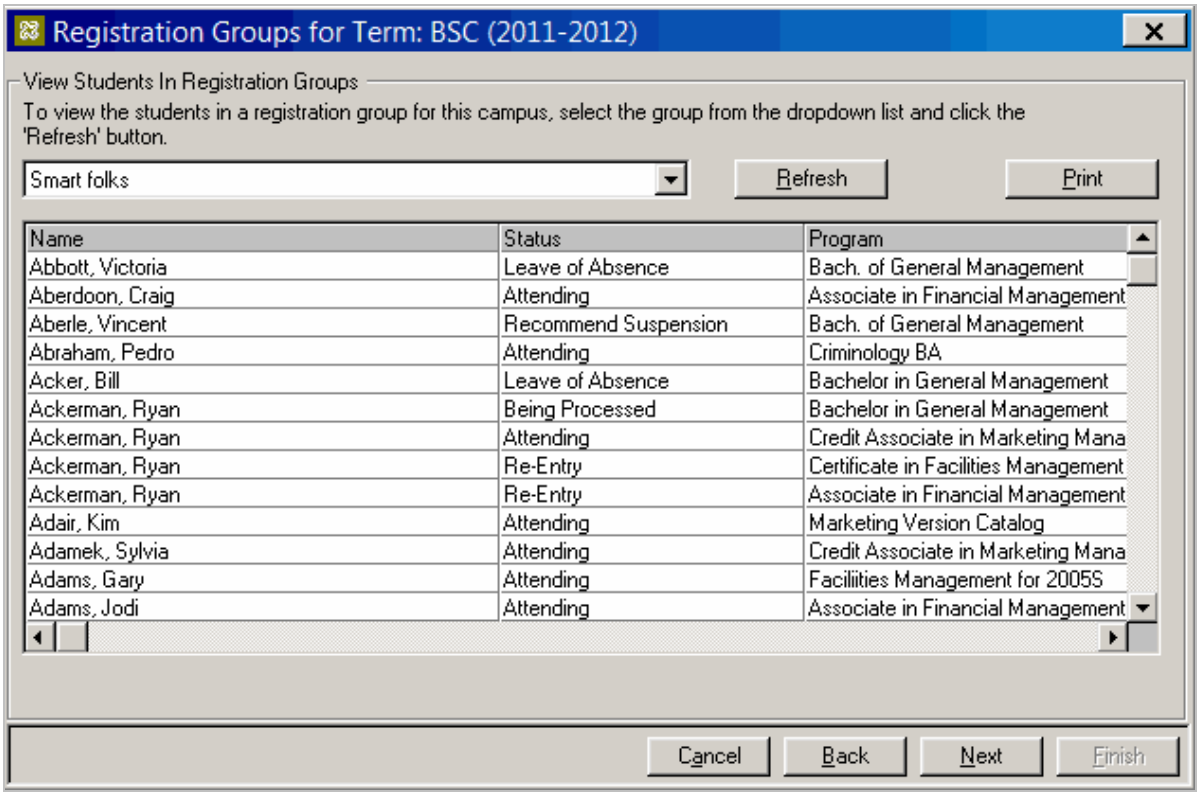
6. When a group is selected, campuses associated with the Registration Group selected are displayed in the lower portion of the form where registration dates may be entered. The start and end dates for the registration periods must occur on or before the term start date.

   Specify the desired dates for the first campus listed and click **Apply to All** to implement the registration dates for all campus terms listed below the first campus.

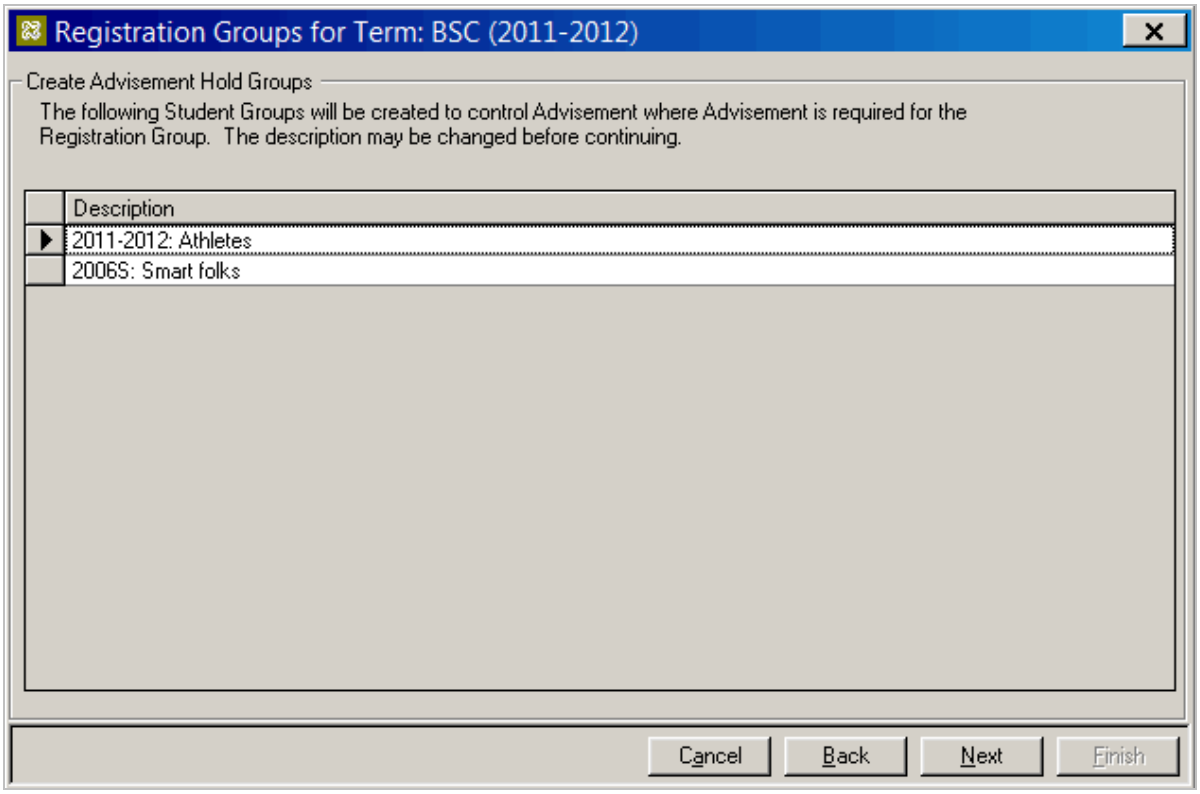
   CampusNexus Student displays a message stating "Selected registration date configuration will be applied to all the campuses whose date column(s) is blank".

   If no dates are entered for a Registration Group, the members of that Registration Group will be assigned the start and end dates specified on the first page of the Registration Groups for Term wizard.

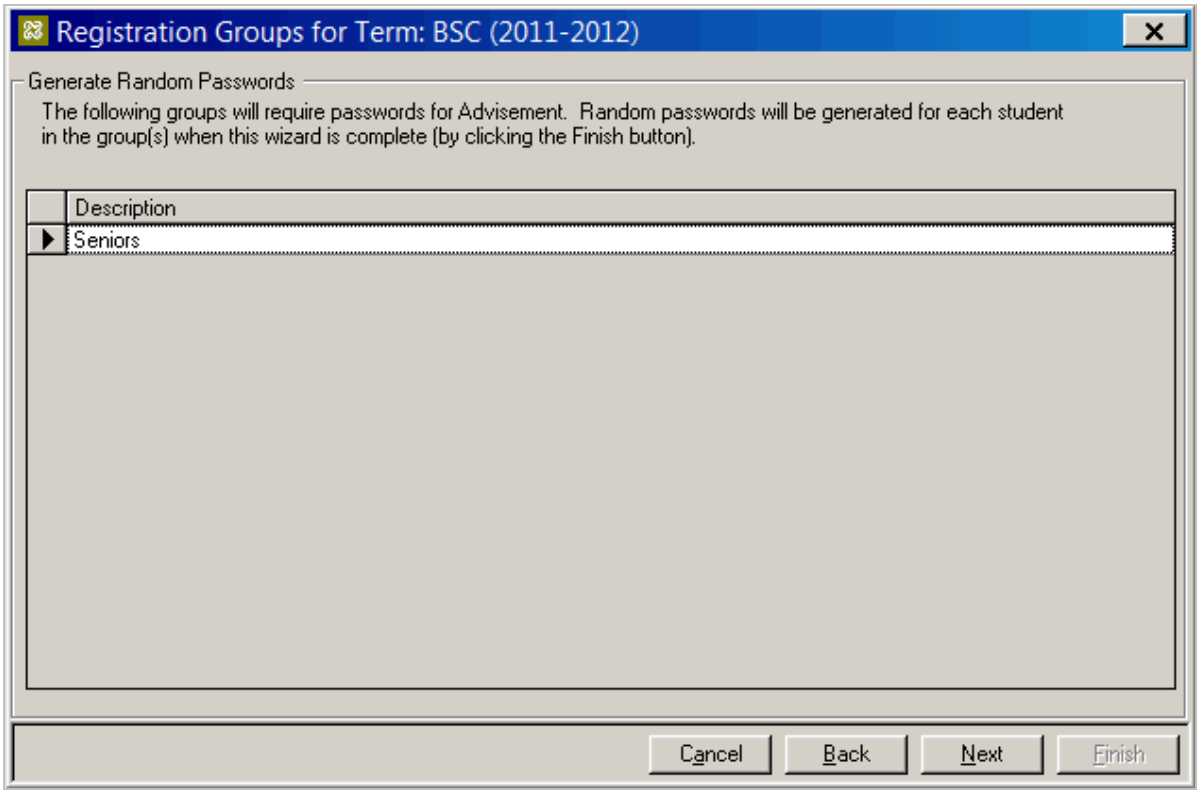
7. Click **Next**. Select a Registration Group and click **Refresh** to view all the students who are members of the group.



8. Click **Next**. If any Registration Groups have the Advisement option enabled, this form displays Registration Groups that will be on hold until the required advisement is conducted.

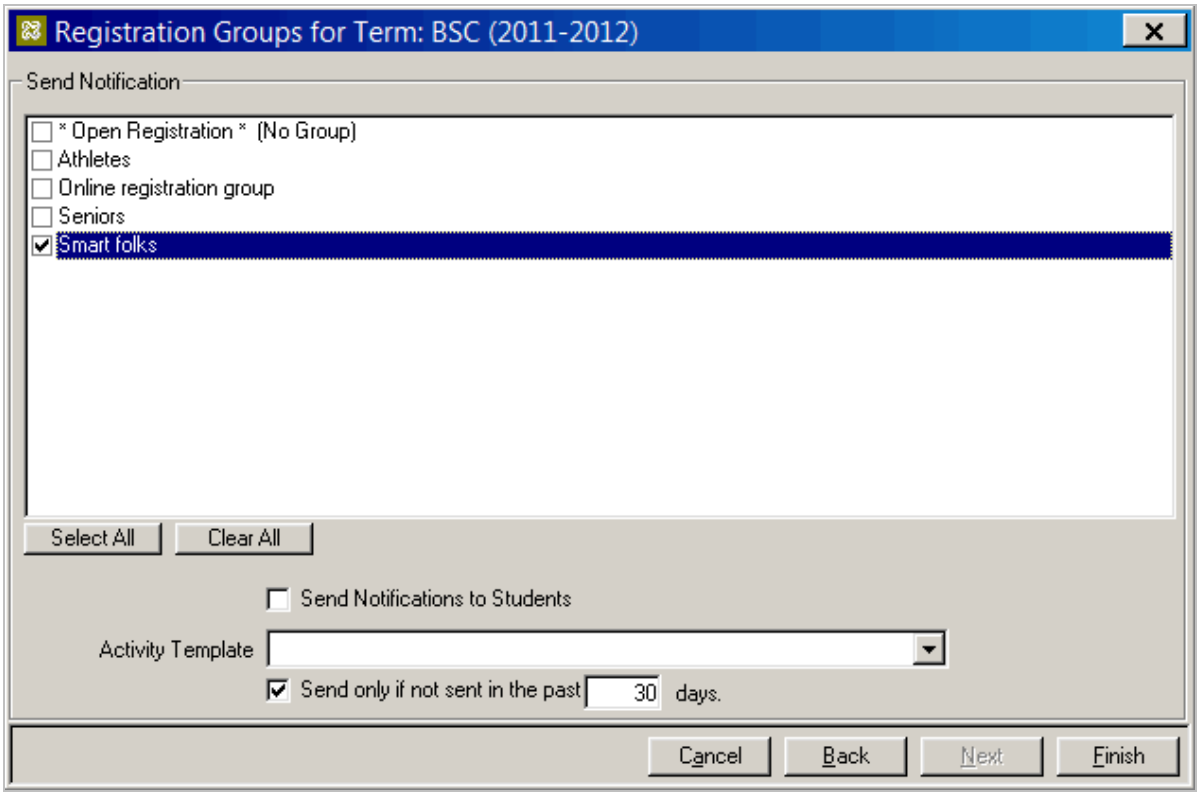


9. Click **Next** to view the **Generate Random Passwords** form. If any Registration Groups have the Password option enabled, this form displays the Registration Groups that require passwords for advisement.



10. Click **Next** to view the **Send Notification** form. Each Registration Group can have notification enabled or disabled by checking the box next to the group name. Select the activity used to notify the students from the **Activity Template** drop-down list.

    Select **Send only if not sent in the past** and specify the number of days.



11. Click **Finish** to save your changes and close the wizard.

Setup Registration Tracks

This form is used for setting up an entire track of courses to be used for registration. The track will include the class sections that a student will be taking and the order in which the student will take them. A school can setup a different registration track for each start date for a program.

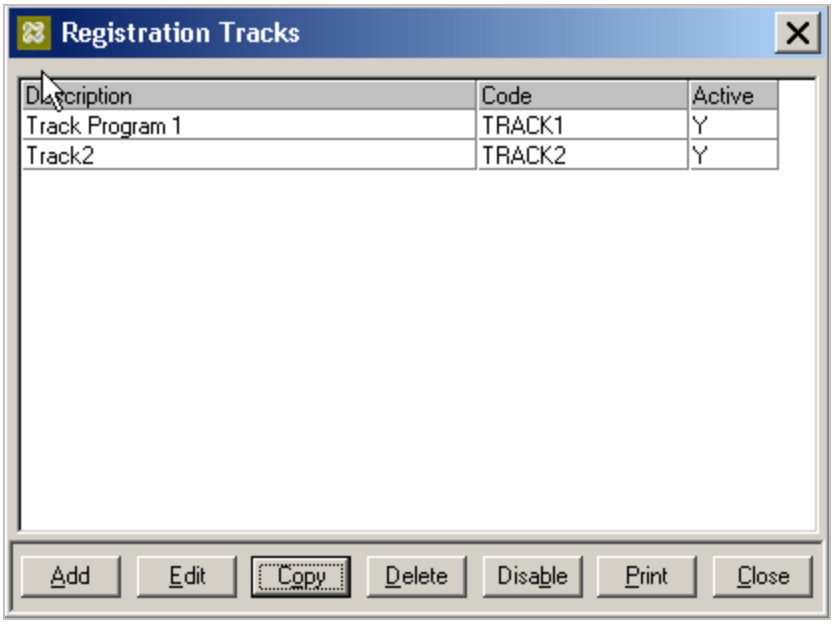
It is recommended that you plan and set up the entire track progression (in other words, all required courses, terms, and class sections) prior to setting up your Registration Track. While it is possible to start with a partial set of track parameters, it is more difficult to come back at a later date and add additional courses, terms and class sections. It will require a re-registration of the students in the track.

The setup form includes a code and description along with the class sections that belong to the track. The combo boxes for Terms and Program are used to add scheduled classes to the grid. When one or more terms are selected, all class schedules for the terms selected will be added to the grid (courses must be defined in **Daily** > **Academic Records** > **Schedule Classes**). When a combination of program and terms are selected, only the courses that are specified for the program and are scheduled in the terms selected will be added to the grid. After the grid has been filled with the selected courses, you select each class section to be used for the registration track. After saving the track, only the courses that were selected are displayed. More courses can be added by selecting more term(s) to add and then selecting the class sections to add.

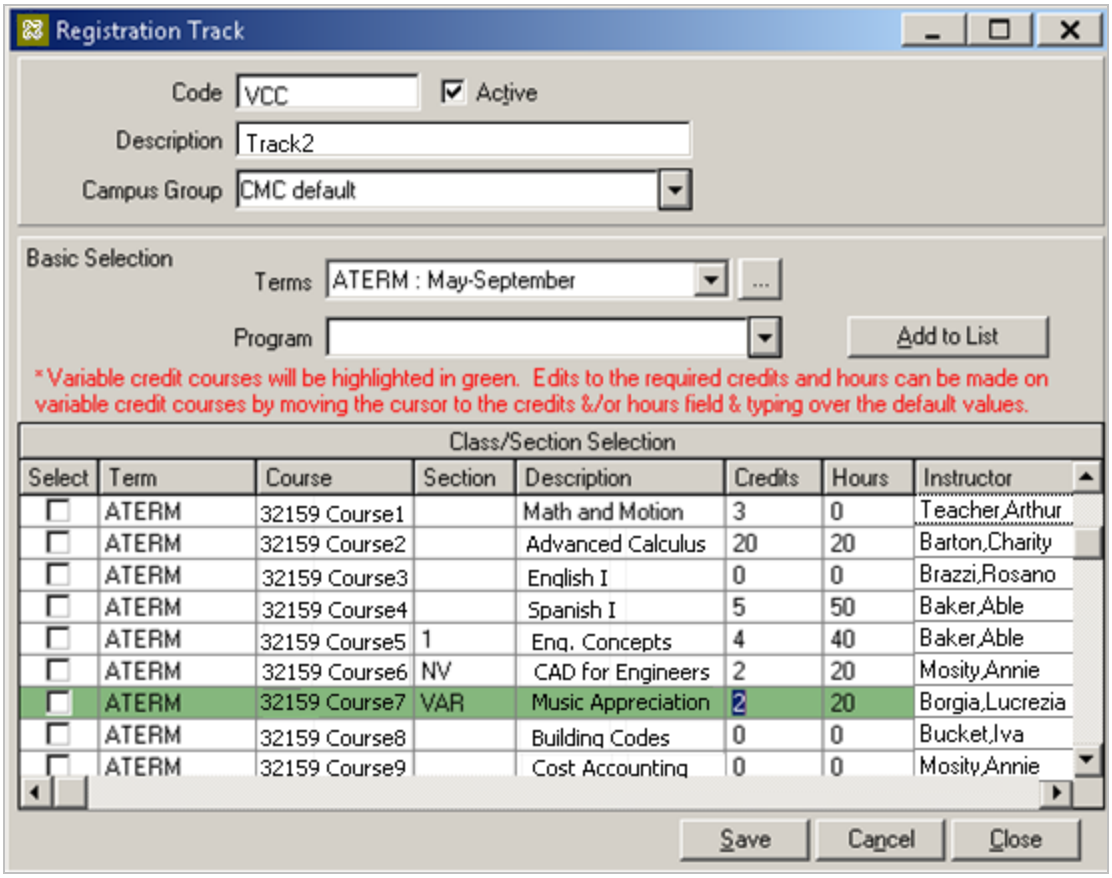
Options have been added to the registration form (Daily > Academic Records > Registration) for TERM or TRACK registration. The Term Registration works the same as in previous versions. Track registration will allow you to register student(s) into a predefined track of classes. When using the track registration, you will select the track to be used for registration. The track registration method will register only those students that have the course on their class schedule with a status of Future or Scheduled. If a student does not have the course as Future or Scheduled, they will not be registered into the class section defined in the track.

To work with a registration track:

1. Navigate to **Daily > Academic Records > Setup Registration Tracks**. CampusNexus Student displays a list of registration tracks.



2. Click **Add** to create a new track, or select a listed track and click **Edit** to see the detail form. CampusNexus Student displays the Registration Track form.



3. Specify a unique **Code**.
4. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
5. Enter a **Description**.
6. Select a **Campus Group** that will use the registration track.
7. Select one or more **Terms** that will be included in the registration track. The list boxes for Terms and Program are used to add scheduled classes to the **Class/Section Selection** grid.
8. Select a **Term** and **Program** from which courses will be added to the **Class/Section Selection** grid.
9. Click **Add to List**. CampusNexus Student adds all the class sections required by the program in all the selected terms to the **Class/Section Selection** grid. (If the same course is offered in multiple sections in multiple terms, you will see it listed several times on the grid at this point.)
10. To form your registration track, select the courses to be taken by the track students in each term. Keep in mind the need to coordinate your selections so that prerequisite courses are taken in earlier terms. Also keep in mind the total credits or clock hours being selected in each term.
11. If one or more of the courses you have selected are variable credit courses, they will be highlighted in green. The required **Credits** and **Hours** may be edited by moving the cursor to the desired field and typing over the default value.
12. Click **Save** to save the class sections you selected for your registration track.
13. After saving the track, only the courses that were selected are displayed in the grid. More courses can be added to

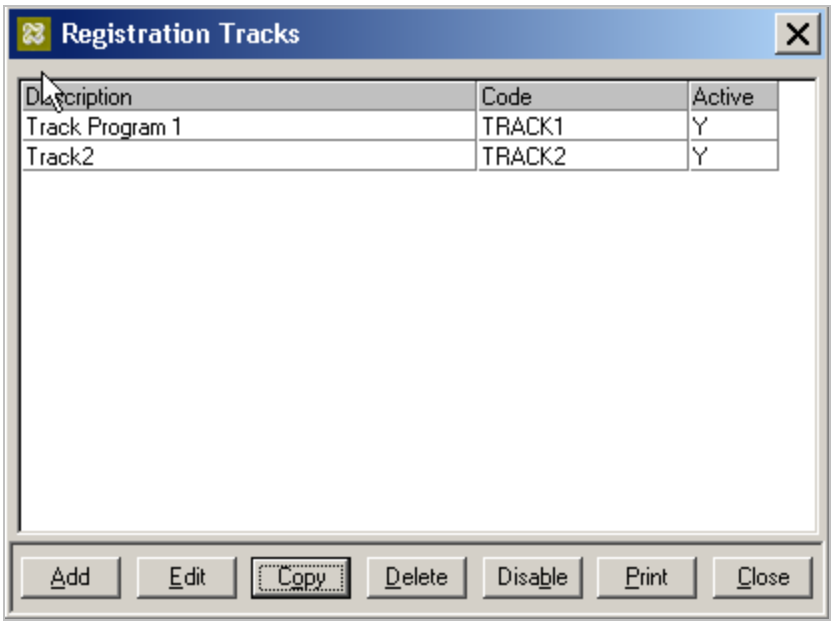
the grid by selecting the program and/or term(s) to add and then selecting the class sections to add. (It is best to make any additions to the registration track before registering students in it.)

14. Click **Close** to close the form.

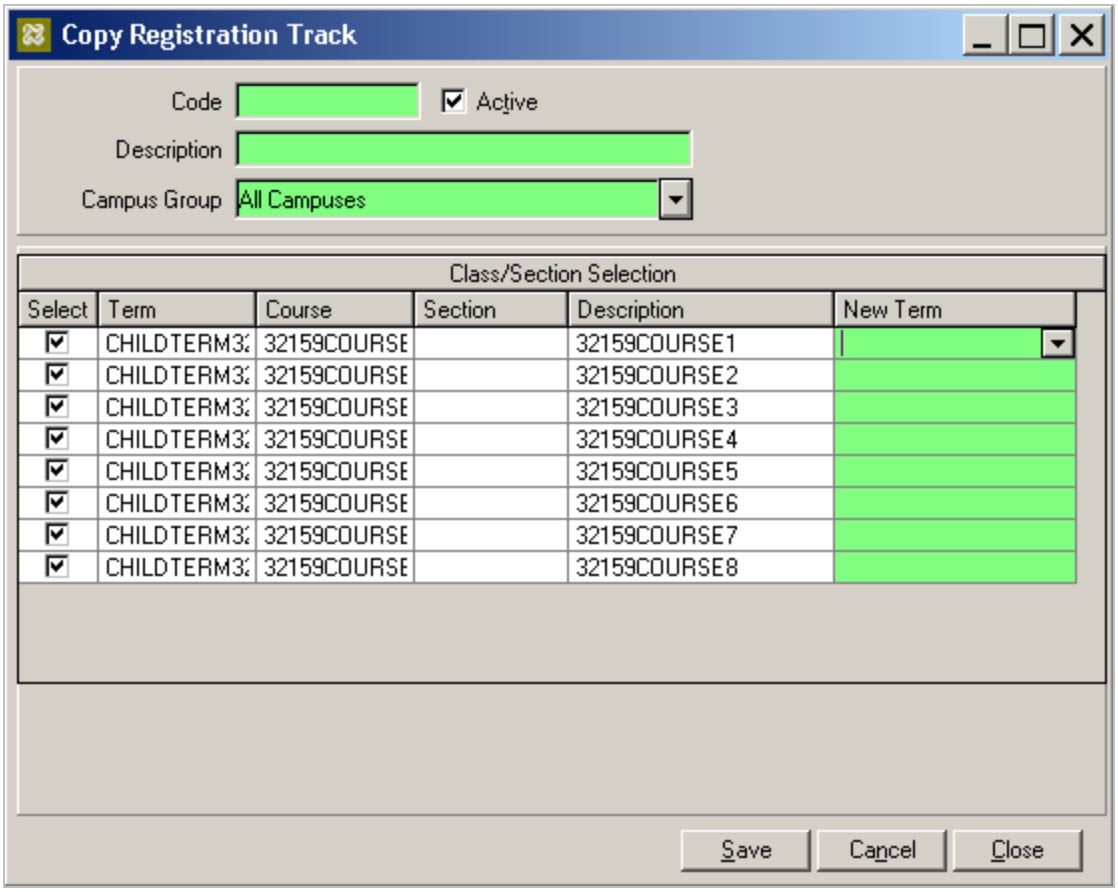
After you have set up your Registration Track, you are ready to register students. Go to the Daily > Academic Records > Registration menu option. On the first page of the registration wizard, click the **Track Registration** option.

To copy a registration track:

1. Navigate to **Daily** > **Academic Records** > **Setup Registration Tracks**. CampusNexus Student displays a list of registration tracks.



2. Highlight the registration track row that you want to copy and click **Copy**. CampusNexus Student displays the Copy Registration Track form.



3. Specify a unique **Code**.
4. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
5. Enter a **Description**.
6. Select a **Campus Group** that will use the registration track.
7. The **Term** column is the term of the original course in the track. The **New Term** column drop-down list displays a list of terms that are available for the course in the track to be copied to. Select a term that will be included in the newly copied registration track.

   Note: Terms are displayed in the **New Term** column if the Course and Section is an exact match of the original Course and Section (**Daily** > **Academic Records** > **Schedule Classes**).
8. Click **Save** and the Copy Registration Track form will automatically close.

Registration

The Registration Wizard makes it easy to register several students in a class section at the same time. You specify term and class section in which to register the students, and CampusNexus Student provides a list of students for whom the course is on their program version list. A Track Registration Exception Report is provided upon completion of the Registration Wizard process showing all students who were not registered along with details and reasons.

Note: To register a student individually in a class section, select the student and navigate to View > Academic Records > Schedule.

The batch registration wizard includes two options: Term or Track registration.

With Track registration, you can register students into a predefined track of classes. The track defines the schedule of courses to be used for registration. After selecting the track, you can select one or more groups of students to be registered into the track. (Using the student groups is not required for track registration.) When the groups are selected and you click Next, all students in the groups are added to the selected students list for registration. (Students are not added to the selected students list if they are on Registration hold.) Individual students can be added or removed from the selected students list before finishing the registration. The track registration method registers only those students that have the course on their class schedule with a status of Future or Scheduled.

CampusNexus Student checks the hold code for registration. If a student is in a group that is in the hold list, CampusNexus Student does not allow the student to be registered.

Parent and Dependent Courses

For schools that use track registration, students can only be registered in "Parent" courses. You can only register students in "Dependent" courses using term registration.

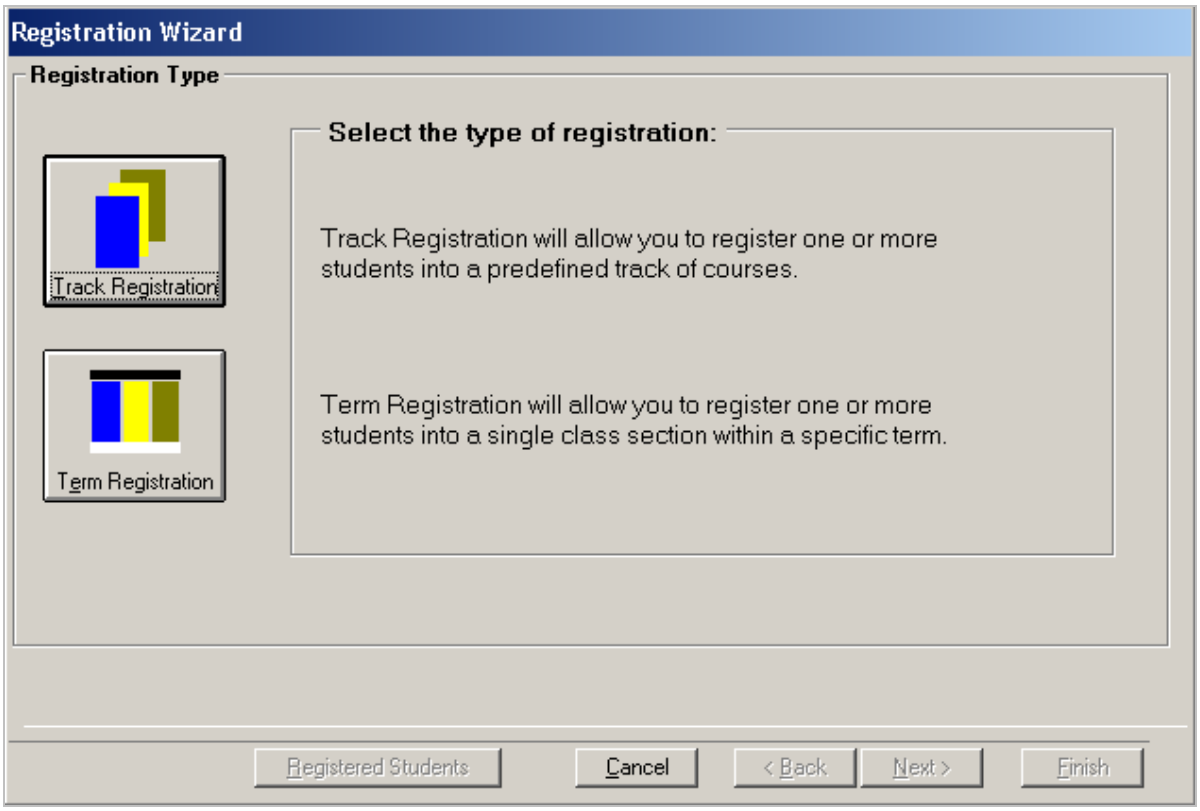
If you are registering students for a course defined as "Dependent", the criteria to display the available students on the registration form are modified. Before loading the registration form, the course section selected is evaluated to check if the course is defined as a "Dependent" course or a "Parent" course.

- If the course is a "Parent" course, the logic for populating the Students Available list box remains the same.
- If the course is a "Dependent" course, the Students Available list box is populated with students who are currently scheduled for any "Parent" course in the selected term.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

To register a batch of students in a class section:

1. Navigate to **Daily > Academic Records > Registration**. The Registration Wizard is displayed.

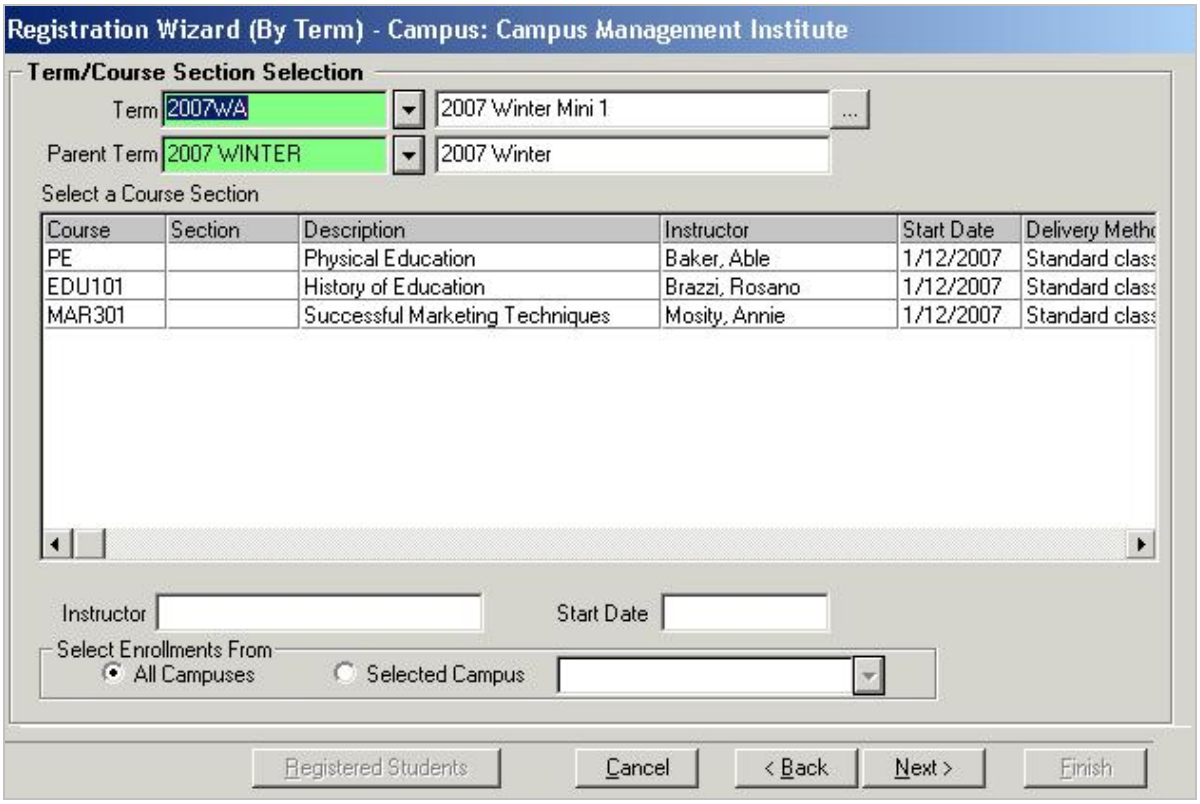


2. Click **Track Registration** or **Term Registration**.
3. Click **Next** to proceed.

Depending on your selection in step 2, continue with Track Registration or Track Registration.

To register a batch of students in a class section by term:

1. If you select **Term Registration** on the first page of the Registration Wizard, CampusNexus Student continues the process with the following steps.



2. Select the **Term** for which the students are to be registered. All the class sections scheduled for the term are listed on the grid.

   Click on a row of the grid, to view the instructor and start date in the fields at the bottom of the form.

   You can sort the class section list by clicking on the column headers. For example, to see all the class sections for a given instructor, scroll to the right until the Instructor column header is visible. Click the column header and scroll down the list until you see the instructor's courses.

   If the Campus uses Term Relationships, the Term list shows the child terms in which courses have been scheduled. When the (child) term is selected, the Parent Term list contains only Parent Terms to the previously selected child term. The (child) Term must be selected prior to selecting the Parent Term.

   CampusNexus Student checks if the student is currently enrolled in the selected course for the selected term and whether the student has already competed the selected course for the selected term. If so, then you are attempting to register a student in overlapping terms. As a result, CampusNexus Student displays an informational message.

3. Select the **Class Section** for which the students are to be registered. The Class Section list contains available options for the selected term. The Instructor and Start Date for the class section you choose are displayed below the grid.

4. In the Select Enrollments From area, select **All Campuses** or **Selected Campuses**. If you choose the latter, select a campus from the list. Only the students that are enrolled or active in the selected campus or campuses will be selected for registration.

5. Click **Next**. Page two of the Registration Wizard is displayed. Students who are available to take the course are listed on the left side of the form. Students who have been selected to take the course are listed on the right side of the form.

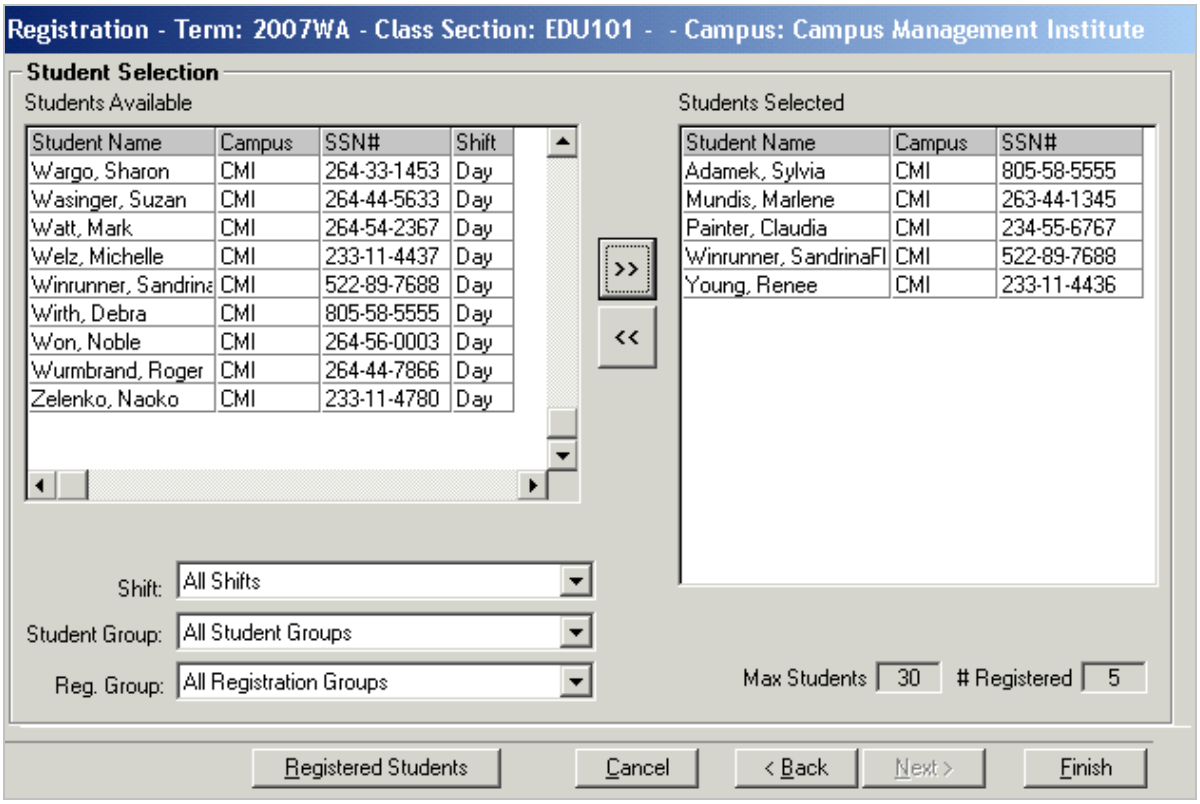
Only students not registered are listed in the Students Available list.

- To limit the students in the Students Available list by Shift, make a selection from the **Shift** list.
- To limit the students in the Students Available list by Student Group, make a selection from the **Student Group** list.
- To limit the students in the Students Available list by Registration Group, make a selection from the **Reg. Group** drop-down list.

The "Max Students" and "# (Number) Registered" fields list the number of students currently registered for the course and the maximum number of students allowed to be registered for the course section. The number of students registered field is redisplayed as students are selected for and deselected from the course section.

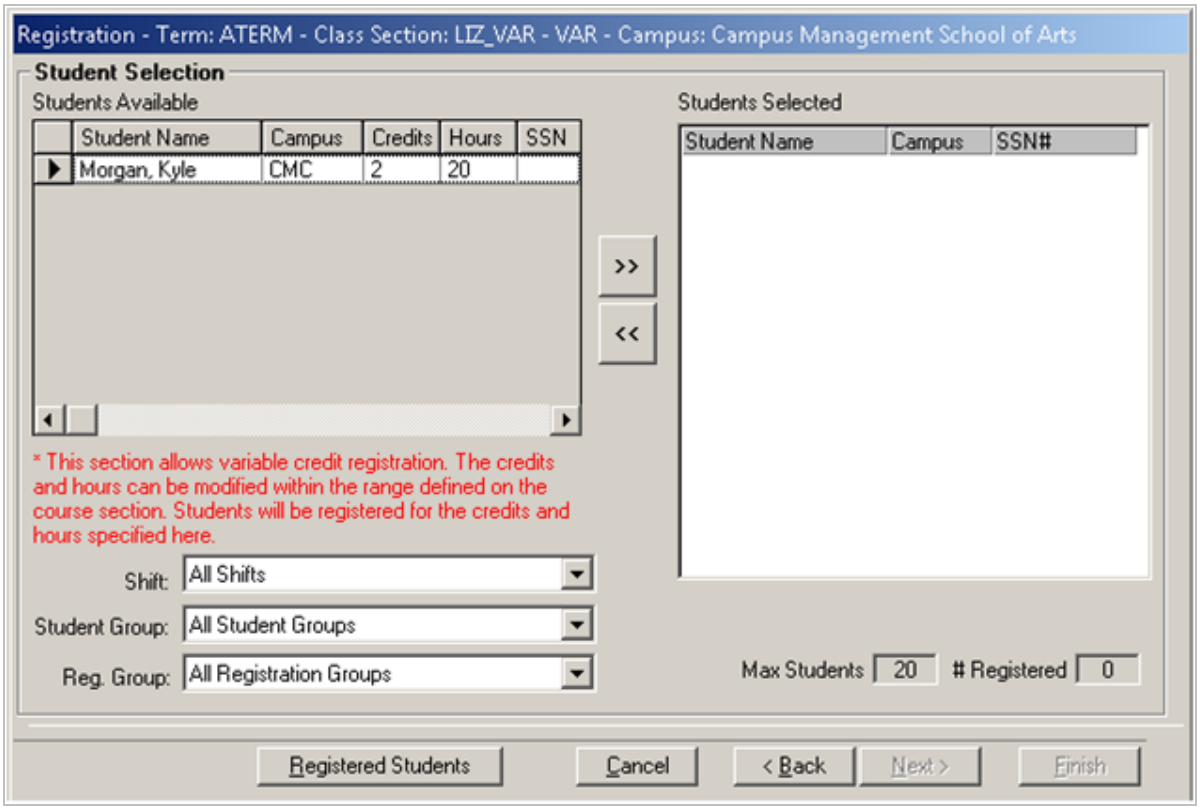
Click **Registered Students** to view the students registered. Students registered in a dependent course do not add to the count of registered students.

Note: You can select any active Registration Group, regardless of the Student Groups defined for it. If all students are members of inactive Student Groups, CampusNexus Student displays a warning stating, "*There are no students in the selected Registration Group that require this course.*"



6. To select a student for registration in the class section, double-click the name of the student in the **Students Available** column or select the student and click the right arrow button [>>] between the lists. The student's name will be moved to the **Students Selected** column.
7. To unselect a student for registration in the class section, double-click the name of the student in the **Students Selected** column, or select the student and click the left arrow button [<<] between the lists. The student's name will be moved to the **Students Available** column.
8. If Term Registration is being performed for a variable credit course, you can change **Credits** and **Hours** for each

student.



9. When you have selected your list of students for the class section, click **Finish**.

   Note: If student registration lock configuration is enabled, while registering a student through Track Registration or Term Registration, upon clicking **Finish**, the Registration Locks are evaluated.

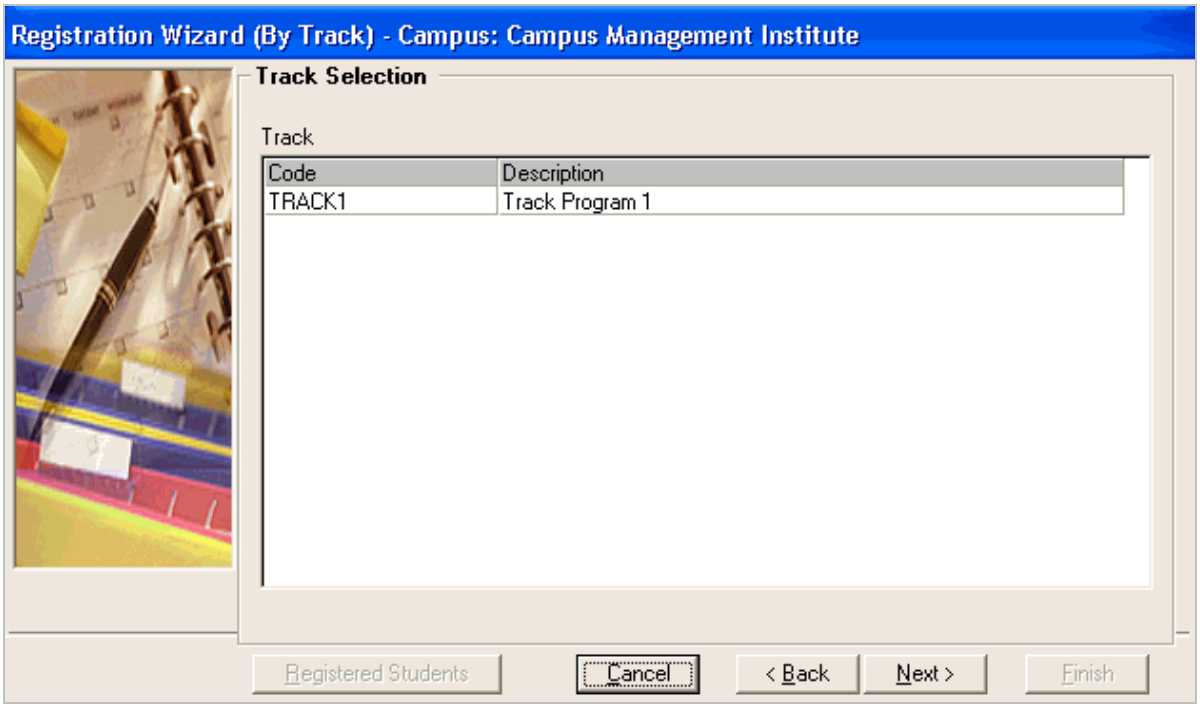
   - If CampusNexus Student detects that a selected student has already taken the class, or is scheduled to take the class in the future, it will highlight the student's name. You can then remove the student from the list.
   - If CampusNexus Student detects a Date/Time Conflict in a student's schedule, it will not permit the student to be registered. Remove the student from the Students Selected list.
   - CampusNexus Student checks the maximum number of students allowed in the class section. CampusNexus Student does not allow the maximum to be exceeded. It checks for equal to or greater than the maximum number of students allowed for the class section. To add more students to the section, you must adjust the maximum students value under Daily > Academic Records > Schedule Classes.
   - CampusNexus Student also checks that each student meets the prerequisite/corequisite requirements for the course.

   See Registration Validation below for more on system checks performed during registration.

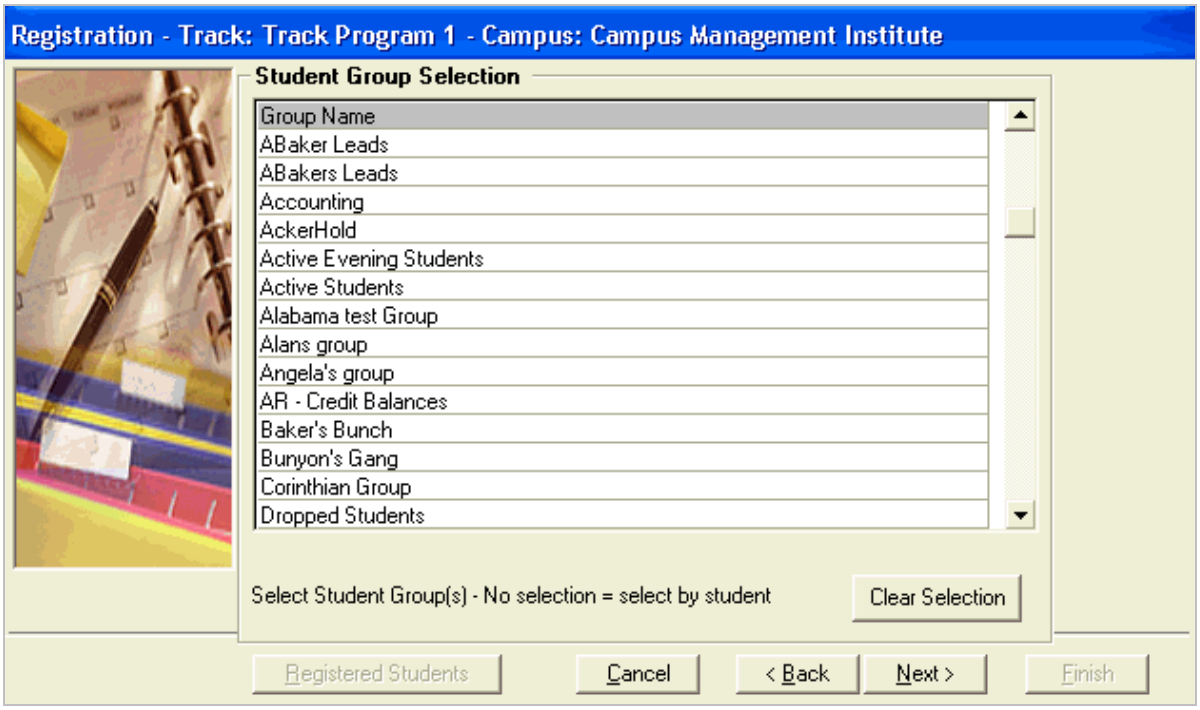
10. When all selected students pass the validation tests, CampusNexus Student displays a message indicating that the registration is complete. Click **OK** to close the message and the registration form.

To register a batch of students in a class section by track:

1. If you selected to register the students by Track, the second page of the Registration Wizard contains a Track Selection grid.



2. Select the **Track** for which you want to register students.
3. Click **Next**. CampusNexus Student displays a list of student groups from which you can choose one or more groups.



4. Select the **Group(s)** to be included in the track registration from the Student Group Selection list. If you prefer to select students for registration individually rather than by group, click **Next**.

   To choose more than one group:

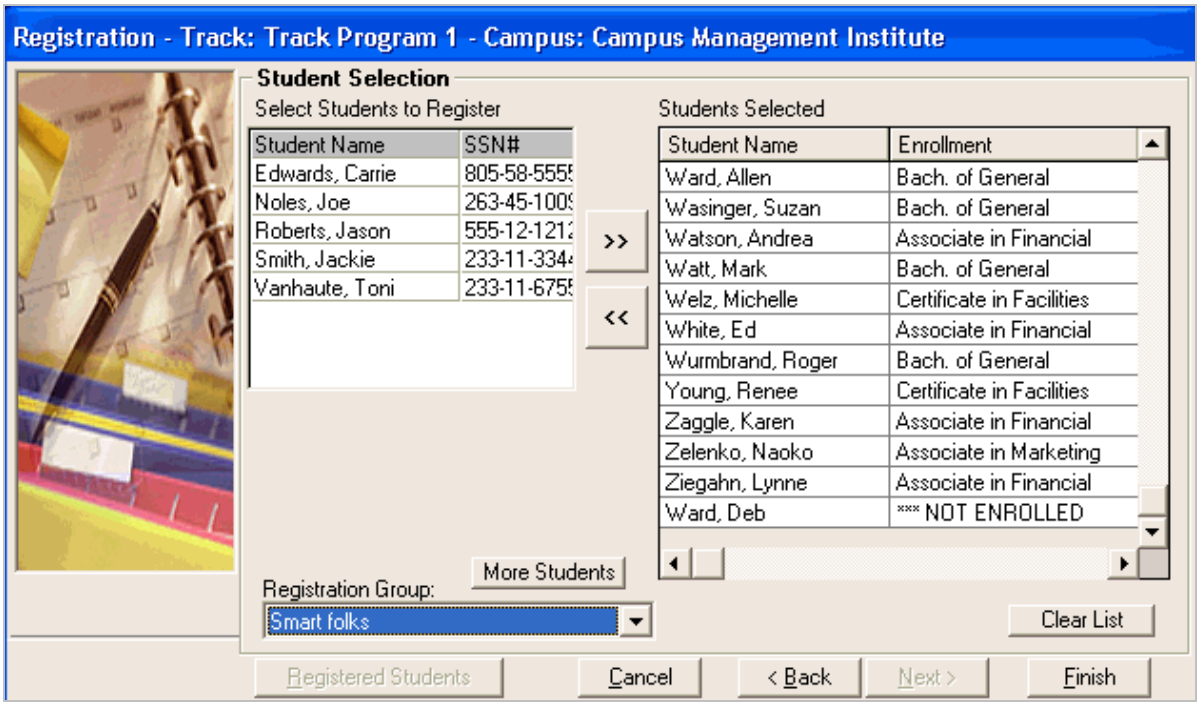
   - If the groups are listed together, click the first group name, then hold down the **Shift key** while you click the last group name.
   - If the groups to be selected are not together, hold down the **Ctrl key** while clicking the group names to be included.
   - Click **Clear Selection** to unselect those groups that have been selected.

5. Click **Next**. CampusNexus Student lists the students that can be registered in the track.

   - If you selected one or more student groups, the students are listed under **Students Selected**.
   - If you selected students individually from the list of those eligible for the track, the students are listed under **Select Students to Register**.

   Click **Registered Students** to view the students registered. Students registered in a dependent course do not add to the count of registered students.

   Note: To filter the students by Registration Group, make a selection from the **Registration Group** list. You can select any active Registration Group, regardless of the Student Groups defined for it. If all students are members of inactive Student Groups, CampusNexus Student display a warning stating, "*There are no students in the selected Registration Group that require this course.*"



6. To select a student for registration in the class section, double-click the name of the student in the **Students Available** column or select the student and click the right arrow button [>>] between the lists. The student's name will be moved to the **Students Selected** column.
7. To unselect a student for registration in the class section, double-click the name of the student in the **Students Selected** column, or select the student and click the left arrow button [<<] between the lists. The student's name will be moved to the **Students Available** column.
8. When you have selected your list of students for the class section, click **Finish**. When the registration process is complete, CampusNexus Student displays a confirmation message.

   Note: If student registration lock configuration is enabled, while registering a student through Track Registration or Term Registration, upon clicking **Finish**, the Registration Locks are evaluated.
9. Click **OK** to acknowledge the message. CampusNexus Student closes the wizard.
10. Repeat steps 1 through 9 to register students in another track.

Registration Validation

Registration conflicts are checked during Term Registration and Track Registration. CampusNexus Student checks the following items when registering a student into a class section:

1. **Maximum Students in Class**. CampusNexus Student checks how many students are registered for the class against the maximum allowed in the class.
   - If you are set up in Staff Setup with permission to override the maximum,you can override the maximum.
   - If you do not have the permission to override the maximum, a message states that the you cannot register students.
2. **Prerequisites**. If a student has not taken a course that is a prerequisite to the course being registered, a message

lists the prerequisite and corequisite requirements of the course. You can click on highlighted areas of the message to view additional details about the prerequisite and corequisite requirements.

When checking prerequisites, CampusNexus Student ensures that the section end date of the prerequisite course is in the past when compared to the section start date of the course for which the prerequisite course is required.

For term registrations, if you have the permission to override the course prerequisite requirement and a student does not meet the requirement, you can override the requirement.

Note: The override option is not available for track registrations. To check for courses that failed registration, refer to the Track Registration Exception Report.

If you do not have permission to override prerequisite courses that have not been completed, you cannot to perform the registration.

3. **Corequisites**. Corequisite courses must be taken concurrently in the same term.

   Note: Corequisite courses must be scheduled in the same registration term for registration to be completed (unless the administrator has override authority). For example, an institution may be using Parent-Child terms with the Parent Term having two Child terms. One corequisite course is offered in Child Term 1 and the second corequisite course is offered in Child Term 2. If a student is registered for the corequisite course in Child Term 1, CampusNexus Student notifies the registrar that the course is a corequisite and that the other corequisite must be completed at the same time (Child Term 1). If you have override permissions, you may override the corequisite requirement and register the course.

   If a student is not taking the corequisite courses required with the course being registered, a message lists the prerequisite and corequisite requirements of the course. You can click on highlighted areas of the message to view additional details about the prerequisite and corequisite requirements.

   For term registrations, if you have the permission to override the course corequisite requirement and a student does not meet the requirement, you can override the requirement.

   Note: The override option is not available for track registrations. To check for courses that failed registration, refer to the Track Registration Exception Report.

   If you do not have permission to override corequisite courses that have not been completed, you cannot perform the registration unless the student is registering in all required corequisite courses at the same time.

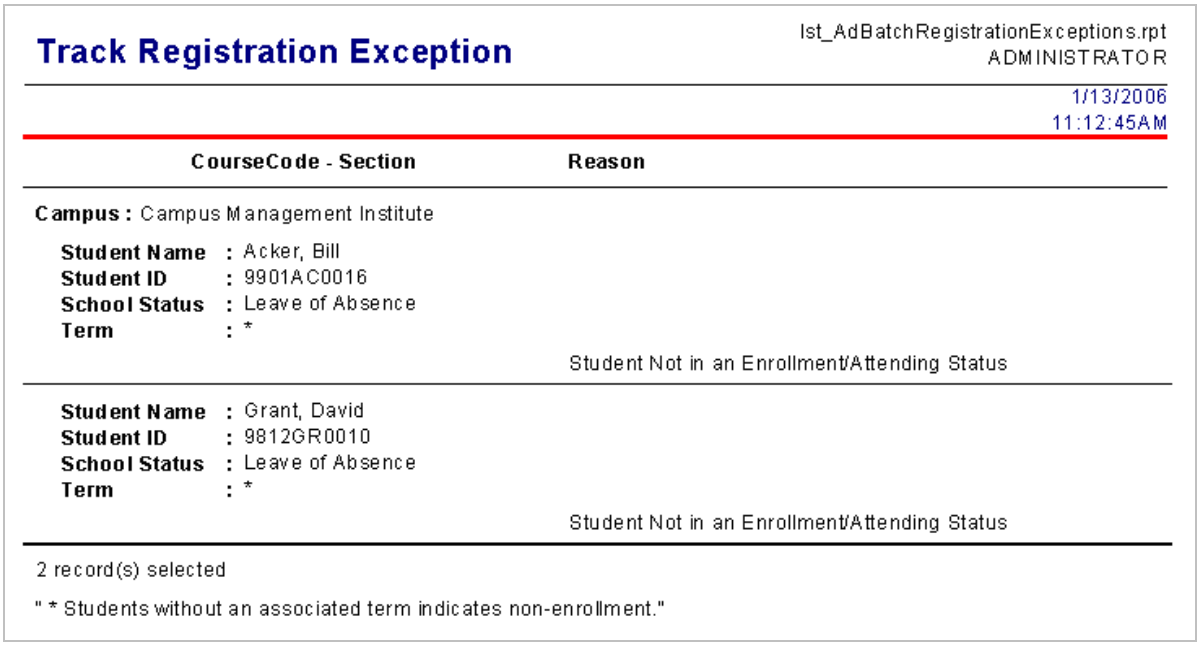
4. **Currently Taking**. If the student is already registered for the class, a message indicates that the student cannot be registered again.
5. **Already Taken**. If the student has already taken the course, a message asks if this class should be registered again as a RETAKE.
6. **Conflicts**. If the class being scheduled meets on the same date and time as another class that is already on the student's schedule, you are prompted confirm if it is OK to register anyway. A message lists the course(s) that are in conflict. If you have permission to override the conflict, a message asks if you want to override the conflict. If you do not have the permission to override the conflict, the current registration is not allowed.

Track Registration Exception Report

Upon completing the Registration Wizard, if there are any students that were not registered, the following message is displayed: *Track Registration completed with exceptions.*

The Track Registration Exception Report list students who could not be registered and the reasons why they could not be registered. Some of the reasons that students were not registered could include failure to meet prerequisite/corequisite requirements, currently taking the class, already taken the class, or maximum class size exceeded.

Notice that the exception report lists the reasons for the students not being enrolled as indicated by the "Student Not in an Enrollment/Attending Status" message. The asterisk (*) next to the Term label references the footnote containing an explanation: "* * Students without an associated term indicates non-enrollment". The two students listed on the report did not qualify for registration and therefore appeared on the exception report. The Registration wizard registered the other students.



Track Registration Exception

lst_AdBatchRegistrationExceptions.rpt

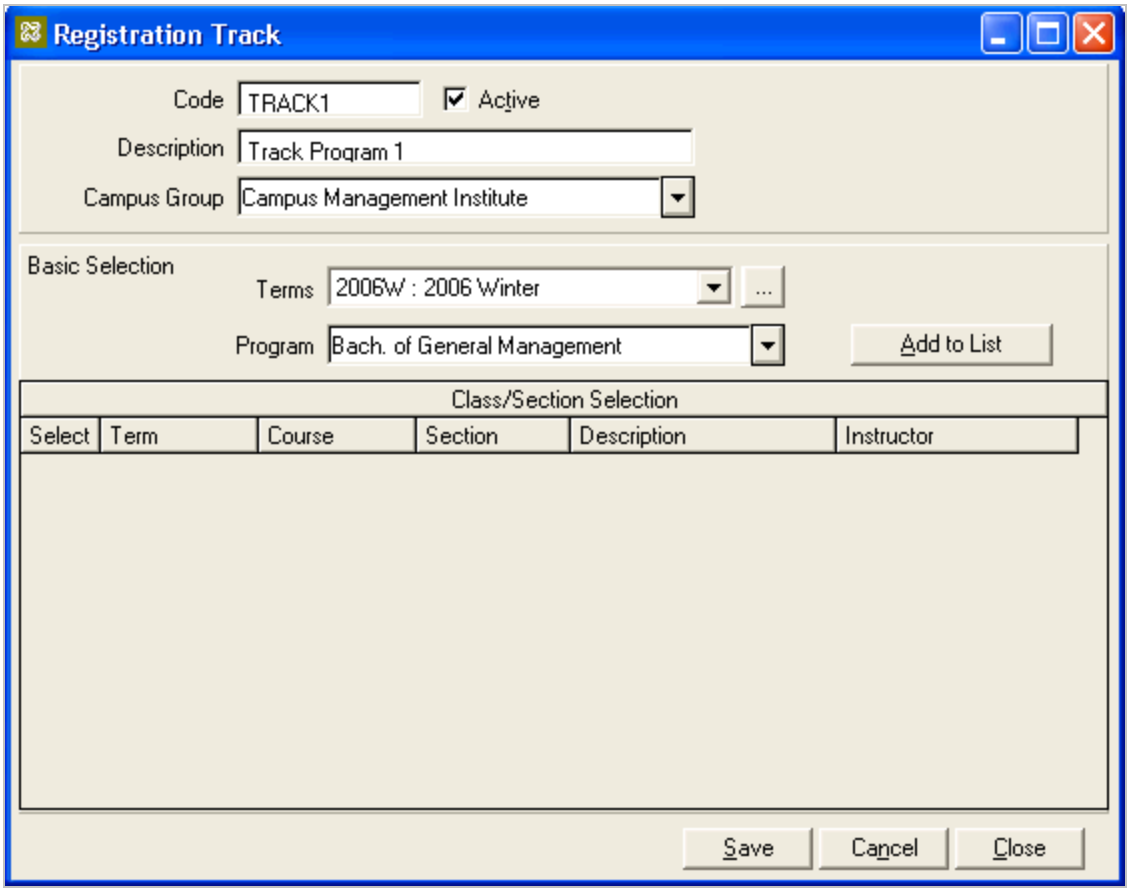
" * Students without an associated term indicates non-enrollment."

Copy Registration Tracks

CampusNexus Student allows you to copy the entire content of a registration track and assign that information to a new registration track. The new registration track can then be associated with the same term(s) as the original track or with other terms. You can also add or delete courses from the track after the copy function is complete.

To copy a registration track:

1. Select **Daily > Academic Records > Setup Registration Tracks**. CampusNexus Student displays a list of Registration Tracks in a grid.
2. Select a registration track from the grid and click **Copy**. The Copy Registration Track form is displayed.
3. Specify a unique **Code**.
4. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
5. Enter a **Description**.
6. Select the **Term(s)**. You can select same or different term(s) to associate with the new registration track.
7. Click **Finish**. After the track is copied, the Registration Track form is displayed. The Registration Track form presents the complete track information for the new track, including: **Code**, **Description**, **Campus Group(s)**, **Term(s)**, and **Program(s)**. If required, you can edit the details on this form.



8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

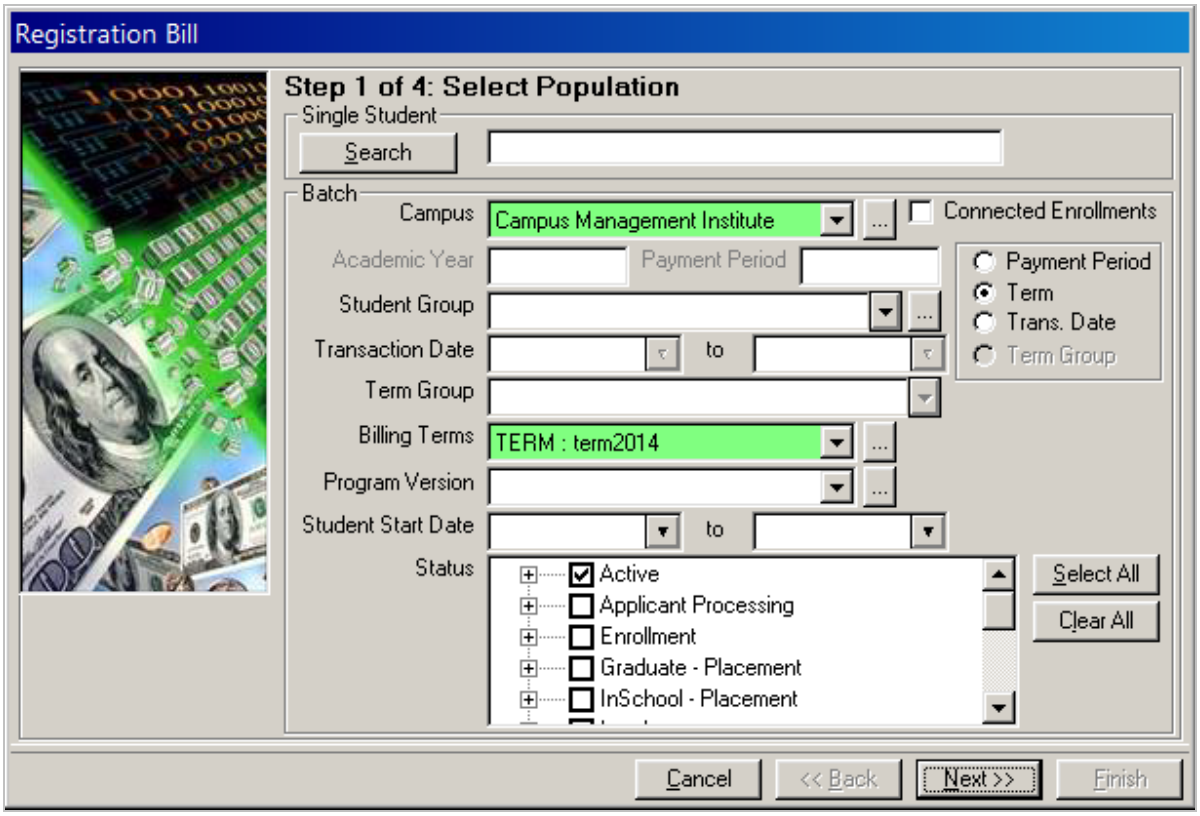
Note: If any courses that are part of the new track are not scheduled within the term(s) the user has selected, the track is not saved. The user receives a message that the track cannot be saved. The message lists the course(s) that are not scheduled with the selected term(s).

Registration Bill

Use this form to produce student bills or a summary report. See also Registration Bill Defaults and Purge Billing Statement Records. The Registration Bill functionality was previously referred to as 'Registration Summary by Term'.

To run the Registration Bill wizard:

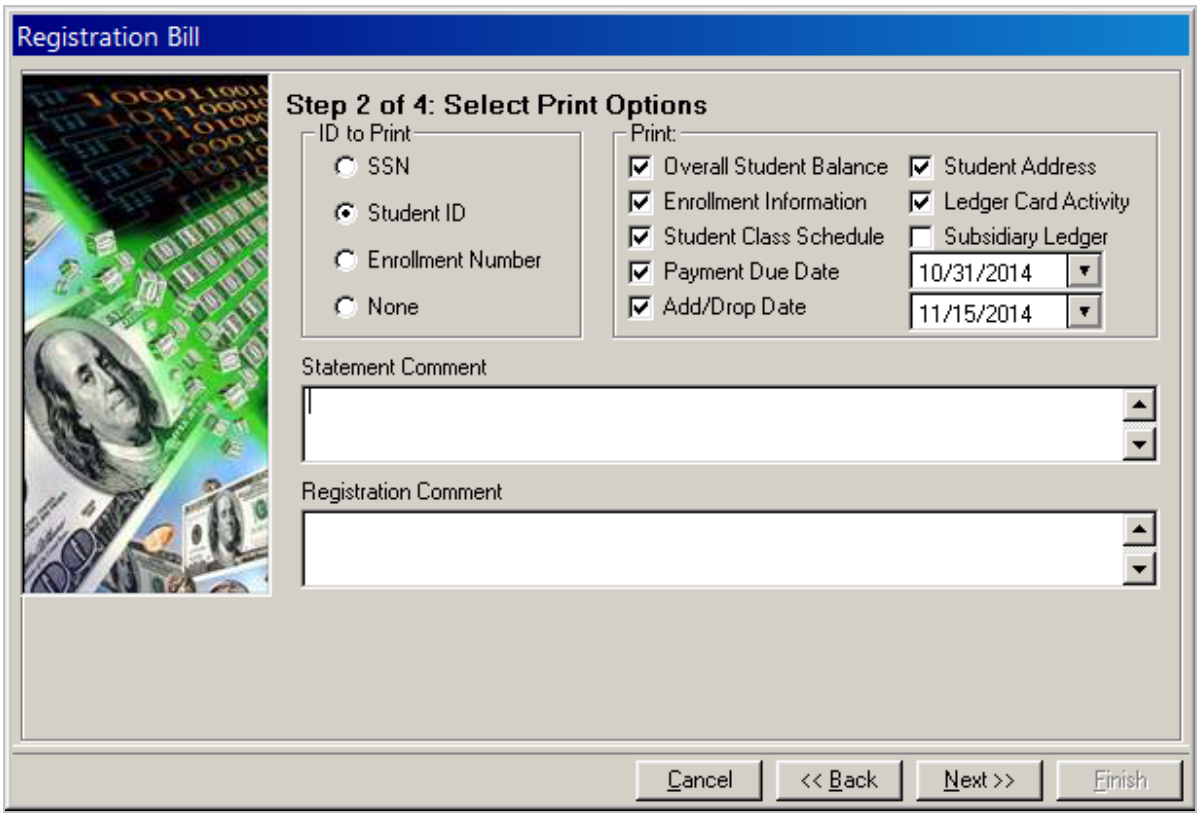
1. Navigate to **Daily** > **Academic Records > Registration Bill**.
   - OR -
   Navigate to **Daily > Student Accounts > Student Billing Statements > Registration Bill**. Step 1 of the Registration Bill wizard is displayed.



2. Search for a **Single Student** or specify selection criteria for a **Batch** of students. If you search for a single student, the batch selection options are disabled.
3. Select a billing period. The options are:
   - Payment Period
   - Term
   - Transaction Date
   - Term Group
4. If applicable, select **Connected Enrollments**. With this selection the options the following options enabled are: Term, Transaction Date, and Term Group.

You can print batch Registration Bills for connected enrollments, with combined detail and aggregated summary information. Connected enrollment information will be printed even if both of the connected enrollment's campus or program version is not selected.

5. Depending on your billing period selection, complete any other required fields.
6. Click **Next**. Step 2 of the Registration Bill wizard is displayed.



7. Select the ID to Print on the registration bill. The options are:

   - SSN
   - Student ID
   - Enrollment Number
   - None

   Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

8. Select additional information to print on the bill.

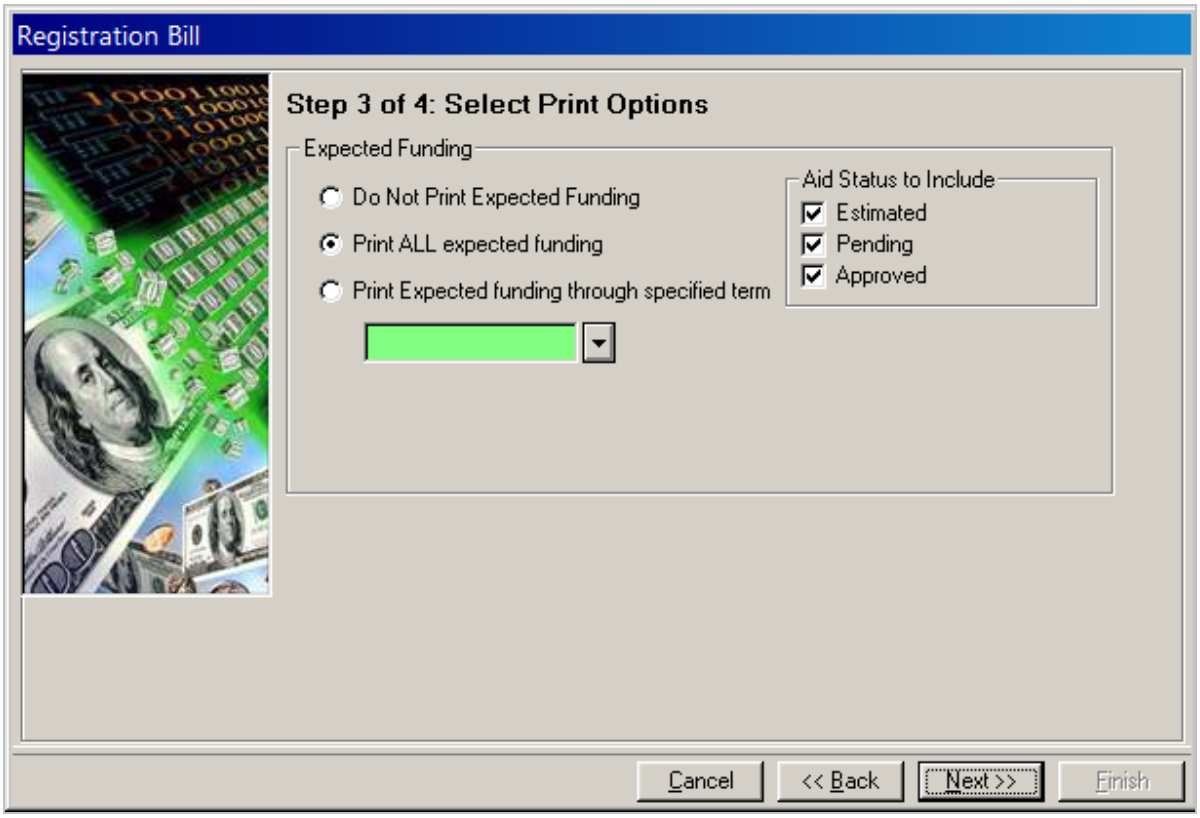
   If you select **Payment Due Date** and **Add/Drop Date**, specify the respective dates.

   Note: Student Class Schedule is enabled only if a single term was selected on the previous form.

9. *Optional*: Enter a **Statement Comment** and **Registration Comment** to print on the student bill. Do not use special characters like & and < in your comments.
10. *Optional*: Select **Subsidiary Ledger**. If this option is selected, the report will include a sub report showing the

subsidiary information for the enrollment. For single or multiple enrollments, the subsidiary ledger information is printed for the Summary Registration Bill and the Detail Registration Bill.

11. Click **Next**. Step 3 of the Registration Bill wizard is displayed.



12. Select appropriate funding and aid status options to print on the registration bill.

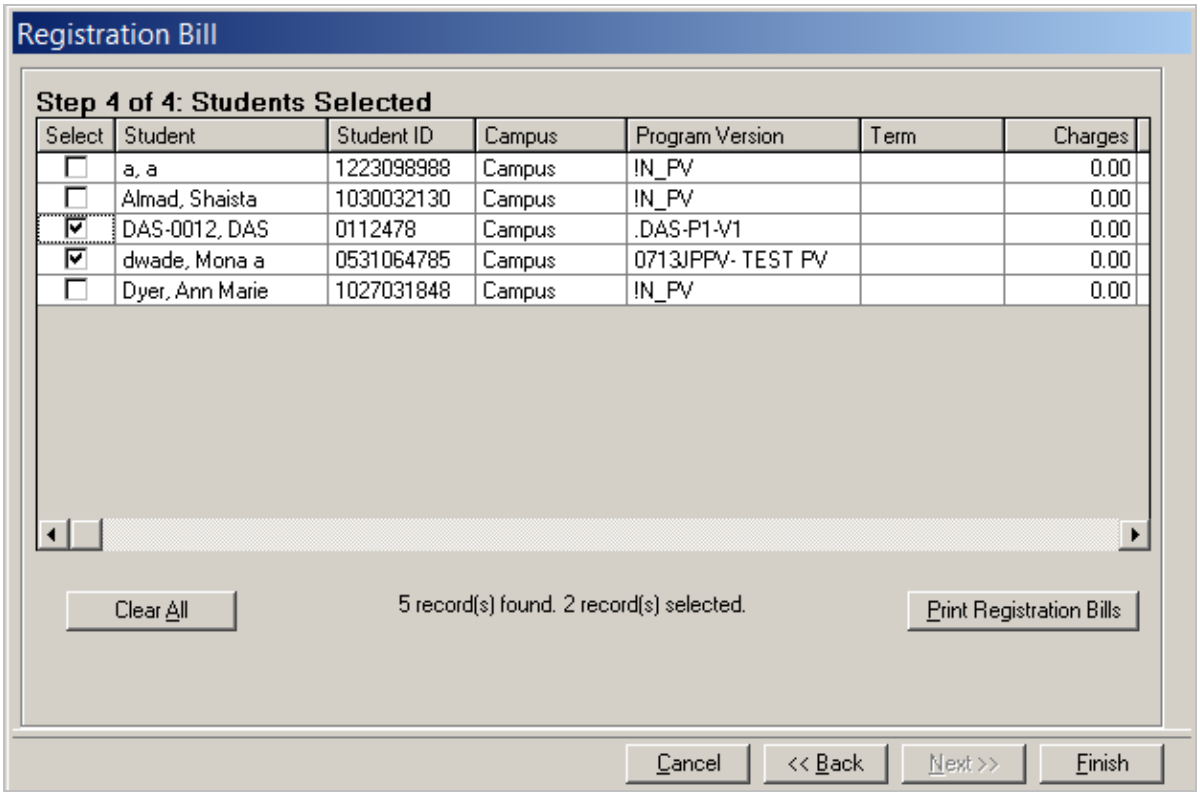
    The Billing Information group determines the charges source. Aid to be included is determined by the check boxes in this group.

    If you select **Print Expected funding through specified term**, you can specify only one term. CampusNexus Student gathers disbursements that have an expected date on or before the end date of the term selected.

    The Balance Options group allows you to specify whether the Summary and Detail reports are to be filtered based on positive, negative, and/or zero student balances.

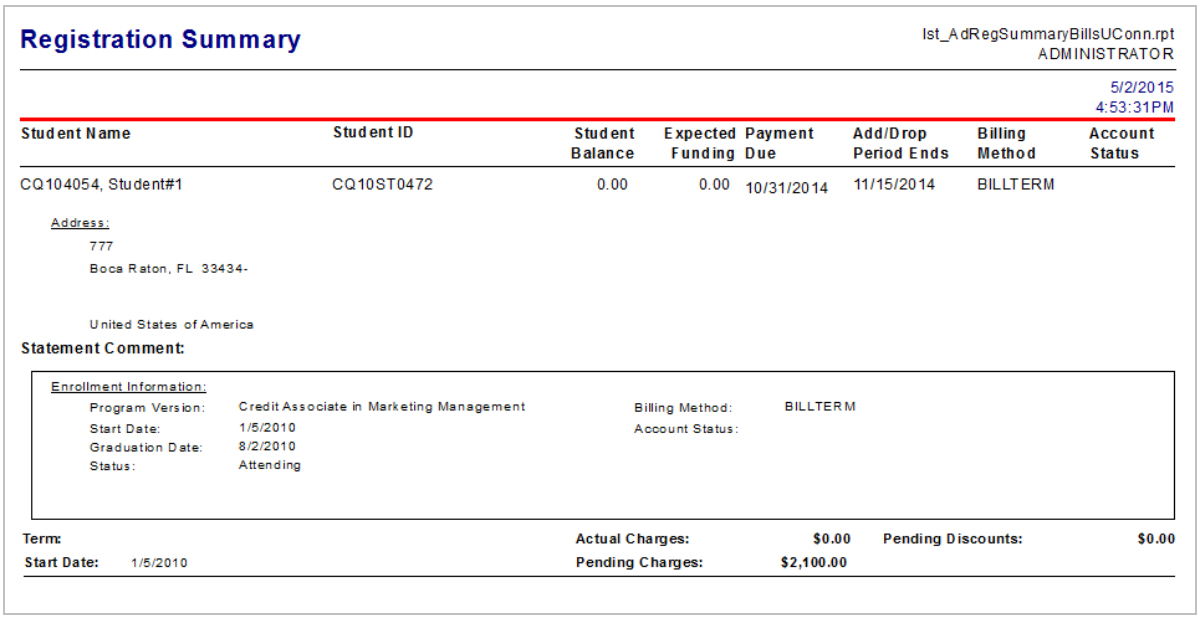
    Note: The configuration settings for Balance Options in the Registration Bill wizard override the settings in the Registration Bill Defaults.

13. Click Next. Step 4 of the Registration Bill wizard is displayed.



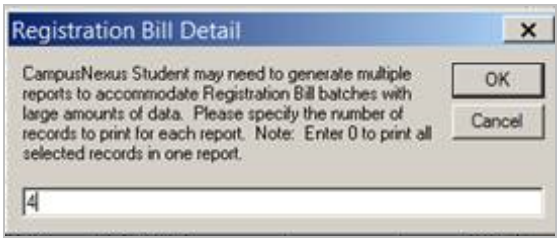
14. The Students Selected grid lists students, their enrollment, and charges. The charges column lists the Actual/Expected charges calculated for each student for the terms specified. Click the **Select** column for the students you want to include in the registration bill.

15. Depending on the settings in Registration Bill Defaults, you can print Summary or Detail bills. If only the Summary option or only the Detail option was configured in the default settings, the Print button is labeled **Print Summary Registration Bills** or **Print Detail Registration Bills**, respectively. If both Summary and Detail were configured as default settings, a pop-up menu appears when you click the Print button.



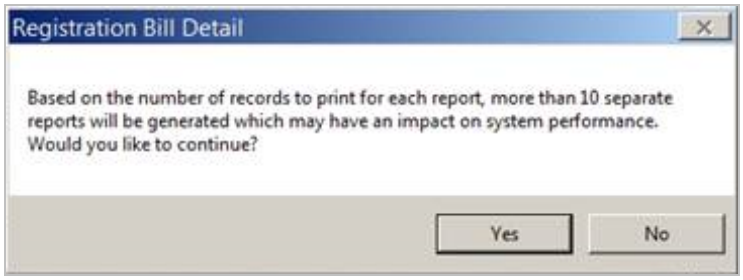
16. Click **Finish** or **Cancel** to close the form.

17. If you are printing **Detail Registration Bills**, after clicking **Print Registration Bills**, you have the choice to print all selected students to a single Crystal Report or to print the selected students in smaller batches as multiple reports. Printing multiple reports can avoid issues with system performance if the amount of selected data for a single report is extremely large.



Enter the number of desired records to be displayed on each generated report in provided field. This must be a whole number and not exceed the total number of records selected. Entering 0 prints all selected records in a single report.

If the number entered by the user generates more than 10 reports, a warning message is displayed:



Users can chose Yes and continue or chose No to cancel and re-enter a new number of records.

Batch Unregister Courses Wizard

The Batch Unregister Courses Wizard makes it easy to unregister several students in a course at the same time. You tell the wizard which Campus, Term, and Course Status the course belongs to. You may gather the course's students by Instructor or Student Group. The program provides a list of students registered for the course.

Things you should know:

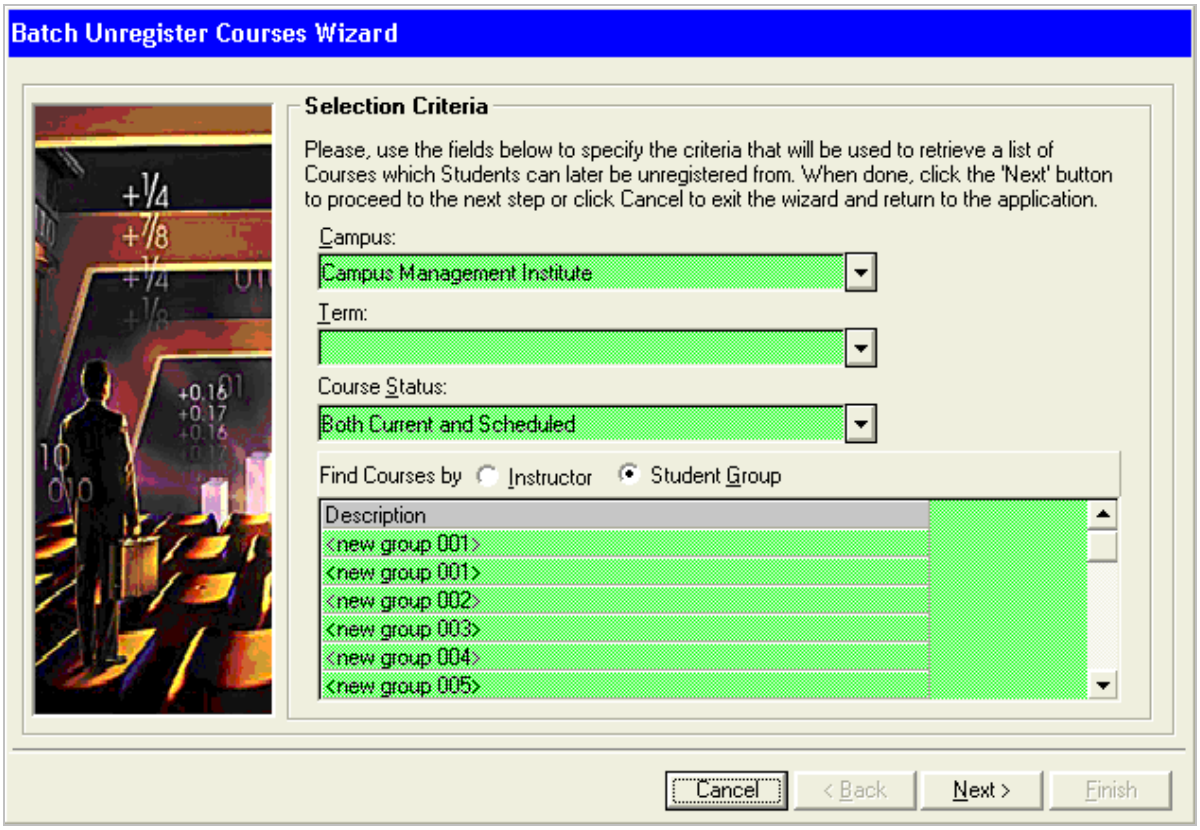
- Unregistering a student from a course will cause the Pending Charges associated with the course to be deleted if the auto billing is on and the status of the course in the student's degree audit folder will be updated to reflect a 'Future' status.
- Unregistering students in Course Registration Sharing Groups will NOT occur unless the course is from the sponsoring campus.
- If a Campus has been configured to enforce drop/add dates, then the wizard will NOT unregister students from courses in cases where the drop/add period has expired.
- The Terms displayed in the drop-down list will only reflect the Terms that are considered "Registration/Attendance" Terms.
- Courses that are prerequisite and corequisites for other courses will not be unregistered by the Batch Unregister process. Instead they will be listed on the Batch Unregistration Exception report generated when the wizard finishes processing.

The first page of the wizard requires that you provide information regarding the Campus, Term, and Course Status of the course that you would like to unregister. The course status options consists of Current, Scheduled or Both Current and Scheduled. If the course is not in a Current or Scheduled status then the unregister wizard will ignore the course and the unregistration process will not be available for these courses.

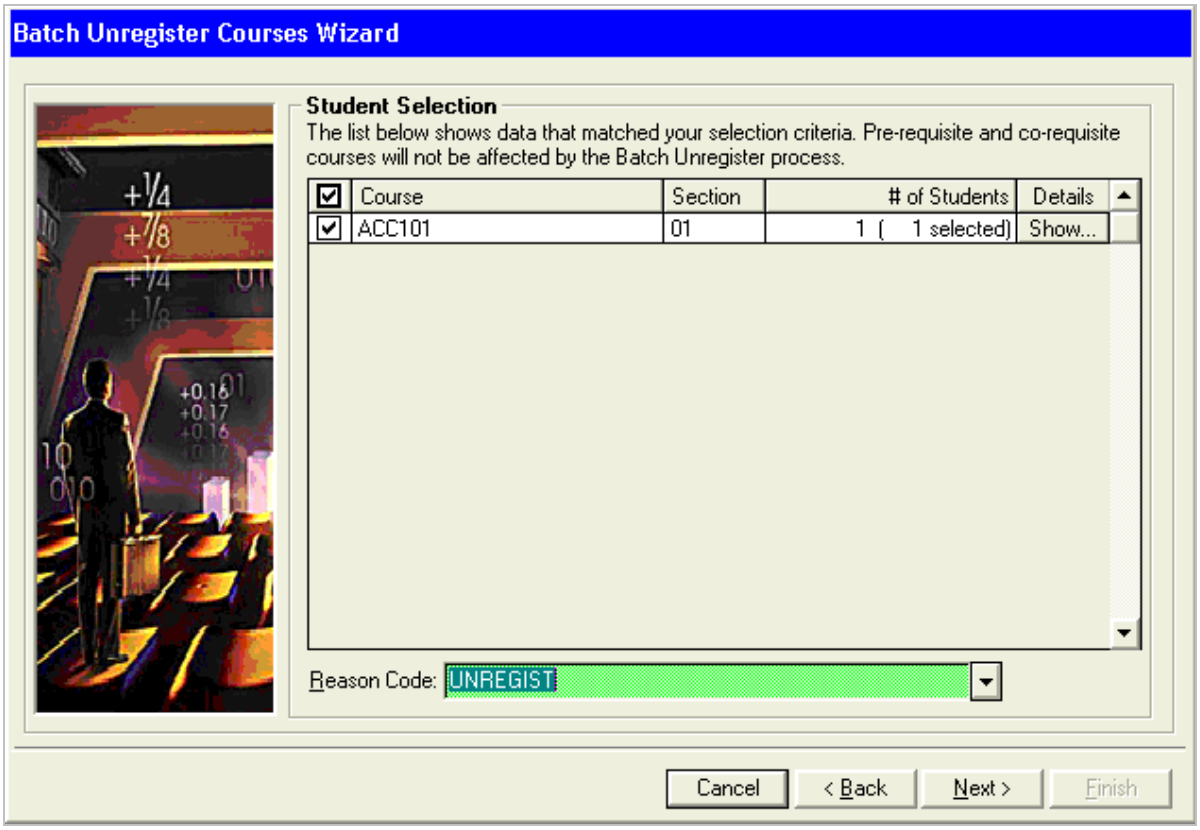
Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

To unregister a batch of students from a course:

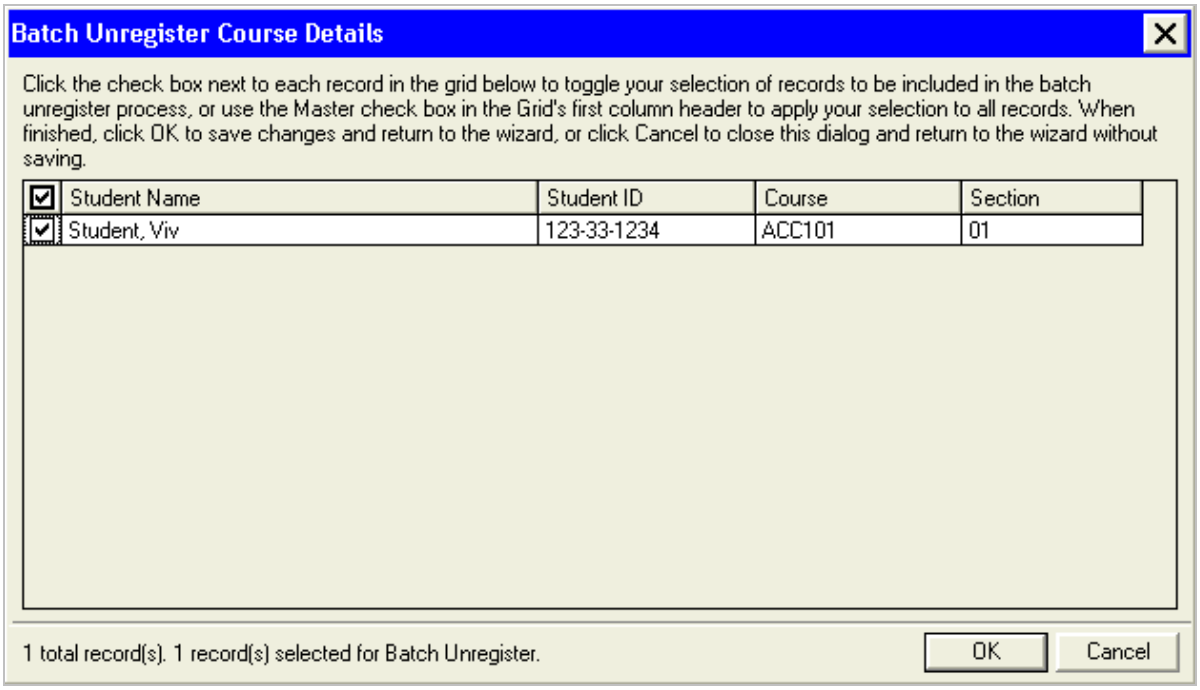
1. Navigate to **Daily** > **Academic Records** > **Batch Unregister Courses**. The Batch Unregister Courses Wizard is displayed.



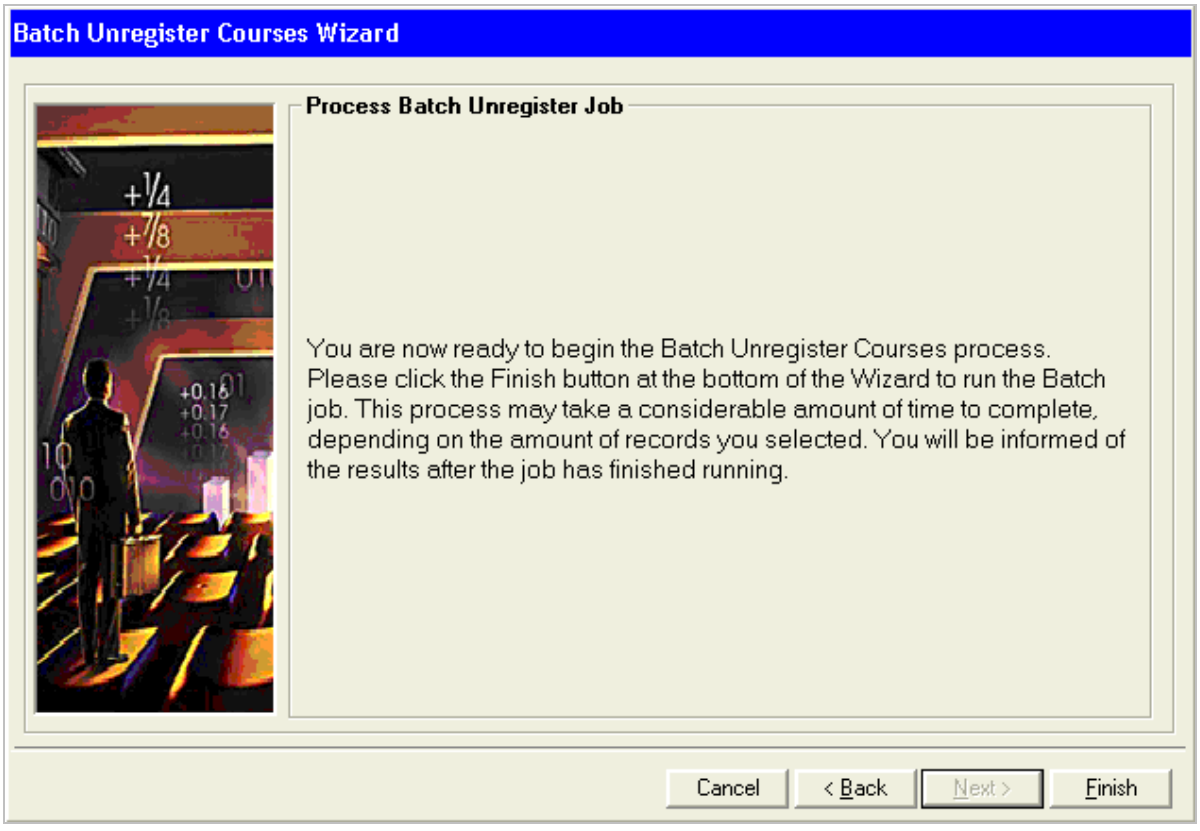
2. Select the **Campus** of the course from the drop-down list.
3. Select the **Term** of the course from the drop-down list.
4. Select the **Course Status** of the course from the drop-down list.
5. Click the **Instructor** or **Student Group** option associated with the course that you want to unregister.
6. Click **Next** to continue the unregistration processing. The Batch Unregister Courses Wizard form is displayed.



7. Click on the course that you want to unregister by selecting the check box to the left of the Course field as shown here.
8. Click the **Show** button listed under the **Details** header, in the course row, to display the students registered for the course. Select the students you want to unregister from the course by selecting the check box on the left side of the student's name. Clearing the check box for the student indicates that you DO NOT want to unregister the student from the course. If ALL students registered for the course need to be unregistered, leave the checks marks in the check boxes for ALL students listed.



9. Select the **Reason Code** for unregistering the class from a list of predefined reasons associated with the unregister wizard process.
10. Click **Next.** .



11. Click **Finish** to continue. A confirmation message is displayed. Click **OK**.

Note: If student registration lock configuration has been enabled, while unregistering a student through the **Batch Unregister Courses Wizard**, upon clicking **Finish**, the Registration Locks will be evaluated.

Rosters

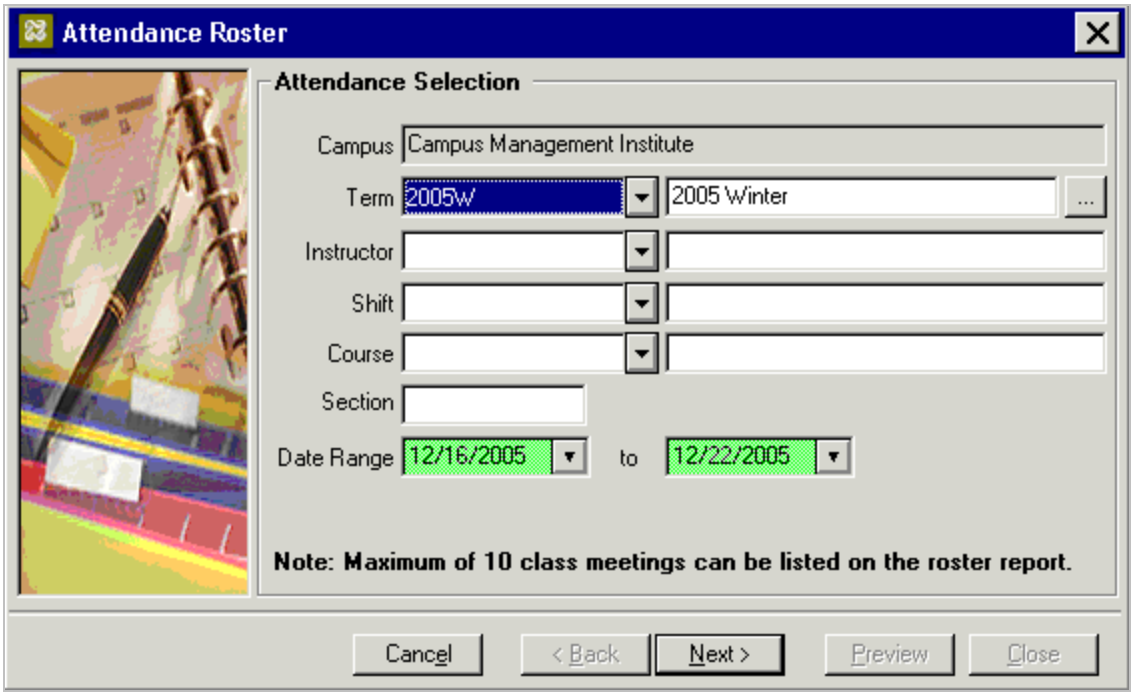
You can provide your instructors with a convenient form for taking attendance in their class sections. By using the Attendance Roster wizard, you can select a group of class sections for which to print rosters. Rosters are printed for one week at a time. For a given class section, all meetings during the week are listed on the roster. The instructor can indicate a student's attendance for each meeting of the class. (See the example report included in this topic.)

The agency sponsor code is included for each student on the attendance rosters. This information is important to list on the roster as each agency may have special requirements concerning attendance. Listing the agency code on the roster makes it easy for the instructors to identify any agency students in their class.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

To print Attendance Rosters for class sections:

1. Select **Daily** > **Academic Records** > **Attendance > Rosters**. The Attendance Roster wizard is displayed.



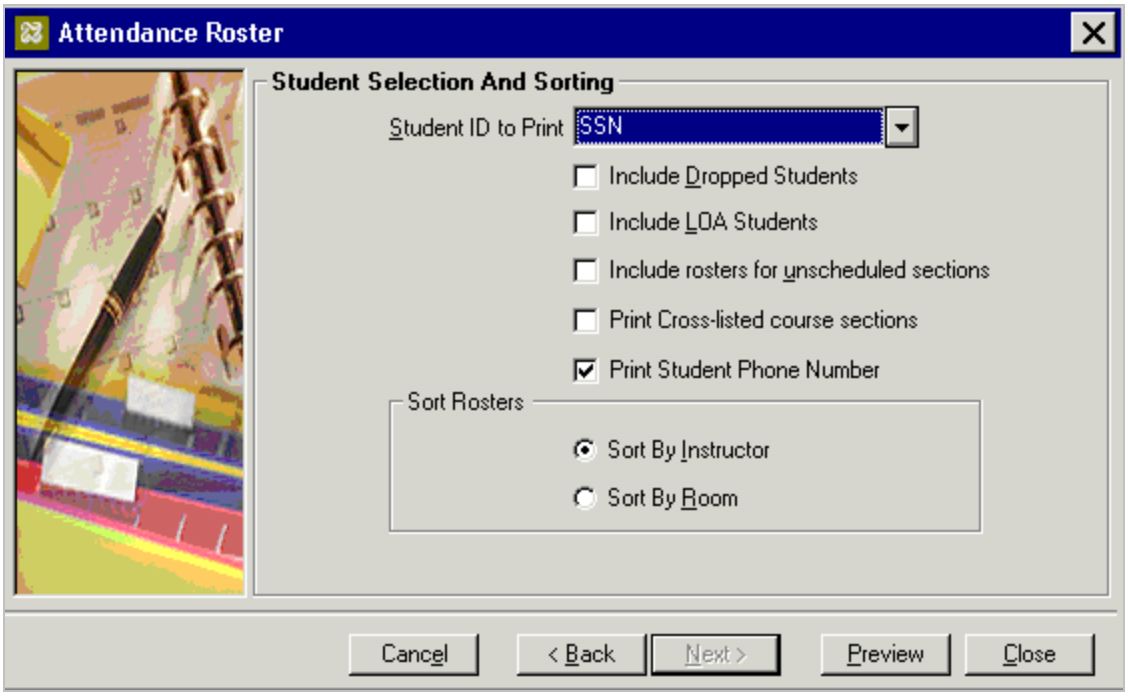
2. Select the **Term** (required). Click ... to the right of the Term field to view the Term Selection form to pick terms from a list.

   When printing rosters for a campus where the floating term flag is set to Yes, the filter on Term is replaced by a filter on class start date. Please refer to the topic on Floating Term Class Scheduling for an overall view of this feature.

   When printing rosters for floating terms, the query uses the Start Date range. For floating terms, the start date range can remain blank.

3. Select an **Instructor** (optional). If you do not select an instructor, rosters will be printed for all instructors.
4. Select a **Shift** (optional). If you do not select a shift, rosters will be printed for all shifts.
5. Select a **Course** (optional). If you do not select a course, rosters will be printed for all courses.

6. Enter a **Section Code** (optional). If you do not select a section code, rosters will be printed for all sections that are otherwise qualified for the report. **Note**: This really is the section code only, not the course code or course/section combination. If your instructors are assigned by section code, this can be a useful selection criteria.
7. Select or enter a **Date Range** (required). The date range must include no more than 10 class meetings. This is the maximum that can be printed on one row of the roster report. Remember that a class section can be scheduled to meet more than once per day.
8. Click **Next**.



9. Select the **Student ID to Print** options (SSN, Student ID, or Enrollment Number) or you select (none) to print all the students that meet the requirements of the options selected.
10. Select **Include Dropped Students** if you would like to include dropped students in the roster report, otherwise clear the option to suppress printing of the dropped students in the roster. See Drop Class Section for an explanation of this group of students.
11. Select **Include LOA Students** if you would like to include the Leave of Absence students in the roster report, otherwise clear the option to suppress them.
12. Select **Include rosters for unscheduled sections** if you would like to include the rosters for unscheduled sections in the roster report, otherwise clear the option to suppress them. See Unscheduled for an explanation of this group of students.
13. Check or clear **Print Cross-listed course sections** if you would like to print the cross-listed course sections. See Cross-listed Courses for an explanation of this group of students.
14. Check **Print Student Phone Number** if you would like the student's phone number to print on the roster otherwise deselect the option to suppress them.
15. Select a **Sort** option (required). Choose Sort by Instructor or Sort By Room.
16. Click **Finish**. The report preview will appear on your screen. A portion of an Attendance Roster is shown here,

sorted by instructor.

ATT						
DMEDD08A86	Warning: Excessive Absences					

This warning will appear regardless of whether the class section is configured for Enforce LDW within attendance rules. If the course is not dropped because Enforce Last Day to Withdraw is selected in Attendance Rules (**Daily > Academic Records > Schedule Classes > Attendance Rules**) and it is after the LDW Date, the warning will still appear on attendance rosters.

18. View or print the rosters as required. When you close the report screen, CampusNexus Student is finished with the Attendance Roster procedure.

Rosters

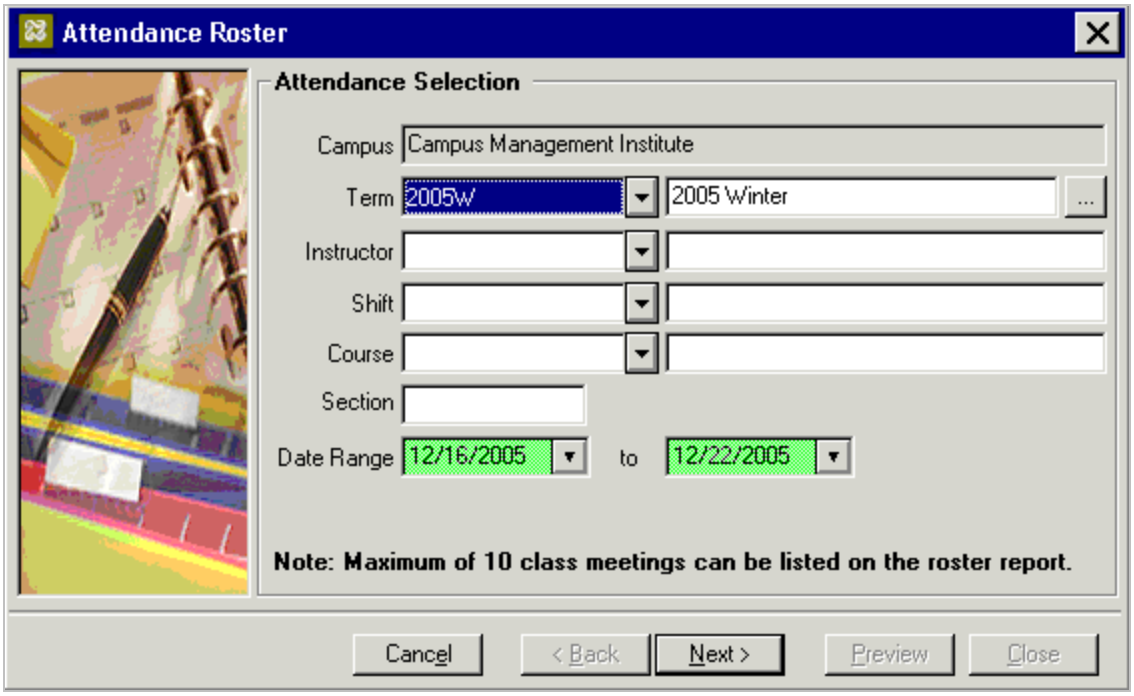
You can provide your instructors with a convenient form for taking attendance in their class sections. By using the Attendance Roster wizard, you can select a group of class sections for which to print rosters. Rosters are printed for one week at a time. For a given class section, all meetings during the week are listed on the roster. The instructor can indicate a student's attendance for each meeting of the class. (See the example report included in this topic.)

The agency sponsor code is included for each student on the attendance rosters. This information is important to list on the roster as each agency may have special requirements concerning attendance. Listing the agency code on the roster makes it easy for the instructors to identify any agency students in their class.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

To print Attendance Rosters for class sections:

1. Select **Daily** > **Academic Records** > **Attendance > Rosters**. The Attendance Roster wizard is displayed.



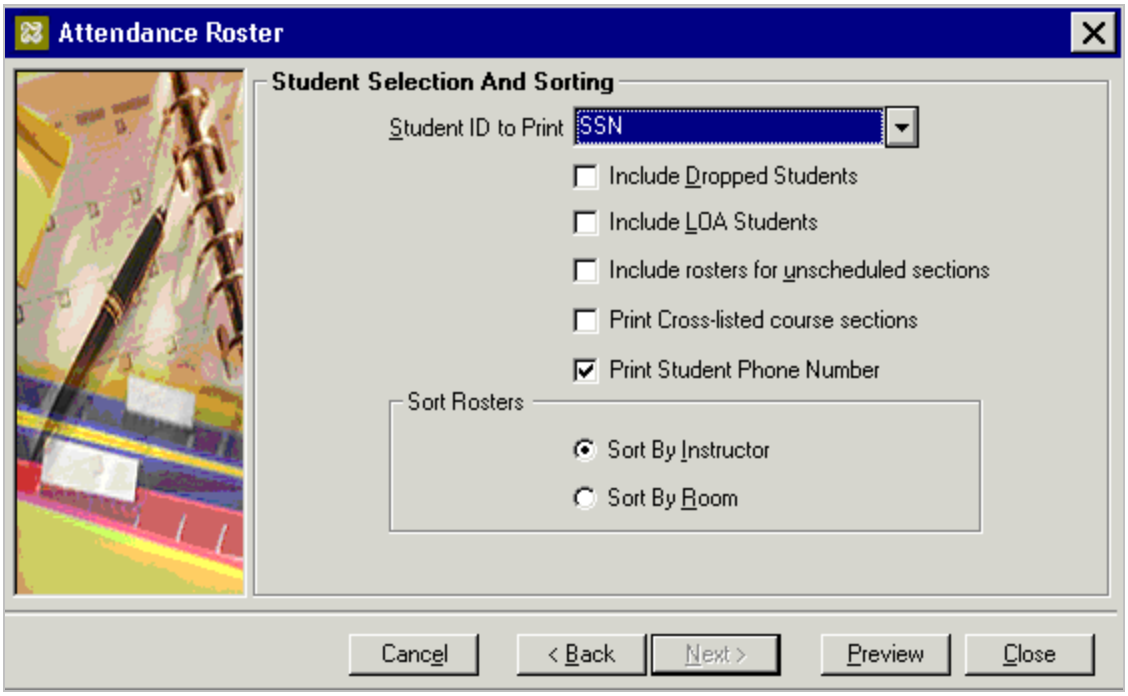
2. Select the **Term** (required). Click ... to the right of the Term field to view the Term Selection form to pick terms from a list.

   When printing rosters for a campus where the floating term flag is set to Yes, the filter on Term is replaced by a filter on class start date. Please refer to the topic on Floating Term Class Scheduling for an overall view of this feature.

   When printing rosters for floating terms, the query uses the Start Date range. For floating terms, the start date range can remain blank.

3. Select an **Instructor** (optional). If you do not select an instructor, rosters will be printed for all instructors.
4. Select a **Shift** (optional). If you do not select a shift, rosters will be printed for all shifts.
5. Select a **Course** (optional). If you do not select a course, rosters will be printed for all courses.

6. Enter a **Section Code** (optional). If you do not select a section code, rosters will be printed for all sections that are otherwise qualified for the report. **Note**: This really is the section code only, not the course code or course/section combination. If your instructors are assigned by section code, this can be a useful selection criteria.
7. Select or enter a **Date Range** (required). The date range must include no more than 10 class meetings. This is the maximum that can be printed on one row of the roster report. Remember that a class section can be scheduled to meet more than once per day.
8. Click **Next**.



9. Select the **Student ID to Print** options (SSN, Student ID, or Enrollment Number) or you select (none) to print all the students that meet the requirements of the options selected.
10. Select **Include Dropped Students** if you would like to include dropped students in the roster report, otherwise clear the option to suppress printing of the dropped students in the roster. See Drop Class Section for an explanation of this group of students.
11. Select **Include LOA Students** if you would like to include the Leave of Absence students in the roster report, otherwise clear the option to suppress them.
12. Select **Include rosters for unscheduled sections** if you would like to include the rosters for unscheduled sections in the roster report, otherwise clear the option to suppress them. See Unscheduled for an explanation of this group of students.
13. Check or clear **Print Cross-listed course sections** if you would like to print the cross-listed course sections. See Cross-listed Courses for an explanation of this group of students.
14. Check **Print Student Phone Number** if you would like the student's phone number to print on the roster otherwise deselect the option to suppress them.
15. Select a **Sort** option (required). Choose Sort by Instructor or Sort By Room.
16. Click **Finish**. The report preview will appear on your screen. A portion of an Attendance Roster is shown here,

sorted by instructor.

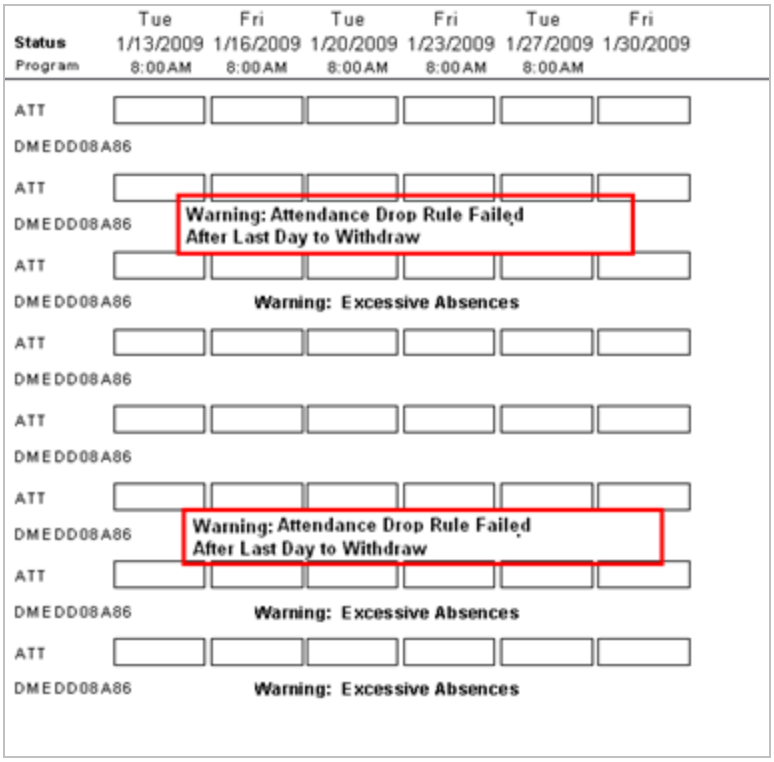
17. When posting attendance for a class section, if a course section fails the Auto Drop rule after the LDW date, and that class section has the "Drop Rule Warning When Failed After LDW" enabled, then all class roster reports will display a message alerting staff members that the Auto Drop rule failed after the LDW date.



Status / Program	Tue 1/13/2009 8:00AM	Fri 1/16/2009 8:00AM	Tue 1/20/2009 8:00AM	Fri 1/23/2009 8:00AM	Tue 1/27/2009 8:00AM	Fri 1/30/2009
ATT

DMEDD08A86						
ATT						
DMEDD08A86	Warning: Attendance Drop Rule Failed After Last Day to Withdraw					
ATT						
DMEDD08A86	Warning: Excessive Absences					
ATT						
DMEDD08A86	Warning: Excessive Absences					

This warning will appear regardless of whether the class section is configured for Enforce LDW within attendance rules. If the course is not dropped because Enforce Last Day to Withdraw is selected in Attendance Rules (**Daily > Academic Records > Schedule Classes > Attendance Rules**) and it is after the LDW Date, the warning will still appear on attendance rosters.

18. View or print the rosters as required. When you close the report screen, CampusNexus Student is finished with the Attendance Roster procedure.

Record Attendance

This option provides a tool for recording daily attendance in class sections. You can choose the term, class section, and date range for which attendance is to be posted. Attendance posting is "by exception". Since the vast majority of students will be present for the full class period on any given date, the exceptions are absences and tardies. You will post the absences and tardies and the program will assume that all other students were present for the full class period.

There is an alternative menu option in CampusNexus Student from which class section attendance can be posted: Daily > Academic Records > Schedule Classes > Attendance. Both procedures are essentially the same. Attendance can also be posted for a selected student via View > Academic Records > Attendance.

Note: All available classes are displayed and can be properly recorded (before and after the change) when a section change is performed with any of the following methods:

- Student in the Portal
- Staff member in the Portal
- In CampusNexus Student

This includes classes with multiple meeting periods scheduled on the same day. Class records are available for editing, display, and reporting regardless of the student attending or not attending an available course section. All eligible classes from the original section a student transferred from remain eligible for attendance, even if attendance has already been entered for one meeting period that day.

Note: The system date and time at which the transfer section occurred governs what attendance can be entered for a student for a specified section. Attendance remains with the original section once a transfer section occurs. If a user does not desire to retain attendance records, use unregister and register rather than transfer section.

For example

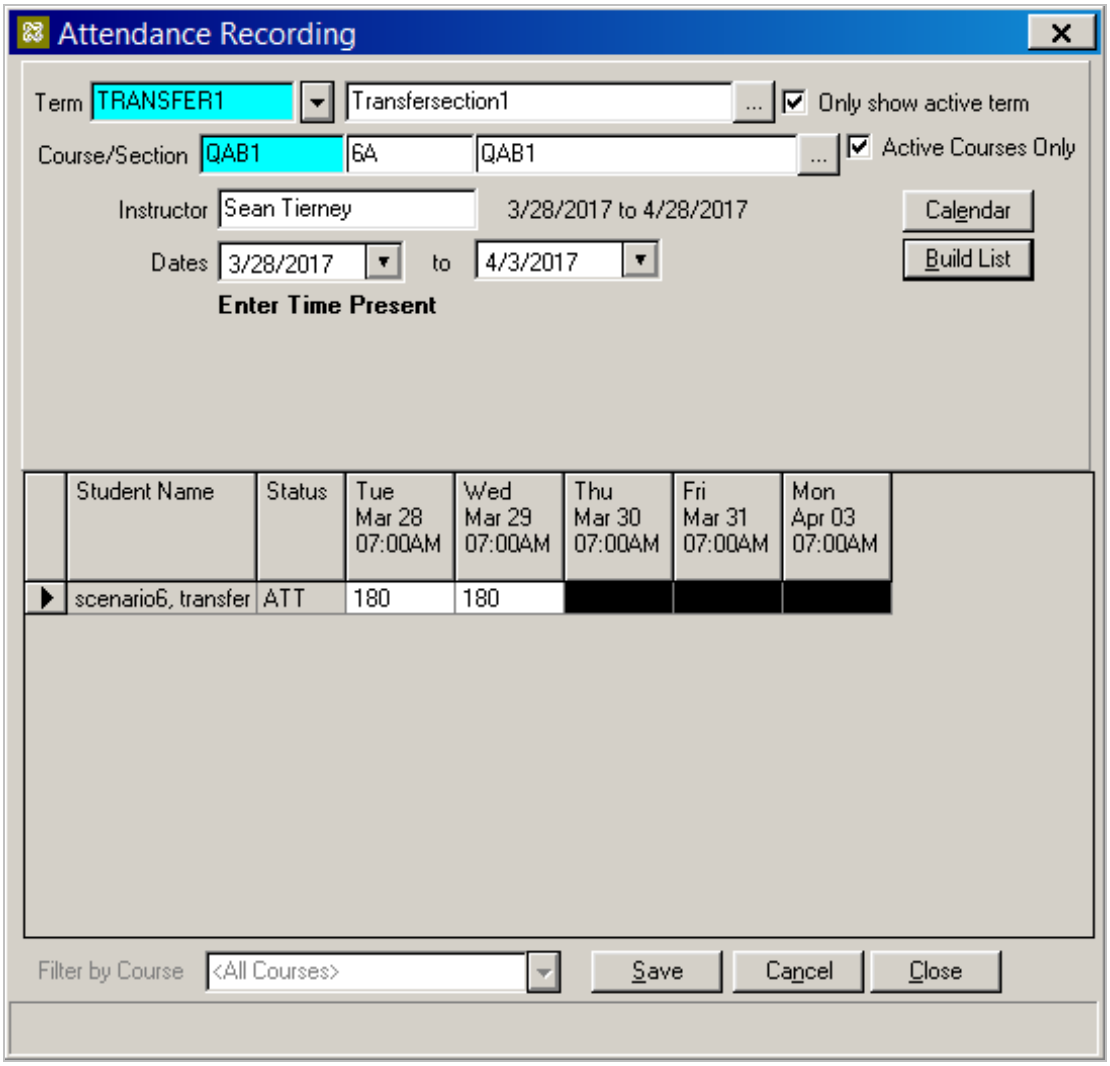
A student is registered in Section A, meeting at 7:00 a.m. for 3 hours (180 minutes) on Monday through Friday, and transfers to Section B, meeting at 2:00 p.m. for 3 hours (180 minutes) on Monday through Friday, with the transfer taking place at 12:00 p.m. on Wednesday.

The following highlighted days and times should have attendance available for entry:

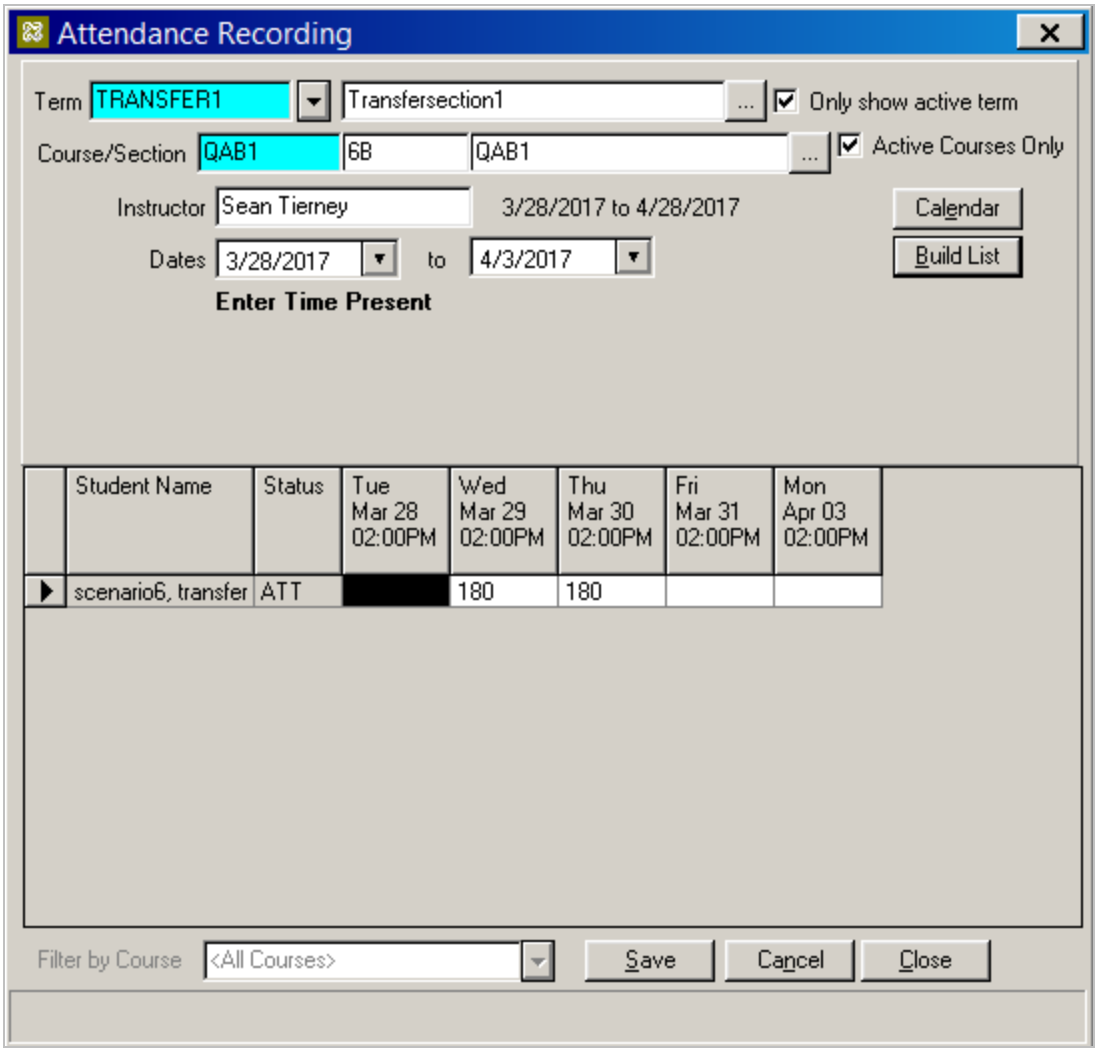
Transfer occurs at 12:00 p.m. Wednesday					
Monday	Tuesday	Wednesday	Thursday	Friday	SECTION
7:00 a.m.	7:00 a.m.	7:00 a.m.			A
		2:00 p.m.	2:00 p.m.	2:00 p.m.	B

The student will continue to show on attendance entry forms but will have the dates that are unavailable for entry blacked out in the form.

Section A Post-Transfer



Section B Post-Transfer



See "Attendance for Unscheduled Classes" for information about posting attendance for class sections with variable meeting schedules.

Note: Regardless of which method is used to post attendance, if attendance rules are configured to auto drop students based on the level of absences, then the posting of attendance may result in a student being auto dropped from a course. While dropping a course, CampusNexus Student looks at the add/drop configuration to determine if the drop occurred before or after the add/drop date for student accounting purposes.

Attendance cannot be posted for dates beyond the current system date.

Attendance for a given class section can only be recorded for dates on or between the start and end dates. They are displayed beside the Instructor's name on the form. CampusNexus Student allows you to schedule more than one meeting of a class section on the same day. Each session will be represented by a different column on the grid. A total of 10 meetings may be scheduled in the same week.

When you set up the class section, you tell CampusNexus Student how to interpret your entries. You can choose to (1) enter the time absent (in minutes), (2) enter the time present in minutes, or (3) enter a quantity of units completed by the student. A reminder of the expected entry is shown below the date range on the form. In the example, "**Enter Minutes Absent**". Note that CampusNexus Student also reminds you of the number of minutes scheduled in the lower left corner of the form (in this case, each meeting is scheduled for 60 minutes).

Best Practices Note: Users need to be aware that the selection of the **Class Meets at Various Days/Times** check box on the Class Schedule form takes precedence over any configured schedule in the system. Using this check box along with a configured schedule should be avoided as it can cause unpredictable results in attendance.

Automatic Drops and Attendance Warnings

If the class section setup indicates that a student is to be dropped from class after too many absences, the Attendance Posting routine will update the student's class status by setting it to "**D - Dropped**" when absences exceed a limit you set. This works only when adding **NEW attendance**. You can also set up a class section to trigger a warning flag when absences exceed a limit you set. The warning flag will cause a message to appear on class section rosters (**WARNING - excessive absences **).

The status of the class section on the student's schedule is changed to Dropped, and the default grade (if the campus is set up to require a default drop grade) is applied.

The attendance posting routine will set the roster flag to the appropriate value, and update the Consecutive Minutes Absent field. This will only be done when adding new attendance. Modifying previously posted attendance will have no effect on the Consecutive Minutes Absent field. If the current time attended is zero (for the attendance being recorded), CampusNexus Student will add the Minutes Absent to Consecutive Minutes Absent. If the current time attended is greater than zero (for the attendance being recorded), the program will set the Consecutive Minutes Absent to zero.

After saving the attendance for the student, the program will check the class schedule. It checks the Warning/Drop values in the following order:

1. Drop Cumulative Absent
2. Drop Consecutive Absent
3. Drop Absent Percent
4. Warning Cumulative Absent
5. Warning Consecutive Absent
6. Warning Absent Percent

As soon as one condition is met, the program stops checking the remaining conditions except in the case of when Enforce Last Day to Withdraw configuration exists.

If a student is selected to be dropped from the class, CampusNexus Student sets the Previous Status to Status and Status to "D" for the student being dropped. The program also sets the Drop Date to today's date and sets the Auto Drop Flag to 1.

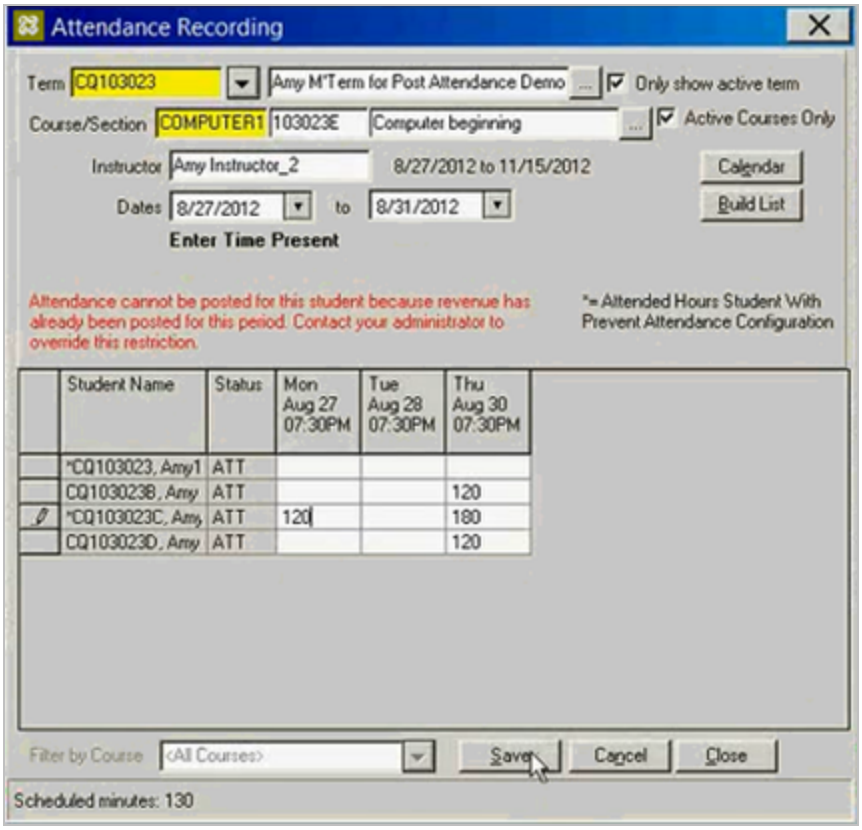
If a student is selected to be flagged for a warning, CampusNexus Student sets the Roster Flag to "W" for the student being updated.

On the Class Roster and Attendance Roster reports, if the Roster Flag is "W", the program will print "**WARNING - excessive absences **" on the roster.

If the Enforce Last Day to Withdraw feature is part of the configuration for the existing course section's campus (**Setup > Campus Locations > Edit/Add > Academic Records (tab) > General (tab)**), and LDW date is enabled for the course section, then the course section's LDW date will be validated. If the LDW date has passed, the system will not drop the course when the Auto Drop rule is failing and Enforce Last Day to Withdraw is selected on the Attendance Rules tab in the course section (**Daily > Academic Records > Schedule Classes > Attendance Rules**). The student will remain current in the course.

To record class section attendance:

1. Navigate to **Daily > Academic Records > Attendance > Record Attendance**. The Attendance Recording form is displayed.



Note: If the class meets on various days and the course type is Externship or Online, the form displayed is slightly different, and you can enter a date, length of class, and comment for each student. The attendance will be posted as type 'E' or 'O' depending on the course type.

If the class is a student specific meeting schedule, then the value entered in the Attendance Rules tab, Default duration per meeting (minutes) field will be used to represent any 'P' attendance that is posted.

2. Select a **Term** Code from the drop-down list. By default, the program will select the term you have designated in your Session Defaults. You can change the selected term code as required. When you select a term code, the program will display the description.

   The filter on Term is replaced by a filter on class start date when recording attendance for a Campus that is set up to do floating term scheduling. Please refer to the topic on Floating Term Class Scheduling for an overall view of this feature.

3. Select a **Section** from the drop-down list. (A section is designated by a course code and a section ID.) When you select a section, the program will display the description of the related course, the instructor's name, and the beginning and ending dates.

4. The program will also display a **default date range** for which attendance needs to be posted. You can change this date range as required. (This implies that you can go back, if necessary, to earlier dates to post changes to previously recorded attendance dates.) Enter the **Dates** in the date range for which attendance is to be posted. CampusNexus Student will automatically enter dates for one week after the **Last Date of Attendance**. You can change the date range to suit your need.

   CampusNexus Student will remember the date range and will update attendance for all students in the class through the end date when you save your entries. The next time you enter attendance for a class section that has

been previously updated, the program will assume that attendance has been posted for all dates previously viewed. Students will be credited with time in class up to and including the last date shown on the attendance grid.

5. Click **Build List**. CampusNexus Student will display a grid with one row for each student on the class section roster. (One extra row is displayed for technical reasons. You will not use this row.)

   Each row contains the student's status in the class and a cell for each meeting in the date range. Holidays are not displayed.

6. Enter the **time absent**, **time present**, or **units** for each date for each student.

   If a student is absent, you can type an "A" (or a). CampusNexus Student will convert your A to the number of minutes scheduled for the class. Alternatively, you can enter the number of minutes scheduled for the class.

   If a student has an excused absence, type an "E" (or e) to record an absence for the scheduled time of the class.

   To record a "tardy" in the "Time Absent" scenario, simply enter the number of minutes that the student missed. In other words, if the student is 15 minutes late to class, enter 15.

   If a student is present (in classes set up to record time present), you can type a P (or p) to record the minutes scheduled for the class. **Note that in the "time present" scenario, CampusNexus Student does not track time absent**.

   To record the number of units completed by the student (such as experiments completed, welds made, and so on), just enter the number.

   Custom Message or Default Message indicating that Permission is needed to post attendance

   This message is displayed **in red** when the user tries to enter time for 'Earn by Attended Hours' students, if the configuration is set to prevent attendance posting and permission has not been granted to the user to post attendance for the user ID and campus ID. If a custom message is not specified, the default message is displayed.

   ***Attended Hours Student with Prevent Attendance Configured**
   An asterisk next to a student's name in the Student Name column indicates that the student earns by Attended Hours and that the configuration is set to prevent attendance posting.

7. Click **Save** to save your posted attendance data.

   Note regarding attendance posting and impact on conditional courses:
   The Save functionality on the Attendance Recording form is such that the course will be dropped automatically on attendance posting if the student's absence time is greater than or equal to the time configured on the Class Schedule Attendance Rules tab.

   If this course is a prerequisite course, and if the campus is configured accordingly (see Descriptions of Fields on the SAP/Grades/Registration Tab), conditional course(s) will be automatically unregistered when this prerequisite course is automatically dropped due to attendance rules that cause the prerequisite rule to fail.

8. Click **Close** to close the form. You are returned to the Class Scheduling form.

Attendance for a selected class section can also be posted by going to Daily > Academic Records > Schedule Classes > Attendance.

Record Attendance Dates

If your school does not keep attendance records for each meeting of a class section, you can use this form to record the students' enrollment status, actual start date in the class section, and the Last Date of Attendance (LDA) in the class section. A class section appears on the list in this form if, when scheduling it, you selected an **Attendance Type of None**. The roster list can only be built if students are registered for the class section.

See Dependent and Parent Courses.

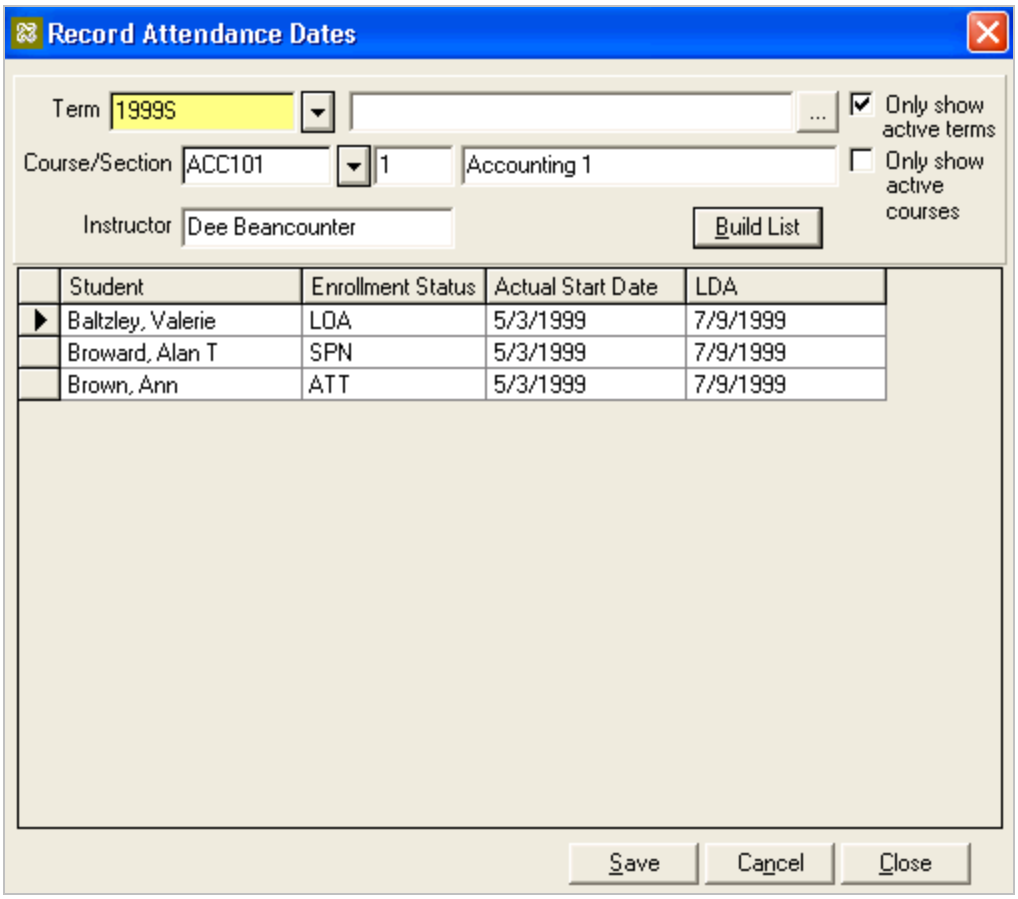
An alert message on the Record Attendance Dates form warns you if no course sections exist in the selected term that are set up with an Attendance Type of "None". When a term is selected, the course list is built by selecting all rows from the class schedule where the attendance type is "None" for the selected term. If no rows are selected, the following message is displayed: *There are no course sections on file for the selected term where the attendance type is None.* Click **OK**. Upon exiting the alert message form, the form is closed.

Course sections where the course is defined as "Dependent" are omitted from the course section list on this form.

If the "Parent" course is set up with an Attendance Type of "None", the last date of attendance will be tracked for that course only. **A separate last date of attendance for the "Dependent" course will not be tracked**.

To record attendance dates for a class section in which no regular attendance is posted:

1. Navigate to **Daily** > **Academic Records** > **Attendance** > **Record Attendance Dates**. The Record Attendance Dates form is displayed.



2. Select the **Term** for which attendance dates are to be recorded.

When recording attendance dates for a campus where the floating term flag is set to Yes, Term is replaced by Class Start Date. Please refer to the topic on Floating Term Class Scheduling for an overall vi of this feature.

3. Select a **Class Section** for which attendance dates are to be recorded. CampusNexus Student displays the course description and the instructor's name for your selected class section. You cannot change this data on this form.
4. Click**Build List**. CampusNexus Student lists the student roster grid for the class section.
5. Enter the **Enrollment Status**, **Actual Start Date**, and **LDA** for each student.
6. Click **Save**.
7. Click **Close** to close the form.

Grade Book

The Grade Book form can be used to post lessons and exam grades for a class section. If your courses are planned and set up with distinct components such as lessons, book reports, exams and so on. This is a place to track the students' progress.

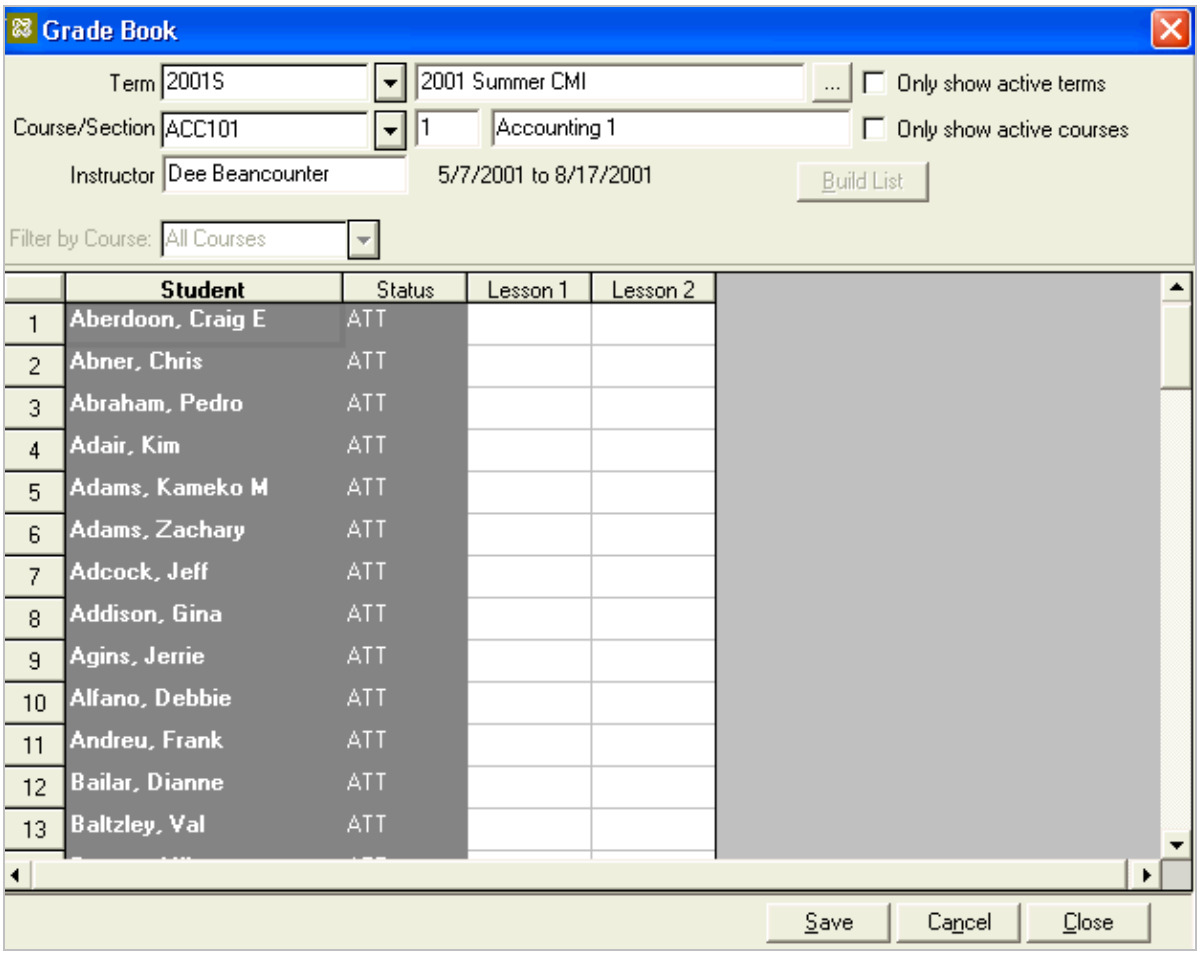
If the lessons and exams are set up with weights as a percentage of the total grade for the class section, the final grade is calculated by CampusNexus Student when the last grade is entered in the grade book. (If weight percentages are used with lessons and exams, they must add up to 100 percent.) To disable the auto calculation of the final grade, do not enter the percent of final grade when setting up the lessons for the class.

Final grades can also be posted. If you do not use percentage weights with your lessons and exams, you need to post your final grades using this option.

Note: To navigate the grade book grid, use the Arrow keys to move from one cell to another and the Enter key to edit the grade. Press the Tab key to exit from the grid.

To post lesson and exam grades using the grade book:

1. Navigate to **Daily> Academic Records > Grade Book**. The Grade Book form is displayed.



2. Select the **Term** for which lesson or exam grades are to be posted. CampusNexus Student displays the term description. You can also click ... to the right of the Term field to view the Term Selection form for easy term

selection.

For a campus where the floating term flag is set to Yes, Term are replaced by Class Start Date when entering lesson scores in the Grade Book. Refer to Floating Term Class Scheduling for an overall view of this feature.

3. Select the **Class Section** for which lesson or exam grades are to be posted. CampusNexus Student displays the class section description, Instructor name, and begin/end dates.
4. Click **Build List**. CampusNexus Student displays the lessons and exams as column headers and students as row headers. All previously posted grades are displayed.
5. Enter your grades for lessons and exams by clicking a cell and typing the grade. You can navigate around the cells by using the arrow keys on your keyboard or by clicking each cell with the mouse. Unlike spreadsheets in Microsoft Excel, pressing the Enter key after typing a grade does not move the cursor to the next cell.

   Double-click a row to display the Student Master form.
6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

   Note: Upon saving Final Grades, CampusNexus Student evaluates if a prerequisite rule failed due to grade posting or credits/hours. If the campus is configured to do so, conditional course(s) are automatically unregistered if the prerequisite rule fails. The reason for the automatic unregistration is populated as configured at the campus level.

Note: The Grade Book form has security based on staff groups configured under Setup > Security. The security settings control the permissions to view, post, and modify Letter Grades and Numerical Grades.

The following permissions are available for staff groups:

- Display - Allows staff to view students on the form with and without grades.
- Add - Allows staff to post grades for students (who don't already have a grade posted).
- Edit - Allows staff to change grades that have already been posted.
- Delete - Allows staff to remove a previously posted grade.

Midterm Grades

You can post Midterm grades for a student through Midterm Grade Recording form (from the Daily menu).

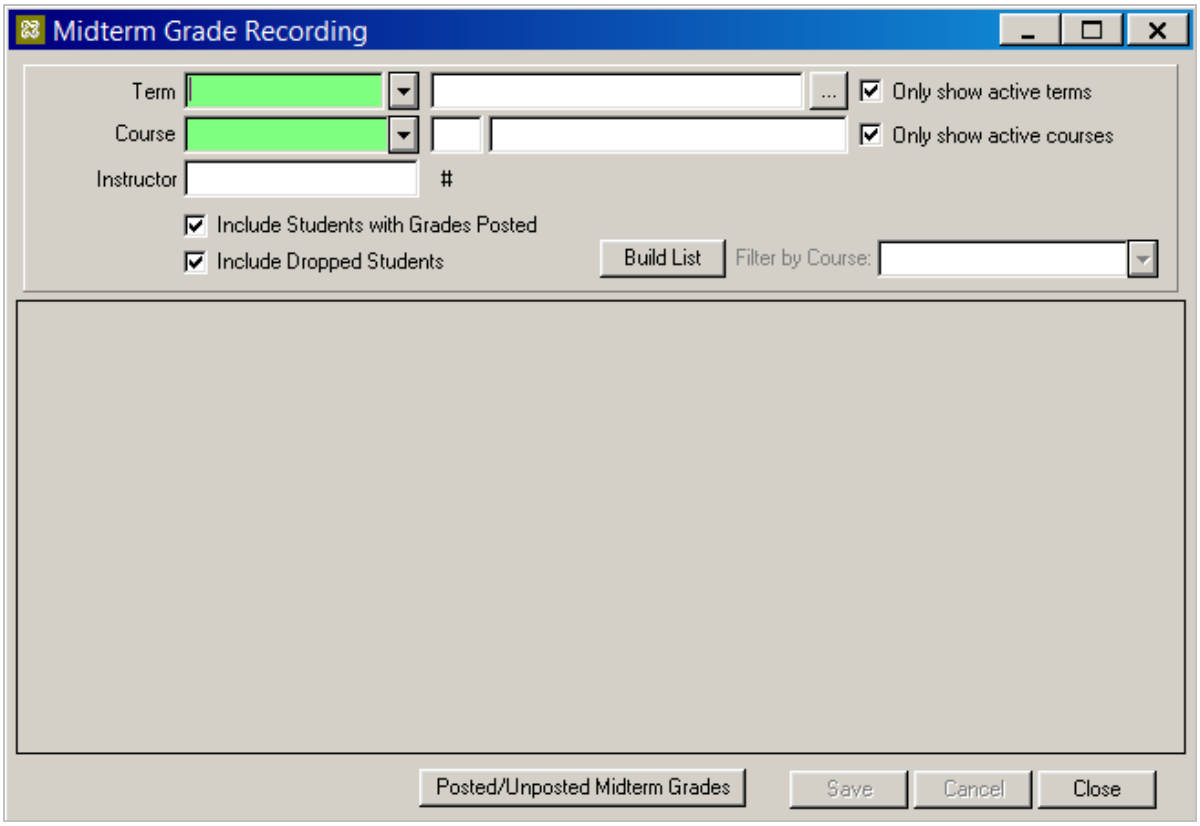
You can view this form only if you select **Yes** in the **Post Independent Mid Term Grade** option on the Campus Information form. For more details see Campus Academic Records. See also Final Grades.

Note: The Midterm Grades form has security based on staff groups configured under Setup > Security. The following permissions are available for staff groups:

- **Display** - Allows staff to view students on the form with and without grades.
- **Add** - Allows staff to post grades for students (who don't already have a grade posted).
- **Edit** - Allows staff to make changes to grades that have already been posted.
- **Delete** -Allows staff to remove a previously posted grade.

To post Midterm grades:

1. Navigate to **Daily >Academic Records > Midterm Grade**. The Midterm Grade Recording form is displayed.



2. Enter data in the following fields:

   Term: Select the **Only show active terms** check box to display active terms in the **Term** list box.

   Course: Select the **Only show active courses** check box to display active courses in the **Course** list box.

   Instructor: Enter the name of the Instructor for the course.

3. Select the student from the **Student Name** list and post Numeric and Letter grades for the students in the **Numeric**

Grade and **Letter Grade** columns respectively.

Note: If the selected course was taken by the student as an Audit, the only Midterm grade that is assignable to the student is **AU**.

4. Click the **Posted/Unposted Midterm Grades** button. This opens the Report Selection form. You can view the number of posted and unposted Midterm grades for a particular course.
5. Select **Yes**, **No**, or **Both** from the **Grade Posted** list box to view posted/unposted grades or both types of grades.
6. Click **Preview** to view the Posted/Unposted Midterm Grades report.

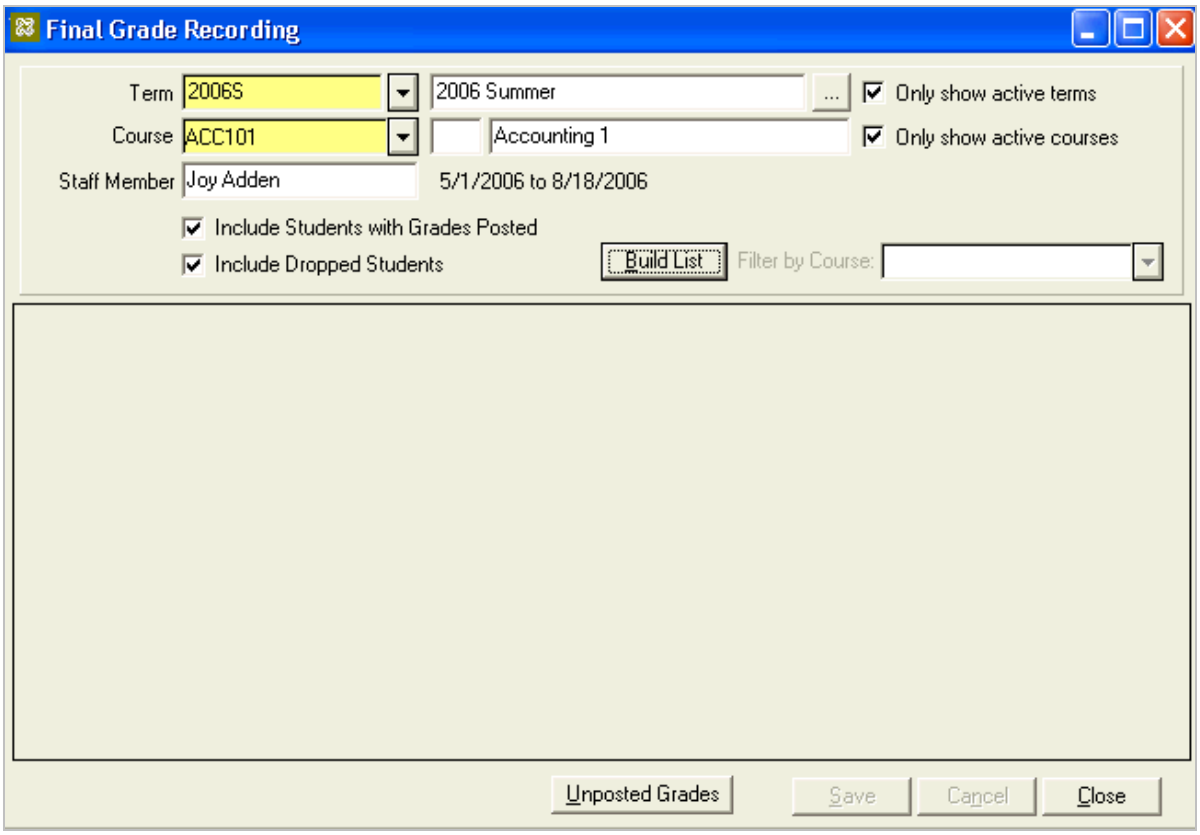
Final Grades

Final grades for class sections are "batch posted" from Daily > Academic Records. Alternatively, final grades for an individual student can be posted by using the option at View > Academic Records > Final Grades.

Note: Another tool for posting final grades is the Grade Book (Daily > Academic Records > Grade Book). Although the Grade Book is used primarily for posting lesson and exam grades for class sections, it also calculates a final grade if the lesson and exam grades are weighted as a percentage of the final grade. If percentages are used with lessons and exams, they add up to 100 percent. CampusNexus Student calculates the final grade when the last lesson or exam grade is posted.

To post final grades for a class section:

1. Navigate to **Daily** > **Academic Records** > **Final Grades**. The Final Grade Recording form is displayed.

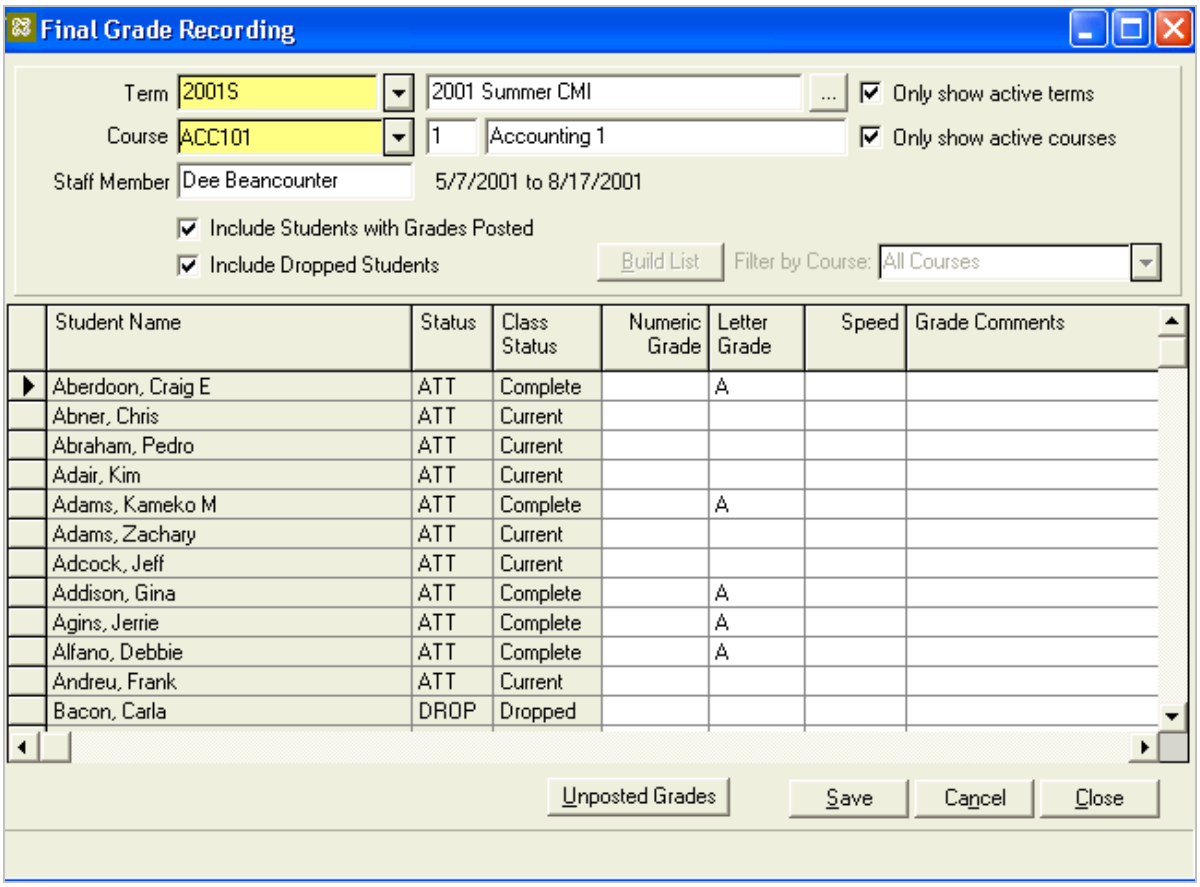


Note: Size the Student Name column (and other columns) to see the full name of students with long names. When you open the form again, the size of the column you set is retained. To "size" a grid column on this form, put your mouse pointer on the vertical line between the column headers. The pointer changes to a double-headed arrow with a vertical line between the arrowheads. Drag the line between the column headers to change the width of the column.

2. Select the **Term** for which grades are to be posted. The default term comes from your Session Defaults. CampusNexus Student displays the term description.

   For a campus where the floating term flag is set to Yes, Term is replaced by Class Start Date when recording final grades. Refer to the topic on Floating Term Class Scheduling for an overall view of this feature.

3. Select the **Class Section** for which grades are to be posted. CampusNexus Student displays the class section description, instructor name, and beginning and ending dates.
4. To include students whose final grade have already been posted, select **Include Students with Grades Posted**. The default is to show all students. Clear the check box to see only students who have not had grades posted.
5. Click **Build List**. CampusNexus Student builds a grid using the class roster. The grid shows the Student Name, Numeric Grade, Letter Grade, Speed, and Grade Comments.



- **Student Name**. The list of students depends on your choice to list all students or only those that do not have grades posted.

  Note: If Blind Grading is required for the section being displayed, the student's name is replaced with the Blind Grade IDs.

- **Numeric Grade**. Shows the numeric grade given to the student whose name appears on the row. If your school does not award numeric grades, leave this cell blank.
- **Letter Grade**. Shows the letter grade given to the student whose name appears on the row. If a numeric grade has been entered, it is converted to a letter grade according to the grading scale associated with the student's program version. If numeric grades are not used, you can select a grade from the list that is displayed when you enter the letter grade cell. Otherwise, you can type the student's grade in the cell. Grades you type in the cells are validated in the program version grading scale that applies to the student. If the let-

ter grade for the grade scale has been assigned a pass/fail designation (i.e., P and F), these letter grades are the only letter grades that appear in the drop-down list.

The grade information from dropped courses is included when calculating the student's GPA.

Note: Since grades depend on the grading scale associated with the student's program version, it is possible that two students with the same numeric grade will receive a different letter grade.

- **Speed**. This field is used to record such data as typing speed or other "rating" values. It is a numeric field in which you can record anything you like.
- **Grade Comments**. Use this cell to record instructor comments or other information regarding a student's grade. **These comments will be printed on the student's transcript.**

6. Enter the **Numeric Grade** and or **Letter Grade** for each student on the roster. Letter grades will be converted to upper case during data entry. The grades can then be properly validated in the Letter Grade table. It is not necessary to enter grades for all students in the same session. It is possible to close the grading form and come back at a later date with more grades or with changes. If you do not enter numeric grades, you can select the letter grade from the list box that is displayed when the insertion point is in a letter grade cell.

   Note: The Final Grades form has security based on staff groups configured under Setup > Security. The security controls allow for the ability to view, post, and modify both Letter Grades and Numerical Grades. The following permissions are available for staff groups:

   - Display - Allows staff to view students on the form with and without grades.
   - Add - Allows staff to post grades for students (who don't already have a grade posted).
   - Edit - Allows staff to make changes to grades that have already been posted.
   - Delete - Allows staff to remove a previously posted grade.

7. Enter Speed if this value is appropriate for the class. See the description of speed presented previously in this topic.
8. Enter Grade Comments as needed. These comments will be printed on the student's transcript.
9. At any time while you are entering grades, click Save to save your entries. Be sure to click Save when you are finished entering data.

   Note: Upon saving Final Grades, CampusNexus Student evaluates if a prerequisite rule failed due to grade posting or credits/hours. If the campus is configured to do so, conditional course(s) will be automatically unregistered if the prerequisite rule fails. The reason for the automatic unregistration is populated as configured at the campus level.

10. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

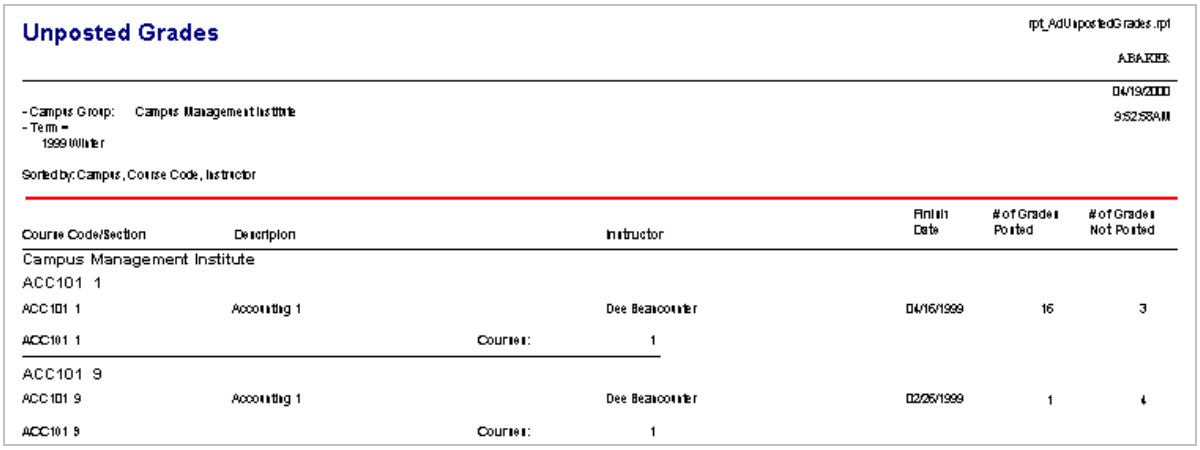
The Date Grade Posted field is included with Final Grades for students. This date indicates the actual system date that the grade letter was recorded on the system. This date is used to produce daily grade reports.

The Date Completed field is updated with the End Date of the course.

Note: If a student drops and then reinstates a course, the previous **Date Completed** and **Date Grade Posted** fields are automatically cleared by CampusNexus Student, allowing the new dates to be entered.

Unposted Grades Report

This form enables you to view or print a report of grades posted and unposted. When you click **Unposted Grades**, the Report Selection form is displayed. Select campus group, term, records posted, and records not posted. You can sort by campus, course code, and instructor.



Unposted Grades

rpt_AdUnpostedGrades.rpt

ABAKER

04/19/2000

9:52:58AM

- Campus Group: Campus Management Institute
- Term =
  1999 Winter

Sorted by: Campus, Course Code, Instructor

Course Code/Section	Description		Instructor	Finish Date	# of Grades Posted	# of Grades Not Posted
Campus Management Institute						
ACC101 1						
ACC101 1	Accounting 1		Dee Beancounter	04/16/1999	16	3
ACC101 1		Courses:	1			
ACC101 9						
ACC101 9	Accounting 1		Dee Beancounter	02/26/1999	1	4
ACC101 9		Courses:	1			

If the current campus has the floating term flag set to Yes, the class start date filter is used for listing courses when the Unposted Grades button is clicked on the Final Grades form (frmAdFinalGrades). This option produces a report showing class sections that have not yet had final grades posted. If the campus is set up to do floating term scheduling, the query for this report filters against the start date criteria instead of a term. Refer to Floating Term Class Scheduling for an overall view of this feature.

Grading and Retakes

CampusNexus Student stores the Student Overall GPA in the Enroll Term table for each term when the GPA is calculated for the term.

If a program version is shared across multiple campuses and the campuses have different retake methodologies, the grade scale that the program version is attached to must have its retake methodology set to 0 - Use Retake Method on Campus setup.

Grade Scale Code Setup

From the Grade Scale Code Setup popup screen that is displayed when adding or editing grade scale codes, you can select a Retake Methodology. The choices appear below:

- 0 - Use Retake Method on Campus Setup.
- 1 - Use Highest
- 2 - Use Most Recent
- 3 - Include All
- 4 - Average Retakes

When adding a new grade scale, the program defaults to 0 - Use Retake Method on Campus Setup. For more information, see Lists Menu > Academic Records Lists > Grade Scale > Grade Scale Codes.

Grade Scales for Program Versions

When the grade scale for a program version is changed and saved, the program checks for any students who are currently enrolled in the specified program version. If any students are found, a message is displayed.

A Degree Seeking student is considered to be currently enrolled if the student's status category is E - Enrolled, A - Active, or T - Temporary Out. For Non-Degree Seeking students currently enrolled, the status categories are X - Enrolled and Y - Active.

If the user selects Yes, the system updates the enrollment grade scale for each of the enrolled students with the new grade scale specified for the program version.

If the user selects No, the enrolled students continue to have the old grade scale attached to their records.

For more information, see Lists Menu > Academic Records Lists > Programs > Program Versions.

Course Retake Override

In cases where courses in your catalog can be repeated many times to satisfy a degree requirement without being considered a "retaken" course, CampusNexus Student provides the functionality to override the retake methodology. In other cases, courses may need to be retaken to improve a grade. In such cases, CampusNexus Student also can be configured to ignore the retake override for the course when it is added back to the student's schedule.

You can configure the system to:

- Flag courses that should not be considered retakes.
- Tell which repeated courses are not considered retakes when looking at the final grades for a student.
- Designate that the retake override should be ignored when adding a class to a student's schedule.
- Specify whether the courses will be included or excluded in the retake methodology in the student's GPA calculation.

Registration for Courses with Retake Override Configured

View > Academic Records > Schedule > Register

If the course for which the student is being registered has the Retake Override flag set to yes and there is at least one final grade or currently scheduled course in the student's file for the selected course or an equivalent course, a form displays asking "Will this course be considered as a retake?" The default is set to No.

The scenarios outlined below should be considered:

- Scenario 1: If there are no retaken courses or equivalents for the registered course, and if the answer to the Question is "No", then the grid is unavailable. Move to the next screen in the wizard.
- Scenario 2: If there is one retaken course or equivalent for the registered course, and if the answer to the Question is "Yes", then the grid is unavailable. Move to the next screen in the wizard.
- Scenario 3: If there are multiple retaken courses or equivalents for the registered course, and if the answer to the Question is "Yes", then the grid is available. Select a course and move to the next screen in the wizard.

The message to select the course that is being retaken is only displayed after you select Yes to the question "Will this course be considered as a retake?" and there is more than one course listed in the grid.

Highlight the course that is being retaken. There is a "Cancel" and a "Next" button on this form as it is part of the registration wizard. If you click Next, a course in the grid must be selected so that when the update to the enrollment schedule occurs, the program will know which course is being retaken and correctly update the Retake Override indicator on that row. Clicking the Next button will take you into what was previously the first form in this wizard. All functionality from that point on will remain unchanged.

When the Finish button is clicked on the final form in the wizard, the program will update the Retake Override column for the registered course and if applicable the course being retaken.

The following scenarios are addressed in regards to updating the Retake Override column:

- If the Retake Override flag for the course being registered is off, the program will turn off the Retake Override flag for the course being registered.
- If no existing posted grades or current scheduled courses are on file for the registered course or any of its course equivalents, then the program will update the Retake Override flag with the Retake Override flag for the course being registered.
- If existing posted grades or currently scheduled courses rows are on file for the registered course, and you answered No to the "Will the course being registered for be considered as a retake?" question, then the program will turn on the Retake Override flag for the registered course.
- If existing posted grades or currently scheduled courses rows are on file for the registered course, and you answered Yes to the "Will the course being registered for be considered as a retake?" question, then the program will turn off the Retake Override flag for the registered course and turn off the Retake Override flag for the course selected as being retaken on the Retaken Courses form.

View > Academic Records > Final Grades

The Retake Override prompt is displayed on this form only if the course highlighted in the grid has it's Retake Override flag set to Yes.

The Yes or No value on the new Retake form in the Registration Wizard will be set according to the Retake Override value on the grade record for the row highlighted in the grid. If the grade record Retake Override is true, the Yes button will be selected. If the grade record Retake Override is false, then the No button will be selected. This new field will be editable if it is visible and you click the Edit button on the form.

Reports > Academic Records > Transcripts

The program lists a notation next to a final grade where the retake override flag is set. Example: If the Retake Override indicator is on, then "R*" would be listed next to the grade. The transcript is the only report where existing logic generates output that identifies a course as being a Retake. Therefore, this is the only report modified to identify courses where the Retake Override flag is

set. "R*" is listed next to the course description and R* as a footnote at the bottom of the report states that it represents a "Retake Override".

Retakes in Non-Term

Retake course work for enrollments associated with program versions configured to use Academic Calendar 5 or 6 directly affects progression as it is measured in the Student Pace Evaluation (SPE). A course that is being retaken for a passing grade progresses the student, however course work that is being retaken for a better grade (previously passed) does not progress the student.

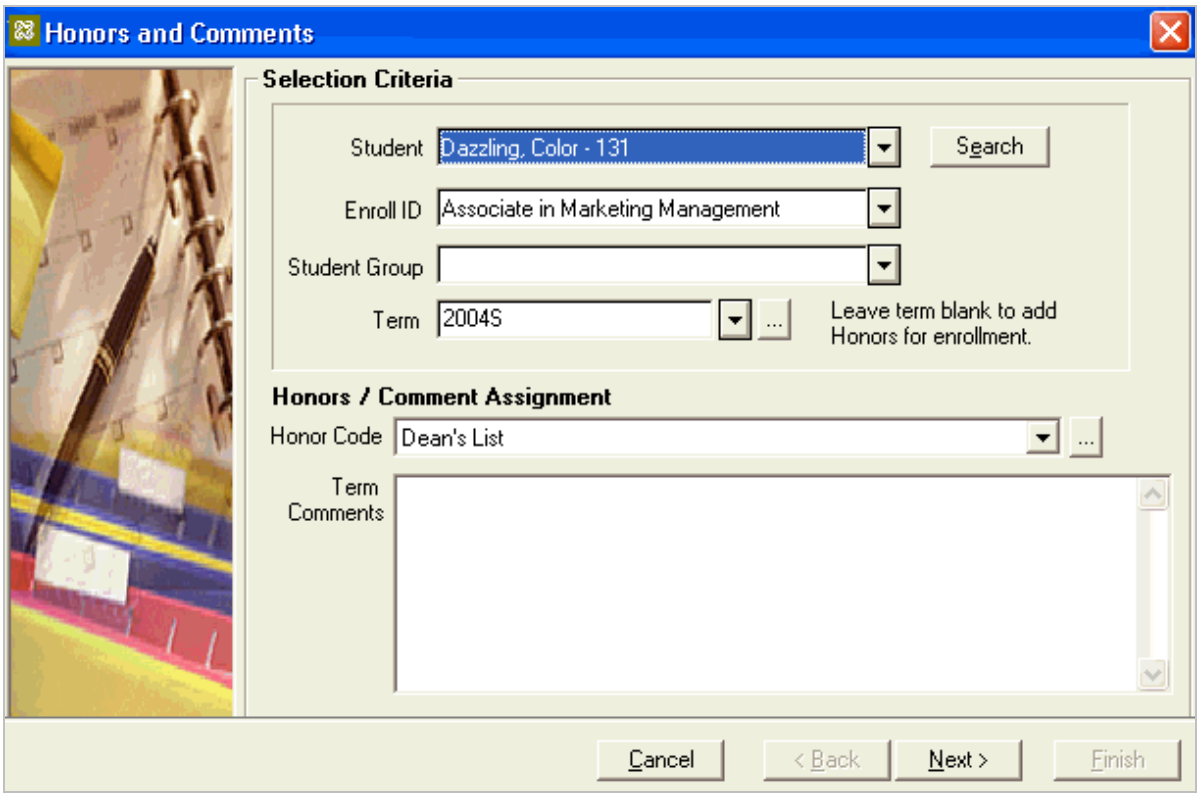
Honors and Comments

This option is used to assign honors to a student or group of students. You can select the student or group of students, the term, and the honor to be awarded. The Term Summary Information (View > Academic Records > Enrollment > Term Summary) will be updated for each student selected.

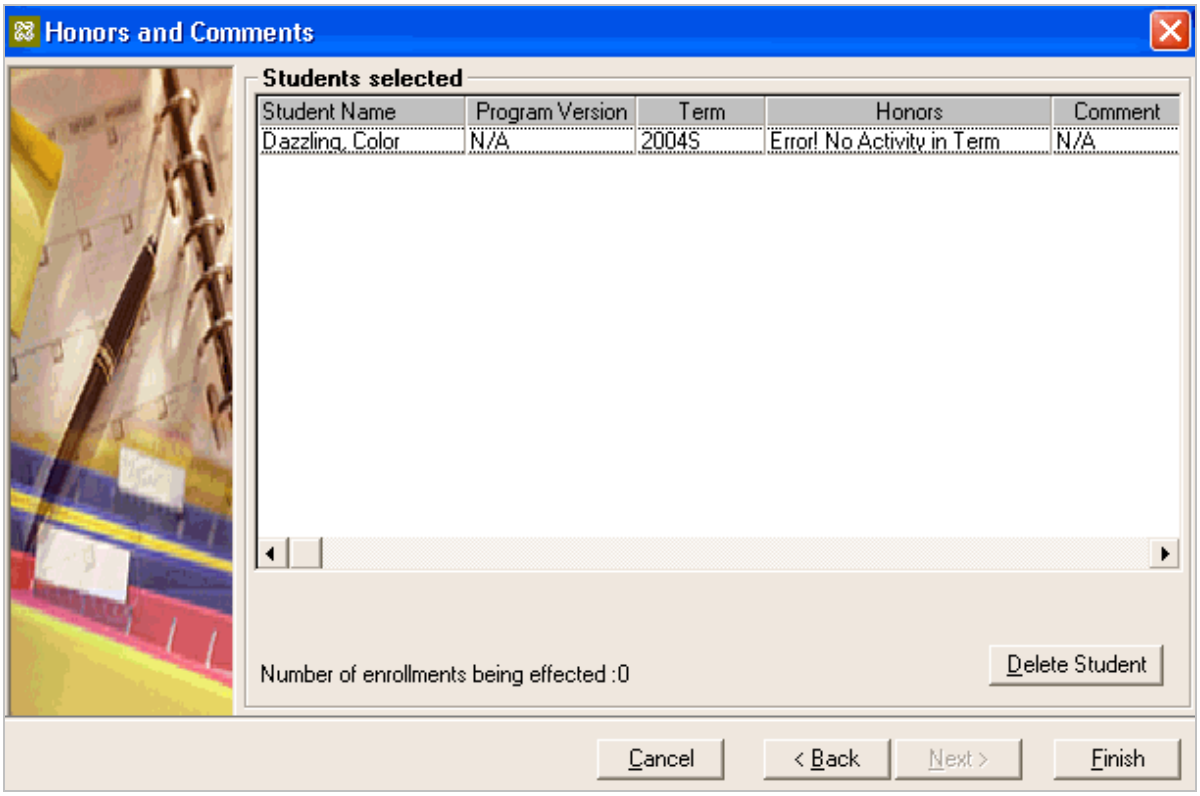
If you are assigning honors to a student group, be sure to update the list of students in the group before executing this procedure.

To post Honors and Comments:

1. Navigate to **Daily > Academic Records** > **Honors and Comments**. The Honors and Comments wizard is displayed.



2. Select the Student or Student Group to whom honors are being assigned. If necessary, click **Search** to find a student. If you use the search tool, the selected student's name will be inserted in the Student field.
3. Click **Next**.



4. Review the list of students. If necessary, select one or more students and click **Delete Student**.
5. Click **Finish** to process the assignment of honors to the selected students and close the form.

Configuring Online Registration

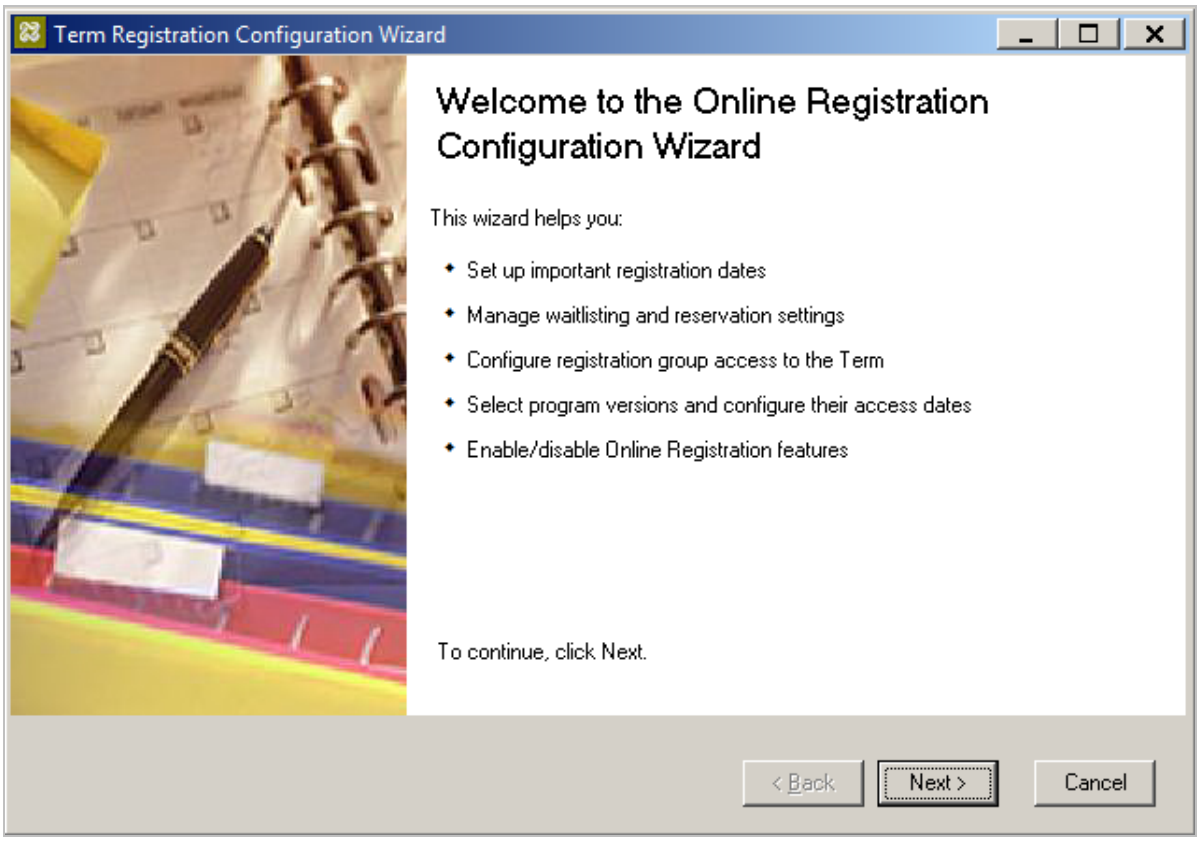
The Online Registration Configuration wizard is available if the Use Portal? option is enabled for the campus.

A student may be enrolled in a term/program version that allows the student to register outside the student's current program. The program version is checked to allow outside registration. The student will see a list of all courses available for the term. If the student registers for a course that is included in the student's present schedule or not, an audit entry is made to the Course Status Change and Academic Records audit folders.

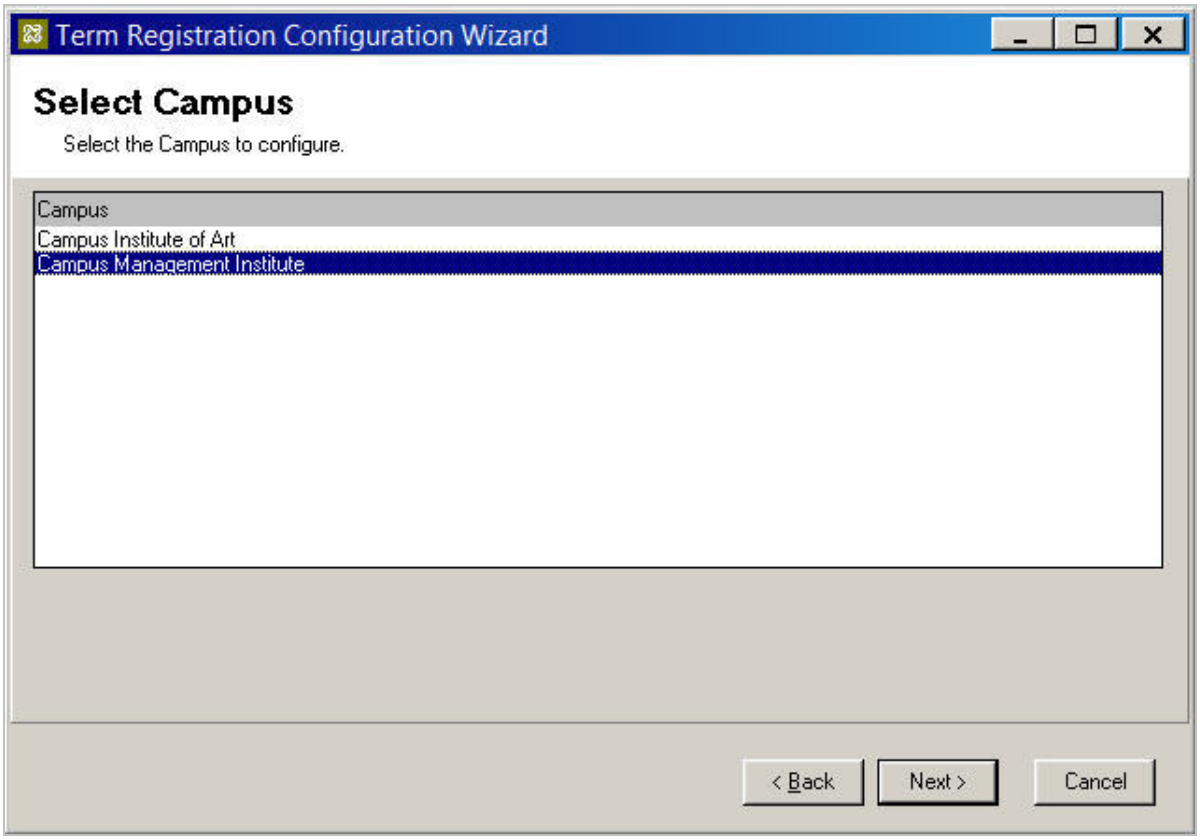
Note: The Registration Start and End dates, Add End Date, and Drop End Date are based on parent term settings, if configured, when a campus uses term relationships. If the parent term settings are not configured when a campus uses term relationships, the child term settings are used during Online Registration through Portal.

To set up the Online Registration Configuration:

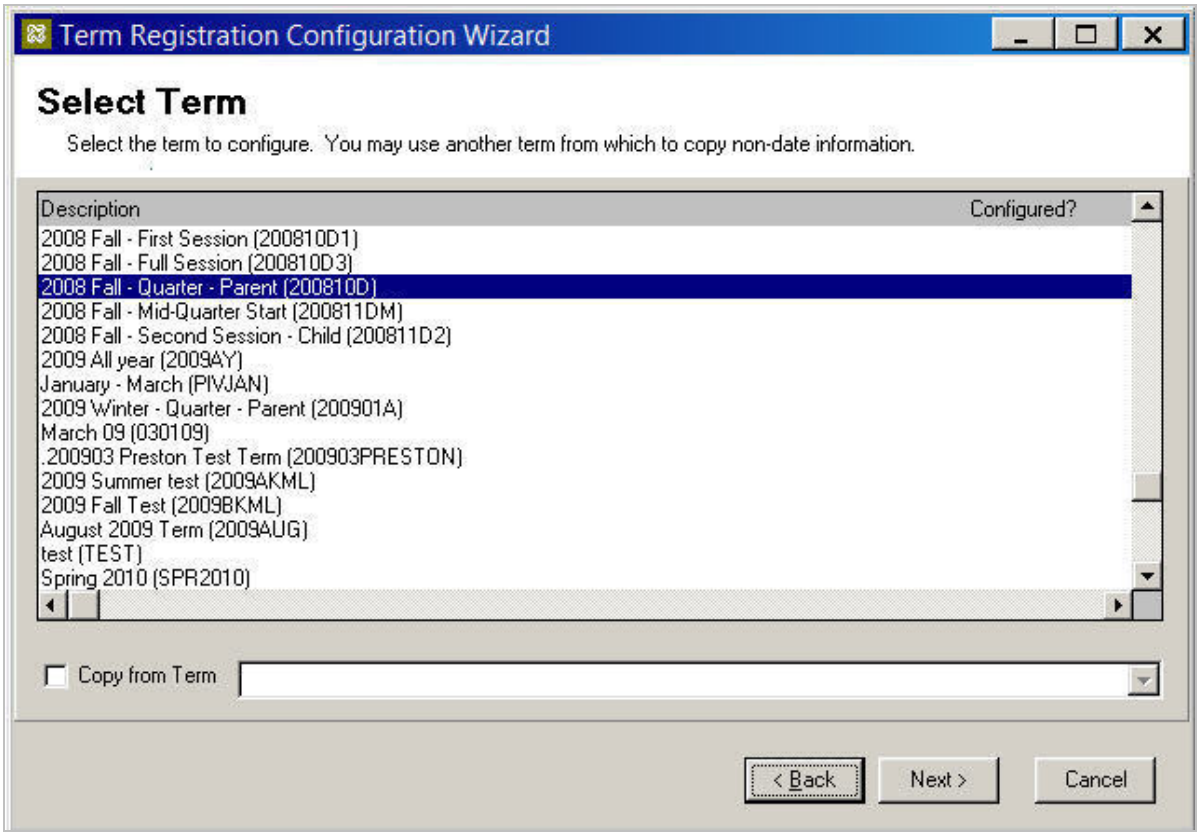
1. Navigate to **Daily > Academic Records > Online Registration Configuration**. The Term Registration Configuration Wizard is displayed.



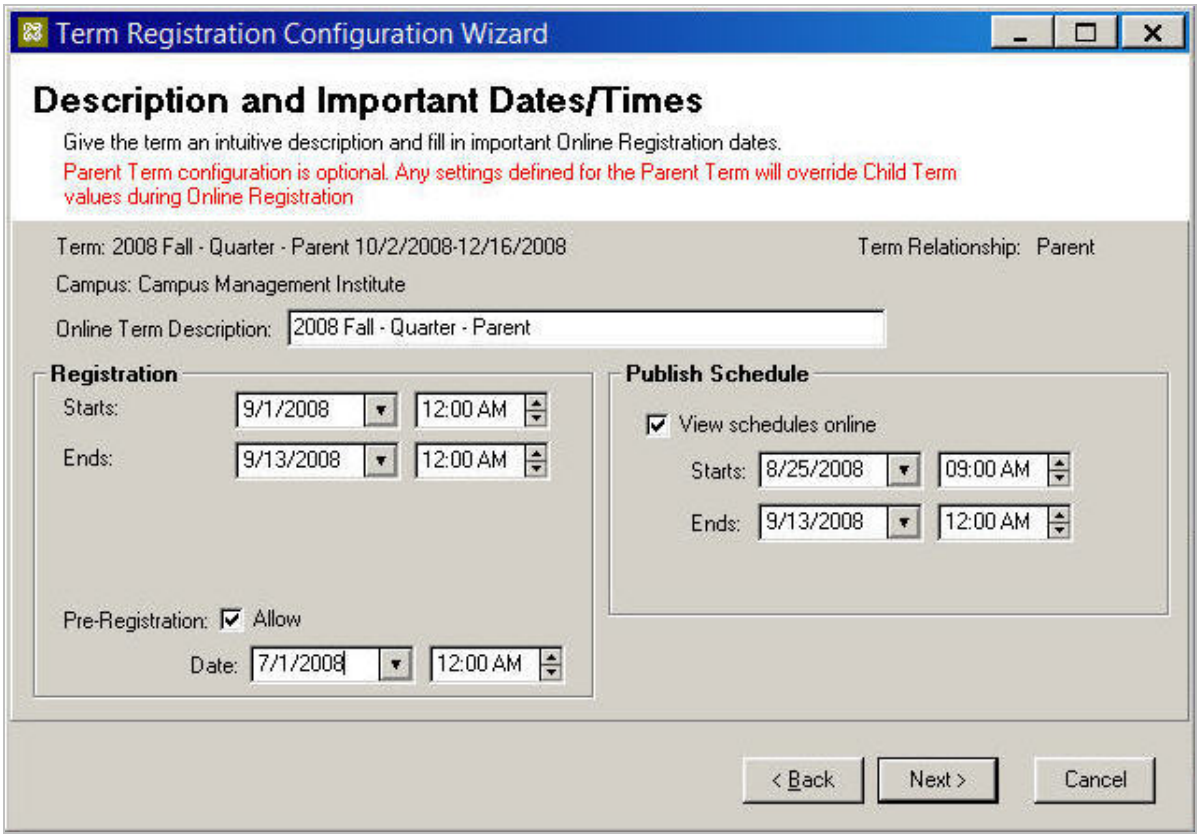
2. Click the **Next**. The Select Campus form is displayed.



3. Select a **Campus** and click **Next**. The Select Term form is displayed.



4. Select a **Term** and click **Next**. The Description and Important Dates/Times form is displayed.



If a campus uses term relationships and a Parent Term or Child Term is selected, the 'Term Relationship:' label is displayed with the value 'Parent' or 'Child'. If a campus does not use term relationships, the term relationship label is not displayed.

5. Specify dates and times for the selected term in the Registration **Starts** and **Ends** fields.

   The Add End Date and Drop End Date fields become enabled if the selected term is not a child term. Enter the dates and times. The add and drop dates must fall between the Registration Start and Term end dates.

   Note: When the add/drop campus level 'Add/Drop Flag' configuration is set to 'S - Course Section Enforced', the 'Add End Date' and 'Drop End Date' fields are disabled since Portal uses the dates configured at the Course Section level for the add/drop enforcement.

6. Select the **View schedules online** check box and specify dates and times in the **Publish ScheduleStarts** and **Ends** fields.

7. Select the Pre-Registration **Allow** check box and specify the **Date** and **Time**.

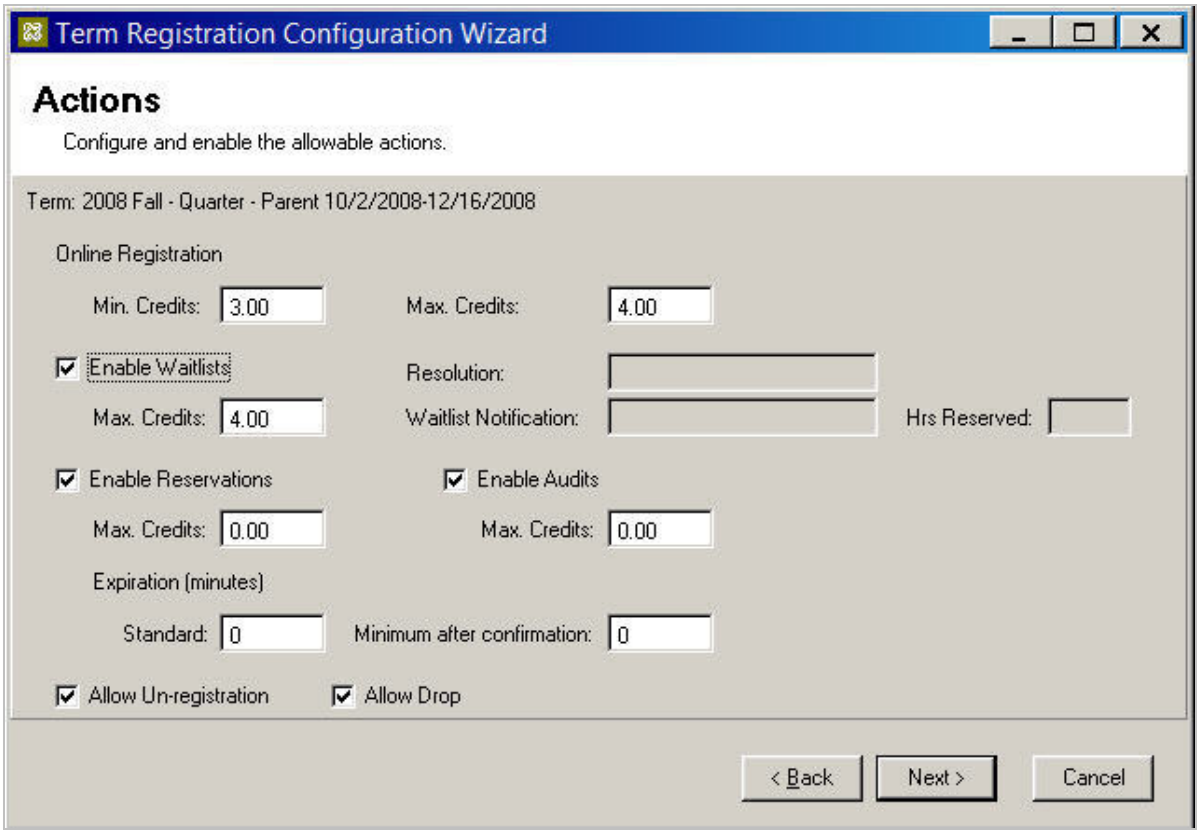
   Note: The pre-registration date must be before the registration start date.

8. Click **Next**. The Registration Groups form is displayed.

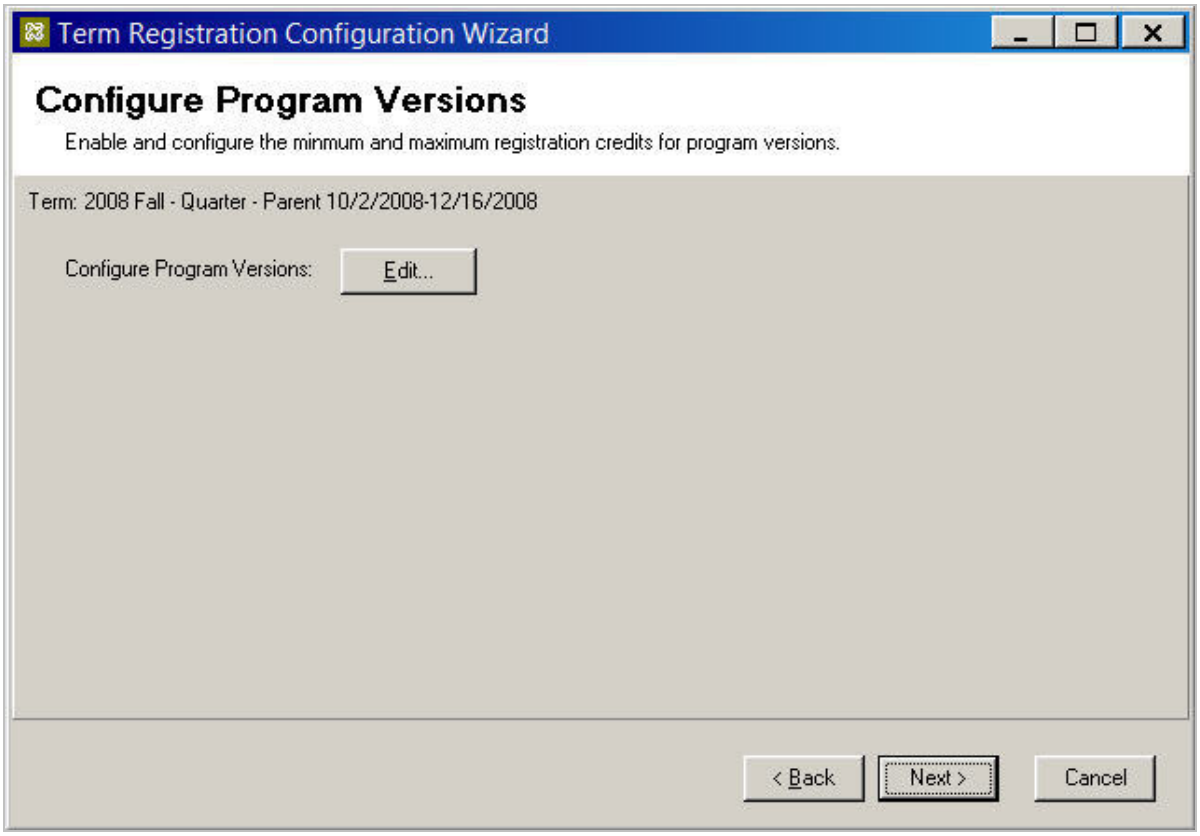
   Follow the instructions to Define Term Registration Groups (step 2) or click **Next**. This step may be bypassed if a parent term was selected.

9. On the Actions form, select appropriate options and click **Next**.

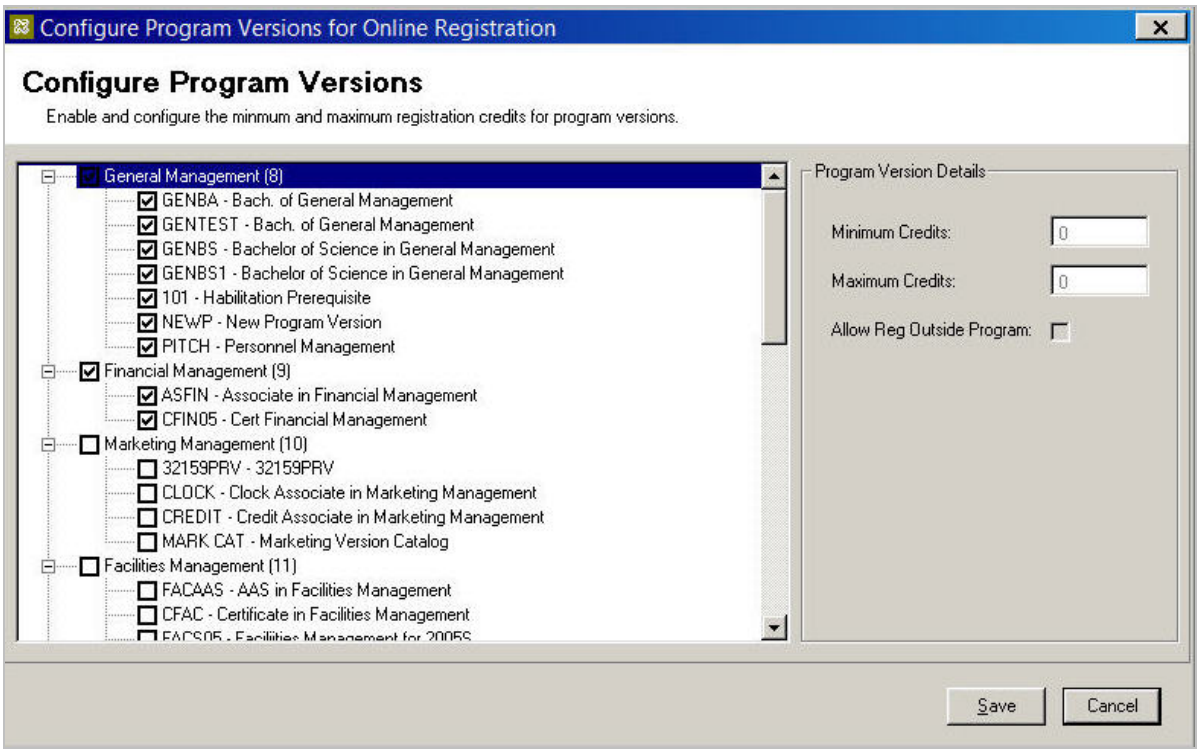
   Note: The minimum and maximum credits do not apply to parent terms and are disabled.



10. On the Configure Program Versions form, click **Edit** to configure program versions or click **Next**.



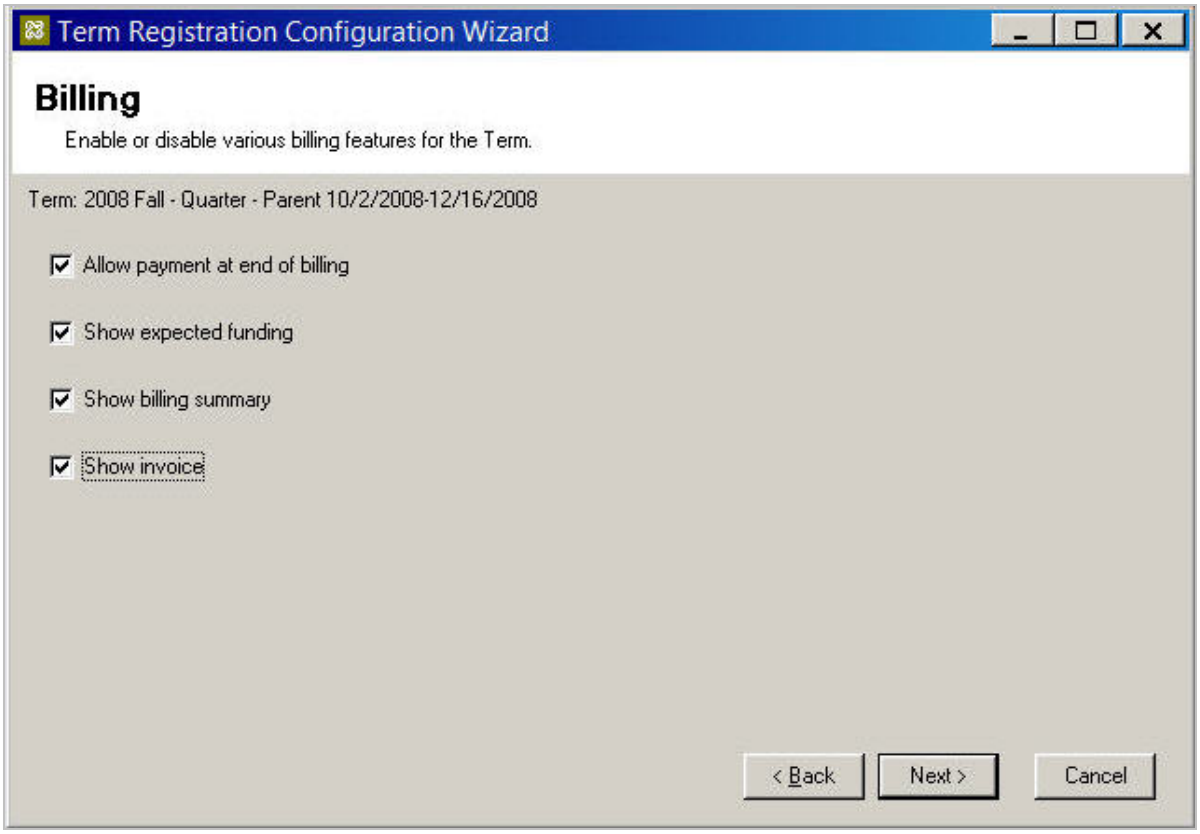
a. If you click **Edit**, the Configure Program Versions form is displayed.



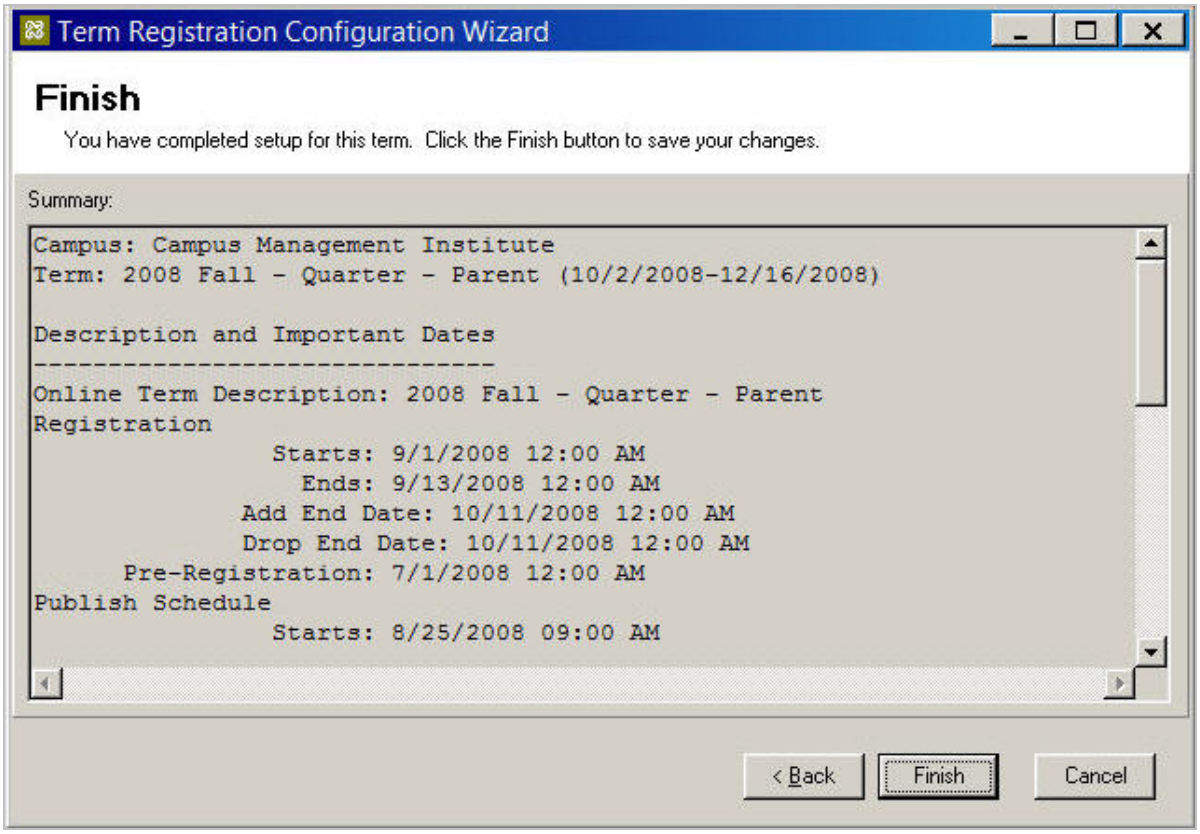
b. Select program versions.

c. Click **Save** to retain your selections.

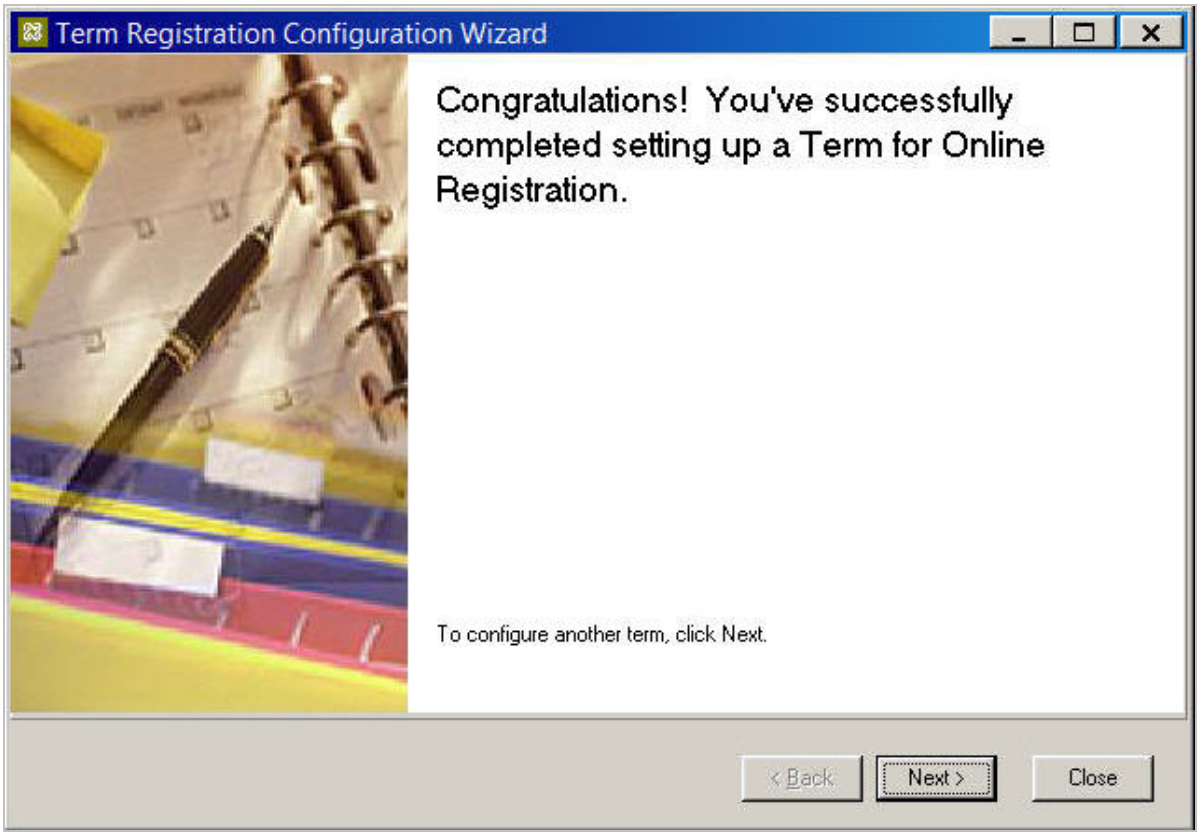
11. On the Billing form, select appropriate options and click **Next**.



12. Click **Next**. The Finish form is displayed.



13. Click **Finish** to complete the process. The Congratulations form is displayed.

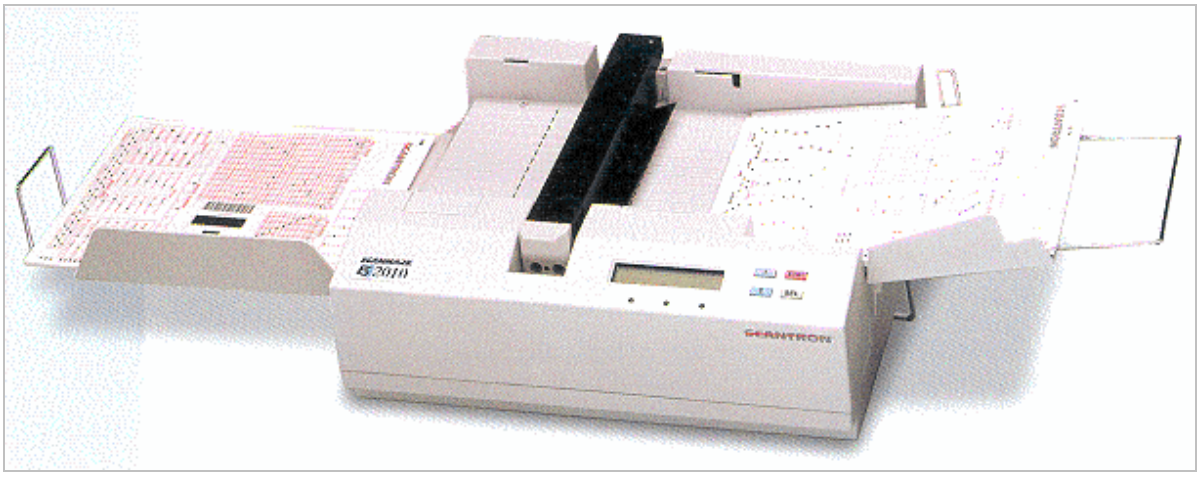


14. Click **Next** to configure another campus or **Close** to exit the process.

Scantron Overview

SCANTRON™ and ScanMark™ are registered trademarks of SCANTRON Corporation.

The SCANTRON interface enables a school to scan attendance or final grades from specially prepared forms, using a ScanMark optical mark reader (OMR). Anthology Inc. designed scannable forms -- final grades, attendance, and additional grade form. The forms may be purchased from SCANTRON. CampusNexus Student preprints class section identification and student rosters on the forms. The forms are distributed to instructors who mark the preprinted forms with attendance or grade data and return them for scanning. The scanning procedure creates data entry records that are processed by CampusNexus Student.



SCANTRON and ScanMark are registered trademarks of SCANTRON Corporation.

The "Scan Rosters" function works in conjunction with your ScanMark Optical Mark Reader (OMR) to scan the marked SCANTRON forms, then update the attendance or final grade data in CampusNexus Student. The operating procedure is the same for both forms.

SCANTRON readers that are capable of reading the forms are the SCANMARK models 2010, 2250, and 2260. The 2250 is no longer being manufactured. The 2260 has read heads capable of reading both sides of a form in a single pass. This capability is not used in CampusNexus Student but may be used for other applications at your school. The model 2010 is capable of reading one side of a form, which is all that is necessary for use with CampusNexus Student.

Attendance

Form No. F-10873-CMC-L. CampusNexus Student will print the course roster on a preprinted SCANTRON Attendance form (Form Type A). Instructors can mark students on the form as absent or tardy. No mark beside a student on the form indicates that the student was present in class. An indication of tardy is evaluated based on a percentage the of minutes that the class meets. The percentage is entered during the setup. Once the attendance form is complete and scanned, CampusNexus Student will import the attendance data and perform the update. This form accommodates 45 students and 9 meeting dates.

Form No. F-15174-CMC-L. This form is similar to the one described above. The principal difference is that it has a Present column for each meeting date. It will contain data for 46 students and 7 meeting dates. The instructor must mark one of the three options, present, absent, or tardy, for each student listed on the form. You must enter a percentage in the Tardiness Absent Percent field for use in calculating minutes to be deducted from scheduled class time.

Form No. F-15175-CMC-L. The third style of attendance form can contain data for 22 students and 5 meeting dates. For this form, you must set up a code table to represent the bubbles on the form. You can designate meanings for 10 bubbles for each student. You can code a bubble to mean present, absent, excused absence, and/or several degrees of tardiness. The codes you set up will be printed at the bottom of the form for easy reference by the instructors.

Final Grades

Form No. F-10871-CMC-L. CampusNexus Student will print the course roster on a preprinted SCANTRON Final Grade form (Form Type G). Instructors must select one of the grades on the form. If the instructor selects a letter grade on the form that is not found in the grade scale for the student's program version, CampusNexus Student will apply the closest grade from the scale.

For instance, the instructor marks B+ for a student on the form, but the grade scale lists only grades A, B, C, D, and F. The program will convert the instructor's B+ to B. This form may not be used for recording midterm grades. This form accommodates 45 students.

SCANTRON® FORM NO. F-10871-CMC-L © SCANTRON CORPORATION 1997 ALL RIGHTS RESERVED. P4 1097 -999- 5 4 3 2

Form No. F-15173-CMC-L. This grading form may be used for midterm or final grades. The form contains rows for 45 students. If you do use it for midterm grades, each class section to be graded must have a lesson defined with a code of MIDTERM. The form contains twelve columns for grades and columns to indicate plus (+) or minus (-). The grades are printed vertically by the program in the column headers. Grades in the grade scales may have three-character codes. The grades from which you select come from the grading scale you select when setting up the Scantron options. If a grade has plus or minus suffixes in the grading scale, the instructor can mark the suffix to go with the selected grade. This form accommodates 45 students.

Once grades are marked and scanned, CampusNexus Student will import the grade information and perform the update. Once a grade is scanned and posted for a student in a class section, changes cannot be made via the scanning procedure. A grade roster is ignored if it is scanned a second time. However, if a class section has been partially graded, and the partially marked form is scanned and posted. You can print a new grade roster for the students who do not yet have grades.

Numeric grades are not processed via SCANTRON at this time.

Setup and Processing

The following specifications are for the ScanMark 2000 - 2500 Series OMR or the new ScanMark ES2010/ES2260 machines. The predefined Anthology Inc.forms can be read in either machine. As of this date, the ScanMark 2000 - 2500 series machines are no longer being made, however SCANTRON is still servicing the machines, and making parts.

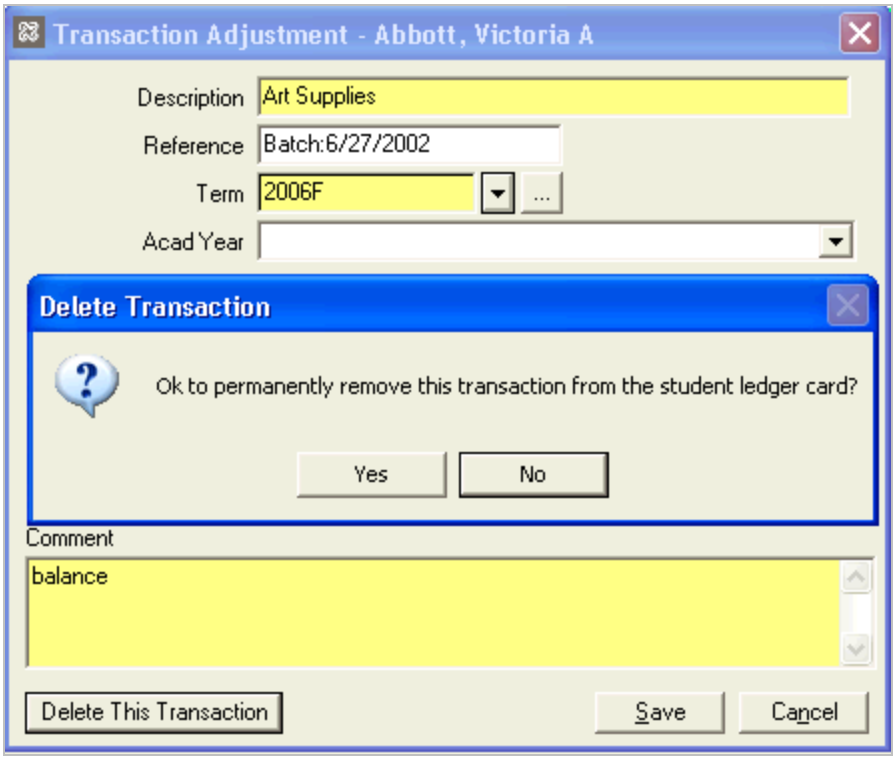
Setup > Academic Records > Scantron

A new "SCANTRON" tab has been added to the Academic Records setup form. Options on this tab include:

- Path to SCANTRON Files
- SCANTRON Attendance Form
- SCANTRON Grade Form
- SCANTRON Port (COM port)
- Tardiness Percentage (0 to 99 percent)
- Test SCANTRON Machine (button to test communications).

The forms are selected from a drop-down list. Only those where the type is relevant to the selection are displayed. The COM port is a drop-down list of available ports. The path includes a standard browse option.

The "Path to SCANTRON files" must be on the PC to which the SCANTRON optical mark reader is attached. The process does not work reliably when these files are installed on a network server. The SCANTRON files are installed at `C:\Program Files\CMC\CampusNexus Student`. The attendance and grade form definition files are shown below.



When you click Test Communications, your PC will send a signal to the SCANTRON unit and receive a signal back from the unit, which confirms that the two units are properly connected. CampusNexus Student displays a positive or negative message depending on the results of the communications test.

Another, more visible means of testing the communications between the two units may be performed under Daily/Academic Records/SCANTRON. On the "**Scan Rosters**" tab, click Scan Final Grades or Scan Attendance while watching the green lights data-activity lights on the SCANTRON unit. You will see the lights flashing. CampusNexus Student will also display a message indicating that the system is ready to scan the selected forms.

Daily > Academic Records > Scanning Services

This new menu option leads to a "Scantron" form. The form has three tabs--**Print Scantron Rosters**, **Scan Rosters**, and **Roster Maintenance**.

Print SCANTRON Rosters

From this option, you can produce reports for processing attendance and grades. These reports are intended to be printed on the Scantron forms.

Tabs are on the top for options. The caption at the top says "Roster Selections". You are given the choice of Attendance Rosters or Grade Rosters.

When printing rosters for large classes, you will be printing two or more form pages for each class section. Each page contains a unique roster ID code in the preprinted "slugs" at the top right corner of the forms. This machine-readable code is interpreted for you above the ID boxes. Additionally, each form header contains a page number in the format "Page x of x". This will help you to keep multi-page rosters together even though they have different roster IDs.

For example, using Form F-10873-CMC-L (45 detail lines) for a class with 51 students, two attendance roster forms will be printed for a selected span of nine meeting dates. The first form, say it is roster ID 1923, will contain the first 45 students in the class section listed in alphabetical order. Also in the header of this form will be "Page 1 of 2". The next form printed will be roster ID 1924. It will be labeled "Page 2 of 2" and contain the last six students in the alphabetical list. The forms are independent of each other for processing purposes. It is not necessary that they be processed in sequential order. However, to post attendance for the entire class section, both forms must be scanned after the instructor marks them.

Likewise, two F-10871-CMC-L forms would be used to print the final grades roster with 45 students on the first form and 6 on the next form.

Attendance Rosters

When the Attendance Rosters option is selected, the Campus defaults to the campus you are signed into. The Term is a required selection. The rest of the fields on the form are included for additional selection criteria but not required.

You cannot specify unscheduled class sections for attendance rosters. The SCANTRON attendance options are not be available for courses that meet at unscheduled days and times because there is insufficient data with which to build a SCANTRON roster. **You can print a final grade roster for an unscheduled class section.**

CampusNexus Student keeps track of the dates to be printed on the column headers of the attendance forms. The first time attendance forms are printed, the program uses the **start date of the class section** as the first column header and continues with sequential meeting dates across the form. On subsequently printed attendance rosters for the same class section, the program will begin the dates in the column headers with the **next date of attendance** that is not yet posted.

When you click "Next", you are prompted to select the SSN, Enrollment Number, Student ID, or Telephone Number as an identifier on the roster. An option to Include Dropped Students, and LOAs is also displayed. You can sort the rosters to be printed by instructor, room, or class section code. The students on the rosters are sorted by name or by SSN. Note that the program does not sort by Enrollment Number, Student ID, or Telephone Number.

When you select the "Finish" button, CampusNexus Student gathers all records using the existing logic for standard attendance rosters. The following data items print on the SCANTRON Forms: Class Schedule ID, Instructor, Course Code, Section, Location and Time, and dates of attendance.

If the number of students in the class section is greater than the number of detail lines on the form, the program will process and print the remaining students on an additional page or pages and print a new SCANTRON Roster ID and page number on each.

Additional items to be printed on the roster will be the attendance dates and names of students who are determined to be included on the roster from the selections above. The student information is written to a SCANTRON Roster Detail table, this includes the SCANTRON Roster ID, Enrollment Schedule ID, the batch position of the student on the roster, and the Student ID.

Machine-readable information printed on the form will be in the form of "slugs". The positions of the "slugs" are defined in the SCANTRON form definition file. They will print in the control boxes. When printed, the "slugs" must line up horizontally with the timing marks on the left margin of the form.

Additionally, the Course information, Student Name, and the selected Student ID will be printed on the forms. The Roster ID and page number will be printed on the upper right corner of the form.

Final Grade Rosters

When the option to Print Final Grade Rosters is selected, the options are nearly identical to the selections when printing attendance rosters. You will have the same selection criteria where the campus defaults to your default campus. The term is required, the instructor, shift, course, and section are optional.

The program will gather the students in the selected courses using the same logic as the final grades worksheet. If the number of students is greater than the number of detail lines on the form, the program will create two or more roster sheets having unique IDs and sequential page numbers for the remaining students.

A Grade Roster Detail report is printed on the preprinted SCANTRON forms. Students can be listed in alphabetical order by name or by SSN on each form and the forms are printed in the print sort order you selected.

Machine-readable information printed on the form will be in the form of "slugs". The positions of the slugs are defined in the SCANTRON form definition file. They will print in the control boxes. When printed, the "slugs" must line up horizontally with the timing marks on the left margin of the form.

Additionally, the Course information, Student Name, and selected Student ID will be printed on the forms. The Roster ID and page number will be printed in the upper right corner of the form.

Note: Once a final grade has been posted for a student in a class section (for instance, a grade is manually posted), that student will no longer appear on a subsequently printed final grade roster for the class section.

Scan Rosters

The "Scan Rosters" function will scan the marked forms then update the attendance or final grade data.

The SCANTRON optical mark readers that are capable of reading the forms are the SCANMARK models 2010, 2250, and 2260. The 2250 is no longer being manufactured. The 2260 has read heads capable of reading both sides of a form in a single pass. This capability is not used in CampusNexus Student but may be used for other applications at your school. The model 2010 is capable of reading one side of a form, which is all that is necessary for use with CampusNexus Student.

The Scan Rosters option will communicate with the SCANTRON machine. You are prompted to select to Scan Attendance Rosters or Scan Grade Rosters. As an optional checking device, you can key in the number of pages you are going to scan. The program will count the number of pages scanned and stop when it reaches the number you entered. You can also stop the process by pressing the End button on the SCANTRON machine. When you proceed, the program will display "Please Wait, Processing Rosters".

Depending on whether you selected attendance or grades, CampusNexus Student will use your form selection to send the correct form definition file to the SCANTRON OMR. (Form definition files have a file name extension of .800.) CampusNexus Student will then wait for the return of the text string(s). The machine will create a text string based on the format defined in the form definition file. This data will then be interpreted and imported into CampusNexus Student.

CampusNexus Student processes each form completely as it is scanned. The data from the form is applied to the records of the listed students before the next form is read. If the Scantron OMR rejects a form, none of the data on that form is applied to the CampusNexus Student database. See "Rejected Forms" below.

Once a final grade form has been scanned and imported into CampusNexus Student, it cannot be rescanned. The database records prepared when the form was printed are marked has having been scanned.

The attendance form, on the other hand, can be scanned repeatedly as data for each succeeding meeting date is marked. Thus, if attendance is marked and scanned after every meeting date, a form would be scanned several times before it is completed. An attendance form that has been scanned at least once has a status of "partially scanned" in the database. Meeting dates that have been previously scanned are not scanned again.

If an attendance roster includes the current date, only columns up to and including the current date are scanned**. The program does not distinguish time-of-day**. Therefore, it is better to scan the forms the day after the class meets rather than the same day.

This would prevent, for instance, a roster for an evening class accidentally being scanned in the afternoon before the class meets.

Note that a class roster form, attendance or grades, can be reprinted if necessary (a form is lost in distribution, for example). If two forms are submitted covering the same class section meeting dates or the same class section grades, only the first form submitted will count. CampusNexus Student will reject subsequent submittals.

Rejected Forms

Forms that are rejected by the SCANTRON unit must be corrected and resubmitted or posted manually. Rejected forms are not considered as processed by CampusNexus Student. Therefore, if the instructor's intention can be determined and corrected by the SCANTRON operator, the form can be resubmitted. If the form is so damaged physically that the SCANTRON unit cannot process it, you must print and mark another roster. Alternatively, you can manually post the data from the form through the CampusNexus Student batch attendance or batch grade posting procedures.

Scan Attendance

CampusNexus Student reads the incoming file, first by identifying the SCANTRON Roster ID. Using the SCANTRON Roster table, it then identifies the Class Schedule ID and matches the SCANTRON Roster Dates table to determine which dates on the roster need to be updated.

Using the SCANTRON Roster Detail table, the program updates the attendance records for the selected students. The attendance update logic is identical to the existing method of batch posting attendance. After posting the attendance data, the program updates the SCANTRON Roster Dates Scan Flag to true for the dates posted. If all date fields for the selected SCANTRON Roster ID have the scan flag set to True, the SCANTRON Roster Status flag is updated to "C - Complete". Once the update is complete, a "Processing Complete" message box is displayed. When you select OK, the program may display a second message box listing rosters that were not processed because they had been previously scanned. Click OK to close this message also.

Attendance Scanning and Posting Considerations

Example: ENG101 Section 1 meets Monday, Wednesday, and Friday. The term begins on Tuesday 09/05/00 (the day after Labor day) and ends on Friday 12/15/00. The first meeting date for ENG101 1 is Wednesday 09/06/00 and the last meeting date is Friday 12/15/00. Using form number F-10873-CMC-L, the first attendance roster printed (roster ID 1923, for example) will have the following dates as column headers: 9/6/00, 9/8/00, 9/11/00, 9/13/00, 9/15/00, 9/18/00, 9/20/00, 9/22/00, and 9/25/00.

Consider these questions and examples when planning your SCANTRON processing:

- How is your school going to process attendance? Daily, weekly, after each form is completely marked (all meeting dates), some other cycle?
- How will the forms be distributed for marking and collected for scanning?
- Who will deal with missing, unreadable, damaged, and incorrectly marked forms?
- Attendance will not be posted for dates beyond the current system date.
- It is possible to print another attendance form covering the same meeting dates (if, for instance the first one is lost). The second form printed will have a different Roster ID. However, whichever of the forms is scanned first controls the posting. The one that is scanned second is ignored for the dates that have been posted from the first form.
- If you scan an attendance roster with no marks on it, i.e., perfect attendance for the class section, only the first date not previously recorded will be updated. In the case of our example, if all students on roster 1923 are present, on time, for 9/6/00, there will be no marks on the form. If form 1923 is scanned on or after 9/6/00, the students on the form will all be recorded as present on 9/6/00. No other dates will be affected. CampusNexus Student will not scan and post roster 1923 for 9/6/00 again, even if the instructor subsequently marks someone absent or tardy on that date. **The SCANTRON process will not overwrite previously scanned attendance dates.**
- As an extreme example, when using form 10873 on which "Present" is the default, if the class section achieves perfect attendance for all nine meeting dates on the form, you must scan it nine times to post attendance for all

meeting dates. The program can detect and process only one perfect attendance date at a time. The exception to this rule is described next.

- If, when using form 10873, the instructor does not take attendance on 9/8/00 or 9/11/00, but does take attendance on 9/13/00 and marks any student absent and/or tardy, all students will be marked as present for 9/8/00 and 9/11/00. To stretch this point, say that the instructor, on 9/25/00, puts one mark, absent or tardy, on any student on roster 1923. The form contains no other attendance markings. If the form, having never been scanned before, is scanned on 9/25/00, all students (except the one with the mark) will be marked present for all meeting dates on the form, up to and including 9/25/00.
- The examples above do not apply to forms 15174 and 15275 because the instructor is required to mark each student as present, absent, or tardy.
- Once a meeting date has been scanned (posted) for a given roster ID, you cannot scan and post another roster ID with the same date for the same students. (This does not mean that you cannot post the multiple pages necessary for a large class section.)
- Any changes to previously scanned attendance data must be made manually.

Scan Final Grades

CampusNexus Student will read the file, first identifying the SCANTRON Roster ID. Using the SCANTRON Roster table, it then identifies the Class Schedule ID and the students on the rosters using the SCANTRON Roster Detail table. It updates the appropriate records in the Class Schedule table and Enrollment Schedule table to finalize the grade posting. The program uses the same logic as the Daily > Academic Records > Final Grades batch entry form uses. No numeric grades will be recorded. Once the update is complete, a "Final Grade Processing Complete" message is displayed. Once a final grade form has been scanned, scanning it again has no effect.

Roster Maintenance

This option shows the students on the roster in the list on the right side of the form and new students added after the roster was printed on the left side of the form. If the roster has not been completely processed (Status C), you can add the new students to the roster. A message box with the student position on the form is displayed. If the roster is for Attendance (Form Type A), a list of dates processed for the roster will also be displayed on the Roster Maintenance tab.

Scantron Roster Status Report

Reports > Academic Records > Scantron Roster Status

This report provides information for tracking your SCANTRON Attendance and Final Grade forms. Using the various selection criteria, you can determine the status of any SCANTRON form printed or processed in CampusNexus Student. Selection criteria include campus group, term, course, and instructor. Additional comparison variables include Roster ID, form type (attendance, grades, or both), date printed, section, and roster status (complete, printed, partially scanned, or all). The sort is program-controlled by campus, term, course, section, and roster ID.

Details on the report include campus, term, course, section, instructor, form type, roster ID, date printed, roster status, and (for attendance) dates included on the form.

Setting Up a Scantron Interface

Following are notes that may come in handy when configuring a school workstation for use with the CampusNexus Student Scantron interface.

Example 1. Workstation is on a **Local Area Network (LAN)** running CampusNexus Student on local servers.

1. Environment: The Scantron unit is connected to the COM 1 or COM 2 port on the workstation PC using a null modem cable. Follow Scantron's recommendation for the OMR you are using.
2. To configure the Scantron 2250 unit, turn it off. Hold down the End button and turn the machine on. Hold the button

down until the yellow light begins to blink. Feed the configuration form into the Scantron unit. When the form is accepted by the machine, the configuration is loaded into the machine. It should then be ready to accept data from the PC. The configuration selections on the Scantron form must match those of the COM port on the PC. See item 6 below for a typical configuration. **See the User Manual that comes with your SCANMARK unit for the current configuration instructions.**

3. From the CampusNexus Student **Setup** menu, select **Academic Records**, then select the **Scantron** tab. Be sure that the correct forms are selected for attendance and grade posting. Be sure that the correct path to the form definition files is selected. (The path and the form definition files must be on the PC's local hard drive for reliable operations.) Be sure that the correct port is selected, the one to which the Scantron machine is attached (COM2 in our example).
4. Click "Test Communication". CampusNexus Student will send the attendance form definition file to the Scantron unit as a test that the PC and the Scantron unit are properly communicating. If any negative messages are displayed, follow the procedure below to trouble shoot the problem.
5. Check the cable between the PC and the Scantron unit to be sure that both ends are securely fastened to the correct connectors. You may need help from a person knowledgeable in computer hardware to confirm that the cable is connected to the correct port on the back of the workstation PC.
6. If there is still a problem, check the settings for the COM port on the local workstation (COM2 in our example). The method for checking the settings on the COM port varies depending on the workstation operating system (Windows 98, Windows 2000, Windows NT, etc.) Ask your local network administrator for help with this check.

   For instance, if you are running Windows NT 4.0 on the workstation, there is a "Port" icon in the Control Panel window. Click the Port icon to see a list of ports on the work station. For each port, you can see the configuration.

   Typically, you want the settings to be: (the same as the Scantron configuration form.)

   - Bits per second: 9600
   - Data bits: 8
   - Parity: None
   - Stop bits: 2
   - Flow Control: None

   To check COM port settings in Windows 2000:

   Start
   Settings
   Control Panel
   System (Properties)
   Hardware Tab
   Device Manager Button
   Ports (COM1, COM2, LPT1)
7. Click "Test Communications" again on the CampusNexus Student Scantron setup form.
8. When the communication test is completed successfully (no negative messages), the system is properly configured to accept attendance and grade forms.

Example 2. Workstation is on a **Terminal Server (TS)** running CampusNexus Student on **Citrix™**.

Connect the SCANTRON machine to the local PC port as described above.

In addition, you have to Map the COM port on the TS to the one on the local machine. To do this, open the command prompt on the TS and type:

NET USE COMx: \\CLIENT\COMz:

where **x** is the port number on the Terminal Server and **z** is the port number on the local workstation.

Forms

The form identification slugs in the control boxes are used to identify the form to the CampusNexus Student process. The following table can be used to read the slugs. The distribution of slugs will agree with the form ID number printed above the control box.

Attendance Form

■	1	2	3	4	5	6	7	8	9		0	1	2	■	4	5	6	7	8	9
■	1	2	3	4	5	6	7	8	9		0	1	2	3	4	5	6	7	■	9
■	1	2	3	4	5	6	7	8	9		0	1	2	3	4	5	6	7	8	9
■	1	2	3	4	5	6	7	8	9		0	1	2	3	4	5	6	7	8	9
■	1	2	3	4	5	6	7	8	9		0	1	2	3	4	5	6	7	8	9
■	1	2	3	4	5	6	7	8	9		0	1	2	3	4	5	6	7	8	9
■	1	2	3	4	5	6	7	8	9		0	1	2	3	4	5	6	7	8	9
0	■	2	3	4	5	6	7	8	9											

Read the attendance from top to bottom on the left side, then the first two rows on the right side of the ID box. In the example above, the roster ID is 0000000138.

Final Grade Form

■	1	2	3	4	5	6	7	8	9
■	1	2	3	4	5	6	7	8	9
■	1	2	3	4	5	6	7	8	9
■	1	2	3	4	5	6	7	8	9
■	1	2	3	4	5	6	7	8	9
0	■	2	3	4	5	6	7	8	9
0	1	2	■	4	5	6	7	8	9
0	1	2	3	4	5	6	7	■	9

The final grade roster ID above is 00000138.

Scantron Daily

Please read the **Scantron Overview** topic before printing or processing SCANTRON forms with these procedures. The overview fully describes the purpose of the CampusNexus Student/Scantron interface, the environment in which it operates, and the preparations that must be made by your school to successfully post attendance and final grades using the ScanMark™ optical mark reading system.

The CampusNexus Student/SCANTRON interface must be defined under Setup > Academic Records > OMR Scanning Setup before you can perform the daily SCANTRON procedures.

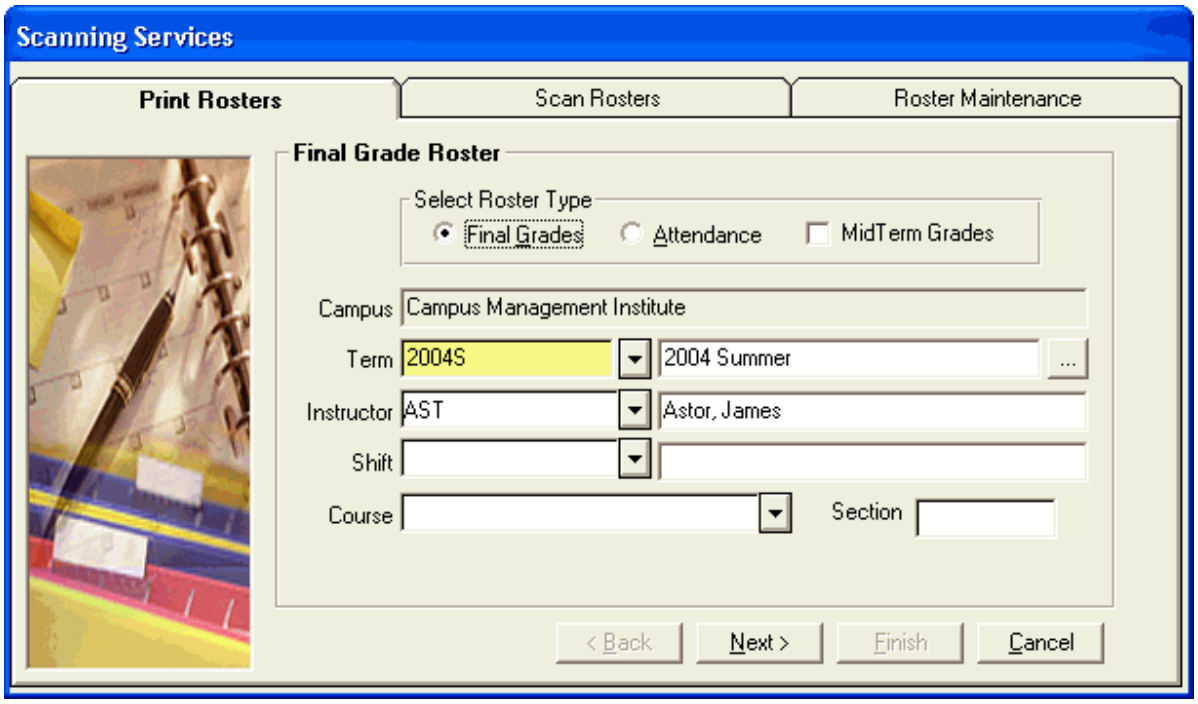
Daily SCANTRON procedures include printing of attendance and final grade forms, scanning of marked forms, and roster maintenance. Each of these functions is described in detail in a different Help topic.

Before you work with the CampusNexus Student/Scantron interface procedures, be sure you have the correct campus selected in your Session Defaults.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

To work with the daily SCANTRON procedures:

1. Select **Daily** > **Academic Records** > **Scanning Services**. The **Scanning Services** form is displayed.

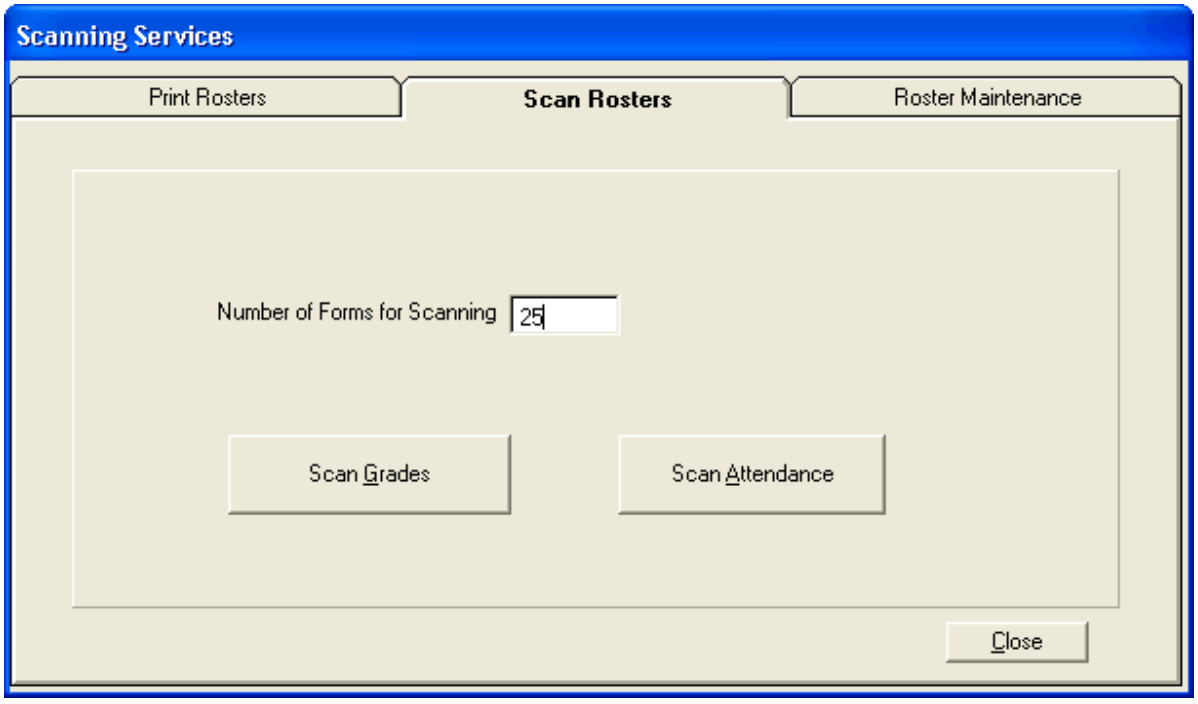


2. Click **Print Rosters** to print rosters for **final grades**, **midterm grades**, or **attendance**. You must have available in your printer, a supply of the preprinted SCANTRON forms for the rosters to be printed. While it is possible to print the rosters on plain paper for test purposes, plain paper rosters cannot be scanned by the ScanMark™ optical mark reader (OMR). Note that it is not necessary to have an OMR connected to your PC to print the rosters. They are printed on your default report printer.

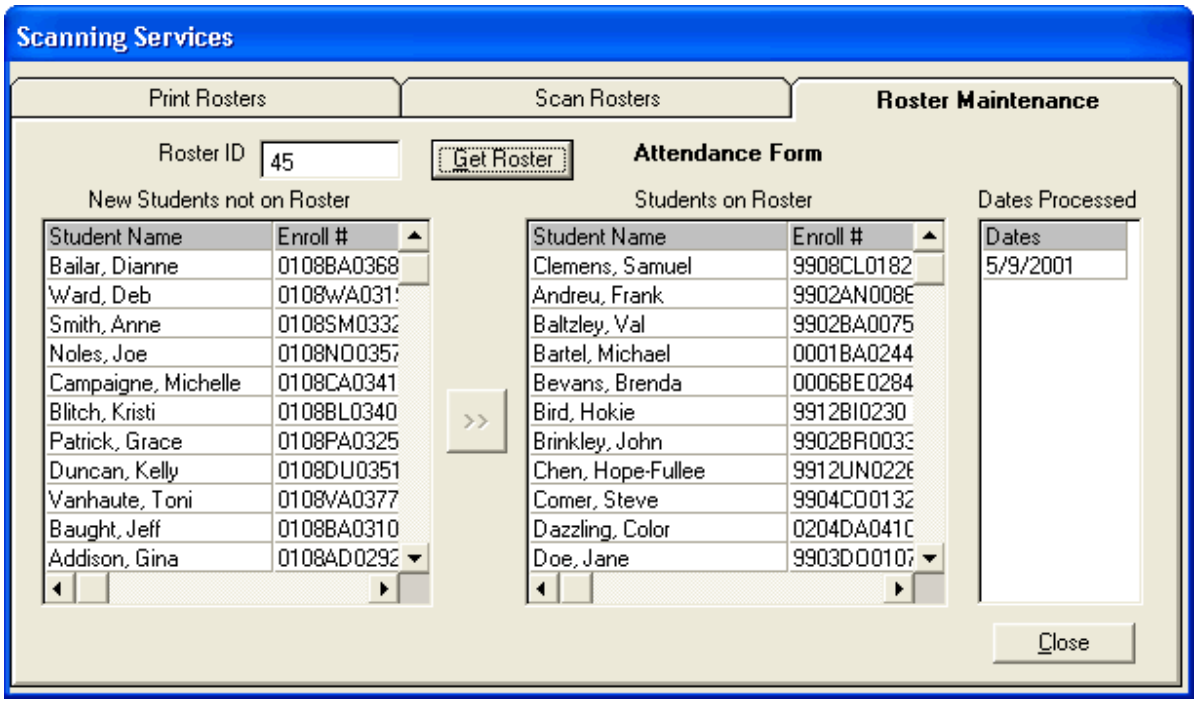
   Note: The option to print and scan a roster to record midterm grades requires the use of form number F-15173-CMC-L. In addition, the class section must have a lesson set up with a code of MIDTERM.

3. Click Scan Rosters to scan **Final Grades** rosters or **Attendance** rosters. CampusNexus Student displays the

form below. See the Scan Rosters topic for more on this form.



4. Click **Roster Maintenance** to add students to a previously printed roster. CampusNexus Student will display the form below. This form allows the class section instructor to "write in" a new student at the bottom of a previously printed roster. See the topic "Roster Maintenance" for more details on this form.



Print Scantron Rosters

SCANTRON and ScanMark™ are registered trademarks of SCANTRON Corporation.

Note: Please read "Scantron Overview" for an overall review of the CampusNexus Student/SCANTRON Interface.

From this option, you can produce five reports for processing attendance and grades. These reports are intended to be printed on preprinted forms manufactured by SCANTRON Corporation™. The forms are specifically designed to be read by an optical mark reader also manufactured by SCANTRON.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

Attendance Rosters

See the topics "Scantron Overview" or "OMR Scanning Setup" for descriptions of the three attendance forms available for use with CampusNexus Student.

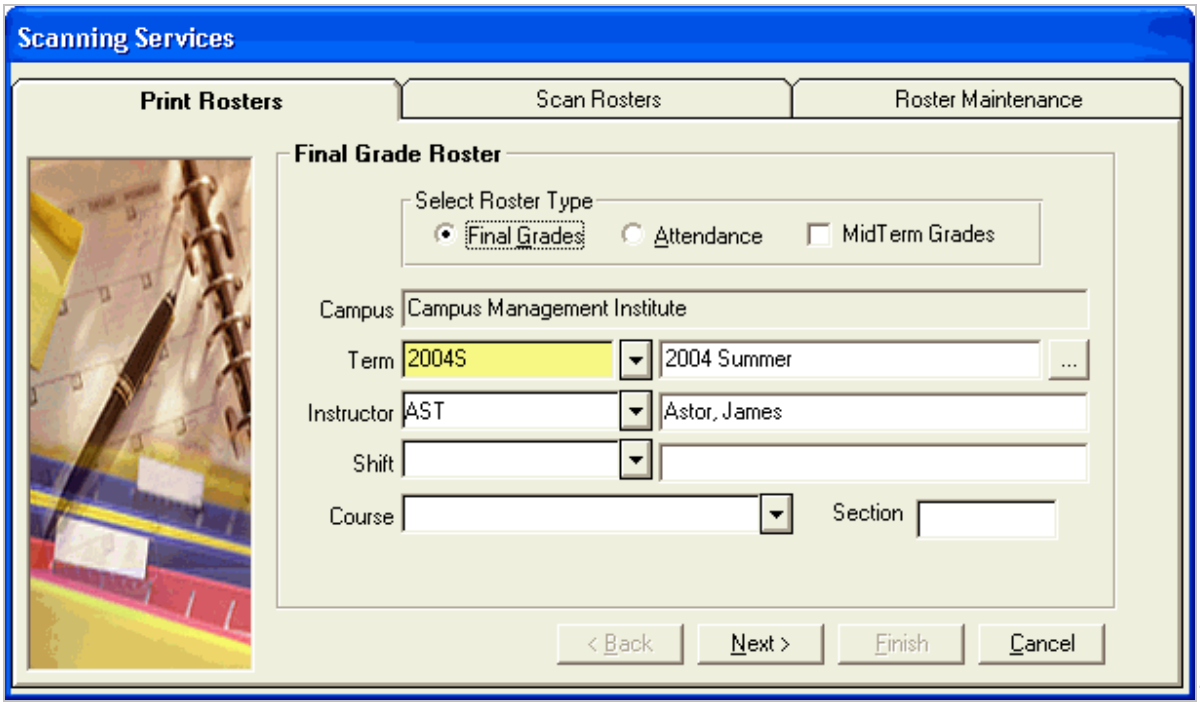
When the Attendance option is selected, the Campus defaults to the campus you are signed into. Refer to Session Defaults to change your default campus. The **Term** is a required selection. The rest of the fields on the form are included for additional selection criteria but are not required.

You cannot specify unscheduled class sections for attendance rosters. The SCANTRON attendance options are not be available for courses that meet at unscheduled days and times because there is insufficient data with which to build a SCANTRON roster. **You can print a final grade roster for an unscheduled class section.**

You must have available in your printer, a supply of the preprinted SCANTRON forms for the rosters to be printed. While it is possible to print the rosters on plain paper for test purposes, plain paper rosters cannot be scanned by the ScanMark™ optical mark reader (OMR). Note that it is not necessary to have an OMR connected to your PC to print the rosters. They are printed on your default report printer.

To print Attendance Rosters:

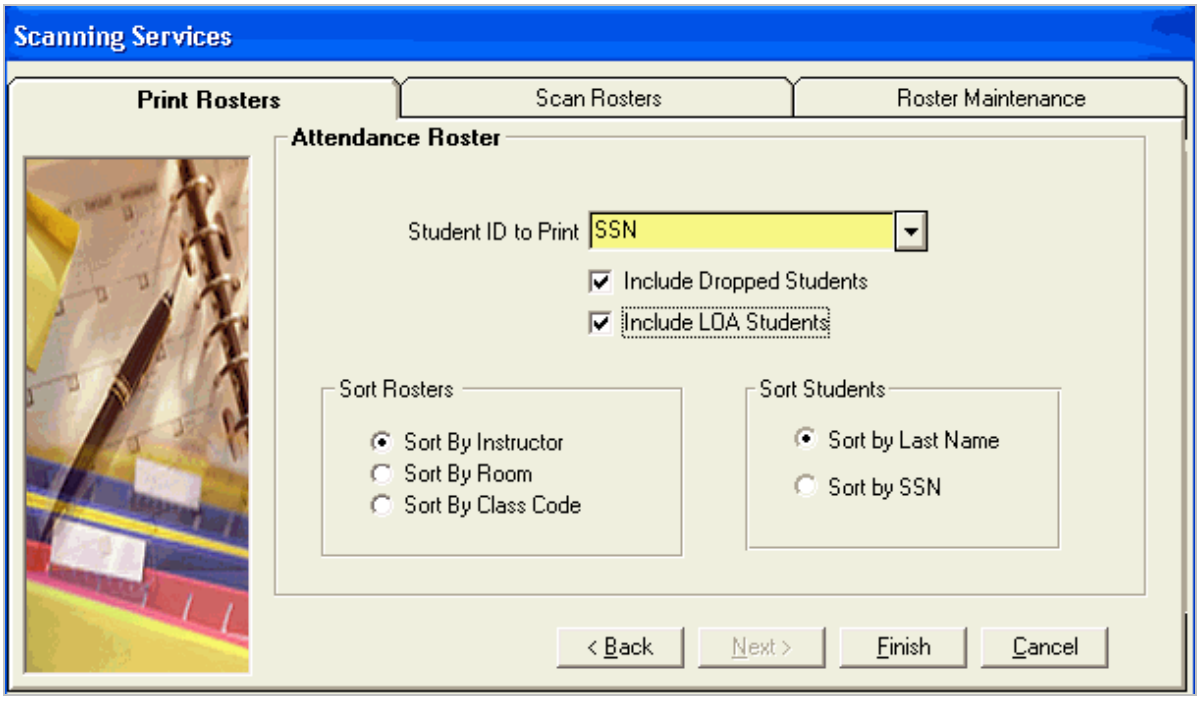
1. Navigate to **Daily** > **Academic Records> Scanning Services**. CampusNexus Student displays the Scanning Services form.
2. Click **Print Scantron Rosters**.



1

3. Select a **Roster Type**, Final Grades, Attendance, or MidTerm Grades.
4. The displayed **Campus** is your session default campus. To change the campus, you must change your session default.
5. Select the **Term** (required) for which the rosters are to be printed.

   For a campus where the floating term flag is set to Yes, Term will be replaced by Class Start Date when printing rosters for SCANTRON®. Please refer to the topic on Floating Term Class Scheduling for an overall view of this feature.
6. Other optional parameters you can select are **Instructor**, **Shift**, and **Course** (actually, class section).
7. Click **Next**



8. Select the **Student ID to Print**. The options are SSN, Student ID, Enrollment Number, and Telephone. This ID will be printed beside the students' names on the rosters to eliminate duplicates.
9. Clear or check the options for **Include Dropped Students** and **Include LOA Students**.
10. Select the order in which the rosters will be printed. The options are **Sort by Instructor**, **Sort by Room**, and **Sort by Class Code**.
11. Select the order in which the students will be sorted on the printed rosters. The options are **Sort by Last Name** and **Sort by SSN**. (Note that the SSN sort option is just that. The program does not sort on your selected Student ID to Print unless it is also SSN.)
12. Be sure the preprinted Attendance Roster forms are loaded in your default report printer.
13. Click **Finish**. The program will display the Report Selection form while it is printing the attendance rosters. When printing is finished, the program will return to page one of the Print Scantron Rosters form and will clear your previously entered parameters.
14. Click **Cancel** to close the form.

When you select the "Finish" button, CampusNexus Student gathers all records using the existing logic for standard attendance rosters. The following data items print on the SCANTRON Forms: Class Schedule ID, Instructor, Course Code, Section, Location and Time, number of records gathered, dates of attendance that will be printed on the roster.

Additionally, the Course information, Student Name and selected Student ID will be printed on the forms. The Roster ID and page number will be printed on the upper right corner of the form. If the number of students is greater than the number of rows on the form, the program will process and print the remaining students on an additional page or pages and print a new SCANTRON Roster ID and page number on each.

Machine-readable information printed on the form will be in the form of "slugs". The positions of the "slugs" are defined in the SCANTRON form definition file. They will print in the control boxes. When printed, the "slugs" must line up horizontally with the timing marks on the left margin of the form.

The student information is written to a SCANTRON Roster Detail table, this includes the SCANTRON Roster ID, Enrollment Schedule ID, the batch position of the student on the roster, and the Student ID.

Final Grade Roster

See the topics "Scantron Overview" or "OMR Scanning Setup" for descriptions of the two grade forms available for use with CampusNexus Student.

When the option to Print Final Grade Rosters is selected, the options are nearly identical to the selections when printing attendance rosters. You can, however, choose to print rosters for final grades or midterm grades. Check the Midterm Grades box if you are printing rosters for midterm grades.

Note: The option to print and scan a roster to record midterm grades requires the use of form number F-15173-CMC-L. In addition, the class section must have a lesson set up with a code of MIDTERM.

You have the same selection criteria where the campus is your default campus. The term is required, the instructor, shift, course, and section are optional. The "Next" option is like the attendance form.

You can print a final grade roster for an unscheduled class section.

The program will gather the students in the selected courses using the same logic as the final grades worksheet. If the number of students is greater than the number of rows on the form, the program will create two or more roster sheets having unique IDs and sequential page numbers for the remaining students.

A Grade Roster Detail report is printed on the preprinted SCANTRON forms. Students are listed according to your sort selection (name or SSN) on each form and the forms are printed in the print sort order you selected.

Machine-readable information printed on the form will be in the form of "slugs". The positions of the slugs are defined in the SCANTRON form definition file. They will print in the control boxes. When printed, the "slugs" must line up horizontally with the timing marks on the left margin of the form.

The Roster ID and page number will be printed in the upper right corner of the form.

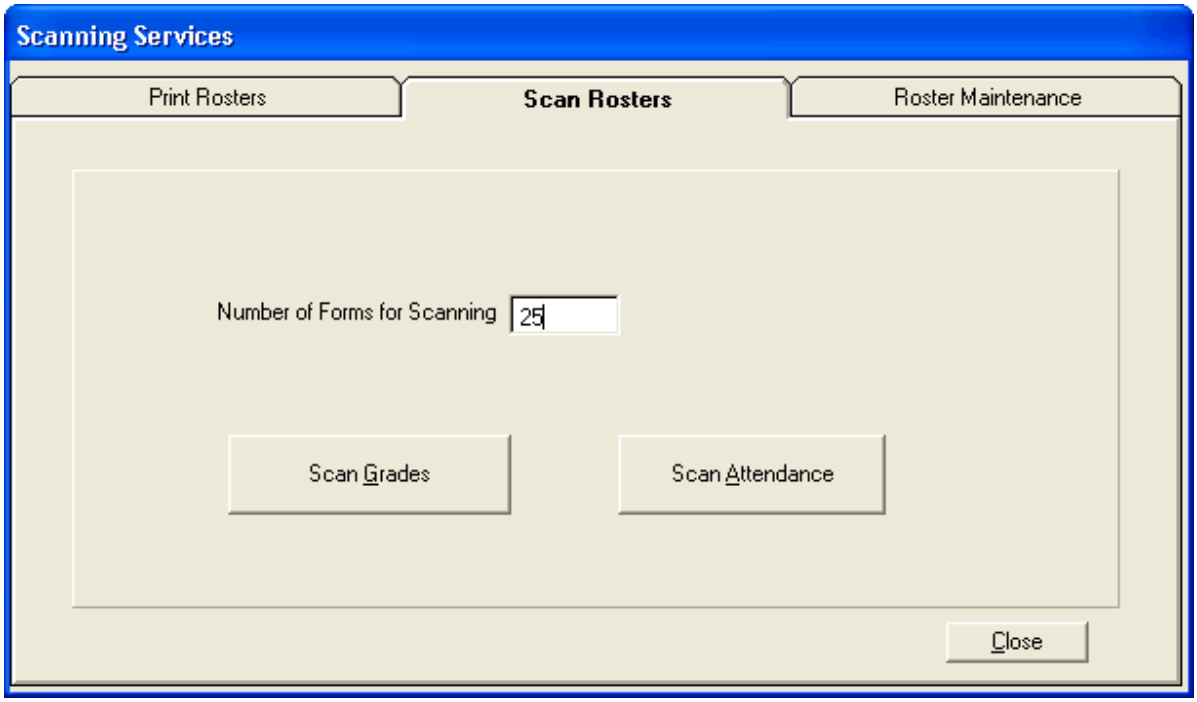
Note: Once a final grade has been posted for a student in a class section (for instance, a grade is manually posted), that student will no longer appear on a subsequently printed final grade roster for the class section.

Scan Rosters

A class roster form, attendance or grades, can be reprinted if necessary (a form is lost in distribution, for example). If two forms are submitted covering the same class section meeting dates or the same class section grades, only the first form submitted will count. CampusNexus Student will reject subsequent submittal.

To scan attendance or final grade forms:

1. Navigate to **Daily > Academic Records > Scantron**. CampusNexus Student displays the Scanning Services form.
2. Click the **Scan Rosters** tab.

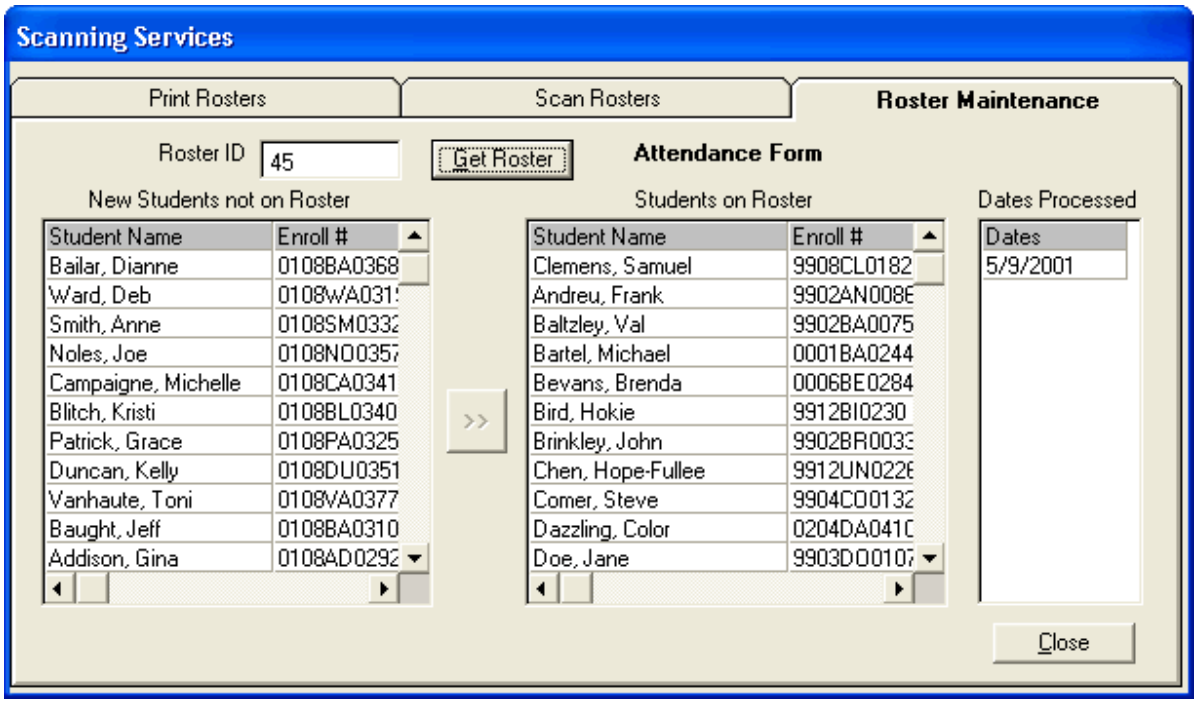


3. Enter the **Number of Forms for Scanning**. This is an optional field to help you control the number of forms you are passing through the OMR.
4. Click **Scan Final Grades**or **Scan Attendance**. CampusNexus Student sends the **form definition file**to the OMR. Depending on whether you selected attendance or grades, CampusNexus Student uses your form selection to send the correct form definition file to the SCANTRON machine. (Form definition files have a file name extension of .800.) If the OMR confirms to CampusNexus Student that it has received the file, the program will display a message that the system is ready to process forms.
5. Click **OK**to continue. CampusNexus Student waits for the return of the text string(s) from the OMR. The machine will create a text string based on the format defined in the form definition file. This data will then be interpreted and imported into CampusNexus Student.
6. Feed the attendance or final grade forms through the OMR. The forms can be fed to the OMR in any order. When CampusNexus Student detects that you have scanned the number of forms you entered in step 3 above, it will stop the scanning process. Alternatively, if you do not enter the number of forms to be scanned, you can scan as many forms as you like and press the **End** button on the OMR when all forms have been scanned. While the forms are being scanned and processed, CampusNexus Student displays a message.

CampusNexus Student processes each form completely after it is scanned. The data from the form is applied to the records of the listed students before the next form is read. If the Scantron OMR rejects a form, none of the data on that form is applied to the CampusNexus Student database. See "Rejected Forms" below.

CampusNexus Student and the OMR can detect a number of abnormal conditions while you are scanning forms. Some examples are:

- Scanner Timed Out -- you did not scan a form within 90 seconds of the start of the scanning process or since the last form was scanned.



- A form has been previously scanned. Grade forms can only be successfully scanned once. Attendance forms can be scanned a maximum of once for each date on the form. When all dates are scanned, any subsequent scan will be rejected by CampusNexus Student.
- The OMR can reject a form that is not properly marked. Forms rejected by the OMR do not count as scanned. You as the operator may be able to correct a form and rescan it. Otherwise, you may have to print a new form for the same class section and period of time and transfer the marks to the new form. Another solution for a form that cannot be read by the OMR is to post the data via the batch posting procedures in CampusNexus Student.
- No rosters were processed. You started the processing but did not successfully scan any forms.

7. When the scanning of forms finishes normally, CampusNexus Student displays a list of the Roster IDs scanned. A "Processing Complete" message box is displayed. When you select **OK**, CampusNexus Student may display a second message box listing rosters that were not processed because they had been previously scanned. Click **OK** to close this message also.
8. Click **Close** to close the form.

Rejected Forms

Forms that are rejected by the SCANTRON unit must be corrected and resubmitted or posted manually. Rejected forms are not considered as processed by CampusNexus Student. Therefore, if the instructor's intention can be determined and corrected by

the SCANTRON operator, the form can be resubmitted. If the form is so damaged physically that the SCANTRON unit cannot process it, you must print and mark another roster. Alternatively, you can manually post the data from the form through the CampusNexus Student batch attendance or batch grade posting procedures.

Scan Attendance

CampusNexus Student reads the incoming file, first by identifying the SCANTRON Roster ID. Using the SCANTRON Roster table, it then identifies the Class Schedule ID and matches the SCANTRON Roster Dates table to determine which dates on the roster need to be updated.

Using the SCANTRON Roster Detail table, the program updates the attendance records for the selected students. The attendance update logic is identical to the existing method of batch posting attendance. After posting the attendance data, the program updates the SCANTRON Roster Dates Scan Flag to true for the dates posted. If all date fields for the selected SCANTRON Roster ID have the scan flag set to True, the SCANTRON Roster Status flag is updated to "C - Complete".

Note: CampusNexus Student does not distinguish the **time of day** when posting attendance. It only looks at the dates. For example, if an instructor records "attendance" on a SCANTRON form Friday at 8:00 A.M. for a class that meets Friday at 1:00 P.M., turns it in at 9:00 A.M., and leaves for the weekend, and the form is processed Friday at 10:00 A.M. CampusNexus Student looks only at the date in the Friday column on the form, compares it to the current date, and accepts the "future" attendance.

Scan Final Grades

CampusNexus Student reads the file, first identifying the SCANTRON Roster ID. Using the SCANTRON Roster table, it then identifies the Class Schedule ID and the students on the rosters using the SCANTRON Roster Detail table. It updates the appropriate records in the Class Schedule table and Enrollment Schedule table to finalize the grade posting. CampusNexus Student uses the same logic as the Daily/Academic Records/Final Grades batch entry form uses. No numeric grades will be recorded. Once the update is complete, a "Final Grade Processing Complete" message is displayed. Once a final grade form has been scanned, scanning it again has no effect.

Scantron Roster Maintenance

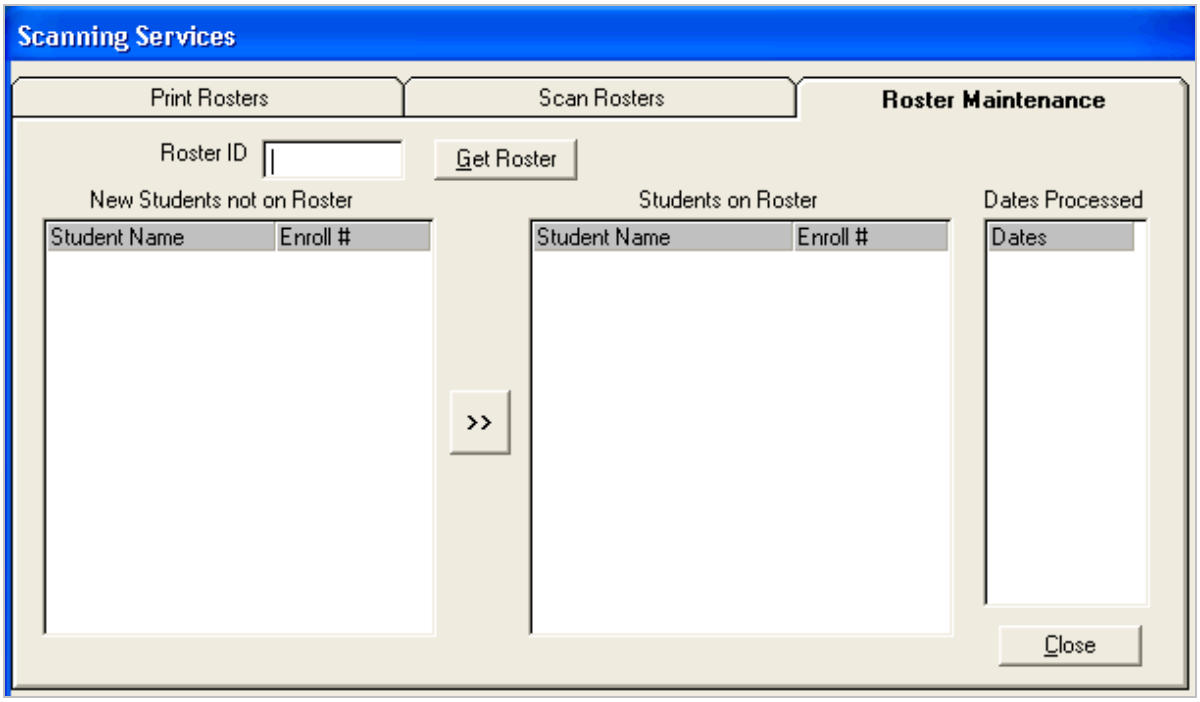
SCANTRON and ScanMark are registered trademarks of SCANTRON Corporation.

Note: Please read Scantron Overview for an overall review of the CampusNexus Student/SCANTRON Interface.

This option shows the students on the **previously printed roster** in the list on the right side of the form and new students added to the class section after the roster was printed on the left side of the form. If the roster was not completely processed (Status C), you can add the new students to the roster. A message box with the student position on the form is displayed. If the roster is for Attendance (Form Type A), a list of dates already processed for the roster will also be displayed on the Roster Maintenance tab. Dates Processed does not apply to Final Grades forms (Form Type G).

To work with the Scantron Roster Maintenance feature:

1. Navigate to **Daily > Academic Records > Scanning**. The Scanning Services form is displayed.
2. Click the **Roster Maintenance** tab.



3. Enter a Scantron Roster ID. You can get roster IDs from the top of a printed roster form or from the Roster Status Report. It is not necessary to enter leading zeros from the roster ID.
4. Click **Get Roster**. CampusNexus Student displays a list of the **Students on Roster**, **New Students not on Roster** and **Dates Processed**. Dates Processed applies to attendance rosters only. If the roster ID you enter has been completely processed, a message is displayed.
5. To add a new student to the roster, select the student in the **New Students not on Roster** column and click the move button (>>) . The selected student will be moved to the bottom of the Students on Roster column. This represents the position in which the student can be "written in" on the previously printed roster.

   It is important to maintain the order in which new students are added to the roster when hand-writing them on the previously printed roster. They must be added on the next consecutive line(s) of the form. CampusNexus Student depends on the position of the students on the roster to properly read the marks and update their records. The

instructor or Scantron operator can "write in" the student on a previously printed roster. The student's name must appear in the order shown in the Roster Maintenance list. In other words, the first student added must appear on the first line below the printed list, the second student added must appear on the next line, and so on.

Note that new students in a class section will be automatically added to any future rosters that are printed.

6. Click **Close** to close the form.

Troubleshooting Scantron

Once it is installed and configured properly, the SCANMARK Optical Mark Reader (OMR) will provide an efficient means of recording attendance and grades. Here, we are offering some suggestions of things to look for if problems arise. For specific details concerning your OMR, please consult your SCANTRON representative or service technician.

If these tips do not solve your problem, please reread the other Scantron topics in the Help system. If that doesn't help, contact Support (1-800-483-9106).

Scantron Trouble Symptoms and Solutions

Symptoms	Solutions	Comments
The Power light is not lit on the SCANMARK OMR.	Make sure the power connector is fully inserted on the back of the OMR and the plug is fully inserted in the power source (a wall outlet or, preferably, a surge protector). Turn on the OMR. The power switch is on the back of the unit. Check for power to the outlet (circuit breaker, wall switch, etc.)	

Symptoms	Solutions	Comments
Communication cannot be established between the PC and the SCANMARK OMR.	In CampusNexus Student, go to Setup > Academic Records > Scantron. Click the Test Communications button to determine if communication has been established between the PC and the OMR. If the result is negative, check the settings below. Confirm that you are using the proper null modem cable to connect the two units. Refer to the SCANMARK User Guide for information about the correct cable. Make sure the cable is connected securely to the correct COM port on the PC (there are usually two ports) and to the correct jack on the back of the SCANMARK unit (there are two connection points. Consult the User Guide to locate the correct one.) Confirm that the communications protocol for the COM port is the same as that of the OMR unit. We recommend that you use the factory default settings of the OMR: • Baud rate: 9600 • Word length: 8 Bits • Stop bits: 2 Bits • Parity: None • Clear-to-Send (CTS): Off • Handshaking: None • Command Prefix: ASCII <ESC> (decimal 27) • End-of-Form: ASCII <CR> (decimal 13) • Threshold: Pencil - 42 (Ink - 30) • Difference: Pencil - 57 (Ink - 69) If you need to reset the OMR to its default settings, follow the directions in the SCANMARK User Guide. You will need to have available a properly marked configuration form to reset the OMR. If your school is running CampusNexus Student via Citrix on a terminal server, remember that you must command the Citrix server to map the server's COM port to the PC's COM port. Ask your system administrator to help you with this. On the server, run the command: **NET USE COMx: \\CLIENT\COMz** where **x** is the port number on the Terminal Server and	If the communications test is still unsuccessful after these checks, call your Scantron technician. Whether your PC can communicate with the OMR has nothing to do with CampusNexus Student. If the units can talk to each other, the CampusNexus Student Scantron-related procedures will work.

Symptoms	Solutions	Comments
	z is the port number on the local PC. Refer to the topic titled "Scantron Overview" for more about checking the PC's COM port settings for the Windows operating system you are using.	

Symptoms	Solutions	Comments
The OMR is not reading the forms correctly.	Always buy your forms from SCANTRON Corporation. The forms are very precisely designed and manufactured for use with OMRs. Do not change the design of the forms by altering the location of the rows, columns, and "bubbles" on the forms. (About the only thing you can change is the addition of a school logo in a non-readable area of the form, perhaps at the top or on the back. You can change the ink color on the forms as long as you consult with SCANTRON and use their recommended inks. Note that your school name and the class section identification data is printed at the top of the form by CampusNexus Student. Instructors should use a Number 2 pencil to mark the forms. Other marking devices such as ball point pens felt tip pens are not as reliable. A pencil mark can be erased and remarked or cleaned up a little to make an otherwise unreadable form readable. Use only a good-quality **laser printer** to print the attendance or grade rosters. Ink-jet printers do not have sufficiently reliable paper control to print scannable rosters. Confirm that the "slugs" identifying the roster number are centered (or very nearly centered) in the bubbles at the top of the form. The OMR can tolerate a little "slop" when the slugs are printed on the form but not much. For instance, a slug that falls between two bubbles will result in a "Zone Error" message on the OMR's LED display. This is not a CampusNexus Student problem, it is a Printer problem. Find a printer that can accurately print the slugs in the bubbles. The slugs that identify the roster number must also be aligned horizontally with the timing marks on the left edge of the form. Again, a very small margin of error is acceptable in the horizontal alignment of the slugs and timing marks. There can be no vertical overlapping of slugs between bubbles. Periodically clean the read head and paper path on the OMR. Refer to the SCANMARK User Guide for cleaning instructions. Check for pieces of forms in the paper path of the OMR. Forms that constantly jam in the paper path of the OMR indicate that the rollers may be out of alignment. Call the Scantron Service Technician.	

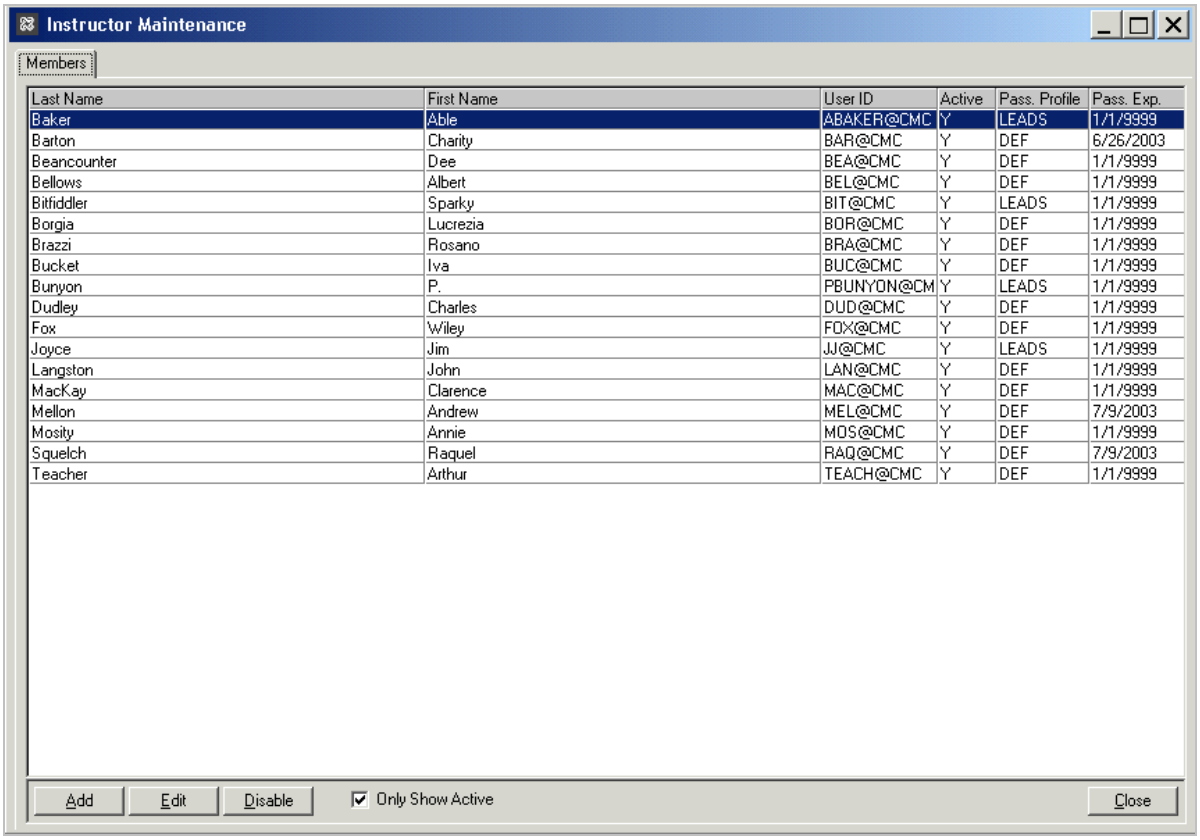
Symptoms	Solutions	Comments
Other form-related problems	Be sure you are scanning the forms that go with the form definition file you downloaded to the OMR. For instance, do not attempt to scan attendance forms after having downloaded the grade form definition file and vise versa. Be sure you are scanning the correct form according to the setup parameters in CampusNexus Student. Damaged forms usually do not scan properly. If a roster is torn, wrinkled, folded, stapled, or otherwise not in pristine condition, you may have to bag it and post the data manually in CampusNexus Student. See Daily > Academic Records > Attendance > Record Attendance. Do not allow any extraneous notes or markings within the range of the timing marks on the form. Users should not make notations on the forms. Anyway, the machine can't read them. Check for double marks in the same column for the same student, for example, a present and an absent mark on the same day for the same student. Check for light marks that may not pass the "threshold" of "darkness" and thus cannot be recognized as a real mark.	

Symptoms	Solutions	Comments
CampusNexus Student Setup Problems	Please read the setup topic titled "OMR Scanning Setup". Be sure the five form definition files are in the folder indicated in "Path to Scantron Files". Be sure the COM Port indicated in "Scantron Com Port" is the one to which the cable from the OMR is connected. If you are using form 15173, be sure that the correct grade scale has been selected and that the grade codes have been selected before scanning the grade forms. If you are trying to scan grade forms for midterm grades, be sure that each class section has a lesson defined with a code of MIDTERM. See Daily > Academic Records > Schedule Classes > Lessons. If you are using form 10873 or form 15174 for attendance posting, be sure to indicate a tardy percentage. If you are using form 15175 for attendance posting, be sure to define the meanings of the 10 code bubbles. In other words, Code (bubble) 1 is Present, Code 2 is Absent, Code 3 is Excused, Code 4 is 10 percent tardy, and so on.	The "Path to Scantron files" must be on the PC to which the SCANTRON optical mark reader (OMR) is attached. The scanning process does not work reliably when these files are transferred during scanning from a network server through the PC to the OMR. It is a "timing" issue in which the OMR frequently times out before the file transfer from the server is completed. The SCANTRON files are installed at `C:\Program Files\CMC\CampusNexus Student`. (Note that this implies that you can attach the Scantron unit to any PC running CampusNexus Student.) You can use this path or you can copy the files to a separate SCANTRON directory, for example, `C:\Scantron`. The attendance and grade form definition files are static and do not change during processing.
Other Problems	Please reread the other Scantron topics, including Scantron Overview, Scantron, Print Scantron Rosters, Scan Rosters, Roster Maintenance, and OMR Scanning Setup.	If you cannot find an answer in the documentation, call or email Support (1-800-483-9106). support@campusmgmt.com

Instructor Maintenance

The daily maintenance function enables staff members at campus levels to add new instructors, and update information for existing staff members.

1. Navigate to **Daily > Academic Records > Instructor Maintenance** path. The Instructor Maintenance form is displayed.



Last Name	First Name	User ID	Active	Pass. Profile	Pass. Exp.
Baker	Able	ABAKER@CMC	Y	LEADS	1/1/9999

2. Upon creation of a staff member through the Daily menu, you will be prompted to enter the remaining user information, such as name, address, department, etc. All other required fields are gathered from the template and written to the new staff record when added.
3. Select the **Only Show Active** check box to display only active Instructors.
4. Select an Instructor and click **Disable** to deactivate an Instructor or click **Enable** to activate a staff member that has been deactivated.
5. Select **Add** to add a new staff member, or select existing staff members and click **Edit** to modify their information.

   Note: Since CampusNexus Student allows users to make staff member configuration changes through the Instructor Maintenance form, all changes will be audited. Audit verifications are handled at the database level only and performed through appropriate SQL queries.
6. The **Members** tab displays staff members associated with the Instructor Group.
7. When you select a staff member to edit, the Staff Information screen is displayed. The information on the Home

Address tab, Work Address tab, and HR Info tab will be fully displayed.

8. The User Info tab will allow for the Campus Group association, and the initial password creation (upon Edit, password options are hidden).
9. The Groups tab has the Admission Rep default group as a permanently selected group for the staff member. Additional groups can be assigned to the new staff member if the groups have been identified as Admission Rep groups within the new staff group attribute. The user may select to assign a Setup Template from the templates associated with the selected staff groups. The Setup Template defines the user-level permissions and Contact Manager policy for the staff member being created.
10. Click Picture to access the Instructors picture.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Associate Instructors to Courses

Institutions can associate instructors with a specific course (for example, ENG101), course code prefixes that begin with, for example, ' ENG', and/or courses based on Course Level (for example, Undergraduate 300/400 Level). Users can designate a Staff member per campus to be the course owner. The selected person does not have to be a Staff member of type Instructor. Refer also to Instructor Maintenance, Staff Group, Course List and Schedule Classes.

Staff members or staff groups can be given the capability to override the instructor course association. Staff member override capability is configured in the User Info Academic Records - sub tab, while staff groups are configured through the Setup Template. If the override instructor course association option is enabled, then during scheduling classes, that particular staff will have all the instructors (based on current campus) available for selection, irrespective of the fact that an Instructor/Course association is defined.

Institutions can define available Instructors for a course at a campus level, by designating Instructors to courses by any or combination of course code (for example, ENG, MTH, etc.), course number for example, 100, 200) and course level (for example, Graduate, Undergrad, All).

The following rules and features apply:

- One or multiple instructors can be associated with the courses.
- Only one Instructor can be defined as the 'Owner' of a course.
- Any association between any instructor/course can be deleted or made inactive.
- When you schedule a class, only Instructors associated with the course will appear for the selected course.
- If Instructors have not been assigned to a course, when setting a schedule for the course, CampusNexus Student defaults to 'All' instructors.
- A report is provided for Instructor/Course allowable assignments.

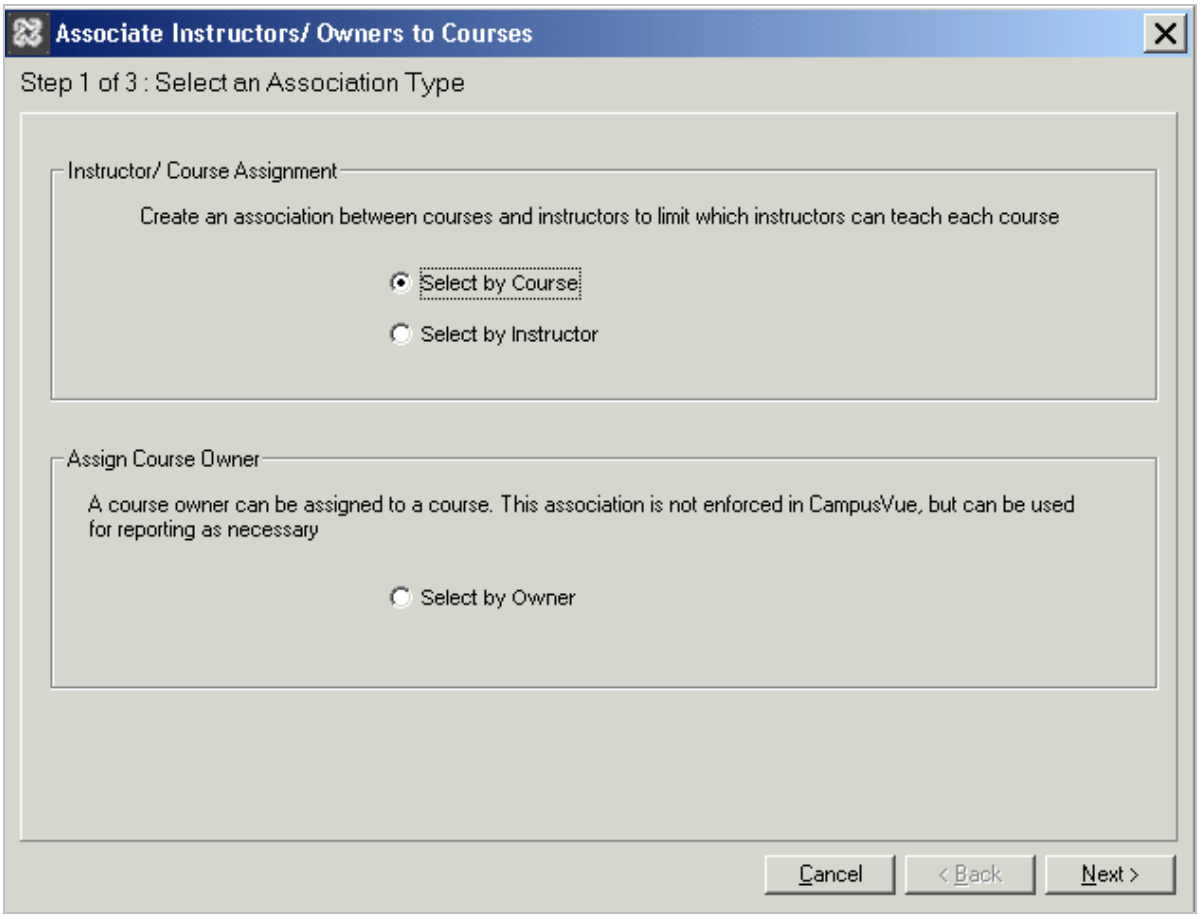
To associate instructors to courses

1. Navigate to **Daily > Academic Records > Associate Instructors to Courses**. The Associate Instructors to Courses wizard is displayed.

   CampusNexus Student provides three options for associating instructors/owners with courses: by Course, Instructor, or Owner.

Step 1 of 3: Select Association Type:

If the override option is selected, then during scheduling classes, that particular staff member will have all the instructors (based on current campus) available for selection irrespective of the fact that an Instructor/Course association is defined.



Associate Instructors/ Owners to Courses
Step 1 of 3 : Select an Association Type
Instructor/ Course Assignment
Create an association between courses and instructors to limit which instructors can teach each course
Select by Course
Select by Instructor
Assign Course Owner
A course owner can be assigned to a course. This association is not enforced in CampusVue, but can be used for reporting as necessary
Select by Owner
Cancel

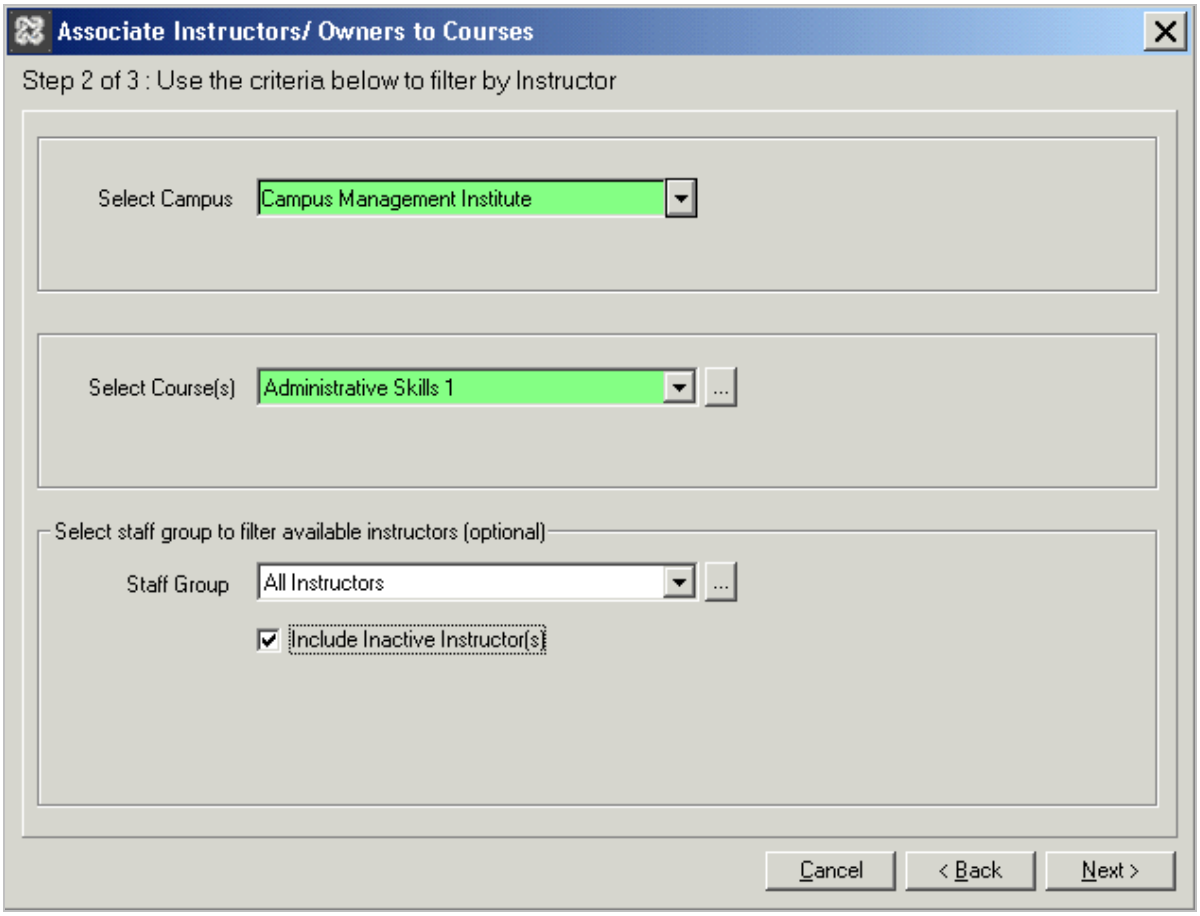
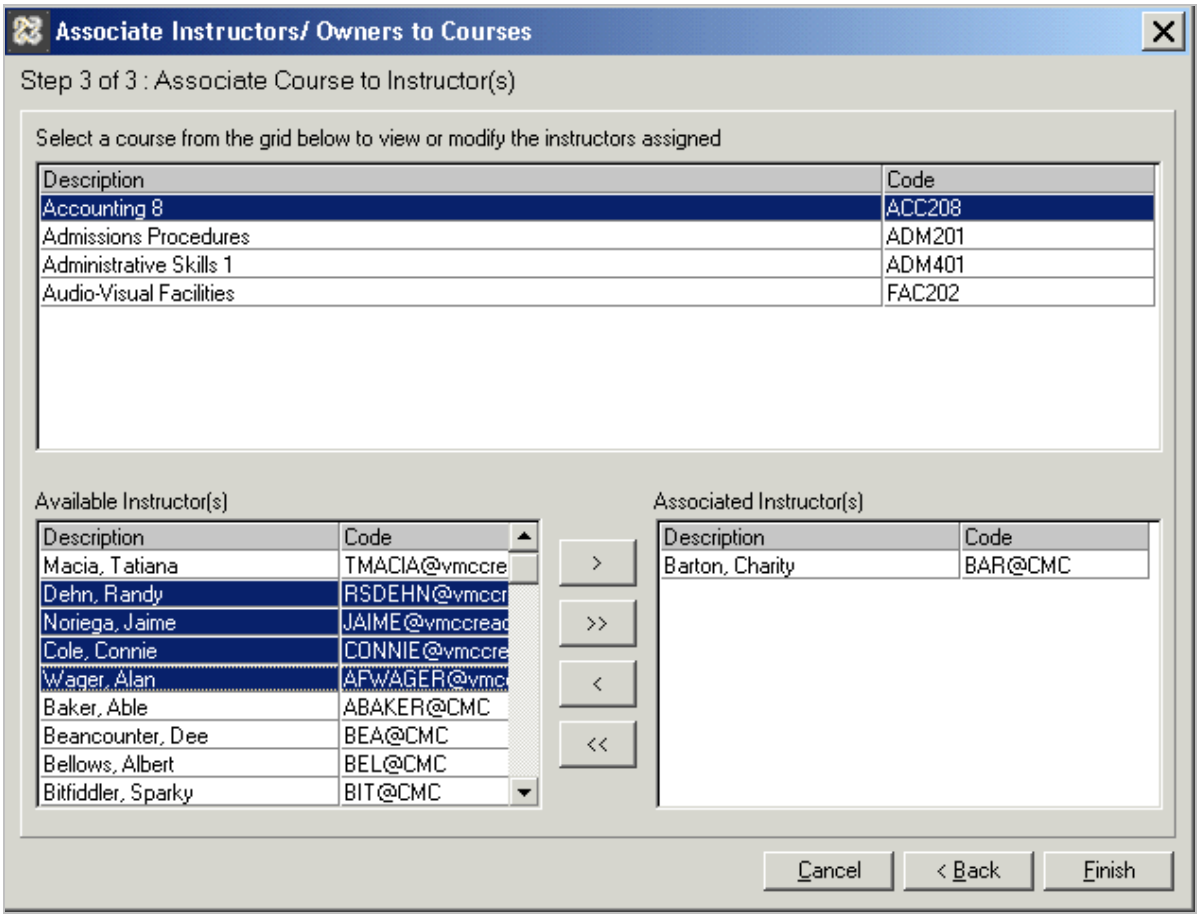
Select by Course

1. Choose **Select by Course** and click **Next**. Step 2 of 3: Use the criteria below to filter by Instructor is displayed.



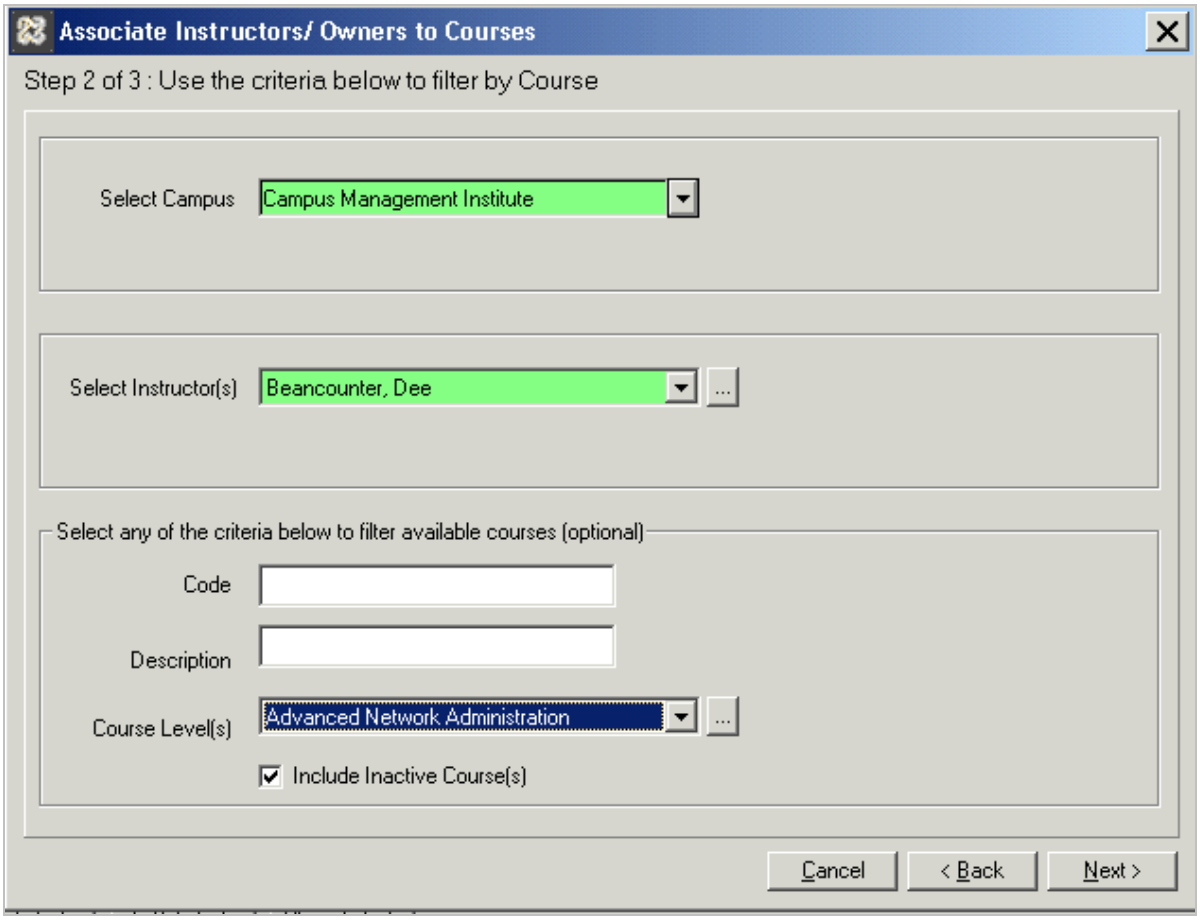
2. Select a **Campus**.
3. Select a **Course** from the list or click ... to select multiple courses.
4. Select a **Staff Group** from the list or click ... to select multiple staff groups.
5. When the **Include Inactive Instructor(s)** option is selected, inactive instructors may be selected from the **Staff Group** list.
6. Click **Next**. Step 3 of 3: Associate Course to Instructor(s) is displayed.



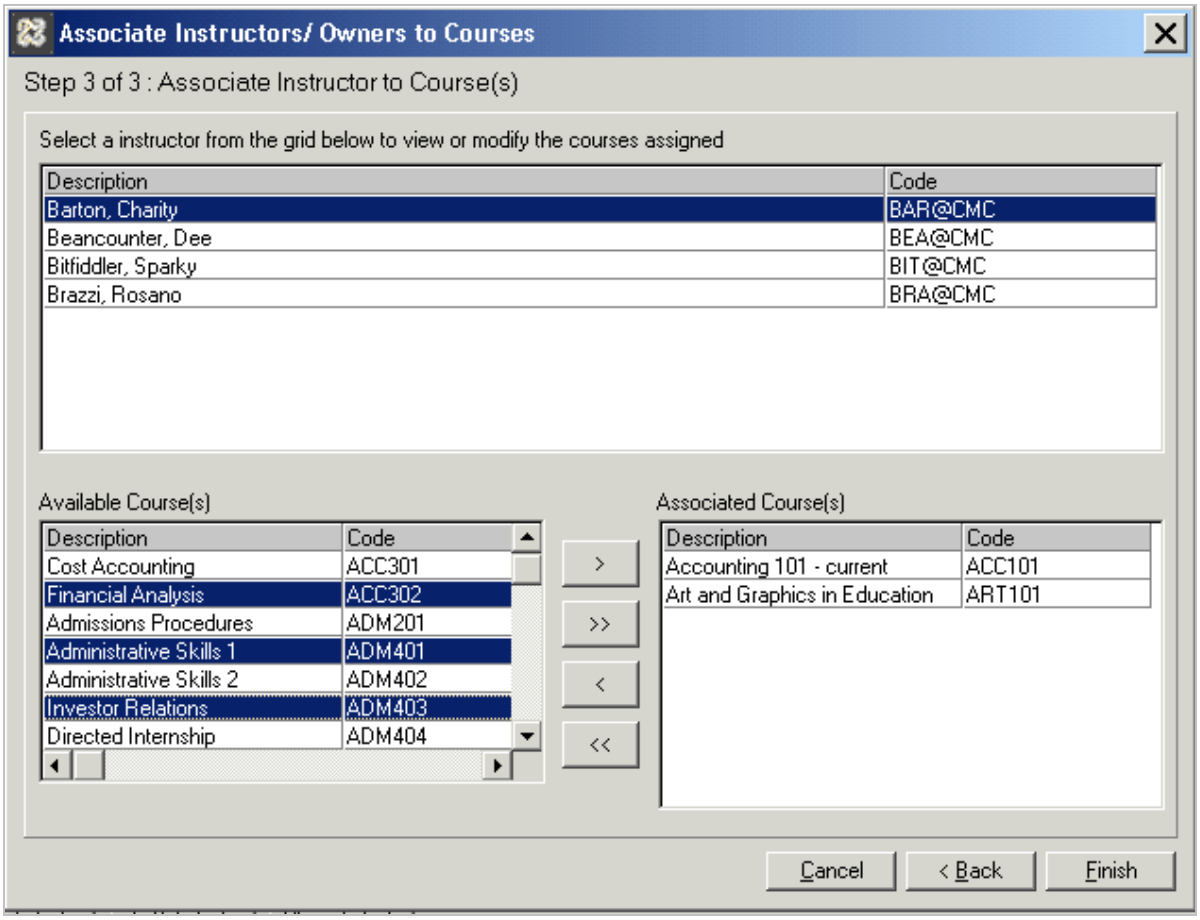
7. Select a **Course** from the top portion of the screen.
8. From the Available Instructor(s) list, select an instructor and then click the **>** arrow, or click the **>>** arrow to move all instructors from the **Available Instructor(s)** list to the **Associated Instructor(s)** list. You can also use the **Shift + down arrow key** to highlight several instructors at once and then click the **>>** arrow to move available instructors to the associated instructors.
9. Click **Finish** to associate the selected Course(s) with the selected Instructor(s).

Select by Instructor

1. Navigate to **Daily > Academic Records > Associate Instructors to Courses**. The Associate Instructors to Courses wizard is displayed on Step 1 of 3: Select Association Type.
2. Choose **Select by Instructor** and click **Next**. Step 2 of 3: Use the criteria below to filter by Course is displayed.



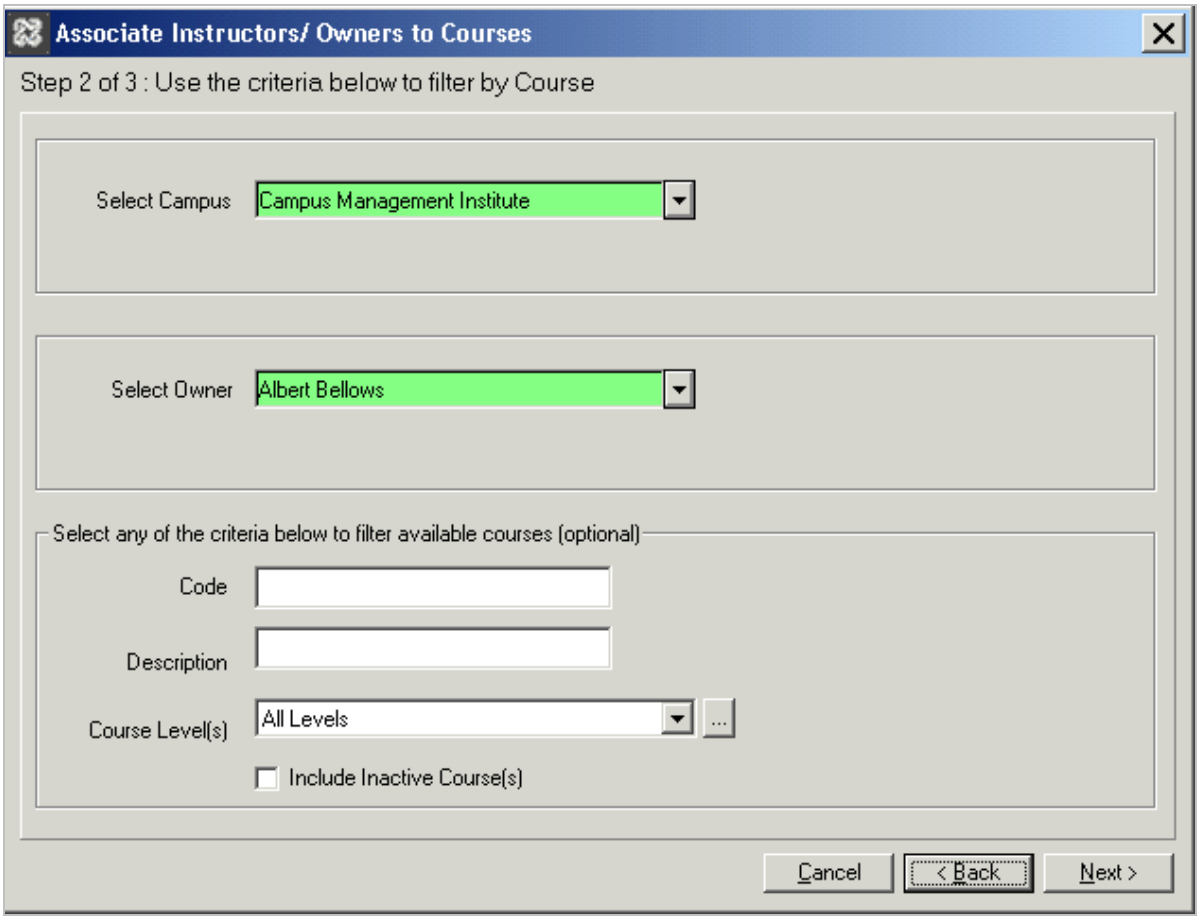
3. Select a **Campus**.
4. Select an **Instructor** or click ... to select multiple instructors.
5. Select additional criteria to filter available courses. The optional fields are **Code**, **Description**, and **Course Level (s)**.
6. Select a **Course Level** or click ... to select multiple courses. Select the course that you would like CampusNexus Student to return in the search results in Step 3.
7. Click **Next**. Step 3 of 3: Associate Instructor to Course(s) is displayed.



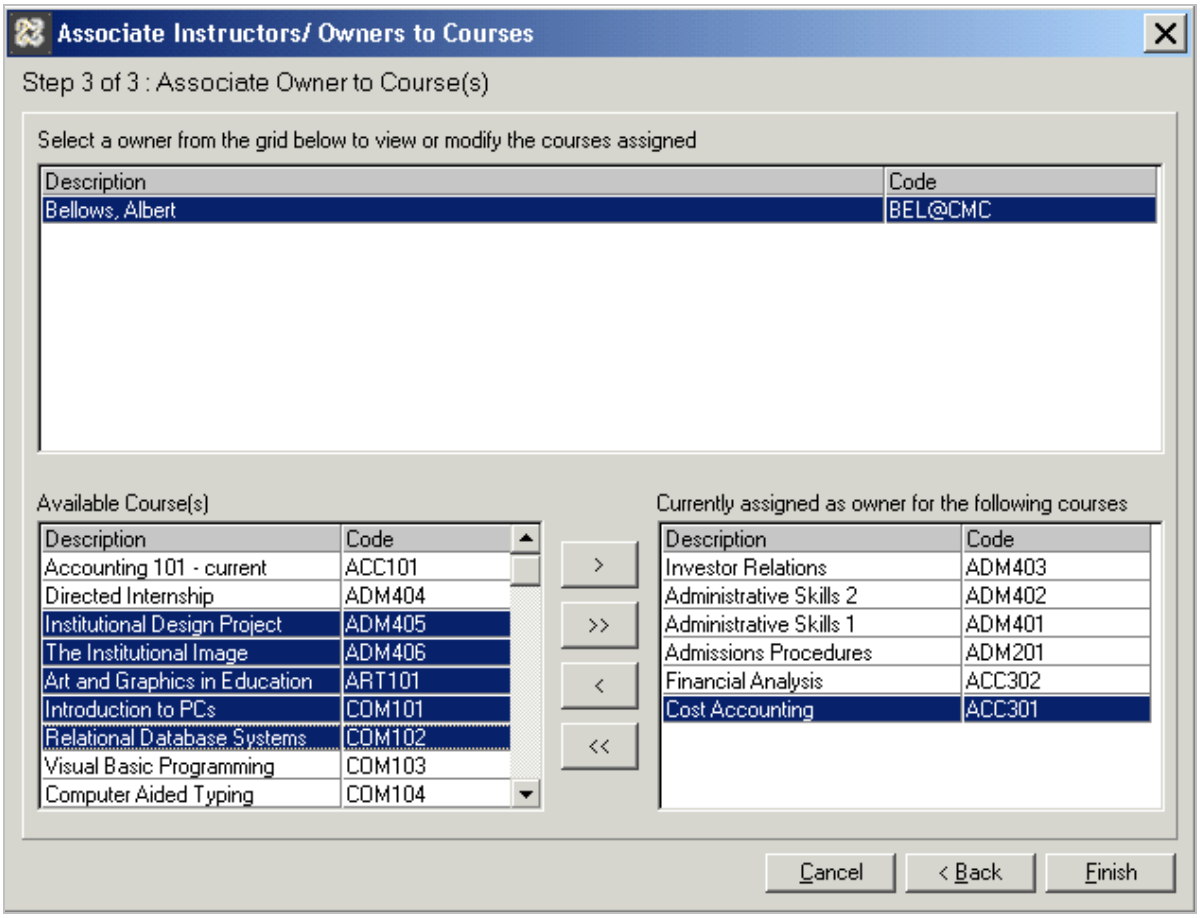
8. Select an **Instructor** from the top portion of the screen.
9. From the Available Course(s) list, select a course, and click the **>** arrow, or click the **>>** arrow to move all courses from the **Available Course(s)** list to the **Associated Course(s)** list. You can also use the **Shift + down arrow key** to highlight several courses at once and then click the **>>** arrow to move available courses to the associated instructors.
10. Click **Finish** to associate the selected Instructor(s) with the selected Course(s).

Select By Owner

1. Navigate to **Daily > Academic Records > Associate Instructors to Courses**. The Associate Instructors to Courses wizard is displayed on Step 1 of 3: Select Association Type.
2. Choose **Select by Owner** and click **Next**. Step 2 of 3: Use the criteria below to filter by Course is displayed.



3. Select a **Campus**.
4. Select an **Owner**.



5. From the Available Course(s) list, select a course, and click the **>** arrow, or click the **>>** arrow to move all courses from the **Available Course(s)** list to the **Associated Course(s)** list. You can also use the **Shift + down arrow key** to highlight several courses at once and then click the **>>** arrow to move available courses to the associated owner.
6. Click **Finish** to associate the selected Owner with the selected Course(s).

Status Change in Academic Records

Academic Records Department staff can manually change the status of a student. The choices of which statuses can be changed to which other statuses are controlled by the system administrator through the Status Code Setup procedures under the Setup menu.

CampusNexus Student checks the number of days allowed for status changes in the campus setup. If you enter a date that is older than the number of days allowed for the campus, a message is displayed. If you have "Override" permission, the status change is allowed. If you have "No Override" permission, the status change is not allowed until you enter a valid date.

CampusNexus Student allows only one status record for a date. If there is already a status record for a date, you must update the status rather than writing a new record.

You can access the Status Change form multiple paths, for example:

- View > Academic Records > Enrollment > Status History (button) > Change (button)
- Daily > Academic Records > Batch Status Change
- Daily > Academic Records > Status Change

Whether the status of the individual student is being changed or multiple students in a batch, if the status is changed to Drop, CampusNexus Student drops current classes. CampusNexus Student checks the add/drop date configuration to determine if the drop occurred before or after the add/drop date. If the 'Add Drop Flag' is configured to 'S - Course Section Enforced' for the course section's campus, the add/drop date at the course section level is used.

See also Tracking NDS students.

To change the status of a student:

1. Navigate to **Daily > Academic Records > Status Change**. The Status Change form is displayed.
2. Select or find the **Student** whose status is to be changed.
3. Select an **App/Enroll** in which the student's status is to be changed. CampusNexus Student displays the student's Current Status.
4. Select the **New Status** from the drop-down list. You can only change the status to one of those in the drop-down list. This list is controlled by the policy of your institution and by the requirements of CampusNexus Student.

   When you change a student's status from active to Leave of Absence (LOA), CampusNexus Student includes current and scheduled classes in the update.

   When you change a student's status to a Permanent Out category, the Loan Status is updated to "Grace". Set the Loan Status Effective Date to the AdEnroll Status Date, and set the Repayment Date to the AdEnroll Status Date + the Grace Days. Each field change adds a record to the Loan Management Status Change History table.

   When you change a student's status to a Drop system status for a single student, or during the Batch Status Change process, the "Drop Date" field is renamed to "Date of Determination".

   When you change a student's status to a Drop system status from any of the following paths in the application, validation on Date of Determination is performed when you save the status change (rather than when you move out of the field):

   - Daily > Status Change
   - View > Admissions > Status History > Change (button)
   - View > Academic Records > Enrollment > Status History (button) > Change (button)
5. Select a **Reason** from the drop-down list.

Before a reason code can be used here, it must be set up under Lists > Academic Records > Reasons. A reason code must be specified when posting a batch status change if at least one reason code has been attached to the status to which the student(s) are being changed.

The Reason field is disabled when you open this form. After you select the new status, the program check if at least one row exists in the Reason table where the School Status ID equals the status to which the students are being changed, and the Campus Group ID contains the campus listed at the top of the form. If at least one row is found in the Reason table, the background color of the Reason field changes to the color that identifies required fields. The status change will not take place when you click Save if the Reason is left blank. If no rows are found in the Reason table, the Reason field remains disabled.

6. Enter any **Comments** necessary to explain the status change.
7. Click **OK** to save the status change. A confirmation message is displayed. Click **OK** again.

Notes on Status Changes

Changing Status from Active to LOA

When you change a student's status from active to Leave of Absence (LOA), CampusNexus Student includes current and scheduled classes in the update.

Temporary Out Status

When a record is selected where the system status is a category of "T - Temporary Out", CampusNexus Student displays the begin and return date. If the new status is a type where the category is "T", the program displays the value of the begin date and return date fields. For example, you are prompted to enter a "Begin Date" and "Return Date" when you change the status to LOA.

Graduate Status Change

When you change a student to "Graduate" status, you are prompted for the graduation date and Last Date of Attendance (LDA). If you try to change the status of a student who is still taking classes to graduate, a message states that you cannot change the status. In this case, post final grades for all courses before changing the status.

The Status Change form defaults to the LDA date when changing status to GRAD, COMPLETE, or DROP. When changing a status to DROP, the system prompts for a LDA (last date of attendance). This gives you the option of overriding it or leaving it as is without accidentally changing the LDA to the current date and without forcing you to go to another form to look it up. This logic applies on all status changes that allow the LDA to be overwritten (Grads, Completes, Drops).

Never Attended or Cancellations

When you change the status of a student with an award package to Never Attended, CampusNexus Student checks for any awards where all associated disbursements have been set to a status of Canceled and sets the status for the award records to Canceled as well.

When you post a Drop status change, CampusNexus Student changes the status of the student's current classes to Drop and it *unexpects* (or cancels) financial aid. All financial aid disbursement statuses are set to Canceled, regardless of the fund source.

When you change a student's status to Cancel, or Application Rejected, you must enter an effective date. CampusNexus Student includes a stored procedure that runs nightly. This procedure checks the status change file.

When a student cancels an enrollment, i.e., notifies the school that he or she will not be attending classes, the student's status is usually changed to Canceled. To change a Canceled status to New Lead status, use the Student Master form. You cannot change a Canceled status to a New Lead status using the Status History form. This can only be done from the Student Master form.

Non-Degree-Seeking (NDS) Student Statuses

The prompts on the Status Change form (frmAdStatusChange.frm) for various dates and other information are based on the type of status change that is taking place. These include Non-Degree-Seeking (NDS) status codes and categories when setting the

prompts.

Standard status changes and changes to NDS enrollments are similar.

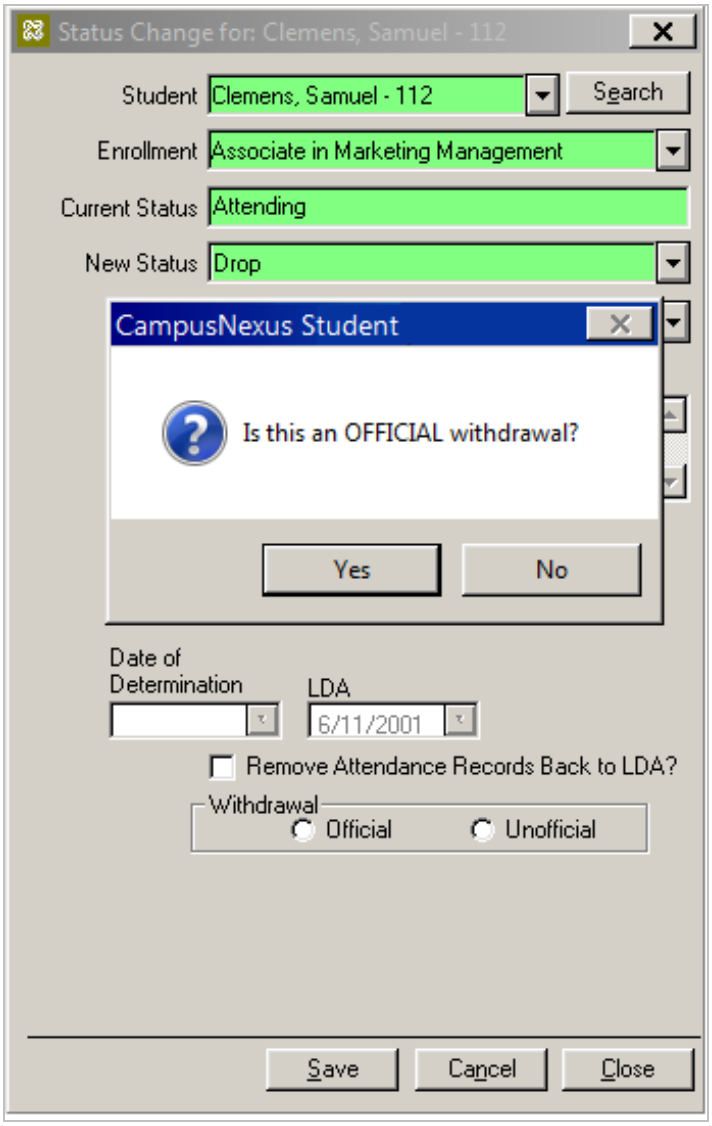
- NDS-DROP = DROP
- NDS-INC = INC
- NDS-COMP = COMPLETE
- NDS-NO = NOSHOW
- NDS-CAN = CANCEL
- NDS-REJ = APPREJ
- NDS-ATT = ATT
- NDS-RE = REENTRY
- NDS-BP = BP
- NDS-FUT = FUT

Changing Attending Status to Permanent Out/Drop

When the New Status is changed to Drop system status, specify if this drop is Official or Unofficial. The Official or Unofficial withdrawal selection is used in conjunction with Student Status Reporting and Withdrawal Date Settings to determine how to calculate a default NSLDS Withdrawal Date. This date is important because it is used as the status effective date in your SSCR and Clearinghouse reports. Designating whether a withdrawal is Official or Unofficial also impacts the calculation for the Date of Determination. To see more information on how these date are calculated, see Default Date Calculation for Drop Status Changes.

In addition to changing the enrollment's school status, posting a Drop status change for a student in CampusNexus Student changes the status for current classes to Dropped, unregisters all scheduled status courses, and 'unexpects' FA. All financial aid is set to Canceled (disbursement status) regardless of the FA fund source type. CampusNexus Student changes all disbursements that have a status of Scheduled to Canceled. CampusNexus Student cancels only disbursements that are scheduled. All other statuses, such as Ready to Pay and Paid, are not changed. Scheduled stipend disbursements are canceled. When enabled, the origination changes are created for the canceled disbursements (**Setup > Financial Aid > Direct Loan Setup**).

Another option is to automatically create origination changes to adjust to the Loan Period End Date to exclude the cancel disbursements from the loan period on Direct Loans, if a student withdraws between payment periods or hasn’t established attendance in a payment period following the initial payment period on a Direct Loan (**Setup Menu > Admissions > Financial Aid > Direct Loan Setup**). The date used for evaluation of the attendance within a Payment Period relies on the configured value on the program version under **Lists > Financial Aid > Programs**.



When you select Official by clicking the **Yes** button or Unofficial by clicking the **No** button, the status change form is enabled for further data entry. If Reasons have been configured for Drop status changes, the reason field will be available for selection first. After selecting a reason, a comment field is available to capture any additional information related to the status change. After entering comments, the various Date fields should be reviewed and addressed.

The Date of Determination (DOD) field is always pre-calculated. The number of days to add to the DOD is no longer configurable because the system defaults to LDA + 14 Days. Therefore, when a student is unofficially dropped, the DOD should be automatically calculated. If the staff member posting the status change has field level security to the Edit field, the pre-calculated Date of Determination can be modified.

For schools configured to take attendance:

- DOD will be the LDA + 14 calendar days or the withdrawal date, whichever is the lesser of the two.

For schools configured not to take attendance:

- DOD will be no later than 30 days after the end of the earlier date from the following selections:

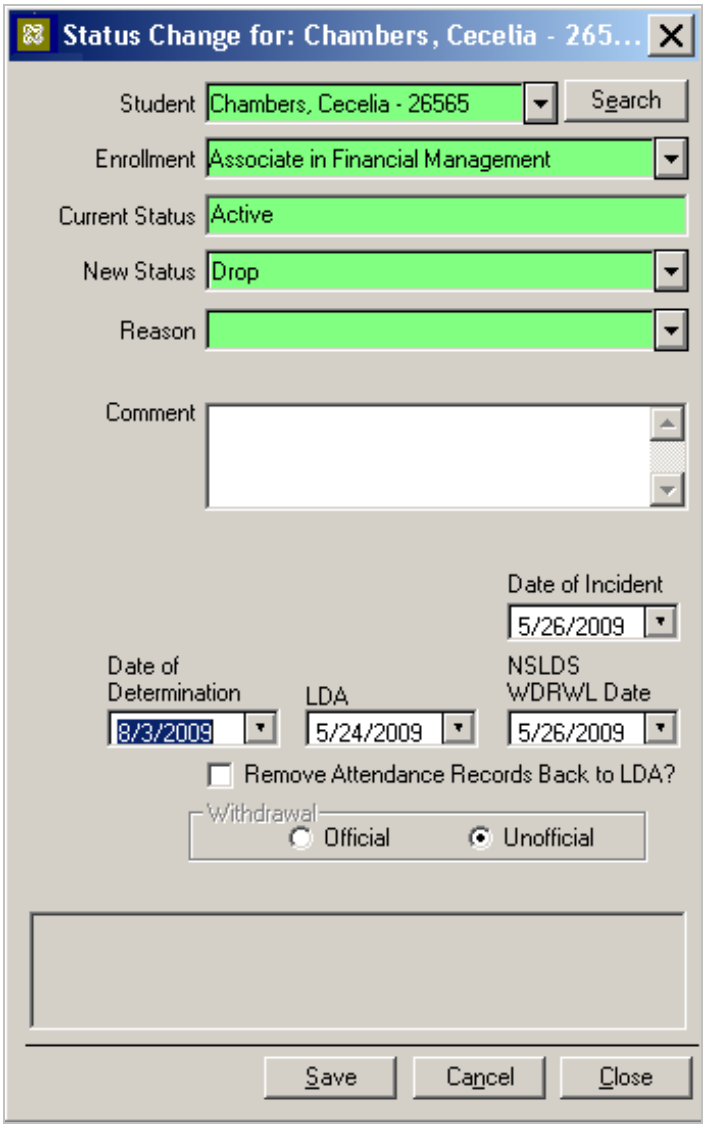
    1. End of the payment period or period of enrollment.
    2. End of the academic year.
    3. End of the student's educational program..

For Institutions that are not required by any outside entities to take attendance, selecting an Official withdrawal type results in an additional date field to capture the Official Notification Date. The date entered in this field is used to determine the NSLDS Withdrawal Date.

For Institutions that are not required by any outside entities to take attendance and do not have their own attendance policy (Status Date for Withdrawals configured as Use Drop Type), selecting an Unofficial withdrawal prompts a subsequent message box asking if the withdrawal was beyond the student's control. This additional question is based on the Dept. of Education guidelines for non-attendance taking institutions. If the withdrawal is due to reasons that were beyond the student's control, the withdrawal date should be the date of the incident that occurred to cause the student to withdraw. Staff members posting the withdrawal will see an additional Date of Incident field. The date entered as the Date of Incident will then be used to populate the NSLDS Withdrawal Date. If the answer to the prompt is No, the NSLDS Withdrawal Date is pre-calculated based on the Financial Aid program version configurations (Academic Calendar and in the case of Non-Traditional programs the RT4 settings).

In other scenarios, there are no additional prompts or date fields, and the NSLDS Withdrawal Date is pre-calculated. To ensure accurate withdrawal dates, the status change form also includes text to explain the logic used to calculate a default NSLDS Withdrawal Date. And like the Date of Determination field, the NSLDS Withdrawal Date is subject to field level security settings and can be modified by staff members with the appropriate privileges.

See Default Date Calculation for Drop Status Changes for more detailed information on how the Date of Determination and NSLDS Withdrawal Dates are calculated.



Default Date Calculation for Drop Status Changes

Date of Determination

When the withdrawal is categorized as Unofficial, the Date of Determination (DOD) is precalculated based on the LDA + configured Days to Add to LDA for Determination Date on Unofficial Withdrawals (configured under Setup > Campus Locations > Academic Records).

When a withdrawal is categorized as Official, the Date of Determination is precalculated with the system date (current date when executing the status change). This also applies for unofficial withdrawals at schools that do not take attendance and therefore have no last recorded date of attendance.

NSLDS Withdrawal Date

The following types of Institutions need to be considered when determining how to calculate withdrawal dates:

1. Institutions with Programs and/or Fund Sources that are required to take attendance by some outside entity (this could be an Accreditation body, the Department of Education, or an agency that provides student funding).
2. Institutions that are not required by an outside entity, but still take attendance according to their own policy.
3. Institutions that do not take attendance at all.

CampusNexus Student calculates default withdrawal dates differently depending on the type of Institution processing the Drop status change. Therefore, it is important to properly configure the Student Status Reporting and Withdrawal Date Settings, as well as the Program Versions & Fund Sources at each campus.

Type 1 - Attendance Required by an Outside Entity

The NSLDS Withdrawal Date always defaults to the LDA when the student being dropped is enrolled at an Institution that is Required to Take Attendance by an Outside Entity or in a program version that has the Attendance Required flag set or is currently receiving aid at the time of the withdrawal from a fund source that has the Attendance Required flag populated. This is true regardless of whether the withdrawal is classified as Official or Unofficial.

Type 2 - Attendance Not Required by an Outside Entity, however Institutional Attendance/Withdrawal Policy Exists

When a student is being dropped at an Institution that has opted to take attendance according to its own policy (Attendance is not required by an outside entity and the Status Date for Withdrawals setting is defined as L-LDA), the NSLDS Withdrawal Date defaults according to the following logic:

- If the withdrawal is Official and the Official Notification Date does not fall within a scheduled break of 5 days or more, the Official Notification Date is used to populate the NSLDS Withdrawal Date field.
- If the withdrawal is Official and the Official Notification Date falls within a scheduled break of 5 days or more, the student's last scheduled class day prior to the break (regardless of whether the student attended) is used to populate the NSLDS Withdrawal Date field.
- If the withdrawal is Unofficial, the NSLDS Withdrawal Date is populated using the LDA + the configurable # of days (set in Setup > Campus Locations > Allow > Number of days to add to LDA for unofficial withdrawal).

  Note: If the calculated date falls within a school holiday or break, the date is adjusted to the next non-holiday/break date.

Type 3 - Non-Attendance Taking Institution:

When a student is being dropped at an Institution that does not have its own attendance policy and does not regularly record attendance (Attendance is not required by an outside entity and the Status Date for Withdrawals setting is defined as U-Use Drop Type to Determine), the NSLDS Withdrawal Date defaults according to the following logic:

- If the withdrawal is Official and the Official Notification Date does not fall within a scheduled break of 5 days or more, the Official Notification Date is used to populate the NSLDS Withdrawal Date field.

- If the withdrawal is Official and the Official Notification Date falls within a scheduled break of 5 days or more, the student's last scheduled class day prior to the break is used to populate the NSLDS Withdrawal Date field.
- If the withdrawal is Unofficial and the reason for the withdrawal is beyond the student's control, the NSLDS Withdrawal Date is based on the Date of the Incident (that was beyond the student's control).
- If the withdrawal is Unofficial and the reason for the withdrawal is NOT beyond the students control, the NSLDS Withdrawal Date is determined using the Financial Aid settings on the program version. Specifically,
    - If the student's program version has a traditional academic calendar (standard terms of quarters, semesters or trimesters), the NSLDS Withdrawal Date is the midpoint or the end date of the current or previous academic term. This determination is made by finding the most current course in a Completed or Current Status.

      If the most current course is completed, the end date of that term is used.

      If the most current course has been started, but has not yet been completed, the midpoint of the corresponding term is used.
    - If the student's program version has a non-traditional academic calendar (non-standard terms, clock hours or credit hours without terms), the NSLDS Withdrawal Date is determined by the RT4 Period Type settings. Specifically,
        - If the RT4 Period Type is set to Payment Period, at the point of withdrawal, the system determines if the student has completed their current payment period (determining the current payment period is based on the payment periods dates, and determining if the payment period is completed is based on if the student has met both the credits/hours criteria and the weeks)
            - If Yes, the NSLDS Withdrawal Date is the end date of this payment period.
            - If No, the NSLDS Withdrawal Date is the midpoint of this payment period.
        - If the RT4 Period Type is set to Period of Enrollment and the RT4 Period of Enrollment is set to Program Start/End Date, the NSLDS Withdrawal Date is the midpoint of the program (midpoint calculated using the version start date and expected grad date).
        - If the RT4 Period Type is set to Period of Enrollment and the RT4 Period of Enrollment is set to Academic Year Start/End Date, the NSLDS Withdrawal Date is the midpoint of the students current Academic Year.

Determination of Course Status When a Student's Enrollment is Dropped

	NSLDS Withdrawal Date On/Before Add/Drop & Before LDW Date	NSLDS Withdrawal Date After Add/Drop but On/Before LDW Date	NSLDS Withdrawal Date After Add/Drop & LDW Date
Enforce Add/Drop Date for Scheduled Status Courses **Disabled** & Enforce LDW dates **Disabled**			
Scheduled	Unregister	Unregister	Unregister
Current/LOA	Drop	Drop	Drop
Enforce Add/Drop Date for Scheduled Status Courses **Enabled** & Enforce LDW dates **Enabled**			
Scheduled	Unregister	Drop	Complete
Current/LOA	Drop	Drop	Complete

	NSLDS Withdrawal Date On/Before Add/Drop & Before LDW Date	NSLDS Withdrawal Date After Add/Drop but On/Before LDW Date	NSLDS Withdrawal Date After Add/Drop & LDW Date
Enforce Add/Drop Date for Scheduled Status Courses **Enabled** & Enforce LDW dates **Disabled**			
Scheduled	Unregister	Drop	Drop
Current/LOA	Drop	Drop	Drop
Enforce Add/Drop Date for Scheduled Status Courses **Disabled** & Enforce LDW dates **Enabled**			
Scheduled	Unregister	Unregister	Unregister
Current/LOA	Drop	Drop	Complete

While moving course statuses to Complete, grades are posted by the system. If the course has a Pass/Fail grade, the grades configured as After LDW Grade and Pass/Fail Grade are posted. For other courses, the grade configured as the default After LDW Grade is posted. Grade posting is performed by the system automatically. If multiple Grade Letters are configured, the last grades configured in the grade scale are posted.

Batch Status Change

You can use the Batch Status Change option to change a status for several students at the same time. If several students have the same current status in common and they all need to be changed to the same new status, use this form. CampusNexus Student take the same actions for the batched status changes that would be taken for individual student status changes. Depending on the current status and the new status, CampusNexus Student asks for different items of data. For instance, if the new status is Complete, CampusNexus Student asks for a Date Complete and a Last Date of Attendance (LDA). If the new status is Drop, CampusNexus Student asks for the drop and LDA dates and changes the appropriate records, such as scheduled classes and financial aid.

Status changes are controlled by parameters selected on the Status Changes form (Setup > Status Codes). The system administrator maintains these parameters. When you perform a status change, the status change grid presents the allowable status changes.

In conjunction with the Automatic Document Scheduler feature, document schedules based on Pre-Enrollment or Enrollment are evaluated when the status for a student is modified and saved using the batch status change form. If the students' data matches the specified criteria for a document schedule where the criteria includes student status, all documents attached to the document schedule that are not already scheduled are scheduled for the students.

You can perform a status change on a student group. CampusNexus Student checks for hold codes, verifies status change rules, and creates exception reports for students in the group who do not meet the conditions required for the selected status change.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

Loan Management: When you change a student's status to a Permanent Out Category, CampusNexus Student updates the Loan Status field to Grace, sets the Loan Status Effective Date to the Enrollment Status Date, and sets the Repayment Date to the Enrollment Status Date plus the Grace Days. Each field change results in a record added to the Loan Management Status Change History table.

Non-Degree-Seeking (NDS) Students Statuses

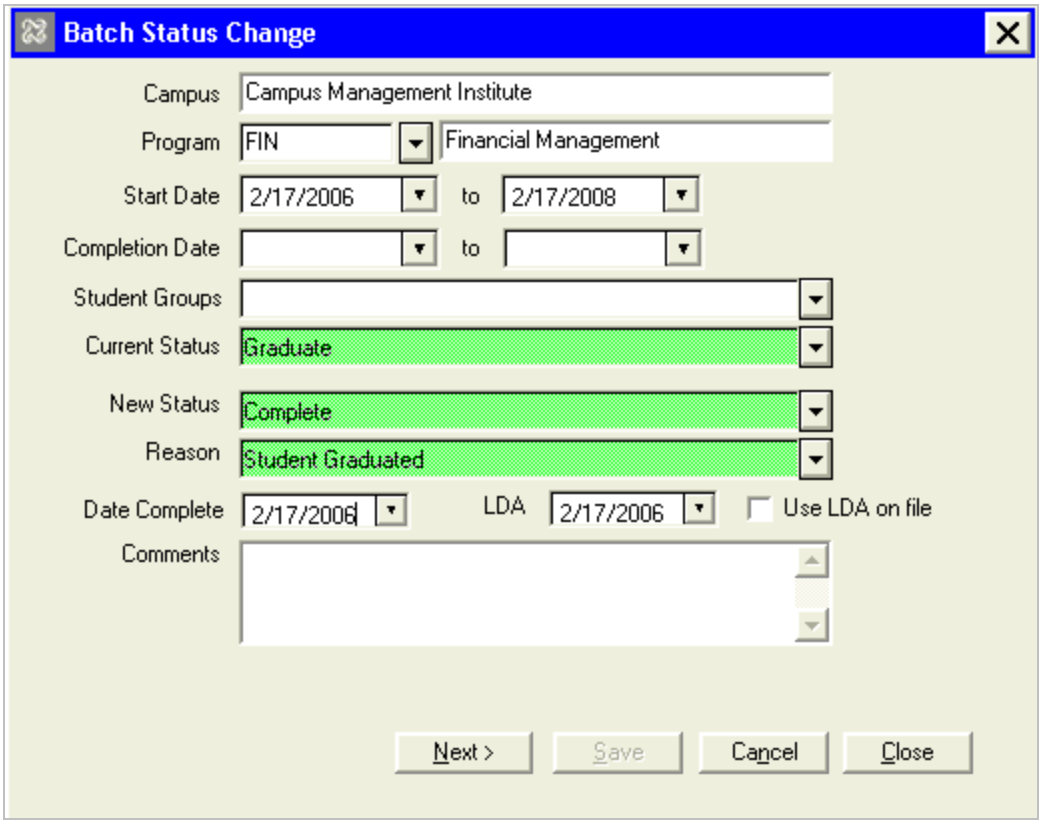
The prompts on the Batch Status Change form for various dates and other information are based on the type of status change that is taking place. The logic includes the NDS status codes and NDS status categories when setting the prompts. Standard status changes and changes to NDS enrollments are similar. See also Tracking NDS student.

Student Status Codes - Non-Degree Seeking

- NDS-DROP
- NDS-INC
- NDS-COMP
- NDS-NO
- NDS-CAN
- NDS-REJ
- NDS-ATT
- NDS-RE
- NDS-BP
- NDS-FUT

To change the status for a batch of students:

1. Select **Daily** > **Academic Records** > **Batch Status Change**. The Batch Status Change wizard is displayed.



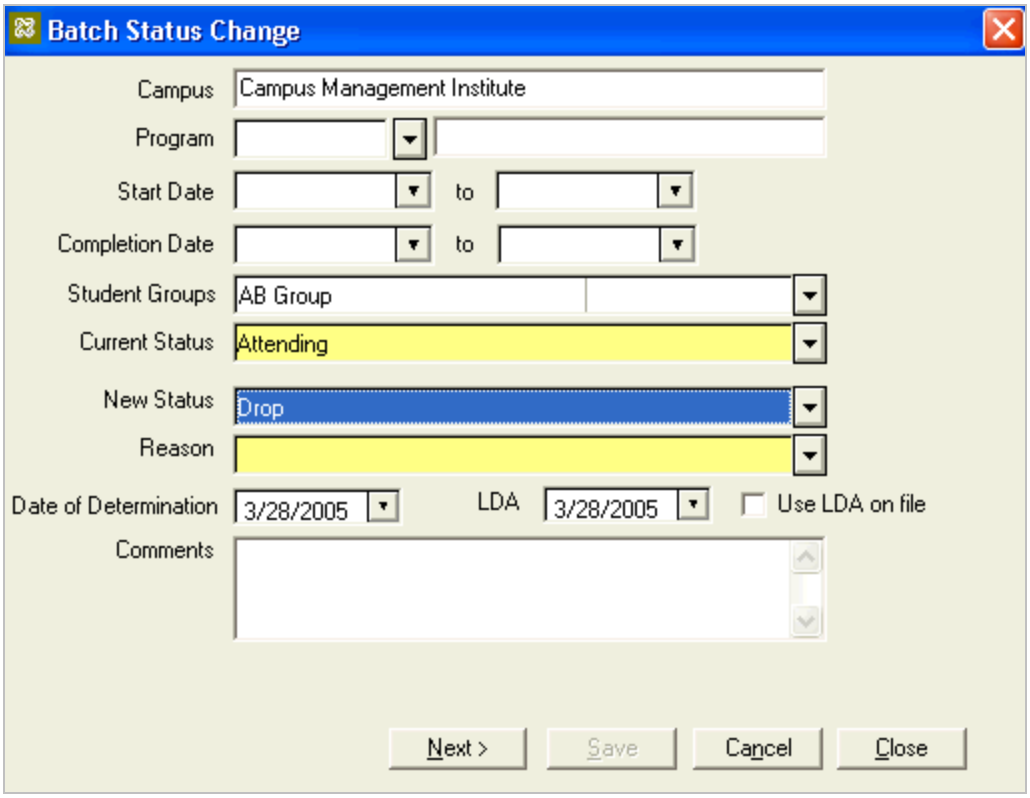
2. The **Campus** shown on the form is your default campus. To change the campus shown on this form, you must change the campus that you are logged into.
3. Select an optional **Program code**.
4. Enter any of the **Optional Date Fields**.
5. Select an optional **Student Group**. When you click **Next**, CampusNexus Student checks for hold codes, verifies status change rules, and creates exception reports for students in the group who do not meet the conditions required for the selected status change.
6. Select a **Current Status.** Required.
7. Select a **New Status.** Required. The new status you select may cause CampusNexus Student to display other fields on the form, some of which may be required. Select an option or enter data for any required fields.

   In the example, selecting Drop as the new status caused the Reason, Drop Date, LDA, and Use LDA on file fields to be displayed. These must be completed before continuing. When you change the students' status from active to leave-of-absence (LOA), CampusNexus Student includes current and scheduled classes in the update. When dropping multiple students, the default grade as set on the Grade Scale is applied. If no default grade is enabled, no grade is applied for dropped students in the batch.

When a student's status is changed to a Drop system status for a single student or during the Batch Status Change process, the Drop Date field is renamed the Date of Determination field. The NSLDS Withdrawal Date is calculated from the student's record and automatically populated.

For information on how course status changes are determined when a student is dropped, see Notes on Status Changes.

8. Select a **Reason**. This field is required if enabled.
9. Enter any **Comments** appropriate to the change you are making.
10. Click **Next**. CampusNexus Student displays the list of students affected by the status change you are about to make.

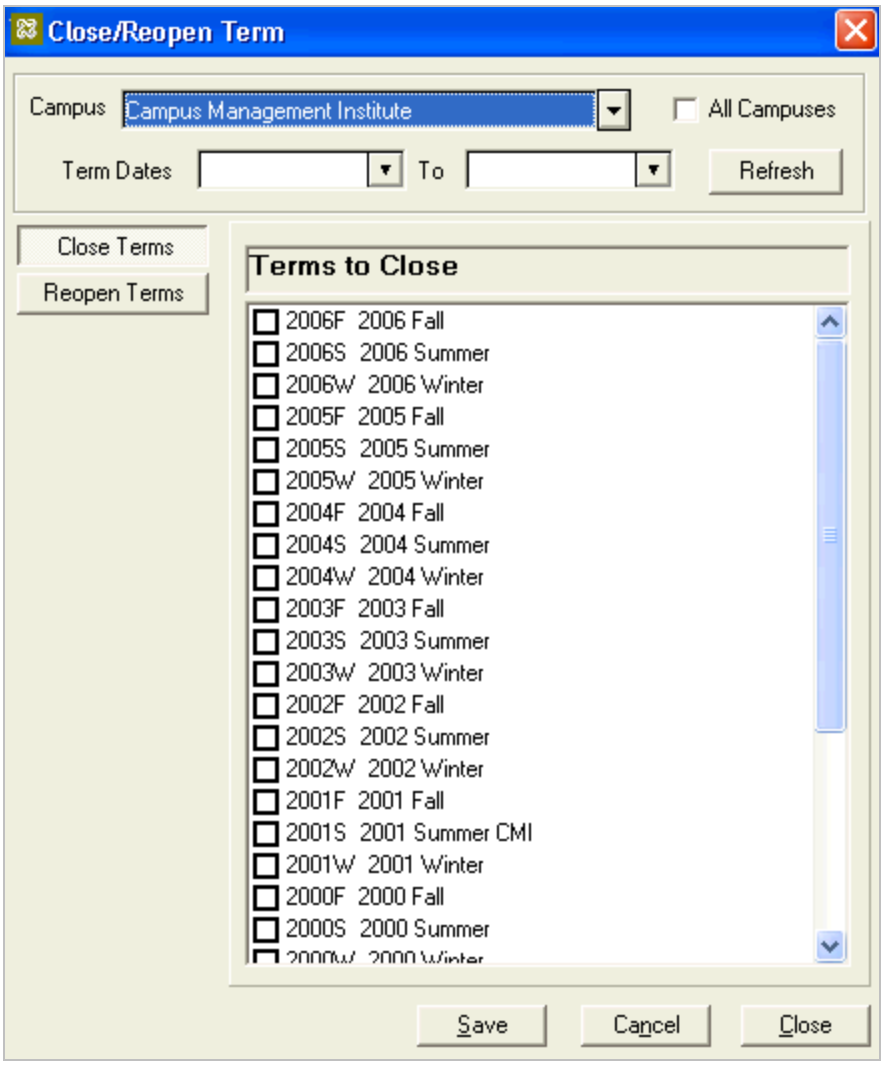


11. Select the **Omit** check box beside any student you want to exclude from the status change.
12. Click **Print** to print a list of the students affected by the status change.
13. Click **Save** to save the status changes. If the status of some of the students cannot be changed, CampusNexus Student displays a message. Click **OK** to acknowledge the message. The program will process the status changes for the remaining students.
14. CampusNexus Student displays a message when the status change process is complete. Click **OK**.
15. Click **Cancel** to clear the form and leave it open.
16. Click **Close** to close the form.

Close/Reopen Term

You can use the Close/Reopen Term function to close terms to prohibit changes to the data from that term. You can allow designated users to reopen the term when changes to information in that term are necessary (that is, grade changes, attendance corrections). You can close a course when all grades for the course have been entered. This locks down the grades and prevents grade changes from occurring without the proper authorization. Additional Daily functions for grade changes have also been added to allow for grade changes to be made to closed courses.

1. Select **Daily** > **Academic Records** > **Close/Reopen Term**. The Close/Reopen Term form is displayed.



2. Select the **Campus** from the drop-down menu or select **All Campuses**.
3. Select the starting and ending **Term Dates**.
4. Click **Close Terms** to see the list of open terms to make your selection.
5. Click **Reopen Terms** to see the list of closed terms to make your selection.
6. Click **Save** to update all records you have selected.

Note: Changes to attendance roster, attendance dates, grade book, and final grades requires you to reopen the term.

Population Analysis/IPEDS Enrollment Survey

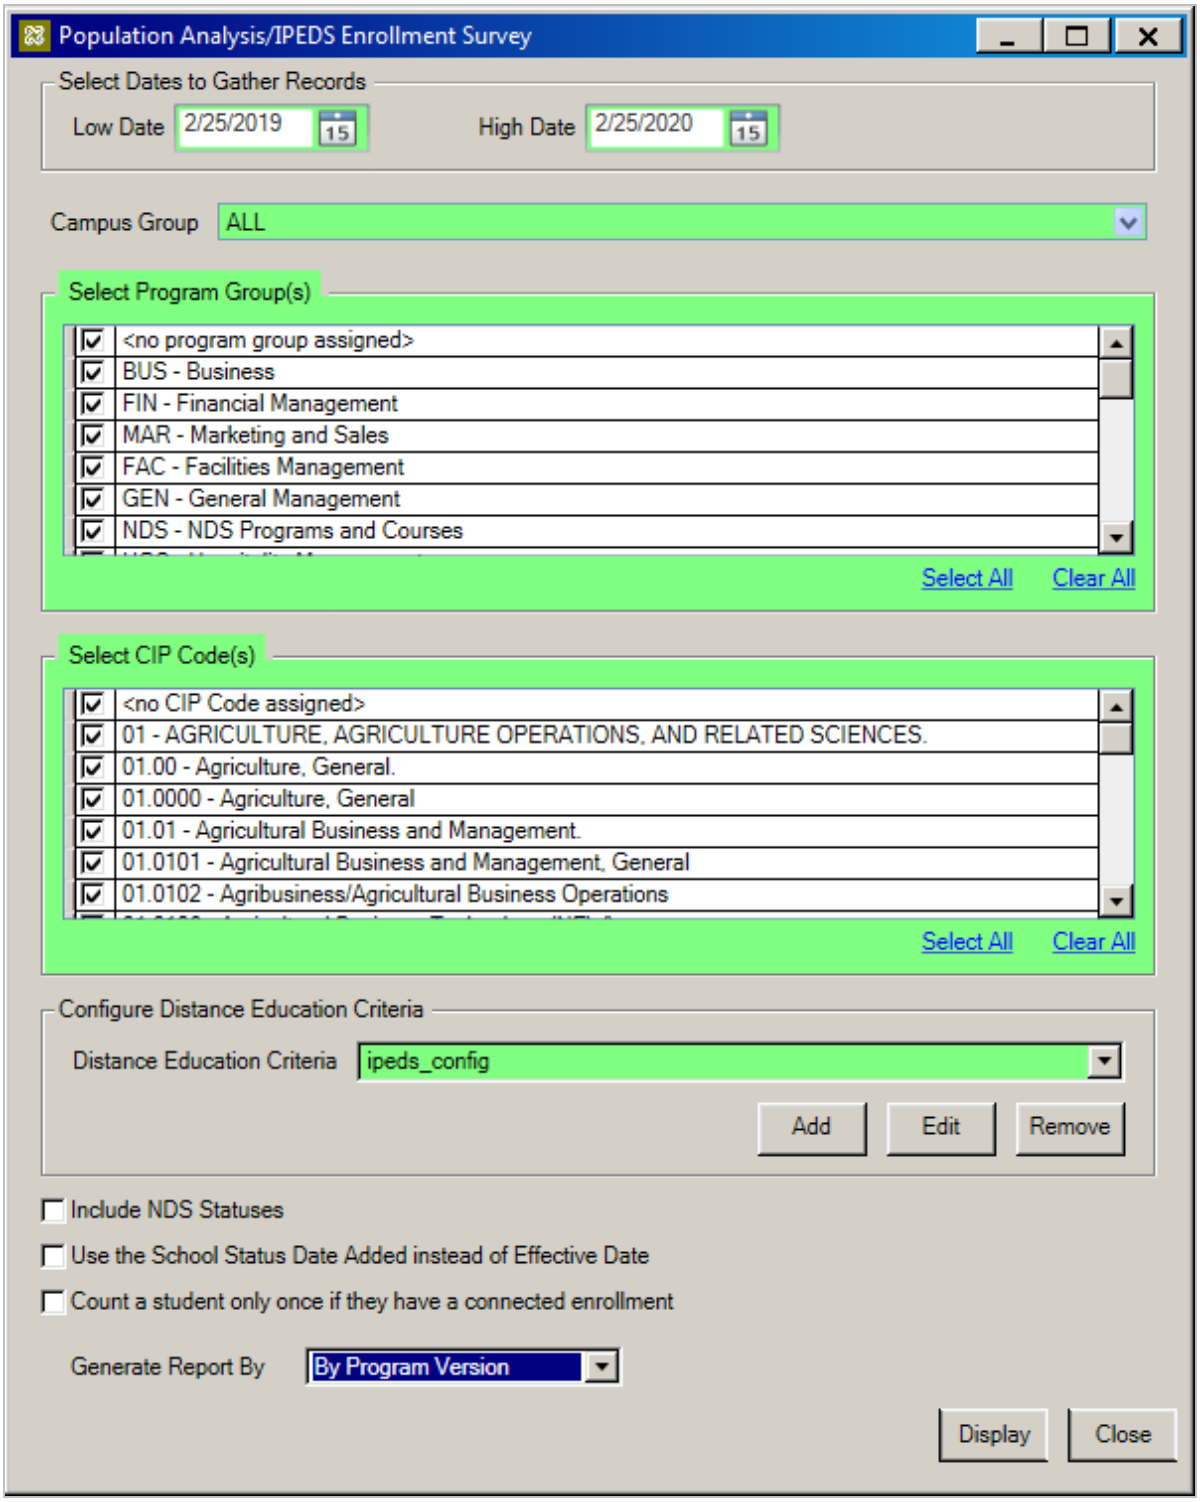
The Population Analysis helps you with many accrediting agency reports and with the two IPEDS Enrollment Surveys: the 12-Month Enrollment Survey and the Fall Enrollment Survey. The Population Analysis is a cube report. You can review the characteristics and manipulation of cube reports by reviewing the Cube Reports topic.

When CampusNexus Student displays the Population Analysis cube, you can manipulate the rows and columns, preview and print the data in spreadsheet format, create and print a graph, and export the data to Excel. You can save the results to a file. The cube opens with one row for each program version in your school. For each program version, there are columns for beginning population, new starts, re-entry students, transfers in, transfers out, incompletes, drops, completes, Standard Period of Non-enrollment (SPN), graduates, and ending population. Some additional variables that are also available include campus, student status, shift, lead source, admissions rep code, student name, SSN, ethnic code, gender, ZIP code, enrollment status, grade level, degree, and age bracket.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

To run the Population Analysis Cube:

1. Navigate to **Daily > Academic Records > Population Analysis/IPEDS Enrollment Survey**. The Population Analysis/IPEDS Enrollment Survey selection form is displayed.



2. Select the **Low Date**, **High Date**, **Campus Group**, and **Program Group** for which to run the analysis. Click ... in the Program Group field to display a list of the program groups that were created and flagged as Active in **Lists > Academic Records > Program Groups**.
3. Select a **CIP Code** from the drop-down list. Click

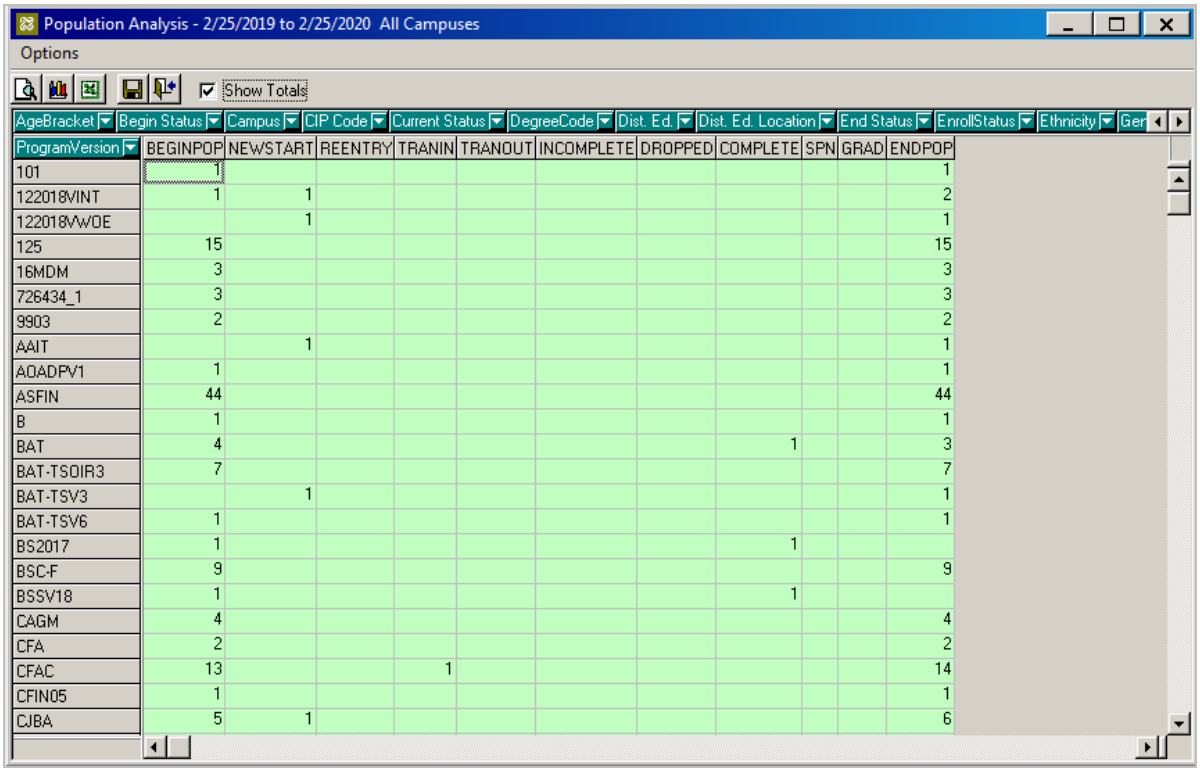
to select multiple CIP Codes. These codes are defined by the National Center for Education Statistics (NCES). HERA requires that schools provide this report broken down by CIP Code.

4. If your school accepts international students, CampusNexus Student adds a check box to this form named **Report Using International Students Only**. Select this check box to show data on the cube for international students only. In this case, CampusNexus Student adds Visa Type to the variables available at the top of the cube window.
5. Select **Include NDS Statuses** to include in the report those students in a Non-Degree Seeking school status. Non-Degree Seeking statuses are used when students are enrolled in Program Versions that are configured as Non-Degree Seeking. If this option is left cleared, the Non-Degree Seeking program versions and the students enrolled in them will not be included on the report.
6. Select the **Use the School Status Date Added instead of the Effective Date** option to tell the system which date on the student's status change history records to use when calculating the appropriate population bucket(s) for the student. If this option is selected, the system uses Date Added to calculate the status for the student. If the option is not selected, the system uses the Effective Date (also called the Begin Date) to calculate the student status.
7. Select the **Count a student only once if they have a connected enrollment** option to designate that the Population Analysis report should not count students with connected enrollments more than once. If this option is selected, the report will include enrollment specific information for connected enrollments using the default enrollment only.
8. Select an option from the **Generate Report By** drop-down list. You can generate and sort the report by **Program Version** or **Area of Study**.

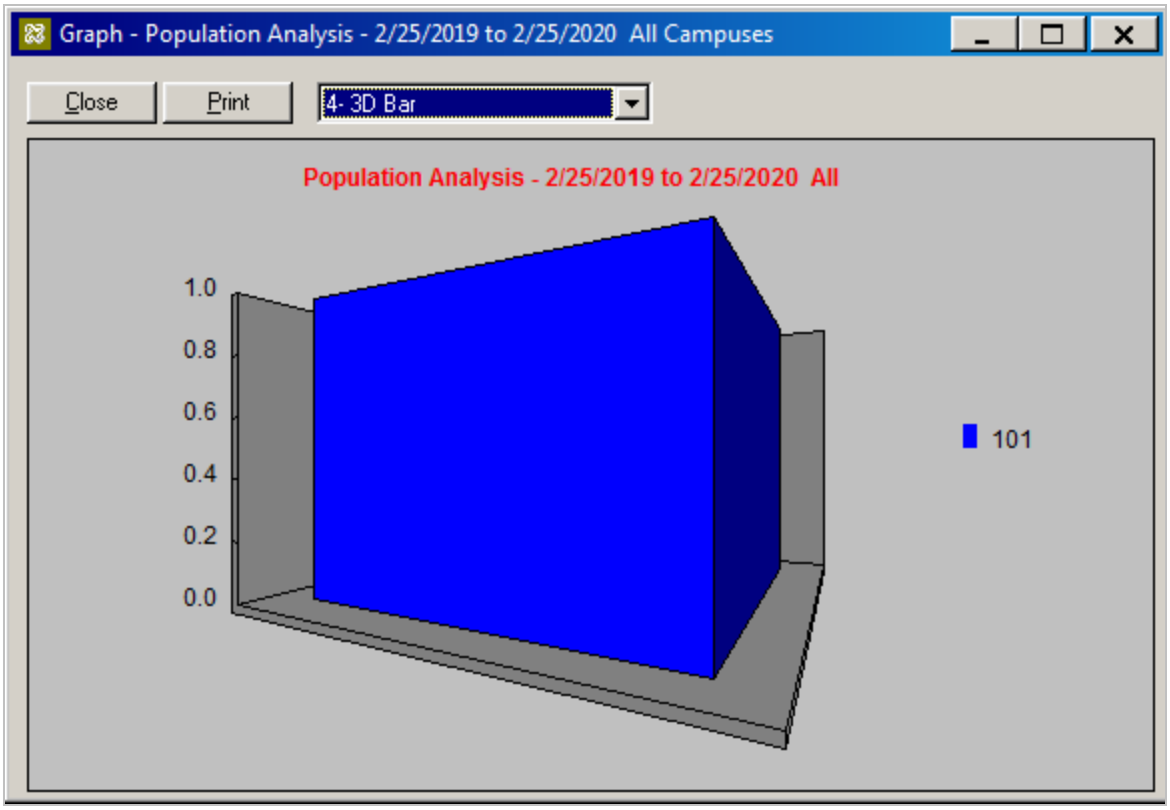
   Note: If you select Area of Study option, the cube report will contain three additional sort variables - Major, Minor and Concentration.
9. Click **Display** to run the Population Analysis cube. When the calculations are finished, a cube grid will appear.

   The available variables in the cube include Campus, Current Status (of student in school), Begin Status, End Status, Reason Code (Enrollment Survey, Part G), Age Bracket, Shift, Lead Source, Rep Code, Student Name, SSN, Start Date, Race Code, Gender, Previous Education, State, IPEDS State (Enrollment Survey, Part C), ZIP, Grade Level Code, Degree Code, Enrollment Status, Program, High School Grad Date, High School Grad Year, CIP Code, and Visa Type (for international students). If the report was sorted by Area of Study, three additional variables - Major, Minor and Concentration - will be included.

   Note: The Orig Grad Date column enables institutions to identify graduate students correctly by determining completion rate calculations. This information comes directly from the "Orig. Exp Grad Date" field on the student's Enrollment form.



10. Click to see a preview of a spreadsheet report with the data from the cube. The report can be formatted to a limited extent and printed.
11. To see or print a graph of the data from the cube, highlight all data cells you want to include in the graph and then click .



12. Click to transfer the data to an Excel spreadsheet.
13. Click to save a copy of your Population Analysis data. A message with the name and location of the saved cube file is displayed.
14. Select or clear **Show Totals** as you require.
15. Click to close the Population Analysis Cube.
16. Click **Close** to close the form.

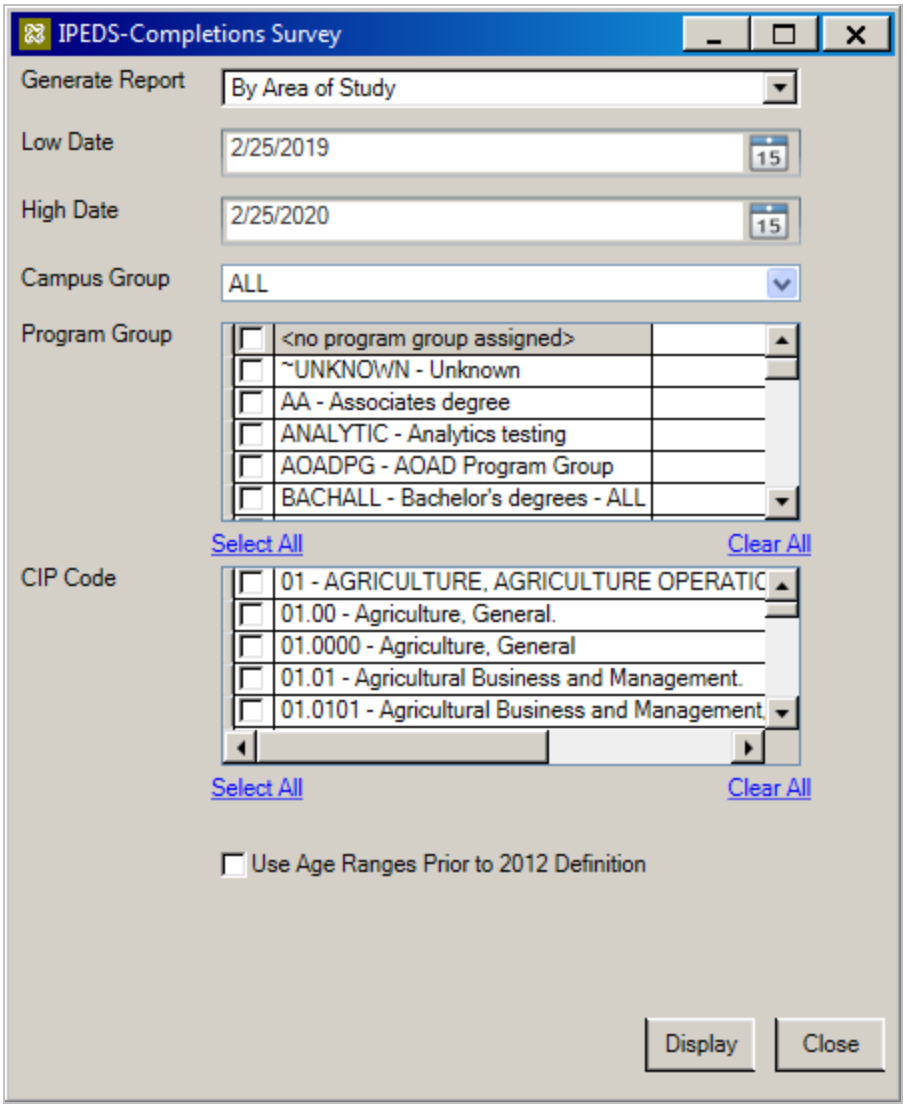
IPEDS Completions Survey

This cube report provides information to help you complete your IPEDS-C Form. An initial dialog box asks you for the Low Date, High Date, and Campus Group. The selections on the cube include Degree, Student Name, SSN, Campus Code, Ethnicity, Gender, and Graduation Date.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

To run the IPEDS-Completions Survey cube report:

1. Navigate to **Daily** > **Academic Records** > **IPEDS-Completions Survey**.

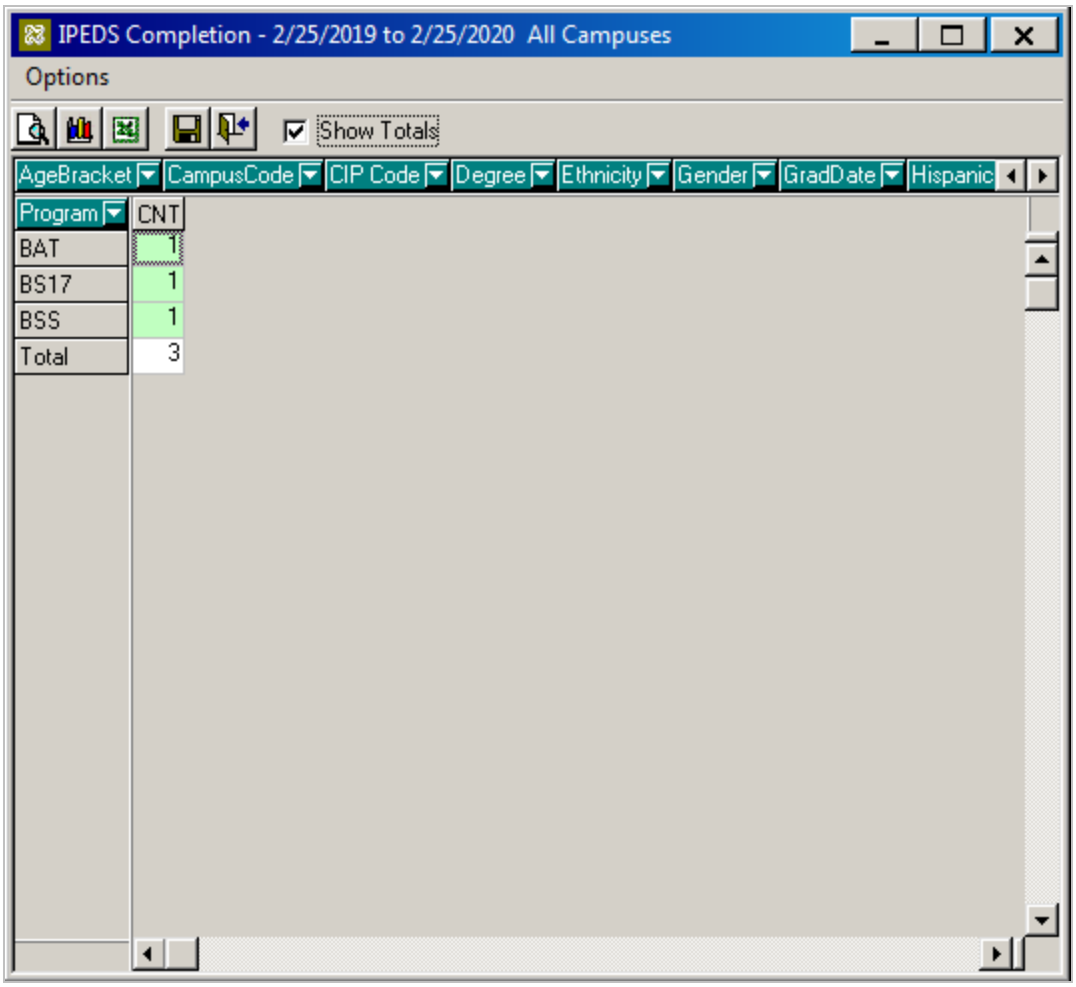


2. You can generate and sort the report by **Program Version** or **Area of Study**. Select an option from the Generate Report list.

Note: If you select Area of Study option, the cube report will contain three additional sort variables - Major, Minor, and Concentration.

3. Enter the **Low Date** and **High Date**. The date range is an "Enrolled As Of Date Range" similar to that on the population analysis.
4. Select a **Campus Group** for which to run the report.
5. Select the **Program Group** for which to run the analysis. Click ... in the Program Group field to display a listing of the program groups that were created and flagged as Active in**Lists > Academic Records > Program Groups**.
6. Select a **CIP Code** from the drop-down list. Click ... to multi-select CIP Codes. These codes are defined by the National Center for Education Statistics (NCES). HERA requires that schools provide this report broken down by CIP Code.
7. Click **Display**. The program will gather the necessary data and display the cube report. The available data variables for this cube report are Student Name, SSN, Campus Code, Ethnicity, Gender, Grad Date, CIP Code, and Degree.

   Note: The Orig Grad Date column enables institutions to identify graduate students correctly by determining completion rate calculations. This information comes from the **Orig. Exp Grad Date** field on the student's **Enrollment** form.



8. Arrange the data elements on the horizontal and vertical axes of the grid as desired to obtain your analysis of the

data. See the topic titled "Cube Reports" for more instruction about this versatile reporting tool.

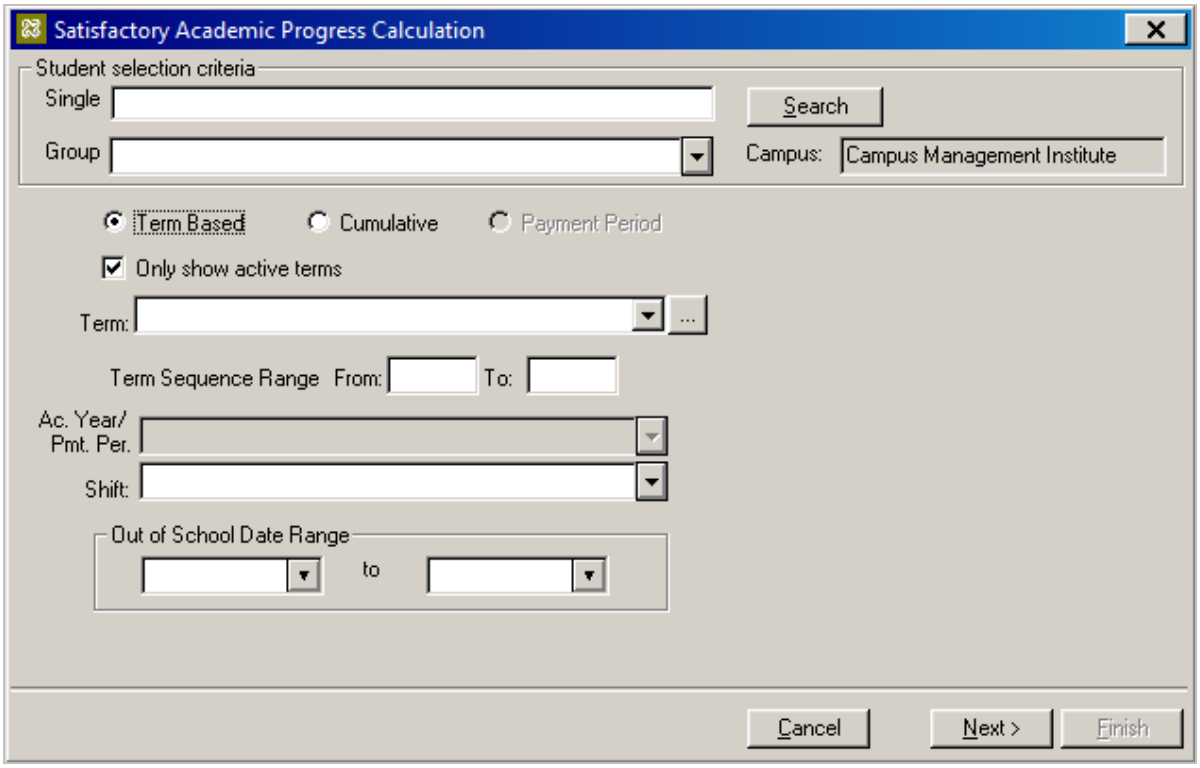
9. Close the report window when you are finished working with it.
10. Close the IPEDS Completions Survey form.

Processing a SAP Calculation

The SAP wizard automates the calculation of students' academic progress. If a student does not meet SAP, then all SAP failure reasons are displayed in the SAP calculation listing, as well as all SAP reports.

To process the SAP calculation:

1. Navigate to **Daily** > **Academic Records** > **Satisfactory Academic Progress**. The first page of the SAP wizard (Satisfactory Academic Progress Calculation) is displayed. The SAP is calculated for the default campus.



2. You can calculate the SAP for a single student, a group of students, or all students.
   - For a single student, enter the student's name in the **Single** field or use the **Search** button to find the student.
   - For a group of students, select the group from the **Group** drop-down list.
   - For all students, leave the Student selection criteria fields blank.

   The fields available for selection on the SAP Calculation form depend on the Student selection criteria.

3. Select an option indicating whether the SAP calculation is Term Based, Cumulative, or by Payment Period.
   - For the **Term Based** option, use the **Term** drop-down list to select the term. The selected term is the first term for which SAP is calculated. The SAP calculation then processes each subsequent term through the most recently completed term.

     Note: You cannot run SAP by Term Sequence if you are evaluating Partial Terms. You must process SAP by Student, Term, Student Group, or Cumulative. Your SAP Policy can still use Term Sequences as an

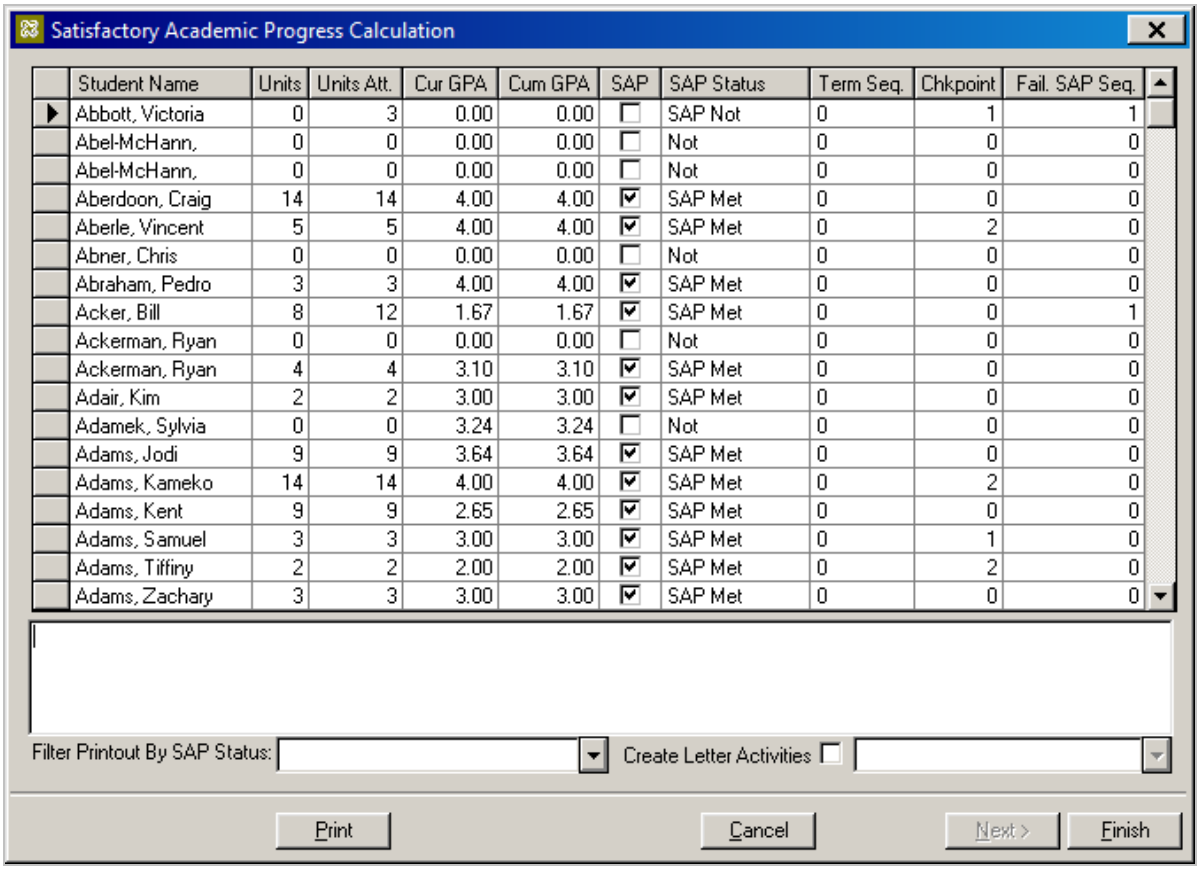
evaluation criterion (Lists > Academic Records > SAP), you just cannot use the Term Sequence Range to process SAP (Daily > Academic Records > Satisfactory Academic Progress).

- For the **Cumulative** option, the term-related and payment period-related fields are disabled, and a message indicates which students are evaluated and that multiple enrollments are considered in the calculation.
- For the **Payment Period** option, if a single student is selected, from the **Ac. Year/Pmt. Per.** drop-down list, select the academic year/payment period for which SAP is to be run. This drop-down list is only available if the Single student field is populated. When re-evaluating SAP based on payment periods for a single student, the system prompts you to run SAP for any subsequent payment periods.

  When running SAP based on payment period, the system assumes that the payment period end dates are correct and prompts you to verify that they are accurate. To confirm that the payment period end dates are correct, you should run the Student Pace Evaluation (SPE) tool. If your institution's business process currently does not include the use of the SPE tool, the accuracy of the payment period end dates needs to be verified.

  SAP reports based on payment periods include the SAP Evaluation Date field. The value in this field displays on the SAP List Report.

4. For a Term Based SAP calculation, select or clear the **Only show active terms** check box as applicable.
5. For a Term Based SAP calculation, enter the start of the **Term Sequence Range** in the **From** field and the end of the range in the **To** field.
6. For a Term Based or Cumulative SAP calculation, select the **Shift**, that is, the time period during which the student's course is available at the campus. If you do not select a shift, SAP is calculated for all shifts .
7. If applicable, select the beginning date and end date of the **Out of School Date Range**. When this option is used, SAP evaluates students that have a status of dropped.
8. Click **Next** to continue with the next page of the SAP wizard.
9. The second page of the SAP wizard lists all students that are evaluated in the SAP calculation. You can filter the results that are displayed by selecting a status from the **Filter Printout by SAP Status** drop-down list.



Results of the SAP calculation are dependent upon the SAP table setup, the individual student's academic progress, and whether enrollments are linked. See SAP Audit for explanations for the fields.

The SAP wizard verifies that the student's term sequences, Auto Probation and School Status changes configured in the SAP Detail Code Setup are not updated for historical terms. CampusNexus Student determines the most recently completed term and processes the Auto Probation/ School Status changes for the most recently completed term only.

10. A check mark in the **SAP** column indicates that the student meets the SAP requirements; if the box is cleared, the student does not meet the SAP requirements.

    If you have permission to override the SAP status, you can override the automatic calculation of SAP for a student by selecting or clearing the SAP check box. When you override the automatic SAP calculation, your overrides are saved and shown on the SAP report.

    When you select a SAP check box, you can select a new SAP status from the drop-down list which then replaces the system defined SAP status. An audit entry is recorded in the Academic Records folder within the SAP Audit tab.

    The next time the SAP calculation is processed, the automatic calculation evaluates each student again. Any previous overrides are overwritten based on the new calculation.

11. When you click the area to the left of the Student Name for a student with a failed SAP, *all* failed reasons appear below the list of students.

- When posting SAP, the system records *all* failed Detailed SAP criteria reasons and related messages to the SAP audit folder for the detailed SAP sequence evaluated. The system displays customized SAP failure reasons, if defined, otherwise system-defined SAP reasons are presented. Letter activities can be created to send letters to these students.
- The *Students who exceed the maximum time frame of credit/clock hours criteria* configured for the SAP Policy are evaluated, even if the student has already *failed* one criterion within the SAP Policy.
- When posting SAP, the system records *all* failed criteria from the SAP Policy and related reasons and display the information in the student's SAP audit folder in the Additional Information field.

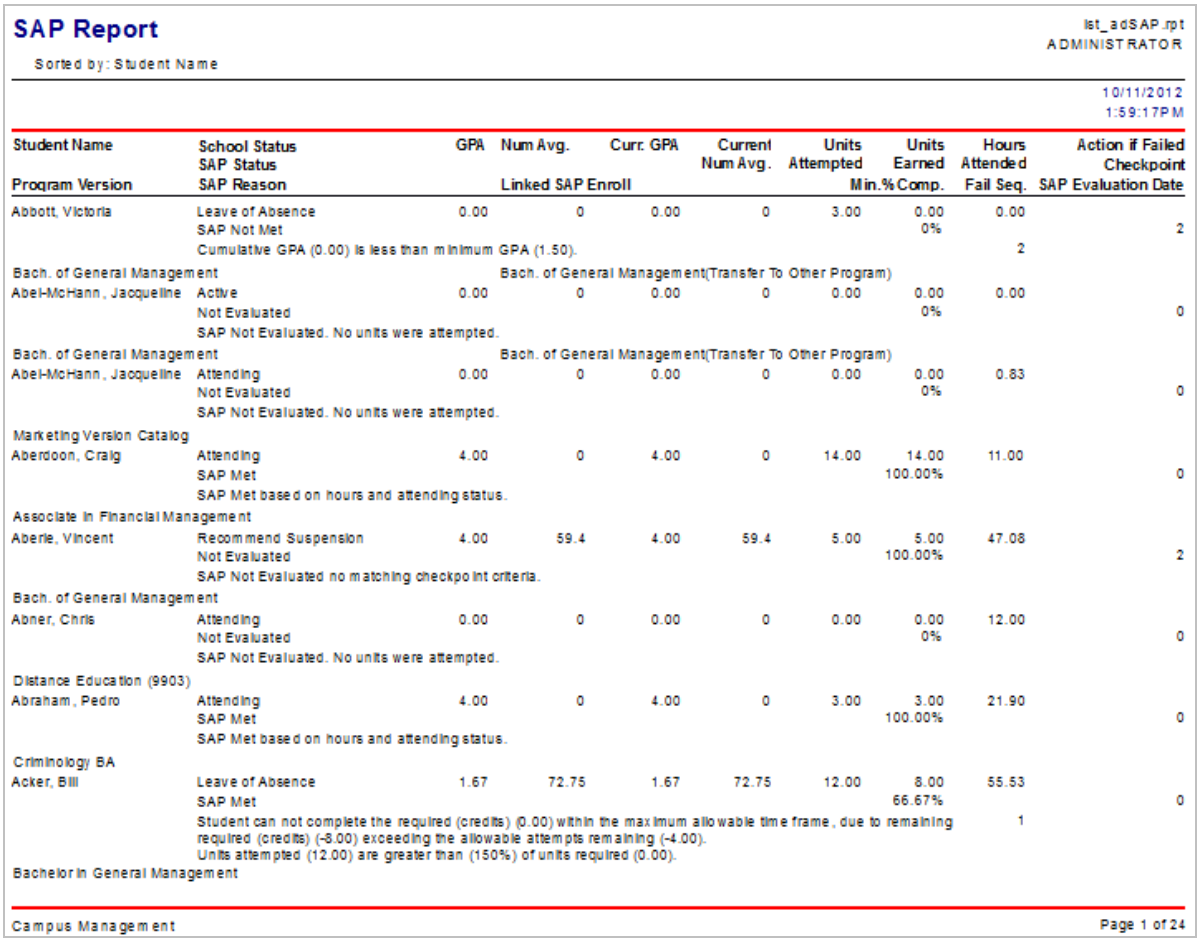
12. To create letter activities from the SAP Calculation wizard, select the **Create Letter Activities** check box and choose a letter type from the drop-down list.

    Upon completion of the SAP Calculation, letter activities are assigned to those students in the SAP Calculation process that do not meet SAP. These activities have pending status and are placed in the student's activities folder and faculty member Contact Manager folder until the letters have been printed successfully. The activities are then closed and assigned a closed status.

13. Click **Print** to print the SAP calculation results, including any overrides. To filter the print results, select a status from the **Filter Printout by SAP Status** drop-down list before you click Print.

    The Report Selection form is displayed and offers Student Name, SAP Status, School Status, and Program Version as sort variables. Make your selections and then click the Preview button.

    The following is an example of a cumulative SAP report.



SAP Report

Campus Management

Page 1 of 24

The SAP Report is the same for manual and automated SAP evaluation. All SAP Detail criteria are evaluated and the associated failure reasons are listed on the report.

SAP Reports based on payment period are similar to term-based SAP Reports, except they include columns for PP (Payment Period) Count and Academic Year/Payment Period instead of Term and Term Sequence number. SAP reports based on payment periods include data in the SAP Evaluation Date field.

14. If you choose to complete the SAP calculation process, click **Finish**. You are prompted to confirm if it is okay to post the SAP results. Click **Yes** to post the calculation. If after reviewing the list, you choose not to post the calculation, click **Cancel**.

15. When the posting is done, a message is displayed asking if you want to print a report. Click **Yes** to print the report and complete the Report Selection form as needed. If you have already printed the report, click **No** to exit the wizard.

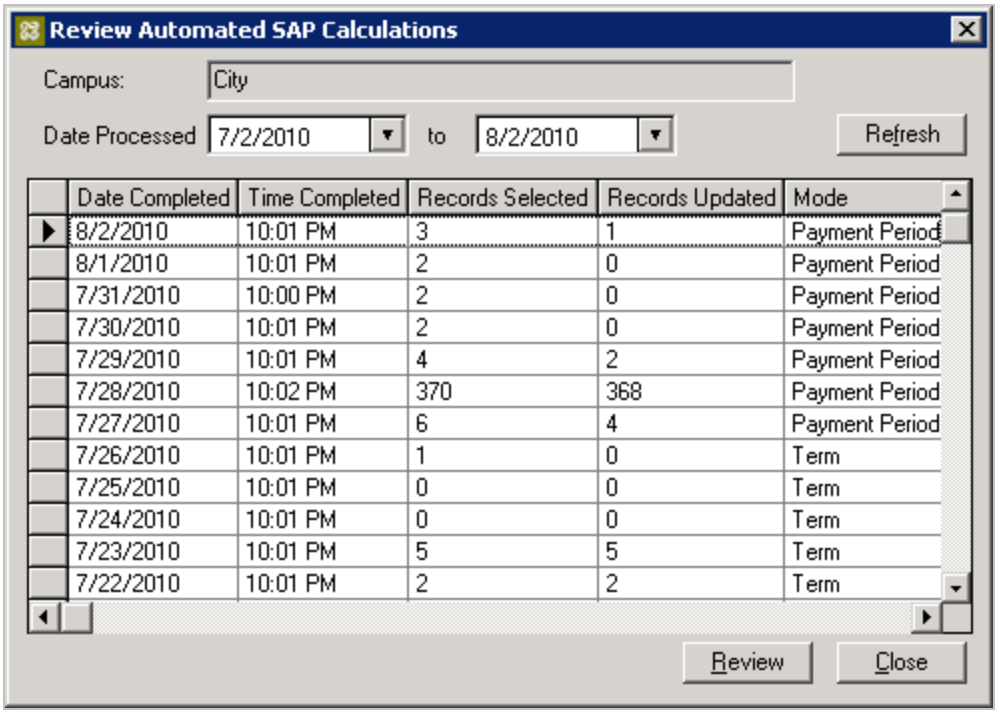
Reviewing Automated SAP Calculations

When CampusNexus Student is configured to perform Automated SAP Calculations, users can view a summary of the Automated SAP Calculations that have taken place. In addition, it is possible to view a report listing the results of a particular instance of the Automated SAP Calculations.

To access the Review Automated SAP Calculations form, the system administrator must have enabled **Automated SAP reporting on Daily Menu** for the campus.

To review Automated SAP Calculations:

1. Select **Daily > Academic Records > Review Automated SAP Results**. The Review Automated SAP Calculations form is displayed.
2. Enter a range of dates in the **Date Processed** and **To** fields encompassing the dates on which Automated SAP Calculations were done.
3. Click **Refresh**. A listing of all Automated SAP Calculations that took place between the selected dates is displayed.



Date Completed	Time Completed	Records Selected	Records Updated	Mode
8/2/2010	10:01 PM	3	1	Payment Period
8/1/2010	10:01 PM	2	0	Payment Period
7/31/2010	10:00 PM	2	0	Payment Period
7/30/2010	10:01 PM	2	0	Payment Period
7/29/2010	10:01 PM	4	2	Payment Period
7/28/2010	10:02 PM	370	368	Payment Period
7/27/2010	10:01 PM	6	4	Payment Period
7/26/2010	10:01 PM	1	0	Term
7/25/2010	10:01 PM	0	0	Term
7/24/2010	10:01 PM	0	0	Term
7/23/2010	10:01 PM	5	5	Term
7/22/2010	10:01 PM	2	2	Term

Note: The Mode column displays *Term* if the results are for *Term SAP* or *Payment Period* if the results are for *Payment Period SAP*. The SAP job runs for term regardless how the campus is configured. If Payment Period is set to run, then SAP evaluates the Payment Period.

4. A listing of all students whose SAP was calculated as part of an Automated SAP Calculation batch process is available. To generate this report, highlight the row corresponding to the desired batch.
5. Press **Preview**. A Report Selection form is displayed.
6. If desired, the report may be sorted by Student Name, SAP Status, School Status, or Program Version. The default

sort is set to Student Name. Move the desired sort variables to the Selected Sort Order field.

7. Press the **Preview** button on the report selection form.

   A report entitled **SAP Report** is produced. For each student processed it lists the SAP Status, GPA, Numeric Average, Current GPA, Current Numeric Average, Units Attempted, Units Earned, Hours Attended, Action if Failed, Academic Year/Payment Period (AY/PP), all SAP Failure Reasons, and if applicable, Linked SAP Enroll (ments), and, depending on the SAP Setup, the Academic Year Evaluation Point and the SAP Evaluation Date.

   Note: It is not possible to click on the student's name in the report and have CampusNexus Student automatically retrieve the Student Master Record as occurs in some other CampusNexus Student reports. Instead, create a Student Group from the report using the menu option at the top of the report viewer. You may then view the students in the group and double-click on the student's name to view the Student's Master Record.

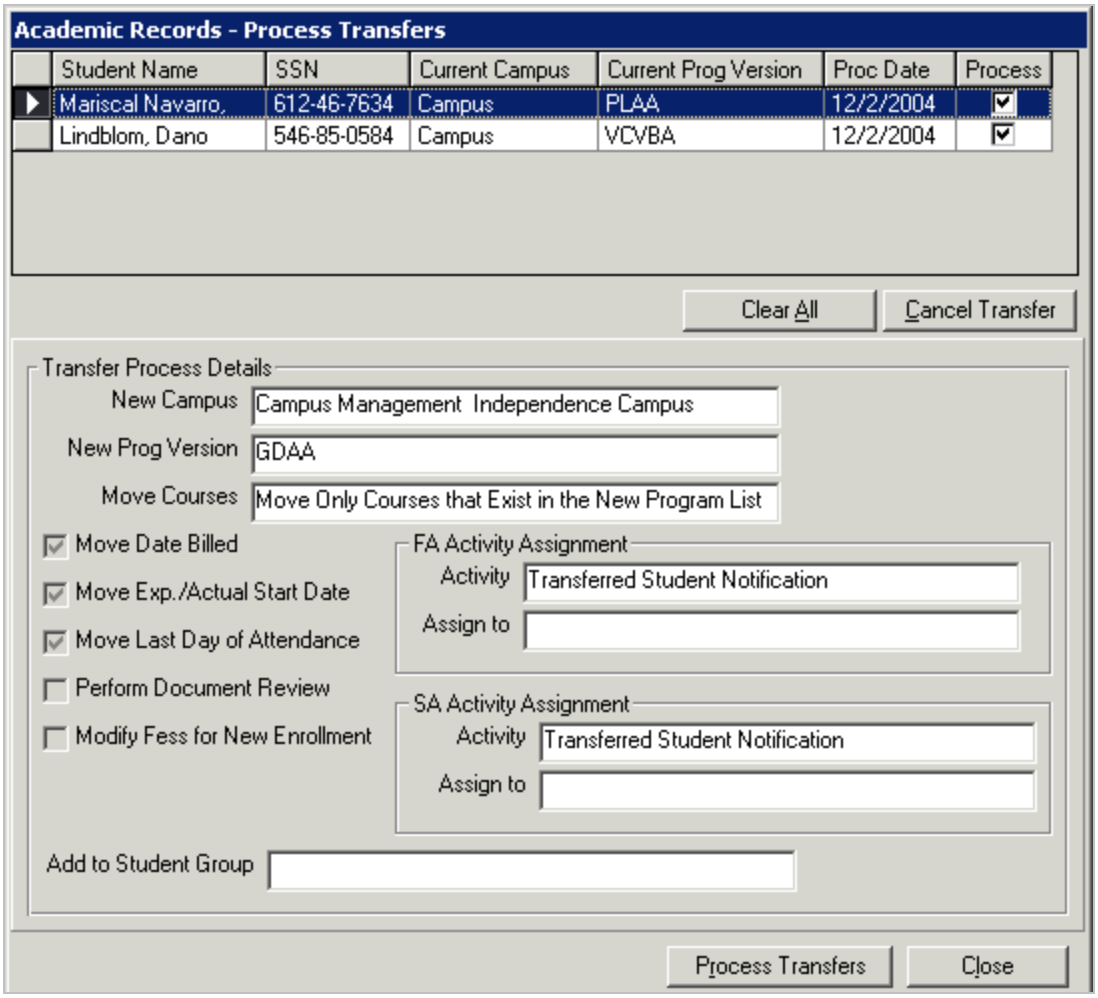
Process Queued Transfers

This menu option is used to process student transfers that have been queued up to wait for a certain date before processing. You can view or print transfers currently waiting to be processed and cancel a queued transfer. Transfers are initiated on an individual student basis from their enrollment folder. They can be scheduled to occur at a time selected by the user who records the transfer.

To process queued transfers:

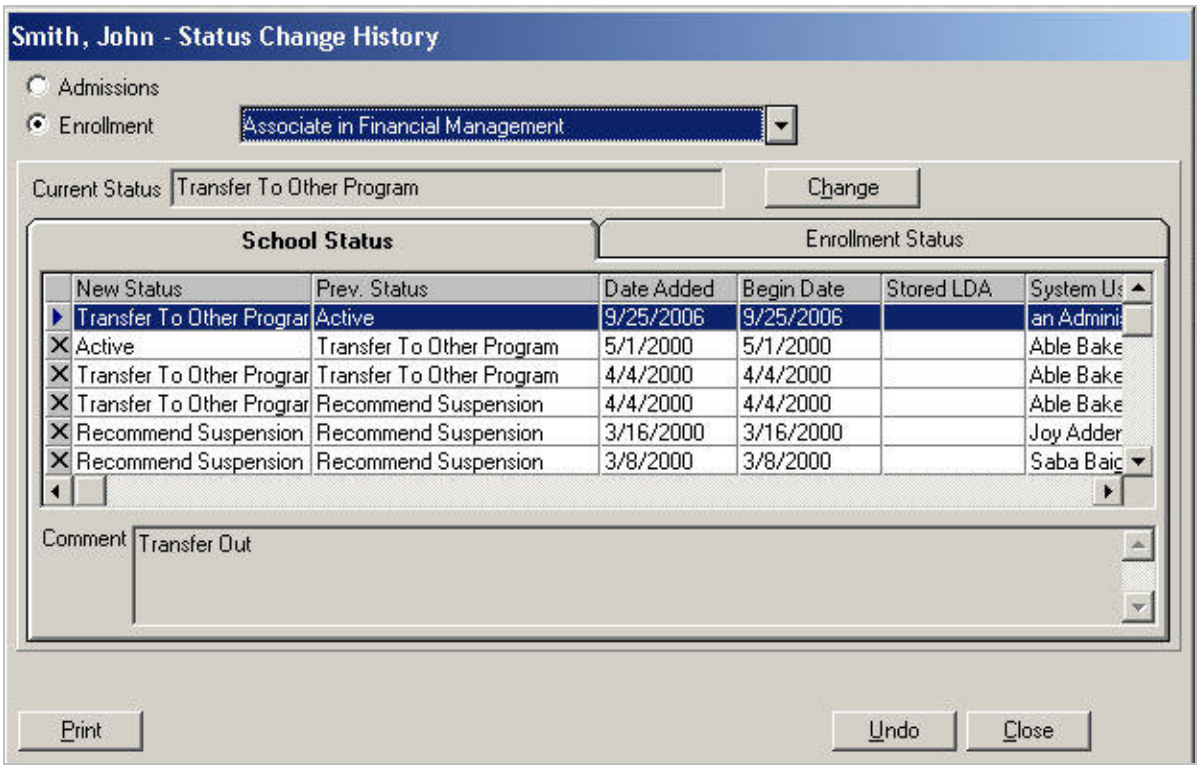
1. Navigate to **Daily** > **Academic Records** > **Process Queued Transfers**. The **Academic Records - Process Transfers** form is displayed.



2. You can select a student and click **Cancel Transfer** to remove the student from the list, or select the **Clear All** button to clear all **Process** check boxes.
3. You can also edit the **Proc Date** to a date later than the system date and clear the **Process** check box, or you can set the date to today's date or earlier and select the **Process** check box.
4. When you click **Process Transfers** at the bottom of the form, all transfer records with the **Process** check box selected will be processed. A message shows the number of pending transfer records. Click **Yes** to continue or **No**

to return to the previous screen.

5. A confirmation message is displayed. Click **OK**.
6. You may verify the transfer by navigating to the student's enrollment form and selecting the Status History button. The New Status will contain 'Transfer to Other Program' as the student's status.

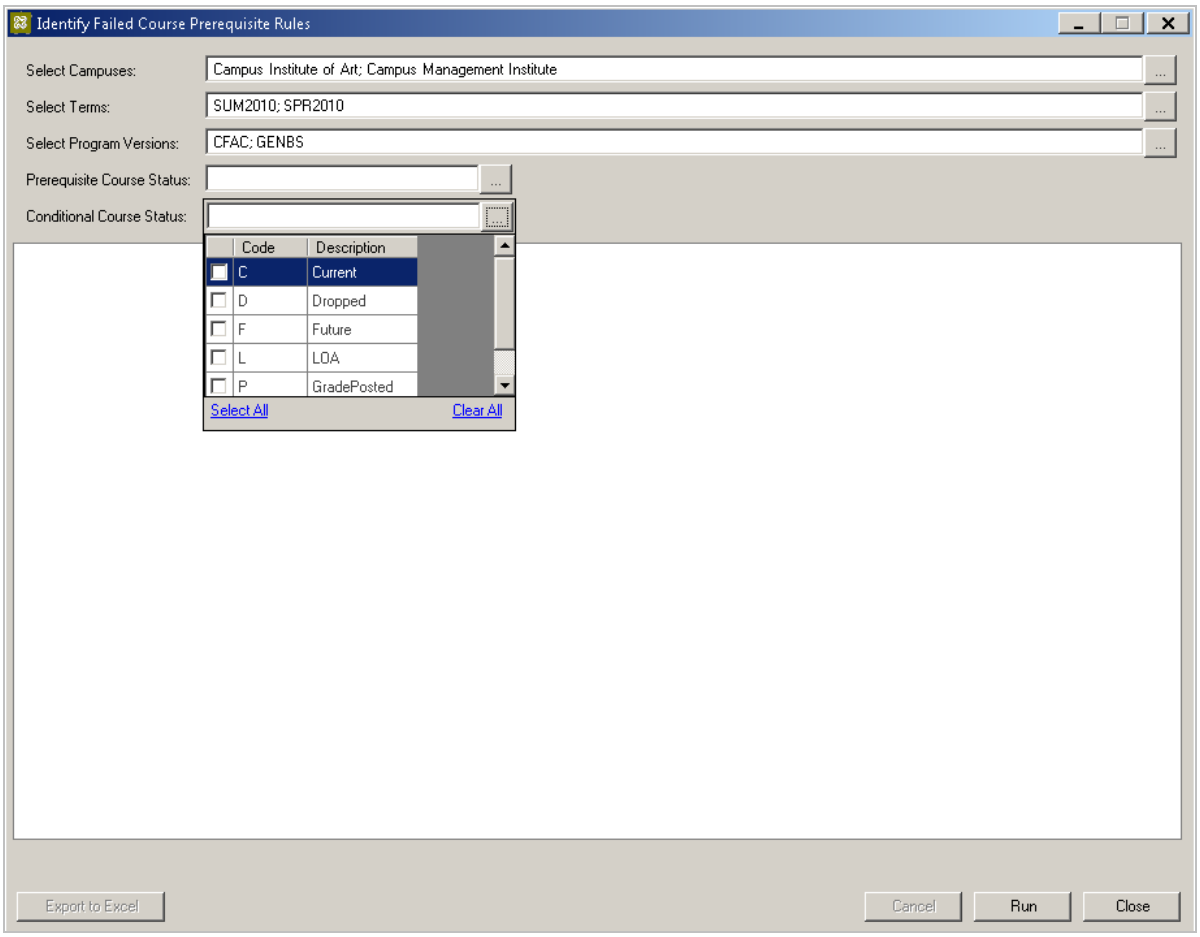


Identify Failed Course Prerequisite Rules

This menu item can be used to identify students who are not meeting the course prerequisite rule(s) for a conditional course they are registered for. Report results can be filtered by conditional course status and/or prerequisite course status, and can be exported to Excel as needed.

To identify failed course prerequisite rules:

1. Navigate to **Daily** > **Academic Records** > **Identify Failed Course Prerequisite Rules**. The Identify Failed Course Prerequisite Rules form is displayed.



2. Use the **Select Campuses** multi-select combo box to select the applicable campus(es). This list will be populated with the active campuses to which you have access, sorted by campus description. You must select at least one campus to be able to run the report.

   Note: The **Term** and **Program Version** combo boxes will remain unavailable and unpopulated until you select the campus(es).

3. Use the **Select Terms** multi-select combo box to select the applicable term(s). Terms are initially listed in descending order by end date, then by code. You must select at least one term to be able to run the report.

Note: A "dummy" Future Term is included in the Term combo box so that you can also identify unregistered pre-requisite courses.

4. Use the **Select Program Versions** multi-select combo box to select the applicable program version(s).

   Note: Program versions are listed by querying active programs for the selected campus(es), and are initially arranged in ascending alphabetical order based on code.

5. Use the **Prerequisite Course Status** and **Conditional Course Status** multi-select combo boxes to select the applicable course status(es). In each case, the possible values are:

   - Current (C)
   - Dropped (D)
   - Future (F)
   - LOA (L)
   - Grade Posted (P)
   - Scheduled (S)

   Note: Course status selections are only used to filter the failed course prerequisite rules being gathered for the report, i.e., to reduce the amount of data shown.

6. Click **Run** to generate the report. The report will run in the background, so you can continue using CampusNexus Student while it is running. If necessary, you may **Cancel** the report after the records to be processed are gathered and the report begins to process each record.

   Note: A label will appear in the lower left corner of the form, showing the current record being processed and the total number of records to be processed. In addition, a progress bar is displayed indicating the progress of report generation.

7. Upon completion of report generation, results are displayed in a grid in the form of a hierarchical tree grouped by campus and sorted by program version first, then by student name. You can change the default sort order in any column by clicking the grid column header. You can rearrange the columns in the grid by dragging them to the desired location.

   Note: Details for a particular student can be expanded/collapsed by clicking the +/- icon that appears to the left of the corresponding student record.

8. If applicable, use the **Export to Excel** button to export the report results to an Excel spreadsheet.

9. Click **Close** to close the form.

Report Configuration Academic Records THECB Reports

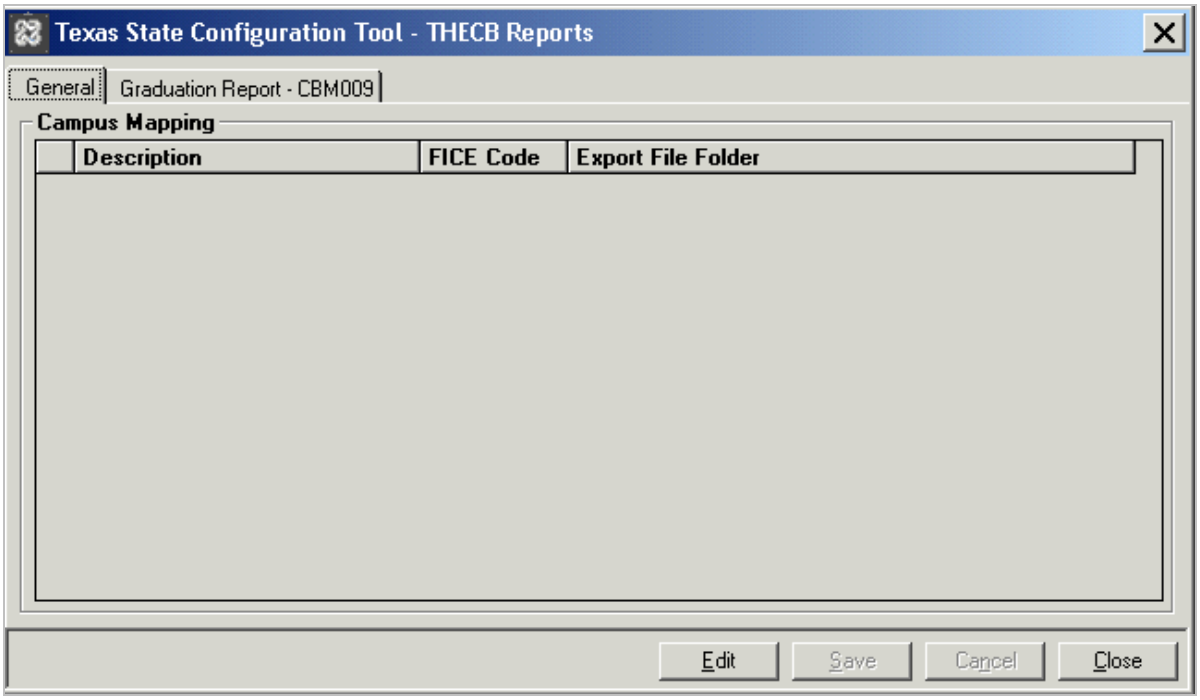
In Texas State, each participating institution has to submit an annual graduation report (CBM009) to the Texas Higher Education Coordinating Board (THECB).

The Graduation Report (CBM009) is an annual report due to THECB on November 1st. The report should reflect awards conferred during the academic year immediately preceding the fall semester in which the report is submitted. For example, the report due November 1, 2005 should reflect data from July 1, 2004 through June 30, 2005.

Each Graduation Report (CBM009) report must be configured before it can be generated and extracted.

To configure THECB reports:

1. Navigate to **Daily > Academic Records > Export Data > State Reporting > Texas > THECB-Configuration**. The Texas State Configuration Tool - THECB Reports form is displayed.



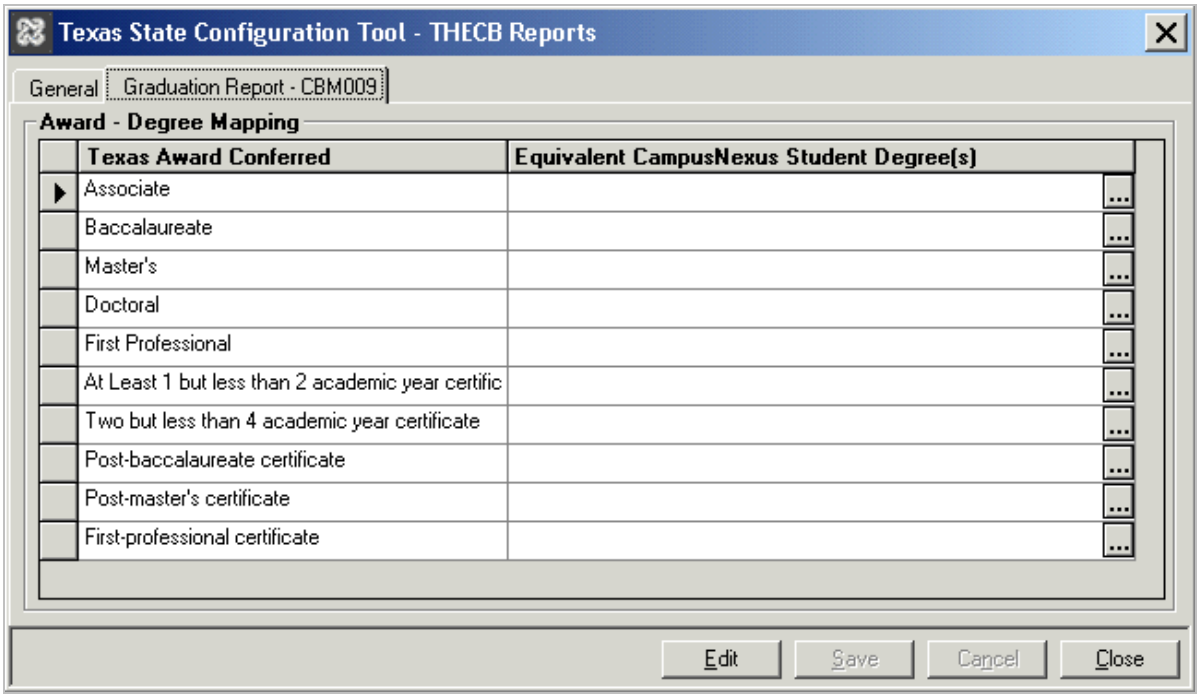
2. On the General Tab for Campus Mapping a list of campuses will appear and you can enter the FICE code and Export File Folder for each campus. More than one campus can have the same FICE code. Click the Edit button to modify the campus mapping information and enter the FICE code and Export File Folder information. Click ... to specify the path where the export file will be placed once it is generated. Click the Save button to save information or the Cancel button to restore the information to its original state.

   Note: An information message will appear if the FICE code is not numeric or the length of the FICE code that you entered is not six digits.

Graduation Report - CBM009 Configuration

To Configure the report:

1. Select the appropriate degree listed in the Equivalent CampusNexus Student Degree(s) in the right-hand column and match it with the appropriate "Award Conferred" for your state in the left-hand column. The same CampusNexus Student Degree(s) can be mapped to different Awards Conferred. If there are no listings for Equivalent CampusNexus Student Degree(s) , click ... and make a selection.
2. Click **Save** to save the Award - Degree mapping.



Note: A Warning! message will appear if you attempt to exit the window without associating at least one CampusNexus Student Degree with a State Award Conferred. If you do not want to finish configuring the report, click **Cancel**and **Close** button to exit the window. To finish configuring the report, select the CampusNexus Student degrees and associate them with the state award conferred.

See also Report Extract Academic Records THECB Reports for information regarding extracting and generating the Graduation Report (CBM009) and Student Enrollment (CBM001) reports.

Report Configuration Academic Records THECB Reports

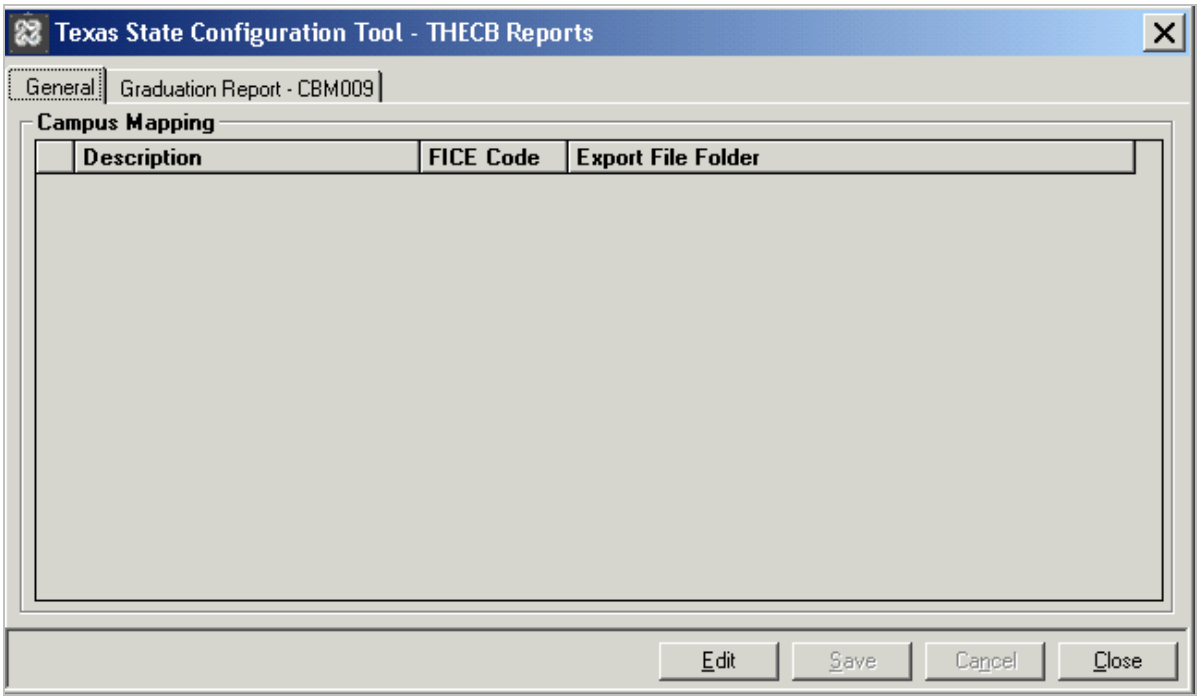
In Texas State, each participating institution has to submit an annual graduation report (CBM009) to the Texas Higher Education Coordinating Board (THECB).

The Graduation Report (CBM009) is an annual report due to THECB on November 1st. The report should reflect awards conferred during the academic year immediately preceding the fall semester in which the report is submitted. For example, the report due November 1, 2005 should reflect data from July 1, 2004 through June 30, 2005.

Each Graduation Report (CBM009) report must be configured before it can be generated and extracted.

To configure THECB reports:

1. Navigate to **Daily > Academic Records > Export Data > State Reporting > Texas > THECB-Configuration**. The Texas State Configuration Tool - THECB Reports form is displayed.



2. On the General Tab for Campus Mapping a list of campuses will appear and you can enter the FICE code and Export File Folder for each campus. More than one campus can have the same FICE code. Click the Edit button to modify the campus mapping information and enter the FICE code and Export File Folder information. Click ... to specify the path where the export file will be placed once it is generated. Click the Save button to save information or the Cancel button to restore the information to its original state.

   Note: An information message will appear if the FICE code is not numeric or the length of the FICE code that you entered is not six digits.

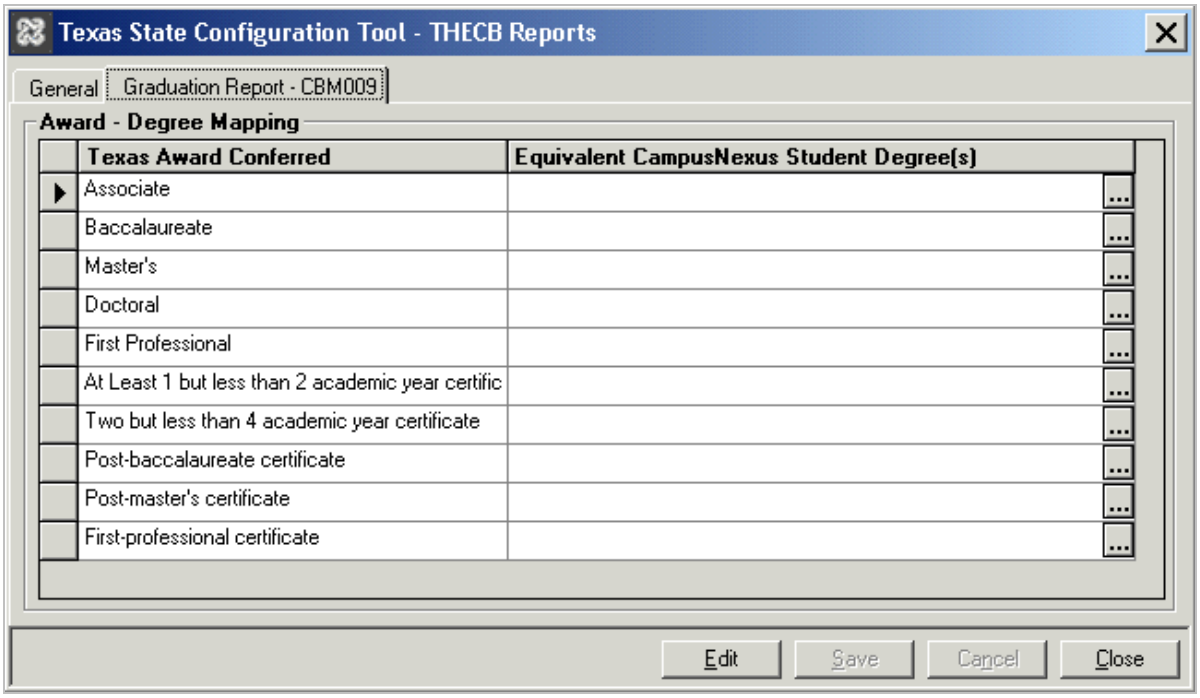
Graduation Report - CBM009 Configuration

To Configure the report:

1. Select the appropriate degree listed in the Equivalent CampusNexus Student Degree(s) in the right-hand column and match it with the appropriate "Award Conferred" for your state in the left-hand column. The same CampusNexus Student Degree(s) can be mapped to different Awards Conferred. If there are no listings for Equivalent

CampusNexus Student Degree(s) , click ... and make a selection.

2. Click **Save** to save the Award - Degree mapping.



Note: A Warning! message will appear if you attempt to exit the window without associating at least one CampusNexus Student Degree with a State Award Conferred. If you do not want to finish configuring the report, click **Cancel**and **Close** button to exit the window. To finish configuring the report, select the CampusNexus Student degrees and associate them with the state award conferred.

See also Report Extract Academic Records THECB Reports for information regarding extracting and generating the Graduation Report (CBM009) and Student Enrollment (CBM001) reports.

Report Extract Academic Records THECB Reports

In Texas State, each participating institution has to submit two types of reports to the Texas Higher Education Coordinating Board (THECB)

1. A student enrollment report (CBM001) for both the spring and fall semesters and

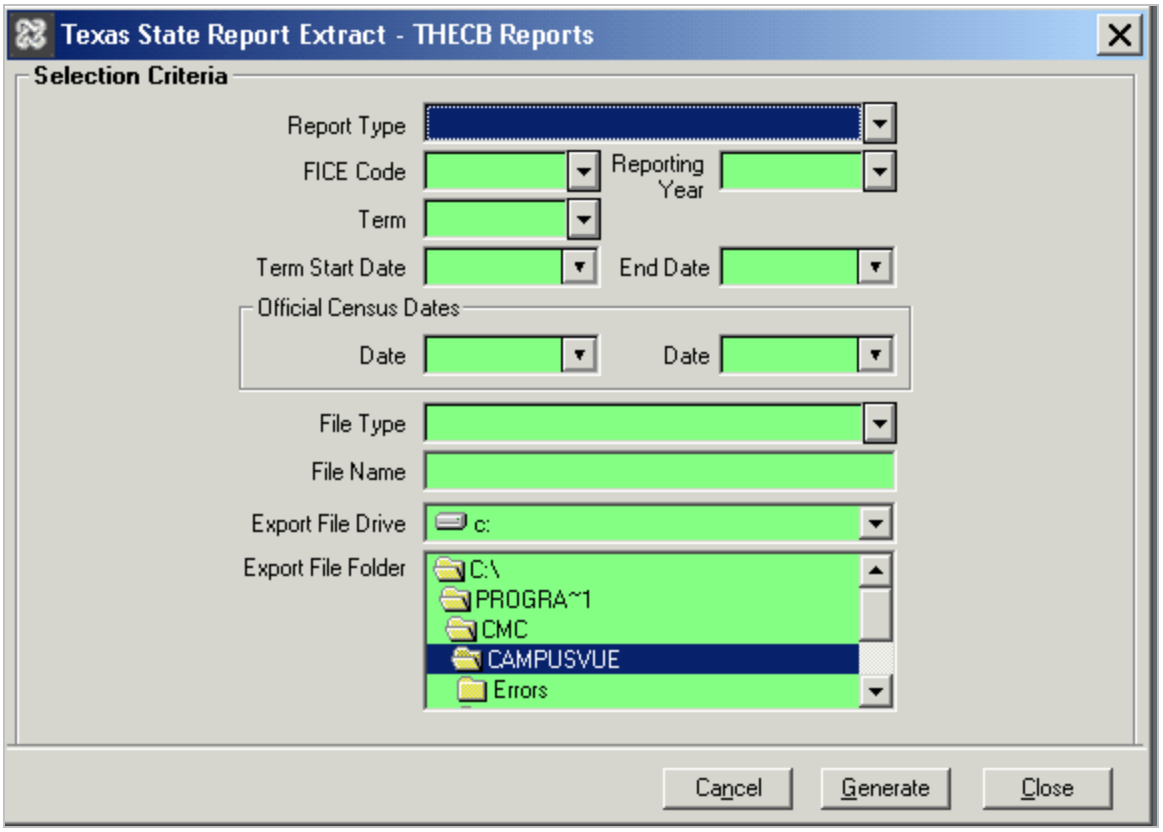
2. An annual graduation report (CBM009)

The Student enrollment report (CBM001) reflects all students enrolled at the reporting institution as of the institution's official census date for the semester (spring and fall) where the Official census date refers to the date set by Department of Education, Science and Training (DEST) that academic and financial penalties are applied. If a student withdraws from the institution on or before the official census date, they must not be included in this report.

The Graduation Report (CBM009) is an annual report due to THECB on November 1st. The report should reflect awards conferred during the academic year immediately preceding the fall semester in which the report is submitted. For example, the report due November 1, 2005 should reflect data from July 1, 2004 through June 30, 2005. The Graduation Report (CBM009) report must be configured before it can be generated and extracted. Click here for configuration instructions for this report before proceeding to *extract* the Graduation Report (CBM009).

To extract and generate THECB reports:

Navigate to **Daily > Academic Records > Export Data > State Reporting > Texas > THECB-Extract**. The Texas State Report Extract - THECB Reports form is displayed.



Student Enrollment Report (CBM001)

1. Select the "Student Enrollment Report - CBM001" from the "Report Type" drop-down list.
2. Select the appropriate FICE code from the drop-down list.

3. Notice the "Reporting Year" field is disabled. It is not needed for this report.
4. Select the "Term" from the drop-down list. The options are Fall or Spring.
    - If "Fall" is chosen for Term, the "Official Census Dates" labels will display Summer and Fall date options.
    - If "Spring" is chosen for Term, the "Official Census Dates" labels will display Winter and Spring date options.
5. Select the "Term Start Date" and "End Date" from the drop-down lists. The start date must be a date before the end date. The Term Start and End Dates can be any valid date.
6. Select the appropriate "Official Census Dates" from the drop-down list of dates. These dates should be within the start and end date of the Term selected above.
7. Select the appropriate "File type" from the drop-down list. You may generate a flat file or excel spreadsheet.
8. Enter the filename in the "File Name" data entry field. A file name will be generated automatically in the format as CBM001_Term_FICECODE_DateTimeStamp (YYYYMMDDHHMMSS). For example, CBM001_Fall_001234_20051104121224. You can change the file name. In case the user selects Excel as the file type, the filename field will be blank and disabled/not required. The folder path will also be disabled/not required.
9. Find the appropriate Export File Drive from the drop-down list and select it.
10. Find the appropriate Export File Folder from the drop-down list and select it.
11. Click the "Generate" button to generate the report.

An confirmation message will appear when the file has been generated with the path information where the file resides.

Graduation Report (CBM009)

1. Select the "Graduation Report - CBM009" from the "Report Type" drop-down list.
2. Select the appropriate FICE code from the drop-down list.
3. Select the appropriate "Reporting Year" from the drop-down list of dates.
4. Select the appropriate "File type" from the drop-down list. You may generate a flat file or excel spreadsheet.
5. Enter the filename in the "File Name" data entry field. A file name will be generated automatically in the format as CBM009_Graduation_Report yr_FICE CODE Date/Time Stamp (YYYYMMDDHHMMSS).

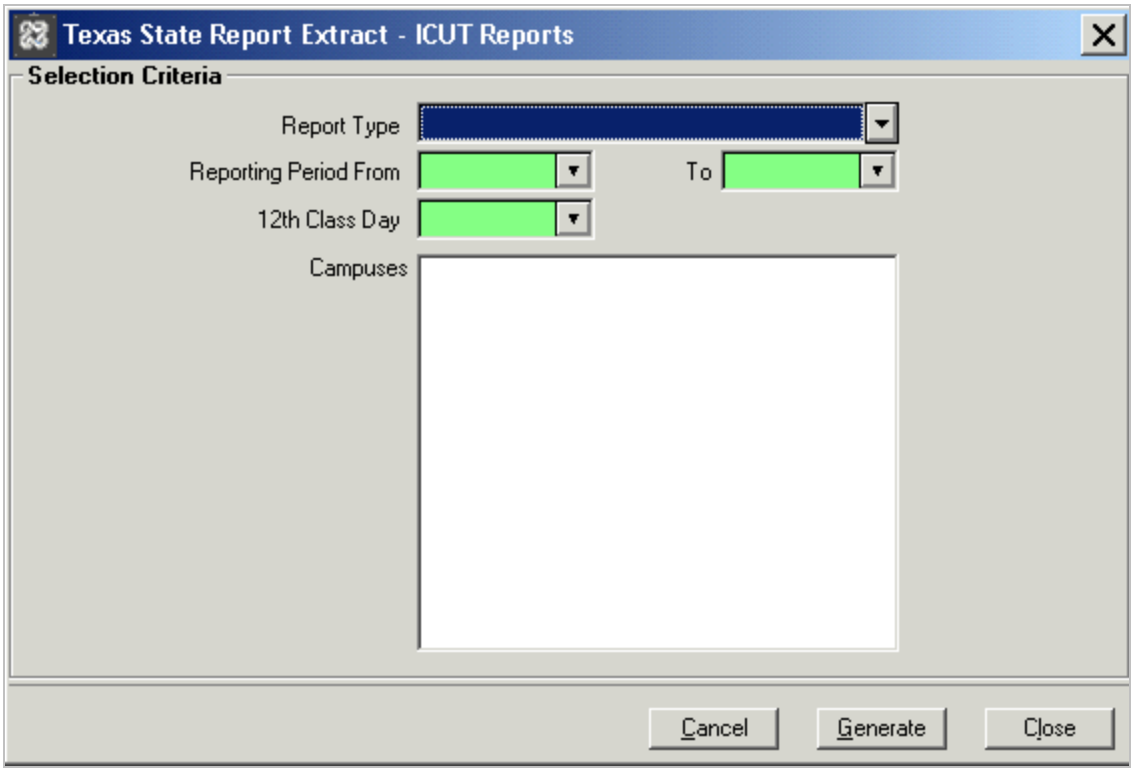
    For example, CBM009_Graduation_2005_001234_20051104121224.,when reporting year selected is 2004-05 and FICE Code is 001234. You can change the file name. To create an Excel spreadsheet as the file type, the filename field will be blank and disabled/not required. The folder path will also be disabled/not required.
6. Find the appropriate Export File Drive from the drop-down list and select it.
7. Find the appropriate Export File Folder from the drop-down list and select it.
8. Click the "Generate" button to generate the report.

Report Extract Academic Records ICUT Reports

The Independent Colleges and Universities for Texas (ICUT) reports for Academic Records Aid do not need to be configured.

To extract and generate ICUT reports:

Navigate to **Daily > Academic Records > Export Data > State Reporting > Texas > ICUT-Extract**. The Texas State Report Extract - ICUT Reports form is displayed.



Fall Enrollment by Ethnicity Report

1. Select the "Fall Enrollment by Ethnicity Report" from the "Report Type" drop-down list.
2. Select the appropriate "Reporting Period From" and "To" dates.
3. Select the appropriate "12th Class Day" date from the drop-down list of dates.
4. Select the campuses that you would like to be included in the ICUT report.
5. Click the "Generate" button to generate the report.

Survey of Freshman Retention Report

1. Select the "Survey of Freshman Retention Report" from the "Report Type" drop-down list.
2. Select the appropriate "Reporting Period From" and "To" dates.
3. Select the appropriate "12th Class Day" date.
4. Select the campuses that you would like to be included in the ICUT report.
5. Click the "Generate" button to generate the report.

Twelfth Day Headcount Enrollment Report

1. Select the "Twelfth Day Headcount Enrollment Report" from the "Report Type" drop-down list.
2. Select the appropriate "Reporting Period From" and "To" dates.
3. Select the appropriate "12th Class Day" date.
4. Select the campuses that you would like to be included in the ICUT report.
5. Click the "Generate" button to generate the report.

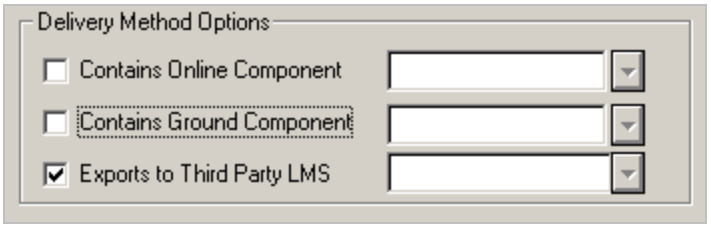
Registration Extract Status

The **Registration Extract Status** tool allows you to change the LMS extract status of selected records and resubmit them to the LMS. You can change the extract status of a single record or in a batch of multiple records.

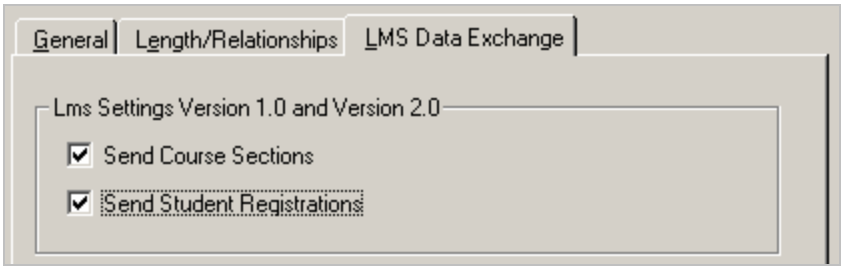
Configuration Setup Options

This option will only be available if certain configurations are set up prior to using this tool.

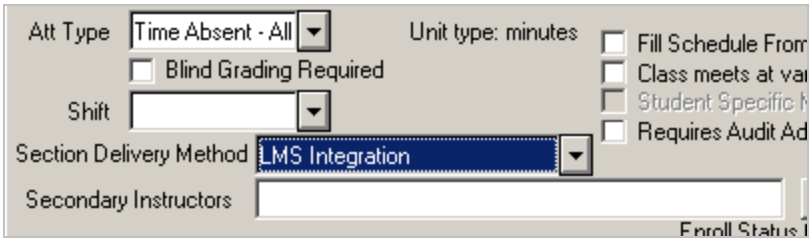
1. The Delivery Method should be configured for LMS Data exchange from Lists > Academic Records > Delivery Method (tab). The **Export to Third Party LMS** check box should be selected.



2. The Term should be configured for LMS Data Exchange from Lists > Academic Records > Term > LMS Data Exchange (tab).



3. The Course Section should be configured to use the Delivery Method in the above setting within Daily > Academic Records > Schedule Classes > Add/Edit (button).

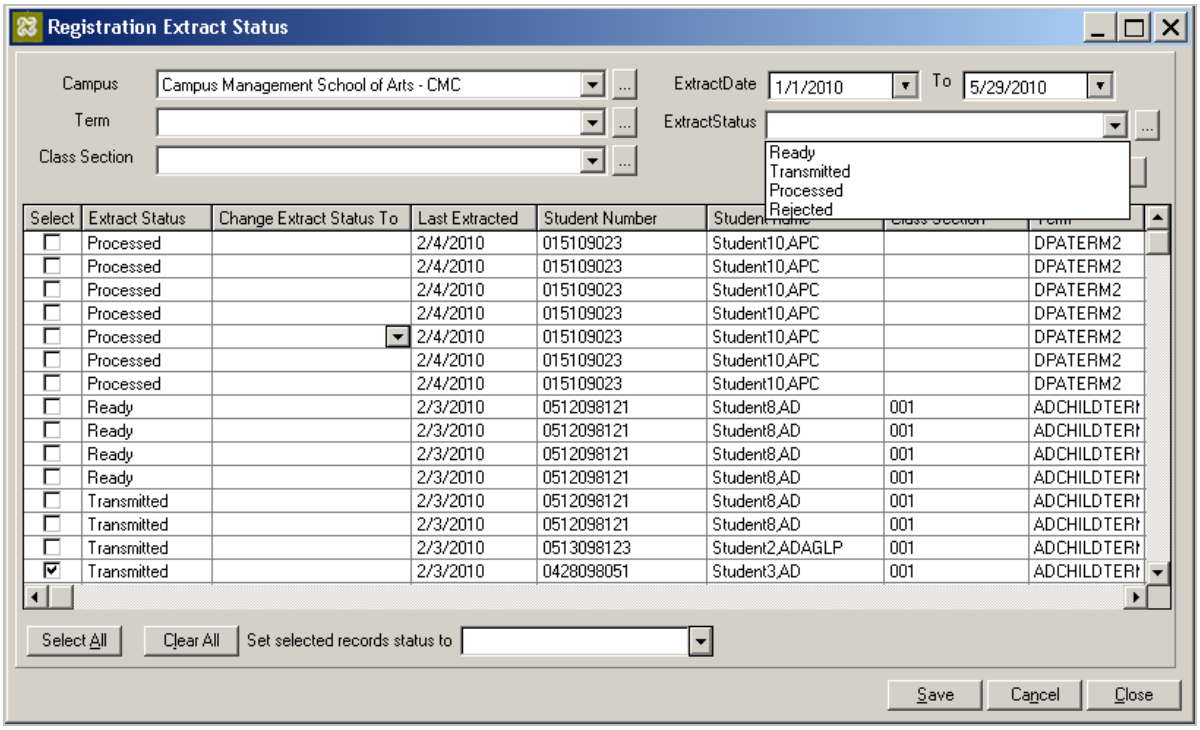


Key to Registration Extract Statuses

Status	Description
Ready	The status when records are Registered, Unregistered, Dropped, Reinstated or Transferred into LMS course sections and terms via CampusNexus Student/Portal/CampusLink API.
Transmitted	The API will change a record in Ready status to Transmitted status when records are extracted successfully.

Status	Description
Processed	After a record has been transmitted, this is the status produced by the Acknowledgement API to indicate that the process was successfully executed.
Rejected	After a record has been transmitted, this is the status produced by the Acknowledgement API to indicate that the process was NOT successfully executed.

Filtering Records



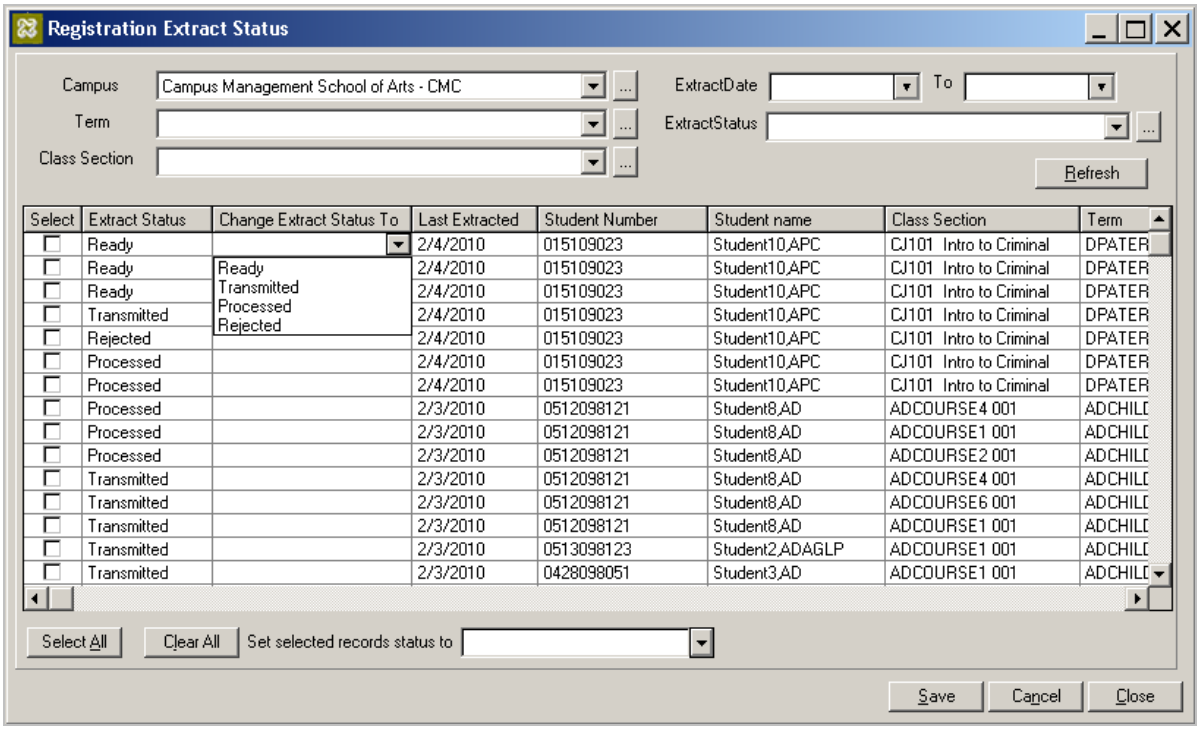
You can filter the records you would like to view and/or update by filtering on the following search criteria:

- Campus - filter by campus. Click ... to select multiple campuses.
- Term - filter on the term(s) that belong to the campus(es). selected in the Campus list. Click ... to select multiple terms.
- Class Section - filter on the class section(s) which belong to the term(s) selected in the Term list. Click ... to select multiple class sections.
- Extract Date (from and to dates) - filter on any valid date range.
- Extract Status - filter on Ready, Transmitted, Processed and Rejected extract statuses. See Key to Registration Extract Statuses for status definitions.

When you have completed selecting your search criteria, click **Refresh**. The results that meet your search criteria will then be listed in the grid below.

Note: You must select at least one filter criteria before clicking on the Refresh button.

Results Grid



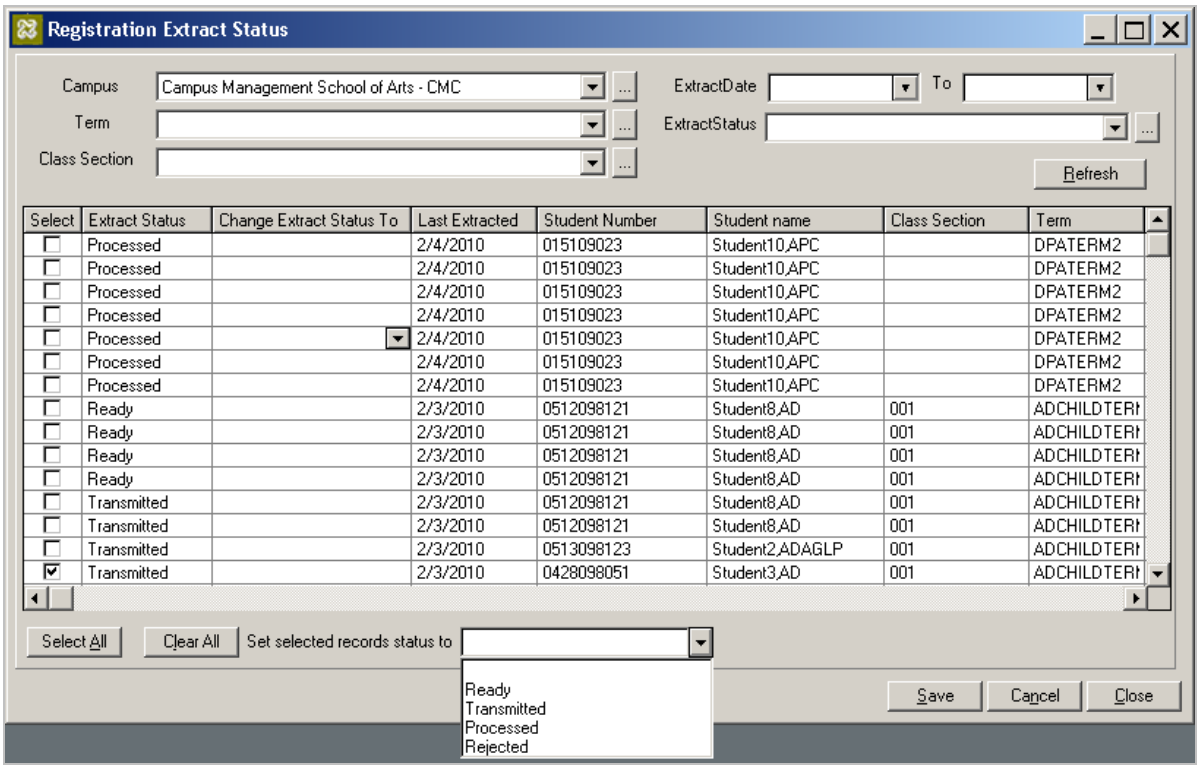
After you click **Refresh**, the following fields are populated in the grid:

- Select*- allows you to select or deselect individual record(s) for the LMS status change. By default, the records are deselected. You can also choose to select all the records at one time through Select All or deselect them through Clear All.
- Extract Status - displays the current extract status of the record.
- Change Extract Status To* - when you click on this column, a drop-down box with the values Ready, Transmitted, Processed and Rejected is displayed to select as the new extract status. See Key to Registration Extract Statuses for status definitions.

  Note: If you choose one of these options, the Select field will automatically be selected even if you had not selected this check box prior to selecting any value in the Change Extract Status To field. If you select a status in the Change Extract Status To field that is the same value as the Extract Status field, the Select check box will be deselected even if you had selected it prior to selecting any value in the Change Extract Status To field.
- Last Extracted - displays the last date that the record was extracted.
- Student Number - displays the student number.
- Student name - displays the student name.
- Class Section - displays the class section.
- Term - displays the term that the record belongs to.
- Old Status - displays the prior status of a course before the status change occurred.
- New Status - displays the new status of a course after the status change occurred.

- Action - displays the action taken to change the course status (e.g., Register).
- Campus - displays the campus that the record belongs to.

*Select and Change Extract Status To are the only editable fields in the grid.



You can click **Select All** to select all records in the grid at one time. You can then changed the status of all the records by then selecting a status in Set selected records status to. Similarly, you can click **Clear All** to deselect all records in the grid at one time. **Clear All** allows you to undo any potential extract status change selections before they are committed to the database.

Set selected records status to - you can update the **Change Extract Status To** field for ALL selected records by selecting a value in the **Set selected records status to** drop-down box. The value of all selected records will be updated as soon as you select a value from this drop-down box. By default, this drop-down box will be blank.

After selecting the extract status(es) to be changed in the **Change Extract Status To** field, click **Save** and the extract status(es) will be updated in the database and sent to the LMS. To remove all filter criteria, click **Cancel**. When you have completed your extract changes, click **Close**.

Generate Batch Transcripts

Generate Batch Transcripts enables users to save student transcripts as PDF files. This works for all transcript forms and custom transcript reports. Users can also save to PDF by individual student and each generated PDF is automatically labeled with that student's name.

Set the path for the location of the generated PDF file at: **Setup > Campus Locations > Academic Records > General**

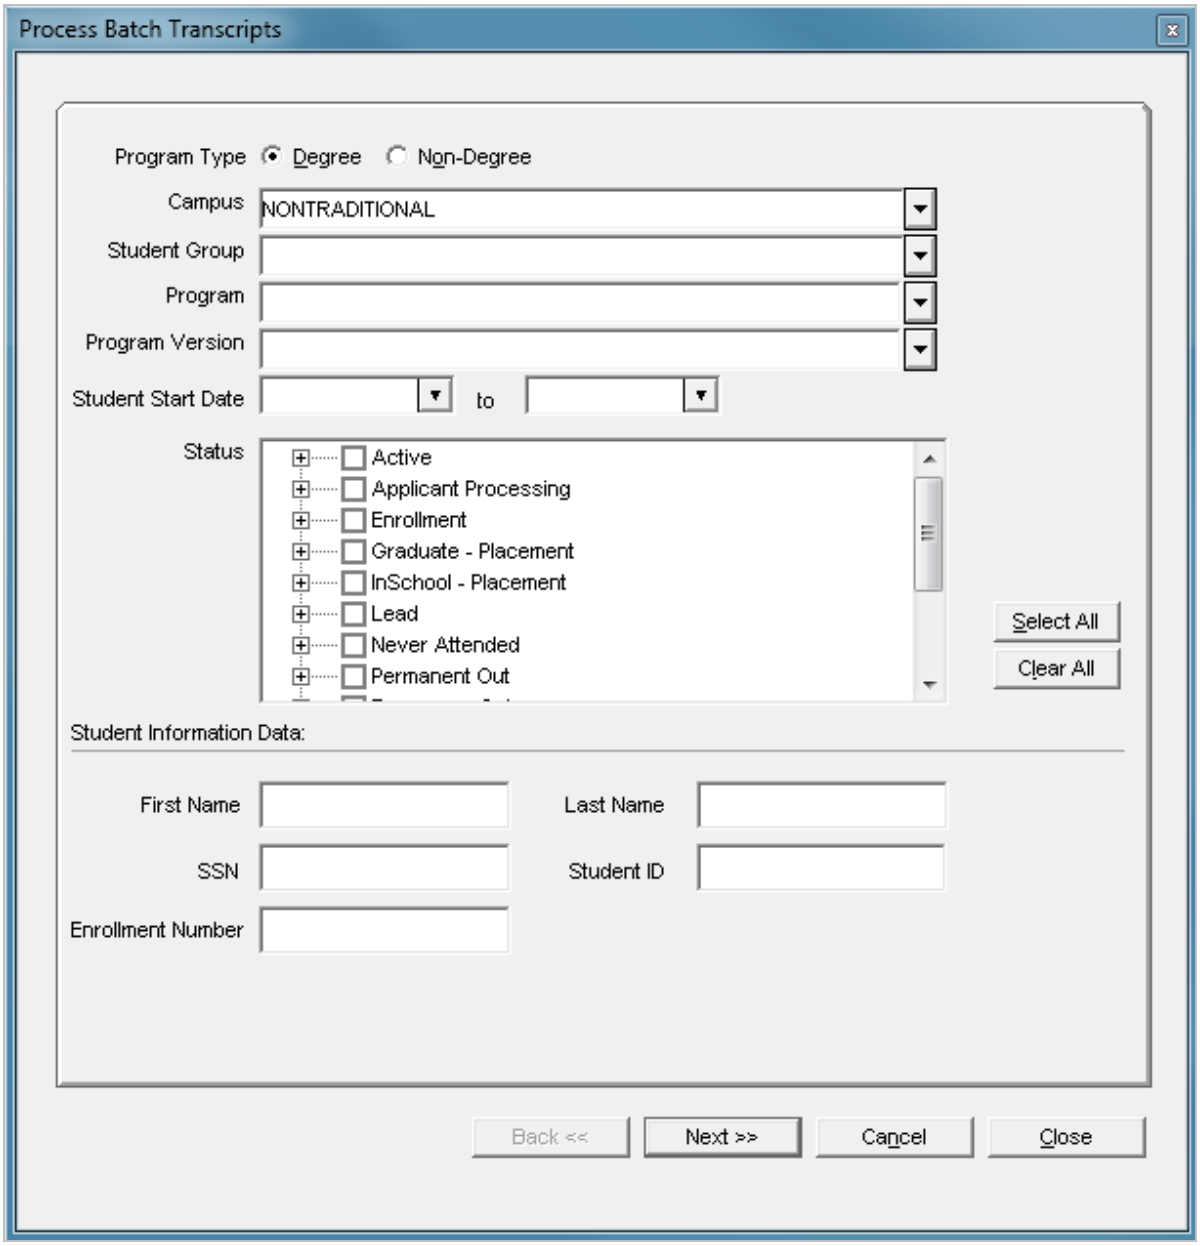
Once generated, transcript files are placed in the folder specified for that campus. If this is specified differently per campus, the files are placed in the folder for the campus that the student is associated to. If the user does not have permission to access the path the transcript files be placed, the system displays the following warning: "User does not have permissions to write to this path. Please contact your System Administrator."

The PDF can be generated for:

- Enrollment Based Transcript
- Student Based Transcript

To save transcripts as PDF files:

1. Navigate to **Daily > Academic Records > Generate Batch Transcripts**. The Process Batch Transcripts form is displayed.



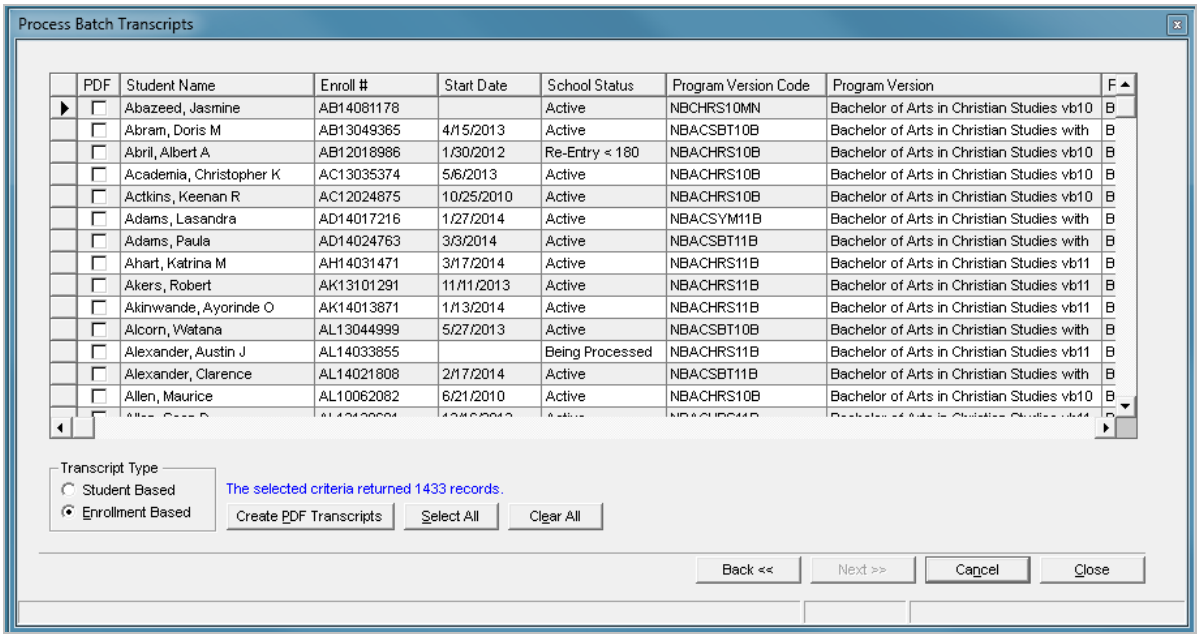
2. Specify appropriate options.

Field Descriptions

Field	Description
Program Type	Select either Degree or Non-Degree
Campus	Select the desired Campus you wish to pull transcripts from **Note**: The campuses displayed in the Campus drop-down field are regulated by the permission granted to the user currently logged in.

Field	Description
Student Group	Select the desired Student Group you wish to pull transcripts from
Program	Select the Program you wish to pull transcripts from
Program Version	Select the Program Version you wish to pull transcripts from
Student Start Date	Enter the Start Date range for the student(s)
Status	Select the Status of the student(s) you wish to pull transcripts for
First Name	Enter a specific student's First Name
Last Name	Enter a specific student's Last Name
SSN	Enter a specific student's Social Security Number
Student ID	Enter a Student ID number for a specific student
Enrollment Number	Enter an Enrollment Number for s specific student

3. Click **Next** to proceed.



Field Descriptions

Field	Description
PDF	Select the check boxes for the students whose transcripts you need

Field	Description
Transcript Type	Select the transcript type for the PDF

4. After selecting the desired students and Transcript Type, select **Create PDF Transcripts**.

   When the PDF is generated, the file is limited to a maximum limit of 1000 records. If this number is exceeded, a message will display noting this and present the option to process the first 1000 transcripts selected.

   Note: If a PDF file already exists for a given student, it is overwritten when a new transcript generation occurs for that student.

Daily > Distance Education

The Daily > Distance Education submenu options are as follows:

- Lesson Receipt
- Lesson Grading
- Course Rewrites
- Instructor Payment Processing
- <Detach> (This options detaches the submenu.)

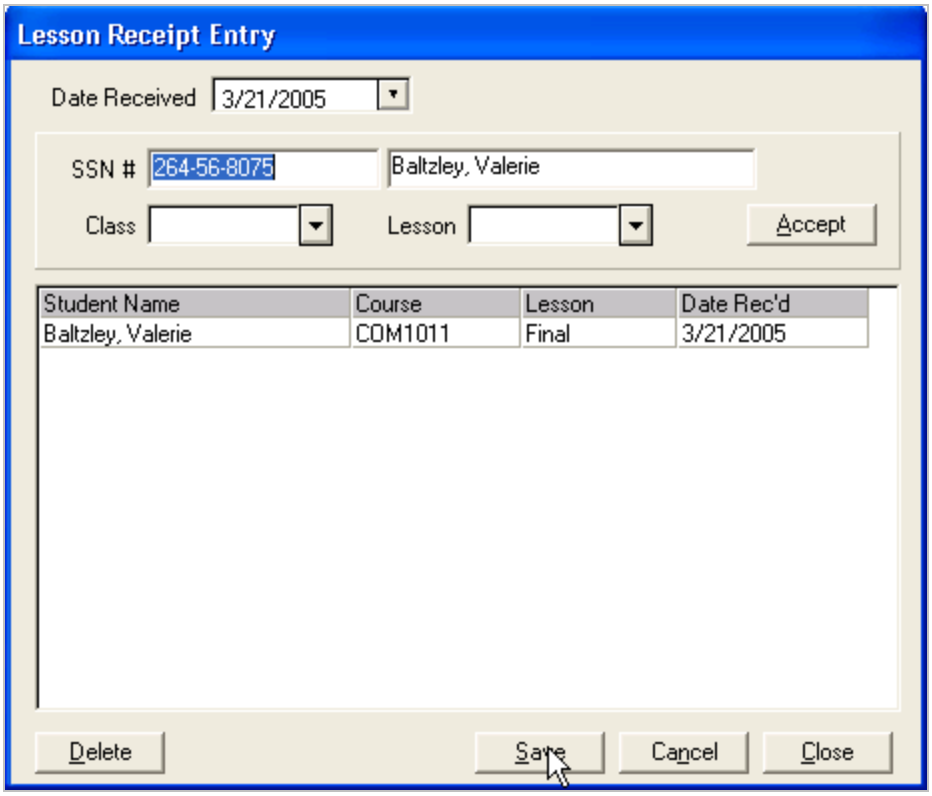
Lesson Receipt

This is a "batch" processing procedure intended for situations in which you have to enter several lesson receipts for a number of students.

You can use this form to record the receipt of lessons, exams, and book reports from your distance education students. (In the context of this procedure, lessons, exams, and book reports are handled in the same manner.) Before you can use this form, a student must be enrolled in a program version, and registered in a course or class section for which lessons, exams, and/or book reports have been set up.

To record a lesson receipt:

1. Determine the **Social Security Number** of the student from whom a lesson has been received.
2. Navigate to **Daily** > **Distance Education** > **Lesson Receipt**. The Lesson Receipt Entry form is displayed.



3. The current date will be entered as a default in the **Date Received** text box. If this is not the date you want to use, click the arrow to select another date, or type your desired date in the box.
4. Enter the **Social Security Number** of the student from whom the lesson or exam has been received. CampusNexus Student finds the student's master record and displays the student's name. CampusNexus Student also displays the next **Class** (class section code) and **Lesson** code for which a lesson is expected to be received.
5. If the **Class** (class section code) is not the one for which a lesson has been received, select the correct one from the drop-down list. If you change the class section code, CampusNexus Student displays the next lesson expected in the class section you select.
6. If the **Lesson** is not the one that has been received, select the correct one from the list.

7. Click **Accept** to add the lesson to the list of those received.

   Note: If your school has set up a "minimum number of days between lessons", you may not be able to receive a lesson that has been sent in prematurely. If your school has set up a block on receiving lessons after the expected end date of the course, you may not be able to receive a lesson. A staff member with system administrator privileges can override these blocks.

8. Repeat steps 3 through 7 until all lessons received have been entered.
9. If you accepted a lesson that has not been received, remove it from the list by clicking on the lesson in the accepted list, and then click **Remove**.
10. Click **Save** at the bottom of the form to submit your list of received lessons.

    Note: If you discover that a mistake has been made after you have clicked Save, use the procedures under View > Academic Records > **Lessons** to correct the mistake.

11. Click **Close** to close the form.

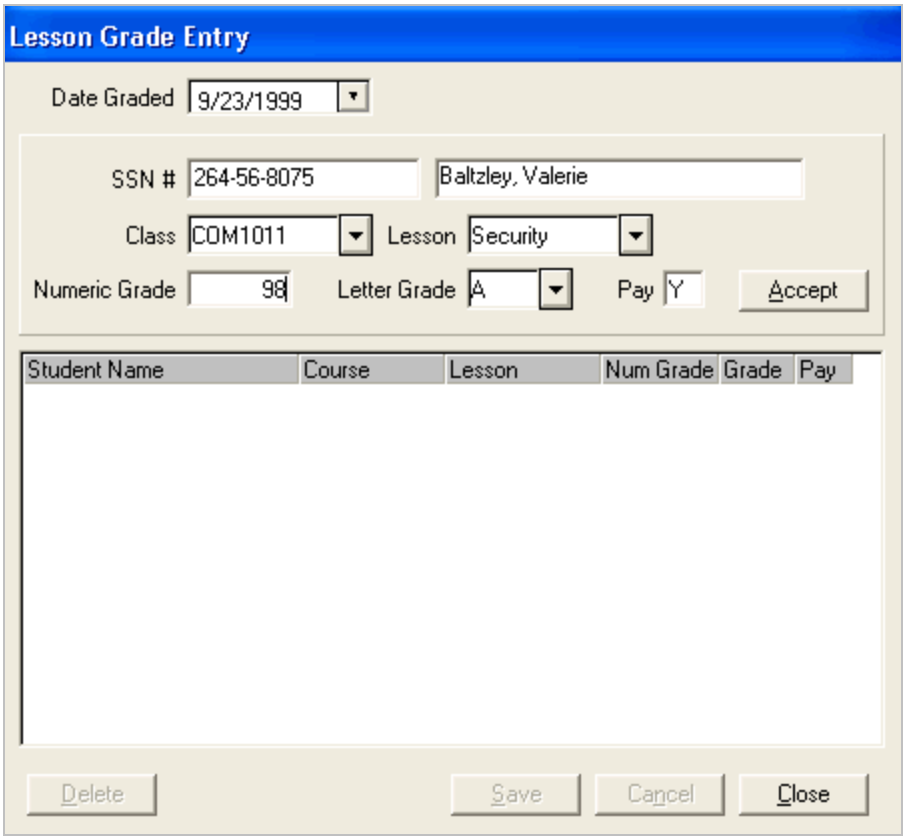
Lesson Grading

This is a "batch" processing procedure intended for situations in which you have several grades to enter for a number of students.

You can use this form to record the grades for lessons, exams, and book reports from your distance education students. (In the context of this procedure, lessons, exams, and book reports are handled in the same manner.) Of course, before you can use this form, a student must be registered in a class section for which lessons, exams, and/or book reports have been set up. Further, the lessons must have been received back at your institution from the student.

To record a lesson grade:

1. Determine the **Social Security Number** of the students for whom a grade must be entered.
2. Navigate to **Daily** > **Distance Education > Lesson Grading**. The Lesson Grade Entry form is displayed.
3. The current date will be entered as a default in the **Date Graded** text box. If this is not the date you want to use, click the arrow to select another date, or simply enter your desired date in the box.
4. Enter the **Social Security Number** of the student from whom the lesson or exam has been graded. The program will find the student's master record and display the student's name. The program will also display the next **Class** (class section code) and **Lesson** code for which a grade can be entered.
5. If the **Class** (class section code) is not the one for which you want to post a grade, select the correct one from the drop-down list. If you change the class section code, the program will display the next lesson for which a grade can be posted.
6. If the **Lesson** is not the one for which you want to post a grade, select the correct one from the drop-down list.
7. Enter the **Numeric Grade** and/or **Letter Grade**. If you enter a numeric grade, and if the grade scale has been set up for numeric grades, the program will calculate the proper letter grade. The reverse is not true, however. If you enter a letter grade, there is no way for the program to guess the numeric equivalent.
8. Enter a Y for yes or an N for no in the **Pay** text box. This indicates whether the instructor is to be paid for this grade. The default is Y.



9. Click **Accept** to add the grade to the pending list of lessons that have been graded.
10. Repeat steps 3 through 7 until all lesson grades have been entered.
11. If you graded a lesson in error, remove it from the list by clicking on the lesson in the accepted list, and then click **Delete**.
12. Click **Save** to submit your list of graded lessons.

    Note: If you discover that a mistake has been made after you have clicked Apply, you must use the procedures under View, Academic Records, Lessons to correct the mistake.
13. Click **Close** to close the form.

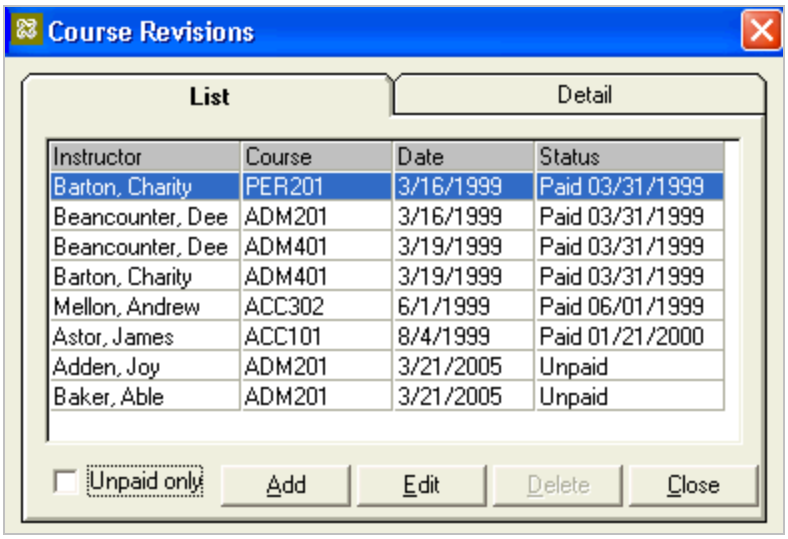
Course Rewrites

From time to time it becomes necessary to revise the lesson plan or content of a distance education course. This form can be used to initiate a payment to an instructor who has performed such a service. With it, you can record the instructor's name, course code, date, and amount. The program tracks the status of the payment.

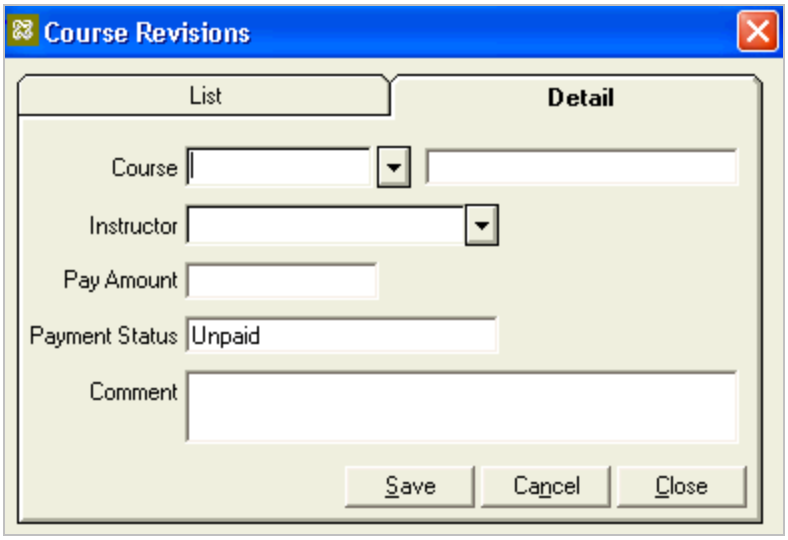
The result of entering a course revision record here is a payment transaction to the instructor during the next Instructor Payment Processing update.

To enter a Course Revision record:

1. Navigate to **Daily> Distance Education > Course Rewrites**. The Course Revisions form is displayed.



2. To see a list showing only those course revision records that have not been paid, click **Unpaid Only**.
3. Click **Add** to add a new course revision record. The Detail form is displayed.



4. Enter the **Course** code or select it from the drop-down list. When you tab to the next field, the description of the

course is displayed in the adjacent text box.

5. Select the **Instructor** from the drop-down list.
6. Enter the **Pay Amount**.
7. The **PaymentStatus** text box will default to unpaid. The program controls the Status values which are "Unpaid" or "Paid on 99/99/99" where 99/99/99 is the date of the Instructor Payment Processing procedure.
8. Enter any **Comments** that you want to add.
9. Click **Save** to save your new record and return to the List page.

To edit an existing course revision record:

1. Click the item on the list.
2. Click **Edit**.
3. Follow the steps above to change the data as needed.

To remove an item from the course revision list

1. Click the item on the list.
2. Click **Remove**. The item will be removed from the list. Only unpaid items can be removed from the list.

Instructor Payment Processing

In the Distance Education environment, instructors are paid on the basis of lessons, exams, and book reports graded. A schedule of pay rates is set up for each program or course. Your institution's instructor payment policy is established and maintained under the Setup menu in the Distance Education option.

You can also pay the instructors for work they have done in the rewriting (revision) of course content. You enter amounts for this type of work on a case-by-case basis. See the topic Course Rewrites for more about entering the payment details.

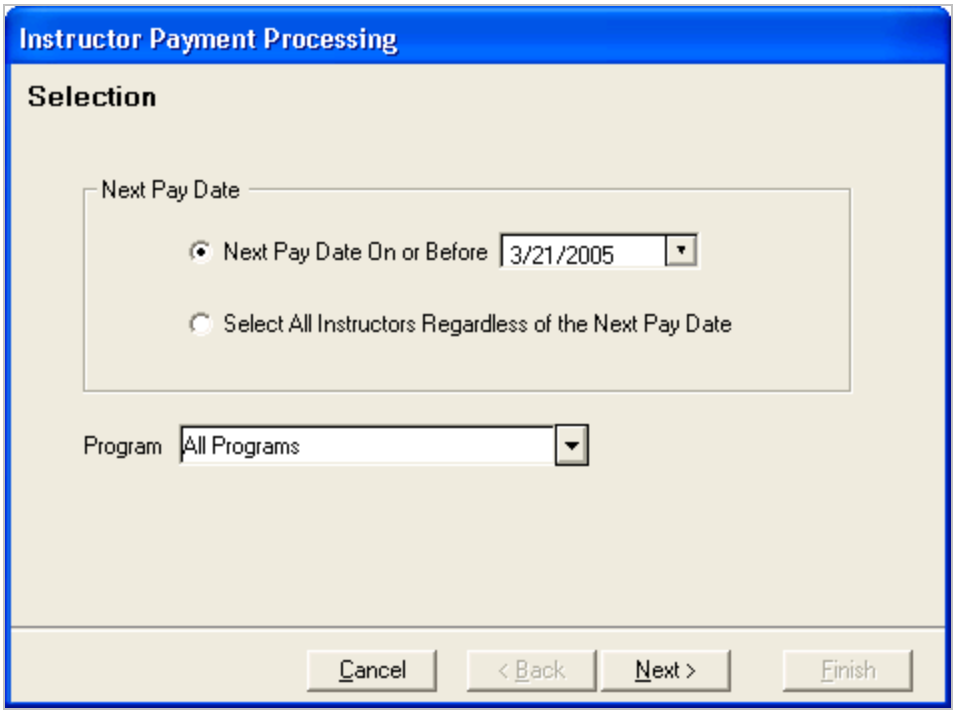
In this procedure, you can trigger the payment of DE instructors based on the work that has been done up to the instructors next pay date. You can also elect to pay all instructors regardless of their next pay date.

You can cancel the procedure at any time before you actually commit the update at the end. You will be asked to confirm your intention to update before anything permanent happens. Thus you can go through the process to the point where you can run the reports, run them and check them, then decide whether to actually do the update.

Process Instructor Payments

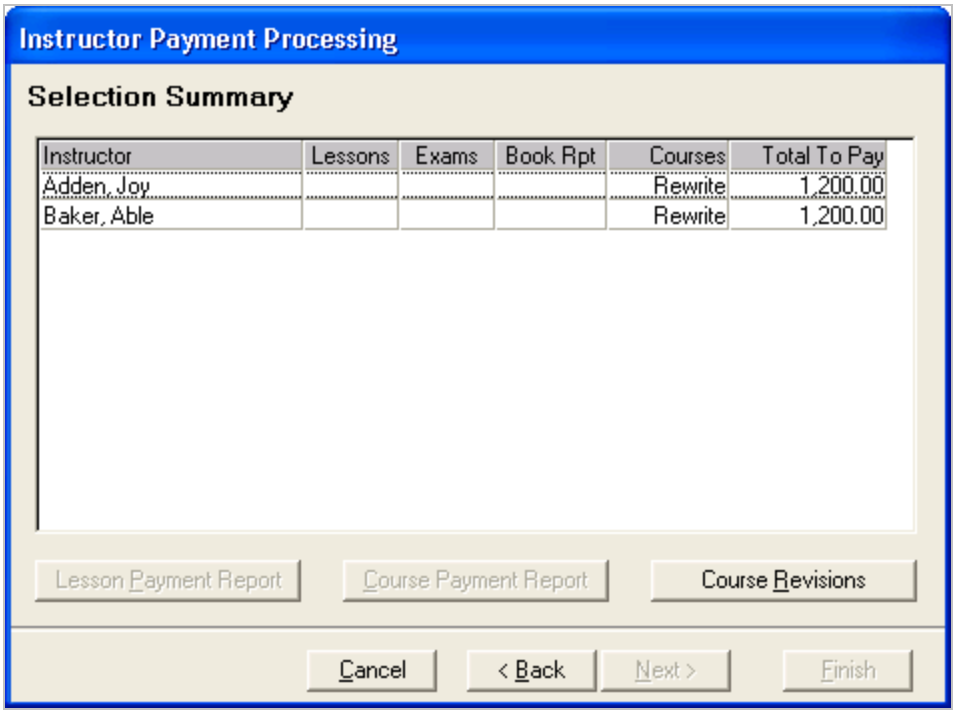
To perform the Instructor Payment Processing procedure:

1. Navigate to **Daily** > **Distance Education** > **Instructor Payment Processing**.



2. Select **Next Pay Date On or Before** or **Select All Instructors . . .**.
3. If necessary, change the date in **Next Pay Date On or Before**.
4. Select the appropriate **Program** or All Programs.
5. Click **Next**. The next page of the wizard is displayed.

   Note: It may take a few seconds for the grid to load in the text box on this form. Don't do anything until the grid appears in the text box.



6. On the second form, a summary of instructors due to be paid is displayed.
7. The available **payment reports** must be run before you can finish the procedure. The Finish command will be "dimmed" until all reports have been run.
    - If you have instructors that are being paid by the lesson, click Lesson Payment Report to display and print a detailed report of instructor payment activity for lessons, exams, and book reports.
    - If you have instructors that are being paid by the course, click Course Payment Report to display and print a detailed report of instructor payment activity for courses.
    - If there are any Course Rewrites that have been posted, you can print a report that lists them. If any are pending, payments for course rewrites are processed on every run.
8. After you have printed the necessary reports, the Finish button is activated. If the report(s) are satisfactory, click **Finish**.
9. CampusNexus Student prompts you to confirm if it is okay to complete the payment process and update.
    - Click **Yes** to complete the process. The lesson and course records will be updated to indicate that the instructor has been paid.
    - Click **No** to stop the update procedure.
    - Click **Cancel** to exit from the procedure. You can then make necessary adjustments and re-start the Instructor Payment Process.

Lesson Payment Report

The Lesson Payment Report lists **payments to be paid** to instructors, by course by instructor. Payment data is for distance education activity including grading of lessons and exams that has been done by the instructors but not yet paid for. The actual title of the report is "Instructor Payment Report Per Lesson". It is printed during the periodic processing of payments to instructors. If activity exists on this report, payment cannot be completed until this report is printed. Payments depend on DE setup for payment schedules per course, lesson, exam, and bonuses for prompt responses. Payments for course revisions are recorded on a case by case basis. Instructor payment schedules are established on an individual basis in DE system setup.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

Historical lesson payments (payments that have already been paid) are not listed on this report.

Daily > Career Services

The Daily > Career Services submenu options are as follows:

- Document Tracking
- Employers
- Print Employer Letters
- Update Placement Status/Advisors
- Reassign Employers
- Process Online Employers
- <Detach> (This options detaches the submenu.)

Document Tracking

Institutions request documents from students and persons or organizations connected with the student. Use Document Tracking to keep track of the documents that are necessary for processing student records in an orderly fashion.

Document Tracking is available in the following modules:

- Admissions - AM
- Financial Aid - FA
- Student Accounts - SA
- Academic Records - AD
- Loan Management - LM
- Career Services - PL

You can use the Daily > Document Tracking feature to look at all documents of a certain type to determine the document's status for each student.

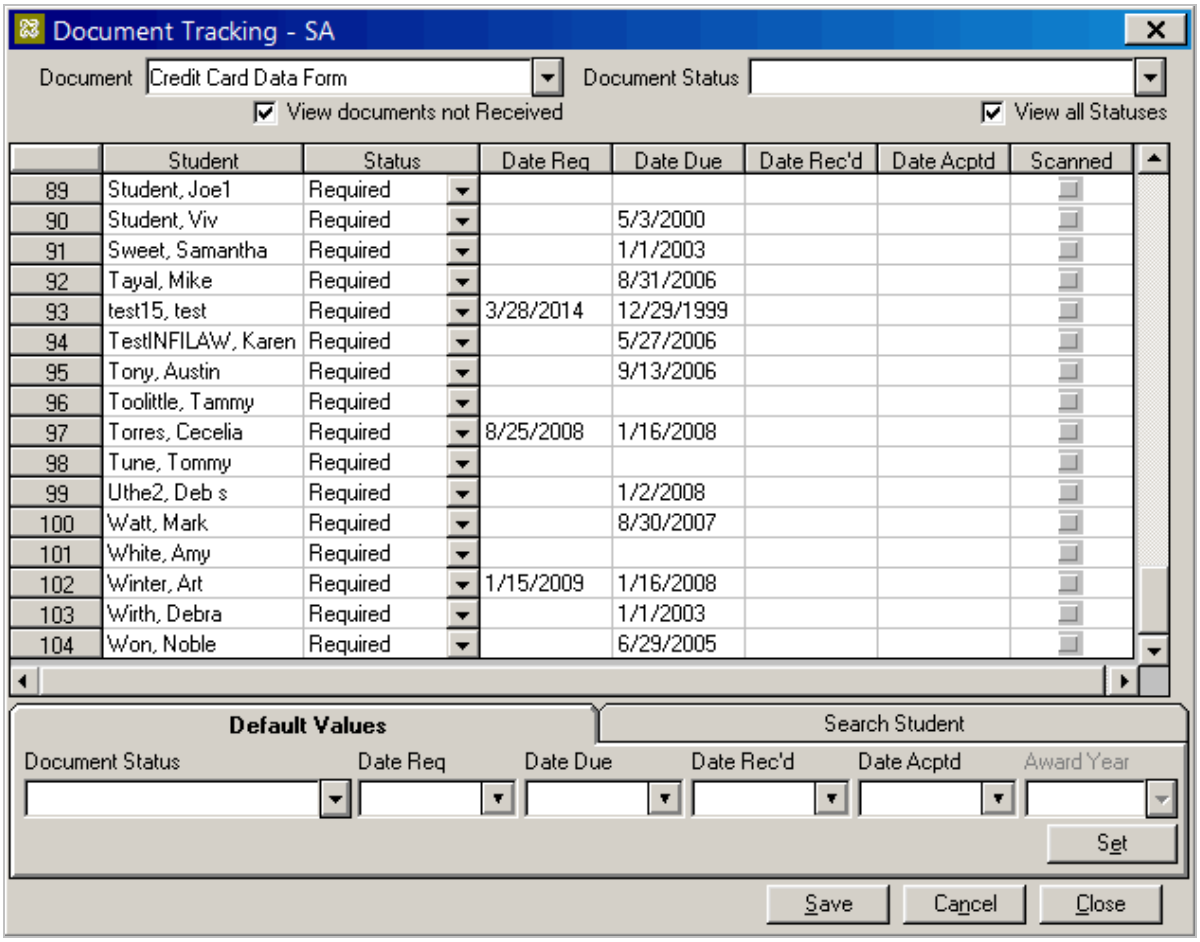
Several documents relate to academic or demographic history and your organization must have copies of them for each student. Examples are birth certificates, driver's licenses, transcripts, alien registration cards, social security cards, etc. Management policy determines which documents are important at your institution.

You can set up lists of these documents and assign them to each student record. You can then record the current status of the documents, the date you requested each document, and the date you received each document. You can also indicate that the document has been scanned into your electronic filing system.

Note: This approach differs from the Document Tracking option that you can access from the View > Contact Manager menu or Student Bar. When you access Document Tracking from the Student Bar, all documents related to a specific student as displayed. Here, you see all students related to a given document.

To edit tracking data for listed documents:

1. Navigate to **Daily > Admissions** (or other module) **> Document Tracking**. The Document Tracking form is displayed.



2. Select a **Document** from the list box at the top of the form. All students having the selected document related to their files are listed on the form.
3. Select or clear **View Documents Not Received**.
   - If the check box is selected, only those documents that have not been received are listed.
   - If the check box is cleared (default), all documents (subject to your Document Status selection) are listed.
4. For Document Tracking in Financial Aid - FA, select an **Award Year** to which the documents apply.

   Note: If you choose a Financial Aid document that does not have the "Award Year Specific" flag selected (indicating Yes) on the Document Setup, the form is displayed with the three Award Year fields disabled.
5. Select or clear **View All Statuses**.
6. Select an optional **Document Status**. If you select a document status, CampusNexus Student lists only the type of document you selected and only those that have the selected status.
7. From the displayed list, find a student document.
8. Click on a field in the row you want to update. You can update the following fields:
   - Status
   - Date Requested
   - Date Received
   - Date Due

- Date Accepted
- Scanned

Note: In date fields, you must enter the century along with the year. For example, 06/30/2000. If you just enter 99 instead of 1999, CampusNexus Student will reject it.

9. Click **Scanned**, if necessary, to indicate that you have scanned the requested document into your electronic filing system.
10. The **Default Values tab** enables you to update statuses and dates in batches.

    If you select a Status, or a Date Due, or Award year, for example, CampusNexus Student updates the values of all students whose names appear in the grid. Click **Set** to update the values and save your work.
11. The **Search Student tab** enables you to search a student using the Social Security Number (SSN) or Student ID.

    Type the SSN or ID and click **Filter**. CampusNexus Student finds the student associated with that number and displays only that student's name and information in the grid. Click **Clear Filter** to remove the filter. The grid revert to the previous display of students.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Employers

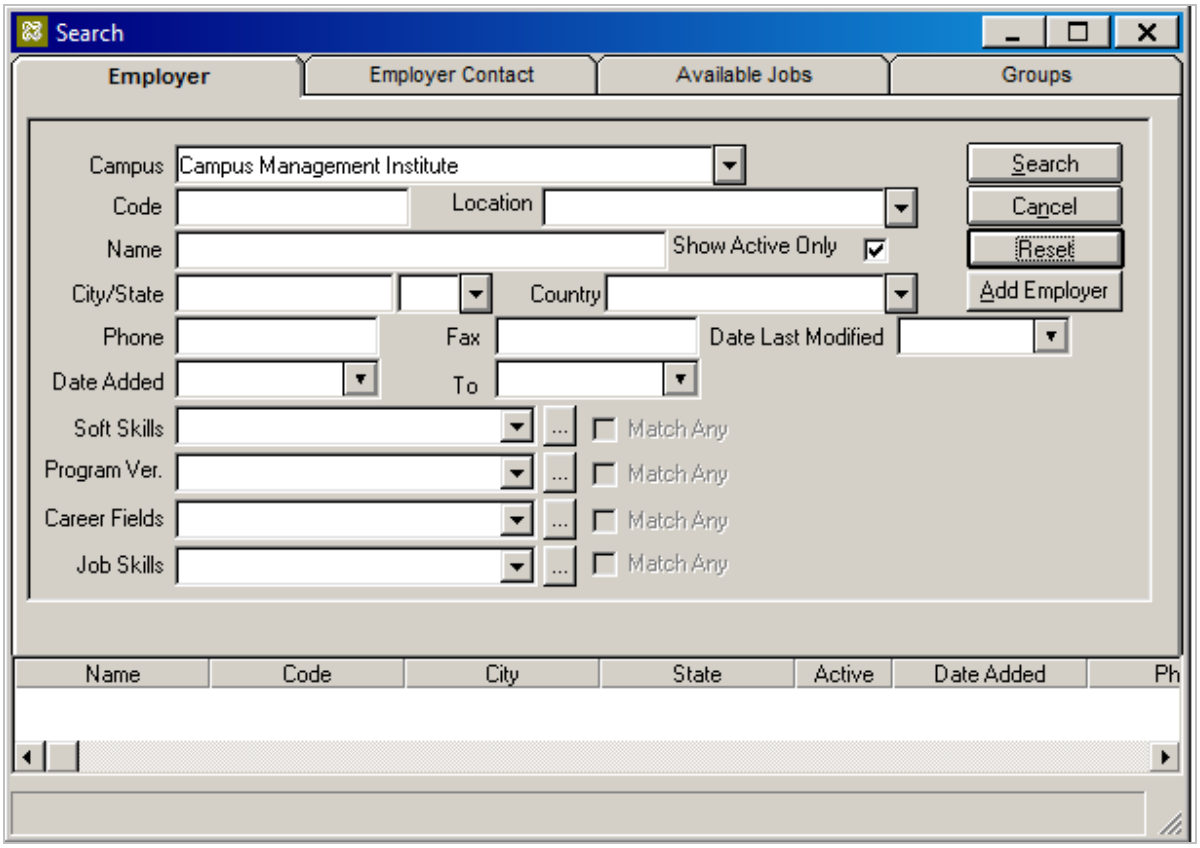
Employer records are maintained under the Daily Career Services menu. All information about employers with whom your school has a Career Services relationship is kept here. Note that while each record in this list represents one employer address, the employer may have multiple entries for contacts, available jobs, and entries in placement history. The employer may also be related to a corporate entity with many other employer entities.

- Employer Search
- Employer Contact Search
- Available Jobs Search
- Address
- Contacts
- Available Jobs
- Placement History
- Comments
- Activities
- Employer Groups

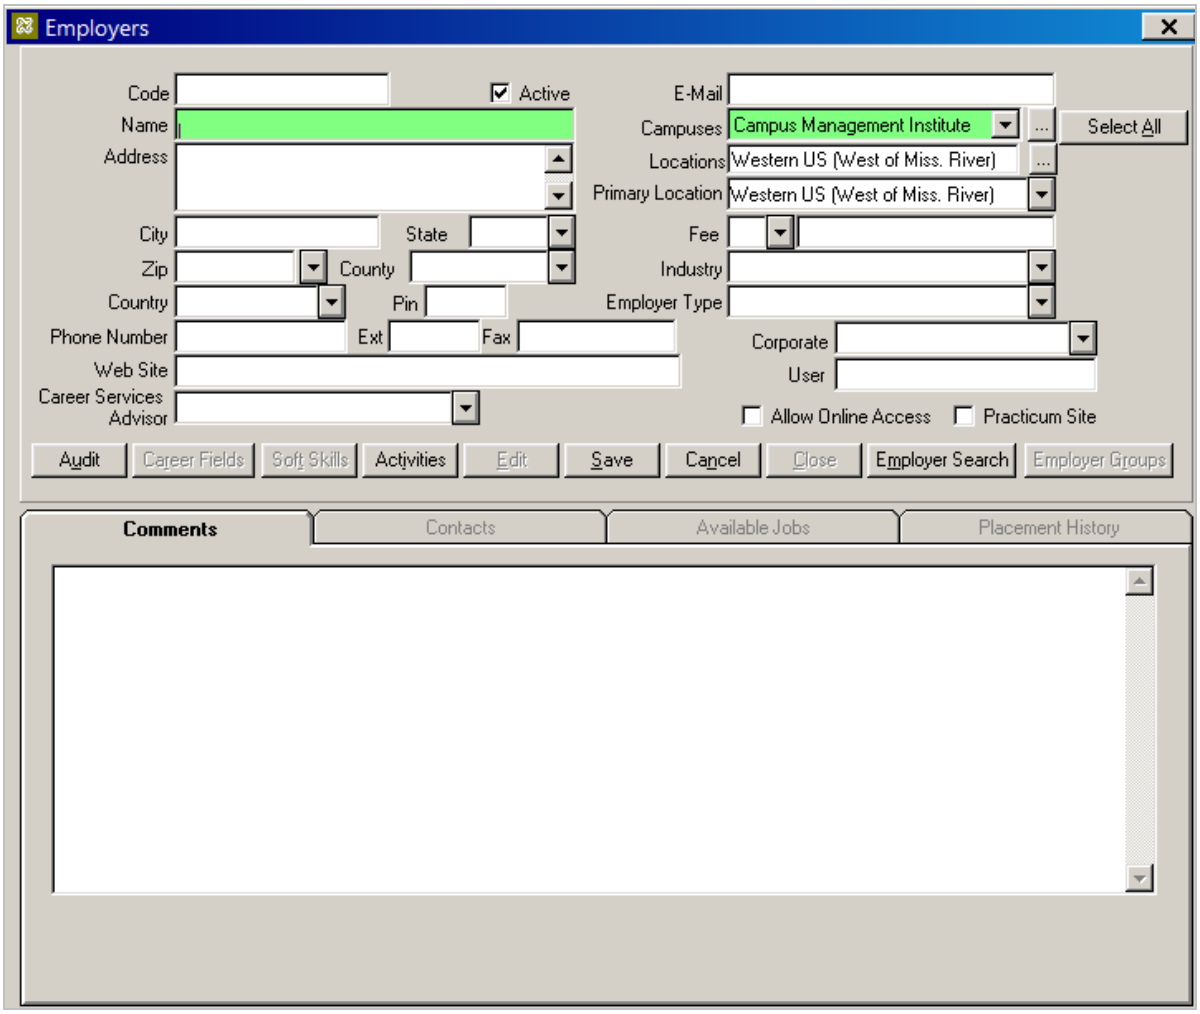
Employer Search

To find an employer:

1. Navigate to **Daily > Career Services > Employers**. The Search form for Employers, Employer Contacts, and Available Jobs is displayed.



2. Click **Add Employer**. The Employers form is displayed.



Enter information on the form. Note that this form requires only two fields: 'Name' and 'Campuses'. You can select one campus or all campuses for this employer.

Note: To prevent entering the same employer multiple times, enable the **Enable Duplicate Employer Check** under **Setup > Career Services > Settings**. If the Enable Duplicate Employer Check setting is set to **Global** or **CampusBased** and you attempt to enter an employer with the same name, address, phone, or website as an existing employer, a form will appear that will list any employers that match the new entry. CampusNexus Student allows you to enter a duplicate employer or duplicate information, if, for example, two different employers happen to share the same address. You can then check the Possible Duplicate Employer form to see if the new entry is a duplicate, or close the form to continue to enter the new employer.

Users who have the **Override** button on the Possible Duplicate Employer form enabled (under **Setup > Staff > User Info** tab **> Career Services** sub-tab) are allowed to save duplicate data as an existing employer. Users who do not have the Override button enabled must change the data so that it does not match to save the new employer. If the entry is a duplicate of an employer already entered, double-click the matching entry on the Possible Duplicate Employer form to select the previously entered employer information. The selected employer's information is displayed on the Employers form.

Note: If the **Allow User to Associate Employer with Campuses outside of the assigned Campus Group** setting under **Setup > Staff > Staff Member tab >*Add*button > User Info tab >** Career Services **tab** is *enabled* for the staff member, then all active campus locations will be available for selection and associated with the employer.

If the flag is disabled then the staff member will only be able to associate the Employer with campuses within their Campus Group. See also Career Services Settings to give security rights to staff members within staff groups.

You cannot add any information in the Contacts, Available Jobs, or Placement History fields until you click Save on this form. Once the information has been saved, click the Contacts, Available Jobs, and Placement History tabs to enter information about contacts, available jobs and placement history.

The **Code** field at the top of the form allows you to group employers by job type. Career Services can create a series of codes (for example, 'COMP' for computer related jobs or 'BANK' for banking jobs). Once this list has been created, enter the appropriate code for the employer in the 'Code' field. This will allow Career Services staff to search for all employers listed under that code. Alternatively, Career Services can use a numerical system, or designate a unique numerical code for each employer, depending upon the department's needs.

When adding or editing an Employer record, the Career Services Administrator can select multiple locations. When the 'Locations' is selected, a grid is displayed (populated with only those locations that belong to the selected campuses) to associate more than one location with the employer and allows you to select a primary location. The 'Active' check box in the grid is enabled by default and used to set the Employer-Location association. Clear the 'Active' check box to disable the Employer-Location association. When you have completed your selections, click and the grid is no longer displayed; however, the locations selected will appear in the Locations field, separated by a semicolon.

Note: If you modify locations or edit the 'Active' column in the grid, an audit is maintained with the old and new values.

The **Primary Location** field is populated with only those locations that are selected in the Locations field and are marked 'Active' in the grid. An audit is also maintained for any changes made to this field, displaying the old and new values.

If the employer is offering jobs as part of a college or graduate practicum program or course, click the **Practicum Site** box.

If you have any additional comments about this employer, enter them in the **Comments** tab at the bottom of the form.

Once all information about this employer has been entered, click the **Save** button in the center of the form.

3. To find an existing employer, on the **Employer** tab, enter search criteria such as a **Campus**, **Code**, **Description**, **Name**, **Phone**, or **Fax** number. You can enter part of a field value to get all records that match the partial entry. For instance, enter "m" to get all the employers whose code started with the letter "m". The search is not case-sensitive.
4. Click **Search**. CampusNexus Student lists all records that match your search criteria in the grid.

   When adding an activity from the Employer form, you will see the selected employer as the default in the Employer field after clicking the **Employer Search** button on the activity form.

Employers Form

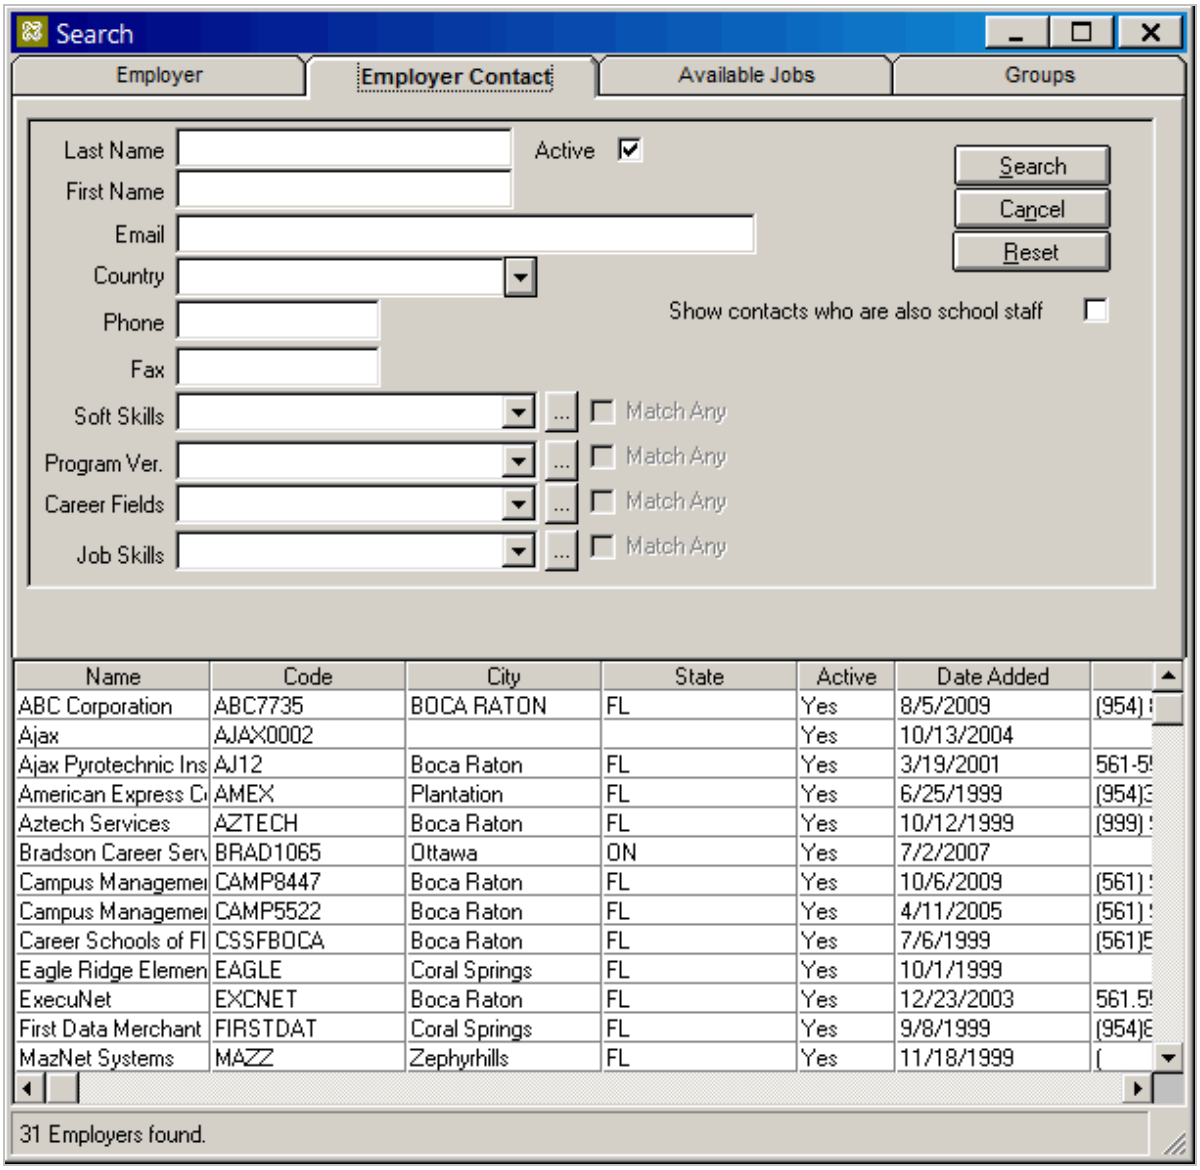
5. Double-click a row in the search results grid to open the **Employers** form for that particular employer, or click the **Employer Search** button to return to the Employer Search form.

See Address for more on working with employer data.

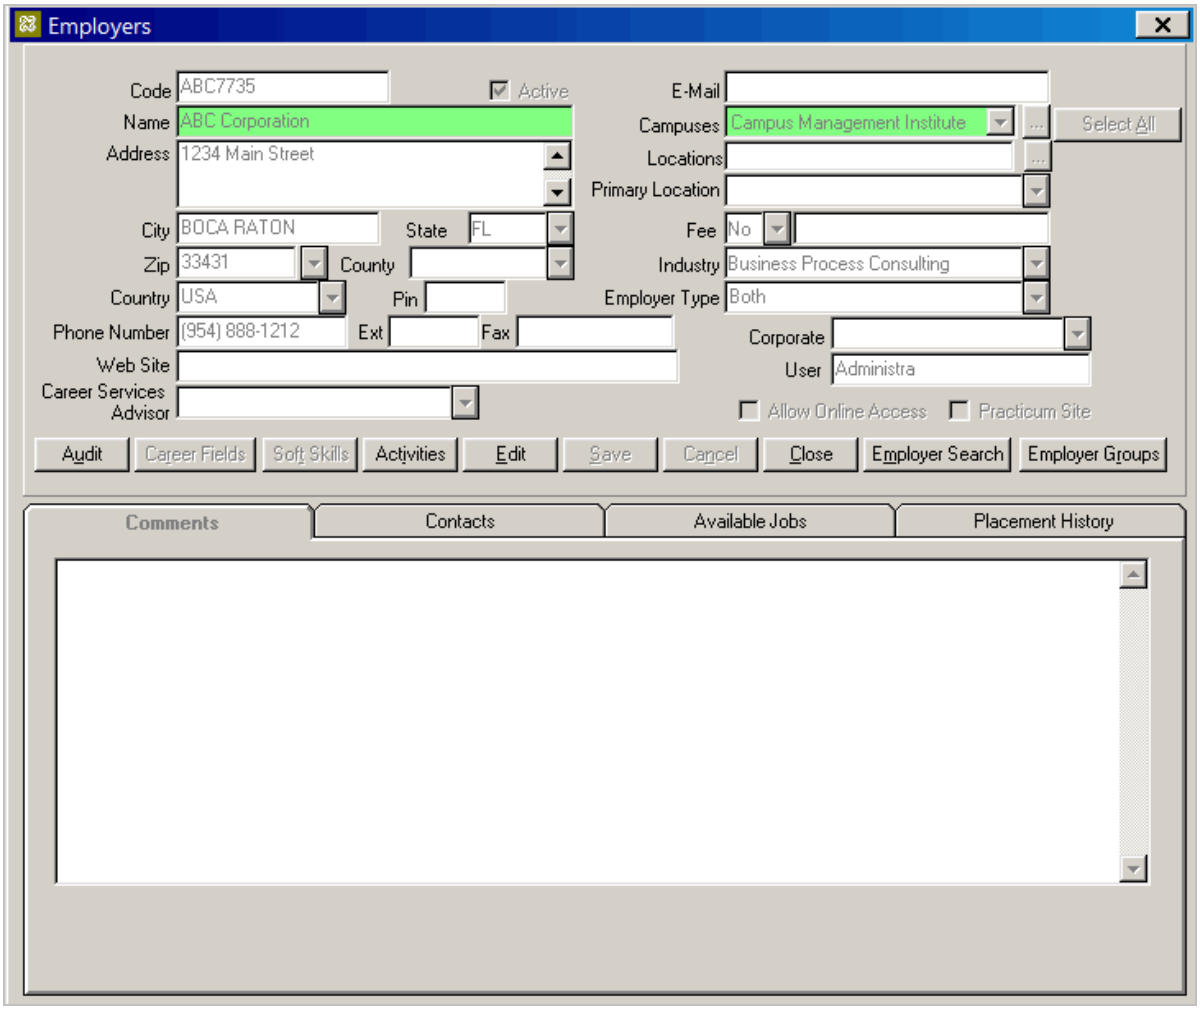
Employer Contact Search

To find an Employer Contact:

1. Click the arrow on **Search** tool and select **Search Employer**.
2. When the Employer Search form is displayed, click the **Employer Contact** tab.



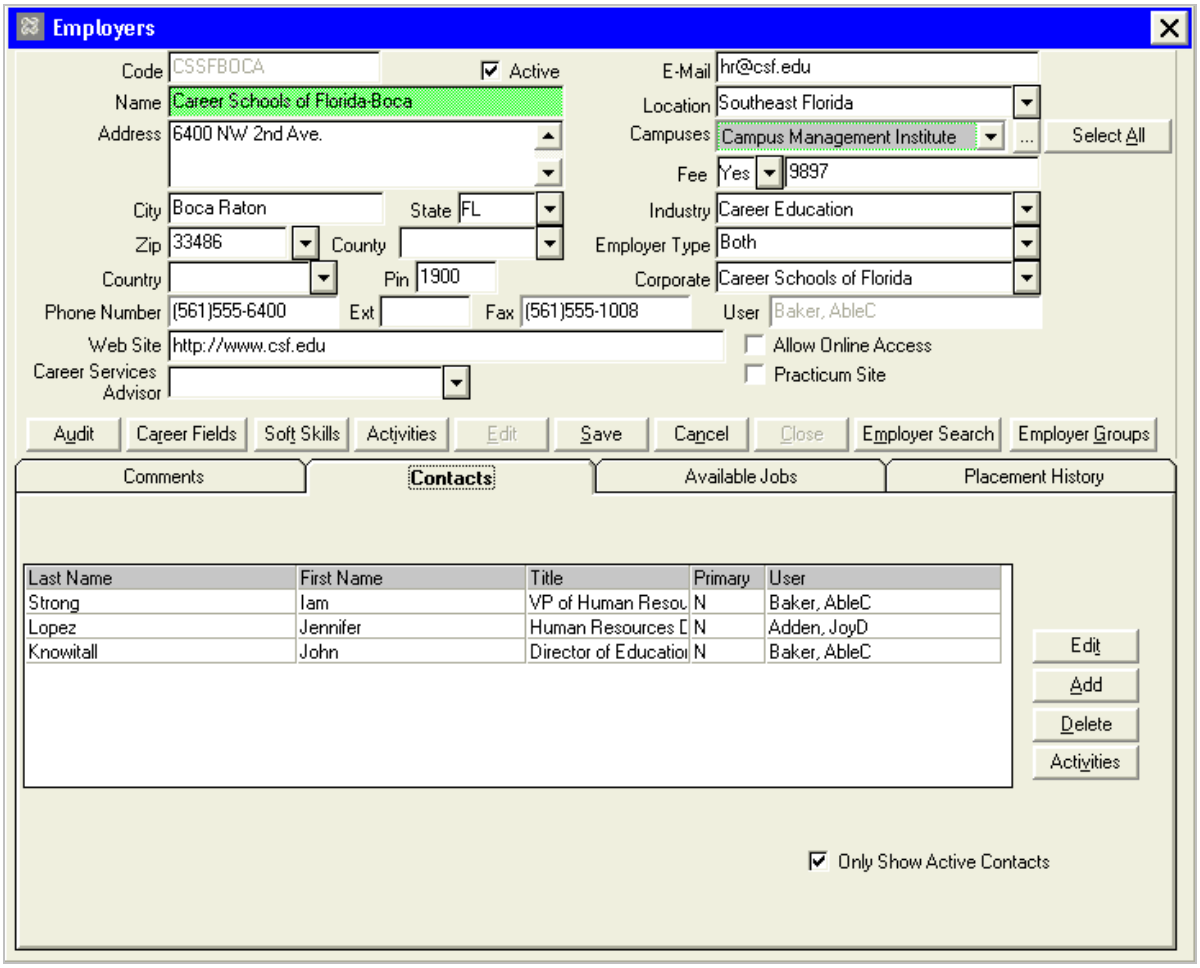
3. Enter your search criteria. Employer Contact search criteria include Last Name, First Name, Email, Country, Phone, Fax, Soft Skills, Program Version, Career Fields, and Job Skills. You can enter partial data in a search field.
4. Click **Search**. CampusNexus Student displays all employer contacts that match your search criteria.
5. **Double-click** the contact row for which you want to see the details. CampusNexus Student opens the Employer Master record to which the selected contact is related.



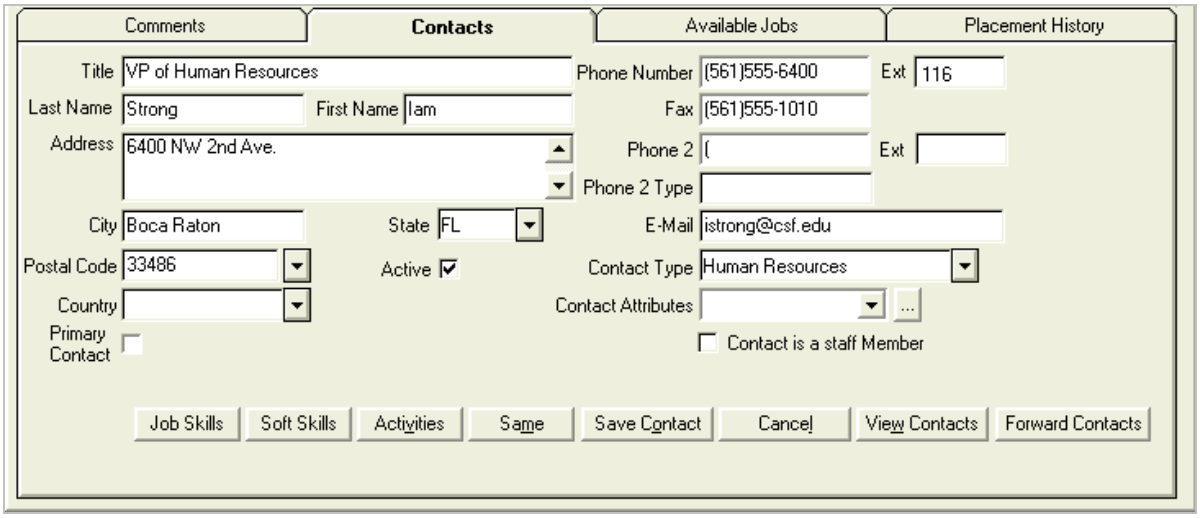
6. Click **Edit** to open the employer record for editing. This is necessary to view the employer's contact list.

   Note: If the **Allow User to Associate Employer with Campuses outside of the assigned Campus Group** setting under **Setup > Staff > Staff Member tab > Select Staff Member >*Edit*button > User Info tab > Career Services tab** is *enabled* for a Career Services Advisor, users may edit existing Employers and associate the employers to any active campus location. See also Career Services Settings to give permission to staff members within staff groups.

7. Select a contact on the list and click **Edit** to view the **Contact**'s detailed information. The program will change the form as shown below.

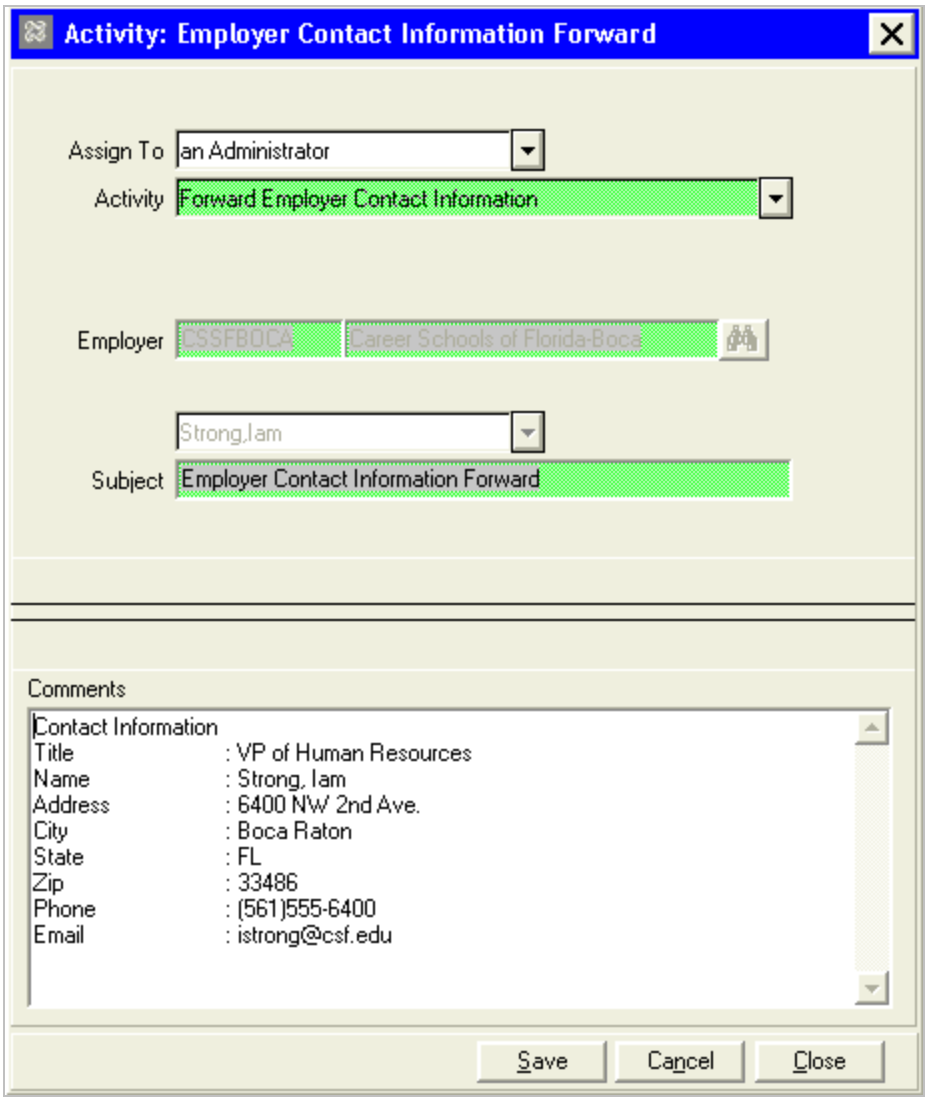


8. View or edit the contact data as required by double-clicking a contact.



9. Click **Job Skills** to obtain a list of job skills.
10. Click **Soft Skills** to obtain a list of soft skills.
11. Click **Activities** to obtain a list of Activities.

12. Click **Same** to load the contact address with data from the Employer address.
13. Click **Save Contact** to save any changes you make.
14. Click **Cancel** to stop the changes.
15. Click **View Contacts** to return to the employer's contact list.
16. Click **Forward Contacts** to the contact information.



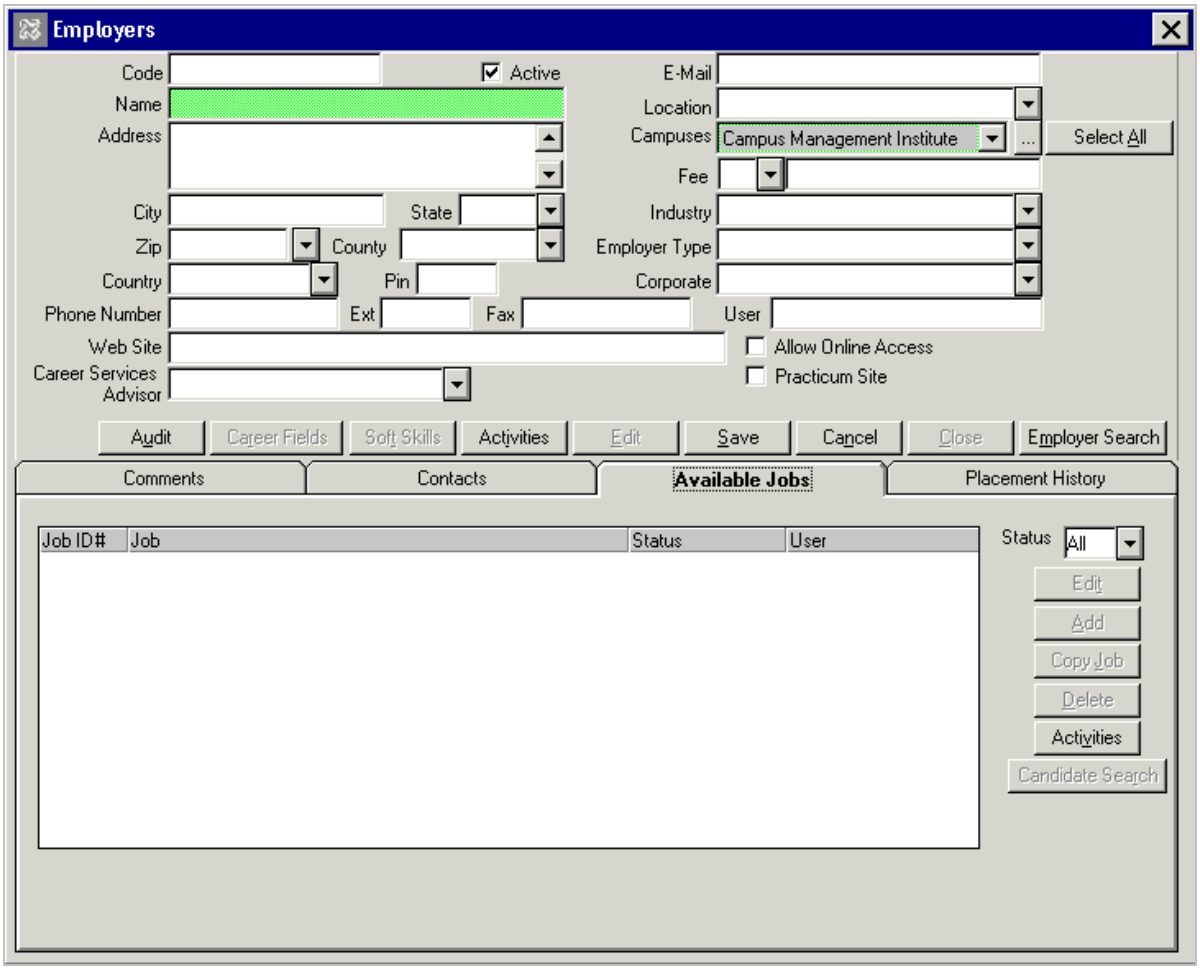
17. Click **Close** to close the form.

See Contacts for more information about employer contacts.

Available Jobs Search

To find available jobs:

1. Click the arrow on **Search** tool and select **Search Employer**.
2. When CampusNexus Student displays the Employer **Search** form, click **Available Jobs**.



3. Enter your search criteria. You may **search for a specific employer** by clicking the binoculars icon. Available Jobs search criteria include Campus, Employer, Description, Area Code, State, Job Type, Job Title, Job ID, Soft Skills, Program Version, Career Fields, Job Skills, Job Status, and Available Jobs Dates. It is permissible to enter partial data in a search field.

   Note: All search criteria are ANDed together unless you enable the **Match Any** check box next to a field. Then that field is ORed with the other fields. For example, if you selected Spanish for the **Job Skills** field, and selected Business Administration as the **Program Version**, the search would return all available jobs for Business Administration program versions that listed Spanish as a soft skill. However, if you also enabled the **Match Any** check box for the **Program Version** field, the search would return all available jobs for Business Administration, whether they required Spanish or not.

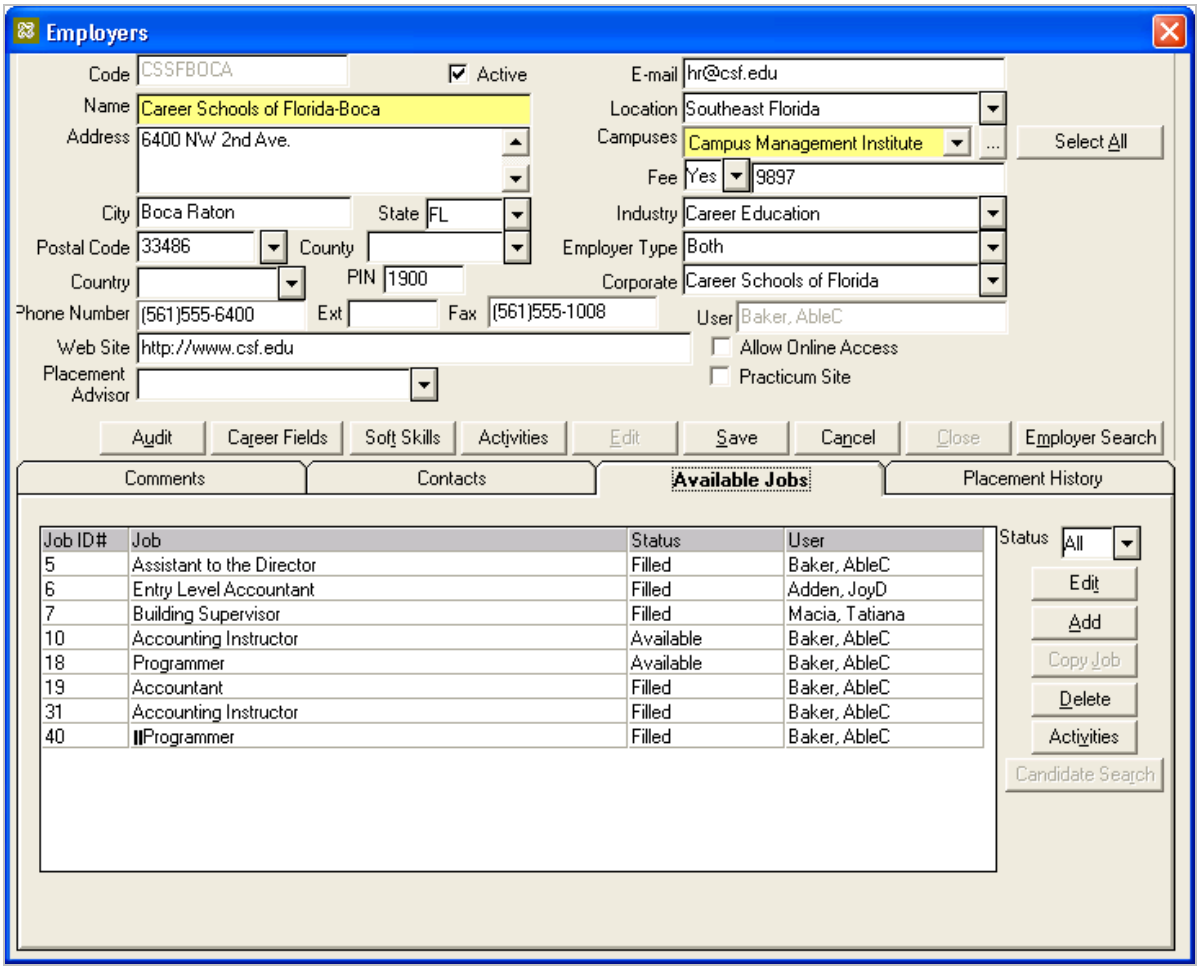
   In addition, to include jobs that have no openings in the search results, the user can enable the **Include Jobs with no openings**check box. The search results will include the jobs that have no (i.e., zero) openings. If the **Include Jobs with no openings** check box is disabled, the search results return only those jobs, which have at least one opening.

4. Click **Search**. CampusNexus Student displays all available jobs that match your search criteria.

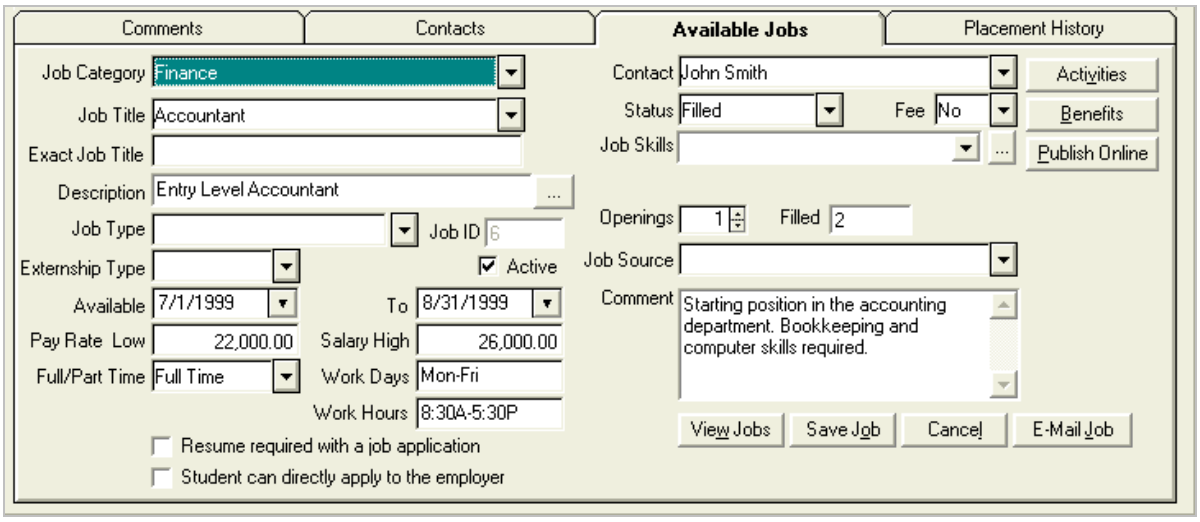
5. **Double-click** the job row for which you want to see the details. The Employer Master record to which the selected job is related is displayed.

6. Click **Edit** to open the employer record for editing. This is necessary to view the employer's job list.

7. Click **Available Jobs**to view a list of all available jobs matching the search criteria.



8. Select a job on the list and click **Edit** to view the job's detailed information.



9. Modify the job information available within Available Jobs tab as necessary.
10. Click **View Jobs** to return to the employer's list of available jobs.

11. Click **Save Job** to save any changes you make.
12. Click **Cancel** to stop the changes.
13. Click **Email Job** to send the job information to an email recipient.
14. Click **Close** to close the form.

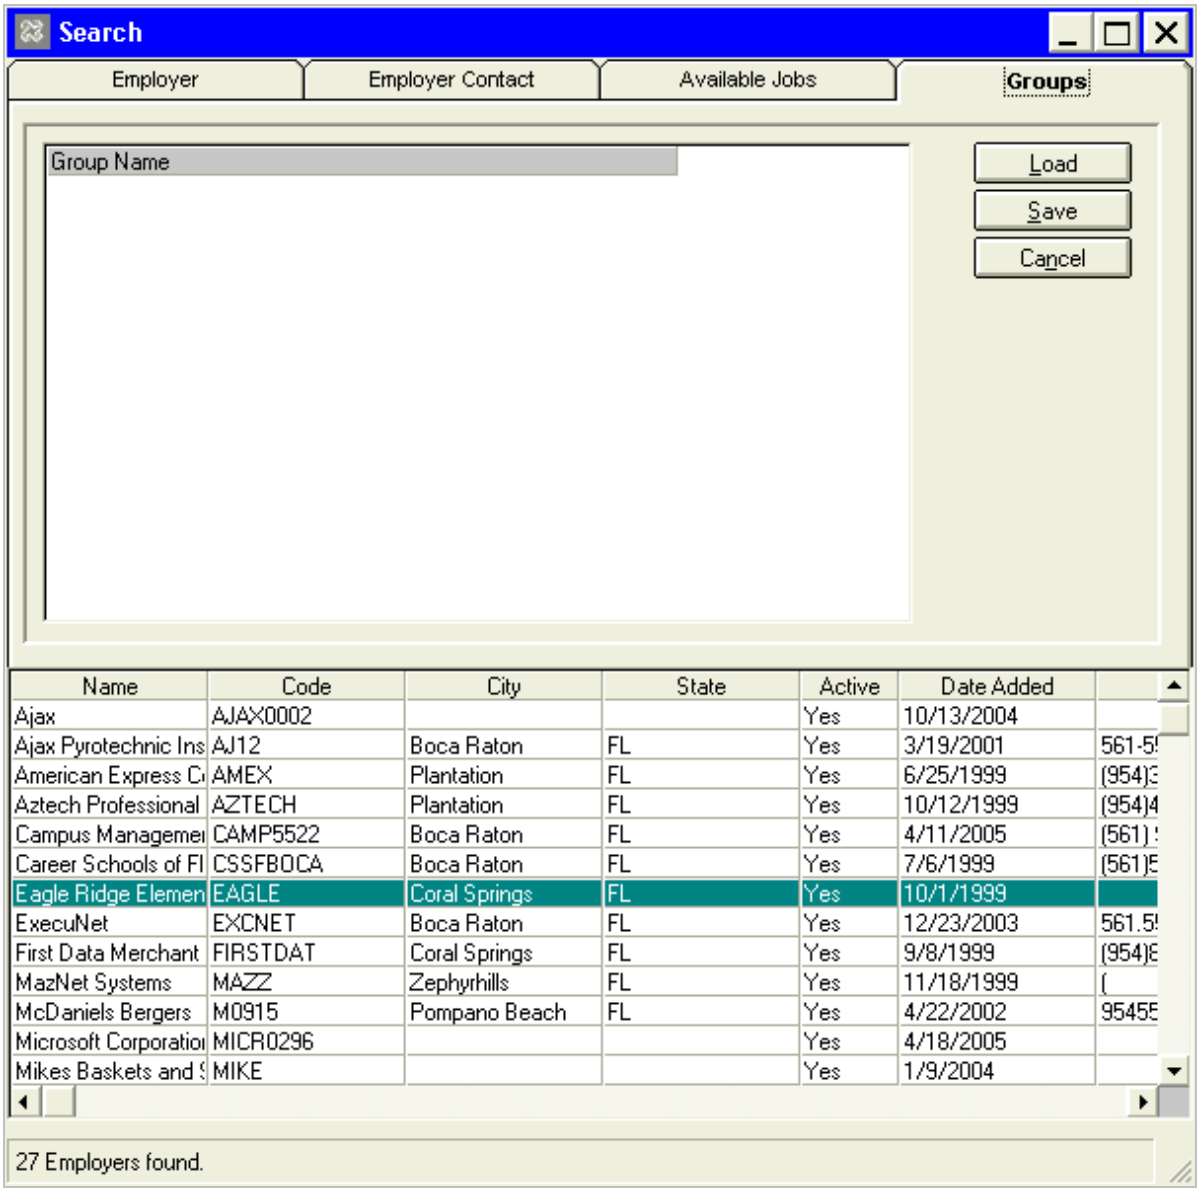
See Available Jobs for more information about available jobs.

Employer Groups

Employers can be assigned to Groups just as Students can be assigned to Groups.

1. Click **Load** to display the Employer Groups.
2. Click **Save** to associate the selected Employer with an Employer Group.

3. Click **Cancel** to cancel your Employer Group selection.



Placement History Tab

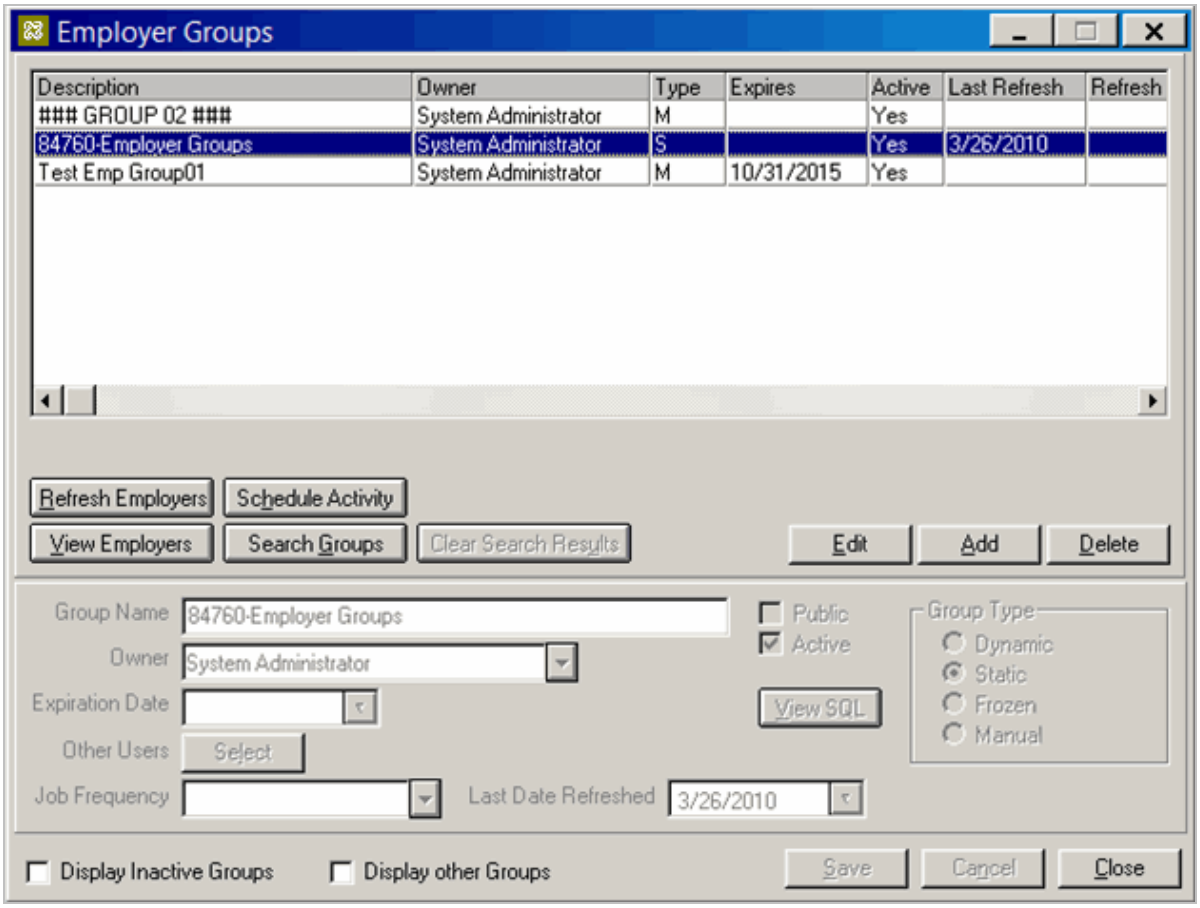
See Placement History.

Employer Groups

Groups serve to organize a list of employers who have one or more characteristics in common. They may all be related to a particular field of study, offer only part-time or intern/extern jobs, or just about anything else you can think of.

When you select an employer from the Employer Group list, the View Employers, Schedule Activity, and Search Groups buttons become available to use.

Select the **Display Inactive Groups** check box if you only want to see a list of Inactive Groups or select the **Display other Groups** to only see a list of other Groups.



An employer group can be created in the following ways:

- Through lists of employers on a report
- Through a search of employers
- By manually adding a new group and selecting employers to be members of it

The process of creating an employer group via a report is described in "Employer Report Preview". See also Employer Search for creating an Employer Group via the Employer Search process.

Creating a Employer Group from a Report

Only authorized users may create an Employer Group from a Report. Authorization may be established by setting the Allow Dynamic Groups option to "Yes" for the staff member. See System settings for additional information.

The process of manually creating an Employer Group is described later in this topic.

Only authorized users may view/edit/add/delete/ or print Employer Groups. See System settings to set up these permissions.

You can view the list of employers who are members of a group, add employers to a group, and remove employers from a group. You can schedule activities for the members of the group as a whole. (To schedule an activity for an individual member of the group, you must do so through the Daily > Career Services > Employers > Activities button path.)

A group is "owned" by the user who creates it. Ownership can be transferred from one owner to another. Once ownership of a private group is transferred, the previous owner no longer has the right to see the group.

A group can be Public or Private. A public group can be viewed and edited by persons other than the one who created the group. A Private group can be viewed and edited only by the person who created it, or those authorized to do so by the group's creator. A group that is formed by saving a search or running a report is typically designated as Private (not Public) until the owner intentionally sets it to be Public. A manually created group defaults to Public. The person creating the group must clear the Public option if necessary to keep it private.

A group can be active or inactive as required by the owner.

Adding and Deleting Group Members

If the group is a manual group type and it is "Public", any user with appropriate access rights can add and delete employers. Only the owner of a Private group or the system administrator can perform maintenance, such as adding and removing employers.

The owner of a Private group or the system administrator can add or delete staff members who have access to that group. When the Public check box is disabled, the Other User **Select** button becomes available. Clicking **Select** displays the **Student Group Staff** form.

Note: Additional users can only add/remove employers from the group from the employer's **View** menu, not from their **Manage Student Groups** form.

The authorized user can search for staff members and add them to the list of Selected Staff for the group. The **Search** button becomes available when the user enters data in any of the search criteria fields or selects a Staff Group from the drop-down list.

Check the **Display Inactive Groups** box at the bottom of the form to view inactive groups. The default view lists only employer groups that are active.

Check the **Display other Groups** box at the bottom of the form to view public groups not owned by the logged in user. The default view lists all employer groups that the logged in user owns or has been given permission to edit.

Group Types

Group types can be **dynamic**, **static**, **frozen**, or **manual**. Dynamic, static, and frozen groups are typically formed by saving the results of a search or a report. These group types can be changed from one type to another, including manual. The manual type, however, cannot be changed to any of the other types since there are no automatic parameters involved.

Dynamic Group

The list of employers in a dynamic group changes when an employer qualifies for the group by virtue of a change in the variable upon which the group was selected. For example, if a group is made up of employers in the General Management Program Version 2, any employer who is enrolled in that version of the program is automatically a member of the group. A employer who leaves the program is automatically removed from the group. A dynamic group can be changed to a manual group, but once you save it as a manual type, it cannot be changed back to dynamic.

An "Allow Dynamic Groups" option is available in the System setup parameters. If you select No for this option, the program will make the dynamic employer group type unavailable when creating new groups.

On the Student Groups maintenance form, if the Allow Dynamic Groups option is **No**, the program does not allow the group type to be changed to dynamic. It will display a message, "*Dynamic Groups have been disabled by the System Administrator*". If you select **Yes**, the program will function as described above.

Static Group

A static group is one that once created can be "refreshed" from time to time by clicking **Refresh**. A static group can be changed to a Manual group, but once you save it as a Manual type, it cannot be changed back to Static.

Frozen Group

A frozen group is one that once created cannot be updated. This type of group can be used when you want to compile a list of employers that will never change. The employers meet a certain criteria on a given date and the members of the group must be retained indefinitely. For instance, you might want a list of employers who started on a given date. No one else can qualify for the group except the employers who actually started on the given date and you want to track them for some time into the future.

Note the distinction between "frozen" and "not active". A frozen group is still available for use in the purpose for which it was created. A group that is "not active" is no longer available for use.

Manual Group

A manual group is created and maintained by the user. The user can include or remove employers from the list at will. You as the user might create an initial list for the group by running a report and then add or remove employers from the group as required.

Group Type Change Warning

If you attempt to add or delete an employer in a dynamic, static, or frozen group, a verification message is displayed indicating that removing the employer from this group will convert the group type to manual. Click Yes to continue, No to stop the process.

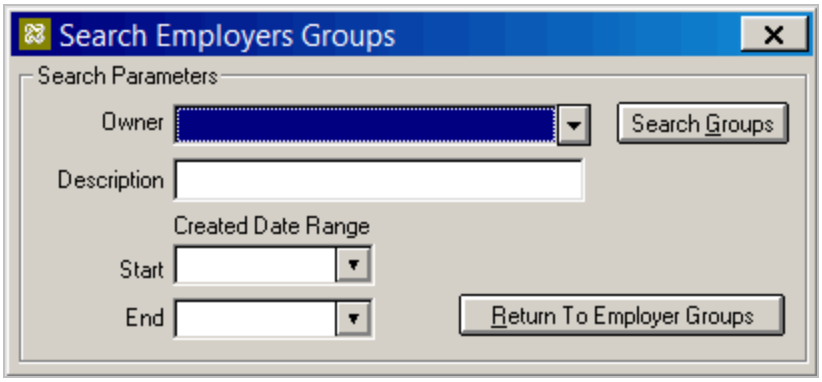
If you answer **Yes** to this message, the group is converted to a Manual group type. It no longer behaves as an automatically controlled group type.

View Employers

Click View Employers to add an existing Employer to a Group. The Employer Group form will appear.

Search Groups

Search for Employer Groups by clicking on Search Groups. The Search Employer Groups form is displayed. Enter your search criteria and click on **Search Groups**. You are returned to the Employer Groups form and a list of Employer Groups meeting the search criteria that you entered is displayed.

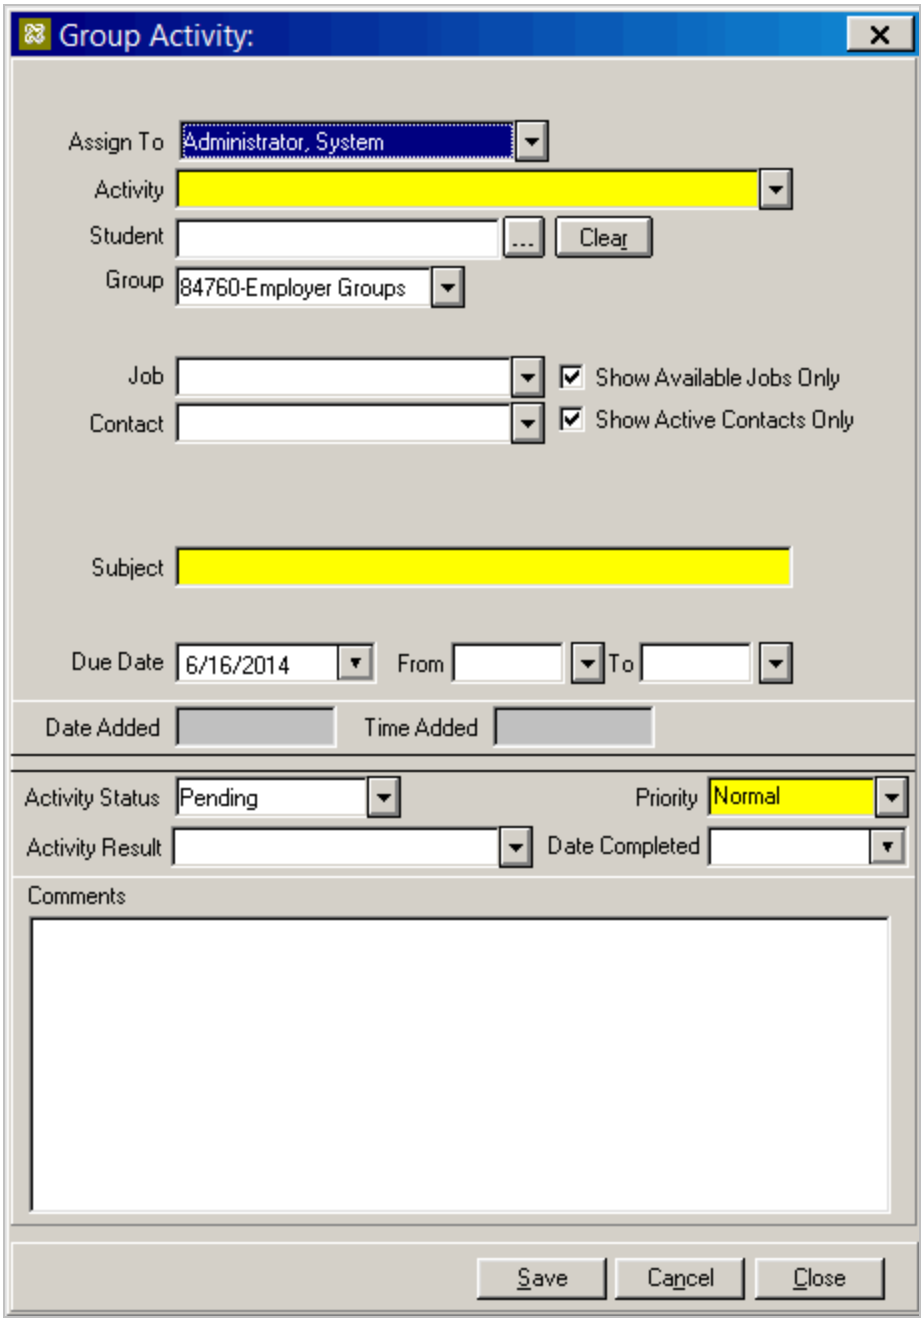


Clear Search Results

Click **Clear Search Results** to clear the search results and begin a new search. Upon clicking this button, the Search Groups button will become available.

Schedule Activity

Click the Schedule Activity button to schedule an activity for the Employer Group. The Group Activity form will appear. Select an activity from the **Activity** drop-down list and enter a subject in the **Subject** line. Click the **Save** button to save the scheduled activity.



Adding a Manual Group

To add a manual group:

1. Navigate to **View > Employer Groups**. The Student Groups form is displayed.
2. Select **Add**.
3. Type a name for the group in the **Group Name** text box.
4. Your name will appear on the **Owner** text box as a default. You can select another name from the drop-down list if necessary.

5. To make the list available to other users, be sure that **Public** has a check mark in the box. The default is to make the group public.
6. To make the list active, be sure that **Active** has a check mark in the box. The default is to make the group active.
7. Click **Save** to save the new group. It will be added to the list.

Note: The group is automatically designated as a "**Manual**" group.

Deleting a Group

Only the owner of the group can delete it from the list of groups.

Deleting an employer group does not remove the employers in the group from the CampusNexus Student database. Deleting an employer group simply dissolves the symbolic relationship of the employers in the group.

To delete a group:

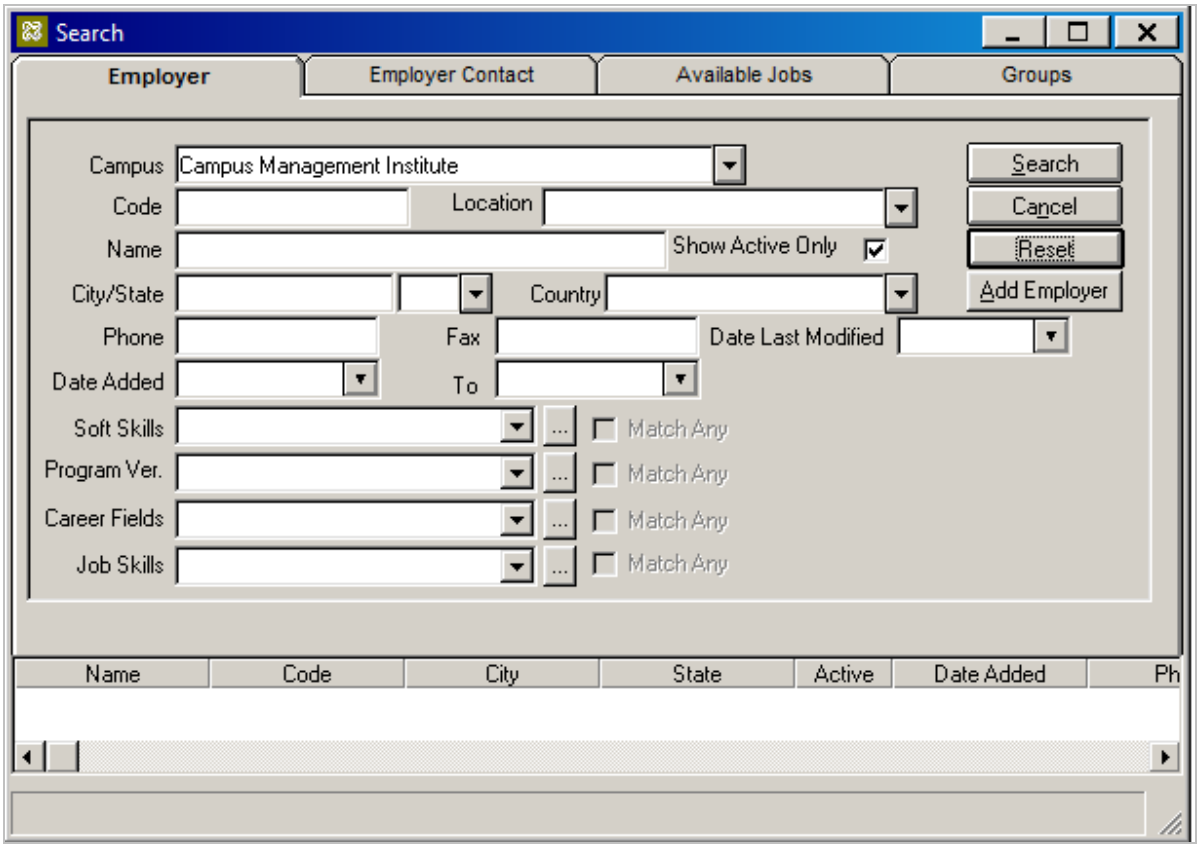
1. Navigate to **View > Employer Groups**. The Student Groups form is displayed.
2. Select (highlight) the group to be deleted.
3. Click **Delete**. Confirm your intention to delete the group.
4. Click **Yes** to confirm the deletion.

Address

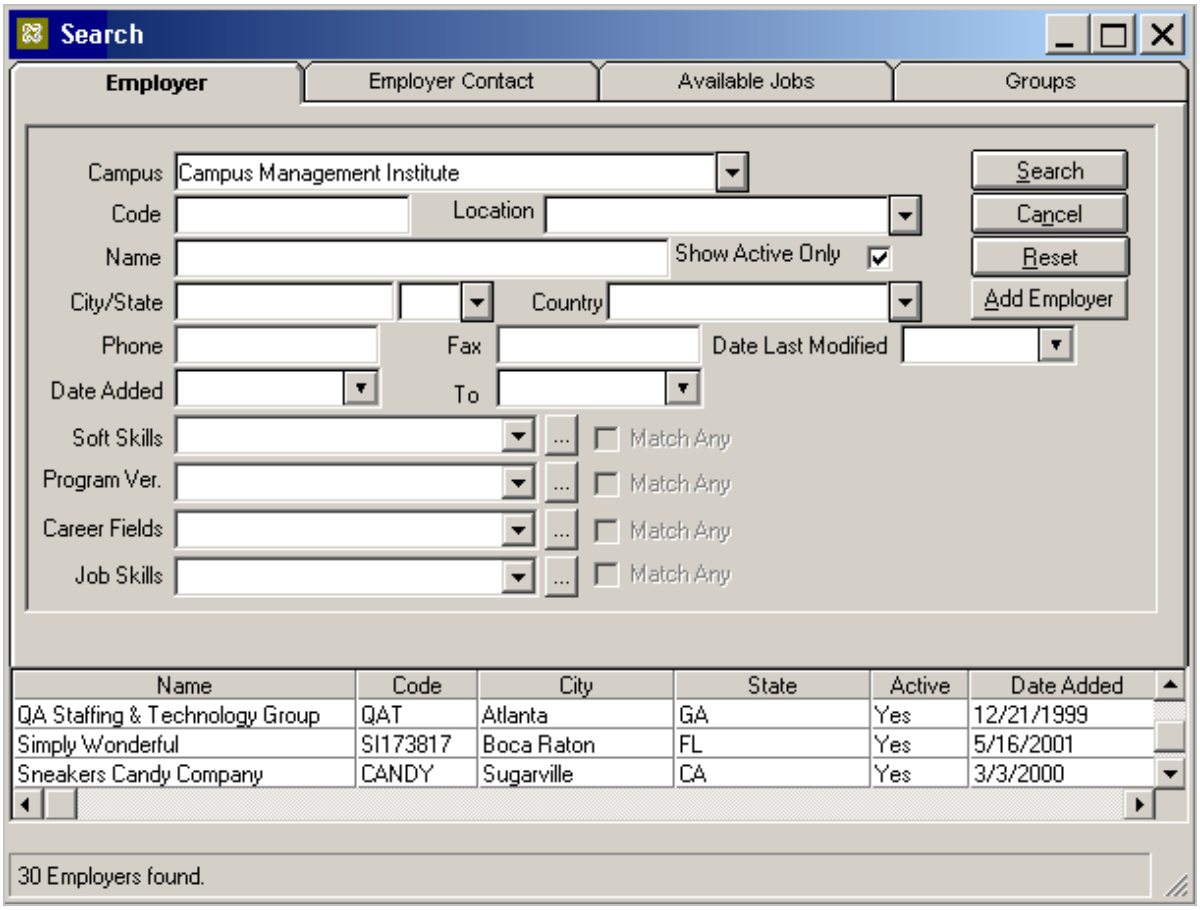
The employer address form contains basic demographic information about a single employer office location.

To edit an employer address:

1. Navigate to **Daily > Career Services > Employers**. The Search form is displayed. The Employer tab is selected by default.



2. On the Employer tab, enter the necessary search criteria to find the employer.
3. Double-click a row on the search results grid to display the employer record.



4. Enter the address data and select options from the combo boxes.

Field Descriptions

Field Label	Description
Code	Enter a unique code to identify the employer. The Employer Code field was changed to accommodate 16 characters.
Active	Check or clear as required.
Name	Enter the name of the employer.
Address	Enter the employer's street address.
City	Enter the employer's city.
State	Enter the employer's state.
Postal Code	Enter the employer's postal code. If you enter the postal code before the city and state, CampusNexus Student fills in the correct city and state.
County	Select the employer's county.

Field Label	Description
Country	Enter the employer's country.
PIN	Enter a 4-digit PIN number that the employer can use when visiting your school's website to enter available jobs. (Each employer must know their code and PIN number to access their data on your website.)
Phone Number	Enter the employer's telephone number.
Ext (Extension)	Enter the employer's telephone extension number.
Fax	Enter the employer's fax telephone number.
Web Site	Enter the employer's website.
Career Services Advisor	Select a Career Services Advisor to assign to this employer.
E-Mail	Enter a general e-mail address for the employer. You can enter e-mail addresses for individual employer contacts under the Contacts tab.
Campuses	Select all campuses that will have access to this employer.
Locations	Select one or more locations associated with the employer.
Primary Location	Select the primary location for the employer from the drop-down list. The options available for selection are those locations that are selected in the Locations field and are marked 'Active'.
Fee	Select **Yes** or **No** to indicate whether your school charges the employer a fee for placing students with the employer. When the Fee field is set to Yes, the field to the right of the Fee field allows you enter a description or an amount .
Industry	Select an industry code for this employer.
Employer Type	Select the employer type. The options are employer only, intern/extern only, or both.
Corporate	Select a corporate entity to which this employer is related.
User	The name of the user who originally entered this employer information is displayed here.
Allow Online Access	Enable this check box if online access is allowed for this employer.
Practicum Site	Enable this check box if this employer is a practicum site.

5. Click **Save**.

If the Comments tab is on top in this form, two Save buttons appear on the form. To save the address data, click the Save button in the top half of the form under the address information. The other Save button saves the Comments field.

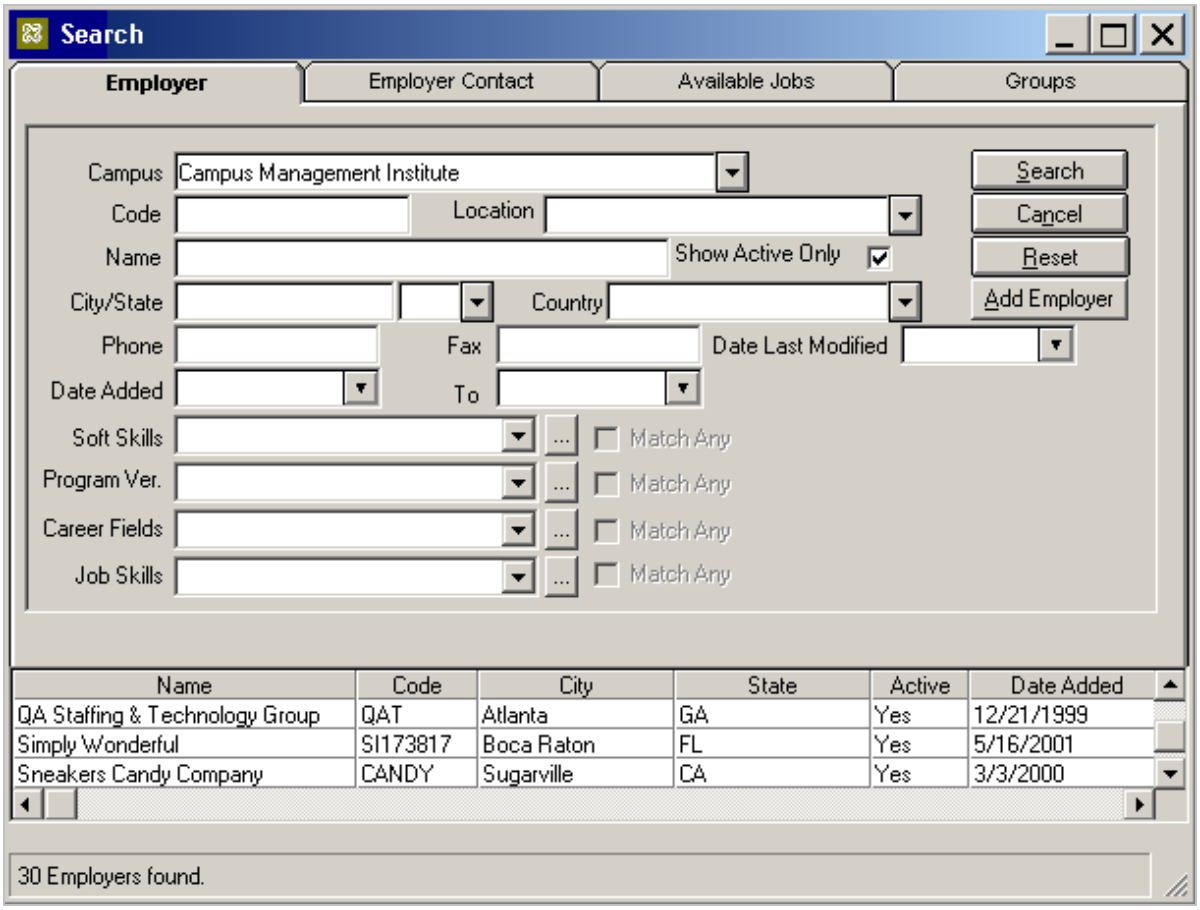
6. To edit any other data for this employer, click the Contacts, Available Jobs, or Placement History tabs.
7. Click **Close** to close the form.

Employer Comments

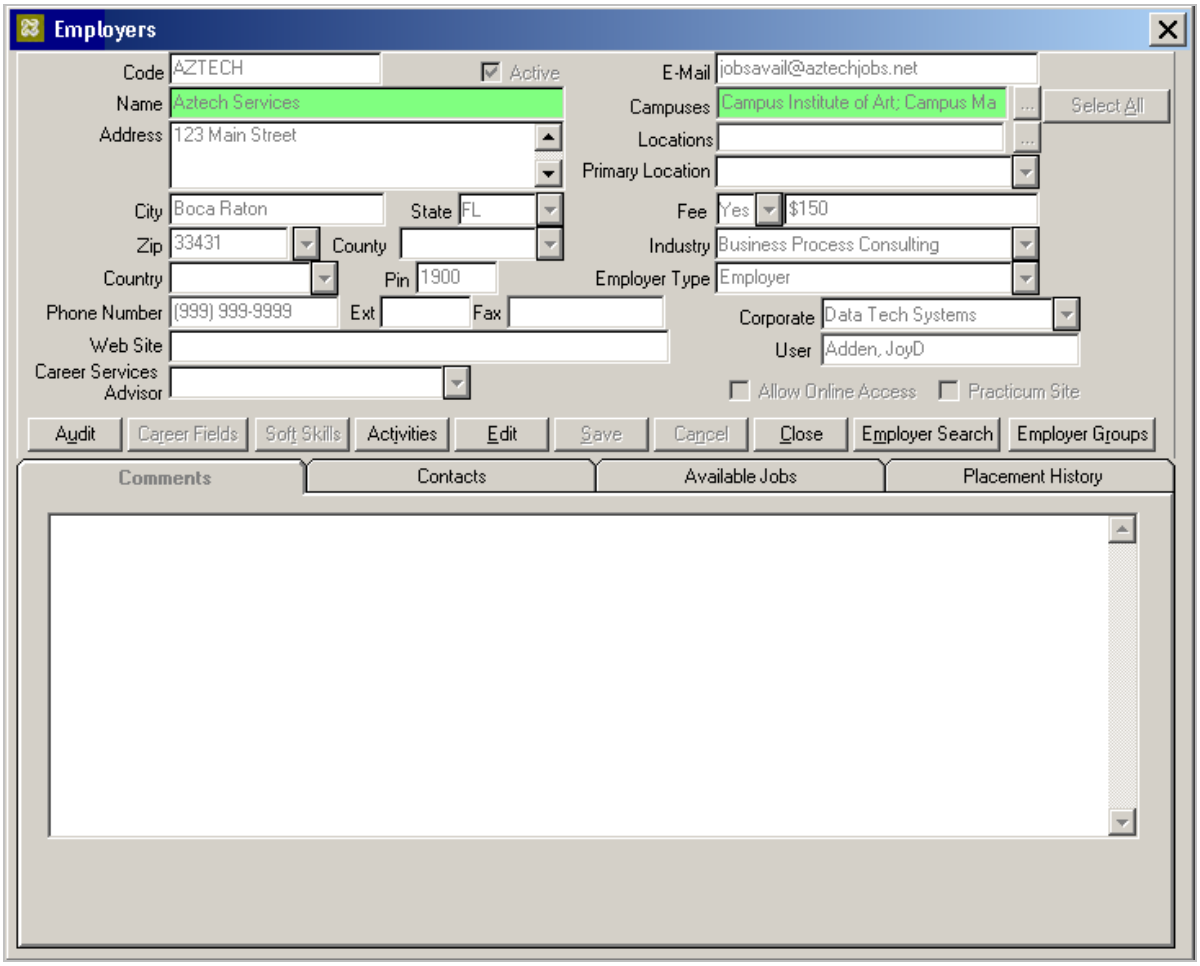
You can enter free-form text comments for a selected employer. This field is available for any comments you care to enter.

To enter or view comments for a selected employer:

1. Navigate to **Daily > Career Services** > **Employers**. The Search form is displayed.



2. Select an employer (see the topic titled Employers for more about searching). Click **Edit** to enable the Comments tab.



3. Enter any new comments or change any that are already recorded.

   Note: To maintain a visible history in the Comments text box, adopt the convention of including the date of the comment and the initials of the person who entered the comment.

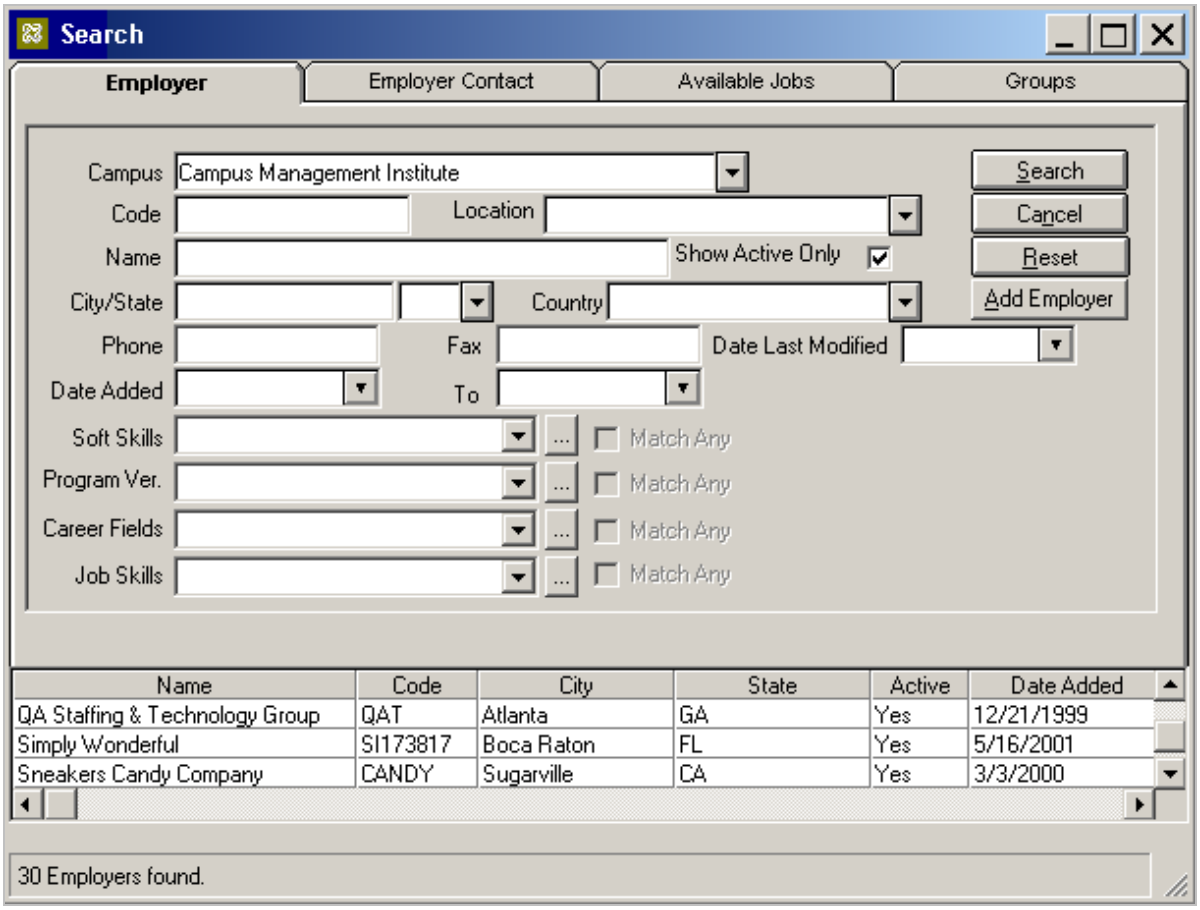
4. Click **Save** to save any changes you make to the Comments text box.
5. A confirmation message is displayed. Click **OK**.
6. Click **Cancel** to cancel any changes you may have made to the Comments text box.
7. Click any of the other Employer tabs to view or change other data for the selected employer.
8. Click **Close** to close the form.

Contacts

You can have as many employer contacts as you want for each employer. All the contacts on the grid are related to the employer location described in the Address information at the top of the form. When adding a new employer, you must save the employer (Address) record before the Contact tab is enabled.

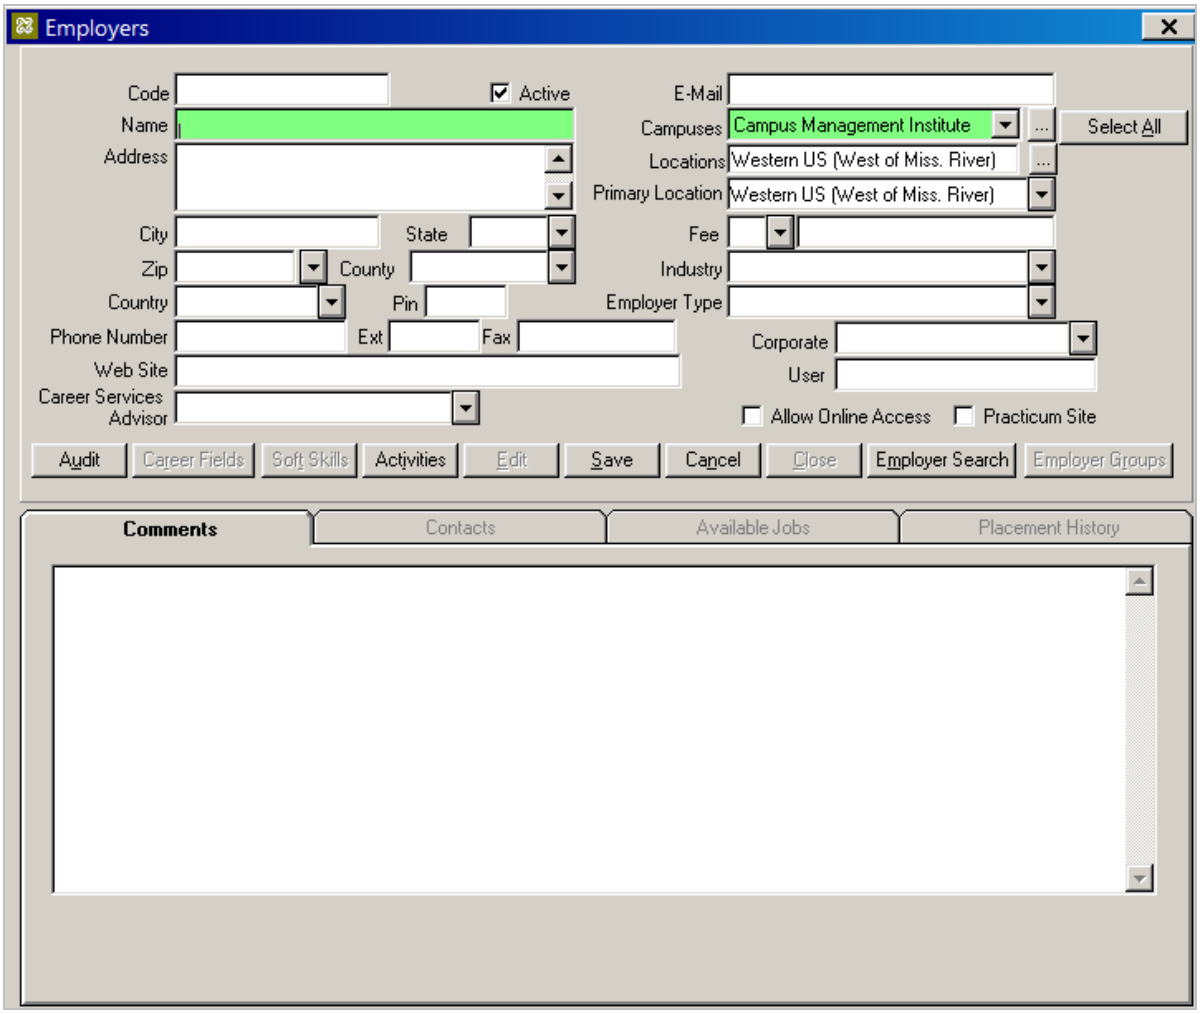
To add a new contact for an employer, or to view or edit an existing one:

1. Navigate to **Daily > Career Services > Employers**. The Search form is displayed. The Employer tab is selected by default.
2. To view or edit an existing employer record, select the **Employer** tab and enter the appropriate search criteria to find an employer.



3. **Double-click** a row on the search results grid to display the selected employer's record. The Employers form is displayed. See Add Employers to add a new employer.

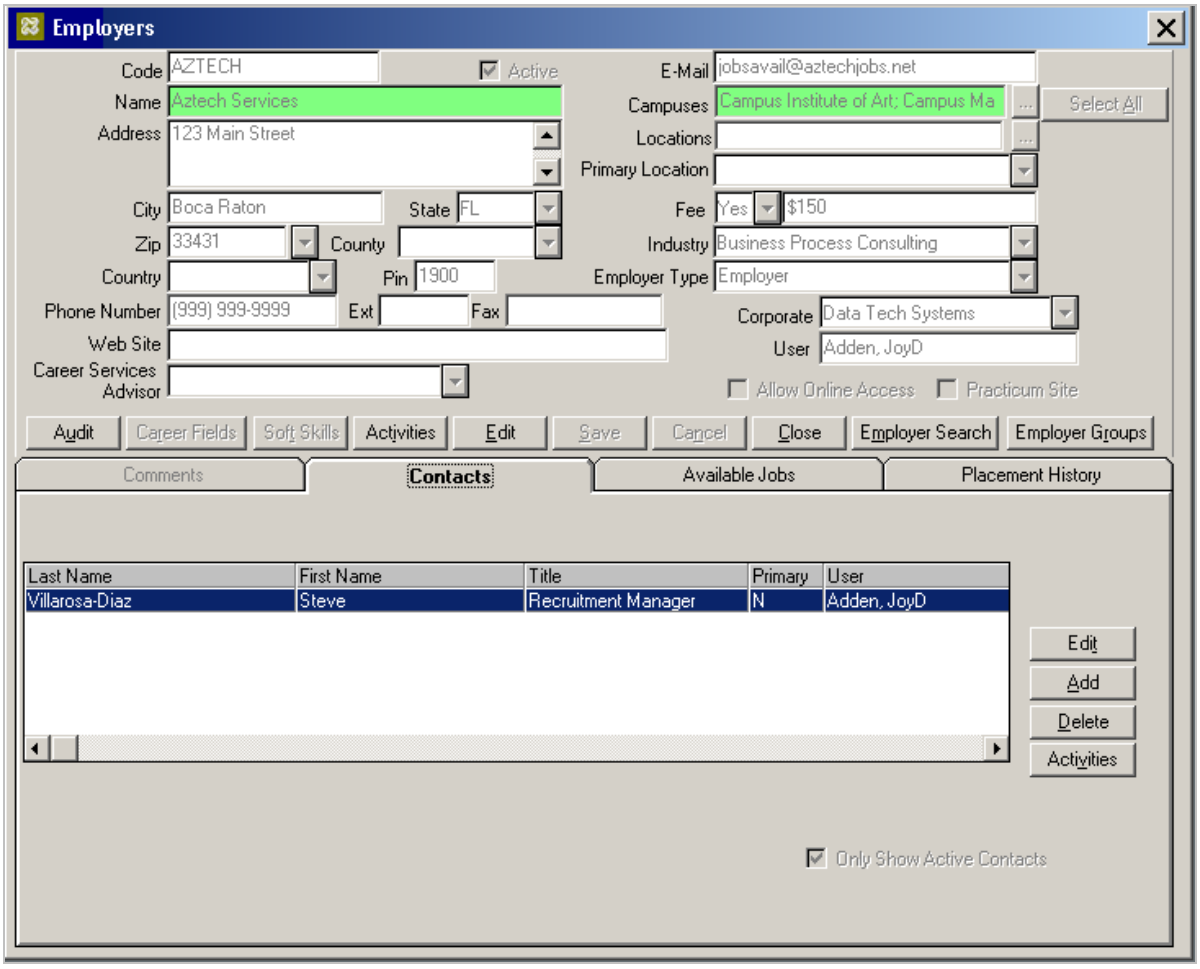
   For information about the address data entry fields, refer to the Address topic.



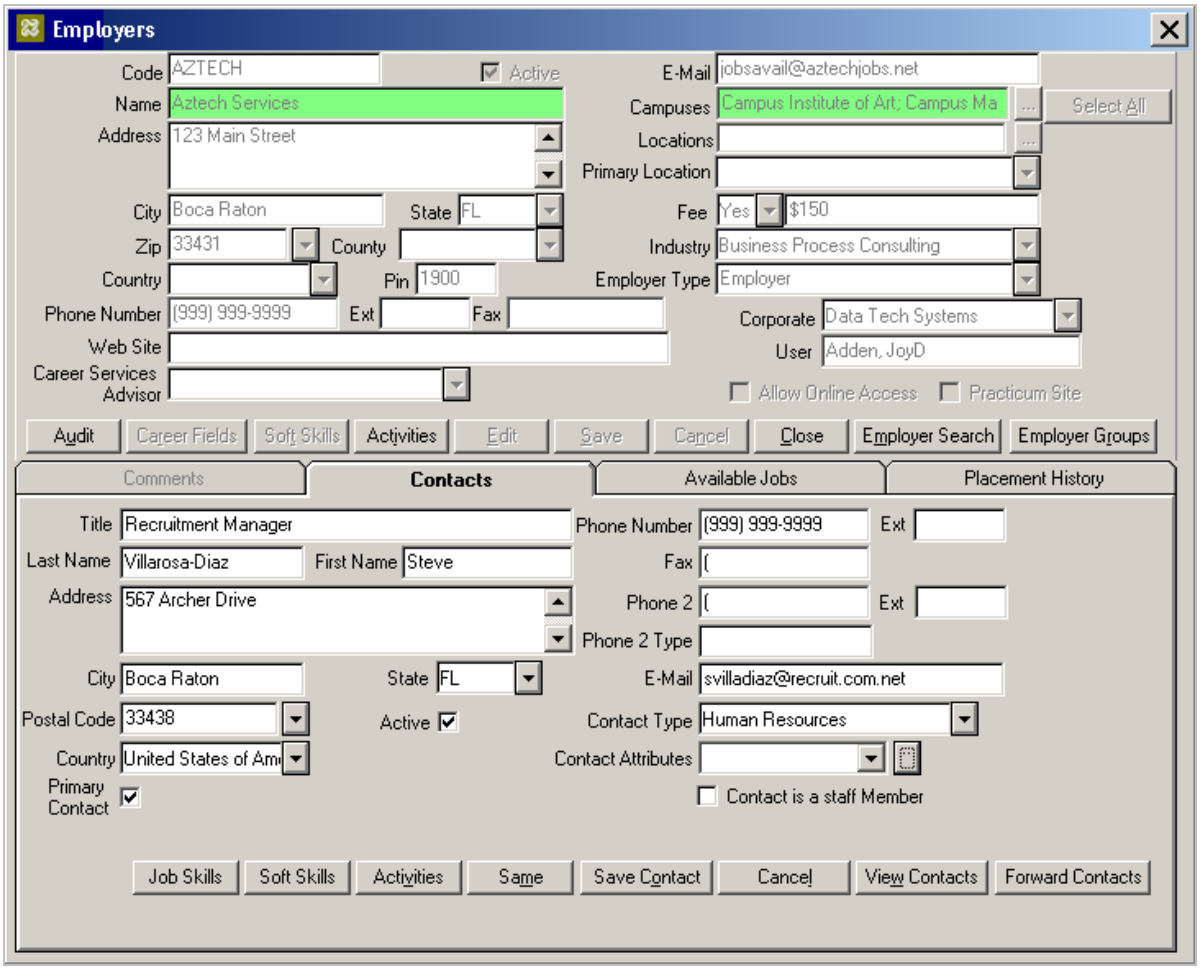
4. Click the **Contacts** tab.

   The contact list shows the Last Name and First Name of the contact, the contact Title, whether this person is the Primary contact (Y) or not (N), and the name of the User who entered the contact.

5. Click **Add** to add a new contact.



6. **Double-click** an existing contact row in the list or select the row, and click **Edit** to view or change the data.



7. Enter or change the contact name and address information. Click **Same** to enter the employer's address information for the contact.
8. The **Active** check box is selected by default. A contact can be made inactive by clearing this check box. Inactive contacts no longer appear in the Contact drop-down list on the Available Jobs tab.

   To help prevent users from assigning activities to a business contact for an employer that no longer has an active relationship with the campus, the system automatically inactivates all associated employer contacts when an employer is made inactive or deleted. If an employer is reactivated and there are inactive employer contacts associated with the employer record, a message is displayed to remind the user to manually update the employer contacts to reactivate them.
9. Select a **Contact Type** from the drop-down list.
10. Select the applicable contact attributes from the **Contact Attributes** drop-down list.
11. If the contact is a staff member of the campus, select the **Contact is a staff Member** check box, and select the name from the drop-down list.
12. Click **Save Contact** to save your contact information. The program returns to the **Contacts** tab.
13. Click **View Contacts** to return to the grid in the Contacts tab.
14. After viewing the contact information detail and saving any changes, you can click on any of the other tabs on the

Employers form.

Button Descriptions: Contacts Tab

Button	Description
Job Skills	Launches a form to associate job skills to this employer contact.
Soft Skills	Launches a form to associate soft skills to this employer contact.
Activities	Launches the **Contact History** form to view and manage associated activities for this employer contact.
Same	Creates a new contact based on the current contact's information.
Save Contact	Saves the contact information.
Cancel	Discards your changes to this contact.
View Contacts	Displays contacts for this employer. The grid can be filtered by the **Only Show Active Contacts** check box.
Forward Contacts	This allows you to forward a contact activity to another staff member. This is useful in sharing contact information if the other staff member does not have access to the employer without having to change the user's access security privileges.

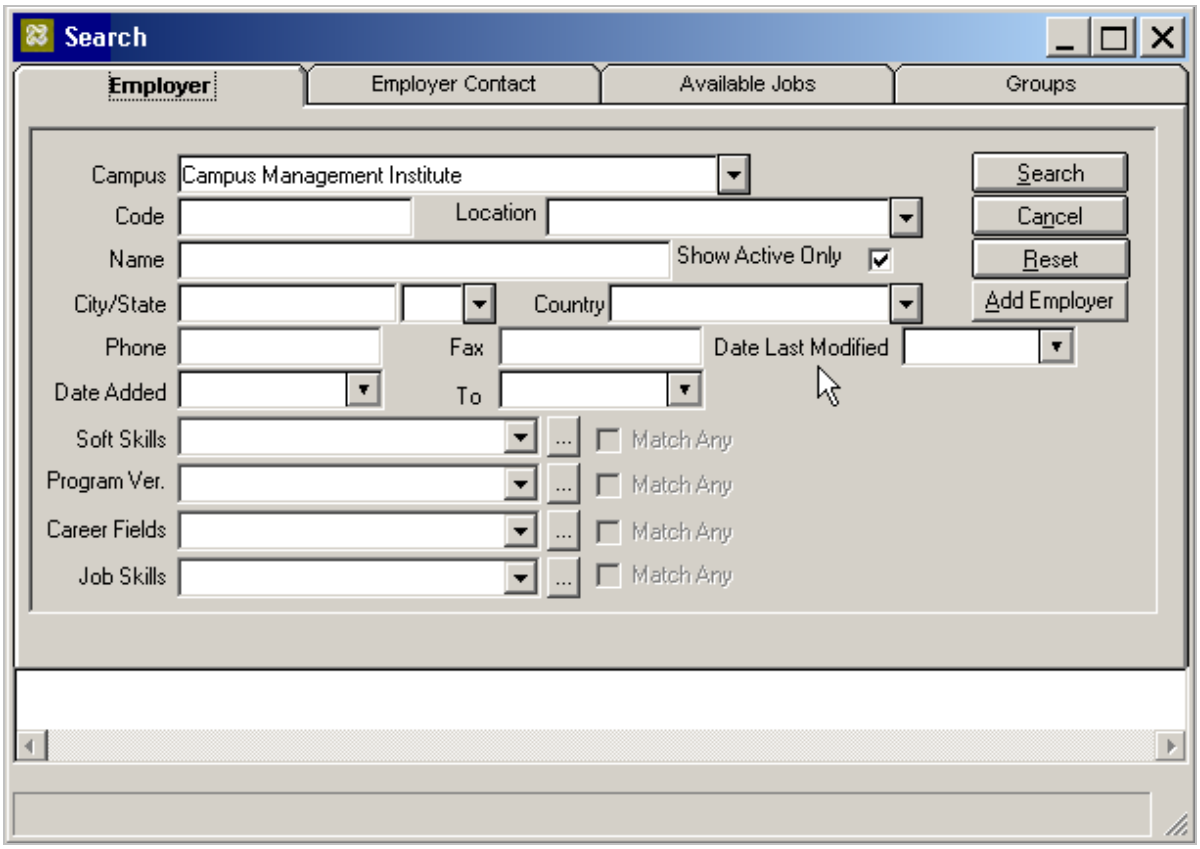
Placement History

As available jobs are filled with students from your school, placement history records are created and linked to the employer. **You can only view these records**. Placements for a selected student are initially recorded and edited via the menu option View > Career Services > Placements.

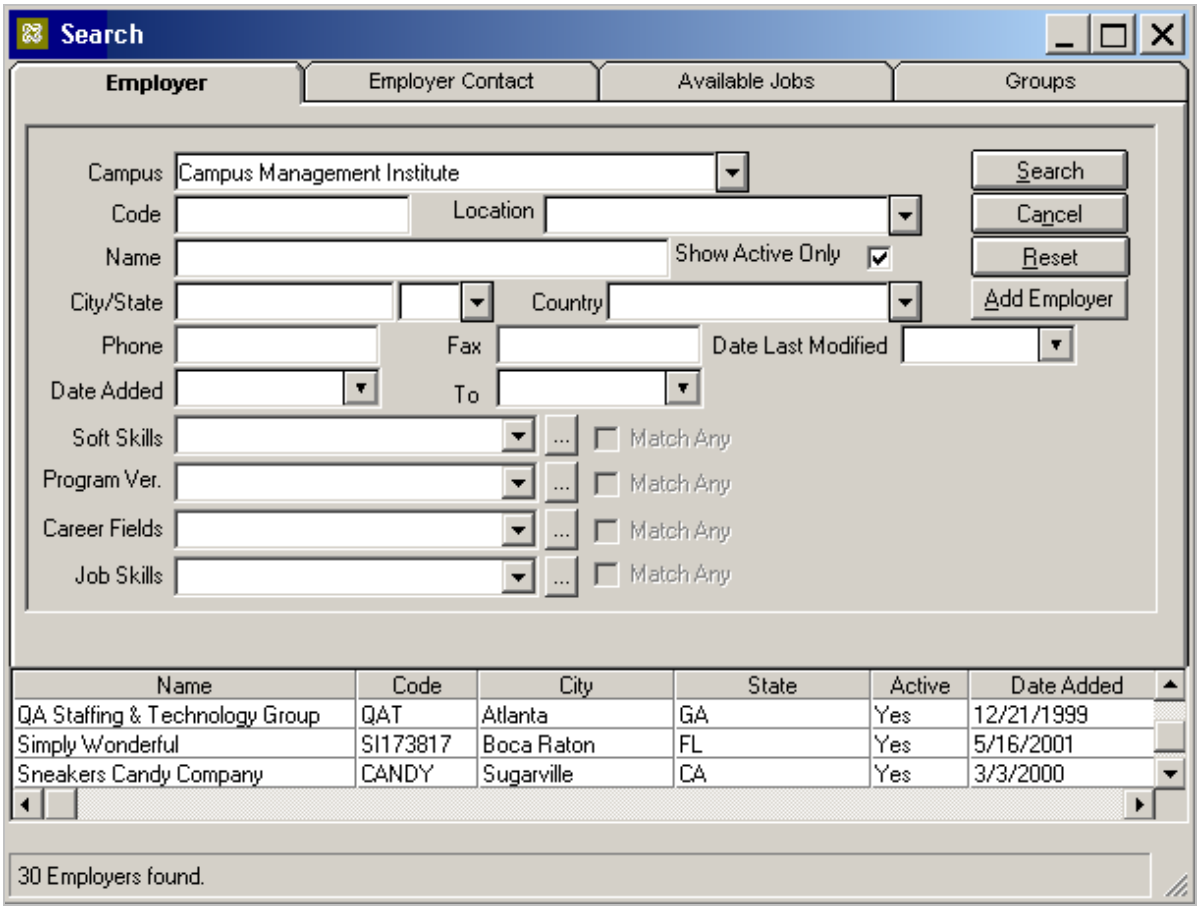
On the Employer's Placement History list, CampusNexus Student shows a line item for each position filled when a listing is for multiple positions. (In other words, if an employer has a single listing with three openings for a Visual Basic Programmer, you will see three different line items on the employer's history when all openings are filled.)

To view an employer's placement history:

1. Navigate to **Daily > Career Services > Employers**. The Employers Search form is displayed.

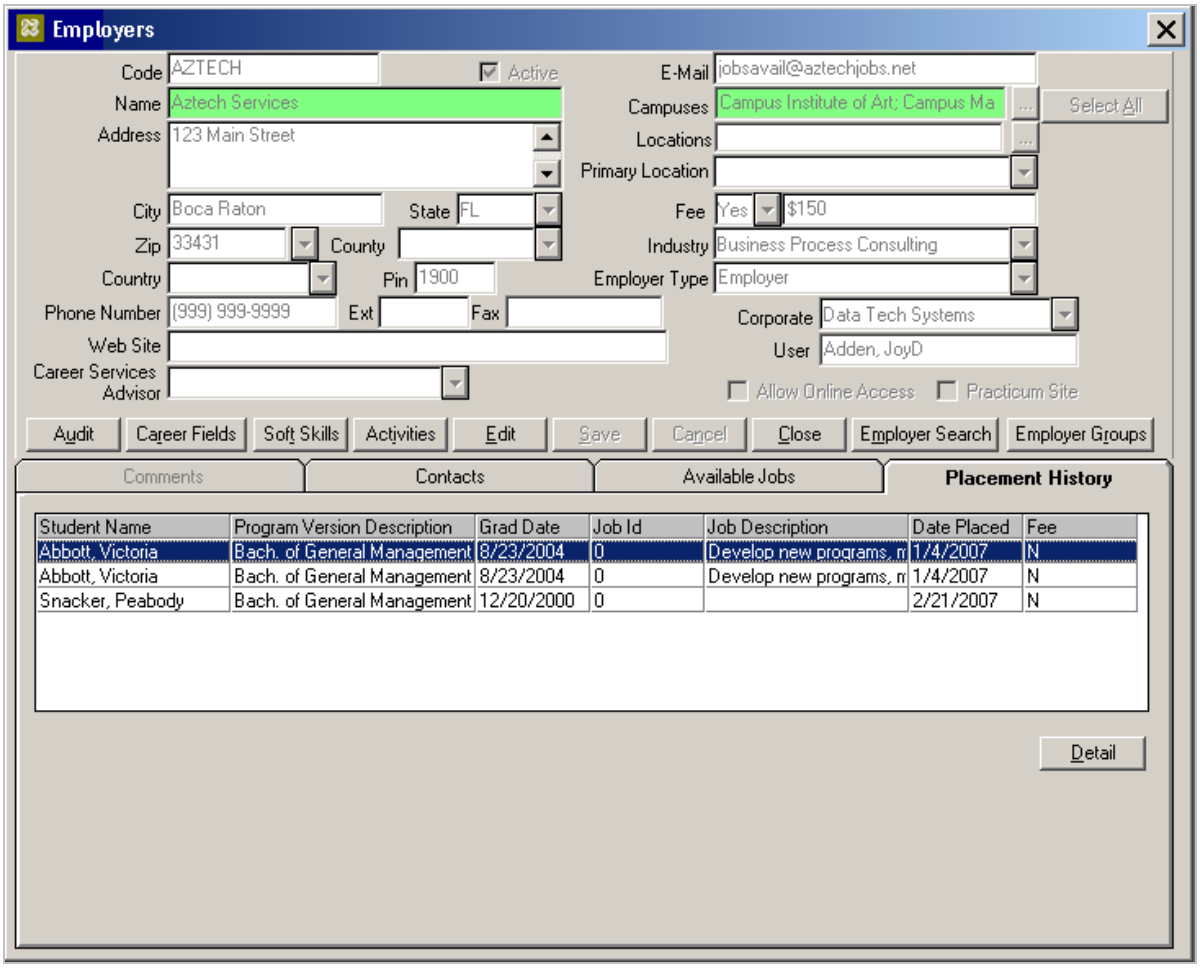


2. Click **Search**. A list of employers is displayed. Select an employer from the list.



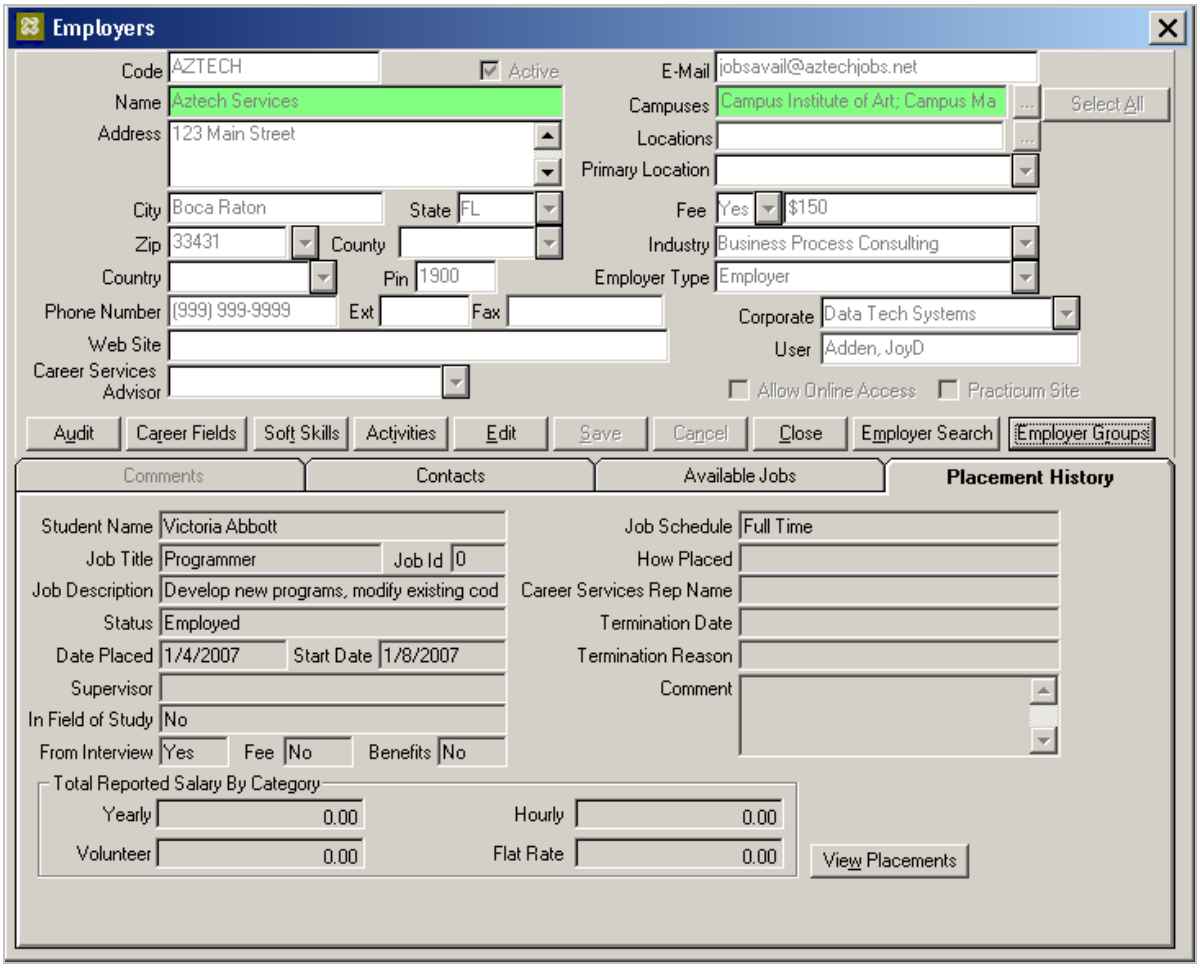
3. The Employers form is displayed containing the employer that you selected above.

   Click **Edit** to activate the Placement History tab. Click the **Placement History** tab.



4. Select a placement item from the lists of placements and click **Detail**. You can also double-click the row. The information about the student who was placed in the position is displayed. The data is read-only in this form. Placement history data can only be edited from the View > Career Services > Placements menu option.

5. Click **View Placements** to return to the list of placements for the selected employer.



6. Click any of the other tabs on the Employers form to see other information about the selected employer.
7. Click **Close** to close the form.

Employer Activities

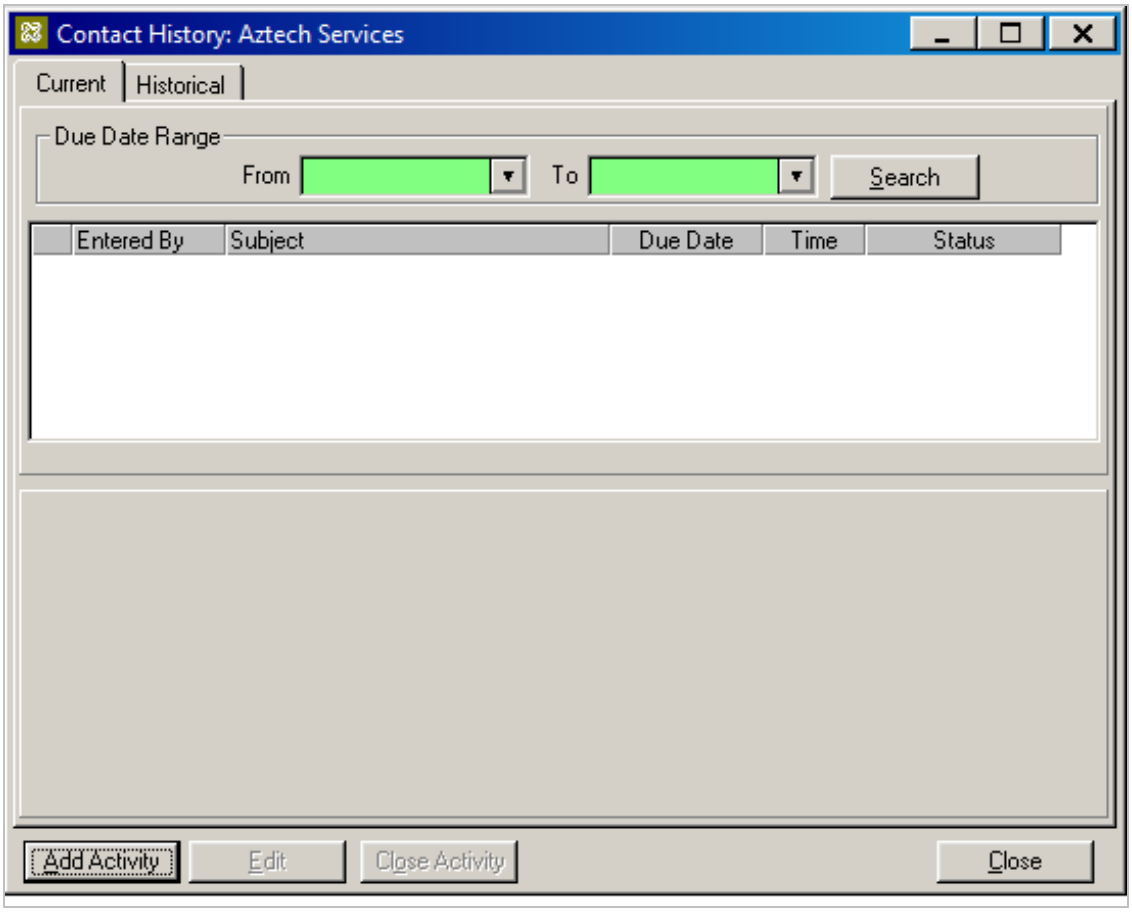
The Employer Activities feature allows you to maintain a list of activities related to a given employer. The employer activities are assigned to specific staff members and can be related to specific students. It is not necessary to relate an employer contact to a student.

Before you begin to use employer activities, set up employer-related activities under Lists > Contact Manager > Activities. You can set up outgoing and incoming phone calls, letters, meetings, and so on. Employer-related activities appear on the staff member's **Contact Manager** form and the **Daily Calendar** form.

To work with the employer activities forms:

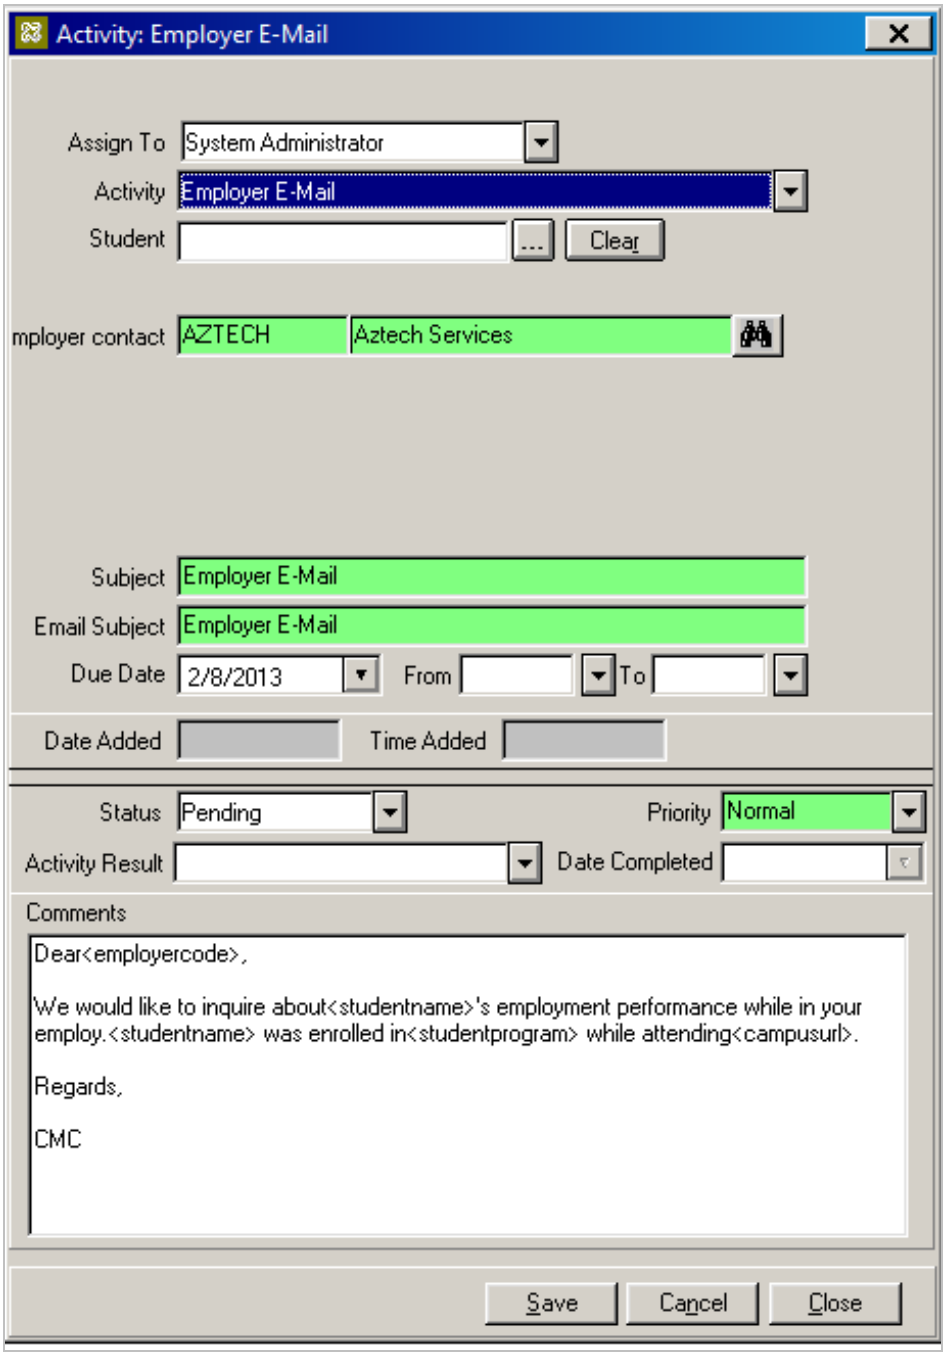
1. Navigate to **Daily > Career Services > Employers**. The Search form is displayed.
2. Click **Search**.
3. In the search results, select the employer for which you want to view or add an activity. The Employers form is displayed.
4. Click **Activities**. The Contact History form is displayed. This form lists all activities related to the selected employer.

   Note: You can filter the list of activities by specifying a Due Date Range.

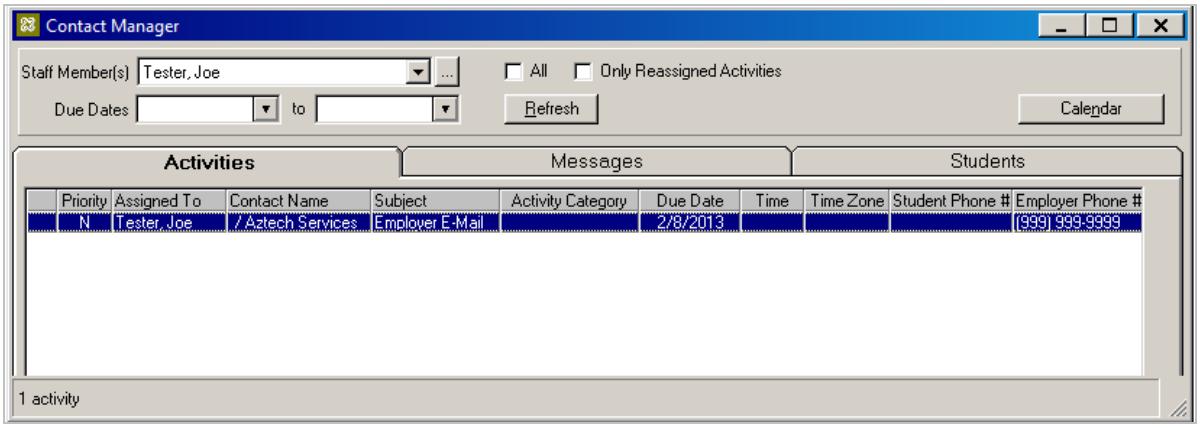


5. Click **Add Activity** to add a new activity, or select an activity on the grid, and click **Edit** to see the details. The

Activity form is displayed.



6. Add or edit the activity data as required. When you add an activity, you must select it from the list of activities that have been previously set up under Lists > Contact Manager > Activities.
7. Click **Save** to save your new activity or changes to an existing activity. The Activity form is closed and the activity is added to the Contact Manager Activities list of the assigned staff member.
8. To view the activity on the Contact Manager form, navigate to **Daily > Contact Manager > Contact Manager** and select the appropriate staff member.



9. Click **Close** to close the form.

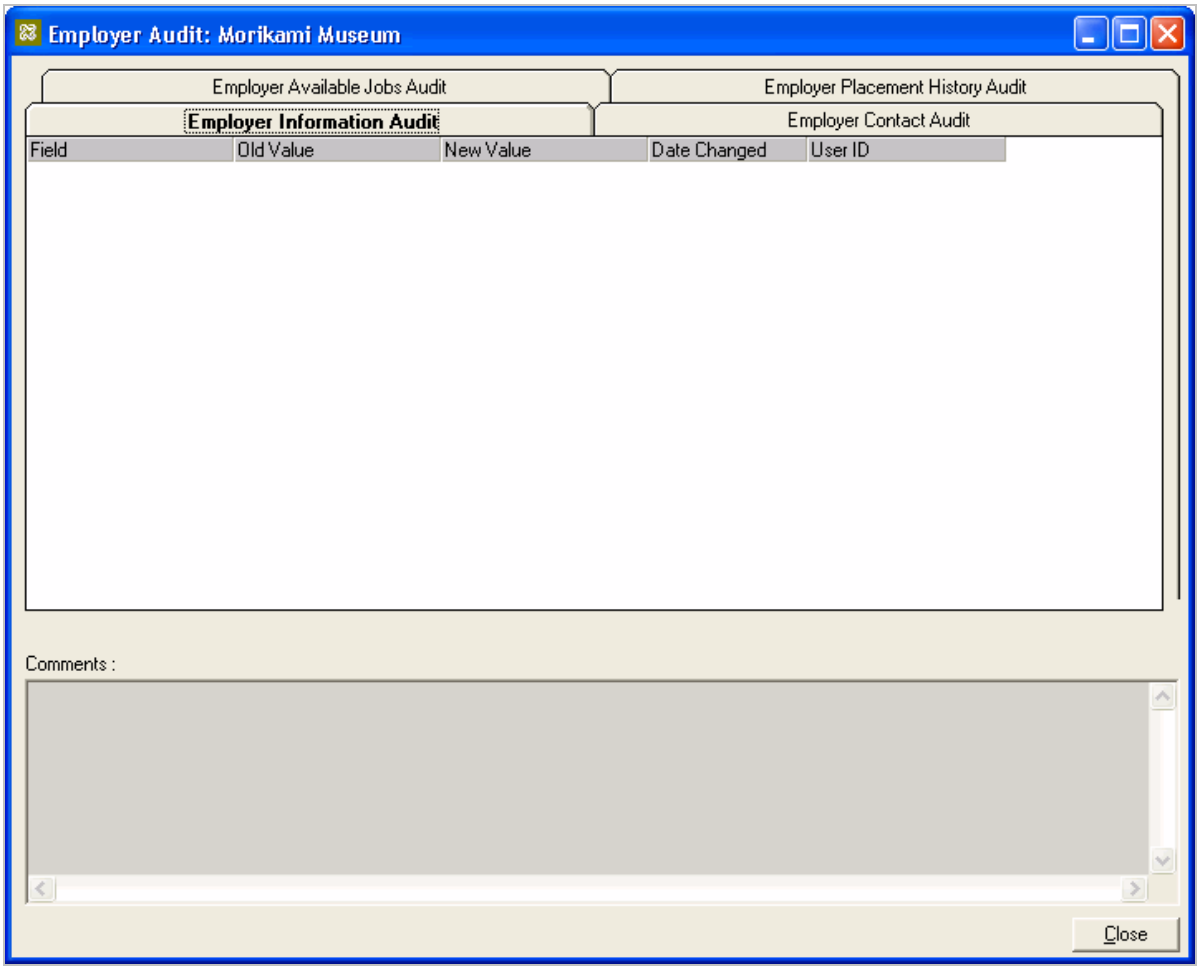
Employer Audit

The Employer Audit feature is accessed from the **Audit** button on the Employers form and allows you to view changes made to employer records. It includes any changes made to employer information, employer contact information, available jobs, and employer placement history. The information is read-only and can only be modified by using the employer record forms.

To view the employer audit information:

1. Navigate to **Daily > Career Services > Employers** and select the employer whose record you want to view; or, click the employer from the **Recent Employers** list.
2. In the Employers form for the selected employer, click the **Audit** button. The Employer Audit form is displayed.

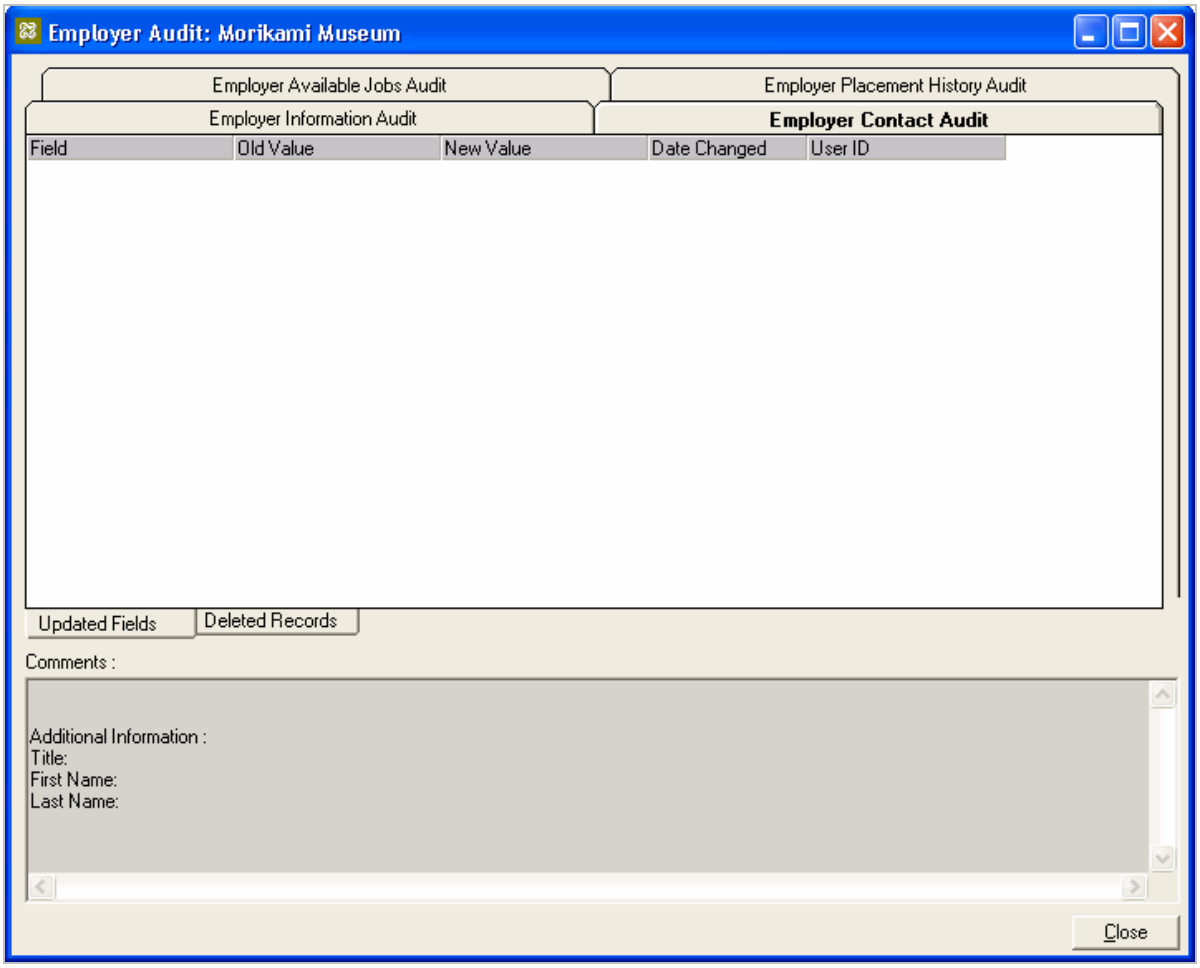
   The default tab is the **Employer Information Audit** tab which displays any changes made to the employer information. It also shows the date the information was changed, and who made the change



3. Click the **Employer Contact Audit** tab to view the audit information for employer contacts.

   This tab displays changes made to the employer contact information. If there are any comments associated with the change, they will appear in the **Comments** field at the bottom of the form.

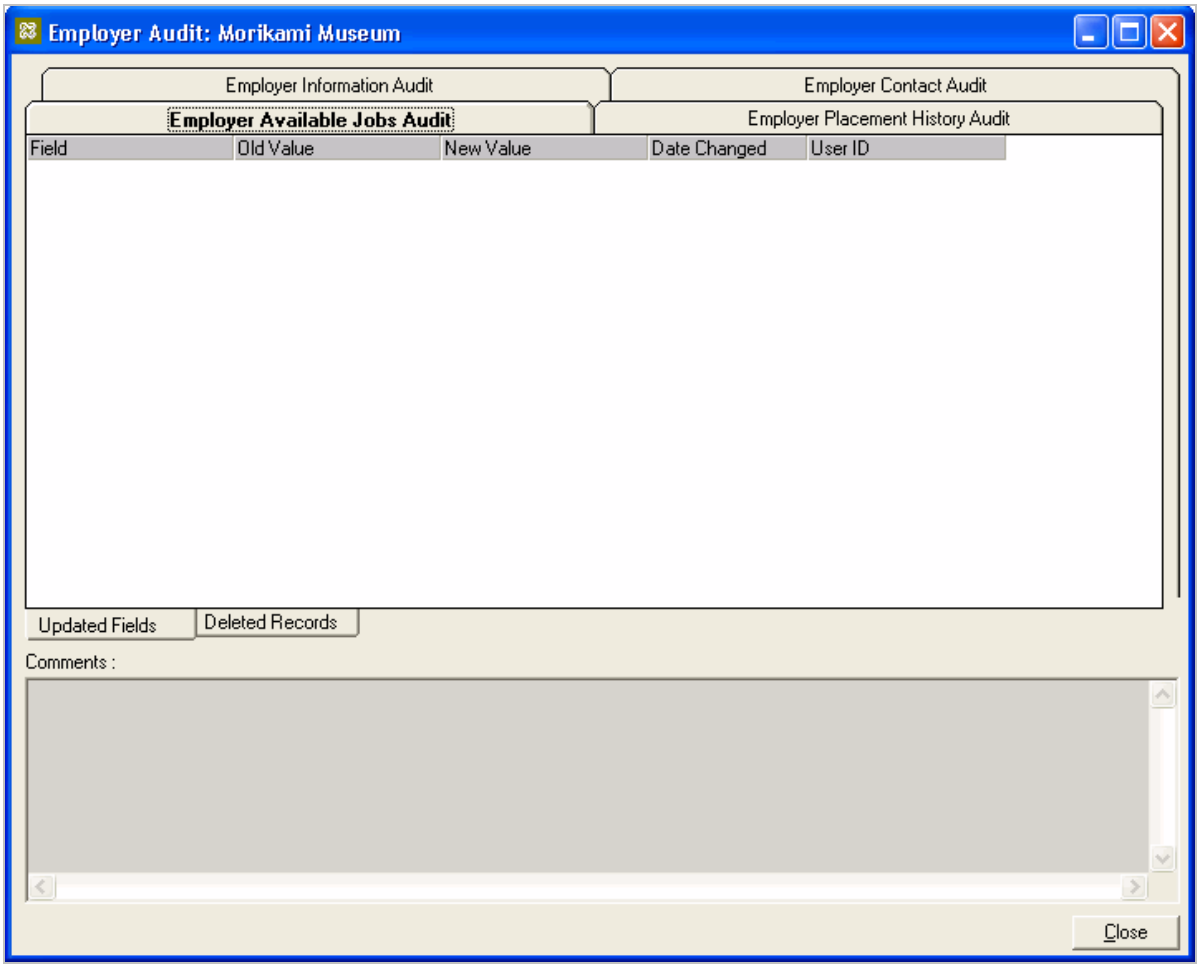
   Two tabs above the Comments field allow the user to view **Updated Fields** (the default view) or **Deleted Records**



4. Click the **Employer Available Jobs Audit** tab to view the audit information for employer's available jobs.

   This tab displays changes made to the available jobs for this employer. If there are any comments associated with the change, they will appear in the **Comments** field at the bottom of the form.

   Two tabs above the Comments field allow the user to view **Updated Fields** (the default view) or **Deleted Records**.

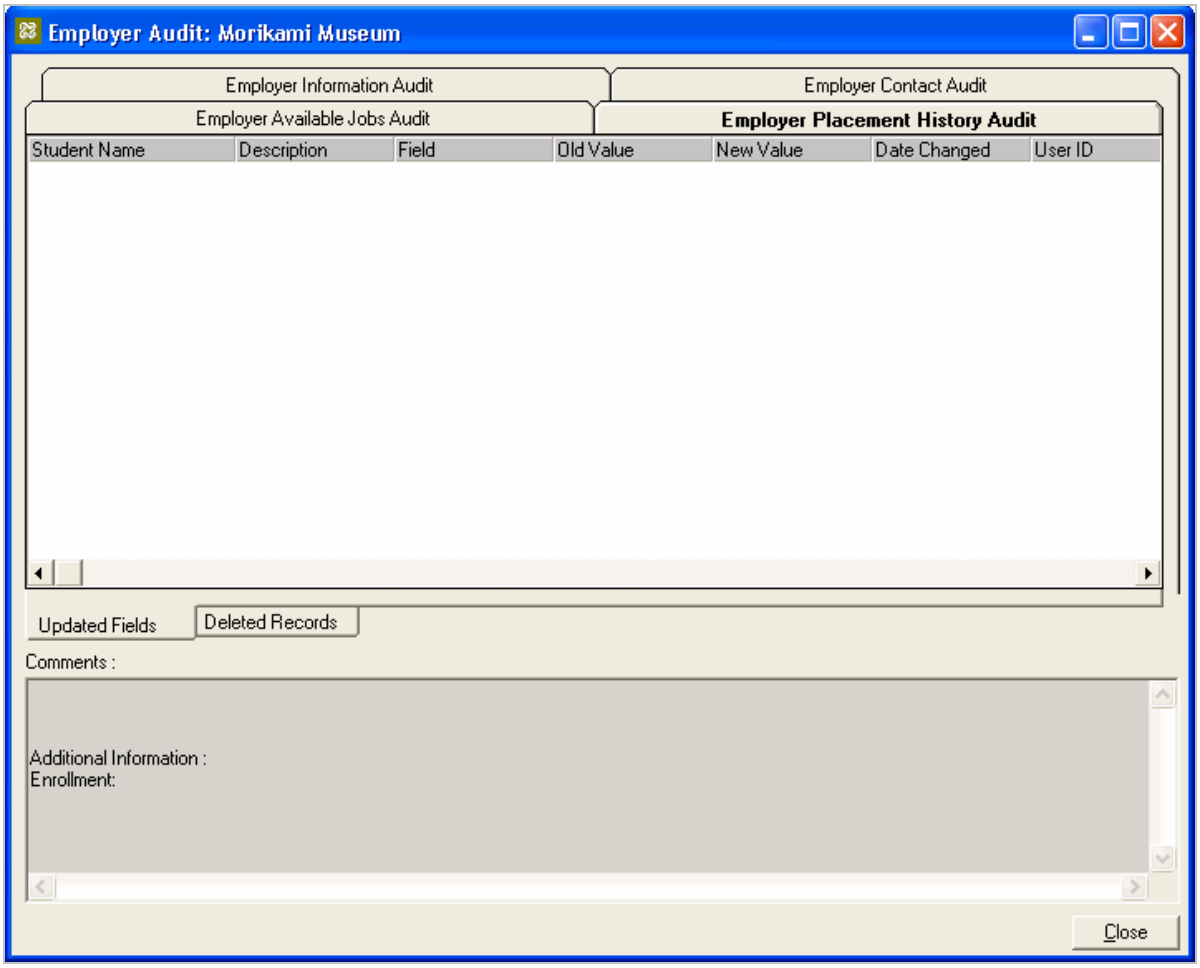


5. Click the **Employer Placement History Audit** tab to view the audit information for employer placement history.

   This tab displays changes made to the employer's placement history information.

   If there are any comments associated with the change, they will appear in the **Comments** field at the bottom of the form.

   Two tabs above the Comments field allow the user to view **Updated Fields** (the default view) or **Deleted Records**



6. Click **Close** to close the form.

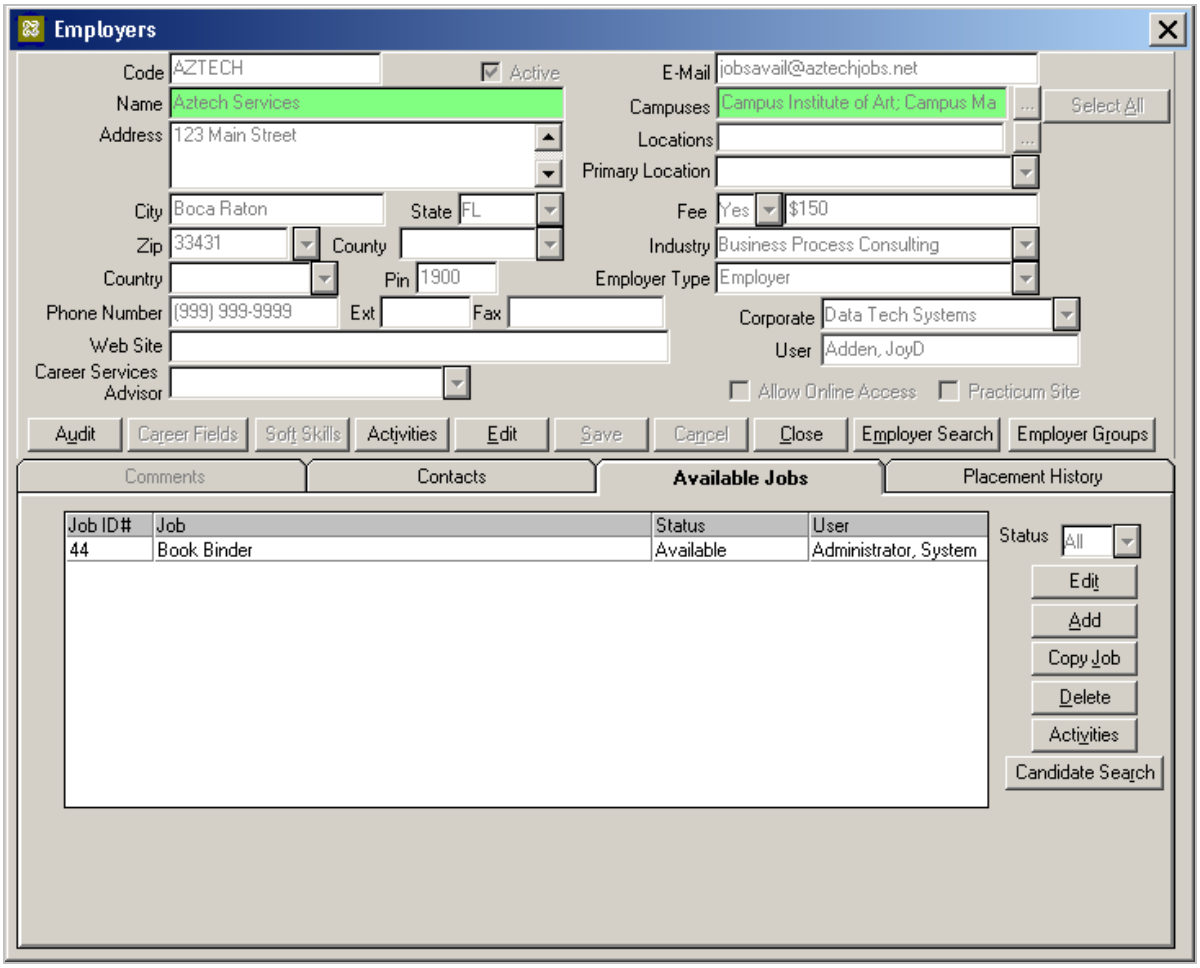
Available Jobs

At any given time, an employer may have many available jobs listed with your Placement department. You can enter and edit these jobs with this form. An employer may have multiple openings for the same job description. You can indicate the number of openings available. As your students are placed in these jobs, the program will update the number of openings filled.

Students are placed in the available jobs via the View > Career Services > Placements option. There, you will select a student and match the student with an available job.

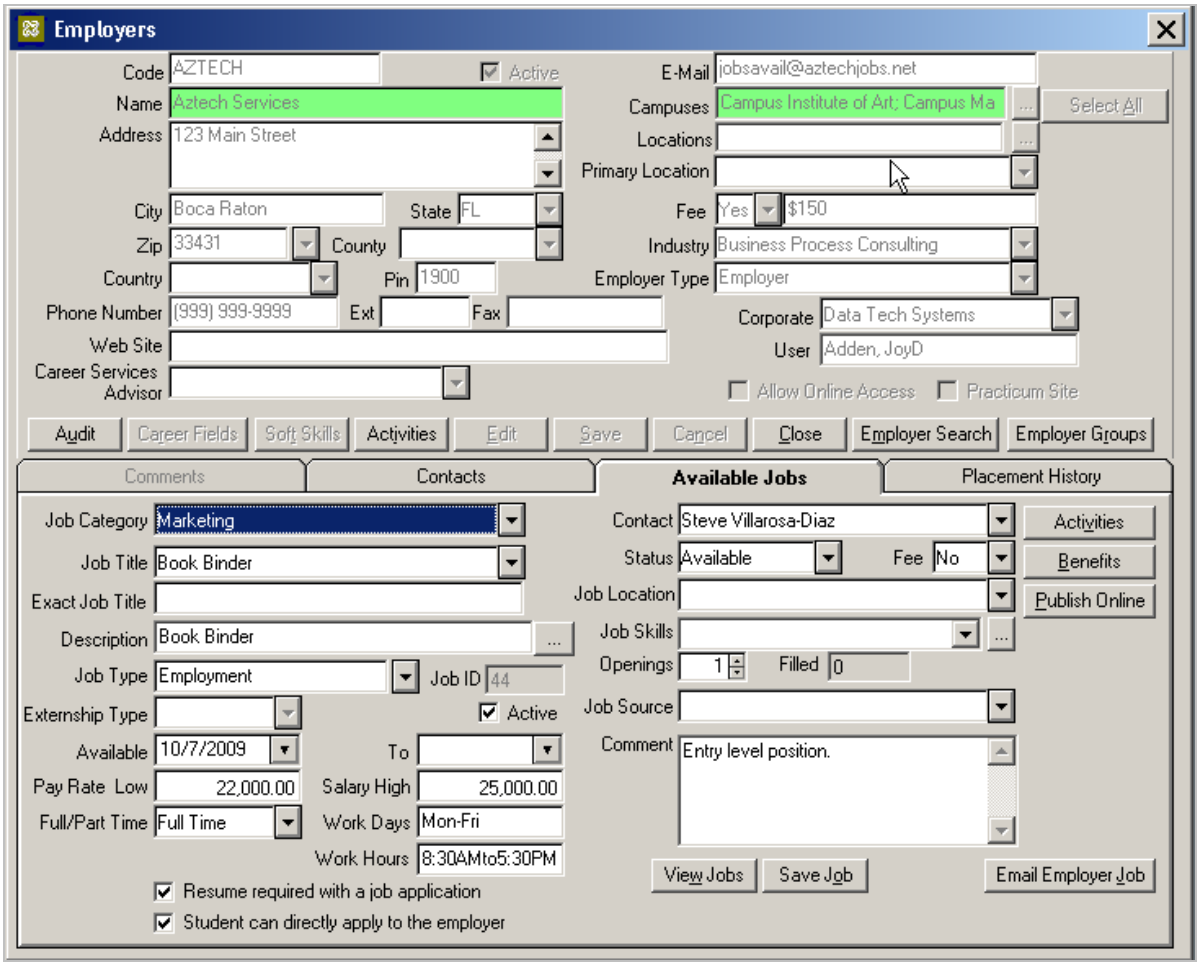
To add or edit an available job:

1. Navigate to **Daily** > **Career Services > Employers**. The Search form is displayed.
2. If the available job is for a new employer, click **Add Employer** and enter the Address and Contacts data.
3. If the available job is for an existing employer, find and select the employer using the **Search** feature.
4. When you double-click an employer from the grid, the **Employers** form is displayed. Click the **Available Jobs** tab to display a list of previously listed jobs for the selected employer.



5. To reduce a long list of available jobs, select a job status filter from the **Status** drop-down list available to the right of the job grid.
6. On the lower half of the form, click **Add** to add a new available job, or select a job in the grid, and click **Edit** to see

the details. The form changes to the format below.

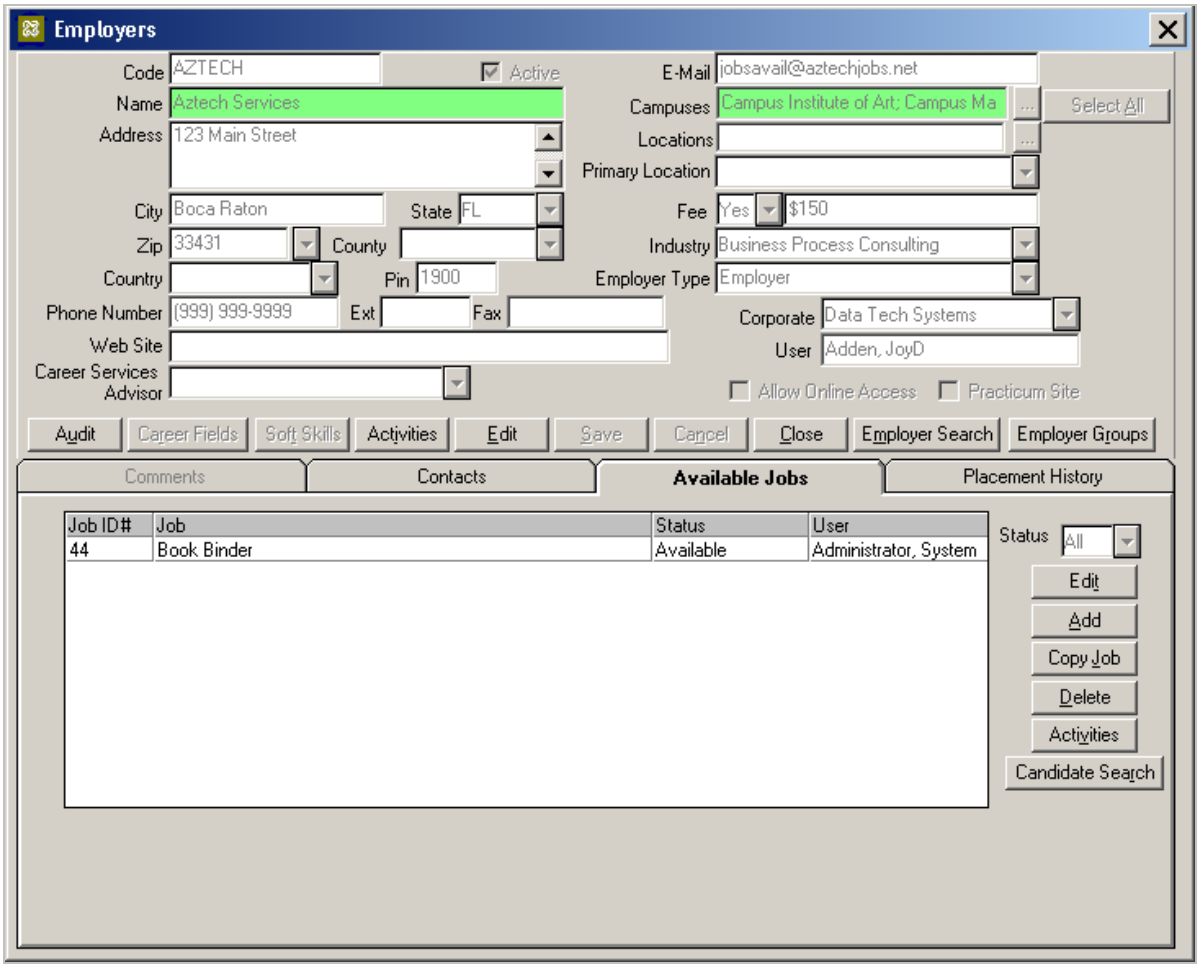


7. Enter the information that describes the available job(s). Refer to the field descriptions below for an explanation of each field.
8. Click **View Jobs** to return to the grid in the **Available Jobs** tab.
9. Click **Save Job** to save your available job listing. The program will automatically return to the grid in the **Available Jobs** tab.
10. Click **Cancel** to stop the changes.
11. Click **Email Employer Job** to send the job information to an email recipient.
12. Click **Close** to close the form.

To speed data entry when an opening, identical to one already placed occurs, use the **Copy Job** option to quickly create the new opening based on an existing job description.

To copy a job description:

1. On the **Available Jobs** tab of the **Employers** form, select the job description to be copied and click the **Copy Job** button.



2. When the new job description is displayed, it will be named identical to the original job with a prefix of "Copy Of" appended to the name and a confirmation message will appear.
3. Click **OK** to close the confirmation message.
4. Rename the new job description as you like.

Note: The name of the job description must be unique within an employer listing.

Field Descriptions: Available Jobs Tab

Field	Description
Job Category	Select the job category from the list. Multiple selections can be associated with Job Titles. You cannot select a Job Category for a campus where you do not have authorization. After making a selection, the system will fill the Job Title drop-down list that are associated with the Job Category that is selected.
Job Title	Select a job title from the list.
Exact Job Title	Enter the exact job title.
Description	Enter a brief description of the available job.

Field	Description
Job Type	Select E-Employment or I-Internship/Externship.
Job ID	A unique number assigned to this job is displayed in this field.
Externship Type	This field does not apply to the employment job type. For the Internship/Externship job type, select "Open", "Closed", or "To Hire". • Open Externship Type: The school can place a student in the position at any time. • Closed Externship Type: The employer has placed limits on which students or when students can be placed in the position. • Hire Externship Type: The externship position can lead to future permanent employment.
Active	Select or clear the Active flag as appropriate.
Available	This field signifies when the employer will first accept applications for this job and defaults to the current date. You can modify the date, if needed.
To	Enter the date after which applications will no longer be accepted.
Pay Rate Low	If the job is hourly, enter the hourly wage in Pay Rate Low, and leave the Salary High field blank.
Salary High	If the job has a salary range, enter the low value in Pay Rate Low and the high value in Salary High.
Full/Part Time	Select full or part time as it applies to the available job.
Work Days	Enter the normal work days for the available job. This field accepts up to 7 characters which represent the days of week that the job requires. (For example: Monday through Friday would be represented by **MTWRF**.) This field's sizing needs to be constant because it is used for display in reports and in Portal. • M = Monday • T = Tuesday • W = Wednesday • R = Thursday • F = Friday • S = Saturday • U = Sunday
Work Hours	Enter the normal work hours for the available job. This is an unformatted text box.
Resume required with a job application	If a resume is required with the job application, select this check box.
Student can directly apply to the employer	If the student can apply directly to the employer, select this check box.
Contact	Select one of the previously established contacts or enter a new name. A contact can be made inactive by clearing the **Active** check box on the **Contacts** tab. Inactive contacts will no longer appear in the **Contact** drop-down list on this tab, only active contacts are listed.

Field	Description
Status	Select the status of the available job. Depending on the previous status, the list of statuses will change. Possible options can include: **Available**, **Pending**, **Filled**, **Cancelled**, **Unable to Fill**, and **Closed**. The default status is blank. You have the option of specifying the status of the job according to the required status of the field set within the data dictionary.
Fee	If your school charges a fee for placing a student in this job, select **Yes**; otherwise, select **No**.
Job Location	The **Job Location** drop-down list allows you to associate the location to each individual job. By default, the value from the **Primary Location** field is displayed as the selected location. **Note**: An audit will be maintained in the **Employer Available Jobs Audit** tab (in the **Employer Audit** form) for any changes made in this field.
Job Skills	The list includes only active skills for the selected campus. Select as many skills that apply.
Openings	Enter the number of openings (positions available).
Filled	Read-only. The program will increment this field each time a student is placed in one of the openings.
Job Source	Select the origin for this job lead from the drop-down list.
Comment	Enter a description of the available job. This description will appear on job listing reports that may be posted for the benefit of your students.
Activities	This button launches the **Activities** form.
Benefits	This button launches the **Benefits** form. Select **Yes** or **No** to indicate if the job comes with employee benefits. Select the applicable benefits from the **Available Benefits** drop-down list. Enter any comments in the **Job Benefits Comments** field. 
Field	Description
Publish Online	Select this check box to launch the **Publish Online** form which allows you to configure how the data is displayed online. View Jobs	Displays all available jobs for the selected employer. This list can be filtered by the **Status** option.
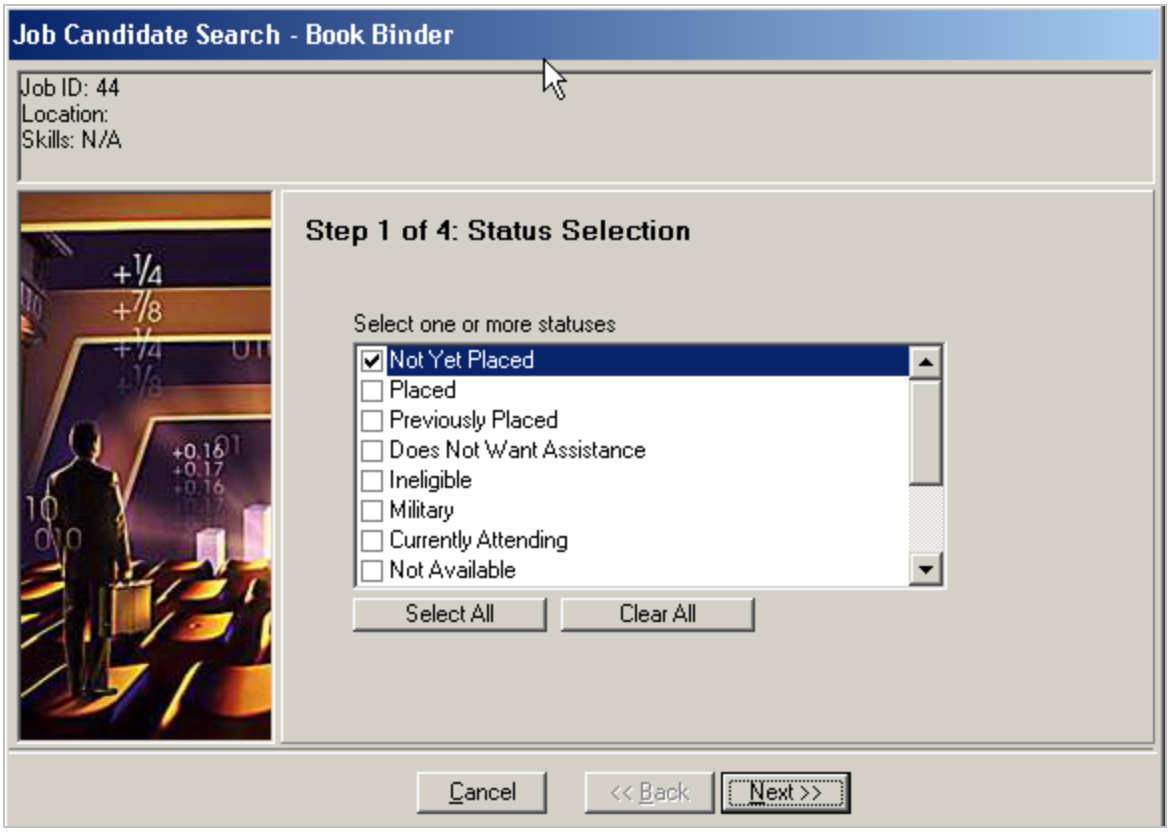
Save Job	Saves the current job information.
Cancel	Discards your changes to the job information.
Email Employer Job	Launches a wizard that allows you to email the current job details.

Job Candidate Search

The **Job Candidate Search** wizard allows you to select candidates for specific available jobs, at specific employer locations.

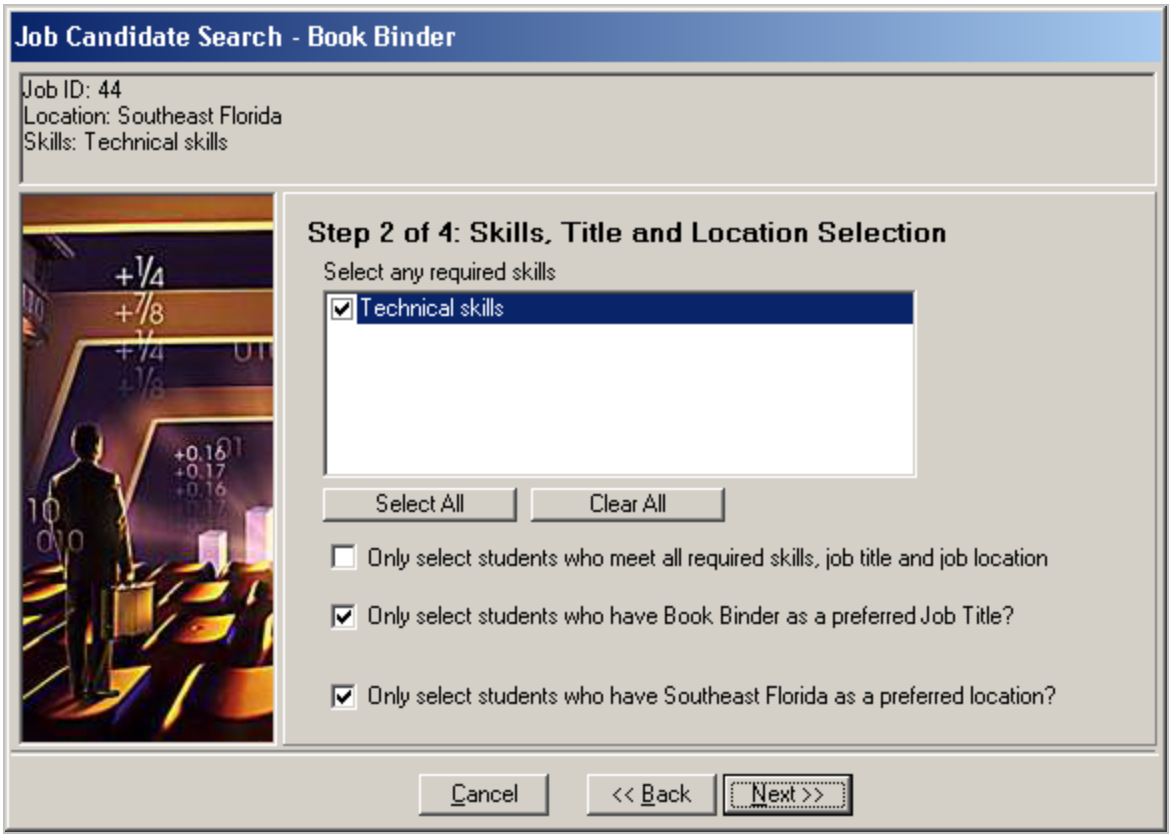
1. Navigate to **Daily** > **Career Services** > **Employers**. The Job Candidate Search wizard is displayed.
2. Click **Search** to select an employer.
3. Double-click the employer name from the grid. The Employers form is displayed.
4. On the Available Jobs tab, highlight a specific job from the grid, and click **Candidate Search**.

   Step 1 of 4 in the Job Candidate Search wizard is displayed.



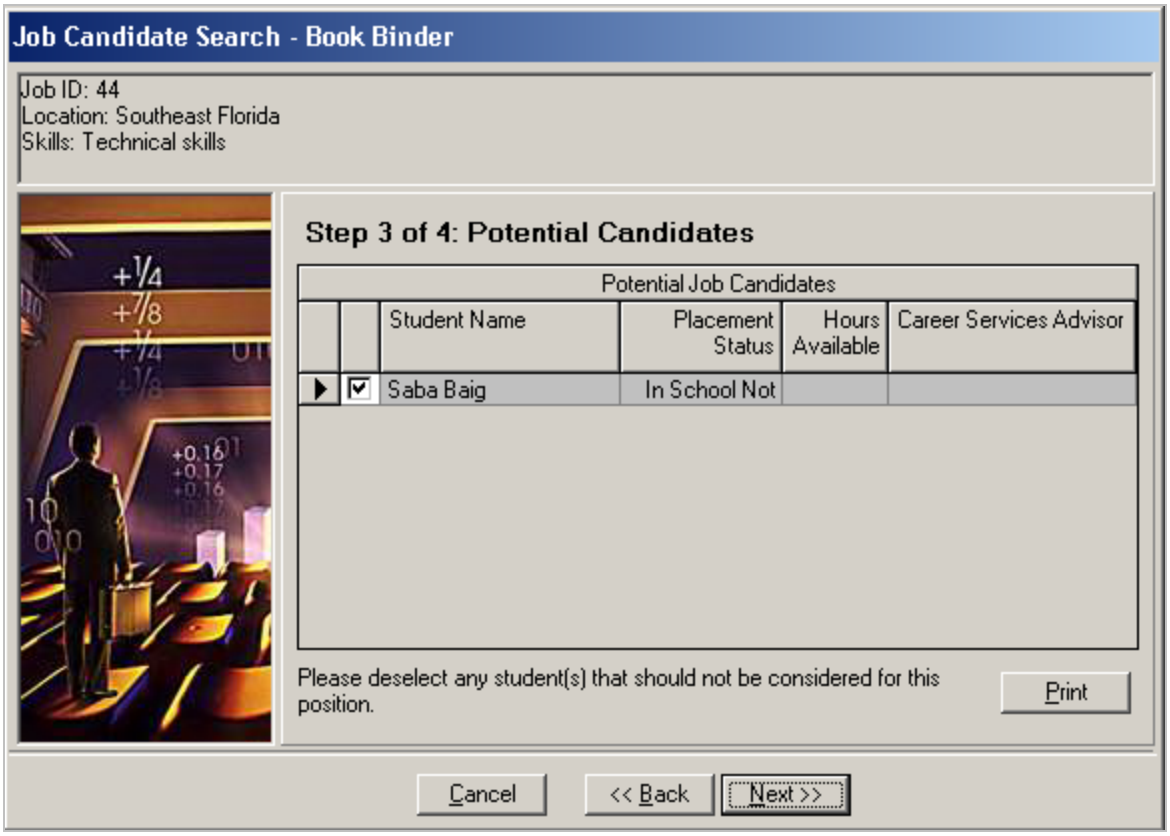
5. Select one or all listed statuses and click **Next**.

   Step 2 of 4 in the Job Candidate Search wizard is displayed.



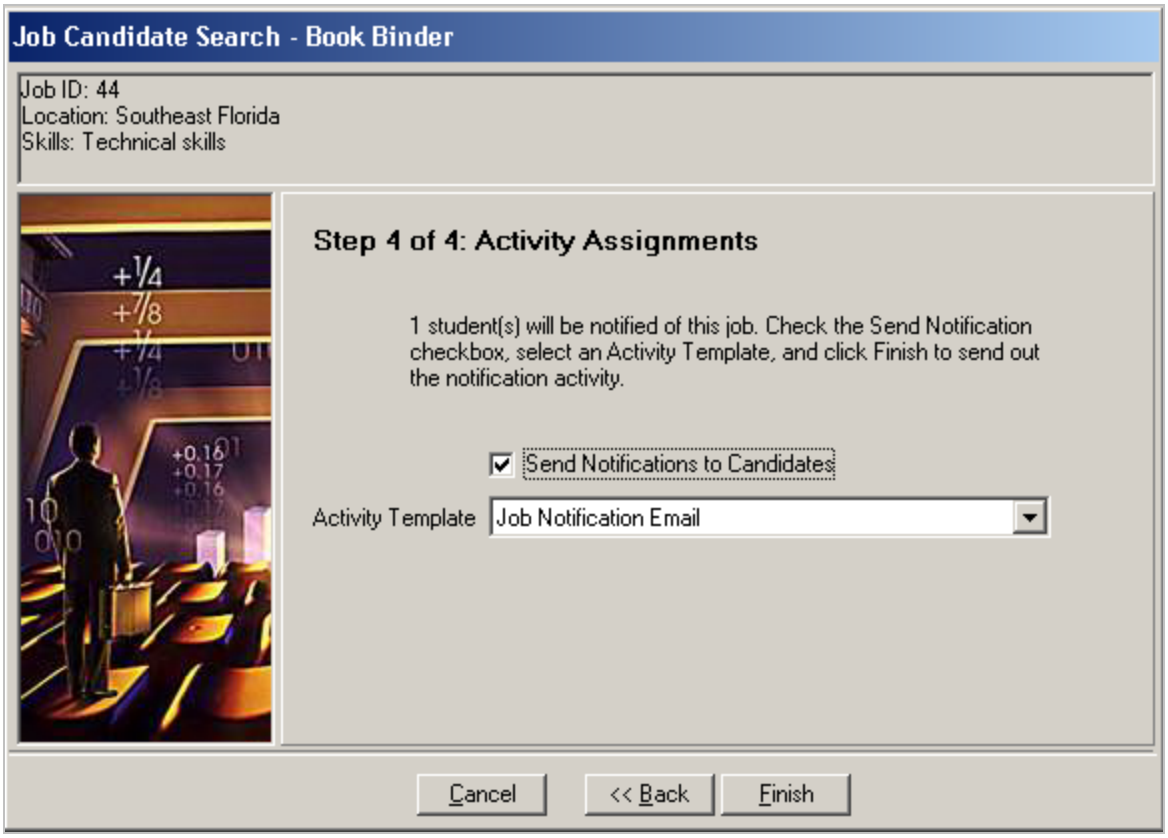
6. Select any or all required skills and click **Next**.

   Step 3 of 4 in the Job Candidate Search wizard is displayed.



7. Select or deselect potential job candidates and click **Next**.

   Step 4 of 4 in the Job Candidate Search wizard is displayed.



8. Select the **Send Notifications to Candidates** check box, select an **Activity Template** from the drop-down list, and click **Finish** to send the notification activity.
9. Click **OK** on the Job Notifications message that indicates the notification activity was sent.

Employer Letters Overview

Many procedures during your daily Career Services department operations require that you send letters to one or more employers. You can establish form letters into which you can merge data from the employer records.

Letter generation begins in the **Contact Manager > Lists** menu. From here, you can add, edit, delete, disable, and print employer letter activities. Refer to Activities for more details.

Once an employer letter activity has been added to the Contact Manager List, you use the Daily > Career Services menu to write the new form letter or edit an existing one. You can then schedule the letter to be sent to a student or a group of students.

To edit and print letters navigate to **Daily > Career Services > Print Employer Letters**. Click Edit Letter to edit the selected letter, Print Letters to print the selected letter. Click Clear Letters to remove the selected letter.

CampusNexus Student calls Microsoft Word to open the letter document.

Edit Employer Letters

You can edit activity letters by starting Microsoft Word from within CampusNexus Student. Before you can edit a letter, however, you must add it to the activities list in the **Contact Manager** option under the **Lists** menu.

Refer to the Activities List topic for more information on setting up a letter activity. See also Mail Merge Codes.

To edit a letter:

1. See Print Employer Letters for navigation and instructions for events that must occur before editing employer letters. The Print Letters form is displayed.
2. From the list of available letters, select the one you want to edit.
3. Click **Edit Letter**. If your employer letter is new, the program will tell you that the letter does not exist and ask if you want to open a new Word document. Click **Yes** to continue. The program will start Microsoft Word with a blank page. The letter file name is made from the code entered in the Activities setup procedure.
4. If your letter is currently on file, the program will start Microsoft Word with the employer letter file that you selected.
5. Work in the word document just as you would if you were not coming from CampusNexus Student. The most significant difference about Word when it is started from within CampusNexus Student is the addition of a control on the toolbar just above the letter. Notice the control labeled "Insert Merge Field". The Insert Merge Fields button displays a drop-down list of CampusNexus Student Employer data fields. These fields can be inserted at any point in your letter.
6. To insert a merge field in your letter, place the insertion point (cursor) at the location where the field is required. Click **Insert Merge Field** on the Word toolbar. The list of merge fields will drop-down. Slide your pointer down (or up) the list until you see the field you want. Click the field on the list and it will be inserted in the letter at the point you chose.
7. After you finish composing your employer form letter, including as many merge fields as you like, **Save** your letter in Word. Then **Exit** from the Word program. You will be returned to CampusNexus Student.
8. To set up Employer form letters, see Edit Letter.

Print Employer Letters

You can print employer letters by calling Microsoft Word from within CampusNexus Student. Before you can print a letter, however, you must add it to the activities list in the **Contact Manager** option under the **Lists** menu.

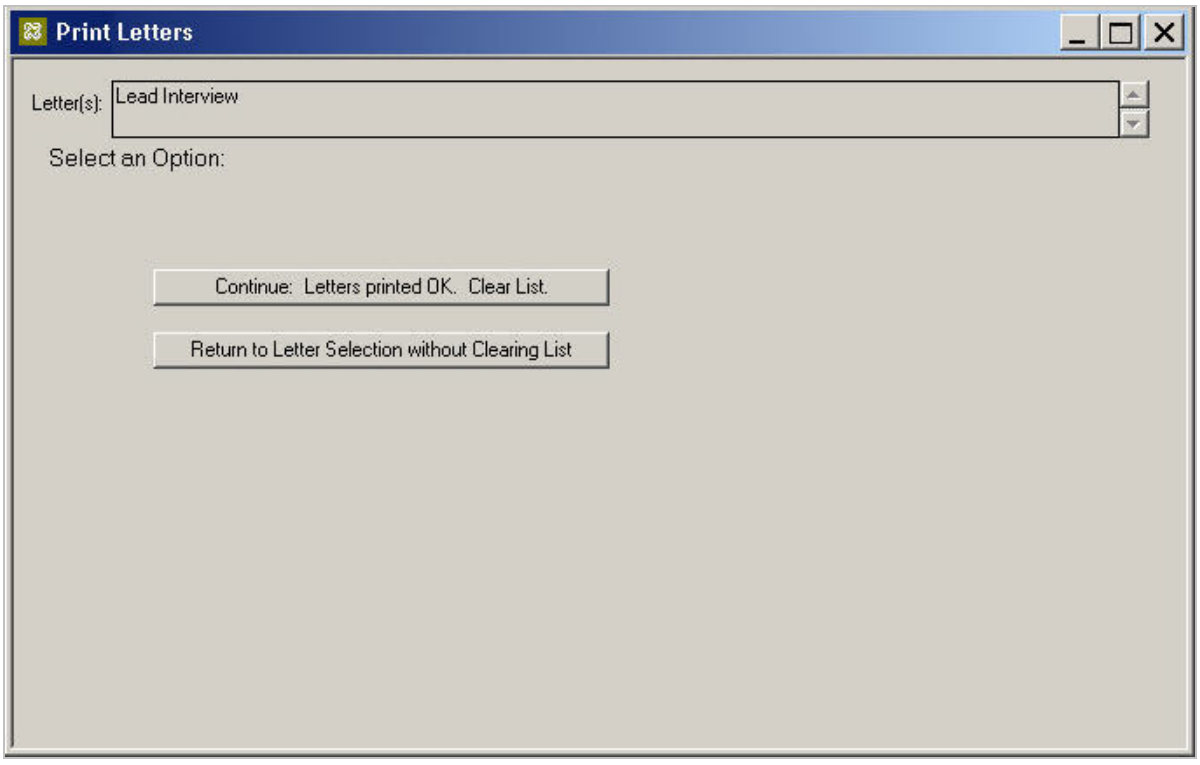
Refer to the Activities List topic for more information on setting up a letter activity. You must also write the form letter using the Edit Employer Letter option.

See Edit Letter, Clear Letter, Print Letter, Print Letter Overview, and Employer Letters Overview for additional information.

To print a letter:

1. Navigate to **Daily** > **Career Services** > **Print Employer Letters**. The Print Letters form is displayed. Only letters that are marked as Send to Employer are listed.
2. From the list of available letters, select one or more letters to print.
3. Click **Print Letters**. Microsoft Word displays your selected letters one after the other.
4. Check the letters and use the Microsoft Word print function to print the letters.
5. When you have finished printing, close the letters. Microsoft Word prompts you to save any changes you may have made (these are the merged letter files). Select **Yes** or **No**.

   Note: Microsoft Word may prompt you with a message asking if you want to replace the Normal.dot template file. Select **No** if you use a different Normal.dot template file than CampusNexus Student does.
6. You are returned to the Print Letters form. At the top of the form, a list of the **Letter(s)** that were selected to be printed is displayed, separated by semicolons.



7. Select **Continue: Letters Printed OK. Clear List.** if you want different employers to receive this letter the next

time it is printed);

- OR -

Select **Return to Letter Selection without Clearing List** if you want the same employers to get this letter the next time it is printed.

8. The Print Employer Letters process is completed after selecting an option, and you will be returned to the Print Letters form.

Update Placement Status / Advisors

CampusNexus Student enables you to perform batch status changes on students' placement status and/or change the advisors to which these students are assigned. If a student already has an assigned advisor on file, you can overwrite that assignment with this feature.

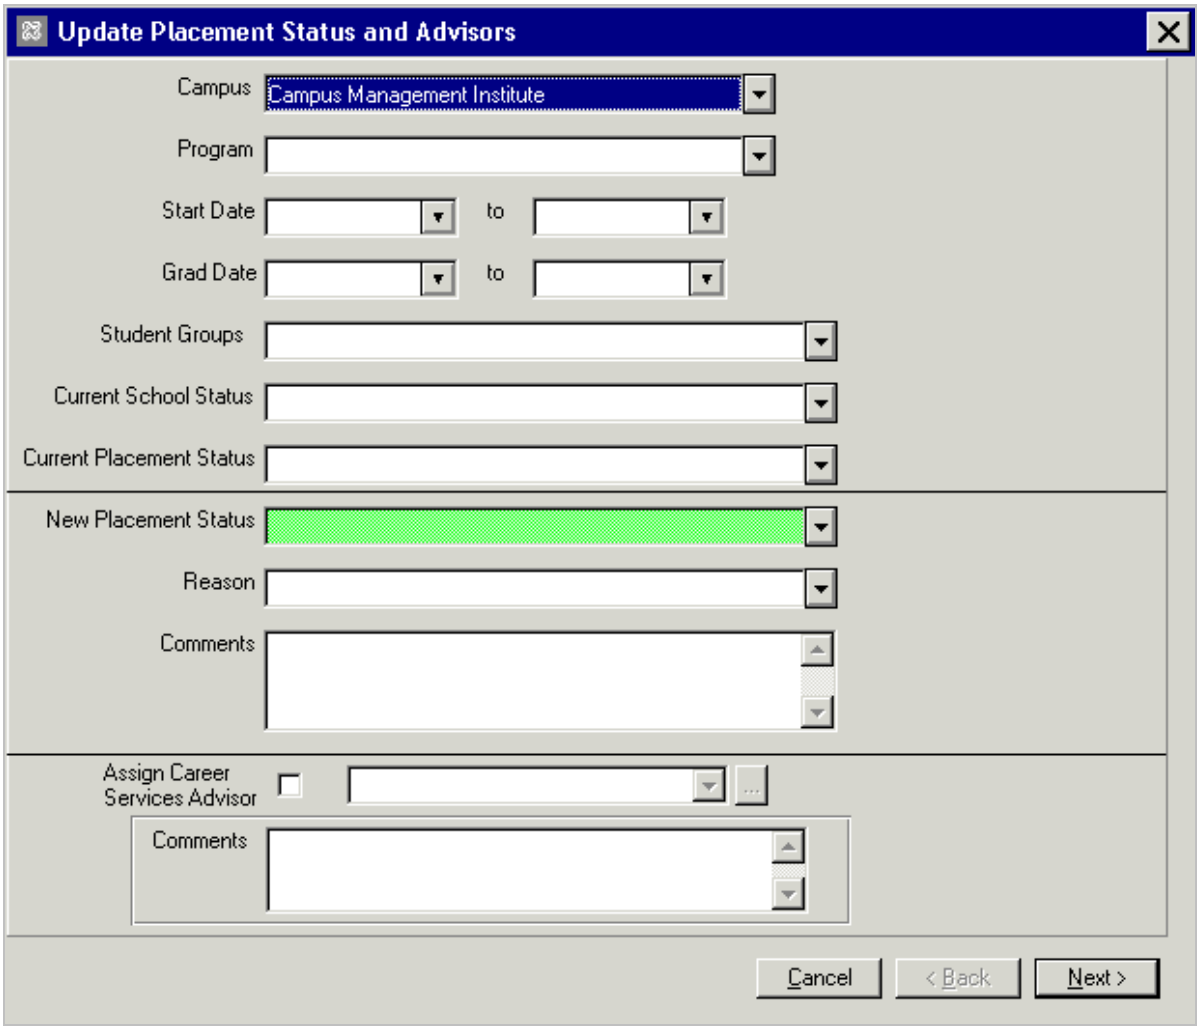
You can assign students to advisors automatically based upon their current status or placement **and** assign advisors, or just perform the batch placement status change.

Criteria for student placement include:

- Program
- Start Date range
- Graduation Date range
- Student Group
- Student Current Status
- Student Placement Status

To perform a batch status change to students' placement status:

1. Navigate to **Daily > Career Services > Update Placement Status/Advisors**. The Update Placement Status and Advisors form is displayed.



Select or enter information as required:

- **Campus** - Select the campus to which this process applies.
- **Program** - Select the course of study, which must be the same for all students in this group.
- **Start Date** - Select the date from the drop-down list when the change takes effect.
- **to:** - Select the date from the drop-down list when the change ends.
- **Grad Date** - Select the first date of the graduation date range from the drop-down list when graduation is expected.
- **to:** - Select the last date of the graduation date range from the drop-down list when the graduation is expected.
- **Student Groups** - Select the group to which the student belongs.
- **Current School Status** - Select Active, LOA, Being Processed, Drop, etc.
- **Current Placement Status** - Select Placed, Ineligible, Not Yet Placed, Waiver, etc.
- **New Placement Status** - Select Placed, Ineligible, Not Yet Placed, Waiver, etc.
- **Assign Career Services Advisor** - Select this check box to assign an advisor to this group. Remember, if an advisor has already been assigned to any of the students in this group, this procedure will overwrite the existing advisor assignment.

  Reassigning Activities

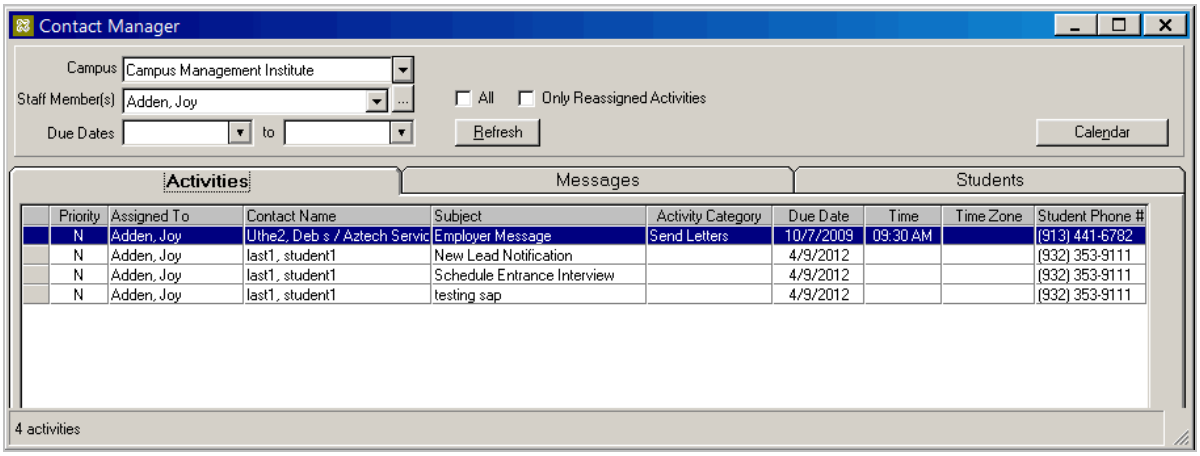
  When activities are reassigned from one staff member to another, the new staff member receives the message **Activities have been reassigned to you. Would you like to view them now?** The message is displayed the next time the staff member logs on to CampusNexus Student. The message is displayed only once.

  When activities are reassigned to multiple staff members, the message is displayed once to all members with the reassigned activities when they log on to the system. This is also true for multiple activities being reassigned to the same staff member – only one notification message is sent.

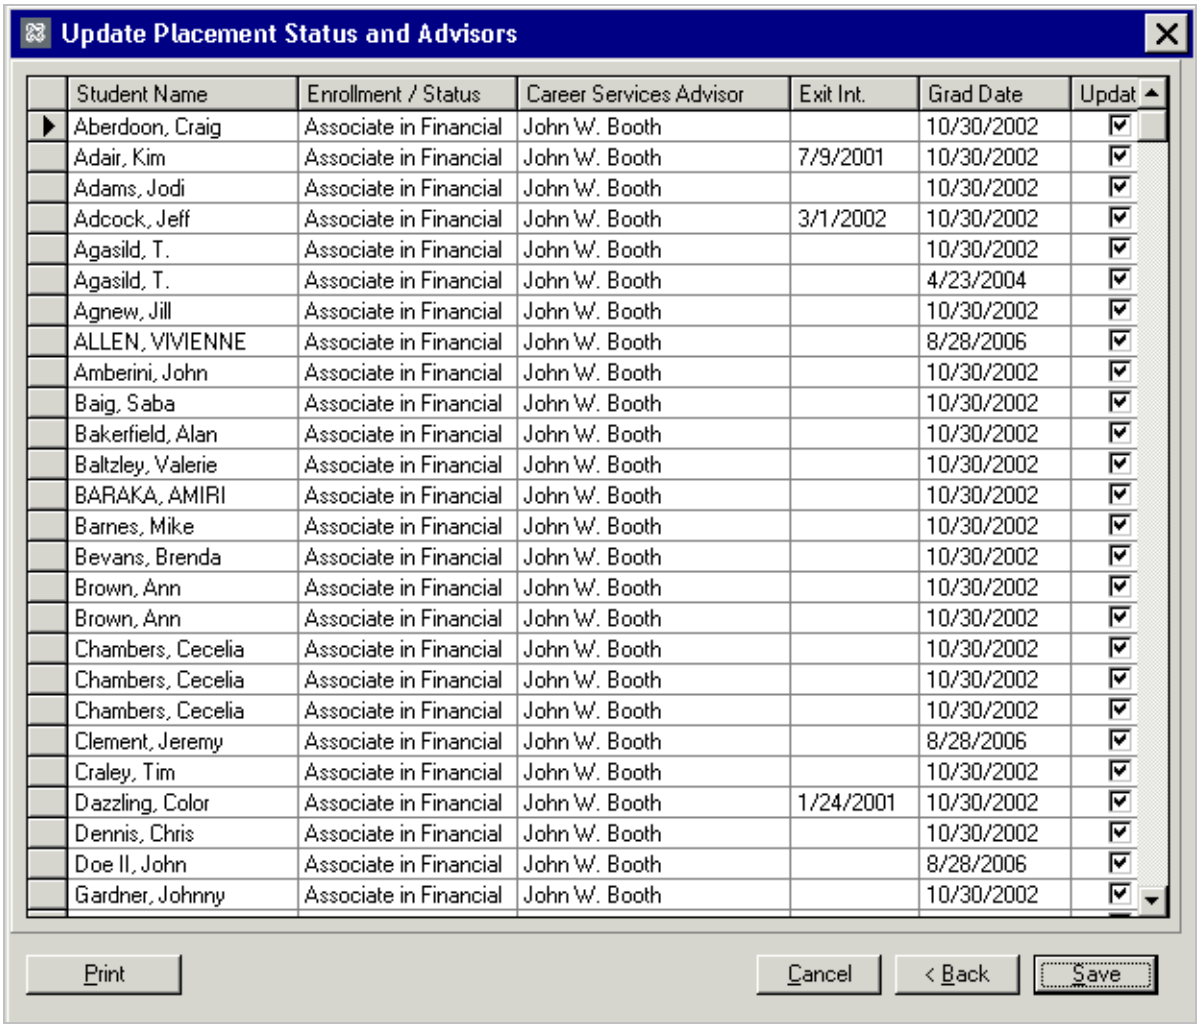
  If the staff member is logged on to the system and activities are assigned and the staff member sees the activities without logging off, then the message is be displayed the next time the staff member logs on to CampusNexus Student. If no activities reassigned to the staff member, the message is not displayed.

  When the notification message is presented, the staff member can view the newly assigned activities. If the staff member decides not to view the reassigned activities and clicks **No** on the notification message, Contact Manager displays *all* the activities listed.

  Note: By default, the **Only Reassigned Activities** check box is cleared. When selected, the check box is displayed only when the staff member selects the Activities tab. On the Activities tab, a new column **Reassigned Date** has been added.



If you select the **Assign Career Services Advisor** check box, an Advisor field is displayed. Use the **Browse** button to the right of the field to select an advisor. Click **Next** to see a list of all students in this group assigned to this advisor.



2. To disassociate an individual student from this advisor, clear the **Update** check box.
3. Click **Save** to keep your changes. A verification message indicates the number of records that were updated and

prompts you to continue.

4. Select **Yes** to continue or select **No** to stop the process. If you select **Yes**, a verification message indicates that all statuses and placements were updated.
5. Click **Finish** to close the form.
6. Click **Print** to generate a Placement Batch Status/Advisor Update report listing all students assigned to this advisor and their statuses.

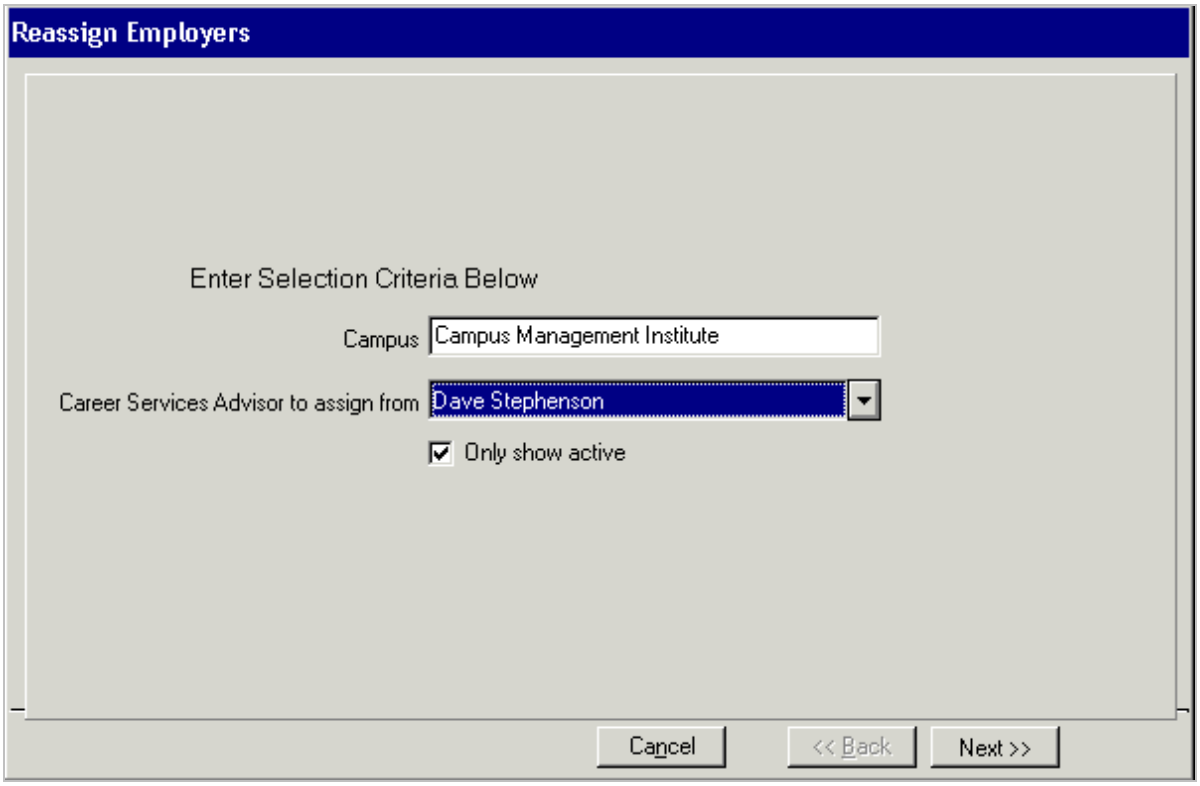
Reassign Employers

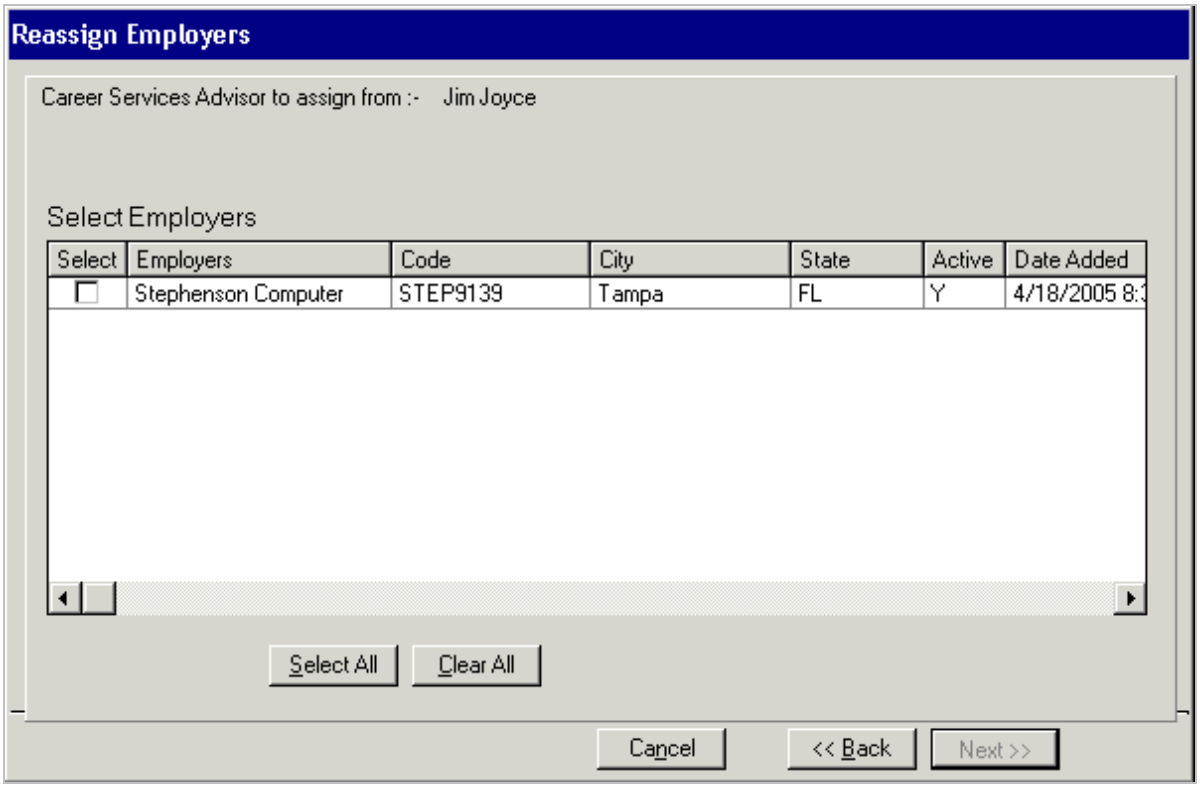
When staff changes, it may be necessary to reassign employers from one Career Services Advisor to one or more other advisors. A wizard enables you to reassign employers.

To reassign employers from one advisor to one or more other advisors:

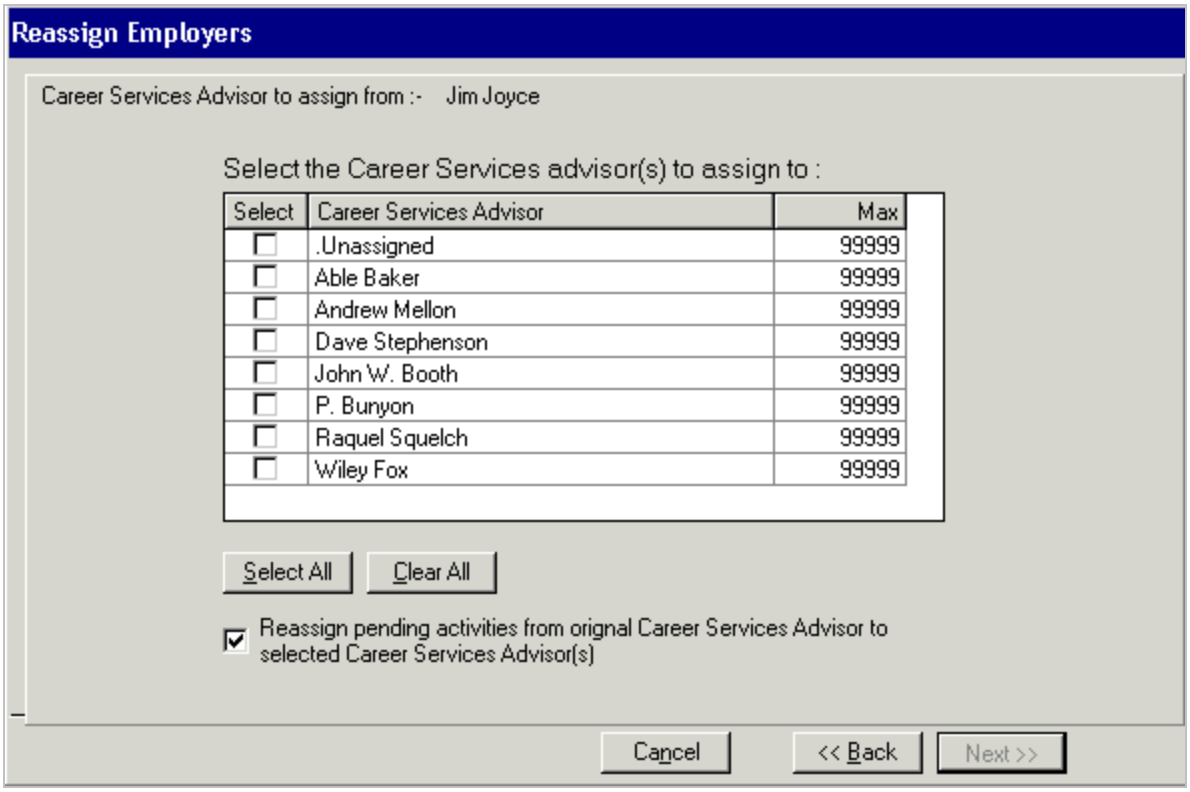
1. Navigate to **Daily > Career Services > Reassign Employers**. The first page of the Reassign Employers wizard is displayed.



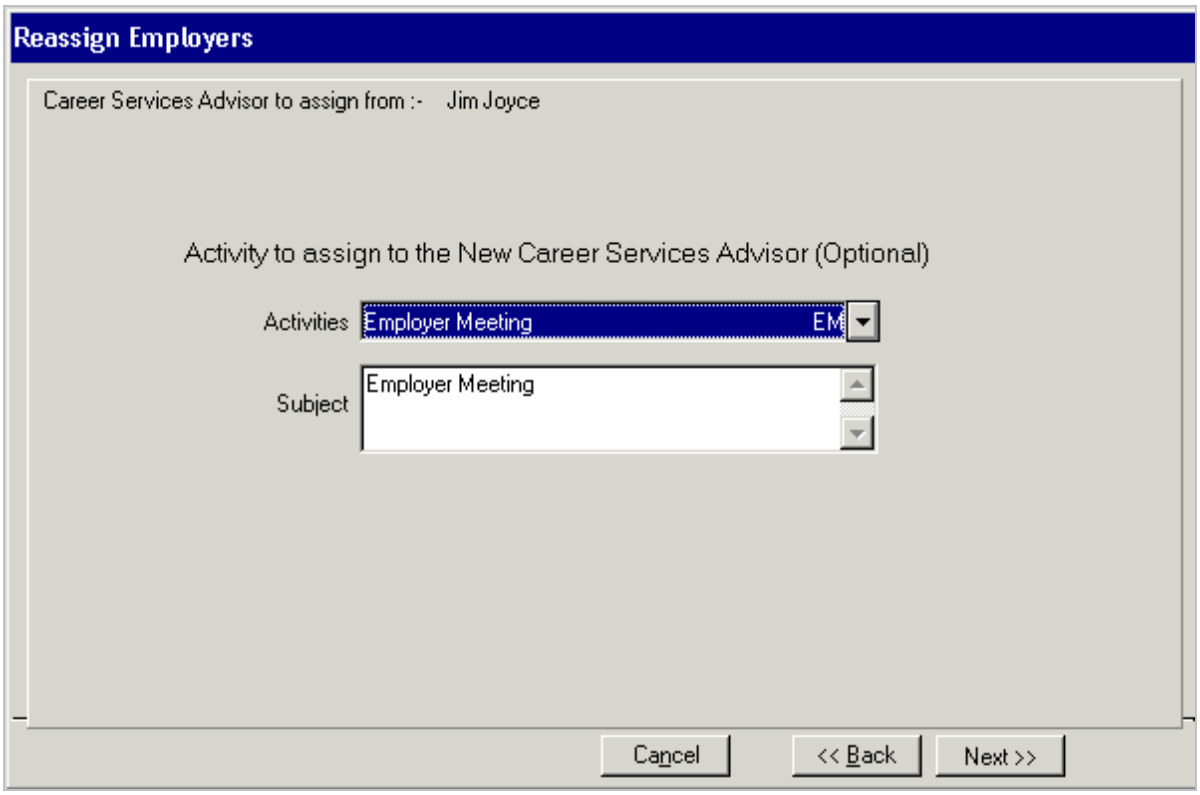
2. Select the campus where the reassignment will occur from the **Campus** field.
3. Select the Career Services Advisor whose employers are being reassigned. You can filter the drop-down list of advisors to show only active advisors by using the **Only show active** check box.
4. Click **Next** to proceed.



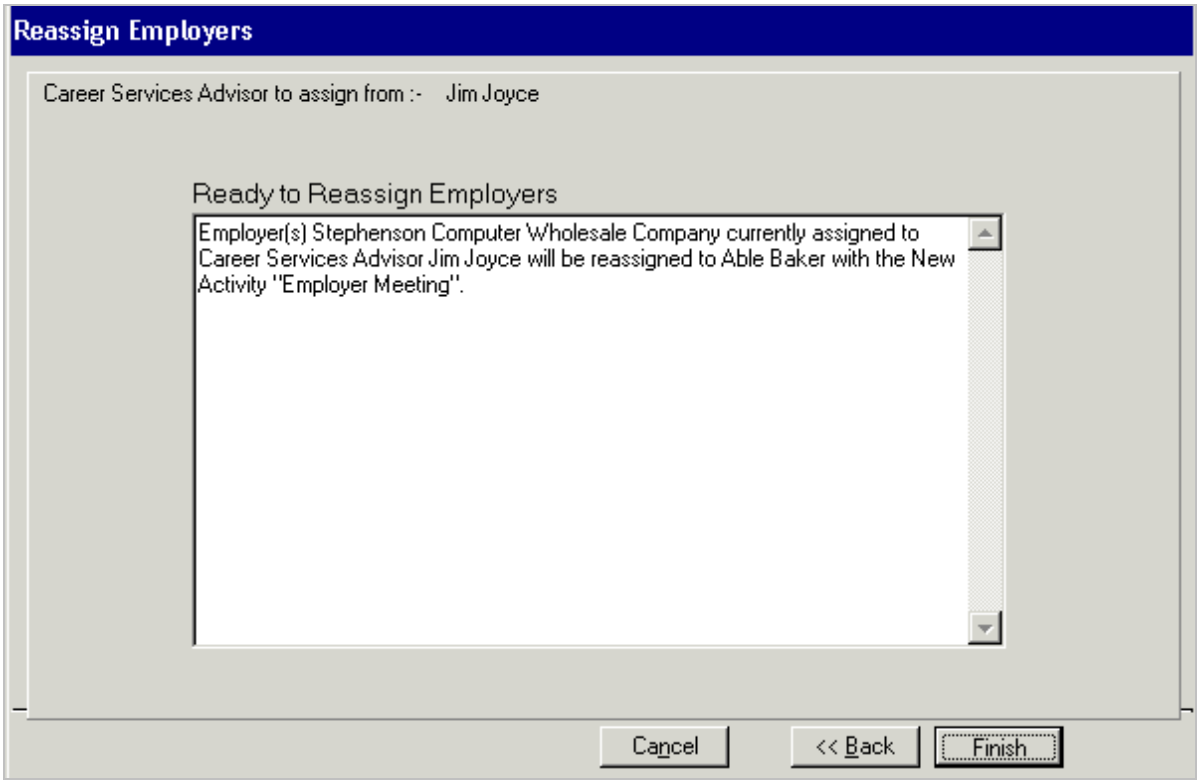
5. When the list of employers is displayed, use the **Select** box to select the employers to be reassigned.
6. Click **Next** to proceed.



7. Select the advisor who will be assigned the employers selected in the previous step. If there are multiple employers, select multiple advisors and distribute the employers among the new advisors using the **Max** field.
8. If any pending activities from the original Career Services Advisor are to be reassigned to the new advisor(s), select the check box at the bottom of the form.
9. Click **Next** to proceed.



10. Select which activity will be reassigned to the new advisor(s).
11. Click **Next** to proceed.



12. A message is displayed describing the selections you have made using the wizard.
    - If the selections are correct, click **Finish**. A "Processing..." message is displayed.
    - Click **Back** to return to the form where you need to make a change, and continue as before.
13. The final step of the wizard displays a confirmation message. Click **Close** to close the form.

Process Online Employers

Employers can register and create a profile online via the Employer Signup Page of Portal. It is the responsibility of authorized school staff to view employer records submitted online, identify possible duplicate records, and approve or reject any record. Staff must also verify via a school-defined process that campus assignment to employers meets the school's business practices.

Note: Before employers can be processed online, the Employer Code Option, Employer Code Format and Enable Duplicate Employer Check must be configured in the Placement Settings form (**Setup > Career Services > Settings tab**).

Employer Registration

Employers register as follows:

1. The employer navigates to the Employer Signup Page of Portal. The system displays a form in which the employer enters all required data and submits the form.
2. If all required information was supplied, the employer receives a confirmation indicating that the form was transmitted to the school. Otherwise, the employer is prompted to provide information in all required fields.
3. Employers are saved to a temporary employer table in CampusNexus Student with the default campus configured at the URL

Employer Processing

To add a new employer:

1. Navigate to **Daily > Career Services > Process Online Employers**. The Process Employers form is displayed.
2. If there are duplicate employer records, the system displays the warning: "The system found duplicate records among your selected employers. Please select OK to process duplicates and resolve all irregularities before proceeding."

   You must resolve any duplicate employer registrations before proceeding. Click **OK** to do so. The Process Duplicate Employees form is displayed. All duplicate records are displayed in the grid in the top of the form

   a. Select a record and choose one of the following options:

      - Select **Discard Duplicate Employer** to remove the record.
      - Select **Create New Employer Record** to let the duplicate remain in the system.

        Note: If an employer has multiple locations, the system could read this as a duplicate, even though it is not. In this case, select Create New Employer Record.
      - If the duplicate record is associated with a campus to which you do not have access, select **Request for Record Change**. If you choose this option, you must assign a Contact Manager activity - an Employer Email- to a staff member requesting the record change. Type a message to the staff member in the Message field.

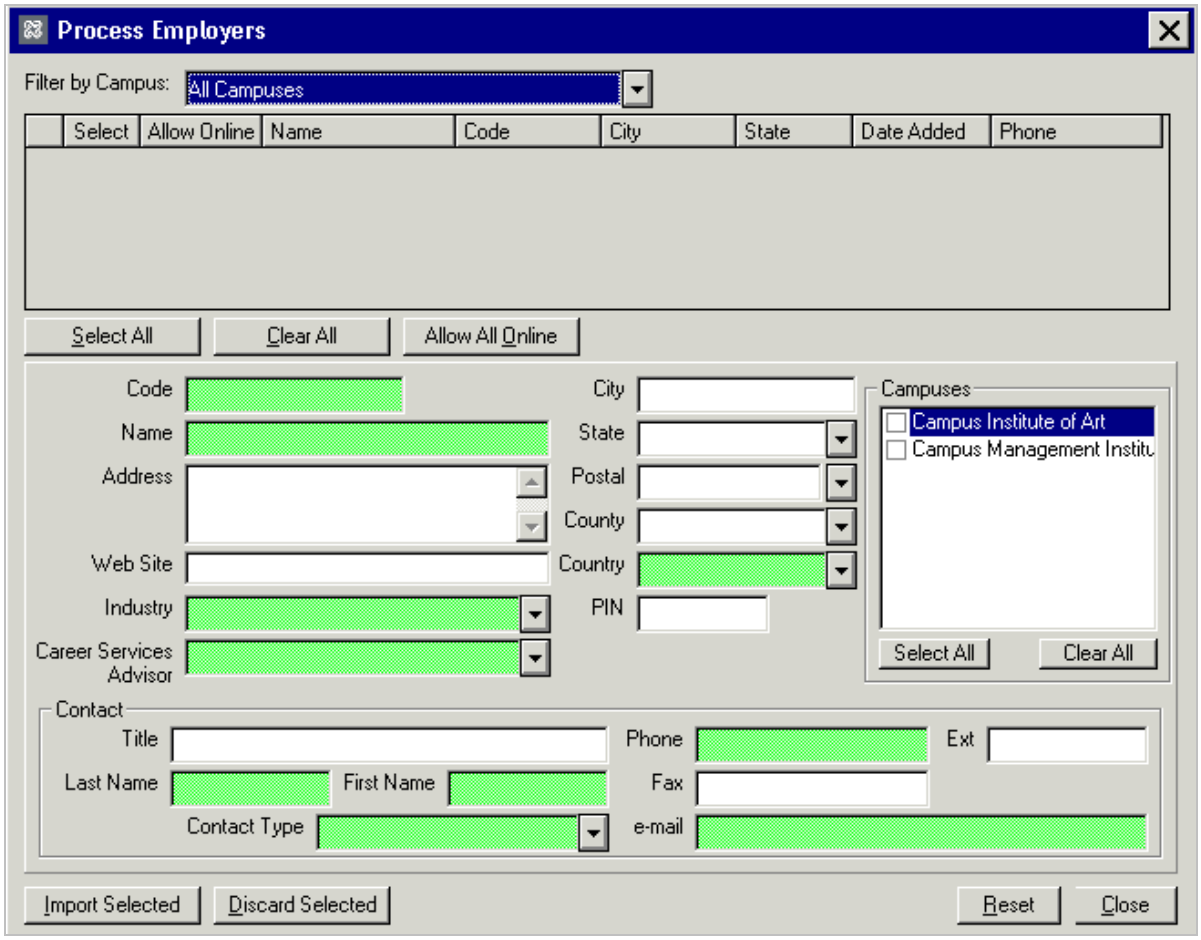
   For speed and ease of use, you can use the button **Discard All Duplicates** to remove redundant records from the queue.

   b. Select/clear the check boxes in the Campuses field to indicate the campuses to which you want to associate this employer. For speed and ease of use, you can use the buttons to **Select All** or **Clear All**, if

appropriate.

c. Click **Process** to save your changes.

3. If there are no duplicates in the queue, the system displays the **Process Employers** form.



Work with the fields on the Process Employers form as appropriate:

- **Campus**: Select the allowable campus based on security. For multiple campuses, use the check boxes in the Campuses field.
- **Select**: Select the employer with which you want to work.
- **Select All**, **Clear All**, **Allow All Online**: Use these buttons to perform the same action on all employers in the queue.
- **Allow Online**: Imports and processes employer. Employer is immediately accessible online. Typically, schools import employers and review during a school-defined grace period prior to granting online access.
- **Code**: The system assigns a code to each employer who registers online. This is a read-only field.
- All other employer information fields (Name, Address, website, and so on) are populated with information from the Employer Sign up page. These fields are editable by authorized staff users.
- **Career Services Advisor**: Use the drop-down list to assign a staff member to this employer.

- **PIN**:The personal identification assigned to the employer.
- **Campuses**:Select campuses to associate with this employer. Use **Clear All** and **Select All** if appropriate.
- **Import Selected**:Click to add the employers selected in the grid to add them to the CampusNexus Student database.
- **Discard Selected**: Click to remove from the system the employers selected in the grid.
- **Reset**: Click to undo any changes you have made since opening this form.
- **Close**: Click to exit this form after you have imported/edited and discarded employers, as required.

4. Following the successful online processing of an employer, users can select an option to grant online access to the employer. The system will generate a Contact Manager activity; an email to the new employer which will include a user name and password.

Daily > Loan Management

The Daily > Loan Management submenu options are as follows:

- Document Tracking
- Status Update
- <Detach> (This options detaches the submenu.)

Document Tracking

Institutions request documents from students and persons or organizations connected with the student. Use Document Tracking to keep track of the documents that are necessary for processing student records in an orderly fashion.

Document Tracking is available in the following modules:

- Admissions - AM
- Financial Aid - FA
- Student Accounts - SA
- Academic Records - AD
- Loan Management - LM
- Career Services - PL

You can use the Daily > Document Tracking feature to look at all documents of a certain type to determine the document's status for each student.

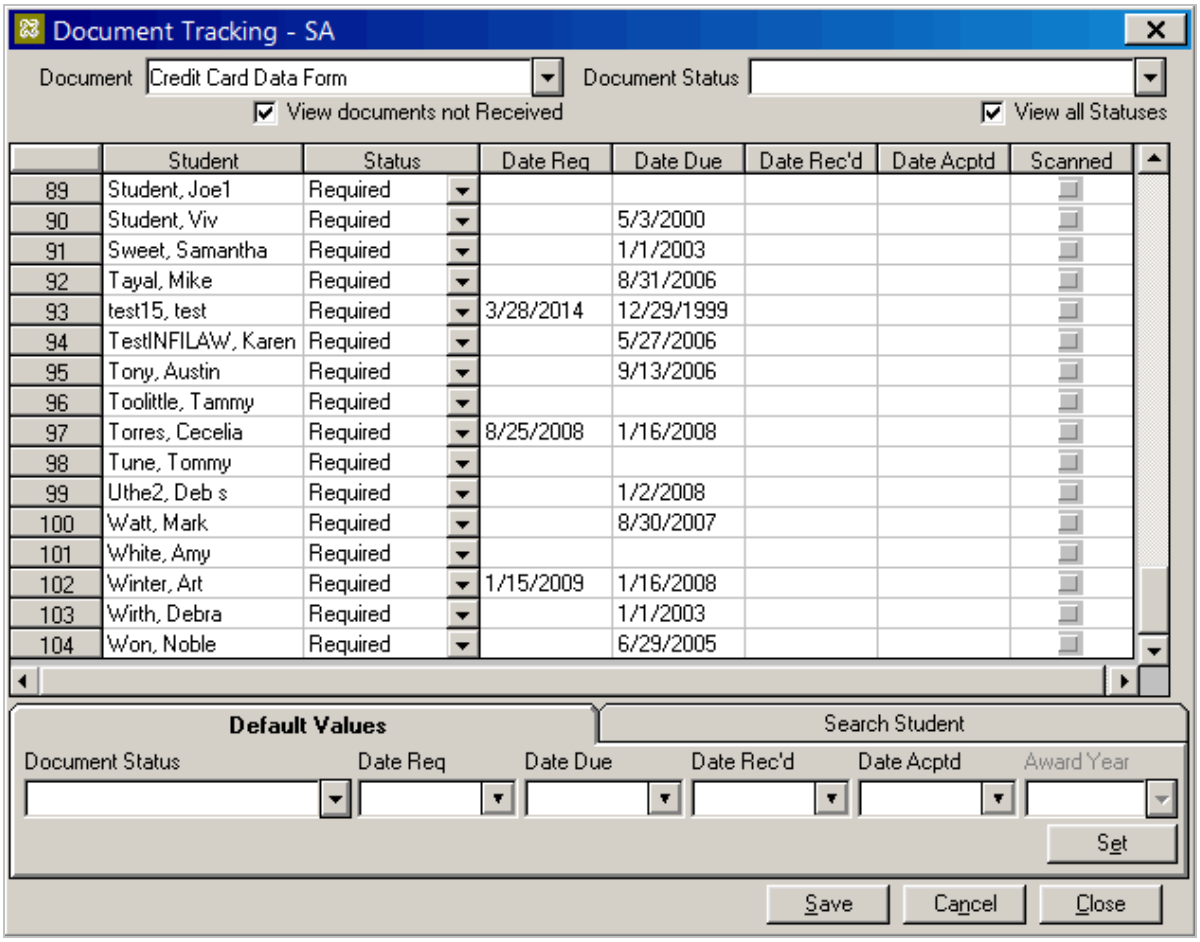
Several documents relate to academic or demographic history and your organization must have copies of them for each student. Examples are birth certificates, driver's licenses, transcripts, alien registration cards, social security cards, etc. Management policy determines which documents are important at your institution.

You can set up lists of these documents and assign them to each student record. You can then record the current status of the documents, the date you requested each document, and the date you received each document. You can also indicate that the document has been scanned into your electronic filing system.

Note: This approach differs from the Document Tracking option that you can access from the View > Contact Manager menu or Student Bar. When you access Document Tracking from the Student Bar, all documents related to a specific student as displayed. Here, you see all students related to a given document.

To edit tracking data for listed documents:

1. Navigate to **Daily > Admissions** (or other module) **> Document Tracking**. The Document Tracking form is displayed.



2. Select a **Document** from the list box at the top of the form. All students having the selected document related to their files are listed on the form.
3. Select or clear **View Documents Not Received**.
   - If the check box is selected, only those documents that have not been received are listed.
   - If the check box is cleared (default), all documents (subject to your Document Status selection) are listed.
4. For Document Tracking in Financial Aid - FA, select an **Award Year** to which the documents apply.

   Note: If you choose a Financial Aid document that does not have the "Award Year Specific" flag selected (indicating Yes) on the Document Setup, the form is displayed with the three Award Year fields disabled.
5. Select or clear **View All Statuses**.
6. Select an optional **Document Status**. If you select a document status, CampusNexus Student lists only the type of document you selected and only those that have the selected status.
7. From the displayed list, find a student document.
8. Click on a field in the row you want to update. You can update the following fields:
   - Status
   - Date Requested
   - Date Received
   - Date Due

- Date Accepted
- Scanned

Note: In date fields, you must enter the century along with the year. For example, 06/30/2000. If you just enter 99 instead of 1999, CampusNexus Student will reject it.

9. Click **Scanned**, if necessary, to indicate that you have scanned the requested document into your electronic filing system.
10. The **Default Values tab** enables you to update statuses and dates in batches.

    If you select a Status, or a Date Due, or Award year, for example, CampusNexus Student updates the values of all students whose names appear in the grid. Click **Set** to update the values and save your work.
11. The **Search Student tab** enables you to search a student using the Social Security Number (SSN) or Student ID.

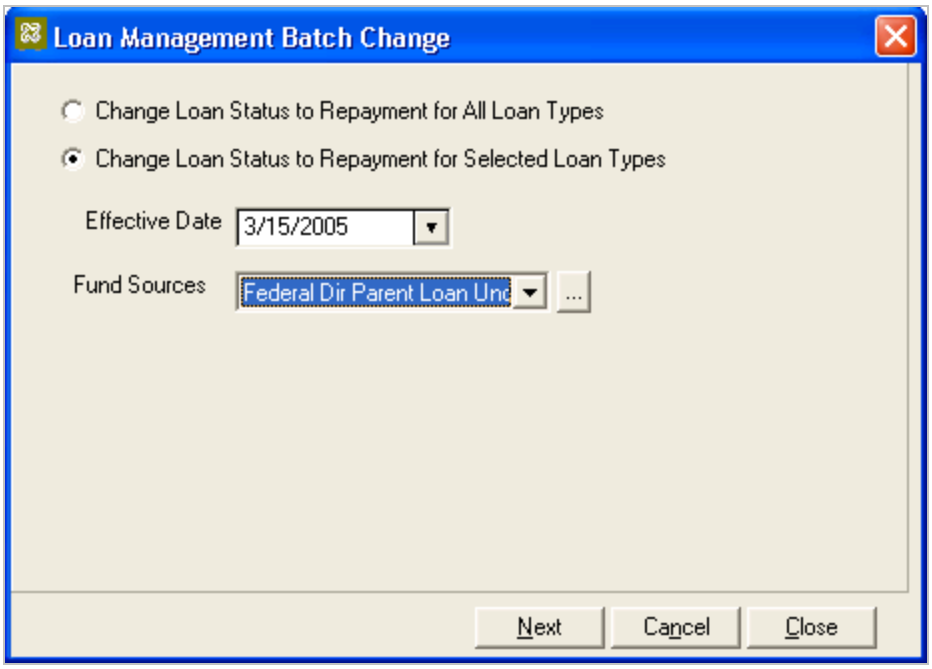
    Type the SSN or ID and click **Filter**. CampusNexus Student finds the student associated with that number and displays only that student's name and information in the grid. Click **Clear Filter** to remove the filter. The grid revert to the previous display of students.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Status Update

This option opens a wizard to make batch changes of the loan status to groups of loans. The wizard will list all loans with a status of Grace Period that have a repayment date on or before the date entered. The status of all loans (Students) not removed from the list will be changed to Repayment.

To run the Status Update wizard:

1. Navigate to **Daily** > **Loan Management** > **Status Update**.



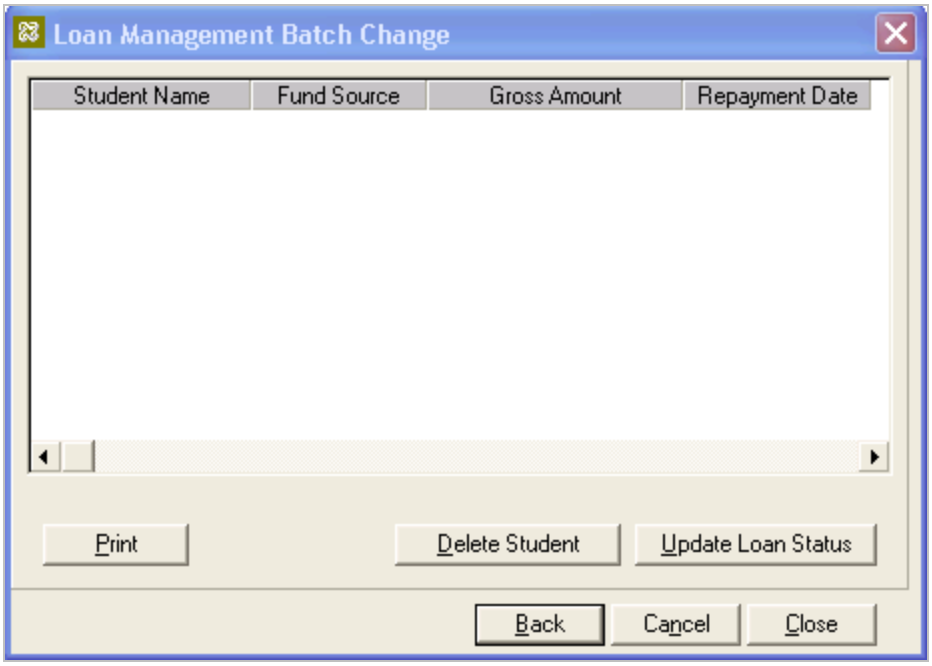
2. Select **Change Loan Status to Repayment for All Loan Types** or **Change Loan Status to Repayment for Selected Loan Types**.

   Enter an Effective Date.

   If you selected the second option above, select the Fund Sources for which to make the changes.

   Click to select more than one fund source.

3. Click **Next** to continue.



The next page of the wizard lists all loans with a status of Grace Period that have a repayment date on or before the date entered. The status of all loans (Students) not removed from the list will be changed to Repayment when you click **Update Loan Status**.

4. Select a student on the grid and click **Delete Student** to remove the record from the list to be updated.
5. Click **Update Loan Status** to continue with the update procedure. A record is added to the Loan Management Status Change history table for each loan updated in this procedure.
6. Click **Print** to print the list. The report will list the data on the grid plus the Student ID field. You can create a student group from the report.
7. When the update procedure is finished, the program will display a message "999 loans updated. OK to Print Report?" If you have not already printed a report, do so now. The **Finish** button is then enabled.
8. Click **Finish** to close the form.

Daily > Student Services > Batch Assign Services

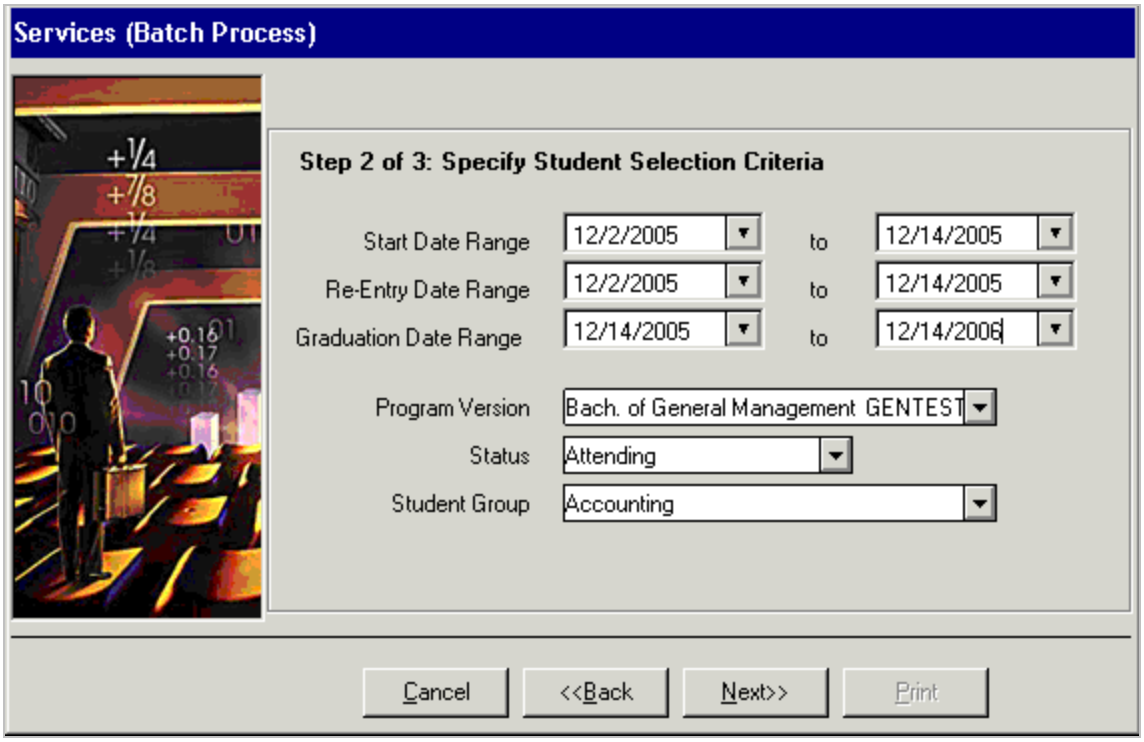
The Batch Assign Services option provides a means of assigning a student service to a group of students selected by specifying filtering criteria. Services can be assigned to students who are members of a group, or who started within a specific date range, or many other options described below. When you complete the wizard, the specified service will be assigned to all the students you selected.

To assign services in batch mode:

1. Navigate to **Daily > Student Services > Batch Assign Services**. The Services (Batch Process) Wizard is displayed.

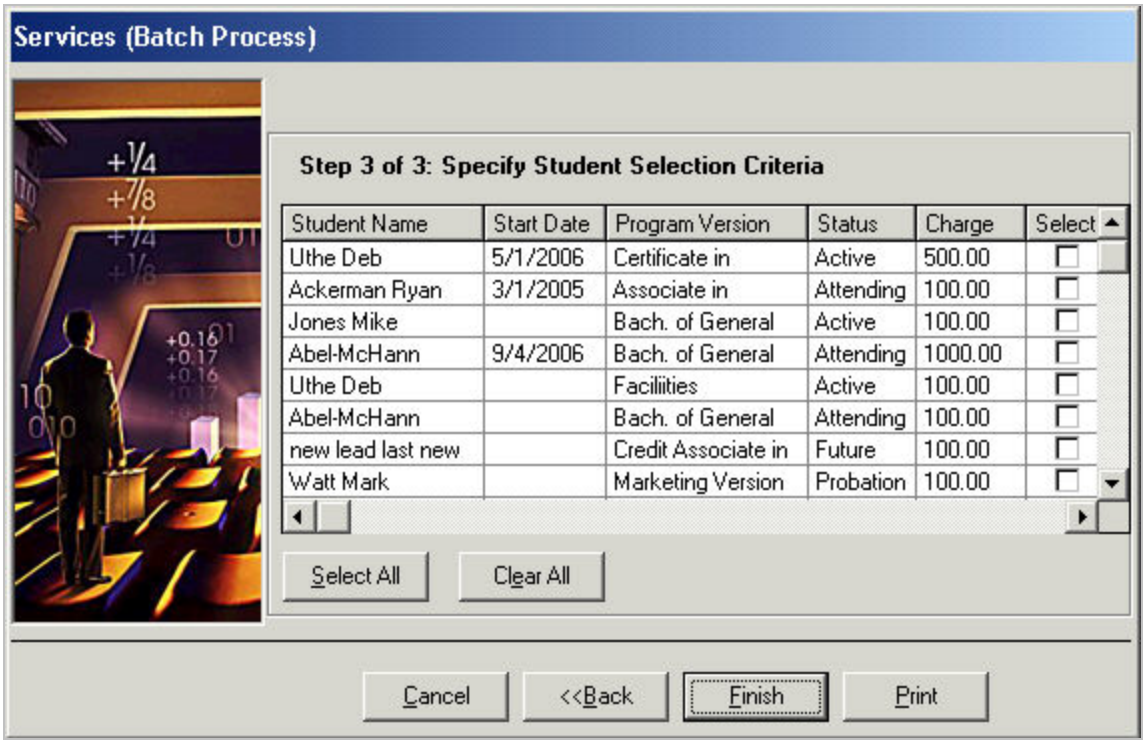
   Note: The selections that you make in the **Step 1 of 3: Select Service Category, Service, and Term** screen will be applied to the students selected in this wizard.

2. Select a **Service Category** from the drop-down list of Service Categories that have been configured.
3. Select a **Service** from the drop-down list of Services that have been configured.
4. Select a **Term** drop the drop-down list of Terms that have been configured.
5. Click **Next >>** to continue. Step 2 of 3: Specify Student Selection Criteria is displayed.

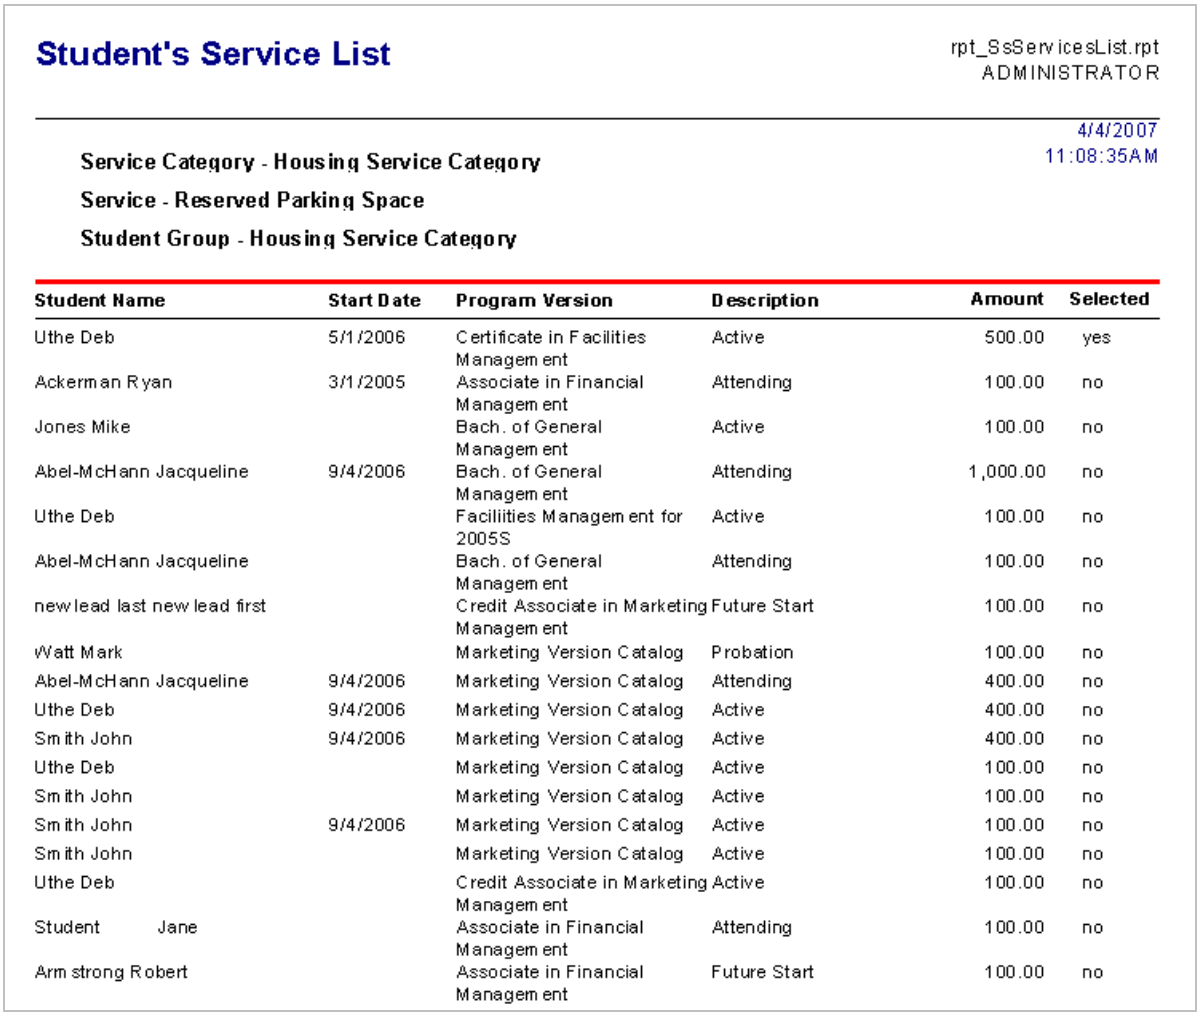


Note: If *all* selection criteria fields are left blank, then *all* students within the active campus will be included in next step of the wizard and are available for selection.

6. Optional: Select a **Start Date Range**. Only students that started within the specified date range will be included in the batch to assign services. If this field is left blank, *all* start dates are eligible.
7. Optional: Select a **Re-Entry Date Range**. Only students that re-entered within the specified date range will be included in the batch to assign services. If this field is left blank, *all* re-entry start dates are eligible.
8. Optional: Select a **Graduation Date Range**. Only students that graduated within the specified date range will be included in the batch to assign services. If this field is left blank, *all* graduation start dates are eligible.
9. Optional: Select a **Program Version**. Only students that started within the specified date range that you selected above, and are in the program version that you select here will be included in the batch to assign services. If this field is left blank, then *all* program versions are eligible.
10. Optional: Select a **Status**. Only students that started within the specified date range that you selected above, and are in the status that you select here will be included in the batch to assign services. If this field is left blank, then *all* statuses are eligible.
11. Optional: Select a **Student Group**. Only students that started within the specified date range that you selected above, and are in the Student Group that you select here will be included in the batch to assign services. If this field is left blank, *all* student groups are eligible.
12. Click **Next >>** to continue. Step 3 of 3: Specify Student Selection Criteria is displayed.



13. Click **Select All** or **Clear All** to select or clear all students at one time, or select or clear student individually using the student's **Select** check box.
14. Click **Print** to print the **Student's Services List** report.



Student's Service List

Uthe Deb		Credit Associate in Marketing Management	Active	100.00	no
Student Jane		Associate in Financial Management	Attending	100.00	no
Armstrong Robert		Associate in Financial Management	Future Start	100.00	no

15. Click **Finish**. All selected students will be assigned to the service selected in Step 1 of the wizard.
16. Click **<< Back** to return to the previous screen or **Cancel** to exit the wizard.

Daily > Housing

The Daily > Housing submenu options are as follows:

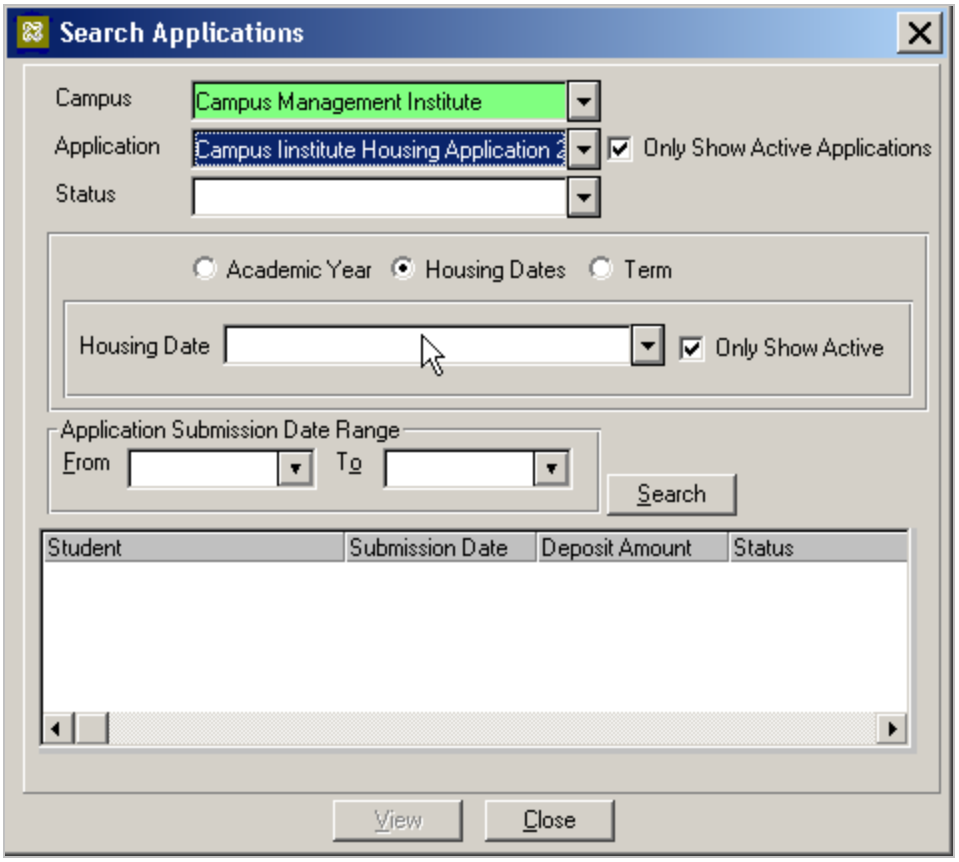
- Application
- Roommate Matching
- Post Rent Charges
- Batch Move Out/Renewal
- <Detach> (This options detaches the submenu.)

Search Applications

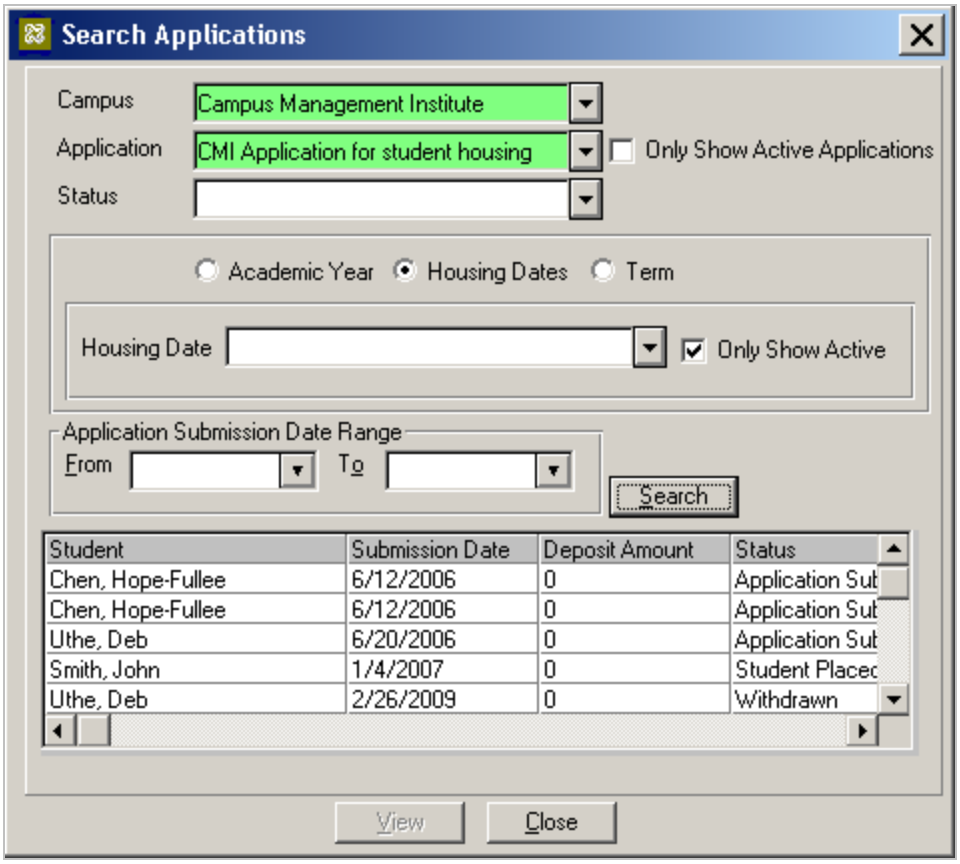
Use this form to search and view housing applications submitted by students.

To search and view housing applications submitted by students:

1. Navigate to **Daily > Housing > Application**. The Search Applications form is displayed.



2. Select the **Campus** for which you want to view submitted housing applications. When you select a campus, the housing applications associated with the campus are listed in the **Application** drop-down list. Select the housing application you want to view.
3. Select the **Status** of the housing applications you want to view.
4. Select **Academic Year**, **Housing Dates** or **Term**.
    - If **Academic Year** is selected, enter a **From** and **To** date range defined using the pop up calendar.
    - If **Housing Dates** is selected, select the applicable **Housing Date** from the drop-down list.
    - If **Term** is selected, select the applicable **Term** from the drop-down list.
    - Select the **Only Show Active** check box, if you only want to see housing dates or terms that are active, depending on your selections.
5. Select the **Application Submission Date Range** for the housing applications you want to view.
6. Click **Search**. Housing applications matching your search criteria are listed on the Applications form.



Multiple leases are displayed for Academic Year based applications, if they belong to an application that matches the criteria.

An Application search based on Academic Year will be done on a full month. For example entering a Search date with the following values - From: 4/15/2010 To: 1/5/2011 - will return all Academic Year based applications from 4/1/2010 to 1/31/2011.

7. To view an application, select the application and then click **View**. The submitted application is displayed. This form is read-only. The **Submit** button is disabled on this form.
8. Click **Close** to close the form.

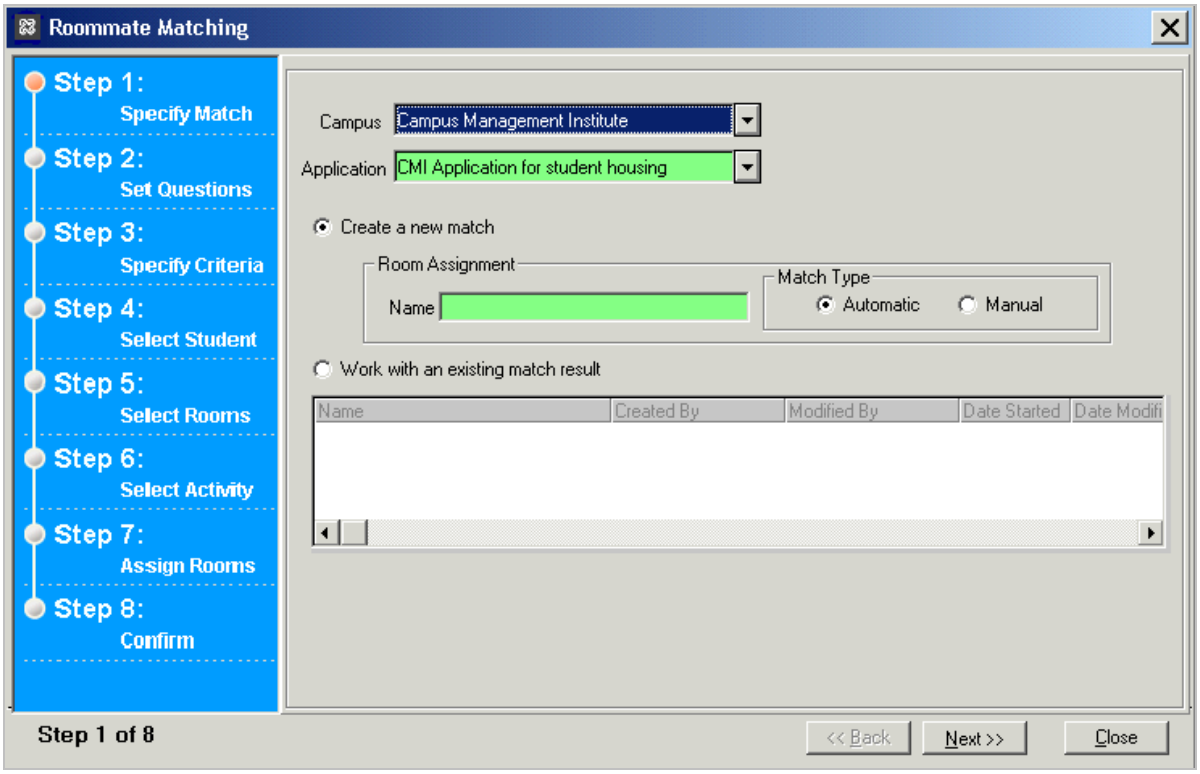
Roommate Matching

The Roommate Matching Wizard automates the process of sifting through housing applications for a campus. You can use this wizard to find students who are eligible for housing and then assign suitable rooms and roommates to them accordingly.

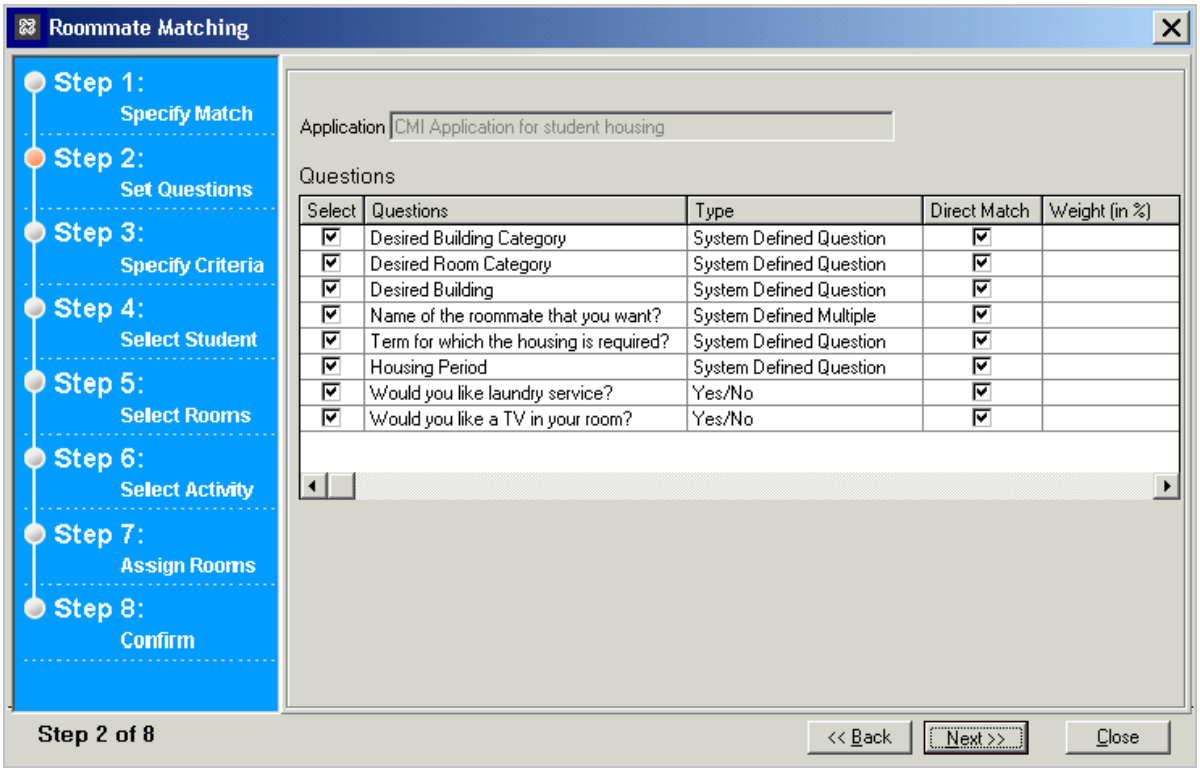
The Roommate Matching Wizard allows you to define the criteria to filter all the students who have applied for housing facilities in a campus and find those students who are eligible for housing. Next, you are provided with a list of available rooms for eligible students. You can then place the eligible students in these rooms and finally confirm a lease to be created using Roommate Matching for placed students.

To run a roommate match:

1. Navigate to **Daily > Housing > Roommate Matching**. Step 1 of 8 of the Roommate Matching Wizard is displayed.



2. Select the **Campus** for which you want to run the roommate match. When you select a campus, the active application associated with the campus is automatically populated in the **Application** filed. However, to run the match for an inactive housing application associated with the campus, select the inactive application from the drop-down list.
3. If you are creating a new match, select the **Create a new match** option button, and then enter a **Name** for the new match.
4. Select the match type as **Automatic** or **Manual**.
5. If you have previously run a match and saved it before completing the eight steps of the wizard, it is listed in the screen. To complete such a match, select the **Work with an existing match result** option button, and then choose an existing match from the list. The **Campus** and **Application** fields are automatically updated in this case. The list of saved roommate matches is displayed based on the campus selected.
6. Click **Next**. Step 2 of 8 of the Roommate Matching Wizard is displayed.



7. Step 2 lists all the questions with the status as **Active** included in the housing application you selected in step 1. Include or exclude the individual questions by selecting or clearing the **Select** check boxes accordingly.

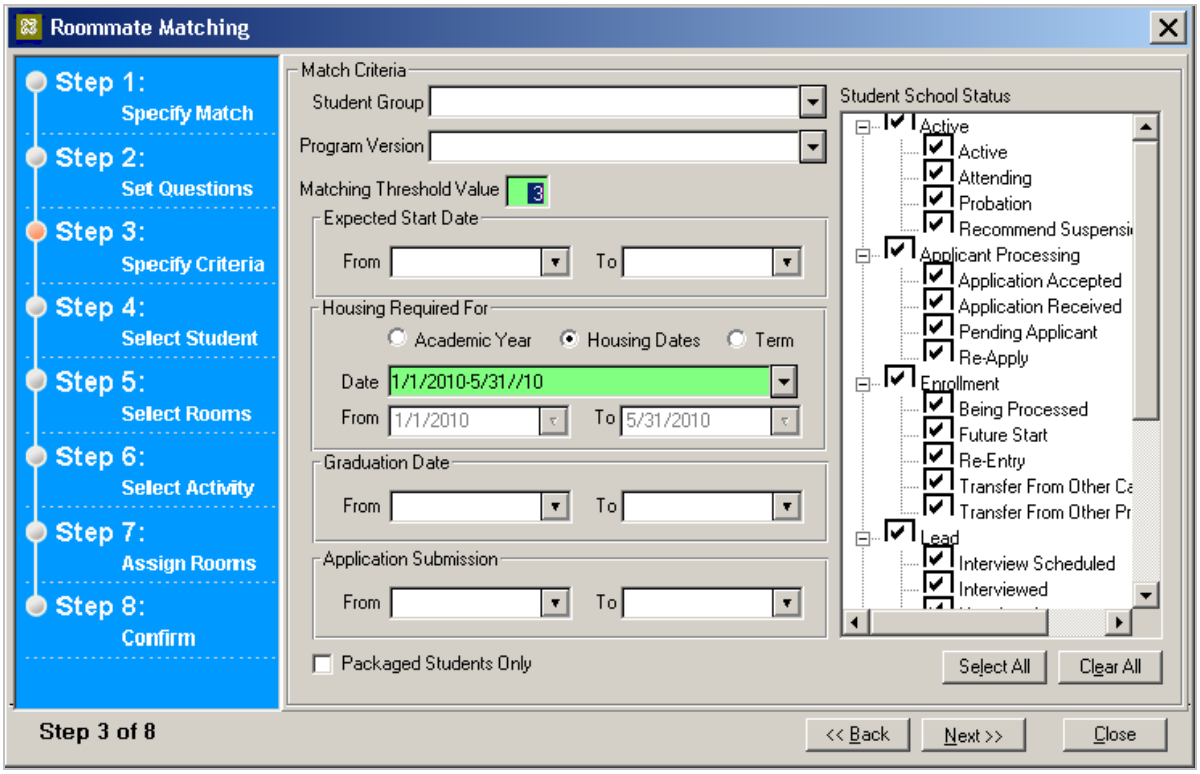
   Note: If you selected Match Type as **Automatic** in step 1, the following questions must be part of the student's Housing Application and must also selected in the wizard:

   - Desired Building Category
   - Desired Room Category
   - Desired Building
   - The name of roommate must be set to NO.

8. Define the following attributes for the selected questions. You will not be allowed to attribute both **Direct Match** and **Weight (in%)** at the same time to a selected question.

   - **Direct Match**: If you enable the **Direct Match** check box for a question, it implies that the answer for the question has to directly match for two students to be considered as roommates.
   - **Weight**: For such questions that do not need to match directly but need to be considered in the roommate matching process, provide the weight in percentage that the question holds in the **Weight (in %)** column. The sum of the weights assigned to such questions cannot exceed 100%.

9. Click **Next**. Step 3 of 8 of the Roommate Matching Wizard is displayed.



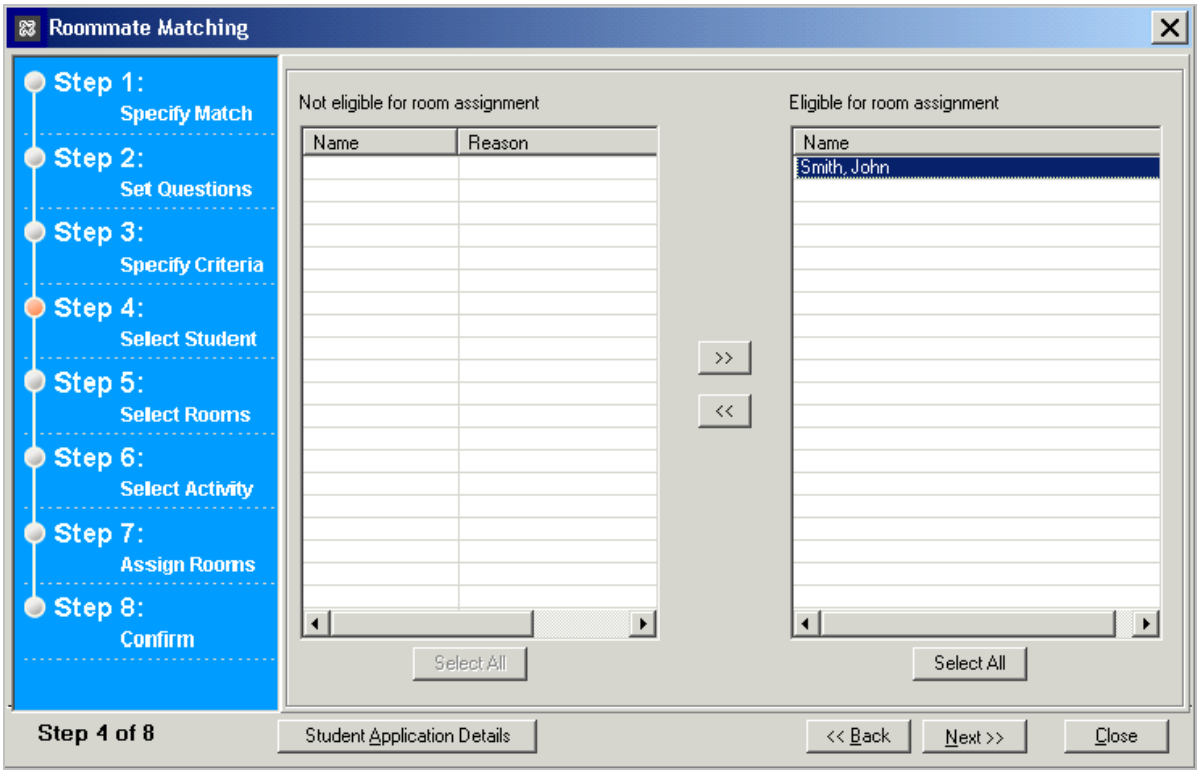
Note: If you are working with an existing match, you cannot edit the data in **Step 3**.

10. Specify the relevant match criteria in the various fields on this screen. These criteria are used to identify students eligible for the roommate match, out of all the students who have submitted applications. Those students who have not deposited the application fee (in case application fee was required while submitting the application) and/or are not packaged would not be considered eligible. For information about how to override the deposit and packaging validations, please see the Housing Setup topic located at Setup Menu > Housing > Housing Setup.

    Running the wizard using the Academic Year selection, select one of the following dates to filter the housing applications: **Expected Start Date**, **Housing Required For**, **Graduation Date**,**Application Submission**. If **Housing Required For** dates were selected, the system will gather students whose housing application is Academic Year Based and where the Academic Year is within the months specified. For example: Search date From: 4/15/2010 To: 1/5/2011 will return all Academic Year based applications from 4/1/2010 to 1/31/2011.

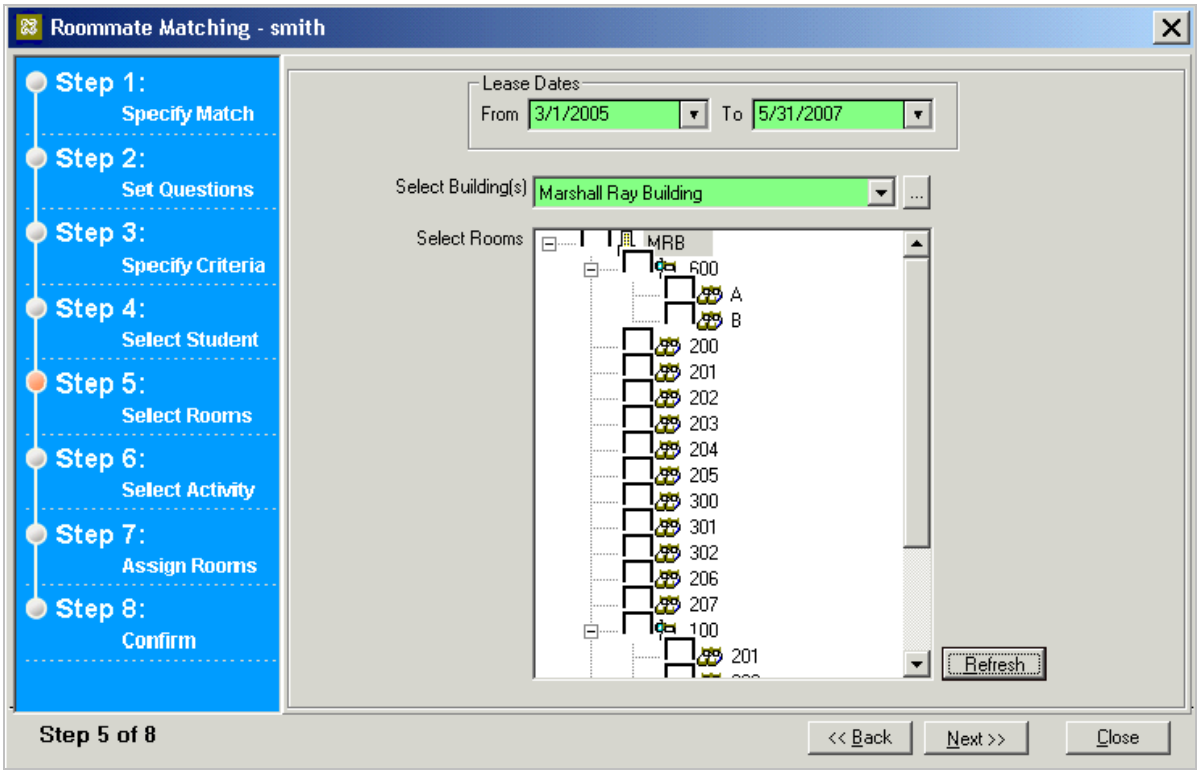
    Note: Academic Year based lease with room frequency of Term will not be pulled in the wizard.

11. Click **Next**. Step 4 of 8 of the Roommate Matching Wizard is displayed.



12. All the students matching the criteria specified in step 3 are listed in step 4, including those who are not eligible for roommate match as per these criteria. The ineligible students are listed so that you can manually specify them as eligible. You can now shift students from the **Not eligible for room assignment** list to the **Eligible for room assignment** list, and vice versa, by using the >> or << buttons.
13. You can view the housing application submitted by a student by selecting the student and then clicking the **Student Application Details** button. The housing application submitted by the student is displayed in read-only mode.
14. Until this step, the match will not be saved. Click **Next**. A confirmation box will appear asking you to confirm saving the match result. The confirmation box will appear only the first time you create a match or if you change the status of any student from not eligible to eligible (and vice-versa).
15. Click **Yes** to save the data of the first four steps of the wizard. The students placed in the **Eligible for room assignment** list will be locked, that is, these students will not be a part of any other match being performed for the housing period specified in **Step 3**.

    Step 5 of 8 of the Roommate Matching Wizard is displayed.



16. Specify the **Lease Dates** for the room assignment. By default, the housing dates mentioned in step 3 are populated in the **From** and **To** fields. In case you need to change the lease dates, ensure that the new **From** and **To** dates fall within the period between the start and end date of the housing dates mentioned in step 3.

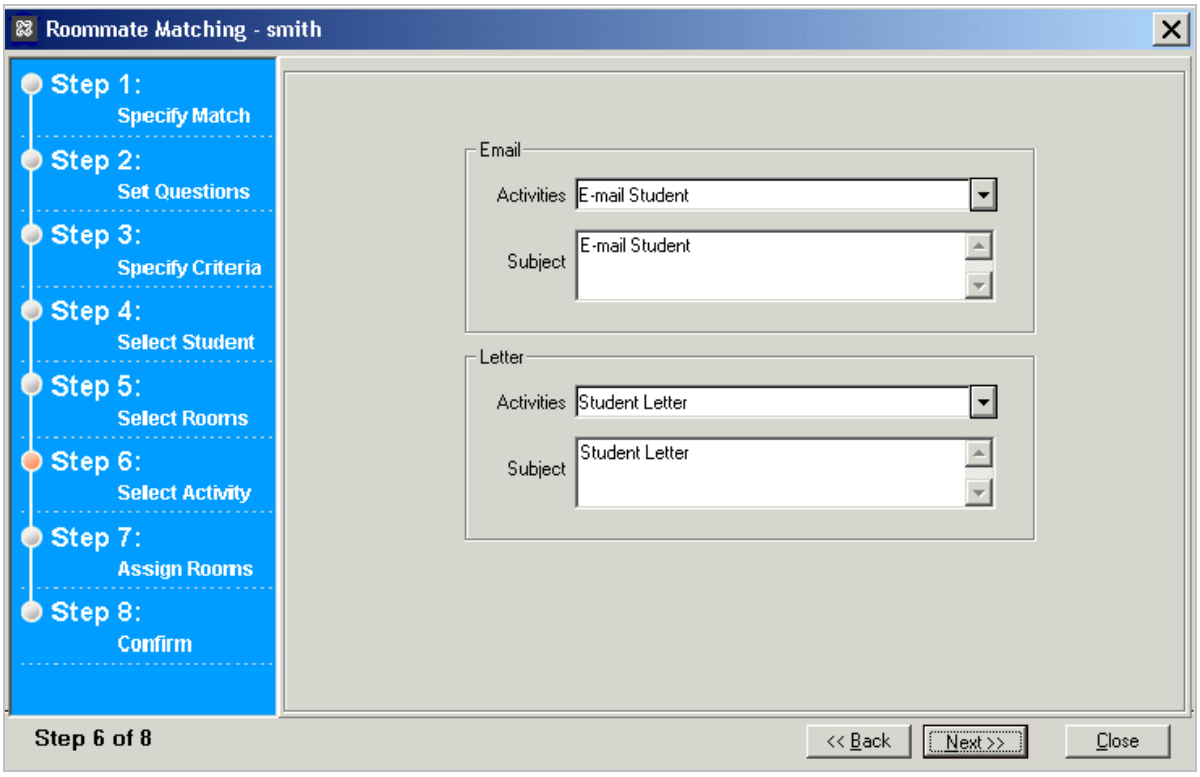
17. Select the **building(s)** where the students will be placed by clicking the ... button. Click the Refresh button. The system will present the suites and rooms associated with the selected building(s) in the Select Rooms area of the form. Place the mouse pointer on any node of the tree structure to view the related maximum capacity, normal capacity, and the number of the occupants.

    Note: A room is the place where a student is actually placed. A suite is a collection of rooms. A building can be a collection of rooms or suites, or both.

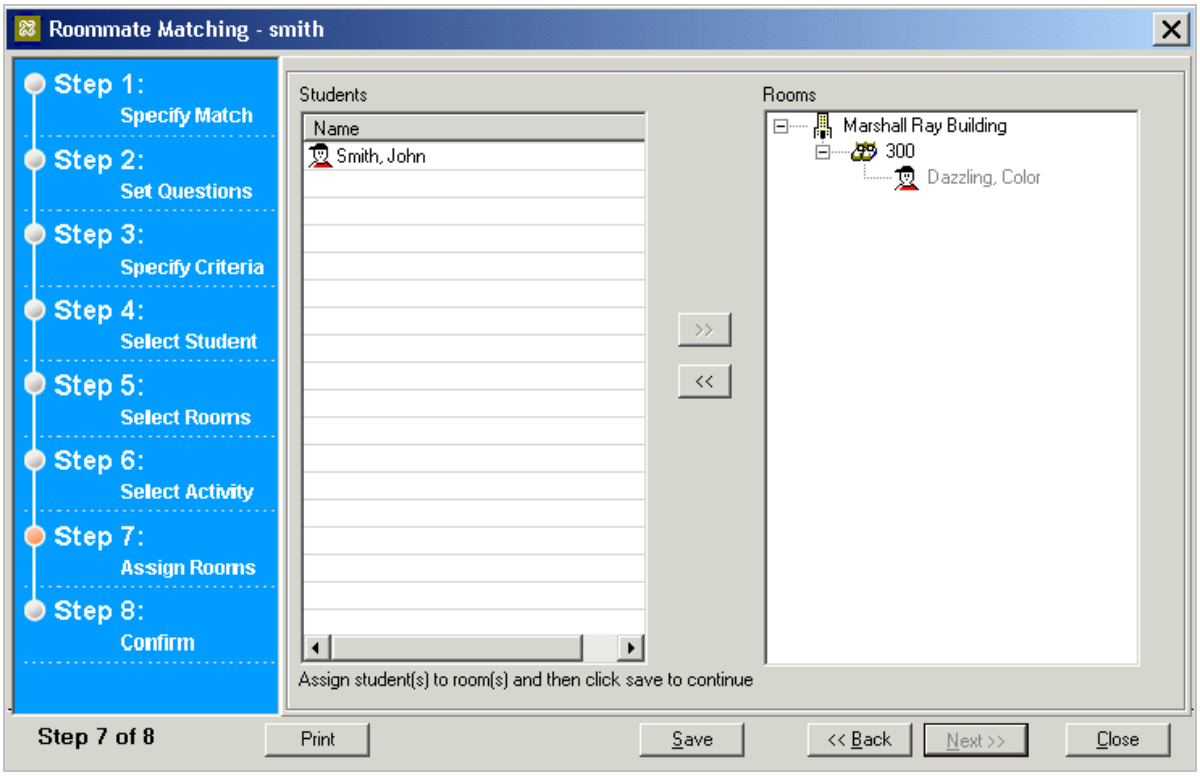
18. From the tree structure, select the rooms where you want to place the eligible students.

19. Click **Next**. **Step 6 of 8** of the Roommate Matching Wizard is displayed.

20. Select the **Activities** and specify the **Subject** that will be assigned to each of the placed student using the Contact Manager.

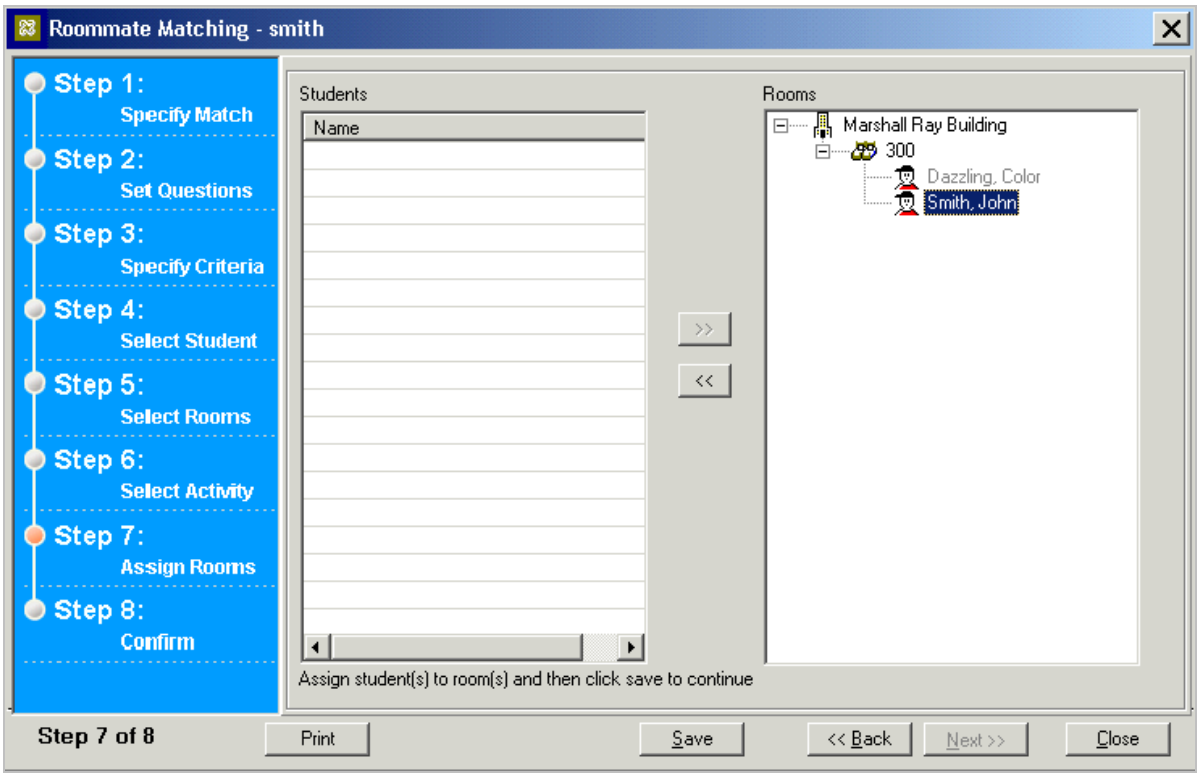


21. Click **Next**. Step 7 of 8 of the Roommate Matching Wizard is displayed. This step of the wizard allows you to assign rooms (identified in **Step 5**) to eligible students (identified in **Step 4**).



22. Click the

>> button to place a student in a room after selecting a student from the **Students** list and a room from the **Rooms** tree structure. Alternatively, you can drag and drop students from the **Students** list into a room in the **Rooms** tree structure.



Note: If you selected the match type as **Automatic** in step 1, the system will automatically match eligible students (identified in step 4 of the wizard) with suitable roommates and place them into the rooms. However, you can manually change the automatic assignments.

You cannot place a student in a room that has reached its maximum capacity or a room that expects a certain occupant type, which does not match the student profile. For example, a male student cannot be placed in a female-only type of room. The system will assign rooms (of a suite) based on the gender setting of the *suite*, not on gender setting of individual *rooms* of a suite. The gender rules are as follows:

- When the gender setting of suite is 'Male', then only male student
- When gender setting of suite is 'Female', then only female student
- When gender setting of suite is 'Co-ed', then students with any type of gender (M, F, U, N)
- When gender setting of suite is 'Either', then only one gender type, all males or all females

23. Place the mouse pointer on any node of the tree view to view the related maximum capacity, normal capacity, and the number of the occupants.

24. The << button has the opposite function, it allows you to remove a student from a room. Alternatively, you can drag and drop a student from a room in the Rooms tree structure into the Students list. Note that the students whose names appear in gray color (in the tree structure) have been placed in the room by some other match, such students cannot be moved from the rooms in this match.
