Setup - Academic Records Lists [Reasons] ... 1483
To add or edit a list of status change reason codes: ... 1483
Setup - Academic Records Lists [Requirement Rules] ... 1485
To add a list of requirement rules codes: ... 1486
Satisfactory Academic Progress (SAP) ... 1490
SAP Calculation ... 1490
GPA Criteria and Letter Grades ... 1491
SAP Maximum Time to Complete ... 1492
Configurable Option for MTF ... 1492
Setup - Academic Records Lists [SAP] ... 1493
To add or edit a list of SAP codes: ... 1493
SAP Detail ... 1498
To add or edit SAP details in the SAP table: ... 1498

Setup - Academic Records Lists [SAP Reason] 1502
To add or edit a list of SAP reason codes: 1502
Setup - Academic Records Lists [SAP Status] 1506
To add or edit SAP status codes and associate student groups with SAP status codes: 1506
Setup - Academic Records Lists [Start Date] 1509
To add or edit a list of start date codes: 1509
Setup - Academic Records Lists [Shifts] 1512
To add or edit a list of shift codes: 1512
Setup - Academic Records Lists [Registration Groups] 1514
To add or edit a list of registration groups codes: 1514
Setup - Academic Records Lists [Resources] 1518
To add or edit a list of resources codes: 1518
Setup - Academic Records Lists [Term] 1520
To add or edit a list of term codes: 1520
To complete the General tab: 1521
To complete the Length/Relationships tab: 1523
To complete the Web Registration tab: 1524
To complete the LMS Data Exchange tab: 1525
Term Relationships 1526
To view term relationships: 1526
To define term relationships: 1526
Payment Recalculation Notification Configuration 1527
To configure the payment recalculation notification: 1528
Pre-Pull/Add-Drop Automation Configuration 1528
To configure Pre-Pull/Add-Drop Automation: 1528
Setup - Academic Records Lists [Term Group] 1530
To add or edit a list of term group codes: 1530
Lists > Career Services 1533
Setup - Career Services Lists [Career Fields] 1534
To add or edit a list of career field codes: 1534
Setup - Career Services Lists [Certifications] 1536
To add or edit a list of certification codes: 1536
Setup - Career Services Lists [Contact Type] 1538
To add or edit a list of contact type codes: 1538
Setup - Career Services Lists [Corporate] 1540
To add or edit a list of corporate codes: 1540

Setup - Career Services Lists [Employer Contact Attributes] ... 1542
To add or edit a list of employer contact attribute codes: ... 1542
Setup - Career Services Lists [How Placed] ... 1544
To add or edit a list of how placed codes: ... 1544
Setup - Career Services Lists [Industry] ... 1546
To add or edit a list of industry codes: ... 1546
Setup - Career Services Lists [Job Benefits] ... 1548
To add or edit a list of job benefit codes: ... 1548
Setup - Career Services Lists [Job Category] ... 1550
To add or edit a list of job category codes: ... 1550
Setup - Career Services Lists [Job Source] ... 1552
To add or edit a list of job source codes: ... 1552
Setup - Career Services Lists [Job Title] ... 1554
To add or edit a list of job title codes: ... 1554
Setup - Career Services Lists [Job Type] ... 1556
To add or edit a list of job type codes: ... 1556
Setup - Career Services Lists [Location] ... 1558
To add or edit a list of location codes: ... 1558
Duplicate Codes ... 1559
Setup - Career Services Lists [Reasons] ... 1561
To add or edit a list of reason codes: ... 1561
Setup - Career Services Lists [Salary Type] ... 1565
To add or edit a list of salary type codes: ... 1565
Setup - Career Services Lists [Skills] ... 1567
To add or edit a list of skill codes: ... 1567
Duplicate Codes ... 1569
Occupation Insight Skills ... 1570
Lists > Book Store ... 1571
To add or edit a list of book store inventory codes: ... 1571
Lists > Loan Management ... 1574
To add or edit the list of loan status codes: ... 1574

About 3833

Welcome

CampusNexus® Student is a fully unified academic and administrative platform designed for today's service-oriented institutions. Administrators, faculty, and advisors leverage a centralized database and automated workflows to speed and improve services to students at every stage and touchpoint of their academic experience. Business and executive officers gain a 360 degree view of campus operations for strategic analysis, enhanced recruiting and retention, and accurate, real-time reporting.

Note: The CampusNexus Student product interface previously called the "desktop client" is now referred to as the "legacy interface". The product interface previously called the "web client" is now the standard, default product interface and is no longer prefixed with "web client".

This help system is organized based on the menu structure of the CampusNexus Student application. To find information within the help system, navigate through the **Contents** pane or use the **Search** function.

Help is updated with every major or minor release of CampusNexus Student. See What's New.

To send comments about a help topic, click the **Feedback** button at the top of the topic pane and send an email. Your comments will be used to improve the Help system.

To view the HTML5 version of this Help system, navigate to http://www.mycampusinsight.com (logon required), select **Documentation Center** > **Help Systems** > **Choose Product** > **CampusNexus Student**, and click the appropriate link.

CampusNexus Student (Legacy Interface) Help Guide

What's New

Version 21.2

- Campus Information - Options Tab - added options to select 'Enable Automatic Grade Level Promotion' and/or 'Additional Academic Year Loan Packaging'.
- Field Descriptions: Standard Packaging Form - relabeled columns 'Gross Amount Exp for AY' and 'Net Amount Exp for AY'
- Added Loan Information form with tabs for Informed Borrower status and Subsidized Usage information.

Note: The CampusNexus Student product interface previously called the "desktop client" is now referred to as the "legacy interface". The product interface previously called the "web client" is now the standard, default product interface and is no longer prefixed with "web client".

Campus Management Corp. is now Anthology Inc.

Version 21.1

2020 CIP Code Update

The National Center for Education Statistics (NCES) published the final CIP 2020 on their site on July 1, 2019. In accordance with the needs related to managing 2020 CIP Codes, as outlined by the Department of Education at the December 2019 Federal Student Aid conference, CampusNexus Student now supports the ability to assign and save both a 2010 and 2020 CIP code to a program, program version, and area of study. The ability to configure 2010 CIP codes has not been impacted and continues to function as before, only the label of fields previously labeled as "CIP Code" have been updated to "2010 CIP Code." A new 2020 CIP Code field has been added.

Additionally, users will be able to see which 2010 and 2020 CIP code is associated with a student's program version when reviewing the Enrollment Information and Financial Aid Packaging forms.

More details regarding 2020 CIP Codes can be found on NCES at https://nces.ed.gov/ipeds/cipcode/resources.aspx?y=56

More details regarding changes to Regulatory processes to report 2020 CIP Codes to NSLDS and COD can be found in Regulatory Help.

The following forms are updated to display both the 2010 and 2020 CIP Codes:

- Setup - Academic Records Lists [Areas of Study]
- Setup - Academic Records Lists [Programs]
- Associate CIP Code with Area of Study or Program
- Programs > Program Versions
- Enrollment Information
- Financial Aid Packaging

College Finance Plan

The Financial Aid Shopping Sheet is renamed "College Finance Plan". New options are added under:

- Tools > Financial Aid
- Daily > Financial Aid > Print/View College Finance Plan

For more information, see Regulatory Help.

Informed Borrowing Requirement

The Direct Loan - Informed Borrowing Response (Award Year 2020 and later) message class (CRIByyOP) is added to the Export and Import File Types.

For more information, see COD Updates in Regulatory Help.

90-10 Report by Revenue Source

The purpose of the 90-10 calculation is to determine the percentage of revenue received from Federal Student Aid (FSA) funds. New options are added under 90-10 Reports by Revenue Source.

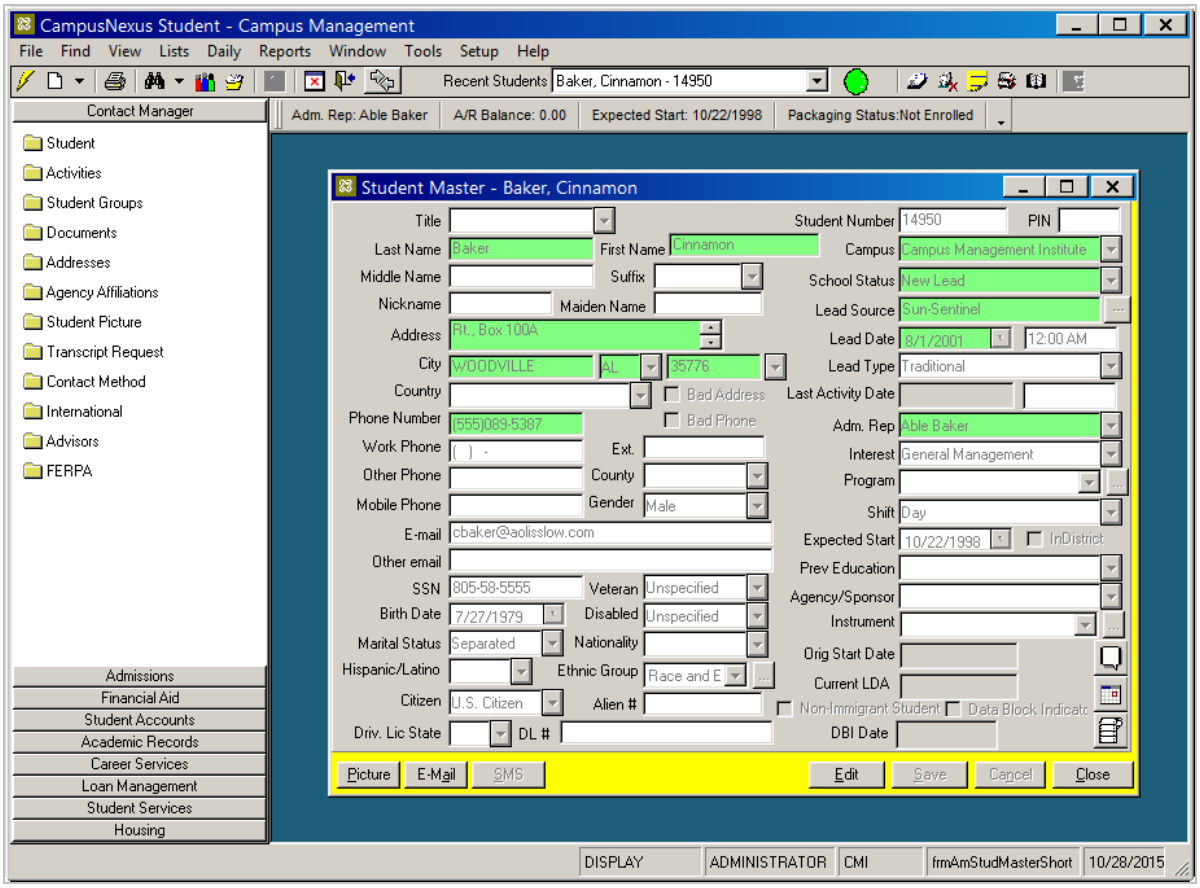
Updated Help Content

Status Codes - Status Codes Tab: added status definitions and Status Hierarchy.

Exploring the User Interface

A quick tour of the user interface, together with links to descriptions of frequently used features and other useful information, serves as a practical introduction to CampusNexus Student.

When you access CampusNexus Student, the main window is displayed. You have complete control over the color scheme used on your computer. Your pattern of colors for the features of the window may be different. A difference in color scheme or dimensions does not affect the functionality of the objects in the window.



Main Window at a Glance

Title Bar. At the top of the CampusNexus Student window is the Title Bar. On the Title Bar, from left to right you find the CampusNexus Student icon, the name of the program, and the name of your corporation, company, or institution. To the far right of the Title Bar are the typical control buttons for minimizing or maximizing the window and for quitting (exiting) the program.

- Click the CampusNexus Student icon at the far left end of the Title Bar to open a menu of controls for the main window. You can restore, move, resize, minimize, maximize, and close the main window. Double-click this icon to close the program, or press the key combination **Alt+F4** to close the program. When you attempt to close the program by any method, a dialog box is displayed asking you to confirm your intention to close it.
- Also on the Title Bar is the name of the program and the name of your corporation, company, or institution. This name can be edited by your system administrator in the **System** dialog box that is reached from the **Setup** menu.
- At the far right of the Title Bar are the controls for minimizing and maximizing the CampusNexus Student window

and for closing the program. Click one of these buttons to start the desired action.

- If you have reduced the size of the CampusNexus Student window, you can drag the window around on your desktop by placing your mouse pointer on the Title Bar and holding down the left mouse button. Move the reduced window to any place on the desktop and release the mouse button.

  Refer to your Microsoft Windows documentation for general instructions on resizing and other procedures associated with managing your Windows desktop.

Menu Bar. Below the Title Bar is the Menu Bar. All functions in CampusNexus Student can be accessed from the Menu Bar.

Toolbar. Under the Menu Bar is the Toolbar. It contains icons that lead you directly to specific tasks. This bar contains tools that make it easier for you to initiate certain functions in the Contact Manager module. Also on this bar is the Recent Students list box. As you work with student records, CampusNexus Student keeps the most recently accessed records handy so that you can go back to them quickly.

Student Bar. On the left side of the main window is the Student Bar. It provides access to many student-related functions. All functions on the Student Bar can also be accessed from the **View** menu on the Menu Bar. To free up additional space in your work area, you may choose to "autohide" the Student Bar.

User Toolbar. Below the toolbar is the User Toolbar. It provides access to forms that you use most often. This differs from the Student Bar in that it gives you access to the various forms that are within each of the Student Bar functions.

Work Area. The large area to the right of the Student Bar is referred to as the Work Area (a.k.a. desktop). Here, the program displays forms for viewing and editing the data that you use in your system-related work. You can have many forms open in the work area simultaneously. At any time, you can use the Window menu on the menu bar to see a list of currently open windows (forms). Switch to another window by selecting it on the Window menu. Alternatively, you can click anywhere in a window to make it active.

CampusNexus Student opens some forms in a modal window. This means that you must work with the form and close it before you can go to any other form (window).

Note the distinction between an **open window** and an **active window**. Several windows can be open at the same time, but only the active window has focus at any given time.

If you double-click the surface of the work area with the left mouse button, you will open the student search form.

If you right-click the surface of the work area, you will see a listing of very useful tools, which are described elsewhere in this Help system. Click an item on the list to view the related Help topic:

- Find Student
- Find Employer
- Find Staff
- Student Groups
- Employer Groups
- New Student
- Quick Lead
- Contact Manager
- Session Defaults
- Set Background Color

Status Bar. At the bottom of the main window is the Status Bar. Helpful hints, messages, and other basic information is displayed at various times on the Status Bar. It often tells you what you need to enter in a data entry field. It tells you what campus you are working with, the current date, and the name of the active form. It indicates the mode in which you are operating. At any given time, you will be in **DISPLAY** mode, **ADD** mode, or **EDIT** mode.

For more information, see Common Tasks. Also refer to the System Setup Overview.

Social Security Number (SSN) Handling

Access to a student's Social Security number (SSN) poses problems that can affect security administrators, systems administrators, compliance officers, students, financial aid administrators, admissions officers, and registrars. As a result, organizations that are required by state and regulatory bodies to adhere to strict security protocols may fall out of compliance, administrators maintain security groups that prevent access to key areas of the system, and students run the risk of having their identity used fraudulently.

CampusNexus Student prevents users from viewing a student's SSN, in full or in part, unless they have been given explicit permission to do so by a system administrator.

Overall, SSN access control in CampusNexus Student is achieved using a three-pronged approach:

- A staff-level configuration option – **Allow Access to SSN on UI**. This option, selected by default, enables system administrators to grant or prevent SSN viewing access to individual staff members for specific forms, as well as on the setup templates for Instructor Groups and Admissions Rep Groups.
  Note: This option is available in addition to the existing functionality to **Allow reporting access to SSN**.
- Replacing the SSN with the Student Number – This is not configuration-driven, but rather a change made directly on the forms in those cases where the student can be uniquely identified by Student Number.
- Hiding the SSN completely – The system hides the SSN on specific forms where a unique identifier is not needed (e.g., Career Services and International forms).

Granting/Preventing SSN Viewing Access for Staff Members

The staff-level configuration option **Allow Access to SSN on UI** enables system administrators to grant or prevent SSN viewing access to individual staff members for specific forms in CampusNexus Student. Like all other changes made through Staff Maintenance, the granting/removal of SSN access permissions is audited.

To grant or prevent SSN viewing access for a Staff Member:

1. Navigate to **Setup** > **Staff**. The Staff Maintenance form is displayed.
2. Click the **Staff Members** tab.
3. Select the name of the staff member whose SSN viewing access is to be granted/prevented; click **Edit**.
4. When the Staff Information form is displayed, select the **User Info** tab.
5. On the General subtab, select the **Allow access to SSN on UI** check box to grant SSN viewing access to the selected Staff Member. To prevent this Staff Member from viewing the SSN, clear this check box.
6. Staff Information form: Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.
7. Staff Maintenance form: Click **Close** to close the form.

Note: The Student Master is not impacted by the configuration option **Allow Access to SSN on UI**. On the Student Master, viewing access to SSN is based on the Field Level Security, not on this configuration option.

Granting/Preventing SSN Viewing Access for Instructor Groups and Admissions Rep Groups

The staff-level configuration option **Allow Access to SSN on UI** enables system administrators to grant or prevent SSN viewing access on the setup templates for Instructor Groups and Admissions Rep Groups. Like all other changes made through Staff Maintenance, granting/removal of SSN access permissions is audited.

To grant or prevent SSN viewing access for Instructor Groups or Admissions Rep Groups:

1. Navigate to **Setup** > **Staff**. The Staff Maintenance form is displayed.
2. Click the **Staff Groups** tab.
3. Click **Add** to define a new Staff Group (see Adding a Staff Group for details)
   or
   Select the name of the Staff Group whose SSN viewing access is to be granted/prevented; click **Edit**.
4. Complete the **Staff Group** form as applicable, including the designation of the group as an **Instructor Group** or **Admissions Rep Group**. When either of these options is selected, the Setup Template button becomes available; click **Setup Template**.
5. When the Setup Template form is displayed, select the **User Info** tab.
6. On the General subtab, select the **Allow access to SSN on UI** check box to grant SSN viewing access to the selected Staff Group. To prevent this Staff Group from viewing the SSN, clear this check box.
7. Setup Template form: Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.
8. Staff Group form: Click **Close** to close the form.

Note: The Student Master is not impacted by the configuration option **Allow Access to SSN on UI**. On the Student Master, viewing access to SSN is based on the Field Level Security, not on this configuration option.

Forms Containing SSN that are Configuration-driven

A number of forms used in CampusNexus Student involve the display of Social Security numbers (SSN) and are set up to be configuration-driven. Staff Members are able to access and view the SSN on these forms (or not) depending on the permissions assigned to them by the system administrator using the staff-level configuration option **Allow Access to SSN on UI**.

If the **Allow Access to SSN on UI** option is enabled for a Staff Member (check box is selected), the Staff Member can view the student's SSN on these forms. If the option is disabled (check box cleared), the text area is grayed out where the SSN normally appears, or the phrase 'SSN Blocked' is displayed in place of the SSN.

Configuration-driven Forms Containing SSN

FAFSA	View > Financial Aid > FAFSA

Forms on which SSN is Replaced with Student Number

In cases where a student can be uniquely identified by Student Number rather than by Social Security number (SSN), CampusNexus Student makes this replacement in the corresponding forms. Unlike configuration-driven changes, these are direct changes in the form itself.

Forms Where SSN is Replaced with Student Number

Form Title	Navigation Path
Academic Records - Process Transfers	Daily > Academic Records > Process Queued Transfers

General (Multimodule) Tasks

How do I exit?

How do I use the Help system?

How do I quickly enter a new lead?

How do I add a new student master?

How do I edit a lead or student master record?

How do I find a student master record?

How do I see other student addresses?

How do I print a student address label?

How do I delete a lead or student master record?

How do I print a report?

How do I save a group of students?

How do I load a group of students?

How do I refresh the current form on my screen?

How do I change my session default settings? (Campus, Term, FA Year)

How do I add a new list item?

How do I edit a list item?

How do I delete a list item?

How do I disable a list item?

How do I enable a list item?

How do I print reports from a list?

How do I print the current screen image?

How do I show or hide the Student Bar?

How do I see the Print Setup for my system?

How do I choose printers for reports, receipts, and labels?

How do I enter school-defined data for a student?

How do I add a new document to track for a student?

How do I edit a document tracking record?

How do I remove a tracked document for a student?

Contact Manager

How do I see a list of my active leads or students?

How do I see my pending activities?

How do I add or edit an activity for a student?

How do I close an activity for a student?

How do I add a follow-up activity?

How do I see all the activities for a student?

How do I see my messages?

How do I send a message?

How do I mark a message as read?

How do I reply to a message?

How do I add an alternative address for a student?

How do I edit an alternative address for a student?

How do I remove an alternative address for a student?

How do I print letters?

How do I create a new form letter?

How do I add a new automatic activity to the Scheduler?

How do I edit an automatic activity in the Scheduler?

How do I delete an automatic activity from the Scheduler?

How do I print a list of staff members?

How do I report a police incident regarding a student?

How do I find out if a contact is on a Do Not Call list?

Admissions

How do I add a new lead?

How do I change the status of a lead or student?

How do I enroll a student?

How do I add an entrance test result record for a student?

How do I see all the leads assigned to me?

How do I add an Admissions expense?

How do I edit an Admissions expense?

How do I delete an Admissions expense?

How do I print a list of Admissions expenses?

How do I reassign leads to another rep?

Financial Aid

How do I set up Fund Sources for FA?

How do I set up Packaging Methods for FA?

How do I set up Academic Years for FA?

How do I set up Cost of Attendance Budgets for FA?

How do I set up the FA General Ledger?

How do I package a student for FA?

How do I add or edit a FAFSA record? See Regulatory Help.

How do I send FAFSAs to the Central Processing System (CPS)? See Regulatory Help.

How do I package a student for work study funds?

How do I package a student for a direct loan?

How do I post work study disbursements?

How do I approve batches of packaged financial aid?

How do I import ISIRs?

How do I match imported ISIRs with my students?

How do I print an ISIR?

How do I work with ISIRs returned to our office?

How do I make ISIR corrections?

How do I work with SSCR processing?

How do I export Clearinghouse data?

How do I export data to my FA servicer (Global)?

How do I find out about Return of Title IV Funds?

Student Accounts

How do I see a student's ledger card?

How do I enter a charge transaction?

How do I enter a payment transaction?

How do I apply a payment to outstanding charges?

How do I enter a charge adjustment transaction?

How do I enter a payment adjustment transaction?

How do I set up a student payment schedule?

How do I print a student's account statement?

How do I see a list of my accounts receivable?

How do I set up a transaction code?

How do I set up a bank code and its related accounts?

How do I set up a billing method?

How do I assign a billing method to a program?

How do I find out about Return of Title IV Funds?

Academic Records

How do I set up a new program?

How do I set up a new program version?

How do I build a course list for a program version?

How do I set up a course?

How do I set up Dependent and Parent courses?

How do I register students in a class section?

How do I set up lessons and exams for a class section?

How do I receive distance education lessons?

How do I track lessons and exams for a student?

How do I grant a course extension?

How do I enter fees for a student enrollment?

How do I add a class section to a student's schedule?

How do I remove a class section from a student's schedule?

How do I drop a student from a class section?

How do I post final grades for a selected student?

How do I change a student's status?

How do I post attendance for a class section?

How do I post final grades for a class section?

How do I set up a SCANTRON™ system for attendance and grades?

How do I set up a Satisfactory Academic Progress table?

How do I process instructor payments?

How do I print a Student Degree Evaluation Report?

Distance Education

How do I track lessons and exams for an individual student?

How do I enter a batch of received lessons?

How do I enter a batch of graded lessons?

How do I process payments to instructors for courses, lessons, and exams they grade?

How do I pay an instructor for course revisions?

How do I process payments to instructors for course revisions (rewrites)?

How do I set up instructor pay rates for programs?

How do I set up instructor pay rates for courses?

Placement

How do I edit the Placement settings?

How do I set up a Placement Master record for a student?

How do I enter Placement Exit Interview results?

How do I attribute job skills to a student?

How do I enter a new employer?

How do I enter a new job opportunity?

How do I record a job placement?

How do I see a list of available jobs?

How do I see an employer's placement history?

How do I see a student's placement history?

How do I add an employer activity?

Housing

How do I view housing applications?

How do I work with housing applications?

How do I work with housing leases?

How do I move a student from one room to another?

How do I assign the cost of a housing related service to a student for subsequent billing?

How do I post housing deposits?

Bookstore

How do I enter new inventory items?

Setup

How do I edit theCampusNexus Student system settings?

How do I delete a campus record?

How do I add, edit, or delete a campus group?

How do I design a quick lead form?

How do I design a student ID number?

How do I add a new staff member?

How do I search for a staff member?

How do I edit a staff member?

How do I deactivate a staff member?

How do I delete a staff member?

How do I add a staff group?

How do I delete a staff group?

How do I set up security for my system?

How do I add a student status code?

How do I edit a student status code?

How do I delete a student status code?

How do I edit the student status change rules?

How do I assign background colors to student statuses?

How do I edit the Academic Records settings?

How do I edit the Placement settings?

How do I set up a Distance Education instructor?

How do I set up program rates for distance education?

How do I set up course rates for distance education?

How do I set up a label printer for distance education?

How do I designate required data fields on a form?

How do I see the data dictionary?

How do I change the form captions?

How do I add a school-defined field?

How do I set up field level security?

How do I set up our school's Web Interface?

How do I set up a link to the Great Plains Accounting system?

How do I set up a link to the accounting system?

How do I print one or more Help topics?

How do I access our school's private Help system?

How do I access the website?

How do I send an e-mail request for support?

Select City ZIP Code

ZIP (Zone Improvement Plan) codes are used in addresses throughout CampusNexus Student. A ZIP code can cover multiple cities. The U.S. Postal Service has designated a "default" place name for each ZIP code. However, other cities may also be covered by the same ZIP code.

The ZIP code database in CampusNexus Student includes alternative ZIP codes, cities, and an indicator marking the primary city. When entering a ZIP code into any form in CampusNexus Student, if the ZIP code covers more than one city, a drop-down list of cities is displayed and you can select the correct city from the list. The primary city is selected as the default, but you can select any city from the list. If only one city matches the ZIP code, that city is used without displaying a list of cities.

As an example of this scenario, for the ZIP code 33067, the default city is Pompano Beach, FL. However, Coral Springs, FL and Parkland, FL are also covered by this ZIP code. CampusNexus Student displays a list of the three cities, with the default selection being Pompano Beach.

Incoming Phone Call Activity

You can keep a record of incoming telephone calls related to students or employers. First you must set up an incoming phone call activity under Lists > Contact Manager > Activities.

Next, you must select the student or employer who called in and record your notes about the call.

To record an incoming phone call activity for a selected student or employer:

1. **Find** the student (or employer) for whom you want to add the incoming phone call activity. Or, select a student from the **Recent Students** list box at the top of the CampusNexus Student work area.
2. Select View > Contact Manager > Activities. The Contact History form for the selected student is displayed.
3. Click **Add Activity**. A new Activity form is displayed.
4. Check the **Assign To** box to be sure the person who received the incoming call is showing.
5. Select the incoming phone call **Activity** from the list. (If you don't see an activity that matches what you want, new activities can be added by going to the Contact Manager option under the Lists menu. See the Lists > Contact Manager > Activities topic for more information.)
6. When you select an activity, the description of the activity will be inserted in the **Subject** box as a default. You can change the subject to anything you wish.
7. If you are recording the phone call after it has been completed, the **Status** will probably be Closed or Follow Up.
8. Select options from the other list boxes as necessary.
9. Enter **Comments** about the nature of the call.
10. Click **Save** to save your changes. If the date of the phone call is not today, you will get a warning message. Click **Yes** to continue.
11. You can click **Cancel** if you change your mind about adding the activity before you save it.

Outgoing Phone Call Activity

You can assign outgoing phone calls or keep a record of outgoing telephone calls related to students or employers. First you must set up an outgoing phone call activity under Lists > Contact Manager > Activities.

Next, you must select the student or employer to be called (or that was called) and record your notes about the call.

To assign an outgoing call or record an outgoing phone call activity for a selected student or employer:

1. **Find** the student (or employer) for whom you want to add the outgoing phone call activity. Or, select a student from the **Recent Students** list box at the top of the CampusNexus Student work area.
2. Select **View > Contact Manager > Activities**. The **Contact History** form for the selected student is displayed.
3. Click **Add Activity**. A new Activity form is displayed.
4. Check the **Assign To** box to be sure the person who will make the outgoing call is listed.
5. Select the outgoing phone call **Activity** from the list. (If you don't see an activity that matches what you want, new activities can be added by going to the Contact Manager option under the Lists menu. See the Lists > Contact Manager > Activities topic for more information.)
6. When you select an activity, the description of the activity is inserted in the **Subject** box as a default. You can change the subject to anything you want.
7. If you are recording the phone call after it has been completed, the **Status** will probably be Closed or Follow Up. If you are setting up a phone call that will be made later, the **Status** will be Pending.
8. Select options from the other list boxes as necessary.
9. Enter **Comments** about the nature of the call.
10. Click **Save** to save your changes. If the date of the phone call is not today, you will get a warning message. Click **Yes** to continue.
11. You can click **Cancel** if you change your mind about adding the activity before you save it.

Letter Activity

Letter activities are set up to send form letters to one or more students. The form letters can be set up to include attachments, such as catalogs, brochures, forms, and so on, that will be picked from the shelf and sent along with the form letter. The form letters can also be set up with "linked" letters or documents, such as mailing labels, that will be printed at the same time as the form letter. The attached and linked documents are specified at the time the letter activity is defined. See also Print Award Letters in a Batch Mode.

After the form letter has been defined, you can relate it to a Student or Employer through the Activities form.

To match a letter activity with a selected student:

1. **Find** the student for whom you want to add a letter activity. Or, select a student from the **Recent Students** list box at the top of the CampusNexus Student work area.
2. Select **View > Contact Manager > Activities**. The Contact History form for the selected student is displayed in the work area.
3. Click **Add Activity**, or select an existing activity and click **Edit Activity** to modify the activity. The Activity form is displayed.
4. Check the **Assign To** box to be sure that the person responsible for the letter activity is showing. If necessary, select the appropriate person. (Only the persons to whom you can assign the activity will appear in this list.)
5. Select a letter **Activity** from the list. (If you don't see an activity that matches what you want, new activities can be added by going to the Contact Manager option under the Lists menu.)
6. When you select an activity, the same text will be inserted in the **Subject** box as a default. You can change the subject to anything you want.
7. Check the **Student box** to be sure the correct student is showing. If not, click to find the correct student.
8. Select options from the other list boxes as necessary.
9. Enter any additional **Comments** concerning the activity. These comments do not appear in the letter.
10. Click **Save** to save your changes.
11. If there are **Attachments** to be sent with the form letter, CampusNexus Student will open the **Documents to Send Student** form.
12. Enter the quantity of each attachment that is to be sent with the form letter. If you like, click **Clear** to set the quantity column for all attachments to zero, then enter a quantity for the ones you want to attach. You can select only the ones you want to include by entering a quantity to send next to the description.
13. Click **Save** to save your selection of documents to send with the letter and close the Documents to Send form. The letter activity form will also close.
14. Documents to Send form: Click **Close** to close the form.
15. Letter Activity form: Click **Close** to close the form.

Daily Contact Manager Activities

You can see all the letter activities assigned to you in the Contact Manager form. Here, you can edit or close the letter activity.

Daily Contact Manager Letters

See Print Letters to edit, clear, and print the letters that are showing on your activities list. See also Print Employer Letters, Print Letter Overview or Employer Letters Overview.

Note: When you edit or print the selected letter from the Print Letters and Print Employer Letters form, you are affecting all the queued up letters, not just those that appear on your own Contact Manager Activities list.

Mail Merge Codes

Mail merge codes are used to merge data from CampusNexus Student into letters, e-mails, labels, and other documents created in Microsoft Word. Select the codes from a drop-down list while composing or editing your document. When the time comes to print the document, Word extracts the data from the CampusNexus Student databases and substitutes it where you have placed the merge codes.

The data fields can range from a simple name field to a complex data table of financial aid data. Some codes, such as StudentFirstName, result in data from a single field in the database. Others, such as StudentCourseSchedule, result in data being listed from several records.

School-defined fields automatically appear on the list of mail merge codes. You will recognize them by the suffix "_SDF" that is appended to each code.

For information regarding mail merge functionality from the **Reports** menu, see the topic Report Viewer Controls.

For information on using mail merge features from the **Print Letters** screen in CampusNexus Student, see the topic Edit Letter.

Available Merge Field Codes for Letter Activities

The table below contains an alphabetic listing of merge field codes available in CampusNexus Student. It is intended to serve as an overview of the codes available to you through Microsoft Word when you compose or edit your document. When the time comes to print the document, Word extracts the corresponding data from the CampusNexus Student databases and substitutes it where you have placed the merge codes.

Note: While every effort has been made to present an exhaustive listing below, it is possible that there are differences between this list and the codes that you see in your current version of CampusNexus Student. In addition, please note that the set of codes presented to you by the Insert Merge Field function of Microsoft Word depend on the settings you have made in CampusNexus Student for the specific letter activity at hand.

For example, in the case of merge field codes of the groups beginning with <<Student**##**Advisor...>>, provisions have been made for codes wherein **##** represents modules AM, FA, SA, AD, CS, LM, and Other.

For special instructions regarding the use of the ledger merge field codes <<LedgerAmount>>, <<LedgerDate>>, and <<LedgerDescrip>>, please see the topic Using Ledger Merge Fields in Letter Activities.

Student International Advisor	<studentniadvisorlastname> <studentniadvisorfirstname> <studentniadvisoraddress> <studentniadvisorcity> <studentniadvisorstate> <studentniadvisorzip> <studentniadvisoremail> <studentniadvisoremailreplyto> <studentniadvisorphone> <studentniadvisorofficenumber> <studentniadvisorextension>
Other Advisors (examples only) Replace **XXXXX** in code as follows: System Administrator: ADMIN Athletic Advisor: ATHLETIC Other: OTHER	<studentoth**XXXXX**advisor-lastname> <studentoth**XXXXX**advisor-firstname> <studentoth**XXXXX**advisoraddress> <studentoth**XXXXX**advisorcity> <studentoth**XXXXX**advisorstate> <studentoth**XXXXX**advisorzip> <studentoth**XXXXX**advisoremail> <studentoth**XXXXX**advisore-mailreplyto> <studentoth**XXXXX**advisorphone> <studentoth**XXXXX**advisor-officenumber> <studentoth**XXXXX**advis-orextension>

Merge Field Group	Merge Field Codes (E-mails)
Disb. Details	<fundsourcecode> <awardyear> <awardamount> <disbursementnumber> <disbursementdate> <expectedamount> <disbursementstatus>
User (School) Defined Fields Any merge field code ending with **_SDF**	Examples: <FormerRoomates_SDF> <LicensePlate_SDF> <ParkingSpace_SDF> <AnySchoolDefinedField_SDF>

The expiration deadline date is required to populate the Incomplete grade mail merge fields on Activities. The Final Grades form will always have the expiration deadline date, even if the Incomplete grade is replaced prior to the expiration date. The Incomplete expiration deadline date will be compared to the Date Posted using the full Month/Day/Year date format and not just the Month/Day format, as this is used to determine if the expiration date is in the past.

Whenever a configured E-mail Activity is triggered and the student's grade changes from any grade to Incomplete, the following mail merge fields will appear and be populated with data within the E-mail body:

- IncompleteGradeCourse
- IncompleteGradeCourseTerm
- IncompleteGradeExpirationDate
- IncompleteGrade

Whenever a configured E-mail Activity is triggered and the student's grade changes from Incomplete to any grade, the following mail merge field will appear and be populated with data within the E-mail body:

- IncompleteGradeCourse
- IncompleteGradeCourseTerm
- IncompleteGradeExpirationDate
- IncompleteGrade
- IncompleteGradeReplaced

Merge Field Codes for Job Notification E-mail Activities

When creating a Job Notification E-mail activity template, you can configure advisor groups as **From Advisor** on the Activities Code Setup form. Advisor-related merge field codes are available for groups beginning with <<Student**##**Advisor...>>, where **##** represents modules AM, FA, SA, AD, CS, LM, and Other.

In addition, the following merge field codes are available for Job Notification E-mail activities:

<programversiondesc>
<attachmentsummary>
<attachmentdetail>
<programversion>
<enrollmentdescription>
<enrollmentexpectedend>
<campusdirectorofcareer>
<campusofficialschoolname>
<campusphone>
<campuspresident>

<campusstate>
<campuszip>

Meeting Activity

You can record a meeting activity related to students or employers. First you must set up the meeting activity under Lists > Contact Manager > Activities.

Next, you must select the student or employer with whom the meeting is to be scheduled.

To add or edit a meeting activity with a selected student or employer:

1. **Find** the student (or employer) for whom you want to add or edit the meeting activity. Or, select a student from the **Recent Students** list box at the top of the CampusNexus Student work area.
2. Select **View > Contact Manager > Activities**. The Contact History form for the selected student will appear in the work area.

   Click **Add Activity** to add a new activity or select an existing meeting and click **Edit Activity**. The Activity form is displayed.
3. Check the **Assign To** box to be sure the staff person who will attend the meeting is showing.
4. Select the meeting **Activity** from the list. (If you don't see an activity that matches what you want, new activities can be added by going to the Contact Manager option under the Lists menu. See the Lists > Contact Manager > Activities topic for more information.)
5. When you select an activity, the description of the activity will be inserted in the **Subject** box as a default. You can change the subject to anything you want.
6. If you are setting up a meeting that will occur later, the **Status** will be Pending. If you are recording the meeting after it has been completed, the **Status** will probably be Closed or Follow Up.
7. Select options from the other list boxes as necessary.
8. Enter any **Comments** about the meeting.
9. Click **Save** to save your changes. If the date of the meeting is not today, you will get a warning message. Click **Yes** to continue.
10. Click **Cancel** if you change your mind about adding the activity before you save it.

Message Activity

The Message activity is sort of like a scaled down internal e-mail system. It is used to send messages between staff members about students and employers. It can be sent to anyone to whom the user is authorized to assign activities.

Students or employers do not have a message record attached to their contact history.

Before a message activity can be recorded, you must define the activity under Lists > Contact Manager > Activities.

To add or edit a message activity:

1. Select the student or employer using the normal procedures.
2. Select **View > Contact Manager > Activities**. CampusNexus Student displays the Contact History form.

   Click **Add Activity** to add a new message activity or select an existing message activity and click **Edit Activity** to see the details. CampusNexus Student will display the Activity form.
3. Check the **Assign To** box to be sure the staff person who will receive the message is showing.
4. Select the message **Activity** from the list. (If you don't see an activity that matches what you want, new activities can be added by going to the Contact Manager option under the Lists menu. See the Lists > Contact Manager > Activities topic for more information.)
5. When you select an activity, the description of the activity will be inserted in the**Subject**box as a default. You can change the subject to anything you want.
6. The **Status**will be Pending.
7. Select options from the other list boxes as necessary.
8. Enter the text of the message in the large box at the bottom of the form.
9. Click **Save**to save your message. If the date of the message is not today, you will get a warning message. Click**Yes** to continue.

Daily Contact Manager Messages Tab

After the message has been saved, the recipient will see the message as a row on the Daily > Contact Manager > Contact Manager > Messages tab. You can click on the row to see the text of the message in the box on the lower portion of the form. Click Mark as Read or Reply as necessary to handle the message.

An alternative method of recording and sending a message is provided under the **Daily > Contact Manager > Contact Manager > Messages** tab. If you click Add here, CampusNexus Student displays a similar but slightly different message form.

The net result of using this form is the same as described at the top of this topic. The message is displayed on the Contact Manager Messages tab and nothing appears on the student's or the employer's contact history.

Other Task Activity

Choose this type of activity to add a record for an activity that does not fall under one of the other types. Before you can initiate an "other task" activity, you must set up the activity under Lists/Contact Manager/Activities.

To record an "Other Task" activity for a student or employer:

1. Select the student or employer by the normal procedures.
2. Select **View** > **Contact Manager** > **Activities**. The Contact History form for the selected student will appear in the work area.
3. Click **Add Activity** to add a new Other Task activity, or select an Other Task activity and click **Edit Activity** to see the details. CampusNexus Student displays the Activity form.
4. Check the **Assign To** box to be sure the staff person who will be responsible for the task is showing.
5. Select the Other Task **Activity** from the list. (If you don't see an activity that matches what you want, new activities can be added by going to the Contact Manager option under the Lists menu. See the Lists > Contact Manager > Activities for more information.)
6. When you select an activity, the description of the activity will be inserted in the**Subject**box as a default. You can change the subject to anything you want.
7. If you are setting up a task that will occur later, the **Status** will be Pending. If you are recording the task after it has been completed, the **Status** will probably be Closed or Follow Up.
8. Select options from the other list boxes as necessary.
9. Enter any **Comments** about the task.
10. Click **Save** to save your changes. If the date of the task is not today, you will get a warning message. Click **Yes** to continue.

Daily Contact Manager Activities

Once the "Other Task" activity has been recorded for the student or employer, the responsible staff member can see it on his or her Contact Manager Activities form (Daily > Contact Manager > Contact Manager > Activities).

The Other Task activity can be edited or closed at the convenience of the user.

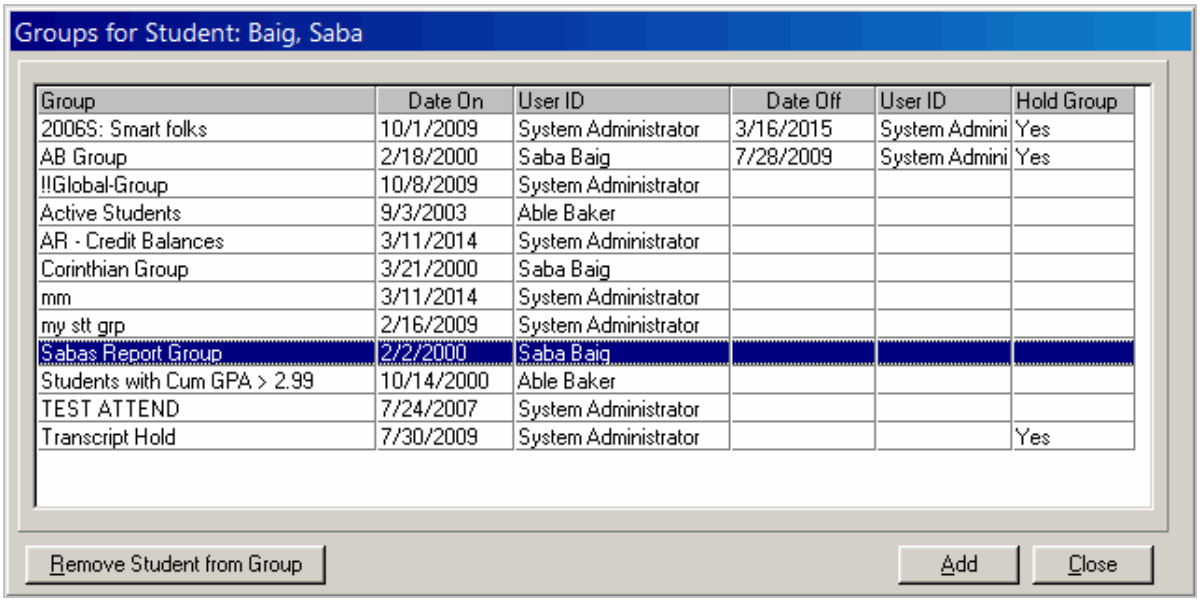
Groups for a Student

Use the Groups for Student form to view or change the group membership of a student. A student can be assigned only to existing groups created by another procedure such Search or Report Selection. Furthermore, the groups must be designated as manually maintained groups that are marked as public if the groups were initially created by someone other than yourself.

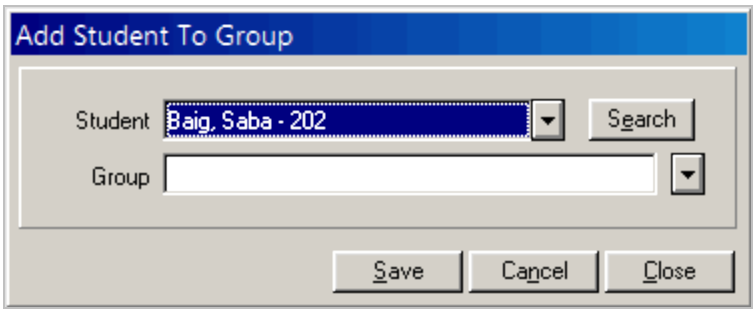
To view or edit the group membership for a student:

1. Select a student.
2. Navigate to **View** > **Contact Manager** > **Student Groups**. The Groups for Student: <student name> form is displayed.

   The Date On column indicates the dates when the student was added to a group. The Date Off column indicates the dates when the student was removed from a group.



3. Click **Add** to add the selected student to a new group. The Add Student To Group form is displayed.



3. To add a different student to a group, select a **Student** from the drop-down list or click **Search** to find the student.
4. Select a **Group**.
5. To remove a student from a group, select the group from which to remove the student.
6. Click **Remove Student from Group**.

Note: This button is available only if the Group Type is M – Manual and you have security rights to delete students from groups.

7. A confirmation message is displayed. Click **Yes**.

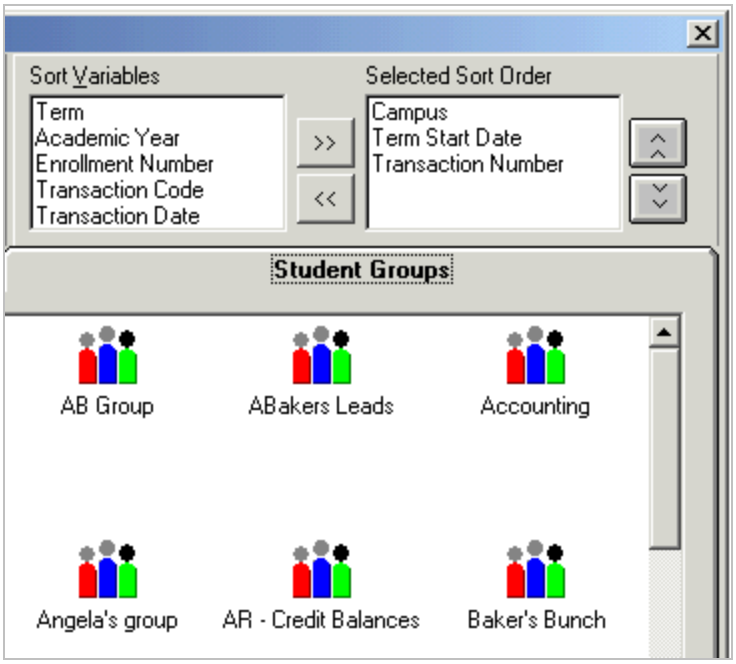
   The Date Off field in the student group grid is updated to indicate the date when the student was removed from the group. If applicable, the red/green "hold" light on the toolbar is turned on or off.

8. Click **Close** to close the form.

Student Groups Menu

This menu is displayed on the main menu bar from time to time when a user opens the Report Selection form. It is one of a few such menu options that are related to right-click shortcut menus. In this case, if you right-click on a report, the Student Groups option is displayed when the Report Selection Form is displayed. It provides an alternative means of choosing how you would like to view the list of available student groups on the form.

If you select the **Icon View** option, CampusNexus Student lists the student groups as icons.



If you select the **List View** option, CampusNexus Student lists the student groups as text only.

Create Labels

This procedure is an easy way to create mailing labels with merge codes and postal bar codes. It is a three-part procedure involving both CampusNexus Student Contact Manager and the mail merge features of Microsoft Word.

- Part 1 - Assign an "Activity" Name to Your Label where you use Contact Manager to name an "activity" for your labels.
- Part 2 - Define the Labels with Merge Codes and Postal Bar Codes where you use Contact Manager to start the label definition process in Word, and then you use Microsoft Word to define the content of your label.
- Part 3 - Test Your New Mail Merge Labels where you test your work by printing some test labels for selected students.

Note: Because there are several steps in each part of this procedure, we suggest that you print this Help topic and keep the hard copy by your side while you work your way through it.

This procedure takes advantage of the Word feature that uses predetermined formats for **Avery Labels**. You can select the Avery mailing label that you use in your school. Determine which Avery Label format (number) you are going to use and how many lines of information can be printed on each label before you start the setup procedure.

For our example, we will set up a label format (Avery 5160) to be used on information packets that are sent to new leads.

Part 1 - Assign an "Activity" Name to Your Label

1. Navigate to **Lists > Contact Manager**. The Setup - Contact Manager Lists form is displayed. Click the Activities tab.
2. Click **Add** to add your new label.
3. When the **Activities Code Setup** form is displayed, enter the data for your label. We suggest that you use a prefix on the name to identify the department in which it is used. For Admissions, the prefix is "AM". Our example label will have a **Code** of AM-NL (up to eight characters in the code) and "AM-New Lead Label" for the **Description**.

   Department Prefixes

Prefix	Module
AD	Academic Records
AM	Admissions
BS	Bookstore/Inventory
CM	Contact Manager
DE	Distance Education
FA	Financial Aid
PL	Placement
SA	Student Accounts
SY	System

4. Select Letter for the **Event Type**.

5. Leave Duration at zero.
6. In the Contacts frame, enable the **Required** option for **Student**.
7. In the Send To box, select **Student**.
8. Click **Save** to save your new "activity" (label) and leave the form open for the next step.

Part 2 - Define the Labels with Merge Codes and Postal Bar Codes

1. Ensure that a folder exists to match the **Letter Path** setting in the **Setup > System > General** tab. If the folder does not exist, create one, or change the Letter Path setting to match a folder that does exist. The default path is `C:\Program Files\CMC\CampusNexus Student\Letters`.
2. Click **Edit Letter**. Because this is the first time we are accessing the "letter" file, the program has not yet created it. A message is displayed to ask you if you want to create one. Click **Yes** to create the letter file document **AM-NL.-doc** for our example and start your new label. CampusNexus Student displays a message in the lower left corner that says "Opening Word" until Word opens with a blank page. Be patient, it could take a few seconds.
3. If Word is not already maximized on your screen, maximize it (right-click on the task bar icon for the Word document and select **Maximize**).
4. From the Word menu, start the Mail Merge Wizard.
   Note: For Word 2003 or earlier: **Tools > Letters and Mailings > Mail Merge Wizard**; for Word 2007 or later: **Mailings > Start Mail Merge > Step-by-Step Merge Wizard**
5. When the Wizard is displayed, make sure that you are on **Step 1 of 6** (Step 1 of 6 is displayed unless the Wizard has been run before. If necessary, click **Previous** to return to Step 1 of 6.). Select **Labels** as the document type, and click **Next: Starting document** to continue.
6. When **Step 2 of 6** is displayed, click **Label options ...** to pick the label that your school uses in this situation. Select the **Tray** to be used on the printer. Click **OK** to accept the settings. Now you will see all your mail merge codes and bar codes formatted to your Avery label format. Then click **Next** to proceed to Step 3 of 6.
7. When **Step 3 of 6** is displayed, click **Next: Arrange your labels**. We will not be making any changes on Step 3 of 6.
8. When **Step 4 of 6** is displayed, place the cursor in the first label and click **Postal bar code**.
9. When the **Insert Postal Bar Code** form is displayed, select **StudentZip** from the drop-down menu, and click **OK** to save the change.
   Note: The message "ZIP code not valid!" indicates that the ZIP code data has not yet been loaded. This will happen during the merge process later.
10. Move the cursor to the second line on the first label. On the Mail Merge Wizard menu, click **More items**.
11. When the **Insert Merge Field** form is displayed, select a merge code for each field to appear in the label. For example, in the **Last Name** field, select the merge code **StudentLastName**. Continue to create the label format by adding the fields you require.
12. From the Mail Merge Wizard menu on **Step 4 of 6**, select **Update all labels** to duplicate the label format for every label, and click **Save** to save the changes.
13. **Save** and **Close** the document file **AM-NL.doc** and return to the CampusNexus Student **Activities Code Setup** form and click **Save** and **Close**.

You are ready to test your mail merge labels.

Part 3 - Test Your New Mail Merge Labels

To test your new labels, select a few leads or students and assign the "activity" that represents your new labels.

1. Select a student using the Recent Students list or the Search tool.
2. Select **View** > **Contact Manager > Activities**. The Contact History form is displayed.
3. Click **Add Activity** to open the Activity form.
4. Select the**Activity**from the drop-down list that represents your new label. In our example, this is "AM-New Lead Label".
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.
6. Repeat steps 1 through 5 for a few more students; at least enough students to fill a couple of rows of the label form so you can see how the spacing works out. When you have enough students (or leads) selected, go on to the next step.
7. Navigate to **Daily > Contact Manager > Letters**. The Print Letters form is displayed.
8. Select the grid line that describes your new labels. Under **# to Print**, you should see the number of student records you selected for the test. In our example, we will print labels for six (6) students.
9. Click **Print Letter**. CampusNexus Student calls Microsoft Word and Word opens the file containing the data for the selected students. The data is merged with the label format and displayed on your screen. This process could take a little while, depending on how many students you selected. Be patient.
10. Load your label forms paper into the printer tray you specified earlier.
11. From the Word menu, select **File > Print** (or press **Ctrl+P**) to print your labels.
12. Click **File > Exit** to close Microsoft Word and return to CampusNexus Student. Word asks a couple of questions about saving changes to the forms. You will normally click **No**to these questions.
13. When you return to CampusNexus Student, it will ask if you want to clear the student count for your label form. As with other letters or activities, you would normally say **Yes**. If you think you may have to reprint the labels for any reason, say **No**.

If you find that your labels need a little adjusting, go back to the beginning of Part 2. When you click **Edit Letter**, the program finds your label "letter" and starts Word with the formatted label document. You can edit the document just like you would any other letter. See your Microsoft Word manual for more details on editing mail merge documents.

Automatic Activity Scheduler

You can set up an automatic procedure to assign your new label "activity" to students based on some triggering condition. In our new lead example, you could cause the label to be printed for each new lead that enters the system. See the topics on Activity Scheduler for more information on this procedure.

Multiple Disbursements

Customers who purchase a CampusNexus license can use the Multiple Disbursements feature to schedule more than one disbursement per payment period (or term) in an automated fashion. Though CampusNexus Student has always allowed for the manual addition of disbursements, there has never been an option via Disbursement Schedules to facilitate the scheduling of more than one disbursement. The exception is for the regulatory requirement when awarding a Direct Loan and using the configuration to specify a minimum number of disbursements per loan.

Multiple Disbursements can be used to automate the determination of disbursements dates, as opposed to using Disbursement Schedules (which is disabled when a customer enables Multiple Disbursements), and still limit the process to a single disbursement per payment period or term. This significantly reduces the amount of annual maintenance of some configurations under **Lists > Financial Aid**, and allows institutions to define the structure for their disbursements dates via a set of rules so that they automatically populate the dates desired.

Note: The Multiple Disbursement feature relies on the use of Term Association for Term based programs; it is important to ensure Term Association is configured and maintained. Multiple Disbursements cannot support Program Versions offered via Non-standard Term. It is important for users to evaluate their programs before activating this feature. A campus that offers Programs via Non-standard Term should not activate Multiple Disbursements. Options to facilitate Non-standard Term in this matter are under consideration for a future release.

Having an active CampusNexus license is essential to use CampusNexus features. If you do not have a license, you will be able to see some aspects of some features (via the user interface and Help), and you may learn what options you will gain with CampusNexus, but the screens will show clear reminders that feature activation requires the license.

Note: Before using Multiple Disbursements features, set up the required system and campus level definition rules. See Configuring Multiple Disbursement Definitions.

Configuring Multiple Disbursement Definitions

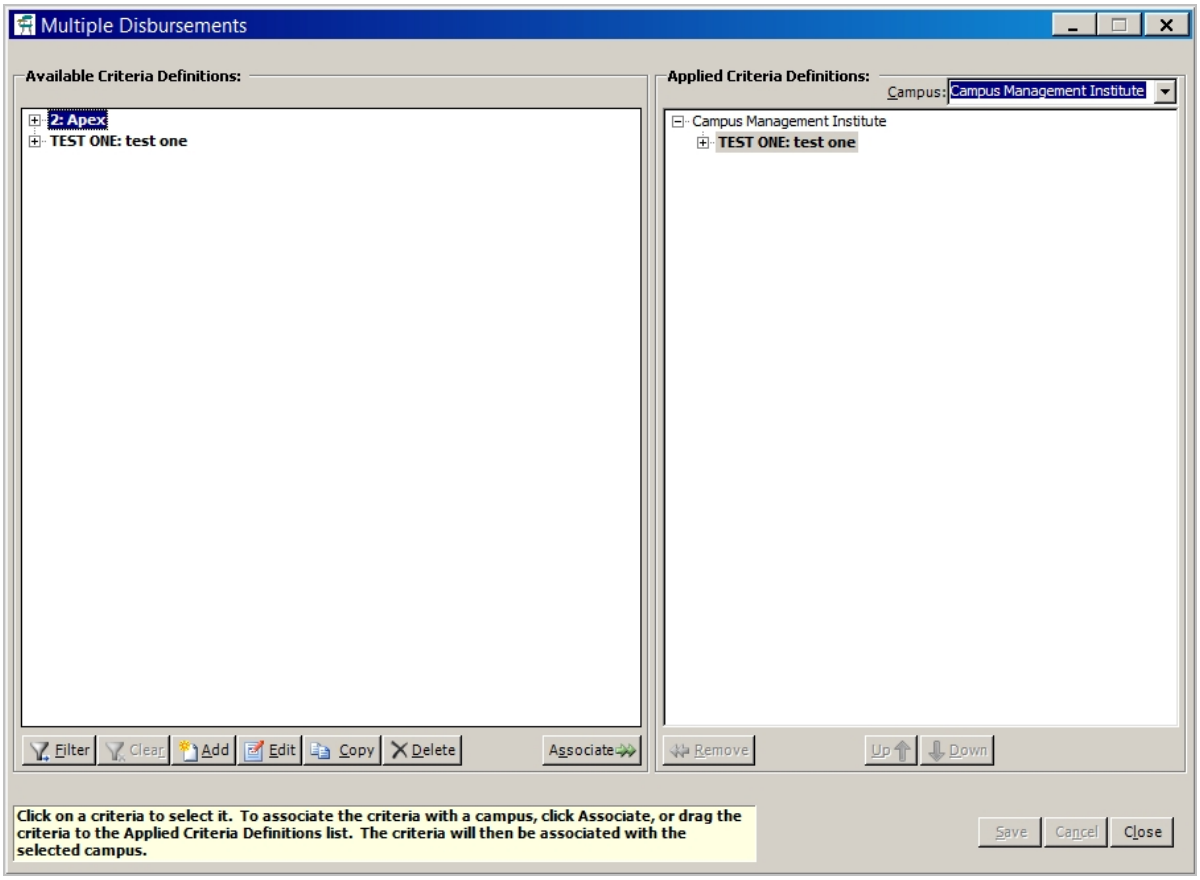
Before enabling the Multiple Disbursements feature in the Financial Aid tab of the of the Campus Information form, the Multiple Disbursement Criteria Definitions must be created and saved for the campus being configured. The Multiple Disbursements form allows users to perform a variety of configuration tasks (e.g., add, edit, copy, delete, and associate their rules to a campus) for Multiple Disbursements. The form supports Drag and Drop capability. There is also a Filter function so that after rules have been established, the user can filter for specific items to see rules that have specific conditions.

The Multiple Disbursements feature uses rules created in several areas of CampusNexus Student. The Multiple Disbursements form contains Criteria Definitions that enable users to perform a variety of configuration tasks that can be driven by the institution's business rules concerning Multiple Disbursements.

Note: If the Definitions are not configured for a campus, an error message is displayed when the Enable Multiple Disbursements check box is selected on the Campus Information form's Financial Aid tab.

Rules in the Applied Criteria Definitions section of the Multiple Disbursement form are applied in order, so it is important for institutions that opt to configure a variety of rules that the most specific rules be at the top of the list. If a very general rule is at the top (for example, no specific information about population and set to assign X% of payment period) and it is followed by a very specific rule (for example, a rule for first-time borrowers living in the state of Tennessee), the dates would likely be assigned by the first rule rather than the second rule, because Multiple Disbursements looks to see if a date can be assigned and would move to subsequent criteria only if it cannot be defined by the preceding rule.

1. Navigate to: **Tools > Financial Aid > Multiple Disbursements**. The Multiple Disbursements form is displayed.



2. Select a **Campus**.
3. Drag and drop Definitions from the **Available Criteria** to the Applied Criteria list as needed, or select the Available

Criteria and click **Associate** to move the Definition.

4. Drag and drop definitions from the Applied Criteria list to the Available Criteria list to remove them, or select Definitions on the Applied Criteria Definitions list and click **Remove** to move them back to the Available Criteria Definitions list.
5. Click **Filter** to filter the Available Criteria list.
6. Click **Clear** to clear the filter, allowing a new filter to be created.
7. Click **Add** to add a Definition.
8. Select a Definition and click **Edit**to change the Definition properties using the Multiple Disbursement Editor.
9. Select a Definition and click **Copy** to create a new definition with the same properties for later editing.
10. Select a Definition and click **Delete** to remove it from the Available Criteria list.
11. Select a Definition in the Applied Criteria list and click **Up** to move the Definition higher on the list,.
12. Select a Definition in the Applied Criteria list and click **Down** to move the Definition lower on the list
13. Click **Save** to save the settings.
14. Click **Cancel** to cancel changes.
15. Click **Close** to close the form.

Field Descriptions

Field	Description
Filter	Activates the filter window
Clear	Clears the filter and shows all criteria
Add	Adds a new criteria and its associated rules
Edit	Opens the Multiple Disbursements Editor form, to edit the selected Definition Criteria
Copy	Copies the Definition Criteria and opens a new copy of it in the Multiple Disbursements Editor
Delete	Deletes the selected Definition Criteria
Associate	Associate the selected Definition Criteria with a campus
Remove	Removes the selected Definition Criteria
Up/Down	Moves the selected Definition Criteria up or down as needed

Enabling Multiple Disbursements

Selecting the Enable Multiple Disbursement check box on the Financial Aid tab of the Edit (Campus) form activates the process for the specified campus. Doing so instructs CampusNexus Student to not allow the use of Disbursement Schedules, and that the rules a client configures will be used to determine disbursement dates. Ensuring that this feature works properly requires testing before deployment into a production environment. Once tested, best practice would be to configure the rules during an off-peak time to complete the process and test without an impact to packaging.

Note: Before using Multiple Disbursements features, set up the required system and campus level definition rules. See Configuring Multiple Disbursement Definitions.

1. Navigate to: **Setup > Campus Locations**. The Campus Locations form is displayed.
2. Select a campus.
3. Click **Edit**. The Campus Information form is displayed.
4. Select the **Financial Aid** tab. The Financial Aid tab content is displayed, containing the Enable Multiple Disbursements and Auto Recalculate Multiple Disbursements check boxes. If Enable Multiple Disbursements is not selected, the Auto Recalculate Multiple Disbursements screen element remains unavailable for selection (appears dimmed).
5. Select the **Enable Multiple Disbursements** check box. The Auto Recalculate Multiple Disbursements screen element is enabled, and the associated check box is cleared.
6. Click **Save** to save the settings.
7. Click **Cancel** to cancel changes.
8. Click **Close** to close the form.

Auto Recalculate Multiple Disbursements

With Multiple Disbursements, users structure disbursement dates via a set of rules which then automatically populate the dates desired. The Recalculate Multiple Disbursements feature can be configured to automatically reevaluate scheduled and canceled disbursement dates under specific conditions. Though CampusNexus Student has always allowed for the manual evaluation of disbursement dates, there has never been an option to facilitate an automatic reevaluation of more than one disbursement. This feature can be used, for example, if the Student Pace Evaluator were to be run for a student, and the Payment Period dates shift, there might be some cases where a disbursement date would also need to shift.

Note: Before using Multiple Disbursements features, set up the required system and campus level definition rules. See Configuring Multiple Disbursement Definitions.

Having an active CampusNexus license is essential to use CampusNexus features. If you do not have a license, you will be able to see some aspects of some features (via the user interface and Help), and you may learn what options you will gain with CampusNexus, but the screens will show clear reminders that feature activation requires the license.

Enabling Auto Recalculate Multiple Disbursements

Selecting the Auto Recalculate Multiple Disbursements check box on the Financial Aid tab of the Edit (Campus) form triggers a reevaluation of the scheduled and canceled disbursement dates under specified conditions. Disbursements in a scheduled status can be reevaluated but those that have been paid or batched to send can not be reevaluated using this feature. CampusNexus Student will use configuration settings from the Configure Multiple Disbursements form to reevaluate scheduled disbursements when specific information is changed, like payment period dates, state, or residence for rules that are different based on state, or when a student changes courses or has different course start dates.

Note: Before using Multiple Disbursements features, set up the required system and campus level definition rules. See Configuring Multiple Disbursement Definitions.

1. Navigate to: **Setup > Campus Locations**. The Campus Locations form is displayed.
2. Select a campus.
3. Click **Edit**. The Campus Information form is displayed.
4. Select the **Financial Aid** tab. The Financial Aid tab content is displayed, containing the Enable Multiple Disbursements and Auto Recalculate Multiple Disbursements check boxes.
5. If Enable Multiple Disbursements is not checked, select it now. The Auto Recalculate Multiple Disbursements screen element becomes available for selection.
6. Select the **Auto Recalculate Multiple Disbursements** check box.
7. Click **Save** to save the settings.
8. Click **Cancel** to cancel changes.
9. Click **Close** to close the form.

Multiple Disbursement System Settings

With Multiple Disbursements, users structure disbursement dates via a set of rules which then automatically populate the date(s) desired. The Multiple Disbursements feature can be configured to automatically exclude weekends and/or holidays when determining disbursement dates, or use the state on the student's ISIR to determine the date of a disbursement (state laws may require disbursements to occur on specific dates or under specific conditions). While CampusNexus Student Financial Aid Automation (FAA) allows for the configuration of exclusions, this feature is not available outside of CampusNexus Student FAA without purchasing a CampusNexus license.

Note: Before using Multiple Disbursements features, set up the required system and campus level definition rules. See Configuring Multiple Disbursement Definitions.

Having an active CampusNexus license is essential to use CampusNexus features. If you do not have a license, you will be able to see some aspects of some features (via the user interface and Help), and you may learn what options you will gain with CampusNexus, but the screens will show clear reminders that feature activation requires the license.

Configuring Multiple Disbursements System Settings

Configuring the Multiple Disbursements System Settings creates a set of rules that are used across all campuses in relation to how Multiple Disbursements will handle weekends, holidays, and the legal state of residence from a student's ISIR in determining the dates of disbursements.

Note: Before using Multiple Disbursements features, set up the required system and campus level definition rules. See Configuring Multiple Disbursement Definitions.

1. Navigate to: **Setup > Financial Aid > Packaging tab**. The Financial Aid - Settings form is displayed.
2. Select the **Multiple Disbursements** tab. The Multiple Disbursements options in the Packaging section is displayed.
3. Select **Yes** in the Exclude Weekends line to instruct the Multiple Disbursements feature to not count weekend days when calculating disbursement dates across all campuses.
4. Select **No** in the Exclude Weekends line to instruct the Multiple Disbursements feature to count weekend days when calculating disbursement dates across all campuses.
5. Select **Yes** in the Exclude Holidays line to ensure that disbursement dates do not fall on a scheduled holiday when calculating disbursement dates across all campuses. The default is No.
6. Select **No** in the Exclude Holidays line to ensure that disbursement dates may fall on a scheduled holiday when calculating disbursement dates across all campuses.
7. Select **Yes** in the Use State from ISIR line to instruct the Multiple Disbursements feature to refer to the student's legal residence on their ISIR, in accordance with the institution's policy on using the ISIR instead of the Student Master for the student's residence.
8. Select **No** in the Use State from ISIR line to instruct the Multiple Disbursements feature to refer to the student's legal residence on their current Student Master, in accordance with the institution's policy on using the Student Master for the student's residence. The default setting on this line is No.
9. Click **Save** to save the settings.
10. Click **Close** to close the form.

Configuring Additional Multiple Disbursement Criteria

The Disbursement Approval Criteria Code Setup form contains the Additional Multiple Disbursement Criteria tab, where users can refine Multiple Disbursement Criteria. Configuring these settings ensures that the institution's business rules for Multiple Disbursements are maintained.

While the initial disbursement criteria set up in CampusNexus Student can be used in Multiple Disbursements (by clicking the Copy Initial button), an institution may not want to make the subsequent disbursements dependent upon specific GPA conditions (if they are monitoring the results of GPA at the conclusion of the semester, for example).

Note: Before using Multiple Disbursements features, set up the required system and campus level definition rules. See Configuring Multiple Disbursement Definitions.

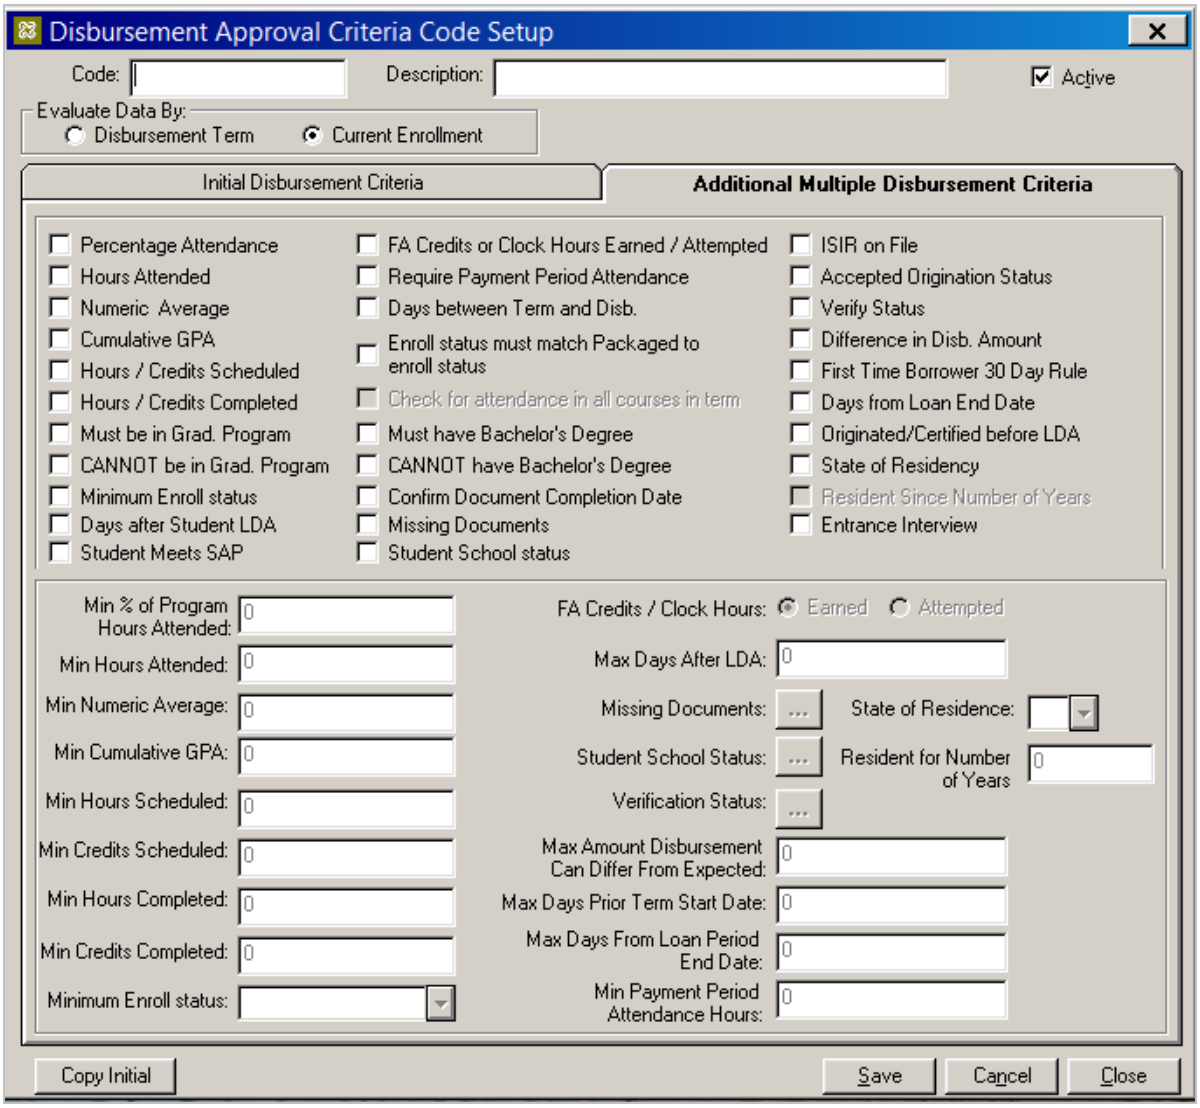
1. Navigate to: **Lists > Financial Aid > Disbursement Approval Criteria**. The Disbursement Approval Criteria Code Setup form is displayed.
2. Select the **Additional Multiple Disbursement Criteria** tab. The Additional Multiple Disbursement Criteria tab is displayed.
3. Click **Copy Initial** to copy over the criteria configured in the Initial Disbursement Criteria tab.
4. Updates this form as needed to conform with the institution's business rules associated with Multiple Disbursements. For more information about the fields on this form, see Disbursement Approval Criteria.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Multiple Disbursements Forms

To ensure that the Multiple Disbursements feature is used properly, several forms have been created or updated. Where necessary, clients who have not purchased a CampusNexus license will see a message informing them that they may see and configure Multiple Disbursement related settings, but the feature will not work without a license.

Disbursement Approval Criteria Code Setup Form

The Disbursement Criteria tab has been renamed the Initial Disbursement Criteria tab of the Disbursement Approval Criteria Code Setup form, for institutions that have purchased a CampusNexus license. The Additional Multiple Disbursement Criteria Tab enables campuses to configure Initial Disbursement Criteria, and then copy the criteria to the Additional Multiple Disbursement Criteria tab so that the criteria can be changes for disbursements that occur after the first one.



Field Descriptions

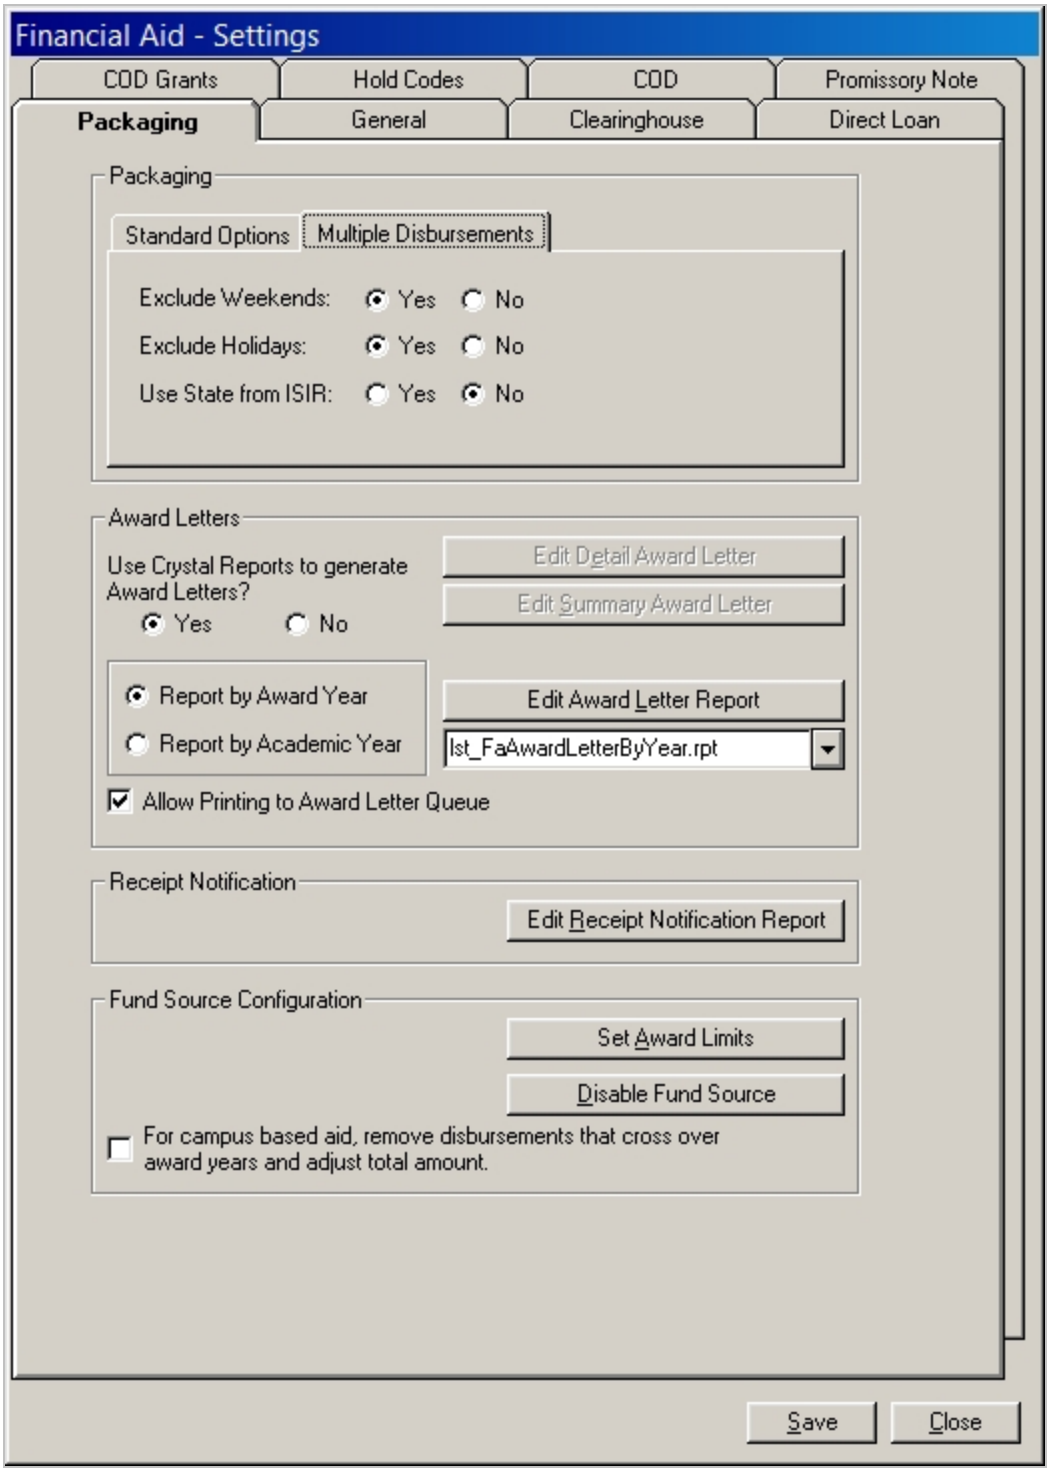
Field	Description
Copy Initial	This button takes all set attributes of the initial disbursement and carries them over to the Additional Multiple Disbursement Criteria tab. Note that is if the user sets the information on the Additional Multiple Disbursement Criteria tab and then clicks Copy Initial, it may overwrite this information.

Field	Description
Initial Disbursement Criteria	This tab contains the criteria originally configured in the Disbursement Criteria tab of the form.
Additional Multiple Disbursement Criteria	Reproduction of the Initial Disbursement Criteria tab, where criteria can be changed for subsequent disbursements.

System Configuration of Multiple Disbursements Form

There are two levels of configuration for the Multiple Disbursements feature, one set at the campus level, and another for the entire institution (system level). System level configuration consists of setting up the way Multiple Disbursement calculates the number of days between disbursements, and where the student's legal state of residence is gathered.

Note: When Yes is selected for Exclude Weekends and Exclude Holidays, the disbursement date will be the next available business day after the weekend or holiday, except in cases where that date would be outside the Payment Period or Term. In those cases, the disbursement date will pull back to the day prior to the weekend or holiday.



Field Descriptions

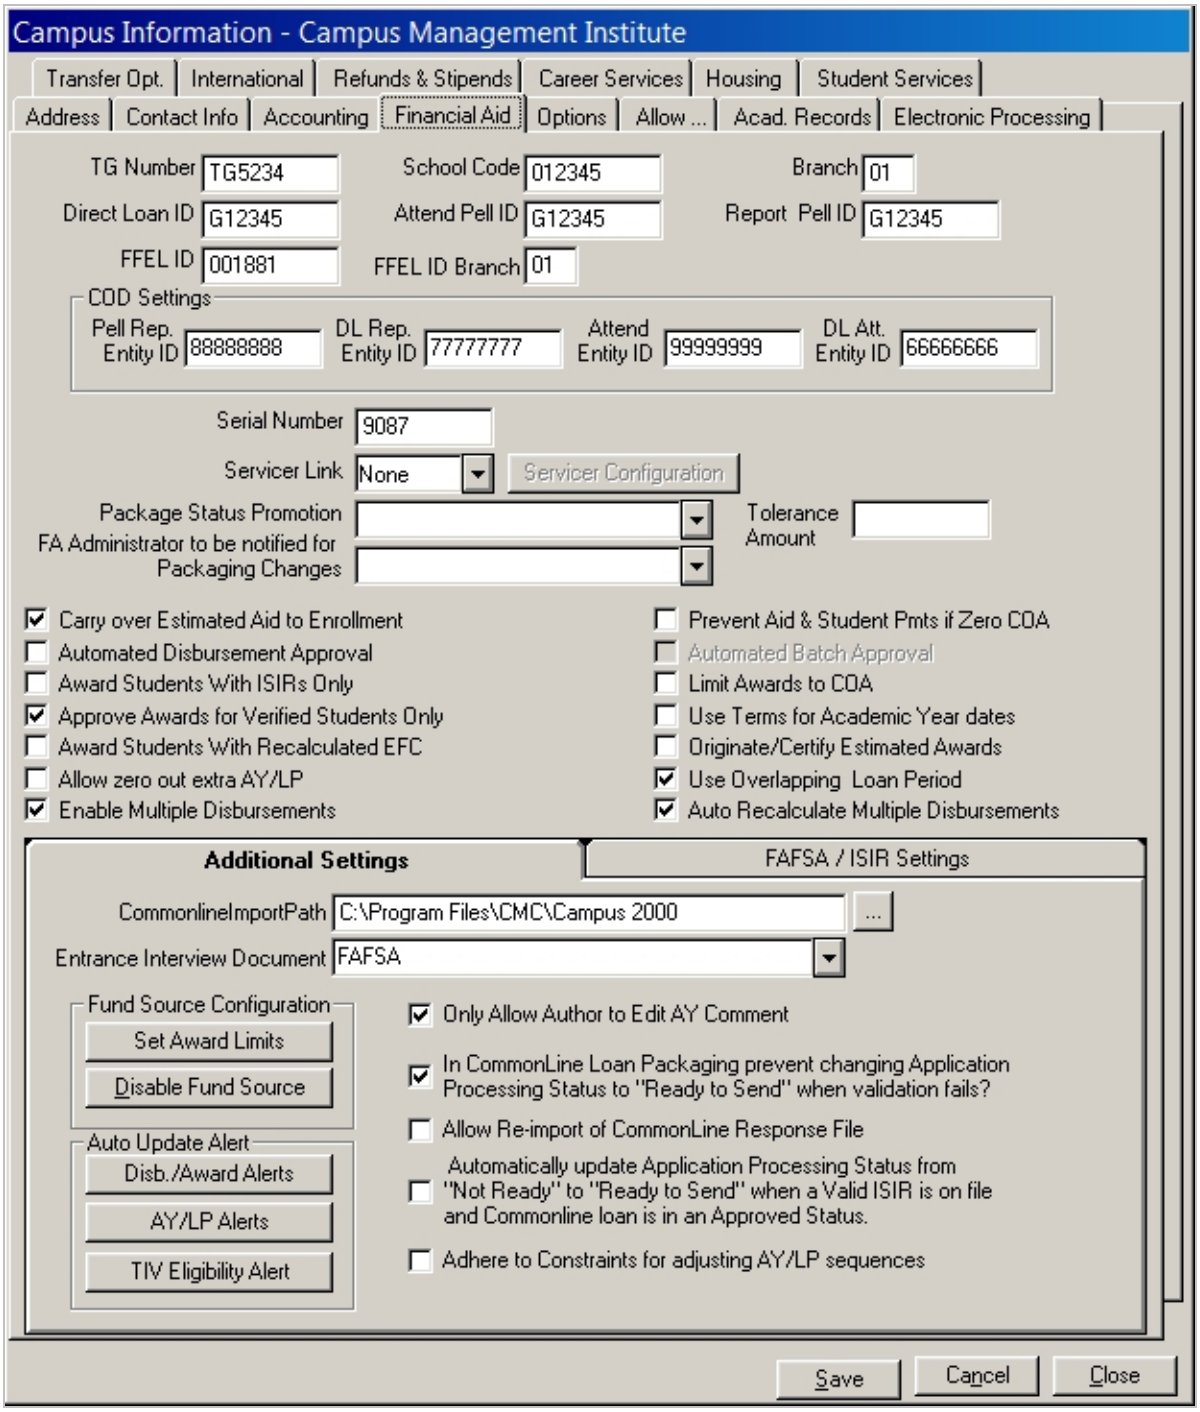
Field	Description
Exclude Weekends	System-wide option that allows users to exclude weekends when disbursement dates are being determined. The default on this configuration is Yes but clients may choose to set the option to No if they wish to have disbursement dates that include weekend dates.

Field	Description
Exclude Holidays	System-wide option that ensures that disbursement dates will not fall on a scheduled Holiday (via Lists > Academic Records > Calendar). The default on this option is No.
Use State from ISIR	System-wide option that allows users to specify if the institution's policy is to use the state from the Institutional Student Information Record (ISIR). The default on this option is No. If left as No, or if the student does not have an ISIR, the system always uses the state of residence from the Student Master.

Multiple Disbursement Configuration in Campus Information

The Campus Information form's Financial Aid tab is used to configure various packaging properties, including those used by Multiple Disbursements. Multiple disbursements can be enabled or disabled, and the Auto Recalculate function of this feature is also controlled from this form.

Having an active CampusNexus license is essential to use CampusNexus features. If you do not have a license, you will be able to see some aspects of some features (via the user interface and Help), and you may learn what options you will gain with CampusNexus, but the screens will show clear reminders that feature activation requires the license.

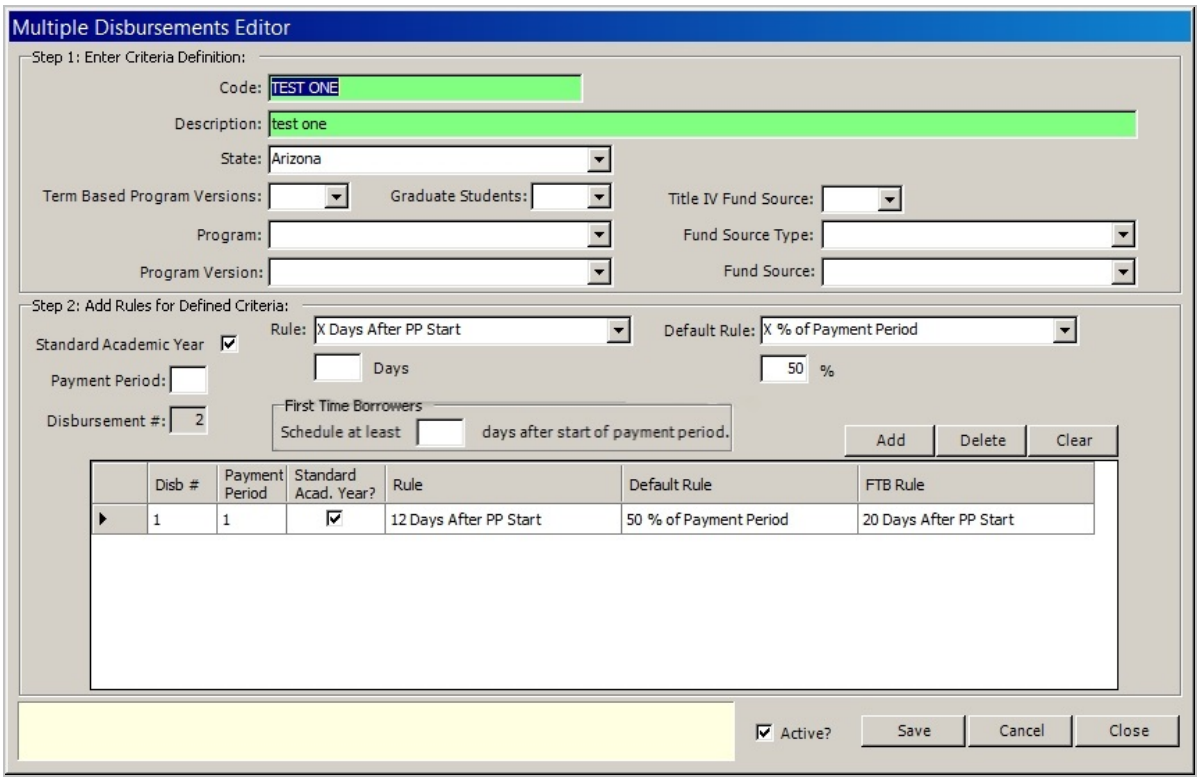


Field Descriptions

Field	Description
Enable Multiple Disbursements	Selecting the Enable Multiple Disbursement check box activates the Multiple Disbursements feature for the specified campus. Once you activate the process, CampusNexus Student will not allow the use of Disbursement Schedules and the configured rules are used to determine disbursement dates. **Note**: Before using Multiple Disbursements features, set up the required system and campus level definition rules. See Configuring Multiple Disbursement Definitions.
Auto Recalculate Multiple Disbursements	Selecting the Auto Recalculate Multiple Disbursements check box triggers a re-evaluation of the scheduled and canceled disbursement dates under specific indicated conditions (such as payment period dates, state or residence for rules that are different based on state, or when a student changes courses and maybe has different course start dates). The re-evaluation will not occur when a disbursement has been paid, or batched to send. However, disbursements that are still in a scheduled status can be re-evaluated. This check box is cleared by default.

Multiple Disbursements Editor Form

The Multiple Disbursements Editor allows the user to configure Criteria Definitions, so that the rules of that Definition can be employed when setting up the Applied Criteria Definitions of the Multiple Disbursements form.



Field Descriptions

Field	Description
Program	Filter Program versions. If not selected, all Programs apply.
Program Version	Use to select Program version. If not selected, all Program versions apply.
Fund Source	Use to select Fund Source. If not selected, all Fund Sources apply.
Degree Level (Under-graduate or Graduate)	Filters both Program and Program Versions based on selection. If not selected, all Graduate Levels apply.
State	Use to select a State. If not selected, all States apply.
Term Based Program Versions	Filters both Program and Program Versions based on selection. If not selected, all Financial Aid Academic Calendars apply.
Title IV Fund Sources	Filters Fund Source based on selection. If not selected, Title IV and non-Title IV Fund Sources apply..
Fund Source Types	Filters by Fund Source Type. If not selected, all Fund Source Types apply.
X% of Payment Period	Enter 1 to 100 for % and 0 to 999 for days.

System Setup Overview

There's no getting around it. Setting up CampusNexus Student for a new institution is a lot of work! Because there is so much flexibility built into CampusNexus Student, you as the system administrator (SA) must express the policies and procedures of your school in terms that CampusNexus Student can understand. To do this, you will enter information in the tables that CampusNexus Student uses to process data flowing into and out of the system.

You will do much of the initial setup work in two forms (screens) accessed from the menu bar on the CampusNexus Student main menu. These are the Setup Menu and the Lists Menu.

If you are not logged into CampusNexus Student as the system administrator, you may not see one or more of these menu options due to security considerations. To add or change system setup options, contact your SA and request the necessary adjustments.

From the Setup Menu, the SA will set several system parameters by which to.

- Identify your campus(es)
- List your staff members
- Assign security (access rights and permissions)
- Define student status codes
- Customize the data dictionary
- Create school-defined fields
- Designate field-level security
- Define setup options at the module level (if required)

The Lists drop-down menu is module-oriented. The SA can select each module and set up the related lists of codes, descriptions, and parameters that are required in each module. Other topics in the Help system describe each list in each module in detail.

Localization for International Schools

Many features in CampusNexus Student take into account the requirements of international schools (i.e., institutions based outside of the U.S.). Date and time formats, currency symbols, address field length, mailing labels, telephone numbers, Social Security number (or other government-issued identification number), and paper size (A4) for reports are a few of the considerations that have been addressed. Many CampusNexus Student forms accommodate these requirements. The program uses data masks and settings based on the user's sign-on ID. In the case of student, staff, employer, and agency addresses, the program bases its formatting of labels and other address-sensitive documents on the country selected in the address.

In the Data Dictionary, you can change the names of fields in the tables to conform to local language and usage.

System-wide features:

- Telephone number and SSN fields are standard text boxes that allow entry of 16 characters. For each country in the Countries table, you can enter a phone data mask and an SSN data mask. The program will use these masks to fill the telephone and SSN fields on screen forms as required. For instance, when a country appears on an address form, the masks for that country control the format of the SSN and telephone fields.
- Date formats for on-screen forms can be customized using the regional settings accessible through the Windows Control Panel. In Windows 7, for example, the date format can be customized by navigating to **Start > Control Panel > Clock, Language and Region > Region and Language (Formats tab) > Additional settings... > Date (tab)**. For instance, in some countries the preferred date format is **d/M/yyyy**, i.e., 29/7/2011.
  For additional information, see Customizing the Date Format.
- Currency symbols do not appear on on-screen forms in which money amounts are displayed.
- Reports can been modified to fit on A4 paper. Currency symbols for money amounts on reports are controlled by a variable in the campus setup. Date formats for reports are configured at the workstation level based on the user's regional settings in Windows.

Setup Considerations

Keep in mind when you are setting up a school in a country other than the United States, change the labels on some data fields to reflect local usage. For instance, if the local country has a different name for a "Social Security Number (SSN)", you can change it by finding the SSN field in the SyStudent table through **Setup > Data Dictionary** and changing the label. Note that there may be several tables and forms in which a student's SSN might appear. Financial Aid forms are a good example.

Setup > Campus Locations > Campuses > Campus Information > Address

The address of the campus includes a Country field. The country selection affects the formatting of dates, phone numbers, and currency on reports. The country code of the user's default campus governs this formatting process.

Setup > Campus Locations > Campuses > Campus Information > Allow

The system prints labels from the Student Master in a defined label format. To accommodate international address labels, the format will vary. There is an option to define a report label format to be used instead of the system defined label format. The option is "Use Report Label Format for Student Labels?" If you select this option, the program will prompt for a report file name. If this option is not selected, the program will use the generic label format.

Setup > Campus Locations > Campuses > Campus Information > Options

Entry fields are provided for the currency symbol to be used on reports and the position of the currency symbol with respect to the amount. The fields are SyCampus.CurrencySymbol and SyCampus.CurrencySymbolPosition.

Setup > Staff > Staff Members > Home Address and Work Address

The Country code in these addresses will affect formatting of dates, SSN, and phone numbers in the staff member's record.

Lists > Admissions > Countries

The Countries Code Setup form includes a Default Phone Mask (16 characters) and a Default SSN Mask (16 characters). Set up the two mask fields for each country in which the school does business or from which it receives students.

Valid characters for the mask fields are:

+ Plus sign

- Hyphen

(Open parenthesis

) Close parenthesis

Octothorpe (place-holder for 0 – 9)

. Period

Space - Embedded spaces only, no leading or trailing spaces.

No other characters are accepted in the mask fields.

Toolbar > Search Reference Address

The Phone field is a 16-character text box. When searching for telephone numbers in schools having multiple countries represented in student addresses, it is not possible to assume a phone number format.

Toolbar > Recent Student List

The Recent Student List control is designed to accommodate the 16-character SSN format.

View > Contact Manager > Transcript Request
Daily > Contact Manager > Process Transcript Requests

On the Transcript Request form, when adding a new College as the addressee, the College form will include a country field. When adding an Other address, the form also includes a country field.

View > Any Module > Student > Print Label

The Print Label procedure uses the label format of the user's default campus. You can select the generic label format or a customized label, which is formatted with Crystal Reports. The label format is selected under **Setup > Campus Locations > Campus Information > Allow**.

Mail Merge

Daily > Contact Manager > Letters

The Mail Merge procedure uses the regional settings on the user's workstation for date formatting in letters.

Currency Designator for Reports

The report form handles formatting of dates on the report according to the regional settings used for the workstation date format. Currency symbols are set based on the user's default campus setting.

Customizing the Date Format

CampusNexus Student allows users to configure date formats through the Windows Control Panel.

While the default date format is the U.S. standard **mm/dd/yyyy**, the de facto standard in much of the world outside of the United States is **dd/mm/yyyy**.

By customizing the regional settings through the Windows Control Panel of the application server that is running CampusNexus Student, users can display dates in any other format that may be needed.

For specific instructions on customizing the date format using Windows regional settings through the Control Panel, refer to the corresponding Microsoft support documentation.

Note: Each time a new date format is applied using this procedure, you must fully exit CampusNexus Student and restart the application.

Error Handling

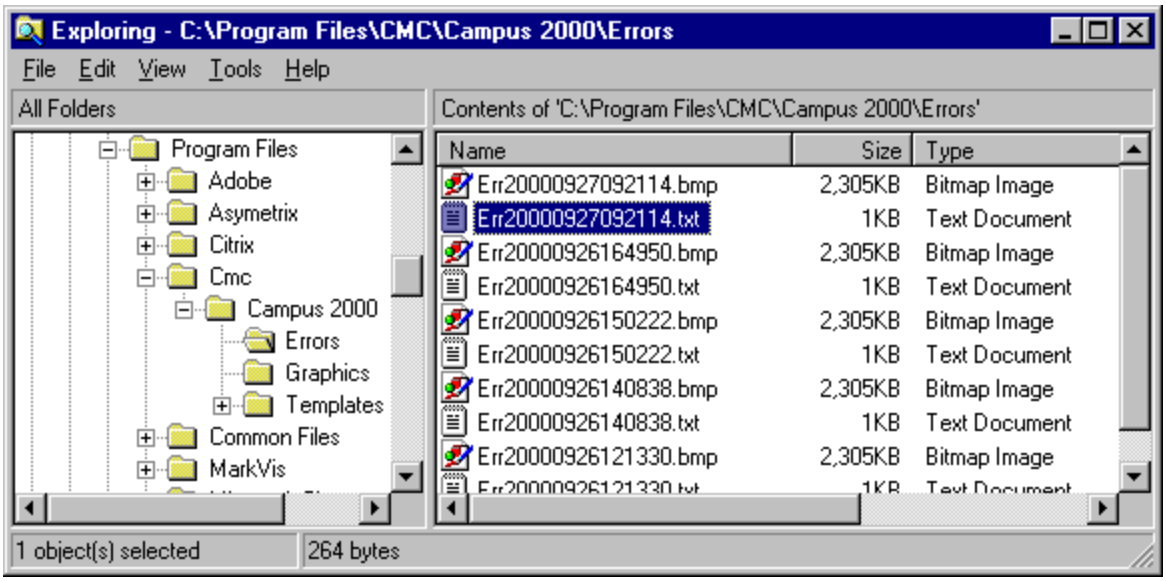
Even the most extensive testing of CampusNexus Student sometimes does not catch an error. Sometimes an error that occurs on a user's computer cannot be duplicated in the Anthology Inc. test system. Therefore, the program includes an error trap routine that captures information when that rare error that was missed in QA does occur.

Whenever a user gets an error, CampusNexus Student saves a screen image and a text file to disk. The files will be created in the `C:\Program Files\CMC\CampusNexus Student\Errors` folder (or the folder where the CampusNexus Student client program is installed). There will be a .txt and a .bmp file created - the file name will be ErrYYYYMMDDHHMMSS. Files over two weeks old will be deleted when users sign on to CampusNexus Student.

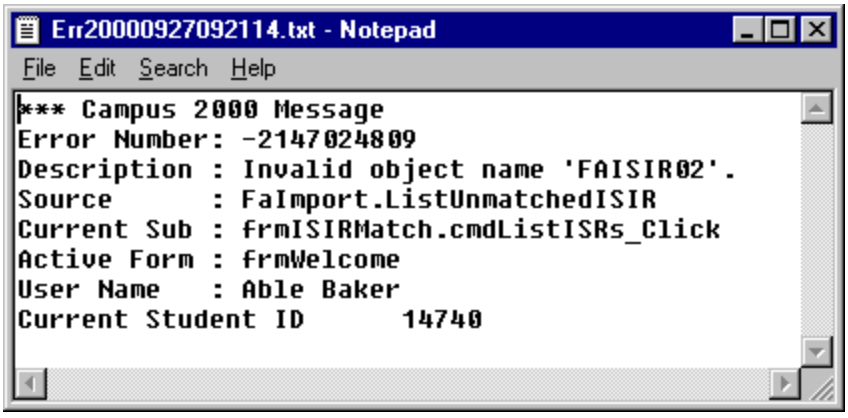
In addition, when errors are logged on the server, they will be logged as Informational messages and not Severe.

You (or the Anthology Inc. Support Rep) can use Windows Explorer to find the Errors subdirectory on your machine and examine the files.

Use Explorer to Find Error Documentation Files.



Double-click the .txt file to open it in Notepad.



Double-click the .bmp file to open it in Windows Paint.

When errors are reported to the Anthology Inc. Customer Support Department, this documentation can be valuable in determining the cause of the error. See the "System Messages" topic for more about messages that you might see when running CampusNexus Student.

System Messages

From time to time CampusNexus Student or other software that is used with it, will display messages on your screen. Here are some of the messages, what they mean, and what you can do about them. If you do not see your message here, ask your system administrator (SA) what they mean. If the SA cannot explain them, he or she will ask the Anthology Inc. support department for assistance.

Please report to your SA any messages that you see that result in stopping or closing the program on your workstation. Try to get a picture of the message if at all possible. One way to do this is to press the key combination **Ctrl+Print Screen**. This captures a picture of your screen on the Windows Clipboard. Open a blank Word document and press the **Ctrl+V** key combination to paste the clipboard image into the document. Type the circumstances under which the message appeared in the same document with the image. Print the document, or better yet, e-mail it to your SA.

If you don't have access to Microsoft Word, you do the same sort of thing with a Windows accessory program called Word Pad. Just open a new Word Pad document and paste in the image from the clipboard.

If you don't have either of these document programs available, please write down as much information as you can gather about the problem message and what you were doing at the time it occurred. Forward your notes to your SA, who will in turn forward the information to Anthology Inc..

Hour Glass

The Hour Glass icon, other a similar icon, is displayed on your screen when the program is busy doing something behind the scenes (so to speak). This is a basic Windows signal. It applies to the work being processed in the currently active window. When it appears, please wait until it disappears before continuing your work. Attempting to continue before the hour glass goes away will not give you the desired results.

Switch to … Retry

The Switch to ... Retry message occasionally appears when the program is busy processing data and you are trying to do something else. If you click on a button, or another form, or try to close a form before the program completes the previous task, this message may appear. It usually occurs when the program is trying to obtain control of a record in the database for updating, or is searching for data that is being used by someone else, or something of a similar nature. If you click the Switch to button, the program will switch to the procedure that is running. If you click the Retry button, the program will try again to perform your request (to close a form, etc.) You must click one or the other to close the message.

In rare cases, the process that is causing the message cannot proceed for some technical reason. Please report these incidents to your SA with as much detail as possible about the circumstances as possible. The SA will forward your information to Anthology Inc. for a programming adjustment.

Error 91--Object variable or With block variable not set.

This error occurs sometimes after program modifications or new data items are added to CampusNexus Student. You cannot continue with the procedure in which the error occurred until it is fixed. We try hard to find and eliminate this type of problem prior to the release of changes. However, if it should occur, please follow the procedures outlined above for recording the circumstances under which the error occurred and sending the documentation to Anthology Inc. via your SA.

Error 94--Invalid use of null.

This error occurs sometimes after program modifications or new data items are added to CampusNexus Student. When you are working with a form, you may have left blank a field required by the program. When you save the form, the program sees the blank field as having nothing in it (null). If you cannot find the blank field on the form and put something in it, you cannot continue with the procedure in which the error occurred until it is fixed. We try hard to find and eliminate this type of problem prior to the release of changes. However, if it should occur, please follow the procedures outlined above for recording the circumstances under which the error occurred and sending the documentation to Anthology Inc. via your SA.

System Codes

This topic consists of various and sundry codes used in CampusNexus Student. Usually, the codes are "hard coded" (written into the program code) in the program or they are in tables that the user cannot access via the user interface. This is done because the program must count on these codes for control of the system. Some times the codes are a little cryptic in nature so we have included them here for documentation purposes.

Academic Calendar Year Codes (Also see Payment Methodologies)

1. Credit Hours - non-standard terms
2. Credit Hours - standard terms of quarters
3. Credit Hours - standard terms of semesters
4. Credit Hours - standard terms of trimesters
5. Clock Hours
6. Credit Hours without terms

Campus Groups

The system requires at least one campus group named "All Campuses". All campuses are automatically assigned to this group. See Campus Groups under the Setup menu for more on campus groups.

Campus License Units (CLU)

In program version setup, programs can be designated as "full license units" or "half license units". Certain processing restrictions (such as financial aid packaging) are applied to program versions that are "half license units".

F - Full CLU
H - Half CLU

Contact Manager Activity (Event) Types

E-mail
Incoming Phone Call
Letter
Meeting
Message
Other Task
Outgoing Phone Call

Direct Loan Grade Level Codes

Description	Code
1st year undergraduate/never attended coll	0
1st year undergraduate/attended college be	1
2nd year undergraduate/sophomore	2
3rd year undergraduate/junior	3
4th year undergraduate/senior	4
5th year/other undergraduate	5
1st year Graduate/professional	6
Continuing graduate/professional and beyor	7

Direct Loan Origination Status

N - Not ready to send to COD[1]
R - Ready to send to COD
B - Batched to send to COD
A - Accepted by COD
E - Rejected by COD
X - Pending Credit Decision

Disbursement Option

Advanced Funding. The school re-authorizes funds to be held in reserve for use throughout the year. If the school gets close to its authorization limit, it must submit a re-quest for additional funds before any disbursement of funds that causes the school to go over its limit.

Just-in-Time. The origination records from the schools will be used to automatically set and reset authorization limits.

For 1999-2000 Pell, ED is not requiring all schools to switch to Just-In-Time. However, by 2000-2001, this is slated to be a requirement. Schools that are on reimbursement will stay on the Advanced Funding disbursement option.

Disbursement Status

N - Not Ready to Send to COD
R - Ready to Send to COD
B - Batched to send to COD
A - Accepted by COD
E - Rejected by COD

FAFSA Status Codes

A - Accepted
E - Rejected
N - Not Ready to send
R - Ready to send
S - Sent

FAGL Fund Types

G - GAPS
P - Federal Pell Grant
S - Federal SEOG
W - Federal Work-Study
K - Federal Perkins Loan
D - Direct Loan - GAPS
L - Direct Loan - Program Fund
F - FFEL
O - Other (Non-Title IV Fund)

FAGL Fund Authorization Types (Distribute Authorization)

C - By Campus
D - By Direct Loan ID
S - By Serial Number

---

[1]Common Origination and Disbursement

Financial Aid Disbursement Status Codes

A - Approved for disbursement
E - Estimated
P - Pending

Financial Aid Packaging Status Codes

These statuses are hard coded, entered by the program, and not edited by users.

Packaged
Not Packaged

Financial Control Codes

1. Public
2. Private, Nonprofit
3. Proprietary

Institution Type Codes

1. Less than one year
2. One year or more but less than two years
3. Two years or more but less than three years
4. Three years or more but less than four years
5. Four years (baccalaureate degree)
6. Five years or more.

Instructor Pay Codes

In the Distance Education features of the system, lessons, exams, and book reports are flagged with a code which the user can change to one of these options. See Lesson Grades for more on instructor pay codes.

Y = Yes, pay the instructor
N = No, do not pay the instructor
P = Paid (The instructor has been paid.)

Module Identifier Codes

Each module of CampusNexus Student has components such as database tables, form, reports, and so on. The codes below are included in the names of such components to identify them as originating in a given module.

Module Codes

Module Code	Module
AD	Academic Records
AM	Admissions
BS	Bookstore
CM	Contact Manager

Module Code	Module
DE	Distance Education
FA	Financial Aid
LM	Loan Management
PL	Placement
SA	Student Accounts
SS	Student Services
SY	System

Payment Methodologies (Also see Academic Calendar Year Codes)

Formula 1 = Credit Hour - Standard terms in which the fall through spring terms are equal to or greater than 30 weeks, or the academic year exceeds the definition of an academic year and the school has a waiver.

Formula 2 = Credit Hour - Standard terms in which the fall through spring terms are less than 30 weeks without a waiver.

Formula 3 = Credit Hour with Standard or Non-Standard terms.

Formula 4 = Clock Hour or Credit Hour without terms.

Formula 5 = Nonresident portion of a program offered by correspondence without terms. (Distance Ed.)

Payment Type Codes

C = Cash
E = EFT
H = Check
N = Non-Cash
R = Credit Card

PLUS Credit Decision

A - Credit Accepted
N - Credit denied
C - Credit overridden; new credit information provided
E - Credit overridden; endorser OK
D - Credit denied; endorser not OK
X - Pending

Promissory Note Print Options

F = On-site
R = COD prints and returns to school
S = COD prints and sends to borrower
Z = Reprint at the COD

Promissory Note Status

N - Not ready to print
R - Ready to Print
P - Printed
S - Signed
X - Pending
A - Accepted by COD
E - Rejected by COD

Required Course Types

When setting up courses, you will indicate what type of course it is. CampusNexus Student has a few type codes from which you can select. Or, you can add your own course types to the list which is maintained at Lists > Academic Records > Course Type. The course type codes provided by CampusNexus Student are:

Clinical
Externship
Hands On
Laboratory
Lecture

Required Transaction Codes

In the Student Accounts module, there are a few transaction codes that are required by the system to be present in the table. See Transaction Codes under Academic Records on the Lists menu for more on transaction codes.

BOOK = Books
EXAMR = Exam Retake Fee
EXTCRSE = Course Extension Fee
EXTLSN = Lesson Extension Fee
INT = Interest
LESSONR = Lesson Retake Fee
REG = Registration Fee
TUIT = Tuition

Retake Indicator

Courses that are retaken: In the AdEnrollSched database file, the Retake indicator for the previous course will be an R. In the subsequent retake course, the Retake indicator will be an asterisk (*).

Staff Groups

The system requires certain staff groups. See Staff Maintenance Form for more on staff groups. The required staff groups are:

System Administrator
Director of Admissions
Admissions Reps
Financial Aid Advisors
Academic Advisors
Instructors
Placement Advisors

Status Categories

A - Active
C - Applicant Processing
E - Enrollment
G - Graduate - Placement
I - InSchool - Placement
L - Lead
N - Never Attended
P - Permanent Out
T - Temporary Out
W - NDS Never Attended
X - NDS Enrollment
Y - NDS Active
Z - NDS Permanent Out

Stipend Schedule Status Codes

Student Stipend Schedules are controlled by the user through hard coded status codes. Stipends are accessed through View > Financial Aid > Packaging or through View > Student Accounts > Stipend Schedule. Individual stipend disbursements can also be cancelled and "re-expected" while viewing the student's stipend schedule.

A - Approved (necessary to process disbursements)
C - Canceled
E - Estimated
H - Hold
P - Pending Approval

Student Status Codes

Student Status Codes are made up of a combination of school-defined descriptions and predetermined system codes. These codes are discussed in detail in Status Codes which is an option on the Setup menu.

Student Status Codes in a Class Section

C - Current
D - Dropped
P - Grade Posted

System-Required Student Master Fields

Some data entry fields on the student master form are required by CampusNexus Student. Data must be entered in these fields regardless of additional school requirements.

Last Name
First Name
Lead Date
Admissions Rep

Transaction Type (Code)

Financial transactions in the Student Accounts module are given a transaction type code. These codes appear on the Transaction Report.

C = Credits
P = Payments
D = Debits
I = Invoice

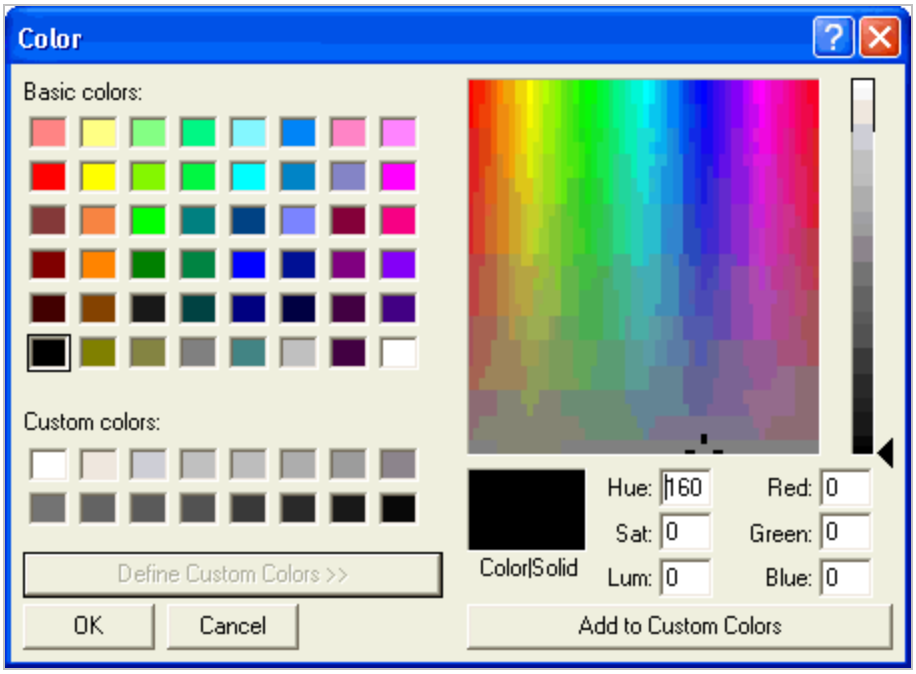
Set Background Color

The color of the work area field can be set to something other than the default.

To set the background color of the work area:

1. Right-click anywhere inside the work area.
2. When the pop-up menu is displayed, select **Set Background Color**. The follow form is displayed.

3. Select a background color by clicking the square with the desired color. If the color you desire is not displayed on the Color form, you can click the **Define Custom Colors** button to display an expanded form to use to define a specific color. You also have the option of adding your specific color to the **Custom colors** list by clicking the **Add to Custom Colors** button after you have defined your color.



4. Click **OK** to display the new color in the work area. This color will remain set for the user until changed by the user.

Shortcuts and Access Keys

This table is a list of frequently used key combinations. Some of them are specific to CampusNexus Student and some are commonly used in all Windows applications.

Shortcuts

Key	Description
Alt	Activate or inactivate menu bar mode.
Alt+Down Arrow	Opens a drop-down list when the list box has focus.
Alt+Tab	Display next primary window (or application).
Alt+Esc	Display next window.
Alt+Spacebar	Display the control panel menu for the main application window.
Alt+Enter	Display property sheet for current selection.
Print Screen	Capture desktop image to the Clipboard.
Alt+Print Screen	Capture active window image to the Clipboard.
Ctrl+.(period)	Print an image of the CampusNexus Student window.
Ctrl+E	Edit the data on a form.
Ctrl+F	Find a student, open search dialog.
Ctrl+F4	Close the active form.
Ctrl+L	Open the Quick Lead Entry form.
Ctrl+N	Start a new student master record.
Ctrl+P	Open the Print dialog box.
Ctrl+Q	Cancel the changes to the active form.
Ctrl+S	Save data on the active form.
Ctrl+Z	Restore previous data in a field before you save it or leave it.
Esc	Cancel
Ctrl+Esc	Access the Start button in taskbar.
F1	Open the CampusNexus Student Help Library.
F3	Go to the next student.
Alt+F4	Close the active window.
F5	Refresh the active form.
Alt+F6	Switch to next window within the application.

Key	Description
Shift+F10	Display popup menu.
Spacebar	Select (same as mouse button 1 click).

Windows Key Shortcuts

On many keyboards there is a pair of keys with Microsoft Windows icons on them. Typically, they are somewhere near the **Alt** and **Ctrl** keys. On notebook computers, one or more Windows keys may be located elsewhere on the keyboard.

There are several Windows key shortcuts that you can use to simplify various operations. Here is a list of the shortcuts and their effects.

Windows Keys

Key Combination	Effect
Windows Key	Displays taskbar and Start menu
Windows Key+E	Starts Windows Explorer
Windows Key+F	Finds files or folders
Windows Key+Ctrl+F	Finds a computer
Windows Key+M	Minimizes all windows
Windows Key+Shift+M	Restores all windows
Windows Key+R	Displays the Run dialog box
Windows Key+Tab	Cycles through the taskbar buttons
Windows Key+ Break	Displays the System Properties sheet

Accessibility Keys

Support for these key combinations and sequences is set by users with the Windows Accessibility Options. Pressing the combination for a particular mode toggles it from On to Off or Off to On, depending on which mode it is in when you press the keys.

- High Contrast Mode - **Left Alt + Shift Print Screen**
- MouseKeys - **Left Alt + Left Shift + Num Lock**
- StickyKeys - **Shift, Shift, Shift, Shift, Shift** (press the **Shift** key five consecutive times)
- FilterKeys (SlowKeys, RepeatKeys, and BounceKeys) - **Right Shift** held down for 8+ seconds
- ToggleKeys - **Num Lock** held down for 5+ seconds

Mouse Vs. Keyboard

CampusNexus Student accommodates the user who prefers to use his or her mouse while working with the program, as well as the user who prefers to use the keyboard rather than reach for the little creature beside it. Wherever possible the designers have

made both options available as you work. On menus and forms, look for the "shortcut keys" if you prefer selection from the keyboard. Otherwise, just click away.

Note: There are settings in Windows that causes the "shortcut keys" or (as Windows refers to them) "keyboard navigation indicators" to be hidden until you press the **Alt** key. To turn this option off (make your "shortcut keys" always visible, follow the steps below.

Windows 2000:

1. From the Windows **Start** button, select **Settings**, then select **Control Panel**.
2. Select the **Display** icon or option, then select the **Effects** tab.
3. Clear the check box labeled **"Hide keyboard navigation indicators until I use the Alt key."**
4. Click **OK** to save the change.
5. Close the Display and other windows until you are back on the desktop.

Windows XP:

1. From the Windows XP **Start** button, select **Control Panel**, and then select **Appearances and Themes**.
2. Select the **Display Icon**, and then select the **Appearances Tab**.
3. Click **Effects**.
4. Clear the check box labeled **"Hide underlined letters for keyboard navigation until I press the Alt key**."
5. Click **OK** to save the change.
6. Close the forms until you are back to the desktop.

In the Help system, whenever we say "click", for the sake of brevity, we really mean point to your desired option with your pointing device (mouse, trackball, slider pad, and so on) or select it using the keyboard.

In the illustration below, "S" is the shortcut key for opening the selected student's master record form.

Admissions View Menu

Use your pointing device (mouse) to select a folder:

1. For example, select the **View** option on the main menu at the top of the CampusNexus Student window.
2. Slide the pointer down to highlight the **Admissions** option.
3. Slide the pointer to the left to see the submenu.
4. Click (with the left mouse button) on a submenu option to see the related form.

To use your keyboard instead of your mouse:

When you see **"Alt+W"** or some other similar key combination, it means press and hold down the **Alt** key (either one) and, while holding Alt down, press the indicated letter (**W** in this example). Do not forget the arrow keys on your key board are great for moving between options. For another example in CampusNexus Student, when no other form has the focus (is currently active), pressing **Alt+F** will open the **File** menu. You can then use the arrow keys to move from one option or sub-option to another.

Another keyboard example:

1. Press the **Alt+V** key combination. The **View** menu will drop-down from the main menu.
2. Press **A** for Admissions. Alternatively, you could use the down-arrow key to highlight the Admissions option. The folder list will appear beside the View menu.
3. Type the underlined letter in the option you want to select.
4. Or, use your **down arrow** key to highlight the folder or form you want to view and press the**Enter** key to select the folder or form.

More About Pointing Devices and Keyboards

Please refer to your Windows User Guide or Help topics for more information on using the mouse or other pointing device and for tips on using the keyboard for selecting options and objects on the desktop and in application windows.

Shortcut Menus

CampusNexus Student often offers you shortcut menu when you right-click in a window or form. An example of a shortcut menu is shown below. This menu appears when you right-click any blank spot in the main CampusNexus Student work area.

Sequence of System Setup Procedures

The initial setup of CampusNexus Student must be done in an organized manner to ensure a successful start-up. The tables below provide guidance about the order in which the many parameters, variables, and tables can be approached.

Some of the more complex tables require references to entries in code lists that have already been populated with school-related data. For example, you cannot assign an instructor to a class section until the instructor is set up as a staff member. Many other such relationships exist between lists and tables. Where dependencies exist that do not follow the general schema of the installation procedure, it is so noted in the help text for the setup sequence.

It is important that you follow the setup sequence shown in the following topics.

1. The sequence begins with high-level system-wide utilities that are set up by the system administrator in the System Setup menu.
2. Functions that pertain to detailed reports, security and utilities are typically set up by the system administrator in the System Setup menu.
3. Functions that pertain to student and staff records of all kinds are set up by the system administrator in the System Setup menu.
4. Functions that pertain to reports, and lists and reports of all kinds are set up by the system administrator in the Lists menu. Academic Records are set up last because they depend on data and parameters in previously set up tiers.

Some lists and parameters are populated in one module but are also required in other modules. An example would be the Program code list which is set up in Academic Records. These codes are also referenced, with respect to a lead or a student, in Admissions and Financial Aid.

In the tables that follow, each module is represented. The modules are arranged in the suggested setup order. Within each module, the lists and system parameters are listed in the suggested setup order. If a particular list is not mentioned in the table, the setup order is not significant and can be handled as the need arises and time permits.

System-wide variables are those that pertain to the entire system. They are set by the system administrator using the System Settings form accessed from the Setup option on the main menu bar. CampusNexus Student provides default values for most of these fields. You can customize the values for your institution.

Generally, you can use whatever codes and descriptions are understood in your institutional environment. In some cases, such as student status codes, you must relate your codes and terminology to codes that CampusNexus Student understands. Examples of these parameters and lists can be found in other topics in the Help system. Click on a link in the table below to read the related Help topic.

Setup Sequence: System

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
1.	Setup	System-Wide Variables					
1.1	System.	Enter some basic information that will control your system.	Setup				

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
1.1.1	Company Name. Enter a corporate or company name.	This is the name that will appear in the title bar of the main CampusNexus Student window for all campuses. It is not the name of the campus, which is entered elsewhere.	Setup	System	Initial Setup	N/A	Corp
1.1.2	Student Groups by Campus. Select Yes or No.	Select Yes to limit the users to student groups for campuses to which the users have access.	Setup	System	Initial Setup	N/A	Corp
1.1.3	Required Fields Color. Select the background color of required fields to be shown on CampusNexus Student forms.	Some data is required by CampusNexus Student for proper operation. You can designate additional fields as required for your school.	Setup	System	Initial Setup	N/A	Corp
1.1.4	Language. Select the language to be used for field labels on forms.	The options are English, Spanish, and Other. If you select Spanish or Other, you may need to modify the label names in the data dictionary.	Setup	System	Initial Setup	N/A	Corp
1.1.5	Recent Student Count. Enter the number of student names to be shown in the drop-down list of recently accessed student records.	Twenty (20) seems to be a good round number.	Setup	System	Initial Setup	N/A	Corp

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
1.1.6	Form to Open. Select the form to open when a student is selected from the Recent Student list.	The options are Student Master form, current form, or none.	Setup	System	Initial Setup	N/A	Corp
1.1.7	Letter Path. Enter the directory path to letters used in CampusNexus Student.		Setup	System	Initial Setup	N/A	Corp
1.1.8	Custom Reports. Enter the path to be used to store custom reports designed for or by your school.	When a user selects a report from a button or menu option, CampusNexus Student will look first in this folder for a report file with the appropriate name (for instance, a customized transcript). If the program does not find such a report in your Custom Reports folder, it will look in the system reports folder.	Setup	System	Initial Setup	N/A	Corp
1.1.9	Use NT Security. Select Yes or No.	If you select Yes, persons who can log into your NT network are authorized to log into CampusNexus Student. See the Help topic for more details.	Setup	System	Initial Setup	N/A	Corp

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
1.1.10	Allow Duplicate SSNs. Select Yes, No Duplicates in Database, or No Duplicates in Campus.		Setup	System	Initial Setup	N/A	Corp
1.1.11	ID to Display. Select the student ID to be displayed on forms.	The options are Student ID, Enrollment ID, or SSN.	Setup	System	Initial Setup	N/A	Corp
1.1.12	Default ID on Reports. Select the student ID to be used as a default on reports.	The options are Student ID, Enrollment ID, or SSN.	Setup	System	Initial Setup	N/A	Corp
1.1.13	Search Results. Enter the maximum number of rows that the search procedure is to return when you use the student search procedure.	A zero in this field indicates that all matches are to be displayed in the resulting grid. This does not apply to the employer search tool.	Setup	System	Initial Setup	N/A	Corp
1.1.14	Default Search. Select the field in which the cursor will first appear when using the student search tool.	The options are Last Name, Student ID, Enrollment ID, or SSN.	Setup	System	Initial Setup	N/A	Corp
1.1.15	Report Time-Out. Enter the number of seconds that the report processor will wait for data to be collected before canceling the print job.		Setup	System	Initial Setup	N/A	Corp

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
1.1.16	Allow Global Search. Select Yes or No.	Allow Student search across all campuses in the system or limit the search to the Users campus list.	Setup	System	Initial Setup	N/A	Corp
1.1.17	Student Form. Select Short or Long.	Select the format of the student master form to use when adding or editing student data. The short format is shown in the display mode. The long form opens when adding or editing to accommodate additional code search features.	Setup	System	Initial Setup	N/A	Corp
1.1.18	Prevent Web Access. Select Yes or No.	Choose Yes to restrict Web Access and No to have Web Access. Yes will make the "Help on the Web" option on the Help Menu unavailable.	Setup	System	Initial Setup	N/A	Corp
1.1.19	Allow Dynamic GroupsSelect Yes or No.	Allow Student Dynamic Groups? If you select no, the pro-gram will not allow users to create dynamic student groups.	Setup	System	Initial Setup	N/A	Corp

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
1.1.20	File Server. Select the server where the CampusNexus Student shared folders reside.	Select the appropriate file server.	Setup	System	Initial Setup	N/A	Corp
1.2	Campus Locations. Refer to the related Help system topics for details.	Enter the names, addresses, and other data about your campus (es).	Setup	Campus - System-wide list	Initial Setup	N/A	Corp
1.3	Staff Groups.First, set up all the staff groups you think you are going to need.	You will have to assign each staff member to at least one group when you set them up.	Setup	System	Initial Setup	N/A	Corp
1.3.1	Staff. Enter data for as many staff members as possible and form appropriate staff groups.	A staff member can belong to more than one group.	Setup	System	Maintenance	3.16	Corp
1.4	Security.	Set up staff group security.	Setup	System		N/A	Corp
1.5	Status Codes.	Add or edit school terminology for student status codes. Includes the background colors on the student master form for the various statuses.	Setup	System	Initial Setup	N/A	Corp
1.6	Contact Manager Setup		Setup				Corp
1.6.1	Enable Contact Manager Security Policies. Check or clear this option as required.	See the Help topic for details.	Setup	System	Initial Setup	N/A	Corp

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
1.6.2	Policy Name. Add Contact Manager security policies for your staff groups.	See the Help topic for details.	Setup	System	Initial Setup	N/A	Corp
1.6.3	E-Mail. Enter information about your e-mail server and default return address.						
1.7	Admissions Settings		Setup				
1.7.1	Student ID Option. Select an option for your students' ID format.	Sequential number, School-Formatted ID, or no ID number.	Setup	System	Initial Setup	N/A	Corp
1.7.2	Student ID Format. If you elect to use a school-defined student ID format, select the components that make up the ID.	You can choose a combination of date, name, and numeric components for your school's student ID format.	Setup	System	Initial Setup	N/A	Corp
1.7.3	Student ID. You can enter the next sequential number to be assigned as a student ID. This number is used in either of the ID formats mentioned above.	CampusNexus Student does not allow duplicate student IDs to be assigned. If the next number in sequence has already been used, the program will skip over it.	Setup	System	Initial Setup	N/A	Corp

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
1.7.4	Duplicate Name/Phone. Select Yes or No.	If you select Yes, CampusNexus Student checks for duplicate entry of leads immediately after you enter a lead name and telephone number. If you select No, it waits until you save the lead entry form to check for duplicates.	Setup	System	Initial Setup	N/A	Corp
1.7.5	ISIR Settings. Enter the ISIR settings appropriate for your school.	See the Help topic for more details.	Setup	System	Initial Setup	N/A	Corp
	The lead's Social Security Number (SSN) is used as the matching criteria. If the ISIR Lead Flag is set to No, data from unmatched ISIRs is ignored and the other three ISIR-related options below have no affect on the system.	Setup	System	Initial Setup	3.12	Corp	
		Setup	System	Initial Setup	3.13	Corp	
		Setup	System	Initial Setup	1.3	Corp	

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
1.7.6	Master on Quick Lead. Set the default option to open or not open the Student Master after entering a quick lead.	Select Yes to open the student master form after entering a quick lead.	Setup	System	Initial Setup	N/A	Corp
1.7.7	Duplicate Lead Selection. Select Yes or No.	Allow user to select leads found during duplicate check that belong to campuses to which the user has no access?	Setup	System	Initial Setup		
1.7.8	Design The Quick Lead Form. The Additional tab contains a list of Quick Lead Template forms. You can design the Quick Lead forms for your school.	Select the fields for your Quick Lead forms and the order in which they are to appear.	Setup	System	Initial Setup	N/A	Corp
1.8	Financial Aid Settings		Setup				
1.8.1	Packaging. Enter the number of days to hold financial aid for first time students.		Setup	System	Initial Setup	N/A	Corp
1.8.2	Edit Detail Award Letter. Click this button to edit your detailed financial aid award letter in Microsoft Word.		Setup	System	Initial Setup	N/A	Corp
1.8.3	Edit Summary Award Letter. Click this button to edit your summary financial aid award letter in Microsoft Word.		Setup	System	Initial Setup	N/A	Corp

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
1.8.4	Edit Receipt Notification Report. Click this button to edit notices of financial aid receipt.	See details in the Help topic. This option requires access to Crystal Reports.	Setup	System	Initial Setup	N/A	Corp
1.8.5	General. You can set up fund source security, FAFSA controls, and FAGL functions.		Setup	System	Initial Setup	N/A	Corp
1.8.6	Clearinghouse. Indicate whether you are using the clearinghouse or not. If so, choose the reporting method and withdrawal date method.		Setup	System	Initial Setup	N/A	Corp
1.8.7	Direct Loan. If you school uses Direct Loans, enter the necessary data.	Direct Loan ID, drawdown requests, disclosure statements, etc.	Setup	System	Initial Setup	N/A	Corp
1.8.8	Pell	Disbursement Export. Include Disbursements at status "Scheduled" Yes/No. Disbursements Scheduled in the number of days - determine that number	Setup	System	Initial Setup	N/A	Corp
1.8.9	Hold Codes. Set up hold code options and signals.						
1.9	Student Accounts Settings		Setup				

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
1.9.1	Edit Enrollment Fees. Allow the user to edit the tuition, books, fees, etc., when the enrollment record is added?	Yes or No.	Setup	System	Initial Setup	N/A	Corp
1.9.2	Earnings Method. Select the method to be used for earning tuition.	None or Monthly.	Setup	System	Initial Setup	N/A	
1.9.3	Require Term Codes. Require term codes to be entered when posting charges and adjustments?	Yes or No.	Setup	System	Initial Setup	N/A	Corp
1.9.4	Delete Charges/Drop. Delete charges dated after drop date when dropping a student?	Yes or No.	Setup	System	Initial Setup	N/A	Corp
1.9.5	Delete Charges/No Show. Delete charges the charges from the ledger card when the student status is set to No Show or Cancel?	Yes or No.	Setup	System	Initial Setup	N/A	Corp
1.9.6	Revenue Reference Number. This number will be incremented and used as a reference when you command CampusNexus Student to generate revenue recognition transactions once a month.		Setup	System	Initial Setup	N/A	Corp

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
1.9.7	G/L Format. Enter the format of your general ledger account number.		Setup	System	Initial Setup	N/A	Corp
1.9.8	G/L Batch Number. Enter the next batch number to be used when preparing export batches from CampusNexus Student to your G/L system.		Setup	System	Initial Setup	N/A	Corp
1.9.9	Allow Posting. Choose to allow posting to any campus or to default campus only.		Setup	System	Initial Setup	N/A	Corp
1.9.10	Deposits Posting. Choose to allow deposit posting to any campus or to default campus only.		Setup	System	Initial Setup	N/A	Corp
1.9.11	GL/AP Package. Select the accounting package that is used in conjunction with CampusNexus Student.	At this time, the choices are Great Plains and Other. Note that SBT Pro Series is no longer supported in CampusNexus Student.	Setup	System	Initial Setup	N/A	Corp
1.9.12	GL Release Type. Select the type of transaction that is to be delivered to the accounting package.	The options are Detail and Summary.	Setup	System	Initial Setup	N/A	Corp

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
1.9.13	Integrate with Great Plains. Answer N/A, Yes, or No.	Does your CampusNexus Student system share data with Great Plains? In other words, will CampusNexus Student validate GP account numbers, pass transactions to GP, get data from GP for CampusNexus Student reports, and so on.	Setup	System	Initial Setup	N/A	Corp
1.9.14	Integrate Checks with Great Plains. Answer N/A, Yes, or No.	Does your CampusNexus Student system share data with Great Plains for printing accounts payable checks?	Setup	System	Initial Setup	N/A	Corp
1.9.15	Integrate Bank Reconciliation with Great Plains. Answer N/A, Yes, or No.	Are the refund and stipend checks printed in CampusNexus Student integrated into the Great Plains process for bank reconciliation.	Setup	System	Initial Setup	N/A	Corp

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
1.9.16	Apply Payment Flag. Should CampusNexus Student apply a payment to outstanding charges? Yes or No.	This option is a default. If you choose Yes, you can elect to not apply a payment at the time of the transaction. If you choose No, you can elect to apply a payment at the time of the transaction.	Setup	System	Initial Setup	N/A	Corp
1.9.17	Print Receipt Flag. Should CampusNexus Student print a receipt for payments received? Yes or No.	This option is a default. If you choose Yes, you can elect to not print a receipt at the time of the transaction. If you choose No, you can elect to print a receipt at the time of the payment transaction.	Setup	System	Initial Setup	N/A	Corp
1.9.18	Schedule Stipends?	Prevent Stipends if Institutional Charges> amount package?					Corp
1.9.19	Limit Stipend Amount? Prevent stipend amount scheduled from exceeding amount packaged for specified fund source?	Yes or No.					
1.9.20	Refund Calc Date. Which date should be used as the effective date when calculating refunds.	Drop Date or Last Date Attended.					

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
1.9.21	Disburse Stipends? Prevent Stipends if Fund Not Posted?	Yes or No.					
1.9.23	QT Default Bill Code. Assign a default billing code to imported QuickTouch transactions that have no billing code specified?	Yes or No.					
1.9.24	Bank Accounts. Select the default bank accounts for each campus. These are the accounts that will used (unless you choose a different one) when bank deposits are processed.	This option is under the Additional tab on the Student Accounts Settings form.	Setup	Campus	Initial Setup	4.2,1.1.1	Corp
1.9.25	G/L Link. Enter the general ledger account numbers that relate to the CampusNexus Student transaction codes.	This option is under the Additional tab on the Student Accounts Settings form.	Setup	Campus	Initial Setup	4.1,1.1.1	Corp
1.9.26	Revenue Tab. Select the format of the Revenue Recognition Report.	Detail or Summary.					
1.10.	Academic Records Settings	Set up some basic parameters concerning required data for start date, term code, rooms, enrollment number, and enrollment number format.	Setup				

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
1.10.1	Require Start Date. Require the use of the start date table for enrollment?	Yes or No.	Setup	System	Initial Setup	N/A	Corp
1.10.2	Require Term Code. Require terms for class schedules?	Yes or No.	Setup	System	Initial Setup	N/A	Corp
1.10.3	Require Rooms. Require rooms for class schedules?	Yes or No.	Setup	System	Initial Setup	N/A	Corp
1.10.4	Enrollment Number. Enter the next enrollment number.		Setup	System	Initial Setup	N/A	Corp
1.10.5	Enrollment Number Format. Design the format of your custom enrollment number.		Setup	System	Initial Setup	N/A	Corp
1.10.6	Custom Transcript. Select the file to be used when printing a transcript.						
1.10.7	Use Individual Custom Transcript? Select Yes or No.	Do you want to use the generic transcripts for individual students or your own custom transcripts?	Setup	System	Initial Setup	If yes, design transcript.	Corp
1.10.8	Use Batch Custom Transcript?Select Yes or No.	Do you want to use the generic transcripts for batches of students or your own custom transcripts?	Setup	System	Initial Setup	If yes, design transcript.	Corp

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
1.10.9	Hold Codes. Set up hold codes for student groups.	Hold codes can prevent students from being registered in class sections or from having transcripts printed.	Setup	System	Maintenance	Groups	Corp
1.10.10	Enrollment. Select forms to be displayed when enrolling students.	You can elect to see the document tracking, registration, enrollment fees, and/or ledger card forms in addition to the enrollment forms.	Setup	System	Initial Setup	N/A	Corp
1.10.8	OMR Scanning Setup. If your school will use a scanning device for attendance and grades, enter the necessary interface data.	Select form files and locations,COM port, and tardiness percentage.	Setup	System	Initial Setup	N/A	Corp
1.11	Distance Education Settings	Set up the payment schedule for DE instructors. Set charges for lessons by program or course. Set Hold Code Groups.	Setup				
1.11.1	Instructors. Enter payment scheduling information for your DE instructors.		Setup	System	Initial Setup	N/A	Corp
1.11.2	Program Rates. Enter student billing rates for your DE programs.		Setup	System	Initial Setup	2.17	Corp

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
1.11.3	Course Rates. Enter student billing rates for your DE courses.		Setup	System	Initial Setup	2.16	Corp
1.11.4	Hold Criteria. Enter the criteria for setting up hold groups.		Setup	System	Initial Setup	N/A	Corp
1.12	Career Services Settings	Select statuses for new Career Services masters and for placements.	Setup				Corp
1.13	Report Maintenance.	Use this option to customize generic CampusNexus Student reports for your school. This option requires access to Crystal Reports. See the Help topic for details.	Setup	System	Initial Setup	N/A	Corp
1.14	Web Interface.	If your school wishes to make CampusNexus Student data available to your students and staff, use this form to set it up. Anthology Inc. recommends that you consult with CampusNexus Student Support before attempting to set up this feature.	Setup	System	Initial Setup	N/A	Corp

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
1.15	Data Dictionary.	If your institution prefers different labels for data entry fields on forms, change the descriptions here. You can enter labels in languages other than English. Optional.	Setup	System	Initial Setup	N/A	Corp
1.16	School-Defined Fields.	You can set up fields for data that is unique to your institution here. Optional.	Setup	System	Initial Setup	N/A	Corp
1.17	Required Fields.	Review the required data entry fields list for the Student Master form and other forms. Some fields are required by the CampusNexus Student system and others may be optionally required by your school.	Setup	System	Initial Setup	N/A	Corp
1.18	Field Level Security.	Review the Student Master form for necessary field level security.	Setup	System	Initial Setup	N/A	Corp

Setup Sequence: Academic Records

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
2.	Acad. Records Lists						

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
2.1	Calendar. Define your school calendar of holidays and other non-attendance periods. It is wise to extend the calendar into the future at least a year past the length of your longest program.	The calendar can be defined for each campus and each shift (day, night, weekend, distance learning, etc.)	Lists - Acad. Records	Campus	Maintenance	N/A	Campus
2.2	Course Type. Define the types of courses offered in your programs.	Lecture, lab, distance, etc.	Lists - Acad. Records	System	Initial Setup	N/A	Corp
2.3	Course Categories. Define the course categories for your program versions.	Core, Elective, etc.	Lists - Acad. Records	System	Maintenance	N/A	Corp
2.4	Degree. Define the degrees offered by your institution.	AA, BA, MBA, etc.	Lists - Acad. Records	Campus Group - system-wide list	Maintenance	N/A	Corp
2.5	Enrollment Status. Define the various enrollment statuses that apply to your students.	Full time, 3/4 time, half time, less than half time, etc.	Lists - Acad. Records	System	Fixed	N/A	Corp
2.6	Grade Level. Define the grade levels that apply to your students.	These will correspond to Dept. of Ed. codes for FA.	Lists - Acad. Records	System	Fixed	N/A	Corp
2.7	Grade Scale. Define one or more grading scales for your programs.	Includes GPA points, etc.	Lists - Acad. Records	Campus Group - system-wide list	Initial Setup	N/A	Corp

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
2.8	Honors. Define any honors codes to be related to students.	Summa Cum Laude, Dean's List, etc. See also Posting Honors.	Lists - Acad. Records	Campus Group - system-wide list	Maintenance	N/A	Corp
2.9	Period. Define the daily class room periods used in your institution.	Example: Day1 =8:00 A.M., 50 minutes, 1st Period of the day shift.	Lists - Acad. Records	System	Maintenance	N/A	Campus
2.10	Program Group. Aka "Interests". Define groups of programs.	Examples: Business Administration, Medical Tech, Dental Tech, etc.	Lists - Acad. Records	System	Maintenance	N/A	Corp
2.11	Reasons. Define reason codes to be related to student status changes.	Medical, incarcerated, military duty, etc.	Lists - Acad. Records	Campus Group - system-wide list	Initial Setup	1.5	Corp
2.12	Resources. Define codes for resources available in class rooms and required by class sections.	Personal Computers, projectors, TV, etc.	Lists - Acad. Records	Campus	Maintenance	N/A	Campus
2.13	SAP. Satisfactory Acad.Progress. Set up tables of parameters for measuring SAP.	Can be different tables for different programs.	Lists - Acad. Records	System	Initial Setup	1.5	Corp
2.14	SAP Status. Set up student statuses for those not making SAP.	There is one system SAP status code for students who are making SAP and one system status code for those who are not. You can add other codes for those who are not making SAP.	Lists - Acad. Records				

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
2.15	Shifts. Define the portions of the day or week when students will be attending classes.	Examples: Day, Night, Weekend, Distance.	Lists - Acad. Records	Campus Group - System-wide list	Initial Setup	N/A	Corp
2.16	Term. Define the start and end dates of each term, semester, quarter, etc. for each campus and each shift.	It is possible to define a perpetual term with no start and end dates.	Lists - Acad. Records	Campus - System-wide list	Maintenance	N/A	Campus
2.17	Courses. List all courses offered by your institution. The courses will, in turn, be incorporated into programs.	Requires codes from Course Types, Transaction Codes (set up in Student Accounts), and Books (set up in Bookstore Inventory).	Lists - Acad. Records	Campus - System-wide list	Maintenance	2.2, 1.1.1, 2.12, 6.1	Campus
2.18	Course Categories. Setup categories of courses such as core and elective.						

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
2.19	Programs. List all programs offered by your institution. Programs are sub-defined into Program Versions that are composed of groups of required and elective courses. After you set up the program version, you would attach a course list, apply entrance tests, documents, costs, program start date, and distance education parameters. You can also copy program versions to create a similar new version.	Requires codes from the following tables:	Lists - Acad. Records	System	Maintenance	See below	Corp
		Courses	Lists - Acad. Records			2.16	
		Degrees	Lists - Acad. Records			2.4	
		Program Groups	Lists - Acad. Records			2.10	
		Grade Scale	Lists - Acad. Records			2.7	
		SAP Tables	Lists - Acad. Records			2.13	
		Shifts	Lists - Acad. Records			2.14	
		Entrance Tests (Admissions)	Lists - Acad. Records			3.6	

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
		Documents (Contact Mgr.)	Lists - Acad. Records			7.4	
		Transaction Codes (Student Accounts)	Lists - Acad. Records			4.1	
2.20	Buildings/Rooms. Enter data identifying the buildings and rooms on your campus (es).	This data is used when assigning rooms to class sections. Set up each building on your campus(es) in which classes are held. For each building, set up the related rooms.	Lists - Acad. Records	Campus	Maintenance	2.12	Campus
2.21	Schedule Classes. From the Daily menu, select Administration, then Schedule Classes. Enter your class schedule for current and future terms.	This procedure requires data from several lists including:	Lists - Acad. Records	Campus	Maintenance	See Below	Campus
			Lists - Acad. Records	Terms			
		Courses	Lists - Acad. Records				
		Instructors	Lists - Acad. Records				
		Buildings	Lists - Acad. Records				
		Rooms	Lists - Acad. Records				

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
		Periods	Lists - Acad. Records				
2.22	Start Dates. After you set up your program versions, enter the dates on which they will start.	This form provides an easy way to select multiple program versions that start on the same date.	Lists - Acad. Records	Campus	Maintenance	2.17	Campus

Setup Sequence: Admissions

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
3.	Admissions Lists						
3.1	Citizenship. Enter the types of citizenship that describe your students: U. S. Citizen, Eligible Non-citizen, etc.		Lists - Admissions	System	Initial Setup	N/A	Corp
3.2	Colleges. Enter the names and addresses of other colleges attended by your students.		Lists - Admissions	System	Maintenance	N/A	
3.3	Counties. Enter the counties from which your students are drawn.		Lists - Admissions	System	Initial Setup	N/A	
3.4	Countries. Enter a list of countries to be used in student records.	These codes will be related to various student addresses.	Lists - Admissions	System	Initial Setup	N/A	Corp
3.5	Education Level. Enter prior education levels to describe your leads and students.		Lists - Admissions	Campus Group - system-wide list	Initial Setup	N/A	Corp

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
3.6	Entrance Tests. Enter the parameters for entrance tests required by your institution.	Also used when setting up programs in Acad. Records.	Lists - Admissions	Campus Group - system-wide list	Initial Setup	N/A	Corp
3.7	Ethnic Codes. Enter a list of ethnic codes used in your institution. This is used on the IPEDS report.		Lists - Admissions	System	Initial Setup	N/A	Corp
3.8	Extra-Curricular. Enter extra-curricular activities in which your students may participate.	Note that by changing the label in the data dictionary, you can use this field for some other purpose.	Lists - Admissions	System	Initial Setup	N/A	
3.9	Gender. Enter a list for male, female, and unknown.		Lists - Admissions	System	Initial Setup	N/A	Corp
3.10	High Schools. Enter names, addresses, and contacts for high schools from which your students are selected.	The High Schools list is located on the Daily / Admissions menu for the convenience of the Admissions staff. The data in this list is very volatile. Additions and changes are made frequently.	Lists - Admissions	Campus Group - system-wide list	Maintenance	N/A	Campus
3.11	Lead Categories. See the Daily / Admissions menu. Enter groups for the lead sources used by your institution, i.e., newspaper, TV, radio, seminar, etc.	Must be populated before Lead Sources are entered.	Lists - Admissions	System	Initial Setup	N/A	Corp

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
3.12	Lead Sources. Enter specific lead sources, New York Times, Dec. 12th seminar at Lincoln High School, etc.		Lists - Admissions	Campus Group - system-wide list	Maintenance	N/A	Campus
3.13	Lead Type. Enter types of leads that apply to your school. This is a general classification that can be used for reporting lead activity.		Lists - Admissions	System	Initial Setup	N/A	
3.14	Marital Status. Enter codes for single, married, etc.		Lists - Admissions	System	Initial Setup	N/A	Corp
3.15	Nationality. Enter a list of nationalities from which your students originate. This may help the staff in evaluating qualifications and requirements for enrollment.		Lists - Admissions	System	Initial Setup	N/A	Corp
3.16	Rep Type. Enter a list of admissions representative types. One type code will be assigned to each rep.	Optional. In-house, Traveling, High School, etc. Set up these codes before adding admissions reps to the staff member list.	Lists - Admissions	System	Initial Setup	N/A	Corp
3.17	States. Enter a list of states, provinces, etc.	This table comes with U. S. Postal codes already entered.	Lists - Admissions	System	Initial Setup	N/A	Corp

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
3.18	Titles. Enter a list of titles for students and staff members such as Mr., Ms., Mrs., and Dr.	These titles will be available for use in correspondence.	Lists - Admissions	System	Initial Setup	N/A	Corp
3.19	Agency Type. Enter codes to classify the types of agencies with which your school and students interact.	For example, federal, state, private, and so on.					
3.20	Agencies		Daily - Admissions	Campus Group - system-wide list			

Setup Sequence: Student Accounts

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
4.	Student Accounts Lists						
4.1	Transaction Codes. Define transaction codes that will be used through out the institution for posting charges, payments, and adjustments to student accounts.	Enter the default GL account number for each transaction code.	Lists - Student Accounts	Campus Group - system-wide list	Initial Setup	N/A	Corp
4.2	Bank Codes. Enter bank and bank account identifications.	Enter the default GL account number for each bank account.	Lists - Student Accounts	Campus	Initial Setup	N/A	
4.3	Billing Methods. Select the tuition billing method that is used at your school and fill in the grid if necessary.		Lists - Student Accounts	System	Initial Setup	4.1	Corp

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
4.4	Programs (Version Costs). Enter the costs for each program version if your costs are determined at the program version level.		Lists - Student Accounts	Program	Initial Setup	4.3, 4.6	Corp
4.5	Credit Card Types. Enter any credit card types that your school accepts.	CampusNexus Student provides for validation of some standard credit cards when used. Other cards may be entered but the system will not attempt to validate them when used.	Lists - Student Accounts	Campus	Initial Setup	N/A	Corp
4.6	Earnings Methods. Set up the methods by which you will "earn" tuition and prorated revenue.		Lists - Student Accounts	Campus	Initial Setup	N/A	Corp
4.7	Refund Policies. Set up the policies under which you will refund money to fund sources when a student drops.		Lists - Student Accounts	System	Initial Setup	4.1, 5.1	Corp

Setup Sequence: Financial Aid

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
5.	Financial Aid Lists						
5.1	Fund Sources. Enter sources from which your students receive financial aid funds. Pell, Stafford, PLUS, and so on.	Fund Source entries include selections from the other FA tables.	Lists - Financial Aid	Campus Group - system-wide list	Maintenance	5.2, 1.9.21	
5.2	Lenders. Enter lenders from which your students obtain loans. Also includes servicers and guarantors.		Lists - Financial Aid	System	Maintenance	N/A	Corp

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
5.3	Packaging Statuses. Enter your school's definition of packaging statuses.		Lists - Financial Aid	System	Initial Setup	N/A	Corp
5.4	Packaging Methods. Enter your packaging methods.	Specifies details about each FA source such as gift aid maximum, self-help maximum, minimum amount of aid, maximum amount of aid, minimum EFC, and maximum EFC.	Lists - Financial Aid	Campus	Initial Setup	5.1	Campus
5.5	Budgets. Enter the cost of attendance budgets used by your school.	Multiple programs can use the same COA budget.	Lists - Financial Aid	Campus	Initial Setup	Programs	Campus
5.6	Acad.Years. Define your Acad.years in terms of weeks or hours.	The same Acad.year codes can be used for multiple program versions. You must also set up the default number of disbursements for the various types of fund sources.	Lists - Financial Aid	System	Initial Setup	N/A	Corp
5.7	Programs. For each program version, set up the Acad.calendar, payment methodology, and so on.	Several variables are entered here that have a bearing on financial aid.	Lists - Financial Aid	System	Maintenance	5.6, 2.17	Corp
5.8	FA G/L Funds. Set up the chart of accounts for your Financial Aid General Ledger.	CampusNexus Student provides a default chart of accounts but you may wish to modify it.	Lists - Financial Aid	System	Initial Setup	N/A	Corp

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
5.9	Disbursement Schedules. Set up disbursement schedules that are related to campuses and fund sources.		Lists - Financial Aid	Campus	Initial Setup	N/A	Corp
5.10	Packaging Status Promotion. Set up your optional packaging status promotion codes.		Lists - Financial Aid				

Setup Sequence: Bookstore

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
6.	Bookstore Lists		Lists - Financial Aid				
6.1	Inventory. Add your books and supplies inventory here. Includes titles, authors, ISBN, cost, price, courses, etc.	Items listed here are used when setting up courses.	Lists - Bookstore	System	Maintenance	N/A	

Setup Sequence: Contact Manager

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
7.	Contact Manager Lists						
7.1	Activities. Enter your initial list of student-related activities in which staff members will engage.	Examples of activities include phone calls, interviews, send letter, and so on.	Lists - Contact Manager	Campus Group - system-wide list	Maintenance	7.4	Campus

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
7.2	Activity Status. Define a set of activity status codes.		Lists - Contact Manager	System	Initial Setup	N/A	
7.3	Activity Results. Define a set of activity results codes.		Lists - Contact Manager	System	Initial Setup	N/A	
7.4	Documents. List your initial set of documents to required of your leads and students.	Note that document requirements for all modules are listed here. Each document is designated as required by one department.You can also assign documents to be required for a program but they are defined here.	Lists - Contact Manager	Campus Group - system-wide list	Initial Setup	2.17	
7.5	Document Lists. Set up lists of documents that are required from students.	The documents on the lists are selected from the previously set up document codes.					
7.6	Document Status. Define a set of document status codes.		Lists - Contact Manager	System	Initial Setup	N/A	Corp
7.7	Address Types. Enter a list of student address classifications.		Lists - Contact Manager	System	Initial Setup	N/A	Corp
7.8	Visas. Enter Visa codes for international students in addition to the system codes already provided.	Other visa types not used by the SEVIS system. SEVIS visa types are already included in the table.	Lists - Contact Manager	System	Initial Setup	N/A	Corp

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
7.9	Edit Letters. Set up standard letters in Word for mail merge operations.	Letters must be defined as an activity under setup item 7.1 before you create them. After a letter is added to the Activities list use the Daily menu. Select Contact Manager, then select Print Letters. Edit the letter you want to create or change. If the letter is not on file, the program will ask if you want to create it. The program opens MS Word to work with the letters.	Lists - Contact Manager	System	Maintenance	7.1	

Setup Sequence: Placements

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
8.	Placement Lists						
8.1	Industry. This table already contains the Department of Labor SIC codes.		Lists - Placement	System	Initial Setup	2.17	Corp
8.2	Location. Enter the location of employers and jobs served by your institution.		Lists - Placement	System	Initial Setup	N/A	Campus

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
8.3	Corporate. Consolidated Employers to which local employer branches are linked.		Lists - Placement	System	Maintenance	N/A	Campus
8.4	Contact Type. Typical titles or positions of employer contacts.		Lists - Placement	System	Initial Setup	N/A	Campus
8.5	Skills. Special skills acquired by your students and desired by your employers.		Lists - Placement	System	Initial Setup	N/A	Campus
8.6	Job Category. Types of jobs in which your students may be placed. Used for summary reporting.		Lists - Placement	System	Initial Setup	N/A	Corp
8.7	Job Title. Titles of jobs offered by your employers. Classified by Job Category.	Complete your list of job categories before doing job titles.	Lists - Placement	System	Initial Setup	N/A	Campus

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
8.8	Job Type. Add user-defined job type statuses that are defined by one of two Types. These types are system codes that cannot be modified. You can define Code, Description, and Job Type.	Type is a drop-down list including Employment and Internship / Externship.					
8.9	Reasons. The campus-specific Reasons table gives you the ability to attach a reason to each change of placement status for each student at each campus.	The Status list box will show statuses in the Graduate Placement category.					
8.10	How Placed. Add user-defined how-placed statuses that are defined by one of three Types.	Types are system codes and can-not be modified. They include C - College, S - Self, and O - Continuing Employment/Education.					
8.11	Placement - Employers		Daily - Placement	Campus Group - system-wide list			Campus

Setup Sequence: Loan Management

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
9.	Loan Management Lists						
9.1	Loan Status. You can add additional school-defined loan status codes to the provided types of loan statuses.	The provided Loan Status codes include Attending, Default, Deferment, Delinquent, Forbearance, Grace Period, and Repayment. Of these codes, Attending, Grace, and Repayment are System codes which means that they are not available for modification or deletion.					

Setup Sequence: Student Services

	Setup Item	Description	Menu Location	Scope	Type	Depends on	Corporate / Campus Control
10.	Student Services Lists						
10.1	Room Type. Enter the room types for on-campus and off-campus housing tracked by your campus.						
10.2	Location. Enter the location of the housing and room numbers.						

What is Replication?

Replication is making copies of data, moving those copies to different locations, and synchronizing the data automatically so that all copies have the same data values. Replication can be implemented between databases on the same server or between different servers connected by LANs, WANs, or the Internet. See also Campus Options, CampusNexus Student and Replication, Configuring Replication for CampusNexus Student, Planning Replication for CampusNexus Student, and Report Selection.

Benefits of Replication

Replication offers various benefits depending on the type of replication and the options you choose, but the common benefit of SQL Server 2000 replication is readily available data when and where it is needed.

Benefits include:

- Allowing multiple sites to keep copies of the same data. This is useful when multiple sites need to read the same data or need separate servers for reporting applications.
- Separating online transaction processing (OLTP) applications from read-intensive applications such as online analytical processing (OLAP) databases, data marts, or data warehouses.
- Allowing greater autonomy. Users can work with copies of data while disconnected and then propagate changes they make to other databases when they are connected.
- Separating data to be browsed or for reporting so as not to slow down the original database.
- Increasing aggregate read performance.
- Bringing data closer to individuals or groups. This helps to reduce conflicts based on multiple-user data modifications and queries because data can be distributed throughout the network, and you can partition data based on the needs of different business units or users.
- Using replication as part of a customized standby server strategy. Replication is one choice for standby server strategy. Other choices in SQL Server 2000 include log shipping and failover clustering, which provide copies of data in case of server failure.

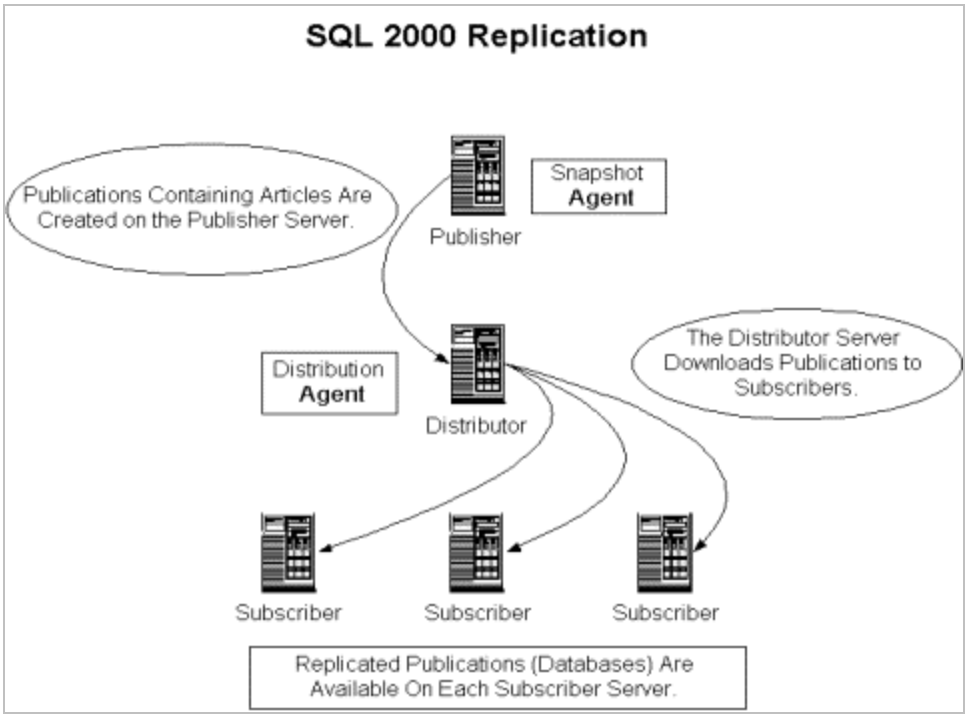
When to Use Replication

Diverse hardware and software applications in distributed environments with various needs for autonomy and data consistency make it necessary to store data redundantly. Replication is a solution for a distributed data environment when you need to:

- Copy and distribute data to one or more sites.
- Distribute copies of data on a scheduled basis.
- Distribute data changes to other servers.
- Allow multiple users and sites to make changes then merge the data modifications together, potentially identifying, and resolving conflicts.
- Build data applications that need to be used in online and offline environments.
- Build Web applications where users can browse large volumes of data.
- Optionally make changes at subscribing sites that are transparently under transactional control of the Publisher.

Replication Model

Microsoft® SQL Server™ 2000 replication uses a publishing industry metaphor to represent the components and processes in a replication topology. The model is composed of the following: Publisher, Distributor, Subscribers, Publications, Articles, and Subscriptions.



Several replication processes are responsible for copying and moving data between Publisher and Subscriber. These are Snapshot Agent, Distribution Agent, Log Reader Agent, Queue Reader Agent, and Merge Agent.

Publisher

The Publisher is a server that makes data available for replication to other servers and has one or more publications, each representing a logically related set of data. In addition to being the server where you specify which data is to be replicated, the Publisher also detects which data has changed during transactional replication and maintains information about all publications at that site.

Distributor

The Distributor is a server that stores history data and/or transactions and metadata. The role of the Distributor varies depending on which type of replication you implement. A remote Distributor is a server that is separate from the Publisher and is configured as a Distributor of replication. A local Distributor is a server that is configured to be both a Publisher and a Distributor of replication.

Subscribers

Subscribers are servers receiving replicated data, they subscribe to publications, not individual articles within a publication. They subscribe only to the publications that they need, not all publications available on a Publisher. The Subscriber can propagate data changes back to the Publisher or republish the data to other Subscribers with the appropriate options set.

Publication

A publication is a collection of articles from one database. This grouping of articles makes it easier to specify a logically related set of data and database objects that you want to replicate together.

Article

An article is a table of data, a partition of data, or a database object that is specified for replication. An article can be an entire table, certain columns (using a vertical filter), certain rows (using a horizontal filter), a stored procedure or view definition, the execution of a stored procedure, a view, an indexed view, or a user-defined function.

Subscription

A subscription is a request for a copy of data or database objects to be replicated and defines what publication will be received, where, and when. Synchronization or data distribution of a subscription is requested by the Publisher (a push subscription) or the Subscriber (a pull subscription).

Types of Replication

Snapshot Replication

Note: Snapshot Replication is used to initialize Subscriber databases at start-up and when Subscribers are restarted after installation of CampusNexus Student upgrades.

Snapshot replication is the process of copying and distributing data and database objects exactly as they appear at a moment in time. Subscribers are updated with a complete refresh of the data set and not individual transactions and therefore no monitoring is required. Because snapshot replication replicates an entire data set at one time, it may take longer to propagate data modifications to Subscribers and is typically replicated less frequently than other types of publications.

Transactional Replication

Note: Transactional Replication is the type recommended for use with CampusNexus Student.

Initially a snapshot of data is propagated to Subscribers; thereafter when data modifications are made just the individual transactions are captured and propagated to Subscribers.

SQL Server 2000 monitors INSERT, UPDATE, and DELETE statements, and changes to stored procedure executions and indexed views. SQL Server 2000 stores the transactions affecting replicated objects and then it propagates those changes to Subscribers continuously or at scheduled intervals. Transaction boundaries are preserved. If, for example, 100 rows are updated in a transaction, the entire transaction with all 100 data modifications are accepted and propagated to Subscribers or none of them are. When all changes are propagated, all Subscribers will have the same values as the Publisher.

Merge Replication

Note: CampusNexus Student does not support Merge Replication.

Merge replication allows various sites to work autonomously (online or offline) and merge data modifications made at multiple sites into a single, uniform result later. The initial snapshot is applied to Subscribers and then SQL Server 2000 tracks changes to published data at the Publisher and at the Subscribers. The data is synchronized between servers at a scheduled time or on demand. Updates are made independently (no commit protocol) at more than one server, so the same data may have been updated by the Publisher or by more than one Subscriber. Therefore, conflicts can occur when data modifications are merged.

Merge replication includes default and custom choices for conflict resolution that you can define when you configure a merge publication. When a conflict occurs, a resolver is invoked by the Merge Agent to determine which data will be accepted and propagated to other sites.

Options available with merge replication include filtering published data horizontally and vertically, including join filters and dynamic filters, using alternate synchronization partners, optimizing synchronization to improve merge performance, validating replicated data to ensure synchronization, and using attachable subscription databases.

Replication Data Considerations

Special considerations should be taken when publishing certain data types and properties. This section identifies those data types and properties, and it describes solutions for managing them, including:

1. Identity range management. Specifying identity range management can help you control how data modifications are made at different Subscribers during merge replication or during snapshot or transactional replication with updatable subscriptions.
2. Data types with specific uses. Different data types such as **uniqueidentifier** and **timestamp** have specific uses during replication processing, including conflict resolution when changes to the same data are made at multiple servers.
3. NOT FOR REPLICATION. Using the NOT FOR REPLICATION option allows you to implement ranges of identity values in a partitioned environment.

Replication

CampusNexus Student is a complex application that has a large database composed of many tables, indexes, stored procedures, and views. The database tables are constantly being updated with new information during your business operations. There is a constant demand on your network resources for quick responses to user activity.

One way to reduce the load on your SQL server is to transfer some of the less urgent requests for data to another server. The most obvious example of this situation is report production. A lengthy report, when it is created directly from the CampusNexus Student database, can consume precious system resources. Response time for transaction processing can suffer while large reports are being processed.

Replication offers a solution to this dilemma. In most cases, it is acceptable to generate reports from data that is up to a few hours old. This means that the reports can be created from a recent copy of the master database stored on another server.

If this is the case in your institution, consider our discussion of replication using Microsoft SQL Server.

In the replication environment we are suggesting here, the database tables from CampusNexus Student are copied to another server. Setup parameters in CampusNexus Student tell the system, by default, where to get reporting data. In exceptional cases, you can configure individual reports to indicate where the data should come from– the live database or the reporting database.

Replication, as proposed for use with CampusNexus Student, is a one-way, read-only process. Users can generate reports from the report server but they cannot update the reporting database. Updates are performed on the live (master) database.

Reporting and updating are essentially transparent to CampusNexus Student users. The only exception to this is the refresh delay on the report server. For instance, if a user posts a tuition payment to a student's ledger card and then runs a Cash Receipts report from the replicated database, the payment will not be reflected on the report until the next refresh. The delay in receiving data for the reports is based on the time interval of the replication. Your system administrator sets the refresh interval based on your school's needs.

Note: You can set up your Cash Receipts report (or any report) to use the "live" database rather than the "replicated" database.

Planning Replication

With new releases and service packs, there are often changes to the structure of database tables. Replication must be interrupted during the installation of new releases and service packs, restarted, and a new "snapshot" of the database distributed to all subscribers for proper replication of tables. Let your Anthology Inc. Support Representative know that your school is using replication before new CampusNexus Student releases and/or service packs are installed.

To enhance performance, consideration should be given to the methods and options used in replication design. Anthology Inc. encourages you to contact us for assistance in planning CampusNexus Student replication.

Servers

Anthology Inc. **requires** that your environment includes at least two servers running Microsoft SQL Server 2000: one server for the publisher and distributor, another for the subscriber.

The Publisher contains the master CampusNexus Student database and is subject to constant transaction traffic. In large institutions it may be beneficial to minimize the load on the Publisher by placing the Distributor on another server as it requires resources to download transaction activity to Subscribers. Placing the Distributor on the same server as the Subscriber may cause errors in the event of system failure and is to be avoided.

Publication Articles

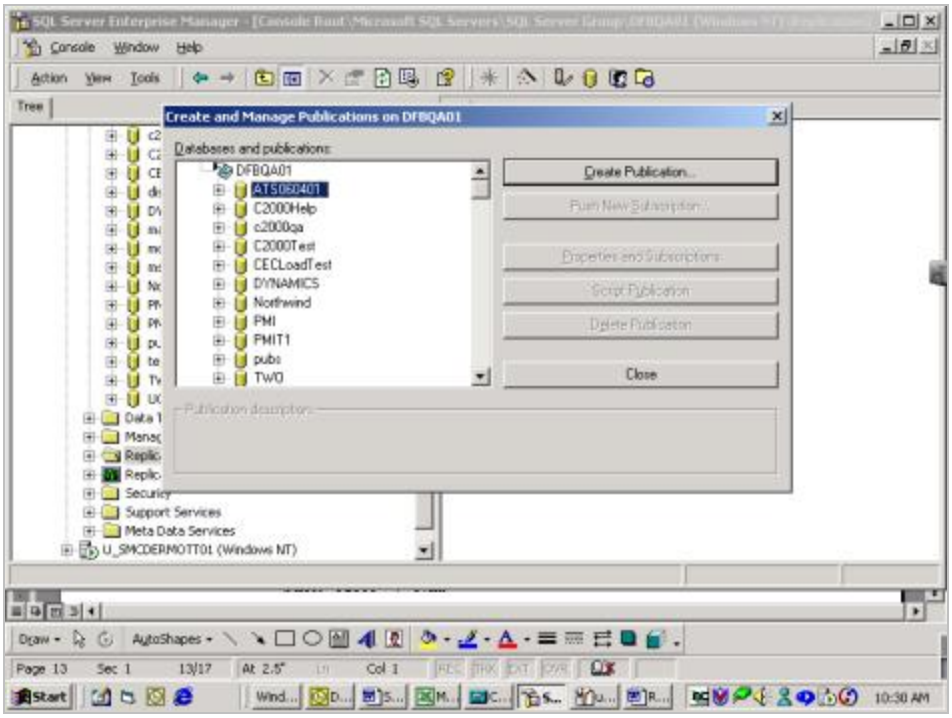
Tables and other database objects (views, stored procedures, etc.) are grouped and published as Articles. Although our default configuration replicates one copy of the entire database to another server, this default can be modified to suit specific needs. For example, an article could be published with only the tables necessary to run a particular report or group of reports. Additionally, articles can be published with tables selected according to the interval for updating or if replicated to multiple servers.

Transactional Replication Intervals

CampusNexus Student supports transactional replication. The intervals in which the subscriber data is updated may be set to continuously or according to a schedule depending on whether the data requires frequent or constant updates. The size of the data and length of time to complete an update may also affect the interval, or whether the data needs to be updated at multiple servers.

Configuring Replication

1. Open Enterprise Manager.
2. Configure the Distributor (transaction handler):
    a. Select the original database server to copy from. Select **Tools > Replication > Configure Publishing, Subscribers, and Distribution...**.
    b. Use the server as its own distributor, "Next"
    c. Specify the default snapshot folder, "Next"
    d. Customize Configuration: select default settings, "Next"
    e. "Finish" This will take a few moments while your distributor is configured.
3. Configure the Publisher (source database):
    a. Select the original database server to copy from. Select **Tools > Replication > Configure Publishing, Subscribers, and Distribution...**.
    b. Select the Publishers: check source database servers you want to replicate.
4. Configure the Subscriber (target database):
    a. Select the original database server to copy from. Select **Tools > Replication > Configure Publishing, Subscribers, and Distribution...**.
    b. Select the Subscribers: check target database servers you want to replicate.
5. Create a Publication:
    a. From the tools menu on the Publisher Server, select **Replication > Create and Manage Publications > Create Publication**.
    b. Select the database to publish ("CampusNexus Student")



c. Check the "show advanced options" on the first screen. Click "Next".

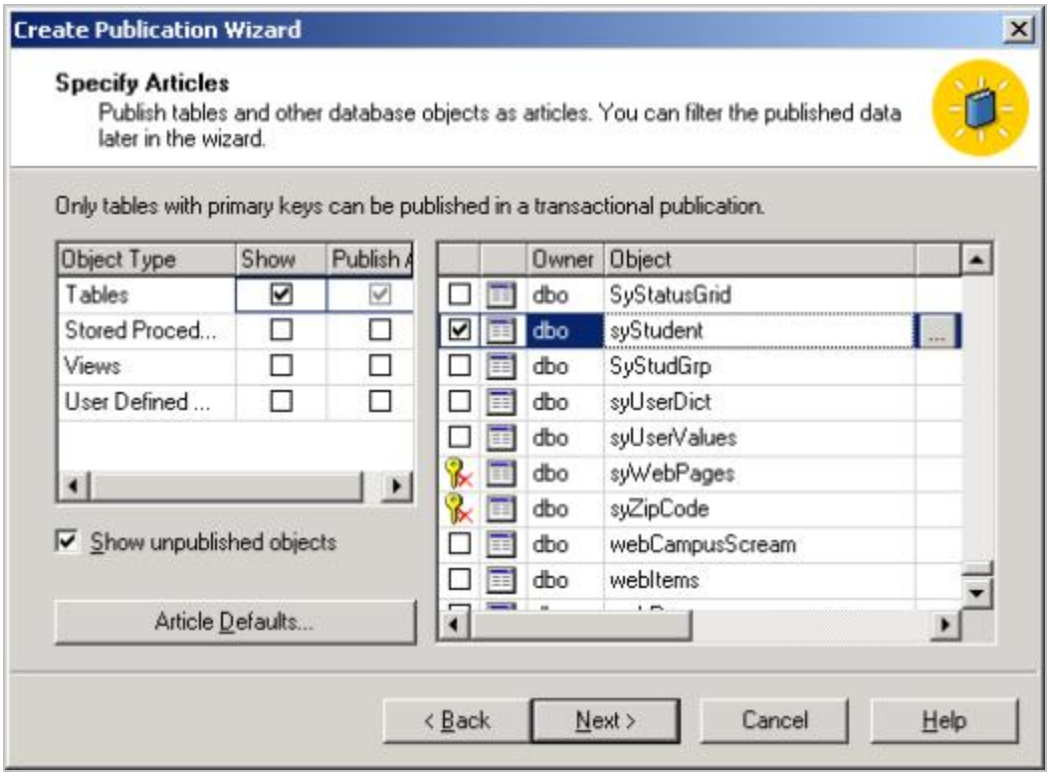
d. Select "CampusNexus Student" (or your database name) > "Next"

e. Select Publication Type Transitional > "Next" (Transitional publication supports automatic updating of data from the source Publisher to target Subscriber)

f. Check Immediate updating > "Next".

g. Select the type of servers you are using. Select SQL 2000.

h. Select the CampusNexus Student tables. Check **Tables** and **Publish All**. If desired, filters on the tables can setup later in the procedure. "Next"



A form with Article issues (ignore) is displayed:

- Time stamp: Used to track changes to the replicated data.
- Identity Columns: An IDENTITY property to a column automatically generates unique sequential incrementing numbers for new rows inserted into a table. This generation occurs at the publisher, therefore the identity property is not transferred to subscribers.
- Next.

i. Enter a name for the Publication. Use "CampusNexus Student" (or the name of your database). "Next".

j. Select "No, create the publication" > "Next"

k. Select "Finish" to create the Publication. This will take a few moments.

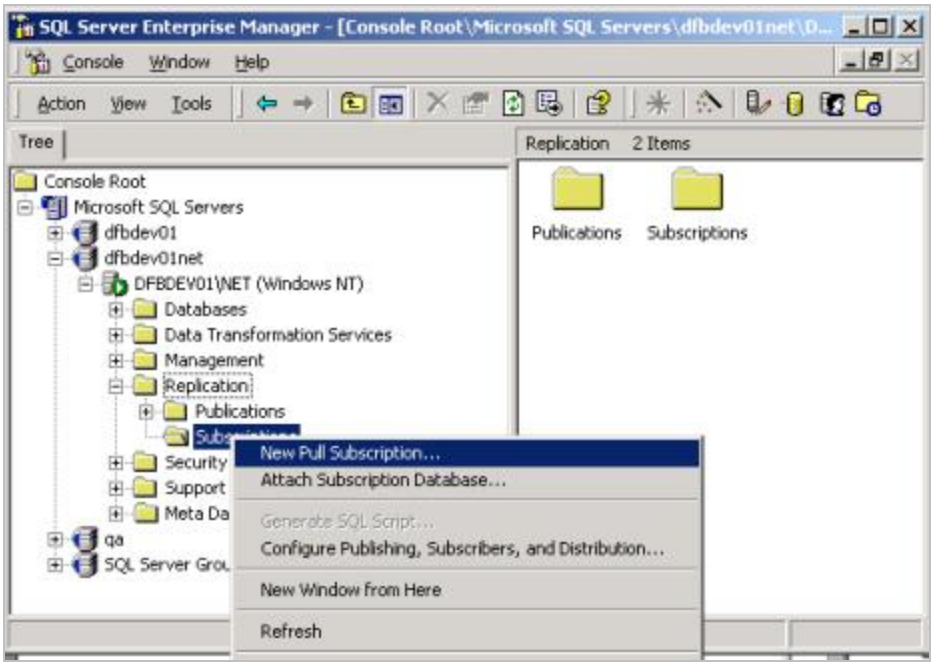
6. Create a Pull Subscription:

- On the Subscriber

a. Select the "Replication" folder

b. Right-click the Subscription folder. Go to **Tools > Replication > Pull Replication to "name of**

server".



- Select "New Pull Subscription" > "Next"
- Select "Look at publications from registered servers" > "Next"
- Expand the Publisher to select the Publication. Click "Next".
- Select destination database (subscriber database) > "Next"
- Select "Yes, initialize the Schema ..." > "Next". This creates a copy of the publication.
- Select "Use snapshot files from the default ..." > "Next"
- Select to replicate:
    a. By the schedule you choose. Subscribers will not have access to the most current data until the update. "Next"

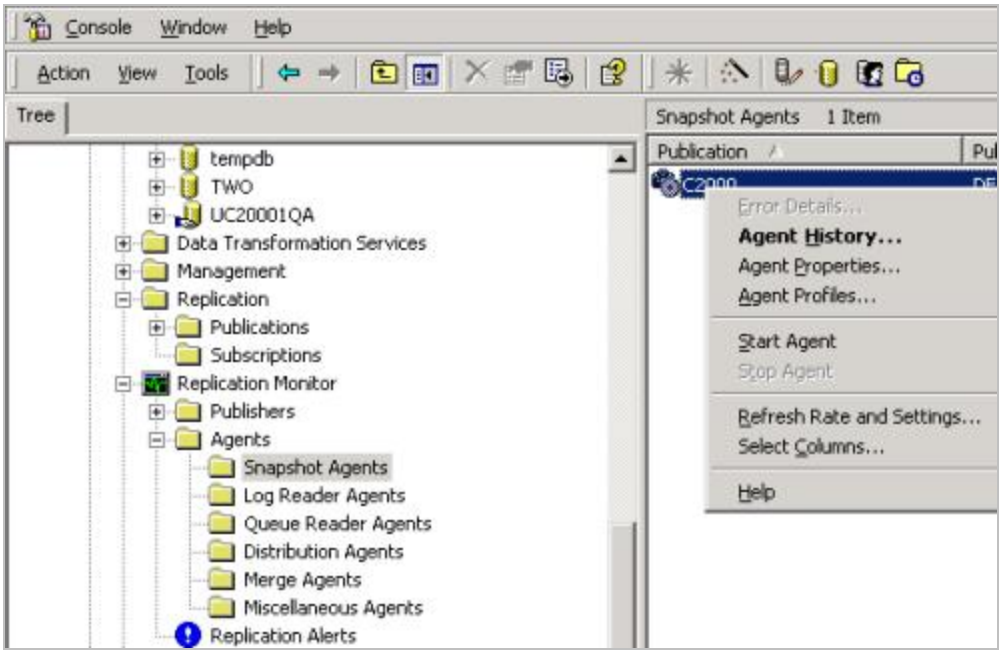
    - OR -

    b. Continuously: This option provides the greatest data integrity but can degrade performance. "Next"
- Start required Services - don't check and > "Next" > "Finish"

7. Start the Service:

- On the Publisher server, select the Replication Monitor folder

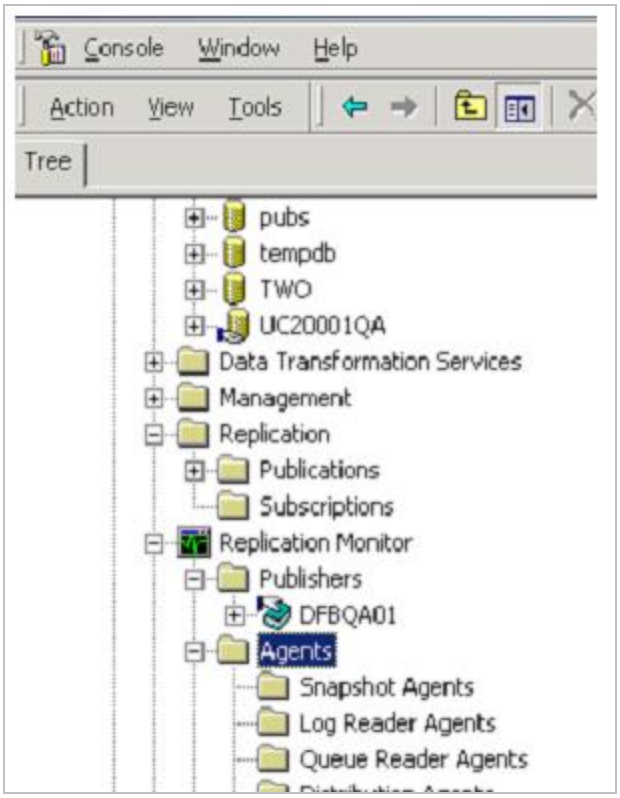
- Select Agents. Right-click the Snapshot Agent.



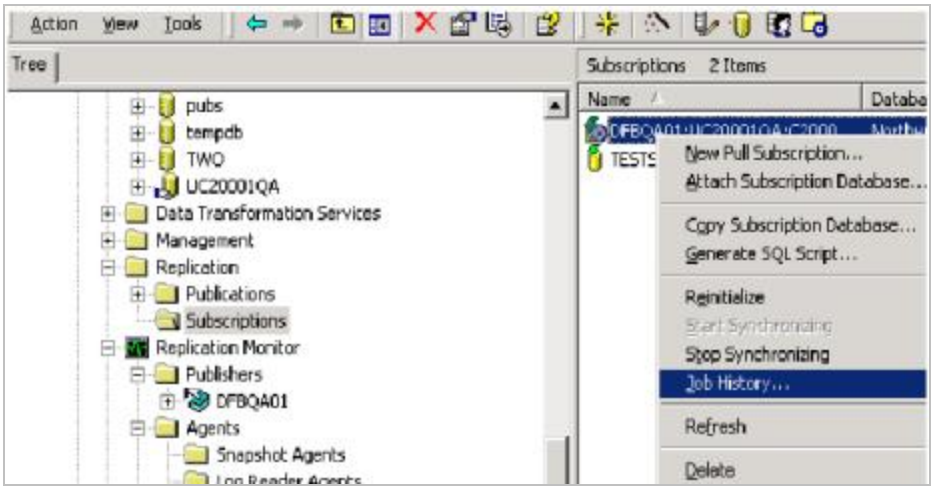
- Right-click the publication "CampusNexus Student" to the right of the Console Root Tree. Select **Start Agent**.
- On the Subscriber server, select the Replication folder.
- Right-click Subscriptions.
- Select **Start Agent**.

Additional Procedures:

1. **Monitor Replication** (view details about your replication)
    - Publications: On the Publisher server, select the Replication Monitor folder. From there, you can select an agent and right-click to see history, status, and properties, and start or stop the agent.



- Subscriptions: On the Subscriber server, select the Replication folder. Click Subscriptions. Right-click the subscription (CampusNexus Student:CampusNexus Student to the right of the console root tree) to see history, status, and properties, and start or stop the agent.



- Do not forget to refresh the server to see the most recent information.

2. Remove Subscription

   On the Subscriber server, select the subscription from the Replication > Subscriptions folder. Right-click the subscription and click Delete.

3. Remove Publications

- On the Publisher server, select the publication from the Replication > Publications folder. Right-click the publication and click Delete.
- Delete all subscriptions before deleting a publication.

File Menu

This menu includes the following options:

- Adding a new lead using the short form or long form
- Closing the active window
- Refreshing the active form
- Deleting a record
- Printing a screen image
- Setting up printer options
- Logging off
- Closing all forms
- Exiting

Part of the menu is assigned to a list of up to nine of the most recent students accessed by the user.

Add New Lead (Ctrl+L)

The Quick Lead (New Lead) short form has the basic information required to record contact information for a new lead. More than one new lead form can be open at the same time. The Quick Lead form is used by staff members such as receptionists, telephone operators, and admissions clerks to rapidly record, while on the telephone with an interested party, the information necessary for a follow-up contact by an Admissions Rep.

The Quick Lead form results in a student master record being created. The data recorded should be for the prospective student, not information about the person making an inquiry on behalf of a student.

If your institution has a Portal site, an Inquiry page is formatted to look like the Quick Lead form. Inquiries submitted from the web do not immediately result in a new student master record. The web inquiries are placed in a screening file. An Admissions department staff member screens the inquiries and decides whether to convert each inquiry to a student master record.

The default Quick Lead form behaves similar to the new batch quick lead entry form. Depending on the Yes/No setting for the Master on Quick LeadAdmissions Setup option, the Quick Lead form behaves as follows:

- If Yes is selected, the Quick Lead form closes and the Student Master form opens.
- If No is selected, when you save a new lead using the Quick Lead form, the form remains open for the next lead to be entered.

CampusNexus Student increments the Quick Leads Entered count and you can use the **Review On** button to see previously entered leads.

See also Lead Categories, Lead Sources and Lead Type.

To add a new lead:

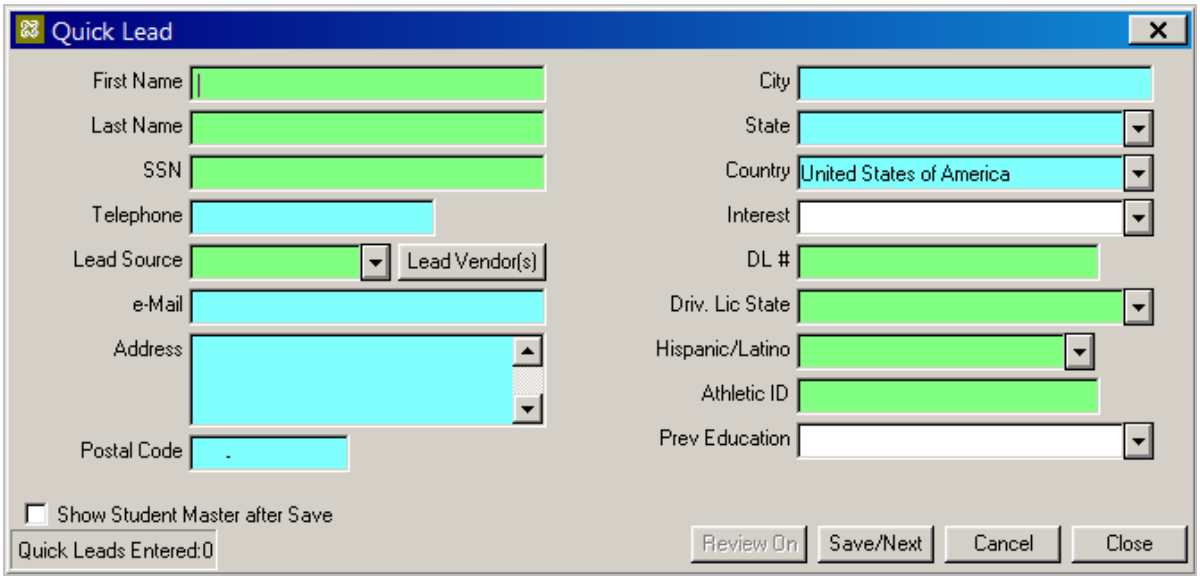
1. Select **Add New Lead** on the File menu, click the **Quick Lead Entry** button on the Toolbar, or press the **Ctrl+L** key combination. A blank Quick Lead form is displayed.

   Note: The format of your quick lead form may be different from the one shown here. A setup option is available to your system administrator to change the format of this form. Other data items may be shown and may be designated as required. Required fields have a different background color.

2. Enter the lead data. Select appropriate options from the list boxes. The form cannot be saved until all required entries have been completed.

3. To add more information about the new lead, click the **Show Student Master After Save** box to check mark it. When you save the new lead, the program will immediately open the Student Master form with the new lead data on it.

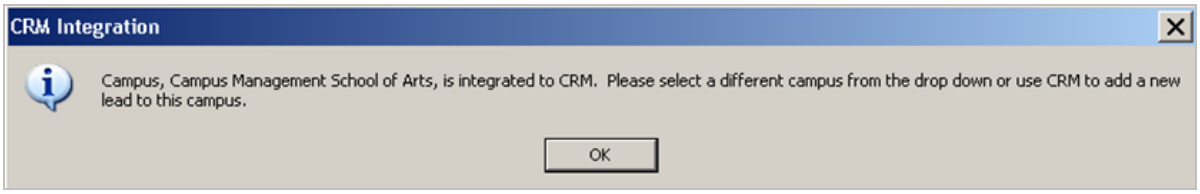
   - If you have set the Master on Quick Lead to **Yes**, the Quick Lead form is closed and the Student Master form is displayed.
   - If **Show Student Master After Save** is not selected when you save a new lead, the Quick Lead form remains open for the next lead to be entered. The system increments the **Quick Leads Entered** count. Use the **Review On** button to see a list of previously entered leads.



4. Click **Save/Next**.

   If there is an Admissions Rep change, enter the effective date of this change. The effective date defaults to the system date. The effective date entered cannot be before the lead date. If the effective date entered is earlier than the lead date, the program will display a message box stating that the effective date must be on or after the lead date.

   When **Adding a New Lead** for the default campus, if both the (system level) **CRM Integration** and (campus level) **Enable CRM Integration** check boxes are enabled, but the (campus level) **Enable new lead entry from CampusNexus Student when CRM is integrated** check box is disabled, the following message is displayed:



5. The following table indicates whether you can create New Lead/Student records within the CampusNexus Student interface based on the various settings:

   CRM Integration Matrix

CRM Integration (System level CRM integration)	Enable CRM Integration (Campus level CRM integration)	Enable new lead entry from CampusNexus Student when CRM is integrated	Allow create Lead/Student for a campus?
OFF	OFF	OFF	YES
ON	OFF	OFF	YES
ON	ON	OFF	NO
ON	ON	ON	YES

New Lead (Full) (Ctrl+N)

The **New Lead (Full) (Ctrl+N)** function on the **File** menu opens a new Student Master form. The **Status Bar** at the bottom of the work area shows "ADD" in the mode text box. The new form has no connection to any previous form which may remain in the background of your work area. In this case, you are starting a new lead/student record in the CampusNexus Student database.

As one of the localization features, the selection you make in the **Country** field affects the format of the **telephone numbers** and **SSN** (if it appears on the form). If you do not select a country, the country defaults to the country in the user's default (login) campus address. See Countries and Address for more information.

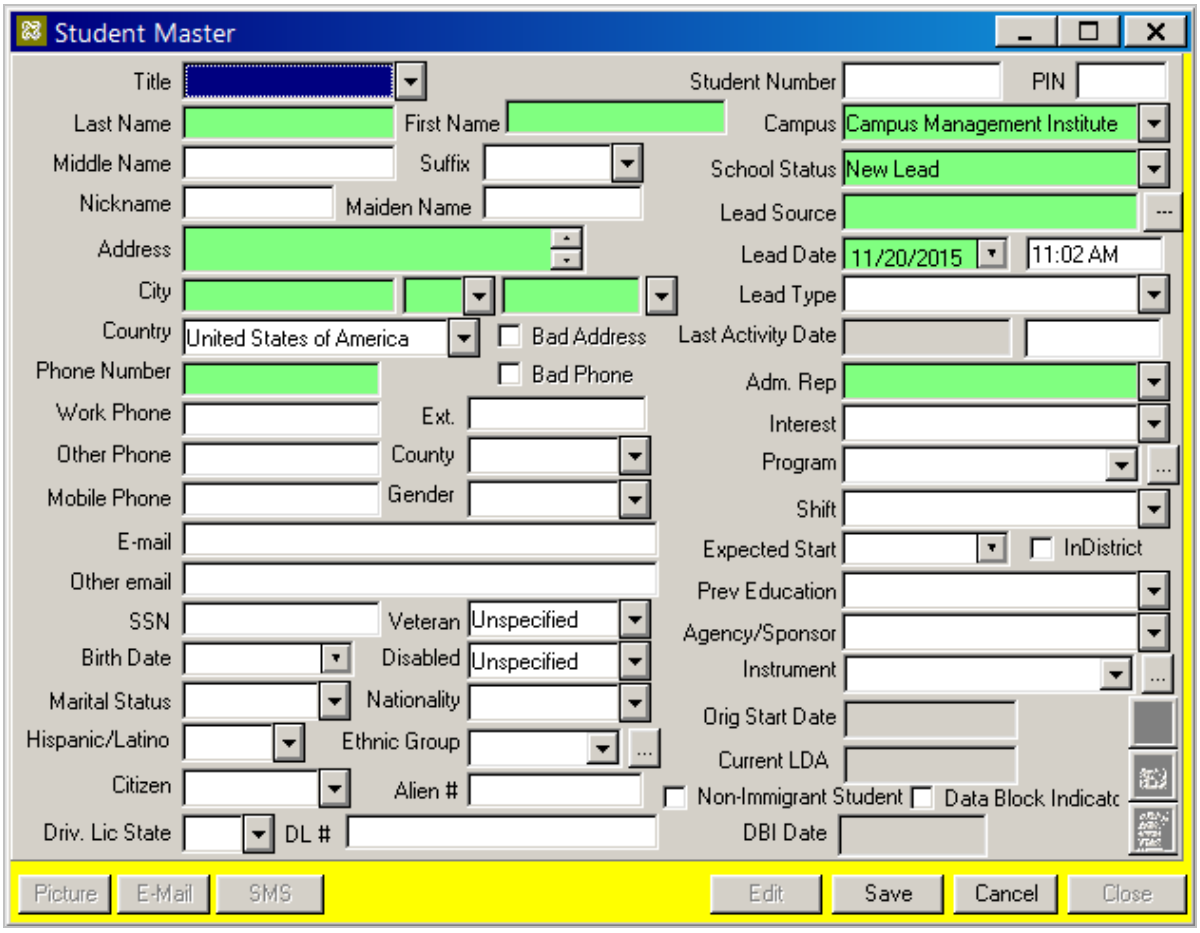
To enter a new Student Master record:

1. Navigate to **File > New Lead (full)**.

   Or click **New Lead (full)** on the Toolbar.

   Or press the **Ctrl+N** .

   A new Student Master form is displayed. Some fields are already completed.



2. Complete the form by entering or selecting data in as many of the fields as you can. Some fields are required. You cannot save the record without completing these fields. The background of required fields is a different color than the optional fields.

3. Click **Save**, or press **Alt+S** to save your changes and change to Display mode.

4. To close a new form without saving any changes, click **Cancel**, or press **Alt+N**. A confirmation message is displayed.
5. Click **Yes** or **No** as required. If you change your mind about closing the form, click **Cancel** in the message window.

   Note: When creating a **New Lead (full)** for the default campus, if both the (system level) **CRM Integration** and (campus level) **Enable CRM Integration** check boxes are enabled, but the (campus level) **Enable new lead entry from CampusNexus Student when CRM is integrated** check box is disabled, the following message is displayed:

   Note: Click on this link to display various CampusNexus Student CRM Integration settings.

Original Rep ID

The **Original Rep ID** field in the Student Master record is updated when adding a new lead to CampusNexus Student. Is is also updated as the current rep ID in the Student Master when editing the **Admissions Rep** for an existing lead.

The following business rules are applied when the **Save** button is clicked, and the value of the **Admissions Rep** was changed:

- If there is a previous **Admissions Rep**, CampusNexus Student displays a form that prompts you to specify the effective date of the **Admissions Rep** change.
- If there is no previous **Admissions Rep**, the Admissions Rep change form is *not* displayed.

If the Admissions Rep Change form is displayed, enter the effective date of the **Admissions Rep** change. The effective date defaults to the system date. The effective date entered *cannot* be before the lead date. If the effective date entered is earlier than the lead date, CampusNexus Student displays a message stating that the effective date must be on or after the lead date.

Close (Ctrl+F4)

Your work area can get cluttered with forms with which you are no longer working. To close the forms, click on a form to be closed, thus making it the active form. Click **Close** on the form, select **Close** on the File menu, or press **Ctrl+F4**.

If the form is in **Edit** mode at the time you close it, you are prompted to save any changes.

Note: Choose **Cascade** from the **Window** menu to organize all the open windows in your work area before using the Close function. This will let you see at least the Title Bar for each open window, thus making it easier to identify the forms you want to close.

Refresh (F5)

Use the **Refresh** function to assure yourself that you are looking at the most current data on a given form. Click the form to make it the active form on your desktop. Then select **Refresh** from the File menu or press the **F5** key. The form will be reloaded with the current data.

This function comes into play when you think that someone else may have updated the data on the form while it is displayed in your work area. If you leave a form in your work area for an extended period of time, refresh it when you come back to it.

Delete

The **Delete** function must be used carefully in CampusNexus Student. The system will not let you delete data that is essential to system operation. In many cases, list data that has been used in student records cannot be deleted. However, some data may be significant to your institution due to its relationship to other items of data, student records, etc. The system will not prevent you from deleting such data. Always consider these relationships before you delete data. Refer also to Delete Lead-Student.

Often it is better to **deactivate** a list option or other item of data rather than delete it. Thus, you save it for historical purposes and prevent it from being used in the future.

If you must delete a form (record) or an item of data, be sure the focus is on the correct form or list item. (The correct form is active.) Select the **Delete** option from the File menu. The record or list item will be ***permanently removed*** from the system.

Note: The **Delete** key on your keyboard is not the same as the **Delete** option on the **File** menu. The **Delete** option is programmed based on the context of the active form window. The Delete key has no effect on an active form other than deleting characters in a data entry field while editing the field. Also, remember that you cannot leave a required field completely blank.

Print

To print an image of the CampusNexus Student main window:

Click the **Print** button on the Toolbar.

- OR -

Select the **Print** option on the File menu.

- OR -

Press the **Ctrl+P** key combination.

To print reports from List forms:

Select the **Print** option at the bottom of the selected form.

To print reports from the Reports menu:

1. Select the desired report, choose the parameters you want to see, and select Preview.
2. After previewing the report on your screen, select **Print**.

Print Setup

Each workstation can be configured for a Reports Printer, a Label Printer, and a Receipt Printer. You can also indicate which font is to be used for label printing. The list of printers from which you can select is determined under the Printers option on your Windows Control Panel. Any printers to be used in CampusNexus Student must be first set up in Windows.

Note: If a workstation only has access to one printer, CampusNexus Student sets it as the default for reports, receipts and labels, automatically. If a workstation has access to multiple printers, CampusNexus Student sets the default printer to be the same as the default printer set up in Windows unless the user specifies that another printer shall be used.

Report Printing Orientation

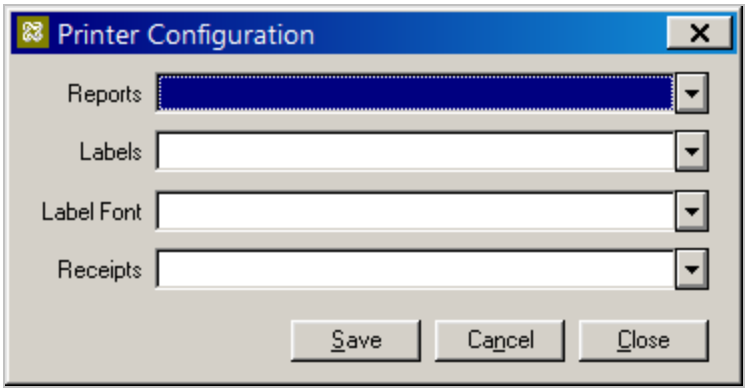
At this time we do not recommend changing the print setup from landscape to portrait orientation because all report information may not be visible on the page due to variable printable margin settings on various types of printers. Also, the Currency Designator setting affects the layout of reports.

Shared Local Printers

Does your network use shared local printers? If so, those printers are not available to others unless the computer to which the printer(s) is attached is on and booted up.

To set up printers:

1. Navigate to **File** > **Print Setup**. The Printer Configuration form is displayed.



2. Select your **Reports** printer from the drop-down list. All reports requested from your workstation, except labels and receipts, are routed to this printer. This includes screen captures triggered by the **Print** option on the File Menu or by clicking on the Toolbar. Checks from the Student Accounts module are also routed to the reports printer. You can change your report printer selection before and after printing checks if you want to keep a special printer loaded with checks.
3. Select your **Labels** printer from the drop-down list. Since mailing labels are routed to this printer, keep a supply of label forms loaded in this printer.
4. Select a **Label Font**. This font is used to print the address on your labels. Test the available options to find the font best suited to the label size you are using. The label font size is fixed at 10 points.
5. Select a **Receipts** printer. Transaction receipts from Admissions Deposits and Student Accounts payments are printed on this printer. You may have preprinted receipt forms loaded in this printer.
6. Click **Save** to save your printer selections. A confirmation message is displayed.

7. Click **OK** on the confirmation message.
8. Click **Close** to close the form.

Recent Students

The File menu displays up to nine most recent students accessed by the current user. Note that you may see more than nine students listed when you click the arrow in the Recent Students list box on the Toolbar above the work area. The first nine are the same as those shown on the File menu.

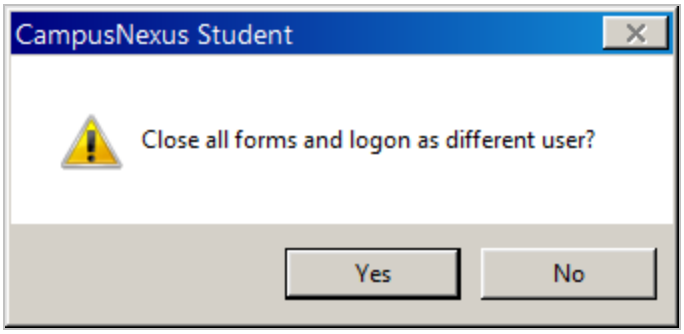
Click the student for which the current form is desired. Alternatively, you can type the number beside the student's name to display the student's form. For example, if the Education form currently has focus in your work area, and you want to see the same form for one of the students listed on the File menu, click the student's name or type the corresponding number. An additional copy of the form is opened with data for the selected student. The form for the previous student remains open in the background.

Recent Employers

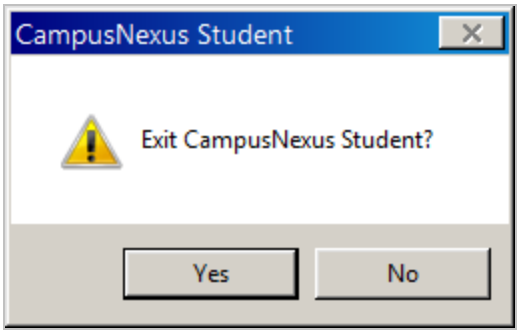
The File menu displays up to nine most recent employers accessed by the current user. Note that you may see more than nine employers listed when you click the arrow in the Recent Employers list box on the Toolbar above the work area. The first nine are the same as those shown on the File menu. Click the employer for which the current form is desired.

Logoff

Use File > Logoff to close all open windows in CampusNexus Student and restart the application. A dialog box is displayed. From there, you can log on again with any valid user ID and password.



As with File > Exit, the application asks for a confirmation that you want to exit from CampusNexus Student. Click **Yes** to continue the logoff procedure. If any forms are open in edit mode, the application asks if you want to save them before exiting.



Close All Forms

Navigate to **File** > **Close All Forms**.

- OR -

Click from the Toolbar.

Use this option to close all student-related forms in your work area. The Report Selection form and the Report Preview form are closed. This option does not close the Search form. It also does not close "modal" forms, in other words, those forms that, once opened, must be closed before you can click on anything outside of the form window.

Exit

You can close (exit from) CampusNexus Student in several ways.

- Click on the main window title bar.
- Double-click on the main window title bar.
- Navigate to the **File** menu and select **Exit** or type the letter **X**.
- If the main window is the active window, type **Alt, F, X**.

When prompted, click **Yes** or type the letter **Y** to confirm. Click **No** or type the letter **N** to stop the exit process and return to CampusNexus Student.

Except for modal forms which must be closed before anything else can be done, it is not necessary to close the forms in the work area before closing CampusNexus Student.

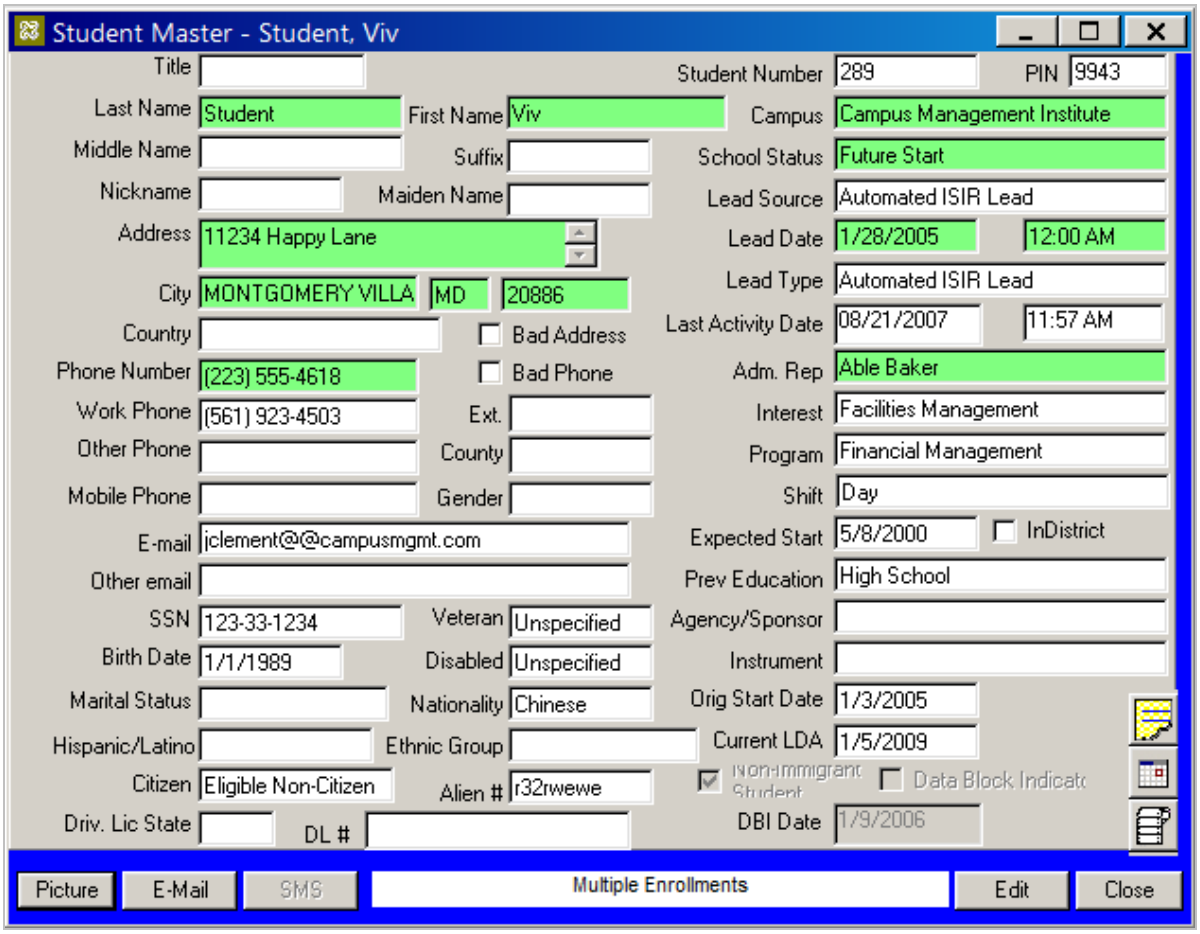
If a form is in **Edit** mode at the time you close it, CampusNexus Student will ask if you want to save changes that may have been made to the data.

Student Master

The Student Master form contains much of a student's basic demographic information. The Student Master form is usually (but not necessarily) populated in the Admissions module by adding a new lead to the database. New leads are entered using the Quick Lead Entry form or the Add New Lead **Ctrl+L** option on the File menu. The **Ctrl+N** key combination can also be used to start a new Student Master record (form) without entering a quick lead.

To view a Student Master form:

1. Select one of the following options:
    - Click **Student** on the Student Bar.
    - Double-click **Recent Students** on the Toolbar. When you change the student in the Recent Students list, a new Student Master form is displayed. If you already have a Student Master form open, it remains open in the background.
    - From the **View** menu navigate as follows:
        - Contact Manager > Student
        - Admissions > Student
        - Financial Aid > Student
        - Student Accounts > Student
        - Academic Records > Student
        - Career Services > Student
        - Loan Management > Student
        - Student Services > Student
        - Housing > Student
    - Use the **Find** menu or click on the Toolbar to search for a student.



Note: The border color around the Student Master form indicates the student's status category. In the setup options under Setup > Status Codes > Colors Tab, your system administrator can choose colors for the status categories.

2. Multiple Student Master forms can be displayed at the same time. The forms always open in the same place in the work area. Unless you have closed, moved, or minimized a previous Student Master form, the next form you open covers the previous form.

   To move between open Student Master forms use the **Window** menu and select **Tile** or **Cascade** to organize all open forms in the work area.

   When you are working with multiple students, ensure that the correct form is current (active). The name of the current student is always shown in the Recent Students text box. The title bar of the active form is always a different color than other forms which may be open in your work area.

3. To edit the information on the form, click **Edit**. See Edit a Student Master.

   Required fields on the form have a background color other than white. If a required field is blank, you must enter data in it when you edit the form, even if you did not intend to provide the information when you clicked Edit.

   Some fields are required by CampusNexus Student (Last Name, First Name, Lead Date, Admissions Rep). Additionally, your institution may designate other fields as required. The system administrator can mark fields as required in either of two ways.

- Open any Student Master (or Quick Lead) form and go to Setup > Required Fields.
- Designate the field as required in the Data Dictionary.

4. To add an activity from the Student Master form, click the **Add Activity** icon at the bottom right of the form. The Activity form is displayed.
5. Click **Close** (Ctrl+F4) to close the active Student Master form. If you are in edit mode when you click Close, you are prompted to save any changes.

Duplicate Student Records

CampusNexus Student checks for duplicate Student Master records when new leads or students are added. The following table columns are used to check for duplicates:

- Student ID
- Social Security Number
- Phone Number
- Date of Birth and Student Name (combined)
- Driver's License Number
- E-mail address.

Each check is performed only if you entered data in the corresponding field. If at least one match is found, a grid showing the matches is displayed

If the lead is a duplicate and can be found on the grid, click the record and the lead form is populated with the information for that lead. The information can then be edited. The campus for the lead can be changed only if the campus ID for the record from the grid is in the list of campuses to which you have access.

Student ID Setup

The Student ID field in the upper right corner of the Student Master form is the means of identifying students. The Student ID should not be confused with the Social Security Number (entered elsewhere on the Student Master form), or the Enrollment ID which is assigned automatically to each student's enrollment in a program version. Furthermore, the Student ID field is not required by CampusNexus Student to keep track of student master records or any other student-related data. That function is handled internally by unique record identifiers in database tables.

The following setup features give your institution the student identification options it requires.

- Setup > Admissions – Select one of the following values for the Student ID Option field:
    - Sequential Number
    - Use Student ID Format
    - Do Not Generate
- Setup > Required Fields – Select whether the Student ID field is required or optional.
- Setup > Field Level Security – Select one of the following values for each staff group:
    - Update
    - Display
    - None (no access)

Student ID Alternatives

If desired by your institution's administration, CampusNexus Student **automatically generates** a student identification number or a formatted code (you determine the format) and assigns it to each new lead entered into the system. This identification is unique and permanently attached to the lead/student record.

As a second alternative, you can elect to **require manual entry** of a student ID of your own choosing (established outside of CampusNexus Student) each time a new lead/student is entered. CampusNexus Student does not allow you to enter a duplicate Student ID. You can set up security measures as to which staff group can enter or change this identifier. You can also set the Student ID field as required so that a Student Master record cannot be saved without it.

As a third alternative, you can elect to **optionally enter** or not enter a student ID as the person creating a new lead/student master desires. If your institution intends to use the Web interface features of CampusNexus Student for student access, this is not a viable option. The Web interface requires a student ID number for student access.

A fourth alternative is to **not use** the student identification field at all. Perhaps your institution identifies all students by their Social Security Number or Name and does not assign another unique identifier. If your institution intends to use the Web interface features of CampusNexus Student for student access, this is not a viable option. The Web interface requires a student ID number for student access.

Alternative 1 - Automatic Student ID Generation

1. Navigate to **Setup > Admissions**.
2. In the **Student ID Option** field, select **Sequential Number** or **Use Student ID Format**.
3. In the **Student ID** field, and enter or accept the next sequential identification number to be assigned. This number is used with "Sequential Number" and "Use Student ID Format".
4. Open a **Student Master** form (a new one or an existing student).
5. Navigate to **Setup > Required Fields**.
6. Be sure the Student ID field in the upper right corner of the form is **not** selected. (It is not necessary to mark it as

required if CampusNexus Student is going to supply the number.)

7. **Close** the Required Fields form. CampusNexus Student closes the Student Master form.
8. Open a **Student Master** form again.
9. Navigate to **Setup > Field Level Security**. The Field Security form for the Student Master is displayed.
10. For all Staff Groups, select the **Display** option for the Student ID field.
11. **Close** the Field Security form.

CampusNexus Student now automatically assigns a unique number or code to each new lead/student record and does not allow it to be changed after it is entered.

Alternative 2 - Required Manual Entry of the Student ID

1. Navigate to **Setup > Admissions**.
2. In the **Student ID Option** field, .select **Do Not Generate**. The "Student ID Format" and the "Student ID" (next number) settings are irrelevant in this alternative.
3. Open a **Student Master** form (a new one or an existing student).
4. Navigate to **Setup > Required Fields**.
5. Be sure the Student ID field in the upper right corner of the form is selected.
6. **Close** the Required Fields form. CampusNexus Student closes the Student Master form.
7. Open a **Student Master** form again.
8. Navigate to **Setup > Field Level Security**. The Field Security form for the Student Master is displayed.
9. For all Staff Groups, select the **Update or Display** option for the Student ID field as required.
10. **Close** the Field Security form.

CampusNexus Student now requires a unique number or code to be entered for each new lead/student. (Note that the Student ID is not entered on the Quick Lead form unless you add it to the form. See Quick Lead Form Design. It will be a required field on that form also.)

Alternative 3 - Optional Manual Entry of the Student ID

1. Navigate to **Setup > Admissions**.
2. In the **Student ID Option** field, select **Do Not Generate**. The "Student ID Format" and the "Student ID" (next number) settings are irrelevant in this alternative.
3. Open a **Student Master** form (a new one or an existing student).
4. Navigate to **Setup > Required Fields**.
5. Be sure the Student ID field in the upper right corner of the form is **not** selected. (It should not be marked as required if a Student ID is optional.)
6. **Close** the Required Fields form. CampusNexus Student closes the Student Master form.
7. Open a **Student Master** form again.
8. Navigate to **Setup > Field Level Security**. The Field Security form for the Student Master is displayed.

9. For all Staff Groups, select the **Update or Display** option for the Student ID field as required.
10. **Close** the Field Security form.

CampusNexus Student now allows an optional unique number or code to be entered for each lead/student. The Student ID can be changed if necessary but this practice is **not recommended**.

Alternative 4 - No Use of the Student ID Field

1. Navigate to **Setup > Admissions**.
2. In the **Student ID Option** field, select **Do Not Generate**. The "Student ID Format" and the "Student ID" (next number) settings are irrelevant in this alternative.
3. Open a **Student Master** form (a new one or an existing student).
4. Navigate to **Setup > Required Fields**.
5. Be sure the Student ID field in the upper right corner of the form is **not** selected. (It should not be marked as required if a Student ID is not used.)
6. **Close** the Required Fields form. CampusNexus Student closes the Student Master form.
7. Open a **Student Master** form again.
8. Navigate to **Setup > Field Level Security**. The Field Security form for the Student Master is displayed.
9. For all Staff Groups, select the **None** option for the Student ID field.
10. **Close** the Field Security form.

The Student ID field is effectively disabled by implementing Alternative 4.

Student Master Fields

This table lists information and/or data entry instructions for all fields on the **Quick Lead**, **Student Master**, and **Edit Student Information** forms. The fields are listed in the tabbing order of the Student Master form, upper left to lower left followed by upper right to lower right.

Field Descriptions for the Student Master Form

*An asterisk next to the field name indicates a list that can be maintained by your school. See Maintaining Lists for more information.

Field Descriptions

Field	Description
Title*	Enter the lead/student's title such as Mr., Ms. etc.
Last Name, First Name	Enter the lead/student's last name in the first text box on this line followed by the first name in the second box.
Middle Name	Enter the lead/student's middle name (accommodates SEVIS requirements).
Suffix	Enter the lead/student's name suffix (if any) such as Jr., III, and so on (accommodates SEVIS requirements).
Nickname	Enter the lead/student's nickname (if any).
Maiden Name	Enter the student's maiden name (if any).
Address	Enter the lead/student's current home address. You can type multiple lines in this field up to a maximum of 256 characters. Press the Enter key at the end of each address line. Press Tab to leave the field. If you use more than two or three lines, you may not see all of the address on all reports, including labels. Do not include the city, state, and postal code in this field. **Note**: If an address on a student record has more than 40 characters, the additional characters in the address line will not be extracted to be sent to COD, but will be truncated. If a Post Office Box number or Apartment number causes the address line to exceed 40 characters, some elements of the Street Address line must be abbreviated. If the student address on the master form is changed, CampusNexus Student prompts you with an option to save the previous address. (Set up an address type as "Old Address" or "Previous Address" to assign the old address.)
City, State*, Postal Code (ZIP Code)	Enter the City, State Code, and Postal Code. **Tip!** If you enter the postal code (ZIP) first, CampusNexus Student fills in the correct city and state. If you enter the city and state, or just the state, you can select from a list of all ZIP codes that apply by clicking the arrow beside the ZIP field. The ZIP Code database includes **alternative ZIP codes**, cities, and an indicator marking the primary city. When entering a ZIP code into any form in CampusNexus Student, if the ZIP code covers more that one city, a drop-down list of cities is displayed and you can select the correct city from the list. The "primary" city is selected as the default, but you can select any city from the list. If only one city matches the ZIP code, that city will be used without displaying the list of cities.

Field	Description
Country*	Select from the list box the country name to be used with the home address on mailing labels. CampusNexus Student defaults the country field when you add a student using the Student Master form or the Quick Lead form. The Country field defaults to country in the Campus Location Address form. We modified the Campus Location Address form so you can select a country from a list of available countries in the SyCountry table. The selection you make in the **Country** field affects the format of the **telephone numbers** and **SSN.** If you do not select a country, the country defaults to the country in the user's default (login) campus address. See Lists > Admissions > Countries and Setup > Campus Locations > Campuses > Campus Information > Address for more information.
Bad Address	Check this box to indicate that an error has been discovered in the lead/student's address (Incomplete or mail returned, etc.)
Telephone	Enter the lead/student's home telephone number. Depending on how your school has formatted the field, the program may or may not insert the parentheses and hyphen for you. Sixteen (16) characters are allowed in this field.
Bad Phone	Check this box to indicate that an error has been discovered in the lead/student's home phone number.
Work Phone	Enter the lead/student's work telephone number. Depending on how your school has formatted the field, the program may or may not insert the parentheses and hyphen for you. Sixteen (16) characters are allowed in this field. When a student is placed in a job via a student placement, the program updates the Work Phone number in the student's master record with the employer's phone number. The Work Phone Extension is also updated.
Extension	Enter the work phone extension number.
Other Phone	Enter additional phone number.
Mobile Phone	Enter the mobile phone number. For the student to subscribe to receive SMS text messages, the student must have (1) a mobile phone number on file on the Student Master form, and (2) on the Contact Manager's Contact Method screen under SMS Preference, the Subscribe to SMS Service check box must be selected and (3) a SMS service provider must be selected. The Mobile Phone field is audited to identify who last updated CampusNexus Student (View > Admissions > Audit). If the campus administrator updated the mobile phone number, that would mean that the student signed a paper Disclaimer document and it is on file. If a Portal user updated the mobile phone number, that would mean that the student signed an online Disclaimer document and it is stored electronically.

Field	Description
SMS Button	You can view the SMS button on the Student Master form when adding or editing a student. If the student has no mobile number and the student has not subscribed to get SMS, the SMS button is disabled on Student Master form. Clicking the SMS button displays the SMS Message screen where you can create a text message to send. Notice the Maximum Character Limit in the bottom left of the screen. As you enter each keystroke, it is noted in the Character(s) box in the bottom right of the screen. This number will refresh with every key press. A red warning message is displayed as you cross the limit of maximum characters, notifying you that the text is truncated. Click "Send" to send the message to the user. Click "Close" to close the form and return to the Student Master form.
e-Mail (field)	Enter the lead/student's e-mail address.
Other e-Mail	Enter additional e-mail address.
Social Security Number (SSN)	Enter the lead/student's Social Security Number. There is a setup option to allow or not allow duplicate SSNs within the campus or within the entire multi-campus database.
County*	Select the county in which the lead/student lives.
Date of Birth	Enter the lead/student's date of birth. You can type the date (Example: 092880 or 09/28/80) or select the date from the date wizard. Click the arrow beside the field to open the wizard. Regardless of how it is entered, the program displays the date as MM/DD/CCYY.
Gender*	Select the lead/student's gender from the list. (This may seem redundant but there's a reason for using a list. Your school can decide how it wants to handle cases where gender has not yet been indicated.)
Marital Status*	Select the lead/student's marital status.
Ethnic Group*	Select the ethnic group that best describes the lead/student.
Nationality*	Select the lead/student's nationality. This applies to schools that have international students enrolled.
Hispanic/Latino	Select Yes or No. By default, this field is blank. You can delete selected values by using the Delete key. **Note**: This field appears whether the Student Form is configured as "Short" or "Long". In addition, existing field level security logic applies to this field. Additionally, the field caption may be updated in the Data Dictionary by navigating to **Setup** > **Data Dictionary** > **System** (tab) > **Edit** (select IsHispanic).
Ethnic Group	You can select one or more Ethnic Groups. **Note**: This field appears whether the Student Form is configured as "Short" or "Long". In addition, existing field level security logic applies to this field.
Citizen*	Select the lead/student's citizenship status.

Field	Description
Alien Number	Enter the lead/student's Alien ID number (if applicable).
Driver License State*	Select or type the state code of the lead/student's driver license.
Driver License Number	Enter the lead/student's driver license number.
Veteran	Select the appropriate option for the student. The options are Unspecified (from conversion), Yes, or No.
Disabled	Select the appropriate option for the student. The options are Unspecified (default), Yes, or No.
Student ID	This field is filled in by CampusNexus Student based on your school's setup parameters. You may or may not be able to change this number based on your school's setup parameters. Some schools may elect to enter a number here that has been assigned outside of CampusNexus Student. The number must be unique in CampusNexus Student. No duplicate IDs are allowed.
PIN	The Personal Identification Number (PIN) must be numeric and must consist of four numbers. It can remain blank. You can enter or change the PIN as required. The CampusNexus Student Web interface requires the student to enter his or her Student ID and PIN during the login process. When editing or adding a Student Master form, if the PIN is blank and you change the SSN, the program defaults the PIN to the last four characters of the SSN. If the last four characters begin with a zero, for instance 0398, the PIN defaults to a 1 followed by the last three characters of the SSN. The student's PIN is 1398.
Campus*	Select the lead/student's campus. The list of campuses from which to select includes only the campuses you are authorized to work with. As a result of the Program Transfer feature it is not necessary for Campus to be editable on the Student Master form if the student's status category is Enrollment. The campus is changed in the Transfer option on the Enrollment. We changed the logic on the Student Master so that the Campus can be edited only if the student's status category is Lead.
School Status*	Select the lead/student's status in school. CampusNexus Student controls which status codes can be selected at any given time in the student's cycle. The status options come from the Status Codes option on the Setup menu. In conjunction with the new Automatic Document Scheduler feature, document schedules based on "Pre-Enrollment" or "Enrollment" are evaluated when the status for a student is modified and saved on the student master form (frmAmStudMaster). If the student's data matches the specified criteria for a document schedule where the criteria includes student status, all documents attached to the document schedule that are not already scheduled are scheduled for the student.
Lead Source*	Select the Lead Source for this lead/student. Lead sources indicate how the student heard about your school. Click the button to the right of the text box to select one or more lead sources. You can select multiple lead sources for a student. Click to select multiple lead sources. After selecting, click the button again to close the list.

Field	Description
Lead Date	CampusNexus Student enters the current date and time when a new lead/student record is created. If you edit this date, you can type the date (Example: 092801, 09/28/01) or select the date from the date wizard. Click the arrow beside the field to open the wizard. Regardless of how it is entered, the program displays the date as MM/DD/CCYY.
Lead Type*	Select the lead type for this lead/student. Lead types can be anything that your school says they are. For instance, Newspaper, High School, TV, Radio, or Handout could all be lead types.
Last Activity Date	Read-only. Displays the last time information was changed for this student.
Admissions Rep*	Select the Admissions Rep for the lead/student. Only staff members who are classified as admissions representatives (Admissions Rep Group) is shown on this list. Occasionally, a staff member is removed from the Admissions Rep group after having been assigned to students as their original rep. When this happens, the program retains the name of the former rep on the student records.
Interest*	Select the Program Group in which the lead/student is interested. Program groups are groups of related programs such as business, medical, dental, social sciences, etc.
Program*	Select the program(s) of study in which the lead/student is or wishes to be enrolled. If the program is selected for a new lead, the program-related documents will be listed for tracking in the lead/student's document file. Enrollment in the program is not a requirement. Similarly, any program-related entrance tests are attached to the lead/student's file. Click ... to select more than one program. After selecting, click the button again to close the list.
Shift*	Select the shift (days, evenings, etc.) in which the lead/student attends classes.
Expected Start (Date)	Enter the lead/student's expected start date. You can type the date (Example: 091399, 09/13/99) or select the date from the date wizard. Click the arrow beside the field to open the wizard. Regardless of how it is entered, the program displays the date as MM/DD/CCYY.
Previous Education*	Select the lead/student's previous education level (high school, GED, college, etc.) code. **Important**: This text box must be populated with the proper Ability to Benefit code for the student to pass validation at COD. If you have not set up ATB associations yet, go to If this text box contains ATB codes of 3 or 5, or text box is blank, the student will fail validation and an exception will be generated at COD. To set up ATB associations, go to **Tools > Financial Aid > Education Level Setup**.
Agency/Sponsor*	Select an agency or sponsor with which the lead/student is associated. **Note**: The Agency selection on the student's master form designates one of possibly many agencies. It is not a branch. It is a signal that the student has some relationship with the agency. It is for your information and report selection purposes. The Agency shown on the student master may have several branches. To complete the connection between the student and the agency, select and add an agency branch under View > Contact Manager > Agency Affiliations. You can also add additional agency/student relationships from the Agency Affiliations form.

Field	Description
Instrument (Extra-Curricular)*	Select a code that describes the lead/student. The label of this field is often changed to something that is meaningful to your institution. At installation, CampusNexus Student labels this field as "Extra-Curricular", but your school may call it something else. It is possible to select more than one choice for this field. Click ... to select more than one program. After selecting, click the button again to close the list.
Original Start Date	Read-only. When a student has multiple records,many schools report strictly on the student's original start date, rather than the student's current start date. This date is also retained when the student's start date changes for any reason.
Current LDA	Read-only. In CampusNexus Student, a student's last date of attendance (LDA) is stored on the enrollment record. Therefore, a student with three enrollments has three LDAs. Schools need the ability to see the most current LDA without having to search though the enrollments. This field is updated each time attendance is posted.
Non-Immigrant Student	Select or clear this box as required. This field is required for Student and Exchange Visitor Information System (SEVIS) processing for the Immigration and Naturalization Service (INS). This check box appears on the Student Master form only if your school accepts international (nonimmigrant) students, exchange visitors, or both.
Data Block Indicator	Select Data Block Indicator if some student data is to be blocked at the Clearinghouse from distribution to other servicers. This indicator, along with the other data, is sent to the Clearinghouse. See also Clearinghouse Setup. The field is disabled by default. If your campus is using the Clearinghouse for sending IPEDS data to the Department of Education, this check box will appear on the student master form, otherwise it will not appear. See FERPA Document Setting for Family Educational Rights and Privacy Act (FERPA) laws.
Comments or	Click Comments to open a form for entering miscellaneous comments about the lead/student. The button appearance changes if comments exist or not for the record. No comments have been entered. Click to add a comment. Comments have been entered. Click to edit a comment.
Add Activity	Click Add Activity to open a form for entering an activity related to the lead/student. If your school uses the automatic activity features of CampusNexus Student, the act of creating a new lead or changing a student's status may trigger activities to be assigned to staff members.
Print Labels	Click Print Labels to print a mailing label from one or more addresses related to the lead/student. See Print Setup for information about choosing a label printer.
Picture	Click Picture to see, add, or edit a picture of the student. The student picture must be in bitmap (*.BMP) format for use in CampusNexus Student.
E-Mail	Click E-Mail to send an e-mail message to the student. An e-mail address must be present in the student's master record before you can use this feature.

Field	Description
Multiple Enrollments	This read-only field appears only if the student is enrolled in more than one program version at your school.
More on Student Status - Change Cancel to New Lead	When a student cancels an enrollment, i.e., notifies the school that he or she will not be attending classes, the student's status is usually changed to Cancelled. To change a Cancelled status to New Lead, use the Student Master form. You cannot change a Cancel to a New Lead using the Status History form. This can only be done from the Student Master form.

Student Status

What is Student Status?

During the course of a student's relationship with your institution, the student's status, with respect to CampusNexus Student, changes several times. When the first record is created for the prospective student (lead), the default "New Lead" status is assigned to it. from that point forward, staff members and the system initiate a series of status changes. Different departments of the school are responsible for certain status changes.

For example, a new lead might progress in the following series of status changes:

1. New Lead (Admissions)
2. Interview Scheduled (Admissions)
3. Interviewed (Admissions)
4. Application Accepted (Admissions)
5. Future Start (Enrolled, not yet attending, Admissions)
6. Active (attended first class, Academic Records)
7. Leave of Absence (Academic Records)
8. Graduated (Academic Records)
9. Placed (Placement)

Authority is granted to staff members in certain departments to execute the changes in student status. A few status changes happen automatically, such as the change from Future Start to Active. This change is triggered by attendance in a class section (if attendance is being tracked, otherwise, it must be changed manually). Status changes can be reversed or rolled back in some circumstances that are controlled by system setup parameters. These are set by your system administrator.

The description of status changes is controlled by your system administrator in the Setup menu. CampusNexus Student must know that your status codes and descriptions are related to certain very specific conditions which are listed in the setup procedure. For example, your school might have a student status described as "In Trouble". For CampusNexus Student to understand what this means, you would have to relate your status with a CampusNexus Student System Status known as "Probation". Further, CampusNexus Student knows that the System Status code for "Probation" belongs to a Category of similar codes known as "Active". "Active" means that the student is still on the active roster for your school.

Status codes must be classified in the manner described above so that CampusNexus Student knows how to properly report your student population on reports required by the Department of Education, accreditation agencies, and so on.

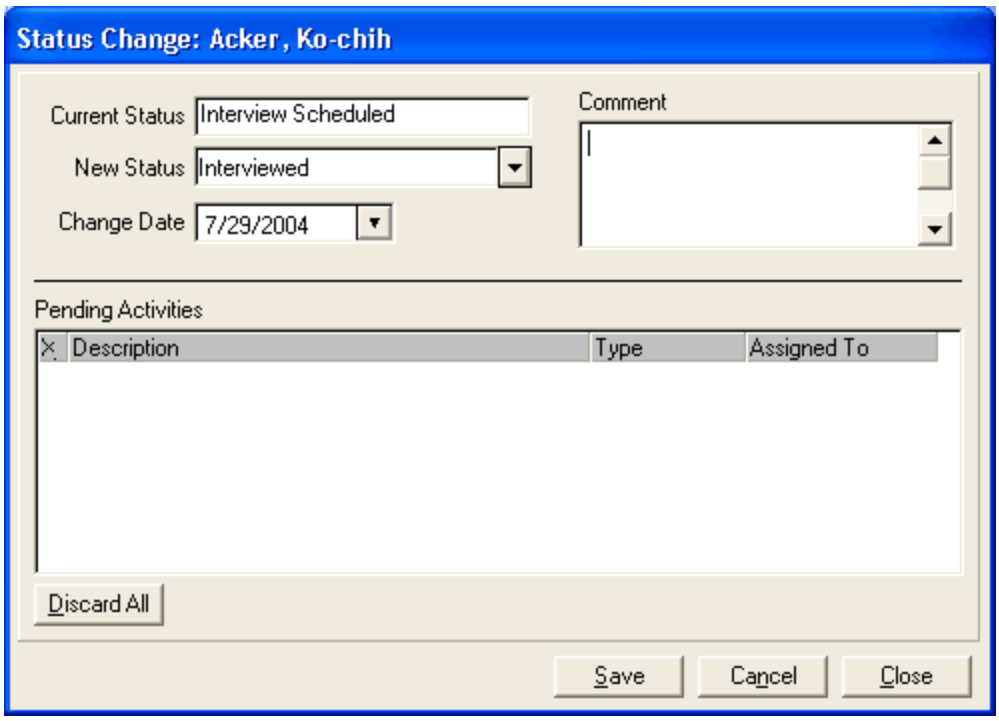
Change a Student Status

To change the status of a student:

1. You must be granted the proper authority by the system administrator.
2. You must be in the proper department for making the required change. This is also controlled by the System administrator.
3. Use the **Find** tool, if necessary, to locate and **select the student** for whom the status change must be made. The **Student Master form** must be displayed.
4. Click **Edit** to edit the Student master form.
5. If the text in the Status text box is "dimmed" you cannot change the student's status at this point.
6. Click the arrow beside the **Status** text box. A list of valid status changes is shown.
7. Select the status to which the student must be changed.
8. Click **Save** to save your status change. When you save the Student master form with a status change made, an

additional form is displayed. On this form, you can enter comments regarding the change and you can discard any activities that no longer apply due to the change of status.

9. Click **OK** on the Status Change form to accept it and finalize the status change.



More on Student Status

Change Cancel to New Lead. When a student cancels an enrollment, i.e., notifies the school that he or she will not be attending classes, the student's status is usually changed to "Cancelled". To change a "Cancelled" status to "New Lead", use the Student Master form. You will not be allowed to change a "Cancel" to a "New Lead" using the Status History form. This can only be done from the Student Master form.

Adding a Quick Lead

The Quick Lead form is intended for rapid data entry of the most basic information about a person making an inquiry concerning your institution. It can be used by receptionists, telephone operators, or other staff members to gather data for later response by someone such as a sales or admissions representative.

The format of the Quick Lead form is flexible. See Quick Lead Form Design for more about designing your institution's forms. If your institution accepts international (nonimmigrant) students, the quick lead form may contain fields that are specifically required for processing data for the Students and Exchange Visitors Information System (SEVIS) of the Immigration and Naturalization Service (INS).

To quickly add a lead:

1. Click the **Quick Lead Entry** button on the Shortcut Bar.

   Or, select **File** > **Add New Lead**.

   Or, press the **Ctrl+L** key combination.

   The Quick Lead Entry form is displayed.

2. Enter the necessary data. Fields with colored backgrounds are required.

   Some required fields are linked so that only one entry out of several is required. In the example, the fields with blue backgrounds are linked. If you enter data in any one of the three, the requirement is satisfied. (On your Quick Lead form, the colors may be different.)

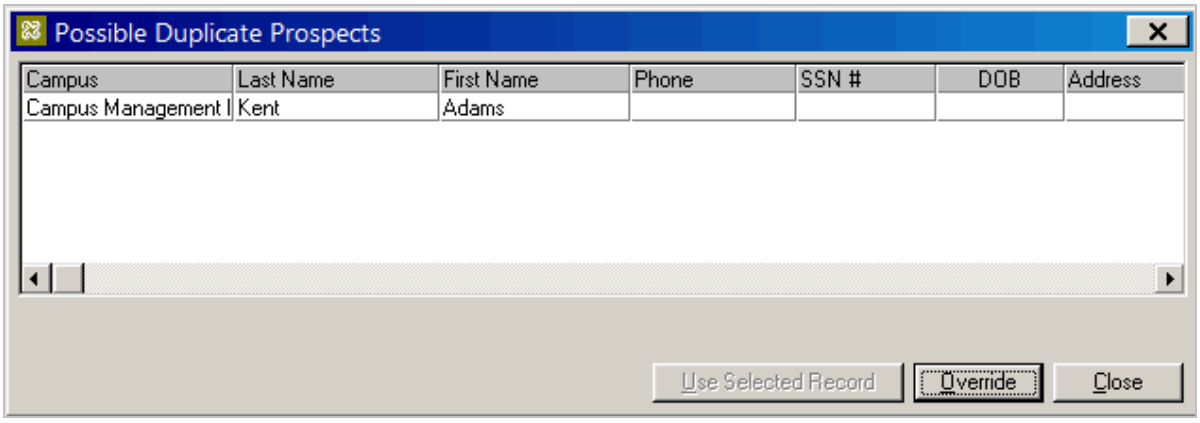
   The drop-down lists on the Quick Lead form are campus-specific. Only the options set up for the campus selected at the top of the form are displayed.

   As you enter data, CampusNexus Student checks the database for duplicates. The following fields are checked for duplicate values:

   - Campus
   - Student Name (combined)
   - Phone

- Student ID or Social Security Number
- DOB
- Address
- E-mail address.

If a duplicate is found, the Possible Duplicate Prospects form is displayed.



If the new lead is a duplicate, select the record in the grid and click **Use Selected Record**. The lead form will be populated with the information for that lead. The information can then be edited.

Otherwise, click **Override** to continue entering the new lead record with data similar to the record already on file.

The campus for the lead can be changed ONLY if the campus ID for the record from the grid is in the list of Campuses that you have access to. If you do not have access to the campus of the lead's record, you cannot change the campus.

3. The Quick Lead form is an abbreviated version of the Student Master form. To enter additional information about the new lead in the Student Master, select **Show Student Master after save**.
4. Click **Save** to save your new lead.
5. Clear the "Show Student Master after save" check box to continue entering new leads. When you clear the check box, the Save button label changes to **Save/Next**. See Batch Quick Lead Entry for more about adding batches of leads.

   The **Quick Leads Entered** value in the lower left corner of the form is incremented as long as you do not close the form.

Adding a New Student

The distinction between adding a new lead and adding a new student is in the form that is presented when you press the **Ctrl+N** key combination. The **New** (**Ctrl+N**) option on the **File** menu will open a blank **Edit Student Information** form. You can then enter complete data for the new lead or student.

Note: The field labels on your Edit Student Information form may vary from those of the example. Your system administrator can change the labels in the data dictionary. You may even see the labels in a different language such as Spanish or French.

Additionally, your school may use "format masks" that are different from the illustration. For example, fields such as the telephone number may be formatted for international data.

Duplicate Student Records

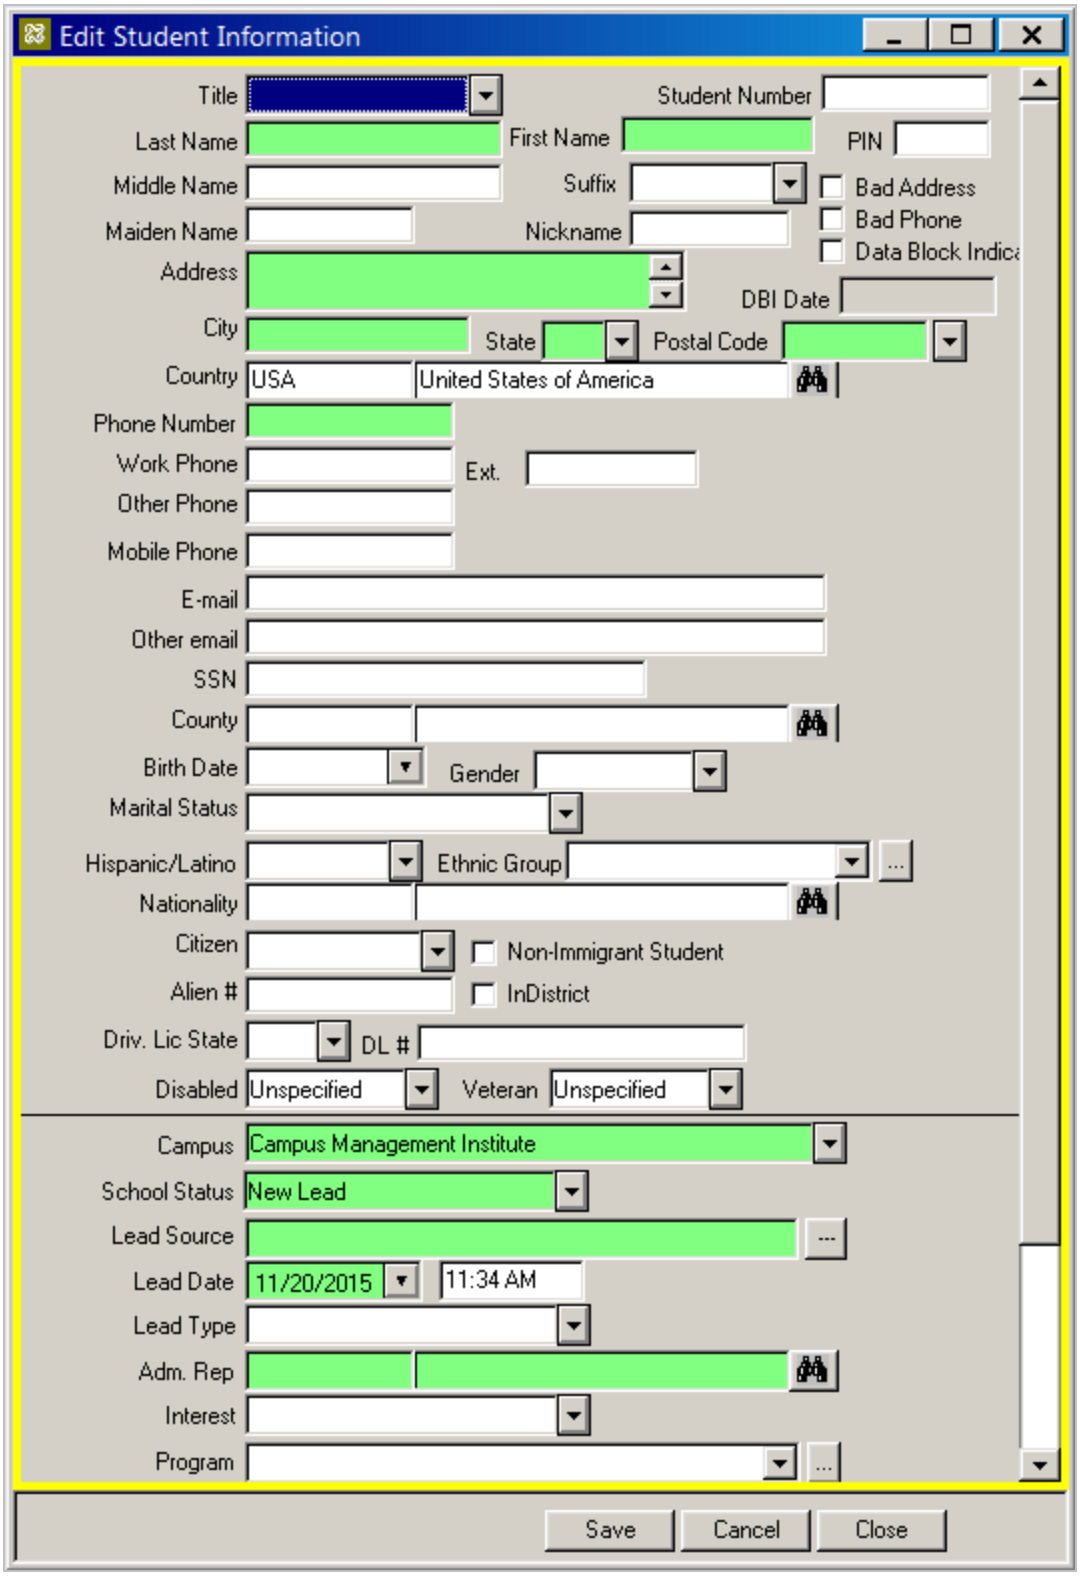
CampusNexus Student checks for duplicate student master records when new students are added. The columns that are used to check for duplicates are Student ID, Social Security Number, Phone Number, Date of Birth and Student Name (combined), Driver's License Number, and E-mail address. Each of these checks is performed only if you entered data in the corresponding field. If at least one match is found, a grid showing the matches is displayed. If the lead being entered is indeed a duplicate and can be found on the grid, you can click the record and the lead form will be populated with the information for that lead. The information can then be edited. The campus for the lead can be changed ONLY if the campus ID for the record from the grid is in the list of campuses that you have access to. If you do not have access to the campus of the lead's record, you cannot change the campus.

To add a new student master record:

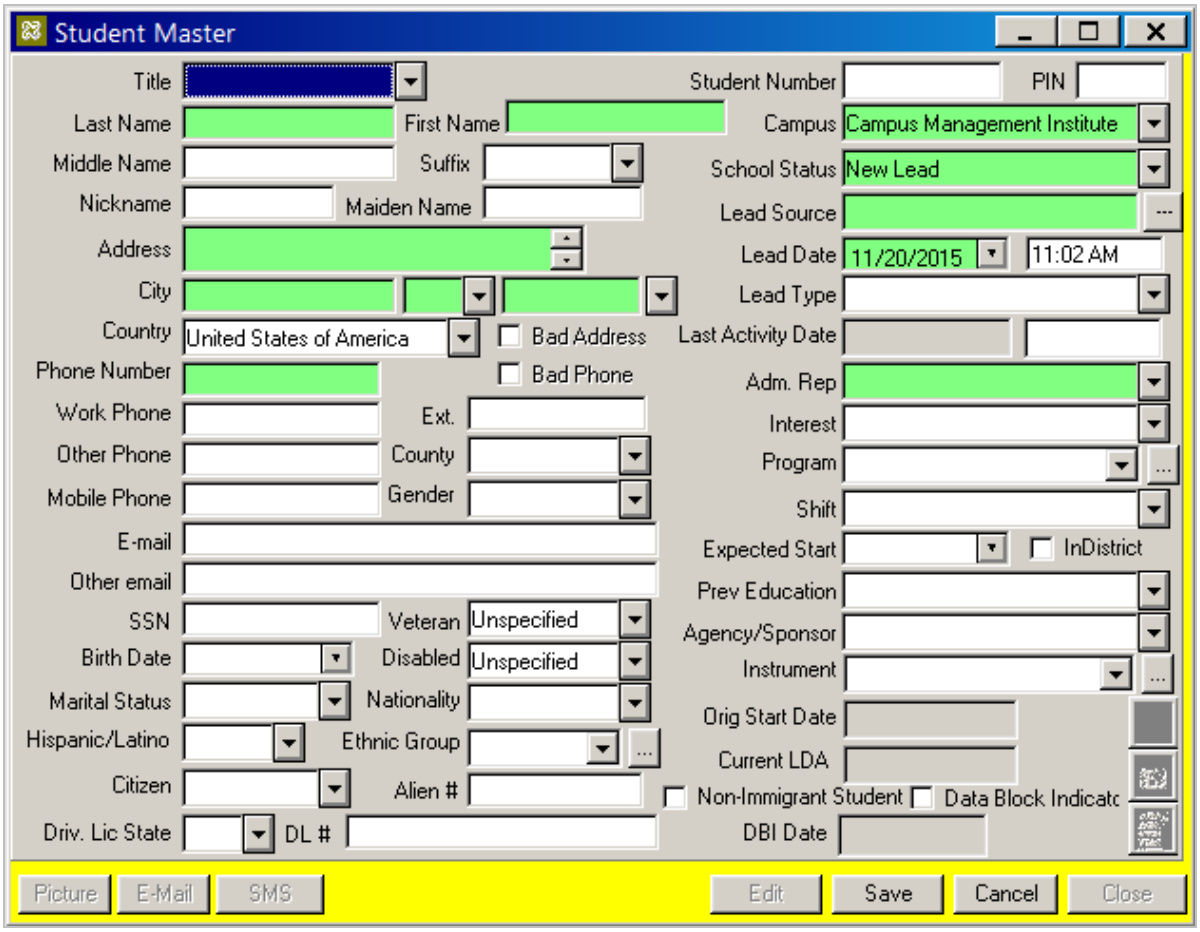
1. Click the New Student Master icon .
   Or, press **Ctrl+N**.
   Or, navigate to **File** and select **New Lead (Full)**.
   Or, press **Alt+F** and then press **N**.

   A blank Edit Student Information form is displayed. The format of the form depends on the System Setup option that chooses the long form or short form.

Student Master - Long Form



Student Master - Short Form



2. Enter the information about the new person. Select an option from each list box on the form. Note that your school may have designated some of the fields on the form as required. The required fields are colored differently than other fields on the form. When you save the form, the program displays a message if you don't provide required information. See the Student Master Fields Table for information about all fields on the Student Master and Edit Student Information forms.
3. Click **Save** to save the information about the new lead or student. When the save procedure is completed, the Edit Student Information form is closed and the Student Master form is displayed.

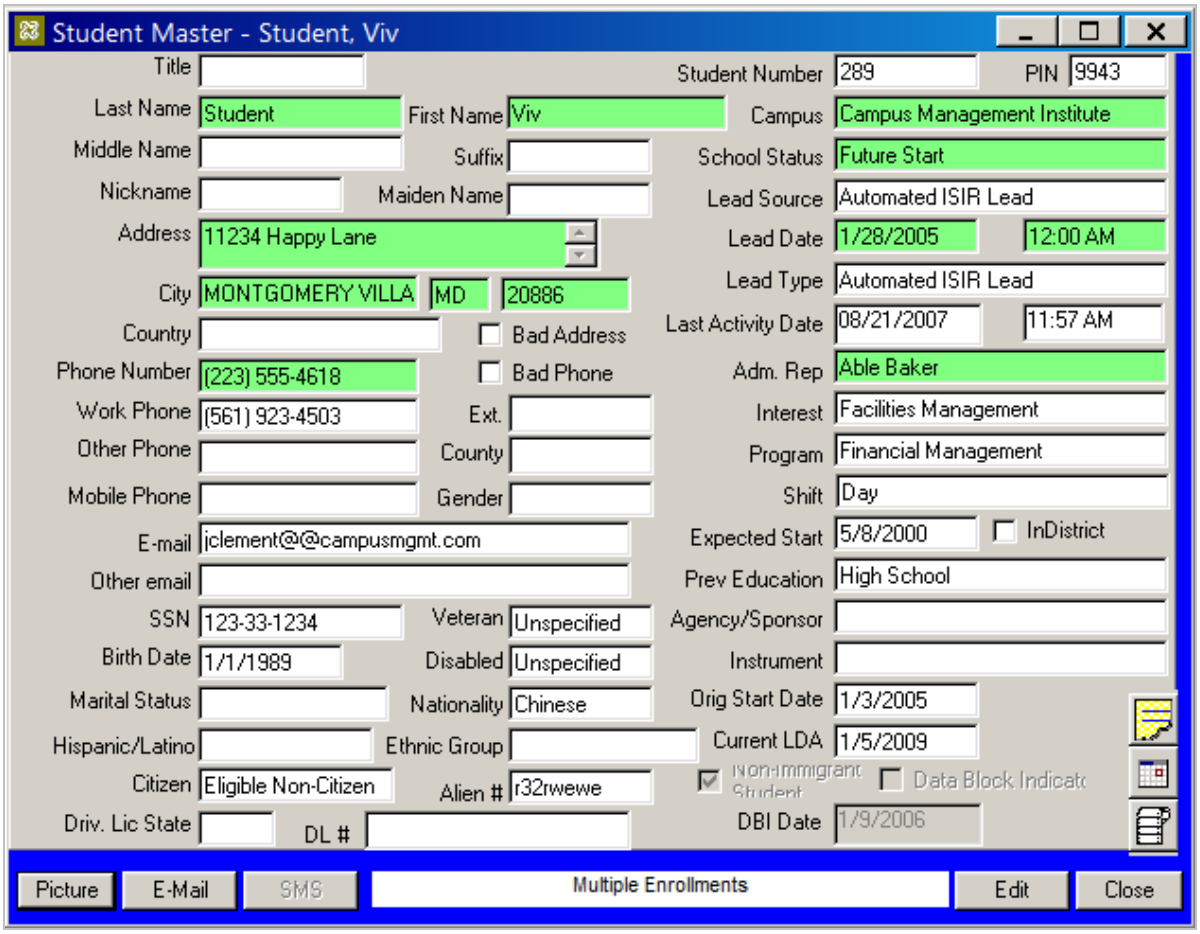
Editing a Student Master Form

Once an Student Master record has been added to CampusNexus Student, you can select and edit it. This optional feature is controlled by a System Settings option labeled Student Form.

Note: If a user changes the student's campus, the lead source value remains. CampusNexus Student keeps the original lead source, even if it is not valid for the new campus.

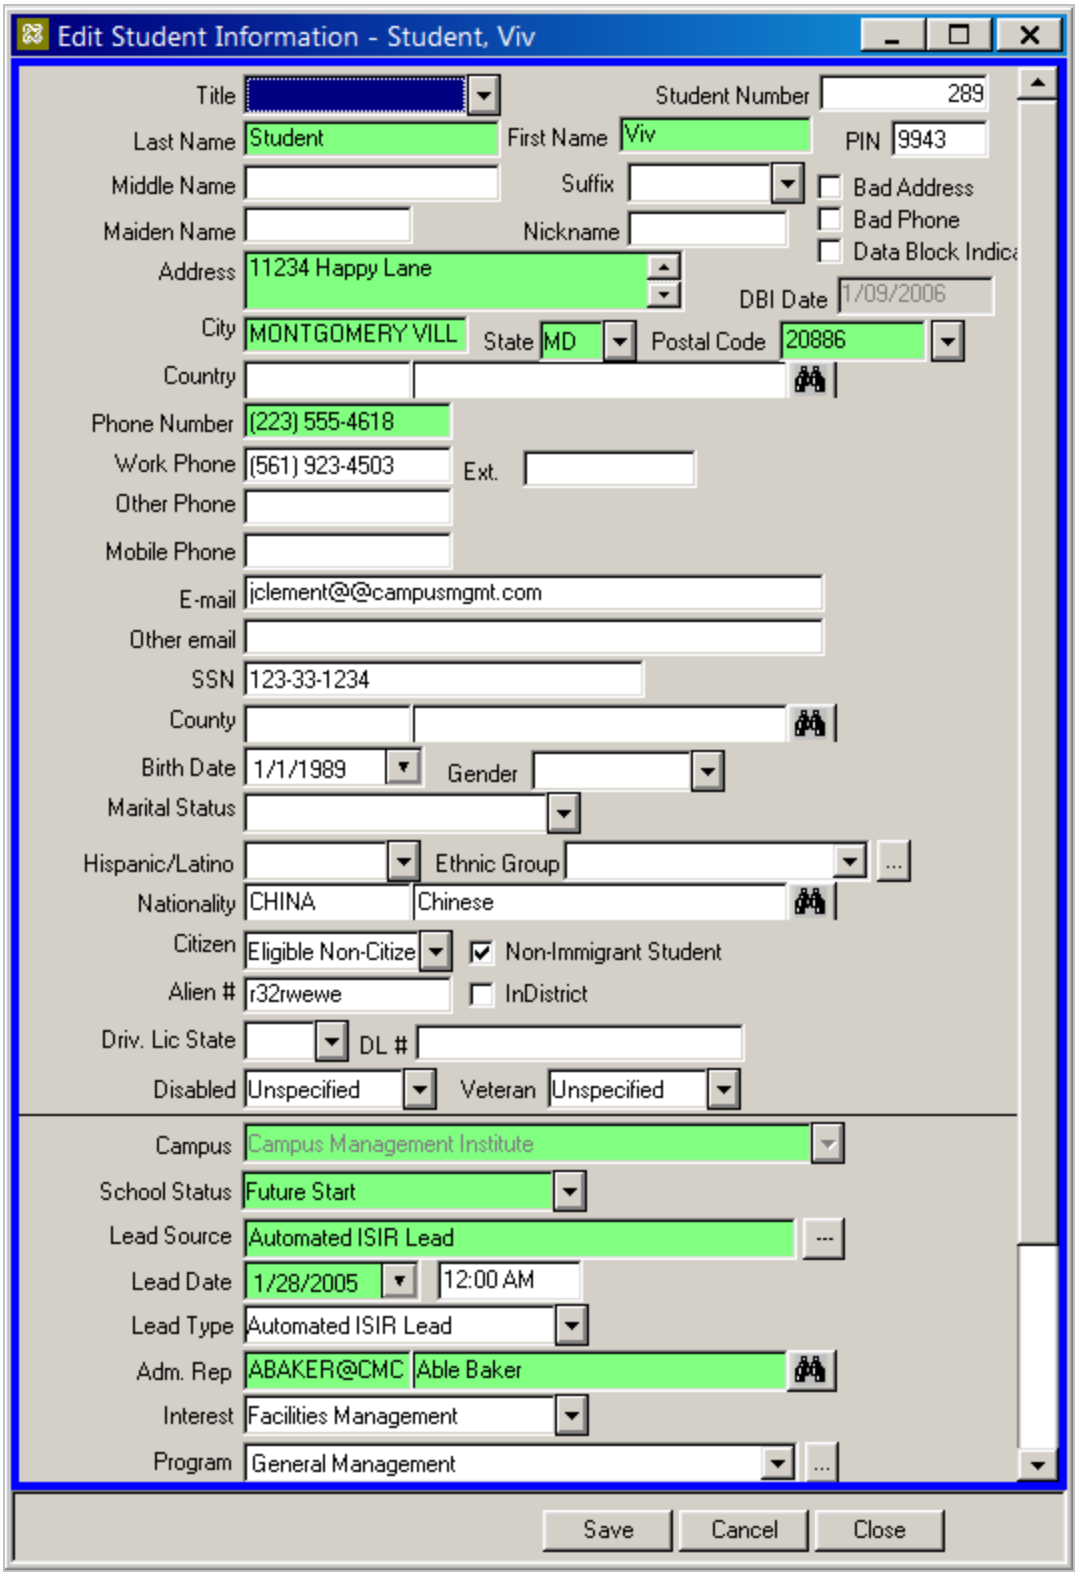
To edit a Student Master form:

1. Find the student whose form you want to edit, or select the student from the **Recent Students** list box. The selected Student Master form is displayed.



2. Click **Edit**.

   If the Long Student Form is enabled in Setup > System Settings, CampusNexus Student displays the long Student Master form for editing. Otherwise, the fields are available for editing on the short form.



- List Boxes

  The list boxes on Edit Student Information form contain choices that you can make to describe the lead or student. These choices are set up on lists in the Admissions module and other modules. If you find that you

need a choice that is not on a certain list, contact your manager or system administrator and request that it be added to the list.

- Search Icons

  Click , for example beside the County field, to find an appropriate selection.

  The search form requires that you specify at least part of the Description or Code before you click Search. Once the list of items is displayed, select one and click **Select** to enter it in the related student master record. CampusNexus Student closes the form when you select a listed option. Click **Clear** to start a new search. Click **Close** to close the form.

3. Enter the additional or changed information about the student. If necessary, select options from the list boxes on the form. The required fields are usually colored differently than other fields on the form. For a complete list of field on the student master form, refer to Student Master Fields.

   - **Bad Address**. Select this check box if you find that the current address on file for the student is incorrect.
   - **Bad Phone**. Select this check box if you find that the telephone number on file for the student is incorrect.

4. If you update the **Lead Type**, **Lead Source**, **Program**, or **Interest** fields, and CampusNexus Student is set to track multiple inquires, a dialog box is displayed asking if you want to update these fields in the Student Inquiry. Select **Yes** to update the inquiry record, ensuring that the inquiry and Student Master are synchronized. Select **No** and the inquiry record will not be updated with the changes in these fields.

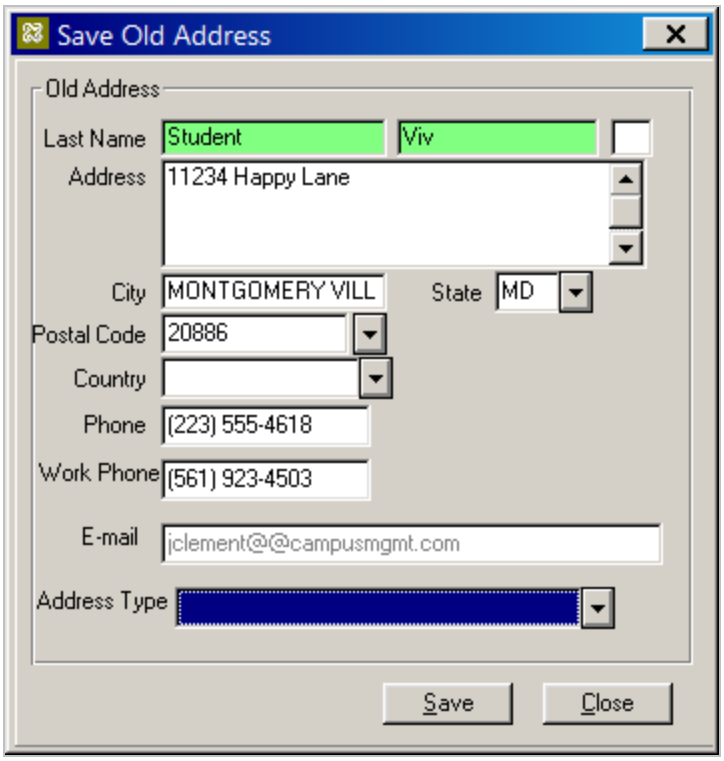
5. Click **Save**.

Address Change

See Save Old Address instructions to save the previous address.

Save Old Address

If you change the student's address information in the Edit Student Information form, the Save Old Address form is displayed. If you do not want to save the old address, click **Close**.



To save the previous address information:

1. Verify that the address information is correct.
2. Edit appropriate fields.
3. Select an **Address Type**.
4. Click **Save**. The previous address will be added to the list of other addresses for the student.
5. Click **Close** to close the form.

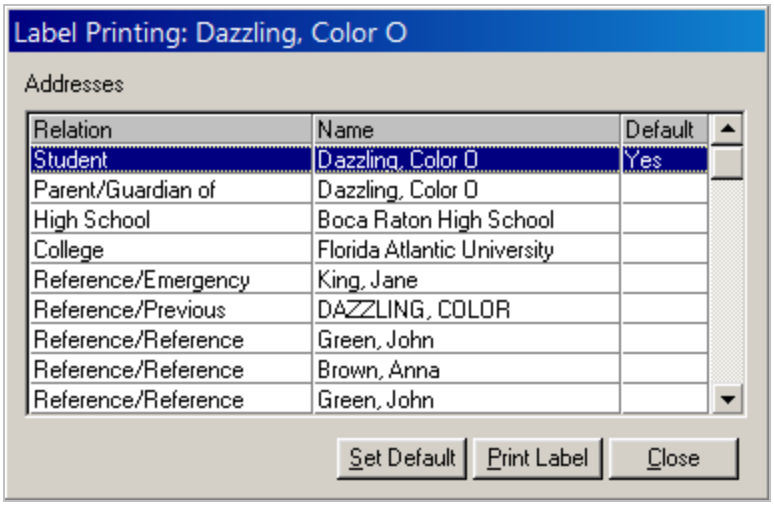
Print Address Labels

You can print a label for any address associated with a student. You can designate one of the addresses as the student's default address. Be sure that your label printer has been set up by your system administrator before trying to print a label.

To print a label:

1. Select a student.
2. Open the Student Master form.
3. Click **Print Labels** to see a list of addresses for the student.

   Some of these addresses are entered from Contact Manager on the View menu. The High School address comes from the selection on the Education form in Admissions. The Parent/Guardian address is derived from the student's primary address on the Student Master form.



4. Select the row for the label you want to print.
5. Click **Print Label**. One label is printed on the designated printer for each address you select.
6. Click **Close** to close the form.

For instructions on completing the Addresses form, see View > Contact Manager > Addresses.

Comments

When you are viewing the Student Master form, you can enter comments related to the selected student. The comments field is virtually unlimited in size and can contain any text. Refer to your school's policies and procedures for the types of information to record here.

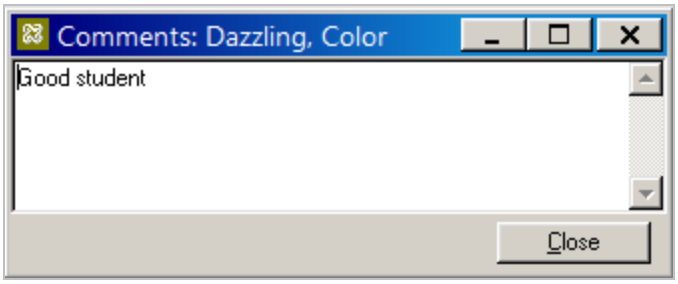
Remember that you can use Contact Manager to capture detailed activity and comments about any given student. Contact Manager can be a better format for organizing contact information and comments about a given student.

To add or view comments related to a selected student:

1. Select a student.
2. Open the Student Master form.
3. Click the **Comments** icon.

   - The Comments icon looks like this when there are no comments on file.
   - It looks like this when there are comments on file.

   The Comments form is displayed.

4. Use the Scroll bar to navigate up and down the existing comments, if any.
5. Place the insertion pointer anywhere in the comments box that you want to add additional comments and type your new text. Since the comments are free-form in nature, add a date and user name to identify when the comment was entered and by whom.
6. Click to close the Comments form or press **Ctrl+F4**. If you have changed the comments, you are prompted to save your changes.
7. Press **Enter**, type **Y**, or click **Yes** to save your changes.

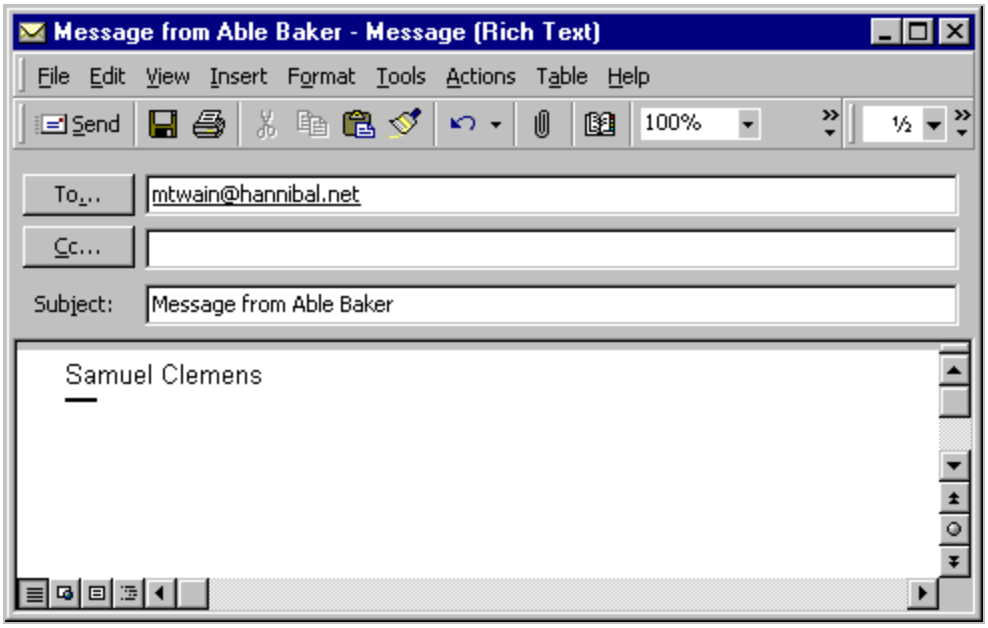
E-Mail

The E-Mail Button on the Student Master form opens a new email message addressed to the student. This feature is enabled when you enter an e-mail address in the student's master record.

Note: The email feature in CampusNexus Student requires that you have Microsoft Outlook available on your workstation. If your network uses terminals (Winterms) and a terminal server (Citrix), Outlook must be available on the server.

To send an email to a student:

1. Select a student.
2. Open the Student Master form.
3. Verify that an email address is recorded for the student. If the E-Mail button is dimmed, there is no e-mail address on file for the student. If you know the e-mail address for the student, enter it before attempting to send a message.
4. Click the **E-Mail** button. An e-mail message form is displayed on your desk top. Some fields are filled in with data from CampusNexus Student.



5. Enter the message information, e.g., Subject, CC list, and the body of the message.
6. Click **Send** to send the message to the student. The form closes automatically when the message is sent.

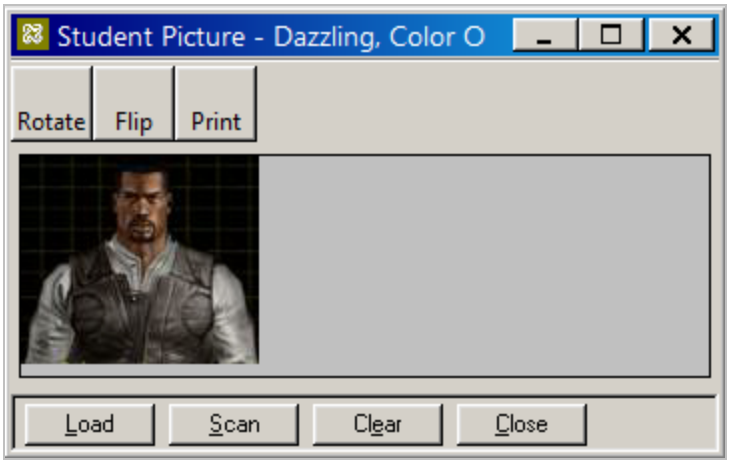
Student Picture

You can import digital images of your students into CampusNexus Student and display them when needed. When they are imported, the pictures are stored as bitmaps in a CampusNexus Student database.

Note: The Student Picture form is also accessible from the Student Master form.

To work with student pictures:

1. Select a student.
2. Navigate to **View > Student Bar > Contact Manager > Student Picture**. The Student Picture form is displayed. If a picture has already been imported for the student, it is displayed on the form.



3. Click **Load** to import a picture from a file. When you click Load, CampusNexus Student opens a directory search form. Use it to find the image you want to import.
4. Click **Scan** to open your scanner software and import an image from a scanner attached to your computer or on your network. When you click Scan, CampusNexus Student looks for Twain compliant applications on your computer. If there is more than one, select one to open. When the image is scanned, choose an option in the scanner application to export it to CampusNexus Student.

   Note: We recommend that you edit, crop, or size the image before you import it. Once it is imported, you cannot change anything except its orientation on the Student Picture form.
5. Click **Clear** to clear an existing picture of the student from the form and from the database.
6. Click **Close** to close the Student Picture form and save any changes you have made.
7. Click **Rotate** to rotate the image by 90 degrees.
8. Click **Flip** to turn the picture upside-down.
9. Click **Print** to print a copy of the student's picture. The picture is enlarged to just fit on an 8.5" x 11" sheet of paper.

Deleting a Lead-Student

In rare instances it may be necessary to delete a lead or student master record and all related records.

For a lead or student to be deleted:

- The person performing the deletion must be in a staff group that has Delete Permission in Security Setup.
- There must be no financial transactions on file for the lead or student.
- A student must not be enrolled in a program version. (It is possible to remove an enrollment if classes are not scheduled or grades have not been recorded.)

To delete a lead or student record set:

1. If the delete conditions described above are true, select the lead or student master record to be deleted. Be absolutely sure that the lead or student master to be deleted is the currently active form in your work area.
2. From the **File** menu, select **Delete**. A confirmation message is displayed.
3. Click **Yes** to permanently remove the lead or student record from the CampusNexus Student database. Data for the selected student can no longer be viewed or recalled in CampusNexus Student.

   Click **No** to stop the deletion and keep the record in the database.

Find Menu

The Find menu provides two options that can be used to find individual students or a group of students that were found in an earlier search and saved as a group.

- Select **Student (Ctrl+F)** to search for an individual student or a group of students using the Search tab or the Advanced tab of the search tool.
- Select **Next Student (F3)** to switch to the next student in a group of students. Data for the next student will populate a form like the one with which you are working.

Student Record Search

CampusNexus Student provides extensive student record search features. The **Find > Student** (Ctrl+F) menu option opens a dialog box with three tabs.

Search Tab

The Search tab is used to find one student or a group of students by Campus, Student Number, SSN, Last Name, or First Name. The fields displayed in the search result can be customized.

Wildcard searches are supported. The underscore character (_) replaces one character in the search field. The percent character (%) replaces a string of characters.

Advanced Tab

The Advanced tab is used to find groups of students having the same characteristics. Up to six search parameters can be defined. The search parameters are created by selecting fields and specifying values for each field.

Groups Tab

The Group tab is used to create groups based on the students found using the Search tab or Advanced tab. The groups can be saved and reloaded on demand. The Groups tab also allows updating groups by adding, replacing, or deleting students.

Student Record Search

CampusNexus Student provides extensive student record search features. The **Find > Student** (Ctrl+F) menu option opens a dialog box with three tabs.

The Advanced tab is used to find groups of students having the same characteristics. Up to six search parameters can be defined. The search parameters are created by selecting fields and specifying values for each field.

Groups Tab

The Group tab is used to create groups based on the students found using the Search tab or Advanced tab. The groups can be saved and reloaded on demand. The Groups tab also allows updating groups by adding, replacing, or deleting students.

Finding a Student Master Record From the Search Tab

You can find students from the Search tab of the Search form, using all or part of a student number, SSN, last name, or first name. The Search tab also allows you to customize the fields to be displayed in the search results list.

To find student records using the Search tab:

1. Use one of the following methods to open the Search tool:
    - Click the Find icon on the toolbar.
    - Press **Ctrl+F**.
    - From the **Find** menu, select **Student**.
    - Double-click any open space in the work area.
    - Right-click an open space in the work area and select **Find Student**.
2. Click the **Search** tab. The Search form displays any previously used search criteria.

    Note: If you click the **Reset** button, the search parameters on the Search tab and on the Advanced tab are cleared with the exception of the default campus in the Campus drop-down on the Search tab and the Group listing on Groups tab.
3. Click the **Advanced** tab and check for search parameters that may be left over from previous searches. Clear any unwanted parameters by selecting the **<none>** option from the drop-down list.
4. Click the **Search** tab again and select a **Campus** in which to search. If yours is a multi-campus institution and you have permission, you can search all campuses.
5. Enter the known search criteria, for example, the student's last name, first name, or SSN.

    The SSN and the name fields accept wildcard characters. The underscore character (_) replaces one character in the search field. The percent character (%) replaces a string of characters. For example, if you enter "%Donald" in the last name field, the query find students named McDonald, MacDonald, and O'Donald.
6. Click the **Search** button. The query returns a list of all student records that meet your search criteria.

    Note: Students having more than one enrollment are listed once for each enrollment if **Enrollment #** has been selected as a display column in the search results grid.
7. Review the search results and proceed as desired.
    - **Double-click** a line to open the associated Student Master form.
    - Click the **Advanced** tab to refine the search.
    - Click the **Groups** tab to save the search results as a student group.
    - Click **Cancel** to close the form.

Customizing the Search Results Grid

There are two ways in which the search results grid on the Search form can be changed.

(1) The system administrator (SA) can customize it through a Setup option.

(2) If you have been given permission via a Setup option, you can customize search results grid yourself.

To customize the search results grid:

1. On the Search form, click **Customize**. The Customize Search Form is displayed.
2. Select or clear the optional data columns to be displayed in the search results grid.
3. Click **OK**. Your selections are saved and the form is closed.

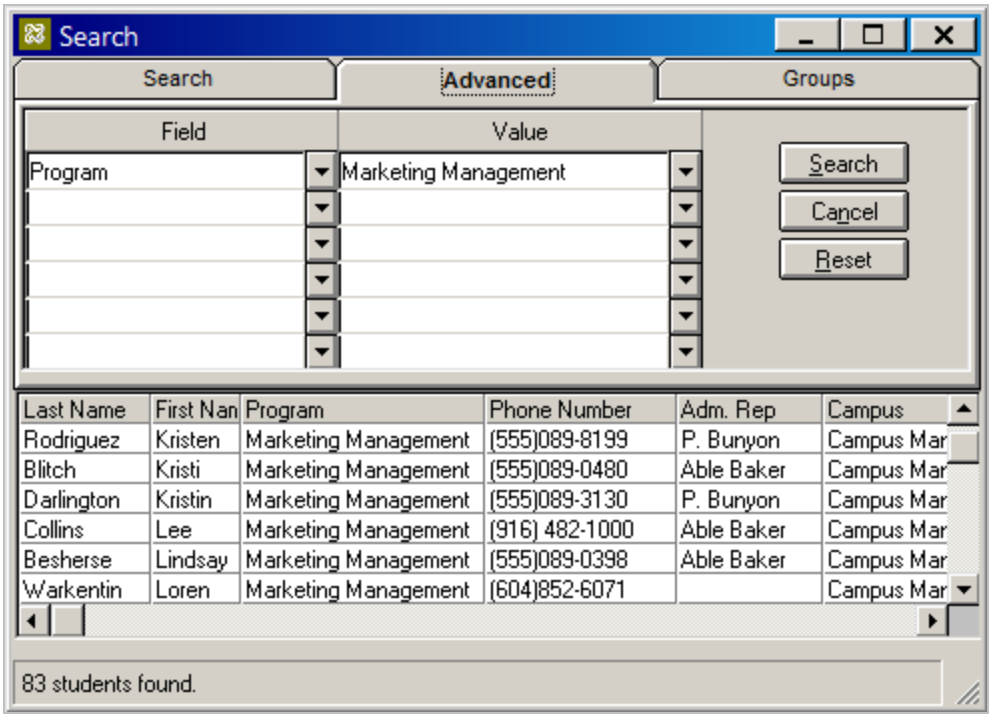
Finding Student Records From the Advanced Tab of the Search Form

You can use the Advanced tab of the search tool to define school-specific search parameters. The search parameters can be a combination of up to six fields and their associated values. The search results can be saved as a group.

To find student records using the Advanced tab:

1. Use one of the following methods to open the Search tool:
   - Click the Find icon .
   - Press **Ctrl+F**.
   - From the **Find** menu, select **Student**.
   - Double-click any open space in the work area.
   - Right-click an open space in the work area and select **Find Student**.
2. Click the **Search** tab. The Search form displays any previously used search criteria.

   Note: If you click **Reset**, the search parameters on the Search tab and on the Advanced tab are cleared with the exception of the default campus in the Campus drop-down on the Search tab. The Group listing on the Groups tab also is not cleared.
3. On the Search tab, select **All Campuses in Database**, **Group: All Campuses**, or one campus. Enter any other parameters that apply to the new search.
4. Click the **Advanced** tab and check for search parameters that may be left over from previous searches. Clear any unwanted parameters by selecting the **<none>** option from the drop-down list.
5. Select the search parameters from the drop-down lists in the **Field** column. For each field selected, enter or select a value in the **Value** column. You can combine up to six search fields.



6. Click **Search** . All student records that meet your search criteria appear.
7. Review the search results and then:
    - **Double-click** each student record to open the associated Student Master form.
    - Click the **Groups** tab to save the search results as a student group.
    - Click **Cancel** to close the form.

Advanced Search Fields

The Advanced tab of the search tool provides six drop-down lists of fields that can be searched. The user can specify the values for each field. The combination of up to six fields and their associated values can be used to find a group of students having the same characteristics.

Several input fields accept wildcard characters. The underscore character (_) replaces one character in the search field. The percent character (%) replaces a string of characters. For example, when you are searching for e-mail addresses, if you enter "ab%", the query returns all students with e-mail addresses that begin with "ab".

Field Values

Field	Value
Adm. Rep.	List of names of administration representatives
Adult Student Goals	<input field> (wildcards allowed)
City	<input field>
Country	List of countries
Current FA Grade Level	List of available grade levels
Diploma Name	<input field> (wildcards allowed)
E-mail	E-mail address (wildcards allowed)
Former Roommates	<input field> (wildcards allowed)
GPS	<input field>
Honors	List of available honors
Lead Source	List of available lead sources
License Plate	<input field>
Maiden Name	<input field> (wildcards allowed)
Middle Name	<input field> (wildcards allowed)
Nickname	<input field>
Parking Space	<input field>
Phone Number	<input field> (wildcards allowed)
Program	List of available programs
School Status	List of available statuses
State	<input field> (allows two characters)
Steno Machine SN	<input field>

Saving and Loading Student Groups

Once a group of students has been found using the Search or Advanced tab, you can save the group and, at a future time, you can select the group and "reload" it. You can also update a group by adding, deleting, or replacing students.

To save a group of students:

1. Click**Find > Student**. Use the **Search** tab or the **Advanced** tab to find the student records to be grouped.
2. When the desired list of students is displayed, click the **Groups** tab.
3. Click **Save**. The Save New Group dialog box is displayed.
4. In the **Group Name** box, type a name for the new group.

   Optional: Select **Make Group Public**, **Make Group For Portal Content**, and choose a date for the group to expire.
5. Click **OK**. A confirmation message is displayed.
6. Click **OK** to acknowledge the message. The group name is added to the list of available groups.

After the group is saved, you can select the Student Groups option on the **View** menu to specify characteristics of the group, for example, public or private, dynamic, static, frozen, or manual.

Loading a Group

Once a group has been created, you can load it in the Groups tab.

To load a group of students:

1. Select **Find > Student** to open the search tool.
2. Click the **Groups** tab.
3. Select the Group you want to load from the **Groups**list.
4. Double-click the list or click **Load**. The list of students in the group displays in the lower portion of the dialog box.

Updating Student Groups

Once a group of students has been created, you can update the group by adding, replacing, or deleting students.

Adding Students or Replacing All Students in a Group

To add students to a group or to replace all students in a group:

1. Navigate to **Find > Student**. Use the **Search** tab or the **Advanced** tab to find one or more students to be included in the update.
2. Click the **Groups** tab.
3. Select the Group you want to update from the **Groups** list.
4. Click **Update** to display the **Add Students to Group** dialog box. The group you selected in the previous step is displayed by default, but you may select any other group by using the drop-down list.

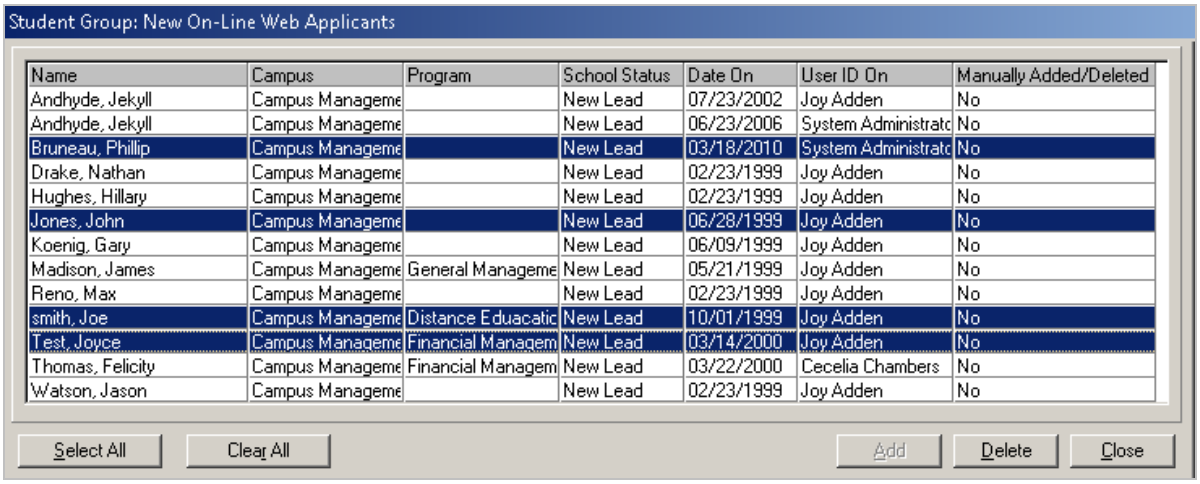
   Note: Only active, non-expired groups are automatically populated.
5. If applicable, select the **Replace All Students in Group** check box to replace all students in the group with the students listed in the search results. If this option is selected, all students previously associated with the group are deleted from the group. If this option is not selected, the students from the search results are added to the students in the group.
6. Click **Save** to update the student group.
7. If the selected group was a non-manual group, you are prompted to confirm the change.
   - Click **Yes** to change the group type to Manual for the selected group.
   - Click **No** if you do not want to change the group type to Manual for the selected group.
   - Click **Cancel** to terminate processing without making any changes.

Deleting Students from a Group

To delete students from a group:

1. Select **Find** > **Student**.
2. Click the **Groups** tab.
3. In the **Groups** list, select the Group from which you want to delete students.
4. Click **Delete** to display the **Delete Students from Group** form. The group you selected in the previous step is displayed by default, but you may select any other group by using the drop-down list.

   Note: Only active, non-expired groups are automatically populated.
5. Click **Save**to remove all students from the group. In this case, the relationship records are deactivated, but not physically deleted.
6. To selectively remove one or more students from the group, click the **View Students** button to display a list of all students in the group.



Using **Select All, Clear All** and **Ctrl-click** for multiple selection as needed, select the students to be removed from this group.

Note: When this form is opened from the student search, the Include Removed Students check box is not visible on the form.

7. Click **Delete** to delete the selected students from the group.
8. If the selected group was a non-manual group, you are prompted to confirm the change.
    - Click **Yes** to change the group type to Manual for the selected group.
    - Click **No** if you do not want to change the group type to Manual for the selected group.
    - Click **Cancel** to terminate processing without making any changes.

Next Student

From the **Find** menu, you can open forms for the next student in a group of students that you have previously found or loaded as a group.

To use the Find Next Student feature:

1. Find or load a group of students.
2. Open a form such as Admissions Summary, Addresses, and so on, in which you want to see student data. If you are not currently working in a form, the Student Master form is displayed.
3. Double-click a student on the list to access the data for the student. The Student Master form opens if no other form is already open. If another form is active in the work area, data for the selected student is displayed on the form.
4. When you are ready to see data for the next student, press the **F3** key or select **Next Student** on the **Find** menu.

Note: As you repeat the Find Next Student procedure, the previously accessed forms remain open in your work area. Close each form before accessing the next student.

View Menu

The View menu enables you to view and edit student information in CampusNexus Student and to select view settings for the toolbars.

The submenus are organized by departments. The department options are also available on the Student Bar. If a user does not have access to items in the View menu, the Student Bar is cleared.

- Contact Manager
- Admissions
- Financial Aid
- Student Accounts
- Academic Records
- Career Services
- Loan Management
- Student Services
- Housing

Select Student Groups to create and work with different types of groups.

View and edit your Session Defaults including the campus, term, and FA year with which you are working.

Select show or hide options for the following toolbars:

- Student Bar
- Toolbar
- Status Bar
- User Toolbar

You can also Customize the User Toolbar.

View > Contact Manager

From the Contact Manager View menu, you can work with student-related records that are usually common to several departments. The options on this menu apply to the student selected from the Recent Students list.

Menu Item	Description
Student	Displays the Student Master form.
Activities	Displays a list of activities related to the student. Activities can be added, edited, and closed.
Student Groups	Displays a list of all groups of which the student is a member. The student can be added to a group or removed from a group.
Documents	Displays a list of documents related to the student. Documents can be added, edited, or deleted.
Addresses	Displays alternative addresses associated with the student. Addresses can be added, edited, or deleted.
Agency Affiliations	Displays agencies to which the student is related.
Student Picture	Displays the student's picture or facilitates the loading of one.
Transcript Request	Displays transcript requests related to the student and allows the recording of a request.
International	This menu option is only available if the campus supports international students and the selected student is designated on the Student Master form as an international student. Use this option to monitor international student data.
Contact Method	Displays the Contact Method form for selecting the preferred contact method.
Advisors	Displays all advisors for the student and defaults to the student’s most current enrollment.
FERPA	Displays FERPA student Information form.

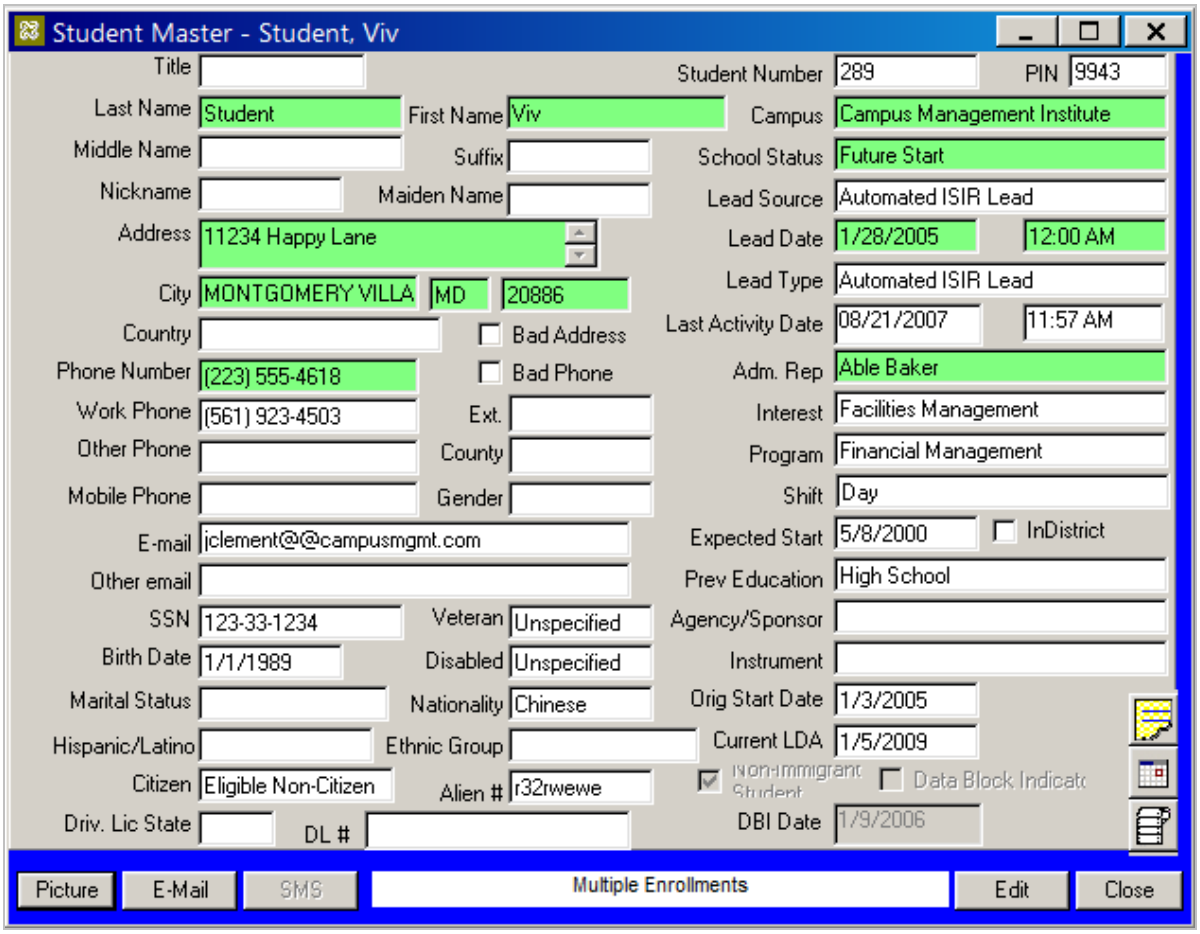
The options on the Student Bar are the same as the options on the View menu, unless the Student Bar has been altered by the user.

Student Master

The Student Master form contains much of a student's basic demographic information. The Student Master form is usually (but not necessarily) populated in the Admissions module by adding a new lead to the database. New leads are entered using the Quick Lead Entry form or the Add New Lead **Ctrl+L** option on the File menu. The **Ctrl+N** key combination can also be used to start a new Student Master record (form) without entering a quick lead.

To view a Student Master form:

1. Select one of the following options:
    - Click **Student** on the Student Bar.
    - Double-click **Recent Students** on the Toolbar. When you change the student in the Recent Students list, a new Student Master form is displayed. If you already have a Student Master form open, it remains open in the background.
    - From the **View** menu navigate as follows:
        - Contact Manager > Student
        - Admissions > Student
        - Financial Aid > Student
        - Student Accounts > Student
        - Academic Records > Student
        - Career Services > Student
        - Loan Management > Student
        - Student Services > Student
        - Housing > Student
    - Use the **Find** menu or click on the Toolbar to search for a student.



Note: The border color around the Student Master form indicates the student's status category. In the setup options under Setup > Status Codes > Colors Tab, your system administrator can choose colors for the status categories.

2. Multiple Student Master forms can be displayed at the same time. The forms always open in the same place in the work area. Unless you have closed, moved, or minimized a previous Student Master form, the next form you open covers the previous form.

   To move between open Student Master forms use the **Window** menu and select **Tile** or **Cascade** to organize all open forms in the work area.

   When you are working with multiple students, ensure that the correct form is current (active). The name of the current student is always shown in the Recent Students text box. The title bar of the active form is always a different color than other forms which may be open in your work area.

3. To edit the information on the form, click **Edit**. See Edit a Student Master.

   Required fields on the form have a background color other than white. If a required field is blank, you must enter data in it when you edit the form, even if you did not intend to provide the information when you clicked Edit.

   Some fields are required by CampusNexus Student (Last Name, First Name, Lead Date, Admissions Rep). Additionally, your institution may designate other fields as required. The system administrator can mark fields as required in either of two ways.

- Open any Student Master (or Quick Lead) form and go to Setup > Required Fields.
- Designate the field as required in the Data Dictionary.

4. To add an activity from the Student Master form, click the **Add Activity** icon at the bottom right of the form. The Activity form is displayed.
5. Click **Close** (Ctrl+F4) to close the active Student Master form. If you are in edit mode when you click Close, you are prompted to save any changes.

Duplicate Student Records

CampusNexus Student checks for duplicate Student Master records when new leads or students are added. The following table columns are used to check for duplicates:

- Student ID
- Social Security Number
- Phone Number
- Date of Birth and Student Name (combined)
- Driver's License Number
- E-mail address.

Each check is performed only if you entered data in the corresponding field. If at least one match is found, a grid showing the matches is displayed

If the lead is a duplicate and can be found on the grid, click the record and the lead form is populated with the information for that lead. The information can then be edited. The campus for the lead can be changed only if the campus ID for the record from the grid is in the list of campuses to which you have access.

Contact Manager Security Policy

The Contact Manager Security Policy applies to the Edit Activity and Close Activity permissions on the Contact Manager form and Contact History form.

See also Activities Policies Setup and Staff Member Policies.

Contact Manager Form

The Contact Manager form, which displays a user's activities (to do list), uses the Contact Manager (CM) Security Policies. You can display the activities for other users as specified in the CM Policy. You can also list the Activities for ALL users. When the ALL users check box is selected, all activities for all users to which the user has read access are listed. The first column of the list changes to display the user to whom the activity is assigned. The **Edit Activity** and **Close Activity** buttons are enabled or disabled depending on the policy settings.

When an activity is closed and you change the student's status, the Status Change table is updated. A row is added to the Status Change table when the Change Student Status check box is selected, and the selected status is different from the student's current status.

If Contact Manager Policies are enabled, the Contact Manager security policy assigned to you controls the adding of a new activity. You can only assign activities to staff members listed in the drop-down list. Only Activity Types authorized by the policy are listed. If Contact Manager Policies are not enabled, you can only assign the activity to yourself and all "active" Activity Types are listed.

Contact History Form

This Contact History form, which displays all activities for a student, uses the Contact Manager security. If the institution uses Contact Manager Policies, the **Edit** and **Close Activity** buttons are disabled or enabled depending on the policy assigned to the user who is signed in. A logged-in user can always edit or close an activity that is assigned to him or her. A logged-in user is authorized to edit or close an activity that is assigned to a user in the groups designated in the policy. The Activity Type is checked against the security policy and the logged-in user can only edit and close activity types that the policy indicates.

The label at the top of the form varies according to the types of records gathered for the selected student. When the user opens the form, the label for the left field changes to indicate whether the selected student has applicant or enrollment records or both. All existing records are gathered into the drop-down list. The left field is labeled **Applicant**, **Enrollment**, or **Applicant/Enrollment** depending on whether the student has:

- No records - label: **Enrollment**
- One or more enrollment records - label: **Enrollment**
- One or more Applicant records - label: **Applicant**
- Both Applicant and Enrollment records - label: **Applicant/Enrollment**

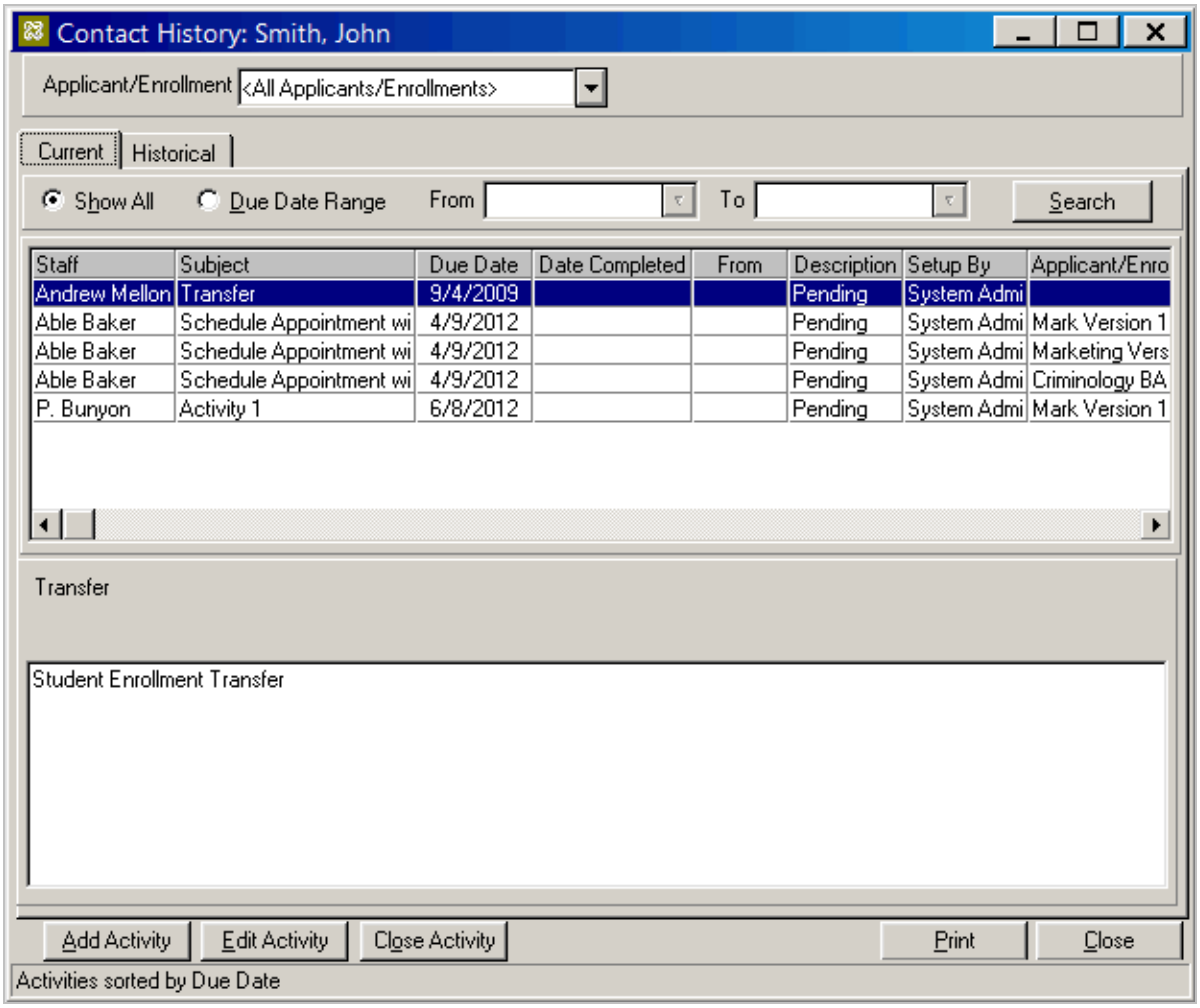
Contact History Form

Activities are created and maintained via the Contact History form, which displays a list of outstanding activities (contacts) related to the selected student. See Contact Manager form for details about working with Contact Manager.

Your institution's policy determines how long an activity remains visible in the Current tab of the Contact history form. Activities no longer considered current are viewable in the Historical tab. See also Admissions Settings.

To view, add, edit, or close activities for a student:

1. Select a student.
2. Navigate to **View** > **Contact Manager** > **Activities**. The Contact History form is displayed. By default, all applicants/enrollments and all activities regardless of their due dates are displayed.

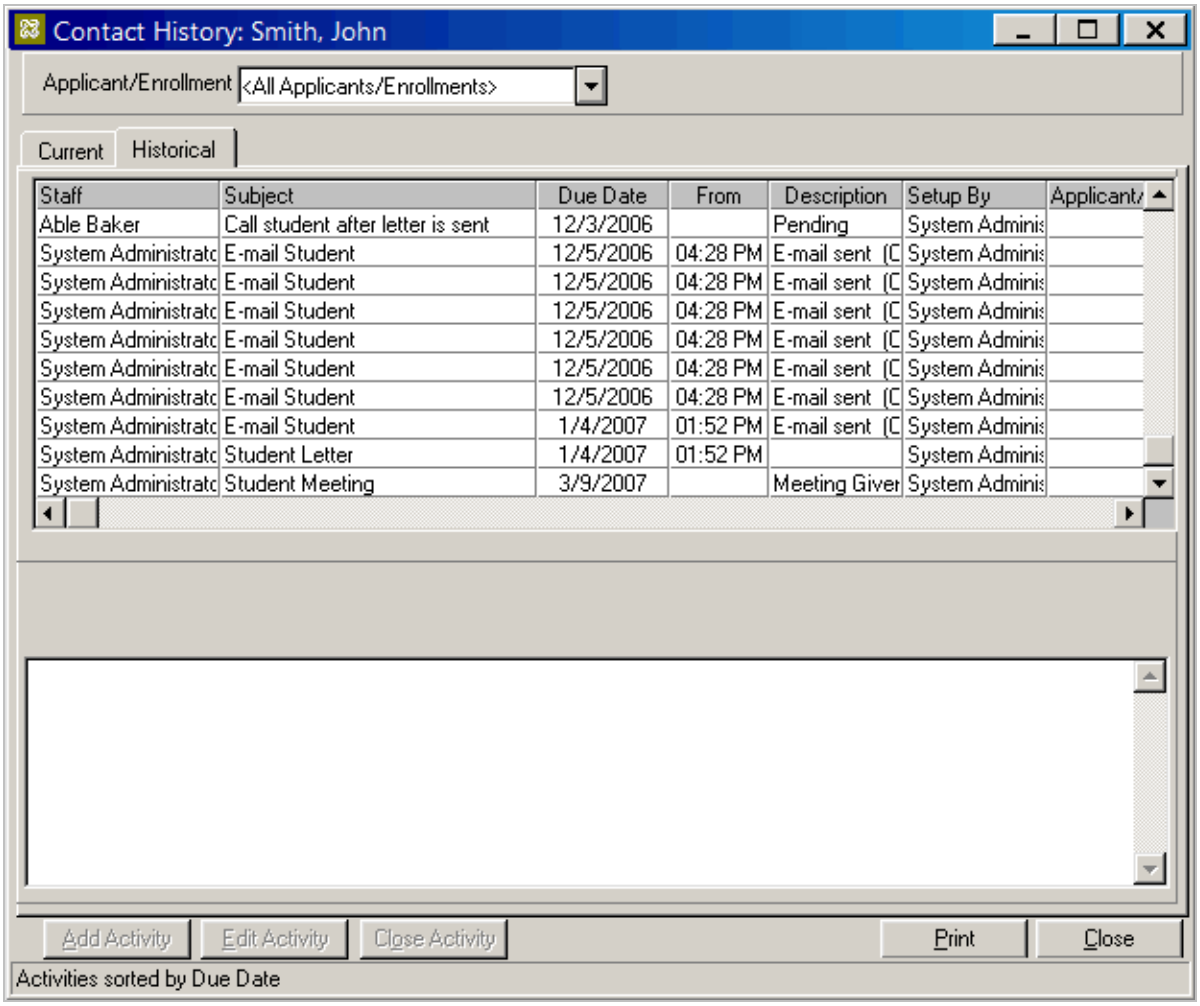


3. To filter activities by applicant or enrollment, select an option from the **Applicant/Enrollment** list.
4. To filter activities by due date, select **Due Date Range**, specify dates in the **From** and **To** fields, and click **Search**. The 'From' date must be an earlier date than the 'To' date.

   To clear the due date range filter, select **Show All** and click **Search**.

5. Sort the activities in ascending or descending order by clicking on the column headers. The selected sort option is displayed at the bottom of the form.
6. Select an activity in the grid to view associated comments.

   Note: If an activity is employer-related, CampusNexus Student adds the employer name and address information in the Comments field.
7. To add an activity, click **Add Activity** or type **Alt+A**. See Activity Form.
8. To edit an activity, select an activity and click **Edit Activity**. See Activity Form.
9. To close an activity, select an activity and click **Close Activity**. See Closing an Activity.
10. To view activities that are no longer current, click the **Historical** tab. This form can also be accessed through the **Historical Activities** button on the Admissions Summary form.



11. Click **Print** to print the Student Activities report that contains the activities listed on the Contact History form. The Student Activities report is sorted by due date. If the 'Show All' option is active (See Staff Contact Manager Tab for setup instructions), the report displays 'All' due dates for all activities. If a specific due date range is selected, the report displays only those due dates that were indicated using the 'Due Date Range'.

The Student Activities report is also accessible via the Reports > Contact Manager menu. This report can be used to list activities for selected groups of students.

12. Click **Close** to close the form.

Activity Form

The Activity form is used to add or edit activities related to a student. To close an activity, see Closing an Activity.

When an activity record is being edited by a staff member, it is locked and cannot be viewed by other staff members. If you attempt to edit an activity that is being edited by another user, the following message is displayed: *[Staff Member Name] is currently working on this activity. Please try later.*

If you are editing an activity for a long period of time, you may see the message *This activity is set to unlock automatically within [NNN] minutes. Click Continue if you wish to continue.* If you do not acknowledge the message, CampusNexus Student will eventually end your editing session, and you may lose any changes you have made to the activity.

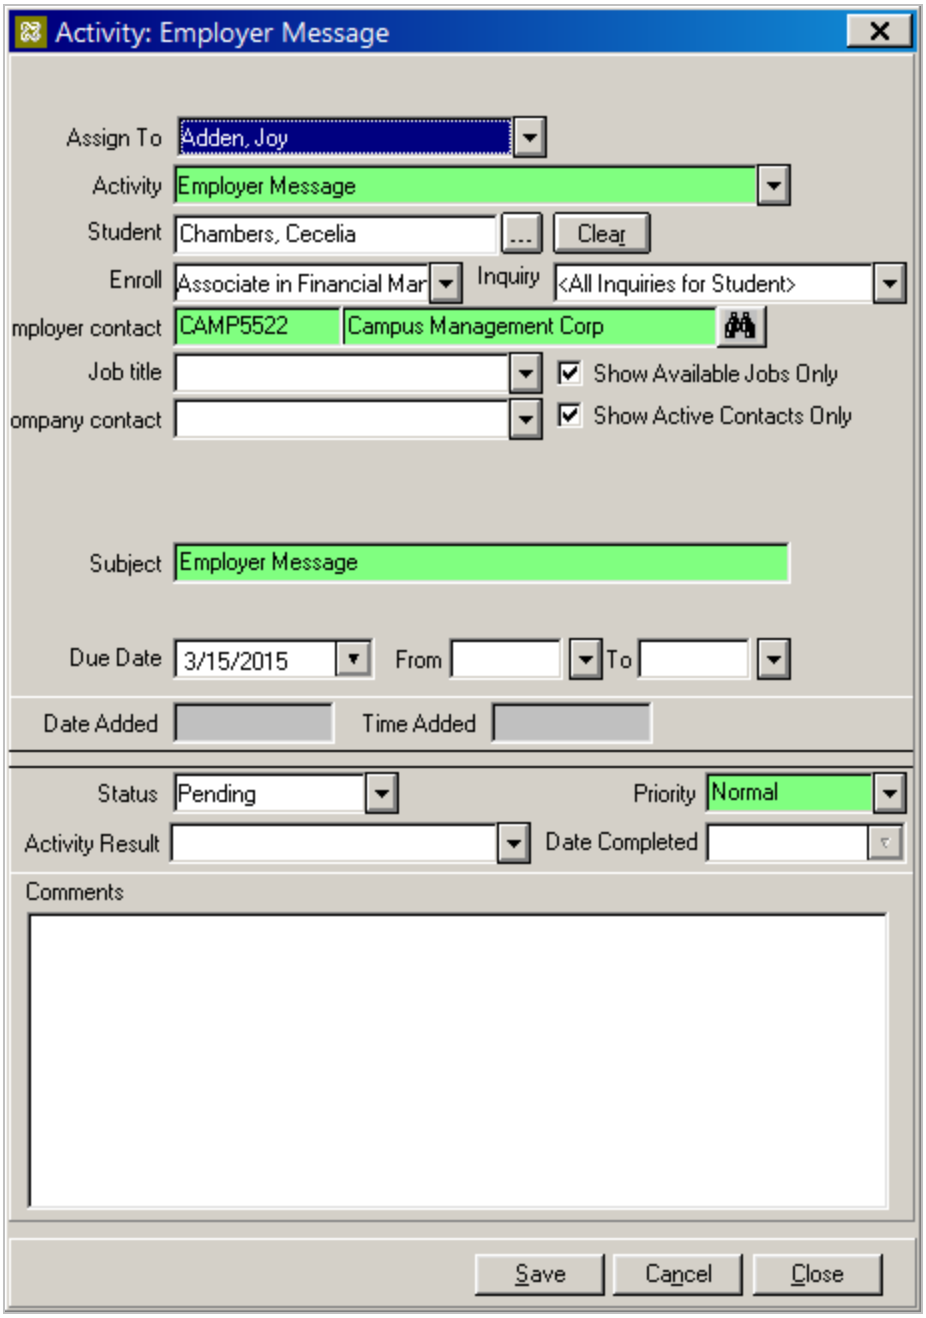
If you select an activity such as a letter with attachments that is a duplicate of an activity already on file with a status of pending, CampusNexus Student does not allow the duplicate activity to be added. (Some institutions refer to this as a duplicate fulfillment request.)

Please read the Contact Manager Security Policy before continuing.

To add or edit an activity:

1. Navigate to the Activity form using one of the following options:

   - **Student Master** > **Add Activity** (icon at the bottom right of the Student Master form). The Activity form is displayed.
   - **View** > **Contact Manager** > **Activities**. The Contact History form is displayed. Click **Add Activity** or **Edit Activity** to add or edit an activity for an individual student. The Activity form is displayed.
   - **Daily** > **Contact Manager** > **Contact Manager**. The Contact Manager form is displayed. Click **Add Activity** or **Edit Activity** to add or edit an activity on the Contact Manager List. The Activity form is displayed.



2. From the **Assign To** list, select the staff member to whom the activity is assigned. By default CampusNexus Student selects the person who is logged in. If you are authorized to assign activities to others, their names are listed.

   Permissions for activity assignments are set up by the system administrator under Setup > Staff > Activity Group Access.

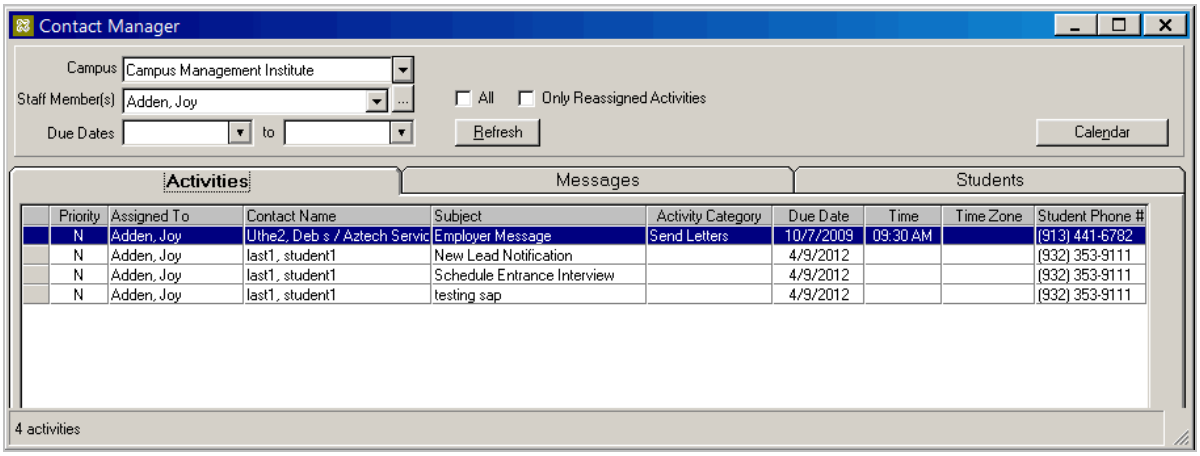
   ### Reassigning Activities

   When activities are reassigned from one staff member to another staff member, the message *Activities have been reassigned to you. Would you like to view them now?* is displayed when the staff member logs in to CampusNexus Student. This message is displayed only once. Likewise, when activities are reassigned to multiple staff members,

the message is displayed once to all members with the reassigned activities when they log on to CampusNexus Student. This is also true for multiple activities being reassigned to the same staff member, only one notification message is sent.

If activities are reassigned while the staff member is logged in, the staff member will see the activities without logging off. The notification message is not displayed the next time the staff member logs on to CampusNexus Student.

When the notification message is presented, the staff member can view the newly assigned activities. If the member decides not to view the reassigned activities and clicks **No**on the message, the Contact Manager form displays a list of all activities.



Note: By default, the **Only Reassigned Activities** check box on the Contact Manager form is cleared. When selected, the check box is displayed only when the staff member selects the Activities tab. Scroll to the right on the Activities tab to view the 'Reassigned Date'.

3. On the Activity form, select an appropriate **Activity**.
4. When the activity is selected, CampusNexus Studententers the Activity description in the **Subject** field. Change the text in the Subject field if necessary.
5. Select the **Student** to whom the activity is related. If necessary, click ... to the right of the student field and use the **Search** tool to find the student.

   Click **Clear** to change the student for this activity or to remove a previously selected student.
6. If the student enrolled in a program, select the student's enrollment from the **Enroll** list. The student's enrollments (Lists > Academic Records > Program Versions button) appear in the Enroll list. The Enroll field is not displayed for a student who has not yet enrolled.
7. If the Activity involves a student's previous inquiry about a program, select an item from the **Inquiry** list.
8. If the Activity was defined as requiring that an employer be contacted, enter an **Employer**. Search for the employer using the icon.
9. If the activity was defined as an employer-related activity, optional or required, select a **Job** and **Contact**. Select **Show Available Jobs only** to show only available jobs in the list. Likewise, select **Show Active Contacts only** to display only active contacts.
10. A **High School** field is displayed under certain conditions (see Note). When the field is visible, enter or edit the

High School.

Note: Activities involving an organization (High School) only display the High School information when accessed by navigating to:

- View > Admissions > Education > Activities (High School)
  - OR -
- Daily > Admissions > High School > Search > Edit > Activities > Add Activity.

The High School and Organization ContactID are not displayed when the activity is accessed any other way.

11. If the High School field is displayed, an **OrganizationContactID** field is also displayed (see Note). The list displays the contacts for the selected high school.
12. *(Optional)* Specify the **Due Date**, **From**, and **To** time. The 'From' and 'To' fields contain 15-minute increments between 7:00 AM and 10:45 PM. If an activity is assigned with the same date and time as a previously saved activity, a warning message is displayed when you click Save.
13. **Date Added** and **Time Added** are read-only fields.
14. *(Optional)* Select the activity **Status**.The options are:
    - Pending (default)
    - Cancelled
    - Closed
    - Follow Up
15. Select the activity **Priority**. The options are:
    - Normal (default)
    - Low
    - High
16. If the activity status you selected in the Activity Status list is considered a closed activity, select an activity result from the **Activity Result** list.
17. Enter any **Comments** about the activity.
18. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. The new activity appears on your main Contact Manager Activities list.

    Note: If an activity is scheduled at the same time as a previously entered activity, a message is displayed warning of the conflict and asking if you want to proceed.

    - When you select **Yes**, the activity is saved and both activities are scheduled at the same time.
    - When you select **No**, the Activity form is re-displayed with the information originally entered. Enter a new time to avoid a scheduling conflict.

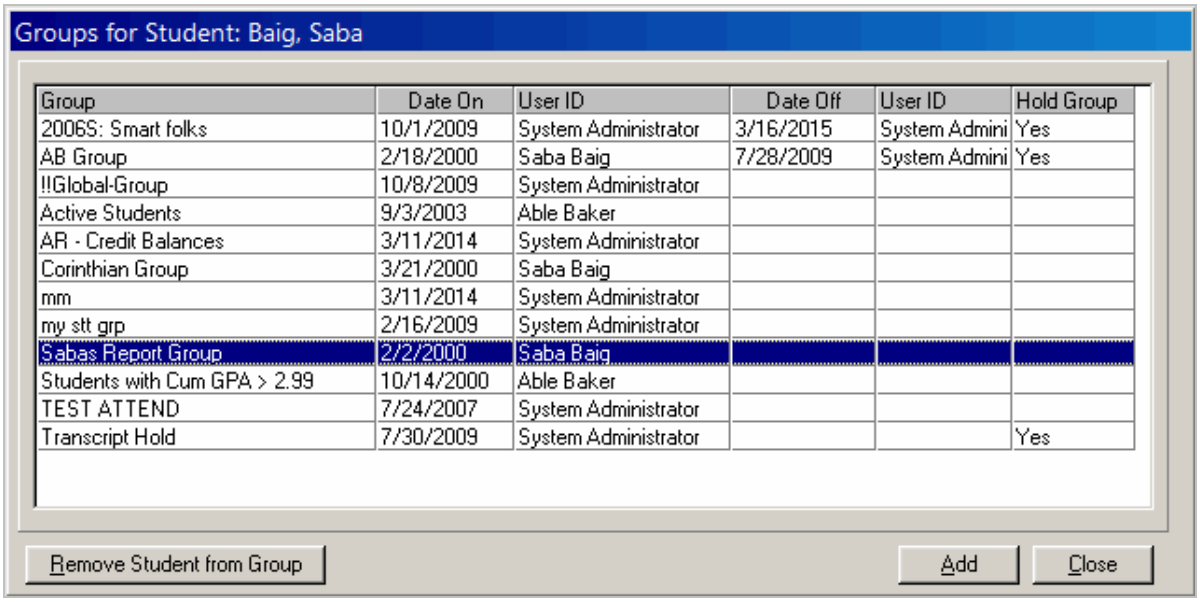
Groups for a Student

Use the Groups for Student form to view or change the group membership of a student. A student can be assigned only to existing groups created by another procedure such Search or Report Selection. Furthermore, the groups must be designated as manually maintained groups that are marked as public if the groups were initially created by someone other than yourself.

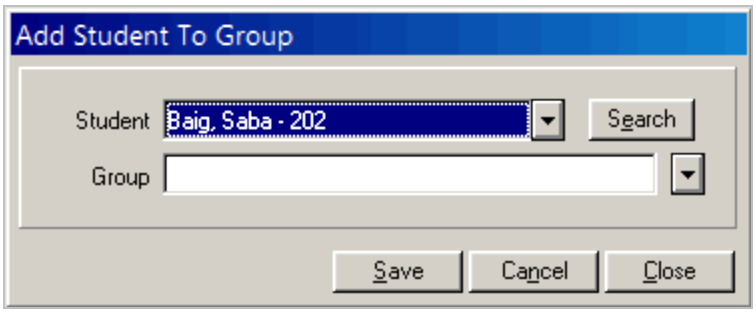
To view or edit the group membership for a student:

1. Select a student.
2. Navigate to **View** > **Contact Manager** > **Student Groups**. The Groups for Student: <student name> form is displayed.

   The Date On column indicates the dates when the student was added to a group. The Date Off column indicates the dates when the student was removed from a group.



3. Click **Add** to add the selected student to a new group. The Add Student To Group form is displayed.



3. To add a different student to a group, select a **Student** from the drop-down list or click **Search** to find the student.
4. Select a **Group**.
5. To remove a student from a group, select the group from which to remove the student.
6. Click **Remove Student from Group**.

Note: This button is available only if the Group Type is M – Manual and you have security rights to delete students from groups.

7. A confirmation message is displayed. Click **Yes**.

   The Date Off field in the student group grid is updated to indicate the date when the student was removed from the group. If applicable, the red/green "hold" light on the toolbar is turned on or off.

8. Click **Close** to close the form.

Email Activity

Use a Contact Manager email activity to automatically send the same email message to one or more students or employers. This activity presumes that email addresses are on file for the recipients of the message. An email activity must be previously defined (View > Contact Manager > Activities). You can attach documents to your email messages.

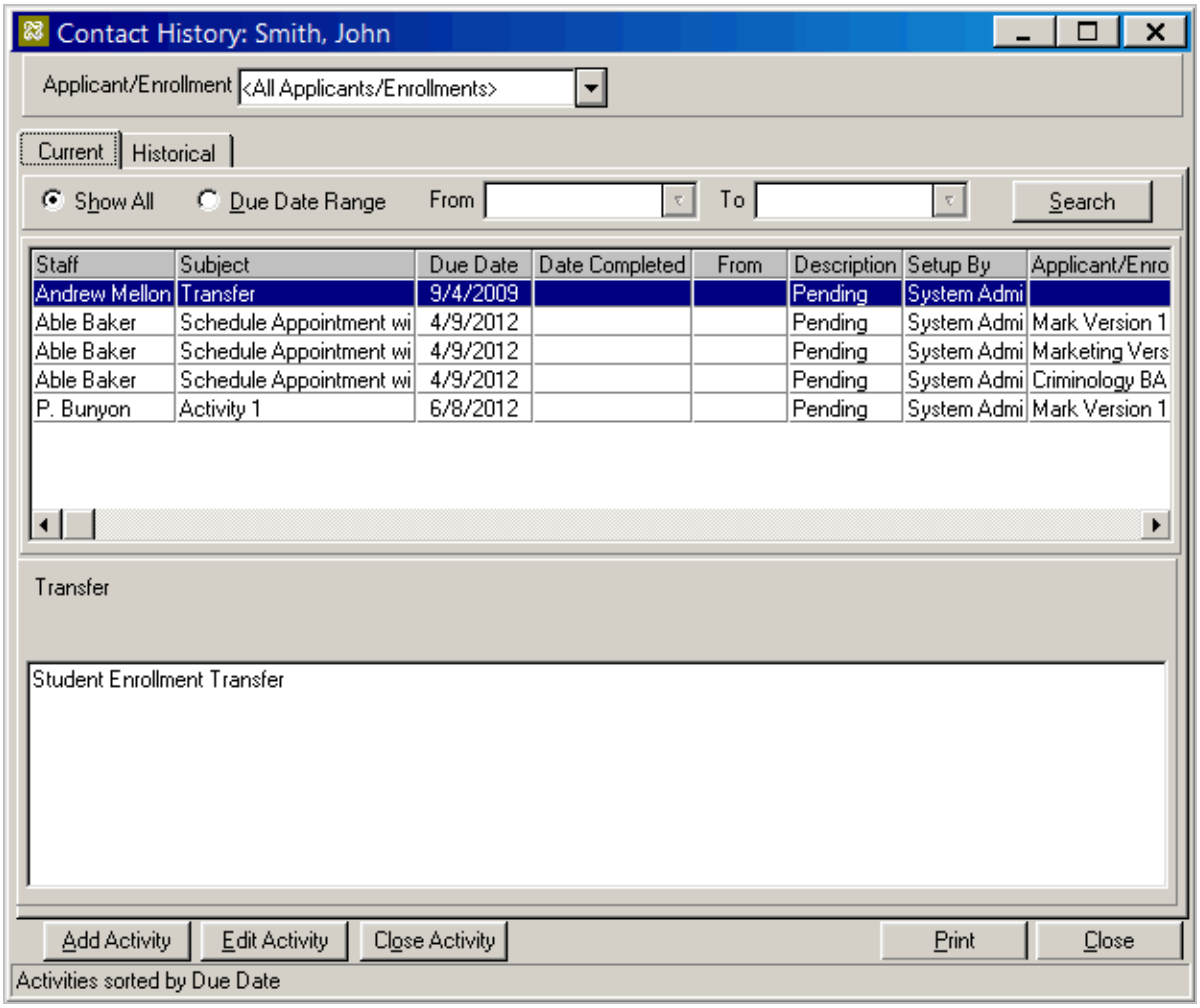
Note: To send an email message to a student from the person who is logged into CampusNexus Student, select the student and, if an email address is present in the Student Master form, click **E-Mail** at the bottom of the form. CampusNexus Student does not maintain a history of messages sent in this manner.

The following functionality applies to email activity types:

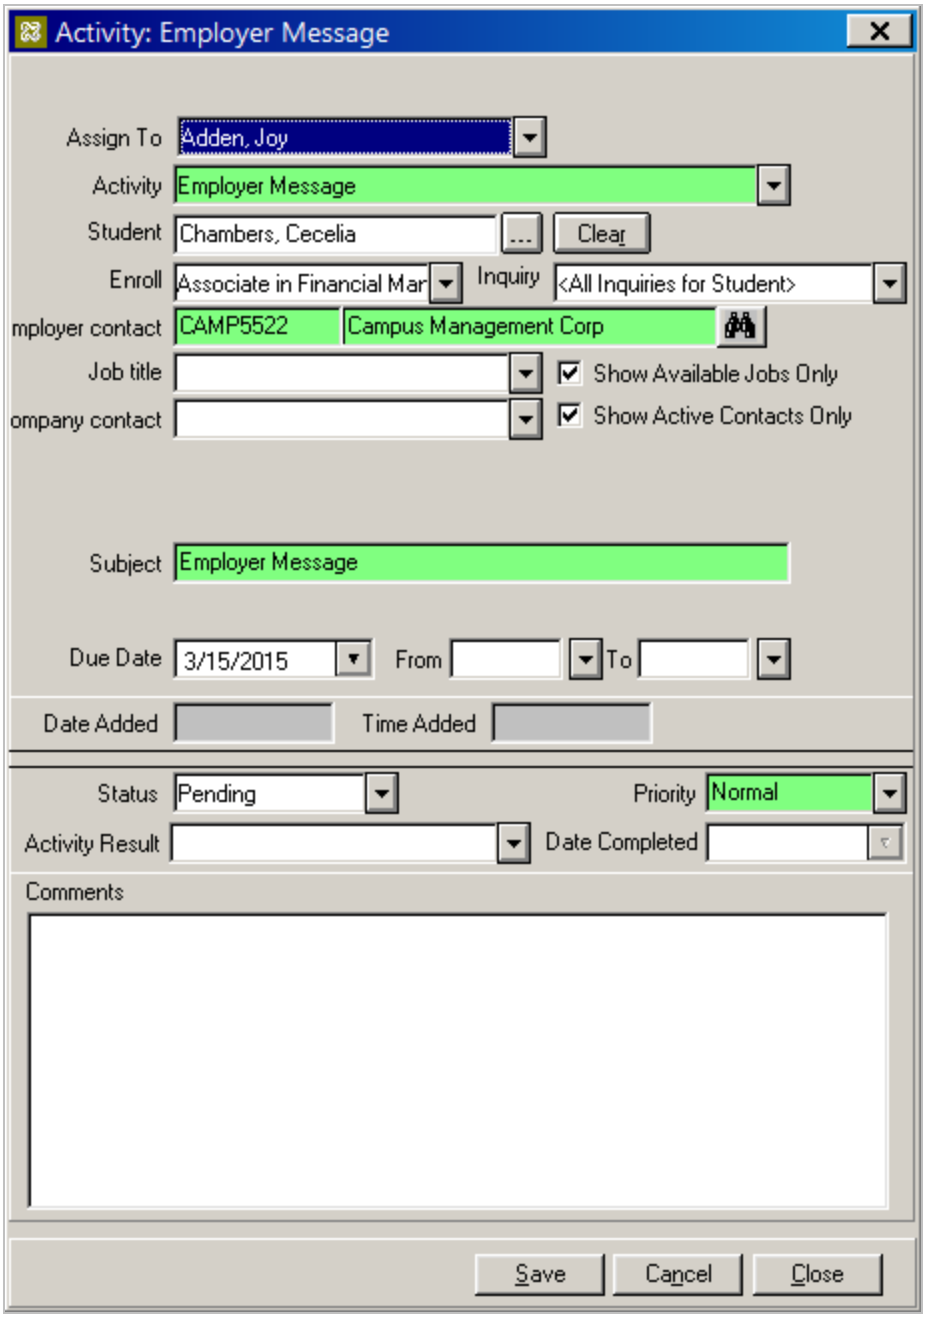
- When an "Email Student" activity is triggered in Contact Manager, CampusNexus Student inserts the campus location default values in the email based on the campus location associated with the student on the table in the activity.
- When an "Email Staff" or "Email Employer" activity is triggered in Contact Manager, CampusNexus Student inserts the system-defined default values in the email.
- When a manual "Email Student" activity is added to a student, the staff member's email address that is associated with the activity is used unless it has not been defined. In this case, CampusNexus Student records the campus location that the staff member is currently logged into as the From: email address.
- When a manual "Email Staff" or "Email Employer" activity is added, the staff member's email address that is associated with the activity is used unless it has not been defined. In this case, CampusNexus Student records the campus location that the staff member is currently logged into as the From: email address.
- When no default values are specified at the campus location level, the system-defined default values are used.

To add an email activity for a student (or employer):

1. Select the student or employer for whom the email is intended.
2. Navigate to **View > Contact Manager > Activities**. The Contact History form is displayed. Any previous activities for the selected student are displayed.



3. Click **Add Activity**. The Activity form is displayed.



4. In **Assign To** select the person who is responsible for this email.
5. Select the email **Activity** to be executed.
6. Check the **Student** field to be sure the correct student is displayed.
7. To send this email to a group, click ... next to the student field. The Search form is displayed.
8. Select the **Groups** tab and select the group that you want to send this email to.
9. Click **Load**. The members of the selected group are display in the bottom pane of the Search form.
10. Select the members in the group to send the email to. Click **Save**. A message is displayed allowing you to name

the group. Name the group and click **OK**. You are returned to the Activity form.

11. Select the correct **Enroll** status.
12. Select the correct Lead Date and Program in the **Inquiry** field.
13. Select **Show Available Jobs Only** and select a **Job**.
14. Select **Show Active Contacts Only** and select a **Contact**.
15. The **Subject** of the email defaults to the name of the activity, but you can change it.
16. Enter the **Due Date** for the email message to be sent.
17. The **From** and **To** times are not necessary for this type of activity, but you can enter them.
18. Select the **Status** for the email activity.
19. Select the **Priority** for the email activity.
20. Enter the text for the email in the bottom pane of the Activity form.
21. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Document Tracking by Student

This form lists documents to be tracked and viewed for the selected student. CampusNexus Student can be set up to automatically put documents on this list as certain events or milestones happen. For instance, you can set up a list of documents for a program version. When a student enrolls in the program version, the list of documents is automatically added to the student's document tracking list. You can add new documents to the student's list as well as edit or remove those that are already on the list. You can display documents that have been scanned.

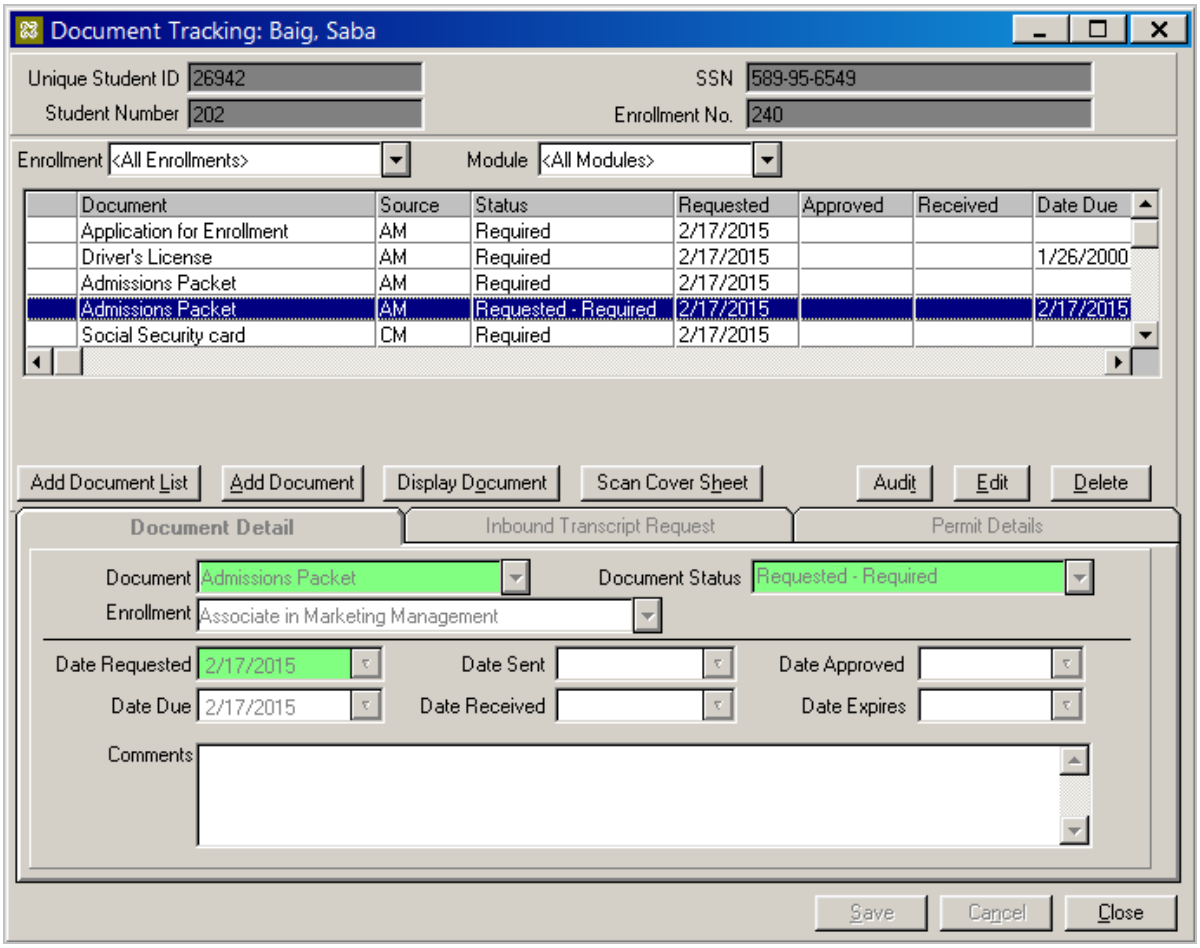
See the following procedures:

- Track Documents
- Add Document List
- Display Document
- Scan Cover Sheet
- Audit Document Changes

Note: This procedure is different from the procedures under Document Tracking on the Daily module menus. This procedure lists all the documents for a single selected student. The procedures on the Daily menu list all the students for a selected document.

To add or edit the tracking data for a document:

1. Select the student for whom documents are to be tracked.
2. Navigate to **View** > **Contact Manager** > **Documents**. The Document Tracking form is displayed. Any documents that have already been added to the student's list appear on the grid. An icon in the left column of the grid indicates that the document is viewable.



3. Select an **Enrollment**. The documents related to the selected enrollment/module combination are displayed on the grid. **All Enrollments** is the default selection.
4. Select a **Module**. The documents related to the selected enrollment/module combination are displayed in the grid.

   If the module selected is Financial Aid or Career Services, an additional drop-down list is displayed to the right of the Module field.

   - If the Financial Aid module is selected, the drop-down box is labeled **Award Year**.
   - If the Career Services module is selected, the drop-down box is labeled **Placement**.

   Note: If the default module was set to Financial Aid in the Session Parameters form, the Document Tracking form displays Financial Aid documents only.
5. If the **Award Year** or **Placement** drop-down box is visible, select an item from the list. The default selection displays all documents for the module. If an item, such as a specific award year or specific placement, is selected, only documents relating to that item may be added or displayed.
6. Click **Add Document List** to add a new list of documents to the tracking list. This action enables the Document Detail tab.

Note: If you are adding a new document, select it from the Document List drop-down list. Documents appear on this list when they are added under Lists > Contact Manager > Documents. Document Status codes appear on this list after they are added under Lists > Contact Manager > Document Status.

7. Enter the **Date Requested**, **Date Due**, **Date Sent**, **Date Received**, **Date Approved**, **Date Expires** data as it becomes available.

   The Date Sent field is automatically updated when a mail merge letter is printed that has the document included as an attachment.

   Date Expires is important for Title IV Credit Balance Waiver Documents. For a student to appear on the Title IV Credit Balance Report as having waived the Title IV refund of credit balances requirement, the Date Expires must be null or later than the date the report is run. The Title IV Credit Balance Waiver Document must be related to a specific enrollment, not to All Enrollments. See Setup > Campus Locations > Financial Aid tab for more information.

   For Registration Prerequisite Documents (Permits), the Date Expires relates to registration dates, not to course start dates. For example, an **Instructor Permission to Register** document might only be good for 7 days (expires on 6/29/10), which means the student would need to register before or on 6/29/10 to successfully register for the course. If the course start date is 8/1/10, the student could still register as long as the student did so before or on June 29th. After the expiration date, the permit document would no longer be considered approved and registration would fail regardless of the course start date.

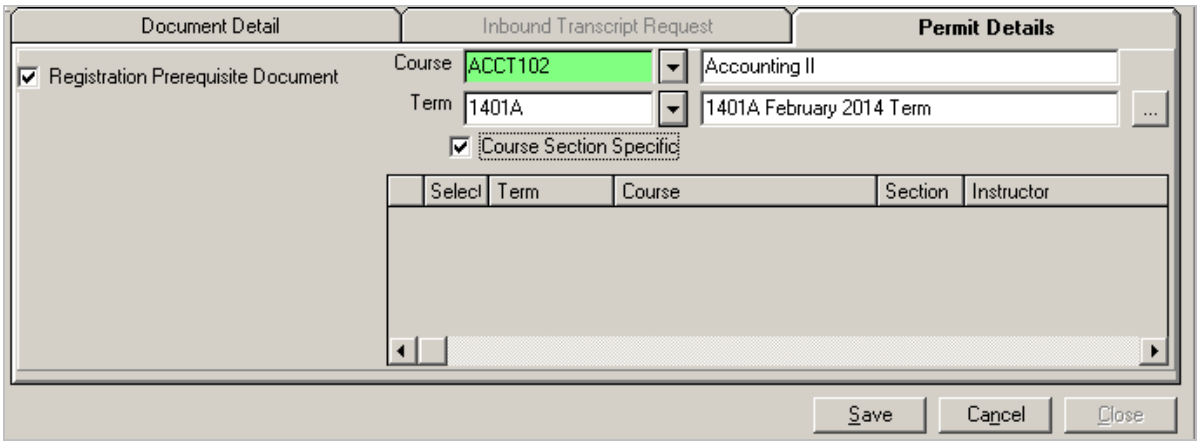
8. Selecting an Academic Records Document which was configured as a Registration Prerequisite Document enables the **Permits Details** tab.

   Permit Documents are not enrollment specific, therefore a permit document is visible under any and all enrollments. Permit Documents are Module Specific and appear as Academic Records documents.

9. To select a course and any other field, you must check the **Permit type**. Once the Permit type is selected, the course drop-down is enabled as a required field. The course drop-down is only be filtered by campus & active settings.

10. Click ... to select one term or multiple terms. The Term Selection form is displayed, showing the Term Code and Term Start Dates. Only active, registration terms that are not closed are available for selection.

11. Select **Course Section Specific** to view a listing all available course sections based on the course selected (and terms, if any term is selected). Course sections shared from other campuses are included in the list.



12. Use the **Comments (Document Detail tab)** to note which faculty/staff approved the permit.

13. Enter the expiration date of the permit. CampusNexus Student enforces it (Document Detail tab).
14. Select a course and a term without any sections specified, so that the permit is applicable to registration for the course in any of the specified terms, regardless of section.
15. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To add or edit the tracking data for a document list:

1. Select the student for whom documents are to be tracked.
2. Navigate to **View** > **Contact Manager** > **Documents**. The Document Tracking form is displayed. Any documents that have already been added to the student's list appear on the grid.
3. Select an **Enrollment**. The documents related to the selected enrollment/module combination are displayed on the grid.
4. Select a **Module**. The documents related to the selected enrollment/module combination are displayed on the grid.
5. Click **Add Document List** to add a new list of documents to the tracking list. This action enables the **Document Detail** tab. Select a **Document List** from the drop-down list.

   Note: Document lists appear on this list when they are added from Lists > Contact Manager > Document Lists.
6. Select a **Document Status.** If a document has a default status (e.g., On File), and you select a different status when uploading the document list (e.g., Required), the document will retain its default status (On File, in this case).

   If a document does not have a default status, the status you select when uploading the document list is assigned to the document (Required, in this example).

   Note: Document Status codes appear on this list after they are added from Lists > Contact Manager > Document Status.
7. Enter the **Date Requested**, **Date Due**, **Date Sent**, **Date Received**, **Date Approved,** and **Date Expires** as needed. The same dates are assigned to all documents on the document list.
8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Display Document

This function works both with and without ImageNow. If your institution has the necessary technology to scan or otherwise import images of student documents, you can load or scan them into the CampusNexus Student database. The document can be in any file format that can be processed by an application on your PC.

Note: The coding used to display a document when the Display Document button is selected:

```
Set objImageNow = GetObject(, "imagenow.CtrlPanel")
Call objImageNow.INViewDocDID(ImageNowDocID0, ImageNowDocID1)
For version 6.0, the coding to display the document image must be changed to:
Set objImageNow = GetObject(, "imagenow6.CtrlPanel")
Call objImageNow.INViewDocDID(ImageNowDocID, -1, 0, 1)
```

The existing code to launch the ImageNow log on form if the Display Document button is selected but the user is not logged into ImageNow is:

```
lngReturn = ShellExecute(0, "", "imagenow32.exe", "", Replace(ImageNowPath, "\imagenow32.exe", ""), 1)
```

For version 6.0, the coding to call the ImageNow log in form if the user is not logged into ImageNow must be changed to:

```
lngReturn = ShellExecute(0, "", "imagenow.exe", "", Replace(ImageNowPath, "\imagenow.exe", ""), 1)
```

To view a stored document:

1. Select a document on the grid and click **Display Document**. If no attachment has been stored for this document, the dialog form displays *No attachment found for this document*. Otherwise the dialog displays the name of the document.
2. If the document is available in a file but has not yet been imported into CampusNexus Student, click **Upload Document** to open a file browser from which you can pick the file for import. Select any type of file that can be viewed by the software on your computer.

   Once the file has been imported, it is no longer necessary (as far as CampusNexus Student is concerned) to retain the original image file. After the image is imported, it is available for direct viewing. To view a file attached as a document, you must have the necessary software on your PC to open the file format in which the document is stored. Example file formats include .doc (Word), .xls (Excel), .vsd (Visio), and .txt (Notepad).
3. If you have a scanner attached to your computer and you have "Twain-compliant" scanning software, click **Scan** to import an image of the document from the scanner application. The Document Display form appears.
4. Click **Scan** Document on the Document Display form to activate your scanning application. The many available scanning applications preclude a detailed description of that process here. For example, however, using HP PrecisionScan Pro, once the document is scanned, you would click the **File** > **Place Image** to send the scanned image back to the Document Display form.

   On the Document Display form, you can:

   - Click **Load** to load a bitmap image file (*filename*.bmp) of the document. The bitmap file format is the only one you can load from this command.
   - Click **Clear** to clear the previously imported document image.
   - Click **Print** to print the document image.
   - Click **Rotate** to rotate the document image 90 degrees.
   - Click **Flip** to rotate the document image 180 degrees.
   - Click **Close** to close the form.
5. In the Document Display dialog box, the other controls are:

   View a document that is on file. When you view a document, it is opened by the application that is designated in Windows to open that type of file. For instance, a file named Resume.doc is opened by Microsoft Word.

   Clear the document from CampusNexus Student storage.

   Return to the previous form.

   
   Scan a document as described earlier in this topic.

   Close this form and return to the Document Tracking Form.

If a button shows in only black and gray tones, the function it represents is not available until something else happens. For example, you cannot view a document until it has been scanned in or loaded or, has been loaded. You cannot load another document unless the previous one is cleared.

To scan a cover sheet

If the document selected is linked with ImageNow, click the **Scan Cover Sheet** button to print a cover sheet to be printed. This sheet contains bar codes for student and enrollment. The scan cover sheet is used to identify a student whose documents are being scanned with a scanner. For detailed information about ImageNow, see your system administrator.

To audit a document:

The Audit function tracks changes to the document and its status history. This enables institutions to study the time it takes for each document to progress from the Requested or Required status to the On File status. Metrics can subsequently be developed with the goal of streamlining the process.

1. Select a document in the grid and click **Audit.** A verification message is displayed.
2. Click **Yes** to see a history of all edits and changes made to all documents in the grid or click **No**to see the history of only the selected document. If a blank form is displayed, it indicates that there are no transactions on file for the document(s). Click **Close** to close the form. You are returned to the Document Tracking form.

Addresses in Contact Manager

Your institution determines which addresses to track and how they should be labeled. CampusNexus Student can accommodate many student addresses. Address Types (labels) are maintained in the Lists > Admissions menu.

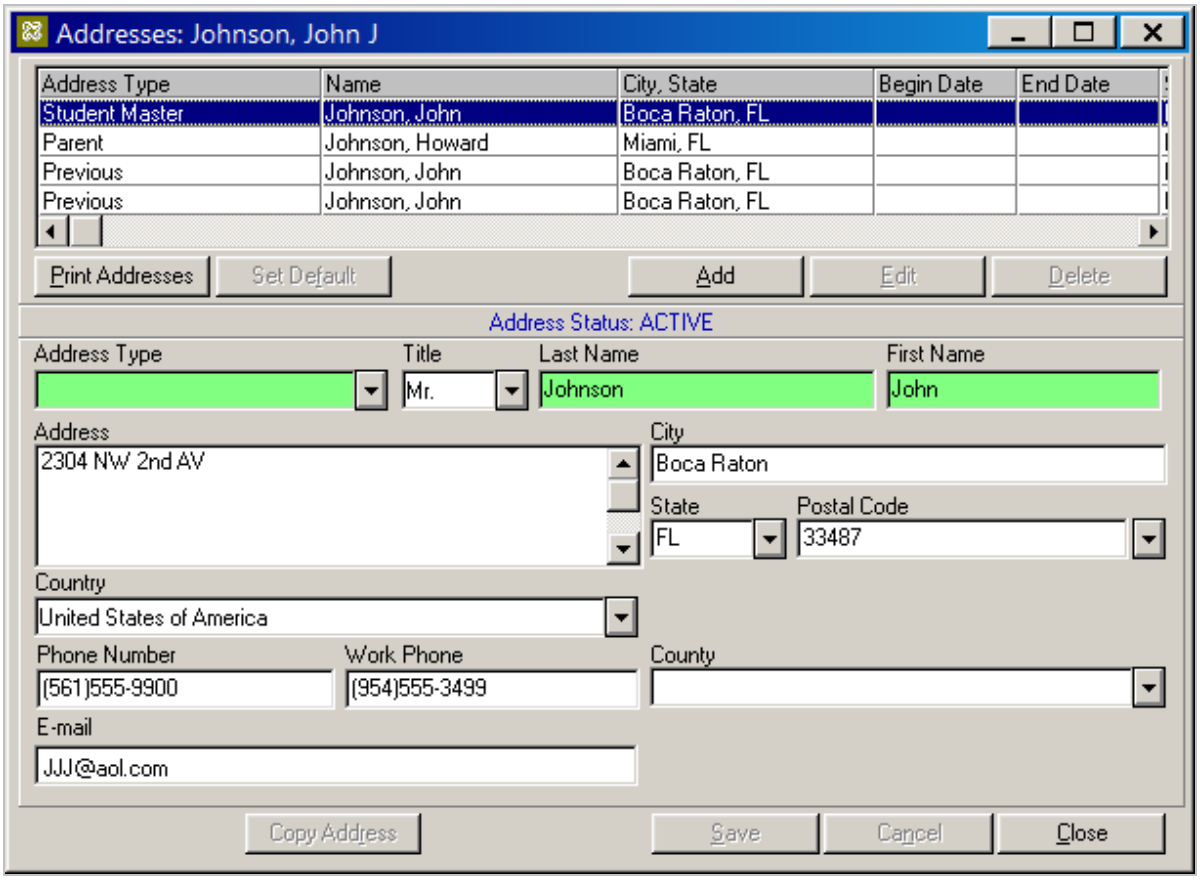
When you change a student's address on the Student Master form, you are prompted to save the previous address. (We recommend that you set up an address type for Previous Address.)

Note: The addresses listed and maintained on this form are in addition to the student's current local address which is on the Student Master form.

For information regarding FERPA Address Types and Academic Information related to FERPA, please refer to FERPA Student Information and Academic Record Information.

To add or edit an additional student address:

1. Navigate to **View** > **Contact Manager** > **Addresses**. The Addresses form is displayed. Any previously added addresses are listed in the grid.

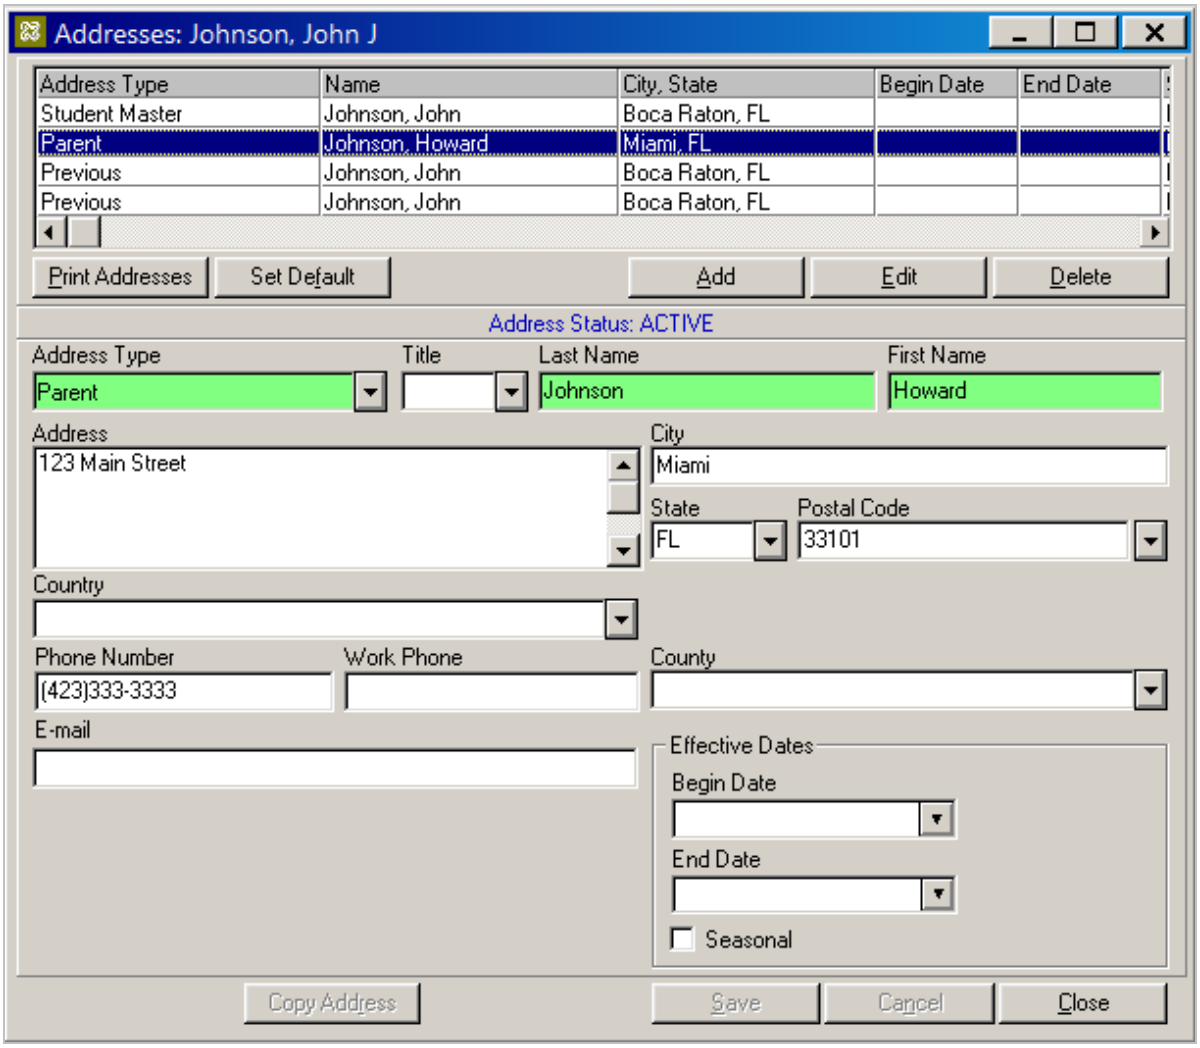


2. Click **Add**, or select a record and click **Edit**. Click **Delete** to remove an address.
2. Click **Copy Address** on this form if you want CampusNexus Student to populate the student's address into the address fields.
3. If you did not click the **Copy Address** button, then:

- Select an address type from the **Address Type** list. See Address Types for configuring address types. If 'Billing Address' address type is selected, it is displayed in the student's ledger card in the Billing Address tab.
- Select a salutation from the **Title** list. These values are usually Dr., Madame, Miss, Mr., Mrs., Ms., Sir, and so on. See Titles to configure Titles.
- Enter the new address into the address fields.
- If you enter the ZIP code first, CampusNexus Student fills in the city and state. If you enter a state code, you can search the ZIP code list to view all the codes and cities in the state.
- Enter a phone number, work phone number, and e-mail address.

4. Click **Save**.
5. Click **Print Addresses** to print a list of the student's addresses.
6. Click **Set Default** to select an address and post it to the Student Master form. CampusNexus Student fills in the address fields. When you have chosen an address as a default address, the button is replaced with a

button. Click this button to remove the address as the default address.
7. If the Use Effective Dates flag is enabled, the Effective Dates section of the form is displayed.



8. Select the **Begin and End Effective Dates** that the student would like the address to be in effect. Enter these dates only if the address type is seasonal or temporary.
9. Select **Seasonal** if the address is seasonal or temporary. A "Y" will be placed in the Seasonal column in the address grid. If you clear the **Seasonal** check box, an "N" will be placed in the Seasonal column.
10. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

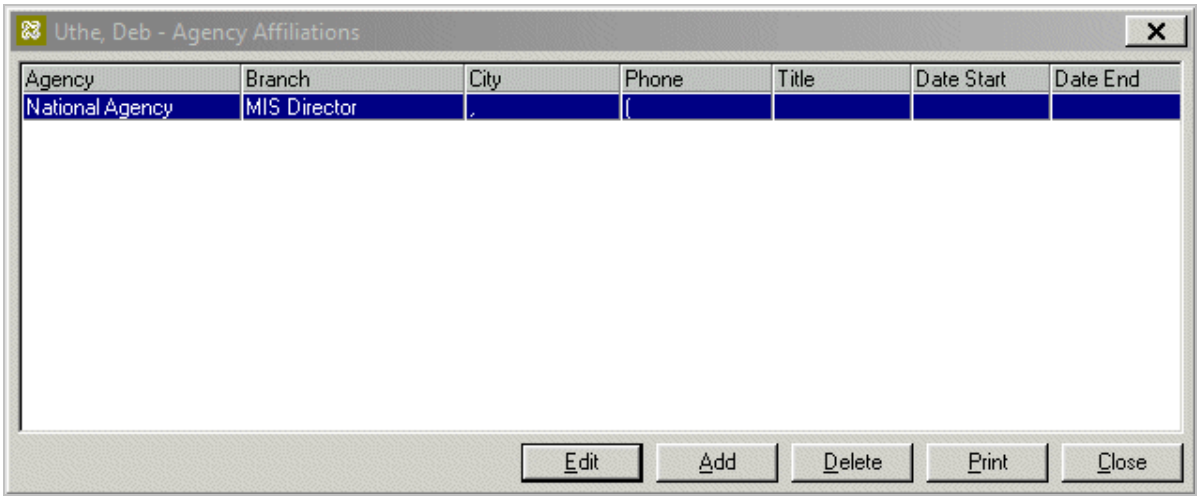
Agency Affiliations

A student can be related to multiple agencies. Agencies to which the student is related are listed on the Agency Affiliations form. Agencies are set up under Daily > Contact Manager > Agency-Third Party.

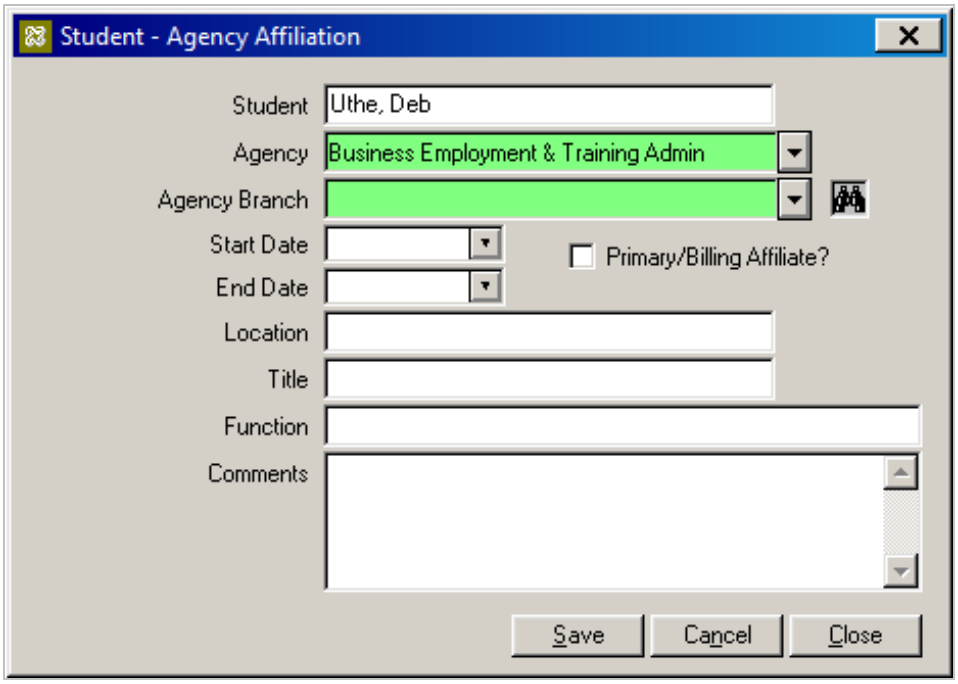
Note: The Agency selection on the student's master form designates one of possibly many agencies. The Agency shown on the student master may have several branches. To complete the connection between the student and the agency, select and add an Agency Branch under Agency Affiliations.

To view, add, or edit agency affiliations:

1. Select a student.
2. Navigate to **View > Contact Manager > Agency Affiliations**. The Agency Affiliations form is displayed.

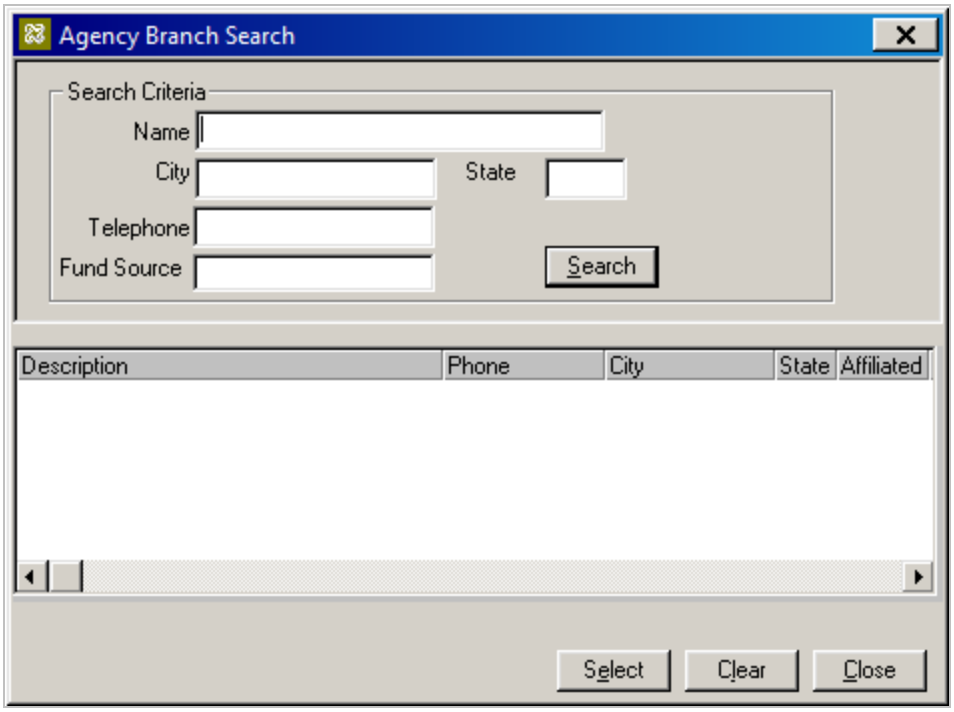


3. Click **Add**, or select a record and click **Edit**. The Student Agency Affiliation form is displayed. The detail form provides details of the student's relationship to the agency.



4. Select the **Agency** with which the student is affiliated.
5. Select the **Agency Branch** with which the student is affiliated.

   If you do not see the Agency Branch, click to view the **Agency Branch Search** form, in which you can search by additional criteria.



6. Enter the **Start Date** - the date that the student was first affiliated with the agency.

7. Enter the **End Date** – the date that the student was or will be last affiliated with the agency.
8. Select **Primary Billing Affiliate** if the student has more than one agency affiliation and this agency is to be the Primary Billing Affiliate. When Primary Billing Affiliate is selected, the billing method associated with this agency will be the default in the Enrollment Wizard.
9. Enter the **Location** – the location of the affiliation.
10. Enter the student's **Title** at the agency.
11. Enter the **Function** – the student's responsibility or role at the agency.
12. Enter any comments in the **Comment** field.
13. Click **Save**.
14. Click **Print** to see a report listing the student's agency affiliations.

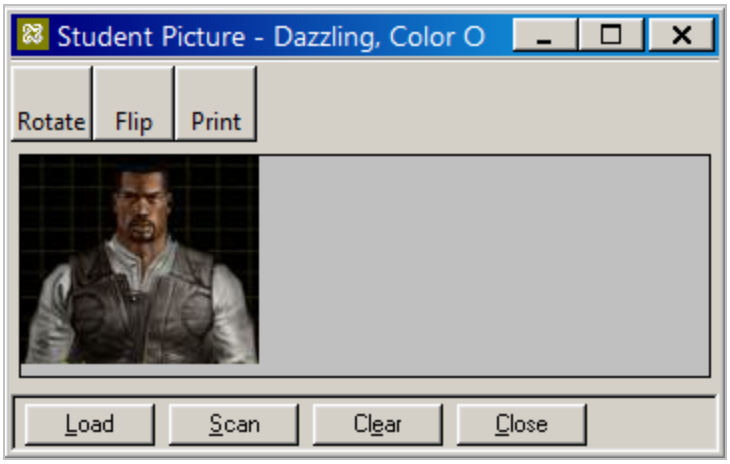
Student Picture

You can import digital images of your students into CampusNexus Student and display them when needed. When they are imported, the pictures are stored as bitmaps in a CampusNexus Student database.

Note: The Student Picture form is also accessible from the Student Master form.

To work with student pictures:

1. Select a student.
2. Navigate to **View > Student Bar > Contact Manager > Student Picture**. The Student Picture form is displayed. If a picture has already been imported for the student, it is displayed on the form.



3. Click **Load** to import a picture from a file. When you click Load, CampusNexus Student opens a directory search form. Use it to find the image you want to import.
4. Click **Scan** to open your scanner software and import an image from a scanner attached to your computer or on your network. When you click Scan, CampusNexus Student looks for Twain compliant applications on your computer. If there is more than one, select one to open. When the image is scanned, choose an option in the scanner application to export it to CampusNexus Student.

   Note: We recommend that you edit, crop, or size the image before you import it. Once it is imported, you cannot change anything except its orientation on the Student Picture form.
5. Click **Clear** to clear an existing picture of the student from the form and from the database.
6. Click **Close** to close the Student Picture form and save any changes you have made.
7. Click **Rotate** to rotate the image by 90 degrees.
8. Click **Flip** to turn the picture upside-down.
9. Click **Print** to print a copy of the student's picture. The picture is enlarged to just fit on an 8.5" x 11" sheet of paper.

Transcript Request

The Transcript Request form lists all transcript request records for the student. You can enter several requests for transcripts and then navigate to Daily > Contact Manager > Process Transcript Requests to print them all at once, along with the matching envelopes and labels.

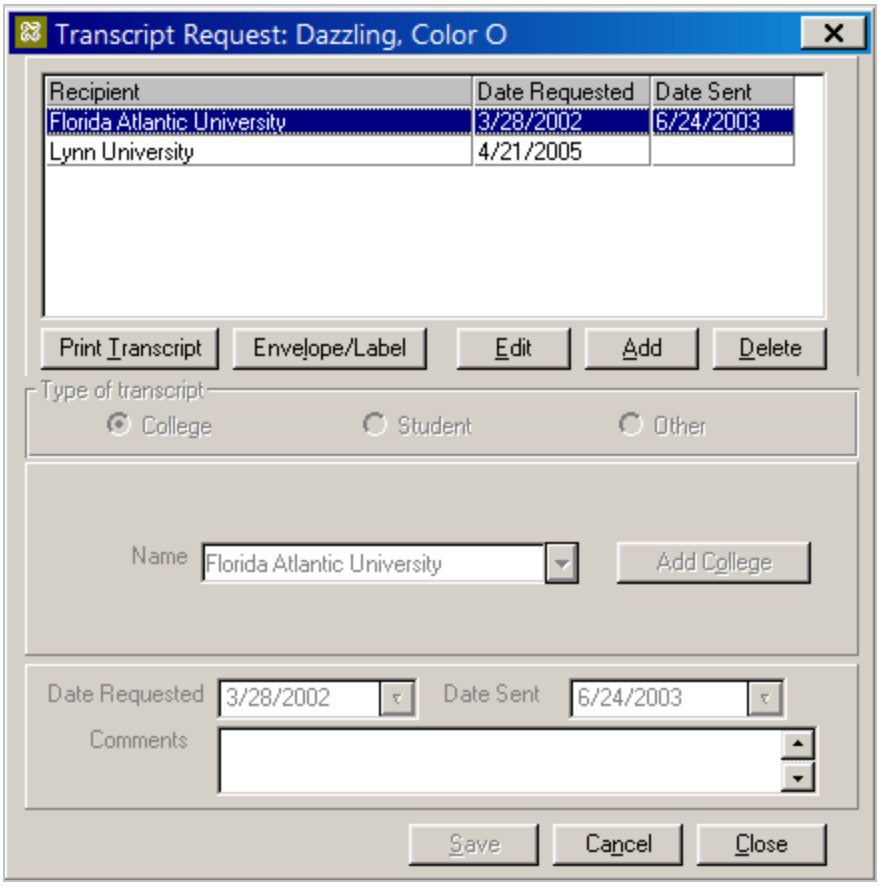
CampusNexus Student stores student transcript requests individually by capturing the college to which it was sent, the date requested, and the date sent. The college names are maintained in the College list (Lists > Admissions > Colleges) to prevent duplicate entry from schools from which courses may be transferred or to which transcripts may be sent.

If you created a custom transcript and entered the file name under Setup > Academic Records, CampusNexus Student uses your report instead of the generic report.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

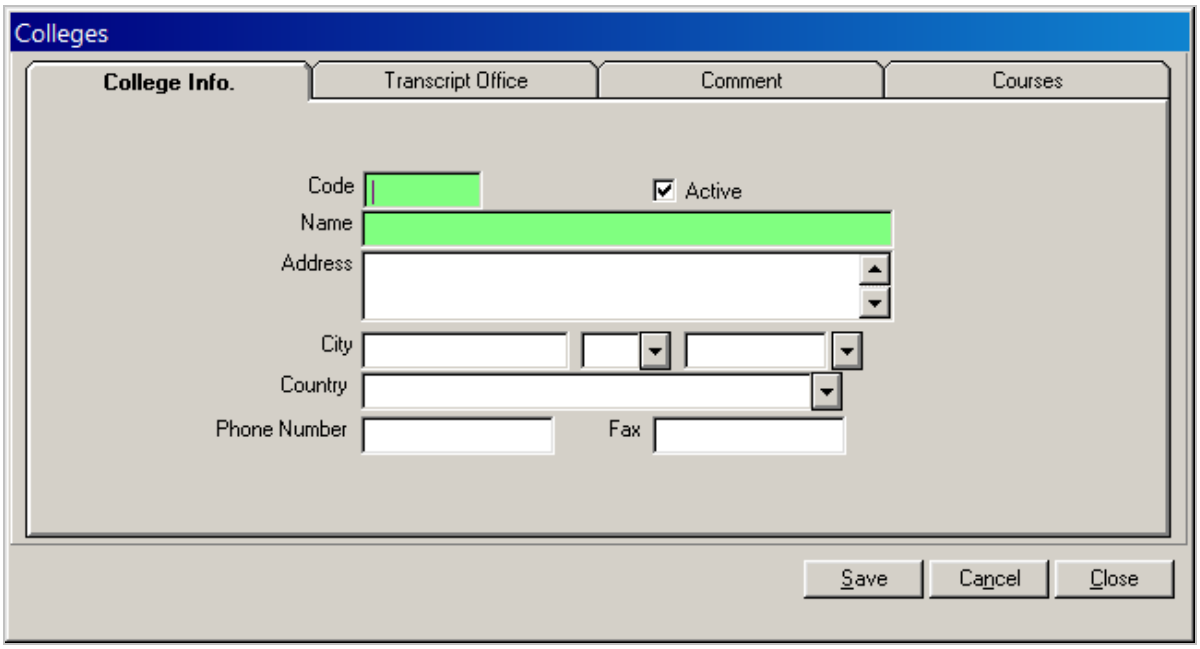
To add or edit a transcript request:

1. Select a student.
2. Navigate to **View > Contact Manager > Transcript Request**. The Transcript Request form for the selected student is displayed.

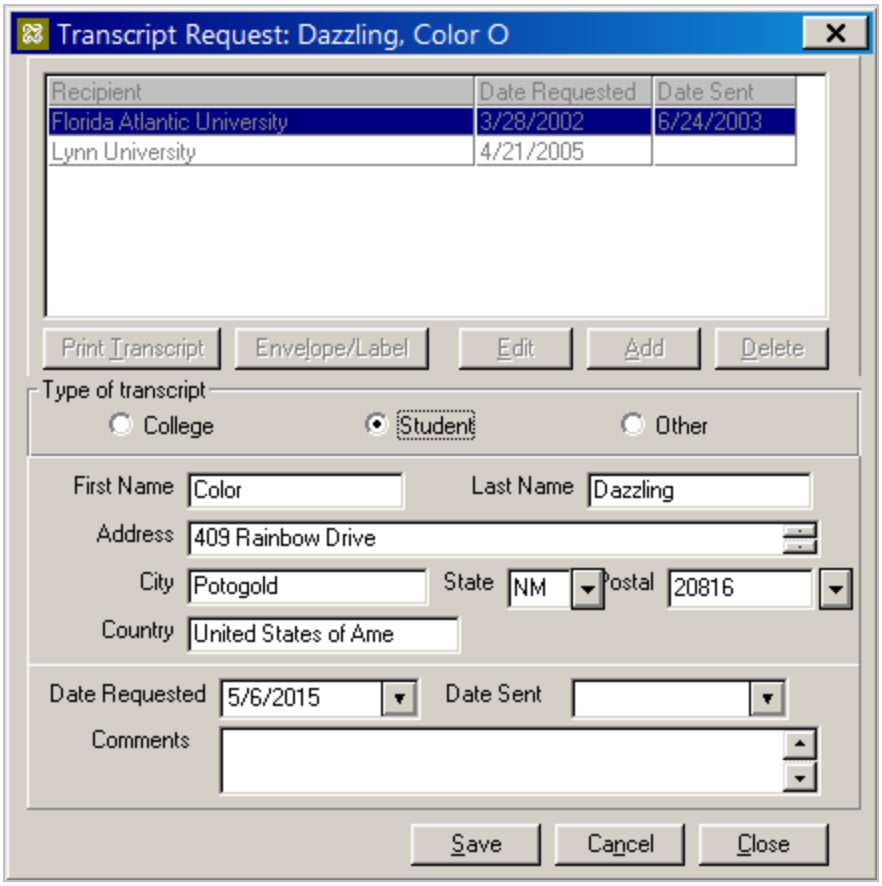


3. Click **Add**, or select a record and click **Edit**. The Add and Edit buttons enable the fields on the bottom of the form.
4. Select a **Transcript Type**. The options are College, Student, or Other.

a. If you choose **College**, select a college from the **Name** list or click **Add College**. When you click Add College, the Colleges form is displayed. (This option is only available if you have security rights to this list setup). Specify the necessary college information in the Colleges form, save and close the form, and select the college in the Name field on the Transcript Request form.



b. If you choose **Student**, the form displays the student's mailing address. You can change the address data as necessary.



c. If you choose **Other**, the form allows you to enter the recipient's name and address.

5. Enter the **Date Requested**. The default date is the system date when the Add button is selected.
6. If you choose to print the transcript at the time you enter the request, enter the **Date Sent** (no default). If you can leave this field blank, CampusNexus Student enters the date sent when you batch-process transcript requests under Daily > Contact Manager > Process Transcript Requests.
7. Enter any comments in the **Comment** field.
8. Click **Save**.
9. Select one of the transcript request records in the grid to print a transcript. Click **Print Transcript**. CampusNexus Student verifies that the student is not currently on "Transcript Hold".
    - If the student is not on hold, CampusNexus Student prints the student's transcript. When the report form closes, the form remains active and the Date Sent is updated with the system date. You can then click the Envelope/Label button.
    - If the student is on hold and you have authorization to override transcript holds, the following message is displayed: *"Override Transcript Hold for this student?"* Click **Yes** to produce the transcript.
    - If the student is on hold and you do not have authorization to override transcript holds, the following message is displayed *"Transcript Printing is on hold for this student."*
10. Click **Envelope/Label**. The Process Transcript Request form is displayed from which you can print an envelope

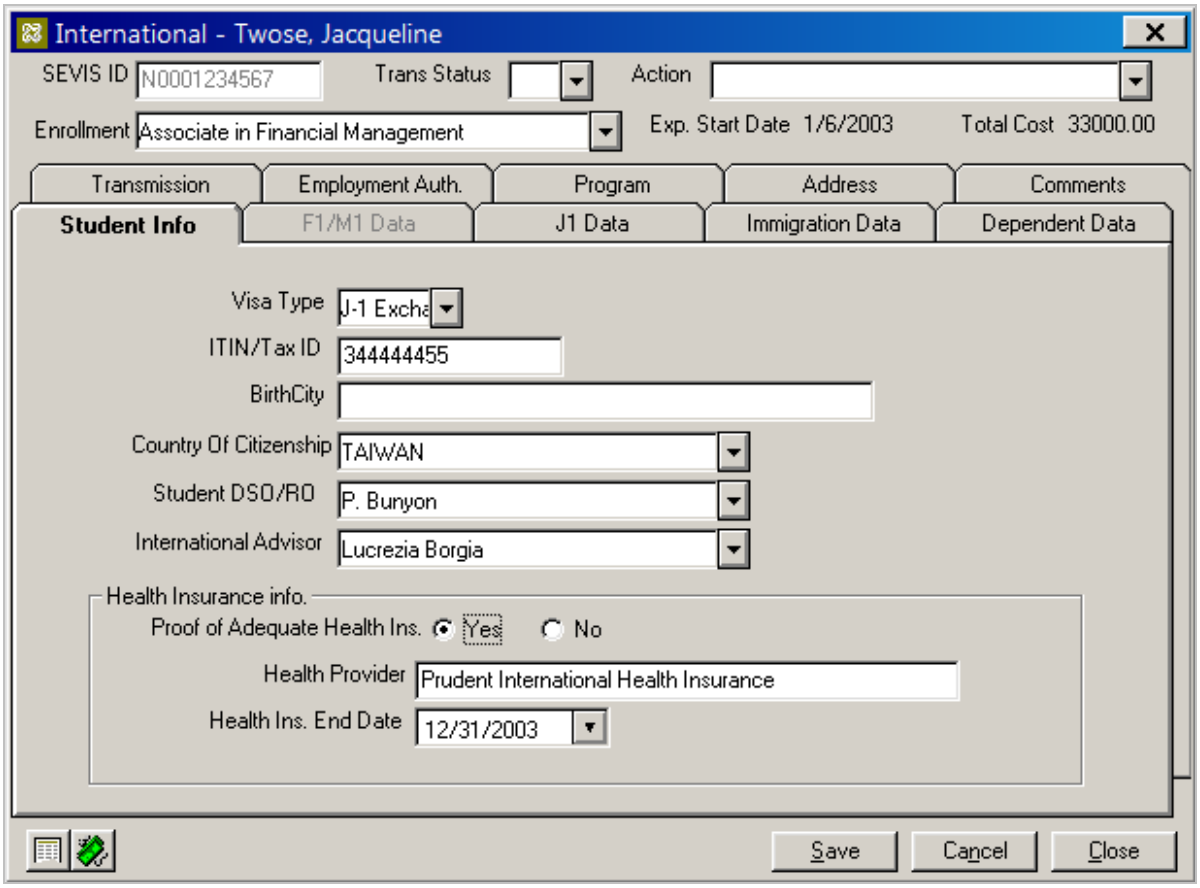
and/or a label. The labels are printed on the default label printer. You can select the envelope printer from a drop-down list of printers available to you.

11. After printing the transcript, envelope, and/or label, click **Save** to update the records in the Transcript Request table. The Save button does not close the form.
12. You can also add the transcript request without printing the transcript or envelope/label. This creates a record in the Transcript Request table with an empty Date Sent. The accumulated requests for transcripts can be processed later using Daily > Contact Manager > Process Transcript Requests.

International

This menu option is only available when the selected student is designated as an international student on the Student Master form. To make it convenient for you to monitor your international student data, this multipurpose form contains most of the information necessary to track and report on international (nonimmigrant) students and exchange visitors.

Click a tab in the image below to go to the Help topic that describes it.



The following fields are common to all tabs of the International form.

Fields Descriptions

Field	Description
SEVIS ID	An eleven-character identifier assigned to the student by INS. Refer to SEVIS Overview for general information about the Student and Exchange Visitor Information System (SEVIS) system.
Trans Status	Select **R** (ready) or **D** (DSO review).
Action	Select an Action if a student has no pending actions and the student has been previously transmitted to SEVIS and the status is accepted.
Enrollment	Select the enrollment for which the student is being reported to SEVIS.

Field	Description
Expected Start Date	CampusNexus Student displays the Expected Start Date from the enrollment record.
Total Cost	CampusNexus Student displays Total Dependent Expenses + Insurance Cost + Cost of Attendance (COA). • Total Dependent Expenses – Entered on the Dependent Data tab. • Insurance Cost – Entered on the Student Info tab. • Cost of Attendance (COA) – Entered on the Program tab.
The following buttons are displayed on the bottom of the International form:	
	Leads to the student's Enrollment form.
	Leads to the Financial Aid Summary.
Access to these forms is controlled according to your access permissions via the normal menu options.	

SEVIS Overview

Student and Exchange Visitor Information System (SEVIS)

CampusNexus Student provides the tools to capture data pertinent to a nonimmigrant (NI) student or exchange visitor. You can record data related to their pre-arrival activities, physical arrival, status while in the U.S., changes in status, and physical departure.

You can communicate these details and events to the U.S. Immigration and Naturalization Service (INS) in XML-formatted batch transmissions via the Internet. CampusNexus Student complies with the Student and Exchange Visitor Information System (SEVIS) requirements.

Note: For additional information on SEVIS and transaction batch processing, refer to the U.S. Immigration and Customs Enforcement website.

When a nonimmigrant prospective student contacts an institution, the student can be processed through the normal lead and enrollment actions by the Admissions staff; however, when prospective students contact an institution using the CampusNexus Student Web Interface, they should be identified as soon as possible as a nonimmigrant, or "international" students. The campus may or may not want to process these students separately from domestic and/or other non-international students. If the campus does not host international students, it is obligated to immediately inform the prospective students.

After the student has been offered admission (enrolled) and before the student travels or reports to the institution, additional information must be collected. This information is processed through SEVIS. SEVIS, via the institution, provides the students with the proper documentation allowing them to apply for the appropriate student visa or to transfer programs from their current nonimmigrant status within the US.

Only Designated School Officials (DSOs) or Responsible Officers (ROs) can transmit and retrieve information from SEVIS, dictating a close working relationship between the DSO/RO, the International Student Advisor (if different), and all divisions and departments within the institution. The International Student Advisor/DSO/RO will need to maintain timely and accurate information about the student and report required data to INS/DOS as specified by the law. The International Student Advisor/DSO/RO may or may not have responsibilities associated with the admissions process.

The DSO/RO will use CampusNexus Student to identify a student or exchange visitor that needs to be documented by batch transmissions in SEVIS. The DSO/RO will report, by batch transmission, updates and changes associated with a student or exchange visitor within 24 hours of entering the data in CampusNexus Student. The DSO/RO will use CampusNexus Student to request and process batch downloads from SEVIS. The DSO/RO will evaluate error reports and generate printed documents for approved records.

International administrative support and International Student Advisors can, with the proper user authorizations, perform data entry on the International form. The ability to mark a record as "Ready To Send" will be limited to a staff person with DSO/RO approval authority.

CampusNexus Student stores and tracks the data necessary to transmit nonimmigrant (visa types F1, M1, and J1) student data through SEVIS. You can manually extract files to report to SEVIS, and import acknowledgement files from SEVIS. You have the option of processing other nonimmigrant types, but only those defined as F1, M1 and J1 are processed through SEVIS. You can manage written documentation and contact information for international students using existing the Contact Manager and Document Tracking features in CampusNexus Student.

The International form under View > Contact Manager provides a centralized location for tracking data, activities, and documents related to international students.

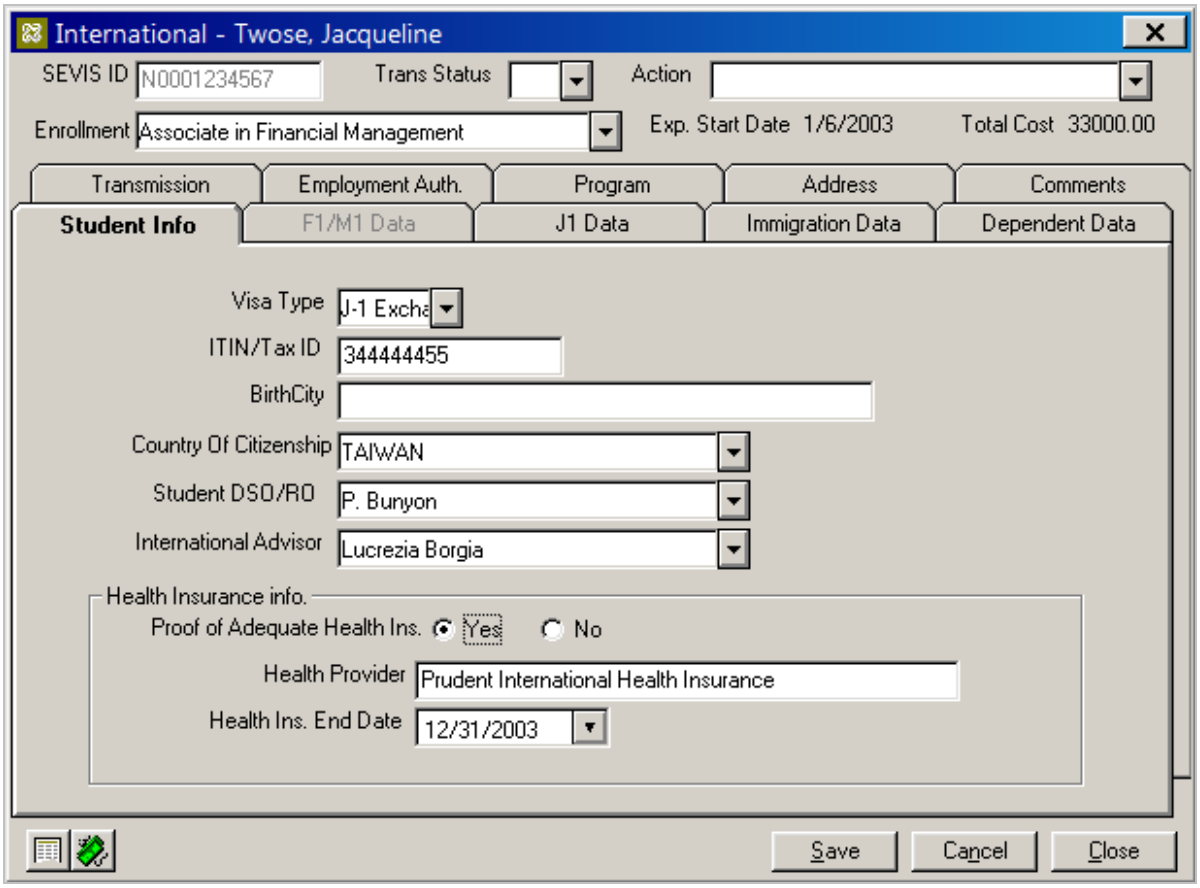
Student Info

The Student Info tab on the International form contains basic information about the nonimmigrant (NI) student or exchange visitor.

To record international student information:

1. Select an international (NI - nonimmigrant) student.
2. Navigate to **View > Contact Manager > International**. The International form is displayed.

   Note: This option does not appear on your menu unless you have selected an NI student.



3. Select the **Student Info** tab. Specify appropriate options.

Field Descriptions

Field	Description
Visa Type	Select a Visa Type. See Lists > Contact Manager > Visas.
ITIN/Tax ID	Enter the 9-character identifier issued to the student by the IRS.
Birth City	Enter the student's city of birth.
Country Of Citizenship	Select the country of which the nonimmigrant student or exchange visitor is a citizen.
Student DSO/RO	Select the Designated School Official (DSO) or Responsible Officer (RO) from staff members defined as DSO/ROs. The DSO/RO is identified on the International tab of the Campus Information form.
International Advisor	Select the student's international advisor from staff members in the International Advisors group.
Proof of Adequate Health Ins.	Did the student submit proof or adequate health insurance to your institution ? Select Yes or No. Required only for a student with a J1 visa.
Health Provider	Name of the student's health insurance provider.
Health Ins. End Date	End date for the student's health insurance coverage.

4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

F1/M1 Data

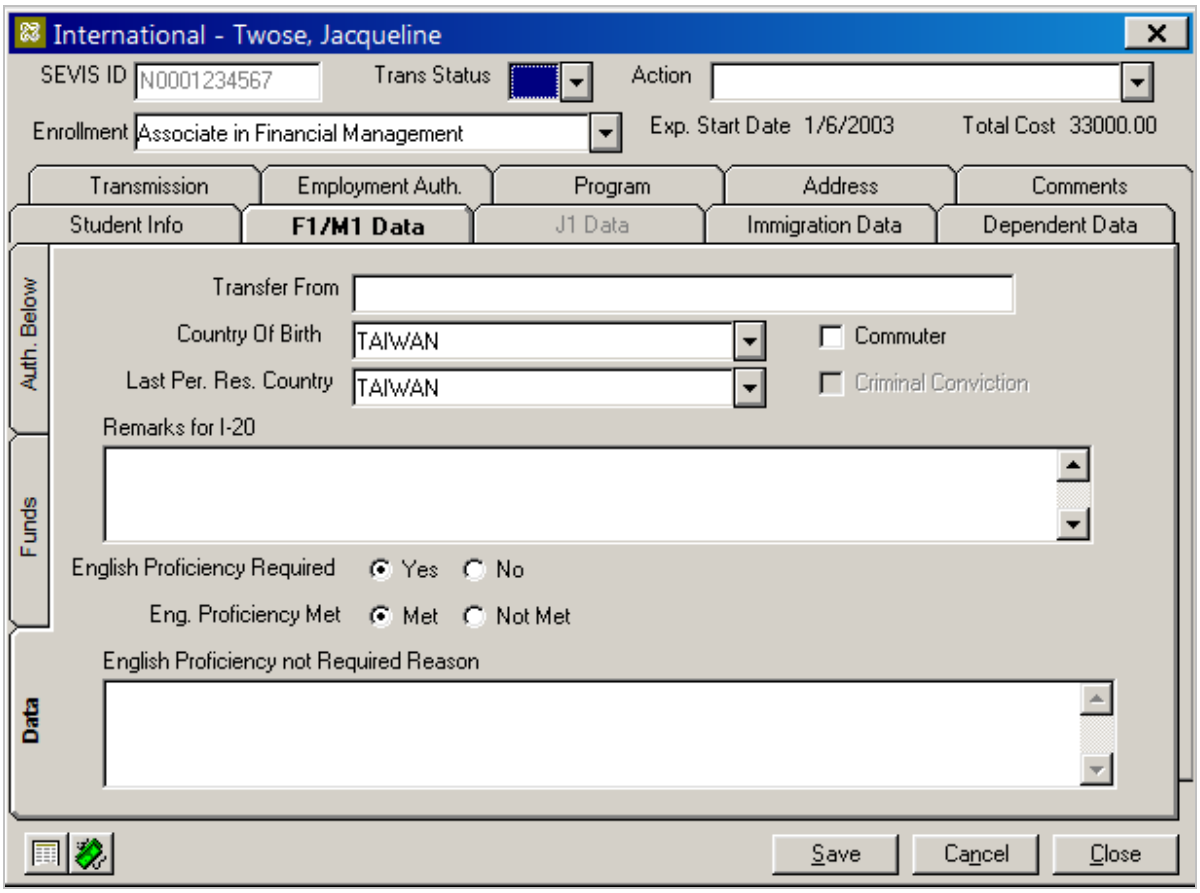
The F1/M1 Data tab on the International form is enabled for the F-1 (Academic), M-1 (Vocational), and Other visa types only. This includes the nonimmigrant students for SEVIS and other international students tracked by your institution .

To record the international student's F1/M1 data:

1. Select an international (NI - nonimmigrant) student.
2. Navigate to **View > Contact Manager > International**. The International form is displayed.

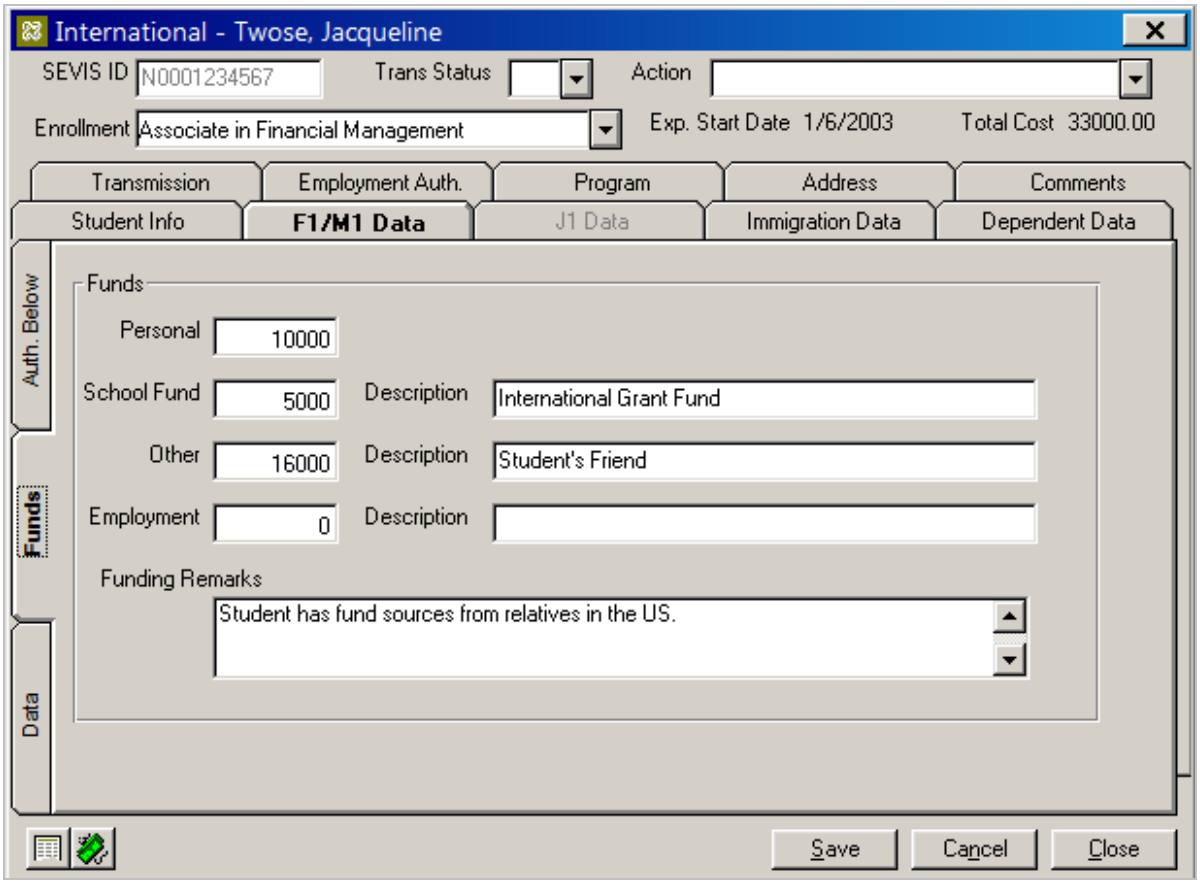
   Note: This option does not appear on your menu unless you have selected an NI student.
3. Select the **F1/M1 Data** tab. The F1/M1 Data tab has three subtabs on the left side: Data, Funds, and Auth. Below.
4. Select the **Data** subtab and enter appropriate data in the following fields:

   - Transfer From
   - Country of Birth
   - Commuter
   - Last Permanent Resident Country
   - Criminal Conviction
   - Remarks for I-20
   - English Proficiency Required
   - English Proficiency Met
   - English Proficiency Not Required Reason



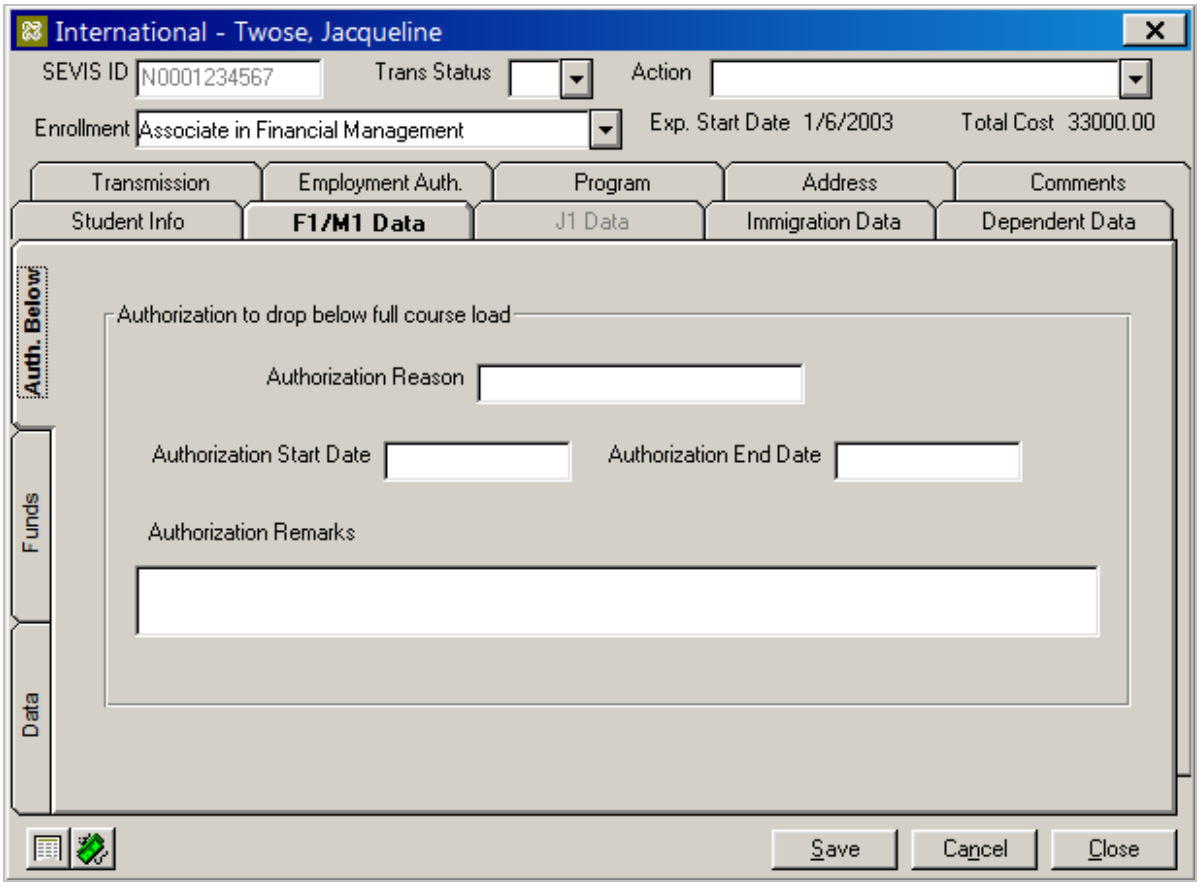
5. Select the **Funds** subtab and enter appropriate data in the following fields:

   - Personal Funds
   - School Funds
   - Description of School Funds
   - Other Funds
   - Description of Other Funds
   - Employment Funds
   - Description of Employment Funds
   - Funding Remarks



6. Select the **Auth. Below** subtab and enter appropriate data in the following fields:

   - Authorization Reason
   - Authorization Start Date
   - Authorization End Date
   - Authorization Remarks



7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

J1 Data

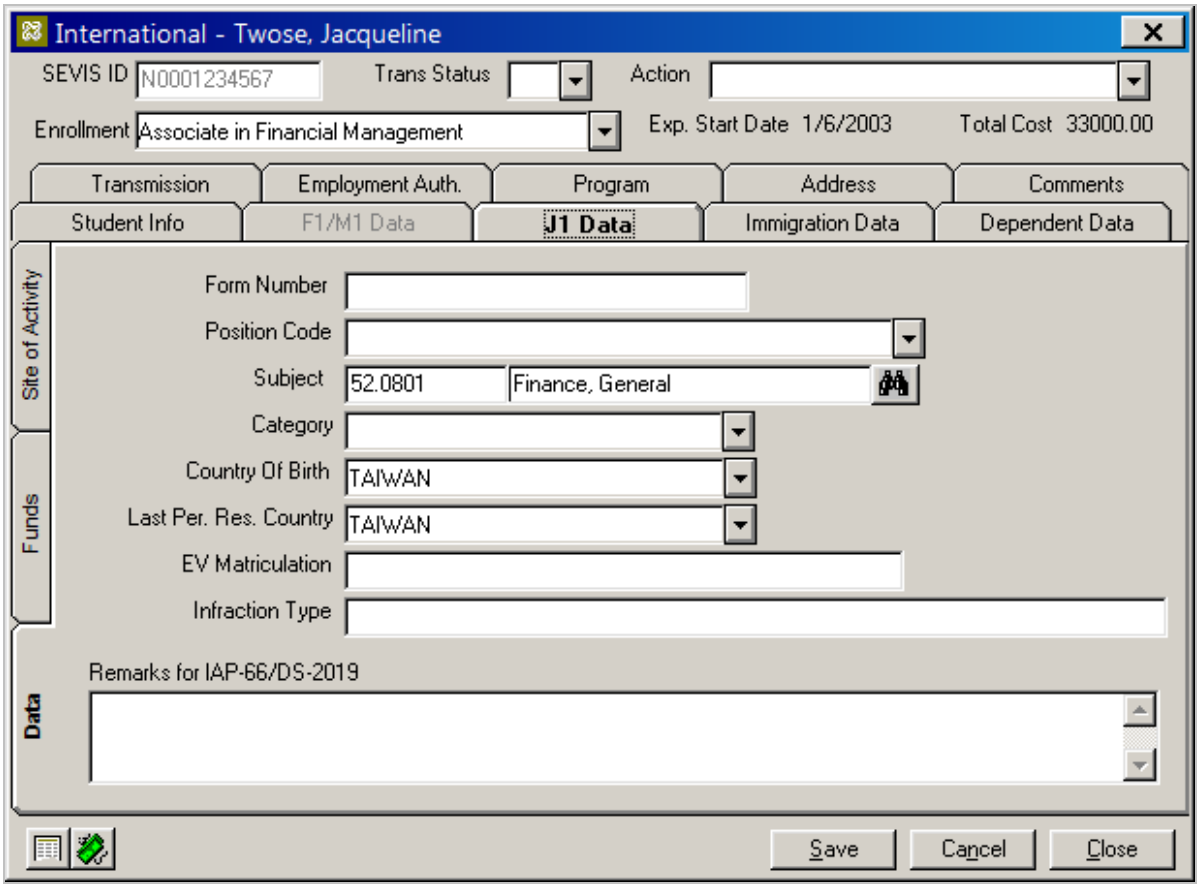
The J1 Data tab on the International form is enabled for the NI visa types J1 and Other only. This includes the nonimmigrant students for SEVIS and other international students tracked by your institution.

To record the international student's J1 data:

1. Select an international (NI - nonimmigrant) student.
2. Navigate to **View > Contact Manager > International**. The International form is displayed.

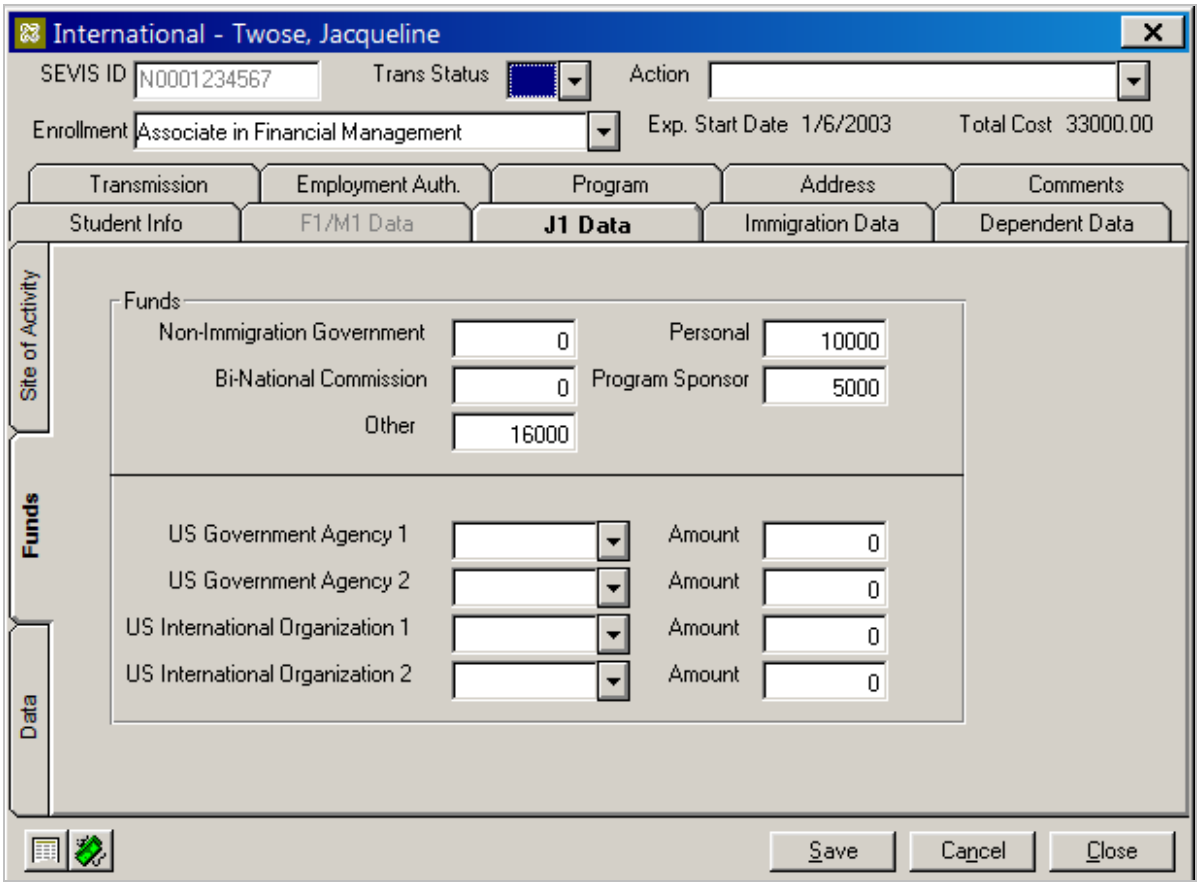
   Note: This option does not appear on your menu unless you have selected an NI student.
3. Select the **J1 Data** tab. The J1 Data tab has three subtabs on the left side: Data, Funds, and Site of Activity.
4. Select the **Data** subtab and enter appropriate data in the following fields:

   - Form Number
   - Position Code
   - Subject
   - Category
   - Country of Birth
   - Last Permanent Residence Country
   - EV Matriculation
   - Infraction Type
   - Remarks for IAP-66/DS-2019



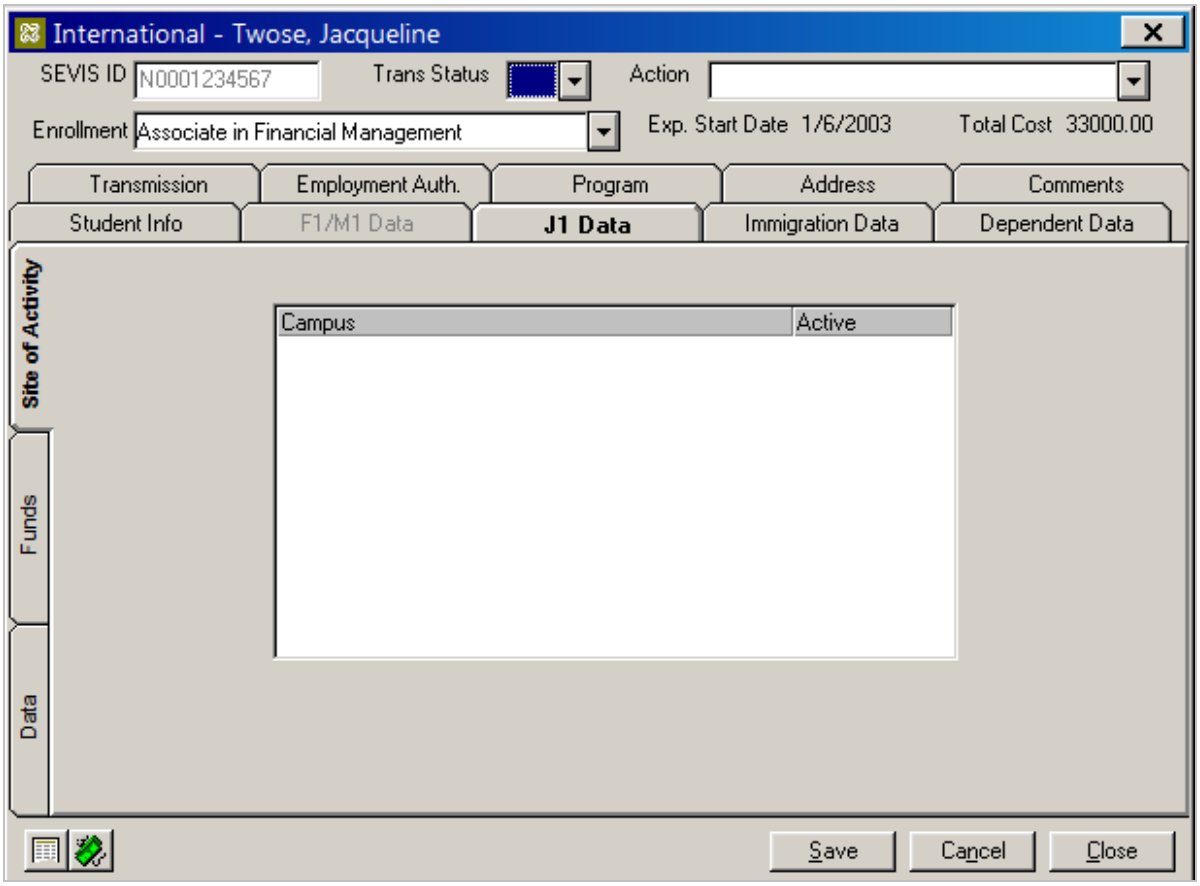
5. Select the **Funds** subtab and enter appropriate data in the following fields:

   - Non-Immigration Government Funds
   - Personal Funds
   - Binational Commission Funds
   - Program Sponsor Funds
   - Other Funds
   - US Government Agency 1 Code and Amount
   - US Government Agency 2 Code and Amount
   - US International Organization 1 Code and Amount
   - US International Organization 2 Code and Amount



6. Select the **Site of Activity** subtab and enter appropriate data in the following fields. These fields may be displayed if the NI is a J-1 Visa Type.

   - Program Category (select from predefined SEVIS list).
   - Program Subject (select from predefined SEVIS list).
   - Position (select from predefined SEVIS list).
   - Site Name (Site of Activity) (Campus).



7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Immigration Data

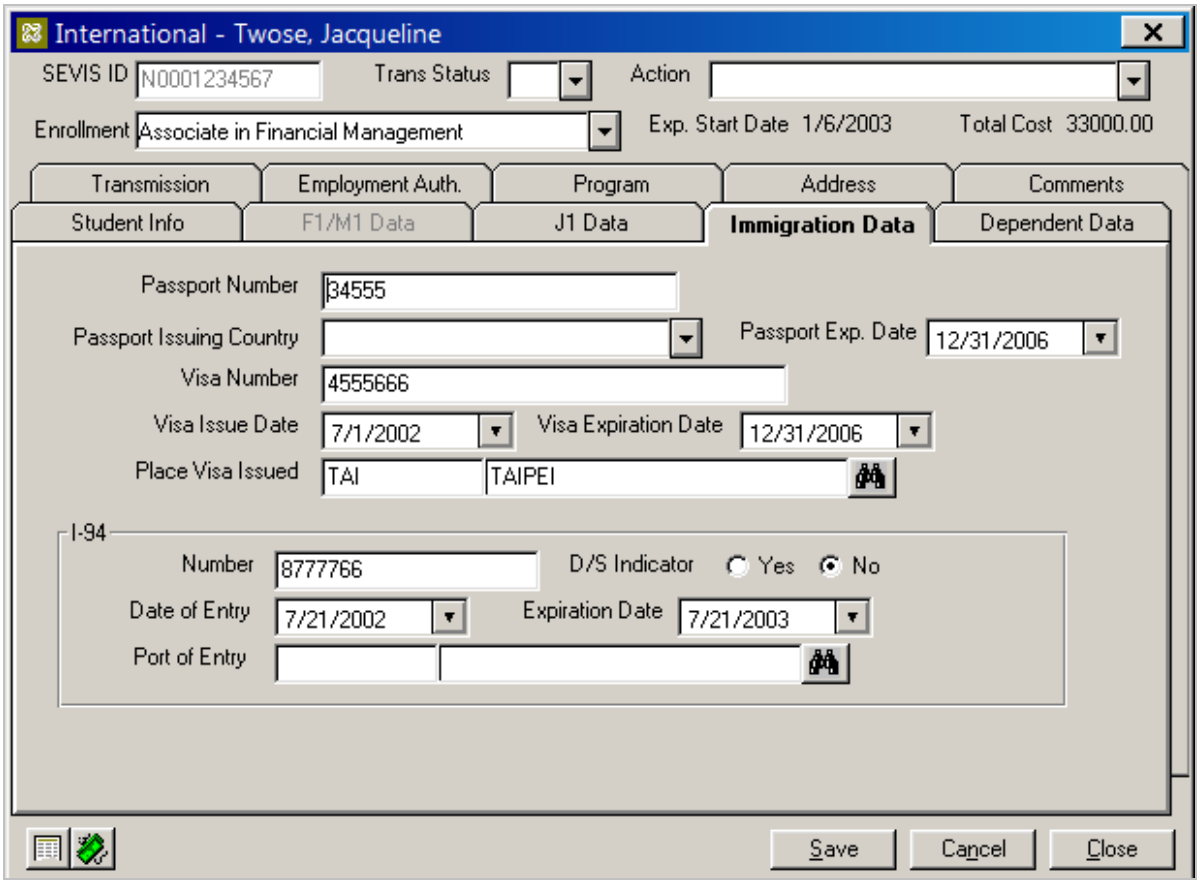
The Immigration Data tab on the International form applies to all NI visa types.

To record the international student's immigration data:

1. Select an international (NI - nonimmigrant) student.
2. Navigate to **View > Contact Manager > International**. The International form is displayed.

   Note: This option does not appear on your menu unless you have selected an NI student.
3. Select the **Immigration Data** tab and enter appropriate data in the following fields:

   - Passport Number
   - Passport Issuing Country
   - Passport Expiration Date
   - Visa Number
   - Visa Issue Date
   - Visa Expiration Date
   - Place Visa Issued
   - I-94 Number
   - I-94 D/S Indicator
   - Date of Entry
   - I-94 Expiration Date
   - Port of Entry



4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Dependent Data

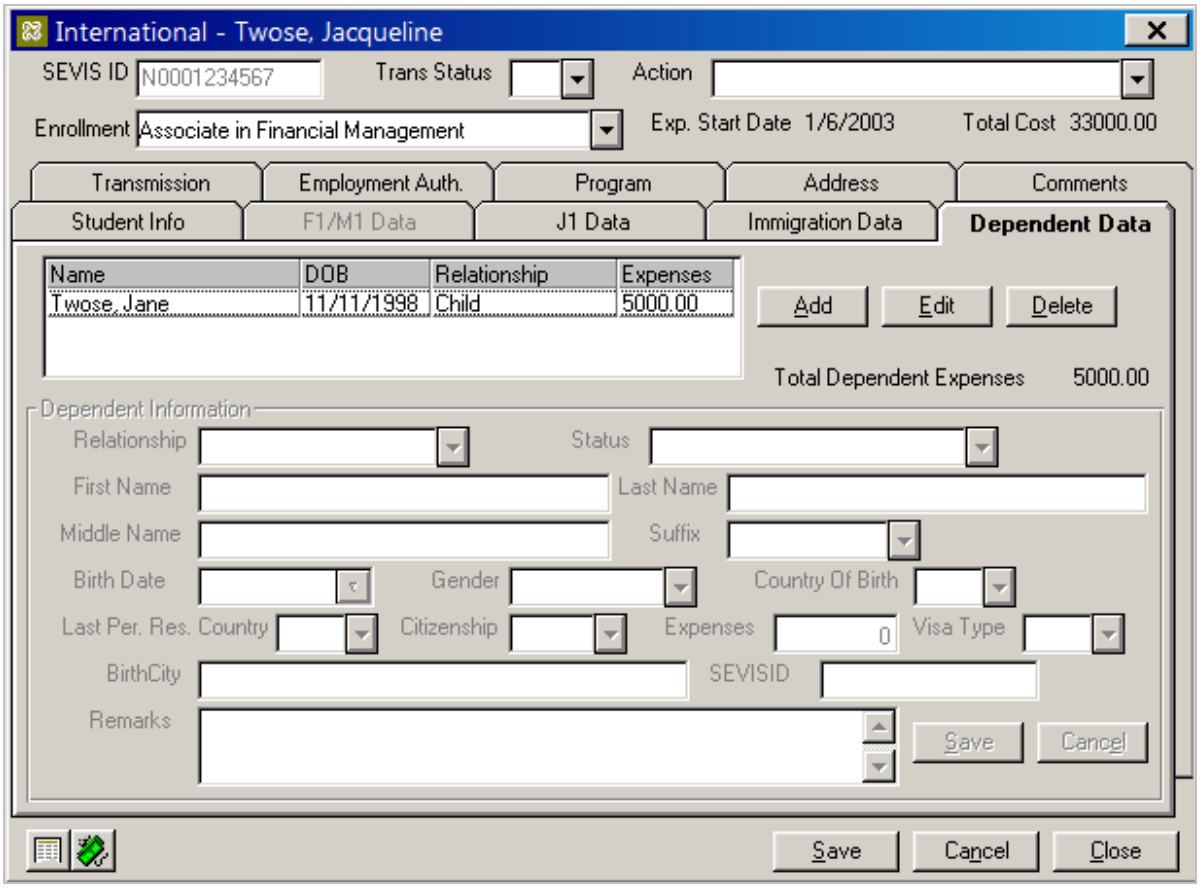
The Dependent Data tab on the International form contains information about the student's (or exchange visitor's) dependents. All students and EVs are eligible to bring spouse and dependent, unmarried children. Funds required for dependents could be calculated and/or entered on this tab if not included elsewhere.

Note: Dependents are deleted from a student's record only by an action transmitted from SEVIS.

To record the international student's dependent data:

1. Select an international (NI - nonimmigrant) student.
2. Navigate to **View > Contact Manager > International**. The International form is displayed.

   Note: This option does not appear on your menu unless you have selected an NI student.
3. Select the **Dependent Data** tab.



4. Click **Add**, or select a record and click **Edit**.
5. Specify appropriate data in the following fields:

   - Relationship
   - Status
   - First Name
   - Last Name
   - Middle Name

- Suffix
- Birth Date
- Gender
- Country of Birth
- Last Permanent Residence Country
- Citizenship
- Expenses
- Visa Type
- Birth City
- Remarks

6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

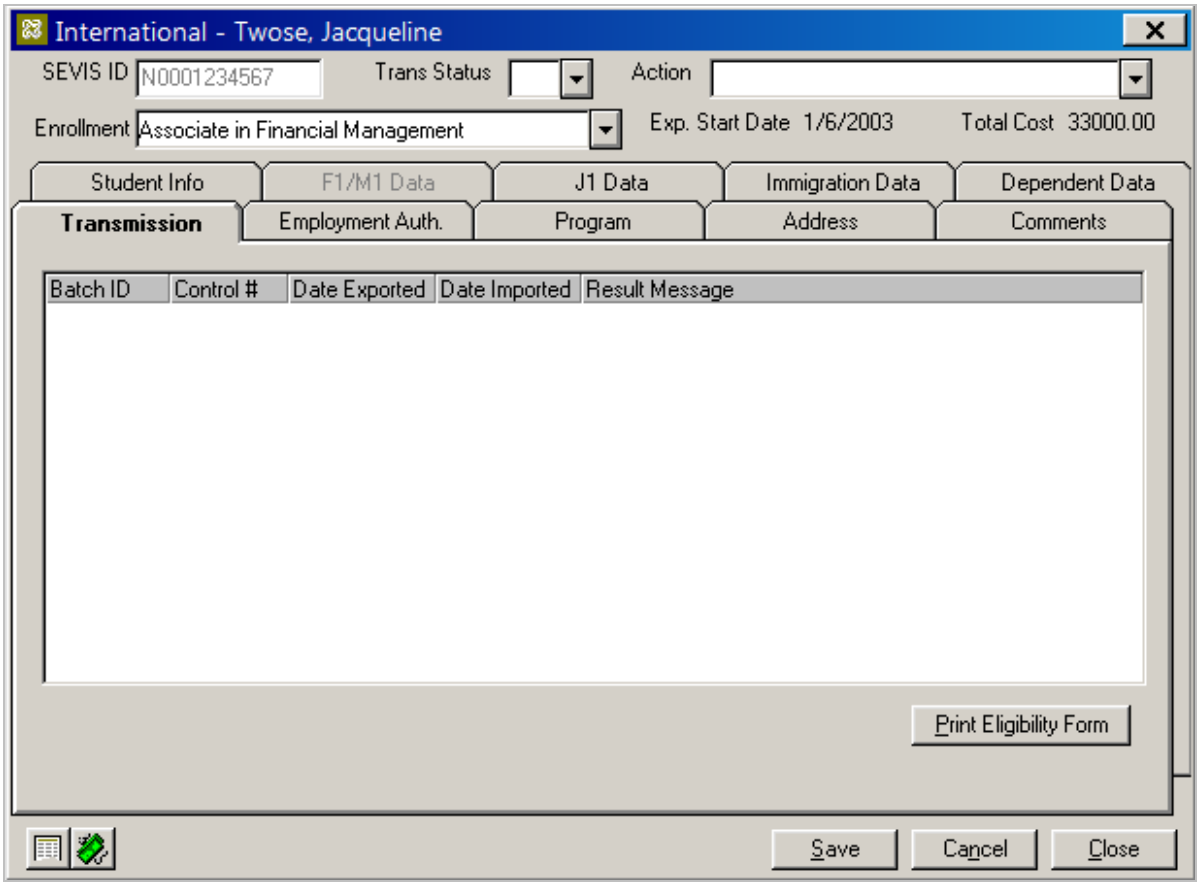
Transmission

The Transmission tab on the International form is used only for F1, M1, and J1 nonimmigrant visa types. It shows a list of transmissions related to the selected student.

To access the international student's transmission data:

1. Select an international (NI - nonimmigrant) student.
2. Navigate to **View > Contact Manager > International**. The International form is displayed.

   Note: This option does not appear on your menu unless you have selected an NI student.
3. Select the **Transmission** tab.



4. SEVIS creates a PDF file for each record that results in the creation of an I-20 or DS-2019 form. Each I-20 or DS-2019 is provided in a separate PDF file that may be printed by the user system. Click **Print Eligibility Form** to print the student's bar-coded eligibility form (I-20/DS-2019 PDF file).
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Employment Authorization

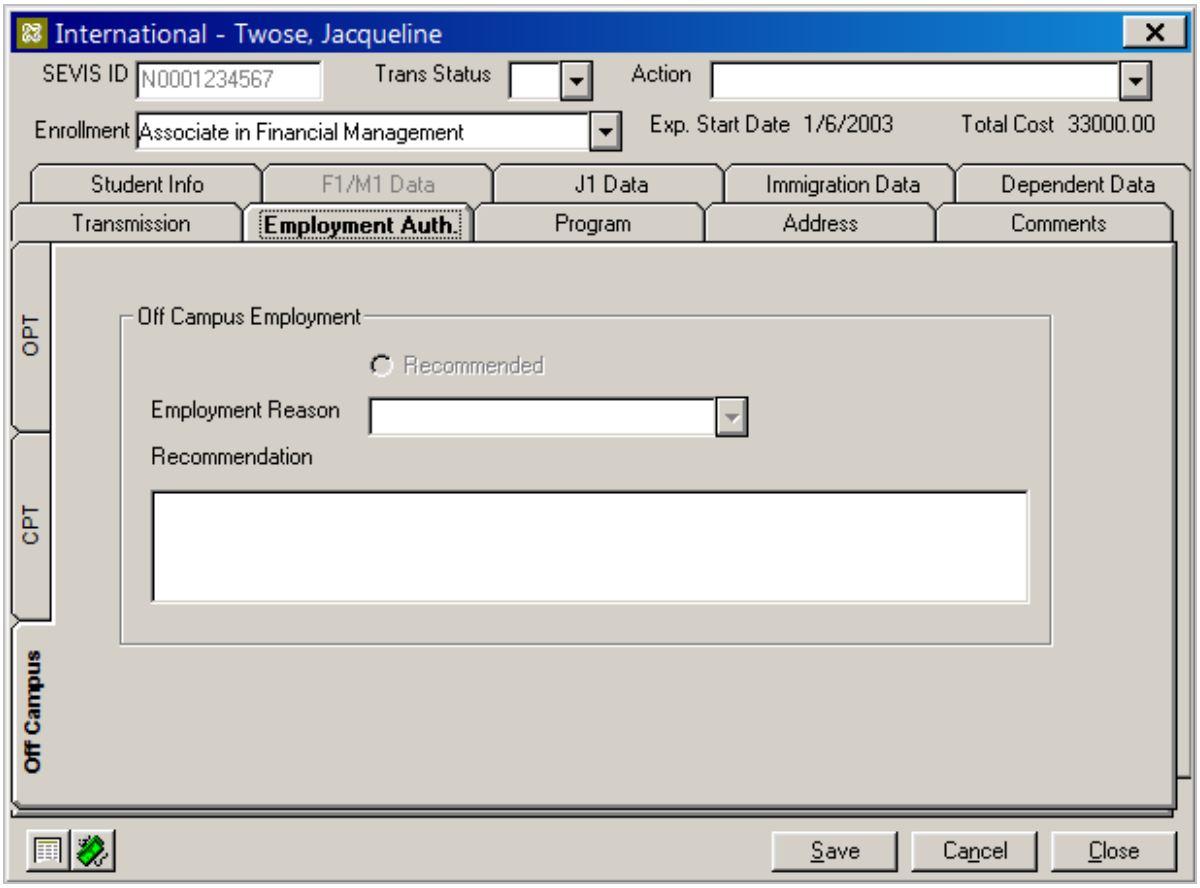
The Employment Authorization tab on the International form applies to all NI visa types. The Curricular Practical Training (CPT) subtab displays information about the student's application for training related to his or her program of studies. The Optional Practical Training (OPT) sub-tab displays information about the student's application for training that is related to his or her course of study.

To record the international student's employment authorization data:

1. Select an international (NI - nonimmigrant) student.
2. Navigate to **View > Contact Manager > International**. The International form is displayed.

   Note: This option does not appear on your menu unless you have selected an NI student.
3. Select the **Employment Authorization** tab. The tab has three subtabs on the left side: Off Campus, CPT, and OPT.
4. Select the **Off Campus** subtab and enter appropriate data in the following fields:

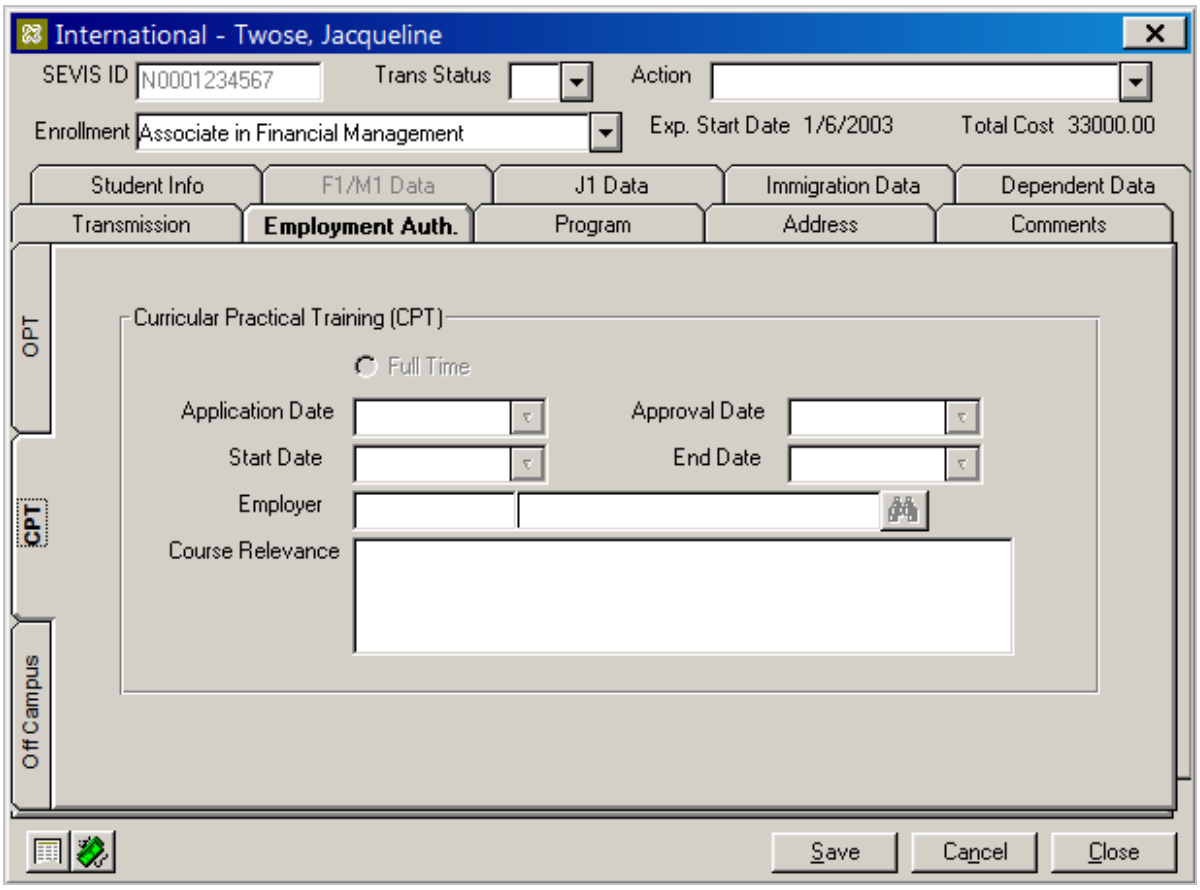
   - Employment Reason
   - Recommendation



5. Select the **CPT** (Curricular Practical Training) subtab and enter appropriate data in the following fields:

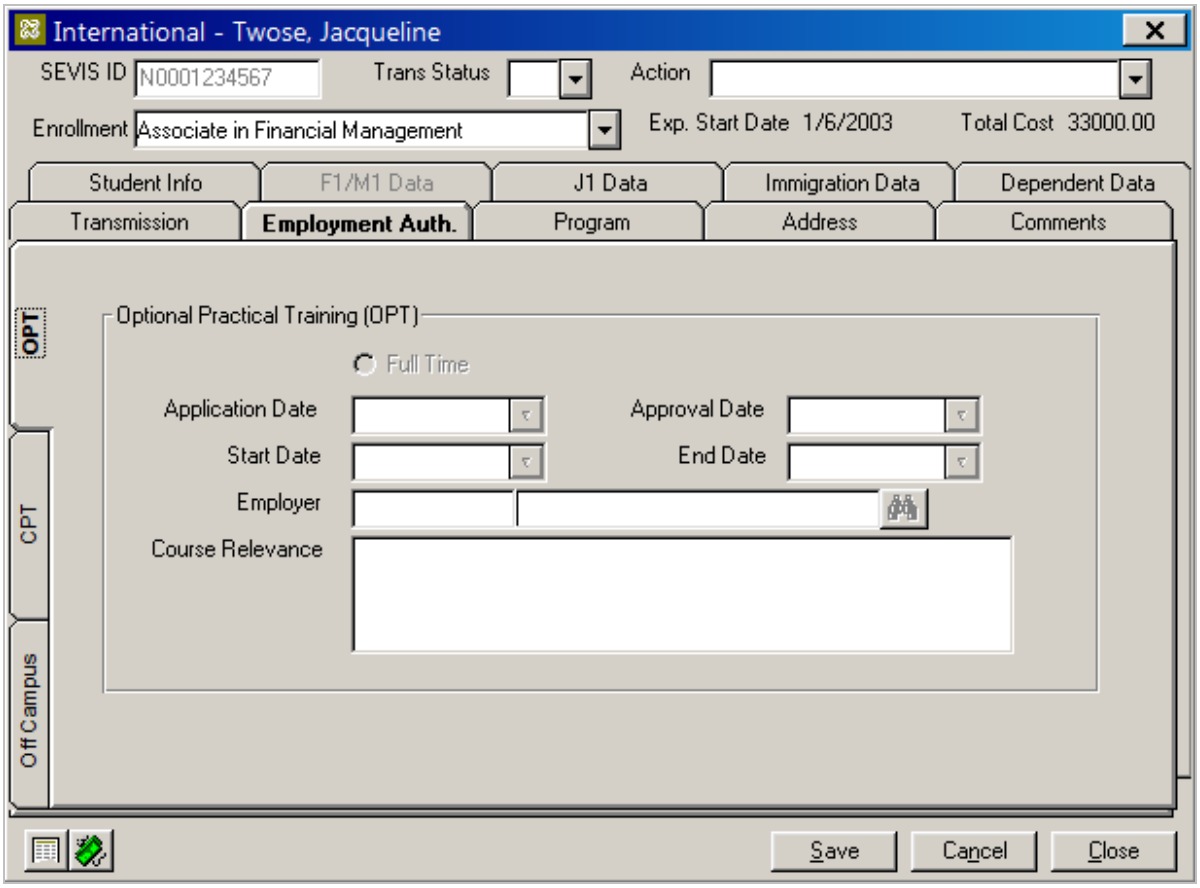
   - Application Date
   - Approval Date

- Start Date
- End Date
- Employer
- Course Relevance



6. Select the **OPT** (Optional Practical Training) subtab and enter appropriate data in the following fields:

   - Application Date
   - Approval Date
   - Start Date
   - End Date
   - Employer
   - Course Relevance



7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Program

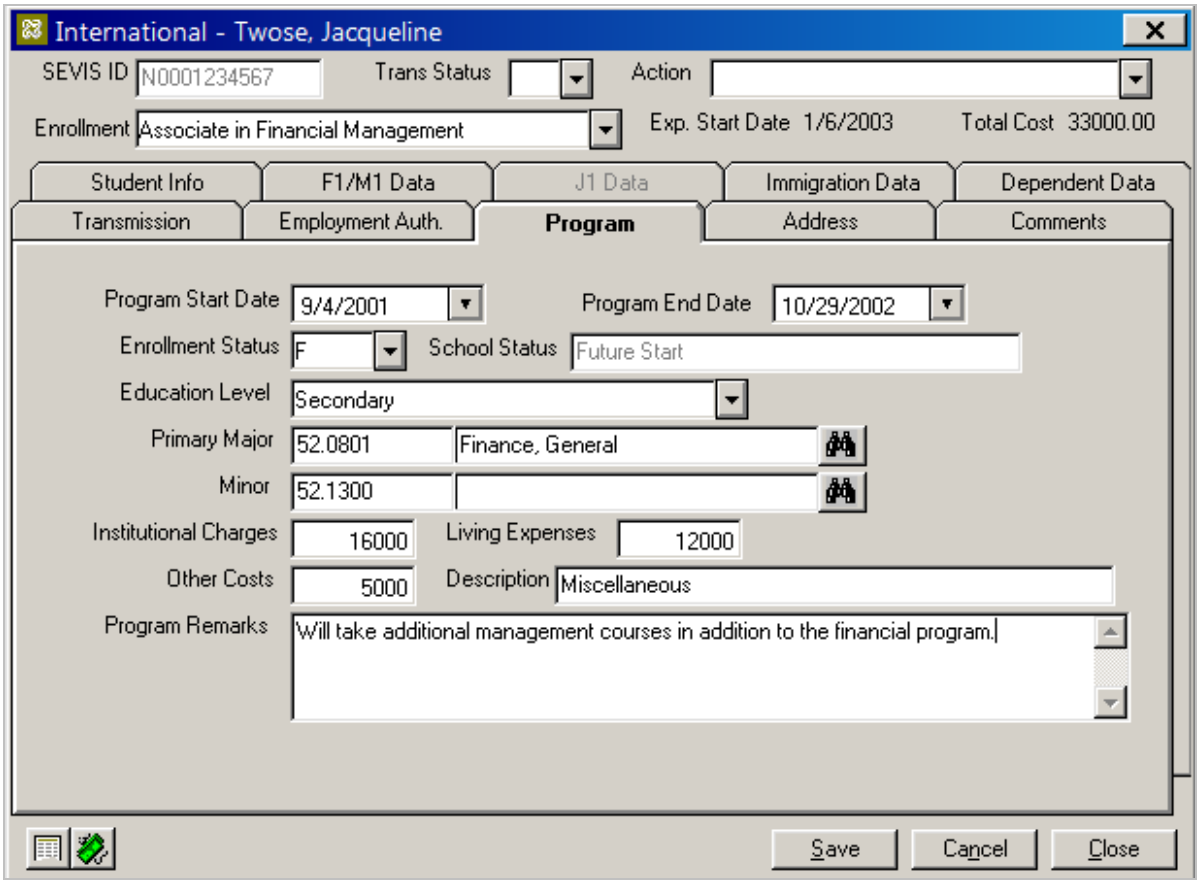
The Program tab on the International form displays information about the NI student's program of study and about expenses related to the program.

To record the international student's program data:

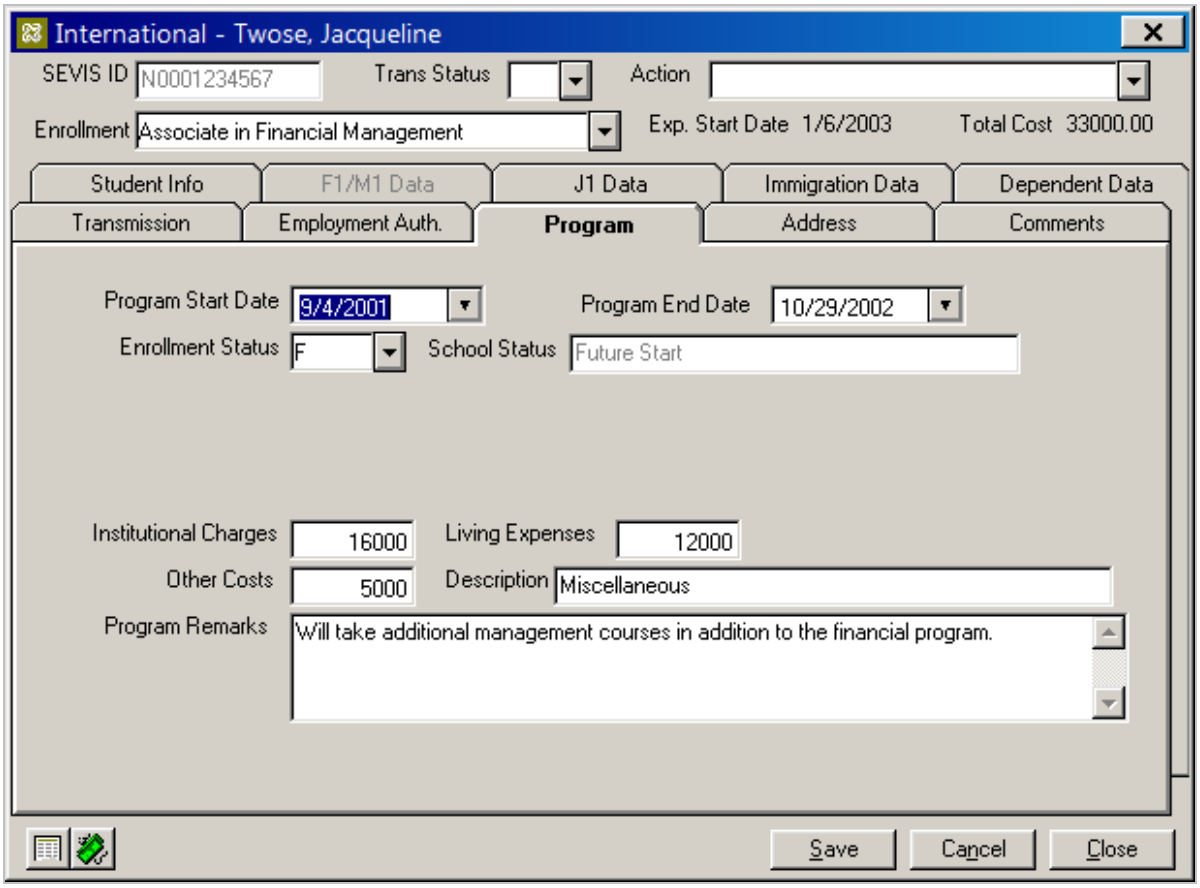
1. Select an international (NI - non-immigrant) student.
2. Navigate to **View > Contact Manager > International**. The International form is displayed.

   Note: This option does not appear on your menu unless you have selected an NI student.
3. Select the **Program** tab. The form is slightly different for F1/M1 students and J1 students.

   Program Tab for F1/M1 Student



Program Tab for J1 Student



4. Select or enter Program data as required.

    - Program Start Date
    - Program End Date
    - Enrollment Status
    - School Status
    - Education Level
    - Primary Major
    - Minor
    - Institutional Charges
    - Living Expenses
    - Other Costs
    - Description
    - Program Remarks

5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

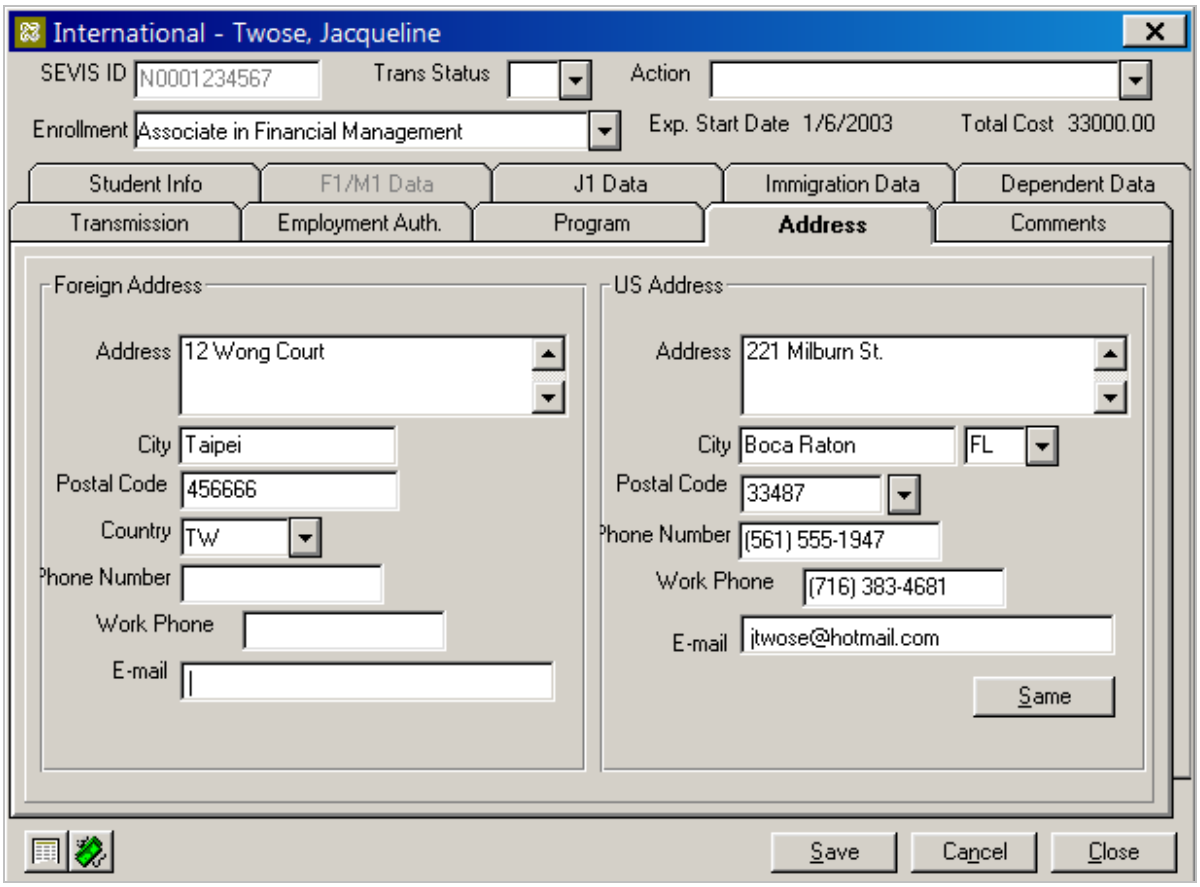
Address

The Address tab on the International form contains the student's foreign and U.S. addresses.

To record the international student's address data:

1. Select an international (NI - nonimmigrant) student.
2. Navigate to **View > Contact Manager > International**. The International form is displayed.

   Note: This option does not appear on your menu unless you have selected an NI student.
3. Select the **Address** tab.



4. Enter the student's **Foreign Address** and **U.S. Address**.

   If applicable, click **Same** to copy the U.S. Address from the Student Master record.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. .

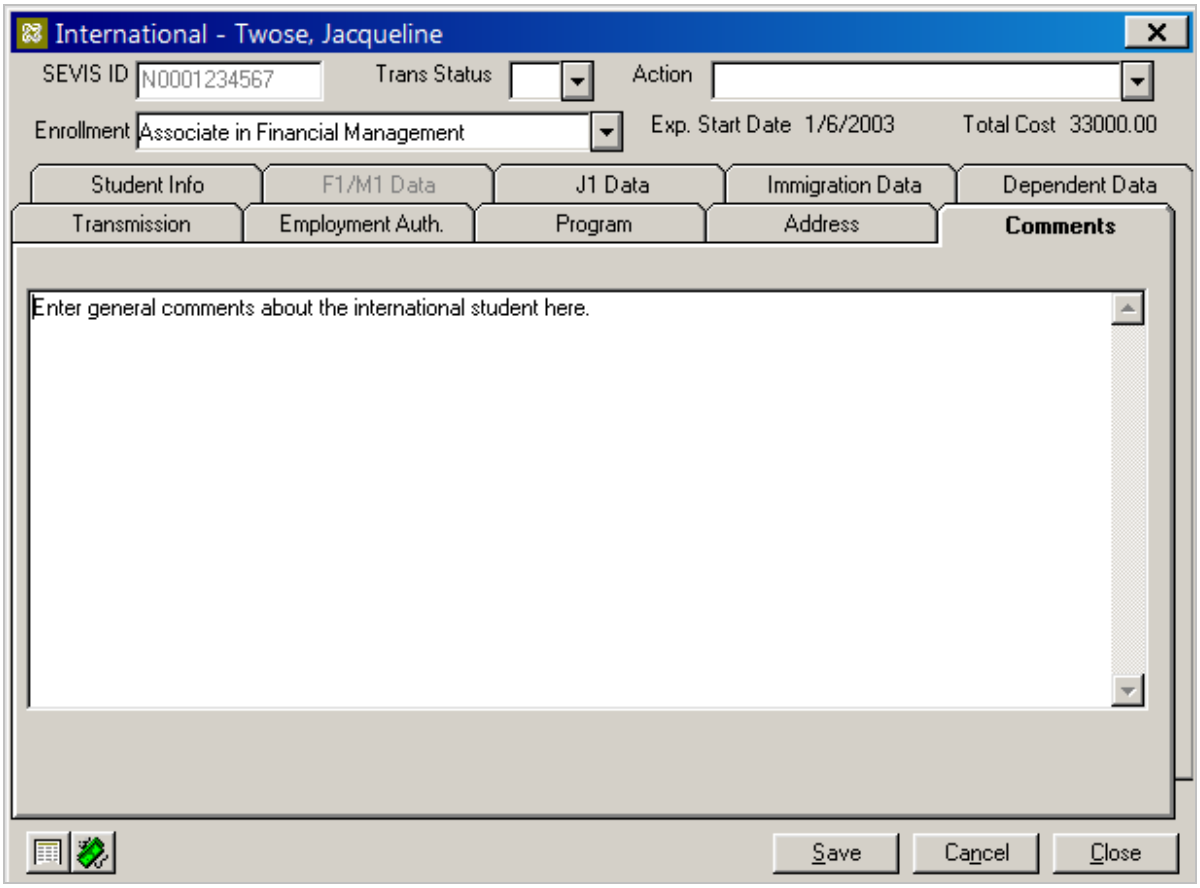
Comments

Use the Comments tab on the International form to enter general comments about the international student.

To record comments about the international student:

1. Select an international (NI - nonimmigrant) student.
2. Select **View > Contact Manager > International**. The International form is displayed.

   Note: This option does not appear on your menu unless you have selected an NI student.
3. Select the **Comments** tab.



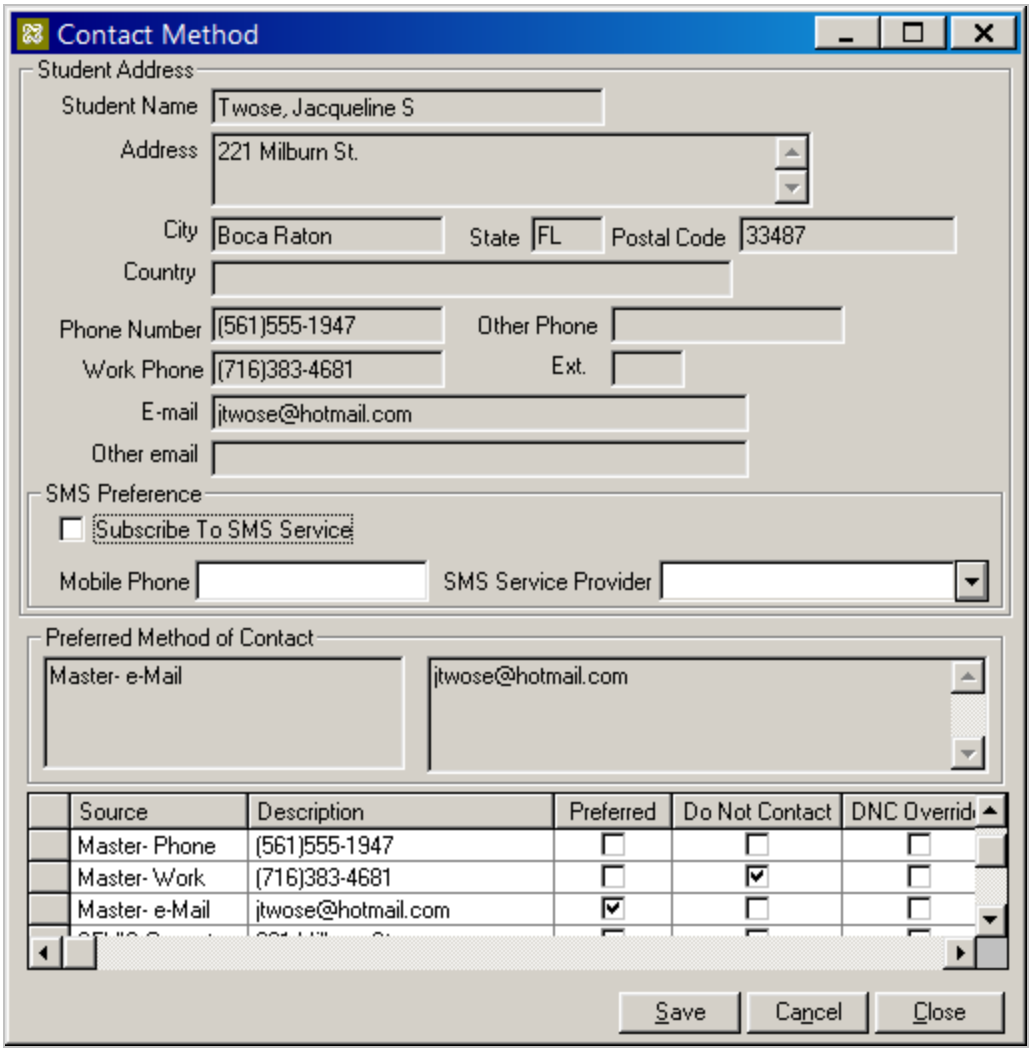
4. Enter any comments in the **Comment** field.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Contact Method

The Contact Method form enables you to select the preferred method for contacting a student. This form pulls the data from the Student Master and the student Addresses forms.

To set up the student's preferred contact method:

1. Select a student.
2. Navigate to **View > Contact Manager > Contact Method**. The Contact Method form for the selected student is displayed.



3. For the student to subscribe to receive SMS text messages, select the **Subscribe to SMS Service** check box and select an **SMS Service Provider**. A prerequisite is that the student has a mobile phone number on the Student Master form.

   If the **Subscribe to SMS Service** check box is not selected, the student has not subscribed or has unsubscribed and does not want to receive text messages from the institution. Students can use Portal to subscribe and

unsubscribe.

4. Select only one **Preferred** method of contact.
5. Select one or more **Do Not Contact** sources.
6. If the student's status is Lead and the most recent Lead Date is greater than 90 days, the phone number is masked, unless a **DNC Override** is on file. An override document stores any exceptions to the DNC list. Students with phone numbers listed on the DNC list, but who permit phone calls from the institution, require an override to comply with FTC rules.

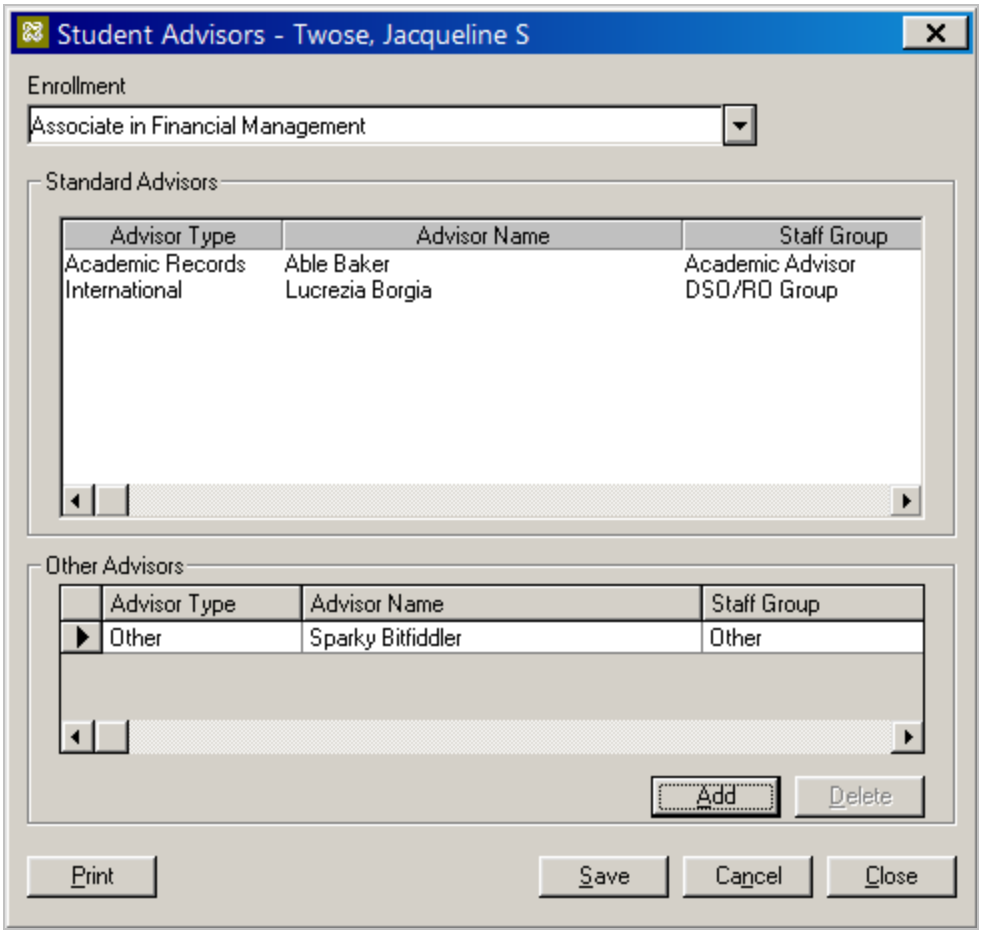
   Identify the override document in the Setup > Campus Locations > Contact Info (tab). During updates, if the phone number is also on file for the defined override document, it will be restored and displayed in CampusNexus Student as a number that is permissible to call.

Advisors

The Advisors form in Contact Manager contains all advisors for a student. By default the information in the form displays the advisors for a student's most current enrollment.

To view a student's advisor list:

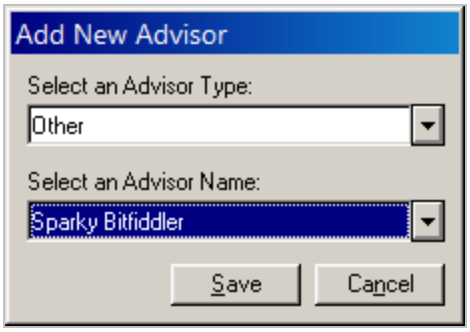
1. Select a student.
2. Navigate to **View > Contact Manager > Advisors**. The Student Advisors form for the selected student is displayed.



3. If the student has more than one enrollment, select the enrollment for which you want to see the advisors. The top of the form lists the student's *Standard Advisors*. The Standard Advisors are selected on other forms throughout CampusNexus Student.

   If you attempt to view the advisor list for a student that is not yet enrolled, a message indicates that the student is not yet enrolled. For a student that is not yet enrolled you can only select advisors in the *Other Advisors* groups.

4. Click **Add** to add Other Advisors. The Add New Advisor form is displayed. Only advisors belonging to a staff group with an Advisor Type code of OTH - Other Advisor are listed on this form. Other Advisor staff groups are set up under **Setup > Staff > Staff Groups**.



5. Select an **Advisor Type** and an **Advisor Name**.
6. Click **Save**. You are returned to the Student Advisors form.
7. To delete Other Advisors, select a row in the grid and click **Delete** .
8. Click **Print** and choose **Selected Enrollment** or **All Enrollments** to print a list of the student's advisors for the current enrollment or for all enrollments. The report includes Student Name, Enrollment Program, Advisor Type, and Advisor Name.

Standard Advisor Selection

Standard Advisors for students are initially selected during enrollment. You can set up a set of default advisors at Daily > Contact Manager > Default Campus Advisors. When you enroll a student, the default advisors appear on an advisor page of the enrollment wizard. Whether the advisor page is displayed during enrollment is controlled by an option in Setup > Academic Records > Enrollment.

Reassigning Advisors

Note: You can change a student's advisors only if you have been given permission to do so in the Setup > Staff > Staff Information > Contact Manager form. The check box **Allow Editing of Advisors** must be selected.

CampusNexus Student has a flexible advisor feature which allows institutions to assign advisors per module and to designate an unlimited number of other advisors. For each module, student advisors are shown and changed on the following forms.

Advisor Forms

Module	Form
Academic Records	View > Academic Records > Enrollment > Date-Status tab
Admissions	View > Admissions > Student (Admissions Rep)
Financial Aid	View > Financial Aid > Academic Year
Loan Management	View > Loan Management > Loan Management
Placement	View > Career Services > Placements
Student Accounts	View > Student Accounts > Ledger Cards
International	View > Contact Manager > International

If an advisor changes or is no longer with your institution, you need to re-assign students to one or more other advisors. When you transfer advisors, you can re-assign all Contact Manager activities to the new advisor(s) automatically. This does not apply for students who had no previous advisor. CampusNexus Student also tracks advisor changes to the admission audit folder.

To use the Advisor Assignment Wizard to re-assign students in batches and override automatic features to assign specific advisors:

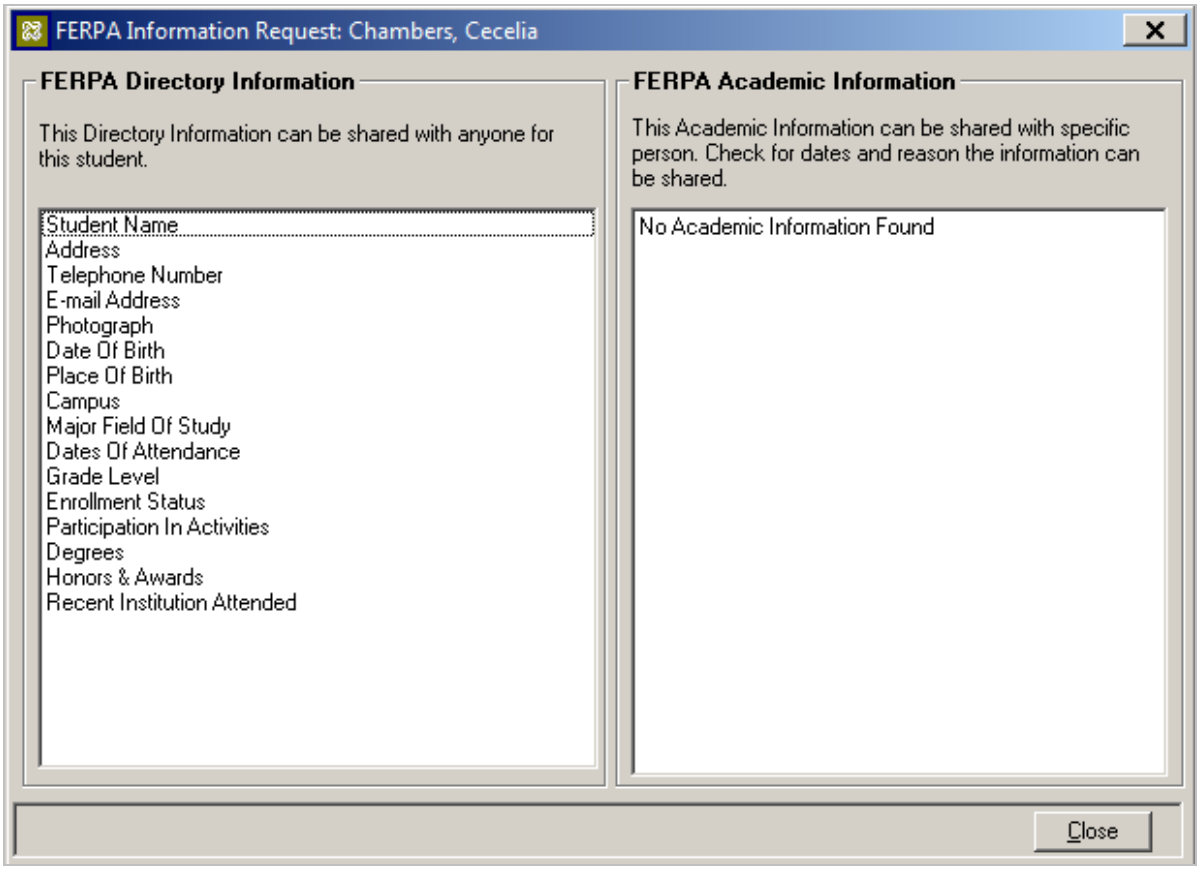
1. Student General Selection Criteria. It is important that you select **Re-assign Student Advisor** or **Assign Students without an Advisor**.
2. Student Statuses & Program Versions to be Included.
3. Select Advisors to Assign: Select **Select All**, **Clear All** or **Distribute**. If you select **Distribute**, the students in the batch will be distributed equally among all advisors whose names you have selected.
4. Ready to Reassign: This form shows all students ready to be assigned or reassigned. If you click **Next**, a dialog box prompts you to print a report.
5. Reassigned Students: a list of students that will be (re)assigned. At this point, you can manually remove a student if required. There is also a **Print** button that enables you to print a report of the students to be processed. Click **Finish** to finalize the assignments.
6. Advisor Assignment Review. This is a summary report that includes Student Name, ID#, Program Version, Start Date, Grad Date, and Reassigned Advisor.

FERPA Student Information

Displaying FERPA Directory Information and Academic Information

Click the FERPA icon in the standard toolbar to display the student's Directory Information and Academic Information that can be disclosed.

Note: The Academic Information window displays only Active requests of contacts.



Adding/Editing FERPA Student Information

Open the FERPA student information form for a student in one of two ways:

- Click the FERPA folder in the Contact Manager group of the Student Bar, or
- Select **View > Contact Manager > FERPA**.

The FERPA student information form consists of three tabs:

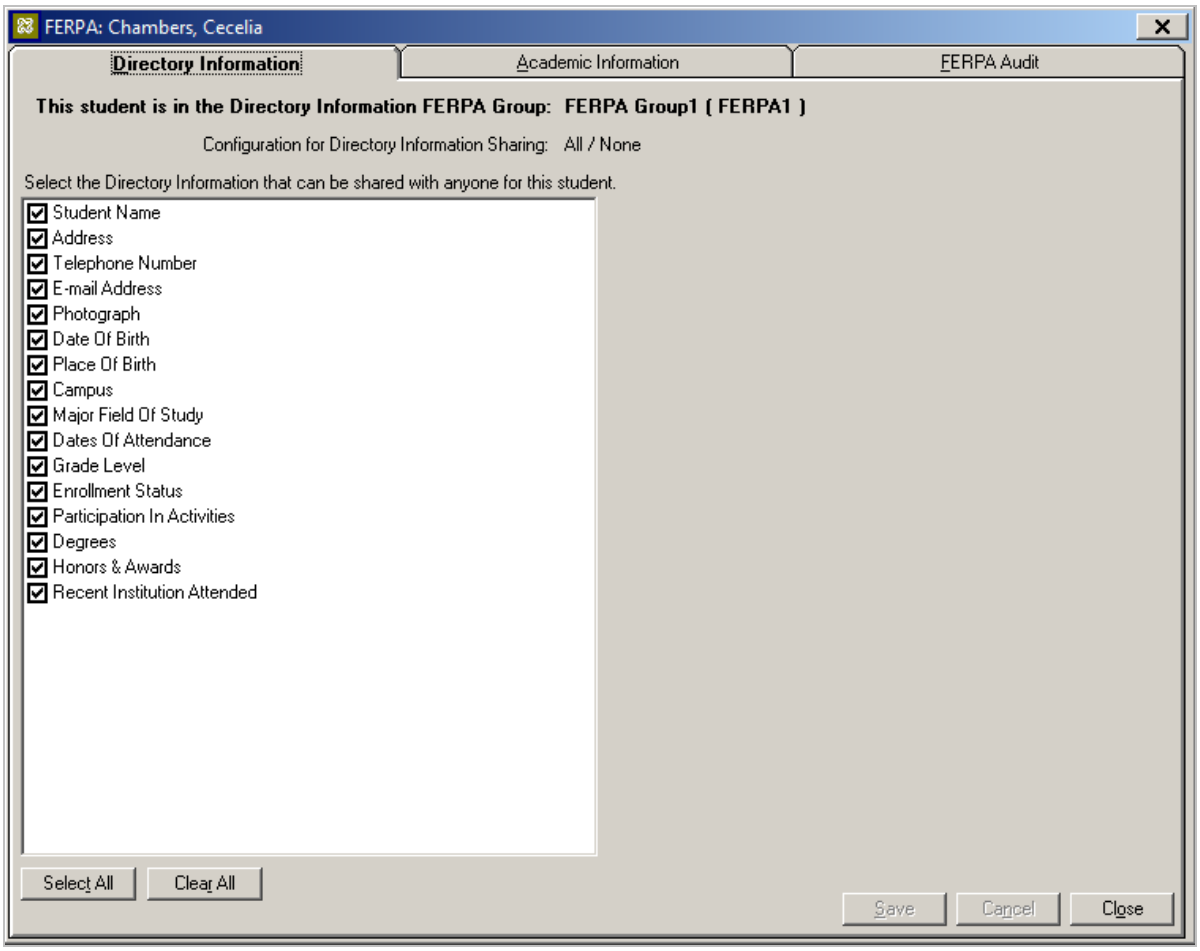
- Directory Information
- Academic Information
- FERPA Audit

Directory Information Tab

The Directory Information tab displays the student's directory information:

- The FERPA Group name and code corresponding to the student's campus.
- The Directory Information Sharing configuration for this FERPA Group.

- A list box displaying all Directory Information details selected at the FERPA Group level.
- The Directory Information which is selected by student is displayed as selected.



Notes:

- When the Directory Information Sharing configuration is set to **All**, the list box is disabled, so you cannot select individual directory information details. In such cases, you can use the **Select All** or **Clear All** buttons.
- When the Directory Information Sharing configuration is set to **Partial**, the list box is enabled so that you can select individual directory information details for the student.

When the form opens and the Directory Information tab is active, the Save and Cancel buttons are initially disabled. Save and Cancel are enabled when the student's directory information is changed. Click **Save** to save the directory information to the database.

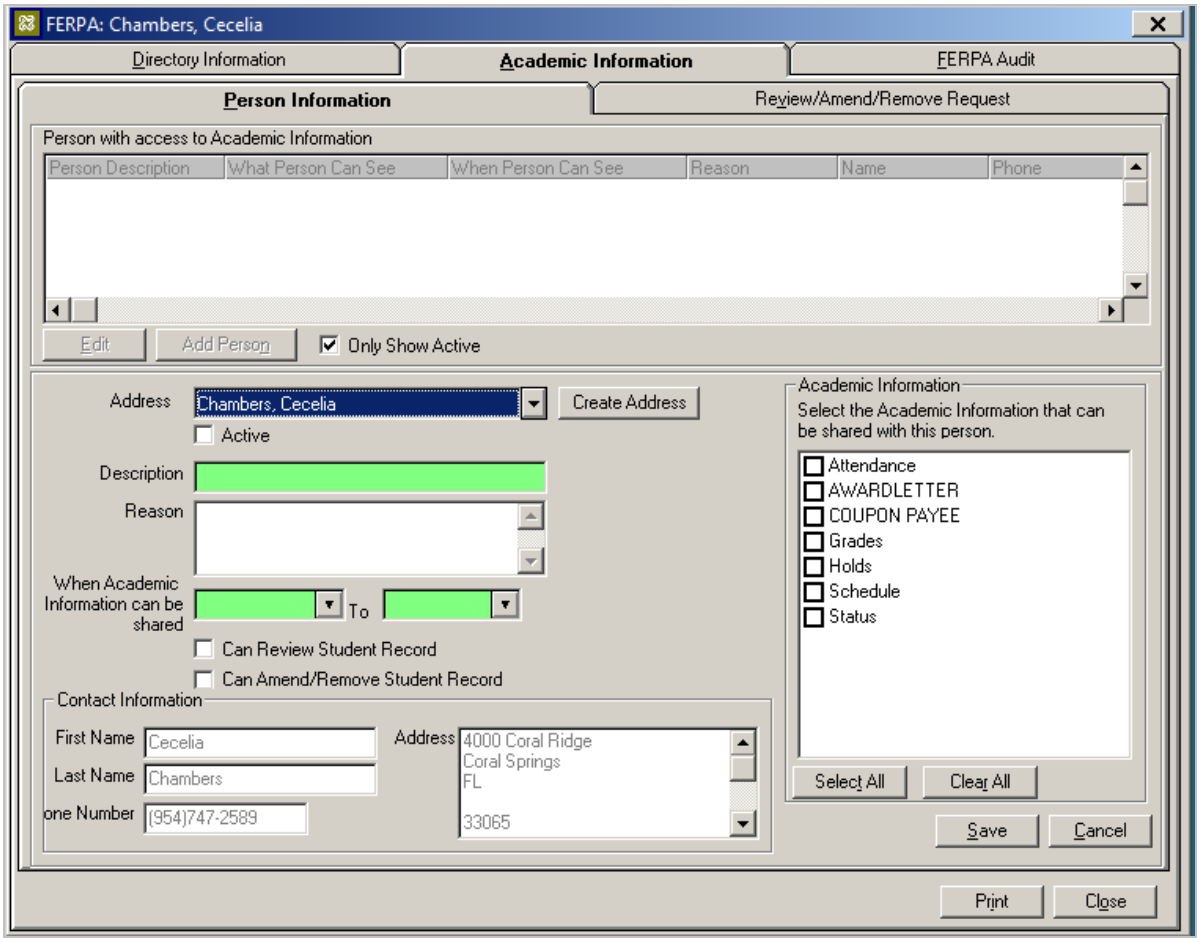
Academic Information Tab

The Academic Information tab displays academic information related to the student in two subtabs:

- Person Information
- Review/Amend/Remove Request

Person Information Subtab

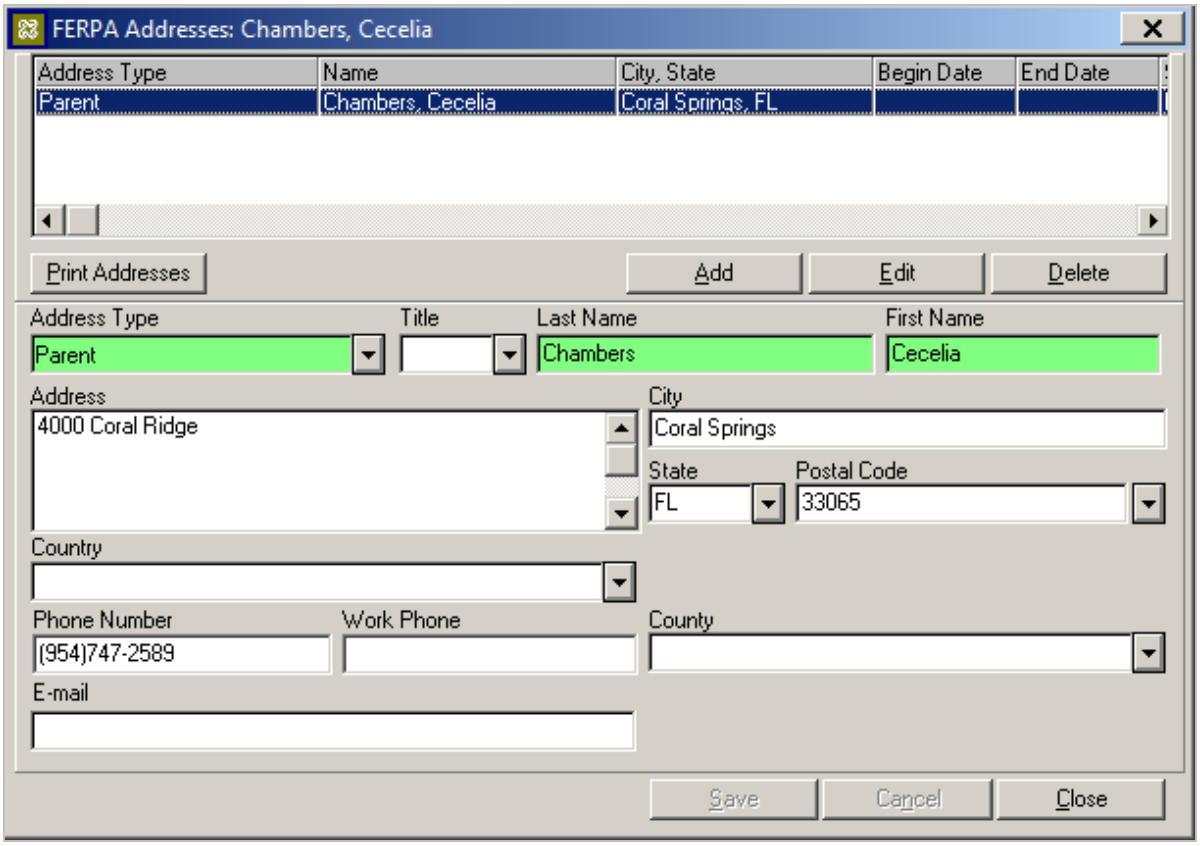
This subtab displays the student's Person Information in the upper grid. The **Person with access to Academic Information** grid contains information about persons with whom a student's information can be shared.



1. Select an address from the **Address** list or create a new FERPA address by clicking **Create Address**.
2. When you select an address from the Address list, all the details of the address are displayed under **Contact Information**. All academic information is displayed in the **Academic Information** list box.
3. By default, none of the Academic Information is selected, and you can select the Academic Information details which can be shared.
4. The **Active** check box is cleared by default.
5. When the **Can Review Student Record** check box is selected, the Person Information is displayed in the Review Requested By list on the Review/Amend/Remove Request tab.
6. When the **Can Amend/Remove Student Record** check box is selected, the Person Information is displayed in the Amend/Remove Requested By list on the Review/Amend/Remove Request tab.
7. Click **Add Person** to create a new contact by button. Select an existing contact and clicking **Edit** to modify it.
8. **Note**: A contact (address) can have multiple requests, but only one request should be Active at any given time.
9. Click **Save** to save the person along with the Academic Information to the database.

Creating a New FERPA Address

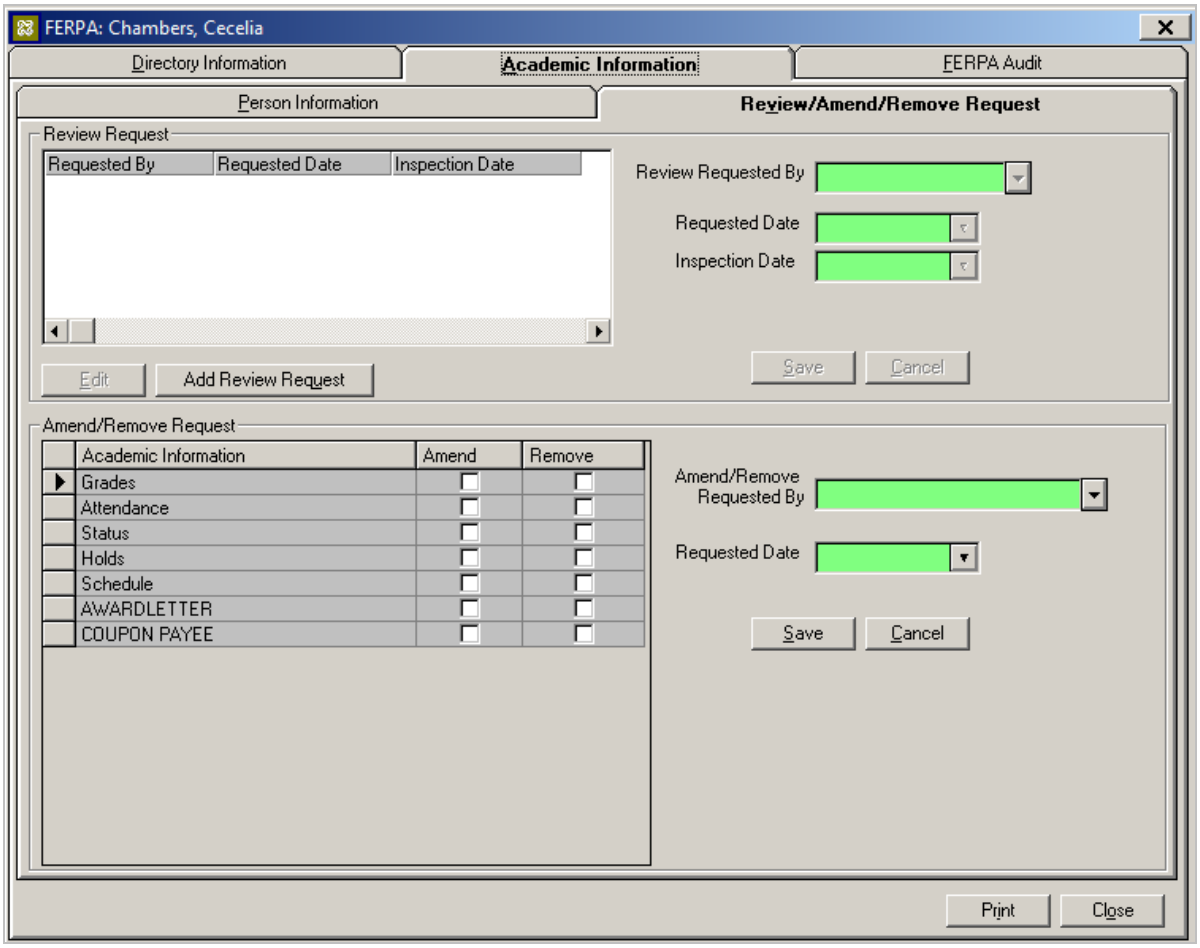
1. Click the **Create Address** button on the Academic Information tab to open the FERPA Addresses form. This form displays all the available addresses in the grid.



2. To add a new address, click **Add**. All fields become editable, and the **Address Type** list displays only FERPA Address Types.
3. Enter all relevant information and click **Save**. The address is saved and the newly added address is displayed in the grid.
4. To change the details for an existing person, select a record in the top grid and click **Edit**.
5. Click **Close**. The newly added address is displayed in the **Address** list on the **Person Information** tab.

Review/Amend/Remove Request subtab

This subtab consists of two sections: Review Request and Amend/Remove Request.



Review Request

This section of the form is used to document details related to Review Requests associated with the student information.

The grid on the left displays previous review records. You can select any record from the grid and edit that record.

Click **Add Review Request** to add new Review Request details. Upon providing all the mandatory information, click **Save** to save the review request to the database. The new record is displayed in grid on the left. To edit any of the records listed in the grid, select the record and click **Edit**.

The **Review Requested By** list displays the student's name and all other "eligible" persons (i.e., persons for which the **Can Review Student Record** check box is selected in the Person Information tab).

Use the **Requested Date** and **Inspection Date** lists to select these dates accordingly.

Amend/Remove Request

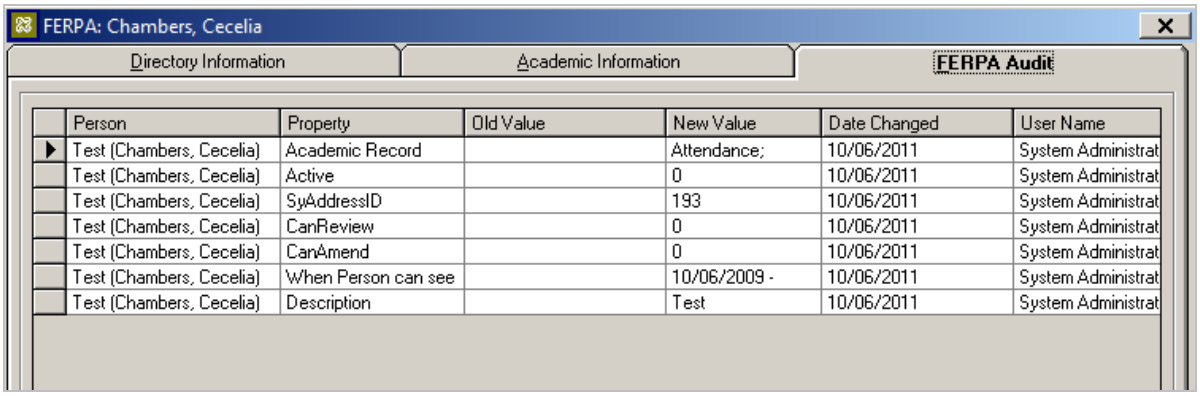
The grid on the left displays the Academic Information and columns of check boxes labeled **Amend** and **Remove**.
Select or clear these check boxes to indicate whether the Academic Information details are to be amended or removed.

The **Amend/Remove Requested By** list displays the student's name and all other "eligible" persons (i.e., persons for which the **Can Amend/Remove Student Record** check box is selected in the Person Information tab).

Upon entering all the relevant information, click **Save** to save the amend/review request to the database.

FERPA Audit Tab

The FERPA Audit tab displays the audit data for the student's Academic Information.



The audit data grid consists of the following columns:

- Contact: Name of person
- Property: Property whose value was change
- Old Value: Old value of the property
- New Value: New value of the property
- Date Changed: Date on which the value was changed
- User name: Name of the user who changed the value

The Audit Information includes changes in the following Academic Information fields:

- Date of Request for the Academic Information
- Change in Effective Date for a contact
- Change in contact information, such as name, address, or phone number
- Change in the Academic Information for a contact

Note: The auditing of the Academic Information is implemented using service broker architecture.

View > Admissions

The Admissions option on the View menu leads to a list of admissions-related folders. The options on this menu apply to the student selected from the Recent Students list.

Menu Item	Description
Student	Displays the Student Master form.
Inquiry	Displays the Inquiry form to create an inquiry record when a prospective student inquires about possible enrollment.
Applicant	Displays the Applicant form.
Education	Displays a form used to view and enter the student's education history.
Summary	Displays a form that summarizes the student's activities, documents, entrance tests, addresses, lead date, city, and status. You can get details about each of the summary items.
Tests	Displays a form used to view and maintain the student's entrance tests.
School Fields	Displays a form used to view or enter data in school-defined fields related to the Admissions module and public fields from other modules.
Audit	Displays a form listing changes to selected data entry fields in the student's record.
Status History	Displays a form listing the student's history of school status changes. You can change the student's status from this form.
Deposit	Displays a form on which you can enter an admissions deposit.
Transfer Credits	Displays a form used to review the list of courses transferred from other colleges and modify transfer credit information. This is the same as the Transfer Credits option under the View > Academic Records menu.

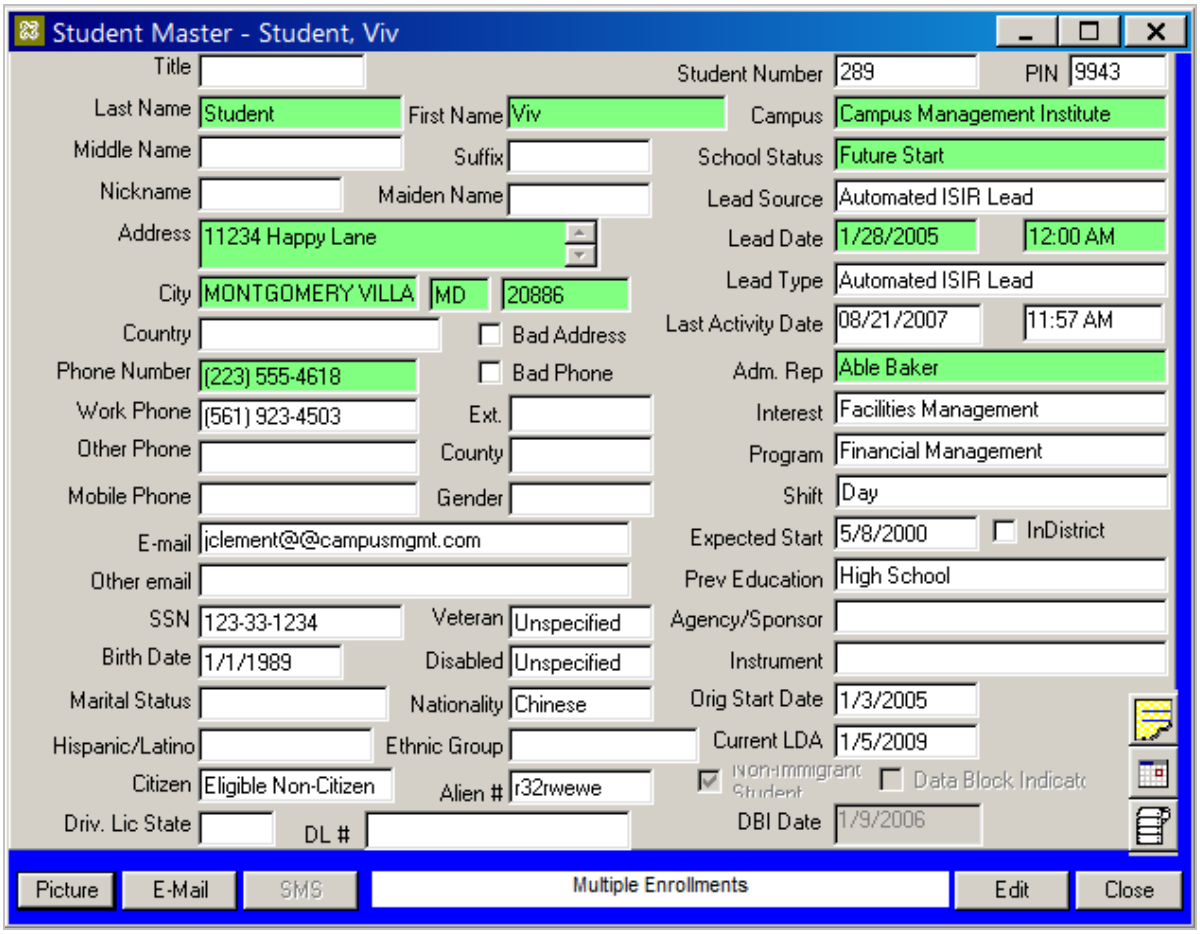
The options on the Student Bar are the same as the options on the View menu, unless the Student Bar has been altered by the user.

Student Master

The Student Master form contains much of a student's basic demographic information. The Student Master form is usually (but not necessarily) populated in the Admissions module by adding a new lead to the database. New leads are entered using the Quick Lead Entry form or the Add New Lead **Ctrl+L** option on the File menu. The **Ctrl+N** key combination can also be used to start a new Student Master record (form) without entering a quick lead.

To view a Student Master form:

1. Select one of the following options:
    - Click **Student** on the Student Bar.
    - Double-click **Recent Students** on the Toolbar. When you change the student in the Recent Students list, a new Student Master form is displayed. If you already have a Student Master form open, it remains open in the background.
    - From the **View** menu navigate as follows:
        - Contact Manager > Student
        - Admissions > Student
        - Financial Aid > Student
        - Student Accounts > Student
        - Academic Records > Student
        - Career Services > Student
        - Loan Management > Student
        - Student Services > Student
        - Housing > Student
    - Use the **Find** menu or click on the Toolbar to search for a student.



Note: The border color around the Student Master form indicates the student's status category. In the setup options under Setup > Status Codes > Colors Tab, your system administrator can choose colors for the status categories.

2. Multiple Student Master forms can be displayed at the same time. The forms always open in the same place in the work area. Unless you have closed, moved, or minimized a previous Student Master form, the next form you open covers the previous form.

   To move between open Student Master forms use the **Window** menu and select **Tile** or **Cascade** to organize all open forms in the work area.

   When you are working with multiple students, ensure that the correct form is current (active). The name of the current student is always shown in the Recent Students text box. The title bar of the active form is always a different color than other forms which may be open in your work area.

3. To edit the information on the form, click **Edit**. See Edit a Student Master.

   Required fields on the form have a background color other than white. If a required field is blank, you must enter data in it when you edit the form, even if you did not intend to provide the information when you clicked Edit.

   Some fields are required by CampusNexus Student (Last Name, First Name, Lead Date, Admissions Rep). Additionally, your institution may designate other fields as required. The system administrator can mark fields as required in either of two ways.

- Open any Student Master (or Quick Lead) form and go to Setup > Required Fields.
- Designate the field as required in the Data Dictionary.

4. To add an activity from the Student Master form, click the **Add Activity** icon at the bottom right of the form. The Activity form is displayed.
5. Click **Close** (Ctrl+F4) to close the active Student Master form. If you are in edit mode when you click Close, you are prompted to save any changes.

Duplicate Student Records

CampusNexus Student checks for duplicate Student Master records when new leads or students are added. The following table columns are used to check for duplicates:

- Student ID
- Social Security Number
- Phone Number
- Date of Birth and Student Name (combined)
- Driver's License Number
- E-mail address.

Each check is performed only if you entered data in the corresponding field. If at least one match is found, a grid showing the matches is displayed

If the lead is a duplicate and can be found on the grid, click the record and the lead form is populated with the information for that lead. The information can then be edited. The campus for the lead can be changed only if the campus ID for the record from the grid is in the list of campuses to which you have access.

Inquiry

Any time a prospective student inquires about possible enrollment, or any time a student or lead record is first created, an inquiry record is created and the information is tracked within CampusNexus Student.

This tracking of inquiry information can be enabled or disabled for each campus under Setup > Campus Locations > Add/Edit Campus > Allow (tab) > Student Inquiries. To track information about multiple inquiries, the 'Track Multiple Lead Inquiries' option must be selected on the Allow (tab). The most recent inquiry record on file is displayed on the Student Master form and in associated reports. Lead inquiries can be tracked by comparison against the Lead Date or the Last Activity Date; the lead inquiry becomes a New Inquiry if its comparison date exceeds the number displayed in the 'New Inquiry if this many days since comparison date' field.

Note: The Inquiry form allows system administrators and users with appropriate permissions to configure field level security via Setup > Field Level Security when the form is active.

Inquiry Record Data Elements and Business Processing

Each inquiry record stores the following data elements:

- Lead Date
- Campus
- Lead Sources
- Response Phone
- Response Time
- Response Date
- Lead Type
- Programs of Interest
- Last Activity Date
- Status
- Admissions Rep and Original Admissions Rep
- Admissions Rep Assignment History
- Contact History Activities

If a student has more than one inquiry record on file, information from the most recent inquiry record is displayed on the Student Master form. The most recent inquiry record is the record with the highest lead date.

You can add a new inquiry record for an existing student and you can edit any existing information on an inquiry record. You can also delete an inquiry record if there is at least one other inquiry record on file for the student. A warning message is displayed if there is any data in other tables related to the inquiry record when attempting to delete that record.

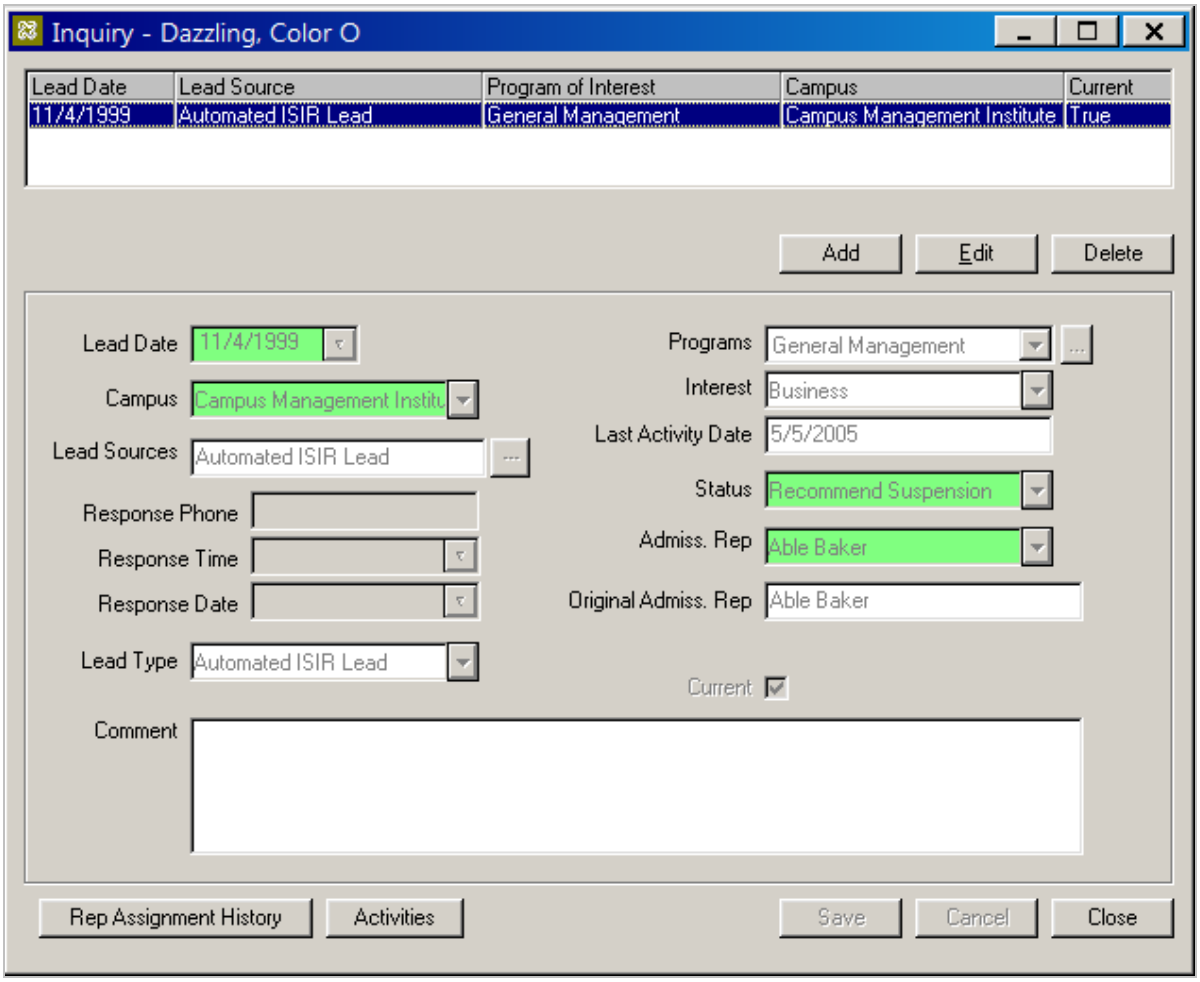
Information for the most recent inquiry can be modified by editing the inquiry information on the Student Master form. The inquiry data on the Student Master record is moved to the inquiry table when a new inquiry record is added for a student and the lead date of the inquiry event added is more recent than the lead date stored on the Student Master record. The inquiry data on the Student Master record is updated with the data from the next most recent inquiry when the most recent inquiry is deleted.

You can assign Contact Manager activities to a specific inquiry record and view Contact Manager activities specific to each inquiry record for a student. Activities that are triggered off a data change on the Student Master record are assigned to the most recent inquiry event.

Logic for Do Not Call uses the lead date from the most recent inquiry event when determining if a prospective student can be contacted.

To view, add, or edit an inquiry:

1. Select a student.
2. Navigate to **View > Admissions > Inquiry**. The Inquiry form is displayed.



3. Click **Add**, or select a record and click **Edit**.
4. In the **Lead Date** field, enter the date of the inquiry.
5. The **Last Activity Date** displays the date when the last change to the inquiry record was made. This date may be different than the Last Activity Date shown on the Student Master form.
6. Select the **Campus** that the student was inquiring about.
7. Select the lead/student's **Status**.

   The system category and system status for applicant processing is *Being Processed*. The school status of *APPREC* is mapped to this system status category. Additional school statuses can be configured and mapped to this status category. You can specify allowable status transitions for any of the Applicant Processing school statuses.

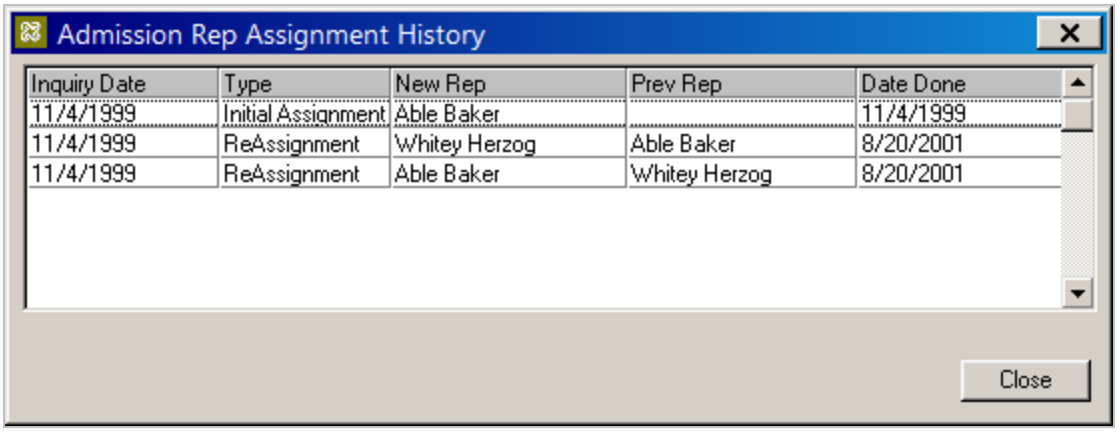
   An applicant's record is converted to an enrollment when a student's school status is changed from a *Being Processed* system status category to an *Attending* system status category.

   You can also configure a list of applicant types. An applicant type can be assigned to each applicant record created.
8. Select the method by which the student heard about your institution from the **Lead Sources** list. If you select a

lead source that has the 'Capture Advertising Information' property selected, the following fields are displayed: Response Number, Response Time, and Response Date. These fields capture additional advertising information for each inquiry, enabling institutions to better analyze their advertising projects.

Note: The Response Number, Response Time, and Response Date fields are displayed on the Student Inquiry form only if *Track Multiple Lead Inquiries* and *Capture Advertising Information*are selected on the Lead Sources Code Setup form (List > Admissions > Lead Sources > Add/Edit Lead Source > Lead Sources Code Setup).

9. Enter the **Response (phone) Number** and select the correct **Response Time** and **Response Date**.
10. Select the admissions representative for the lead/student from the **Admiss. Rep** list.
11. Select the lead type for the lead/student from the **Lead Type** list.
12. The **Original Admiss. Rep** field displays the first admissions representative assigned to the student.
13. Select the programs of study in which the lead/student is or wishes to be enrolled from the **Programs** list.
14. The **Zone** field, if enabled, shows the current zone for this student. Zone is determined by calculating the direct line distance between the ZIP code of each campus and the ZIP code of the student's address.
15. Select the program group in which the lead/student is interested from the **Interest** list.
16. Select the **Current** check box to indicate that the information being displayed is the current inquiry information.
17. Enter any comments in the **Comment** field.
18. Click **Rep Assignment History** to view a form that displays the history of admissions representative assignments for the selected student. Each assignment is shown on a separate line and indicates the type of assignment, the new representative, the former representative, the date done, and the effective date of the reassignment. Click **Close** to close the form.



19. Click **Activities** to view the Contact History form that displays a list of outstanding activities (contacts) related to the student. Click **Close** to close the form.
20. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Applicant

Applicant Record Data Elements and Business Processing

To better track the application process for students, a separate applicant record is created for each student when the student's school status is changed from Lead system status category to a Being Processed system status category. The status is tracked in CampusNexus Student. Contact Manager activities are triggered when the applicant status changes without disturbing the current enrollment data for the student.

You can enter and save enrollment specific data for an applicant record prior to the record becoming an enrollment. The data that can be tracked for an applicant are all enrollment dates (Expected Start Date, Application Received Date, Expected Graduation Date, etc), program version information, and status history.

You can also specify the applicant type for each applicant record created.

Additionally, you can convert an existing applicant record (if one is on file for the student) into an enrollment when running the enrollment wizard.

If the applicant information is converted during the enrollment process and awards have been packaged, the award information should be reviewed and adjusted by an FA officer as needed. There are several processes or user actions that can take place which would change the academic year / loan period dates of the sequences on the student's enrollment and they may no longer match the dates of the awards. Accepting transfer credits and changing the expected start date during the enrollment process are two examples that affect dates of academic years.

You can assign Contact Manager activities to a specific applicant and enrollment record and view Contact Manager activities specific to each applicant and enrollment record for a student. All enrollment-based scheduled activities are evaluated and activities automatically scheduled when pertinent data is changed on an applicant record.

You can assign documents to a specific applicant record and view documents specific to each applicant record for a student. All enrollment-based document schedules are evaluated and correctly auto schedule documents when pertinent data is changed on an applicant record.

You can post status changes and view a status history for each applicant record. If the applicant record converts to an enrollment, the applicant status history becomes part of the enrollments record's status history.

Note: When values for the fields **Program Version**, **Enrollment Status**, and **Expected Start Date** have been entered,CampusNexus Student automatically creates a financial aid academic year for the applicant. This information can be viewed under **View > Financial Aid >** Packaging for the applicant.

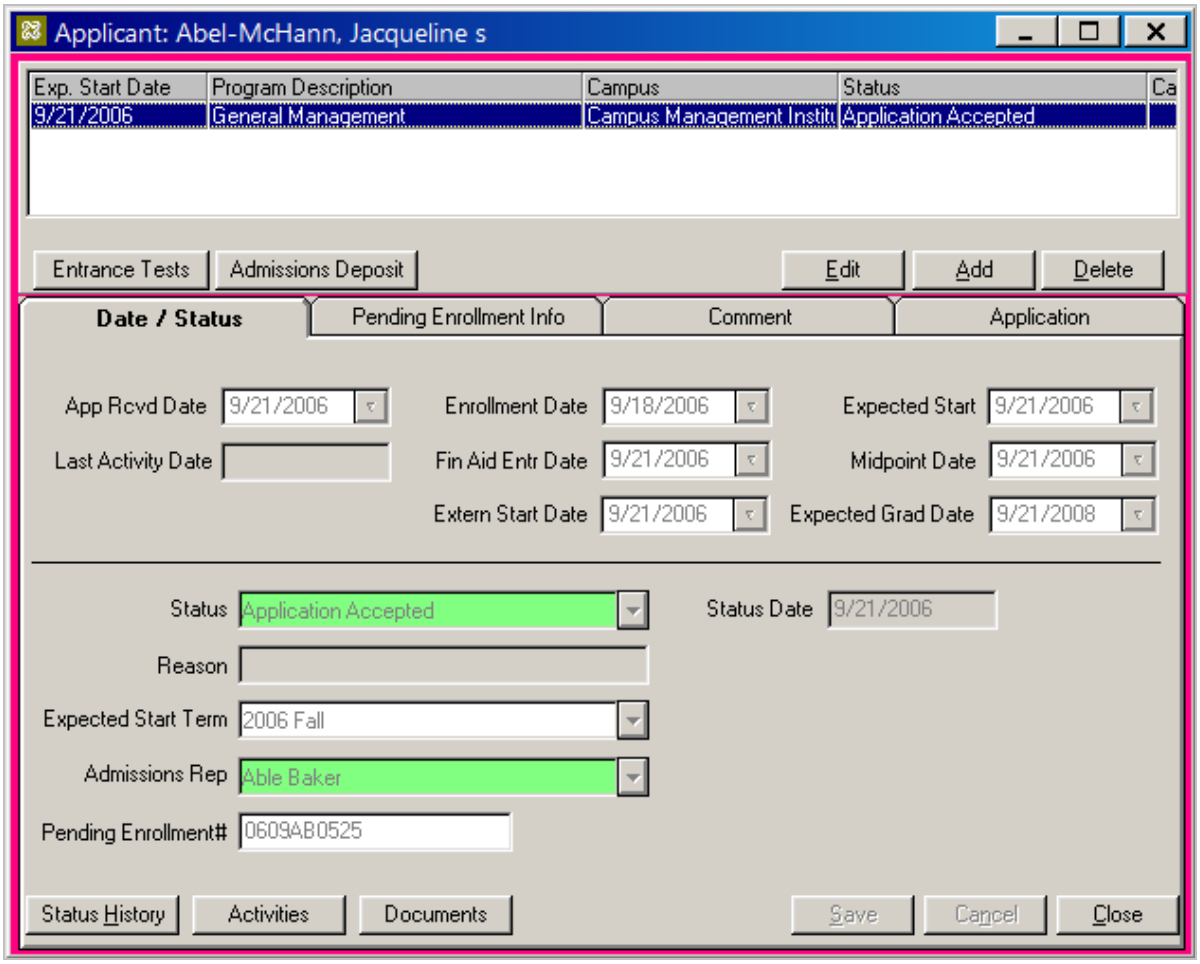
See also Entrance Tests, Admissions Deposit, Status History, Activities, Documents.

To go directly to the tabbed information, click here:

To manage applicant data:

1. Navigate to **View > Admissions > Applicant**. The Applicant form is displayed. It contains the following tabs: Date/Status, Pending Enrollment Info, Comment, and Application.
2. **Date/Status tab**:

   Click **Add**, or select a record and click **Edit**.



3. Complete the fields on this form as needed.

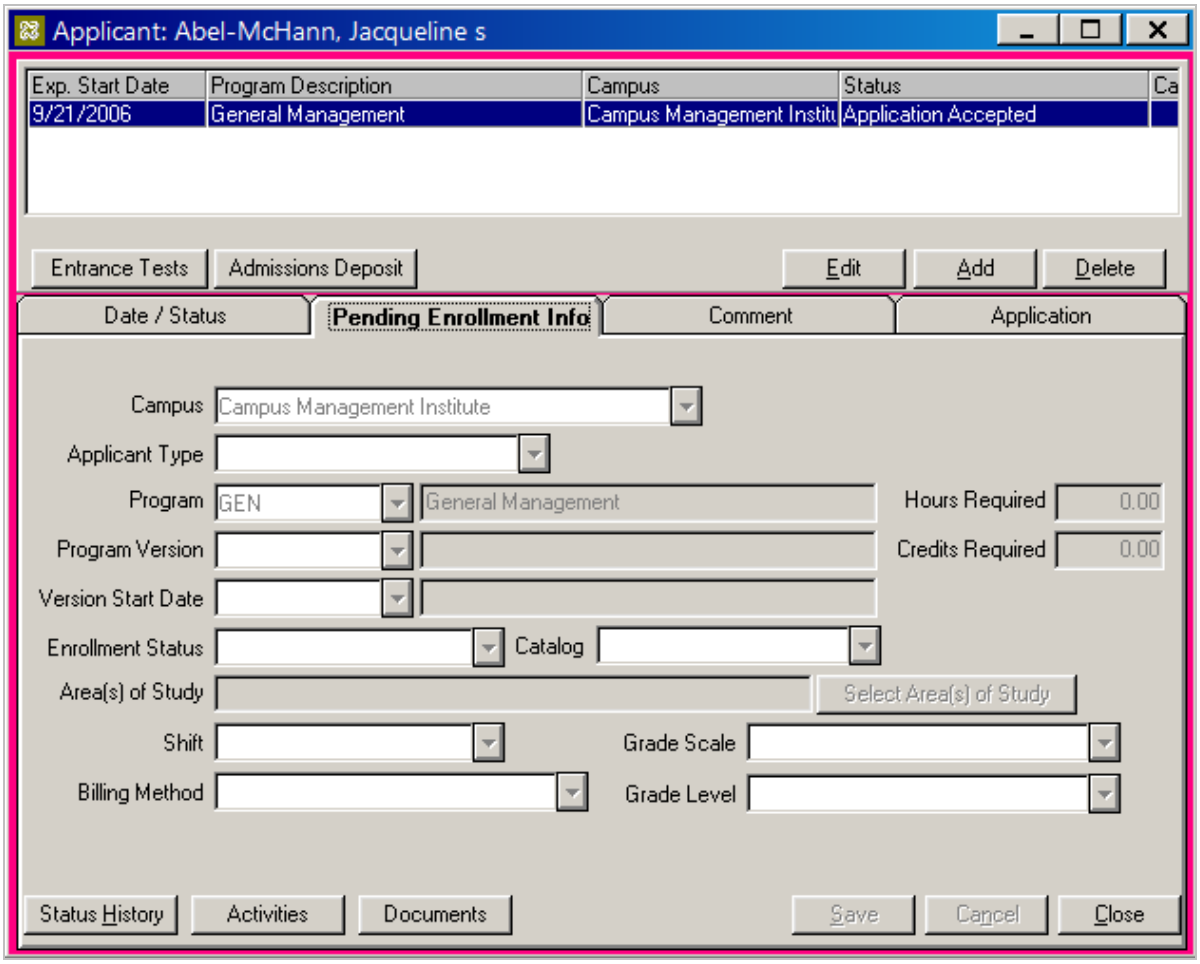
Field Descriptions

Field	Description
App Rcvd Date	Enter or select the date when the application was received.
Enrollment Date	Enter or select the enrollment date for the applicant.
Expected Start	Enter or select the date when the applicant expects to start the next enrollment.
Last Activity Date	This read-only field shows the date when the last activity occurred.
Fin Aid Entr Date	Enter or select the date when financial aid was entered for this applicant.
Midpoint Date	Enter or select the estimated midpoint date for the program version on the listed start date.
Extern Start Date	Enter or select the date when the applicant can begin an externship.
Expected Grad Date	Enter or select the date when the applicant is expected to graduate from the current program.

Field	Description
Status	Select the application status from the drop-down list.
Status Date	The date displayed is the date when the status last changed.
Reason	This read-only field shows the reason text associated with the last status change.
Expected Start Term	Enter or select the term which the applicant is expected to start.
Admissions Rep	Select the admissions representative for this applicant.
Zone	The Zone field, if enabled for this user, shows the current zone for this student. Zone is determined by calculating the direct line distance between the ZIP code of each campus and the ZIP code of the student's address.
Pending Enrollment #	Each application is assigned a unique Pending Enrollment number that is displayed in this field.

4. Click **Save**.
5. **Pending Enrollment Info tab**:

   Use the Pending Enrollment Info tab to record information about the applicant's pending enrollment. This information is updated automatically when the applicant is converted to an enrolled status.



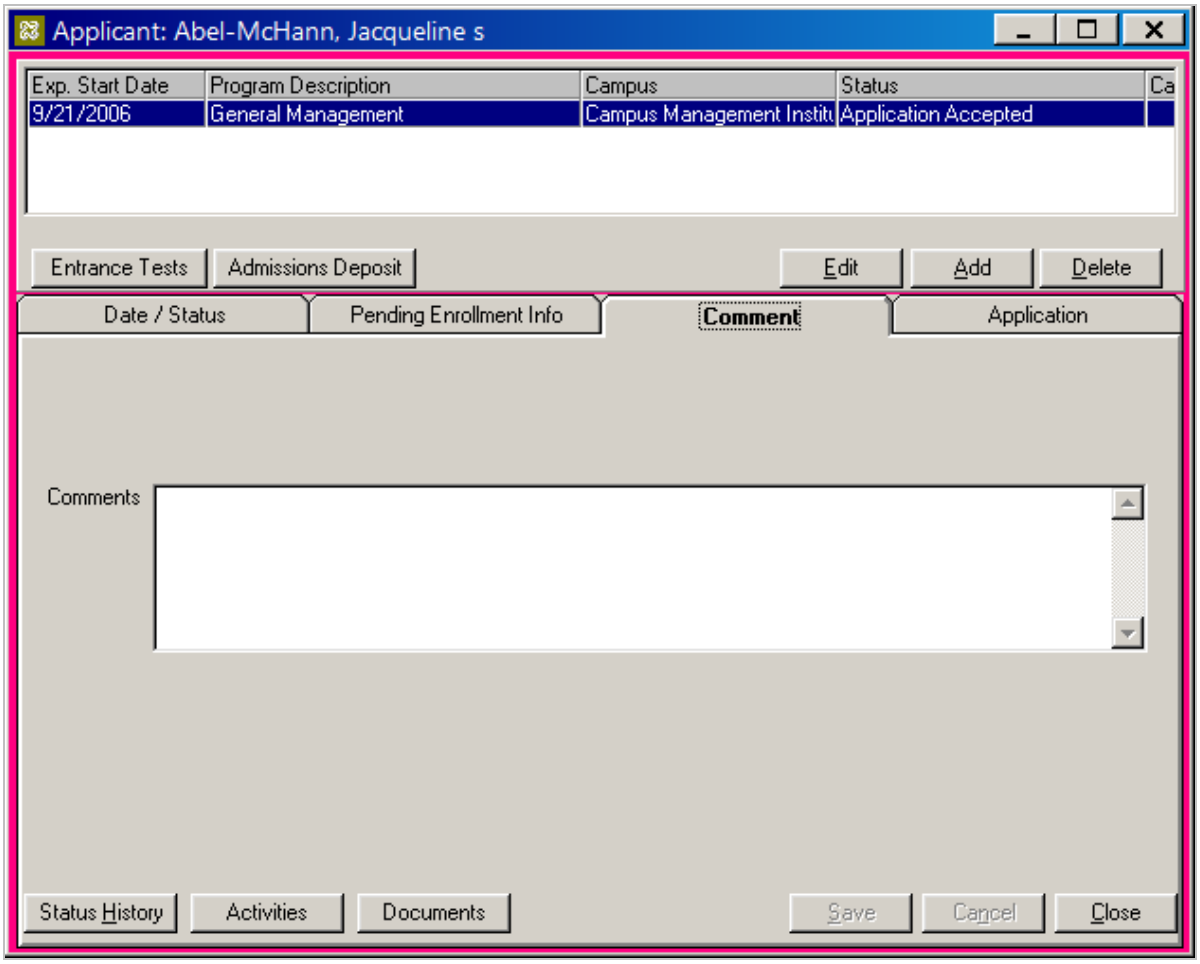
6. Complete the fields on this form as needed.

Field Descriptions

Field	Description
Campus	The current campus assigned to the applicant is displayed in this field.
Applicant Type	Select an Applicant Type from the drop-down list of applicant types. **Note**: If you select the same Applicant Type in the Applicant Type list on which the Schedule Documents activity is created, all the documents (which are added to the Schedule Documents at the time of creation of Document Scheduler) are assigned to the applicant. Additionally, the activity can be triggered when the desired Applicant Type (in the Pending Enrollment Info tab) is assigned to the applicant. On Date/Status tab, you can also schedule the activity for this Status. If two different activities are scheduled for these two lists, and both of them have some common documents in it, CampusNexus Student first checks if the same document is attached to the student. If this document is already attached, there is no need to add the same document again; if the document is not assigned to the student, the document will be assigned to the student.

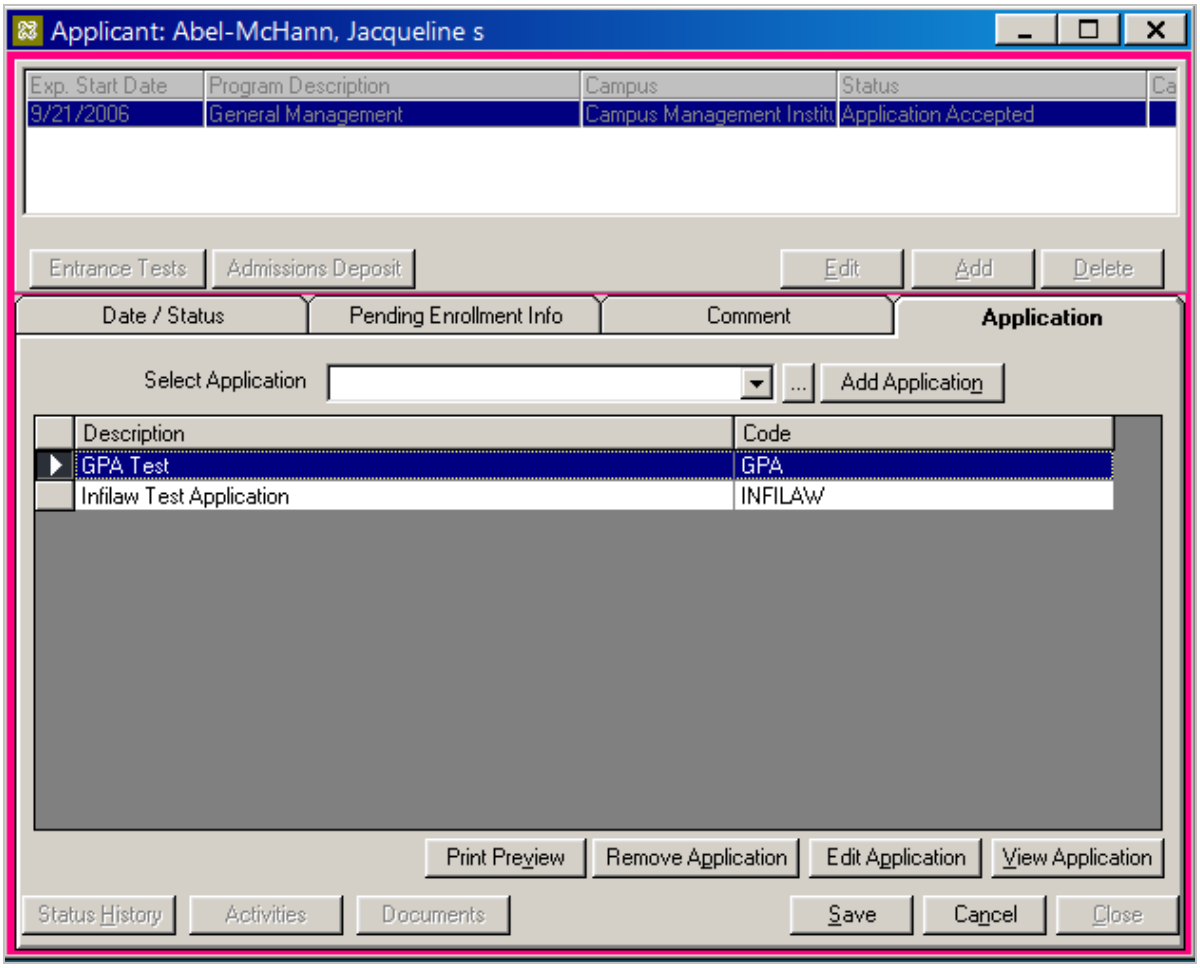
Field	Description
Program	If the applicant's program is known, it can be entered or selected here.
Program Version	If the applicant's program version is known, it can be entered or selected here.
Hours Required	This read-only field shows the hours required when the program is selected.
Credits Required	This read-only field shows the credits required when the program version is selected.
Version Start Date	The program version start date presented in the Version Start Date list represents the student's enrollment program version start date for the student's enrollment campus.
Enrollment Status	Select the enrollment status from the list.
Catalog	Select the catalog from the list.
Shift	Select the shift (Day, Night, or Weekend).
Grade Scale	The grade scale can be entered or selected here.
Billing Method	The billing method can be entered or selected here.
Grade Level	The grade level can be entered or selected here.

7. Click **Save**.
8. **Comment tab**:



9. Enter any comments in the **Comment** field.
10. Click **Save**.
11. **Application tab**:

    Select the student's Program Version and click **Edit** in the top portion of the screen. The available applications are enabled.



12. Select an application and click **Edit Application**. See Admissions Application for application setup instructions.
13. Fill out the student's application and click **Submit**.
14. A confirmation message is displayed. Click **OK**. The Application Status field now contains a Complete value.
15. Click **View Application** to view the applicant's responses to the application at any time.
16. Click **Print Preview** to view the Student Application in the Report Viewer.
17. Click **Remove Application** to remove an application.
18. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Education

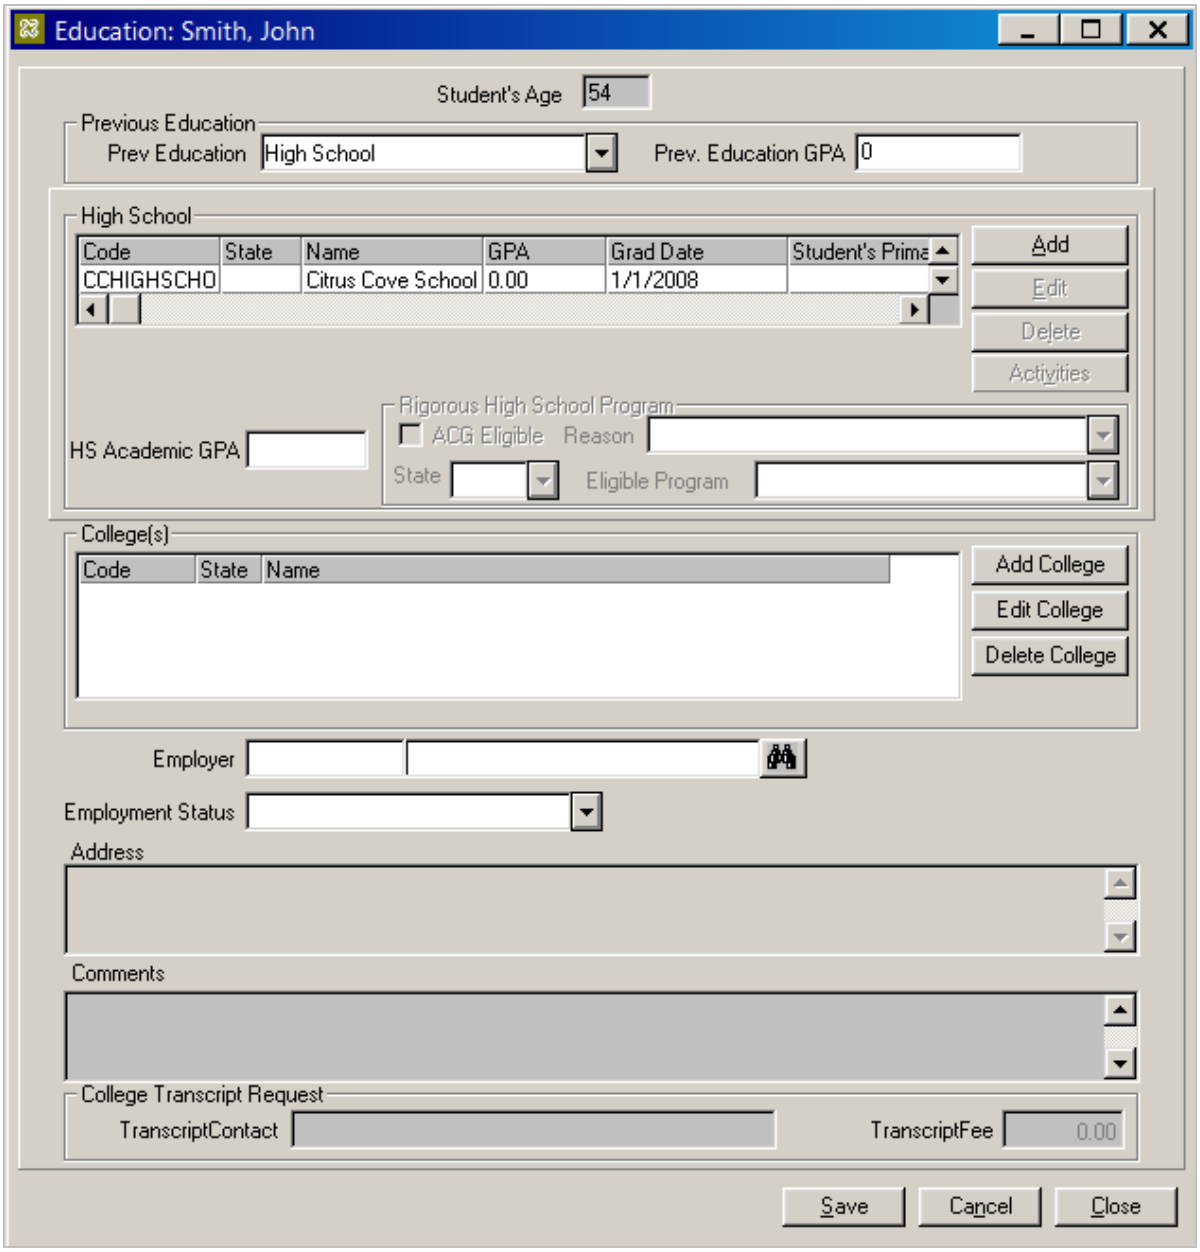
Use the Education form to record data related to the student's education and employment history.

Note: The system administrator must set up security rights for staff members to use the Add College, Edit College, and/or Delete College button on this form.

To set up the permissions as administrator, navigate to **Setup > Security**, select a Staff Group within the Manage Group Access form, click **View**, scroll down to the Admissions section and locate the security settings in the Education row. Within the Education row, select Edit, Add, and/or Delete allow a staff group access.

To edit the student's Education form:

1. Select a student.
2. Navigate to **View > Admissions** > **Education**. The Education form is displayed.



3. Select the student's previous education from the **Prev Education** list.

   In addition to the other configured options for Previous Education (e.g., College Graduate, Doctorate, GED, High School, Masters Degree, Some College), you also need to enter and save *Ability to Benefit* (ATB) information, which must be transmitted to COD for students admitted based on their ability to benefit.

   When Ability to Benefit is selected from the Prev Education list, the High School panel of the Education form is replaced by the Ability To Benefit panel. Here, you can enter the following information as called for in the COD requirements:

Field Descriptions

Field	Code	Description	Valid Completion Date
Tests Administered	01	ASSET Program> Basic Skills Test	November 1, 2002 to October 31, 2015
	02	Career Program Assessment (CPAt) Basic Skills Subtests	November 1, 2002 to June 30, 2015
	03	Combined English Language Skills Assessment (CELSA)	November 1, 2002 to Present
	04	Compass Subtests (COMPASS)	November 1, 2002 to October 31, 2015
	05	Computerized Placement Tests (CPTs) / ACCUPLACER	November 1, 2002 to Present
	06	Descriptive Tests: Language Skills and Mathematical	November 1, 2002 to April 27, 2007
	07	ESL Placement Test (COMPASS/ESL)	May 19, 2006 to October 31, 2015
	08	Wonderlic Basic Skills Test (WBST)	November 1, 2002 to Present
	09	WorkKeys Program	March 11, 2005 to June 30, 2015

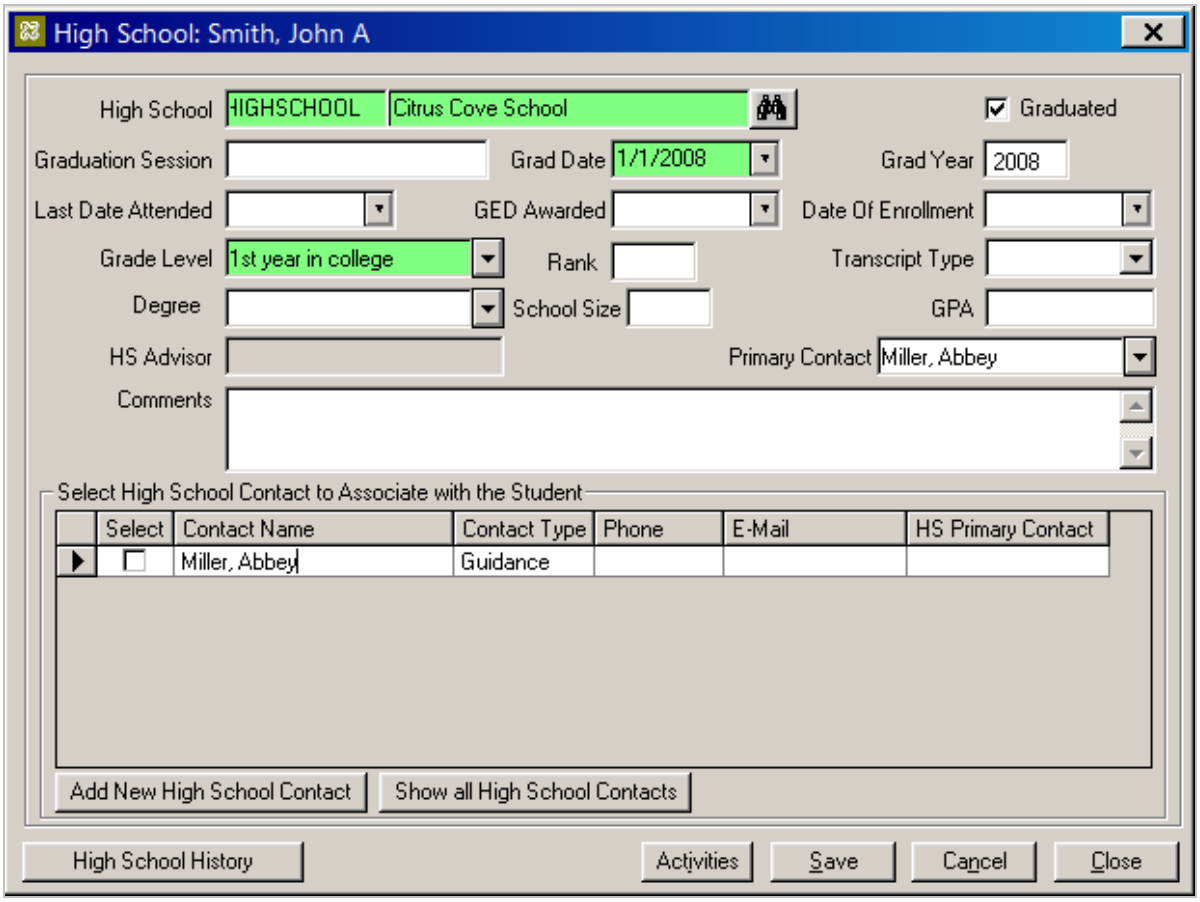
Validation checks are performed on the Ability To Benefit fields before changes are saved to the database. To remove a previously saved ATB record for a student, you must first select [BLANK] for the Ability To Benefit Code and then click **Save** to have the entire ATB record removed from the database.

Important: ATB codes 3 and 5 are no longer valid, and you will only see these codes if the student had been configured with them previously. If you try to submit a student for COD processing with previously configured ATB codes of 3 or 5, an exception is generated.

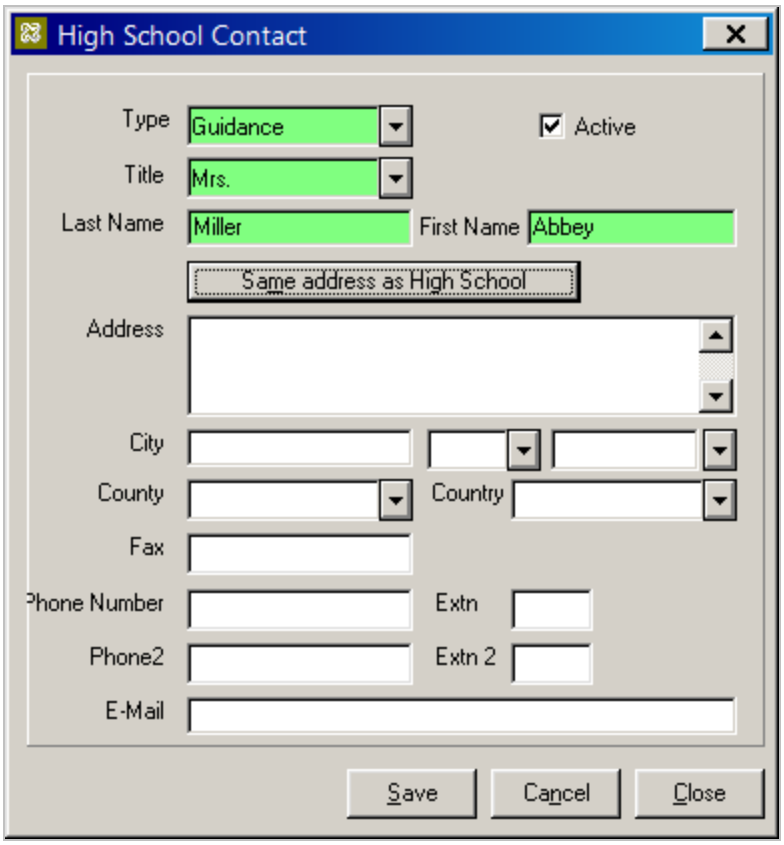
4. Enter the student's grade point average in the **Prev. Education GPA** field.
5. To add or update a high school for a student, click **Add**, or select a record and click **Edit**. The High School form is

displayed.



6. Click to find a high school.
7. Select **Graduated** to indicate that the student graduated. A GED does not qualify as graduation, so the box would be cleared in that case.
8. In the **Graduation Session** field, enter the name of the session when the student graduated, such as Spring, Fall, and so on.
9. In the **Grad Date** field, enter or select the date the student graduated from high school.
10. Press the **Tab** key to automatically fill in the **Grad Year** field based on the graduation date. Or, if the graduation date is unknown, enter or select the year the student graduated in the Grad Year field.
11. In the **Last Date Attended** field, enter or select the date when the student last attended school.
12. In the **GED Awarded** field, enter or select the date when the student received the GED.
13. In the **Date of Enrollment** field, enter or select the date of the student's enrollment.
14. Select the **Grade Level** the student has achieved so far.
15. In the **Rank** field, enter the number of the student's graduating rank.
16. Select the **Transcript Type**. The options are **Unofficial**, **Partial**, or **Official/Final**.
17. Select the student's **Degree**.

18. In the **School Size** field, enter the total number of graduates in the student's class.
19. Enter the student's **GPA**.
20. The **HS Advisor** field is a read-only field.
21. Select a **Primary Contact**.
22. Click **Add New High School Contact**. The High School Contact form is displayed.

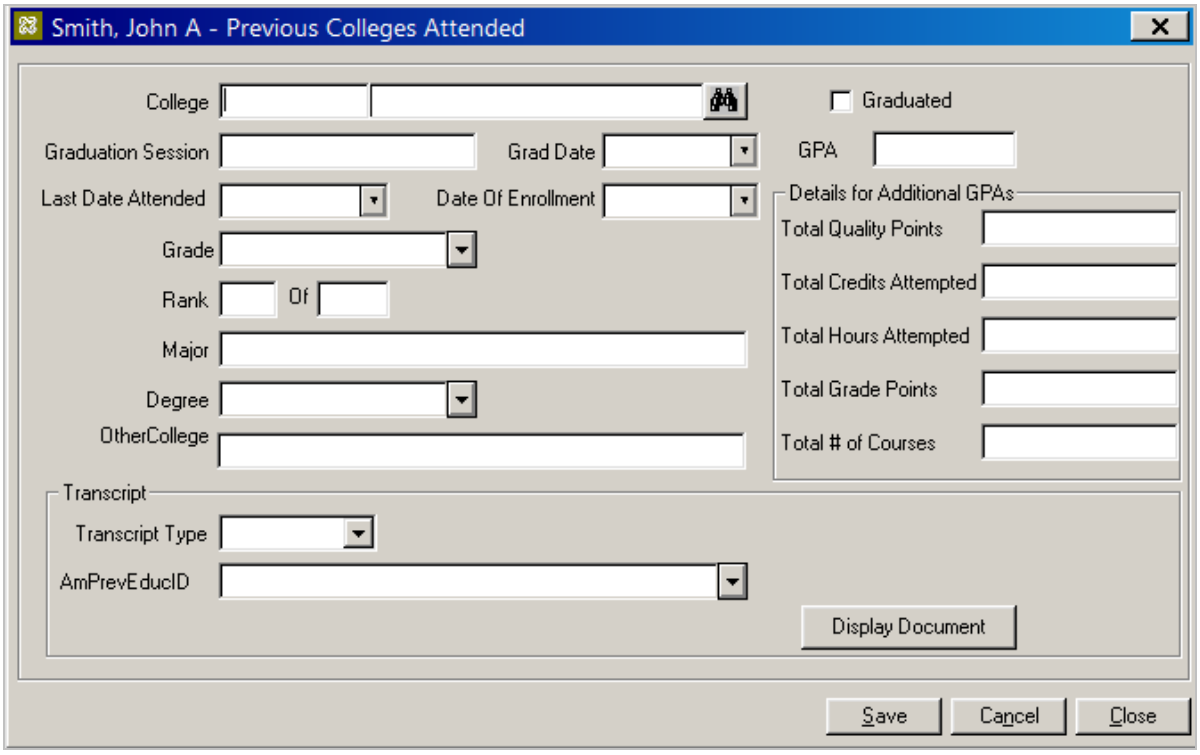


23. Add at least one contact. Specify the **Type**, **Title**, **Last Name**, and **First Name**. If the contact's address is the same as the high school, click **Same Address as High School** to copy the high school address on file to the appropriate fields.

    Note: To change information about an existing High School Contact, navigate to **Daily > Admissions > High Schools**.
24. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the High School form.
25. To view existing or add new high school activities, by select a high school record and click **Activities**.
26. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Education form.
27. The **HS Academic GPA** field is used exclusively for HOPE eligibility and awarding purposes.
28. The **Rigorous High School Program** section is disabled unless the student applies for an ACG grant. See also

Awards and Packaging.

29. Click **Add College** to add the student's previously attended college. Select a college from the list and click **Edit College** to modify an existing previous college attended. The Previous Colleges Attended form is displayed.

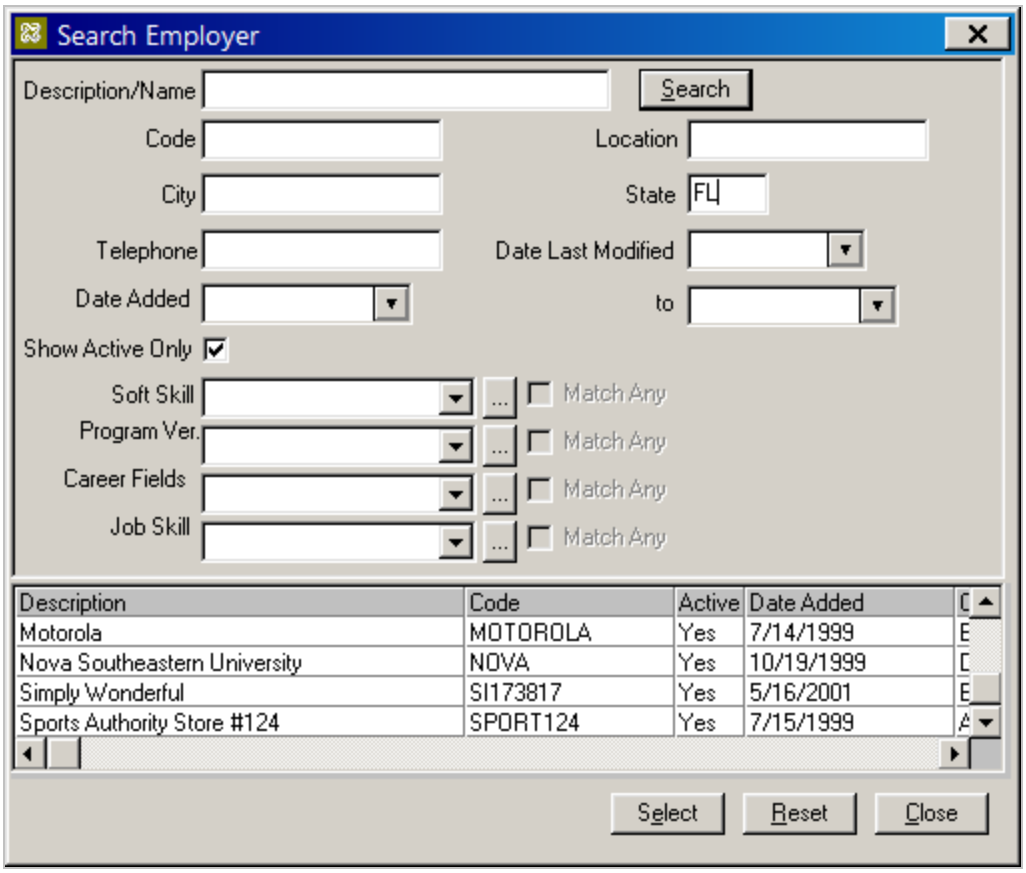


30. The Previous Colleges Attended form includes a **Details for Additional GPAs** area.
    - If you are calculating weighted GPAs, enter a sum **Total of Quality Points** a student earned at the previous college.
    - If you are calculating unweighted GPAs, enter the number of **Total Grade Points** the student has on the previous college transcript.
31. Enter the **Total Credits Attempted** from the student's unofficial or official transcript.
32. Enter the **Total Hours Attempted** from the student's unofficial or official transcript.
33. Enter the **Total Grade Points** and the **Total # of Courses** from the student's transcript.
34. Select a document and click **Display Document**. If no attachment has been stored for this document, the following message is displayed: *"No attachment found for this document."* Otherwise, the name of the document is displayed.

    Note: This function works with and without ImageNow. If your institution has the necessary technology to scan or otherwise import images of student documents, you can load or scan them into the CampusNexus Student database. The document can be in any file format that can be processed by an application on your computer.
35. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Education form.
36. To remove a college, select a college record and click **Delete College**. A confirmation message is displayed. Click

Yes. CampusNexus Student checks if transfer credits exist for this college. If transfer credits are found for the selected college, the college will not be deleted.

37. Click to find the employer. The Search Employer form is displayed.



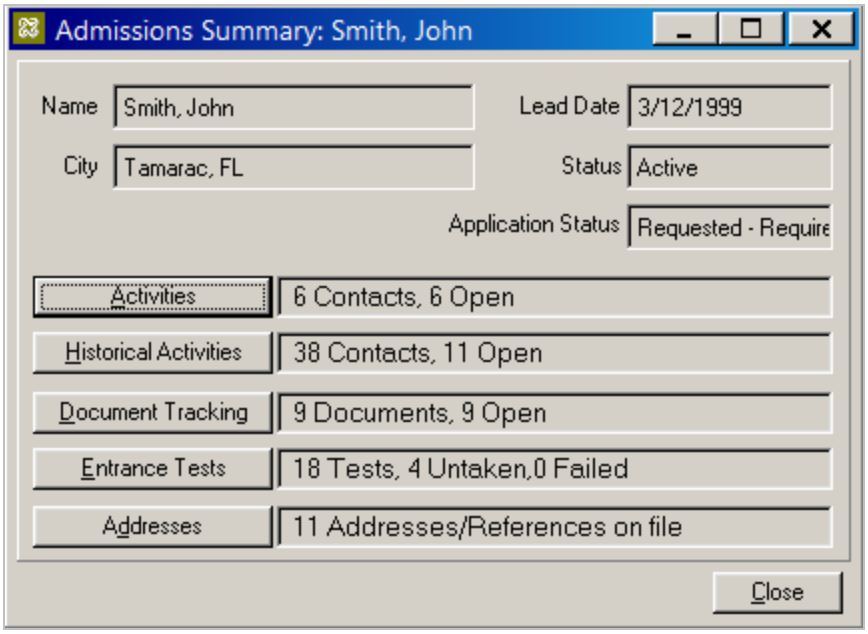
38. Enter any combination of search criteria and click **Search**. Select the student's employer from the search results. The employer's address and any associated comments appear in the **Comments** and **Address** fields on the Education form and the Search form is closed.
39. Select an **Employment Status**. The options are Full Time, Part Time, and Unemployed.
40. If a transcript request has been made, the **Transcript Contact** and **Transcript Fee** are displayed.
41. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Admissions Summary

The Admissions Summary form summarizes significant information about the selected lead (student). It displays statistics for activities, historical activities, document tracking, entrance tests, and addresses.

To view the admissions summary:

1. Select a student.
2. Navigate to **View >Admissions** > **Summary**. The Admissions Summary form appears. It displays the student's current application status. If more than one application is in Document Tracking, the status is displayed for the most recently added record.



3. Click **Activities** to view or edit the Current ab of the Contact History form.
4. Click **Historical Activities** to view the Historical tab of the Contact History form.
5. Click **Document Tracking** to view or edit the Document Tracking form.
6. Click **Entrance Tests** to view or edit the Entrance Tests form.
7. Click **Addresses** to view or edit the Addresses form.
8. Click **Close** to close the form.

Entrance Tests

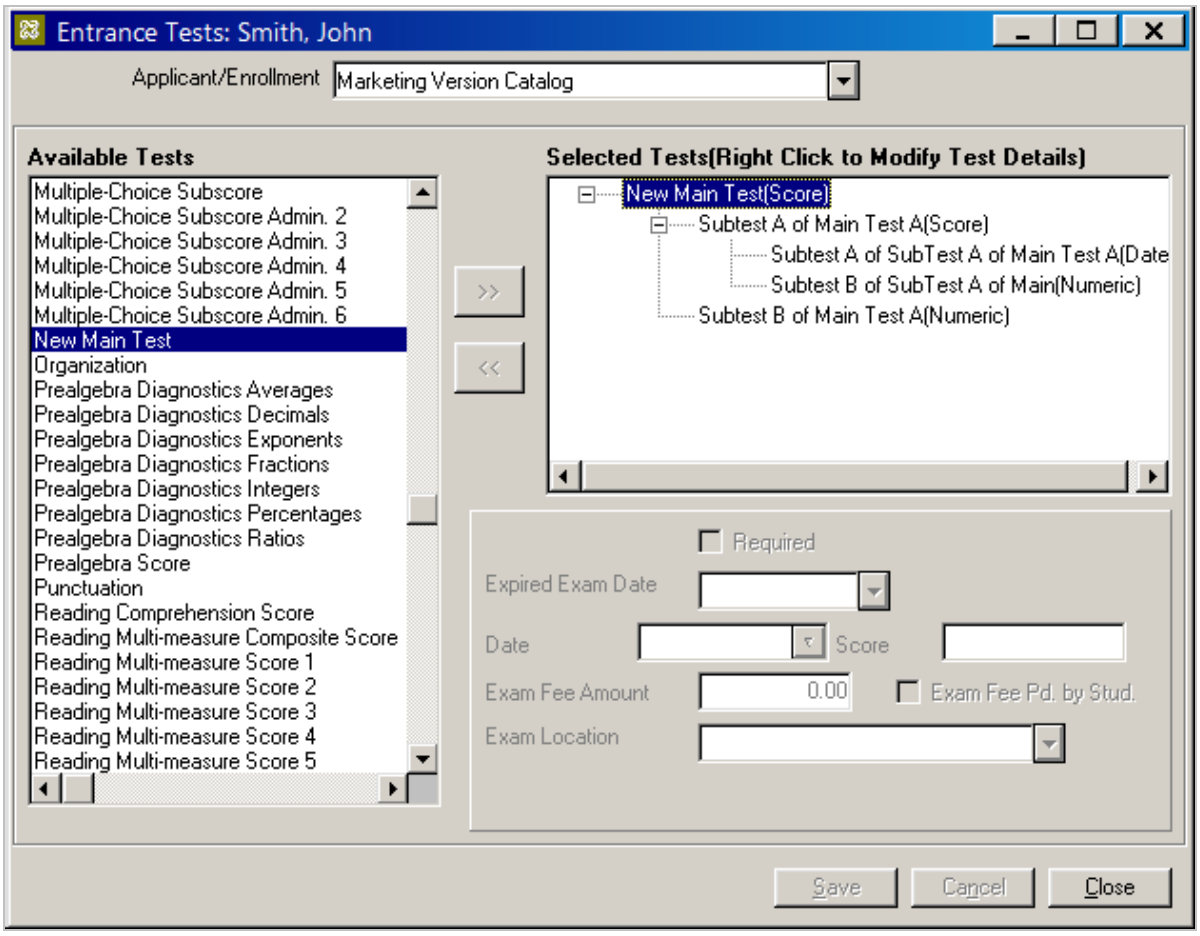
Some institutions require entrance tests that a student must take to gain entry into certain classes. A minimum score is usually established for the test and a remedial course assigned to the student's schedule if the student does not meet the criteria.

Some tests may appear on the Entrance Tests form as a result of your institution's enrollment policies. The list of tests that can appear is set up by the system administrator. You can add tests to the student's list, and edit or remove those that are already on the list. See also test setup, and program, program version, and agency and third party entrance test setup.

To add or edit an entrance tests associated with a student's record:

1. Select a student.
2. Navigate to **View** > **Admissions** > **Tests**. The Entrance Tests form for the selected student is displayed.

   Note: When an ACT test score is populated for the student, CampusNexus Student displays the equivalent SAT score of ACT score. This field is visible only when an ACT test is selected.



3. Select an **Enrollment** at the top of the form.
4. Select a test/field from the list of **Available Tests**. Click to move it to the **Selected Tests** field.

   Repeat this step until all required tests are selected.

5. To remove a test/field from the list, select it in the **Selected Tests** field, and click << to move it back to **Available Tests** field.
6. To edit a test/field, select the test/field, **right-click** in the **Selected Tests** field, and click **Edit**. The test detail fields below the Selected Tests field are enabled.

   a. Select **Required** if the test is required.
   b. In the **Scheduled Exam Date** field, specify the date when the exam was originally scheduled.
   c. In the **Date** field, specify the date when the student took the exam.
   d. In the **Exam Fee Amount** field, specify the amount of the fee to be paid by the student for the exam.
   e. Select **Exam Fee Paid by Student** if the fee was received.
   f. In the **Exam Location** field, select the location where the student takes the exam.
7. When you select a sub-test, **right-click** in the **Selected Tests** field, and click **Edit**, the panel below the Selected Tests field displays the following fields:
   - For a sub-test with a *Score* data type, the **Score** field is displayed.
   - For a sub-test with a *Numeric* data type, the **Value** field is displayed.
   - For a sub-test with a *Date* data type, the **Date Value** field is displayed.
   - For a sub-test with a *Text* data type, the **Text** field is displayed.

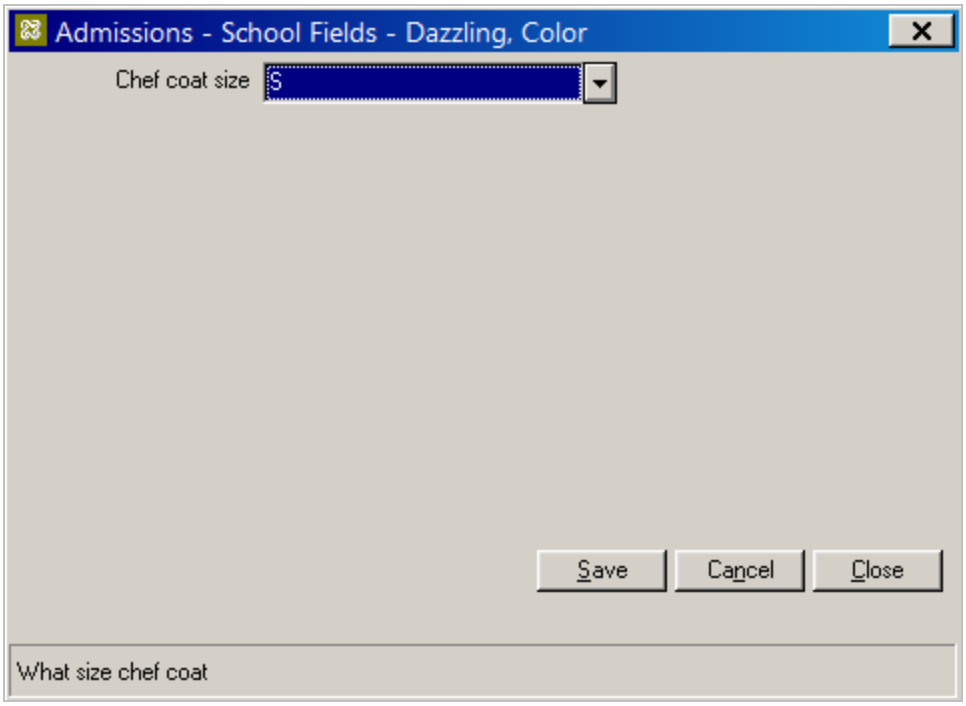
   Complete the fields on this form as needed.
8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

School Fields

School-Defined Fields are set up by your system administrator to collect information that is not required by the generic CampusNexus Student application. (See Setup > School Defined Fields.) The fields are organized by department during setup. At least one department has the authority to change each field. Some fields may be viewed but not edited in your department. A field may be flagged as confidential by the originator, i.e., not viewable outside of the department that is using it. For instance, if a field can only be viewed or edited by the Admissions Department, it will only be visible when the form is opened from View > Admissions > School Fields. If you do not have access to that menu option, you will not see this field.

To view or edit school fields:

1. Navigate to **View** > **Admissions** > **School Fields**. The Admissions - School Fields form is displayed.



2. Click on or tab to a field that you want to change. Select an option or enter data to edit the field.

   The fields are displayed in edit mode (white background) if your department has been given permission to change the data. Fields that are "dimmed" cannot be changed. Fields that are listed but are gray and show no data are simply not be filled in yet by the staff member responsible for doing so.

3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Audit

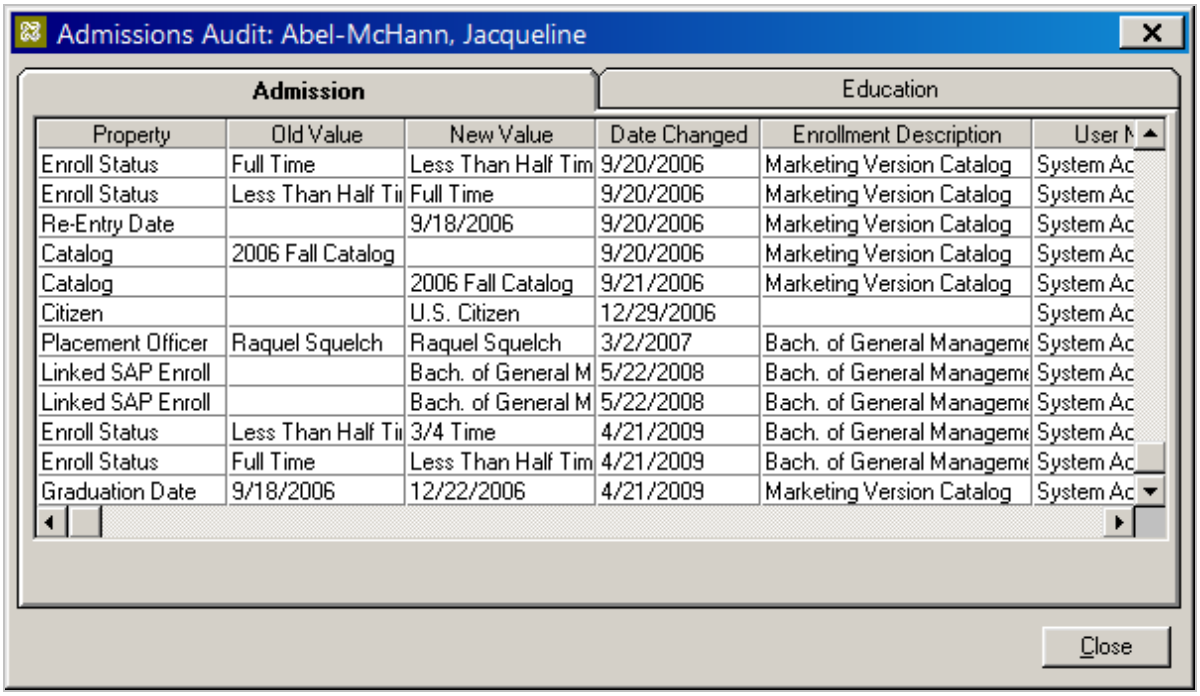
The Admissions Audit form displays a read-only list of changes to significant student record fields in the CampusNexus Student database.

Changes to the Student Number on the Student Master are recorded here. In addition, changes to 'Ethnic Group' categories associated with a student are also captured.

Note: 'Hispanic/Latino' information for a student is only audited when there is a change. An insertion or deletion of 'Hispanic/Latino' information is not audited.

To view the admissions audit for a student:

1. Select a student.
2. Navigate to **View > Admissions > Audit**. The selected student's Admissions Audit form is displayed containing a list of changes to Admission and Education information.



Note: A row is automatically added to the Admissions Audit for transfer enrollments that existed prior to implementing the Link SAP Enrollments enhancement. These record types are easily identified by the User Name *? System* and the Comment *Initial data population for SAP enrollment linking.*

3. Click **Close** to close the form.

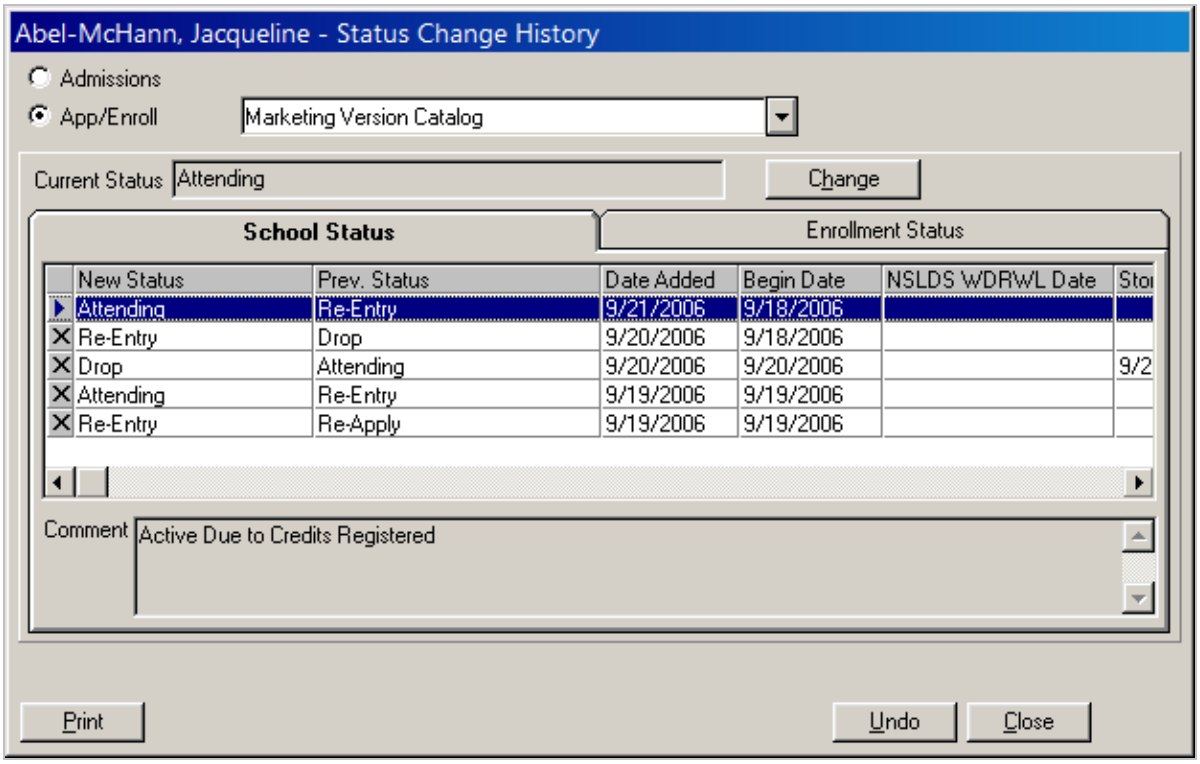
Status History

The Status History function provides a means of auditing changes in the student's status as the student progresses through the various phases of lead, active student, graduate, etc. Given the proper system permissions, you can view and print the history of status changes, make status changes, and even reverse a status change.

When a student's school status is changed to a "Never Attended" status category type (e.g., Cancel; No Show) and courses are removed from the student's schedule, Grade Audit and Course Status Change Audit records will be created.

To view or edit the status history for a student:

1. Select a student.
2. Navigate to **View > Admissions > Status History**. The Status Change History form is displayed listing all status changes for the selected student.



3. Select the **Admissions** or **App/Enroll** (Application/Enrollment) filter option. The Admissions option allows viewing only (Change button is disabled). The App/Enroll option allows viewing and editing (Change button is enabled). If you select the App/Enroll option, select an enrollment from the drop-down list.
4. The **School Status** tab displays the student's school-defined status changes. The **Enrollment Status** tab displays the student's enrollment status changes. Both tabs use columns defined as follows:

Status Column

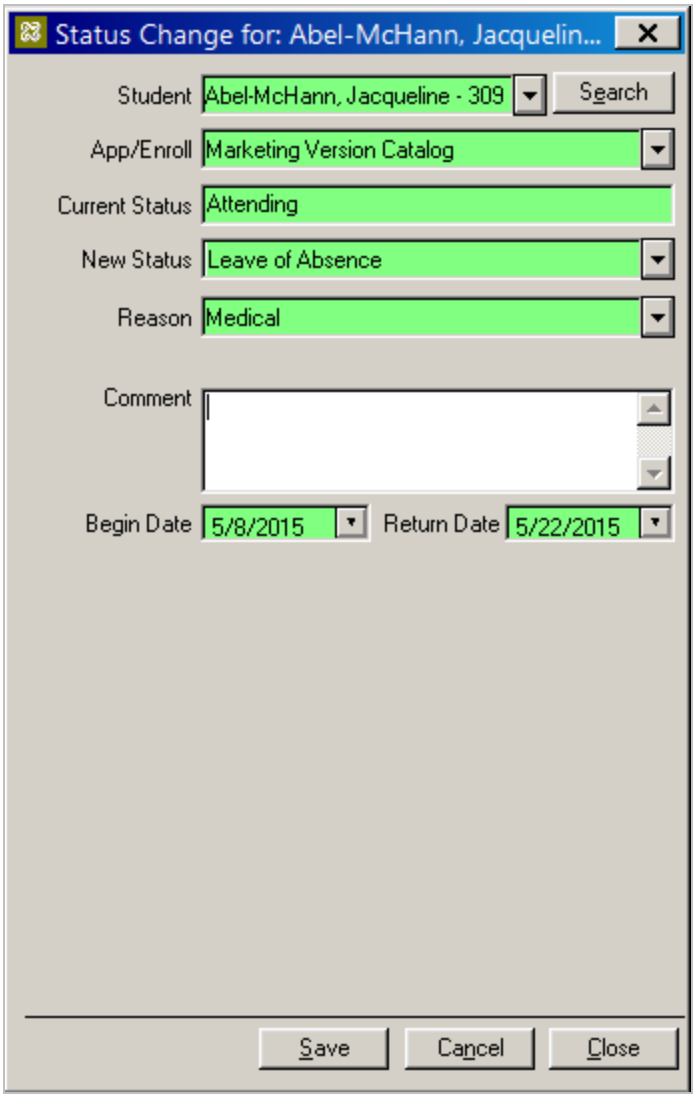
Column	Description
New Status	Status after the status change

Column	Description
Prev. Status	Status before the status change
Date Added	Date when the status change was entered
Begin Date	Date the status change becomes effective
Stored LDA	Last Date of Attendance
System User	Login ID of the person who made the status change
Reason	Reason why a student's status was changed
NSLDS WDRWL Date (School Status tab only)	Date reported as the effective date when a student withdrew from school in SSCR and Clearinghouse Reporting

Click each column heading to sort the data in a column. By default the latest change is displayed on top.

5. To change a status, click **Change**. The Status Change form for the selected student is displayed.

   Note: Changes can only be made if the App/Enroll option is selected. You cannot change Admissions statuses once the student is enrolled. CampusNexus Student allows only one status record for a date. If there is already a status record for a date, you must update the status rather than writing a new record.



6. Confirm the values in the **Student ID**, **App/Enroll**, and **Current Status** fields. Correct them if necessary.

   Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

7. Select the **New Status**. See Notes on Status Changes for further details.

8. Select a **Reason** if the Reason field is enabled for the new status.

   When you select a new status, CampusNexus Student checks if at least one row exists in the Reason table where the School Status ID equals the new status, and the Campus Group ID contains the campus in which the student is enrolled. If at least one row is found in the Reason table, the Reason field on the form is changed to the color that identifies required fields. The status update will not proceed when you click Save if the Reason field is left blank. If no rows are found in the Reason table, the Reason field remains disabled.

9. Enter any comments in the **Comment** field.

10. If a Drop Status was entered, additional fields are displayed. The **Withdrawal** Official/Unofficial check box must

have a selection and the **Date of Determination**, **LDA**, and **NSLDS WDRWL Date** fields must be filled in.

For information on how these dates are calculated and on how course status changes are determined when a student is dropped, see Notes on Status Changes.

11. Depending on the type of status change, the **Effective Date** field (also known as Begin Date) will be available. The default for this field is the current date.
12. Click **Save**.
13. To undo a status change, select the most recent change and click **Undo**. You cannot undo previous statuses. A confirmation message is displayed. Click **Yes**. The student is returned to the previous status.

    If you are canceling a student enrollment when the enrollment has courses associated with it, a message appears asking if you want to delete course associations for this student. If you answer **Yes**, the course associations and enrollment for this student are deleted. If you answer **No**, the course associations are not deleted and the student's enrollment is not cancelled.
14. Click **Print** to print a Status Change History Report.
15. Click **Close** to close the form.

Deposit

Accounting for deposits is maintained separately from other monetary transactions in CampusNexus Student. For example, in some institutions the Admissions department, rather than the Accounting department, is responsible for collecting deposits from leads that are submitting applications for enrollment.

Deposits do not appear on the ledger card until they are posted in the Student Accounts department. The menu option Daily > Student Accounts provides a form to post deposits to the student's ledger card. The menu option Reports > Admissions provides an Admissions Deposits report.

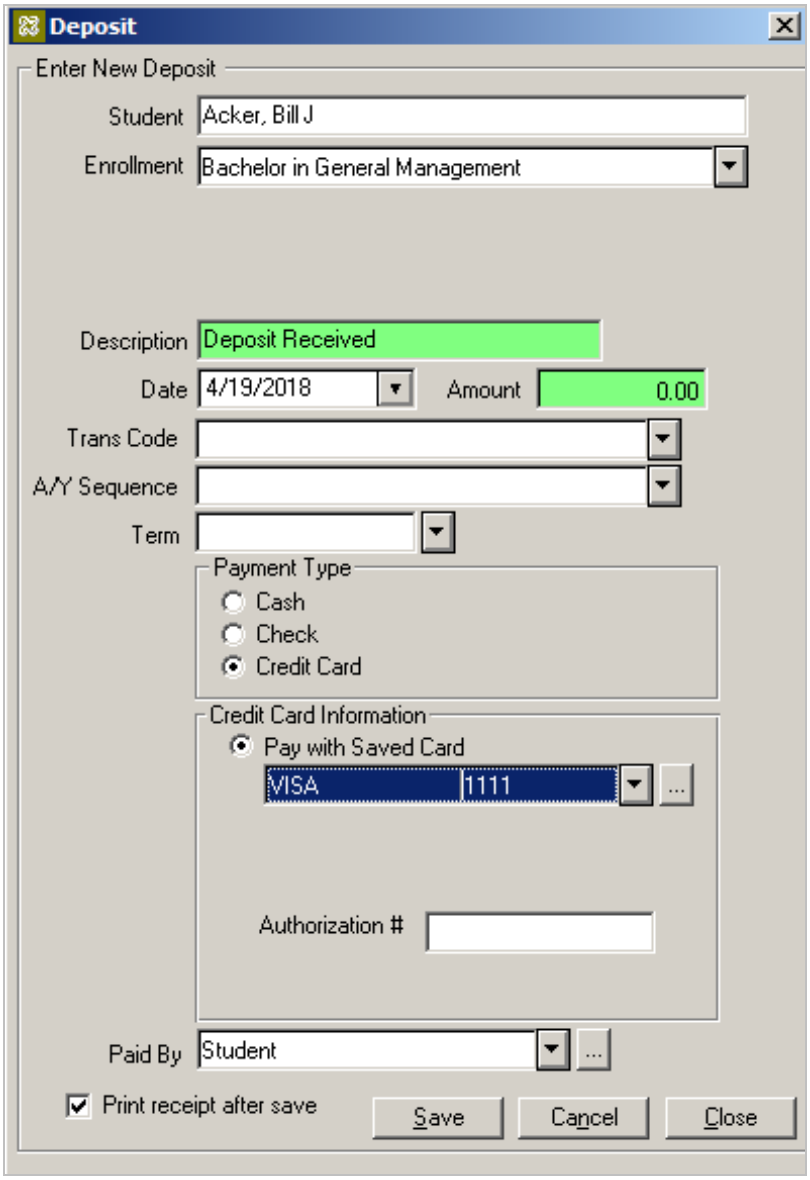
The Deposits Posting flag under Setup > Student Accounts > General tab determines the permissions to post deposits:

- If the flag is set to "Any Campus", you can post deposits for a student at any campus.
- If the flag is set to "Current Campus", you can only post deposits for a student at the "Current Campus". If you try to post deposit transactions for students at another campus, a message indicates that you are not signed into the campus and posting is not allowed.

To post a deposit:

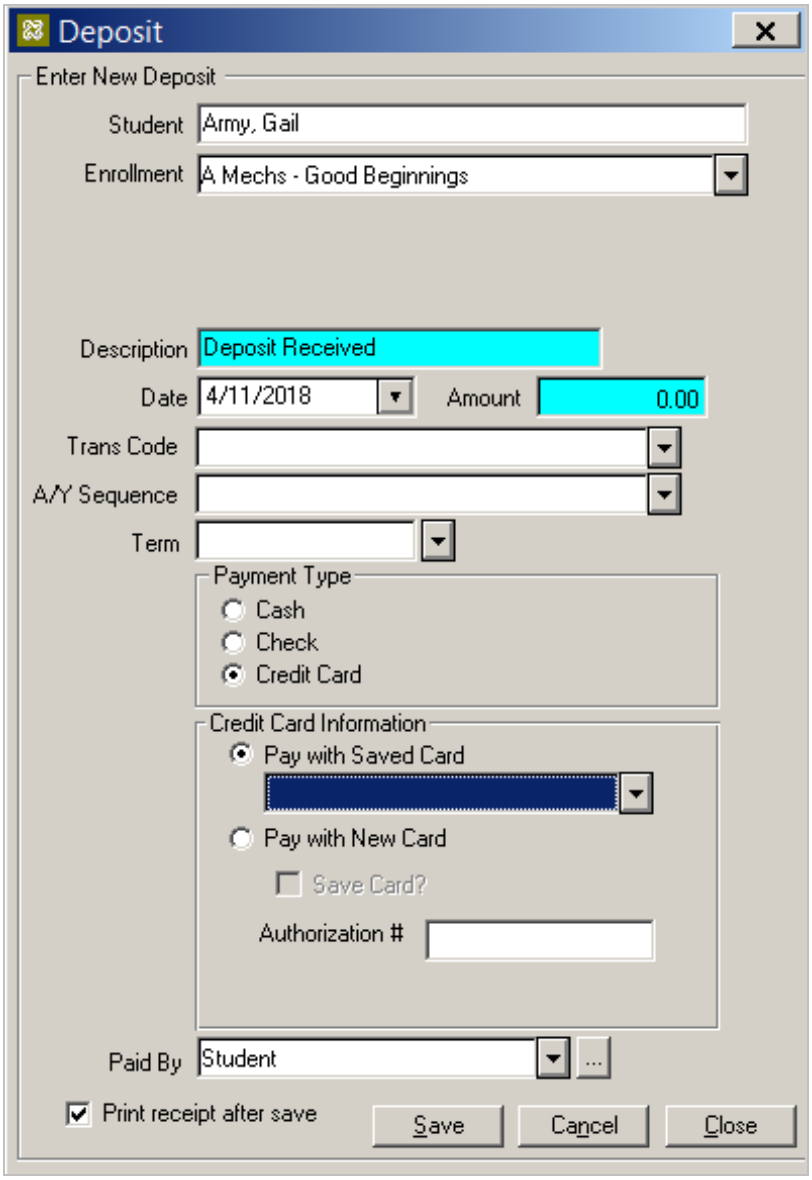
1. Select the lead or student from whom the deposit is to be posted.
2. Navigate to **View > Admissions > Deposit**.
    - If you are posting the first deposit for the student, the Deposit form is displayed.

      Note: If the student's campus is not configured to Verify Credit Card Payments Posted Using CampusNexus Student (Campus Information - Electronic Processing Tab), the form only has a single option for Credit Card Payment Type: Pay with Saved Card.

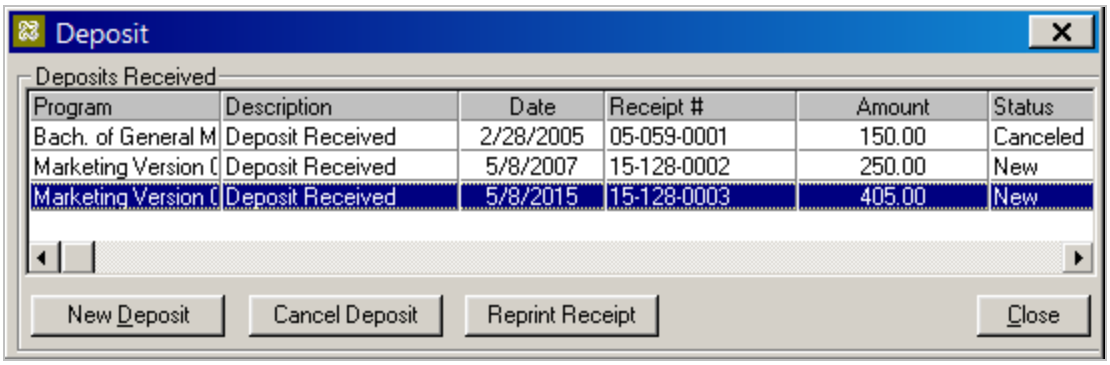


Note: If the student's campus is configured to Verify Credit Card Payments Posted Using CampusNexus Student (Campus Information - Electronic Processing Tab), there are two options for Credit Card Payment Type:

- Pay with Saved Card
- Pay with New Card



- If any deposits have been submitted for the selected student, the Deposit grid is displayed. When you click **New Deposit**, the Deposit form is displayed.



3. In the Deposit form, enter the **Date** and **Amount.**

4. Select a **Trans Code**. Only transaction codes with the Allow Deposits property set to True are available for selection.
5. Select the **A/Y (Academic Year) Sequence**.
6. Select the **Term**.
7. Select a Payment Type. The options are Cash, Check, or Credit Card.
    - If you select **Check**, enter the check number.
8. Select **Authorize** if the credit card needs to be authorized by a Credit Card Authorization Center.
9. When the authorization is obtained, enter the **Authorization Number**.
10. Select a **Paid By** option (e.g., student, parent). These options come from the student's Addresses list. To add an option, click . The Addresses form is displayed.
11. If you want a receipt, select **Print receipt after save**.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

    If you have selected the **Pay with New Card** option, you are redirected to the payment gateway provider's hosted page to enter credit card information to complete the transaction.

    Note: Selecting the **Save Card?** check box will save the new card to the database as Active for future transactions. If you do not save the card, the card will be saved but will be marked as Inactive and won't be available for selection for future transactions.

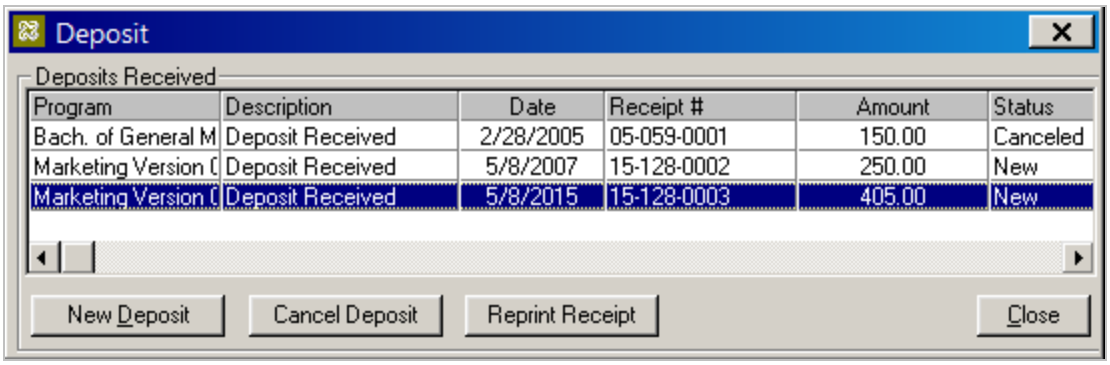
13. When the deposit is saved, the Deposit grid displayed. Note the values in the Status column.



14. To add deposit, click **New Deposit**. The Deposit form is displayed.
15. To cancel a deposit that has been recorded in error, select the deposit and click **Cancel Deposit**. A confirmation message is displayed. Click **Yes**.

    Note: A deposit can be canceled only if its status is **New**.
16. To reprint a receipt, select a deposit and click **Reprint Receipt**. A confirmation message is displayed. Click **Yes**.
17. Click **Close** to close the form.

Transfer Credits

Staff members can review the list of courses transferred from other institutions, and add, view, or edit transfer credit information, and add course relationships.

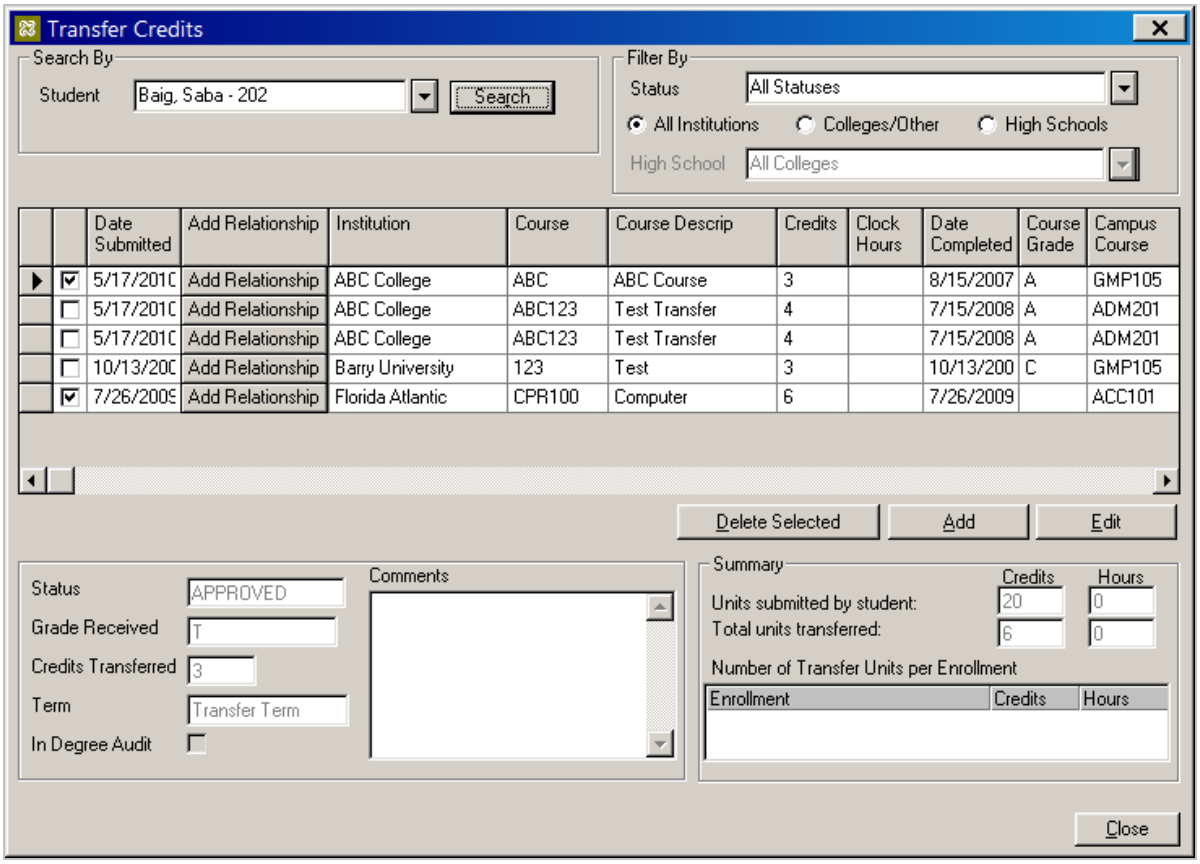
For program versions that use Academic Calendars 5 and 6 (non-term), CampusNexus Student automatically adjusts the Academic Year and Loan Period sequences and associated credits or hours and weeks as transfer credits are 'Approved' or changed from 'Approved' to a different status.

Approved transfer credits or hours in non-term configurations shorten the remaining course work that the student has to complete for the program version and is in direct relation to the academic year or loan period length and sequences. The "Credits in AY" ("Hours in AY") and "Weeks in AY" fields of the final academic year and loan periods are continually adjusted based on changes in the amount of transfer credits or hours.

When CampusNexus Student is enabled for Allow courses to be exempt from progression, the system uses the "Enrollment Status Credits (Hours)" of the linked course as the accepted value instead of the Credits or Hours value of the course on the student schedule when adjusting academic years and loan periods.

To transfer credits for an incoming student:

1. Navigate to **View > Admissions** or **Academic Records > Transfer Credits**.
   - OR -
   Navigate to **Daily > Admissions > Transfer Credits**. The Transfer Credits form is displayed.



Note: The options under **Filter By** allow you to view College transfer credit records, High School transfer credit records, or both (All Institutions). By default, **All Institutions** is selected and the drop-down lists to filter the records are unavailable.

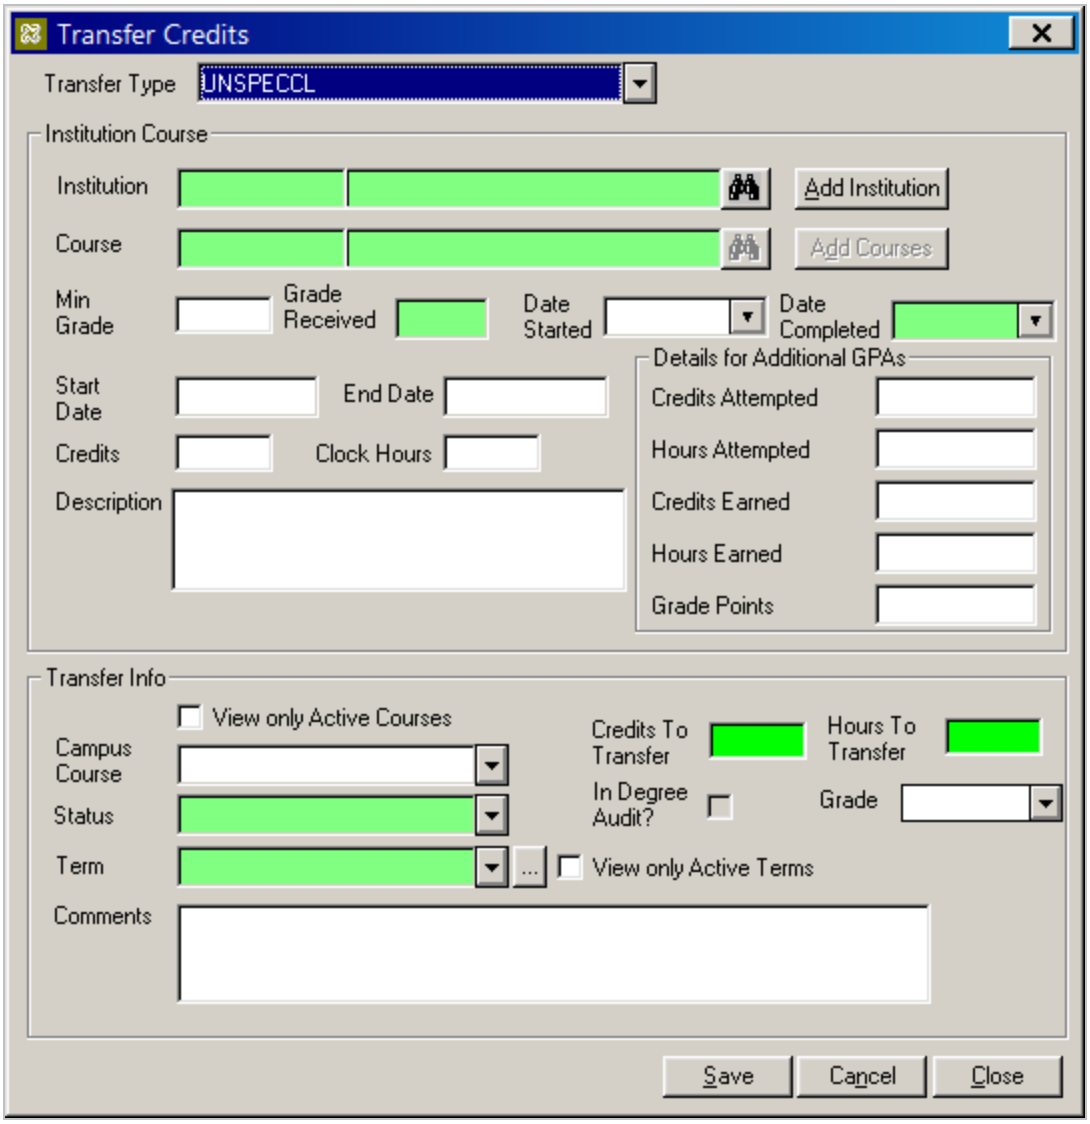
- If you select **Colleges/Other**, the College filter becomes available and only College transfer credit records get listed in the Transfer Credit grid.
- If you select **High Schools**, a High School filter becomes available and only High School transfer credit records get listed in the Transfer Credit grid. The list shows only those high schools for which Transfer Credit records are available.

Note regarding Number of Transfer Credits per Enrollment:

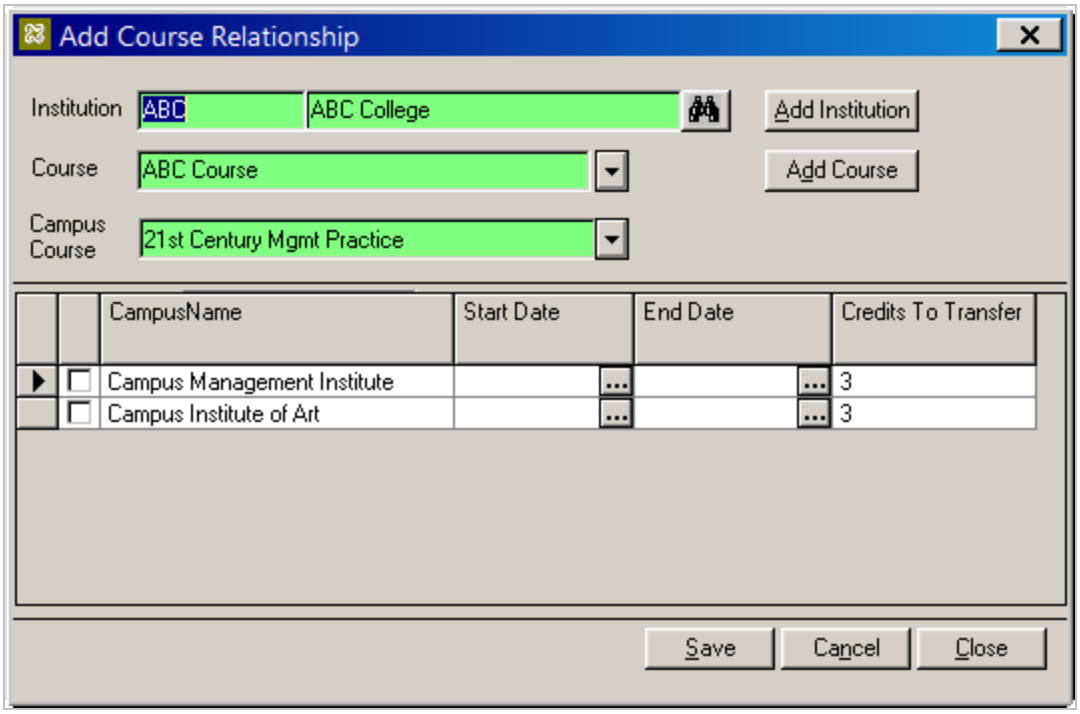
CampusNexus Student accurately tracks and updates the number of Transfer Credits on the student enrollment. If applicable, the following warning is displayed:

Transfer Credits entered exceed the number currently tracked on the enrollment. Automated processes or the academic year tool can be run to update the enrollment and Academic Years. If the student's current Academic Year is adjusted, the student should be repackaged according to the adjustment.

2. Click **Add**, or select a record and click **Edit**. The Transfer Credits form is displayed. The state (enabled/disabled) of **Add Institution** and **Add Courses** buttons depends on the staff member's Admissions security settings.



3. Complete the fields on this form as needed. See Field Descriptions.
4. To add a trans credit relationship to another campus, select a record and click **Add Relationship**. The Add Course Relationship form is displayed. Complete the fields on this form as needed.



5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Field Descriptions

Field	Description
Transfer Type	Use this drop-down list to select College or High School type of transfer credits. The list is populated with the entries available under Lists > Admissions > Transfer Type (tab). **Note**: The Institution Course frame and Transfer Info frame of the Transfer Credits form remain unavailable (dimmed) until you select a Transfer Type. If you select a College Transfer Type, you can Select/Add College and College Courses for transfer credit records. If you select a High School Transfer Type, you can Select/Add High School and High School Courses for transfer credit records.
Institution Course Fields	
Institution	Name of the institution (i.e., College/Other or High School) from where the course is being transferred is displayed in this field. You can use Search to select the institution using the Search College or Search High School forms. If the institution is not listed and you have proper access, click **Add Institution** to display a form with which to add the school.

Field	Description
Course	The name of the course being transferred is displayed in this field. You can select the course using Search. If the course is not listed and you have proper access, click **Add Courses** to display a form to add the course.
Min Grade	Minimum grade allowed for successful completion of the transferred course
Grade Received	Grade the student achieved
Date Started	Date when the student started the course
Date Completed	Date when the student completed the course
Start Date	Effective start date for the course
End Date	End date for the course
Credits	Number of credits the student earned at the institution where the course was taken
Clock Hours	Number of clock hours the student earned at the institution where the course was taken
Description	Brief description of the course
Transfer Info Fields	
View only Active Courses	Select this check box to filter terms by Active only.
Campus Course	Equivalent course offered by the selected campus
Credits to Transfer	Number of credits to transfer
Hours to Transfer	Number of clock hours to transfer
Status	Transfer status. A not yet **APPROVED** transfer status displays on the Degree Progress Audit only if a **Campus Course** is selected on the **Transfer Credits** folder. **Note**: If configured (Lists > Admissions > Transfer Status), the field displays course information on the Degree Progress Audit.
In Degree Audit?	This check box is enabled when the **Campus Course** selected is in the Program Version's required course list.
Grade	The student's grade to associate with the transferred course
Term	Term when the credits are applied **Note**: Non-term functionality in CampusNexus Student allows users to add transfer credits at any point during the student life cycle. Transfer credits adjust the academic year attributes and therefore the time it takes a student to complete the program.
View only Active Terms	Select this check box to filter terms by Active only. By default all terms, active and inactive, appear on the Term list.
Comments	Any related comments

Field	Description
Details for Additional GPAs The fields **Credits Attempted**, **Hours Attempted**, **Credits Earned**, **Hours Earned**, and **Grade Points** capture the information from previous institutions so that you can include courses for students from other schools in a school-defined GPA calculation. See school-defined GPAs/Additional GPAs. When adding a new transfer credit record, the fields Credits Attempted, Hours Attempted, Credits Earned, and Hours Earned are populated from Course Credits and Course Clock Hours as soon as you select a course. If the school-defined GPA is configured to use transfer courses and is a weighted GPA, these grade points are multiplied by the credits attempted to get the quality points for the calculation.	
Credits Attempted	Number of Credits Attempted from the student's transcript
Hours Attempted	Number of Hours Attempted from the student's transcript
Credits Earned	Number of Credits Earned from the student's transcript
Hours Earned	Number of Hours Earned from the student's transcript
Grade Points	Number of Grade Points from the student's transcript

View > Financial Aid

Note: For the latest content about FAFSA, ISIR and COD processing, access Regulatory Help.

The Financial Aid option on the View menu provides forms for working with the student's financial aid requirements. The options on this menu apply to the student selected from the Recent Students list.

Menu Item	Description
Student	Displays the Student Master form.
Packaging	Displays the form used to start Financial Aid Packaging process for the student.
Academic Year	Displays the student's Financial Aid Academic Year form.
Loan Period	Displays the Loan Periods form. This option is available only if the student is enrolled in a Clock Hour (Academic Calendar 5) or Credit Hours without Terms (Academic Calendar 6) program.
Awards	Displays the student's Financial Aid Packaging form.
FAFSA	Displays the FAFSA Main form. You can enter or edit a FAFSA for the current student.
ISIR	Displays the student's ISIRs. You can view or print the current student's ISIRs and enter corrections.
Summary	Displays the student's Financial Aid Summary report.
School Fields	Displays school-defined fields related to the Financial Aid module and public fields from other modules. You can view and enter data.
Audit	Displays a list of significant changes in the selected student's FA records.
Estimates	Displays an estimated financial aid package for prospects (leads) and enrolled students.
Documents	Displays the FA Document Tracking form, which is similar to the Document Tracking form, but only shows Financial Aid-specific documents for the student. It also allows the user to see ISIR information when an Award Year is selected in the main drop-down list.
State Report Evaluation	Displays the State Reporting Evaluations for the State of Georgia for the HOPE Grant/Scholarship and the Zell Miller Scholarship.

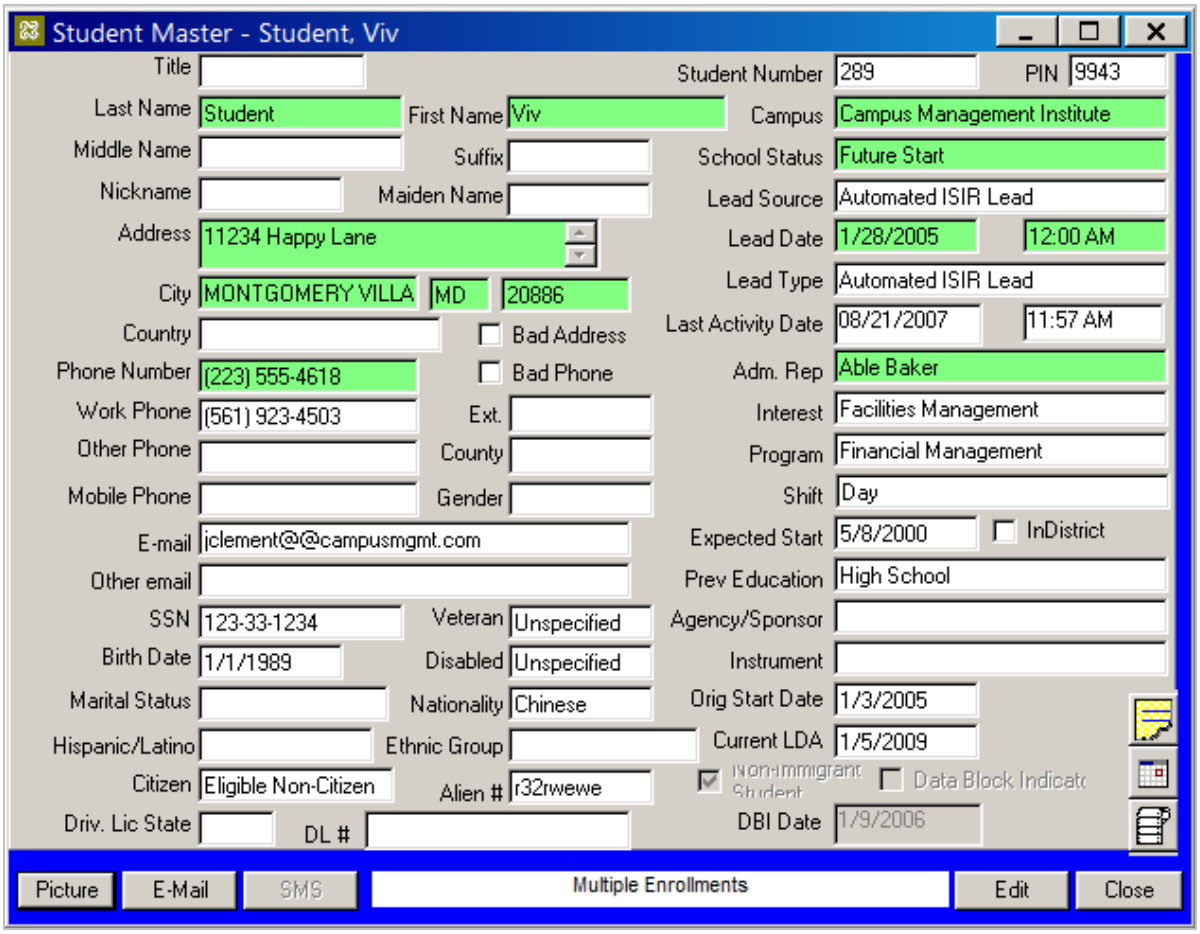
The options on the Student Bar are the same as the options on the View menu, unless the Student Bar has been altered by the user.

Student Master

The Student Master form contains much of a student's basic demographic information. The Student Master form is usually (but not necessarily) populated in the Admissions module by adding a new lead to the database. New leads are entered using the Quick Lead Entry form or the Add New Lead **Ctrl+L** option on the File menu. The **Ctrl+N** key combination can also be used to start a new Student Master record (form) without entering a quick lead.

To view a Student Master form:

1. Select one of the following options:
    - Click **Student** on the Student Bar.
    - Double-click **Recent Students** on the Toolbar. When you change the student in the Recent Students list, a new Student Master form is displayed. If you already have a Student Master form open, it remains open in the background.
    - From the **View** menu navigate as follows:
        - Contact Manager > Student
        - Admissions > Student
        - Financial Aid > Student
        - Student Accounts > Student
        - Academic Records > Student
        - Career Services > Student
        - Loan Management > Student
        - Student Services > Student
        - Housing > Student
    - Use the **Find** menu or click on the Toolbar to search for a student.



Note: The border color around the Student Master form indicates the student's status category. In the setup options under Setup > Status Codes > Colors Tab, your system administrator can choose colors for the status categories.

2. Multiple Student Master forms can be displayed at the same time. The forms always open in the same place in the work area. Unless you have closed, moved, or minimized a previous Student Master form, the next form you open covers the previous form.

   To move between open Student Master forms use the **Window** menu and select **Tile** or **Cascade** to organize all open forms in the work area.

   When you are working with multiple students, ensure that the correct form is current (active). The name of the current student is always shown in the Recent Students text box. The title bar of the active form is always a different color than other forms which may be open in your work area.

3. To edit the information on the form, click **Edit**. See Edit a Student Master.

   Required fields on the form have a background color other than white. If a required field is blank, you must enter data in it when you edit the form, even if you did not intend to provide the information when you clicked Edit.

   Some fields are required by CampusNexus Student (Last Name, First Name, Lead Date, Admissions Rep). Additionally, your institution may designate other fields as required. The system administrator can mark fields as required in either of two ways.

- Open any Student Master (or Quick Lead) form and go to Setup > Required Fields.
- Designate the field as required in the Data Dictionary.

4. To add an activity from the Student Master form, click the **Add Activity** icon at the bottom right of the form. The Activity form is displayed.
5. Click **Close** (Ctrl+F4) to close the active Student Master form. If you are in edit mode when you click Close, you are prompted to save any changes.

Duplicate Student Records

CampusNexus Student checks for duplicate Student Master records when new leads or students are added. The following table columns are used to check for duplicates:

- Student ID
- Social Security Number
- Phone Number
- Date of Birth and Student Name (combined)
- Driver's License Number
- E-mail address.

Each check is performed only if you entered data in the corresponding field. If at least one match is found, a grid showing the matches is displayed

If the lead is a duplicate and can be found on the grid, click the record and the lead form is populated with the information for that lead. The information can then be edited. The campus for the lead can be changed only if the campus ID for the record from the grid is in the list of campuses to which you have access.

Introduction to FA Packaging

Application Processing Updates

Users can perform FAFSA and ISIR processing for the current Award Year. Financial Aid Administrators can enter FAFSA data, submit and receive Application Processing data to CPS, perform ISIR Corrections and ISIR Verification with CampusNexus Student Regulatory. Each Award Year the Department of Education specifies what data will be gathered as part of the student's application for financial aid, and how that data will be used to determine Need and Eligibility for financial aid. These specifications are provided at the https://ifap.ed.gov/ website:

- https://ifap.ed.gov/software-and-other-tools
- https://ifap.ed.gov/ilibrary/document-types/fafsa-and-sar-materials

Processes updated to provide compliance include:

- FAFSA Entry
- FAFSA Export
- FAFSA Printing
- Print FAFSA Reports including Export Error Reports
- ISIR Import
- Global ISIR Import
- ISIR Matching
- ISIR Verification
- ISIR Corrections
- ISIR Reports
- ISIR Printing
- Manual ISIR Matching
- Document Triggers
- EFC Calculations
- Recalculate Estimated Pell Amount when enrollment changes
- Schedule Documents
- Process Error Report files
- Pell estimates

EFC fields are six digits in length. The primary and secondary EFC intermediate values are eight digits for: TI, STI, AI, AAI, and FISAP TI.

Selection of Latest Award Year when COD Grants and Direct Loans are Configured

Users can configure COD Grants and Direct Loan processing for the current award year; however, they cannot export COD Grants and Direct Loans to COD until the COD Processing Update is released.

The option to configure the current award year for Pell and Direct Loans is available via a DDL in CampusNexus Student Regulatory.

NSLDS Fraud Loan Flag Reject 24 Added to Reject Edits

Reject 24 for the NSLDS Fraud Loan Flag has been added to the Complete Reject Edits section. This reject was implemented on January 2, 2014 for the 2013-2014 and 2014-2015 award years.

ISIR Reports for the Current Award Year Include SLEU and SULA Content

The ISIR Summary Report, ISIR Import Report, Print ISIR Batches Report, Review/Print Multiple Print Batches, and Print Individual ISIR reports selections include the current year in the Academic Year (AY) menu list.

The associated report selection criteria includes a Subsidized Loan Eligibility Used (SLEU) Range for the SLEU values to be entered in whole numbers. The report selection criteria includes the option to determine the SLEU Range. The user can enter

the valid SLEU values in whole numbers. If the user does not enter a value, the default is 000000 to 999999. If a SLEU is not available, the field is blank on the report and on the file that is exported to Excel. While this field is available for all award years, it is only populated for the current AY and higher.

The NSLDS Subsidized Loan Eligibility Used Field (position 445) provides the total time during which the student has received Direct Subsidized Loans as of the date of the ISIR; it does not include the total time during which the student has received Direct Subsidized Loans while enrolled in a non-credential teacher certification program. In general, applicants may not receive Direct Subsidized Loans for more than 150% of the published length of the program in which they are currently enrolled. This field contains numeric 6-digit values, 000v000 to 999v999, where "v" is an implied decimal and is excluded from the output.

The ISIR Summary Report also includes the Subsidized Usage Limit Applies (SULA) Flag (where the valid values are Y or N). This flag is viewed for all Academic Years but is only populated for the current award year and higher.

Verification Tracking Group V6 Now Available

The V6 Household Resources Verification Group can be accessed ISIR Verification and scheduling document triggers. This group is not available for prior award years.

Group V2 No Longer Available for FAFSA

Verification Group V2 is not available when users are verifying 2014-15 ISIRs and forward. Verification Group V2 is also not available when scheduling document triggers for the current award year. Verification Group V2 is available when verifying or scheduling document triggers for 2012-13.

SULA Flag Added to FA Packaging

On July 6, 2012, Public Law 112-141 was enacted. This law contains a provision that eliminates the subsidy on Direct Subsidized Stafford Loans when a “first time borrower” enrollment exceeds 150% of the published program length.

For award years 2014-15 and higher, the Subsidized Usage Limit Applies (SULA) flag (where the valid values are Y or N) has been added to the COD system. Upon receipt of a Direct Loan actual disbursement with a first disbursement date on or after July 1, 2013, COD determines if the borrower meets the definition of a "first time borrower" to confirm that the 150% subsidy limit applies to the borrower.

When the SULA flag is set to Y, a SAR comment code 267 will appear if a first time borrower student is subject to the subsidized loan limitation. The message directs users to the studentaid.gov site. This flag is viewed for all academic years but is only populated for the current award year. When the ISIR is received and the SULA flag is associated with a comment code, document triggers associated with the comment code are activated. The SULA flag is also displayed in the Financial Aid Packaging form.

Sequester Updates for Direct Loan Origination Fees

On October 11, 2013 Federal Student Aid published Dear Colleague Letter (DCL) GEN-13-22, announcing FY 2014 Sequestration Changes to Title IV Student Aid Programs. The Sequester changes to Direct Loan origination fees per this DCL go into effect on October 1, 2013, where origination fees charged to Direct Loan borrowers go beyond last year's increases.

The new loan fees are 1.072 percent for Direct Subsidized Loans and Direct Unsubsidized Loans and 4.288 percent for Direct PLUS Loans (both parent and graduate student PLUS Loans). The increase applies to loans where the first disbursement is made on or after December 1, 2013. The loan fees on Direct Loans where the first disbursement was made on or after July 1, 2013 and prior to December 1, 2013 continue as noted in last spring's communications - 1.051 percent for Direct Subsidized and Direct Unsubsidized Loans and 4.204 percent for Direct PLUS Loans.

The change required to address this update to the fees shall not require an upgrade to CampusNexus Student as the initial code changes in Spring 2013 took into consideration this possibility; future changes could be made using a script to update the existing fee table.

Two scripts are used to correct the tables.

For Direct Loans:

The update script makes the appropriate changes to the tables so that institutions can originate Direct Loans using the new increased origination fee where the first disbursement is made on or after December 1, 2013. For Direct Loans where the first dis-

bursement was made on or after July 1, 2013 and prior to December 1, 2013 CampusNexus Student continues to apply those fees noted in last spring's communications.

- The first script identifies Direct Loan awards that are subject to the new fee increase but have the current lower fees populated for the loan and for which the loan has not yet been originated. After identifying these loans the script updates the loan using the new increased fee. Additionally, when the script updates any loan fee and CampusNexus Student is configured to include the actual loan fee in the student's Cost of Attendance (COA), CampusNexus Student updates the COA to include the updated loan fee amount. This script enables users to easily identify students when this occurs so they can potentially increase the student's packaged aid because they will have additional eligibility due the increased COA.
- The second script identifies Direct Loan awards that are subject to the new fee increase but have the current lower fees populated for the loan and for which the loan has already been originated. This script enables users to easily identify the loans and associated students because, based on guidance provided in GEN-13-22, the institution needs to cancel these loans and award a new loan using the correct fees under these circumstances.

Summary table of origination fee updates, based on earliest disbursement date:

Direct Loan Program Loan Fee Amounts			
Loan Type	**Impacted Loans**	**Loan Fee Percent**	**Fee on a Loan Amount of**
Direct Subsidized Loans and Direct Unsubsidized Loans			
(No Sequester)	First Disbursed Prior to July 1, 2013	1.00	$55.00 on a $5,500 loan
	First Disbursed on or after July 1, 2013 and Before November 30, 2013	1.051	$57.80 on a $5,500 loan
	First Disbursed on or after December 1, 2013 and Before September 30, 2014	1.072	$58.96 on a $5,000 loan
Direct PLUS Loans (Parent and Grad/Prof Student)			
(No Sequester)	First Disbursed Prior to July 1, 2013	4.00	$400 on a $10,000 loan
	First Disbursed on or after July 1, 2013 and Before November 30, 2013	4.204	$420.40 on a $10,000 loan
	First Disbursed on or after December 1, 2013 and Before September 30, 2014	4.288	$428.80 on a $10,000 loan
Loan fee calculations that result in more than two decimal points must be truncated to two decimal points (cents).			

Sequester Updates for Teach Award Limits

The Federal Government Budget Control Act (Sequestration legislation) created changes to Teach Award Limits.

COD Export Accommodates GEN-13-13 Changes

As a result of Public Law 112-141, the Department of Education is more strictly enforcing accurate reporting of Direct Loan Academic Year and Loan Period dates to COD. Institutions not complying with Title IV Regulations may be cited and penalized by the Department of Education. This affects Financial Aid offices that submit Direct Loan origination and disbursement records and adjustments to COD.

New fields and functionality have been added to CampusNexus Student to support every example provided in the Dear Colleague Letter GEN-13-13 to ensure that institutions using CampusNexus Student are able to report accurate Academic Year and Loan Period dates to COD.

For COD Processing, the academic year start and end dates and loan period start and end dates for each Direct Loan are updated on the individual loan instead of the loan period dates and the academic year dates set in CampusNexus Student:

- The Academic Year Start Date equals the Loan Academic Year Begin Date ("Ac Yr Start").
- The Academic Year End Date equals the Loan Academic Year End Date ("Ac Yr End").
- The Academic Year Begin Date equals the new Award Year Start Date.
- The Academic Year End Date equals the new Award Year End Date.
- When the user processes any COD export, CampusNexus Student retrieves the four dates from the loan record. This feature works across COD exports: Originations, Disbursements, and Origination Changes.

Sequestration Updates Affecting COD Processing/Award Amounts and Fees

On March 1, 2013, President Obama signed an order to implement sequestration that includes budget cuts affecting Federal Student Aid (FSA) program funds: Direct Loan, Campus Based, TEACH, and IASG programs are subject to these cuts through a reduction in the total award or an increase in fees associated with the program. By law, the Pell Grant Program is exempt from the effects of the sequester for the 2013-2014 award year.

Direct Loan origination fees have been increased as mandated by the sequester. For loans that had an earliest disbursement date on or after July 1, 2013:

- Batch and auto-packaged loans are packaged at COD with new fees.
- Package loan estimates use the new fee percentages.
- Loans that have not been originated at COD are corrected to reflect the new fee.
- Direct Subsidized Loans and Direct Unsubsidized Loans fees have been increased from 1.0 percent to 1.051 percent.
- Direct PLUS Loans (for both parent borrowers and graduate and professional student borrowers) fees are increased from 4.0 percent to 4.204 percent.

New COD Export Validation processes for sequestration include:

- Preventing Direct Loan records with the new higher origination fees from being exported to COD before June 28, 2013.
- Preventing Direct Loan records subject to the new higher origination fees from exporting with the current lower fees.

Important: The disbursement origination fees associated with the sequestration may affect the student's packaging costs. When a student is repackaged, an error message may appear stating that the associated origination fee is not valid. Users must acknowledge the error message and save the form again so that the fees are correct; otherwise the record will be rejected upon COD export.

Notes:

- A script runs at installation to modify the fees for loans that were created with the old fees but that have not already originated at COD. This script runs at installation for CampusNexus Student Regulatory 5.5.0 and higher.
- Another script is available for clients to identify loans originated with current fees but that are subject to increased fees due to sequestration, so that they can modify the fee (by canceling the loan and create a new loan with the new fee) appropriately.

COD processing will reject any records that do not comply with new fee amounts based on the earliest scheduled or actual disbursement date on or after July 1. 2013.

Important:

TEACH Grant awards are validated to ensure that if the earliest disbursement occurred after March 1, 2013, the maximum amount packaged is reduced as required in the sequestration legislation. Any institution that has disbursed TEACH funds to stu-

dents with the earliest disbursement after March 1, 2013 using the pre-sequester maximum award amounts must recalculate the TEACH Grant award amounts for upcoming payment periods.

Loan Period Dates Passed to COD

With the addition of Loan periods in CampusNexus Student, the COD Export and COD Import processes needed to be updated to use new loan period dates. If a direct loan has a loan period sequence selected, COD Export will use the new loan period dates for the Financial Award Begin and End dates, as well as the Academic Year begin and end dates. Direct loans without loan period sequences selects continue to use the Financial Award Begin and End dates from the loan, and the Academic Year begin and end dates from the academic year.

CampusNexus Student supports the updated use of the direct loan form for processing updates to existing loans with COD. To facilitate updating a loan on the direct loan form itself for changes to existing loans with COD, the COD Import process can now restore the previously accepted value at COD when changes are returned as rejected by COD. Additionally, the COD import process includes updating the borrower identifier, borrower Social Security number, borrower Date of Birth and borrower Last name while importing Identifier changes.

For the latest content about FAFSA, ISIR and COD processing, access Regulatory Help.

Note: This topic includes excerpts from "The Blue Book", a publication of the U.S. Department of Education. It is a guide for "accounting, record keeping, and reporting by postsecondary educational institutions for federally funded student financial aid programs".

This topic is a summary discussion of financial aid concepts, sources, and CampusNexus Student processing. CampusNexus Student assists in the management of the financial aid process. Please refer to the various FA-related topics of the CampusNexus Student Help system for more details about how the system deals with these functions. For more information about financial aid in general and federal aid sources in particular, please refer to the sources listed at the end of this topic.

Student Financial Aid Packaging

Student financial aid packaging encompasses all the arrangements necessary for a student to pay for his or her postsecondary education. For your institution in particular, this means the identification of sources of funds available to the student and the processing required to make those funds available to the student and the institution.

Fund Sources

Many sources of funds are available for meeting the financial needs of your students. The most prominent of these fund sources are the Title IV funds provided by the U.S. Department of Education. Title IV of the Higher Education Act of 1965, as amended (HEA), authorizes the Federal Pell Grant, William D. Ford Federal Direct Loan, Federal Family Education Loan (FFEL), Federal Supplemental Educational Opportunity Grant (FSEOG), Federal Work Study (FWS), and Federal Perkins Loan Programs. These programs are collectively known as Title IV programs. There are several other sources of funds provided by federal and state departments and agencies.

Other fund sources include third parties such as commercial financial institutions, private and governmental agencies, corporations, charitable organizations, parents of students, and of course, the students themselves.

Expected Family Contribution (EFC)

The basic premise underlying Title IV programs is that a student and the student's family have primary responsibility for paying for the student's postsecondary education. Because the programs are intended to help students with financial need, eligibility for assistance from most of the programs is need based. Congress developed an Expected Family Contribution (EFC) formula to determine the financial strength of a student's family and the student's need for Title IV assistance.

Free Application for Federal Student Financial Aid (FAFSA)

To apply for Title IV financial aid funds, students must submit a Free Application for Federal Student Aid (FAFSA). Most continuing postsecondary students may file a streamlined Renewal FAFSA. The FAFSA and Renewal FAFSA collect financial and other information from the student and the student's spouse (and parents of a dependent student) to calculate the student's EFC. The EFC represents the amount of money a student's family is expected to contribute toward the cost of the student's postsecondary education. The resulting EFC is reported on the Student Aid Report (SAR). Institutions receive an electronic version

of the same information, called the Institutional Student Information Record (ISIR). The EFC is used with the cost of attendance (COA) in determining an eligible student's need and the amount of aid that the student receives from each of the Title IV aid programs.

"Gift Aid" or "Self-Help Aid"

Title IV programs may be categorized as "gift aid" or "self-help aid." Gift aid consists of grants and scholarships that are given to students; it does not have to be repaid. Self-help aid takes the form of loans (which must be repaid) and employment (which pays students wages for hours worked at jobs provided on campus or off campus).

Gift Aid

- Federal Pell Grant
- Federal Supplemental Educational Opportunity Grant (FSEOG)
- Leveraging Educational Assistance Partnership (LEAP) (Federal funds allocated to states for grants to eligible students.)
- Robert C. Byrd Honors Scholarship (Federal grants to states for scholarships)

Self-Help Aid

- Federal Perkins Loan
- Federal Work Study
- William D. Ford Federal Direct Loan
    - Federal Direct Stafford/Ford Loan (Direct Subsidized Loan)
    - Federal Direct Unsubsidized Stafford/Ford Loan (Direct Unsubsidized Loan)
    - Federal Direct PLUS Loan (Direct PLUS Loan for parents)
    - Federal Direct Consolidation Loan
- Federal Family Education Loan (FFEL)

Other Federal Student Aid Programs

In addition to the Title IV programs, there are other federal financial assistance programs for students including AmeriCorps, The Hope Scholarship, Lifetime Learning Credit, and programs funded by the U.S. Department of Health and Human Services (HHS).

Financial Aid Processing in CampusNexus Student

Financial aid processing in CampusNexus Student includes several setup steps, data entry in lists, student-related procedures, and daily operations in both the Financial Aid Department and in the Student Accounts Department. Additionally, many data items in the Admissions and Academic Records Departments have a bearing on the functions of the Financial Aid Department. These are items such as student demographics, programs, program versions, enrollments, and so on.

Financial Aid Setup

Before you can begin financial aid packaging in your institution, the system administrator (SA) must set some parameters under the CampusNexus Student Setup menu. In the Campus Locations option, several items of campus-related static information such as identifications codes, name of FA Administrator, addresses, and so on, must be entered.

On the Setup menu under Financial Aid, the SA must set up the financial aid summary and detailed award letters. The SA must also indicate whether you are using the Clearinghouse for transmitting FA data.

Financial Aid Lists

Before students can be packaged for financial aid, you must populate the FA lists. Please refer to the related Help topics for more on these lists.

- Fund Sources
- Lenders, Servicers, and Guarantors
- Packaging Methods
- Packaging Statuses

- Academic Years
- Budgets (Cost of Attendance Budgets)
- Programs

Student-Specific Packaging Operations

Packaging

Packaging of financial aid in CampusNexus Student is organized around your institution's academic year. The Department of Education has several categories for academic years--two semesters, two trimesters, three quarters, 900 clock hours, and so on. Academic years are comprised of payment periods. This is especially for non-term based programs, or programs configured with an academic year of Non-Standard Terms, Clock Hours, or Credit Hours without Terms. At the time of enrollment, CampusNexus Student calculates Title IV payment periods according to the program's academic year settings; as mandated by the Department of Education. These payment periods are associated with student's financial aid disbursements within the Awards form. For more on how Title IV payment periods are created, see Title IV Payment Periods. As part of the FA setup, someone will tell CampusNexus Student about your institution's academic year.

Award years run from July 1st of one year to June 30th of the next year. Thus, a student's financial aid package for an academic year may span two FA award years. A FAFSA must be on file in CampusNexus Student for the first award year before you can package that academic year for the student. This is primarily important for Pell Grants which must be prorated between award years when the academic year spans two award years. Loans, on the other hand, are always packaged for an academic year. Adding a second Pell Grant for the same award year: There are some cases where it is OK to have more than one Pell grant for the same award year.

Before any student can be completely packaged and approved for financial aid disbursements, a FAFSA for the applicable award year(s) must be completed and sent to the Central Processing System (CPS). The CPS must return an approved ISIR. Corrections to the FAFSA may be necessary before the CPS approves the application.

When all of the setup data has been entered for your institution, you can begin packaging financial aid for your students. Students are packaged individually. First, you will select the student for which an FA package is needed. Then, from the View menu, you will select Financial Aid/Packaging. CampusNexus Student will open a form in which you will enter and select the appropriate options to package the student.

An automatic packaging feature is available to shorten the process. The automatic packaging feature is based on the Packaging Methods you set up under Lists/Financial Aid.

The packaging forms include logic to warn you when the amount packaged for the fund source exceeds the allowable commitment level for the fund source. This logic will check the FAGL Authorization table for the amount authorized for the award year and multiply this amount by the commitment level for the fund source. If the new packaging amount will exceed the commitment level, a warning message is displayed indicating that you have exceeded the level for the year.

In addition, after a student is packaged, the program will update the amount-packaged column in the FAGL Authorization table. Similar logic is included in the auto-packaging methodology. The program will check the commitment level for a fund source before adding the fund source to the student's scheduled aid. If the commitment level is exceeded, a message is displayed so you know why a particular fund source was not auto-packaged. If an amount is auto-packaged, the program will update the amount-packaged column in the FAGL Authorization table.

You can click **FAFSA** on the Packaging form to enter the necessary student and parent data for the application.

FAFSA

Without going through the Packaging option, you can enter data for a FAFSA to obtain an "estimated" EFC. A FAFSA entered outside of the Packaging routine will not affect any student academic year.

ISIR

For any lead or student, you can print an ISIR that has been received by your institution.

Daily Operations

From the **Daily** menu, select **Financial Aid**. You will see options that are normally performed by the Financial Aid Department in the daily course of business.

Approve Disbursements to Pay

The Financial Aid Officer (FAO) can review a list of scheduled disbursements and approve those that are ready for payment processing. After approval, the Student Accounts Department processes the disbursements for payment and applies them to the student ledger cards.

SSCR Process

CampusNexus Student can import the Student Status Confirmation Report (SSCR) from the Department of Education and compare the data to your student records.

Since the Higher Education Act of 1965, institutions have been required to confirm and report the enrollment status of attending students who receive federal loans. Because a student's enrollment status determines his or her deferment privileges and grace periods, as well as the government's payment of interest subsidies, SSCR is critical for effective administration of Title IV loans. It is the primary means of verifying students' loan privileges and the federal government's monetary obligations. The SSCR data is received from and sent to the National Student Loan Data System (NSLDS).

Your institution may use the National Student Loan Clearinghouse (NSLC). The "Clearinghouse" is a non-profit, industry-sponsored consortium, established by its member organizations (lenders, servicers, and guarantors) to proactively enhance the overall student loan program, and simplify the enrollment verification process. The Clearinghouse is not an agency of the U.S. Department of Education.

Print Batches of ISIRs

Typically, ISIRs are received from the CPS in batches. This option is provided to print these ISIRs. You can select the batch to be printed from a list presented by the system.

Financial Aid Data Communications

CampusNexus Student relies on your institution to have an arrangement with the Department of Education for the transmittal and receipt of student data. The tool that implements this communication process is a computer program known as **EDconnect**.

EDconnect runs on a personal computer (PC) at your institution and connects to the various agencies of the Department of Education (ED) using an attached modem. CampusNexus Student places outgoing data files in a directory that EDconnect can access. The EDconnect program looks for outgoing files in this directory and forwards them to the appropriate destination. Incoming data from various sources is also placed by EDconnect in the shared directory. CampusNexus Student looks for the incoming data in this directory and updates its database as required. Outgoing (export) files and incoming (import) files have distinctive names that identify the type of data they contain.

A list of export and import files that CampusNexus Student processes can be found under the Help topic Export and Import Files.

The Central Processing System (CPS) is a Title IV automated system that receives FAFSAs, performs data matches, processes student financial aid applications, and calculates the Expected Family Contribution (EFC) for each applicant, and prints the Student Aid Report (SAR). It returns the processed applicant data within 72 hours for printing of the Institutional Student Information Report (ISIR).

Recipient Financial Management System (RFMS) is the new processing system that institutions will use to report 1999-2000 Federal Pell Grant student payment data and request funding adjustments. RFMS improves and modernizes the Federal Pell Grant Program. It is a new system that uses origination and disbursement records. RFMS moves the Department towards implementing common processes and records for Federal Title IV program funding to students and institutions in accordance with Project EASI (Easy Access for Students and Institutions), the Department's collaborative initiative with the community to create an integrated, national student aid delivery system.

Under RFMS, institutions will submit an origination record and one or more disbursement records for each student who is eligible for a Federal Pell Grant, similar in concept to the Federal Direct Loan Program origination reporting process. RFMS interfaces with several other ED systems.

- The Central Processing System provides student eligibility information to RFMS for processing detail records.
- The Postsecondary Education Participants System (PEPS) provides RFMS with institution eligibility information.

- Title IV WAN is the primary vehicle that transports data between RFMS and institutions.
- NSLDS receives payment information for all students receiving Pell Grants.

The National Student Loan Data System (NSLDS), as a Title IV automated system, is a national database of information about loans and other financial aid awarded to students under Title IV of the Higher Education Act of 1965. This system pre-screens applications for Title IV aid, supports program administrative research functions, and improves Title IV aid delivery through automation and standardization.

The Loan Origination Center (**LOC**[1]) is also a Title IV automated system. It processes direct loan data from institutions and approves or rejects the loan applications. It also handles the processing of promissory notes and disbursement of loan funds.

Export Data

CampusNexus Student exports several types of data files to the various Department of Education service centers.

- Application Data
- Direct Loan
- Pell-RFMS
- Clearinghouse
- Servicers
- COD

Import Data

CampusNexus Student imports several types of data files from the various Department of Education service centers.

- Application Data
- Direct Loan
- Pell-RFMS
- COD

Note: You can elect to create a new lead master record if you receive an ISIR for a student that is not already in your CampusNexus Student database. You can receive an ISIR only if the student has designated on his or her FAFSA that your institution is to receive it.

Financial Aid - Related Student Accounts Functions

The Student Accounts Department handles a variety of procedures and transactions that are directly related to student financial aid.

For individual students:

- Payment Schedules
- Stipend Schedules
- Refund Calculations

For groups or batches of students:

- Post Individual Refunds
- Post Individual Stipends
- Print Refund/Stipend Checks
- Student Statements
- Third Party Invoices

Financial Aid Reports

CampusNexus Student provides a number of reports related to financial aid activities.

Additional Information

You can find additional information about federal financial aid programs in the publications and Internet websites of the U.S. Department of Education.

- "The Blue Book; Accounting, Recordkeeping, and Reporting by Postsecondary Educational Institutions for Federally Funded Student Financial Aid Programs".
- "The Federal Student Financial Aid Handbook"
- The U.S. Department of Education website home page: http://www.ed.gov
- Information for Financial Aid Professionals: https://ifap.ed.gov/

Contact the various state Departments of Education for additional materials about student financial aid at the state and local levels.

Packaging

Financial Aid Packaging enables institutions to provide, in a single place, a comprehensive picture of the sources of assistance provided to a student.

This topic focuses on the Packaging form used in CampusNexus Student. For information on other aspects of the packaging process, see the corresponding topics in the CampusNexus Student and Regulatory Help systems, such as Introduction to FA Packaging, Start the Packaging Process, Add or Edit a FAFSA, Calculated FAFSA Result, and the various FA setup topics.

Payment Periods and Academic Year Packaging

Typically, the Financial Aid Department assembles a package of financial aid for each student in each academic year. Consequently, CampusNexus Student financial aid processing is also organized around academic years. The Packaging form collects financial aid data for a single academic year. It uses data from several sources, including the Academic Year form completed for each of the student's academic years. You can select a packaging method for a student immediately prior to running the package option. When packaging a student, CampusNexus Student finds the packaging method that is relevant to the student based on the packaging method setup.

Academic year packaging is normally accomplished one year at a time because FAFSAs are completed and renewed on an annual basis. However, when a student is enrolled in a program version that has multiple academic years, CampusNexus Student initializes a record in the student's database for each of the program's academic years. That is why you will often see more than one academic year on a student's list. You cannot package the succeeding years until FAFSAs or Renewal FAFSAs are completed for them.

For academic years that have two financial aid award years, you can select which of the two award years to display. If the academic year has only one financial aid award year, the information for that year is displayed.

When adding academic years (View > Financial Aid > Packaging > Add) and the 'Use TermInAYDates' flag is enabled, CampusNexus Student displays the message "Would you like to complete the sequence of academic years?"

- If you select Yes, CampusNexus Student checks the program setup and adds academic year sequences missing based on the Financial Aid terms closest to the dates of existing academic years or the enrollment start date.
- If you select No, CampusNexus Student creates a blank academic year with no defaults.

Students enrolling in programs that are configured with an academic calendar of Credit Hours without Terms or Clock Hours will be associated with two Title IV payment periods per academic year. The calculation is defined in CampusNexus Student and no additional configuration is needed to enable the payment period association.

Students enrolling in programs configured with Non-Standard Term academic calendar will only receive payment periods for awards that are Title IV loans where the academic terms that comprise the academic year differ in length by 14 days or more. Payment periods are not created for any other award types, or where the academic terms that comprise the academic year differ by 13 days or less.

Non-Title IV payment periods can be added to students individually within the Packaging form. For more information, see Title IV Payment Periods..

When auto packaging or re-packaging aid for a student, CampusNexus Student assigns the disbursement schedule for the academic year that is being packaged. If a fund source is configured to use a disbursement schedule, and there is no disbursement schedule found associated with the current Academic Year Sequence, or is not associated with any Academic Year Sequence (i.e., AY Sequence is NULL), no amount will be packaged against that Fund Source.

Institutions can also provide estimated financial aid packages after a change to an EFC, but before a revised ISIR has been returned to the institution. More information about this option can be found under Pell Paid EFC discussed below, and in Setup > Campus Locations > Add/Edit > Financial Aid.

Crossover Packaging

Crossover Packaging permits only one Pell grant and one SEOG grant to be packaged per award year. If you try to add a second Pell or a second SEOG grant, CampusNexus Student displays a message stating that another grant is already on file for the same award year. There is no option to override and continue adding the Pell grant.

Each disbursement of a packaged FA award may be applied to an academic year.

If you have a student with a crossover term or payment period that has not yet been packaged, it can be evaluated and the availability for that time period can be calculated for both award years. This functionality is enabled when the 'Package Crossover Term/Payment Period with Award Year 2 ISIR' is configured on the Pell grant fund source. So if the student does not have any additional eligibility for funds in the first award year for Pell, but the student has an ISIR on file for the second award year, the crossover period can be calculated and awarded with the new Pell grant for the second award year. If you package or batch package the student in a Crossover Academic Year with multiple award years, the system will package both award years simultaneously for the student when there is a valid ISIR on file for the second award year. When auto packaging, if you package the first award year, then receive the ISIR for the second award year at a later time, you can repackage the student and it will delete and recreate the awards based on the new information.

Note: You will not be able to repackage an award once there is a paid fund source on the academic year. So, if an award is completed for an academic year that has a crossover period, there is no new award year eligible ISIR, and any fund source is paid prior to the new award year ISIR, the system will not use automatically package the new award year Pell grant amount. The award needs to be done manually to add the new award year Pell grant since there may be adjustments to the remaining fund sources that will need to be applied, thus requiring evaluation by the institution.

If an award exists for the student, you can amend an existing Pell award for the current award year when adding in a new Pell grant for the existing year on another academic year. All the existing information will still be used within the calculation and will be visible. When auto packaging and batch packaging, if addition eligibility is calculated on the crossover period, it will append to the existing award as well in another academic year.

Financial Aid General Ledger and Packaging

The Packaging form displays a warning when the amount packaged for the fund source exceeds the allowable commitment level for the fund source. CampusNexus Student checks the Financial Aid General Ledger (FAGL) Authorization table for the amount authorized for the award year and multiplies this amount by the commitment level for the fund source. If the new packaging amount exceeds the commitment level, the warning is displayed.

After a student is packaged,CampusNexus Student updates the Amount Packaged column in the FAGL Authorization table. CampusNexus Student checks the commitment level for a fund source before adding the fund source to the student's scheduled aid. If the commitment level is exceeded, a message is displayed describing why a particular fund source was not auto-packaged. If an amount is auto-packaged, CampusNexus Student updates the Amount Packaged column in the FAGL Authorization table.

Truth in Lending

The Truth in Lending Act in Title I of the Consumer Credit Protection Act requires clear disclosure of key terms of the lending arrangement and all costs. For institutions, these regulations do not apply to lenders of student loans. Disclosure must be made of the following credit terms: Finance Charge, Annual Percentage Rate, Amount Financed, and Total of Payments. In cases where there is no financing charge, Truth in Lending information will be suppressed.

If an institution uses Crystal Reports to generate Award Letters, CampusNexus Student provides lending information associated with each specific fund source. Users of Crystal Reports can also report awards by Award Year or Academic Year.

Term Lists

The Term lists on all FA packaging forms is sorted by date with the most recent terms first. When scheduling disbursements for a student fund source, the Term list boxes are sorted by Term End Date in descending order.

Number of Disbursements

The maximum number of allowed disbursements differs based upon the financial aid type. The maximum number of disbursements allowed by financial aid type is as follows:

- Perkins - 6
- Non-Pell Grants - 6
- Other Loans - 6
- Work Study - 6
- Pell Grant - 15
- Direct Loans - 20

- Subsidized Loans - 20
- Unsubsidized Loans - 20

Student cash disbursements are unlimited.

Note: Financial Aid award years begin on July 1st and end on June 30th. When Pell or campus-based funds are awarded to a student, CampusNexus Student evaluates all scheduled disbursements for the award. If any scheduled disbursement is dated is after the June 30th deadline, CampusNexus Student prevents the disbursement from being counted as part of the award. If a disbursement date is after June 30th, students must complete another FAFSA for the following award year and the disbursement will be paid from that award year.

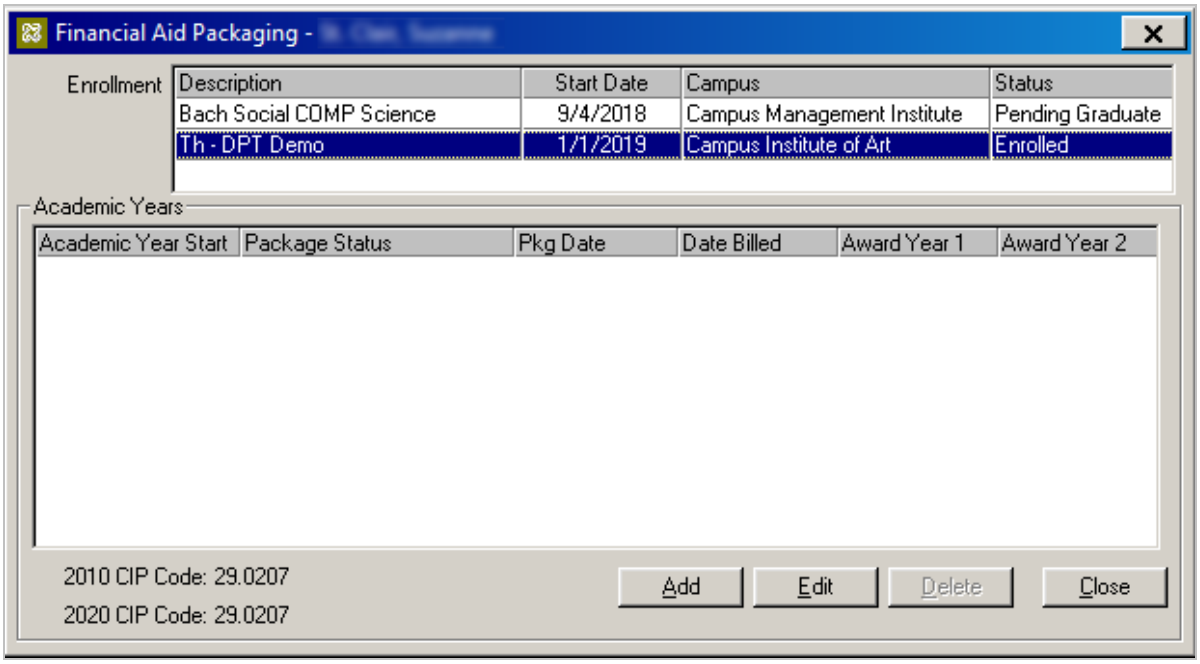
Decimals entered for percentages follow these rules:

- If the number of disbursements is one or two, CampusNexus Student does not allow decimals.
- If the number of disbursements is three or more, decimals are allowed.
- All percentages entered for a financial aid type must add up to 100.00.

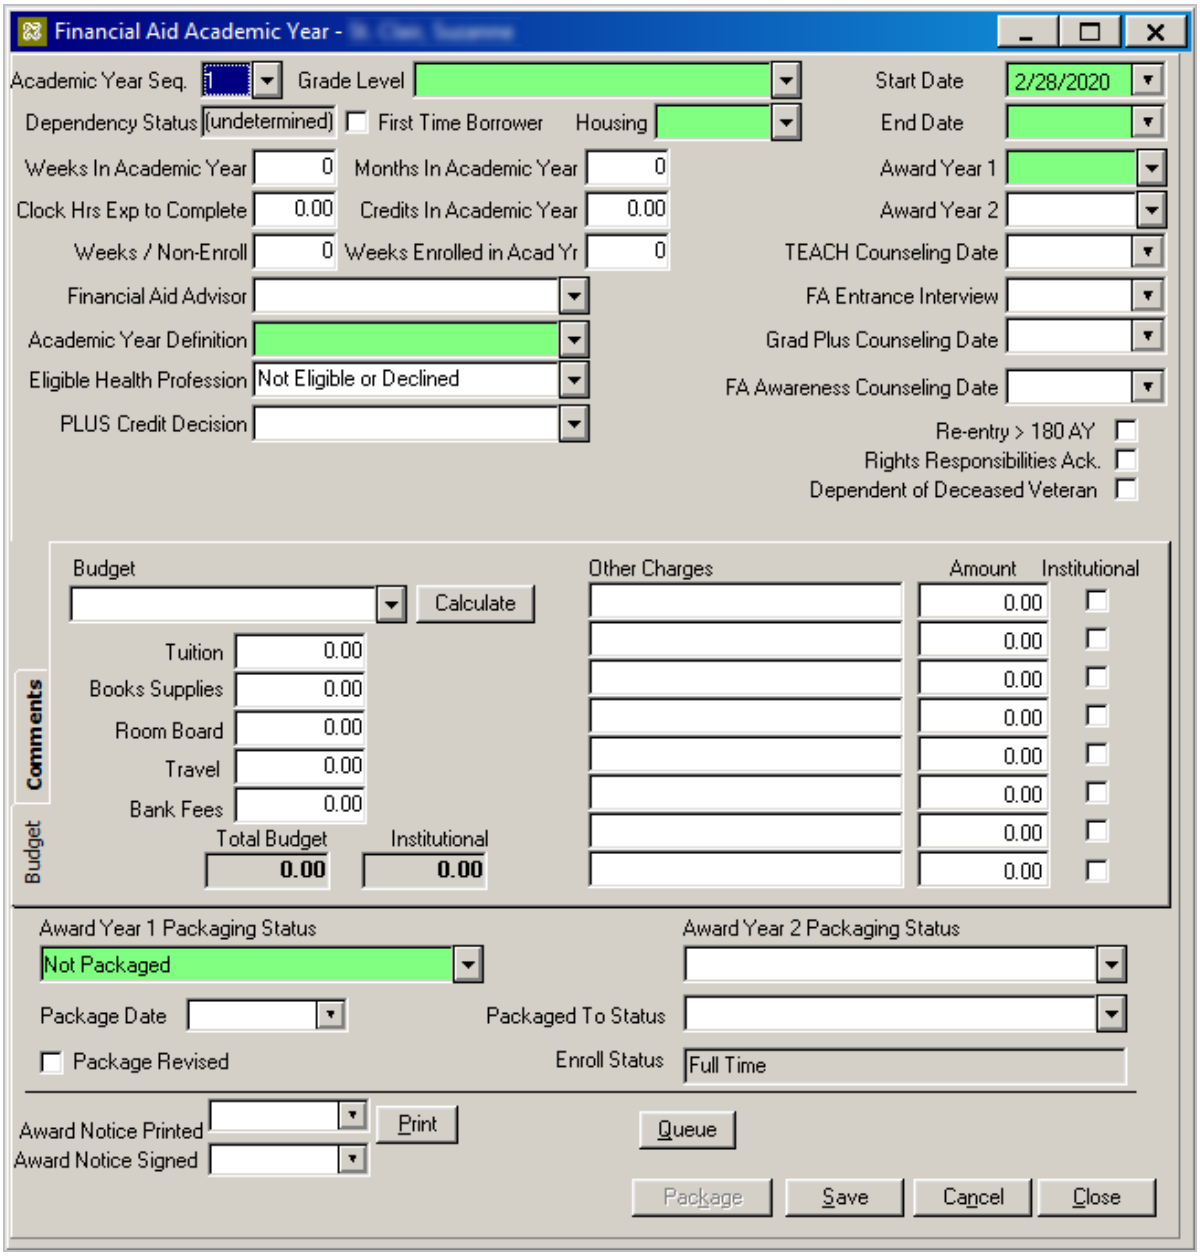
When a student is dropped, financial aid is canceled. If the student is reinstated, financial aid must be "re-expected". Scheduled disbursements are not automatically changed back to scheduled. Review scheduled disbursements for each fund source to "re-expect" the disbursements that still apply.

To organize the financial aid package for a given academic year:

1. Select the student for whom you want to package an academic year.
2. Navigate to **View > Financial Aid > Packaging**. The student's list of academic years is displayed. See Associate CIP Code with Program for details regarding the CIP Code.



3. Click **Add** to add an academic years for the selected student, or select an academic year and click **Edit**. The Financial Aid Academic Year form is displayed.



4. When everything is accurate and complete on this form, the student's FAFSA has been completed, and the EFC has been calculated, click **Package**.

   Note: If a student does not have a FAFSA or ISIR on file and has an undetermined dependency status/model, you are prompted to assign the student with a Dependent status/model when packaging a FFEL or Direct parent PLUS loan. If you do not assign the student with a Dependent status, CampusNexus Student relies on existing validations and you cannot package the parent Plus loan. Additionally, the student's dependency model remains undetermined. If you assign the student with a Dependent status, CampusNexus Student updates the student's record, allowing you to proceed and package the Direct Parent PLUS award.

   After a Direct Parent PLUS Loan has been awarded for a student, CampusNexus Student validates the Dependency status. If there is a discrepancy between the manually updated Dependency status and the Dependency status from a FAFSA or ISIR now on file, CampusNexus Student displays a validation message to alert the

Financial Aid Officer that the award needs to be refunded or canceled since it no longer applies for the student. An audit record is created indicating the person that updated the Dependency status. The COD export for the Direct Parent PLUS loan will export the updated Dependency status as well. For dependent students, if their parents had applied for a PLUS loan, the value selected in the PLUS Credit Decision box is displayed in the Financial Aid Packaging form as a read-only field.

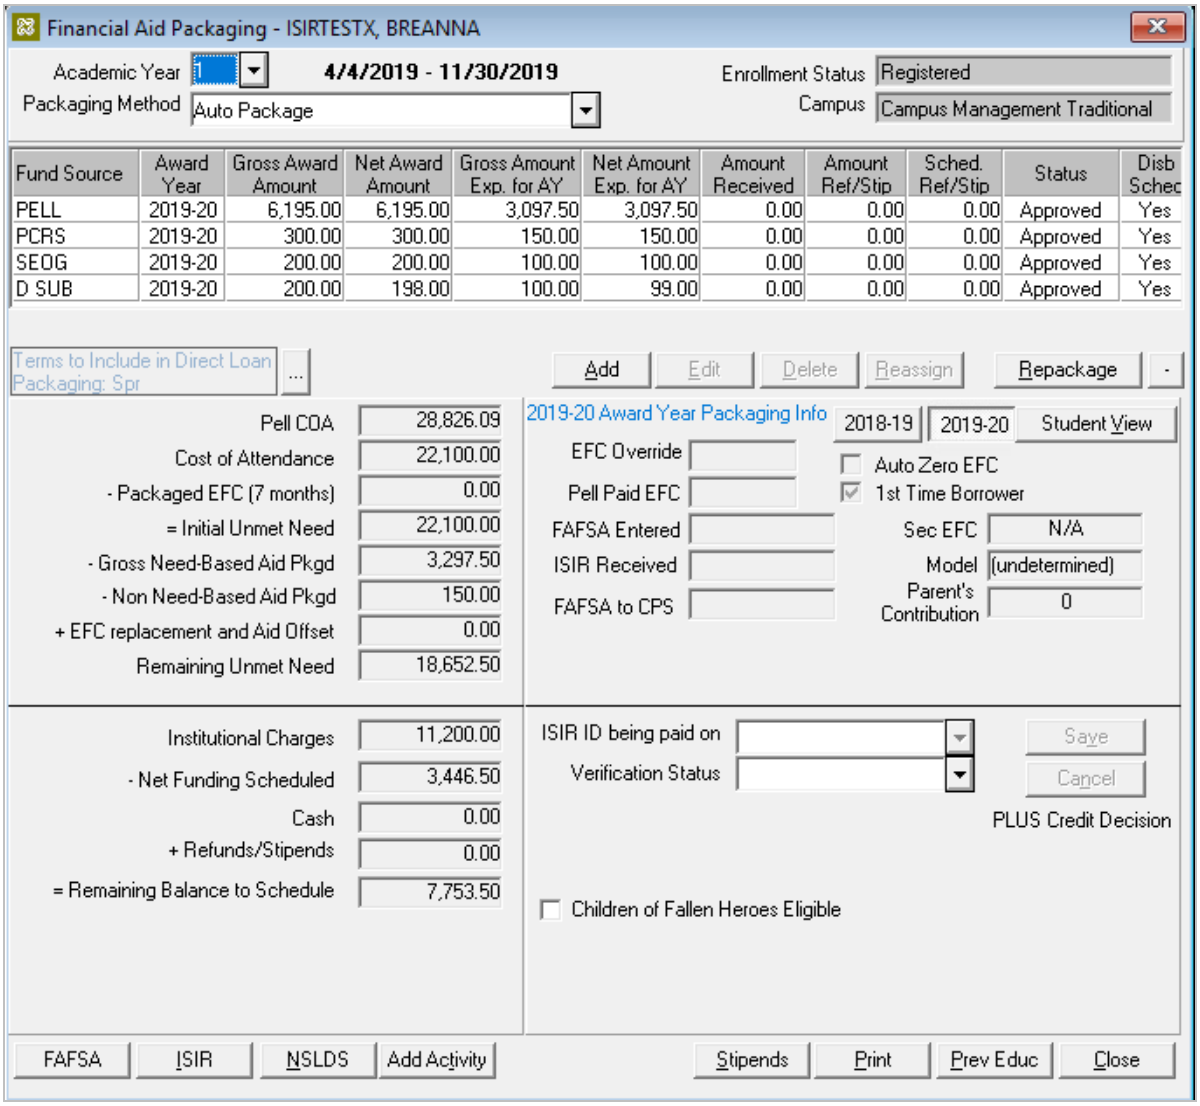
5. The Financial Aid Packaging form is displayed. The grid on the form can be a 'Standard' or 'Alternate' Student's Package Remaining Balance to Schedule (RBS) grid.

    - If **Standard** was selected as the Student's Package RBS grid in the Financial Aid - Settings screen accessed through Setup > Financial Aid > Packaging, the (standard) Financial Aid Packaging form is displayed.
    - If **Alternate** was selected as the Student's Package RBS grid in the Financial Aid - Settings screen accessed through Setup > Financial Aid > Packaging, the Financial Aid Packaging form is displayed.

    On either form, you can **Add**, **Edit**, **Delete**, **Reassign**, **Package**, or **Repackage** the student's financial aid fund sources for the selected academic year.

    Adding, changing, or deleting this information triggers an automatic posting of information to the Financial Aid Audit folder. If your institution has chosen to recalculate financial aid packages based on a recalculated EFC, and if the ISIR ID is the same as the ISIR ID with the corrections made to it, CampusNexus Student asks you if you want to use the recalculated EFC to package aid.

    The following is an example of the standard Financial Aid Packaging form.



6. Click **Close** to close the form. You are returned to the Academic Year form.

Note: Much of the data on the Packaging form is carried over from other sources or is calculated by CampusNexus Student. Elements that are dimmed cannot be changed on this form.

Field Descriptions: Standard Packaging Form

Field	Description
Academic Year	This list box indicates the academic year for which you are packaging the student.
Enrollment Status	This read-only field is the current enrollment status of the student you are packaging.

Field	Description
Packaging Method	Select the Packaging Method to be used for this student in this academic year from the list box. **Note**: Students that are configured with the Unsupported Dependent check box enabled are packaged with Unsubsidized Staff loans only, despite the value displayed in the Packaging Method field. The logic for gathering the rows to populate the grid is as follows: • First, CampusNexus Student selects all records from the student's FA Award Schedule where the Academic Year equals the Academic Year in the Student Academic Year table. It groups the records by the Student Aid ID (fund source) so each unique ID will constitute a new row on the grid. • Then, CampusNexus Student finds any records in FaStudentAid where Academic Year equals the Academic Year in the Student Academic Year table AND no FA Award Schedule records exist in the FA Schedule table for the ID. Each record found will constitute a new row on the grid.
Fund Source	This is the source of funds for this element of the financial aid package.
Award Year	This is the award year for which the funds are awarded.
Gross Award Amount	This is the amount packaged before bank fees have been deducted.
Net Award Amount	This is the amount packaged after bank fees have been deducted.
Gross Amount Exp for AY	This is the Gross amount of the disbursements in the academic year adjusted for refunds. This enables staff members to reconcile the award disbursements with the amounts in the Need Analysis grid. Note: When a refund is posted for a Direct Loan, any fee adjustments for the loan are factored into the gross amount calculations made in this field. This ensures that the gross amount for the Direct Loan displayed in the Need Analysis grid is accurate.
Net Amount Exp for AY	This is the Net amount of disbursements in the academic year, not adjusted for refunds. This enables users to reconcile award disbursements with the Net funding scheduled in the RBS grid.
Disb Sched	The Disbursement Scheduled field shows whether disbursements have been scheduled for each FA fund source. This column is populated with Y or N. You can quickly determine if an expected disbursement schedule exists for each FA fund source packaged in the specified academic year. For estimated awards, this field is initialized to N and schedules are not automatically calculated.
Amount Received	This is the amount received to date from the selected fund source.
Amount Refund/Stip	This is the amount refunded to the selected fund source or stipends paid to the student to date from this fund source.
Scheduled Refund/Stip	This is the amount of scheduled refunds and stipends to be paid from the selected fund source. The Scheduled Refunds/Stipends column is calculated by summing all scheduled refunds and stipends from the FA Refund and Student Accounts Stipend Schedule tables.

Field	Description
Status	This is the status of the fund source with respect to this package, in other words, estimated, approved, canceled, or pending. The status of the fund source will be captured and posted to the Financial Aid Audit Folder.
Terms to Include in Direct Loan Packaging: Fall, Spr	Using the Term Association configuration is necessary for term based program versions in CampusNexus Student to determine Loan Period and Academic Year dates. These are required to be accurately reported to COD, NSLDS under guidance provided in Dear Colleague Letter (DCL) GEN-13-13. Institutions that choose not to use the Term Association feature will be responsible for manually managing and adjusting Loan Period and Academic Year dates to ensure regulatory compliance required under GEN-13-13. This includes processes such as Gainful Employment and SSCR. This is used to display the terms that are being packaged for the Academic Year for Direct loans. Click to display a dynamic list of the terms (Summer, Fall, Winter, Spring) available for packaging within the Academic Year. The selected terms are used to build the loan period dates on the Direct Loans. This will only appear for enrollments with a program versions using an Academic Calendar that is Standard Term (2, 3, 4) and the expected start date matches the configured start as well as the start date of the first term in the Term Association form.
No Term Association	If the Academic Years are not built using Term Association, then "*No Term Association*" is displayed on the form. This can happen if Term Association is not fully configured, or if the user selected an expected start date during the enrollment process that does not coincide with a configured Term Association start date.
Add	Click **Add** to add a new fund source to the student's financial aid package. Adding a fund source will generate an automatic posting of package amount, award year, fund source and status to the Financial Aid Audit Folder. If you click Add for a fund source that has been deactivated for the award year and campus, the fund source will not be available for selection in the fund source list in the New Source of Aid screen.
Edit	Select a fund source on the grid and click **Edit** to view or change it. The appropriate form is displayed. Editing a fund source will generate an automatic posting of package amount, award year, fund source, and status to the Financial Aid Audit Folder. If you select an existing fund source that has been deactivated for the award year and campus, the Edit button will be labeled View. The Delete, Reassign, and Student View buttons will be disabled and no changes can be made for the fund source. In addition, a message will appear in red at the bottom of the screen: "*Selected fund source is deactivated for this award year*" if a single fund source is deactivated for the award year and campus; or it reads "*Selected fund sources are deactivated for this award year*" if multiple fund sources for the award year and campus were deactivated.
Delete	Click **Delete** to remove a fund source from the student's FA package. A deleted fund source will generate an automatic posting of package amount, award year, fund source, and status to the Financial Aid Audit Folder.

Field	Description
Reassign	Click **Reassign** to access the Package Move Aid form. The form allows you to select from a list of Academic Years to reassign the aid. When reassigned, the FaStudentAyID will be updated in FaStudentAid, FaSched,edits and Fa Disb for the selected student aid record. The Reassign button is available only if: • The "Allow to reassign Academic Year on Student Aid?" option is enabled. • The user has Edit access to the Student Packaging form. • The enrollment has more than one academic year.
Package/Repackage	When the student is packaged for the first time, this button is labeled **Package**. Click this button to package the student's financial aid automatically using the available data and the packaging method for the academic year. After the student is initially packaged, the label on this button changes to **Repackage**. Click it to redo the automatic packaging of the financial aid. When you auto-package a direct loan award for an overlapping loan period and did not populate the fields "Overlap Period Credits/Hours" and "Overlap Period Weeks" in the “NSLDS Loans / Overlapping Loan Periods” tab of the NSLDS Previous Institute Details form, the message below is displayed. The "Overlap Period Credits/Hours" and "Overlap Period Weeks" are required to create loan periods to award direct loans for the overlapping loan period.  When adding loans, CampusNexus Student compares the packaged amount with the loan limit set up for the fund source. If the amount is greater than the loan limit, CampusNexus Student uses the loan limit. See Campus Financial Aid, Fund Source, Award Year Settings, and Packaging for additional information. When editing loans, if the loan amount exceeds the loan limit for the fund source for the campus, an error message is displayed, stating that the amount entered is greater than the allowable amount and the loan amount will be set to the loan limit amount.

Field	Description
	The button just right of the Package/Repackage button enables you to expand or collapse the window that contains the grid of FA fund sources. The symbol on the button changes as follows: . The grid has not yet been expanded. Click to expand. /\ On the expanded form this button will restore the grid to its original shape. \/ The grid has been expanded and restored. Click to expand. **Note:** The package function uses the loan limits and bank fee of 2.5.% for DIRSUB/DIRUNSUB awards with first disbursement after July, 1st 2007 as stated on COD Technical Reference. CampusNexus Student checks loan limits and adds the preparatory professional course work indicator from the program version.
Student View	Click **Student View** to see a student-centric view of awards. You can filter the view by Award Year, Fund Source, Fund Source Type, and/or Enrollment. Award Detail and Summary information is displayed depending on the selection criterion. The **Refresh Awards** button returns only the Awards Summary and Awards Detail information that matches the selection criterion, while the **Reset Filter** button displays ALL award records for the student. You can **Edit** the Award Records directly from this form if you have permission. If no awards are allocated for any of the student's Enrollments, the Student View button is not available.
COA and Need Data	The calculated cost of attendance and student need data is displayed below the grid. These fields cannot be changed.
Pell COA	This field only appears on the Standard Students Packaging RBS grid. Calculated Pell Cost of Attendance is based on a nine-month academic year. If your academic year is longer or shorter, this value may differ from your estimated COA below. This field is not available when selecting the Alternate RBS grid.
Cost of Attendance	This cost of attendance (COA) budget value is carried over from the academic year form. **Note**: The Cost of Attendance will increase if “Add bank Fees to COA” is set to Yes.
Packaged EFC (x months)	This is the Expected Family Contribution used for packaging. If the COA budget is not based on 9 months, this figure will be the alternate EFC value for the number of months in the budget. The Packaging EFC value is determined as follows: • If the number of months in the academic year is nine, the Packaging EFC will be the Pell Paid EFC. • If the number of months in AY is not nine and is not zero, the Packaging EFC will be the value calculated for the number of months in the academic year. This field is labeled EFC [#months] on the Alternate RBS Grid.
Unmet Need	Unmet need is the difference between cost of attendance and the Packaging EFC. This field is labeled Need on the Alternate RBS grid.

Field	Description
Gross Need Based Aid Packaged	CampusNexus Student displays the gross amount of financial aid packaged based on the Department of Education's definition of need-based aid. For the Alternate RBS Grid, Gross Need Based Aid Packaged is labeled the same as the Standard RBS grid. **Note**: The Need Based Aid packaged amount is populated as per the configuration of the fund source on the Fund Source Code Setup form.
Non-Need Based Aid Packaged	This is the amount on Non-Need-Based Aid Packaged. It includes sources such as unsubsidized loans where financial need is not a criteria for the award. **Note:** The Non-Need Based Aid packaged amount is populated as per the configuration of the fund source on the Fund Source Code Setup form.
Total Aid Packaged	This field only appears on the Alternate RBS grid and represents the amount of the Gross Need Based Packaged plus the Non-Need Based Aid Package.
COA (-) Total Aid Packaged	This field only appears on the Alternate RBS grid and represents the amount of the Cost of Attendance plus the Total Aid Packaged.
Need (-) Total Aid Packaged	This field only appears on the Alternate RBS grid and represents the amount of the Need minus the Total Aid Packaged.
Remaining Need	Remaining Need is Unmet Need minus Net Need Based Aid Packaged.
Cash/Other Packaged	This is funding provided by the student or by sources other than the Department of Education, for example, agencies, scholarships, and student-provided resources. The logic for calculating this field is as follows. • CampusNexus Student sums the net amount for all records in the student's FA schedule where the academic year is the same, the schedules status is not equal to C, and the fund source type is Cash or Other. • CampusNexus Student sums the amount packaged minus the bank fee for all records in FaStudentAid where the academic year is the same, no records exist in the schedule for this FA, and the Fund source type is Cash or Other. The Cash/Other Packaged will be the sum of calculations 1 and 2.
Institutional Charges	This is the total of tuition, books and supplies, and other charges that have been designated as institutional charges. Institutional charges appear on the students ledger card, and the institution expects to be paid for them. Cost of attendance allowances (non-institutional costs) such as room, board, and travel do not appear on the students ledger card, but they are funded in the FA package.
Net Funding Scheduled	The Net Funding Scheduled is Net Need Based Aid Packaged plus Cash/Other Packaged. This amount will not include interest from cash plans.
Cash	This is the total of other funding sources paid directly to the student. This amount is the total paid for Cash plans and includes the interest. It is display only and not used in the top-down math to determine the Remaining Balance to Schedule.

Field	Description
Stipends	The Stipends Scheduled is the total calculated by CampusNexus Student of all stipends for the student in the Academic Year being packaged. CampusNexus Student adds this total to the Remaining Balance to Schedule.
Remaining Balance to Schedule (RBS)	This is Institutional Charges minus Net Funding Scheduled. • If this amount is greater than zero, additional funding may be necessary. • If this amount is zero, institutional charges have been covered by the package. • If this amount is less than zero, a stipend may be scheduled to return the over packaged amount to the student to cover allowances for room, board, travel, and so on. The EFC used in the remaining balance to schedule formula is the Alternate EFC that corresponds to the number of months in the students academic year. • If the number of months is nine, the EFC will be the Pell Paid EFC. • If the number of months is not nine, the applicable alternate EFC will be used. Loan amounts used in calculating the remaining balance to schedule are principal-only.
EFC Override	Use the EFC Override field to enter a new Expected Family Contribution (EFC) value to be used in the remaining balance to schedule and auto-packaging functions. CampusNexus Student previously required you to submit a correction to change an EFC. Some situations result in a need to change the EFC without requesting a new ISIR. This EFC Override is incorporated in several reports when the value of the setup flag is not null. The FAFSA calculation prompts the user to store the EFC Override if the setup option is Yes. See Financial Aid General Setup for more information about this feature.
Pell Paid EFC	This is the primary or secondary Expected Family Contribution calculated from the FAFSA data based on a nine-month academic year. **Note**: This field is labeled 'Recalc. EFC' instead of 'Pell Paid EFC' if financial aid advisors have chosen to award students with a recalculated EFC before the official ISIR has been received. This function works under the following conditions: • Awards must be in an Estimated status. If the award is in an Approved status, financial aid advisors must manually change the Approved status to an Estimated status before using this function. No changes can be made to estimated financial aid awards after any financial aid disbursements have been paid. • The Campus setup flag Award Students with ISIRs Only (in Setup > Financial Aid > Campus Locations > Campus (Edit/Add) > Financial Aid tab) has NOT been checked. • The Campus setup flag Award Students with Recalculated EFC (in Setup > Financial Aid > Campus Locations > Campus (Edit/Add function) > Financial Aid tab) HAS been selected.
Sec EFC	Secondary EFC, also calculated from the FAFSA.
Auto Zero EFC	This box will be selected if the student qualifies for an automatic zero EFC.

Field	Description
FAFSA Entered	This is the date that the FAFSA was entered in CampusNexus Student.
ISIR Received	The date that the ISIR was received from CPS.
FAFSA to CPS	The date that the FAFSA was sent to the Central Processing System (CPS) of the Department of Education.
Model	This is dependency status of the student is used in calculating Pell grants and arranging loans. The options are Dependent, Independent, and Undetermined. **Note**: If a student does not have a FAFSA or ISIR on file and has an Undetermined dependency status/model, you can assign the student with a Dependent status/model when packaging a FFEL or Direct parent PLUS loan. In this scenario the model will be Dependent*.
1st Time Borrower	This is carried over from the Academic Year form and indicates that the student is a first-time borrower. Loan disbursements will be held back by the number of days indicated in the Financial Aid Settings.
ISIR ID Being Paid On	The ID of the ISIR for which Pell is being paid. If a student has more than one ISIR on file for the designated award year, you can select the ISIR ID that the Pell grant will be paid on. This field is not always enabled. This field is read-only if either of the following conditions is true: • The student's Pell Origination Status is equal to A or B. - OR - • A Pell Grant is packaged for the designated award year, and at least one disbursement record in the schedule has a status of P or R. If neither of the above conditions is true, and the ISIR ID being paid on is enabled, the following edit logic will apply: • Does the student have more than one ISIR on file for the designated award year? If more than one record does exist for the student, a list will be provided. The list will list one record for each ISIR on file for the student. CampusNexus Student displays the Transaction ID for each record in the ISIR table for the student. The default value in the ISIR ID being paid field is the contents of the Student Pell Transaction ID. If you select a different ISIR ID to pay on and click Save, several columns in Student Pell table are updated. (A Save button has been added on this section of the form.) If you edit the verification status or the ISIR ID Being Paid On field, the Save button will be enabled.

Field	Description
Verification Status	This function enables you to update a students verification status manually. For additional information on verification status, and functions within CampusNexus Student to perform automated updates, see Verification. Select the verification status of the FAFSA/ISIR. The options are: • Blank: Not Selected and not verified • S: Selected, Not Verified • V: Verified • W: Without Documentation. The ISIR import procedure sets an ISIR selected for verification to Selected, Not Verified and an ISIR not selected to blank. The Pell origination extract procedure rejects a record with a verification status of Selected, Not Verified. This forces the user to make an appropriate selection. The Department of Education has defined Blank, Verified, or Without Documentation as the only valid codes. However, institutions will lose the ability to determine and locate students selected for verification if all ISIRs are set to a BLANK Verification status on Import, as there will be no traceability to an ISIR selected for Verification. The use of an S, although not valid on the origination extract, requires institutions to address and manage the verification status for those students selected prior to extracting a Pell Origination. (Since CampusNexus Student has always maintained the origination status on Import as Selected or Not selected, the absence of a code to define these selections we felt cr eated a hardship on the FA officers ability to manage the verification status. Using the DOE codes, we would have had to map all ISIRs to Blank, because we could not state that ALL ISIRs Not selected were Verified). See also ISIR Received and Verification.
Student Identifier	The blue text is a display of the student identifier.
Children of Fallen Heroes Eligible	Pell eligible students are eligible to receive a maximum Pell Grant award for their current award year if their parent or guardian died in the line of duty working as a public safety officer (a police officer or firefighter). To qualify for this grant, the student must be eligible for a Pell grant, have a Pell eligible Expected Family Contribution (EFC), and be less than 24 years of age or enrolled at a higher education institution at the time of the death of their parent or guardian. A student's eligibility for the scholarship thereby automatically reduces their packaged EFC to zero. Once a CampusNexus Student user has confirmed that a student is eligible for the Children of Fallen Heroes scholarship, select this CFH check box (only applicable for award year 2018-2019 or higher). An informational message is then displayed, letting the user know that CampusNexus Student is using an EFC of 0 to determine award amounts. The packaged EFC will be displayed as 0 in the Remaining Need grid. Note: If schools are packaging non-Title IV awards that utilize the EFC in the calculations, they will have to calculate those manually for the student's normal EFC. Also note that if there is no ISIR ID being paid on, then the CFH check box is still displayed but not enabled.

Field	Description
Career Pathway Alternative Pell	Financial Aid Administrators can select this check box to properly package and award a student's financial aid when they are eligible to receive a Career Pathway Alternative Pell Grant. The Limited Pell Grant has a maximum amount of $4,860 for the 2015-2016 award year. The Career Pathway Alternative Pell Grant Disbursement Schedules use the same maximum Pell Grant eligible expected family contribution (EFC) that was used to develop the Regular Federal Pell Grant Payment and Disbursement Schedules. Once the student's annual award amount is determined using the Career Pathway Alternative Pell Grant Disbursement Schedules, all other Pell funding calculations are the same as those used for Regular Pell Grant awards, but based on the Career Pathway Alternative Pell Grant Disbursement Schedules. Calculation of the grant is based on the student's full Scheduled Award under the Regular Federal Pell Grant Payment Schedule. **Note**: This check box is only visible on the form if the student has an ATB value (ATB code 12 or 14) populated for their Previous Education (Admissions>Education>Previous Education).
Unsupported Dependent	Financial Aid Administrators may use Professional Judgment by selecting this check box to authorize a FFEL or Direct Unsubsidized Stafford loan (in the selected award year), to a dependent student when that student's parent or parents have stopped providing financial support for the student and refuse to provide information on a FAFSA. The application creates and maintains an audit record that indicates the authorized user who selected the Unsupported Dependent check box to a student based on the Professional Judgment decision. **Note**: This check box is only visible on the form if the ISIR associated with the students Academic Year qualifies the student as eligible for a Professional Judgment decision. ISIR reject codes that are eligible are **15** plus any combination including the following: E, F, J, K, S, T, 2, 6, 7, 9, 10, and 12. In addition, this check box may be visible, but disabled, if the student has an ISIR
Rejected	Rejected indicated on the form, with reject codes that do not meet the Professional Judgment decision criteria.
Save	Click Save to save changes if you edit Verification Status or ISIR ID Being Paid On. If you change either, the Save button is enabled.
Cancel	Click Cancel to cancel changes if you edit Verification Status or ISIR ID Being Paid On. If you change either, the Cancel button is enabled.
FAFSA	Click FAFSA to complete a Free Application for Federal Student Aid. A FAFSA must be on file and calculated in CampusNexus Student for most financial aid packaging functions to work.
ISIR	Click ISIR to see a list of ISIRs on file for the student and to print the students ISIR

Need Analysis Packaging

The purpose of the upper grid is for calculating Remaining Need as aid is added to the student's package to help you determine when a student is fully packaged for an Academic Year. It is organized in a top-down math format giving a summary view of the gross amounts packaged. The logic uses a disbursement-level summation of gross amounts, since an award could have one disbursement in one academic year and another disbursement in the subsequent academic year.

The system also allows for Estimated Family Contribution (EFC) replacement which is used when a student with an EFC has Direct Subsidized loans or Campus-Based aid as part of the student's package. The 'EFC replacement and Aid Offset' field will dis-

play amounts from fund source types that can replace EFC which are greater than Initial Unmet need. This will allow the top-down math to not present the student as over packaged once the total package amount exceeds the Initial Unmet Need.

Additionally, when a student with an EFC has no Direct Sub Loans or Campus-Based aid, the 'EFC replacement and Aid Offset' field will display amounts from Non-Need Based aid in the student package that are greater than Initial Unmet Need. This will allow the top-down math to not present the student as over packaged once the total packaged amount exceeds the Initial Unmet Need.

Packaging Configuration:

- Limit Awards to COA: The total gross amounts for the disbursements (minus refunds) in the Academic Year will not exceed the COA.
- Add Bank Fees to the COA when packaging loans: When set to Yes, the COA is increased by the amount of the bank fees when the award is saved. Note that the loan being packaged is the award that would meet the COA, the COA will still be increased by the amount of the fees when the award is added. The total amount of the loan could then again be increased or other aid added for the increased COA amount.

Campus-Based Aid:

- SEOG
- Work Study

Categorizing the Fund Sources

Fund Source	Type	Details
PELL	Need Based	No restrictions within Packaging
Adheres to Need (Include Pell with all packaged awards when validating amounts)		
DIRSUB	Need Based	Adheres to Need
SUB	Need Based	Adheres to Need
LOANNB	Need Based	Adheres to Need
GRANT (other than Pell NB (SEOG))	Campus Based	Adheres to Need
WORKST	Campus Based	Adheres to Need
OTHER NB	Need Based	Adheres to Need
SCHOLAR NB	Need Based	Adheres to Need
Replaces EFC (Total of these amounts over EFC is considered EFA and reduces need)		
DIRPLUS	Replaces EFC	Adheres to COA
PLUS	Replaces EFC	Adheres to COA
DIRUNSUB	Replaces EFC	Adheres to COA
UNSUB	Replaces EFC	Adheres to COA

Fund Source	Type	Details
TEACH	Replaces EFC	Adheres to COA
LOANNNB	Replaces EFC	Adheres to COA (Flag for Exclude from EFA removes it from Need analysis and package to COA validation)
Conditional Aid (EFA if SUB, SEOG, Work Study are in the package, then amounts from these adhere to Need. Otherwise, they are COA)		
OTHER NNB		Conditional (Flag for Exclude from EFA removes it from Need analysis and package to COA validation)
SCHOLAR NNB		Conditional
Grant (other than Pell NNB)		Conditional
Not Included in EFA or Need Analysis		
IASG		
Other

Retired		
PERKINS		Retired
ACG		Retired
Smart		Retired

Dependent Student without a FAFSA or ISIR on file

When a student does not have a FAFSA or ISIR on file and has an Undetermined dependency status, the FA Officer is prompted to assign the student with a Dependent status when packaging Direct Parent PLUS Loans. When the student's dependency status is set to Dependent, CampusNexus Student updates the student's record, allowing the Financial Aid Officer to proceed as normal and package the Direct Parent PLUS award.

After a parent PLUS Loan has been awarded on a student, CampusNexus Student validates the dependency status/model for the student upon saving the award. If there is a discrepancy between the manually updated Dependency status/model and the Dependency status/model from an FAFSA or ISIR on file, a validation message alerts the FA Officer of the conflict. The FA Officer can resolve this conflict by refunding and canceling any remaining scheduled payments, canceling the award, or correcting the FAFSA or ISIR to a Dependent status/model.

Note: The Federal Parent PLUS Dependency Status Conflicts report can display the student details if there is a dependency conflict.

NSLDS

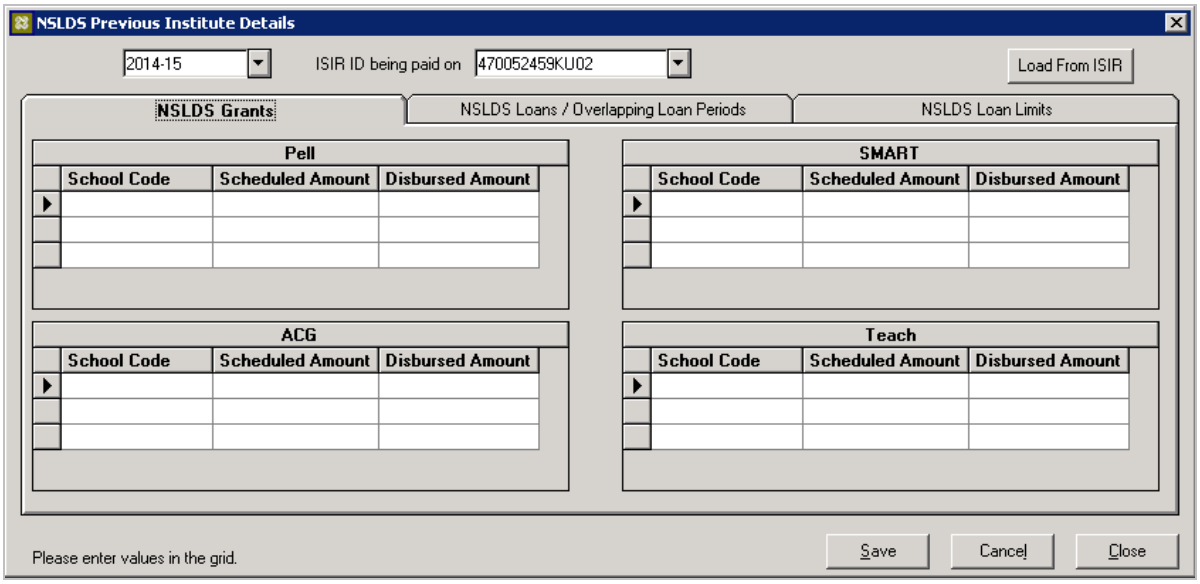
The National Student Loan Data System (NSLDS) maintains a history of Title IV aid awarded to students nationally. This data is shared with CPS, which then populates the student awards in the NSLDS section of the ISIR.

Note: Reject 24 for the NSLDS Fraud Loan Flag was added to the Complete Reject Edits section. This reject was implemented on January 2, 2014 for the 2013-2014 and 2014-2015 award years.

The NSLDS Subsidized Loan Eligibility Used Field (position 445) provides the total time during which the student has received Direct Subsidized Loans as of the date of the ISIR; it does not include the total time during which the student has received Direct Subsidized Loans while enrolled in a non-credential teacher certification program. In general, applicants may not receive Direct Subsidized Loans for more than 150% of the published length of the program in which they are currently enrolled. This field contains numeric six-digit values, 000v000 to 999v999, where "v" is an implied decimal and is excluded from the output.

The 2014-15 ISIR Summary Report also includes the new Subsidized Usage Limit Applies (SULA) Flag (where the valid values are Y or N). This flag will be viewed for all Academic Years but will only be populated for 2014-15 and higher.

Click **NSLDS** to view and edit the NSLDS Previous Institute Details form.



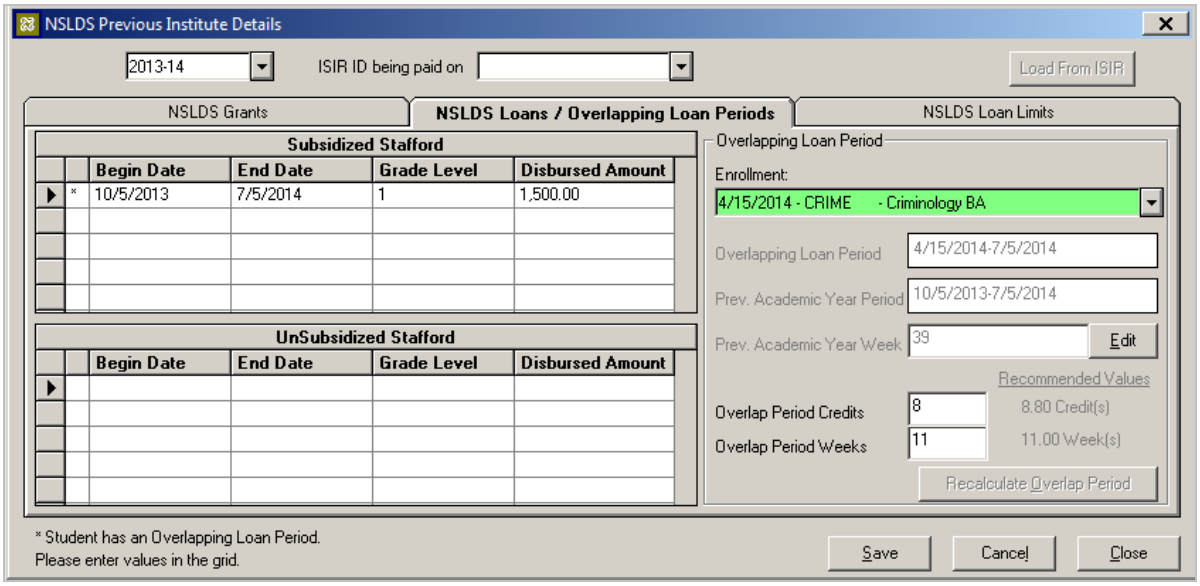
The NSLDS Previous Institute Details form loads certain data elements contained in the NSLDS section of the ISIR record (for example, previous loans or awards paid to the student) based on the selected student, award year, and transaction ID. The purpose of this form is to ensure that regulations related to overlapping loans and Title IV grants paid at a prior institution can be captured in CampusNexus Student and considered when awarding Title IV aid.

- **Award Year**: Displays the applicable year for the award. The Award Year is based on the academic year sequence selected on the Financial Aid Packaging form.
- **ISIR ID being paid on**: Displays the transaction ID of the ISIR for which the grants are being paid. If a student has more than one ISIR on file for the designated award year, the box displays the available transaction IDs.
- **Load from ISIR**: Loads values based on the selected award year and transaction ID. The Loan from ISIR button is disabled if the transaction ID is blank.
- **Grants tab**: This tab displays the award details (School Code, Scheduled Amount, and Disbursed Amount) for applicable, available awards.

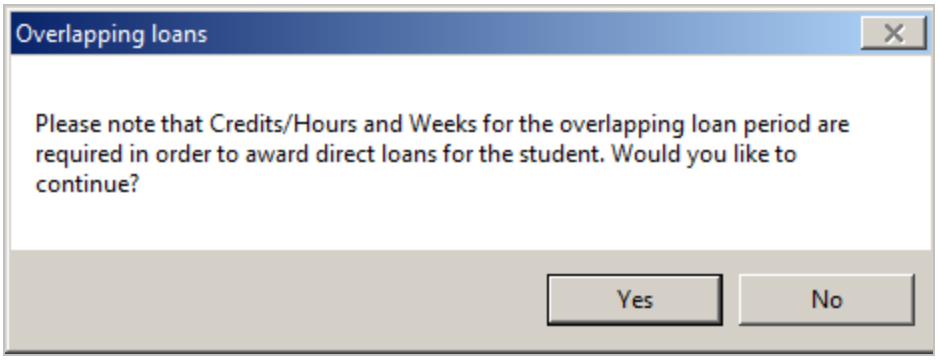
Enter appropriate values and click **Save** to update the database with the latest data.

NSLDS Loans / Overlapping Loan Periods tab

This tab displays details (Begin Date, End Date, Grade Level, and Disbursed Amount) for subsidized and unsubsidized Stafford loans that have loan periods which overlap the current academic year sequence on the Financial Aid Packaging form.



If a student has overlapping loan periods, and the overlapping loan period feature is enabled (under the Financial Aid tab of the Campus Locations Setup), then when you click Save without populating the Overlap Period Credit and the Overlap Period Week-s,CampusNexus Student alerts you that overlapping loan period exists and that the credits/hours and weeks for the overlapping loan period are required to award direct loans for the overlapping period.



Click **Yes** to continue.

Based on the overlapping loan period information and transferred credits/hours from the prior loan period, CampusNexus Student calculates and recommends default values for credits/hours and weeks for the stub loan period as follows:

a. If the student has approved transfer credits from the prior loan period, CampusNexus Student subtracts transfer credits from the full academic year definition of the program to obtain the credits/hours for the stub loan period. The number of weeks is calculated based on the date range of the overlapping loan period.

b. If the student has no approved transfer credits from the prior loan period, CampusNexus Student prorates by first using the date range of the overlapping period to determine the number of weeks (normal rounding) in the stub loan period. Next, CampusNexus Student uses the number of weeks in the stub loan period and the full academic year definition to prorate the credits/hours for the stub loan period (rounding to 2 decimal places).

For more information, see Packaging for Overlapping Loans.

Click **Recalculate Overlap Period** after you specify values in the Overlap Period Credits or Overlap Period Weeks fields. CampusNexus Student uses the values from these fields to calculate loan periods when loan periods are added in the Awards folder on the Loan Period form. The Awards folder displays a message that an overlapping loan period exists for the academic year.

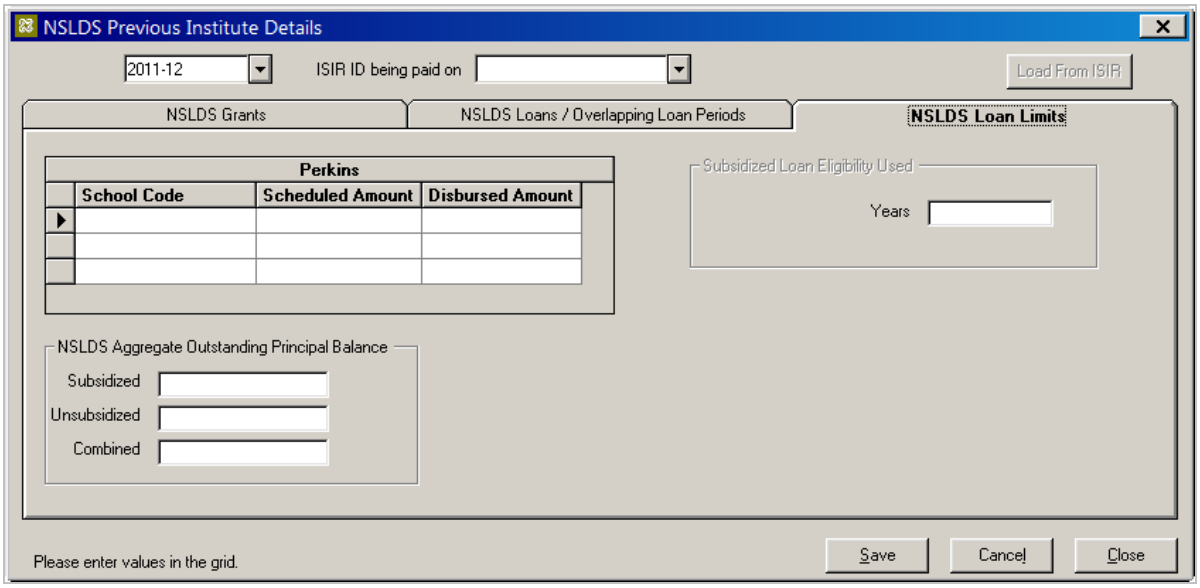
When a stub loan period is not yet completed, updating the credits/hours or weeks attribute of the overlapping period will cause the SPE tool to reevaluate the progress of all the loan periods. This means when you update the credits/hours or weeks of the overlap period on the NSLDS form and if loan periods exist for the enrollment, CampusNexus Student checks whether the stub loan period is completed.

- If the stub loan period is not completed, the following message is displayed: "*Loan period(s) exist for this enrollment. The existing overlapping loan period will be updated with the new credits/hours and weeks attributes and progress of all loan periods will be reevaluated as a result of this change. Would you like to continue?*" Click **Yes** to update the attributes on the stub loan period as well as attributes of the LPP > Reevaluate the Schedule complete flags of the loan periods and put the student through AY/LP adjust queue to be evaluated. Click **No** to cancel the change.
- If the stub loan period is completed, the following message is displayed: "*Loan period(s) exist for this enrollment and the existing overlapping loan period has been completed. Changes to the credits/hours or weeks attributes of the overlap period are not allowed.*" Click **OK**. The original values are restored.

Specify appropriate values and click **Save** to update the database with the latest data.

NSLDS Loan Limits tab

This tab enforces the annual and aggregate loan limits defined by the Department of Education for Stafford loans. Use this tab to limit a student's loan based on the appropriate aggregate loan limit when packaging Stafford loans. The aggregate loan limits are affected by dependency status; whether a borrower is an undergraduate, graduate, or professional student; or has increased eligibility allowed for health-profession students.



- Under **Perkins**, enter or edit the appropriate values for School Code, Scheduled Amount, and Disbursed Amount. The Perkins table relates to the grants applicable to the student, in addition to Pell, SMART, ACG, and Teach grants.
- Under **NSLDS Aggregate Outstanding Principal Balance**, if applicable, enter the values to specify the aggregate loan limit for Stafford loans:

- **Subsidized**: value of unsubsidized Stafford loan applicable to the student. If the value exists in the FANSLDS database, it is loaded.
- **Unsubsidized**: value of unsubsidized Stafford loan applicable to the student. If the value exists in the FANSLDS database, it is loaded.
- **Combined**: combined value of the subsidized and unsubsidized loan balance applicable to the student. If the value exists in the FANSLDS database, it is loaded.

- Under **Subsidized Loan Eligibility Used**, enter the appropriate number of years (whole numbers only). This field is available on 2014-15 ISIRs and forward.

Click **Save** or **Close** to return to the Financial Aid Packaging form.

On the Financial Aid Packaging form, click **Add Activity** to add an activity in Contact Manager.

FA History: This command is not used at this time.

Click **Stipends** to set up a stipend schedule for the student based on funds awarded in this academic year. (See View > Student Accounts > Stipend Schedule.)

Click **Print** to print a Budget Worksheet report. The report contains all the information included on the packaging form.

Add ACG/Edit ACG: One eligibility requirement for the new ACG grant is that a student must have completed a rigorous course of study. There are three Eligibility/Payment Reason Codes that must be submitted to COD that satisfy that requirement:

- 01 = Rigorous High School Program
- 02 = Advanced Placement/International Baccalaureate
- 03 = Coursework

If *01 Rigorous High School Program* is selected as the Eligibility/Payment Reason Code, a code for one of the Rigorous Secondary (High) School Programs of Study approved by the U.S. Department of Education must also be submitted in the COD Common Record. CampusNexus Student maintains these Rigorous Secondary (High) School Programs of Study and provides customers with a method of selecting one of the three Eligibility/Payment Reasons for students who qualify for ACG funding in their financial aid package.

This configuration is optional since not all students will be awarded ACG grants. Navigate to the Packaging form. If a student attended an (ACG) eligible HS Program, a button labeled 'Add ACG' is displayed. When the 'Add ACG' button is selected, CampusNexus Student presents the Education form, which contains a section entitled 'Rigorous High School Program'.

Note: If award year 2011-12 is selected, the Add ACG button is disabled.

Select 'ACG Eligible' to enable the Reason Code list. If the '01 Rigorous High School Program' reason code is selected, the State and Eligible Programs lists become enabled and may be selected. Then select a state and eligible program for the state selected.

When the selections are saved, CampusNexus Student returns the user to the Financial Aid Packaging form. The Add ACG button is now displayed as Edit ACG, so that you can modify the selections if necessary.

Admissions staff members can view the Eligibility/Payment Reason Code information by navigating to the Education form. This is the same Education screen that was invoked from the Packaging form above.

Deleting Pell

You can delete a Pell award only if the origination status is N - Not Ready to Send or E - Rejected status. If it is any other status, CampusNexus Student displays the message "*Origination must be a status of 'Not Ready to Send' or 'Rejected' to delete.*" If the origination status is E and the deletion is allowed, the origination status is set to N on the student Pell record related to the award year.

Half License Units

A program code in Financial Aid Packaging (frmFaStudAcadYears) disallows packaging for programs that are "half" license units. Program versions are marked as "Full License Units" or "Half License Units" on the program version setup form.

Packaging Forms

CampusNexus Student provides two Financial Aid Packaging forms:

- One is accessed by navigating to **View > Financial Aid > Packaging**. See Packaging.
- The other by clicking **Package** on the Financial Aid Academic Year form. See Academic Year Form.

Title IV Payment Periods

Establishing Title IV Payment Periods

A payment period consists of two attributes: length of time and number of credits or hours. Programs whose academic calendars are configured to be *Non-Standard Term*, *Clock Hour*, or *Credit Hours without Terms* are eligible for two Title IV payment periods per academic year. CampusNexus Student automatically builds Title IV payment periods upon student enrollment.

Note: *Non-Standard Term* is a conditional academic calendar as defined below.

Department of Education Guidelines

Programs are **no longer allowed** to have more than the defined two payment periods in the lesser of the program, the academic year, or the remainder of the program. You can make multiple disbursements within a single payment period; however, making multiple disbursements within a payment period does not create a new or additional payment period.

Non-Title IV awards can be configured to use Title IV payment periods, use a separate set of non-term payment periods, or not use payment periods at all. The configuration is found under **Lists > Financial Aid > Programs > Program Version > Non-term Payment Period (tab)**. This tab is available for *Clock Hour* and *Credit Hours without Terms* programs.

Programs with an academic calendar of *Non-Standard Term* are evaluated and treated differently than *Clock Hour* and *Credit Hours without Terms*. *Non-Standard Term* programs only receive payment periods for awards that are Title IV loans where the academic terms that comprise the academic year differ in length by 14 days or more. Payment periods are not created for any other award types, or where the academic terms that comprise the academic year differ by 13 days or less.

Note: We recommend configuring term sequencing for *Non-Standard Term* program versions so that the exact terms are known when CampusNexus Student performs the week's comparison to determine if payment periods are needed during academic year creation.

CampusNexus Student creates payment periods using the following logic:

1. Upon enrollment, *Clock Hour* or *Credit Hours without Terms* programs receive two Title IV payment periods. *Non-Standard Term* where the academic years meet the criteria also receive two Title IV payment periods.
2. The program version start date is the beginning point for calculating academic year and payment periods for non-term programs. If the program version start date is NULL, CampusNexus Student uses the expected start date.
3. The weeks and credits that are defined on the AY are divided by 2 and those numbers are assigned to each payment period. *Example*: 36 credits/32 week AY produce two payment periods of 18 credits/16 weeks. The start date is set to the start date of the AY. The end date for payment period 1 is obtained by adding the weeks attributed to the start date of the payment period.

Note: If a partial AY exists and is less than half of a full AY, only one payment period should be created. *Example*: A full AY is 36 credits/32 weeks, and the program contains AY 2, which is 16 credits and 12 weeks since it is less than half of a full AY).

Once Title IV payment periods have been associated with students' academic years, they can be accessed by navigating to **View > Financial Aid > Academic Year** and selecting the Payment Period button. A user with permissions can add, edit, or remove payment periods as needed. Payment period dates can be viewed and the association with the disbursement can be changed within each award detail from **View > Financial Aid > Awards > Edit**.

While non-Title IV awards can be scheduled in Title IV payment periods, Title IV awards cannot be scheduled in non-Title IV payment periods. Furthermore, CampusNexus Student prevents administrators from removing both Title IV payment periods; at least one Title IV payment period must remain for each student. Payment periods cannot be removed if disbursements within the payment period have already been paid.

Updating Academic Year, Payment Period, and Disbursement Date

CampusNexus Student automatically updates the academic year, payment period, and disbursement dates as students progress through non-term based programs, i.e., programs configured with an academic calendar of *Non-Standard Term*, *Clock Hour*, or *Credit Hours without Terms*.

Per Federal Student Aid standards, students enrolled in non-term and clock hour programs must not progress to their subsequent academic year until they have successfully completed the required number of clock hours or credits for each academic year within their program of study. For example, if a student is enrolled in a 48 credit semester non-term program with an academic year defined as 24 credits, the student does not progress to the second academic year until successfully completing 24 credits. If the student was originally scheduled to complete the first academic year on April 5, 2008, for a program that started on September 1, 2007, and the student had successfully completed only 20 credits because of failing one four-semester credit course, the student would remain in the first academic year until successfully retaking and passing the failed course.

Prior to this automation, financial aid administrators were required to evaluate each student's progress and determine if they were eligible for the subsequent academic year. If they were not eligible, academic year end dates were manually extended, and the subsequent academic year begin and end dates were adjusted manually. In addition, scheduled disbursements also required manual adjustments any time academic year dates were adjusted.

The automatic updating capability alleviates the need to manually manage the process of academic year eligibility based on academic progress. The Student Pace Evaluation (SPE) tool assesses students' rate of academic progress and adjusts externship and expected graduation dates accordingly. The tool also assesses students enrolled in non-term based programs and determines their eligibility to advance to the subsequent payment period and academic year based on their rate of academic progress.

When students are eligible for their subsequent payment period, nothing happens. When students are not eligible for their subsequent payment period, CampusNexus Student modifies the students' existing payment period and academic year. The logic that is used to determine the adjustment is explained in the following section.

Title IV Payment Period Adjustment

The payment periods are adjusted by the Student Pace Evaluation (SPE) tool or a scheduled job using the attributes (Credits/Weeks or Hours/Weeks) defined on each student’s individual payment periods and based on the following logic:

The start date of the first payment period is always set to the start date of the first course registered on the schedule. The end date of the first payment period is set to the end date of the course that completes the credits or hours in the payment period if the weeks requirement for that payment period has been met. If the weeks requirement for that payment period has not been met, the end date of the payment period is set to the date that completes the weeks that are required.

If the student has a class in a current status, payment period 2 starts the day after payment period one ends. If not, payment period 2 begins on the day of the next class registered on the student schedule. The end date of the second payment period is set to the end date of the course that completes the credits or hours in the payment period if the weeks requirement for that payment period has been met. If the weeks requirement for that payment period has not been met, the end date of payment period is set to the date that completes the weeks that are required.

Note: If Global is configured as the servicer, the start date of all payment periods will be the day after the prior payment period ends. This is to make sure that the disbursements do not fall between any payment period dates and that a payment period ID is always assigned.

Disbursements: All disbursements associated with a payment period remain within that payment period. If the payment period dates are adjusted such that the disbursement would not fall within the payment period, the disbursement date will be changed to the first day of the payment period.

AY dates: The adjustment logic aligns Academic Year dates to the payment period dates. The start date of academic year 1 is set to the start date of payment period one. The end date of academic year 1 is set to the end date of payment period two. This logic is repeated for all AYs. The graduation date is set to the end date of the course that completes the credits in the program. Disbursements that are set to be processed by Global are not updated with this logic. Any changes made to the disbursement, payment period or academic year dates are audited within the Audit form. Automated updates made by the system are designated with an "automated" user name within the audit record. To view audit records, navigate to **View > Financial Aid > Audit**.

Transfer of credits may accelerate program completion. The logic factors in transfers of credits and decreases the expected graduation date, if applicable, as well as a student's last academic year and payment period. Any scheduled disbursements that are affected by the decrease in academic year length are adjusted to remain within its payment period and academic year dates.

When transfers of credits are applied to students, enrollment officers may synchronize the students' expected graduation dates with the logic of this feature at the time of student enrollment. Once these dates are synchronized during enrollment, the new dates will replace the expected graduation dates that are defined as a result of the program version configuration.

Configuring and Using this Feature

The Title IV payment period creation portion of this feature is effective any time students are enrolled in programs with an academic calendar of *Clock Hour* or *Credit Hours without Terms*. Programs configured as *Non-Standard Terms* apply payment periods for Title IV loans where the academic terms are greater than 14 days. This function occurs automatically for programs configured with those academic calendars as long as "Do Not Use Payment Periods" is not selected under **Lists > Financial Aid > Programs > Program Versions**.

The automated updates for academic year, payment period, and disbursement dates portion of this feature is available as an add-on process which can be installed by a system administrator. Once installed, this feature processes updates without human intervention according to the routine schedule which is defined during installation. To view the automated updates, navigate to **View > Financial Aid > Audit**.

This feature is also available in the Student Pace Evaluation (SPE) tool, which can be accessed by navigating to **Tools > Academic Records > Student Pace Evaluation**. Note that any changes made manually (or with the SPE tool) will be replaced by the automated routine, unless "Exclude from Auto Adjustment" is selected on the Payment Period form.

Packaging for Overlapping Loans

Note: As of CampusNexus Student 15.0, this feature is available for clock hour and non-term programs only.

If a student who enrolls in a clock hour or non-term program after having taken out a loan at another school with an academic year that overlaps the academic year at the second school, the new school may originate a loan for the remaining portion of the program or academic year if the period of enrollment for the loan at the first school overlaps the period of enrollment at the new school. The loan at the new school may not exceed the remaining balance of the student's loan limit at the new school, after the disbursements at the first school are taken into account. The new school may originate a loan for the remaining portion of the program or academic year regardless of whether the new school accepts transfer credits/hours from the prior school.

To use the overlapping loan period feature, the school must activate this feature under the Financial Aid tab of the Campus Locations Setup.

CampusNexus Student can award students when they have overlapping loans by automatically creating the appropriate loan periods and loan payment periods when a direct loan (DIRSUB, DIRUNSUB, DIRPLUS) is added. In addition, financial aid packaging functionality recognizes overlapping periods for awarding. Direct loans eligibility in the first loan period (overlapping loan period) is determined by subtracting the amount received in the prior loan period from the student maximum eligibility in the current loan period. This logic is applicable to all packaging methods (manual packaging, Auto Packaging, and Batch Packaging).

To be eligible to be packaged for the overlapping loan period (stub loan period), the student must meet the following criteria:

- An overlapping loan period exists for the current enrollment. CampusNexus Student uses the NSLDS data from the student's ISIR to determine whether an overlapping loan period exists. This can be confirmed through the NSLDS Previous Institute Details form.
- The number of Credits/Hours attribute and the number of Instructional Weeks attribute for the overlapping loan period must be specified through the NSLDS Previous Institute Details form.

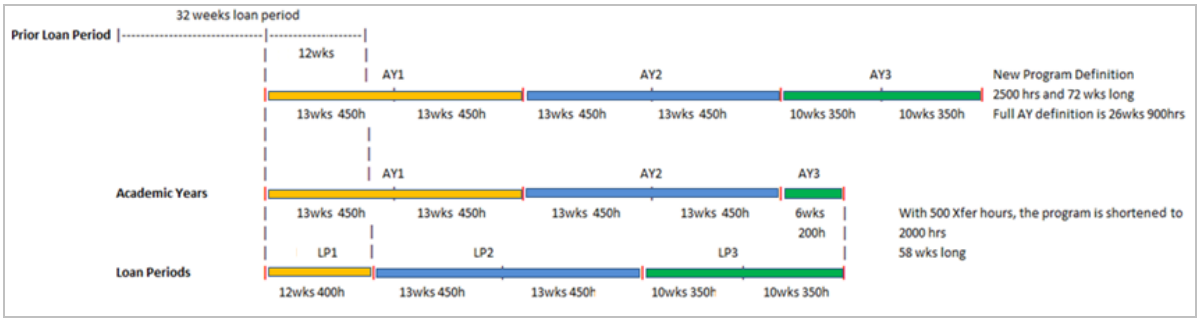
In compliance with the regulations specified in the student FSA handbook, CampusNexus Student packages overlapping direct loans regardless of whether the student has transfer hours/credits from the prior loan period. Also, CampusNexus Student does not use completed credits/hours and weeks as criteria when approving direct loan disbursements associated with the stub loan period. For more information, see Approve Disbursements to Pay.

For schools that wish to use this overlapping loan feature, it is highly recommended that best practices be in place to ensure that student's NSLDS data and approved transfer hours/credits are entered before creating loan periods for the student. This ensures that the student loan periods are created correctly. If transfer hours/credits or NSLDS data are entered after the loan periods have been created, the loan periods may have to be rebuilt and the student needs to be repackaged accordingly.

Note: Loan periods and loan payment periods are created only if the program version is configured to use payment period. Refer to the FA Program Code Setup for details.

Overlapping Loan Example

The diagram below illustrates the Academic Years and Loan Periods in CampusNexus Student for a clock hour student who has an overlapping loan period.



The student enrolled at school A and received a direct loan with a loan period of 32 weeks. The student withdrew from school A before the loan period was over and refund calculation was carried out at school A. The student then enrolled at school B before

the loan period at school A was over. The new program at school B consists of 2500 hours and 72 weeks. The full Academic Year definition at school B is 900 hours and 26 weeks. School B also accepts 500 transfer hours from school A. All 500 transfer hours are from transfer courses that were completed within the prior loan period at school A.

As a result of the transfer hours, the student's last Academic Year in the program at school B is reduced by 500 hours. The program is reduced to 2000 hours and 58 weeks. This student is eligible to be packaged for overlapping loans. The first loan period is the stub loan period in which school B would certify a loan for the remaining balance of the annual loan limit for the period that covers the remaining portion of the loan period at school A. Loan periods for the student will be created as follows:

- The first loan period is the overlapping period (stub loan period). The required clock hours and weeks attributes in this first loan period are the values entered through the NSLDS Previous Institute Details form. For this scenario, based on the transferred credits and the date range of the overlapping loan period, the loan officer entered 400 hours and 12 weeks the student is expected to complete for the stub loan period. The BBAY dates on the stub loan period will reflect the original loan period at school A and are displayed within the NSLDS information. If the loan period at the prior institution is less than 30 weeks, the BBAY start date will be calculated to ensure the loan period is at least 30 weeks.

  Note: Transfer credits/hours are only used as a reference to calculate the recommended hours/credits for the stub loan period. These recommended values are displayed in the "NSLDS Loans / Overlapping Loan Periods" tab of the NSLDS Previous Institute Details form. The appropriate credits/hours and weeks for the stub loan period must be entered by the loan officer based on the school's business model.

- Subsequent loan periods are created based on the remaining hours and the full Academic Year definition of the program.

Packaging Overlapping Loans

Financial Aid packaging continues to be Academic Year based. For Auto Packaging and Batch Packaging using auto packaging, CampusNexus Student correctly packages direct loans for each loan period within the Academic Year to satisfy the need in that Academic Year.

Budget for each loan period is prorated based on the budget of the Academic Year(s) that encompass the loan period. Each charge (TUIT, Books/Supplies…) will be calculated separately. Prorating is based on weeks if the Program Version is configured to prorate costs using weeks. Prorating is based on credits/hours if Program Version is configured to prorate costs using credits/hours. This configuration is found under Lists > Financial Aid > Programs. Below is a sample calculation using the previous overlapping loan example:

- AY1 Tuition is $10,000
- AY2 Tuition is $12,000
- AY3 Tuition is $5,000

All 12 weeks of LP1 are within AY1. Therefore, Tuition for LP1 is calculated as follows:

- ($10,000/26 weeks) * 12 weeks = $4,615

14 weeks of LP2 overlap AY1 and 12 weeks of LP2 overlap AY2. Therefore, Tuition for LP2 is calculated as follows:

- Tuition from AY1 = ($10,000/26 weeks) * 14 weeks = $5,385
- Tuition from AY2 = ($12,000/26 weeks) * 12 weeks = $5,538
- Tuition for LP2 = $5,385 + $5,538 = $10,923

14 weeks of LP3 overlap AY2 and 6 weeks of LP3 overlap AY3. Therefore, Tuition for LP3 is calculated as follows:

- Tuition from AY2 = ($12,000/26 weeks) * 14 weeks = $6,462
- Tuition from AY3 = ($5,000/6 weeks) * 6 weeks = $5,000
- Tuition for LP2 = $6,462 + $5,000 = $10,538

Note: This example illustrates prorating based on weeks. The same logic applies when the program version is

configured to prorate cost using credits/hours. The calculated amounts are rounded. Based on this example, it is recommended that budget for all Academic Years to be calculated in advance before loan periods are created. This will ensure more accurate budget information for the loan periods. The loan period budget can also be recalculated through the loan period form if budgets in the Academic Years are changed.

- Packaged EFC of a loan period comes from the ISIR being paid on for the Academic Year.
- EFA of a loan period is calculated by prorating the awards in the Academic Year that overlaps the loan period. Prorating is based on the number of weeks. Prorating is done at the Academic Year's payment period level. For example, there is a Pell award for $4000 in AY 1. There are two payment periods with $2000 in each payment period. This Pell award is counted as EFA for both LP1 and LP2.

  EFA from Pell for LP1:

  - ($2000 in first payment period / 13 weeks) * 12 weeks = $1,846

  EFA from Pell for LP2 will be calculated based on awards that are in both AY1 and AY2:

  - ($2000 in first payment period / 13 weeks) * 1 week = $154
  - All $2000 in the second payment period will be considered because all of the second payment period overlaps with LP2
  - If other awards exist in AY2, they will be prorated and included in EFA of LP2.

  EFA for LP3 will be calculated based on awards in AY2 and AY3.

  Note: Based on this example, it is recommended that when packaging for overlapping loans, non-direct loan awards be packaged in advance if possible, prior to packaging for direct loans. This way EFA can be correctly calculated for loan periods that cross over multiple Academic Years. This will allow the student to be packaged accurately.

- For the first loan period, the direct loan amount to be awarded is determined by subtracting the amount already received at the prior institution from the student's maximum eligibility at the current institution. Other loan periods will be packaged up to the maximum amount based on the student's grade level and dependency status in the loan period.
- Validations are in place to ensure that the final loan amount cannot be greater than the COAs of the loan period.

Related Topics:

- NSLDS Previous Institute Details form, which stores NSLDS information from the student's ISIR.
- Loan Periods form, which contains loan period information such as the number of weeks and hours/credits, as well as budget for the loan period and payment periods for each loan period.
- Loan Periods Packaging view, which displays all awards packaged for each loan period. It also contains COA, EFC, and EFA data for the loan period.

Notification of Receipt

You can set up CampusNexus Student to print notifications of receipt for each type of financial aid received. By law, a student must be notified each time a financial aid disbursement is received by the institution on the student's behalf and credited to the student's account. The text on each receipt can vary depending on the type of funding received.

Each fund source can have its own formatted receipt. Each receipt is created as a Crystal Report. You can customize the layout of each receipt.

Note: You must have access to the Crystal Reports program to edit Receipt Notifications.

The following student data can be displayed on the receipt:

Today's date
Student name - SyStudent.Firstname + SyStudent.Lastname
Student's address - SyStudent.Addr1
Student's city - SyStudent.City
Student's state - SyStudent.State
Student's ZIP - SyStudent.Zip
Student's phone number - SyStudent.Phone
Student's SSN - SyStudent.Ssn
Student's enrollment number - AdEnroll.StuNum
Student number - SyStudent.Stunum
Student's program version description - AdProgramversion.Descrip
Student's enrollment current account balance - AdEnroll.ArBalance
Student's overall current account balance - SyStudent.ArBalance
Student's campus name - SyCampus.Descrip
Student's campus phone number(s) - SyCampus.Phone1, SyCampus.Phone2, SyCampus.Phone3

Loan Borrower Variables

The following merge variables are available to include in the receipt notifications that are printed when FA disbursements are received and posted to the ledger cards:

FaLoan.BorrowerSSn
FaLoan.BorrowerLastName
FaLoan.BorrowerFirstName
FaLoan.BorrowerMi
FaLoan.BorrowerAddress
FaLoan.BorrowerCity
FaLoan.BorrowerState
FaLoan.BorrowerZip
FaLoan.BorrowerPhone

Customized receipt notifications already on file need to be recreated or modified by a support rep to include the option of adding these fields.

Transaction-related data items available to be displayed on the receipt include the following:

Lender name - FaLender.Descrip
Lender address - FaLender.Addr1
Lender phone number(s) - FaLender.Phone, FaLender.Phone2
Lender fax number - FaLender.FaxNumber
Lender contact(s) - FaLender.Contact1Name, FaLender.Contact2Name
Fund source description - FaFundSource.Descrip
Fund source receipt notification comments - FaFundSource.ReceiptComment
Award year - FaStudentAid.AwardYear
Disbursement amount - SaTrans.Amount
Transaction date of disbursement - SaTrans.Date
Disbursement check/EFT number - SaTrans.Checkno
Transaction reference - SaTrans.Ref

Transaction description - SaTrans.Descrip
Transaction receipt number - SaTrans.ReceiptNo
Term code disbursement was for - AdTerm.Code (Join AdTerm on SaTrans.AdTermID)

All of the above listed data items may not be included on each defined receipt. They are available for you to drop onto the report. In addition, you can specify any amount of free text on the receipt.

A column for Receipt Comment Text is included in the FA Fund Source table.

A column is included in the FA Disbursements table for Date Receipt Printed.

CampusNexus Student has a default Notification of Receipt report. It will be used as the default Notification of Receipt for each fund source unless you modify the layout for that fund source. The default layout is as follows:

Today's Date

School Name School Phone #

Student's Name
Student's Address 1
Student's Address 2
Student's City, State, and ZIP
Student's Phone #

Current Account Balance: $######.##

Fund Source: *nnnnnnnnnnnnnnnnnnnn* Award Year: ####-##

Disbursement Amount: ####.##

Disbursement Date: 99/99/9999

Check Number: *nnnnnnnnn*

Receipt Number: *nnnnnnnnnnnnnn*

Fund Source Receipt comments

This default receipt is named lst_FaDefaultReceipt. If you customize the default receipt report, it will be saved as cst_FaDefaultReceipt. When you customize a receipt for a fund source, the resulting report name will be cst_Fa*nnnnnnnn*Receipt, where *nnnnnnnn* is the fund source code.

Setup > Financial Aid > Packaging

You can modify the default receipt notification report from the FA Setup Packaging form.

Lists > Financial Aid > Fund Source

An **Edit Receipt Notification** button is available on each fund source form. When you click this button, you are taken into Crystal Reports and where you can edit the receipt layout. **You must have access to the Crystal Reports program to edit Receipt Notifications.** CampusNexus Student first checks if a report exists for the selected fund source. If a report exists for the fund source (cst_Fa*nnnnnnnn*Receipt), that report is loaded. If a report does not exist for the fund source, the default receipt (lst_FaDefaultReceipt) will be copied to cst_Fa*nnnnnnnn*Receipt. The cst_Fa*nnnnnnnn*Receipt is be loaded for editing.

View > Student Accounts > Ledger Cards

The Student Accounts Ledger form contains a **Print Receipt** button to print the Notification of Receipt for any received FA disbursement. This option generates a generic receipt for the currently selected transaction on the ledger card. However, if the selected transaction on the ledger card is an FA disbursement received, and the FA fund source type is not CASH, the corresponding Notification of Receipt is printed.

To determine which Notification of Receipt report should be loaded when this option is selected, CampusNexus Student checks for the existence of a receipt report for the fund source received.

1. If cst_Fa*nnnnnnnn*Receipt exists (*nnnnnnnn* = Fund Source code), that report is loaded.
2. If cst_Fa*nnnnnnnn*Receipt does not exist, CampusNexus Student looks for cst_FaDefaultReceipt.

3. If it does not exist, lst_FaDefaultReceipt is loaded.

After the receipt is printed for the selected transaction, CampusNexus Student updates FaDisb.DateReceiptPrinted with the system date.

Daily > Student Accounts > Post FA Disbursements

The Student Accounts Post FA Disbursements form contains a button to print a Notification of Receipt for each FA disbursement received in the posted batch. The logic to determine which receipt report to use is the same as explained above. It is possible that a posted batch of FA disbursements includes disbursements for more than one fund source. This means that it is possible that more than one receipt report needs to be used when generating these receipts. The option to print the receipts is available after clicking Post to post the batch. The following message is displayed: *"Print receipt notifications for disbursements just posted?"*

Daily > Student Accounts > Post Payments

The Student Accounts Post Payments form prints a Notification of Receipt for any posted FA disbursement. You can print a receipt notification after clicking Save. If the payment posted was not a scheduled payment or the fund source type is CASH, a standard receipt is printed. (The receipt notification is not printed.)

New Source of Aid

While packaging Financial Aid for a selected student, you may want to add a new source of aid for the student. When you attempt to package a student by navigating to View > Financial Aid > Financial Aid Packaging > New Source of Aid and add a new source of aid, the new source of aid is considered a Title IV fund source.

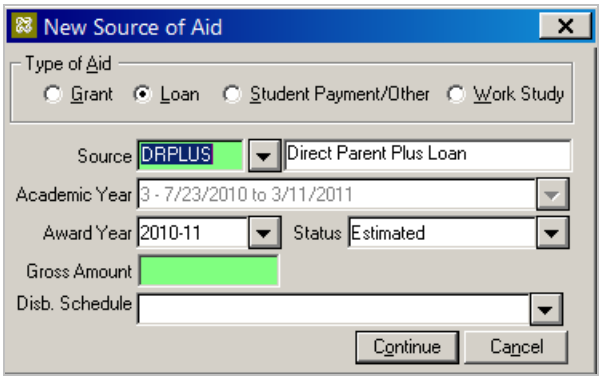
Note: If your institution has enabled the feature that prevents awarding Title IV funds to students who do not have valid ISIRs on file, CampusNexus Student allows you to add fund sources that are non-Title IV, but prevents you from awarding Title IV funds. CampusNexus Student displays a message indicating that awarding Title IV aid is not allowed because no ISIR exists for the student for the award year being packaged. This feature is enabled or disabled in the Campus Financial Aid form by selecting the Approve Awards for Verified Students Only option.

Add a Fund Source

Default values for fields in the **New Source of Aid** forms are set up in **Setup > Financial Aid > General > Setup**. Users must have the required levels of permission to do so.

To add a new source of financial aid to a student's FA list:

1. Select a student.
2. Navigate to **View** > **Financial Aid** > **Packaging**. The Financial Aid Packaging form is displayed.
3. Double-click the academic year for which the new source of aid is to be added, or select it and click **Edit**. The Financial Aid Academic Year form is displayed.
4. Click **Package**. The Financial Aid Packaging Form is displayed. Any existing fund source is listed on the grid in the upper left portion of the form.
5. Click **Add**. The New Source of Aid Form is displayed.



6. Select the **Type of Aid**. The options are Grant, Loan, or Student Payments/Other. "Other" includes such aid options as agency payments, scholarships, and so on. If you select Student Payments/Other, you are prompted to generate an Award Letter when you start the packaging process.
7. Select the **Source**. The configured sources of funds are displayed.
    - Only the sources that are appropriate for the fund source type of aid you selected are listed. Deactivated fund sources may not appear for the award year selected.
    - If a 'Graduate PLUS loan' is selected and the student is not a graduate, an error message is displayed with instructions to proceed. A student is considered to be a Graduate Student based on the grade level as

specified on the student's Financial Aid Academic Year form. See also Grade Level.

- If a regular PLUS loan is selected as the fund source and the student is a graduate, an error message is displayed with instructions to proceed.

8. Select the **Academic Year**. If this field is dimmed, it has already been selected for you.
9. Select the **Award Year**.
10. Select the **Status** of the new fund source. The options are:

    - E = Estimated
    - A = Approved
    - P = Pending Approval

    The status of the financial aid being packaged, entered on the New Aid form, is carried forward into the subsequent form when it is loaded. The forms include the Pell Grant, Federal Work Study, Other Grants, Direct Loans, Other Student Loans, and Student Cash/Other.

    If the status of the aid being packaged is Estimated, CampusNexus Student does not automatically calculate the expected disbursements. The affected forms are Pell Grant, Other Grants, and Other Student Loans. The FA packaging forms allow an expected disbursement schedule to be calculated for financial aid that currently has no expected disbursements scheduled. This is used for FA that was originally packaged as Estimated and later changed to Approved. The expected disbursements can be scheduled at the time the status of the aid is change to approved.

    The "Approved" status is available in the drop-down list when you add or edit a fund source; however, CampusNexus Student displays an informational message stating that the verification status of "Verified" is required before the student's award status is saved as "Approved". If the fund source is a PLUS loan, you can save the student's award status to "Approved" in the New Source of Aid form.

11. Enter the **Gross Amount**.

    The packaging forms warn the user when the amount packaged for the fund source exceeds the allowable commitment level for the fund source. CampusNexus Student checks the Financial Aid General Ledger (FAGL) Authorization table for the amount authorized for the award year and multiplies this amount by the commitment level for the fund source. If the new packaging amount exceeds the commitment level, a warning message is displayed indicating that you have exceeded the level for the year.

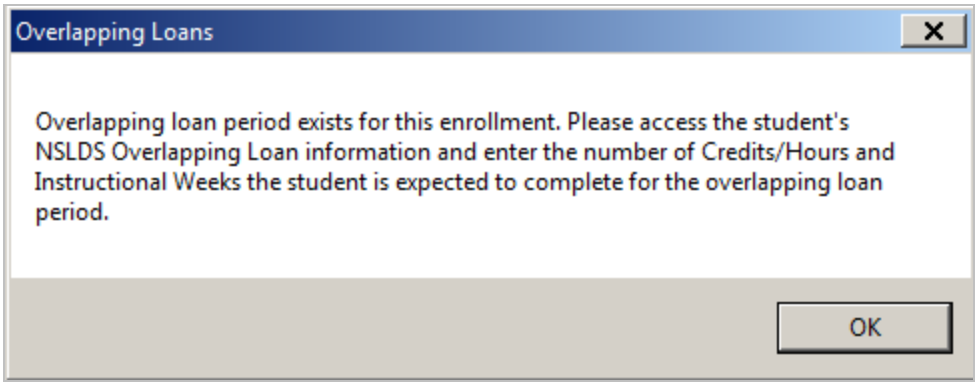
    After a student is packaged, CampusNexus Student updates the Amount Packaged column in the FAGL Authorization table. CampusNexus Student checks the commitment level for a fund source before adding the fund source to the student's scheduled aid. If the commitment level is exceeded, a message is displayed to inform you why a particular fund source was not auto-packaged. If an amount is auto-packaged, CampusNexus Student updates the Amount Packaged column in the FAGL Authorization table.

12. Select an optional **Disbursement Schedule**. After you select a Source for the new FA, CampusNexus Student populates the Disbursement Schedule list. For a schedule option to appear on the list, the student's academic year start date must fall within the date range of the disbursement schedule. You can limit staff members who may

configure this field, and configure the field as required when setting up new aid.

13. Click **Continue**. CampusNexus Student displays the appropriate form based on the type of aid you selected. The entries you made on this form are carried over to the next form.

    Note: When you add a direct loan award for an overlapping loan period and did not populate the fields "Overlap Period Credits/Hours" and "Overlap Period Weeks" in the "NSLDS Loans / Overlapping Loan Periods" tab of the NSLDS Previous Institute Details form, the message below is displayed. The "Overlap Period Credits/Hours" and "Overlap Period Weeks" are required to create loan periods to award direct loans for the overlapping loan period.



14. Complete the selected fund source form to add the new source to the student's list.
15. Click **Cancel** to cancel the addition of a new source and return to the previous form.

Other Financial Aid Loan Form

All types of financial aid loans **except Direct Loans from the Department of Education** are processed using the Financial Aid Loan form. Basic information about the loan is shown at the top of the form. The tabs on the form lead you to more specific information about the loan. You can add, delete, or cancel disbursements. The Financial Aid Loan form has the following tabs:

- Scheduled Disbursements
- Received and Refund/Stipend
- Borrower Information
- Promissory Note and Other Information
- Comments

All non-direct (other) loans may be electronically transmitted via the CommonLine file formats. Although there is some information specific to direct loans not required by CommonLine and information specific to CommonLine not required for direct loans, the majority of information required is similar. For this reason, the form design for non-direct loans is patterned after the form design of the direct loans.

The static information about lenders, servicers, and guarantors is set up under Lists > Financial Aid > Lenders. Review that information when you are working with student loans.

Some parameters for loans are entered when the fund source is set up under Lists > Financial Aid > Fund Source.

Notes:

When an Award status is set to 'Canceled', the disbursements associated with the award will also be set to a status of 'Canceled'. Under these conditions the disbursements may not be added or re-expected.

- If the **Add** button is selected, the following message is displayed: *"Cannot add disbursement to a canceled Award"*.
- If the **Re-Expect** button is selected, the following message is displayed: *"Cannot Re-Expect a disbursement while the Award is in 'Canceled' status. Select a new Award Status and try again."*

You may not 'Calculate' or 'Recalculate' disbursements.

- If the **Calculate** or **Recalculate** buttons are selected, the following message is displayed: *"Cannot Calculate disbursements while Award is in 'Canceled' status. Select a new Award Status and try again."*

Actual Disbursements

Actual disbursements are approved in the Financial Aid department and disbursed in the Student Accounts department.

Actual disbursements Received, as well as refunds made, and stipends paid by the Student Accounts department are shown at the bottom of the form. Refunds may be necessary when a student drops out of school or drops below the enrollment status for which the loan was calculated. This data is read-only.

The logic that controls FA loan disbursements prevents the canceling of paid disbursements. The proper procedure after disbursements have been paid is to refund the payments.

The number of disbursements and percentage disbursed in each disbursement are set up under Lists > Financial Aid > Academic Years.

Note: When validating the scheduled disbursements against the total loan amount, the logic for validating the sum of the disbursements to the loan amount is as follows:

- Sum the net amount of disbursements received plus the net amount of scheduled disbursements that have not been received. This amount must be equal to or less than the net amount of the loan.
- When FA disbursements are posted as received on the student's ledger card from the Student Accounts Payments

form or from the Post FA Disbursements form, CampusNexus Student updates the Student Academic Year ID column in the FA Disbursements table.

Refunds and Stipends

Refunds and stipends are processed in Student Accounts under Daily > Student Accounts > Process Refunds/Stipends. Refunds can also be posted from the student's ledger card by clicking Post Refunds.

Validations When Saving

CampusNexus Student includes the refund amounts when checking the disbursements against the total amount packaged. When CampusNexus Student adds scheduled and disbursed amounts to prevent you from going over the amount packaged, CampusNexus Student takes into account refunds on student loans (other than direct loans) and Pell Grants. Direct Loans are handled through the origination change.

To work with the Financial Aid Loan form:

1. Select a student.
2. Navigate to **View > Financial Aid > Packaging**. The Financial Aid Packaging form is displayed.
3. Double-click the academic year for which the loan is required, or select it and click **Edit**. The Financial Aid Academic Year form is displayed.
4. Click **Package**. The Financial Aid Packaging Form is displayed. Any existing fund sources including loans are listed on the grid in the upper left portion of the form.
5. Click **Add** to add a new loan. The New Source of Aid Form is displayed. You must select a Packaging Method before you can add a new loan.
6. Sometimes, it is necessary to enter the same type of loan more than once in the same award year. CampusNexus Student asks if you want to continue when adding a second loan.
7. Select the **Source** for the type of loan.
8. Select the **Academic Year**.
9. Select the **Award Year**.
10. Select the **Status** of this loan. The status options are: **A** - Approved, **C** - Canceled, **E** - Estimated, and **P** - Pending Approval.

    ### Canceled status

    When you cancel a loan disbursement, CampusNexus Student checks if all other disbursements for the award are in canceled statuses.

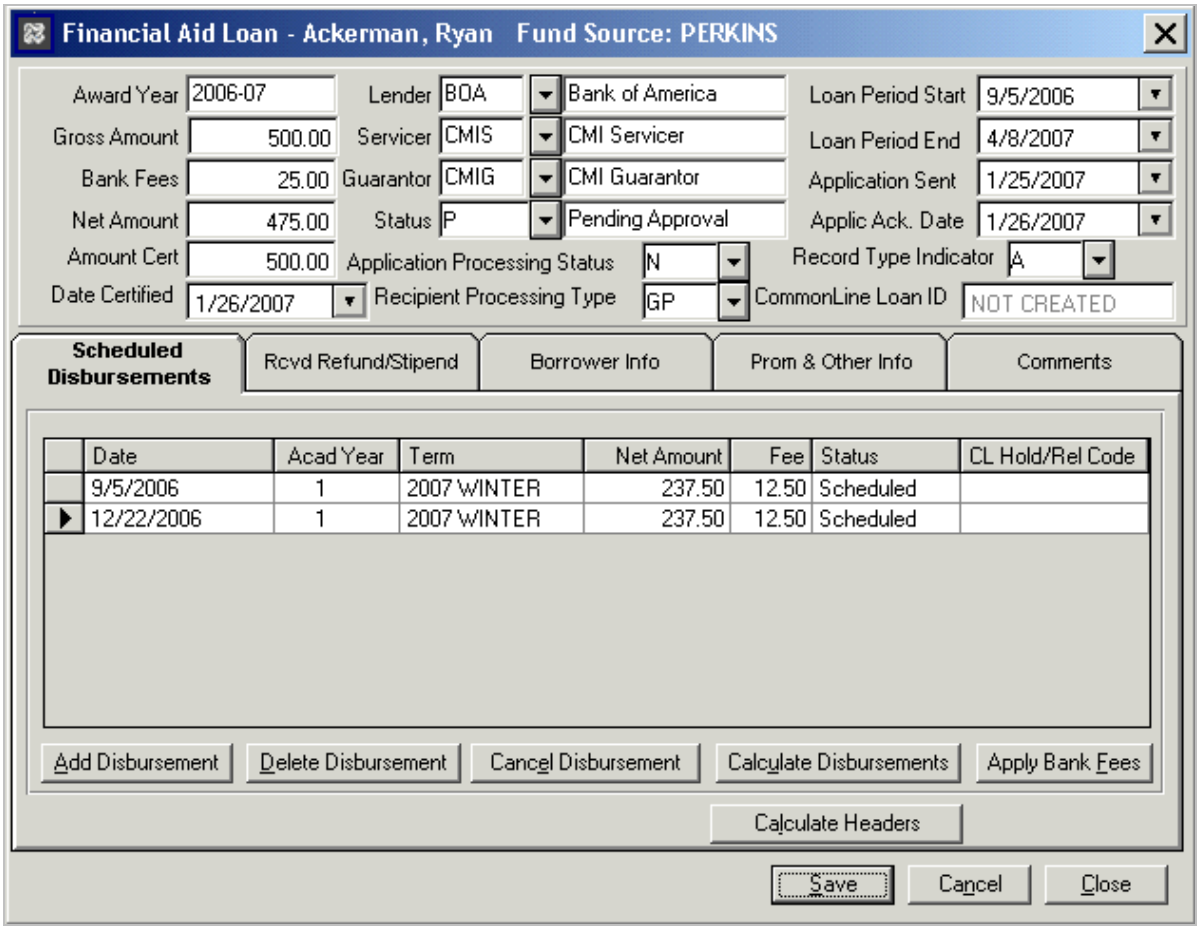
    - If so, the status for the loan award is changed to "Canceled".
    - If at least one disbursement of a loan award has a status of "Paid" or "Ready to Pay", the "Cancel" option is not available in the award's status drop-down list.

    The status for all disbursements associated with a loan award is set to "Canceled" if a user cancels the award. Additionally, if the loan origination status is "Ready to Send", the status is changed to "Not Ready to Send" if the award has been canceled.

    When a student's school status is changed to a never attended status, the loan award's status is changed to "Canceled", and the loan origination status is "Ready to Send", then the status is changed to "Not Ready to Send" if all associated disbursements have a canceled status.

11. Enter the **Amount** of the loan.

12. Click **Continue**. Double-click an existing loan fund source on the Packaging form, or select it and click **Edit**. The Financial Aid Loan form is displayed. Enter or change data on the top portion of the form as required.



13. The Lender, Servicer, and Guarantor data are populated with the defaults that were set up on the Fund Source Code Setup form.

Basic Loan Data Fields

Field	Description
Award Year	The Award Year is carried over from the Packaging form.
Gross Amount	Enter the gross amount of the loan. This includes the net amount plus the bank fees.
Bank Fees	Enter the fee charged by the lender for the processing the loan.
Net Amount	The net amount is calculated.

Field	Description
Amount Cert (Certified)	If the status is other than Sent, Amount Certified is enabled. You can edit the amount certified only if the CommonLine Application Status is null, R, N or D. If you are adding a new loan, this amount is defaulted to the maximum amount the student is eligible to receive for this fund source. This amount is determined from the packaging method being used for the student's academic year being packaged. The amount entered here cannot be less than the loan amount nor greater than the maximum amount determined from the packaging method. Loan amount specified by the school is what the borrower is eligible to receive. This figure does not always match the amount of the loan.
Lender	Select the lender that is providing the loan funds.
Servicer	Select the servicer that is servicing the loan (collecting payments, etc.)
Guarantor	Select the guarantor that is guaranteeing the loan.
Status	Select the status of the loan. The status options are Estimated, Pending Approval, Approved, and Canceled. **Note**: When you cancel a disbursement, CampusNexus Student determines if all disbursements for the award have a status of Cancel. If all disbursements for the award have a status of Cancel, the award is set to Cancel; however, if at least one disbursement for an award has a status of Paid or Ready to Pay, the choice Cancel is not available.
Loan Period Start	Enter the loan start date. The default is the beginning date of the Academic Year.
Loan Period End	Enter the loan end date. The default is the ending date of the Academic Year.
Application Sent	Enter the date the application was sent to the lender.
Applic Ack. Date	Enter the date the application was acknowledged by the lender.

Field	Description
Application Processing Status	Select the status of the application process. If it is a new application, your choices are: • Blank = Not Specified • R = Application is Ready to Send • N = Application is Not Ready to Send This field can be edited only if the current status is Blank, R, N, or D. Depending on the current value of this field, the valid values to which the status can be changed are as follows: • Blank can change to R or N • R can change to N • N can change to R • D can change to R The above changes may be affected by the award Status and the 'Originate/Certify Estimated Awards' (Setup > Campus Locations > Financial Aid) option setting. If your institution has enabled the 'Originate/Certify Estimated Awards' option, you can set the Origination Status to Ready to Send when the Award Status is 'E' (Estimated), 'P' Pending Approval, or 'A' (Approved). Once sent, the following codes can be displayed in this field: • A = Initial processing successful, will guarantee upon receipt of prom note • I = Initial processing successful, pending further approval • G = Guaranteed • B = Guaranteed, prom note received and approved for disbursement • P = Pending processing (error resolution underway by sending organization) • D = Denied/rejected/incomplete • S = Application sent. Response not yet received **CommonLine Application Status** If the CommonLine Application Status is one of the following: S, I, G, B, A, or T, CampusNexus Student does not allow deletion of the fund source from the student's package. If Application Processing Status is in "Not Ready to Send" status, and you attempt to change the status to "Ready to Send" when existing or new criteria has not been met (listed below), CampusNexus Student displays a message with the outstanding criteria that must be corrected. **CommonLine Validations** The following is a partial list of validations required for CommonLine Loans: 1. Valid Graduation date, i.e., the graduation date is greater than or equal to the loan period end date. The date must be less than the loan period end date. 2. Loan Period is within Academic Year Start and End dates. 3. Valid Award Year, based on Loan Period, i.e., Award Year on Loan should be equal to Award Year 1 in the Academic Year screen. 4. Valid Student Status, i.e., Student is not in Cancelled status. 5. Verify that an Entrance Interview was Completed. 6. Verify that the Comment Codes have been resolved. 7. Verify the Student and Parent Date of Birth fields are not empty or invalid date. 8. Verify Phone Number is numeric.

Field	Description
	The validations are checked by CampusNexus Student when packaging and exporting CommonLine loans. Only if the Application Processing status security configuration is enabled, will the Application Processing status and validations be verified when a user packages CommonLine loans; however the criteria will always be verified, along with the existing validation, when exporting CommonLine loans regardless of whether the setting is configured. When the user changes the value for a loan's Application Processing Status, or creates a new loan, a record of this is displayed in the Financial Aid Audit form.
Recipient Processing Type	The recipient is the lender or servicer that receives the CommonLine data. This field defines the default process type that will be performed by the recipient when receiving applications, as follows: • CR = School certification request • GO = Guarantee loan only • GP = Guarantee loan (prior to receipt of promissory note) and print application/promissory note • PG = Print application/promissory note and guarantee loan (after receipt of promissory note) • PO = Print application only Users can edit this field if the CL Application Status is null, R, N, or D. If a loan is being added, this field reverts to the default processing code specified for the recipient of this loan record. This can be determined by finding the record in the CL Recipient table that matches the Lender/Guarantor criteria specified for the loan.
Record Type Indicator	This field defines the type of detail record this loan will be sent as in the Application Send file. • A = New application submitted for processing • C = Correction application submitted for processing (prior to guarantee) • R = Reprint of application • T = Terminate request (Withdrawal of loan prior to guarantee. Once guaranteed, cancellation of a loan must occur using Change Transaction send file) When a new loan is added, the default value is A. This field can be edited only if the CL Application Status is blank, R, N, D, or P.
CommonLine Loan ID	If a new loan is added or the contents of the CommonLine Loan ID is null, CampusNexus Student displays "NOT CREATED". The CommonLine Loan ID will be created for each loan that is extracted during the routine that creates the Application Send file. This ID cannot be edited here. (17 characters).

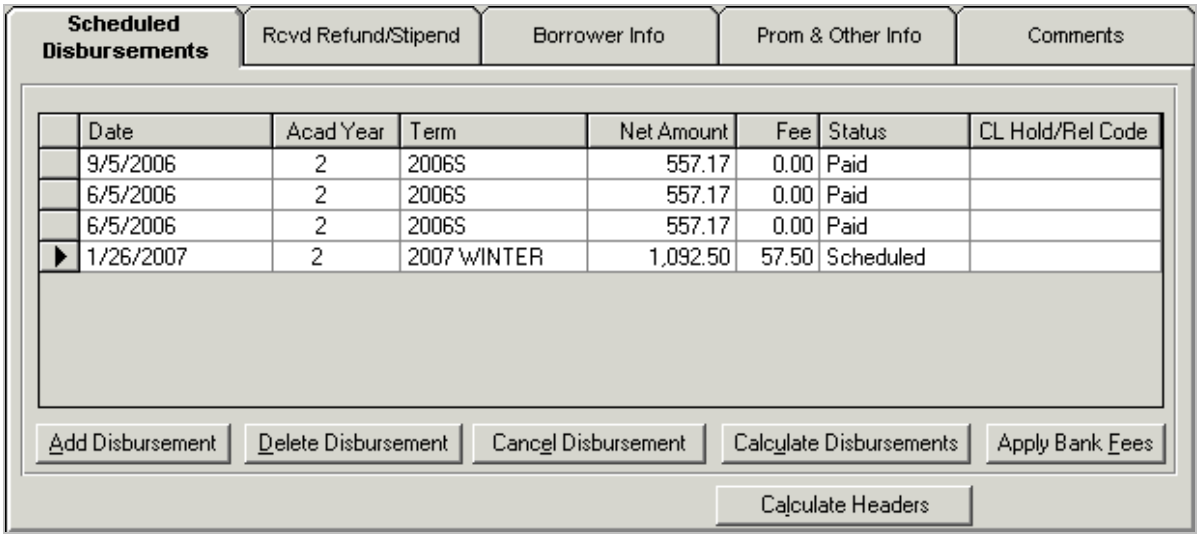
14. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Scheduled Disbursements Tab

Set up the disbursements after completing the top of the Financial Aid Loan form. Scheduled disbursements are created when the status on the **New Aid** form is selected as Approved or Pending, OR when the **Add** or **Calculate** tabs are clicked on the **Student Loan** form. The Scheduled Disbursement list is not created when new aid is added with a status of Estimated. Individual disbursements with a status of Paid or Cancelled cannot be edited.

When a student is dropped, financial aid is cancelled. If the student is reinstated, financial aid must be "re-expected". Scheduled disbursements are not automatically changed back to scheduled. Review scheduled disbursements for each fund source to "re-expect" the disbursements that still apply.

1. Click **Calculate Disbursements**. CampusNexus Student calculates the disbursement schedule.



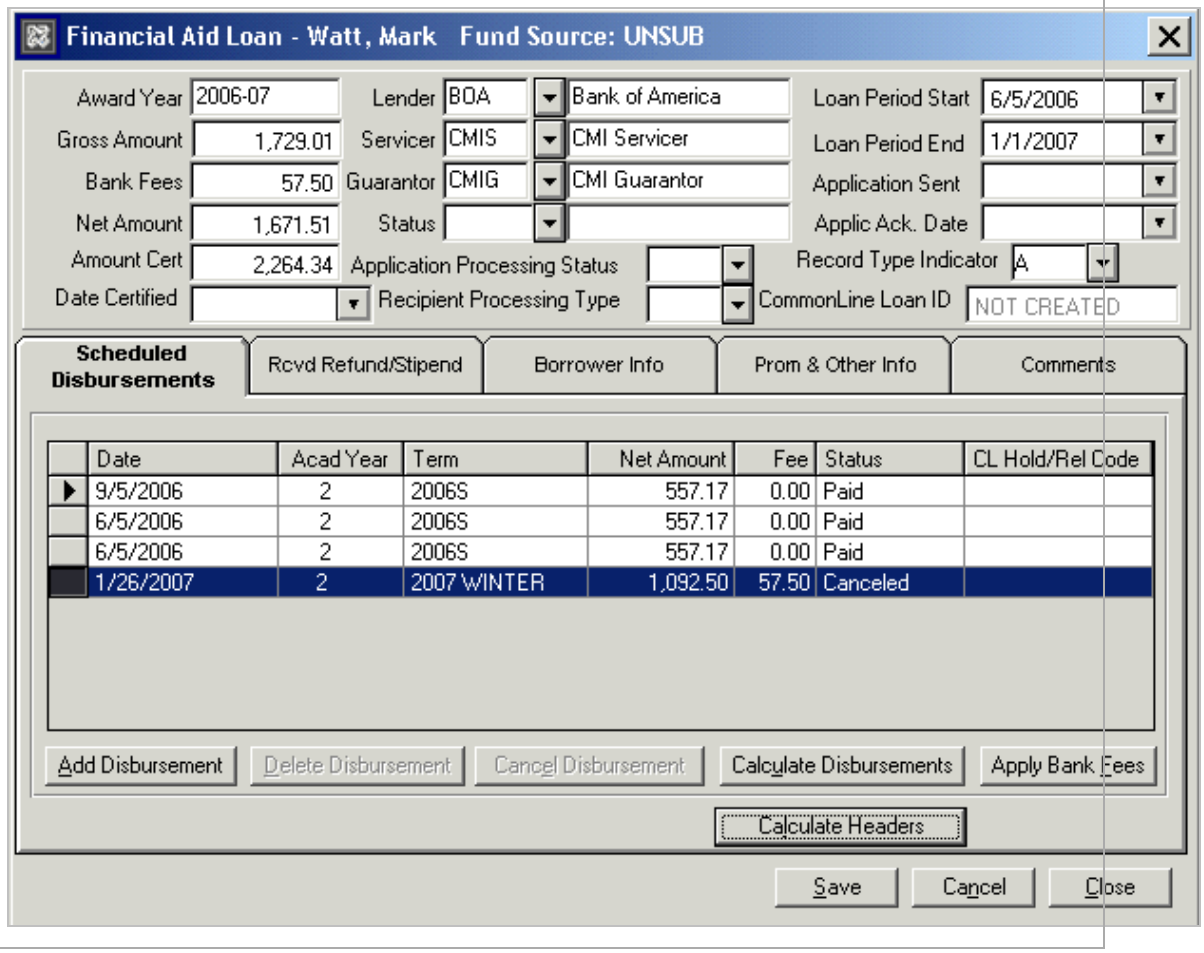
2. Enter data as necessary for each scheduled disbursement.

Field Descriptions: Scheduled Disbursements Tab

Field	Description
Date	Expected date of the disbursement.
Acad Year	Academic year number to which the disbursement applies. Edit the "Acad Year" for each disbursement if the disbursement passes the criteria required for edit the field. If the Acad Year can be edited and you edit this field, a drop-down list is displayed showing each academic year for this student's enrollment. Each record displayed in the list shows the academic year number, academic year start date, and academic year end date. When new scheduled disbursements are added for the FA Loan, CampusNexus Student defaults the academic year for each disbursement to the academic year being packaged.
Term	Term to which the disbursement applies. The Term code can be edited only on a disbursement in the Scheduled section if the disbursement has a status of Scheduled (S).
Course Code	This column appears if the fund source type is 'Cash', 'Other', or 'Scholarship' and it has been set up to associate payment with a course for disbursements. See Fund Source form (Associate Courses with Payment field) and Other Grant form for additional information. The only applicable fund source types are 'Cash', 'Other', or 'Scholarship, otherwise, this field is not displayed. Only the courses scheduled for the Term selected appear in the Course Code drop-down list. Select the course associated with the payment.
Net Amount	Net amount of the disbursement as calculated by CampusNexus Student from the gross amount, bank fees, and the number of payments specified for this type of loan.

Field	Description
Status	Status of the disbursement. Statuses include Scheduled, Paid, and Cancelled.
CL Hold/Rel Code	Valid values for this field are: • H = Hold disbursement until release notification is given • R = Release the disbursement as scheduled • Blank When adding a loan, the value of this column for each disbursement defaults to the default hold-/release indicator code specified for the CommonLine recipient of this loan. The CommonLine recipient is determined by finding the record in the CL Recipient table that matches the lender-/guarantor criteria specified for the loan. For Parent PLUS loans, if a Dependency Status Conflict occurs, a warning message is displayed for the users to resolve this issue by refunding, canceling, or updating the FAFSA or ISIR.
Add Disbursement button	Click **Add Disbursement** to add a new disbursement to the schedule.
Delete Disbursement button	Click **Delete Disbursement** to permanently remove a disbursement from the schedule.
Cancel Disbursement button	Click **Cancel Disbursement** to cancel a disbursement. This differs from Delete because the record of the disbursement remains on file for later reference. When you select a different row, the button label is updated. If the selected disbursement has been cancelled, the button label is 'Re-Expect'. Otherwise, it is 'Cancel'.
Calculate Disbursements button	Click **Calculate Disbursements** to calculate the disbursement schedule based on all the entered parameters. If no disbursements are scheduled, an expected disbursement schedule is created. Click **Calculate Disbursements** at any time to see the current information.

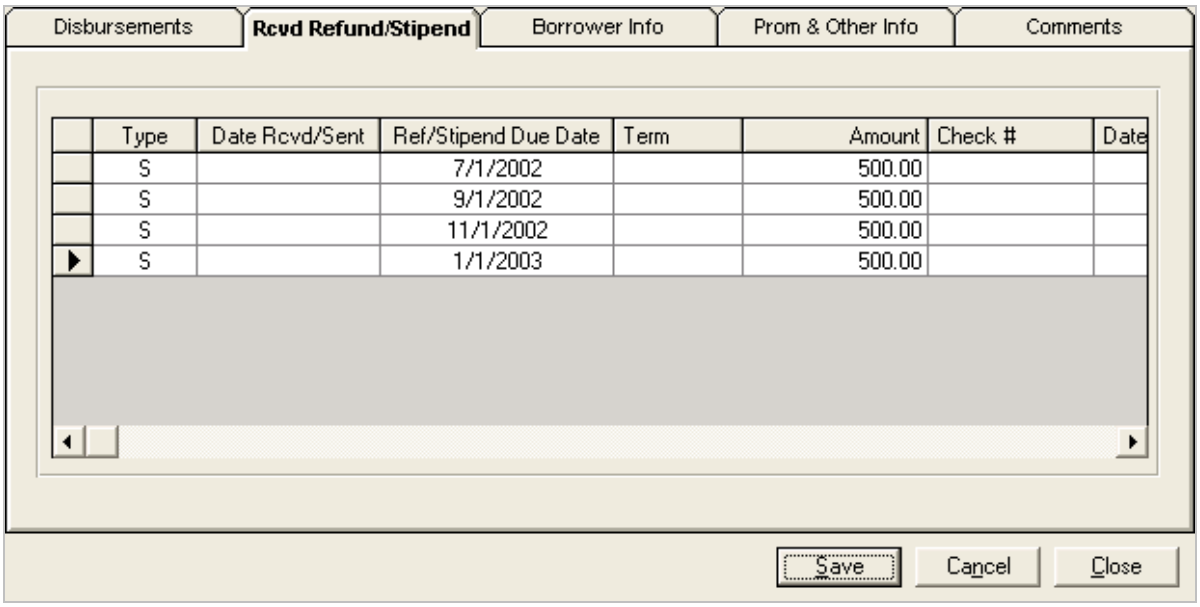
Field	Description
Calculate Headers button	Click this button if you want CampusNexus Student to recalculate the *Gross* and *Net amount* values listed at the top of the form, after canceling a scheduled disbursement, so that the amounts only reflect the paid disbursements. Refunds were not being taken into consideration when using the 'Calculate Headers' feature. Student refunds will be included in the calculation. **Before Scheduled Disbursement is Cancelled**  Select the scheduled disbursement and click **Cancel Disbursements** to cancel the scheduled disbursement. Click the **Calculate Headers** button. The **Gross Amount** and **Net Amount** fields at the top of the **Financial Aid Loan** form now reflect the sum of the paid disbursements.

Field	Description
	


3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Received Refund/Stipend Tab

The Received Refund/Stipend tab displays data about disbursements, refunds, and stipends that have been processed by CampusNexus Student. Scroll horizontally to see all fields.



Field Descriptions: Rcvd Refund/Stipend Tab

Field	Description
Type	Read-only. Type of transaction on the row: Disbursement, Refund, or Stipend.
Date Rcvd/Sent	Read-only. Date the disbursement was received, the date the refund was made, or the date the stipend was paid depending on what type of record it is. This column will be blank if the type is a refund or stipend and the status is scheduled.
Ref/Stipend Due Date	Read-only. If the type is a refund, it is the date due. If the type is a stipend, it is the date scheduled.
Term	Read-only. Term in which the disbursement, refund, or stipend occurred.
Amount	Read-only. Amount that was posted to the student's ledger card.
Check Number	Number of the check or the EFT transaction for the disbursement.
Date Deposit	Date of the deposit of the disbursement funds.
Date Signed	Date that the student signed for the loan disbursement.
Batch ID	Number of the batch in which the disbursement was posted to the student's ledger card.
Status	Status of the disbursement. Status options include Approved and Paid.

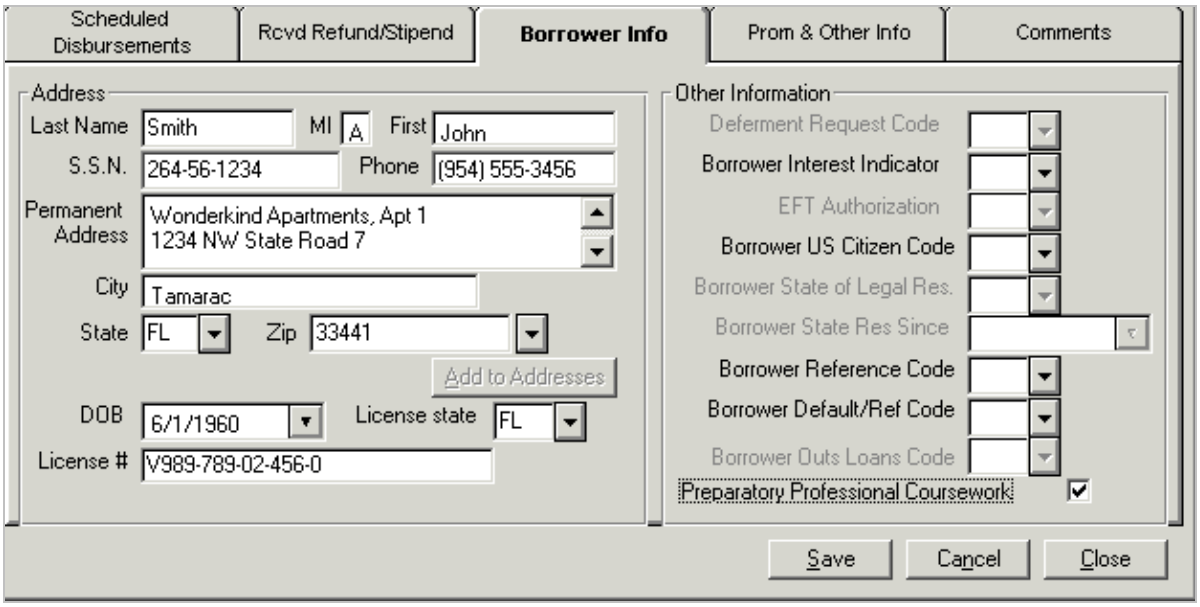
Borrower Information

The Borrower Information tab is used to capture all information related to the borrower of the loan. When adding a loan, if the student is the borrower of the loan, several fields on this form default to the student's information. The student is the borrower of the loan if the fund source type is SUB, UNSUB, or PERKINS; OR the fund source type is LOANNB or LOANNNB, and the "Is the Student the Borrower" check box is selected. Otherwise, it is assumed that the student is not the borrower.

If the student is not the borrower, and the borrower information for the loan is blank, a "Borrower" drop-down list is displayed listing the last name and first name for all records in the student's address file for the current enrollment. When you select one of the

records in the drop-down list as the borrower,CampusNexus Student fills in the borrower information with the name, permanent address, telephone, and SSN from the address file.

If you do not select a record from the drop-down list, you must enter the borrower information. Click "Add to Addresses" to add a new address to the list. Select the address type and enter the necessary information.



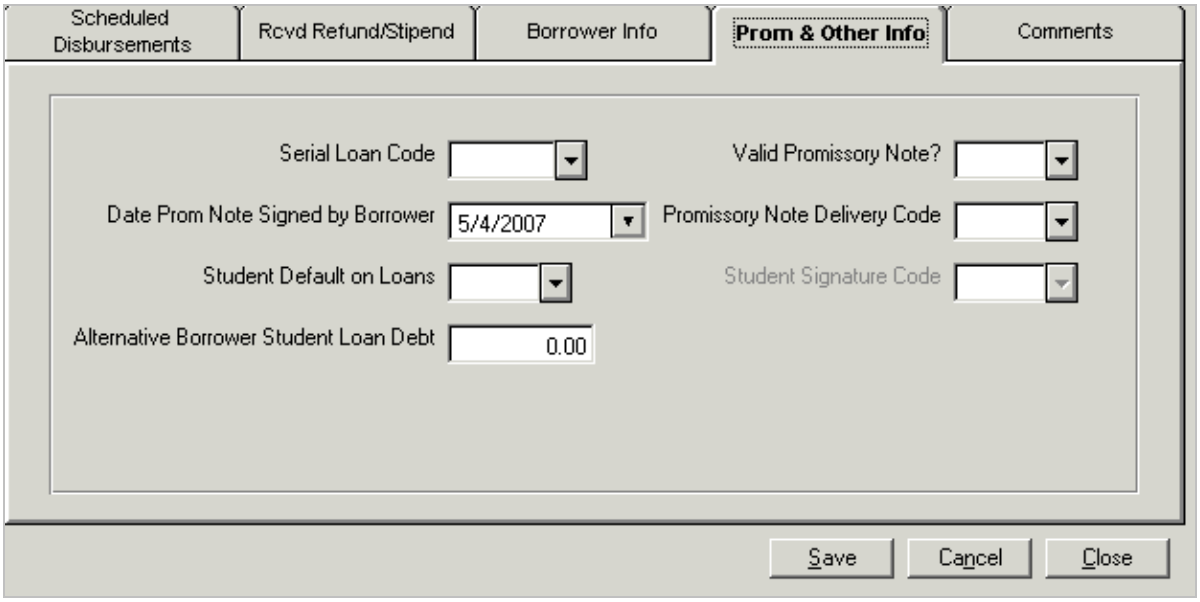
Field Descriptions: Borrower Info Tab

Field	Description
Borrower Name	Borrower's last name, middle initial, and first name.
SSN	Borrower's social security number.
Phone	Borrower's telephone number.
Permanent Address	Borrower's permanent address.
City	City of borrower's permanent address.
State	State of borrower's permanent address.
ZIP	ZIP code of borrower's permanent address.
DOB	Borrower's date of birth.
License #	Borrower's driver license number.
License State	State in which the borrower's driver license was issued.
Deferment Request Code	Y, N, or null. This field is enabled only if the fund source type is LOANNB, LOANNNB, PERKINS, or PLUS.
Borrower Interest Indicator	Y, N, or null.
EFT Authorization	Y, N, or null. This field is enabled only if the fund source type is LOANNB, LOANNNB, PERKINS or PLUS.

Field	Description
Borrower U.S. Citizen Code	This field is enabled only if the fund source type is ((LOANNB or LOANNNB) and the borrower is not the student), or the fund source type is PLUS. Valid values for this column are: • 1 = Borrower is US Citizen, US National, Permanent resident of Pilau • 2 = Borrower is an eligible non-citizen.
Borrower State of Legal Residence	This field is enabled only if the fund source type is ((LOANNB or LOANNNB) and the borrower is not the student), or the fund source type is PLUS.
Borrower State Res Since	This field is enabled only if the borrower is not the student.
Borrower Reference Code	Y, N, or null. • Y= Reference information on application is complete • N= Reference information on application is not complete
Borrower Default/Refund Code	Y, N or null. This field is enabled only if borrower is not the student.
Borrower Outstanding Loans Code	Y, N or null. This field is enabled only if borrower is not the student. Does the PLUS/Alternative Loan borrower have any outstanding loans disbursed before July 1, 1993?
Preparatory Professional Coursework	Select the **Preparatory Professional Course Work** check box, if applicable, to designate whether the loan is for Preparatory coursework (to enroll in graduate or professional program) or Teacher Certification. If the option is selected, a tag <PreprofessionalCourseworkIndicator> is included in the COD Common Records as defined in the COD Technical Reference. The Grade Level for the loan is 5, the maximum Subsidized Stafford loan limit $5,500, and the combined Maximum $12,500 limit for loans is applied. **Note**: This flag is only accepted by COD when a loan is submitted that has a first disbursement date on or after July 1, 2007.

Promissory Note and Other Information Tab

The Prom & Other Information tab contains data about the promissory note and other miscellaneous information about the loan.



Field Descriptions - Prom & Other Info Tab

Field	Description
Serial Loan Code	Indicates how the school intends to use the Master Promissory Note. This field is enabled only if the fund source type is SUB, UNSUB, or PLUS. The valid values for this field are: • N = New; use a new MPN • S = Serial; renew the existing MPN • Blank = Not Specified. If the loan start date occurs after 06/30/2004, this field must be N or S.
Date Prom Note Signed by Borrower	Date on which the borrower signed the promissory note.
Student Default on Loans	Y, N, or null. This field is enabled only if borrower is not the student.
Alternative Borrower Student Loan Debt	Total amount of outstanding education loan debt for alternative loan borrower prior to this application.
Valid Promissory Note?	Blank, Y, or N. Y = Yes, school has a valid, signed promissory note. N = No, school does not have a valid, signed promissory note.
Promissory Note Delivery Code	Preferred method of delivering the promissory note to the borrower. Required if the Loan Processing Code is GP, PG or CR. The values is P if the Processing Code is PO. The is blank if the Processing Code is GO. • E = Email • P = Paper • W = Web • Blank
Student Signature Code	Y or N if borrower is not student. Not used if borrower is student.

Comments Tab

The Comments tab contains any comments concerning this loan. When you click the **Comments** button, the cursor is placed in the Comments window. Enter or edit comments as required. The Comments field holds up to 1000 characters.

FA Student Cash Payment/Other Form

This form is used to handle cash paid by the student or by an agency on behalf of the student. The form has the following tabs:

- Scheduled Payments
- Payments Received (contains a read-only ACH Transactions sub-tab)
- Refunds
- Auto Drafts
- Comments

Also see Payment Schedule Dates Calculations.

Note: Package student payments (cash) only if, after all other aid has been packaged, the Institutional Charges minus the Net Aid Packaged is greater than zero (0).

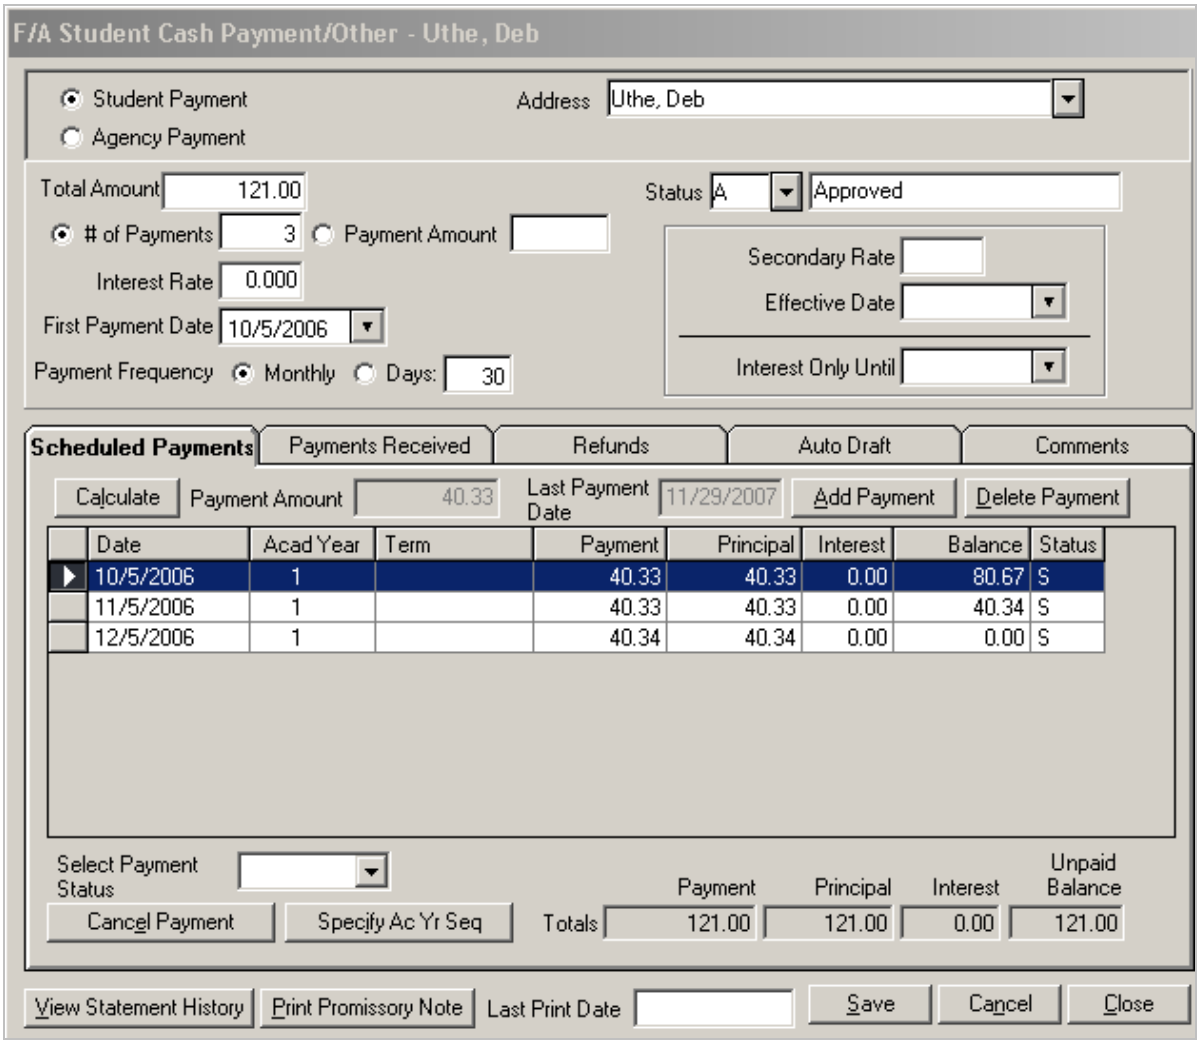
When Cash-Other payments are posted as received on the student's ledger card from the Student Accounts Payments form, CampusNexus Student updates the Student Academic Year ID column in the FA Disbursements table.

The Financial Aid Student Cash Payment/Other form prevents users from approving financial aid when the aid is from a Title IV fund source and the school is using a third-party FA servicer such as Global. All such approvals are managed by the servicer and imported by the servicer integration features. Users are also prevented from deleting a record that is associated with a Servicer ID. This can only occur through a Global change file.

To work with the F/A Student Cash Payment/Other form:

1. Select a student.
2. Navigate to **View > Financial Aid > Packaging**. The Financial Aid Packaging form is displayed.
3. Double-click the academic year for which the payment is required, or select it and click **Edit**. The Financial Aid Academic Year form is displayed.
4. Click **Package**. The Financial Aid Packaging form is displayed. Any existing fund sources including student or agency payments are listed in the upper left of the form.
5. Double-click an existing cash payment or third-party payment fund source on the Packaging form, or select it and click **Edit**.
   - OR -
   Click **Add** to add a new payment schedule. The New Source of Aid form is displayed.
6. Select **Student Payment/Other** and complete the required fields. Click **Continue**. The F/A Student Cash Payment/Other form is displayed.
7. Select **Student Payment** or **Agency Payment**.

- If you select Student Payment, the Address field is displayed to the right of the payment options.



- If you select Agency Payment, the Agency and Agency Branch fields appear to the right of the payment options.

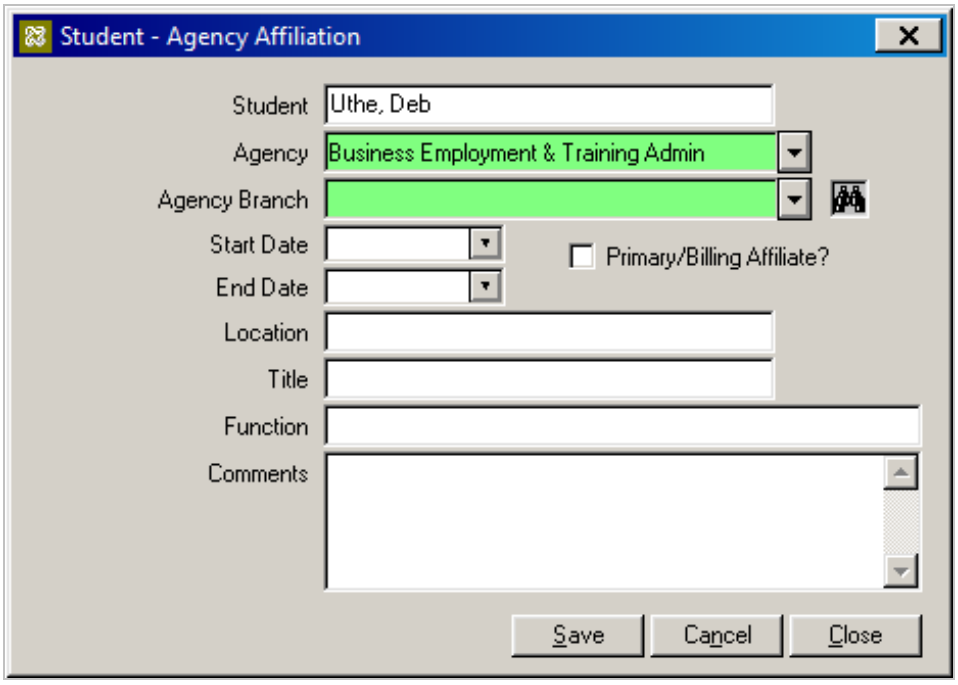
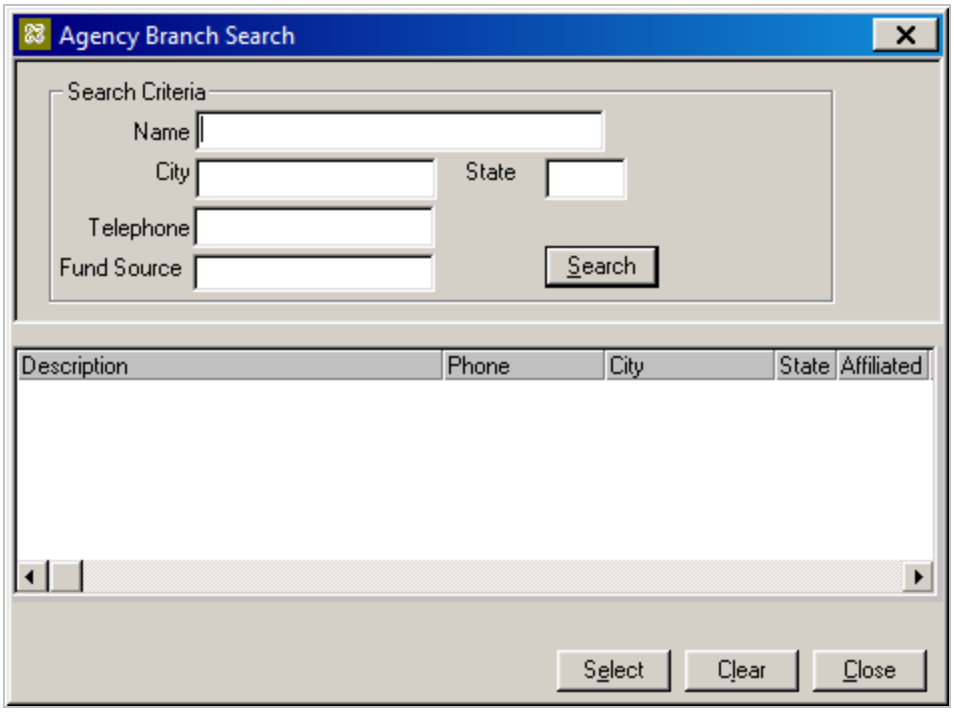
a. Select an Agency.

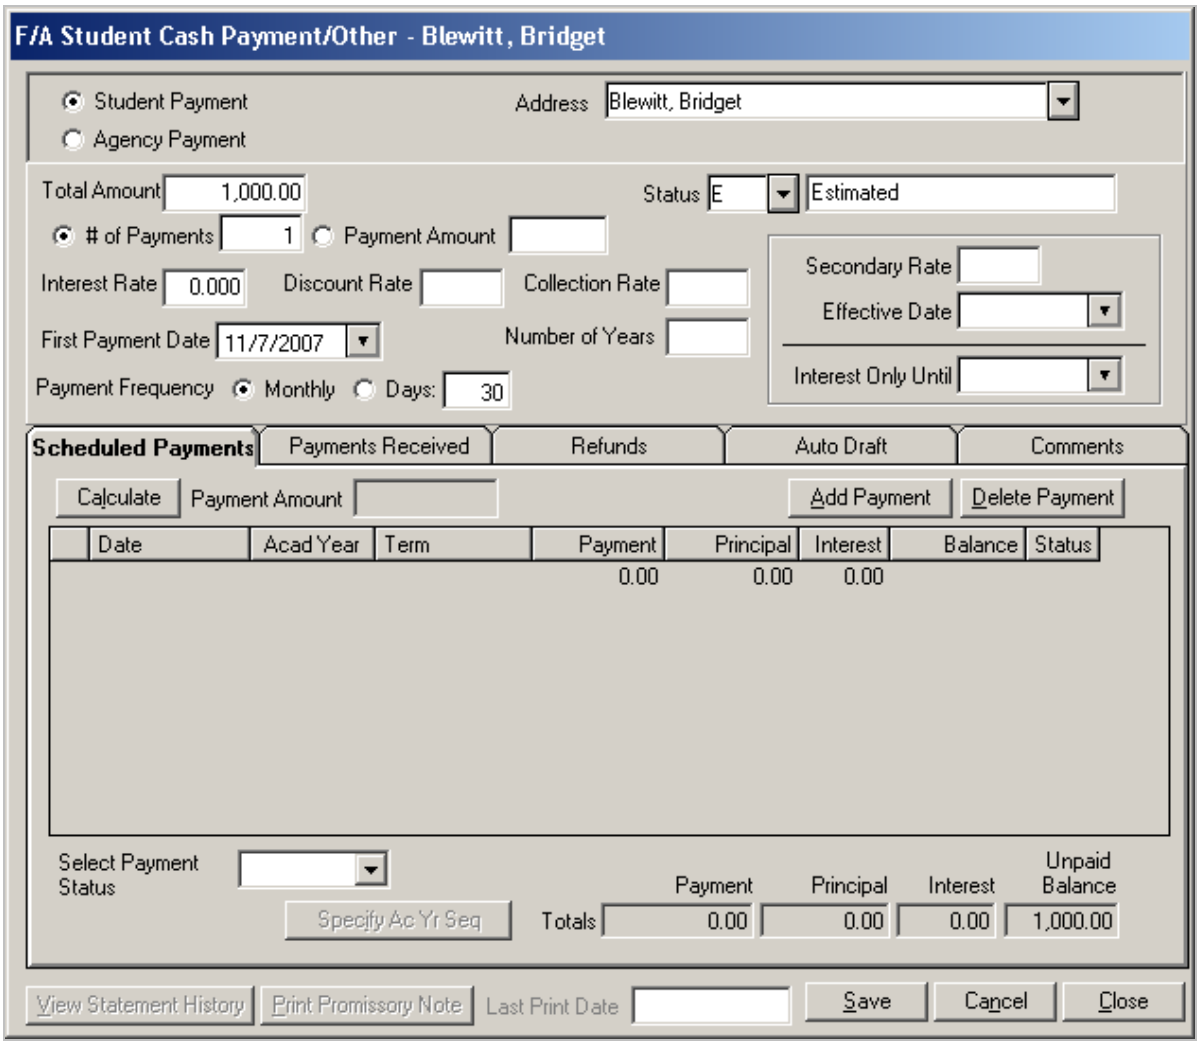


b. If you do not see the Agency Branch, click to display the Agency Branch Search form, specify search criteria, and click **Search**. The grid on the lists all agencies that match your search criteria. Double-click the agency you want to select.



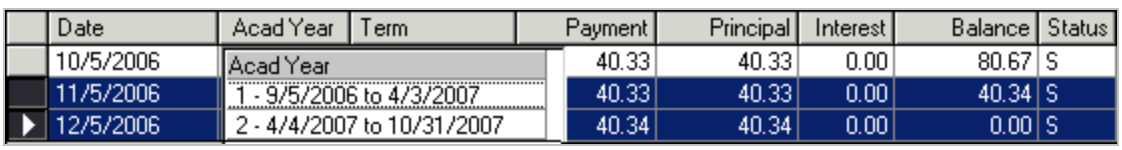
8. Complete the Basic Information fields and proceed to each of the tab's instructions below.
9. The **Number of Years**, **Discount Rate**, and **Collection Rate** field appear only when the configuration option "Use

Individual Institution Loan calculation" has been selected from the Fund Source Code Setup form. These fields are populated once the award is saved. If any of these values are missing, the loan will not be included in the 90/10 Report calculations. For more information, see the 90/10 Report Configuration options under Lists > Financial Aid Sources > Fund Source.



10. Click **Print Promissory Note** to print the promissory note. If the Allow Printing Promissory Note option has been activated for the campus and a location has been designated for custom reports, the custom promissory note is printed; otherwise, the standard promissory note is printed.

11. Click **Specify Ac Yr Seq** to change the academic year sequence on multiple disbursements instead of having to change each academic year individually. This feature does not apply for disbursements that have been paid or associated with an academic year where the COA is zero. Select multiple disbursements by holding down the **Shift** or **Ctrl** key and clicking on the disbursement. When you click **Specify Ac Yr Seq**, an academic year list is displayed. Double-click the desired academic year to apply the selected academic year to all selected disbursements.



Example: The **Academic Year** for the two selected disbursements was 1 before clicking **Specify Ac Yr Seq**. Then, **Academic Year 2** was selected from the drop-down list, and now the selected disbursements is assigned to **Academic Year 2**.

	Date	Acad Year	Term	Payment	Principal	Interest	Balance	Status
	10/5/2006	1		40.33	40.33	0.00	80.67	S
	11/5/2006	2		40.33	40.33	0.00	40.34	S
	12/5/2006	2		40.34	40.34	0.00	0.00	S

12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

    Notes:

    - When a payment schedule is saved, the Interest Balance and Principal Balance in the FA Student Aid table will be the sum of the respective interest and principal amounts in the grid where the status is S - Scheduled.
    - When you save an Agency payment schedule, and the student is not already affiliated with the agency branch, CampusNexus Student prompts you to create the affiliation between the student and the agency branch. Select **Yes** or **No**.

Field Descriptions - Basic Information

Field	Description
Address	Depending on the source selected above, this will be the student's address or the agency. If it is the agency, the form will also ask for the branch address.
Total Amount	Enter the total amount. The default amount is the amount entered on the FA Packaging form. The Total Amount field will show positive amounts only.
Number of Payments	Enter the number of payments that the source will make. You can choose to enter the number of payments or the amount of each payment. The calculation procedure will recognize your choice and calculate the other component.
Payment Amount	Enter the amount of each payment. You can choose to enter the number of payments or the amount of each payment. The calculation procedure will recognize your choice and calculate the other component.
Interest Rate	Enter the interest rate. Example: 3.00 is three percent. Negative interest rates are not allowed. Interest values are displayed with three decimal places.
First Payment Date	Enter the date that the first payment on the schedule is expected. See Payment Schedule Dates Calculations.
Payment Frequency	Select Monthly or Days. If you select Days, enter the number of days between payments (this value cannot exceed 365).
Status	Select Approved, Estimated, Pending, or Canceled. When you change a payment schedule to status C - Canceled, the remaining Scheduled disbursements are changed to status Canceled when you save the record.
Secondary Rate	Enter an optional secondary interest rate that applies as of the effective date below. These fields facilitate a "two-tiered" payment plan. Negative interest rates are not allowed. Interest values are displayed with three decimal places.

Field	Description
Effective Date	Enter the effective date of the secondary interest rate. The secondary rate is applied to the balance for payments after this date.
Interest Only Until	Enter a date until which the student will make interest payments only.

Scheduled Payments Tab

The Scheduled Payments tab shows the calculated schedule of payments based on the parameters shown on the top portion of the form. After entering the parameters, click **Calculate** to fill in the grid. After the calculation is performed, edit the individual payments if necessary. Enter the number of payments or the amount of each payment. The calculation procedure will recognize your choice and calculate the other component.

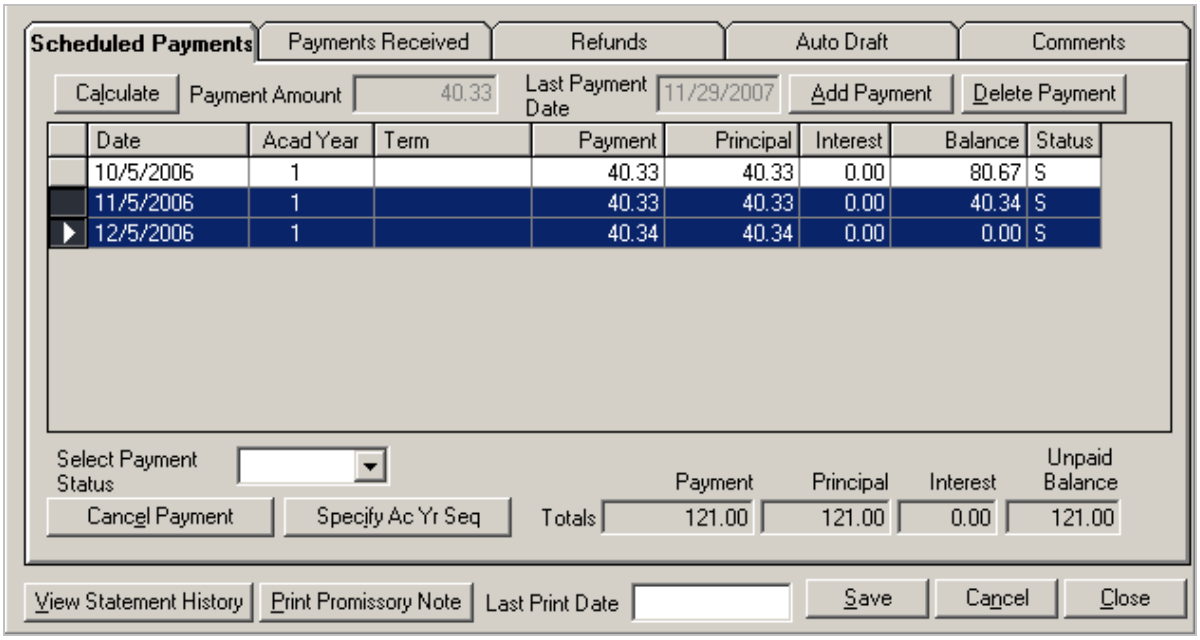
Note: The initial scheduling of any payment plan associated with a fund source type of cash/other uses the same amortization logic that is used when payments are posted.

The F/A Student Cash Payment/Other form allows a scheduled payment to be cancelled. It also allows you to modify an expected amount for a scheduled payment. When you click on the expected amount for a scheduled payment, you can edit the amount expected.

When you click the payment to edit, if the status of the payment is Scheduled (S), the **Cancel Payment** button is enabled. Click this button to cancel the payment. When the payment was cancelled, the button is labeled **Re-expect Payment**. When you select a different row, the button label is updated to **Cancel Payment**. If the selected disbursement was canceled, the button label is **Re-Expect**; otherwise, it is **Cancel**.

You can change the total amount of the payment schedule or the total number of payments to a larger number and then click **Recalculate**. The Recalculate button will not affect scheduled payments that have been received or canceled.

Type or select Scheduled Payments tab as follows:



Click **Calculate** to calculate the payment schedule from the data on the top portion of the form. The total amount is divided by the number of payments to determine the amount of each payment along with principal, interest, and balance amounts. If payments have been received, a message indicates that the payment amount may change for future payments. You have the option to continue or cancel.

Calculation of the payment amount expected must include the net amount for any scheduled payments that are past due. Calculation of the interest portion of the payment being made includes summing the interest amount of the payment being made, any accrued interest amount, and the interest amounts of any scheduled payments that are past due.

If the payment amount equals the scheduled payment amount, there is no change to the future scheduled payment amounts and the following formula is not executed. However, if the payment amount is under or over the amount expected, the logic to reamortize the principal balance is as follows:

Formula for Reamortization of Cash Payment Plans

First, the Constant Rate is calculated:

- If Payment Frequency is Monthly (Monthly Constant Rate)

  Constant Rate = (Interest Rate * 0.01) / 12

- If Payment Frequency is Days (Daily Constant Rate)

  Constant Rate = (Interest Rate * 0.01) / (365/Days)

  Next, the Payment Amount per period is calculated:

- If Interest Rate > 0

  Payment Amount = Outstanding Loan Amount * (1+Constant Rate) ^ Number of Remaining Disbursements / (((1+Constant Rate) ^ Number of Remaining Disbursements) - 1) / Constant Rate

- If Interest Rate = 0

  Payment Amount = Outstanding Loan Amount / Number of Remaining Disbursements

Outstanding Loan Amount = Total Amount Packaged - Principal Payments Received to Date

Interest Amount = Outstanding Loan Amount * Constant Rate

Principal Amount = Payment Amount - Interest Amount

Field Descriptions - Scheduled Payments Tab

Field	Description
Payment Amount	This field displays the calculated amount of each payment.
Add Payment	Click **Add Payment** to add a payment to the schedule. A new row is added in the grid. Enter the Date, Academic Year, Term, Principal, and Interest. The default date is today's date. CampusNexus Student updates the Payment and Balance totals when the Principal and Interest columns are changed.
Delete Payment	Select a row in the grid and click **Delete Payment** to remove a payment from the schedule. When a payment is deleted,CampusNexus Student updates the balance calculation for subsequent payments.
Date (expected)	Expected due date of each payment based on the entered parameters.

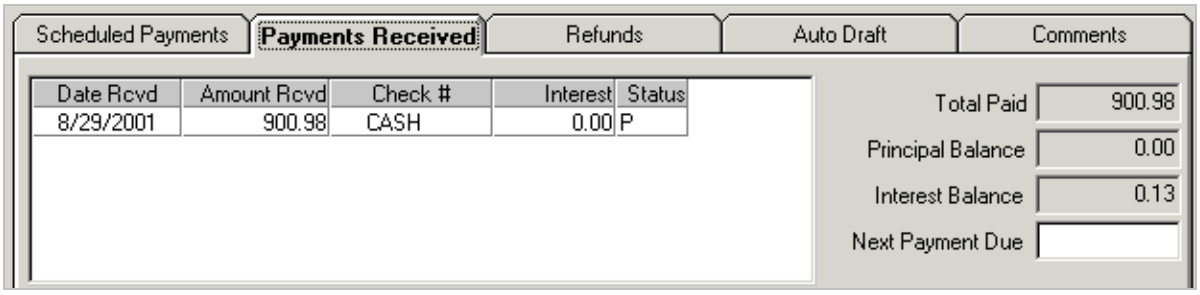
Field	Description
Acad Year	Academic year number to which the disbursement applies. You can edit the academic year for each disbursement if the disbursement passes the criteria required for editing the field. If it can be edited, a drop-down list is displayed showing each academic year for the student's enrollment. Each record displayed in the list shows the academic year number, academic year start date, and academic year end date. When new scheduled payments are added for the Cash/Other payment schedule, CampusNexus Student sets defaults for the academic year for each scheduled payment to the academic year being packaged. Scheduled payments are created when **Calculate** is clicked.
Term	Term to which each payment applies. It is entered at the time the payment is received. Enter the term code or select it from the drop-down list. **Agency Payment**: If the 'Associate Course with Payment' flag is for Agencies of Cash or Other fund source type, the Term and Course fields are related fields. In other words, if a Term is selected, *only* the Courses associated with the Term appear in the Course field. Alternatively, if a Course is selected, *only* the Terms associated with the Course selected appear in the Term list.
Course	**Agency Payment**: This field is displayed only if the 'Associate Course with Payment' flag is enabled for Agencies of Cash or Other fund source type. The field represents the course associated with each payment. It is selected from the Course list at the time the payment is received. If the Course field is displayed, the Term field are related field. In other words, if a Term is selected, *only* the Courses associated with the Term appear in the Course list. Alternatively, if a Course is selected, *only* the Terms associated with the Course appear in the Term list.
Payment	Read-only. This amount is calculated based on the entered parameters. If the total amount is not evenly divisible by the number of payments, the last payment may be slightly different from the other payments due to rounding.
Principal	Read-only. This is the portion of each payment that is applied to principal.
Interest	Read-only. This is the amount of each payment that is applied to interest.
Balance	Read-only. This is the balance due after each payment is made.
Status	Read-only. This is the status of each payment. Statuses can be Scheduled (S), Ready to Pay (R), Paid (P), or Cancelled (C).

Field	Description
Select Payment Status	This option allows institutions to select one, multiple, or all canceled or scheduled payments. This field is initially displayed on the form as blank and cannot be edited. There are two options for selection: Canceled or Scheduled. This field also drives the functionality of the Cancel Payment/Re-expect Payment button: • When the Select Payment Status option of Canceled is selected, CampusNexus Student highlights any payments in the grid that have a 'C' (Canceled) in the Status column and the button is set to 'Re-expect Payment'. If there are no Canceled payments, the button is still set to 'Re-expect Payment'. • When the Select Payment Status option of Scheduled is selected,CampusNexus Student highlights any payments in the grid that have a 'S' (Scheduled) in the Status column and the button is set to 'Cancel Payment'. If there are no Scheduled payments, the button is still set to 'Cancel Payment'. You can use the Ctrl or Shift keys, in conjunction with a mouse click, to select multiple payments.
Totals	Read-only. These are the totals of the Payment, Principal, Interest, and Balance columns on the grid. Users can move the alignment of the columns in the grid. Thus, the alignment of the totals below the related columns is only valid for the default grid configuration.

Payments Received Tab

The Payments Received tab lists payments received from the student or agency. The fields are read-only .

Payments are posted in Student Accounts or from the Post Payment button on the Ledger Card.

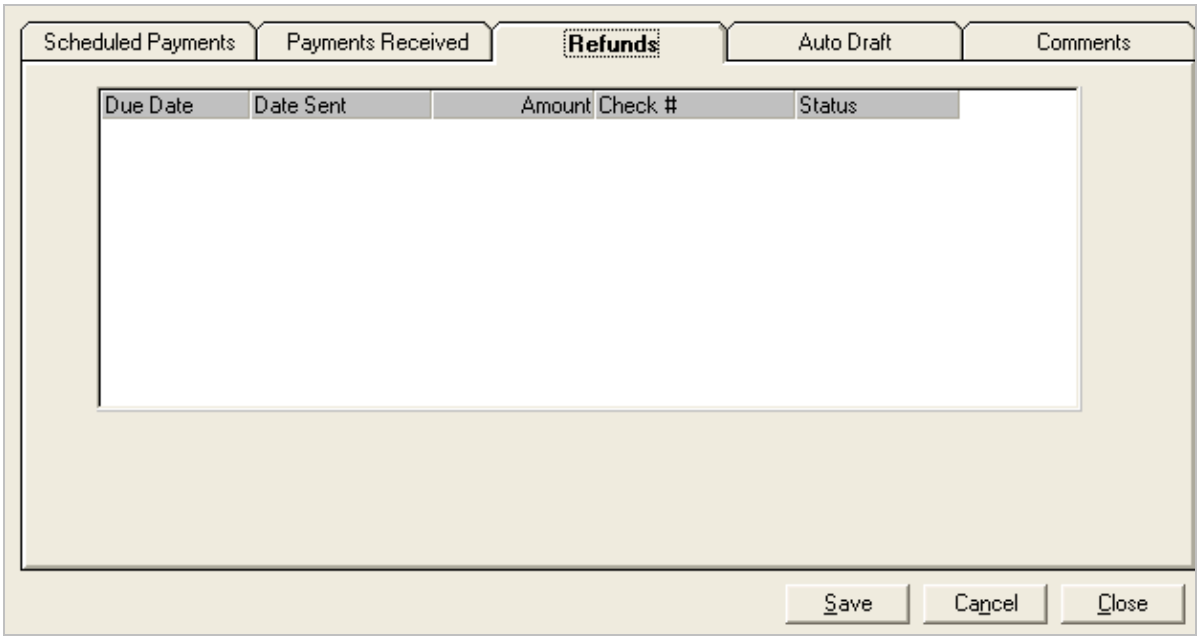


Field Descriptions - Payments Received Tab

Field	Description
Date Received	Date on which the payment is received
Amount Received	Dollar amount that was received
Check Number	Number of the check used for the payment
Interest	Portion of the payment that was applied to interest

Field	Description
Status	Indicates whether Paid (P) or Void (V).
Total Paid	Total amount of the scheduled payment paid to date
Principal Balance	Balance of the principal that remains to be paid
Interest Balance	Balance of the interest that remains to be paid
Next Payment Due	Due date of the next scheduled payment
ACH Transactions	This sub-tab serves as an audit trail. It displays all imported and exported ACH transactions. Transaction data includes Post Date, Batch #, Transaction ID, Amount, Message and Status (Response Code). 
Refunds Tab

It is sometimes necessary to refund all or part of student payments. Refunds may be necessary when a student drops out of school. Refunds are processed in Student Accounts under Daily > Student Accounts > Post Individual Refunds. Refunds can also be posted from the student's ledger card by clicking Post Refunds. The fields on this tab are read-only.



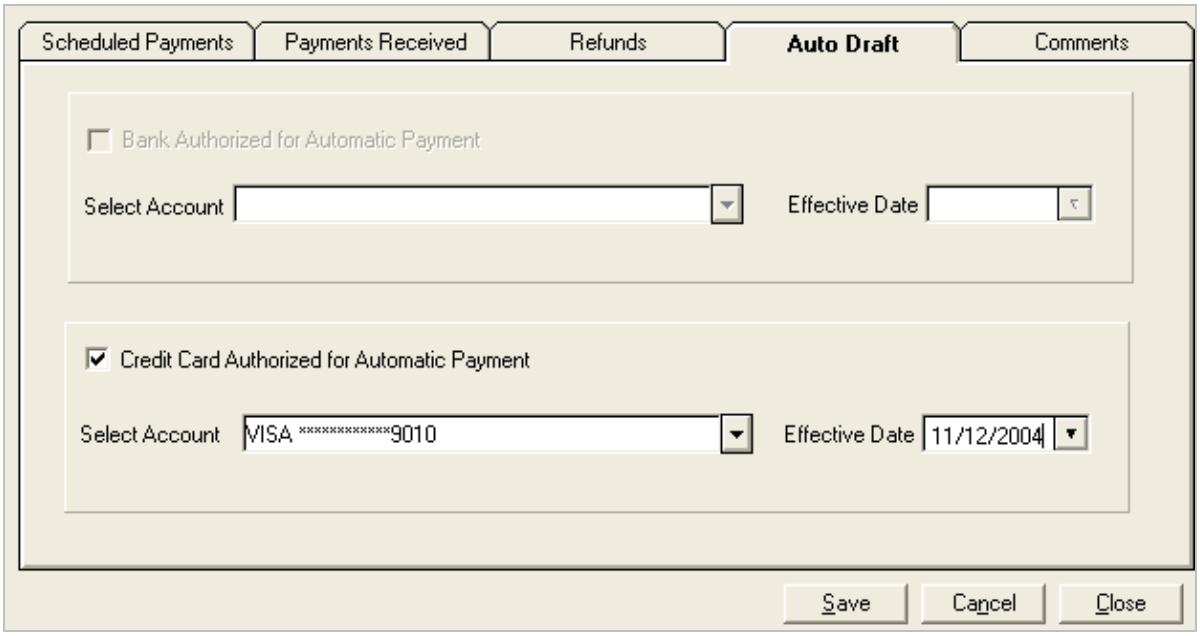
Field Descriptions - Refunds Tab

Field	Description
Due Date	Date that the refund is due to be sent to the student or agency
Date Sent	Date that the refund check was sent to the student or agency
Amount	Amount of the refund
Check Number	Number of the refund check
Status	Status of the refund. Status options include Scheduled, Approved, Paid, Cancelled.

Auto Draft Tab

This tab enables you to select the appropriate student bank account or credit card account for auto drafts.

Select the **Authorized** check box and then select appropriate values from the **Select Account** and **Effective Date** lists. If Auto Withdrawal is not authorized, the lists are unavailable.



Comments Tab

Click the **Comments** tab to view, edit, or add comments. The Comments field holds 1000 alphanumeric characters.

Other Grant/Scholarship Form

This form is used to set up grants or scholarships other than Pell grants. Student eligibility for a grant or scholarship is determined by your institution or the fund source.

The number of disbursements and percentage disbursed in each disbursement are set up under Lists > Financial Aid > Academic Years. You can change these parameters in this form to deal with exceptions to the normal practice.

When a student is dropped, financial aid is cancelled. If the student is reinstated, financial aid must be "re-expected". Scheduled disbursements are not automatically changed back to scheduled. Review scheduled disbursements for each fund source to "re-expect" the disbursements that still apply.

Notes:

When an Award status is set to "Canceled" , the disbursements associated with the award will also be set to a status of "Canceled". Under these conditions the disbursements may not be added or re-expected.

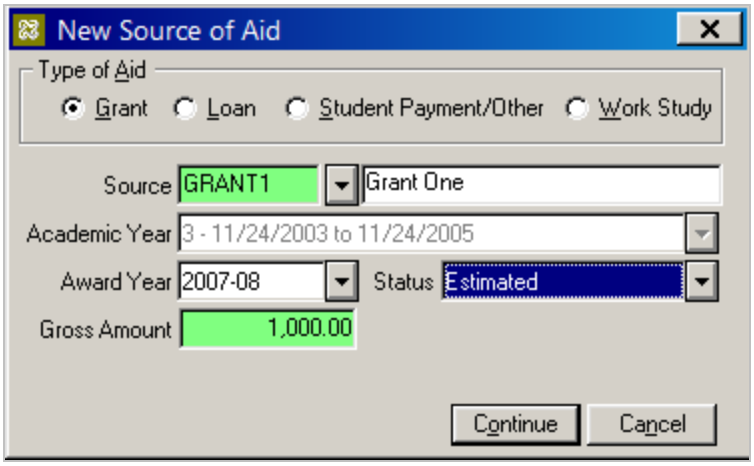
- If the **Add** button is selected, the following message is displayed: *"Cannot add disbursement to a canceled Award."*
- If the **Re-Expect** button is selected, the following message is displayed: *"Cannot Re-Expect a disbursement while the Award is in "Canceled" status. Select a new Award Status and try again."*

You may not "Calculate" or "Recalculate" disbursements.

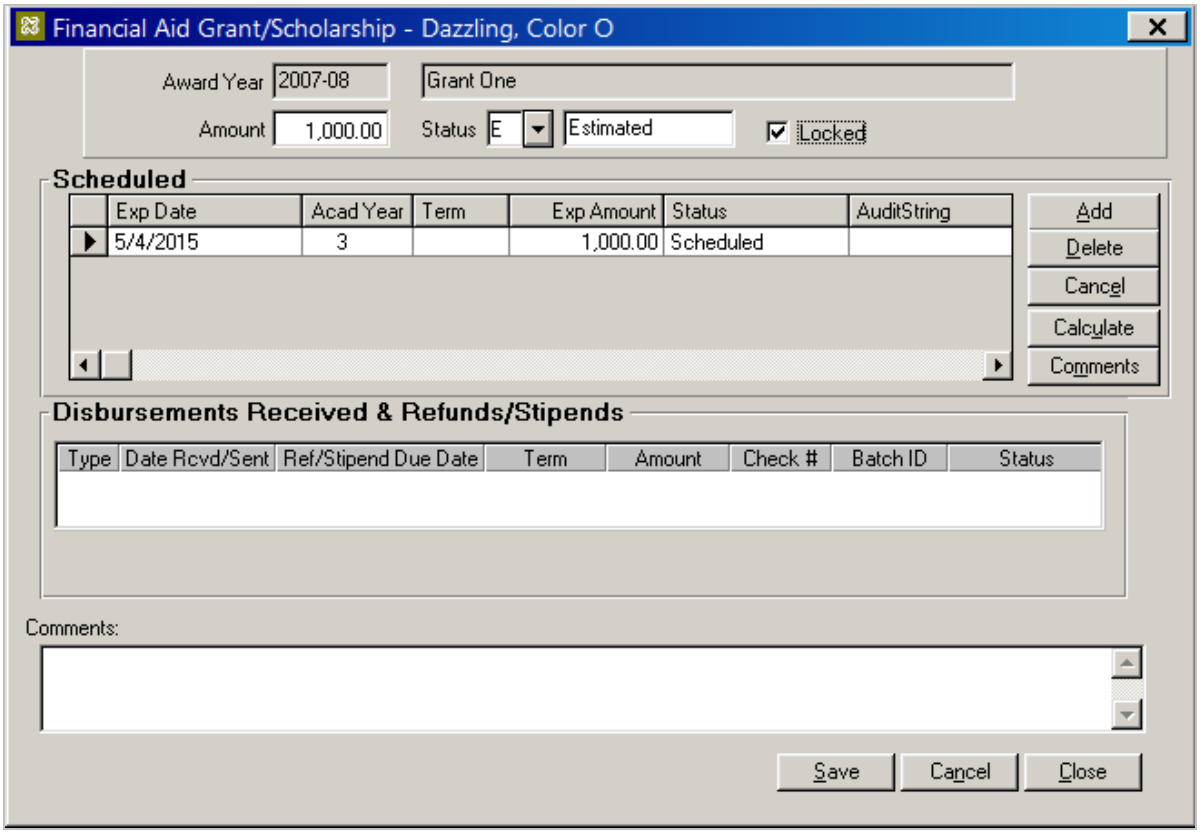
- If the **Calculate** or **Recalculate** buttons are selected, the following message is displayed: *"Cannot Calculate disbursements while Award is in "Canceled" status. Select a new Award Status and try again."*

To work with the Financial Aid Grant/Scholarship form:

1. Select a student.
2. Navigate to **View > Financial Aid > Packaging**. The Financial Aid Packaging form is displayed.
3. Double- click the academic year for which the payment is required, or select it and click **Edit**. The Financial Aid Academic Year form is displayed.
4. Click **Package**. The Financial Aid Packaging Form is displayed. Any existing fund sources including grants and scholarships are listed on the grid in the upper left portion of the form.
5. Click **Add** to add a new grant schedule. The New Source of Aid Form is displayed.
6. Select the **Source**, the **Award Year**, and **Status**. Enter the **Gross Amount**. If the status is Estimated, CampusNexus Student will not calculate a disbursement schedule on the next form.



7. Click **Continue**. The Financial Aid Grant/Scholarship form is displayed.



8. Enter or change data on the top section of the form as required.

Field Descriptions

Field	Description
Award Year	Award Year that you selected on the Financial Aid A/Y form.

Field	Description
Amount	Amount that the student is eligible to receive.
Status	Status of this grant/scholarship award. The status options are: • **A** - Approved • **C** - Canceled • **E** - Estimated • **P** - Pending Approval Canceled status: • When a user cancels a grant/scholarship disbursement, CampusNexus Student checks if all other disbursements for the award are in canceled statuses. If so, the status for the grant/scholarship award is changed to "Canceled". • If at least one disbursement of a grant/scholarship award has a status of "Paid" or "Ready to Pay", the "Cancel" option is not available in the Status drop-down list. • The status for all disbursements associated with a grant/scholarship award is set to "Canceled" if a user cancels the award. • If the grant/scholarship origination status is "Ready to Send", the status is changed to "Not Ready to Send" if the award has been canceled. • When a student's institution status is changed to a never attended status, the grant/scholarship status is changed to "Canceled" and the grant/scholarship origination status is "Ready to Send", the status is changed to "Not Ready to Send" if all associated disbursements have a canceled status.

9. Click **Add** to add scheduled disbursements. Enter the date and term for each disbursement.
10. If the status is Estimated, CampusNexus Student does not automatically calculate a disbursement schedule when the grant is added. You can initiate the disbursement schedule by clicking **Calculate**. The disbursements are calculated based on the data entered in the top of the form and the number of scheduled disbursements listed. The listed disbursements are updated as approvals are processed and payments are made.

    Scheduled disbursements are created when the status on the New Aid form is selected as *Approved* or *Pending*, or when the **Add** or **Calculate** buttons are clicked on the Financial Aid Grant/Scholarship form. The Scheduled Disbursement list is not created when new aid is added with a status of *Estimated*. Individual disbursements with a status of *Paid* or *Cancelled* cannot be edited.

    When FA disbursements are posted as received on the student's ledger card from the Student Accounts Payments form or from the Post FA Disbursements form, CampusNexus Student updates the Student Academic Year ID column in the FA Disbursements table.

    CampusNexus Student divides the total amount by the number of scheduled disbursements to determine the amount of each disbursement. CampusNexus Student calculates the distribution of disbursements when adding a new grant. For example, when adding a grant designated to have three disbursements, CampusNexus Student rounds up the first disbursement so that the distribution is 34%, 33%, and 33%.

    The Disbursements Received & Refunds/Stipends grid is read-only. It lists the disbursements received, refunds made to the fund source, and stipends paid to the student. The grid displays information from transactions that have been processed in the Student Accounts department.
11. Click **Comments** to enter or edit comments. The comments field holds 1000 characters of information.

12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

COD Grants

Pell, ACG, SMART, and TEACH grants are considered COD grants.

To manage COD grants:

1. Select a student.
2. Navigate to **View > Financial Aid > Awards**. The Financial Aid Packaging form is displayed.
3. Click **Add** to add a new COD grant or select an existing COD grant and click **Edit** to modify the award.
4. The New Source of Aid form is displayed. Select the COD fund source and fill in the fields in the form.
5. Click **Continue**.

   If the Pell Grant was selected, see Pell Grant form for instructions; otherwise, see ACG Grant, SMART Grant, or TEACH Grant.
6. The Financial Aid (COD Grant) form is displayed. In addition to information fields in the top portion of the form, the following tabs are displayed:

   - Scheduled Disbursements
   - Received Funds/Stipends
   - Comments
7. Enter or change data on the top portion of the form as required. Refer to the parameters below for specific information about each field.
8. On the Sched Disb tab, click **Calculate** to calculate the amount of each disbursement.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

CampusNexus Student checks for an ISIR on file before writing the Origination ID. If an ISIR is on file, the student COD grant Transaction ID is populated from the ISIR record. CampusNexus Student gets the first 11 characters from this field and populates the student COD grant Origination ID field.

ACG Grant

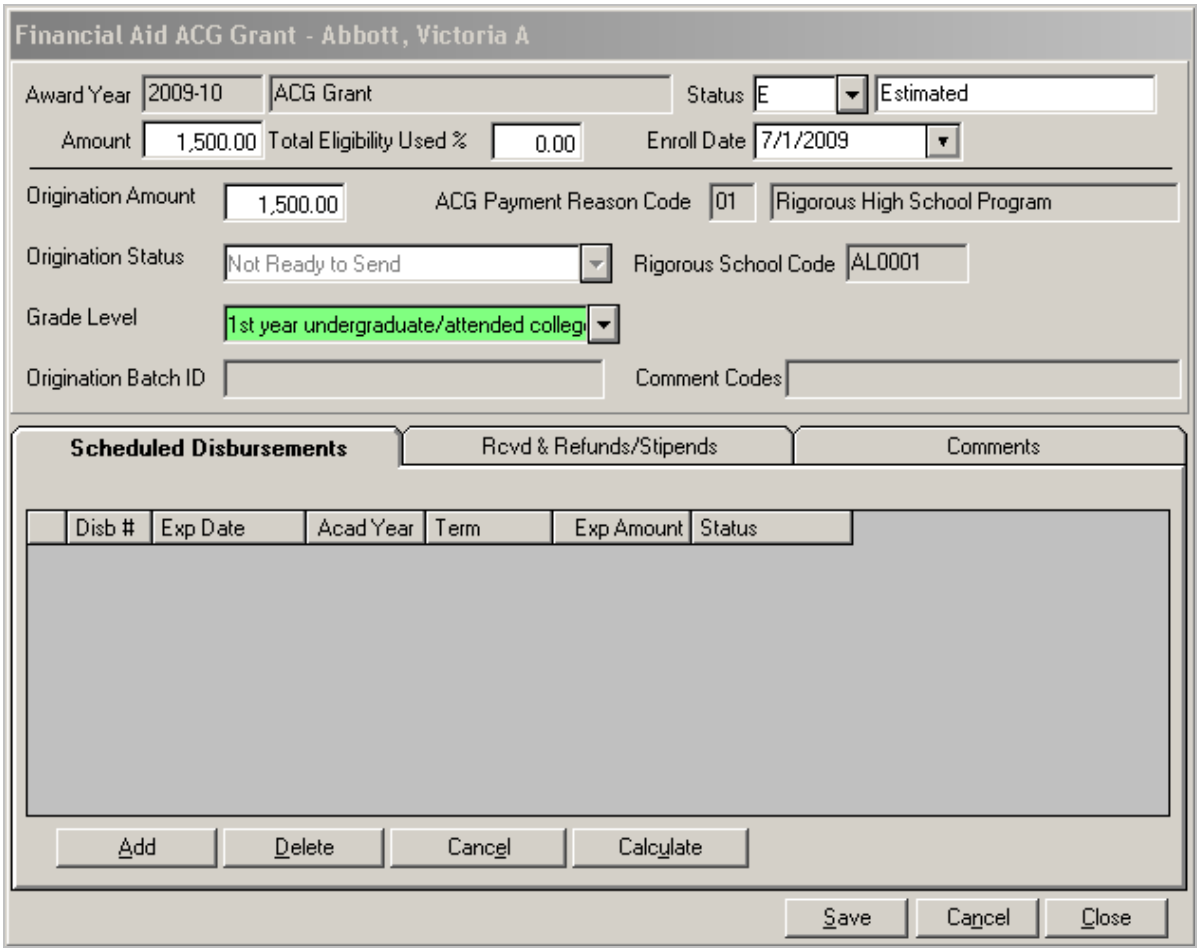
ACG Grants are offered to 1st and 2nd year students that meet the following requirements:

- They are U.S. Citizens or eligible non-citizens.
- The attended a Rigorous High School Program.
- They are attending at least half time.

If the student level code is '0' or '1' (1st year), the maximum Award amount cannot exceed $750.

If the student level code is '2' (2nd year), the maximum Award cannot exceed $1,300.

Note: For Award Years 2008-09 and prior, the **Student Level** field is displayed and an Academic Year can be selected.



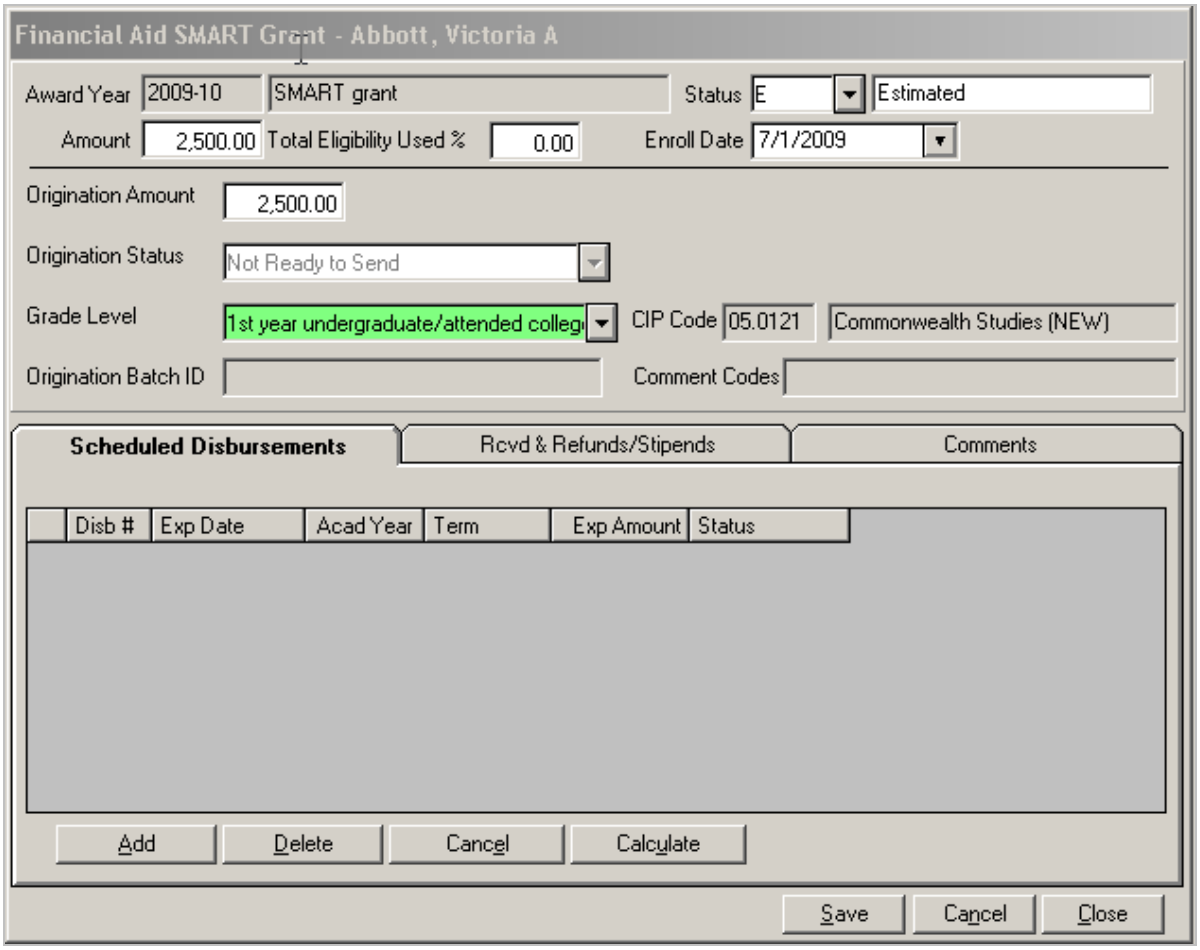
SMART Grant

SMART Grants are offered to 3rd, 4th, and 5th year students that meet the following requirements:

- They are U.S. Citizens or eligible non-citizens.
- They are enrolled in a program that is associated with approved CIP codes.
- They are attending at least half time.

The maximum allowable allocation per year is $4,000.00.

Note: For Award Years 2008-09 and prior, the **Student Level** field is displayed and an Academic Year can be selected.

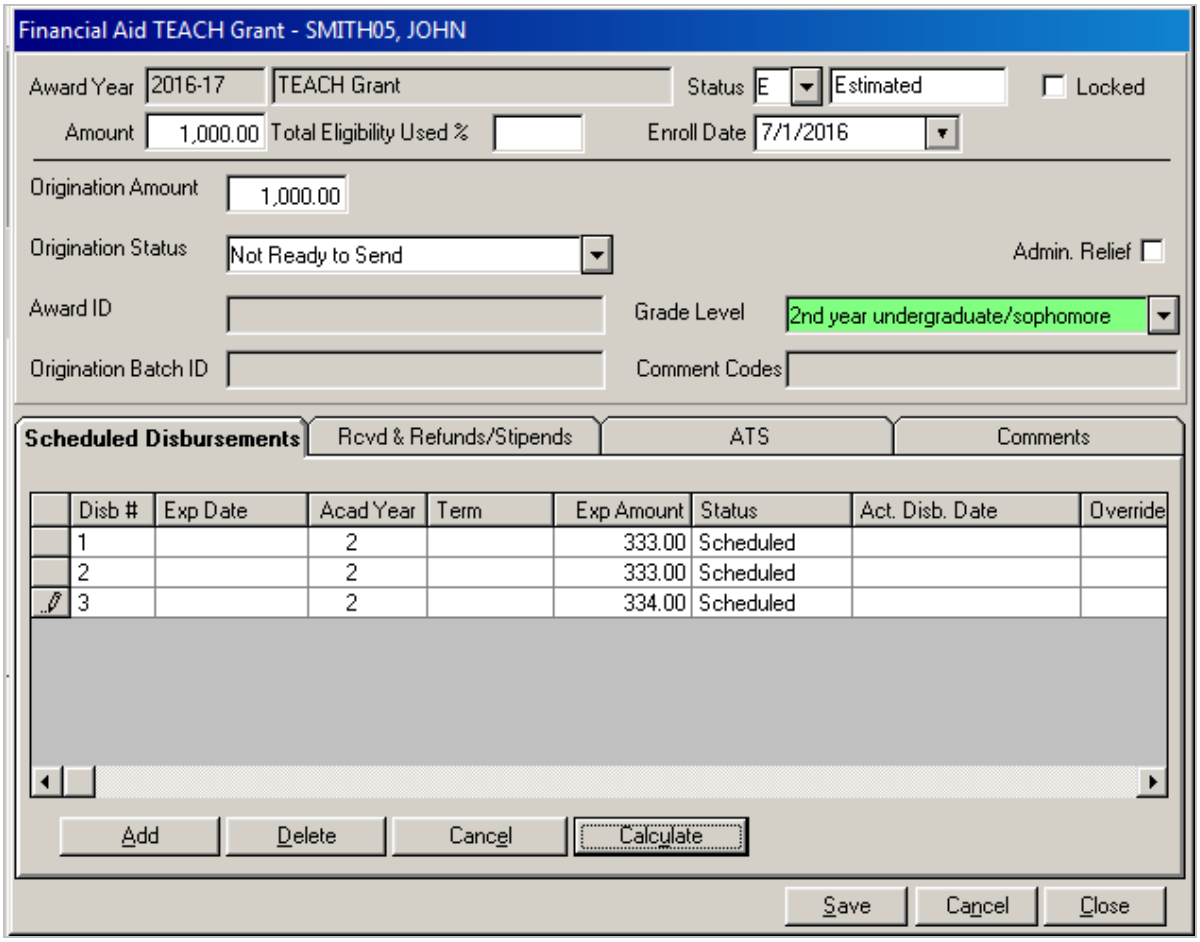


TEACH Grant

TEACH Grants are offered to students who intend to teach in a public or private elementary or secondary school that serves students from low income families. They must be U.S. Citizens or eligible non-citizens.

The maximum allowable allocation per year is $4,000. Eligible undergraduate and post-baccalaureate students may receive up to an aggregate limit of $16,000 and graduate students may receive up to a graduate aggregate limit of $8,000 in TEACH grants.

TEACH Grant awards are validated to ensure that if the earliest disbursement occurred after March 1, 2013, the maximum amount packaged is reduced as required in the sequestration legislation. Any institution that has disbursed TEACH funds to students with the earliest disbursement after March 1, 2013 using the per-sequester maximum award amounts must recalculate the TEACH Grant award amounts for upcoming payment periods based on the latest announced parameters.



Field Descriptions (top section of the form)

Field	Description
Award Year	Award Year selected on the Financial Aid A/Y form.
Amount	Amount that the student is eligible to receive.

Field	Description
Status	Status of the COD Grant. The status options are: • **A** - Approved • **C** - Canceled • **E** - Estimated • **P** - Pending Approval Canceled status: • When a user cancels a COD disbursement, CampusNexus Student checks if all other disbursements for the award are in canceled statuses. If so, the status for the COD award is changed to "Canceled". • If at least one disbursement of a COD award has a status of "Paid" or "Ready to Pay", the "Cancel" option is not available in the Status drop-down list. • The status for all disbursements associated with a COD award is set to "Canceled" if a user cancels the award. • If the COD origination status is "Ready to Send", the status is changed to "Not Ready to Send" if the award has been canceled. • When a student's institution status is changed to a never attended status, the COD status is changed to "Canceled" and the COD origination status is "Ready to Send", the status is changed to "Not Ready to Send" if all associated disbursements have a canceled status. Once a COD Grant is approved and batched to send to COD, you cannot make changes that would affect the batched data.
Locked	Enables users to lock or unlock a fund source, preventing or allowing changes to that Title IV fund source.
Total Eligibility Used %	This read-only field displays a percentage representing the eligibility that the student has used. This field is updated when the COD record for the grant is imported from COD.
Enroll Date	The enroll date must occur within the COD Grant Award Year. • If the student's enrollment date occurs *after* July 1 of the COD Grant Award Year, this field contains the date from the enrollment record . • If the student's enrollment date occurs *before* July 1 of the COD Grant Award Year, this field contains the July 1 date of that year.
# of Payment Periods in A/Y	Enter the number of payment periods in the academic year. The default comes from the Academic Year Setup. The maximum is 15. **Note**: Financial Aid award years begin on July 1st and end on June 30th. When COD or campus-based funds are awarded to a student, CampusNexus Student evaluates all scheduled disbursements for the award. • If any scheduled disbursement is dated is after the June 30th deadline, CampusNexus Student prevents the disbursement from being counted as part of the award. • If a disbursement date is after June 30th, students must complete another FAFSA for the following award year and the disbursement will be paid from that award year.

Field	Description
Origination Status	Select the origination status of this COD Grant. The options are: • **A** - Accepted • **B** - Batched to Send • **E** - Error/Rejected • **N** - Not Ready to Send • **R** - Ready to Send • **Blank** - Not on File This field can be edited only if a new Pell Grant is being added or if the value is blank, **N**, **R**, or **E**. When you **add** a COD Grant, the default status is 'Not Ready to Send' (No ISIR). The conditions under which the Origination Status may be set to 'Ready to Send' depends on your institution's policies. CampusNexus Student has a default setting that prevents the Origination Status from being set to 'Ready to Send' unless an ISIR has been received and the COD Grant Status is Approved. With this setting the Origination Status cannot be changed to 'Ready to Send' until the ISIR Received Date has been populated by CampusNexus Student (when an ISIR is received); however, if your institution has enabled the 'Originate/Certify Estimated Awards' option, you can set the Origination Status to 'Ready to Send' when the Award Status is 'E' (Estimated), 'P' (Pending Approval), or 'A' (Approved). When you modify the verification status, you are prompted to set Origination Status to 'Ready to Send'. The verification status field displayed on the Student Packaging form is included in the COD origination files transmitted for acknowledgment. A change in verification status will cause a prompt to ask if you would like to set the Origination status to 'Ready to Send'. The prompt is displayed if the following conditions are met: 1. CampusNexus Student determines the award year selected on the form. If the Origination status is **A**, the following message is displayed: *COD Origination Has Changed. Change the Origination Status to Ready to Send? Yes or No.* 2. If your response is **Yes**, CampusNexus Student sets the Origination status to **R**. Otherwise, no change is made. After you export originations, CampusNexus Student sets the origination status to **B** - 'Batched to Send'. When a COD Grant origination status is Batched, you are not allowed to modify any of the information regarding the origination. After the COD Grant origination records are sent to COD, if changes are made to the student's data records that affect the COD origination, CampusNexus Student captures the changes and prepares records to be exported to COD. The COD Grant record is considered to be originated if the Origination status is **A**, **B**, or **E**. If the COD grant record has already been originated (COD), and you change the Weeks Enrolled in AY on the Academic Year form, you will be prompted to change the origination status to **R**.
Origination Amount	Saving the form will only overwrite the origination amount when you change it. If the origination is accepted, changing the origination amount will prompt you to set the status to Ready. This change was made to allow two scheduled COD Grants for the same award year. These changes will accurately reflect on the related origination record.

Field	Description
Admin. Relief	If an institution has been granted Administrative Relief, selecting this check box ensures that records for the award year are included in the COD Export process. **Note:** This check box only appears when Financial Aid Automation is enabled.
Grade Level	See Grade Level.
Origination Batch ID	CampusNexus Student populates this field.

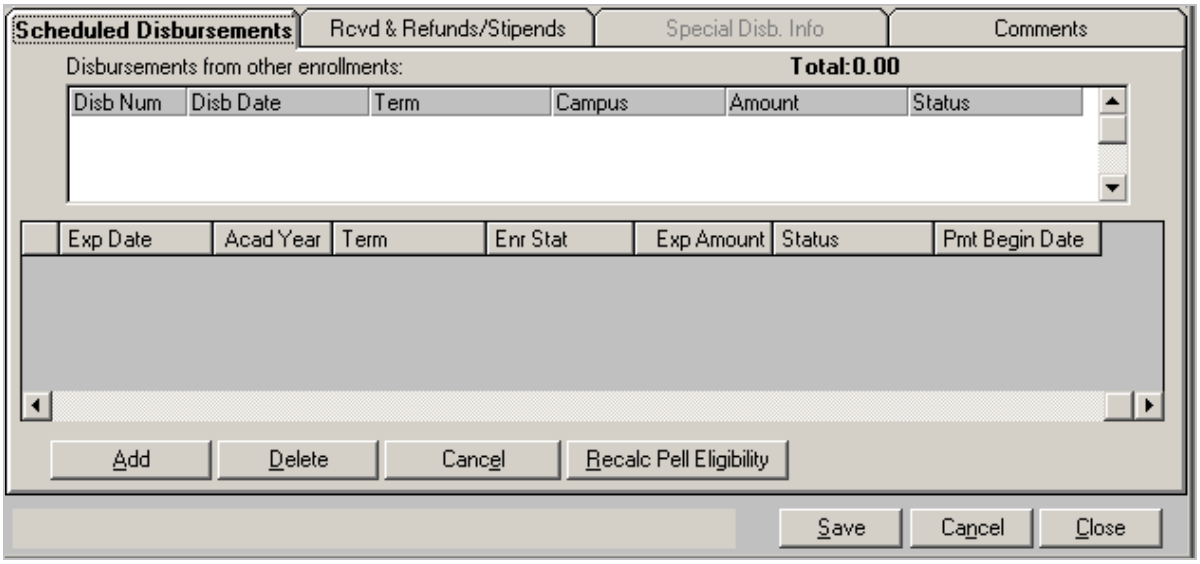
Scheduled Disbursements Tab

The Scheduled Disbursements tab lists the COD Grant disbursements for the selected award year. The disbursements are calculated based on the data entered in the top half of the form. If the status of the COD Grant is Estimated, CampusNexus Student will not automatically calculate a disbursement schedule. You can initiate the disbursement schedule by clicking Calculate or by adding a new scheduled disbursement to the list. The listed disbursements are updated as approvals are processed and payments are made.

Scheduled disbursements are created when the status on the New Aid form is selected as Approved or Pending, OR when the Add or Calculate tabs are clicked on the COD Grant form. The Scheduled Disbursement list is not created when new aid is added with a status of Estimated. Individual disbursements with a status of Paid or Cancelled cannot be edited.

When FA disbursements are posted as received on the student's ledger card from the Student Accounts Payments form or from the Post FA Disbursements form, CampusNexus Student updates the Student Academic Year ID column in the FA Disbursements table.

When a student is dropped, financial aid is canceled. If the student is reinstated, financial aid must be re-expected. Scheduled disbursements are not automatically changed back to Scheduled. Review scheduled disbursements for each fund source to re-expect the disbursements that still apply.



Field Descriptions - Scheduled Disbursements Tab

Field	Description
Disbursement Number	The disbursement number for this row.

Field	Description
Exp Date	The date on which the grant disbursement is due to be paid.
Acad Year	The academic year number to which the disbursement applies. You can edit the academic year for each disbursement if the disbursement passes the criteria required for editing. If you edit this field, a drop-down list is displayed. Each row in the drop-down list shows the academic year number, start date, and end date. When new scheduled disbursements are added for the COD Grant, CampusNexus Student defaults the academic year for each disbursement to the academic year being packaged.
Term	Type the term code or select it from the drop-down list. This is the term to which the disbursement is related. When you click in the field on the grid, a drop-down button becomes available. Click the button to see a list of terms from which you can select. The Term code can be edited only for disbursements that have a status of Scheduled (**S**).

Field	Description
Enr Stat/Hours	If the ProgramVersion.ClockCredit value is CCredit Hours, the column heading is Enr Stat. The value of this column is displayed from and stored to FaSched.EnrollmentStatus. This is a required field for Credit Hour institutions. The program stores zero to ClockHours and does not display the ClockHours column. The Enr Stat column is a combo box from which you can select • **F** - Full Time (default) • **Q** - Three Quarter Time • **H** - Half Time • **L** - Less Than Half Time • **U** - Undetermined. If the ProgramVersion.ClockCredit value is HClock Hours, the column heading is Hours. The value of this column is displayed from and stored to FaSched.ClockHours. This is a required field for Clock Hour institutions. The program stores F to Enrollment Status and does not display the enrollment status column. Total CLOCK Hours for all disbursements must add up to the Clock hours for the Academic Year (FaStudentAY). When you click **Recalc Pell Eligibility**, CampusNexus Student uses the FaPell.CalculateFullPellGrant method to find the full COD grant amount for the students EFC and COA. Then, CampusNexus Student calculates each disbursement using this Full Amount as the beginning total award value. After the calculation is complete, CampusNexus Student goes through each disbursement. **For CREDIT Hour programs:** If the Enrollment Status for the Disbursement is: • **F**: LEAVE AS IS • **U**: LEAVE AS IS • **Q**: Disbursement = Disbursement * 0.75 • **H**: Disbursement = Disbursement * 0.50 • **L**: Disbursement = Disbursement * 0.25 **For CLOCK Hour programs:** CampusNexus Student uses the method FaPell.ProRatePell to get the COD grant Amount, then splits the COD grant Amount out into the disbursements using the ClockHours for each disbursement to determine the amount. For example, IF: • FaStudentAY.CreditHoursExpToComplete = 800 • DISB 1 = 300 hours • DISB 2 = 300 hours • DISB 3 = 200 hours • Pell AMOUNT = 2400 Then, the result would be: • DISB 1 Amount = 900.00

Field	Description
	• DISB 2 Amount = 900.00 • DISB 3 Amount = 600.00
Exp Amount	This is the Expected Amount of the disbursement. It is calculated by dividing the total amount of the grant by the number of payment periods in the academic year. When disbursement amounts cannot be divided evenly, the first payment should be the highest. The calculation of the COD grant Amount has been modified to distribute the highest portion first. For example: • A $2,000 award will be disbursed as $667, $667, and $666. • A $1,000 award will be disbursed as $334, $333, and $333. In addition, the AUTO-PACKAGE routine was modified to use the same calculation method.
Status	The status of the grant disbursement. The statuses include Scheduled, Ready to Pay, Paid, and Cancelled.
Pmt Begin Date	Date of first payment.
Act Disb Date	The Automated COD Export Process allows you to configure if the COD Export Process should exclude Holidays and/or Weekends when determining the Actual Disbursement Date (calculation) that is reported to COD for the day disbursements are to be paid. **When Automated Processes is activated**, authorized users can view the calculated date in the Act Disb Date column on the Financial Aid ACG Grant screen. If neither option is selected, NA is displayed in this column.
Override Disb. Date	This column displays the updated disbursement date if **Override Disbursements date with** was selected in the COD Export wizard. The column is not displayed for previously created awards.

Rcvd & Refunds/Stipends Tab

The Rcvd & Refunds/Stipends tab lists the receipts of COD Grant disbursements from COD for the student. It also lists any COD refund transactions that have been processed for this student and any stipends paid to the student from COD Grant funds. The grid displays information from transactions that have been processed in the Student Accounts department. No changes to this grid can be made on this form.

The bottom portion of the Received & Refunds/Stipends section displays traffic related to this student between your school and the COD. Stipends are not part of the school/COD traffic. The records under **Received & Refunds/Stipends** should agree with the records under **Disbursements at COD**. If they do not agree, you can add an adjustment transaction to balance the two sets of records. Any adjustment record you add will be picked up by CampusNexus Student and written to a file for transmission to COD. Exporting and importing of records related to Pell Grants is handled under Daily operations. Those procedures are described in other Help system topics.

Direct Loan disbursement/adjustment records for award years 2014-15 and forward have been updated to display the Enrollment Status, Payment Period Start Date, and CIP code in the Disbursements at COD section of the award. TEACH Grant disbursement/adjustment records have been updated to display the Enrollment Status, and CIP code in the Disbursements at COD section of the award. They are now displayed in the additional columns that a user can scroll to the right to view in the Disbursements at COD section.

Field Descriptions - Rcvd & Refunds/Stipends Tab

Field	Description
Received/Refunds List	
Type	The type of entry on the list. D - Disbursement Received, R - Refund, or S - Stipend.
Date Rcvd/Sent	The date that the disbursement was received, the refund was sent, or the stipend was paid.
Ref/Stip Due Date	The date that the refund is due to be sent to COD for the date the stipend is scheduled to be paid to the student.
Term	The term to which the transaction is related.
Amount	The amount of the transaction.
Check #	The check number or EFT number of the transaction.
Pmt Per#	Payment period associated with the disbursement.
Date Deposited	The date that a receipt was deposited to the bank.
Date Signed	The date on which the student signed for the disbursement received.
Batch ID	The ID of the batch in which the transaction was processed.
Status	The status of the transaction: Approved, Paid, Sent, etc.
Disbursements at COD	
Disb #	The disbursement number for this row.
Disb Sequence	The order in which disbursements are to be made.
Disb Date	The date the disbursement was disbursed by COD.
Amount	The amount of the transaction that was sent to COD.
COD Status	This is the status of the transaction at COD. Statuses include Corrected, Rejected, Verification, Batched.
YTD Amt Accepted	The total year-to-date Pell amount accepted by COD.
Previous Seq #	The record number for the previous transaction associated with the disbursement, as provided by COD.
Export Batch ID	The number of the batch in which the transaction was exported to COD.
COD Comment Codes	A list of all COD edit (comment) codes associated with the Export Batch.
Enrollment Status	The student's enrollment status at the time the record was created. (Academic Year 2014-15 and Forward)
CIP Code	Program CIP Code associated with the disbursement or adjustment. (Academic Year 2014-15 and Forward)

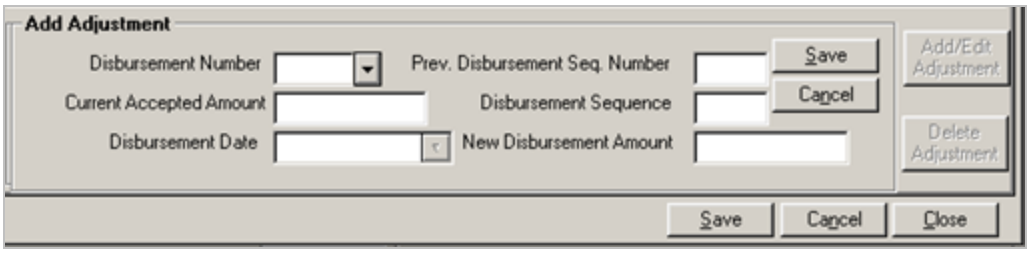
Click **Delete Adjustment** to remove an adjustment transaction from the table before it is sent to COD.

Click **Add Adjustment** to create a transaction adjusting a disbursement. The transaction will be picked up and sent to COD using export procedures under the Daily menu.

The Add Adjustment form is used to enter adjustment data. The **Disb. Reference Number** refers to the number of the disbursement to which the adjustment applies. **Total Accepted Disb. Amount** shows the disbursement amount accepted by COD.

Enter the **Adjustment Date** and **Adjustment Amount**, then click **Save** to save your adjustment transaction. Once saved, procedures under the Daily menu will be used to export the adjustment to COD.

CampusNexus Student permits disbursement adjustments only if the origination status is **A** - accepted, **B** - batched, or **C** - corrected (Accepted) and the disbursement has been released to COD.



Note: The Disbursement Amount field is populated manually. All other data on this form is retrieved from the Disbursements At COD Rcvd & Refunds/Stipends tab.

Special Disb. Info Tab

Note: The Special Disb. Info tab is disabled if the award year for the Pell is 2001-02 or later. It will continue to be shown for earlier award years.

This option is only applicable to an institution if it is required to do special disbursement reporting. If your institution is required to do special disbursement reporting, it will be noted on this form by a **Yes** beside the question "Enter Special Disb Info?"

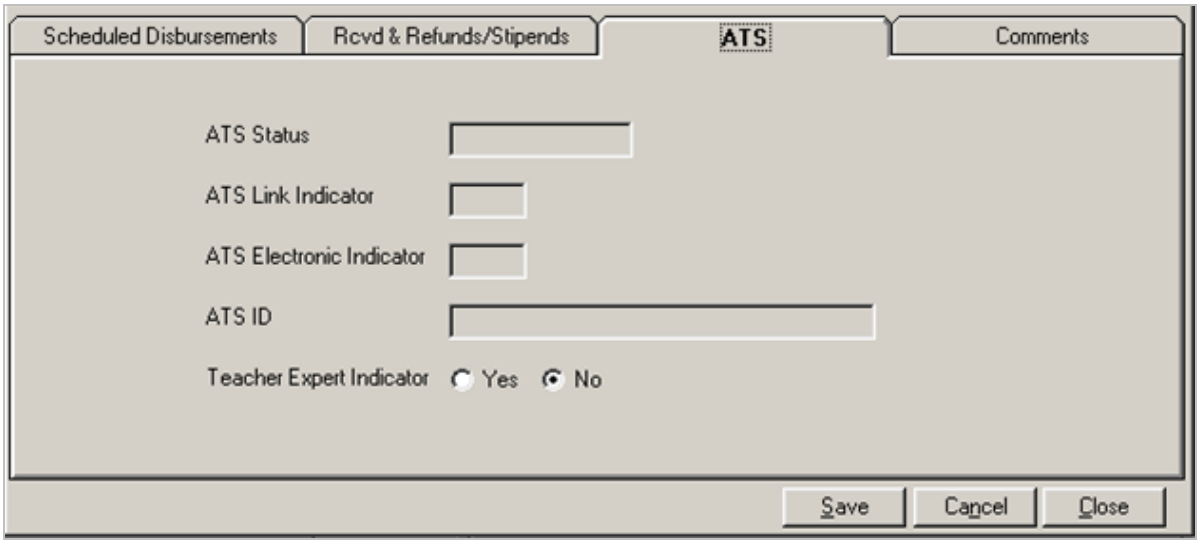
You can edit all fields on this form.

Comments Tab

The Comments tab displays any existing comments. To add comments, click **Comments** and enter your comments. The Comments field holds 1000 characters.

TEACH Grants - ATS Tab

For TEACH Grants, the Agreement To Serve (ATS) tab contains information related to the agreement students electronically sign related to the requirements associated with accepting a TEACH grant,



Field Descriptions - ATS Tab

Field	Description
ATS Status #	The status of the agreement as recorded at COD.
ATS Link Indicator	Confirmation that the agreement has been linked to the award.
ATS Electronic Link Indicator	Indicates the status of the electronic signature associated with this grant.
ATS ID	ID of the Agreement to Serve document.
Teacher Expert Indicator	Indicates if the TEACH grant recipient has the expert knowledge in the field, for example, someone who has retired from a specific field and is now pursuing a master's degree to become a teacher in the same field. The indicator can only be set to Yes if the student is a graduate student.

Click **Add Adjustment** to create a transaction adjusting a disbursement. The transaction will be picked up and sent to COD using export procedures under the Daily menu.

Click **Save** to save changes to the form.

Click **Cancel** to cancel changes to the form.

Click **Close** to close the form. If you have unsaved changes, you are prompted to save changes or close the form without saving.

Pell Grant Form

The Pell Grant program is a type of post-secondary, educational federal grant program sponsored by the U.S. Department of Education. It is named after U.S. Senator Claiborne Pell and originally known as the Basic Educational Opportunity Grant program. Pell Grants, which do not require repayment, are awarded based on a "financial need" formula determined by the U.S. Congress using criteria submitted through the Free Application for Federal Student Aid (FAFSA). Annually, the Federal Pell Grant Program issues revisions to grant amount and disbursement schedules. The grant disbursement schedule is maintained by the Federal government at https://ifap.ed.gov/ifap/

The Pell Grant form is used to set up Pell Grants in CampusNexus Student. Student eligibility for a Pell Grant is calculated (estimated) when the student's FAFSA is completed. When the FAFSA is sent to the Common Origination and Disbursement (COD) system at the Department of Education, COD determines the Pell amount the student can receive.

The student's ISIR must be on file at your institution before a Pell payment can be posted.

Note: When an Award status is set to 'Canceled', the disbursements associated with the award are also set 'Canceled'. Under these conditions:

- Disbursements may not be added or re-expected. If you click **Add**, an error message states *"Cannot add disbursement to a canceled Award"*. If you click **Re-Expect**, an error message states *"Cannot Re-Expect a disbursement while the Award is in 'Canceled' status. Select a new Award Status and try again"*.
- Disbursements may not be calculated or recalculated. If you click **Calculate** or **Recalculate**, an error message states *"Cannot Calculate disbursements while Award is in 'Canceled' status. Select a new Award Status and try again"*.

Approved Pell payments are posted to the student's ledger card and listed on the Received/Refunds tab of this form.CampusNexus Student updates the Pell disbursement records as ready to be sent to COD when Pell disbursements are approved to pay or actually paid. In addition, if Pell refunds are made, CampusNexus Student marks the refund records as ready to be sent as well.

Pell Formula Calculations

CampusNexus Student calculates the Pell Grant Award amounts based on the student's current enrollment using the following formulas:

- Formula 1:
  When the student is enrolled in a Standard Term program version: standard terms of quarters, standard terms of semesters and standard terms of trimesters (FA Academic Calendars 2, 3, and 4). Also, a student that is enrolled in a Non-standard Terms program version (FA Academic Calendar 1) and term association is not configured.
- Formula 3:
  When the student is enrolled in a Non-standard Terms program version (FA Academic Calendar 1) where term association is configured.
- Formula 4:
  When the student is enrolled in a Clock hour Program or a Non-term Credit Hour Program Version (FA Academic Calendars 5 and 6)

If the student has NSLDS history on file indicating that the student received Pell during the award year or if there are existing Pell awards within the system for the award year, these amounts will be taken into account and the award amounts reduced.

Manually Entering the Pell Amount

If you add a new Pell Grant and manually override the amount of Pell from the Pell tables, you become responsible for calculating the correct amounts for Origination Amount and each Scheduled Disbursement. When you are finished entering the Pell data, click **Save**.

If you have entered manually calculated Pell origination and scheduled disbursement amounts, and then you change the enrollment status on a disbursement, click **Save**.

In both cases, **do not** use the **Recalc Pell Eligibility** button. If you click this button, CampusNexus Student recalculates the Pell amounts based on the standards in the Pell tables. CampusNexus Student is likely to change the values you have entered.

Validations

CampusNexus Student includes refund amounts when checking the disbursements against the total amount packaged. When adding scheduled and disbursed amounts (to prevent you from going over the amount packaged), CampusNexus Student must take into account refunds on student loans (other than direct loans) and Pell Grants. Direct Loans are handled through the origination change.

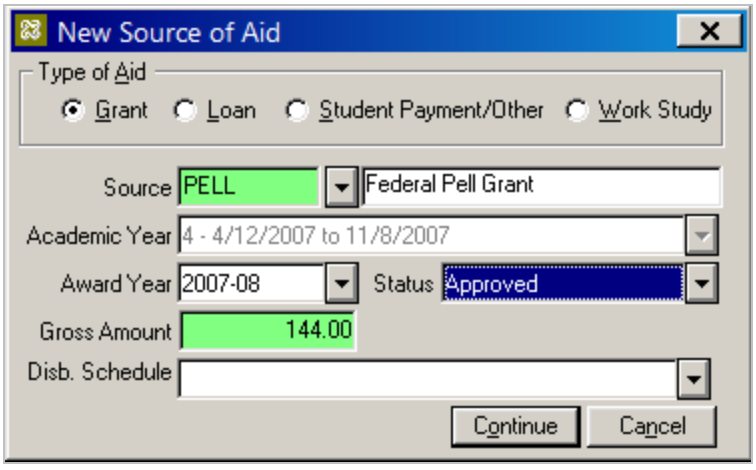
The number of disbursements and percentage disbursed in each disbursement are set up under Lists > Financial Aid > Academic Years.

Configurations that are relevant to Pell / COD grants processing are set up under Setup > Financial Aid > COD Grants.

To work with the Pell Grant form:

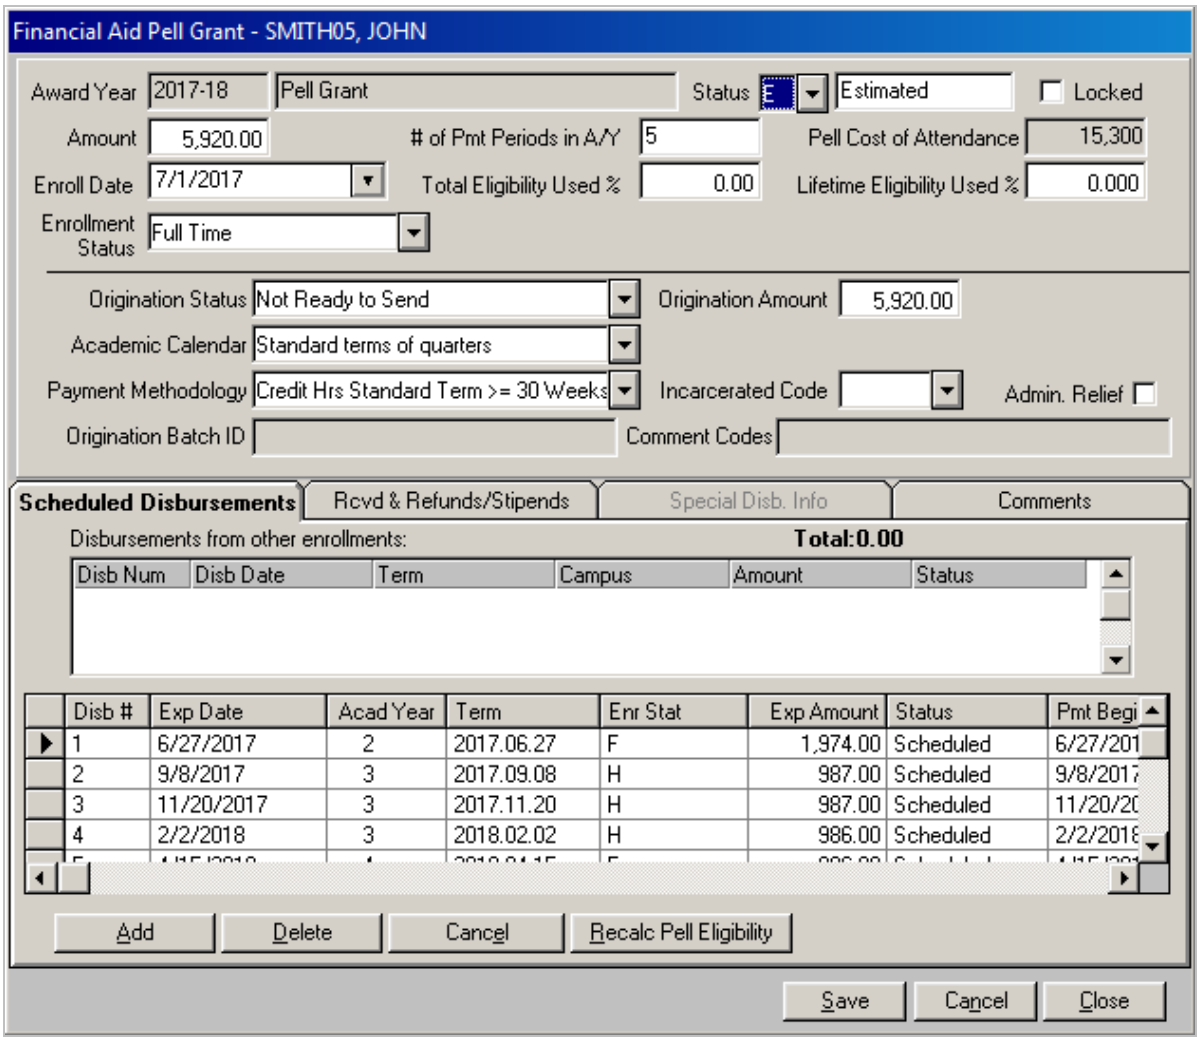
1. Select a student.
2. Navigate to **View** > **Financial Aid** > **Packaging**. The Financial Aid Packaging form is displayed.
3. Double-click the **Academic Year** for which the payment is required or select it and click **Edit**. The Financial Aid Academic Year form is displayed.
4. Click **Package**. The Financial Aid Packaging form is displayed. Any existing fund sources, including Pell Grants, are listed on the grid in the upper left portion of the form.
5. Click **Add**to add a new grant schedule. The New Source of Aid form is displayed.
   - OR -
   Double-click an existing Pell Grant on the Packaging form, or select it and click **Edit**. The Financial Aid Pell Grant form is displayed.
6. If you are adding a new source of aid, select the **Source**, **Award Year**, and **Status**. Enter the **Gross Amount** and click **Continue**.

   If the status is 'Estimated', CampusNexus Student will not calculate a disbursement schedule on the next form.



7. The Financial Aid Pell Grant form contains fields in the top portion of the form and the following tabs:

- Scheduled Disbursements
- Rcvd & Refunds/Stipends
- Special Disb. Info
- Comments



8. Enter or change data on the top portion of the form as required. Refer to the field descriptions.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

   CampusNexus Student checks for an ISIR on file before writing the Origination ID. If an ISIR is on file, the Student Pell Transaction ID is populated from the ISIR record. CampusNexus Student retrieves the first 11 characters from this field and populates the Student Pell Origination ID field.

Field Description (top section of the form)

Field	Description
Award Year	Award Year selected on the Financial Aid Academic Year form.
Amount	Amount the student is eligible to receive.

Field	Description
Status	Status of this Pell grant. The status options are: • **A** - Approved • **C** - Canceled • **E** - Estimated • **P** - Pending Approval Canceled status: • When a user cancels a Pell disbursement, CampusNexus Student checks if all other disbursements for the award are in canceled statuses. If so, the status for the Pell award is changed to "Canceled". • If at least one disbursement of a Pell award has a status of "Paid" or "Ready to Pay", the "Cancel" option is not available in the award's status list. The statuses of all disbursements associated with a Pell award are set to "Canceled" if a user cancels the award. • If the Pell origination status is "Ready to Send", the status is changed to "Not Ready to Send" if the award has been canceled. • When a student's school status is changed to a 'never attended' status, the Pell award's status is changed to "Canceled" and the Pell origination status is "Ready to Send", the status is changed to "Not Ready to Send" if all associated disbursements have a canceled status. Once a Pell Grant is approved and batched to send to COD, you cannot make changes that affect the batched data.
Locked	Enables users to lock or unlock a fund source, preventing or allowing changes to that Title IV fund source.
# of Pmt Periods in A/Y	Enter the number of payment periods in the academic year. The default comes from the Academic Year Setup. The maximum is 15. **Note**: Financial Aid award years begin on July 1st and end on June 30th. When Pell or campus-based funds are awarded to a student, CampusNexus Student evaluates all scheduled disbursements for the award. • If any scheduled disbursement is dated after the June 30th deadline, CampusNexus Student prevents the disbursement from being counted as part of the award. • If a disbursement date is after June 30th, students must complete another FAFSA for the following award year and the disbursement will be paid from that award year.
Pell Cost of Attendance	This read-only field displays the student's cost of attendance. It is passed to this form from the Packaging form.
Enroll Date	The enroll date must occur within the Pell Grant Award Year. • If the student's enrollment date is after July 1 of the Pell Grant Award Year, the date from the enrollment record appears in this field. • If the student's enrollment date is before July 1 of the Pell Grant Award Year, this field contains the July 1 date of that year.

Field	Description
Enrollment Status	Student's enrollment status. The valid values are: • 1 - Full Time • 2 - ¾ Time • 3 - ½ Time • 4 - Less than ½ Time • 5 - Other If this field is blank, default the value to 1, 2, 3, or 4 depending on the value of the attendance status in the student's enrollment record. Enrollment statuses can be: • F = Full Time • H = Half Time • L = Less than Half Time • Q = ¾ Time • 0 = Other If the student's enrollment record is set to one of these values, the Pell Enrollment Status is defaulted to the appropriate value (1, 2, 3, or 4). If the student's enrollment record does not reference one of these values, the default is set to Full Time. **Note**: If the Add'l Eligibility Indicator (AEI) check box is selected and you try to change the Enrollment Status, the message *"Enrollment Status cannot be changed for students eligible for additional Pell funds."* is displayed. You must clear the AEI check box before you try to change an enrollment status.
Lifetime Eligibility Used %	Percentage of the eligibility that the student has used. This field is read-only and is updated when the COD record for the Pell Grant is imported from COD. Beginning in the 2010-2011 Award Year, COD returns the Lifetime Eligibility Used % in the Common Record Response and the Negative Disbursement System-Generated response for Pell Awards for First Time Pell Recipients for the 2010-2011 Award Year and forward. This field is sent in multiple Pell Reports from COD, the Multiple Reporting Records, Reconciliation Report, and Year to Date file. Only the Year to Date file updates this field within the database, in the other files it is just used for display. This field is saved to the database and displayed on the form.

Field	Description
Origination Status	Origination status of this Pell Grant. The status options are: • **A** - Accepted • **B** - Batched to Send • **E** - Error/Rejected • **N** - Not Ready to Send or Not Ready to Send (No ISIR) • **R** - Ready to Send • **Blank** - Not on File This field can be edited only if a new Pell Grant is being added or if the value is blank, **N**, **R**, or **E**. When you **add** a Pell Grant, the default status is 'Not Ready to Send' or 'Not Ready to Send (No ISIR)'. The conditions under which the Origination Status may be set to 'Ready to Send' depends on your institution's policies. CampusNexus Student has a default setting that prevents the Origination Status from being set to 'Ready to Send' unless an ISIR has been received and the COD Grant Status is Approved. With this setting the Origination Status cannot be changed to 'Ready to Send' until the ISIR Received Date has been populated by CampusNexus Student (when an ISIR is received). If the **Originate/Certify Estimated Awards** option is enabled and the "Automatically Update Origination Status to Ready to Send?" flag is enabled (Setup > Financial Aid > COD Grants), the Origination Status is converted to an "R" if the Award Status is not equal to "C" (Cancel) when an ISIR is imported or during the ISIR Matching process. When manually updating a Pell award, when the "Originate/Certify Estimated Awards" option is disabled regardless of how the "Automatically Update Origination Status to 'Ready to Send"? flag is set, if the Origination Status is set to 'Ready to Send' and the Pell award Status is updated to 'E' (Estimated) or 'P' (Pending), the message *"Origination Status cannot be 'Ready to Send' until Pell Grant Status is 'Approved'"* is displayed when an attempt is made to save the award. You are prompted to set Origination Status to 'Ready to Send' when you modify the verification status. The verification status field displayed on the Student Packaging form is included in the Pell origination files transmitted for acknowledgment. A change in verification status will cause a prompt to ask if you want to set the Origination status to 'Ready to Send'. The prompt occurs if the following conditions are met: • CampusNexus Student determines the award year selected on the form. If the Origination status is A, this message will appear: *Pell Origination Has Changed. Change the Origination Status to Ready to Send?* • If you respond with Yes, CampusNexus Student sets the Origination status to **R**. Otherwise, no change is made. After you export originations,CampusNexus Student sets the origination status to **B** - Batched to Send. When a Pell Grant origination status is Batched, you are not allowed to modify any origination information. After the Pell Grant origination records are sent to COD, if changes are made to the student's

Field	Description
	data records that affect the Pell origination, CampusNexus Student captures the changes and prepare records to be exported to COD. The Pell Grant record is considered to be originated if the Origination status is **A**, **B**, or **E**. If the Pell record has already been originated (COD) and you change the Weeks Enrolled in AY on the Academic Year form, you are prompted to change the origination status to **R**. **Note**: If the Origination Status is set to 'Accepted' and changes are made to the Add'l Eligibility Indicator (AEI), CampusNexus Student prompts you to set the status to **'Ready to Send'**.
Origination Amount	Saving will only overwrite the origination amount when you change it. If the origination is accepted, changing the origination amount will prompt you to set the status to Ready. This allows two scheduled Pell Grants for the same award year and will be accurately reflected on the related origination record.

Field	Description
Additional Eligibility Indicator (AEI)	**Award Years 2009-2010, 2010-2011, 2017-2018 and beyond**: You can select or clear the Add'l Eligibility Indicator (AEI) check box to indicate if a student is eligible to receive a Year-Round Pell Grant. • When AEI is selected for award years 2017-2018 and beyond, a student is eligible to receive up to 150% of the Full-Time Maximum Pell Grant. • When AEI is selected for award years 2009-2010 and 2010-2011, a student is eligible to receive up to 200% of the Full-Time Maximum Pell Grant. Enabling this option automatically updates the Origination Amount when changes are made to the award Amount if the Origination Status is not in a 'Batched' or 'Accepted' status. **Note:** Only students with an Enrollment Status of at least half-time may qualify. The check box is not visible when Enrollment Status is 'Less than 1/2 Time' or 'Other'. You can clear the AEI check box if the student's Pell Grant award does not exceed 100% of the established Pell award limit (taking into account scheduled, posted, and canceled disbursements, as well as refunds). If the award exceeds 100%, a message indicates that the check box cannot be cleared because the student already has an excess award amount (see sample message below - dollar amount will vary in the message). *Additional eligibility indicator cannot be unchecked. Student already has been, or is being, awarded more than $...* After receiving this message, to clear the AEI check box, you need to create refunds or cancel scheduled disbursements to reduce the award amount to less than or equal to 100% eligibility. **AEI Validation**: • If you try to clear the AEI check box, CampusNexus Student validates if the award is more than 100% of the student's Pell eligibility. • Calculation: Amount disbursed + Amount of Scheduled disbursement - Amount Refunded. • If you try to select the AEI check box, CampusNexus Student validates the Enrollment Status to ensure it is not less than '1/2 Time'. • If the award amount is greater than 150%/200% (based on specific award year) of the student's Pell eligibility and AEI is selected, or if the award amount is greater than 100% of the student's Pell eligibility and AEI is not selected, the award amount is reset to the student's original Pell eligibility amount. **Note**: If a campus has the Servicer Link field configured to 'Global' (Setup > Campus Locations > Add/Edit > Financial Aid), the Pell validations are relaxed and the AEI check box is not displayed on the Pell Grant form. **Award Years 2011-2012 through 2016-2017**: Due to the discontinuation of the "two Pell Grants in one award year" provision instituted in 2011 (Department of Defense and Full-Year Continuing Appropriations Act, 2011), COD does not accept an Additional Eligibility Indicator field value of "True" (or "selected") on Pell origination records for the award years 2011-2012 through 2016-2017.

Field	Description
	Accordingly, CampusNexus Student no longer supports Year-Round Pell (200% Pell award) for Award Years 2011-2012 through 2016-2017, and COD Export files for Pell awards no longer include the <AdditionalEligibilityIndicator> tag.
Use Sec. EFC Code	Secondary Expected Family Contribution. Valid values are: • **Blank** • **O** - Award previously based on secondary EFC • **S** - Award based on Secondary EFC
Incarcerated Code	Select Yes or No. The default is blank (No).
Admin. Relief	If an institution has been granted Administrative Relief, selecting this check box ensures that records for the award year are included in the COD Export process. **Note:** This check box only appears when Financial Aid Automation is enabled.
Academic Calendar	Select the Academic Calendar that applies to this grant. The default is the option set up for your campus. • Non-standard terms • Standard terms of quarters • Standard terms of semesters • Standard terms of trimesters • Clock Hours • Credit Hours without terms
Payment Methodology	Select the Payment Methodology that applies to this grant. The default is the option set up for your campus. • Formula 1 = Credit Hour - Standard terms in which the fall through spring terms are equal to or greater than 30 weeks, or the academic year exceeds the definition of an academic year and the institution has a waiver. • Formula 2 = Credit Hour - Standard terms in which the fall through spring terms are less than 30 weeks without a waiver. • Formula 3 = Credit Hour with Standard or Non-Standard terms. • Formula 4 = Clock Hour or Credit Hour without terms. When the program or the remaining portion of it is less than the full academic year, it is determined by calculating the weeks in the payment period divided by the weeks in the academic year and calculating credits/hours in the payment period divided by the credits/hours in the academic year and using the lesser of the two calculations. Since the number of weeks in the payment periods is created as a whole number and front loaded when the academic year has an odd number of weeks, the academic year weeks total is divided in half to allow for decimals and an even split of weeks is assigned to the weeks calculation for each payment period to meet Formula 4 expectations. • Formula 5 = Nonresident portion of a program offered by correspondence without terms. (Distance Ed.)

Scheduled Disbursements Tab

The Scheduled Disbursements tab lists the Pell Grant disbursements for the selected award year. The disbursements are calculated based on the data entered in the top half of the form. If the status of the Pell Grant is Estimated, CampusNexus Student does not automatically calculate a disbursement schedule. You can initiate the disbursement schedule by clicking **Calculate** or by adding a new scheduled disbursement to the list. The listed disbursements are updated as approvals, are processed, and payments are made.

Scheduled disbursements are created when the status on the New Aid form is selected as Approved or Pending, or when the Add or Calculate buttons are clicked on the Pell Grant form. The Scheduled Disbursement list is not created when new aid is added with a status of Estimated. Individual disbursements with a status of Paid or Cancelled cannot be edited.

When FA disbursements are posted as received on the student's ledger card from the Student Accounts Payments form or from the Post FA Disbursements form, CampusNexus Student updates the Student Academic Year ID column in the FA Disbursements table.

When a student is dropped, financial aid is canceled. If the student is reinstated, financial aid must be re-expected. Scheduled disbursements are not automatically changed back to Scheduled. Review scheduled disbursements for each fund source to re-expect the disbursements that still apply.

Field Descriptions - Scheduled Disbursements

Field	Description
Disbursements from other enrollments	This section lists additional disbursements (from other enrollments) that have the same Pell ID and do not have a status of 'Canceled'. When a student has multiple enrollments, if the Financial Aid is not moved to the new current enrollment, CampusNexus Student allows you to enter multiple Pell awards when the enrollment is transferred up to the eligible amount. You cannot add more than the eligible Pell amount for the award year onto the second enrollment. The top grid displays the current disbursements. The bottom grid displays the disbursements from previous enrollments. The Disb # numbering scheme picks up where the previous disbursements left off.
Total	The total amount of all the listed disbursements.
Disb Num	The maximum number of allowed disbursements based upon the financial aid type.
Disb Date	The date the disbursement was sent to COD.
Term	The term to which the disbursement is related.
Campus	The campus where the student is enrolled for the selected program version.
Amount	The amount that the student is eligible to receive.
Status	The status of the grant disbursement. The statuses include Scheduled, Ready to Pay, Paid, and Canceled.
Disb #	The Disb # numbering scheme picks up where the previous disbursements left off.
Exp Date	The date on which the grant disbursement is due to be paid.

Field	Description
Acad Year	The academic year number to which the disbursement applies. You can edit the academic year for each disbursement if the disbursement passes the criteria required for editing. If you edit this field, a drop-down list is displayed. Each row in the drop-down list shows the academic year number, start date, and end date. When new scheduled disbursements are added for the Pell Grant, CampusNexus Student by default sets the academic year for each disbursement to the academic year being packaged.
Term	Type the term code or select it from the list. This is the term to which the disbursement is related. When you click in the field on the grid, a drop-down button becomes available. Click the button to see a list of terms from which you can select. The Term code can be edited only for disbursements that have a status of Scheduled (**S**).
Enr Stat/Hours	If the ProgramVersion.ClockCredit value is CCredit Hours, the column heading is Enr Stat. The value of this column is displayed from and stored to FaSched.EnrollmentStatus. This is a required field for Credit Hour institutions. The program stores zero to ClockHours and does not display the ClockHours column. The Enr Stat column is a combo box from which you can select the following: • F = Full Time (default) • Q = Three Quarter Time • H = Half Time • L = Less Than Half Time • O = Other If the ProgramVersion.ClockCredit value is HClock Hours, the column heading is Hours. The value of this column is displayed from and stored to FaSched.ClockHours. This is a required field for Clock Hour institutions. The program stores F to Enrollment Status and does not display the enrollment status column. Total Clock Hours for all disbursements must add up to the Clock hours for the Academic Year (FaStudentAY). When you click **Recalc Pell Eligibility**, CampusNexus Student uses the new FaPell.CalculateFullPellGrant method to find the full Pell amount for the students EFC and COA; then, it calculates each disbursement based on Eligibility for the selected Enrollment Status / # of Disb. If Disbursement Enrollment Status = O, the amount is always $0. For Clock Hour programs CampusNexus Student uses the method FaPell.ProRatePell to get the Pell Amount, then splits the Pell Amount out into the disbursements using the ClockHours for each disbursement to determine the amount.

Field	Description
Exp Amount	This is the Expected Amount of the disbursement. It is calculated by dividing the total amount of the grant by the number of payment periods in the academic year. When disbursement amounts cannot be divided evenly, the first payment is the highest, for example: • A $2,000 award is disbursed as 667, 667 and 666. • A $1,000 award is disbursed as $334, 333 and 333. The AUTO-PACKAGE routine uses the same calculation method.
Status	The status of the Grant disbursement. The statuses include Scheduled, Ready to Pay, Paid, and Canceled.
Act Disb Date	The Automated COD Export Process enables you to configure if the COD Export Process should exclude Holidays and/or Weekends when determining the Actual Disbursement Date (calculation) that is reported to COD for the day disbursements are to be paid. **When Automated Processes is activated,** you can view the calculated date in the Act Disb Date column on the Financial Aid Pell Grant screen. If neither option is selected, NA appears in this column.
Pmt Per #	Payment Period Number. This column is only applicable if the student's campus is required to do Special Disbursement reporting. If Special Disbursement reporting is required, this column can be edited. If not, there will be no values in this column and it will not be edited. The valid values for this column are from 1 up to the number of payment periods in the academic year.

- Click **Add** to add a new disbursement to the schedule. Select the date and term, then click Calculate to get the new distribution of the total grant amount.
- Click **Delete** to remove a disbursement record from the list permanently. Consider using the Cancel button to keep a record of the action on file.
- Click **Cancel** to cancel a disbursement. The disbursement continues to be displayed on the grid but is marked as Cancelled. It is not available to pay to the student.

  When you select a different row, the button label is updated. If the selected disbursement was canceled, the button label is **Re-Expect**. Otherwise, it is **Cancel**.
- Click **Recalc Pell Eligibility** to re-evaluate the Pell Grant based on the standard Pell table values for the student's academic year and enrollment status. **Do not use this feature (button) if you are manually calculating and entering the Origination Amount and Scheduled Disbursement Expected Amounts.**

Pell Grant Eligibility Recalculation by Clock Hours

Navigate to **View > Financial Aid > Packaging > Edit Academic Year > Package**(button) > Pell Fund Source > **Recalc Pell Eligibility** (button).

Institutions that use generic Crystal Reports by Award Year using the Award Letter option can pro-rate Pell disbursements for clock hour programs. The calculation is performed as follows:

1. Select the Pell award based on the students Estimated Family Contribution (EFC) for a full-time student.
2. Multiply this amount by the product of (Weeks enrolled in AY / Weeks in programs definition of AY) to get the students maximum possible Pell award.
3. Pro-rate each disbursement as follows:

- Max Pell Award X (# Disbursement Hours / # AY Hours) = Disbursement Amount
- Maximum Pell award determined in step (2) above (X) multiplied by the product of (Number of Hours for the Disbursement / Number of hours in the programs definition of an AY) = the amount for this disbursement.

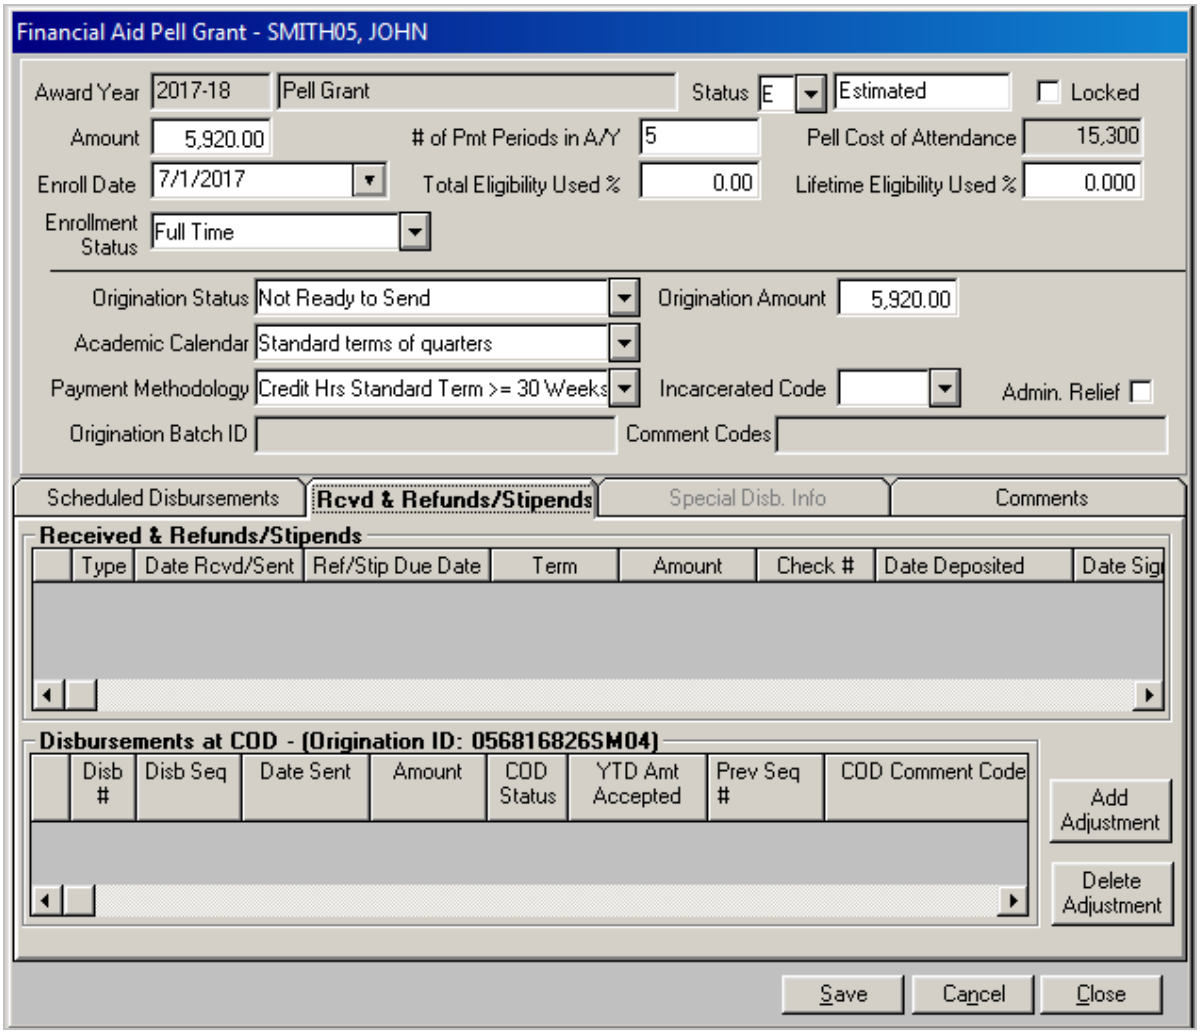
4. The sum of all scheduled disbursements equals the Amount Packaged.

   CampusNexus Student validates the number of hours associated with the disbursements . The validation is based on the total according to the hours expected to complete in the students academic year definition.

Rcvd & Refunds/Stipends Tab

The Rcvd & Refunds/Stipends tab lists the receipts of Pell Grant disbursements from COD for the student. It also lists any Pell refund transactions that have been processed for this student and any stipends paid to the student from Pell Grant funds. The grid displays information from transactions that have been processed in the Student Accounts department. No changes to this grid can be made on this form. The table following the illustration of the form describes the fields and buttons.

The bottom portion of the Received & Refunds/Stipends section displays traffic related to this student between your institution and the COD. Stipends are not part of the school/COD traffic. The records under **Received & Refunds/Stipends** should agree with the records under **Disbursements at COD**. If they do not agree, you can add an adjustment transaction to balance the two sets of records. Any adjustment record you add is picked up by CampusNexus Student and written to a file for transmission to COD. Exporting and importing of records related to Pell Grants is handled under Daily operations. Those procedures are described in other Help system topics.

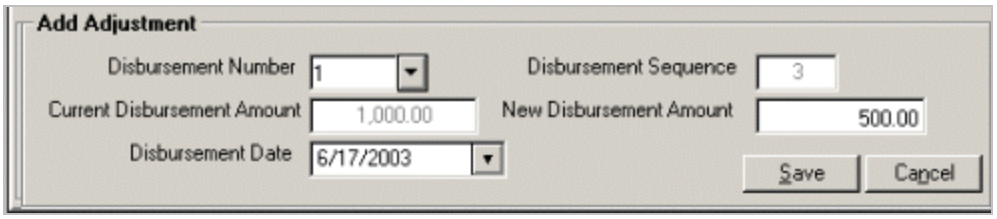


Field Descriptions - Rcvd & Refunds/Stipends

Field	Description
Received/Refunds List	
Type	Type of entry on the list. • **D** - Disbursement Received • **R** - Refund • **S** - Stipend
Date Rcvd/Sent	Date that the disbursement was received, the refund was sent, or the stipend was paid.
Ref/Stip Due Date	Date that the refund is due to be sent to COD for the date the stipend is scheduled to be paid to the student.
Term	Term to which the transaction is related.
Amount	Amount of the transaction.
Check #	Check number or EFT number of the transaction.
Date Deposited	Date that a receipt was deposited in the bank.
Date Signed	Date on which the student signed for the disbursement received.
Batch ID	ID of the batch in which the transaction was processed.
Status	Status of the transaction: Approved, Paid, Sent, etc.
Disbursements at COD	
Disb #	Disbursement number for this row.
Disb Sequence	Order in which disbursements are to be made.
Ref #	Number of the disbursement.
Date Sent	Date on which the transaction was sent to COD.
Amount	Amount of the transaction that was sent to COD
COD Status	Status of the transaction at COD. Statuses include Corrected, Rejected, Verification, Batched.
YTD Amt Accepted	Total year-to-date Pell amount accepted by COD.
Export Batch ID	Number of the batch in which the transaction was exported to COD.
Previous Seq #	Record number for the previous transaction associated with the disbursement, as provided by COD.
COD Comment Codes	List of all COD edit (comment) codes associated with the Export Batch.

- Click **Add Adjustment** to create a transaction adjusting a disbursement. The transaction will be picked up and sent to COD using export procedures under the Daily menu.
- Click **Delete Adjustment** to remove an adjustment transaction from the table before it is sent to COD.

The Add Adjustment form is used to enter adjustment data.



The Disb. Reference Number is the number of the disbursement to which the adjustment applies. The Total Accepted Disb. Amount field shows the disbursement amount accepted by COD. Enter the **Adjustment Date**and **Adjustment Amount**and click **Save**. Once saved, procedures under the Daily menu are used to export the adjustment to COD.

CampusNexus Student permits disbursement adjustments only if the origination status is **A** - accepted, **B** - batched, or **C** - corrected (Accepted) and the disbursement has been released to COD.

Special Disb. Info Tab

The Special Disb. Info tab is disabled if the award year for the Pell is 2001-02 or later. It is shown for earlier award years.

If your institution is required to report on special disbursements, it will be noted on this form by a 'Yes' next to the "Enter Special Disb Info?" question.

You can edit all fields on this form.

Comments Tab

Click **Comments** to view or add comments. The Comments field holds 1000 characters.

Packaging for Work Study and FWS Payments

You can package a student for work study and post Federal Work Study (FWS) payments to a student's financial aid record. Alternatively, you can use the batch method to post one or more work study payments.

A work study award behaves differently from other packaged FA in that work study disbursements are never posted to the student's ledger card. The disbursements (payments) are made directly to the student. Disbursements are never "scheduled" for work study. The student is paid as work is performed.

You can also use the Daily > Financial Aid > Post Work Study Disbursements menu option to post groups of work study disbursements by campus, fund source, and period ending date.

A report under Reports > Financial Aid > FA Batch Posting Work Study lists all work study payments made and offers criteria to filter on the date of disbursement.

Integrated Accounting

Integration with CampusNexus Finance, HR & Payroll

If CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll, users can view work study awards in CampusNexus Finance, HR & Payroll. The following properties are displayed in the Award sections of a Student or Employee record and in the HR/Payroll record:

- FWS Award Year (including Start and End Date of Award Year)
- Fund Source
- Gross Award Amount
- Amount Disbursed
- Award Balance
- Status

Work study award management and packaging is done only in CampusNexus Student. Hence the records are read-only in CampusNexus Finance, HR & Payroll. When work study awards are packaged in CampusNexus Student, the information is propagated to CampusNexus Finance, HR & Payroll.

Note: When an award is reassigned, the new Academic Year Start Date and End Date are updated against every transaction in CampusNexus Finance, HR & Payroll. Since this is non-financial data, the updates will occur even for posted transactions.

To activate the Work Study Integration option for CampusNexus Finance, HR & Payroll, select the Work Study Integration option on the General tab of the Financial Aid - Settings form.

When the payroll has been processed for a student in CampusNexus Finance, HR & Payroll, the following information is sent to CampusNexus Student:

- Date on which the employee was paid
- Payment Period End Date
- Hours worked by the employee
- Check #
- Gross Amount Paid

If a payment that was already sent to CampusNexus Student is voided, CampusNexus Finance, HR & Payroll sends an update to CampusNexus Student so that the Check# fields in CampusNexus Student indicate the void status. Voiding a check will update the check number as Null. A payment line is inserted in CampusNexus Student when earnings are generated in CampusNexus Finance, HR & Payroll. This is done without check number. Once the Payment is posted in CampusNexus Finance, HR & Payroll, the check number is updated against the payment record in SIS. If a new check is cut to replace the lost check, the new check information is sent to CampusNexus Student.

- On the Packaging (Awards) form (View > Financial Aid >Awards), the Amount Received field is continually updated as payments are made to the student in CampusNexus Finance, HR & Payroll. The Amount Received field is also updated if a check is voided in CampusNexus Finance, HR & Payroll. CampusNexus Student does not allow modifications to the payments that have been received from CampusNexus Finance, HR & Payroll. The

Academic Year is populated based on the Academic Year to which the current award is associated. A visual indicator is provided to indicate that a given FWS Award has been imported into the HR module of CampusNexus Finance, HR & Payroll.

- On the Work Study Payments form (View > Financial Aid >Awards, select a work study award) the payment field reflects the information received from CampusNexus Finance, HR & Payroll. The payment information cannot be modified in CampusNexus Student. The Add Payment and Delete Payment buttons are disabled.
- The batch post option for work study disbursements (Daily > Financial Aid > Post Work Study Disbursements) is disabled when CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll.

Amount Disbursed (Past) Field in CampusNexus Finance, HR & Payroll

When Federal Work Study (FWS) awards were awarded prior to CampusNexus Finance, HR & Payroll going live, the opening balances of FWS awards may not correctly reflect awards that were previously paid out. In these cases, an administrator can specify the Amount Disbursed (Past) amount on the Award form in CampusNexus Finance, HR & Payroll. The previously disbursed award will be subtracted: Gross Amount - Amount Disbursed - Amount Disbursed (Past). The Amount Disbursed (Past) field will be imported during the data import. The Amount Disbursed (Past) field is read-only for non-administrator users.

Integration with CampusVue Finance, HR & Payroll

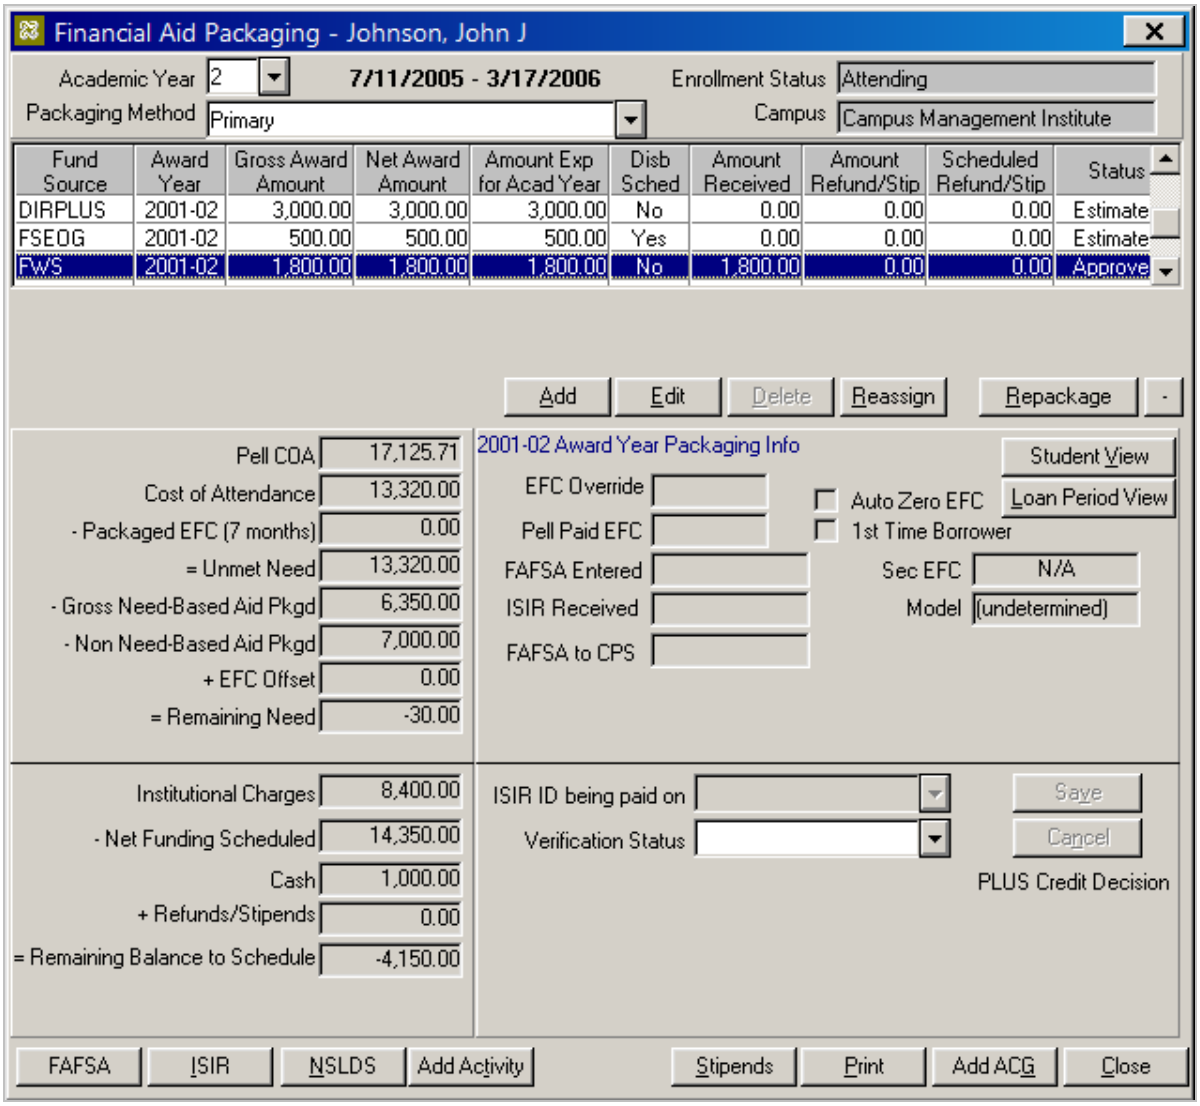
If CampusNexus Student is integrated with CampusVue Finance, HR & Payroll, refer to CampusVue Finance, HR & Payroll Work Study Integration for additional information.

To package a student for work study aid or record a work study payment:

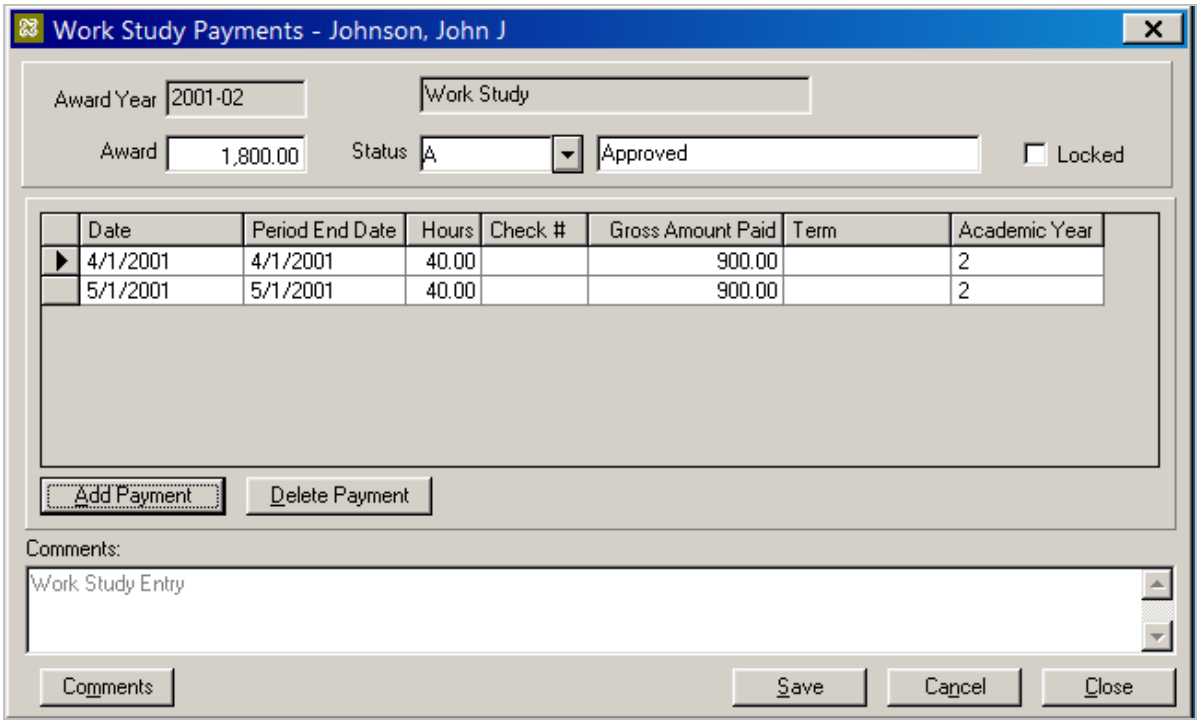
1. Select a student.
2. Navigate to **View** > **Financial Aid** > **Packaging.** The Financial Aid Packaging form is displayed.
3. Select the appropriate **Enrollment** and **Academic Year**, then click **Edit.** The student's Financial Aid Academic Year form is displayed.
4. Click **Package**. The Financial Aid Packaging form is displayed.
5. Select a **Packaging Method**.
6. Click **Add** to add a new source to the FA package. The New Source of Aid form is displayed.
    a. Select the Fund **Source** for work study. The fund source drop-down list displays all fund sources where the Fund Source Type is "WORKST".
    b. Select the **Academic Year**, **Award Year**, and **Status**.
    c. Enter the **Gross Amount** of the work study aid.
    d. Click **Continue**. The Work Study Payments form is displayed.

    - OR -

a. Select a **FWS fund source** in the grid on the Packaging (Awards) form.



b. Click **Edit**. The Work Study Payments form is displayed.



7. If necessary, change the **Amount** and **Status** of the work study award.

   - A - Approved
   - C - Cancelled
     Note: You can cancel Federal Work Study awards if Federal Work Study funds have not been disbursed; however, if FWS has been paid, the "Cancelled" status will not be listed among the available award statuses.
   - E - Estimated
   - P - Pending

   Note: CampusNexus Student does not allow modifications to the payments that have been received from CampusNexus Finance, HR & Payroll.

8. Click **Add Payment** to add a new payment record.

   Note: The button is disabled if Work Study Integration is selected on the General tab of the Financial Aid - Settings form.

9. Accept or enter the **Date** and **Period End Date**.

10. Enter the **Hours**, **Check Number**, and **Gross Amount Paid**.

11. Select the **Term** and **Academic Year**. You can enter the term code or select it from the drop-down list.

12. Click **Comments** to add or edit comments about this work study record. The cursor is placed in the Comments window. The comments field holds 1000 characters of information.

13. Click **Save**. Be sure to save each payment entry before starting the next one.

    Note: If you attempt to add a disbursement that exceeds the total amount of the award, a message is displayed and you cannot saved the transaction.

14. Click **Delete Payment** to remove it from the list.

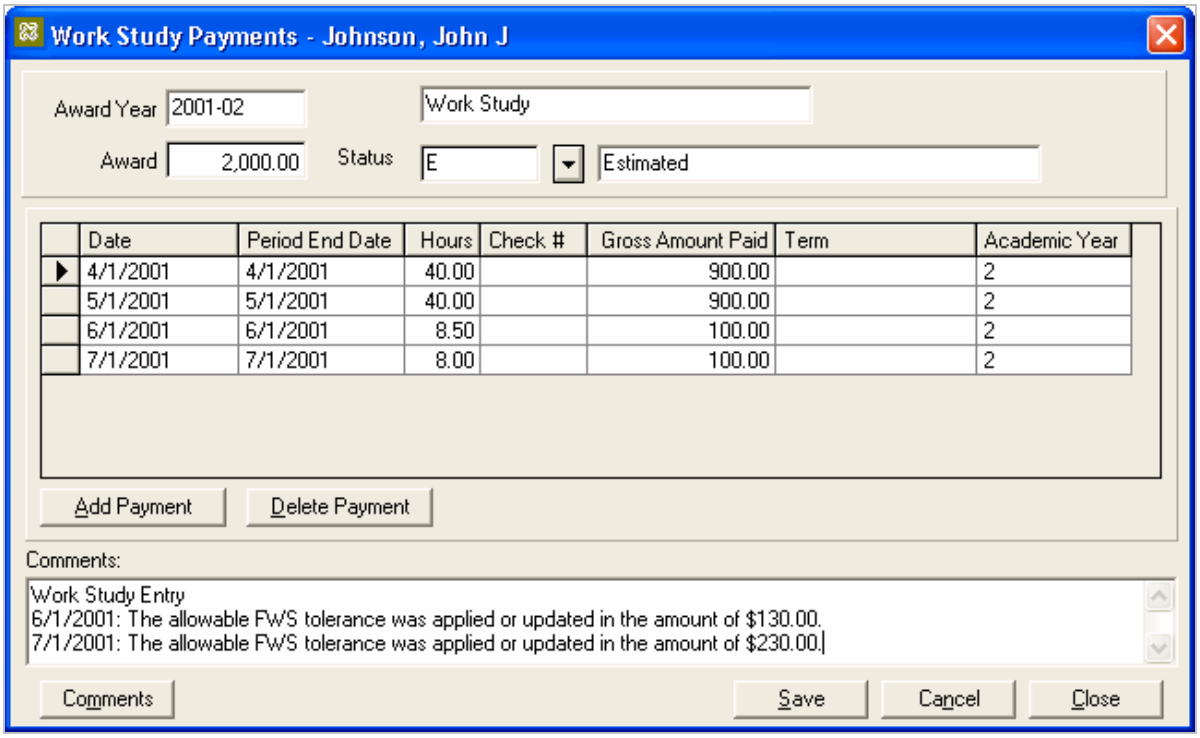
Note: The button is disabled if Work Study Integration is selected on the General tab of the Financial Aid - Settings form.

15. Click **Close** to close the form.

To record a work study payment that exceeds the Cost of Attendance:

There may be instances where additional FWS payments are needed when a student worked more hours than anticipated. When Limit Awards to COA is selected (see Setup > Campus Locations > Campus > Financial Aid tab), you are can record FWS payments that exceed the COA. The total of these additional payments is limited to $300.00.

1. Adjust the **Award** amount to accommodate the additional payments.
2. Select **Add Payment** and enter the payment information.
3. Click **Save**. The notation of the additional payment is automatically included in the **Comments** box.



4. If the added payment would cause the total amount of payments to exceed the $300.00 tolerance limit, CampusNexus Student displays a warning message. The amount must be adjusted to fall within the limit.

Scholarship Processing

This is an outline of the procedure to set up a scholarship for a student. Some preliminary conditions must be in place. As with virtually all student financial aid, a FAFSA must be prepared for the academic year in which the scholarship is to be set up. After the FAFSA is on file, you can continue with the process described below.

To set up a scholarship:

1. Set up the Fund Source.

   Navigate to **Lists > Financial Aid >** Fund Source. Select the Fund Source Type "Scholarship".

2. Set up the Academic Year.

   Navigate to **Lists > Financial Aid >>** Programs.

   - Choose program and program version. Values for academic calendar, credits, and weeks are populated by CampusNexus Student.
   - Click **Add**.
   - Select a **Default Budget**
   - Click **New**.
   - Select **Other Grant**.
   - Select the Number of **Disbursements**.
   - Click **Save**.

3. Select the Student Master of the student to whom you wish to give the scholarship.

   Select **View > Financial Aid >** Packaging.

   - Select the **Enrollment**.
   - Click **Add**.
   - Select the **Academic Year**. (If the Academic Year is not displayed, a FAFSA must be added for the student).
   - Click **Package**.
   - Click **Add**.
   - In the new Source of Aid form, select the **Type of Aid**.
   - Select the Fund **Source**.
   - Enter the **Gross Amount**.
   - Choose a **Status**: A = Approved; E = Estimated; P = Pending.
   - In the Scheduled section, click **Add**.
   - Select or enter the **Exp Date** date in this format: MM/DD/YYYY.
   - Specify the **Exp Amount**. Specify one lump sum distribution or add several smaller amounts that add up to the gross amount.
   - Click **Save** and **Close**.
   - Close all windows.

4. Approve disbursements.

   Navigate to **Daily > Financial Aid > Approve Disbursements to Pay**.

   - Choose **Select a Batch In Progress**.
   - Select the **Award Year**, **Fund Source**, and **Disbursement Dates**.
   - Click **Continue**.
   - Select the **Approve** check boxes next to the amounts.
   - Click **Post Batch**.

5. Post disbursements.

Navigate to **Daily > Student Accounts >** Post FA Disbursements.

- Enter Check #, EFT (if applicable), and term.

6. Verify posting.

   To verify that the amount has been posted, go to the ledger card of the student.

Direct Loan Form

When you package financial aid for a student, you may find it necessary to package a direct loan. CampusNexus Student captures the necessary information for initializing a direct loan and maintaining a history of the loan. Direct Subsidized loans (DIRSUB), Direct Unsubsidized loans (DIRUNSUB), and Direct PLUS loans (DIRPLUS) are recorded. See also Other Loan form and COD grants form for originations and disbursements for other types of loans.

Note: Estimated awards may differ from actual awards on the values in the Net Amount, Bank Fees, and Rebate Amounts fields. For estimated awards, the values for Net Amount, Bank Fees, and Rebate Amounts are calculated from the Gross Amount of the award. The actual award will have disbursements, with the values for Net Amount, Bank Fees, and Rebate Amount calculated from the Gross Amount of the "disbursements" and summed up for the total. Therefore, there may be a variation between the values displayed for the estimated award and the actual award, once the student is enrolled.

The Direct Loan form displays some basic information in the top portion and has tabbed pages for scheduled disbursements, receipts, and refunds, borrower/student information, and promissory note information.

For additional information, see Disbursement Adjustments, Origination Changes, Print Disclosure Statement, Validations for Direct Loans.

Note:

When an Award Status is set to Canceled, the disbursements associated with the award are also set to Canceled. Under these conditions the following applies:

- The disbursements may not be added or re-expected. If the **Add Disbursement** button is clicked, the following message is displayed: *Cannot add disbursement to a canceled Award*. In addition, if the **Re-Expect** button is clicked, the following message is displayed: *Cannot Re-Expect a disbursement while the Award is in 'Canceled' status. Select a new Award Status and try again*.
- You may not Calculate or Recalculate canceled disbursements. If the **Calculate** or **Recalculate** buttons are clicked, an error message is displayed stating: *Cannot Calculate disbursements while Award is in 'Canceled' status. Select a new Award Status and try again*.

Note:

The student's ISIR must be on file at your institution before a direct loan can be originated. See ISIR Requirements below. If a student does not have an ISIR on file and has an undetermined dependency status/model, you need to assign the student with a Dependent status/model when packaging a FFEL or Direct parent PLUS loan.

- If you do not assign the student the Dependent status, CampusNexus Student relies on the existing validations and you cannot package the parent Plus loan. Additionally, the student's dependency/ model remains as undetermined.
- If you assign the student the Dependent status, CampusNexus Student updates the student's record and the new dependency status/model is visible on the student record, allowing you to proceed as normal and package the parent PLUS or DIRPLUS award.

The number of disbursements and percentage disbursed in each disbursement are set up within the Academic Years form.

The *Department of Education* must be set up as a Lender before Direct Loans can be set up for students.

Loan Origination Fees and *Interest rates* for direct loans (subsidized, unsubsidized, and PLUS loans) are set up.

To work with the Direct Loan form:

1. Access the Packaging form. The Financial Aid Packaging list is displayed containing a list of enrollments and their associated academic year.
2. Select an **Enrollment**.
3. Click **Add** to add a new academic year.

4. To view or modify the academic year, double-click the Academic Year for which the loan is required, and click **Edit**.

   The Financial Aid Academic years form is displayed. In this form, values in the Start Date, End Date, or Dependency Status fields are displayed in red, which indicates that there is a pending origination change for a loan associated with the academic year being displayed.

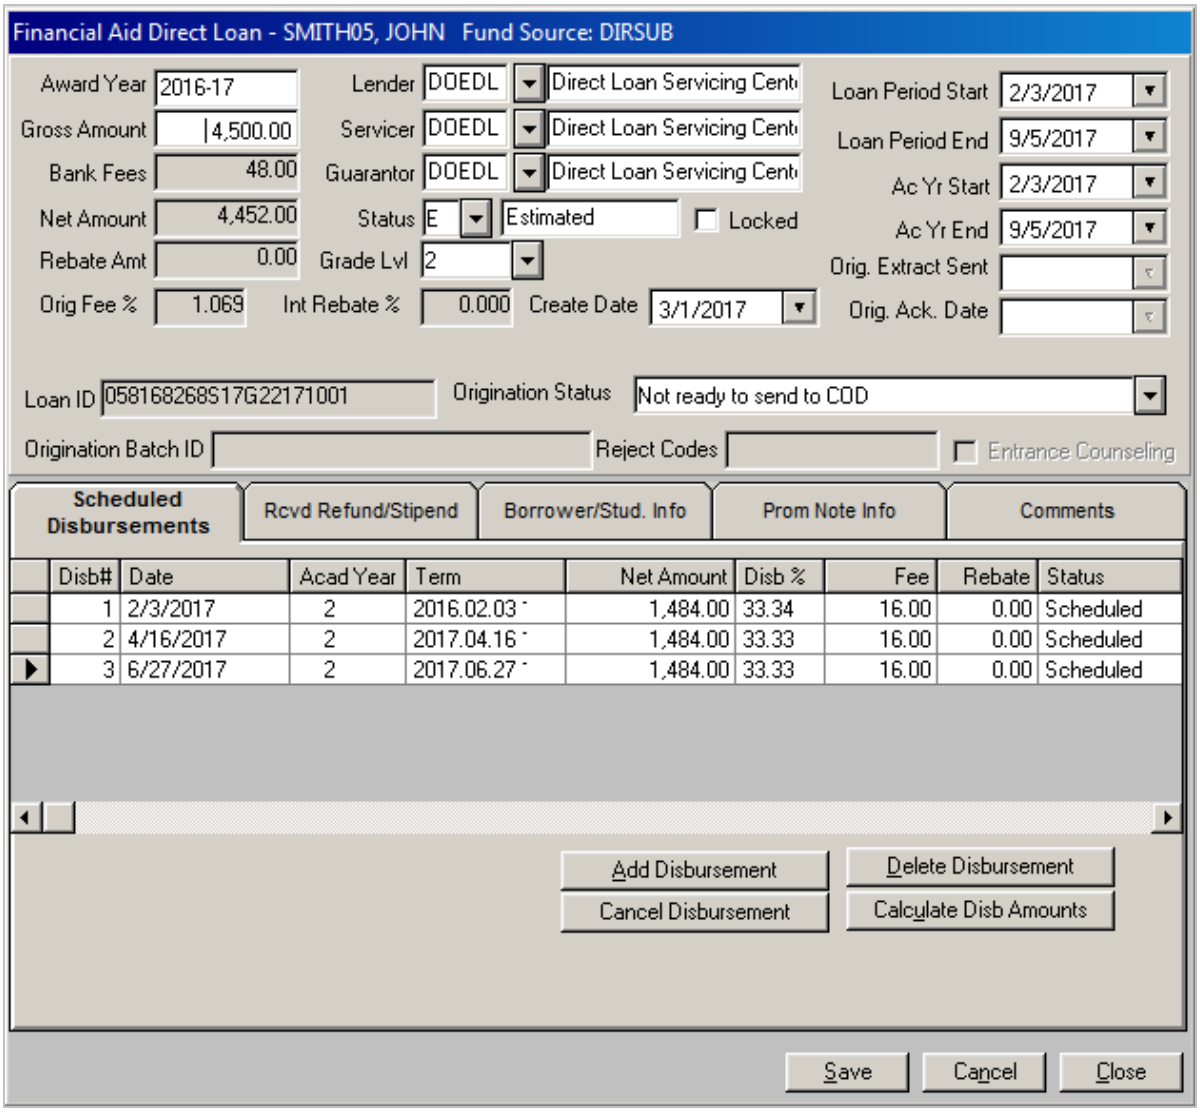
5. Click **Package**. The Standard Student's Package RBS grid or the Alternate Student's Package RBS grid is displayed. Any existing fund sources including direct loans are listed in the upper left portion of the form.

   Note: When the student is enrolled in a Standard Term program version and term association is configured, the **Terms to Include in Direct Loan Packaging** option is displayed on the awards form. Click to display the dynamic list of terms within the Academic Year. The selected terms are used to build the loan period dates and for auto packaging or batch packaging. Based on the terms selected, the corresponding disbursement amount is calculated.

   Example: For a trimester program, if only the Fall and Winter terms are selected, the student will get packaged a third of the student's award eligibility for each disbursement (if it is not the last academic year for the student).

6. To add a new direct loan, click **Add**. Follow the New Source of Aid instructions for Direct Loans.

7. To modify an existing direct loan, select it from the list and click **Edit**. The Financial Aid Direct Loan form is displayed. The Award Year field is read-only.



8. Enter the **Gross Amount** of the loan. The Bank Fees are calculated based on the rates that were configured for the bank and are displayed in a read-only mode. This is the calculated Net Amount of the loan.

    - If a loan is added, the Rebate Amt is calculated by using the following formula:

      Rebate Amt = Gross Loan Amount * ((Orig Fee % - Interest Rebate %)/100.00)

    - If a loan is edited, the Rebate Amt field displays the data stored in the FaStudentAid.InterestRebateAmt field in the database.

      When the disbursements are calculated or edited, this field is calculated and re-displayed. The field is calculated by summing the interest rebate amount calculated for each disbursement.

      CampusNexus Student fills the Loan ID field.

      For *Direct Loans*, the *Lender, Servicer, and Guarantor* is the Department of Education.

      The default values are configured in the Fund Source Code Setup form.

9. Select one of the following **Award Status** options:

- E = Estimated
- A = Approved
- P = Pending Approval
- C = Canceled

10. Select the Grade Level of the student within the award year of the loan. The Grade Level Codes for Direct Loans are as follows:

Description	Code
1st year undergraduate/never attended coll	0
1st year undergraduate/attended college be	1
2nd year undergraduate/sophomore	2
3rd year undergraduate/junior	3
4th year undergraduate/senior	4
5th year/other undergraduate	5
1st year Graduate/professional	6
Continuing graduate/professional and beyor	7

The business rules for this field are as follows:

If adding a loan or (editing a loan and a row does not exist in FaLoan table, or FaLoan.StudentYearInCollege field is blank), the value of the Grade Level field defaults to what is specified in FaStudentAY table. (It only defaults if the grade level corresponds to a valid code listed in the Direct Loan Technical Reference.) For example, if the Grade Level is 0 thru 7, the Grade Level field on the Packaging form is defaulted to this value, otherwise it is left blank.

Note: This field cannot be edited if the origination status is A, B, or X.

11. Select a **Loan Period Sequence** if available.

- If a Loan Period Sequence is selected or populated, the start and end dates of the loan period become the values displayed in the Loan Period Start and Loan Period End fields. The Loan Period Start and Loan Period End become disabled, restricting you from manually changing the value unless you manually change the value of the Loan Period selected. Otherwise, the fields operate as they usually do by allowing you to edit the values in the fields.
- The loan period is not audited since the existing Loan Period Start and End dates are not audited.
- If the Loan Period Sequence is available and the loan periods are populated, the Loan Period Payment column is displayed in the disbursement grid below. The value in the disbursement grid indicates the loan payment periods found for the selected loan period sequence.
- If no loan periods are populated, the Loan Pay. Per. column is not visible. The column is also disabled for academic calendars 2, 3, and 4. In other words, if the academic calendar is not 5 or 6, the Loan Period Seq. field and the Loan Payment Period column in the disbursement grid are hidden.
- If the academic calendar is 5 or 6 and no value is selected in the Loan Period Seq. drop-down list, the Loan Pay. Per. column in the disbursement grid is hidden. If the academic calendar is 5 or 6 and a value is selected in the Loan Period Seq. drop-down list, the Loan Pay. Per. column in the disbursement grid is displayed.
- The Loan Payment Period column stores the value of the loan payment period ID and displays the sequence of the loan payment period in the grid. When the record is initially loaded it must display the value that is stored on the loan payment period ID. Otherwise, you must select the loan payment period sequence.
- When the Loan Payment Period sequence changes, the date on the scheduled disbursement to the Start Date of the Loan Payment Period Sequence is automatically updated. The academic year defaults to the

appropriate academic year based on the start date of the loan payment period. If you change the date of the disbursement, CampusNexus Student automatically updates the loan payment period to the correct sequence number based on which loan payment period the disbursement date falls into.

Note: The Scheduled Disbursement date can be changed to a date outside both the Loan Period and Academic Year dates for non-term Academic Calendars.

- When the Loan Payment Period expands, the Loan Period, Loan Payment Period Sequence #, Start Date, End Date, Credit/Hours, and Weeks fields are displayed. The Loan Payment Period on the disbursement should be within the loan period that is selected on the loan itself. Any data falling outside of the loan period dates is cleared and you must update the data. The new data is validated against the loan period dates to make sure they fall within or equal to the Date, Academic Year, and Loan Payment Period. If they do not support the new loan period dates, the fields are cleared and you are notified as to what information was cleared out, as indicated by a disbursement number and field name. Click **Cancel** to revert all changes to their initial setting.
- Loan Period Seq. and Loan Payment Periods are populated automatically when a direct loan is added in 'Approved' status and there's only one loan period is found in the Academic Year. If multiple loan periods are found within the academic year, CampusNexus Student prompts you to select the appropriate loan period sequence to associate with the loan.

12. CampusNexus Student allows you to disassociate a loan from a Loan Period Sequence if there is no Paid or Ready to Pay disbursement. Disassociating a loan from a Loan Period Sequence means the loan period dates and disbursement dates won't be affected when loan periods and loan payment periods are updated by the SPE. These loans will be evaluated by the SPE based on the academic years and grant payment periods that are associated with these loans instead.

    Similarly, CampusNexus Student allows you to associate a loan with a loan period sequence if there no Paid or Ready to Pay disbursements. You can also change a Loan Period Seq. on the loan if there is no Paid or Ready to Pay disbursements or the loan's Origination Status is 'Approved'.

13. A direct loan that is not associated with any Loan Period Sequence is not saved if the loan period start or end date is outside of the Academic Year's date range. This is applicable to Academic Calendar 5 and 6. A message is displayed informing you that the Loan start and end dates must be within: AY Start date - AY End Date.

    If the Loan Period Seq. is not available, enter the starting date for the loan period in the **Loan Period Start** field. The default date is the start of the academic year. The loan period beginning and ending dates must be within the academic year start and end dates.

14. Enter the ending date for the loan period in the **Loan Period End** field. The default date is the end of the academic year. The loan period beginning and ending dates must be within the academic year start and end dates.

15. Enter the **Start date** for the Academic Year in the AcYr Start field. The default date is the start of the academic year, for a student with an Academic Calendar of 1, 2, 3, 4, or 5 and 6 that do not use Loan Periods. The default date for students that are in Academic Calendars 5 and 6 that do use Loan Periods, is the BBAY Start Date from the Loan Period form. The AcYr Start and End dates do not have to be within the loan period start and end dates.

16. Enter the **End date** for the Academic Year in the AcYr End field. The default date is the end of the academic year, for a student with an Academic Calendar of 1, 2, 3, 4, or 5 and 6 that do not use Loan Periods. The default date for student that are in Academic Calendars 5 and 6 that do use Loan Periods, is the BBAY End Date from the Loan Period form. The AcYr Start and End dates do not have to be within the loan period start and end dates.

17. You can modify the *Ac Yr Start* and *End Dates* for Direct Loans in an Accepted or Batch status by changing the dates through the **Origination Change** button on the Direct Loan form, or by changing the BBAY Start and End

Dates on the Loan Period form if your Direct Loan is associated with a Loan Period.

Changes to the *Ac Yr Start*, *End Dates*, *Loan Period Start*, and *End Dates* are displayed in red until the origination change record has been exported. Once the change record has been exported, the caption on these fields remains red until the response file has been imported.

Note: For Academic Calendar years 5 and 6 that use Loan Periods, the *Ac Yr Start* and *End Dates* are enabled during the origination change process only if the student is in a Permanent Out school status.

18. CampusNexus Student populates the Orig Extract Sent field with the date that the origination record was sent to COD.
19. CampusNexus Student populates the Orig. Ack. Date field with the date the origination acknowledgment was received from COD.
20. The Create Date on the Financial Aid Direct Loan form remains enabled until the origination Status changes to A (Accepted) or B (Batched), at which point the Create Date will become disabled. Additionally, the export process validates the origination against the values in the FaCOD table. If the value violates the validation, an *Invalid Financial Award Create Date* message is displayed.
21. CampusNexus Student initially sets the Origination Status to N to indicate that it is not ready to send to COD.

    - The conditions under which the Origination Status may be set to Ready to Send depends on the institution's policies. CampusNexus Student has a default setting that prevents the Origination Status from being set to Ready to Send unless an ISIR has been received and the COD Grant Status is 'Approved'. With this setting the Origination Status cannot be changed to 'Ready to Send' until the ISIR Received Date has been populated by CampusNexus Student (when an ISIR is received).

      If your institution has enabled the Originate/Certify Estimated Awards option, you can set the Origination Status to 'Ready to Send' when the Award Status is E (Estimated), P (Pending Approval), or A (Approved).

      When the ISIR is on file and approval has been granted, you can change the status to R to indicate that it is ready to send to COD.

      When the origination is batched to send to the COD, CampusNexus Student changes the status to B for batched to send to COD. After this, the change procedures must be employed to make changes to the Loan Origination.

      Origination Status Codes are as follows:

      - N - Not ready to send to COD
      - R - Ready to send to COD
      - B - Batched to send to COD
      - A - Accepted by COD
      - E - Rejected by COD
      - X - Pending credit decision

      If the Origination Status is blank, N, R, or E, the field can be edited, otherwise the field is read-only. When the field is editable, the valid choices are as follows:

      Origination Status Changes

If current origination status is...	... it can be changed to
Blank	N or R

If current origination status is...	... it can be changed to
N	R
R	N
E	N or R

- The Interest Rebate % (percentage) field is read-only if it was configured. Refer to Calculation of Net Disbursement Amounts and Interest Rebate Amounts below.

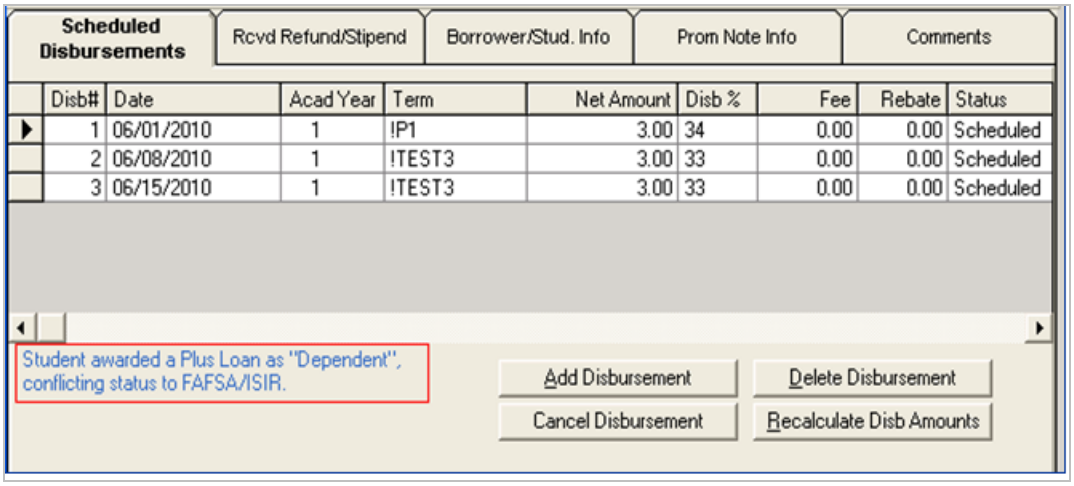
  The Origination Fee % (percentage) is displayed from the Direct Loan Setup form for your campus.

  Note: The Orig Fee% field displays up to three decimal places to accommodate the origination fee percentages for Direct Sub and Direct Unsub loans.

  - If a loan is being added, or a row *does not* exist in FaLoan table for the loan being packaged, the Interest Rebate % is set to `SyDirectLoan.InterestRebate##` where `##` is the last two digits of the award year.
  - If a loan is being edited and a row does exist in the FaLoan table, the contents of FaLoan.InterestRebatePct is displayed in this field.
  - If a loan is added and saved, CampusNexus Student updates FaLoan.InterestRebatePct with the contents of this field.
  - The editable Loan Amount field is displayed for PLUS loans only.

22. Click **Add Disbursement** to add a new disbursement to the list.
23. Click **Delete Disbursement** to remove a disbursement from the list.
24. Click **Cancel Disbursement** to stop a disbursement without removing it from the list.
25. Click **Recalculate Disb Amounts** to calculate the amounts of the disbursements based on the gross, bank fees, net amount and number of disbursements.
26. Click **Save** to save your changes.
27. If you are setting up a new loan, CampusNexus Student prompts you to confirm if the loan is Ready to Originate (send to the COD). The student's ISIR must be on file at the institution before a direct loan can be originated.

    Note: If a student does not have an ISIR on file and has an undetermined dependency status/model, you must assign the student with a Dependent status/model when packaging a FFEL or Direct parent PLUS loan. If a dependency status conflict occurs, the following message is displayed:



CampusNexus Student prompts you to confirm if you want to Print the Prom Note.

28. After saving the loan data and processing the other options, CampusNexus Student closes the direct loan form.

    Note: If, during the process of saving the direct loan, you exceed the institution's commitment level for direct loans in the FA General Ledger records, CampusNexus Student displays a message indicating the amount by which the commitment has been exceeded. This is a warning that something must be presented to adjust your commitment level in the FA G/L system. Click **OK** to acknowledge the message.

29. *Optional*: Click the **Comments** tab to view existing comments, edit, or add comments.

ISIR Requirements

The Department of Education requires that a student must have an ISIR on file for origination of all Direct Loans, except a PLUS Loan. This exception only applies if the student does not have any other Title IV Aid on file for the same award year as the Plus Loan. If there are other Title IV Funds on file for that award year, an ISIR is required. This will impact COD Participants as follows:

- When saving a Full or Phase-In Participant Direct PLUS Loan with an origination status of Not Ready to Send to COD, CampusNexus Student no longer displays the message *ISIR must be on file before loan can be originated* if the student has no other Title IV Aid on file for the award year.
- For Full Participants, CampusNexus Student no longer checks for an ISIR when displaying Direct PLUS loans on the export list if the student has no other Title IV Aid on file for the award year.
- When exporting Full Participant Direct PLUS Loan for a student who has no ISIR and no other Title IV Aid on file for the award year, CampusNexus Student creates the student identifier tag from the student SSN, date of birth, and last name.
- For Phase-In Participants, CampusNexus Student skips the check for dependency status when determining whether a Direct PLUS Loan shall be included in the export file if the student has no other Title IV Aid on file for the award year.

Validations for Direct Loans

A valid Direct Loan school code must be on file before a loan can be added.

If a Direct PLUS loan is added, CampusNexus Student verifies that the student's model status is 'Dependent'. This information is in the FaStudentPell table. CampusNexus Student finds the record for the award year being packaged. If the student's model is Independent or Undetermined, CampusNexus Student does not proceed with setting up the PLUS loan. You must assign the student with a Dependent status/model when packaging a FFEL or Direct parent PLUS loan. Then, CampusNexus Student updates the student's record and the new dependency status/model will be visible on the student record, allowing the packaging to proceed as normal.

The number of disbursements for a direct loan must be equal or greater than two and less than or equal to 20.

Once a loan origination record has been sent to the Common Origination and Disbursement (COD), any subsequent changes made to any field included in the loan origination record will be captured by CampusNexus Student and subsequently sent to the COD.

The business rule that controls Financial Aid loan disbursements prevents the canceling of paid disbursements. The proper procedure after disbursements have been paid is to refund the payments.

Calculation of Net Disbursement Amounts and Interest Rebate Amounts

The Interest Rebate % field is used to calculate net disbursement amounts and the interest rebate amount for each disbursement. In prior years, the net disbursement amount was calculated using the calculated gross disbursement amount and the loan fee percentage. The interest rebate percentage is now a third element that must be taken into account when calculating the net disbursement amount. Examples of how the net disbursement amounts and the interest rebate amount are documented in the *Direct Loan Technical Reference*.

Direct Loan Disbursements

You can add, cancel, or delete a disbursement from the Scheduled Disbursements tab on the Direct Loan form for direct loan fund source types (DIRSUB, DIRUNSUB, and DIRPLUS).

Scheduled disbursements are created when:

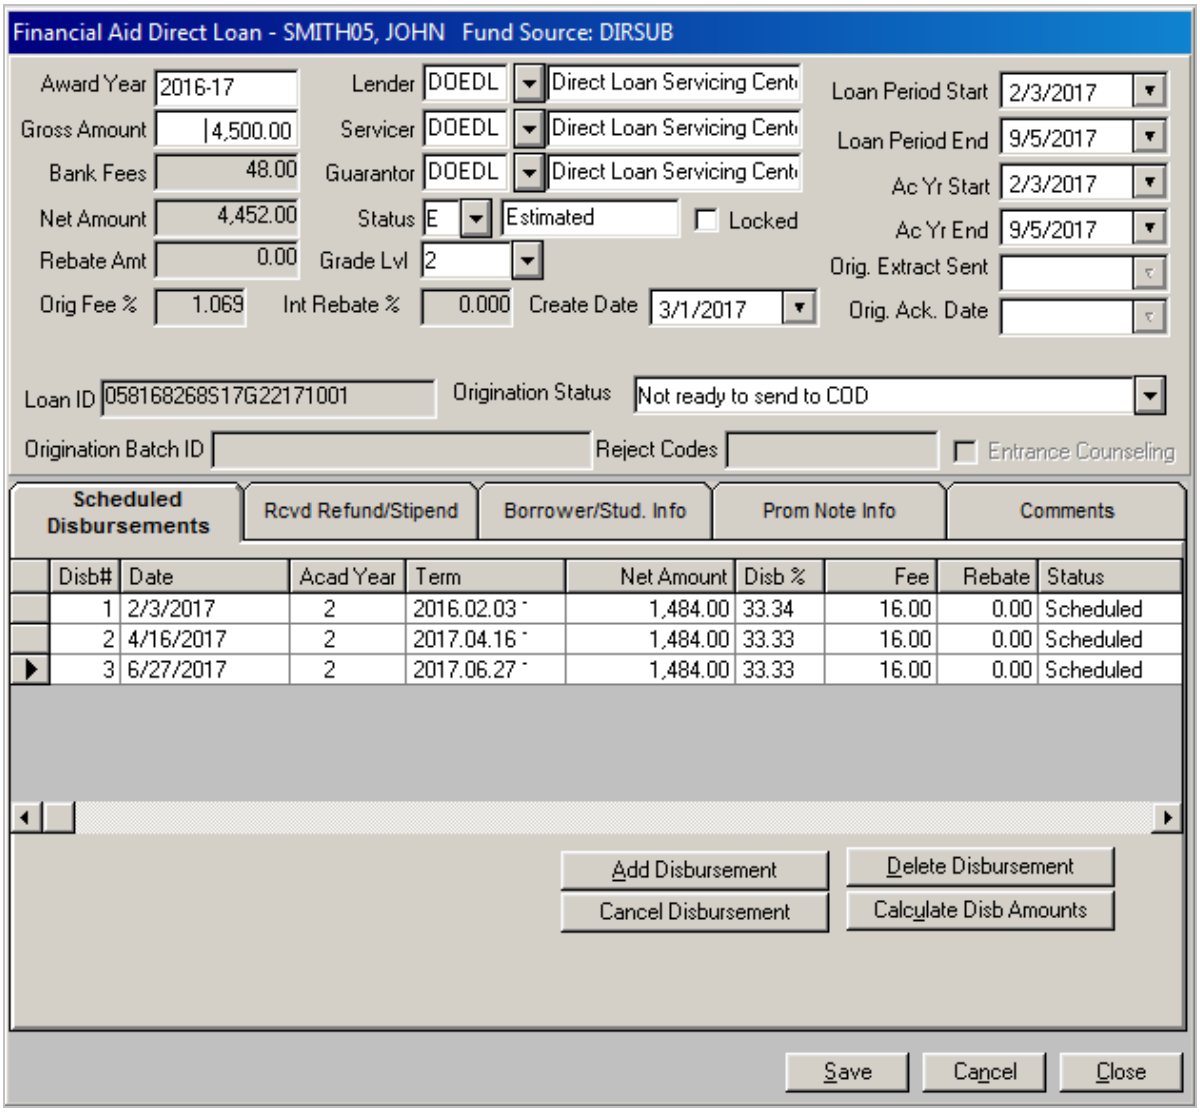
a. You add a new loan and select an award status of Approved or Pending Approval;

b. You click the Add Disbursement or Calculate Disbursement buttons on the Direct Loan form.

The Scheduled Disbursement list within the Scheduled Disbursements tab is not created when a new Direct loan is added with a status of Estimated. Individual disbursements with a status of Paid or Canceled cannot be edited.

To work with Direct Loan Disbursements:

1. Access the Direct Loan form. The Scheduled Disbursements tab is displayed.



2. Complete the fields on this form as needed. See Field Descriptions.

Note:

When FA disbursements are posted as received on the student's ledger card from the Student Accounts Payments form or from the Post FA Disbursements form, CampusNexus Student updates the Student Academic Year ID column in the FA Disbursements table.

When a student is dropped, financial aid is canceled. If the student is reinstated, financial aid must be "re-expected". Scheduled disbursements are not automatically changed back to scheduled. Review scheduled disbursements for each fund source to "re-expect" the disbursements that still apply.

Field Descriptions

Field	Description
Disb #	Sequential number of the scheduled disbursement. The minimum number of disbursements is 2; the maximum is 20.
Date	Select the expected date of the disbursement. **Note**: The Scheduled Disbursement date can be changed to a date outside both the Loan Period and Academic Year dates for non-term Academic Calendars.
Acad Year	Academic year number to which the disbursement applies. You can edit the "Acad Year" for each disbursement if the disbursement passes the criteria required for editing the field. If the academic year can be edited and you edit this field, a drop-down list is displayed showing each academic year for this student's enrollment. Each record displayed in the list shows the academic year number, academic year start date, and academic year end date. When new scheduled disbursements are added for the FA Direct Loan, CampusNexus Student defaults the academic year for each disbursement to the academic year being packaged.
Term	Enter the term code or select it from the drop-down list. To select the term to which the disbursement applies, click in the term cell to be selected and click . The Term code can be edited only for disbursements that have a status of Scheduled (S).
Net Amount	Read-only. Net amount as calculated based on this disbursement's percentage of the total net amount.

Field	Description
Disb %	Percentage of the total loan gross amount to be distributed to this disbursement. The defaults come from the Academic Year setup. You can edit the disbursement percentage for each disbursement. The percentages must add up to 100%. If you click **Recalculate Disb Amounts**, you are prompted to specify the percentage for each existing disbursement. If no disbursements currently exist, you are prompted to enter a disbursement percentage for the number of disbursements specified for a loan for this student's packaging method. If you click **Add Disbursement** or **Delete Disbursement**, the percentages are edited. CampusNexus Student displays a grid in which you can enter the percentages. • If you click **Add Disbursement**, the number of disbursements displayed on the grid will be one more than the number of existing disbursements. • If you click **Delete Disbursement**, the number of disbursements displayed on the grid will be one less than the number of disbursements previously listed.
Fee	Read-only. The fee associated with each disbursement as calculated based on this disbursement's percentage of the total fee amount.
Rebate	The Rebate column is displayed only if the award year for the loan is 2001-02 or beyond. The rebate for each disbursement is calculated using the formulas documented in the Direct Loan technical reference on Pages 3-56 to 3-63. If the user edits a loan, the values for the Rebate column are retrieved from FaSched.InterestRebateAmt. When a loan is added or the disbursements are edited, the program updates the Rebate amounts for each disbursement to FaSched.InterestRebateAmt.
Status	Scheduled, Paid, or Cancelled.
Disbursement Tracking Status Codes	N - Not ready to send to COD R - Ready to send to COD B - Batched to send to COD A - Accepted by COD E - Rejected by COD
Act Disb Date	The Automated COD Export Process enabled users to configure if the COD Export Process should exclude Holidays and/or Weekends when determining the Actual Disbursement Date (calculation) that is reported to COD for the day disbursements are to be paid. **When Automated Processes is activated**, authorized users can view the calculated date in the Act Disb Date column on the Financial Aid Direct Loan screen. If neither option is selected, NA is displayed in this column.

3. Click **Add Disbursement** to add a new disbursement to the direct loan. After adding a new disbursement, click **Recalculate Disb Amounts**.
4. Select a disbursement and click **Delete Disbursement** to delete it. If you do, it is gone irretrievably. After deleting a disbursement, click **Recalculate Disb Amounts**.
5. Select a disbursement and click **Cancel Disbursement** to cancel it. It remains on the list but shows a status of Canceled.
6. Click **Recalculate Disb Amounts** to recalculate the distribution of the net amount over the number of

disbursements.

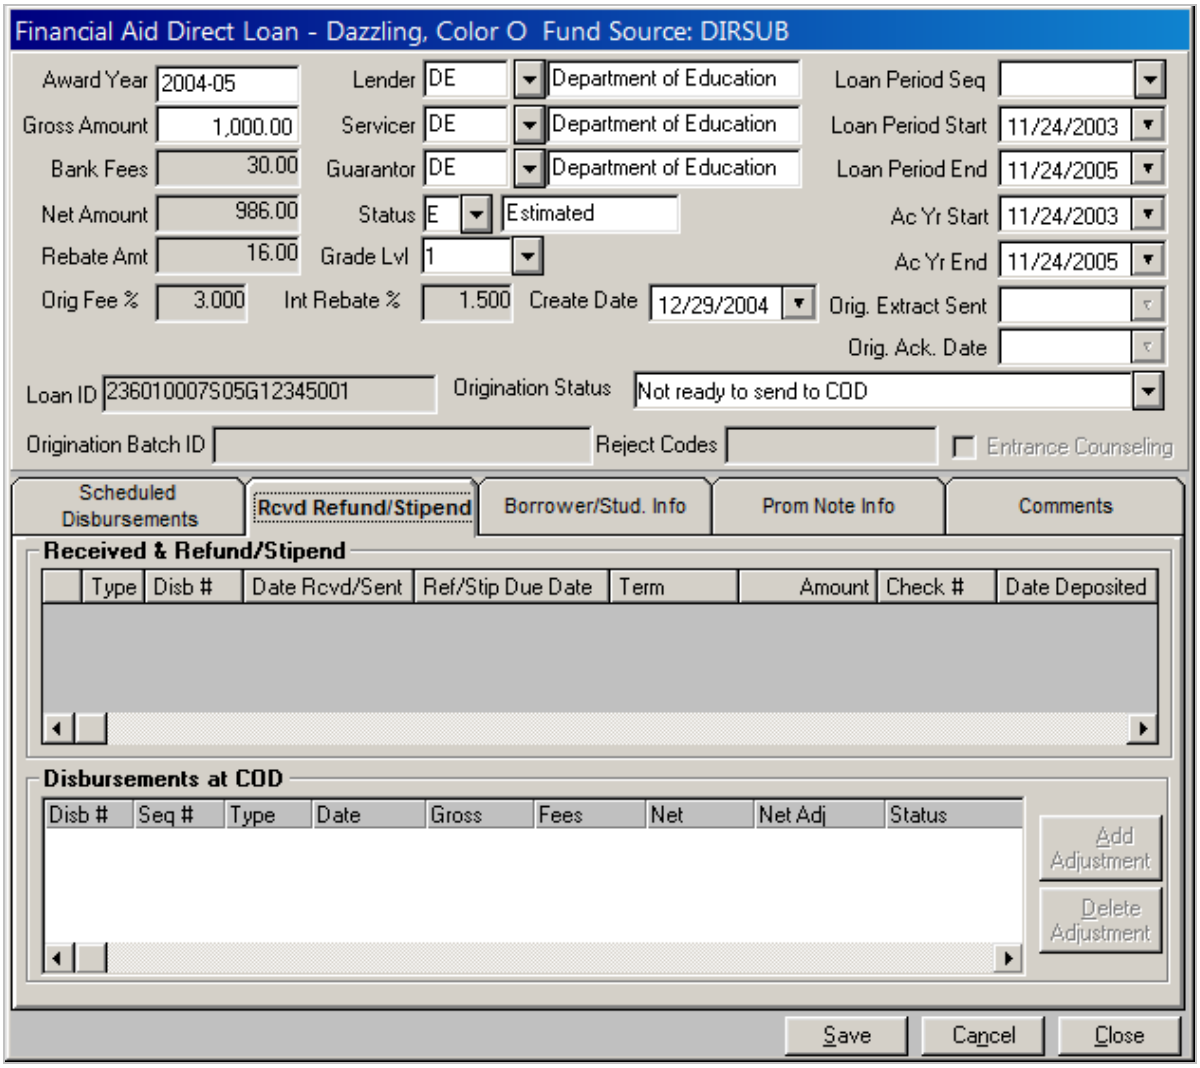
When no disbursements are scheduled, the Recalculate Disb Amounts button is not displayed. Instead, a **Calculate Disbursements** button is displayed. When this button is clicked, an expected disbursement schedule is created.

Received Refund/Stipend

You can add or delete adjustment transactions in the Disbursements at COD table to reconcile differences in loan details between CampusNexus Student and COD. The table of Disbursements at COD is a list of loan transaction traffic to and from the Loan Origination Center. Changes you make in this table result in a transaction that is sent to COD. Disbursements received transactions, refunds, and stipends are handled in the Student Accounts Department.

To work with Direct Loan Received Refunds/Stipends:

1. Access the Direct Loan form.
2. Select the **Rcvd Refund/Stipend** tab.



3. Complete the fields on this form as needed. See Field Descriptions.

Field Descriptions

Field	Description
Received Refund/Stipend	
Type	Type of transaction. The types are D - Disbursement, R - Refund, and S - Stipends.
Disb #	Disbursement number from the table on the disbursements tab.
Date Rcvd/Sent	Date disbursements were received and posted or refunds were made.
Ref/Stip Due Date	Calculated date refunds are due to be received by COD or stipends are due to be received by the student. The Student Accounts Stipend Schedule Date Scheduled is listed in this column for scheduled stipends.
Term	Term to which the transaction applies
Amount	Amount of the transaction
Check #	Number of the disbursement check from COD, the refund check to COD, or the stipend check to the student. It may be the number of an EFT transaction.
Date Deposited	Date a disbursement check was deposited in the school's bank account. It may be used as the date of the EFT deposit.
Date Signed	Date the student signed a receipt for the disbursement. It may be an endorsement on a check or an EFT receipt.
Batch ID	Identifier for the transaction batch in which the disbursement was processed by Student Accounts.
Status	For disbursements, scheduled or paid; for refunds and stipends, posted or not sent.
Disbursements at COD - This section displays all disbursement records that have been sent to or are waiting to be sent to COD. Each disbursement record has an accompanying status at COD. **Note:** Direct Loan disbursement/adjustment records for award years 2014-15 and forward display the Enrollment Status, Payment Period Start Date, and CIP code in the Disbursements at COD section of the award.	
Disb #	Disbursement number (1 - 20)
Seq #	Sequence number of the transactions related to the disbursement number, in other words, 001 is the original scheduled disbursement, 002 is the first adjustment to the disbursement, 003 is the second adjustment, etc.
Type	Type of transaction, disbursement or refund
Date	Transaction date of the disbursement or refund record
Gross	Gross amount of the disbursement
Fees	Amount of the fees related to the disbursement
Net	Net amount of the disbursement.
Net Adj	Adjustment to the net amount of the disbursement.

Field	Description
Status	Status of the disbursement or adjustment; ready to send, sent, accepted, or rejected.
Prev Seq #	Record number for the previous transaction associated with the disbursement, as provided by COD.
Net Adj	Adjustment to the net amount of the disbursement.
Status	Status of the disbursement or adjustment; ready to send, sent, accepted, or rejected.
Prev Seq #	Record number for the previous transaction associated with the disbursement, as provided by COD.
COD Comment Codes	List of all COD edit (comment) codes associated with the Disbursement import response.
Enrollment Status	Student's enrollment status at the time the record was created. (Academic Year 2014-15 and Forward)
Payment Period Start Date	Payment Period start date for the disbursements or adjustments. (Academic Year 2014-15 and Forward)
CIP Code	Program CIP Code associated with the disbursement or adjustment. (Academic Year 2014-15 and Forward)
Batch ID	Number of the batch in which the transaction was exported to or imported from COD.

4. Use the Add and Delete Adjustment buttons to enter manual adjustments to disbursement records to correct a disbursement that is on file at COD for an incorrect amount:

   - Click **Add Adjustment** to add an adjustment transaction to a disbursement.

     CampusNexus Student adds a direct loan disbursement adjustment to send to COD. The ability to add an adjustment resides on the Student Direct Loan form. The Add adjustment button is enabled only if a row exists for the loan in the FA Loan table, the origination status of the loan is Batched to Send, Accepted or Pending (B, A, or X), and at least one row exists for the loan in the FA Schedule table where the Disbursement Number is greater than zero.

   - Click **Delete Adjustment** to delete an adjustment transaction from a disbursement.

     You can delete a disbursement adjustment that is awaiting transmission to COD. The ability to delete a disbursement adjustment resides on the Student Direct Loan form. The Delete adjustment button is enabled only if a row exists in the FA Direct Loan Disbursement table for the loan being edited. If Delete Adjustment is clicked, the selected disbursement adjustment row from the grid will be deleted.

5. CampusNexus Student allows the status of a rejected disbursement record to be changed to "Ready to Send". The Status column on the Disbursements at COD grid may be edited for a row only if the Disbursement Status is "E". If this is the case, a drop-down list is provided on the Status field, listing one choice - R - Ready to Send. CampusNexus Student updates the FA Direct Loan Disbursement Status with "R" for any rows where the disbursement status was changed from E to R.

6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

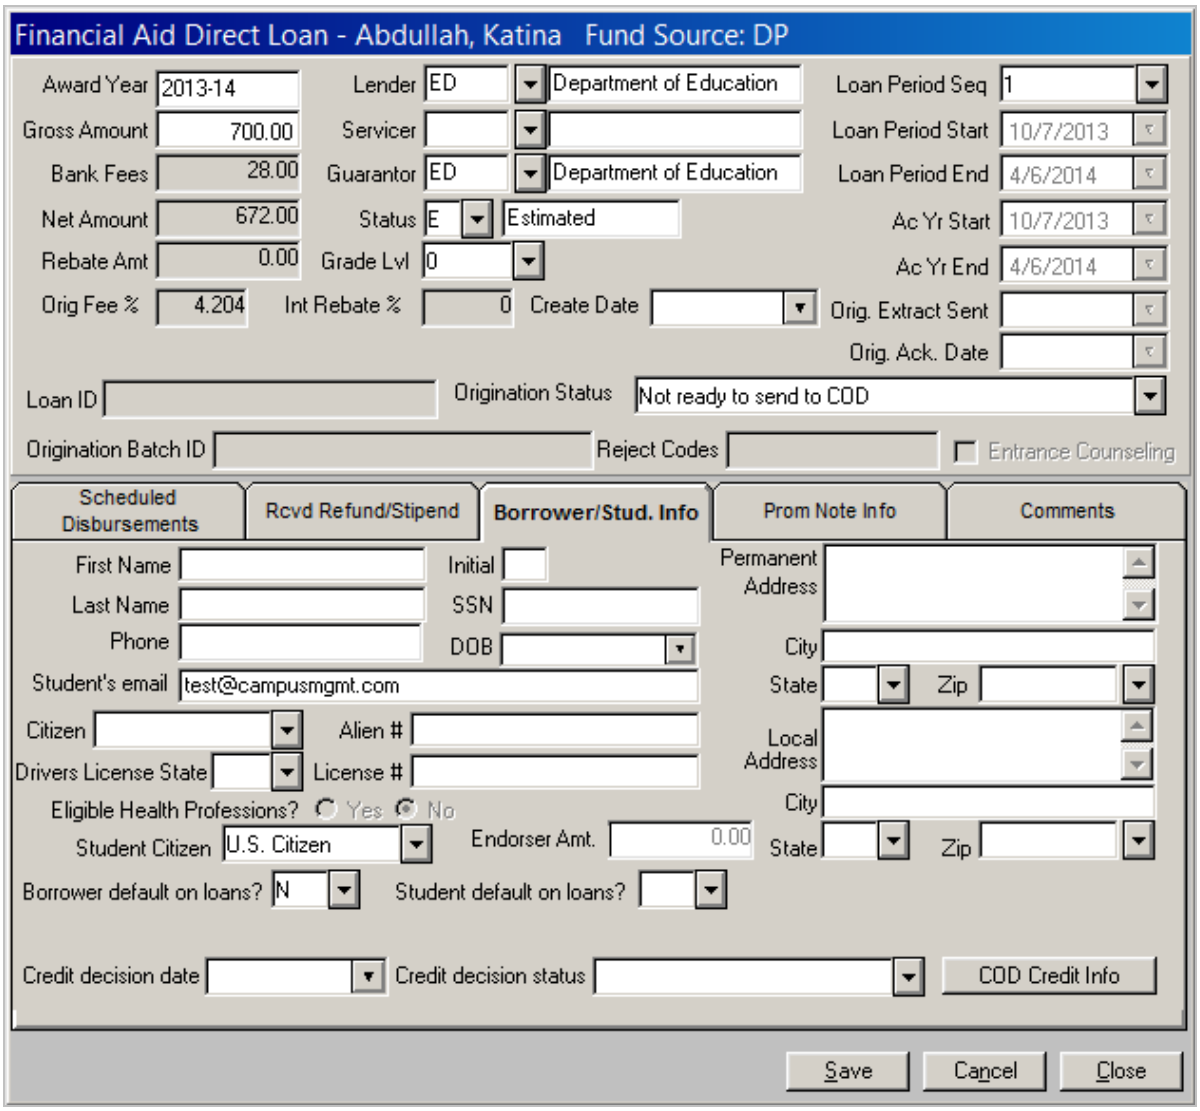
Borrower/Student Information

The Borrower/Student Info tab on the Financial Aid Direct Loan form shows basic information about the borrower. The borrower can be the student or the student's parents (PLUS loan). If the borrower is the student, data from the Student Master record is filled in. Data entered on this part of the form does not update the student's CampusNexus Student master record. It is kept in a separate loan master record.

- If the fund source type is DIRSUB or DIRUNSUB, the borrower is the student. CampusNexus Student sets all borrower information to the student's information by default.
- If the fund source type is PLUS, CampusNexus Student sets the borrower information to the parent's information (address type file - parent) by default.

To work with the Direct Loan Borrower/Student Info:

1. Access the Direct Loan form.
2. Select the **Borrower/Student Info** tab.



3. Enter the name of the borrower in the **First Name**, **Initial**, and **Last Name** fields. If the borrower is the student,

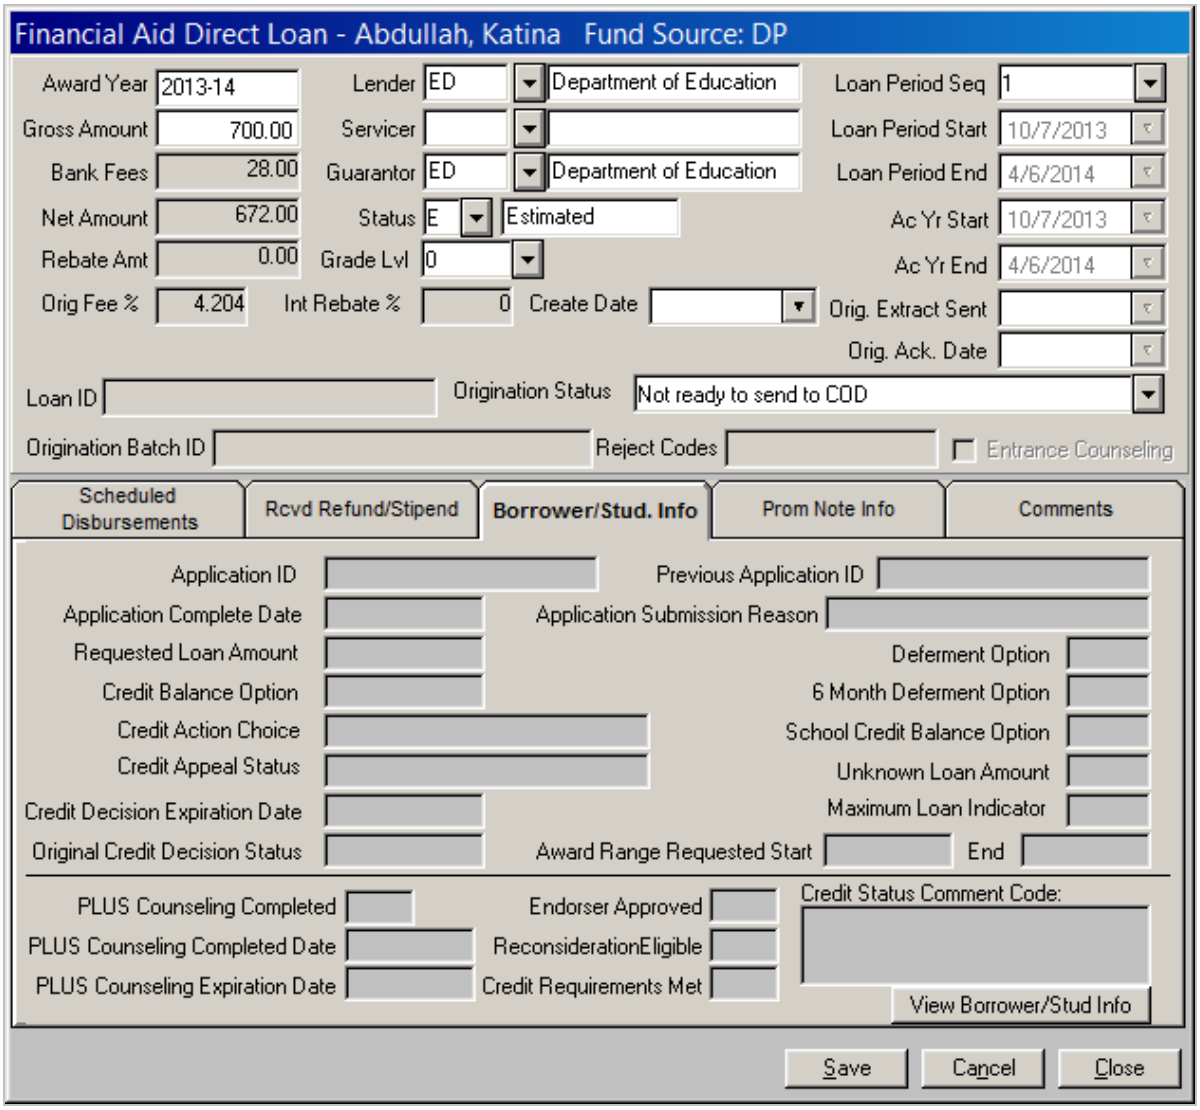
CampusNexus Student fills in the name and address information from the student master record. If the borrower is the student's parent, enter the parent's information on this form.

4. Enter the borrower's social security number in the **SSN** field.
5. Enter the borrower's telephone number in the **Phone** field.
6. Enter the borrower's date of birth in the **DOB** field.
7. The email address for the origination record is retrieved from the existing student email field and displayed in the **Student's email** field. This field is included in the borrower information that is displayed/edited when packaging a direct loan. You can enter a new value. The email field is not editable if the origination status is A, B, or X.
8. Select the borrower's **citizenship** characteristic. The options are:
   - U.S. Citizen
   - Eligible Non-Citizen
   - Ineligible Non-Citizen
9. If the borrower *is not* a U.S. Citizen, enter the borrower's alien identification number in the **Alien #** field.
10. Select the state in which the borrower's driver license was issued from the **Drivers License State** list.
11. Enter the borrower's driver license number in the **License #** field.
12. If the student is eligible for additional loan amounts due to being enrolled in health-care related studies, select **Yes** in the **Eligibility up to HEAL amount** field, otherwise select **No**.
13. The **Additional UNSUB Eligibility** field is displayed for UNSUB loans only and represents the additional amount of unsubsidized loans for which the student is eligible.
14. Select **Yes** from the **Borrower default on loans?** list if the borrower is in default on previous loans, otherwise, select No. You can also select a **Z** value for **Overridden by School** option.
15. The **Credit Decision Date** field only appears for PLUS loans and can be edited.
16. The **Credit Decision Status** field only appears for PLUS loans and can be edited. Valid values are:

    A - Credit accepted
    F - Credit Denied
    N - The credit decision has changed from Pending to Denied or Accepted
    D - Credit Denied; Endorser Denial
    E - Credit Overridden; Endorser Approved
    C - Credit Overridden; New Info Provided
    P - Pending

    Note To ensure direct PLUS loan disbursements are exported, you must ensure:

    - The MPN Link Indicator is Y.
      - AND -
    - The value selected in the Credit Decision Status field is A, E, or C.
17. The **COD Credit Info** button is displayed only in the case of Direct PLUS loans. Clicking this button displays the fields shown and described below.



Field Descriptions

Field	Description
Application ID	Unique application identifier that is returned to institutions on PLUS Application Acknowledgments.
Application Complete Date	Date PLUS Application was completed by borrower.
Requested Loan Amount	Total amount of loan requested by borrower when completing a PLUS Application.
Credit Balance Option	Credit balance on a loan should be directed to the student (S) or borrower (B). • B = Borrower • S = Student

Field	Description
Credit Action Choice	Action borrower plans once borrower has failed the credit check. • A = Appeal Decision • E = Pursue Endorser • N = Not Pursue PLUS Loan (Process Additional Unsubsidized Loan if Eligible) • U = Undecided
Credit Appeal Status	Current status of a credit appeal. • A = Appeal Accepted • D = Appeal Denied • P = Appeal Pending • R = Appeal Closed Without Final Decision
Credit Decision Expiration Date	Date on which a potential borrower's credit decision will expire, requiring another credit check prior to originating a PLUS loan.
Original Credit Decision Status	Initial credit decision for a borrower. • A = Accepted • D = Denied • P = Pending
Previous Application ID	Identifier indicating a previously submitted application.
Application Submission Reason	String (max. length 30 characters) indicating the reason for the PLUS Application submission.
Deferment Option	Repayment deferment option based on student's enrollment status.
6 Month Deferment Option	Indicates whether the borrower wants to defer repayment of their Direct PLUS Loan for 6 months beginning on the date the student on whose behalf the loan was obtained ceases to be enrolled on at least a half-time basis. • True = Six Month Deferment Option used • False = Six Month Deferment Option not used
School Credit Balance Option	Indicates whether any remaining credit balance should be applied to the institution. • True = Remaining balance should be applied to institution • False = Remaining balance should be applied to borrower
Unknown Loan Amount	Indicates whether the borrower knows the Loan Amount for the PLUS Application. • True = The borrower does not know the loan amount
Maximum Loan Indicator	Indicates whether the borrower wants to borrow the maximum loan amount determined by the institution. • True = Borrower has requested maximum loan amount as determined by the institution • False = Borrower has not requested the maximum loan amount
Award Range Requested Start and End Dates	The **start date** and **end date** for which the borrower is requesting the loan.

Field	Description
PLUS Counseling Completed	Indicates whether borrower has completed PLUS Counseling - either Yes or No.
PLUS Counseling Completed Date	Date on which a borrower's PLUS Counseling was completed.
PLUS Counseling Expiration Date	Date on which a borrower's PLUS Counseling expires.
Endorser Approved	Indicates if the borrower has been approved - either Yes or No.
Reconsideration Eligible	Indicates if borrower is eligible for loan reconsideration - either Yes or No.
Credit Requirements Met	Indicates if the borrower has met the credit requirements - either Yes or No.
Credit Status Comment Code	Displays the numerical Credit Status Comment Code for the borrower.

Review the information in these read-only fields. Click **View Borrower/Stud Info** to return to the previous screen.

18. Enter the borrower's **Permanent Address, City, State and ZIP** in the appropriate fields.
19. Enter the borrower's **Local Address, City, State and ZIP** in the appropriate fields. When the student is the borrower, the local address information defaults to the same fields to which the permanent address information is defaulted. In other words, the local address contains the same data as the permanent address.

    Note: If an address on a student record has more than 40 characters, the additional characters in the address line will not be extracted to be sent to COD, but will be truncated. If a Post Office Box number or Apartment number causes the address line to exceed 40 characters, some elements of the Street Address line must be abbreviated.
20. The **Special Program** field is used to indicate if the student is enrolled in a Special Program. The Special Program default value is pulled from the Program Version. This field will only be displayed for award year 2014-15 and thereafter. Valid values are:

    A - Selective Admission Associated Program
    B - Bachelors Degree Completion Program
    N - Not Applicable
    P - Preparatory Coursework Graduate Professional Program
    T - Non Credential Teacher Certification Program
    U - Preparatory Coursework Undergraduate Program
21. Select **Preparatory Professional Course Work** if applicable. This option allows users to designate whether the loan is for Preparatory coursework (to enroll in graduate or professional program) or Teacher Certification. If the option is selected, a new tag <PreprofessionalCourseworkIndicator> is included in the COD Common Records as defined in the COD Technical Reference. The Grade Level for the loan is 5, the maximum Subsidized Stafford loan limit $5,500, and the combined Maximum $12,500 limit for loans will be applied.

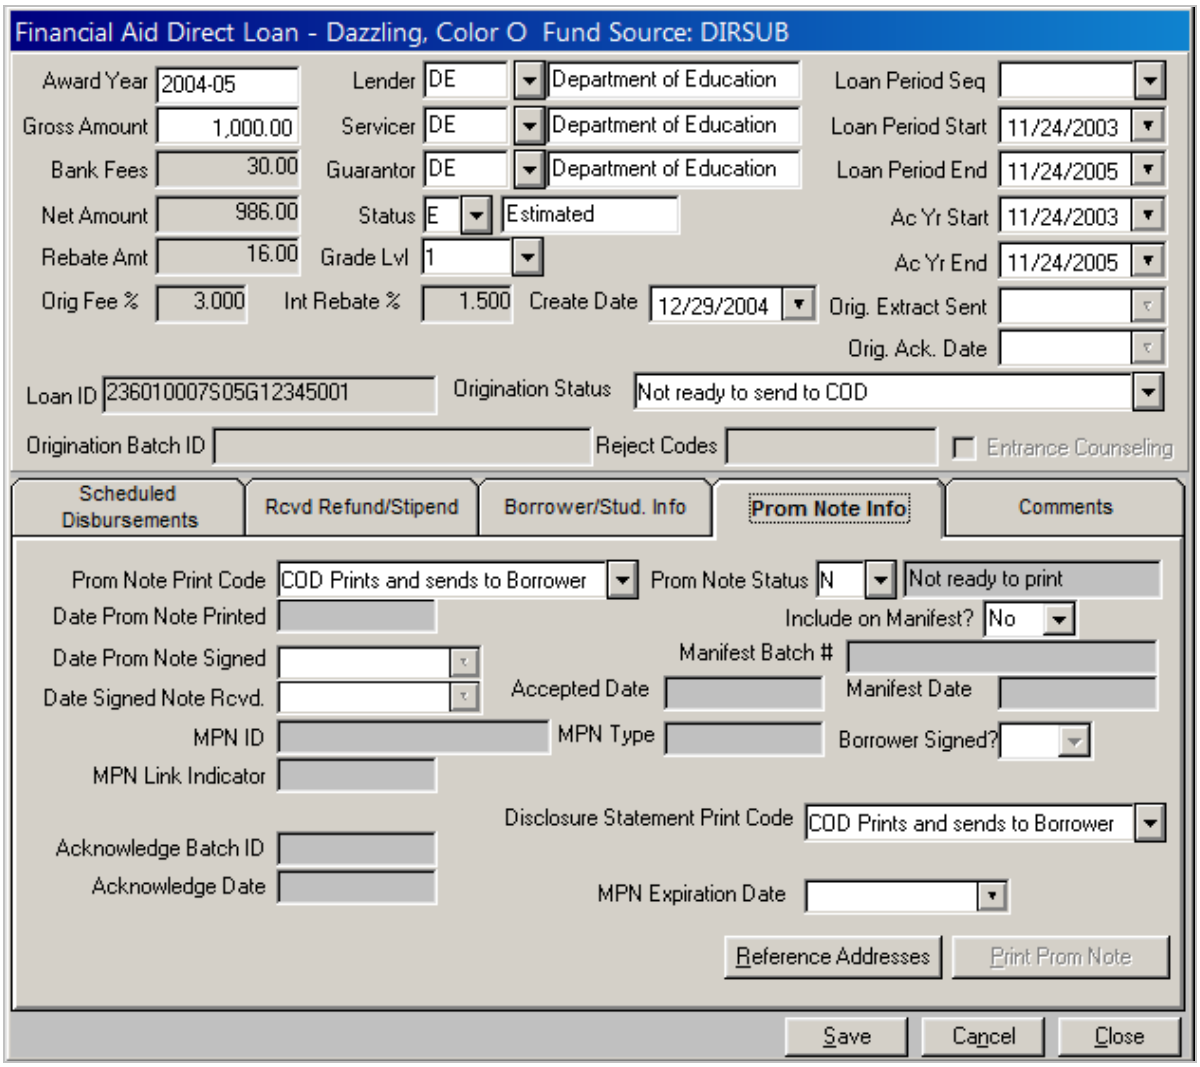
    Note: This flag is only accepted by COD when a loan is submitted that has a first disbursement date on or after July 1, 2007.

Prom Note Information

The Prom Note Information tab on the Financial Aid Direct Loan form provides information about the status of the promissory note and disclosure statement. The form for promissory note information with loans other than direct loans is considerably different than the one described here.

To work with the Direct Loan Prom Note Information:

1. Access the Direct Loan form.
2. Select the **Prom Note Info** tab.



The **Prom Note Print Code** field indicates where the promissory note is printed and must be configured. Valid options are:

- **S** - COD prints and sends to borrower
- **R** - COD prints and sends to institution
- **Z** - COD reprints and sends to borrower
- **V** - COD reprints and sends to institution
- **O** - Institution prints
- **E** - Electronic (only sent in the rebuild file)

3. Select one of the following valid values from the **Prom Note Status** list:

- **N** - Not ready to print (default for new loan)
- **R** - Ready to print
- **S** - Signed
- **P** - Printed (automatic)

- **X** - Pending (automatic)
- **A** - Accepted by COD (automatic)
- **E** - Rejected by COD (automatic)
- **I** - Inactive
- **E** - Inactive - Endorser Linked; Inactive due to the linking of a PLUS loan with an endorser
- **C** - Closed

4. The **Prom Note Status** field is enabled only if a new loan is added, or the **Prom Note Status** is blank, N, or R; otherwise the field is disabled.

   If you are adding a loan and print the prom note while adding the loan, and the **Prom Note Status** is changed to **P** once it was printed successfully, the field is disabled even though the loan is still being added.

   If the **Prom Note Status** is "Printed" and you change **Borrower Signed** field to Yes, CampusNexus Student automatically changes the **Prom Note Status** to Signed (S) and **Include on Manifest** to Yes.

5. The **Date Prom Note Printed** field is a read-only field.

6. Select **Yes** from the **Include on Manifest?** list, if the promissory note is to be included on the manifest of notes being sent to the COD. Select **No** if not.

   The Include on Manifest field is enabled only if the Prom Note Status is Signed or Rejected (S or E), and the Manifest Batch ID is not empty.

7. Select the date on which the borrower signed the promissory note from the **Date Prom Note Signed** calendar. The **Date Prom Note Signed** field is *enabled* only if the **Borrower Signed** field is *Yes*.

8. The **Manifest Batch #** field represents the number of the manifest batch in which the promissory note was sent to the COD, and is a read-only field.

9. The identification number that identifies this prom note is displayed in the **Printed Prom Note ID** field. The caption is *Accepted MPN ID* or *Printed MPN ID* depending on the **Prom Note Status**. A value will not appear in the field if the loan is a Direct PLUS loan.

10. The **MPN Link Indicator** field is a read-only field and is displayed when the loan-origination acknowledgement file is imported.

    Note: If an institution has Automated Processes enabled, Stafford loan disbursements are exported only if the MPN Link Indicator field is Y.

11. The **MPN ID** has been removed from the Loan Origination Acknowledgement record for Stafford loans, and has been replaced with a one character MPN indicator field specifying if the loan has been linked to a valid MPN at COD. It contain a 'Y' for Yes or an 'N' for No. This field is displayed only for DIRSUB or DIRUNSUB loans. It is not displayed for PLUS loans. If you are adding a loan, this field is blank. If you are editing a loan and a row exists in the FA Loan table for the loan being edited, the program displays the contents of FaLoan.MPNIndicator.

12. The **MPN Type** field indicates the type of promissory note for the selected loan. P possible indicators are Electronic, Paper, or Web. This information comes from the Prom Note Acknowledgement Import file.

13. Select **Yes** from the **Borrower Signed?** list if the borrower has signed the promissory note, or **No** if not. The field is enabled only if the Prom Note Status is P (Printed), or the Prom Note Status is S (Signed) and the Manifest Batch ID is empty.

14. Select **Yes** or **No** from the **Student Signed?** list. The field is visible only if it is a PLUS loan and is enabled using the same criteria as the **Borrower signed** field.

15. The **Accepted Date** represents the date on which the promissory note was accepted by the COD. It is a read-only

field.

16. The **Manifest Date** represents the date on which the manifest of promissory notes was sent to the COD. It is a read-only field.
17. The **Acknowledge Batch ID** represents the identification number of the promissory note acknowledgement batch, and is a read-only field.
18. The **Acknowledge Date** represents a date on which the promissory note acknowledgement was received, and is a read-only field.
19. The **Disclosure Statement Print Indicator** field is a read-only field.
20. The **MPN Expiration Date** is updated with value from COD import file. A new <MPNExpirationDate> tag is included in the response block of the COD Common Record received from COD.
21. The **Date Disclosure Statement Printed** field is a read-only field.
22. Click **Print Disclosure Stmt** to print the direct loan disclosure statement to be given to the borrower. This button is visible only if disclosure statements are printed at the institution. This button is enabled if disclosure statements are printed at your institution rather than the COD. This is another setup option.
23. Click **Reference Addresses** to view, select, or enter references for this borrower. When the form loads, the program looks in the Address table for addresses with a type code of "Reference". You can select records from the student's address list or enter new ones.

    a. To add a new address, select **<New Address>** in the Reference #1 or Reference #2 list.
    b. Enter the name and address data.
    c. To select a reference address that is already on file, select the address from the Reference #1 or Reference #2 drop-down list.
    d. Click **Save Addresses** to save new addresses or changes. The addresses are saved in the Address table with a type code of "Reference".
    e. Click **Master Information** to return to the Prom Note Info tab.
24. The Print Prom Note button is enabled only when the **Prom Note Status** is R, P, or S and the **Prom Note Print** indicator is F - On-Site.

25. If disclosure statements are printed at your institution location, click the Print Disclosure Stmt button.
26. Click **Save**.
27. Return to the Direct Loan Form.

Note: A message is displayed when you try to save loans where first disbursement date is after July 1st, 2007 and the origination fee is not 2.5 %.

Print Prom Note

If promissory notes are printed at your institution location, click **Print Prom Note** to print the note for the selected direct loan.

To print a promissory note:

1. Click **Print Prom Note**. CampusNexus Student displays a message asking if this is a non-negotiable note.
2. If you are printing the original, enforceable, note that will be signed by the borrower, click **No**. If you are printing a copy of the note for information purposes only, click **Yes**.
3. In either case, the prom note report will be loaded and displayed in the Preview window. After printing the prom note, close the form.
4. If you answered **Yes** in step 2 above, CampusNexus Student returns to the Direct Loan form with no further action. If you answered **No** in step 2 above, CampusNexus Student displays another message asking if the prom note printed successfully.

   Answer **Yes** or **No**as necessary. If you answer **Yes**, CampusNexus Student updates the Prom Note Printed field with a **P**and adds 1 to the Prom Note Print Sequence field. The Prom Note Printed Date and Printed Prom Note ID fields are also updated. If the prom note is for a direct subsidized or unsubsidized student loan (not a PLUS loan), CampusNexus Student checks for other direct student loans and updates data in those records also.
5. If you answer **No** to the message, CampusNexus Student returns to the Direct Loan form without updating any prom note data.
6. The system will update a second Financial Aid Loan record, if applicable, with any prom note-specific fields that have been updated. When updating the Loan table, the following values may be updated to a second loan record: **Prom Note Status**, **Date Prom Note Printed**, **Include on Manifest**, **Date Prom Note Signed**, **Date Signed Note Received**, **Borrower Signed**, and **Master Prom Note (MPN) ID**.

A second Loan record may be updated only if the loan being edited is a Sub or Unsub loan. When updating, the program checks if another row exists in the Loan table for the student where the fund source is Sub (if editing an Unsub loan), or Unsub (if editing a Sub loan), and the last 3 digits of the Direct Loan ID equals the last 3 digits of the loan ID for the loan you are editing.

Print Disclosure Statement

You can print your own disclosure statements, or use the one from COD. The **Print Disclosure Stmt** button is visible only if disclosure statements are printed at the institution.

- Click the **Print Disclosure Stmt** button. The disclosure statement will print on pre-printed forms just like the prom notes. All information on the disclosure statement is printed in a large white-space area. The only requirement is that all the information printed fits within the white-space area.

CampusNexus Student prints the following fields on the disclosure statement: Borrower Last Name, Borrower First Name, Borrower Middle Initial, Borrower Address, Borrower City, Borrower State, Borrower ZIP, Direct Loan ID, Borrower Phone, Campus Name, Campus Address, Campus City, Campus State, Campus ZIP, School Direct Loan ID, Loan Start Date, Loan End Date, System Date.

The information printed on Section 8 of the Disclosure statement lists all scheduled disbursements. If a student has both a subsidized and unsubsidized loan scheduled, disbursements for both loans are listed. The logic for combining a Sub and Unsub

loan for a student onto one disclosure statement is identical to the grouping logic on the Prom note printing. If a student has a Sub and an Unsub loan packaged for the same award year and the last three digits of the loan ID are the same, the disbursements for both loans are listed. In addition, both loan ID's are listed in Section 2 and both loan periods are listed in Section 6.

For each line in the FA Disbursement Schedule for this loan, the applicable date scheduled, gross amount, origination fee percentage, bank fee, and net amount is displayed.

The fund source description is also listed to the left of the schedule disbursements. The fund source description is listed as one of the following:

- Direct Subsidized Loan
- Direct Unsubsidized Loan
- Direct Plus Loan

After the disclosure statement is printed, you are prompted with the following question: "*Did the disclosure statement print correctly?*"

If you answer Yes, CampusNexus Student updates the **Date Disclosure Printed** field with the system date. If a DIRSUB and DIRUNSUB loan were both included on the Disclosure statement, the **Date Disclosure Printed** fields for both loans are updated.

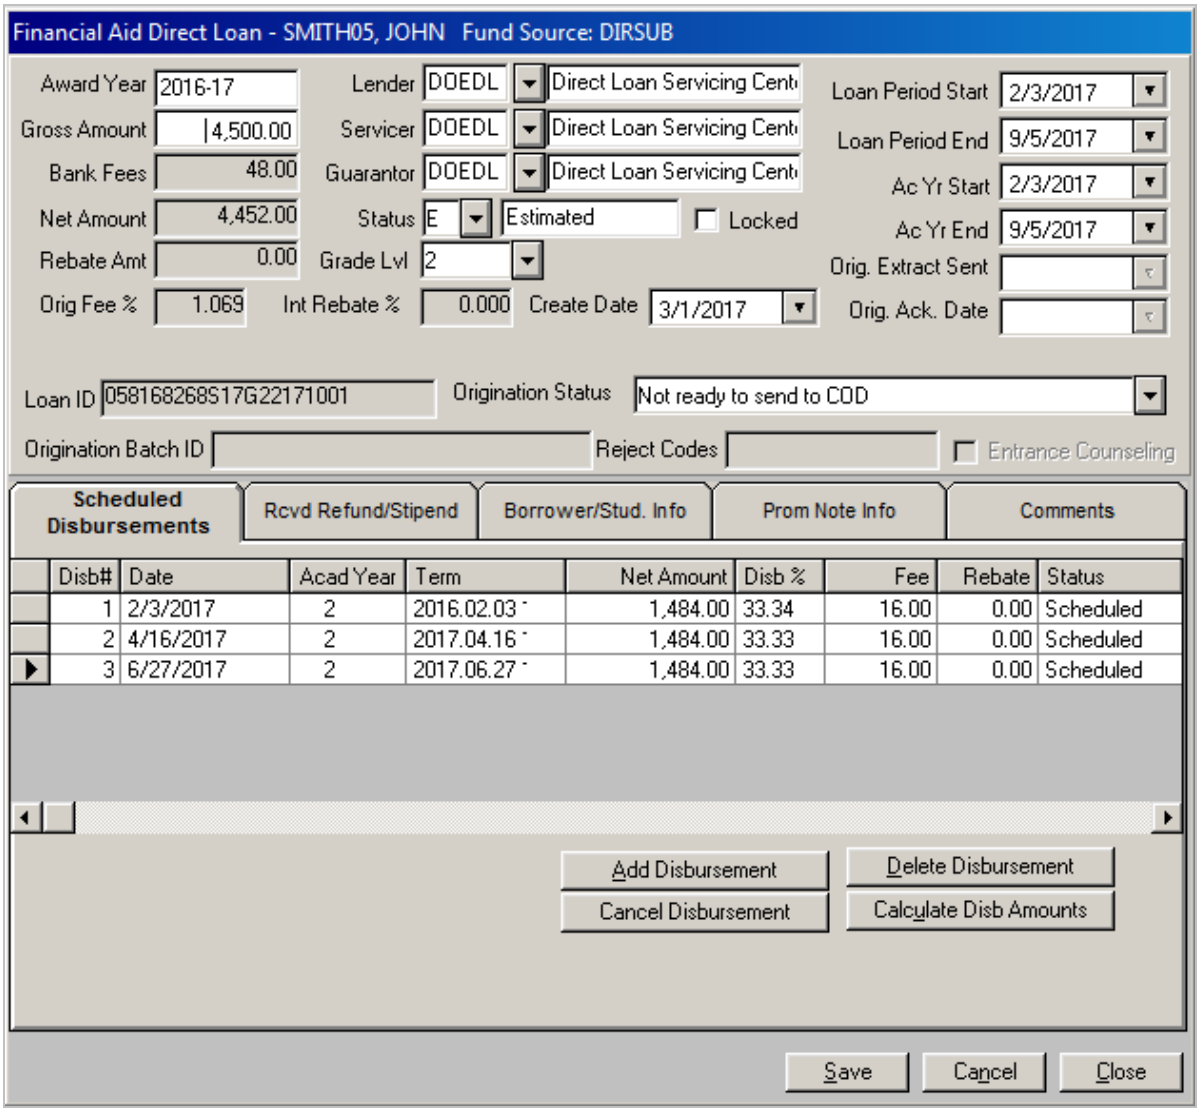
Origination Changes

Origination change records can be created when COD Originations are edited and when loan or academic year dates are updated by Academic related activities, such as adding or removing transfer credits, and using the Student Pace Evaluation (SPE) tool.

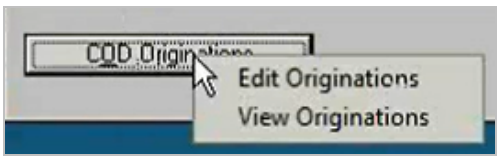
Editing COD Originations

Loan origination changes are only captured if the origination status of the loan being edited is "Accepted", "Batched to Send", or "Pending Credit Decision". If the loan has one of these origination statuses, a COD Originations button is displayed on the Financial Aid Direct Loan form.

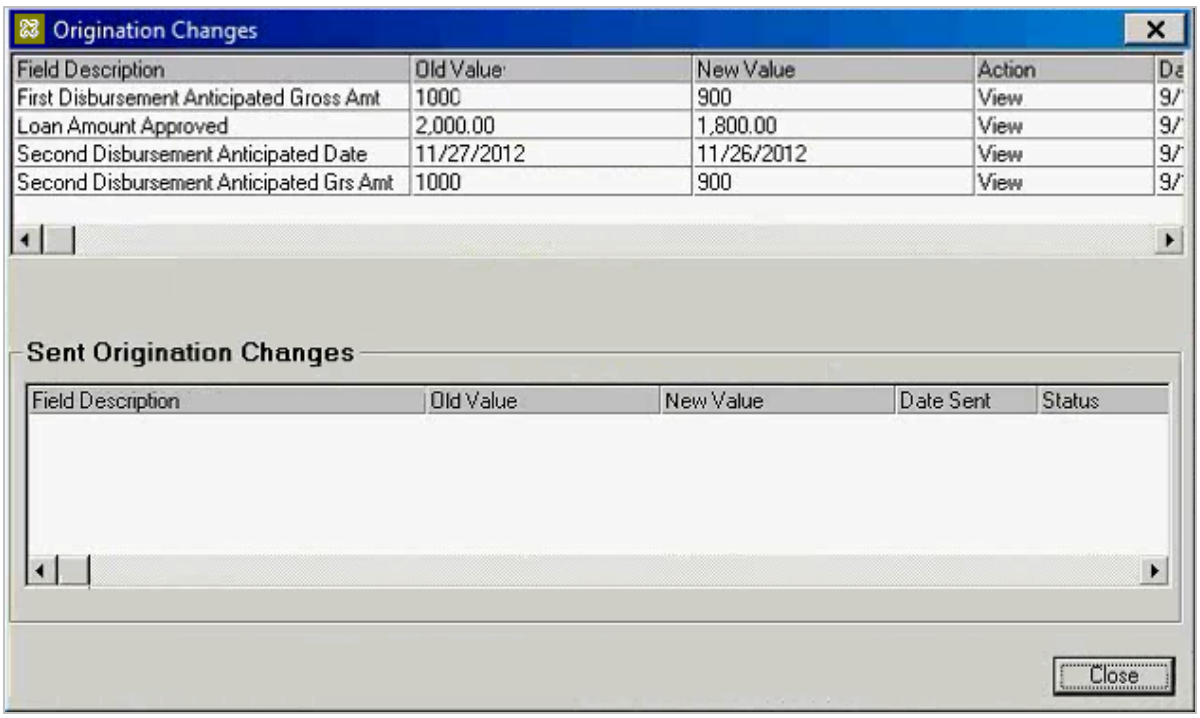
1. Click **COD Originations** on the Financial Aid Direct Loan form.



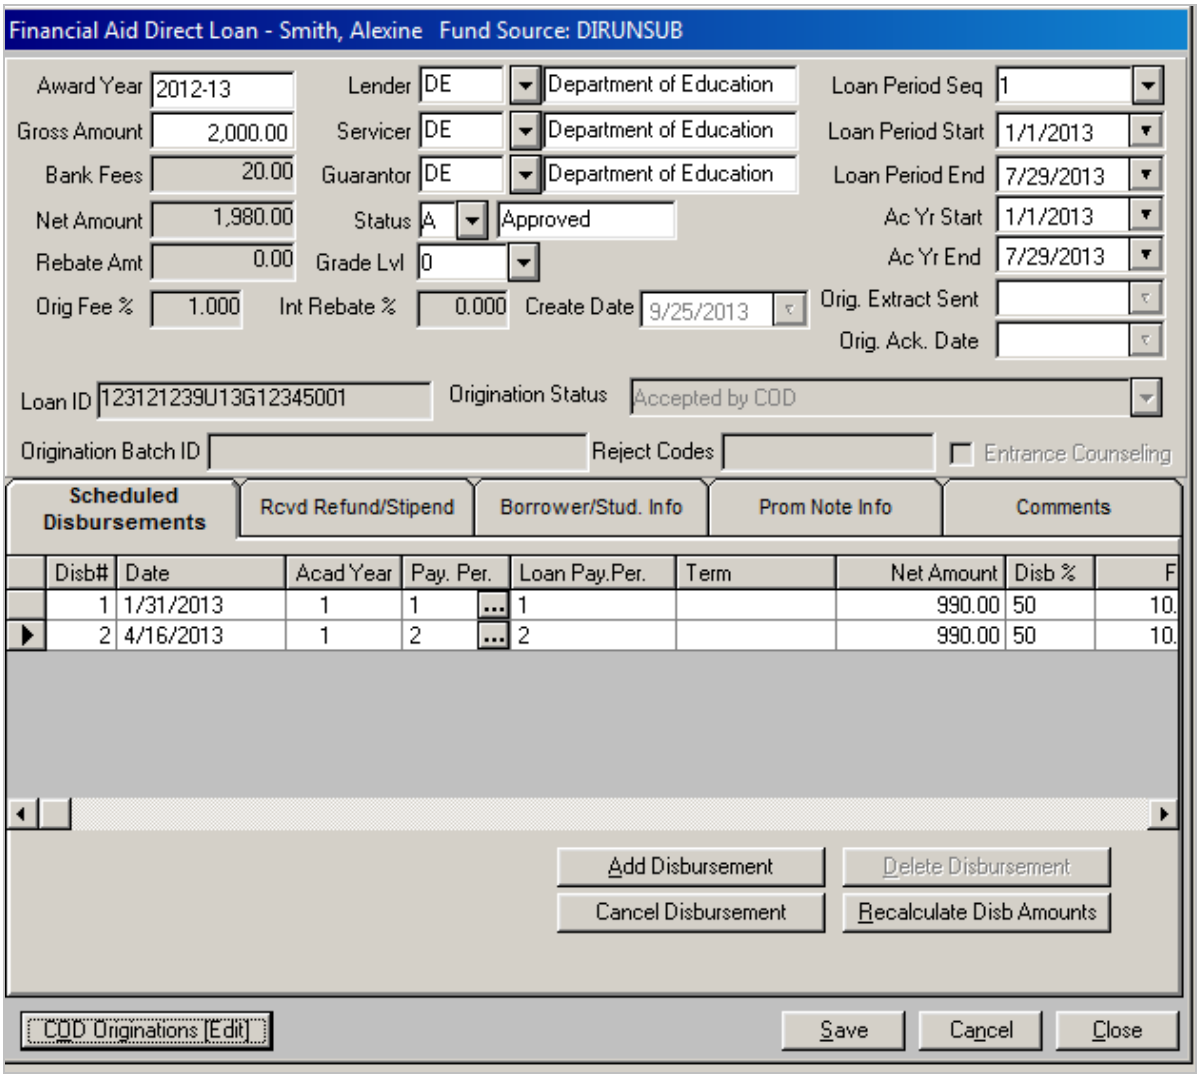
The COD Originations button displays the Edit Originations and View Originations options.



2. Select **View Originations**. The Origination Changes form displays any pending or sent origination changes. If no changes are found, a message stating so is displayed.
3. If you previously saved Origination Changes, they are displayed.

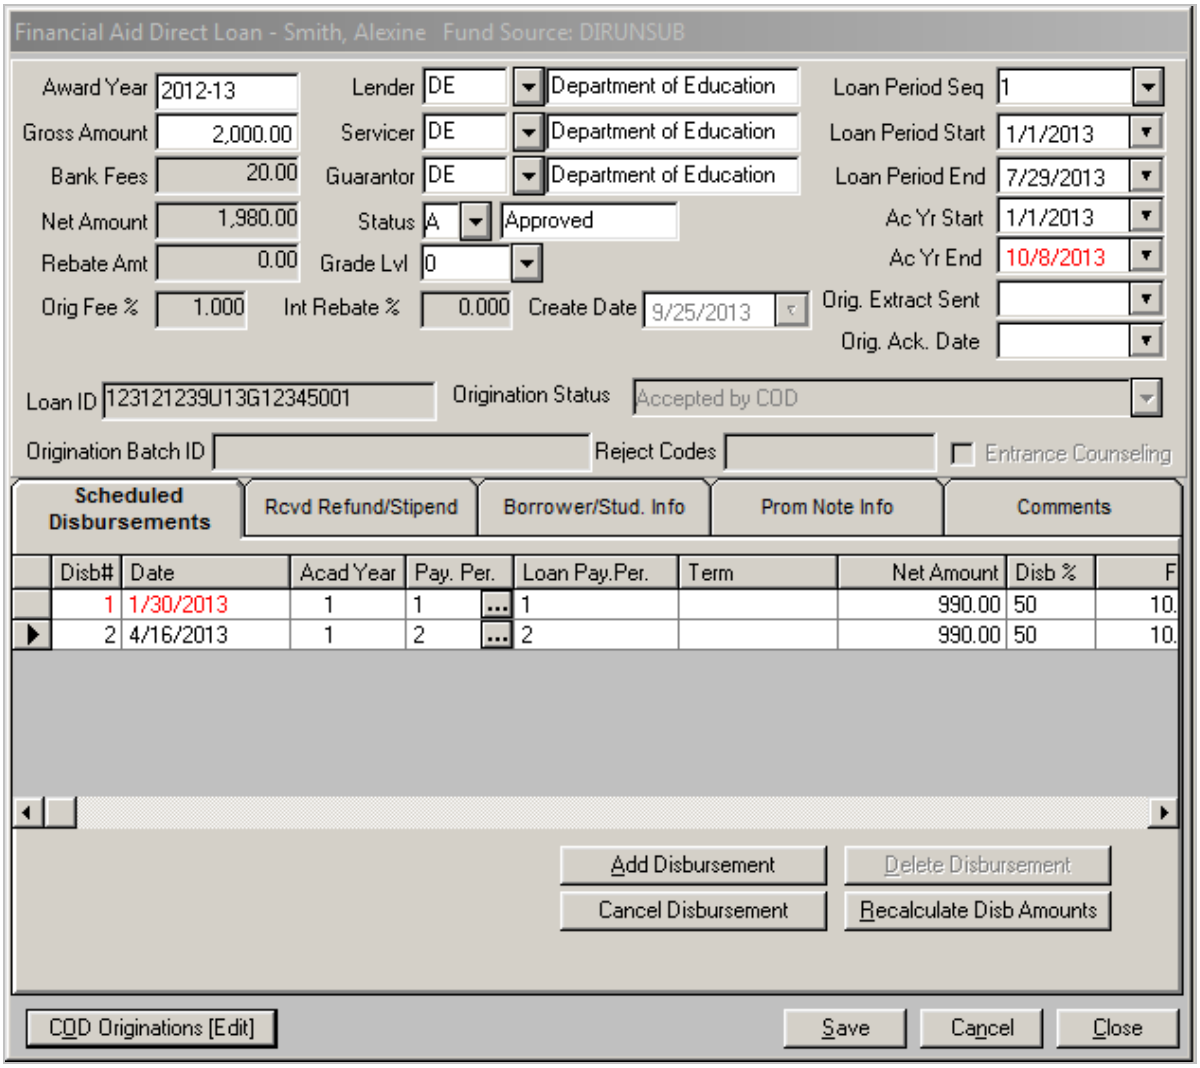


4. Click **Close** to close the form.
5. Click **Edit Originations**. You can edit any field or menu that is not dimmed.



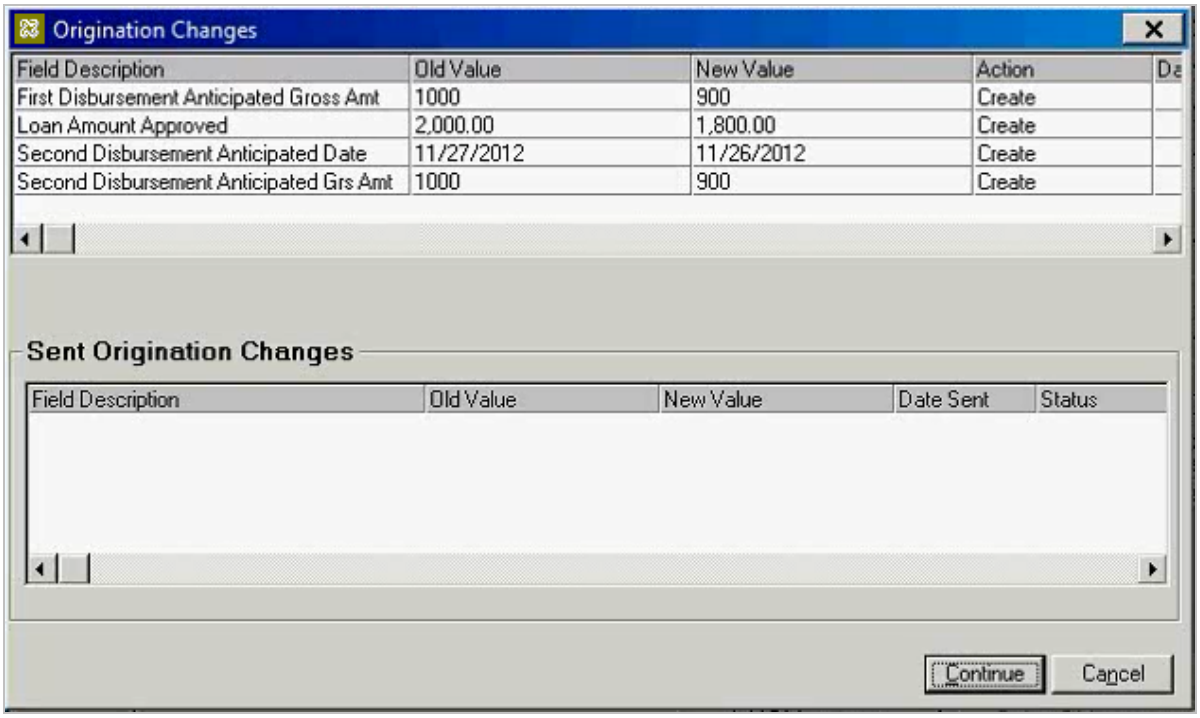
6. To edit a date, click a **Date** field, click ... and select a new Disbursement date.
7. Your changes appear in red until the Origination Change record is exported. Once the file is exported, the names of the fields that were changed will be red until the response file is imported.

   Note: For the Acad Year Start and End Dates to be enabled during the origination change process, for an Academic Calendar 5 & 6 that use Loan Periods, the student must be in a Permanent Out school status.

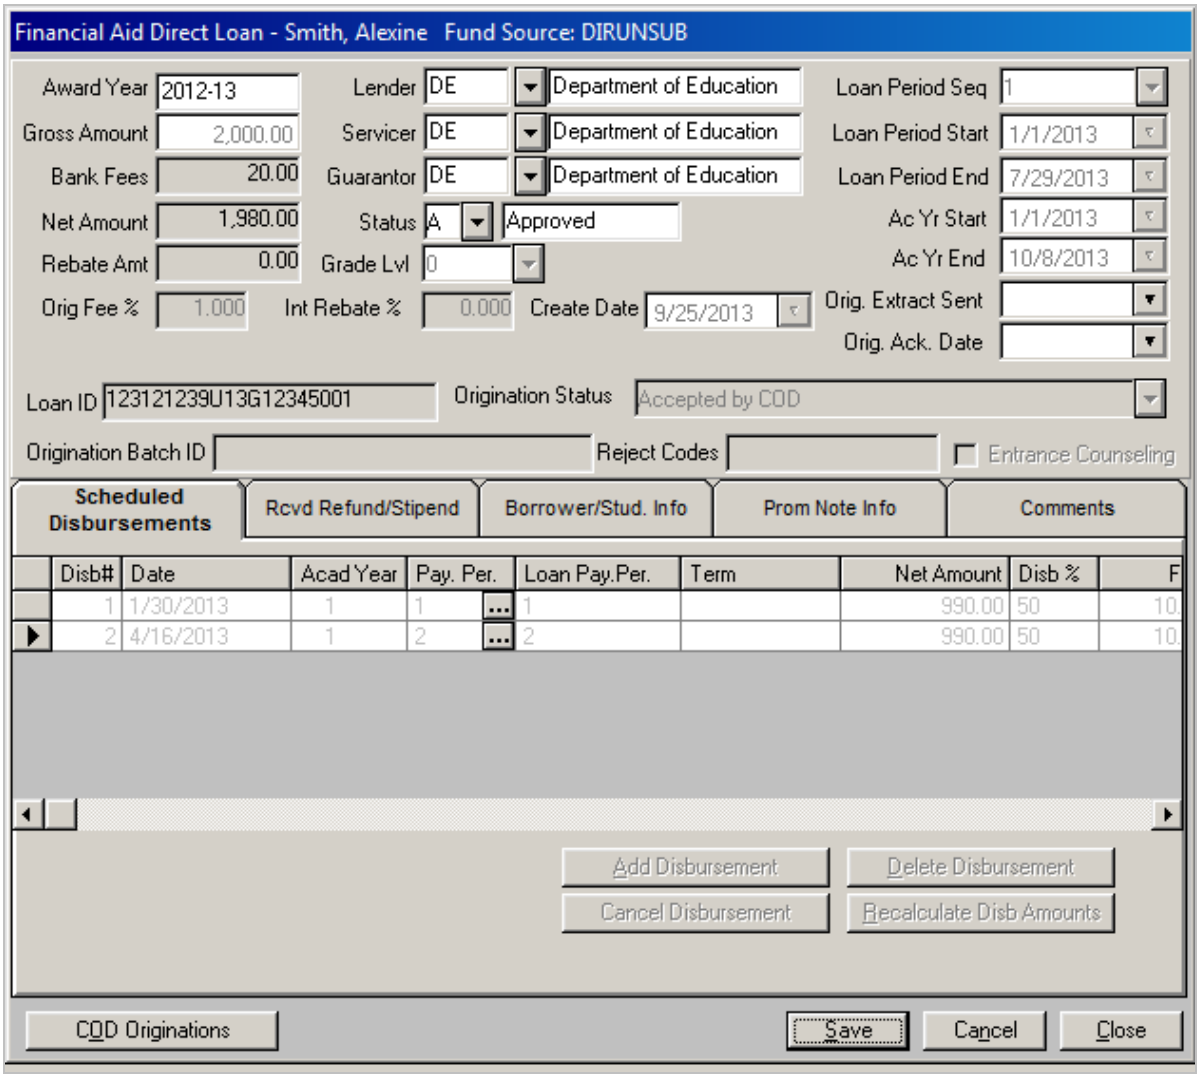


Note: When you mouse over a changed value, the old value is displayed.

8. Click **Save** to view the COD origination changes associated with your edits.



9. Click **Cancel** to close this form. Continue to make changes to the Federal Aid Direct Loan form.
10. Click **Continue** to save your changes. The Schedule Disbursement tab is refreshed with the new information, and the fields once again dimmed.



Each field is validated for correct input. CampusNexus Student updates the applicable tables with the changes.

When the file containing origination changes is sent to COD and approved, the changes are already be in place. If the file is rejected, the changes are rolled back by the COD Import feature, with the exception of the academic year dates and loan dates for loans with loan period sequences. The record will have to be modified again using this process.

Origination Changes Created by Academic Related Activities

For non-term institutions (Academic Calendars 5 and 6), CampusNexus Student can be configured to automatically create origination change records when any of the following dates are updated for a Direct Loan (DIRSUB, DIRUNSUB, and DIRPLUS) by Academic related activities, such as adding or removing transfer credits, and the Student Pace Evaluation (SPE) tool adjusting the loan dates due to changes on the student's schedule, etc.

- Academic Year (AY) start/end dates
- Loan Period (LP) start/end dates
- Disbursement dates

Origination changes are created automatically only for Direct Loans that have Origination Status of "Accepted" or "Batched to Send".

Consequently, corresponding origination changes for Direct Loans that are adjusted when a student's status is changed to "Canceled" (Never Attended) are automatically created in the system and exported to COD.

For more information about the configuration options for origination changes, see Direct Loan Setup.

Loan Information

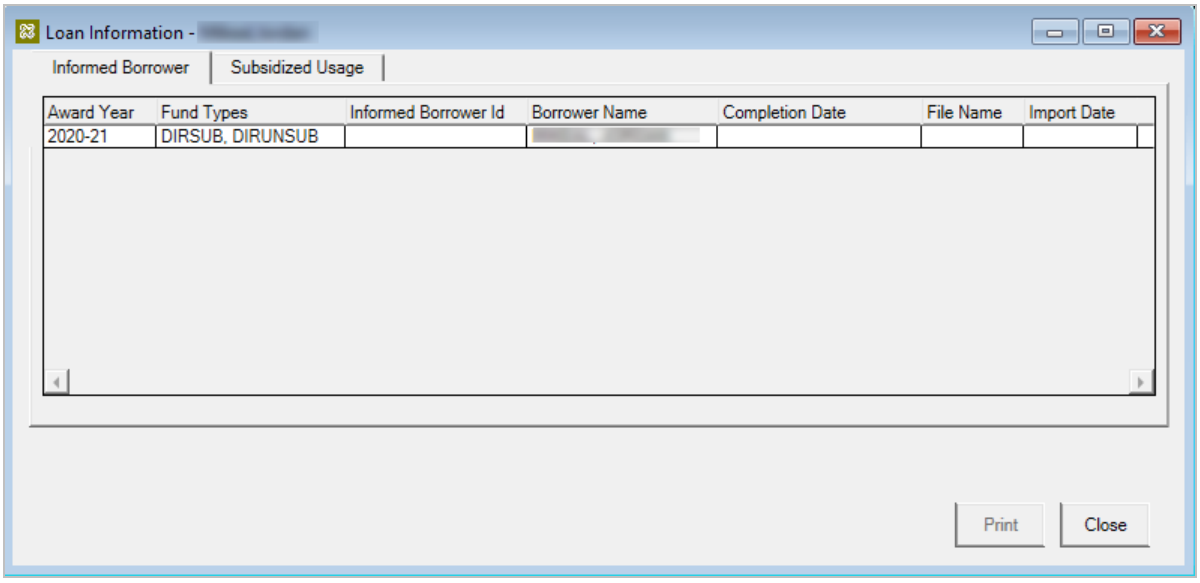
You can use the tabs on the Loan Information form to view and print a student's Informed Borrower status and Subsidized Usage information.

Informed Borrower Tab

Use the Informed Borrower tab to check if borrowers have reviewed their outstanding loan balance at https://StudentAid.gov (Annual Student Loan Acknowledgement).

Beginning with the 2020-21 award year, CampusNexus Student supports the Informed Borrowing Requirement for student borrowers (DIRSUB, DIRUNSUB, DIR Grad Plus loans) and parent borrowers (DIR Parent Plus loans). After the borrowers acknowledge that they have reviewed their outstanding loan balance at https://StudentAid.gov (Annual Student Loan Acknowledgement), COD returns a new system generated response file (CRIB21OP) that contains the information populated on the screen below. For more information, see COD Updates in Regulatory Help.

1. Select a **Student**.
2. Navigate to **View** > **Financial Aid** and select **Loan Information**.
3. Click the **Informed Borrower** tab and review the data in the grid.



Field	Description
Award Year	The financial aid award year.
Fund Types	Specific classification for the fund source.
Informed Borrowing ID	After borrowers acknowledge that they have reviewed their outstanding loan balance at StudentAid.gov, COD returns 18-digit Informed Borrowing ID tags at Award Level for each Direct Loan in the response file.

Field	Description
Borrower Name	Borrower's last name and first name.
Completion Date	The date when the item was completed.
File Name	File name of the generated CRIB21OP file.
Import Date	The date and time when the job was processed

Subsidized Usage Tab

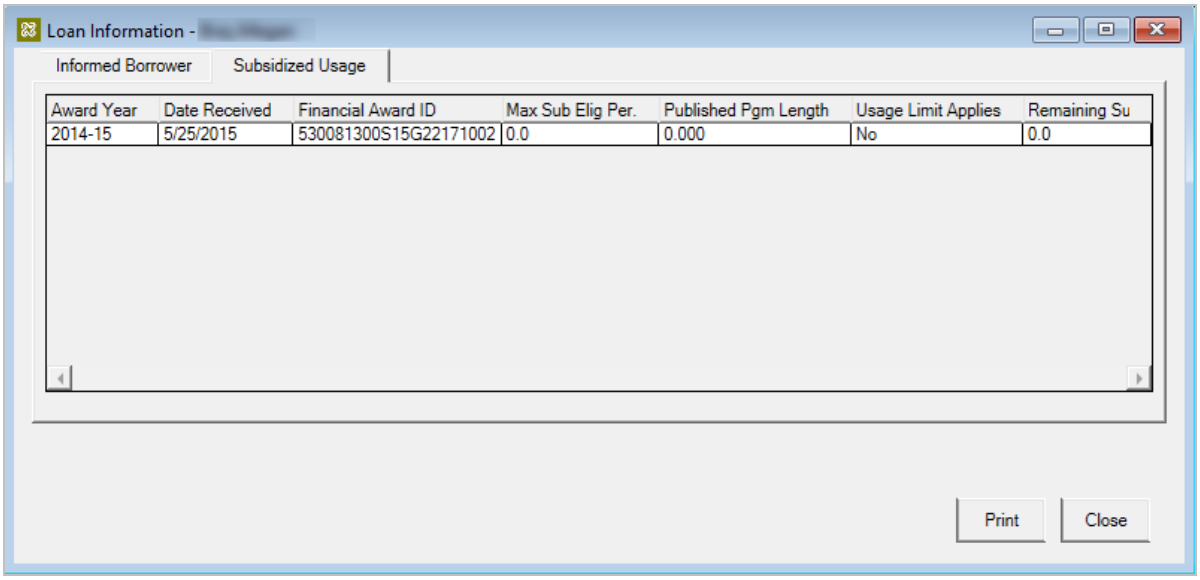
The records in the Subsidized Usage tab indicate if a student has a remaining subsidized loan eligibility for a specific award year. The form assists financial aid administrator when packaging student loans.

When a Direct Loan is exported from CampusNexus Student to the Common Origination and Disbursement (COD) system, COD returns a response that contains the subsidized usage information.

COD uses the following formula to determine the remaining subsidized loan eligibility:

Maximum Eligibility Period - All Subsidized Usage Periods = Remaining Eligibility Periods

1. Select a **Student**.
2. Navigate to **View** > **Financial Aid** and select **Loan Information**.
3. Click the **Subsidized Usage** tab and review the data in the grid.
4. Review the information for the pertinent award year. In particular, check whether the subsidized usage limit (SULA) applies and take note of the Remaining Subsidized Eligibility Period.



Field	Description
Award Year	The financial aid award year.
Date Received	The date when the COD response containing the subsidized usage information was imported into CampusNexus Student and the record displayed in the UI was created.
Financial Aid Award ID	The Financial Award ID matches the Loan ID on the Direct Loan Detail form.
Max Sub Eligibility Per.	The student's maximum subsidized loan eligibility period (in years).
Published Pgm Length	The program length (in years) published in the institution's catalog.
Usage Limit Applies	Indicates whether the subsidized usage limit applies (Yes/No).
Remaining Sub Eligibility Period	The calculated remaining subsidized loan eligibility (in years).

Academic Year Form

The Academic Year form is part of the Financial Aid Packaging Process, enabling you to add or edit an academic year record for the student. See also Start the Packaging Process, Comment tab, Budget tab, Packaging Status, Award Notices, Packaging, and Field Level Security.

Note: When you save any date changes on the Academic Year form, you can also update the dates on the Direct Loan form if you have Fund Source Permissions. If you do not have Fund Source Permissions, the changes are not carried over to the Direct Loan form.

Academic year sequences are generally built from the Program Version setup; however, program versions using Academic Calendars 5 and 6 have logic to alter the number of sequences and their credits or hours and weeks values based on Transfer Credits and prior course work from other enrollments. Other criteria that can alter the values and number of sequences needed are CLEP course work, associated course work, and course work prior to the program version start date.

If an action occurs that triggers a re-evaluation of Academic Year (AY) and Loan Period (LP) sequences for a non-term program version and a system constraint is encountered that prevents CampusNexus Student from adjusting the AY / LP sequences, a message indicates that the Academic Year and Loan Period sequences could not be adjusted automatically. System constraints include Completed / Locked or Fully Disbursed AY / LP's, and CampusNexus Student trying to remove a sequence that has Financial Aid packaged. Review the sequences and adjust them as needed.

When CampusNexus Student is configured to 'Disallow Rolling Credits' under Setup > Student Pace Evaluation Settings, it can also adjust the final academic year and loan period sequences if extra credits or hours are earned within previous sequences.

Note: If the value in the Start Date, End Date, or Dependency Status field is displayed in red, a pending origination change for a loan associated with the academic year is being displayed.

When academic years are added, CampusNexus Student determines if the student has an ISIR or FAFSA for same award year, and if the student's grade level is '1st year never attended college', the academic year Sequence 1 is flagged as 'First Time Borrower'. See also Grade Level and First Time Borrowers settings.

If there are no academic years for the enrollment, CampusNexus Student first tries to add the academic years as defined in Lists > Financial Aid > Programs. If none are found, add an academic year manually. If there already are academic years in the list for the enrollment, click **Add** to open a new academic year for the list.

Note: The ISIR Summary Report, ISIR Import Report, Print ISIR Batches Report, Review/Print Multiple Print Batches, and Print Individual ISIR reports selections now include 2014-15 in the Academic Year (AY) menu list.

The NSLDS Subsidized Loan Eligibility Used Field (position 445) provides the total time during which the student has received Direct Subsidized Loans as of the date of the ISIR; it does not include the total time during which the student has received Direct Subsidized Loans while enrolled in a non-credential teacher certification program. In general, applicants may not receive Direct Subsidized Loans for more than 150% of the published length of the program in which they are currently enrolled. This field contains numeric six-digit values, 000v000 to 999v999, where v is an implied decimal and is excluded from the output.

Special Program Indicators A and B are now available to ensure that institutions can supply of Published Program length of 4 years . For purposes of the 150% limit, a bachelor's degree completion program is a bachelor's degree program that requires an associate degree or the successful completion of at least two years of post secondary coursework as a prerequisite for admission to the program. Because these programs only offer the final two years of coursework necessary to confer a bachelor's degree, the programs have a published length of 2 years.

For more information on the use of Special Program Indicators, see: https://ifap.ed.gov/eannouncements/011714RevisedFinalRegulationsPublished150PercentEANum8.html

On July 6, 2012, Public Law 112-141 was enacted. This law contains a provision that eliminates the subsidy on Direct Subsidized Stafford Loans when a “first time borrower” enrollment exceeds 150% of the published program length.

For award years 2014-15 and higher, the Subsidized Usage Limit Applies (SULA) flag (where the valid values are Y or N) has been added to the COD system. Upon receipt of a Direct Loan actual disbursement with a first disbursement date on or after July 1, 2013, COD determines if the borrower meets the definition of a "first time borrower" to confirm that the 150% subsidy limit applies to the borrower.

When the SULA flag is set to Y, a SAR comment code 267 will appear if a first time borrower student is subject to the subsidized loan limitation. The message directs users to the studentaid.gov site. This flag is viewed for all academic years but is only populated for the current award year. When the ISIR is received and the SULA flag is associated with a comment code, document triggers associated with the comment code are activated. The SULA flag is also displayed in the Financial Aid Packaging form.

Title IV Eligibility

Payment periods that the student will not attend are flagged to indicate that the student is not eligible for TIV funds during that payment period since the student will be unable to establish eligibility for TIV funds.

The 'notEligibleforT4' flag is set to 1 for the following scenarios:

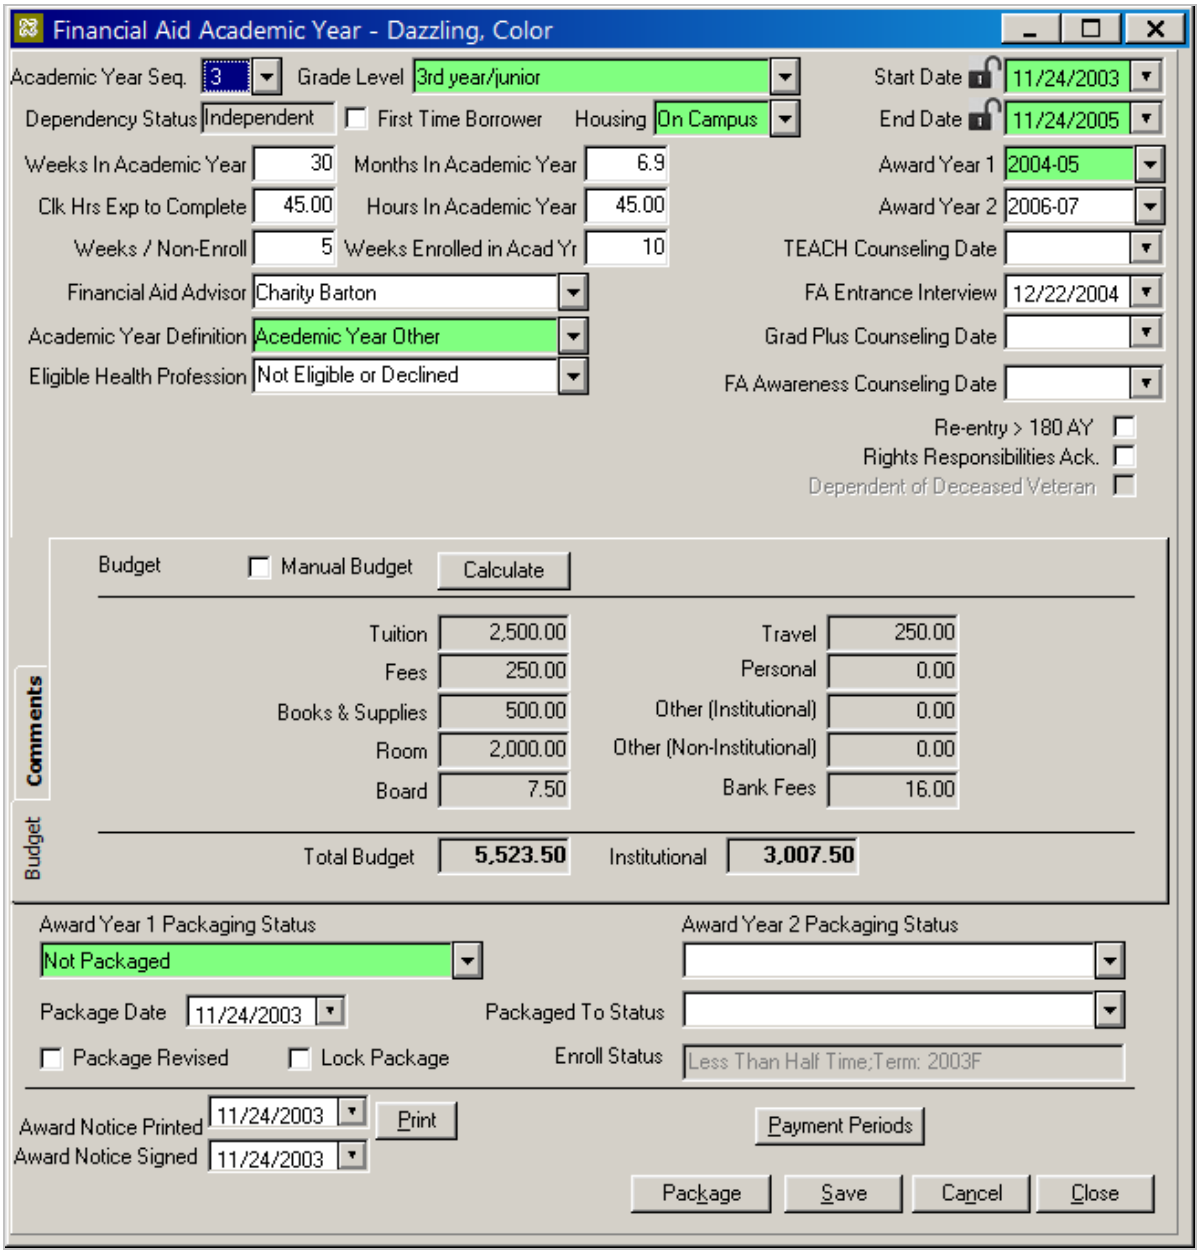
- A final non-zero credit payment period occurs with a credits milestone that is the same as a prior payment period (i.e., the student registered enough credits to complete the program version in the payment period prior to the final payment period). Use cases are AY/LP having 1 or 2 payment periods. Disallow rolling credits is disabled to create this data pattern for a final AY/LP with a single payment period.
- A zero credit payment period can occur when the flag to allow adjustment to 0 is enabled. See Allow zero out extra AY/LP under Setup > Campus Information > Financial Aid (tab). Extra payment periods that are unneeded but cannot be removed due to constraints are updated to have 0 credits/hours.

When the flag is set to 1, the Payment Periods for Academic Year form displays the message: *"The system has calculated that the student will complete the program prior to this payment period. The student is not eligible for the TIV funds associated to this payment period."*

You can configure an alert for a staff member when a payment period is flagged non-eligible for Title IV funds. For more information, see TIV Eligibility Alert under Setup > Campus Information > Financial Aid (tab).

Designing a Financial Aid Package:

1. Select a student.
2. Navigate to **View > Financial Aid > Packaging**. The Financial Aid Packaging form is displayed.
3. Click **Add** to add a new academic year record for the student, or select an academic year option and click **Edit**. The Financial Aid Academic Year form is displayed.



4. If there are no academic years for the enrollment, CampusNexus Student tries to add the academic years as defined in Lists > Financial Aid > Programs. If none are found, you add an academic year manually. If there already are academic years in the list for the enrollment, click **Add** to open a new academic year for the list.
5. Complete the fields on this form as needed.

Field Descriptions

Field	Description
Academic Year Seq	Indicates the Academic Year record with which you are working. You can change from one academic year to another by selecting it in this list box. When you delete an academic year from the student Packaging form, CampusNexus Student renumbers the remaining academic years. In other words, if a student has academic years 1, 2, 3, and 4 and academic year 2 is deleted, year 3 is renumbered to year 2 and year 4 is renumbered to year 3. This also updates the following tables is the database: • FaStudentAY • AdEnrollSched • FaRefund • SaBillingBatchDetail • SaEnrollRevenue • SaRefundCalc • SaRevenueDetail • SaTrans
Grade Level	Select the grade level at which the student is working in this academic year. Grade levels are defined under Lists > Academic Records > Grade Level. **Notes**: • A student must be assigned a 'graduate' grade level to qualify for a Graduate PLUS loan. • The grade level options used here do not necessarily correspond to the options on the FAFSA or the Stafford Loan forms. The grade levels can be modified.
Dependency Status	This read-only field indicates the FA model that is being used for the selected student, in other words, Dependent or Independent. **Note**: If a student does not have a FAFSA or ISIR on file and has an Undetermined dependency status, you can assign the student with a Dependent status when packaging Direct Parent PLUS Loans. In this scenario the dependency status will be Dependent*.
First Time Borrower	Select this option if the student is a first time borrower, and you want to delay the first loan disbursement by the number of days entered in Financial Aid Settings.
Housing	Select On Campus, Off Campus, or With Parents. For more details on Housing Status, refer to Budgets Codes-Financial Aid Housing Status.

Field	Description
Start Date	Enter the start date of the academic year. For the first academic year, CampusNexus Student defaults to the start date in the student's enrollment record. The start date of the student's second and succeeding academic years are estimated using the number of weeks in an academic year and the number of weeks not enrolled. You can change the estimated date if necessary.
End Date	Enter the end date of the academic year. For the first academic year, CampusNexus Student defaults to a date calculated from the student's enrollment date plus the number of weeks in the academic year. The end date of the student's second and subsequent academic years are estimated using the number of weeks in an academic year and the number of weeks not enrolled. You can change the estimated date if necessary.
Locking/Unlocking the Start Date and End Date 	If Exclude from Auto Adjustment permissions are configured for you on the Staff Information form, click the lock image to toggle between the Lock and Unlock states, as follows: Unlock : Allow this date to be adjusted by Student Pace Evaluation (SPE) Lock : Exclude this date from Auto Adjustment If you try to unlock an academic year, CampusNexus Student checks if any subsequent academic years are locked. If subsequent academic years are locked/excluded, the following message is displayed: *"Subsequent Academic Years and Payment Periods are excluded from auto adjustments. To include this academic year in auto adjustment, must also include all the subsequent Academic Years and Payment Periods in auto adjustment. Do you want to continue?"* Select **Yes** to unlock all subsequent payment periods and academic years. Select **No** to do nothing and return to the form.
Award Year 1	Select the first award year in this academic year.
Award Year 2	Select the second award year in this academic year. Award year 2 is optional at this time. CampusNexus Student only requires that a FAFSA be completed for the first award year to package an academic year.

Field	Description
Weeks in Academic Year	Enter the number of weeks in the academic year (AY). The default for this value comes from the AY defined for the student's program in Lists > Financial Aid > Academic Years. This field represents the number of weeks that the student should attend for the selected AY sequence. Any sequence prior to the final AY sequence should be set using the weeks defined for a full AY. In a non-term configuration, the weeks in a final AY can change from the definition configured on the program version based on student need. When student need changes, the weeks of the final AY are pro-rated based on the number of credits needed in the final AY and a ratio of credits to weeks from the definition of a full AY. *Example* If a student needs 14 credits in the final AY, and the definition of a full AY is 24 credits/30 weeks, CampusNexus Student calculates as follows: 30/24 * 14 = 17.5 (rounded up to 18 weeks) When you edit this field for a program version configured to use Academic Calendar 5 or 6, CampusNexus Student displays the attribute warning message. The message warns you if you try to manually edit and save values that would not match the values CampusNexus Student determined are needed.
Months in Academic Year	The number of months in the academic year is calculated from the Weeks in Academic Year field in Lists > Financial Aid > Academic Years Code Setup. CampusNexus Student calculates a 36-week Academic Year as 8 months, when the institution looks at a 36-week AY as 9 months. CampusNexus Student calculates this based on 4.33 weeks per month. Some institutions assume it should be 4.00. To resolve this issue, the calculation is left at 4.33, but holidays are added to the calculation of the academic year end date. CampusNexus Student checks the calendar file and extends the end date of the academic year based on this schedule.
Credits Expected to Complete	Enter the number of credits the student is expected to complete in this academic year. The default for this value comes from the academic year defined for the student's program in Lists > Financial Aid > Programs.

Field	Description
Credits in Academic Year	Enter the number of credits in the academic year (AY). The default for this value comes from the AY defined in Lists > Financial Aid > Academic Years. This field represents the number of credits that the student should attend for the specific AY sequence that is selected. Any sequence prior to the final should be set using the credits defined for a full AY. In a non-term configuration, the credits in a final AY can change from the definition configured on the program version based on student need. *Example*: A student transfers 10 credits. The credit transfer reduces the amount of credits needed to complete the program version requirements. The final AY credits are reduced by 10. When you edit this field for a program version configured to use Academic Calendar 5 or 6, CampusNexus Student displays the attribute warning message. The message warns you if you try to manually edit and save values that would not match the values CampusNexus Student determines are needed. CampusNexus Student can calculate the value of the "Credits in Academic Year" field for the final AY based on the remaining credits needed. **Attribute warning message** Weeks/Non Enroll	Enter the number of weeks in the academic year that the student is not expected to be in attendance. The total of Weeks in A/Y and Weeks Non-Enroll should add up to 52. This number is used to estimate the time between the start of one academic year and the start of the next academic year.

Field	Description
Weeks Enrolled in Academic Year	Enter the number of weeks for which the student is enrolled in the academic year. If the Pell record has already been originated (RFMS), and you change the **Weeks Enrolled in AY**, you are prompted to change the origination status to **R**.
TEACH Counseling Date	When importing TEACH Grant acknowledgment message class CRACYYOP, this field is automatically updated. This field may also manually be updated.

Field	Description
IW weeks and IM in AY	IW weeks and IM in AY are conditional fields that are enabled when the program version is configured to "Auto recalculate budgets" (see Lists > Financial Aid > Programs > Program Version). When the program version for the enrollment has "Auto recalculate budgets" selected in conjunction with the budget assigned to the Academic Year configured to "Use Monthly Amounts" and the Institutional Charges Calculation Method is set to "Use Amounts Entered Here", CampusNexus Student can automatically recalculate budget amounts based on instructional weeks (IW) that occur between the Academic Year and Loan Period dates. The amounts on the budget are multiplied by the value contained in the "IW Months" field to populate values in the budget section of the Academic Year. The IW months field is used to calculate the Monthly amounts instead of the Months in AY field. The COA and Pell COA are updated as the result of the automatic budget recalculation.  **IW weeks** This field which represents the number of instructional weeks (IW) that occur within the date range of the Academic Year (AY) dates. The field is populated/updated by a system calculation if "Auto Recalculate Budgets" is enabled for the program version. The field is used by CampusNexus Student to calculate the IW months value for the AY sequence. The minimum value of the field should never be less than the “Weeks in AY” field; however, it could be calculated to a value that is greater for certain course registration patterns. The number of IW could differ from the calendar weeks of the same time frame. If projection is used to calculate the week milestone and the credits milestone is the same date, the value should not be greater than the “Weeks in AY” value. (A similar field is contained on the Loan Period form and used for calculations on that form). **IM in AY** This field represents the number of instructional months (IM) that occur between the dates of the Academic Year (AY). This field is populated by a system calculation that divides the value of the "IW in AY" field by 4.333. If the resulting value contains a decimal of .5 or higher, the months are rounded up, else the months are rounded

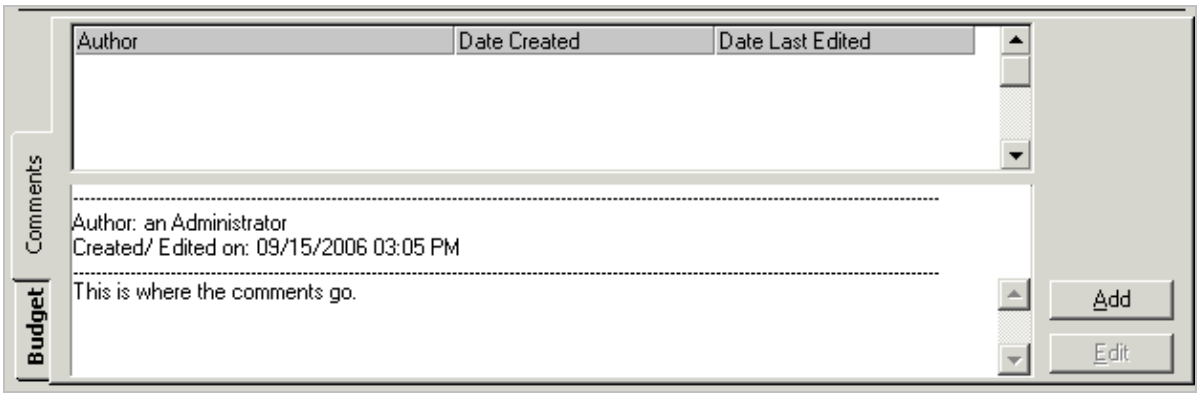
Field	Description
	down. The "IW Months" value is used in budget calculations when "Auto recalculate budgets" is selected for the program version. (A similar field is contained on the Loan Period form and used for calculations on that form).
Financial Aid Advisor	Select the student's Financial Aid Advisor. The FA Advisor may be selected during the enrollment process if your institution is set up to do so. See Setup > Academic Records > Enrollment.
Academic Year Definition	Select an academic year. Academic Years are set up under Lists > Financial Aid > Academic Years.
FA Entrance Interview	The FA Entrance Interview date field can be populated by any of the following methods: • By importing the Direct Loan Entrance Counseling File (Refer to number 3) or Direct Loan Plus Application Acknowledgment. • By selecting the Entrance Interview Document on the campus setup, when the document has been added to the student's document folder and the document status has a document status code of one of the following: "OK", "REC", "RECVD", "RECEIVED", "REC'VD", "A" and is associated with an 'Approved/On file' status, the entrance interview date within this form will be set to the date that the document was received. • By manually editing the date on this form.
Graduate Plus Counseling Date	This field represents the Direct Loan Graduate Plus Entrance Counseling Date. The date is entered by a Financial Aid Officer, or the date is imported from the Direct Loan Counseling file, populated as the value of "P" (Graduate Plus). The date is populated only when the existing contents are null. The field can be populated by any of the following methods: • By importing the Direct Loan Counseling file. • By manually editing the date on this form.
Financial Aid Awareness Counseling Date	The field represents the date the student completed Financial Awareness Counseling on the https://studentloans.gov website. The field can be populated by any of the following methods: • Importing the Direct Loan Entrance Counseling Acknowledgment file (CRECMYOP). • By manually editing the date on the form.

Field	Description
Rights Responsibilities Ack	If you import the Entrance Counseling results, the value of the student's rights and responsibilities Acknowledgment flag contained in the file is set in this field.
Re-entry > 180 AY	This check box is used by the Student Pace Evaluation (SPE) tool in non-term configurations when a student is re-entered after the student has been out of school for more than 180 days. When the Re-entry button is clicked on the enrollment form, CampusNexus Student checks if the re-entry date selected is more than 180 days from the NSLDS withdrawal date. If greater than 180 days, CampusNexus Student finds the first available AY sequence without financial aid packaged (Estimated or Approved) and set its Start Date to the Re-entry Date. CampusNexus Student then selects the Re-entry > 180 AY check box, which will be used as the starting point for the SPE tool to monitor the student's progress through the remaining time in the program.
Dependent of Deceased Veteran	Authorized users can select this check box to indicate that a student is the dependent of a veteran that perished in Iraq or Afghanistan after September 11, 2001. This check box is selected for academic years with award years 2009-10 or beyond. By default, the check box is cleared. During the ISIR import process for the 2011-12 award year and forward, if a student has a "DOD Match Flag" on their ISIR record, the student is updated automatically with the "Dependent of Deceased Veteran" option selected on the student's Academic Year form. This is applicable for automatic ISIR matching, as well as manual matching. **Note**: If this option is selected, eligible students receive the maximum Pell award as well as all Title IV aid based on a zero EFC. Additionally, eligible students may also qualify for an Iraq and Afghanistan Service Grant (IASG).
Exclude Summer Term from Packaging	Use this option to include or exclude the Summer Term in Financial Aid packaging. This option is only visible and applies to students who are enrolled in a Program version with a Summer Header or Trailer, and who have selected the Use Summer Term in Packaging option. By default, students are included in Summer Term packaging if the program version is chosen to package for the summer; students can then choose to be excluded from summer packaging. When this option is not selected, the Packaging process packages aid for Summer. This option on the Financial Aid Academic Year form overrides the option on the Student Program Version, but this applies only when the Program version is configured to package for the summer.

Field	Description
Eligible Health Profession (HPPA Level)	This list takes into account the two levels of additional awarding available to eligible graduate/professional students enrolled in Health Profession programs. This option can take on one of the following values: • Not Eligible or Declined • Eligible for up to $16,667 in additional Stafford loan (HPPA Level 1; applies to CIP Codes 42.0201; 51.0101; 51.0701; 51.2001; 51.2201) • Eligible for up to $26,667 in additional Stafford loan (HPPA Level 2; applies to CIP Codes 51.0401; 51.1201; 51.1701; 51.1901; 51.2101; 51.2401; 51.33; 51.3303) Based on the CIP Code that is assigned to the Area of Study, Program Version or Program, the default value for the Health Professions option is set when a new Student Academic Year is created via new enrollment in CampusNexus Student or via the CampusLink API, or upon completing the academic year sequence on the Academic Year form. If you choose not to use CIP Codes, the value for this field can be manually selected on the Academic Year form. The maximum amounts are for 12-month academic years and will be prorated for 11-, 10- and 9-month years. Only graduate/professional grade level students are eligible for the higher amounts.

Field	Description
PLUS Credit Decision	This list is displayed only when the following conditions are satisfied: • Student Financial Aid Awarding is enabled (Daily > Automated Processes > Configuration > Process Activation) • Dependency Status of the student is dependent The PLUS Credit Decision box enables you to specify the credit decision status for PLUS loans for which the parents have applied. This enables a dependent student to replace the amount of a denied PLUS loan by borrowing additional unsubsidized loan amounts. You can select one of the following values: • A - Credit accepted • N - The credit decision has changed from Pending to Denied or Accepted • C - Credit overridden; new info provided • E - Credit overridden; endorser OK • D - Credit denied; endorser not OK • P - Pending The PLUS Credit Decision does not display a value, by default. A blank value indicates that a credit decision status has not been set. To clear a selected value, press the Delete key in the PLUS Credit Decision box. If a credit decision has been set and the award is packaged, the value in the PLUS Credit decision box is displayed in the Financial Aid Packaging form as a read-only field. To ensure direct PLUS loan disbursements are exported, you must ensure: The MPN Link Indicator is Y. AND The value selected in the Credit Decision Status field is A, E, or C.
Comments Tab	

Field	Description
Click the Comments tab to enter general Academic Year FA comments about the student's financial aid packaging. You can enter a maximum of 3,000 characters in this field. The Comments entered here are tracked by author, date, and time. The **Add** and **Edit** options are only available to authorized users.	



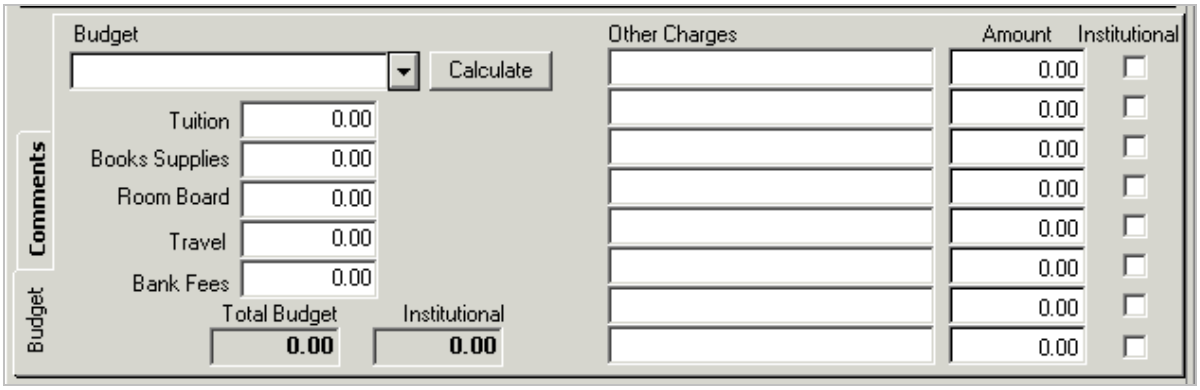
Budget Tab

Select the budget plan to be used in calculating the cost of attendance in this academic year from the list. Budget plans are set up under Lists > Financial Aid > Budgets. Budget information and changes for a student are captured and posted to the Financial Aid Audit folder along with the old and new values of the budget information, user's name and comments.

CampusNexus Student continues displaying a disabled budget's description on the Financial Aid Academic Year form as long as you do not try to view the list of available budgets.

If you activate the Budget list, the description field is cleared in preparation for a new selection. Since the list does not contain the disabled budget option, the budget description on the form remains blank. If you click **Save**, the previous description is no longer available. If you view the list of active budgets in the list, thus clearing the previous description, and then click **Cancel**, the previous description is restored.

Note: Even if the budget description is no longer available, the budget data that was previously selected is still a part of the student's FA record. **It is recommended that you disable budgets with extreme care**.



Field	Description
Calculate (button)	Click **Calculate** to calculate the total cost of attendance from the budget data entered on this form. If the program version is configured to Auto Recalculate Budgets based on Instructional Weeks (IW), a manual recalculation uses the values in the 'IW week's and 'IM in AY' fields.
Total Budget	This read-only field displays the amount of the budget components. It is the calculated total cost of attendance for this academic year.
Institutional (Amount)	This read-only field indicates the portion of the budget that is composed of institutional charges. Tuition is an example of an institutional charge. Travel is not an institutional charge (it is an allowance budgeted for FA packaging purposes). See the topic on FA Budget code setup for more about institutional charge definition.
Tuition	Enter the tuition for this academic year. This number usually comes from the budget you select for this academic year. If a fee schedule is entered for the student's enrollment, the default tuition is the Tuition value in the fee schedule. Set up a student's fee schedule under View > Academic Records > Fees.
Books and Supplies	Enter the books and supplies budget for this academic year. This number usually comes from the budget you select for this academic year. If a fee schedule is entered for the student's enrollment, the books and supplies default to the value in the fee schedule (if any). Set up a student's fee schedule under View > Academic Records > Fees.
Room and Board	Enter the estimated room and board expense for the student for this academic year. This number usually comes from the budget you select for this academic year.
Travel	Enter the estimated travel expense for the student for this academic year. This number usually comes from the budget you select for this academic year.
Bank Fees	The value for this field is determined as follows: • If the FaAddBankFee flag is set to "Prompt User", you are asked *"Add bank fee to COA?"* when a new loan is saved. If you answer Yes, and the bank fee is greater than zero, the fee is added to the Bank Fees field. • If the FaAddBankFee flag is set to Yes, CampusNexus Student always adds bank fees to the cost of attendance. • If the FaAddBankFee flag is set to No, there is no change to the previous loan procedures. Bank fees are not automatically added to the cost of attendance. You can manually edit the bank fees field.

Field	Description
Other Charges	Enter a description and an amount for up to eight additional budget items. These numbers usually come from the budget you select for this academic year. **Note**: The amount cannot be a negative number. If you enter a negative number, CampusNexus Student displays a message indicating that Other Charges must be equal or greater than zero.
Institutional (check boxes)	For each of the Other Charges, select or clear the Institutional check box. Institutional charges are charges that are required by, and paid directly to, the institution. They are counted as revenue for the institution.
Packaging Status	
If the campus has a Packaging Status Promotion Method defined, the form shows only packaging statuses where "Allow Manual Change" is selected. In conjunction with the Automatic Document Scheduler feature, document schedules based on "Enrollment" are evaluated when the FA Packaging Status for a student is modified and saved. If the student's data matches the specified criteria for a document schedule where the criteria includes FA packaging status, all documents attached to the document schedule that are not already scheduled are scheduled for the student. The Packaging Status for the student is captured and posted to the Financial Aid Audit Folder when selected or changed. Depending on when a student enrolls into a program, there are situations when a student could be submitting Financial Aid documents as it relates to both Award Year 1 and Award Year 2 simultaneously within one Academic Year. (crossover students). Institutions can track a student's progression for both Award Year 1 and Award Year 2 simultaneously. CampusNexus Student can have two separate award year packaging statuses for students progressing at the same time. When using the Packaging Status Promotion feature for crossover students, the Financial Aid advisor can easily determine the Packaging Status for both award years within the same academic year.	
Award Year 1 Packaging Status	Select a packaging status for this student. Packaging status options are set up under Lists > Financial Aid > Packaging Statuses.
Award Year 2 Packaging Status	If a student starts in the middle of an academic year, the financial aid packaging crosses over into Award Year 2. Select a packaging status for this student here. When you have chosen a year for Award Year 2, the Award Year 2 Packaging Status field is enabled and disabled as the year is removed.
Packaged to Status	The Packaged To Status field assist institutions with the evaluation of aid that needs to be adjusted. Packaged To Status options are 3/4 Time, Full Time, Half Time, and Less Than Half Time. CampusNexus Student evaluates the term by comparing the packaged Enrollment Status with the current Enrollment Status and identifies discrepancies.
Package Date	Enter the date when the student's financial aid package for this academic year was prepared.

Field	Description
Package Revised	Select this check box if the initial financial aid package for this academic year has been revised.
Enroll Status	A student's enrollment status after the add/drop period determines if a student is eligible to receive the federal aid that was packaged for the current term. If a student has registered for a course, but never attends that course, institutions may still charge the student for the course, but may need to reduce federal aid. **Note**: Use the Packaged Enrollment Status report to determine if an adjustment is needed for a student.
Award Notices	
The Truth in Lending Act in Title I of the Consumer Credit Protection Act requires clear disclosure of key terms of the lending arrangement and all costs. For institutions, these regulations do not apply to lenders of student loans. Truth in Lending information must be printed on Award Notices. For details, please refer to Packaging - Truth_in_Lending. The Award Letters may be printed in a Batch Mode at a later time by clicking on the **Queue** button. See Print Award Letters in a Batch Mode for additional information.	
Award Notice Printed	Enter the date on which the Award Notice for this academic year was printed.

Field	Description
Print (button)	Click **Print** to open Microsoft Word and print the summary award letter or the detailed award letter for this academic year. When you click Print, the bottom of the screen changes to display the **Select Award Letter** frame. Select an award letter. Click Print to print the selected letter. If you click the Print button and try to print an award letter that has already been queued, CampusNexus Student displays the message: *"An entry exists in the queue for this award letter. Remove the Queued Request upon printing?"*. When the form gathers its record set to load data, CampusNexus Student includes the Fa Award Letter value from SyRegistry. • If the value is false, there is no change in the previous procedures. • If the value is true, CampusNexus Student displays your list of award letter reports. You can then select the correct report file to edit, call Crystal Reports, and run the report for the selected file. If there is more than one award year letter, you are prompted to select which award year to print the report for. When printing of the award letter is completed, the "Award Notice Printed" date field is populated. **Award Letters**: A generic Award Letter is provided in Crystal Reports to be selected when an institution defines the award letter selection as a Crystal Report. A condition in Setup determines if the award letter selection is based on Academic Year or Award Year. This option indicates which variables to send to Crystal when formatting the award letter. If an institution is set up to use a Crystal report award letter by Academic Year, the "Select Award Letter" list includes all report files with the following naming convention: `lst_FaAwardLetterByAcadYear.rpt`.
Award Notice Signed	Enter the date on which the award letter was signed by the student. See also Print Queued Award Letters in Batch Mode.
Payment Periods (button)	Click this button to display the Payment Periods for Academic Year form. For more information, see Payment Periods.

6. Click the **Package** button. If everything is accurate and complete on this form, the student's FAFSA has been completed, and the EFC has been calculated, CampusNexus Student displays the Packaging form for this academic year.
7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Payment Periods

CampusNexus Student applies the following general rules that when creating payment periods:

- When initially creating academic years and payment periods, CampusNexus Student uses instructional weeks to determine the actual dates based on the weeks attribute.
- The Start Date for sequence 1 of a payment period sets the start date for the instructional weeks block for the enrollment.
- The initial payment period Start Date is aligned with the Program Version's Start Date.

Rules for subsequent payment period start dates:

CampusNexus Student sets the Start Date to the day after the prior payment period's End Date in either of the following cases:

- If the first course in the subsequent payment period starts before the end date of the prior payment period.

  - OR -

- If there are any credits or hours carried over from the prior payment period.

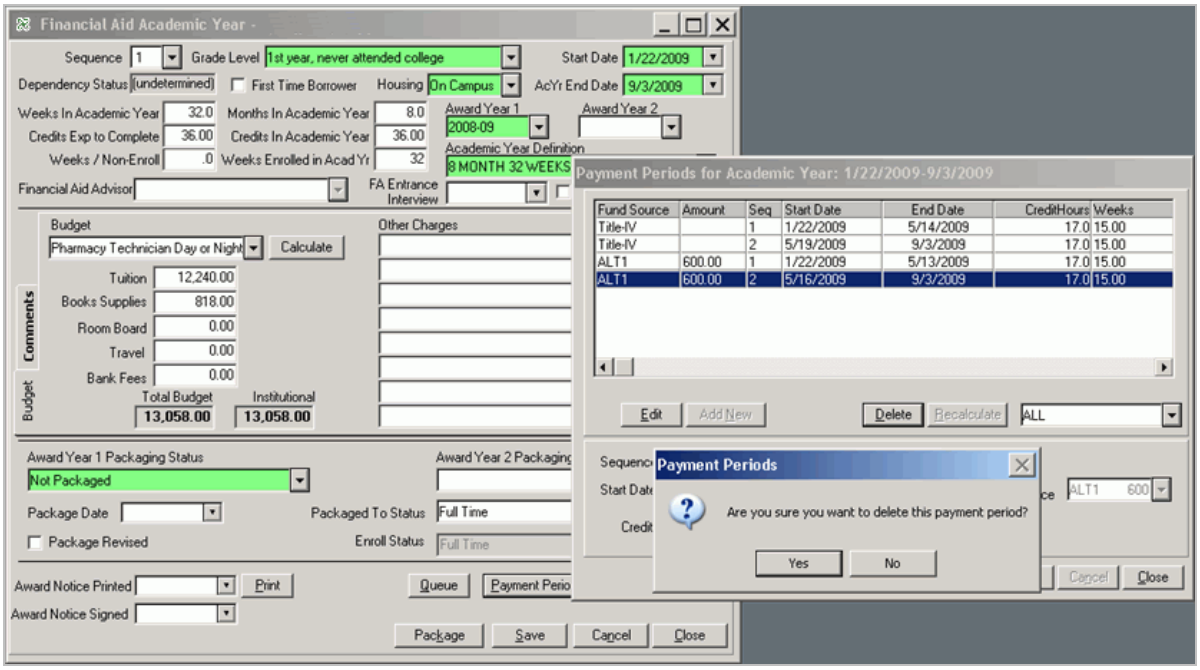
If these conditions are not met, CampusNexus Student sets the start date to the next course's start date.

Rules for payment period end dates:

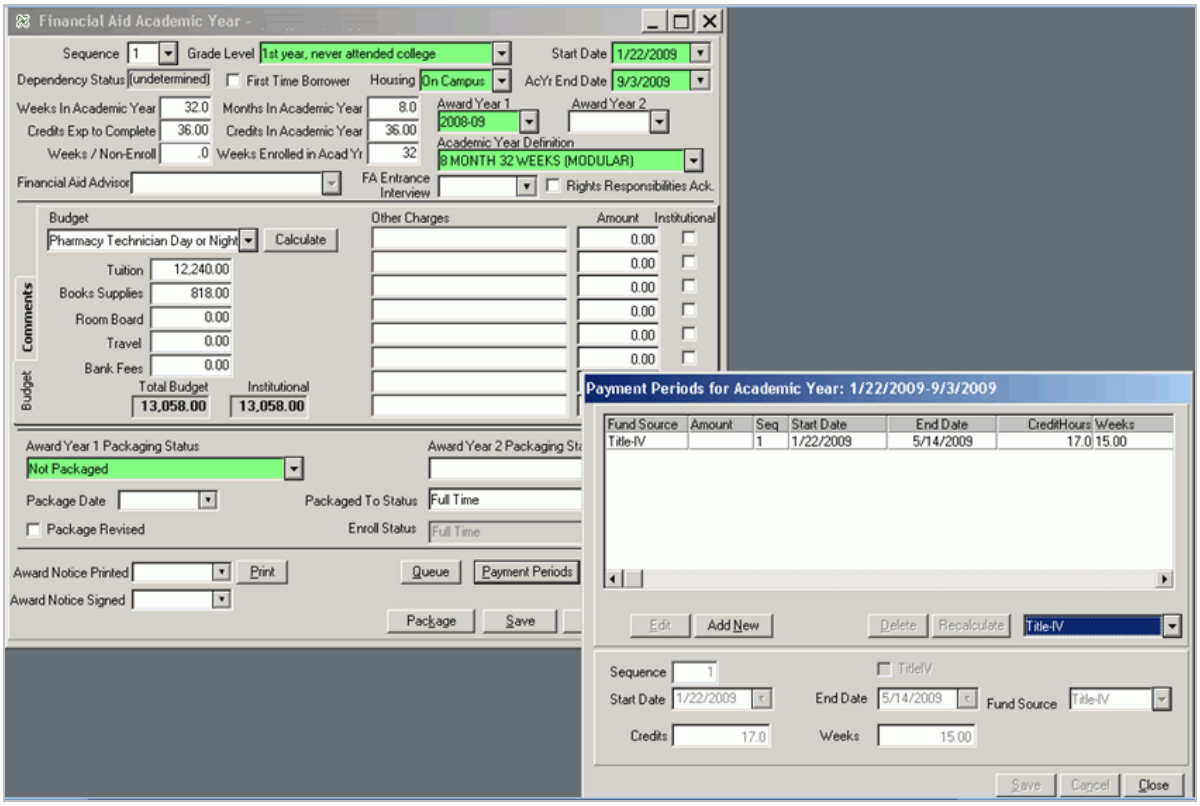
- The end dates are set to a point in time where both the "weeks" and "credits"/"hours" payment period attributes are satisfied.
- If the "weeks" attribute is satisfied prior to credits or hours, CampusNexus Student sets the payment period End Date to the end date of the course that completes the credits or hours requirement.
- If the "hours" or "credits" attribute is met prior to weeks, CampusNexus Student sets the End Date of the payment period to the end date of the instructional weeks block.

Note: A payment period can never end on a holiday configured in the Calendar setup in CampusNexus Student (**Lists > Academic Records > Calendar (tab)**). The End Date will always be the day after the holiday ends.

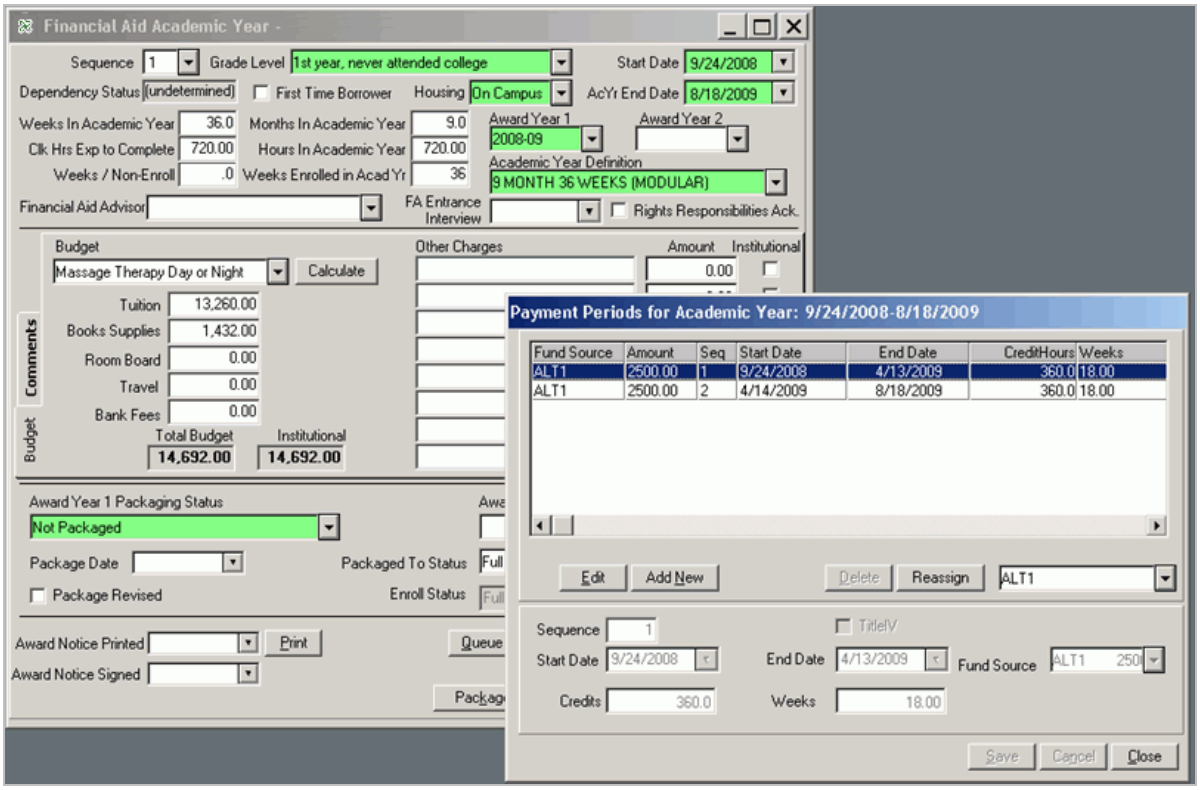
Delete payment periods in descending order to ensure that there is no gap in the sequence.



For Title IV payment periods, the "Add New" button is available only when a payment period was deleted and needs to be added back. This button adds missing payment periods. It is disabled if there is no missing payment period.

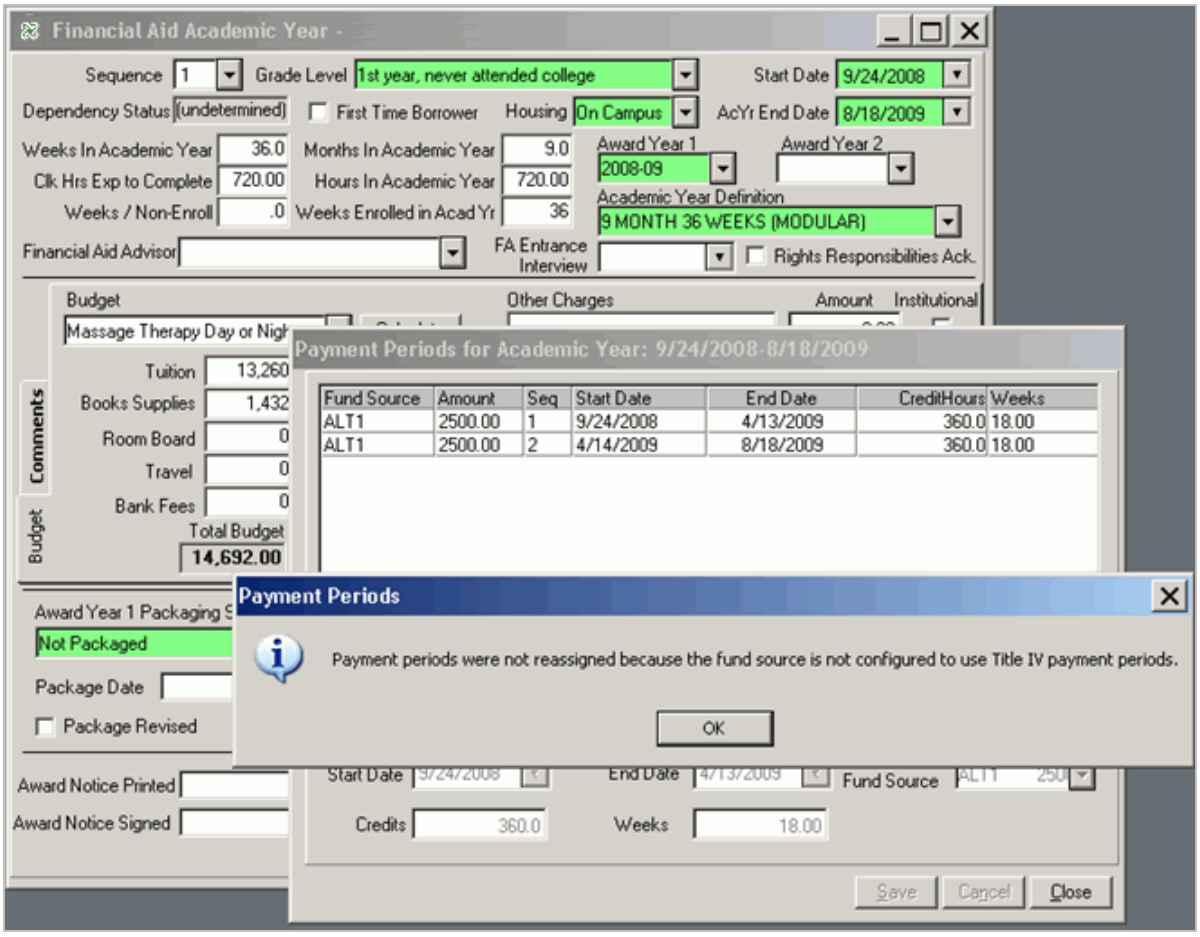


For Non-Title IV payment periods, the "Add New" button is available to add additional payment periods as needed.



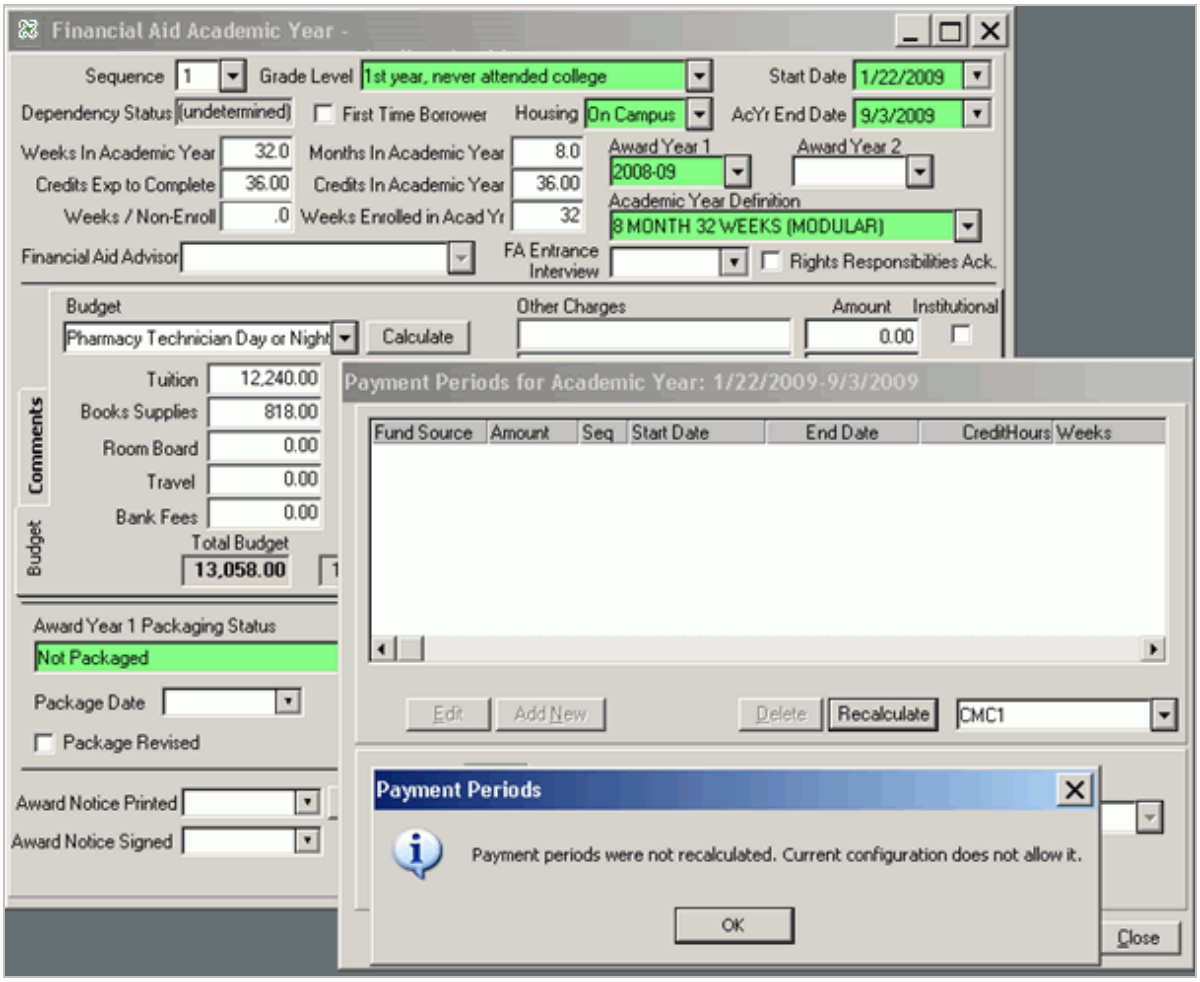
Reassign

The Reassign button enables you to reassign fund sources that are currently **not using** Title IV payment periods to **use** Title IV payment periods. Select a Non Title IV fund source and click Reassign. The fund source must first be reconfigured to use Title IV payment periods under Lists > Financial Aid > Programs > Select the program > Select Program Version > Non-Term Payment Period tab. If the fund source is not reconfigured to use Title IV payment periods, a warning message states *"Payment periods were not reassigned because the fund source is not configured to use Title IV payment periods*".



Recalculate

The Recalculate button enables you to recalculate payment periods for fund sources that are currently using **Title IV** payment periods to use **Non Title IV** payment periods. Select Title IV fund source and click Recalculate. The fund source must first be reconfigured to use Non Title IV payment periods under Lists > Financial Aid > Programs > Select the program > Select Program Version > Non-Term Payment Period tab. If the fund source is not reconfigured to use Non Title IV payment periods, a warning message states "*Payment periods were not recalculated. Current configuration does not allow it.*"



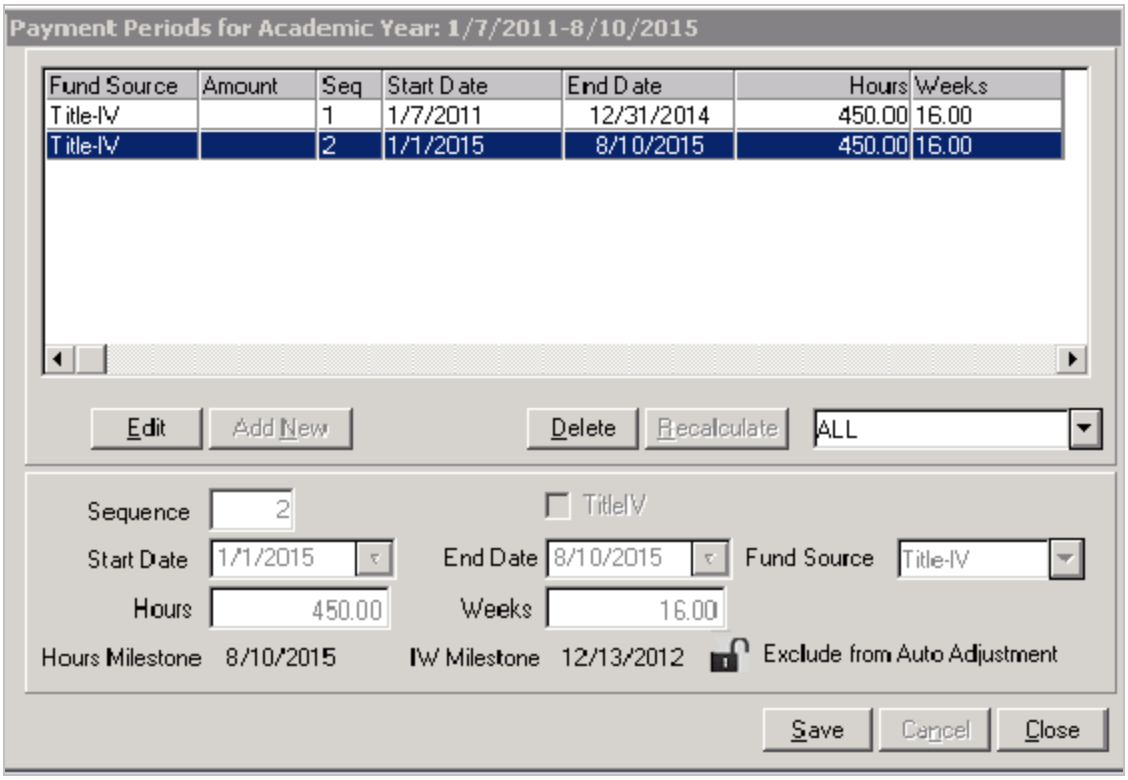
Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. . When saving, if you leave the Weeks Enrolled in AY set to zero (0), a warning message is displayed asking if you want to save the record with zero for Weeks Enrolled.

Payment Periods for Non-Term Institutions

Exclude from Auto Adjustment

The Exclude from Auto Adjustment option is enabled when you click Edit. This feature is available only if the Edit capability is selected in the configuration for that user's Staff Group and 'Allow Edit of Payment Periods' is selected on the Staff Member configuration . The Start Date and End Date fields are enabled when you click Edit. See your system administrator for further information regarding these configurations.

The Exclude from Auto Adjustment feature enables you to manually modify payment period start and end dates and not have the dates changed by the automated process for tracking student progress. This prevents the payment period dates selected and AY dates for that payment period from automatically adjusting.



Locking/Unlocking the Payment Periods

Clicking the lock/unlock icon next to the **Exclude from Auto Adjustment** label toggles the feature between the locked state and the unlocked state. When locked, the payment period is excluded from Auto Adjustment. When unlocked, the payment period is included in Auto Adjustment. Using this logic, one payment period can be excluded without excluding the other.

Note: When you try to unlock a payment period, CampusNexus Student checks whether any subsequent payment periods are locked. If subsequent payment periods are locked, the following message is displayed: *Subsequent Academic Years and Payment Periods are excluded from auto adjustments. If you want to include this academic year in auto adjustment, the system must also include all the subsequent Academic Years and Payment Periods in auto adjustment. Do you want to continue?*

- If you click **Yes**, all subsequent payment periods and academic years are unlocked.
- If you click **No**, there is no action and you are returned to the form.

When you click **Save**, the caption *"These payment period dates are now excluded from auto adjustment."* is displayed at the bottom of the Payment Periods form.

Notes: **Regarding Payment Period creation and Student Pace Evaluation (SPE) logic**
CampusNexus Student can create Payment Periods that extend past the end date of the Academic Year (AY) based on the system configuration for the length of the AY and using Term Sequencing for Non-Standard Term programs (Academic Calendar 1). See also Student Pace Evaluation.

IW (Instructional Weeks) Milestone and **Hours Milestone**
These labels and dates are populated based on the FaStudentAyPaymentPeriod table, which is calculated by the corresponding stored procedure.

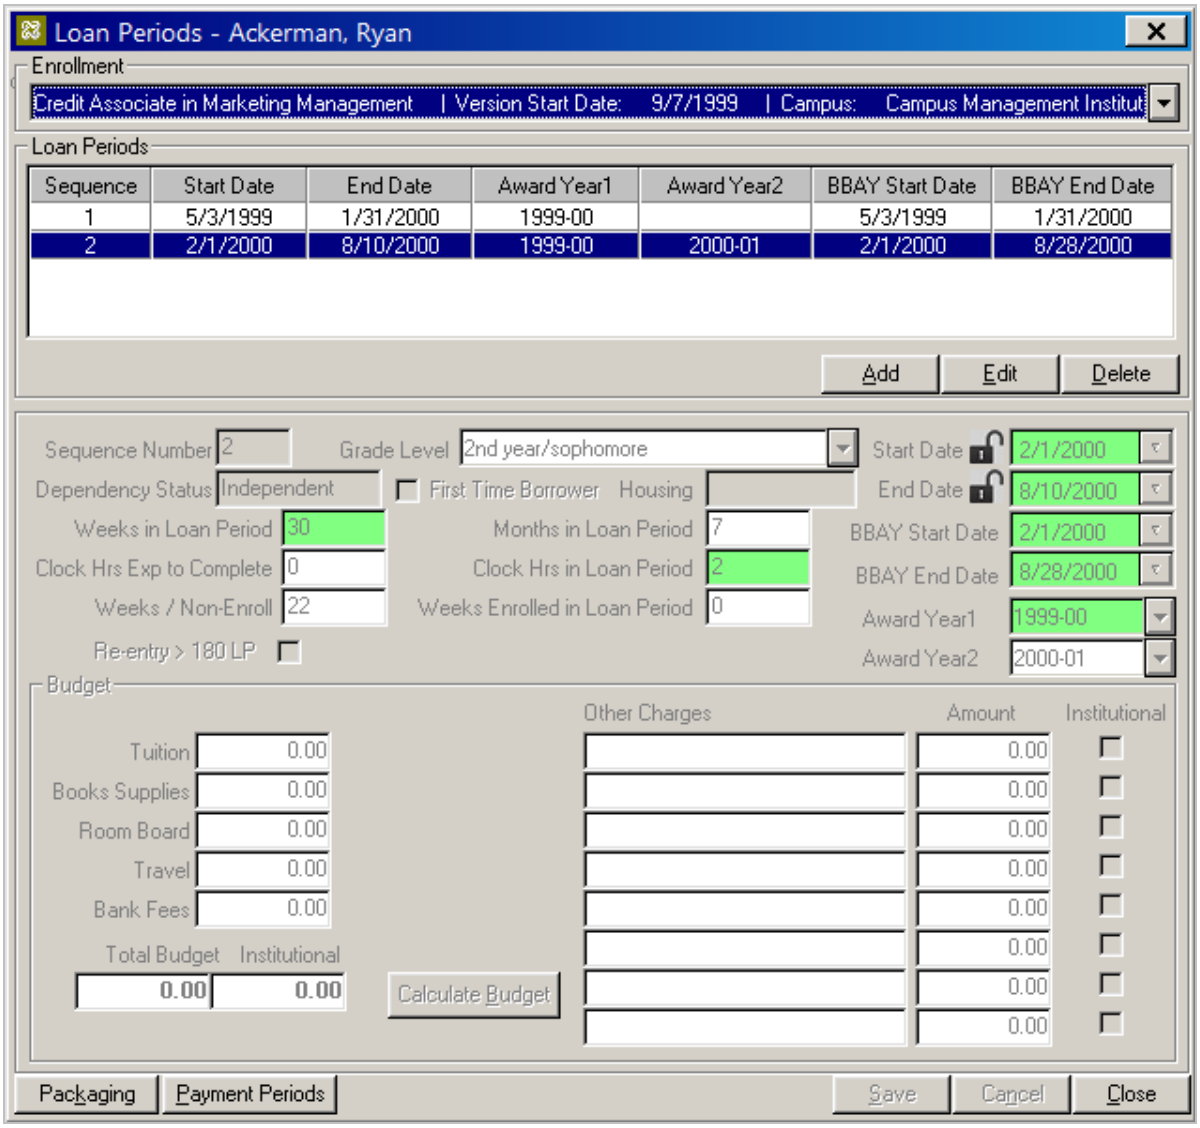
To set Field Level Security for the form:

Leave the Financial Aid Academic Year form displayed, and navigate to **Setup > Field Level Security**. Set the field level security for the fields in the form.

Loan Periods

The Loan Period menu options are available only when at least one of the student's enrollments is non-standard term (academic calender 1) and not SE9W, clock hour (academic calendar 5) or non-term (academic calendar 6) program.

1. Navigate to **View > Financial Aid > Loan Period** to view the Loan Periods form.



2. Select the **Enrollment** for the student. The following information is displayed for each enrollment:

   Enrollment Name | Version Start Date | Campus

   If there is no Version Start Date, the Expected Start Date is displayed. When there are multiple enrollments, the active enrollment is selected as the default enrollment when the form loads. If there is no active enrollment, the enrollment is selected based on hierarchy.

3. Select a record in the **Loan Periods Grid**. The grid lists all the loan periods that belong to the selected Enrollment.

When the form loads, the sequence number loaded first is the one containing today's date, which is between the start date and end date of the loan period. If a sequence number is not found, a future sequence number that is closest to today's date is selected. If there is no future sequence number, the last sequence number is selected.

4. Click **Add** to add a new loan period to the selected enrollment. The Add mode enables you to:

   - Add one record a time.
   - Complete the sequence of any missing loan periods.

   The Add mode locks the enrollment and loan period grid so that you remain on the selected record until you complete the action.

   If the campus of the selected enrollment uses Global as the financial aid servicer, no new loan periods can be added.

   Note: The Add button is enabled only when the selected enrollment is configured for academic calendar 5 or 6.

5. Select a loan period record and click **Edit** to change the loan period data.

   Note: The Edit button is enabled only when loan periods exist in the list and a loan period is selected. When the Edit mode is enabled, the Payment Periods, Packaging, Add, and Delete buttons are disabled until the action is saved or canceled. The Edit mode also locks the Enrollment and Loan Period grid so that you remain on the selected record until you complete the action.

6. Select a loan period record and click **Delete** to remove the record.

   If a loan exists for the selected record and you click Delete, the following message is displayed: *Direct loan exists for this loan period. Cannot delete*.

   When the loan period is deleted, any loan payment periods and their related audit records can be deleted after inserting an audit record of the loan period and the loan payment period.

   Note: The Delete button is enabled only when loan periods are loaded and one loan period is selected.

7. The **Sequence Number** is a read-only field that identifies the Loan Period Sequence number of the record selected in the Loan Periods grid.

8. The **Grade Level** identifies the grade level at which the student will be working in the selected loan period. By default, the loan period's grade level is populated with the grade level of the academic year in which the loan period starts. You can adjust the loan period's grade level by editing the loan period and selecting the appropriate grade level.

   A student must be assigned a 'graduate' grade level to qualify for a Graduate PLUS loan.

   Grade levels are defined under Lists > Academic Records > Grade Level.

9. The **Start Date** is the start date for the student in this loan period. The **End Date** is the loan period end date.

   For the first loan period,CampusNexus Student defaults to a date calculated from the student's enrollment date plus the number of weeks in the loan period. The end date of the student's second and succeeding loan periods are estimated using the number of weeks in a loan period and the number of weeks not enrolled. You can change the estimated date if necessary.

   Note: The Loan Period Start and End Dates can be modified independently of the BBAY Start and End Dates.

10. If you have permission to 'Exclude from Auto Adjustment' as configured on the Staff Information form, click the lock image to toggle between the Lock and Unlock states as follows:

Unlock: Allows this date to be adjusted by the Student Pace Evaluation (SPE) tool.

Lock : Excludes this date from Auto Adjustment.

If you try to unlock a loan period, CampusNexus Student checks if any subsequent loan periods are locked. If subsequent loan periods are locked or excluded, the following message is displayed: *Subsequent Loan Periods and Loan Payment Periods are excluded from auto adjustments. To include this Loan Period in auto adjustment, the system must also include all the subsequent Loan Periods and Loan Payment Periods in auto adjustment. Do you want to continue?*

Select **Yes** to unlock all subsequent loan payment periods and loan periods. Select **No** to take no action and return to the form.

11. The **Dependency Status** is a read-only field that indicates the FA model that is being used for the selected student; in other words, Dependent or Independent. This field is populated with the dependency status of the Academic Year in which the loan period starts.
12. Select the **First Time Borrower** check box if the student is a first time borrower and you want to delay the first loan disbursement by the number of days entered in Financial Aid Settings. This check box inherits its value from the academic year in which the loan period starts.
13. **Housing**: Select from **On Campus**, **Off Campus**, or **With Parents**. This field inherits its value from the academic year in which the loan period starts. For more details on the Housing Status, please refer to Budgets Codes-Financial Aid Housing Status.
14. The **Weeks in Loan Period** field indicates the number of weeks the student should attend for the selected loan period sequence. Any sequence prior to the final sequence should be set using the weeks defined for a full loan period.

    In a non-term configuration, the weeks in a final loan period can change from the definition configured on the program version based on student need. When student need changes, the weeks of the final loan period are prorated based on the number of credits needed in the final loan period and a ratio of credits to weeks from the definition of a full loan period.

    Example

    > If a student needs 14 credits in the final LP, and the definition of a full LP is 24 credits/30 weeks, CampusNexus Student calculates the following:
    >
    > 30/24 * 14 = 17.5 (rounded up to 18 weeks)

    When you edit this field for a program version configured to use Academic Calendar 5 or 6, CampusNexus Student displays the attribute warning message. The message warns you if you try to manually edit and save values that would not match the values the system determines are needed.
15. The **Months in Loan Period** field indicates the number of months in the loan period.
16. The **BBAY Start Date** field indicates the Borrower Based Academic Year (BBAY) start date. The **BBAY End Date** indicates the Borrower Based Academic Year (BBAY) end date.

You can change these dates independently of the Loan Period Start and End Dates. The BBAY Start and End Dates represent a full Academic Year. When origination changes are pending, the data in these fields is red.

Note: For overlapping loans, the BBAY Start Date can be one of two values based on the following rules:

- If the Previous Institution AY Weeks is greater than or equal to 30 (minimum full year definition), the BBAY Start Date is calculated as:
  `Previous Institution Loan Start Date`
- If the Previous Institution AY Week is less than 30 (minimum full year definition), the BBAY Start Date is calculated as:
  `(BBAY End Date – Previous Institution AY weeks) + 1 day`

  The overlapping loan BBAY End Date is always the Previous Institution Loan AY End Date.

17. For clock hour enrollments (academic calendar 5) the **Clock Hrs Exp to Complete** field indicates the number of clock hours the student is expected to complete in this loan period.

    For non-term enrollments (academic calendar 6) the field is labeled **Credits Exp to Complete** and indicates the number of credits the student is expected to complete in this loan period.

18. For clock hour enrollments (academic calendar 5) the **Clock Hrs in Loan Period** field indicates the number of clock hours in this loan period.

    For non-term enrollments (academic calendar 6) the field is labeled **Credits in Loan Period** and indicates the number of credits in this loan period.

19. The **Weeks/Non Enroll** field indicates the number of weeks in the loan period that the student is not expected to be in attendance.

20. The **Weeks Enrolled in Loan Period** field indicates the number of weeks for which the student is enrolled in the loan period.

21. In the **Award Year 1** field, select the first award year in this loan period. By default, this field inherits its value from the academic year in which the loan period starts.

22. The **Re-entry > 180 LP** flag is used by the Student Pace Evaluation (SPE) tool in non-term configurations when students are re-entered after they have been out of school for more than 180 days. When the Re-entry button is clicked on the enrollment form, CampusNexus Student checks to determine if the re-entry date selected is more than 180 days from the NSLDS withdrawal date. If it is greater than 180 days, the system will find the first available LP sequence without financial aid (Estimated or Approved) and set its Start Date to the Re-entry Date. The system will then select the Re-entry > 180 LP check box, which will be used as the starting point for the SPE tool to monitor the student's progress through the remaining time in the program.

23. In the **Award Year 2** field select the second award year in this loan period.

24. The **Budget** section displays costs for Tuition, Book Supplies, Room Board, Travel, Bank Fees, Other Charges, and Amount. These amounts are automatically calculated when loan periods are created. Loan period budgets are calculated based on the calculated budget of the academic years.

    - **Tuition**: Refers to the tuition for this loan period.
    - **Book Supplies**: Refers to the books and supplies budget for this loan period.
    - **Room Board**: Refers to the estimated room and board expense for the student for this loan period.
    - **Travel**: Refers to the estimated travel expense for the student for this loan period.

- **Bank Fees**: If the Financial Aid Add Bank Fee flag is set to 'Prompt User', the program will ask, 'Add bank fee to COA?' when a new loan is saved. If you answer 'Yes', and the bank fee is greater than zero, the fee will be added to the Bank Fees field. If the Financial Aid Add Bank Fee flag is set to 'Yes', the program will always add bank fees to the cost of attendance. If the Financial Aid Add Bank Fee flag is set to 'No', there is no change to the previous loan procedures. Bank fees are not automatically added to the cost of attendance. You can, however, manually edit the Bank Fees field.
- **Other Charges and Amount**: Enter a description and an amount for up to eight additional budget items. These numbers usually come from the budget you select for this loan period. The amount cannot be a negative number. If you enter a negative number, the system displays a message indicating that Other Charges must be equal or greater than zero.
- **Institutional** (check boxes): For each of the eight Other Charges, check or clear the Institutional box. Institutional charges are those that are required by, and paid directly to, the school. They are counted as revenue for the school.
- **Total Budget**: This read-only amount appears below the budget components. It is the calculated total cost of attendance for this loan period.
- **Institutional**: This read-only field indicates the portion of the budget that is composed of institutional charges.

Click **Calculate Budget** to calculate the total cost of the loan period from academic year budget data. If the program version is configured to Auto Recalculate Budgets based on Instructional Weeks (IW), the manual recalculation uses the values in the 'IW week's and 'IM in LP' fields.

25. Click **Packaging** to access the Loan Period packaging form for the selected loan period.

    Note: The Packaging button is not available in Edit and Add modes.

26. Click **Payment Periods** to access the Loan Payment Periods form (see below) for the loan period selected.

    Note: The Payment Periods button is not available in Edit and Add modes.

27. Click **Save** to save the current record after data validation occurs. If the validation fails, an error message is displayed stating why the validation failed and asking if you want to continue.

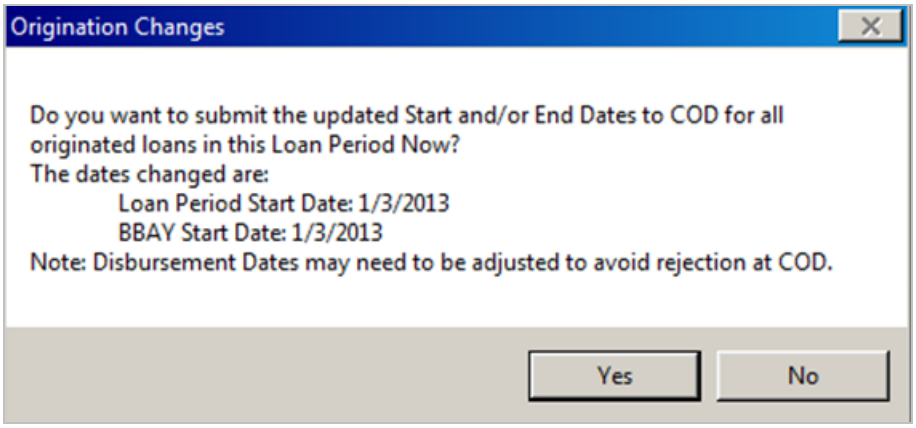
    Error Messages include the following:

    - End date must be after start date.
    - Loan period end date is after the graduation date. Do you want to continue?
    - Loan Period start date must be within an Academic Year date range.
    - Loan Period start/end date overlap another loan period. Do you want to continue?
    - Weeks and credits/hours in all loan periods must be less than or equal to weeks and credits/hours in all Academic Years.
    - Hours in Loan Period is greater than full Academic Year definition. Do you want to continue?
    - Weeks in Loan Period is greater than full Academic Year. Do you want to continue?
    - Field must be numeric.
    - Weeks in Loan Period must be less than 1000.

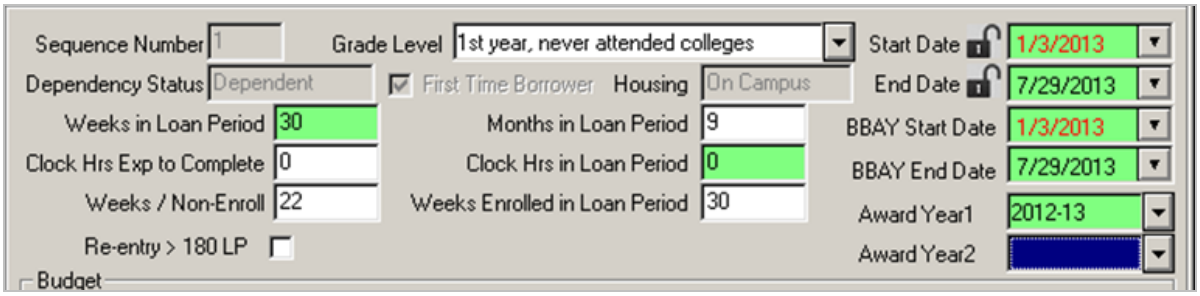
    Note: The Save button is enabled when you are in Add or Edit mode only.

Prompting for Origination Changes

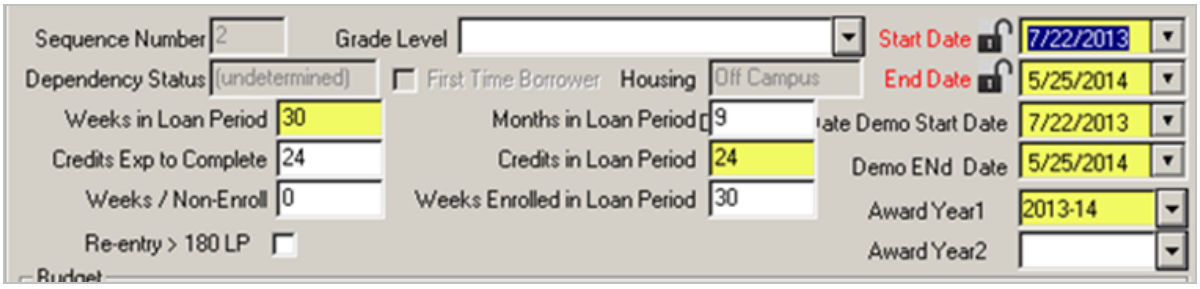
When any of the four date fields are modified, an Origination Changes message is displayed that dynamically lists which fields are changed, if the Loan Period on which the change is being made has a Direct Loan in an Accepted or Batched to Send status.



If the user selects 'Yes' to this message, then an origination change is created. This will send a change for each loan associated with the changed loan period that is in an Accepted or Batched to Send status. When the origination change is made, the field(s) with the corresponding pending change becomes highlighted in RED as a visual queue to the user. These will remain in Red until the origination change has been exported.



Once the Origination change has been exported, then the Caption of the fields will turn red until the response file is imported.



If the user selects 'No' to this message, no origination changes will be created for any of the loans.

Cancel Button: Enabled only in Add and Edit mode. When Cancel is clicked it rolls back all changes made to the loan period details, and it reloads the loan period selected.

Close Button: Always available. When the Close button is clicked in Add or Edit mode, the form closes and a confirmation message displays warning that all changes will be lost. In other modes, the form will close without a confirmation message appearing.

Loan Payment Period

Navigate to **View > Financial Aid > Loan Period > Payment Periods** (button). The Payment Period for Loan Period form is displayed. When initially creating loan periods and payment periods, CampusNexus Student uses instructional weeks to determine the actual dates based on the weeks attribute.

The Start Date for Sequence 1 of a payment period sets the start date for the instructional weeks block for the enrollment. The initial payment period Start Date is aligned with the Program Version's Start Date.

For subsequent payment period start dates, CampusNexus Student sets the Start Date to the day after the prior payment period's End Date in either of the following cases:

- If the first course in the subsequent payment period starts before the end date of the prior payment period

  - OR -

- If there are any credits or hours carried over from the prior payment period.

If these conditions are not met, CampusNexus Student sets the start date to the next course's start date.

Note: 'Hours' appears for Clock hour programs, and for all others, 'Credits' appears.

For payment period end dates, the end dates are set to a point in time where both the weeks and credits/hours payment period attributes are satisfied.

- If the weeks attribute is satisfied prior to credits or hours, CampusNexus Student sets the payment period End Date to the end date of the course that completes the credits or hours requirement.
- If the hours or credits attribute is met prior to weeks, CampusNexus Student sets the End Date of the payment period to the end date of the instructional weeks block.

Credits in Loan Period

Enter the number of credits in the loan period (LP).

This field represents the number of credits that the student should attend for the specific LP sequence that is selected. Any sequence prior to the final should be set using the credits defined for a full LP.

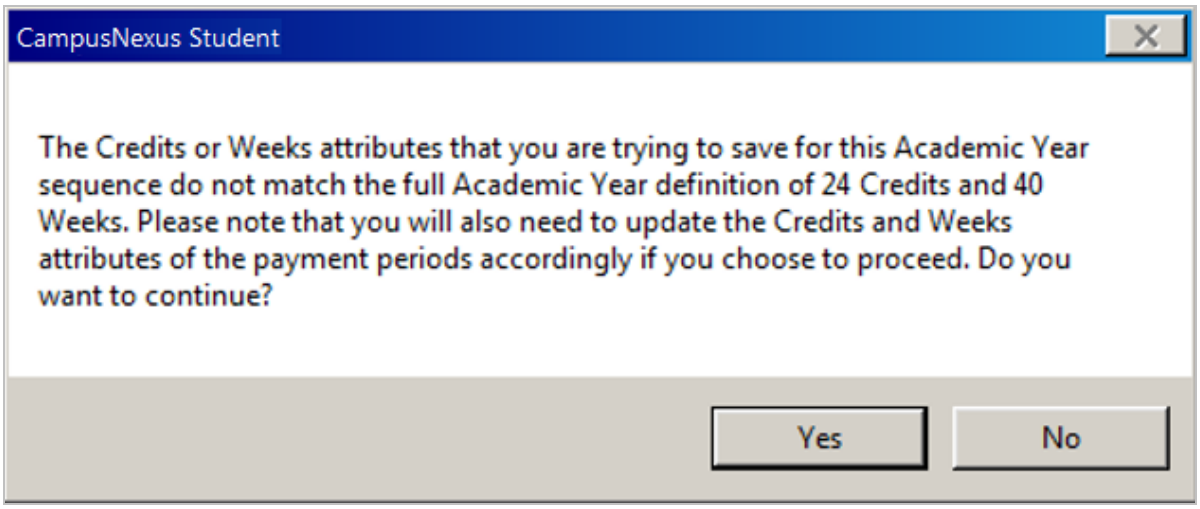
In a non-term configuration, the credits in a final LP can change from the definition configured on the program version based on student need.

Example

> A student transfers 10 credits. The credit transfer reduces the amount of credits needed to complete the program version requirements. The final LP credits are reduced by 10.

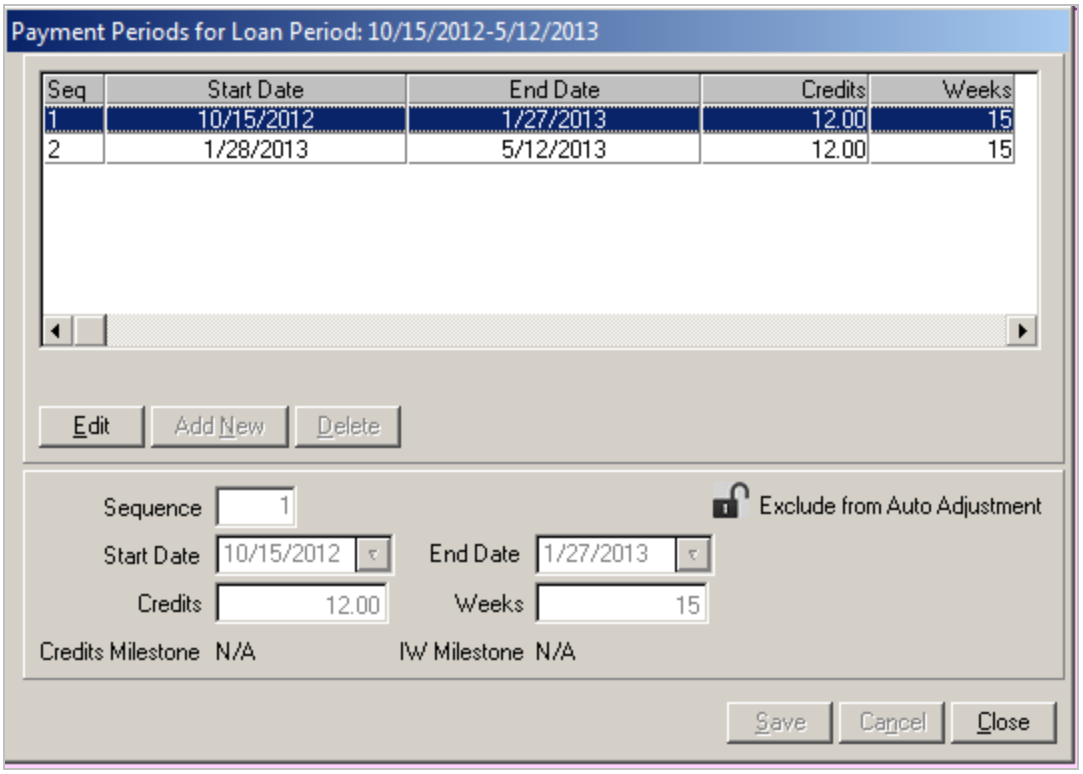
When you edit this field for a program version configured to use Academic Calendar 5 or 6, the system displays the attribute warning message. The message warns you if you try to manually edit and save values that would not match the values the system determines are needed. The system is able to calculate the value of the "Credits in Loan Period" field for the final LP based on the remaining credits needed.

Attribute warning message



Weeks/Non Enroll

Note: A payment period can never end on a holiday configured in the Calendar setup in CampusNexus Student (Lists > Academic Records > Calendar tab). The End Date will always be the day after the holiday ends.



Title IV Eligibility

Payment periods that the student will not attend are flagged to indicate that the student is not eligible for TIV funds during that payment period since the student will be unable to establish eligibility for TIV funds.

The 'notEligibleforT4' flag is set to 1 for the following scenarios:

- A final non-zero credit payment period occurs with a credits milestone that is the same as a prior payment period (i.e., the student registered enough credits to complete the program version in the payment period prior to the final payment period). Use cases are AY/LP having 1 or 2 payment periods. Disallow rolling credits is disabled to create this data pattern for a final AY/LP with a single payment period.
- A zero credit payment period can occur when the flag to allow adjustment to 0 is enabled. See Allow zero out extra AY/LP under Setup > Campus Information > Financial Aid (tab). Extra payment periods that are unneeded but cannot be removed due to constraints are updated to have 0 credits/hours.

When the flag is set to 1, the Payment Period for Academic Year form displays the message: *"The system has calculated that the student will complete the program prior to this payment period. The student is not eligible for the TIV funds associated to this payment period."*

You can configure an alert for a staff member when a payment period is flagged non-eligible for Title IV funds. For more information, see TIV Eligibility Alert under Setup > Campus Information > Financial Aid (tab).

Edit Button: Edits an existing payment period with all existing validations; an audit record is created.

Add New Button: Adds an existing payment period with all existing validations; an audit record is created. The Add New button is available only when a payment period was deleted and it needs to be added back. In other words, this button adds missing payment periods. It is disabled if there is no missing payment period.

Delete Button: Enabled only if the loan payment period is the latest sequence. Be sure to delete payment periods in descending order to ensure that there is no gap in the sequence.

Save Button: Saves all records to the appropriate table with all validations.

Cancel Button: Rolls back changes made in Add and Edit modes.

Close Button: Closes the form.

Exclude from Auto Adjustment: This option will be enabled when you click the Edit button. However, this feature will only be available if you have Edit capability defined in the configuration for that user's Staff Group, and the 'Allow Edit of Payment Periods' option selected on the Staff Member configuration. The Start Date and End Date fields will be enabled when you click the Edit button. Please see your system administrator for further information regarding these configurations.

The Exclude from Auto Adjustment feature gives you the ability to manually modify both payment period start and end dates and not have the dates changed by the automated process for tracking student progress. Note that this will prevent the payment period dates selected and academic year dates for that payment period from automatically adjusting.

You will also notice the caption 'These payment period dates are now excluded from auto adjustment' printed on the bottom of the Payment Periods form. This will appear once you click the Save button.

IW weeks and **IM in LP**

IW weeks and IM in LP are conditional fields that become enabled when the program version is configured to "Auto recalculate budgets" (see Lists > Financial Aid > Programs > Program Version).

- **IW weeks**

  This field which represents the number of instructional weeks (IW) that occur within the date range of the loan period (LP) dates. The field is populated/updated by a system calculation if "Auto Recalculate Budgets" is enabled for the program version.

  The field is used by the system to calculate the IW months value for the LP sequence. The minimum value of the field should never be less than the "Weeks in LP" field, however, it could be calculated to a value that is greater for certain course registration patterns. The number of IW could differ from the calendar weeks of the same time frame.

  If projection is used to calculate the week milestone and the credits milestone is the same date, the value should not be greater than the "Weeks in LP" value.

- **IM in LP**

  This field represents the number of instructional months (IM) that occur between the dates of the loan period (LP). This field is populated by a system calculation that divides the value of the "IW in LP" field by 4.333. If the resulting value contains a decimal of .5 or higher, the months are rounded up, else the months are rounded down.

  The "IW Months" value is used in budget calculations when "Auto recalculate budgets" is selected for the program version. (A similar field is contained on the Loan Period form and used for calculations on that form).

Locking/Unlocking the Payment Periods

Clicking the lock/unlock icon next to the Exclude from Auto Adjustment label toggles the feature between the locked state and the unlocked state. When locked, the payment period is excluded from Auto Adjustment. When unlocked, the payment period is included in Auto Adjustment. Using this logic, one payment period can be excluded without excluding the other.

Note: When a user attempts to unlock a payment period, a check is performed to determine whether any subsequent payment periods are locked. If subsequent payment periods are locked, the following message is displayed:

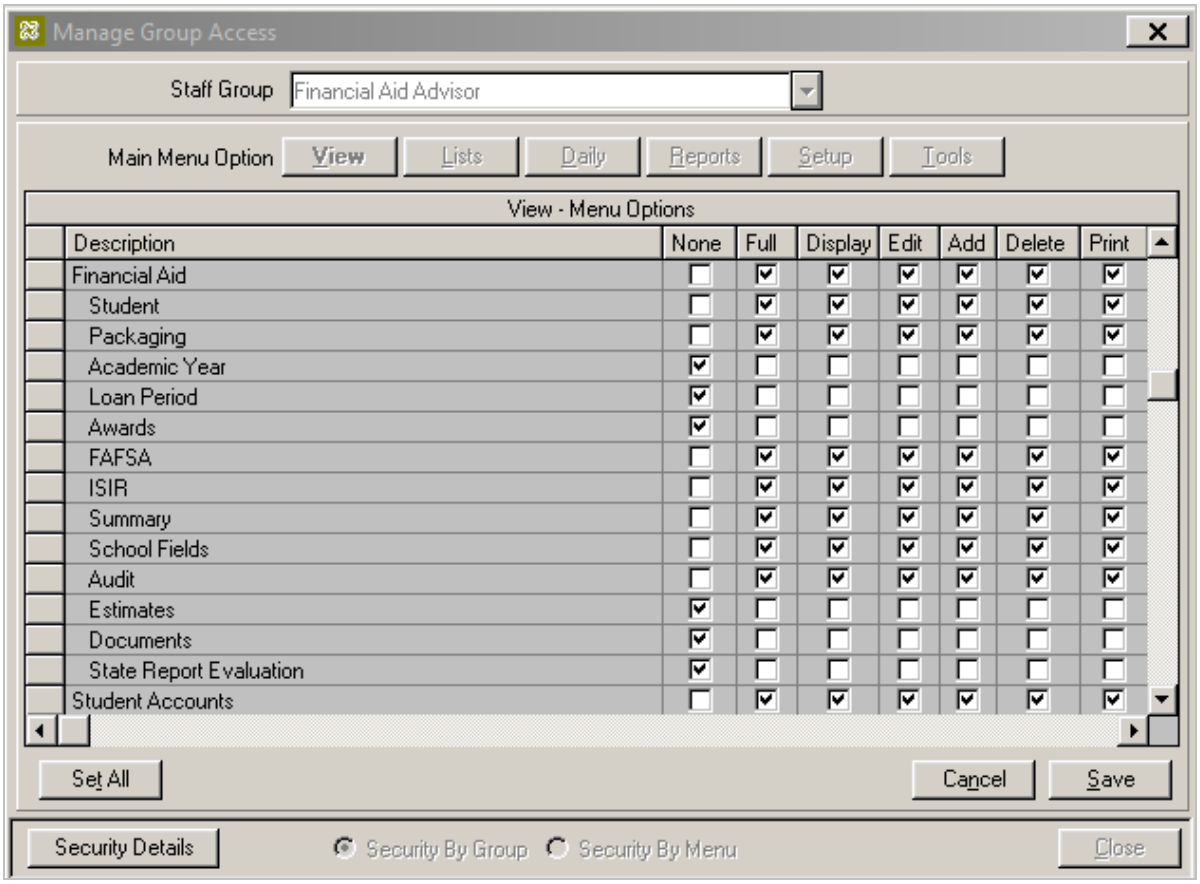
'Subsequent Loan Periods and Payment Periods are excluded from auto adjustments. To include this loan period in auto adjustment, the system must also include all the subsequent Loan Periods and Payment Periods in auto adjustment. Do you want to continue?'

If the user clicks Yes, all subsequent payment periods and loan periods are unlocked. If the user clicks No, there is no action and the user returns to the form.

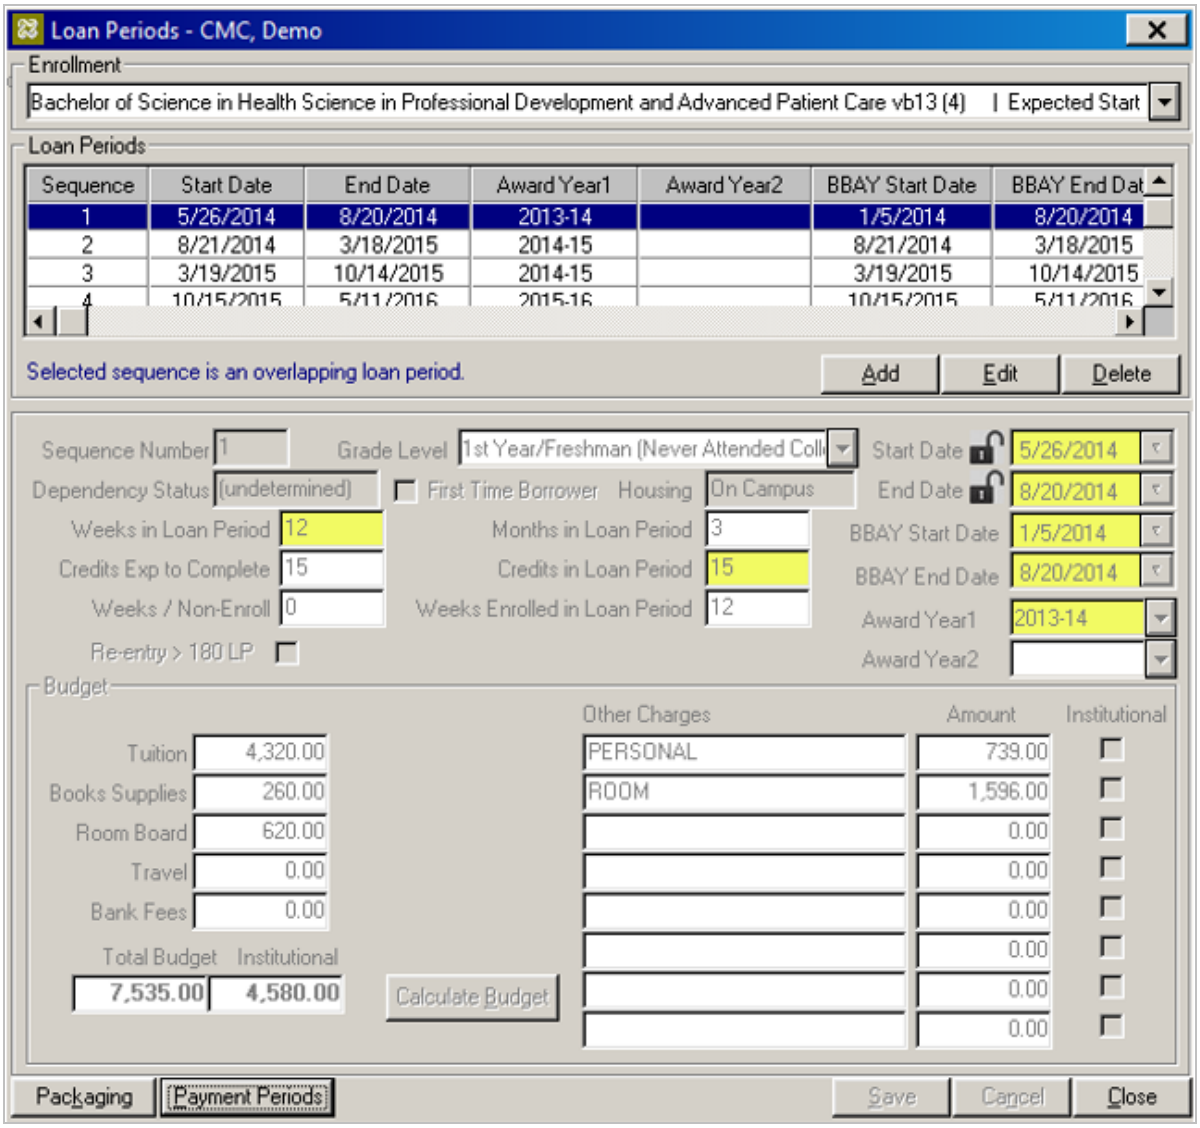
Note: When you click Save, the caption 'These payment period dates are now excluded from auto adjustment' appears at the bottom of the Payment Periods form.

Security

The security access for the Loan Period for all Groups is the same as that defined for Academic Year for all Groups (Setup > Security > Staff Group (Financial Aid Advisor)).



Overlapping Loan Periods



If the selected loan period is an overlapping loan period (stub loan period), a message on the Loan Periods form indicates that the selected LP sequence is an overlapping loan period.

The date range of overlapping is static, which means they won't be updated by the SPE (Student Pace Evaluation). Therefore, the payment periods for the overlapping loan period are also static. If there are two LPPs in the overlapping loan period, the first LPP represents the first half of the loan period and the second loan period represents the second half of the loan period.

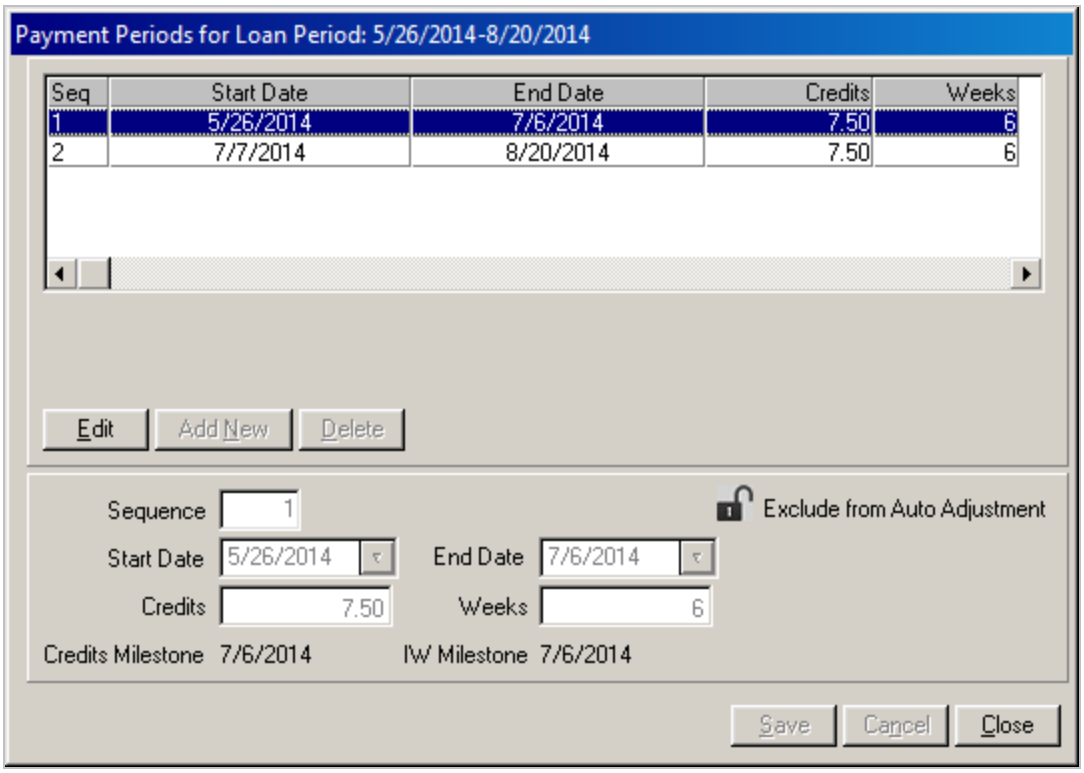
Since CampusNexus Student uses the stub units in the NSLDS form as the credits/hours requirements to create the overlapping loan period and leverage these same units to set the Scheduled Complete / Completed flag for the overlapping loan period, changes to the credits/hours or weeks attributes of the overlapping loan period should be done through the NSLDS form. No action is triggered when you change the credits/hours and weeks attributes of the stub loan period on the Loan Periods form.

- If the stub loan period is not completed and you change the credits/hours or weeks on the stub loan period through the loan period, the following message is displayed: "*In order to maintain data consistency and ensure progress of all loan periods are reevaluated properly, manual changes to the credits/hours of the overlapping loan period should only be made through the student's NSLDS form. Do you want to continue save the changes without reevaluating progress of all loan periods?*" Click **Yes** to save the new credits/hours attributes. Click **No** to cancel the change.

- If the stub loan period is completed and you change the credits/hours or weeks on the stub loan period through the loan period, the following message is displayed: "*Overlapping loan period has been completed. Changes to the credit credits/hours or weeks attributes of the loan period is not allowed.*" Click **OK**. The original values are restored.

Note regarding calculated dates for payment periods of a stub loan period:

The Credits Milestone date and IW Milestone date of LPP1 are set to the midpoint of the stub loan period and will remain unchanged. Also, the Credit Milestone date and IW milestone date of LPP2 are set to the end date of the stub loan period and will remain unchanged. The end date for each LPP is programmed to match its milestone date.



Awards

The Awards menu option (**View > Financial Aid > Awards**) is a shortcut to the Financial Aid Packaging form. The same form is accessed by navigating to **View > Financial Aid > Packaging > Academic Year > Package**. See Packaging for more details.

- If the student's academic year dates were calculated using the "weeks in academic year" value, but the "Use TermInAYDates" flag is enabled for the enrollment campus, the academic year start/end dates are displayed in red.
- If the dates are manually altered, the flag is reset and the dates are displayed in their normal font color. See also Academic Year and Fund Source.

SULA Flag on Awards Form

On July 6, 2012, Public Law 112-141 was enacted. This law contains a provision that eliminates the subsidy on Direct Subsidized Stafford Loans when a “first time borrower” enrollment exceeds 150% of the published program length.

For award years 2014-15 and higher, the Subsidized Usage Limit Applies (SULA) flag (where the valid values are Y or N) has been added to the COD system. Upon receipt of a Direct Loan actual disbursement with a first disbursement date on or after July 1, 2013, COD determines if the borrower meets the definition of a "first time borrower" to confirm that the 150% subsidy limit applies to the borrower.

When the SULA flag is set to Y, a SAR comment code 267 will appear if a first time borrower student is subject to the subsidized loan limitation. The message directs users to the studentaid.gov site. This flag is viewed for all academic years but is only populated for the current award year. When the ISIR is received and the SULA flag is associated with a comment code, document triggers associated with the comment code are activated. The SULA flag is also displayed in the Financial Aid Packaging form.

Student Centric Awards View

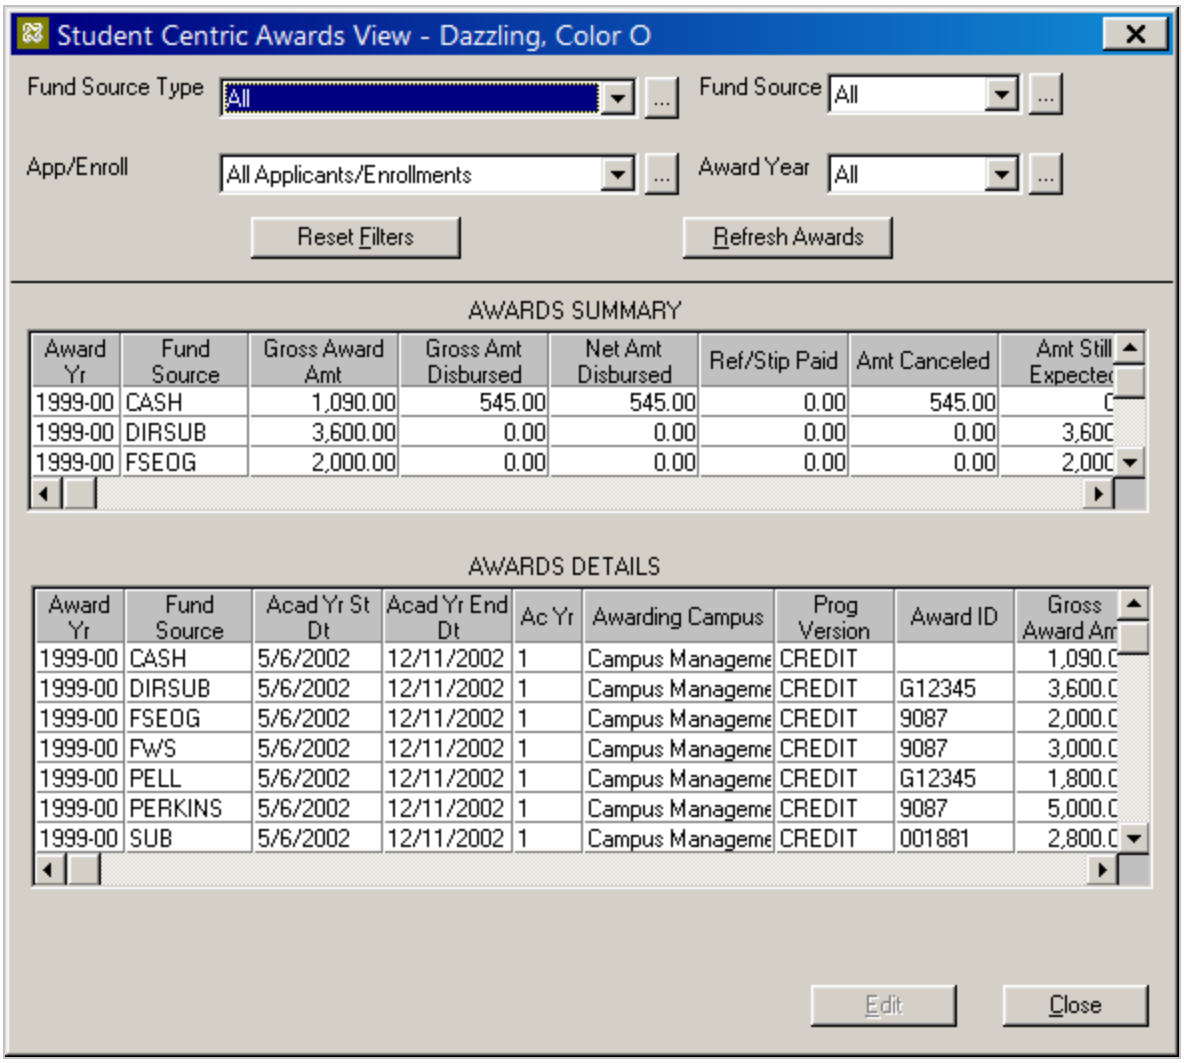
The Student Centric Awards View form displays all financial aid awards for a student and enables the user to filter records and edit awards.

To work with the Student Centric Awards View form:

1. Select a student.
2. Navigate to **View > Financial Aid >** Awards. The Financial Aid Packaging form is displayed.
3. Click **Student View** on the Financial Aid Packaging form.

   Note: The Student View button on the Financial Aid Packaging form is not available if no awards are allocated for any of the student's enrollments.

   The Student Centric Awards View form is displayed.



4. Filter the view by **Fund Source Type**, **Fund Source**, **Application/Enrollment**, and/or **Award Year**. Award Detail

and Summary information is displayed depending on the filter selection.

- The Award Summary contains the following fields:
    - Award Year
    - Fund Source
    - Gross Award Amt
    - Gross Amt Disbursed
    - Net Amt Disbursed
    - Refunded/Stipend Paid
    - Amt Canceled
    - Amt Still Expected.

  The Amt Still Expected equals the Gross Award Amt minus the Gross Amt Disbursed minus the Amt Canceled.

  Note: If (Gross Award Amt minus Amt Canceled) is greater than the maximum amount allowed by Pell, the Pell award record is displayed in bold RED.

- The Award Details section contains the Award Summary fields plus the following fields:
    - Academic Year Start Date
    - Academic Year End Date
    - Academic Year
    - Awarding Campus
    - Program Version
    - Award ID
    - Net Award Amt
    - Refunds/Stipends Scheduled

  Note: If the Academic Year Start Date for any Academic Year falls between the Start and End Dates for any other Academic Year displayed and the Fund Source types are the same, the following message is displayed in bold RED at the bottom of the screen: *"The Loan Periods are Overlapping for the Two Academic Years."*

5. Click **Refresh Awards**. The award records that match the filter selection are displayed.
   - OR -
   Click **Reset Filters**. All award records are displayed.
6. With appropriate permissions you can edit the award records. Select a record and click **Edit**. The financial aid form corresponding to the selected award record is displayed.

   Note: Work study awards cannot be edited.
7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Financial Aid Summary

The Financial Aid Summary option provides a display of summary information relating to the student's financial aid situation. Use the scroll bars to see more of the display. Right-click anywhere in the window to get a shortcut menu. From this menu, you can print the summary report.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

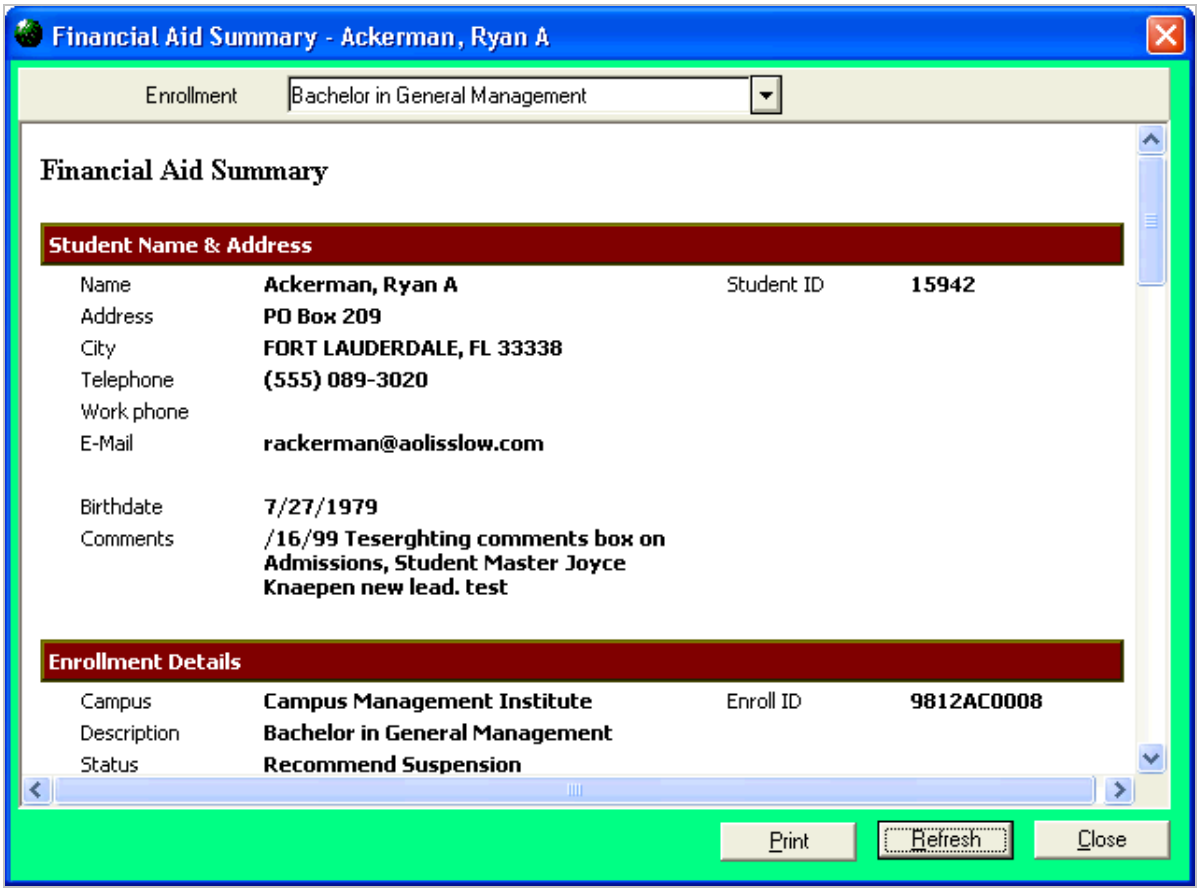
The FA Summary Report will show the comments from FaStudentAY.Comments for each Academic Year (AY) represented on the form. If Comments are present in the student's AY record, they will appear below "Net Funding Scheduled".

Sections of the report include:

- Student Name and Address
- Enrollment Details
- Academic Years

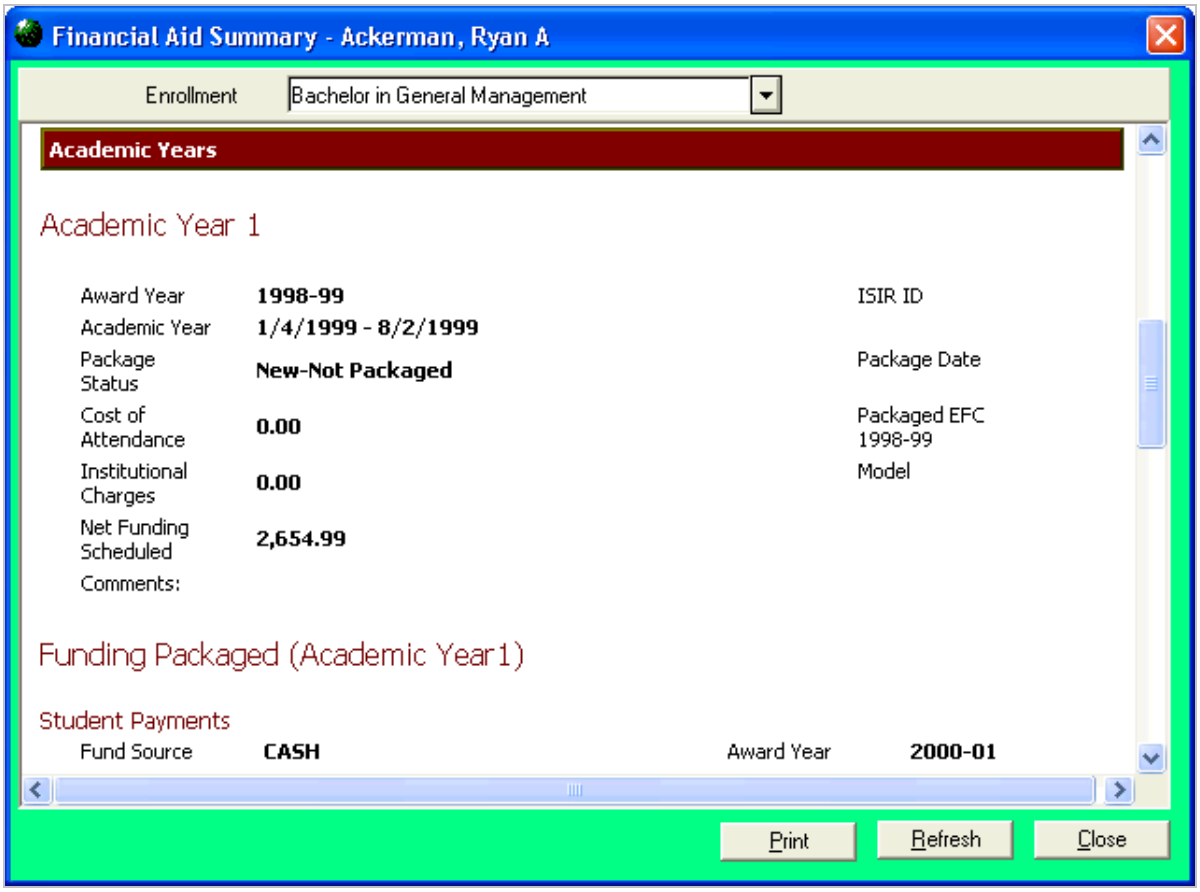
For each academic year, the report shows cost of attendance and funding data.

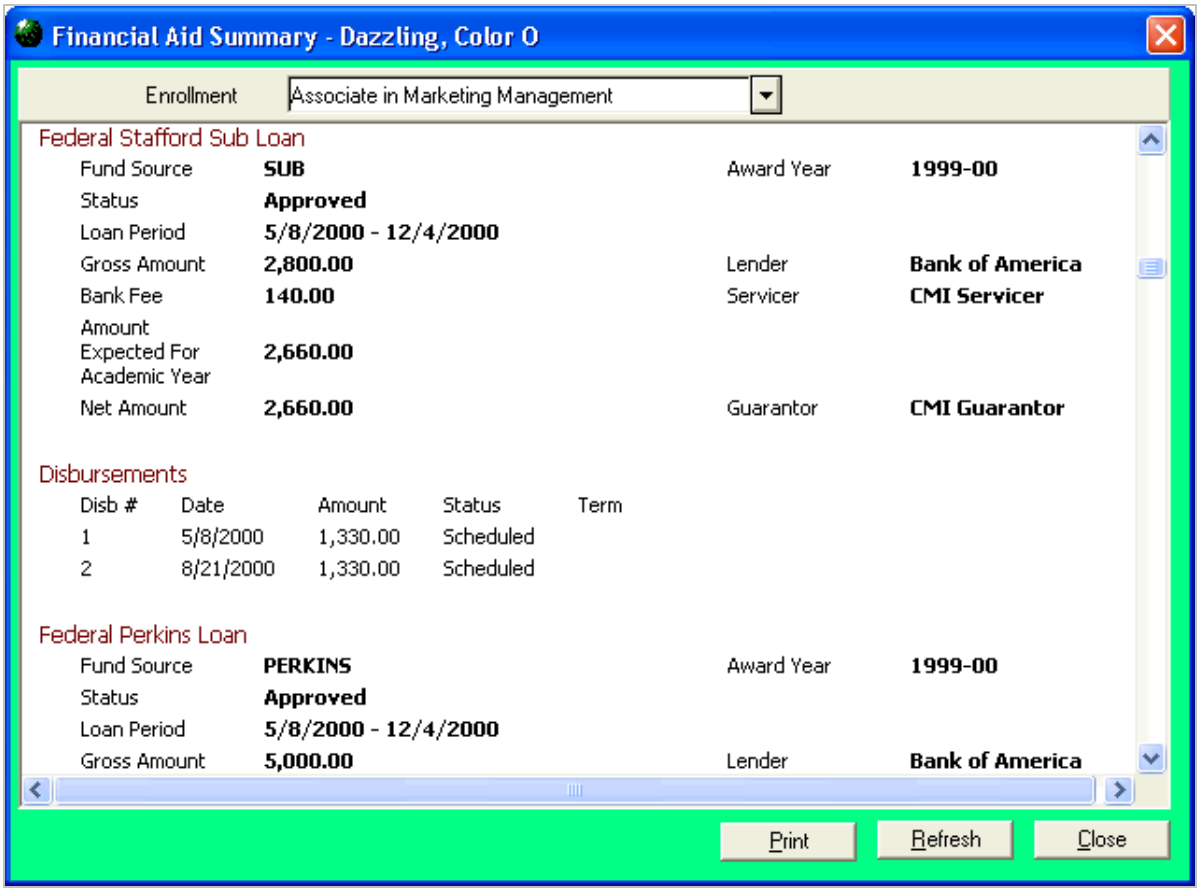
The student's Financial Aid Advisor is listed in the Enrollment Details section of the report.



This option lists a summary of all FA packaged for a student. It is sorted by academic year. Each academic year has heading information displayed.

- **Net Funding Scheduled**. The net funding scheduled is calculated by summing the Net Need Based Aid Packaged and the Cash/Other Packaged.
- **Award Year**. This is a new field on this report.
- **Packaged EFC**. The display lists the EFC from the Pell that was used in the packaging process.
- **ISIR ID**. This field displays the Student Pell Transaction ID.





Academic Year Details

Within each academic year is a detailed listing of each FA award/loan packaged.

Pell Grant

- Origination ID. This is a new field. It is listed in the header section of the Pell Grant.
- Amount. The caption of this field has been changed to "Award Amount".
- Amount Expected for Academic Year. This is a new field. It lists the amount expected for the academic year.
- Scheduled Disbursements. This section lists only the disbursements that apply to the academic year.
- Term. A "Term" column has been added for each scheduled disbursement.

Other Grants

- Amount. The caption of this field has been changed to "Award Amount".
- Amount Expected for Academic Year. This is a new field. It lists the amount expected for the academic year.
- Scheduled Disbursements. This section lists only the disbursements that apply to the academic year.
- Term. A "Term" column has been added for each scheduled disbursement.

Student Loan (not a Direct loan)

- Amount Expected for Academic Year. This new field lists the amount expected for the academic year.
- Scheduled Disbursements. This section lists only the disbursements that apply to the academic year.
- Term. A "Term" column has been added for each scheduled disbursement.

Direct Loan

- Amount Expected for Academic Year. This new field lists the amount expected for the academic year.
- Loan ID. This is a new field.
- Origination Status. This is a new field.
- Prom Note Status. This is a new field.
- Scheduled Disbursements. This section lists only the disbursements that apply to the academic year.
- Term. A "Term" column has been added for each scheduled disbursement.

Cash/Other Payments

- Amount. The caption of this field has been changed to "Amount Scheduled".
- Amount Expected for Academic Year. This new field lists the amount expected for the academic year.
- Scheduled Disbursements. This section lists only the disbursements that apply to the academic year.
- Term. A "Term" column has been added for each scheduled disbursement.

Print the Summary

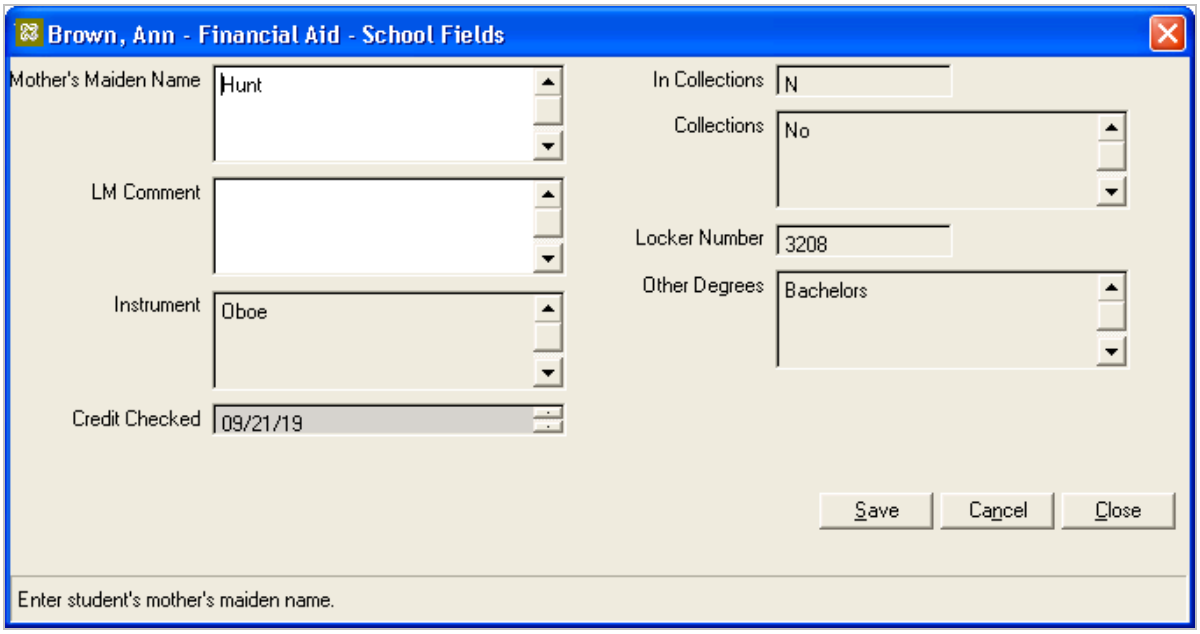
This display is in the form of an "HTML" page. **Right-click** the form to see a shortcut menu with **Print** and other options.

School Fields - Financial Aid

School-Defined Fields are set up by your system administrator to collect information that is not required by the generic CampusNexus Student application. (See Setup > School Defined Fields.) The fields are organized by department during setup. At least one department has the authority to change each field. Some fields may be viewed but not edited in your department. A field may be flagged as confidential by the originator, i.e., not viewable outside of the department that is using it. For instance, if a field can only be viewed or edited by the Financial Aid Department, it will only be visible when the form is opened from **View > Financial Aid > School Fields**. If you do not have access to that menu option, you will not see this field.

To view or edit school fields:

1. Select **View** > **Financial Aid** > **School Fields**. The School Fields form is displayed.



2. Click on or tab to a field that you want to change. Select an option or enter data to edit the field.

   The fields are displayed in edit mode (white background) if your department has been given permission to change the data. Fields that are unavailable are read only. Fields that are listed but are unavailable and show no data have yet to be filled in by the staff member responsible for doing so.

3. Click **Save** to save any changes you make to editable fields.

4. Click **Cancel** to close the form without saving any changes.

Financial Aid Audit

This form displays changes to financial aid awards in conjunction with the Servicer Integration. It enables users to track changes made by the data imports from servicers. In addition, the program tracks any changes to awards made by in-house users and changes in application processing status.

The fields on the grid include Property, Old Value, New Value, Date Changed, User Name, and Comments. The program includes variable data in the comments column to describe the recorded change further.

The system also tracks any changes to Academic Year (AY), Loan Periods (LP), and associated payment period credits or hours and weeks, as well date changes. Tracked changes include those made by automated AY/LP adjustments, automated budget recalculations, SPE user interface, and Automated SPE updates.

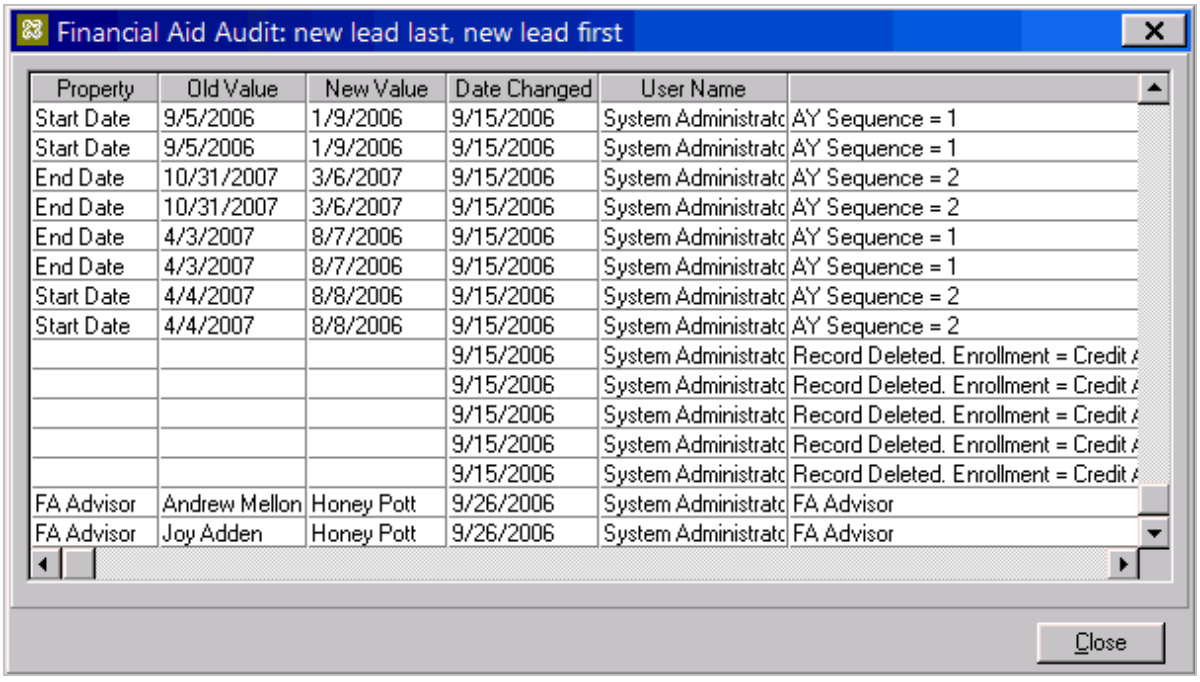
Budget information from the student's academic year are recorded, including the Budget selected, amount for Tuition, Book Supplies, Room Board, Travel, Bank Fees, and all Other Charges. Any changes to this information is also posted.

BBAY Start and End Date fields now appear on the Loan Period form, Ac Yr Start and End Dates and the Loan Period Sequence fields now appear on the Direct Loan form, and modifications to these fields are recorded in the Financial Aid Audit form.

The Financial Aid Audit Folder tracks changes for the amount packaged and award status, award year and fund source whether the award is active or deleted. Changes to net amounts, dates of disbursement, and term of the disbursement, date of scheduled disbursement for active as well as deleted awards. The Financial Aid Audit folder also records changes to documents such as status, date approved, date requested, date sent, document type, and document status whether active or deleted. This is a read-only form.

To view the Financial Aid Audit:

1. Select the student for whom you want to view the financial aid change data.
2. Navigate to **View** > **Financial Aid** > **Audit**. The Financial Aid Audit form for the student is displayed.



3. Scroll to the right to see the Comments column.

4. Click **Close** to close the form.

Financial Aid Estimates

Note: For the latest content about FAFSA, ISIR and COD processing, access Regulatory Help.

This option performs Financial Aid estimates and prepares estimated award letters to prospective students. The data thus created then moves to the enrollment once a student is enrolled. This option is available on prospective students not yet enrolled without the requirement for a FAFSA or ISIR. The option is also available for enrolled students.

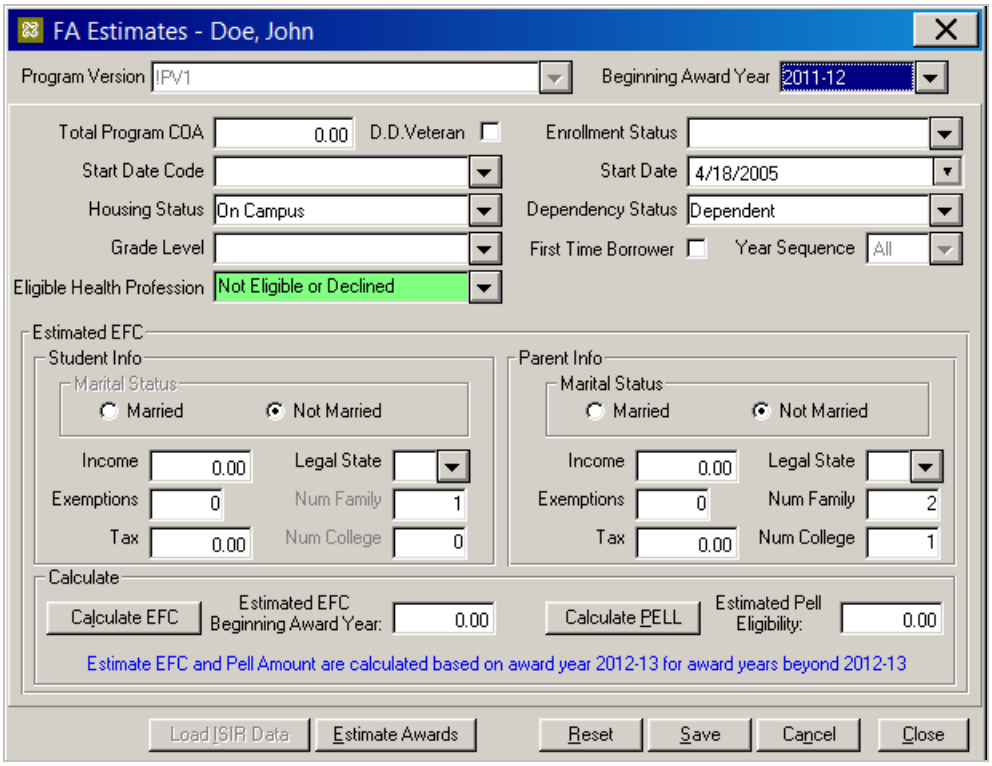
When an enrollment is added, and the award year on file in the estimated awards is an award year in the actual academic year records created during enrollment, the aid is "moved" to the appropriate academic year (using the award year) under the new enrollment record with a status of E - Estimated. Aid not meeting these requirements stays in the tentative award file.

- If an estimated award is moved to the enrollment, CampusNexus Student looks for disbursement schedules for the academic year start date and fund source. If a disbursement schedule exists, the disbursement records is added to the converted aid record.
- When the Multiple Disbursements feature is enabled, CampusNexus Student uses the disbursement rules engine instead of disbursement schedules when moving the estimate awards during the enrollment process. The Multiple Disbursements feature checks for the following settings:
    - "Carry over Estimated Aid to Enrollment" is enabled under Setup > Campus Locations > Financial Aid.
    - The program version used during the enrollment process matches the program version configured for the student's estimates.
    - The start date used during the enrollment process matches the start date configured for the student's estimates.

Note: When the user enters Program Version and Beginning Award Year in the FA Estimates form, CampusNexus Student pulls data from the students ISIR, if one exists, or a previous FA Estimate record if one exists. If a student has multiple ISIRs, the one with the highest transaction ID will be used. Data fields that could be populated from the ISIR are as follows: Enrollment Status, Dependency Status, Grade Level, Student Info, Parent Info, and Estimated EFC Beginning Award Year.

To prepare a financial aid estimate:

1. Select the new lead or student for whom you want to estimate financial aid awards.
2. Navigate to **View** > **Financial Aid** > **Estimates.** The initial FA Estimates form is displayed.



3. Select a **Program Version** (hypothetical). This is based on the campus you are logged in to. The "Inst. Cost" (Institutional Cost) column in the Program Version drop-down list displays the sum of Tuition and Books/Supplies for the whole Program. This information is set up in the Program Setup form.
4. Select a **Beginning Award Year** on which the FA estimates will be based.

   CampusNexus Student populates the **Total Program COA** from the preset formula.
5. Authorized users can select **D.D. Veteran** (Dependent of Deceased Veteran) to indicate that a student is the dependent of a veteran that perished after September 11, 2001. This check box is selected for academic years with award years 2009-10 or beyond. By default, the check box is cleared.
   - If D. D. Veteran is selected, eligible students receive the maximum Pell award as well as all Title IV aid based on a zero EFC.
   - If D. D. Veteran has already been configured for a student on the Financial Aid Packaging form (View > Financial Aid > Awards), the check box is selected when opening the form.
6. Select an **Enrollment Status**.
7. Select the **Year Sequence**. If this drop-down list is enabled, you can select the FA academic year to which this COA applies. If you change the Year Sequence, the system recalculates the COA for the newly selected academic year.
8. Select/clear the **First Time Borrower** check box, as applicable. This value determines the correct expected date of the first disbursement when aid in the estimates folder is moved to the student's financial aid package during the enrollment process.
9. Select values (or estimates) for **Dependency Status**, **Start Date**, **Housing Status**, **Grade Level**, and **Start Date Code**.

Note: Title IV rules state that a school must wait 30 days after the student's start date before disbursing Federal Student Aid (FSA) loans to the student if the student borrower is a first-time, first-year undergraduate student. (This limitation does not apply to PLUS loans.)

10. **Estimated EFC**: Enter the **Student Info** and **Parent Info** income and tax data.

    The system assumes zero for the amounts on Worksheets A, B, and C for students and parents. The system will ask if you want to recalculate the taxes after entering the exemptions and tabbing.

11. Click **Calculate EFC** to determine the estimated EFC amount.

12. Click **Calculate Pell** to determine the estimated Pell amount.

    CampusNexus Student uses the simplified needs formulas to calculate EFC for students (independent) or parents (dependent) with gross income over $50,000 (U.S.). You can manually enter the EFC and Pell amounts. You can calculate the EFC and Pell independently. This makes it easier to input the EFC directly and calculate the Pell eligibility without having to enter the additional student information

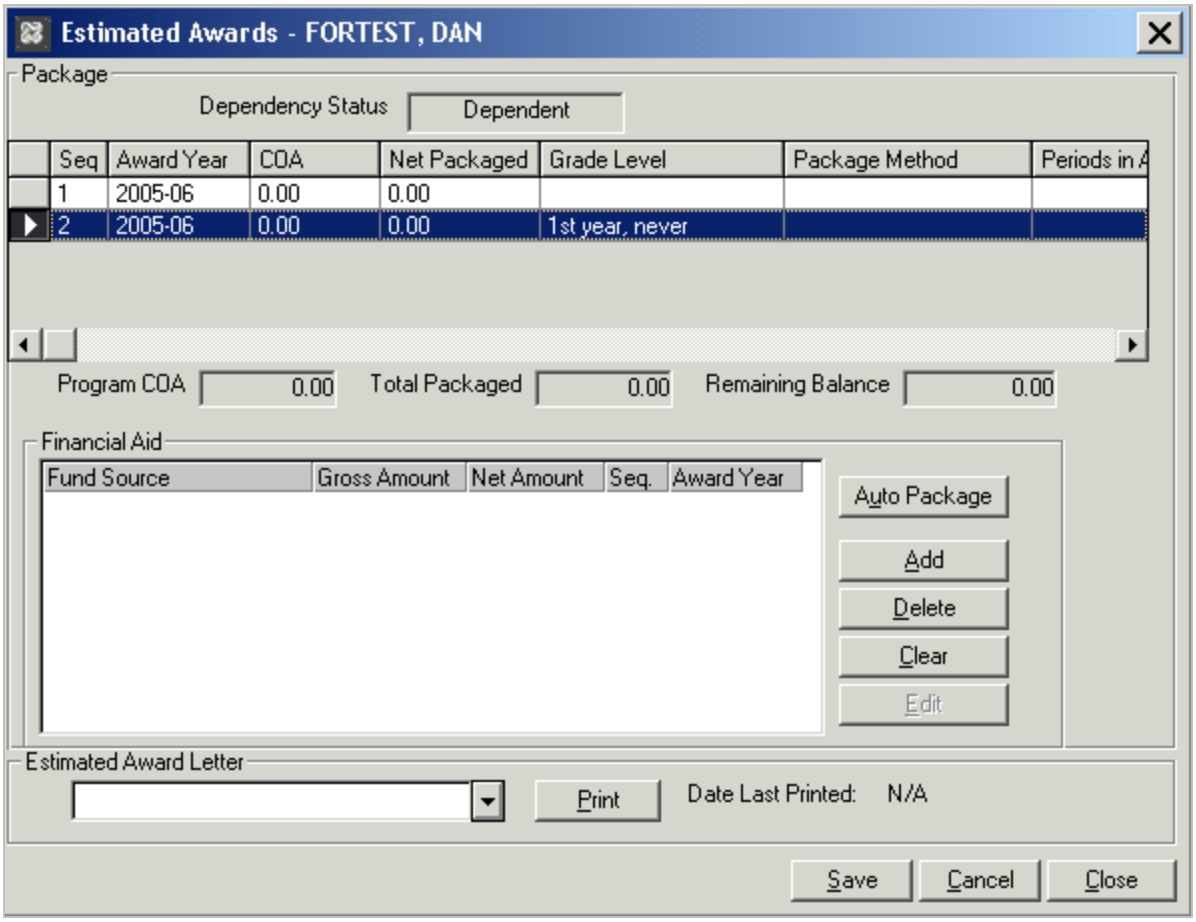
13. Click **Save**.

14. Click **Reset**. This action deletes from the database all estimate data saved. CampusNexus Student resets (clears) the **Estimate** form to begin another estimate for the student. CampusNexus Student also deletes all award data and academic years associated with the previous estimate.

15. Click **Load ISIR Data** to populate fields with ISIR data. This button is enabled only if the student has a valid ISIR on file.

16. Click **Estimate Awards.** CampusNexus Student displays the **Estimated Awards** form (frmFaEstimateAwards). In this form, you can add, delete, and edit estimated awards for the student (Fund Source, Award Year, and Amount).

    Only the academic year sequence selected is displayed in the academic year grid.



Field Descriptions

Field	Description
Sequence	Read-only. This field displays the Year Sequence as filtered in the FA Estimates form. For example, if you selected **All**, all academic years set up for this program are displayed; if you select **1**, the first academic year is displayed.
Award Year	Read-only
COA	Read-only
Net Packaged	Read-only. This is the net amount of the award. That is, the actual amount the student receives after fees.
Grade Level	Click in this cell and use the drop-down list to indicate a grade, if required.
Packaging Method	Click in this cell and use the drop-down list to indicate a packaging method for this award year if required.

17. Click **Auto-Package**to package automatically awards based on the estimated values for EFC, Pell, program version, grade level, award year, and packaging method. An aid package for only the selected academic year will be calculated for the student.

Total Packaged displays the total amount of the estimated award packaged. **Remaining Balance to package** displays the Cost of Attendance minus EFC and Total Packaged.

Note: CampusNexus Student uses loan limits on auto package and new origination fee of 2.5 % for award years on or after 2007- 08.

18. Click **Add** to add a new fund source to the estimated package.
19. Select the **Source** of the award - Grant, Loan, Student Payment/Other, or Work Study.
20. Specify the **Gross Amount**.
21. If you have selected **Loan**, the system displays the Loan Fees field. Click in this field. The system populates this field with the loan fees set up for this loan. For additional information on loan fees, refer to Direct Loan Form.

    Note: Estimated awards may differ from actual awards on the values in the Net Amount, Bank Fees, and Rebate Amounts fields. For estimated awards, the values for Net Amount, Bank Fees, and Rebate Amounts are calculated from the Gross amount of the award. The actual award will have disbursements, with the values for Net Amount, Bank Fees, and Rebate Amount calculated from the gross amount of the "disbursements" and summed up for the total. Therefore, there may be a variation between the values displayed for the estimated award and the actual award, once the student is enrolled.
22. Click **Edit** to make changes wherever this button is available.
23. Select the **Source** and **Award Year**, and specify the **Amount**.
24. Click **Save**to add the award to the list.
25. Select the estimated award letter from the drop-down list.
26. Click **Print** to print the Estimated Award Letter from the list (CampusNexus Student or Custom). The Date Last Printed is stored and displayed on the form.

    The Estimated Award Letter (lst_FaEstimatedAwardLetter) is similar to the actual award letter, but will be labeled "Estimated Awards". It does not display disbursements.
27. Estimated Awards form: Click **Close** to close the form.
28. FA Estimates form: Click **Close** to close the form.

Financial Aid Document Tracking

The FA Document Tracking form is similar to the Document Tracking form, but only shows Financial Aid-specific documents. It also allows the user to see ISIR information when an Award Year is selected in the main drop-down list.

This form displays a Completion Date field, showing the date on which all FA documents for the award year have been approved.

Note: The Completion Date field is NOT populated if the student is a US citizen and does not have an ISIR on file, even if all documents have been approved. If a student has no Financial Aid documents on file, or if no Financial Aid documents have been used for this student, the Completion Date field is instead labeled ISIR Rcvd Date. This only occurs when an ISIR is received for the award year selected. The document is considered approved when it is assigned a status whose code (Lists > Contact Manager > Document Status) has been set up with the **Approved** check box selected.

This form only displays Financial Aid documents. Therefore, no module selection is available. CampusNexus Student displays all enrollments. There is no enrollment selection tool.

This form features two tabs: The Document Detail tab and the ISIR Details tab.

To edit tracking data for listed documents:

1. Select the **View > Financial Aid> Documents**. The FA Document Tracking form is displayed. Any Financial Aid documents that have already been added to the student's list appear on the grid. An icon present in the left-most column of the grid indicates that the document is viewable.
2. Select an **Award Year**. If the option **All Years** is selected, the Completion Date cannot be evaluated and the system populates the Completion Date field with "N/A". If you choose a document that is set up as **Award Year Specific** (please refer to **Documents Code Setup** (Lists > Contact Manager > Documents > Add/Edit for a definition), then the Award Year list box will appear on the Document Detail tab as a required field. This enables the user to assign an award year to the document.
3. Click **Add Document List** to add a new list of documents to the tracking list. This action enables the **Document Detail** tab.

   Note: Documents appear on this list when they are added under Lists > Contact Manager > Documents. Document Status codes appear on this list after they are added under Lists > Contact Manager > Document Status. Only Financial Aid documents that have document statuses of "approved" will meet the documentation requirement to received Financial Aid disbursements, otherwise they are considered Missing documents.
4. Enter the **Date Requested**, **Date Due**, **Date Sent**, **Date Received**, and **Date Approved** data as it becomes available. The **Date Sent** field is automatically updated when a mail merge letter is printed that has the document included as an attachment.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Add Document List

To add or edit the tracking data for a Financial Aid document list:

1. Click **Add Document List** to add a new list of documents to the tracking list. This action enables the **Document Detail** tab. Select a document list from the drop-downs. Document Lists appear on this list when they are added from Lists > Contact Manager > Document Lists.
2. Select an initial **Document Status.** The same status is assigned to all documents on the document list. Document Status codes appear on this list after they are added from Lists > Contact Manager > Document Status.
3. Enter the **Date Requested**, **Date Due**, **Date Sent**, **Date Received**, **Date Approved,** and **Expiration Date** as

needed. The same dates are assigned to all documents on the document list.

4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Add Document

Functionality is the same as the **Add Document List** button, except that the drop-down list displays individual documents to add, rather than groups of documents.

Display Document

This function works both with and without ImageNow. If your school has the necessary technology to scan or otherwise import images of student documents, you can load or scan them into the CampusNexus Student database. The document can be in any file format that can be processed by an application on your PC.

Note: The coding currently being used to display a document when the Display Document button is selected:

```
Set objImageNow = GetObject(, "imagenow.CtrlPanel")
Call objImageNow.INViewDocDID(ImageNowDocID0, ImageNowDocID1)
```

For version 6.0, the coding to display the document image must be changed to:

```
Set objImageNow = GetObject(, "imagenow6.CtrlPanel")
Call objImageNow.INViewDocDID(ImageNowDocID, -1, 0, 1)
```

The existing code to launch the ImageNow log on form if the Display Document button is selected but the user is not logged into ImageNow is:

```
lngReturn = ShellExecute(0, "", "imagenow32.exe", "", Replace(ImageNowPath, "\imagenow32.exe", ""), 1)
```

For version 6.0, the coding to call the ImageNow log in form if the user is not logged into ImageNow must be changed to:

```
lngReturn = ShellExecute(0, "", "imagenow.exe", "", Replace(ImageNowPath, "\imagenow.exe", ""), 1)
```

To view a stored document:

1. Select a document on the grid and click **Display Document**. If no attachment has been stored for this document, a message states, *No attachment found for this document*. Otherwise, the name of the document is displayed.
2. If the document is available in a file but has not yet been imported into CampusNexus Student, click the **Upload Document** button to open a file browser from which you can pick the file for import. You can select any type of file that can be viewed by the software on your PC.

   Note: Once the file has been imported, it is no longer necessary (as far as CampusNexus Student is concerned) to retain the original image file. After the image is imported, it will be available for direct viewing. To view a file attached as a document, you must have the necessary software on your PC to open the file format in which the document is stored. Example file formats include .doc (Word), .xls (Excel), .vsd (Visio), and .txt (Notepad).
3. If you have a scanner attached to your computer and you have "Twain-compliant" scanning software, you can click **Scan** to import an image of the document directly from the scanner application. The program will open the Document Display form.
4. Click **Scan** Document on the Document Display form to activate your scanning application. The many available scanning applications preclude a detailed description of that process here. For example, however, using HP PrecisionScan Pro, once the document is scanned, you would click the **File** > **Place Image** to send the scanned image back to the Document Display form.
5. On the **Document Display** form, you can:

- Click **Load** to load a bitmap image file (*filename*.bmp) of the document. The bitmap file format is the only one you can load from this command.
- Click **Clear** to clear the previously imported document image.
- Click **Print** to print the document image.
- Click **Rotate** to rotate the document image 90 degrees.
- Click **Flip** to rotate the document image 180 degrees.
- Click **Close** to close the form.

6. In the **Document Display** dialog box, the other controls are:
   - View a document that is on file. When you view a document, it will be opened by the application that is designated in Windows to open that type of file. For instance, a file named Resume.doc will most likely be opened by Microsoft Word.
   - Clear the document from CampusNexus Student storage.
   - Return to the previous form.
   - 
Scan a document as described earlier in this topic.
   -

Close this form and return to the Document Tracking Form.
   - If a button shows in only black and gray tones, the function it represents is not available until something else happens. For example, you cannot view a document until it has been scanned in or loaded or, has been loaded. You cannot load another document unless the previous one is cleared.

Scan Cover Sheet

If the document you have selected is linked with ImageNow, the Scan Cover Sheet button is available. Click the Scan Cover Sheet button to print a cover sheet. This sheet contains bar codes for the student and the enrollment. The scan cover sheet is used to identify a student whose documents are being scanned with a scanner. For detailed information about ImageNow, see your system administrator.

Document Audit

The Audit function enables the user to see a history of changes made to a particular document. The purpose of this function is to track changes to the document and its status history. This enables schools to study the time it takes for each document to progress from the Requested or Required status to the On File status. Metrics can subsequently be developed with the goal of streamlining the process.

To audit a document:

1. Select a document in the grid and click **Audit.** A verification message is displayed prompting the user to view a history of all edits and changes made to the document.
2. Click **Yes** to see a history of all edits and changes made to all documents in the grid or click **No** to see the history of only the selected document. If a blank form is displayed, it indicates that there are no transactions on file for the

document(s).

3. Click **Close** to close the form. You are returned to the Document Tracking form.

Document Detail Tab

The Document Detail tab displays all information that applies to a document displayed in the grid. Click **Edit** to update any of this information. Use the Comments field to enter any information pertinent to the document.

ISIR Details Tab

The ISIR information displayed in the ISIR Details tab is the same as that in ISIR Received form; however, only the ISIRs received for the award year and ISIR codes will be displayed and cannot be edited. ISIRs can also be printed from this tab.

Note: For academic years 2007-2008 and further, the **Recalc EFC** column is displayed for institutions that have chosen the option to award students with a recalculated EFC (under Setup Menu > Campus Locations > Campuses > Financial Aid tab > Campus Financial Aid). This column is NOT displayed for prior academic years.

On July 6, 2012, Public Law 112-141 was enacted. This law contains a provision that eliminates the subsidy on Direct Subsidized Stafford Loans when a “first time borrower” enrollment exceeds 150% of the published program length.

For award years 2014-15 and higher, the Subsidized Usage Limit Applies (SULA) flag (where the valid values are Y or N) has been added to the COD system. Upon receipt of a Direct Loan actual disbursement with a first disbursement date on or after July 1, 2013, COD determines if the borrower meets the definition of a "first time borrower" to confirm that the 150% subsidy limit applies to the borrower.

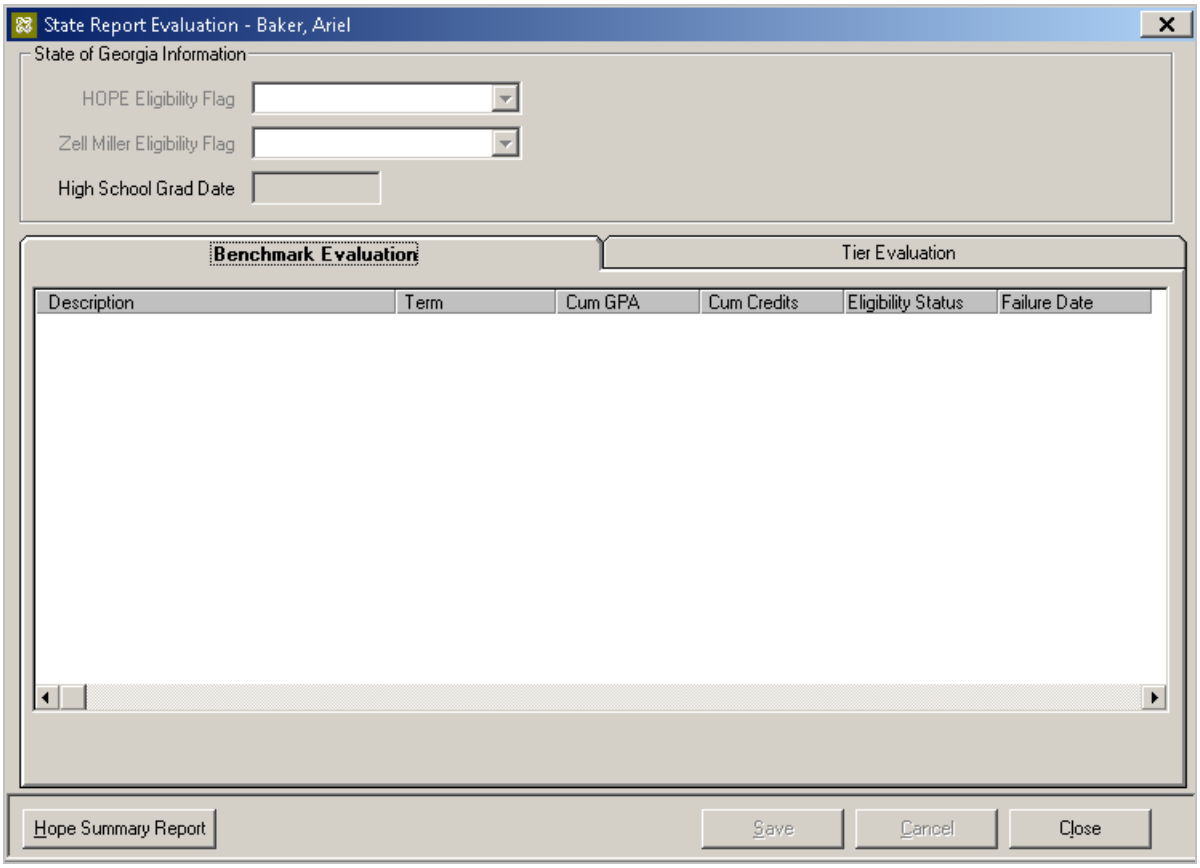
When the SULA flag is set to Y, a SAR comment code 267 will appear if a first time borrower student is subject to the subsidized loan limitation. The message directs users to the studentaid.gov site. This flag is viewed for all academic years but is only populated for the current award year. When the ISIR is received and the SULA flag is associated with a comment code, document triggers associated with the comment code are activated. The SULA flag is also displayed in the Financial Aid Packaging form.

State Report Evaluation

This form displays Benchmark/Tier evaluation results by matching state. The application currently supports the State Reporting Evaluations for the State of Georgia for the HOPE Grant/Scholarship and the Zell Miller Scholarship.

The evaluation of the HOPE and Zell Miller criteria is processed at an overall student level, so it crosses all enrollments and campuses for the student. When the scheduled job runs to evaluate the eligibility of the student for the Hope or Zell Miller scholarship, it uses the current date for the evaluation of the student, and it evaluates the benchmark values and tier configurations for each student by using the criterion that was configured into the Georgia State Configuration Tool. These values are updated every time the job evaluation runs, so it contains an accurate current reflection of the student.

This State Report Evaluation also takes into account Transfer students, wherein the job evaluates the transfer credits on active and inactive terms while evaluating benchmarks. The job evaluates the transfer credits that have been completed in the term by sorting the credits in order by the date completed of the course. The courses that fall within the appropriate months for the most recent year are then grouped together and the appropriate values are used to calculate a GPA value. If the evaluation of the Spring term benchmark is achieved with the transfer credits, the system calculates a GPA for the student, displays the Completion Date for the course, and then marks the term as Transfer. If a benchmark is not achieved within a registered term, the system will review the transfer credits on the student to evaluate if a benchmark 30, 60, or 90 is achieved.



At the top of the State Report Evaluation form appears the **State of Georgia Information** section, which contains the following fields:

- The **HOPE Eligibility Flag** field allows the user to select Yes or No from the available options. Likewise, the **Zell Miller Eligibility Flag** field allows the user to select Yes, No, or Undetermined from the available options. Users can also overwrite the HOPE Eligibility Flag and the Zell Miller Eligibility Flag values for the selected student. All modifications to the HOPE Eligibility Flag and the Zell Miller Eligibility Flag values are audited.

If the HOPE Eligibility drop-down is blank, then the selected student does not have a value populated from the import of the HOPE Eligibility Import files. Likewise, if the Zell Miller Eligibility drop-down is blank, the selected student does not have a value populated from the import of the Zell Miller Eligibility Import files.

Note: If the State Report Evaluation form is blank when it displays, the selected student's residence does not belong to Georgia or the Georgia State Configuration Tool is not configured for that school.

- The **High School Grad Date** field is a read-only field which shows the High School Graduation Date that was provided from the State of Georgia Import files for the student.

At the middle of the State Report Evaluation form are two tabs: **Benchmark Evaluation** and **Tier Evaluation**.

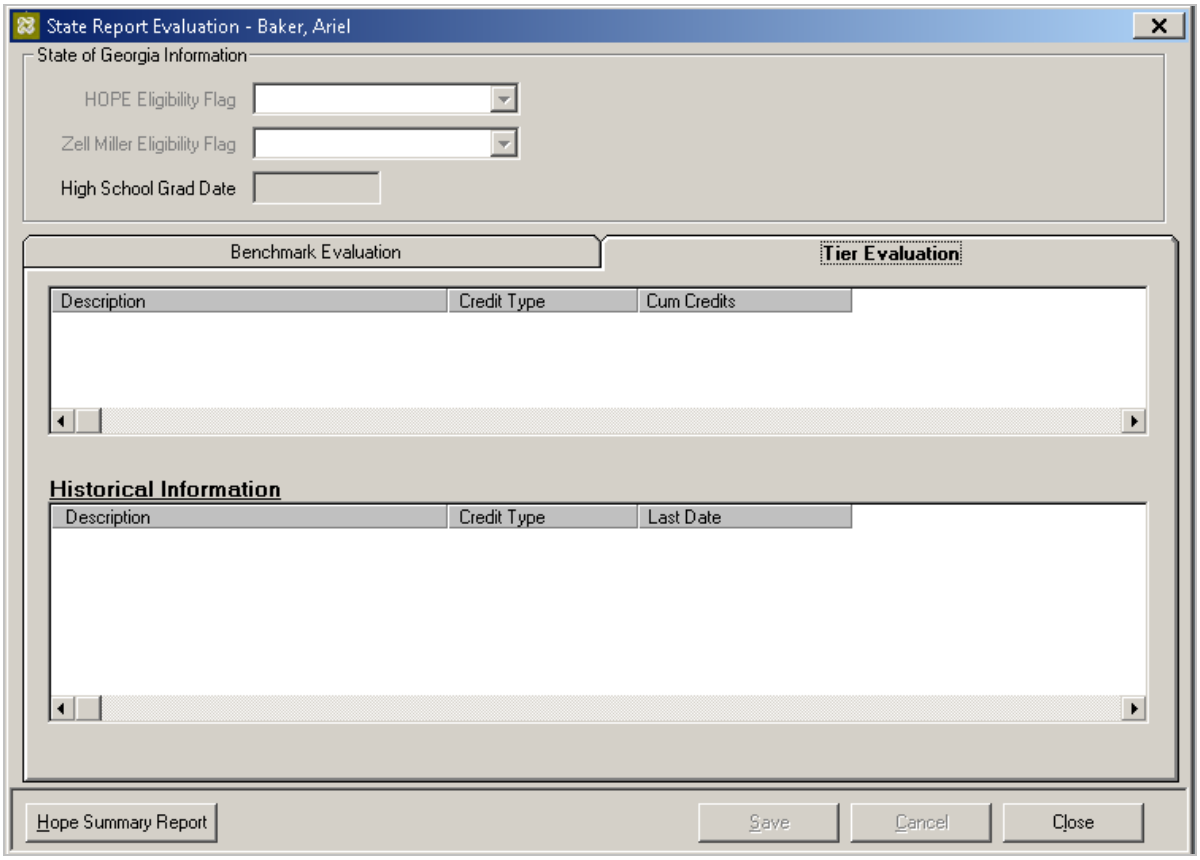
- The **Benchmark Evaluation** tab contains the Benchmark mapping results for each student. The Benchmark Evaluation tab contains a grid with six columns, including **Description, Term, Cumulative GPA, Cumulative Credits, Eligibility Status,** and **Failure Date**. The Eligibility Status and Failure Date columns refer to both the HOPE and Zell Miller fund sources. You can sort Benchmark evaluation data in the grid by clicking on any of the column headers.

  During the evaluation process the HOPE Evaluation Job will evaluate the minimum GPA from the fund source configuration as the minimum and compare it to the GPA value for the benchmark. If the GPA for the benchmark is greater than or equal to the minimum GPA value for each configured fund source, the student then passes. If the GPA for the benchmark is less than the minimum GPA for the fund source, then the student fails that benchmark. When a student fails a benchmark or the Eligibility Status is "Fail" and the student has a HOPE Scholarship or Zell Miller Scholarship on file, the system saves the term end date as the date the student failed the benchmark.

- The **Tier Evaluation** tab stores the Tiers Mapping results and Historical Information for each student. The Tier Evaluation tab contains two grids with three columns, including **Description, Credit Type,** and **Cumulative Credits** or **Last Date**. You can sort Tier evaluation data in either grid by clicking on any of the column headers.

The top of the Tier Evaluation tab displays the current calculated tier value for the student.

The bottom of the Tier Evaluation tab contains the **Historical Information** section, which displays the last date the student was evaluated at the indicated Tier before the student progressed to the next Tier.



The **Hope Summary Report** button opens the HOPE Summary Report for the corresponding student. The HOPE Summary Report contains eight columns, including First Name, Middle Initial, Last Name, Zell, Program Version, Student ID, School Status, and Award Year. The Zell column indicates if the student is eligible for the Zell Miller Scholarship.

The **Save** button updates the Hope Eligibility. The Save button is active if only a HOPE Eligibility Flag value is populated for update.

The **Cancel** button returns the form to its previous state. It does not update the Hope Eligibility value, if changed.

The **Close** button closes the form.

View > Student Accounts

The View > Student Accounts menu offers options related to financial matters for the student. The options on this menu apply to the student selected from the Recent Students list.

Menu Item	Description
Student	Displays the Student Master form.
Ledger Cards	Displays the student's ledger card. You can post charges to the student's account, post payments from fund sources, adjust transactions, and perform other financial procedures related to the student.
Payment Schedule	Displays the student's or third party's payment schedule. You can edit the payment schedule.
Stipend Schedule	Displays the stipend schedule for the student. You can edit the stipend schedule.
Revenue Ledger	Displays the student's revenue history and provides an option to enter revenue adjustments.
Hypothetical Refund Calculation	Displays calculations for return of Title IV funds for review purposes.
Refund Calculation	Displays a form used perform a revenue calculation for the student.
School Fields	Displays a form used to view or enter data in school-defined fields related to the Student Accounts module and public fields from other modules.
Summary	Displays a report in HTML format. The report provides a convenient way to view a snapshot of the student's financial history at the school.
Payment Info	Displays the form used to enter and store information on student bank accounts and credit cards.
Subsidiary	Displays the form used to view and enter subsidiary charges that do not affect the student's ledger card, e.g., housing fees.
Tuition Discounts	Displays the tuition discount policies available for the student and post discounts to the student's tuition charges.
Collections	Displays the collections policies available for the student.
Audit	Displays all collection activity for the student.
Registration Bill	Displays the Student Registration Bill containing a snapshot of student charges, financial, aid and payments for any selected term.

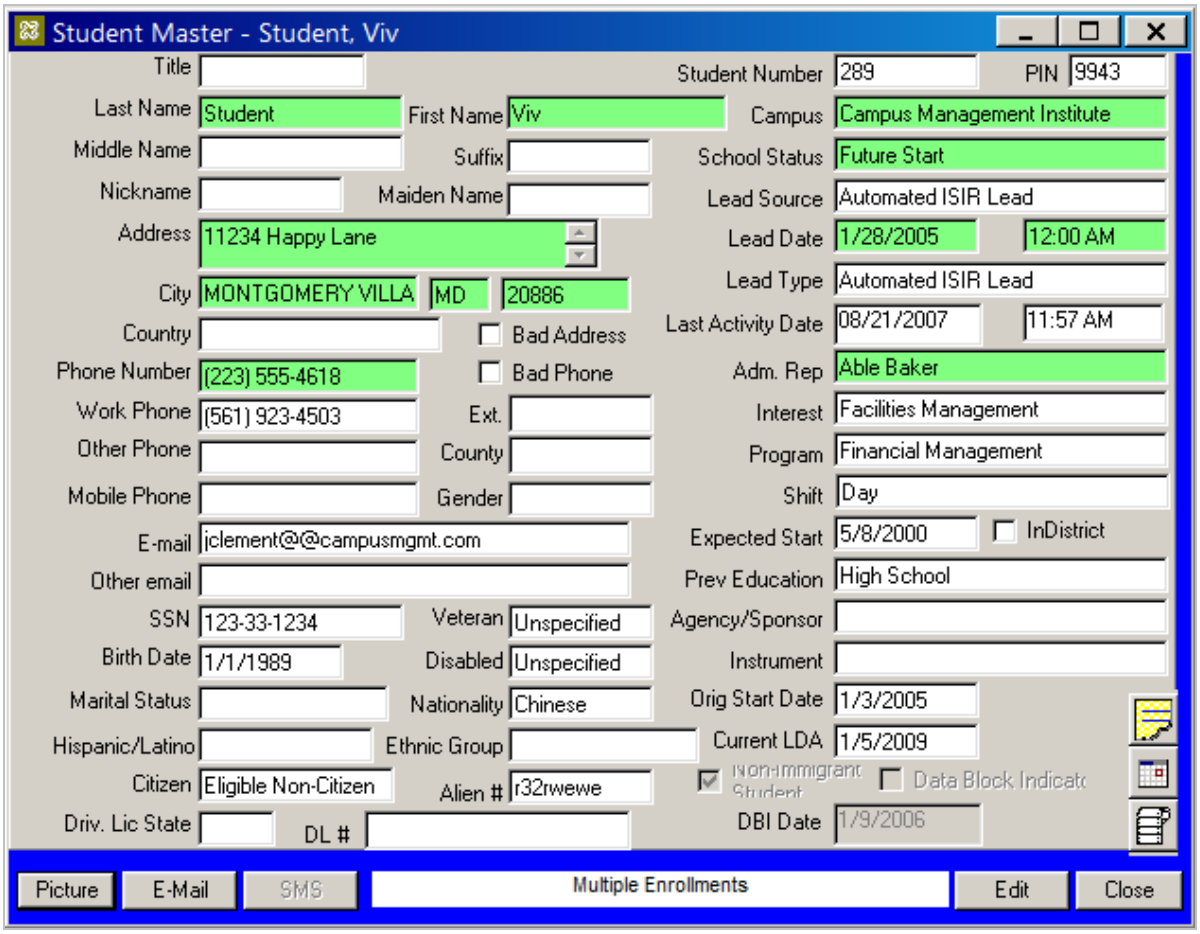
The options on the Student Bar are the same as the options on the View menu, unless the Student Bar has been altered by the user.

Student Master

The Student Master form contains much of a student's basic demographic information. The Student Master form is usually (but not necessarily) populated in the Admissions module by adding a new lead to the database. New leads are entered using the Quick Lead Entry form or the Add New Lead **Ctrl+L** option on the File menu. The **Ctrl+N** key combination can also be used to start a new Student Master record (form) without entering a quick lead.

To view a Student Master form:

1. Select one of the following options:
    - Click **Student** on the Student Bar.
    - Double-click **Recent Students** on the Toolbar. When you change the student in the Recent Students list, a new Student Master form is displayed. If you already have a Student Master form open, it remains open in the background.
    - From the **View** menu navigate as follows:
        - Contact Manager > Student
        - Admissions > Student
        - Financial Aid > Student
        - Student Accounts > Student
        - Academic Records > Student
        - Career Services > Student
        - Loan Management > Student
        - Student Services > Student
        - Housing > Student
    - Use the **Find** menu or click on the Toolbar to search for a student.



Note: The border color around the Student Master form indicates the student's status category. In the setup options under Setup > Status Codes > Colors Tab, your system administrator can choose colors for the status categories.

2. Multiple Student Master forms can be displayed at the same time. The forms always open in the same place in the work area. Unless you have closed, moved, or minimized a previous Student Master form, the next form you open covers the previous form.

   To move between open Student Master forms use the **Window** menu and select **Tile** or **Cascade** to organize all open forms in the work area.

   When you are working with multiple students, ensure that the correct form is current (active). The name of the current student is always shown in the Recent Students text box. The title bar of the active form is always a different color than other forms which may be open in your work area.

3. To edit the information on the form, click **Edit**. See Edit a Student Master.

   Required fields on the form have a background color other than white. If a required field is blank, you must enter data in it when you edit the form, even if you did not intend to provide the information when you clicked Edit.

   Some fields are required by CampusNexus Student (Last Name, First Name, Lead Date, Admissions Rep). Additionally, your institution may designate other fields as required. The system administrator can mark fields as required in either of two ways.

- Open any Student Master (or Quick Lead) form and go to Setup > Required Fields.
- Designate the field as required in the Data Dictionary.

4. To add an activity from the Student Master form, click the **Add Activity** icon at the bottom right of the form. The Activity form is displayed.
5. Click **Close** (Ctrl+F4) to close the active Student Master form. If you are in edit mode when you click Close, you are prompted to save any changes.

Duplicate Student Records

CampusNexus Student checks for duplicate Student Master records when new leads or students are added. The following table columns are used to check for duplicates:

- Student ID
- Social Security Number
- Phone Number
- Date of Birth and Student Name (combined)
- Driver's License Number
- E-mail address.

Each check is performed only if you entered data in the corresponding field. If at least one match is found, a grid showing the matches is displayed

If the lead is a duplicate and can be found on the grid, click the record and the lead form is populated with the information for that lead. The information can then be edited. The campus for the lead can be changed only if the campus ID for the record from the grid is in the list of campuses to which you have access.

Ledger Cards

You can view the student's ledger card or print a report with the ledger information. You can also post charges, payments, or adjustments. By default the current enrollment is displayed when accessing the Ledger Card form.

If the Posting Flag is set to *Current Campus*, the Post Payment, Post Charges, Adjust Transaction, Apply Payment, and Post Refund buttons are enabled only when the enrollment selected is in the campus you are signed into. If the Posting Flag is set to **Any Campus**, you can post transactions for a student at any campus.

Entries on the ledger card display the campus code from which the entry was billed. Options on the ledger card report allow for sorting and subtotalling by campus.

Note: If your institution uses a servicer for processing FA, whether a payment is scheduled or not, CampusNexus Student prevents users from posting individual Title IV payments if the setup option **Prevent Users from modifying Title IV aid?** is set to Yes.

The TUIT code must be used to bill tuition via Registration Billing. Unless an unbilled TUIT item appears in a student's Fees folder, the student will not be gathered in the list of students to bill. The TUIT code must not be used as a tuition discounts bill code.

Integration with CampusNexus Finance, HR & Payroll

Ledger Cards in CampusNexus Finance, HR & Payroll

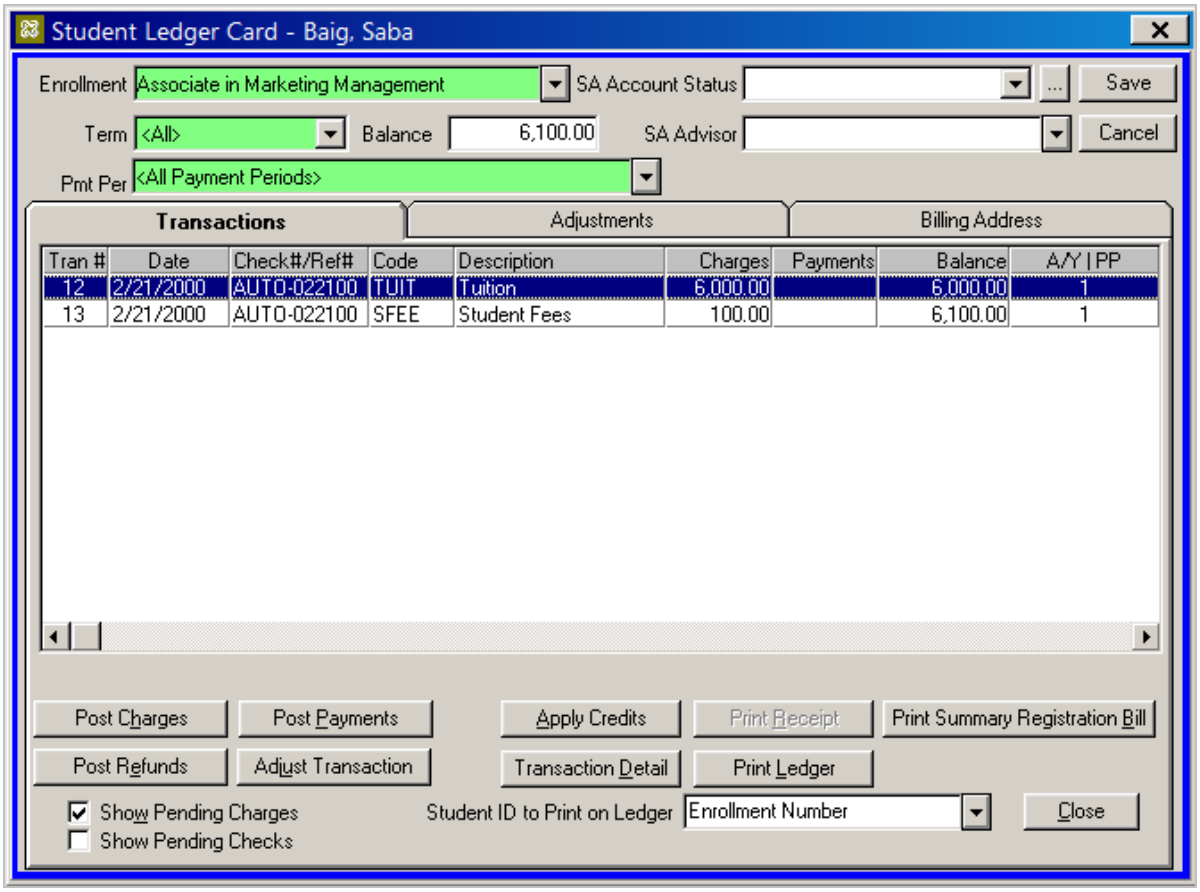
CampusNexus Student maintains the following ledgers:

- Main Ledger (charges, refunds, stipends, payments and related voids)
- Subsidiary Ledger(charges, refunds, payments and related voids)

CampusNexus Finance, HR & Payroll has only one ledger (Student Ledger) that shows the transactions from all CampusNexus Student ledgers and thereby includes all balances for calculating the ledger balance. In version 2.1 and later, CampusNexus Finance, HR & Payroll provides a filter that allows the user to view each of the CampusNexus Student ledgers separately. The default view is the Main Ledger. CampusNexus Finance, HR & Payroll calculates the balances depending on the selected ledger so that the balances can be reconciled with the separate ledgers in CampusNexus Student.

To view or print the ledger card:

1. Select the student whose ledger card you want to view.
2. Navigate to **View > Student Accounts > Ledger Cards**. The Student Ledger Card form is displayed. The default value in enrollment drop-down list is the student's current enrollment record.



3. To reduce the number of transactions to be viewed, select a specific **Enrollment** and/or a specific **Term**. You can change the order of transactions by clicking the column headers.

4. The **Pmt Per** list is displayed only when the **Pmt Per** column is available. Use this option to filter by payment period so that the number of viewable transactions is reduced. The fields displayed in this drop-down box are Academic Year (Ac Yr), Payment Period (Pmt Per), Program Version, and the Payment Period start and end dates.

   Note: When billing a student by Payment Period, it is possible for the payment period on posted charges to be automatically adjusted to another payment period based on the student's progress. For example, if a student receives a grade for a course where the student does not earn credits, CampusNexus Student adjusts the payment period dates to include the next course(s) that would potentially complete the credit value required for that payment period. The charges for those courses will then also be associated with that payment period and posted to the ledger card if the payment period has attendance posted during that time frame. If the grade for the course is later changed to a grade that does earn credits, CampusNexus Student adjusts the payment period dates back to the end date of the course that completes the credit value of the payment period and then change the payment period association on the ledger entry with the payment period that encompasses that course.

   The above changes only occur if the student billing method frequency is Payment period and users are posting using Transaction Details. The automated changes also require that the system administrator has configured the SQL jobs for these processes.

5. In the **SA Account Status** field, select account statuses that apply to this student. The statuses that appear here are determined by the selection you made in the Setup - Student Accounts Lists [Accounts Statuses] form. If you selected the *Account Statuses* check box, only the account statuses will appear. If you selected the **Both** check

box, the Collections and Account statuses will appear.

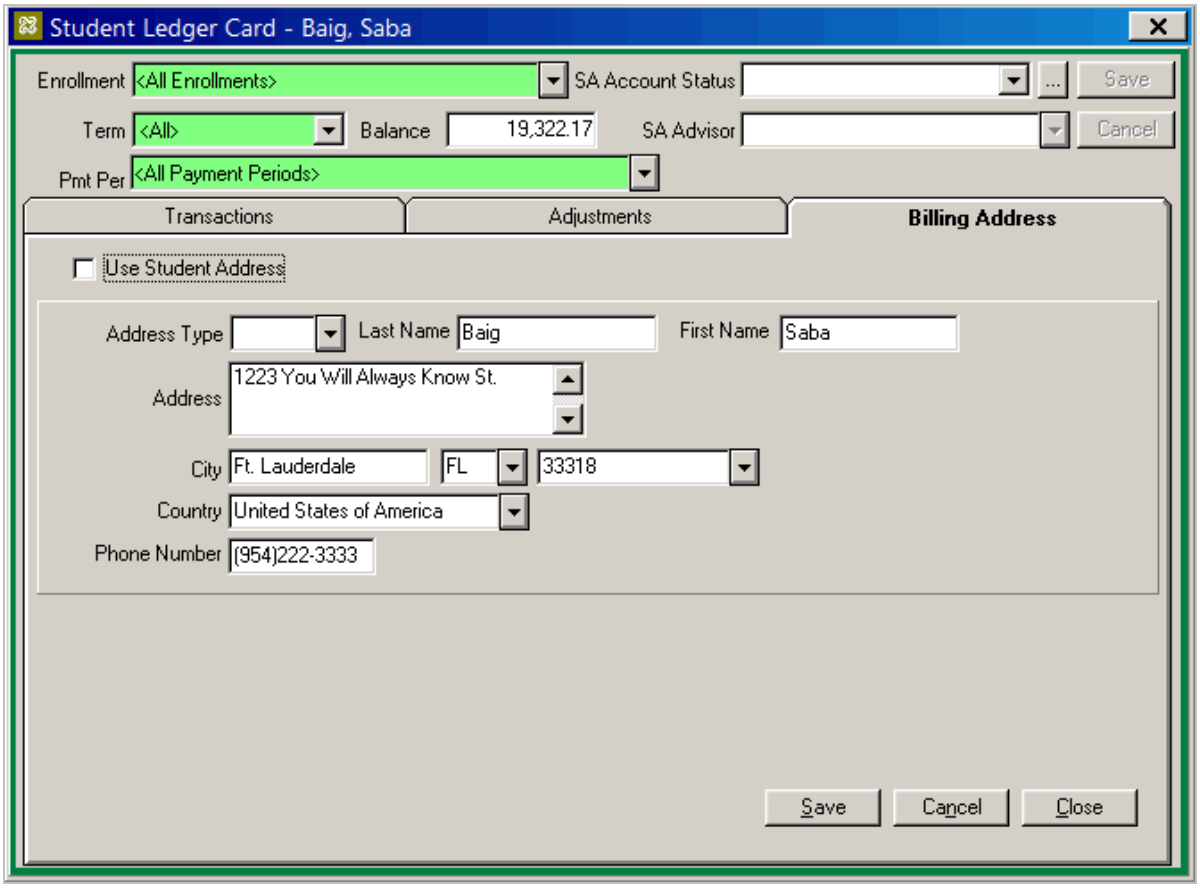
Staff Members must be granted permission to edit the SA Account Status field. The Save button is disabled if the staff member does not have these permissions.

6. The student's **Student Accounts Advisor** for the enrollment is displayed. The advisor is enrollment-specific. If you have you have been granted the necessary authority, you can change the advisor by selecting one from the drop-down list.
7. Click the **Transactions** tab to view a list of all transactions within the selected enrollment.
8. Click the **Adjustments** tab to view a record of all transaction adjustments made through Adjust Transactions.

   a. In the **Adjustments made to Student Ledger Card** list, select the transaction you want to view.
   b. View **Adjustment Details** for the record of the adjustment transaction you selected.

9. Click the **Billing Address** tab to view or change the student's billing address. CampusNexus Student provides for a billing address other than the address on the student's master record. You can select an address from Contact Manager's list of addresses and designate it as the billing address or enter an address on the Billing Address tab of the Ledger Card. The billing address is added to the list of addresses for the student and labeled as the 'Billing Address'.

   If a billing address has already been designated for the student, the address is displayed on the Billing Address tab.



a. If accounts receivable statements are to go directly to the student, select **Use Student Address**.

b. If the billing address is missing or incomplete, enter it in the Addresses form.

c. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

When statements are printed, CampusNexus Student checks for a billing address to be printed on the statements. If no billing address is found, the address from the Student Master form is used.

10. Click **Post Charges** to post debit transactions for the selected student. After adding a payment or charge, the ledger card is refreshed and displays the new entry. Any charge to the ledger card acts as a trigger for CampusNexus Student to perform stipend calculations based on the charge made. If any ACH/Credit Card charge is posted through Process Electronic Draft, CampusNexus Student can generate an auto stipend for any charge per its configuration. Additionally, when creating an auto stipend all charges are used instead of only Title IV charges. Prior period charges are also adjusted when the "Allow up to $200 FSA for prior charges" option is turned ON and a Title IV payment exists under the current payment period. For more information on calculations, see Stipend Schedule.

11. Click **Post Payments** to post credit transactions for the selected student. Note that any payment made to the ledger card acts as a trigger for the system to perform stipend calculations based on the payment made. If any ACH/Credit Card Students Payment is posted through Process Electronic Draft, CampusNexus Student can generate an auto stipend for any payment per its configuration. For more information on calculations, see Stipend Schedule.

12. Click **Post Refunds** to post refund transactions for the selected student.

13. Select a payment transaction and click **Print Receipt**.

CampusNexus Student prints the generic three-part receipt or the FA Notification of Receipt, depending on the type of payment received.

The Print Receipt button on this form generates a generic receipt for the currently selected transaction on the Ledger Card. The Student Accounts Ledger form provides for printing the *Notification of Receipt for a received FA disbursement*. If the selected transaction on the Ledger Card is an FA disbursement received, and the FA fund source type is not CASH, the corresponding Notification of Receipt is printed.

To determine which Notification of Receipt report should be loaded when this option is selected, CampusNexus Student first checks for the existence of a receipt report for the fund source received. If cst_FaXXXXXXXXReceipt exists (XXXXXXXX = Fund Source code), that report will be loaded. If cst_FaXXXXXXXXReceipt does not exist, CampusNexus Student looks for cst_FaDefaultReceipt. If it does not exist, lst_FaDefaultReceipt will be loaded. After the receipt is printed for the selected transaction, CampusNexus Student updates FaDisb.DateReceiptPrinted with the system date.

14. Click **Print Ledger** to print a report of the ledger data. When printing a Ledger Card Report for a specific enrollment, the status of the student in the enrollment is selected for the report. When you print the ledger for *All Enrollments*, CampusNexus Student prints the current (most recent) status on the report.

    The Report Selection: Ledger Card form is displayed. The sort parameters include Campus, Academic Year, Term, (Term) Start Date, Enrollment Number, Transaction Code, Transaction Date, and Transaction Number. On the Selection tab, select SSN, Student Number, Enrollment Number, or No ID to be printed on the ledger card report.

    When Print Ledger is clicked on the Ledger Card form, the Ledger Card can be listed showing all enrollments as one Ledger Card, or the Ledger Card can be separated by enrollment. You can specify how the ledger card is listed. Specify sort criteria before printing the ledger card.

    Printing Pending Discounts

    To print pending discounts, select **Show Pending Charges** and click **Print Ledger**. The Report Selection: Ledger Card form is displayed. Select *Yes* for *Include Course Detail* and *Pending Charges*. Click **Preview**.

    If pending discounts are available, they will appear in the Pending Charges and Discounts section on the Ledger Card.

Pending Charges and Discounts

Description	Bill Code	Term	Amount	Type	Date
Pending Charges and Discounts :					
Student Balance + Pending Charges :			$20.00		

15. Click **Print Registration Bill** to print the registration bill. When printed from the ledger card, the expected funding is printed for the single term selected. The report reflects the individual student using the registration bill defaults setup for the campus and the single term selected by the user on the student ledger card. If the campus default is set up to print expected funding through a particular term, CampusNexus Student uses the term specified by you on the ledger card or schedule folder as the expected funding term.

    A sub-report is appended to the registration bill if the ledger card activity option is selected as a registration bill default print option and the ledger card transactions meet the following criteria:

    - Belong to the enrollment for which the report is being run and
    - If the transaction associated with a term is one of the Billing Terms selected and
    - If the transaction is not associated with a term and its transaction date falls within the range of start and end dates for the Billing Terms selected

    Note: If both Summary Registration Bill and Detail Registration Bill were configured in Registration Bill Defaults, a pop-up menu is displayed when you click Print. If only the Summary option or only the Detail option was configured in the default settings, the Print button caption is **Print Summary Registration Bills** or **Print Detail Registration Bills**, respectively.

    In the Detail Registration Bill, if pending discounts are available, then you can view them in the Charges and Discounts section and in the Account Summary in the line item Pending Charges and Discounts.

Term:	08011210	**Actual Charges:**	**$0.00**	**Pending Discounts:**	**$0.00**
Start Date:	11/23/2010	**Pending Charges:**	**$0.00**		

16. Click **Adjust Transaction** to change a transaction on the student's ledger card or change the check number entered.

    Note: When CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll, the check printing functionality is disabled in CampusNexus Student and checks are printed from CampusNexus Finance, HR & Payroll. The *Date* and *Check#/Ref#* fields in the Transactions tab will reflect data returned from Cam-

pusNexus Finance, HR & Payroll and cannot be changed in the student's ledger card. For more information, see Stipend and Refund Check Printing (CampusNexus Finance, HR & Payroll).

17. Select **Show Pending Charges** to see charges resulting from schedule changes made between the time the student was originally billed for a term and the add/drop period for that term.

    Pending discounts, if available, are calculated based on the pending charges. Pending discounts are displayed in the (Course) Description column on the Transactions ledger, with the Discount Policy Code, and Check#/Ref#, if applicable, when **Transaction Detail** is clicked.

    Note: When CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll, the check printing functionality is disabled in CampusNexus Student and checks are printed from CampusNexus Finance, HR & Payroll. Select **Show Pending Checks** to view the checks that are printed from CampusNexus Finance, HR & Payroll. For more information, see Stipend and Refund Check Printing (CampusNexus Finance, HR & Payroll).

18. Click **Apply Payment** to apply a payment to specific charges. If your campus is configured for Auto Apply Using Hierarchy, this button is labeled Apply Credits.

19. Double-click a transaction or select it and click **Transaction Detail** to see detailed information about the transaction. The Transaction Detail form is displayed.

20. If the entry has not been posted to the General Ledger, you can edit the **Bill Code** and the **Description** on the Transaction Detail form. This change capability can be useful in cleaning conversion data during the start-up of the system.

21. If you change the bill code or the description, click **Save**. CampusNexus Student displays a confirmation message.

22. Click **Close** to close the form. You are returned to the ledger card.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

Ledger Cards Form - Field Level Security

To set Field Level Security for the form, leave the Ledger Cards form displayed, and select Setup > Field Level Security. Set the field level security for the fields in the Ledger Cards form.

Adjust Transaction

Sometimes it is necessary to change transaction data on the student's ledger card after it has been posted. CampusNexus Student provides a means to do this, but certain limitations apply:

- You cannot change a transaction once it has been extracted for posting to the general ledger in your accounting system.
- You can move transactions to another enrollment only if the transaction has not been released to the general ledger.
- You cannot change a transaction if the date of the original transaction is prior to the period start date (Minimum Transaction Date). See also Campus Accounting, Release to General Ledger, and Release to Integrated Accounting System.

CampusNexus Student maintains a record of the changed transaction. You can review the adjustment record on the Adjustments tab of the ledger card.

If a loan amount field is edited and updated, the corresponding row in the Direct Loan Disbursements table is updated with the change. CampusNexus Student finds the row in the table and calculates the new disbursement gross amount, net amount, and fees.

CampusNexus Student can update the Direct Loan disbursement file when adjusting the amount of a previously posted Direct Loan disbursement or deleting a previously posted Direct Loan disbursement from a student's ledger card. If the disbursement has been sent to COD, CampusNexus Student prevents the Direct Loan disbursements from being edited or deleted.

CampusNexus Student enables you to modify check amounts and check numbers in the transaction history grid on the Ledger Card.

See also Deactivated fund source for an award year and campus.

Integration with CampusNexus Finance, HR & Payroll

When CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll, the following applies:

- The check printing functionality is disabled in CampusNexus Student and checks are printed from CampusNexus Finance, HR & Payroll. The Date and Check#/Ref# fields in the Transactions tab reflect data returned from CampusNexus Finance, HR & Payroll and cannot be changed in the student's ledger card. For more information, see Stipend and Refund Check Printing (CampusNexus Finance, HR & Payroll).
- Transactions cannot be adjusted in CampusNexus Student after Release to Integrated Accounting System. This ensures that student ledger transactions in CampusNexus Student remain synchronized with the transactions in CampusNexus Finance, HR & Payroll.
- Transactions that were released but not posted in CampusNexus Finance, HR & Payroll are marked with an asterisk in the Check#/Ref# column. The following message is displayed if the user tries to adjust the transaction: *"Transaction has been released to G/L but not posted."*
- Handling of negative amounts when CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll:
    - When Ledger charges or Subsidiary charges are created or edited in CampusNexus Student with a negative amount, the Debit and Credit Accounts are reversed for the transaction.
    - When payments (Ledger and Subsidiary), refunds (Ledger and Subsidiary), or miscellaneous receipts are created or edited in CampusNexus Student, negative amounts cannot be entered.
- Voiding transactions when CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll:

- Checks posted directly to the Student Ledger can be voided from CampusNexus Finance, HR & Payroll.
- CampusNexus Student no longer provides an option to void transactions for which checks were issued from CampusNexus Finance, HR & Payroll.
- Checks issued from CampusNexus Finance, HR & Payroll can be voided from CampusNexus Finance, HR & Payroll. CampusNexus Student is updated in real time (no waiting for posting) when the void occurs in CampusNexus Finance, HR & Payroll.

  Note: Unposted transactions cannot be voided.
- CampusNexus Finance, HR & Payroll creates a second voucher upon void of the original check and updates the student ledger in CampusNexus Finance, HR & Payroll to reflect the void.
- CampusNexus Finance, HR & Payroll sends an indicator to inform CampusNexus Student if the void is without a re-issue or a new check is re-issued.
- If a check is re-issued after a void, CampusNexus Finance, HR & Payroll sends the update to CampusNexus Student. To reflect the void with a reissue, two new transactions are created in CampusNexus Student. One indicates the void, the other transaction shows the Check# as 0, marks the transaction a Pending Check, and ensures it is in unposted state.

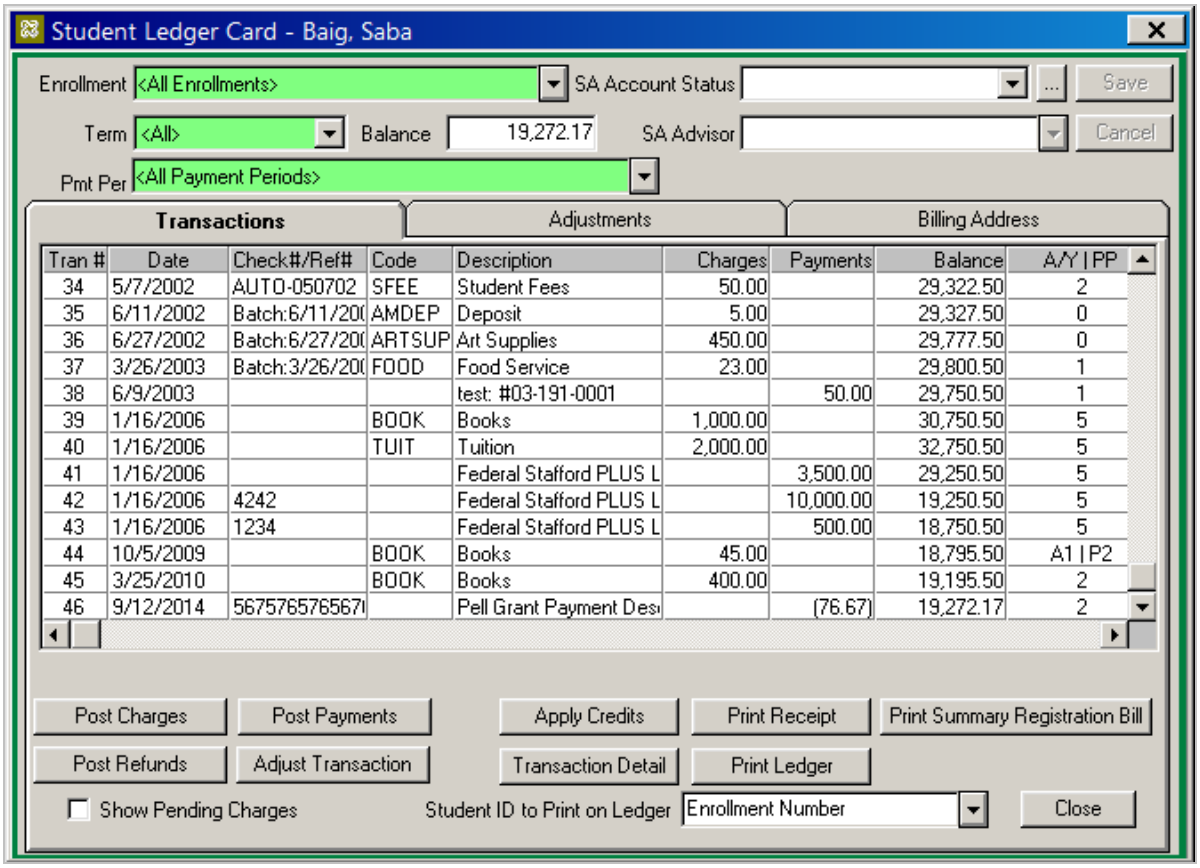
  CampusNexus Student ensures that such a transaction does not appear in the Process Refund/Stipend wizard. The transaction in CampusNexus Student with Check# 0 is updated such that it includes the new Check#, is no longer marked as a Pending Check, and is displayed as a posted transaction.
- CampusNexus Student displays a void transaction that was initiated in CampusNexus Finance, HR & Payroll the same way it currently does when the void is initiated from CampusNexus Student.
- The option to void a Refund/Stipend check is disabled in CampusNexus Student so that the Finance Department that issued the check retains control of voiding the checks.
- Voids initiated from CampusNexus Finance, HR & Payroll are logged in the change history log in CampusNexus Finance, HR & Payroll and CampusNexus Student. The audit report in CampusNexus Finance, HR & Payroll reports voids performed via CampusNexus Finance, HR & Payroll.

- The Returned Check option is disabled in CampusNexus Student when integrated with CampusNexus Finance, HR & Payroll. The workaround is the Void functionality. Any charge as part of a non-sufficient fund (NSF) transaction needs to be a manual charge.

Note: When an award is reassigned, the new Academic Year Start Date and End Date are updated against every transaction in CampusNexus Finance, HR & Payroll. Since this is non-financial data, the updates will occur even for posted transactions.

To adjust a transaction:

1. Select a student.
2. Navigate to **View > Student Accounts > Ledger Cards**. The student's ledger card is displayed.



3. Select the transaction to be changed and click **Adjust Transaction**. Depending on the selected transaction, one of the following forms is displayed:

   - Void/Refund Stipend Check
   - Transaction Adjustment
   - Adjust Payment

   If there is any reason why you cannot adjust the transaction, a message is displayed.

4. Complete any required fields and select the appropriate button.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.
6. After a transaction has been changed, you can see the record of the change by clicking the Adjustments tab on the Ledger Card form.

Void Refund/Stipend Check

Note: When CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll, the Void Refund/Stipend Check option is disabled.

CampusNexus Student allows a refund or stipend check to be voided or modified. When you select Adjust Transaction on the Student Legder Card, if the transaction is a refund/stipend transaction (negative payment), CampusNexus Student displays the Void Refund/Stipend Check form with the transaction details including description, check number, date, etc.

The staff member's permissions determine which adjustment types are enabled.

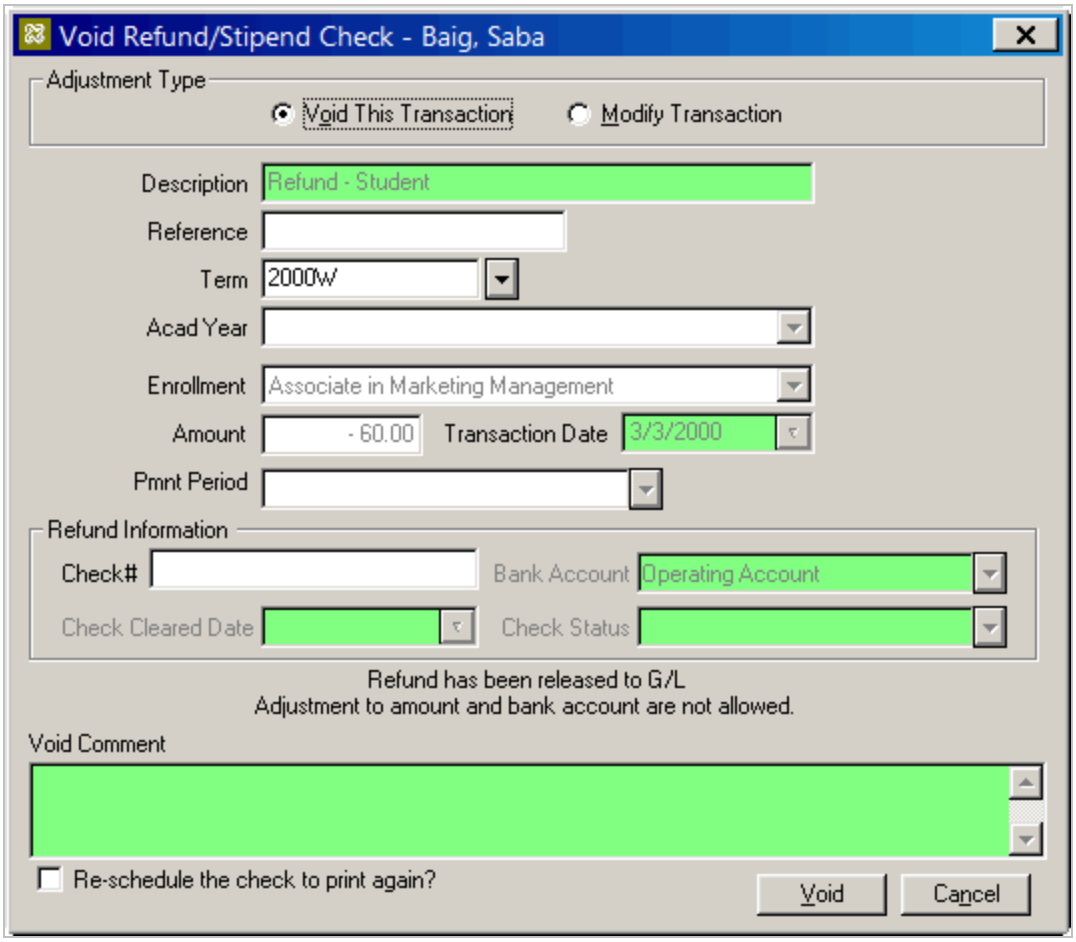
- Void This Transaction is enabled only if the staff member has Void Refund/Stipend permissions.
- Modify Transaction is enabled only if the staff member has Edit Paid Refund/Stipend permissions.

On the Campus Information form (Setup > Campus Locations > Edit (Accounting tab), the Prohibit Void of Cleared Refund and Stipend Checks when option controls whether staff members can void a refund or stipend check if the check status is Cleared.

A check is considered to be Cleared if:

- Check cleared date is not blank;
- Check status is Cleared; or
- Check cleared date is not blank and check status is Cleared.

When you select a refund or stipend from a student's ledger card and click Adjust Transaction, CampusNexus Student checks if the check is cleared. The determination of whether the check is cleared is based on the definition assigned in the campus configuration (i.e., the three conditions noted above). If you choose to adjust a refund or stipend check that is cleared, the **Void This Transaction** button is disabled on the Void Refund/Stipend Check form.



Void This Transaction

a. On the Void Refund/Stipend Check form, select **Void This Transaction**.

b. Enter the required **Comment**.

c. Select or clear **Re-schedule the check to print again?** as required.

d. Click **Void**. The following updates occur:

- A new entry is added to the student's ledger card that reverses the refund/stipend transaction. The Reference for the new transaction is 'VOID'.
- The original transaction is modified to indicate that the check has been voided. This prevents the check from being voided a second time.
- The original transaction information is written to the Adjustments table.
- If the original refund was from a scheduled source of aid, the amount refunded is updated to indicate that the check was voided.
- If you choose to void the check and not reschedule the refund, the refund is marked with a status of 'V - Void'.
- If you choose to reschedule the refund check to print again, the status on the refund check is set to 'N - Not printed'. The check will be printed the next time the Process Refunds/Stipends wizard is run.

Note: When voiding a Direct Loan refund, if Auto create Loan Period Orig. Changes when student Withdraws or Refund is posted? is activated, any pending origination changes created or updated during the refund posting are deleted upon the voiding of the refund.

Modify Transaction

a. On the Void Refund/Stipend Check form, select **Modify Transaction**.

b. Change the **Description**, **Reference**, **Term**, **Check #**, and/or **Academic Year** values.

c. In the **Check Date** field, select a date that the check status was assigned.

d. In the **Check Status** field, select a status The options are:

- Cleared
- Unclaimed
- Sent
- Void

Note: The Check Status and Check Date fields are usually populated through an API; however, users can edit them.

e. Enter an **Adjustment Comment** to document your changes.

f. Click **Save**.

Transaction Adjustment

1. On the Transaction Adjustment form, edit the field values as needed.

   If an academic year is specified in the Acad Year list, you can filter the choices available in the Payment Period list to only the payment period records associated with the academic year record.

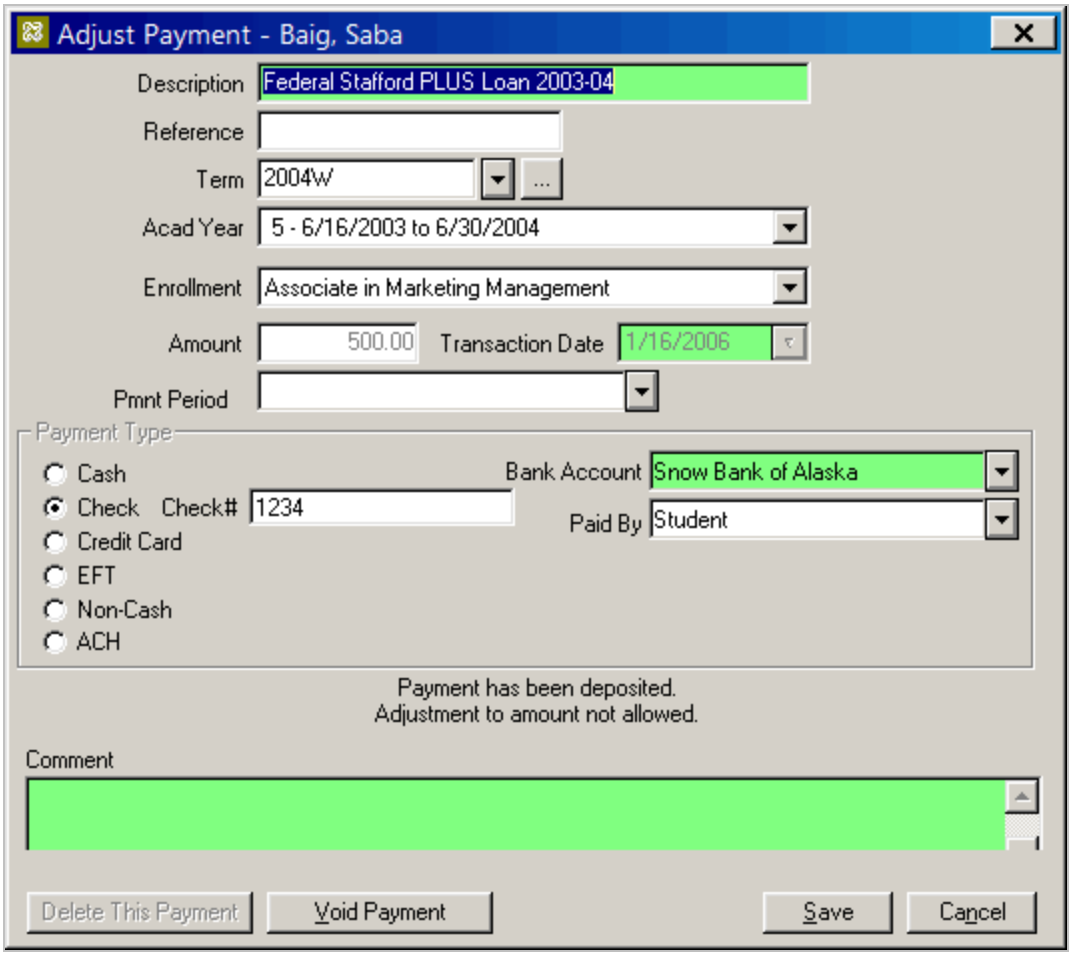
   The enrollment status and enrollment ID appear after each listed enrollment to help distinguish to which enrollment a transaction is being transferred.

2. If necessary, click **Delete This Transaction** to remove the transaction from the student's ledger card. The deleted transaction is displayed on the Adjustments tab of the Ledger Card.

3. Click **Save** to save your changes.

Adjust Payment

1. On the Adjust Payment form, select appropriate options depending on the adjustment needed and your permissions to perform that adjustment.



- The **Payment Type** section is enabled, if you have permission to edit payments.
- The **Delete This Payment** or **Delete this Transaction** button is enabled if you have delete permissions for adjusting a transaction and the payment has not yet been deposited.
- The **Returned Check** button is enabled if the payment has been returned by the bank.
- The **Void Payment** button is enabled if you have void payment permissions and all of the following conditions are true:

  If the payment selected for adjustment is UNSCHEDULED:

  - Source = S in the SA transaction file.
  - Type = P in the SA transaction file.
  - The FA Student Aid ID is NULL in the SA transaction file.
  - The FA disbursement ID is NULL in the SA transaction file.
  - The sent back flag = 0 in the SA transaction file.

  - OR -

  If the Transaction chosen for adjustment is SCHEDULED:

  - Source = S in the SA transaction file.
  - Type = P in the SA transaction file.

- The FA student aid ID is type CASH or OTHER.
- The sent back flag = 0 in the SA transaction file.

When you click Void Payment, CampusNexus Student creates a new transaction record to indicate the voided payment and updates the disbursement, student aid, and financial aid schedule records to reflect the voided payment. It also updates the enrollment, student, and transaction adjustment history file for all voided payments. (The record is not deleted from the Student Accounts Transaction File.)

A new record is created in the transaction file:

- Type = P
- Source = S
- SentBack = 1
- Ref = VOID
- Descrip = "VOID" + Original Description
- Amount = Original transaction amount multiplied by -1
- All other information should remain as the original transaction.

A Financial Aid disbursement can be voided even if it has already been released to the General Ledger. CampusNexus Student posts a reversing entry in the amount of the original disbursement to the student's ledger card. The FA disbursement record status is updated to "V - Void" (instead of deleting the record).

Notes:

- If the Credit Card has expired, the transaction cannot be voided.
- Payment transactions with dates prior to the Minimum Transaction Date of the campus to which the transactions were posted cannot be voided.

2. After you have completed the required fields and selected the adjustment option, a confirmation message is displayed. Click **Yes** to proceed.
3. After a transaction has been changed, you can see the record of the change by clicking the Adjustments tab on the Ledger Card form.

   For information about Transaction Details, see Transaction Details Detail Tab.

Post Individual Refunds

You can post individual refunds to student ledger cards. You must specify to which fund source the refund applies. All payment and refund transactions require a bank account for posting. CampusNexus Student processes refunds for enrolled students and new lead students that have not enrolled yet.

If you use any of the posting options–payments, charges, or refunds–and the posting flag is set to Current Campus, you can only post to an enrollment at the current campus. If you try to post transactions for another campus, a message indicates that you are not signed into the campus and posting is not allowed. If the Posting Flag is set to Any Campus, you can post transactions for a student at any campus.

The refund posting procedure uses the Agency description when posting refunds to third-party agencies. The descriptions on the disbursement transaction and the refund transaction will match.

See also Ledger Card and Process Electronic Drafts.

Updating the Direct Loan Disbursement File

CampusNexus Student updates the direct loan disbursement file when a refund is posted to a student's ledger card. Each refund that is posted to a student's ledger card is reported to COD (Common Origination and Disbursement). CampusNexus Student determines if a row should be added to the direct loan disbursement table. A row will be added to the table if all of the following conditions are met:

- The fund source type of the refund is DIRSUB, DIRUNSUB, or DIRPLUS.
- The Use Direct Loan flag is set to true for the student's campus.
- A row exists in the FA Loan table where the Student Aid ID equals the ID for the FA for which the refund is being posted.

If Auto create Loan Period Orig. Changes when student Withdraws or Refund is posted? is activated, an origination change is created for the following reasons during the posting of the refund:

- An origination change record is created to reduce the Award Amount to exclude the gross amount of the refund posted.
- For a fully refunded disbursement, an origination change record is created to exclude that disbursement’s payment period from the Loan Period, if the disbursement is in a payment period after the initial payment period on the loan.

If there are pending origination changes for the Award Amount or Loan Period End Date that have not yet been sent to COD, they will be updated with the corresponding information from the posted refund record.

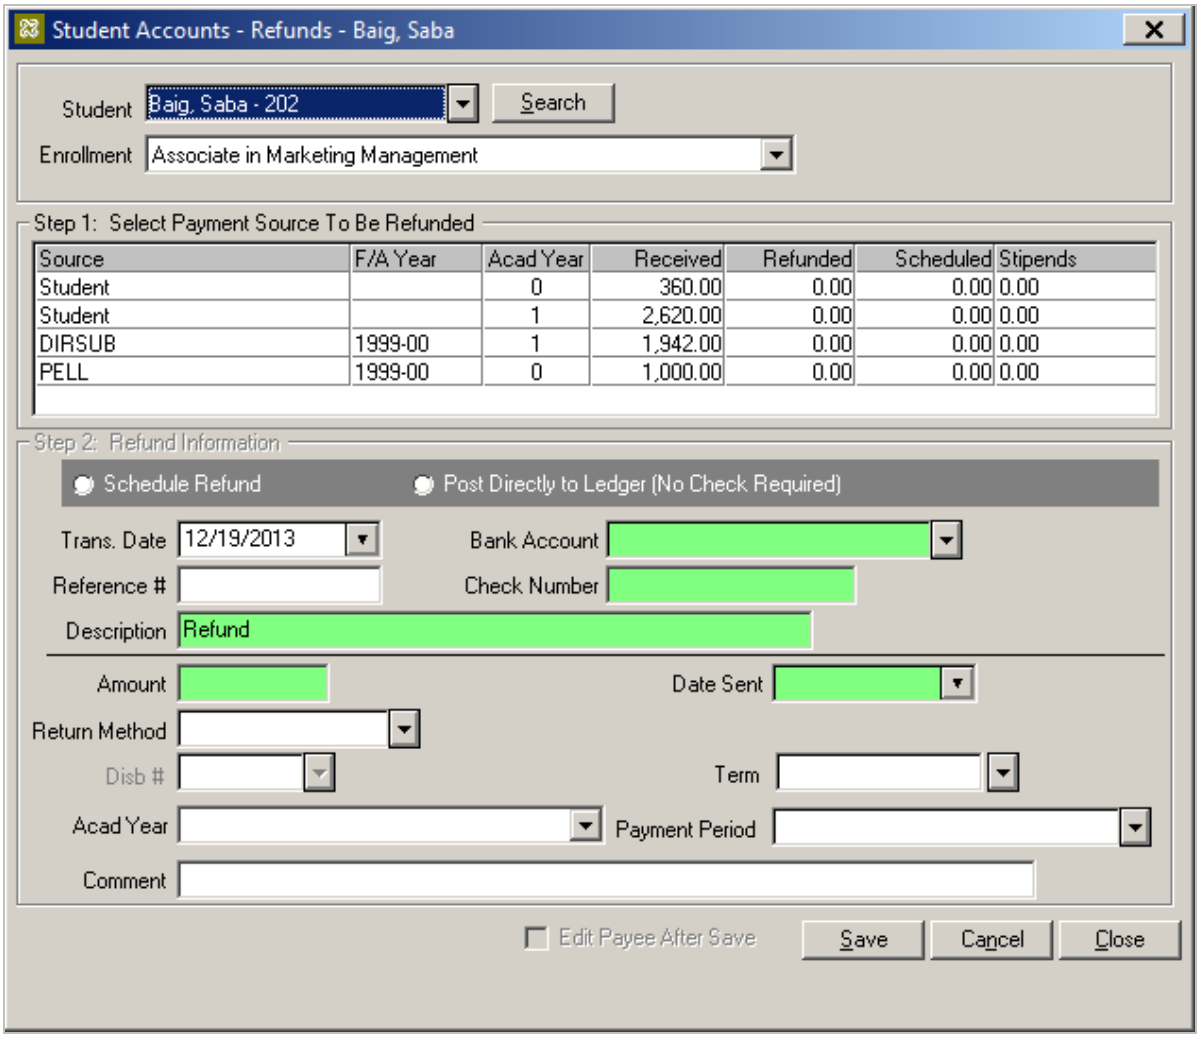
ACH Processing

CampusNexus Student updates the ACH export file when a refund is posted to a student's ledger card and the following applies:

- The fund source type of the refund is CASH.
- The Direct Deposit flag is set to true for the student's bank account.
- The student's institution uses ACH for refund/stipend processing.

To post a manual refund:

1. Navigate **Daily > Student Accounts > Post Refunds**. The Student Accounts - Refunds form is displayed.



2. Select the **Student** to whom the refund applies.
3. Select the **Enrollment** to which the refund applies.
4. Select the **Payment Source** to be refunded. If the selected fund source is deactivated, a message will appear in red and the refund may not be processed.

   If the Payment Source is Student, the Disb # field is disabled. If the Payment Source uses disbursements from an institution, the Disb # field is enabled.
5. Select **Schedule Refund** or **Post Directly to Ledger (No Check Required)**.
   - Select Schedule Refund to add a refund and not post it to the ledger by selecting. CampusNexus Student will add the refund to the "check to print" list via Print Checks functions (see Process Refunds/Stipends). This allows you to schedule refund checks outside of performing a refund calculation. The Schedule Refund option is enabled only if you have Schedule Refund permission.

- Select Post Directly to Ledger when a check has already been issued and you want to record it in CampusNexus Student. The transaction will be posted to the ledger card, but no check will be scheduled. The Apply Refund check box (if present) becomes enabled and can remain selected or be cleared, as needed. The Post Directly to Ledger (No Check Required) option is enabled only if you have Post Refund permissions.

6. Depending on your selection above, enter the **Trans. Date**, **Bank Account**, **Reference #**, and **Check Number**.

   When CampusNexus Finance, HR & Payroll is integrated with CampusNexus Student, the Check Number is required.

7. The **Refund's Description** that was entered when adding or editing the fund source is displayed if one was configured, otherwise the system-defined Refund Description is displayed. You can **override** the Description here. CampusNexus Student will add the fund source and financial aid year to the description entered. The maximum length of the field is 100 characters which includes the addition of the system defined values.

8. Enter the **Amount** to be refunded. Negative refund amounts are not permitted.

   Some refunds are mandatory. Institution are required to refund the funds, and they have to work directly with the student to recover a loss associated with a stipend. CampusNexus Student will allow a refund to be issued to a student for an amount greater than what was paid by the student on the ledger card. If there is a credit balance remaining after all money has been returned, the credit balance may be posted as a refund due to the student.

9. Enter the **Date Due**. Note that this date cannot be any earlier than the Minimum Transaction Date set in the Campus Information setup.

10. In the **Disb #** field, select or enter the disbursement number against which the refund is given. The disbursement number contains an amount that may or may not be equal to the amount being refunded. If the amount being refunded is more than already scheduled for the disbursement, the remainder will be drawn from other disbursements associated with the payment source and enrollment. This applies to DIRSUB, DIRUNSUB, DIRPLUS and Pell only, since the system does not currently create COD adjustments for TEACH refunds.

    A. If the amount is associated with a disbursement number, and the amount is more than the total already set for the disbursement, you are prompted to decide if you want to associate the excess refund amount with other paid disbursements.
    B. If you click No, the message is no longer displayed and you can specify a different total in the Amount field.
    C. If you click Yes, the Refund Assignment - Fund Source form is displayed.
    D. You can then adjust the amounts to be refunded against a disbursement number by changing the number in the Refund Amt. column.

    When a refund associated with a disbursement number is posted, CampusNexus Student flags an adjustment record to be sent to COD. This adjustment will contain the disbursement number that is associated with the refund. This information is exported to COD as an adjustment record with the correct disbursement number and sequence number.

11. Select the **Return Method** (Check, Master Check, EFT, Net, ACH).

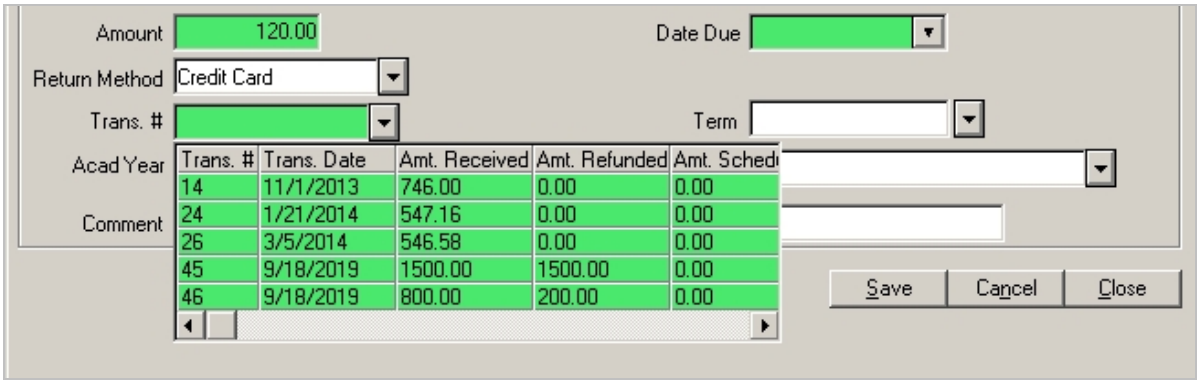
    If the Schedule Refund option is selected, the return method will default to ACH if the campus is configured for an ACH processor for refunds, and the student has at least one checking/savings account configured for direct deposit. ACH is allowed only if the fund source is CASH. If Post Directly to Ledger is selected, the ACH option will be disabled, even if these ACH conditions are met.

    When CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll the following conditions apply:

- When a subsidiary refund transaction is created, Return Method = 'Master Check' is not available.
- When a subsidiary refund transaction is created with Return Method = 'Check', the transaction cannot be voided in CampusNexus Student.

12. Select the Credit Card Type. This field is available when DIRSUB, DIRUNSUB, DIRPLUS and Pell are NOT selected. See also Credit Card and credit card batch setup.

    Note: When Credit Card is selected as the **Return Method** and the student's enrollment campus is configured to use ACI as the payment gateway provider, a required drop-down field appears under the **Trans #** field so you can select a specific transaction. All available credit card transactions associated with the selected payment source are listed with details such as the Transaction #, Transaction Date, Transaction Amounts (Received, Refunded, Scheduled), etc... Since the drop-down field is required, you must select a specific payment to post the refund against to proceed.



13. Enter the **Term**, **Academic Year**, **Payment Period**, and **Comment**.

    The Payment Period field is available (visible on the form) for program versions that can use it (program versions with academic calendars 1, 5, and 6). When Academic Year is selected, this combo box will filter out academic years other than the selection. If the Academic Year box is cleared, all payment periods will be available for selection. If no payment periods exist, the combo box will not be displayed.
    Conversely, when Payment Period is selected, the Academic Year will be auto populated. If Academic Year is modified after Payment Period is selected, this field will be cleared and validated during Save.

    The notation for Payment Periods is `A<n>|P<m>` where `<n>` is the academic year sequence number and `<m>` is the payment period sequence number.

14. Select **Edit Payee After Save** to change the payee information when processing a refund check.

    The Edit Payee After Save check box is disabled if the staff member does not have Edit Payee on Schedule Refund permissions.

15. Select or clear the **Apply Refund** as needed.

    This check box is visible and enabled only if the campus setting for 'How Should Payments Be Applied?' (Setup > Campus Locations > Edit (campus) > Accounting tab) is 'Manual/User Applied' **and** 'Post Directly to Ledger' is selected.

16. Click **Save** to save your refund. The refund will be posted to the student's ledger card.

When a Pell refund is posted to the student's ledger card and the school uses the Pell Processing system, CampusNexus Student will ask the following question: *"Mark this refund as Ready To Send to RFMS?"* If you answer Yes, CampusNexus Student finds the corresponding record in the FA Refund table. If the Pell grant disbursement status is not equal "S - Sent", the status code is replaced with "R - Ready to Send".

If the fund source for the refund being posted is a Direct Subsidized, Unsubsidized, or PLUS loan, a record will be written to the file containing the history of disbursements and refunds sent to COD. On the Direct Loan form, you would see these history records on the Received and Refunds tab under "Disbursements at COD". The View Refunds button is also displayed; users can click View Refunds to note what amounts are being refunded and what disbursements are being associated with those refunds.

After a refund selected for a single disbursement has been saved, it is displayed in the Student Ledger Card form as a refund, with the disbursement number noted in the Description field. It is also displayed in the Transaction Detail form with the total of the refund in the Amount field and the disbursement number associated with the amount in the Disb # field.

After the refunds across multiple disbursements have been saved, they appear on the Student Ledger Card form as a single refund amount with a Description field displaying the Disbursement numbers. It is also displayed in the Transaction Detail form with the total of the refund in the Amount field and the disbursement numbers associated with the amount in the Disb # field.

The disbursements will also properly appear on the Disbursements at COD section of the Rcvd Refund/Stipend tab of the Fund Source form.

Audit Features

The audit features for Student Accounts include:

- CampusNexus Student stores the name of the payee on each refund record, stipend record, and subsidiary refund so that it can be retrieved for reporting purposes.
- CampusNexus Student audits changes to the payee for refunds and stipends. Auditing occurs from the time the refund or stipend is scheduled to the time the refund or stipend is processed. The date changed, time changed, and the user who made the change are audited.
- Payee changes are audited for subsidiaries.
- Payee information for a stipend can be edited regardless of the fund source associated with the stipend. The payee changes are audited for all stipends.
- Your ability to edit a payee for a refund is dependent on the fund source associated with the refund. The payee changes are audited only for the fund sources that allow the payee to be changed.
- You can sort on different columns of the grids available in the Process Refunds/Stipends wizard.
- A student account administrator can define that the Reference information is printed on the check, below the address, or on the stub, or in both places.
- A student account administrator can view the ID of the user who scheduled the refund/stipend using the Ledger Card, Transaction Detail button.
- CampusNexus Student stores the user ID of the user who scheduled the stipend so that it does not get overwritten by the user ID of the user who posted the stipend.

Apply Credits - Student Charges and Payments

If your campus is configured for Auto Apply Using Hierarchy, you can use the Manage Student Ledger form to review, unapply, and manually re-apply transactions.

Note the following before you apply credits:

- Basis = payment period or previous payment period and are limited to transactions within the same enrollment.
- Credit transactions of type I, C, and D are applied to debit transactions of the same transaction code in the same term/payment period regardless of the hierarchy configuration. For example, a -$100 TUIT charge will only be applied to TUIT charge in the same term/payment period. You can choose to override this functionality by manually applying these transactions.
- Void/NSF transactions (debits) are applied to the original credit transactions.
- Refund/Stipend transactions (debits) are applied to payments of the same award type first. Any remaining unapplied amounts on the payment are then applied to open debit transactions based on the hierarchy configuration.

  Example: A $100 SUB payment (credit transaction) is posted to the student's ledger card and has been fully applied to a TUIT charge. A $50 refund/stipend (debit transaction) for the same SUB award is then posted to the ledger card. CampusNexus Studentunapplies the $100 SUB payment from the TUIT charge, applies a $50 SUB payment toward the SUB refund/stipend, and applies the remaining $50 SUB payment to the TUIT charge.

The transaction types and transaction amounts in the tables below refer to the Type and Amount when viewing the Transaction Detail on the ledger card.

Debit transactions (increasing the student ledger balance) include the following:

Debit Transactions

Type	Amount
Invoice	>= 0.00
Debit Memo	>= 0.00
Credit Memo	< 0.00
Payment	< 0.00

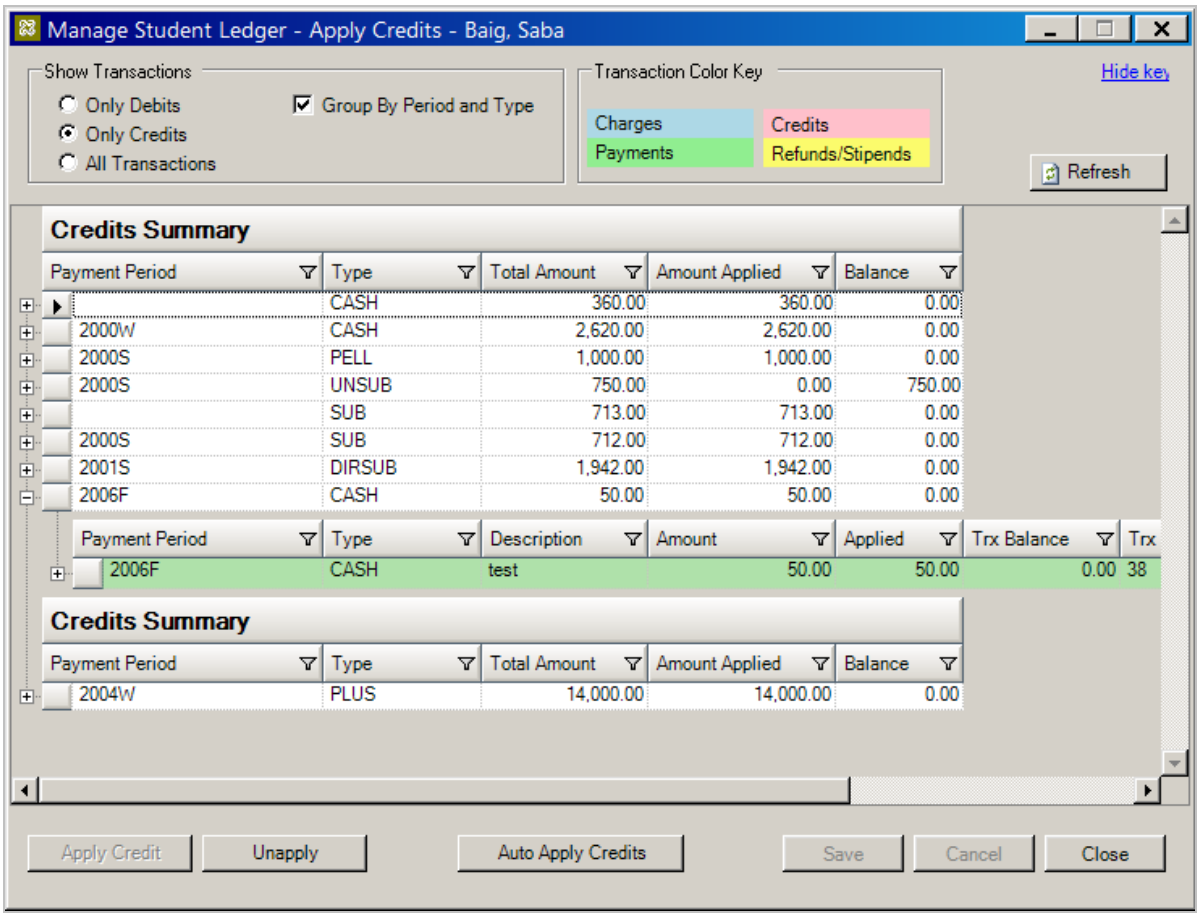
Credit transactions (decreasing the student ledger balance) include the following:

Credit Transactions

Type	Amount
Invoice	< 0.00
Debit Memo	< 0.00
Credit Memo	>= 0.00
Payment	>= 0.00

To apply credits:

1. Select the student whose ledger card you want to view.
2. Navigate to **View > Student Accounts > Ledger Cards**. The Student Ledger Card is displayed.
3. Select a transaction and click **Apply Credits**. The Manage Student Ledger form is displayed.
4. In the Show Transactions area, select the transactions you would like to view. The options are as follows:
   - Only Debits
   - Only Credits
   - All Transactions
   - Group By Period and Type
5. Click the **Show key** link to view the color key for the transactions.



6. Expand the list of transaction by clicking the plus (+) sign next to an item. If an item in the expanded list is a credit, you can see the debits applied to that credit. Conversely, if the item in the expanded list is a debit, you can see the credit associated with that debit.
7. Click on the credit you want to apply. The form lists all transaction types. To find specific transactions, use the following options:
   - Sort the columns by clicking on the column headings.
   - Filter the data in the columns by clicking on the filter icon

. A list of predefined filter fields and an option for custom filters is displayed.

8. Select one of the following actions:

   - Click **Unapply** to remove the credit from a debit. This button is enabled when the currently selected row is a debit transaction with at least one credit applied or a credit row that has been applied to at least one debit. It is also enabled when the current row is a group row with any amounts previously applied.

     Depending on the row selection, the unapply will have different behavior.

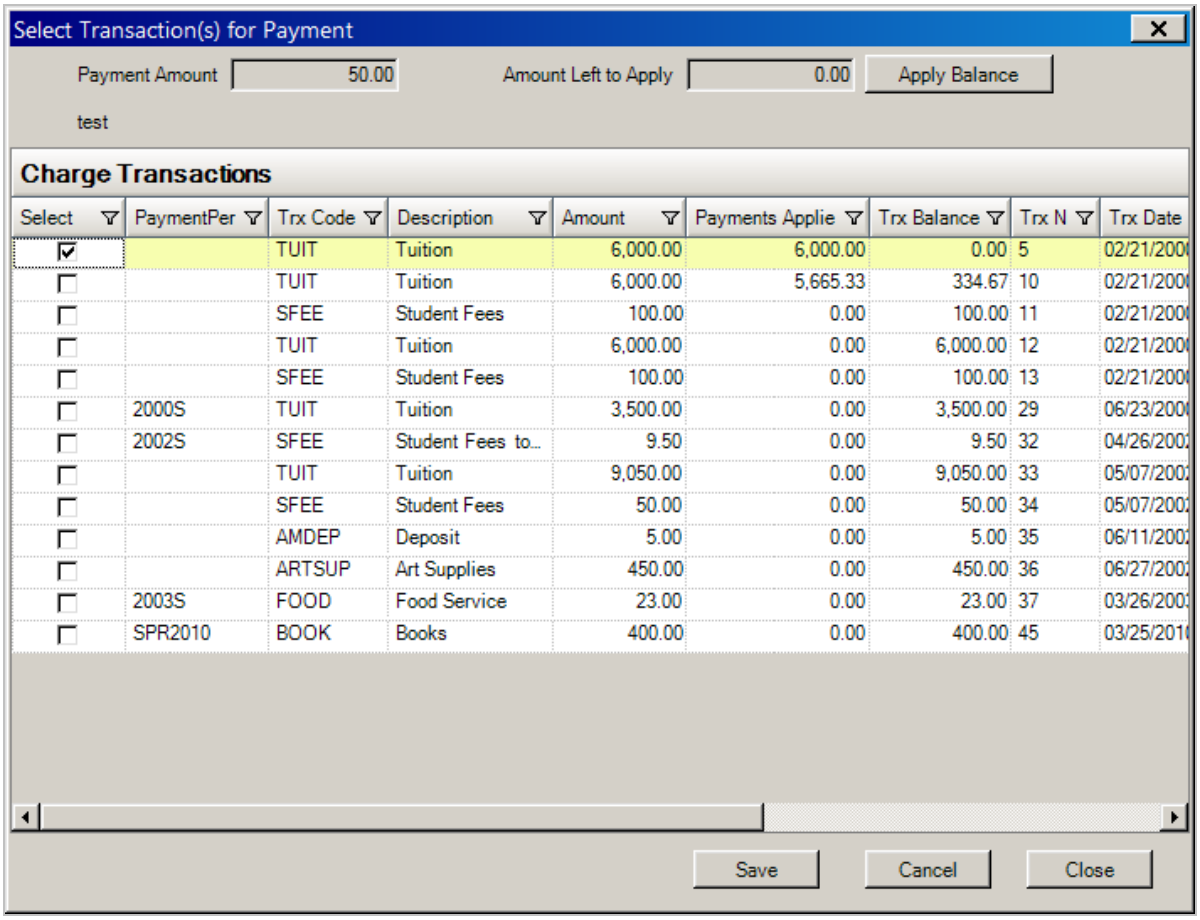
     - If the current row is a summary row (Transactions are Grouped By Period and Type), all detail rows below the selected row will be unapplied.
     - If it is a detail row, only the selected detail row will be unapplied.
     - When selecting this option, groups of transaction types for the selected period can be unapplied at one time. For example, if you have multiple registration fees (REG) of $50 for period 2009W and you want to unapply all the $50 registration fees for the 2009W period at one time, you would do so by selecting the 2009W grid line with type REG and then clicking **Unapply**.

   - Click **Auto Apply Credits** to auto-apply all unapplied credit transactions displayed based on the hierarchies configured in Configure Payment Apply Order. If there are any credits with a remaining amount to be applied, this button is enabled. When you click Auto Apply Credits, the auto-apply logic executes and applies all credits that have balances to be applied.

     - Transactions that are manually applied will not be overwritten by the auto-apply function.
     - You do not need to click Save to apply auto-applied credits because it will occur automatically.
     - You cannot cancel the auto-apply results.
     - After the auto-apply has completed, the transactions are re-loaded into the grid and you can continue manually editing transactions.

   - Click **Apply Credit** to apply credits to debits with open balances. This button is enabled when the currently selected row is a credit that has not been fully applied. When selecting this option, the Select Transaction(s) for Payment form is displayed.

     The *Payment Amount* field shows the original payment. The *Amount Left to Apply* field shows the remainder left from the *Payment Amount* that is available to be applied.



You can apply a credit to any debit with an open balance. You are not restricted by the hierarchy configured.

a. Select the debit(s) you would like to apply the credit to. If you select a debit that reduces the credit to $0 and try to select another debit to apply a credit to, the following message is displayed: *"The full amount of the transaction has been applied. No more items can be selected."*

b. Click **Apply Balance**. The *Amount Left to Apply* is reduced as you apply payments.

c. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Manage Student Ledger form:.

9. Click **Close** to close the form.

Payment Schedule

Institutions send billing statements to students that display the status of a student's payment plan. Use this procedure to set up and monitor a schedule of payments by the student or a third party such as a sponsoring agency. See also scheduling refunds and stipends.

To set up a payment schedule:

1. Navigate to **View > Student Accounts > Payment Schedule**. The Payment Schedule form is displayed. The most recent enrollment is selected by default. The grid is sorted by the First Payment Date field. The oldest value is listed first.

   The 'Last Statement' column contains the date the last student payment statement was printed for each payment plan. The Last Statement date field is only updated for Student and Agency Payments with a Fund Source type of 'Cash' when the student statement process is completed (**Daily > Student Accounts > Student Payment Statements**). This field is updated with the system date when you confirm that the statements was printed correctly and click **Finish**in the Print Student Statements wizard. Institutions can reference the Last Statement date field on the Payment Schedule form (**View** > **Student Accounts** > **Payment Schedule**) to ensure that the billing statements are sent out to the students on a regular basis.

2. Select or clear the **Show Scheduled Only** check box. When the check box is selected (default), only payment plans with at least one scheduled payment not yet received are displayed. When the check box is cleared, all payments regardless of their status are displayed.

3. Click **Add** to start a new payment schedule. The New Source of Aid form is displayed.

   - OR -

   Select an item on the grid and click **Edit** to view the data for an existing schedule. The F/A Student Cash Payment/Other form is displayed. Skip to step 8.

   Note: If a staff member does not have permission to edit a payment schedule, the Edit button is disabled. The Delete button is disabled if the staff member does not have permission to delete payment schedules.

4. In the New Source of Aid form, select the **Source**, **Academic Year**, and **Award Year**. A warning message is displayed if you do not choose an academic year to which the payment schedule applies. Select the Fund Source type of 'Cash' if you want the Last Statement date field to record and update the date the last student payment statement was printed for each payment plan.

5. Enter the **Gross Amount** of the payments.

6. Select the **Status** of the payment schedule. The options are:

- Estimated
- Approved
- Pending Approval

7. Click **Continue**. The F/A Student Cash Payment/Other form is displayed.
8. In the F/A Student Cash Payment/Other form, select the **Student Payment** or **Agency Payment** option. The Student Payment option is described here. The Agency Payment option is slightly different. You need to select a previously set up agency.
9. Select the **Status** of the payment schedule. The options are:
   - Estimated
   - Approved
   - Pending Approval

   If you are setting up a new payment schedule, you will have selected the initial status on the New Source of Aid form.
10. Enter the **Number of Payments**, **Interest Rate**, **Payment Frequency**, and **First Payment Date**.
11. Click **Calculate** to have CampusNexus Student calculate the dates and amounts of each payment on the schedule. The list of payments is displayed in the grid.

    Note: If your institution set up a rule to restrict payments to a fixed number of days past the graduation date, CampusNexus Student displays a message indicating that all payments are due by ___. You are prompted to confirm the recalculation of the payment plan.

    - When you click **Yes**, CampusNexus Student calculates a valid payment plan.
    - When you click **No** and recalculate the payment plan yourself, make sure not to schedule a payment past the limit. This feature is set up in Setup > Campus Locations > Campus Allow...
12. For each payment, select the **Term** to which the payment applies. This is optional but useful information. When packaging a Student Cash payment plan, the individual payments can be edited after the payment plan is calculated.
13. The **Status** of each payment is initially set to **Scheduled (S)**. CampusNexus Student changes the status to Paid, Cancelled, and so on as each scheduled payment is paid or otherwise processed.
14. A **Print Promissory Note** button is displayed if the "Allow Printing Promissory Note" option has been activated for the campus via the Lists > Financial Aid > Fund Source path and a location has been designated for custom reports. If either of these settings are not set up, the standard promissory note is printed instead of the custom promissory note.
15. Click **Save**.

    The other tabs on F/A Student Cash Payment/Other form provide tracking information about the scheduled payments.

    - The Payments Received tab shows a list of payments received from the student or agency. It also maintains the Total Paid, the Principal Balance, the Interest Balance, and the Next Payment Due date.
    - The Refunds tab shows a list of any refunds made to the student or agency. It lists the Refund Due Date, Date Sent, Refund Amount, Refund Check Number, and Refund Status.
    - The Auto Draft tab has two fields for selecting accounts. Use the top 'Select Account' field for ACH

processing. The bottom field is for credit card processing. Select the option 'Credit Card Authorized for Automatic Payment' and select a credit card account from those on file that the student wishes to be debited for payments. Select an Effective Date. This is the date on which the payment schedule begins.

Note: It is assumed that credit card payment has already been set up for this student via View > Student Accounts > Payment Information.

- The Comments tab offers a text window in which you can enter comments about the student's payment schedule.

16. Click **Close** to close the form. You are returned to the Payment Schedule form. Click **Close** to close the form.

Payment Schedule Date Calculations:

CampusNexus Student calculates payment schedule dates as illustrated below:

First Pay Date = 01/30/2004 Number Payments: 6

Payment # Date

1. 1/30/2004
2. 2/28/2004
3. 3/30/2004
4. 4/30/2004
5. 5/30/2004
6. 6/30/2004

First Pay Date = 01/31/2001 Number Payments: 6

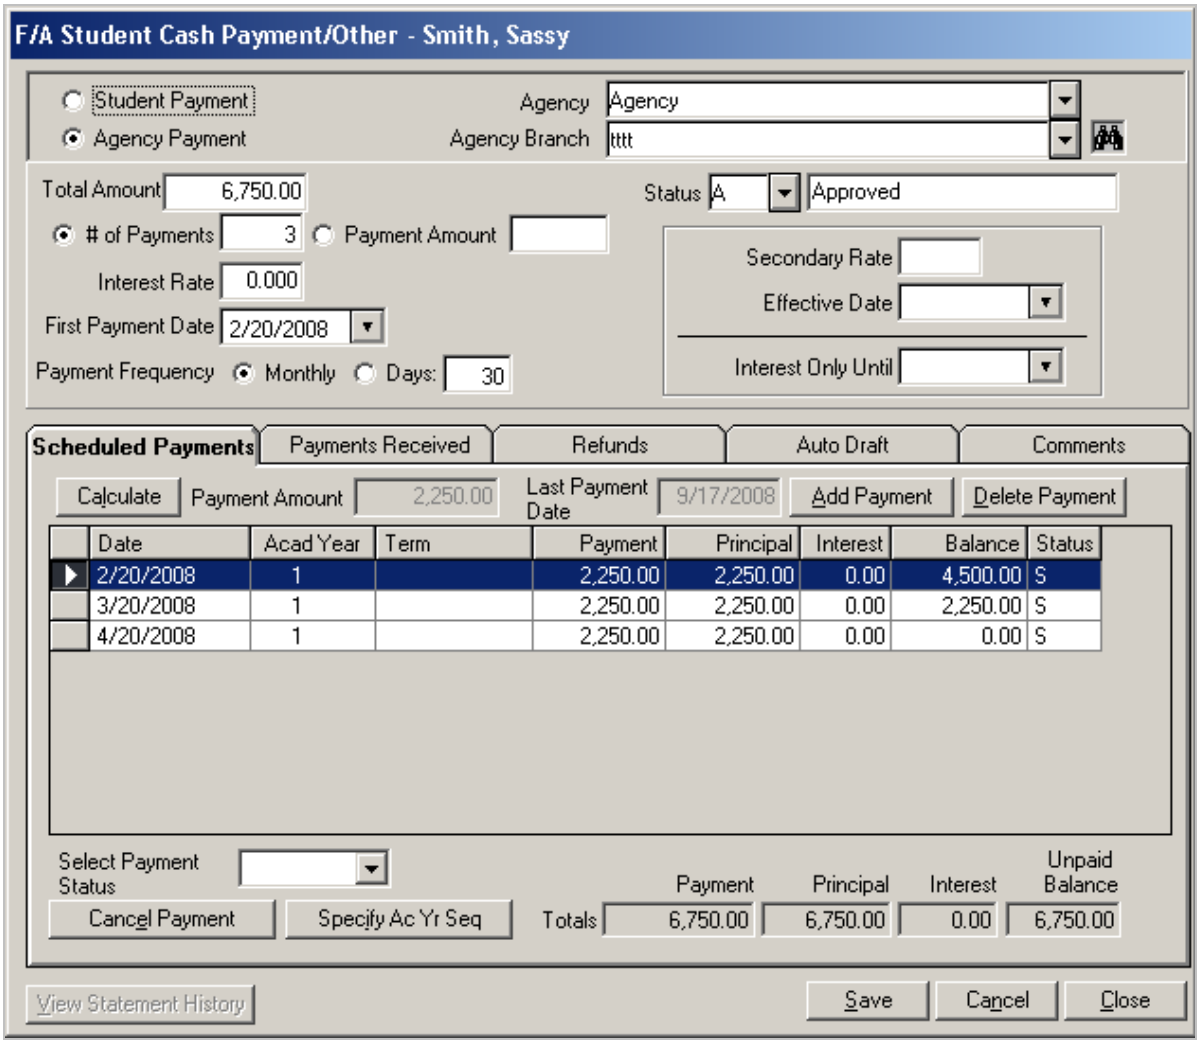
2. 3/28/2004
3. 4/28/2004
4. 5/28/2004
5. 6/28/2004
6. 7/28/2004

Payment Periods

Payment periods are suppressed in the user interface for agency and student payment plans even though they are available to be configured to use payment periods in the program version setup. The following image shows an example.



Three additional fields appear on this form to allow for the calculation of the NPV (Net Present Value). These additional fields, **Number of Years**, **Discount Rate**, and **Collection Rate**, appear only when the configuration option "Use Individual Institution Loan calculation" has been selected from the Fund Source Code Setup form. These fields are populated once the award is saved. If any of these values are missing, the loan will not be included in the 90/10 Report calculations. For more information see the 90/10 Report NPV Calculation Options under Lists > Financial Aid Sources > Fund Source.

Payment Adjustments

Payment adjustments have an effect on your cash account (bank deposit) and possibly on your Credit Card Payments Receivable account. They show up in the Payments column on the Student Ledger Card.

If it should become necessary to "adjust" a payment transaction, you can enter the selections as you did in the original payment, but enter the adjusting amount as a negative value. You cannot "apply" the negative payment to a charge transaction because you can only enter positive amounts on the "Apply to" grid. You will have to reduce the amount of the charge with a charge adjustment to offset the payment adjustment.

When Pell disbursements are posted to the student's ledger card, the disbursement records will be marked as Ready to Send to RFMS if they have not already been marked as such. This is only applicable if the fund source type is 'Pell'.

If the fund source for the payment being posted is a direct subsidized, unsubsidized, or PLUS loan, a record will be written to the file containing the history of disbursements and refunds sent to COD. On the Direct Loan form, you would see these history records on the Received and Refunds tab under "Disbursements at COD".

Apply Payments to Charges

When a student receives a payment or credit transaction, you can apply the payment to specific charges. The Apply Payments/Credit form displays the current list of open charges for the student.

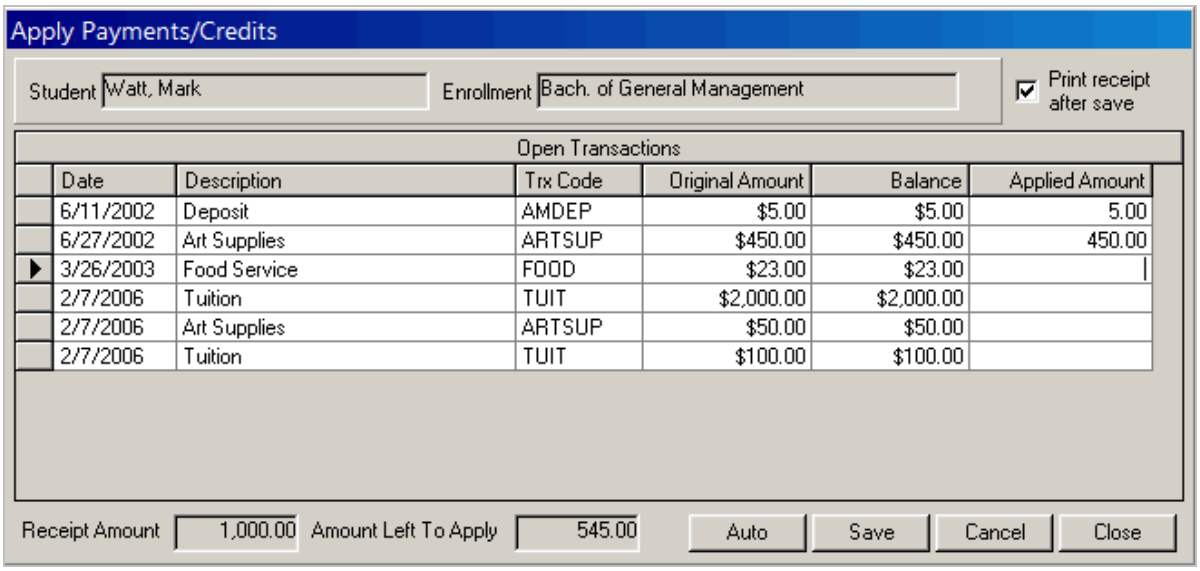
Note: When CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll, CampusNexus Student sends the details of the transaction to which payments were applied to CampusNexus Finance, HR & Payroll during the Release to General Ledger. The transaction details include:

- Payment Transaction ID
- Transaction IDs for the charges towards which the payment was applied. (One or more charge Transaction IDs depending on if the payment was fully applied or partially applied.)
- Amount applied towards each charge.

If a payment was partially applied, CampusNexus Student continues to show the remaining amount that can be applied in the Apply Payment/Credits form.

To apply payments to charges:

1. Select the student whose ledger card you want to view.
2. Navigate to **View > Student Accounts > Ledger Cards**. The Student Ledger Card is displayed.
3. Select a payment or credit transaction and click **Apply Payment** to apply it to specific charges. The Apply Payments/Credit form is displayed containing the current list of open transactions for the student. Note the *Receipt Amount* and *Amount Left to Apply* fields at the bottom of the form.



4. Enter all or part of the payment received in the **Applied Amount** column of the transaction you selected. The *Amount Left to Apply* will be reduced by the amount you enter.

   If the payment received is to be applied to more than one open transaction, select another transaction and enter more of the payment received amount. Continue until the *Amount Left to Apply* is reduced to zero.

   Note that you must tab out of the Applied Amount column before the amount you enter will actually be applied to the selected transaction.

5. To print a receipts after you save the payment distribution, select **Print receipt after save**.

6. To automatically apply the payment to the oldest outstanding charges, click **Auto**. CampusNexus Student will apply the payment in order to the open transactions until all of it has been applied.
7. Click **Save** to complete the payment application procedure. CampusNexus Student will save the distribution of the payment and display a confirmation message. Click **OK** to acknowledge the confirmation.
8. If *Print receipt after save* is selected, CampusNexus Studentprints a receipt on your designated receipt printer. (Your receipt printer must be set up by the system administrator in advance of any print request.)

Stipend Schedule

Stipend schedules are set up to distribute money from financial aid fund sources to the student. Stipends cover living expenses incurred by the student while pursuing a program of study.

You can create one stipend schedule for each academic year defined for the enrollment. You can have unique account numbers for stipends. You can assign each scheduled disbursement to a fund source. This allows stipend disbursements within one stipend schedule to be drawn from different fund sources.

Once the stipend is scheduled, an ACH stipend may be approved to be paid through the Process Refunds/Stipends wizard. ACH batch processing of stipends may occur through the Process Electronic Draft wizard.

Fund Source Security

The fund source disbursements listed in the Scheduled Disbursements tab are limited based on your Stipend Schedule permissions.

- *Edit Scheduled Stipend* permissions for the fund source are required to view fund source information in the Scheduled Disbursements tab.
- *Edit Payee on Scheduled Stipend* permissions for the fund source are required to enable the *Edit Payee After Save* check box.
- *Delete Scheduled Stipend* permissions for the fund source are required to enable the *Delete* button.
- *Cancel Scheduled Stipend* permissions for the fund source are required to enable the *Cancel* / *Re-expect* toggle button.
- Permissions to access all fund sources listed are required to enable the *Calculate* button.

All stipend checks must pass validation before they are printed. An exception message is displayed for each check that is not validated. Access Exception Processing to resolve the issues associated with each check.

Scheduling and Disbursement

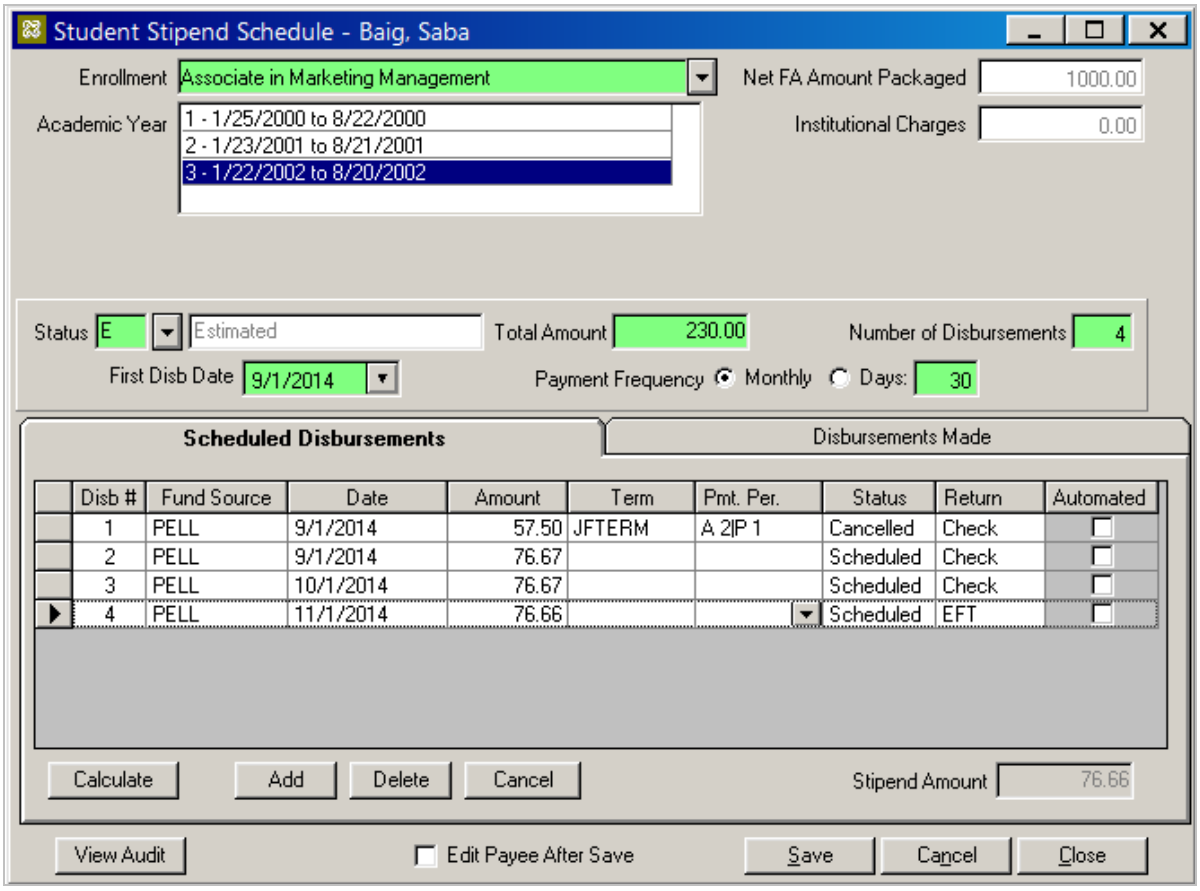
You can allow stipends to be scheduled whether the institutional charges exceed the amount packaged. You can also allow stipends to be posted and issued to the student before the funding is received on the ledger card. You can define these rules using the Student Accounts Settings form (Schedule Stipends, Disburse Stipends, and Limit Stipend Amount) and the Campus Information form (Stipends subtab).

You can schedule stipends through the Student Stipend Schedule form by navigating to the Financial Aid Packaging form (View > Financial Aid > Packaging > Add/Edit button > Stipends button) or directly via the View > Student Accounts > Stipend Schedule path (see below).

Note: Stipend schedules are canceled when a student's status is changed to "Drop". When the stipend schedule is canceled, you can no longer post the stipend disbursements to the ledger card.

To view, edit, or add a stipend schedule:

1. Select the student for whom the stipend schedule is to be maintained.
2. Navigate to **View** > **Student Accounts** > **Stipend Schedule**. The Student Stipend Schedule form is displayed.



3. Select the **Enrollment** for which the stipends are scheduled.
4. Select the **Academic Year** for which the stipends are scheduled.
5. Verify the accuracy of the amounts in the **Net FA Amount Packaged** and **Institutional Charges** fields. If the Institutional Charges are equal to or greater than the Net FA Amount Packaged, stipends cannot be scheduled.
6. Select the **Status** of the stipend schedule. The options are:
   - A- Approved
   - C - Canceled (You can cancel the entire schedule by selecting the **C - Canceled** Status.)
   - E - Estimated
   - H - Hold
   - P - Pending Approval
7. Specify the **Total Amount** of the scheduled stipend.
8. Specify the **Number of Disbursements** to be scheduled. The total amount is divided by the number of disbursements to arrive at the amount of each scheduled disbursement.
9. Select the date of the first stipend disbursement in the **First Disb Date** field. You can backdate a stipend schedule if necessary.
10. Select the **Payment Frequency**. If measured in days, specify the number of days between disbursements.

    Note: Since there are several places to access refunds and stipends in CampusNexus Student, multiple users might try to change one record at the same time. To prevent conflicts, CampusNexus Student locks the record

being updated. If another user tries to access the record, a message indicates that the record is locked along with the name of the user. The lock is released when the user closes the form. In certain scenarios, a system administrator may need to clear a locked stipend or refund record. For more information, see Unlock Refunds/Stipends.

Scheduled Disbursements tab

11. Click **Calculate**. CampusNexus Student fills in the grid with the scheduled disbursements.
    - The *Disb #* column identifies each stipend if there are multiple stipends in the same amount for the same fund source. The disbursement number is incremented with each new record created.
    - The *Date* field indicates the date that the scheduled disbursement will be sent.
    - The *Amount* field indicates the disbursement amount.
    - The *Status* field indicates the status of the disbursement.
    - The *Return Method* field indicates the method with which the disbursement is returned to the student.
    - The *Automated* field, when selected, indicates system generated auto stipends.
12. Click a cell in the **Fund Source** column and select the fund source for each scheduled stipend. The drop-down list shows only those fund sources that are packaged for the student and have a net amount received, or scheduled to be received, greater than zero.

    CampusNexus Student calculates this amount using the formula:

    ```
    (Amount scheduled to be received + Amount received) - (Amount of refunds made + Stipends made + Amount of scheduled refunds + Amount of scheduled stipends).
    ```

    The fund source for a stipend can be edited only if the status of the stipend is *Scheduled*.
13. Click a cell in the **Date** column to select a date.
14. Click a cell in the **Term** column to select a term.
15. The combo box in the **Pmt. Per.** column is available for enrollments with program versions that can use payment periods (program versions with academic calendars 1, 5, and 6). An academic calendar field included in the enrollment combo determines whether the payment period column and its drop-down list are displayed. The notation for Payment Periods is `AY<n>|PP<m>` where `<n>` is the academic year sequence number and `<m>` is the payment period sequence number.
16. Click a cell in the **Return** column to select a return method. The return methods are ACH, Check, EFT, and Net. If the return method is to be ACH, the fund source must be CASH and the institution must be set up for ACH processing.

    Note: When adding a disbursement, the return method defaults to the default method that is specified for the Fund Source and Campus.
17. Click **Add** to add a new disbursement to the schedule.

    When you add a scheduled stipend, CampusNexus Student checks the *Limit Stipend Amount* flags.

    - If the flag is *Yes*, CampusNexus Student prohibits the amount of the scheduled stipend from exceeding the amount packaged for the selected fund source.
    - If the flag is *No*, CampusNexus Student allows the scheduled stipend regardless of the net amount packaged for the fund source.

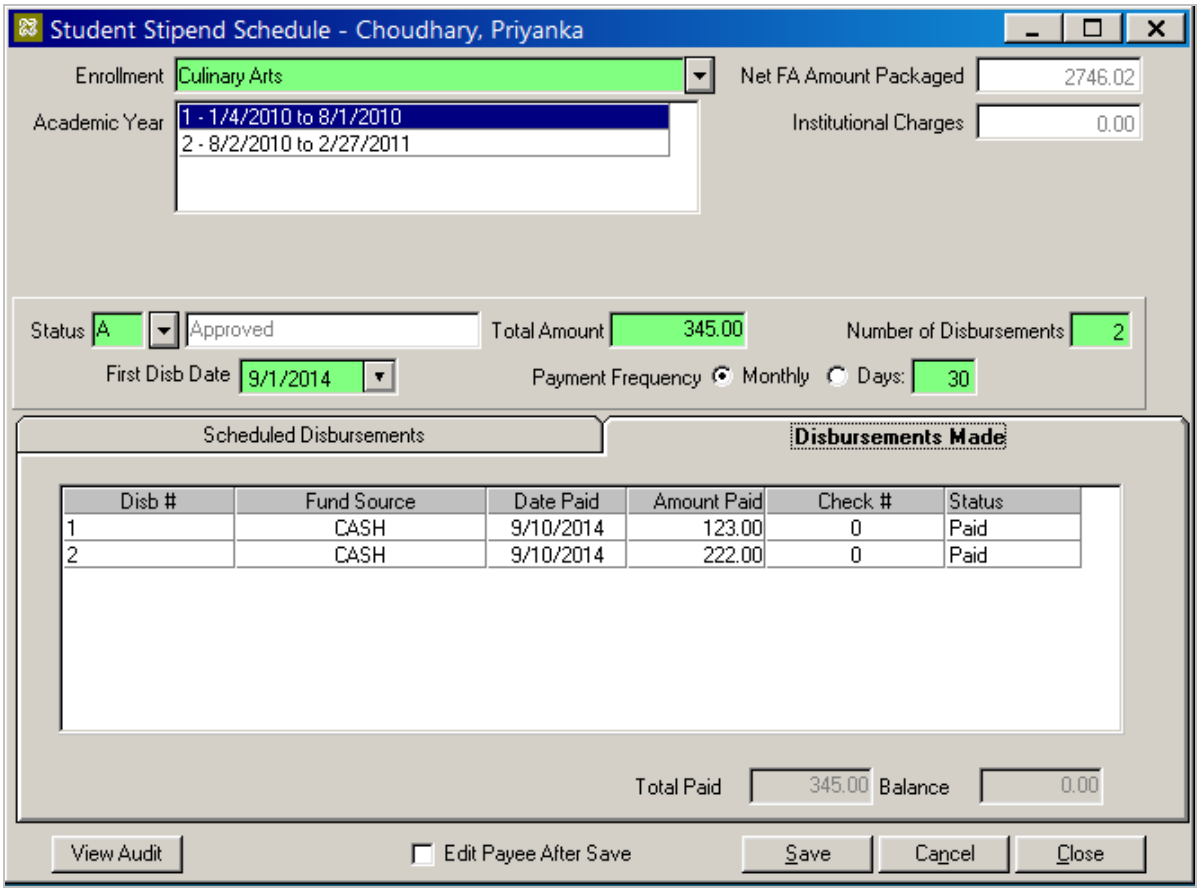
    Note: If your institution has cleared the *Reduces Remaining Balance to Schedule* check box in the Fund Source Code Setup form, "Other" fund sources, paid directly to the student (such as VA benefits) will not be displayed in the grid, and you cannot schedule stipends.
18. Click **Delete** to remove a disbursement from the schedule.

19. Click **Cancel** to cancel a disbursement but leave it on the schedule.
20. Click **Re-Assign** (enabled only for paid stipends) to select a different fund source for the posted stipend. This option does not affect the amount or the term/payment period of the posted stipend. This process voids the original stipend posted and reposts a new stipend with the updated selected fund source. The ledger card will reflect the changes.

    a. Select a fund source from the **Reassign Fund Source** list. Only fund sources that meet all defined rules are listed. The fund source that was originally used to disburse the stipend is not included in the list.
    b. Specify a **Comment**.
    c. Click **Save** to re-assign the fund source.
21. Click **Edit Payee After Save** to change the payee information when processing a stipend check.
22. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Disbursements Made tab

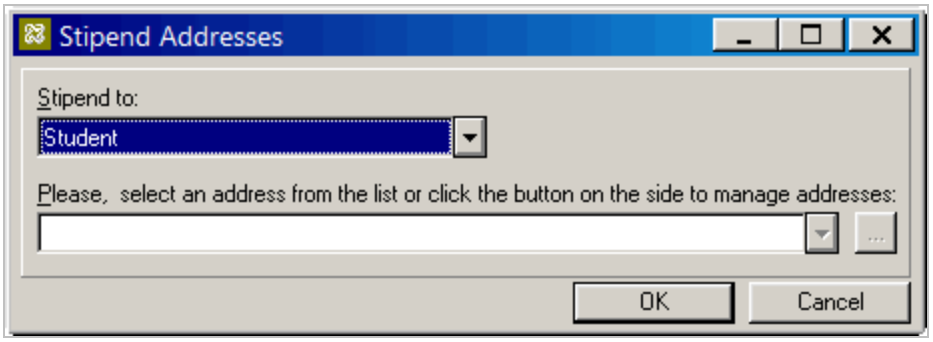
23. Click the **Disbursements Made** tab to view the stipend disbursements paid to the student from the previously established schedule. Data on this tab is read-only.



- *Disb #* identifies each stipend if there are multiple stipends in the same amount for the same fund source. The disbursement number is incremented with each new record created.
- *Fund Source* represents the fund source from which the stipend disbursement was paid.
- *Date Paid* is the date on which the stipend disbursement was paid.
- *Amount Paid* is the amount that was paid.
- *Check #* is the number of the check used to pay the stipend disbursement.
- *Status* is the status of the disbursement, such as Paid, Scheduled.
- *Total Paid* is the total amount paid to date.
- *Balance* is the balance of the scheduled stipends remaining to be paid.

Note: When CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll, the check printing functionality is disabled in CampusNexus Student and checks are printed from CampusNexus Finance, HR & Payroll. The *Date Paid* and *Check#* fields in the Disbursement Made tab will reflect data returned from CampusNexus Finance, HR & Payroll. For more information, see Stipend and Refund Check Printing (CampusNexus Finance, HR & Payroll).

24. Select **Edit Payee After Save** to change information about the student to whom the stipend is paid. The Stipend Addresses form is displayed.

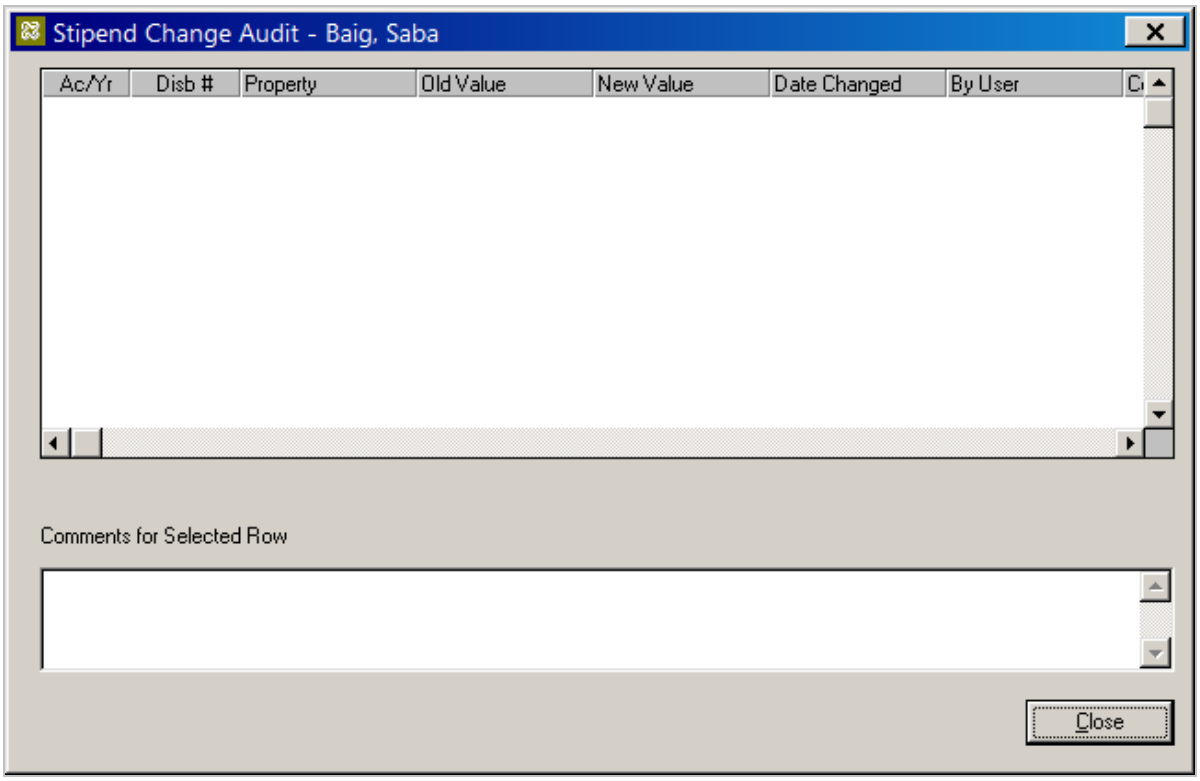


a. Select a value in the **Stipend to** field.

b. Select or add an **address**.

c. Click **OK**. The message *Payee information was successfully saved* is displayed. Click **OK**.

25. Click **View Audit** to track users that have used the Reassign option or adjusted the Payee on the stipend record. The Stipend Change Audit form displays the academic year, disbursement number, property, old value, new value, date changed, user name, and comments.



Revenue Ledger

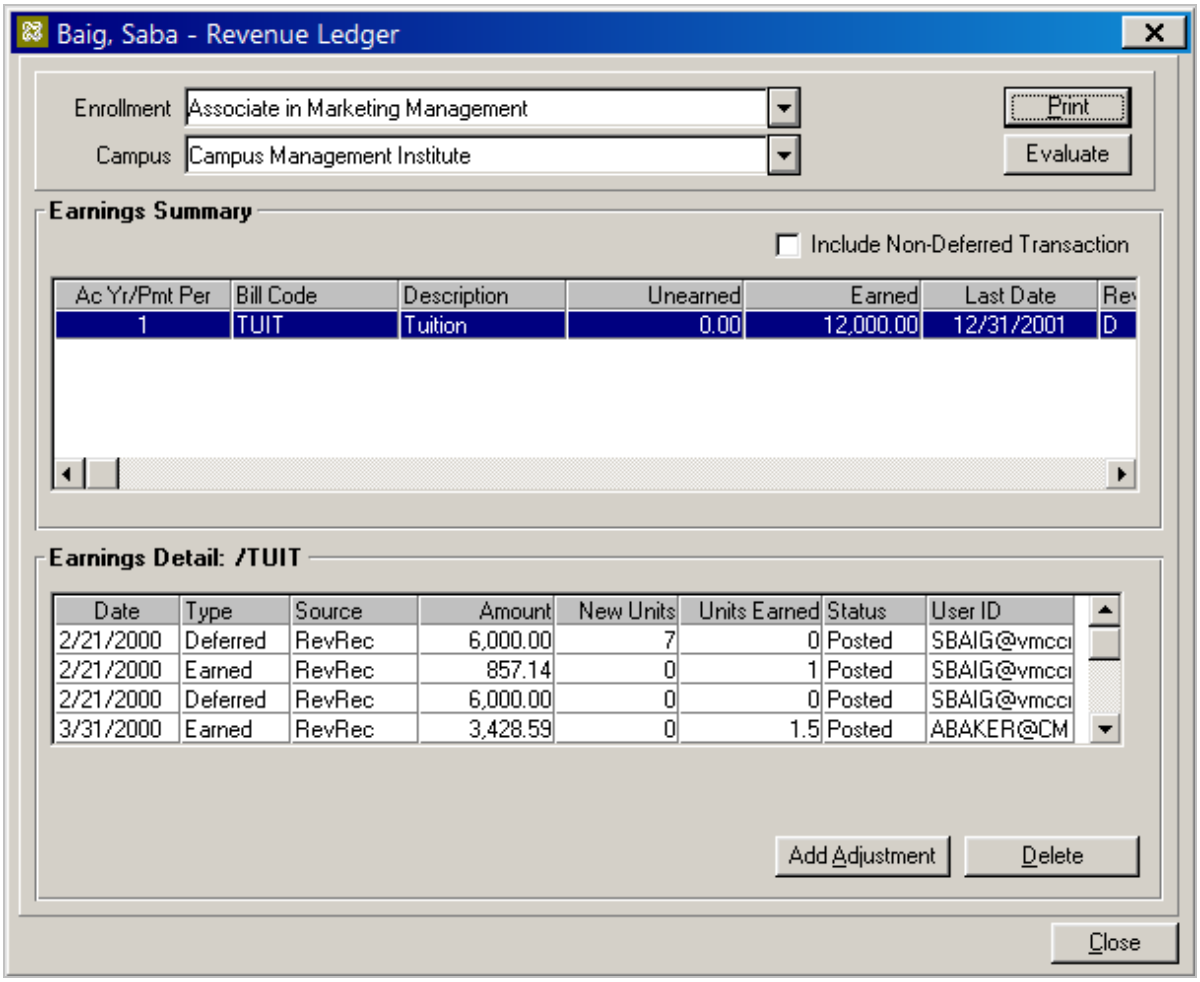
The student's Revenue Ledger shows a list of revenue recognition transactions generated by CampusNexus Student and attributed to the selected student. Detail transactions are added to the ledger each time the Revenue Recognition procedure is processed, typically once a month. The Billing Method for the student is also a factor as to when entries appear in the Revenue Ledger. The transaction codes that show up in this ledger are those that are flagged as deferred revenue transactions when they are set up. See Lists > Student Accounts > Transaction Codes.

It is possible to make adjustments to the student's Revenue Ledger. This may be necessary if data conversion is not as precise as you might wish. You can also print a report of the student's revenue ledger. Once the revenue recognition values in CampusNexus Student are reconciled to your general ledger, you should not have to make adjusting transactions.

The "Units" referred to on these forms are the earning units from the billing method. If your institution is billing for a nine-month program and earning one-ninth of the program tuition per month, a unit is one month and total units will be nine. When making an adjustment, it is possible to adjust only the units, by adding or subtracting one or more units, or by changing the total units. (Keep in mind that this is on a student-by-student basis.)

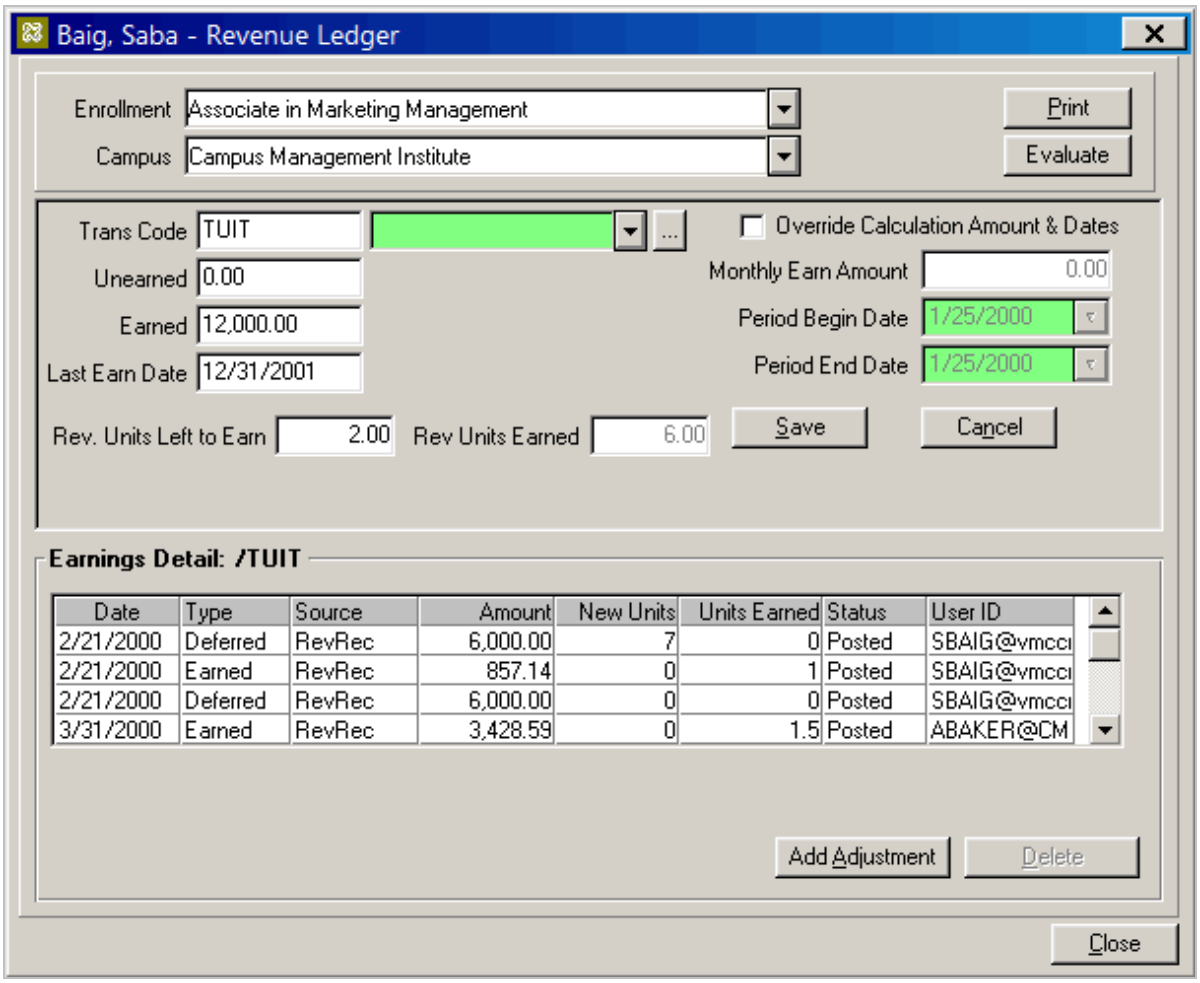
To add an adjustment entry to the student's Revenue Ledger:

1. Select a student.
2. Navigate to **View > Student Accounts > Revenue Ledger**. The Student Revenue Ledger form is displayed.

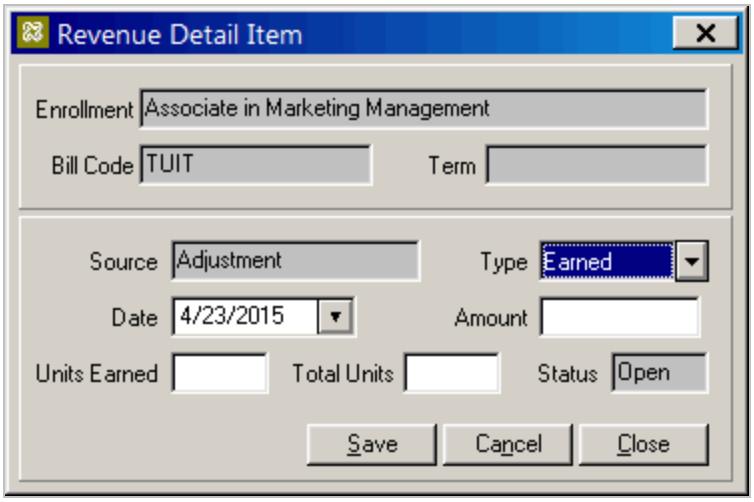


Note: When a bill code transaction is set up to earn over the life of a course, the **Description** column displays the **Course Section: Description**. If not, the description found in the SABillCode table is displayed.

3. Select the **Enrollment** for which the adjustment is to be made. The **Earnings Summary** data for the enrollment is displayed in the top grid on the form. If you click on a summary line in the top grid, the detailed entries that make up the summary are displayed in the lower grid.
4. If the student is enrolled at more than one campus, select the **Campus** to be viewed. If a student takes courses at more than one campus, and the institution bills by term, a student will have deferred revenue for each campus. If the Campus drop-down list is disabled, it indicates that the student is associated with only one campus.
5. Double-click a line in the Earnings Summary grid. The form changes to display more detail and the following editable fields:
   - **Term** - Use the drop-down list to the right of the Transaction Code to select a term. If the term does not appear in the list, click ... to the right of the drop-down to select a term.
   - **Override Calculation Amount & Dates** - Authorized users can override the revenue calculation on a student-by-student basis. Double-click a row on the Earnings Summary grid to display a form on which you can check a box to override the calculated amount and the related dates. When you check the box labeled Override Calculation Amount & Dates" you can enter new values in the Monthly Earn Amount, Period Begin Date, and Period End Date fields. Click **Save**.



6. Click **Add Adjustment**. The Revenue Detail Item form is displayed.

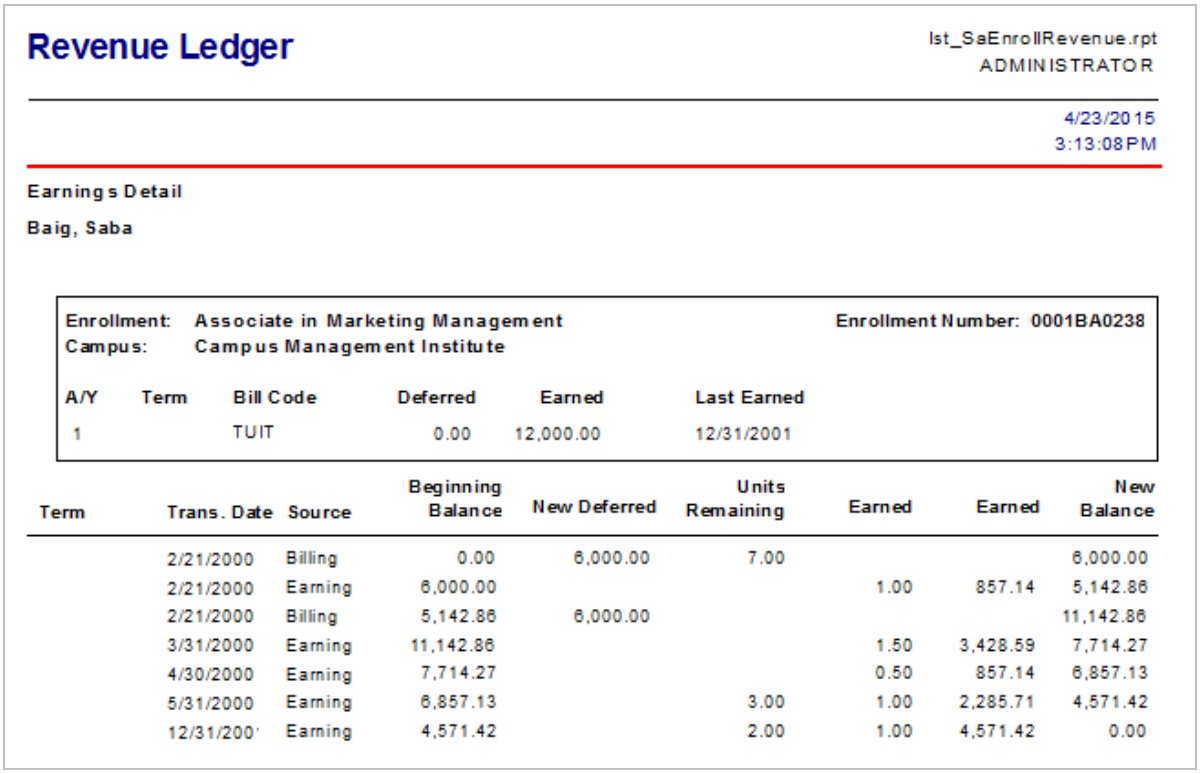


7. Enter the **Adjustment Detail Information**.

Fields Descriptions

Field	Description
Enrollment	The enrollment to which the adjustment applies. Read-only.
Bill Code (Transaction Code)	The transaction code to which the adjustment applies. Read-only.
Term	The term to which the adjustment applies. Read-only.
Source	The source of the transaction. **R** = Revenue Recognition Calculation; **A** = Adjustment. Read only.
Type	Select the adjustment type. The options are Future or Earned. Only the Earned type will affect general ledger balances.
Date	Enter the effective date of the adjustment. When adding an adjustment, the default is today's date. CampusNexus Student checks the minimum transaction date for the campus. It does not allow an earlier transaction date to be entered.
Amount	Enter the amount of the adjustment. It is acceptable to post with a zero amount to adjust the units.
Units Earned	Enter the number of units earned as a result of this adjustment.
Total Units	Enter the total units
Status	The status of the adjustment. Read-only. Status options are **Open** or **Posted**.

8. Click **Save** to save the adjustment transaction and return to the previous form.
9. Click **Print** to print a report of the revenue ledger.



Revenue Ledger

lst_SaEnrollRevenue.rpt
ADMINISTRATOR

4/23/2015

Earnings Detail

Baig, Saba

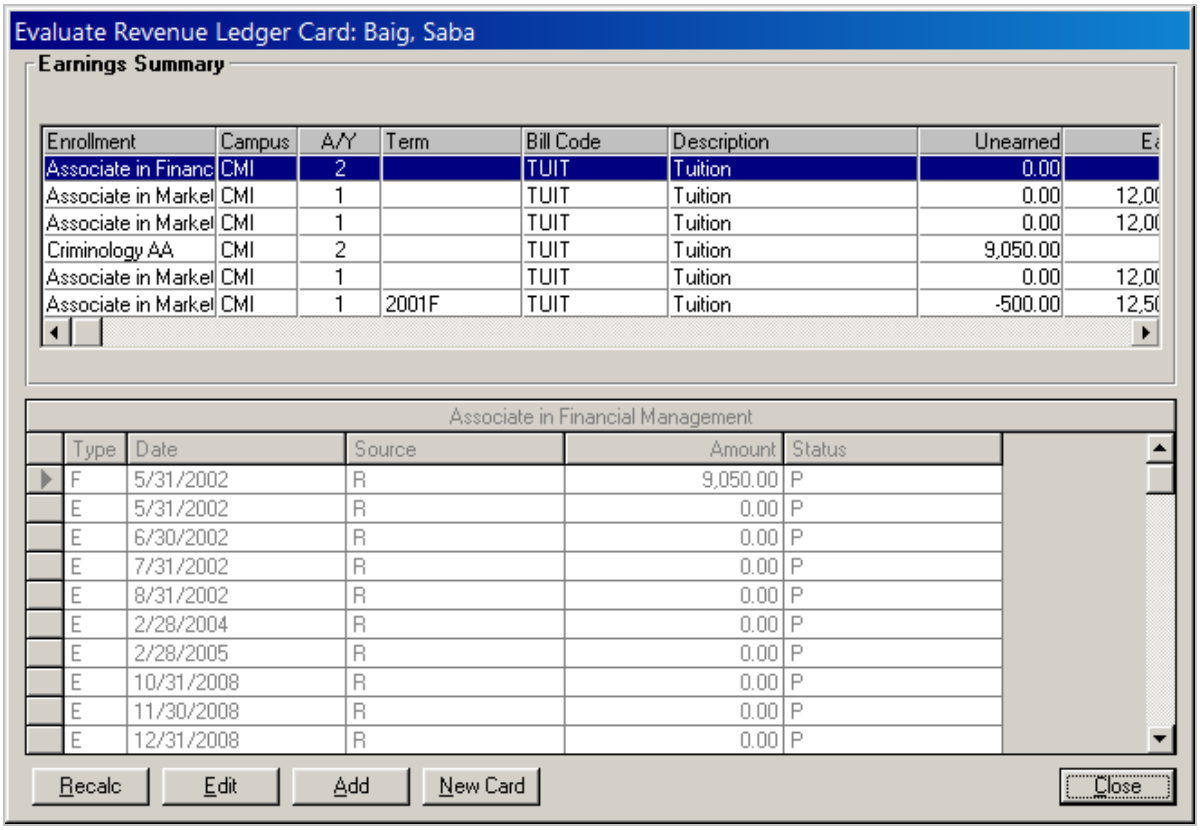
Enrollment: Associate in Marketing Management
Campus: Campus Management Institute
Enrollment Number: 0001BA0238

A/Y	Term	Bill Code	Deferred	Earned	Last Earned
1		TUIT	0.00	12,000.00	12/31/2001

Term	Trans. Date	Source	Beginning Balance	New Deferred	Units Remaining	Earned	Earned	New Balance
	2/21/2000	Billing	0.00	6,000.00	7.00			6,000.00
	2/21/2000	Earning	6,000.00			1.00	857.14	5,142.86
	2/21/2000	Billing	5,142.86	6,000.00				11,142.86
	3/31/2000	Earning	11,142.86			1.50	3,428.59	7,714.27
	4/30/2000	Earning	7,714.27			0.50	857.14	6,857.13
	5/31/2000	Earning	6,857.13		3.00	1.00	2,285.71	4,571.42
	12/31/200	Earning	4,571.42		2.00	1.00	4,571.42	0.00

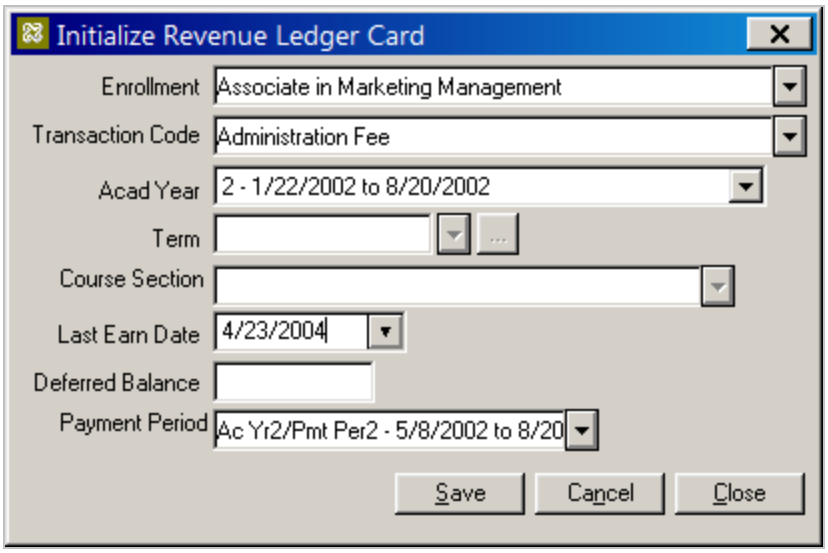
10. The Evaluate button is visible only if you have "Delete" Authority on the Revenue Ledger card.

    Click **Evaluate**. The Evaluate Revenue Ledger Card form for the selected student is displayed. You can edit header and detail amounts and dates, and recalculate header values. This tool is mainly for data cleanup, new campus startup, etc., to clean up data errors regarding revenue.



Note: When a bill code transaction is set up to earn over the life of a course, the **Description** column displays the **Course Section: Description**. If not, the description found in the SABillCode table is displayed.

11. To create a new Revenue Ledger Card, click **New Card** on the Evaluate Revenue Ledger Card form. The Initialize Revenue Ledger form is displayed.



12. Select **Enrollment**, **Transaction Code**, **Course Section**, and **Last Earn Date**.

Note: The Course Section drop-down list is enabled when the following criteria are met:

- Billing Method is set to 'Bill by Course'.
- Earning Method is set to 'Course Section'.
- Transactions are posted to the ledger under a 'TUIT' code.

13. The **Acad Year** and **Term** fields are controlled by the billing method for the enrollment.
    - If the enrollment is billed by Academic Year, the Acad Year field is enabled.
    - If by Term, the Term field is enabled.
    - If by Program, Acad Year and Term are disabled.
14. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Evaluate Revenue Ledger Card form. The new Revenue Ledger Card is added to the Earnings Summary grid.
15. Click **Recalc** to recalculate the earnings summary.
16. Click **Close** to close the form. You are returned to the Revenue Ledger form.Click **Close** to close the form.

Unscheduled Payments

To schedule a payment that has not yet been scheduled for a student:

1. Select an active student.
2. Navigate to **View > Student Accounts > Ledger Cards > Transactions** (tab), and click **Post Payments**. The Post Payments form is displayed.
3. Select an **Acad Year**.

   Make sure that the 'Scheduled Financial Aid Disbursements/Scheduled Student Cash Payment' option *does not* contain a check mark. This allows you to make unscheduled payments.

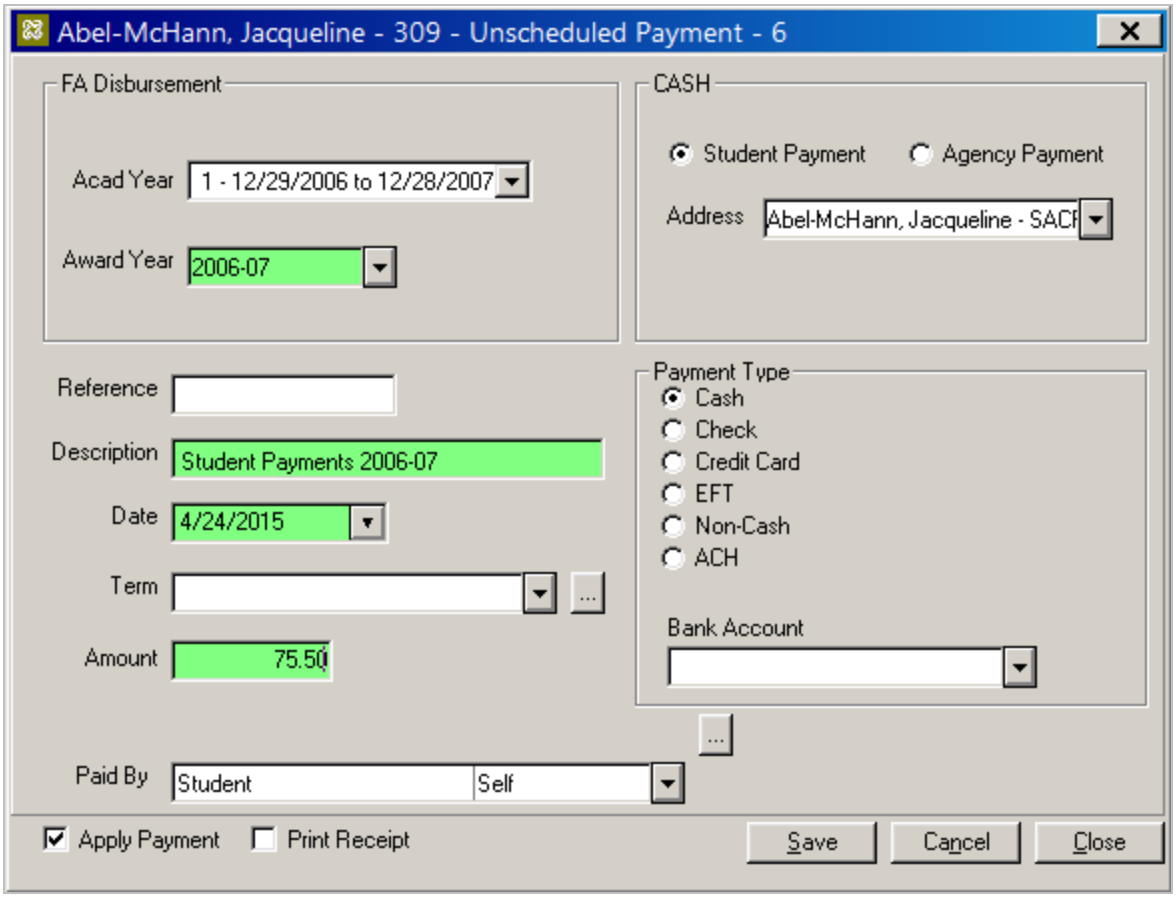
   Note regarding the **Payment Period** field:

   This combo box is available for program versions that can use it (program versions with academic calendars 1, 5, and 6). When Academic Year is selected, this combo box dynamically filters out academic years other than the selection. If the Academic Year box is cleared, all payment periods are available for selection. If no payment periods exist, the combo box is not displayed.

   Conversely, when Payment Period is selected, the Academic Year is auto populated. If Academic Year is modified after Payment Period is selected, this field is cleared and validated during save.

   The notation for Payment Periods is `A<n>|P<m>` where `<n>` is the academic year sequence number and `<m>` is the payment period sequence number.
4. Select a **Source**. The Unscheduled Payment form is displayed.

   The Source list contains fund sources that are associated with the selected academic year. Deactivated fund sources that are associated with the academic year selected are not listed and therefore cannot be processed.



5. On the Unscheduled Payment form, select the **Award Year**. The fund source Description is updated with the award year.

   If you select an award year that contains a deactivated fund source, a message appears in red indicating that the selected fund source for the award year is deactivated and cannot be processed.

6. Fill in the **Amount** field with the amount of the current payment.

7. Optional: Select **Apply Payment** and **Print Receipt**. See Payment Adjustments for additional information.

   Note: This box will only be visible if Auto Apply Using Hierarchy is selected for 'How Should Payments Be Applied?' in the Campus Configuration Accounting tab (Setup > Campus Locations > Add/Edit Campus > Accounting (tab)).

8. Click **Save** to retain the changes, apply the payment (if selected), print the receipt (if selected) and close the form, or click **Cancel** to reset the form to its default settings, or click **Close** to close the form without saving changes.

Refund Calculation

When a student drops out of school, there is often a need to refund money to one or more fund sources. Make sure that you set up Refund policies. The Department of Education requires that you choose the refund policy that returns the most money to the fund sources; in other words, the policy that best benefits the student. As discussed under the setup topic, there is a selected order in which refunded money is distributed to the fund sources. Once your institution's refund policies are established in CampusNexus Student, you can use this option to calculate the best refund for the selected student.

CampusNexus Student has an Automate Refund Calculation setting. When enabled, CampusNexus Student calculates a hypothetical refund for the student, and tracks the progress of the refund process via Drop reports. This field is tied to and populates the Expected Refund Process Date on the Refund Calculation form.

For policies based on hours attended, CampusNexus Student calculates the sum of the student's actual hours attended.

The refund calculation, when based on hours scheduled, includes dropped classes when calculating hours scheduled and hours attended.

The refund calculation based on hours scheduled and hours attended reads data from the attendance table to find hours attended and hours absent. The procedure uses the enrollment schedule to calculate the total scheduled hours for the period.

When calculating the percentage of tuition to retain or refund, if the condition in the policy that matches the student has a Refund Percent Flag = P (indicating pro-rata), the percentage to retain will be the percent completed by the student.

CampusNexus Student uses the unit specified in the Refund Grid Attendance Unit instead of the Refund Policy Attendance Unit if the student's criteria matches a Calculation based on Length condition.

Note: CampusNexus Student provides functionality that automatically rounds Direct Loan funds per COD requirements, and allows configuring Pell and other COD Grants to be rounded as defined in the FSA Handbook. CampusNexus Student recognizes the new configuration and makes the appropriate adjustments when posting the Refund Calculation.

Highlights of this feature include:

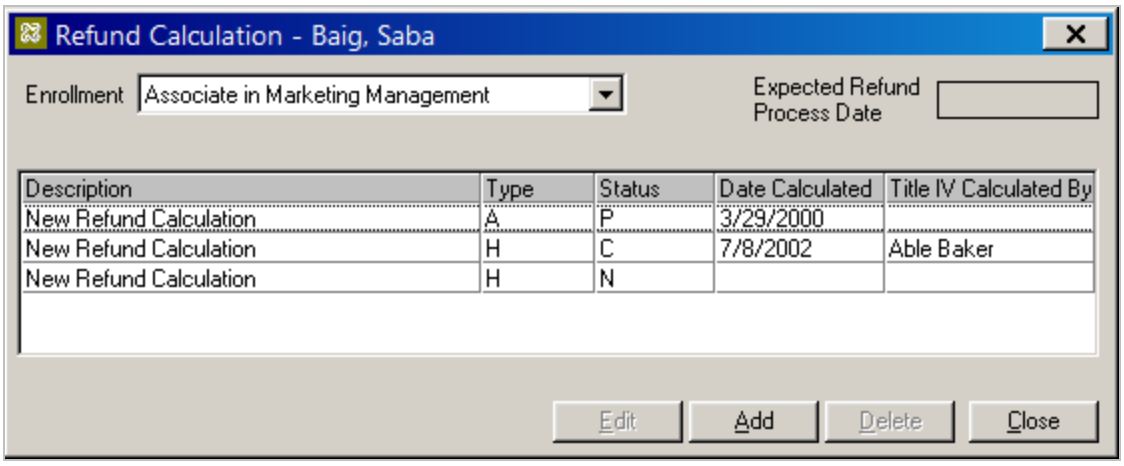
- Configuring rounding to be activated within the Refund Calculations for refund amounts, and for it to be applied when the results from the refund calculation are posted (i.e., the refund calculation results may show a particular fund with cents, but when the results from the refund calculation are posted and refunds are scheduled, the rounding logic is applied rounding the amount to the nearest dollar).
- Ensuring the rounding percentage that is used is within the Refund Calculation for refund amounts per the percentage guidelines as defined in the FSA Handbook, so that rounding percentages are applied correctly when a refund amount is created. The configuration within the Fund Source configuration, the option ‘Round All Disbursements to Whole Dollars’ on the Fund Source Code Setup form, is used for disbursements and refunds to determine if the amount is to be refunded in whole dollars (selected) or not (not selected).
- Allowing the refund amount that is created from the Refund Calculation to be visible to the user and clearly explained so that the user understands any rounding implications, such as the specific amounts that will be used across all forms and processes in CampusNexus Student. For example, the Scheduled Refund Report will reflect the rounded amount so that clients can see the result of the rounding.
- Posting a Refund Calculation for the refund amount that is created (Daily > Student Accounts > Process Refunds/Stipends) to be the rounded amount, so that the amounts posted through the wizard are accurate.

Please read Return of Title IV Funds when calculating a refund involving Title IV funds. See also Tracking NDS students.

To process the refund for a selected student:

1. Select the student for whom the refund is to be calculated.
2. Check the student's status and make any necessary changes.

3. Navigate to **View** > **Student Accounts** > **Refund Calculation**. The initial Refund Calculation form is displayed. If any previous refund calculations have been processed for this student, they are listed on the grid. The Expected Refund Process Date field shows the deadline for processing refunds.



4. Select the **Enrollment** for which the refund is to be processed. If the student is a lead who has not yet enrolled, select **All Enrollments**.

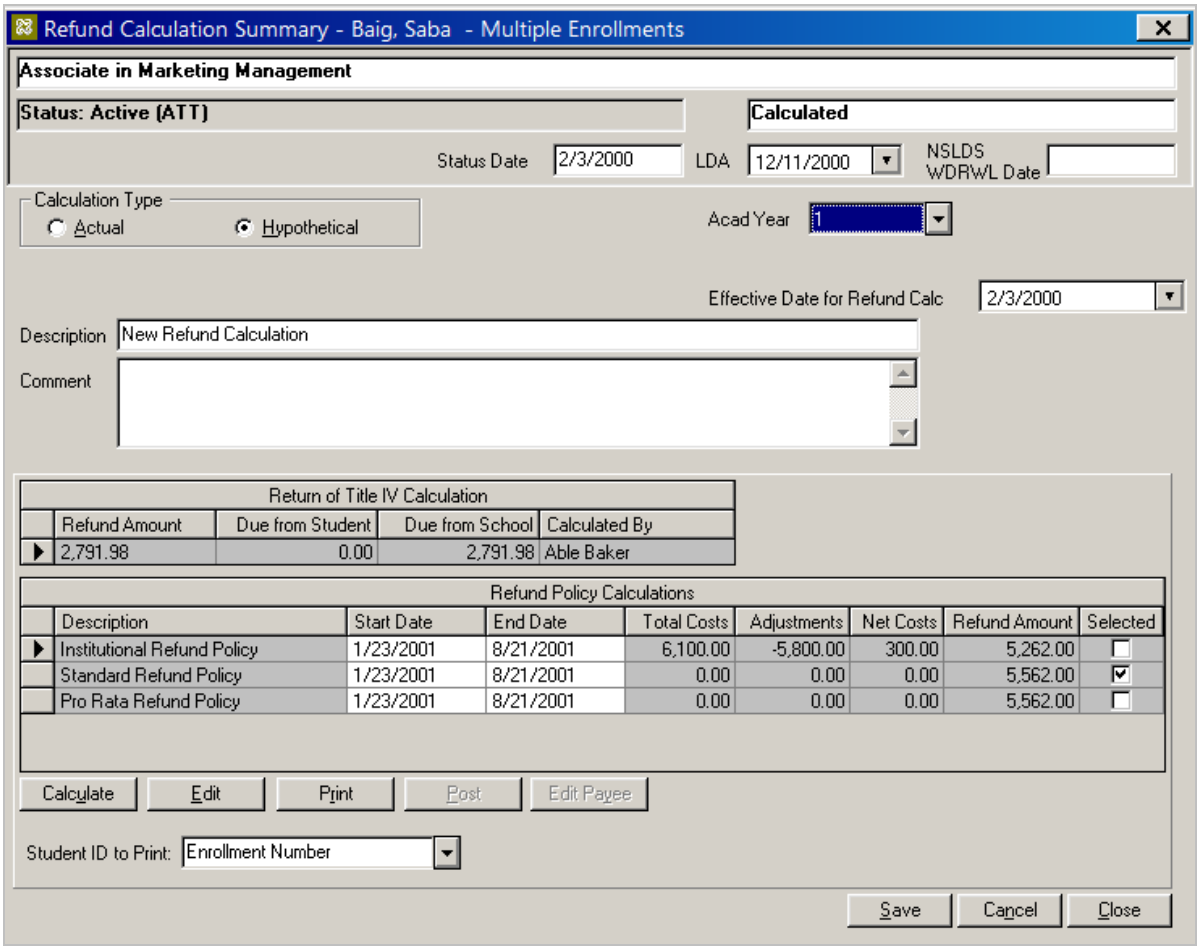
5. Click **Add** to process a new refund calculation, or select a previously calculated refund and click **Edit** to work with it. The Refund Calculation Summary form is displayed.

Note: You can navigate to other areas of CampusNexus Student to verify student information, while using the Refund Calculation wizard.

The following rules apply when you leave the refund calculation form and return:

- If the Return of Title IV Funds Calculation wizard is active, you can navigate to other areas within the application without having to close the wizard.
- You can navigate to other areas within the application from any step within the Return of Title IV Funds Calculation wizard.
- Navigating to other forms within the application while the Return of Title IV Funds Calculation wizard is active will not affect any date previously entered within the wizard.
- If changes are made within the application that will affect the Return to Title IV Funds Calculation data, those changes will be reflected within the Return to Title IV Funds Calculation wizard when focus is returned back to the form. Any data or selections that had been entered manually up to that point will be retained if still applicable.

Menu options such as Lists, View, Daily, etc., are enabled so that you can navigate to other areas of CampusNexus Student while leaving the Refund Calculation form open.



Note: If the student is enrolled in a program version with academic calendar 5 or 6 and billed by payment period, the combo box for **Term** is replaced by the **Payment Period** combo box. If the student is enrolled in a program version with academic calendar 1, both **Term** and **Payment Period** combo boxes will be available. The drop date is used to determine the default value of the Payment Period combo box. The drop date must fall between the start and end dates of the default payment period. When a payment period is selected, the start and end dates are used as the start and end of the R2T4 calculation period.

This field is visible on the Refund Calculation Summary form only when the R2T4 has been calculated on a new calculation or when user edits an existing Refund Calculation which contains a R2T4 calculation. For more information regarding the 'Date Student Ceased Attending' field, see Step 1 of the R2T4 Worksheet in Return of Title IV Funds.

6. Select **Actual Refund** or **Hypothetical Refund**. You can run the hypothetical refund, print the report to use for discussion purposes, and run the actual refund later.

7. When running a hypothetical refund, the **LDA** field can be edited to any desired date, including a future date. The hypothetical refund calculation calculates the time completed based on the LDA entered; however, when the Refund Calculation form is set to calculate an Actual Refund, the LDA field will contain the student's actual Last Date of Attendance and may not be changed.

   If, while performing a Hypothetical Refund, the LDA is changed from it's original value, the following message is displayed: *"Do you want to update Effective Date for Refund Calc with LDA?"*

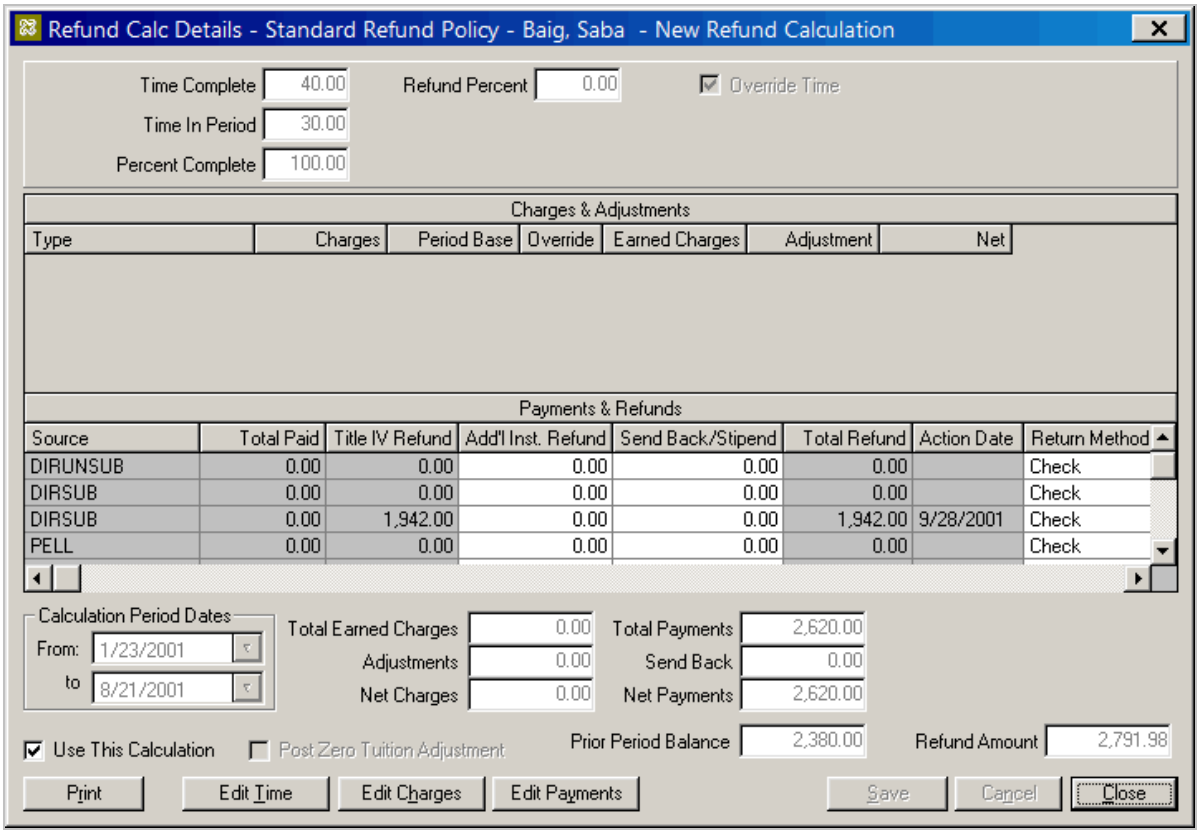
- If you select **Yes**, the 'Effective Date for Refund Calculation' is set to the new LDA.
- If you select **No**, the 'Effective Date for Refund Calculation' is not changed.

Note: For perpetual terms, you will be prompted for calculation period begin and end dates. The dates are needed to determine the period of enrollment for the refund calculation.

8. The NSLDS Withdrawal date is populated only when a Refund Calculation is being calculated for a withdrawn student and cannot be edited. The Actual Refund calculation will calculate the time completed based on the NSLDS Withdrawal Date.
9. Click **Calculate** to run the refund calculation process. CampusNexus Student displays the following message: *"All Refund Policies will be calculated. Ok to continue?"* Click **Yes** to continue.

   CampusNexus Student calculates the refund for each policy and select the result that is most favorable to the student.

   - If a previous Title IV Funds Calculation is found, the following message is displayed: *"Previous Title IV Calculation found. What would you like to do?"* You have the options to **View**, **Edit**, or **Recalculate** the previous calculation.
   - If there are no Title IV funds packaged for the student, the refund calculation is automatically populated, otherwise it is calculated upon completion of the Return of Title IV calculation.
   - If multiple refund policies have been configured and are active, CampusNexus Student automatically selects the calculation that is most beneficial to the student. You can modify the selected option by highlighting the policy and selecting **Edit**.
10. Click **Edit Payee** to display a **Refund Listing form**, which lists all the individual refunds associated with the posted and selected refund calculation. Click **Edit Payee** to change the payee information. Then click **Close**.
11. Click **Print** to print select the Print Summary, Print Detail, or Print Return of Title IV Report option.
12. If there are no institutional refund policies activated when **Calculate** is selected, CampusNexus Student will still calculate the Return of Title IV refunds. Conversely, if institutional refund policies are activated, they will be calculated once the Return of Title IV calculation has been completed.
13. To see the details behind any of the refund calculations on the summary grid, select the row and click **Edit**. The Refund Calculation Details form is displayed.



14. Click **Edit Payments** to edit the Credit Balance column with an amount (it must be less than the total paid amount) other than what was calculated. This is primarily for a refund that results in a credit balance to the student. Once an amount has been entered, you are warned that no further calculations on this refund option can be performed.

    If you agree, click **Save** to save the override amount for this calculation. Once the save is done, the Total Refund column is recalculated and the Refund Amount is updated on the form and on the Refund Summary form.

15. Select **Use This Calculation** if you determine that this is the best one for the student.

16. Click **Print** to print the Refund Calculation Detail report.

    Note: Transaction Codes used to post Adjustments are displayed on this report, as well as Payment Period and Academic Year sequence numbers.

17. If you are calculating an actual refund, click **Post** to post any charge adjustments to the student's ledger card. CampusNexus Student displays a confirmation message asking if it is OK to post the refund calculation. Click **Yes**.

    When you click **Post**, CampusNexus Student schedules the calculated refunds for the appropriate fund sources based on the calculation. You will not see any entry on the student's ledger card reflecting the refunds until they are actually processed.

18. After the posting procedure is completed, CampusNexus Student displays a confirmation message. Click **OK**.

    Other changes will appear on the **Refund Calculation** form. In the top right corner of the form, the status window changes to "Calculated and Posted". The **Post** button changes to **Undo Post**.

19. At this point, it is still possible to "undo" the refund that has been posted. Click **Undo Post** to return the student's records to their status before the refund was posted. If you click **Undo Post** after refund checks have been printed,

CampusNexus Student display s an "Automation error" message.

Once refund checks have been printed, you can no longer "undo" a refund calculation. Other accounting procedures must be employed to correct any misapplication of the refund calculations.

20. Click **Close** to close the form.

Note: The latest entry on the Student Ledger Card shows a refund posted after checks were printed.

Manual Refund Policy

If you do not have permissions to edit the manual refund policy (Allow User to Edit Manual Type Refund Calculations is turned off), the Refund Calc Details form is in display mode with the Edit Time, Edit Charges, and Edit Payment buttons disabled; however, if you have edit permissions for Non Manual Refund Policies, these permissions remain unchanged.

If you have permissions to edit the manual refund policy (Allow User to Edit Manual Type Refund Calculations is turned on), all editable columns on the Refund Calc Details form have a white background. The editable fields for a Manual Refund Policy are Time in Period, Time Complete, Refund Percent, Period Base, Earned Charges, Title IV Refund, and Add'l Inst Refund.

The **Print** button on the Refund Calc Details form is enabled whenever you edit a policy.

Refund Calculations

The manual refund appears in the Refund Policy Calculations grid. When you click Calculate, all policies, including the manual one will be calculated.

Only if you have permission to edit manual refunds will you be able to select the manual refund from the Refund Policy Calculations grid and edit it.

If you try to enter values greater than 100 or less than 0 for the data fields within the refund calculations for which Manual Calculation is selected, an error message states that the Refund Percent cannot be greater than 100 and less than 0. This also occurs if you enter values that are greater than 100 or less than 0 in the Time complete and Time in Period fields.

If the value for the Refund Percent is modified, the Earned Charges and Adjustments on the Charges grid is recalculated using the newly entered Refund Percent when the Tab button is selected. This calculation is done only for the record for which the Transaction code configured on the refund policy is of the type 'calc'; for Transaction code type other than 'calc', the value of Earned Charges, Adjustment and Net will not change.

When the Earned Charges are recalculated, CampusNexus Student multiplies *(100 minus the percentage entered in the Refund Percent field)* by the amount in the Period Base value on the Charges grid to determine the Earned Charges.

The Adjustment value is determined by subtracting the amount in the Charges column from the amount in the Earned Charges column.

You can calculate the value of **Total Earned Charges** by applying the formula:

'Total Earned Charges = Sum of the Total of Earned Charges in the Charges and Adjustments grid'.

Likewise, you can calculate the value of **Adjustments** by applying the formula:

'Adjustments = Sum of the Total of Adjustments in the Charges and Adjustments grid'.

The value of **Net Charges** can be determined by applying the formula:

'Net Charges = Sum of the Total of Net in the Charges and Adjustments grid'.

Note: Changing the value of charges changes the value of Adjustment, Net, Adjustments, and Net Charges according to the formula established for each category.

Refund Calculation Messages and Override Option

You can edit Period Base and Earned Charges when clicking **Edit Charges** for the refund policy for which Manual Calculation is selected, but if in the changed value the Earned Charges is greater than the Period Base, an error message states that the Earned Charges cannot be greater than the Period Base.

You can override the value of the Charges field by clicking on Edit Charges and then selecting the Override check box in the Charges and Adjustments section on the Refund Calc Details screen.

This is also the same operation that occurs when you manually enter and override values for the following data fields within refund calculations: Refund Percent, Time Complete, Time in Period, Period Base on Charges grid, Earned Charges on Charges grid, Title IV Refund on Payments grid, and Add'l Inst. Refund Amount on Payments grid.

When you click **Edit Payment**, you can change the value for the Add'l Inst. Refund and Title IV Refund on the Payments & Refunds grid, and the Total Refund amount will be recalculated. The Total Refund amount is calculated by determining the sum of the amount in the Add'l Inst. Refund Amount column and the amount in the Title IV Refund column.

If the changed value of the Add'l Inst. Refund or Title IV Refund is less than zero, a message states that the value in the Add'l Inst. Refund or Title IV Refund field cannot be less than zero.

If you click Edit Payment and change the value of the Title IV Refund and the Add'l Inst. Refund so that the sum of the Title IV Refund and the Add'l Inst. Refund is greater than the Total Paid amount, a message states that the Sum of the Add'l Inst. Refund and Title IV Refund cannot be greater than the Total Paid amount.

Note 1: Changing the value of refunds changes the value of Total Refund and Refund Amount according to the formula established for each category.

Note 2: When editing manual refunds, you cannot add line items to the Charges or Payment grids.

Refund Calculation Summary and Reports Selection - Drop Report

The Refund Calculation Summary report, Refund Calculation Detail report, and Drop report each display an indicator identifying refund calculations that were entered manually and the name of the person who manually entered the data for the manual refund calculation.

On the Refund Calculation Summary report and Refund Calculation Detail report, under the Policy header, the name of the policy is displayed and below the policy name, the caption 'Manual Policy Calculated by' displays with the name of the person who last manually changed the policy.

On the Drop Report, the name of the policy is displayed and the details of the items under Payments & Refunds are shown and just below the item details, the caption 'Manual Policy Calculated by' displays with the name of the person who last manually changed the policy.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

Audit Features

The audit features for Student Accounts include:

- CampusNexus Student stores the name of the payee on each refund record, stipend record, and subsidiary refund so that it can be retrieved for reporting purposes.
- CampusNexus Student audits changes to the payee for refunds and stipends. Auditing occurs from the time the refund or stipend is scheduled to the time the refund or stipend is processed. The date changed, time changed, and the user who made the change are audited.
- Payee changes are audited for subsidiaries.
- Payee information for a stipend can be edited regardless of the fund source associated with the stipend. The payee changes are audited for all stipends.
- Your ability to edit a payee for a refund is dependent on the fund source associated with the refund. The payee changes are audited only for the fund sources that allow the payee to be changed.
- You can sort on different columns of the grids available in the Process Refunds/Stipends wizard.

- A student account administrator can define that the Reference information is printed on the check, below the address, or on the stub, or in both places.
- A student account administrator can view the ID of the user who scheduled the refund/stipend using the Ledger Card, Transaction Detail button.
- CampusNexus Student stores the user ID of the user who scheduled the stipend so that it does not get overwritten by the user ID of the user who posted the stipend.

Return of Title IV Funds

CampusNexus Student can perform the Return of Title IV Funds calculation based on Department of Education's policy. Refer to the Department of Education (ED) Return of Title IV Funds calculation worksheets while reviewing this description.

The worksheets are titled:

- *Treatment of Title IV Funds When a Student Withdraws from A Credit Hour Program*
- *Treatment of Title IV Funds When a Student Withdraws from A Clock Hour Program*
- *Post-Withdrawal Disbursement Tracking Sheet*

These worksheets may be obtained from the ED web site at https://ifap.ed.gov/ifap/. Select *Worksheets, Schedules, & Tables* and look for *Return of Title IV Aid Worksheets*. Click the link to go to the page where the PDF files are located. The PDF document files are also distributed on the release disk.

Processing the Return of Title IV Funds

You must enable the Use Title IV Refund Calc? option to calculate the Return of Title IV Funds through CampusNexus Student.

See also SEOG Matching Percentage and Return of Title IV Funds Calculations Worksheets.

1. Access the Refund Calculation wizard and follow the instructions. Click **Calculate** on the Refund Calculation form to calculate the return of Title IV Funds.
2. Specify the calculation type as "Actual" if the student's status is Grad, Complete, or Drop.

   If the student's status is not one of these, the calculation type must be "Hypothetical".
3. The Refund Calculation form displays the student's drop date (if applicable).

   - If the student's status is Drop, the form displays the Enroll Status Date with a caption of "Date of Determination".
   - If the student's status is Grad or Complete, the form displays the Enroll Status Date with a caption of "Grad Date" or "Date Completed".

   The Refund Calculation form also displays the student's last date of attendance (LDA) and NSLDS Withdrawal Date (NSLDS WDRWL Date) on this form.
4. The Effective Date field can only be edited if a "Hypothetical" calculation is being done. The label is changed to "Hypothetical Drop Date". If an "Actual" calculation is being done, the effective date for the calculation will be the student's enrollment status change date.
5. If the student's program has a billing method of term or course, the term the student withdrew from must be identified or specified by you. Once identified, it is displayed.

   If the student's program has a billing method of academic year, the academic year from which the student withdrew must be selected/identified. The academic year number and date range are displayed on the form.
6. If the flag to use the Return of Title IV Funds calculation is set to yes, the calculation will be the first step in the refund calculation process. The result of this calculation will then "feed" into the standard refund calculations. The result of the Return of Title IV Funds calculation will be that Title IV money needs to be sent back to the lenders or Title IV money will still be received in the form of a post-withdrawal disbursement.
7. When an "Actual" calculation is selected (as opposed to "Hypothetical"), the Return of Title IV Funds calculation will only be done if the student's status is Drop. Even though the calculation type of "Actual" will be allowed for a Grad and Complete status, the Return of Title IV Funds calculation does not apply to students who have a Grad or

Complete status. If an "Actual" calculation type is being done, and the status is Grad or Complete, CampusNexus Student proceeds directly to the standard refund calculation method.

8. When an "Actual" calculation is being done, the Return of Title IV table is checked to see if a record already exists for the student's enrollment and drop date. If a record exists in the table, you are notified before proceeding and given the option of proceeding with the calculation (in which case the results will overwrite what is currently on file) or going on to the standard refund calculation using the result of the Return of Title IV Funds calculation already on file.

Some initial data values will be determined before performing the Return of Title IV Funds calculation.

1. The date of the institution's determination that the student withdrew. If an "Actual" calculation is being done, this date will be set to the student's drop date on file. If a "Hypothetical" calculation is being done, the date of determination will be whatever you selected for the "Hypothetical Drop Date".
2. If a 'Hypothetical" calculation is changed to an "Actual" calculation, CampusNexus Student checks if the LDA on the Refund calculation is equal to the student's drop date on file. If it is not equal, a message indicates that the Hypothetical refund may not be converted to an actual refund calculation. Once the LDA has been edited to reflect the drop date on file, the "Hypothetical" calculation may be converted to an "Actual" calculation.
3. The period to use for the calculation will be one of two values: Title IV Payment Period or Period of Enrollment (P = Payment Period, E = Period of Enrollment). This value is determined by looking at the academic calendar definition for the program version the student is or was enrolled in and, if needed, the billing method for the program. To determine the Period to use for the calculation, CampusNexus Student performs the following checks:
    - If the Program Version is empty and the Academic Calendar is empty, CampusNexus Student displays the message: *"Could not determine the academic calendar for this student's program. Please select the academic calendar for this program."* CampusNexus Student also updates the Academic Calendar with the value you select, and it uses this value for the academic calendar for this calculation. If no value is selected, the process is terminated. Otherwise, CampusNexus Student uses the Academic Calendar for this calculation.
    - If the Program Version is not empty, CampusNexus Student uses the Program Version Academic Calendar.
    - If the Academic Calendar is 2, 3, 4, 5, or 6, the Period to use for the calculation must be Payment Period. If the Academic Calendar is 1, you select the Period to use for the calculation. CampusNexus Student defaults the answer to the contents of the Program Version Return to Title IV Period.
4. Title IV Payment Period/Period of Enrollment Start and End Dates

    The Return of Title IV Funds calculation will always be calculated for a defined time frame. This defined time frame will be the Title IV payment period or period of enrollment the student was attending when he or she withdrew from school. To determine these dates, CampusNexus Student does the following:

    - If the period to use for the calculation is Title IV Payment Period, CampusNexus Student prompts you to select the term from which the student dropped. If you do not select a term, and the academic calendar is 2, 3, or 4, the program terminates the process.
    - If the academic calendar is 1, CampusNexus Student finds the academic year in which the student dropped by finding the record in the student's academic year table where the Enroll Status Date is within the student's academic year Start Date and End Date. If a record is found, CampusNexus Student defaults the period start and end dates to these dates.
    - If you did select a term, CampusNexus Student defaults the period start and end dates to the selected term

start and end dates.

- If neither a term was selected nor a record was found in the student's academic year table, CampusNexus Student defaults the period start date to the student's start date (if their re-enrollment date is null) or to their re-enrollment date if not null.
- If the Academic Calendar is 1, you are prompted to edit the start and end dates. Otherwise, the period being used is the Period of Enrollment.
- If the Academic Calendar is 5 or 6 and the configuration on the student's program version allows for payment periods, the calculation will be performed over the payment period and use the payment period dates persisted within the system.

When the Period to use for the calculation is not Title IV Payment Period:

- If the billing method for the student is Full program (Billing Method Frequency = 'P'), CampusNexus Student defaults the Period start and end dates to the student's start date/re-enrollment date and the expected graduation date.
- If the billing method for the student is Academic Year (Billing Method Frequency = A), CampusNexus Student finds the record in the student's Academic Year table where the Last Date of Attendance (LDA) is within the student's academic year Start Date and End Date. If a record is found, the program defaults the period start and end dates to the student's academic year Start Date and End Date. Otherwise, the program defaults the period start and end dates to blank.

CampusNexus Student prompts you to edit/confirm the period start and end dates. The Payment Period/Period of Enrollment start and end dates are validated as follows:

- The period end date must be greater than the period begin date.
- The period begin date must be greater than or equal to the student's start date.
- The period end date must be less than or equal to the student's expected graduation date.

SEOG Matching Percentage

If you have a fund source that is SEOG, select the SEOG Grant? option in the Fund Source Code Setup form, and enter the SEOG matching funds percentage in the Match % field. This information is important when calculating a Return of Title IV funds. The amount of SEOG funds received and expected is *reduced* by the school's matching percentage.

Return of Title IV Funds Calculation Worksheets

The business rules for calculating the Return of Title IV Funds is outlined on the worksheets provided by the Department of Education (ED). There are two worksheets: one for credit hour programs and one for clock hour programs. Most of the steps outlined in the two worksheets are the same. To determine if a program is credit hour or clock hour, CampusNexus Student checks the value of the academic calendar for the program version. If the Academic Calendar is 5, the program is a clock hour program. Otherwise, it is a credit hour program.

Note: CampusNexus Student displays items in boxes A thru K for calculations with a withdrawal date before 7/1/06 using the appropriate calculation method, and Steps 8 through 10 will not appear. Boxes A thru U will appear for calculations after 7/1/06, and Steps 8 through 10 will appear. .

The wizard accommodate these changes:

- Inclusion of the three grant programs: Academic Competitiveness Grant (ACG), National SMART Grant, and the TEACH Grant.
- Deletion of the LEAP, SLEAP, and GEAR UP programs
- The clock-hour program calculation for scheduled hours in Step 2
- The 50% of total grants reduction from the student's repayment responsibility in Step 9
- The order for the amounts of Title IV Funds to be Returned in Steps 6 and 10
- The $50 minimum repayment amounts for grants that student's have the responsibility to repay in Step 10

The IASG grant is included on the Return to Title IV worksheets.

- The addition of IASG occurs in Steps 1, 6, and 10.
- CampusNexus Student validates the withdrawal date for the student to display the proper Title IV worksheets.
- For students having withdrawal dates **on or after July 1, 2010**, the Return to Title IV worksheets that identify IASG for inclusion are used and CampusNexus Student performs the Return to Title IV calculations that identify IASG awards for inclusion.
- For students having withdrawal dates **prior to July 1, 2010 or not having withdrawal dates**, the existing Return to Title IV worksheets are used and CampusNexus Student performs the existing Return to Title IV calculation.
- By including IASG fund sources, the calculation of Title IV Grant Programs Amount Disbursed and the Title IV Grant Programs Amount Could Have Been Disbursed sections are also affected.

Previously Calculated Title IV Refunds

When you click **Calculate** on the Refund Calculation form, CampusNexus Student determines whether there are previous Title IV calculations. If there is a previous Title IV calculation, the following message is displayed: *"Previous Title IV Calculation found. Do you want to view the result of the previous calculation?"*

- When you click **No**, the **Delete Previous Calculation Results** option is enabled upon entering the Return of Title IV Funds Calculation wizard.
- When click **Yes**, the **Review Previous Calculation Results** option is enabled, upon entering the Return of Title IV Funds Calculation wizard.

These options are available only if the refunds have not been posted yet:

- When you select Review Previous Calculation Results the previous calculation is displayed in a read-only mode.
- When you select Delete Previous Calculation and Recalculate, the previous calculation is deleted and the recalculation will be as if it were new.

You can change the *review* or *delete* option before clicking Next.

Refund of Title IV Calculation Wizard

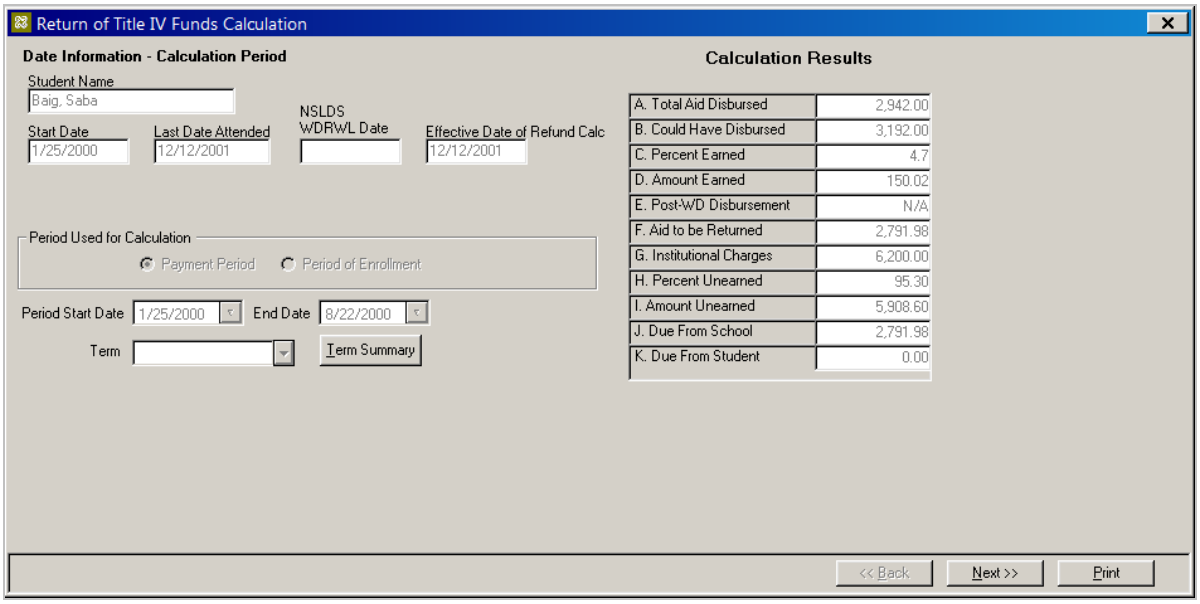
The Refund of Title IV Funds Calculation wizard is invoked from the Refund Calculation form.

Note: You can navigate to other areas of CampusNexus Student to verify student information, while using the Return of Title IV Funds Calculation wizard.

The following rules apply when you leave the refund calculation form and return:

- You can navigate to other areas within the application from any step within the Return of Title IV Funds Calculation wizard.
- Navigating to other forms within the application while the Return of Title IV Funds Calculation wizard is active will not affect any date previously entered within the wizard.
- If changes are made within that will affect the Return to Title IV Funds Calculation data, those changes will be reflected within the Return to Title IV Funds Calculation wizard when focus is returned back to the form. Any data or selections that had been entered manually up to that point will be retained if still applicable.

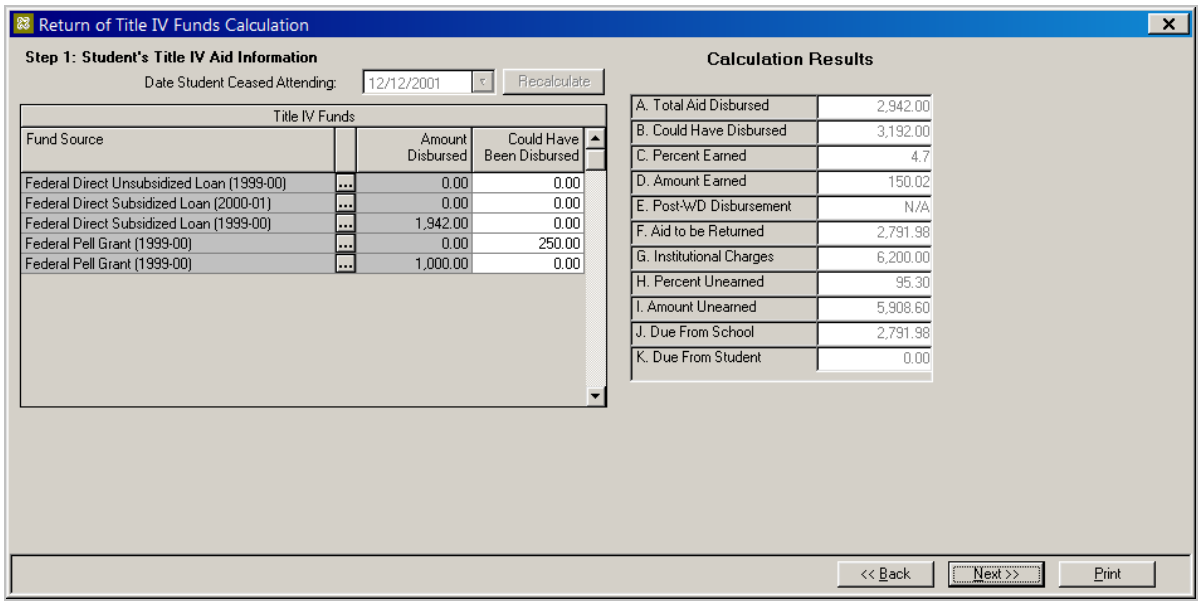
Menu options such as Lists, View, Daily, etc., are enabled so that you can navigate to other areas of CampusNexus Student while leaving the Refund Calculation form open.



Note regarding the **Academic Year/Payment Period** and **Term** fields: If the student is enrolled in a program version with academic calendar 5 or 6 and billed by payment period, the combo box for **Term** is replaced by the **Payment Period** combo box. When a payment period is selected, the start and end dates are used as the start and end of the R2T4 calculation period.

Worksheet Step 1: Student Title IV Aid Information

CampusNexus Student calculates the amount of Title IV aid disbursed (*Worksheet Box A*) and the amount that could have been disbursed (*Worksheet Box B*) within the payment period or period of enrollment (time frame) for this calculation. The logic for this step is the same on the credit and clock hour worksheets.



The Date Student Ceased Attending field is used to determine whether a posted disbursement is considered ‘Amount Disbursed’ or ‘Could Have Been Disbursed’. An inadvertent overpayment occurs when an institution receives a Title IV overpayment of aid that is posted to the student’s ledger after the student has ceased to attend, but before the Date of Determination (DOD). This overpayment is included in R2T4 calculations as 'Could Have Been Disbursed’, rather than ‘Amount 'Disbursed.’ The ‘Could Have Been Disbursed’ funds include inadvertent overpayments and disbursements that are still scheduled for the period that is being calculated.

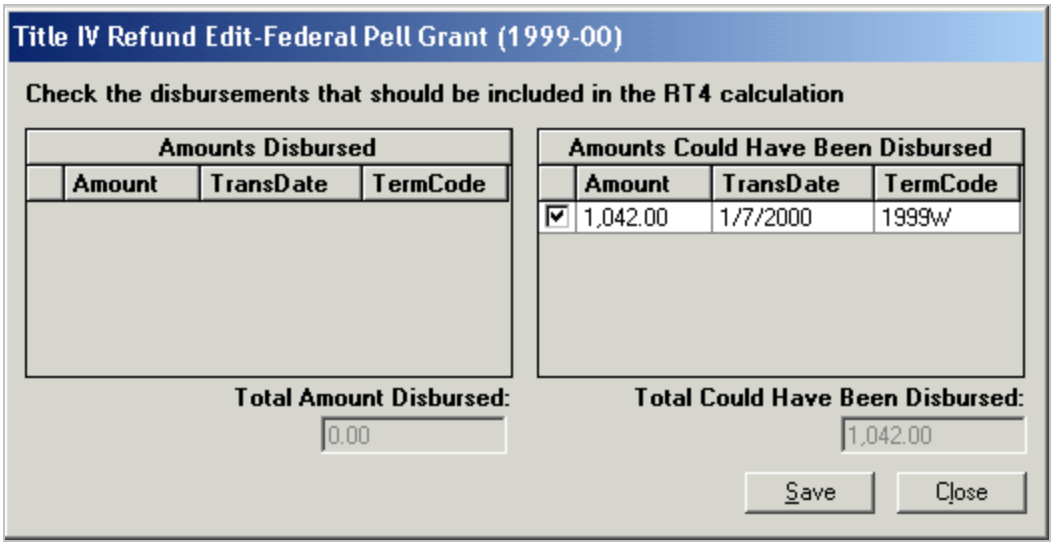
- If attendance is required for the institution, the student's LDA is used to determine if the disbursement posted is an inadvertent overpayment (posted after LDA). This means the Date Student Ceased Attending field will be automatically populated with the LDA and it cannot be edited.
- If attendance is not required, this field is populated with the NSLDS Withdrawal date by default for an Actual calculation. For a Hypothetical calculation, this field is populated by the LDA by default. This date can be edited as needed. After selecting an appropriate date,you can click on the Recalculate button to reevaluate the disbursements (based on the selected Date Student Ceased Attending) to determine if the disbursements are considered 'Amount Disbursed' or 'Could Have Been Disbursed.'

  The Date Student Ceased to Attend field is populated with a saved value (for R2T4 calculations that have been completed previously) by default. Click ... to select the disbursements that should be included in the RT4 calculation.

Note: Under certain conditions a program may have two defined payment periods - one for Title IV grants and Perkins Loan funds and one for Direct Loan funds. Because only one payment period may be used within the Return of Title IV calculation to determine aid received or aid that could have been received, the regulations specify that institutions must use the payment period that ends later as the basis of the return calculation. Any aid associated with payment periods that overlap the payment period used as the basis of the return calculation must be attributed to that payment period.

An example of how to perform the return calculation and attribution defined above when an institution disburses Title IV aid to a student using different payment periods can be found in Volume 5 of the 2012-2013 Federal Student Aid Handbook (page 5-80). While the example is specific to Non Standard Term programs that are non SE9W and where both Title IV grant and Direct Loans funds have been awarded, the guidance received from Federal Student Aid states that this is standard guidance in all situations where payment periods for loans and grants do not align.

While the Return of Title IV Funds feature in CampusNexus Student provides clients with sufficient flexibility to manually perform the attribution defined above, this is not automated at this time. Once the amounts have been entered on the form, CampusNexus Student applies the appropriate return calculation based on the Return of Title IV Worksheets published by the Department of Education.



CampusNexus Student determines the amount of aid received for each Title IV fund source in the time frame. This is done by selecting all of the student's records in the transaction table that satisfy the following criteria:

- The transaction is a Financial Aid related transaction.
- The fund source is a Title IV fund source.
- The Financial Aid transaction applies to the payment period/period of enrollment (time frame) for which this

calculation is being done.

- If the calculation is based on the Period of Enrollment, the transaction date must be within the defined time frame. Otherwise, the calculation is based on the Payment Period.
- If the term code for the transaction is null, or a term was not specified for this calculation, the date must be within the defined time frame. Otherwise, the term code for the transaction must match the term code specified for this calculation.

For all records that pass the above criteria, CampusNexus Student calculates the net amount received for each type of fund source.

If the fund source is a SEOG grant and a matching percentage has been entered for the SEOG, CampusNexus Student reduces the net amount received as follows:

Net Amount Received = (100 – Matching Percentage) * Net Amount Received)

CampusNexus Student determines the amount of aid that could have been disbursed in the time frame at the time of the student's withdrawal but was not disbursed (*Worksheet Box B*). CampusNexus Student selects all the student's scheduled disbursements that satisfy the following criteria:

- The disbursement is still expected to be received. Scheduled Status must equal *S* or *R*.
- The fund source is a Title IV fund source other than College Work-Study.
- The FA disbursement applies to the payment period/period of enrollment for which this calculation is being done.
- If the calculation is based on the Period of Enrollment, the expected date must be within the defined calculation time frame. Otherwise, the calculation is based on Payment Period.
- If the term code for the disbursement is null or a term was not specified for this calculation, the expected date for disbursement must be within the defined calculation time frame. Otherwise, the term code for this disbursement must match the term code specified for this calculation.

For all records that pass the above criteria, CampusNexus Student totals the expected amount for each different type of fund source.

If the fund source is a SEOG grant and a matching percentage has been entered for the SEOG, CampusNexus Student reduces the expected amount as follows:

Expected Amount = (100 - Matching Percentage) * Expected Amount)

If no Title IV funding was calculated to have been received or could have been received, CampusNexus Student displays the message: *"No Title IV funding found that has been disbursed or that could have been disbursed".* and terminates the calculation. There is no need to proceed further with this calculation.

If Title IV aid is found, the results are displayed. A row is displayed for each fund source where amounts were calculated.

Fund Source Disbursement

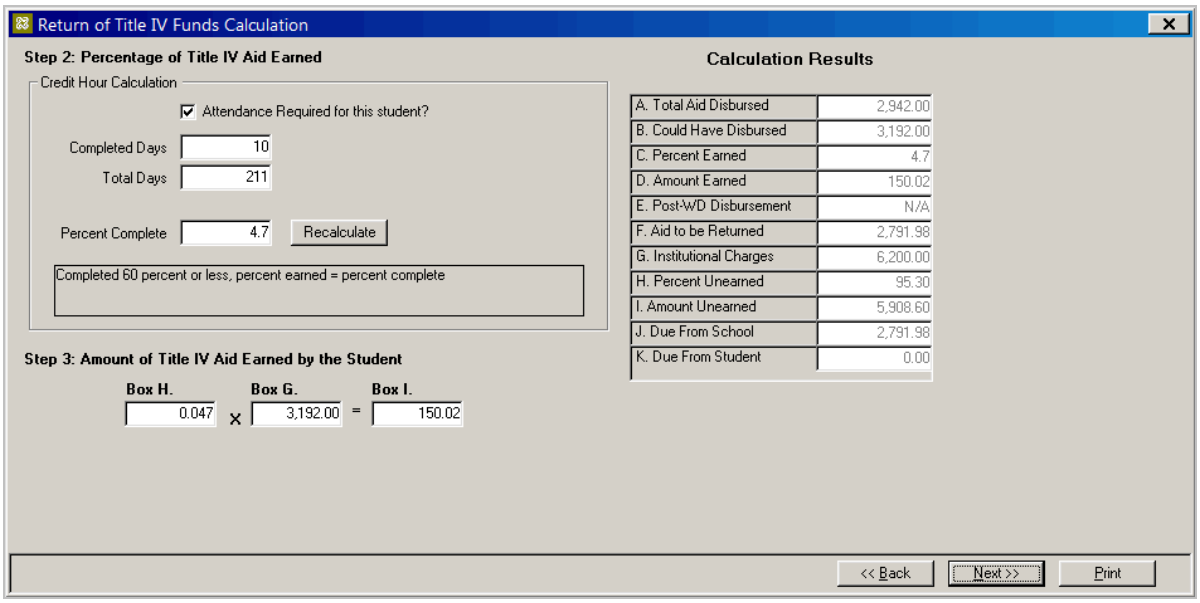
Fund Source	Amt Disbursed	Could Have been Disbursed	Still Expected
XXXXXXXXXXXXXXXXXX	99999.99	99999.99	99999.99
XXXXXXXXXXXXXXXXXX	99999.99	99999.99	99999.99

- Total Title IV aid disbursed for payment period/period of enrollment: 999999.99
- Total Title IV aid disbursed plus Title IV aid that could have been disbursed: 999999.99

CampusNexus Student allows you to navigate the grid and edit any amounts in the amount that **Could Have Been Disbursed** column. The amounts in this column cannot be less than zero and must be less than or equal to the amount still expected. When you exit the grid, you have the option to continue or exit the Calculation.

Worksheet Step 2: Percentage of Title IV Aid Earned

The business rules in this step for the credit hour and clock hour worksheets are different. For a student withdrawing from a clock hour program, only scheduled hours–not completed hours–are used to determine the percentage of the payment period or enrollment period completed (clock hours scheduled to be completed as of the day on which the student withdrew divided by total clock hours in the period). If the percentage is more than 60%, the student earns 100% of his or her aid.



Credit Hour Worksheet

CampusNexus Student determines whether the institution is required to take attendance or not. It searches the attendance table for records related to the student. If a record is found, you are presented with the following message: *"Detailed attendance record(s) were found for this student. Is attendance required to be taken for this student?"* The program defaults the answer to yes.

If no attendance records were found for the student, you will see the following message: "No detailed attendance records found for this student. Is attendance required to be taken for this student?" The program defaults the answer to no.

If attendance is not required, then the percentage earned (*Worksheet Box C*) will be 50%. Otherwise, the percentage of the payment period/period of enrollment will be calculated by applying the following logic:

Note: NSLDS WDRWL date = Withdrawal date as reported to the National Student Loan Data System (NSLDS)

- Total days completed: NSLDS WDRWL date - period begin date.
- Total days in calculation time frame: period end date - period begin date.
- The program subtracts any days of approved LOA that occurred from the period begin date to the NSLDS WDRWL date.
- The program subtracts any holidays where the scheduled time off was 5 days or more. If the holiday period encompasses the period begin date and the NSLDS WDRWL date, the program subtracts the applicable days from the Total days completed.
- The program divides the total days completed by the total days in the calculation period to determine the percentage of the payment period/period of enrollment the student completed (*Worksheet Box C*).

Clock Hour Worksheet

Calculation 1

Clock hours completed will be calculated by selecting all attendance records for the student where the date is within the calculation time frame, and the attendance unit type is "M - Minutes".

The calculation of total hours in the payment period/period of enrollment will depend on the billing method for the student's program and the period type being used for the calculation. After the number is calculated, you will be given the option to verify/override the total hours in the period.

If the billing method is Full Program (Billing Method Frequency is "P"), and if the period type is Period of Enrollment, total hours will equal enrollment hours required. Otherwise, the period type is Payment Period and total hours will equal zero.

If the billing method is Academic Year (Billing Method Frequency is "A"), the program defaults the value to the number of hours defined in the academic year from which the student withdrew. CampusNexus Student finds the record for the student where the last date of attendance (LDA) is within the student's academic year start date and end date. If a record is found, total hours equal the student's academic year credit hours. If a record is not found, total hours equal zero.

If the billing method is Term or Course (Billing Method Frequency is "C" or "T"), the program defaults the value to the calculated sum of the clock hours scheduled for the student in the term from which they withdrew. This is done by summing the scheduled enrollment hours for all records for the student where the term ID equals the term specified for the calculation, and the student's enrollment status is not "D". If no term was specified for the calculation, total hours will equal zero.

CampusNexus Student prompts you to edit/verify the total hours in the payment period/period of enrollment. The caption is displayed as follows: If period type is Period of Enrollment, "Enter the total hours in the Period of Enrollment". Otherwise, "Enter the total hours in the Payment Period."

Calculation 2

The logic of determining the clock hours completed is explained in Calculation 1.

Clock hours scheduled are calculated by selecting all attendance records for the student where the attendance date is within the calculation time frame, and the attendance unit type equals "M - minutes". CampusNexus Student determines the sum of minutes attended and minutes absent, then divides by 60 to calculate the clock hours scheduled.

If the result of Calculation 2 is less than 70%, the percentage in *Worksheet Box C* is taken from Calculation 1. If the result of Calculation 2 is equal to or greater than 70%, CampusNexus Student determines the clock hours scheduled to be completed as of the date the student withdrew divided by the total clock hours in the payment period or period of enrollment. (This amount may be greater than 60%.)

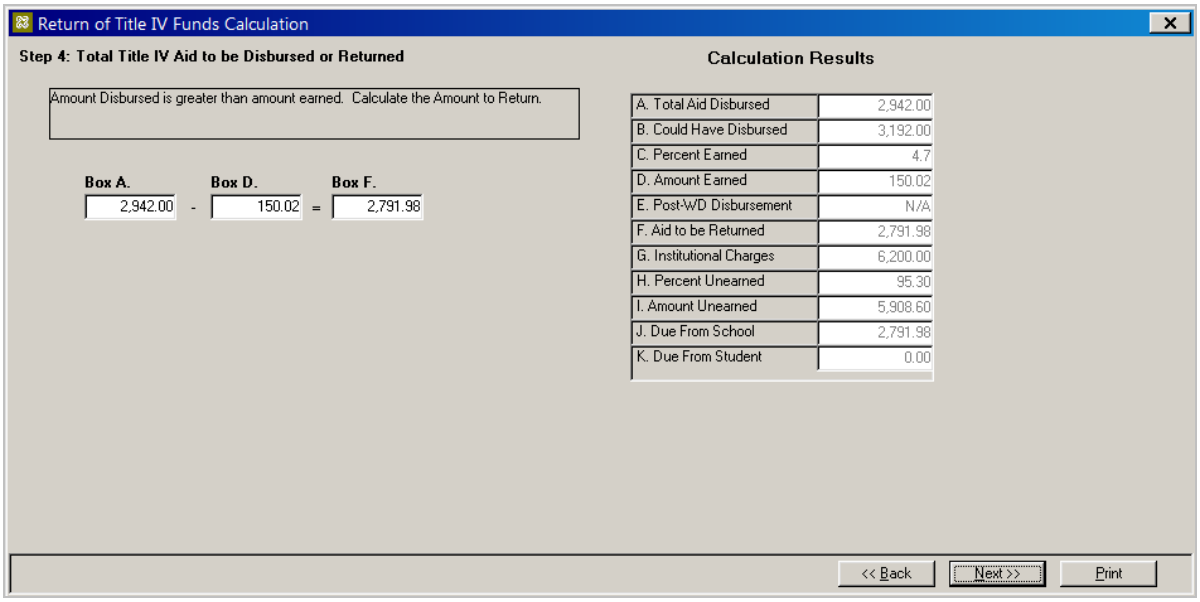
Worksheet Step 3: Amount of Title IV Aid Earned by the Student

This calculation includes the values calculated in *Steps 1* and *2*. The percentage calculated in *Worksheet Step 2* for *Box C* is multiplied by the value calculated in *Worksheet Step 1* for *Box B* to get the amount of Title IV Aid earned by the student (*Worksheet Box D*).

Worksheet Step 4: Total Title IV Aid to be Disbursed or Returned

Please refer to the worksheet titled Post-Withdrawal Disbursement Tracking Sheet along with the main worksheet, located at https://ifap.ed.gov/ifap/. The PWD Tracking Sheet is used in conjunction with *Box E* on the main worksheet.

Notice that under the Calculation Results the inadvertent overpayment to be returned is identified. An inadvertent overpayment occurs when an institution makes a Title IV overpayment of aid to the student's ledger after the student's Last Date Attended (LDA), but before the Date of Determination (DOD). This overpayment is included in Return calculations as 'Amount Could Have Been Disbursed', rather than 'Amount Disbursed.'



Post-withdrawal disbursement (PWD) (*Worksheet Box E*)

A post-withdrawal disbursement is the result if the amount of Title IV aid earned by the student (*Worksheet Step 3*) is greater than the amount of Title IV aid disbursed (*Box A in Worksheet Step 1*). The post-withdrawal disbursement is used as a credit against all outstanding charges on the student's ledger card. If the amount of the post-withdrawal disbursement exceeds the amount of outstanding charges on the student's ledger card, the remaining amount is offered to the student/parent.

The entry of the post-withdrawal disbursement information takes place after the refund calculation is fully completed. A button on the Refund Calculation form is available to edit the post-withdrawal disbursement tracking information. The only information to be entered from this calculation in regard to a post-withdrawal disbursement specifies the fund source(s) and amounts from which the post-withdrawal disbursement will be made.

Post-Withdrawal Disbursement Made From

(See the Post-Withdrawal Disbursement Tracking Sheet.)

CampusNexus Student prompts you to select the fund source(s) and amount(s) from which the PWD will be made. The validation is as follows:

- The total amount entered for all fund sources must equal the total amount of the PWD (Post-Withdrawal Disbursement Tracking Sheet, *Box A*).
- The amount entered for a specific fund source must not exceed the net amount that could have been disbursed for that fund source. (See *Step 1* on the Credit Hour and Clock Hour worksheets.)

Title IV Aid to be Returned (*Worksheet Box F*)

Title IV aid must be returned if the amount of Title IV aid earned by the student (*Step 3*) is less than the amount of Title IV aid disbursed (*Worksheet Box A in Step 1*). If this is the case, proceed to *Step 5*.

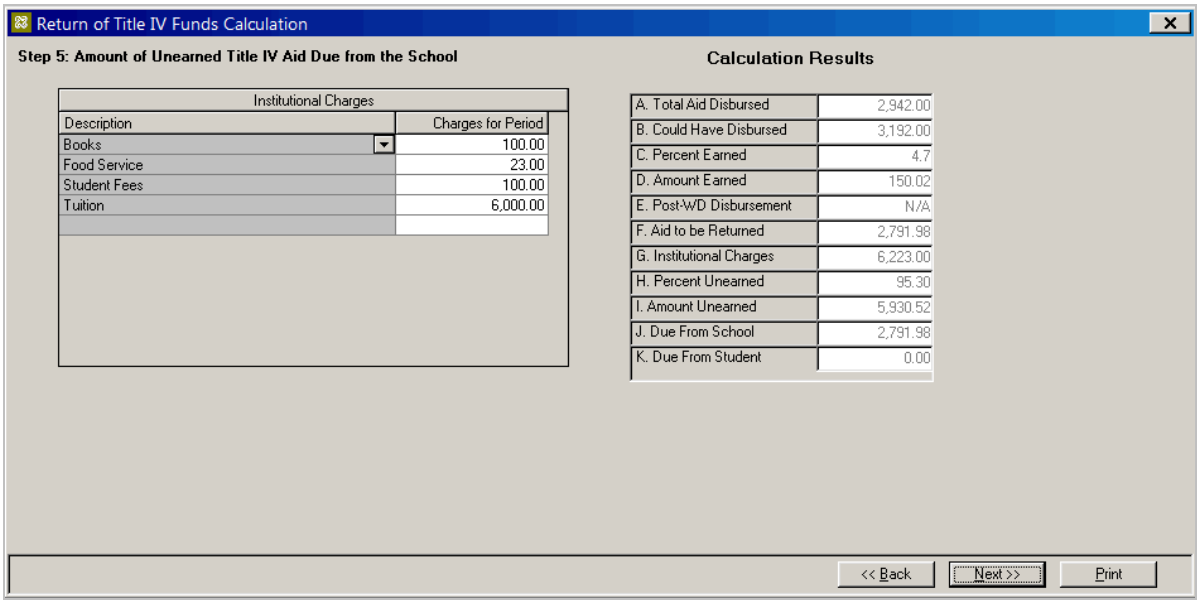
Worksheet Step 5: Amount of Unearned Title IV aid due from the school

The institutional charges for the payment period/period of enrollment are displayed. This is done by selecting all records from the transaction table that satisfy the following criteria:

- The transaction is a charge or adjustment. The transaction type must be *I*, *C* or *D*.
- The transaction applies to the payment period/period of enrollment for which this calculation is being done. If the

period type is Period of Enrollment, the transaction date must be within the defined calculation time frame. Otherwise, the period type is Payment Period. If the term code for the transaction is null or a term code was not specified for the calculation, the transaction date must be within the defined calculation time frame. Otherwise, the term code for the transaction must match the term code specified for the calculation.

- CampusNexus Student uses estimated charges when a calculation is done over the payment period since the charges billed for the time frame can exceed the expected amount due to system anomalies. (Example: A student registers into five 4-credit courses to complete an 18-credit payment period. CampusNexus Student will bill 20 credits for that payment period even though the time frame requires 18.) Charges are estimated based on the budget setting for the student's Academic Year where the drop occurred when the student's program version is academic calendar 5 or 6. The configuration setting for 'r;Institutional Charges Calculation Method' on the budget selected (Lists > Financial Aid > Budget) should be set to 'r;Use Amounts Entered Here' or 'r;Calculate from Total Program Costs' (Lists > Financial Aid > Programs > Program Version > Program Costs tab). Those amounts are used to determine the amounts that should be billed for the payment period. Only Tuition and Books amounts are used, but users are able to manually adjust those amounts or add new transaction codes to include in the Title IV calculations.



CampusNexus Student sums the net amount charged by billing code and displays the results.

Net Amount Charges by Billing Code

Description	Charges for Payment Period/Period of Enrollment
XXXXXXXXXXX	999999.99
XXXXXXXXXXX	999999.99
Total Institutional Charges	999999.99

You can edit the information on this screen if the academic calendar of the student's program is 1, 5, or 6. If you can edit this information, you can add an additional institutional charge or edit the amount of an existing institutional charge. If you add an additional institutional charge, you must select a valid billing code.

If the academic calendar is 2, 3, or 4, you cannot edit any of the institutional charge information. This is because the payment period correspond to a term code in CampusNexus Student and all institutional charges for this payment period are coded with the corresponding term code on the student's ledger card. If the academic calendar is 1, 5, or 6, you can edit the charges

because the institutional charges for the calculation period may not necessarily correlate to what has been posted to the student's ledger card.

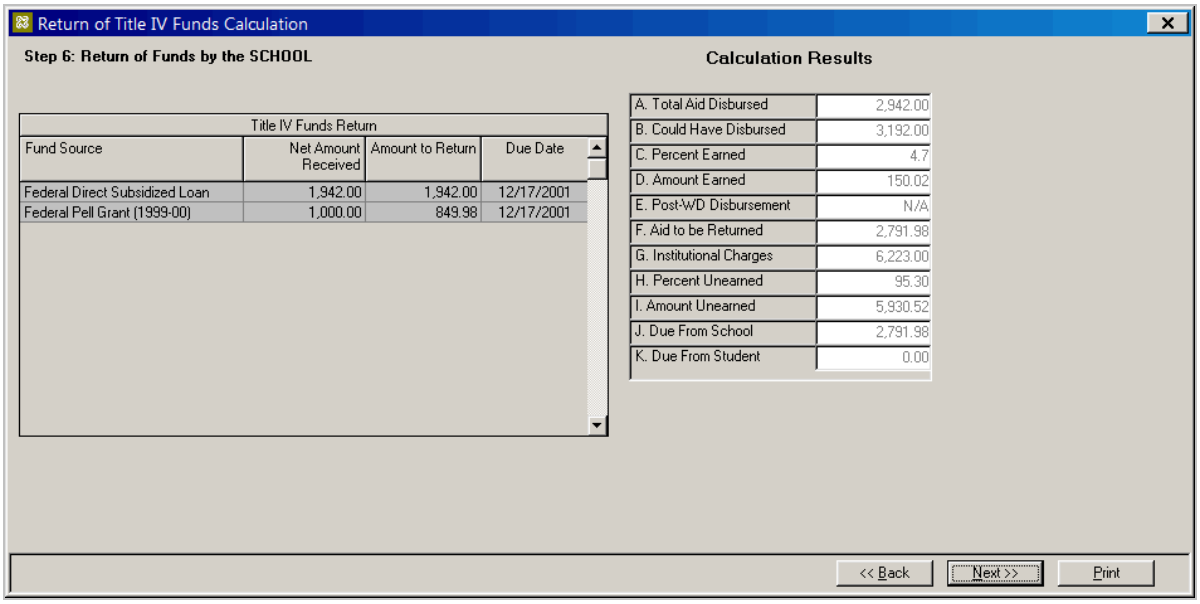
After exiting this screen, you can continue with the calculation or to exit the calculation.

Note: *Worksheet boxes H, I, and J* are explained on the work sheets. You do not edit these values.

Worksheet Step 6: Return of Funds by the SCHOOL

The total amount of funds to be returned is applied to the appropriate fund sources. The amount to be returned to each fund source cannot exceed the net amount received from the fund source. If the amount of funds to return exceeds the net amount received from the first fund source, CampusNexus Student returns the net amount received from the first fund source, and then moves to the next fund source.

Example: *BOX J* in Worksheet Step 5 is $3000.00. The student received a net of $2000.00 from a Subsidized Stafford loan and $4000.00 from a Perkins loan. The funds to return would be as follows: $2000.00 to the Subsidized Stafford loan and $1000.00 to the Perkins loan.



CampusNexus Student displays the amounts to return. Each amount that will be returned will have a due date calculated. Per the regulations of the Return of Title IV Funds policy, the due date for each refund will be 30 days from the student's drop date. This information is displayed as follows:

Amounts to be Returned

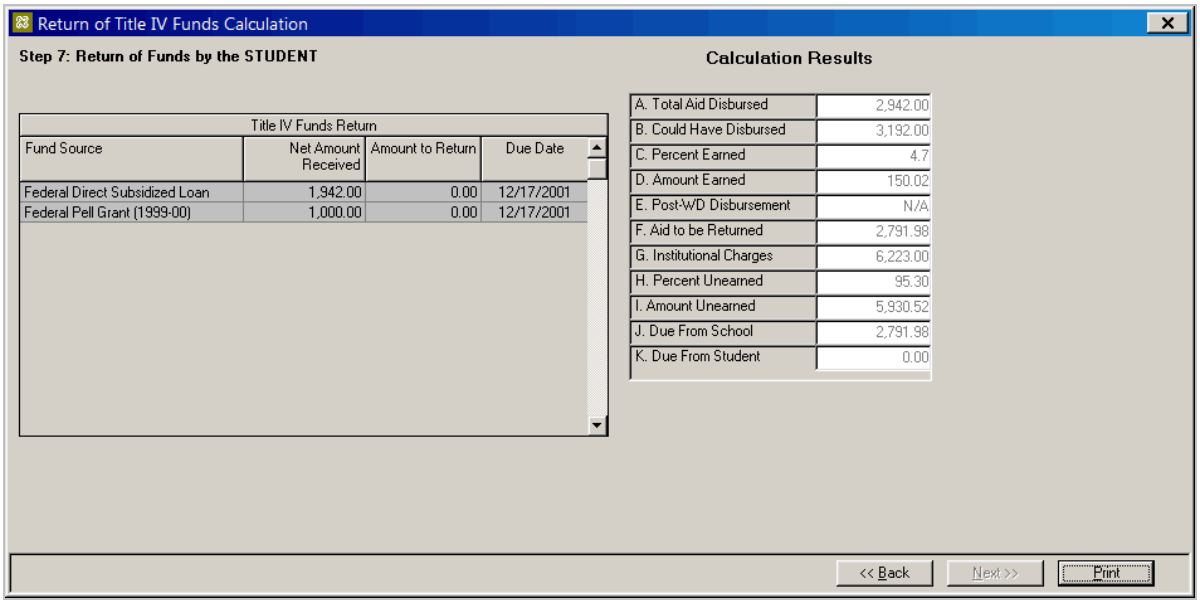
Fund Source	Net Amount Received	Amount to be Returned	Due Date
XXXXXXXXXX	999999,99	999999,99	99/99/99
XXXXXXXXXX	999999,99	999999,99	99/99/99
Amount to be returned		999999,99	

This is a read-only form. You can continue with the calculation or to exit the calculation.

Note: The **Due Date** is based on the Determination Date and the **Number of days to add to Determination Date to calc "Due Date"** field setting on the campus Refunds form.

Worksheet Step 7: Initial Amount of Unearned Title IV Aid Due from the STUDENT

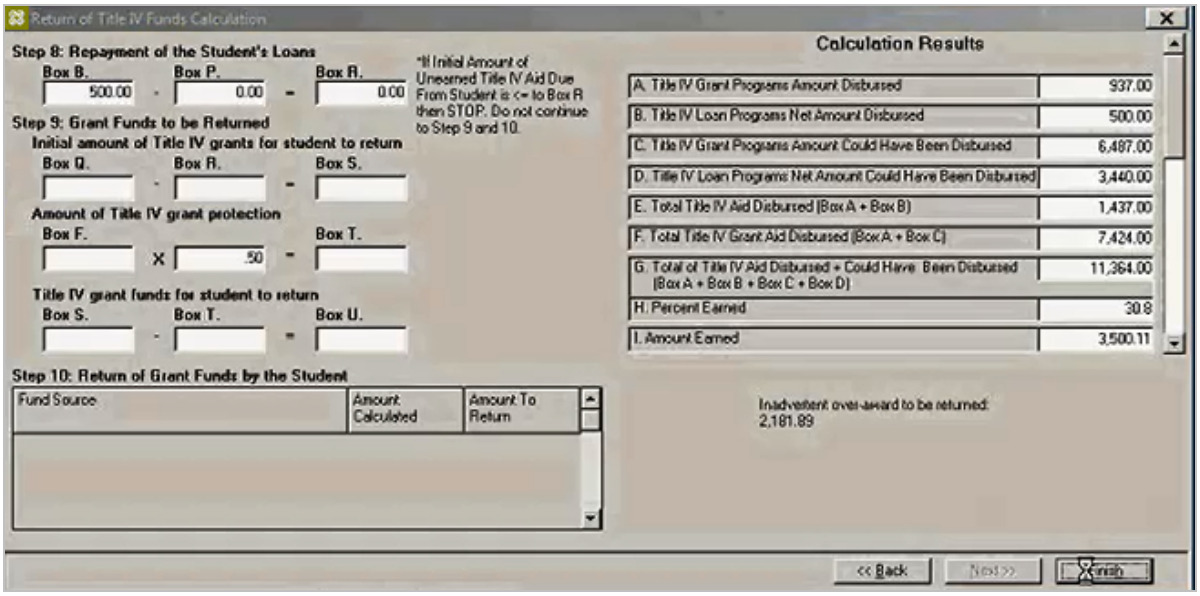
If this calculation returns a number greater than zero, CampusNexus Student proceeds to *Worksheet Step 8*. If this calculation returns zero, the calculation is completed.



Worksheet Step 8: Return of Funds by the STUDENT

CampusNexus Student applies the same validation logic here as was done in *Worksheet Step 6*. The amount to return to each fund source cannot exceed the net amount received from the fund source. HERA regulations that went into effect in 2006 states: *A student shall only be required to return grant assistance in the amount by which the amount to be returned by the student exceeds 50 percent of the total grant assistance received by the student for the payment period or period of enrollment.* The 50% rule only applies to Pell and SEOG loans.

Notice that this step also displays the correct inadvertent overpayment amount. This amount also appears on the R2T4 report.



When you click **Finish**, the following message is displayed: *"Return of Title IV Fund Calculation Saved. Click Ok to View Report"*. Click **OK** to proceed to the Return of Title IV report.

The 50% Rule

The Return to Title IV calculation reflect s the 50% rule. An example is provided below of how to determine 50% of the Title IV grant.

If the current return calculation determined that a student owed $1200 back to the Pell program after $1500 had been received for the payment period, the current amount to return would be $600. Under the new rule only the grant money to be returned greater than $750 (1/2 of $1500) must be returned. Under the new rule $450 would need to be returned. $1200 - 750 = $450.

Note: The net amount received from each fund source includes the amounts being returned in *Worksheet Step 6*. For example, if $2000.00 was received from a Subsidized Stafford loan and posted to the student's ledger card, but $2000.00 was calculated as needing to be returned in Worksheet Step 6, the net amount received would be zero.

CampusNexus Student displays the amounts to return using the same layout as in *Worksheet Step 6*.

Print the Calculation

The printed report does not match the layout of the attached worksheets exactly; however, the presentation of the information flows according to the worksheets.

Save the Calculation

If a hypothetical calculation is being done, no information is saved. If an actual calculation is being done, you can save or cancel the calculation.

The following files hold the information for this calculation:

- Return of Title IV table
- Return of Title IV Aid table
- Return of Title IV Institutional Charge table

A record exist in the Return of Title IV table for each unique combination of enrollment ID and drop date. Even though more than one refund policy may be run for a student when he or she drops, only one return of funds calculation will exist.

When saving the calculation, CampusNexus Student checks if a record already exists in the Return of Title IV table for the student where the drop date equals the enrollment status date. If a record is found, CampusNexus Student the existing record with the values from the calculation. If a record does not exist, CampusNexus Student adds a record and then updates it.

The Return of Title IV Aid table holds one record for each Title IV fund source from which the student received a disbursement or could have received a disbursement. Before adding the records to this table, CampusNexus Student deletes all existing records where the calculated Return of Title IV ID equals the ID in the Return of Title IV table. This will delete all prior records if the calculation is being done again, and you opted to overwrite prior calculation information.

The Return of Title IV Institutional Charge table holds one record for each institutional charge the student received. Before adding the records to this table, CampusNexus Student deletes all existing records where the calculated Return of Title IV ID equals the ID in the Return of Title IV table. This will delete all prior records if the calculation is being done again, and you opted to overwrite prior calculation information.

All amounts to be returned that are calculated in *Worksheet Step 6* are updated to the Refunds Due table. If this calculation has already been done for the student, any re-funds for Title IV monies that were saved from the prior calculation and have not yet been refunded will be deleted. Records for the student with the following criteria will be deleted:

FaRefund.SaReturnOfT4ID = SaReturnOfT4.SaReturnOfT4ID AND FaRefund.Status = 'N'

After saving the calculation information, you can continue with the standard refund calculation or to exit the calculation.

Standard Refund Calculation

The standard refund calculation logic has been modified to recognize any pertinent data created in the Return of Title IV Funds calculation that has already been run. If an institution is not using the Return of Title IV Funds calculation, the standard refund calculation will function as it always has. If an institution is using the Return of Title IV Funds calculation, data will exist that will be "dropped" into the standard calculation.

Selection of Term or Academic Year

If the Return of Title IV Funds calculation has been done, you will have already specified the term or academic year from which the student dropped. You will not be prompted to enter this information again.

Refund Payable Breakdown

The most significant change in the standard refund calculation is in the section where the refund payable breakdown is computed. If the Return of Title IV Funds calculation has been done, the refund payable breakdown for all Title IV funding has already been done. This section of the refund calculation has been modified to calculate any remaining re-fund payable for non-Title IV funding (if applicable). If the Return of Title IV Funds calculation has not been done, this section will execute with no changes.

The "bottom line" of each refund calculation has been adjusted by the results of the Return of Title IV Funds calculation. For example, if the Return of Title IV Funds calculation returned an amount of $2000.00 to be returned, and the standard refund calculation determined that $3000 needs to be returned, the net effect would be that $1000.00 still needs to be sent back to non-Title IV fund sources. The logic that already exists in the standard refund calculation would be executed with the exception that only non-Title IV fund sources would be evaluated. Another example might be if the standard refund calculation determined that $1000 needs to be returned but the Return of Title IV Funds calculation calculated that a post-withdrawal disbursement of $1500 will be received, the net effect would result in $2500 to be returned to non-Title IV fund sources.

The output for the standard refund calculation has been modified to reflect the impact of the Return of Title IV Funds calculation. If a post-withdrawal disbursement (PWD) was calculated, a line is added to the output stating the amount of the post-withdrawal disbursement. If Title IV aid is being returned, a line is added to the output stating the amount of Title IV aid to be returned.

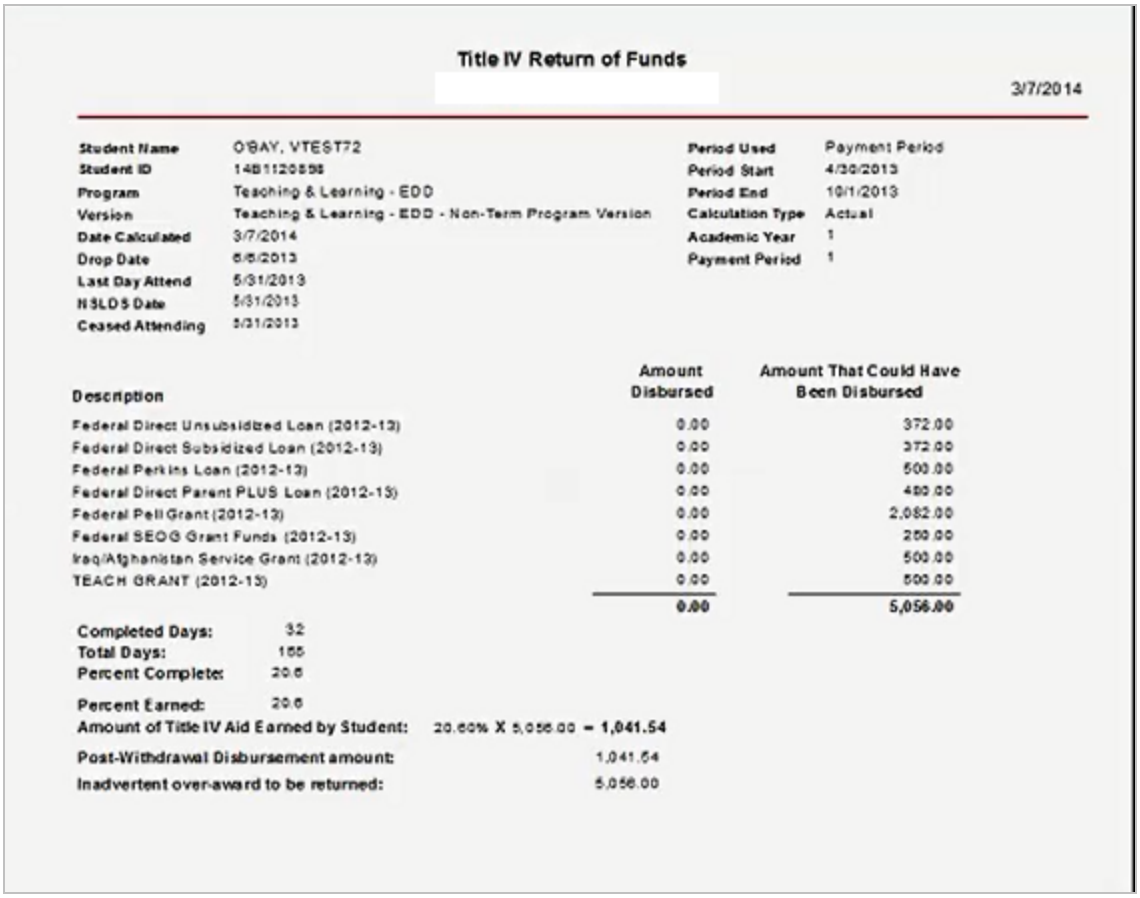
IMPORTANT! The amount of Title IV aid to be returned in this section will be the amount to be returned by the school. Any Title IV monies due to be returned by the student will not be included in the calculations in this section.

Update Return of Title IV Funds Calculation ID

If the Return of Title IV Funds calculation is done before entering the standard refund calculation, CampusNexus Student updates the Refund Calculation Return of Title IV ID with the Return of Title IV ID.

Title IV Return of Funds Report

As part of the refund calculation procedure, CampusNexus Student prepares a report. The Title IV Return of Funds report provides details of a Title IV refund calculation. There are no selection or sort criteria that you can manipulate for this report. The details on the report include student name, SSN, program, program version, date calculated, start date, drop date, last day attended, NSLDS date, ceased attending date, period used, period start date, and period end date. For each fund source, the report displays the fund source description, amount disbursed, and amount that could have been disbursed. It also shows completed days, total days, percent complete, percent earned, amount of Title IV aid earned by the student, Title IV aid to be returned, total institutional charges, percentage of Title IV aid unearned, amount of Title IV aid due from school, the amount of Title IV aid due from student, the initial Title IV grants amount due from student, and the protected amount. It also shows the breakdown of return of funds by the school, including the source of aid and amount.



Title IV Return of Funds

3/7/2014

Student Name	O'BAY, VTEST72	**Period Used**	Payment Period
Student ID	1451120595	**Period Start**	4/30/2013
Program	Teaching & Learning - EDD	**Period End**	10/1/2013
Version	Teaching & Learning - EDD - Non-Term Program Version	**Calculation Type**	Actual

Last Day Attend	5/31/2013		
NSLDS Date	5/31/2013		
Ceased Attending	5/31/2013		

Description	Amount Disbursed	Amount That Could Have Been Disbursed
Federal Direct Unsubsidized Loan (2012-13)	0.00	372.00
Federal Direct Subsidized Loan (2012-13)	0.00	372.00
Federal Perkins Loan (2012-13)	0.00	500.00
Federal Direct Parent PLUS Loan (2012-13)	0.00	480.00
Federal Pell Grant (2012-13)	0.00	2,082.00
Federal SEOG Grant Funds (2012-13)	0.00	250.00
Iraq/Afghanistan Service Grant (2012-13)	0.00	500.00
TEACH GRANT (2012-13)	0.00	500.00
	0.00	**5,056.00**

Completed Days:	32
Total Days:	155
Percent Complete:	20.6
Percent Earned:	20.6

Amount of Title IV Aid Earned by Student: 20.60% X 5,056.00 = **1,041.54**

Post-Withdrawal Disbursement amount: 1,041.54

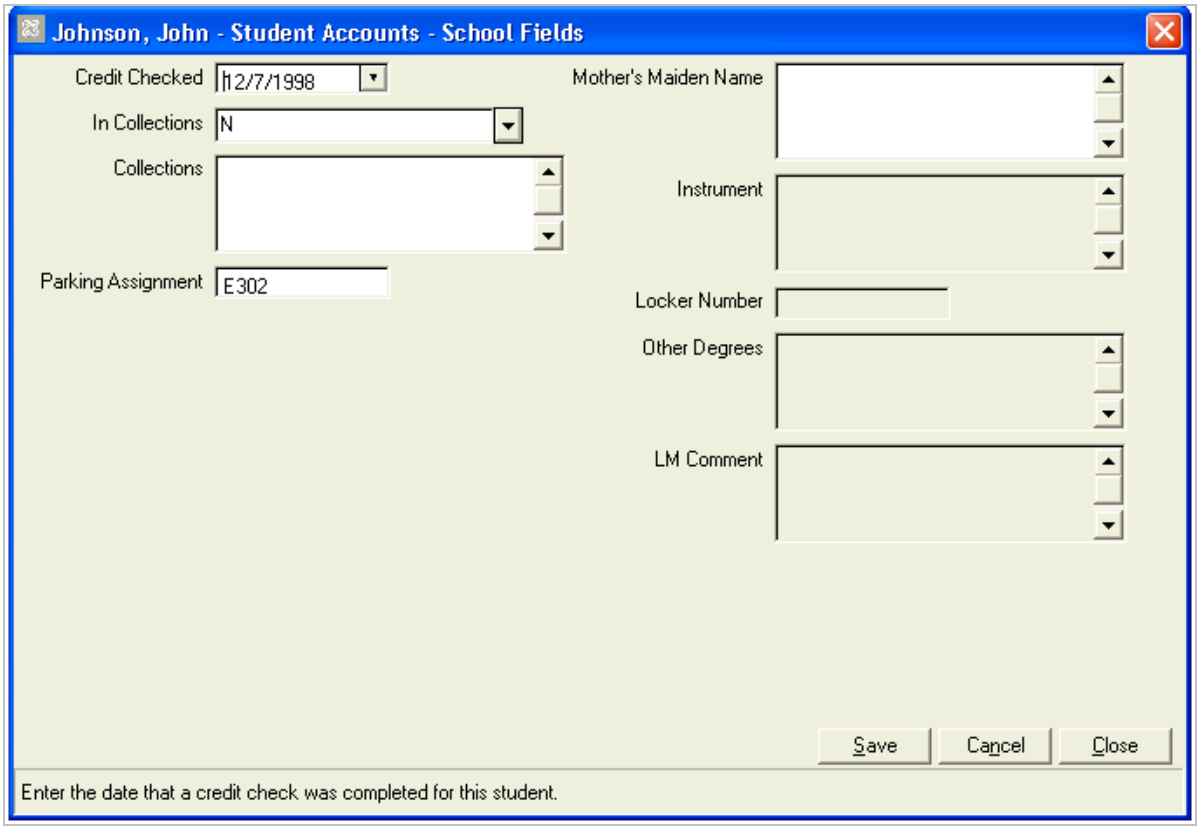
Inadvertent over-award to be returned: 5,056.00

School Fields - Student Accounts

School-defined fields are set up by your system administrator to collect information that is not required by the generic CampusNexus Student application. (See Setup > School Defined Fields.) The fields are organized by department during setup. At least one department has the authority to change each field. Some fields may be viewed but not edited in your department. A field may be flagged as confidential by the originator, i.e., not viewable outside of the department that is using it. For instance, if a field can only be viewed or edited by the Student Accounts Department, it will only be visible when the form is opened from View > Student Accounts > School Fields.

To view or edit school fields:

1. Navigate to **View** > **Student Accounts** > **School Fields**. The School Fields form is displayed.



2. Click on or tab to a field that you want to change. Select an option or enter data to edit the field.

   The fields are displayed in edit mode (white background) if your department has been given permission to change the data. Fields that are "dimmed" cannot be changed. Fields that are listed but are gray and show no data are simply not filled in yet by the staff member responsible for doing so.

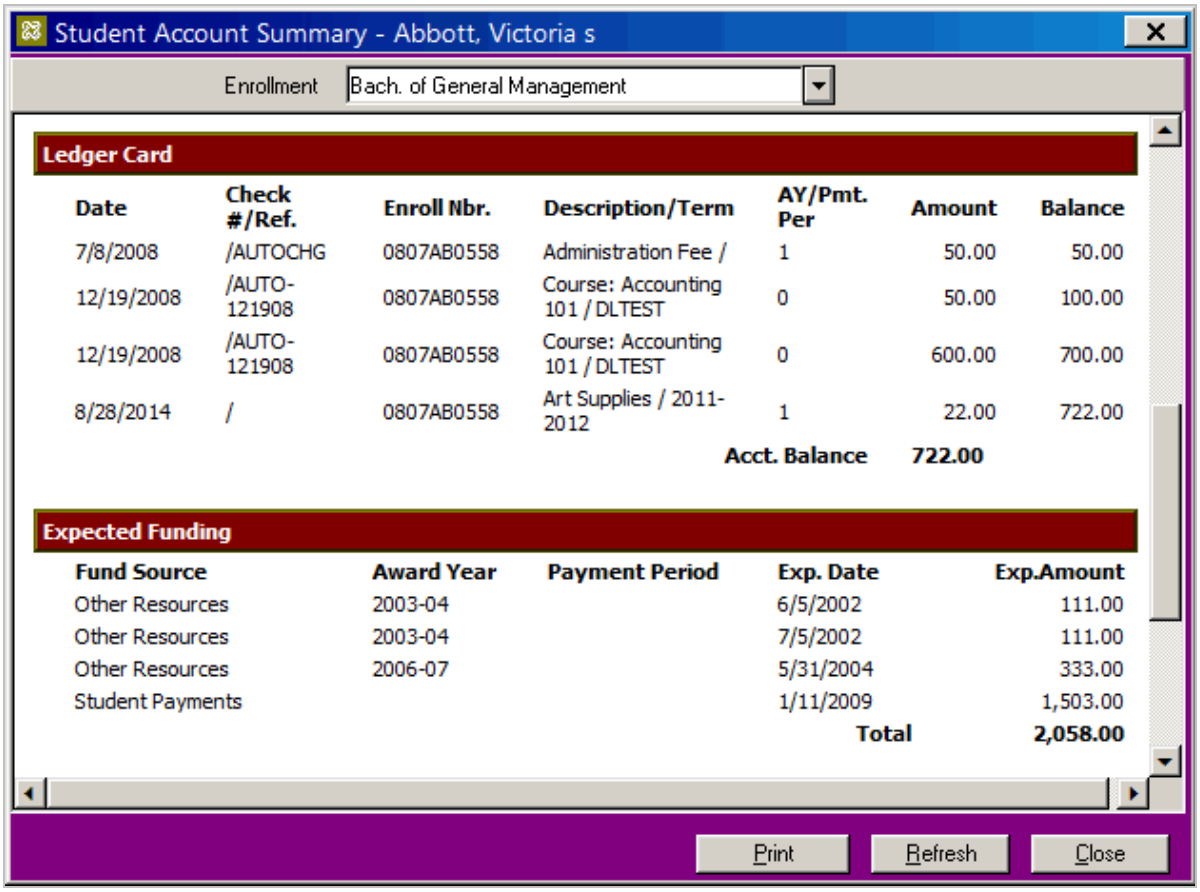
3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Student Account Summary

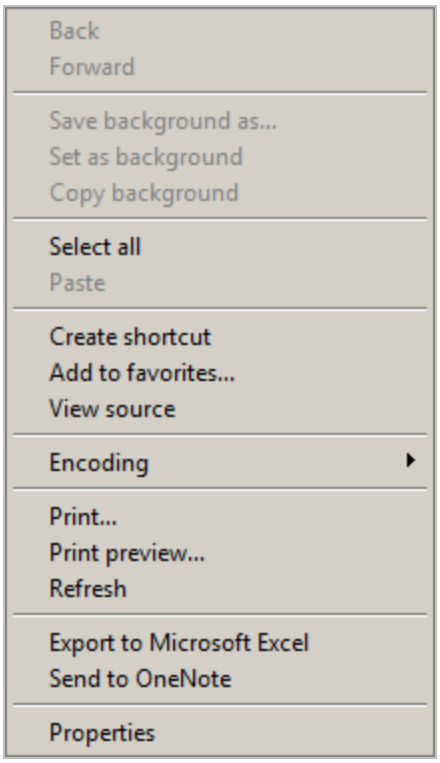
The Student Account Summary report provides an analysis of the student's financial position with your institution. It includes basic identification information, followed by sections for the Ledger Card, Expected Funding, and a Category Breakdown of applied payments. right-click the report to see a short cut menu with HTML-style options.

To view the Student Account Summary report:

1. Select a student.
2. Navigate to **View > Student Accounts > Summary**. The Student Account Summary for the selected student is displayed.



3. If the student has more than one enrollment, select an **Enrollment**and click **Refresh**.
4. Click the section headings to view associated forms, such as the Ledger Card.
5. Right-click the report to access a shortcut menu with the following options:



6. Click **Print** to print the report.
7. Click **Close** to close the form.

Payment Information

Use the Payment Information form to enter and store information on student bank accounts and credit cards. Accounts shown in the Payment Information form can be debited for school fees or credited for refunds and/or stipends to the students, with the student's or agency's permission. You can set up a student payment account or agency payment account.

Integration with CampusNexus Finance, HR & Payroll

When CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll, the bank account information is synchronized between the two systems. The account number is encrypted. Permissions are assigned to view the account number.

- If student bank account information is created in the Payment Information form, the data is transmitted to the Student Bank Accounts module in CampusNexus Finance, HR & Payroll. The first 10 characters of the 'Bank Name' in CampusNexus Student are saved as 'Bank Account' in CampusNexus Finance, HR & Payroll. If the Bank Account already exists in CampusNexus Finance, HR & Payroll, a message is displayed in CampusNexus Student.

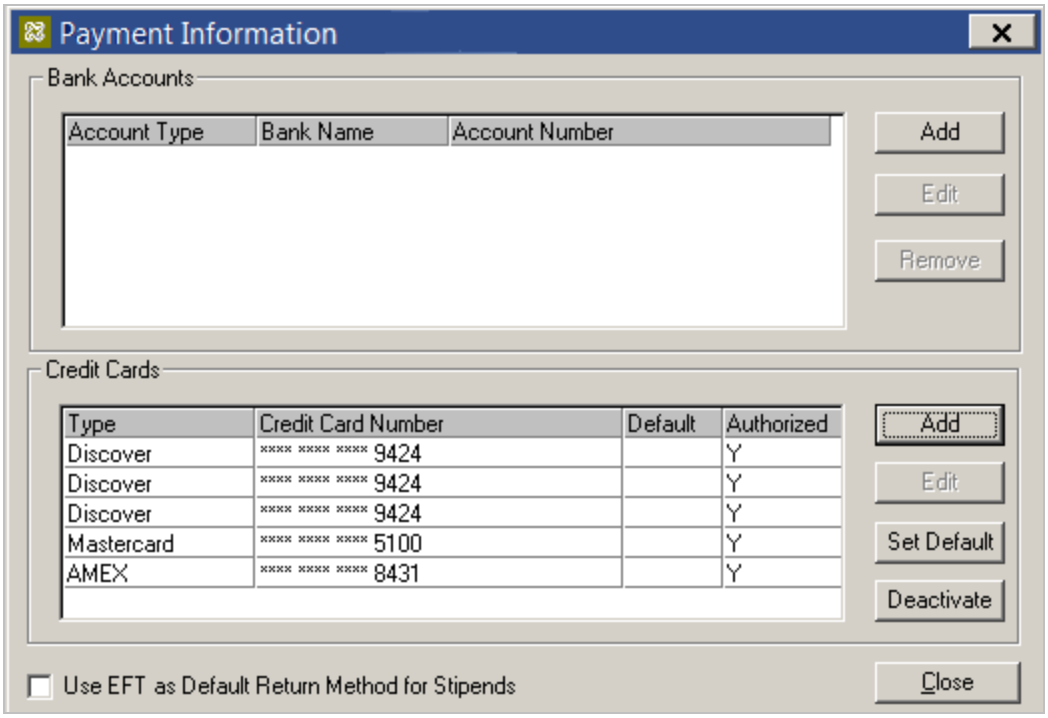
  An automatically generated record ID from CampusNexus Student is saved as an ID in CampusNexus Finance, HR & Payroll to keep track of the record while editing the record so that changes can be sent to the appropriate record CampusNexus Finance, HR & Payroll.

- If student bank account information is created in CampusNexus Finance, HR & Payroll, the values required by CampusNexus Student (i.e., Account Type, Bank Name, Account Number, and Routing Number) are sent to CampusNexus Student and saved in CampusNexus Student. If the record cannot be saved in CampusNexus Student, the record is not saved in CampusNexus Finance, HR & Payroll either, and a message is displayed.

To set up a student payment account:

1. Navigate to **View > Student Accounts** > **Payment Information**. The Payment Information form is displayed.

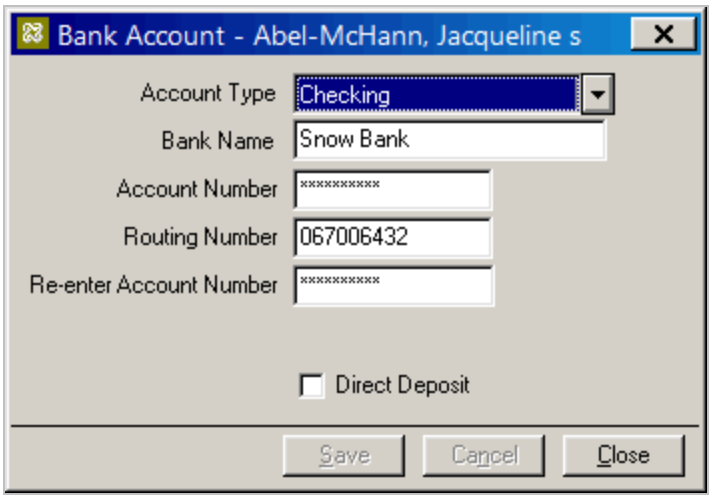
   Note: Bank information is only visible to users who have the appropriate level of permissions. When an account number is typed, it is visible to the person doing so. As soon as the information is saved, the account number is displayed with all but the last four digits masked for security purposes.



Note: The "Authorized" column indicates whether a card has been authorized by an actual credit card processor.

2. In the **Bank Accounts** section of the form:

   Click **Add**, or select a record and click **Edit**. The Bank Account form is displayed.



3. Select an **Account Type**. The options are Checking and Saving.
4. Specify the required **Bank Name**, **Account Number** and **Routing Number**.
5. Specify the Account Number a second time to validate that you have typed it correctly in the **Re-enter Account Number** field.
6. Select **Direct Deposit** if the student is authorizing withdrawals to be made through the bank account or would like to receive the refunds or stipends through ACH.

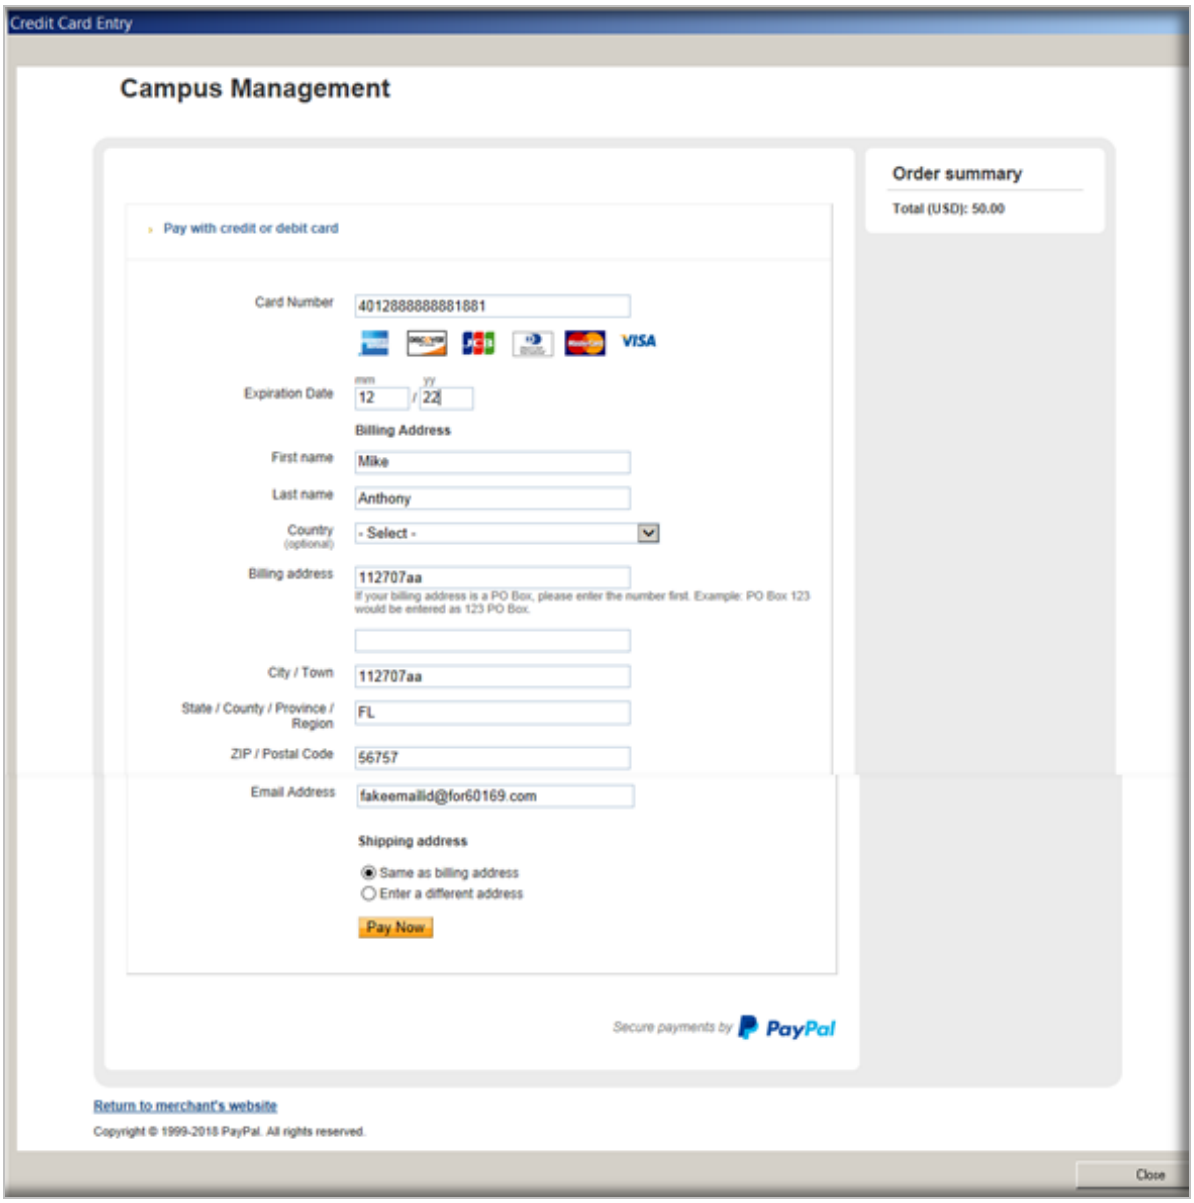
7. Select a record and click **Remove** to delete a bank account from the list.
8. In the **Credit Card** section of the form:

   Click **Add**, or select a record and click **Edit**. The Credit Card Information form is displayed.

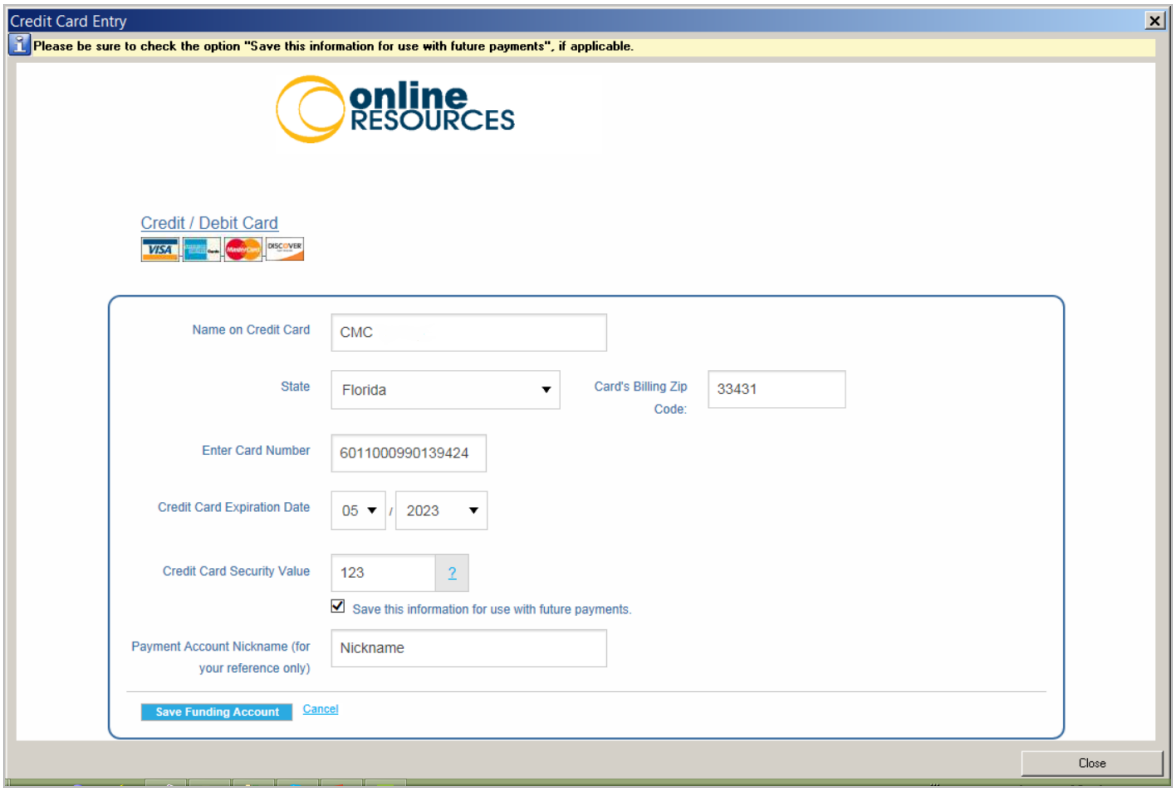
   Note: If the student's campus is **not** configured to Verify Credit Card Payments Posted Using CampusNexus Student (Campus Information - Electronic Processing Tab), you will proceed with this procedure as normal (steps 9 through 12).

   If the student's campus **is** configured to Verify Credit Card Payments Posted Using CampusNexus Student and you add a new credit card, you are redirected to the payment gateway provider's hosted page to enter credit card information.

   PayPal



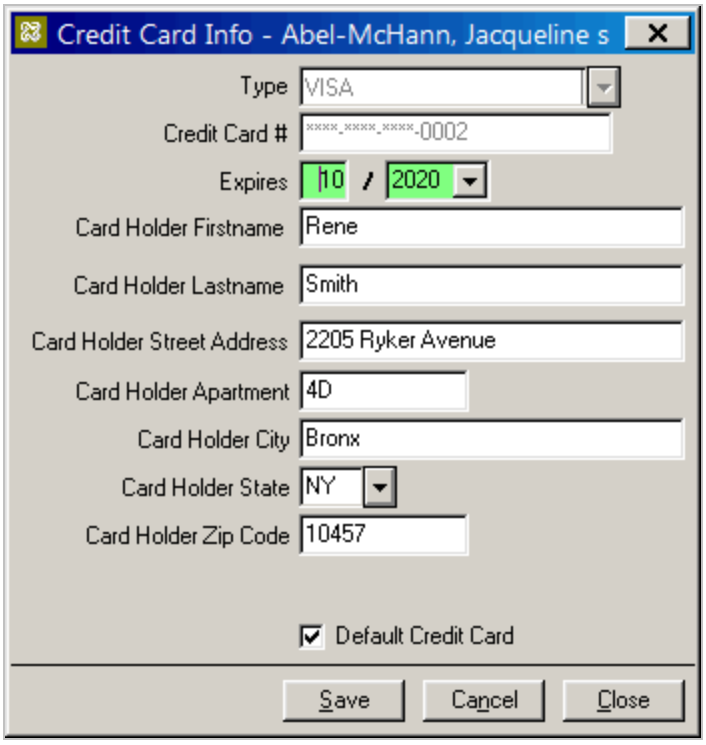
ACI



Note: When adding a credit card through a payment gateway provider's hosted page, a unique ID is stored in the CampusNexus Student database instead of the actual credit card number. This unique ID is used to communicate with the payment gateway provider and to identify the correct student's credit card for processing credit card transactions.

You will not have the ability to edit credit cards when using this redirect and will need to deactivate any expired or invalid cards and add new cards as needed.

9. Select a credit card **Type** and fill in all fields as required.

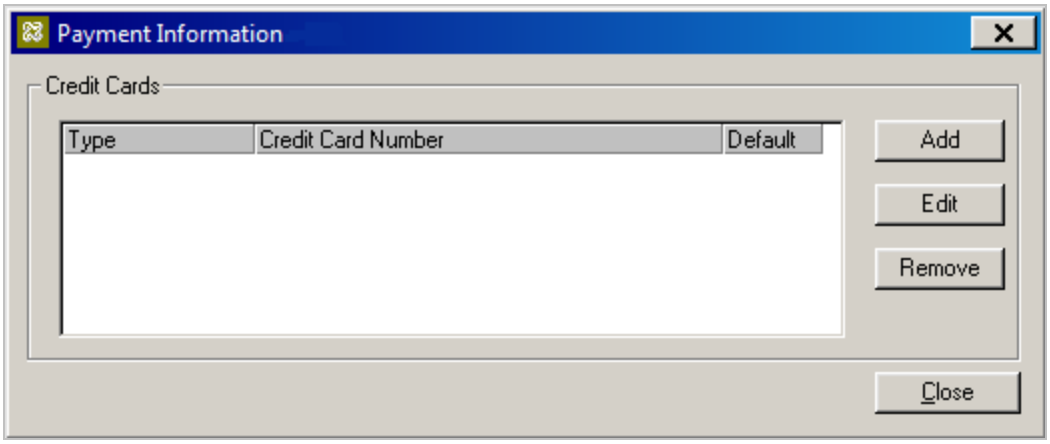


10. Select a record and click **Remove** to delete a credit card from the list.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Payment Information form.
12. Select**Use EFT as Default Return Method for Stipends** to use the Electronic Funds Transfer (EFT) return method and override any of the default return method configurations for all scheduled stipends created for the indicated student.

    Note: The ACH return method still has the highest priority and appears if the student has a bank account configured for direct deposit, regardless of the EFT setting for the student.

To set up an agency payment account:

1. Navigate to **Daily > Contact Manager** > **Agency/Third Party** > **Add/Edit** (button) > **Branches** > **Payment Information** (button). The Payment Information form is displayed.



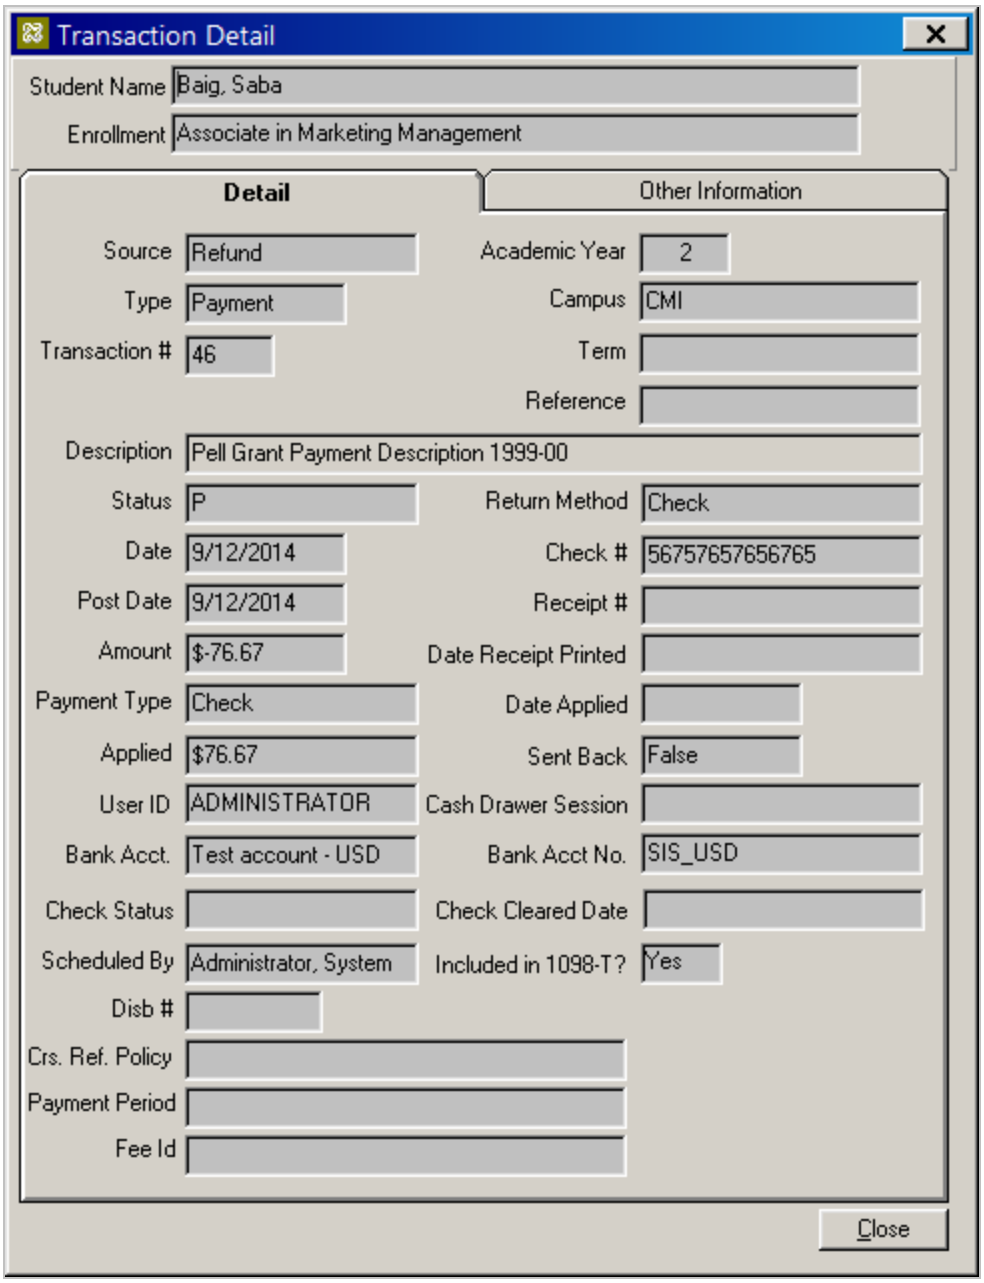
2. Agency payments may only be processed using a credit card. Click **Add**, or select a record and click **Edit**. The Credit Card Information form is displayed.
3. Select a credit card **Type** and fill in all fields as required.
4. Select a record and click **Remove** to delete a credit card from the list. A confirmation message is displayed. Click **Yes**.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Payment Information form.

Transaction Detail

When you click the **Transaction Detail** button on the Ledger Card form or on the Student Subsidiaries form, the Transaction Detail form is displayed. The Transaction detail form contains a Detail tab and an Other Information tab.

Detail Tab

The **Detail** tab on the Transaction Detail form is read-only and is only accessible upon selecting a payment, void, or NSF record from the Student Ledger Cards or Student Subsidiaries form.



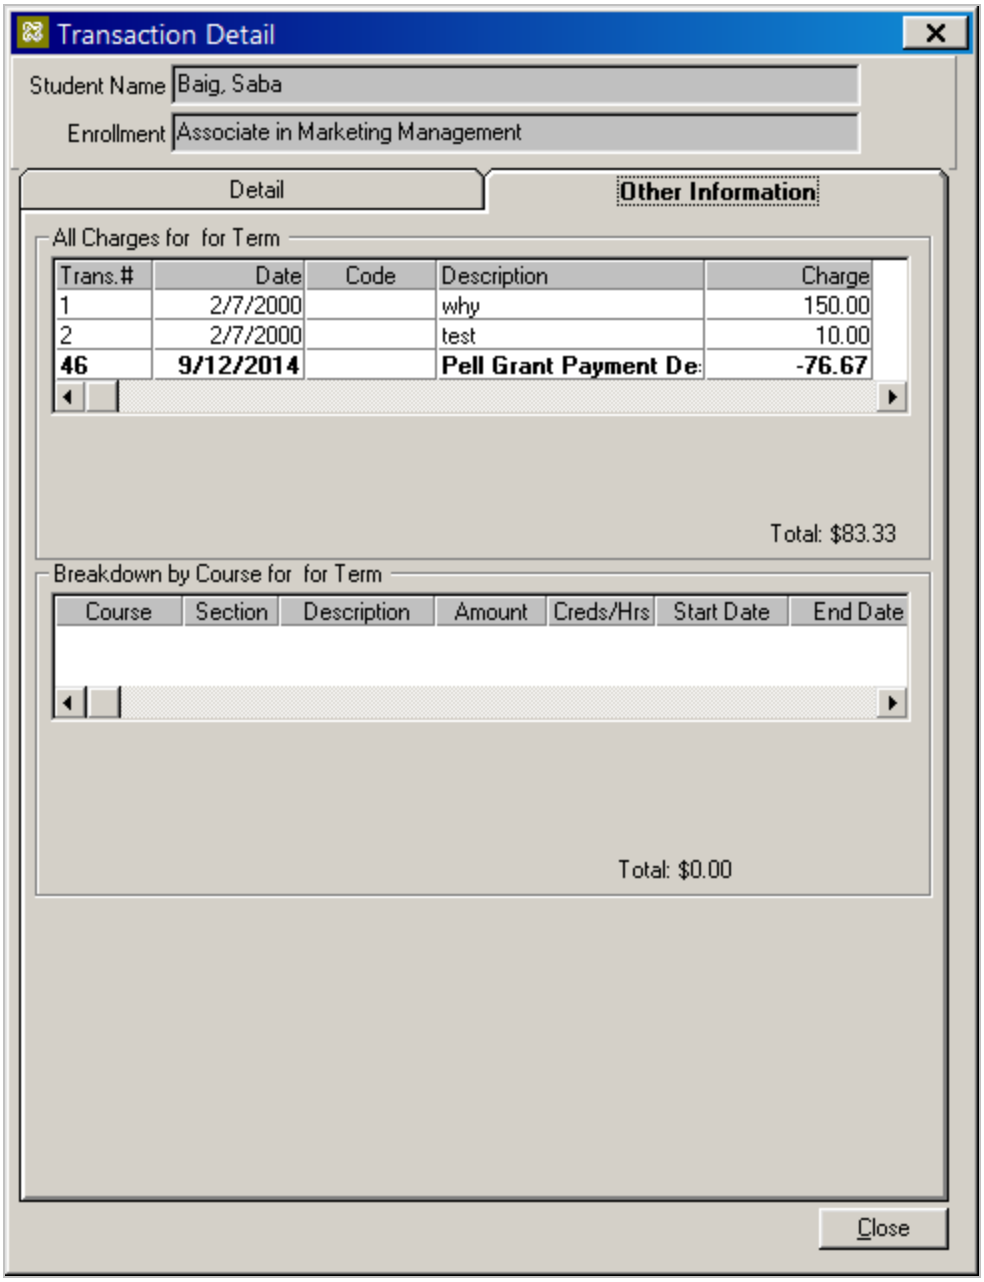
Field Descriptions: Transaction Detail Tab

Field	Description
Source	The source of the transaction.
Type	Type of transaction: Credit Memo, Debit Memo, Invoice, or Payment.
Transaction #	Number of the transaction as it appears on the student's Ledger Card.
Academic Year	Number of the student's academic year to which this transaction applies.
Campus	The campus code for the campus where the transaction occurred.
Term	The term for which this transaction applies.
Reference	Some reference note to explain the transaction.
Description	A description of the transaction
Status	Status of the transaction: • F - Paid in Full • O - Open • P - Partial Payment
Date	Transaction date.
Post Date	Date when the transaction was posted.
Amount	Amount of the transaction.
Payment Type	Payment Type Codes: • C - Cash • E - EFT • H - Check • N - Non-cash • O - Other • R - Credit Card **Note**: The credit card number displayed is masked using the format: "**********####", where * represents the masked number and #### is replaced by the last four digits on the credit card.
Applied	Amount applied from this transaction. This allows you to split the transaction across multiple purposes.
User ID	The User ID of the person who entered the transaction is recorded for tracking purposes.
Bank Acct.	The Bank Account Description associated with the transaction. This information is set up in Lists > Student Accounts > Bank Codes.
Check Status	The check status: • S - Sent • C - Cleared • V - Void • U - Unclaimed
Scheduled By	The user who scheduled the transaction.

Field	Description
Disb #	The disbursement number associated with the refund. This field can contain one or more numbers, depending upon how the user set up the disbursements and refunds.
Crs. Ref. Policy	The name of the Course Refund Policy used to calculate the selected refund adjustment.
Payment Period	The payment period associated with the payment.
Fee Id	The identification number of the fee.
Return Method	The Return Method defined by the IRS and set by each campus is Payments Received or Amounts Billed.
Check #	If paid by check, include the number of the check.
Receipt #	If a receipt is issued, include the number of the receipt.
Date Receipt Printed	The date on which a receipt was generated in CampusNexus Student. A blank field indicates no receipt was printed.
Date Applied	The date when the amount in the Applied field was applied to the transaction described here.
Sent Back	True or False.
Cash Drawer Session	The Cash Drawer Session associated with the transaction.
Bank Acct No.	The Bank Account Number associated with the transaction. This information is setup via the Lists > Student Accounts > Bank Codes tab > Accounts button path.
Check Cleared Date	The date when the check was cleared.
Included in 1098-T?	Yes or No. See also 1098-T Setup and Process 1098-Ts. **Note**: The Included in 1098-T? check box and label are visible for payments and charges. 'Yes' is displayed if the corresponding field for the transaction in the 1098-T Processing Utility is set to 'I'. 'No' is displayed if the corresponding field for the transaction in the 1098-T Processing Utility is set to 'N' or any value other than 'I'. For payments, you can refer to this check box to determine if a payment on the student's ledger card is flagged to be included for 1098-T processing. Note that while the 1098-T setting on the ledger card is visible to users for all payments, it is not possible to change this setting on loans. Regardless of this setting, the 1098-T Processing Utility only gathers payment transactions for scholarships, grants, ACG, SMART, TEACH, or Other category of fund source types. If a payment period is associated with the transaction, the payment period information is displayed here. The fields displayed in this box are Academic Year (Ac Yr), Payment Period (Pmt Per), and the Payment Period start and end dates.

Other Information Tab

The Other Information tab displays a breakdown of the transactions displayed in the Ledger Card form by code.



Field Descriptions: Other Information Tab

Field	Description
All Charges for Term	
Trans #	Transaction number
Date	Transaction date
Code	Transaction code
Description	Transaction description

Field	Description
Charge	Transaction charge
Breakdown by Course for Term	
Course	Course code
Section	Course section code
Description	Course description
Amount	Amount charged for the course
Creds/Hrs	Number of credits or hours for successful completion of the course
Start Date	Start date of the course
End Date	End date of the course
Instructor	Name of the course instructor
Date Added	Date the transaction was posted

When the Posting Type in Billing Methods is configured as Aggregate, an itemization of the individual courses that make up a charge and detailed information about them is displayed at the bottom of this form. At the top part of the form the individual courses that make up a charge roll up into one record. This one record also appears on the top of the Student Ledger Card. Likewise, when the Posting Type is Aggregate, tuition discounts roll up into one record on the Student Ledger Card, and the Transaction Detail shows the breakdown of the discount amount per course (See line item #31 in both examples below).

Student Subsidiaries

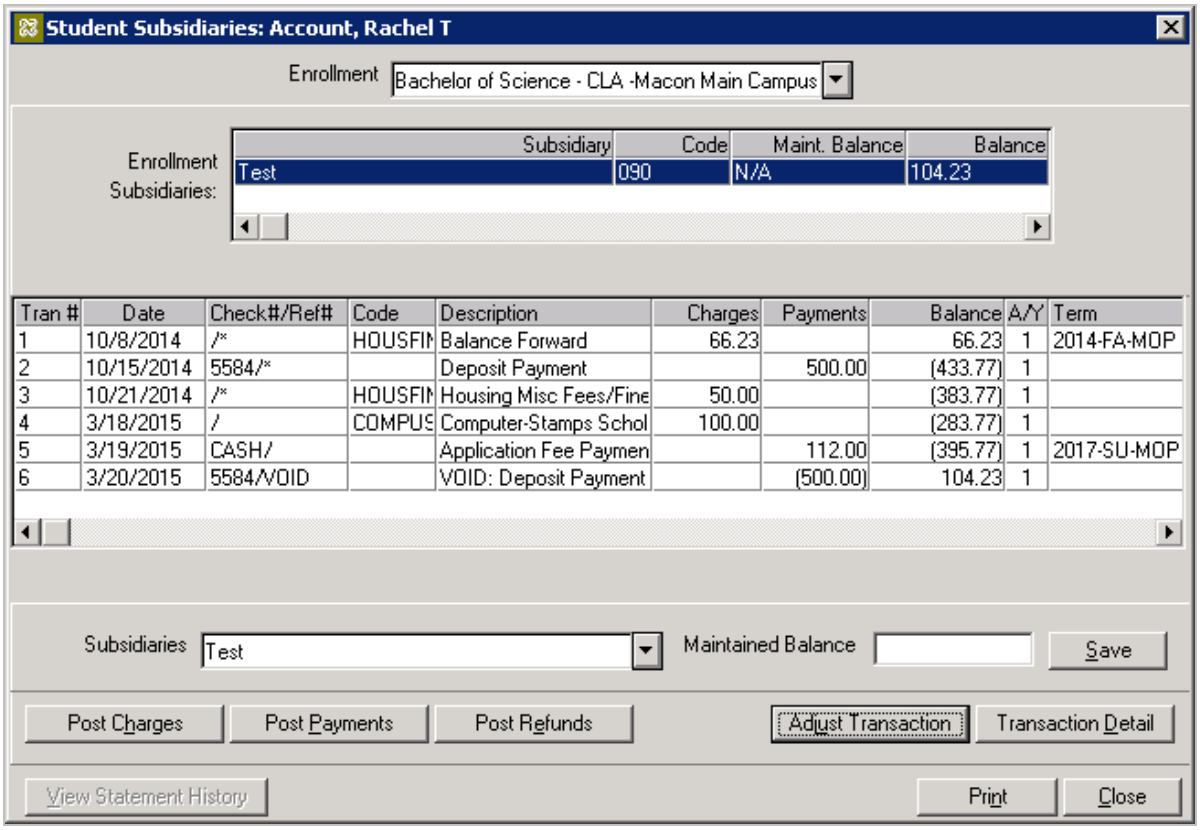
Transactions posted to a student's subsidiary account do not affect the student ledger card balance but affect the balance of the subsidiary. Funds can be released from a subsidiary to the student general ledger card to address situations that arise, for example, when a student pays a housing deposit and then must be charged for damages out of that deposit.

Refer to the following topics related to student subsidiaries:

- Creating a subsidiary
- Configuring a maintained balance
- Posting payments or charges to a subsidiary
- Posting refunds
- Processing refunds/stipends
  Refer to this topic for information about specific conditions that apply when CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll.
- Adjusting a transaction
  Refer to this topic for information about limitations that apply when adjusting a transaction and specific conditions that apply when CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll.
- Viewing transaction details
- Transferring subsidiary transactions upon an enrollment transfer

To create a subsidiary:

1. Select a student.
2. Navigate to **View** > **Student Accounts** > **Subsidiary**. The Student Subsidiaries form is displayed (if the 'Use Subsidiary' setup flag is True).



3. Select an **Enrollment**.
4. Select a subsidiary in the **Subsidiaries** field.
5. Enter the **Maintained Balance** amount for the selected subsidiary for that student. This is the balance the student must maintain in the subsidiary. This is entered in the form of a credit balance. For example, if a student must have $500.00 balance on file, that will reflect as a credit balance of -500.00 or be displayed as (500.00).
6. Click **Save**. The saved subsidiary appears in the Enrollment Subsidiaries section displaying the Subsidiary name, Code, Maintained Balance, and Balance. The balance is calculated using the same logic that is used for the regular ledger card. Payments create a negative balance, while charges increase the balance.

   As charges and payments are posted to the subsidiary, they appear beneath the Enrollment Subsidiaries section of the form, displaying details such as Transaction number, Date, Check number and Reference number, Code, Description, Charge amount, Payment amount, Academic Year, and Term.
7. Click **Print** to print a report of the charges and payments posted to the selected subsidiary.

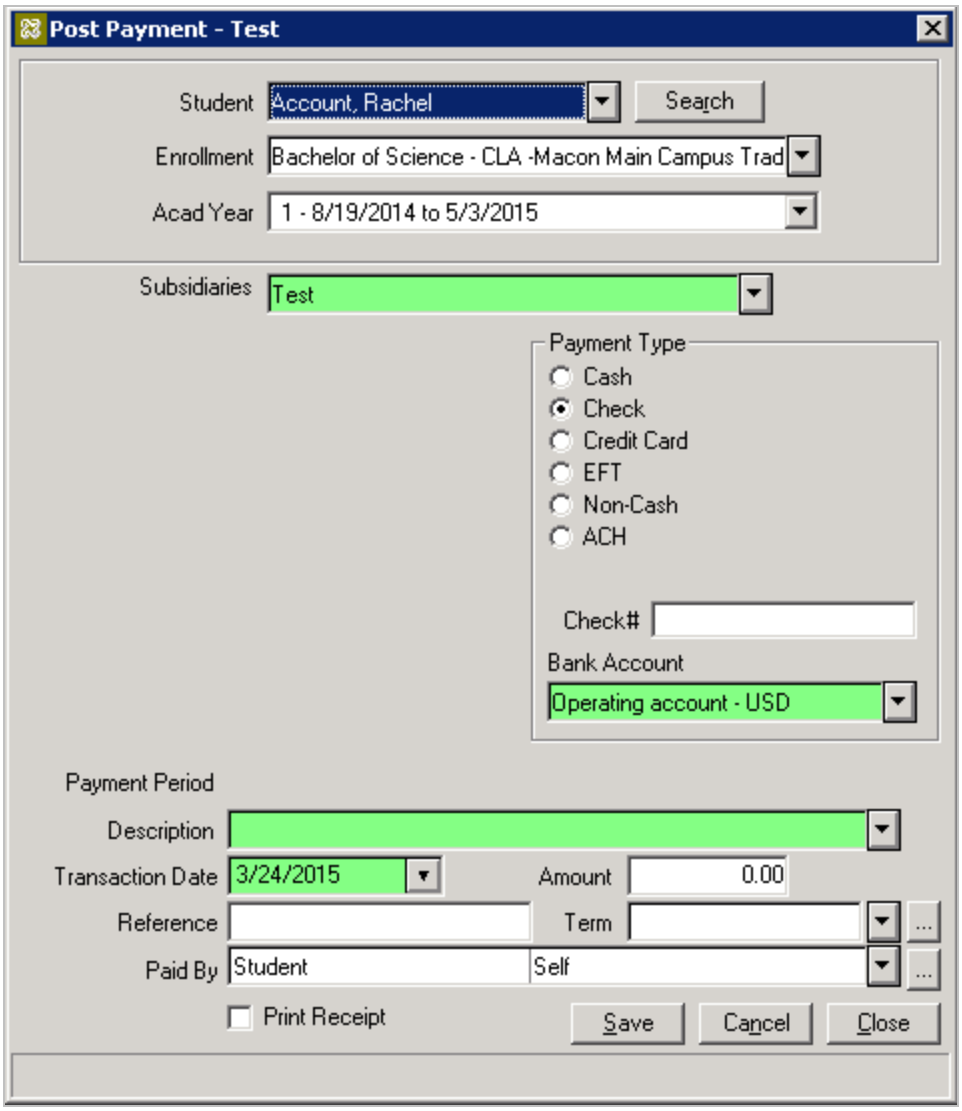
   Note: You can also print Subsidiary statements for 'All Enrollments' from the Subsidiary form.

To post payments or charges to a subsidiary:

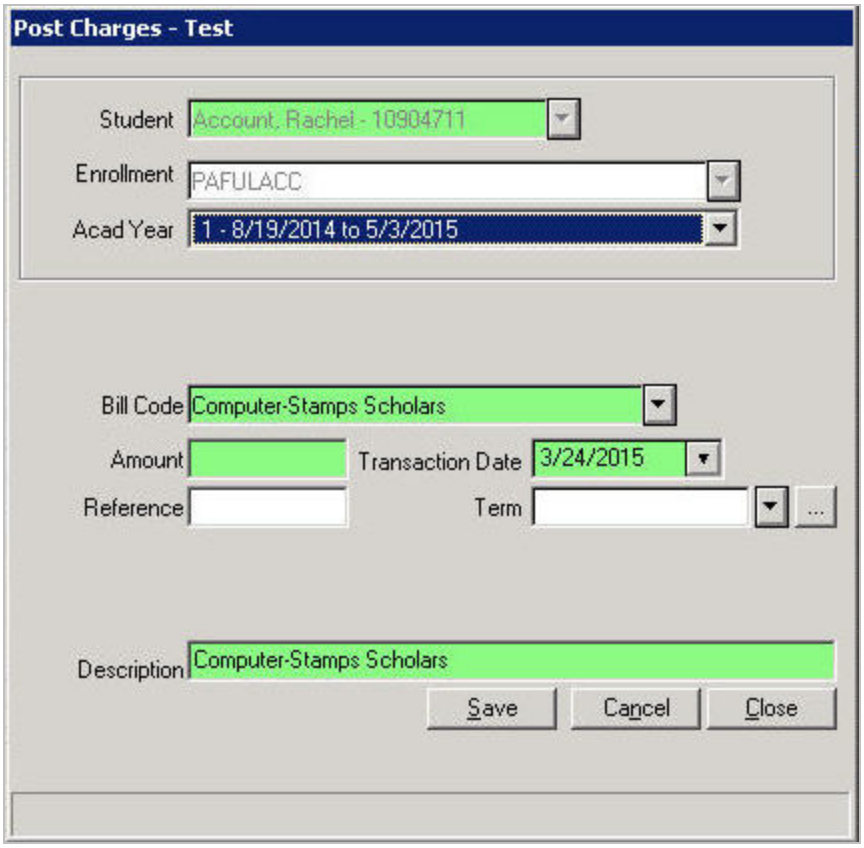
A new subsidiary can have payments and charges posted to it. Payments create a negative balance while charges increase the balance. You can designate to which subsidiary a payment is posted.

When a charge is posted with a transaction code that is associated with a subsidiary, the charge is posted only to the appropriate subsidiary without being reflected on the student ledger card. If the student has a credit balance in the subsidiary due to a deposit and that amount is not enough to cover the cost of the charge, there will be a positive balance on the subsidiary.

1. Navigate to **View** > **Student Accounts** > **Subsidiary**. The Student Subsidiaries form is displayed.
2. Select a subsidiary from the **Enrollment Subsidiaries**.
3. To post a payment, click **Post Payment**. The Post Payment form is displayed. The name of the selected subsidiary is displayed on the title bar.



4. To post a charge, click the **Post Charges** button. The Post Charges form is displayed. The name of the selected subsidiary is displayed on the title bar.



5. Complete applicable fields on the Post Payment or Post Charges form.
6. Click **Save**.
    - For a payment, only the balance on the subsidiary is affected.
    - For a charge, the balance on the subsidiary is increased.
7. Click **Close** to close the form. You are returned to the Student Subsidiaries form, which now displays the payment or charge you just posted.
8. Click **Print** to print a receipt for the payment or charge. You can view the receipt before it is printed.
9. Click **Close** to close the form.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

Audit Features

The audit features for Student Accounts include:

- CampusNexus Student stores the name of the payee on each refund record, stipend record, and subsidiary refund so that it can be retrieved for reporting purposes.
- CampusNexus Student audits changes to the payee for refunds and stipends. Auditing occurs from the time the refund or stipend is scheduled to the time the refund or stipend is processed. The date changed, time changed, and the user who made the change are audited.
- Payee changes are audited for subsidiaries.

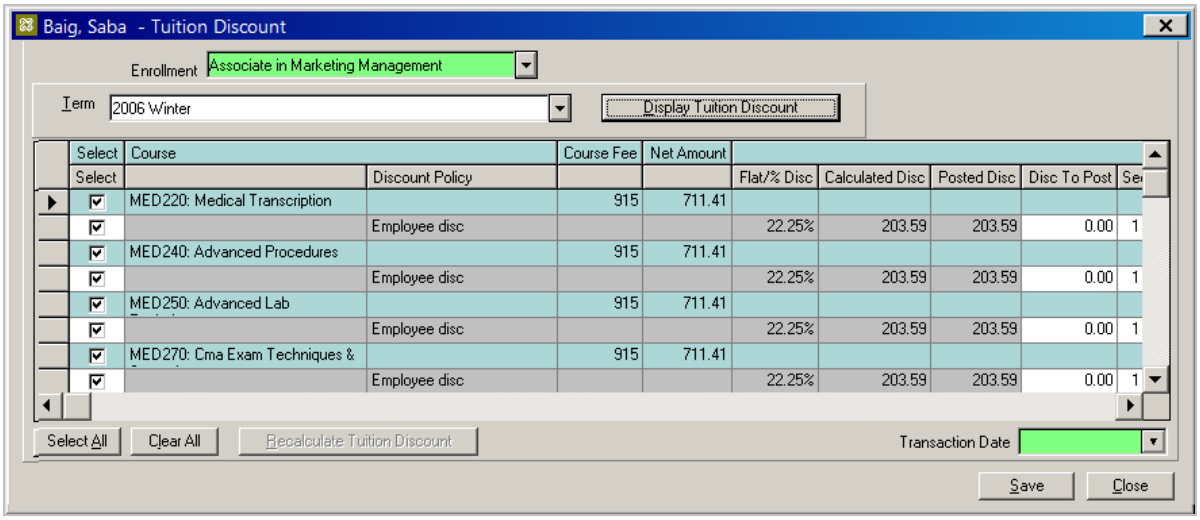
- Payee information for a stipend can be edited regardless of the fund source associated with the stipend. The payee changes are audited for all stipends.
- Your ability to edit a payee for a refund is dependent on the fund source associated with the refund. The payee changes are audited only for the fund sources that allow the payee to be changed.
- You can sort on different columns of the grids available in the Process Refunds/Stipends wizard.
- A student account administrator can define that the Reference information is printed on the check, below the address, or on the stub, or in both places.
- A student account administrator can view the ID of the user who scheduled the refund/stipend using the Ledger Card, Transaction Detail button.
- CampusNexus Student stores the user ID of the user who scheduled the stipend so that it does not get overwritten by the user ID of the user who posted the stipend.

Tuition Discounts

Use this procedure to find the tuition discount policies available for a student and post the amount of discount that needs to be provided to the student.

To post tuition discounts for a student:

1. Select a student.
2. Navigate to **View > Student Accounts > Tuition Discounts**. The Tuition Discount form is displayed.
3. Select the **Enrollment**.
4. If the enrollment is by term, select the **Term** for which the tuition discounts need to be applied or processed for the student.
5. If the enrollment is by payment period, select the **Ac. Year** and **Pmt. Per.** for which the tuition discounts need to be applied or processed for the student.
6. Click **Display Tuition Discount** to view the discount policies defined for the student's campus.



The columns in the form are now populated with the following information for each applicable tuition discount policy.

Column Descriptions

Column	Description
Course	The name of the course if the billing method for the policy is **By Course/Payment Period with Post Transaction Details**. If the billing method for the policy is **By Term**, this column has a **Details** button. Click this button to display all the courses taken by the student in the selected term which qualify for the discount policy.
Discount Policy	The name of the applicable policy.
Course Fee	The amount charged for the course. The course amount cannot be edited.

Column	Description
Net Amount	The discounted amount for the course.
Flat% Disc.	The discount amount for the policy calculated on a flat rate basis. **Note**: It is not recommended to change discount percentages or flat rates on a Tuition Discount Policy once discounts have been posted for a given policy.
Calculated Disc.	The amount of tuition discount that should be paid to the student based on the tuition discount policy. The Calculated Discount Amount will be the maximum amount to be posted if some previous discounts are already posted. If the discount amount for the policy has to be calculated on a flat rate basis, this column will be blank.
Posted Disc	The amount that has already been posted. The system keeps a running sum of the discounts per course.
Disc To Post	The discount amount that needs to be posted for the student for each tuition discount policy. If no previous discount has been posted, the discount to post amount will be updated once the Seq. number is entered, so that CampusNexus Student does not post more than the course amount.
Seq	This is the order in which the tuition discount policies are to be processed. There should not be a duplicate sequence number for a course. This column is required if multiple discounts are available for the course; it is not required if there is only one discount available for the course.

7. Click **Select All** to select all the Courses and Discount Policies displayed; click **Clear All** to clear the selection.

   Note: If a check box cannot be selected, it is because the course is in a Drop status and you cannot select the course for posting.

8. Click **Recalculate Tuition Discount** to update the Tuition Discounts by incorporating any changes that occurred.
9. Select the **Transaction Date** for posting the tuition discount amounts.

   Note: When automated billing is in use with the Post Transaction Details option selected, the Transaction Date for each tuition discount in the payment period will be equal to the course section date.

10. Click **Save** to post the tuition discount amounts.
11. Click **Close** to close the form.

Collections

Students attending an institution are expected to pay for tuition and all other fees and charges. This may be done through financial aid, loans, or student payments. If the student pays the bill and a payment plan is developed between the institution and the student, that plan must be repaid based on the institution's payment schedule. Failure to do so can place a student into a "Collections" status. Collections can be handled internally by the institution if the student is still active or by outside collections agencies if the student has graduated or dropped.

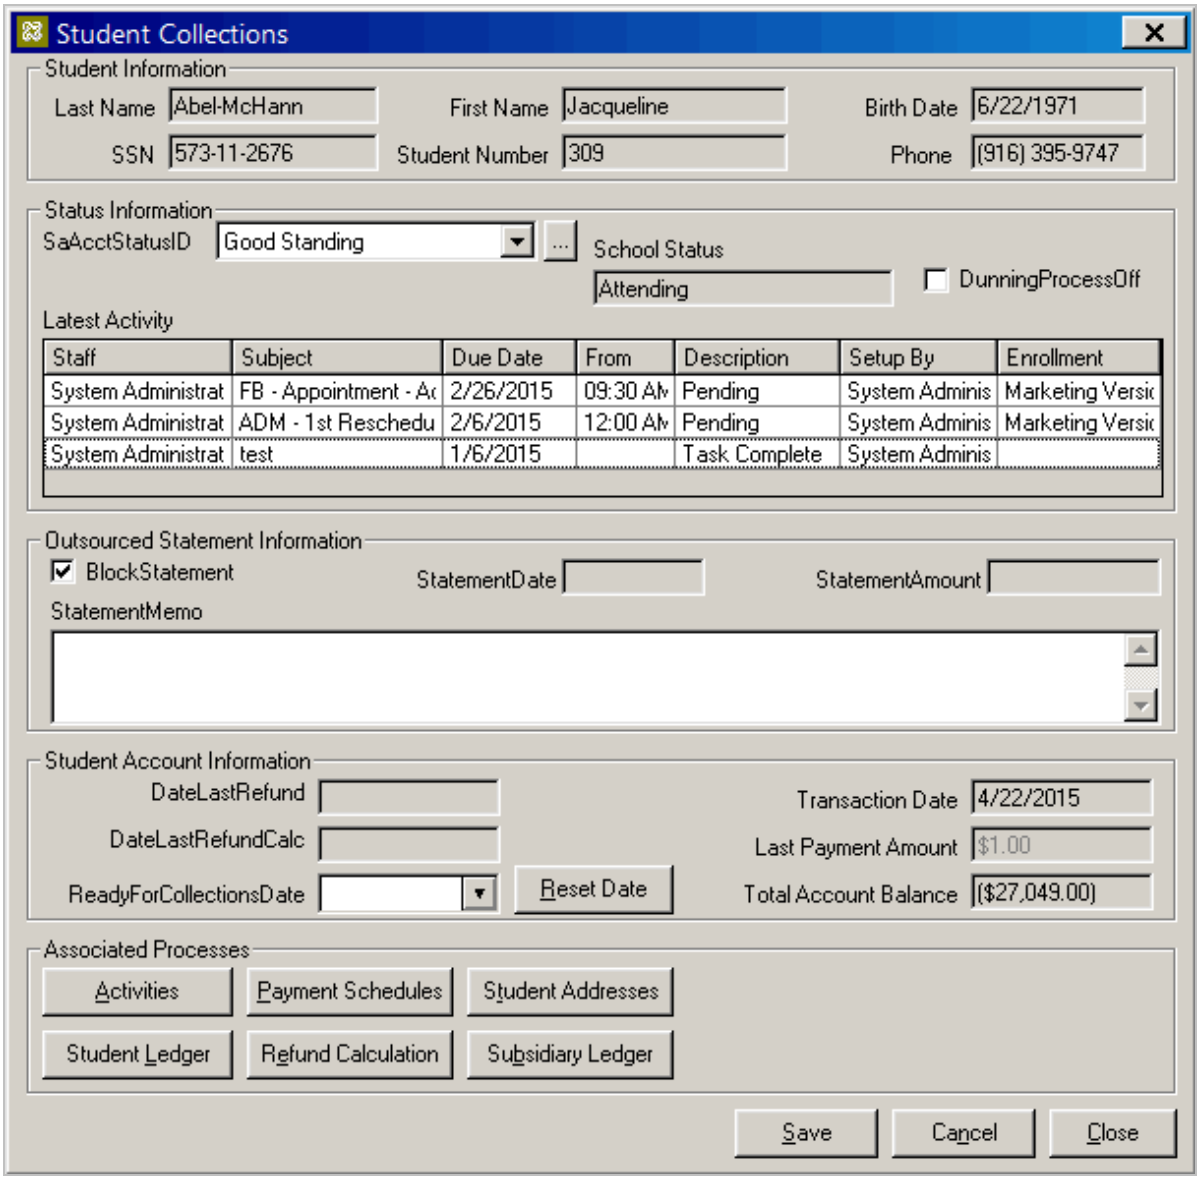
Once a student is in a collections status; various processes and tasks must be performed by the institution to collect any monies due, commonly referred to as the "dunning process". Typical activities include – having collection's payment schedules produced; activities scheduled, letters sent, evaluations to whether student account balances are written off, and tracking of where a student is in the dunning process.

The User Toolbar will now display multiple collection statuses, if multiple selections were made in the Student Collections form.

See Field Level Security below.

To manage Student Collections:

1. Navigate to **View > Student Accounts > Collections**. The Student Collections form is displayed.



2. The Student Information section contains fields that are not editable.
3. In the Status Information section, select a **Collections Status** (**SaAcctStatusID**). If an Enrollment activity has been created for this status, it will be activated/created once the status is saved.
4. Select **Dunning Process Off** if you want the Dunning Process to be disabled or clear the check box to activate the Dunning Process.
5. The Latest Activity grid lists the last three activities associated with the collection.
6. In the Outsourced Statement Information section, select **Block Statement** to block outsourced statements, otherwise clear the field.
7. The Statement Date and Statement Amount fields are read-only.

8. In the **Statement Memo** field enter comments that will appear on the student statement that is produced by the outside vendor/source.
9. Student Account Information
10. In the **ReadyForCollectionsDate** field, enter the start date for collections.

    If a fund source marked with "Use for Outside Collections" has been created for the campus, a new payment schedule is created using the date set in this field. The payment schedule will reflect the "total amount due" from the student to the school. The fund source for this payment plan will be the default Out of School Collections assigned to the enrollment campus. If the fund source cannot be retrieved, the following message is displayed: *"No Outside Collections fund source available to the student's campus. Scheduled Payment can not be created."* The current enrollment will be assigned to the scheduled payment.
11. The Last Payment Date, Last Payment Amount, and Total Account Balance fields are read-only.

    The Date Refund Last Calculated date is the date when the last Actual refund was calculated for the student. If no refund has been calculated, the field is left blank.

    The Date Last Refund date is the date of the last paid refund for the student when all refunds have been paid. For example, if a student has three scheduled refunds, and all three are paid, the latest date is used; however, if no refunds exist or if refunds are still scheduled, the field is left blank.
12. Click **Reset Dates** to clear the dates and cancel scheduled payments.
13. The Associated Processes options allow you to access other areas of CampusNexus Student that pertain to the student collection process.
    - Click **Activities** to schedule an activity. See also Activities.
    - Click **Payment Schedules** to schedule or view a payment. See also payment schedule.
    - Click **Student Addresses** to view the student's addresses. See also address.
    - Click **Student Ledger Card** to view the student's ledger card. See also ledger cards.
    - Click **Refund Calculation** to view the student's refund calculation. See also refund calculation.
    - Click **Subsidiary Ledger** to view the student's subsidiary ledger. See also student subsidiaries.
14. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

    Note: If you click Close without saving the information, the following message is displayed: *"Unsaved data exists for student. Do you want to exit?"* Click **Yes** to exit or **No** to return to the Student Collections form.

To set Field Level Security for the form:

Leave the Collections form displayed, and navigate to Setup > Field Level Security. Set the field level security for the fields in the Collections form.

Audit Features

The audit features for Student Accounts include:

- CampusNexus Student stores the name of the payee on each refund record, stipend record, and subsidiary refund so that it can be retrieved for reporting purposes.
- CampusNexus Student audits changes to the payee for refunds and stipends. Auditing occurs from the time the refund or stipend is scheduled to the time the refund or stipend is processed. The date changed, time changed, and the user who made the change are audited.
- Payee changes are audited for subsidiaries.
- Payee information for a stipend can be edited regardless of the fund source associated with the stipend. The payee

changes are audited for all stipends.

- Your ability to edit a payee for a refund is dependent on the fund source associated with the refund. The payee changes are audited only for the fund sources that allow the payee to be changed.
- You can sort on different columns of the grids available in the Process Refunds/Stipends wizard.
- A student account administrator can define that the Reference information is printed on the check, below the address, or on the stub, or in both places.
- A student account administrator can view the ID of the user who scheduled the refund/stipend using the Ledger Card, Transaction Detail button.
- CampusNexus Student stores the user ID of the user who scheduled the stipend so that it does not get overwritten by the user ID of the user who posted the stipend.

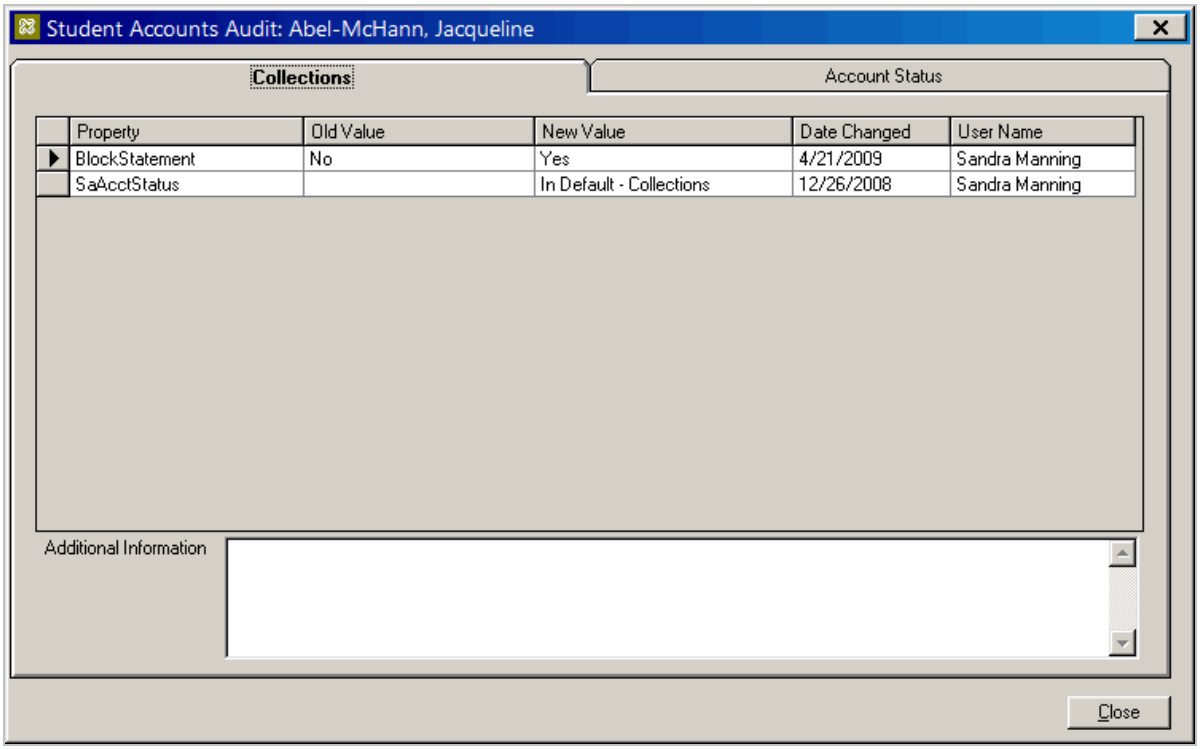
Student Accounts Audit

The Student Accounts Audit form displays changes to a student's account status and collections. The fields on the grid include Property, Old Value, New Value, Date Changed, User Name, and Additional information. CampusNexus Student includes variable data in the additional information field to describe the recorded change further. This is a read-only form.

To view the Student Accounts Audit folder:

1. Select the student for whom you want to view the student accounts history.
2. Navigate to **View** > **Student Accounts** > **Audit**. The Student Accounts Audit form is displayed.

   The Account Status displays changes made to the student's account status. The Collections tab displays changes made while processing collections.



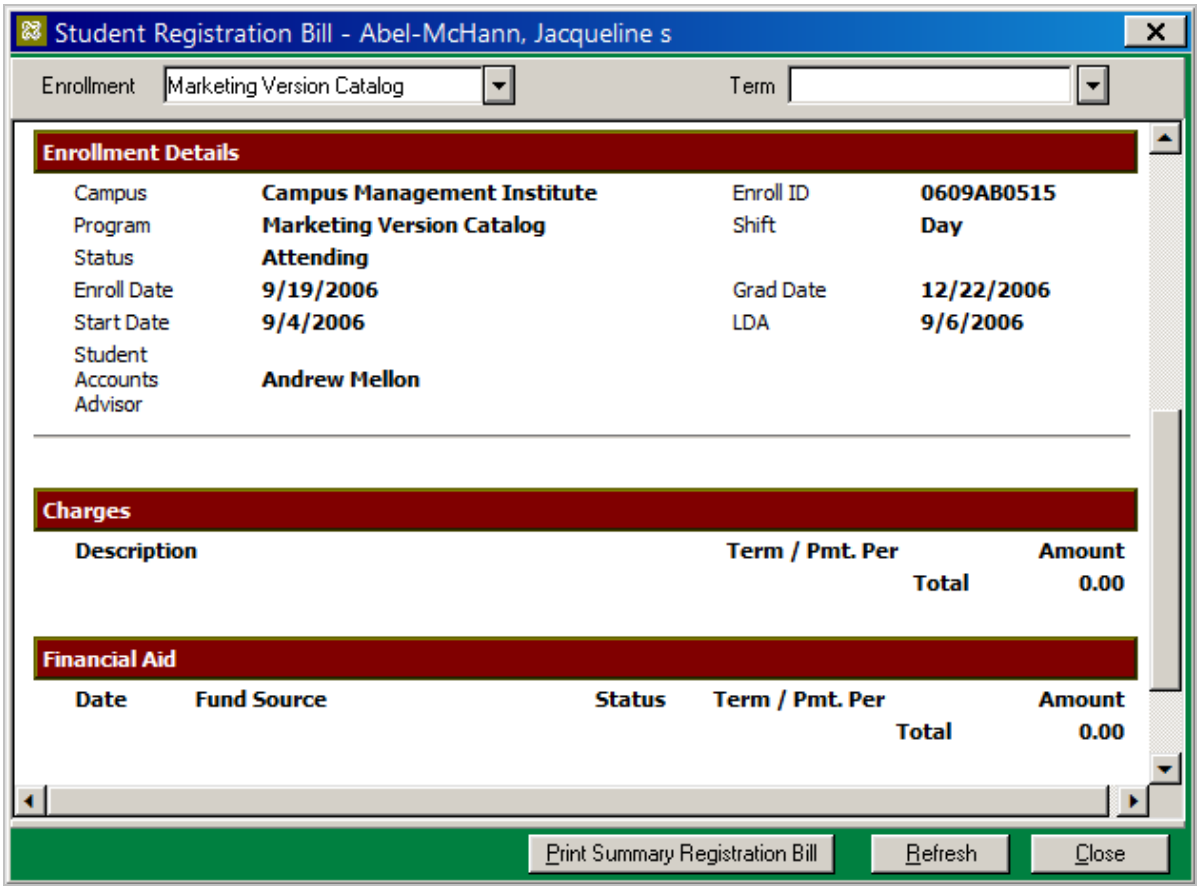
3. Click **Close** to close the form.

Student Registration Bill

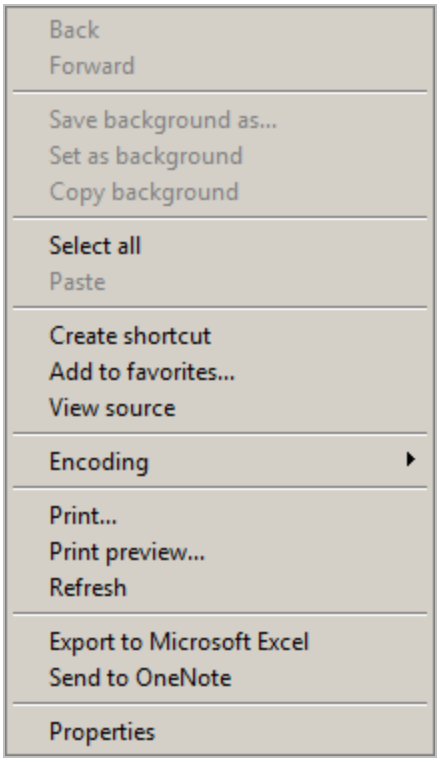
The Student Registration Bill is a report of the student balance with summarized charges, financial aid, payments, enrollment details, and a detailed breakdown of charges, financial aid, and payments.

To run the Student Registration Bill report:

1. Select a student.
2. Navigate to **View** > **Student Accounts** > **Registration Bill**. The Student Registration Bill form is displayed.



3. If the student has more than one enrollment or term/payment period, select an **Enrollment**or **Term/Payment Period** and click **Refresh**.
4. Click the section headings to view associated forms, such as the Enrollment form.
5. Right-click the report to access a shortcut menu with the following options:



6. Click **Print Registration Bill** to print the report. The Print Registration Bill form is displayed.

   Note: If both Summary Registration Bill and Detail Registration Bill were configured in Registration Bill Defaults, a pop-up menu appears when you click the Print button. If only the Summary option or only the Detail option was configured in the default settings, the Print button caption will read Print Summary Registration Bill or Print Detail Registration Bill, respectively.

   Note: You can print a single bill for a student with connected enrollments. If the student does not have Connected Enrollments, the **Print with Connected Enrollments** check box and the **Term Group** selection option are disabled.

7. Click **Close** to close the form.

Note: For information regarding Pending Discounts and registration billing, see Ledger Cards.

View > Academic Records

Functions related to academic matters such as enrollment, class scheduling, attendance, grading, degree audit, fees, and school-defined fields are handled via this menu. The options on this menu apply to the student selected from the Recent Students list.

Menu Item	Description
Student	Displays the Student Master form.
Enrollment	Displays data related to the student's enrollment records.
Summary	Displays a summary report of the student's enrollments.
Schedule	Displays the student's scheduled courses and class sections. You can view and maintain the student's schedule.
Attendance	Displays the form used to view or post attendance for the student.
Lessons	Displays the form used to view or enter course lesson data for the student.
Final Grades	Displays the form used to view or post final grades for the student (obsolete).
Degree Progress Audit	Displays the Degree Progress Audit report. You can enter transfer credits via this option.
Audit	Displays changes to posted grade information for lessons and final grades and identifies what was changed, when it was changed, and who made the change.
Fees	Displays the form used to view and edit fees related to the student's enrollments.
Degrees, Honors and Comments	Displays the form used to view and edit degrees awarded by your institution to the student.
School Fields	Displays the form used to view or enter data in school-defined fields related to the Academic Records module and public fields from other modules.
Transfer Credits	Displays the list of courses transferred from other colleges. You can modify transfer credit information. The same forms is displayed when you select Transfer Credits under View > Admissions.
Placement Info	Displays the form used to view and edit placement data for each student enrollment.
Registration Locks	Displays the form used to associate a registration lock with a student or student group.
Additional GPAs	Displays all your additional, non-system GPAs.
Payment Period Summary	Displays Payment Period summary results for students that are evaluated through SAP based on a completed payment period. For an overview, see Payment Period Locking and the Completed Flag.

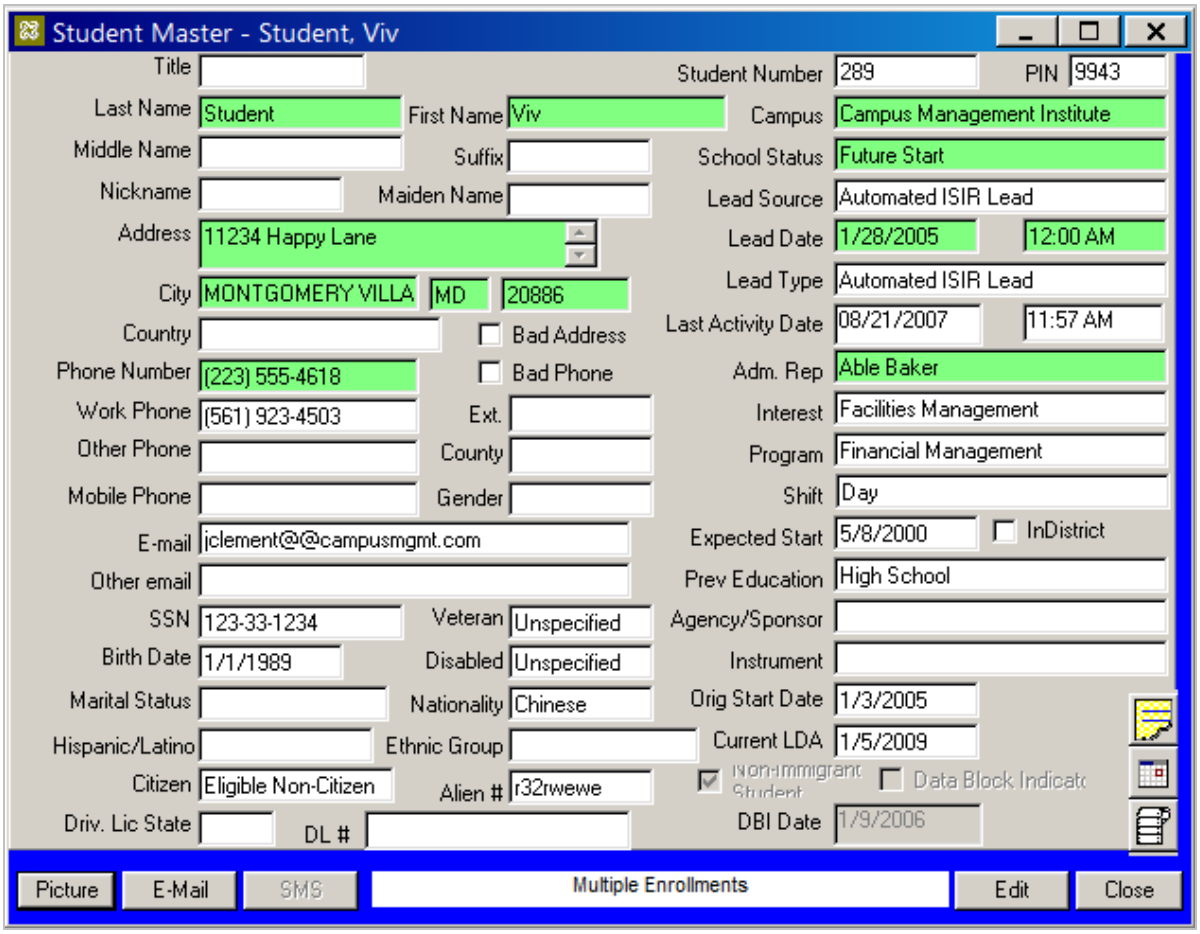
The options on the Student Bar are the same as the options on the View menu, unless the Student Bar has been altered by the user.

Student Master

The Student Master form contains much of a student's basic demographic information. The Student Master form is usually (but not necessarily) populated in the Admissions module by adding a new lead to the database. New leads are entered using the Quick Lead Entry form or the Add New Lead **Ctrl+L** option on the File menu. The **Ctrl+N** key combination can also be used to start a new Student Master record (form) without entering a quick lead.

To view a Student Master form:

1. Select one of the following options:
    - Click **Student** on the Student Bar.
    - Double-click **Recent Students** on the Toolbar. When you change the student in the Recent Students list, a new Student Master form is displayed. If you already have a Student Master form open, it remains open in the background.
    - From the **View** menu navigate as follows:
        - Contact Manager > Student
        - Admissions > Student
        - Financial Aid > Student
        - Student Accounts > Student
        - Academic Records > Student
        - Career Services > Student
        - Loan Management > Student
        - Student Services > Student
        - Housing > Student
    - Use the **Find** menu or click on the Toolbar to search for a student.



Note: The border color around the Student Master form indicates the student's status category. In the setup options under Setup > Status Codes > Colors Tab, your system administrator can choose colors for the status categories.

2. Multiple Student Master forms can be displayed at the same time. The forms always open in the same place in the work area. Unless you have closed, moved, or minimized a previous Student Master form, the next form you open covers the previous form.

   To move between open Student Master forms use the **Window** menu and select **Tile** or **Cascade** to organize all open forms in the work area.

   When you are working with multiple students, ensure that the correct form is current (active). The name of the current student is always shown in the Recent Students text box. The title bar of the active form is always a different color than other forms which may be open in your work area.

3. To edit the information on the form, click **Edit**. See Edit a Student Master.

   Required fields on the form have a background color other than white. If a required field is blank, you must enter data in it when you edit the form, even if you did not intend to provide the information when you clicked Edit.

   Some fields are required by CampusNexus Student (Last Name, First Name, Lead Date, Admissions Rep). Additionally, your institution may designate other fields as required. The system administrator can mark fields as required in either of two ways.

- Open any Student Master (or Quick Lead) form and go to Setup > Required Fields.
- Designate the field as required in the Data Dictionary.

4. To add an activity from the Student Master form, click the **Add Activity** icon at the bottom right of the form. The Activity form is displayed.
5. Click **Close** (Ctrl+F4) to close the active Student Master form. If you are in edit mode when you click Close, you are prompted to save any changes.

Duplicate Student Records

CampusNexus Student checks for duplicate Student Master records when new leads or students are added. The following table columns are used to check for duplicates:

- Student ID
- Social Security Number
- Phone Number
- Date of Birth and Student Name (combined)
- Driver's License Number
- E-mail address.

Each check is performed only if you entered data in the corresponding field. If at least one match is found, a grid showing the matches is displayed

If the lead is a duplicate and can be found on the grid, click the record and the lead form is populated with the information for that lead. The information can then be edited. The campus for the lead can be changed only if the campus ID for the record from the grid is in the list of campuses to which you have access.

Enrollment

CampusNexus Student maintains a lot of data with respect to a student's enrollment records. A student can have multiple active enrollments (for instance, double majors). By default the current enrollment is displayed when accessing the Enrollment form.

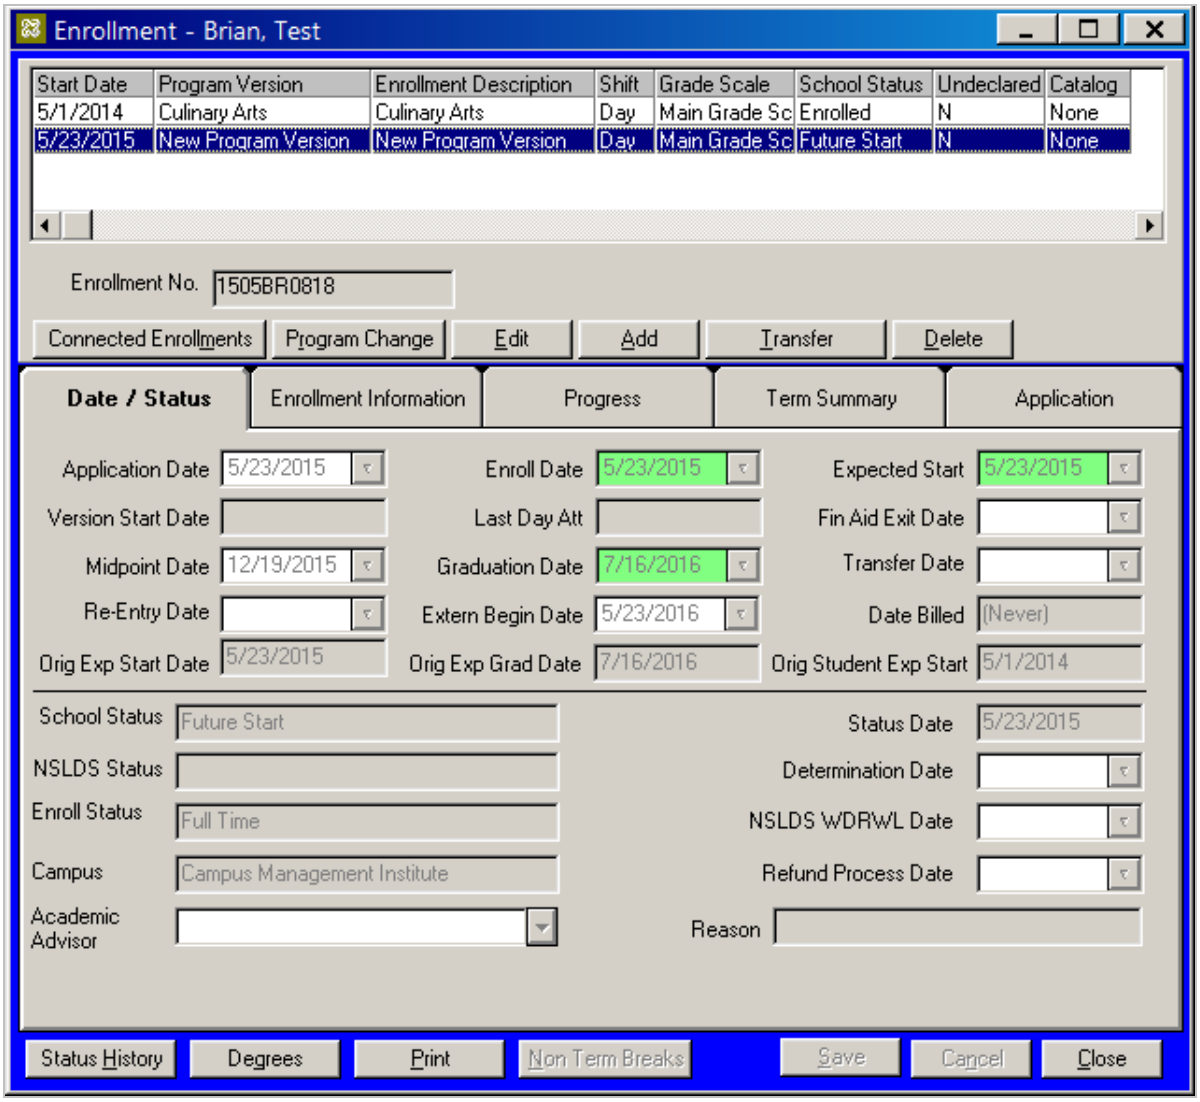
A student enrollment is normally initiated in the Admissions department after the processing of new leads. For more information, see Enrolling a Student. The Admissions department passes the enrolled student to the Academic Records department.

To work with enrollment records:

1. Select a student.
2. Navigate to **View > Academic Records > Enrollment**. The Enrollment form is displayed. CampusNexus Student lists all of the student's enrollments and fills in the form with data from the first enrollment. By default the student's current enrollment is displayed.

   The Enrollment form contains the following tabs:

   - Date / Status
   - Enrollment Information
   - Progress
   - Term Summary
   - Application



You can perform the following actions from the Enrollment form:

- Add, edit, and delete an enrollment.
- Set up connected enrollments.
- Transfer a student's enrollment information to a new enrollment.
- Perform a program change.
- Check on a student's Admissions and Enrollment Status Change History.
- Print a Degree Audit Report.

System administrators and users with the appropriate permissions can configure field level security when the form is active.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

To add an enrollment:

1. Click **Add** on the Enrollment form. The Enrollment wizard is displayed. Complete the forms in the wizard to record a new enrollment.

   Note: When enrolling a student in a new program and the "Use Terms for Academic Year date" flag is enabled, CampusNexus Student checks if a term sequence (Lists > Academic Records > Program > Versions > Start Dates > Assign Term Sequence) exists for the student.

   If a term sequence exists, CampusNexus Student uses that term sequence to calculate the academic year start/end dates, otherwise CampusNexus Student looks for the Financial Aid Term associated with the student campus with the start date closest to the enrollment start date.

   CampusNexus Student then finds the term with a date greater than the end date of the term defined above but closest to that date and considers it to be the next term that is part of the academic year and repeats these steps until the number of terms in the academic year is reached.

   Subsequent academic years follow the same steps.

   If not all terms for an academic year are found, CampusNexus Student uses the 'weeks in academic year' value to calculate the end date of the academic year. A field is provided to enter the number of transfer credits to be used in the calculation of the terms in academic year.

   Note: For students who have connected enrollments, you can view the aggregated enrollment status at the term level and the enrollment level from the enrollment form.

2. When the enrollment is completed in the Enrollment wizard, you are returned to the Enrollment form.

Connected Enrollments

For students who are seeking dual degrees, Connect Enrollments provide the ability to connect enrollments from a list of non-permanent out enrollments (active/future enrollments) and set a default among the connected enrollments.

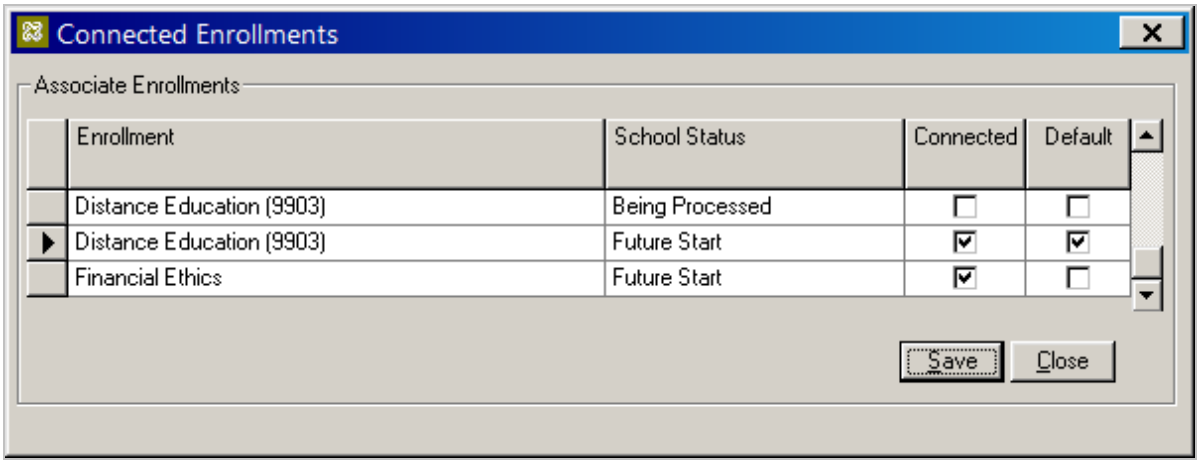
You must have permissions to access this option. If you do not have permissions to connect enrollments, the Connected Enrollments button is not displayed. For more information about setting up permissions to use this option, see Setup > Staff > Staff Members > User Info Tab > User Info Academic Records sub-tab).

Connected Enrollments provide the ability to:

- Create a connected enrollment relationship by connecting two enrollments. Connecting enrollments should be limited to campuses that share the same OPEID, Pell Reporting Entity ID, and DL Reporting Entity ID.
- Charge tuition to the individual enrollment where courses are taken so that revenue is assigned to the correct business unit when connected enrollments exist.
- Store connected enrollment history in the database that can be used in custom reports.
- Define a default enrollment for the two connected enrollments.
- Eliminate double billing of fees (charge fee by student versus enrollment).
- Prepare a Detail Registration Bill (in batch) for connected enrollments.
- Prepare a Summary Registration Bill (in batch and from Student Ledger Card) for connected enrollments.
- Process a student-based transcript by degree level for connected enrollments.
- Report unduplicated counts of connected enrollments for IPEDS 12-Month Unduplicated Count report.
- See aggregated enrollment status on the Term Summary for connected enrollments that share terms.

To set up connected enrollments:

1. Click **Connected Enrollments** on the Enrollment form. The Connected Enrollment form is displayed.



2. Select the **Connected** column of the two enrollments that you want to connect.
3. Select the **Default** column of the enrollment you want to set as the default enrollment.

   If you do not select a default enrollment, the following message is displayed when you click Save: *"One of the selected enrollments must be specified as the default enrollment."*
4. Click **Save**.
5. Click **OK** on the confirmation message to return to the Enrollment form.

To perform a Program Change:

If a student's enrollment is in cancelled status, the Program Change button is displayed. This button will not be visible unless the Enrollment is eligible to be changed.

1. Click **Program Change** on the Enrollment form. The Program Change Wizard is displayed. The wizard allows enrollment changes to be made including changes to a student's Program, Program Version, Start Date, or Shift.
2. After you complete the forms in the wizard, you are returned to the Enrollment form.

Term Groups and Enrollment Status

The enrollment statuses at both the enrollment and term levels are calculated based on term groups when appropriate. These enrollment statuses are displayed on the Date/Status tab and Term Summary tab of the Enrollment folder. The Term Summary also provides a way to view which terms were involved in a particular enrollment status calculation. See Term Groups for further information. In the case of connected enrollments, the enrollment status is calculated using the enrollment status configuration on the default environment.

Note: Institutions that do not configure term groups will not have their enrollment statuses affected in any way.

To edit an enrollment:

1. In the Enrollment form, select the enrollment to be edited.

   Note the **Enrollment Number** under the list of enrollments. This is the student's unique identification number for the highlighted enrollment. All records for this enrollment will be related by this number.
2. Click **Edit**. The fields on the form that you can edit appear with white backgrounds. Fields that are dimmed are

maintained elsewhere and cannot be edited here.

Note: Use the hotspots on the form to navigate to information about specific tabs or buttons.

3. Enter new data or change existing data on the form.

   The Start Date Change wizard is invoked if you change the Expected Start Date for a student with a school-defined Status of Enrolled. If the student's Status is Active, the Academic Year and Payment Periods are updated through the Student Pace Evaluation tool.

4. Click **Save**.

To delete an enrollment:

To delete an enrollment, the following conditions must be met.

a. All courses on the student's course list must be set to Future (no attendance recorded).
b. The student's ledger card must show no transactions related to the enrollment to be deleted.
c. No financial aid was disbursed to the student for the enrollment to be deleted.

If the above conditions have been met, click **Delete** on the Enrollment form. You are prompted to confirm the deletion. If any of the above conditions are not met, CampusNexus Student displays an appropriate message and cancels the deletion.

Note: If you canceling a student enrollment when the enrollment has courses associated with it, a message is displayed asking if you want to delete course associations for this student.

If you answer **Yes**, CampusNexus Student deletes the course associations and the enrollment for this student. If you answer **no**, the course associations are not deleted and the student's enrollment is not cancelled.

To view Status History or Degrees

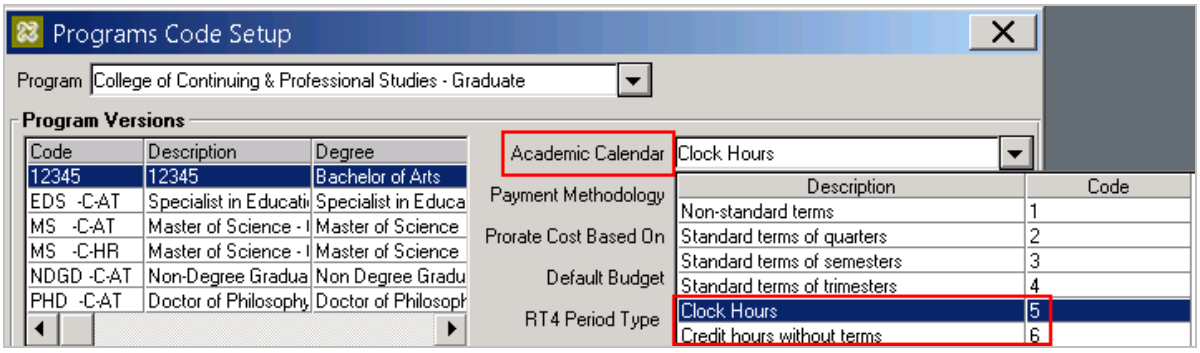
1. Click **Status History** to view or print the student's status change history. See Status History for details.
2. Click **Degrees** to display the Degrees Awarded form. This form lists any degrees already awarded to the student. It is also used to record any new degree awarded.

Adding Non-Term Breaks

Based on the regulations specified by the Department of Education (ED), CampusNexus Student considers only 45 days of a non-term break when calculating instructional weeks.

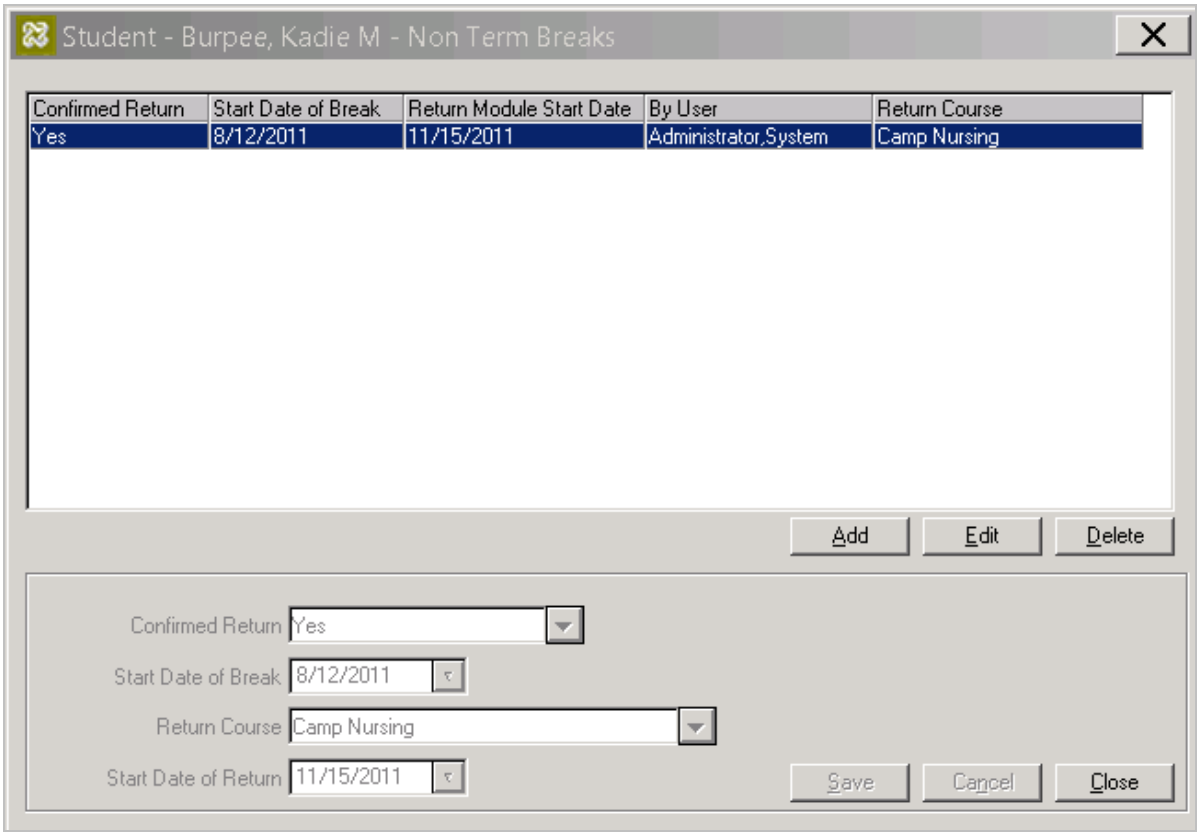
An instructional week is a seven day period containing at least one scheduled day of class.

Note: The Non Term Breaks button is enabled only if the selected enrollment is a non-term program version. To specify a program version as non-term, select Academic Calendar 5 or 6 in the Programs Code Setup form (Lists > Financial Aid > Programs (tab) > Add/Edit (button)).



To specify a non-term break:

1. Navigate to **View > Academic Records > Enrollment**. The Enrollment form is displayed.
2. Select a non-term enrollment, and click **Non Term Breaks**. The Non Term Breaks form is displayed.



3. Click **Add** to specify a new module break.
4. Click the **Confirmed Return** list to specify if the student will be returning to the course after the module break. Select **Yes** in the **Confirmed Return** list to specify that the student will be returning to the course after the break
5. Click the **Start Date of Break** list to specify the starting date of the module break.
6. Click the **Return Course** list to select the application non-term course that the student will enroll in after the module break.

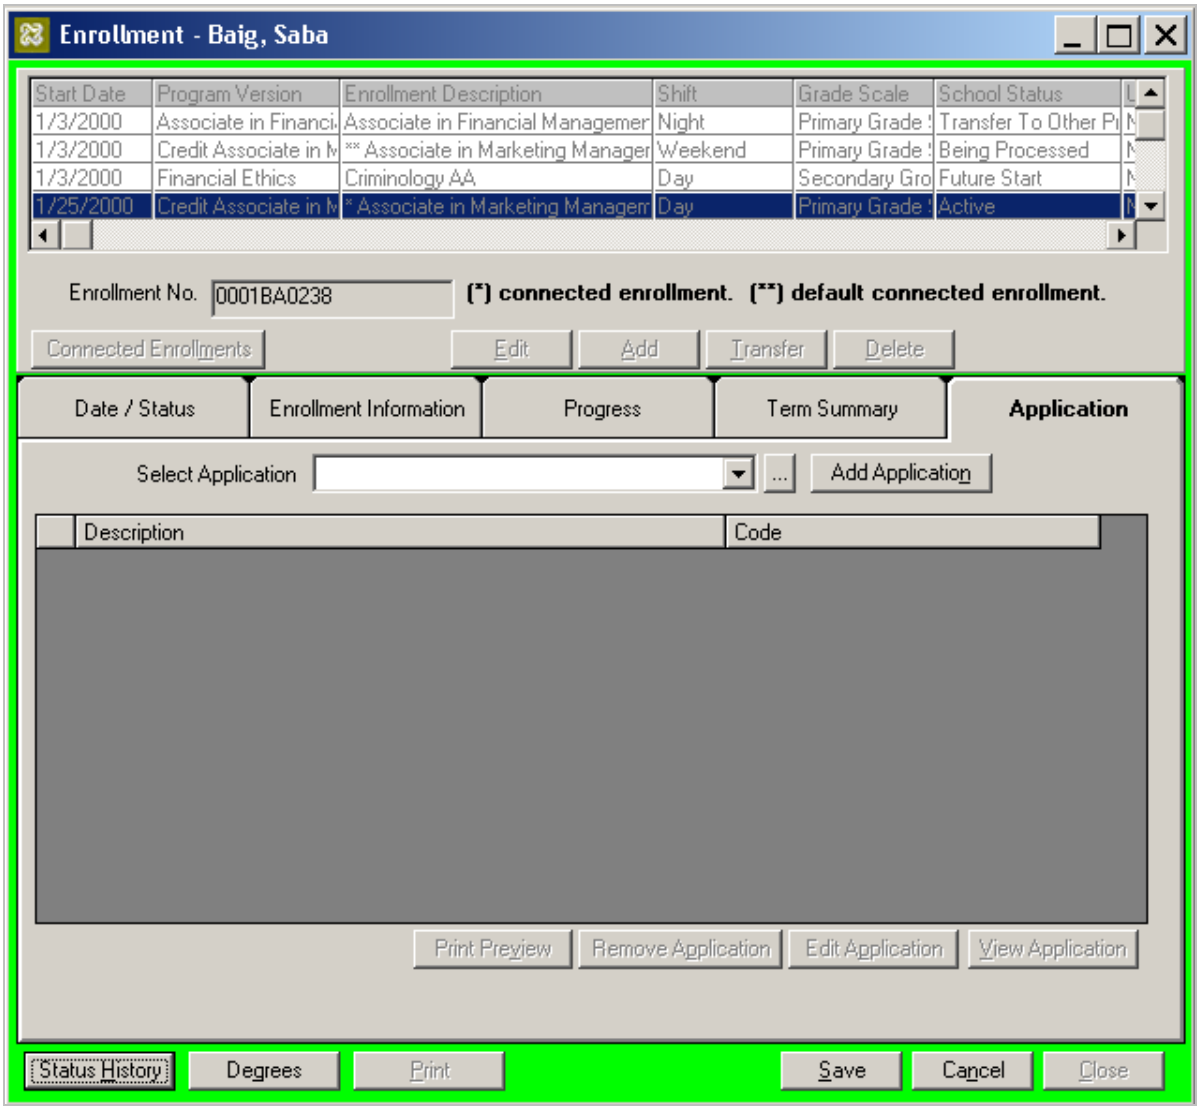
   The **Return Course** list is displayed based on the courses into which the student is registered, for which the start date of the course is greater than the date specified in the **Start Date of Break** field and less than 45 days.

   The **Start Date of Return** list is automatically populated based on the course selected. You can manually change this date if the student's return date does not coincide with the course start date.

   Note: A warning message is displayed if the date is changed to a value greater than 45 days from the Start Date of Break. CampusNexus Student uses only 45 days of the module break when calculating instructional weeks.
7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Application Tab

1. Select the student's Program Version and click **Edit** in the top portion of the form. The available applications are enabled.



2. Select the applicable application and click **Edit Application**. See Admissions Application for application setup instructions.
3. Fill out the student's application and click **Submit**.
4. A message stating 'Application Saved' is displayed. Click **OK**. The 'Application Status' field displays a 'Complete' value.
5. Click **View Application** to view the applicant's responses to the application.
6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Enrollment Changes

An enrollment wizard allows you to make changes to a student's expected start date, shift or program version from within the student's enrollment record. Changes to these data elements will cause recalculation of necessary information, such as length of program, financial aid academic years, midpoint and grad dates, course listings, and so on depending on the selected change. These changes include:

1. **Program Change**. If you select a student's record whose status is in an cancelled status category, the **Program Change** button is available and is displayed to the right of Enrollment ID. The button is hidden for enrollments in all other status categories. You can perform a Program Change on enrolled students. You can select from program versions offered at the campus or campus group of the enrollment being changed.
2. **Program Version Change**. A change in Program Version will perform functions similar to the original enrollment, updating all relevant tables (in other words, required course list, FA Academic Years, Fees, and so on).
3. **Start Date Change.** You can perform a start date change on students in an Enrolled status category. The option is available only when the selected enrollment is in an Enrolled status category. You can select from a list of valid start dates for the program selected if validation to a start date calendar is in use.

   A start date change will always create a change to the Academic Year start and end dates. A shift change may affect Academic Year Start and End Dates or the number of academic years. If financial aid is already on file within the academic years defined where the loan start date is earlier than the new start date, or the loan end date is earlier than the new start date, or the loan end date is later than the new Grad Date these loan records are invalid. If loans are determined to be invalid, a warning message is displayed on the screen:

   "The student's financial aid record has loans on file with dates that do not conform to the new academic year dates. The student's FA data must be reviewed. A message will be sent to the FA administrator to resolve the student's record."

   This message triggers a program change Contact Manager activity to be scheduled to the Financial Aid Administrator listed in the Campus setup form. The activity indicates that a change in start date or program version has occurred and that Financial Aid data must be reviewed. It will include the student's name so that the activity also appears in the student's Contact Manager folder.
4. **Shift Change**. You can perform a shift change on students in an Enrolled status category. The option is available only when the selected enrollment is in an Enrolled status category. You can select from available shift codes for the program.
5. A change in FA information will notify a Financial Aid user to review the file for accuracy via Contact Manager.
6. The student's status change history will reflect the change with a new and previous status equal to the student's current status and a comment indicating that a program or start date change was performed.

If you change the expected start date or shift on the Enrollment form, the program will display a message box prompting you to access the enrollment change wizard when required.

Step 1 of the Enrollment Change Wizard

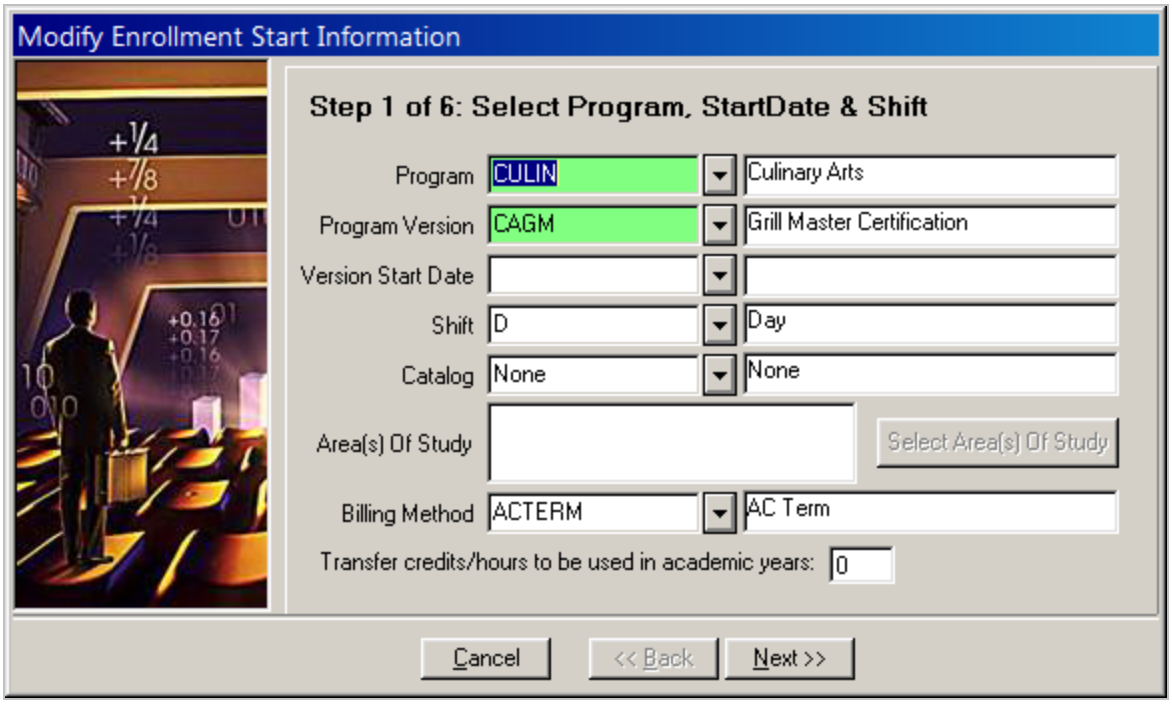
To use the Enrollment Change Wizard, a student must be selected and the Enrollment form must be displayed.

Highlight the Enrollment for which the program change is desired.

Note: The **Program Change** button will only be available if the enrollment has a status of enrolled or cancelled. The **Program Change** button will not be visible if the student has attended classes for the enrollment or the student has a Permanent Out status.

When you click the **Program Change** button, a Selection Wizard is displayed. The first step of the wizard will display start date, program version and shift. Select the change you want to perform. Nothing is changed in the student's records until you click

Finish at the end of the wizard. You can leave the student's records unchanged by clicking **Cancel** at any time before you click the **Finish** button.



Program Version Change:

If you elect to change the Program Version:

Select from a list of eligible program versions offered at the enrollment campus.

If the **Require Start Date Calendar** option is set to **Yes**, you must re-select from a list of valid start dates for the newly selected program version and shift.

If the **Require Start Date Calendar** option is set to **No**, the program displays the start date, midpoint date and grad date on file for you to edit.

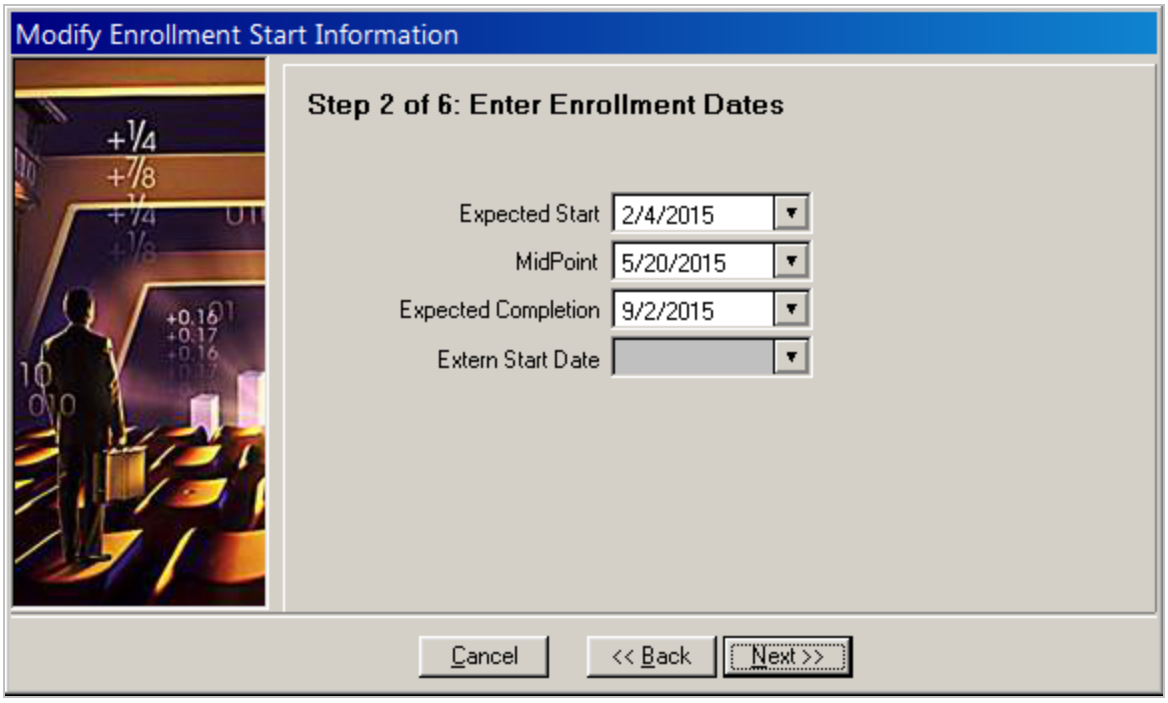
Version Start Date Change:

If you change the start date option, you will be prompted with the following selections:

Under **Setup > Academic Records**, if the **Require Start Date** option is set to **Yes**, then you have access to predefined dates set up by the school and you can see them when you click on the **Version Start Date** combo box on the wizard. Select from the start dates defined for the program version selected above.

Step 2 of the Enrollment Change Wizard

Once the start date calendar is selected, the program will populate and display the new expected start date, midpoint date, and grad date.



If the **Require Start Date** option is set to **No**, select a start term (not required). Below the start term will be the various dates (expected start, mid and grad) based on the term selected (the existing dates are used by default if no term is selected). Each date control will offer a calendar control to allow the user to modify the dates populated as a result of the start term selection. If no start term is selected, the user can manually enter dates.

Shift Change:

If you elect to change the shift, you have the following selections:

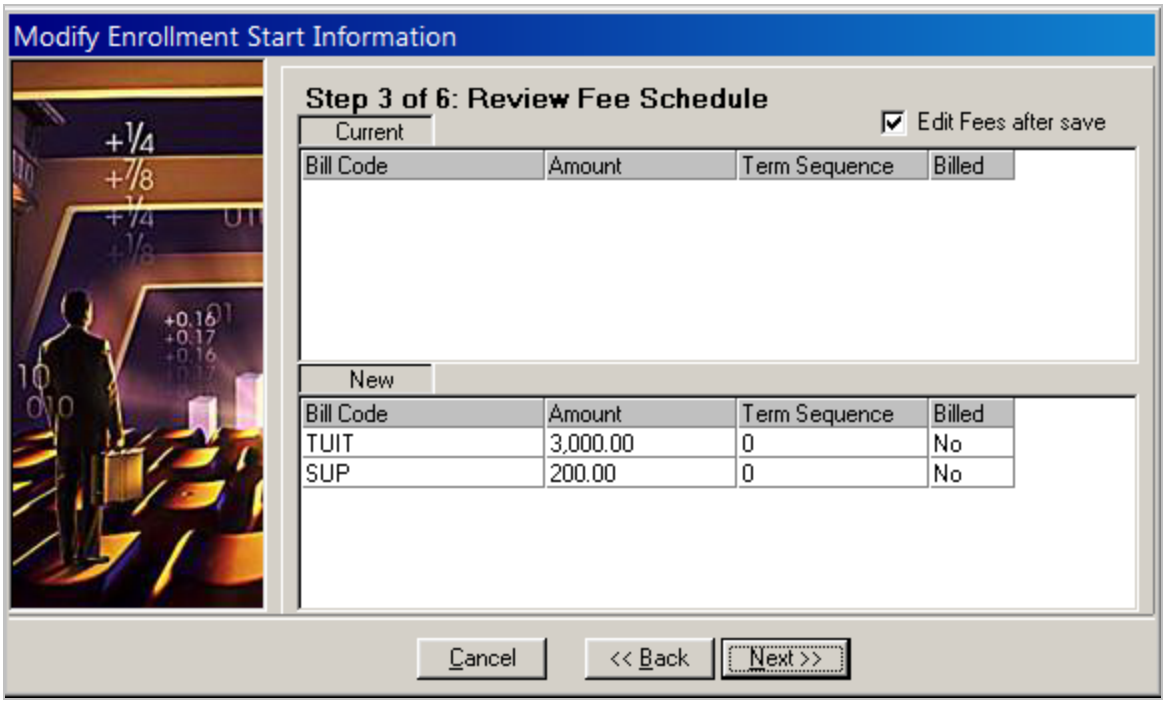
A change in shift will be similar to a change in start date.

The **Shift** drop-down displays all shifts available for the student's campus.

When a start date calendar is required (under **Setup > Academic Records**) if the **Require Start Date** option is set to **Yes**, the system will validate the new shift selection to the start date calendar. If a record is not on file for the start date and shift selected for the program version, the program returns you to the start date box and provides a message: "This program of study is not offered for the shift and start date selected. Reselect the student's shift or start date as defined in the start date calendar."

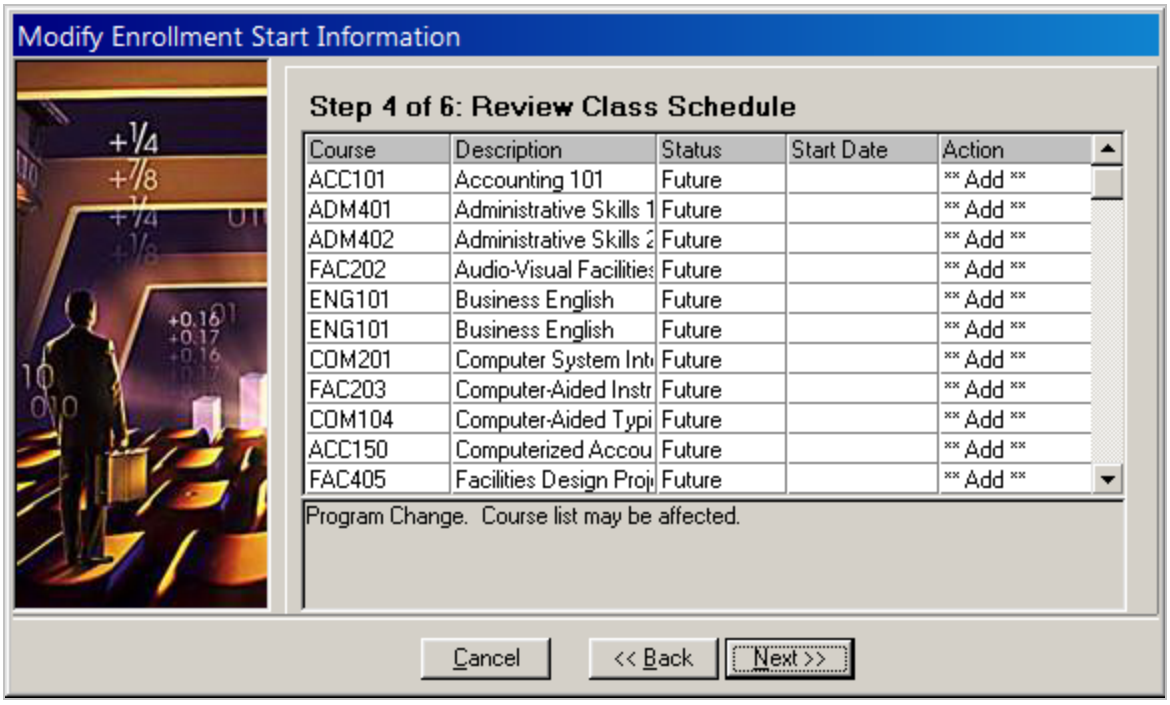
Step 3 of the Enrollment Change Wizard

This step offers you a review of the current and new fee schedules.



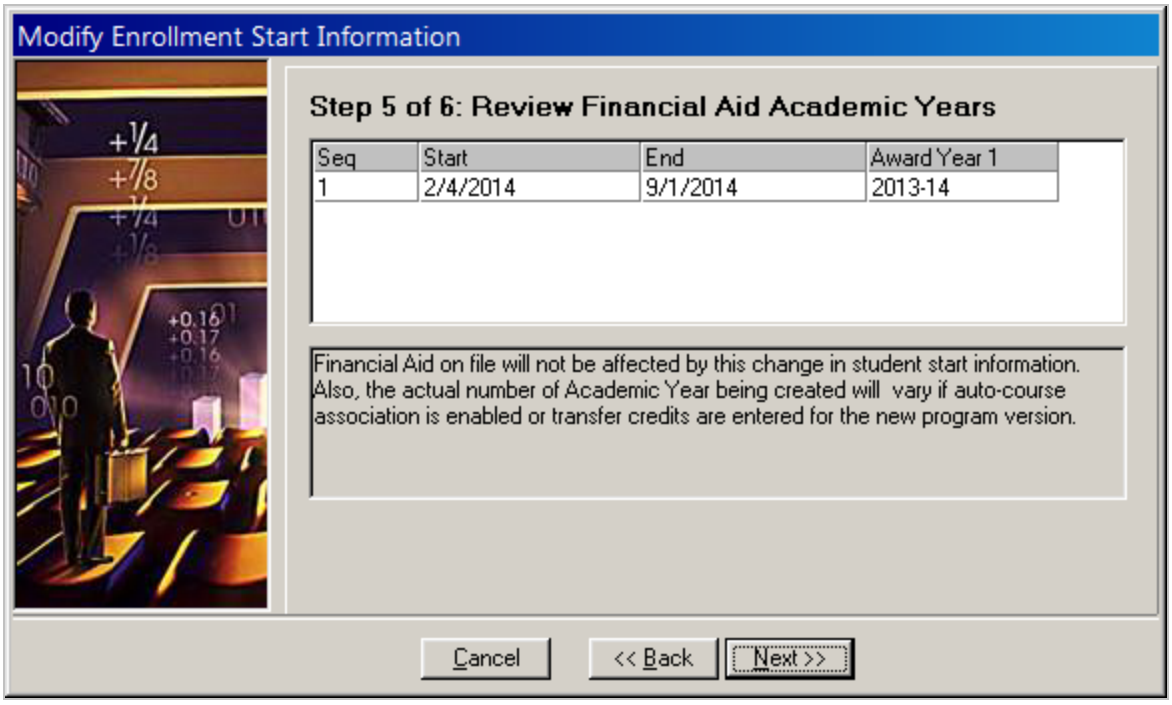
Step 4 of the Enrollment Change Wizard

This step is a review of the class schedule.



Step 5 of the Enrollment Change Wizard

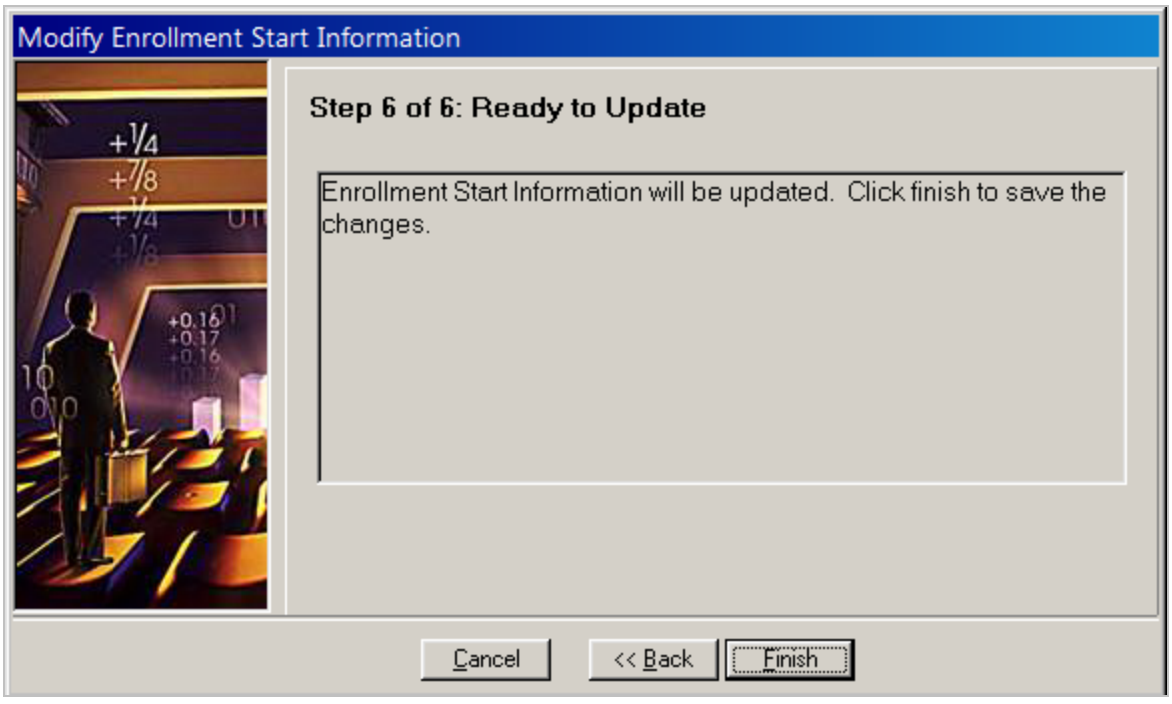
This step is a review of the Financial Aid Academic Years and Award Years.



Note: The academic year Start and End date for non-term programs are automatically updated to use the instructional weeks definition specified by the Department of Education (ED).

Step 6 of the Enrollment Change Wizard

This step shows a statement of the changes to be made when you click **Finish**.



Nothing is changed in the student's records until you click **Finish.** You can leave the student's records unchanged by clicking **Cancel** at any time before you click the Finish button. When you click **Finish**, the program will perform the necessary changes to the database and display a confirmation message when the task is completed.

Setup > Campus Locations > Financial Aid

The field called **FAA Administrator to be notified for Packaging Changes** on the Financial Aid page allows you to select the FA Administrator to be notified of program changes. CampusNexus Student assigns a review activity to this person for each program change.

Transfer Enrollment

Click here to go directly to the transfer procedure. For information about Non-Degree Seeking Students, see Tracking NDS students.

Click **Transfer** to transfer enrollment information from one enrollment to another. Clicking **Transfer** brings up a new form that defines the parameters of the transfer. The transfer is not allowed if there is any scheduled Financial Aid at **Ready to Pay** status (selected in a disbursement batch).

The form displays Current Enrollment information (Campus, Program, Program Version, Enroll Date, and School Status).

The form enables the user to select a different, existing enrollment record to which the information is to be transferred or allow the user to add a new enrollment record for the transfer. When listing the existing enrollments, only enrollments at status category of **Enrolled**, **Active**, or **Permanent Out** are listed.

When the transfer is saved, the business logic evaluates the data and performs the appropriate actions:

- Move all Current courses from the Old Enrollment to the New Enrollment record.
- Move ledger card entries from the Old Enrollment to the New Enrollment.
- Transfer all expected Financial Aid.
- Transfer Completed Course grades to the New Enrollment. The completed courses will be left under the Old Enrollment and any of the completed courses that are required for the new enrollment will have the grade transferred to the new enrollment.
- Set the Old Enrollment record to status "TOPROG" (Transferred to other program)
- Add records to the SyStatChange table indicating that the enrollment was transferred.
- Recalculate the GPA for both the Old and New Enrollments.
- Transfer subsidiary transactions, if applicable; see note below.
- Update all academic year dates based on the instructional weeks logic specified by the Department of Education (ED).

Security:

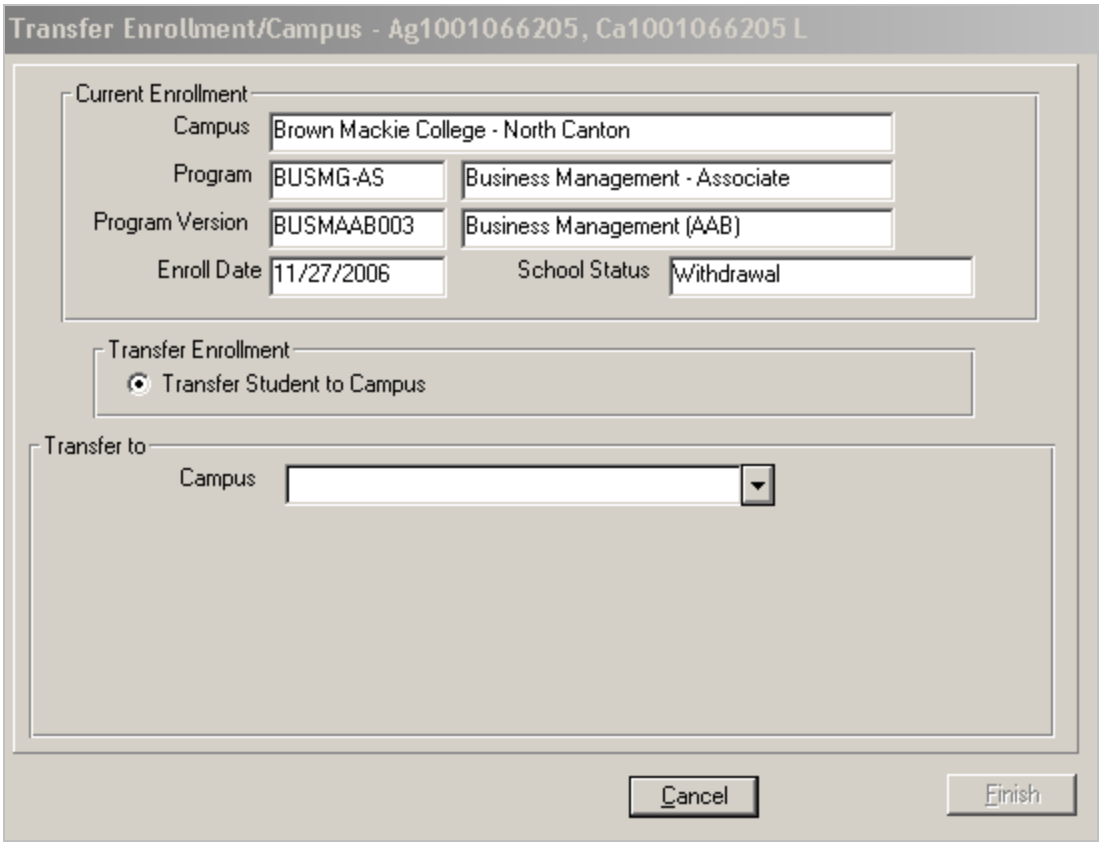
- The **Transfer** button will only be available if the user has BOTH **Add** and **Edit** authorization to the **View > Academic Records > Enrollment** form.
- Only Enrollments at a status that is in the **Enrolled** or **Active** categories will be allowed to transfer.
- If the "FROMPROG" or "TOPROG" status change is disabled or assigned to a Staff Group to which the user does not belong (in Setup > Status Codes), then the user will not be allowed to transfer the enrollment.

To transfer data from one enrollment to another:

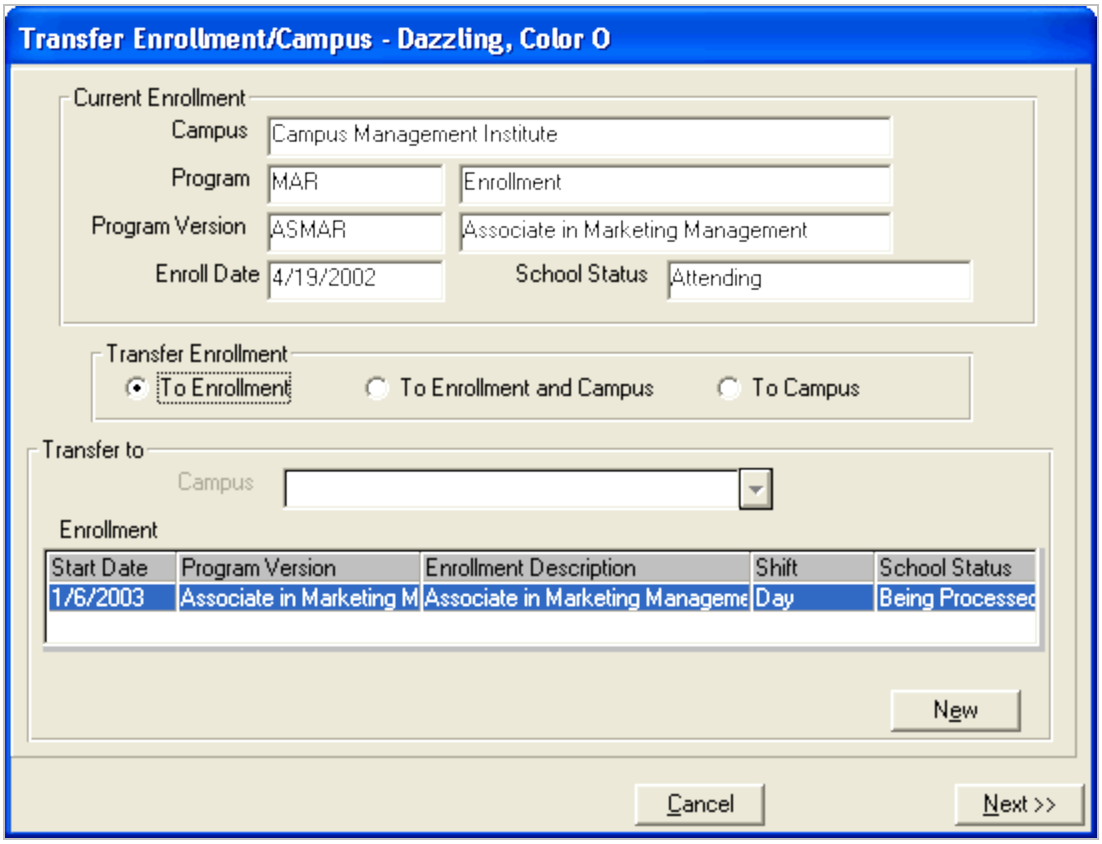
1. Select the student for whom the transfer is to be performed.
2. Select **View** > **Academic Records** > **Enrollment**. The Enrollment form is displayed.
3. In the grid at the top of the form, select the Enrollment from which the data is to be transferred.

   Note: The **Transfer** button changes to **Reverse Transfer** once a transfer has completed, and no status changes have been made. If you have made a mistake and haven't done anything else, you can return the student using the Reverse Transfer option.
4. Click **Transfer**. CampusNexus Student displays one of two Transfer Enrollment forms. The first form is for

transferring students with a status of Permanent Out and the only option is the **Campus** selection for this type of transfer. If you are using this form, after making your selection, just click **Finish**.



The second type appears below.



Data for the current enrollment is displayed in the top half of the form. The grid in the lower half of the form shows other enrollments for the selected student.

On this form you have three transfer options in the **Transfer Enrollment** fields:

To Enrollment - Allows a staff member to transfer a student to another enrollment within the same campus. The Campus Code and the OPEID will remain the same.

- If the 6-digit CIP Codes of the programs are not the same, the Credential Levels are different, or the published program length are different from the transfer from enrollment, the new enrollment must retain the school status selected in Step 2 of 5 in the enrollment wizard.

  Note: If the criteria for this scenario is met, the Version Start Date CANNOT be transferred to the new enrollment even if configured to do so. This is considered to be the program begin date for regulatory reporting.

- If the 6-digit CIP Codes are the same, the credential levels are the same, and the published program lengths of the program versions are all the same (match exactly), then it is okay to keep the existing functionality of leaving the student as active.

To Enrollment and Campus - Allows a staff member to transfer a student to another enrollment in another campus (which adds the new enrollment to the student's enrollment folder and changes the Campus field on the Student Master to the new campus). When 'To Enrollment and Campus' is selected, the CIP Code, Degree Level, or Published Program length may differ from the previous enrollment. The Campus Code will change and this means that the OPEID may also change.

- If the OPEIDs for the campuses are different, the 6-digit CIP Codes of the programs are not the same, the Credential Levels are different, or the published program lengths are different from the transfer from

enrollment, the new enrollment must retain the school status selected in Step 2 of 5 in the enrollment wizard.

Note: If the criteria for this scenario is met, the Version Start Date CANNOT be transferred to the new enrollment even if configured to do so. This is considered to be the program begin date for regulatory reporting

- If OPEIDs assigned to the campuses (transfer from and transfer to) are the same, the 6-digit CIP Codes are the same, the credential levels are the same, and the published program lengths of the program versions are all the same (match exactly), then it is okay to keep the existing functionality of leaving the student as active.

To Campus - Allows a staff member to transfer a student to another campus which changes the Campus field on the Student Master to the new campus.

- If the OPEIDs of the Campuses are different, the user must be forced to do an enrollment transfer as this is required due to regulatory reporting processes (SSCR, Clearinghouse, & potentially GE).

  Note: if the criteria for this scenario is met, the Version Start Date CANNOT be transferred to the new enrollment even if configured to do so. This is considered to be the program begin date for regulatory reporting. We need to be able to report the accurate start date for the program on the new OPEID

- If the OPEIDs assigned to the campuses (transfer from and transfer to) are the same then it is okay to keep the existing functionality of transferring the campus and leaving the enrollment in its current status.

Accurate Enrollment Reporting (Clearinghouse/SSCR processing, GE reporting), to NSLDS is required for all schools participating in Title IV aid and is essential to:

- Protecting borrower's rights by ensuring that loan interest subsidies are based on accurate enrollment data
- Ensuring loan repayment dates are accurately based on the last date of attendance
- Allowing in-school deferments to be automatically granted using NSLDS enrollment data
- Providing critical data about the effectiveness of Title IV aid programs, including completion data (IPEDs)
- Calculation to determine if a student has exceeded the 150% limit. Enrollment changes reported to NSLDS are used to recalculate a student's 150% limit and determine if loss or protection of subsidy should occur

Notes:

- When an Active student transfers into another program using the Transfer Enrollment option of **To Enrollment** or **To Enrollment and Campus**, SAP enrollment is automatically linked (i.e., the **Linked SAP Enroll** field will not appear in Step #3 of the Enrollment wizard) and is recorded in the Admissions Audit.
- If a student meets the criteria for Active status on a program version, the student's status may change to Active post transfer. However upon the initial transfer, the status selected by the user in the enrollment wizard is the status used for the student.

5. If there are no enrollments listed on the grid, or if the enrollments shown on the grid do not include the one to which the student is transferring, click **New** to enter a new enrollment. The Enrollment wizard is displayed.

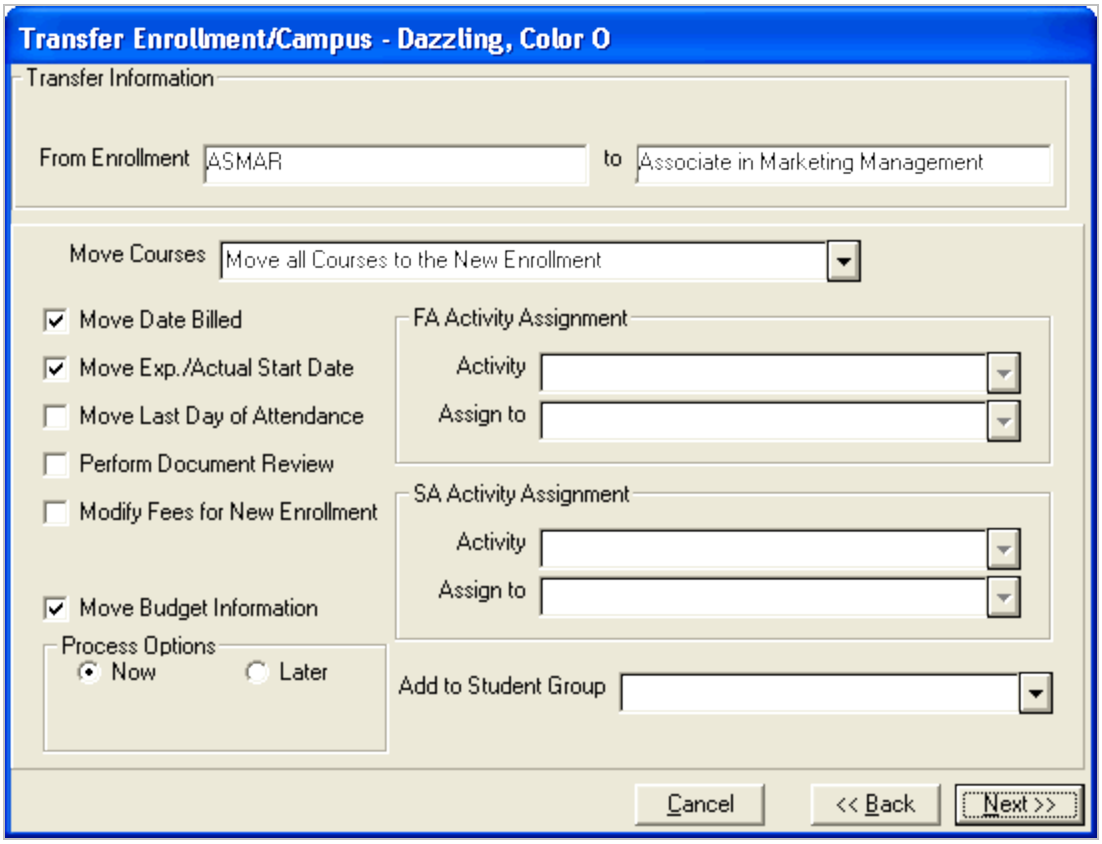
   Note: When adding a new enrollment from the transfer wizard, academic year start and end dates will be calculated the same as adding a new enrollment. For "To Campus" transfers, the weeks in academic years field value will be used when moving academic years from the current enrollment to a new one created by the wizard when finishing the process. This applies regardless of whether the "Use TerminAYDates" flag is enabled or disabled.

6. Click **Next** and the following form is displayed.

If a staff member has override permissions (Allow User to Override Transfer Configuration Options in the Academic Records tab of the Staff information form is selected) and the **Move Exp./Actual Start Date** check box is selected, then the Expected Start Date, Graduation Date and Version Start Date will be copied in the transfer. Then, an evaluation occurs to determine if the new enrollment meets the criteria to go active, based on the Active Units configuration of the Program Version. If Active Units criteria are met then the Version Start Date will be set appropriately. For example, if an existing enrollment has 3 current courses (Attendance Posted) and if all them are getting transferred with the Program Transfer, then the Version Start Date of the new enrollment will also be copied over.

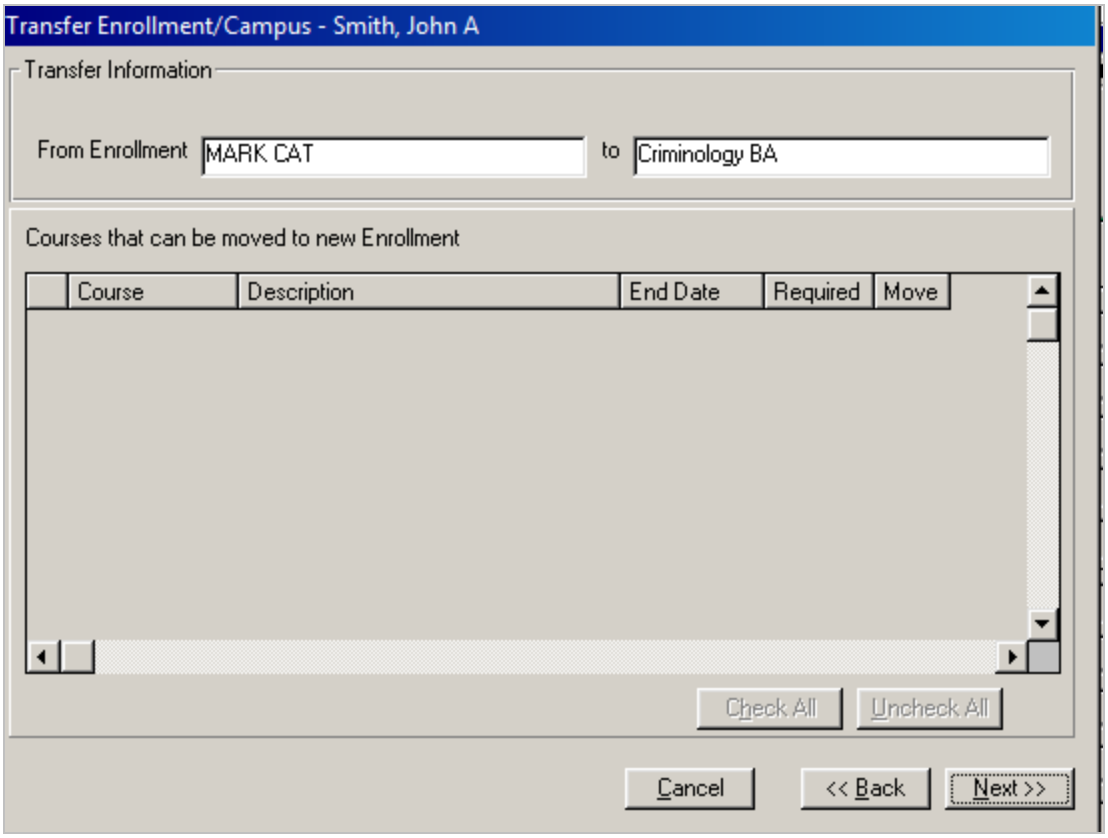
When performing a Transfer for non-term program versions, the **Move Exp./Actual Start Date** check box should only be selected if the program version being transferred to meets the criteria outlined in the FSA handbook for allowing the student to remain in the same payment period. When that selection is processed in the transfer, the system captures the completed date of the last payment period and uses it as the SPE start date on the new enrollment. All student Financial Aid information from the old enrollment prior to that date is transferred to the new enrollment. This memorializes that information and should not be automatically changed by the SPE if it is configured for adjustments.

Note: The Start date should not be transferred if a student is moving from a Term based program to non-term, clock hour to any other academic calendar, or vice versa.

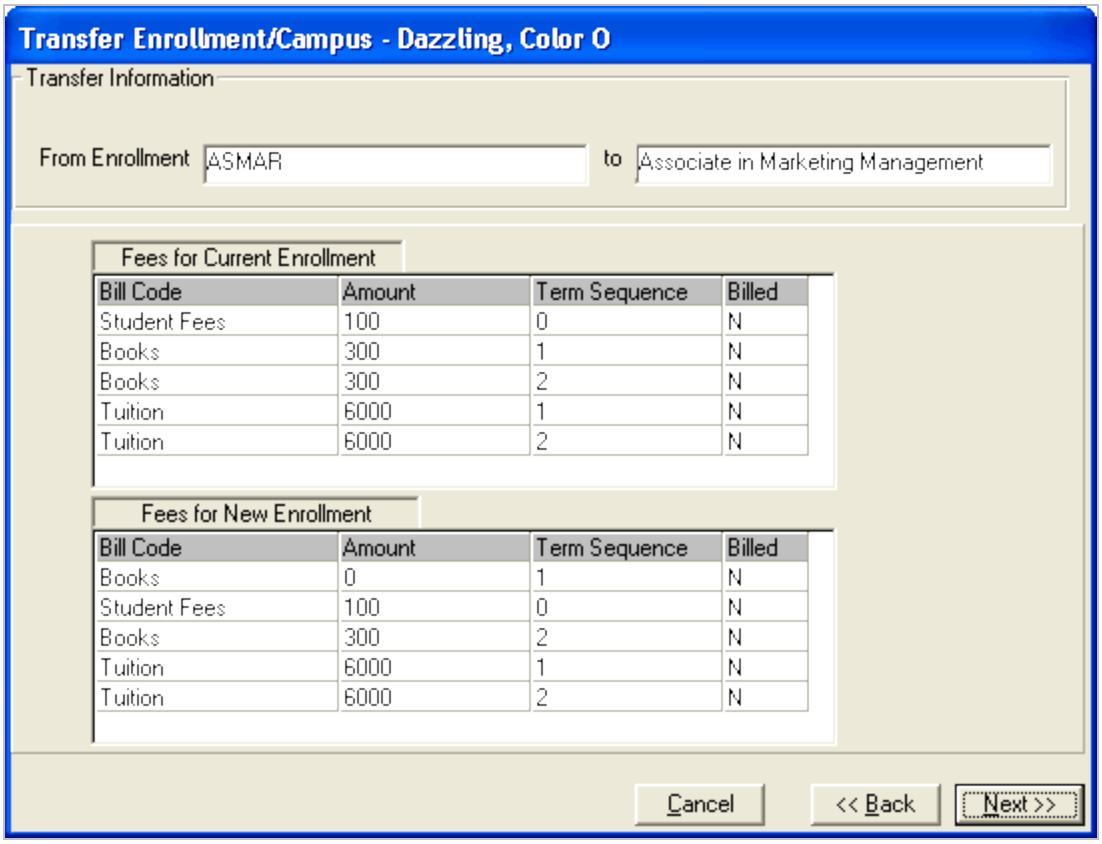


Note: The option Move Start Date to New Enrollment is displayed ONLY if the staff member viewing the form can override transfer configuration options, as configured in the Academic Records tab of the Staff Information form.

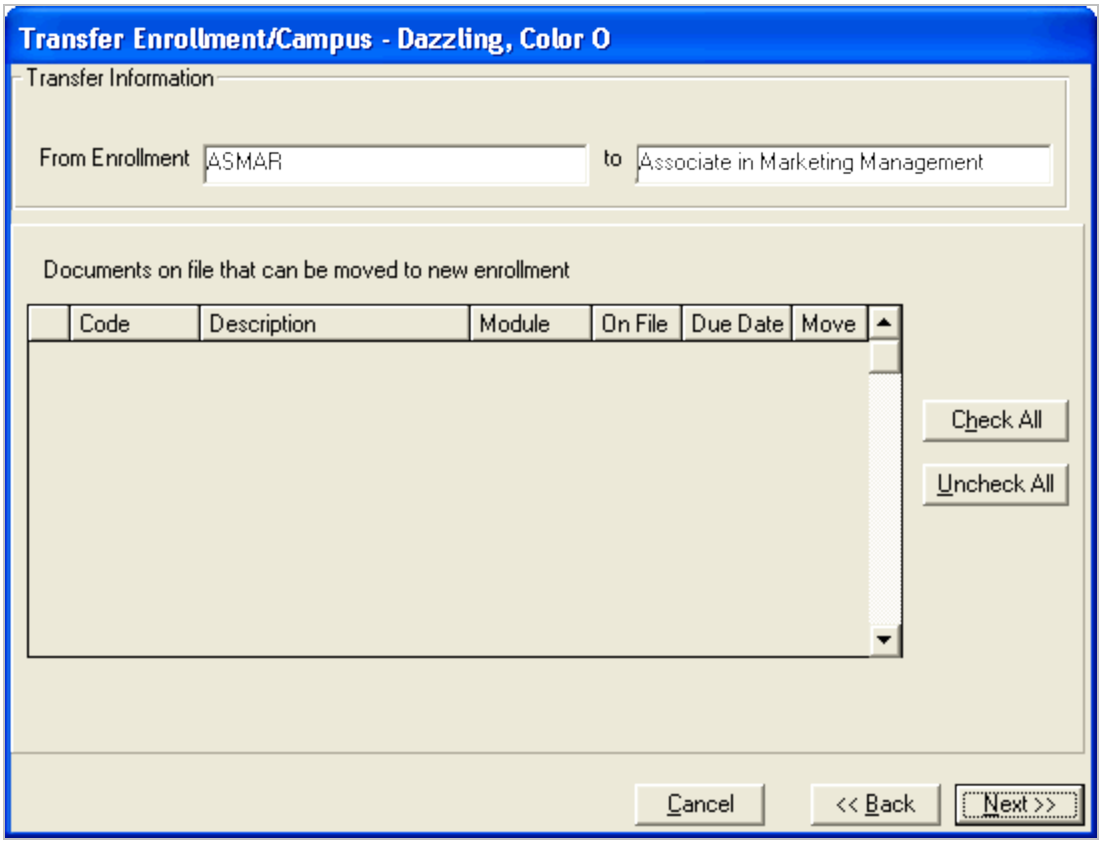
7. You can select to **Move Budget Information**, and to process this transfer now or later.
8. Click **Next**. A summary of the transfer displays.



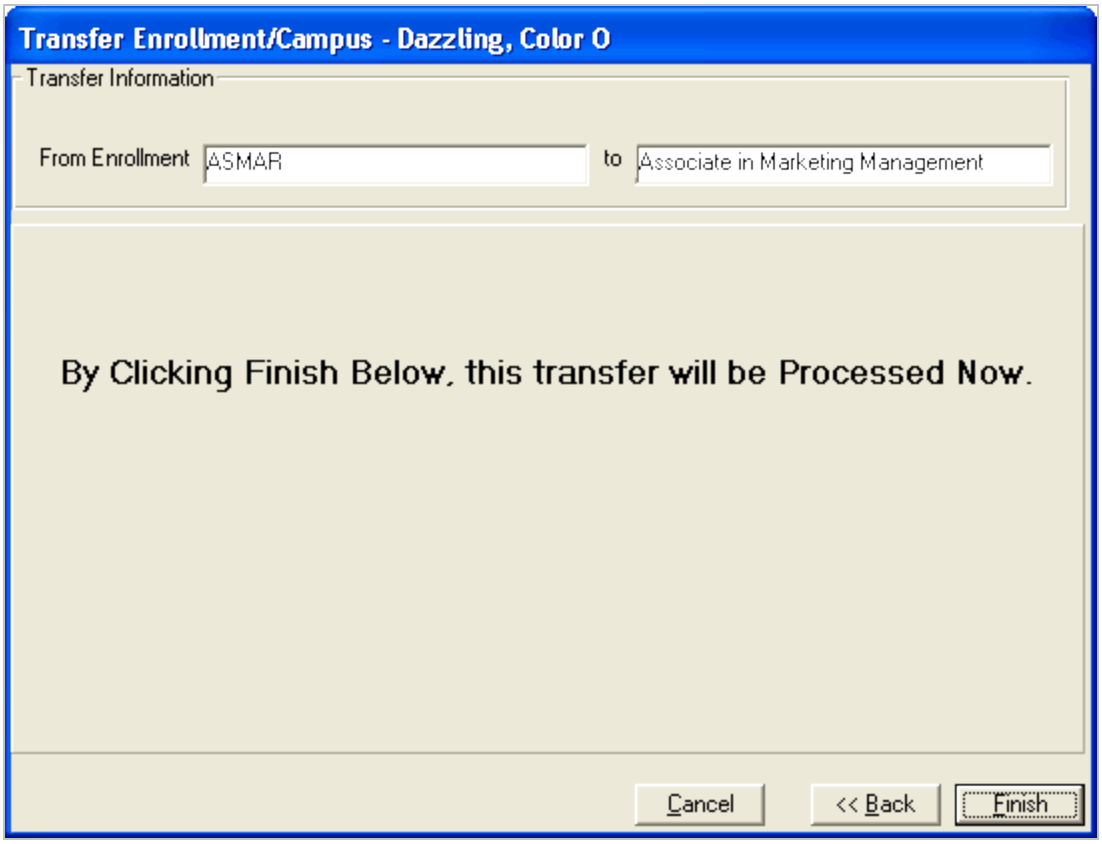
9. The next form only appears if transfer To Enrollment or transfer To Enrollment and Campus were selected and Modify Fees for New Enrollment check box was selected in setup.



10. The following form appears only if transfer To Enrollment or transfer To Enrollment and Campus were selected, and Perform Document Review check box was selected in setup.



11. Click **Next** and the last form appears with a message explaining what is about to occur.



12. Click **Finish** to transfer the information from the source enrollment to the destination enrollment or queue. When CampusNexus Student has completed the transfer of enrollment data, it will display a confirmation message.
13. Click **OK** to acknowledge the message and return to the Enrollment form.

To process queued transfers go to Process Queued Transfers under the **Daily > Academic Records** menu.

Note: If a program is setup in **Lists > Financial Aid** to add one academic year to a student's program version enrollment, and the previous enrollment from which they are transferring has more than one academic year, when selecting to transfer financial aid, the form checks the number of academic years the new enrollment has against the old. If the first has less than the second, a message box asks the user to continue or cancel and warns about the missing second year aid data.

If the enrollment is canceled, there are two methods of correction so that the aid will transfer:

a. On the student level: navigate to **View > Financial Aid > Packaging** and add an Academic Year. Process the transfer, and the second year aid will transfer to the newly added second year.
b. On the Program Version level: navigate to **Lists > Financial Aid > Program > Edit** and add an Academic Year in the form to set up a second Award Year. Then delete the newly added enrollment and restart the transfer process again.

Transfer of Subsidiary Transactions Upon an Enrollment Transfer

As soon as a student transfers to a new enrollment via the Enrollment Transfer Wizard, the system will transfer all Subsidiary ledger transactions (not just the balance) from the old enrollment to the new enrollment. The system will use the subsidiary linked to the enrollments, so that only matching subsidiaries will transfer the ledger entries (for example, Housing to Housing, or Tools to Tools, but a Housing subsidiary balance will never transfer to a Tool subsidiary).

If the subsidiary ledger already exists on the new enrollment, the system will append the transactions from the old subsidiary to the subsidiary on the 'transferred to' enrollment. If the subsidiary ledger does not exist on the new enrollment, then the system will update the AdEnrollID on the subsidiary header and details trans tables.

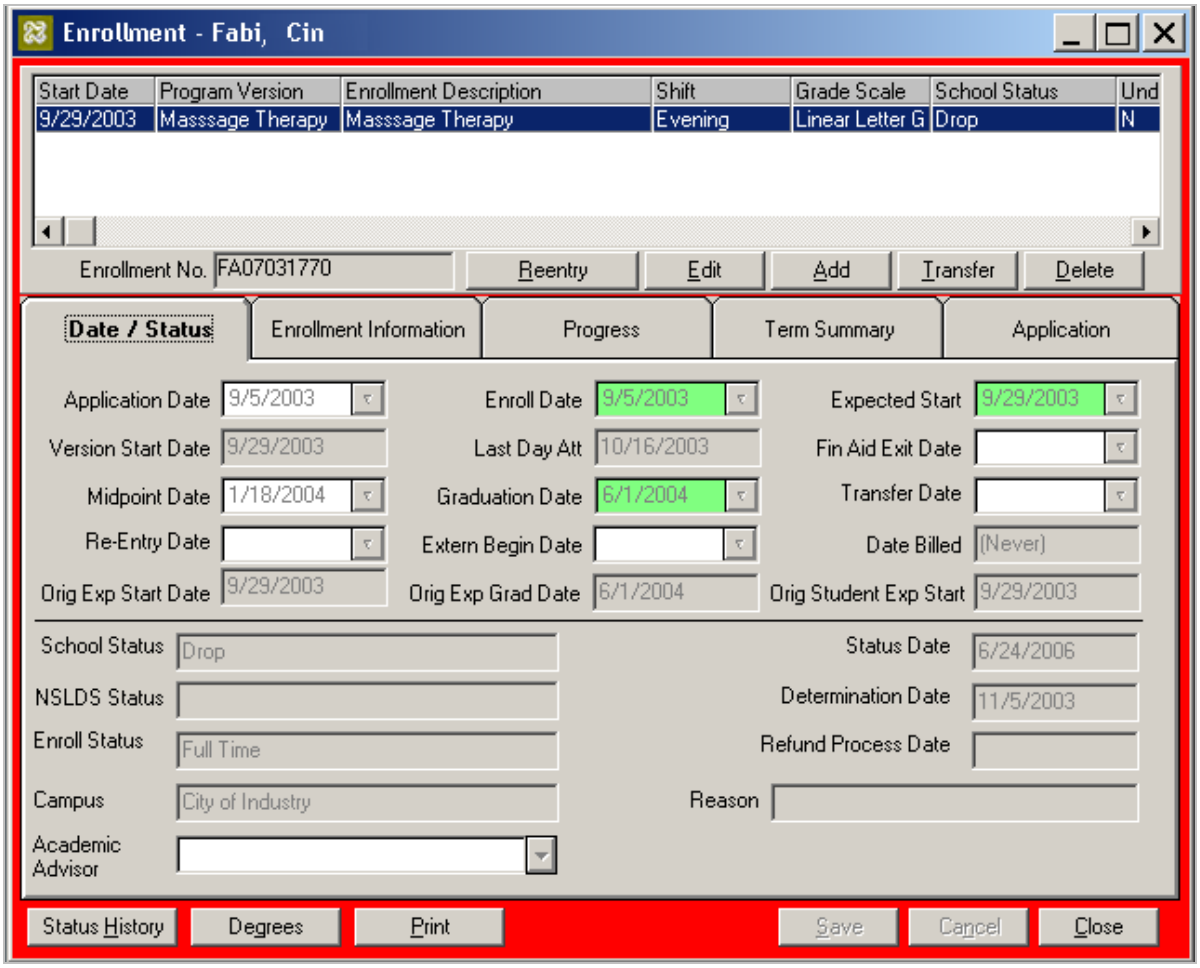
Reentry Wizard

This wizard extends the basic features of the Enrollment wizard to include information specific to the reentry process. It operates much like the Enrollment wizard does, in that it will recalculate necessary information such as length of program, financial aid academic years, midpoint and graduation dates, and so on. A setup option is used to handle status changes after first attendance is taken.

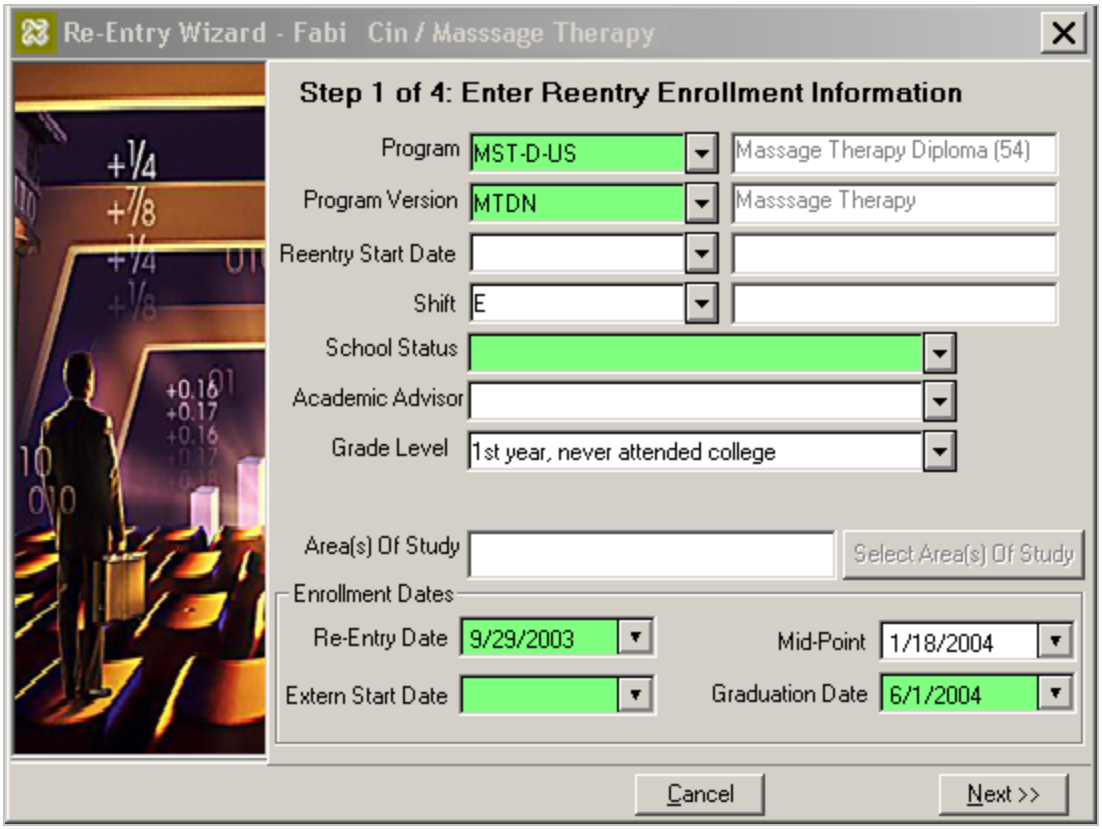
To perform the reentry process:

1. Select a student.
2. Navigate to **View > Academic Records > Enrollment**. The Enrollment form is displayed. The Reentry button is displayed when you select a program that has been assigned the status Permanent Out.

   Note: If the program version selected is one which was previously reentered as a new program/program version, the Reentry button is disabled.



3. Select a program version with the School Status of Permanent Out and click the **Reentry** button to enable the Reentry Wizard. Step 1 of the wizard is displayed. Note that the student's original program and/or program version is displayed by default and is available for selection (even if it is now inactive).

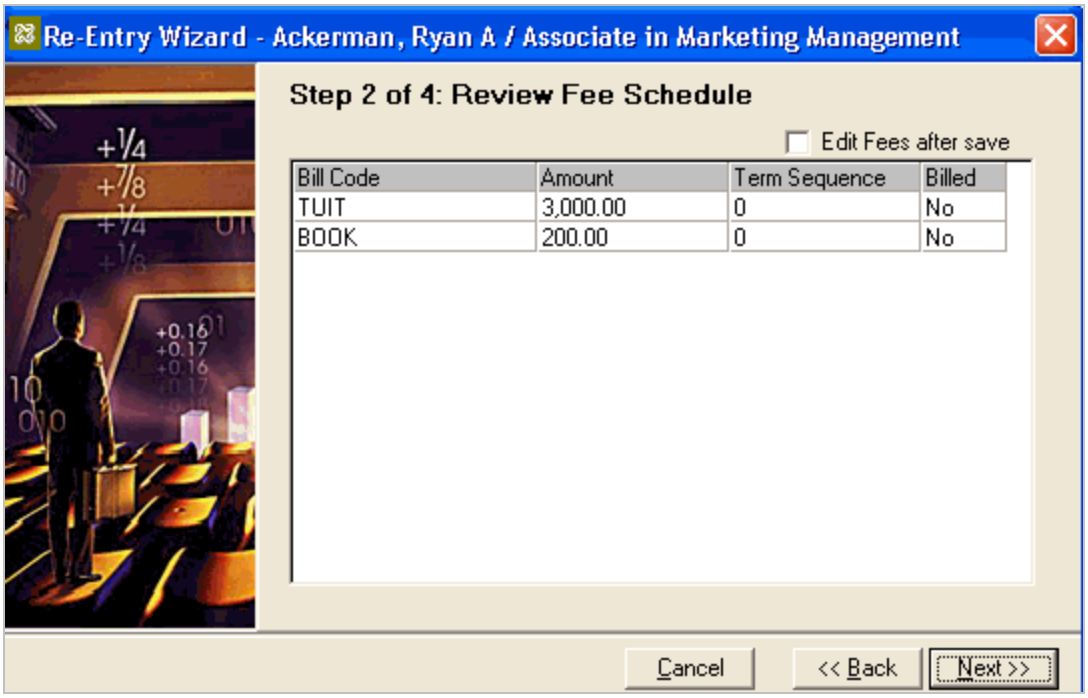


4. If the student is reentering into a new program/program version, select from among the active **Program**s and **Program Version**s displayed in the corresponding drop-down lists.
5. If applicable, select from a list of valid **Reentry Start Date**s.

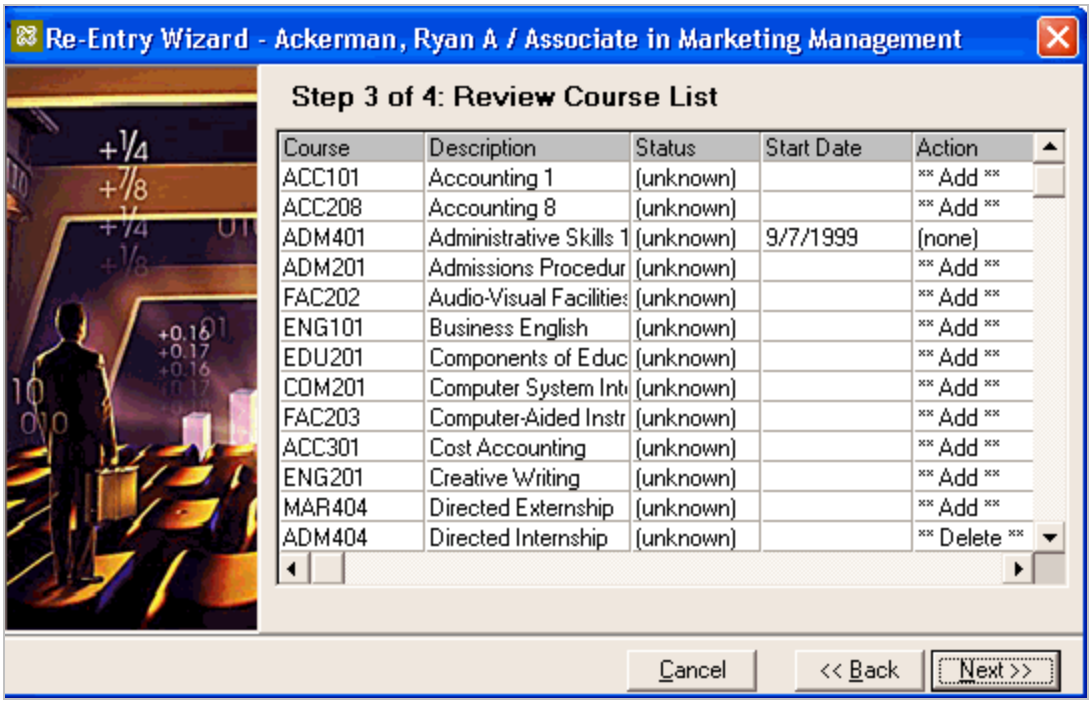
   Note: Whether you will be required to select a Reentry Start Date depends on the Require Start Date configuration under Academic Records Settings:

   - If Require Start Date is set to Not Required, it is not necessary to select a Reentry Start Date.
   - If Require Start Date is set to Required, then you must select one of the valid Reentry Start Dates as configured for the program version (see Lists > Academic Records > Program Version > Start Date Setup or Lists > Academic Records > Start Date) to reenter the student.
     - If the Start Date is configured to be required and not modifiable, then it is required in the Reentry Wizard and the Expected Start, Mid-Point and Graduation Dates cannot be modified.
     - If the Start Date is configured to be required and modifiable, then it is required in the Reentry Wizard and the Expected Start, Mid-Point and Graduation Dates can also be modified.
6. Assign a new future **School Status** for the enrollment, and update the **Shift**, **School Status**, **Academic Advisor,** and **Grade Level** fields (if required).
7. If the student's reentry program allows the choice of an Area of Study, the field will contain filtering options allowing you to select the Area(s) of Study for students enrolled in the selected Program Version. It enables you to select components for the course of study and then displays them in a tree structure. In the tree view, the root will be the student Program Version/Degree; under the Program Version/Degree will be a folder for each Area of Study.
8. Verify the **Reentry Date**, **Midpoint, Extern Start Date**, and **Graduation Date**.

9. Click **Next**.
10. Depending on whether the student is reentering into a new program/program version or reentering their original program, the wizard will display a different set of forms. For instructions on handling a student reentering the program in which they were previously enrolled, continue to the next step. For instructions on handling a student who is reentering into a new program, see section Reentering into a New Program.
11. For a student reentering their original enrollment, the wizard will proceed to Step 2.



12. Check the **Edit Fees after save** check box to edit the fees after the Re-entry process.
13. Click **Next**.



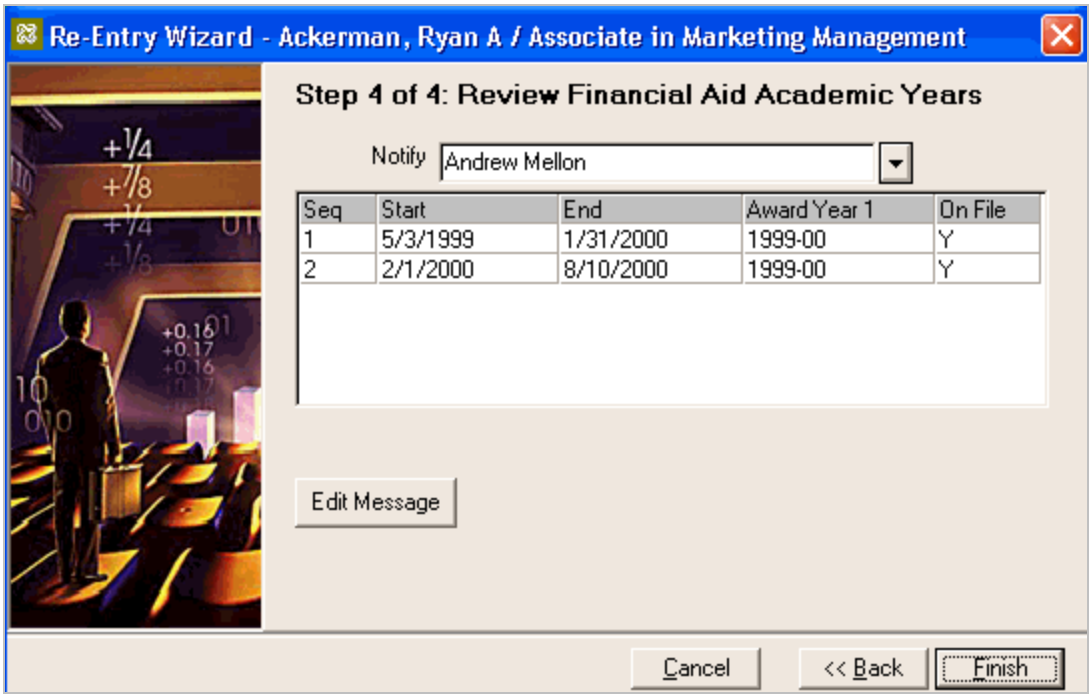
14. Review the new course schedule, based on the new Enrollment Start Date. The class schedule displays the current status and action of each class as it relates to the student's schedule folder. Depending on the status of the required courses, they will have the following actions displayed:

Matrix: Course - Status - Action

Course	Status	Action
New	Unknown	Add
Future	Future	None or Delete
Scheduled	Scheduled	None or Delete
Completed	Completed	None
Current	Current	None
Dropped	Dropped	None

All other course statuses are displayed with an Action of None

15. Click **Next** to continue to Step 4 of the Reentry wizard.



16. Click **Finish** to process the reentry. If you had selected **Edit Message,** an area will appear on the form allowing a message to be associated with the Financial Aid Academic Years.

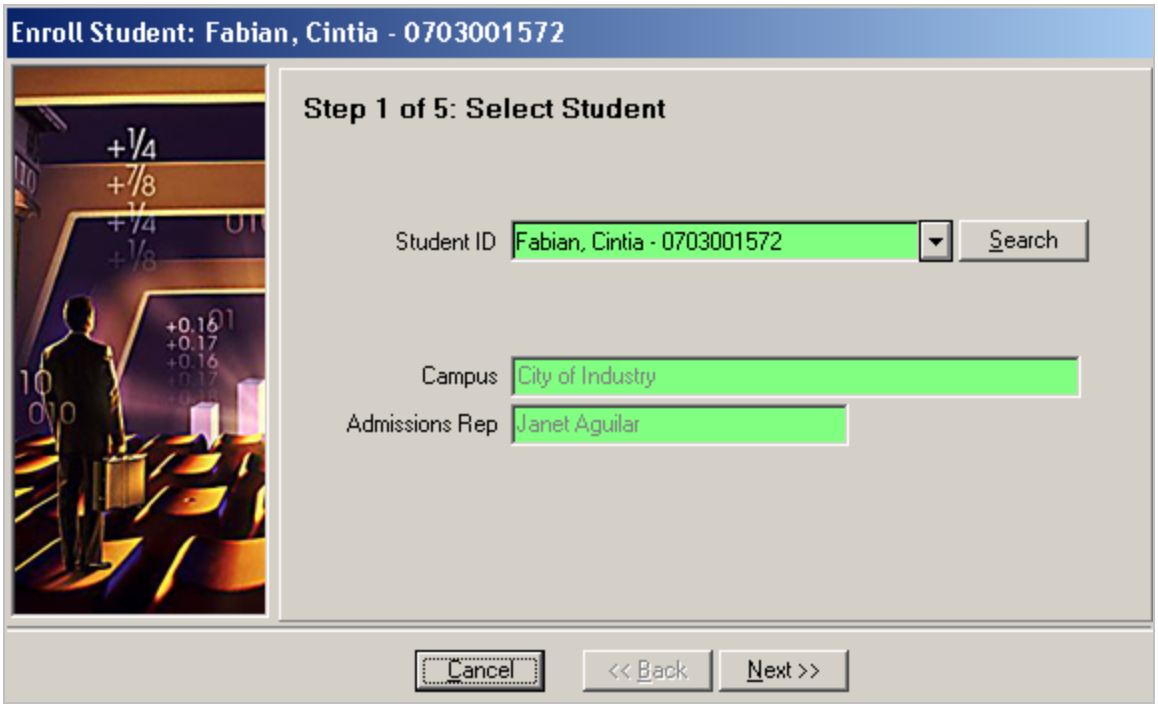
Reentering into a New Program

If the program/program version selected in Step 1 of the Reentry Wizard is new (i.e., different than the student's original program/program version), the wizard will process the reentry differently. The process is similar to a student enrolling into a new enrollment, but since some of the information has already been entered or exists in the system, only five (5) steps are required instead of the seven (7) steps for a new student enrollment.

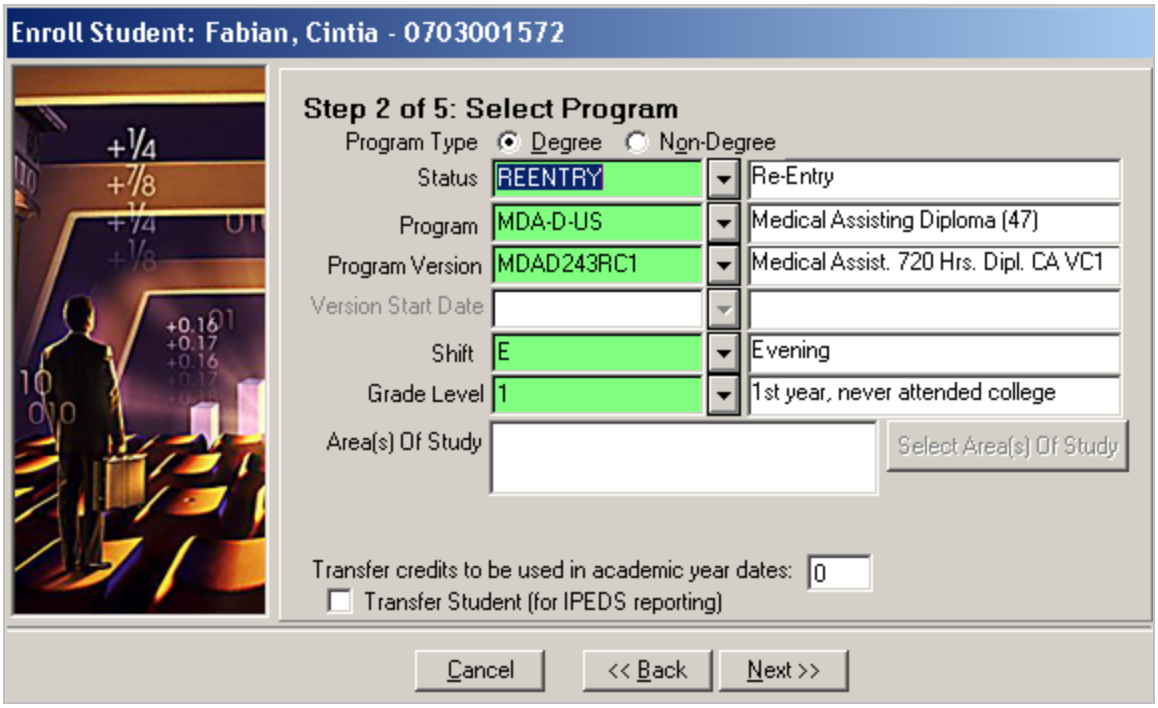
1. After **Next** is selected in Step 1 of the Reentry Wizard, the system will detect that the student is entering a different (i.e., new) program/program version. As this requires that a new enrollment record be created, a message will be presented warning that a new enrollment record is about to be created.

   Click **OK** to proceed or **Cancel** to return to Step 1 of the Reentry Wizard.

2. The wizard will now proceed through the process used to create a new enrollment.

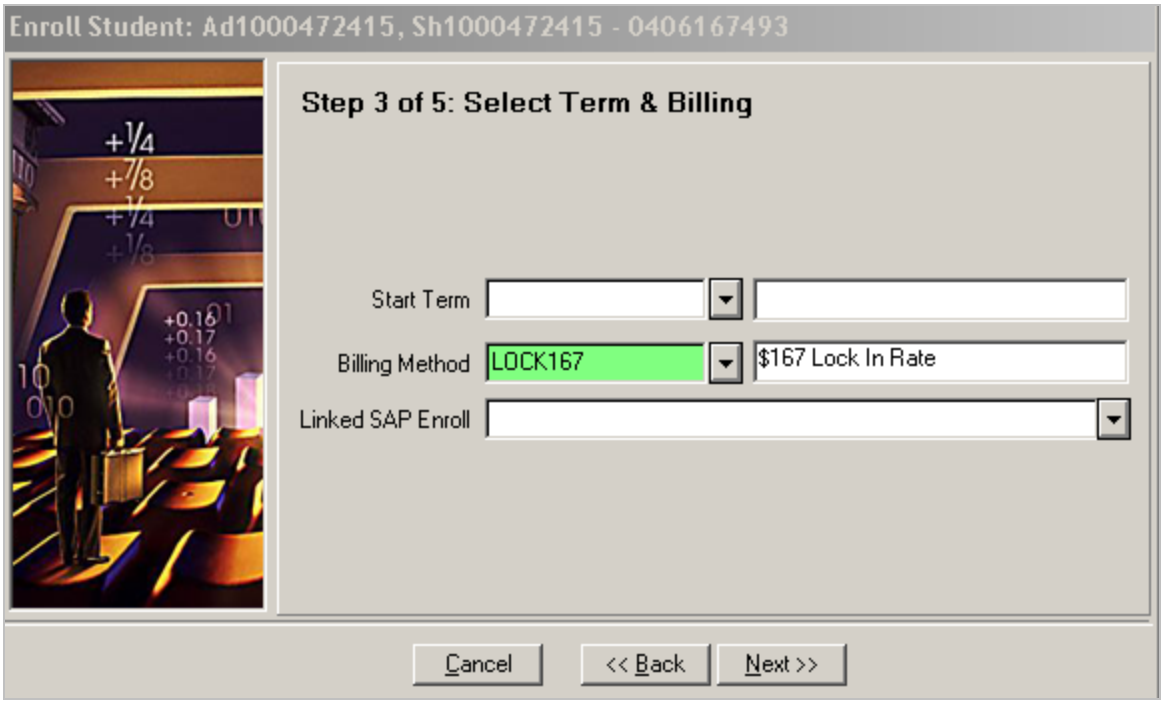


3. The **Student ID**, **Campus** and **Admissions Rep** will be copied from the student's existing record. Click **Next** to continue.
4. **Step 2 of 5: Select Program** will display the Program Information copied from the information entered in Step 1 of the Reentry Wizard.



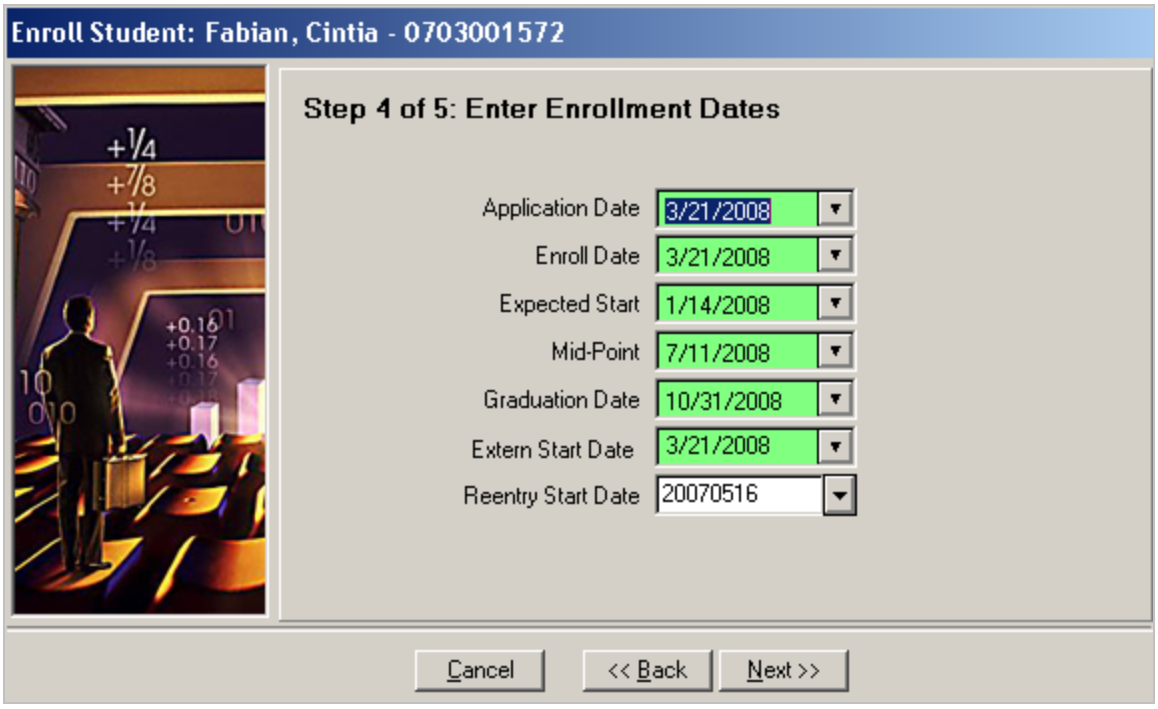
Review and update the Program Information as required and then click **Next**.

5. **Step 3 of 5: Select Term & Billing** displays the Term and Billing information.

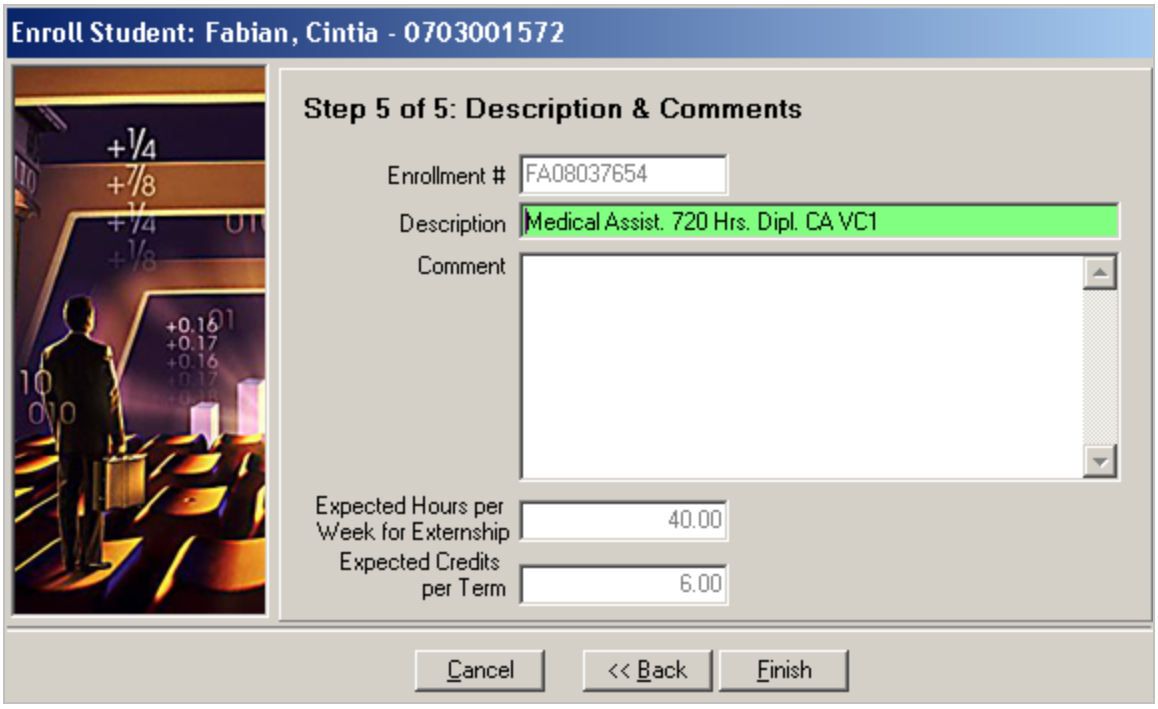


6. Select the **Start Term** from the list. The term list is set up under Lists > Academic Records > Terms. The default Term Start Date will be the Reentry Date entered in Step 1 of the Reentry Wizard.
7. Select the **Billing Method**. The billing methods are set up under Lists > Student Accounts > Billing Methods. This is a required field. The system defaults to the billing method for the student's primary Billing Affiliate.
8. Select any previous Permanent Out enrollment from the **Linked SAP Enroll** drop-down list for this new enrollment. **Note**: This field will only be displayed if the system configuration for **SAP Enrollment Linking?** is set to **Yes** in Setup > Academic Records > Settings.
9. Click **Next** to continue processing.

   Step 4 of 5:Enter Enrollment Dates allows you to select all applicable dates related to the enrollment.



10. Enter the appropriate dates for **Application Date**, **Enroll Date**, **Expected Start**, **Midpoint**, **Graduation Date**, **Extern Start Date**, and **Reentry Start Date**. The program fills in these dates from the program version setup. You can change these dates only if they are set up to be modifiable. If the program version was set to require an **Extern Start Date**, the field will be required on this page of the wizard. Otherwise, it will appear as an optional field.
11. Click **Next** to continue processing.
12. **Step 5 of 5: Description & Comments** of the wizard allows you to enter any comments regarding the enrollment, as well as verifying the student's ID and program.



13. The **Enrollment #** field will contain the Enrollment ID, and the **Description** field will contain the program selected in Step 1 of the Reentry Wizard (Enter Reentry Enrollment Information).
14. Enter any **Comments** that you want to add about this enrollment.
15. The **Expected Hours per Week For Externship** and **Expected Credits per Term** are assigned when setting up a program version. The fields will only be displayed here.
16. Click **Finish** to complete the enrollment.
17. Click **OK** to acknowledge that the student has been re-enrolled. You will be returned to the Enrollment form and shown the reentry enrollment.

Date / Status

Significant dates for a selected student's enrollment are shown on the **Date / Status** tab. You can edit some of the dates; some are maintained by CampusNexus Student. You cannot edit the dates maintained by the system. You can also see some information about the student's school status and enrollment status. This is where the student's academic advisor is assigned.

When a student's status is changed to DROP or NDS-DROP, the"Expect Disbursements Within 30 Days of LDA on Drop?" option on the Fund Source Code Setup form is evaluated. If the option is blank (cleared), all scheduled FA disbursements not in an open disbursement batch are cancelled. If the option is selected, any disbursement where the scheduled disbursement date is within 30 days of the LDA defined during the status change are left at its current "scheduled" or "ready to pay" status.

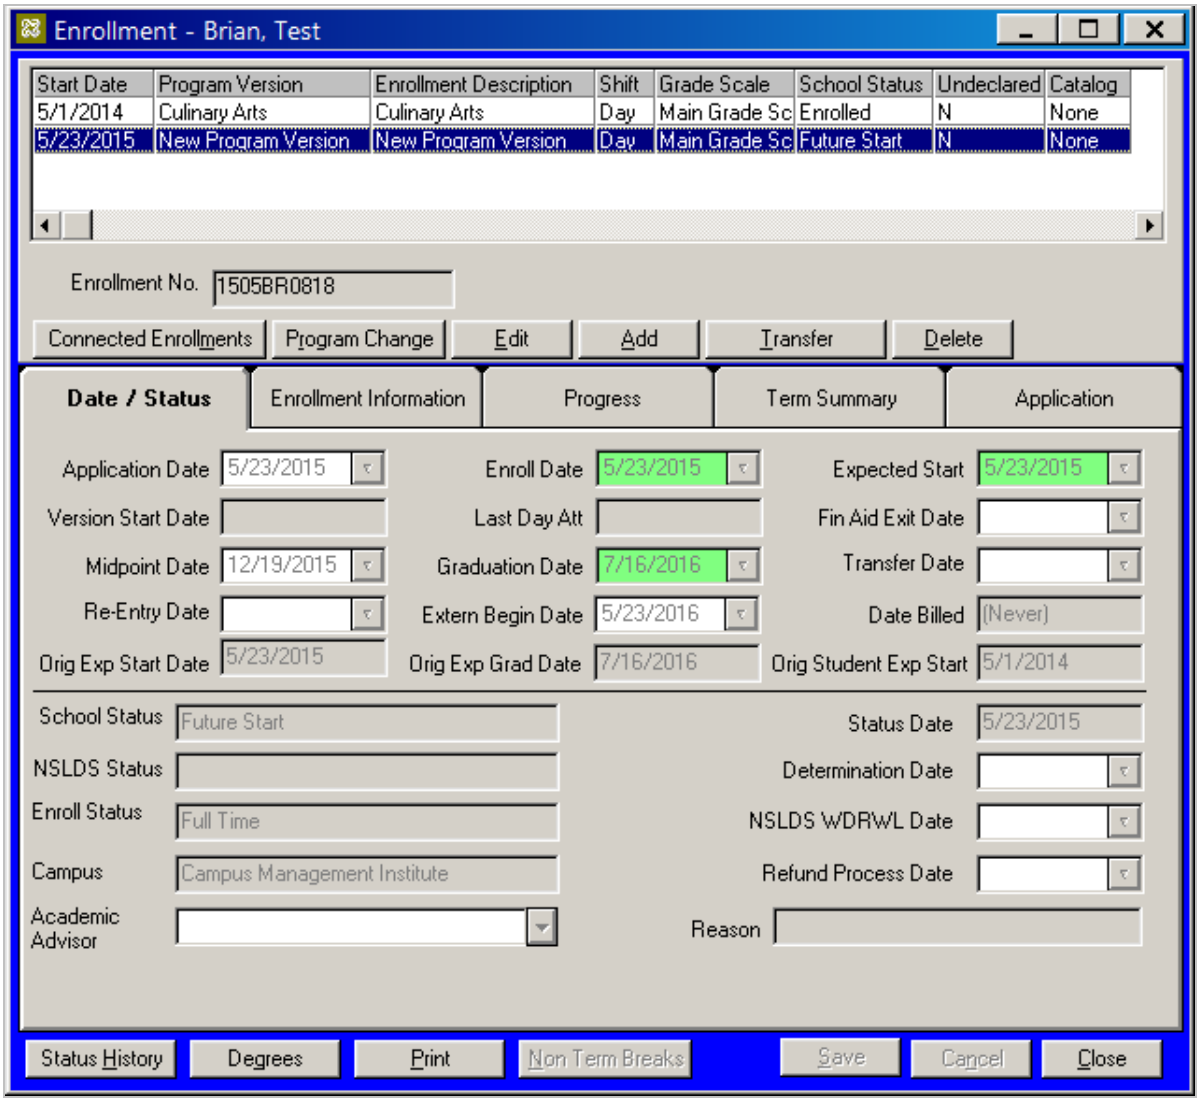
In conjunction with the Automatic Document Scheduler feature, document schedules based on "Pre-Enrollment" or "Enrollment" are evaluated when the status for a student is modified and saved on the status history form (frmAdStatusChange). If the student's data matches the specified criteria for a document schedule where the criteria include student status, all documents attached to the document schedule that are not already scheduled are scheduled for the student.

Loan Management: When you change a student's status to a Permanent Out Category, the program updates the Loan Status field to Grace, set the Loan Status Effective Date to the Enrollment Status Date, and sets the Repayment Date to the Enrollment Status Date plus the Grace Days. Each field change results in a record added to the Loan Management Status Change History table.

A student can be posted to an "Incomplete" status only if the student does not have any current classes. If the student has current classes, the program displays a message explaining why the student's status cannot be changed to "Incomplete".

To view or edit the date and status information for an enrollment:

1. Select a student for whom you want to view or edit the dates in the enrollment record.
2. Navigate to **View** > **Academic Records** > **Enrollment**. The student's Enrollment form is displayed. CampusNexus Student lists all students' enrollments, and fills in the form with data for each enrollment.



3. To edit an enrollment, select it in the top window of the form. Note the **Enrollment Number** under the list of enrollments. This is the student's identification number for the highlighted enrollment. All records for this enrollment are associated with this number. There is a different number for each enrollment.
4. Click **Edit** to open the selected enrollment for changes. The fields on the form that you can edit appear with white backgrounds. Fields that are "dimmed" are maintained elsewhere and cannot be edited here.
5. Enter new data or change existing data on the form.
6. Click Status History to view or change the student's status history for this enrollment.
7. Click Degrees to view or change the student's degrees, honors, and comments information.
8. Click **Print** to review or print the **Student Degree Evaluation Report** for the student selected. The report is also accessible at **Reports > Academic Records >**Student Degree Evaluation Report.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Field Descriptions

Field	Display/Edit	Description
Enrollment	Display	This is the number that was calculated for this student's enrollment by the system from parameters provided by your school.
Application Date	Edit	Enter the date that the student's application was received
Enroll Date	Edit	Enter the date that the student enrolled in this program version.
Expected Start	Edit	Enter the date that the student is expected to start this program version. Modifying this date will change the **Orig Exp Start Date** listed below, however an information message will appear asking you if you would like to use the Change Start wizard. To use the Change Start wizard, then select the 'Yes' option. You may make the changes in Step 2 of the wizard.
Version Start Date	Display	This is the actual date that the student started this program version. When selecting the **Program Change** button, the program version start date drop-down list will contain start dates for the program versions for the student's enrollment campus
Last Day Attended	Display	This the date that the student last attended a class in this program version.
Financial Aid Exit Date	Edit	Enter the date that the Financial Aid Exit Interview was conducted with this student.
Midpoint Date	Edit	Enter the estimated date that the student will reach the midpoint in this program version.
Graduation Date	Edit	Enter the estimated date on which the student will graduate from this program version.
Transfer Date	Edit	Enter the date that this student transferred out of this program version.
Re-Entry Date	Edit	The Re-entry wizard should initially be used to return the student from a Permanent out status category, as that process correctly populates this date field. This field should only be edited if that initial re-entry changes due to the student returning earlier or later than expected. Whenever the Re-entry Date is changed for an enrollment configured for a non-term program version, the system checks if the student has been out of school for more than 180 days. This evaluation is used in the creation of academic year and loan period sequences. Please see Academic Years for more information. Enter the date that this student re-entered this program version. Note: If a student is moved to Re-entry status using this field and then the Re-Entry Date field is updated again afterwards, a dialog box appears with the following message and Yes and No buttons: "Update expected start date to reflect changes made to re-entry date?". Ensuring the user confirms or denies the date change guarantees the integrity of the Expected Start Date in the system.

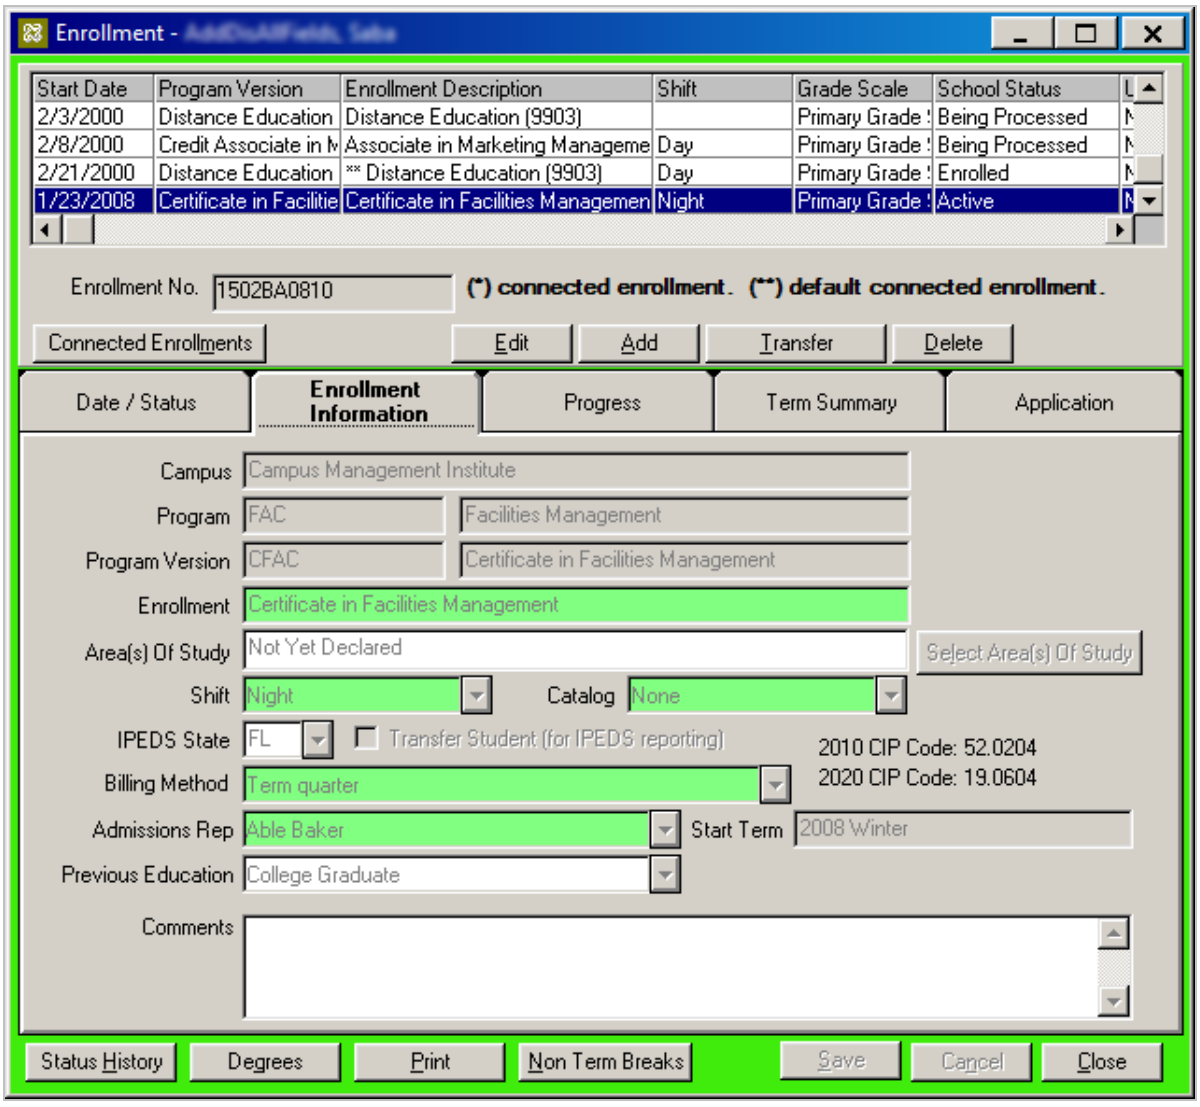
Field	Display/Edit	Description
Extern. Begin Date	Edit	Enter the date that this student began an externship.
Date Billed	Display	This is the date that the student was billed using the billing method set up under the program version in Student Accounts or on this form.
Orig Exp Start Date	Display	This is the original expected start date of the enrollment. The Expected Start date is captured when enrolling a student or upon the completion of the application process. If the student has multiple enrollments, then this date will reflect the original expected start *date* for each enrollment. If the enrollment is transferred then the original student expected start date and this date will be the same.
Orig Exp Grad Date	Display	This is the original expected graduation date at the time of enrollment. This date is frozen.
Orig Student Exp Start	Display	This is the original student expected start date at the time of enrollment. The date is determined at the time of the student's *first* enrollment. This date is frozen. (The date was previously referred to as the Original Expected Start Date).
School Status	Display	This is the student's status in school.
NSLDS Status	Display	The status is assigned by the National Student Loan Data System (NSLDS) to be used for SSCR Processing. The School Status is associated with the NSLDS Status during configuration and an effective date assigned at that time.
Status Date	Display	This is the date of the most recent status change.
Enroll Status	Display	This is the student's enrollment status. Full time, half time, etc. The Enrollment Status (Less than Half Time, Half Time, etc.) for new students (having a school status associated with a system status with a category of Enrolled or NDS Enrolled) will be updated the first time that they register for a class. If the current term has an aggregated enrollment status, that status will populate the Enroll Status field.
Determination Date	Display	This is the date when the student dropped enrollment.
NSLDS Withdrawal Date	Display	This date will be used as the effective date when reporting withdrawal status changes in the SSCR and Clearinghouse Reports. If necessary, this date can be modified using the system tool Edit Student Status History.
Campus	Display	This is the campus at which the student is enrolled.
Refund Process Date	Display	This is the date when the refund (if any) was processed.
Academic Advisor	Edit	Select the staff member who is this student's academic advisor.
Reason	Display	This field shows a reason for the student's enrollment status. It is blank until a manual status change is made.

Enrollment Information

The Enrollment Information tab displays basic information for a selected student's enrollment. You can edit some of the information, but you cannot edit the data maintained by the system. See also Tracking NDS students.

To view or edit the enrollment information:

1. Select a student for whom you want to view or edit the data in the enrollment information tab.
2. Navigate to **View > Academic Records > Enrollment**. The Enrollment form is displayed. CampusNexus Student lists all students enrollments and fills in the form with data from the first enrollment.



3. To edit an enrollment, select it in the top window of the form.

   Note the **Enrollment No.** under the list of enrollments. This is the student's identification number for the highlighted enrollment. All records for this enrollment will be related by this number.

4. Click **Edit** to open the selected enrollment for changes. The fields in the lower pane form that you can edit will

appear with white backgrounds. Fields that are "dimmed" are maintained elsewhere and cannot be edited here.

5. Click the **Enrollment Information** tab.
6. Enter new data or change existing data on the form.
7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Field Descriptions: Enrollment Information Tab

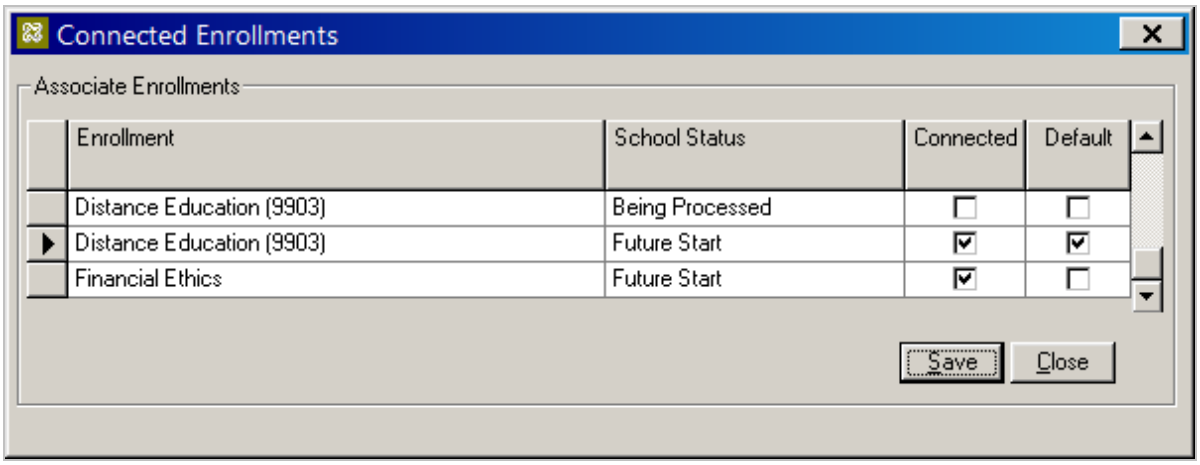
Field	Display/Edit	Description
Enrollment ID	Display	This is the number that was calculated for this student's enrollment by the system from parameters provided by your school.
Campus	Display	This is the campus in which the student is enrolled.
Program	Display	This is the code and description of the program in which the student is enrolled.
Program Version	Display	This is the code and description of the program version covered by this enrollment.
Enrollment	Edit	This is the description of the student's enrollment. By default, the description of the program version is inserted here. You can change it if necessary.
Area(s) of Study	Edit	Use the **Select Area(s) of Study** button to populate this field. Changing this value for a program version configured for Academic Calendar 5 or 6 will trigger a re-evaluation of Academic Year sequences and the credits or hours and weeks values needed to complete the program. The system also captures the end date of the last completed payment period and resets the SPE start date to that date when ever as AOS change is done for a non-term program version.
Shift	Edit	Select the shift that the student is attending for this program version.
Catalog	Edit	Select the catalog that the student is using for this program version.
IPEDS State	Edit	Enter the state identified by the student as his/her permanent address at the time of application to the institution. (The information from this field is also available on the cube report under Daily > Academic Records > Population Analysis / IPEDS Enrollment Survey.)
Transfer Student (for IPEDS reporting)	Display	The logic in the Enrollment wizard determines whether this check box is selected by default, based on whether the student has transfer credits which have a transfer type configured with its "Include as Transfer Student (for IPEDS reporting) check box selected.
Billing Method	Edit	Select the method used to bill the student-monthly, term, course, etc.
2010 CIP Code and 2020 CIP Code	Display	See Associate CIP Code with Program for details.
Admissions Rep	Display	This is the admissions rep assigned to the student.

Field	Display/Edit	Description
Start Term	Display	After selecting the start term field when adding an enrollment to the student record, the selected start term field will display on this form.
Comments	Edit	Enter comments about the enrollment.

Connected Enrollments

For students who are seeking dual degrees, provides the ability to connect enrollments from a list of non-permanent out enrollments (active/future enrollments) and set a default among the connected enrollments.

1. Click the **Connected Enrollments** button. The Connected Enrollments form is displayed.



2. Select the two enrollments that you would like to connect by selecting the **Connected** column of the appropriate enrollment.
3. Select the **Default** column of the enrollment you would like to set as the default enrollment.

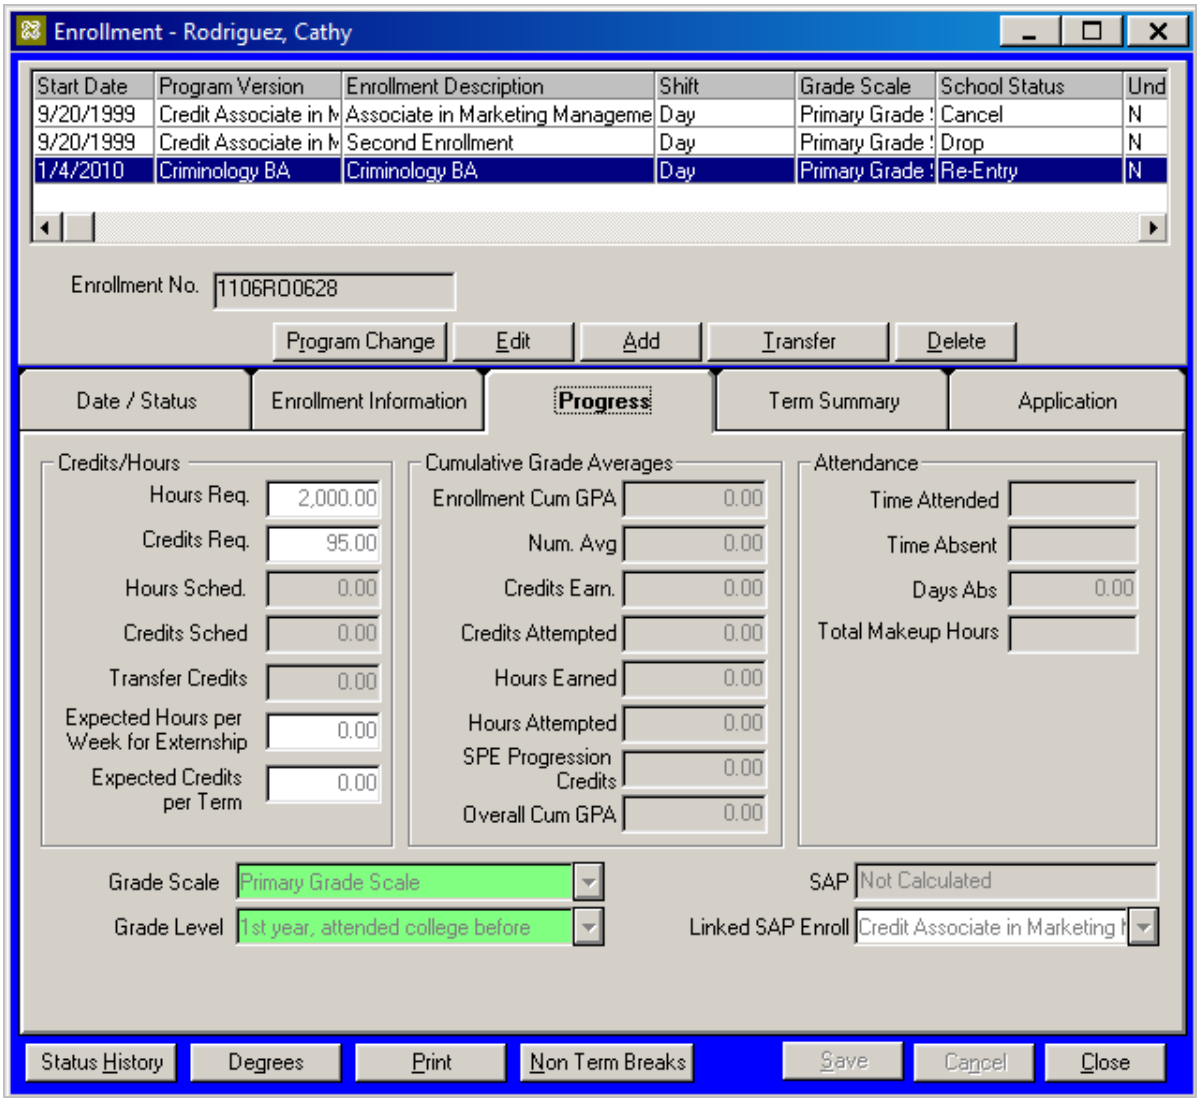
   If you do not select a default enrollment , the following message is displayed when you click Save: *"One of the selected enrollments must be specified as the default enrollment."*
4. Click **Save**.
5. A confirmation message is displayed. Click **OK**. You are returned to the Enrollment Information form.

Progress

The Progress tab shows summary enrollment data related to Credits-Hours, Cumulative Grade Averages, and Attendance. You can also select the student's grading scale and grade level.

To view or edit the enrollment progress information:

1. Select a student for whom you want to view or edit the data in the grade summary tab.
2. Navigate to **View** > **Academic Records** > **Enrollment**. The Enrollment form is displayed. The program lists all of the student's enrollments and fills in the form with data from the first enrollment.



3. To edit an enrollment, select it in the top window of the form. Note the **Enrollment No.** under the list of enrollments. This is the student's identification number for the highlighted enrollment. All records for this enrollment will be related by this number. There is a different number for each enrollment.
4. Click **Edit** to open the selected enrollment for viewing or changes. The editable fields on the form have white (or your required fields color) backgrounds. Fields that are "dimmed" are maintained elsewhere and cannot be edited

here.

5. Click the **Progress tab**.

   Tip! Double-click the Progress tab to recalculate the values on this page of the form.

6. Enter new data or change existing data (Hours Required, Credits Required, Expect Hours/Week Internship, Expected Credits/Term, Grade Scale, Grade Level only) on the form.
7. Click **Save** to save your changes.
8. Click **Close** to close the form.

Refer to the table below for a description of the data fields on the Enrollment form, Progress tab.

Field Descriptions: Enrollment Form Grade Summary

Field	Display/Edit	Description
Enrollment No.	Display	This number is calculated by the system for this student's enrollment parameters provided by your school.
Credits / Hours		
Hours Req.	Display	This is the total hours required for completion of the enrollment (program version). Changing this value for a program version configured for Academic Calendar 5 will trigger a re-evaluation of Academic Year sequences and the hours and weeks values needed to complete the program. If a credit hour non term program is using clock to credit conversion, then changing this field will drive the AY/LP adjustment evaluation. Staff Group field-level security may be established for the field.
Credits Req.	Display	This is the total credits required for completion of this enrollment (program version). Changing this value for a program version configured for Academic Calendar 6 will trigger a re-evaluation of Academic Year sequences and the credits and weeks values needed to complete the program. If a credit hour non term program is using clock to credit conversion, then the Hours Req. value will drive the AY/LP adjustment evaluation. Staff Group field-level security may be established for the field.
Hours Sched.	Display	This is the number of hours currently scheduled in this enrollment.
Credits Sched	Display	This is the number of credits currently scheduled in this enrollment for the current term.
Transfer Credits	Display	If the student if enrolled in a credits based program version, the field is labeled *Transfer Credits* and the total number of transferred credits is displayed. If the student if enrolled in a clock hours based program version, the field is labeled *Transfer Hours* and the total number of transferred hours is displayed.

Field	Display/Edit	Description
Expected Hours per Week for Externship	Edit	This field will only be used in the graduation date calculation if the student is enrolled in an Externship course. The value entered must be less than the *Total Hours for Externship* entered when configuring the program version. Staff Group field-level security may be established for the field.
Expected Credits per Term	Edit	Enter the total number of academic credits that the student is expected to complete per term. This value can also be entered when configuring the program version. This value is displayed in the Term Sequencing Enroll Course List form. Staff Group field-level security may be established for the field.
Outside Coursework Hours	Edit	Enter in 5 minute increments as expressed in hour decimals (e.g. 10 minutes is 0.17 hours). This text box is only visible when the Clock to Credit option is ON for the enrolled program version.
FA Credits	Edit	This field is used for measuring progression as well as adjusting Academic Year and Loan Period sequences if the total FA credits for a program version is different than the Academic Credits. This field is available for programs configured to use Academic Calendar 6 if “Allow Course to be exempt from Progression” is enabled. During enrollment this field is populated from the corresponding field on the Financial Aid configuration form for the Program Version.
Cumulative Grade Averages		
Enrollment Cum GPA	Display	This is the student's cumulative grade point average at this time in the selected enrollment. The information from dropped courses is included.
Num. Average	Display	This is the current numeric average of class sections graded for this student. If your school does not use numeric grading, this will be zero.
Credits Earn.	Display	This is the number of credits earned by the student to date.
Credits Attempted	Display	This is the number of credits attempted by the student to date.
Hours Earned	Display	This is the number of hours earned by the student.
Hours Attempted	Display	This is the number of hours attempted by the student.
Total FA Hours	Display	This is the sum of Hours Req. text box + Outside Coursework Hours text box value. This text box is only visible when the Clock to Credit option is ON for the enrolled program version.
SPE Progression Hours	Display	This is the number of hours completed by a student using Academic Calendar 5 or 6. This field is updated manually, or when a grade change (final grade is posted, or if grade change from Pass to Fail or Fail to Pass) occurs for the student.
SPE Progression Credits	Display	This field displays the total number of credits applying toward the completion of the enrollment. When “Allow courses to be exempt from progression” is enabled, this field holds the total of the Enrollment status credits that apply to completion of the program.

Field	Display/Edit	Description
Attendance		
Time Attended	Display	This is the number of hours attended by the student.
Time Absent	Display	This is the number of hours that the student was absent from class.
Days Absent	Display	This is the number of complete days that the student was absent from school.
Total Makeup Hours	Display	This is the number of makeup hours accumulated by the student.
Grade Scale	Edit	Select the grade scale to be used for this enrollment from the list.
Grade Level	Edit	Select the grade level of the student from the list.
SAP	Display	This field indicates that the student is or is not making Satisfactory Academic Progress. It also indicates that SAP has not yet been calculated for the student.
Linked SAP Enroll	Edit	This field displays the previous permanent out enrollment that was linked to the selected enrollment for SAP calculation. **Note**: Users with *Edit* security permissions, and *Update* Field-Level Security can add/delete/change the SAP link. Any time a change is made to this field, a message is displayed stating *SAP will not be recalculated as a result of this change. If corrections to historic SAP records are needed, please re-run SAP manually for the student.* In addition, changes to this field are captured in the Admissions Audit.

Staff Group Field-Level Security for Progress fields

While the Progress tab is open, select **Setup > Field-Level Security**. The **Set Field Security** form is displayed. Staff Groups can be assigned that are permitted to Update the fields shown on the form. Other options for the fields are *None* or *Display*.

- If *None* is selected, the field is not displayed for the Staff Group selected.
- If *Display* is selected, the Staff Group can view the field, but may not edit it.

Total Attended Hours for Clock Hour Programs

Total Attended Hours data is available in multiple areas of the application, as derived from the cumulative minutes attended and minutes absent (Enrollment Schedule table for courses) and the total program hours (Progress tab of the Enrollment folder).

Basis

The display of Total Attended Hours for a Clock Hour program is based on the following features of CampusNexus Student:

Attendance Summary: Designation referring to the Attendance section of the Progress tab on the Enrollment form in CampusNexus Student. It contains the following 4 fields (for a more detailed description of these fields, see Progress):

- Time Attended
- Time Absent
- Days Absent
- Total Makeup hours

Total Attended Hours: A field on the Customized User Toolbar that shows the total hours attended by the student for the current enrollment, if the program is a Clock Hour program. The Total Attended Hours are displayed in the format **## h ## m**. See also Enabling the Display of Total Attended Hours.

Notes:

- The Total Attended Hours field will be empty for Non-Clock Hour programs.
- The Total Attended Hours field is visible only if the Customized User Toolbar has been turned on in CampusNexus Student.

Effects of Course Association/Unassociation

The characteristics below apply to both the Time Attended field in the Enrollment folder (Progress tab) and the Total Attended Hours field on the Customized User Toolbar. The latter uses the hours from the Enrollment folder, hence the statements are valid for both.

- The Total Attended Hours field on the User Toolbar and the Attendance Summary on the Enrollment folder include hours from associated courses.
- CampusNexus Student updates the attended hours for a given enrollment for each new course association that occurs in the system, manually or automatically.
- When a course is associated, any Makeup Hours, Absent Hours and Days Absent for the associated course are also included in totals for the associated enrollment.
- If a course is unassociated, the Attended Hours, Makeup Hours, Absent Hours and Days Absent are deducted from the totals for the associated enrollment.

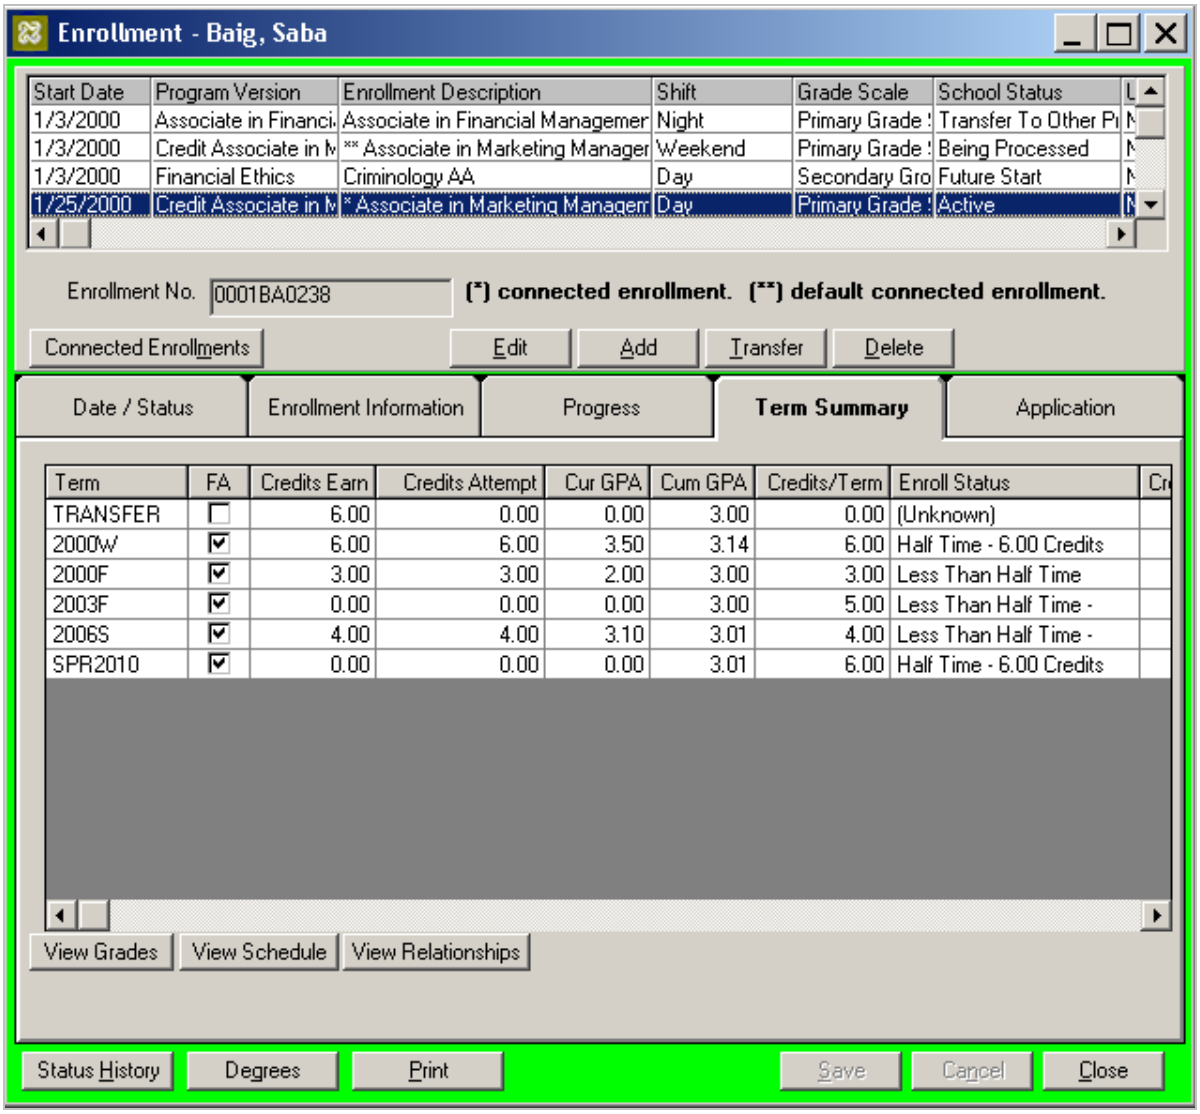
Term Summary

Term summary information for a selected student's enrollment is shown on this tab. There is one row on the grid for each term the student is in school. Data on this form is maintained by CampusNexus Student. You cannot edit data maintained by the system.

When SAP is run by Term, if a student's Term GPA is 0.00 because all courses are configured to not be included in the GPA, SAP will ignore evaluating the Term GPA criteria.

To view the term summary information:

1. Select a student for whom you want to view the data in the term summary tab.
2. Navigate to **View > Academic Records > Enrollment**. The Enrollment form is displayed. A list of all the student's enrollments is displayed.



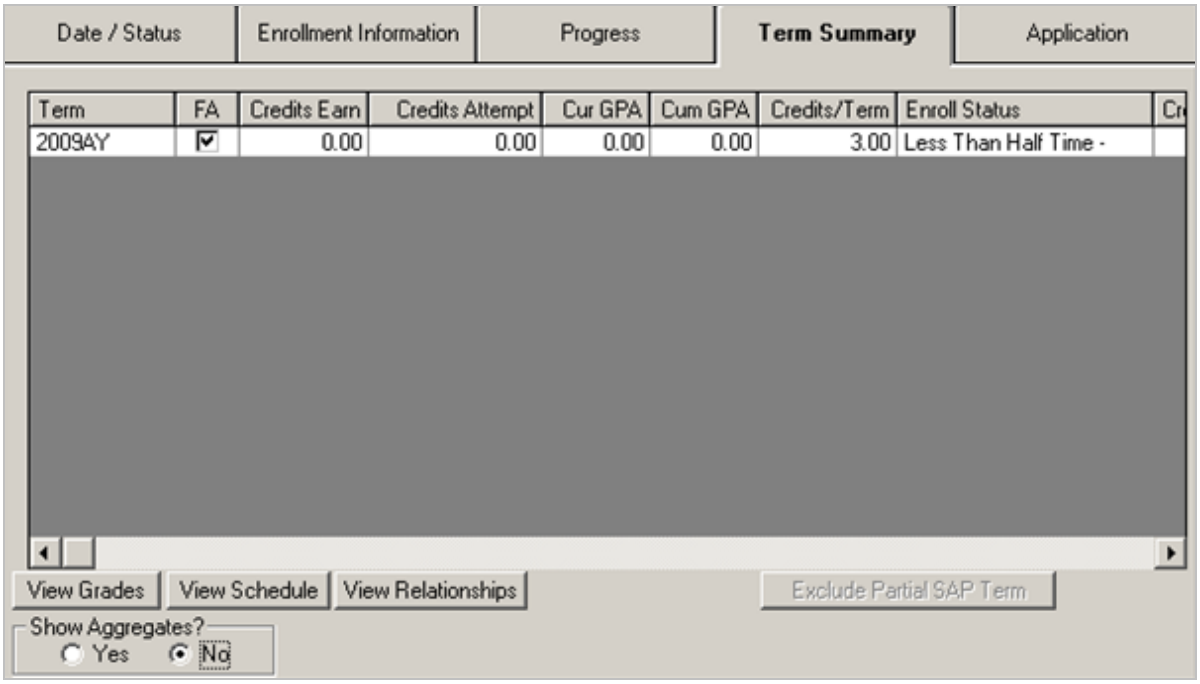
3. To view or edit an enrollment, select it in the top window of the form. Note the **Enrollment Number** under the list of enrollments. This is the student's identification number for the highlighted enrollment. All records for this enrollment

will be related by this number. There is a different number for each enrollment.

4. Click the **Term Summary tab** to view the term summary for each term attended by the student.
5. Click **View Grades** to see the student's Grades.
6. Click **View Schedule** to see the student's Schedule.
7. Click **View Relationships** to see the term's relationships to parent or child terms.
8. Click **Rebuild Relationships** to rebuild the parent child relationships. This button will only be shown when at least one of the terms in the student's term summary has a term relationship configured.
9. Click **Exclude Partial SAP Term** to exclude a selected term in the term summary from the term sequence calculation. This provides the ability to designate the selected term as a Partial SAP Term. This button will only be shown when the Partial Term Validation feature is turned on in the SAP policy defined for the student's program version and the user has permission to exclude Partial SAP Terms.
10. Select the **Show Aggregates?** option to display an aggregated enrollment status when there are terms shared across both enrollments.

    When **Yes** is selected, the grid on this form shows aggregated values in the Credits/Term and the Enroll Status columns. When terms are shared across both enrollments, Yes is the default value.

    When **No** is selected, the grid on this form displays non-aggregated values. This option is visible only if the enrollment being viewed is or has ever been connected to another enrollment.



11. Click Status History to see the student's status history.
12. Click Degrees to see the student's degrees, honors, and comments.
13. Click **Close** to close the form.

Refer to the table below for a description of the data fields on the Enrollment form, Term Summary tab.

Note: If the student is enrolled in a clock-hour program, the column headers are changed for the clock-hour values. The amount of credits or clock-hours shown for a term on this form includes the sum of all credits or hours for this term and any related child terms (click **View Relationships** to view all related terms to the selected term).

Field Descriptions: Enrollment Form Attendance and Status

Field	Display/Edit	Description
Enrollment Number	Display	This is the number that was calculated for this student's enrollment by the system from parameters provided by your school.
Term	Display	This is the code for the term on the row.
FA	Display	This check box represents whether the student is receiving Financial Aid for the particular term displayed in the Term column.
Credits Earned	Display	This is the number of credits earned by the student during this term. For clock-hour schools this column will show hours earned.
Credits Attempted	Display	This is the number of credits attempted by the student during this term. For clock-hour schools this column will show hours attempted.
Current GPA	Display	This the student grade point average for the term on this row. The information from dropped courses will be included.

Field	Display/Edit	Description
Cum GPA	Display	This is the student's cumulative grade point average for all terms listed. The information from dropped courses will be included.
Credits/Term	Display	This is the number of credits registered for the selected term & enrollment.
Enroll Status	Display	This is a calculated sum of enroll status credits or enroll status hours (depending on the program version's setting for credit or clock hour) for the term and enrollment selected. The total is then compared to the enroll status minimums defined on the program version. (The total enroll status number may not always match the academic credits/hours total in the Credits/Term column.)
SAP Status	Display	This is the status of the student's SAP.
Honors	Display	This is an honor awarded to the student during the selected term. For instance, "Dean's List".
Term Confirmation	Display	This is the status of Term Confirmation settings for a student.
Blind Grade ID	Display	This is the blind grade ID that corresponds to the term on the same line for the selected student. The blind grade ID is used in place of the student's name.

Excluding Partial SAP Terms

A student's schedule may include a Partial Term which occurs when a student takes a course before the first full term. For example, a student starts at the midpoint of a term and only takes one or two courses. Since the term is short and the credit load is small, the school may not wish to include the courses taken in that term as part of the student's SAP calculations. For this purpose CampusNexus Student provides the **Validate Partial Term** feature. When this feature is turned on, a partial term is determined using the following logic:

- The student's earliest registered course start date for the SAP term being evaluated is equal to the student's **version start date**

  AND is greater than the start date of the term the registered course is associated with (for schools not using term relationships)

  OR is greater than the start date of the parent term of the term the earliest registered course is associated with (for schools using term relationships).

- The student's earliest registered course start date for the SAP term being evaluated is equal to the student's **re-entry date**

  AND is greater than the start date of the term the registered course is associated with (for schools not using term relationships)

  OR is greater than the start date of the parent term of the term the earliest registered course is associated with (for schools using term relationships).

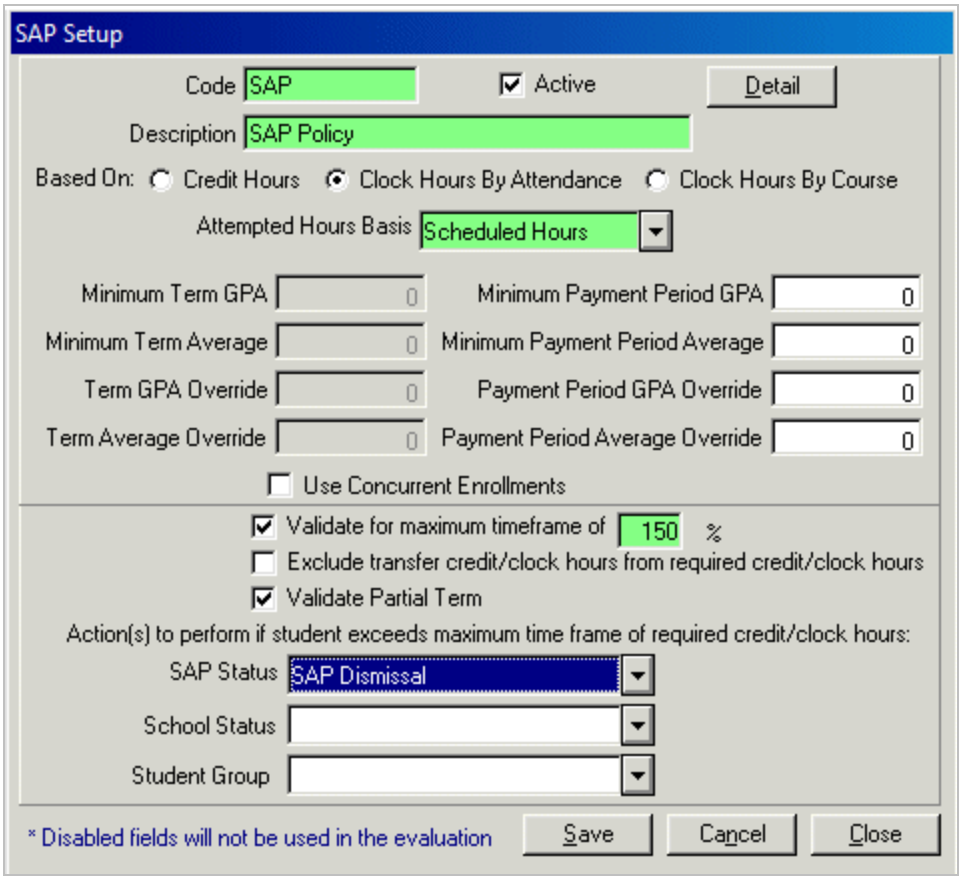
When the logic above determines that a student has taken a partial term, the partial term is not included in the student's SAP calculation.

If a school uses partial terms the school may wish to exclude a partial term from the general SAP calculation. This can be manually configured for each student from on the Term Summary tab of the Student Enrollment form. Once a term has been flagged as a Partial SAP Term, it is no longer be included in the SAP calculations.

This feature must be enabled as part of the SAP code setup.

To enable the validation of a partial SAP Term for a specific SAP Code:

1. Navigate to **Lists > Academic Records**.
2. Select the applicable **tab**, or click the **Go To** button, click and select **SAP**. The existing SAP codes are displayed on the grid.
3. Select a line and click **Edit** to view or change it. The **SAP Code Setup** form is displayed.



4. Select the **Validate Partial Term** check box.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

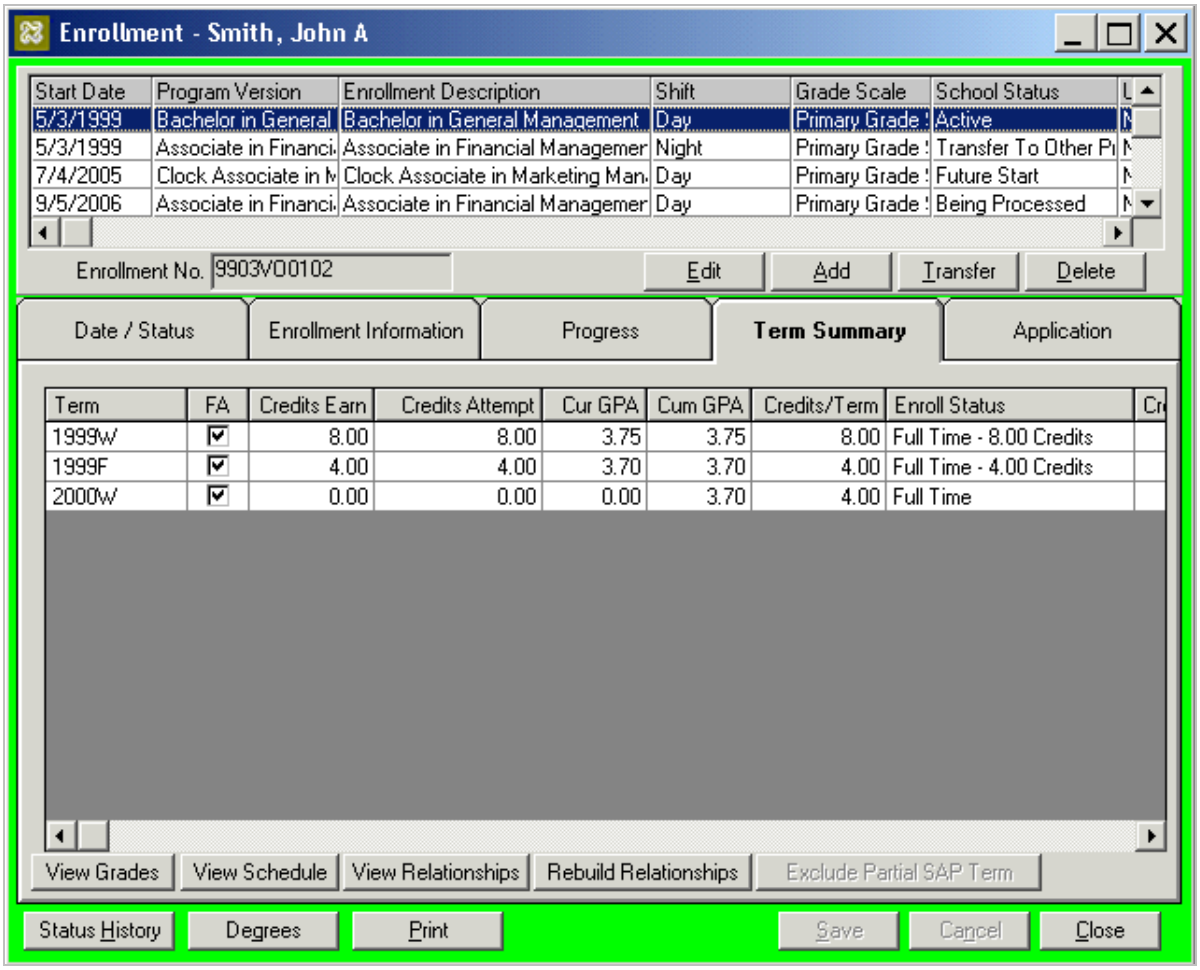
This should be done for each SAP Code for which you want to be able to exclude Partial SAP terms.

Configuring Partial Term SAP for a Student

To manually configure Partial Term SAP for a student, the system administrator must have enabled this feature on the system for the staff member or group member.

To configure one or more SAP Partial Terms for a student:

1. Select a student whose enrollment contains the terms that you want to configure.
2. Select **View > Academic Records > Enrollment.** The Enrollment form for the selected student is displayed.
3. To view or edit an enrollment, select it in the top window of the form.
4. Click the **Term Summary** tab.

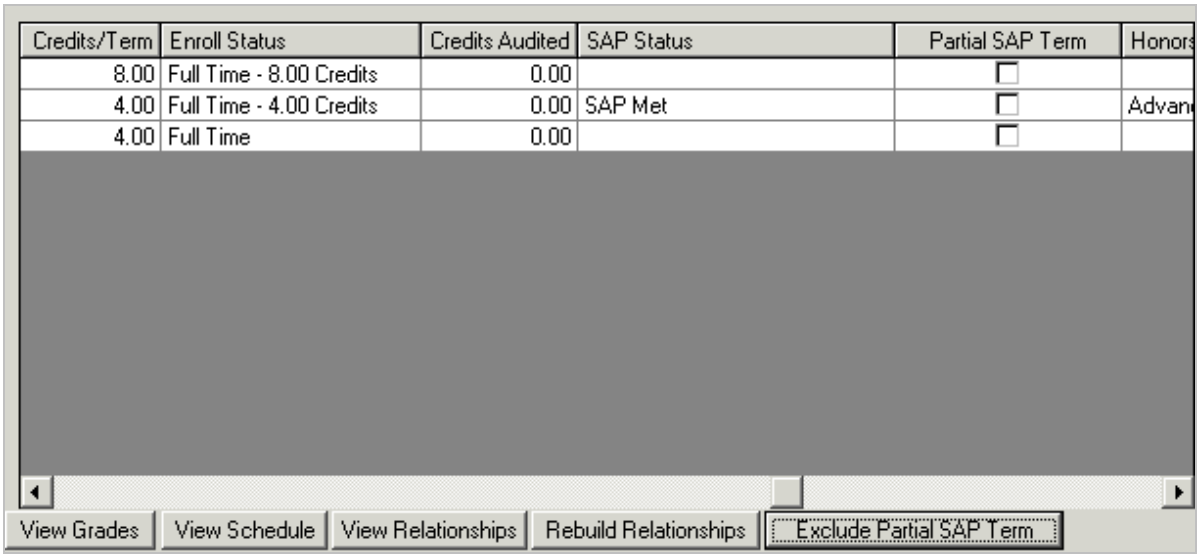


5. Click **Edit**. Since the form is displayed with focus on the **Date/Status** tab.
6. Click the **Term Summary** tab again. The **Exclude Partial SAP Term** button should be enabled.

   If the button is not enabled or visible, this means that:

   - The user does not have system permission to exclude partial SAP terms.
   - The Partial Term Validation feature is turned off in the SAP Code defined for the student's program version.
7. Using the slider at the bottom of the form, move the grid so that the **Partial SAP Term** check box is visible.

   If the term is a Partial Term for that student, the **Partial SAP Term** check box is selected.



8. Click the row representing the term that you want to flag as a Partial SAP Term.
9. Click the **Exclude Partial SAP Term** button. The Partial SAP Term check box is now selected.

   Note: The **Exclude Partial Term** button is now labeled **Include Partial Term**. This enables you to deselect the check box.
10. Repeat the previous steps for each term that you want to exclude from the SAP calculation.
11. Click **Save** when you have completed editing of the partial SAP Terms.

    Note: As the screen is re-displayed after saving, it may display a different enrollment. Simply re-select the desired enrollment.

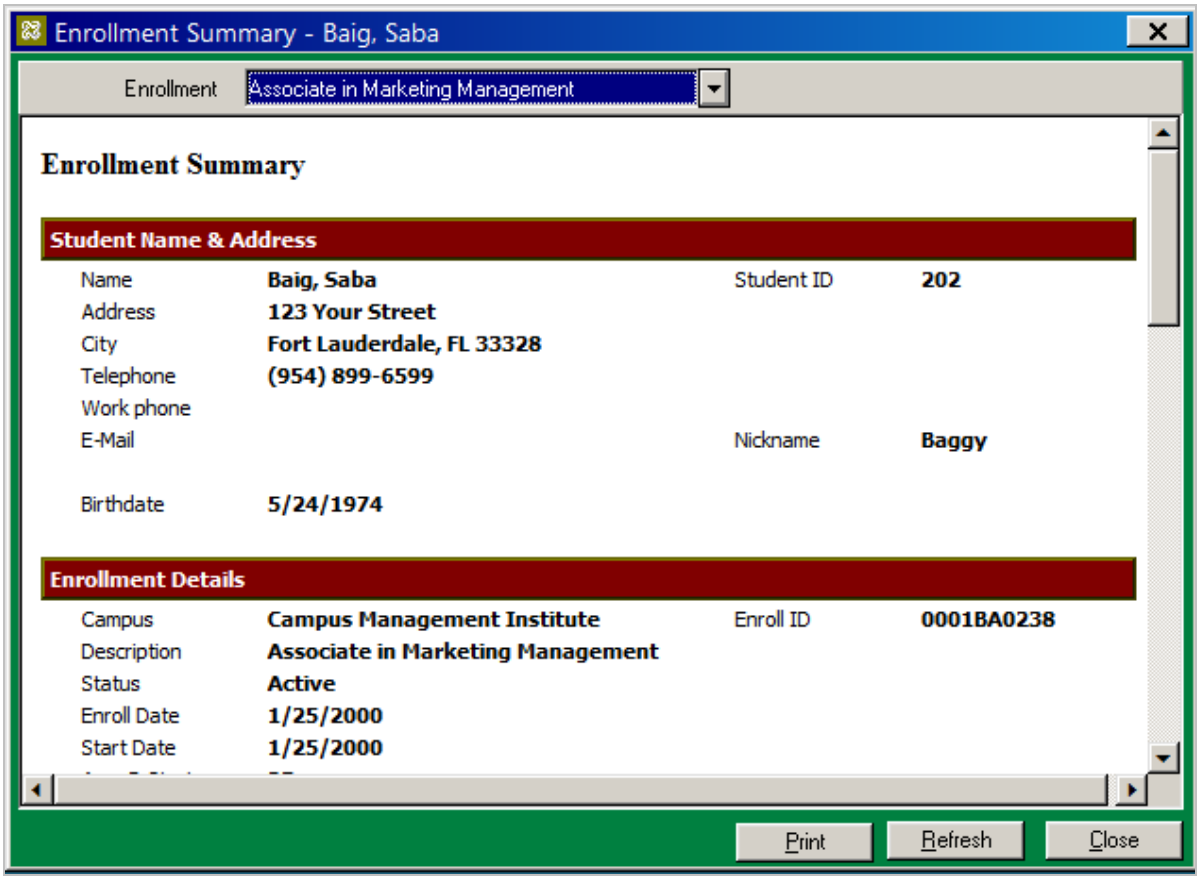
When the SAP calculation is performed, it will exclude all terms as part of the SAP term sequence calculation which contain a check in the **Partial SAP Term** check box.

Enrollment Summary

The Enrollment Summary option displays an html-style report that lists enrollment data about the selected student.

To view the Enrollment Summary:

1. Select a student.
2. Navigate to **View > Academic Records > Summary**. The Enrollment Summary for the selected student is displayed.



3. Select the **Enrollment** for which you want to view the summary.
4. Click the **section headers** on the report to bring up the related maintenance form. The sections on this report include:
    - Student Name and Address
    - Enrollment Details
    - Billing Address
    - Schedule of Fees
    - Account Summary
    - Registration
5. Click **Print** to print a report of the Enrollment Summary.

6. Right-click on the report to view a shortcut menu. to perform other actions.
7. Click **Close** to close the form.

Schedule

When a student is enrolled in a program version, all core and elective courses set up for the program version are copied into the student's schedule. The Student Schedule form is used to enter and maintain a student's class schedule. You can filter the class schedule by enrollment, term, registration group, and student status. You can create a unique schedule or modify a class schedule for each enrollment. The list of classes shown on the form can be displayed showing schedule information or grade information.

Shared courses appear on the Course Schedules of all participating campuses. For example, if a campus shares on-line courses with an on-ground campus, the report displays courses for both types of campuses. Additionally, the number of available seats are displayed. The Registrars have override capability for courses and seats available for their campuses but not for courses shared from other campuses.

Note: If an institution is a "Clock Hour" school, the clock hour information is used to calculate GPAs and Tuition Billing.

You can perform the following tasks from the Student Schedule form:

- Add class sections to the schedule
- Delete class sections from the student's schedule
- Drop a student from a class section

  Be sure to note the difference between *dropping* the student from the class section which can result in a grade action, and *deleting* a class section from the student's schedule which removes the class from the student's records.

- Edit class sections
- Reinstate a student
- Register a student in a class
- Register a student in multiple class
- Reassign a class
- Allow the course to be considered as a Retake
- Transfer a student to another class section
- Associate completed or dropped courses with other enrollments
- Work with the student's registration groups

You can also print the class schedule, enter and edit lesson information, enter and edit attendance, print a list of the scheduled classes, and print labels.

Remedial courses may be posted to the student's schedule when minimum test scores are not met during the admission or academic enrollment process.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

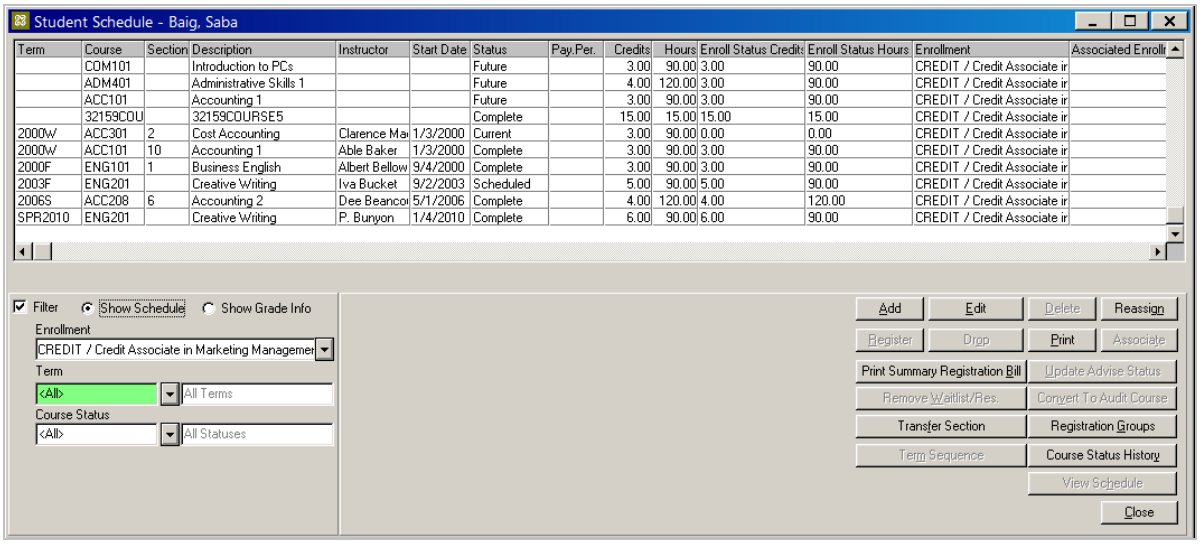
To work with the Student Schedule form:

1. Select a student.
2. Navigate to **View > Academic Records > Schedule**. The Student Schedule form is displayed.

   Note: You can resize the Student Schedule form.

   If a student's enrollment is associated with Major, Minor, or Concentration, an additional column – Areas of Study – is displayed between the Section and Description columns. This column identifies the student's Major, Minor, and/or Concentration.

If a value is displayed in the Catalog Code field, the Student Schedule will show the Catalog Code for the course. If there is no value in Catalog Code, it will show the Code.



3. Select a filter option: **Show Schedule** or **Show Grade Info**. These options change the columns displayed in the grid as follows:

Columns for Show Schedule/Show Grade Info

Columns	Show Schedule	Show Grade Info
Term	Yes	Yes
Course	Yes	Yes
Section	Yes	Yes
Description	Yes	
Instructor	Yes	
Start Date	Yes	
Status	Yes	
SPE	Yes	Yes
Pay.Per.	Yes	Yes
Credits	Yes	
Hours	Yes	
Grade		Yes
Numeric Grade		Yes
Points		Yes

Columns	Show Schedule	Show Grade Info
Credits Earned		Yes
Status		Yes
Enroll Status Credits	Yes	Yes
Enroll Status Hours	Yes	Yes
Enrollment	Yes	Yes
Associated Enrollments	Yes	Yes
Campus	Yes	Yes
Delivery Method	Yes	Yes
Outside Course work Hours	Yes	Yes
Total FA Hours	Yes	Yes

Note 1: The SPE column indicates how the course is evaluated in the Student Pace Evaluation (SPE) tool:

- Y - Indicates that the course is included in progression.
- N - Indicates that the course is excluded from progression.
- R - Indicates that the course reduces the Academic Year/Loan Period.

Note 2: The Outside Coursework Hours and Total FA Hours columns are only visible when the Clock to Credit option is ON for the enrolled program version.

- When CEFP Configuration is ON, Total Fa Hours = Outside Coursework Hours + Enroll Status Hours.
- When CEFP Configuration is OFF, Total Fa Hours = Outside Coursework Hours + Earned Hours when final grade was posted, otherwise Schedule Hours.

For more information, refer to Allow courses to be exempt from progression.

4. Filter the list of courses by selecting the **Enrollment**, **Term**, and **Status**.

   Course Status changes:

   - When a course is added to a student's course list, its status is set to '*Future*'.
   - When the student is registered in a class section for the course, the status is changed from '*Future*' to '*Scheduled Future*'.
   - When attendance is first posted for the student in the class section, the status is changed from '*Scheduled Future*' to '*Current*'.
   - When a final grade is posted for the student, the status is changed from '*Current*' to '*Complete*'.
   - The 'Current' status can also be changed to '*Leave of Absence*' or '*Dropped*' as required.

   Any Course Status changes are retained and posted to the Audit folder within the Course Status Change Audit tab.

5. Click **Print** to obtain any of following reports about the selected student.

   - Schedule
   - Attendance

- Lesson Status
- Lesson Labels

When you choose the Schedule, the Student Schedule Report Selection Criteria form is displayed. Select **Book Information** or **Book Information with Price Information**. This report provides information about the required textbooks and other reference materials required for the course. Book Information includes the Book Name, ISBN Number, Author, Publisher, Copyright Year, Edition, the Required book flag (Yes or No), and Comment (if configured to be visible on student reports and online). Pricing Information is displayed when the Book Information with Price Info option is selected.

The Student Schedule Report also includes comments that have been entered for individual class sections. These comments are in addition to the comments that can be entered for all student schedules at Setup > Campus Locations > Academic Records Tab.

The Student Schedule Report also includes "Dependent" class sections scheduled for a student. The sort order for the report is student name, term, and day of the week. The report uses grouping that requires this sort order.

6. Click **Print Registration Bill** to print the registration bill. When printed from the schedule, the expected funding is printed for the single term selected. The report reflects the individual student using the registration bill defaults setup for the campus and the single term selected by the user on the student schedule. If the campus default is set up to print expected funding through a particular term, CampusNexus Student uses the term specified by you on the ledger card or schedule folder as the expected funding term.

   Note: If both Summary Registration Bill and Detail Registration Bill were configured in Registration Bill Defaults, a pop-up menu will appear when you click the Print button. If only the Summary option or only the Detail option was configured in the default settings, the Print button caption is **Print Summary Registration Bills** or **Print Detail Registration Bills**, respectively.

7. Click **Update Advise Status** to update the advise status for this student.

8. Click **Remove Waitlist/Res** to remove this student from a wait list or reservation for the selected class. This button is only active if the student is on a wait list or has a reservation for the selected class. See also Campus Academic Records to enable/disable the student wait list option and set up the defaults.

9. The Convert to Audit Course button is used to convert a course to an audit course.

   a. Select the scheduled course and click the **Convert to Audit Course** button.

   b. Enter today's date in the prompt, click **OK** and receive the message to manually adjust the audit refund amount on the student's ledger card. A pending refund is added to the student ledger card.

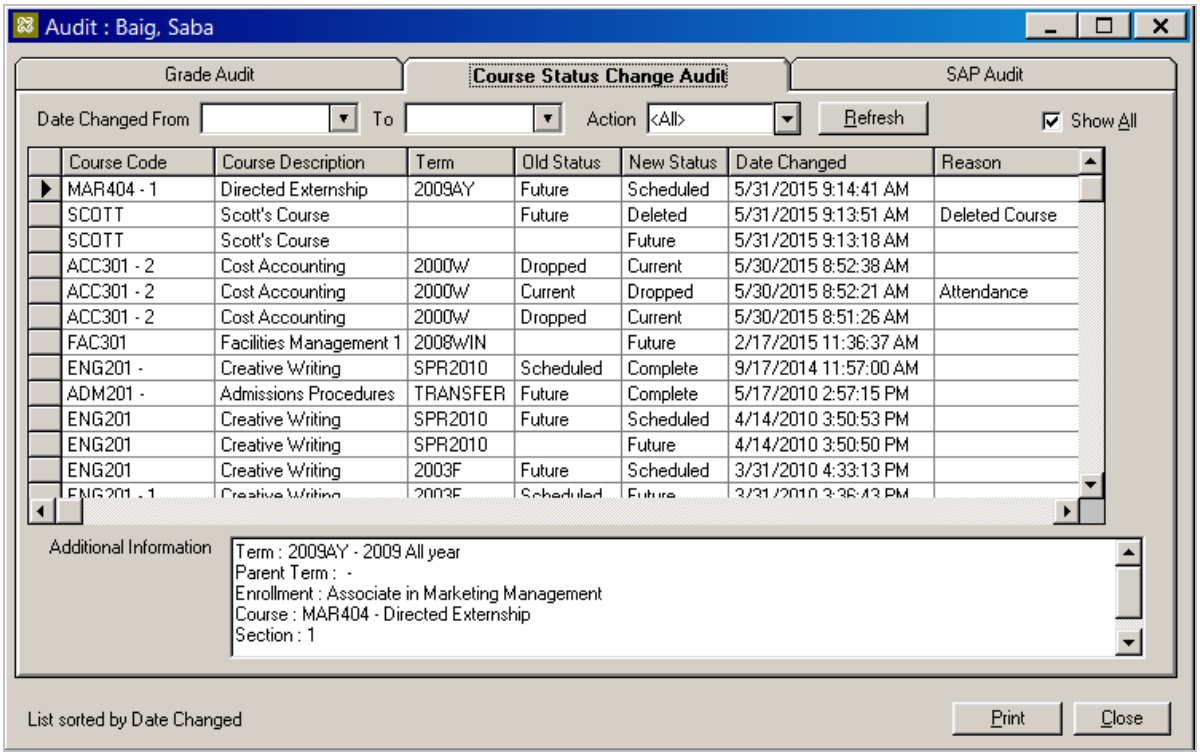
   c. The audit course fee amount is setup under Lists > Academic Records > Courses > Course Fees. If no audit amount exists, then no adjustment is required.

   d. If the auto charge billing method is used, the adjustment should also be generated automatically.

   Note: If student registration lock configuration has been enabled, upon clicking **Convert to Audit Course**, the Registration Locks will be evaluated.

10. Click **Term Sequence** to view the Student's Term Sequence in a grid. The Term Sequence specific to the student chosen is displayed. The grid is populated with the courses that the student has taken in the term that they were taken. See also Term Sequencing for additional information.

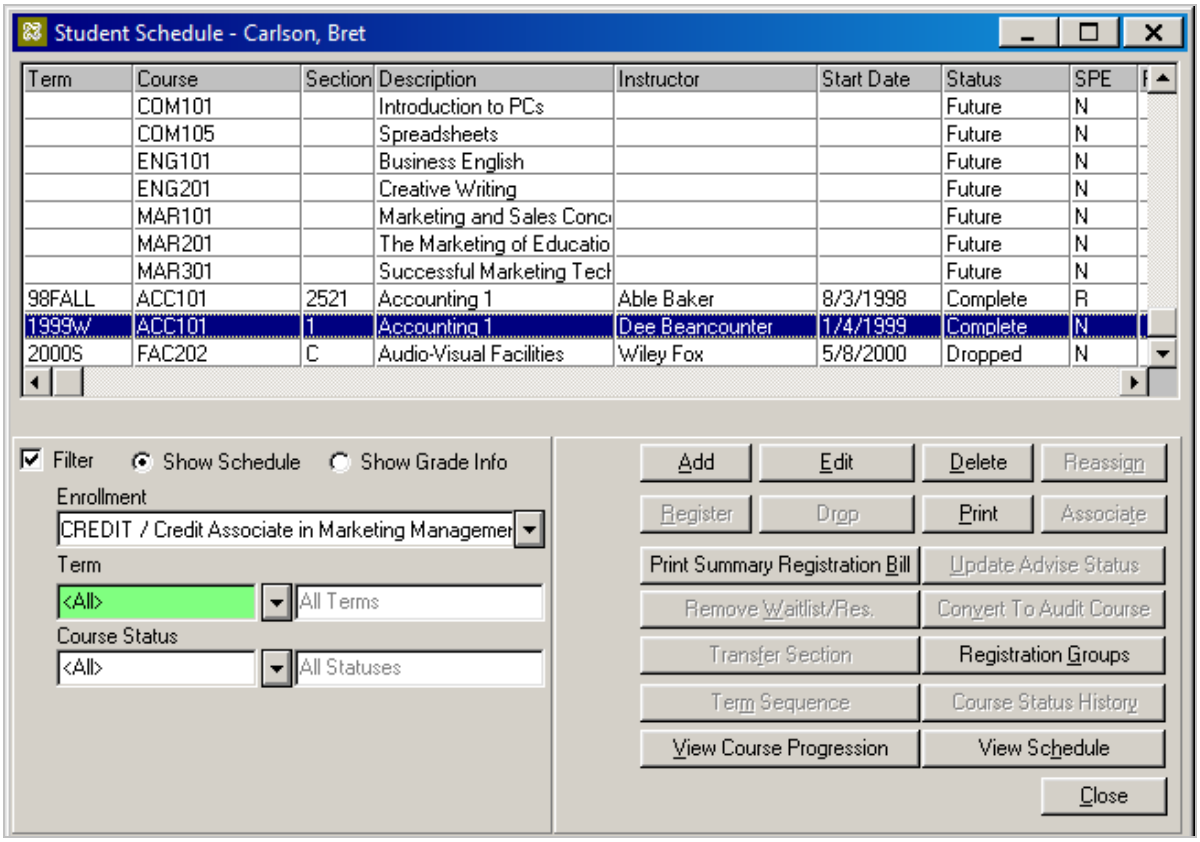
11. Click **Course Status History** to access a student's Audit folder.



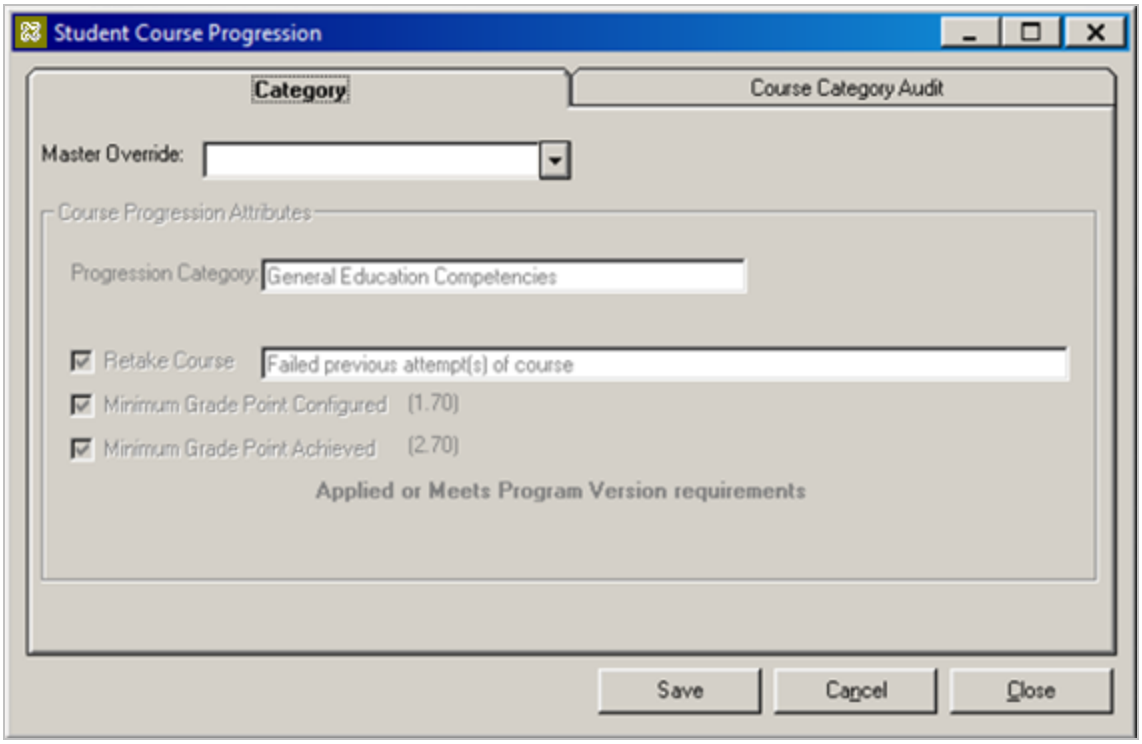
12. Click **View Schedule** and select **Weekly** or **Monthly**. If you select Weekly, the Class Schedule (Week n) form is displayed. If you select Monthly, the Class Schedule Calendar is displayed.

13. The **View Course Progression** button is enabled for enrollments that use a non-term Academic Calendar. Institutions using the SPE and CEFP reference an audit that logs category changes for a course, which establishes an audit trail that tracks a course from its origination to its resultant current category. Confirmation of this audit trail occurs in an audit form that shows the date when a category change took place for a course. For example, a category change occurs when a course does not meet a configured minimum grade point, and a user uses the DPA to fulfill a requirement in another category.

    This form also displays the category of a course that is manually added to the schedule and automatically associated with a category requirement by the use of the Equivalency configuration prior to a fulfillment record being created in the DPA.



Select a course and click **View Course Progression** to view the reason why CampusNexus Student assigned the value in the SPE field. The Student Course Progression form is displayed.

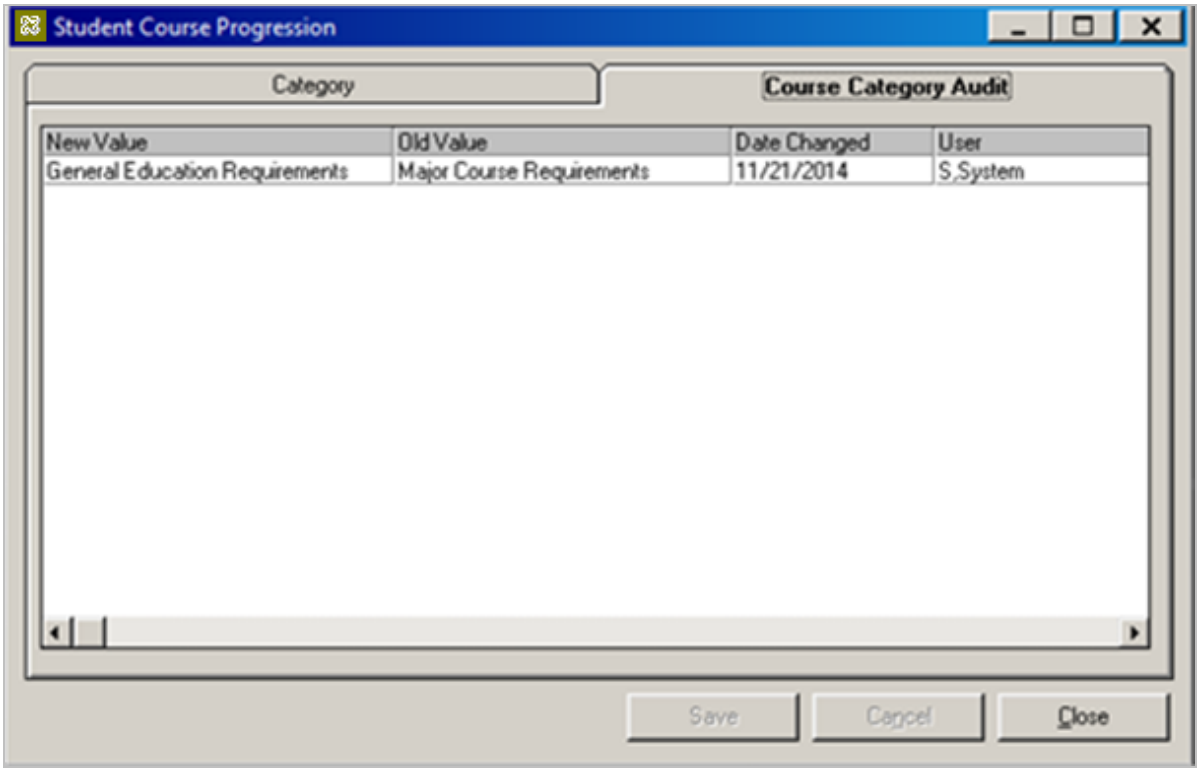


The Category tab of the Student Course Progression contains the following fields:

Field Descriptions: Category Tab

Field	Description
Master Override	This field is enabled for users who have permission to "Override SPE progression" on their staff user ID. The options are: • **Blank**: System attributes determine how the course is used. • **Always include in progression**: Regardless of system attributes, this setting forces CampusNexus Student to always progress the student for the course credits or hours and weeks. • **Always exclude from progression**: Regardless of system attributes, this setting forces CampusNexus Student to never progress the student for the course credits or hours and weeks.
Progression Category	This field displays the current category where the course is being used for progression. It is patterned to follow the courses categories in the DPA.
Retake Course	This field displays the retake status of the course if a retake exists. A retake for a better grade typically does not progress a student; however, a retake for a passing grade would progress a student.
Minimum Grade Point Configured	This field displays the minimum grade point configured for the course on the Program Version course list.
Minimum Grade Point Achieved	This field displays the grade point achieved once the course receives a final grade.

The Course Category Audit tab captures a category change, the date the change occurred, and the user who performed the change for which category the course should be associated.



14. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Student Schedule form.
15. Click **Close** to close the form.

Adding a Course

Use the Add Course wizard to add a course to a student's schedule. The student must take the course at some time in the future as determined by the term and academic year. The course status is set as "Future" until the student is registered in a class section. See also Course List.

Note: The process of enrolling a student in a program version automatically adds all the required and elective courses to the student's schedule. This procedure should only be necessary for adding exceptions to the normal program version course list.

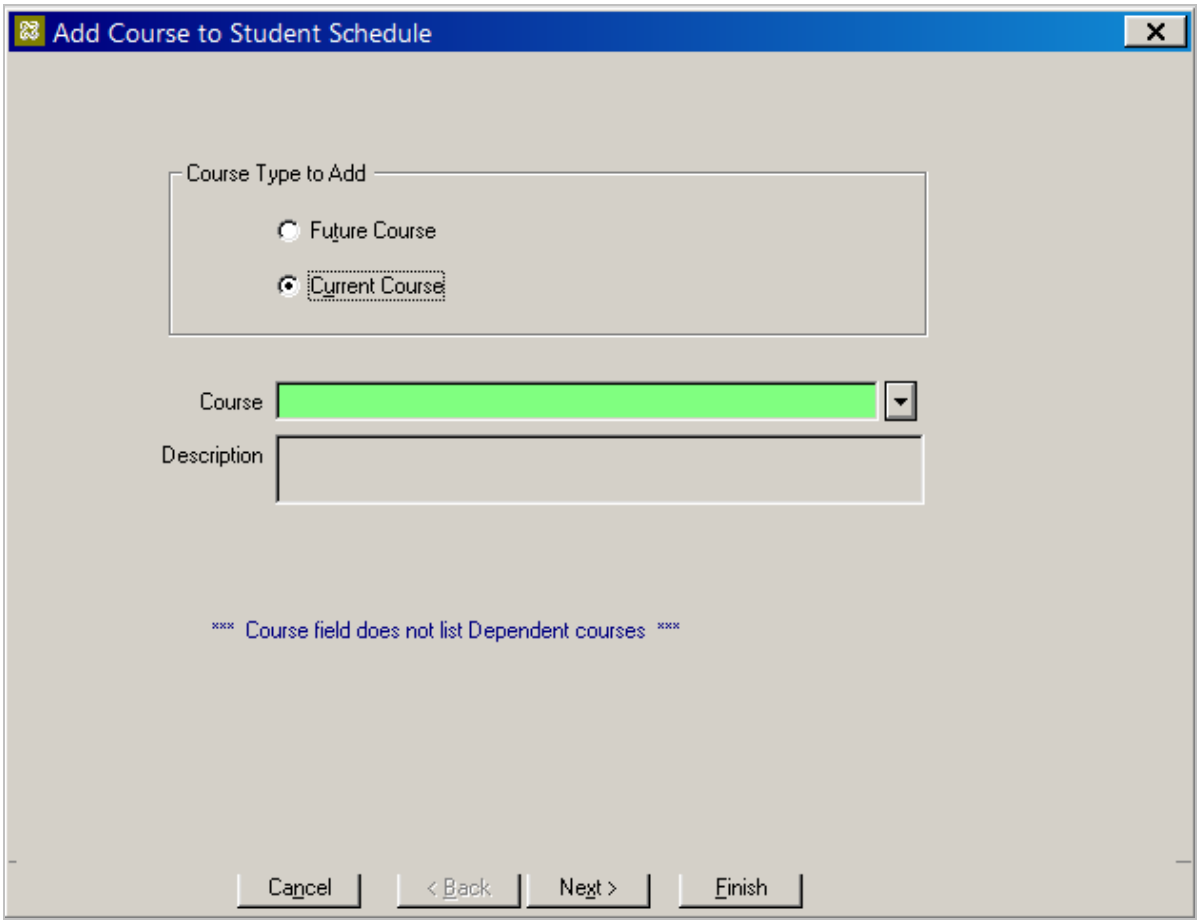
To add a course to a student's schedule:

1. Select a student.
2. Navigate to **View** > **Academic Records** > **Schedule**. The Student Schedule form is displayed.
3. Filter the list of courses by selecting the **Enrollment**, **Term**, and **Status**.
4. Click **Add** to add a new class section. The Add Course to Student Schedule wizard is displayed.

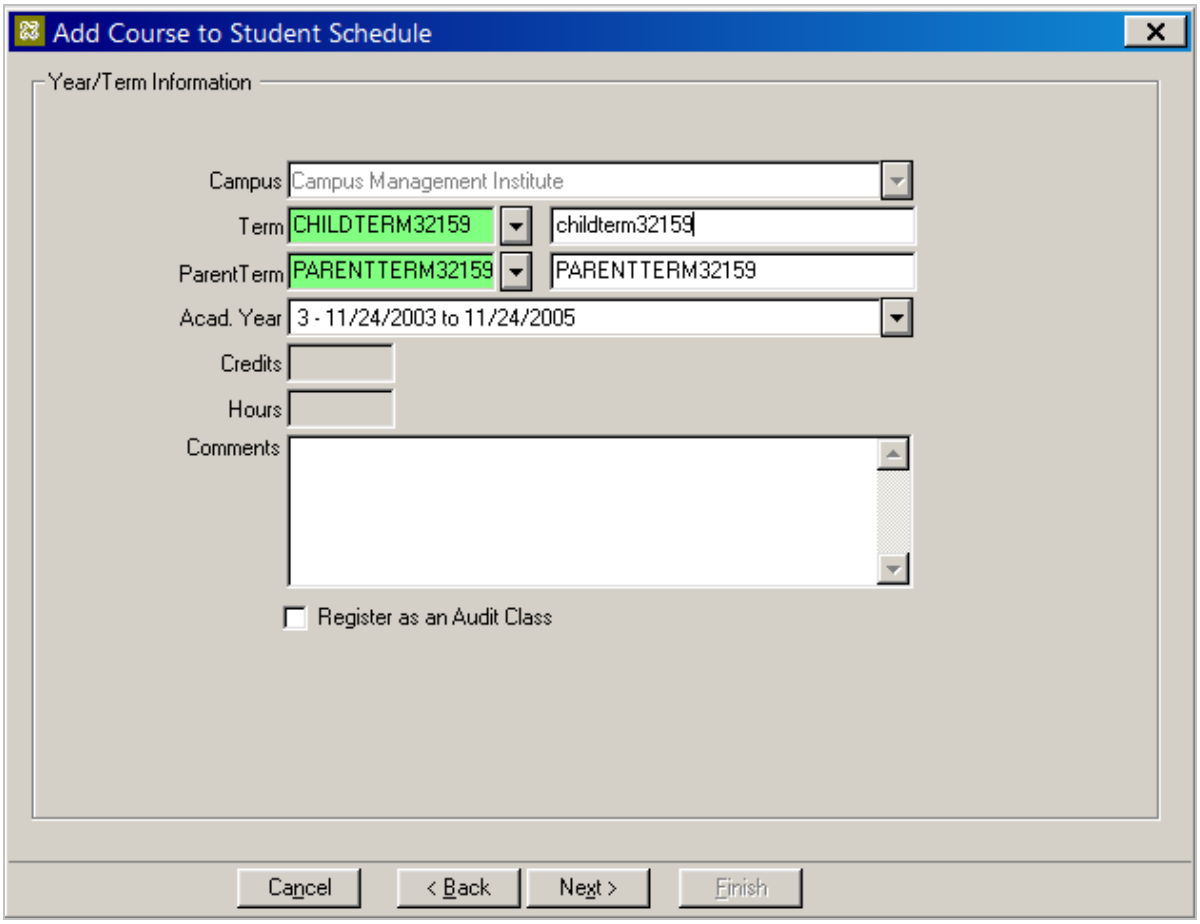
   When you click Add, CampusNexus Student checks if the student:

   - Is currently enrolled in the selected course for the selected term.
   - Has completed the selected course for the selected term.

   If so, then you are attempting to schedule or register a student in overlapping terms. As a result, CampusNexus Student displays an informational message.

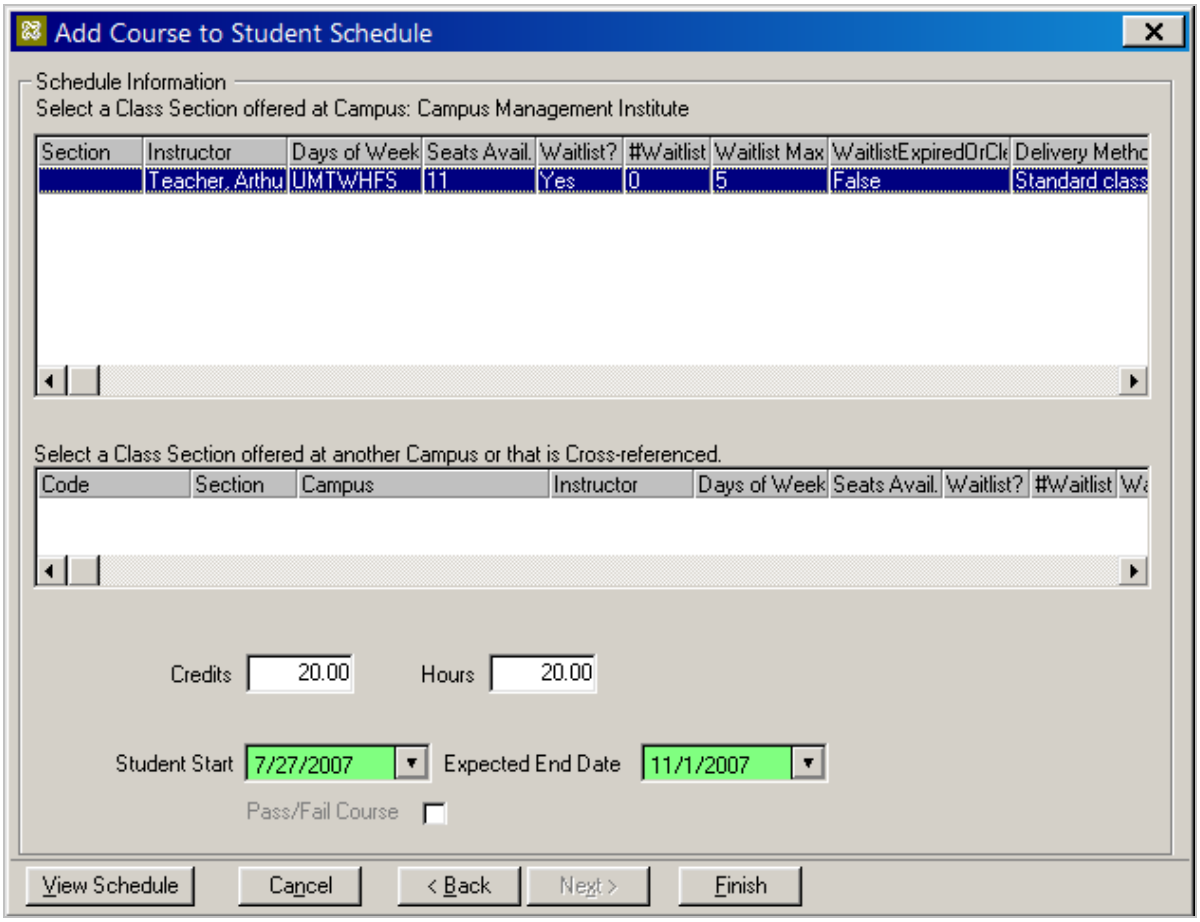


5. Select **Future Course** or **Current Course**.
6. Select the **Course**.
7. Click **Next**. Page 2 of the wizard is displayed.



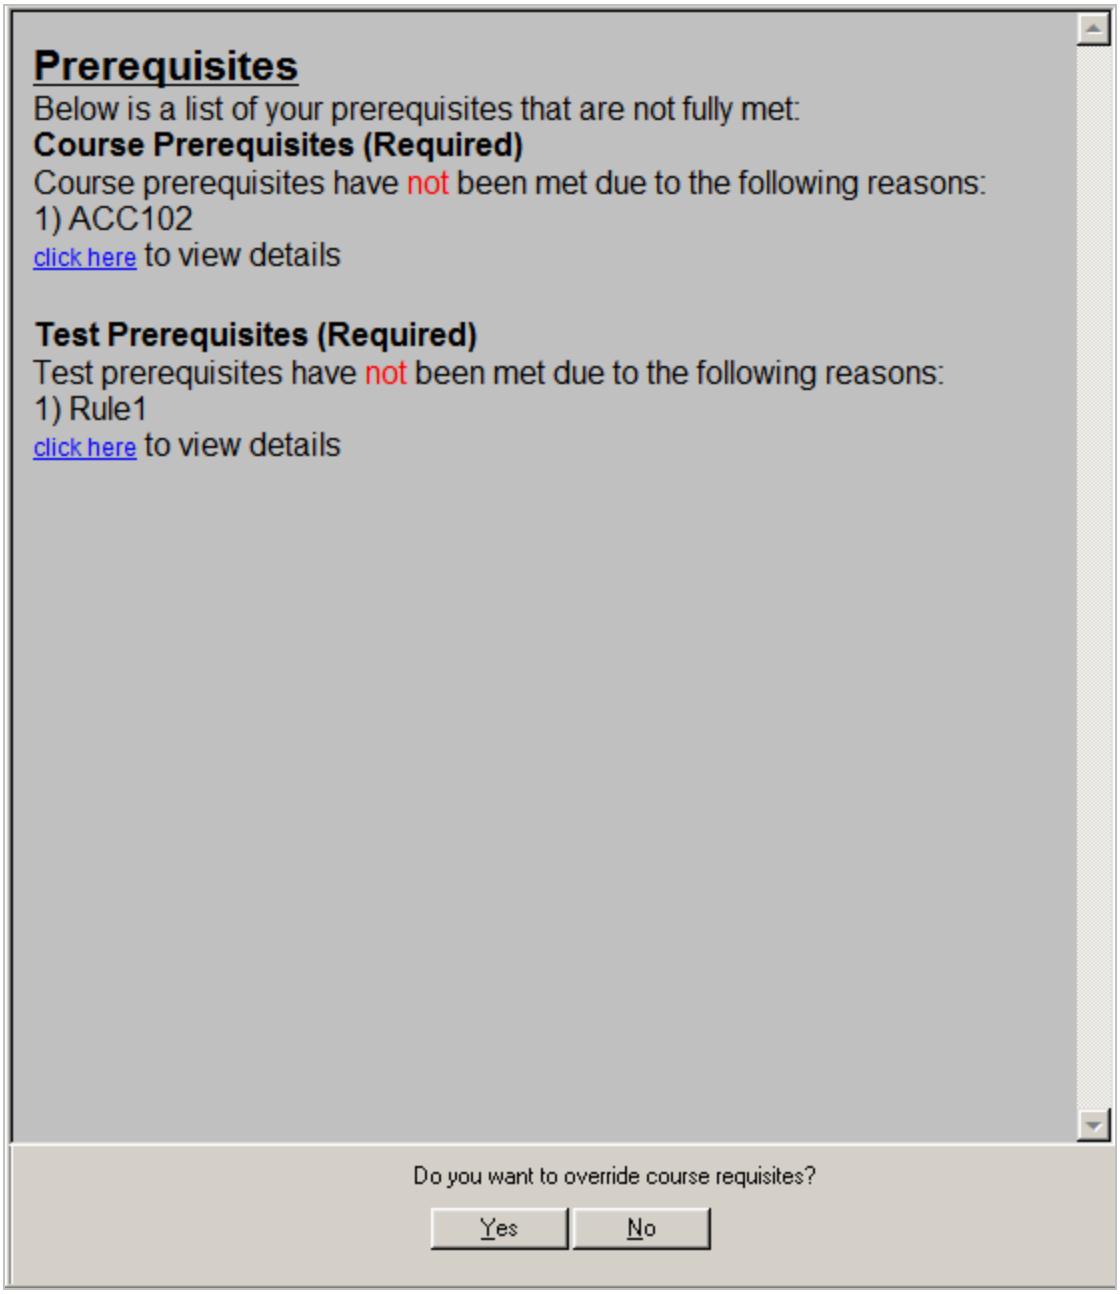
8. If necessary, select the **Campus**.
9. Select the **Term**.

   If the campus uses Term Relationships, the **Parent Term** is enabled and may be selected. In this case, the Term selected will represent the **Child Term** associated with the Parent Term .
10. If necessary, select the **Academic Year**.
11. If the course is configured as a variable credit course (i.e., 'Allow Override' is selected on the Courses Code Setup form), you can change the **Credits** and **Hours** values.
12. Enter any comments in the **Comment** field.
13. If applicable, select **Register as an Audit Class**.
14. Click **Next**. Page 3 of the wizard is displayed.



15. The Schedule Information is displayed for selection.
16. Select the **Student Start** date.
17. Select the **Expected End Date**.
18. The **Pass/Fail Course**check box is enabled and available for selection when the Course Section's pass/fail flag is set to the "Student's Choice" option. The check box will appear in a 'selected disabled' state when the pass/fail flag has been set to "Pass/Fail (Required)", indicating that the course will be graded on a pass/fail basis only. The check box will not appear when the pass/fail flag has been set to "Non-Pass/Fail" indicating that letter grades will be issued for the course. SeeCourse Code Setup for information regarding the pass/fail flag options.
19. Click View Schedule to view the course schedule on a weekly or monthly basis.
20. Continue adding class sections as necessary by selecting them from the list, until the student's schedule is completed.

    Note: If the program version for the student's enrollment uses a billing method with a frequency of Payment Period and there is no matching payment period, the course will not be billed. The following message is displayed: *"There is no matching payment period for the class section being registered. This course will not be billed."*
21. Click **Finish**. CampusNexus Student adds the course and closes the wizard. The program version, catalog, and area of study will be considered when adding the course. (If you don't immediately see the course on the student's schedule, press **F5** to refresh the course list.)
22. If prerequisites need to be satisfied for the added course, a message similar to the following is displayed:



To override the prerequisites, click **Yes**.

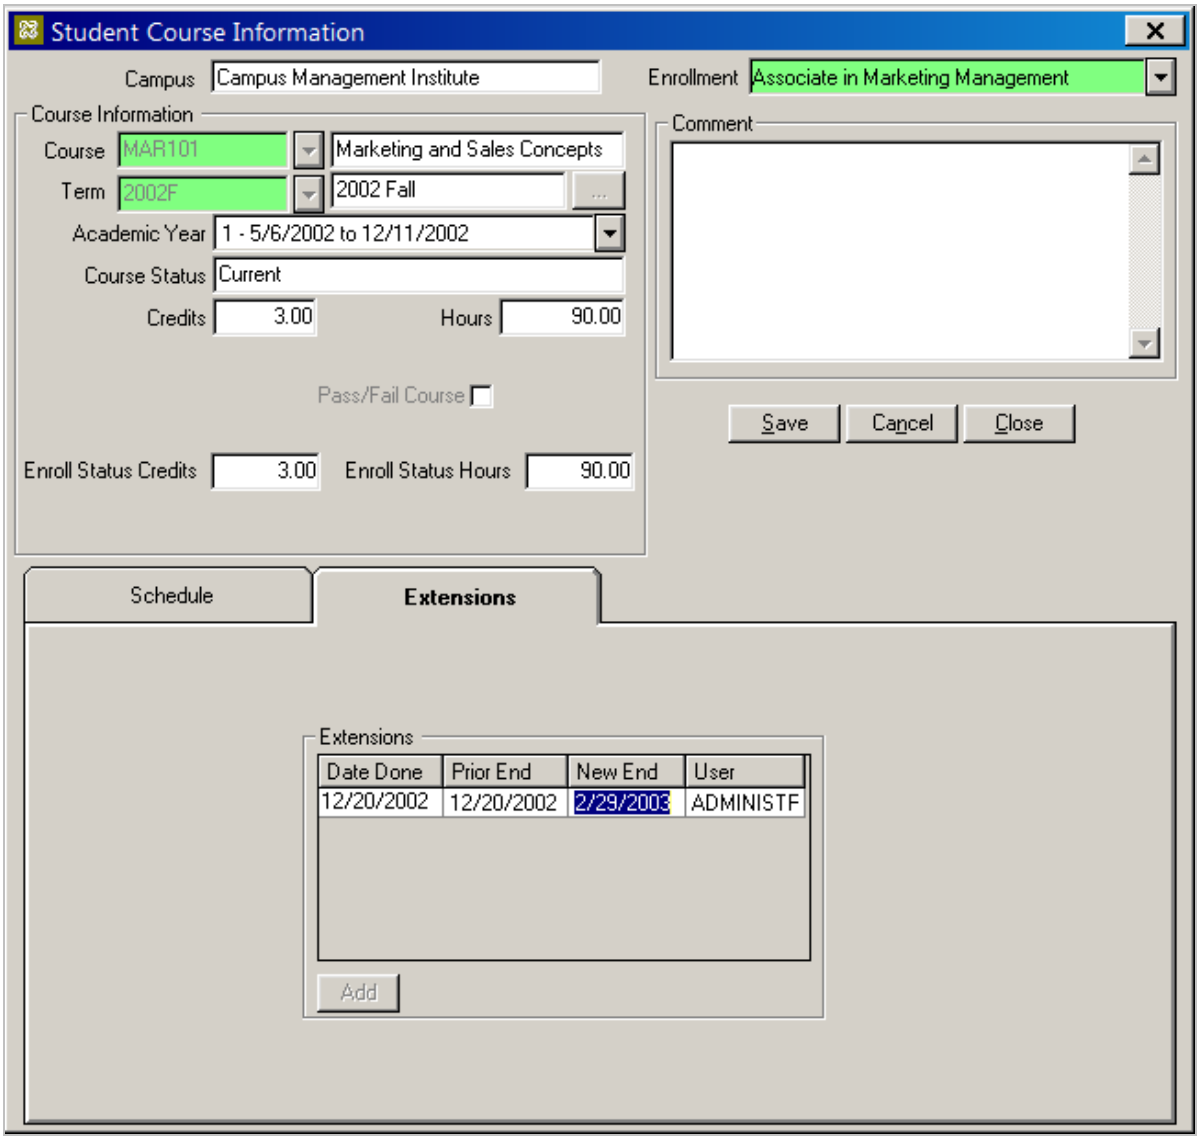
Adding Course Extensions

An institution may grant a student an extension of time for course completion. In CampusNexus Student, this extension is recorded in the student's schedule. You can only extend courses in which the student is currently registered.

A maximum number of allowed extensions can be set up for courses in a given program version under Lists > Academic Records > Programs > Program Versions > Distance Education.

To add an extension to a student's scheduled course (class section):

1. Select a student.
2. Navigate to **View** > **Academic Records** > **Schedule**. The Student Schedule form is displayed.
3. Filter the list of courses by selecting the **Enrollment**, **Term**, and **Status**.
4. Select the course to be extended and click **Edit**. The Student Course Information form is displayed.
5. On the Extensions tab, click **Add**. The Date Done, Prior End, and User fields are filled in by CampusNexus Student.
6. Enter the **New End** date of the course in mm/dd/yy format.



7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To set up an automatic charge for a course extension:

An automatic charge can be set up to be posted to the students ledger card when a course extension is granted.

1. Navigate to **Lists > Student Accounts >** Billing Method. Select **Programs**.
2. Set the Billing Method for the Program Version to **Course**.
3. Navigate to **Lists > Student Accounts >** Programs. The program version must have the Transaction Code **EXTCRSE** as one of its charges with the amount to be charged for an extension.

   The transaction code **EXTLSN** is set up with an amount to be charged for each lesson, exam, or book report that has not been received when the extension is granted.
4. Clear the "one time" indicator on these charges when they are set up. See Transaction Codes.

The total charge to a student when a course is extended is the Course Extension Charge (EXTCRSE) plus the Lesson Extension Charge (EXTLSN) times the number of lessons, exams, and book reports not yet received.

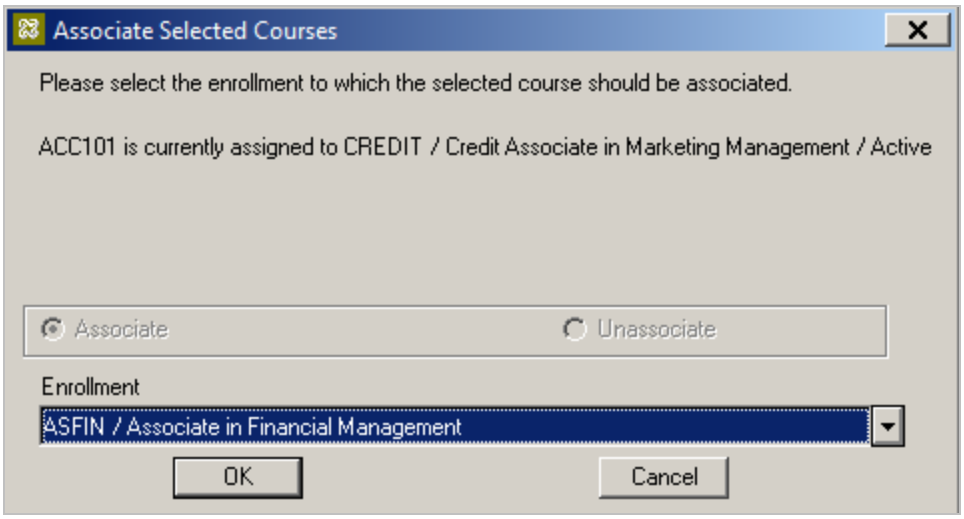
Associate or Unassociate Courses

Use this function to allow staff members to associate completed or dropped courses with other enrollments. This function assumes that the selected student has more than one previously established enrollment. Associating or unassociating courses is different than transferring an enrollment to another enrollment.

To associate completed or dropped courses with other enrollments:

This feature allows staff members to associate completed or dropped courses with other enrollments. The Associate button toggles between Associate and Unassociate.

1. Select a student.
2. Make sure that the target enrollment is set up. See **View > Academic Records > Enrollment**.
3. Navigate to **View > Academic Records > Schedule**. The Student Schedule form is displayed.
4. Select one or more courses. To select more than one course, hold down the **Ctrl** key while clicking on each course to be associated. Only Completed and Dropped courses may be associated.
5. Click **Associate**. The Associate Selected Courses form is displayed.



6. Select the **Associate** option.

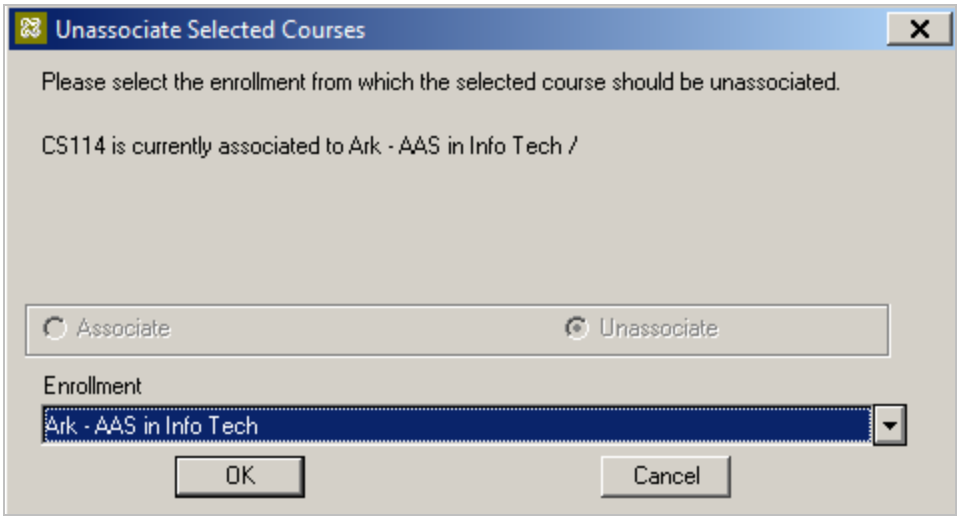
   Note: The Associate and Unassociate options can be available at the same time when the selected course is associated with at least one enrollment, yet enrollments exist to which the course can still be associated. CampusNexus Student displays Associate Selected Courses or Unassociate Selected Courses in the header depending on the radio button selected.
7. From the Enrollment list, select the **Enrollment** to which the selected courses will be associated. When associating a course, enrollments that are already associated with the selected course will not appear in the Enrollment list.
8. Click **OK** to process the association of courses.
9. A confirmation message is displayed. Click **OK**. You are returned to the student's Schedule form.
10. On the Schedule form, verify the data in the **Associated Enrollments** column. The Enrollment column reflects the

original enrollment, while the associated enrollments are displayed in the Associated Enrollments column for the selected courses.

To unassociate courses from an enrollment:

The Unassociate button is enabled for courses that have already been associated with all available enrollments. The button toggles between Unassociate and Associate.

1. Select a student.
2. Make sure that the target enrollment is set up. See **View > Academic Records > Enrollment**.
3. Navigate to **View > Academic Records > Schedule**. The student's Schedule form is displayed.
4. Select one or more courses. To select more than one course, hold down the **Ctrl** key while clicking on each course to be associated. Only Completed and Dropped courses may be unassociated.
5. Click **Unassociate**. The Unassociate Selected Courses form is displayed.



6. Select the **Unassociate** option.
7. From the Enrollment list, select the **Enrollment** from which the selected courses will be unassociated.
8. Click **OK** to process the unassociation of courses.
9. A confirmation message is displayed. Click **OK**. You are returned to the student's Schedule form.
10. Verify that the **Associated Enrollments** column is empty on the student's Schedule form.

Deleting a Course

It may become necessary to delete a course from a student's schedule if it was added in error. This can only be done before the student has been assigned to a class section for the course. The status of the scheduled course must be **Future**.

A course can be deleted from the system when the course is in **Scheduled** status, but this practice is not recommended. Instead, the course should be unregistered before being deleted.

Once the student has been assigned to a class section for a course, the status is changed to **Current**. In this case, you can remove the student from the class section by using the one of the following methods:

- Unregister
- Drop
- Final Grade

The option chosen depends on the circumstances.

Note: CampusNexus Student does not allow a course to be unregistered or dropped if it fulfills a prerequisite or corequisite requirement for another course in which the student is registered. A message is displayed containing the prerequisite and corequisite rules applicable to that course. The course may only be unregistered or dropped if:

a. The student is first dropped or unregistered from any courses that had their prerequisite requirements fulfilled by the course for which a drop or unregistration was initially attempted;

b. The user has permissions to override prerequisite and corequisite requirements for Drop/Unreg.

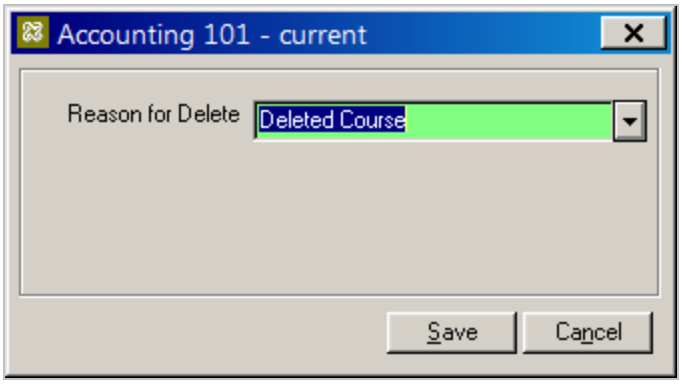
When a course is removed from a student's schedule, by deleting or unregistering, CampusNexus Student recalculates values in the enrollment term summary form. CampusNexus Student recalculates the last date of attendance (LDA).

Any Course Status change is retained and posted to the Audit folder within the Course Status Change Audit tab. The Audit folder may accessed at any time through the Course Status History button on the Student Schedule when it is enabled.

To delete a course from a student's schedule:

1. Select a student.
2. Navigate to **View** > **Academic Records** > **Schedule**. The Student Schedule form is displayed.
3. Filter the list of courses by selecting the **Enrollment**, **Term**, and **Status**.
4. Select the future **Course** to be deleted from the list of scheduled courses.
5. Click **Delete** to permanently remove a class from the student's schedule. If an associated course is selected, the native enrollment will remain.

   Note: If student registration lock configuration has been enabled, upon clicking Delete, the Registration Locks will be evaluated.
6. A confirmation message is displayed. Click **Yes**.
7. Dropping, unregistering, or deleting the student from a course requires a reason for the action. Select a **Reason** for deleting the course from the student's schedule. See Course Reason Code Setup to learn more about setting up reason codes.



8. Click **Save** to continue processing the deletion of the course or **Cancel** to discontinue.

Dropping a Class Section

A class section can be dropped from a student's current class schedule. Dropping a student from a class section implies that the student started the class and elected to drop or was forced to drop the class. You can only drop a student from a class section that the student is currently attending.

When you drop a class section from the student's schedule, CampusNexus Student prompts for the Drop Date and the Grade for the class. The Grade is optional. You can drop a course with a status of **Complete** (the status to which the scheduled class section is changed when a final grade is posted). If the course is required and active, the course is automatically added as a new course back to the student schedule as **Future** status provided that the optional setup is enabled.

Note: CampusNexus Student does not allow a course to be dropped if it fulfills a prerequisite or corequisite requirement for another course in which the student is registered. A message is displayed containing the prerequisite and corequisite rules applicable to that course. The course may only be dropped if:

a. The student is first unregistered or dropped from any course(s) that had their prerequisite requirements fulfilled by the course for which the drop was attempted;

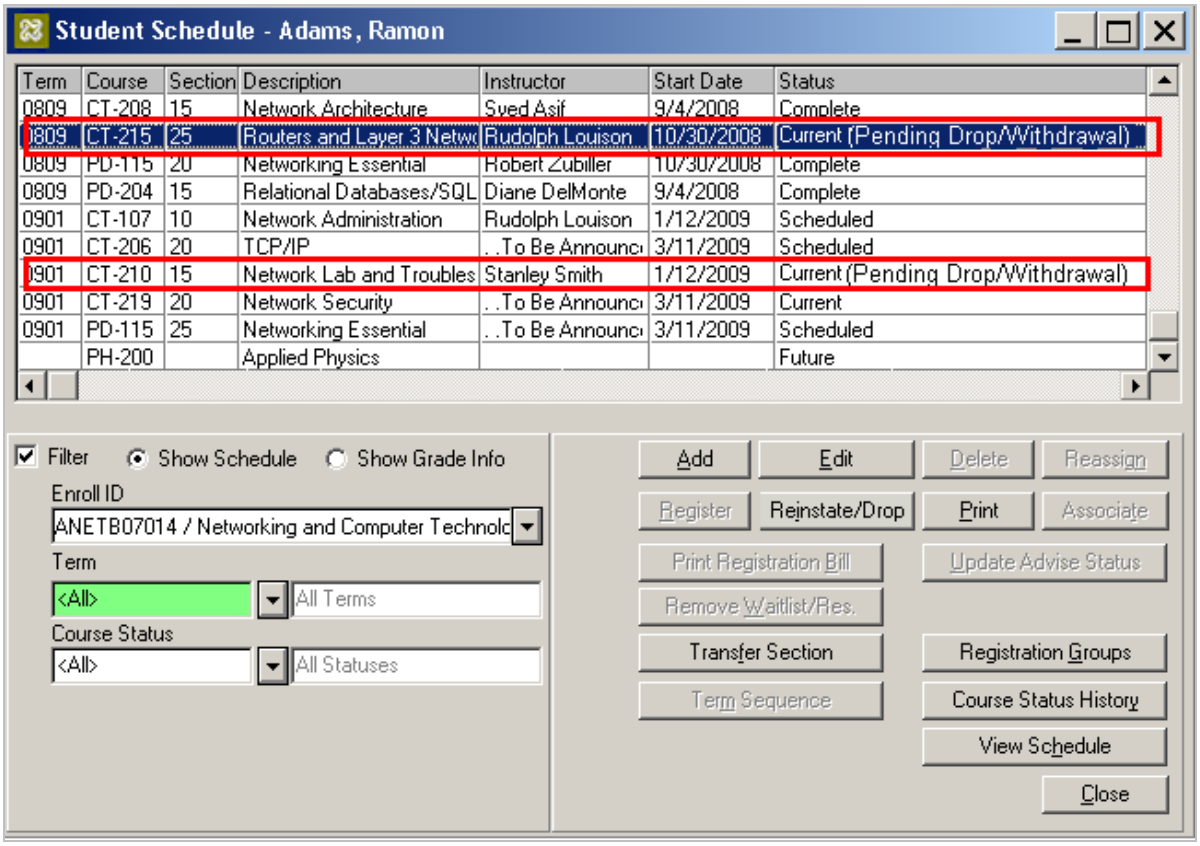
b. The user has permissions to override prerequisite and corequisite requirements for Drop/Unreg.

Any Course Status change is retained and posted to the Audit folder within the Course Status Change Audit tab. The Audit folder may accessed through the Course Status History button on the Student Schedule.

To drop a class section from a student's schedule:

1. Select a student.
2. Navigate to **View > Academic Records > Schedule**. The Student Schedule form is displayed.
3. Filter the list of courses by selecting the **Enrollment**, **Term**, and **Status**.
4. Select the **Course** and **Section** to be dropped.
5. Click **Drop** to drop the selected class from the student's schedule.

   If a student submits a course drop request through Portal, that request can be approved or cancelled through CampusNexus Student by using the Reinstate/Drop function. When a student submits a pending withdraw request, the course status will be appended with 'Drop/Withdrawal Pending'. If a course status is 'Scheduled (Drop/Withdrawal Pending)' or 'Current (Drop/Withdrawal Pending)', the staff member can drop or cancel the drop request. For this, the Drop button will change to **Reinstate/Drop**.

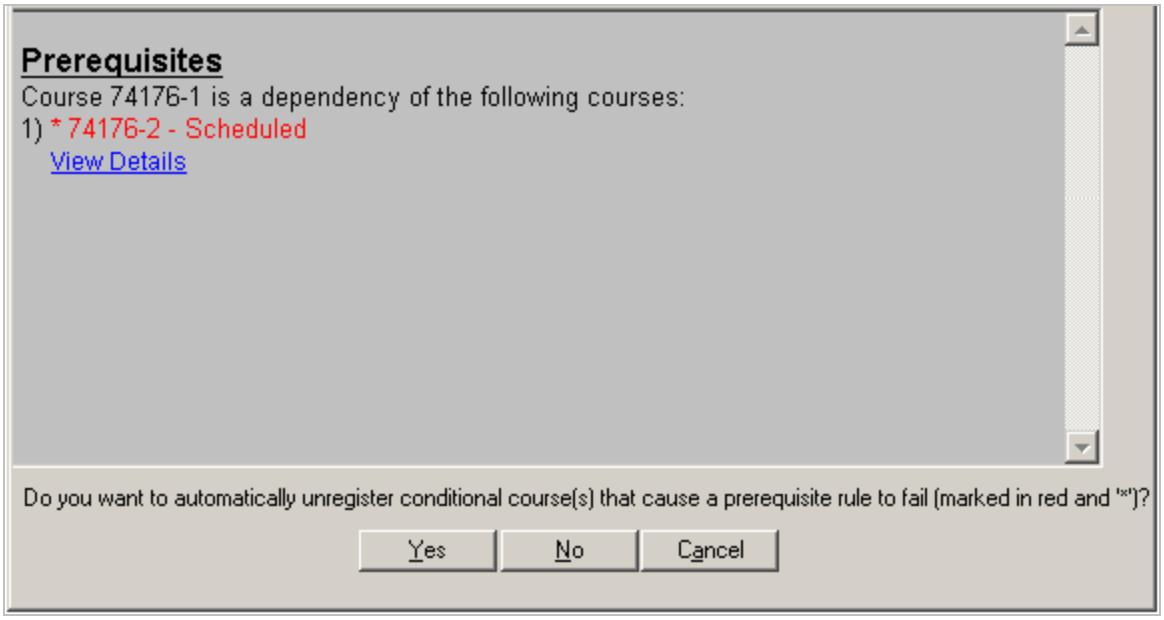


Note: If student registration lock configuration has been enabled, upon clicking Drop, the Registration Locks will be evaluated.

CampusNexus Student checks if the course to be dropped fulfills prerequisite or corequisite requirements for any other courses. If the course to be dropped fulfills a prerequisite or corequisite requirement, a message indicates the prerequisite and/or corequisite rules that would be broken if the course was dropped.

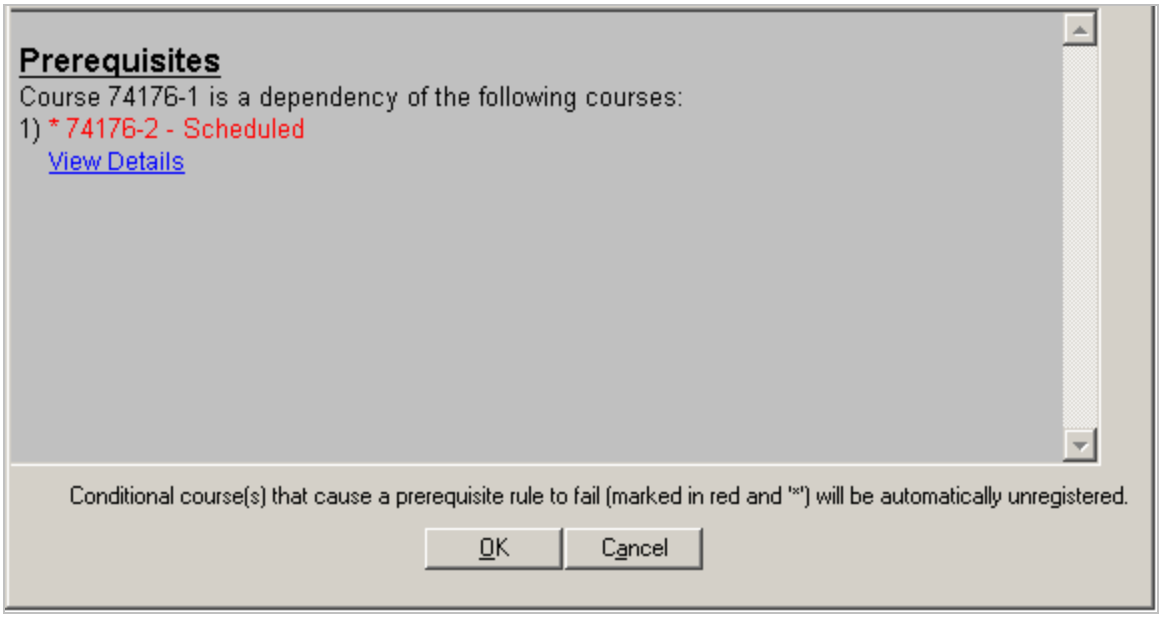
If campus is configured for automatic unregistration of conditional courses:

If you have permission to override prerequisite and corequisite rules for Drop/Unreg, the following message is displayed:



- If you click **Yes**, the conditional course(s) will be unregistered and the prerequisite course will be dropped.
- If you click **No**, only the prerequisite course will be dropped.
- If you click **Cancel**, the action will be cancelled and no course(s) will be dropped/unregistered.

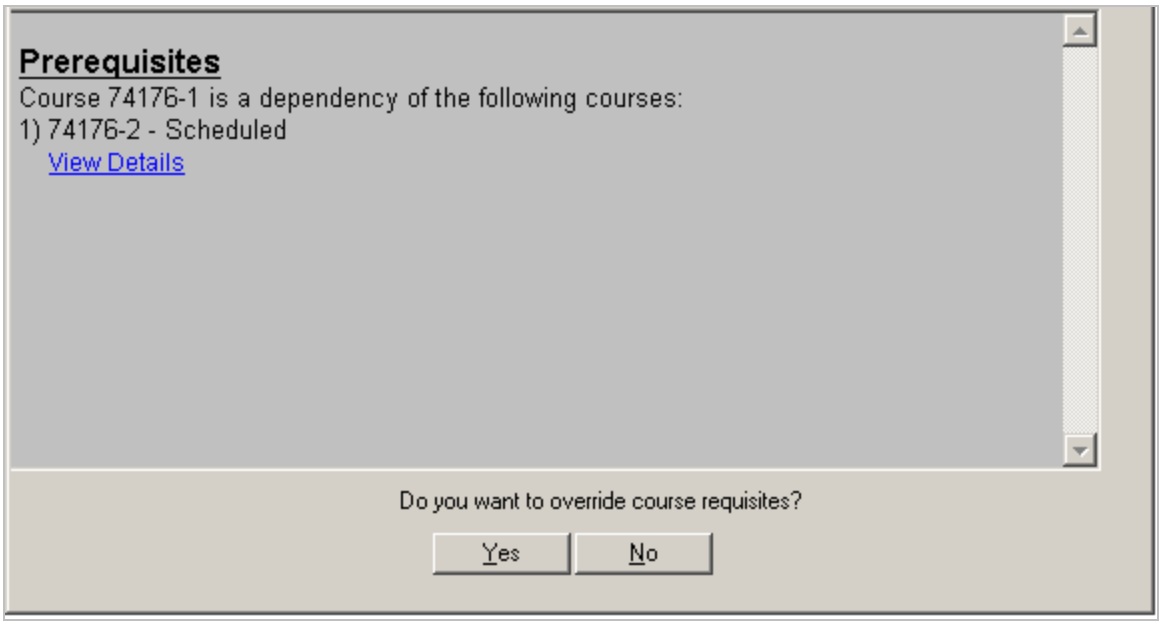
If you do not have permission to override the prerequisite and corequisite rules, the following message is displayed:



- If you click **OK**, the conditional course(s) will be unregistered and the prerequisite course will be dropped.
- If you click **Cancel**, the action will be cancelled and no course(s) will be dropped/unregistered.

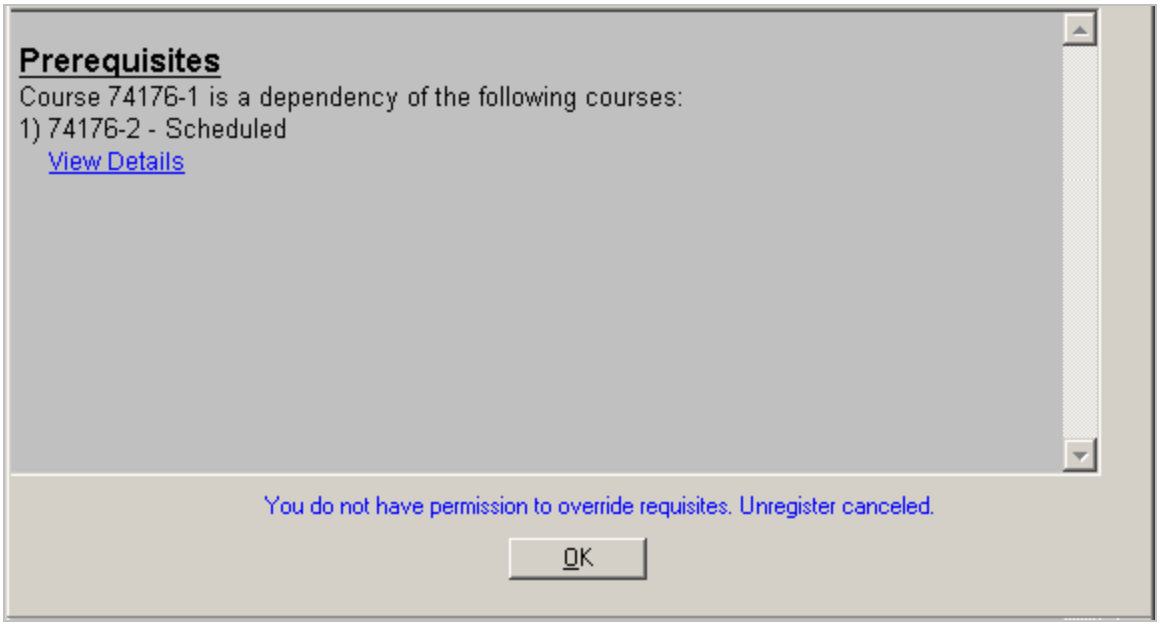
If campus is not configured for automatic unregistration:

If you have permission to override prerequisite and corequisite rules for Drop/Unreg, the following message is displayed:



- If you click **Yes**, the prerequisite course will be dropped, but the conditional course(s) will not be unregistered.
- If you click **No**, the process will terminate.

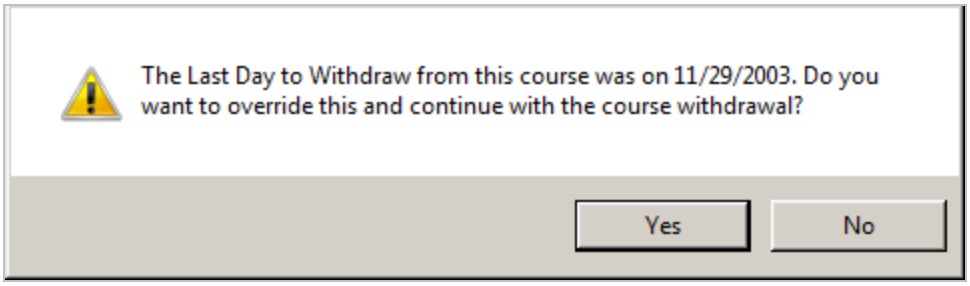
If you do not have permission to override the prerequisite and corequisite rules, the following message is displayed:



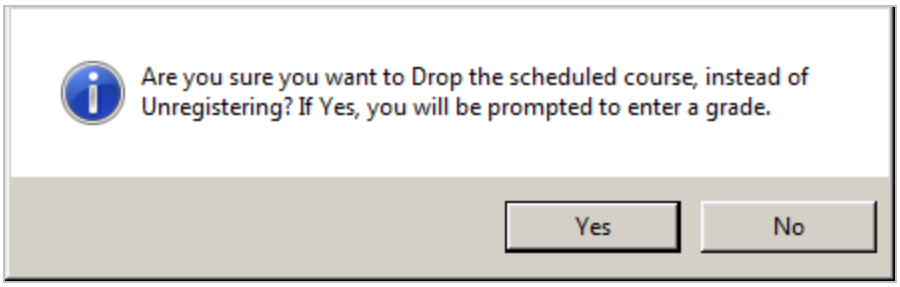
- When you click **OK**, the process terminates.

If the Enforce Last Day to Withdraw feature is configured for a course section's campus (Setup > Campus Locations > Edit/Add > Academic Records (tab) > General (tab)), CampusNexus Student verifies that users who do not have override privileges for Last Day to Withdraw, cannot withdraw a student from a course section that is in scheduled, current or LOA status if it is after the LDW date set on the class section. A message is displayed stating that the student can no longer be withdrawn.

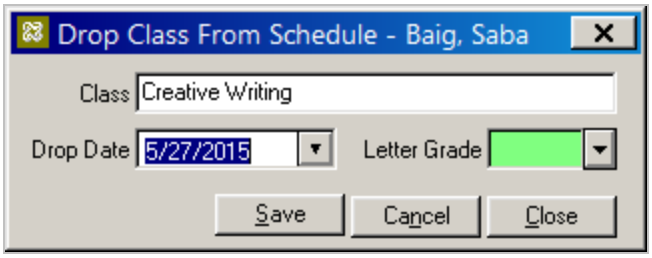
If a user who has override privileges tries to drop a course for which LDW date has already passed, a message similar to the following is displayed:



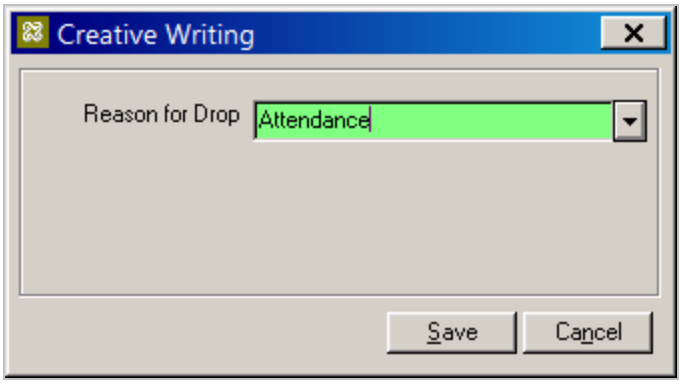
6. A confirmation message is displayed. Click **Yes**.



7. In the Drop Class From Schedule form, verify that the correct class is displayed, select the **Drop Date**, and enter a **Letter Grade**.



8. Click **Save**. The status of the class section on the student's schedule is changed to **Dropped** and the date and the default grade (if set up in Grade Scale) is listed in the **Letter Grade** field. You can select a different drop grade.
    - If the course is required and active, the course is automatically added as a new course back to the student schedule in **Future** status.
    - If the course is inactive, but an equivalent course is active, the equivalent course is automatically added to the student's future course requirements.
    - If the student has exceeded the maximum repeats for the course, it will not be added to the student's future course requirements.
9. Select a **Reason for Drop**. See Course Reason Code Setup for additional information.



10. Click **Save** to continue or **Cancel** to exit.

Reinstating a student's course

Once a class section has been dropped, if you select the class section on the student's schedule again, the button that was formerly labeled **Drop** changes to **Reinstate**. If you click **Reinstate**, the student will be reinstated in the previously dropped class section, the course status reverts back to previous status, and posted grades for this course are removed. A confirmation message is displayed. Click **Yes**. For more information, see Reinstate Course.

Editing a Course

When a student is enrolled in a program version, the list of required and elective courses associated with the program version is copied into the student's enrollment record. You can edit the courses on the student's schedule using this procedure. See also Course List.

Notes:

- When editing a course that is on a student's schedule, you can change the Enroll Status Credits and/or Enroll Status Hours values.
- If the course is configured to allow it (i.e., the 'Allow Override' is selected on the Courses Code Setup form), you can change the Credits and/or Hours values.
- If changes are made on a course that is in a status other than Future, the configured registration locks could be affected. Registration Locks are evaluated upon saving the changes to determine if a lock is in place that should prevent the changes from taking place. If the change cannot take place due to a registration lock, the process is canceled and a message is displayed.

To edit a course on a student's schedule:

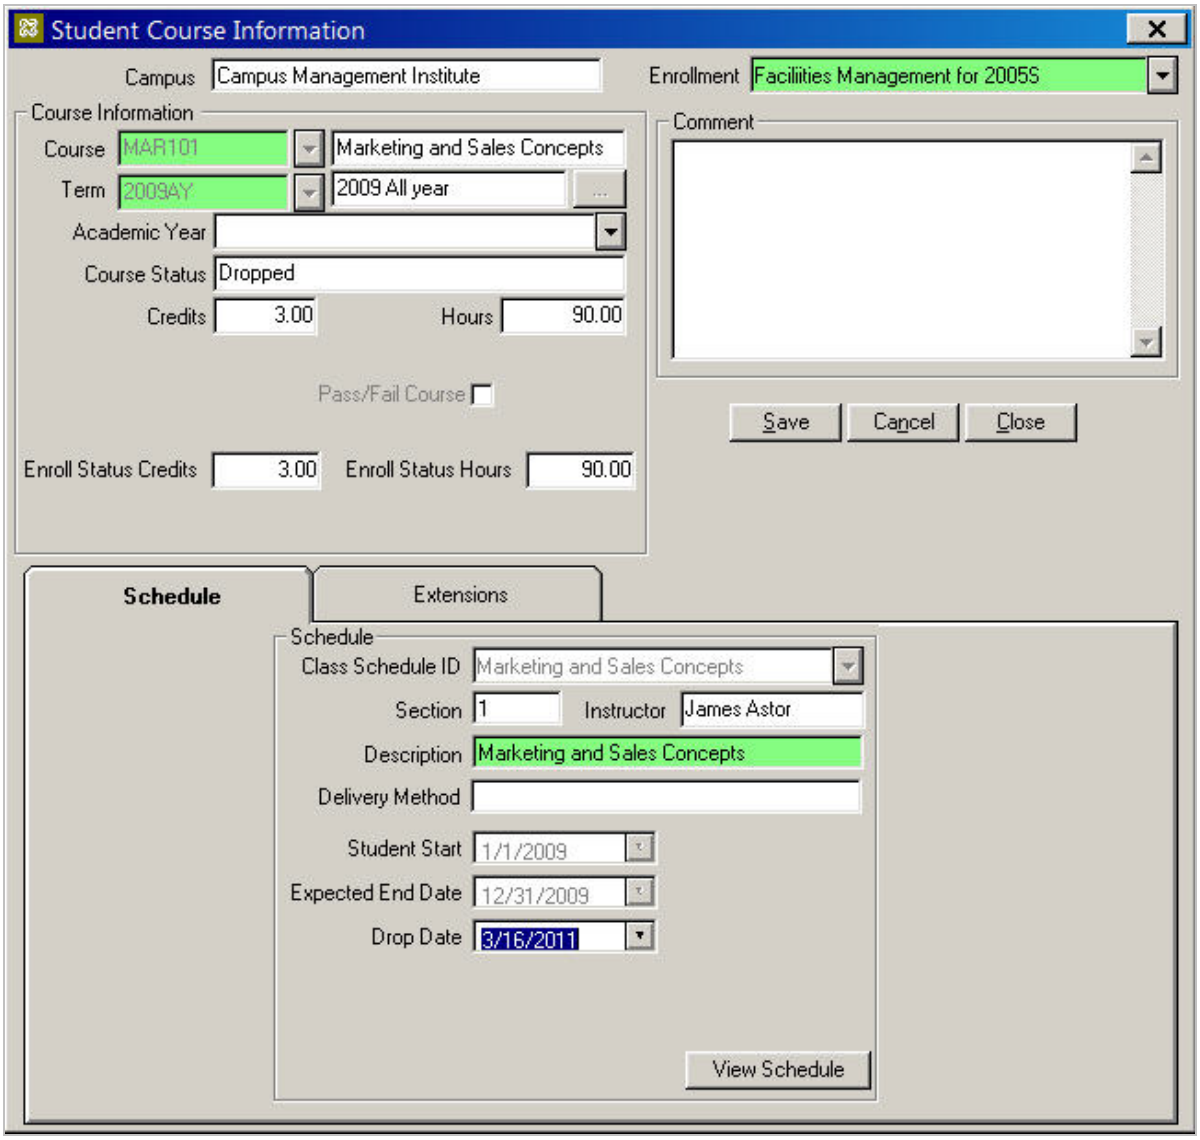
1. Select a student.
2. Navigate to **View** > **Academic Records** > **Schedule**. The Student Schedule form is displayed.
3. Filter the list of courses by selecting the **Enrollment**, **Term**, and **Status**.
4. Select a course to be edited.
5. Click **Edit**. The Student Course Information form is displayed.

   When you click Edit, CampusNexus Student checks if the student:

   - Is currently enrolled in the selected course for the selected term.
   - Has completed the selected course for the selected term.

   If so, then you are attempting to schedule or register a student in overlapping terms. As a result, CampusNexus Student displays an informational message.

   Note: For associated courses, the Edit button will only be available for the enrollment where the course was completed, otherwise the button will be disabled.



6. Select an **Enrollment** to transfer a student from one program version to another.
7. Select the **Course** to be included on the student's schedule. The program version, catalog, and area of study are considered when editing the course.
8. Review the data displayed in the **Course**, **Term**, **Academic Year**, and **Status** fields.

   The status will be Future if a class section has not been selected. The status will be Current if a class section has been selected.

   Student's status in the class section:

   - **C** = Currently attending
   - **D**= Dropped
   - **F** = Future start
   - **L** = Leave of Absence
   - **P** = comPlete
   - **S** = Scheduled future
9. The **Enroll Status Credits** and **Enroll Status Hours** fields display the credits and hours that CampusNexus

Student uses to calculate enrollment status for financial aid purposes.

If the class is in future status, the values are copied from the Course setup. If the student has already been scheduled, the values are copied from the Class Schedule.

You can edit these fields by entering the number of credits or hours if you need to force CampusNexus Student to calculate an enrollment status for financial aid purposes that may be different than the actual academic credits or hours that a student has enrolled in (for instance, if a student is enrolled in a non-academic credit graduate level internship or remedial skills class required by an academic program).

Note: If the Enroll Status Credits and/or Enroll Status Hours for a course were modified while the course had a status of 'Future' and then the student registers in to the course, the Enroll Status Credits and/or Enroll Status Hours fields will be overwritten with the values from the Class Schedule.

10. The **Outside Coursework Hours** and the **Total FA Hours** fields are only visible when the Clock to Credit option is ON for the enrolled program version.
    - When CEFP Configuration is ON, the Total FA Hours = Outside Coursework Hours + Enroll Status Hours.
    - When CEFP Configuration is OFF, the Total FA Hours = Outside Coursework Hours + Earned Hours when the final grade was posted, otherwise Schedule Hours.
11. In the Schedule section of the form, select the **Class Schedule ID** that represents the class section in which the student is registered. The **Section**, **Teacher** (Instructor), Course **Description**, and **Delivery Method** are displayed. The **Student Start Date** and **Expected End Date** for the selected class section is displayed.
12. If the student has a Billing Method that is configured to use Fee Schedules and the course being edited has one or more Fee Schedules associated with it, the **Fee Schedule** list contains the fee schedules that may be used to charge the student for the course. Click **View Fees** to view the fees associated with the selected fee schedule.

Note: The Fee Schedule is not available for Future Courses because the Fee Schedule must be associated with a Course Section.

13. Enter the **Date Requirements Met** for externship or online courses.
14. Click View Schedule to view the course schedule on a weekly or monthly basis.
15. Enter any comments in the **Comment** field. These comments will appear on class roster reports.
16. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Reassigning a Course

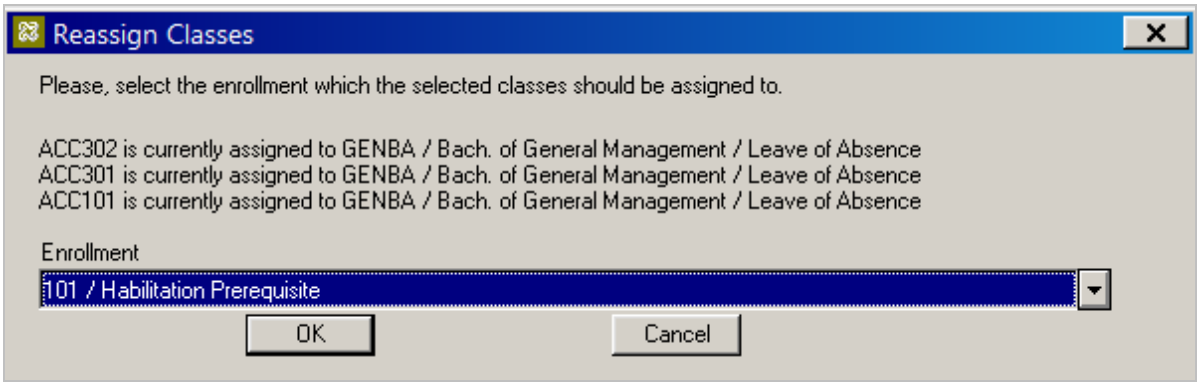
You can reassign courses to move courses from one enrollment to another. Only courses with a status of Complete, Drop, or Future may be re-assigned.

The reassign function assumes that the selected student has more than one previously established enrollment. This function is different than transferring an enrollment to another enrollment. See also Associate Selected Classes.

To reassign courses from one enrollment to another:

1. Select a student.
2. Navigate to **View > Academic Records > Enrollment** and verify that the target enrollment is set up.
3. Navigate to **View > Academic Records > Schedule**. The Student Schedule form is displayed.
4. Filter the list of courses by selecting the **Enrollment**, **Term**, and **Status**.
5. Select one or more courses. To select more than one course, hold down the **Ctrl key** while clicking on each course to be reassigned. Only Completed, Dropped, or Future courses may be re-assigned.
6. Click **Reassign**. This button is displayed only, if you have permission to reassign courses. The Reassign button is disabled when selecting associated courses. When courses are reassigned, the Native Enrollment field is set to blank.

   The Reassign Classes form is displayed. If more than one course was selected, the Reassign Classes form lists the courses.



7. Select the **Enrollment** to which the selected courses will be assigned.
8. Click **OK** to process the reassignment of courses.
9. A confirmation message is displayed. Click **OK**. You are returned to the Schedule form.

Registering a Student

Registration for class sections is normally done in batch mode under Daily > Academic Records > Registration; however, occasionally it is necessary to register a student into a class from the Student Schedule form.

Once a class section has been scheduled for a student, you can no longer change the term, course, or class section. If such a change is necessary, you must first unregister the student from the class section and then register the student in the correct class section.

Validations for Registrations

CampusNexus Student checks the following when registering a student into a class section:

A. **Registration Hold**

CampusNexus Student checks the hold code for registration. If the student is in a hold group, classes cannot be added or registered for the student, unless you have permissions to override the hold.

B. **Maximum Students in Class**

CampusNexus Student checks how many students are registered for the class against the maximum allowed in the class.

- If you have override permissions (Staff Setup), you can select to override the maximum allowed in class and register the student.
- If you do not have permission to override the maximum allowed in class (Staff Setup), a message indicates that you cannot register the student.

C. **Prerequisites**

CampusNexus Student checks for a grade on prerequisite courses. If a grade is not found, a message listing the prerequisite requirements is displayed. This message indicates that the prerequisite courses are currently scheduled.

- If you have override permissions (Staff Setup), you can override the prerequisite requirements.
- If you do not have override permissions (Staff Setup), a message indicates that you cannot register the student.

D. **Corequisites**

CampusNexus Student requires that a student registers in corequisite courses concurrently. A student may not register in a course with corequisite requirements unless the student registers for all corequisite courses at the same time or has previously completed the corequisite course. If a student does not meet the corequisite requirements, a message listing the corequisite requirements is displayed.

- If you have override permissions (Staff Setup), you can override the corequisite requirements.
- If you do not have override permissions (Staff Setup), a message indicates that you cannot register the student unless you register the student in the required corequisite courses at the same time. For more information, see Register for Multiple Courses.

E. **Currently Taking**

If the student is already registered for the class, a message is displayed indicating that the student cannot be registered again.

F. **Already Taken**

CampusNexus Student prompts for a confirmation if a student is registered into a previously taken course. A student may take a same course more than once. This situation usually arises when a student must "retake" a course due to an incomplete or poor performance in the first registration.

CampusNexus Student takes into account the Retake Override indicator on the Courses Code Setup form. Some courses, such as Physical Education, are set up to allow retakes.

G. **Conflicts**

If the class being scheduled meets on the same date and time as another class that is already on the student's schedule, a message is displayed listing the courses that are in conflict. You are prompted to confirm if it is OK to register anyway.

- If you have override permissions (Staff Setup), you can override the conflict.
- If you do not have override permissions (Staff Setup), you cannot register the student.

H. **Add/Drop Flag**

During registration and unregistration, the 'Add/Drop Flag' for the campus is checked to determine what type of add/drop validation needs to take place. If validation must take place, CampusNexus Student calculates the add/drop date as follows:

- The Academic Records system level setting ('Campus for add/drop?' field) is used to determine which campus to use when determining the add/drop policy: the 'Student's enrollment campus' or the 'Course section's campus'.
- The 'Add/Drop Flag' for the campus designated in the Academic Records system level setting is checked.
- If the Academic Records system level setting is configured to use the 'Student's enrollment campus', and the 'Add/Drop Flag' of the student's enrollment campus is set to 'S - Course Section Enforced', CampusNexus Student enforces the add/drop policy of the course section's campus.

  If the 'Add/Drop Flag' for the student's enrollment campus is different than 'S - Course Section Enforced', the student's enrollment campus is used.
- If the Academic Records system level setting is configured to use the 'Course section's campus', the policy of the same campus is used.
- Once the appropriate campus and add/drop flag configurations have been determined, the add/drop date is calculated as follows:
  - If the 'Add/Drop Flag' is 'N - Not Enforced', there is no add/drop date.
  - If the 'Add/Drop Flag' is 'C - Campus Enforced', the add/drop date is enforced by campus (the campus that was determined above). Calculate the add/drop date by adding the number of days after the start date configured at the campus level to the course section's term start date.
  - If the 'Add/Drop Flag' is 'T - Term Enforced', the add/drop date is enforced by term. Obtain the add/drop date configured at the term level for the course section's term.
  - If the 'Add/Drop Flag' is 'S - Course Section Enforced', the add/drop date is enforced by course section. Obtain the add/drop date configured at the course section level for the appropriate course section.

The add/drop date override permissions (Staff Setup) are also checked.

- If you have override permissions and the add/drop date has passed, a message is displayed and you have the option to override.
- If you do not have override permissions and the add/drop date has passed, an add/drop warning is displayed and the registration or unregistration action is cancelled.

Notes:

- During course registration, if at least one applicable Schedule Change Lock registration lock type exists, you cannot register the course.
- Courses taken as an 'Audit Class' are handled the same way as non-audit courses with regard to the Schedule Change Lock registration lock type.
- Maximum Limit and Minimum Limit registration lock types do not apply to courses registered as an 'Audit Class'.
- If a course being registered is cross-referenced to another course, the registration lock evaluation logic will use the credits/enroll status credit/enroll status hours/hours from the course it is cross-referenced to, not the actual course being registered.

Navigation Paths for Registration

Course registration can take place from multiple navigation paths in CampusNexus Student; however, the add/drop validation outlined above will be executed regardless of where course registration is initiated.

- View > Academic Records > Schedule > Add > Course Type to Add as "Current"
- View > Academic Records > Schedule > Delete
- View > Academic Records > Schedule > Drop/Reinstate
- View > Academic Records > Schedule > Register
- View > Academic Records > Schedule > Register < *select more than one course* > Register
- View > Academic Records > Schedule > Register > Term Sequence
- View > Academic Records > Schedule > Term Sequence > Register Single Course/Register Courses in Term
- View > Academic Records > Schedule > Unregister
- Daily > Academic Records > Batch Unregister Courses
- Daily > Academic Records > Registration > Term Registration
- Daily > Academic Records > Registration > Track Registration
- Daily > Academic Records > Schedule Classes > Waitlist > Accept Seat Max/Accept Student(s)/Re-assign

To register a student in a class section from the Student Schedule form:

1. Select a student.
2. Navigate to **View** > **Academic Records** > **Schedule**. The Student Schedule form is displayed.
3. Filter the list of courses by selecting the **Enrollment**, **Term**, and **Status**.
4. Select the course in which the student is to be registered. The status of the selected course must be 'Future'.

   When you register a student into a course that has a substitution pool and the Allow Course Substitution option is enabled, select a course from the list for standard courses that have a substitution pool. After registration into a course that has a substitution pool, changing the selected course can happen only while the course's status is 'Future'.
5. Click **Register**. The first page of the Registration wizard is displayed.

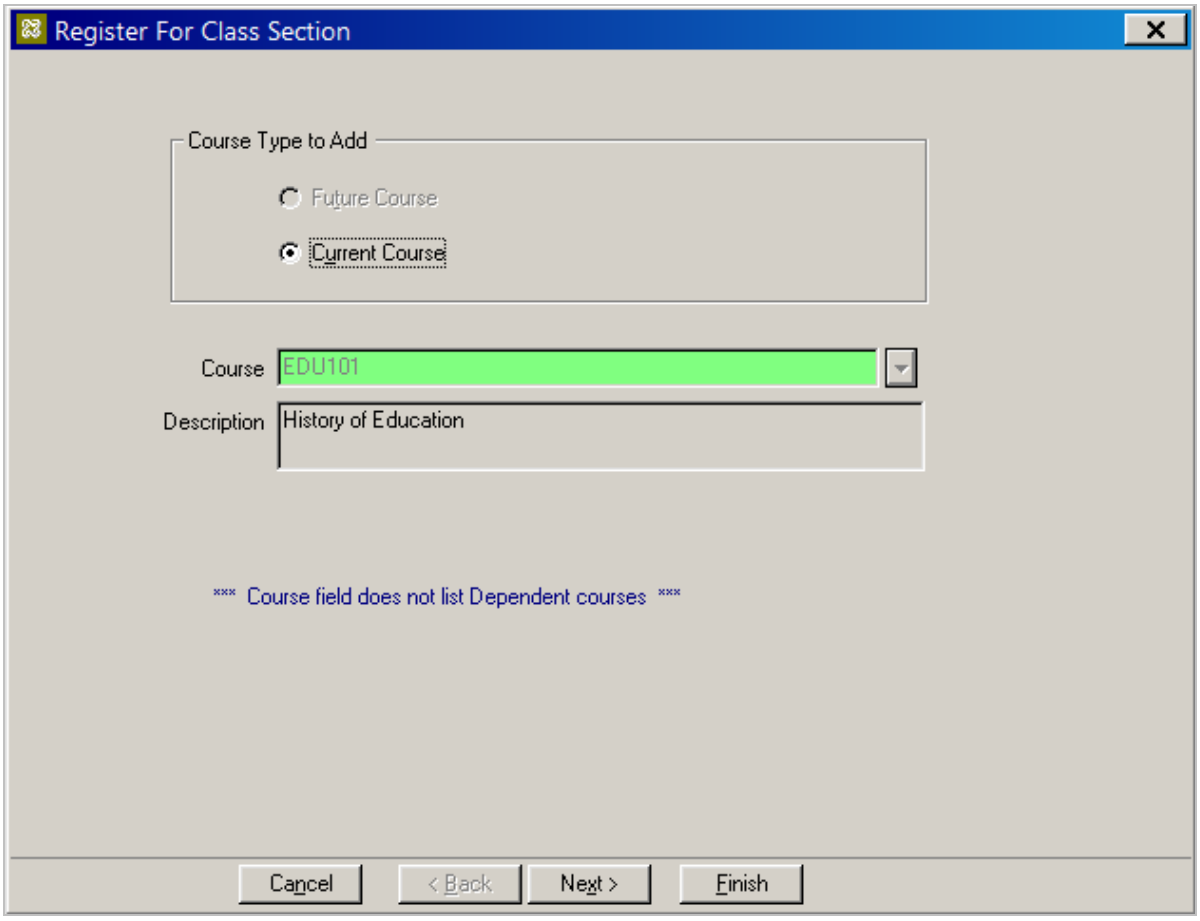
   When you click Register, CampusNexus Student checks if the student:

- Is currently enrolled in the selected course for the selected term.
- Has completed the selected course for the selected term.

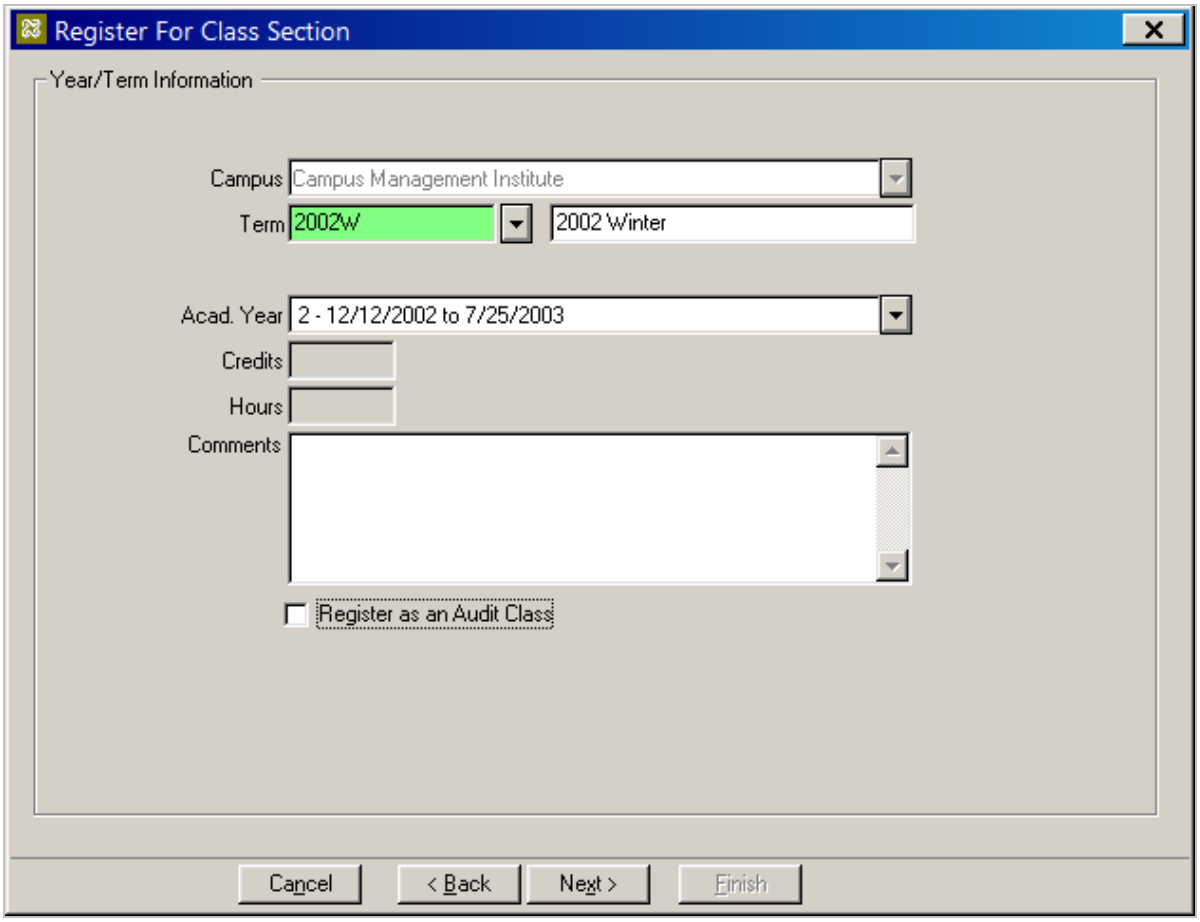
If so, then you are attempting to schedule or register a student in overlapping terms. As a result, CampusNexus Student displays an informational message.

If a student is already registered for the selected class, the Register button is renamed to **Unregister**. Click Unregister to remove a student from the selected class section.

Note: If the selected course is not scheduled for any term, the following message is displayed: *"The selected course is not currently scheduled for any terms."* Click **OK**. You are returned to the Student Schedule form.



6. Click **Next**. Page 2 of the wizard is displayed. The second page will vary. If the course is not a possible retake, page 2 will be similar to this one.



7. The default **Campus** is the campus for the enrollment. You can select a different campus if the student is taking the course at another campus.

   Note: If the student plans to take a cross-referenced course at another campus, you can only view cross-referenced courses at campuses that offer sharing permissions with the campus of the student's current enrollment.

8. Select the **Term**.

   When Term Relationships are used, the **Parent Term** must be selected before the **Child Term**. If the Parent Term is disabled, indicating that the Campus does not use Term Relationships, the Child Term field is labeled **Term**. A Child Term cannot be associated with more than one Parent Term on a Term Summary for an individual enrollment.

9. Select the **Academic Year**.

10. The **Credits** and **Hours** fields are normally a read-only fields.

    If the class being registered is a variable credit course and the specified class section is configured to 'Allow Overrides During Registration', the Credits and Hours fields are grayed out on this form but may be modified in the next step of the wizard after a class section is selected.

    If the class section selected allows overrides during registration, the Credits and Hours fields can be edited. If minimum and maximum credit values were also specified, you can only enter a credit range that is between the specified values.

11. Enter any comments in the **Comment** field. These comments will be printed on class roster reports.

12. Select **Register as an Audit Class** if applicable.

13. Click **Next**. A grid of available Class Sections is displayed.

    If the course for which the student is being registered is a possible retake, the following message is displayed: *"Will this course be considered a Retake?"* Select **Yes** or **No** as required.

    - *Scenario 1*: If there are no retaken courses or equivalents for the registered course, and if the answer to the question is **No**, the Class Section grid is unavailable. Move to the next screen in the wizard.
    - *Scenario 2*: If there is one retaken course or equivalent for the registered course, and if the answer to the question is **Yes**, the grid is unavailable. Move to the next screen in the wizard.
    - *Scenario 3*: If there are multiple retaken courses or equivalents for the registered course, and if the answer to the question is **Yes**, the grid is available. Select a course and move to the next screen in the wizard.

    The message to select the course that is being retaken is displayed only after you select **Yes** to the question *"Will this course be considered as a retake?"* and more than one course is listed in the grid. Select the course that is being retaken.

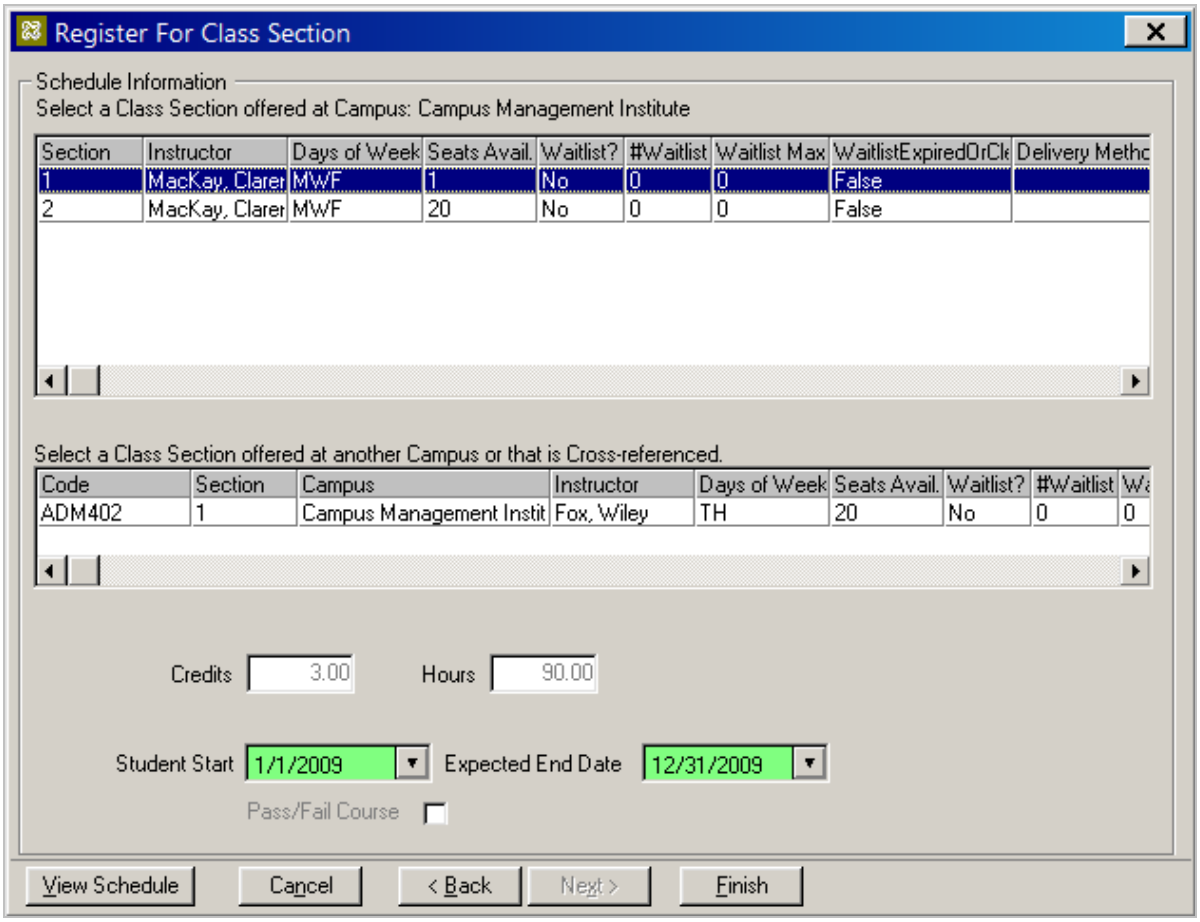
    When you click **Next**, a course in the grid must be selected so that when the update to the enrollment schedule occurs, CampusNexus Student identifies the course as being retaken and correctly updates the Retake Override indicator on that row. When you click **Finish** button on the final form in the wizard, CampusNexus Student updates the Retake Override column for the registered course and, if applicable, the course being retaken.

    The Retake Override column is updated in the following scenarios:

    - If the Retake Override flag for the course being registered is off, CampusNexus Student turns off the Retake Override flag for the course being registered.
    - If no existing posted grades or current scheduled courses are on file for the registered course or any of its course equivalents, CampusNexus Student updates the Retake Override flag with the Retake Override flag for the course being registered.
    - If existing posted grades or currently scheduled courses rows are on file for the registered course, and you answered No to *"Will the course being registered for be considered as a retake?"*, CampusNexus Student turns on the Retake Override flag for the registered course.
    - If existing posted grades or currently scheduled courses rows are on file for the registered course, and you answered Yes to *"Will the course being registered for be considered as a retake?*", CampusNexus Student turns off the Retake Override flag for the registered course and turns off the Retake Override flag for the course selected as being retaken on the Retaken Courses form.

    CampusNexus Student defaults the answer to match the Retake Override setting on the Courses Code Setup form.

14. Select the **Class Section** in which the student is to be registered. The **Student Start** date and **Expected End Date** of the class section are filled in by default. You can change them if necessary for this student.



15. If the Billing Method is configured to use Fee Schedules, a Fee Schedule list box and a View Fees button are displayed. Click **View Fees** to display a listing of the fees applicable to the selected fee schedule.
16. The **Pass/Fail Course** check box is enabled when the Course Section's pass/fail flag has been set to the "Student's Choice" option. The check box is in a 'selected disabled' state when the pass/fail flag has been set to the "Pass/Fail (Required)" indicating that the course will be graded on a pass/fail basis only. The check box is not displayed when the pass/fail flag has been set to "Non-Pass/Fail" indicating that letter grades will be issued for the course. See Course Code Setup for information regarding the pass/fail flag options.
17. Click **View Schedule** to view the course schedule on a weekly or monthly basis.
18. Click **Finish**.

    If you have permissions to waive a retake fee, you are prompted to confirm waiving of the retake fee. Click **Yes** or **No**.

    If student registration lock configuration has been enabled, upon clicking **Finish**, the Registration Locks will be implemented.

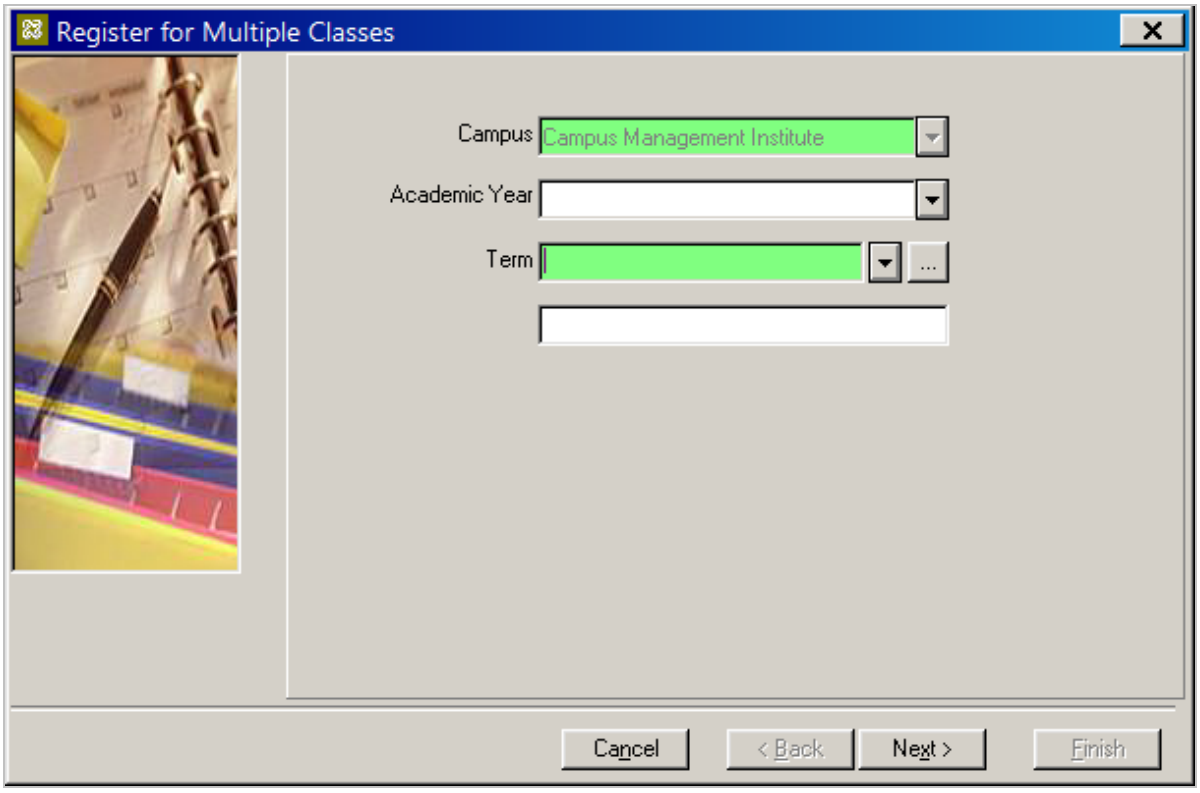
See Unregister Student for details about reversing a student registration.

Registering for Multiple Classes

You can register a student into multiple classes for a term from the Student Schedule form. After registering, the Auto Bill flag is checked. If your school auto-bills by course, the billing routine will be called.

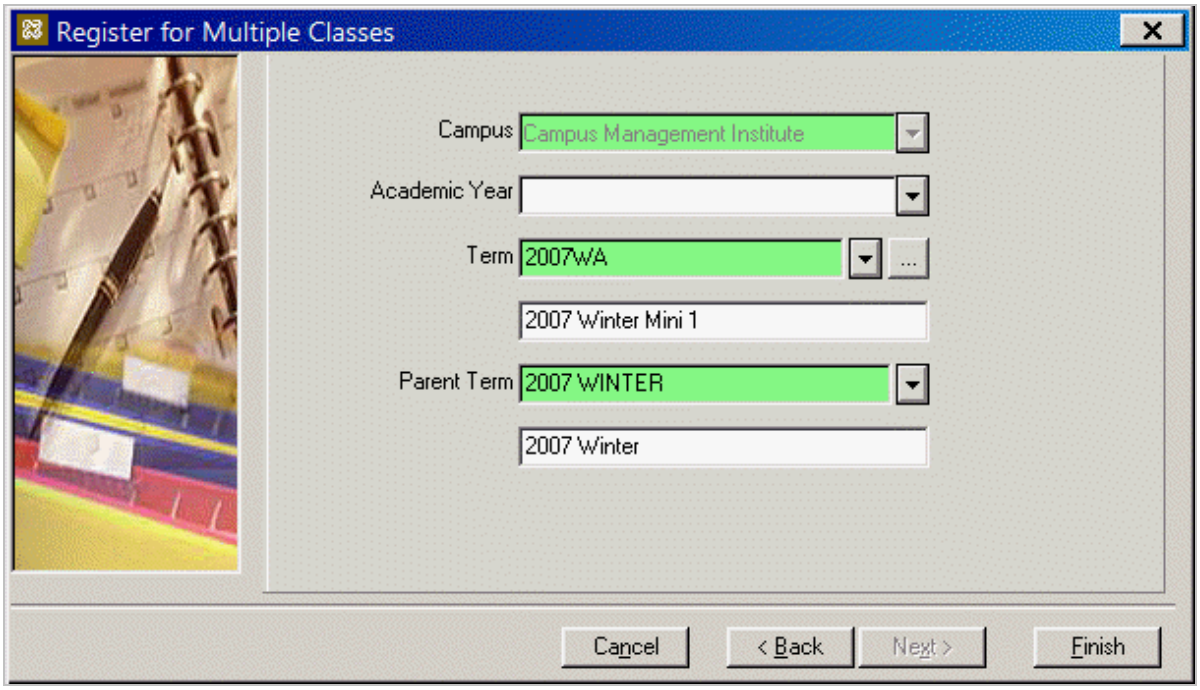
To register a student for multiple class sections:

1. Select a student.
2. Navigate to **View > Academic Records** > **Schedule**. The Student Schedule form is displayed.
3. Filter the list of courses by selecting the **Enrollment**, **Term**, and **Status**.
4. Select the **Courses** into which the student is to be registered.
    - To select consecutive courses, click the first course, then, while holding down the **Shift key**, click the last course in the group.
    - To select nonconsecutive courses, click the first course, then, while holding down the **Ctrl key**, click each of the other courses in which the student is to be registered.
5. Click **Register**. The first page of the Register for Multiple Classes wizard is displayed.

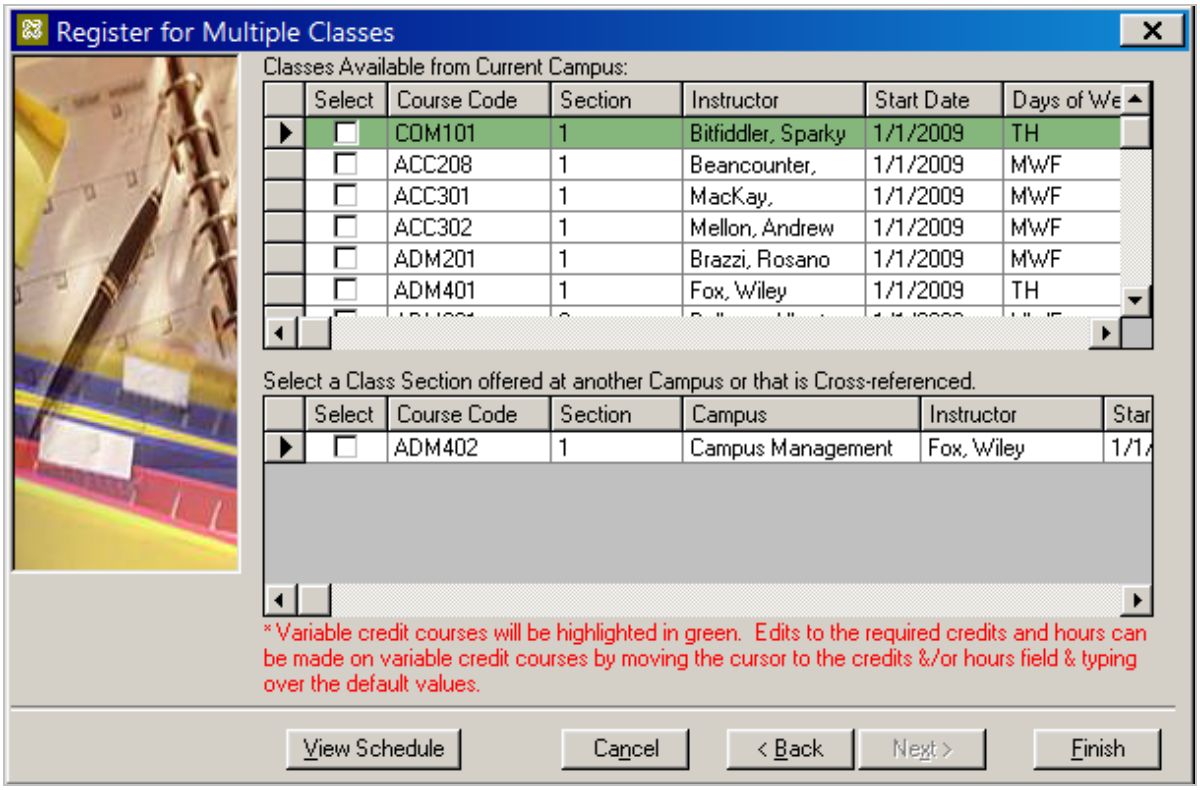


6. Select the **Term** in which the student is to be registered.

    If Term Relationships are being used and the term chosen is a child term, the page is re-displayed with the Parent Term:



7. Select the **Academic Year** that applies to the selected courses.
8. Click **Next**. The next page of the wizard is displayed. This page lists all the available class sections for the courses selected above.



9. In the **Select** column, select the class section into which the student will be registered.

If variable credit courses are included in the course selection, they will be highlighted in green. To change the credits or hours, click on the desired class and move the cursor right to the **Credits**/**Hours** field and typing over the default values.

10. Select View Schedule to view the course schedule on a weekly or monthly basis.
11. Click **Finish**. CampusNexus Student registers the student into the selected class sections.

    If student registration lock configuration has been enabled, upon clicking **Finish**, the Registration Locks will be implemented.

    If there are unfulfilled prerequisites, courses already registered, or other conflicts, a corresponding message is displayed. Answer any messages as they arise. If you have override permissions, you can override the warning messages. If you do not have override permissions, the override option is not displayed.

    Notes:

    - If student registration lock configuration has been enabled, upon clicking **Finish** during course registration for multiple course registration, the Registration Locks is evaluated.
    - During course registration, if at least one applicable Schedule Change Lock registration lock type exists, you cannot register the course.
    - Courses taken as an 'Audit Class' are handled the same way as non-audit courses with regard to the Schedule Change Lock registration lock type.
    - Maximum Limit and Minimum Limit registration lock types do not apply to courses registered as an 'Audit Class'.
    - If a course being registered is cross-referenced to another course, the registration lock evaluation logic uses the credits/enroll status credit/enroll status hours/hours from the course it is cross-referenced to, not the actual course being registered.
    - If the student's billing method is set to use Fee Schedules, CampusNexus Student uses the course section's default fee schedule to bill the student. Otherwise the student is billed based upon the student's billing method, rate schedule, and the default fee schedule for the courses.
    - If you have permission to waive a retake fee, you will receive a message at the time of retake course registration prompting you to waive the retake fee. If you select **Yes**, the retake fee will be waived. Otherwise, the retake fee will be charged.

12. When the registration procedure is completed, you are returned to the Student Schedule form. The courses you

selected for registration are displayed with a status of "Scheduled".

13. Click **Close** to close the form.

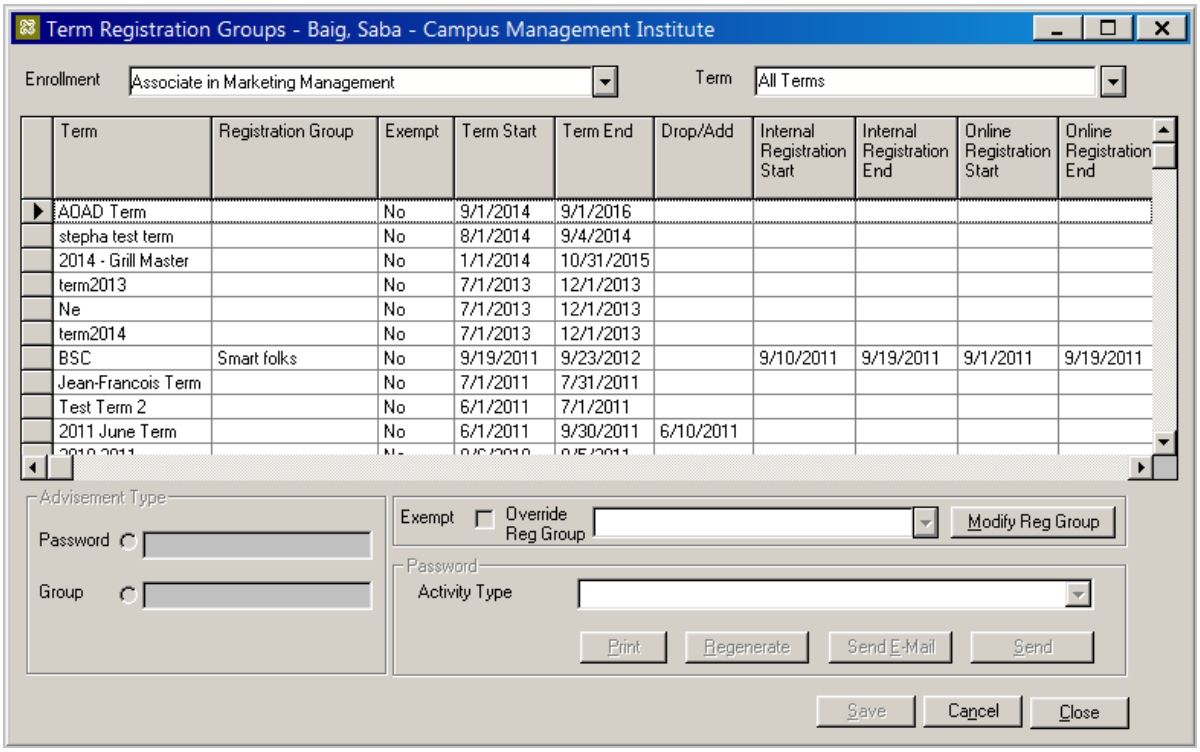
See Unregister Student for details about reversing a student registration.

Managing Registration Groups

Registration groups are used to assign priority to students during a term's registration period. Institutions can create registration groups using a number of variables and assign allowable registration periods to each group. Registration groups serve to sequence and control the registration process for groups of students simultaneously. In some instances, students may be exempt from a registration group consideration, or they need to adhere to dates of another registration group.

To work with registration groups:

1. Select a student.
2. Navigate to **View** > **Academic Records** > **Schedule**. The Student Schedule form is displayed.
3. Filter the list of courses by selecting the **Enrollment**, **Term**, and **Status**.
4. Click **Registration Groups** to view the Term Registration Groups form. This form displays all registration groups associated with this student.



5. Authorized users can override student registration groups to allow the institution to address special student requests and other situations where enforcement of registration groups on specific students is not desired. This feature affects both internal and online registration groups.

   Only staff members with access to override registration groups (Setup > Staff > User Options: Allow user to override registration group constraint) can modify or override student registration groups.

   Authorized users can exempt a student from registration group consideration for a specific term as well as modify the student registration group for a term. If the registration group is associated with a student advisement group, a student can be removed from the group by modifying the group or exempting the student from the group.

   When you click **Modify Reg Group**, all registration groups are displayed.

6. Click **Passwords** to create passwords for specific sections (used for online registration).
7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Reinstating a Course

You can reinstate students into courses they were previously registered in but now have a status of Drop or LOA (Leave of Absence). The reinstate option is available when students return to the same course sections in the same term into which they were originally registered.

Before reinstating a course you must confirm that the course has not ended yet. You can determine if the course already ended by checking if the system date is greater than the end date of the course. If the course section has already ended, and you attempt to reinstate the student, a warning message is displayed asking if you still want to reinstate the student.

To reinstate a student into a course:

1. Select a student.
2. Navigate to **View > Academic Records > Schedule**. The Student Schedule form is displayed.
3. Filter the list of courses by selecting the **Enrollment**, **Term**, and **Status**.
4. Select the class section on the student's schedule that has a status of **Dropped** or **LOA**.
5. The Drop button is now labeled 'Reinstate'. Click **Reinstate**.
6. A confirmation message is displayed. Click **Yes**.
7. CampusNexus Student checks if there are any prerequisites or corequisites for the course being reinstated. If the course to be reinstated does not meet all prerequisite or corequisite requirements, a message is displayed listing the prerequisite and corequisite requirements of the course. You may click on the highlighted areas of the message to view additional details about the prerequisite and/or corequisite requirements.
    - If you have permission to override prerequisite and corequisite rules for registration, the following message is displayed: *"Do you wish to override the course prerequisites/corequisites?"* Click **Yes** to proceed with the reinstatement.
    - If you do not have permission to override prerequisite and corequisite courses for registration, CampusNexus Student does not allow you to reinstate the course.
8. When the reinstatement is completed, the course status reverts to its previous status and posted grades for the course are removed. The status change is recorded in the Course Status Change Audit folder. To view the audit, navigate to **View > Academic Records > Audit > Course Status Change Audit**.

    The Old Status is 'Dropped' or 'LOA' and the new status is 'Current' or 'Scheduled'.

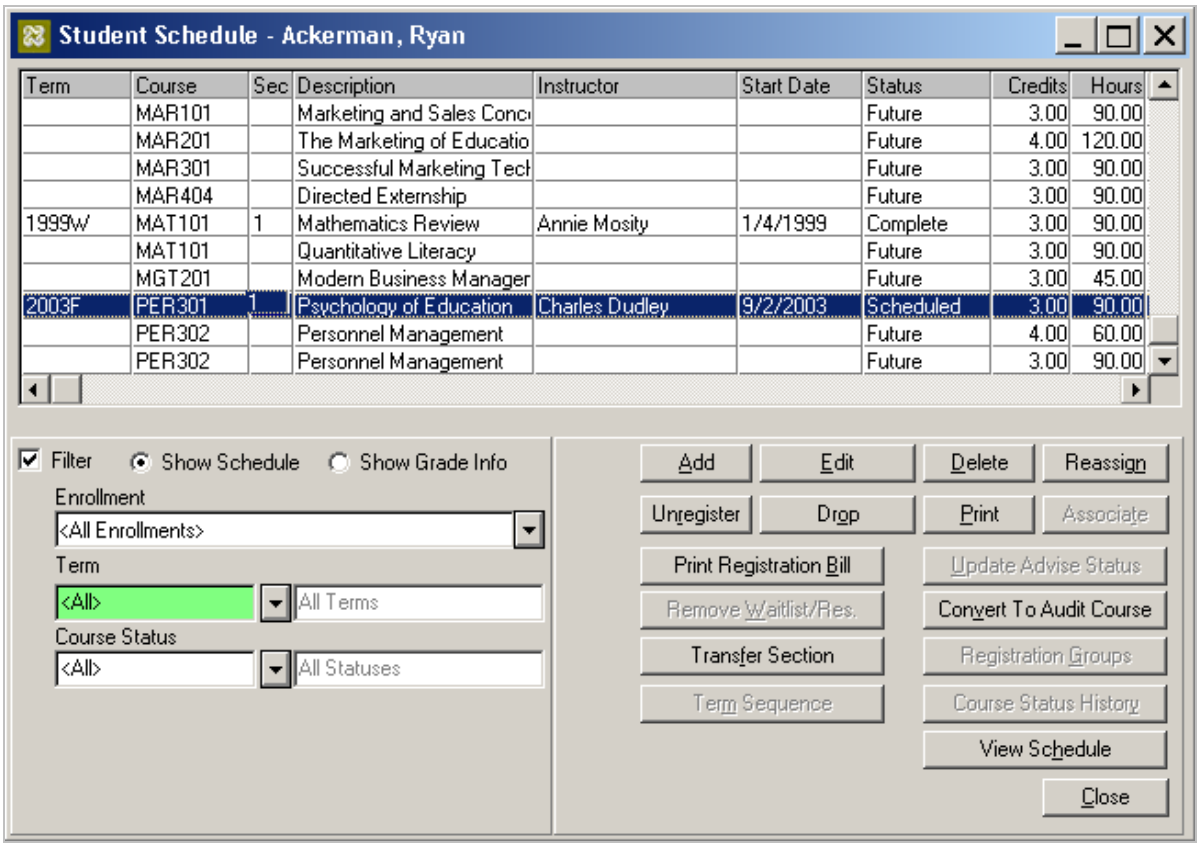
Transferring a Course Section

You can transfer a student to another course section using the Transfer Section button on the Student Schedule form. The course to be transferred must be in 'Scheduled', 'Current', or 'LOA' status. If lesson grades are associated with the original class section, these will be deleted.

To transfer a student to another course section:

1. Select a student.
2. Navigate to **View** > **Academic Records** > **Schedule**. The Student Schedule form is displayed.
3. Filter the list of courses by selecting the **Enrollment**, **Term**, and **Status**.
4. Select the **Course Section** to be transferred.

   Note: The Transfer Section button is enabled for courses with a 'Scheduled', 'Current', or 'LOA' status.



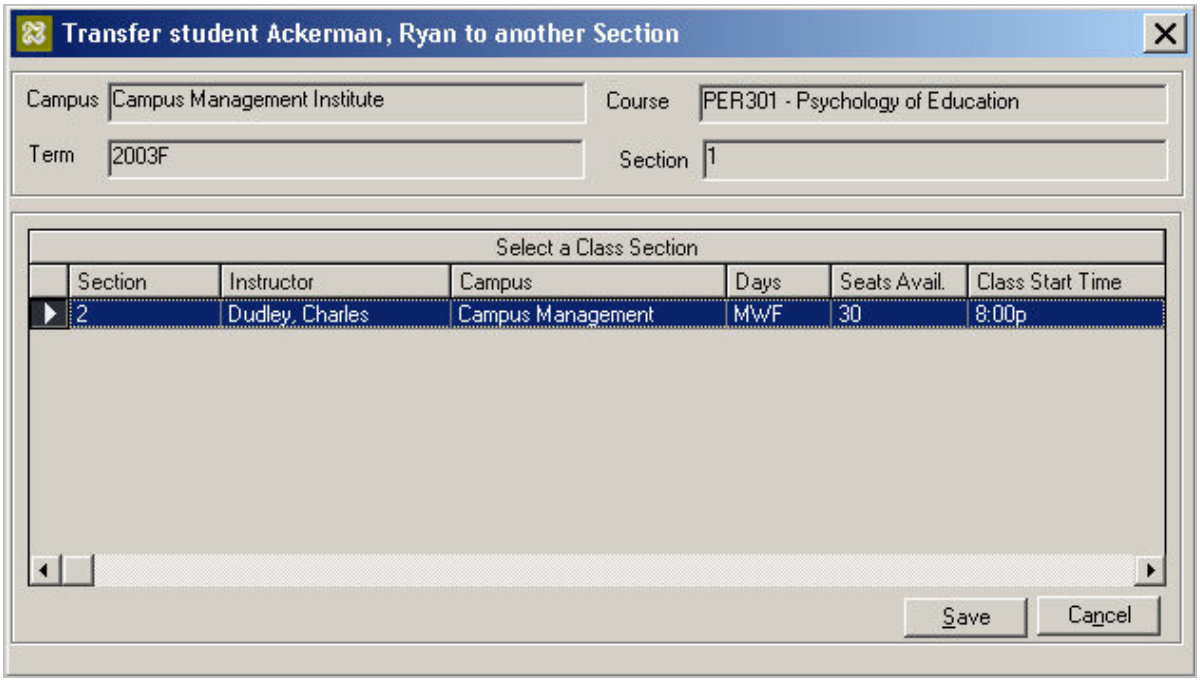
5. Click **Transfer Section**. The 'Transfer student <student name> to another Section' form is displayed. It shows all sections available for the selected course. If the campus is sharing courses, shared class sections will be listed as available choices.

   Note: If student registration lock configuration has been enabled, upon clicking **Transfer Section**, the Registration Locks will be evaluated.

6. Select a **Course Section** from the list. The student will be transferred from the original course section to the course section listed in the Transfer student form.
7. If the class being registered is a variable credit course and the specified class section is configured to 'Allow

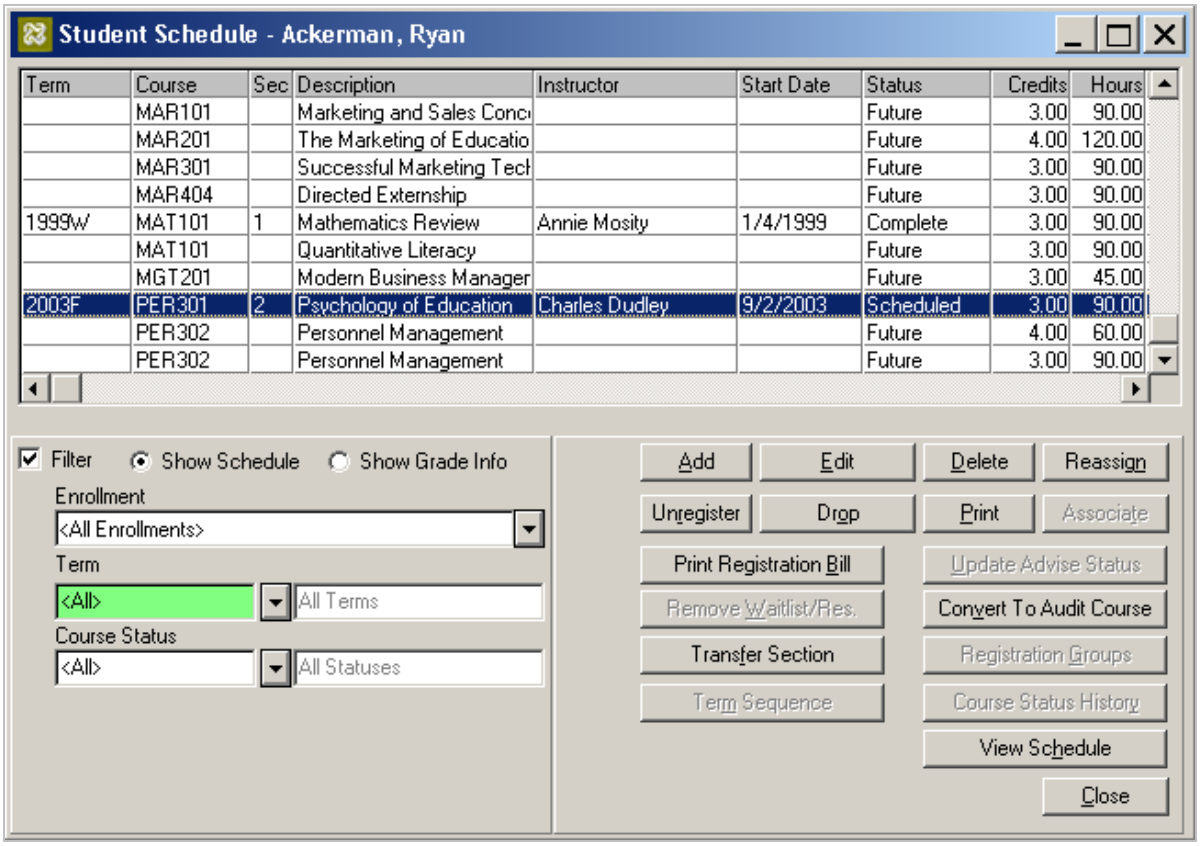
Overrides During Registration', you can modify the **Credits** and **Hours** that the student will be attempting.

8. Click **Save** to continue processing, or click **Cancel** to close the form without making the transfer.



9. A confirmation message is displayed. Click **OK**.

   The new course section is displayed in the Student Schedule form upon completion of the Transfer Section process.



The class section transfer is reflected in the student's Grade Audit and the student's Status History folder.

Note: The system date and time at which the transfer section occurred governs what attendance can be entered for a student for a specified section. Attendance remains with the original section once a transfer section occurs. If a user does not desire to retain attendance records, use unregister and register rather than transfer section.

For example

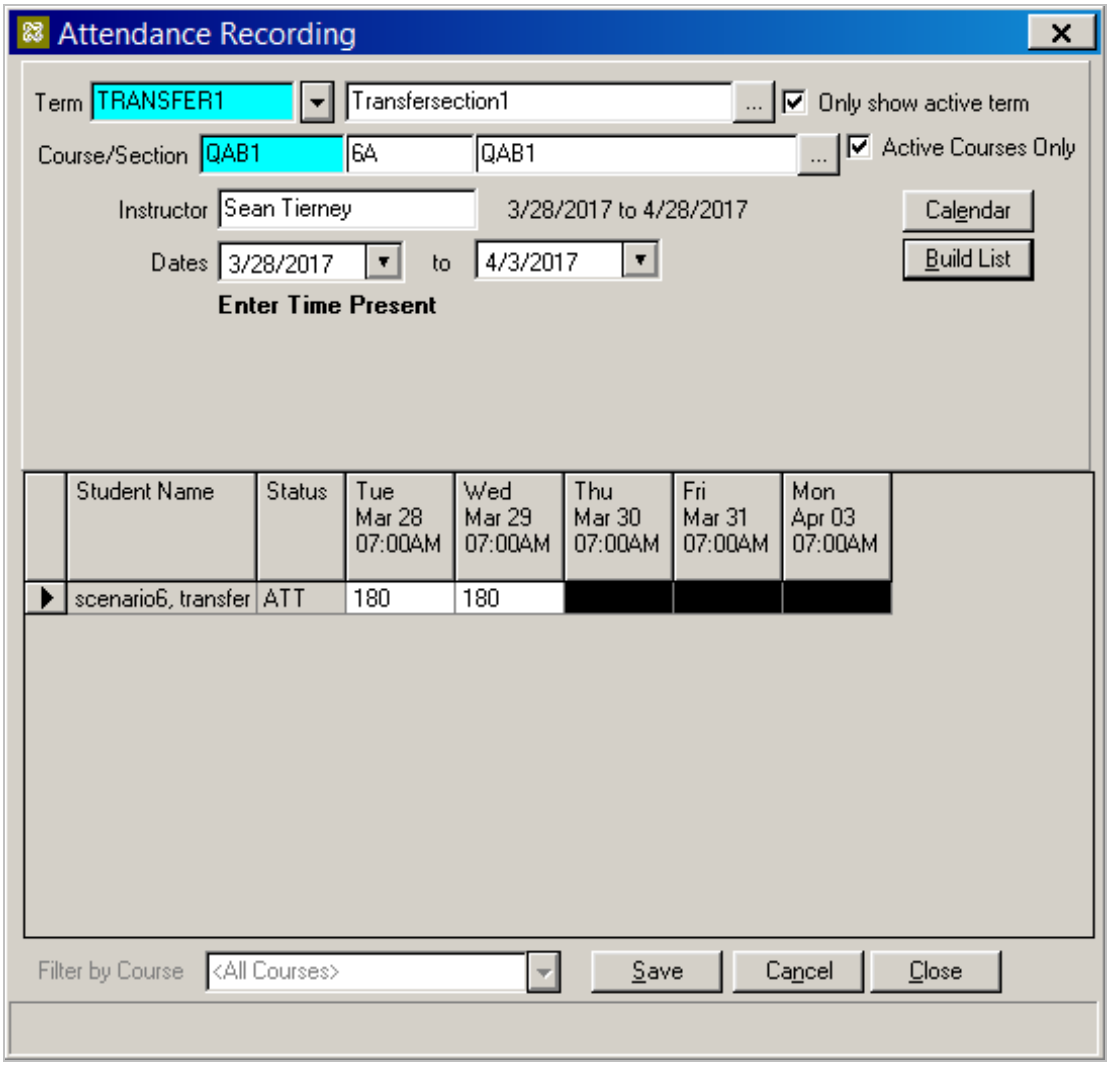
A student is registered in Section A, meeting at 7:00 a.m. for 3 hours (180 minutes) on Monday through Friday, and transfers to Section B, meeting at 2:00 p.m. for 3 hours (180 minutes) on Monday through Friday, with the transfer taking place at 12:00 p.m. on Wednesday.

The following highlighted days and times should have attendance available for entry:

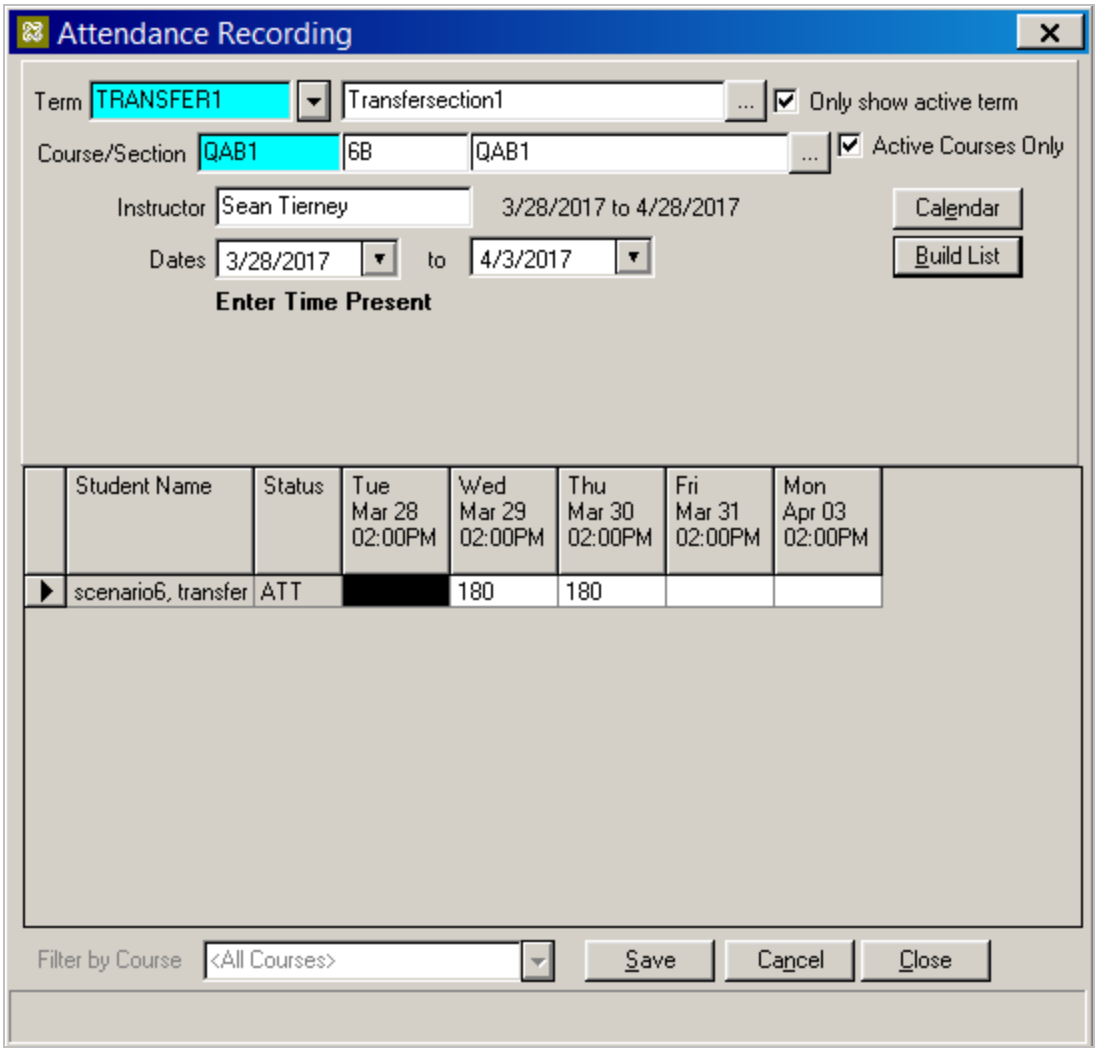
Transfer occurs at 12:00 p.m. Wednesday					
Monday	Tuesday	Wednesday	Thursday	Friday	SECTION
7:00 a.m.	7:00 a.m.	7:00 a.m.			A
		2:00 p.m.	2:00 p.m.	2:00 p.m.	B

The student will continue to show on attendance entry forms but will have the dates that are unavailable for entry blacked out in the form.

Section A Post-Transfer



Section B Post-Transfer



Best Practices Note: Users need to be aware that the selection of the **Class Meets at Various Days/Times** check box on the Class Schedule form takes precedence over any configured schedule in the system. Using this check box along with a configured schedule should be avoided as it can cause unpredictable results in attendance.

Unregistering a Student

Once a student is registered in a class section, the 'Register' button on the Student Schedule form changes to 'Unregister'. The Unregister option is available to correct situations in which a student was mistakenly registered. It is not to be used if a student drops a class section after classes begin.

Occasionally, a student enrollment needs to be reversed. To cancel an enrollment, it becomes necessary, among other things, to "unregister" the student from some class sections. To cancel an enrollment all the student's courses must be set to "Future" status. This is accomplished using the Unregister option.

Note: CampusNexus Student does not allow a course to be unregistered if it fulfills a prerequisite or corequisite requirement for another course in which the student is registered. A message is displayed containing the prerequisite and corequisite rules applicable to that course. The course may only be unregistered if:

a. Any courses whose prerequisite requirements were being fulfilled by the course being unregistered are removed (by unregistration) first;

b. You have permissions to override prerequisite and corequisite requirements.

When a course is removed from a student's schedule, by deleting or unregistering, CampusNexus Student recalculates values in the enrollment term summary form, for example, the last date of attendance (LDA).

Any Course Status change is retained and posted to the Audit folder within the Course Status Change Audit tab. You can access the Audit folder through the Course Status History button on the Student Schedule.

Course Section Add/Drop Validation

During registration and unregistration, the 'Add/Drop Flag' for the campus is checked to determine what type of add/drop validation needs to take place. For more information, see Add/Drop Flag.

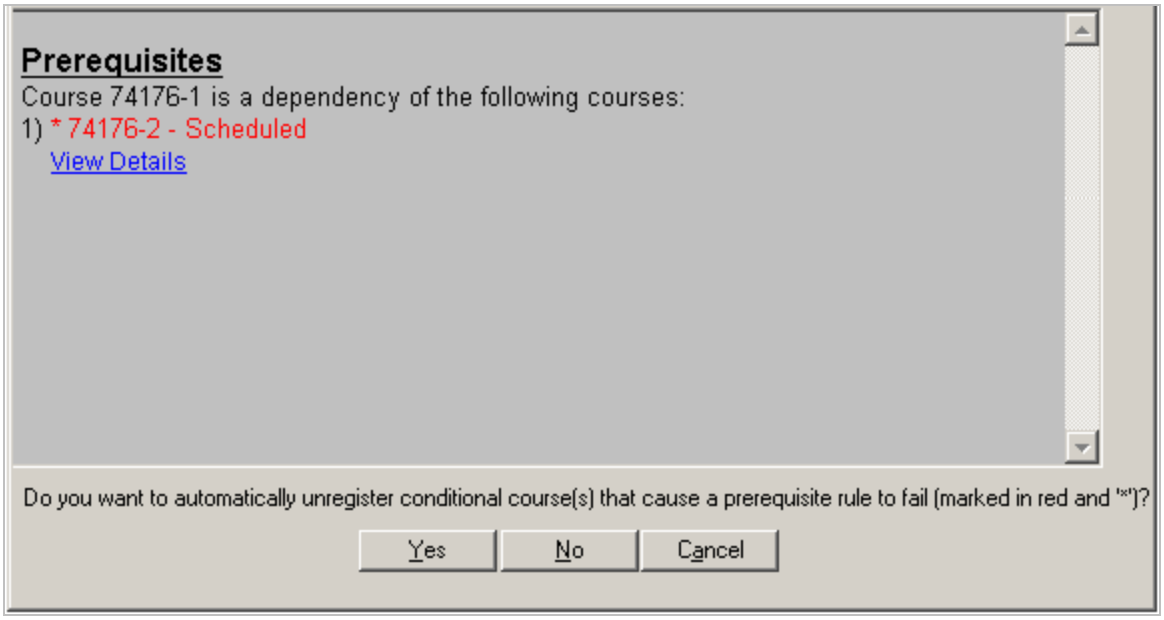
Note: If automatic unregistration is turned ON for the campus, CampusNexus Student applies all Add/Drop rules when automatically unregistering a conditional course.

To unregister a student from a class section:

1. Select a student.
2. Navigate to **View** > **Academic Records** > **Schedule**. The Student Schedule form is displayed.
3. Filter the list of courses by selecting the **Enrollment**, **Term**, and **Status**.
4. Select the **Class Section** to be unregistered. Only Current Class Sections can be unregistered. Future Class Sections are not yet registered. Completed Class Sections cannot be unregistered.
5. Click **Unregister**.

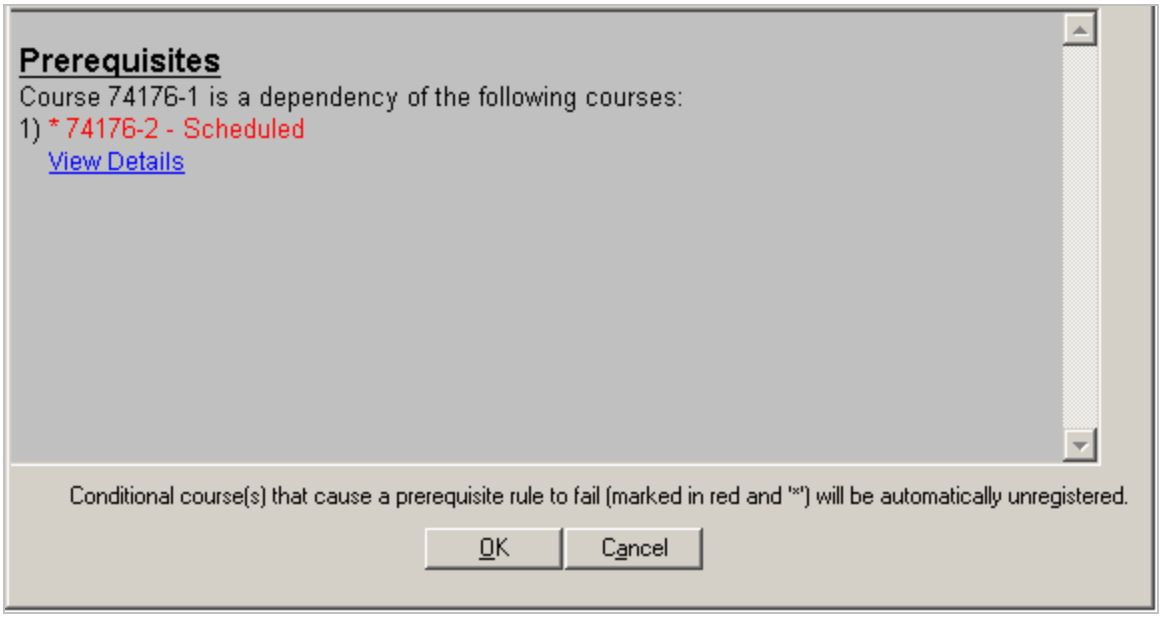
   CampusNexus Student checks if the course to be unregistered fulfills prerequisite or corequisite requirements for any other courses. If the course to be unregistered does fulfill a prerequisite or corequisite requirement, a message is displayed indicating the prerequisite and/or corequisite rules that would be broken if the course was unregistered.

   If campus is configured for automatic unregistration of conditional courses:
   If you have permission to override prerequisite and corequisite rules for Drop/Unreg, the following message is displayed: *Do you want to automatically unregister conditional course(s) that cause a prerequisite rule to fail?*



If you click **Yes**, the conditional courses will be unregistered and the prerequisite course will be unregistered. If you click **No**, only the prerequisite course will be unregistered. If you click **Cancel**, the action will be cancelled and no course(s) will be unregistered.

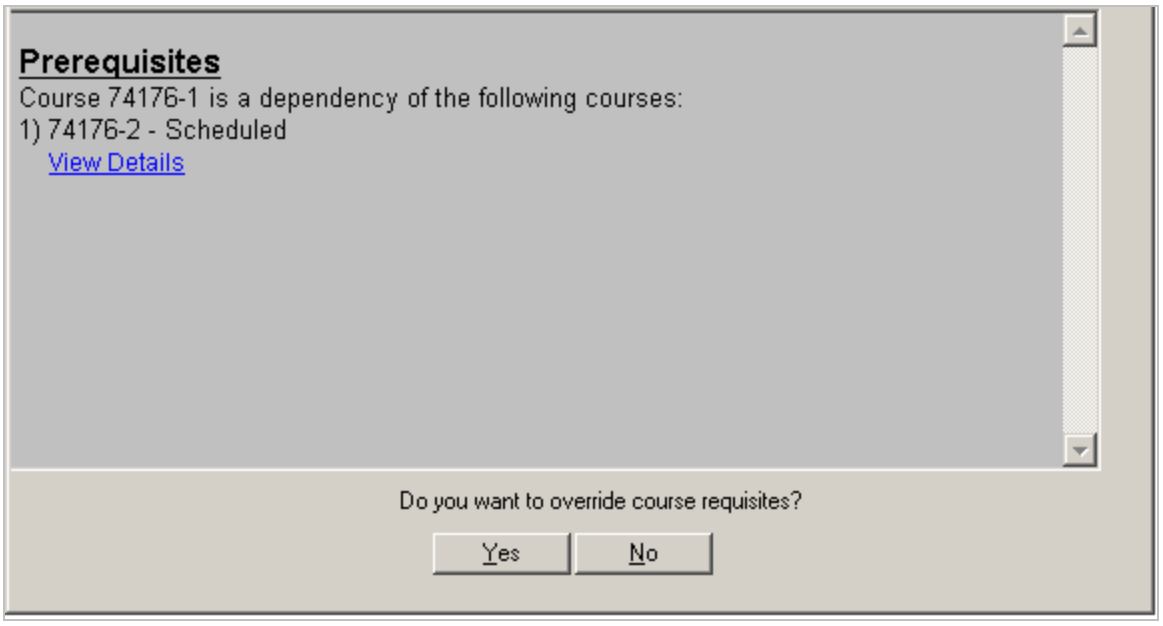
If you do not have permission to override the prerequisite and corequisite rules, the following message is displayed: *"Conditional course(s) that cause a prerequisite rule to fail will be automatically unregistered."*



If you click **OK**, the conditional course(s) will be unregistered and the prerequisite course will be unregistered. If you click **Cancel**, the action will be cancelled and no courses will be unregistered.

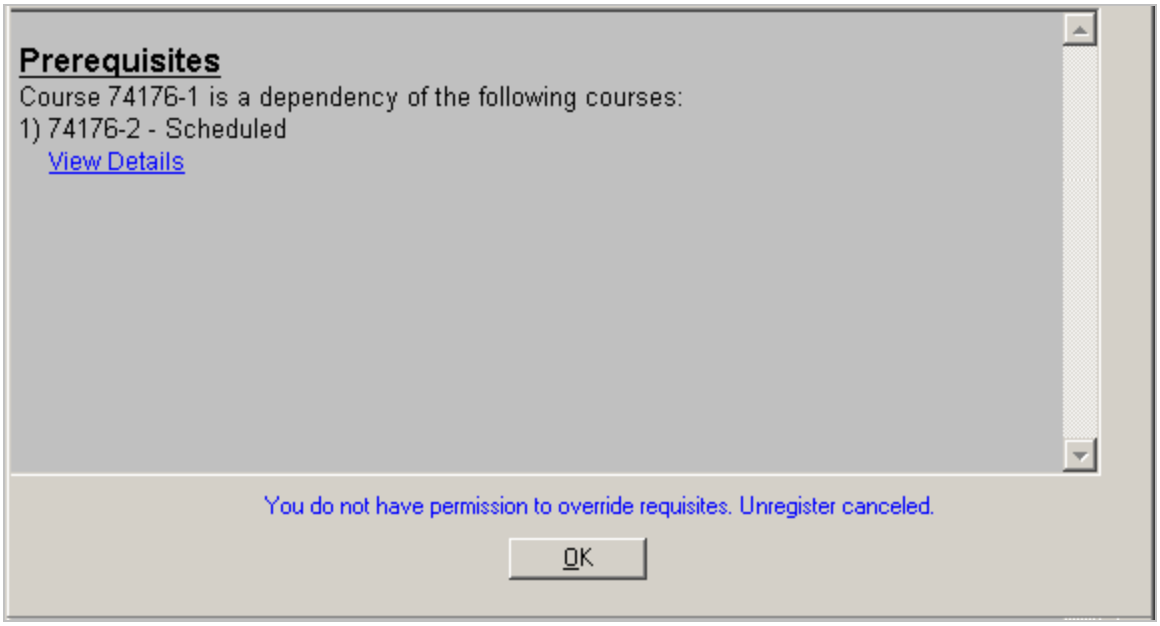
If campus is not configured for automatic unregistration:

If you have permission to override prerequisite and corequisite rules for Drop/Unreg, the following message is displayed: *"Do you want to override the course requisites?"*



If you click **Yes**, the prerequisite course will be unregistered, but the conditional course(s) will not be unregistered. If you click **No**, the process will terminate.

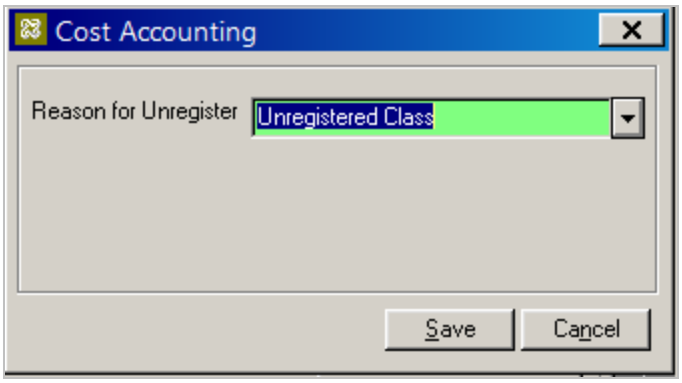
If you do not have permission to override the prerequisite and corequisite rules, the following message is displayed: *"You do not have permission to override requisites. Unregister canceled."*



When you click **OK**, the process will terminate.

Note: If student registration lock configuration is enabled, upon clicking the **Unregister** button, the Registration Locks will be evaluated.

6. Select a **Reason** for unregistering the course. See Course Reason Code Setup for additional information.



Note: The status and reason for the class section will be changed to 'Future'. The Term, Section number, Instructor, and Start Date will all be deleted.

7. Select **Save** to continue or **Cancel** to exit. You are returned to the Student Schedule form.
8. Select and unregister any other courses as necessary.
9. Click **Close** to close the form.

Attendance

Use the Student Attendance form to review attendance data for a student. You can filter the list of class sections by enrollment, term, or by the student's status in class. CampusNexus Student defaults to the current enrollment when accessing this form. For any selected class section, you can review the student's attendance and, if necessary, make adjustments.

When editing attendance information, the last date of attendance (LDA) will be recalculated after the information is saved.

Ordinarily, attendance is posted in batches as a daily procedure. You can see the procedures for this at Daily > Academic Records > Attendance > Record Attendance.

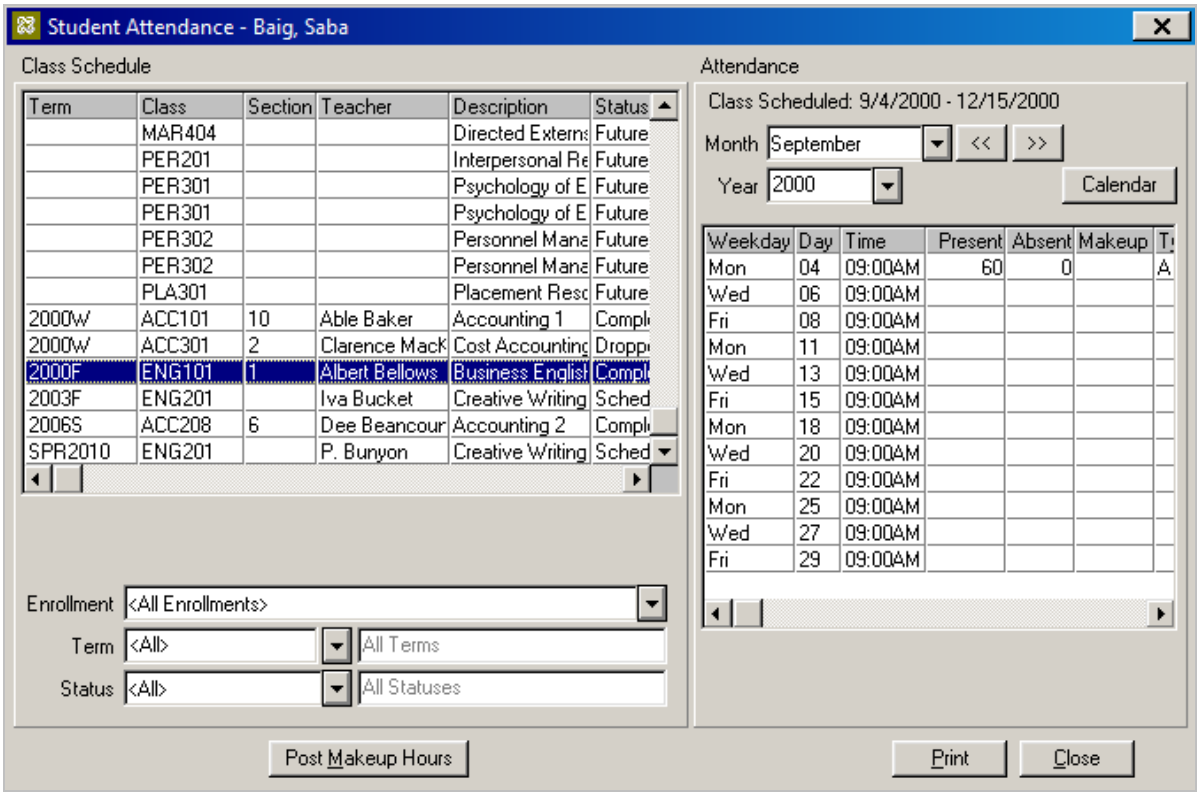
Note: All available classes are displayed and can be properly recorded (before and after the change) when a section change is performed with any of the following methods:

- Student in the Portal
- Staff member in the Portal
- In CampusNexus Student

This includes classes with multiple meeting periods scheduled on the same day. Class records are available for editing, display, and reporting regardless of the student attending or not attending an available course section. All eligible classes from the original section a student transferred from remain eligible for attendance, even if attendance has already been entered for one meeting period that day.

To view or post attendance for a student in a selected class section:

1. Select a student.
2. Navigate to **View** > **Academic Records** > **Attendance**. The Student Attendance form is displayed.

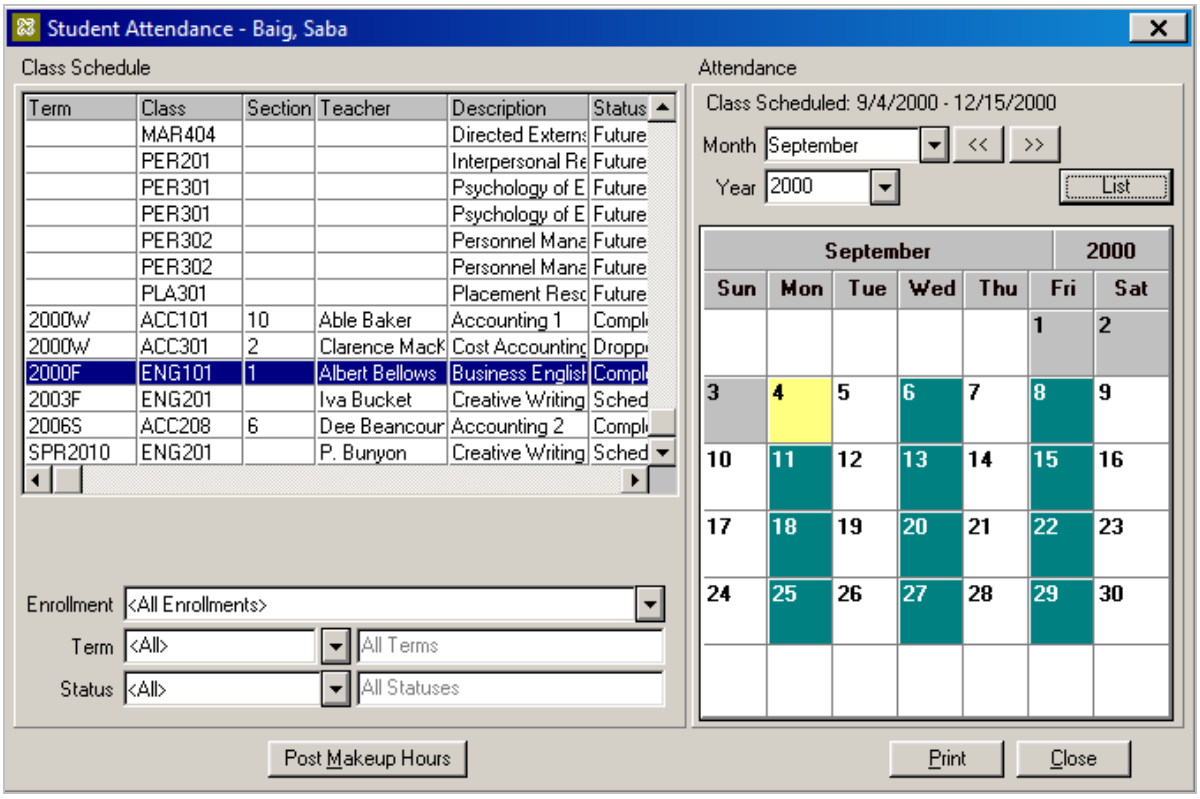


3. Click **Calendar** to see the student's attendance in a calendar-style format.

The color code is as follows:

- Yellow – The dates colored in yellow have had attendance posted.
- Green – The dates colored in green have not had attendance posted.
- White – No attendance is required on the dates colored white.
- Gray – Dates colored gray are before the start date of the class section or after the end date.

When the form is shown in this format, click **List** to return to the other format. Double-clicking a date also returns you to the List format.



4. Select the **Enrollment**, **Term**, and/or **Status** for which you want to view attendance. The list of class sections is displayed on the left side of the form under **Class Schedule**.

   Status on this form refers to the student's status in the selected class section. The options are:

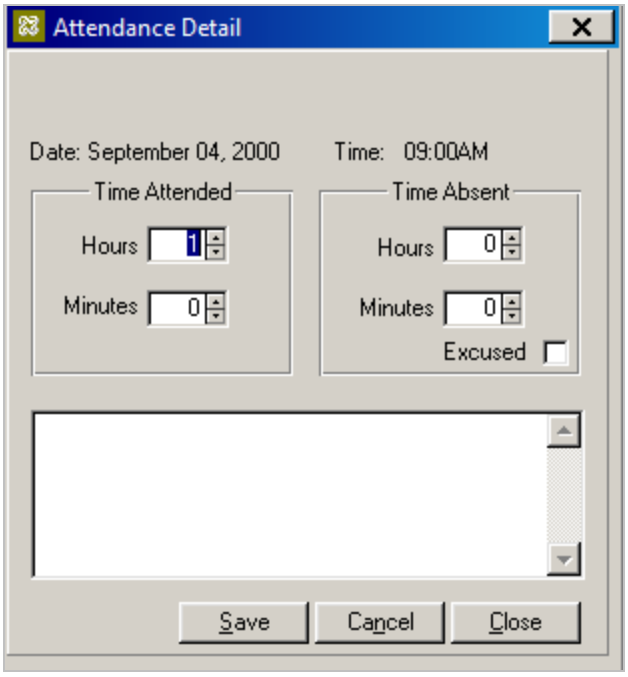
   - All
   - Currently Taking
   - Scheduled
   - Future-Not Scheduled
   - Dropped Class
   - Grade Posted
   - Leave of Absence

5. Select the **Year** and **Month** for which attendance is to be reviewed. The date range in which the class is offered is shown at the top right side of the form.

6. For any selected date on the Attendance grid, double- click it or click **Post Externship Hours** to view the Attendance Detail form.

Note: The name of the button is **Externship Hours** or **Online Hours** depending on how the course was set up in Lists > Academic Records > Courses.

7. On the Attendance Detail form, enter **Time Attended**, **Time Absent**, and mark an absence as **Excused**. You can also enter a comment to explain the entry.



Note regarding attendance posting and impact on conditional courses:
The Save functionality on the Attendance Detail form is such that the course will be dropped automatically on attendance posting if the student's absence time is greater than or equal to the time configured on the Class Schedule Attendance Rules tab. Excused absences are excluded from the auto drop process.

If this course is a prerequisite course, and if the campus is configured accordingly (see Descriptions of Fields on the SAP/Grades/Registration Tab), conditional courses will be automatically unregistered when this prerequisite course is automatically dropped due to attendance rules that cause the prerequisite rule to fail.

Note regarding students earning by Attended Hours:
A check is performed to see if Prevent Attendance Posting is enabled. If so, a further check is performed to determine whether the user has permission to post against the date selected if the date selected is prior to the campus Last Earn Date. If the date selected is between the begin and end date of the unexpired records, the user is allowed to post. Otherwise, the custom message or the default message is displayed, depending on the configuration.

Note: The system date and time at which the transfer section occurred governs what attendance can be entered for a student for a specified section. Attendance remains with the original section once a transfer section occurs. If a user does not desire to retain attendance records, use unregister and register rather than transfer section.

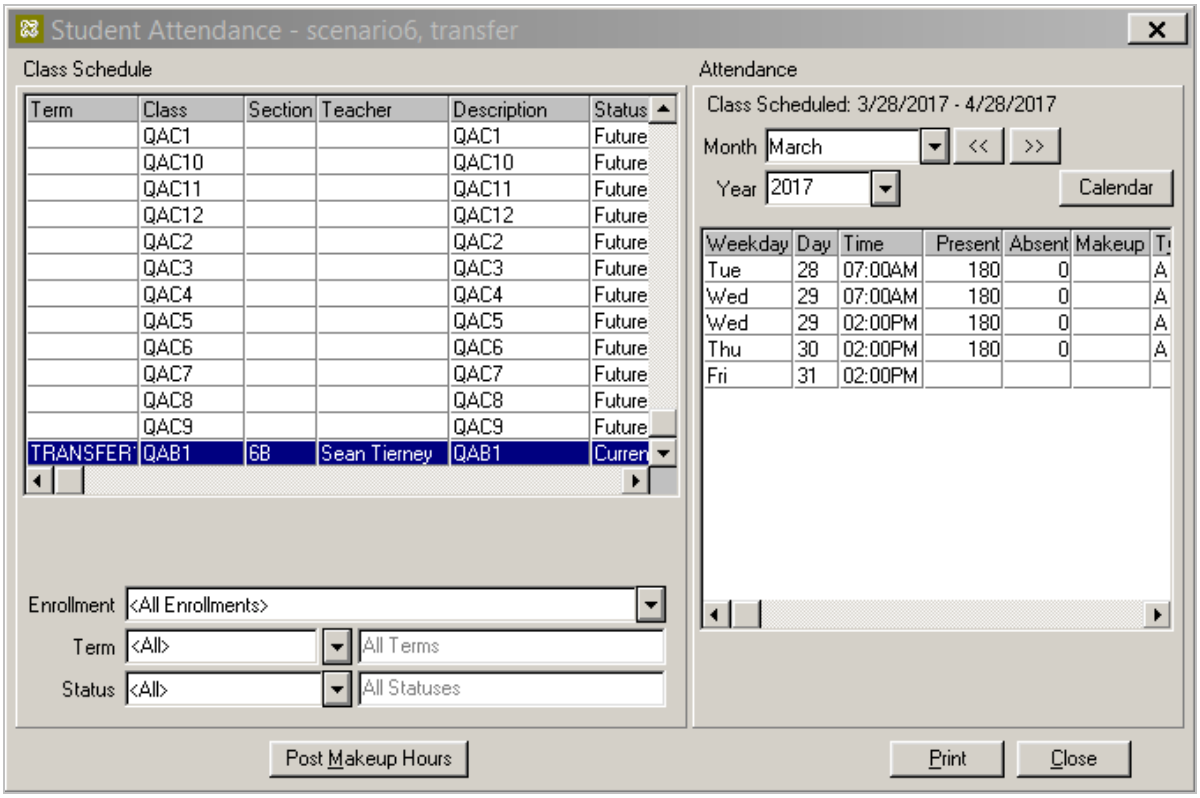
For example

A student is registered in Section A, meeting at 7:00 a.m. for 3 hours (180 minutes) on Monday through Friday, and transfers to Section B, meeting at 2:00 p.m. for 3 hours (180 minutes) on Monday through Friday, with the transfer taking place at 12:00 p.m. on Wednesday.

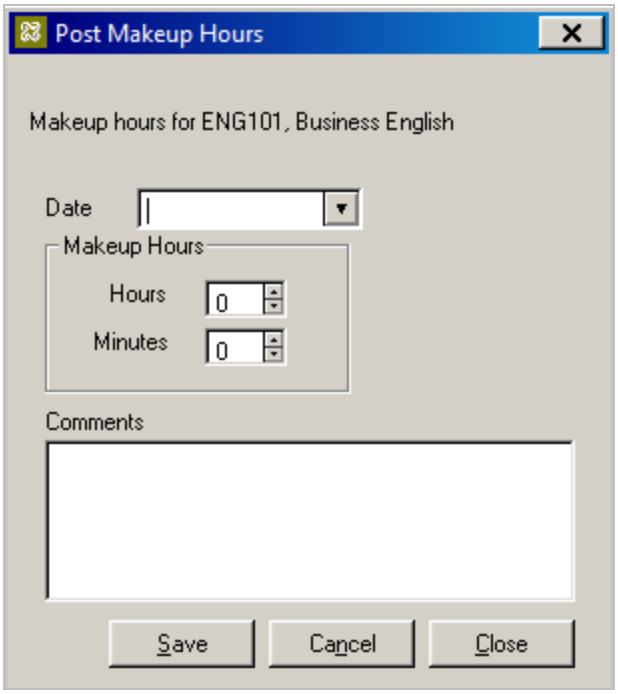
The following highlighted days and times should have attendance available for entry:

Transfer occurs at 12:00 p.m. Wednesday					
Monday	Tuesday	Wednesday	Thursday	Friday	SECTION
7:00 a.m.	7:00 a.m.	7:00 a.m.			A
		2:00 p.m.	2:00 p.m.	2:00 p.m.	B

The student's attendance from the prior section will continue to show on the View > Attendance form if attendance was entered prior to the transfer. If attendance needs to be posted for the dates registered in the prior section, the user will have to post that attendance through Daily >Academic Records > Attendance or through the Staff Portal.



8. You can post makeup hours by clicking **Post Makeup Hours**. The Post Makeup Hours form is displayed.



Note: If the Makeup hours date is AFTER the student's last date of attendance (LDA) or the student's last date of attendance has not been defined, and the status is "Current", "Complete", or "LOA", then the LDA date on the enrollment folder is updated.

Note regarding students earning by Attended Hours:
A check is made to determine whether the date entered is prior to the Last Earn Date for the campus. If so, and the student is earning by Attended Hours, then another check is performed to see if the user has permission to post attendance for the date entered. If the date selected is between the begin and end date of the unexpired records, then the user is allowed to post. Otherwise, the custom message or the default message is displayed, depending on the configuration.

9. Click **Save** to save any changes you made to Post Makeup Hours.
10. Click **Save** to save any change you made to the Detailed Attendance record.
11. After selecting a class section, year, and month, click **Print** to print a list of the student's attendance records for the month.

    Note: If the student's attendance record has old attendance data that has been archived, the words **Archived Attendance** will appear on the form. An additional button, **Recall Attendance**, will appear at the bottom of the form to allow you to retrieve old attendance data from the archive records, if necessary.

    This report enables you to quickly review detailed attendance for an individual student. When the **Print** button is selected, a drop-down list is displayed including Schedule, Attendance, Lesson Status, and Lesson Labels. When the user selects **Attendance**, this report will be run.

Lessons

The Student Lesson Schedule form is used to monitor progress on lessons, exams, and book reports undertaken by the student.

If your institution has set up a minimum number of days between lessons, you may not be able to receive a lesson that has been sent in prematurely. Lessons cannot be received after the end date of the course unless an extension is granted. The system administrator determines the maximum number of extensions under Setup > Distance Education.

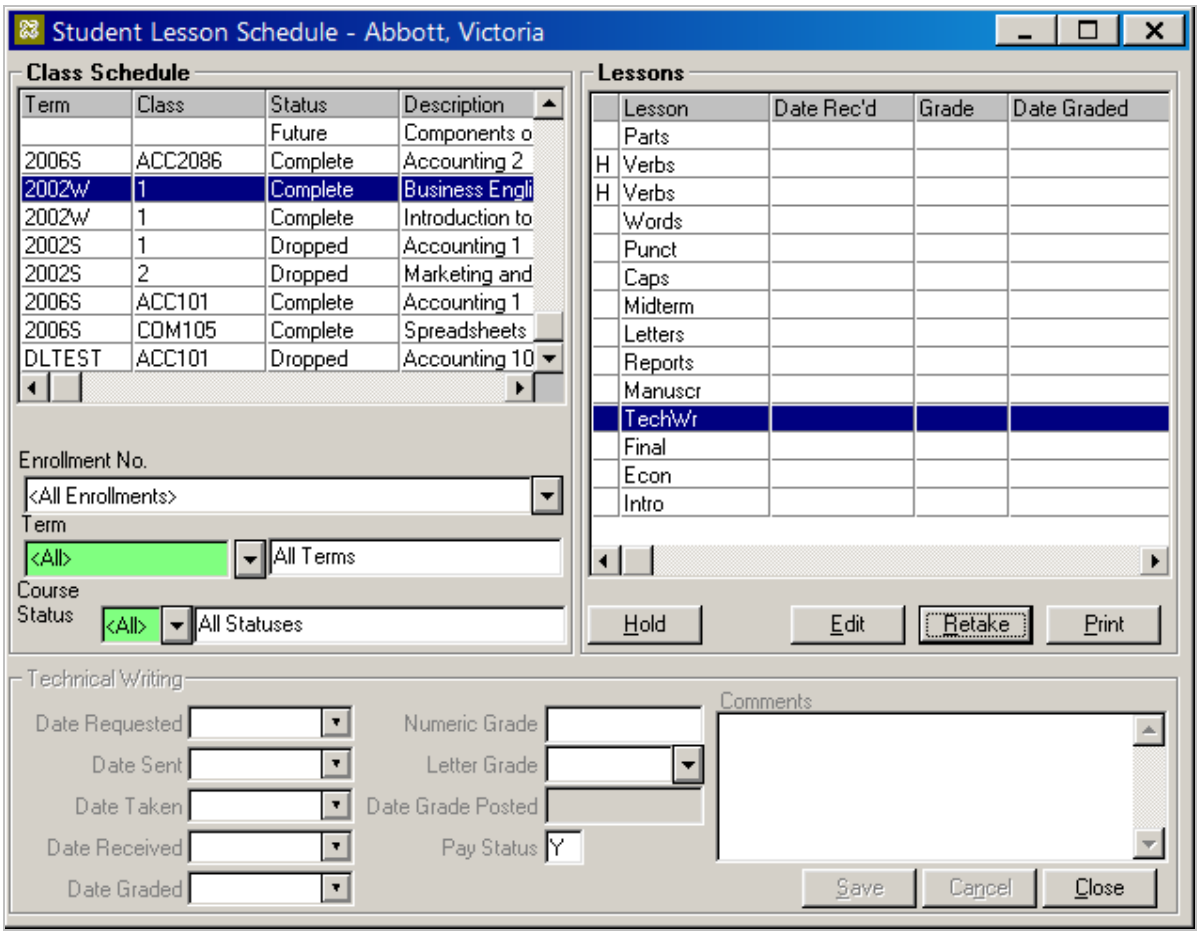
If the student has a ledger balance that is greater than zero, lessons cannot be received. You can, however, post grades for lessons that have been received.

A student group based on ledger balance can be set up to inhibit the posting of lesson grades.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

To view or update lesson data for a student:

1. Select a student.
2. Navigate to **View** > **Academic Records** > **Lessons**. The Student Lesson Schedule form is displayed. If necessary, filter the display by selecting the **Enrollment ID**, **Term**, and **Lesson Status**.



3. Select a row on the **Class Schedule** grid. This grid lists the student's class sections. The **Class** column shows the

combined Course Code and Section Code. The list of lessons for the selected class section is displayed.

4. Select a row on the **Lessons** grid. At the bottom of the form, any previously entered data for the selected lesson is displayed.
5. Click **Edit** to enter new data for the lesson.
6. In the **Date Requested** field enter the date when the student requested the lesson.
7. In the **Date Sent** field enter the date when the lesson is sent to the student.

   CampusNexus Student validates the Date Sent and Date Received. It does not allow the dates entered to be after the Expected End Date for the course. If you are an Administrator, you can continue by selecting "Yes" in the warning message. All other users have to enter dates on or before the end date of the course.
8. If the selected Lessons row is an exam, enter the **Date Taken**.
9. In the **Date Received** field enter the date when the lesson is returned to the institution by the student.
10. In the **Date Graded** field enter the date when the instructor returns the graded lesson.
11. Enter the **Numeric Grade**. When numeric grades are used, CampusNexus Student inserts the corresponding letter grade.

    Note: While posting grades for students, user cannot post the lesson grades for a student if the course is being taken as an audit.
12. If your institution uses only letter grades for lessons, select the **Letter Grade**. CampusNexus Student inserts the **Date Grade Posted**. This date indicates the date when the grade letter was recorded. This is the date used to produce daily grade reports.
13. Enter the **Pay Status** code. Enter Y for yes or N for no. CampusNexus Student changes the Pay Status to P for Paid when the instructor has been paid for grading the lesson.
14. Enter any comments in the **Comment** field. The field can hold up to 2000 characters.
15. When necessary, you can place lessons on hold. Select the lesson and click **Hold**. An H is displayed to the left of any lesson that is on hold and the hold date is added to the comments. The label on the Hold button changes to **Release**. When you release the lesson, the release date is added to the comments.
16. Click **Retake** if the student is retaking the lesson or exam.

    Fees for retaking lessons can be set up for the course under Lists > Student Accounts > Billing Methods and Programs. The billing method must be by course. The transaction code for the lesson retake is LESSONR. The code for exam retakes is EXAMR. These codes are added to the costs for a program version in Student Accounts.
17. If the student is granted an extension of time to complete the course, a charge may be levied on each lesson that is not yet received at the time of the extension. See Course Extensions for more detail.
18. Click **Save** to save any data changes you entered.
19. Click **Print** to print a Course Lesson Log for the student.

Final Grades

The Final Grades form lists all courses for the selected student. You can filter the courses by enrollment, degree level, term, or course status. For each course, the grid displays the term, course code, section, description, numeric grade and letter grade (if they have been entered), and other pertinent data about the students scheduled courses. The form also displays retake courses.

The Final Grades form allows you to include or exclude students that have dropped a course. The default setting is to include the drops. The Status column shows the student's status in the class (Scheduled, Current, LOA, etc.). When posting the grades, if the student status in class is Dropped, it cannot be changed here. The only way to reinstate (undrop) a course is through the Schedule form. The grade information from dropped courses is included when calculating the student's GPA.

You can also post final grades in batch mode from the Daily > Academic Records > Final Grades option. The form shown here is used when you want to enter or edit a grade for an individual student as opposed to groups of students such as class sections.

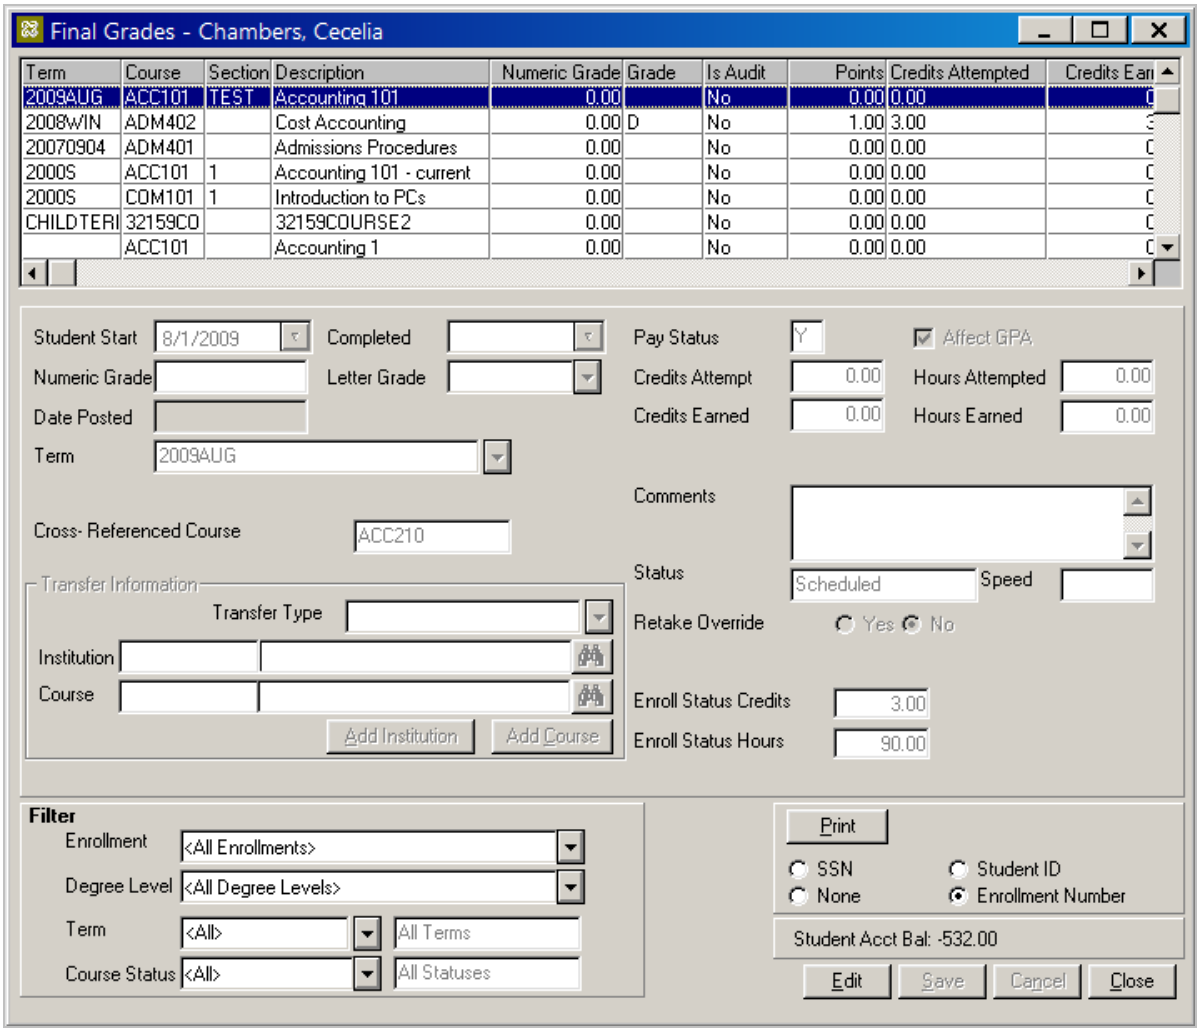
You can print a **Report Card** or a **Transcript** for the selected student. (Report Cards and Transcripts can also be printed from the Reports menu.) If the student has a Grade Delivery address on record, that address is printed on the Report Cards and Transcripts. The transcript may be **official** or **unofficial** depending on the user's selection. The transcript and report card include all dropped courses. Dropped courses are flagged with (**Dropped) on the report card.

If the student is on hold for transcript printing, CampusNexus Student does not allow the transcript to be printed. If you created a custom transcript and entered the file name under Setup > Academic Records, CampusNexus Student uses your report instead of the generic report.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

To enter or edit a final grade for a student's class section:

1. Select a student.
2. Navigate to **View** > **Academic Records** > **Final Grades**. The Final Grades form is displayed.



3. To filter the list of courses, select the **Enrollment**, **Degree Level**, **Term**, and **Status**.
4. Double-click a **Course** to edit the Final Grade. Enter the grade data, dates, and credit data. If a final grade is already on file, a message is displayed. You can override the message and post the new grade.

   Letter grades are converted to upper case during data entry so that the grades can be properly validated in the Letter Grade table.

   Numeric grades that are posted in fractions are rounded to two decimal places, for example. 87.25.

   Note: You cannot edit the **Numeric Grade** field for an audited course.
5. **Incomplete Grades**: The option to calculate and extend the expiration deadline date allows you to edit the expiration deadline date while posting an incomplete grade. Upon posting an incomplete grade, the expiration deadline date is calculated if the number of days to calculate the expiration date is configured on the Grade Scale, Course, or Campus Locations. The expiration deadline date cannot be edited if you do not have the staff level override permissions. If you have the override permissions, you can override the expiration deadline date within the maximum number of days configured for override on Campus Locations at the time of extending the deadline date.

   Note: The expiration deadline date can also be calculated or edited in a batch.
6. A manual replacement of an incomplete grade is also available so an instructor can change the incomplete grade to

the other grade if the student submits the course work on or before the "Expiration Deadline Date." Additionally, if the replacement grade is not configured on the grade scale, the incomplete grade is not automatically replaced by the replacement grade past the expiration deadline date if it has not been manually replaced to any non incomplete grades.

7. CampusNexus Student calculates the expiration deadline date based on the following hierarchy while posting an incomplete grade:

    a. Grade Scale configuration of Number of days past course section end date
    b. Course configuration of Number of days past course section end date
    c. Campus Locations configuration of Number of days past course section end date.

8. CampusNexus Student updates the **Date Completed** and **Date Posted**. By default the Date Completed on the student's Final Grades form is the End Date of the course. You can change the date when you post the final grade.

9. CampusNexus Student checks **Affect GPA** by default. If you do not want the grade to affect the student's GPA, clear the Affect GPA check box.

    Note 1: The **Affect GPA** option is disabled if the student selects an Audit course or to indicate that the grade will not be included in the student's GPA calculation, but the student will still have credits earned/attempted for the course, which will be included when evaluating SAP, as per the grade scale configuration.
    When the Clock to Credit option is ON for the enrolled program version, the Outside Coursework Hours and Total FA Hours fields are displayed. The user can enter in 5 minute increments as expressed in hour decimals (e.g., 10 minutes is 0.17 hours).

    Note 2:

    - When CEFP Configuration is ON, the Total Fa Hours = Outside Coursework Hours + Enroll Status Hours.
    - When CEFP Configuration is OFF, the Total Fa Hours = Outside Coursework Hours + Earned Hours when final grade was posted, otherwise Schedule Hours.

10. The **Pay Status** field indicates that the instructor should be paid (Y), should not be paid (N), or has been paid (P).

11. Enter any comments in the **Comment** field.

12. The student's status in the class selected is displayed in the **Status** field. It is read-only. When editing the grade, if the Student Status in Class is Dropped, you cannot change the status to Complete. The only way to reinstate (undrop) a course is through the Schedule form.

13. Click **Save**.

    Note: Upon saving Final Grades, CampusNexus Student evaluates if a prerequisite rule failed due to grade posting or credits/hours. If the campus is configured to do so, conditional courses are automatically unregistered if the pre-requisite rule fails. The reason for the automatic unregistration is populated as configured at the campus level.

14. To post a transfer grade for a selected course, select **T** in the Letter Grade field. The fields in the Transfer Information section are enabled.

    Note: The transfer grade must be flagged as such when setting it up under Grade Scale.

    a. Select the **Transfer Type** (College or High School).

    b. Click next to the **Institution** field. The corresponding search form (Search College or Search High School)is displayed. Enter the search criteria and click **Search**. Choose the institution from the search

results and click **Select**. The selected institution is placed in the Institution field.

c. Click next to the **Course** field. The course search form is displayed. Enter the search criteria and click **Search** . Choose the course from the search results and click **Select**. The selected course is placed in the Course field.

Note: The institutions and courses they offer are stored in the CampusNexus Student database. If a course needs to be transferred from a school that is not in the database, enter information directly into the **Institution** and **Course** fields, or click the Add Institution / Add Course buttons. The institution must be added first followed by the course. When you click **Add Institution** the Colleges form is displayed. When you click **Add Course** College Course form is displayed. For more information, see Setup - Admissions Lists [Colleges].

15. The **Enroll Status Credits** and **Enroll Status Hours** fields display the credits and hours that CampusNexus Student uses to calculate enrollment status for financial aid purposes.

    If you want CampusNexus Student to calculate an enrollment status for financial aid purposes that may be different than the actual academic credits or hours that a student has enrolled in (for instance, if a student is enrolled in a non-academic credit graduate level internship or remedial skills class required by an academic program), enter the number of credits or hours that CampusNexus Student should use to calculate an enrollment status.

16. When you are not editing a grade for a class section, click **Print** and select one of the options to preview and/or print the selected document. The options include:
    - Report Card
    - Transcript options (based on configuration - see below)
    - Academic History and Advisory Report options

    When transcript configuration of the campus is set to Enrollment Based, CampusNexus Student defaults to the current enrollment when printing a transcript. If the student is in a Hold Group, you cannot print transcripts unless you have authorization to override a transcript hold. See User Info Academic Records to set up these permissions. See also Academic Records Hold Codes Setup, Setup > Academic Records > Transcripts and custom transcripts for system administrator setup instructions for transcripts.

    - The transcript shows the Catalog Code for the course (if there is a value in the Catalog Code field). If there is no value in Catalog Code, the Code is printed.
    - If the student is enrolled in a program with a specific Transcript Description, the transcript displays the Transcript Description. Otherwise, the transcript displays the Version Description.
    - The generic Transcript report uses the Official School Name. If you are using a custom transcript report, change it to use the Official School Name instead of the Campus Description field. Transferred course work is included in the transcript. The GPA calculation includes transfer credits in the credits earned if the grade setup indicates to do so.

    When transcript configuration of the campus is set to **Student Based**, the Print menu provides **Transcript** as the only transcript-related option.

    When the transcript format is configured to **Both Enrollment Based** and **Student Based**, the Print menu provides the following transcript-related options:

    - **Enrollment Based Official Transcript**
    - **Enrollment Based Unofficial Transcript**
    - **Student Based Transcript** - with submenu options **All** and **Degree Level**. Degree Level is the degree level

associated with a student. For example, if a student has an enrollment with a program version tied to a degree that has been designated as an undergraduate degree, the menu option is 'Undergraduate.' There is one menu option for each distinct degree level associated with a student. If a student has two undergraduate enrollments and one graduate enrollment, the options are 'Undergraduate' and 'Graduate.'

Degree Progress Audit Form

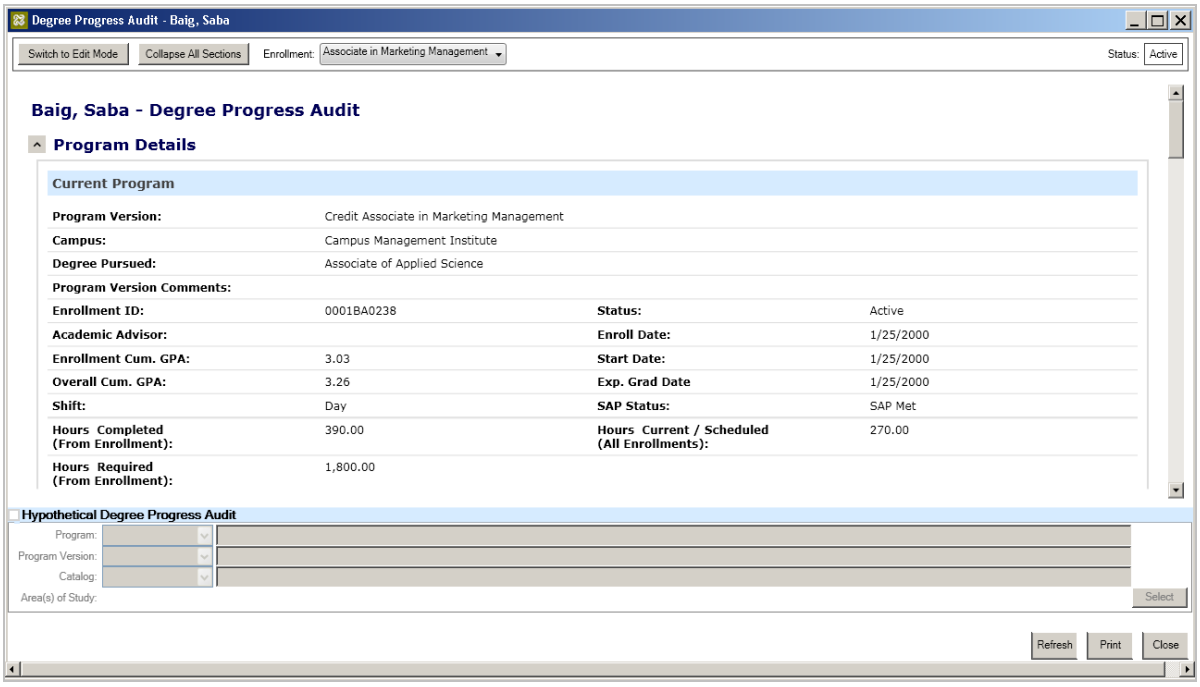
The Degree Progress Audit form is a multisection form showing a student's progress toward completion of degree requirements based on enrollment. A series of expandable/collapsible sections are provided to view and/or edit Program Details, Student Academic Progress, Course Categories, Required Courses, and Requirement Rules.

When the Degree Progress Audit form is first opened, CampusNexus Student defaults to the current enrollment. If the student has more than one enrollment, the enrollment can be selected from a drop-down list. The course categories required for the program version are displayed in the order they were set up for the program version. Within each category, courses are displayed in alphabetical order according to course code. For each course, the form displays the student's status for the course (Future, Scheduled, Current, Completed, or Dropped). Dropped courses always appear as Unfulfilled, as do failed courses and courses not meeting minimum GPA requirements. All courses are included, regardless of the enrollment record for which the course was taken or scheduled.

Program Details

The Program Details section shows information about the Current Program: Program Version, Campus, Degree Pursued, Program Version Comments, Enrollment ID, Status, Academic Advisor, Enroll Date, Enrollment Cum. GPA, Start Date (Expected Start Date if the student has not yet started), Overall Cum. GPA (configurable), Grad Date (Expected Grad Date if the student has not yet graduated), Shift, SAP Status, Credits Completed (From Enrollment), Credits Current/Scheduled (All Enrollments), and Credits Required (From Enrollment).

If the Program Version is set up as a clock hour program, CampusNexus Student displays hours instead of credits. Also, the Catalog Description and/or Areas of Study with AOS GPAs are displayed when applicable.



Credits Completed (From Enrollment) shows the total number of credits earned for the enrollment as seen on the Progress tab of the Enrollment folder, regardless of what has been applied to the Degree Progress Audit. This may be different than the credits completed in the Course Categories Summary section if the enrollment has courses associated that do not fulfill any program requirement, or courses from other enrollments that fulfill requirements of the current enrollment.

Credits Required (From Enrollment) shows the total number of credits required for the enrollment as seen on the Progress tab of the Enrollment folder. This may be different than the credits required in the Course Categories Summary section if there are waived or manually added courses on the Degree Progress Audit and the user has not elected to update the total credits required for the enrollment, or if the Total Required Credits has been changed from the Enrollment folder. Although this number

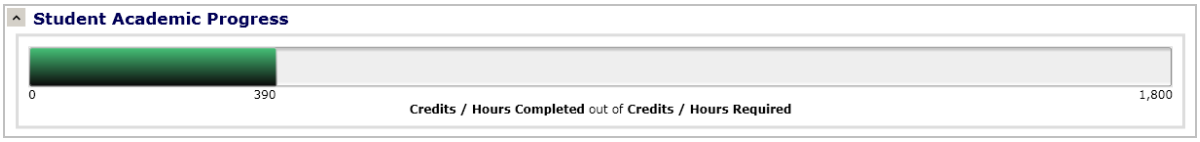
originates from the program version set up at the time of enrollment, based on the aforementioned reasons, or if the program version has been revised, this number could also differ from the required credits saved on the program version set up.

Credits Current/Scheduled (All Enrollments) will equal the Total of Credits for courses in a current or scheduled status within the Degree Progress Audit's required course lists.

Student Academic Progress

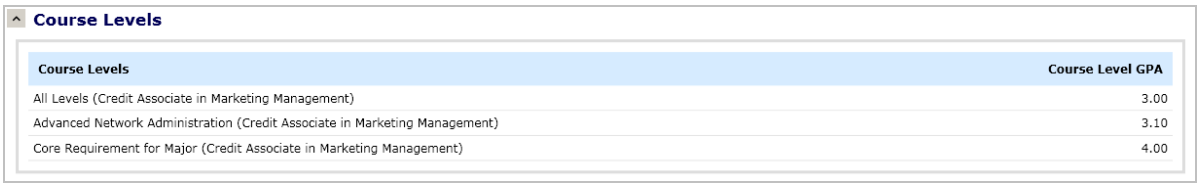
The Student Academic Progress bar provides a graphical representation of the student's progress towards completing their program requirements.

Note: The Credits/Hours represented in this graph are based on the values from the Enrollment folder.



Course Levels

The Course Levels section will only appear if the Degree Progress Audit is enabled with the Course Level GPA setting. It will list all Course Levels that apply to the student's taken required courses. For each course level, a corresponding GPA will be calculated and displayed. The method for calculating the Course Level GPA is derived from the program version setting (weighted vs. unweighted).



Course Categories/Areas of Study

The Course Categories/Areas of Study section lists all required Course Categories and Areas of Study (if defined) as configured in the Program Version Setup at the time of enrollment. Subsequent revisions to a program version's requirements will not impact the student's Degree Progress Audit, unless the Update Required Course Lists tool has been run. (See Program Revisions and the Degree Progress Audit). Course Categories might include, for example, General Education Requirements, Core Courses, Elective Courses, etc. For each category, a summary line will be shown indicating the name of the program or area of study the category Applies To, the Course Category name, Credits/Hours Required, (+)Credits/Hours Added, (-)Credits/Hours Waived, (-)Credits/Hours Completed,
(-)Credits/Hours Current/Scheduled, (=)Credits/Hours Remaining, and a calculated Course Category GPA.

The Credits (Hours) Required reflect the requirements defined for each category on the program version at the time of the student's enrollment. Subsequent revisions to a program version's category requirements will not impact the student's Degree Progress Audit, unless the Update Required Course List Tool has been run (See Program Revisions and the Degree Progress Audit). It is also important to note that the credits required will not be impacted by the addition of courses or waiving of courses, because they are meant to reflect the program's requirements, not what the individual students will take to meet the program's requirements.

Credits (Hours) Added is the sum of all credits (hours) for courses that have been manually added to the Degree Progress Audit.

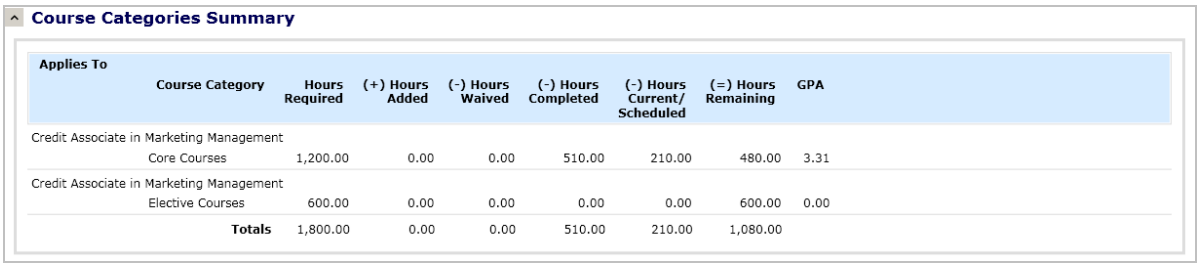
Credits (Hours) Waived is the sum of all credits (hours) for courses that have been manually waived on the Degree Progress Audit.

Credits (Hours) Completed is the sum total of credits (hours) earned on courses that fulfill the Degree Progress Audit's required courses.

Credits (Hours) Current/Scheduled is the total number of credits (hours) in a current or scheduled status for courses within the Degree Progress Audit's required course lists.

Credits (Hours) Remaining indicates the number of credits (hours) that the student still needs to schedule and complete to fulfill their program requirements. Its value is calculated as follows:

Credits (Hours) Remaining = Credits (Hours) Required **plus** Credits (Hours) Added **minus** Credits (Hours) Waived **minus** Credits (Hours) Completed **minus** Credits (Hours) Current/Scheduled.



Course Categories Summary

Applies To / Course Category	Hours Required	(+) Hours Added	(-) Hours Waived	(-) Hours Completed	(-) Hours Current/ Scheduled	(=) Hours Remaining	GPA
Credit Associate in Marketing Management							
Core Courses	1,200.00	0.00	0.00	510.00	210.00	480.00	3.31
Credit Associate in Marketing Management							
Elective Courses	600.00	0.00	0.00	0.00	0.00	600.00	0.00
Totals	1,800.00	0.00	0.00	510.00	210.00	1,080.00	

Course Category Course Lists

For each Course Category, a list of courses applicable to that category is displayed. The information displayed includes Course, Course Title, Course Level (only if configured to calculate Course Level GPA), Credits or Hours, Credits Earned or Hours Earned, Status, Grade, Term, Completion Date, and Min. GPA.

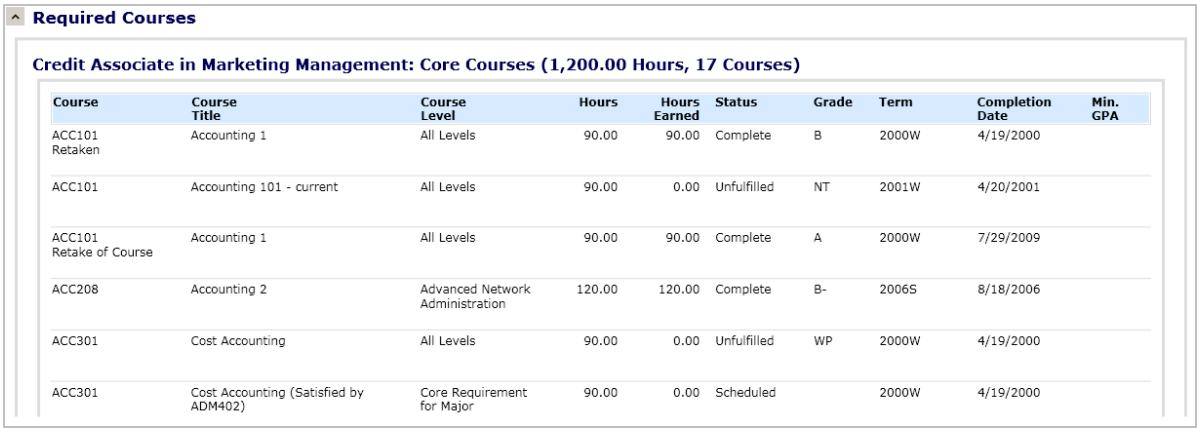
Courses that have been substituted, transferred, or audited are indicated in the Degree Progress Audit.

If a variable credit course is required as part of the program, all taken instances of the course will be applied to the course category until the credits required (specified on the program version course list configuration) are successfully earned.

The Course Category Header (Number of Credits and Number of Courses) is based on the program version at the time of the student's enrollment. These values do not change with the addition, waiving, or substitution of courses, so they may potentially be different than the calculated value based on actual courses required in the course list.

Credits (located at the bottom of every course category course) list are equal to the sum of the credits within the required course list that have not been waived. For courses that have been taken, this total will only include the credits from the required instance of the course.

Credits Earned (located at the bottom of every course category course) list are equal to the sum of the credits earned within the required course list.



Required Courses

Credit Associate in Marketing Management: Core Courses (1,200.00 Hours, 17 Courses)

Course	Course Title	Course Level	Hours	Hours Earned	Status	Grade	Term	Completion Date	Min. GPA
ACC101 Retaken	Accounting 1	All Levels	90.00	90.00	Complete	B	2000W	4/19/2000	
ACC101	Accounting 101 - current	All Levels	90.00	0.00	Unfulfilled	NT	2001W	4/20/2001	
ACC101 Retake of Course	Accounting 1	All Levels	90.00	90.00	Complete	A	2000W	7/29/2009	
ACC208	Accounting 2	Advanced Network Administration	120.00	120.00	Complete	B-	2006S	8/18/2006	
ACC301	Cost Accounting	All Levels	90.00	0.00	Unfulfilled	WP	2000W	4/19/2000	
ACC301	Cost Accounting (Satisfied by ADM402)	Core Requirement for Major	90.00	0.00	Scheduled		2000W	4/19/2000	

Note: Any transfer status code that is configured to display on the Degree Progress Audit (**Lists** > **Admissions** > **Transfer Status**), and the corresponding college information that is posted in the student's Transfer Credits folder, is displayed on the Degree Progress Audit in a separate row under the **Course/Course Title** headings, (including the Hypothetical DPA).

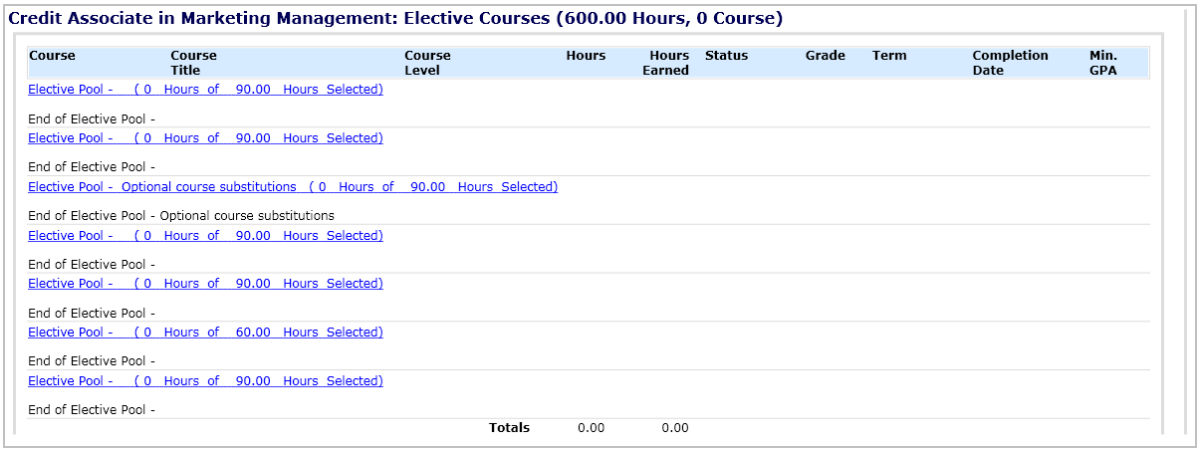
Course Category with Electives

When a category has a pool of elective courses that may be selected, an Elective Pool header is shown, listing the number of credits selected and the number of credits required from that elective pool. Each course that has been manually selected from a

specific elective pool is displayed, along with the Course, Course Title, Course Level, Credits or Hours, Credits Earned or Hours Earned, Status, Grade, Term, Completion Date, and Min. GPA. Taken courses from the Schedule folder that have not been manually applied to an Elective Pool, but could potentially satisfy the Elective Requirement, will be automatically matched to the Elective Pool.

Note regarding automatically applied courses vs. manually applied courses:

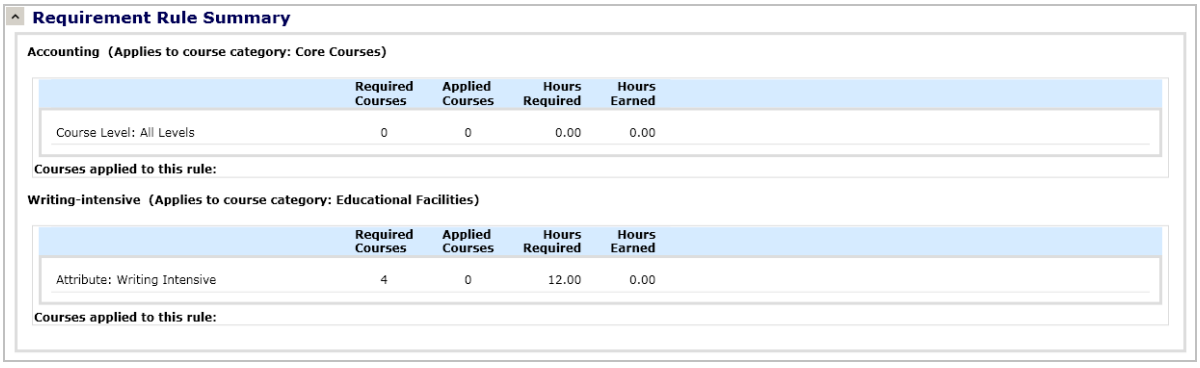
To distinguish between automatically applied courses and manually applied courses, check whether the course code becomes a hyperlink when viewed in Edit Mode. Automatically applied courses will not show a link to open the Fulfillment form. To enable a hyperlink, the course must be manually applied to the elective (thus confirming it is indeed an appropriate match for satisfying the elective requirement).



Requirement Rules

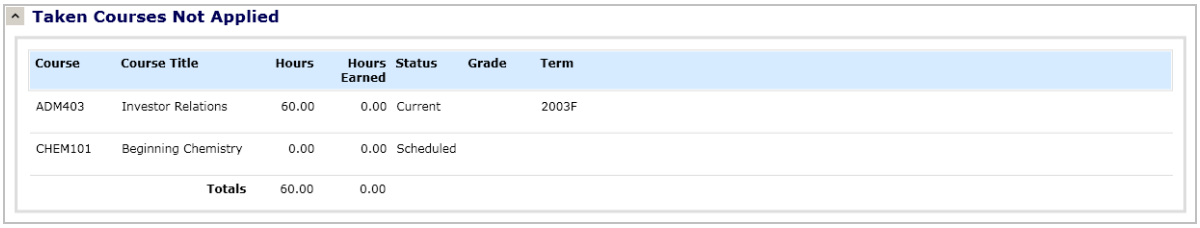
If a Program, Course Category, or Area of Study has Requirement Rules, they are displayed in the Requirement Rule Summary section.

The Degree Progress Audit displays the rule name associated with the program, course category, and/or Area of Study. Each rule shows its criteria in detail (course attributes with total credit or hours/course values required, and course levels with total credit or hours/course values), and how many courses/credits or hours have been taken to satisfy the conditions of the rule. The courses that were taken to satisfy the rule are also displayed. If there are more courses taken than are needed to satisfy a rule, the summary will display only the required amount of courses taken (chronologically, starting with the first course taken).



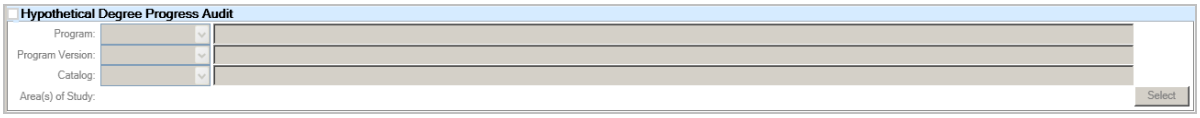
Taken Courses Not Applied

The Taken Courses Not Applied section displays all taken courses that have not been applied to the student's program. The information displayed includes Course, Course Title, Credits or Hours, Credits Earned or Hours Earned, Status, Grade, and Term. Transfer information that has been configured to display on the Degree Progress Audit is also included in this section.



Hypothetical Degree Progress Audit

An option at the bottom of the Degree Progress Audit form enables the user to perform a Hypothetical Degree Progress Audit. In the hypothetical scenario, the user selects a different Program, Program Version, Catalog (when applicable), and/or Area of Study (when applicable). The output is then generated by comparing the student's Enrollment Schedule records to the program course records for the program version selected. The result is a picture of how the student's work to date would fit in to the selected program version, including taken courses that could satisfy an elective pool.



Details for Additional GPAs

The system will display any new GPAs on the Degree Progress Audit (and Report Cards) if configured to do so. Each time a grade is posted, the system will automatically determine which new GPA should be recalculated with the newly graded course included. The system will automatically calculate and store the newly created GPAs for all applicable students. GPAs will be calculated using all final grades for all courses marked to be included in the GPA calculation. A stored GPA will be overwritten each time it is recalculated.

Course Order in the DPA

When courses are completed by a student, these courses may be available in multiple places in the Degree Progress Audit. When a course appears in more than one place (category, elective pool, etc..), the DPA priority order determines where the course is assigned first. After this, reassignment can be done through fulfillment logic (in the Fulfillment form).

The DPA priority order for course assignment is as follows:

1. Required Course list for the Program Version for Course Categories marked as Core.
2. Required Course list for the Program Version for Course Categories not marked as Core.
3. Elective Pools in Course Categories for the Program Version marked as Core.
4. Elective Pools in Course Categories for the Program Version not marked as Core.
5. Required Course list for an Area of Study with a Type of Major for Course Categories marked as Core.
6. Required Course list for an Area of Study with a Type of Major for Course Categories not marked as Core.
7. Required Course list for an Area of Study with a Type of Minor for Course Categories marked as Core.
8. Required Course list for an Area of Study with a Type of Minor for Course Categories not marked as Core.
9. Required Course list for an Area of Study with a Type of Concentration for Course Categories marked as Core.
10. Required Course list for an Area of Study with a Type of Concentration for Course Categories not marked as Core.
11. Required Course list for an Area of Study with any other Type besides Major, Minor or Concentration marked as Core.
12. Required Course list for an Area of Study with any other Type besides Major, Minor or Concentrator not marked as Core.
13. Elective Pools in Course Categories for an Area of Study with a Type of Major marked as Core.
14. Elective Pools in Course Categories for an Area of Study with a Type of Major not marked as Core.
15. Elective Pools in Course Categories for an Area of Study with a Type of Minor marked as Core.
16. Elective Pools in Course Categories for an Area of Study with a Type of Minor not marked as Core.
17. Elective Pools in Course Categories for an Area of Study with a Type of Concentration marked as Core.
18. Elective Pools in Course Categories for an Area of Study with a Type of Concentration not marked as Core.

19. Elective Pools in Course Categories for an Area of Study with any other Type besides Major, Minor or Concentration marked as Core.
20. Elective Pools in Course Categories for an Area of Study with any other Type besides Major, Minor or Concentration not marked as Core.

Degree Progress Audit Logic

The Degree Progress Audit (DPA) is a student/enrollment-centric process that tracks a student's progress toward completion of their degree requirements. The DPA assigns courses in a student's schedule to appropriate categories depending on a set of requirement rules that apply to the specific (or hypothetical) enrollment.

Completed courses in a student's schedule that fulfill a category course requirement are automatically assigned to that category if they are equivalent to the required course. Taken required courses, taken courses that are equivalent to a required course, and taken courses that exist in an elective pool are automatically matched to the requirement. Substitute courses, however, are not automatically matched. Taken courses that have not been applied to the requirements are displayed in the **Taken Courses Not Applied** section of the DPA form.

The Degree Progress Audit is student/enrollment-centric. When a student is enrolled, all requirements and Requirement Rules that exist on the Program Version at that moment are stored by enrollment for that student. The course requirements for the student will not change if modifications are subsequently made to the Program Version, Catalog Year, and/or Area of Study (AOS) Course Lists in which the student is enrolled. If a change is made to the Program Version requirements for the program the student is enrolled in, and the changes need to be applied to the student, the Update Required Course Lists tool should be used to rebuild the required course lists for all students to whom the change applies.

When changes are made to the student's Degree Progress Audit using Edit Mode, CampusNexus Student will automatically reflect these changes in the student's Schedule. If required courses are added, they will be placed in the student's Schedule with a status of Future. If courses are no longer required and are removed from the Degree Progress Audit, they will be removed from the Schedule folder as long as they have a status of Future. If the course has a status of Registered, Current, or Completed, it will remain in the Schedule folder.

Once changes have been made to the student's Degree Progress Audit, the student's enrollment requirements remain with the student and may (depending on the changes) be different than the original requirements of the student's Program Version, Catalog Year, and/or Area of Study.

Viewing a Degree Progress Audit

You can view the Degree Progress Audit for a student in any Program Version, Catalog Year, and/or Area of Study that has a rule (or rules) assigned to it. The Degree Progress Audit form always opens in View Mode; with appropriate permissions, you can switch to Edit Mode and make student-specific modifications.

To view a Degree Progress Audit:

1. Select a student.
2. Navigate to **View > Academic Records > Degree Progress Audit**.

   The Degree Progress Audit form for the current student is displayed in View Mode.

   Note: The Degree Progress Audit form can be expanded to full-screen view, making it easier to read.
3. If the student has more than one enrollment, select the appropriate **Enrollment** from the drop-down list.
4. Click the or button to collapse or expand the individual sections of the Degree Progress Audit form as needed.

   To collapse all sections at once, click the  button.

   When all sections are collapsed, the button change to so that all sections can be expanded in one step.

Note: If the Print option is selected, all sections of the form will be expanded before printing to ensure a complete view of the Degree Progress Audit.

Working with the Degree Progress Audit (Edit Mode)

When the Degree Progress Audit form is in Edit Mode, you can: enter a substitute course; transfer credits from another institution; add, waive, or fulfill course requirements; add or waive requirement rules; associate and/or unassociate courses to/from specific enrollments.

To work with the Degree Progress Audit:

1. Select the student whose Degree Progress Audit you would like to modify.
2. Navigate to **View** > **Academic Records** > **Degree Progress Audit**. The Degree Progress Audit form is displayed.
3. If the student has more than one enrollment, select the **Enrollment** from the drop-down list.
4. Click the **Switch to Edit Mode** button located at the top of the form. This enables the links that are associated with the course codes.

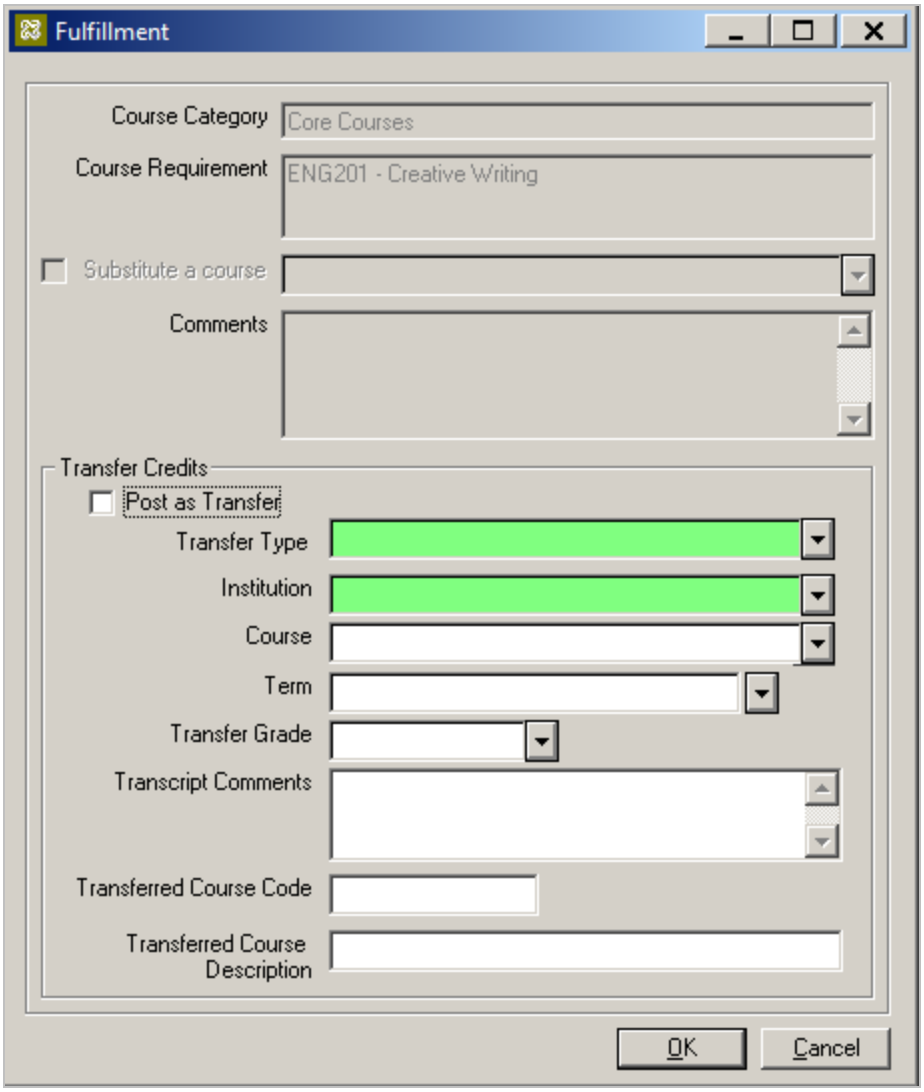
   The additional links displayed include:

   - Waive Requirement link or Undo Waive Requirement link at course level;
   - Add a course requirement link at the bottom of each Course Category section;
   - Associate link or Unassociate link at course level; associate or unassociate selected courses to/from specific enrollments from the Degree Progress Audit form;
   - Move to **Taken Course not Applied** link or **Undo Move to Taken Course not Applied** link. This allows the course to be moved from its current category to the Taken Courses not Applied section or back to its original configured category. This is used in non-term programs to alter student progression when 'Allow courses exempt from progression' is enabled. If the course was used to reduce program requirements already completed, such as a transfer credit course, this will trigger an adjustment of AY/LP sequences and their credits or hours and weeks.

   Note: Upon associating courses from the Degree Progress Audit form, the updated information is reflected on the Progress tab of the Enrollment form.

   - Fulfill Requirement link or Undo Fulfill Requirement at course level; allows the user to fulfill requirements from the Degree Progress Audit form, and to undo this action, if applicable. This functionality can be used to trigger a change in course progression when 'Allow courses exempt from progression' is enabled. A course that does not meet the minimum grade points configured in its original category, which would not progress the student, can fulfill a requirement in another category and allow the student to progress.
   - Elective Pool links in each Category, if applicable and if the program version allows elective courses;
   - Requirement Rules links are shown, if applicable, in the individual Course Categories containing the Elective Courses.
5. Depending on the requirements of the program version, different links are displayed with each course. If a course has **not yet been completed**, you may:

   - Perform a **Substitution** or post earned **Transfer Credit** on a Future or Scheduled course by clicking the **Course Code** on any row. The **Fulfillment** form is displayed.



- **To enter a substitute course:**

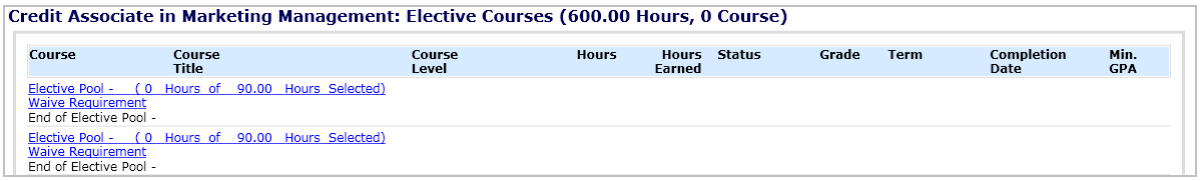
  Select the **Substitute a course** check box, and then select a course from the drop-down list. The selected course will be substituted for the course on the Degree Progress Audit.
  Note: This may only be done if substitutions are allowed for the course, as configured under Lists > Academic Records > Programs > Program Versions > Course List.

- **To transfer credits from another institution:**

  Select the **Post as Transfer** check box, then use the **Transfer Type** drop-down list to select the transfer type (College or High School). This will populate the **Institution** and **Course** drop-down lists accordingly. Select the **Institution** from which credits are being transferred, the **Course**, **Term**, and the **Transfer Grade**.If desired, you may enter **Transcript Comments**,**Transferred Course Code**, and a **Transferred Course Description**. The **Course** code entered would be the code indicated on the transcript of the institution from which the course was transferred. Select your school's term to which the transferred course applies. If necessary, enter **Transcript Comments** to explain the transferred grade. This comment will print on the transcript.

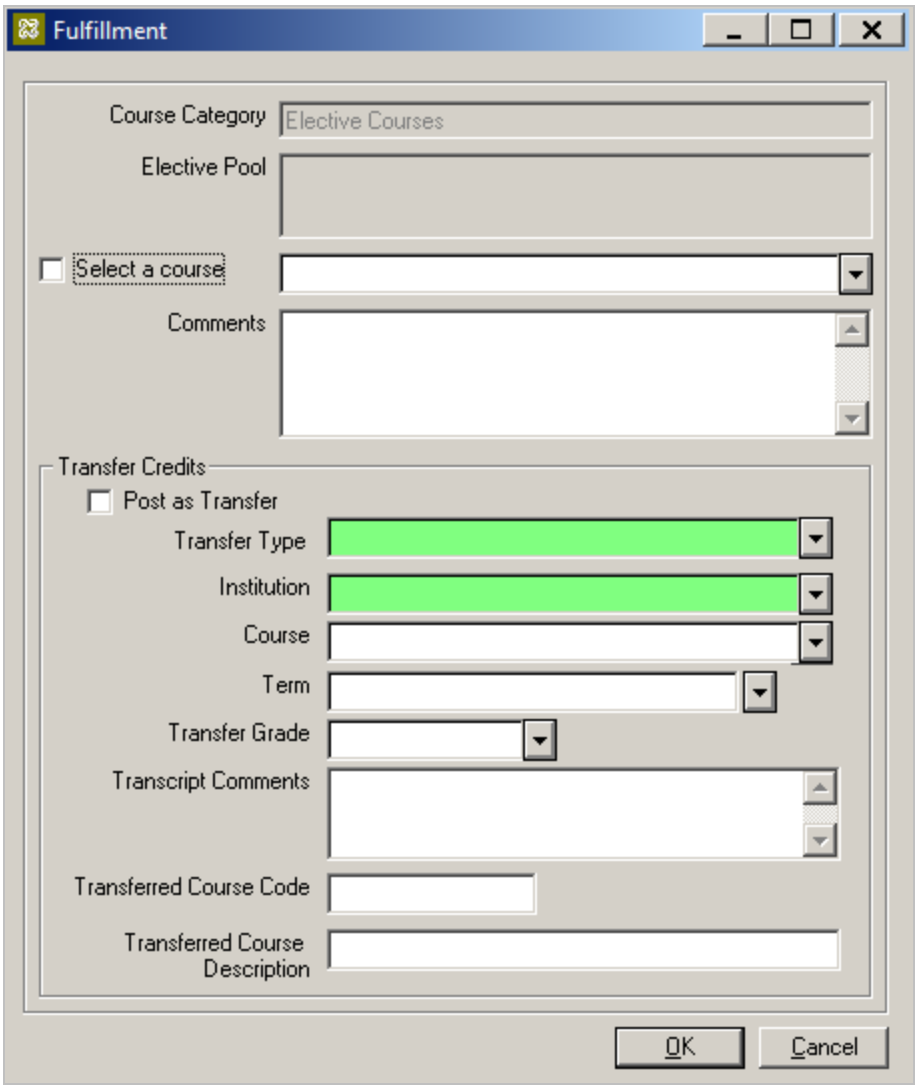
Note: The college name and courses associated with that college must have been previously entered. A list of colleges and their associated courses is normally controlled by entries made under Lists > Admissions > Colleges.

6. For **Elective Courses**, you will see a link entitled **Elective Pool - <elective name> (<number> Hours/Credits of <number> Hours/Credits Selected)**. The <elective name> comes from the Elective rule specified in the program version. CampusNexus Student displays how many relevant credits or hours the student has selected out of the total number of credits or hours required to fulfill the elective requirement.

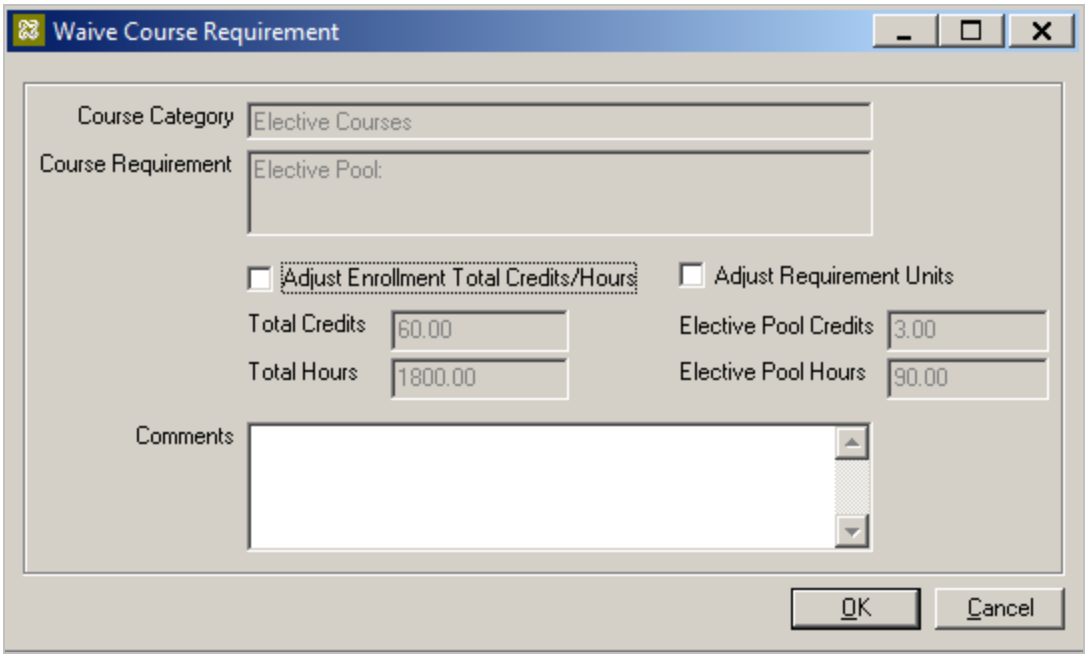


Clicking the **Elective Pool** link opens the **Fulfillment** form showing the following options:

Select a course check box and a drop-down list of courses in the elective pool. Choose a course from the list that fulfills the elective requirements. Add any relevant **Comments** in the box provided.



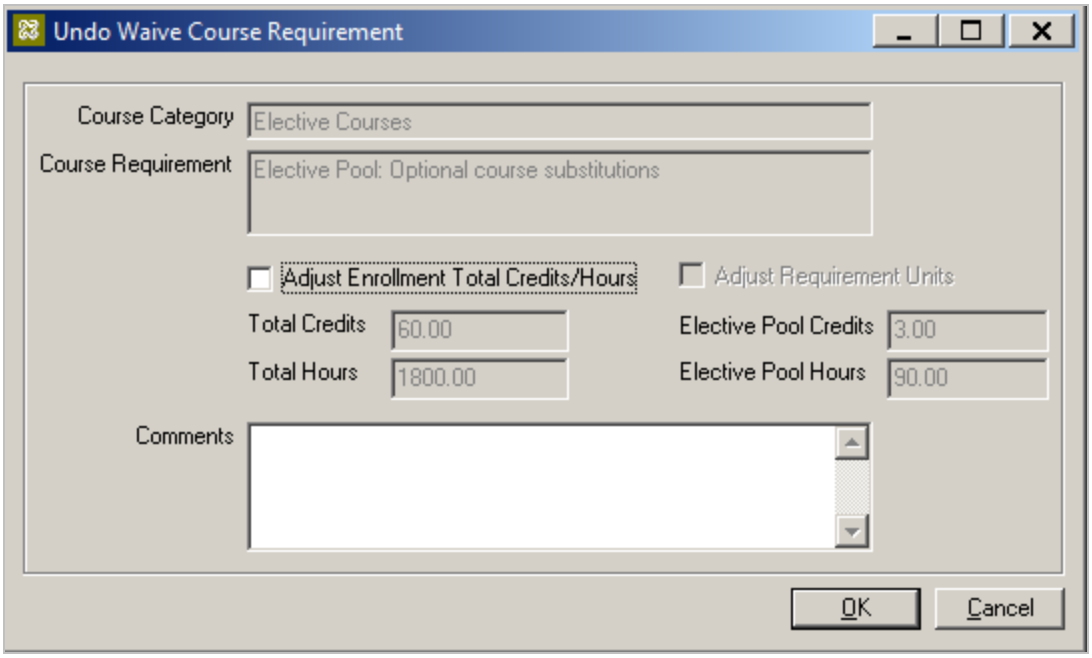
7. To waive a requirement, click the **Waive Requirement** link to open the Waive Course Requirement form.



If the adjustment to the student's program should change the Total Credits/Hours required for the enrollment as seen on the Progress tab of the Enrollment folder, select the **Adjust Enrollment Total Credits/Hours** check box.

Adjust Requirement Units check box: select this option to make available the **Elective Pool Credits** and **Elective Pool Hours** boxes. This allows you to adjust (add or subtract) required units for the elective pool. Add any relevant **Comments** in the box provided.

To undo the Waive Course Requirement action, click the **Undo Waive Requirement** link displayed for this course code to open the Undo Waive Course Requirement form.



If the adjustment to the student's program should change the Total Credits/Hours required for the enrollment as seen on the Progress tab of the Enrollment folder, select the **Adjust Enrollment Total Credits/Hours** check box.

Adjust Requirement Units check box: select this option to make available the **Elective Pool Credits** and **Elective Pool Hours** boxes. This allows you to adjust (add or subtract) required units for the elective pool. Add any relevant **Comments** in the box provided.

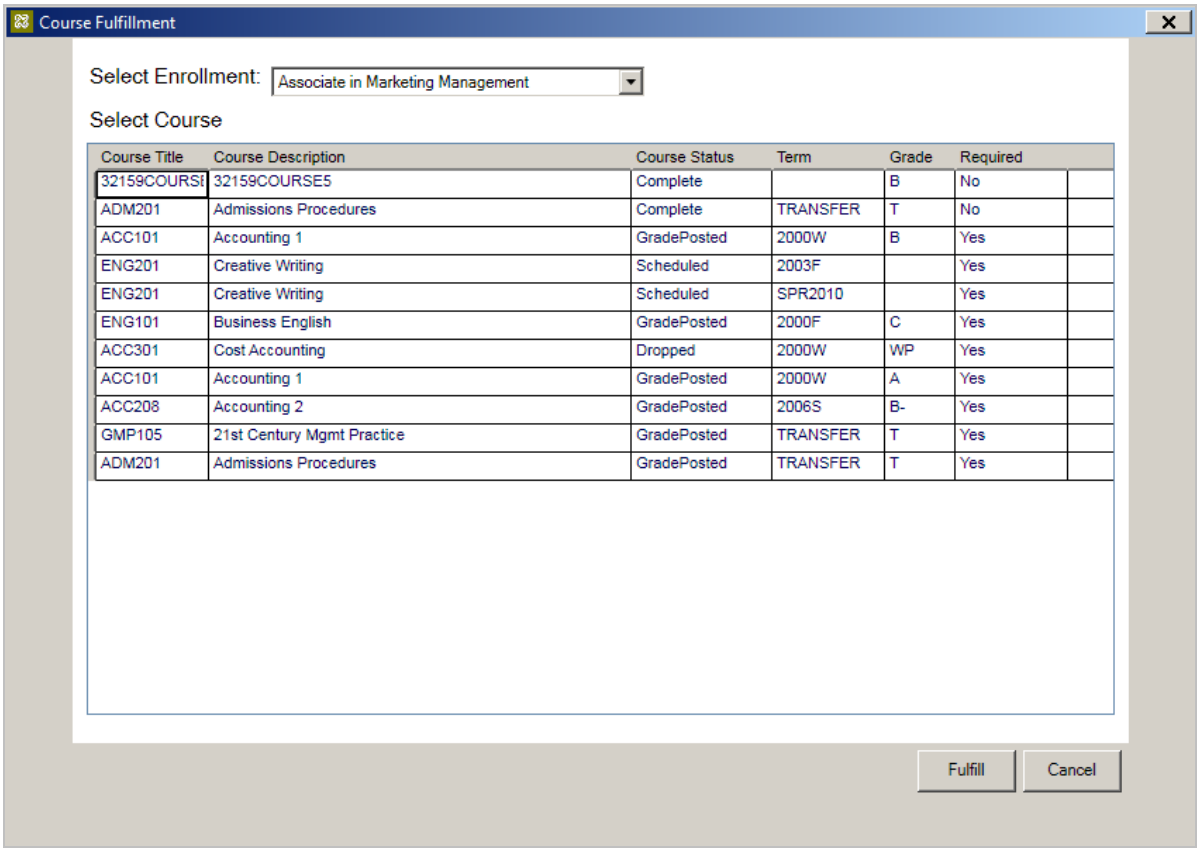
8. To fulfill a course requirement, click the **Fulfill Requirement** link to open the Course Fulfillment form.

   This form shows all taken courses from all enrollments and from the Taken Courses Not Applied section.

   Select Enrollment list: This list shows all enrollments from which course requirements can be fulfilled.

   Select Course grid: Courses with Required=Yes are the required courses for the selected enrollment. Course with Required=No are courses taken in different enrollments or from the Taken Courses Not Applied section.

   Select the Enrollment from the drop-down list and, from the Select Course grid, the course whose requirements are to be fulfilled. Click **Fulfill**. A message is displayed upon successful fulfillment of the selected course. Once the course is fulfilled, the Degree Progress Audit form will show the fulfilled requirement in parentheses, e.g., English 101 (Fulfilled by BUS101).



The Fulfill Requirement link enables users to move taken courses within the course categories or satisfy course requirements based on taken courses of other enrollments.

- If a student has taken a course outside of the program version, it is displayed in the Taken Courses Not Applied section. Previously, to count this course toward completing the requirements of the program version the student is enrolled in, the user would have had to waive a requirement for a course and then add a requirement for the course appearing in the Taken Courses Not Applied section. Now, the user can simply click the Fulfill Requirement link for a course that would otherwise have been waived to fulfill the requirement.

- If the campus configuration to Prevent Auto-matching is enabled, then the Degree Progress Audit will not auto-match any courses, and schools can use this Fulfill Requirement functionality.

Example: English 101 is core course in Enrollment 1. English 101 is a Core course as well as an Elective course in Enrollment 2. English 101 is taken in Enrollment 1. If Prevent Auto-matching is turned off, then the Elective course will be auto-matched. This may not be applicable in all schools; in those cases, users can fulfill English 101 as a Core course using the Fulfill Requirement functionality.

Note: As a recommended best practice, Anthology Inc. advises that if a student has two courses (e.g. Course A and Course C) that are both elective courses with substitution pools, even though using the **Fulfill Requirement** link with Course A to satisfy Course C is allowable, the best course of action is to simply Waive Course C. Using the Fulfill Requirement link in the scenario provided will cause a Course A duplicate in Future status to appear in the Degree Progress Audit form.

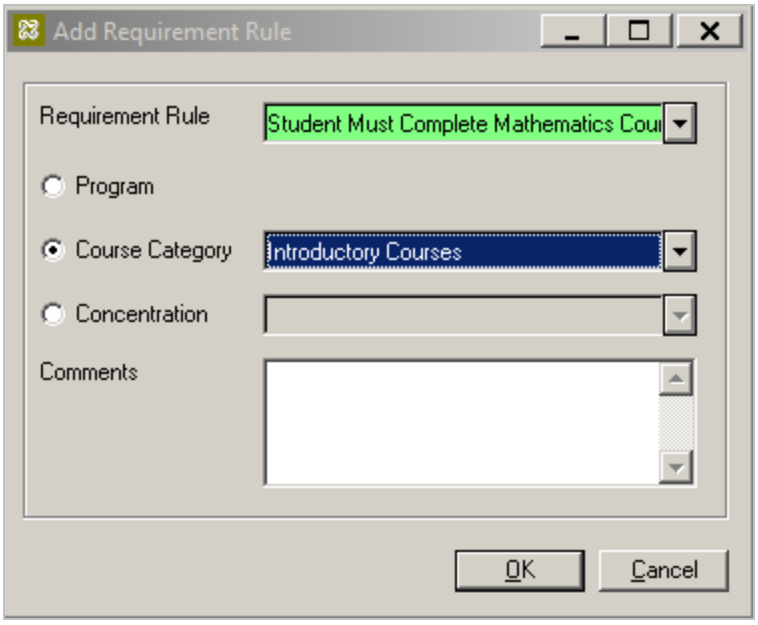
9. To add a course requirement, click the **Add a course requirement** link at the bottom of the Course Category section. The **Add Course Requirement** dialog box is displayed, allowing entry of the Course Category (already filled in by default) and the Course.

   Note: When the course is selected from the list, the Credits and Hours boxes are populated accordingly.

   If the adjustment to the student's program should change the Total Credits/Hours required for the enrollment as seen on the Progress tab of the Enrollment folder, click the **Adjust Enrollment Total Credits/Hours** check box. Comments may also be added.

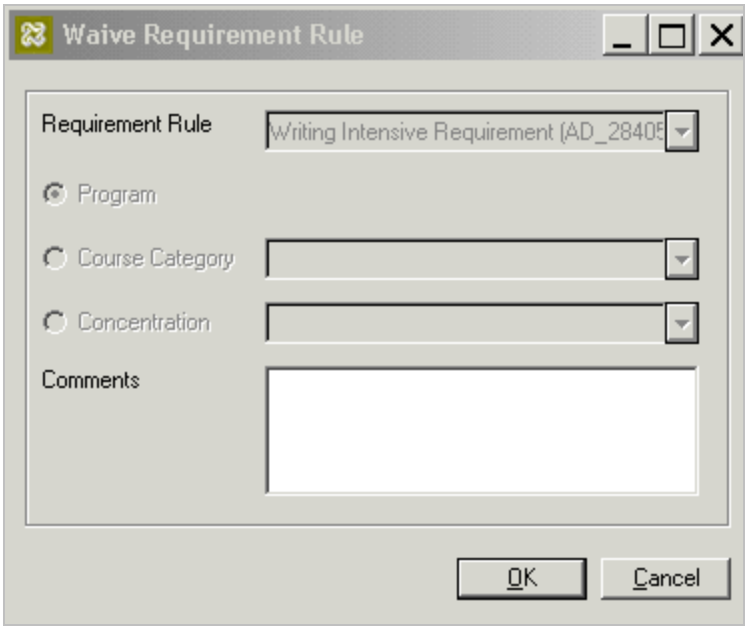
10. Adding/Waiving Requirement Rules - If there is at least one Requirement Rule configured in the database (**Lists** > **Academic Records** > **Requirement Rules**), users with applicable permissions can add and/or waive Requirement Rules, as well.

    To add a requirement rule, click the **Add a requirement rule** hyperlink. The Add Requirement Rule form allows you to select a requirement rule from a drop-down list. The requirement rule may be applied to a Program, Course Category, or Concentration.



Comments may also be added. Clicking the OK button will place the Requirement Rule into the student's Degree Progress Audit.

To waive a requirement rule, click the **Waive this requirement rule** link located near the title of the requirement. This opens the **Waive Requirement Rule** dialog box showing the rule to be waived and allowing for a comment as to why the rule is being waived.



11. **Undo** actions - Users with Delete rights to the Degree Progress Audit can undo manually added, manually waived, or manually fulfilled requirements.

Note: When changes are made to the student's Degree Progress Audit using Edit Mode, CampusNexus Student changes the student's schedule as needed. If required courses are added, they will be placed in the student's schedule with a status of Future. If courses are no longer required and are removed from the Degree Progress Audit, they will be removed from the Schedule folder

as long as they have a status of Future. If the course has a status of Registered, Current, or Completed, it will remain in the Schedule folder.

Performing a Hypothetical Degree Progress Audit

Using the Hypothetical Degree Progress Audit option, you can select a different Program, Program Version, Catalog, and/or Area of Study and generate output that shows what would be required for completion of the selected program.

To work with the Hypothetical Degree Progress Audit:

1. Select the student for whom the Degree Progress Audit is required.
2. Navigate to **View > Academic Records > Degree Progress Audit.** The Degree Progress Audit form is displayed.
3. Select the **Hypothetical Degree Progress Audit** check box.
4. Select the **Program** and **Program Version** from the drop-down lists. If applicable, **Catalog** and **Area(s) of Study** may also be selected.
5. Click **Refresh**.

   The data on the form will change to overlay the student's work-to-date on the selected program version and show what would be required for completion of the selected program. Values for Credits Required and Total Number of Courses are based on the Hypothetical Program Version selected. Values for Credits Completed (From Enrollment), and Credits Current/Scheduled (All Enrollments), are based on credits that apply to the hypothetical program based upon the hypothetical required course list.

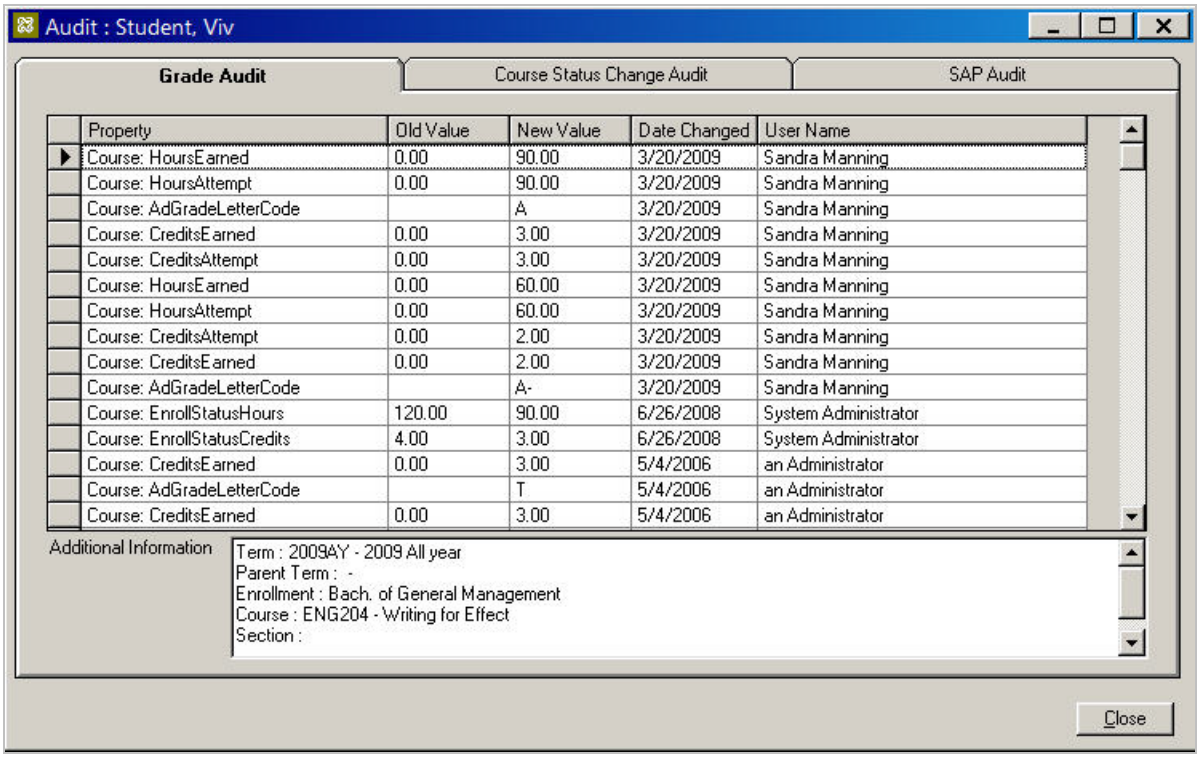
   CampusNexus Student evaluates the student's course list and automatically applies courses the student already has on the schedule (including equivalent and potential elective courses) that will fulfill requirements of the hypothetical program.
6. Click **Print** to print a copy of the data on the form. The required course list is sorted by Course Category.
7. Click **Close** to close the form.

Grade Audit

You can view audit entries for Grades, Course Status Change, and Satisfactory Academic Progress (SAP) for a student.

To view audit entries for academic records:

1. Navigate to **View > Academic Records > Audit**. The student's Audit form displays the Grade Audit tab.



The Grade Audit process displays changes to posted grade information for lessons and final grades and identifies what was changed, when it was changed, and who made the change. The Grade Changes Audit report provides the same information in printable format.

Field Descriptions: Grade Audit Tab

Field	Description
Property	This field identifies which property was changed. Properties monitored include: student course start date, course completion date, numeric grade, letter grade, term, credits earned, credits attempted, hours earned, hours attempted, affect GPA?, retake override, speed, comments, and pay status.
Old Value	The former value of the property.
New Value	The current value of the property.
Date Changed	The date when the change occurred.
User Name	The name of the user who changed the property.

Field	Description
Enrollment Description	The description of the enrollment assigned to the lesson grade record when the change occurred.
Additional Information	Information about the student's enrollment and course. **Note**: If the Grade Scale Update Tool is used to update a grade, the Additional Information field includes a notation that the grade was updated by the tool.

2. Select the **Course Status Change Audit** tab.

   The Course Status Change Audit process gathers and displays the courses for which the student has enrolled and the information pertaining to changes in the course status such as previous status, new status, date on which the status was changed, reason for status change, and user who changed the status. Where courses are automatically dropped based on attendance posting, SAP updating or School Status Change, pre-specified reasons are kept and added to the audit folder. These reasons are displayed here, as well as the Course Drops reports where applicable. See the Drop, Unregister, or Delete a student's Course section.

   Before the 8th day of class, CampusNexus Student add/drop logic allows the user to unregister the course. The course status changes back to "Future" and there will be no record of the student having registered in the first place. When a user is forced to drop a student's course after the Add/Drop period, the course is marked as a Drop and a drop grade is assigned, however, there is still no reason code given.

   When auto-drop logic removes a student from a class during attendance posting, the reason assigned to the drop will be "Dropped due to Attendance". This change applies to attendance taken from the student's attendance folder, from the daily option to post attendance, or from the daily option to post attendance dates.

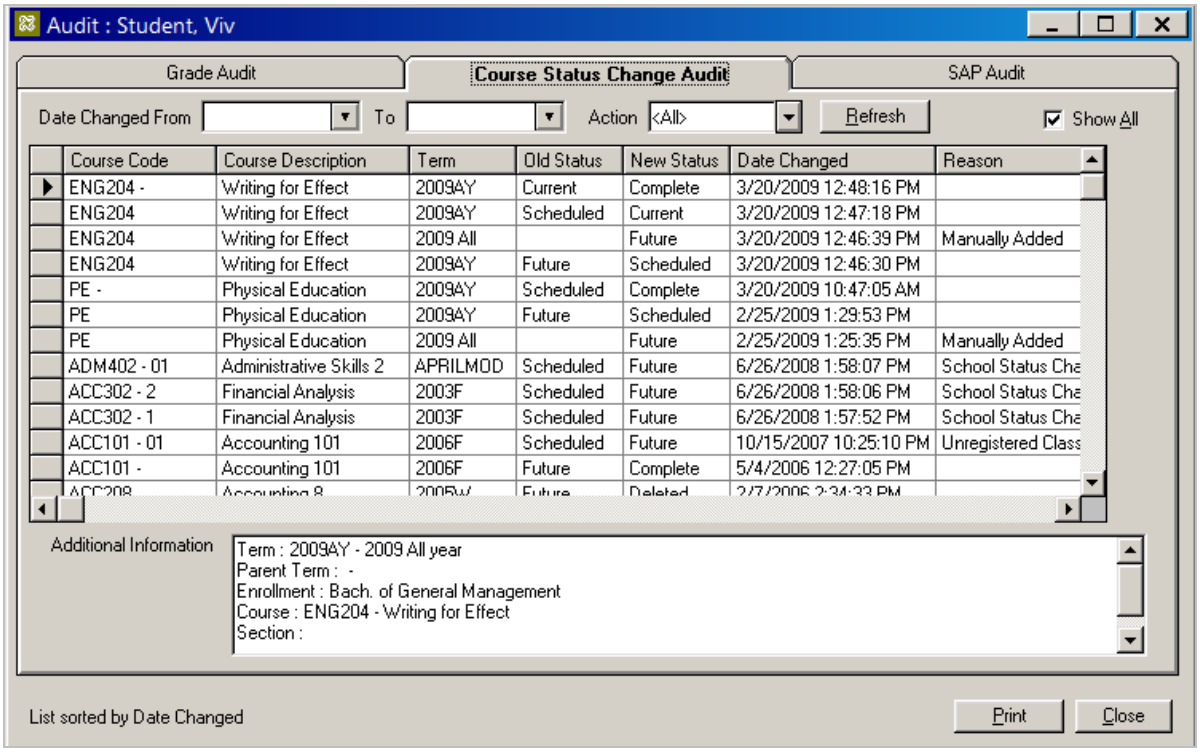
   When a Student's School status changes due to SAP failure, and that status change removes a student from a course, the reason assigned to the course drop will be "Failed SAP."

   When a Student's status changes due to Leave of Absence (LOA), Drop, or Standard Period for Non-Enrollment (SPN), the CampusNexus Student records the change automatically as "School Status change" in their audit folder.

   You can view the history of a student's course status changes when editing a course on a student's schedule. Click **Course Status History** to access the audit folder for the selected course history. See Class Schedule for additional information.

   When registering for a course, (through the Online Registration application) in a program version that contains an elective pool, the course is added to the student's schedule and recorded in the Course Status Change Audit folder.

   A student may be enrolled in a term/program version that allows the student to register outside the student's current program. This is configured through Daily > Academic Records > Online Registration Configuration > Program Version Configuration. The program version is checked to allow outside registration. The student will see a list of all courses available for the term. If the student registers for a course that is included in the student's present schedule or not, an audit entry will be made to the Course Status Change audit folder.



3. Use the **Date Changed From** and the **Date Changed To** filters to sort the grid by date range.
4. Use the **Action** filter to sort by action type.
5. Click **Refresh** to clear the filters.
6. Clear the **Show All** option as needed.
7. Click on the column headers to sort on each column in the grid. The bottom of the form indicates the sort method selected.

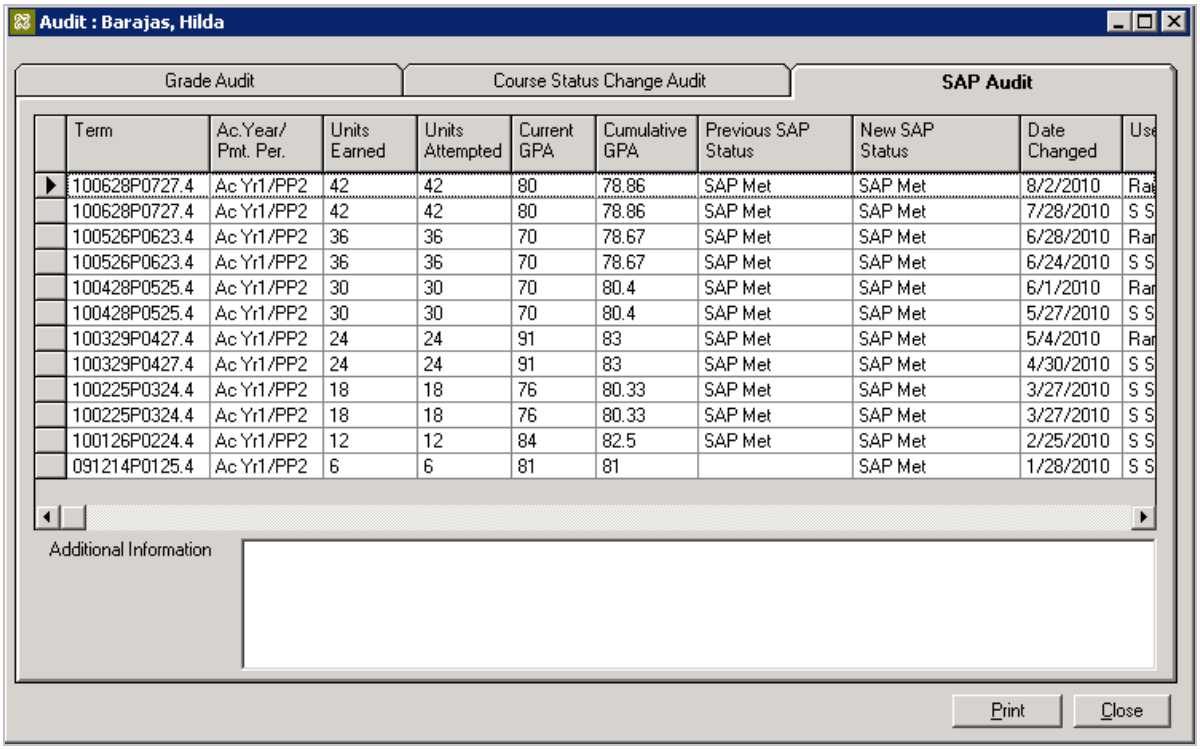
Field Descriptions: Course Status Change Audit Tab

Field	Description
Course Code	Code identifying the course for which the student has enrolled.
Course Description	Description of the course.
Term	Term in which the course is offered.
Old Status	Status of the course before the user changed it.
New Status	New course status set by the user.
Date Changed	Date on which the user changed the course status and includes a time stamp.

Field	Description
Reason	Reason for the course status change. See Course Reason for additional information. Possible values : • *Dropped* • *Unregistered* • *Deleted* • *Online Course Unregistration* if the student had unregistered the course using the "Register/Drop" feature on Portal • *Attendance Auto Drop Rule* if the student failed to meet the attendance requirements for the course.
User Name	Name of the user who changed the course status.
Credits	Credits achieved in the course.
Action	Action taken such as course registered, dropped via Portal, course cancelled, etc.
LDA	Last date the student attended classes.

8. Click the **SAP Audit** tab to view or print the student's SAP Audit information.

Note: The images below are for illustration purposes only. When viewing audit data for a SAP audit based on payment periods, for example, the term-related columns (Term and Term Sequence) may not be populated.



Term	Ac.Year/ Pmt. Per.	Units Earned	Units Attempted	Current GPA	Cumulative GPA	Previous SAP Status	New SAP Status	Date Changed	Use

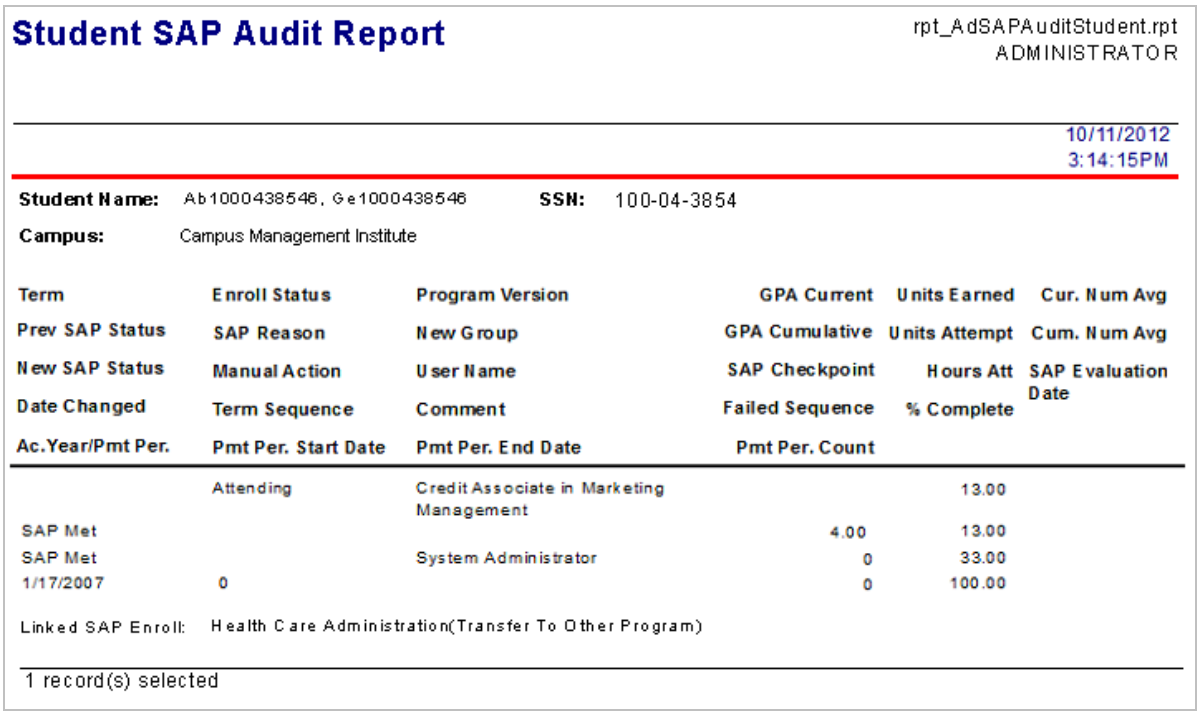
Field Descriptions: SAP Audit Tab

Field	Description
Term	Term in which SAP is evaluated.
Ac. Year/Pmt. Per.	Academic year/payment period for students evaluated based on a completed payment period. **Note**: When viewing audit data for a SAP audit based on payment periods, the term-related columns (Term and Term Sequence) are not populated.
Units Earned	Student's units earned for this term or payment period.
Units Attempted	Student's units attempted for this term or payment period.
Current GPA	Student's GPA for the term.
Cumulative GPA	Student's GPA from the time the student entered school.
Previous SAP Status	If SAP has not yet been run for a student, the column is blank. If SAP has been previously run for a student, the Previous SAP Status column contains the status from that prior run of SAP.
New SAP Status	Always contains the SAP status saved to the Term Summary.
Additional Information	When the SAP status calculated by CampusNexus Student is manually changed by the user, the system calculated SAP status and the SAP status selected by the user appear in the Additional Information section of the audit record for the SAP calculation. In addition, all SAP failed reasons from the SAP calculation appear in the Additional Information field.
Date Changed	Date on which system or user changed the SAP information.
User Name	Name of the user who changed the SAP information.
Checkpoint	Benchmarks established by the campus SAP policy.
Hours Attended	Student's hours attended for the period being evaluated.
Percent completed	Student's percentage of credits completed to the credits attempted for the period being evaluated.
Term Sequence	Term sequence number associated with the student's SAP evaluation.
Failed SAP Sequence	Sequence number in the SAP Policy where the student is failing SAP. The SAP failure reasons appear in the Additional Information field for each listing where the student did not meet SAP.
Linked SAP Enrollment	Program version description of the linked SAP enrollment.
Pmt Per. Start Date	Payment period start date.
Pmt Per. End Date	The payment period end date.

Field	Description
Pmt Per. Count	The count of applicable payment periods.
SAP Evaluation Date	Date of the SAP report. The values in this column are displayed only for SAP reports based on payment period.

9. On the SAP Audit tab, click **Print** to view or print the Student SAP Audit Report.

   Example of a Student SAP Audit Report Based on Term:



Student SAP Audit Report

Linked SAP Enroll: Health Care Administration(Transfer To Other Program)

1 record(s) selected

Fees

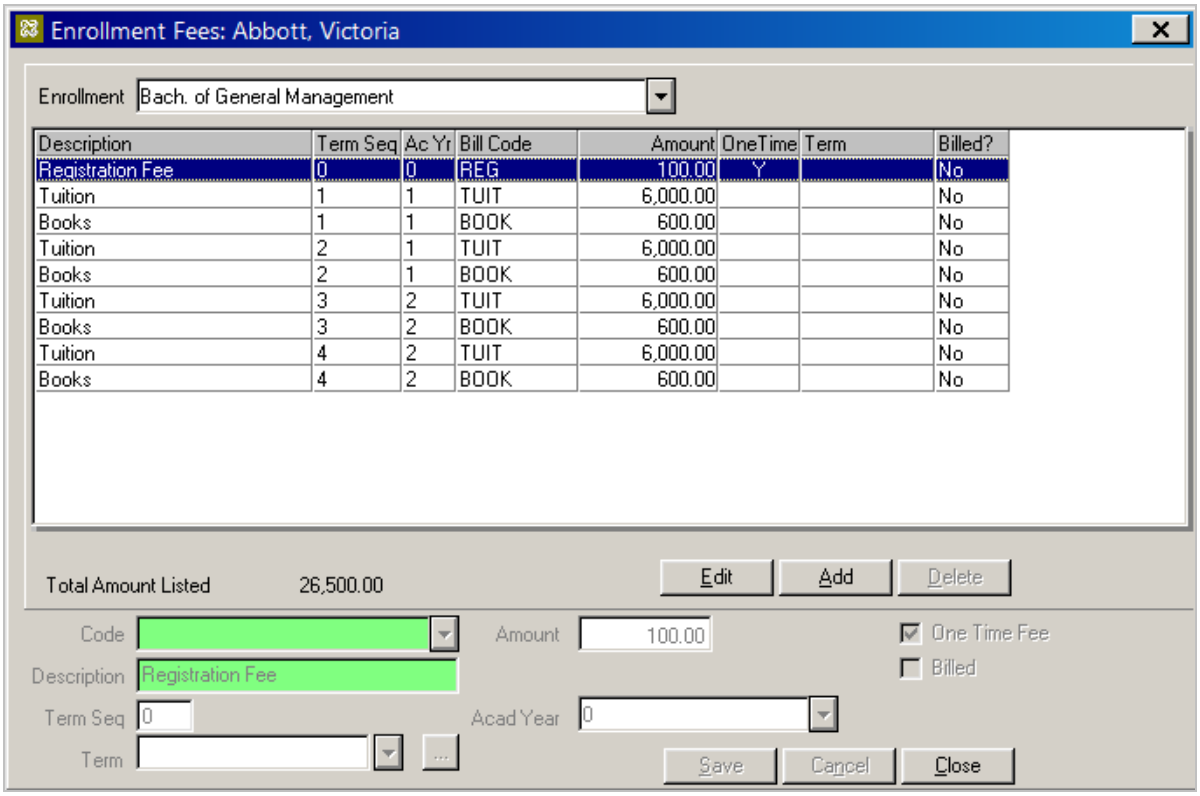
Fees can be established at the enrollment level. You can select from the list of transaction codes and enter amounts to be charged to each student that enrolls in a given program version. When the enrollment is recorded for a given student, the fees listed here are recorded in the student's receivable account.

Your school's billing policies come into play here. Do you charge the entire cost of the program to the student at the time of the enrollment? Or, do you charge certain registration fees, supplies, and so forth?

Edit Enrollment Fees

To enter or edit a fee on the enrollment schedule for a student:

1. Select a student.
2. Navigate to **View** > **Academic Records** > **Fees**. The Enrollment Fees form is displayed. CampusNexus Student lists all fees and fills in the fields with data from the first fee.



3. To add a fee, click **Add** .

   Note: The TUIT code must be used to bill tuition via Registration Billing. Unless an unbilled TUIT item is displayed in a student's Fees folder, the student will not be gathered in the list of students to bill.

4. Click and select the **Code**. Notice that the **Description** field and **Code** field become populated with the data chosen.
5. Enter the correct data in the **Term Seq** field.
6. Click

and select the **Term**. The drop-down list contains all the terms available, with the Start and End Dates for each one.

7. Provide the correct amount in the **Amount** field.
8. Click and select the **Acad Year**.
9. Select if you would like to have the fees gathered or not gathered according to the following rules:

   When billing by academic year, if you selected the **Billed** check box (**Billed = YES)** and the **One Time Fee** check box, those fees will not be gathered when running registration billing.

   When billing by academic year, if you select the **Billed** check box (**Billed = YES)** and do **not** select the **One Time Fee** check box, those fees will be gathered when running registration billing.(Academic Year should be zero.)

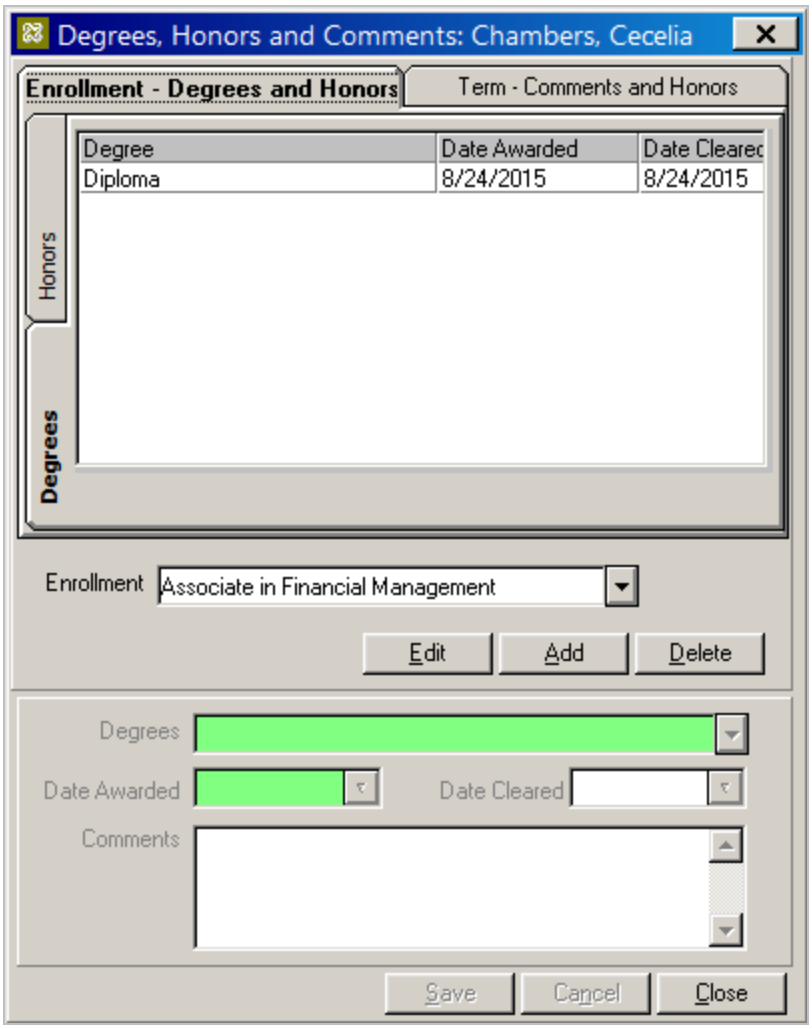
   When billing by academic year, if you do **not** select the **Billed** check box (**Billed = No**), those fees will be gathered when running registration billing.
10. Click **Save** to save the fee record.
11. Click **Edit** to modify a fee other than the first one. Select the fee in the top pane of the screen. The data will appear in the lower pane of the screen.
12. Enter new data or change existing data on the form.
13. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Degrees, Honors, and Comments

The Degrees, Honors, and Comments form enables you to track multiple degrees and the dates that the degrees where awarded. The degrees awarded are printed on the student's transcript. Degrees are related to enrollments. There can be more than one degree associated with a single enrollment. Honors are tracked by term.

To add or edit degrees, honors, and comments:

1. Navigate to **View > Academic Records > Degrees, Honors and Comments**. The Degrees, Honors, and Comments form is displayed.



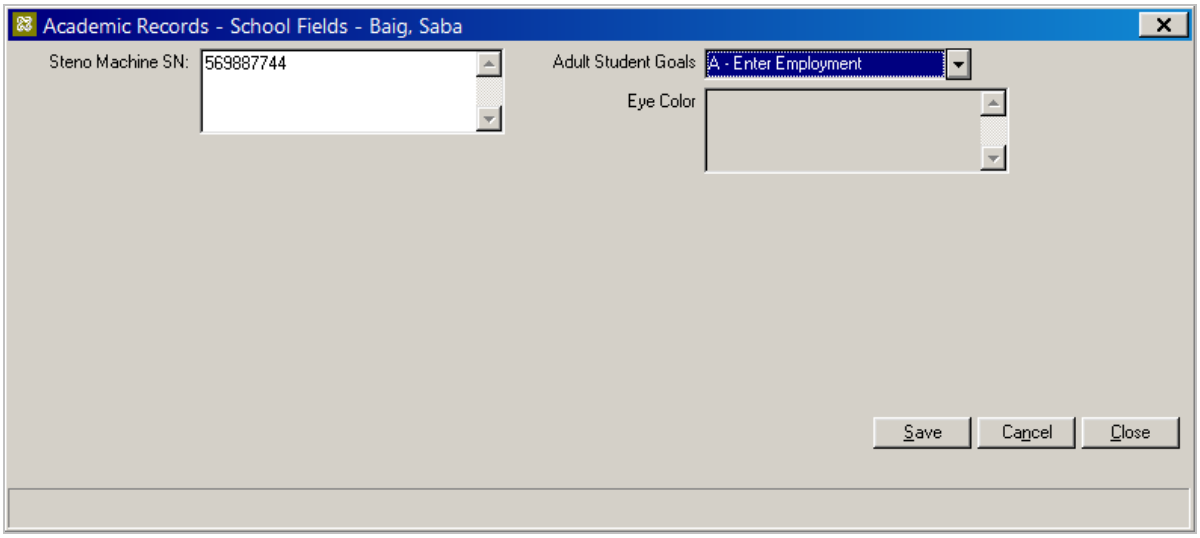
2. Choose an appropriate tab:
   - Select the **Enrollment - Degrees and Honors** tab to view, add, or edit degree records, honors, or comments by enrollment. Select the **Honors** or **Degrees** subtab as needed.
   - Select the **Term - Comments and Honors** tab to view, add, or edit honors or comments by term.
3. Click **Add**, or select a record and click **Edit**.
4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

School Fields - Academic Records

School-Defined Fields are set up by your system administrator to collect information that is not required by the generic CampusNexus Student application. (See Setup/School Defined Fields.) The fields are organized by department during setup. At least one department has the authority to change each field. Some fields may be viewed but not edited in your department. A field may be flagged as confidential by the originator, i.e., not viewable outside of the department that is using it. For instance, if a field can only be viewed or edited by the Academic Records Department, it will only be visible when the form is opened from View (or Student Bar)> Academic Records > School Fields. If you do not have access to that menu option, you will not see this field.

To view or edit school fields:

1. Navigate to **View** > select a module (for example, Academic Records) > **School Fields**. The School Fields form is displayed.



2. Click on, or tab to, a field that you want to change. Select an option or enter data to edit the field.

   The fields are displayed in edit mode (white background) if your department has been given permission to change the data. Fields that are dimmed cannot be changed. Fields that are listed but are gray and show no data are simply not be filled in yet by the staff member responsible for doing so.

3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Transfer Credits

Staff members can review the list of courses transferred from other institutions, and add, view, or edit transfer credit information, and add course relationships.

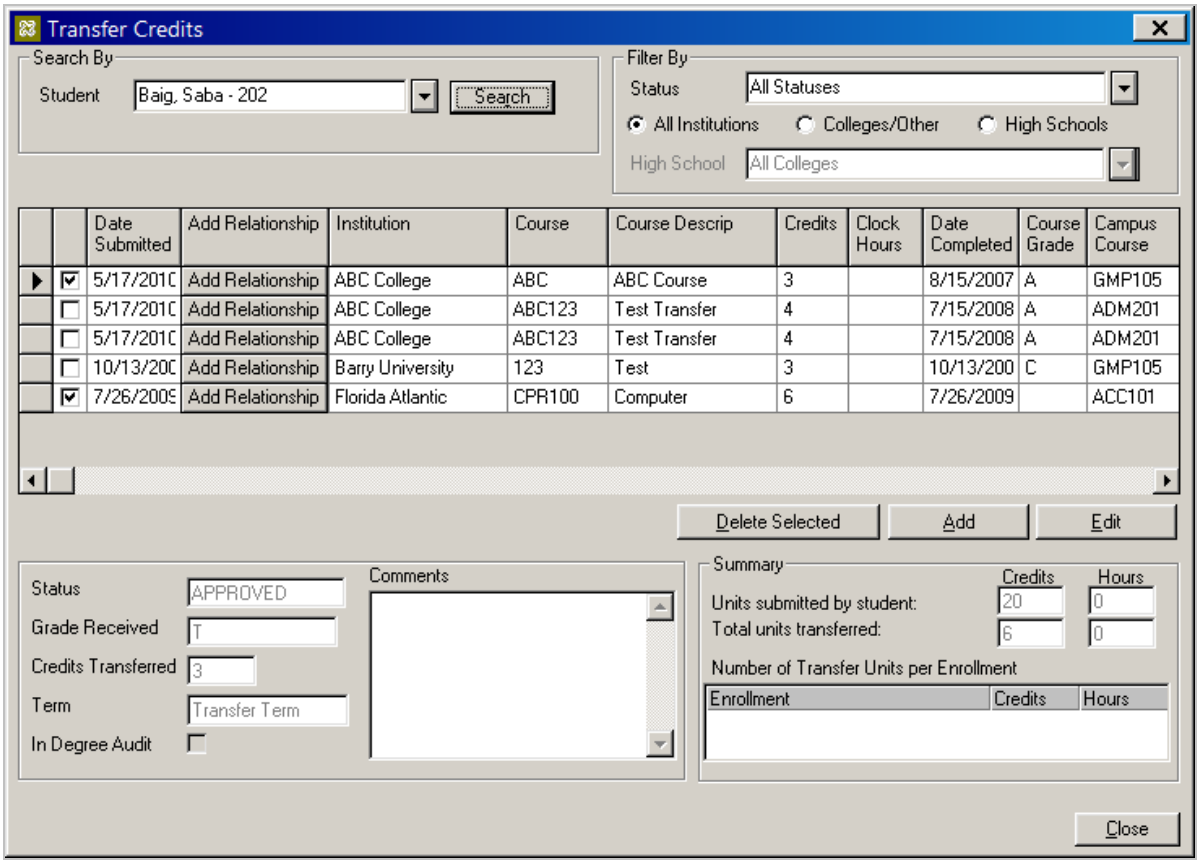
For program versions that use Academic Calendars 5 and 6 (non-term), CampusNexus Student automatically adjusts the Academic Year and Loan Period sequences and associated credits or hours and weeks as transfer credits are 'Approved' or changed from 'Approved' to a different status.

Approved transfer credits or hours in non-term configurations shorten the remaining course work that the student has to complete for the program version and is in direct relation to the academic year or loan period length and sequences. The "Credits in AY" ("Hours in AY") and "Weeks in AY" fields of the final academic year and loan periods are continually adjusted based on changes in the amount of transfer credits or hours.

When CampusNexus Student is enabled for Allow courses to be exempt from progression, the system uses the "Enrollment Status Credits (Hours)" of the linked course as the accepted value instead of the Credits or Hours value of the course on the student schedule when adjusting academic years and loan periods.

To transfer credits for an incoming student:

1. Navigate to **View > Admissions** or **Academic Records > Transfer Credits**.
   - OR -
   Navigate to **Daily > Admissions > Transfer Credits**. The Transfer Credits form is displayed.



Note: The options under **Filter By** allow you to view College transfer credit records, High School transfer credit records, or both (All Institutions). By default, **All Institutions** is selected and the drop-down lists to filter the records are unavailable.

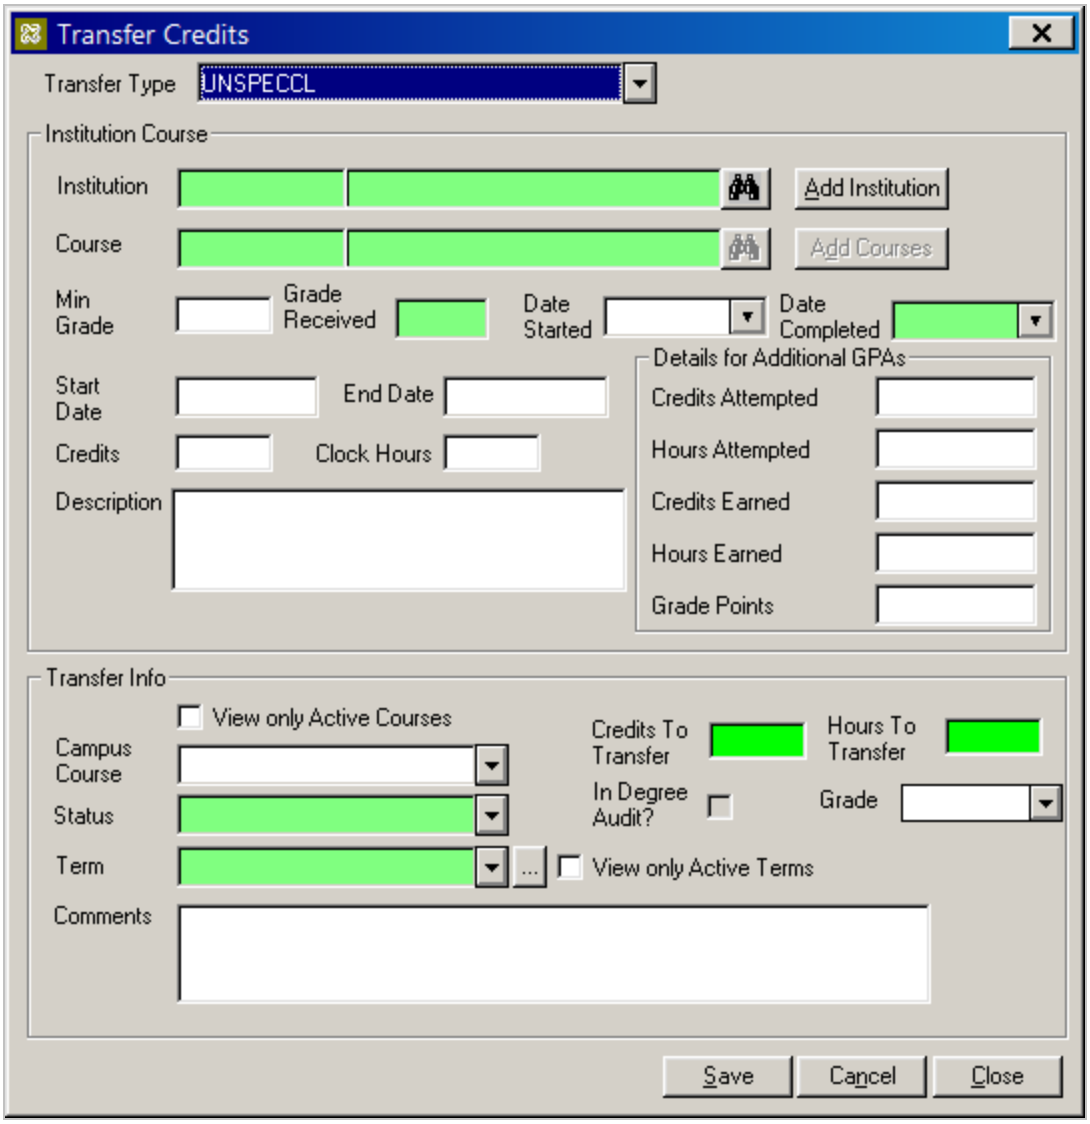
- If you select **Colleges/Other**, the College filter becomes available and only College transfer credit records get listed in the Transfer Credit grid.
- If you select **High Schools**, a High School filter becomes available and only High School transfer credit records get listed in the Transfer Credit grid. The list shows only those high schools for which Transfer Credit records are available.

Note regarding Number of Transfer Credits per Enrollment:

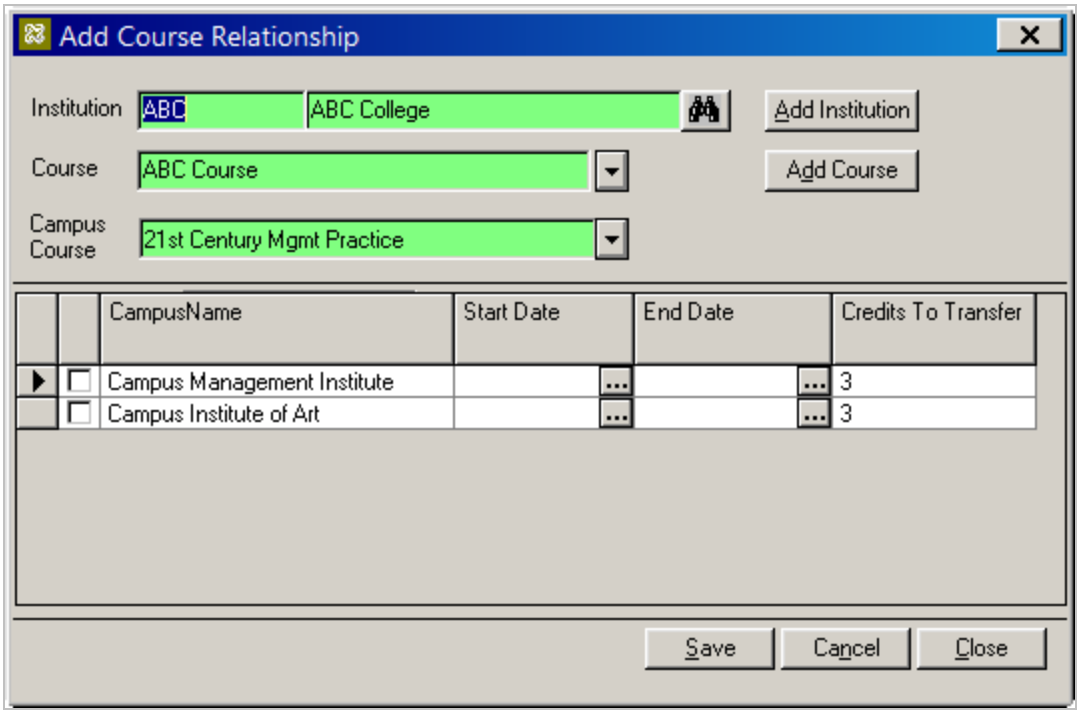
CampusNexus Student accurately tracks and updates the number of Transfer Credits on the student enrollment. If applicable, the following warning is displayed:

Transfer Credits entered exceed the number currently tracked on the enrollment. Automated processes or the academic year tool can be run to update the enrollment and Academic Years. If the student's current Academic Year is adjusted, the student should be repackaged according to the adjustment.

2. Click **Add**, or select a record and click **Edit**. The Transfer Credits form is displayed. The state (enabled/disabled) of **Add Institution** and **Add Courses** buttons depends on the staff member's Admissions security settings.



3. Complete the fields on this form as needed. See Field Descriptions.
4. To add a trans credit relationship to another campus, select a record and click **Add Relationship**. The Add Course Relationship form is displayed. Complete the fields on this form as needed.



5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Field Descriptions

Field	Description
Transfer Type	Use this drop-down list to select College or High School type of transfer credits. The list is populated with the entries available under Lists > Admissions > Transfer Type (tab). **Note**: The Institution Course frame and Transfer Info frame of the Transfer Credits form remain unavailable (dimmed) until you select a Transfer Type. If you select a College Transfer Type, you can Select/Add College and College Courses for transfer credit records. If you select a High School Transfer Type, you can Select/Add High School and High School Courses for transfer credit records.
Institution Course Fields	
Institution	Name of the institution (i.e., College/Other or High School) from where the course is being transferred is displayed in this field. You can use Search to select the institution using the Search College or Search High School forms. If the institution is not listed and you have proper access, click **Add Institution** to display a form with which to add the school.

Field	Description
Course	The name of the course being transferred is displayed in this field. You can select the course using Search. If the course is not listed and you have proper access, click **Add Courses** to display a form to add the course.
Min Grade	Minimum grade allowed for successful completion of the transferred course
Grade Received	Grade the student achieved
Date Started	Date when the student started the course
Date Completed	Date when the student completed the course
Start Date	Effective start date for the course
End Date	End date for the course
Credits	Number of credits the student earned at the institution where the course was taken
Clock Hours	Number of clock hours the student earned at the institution where the course was taken
Description	Brief description of the course
Transfer Info Fields	
View only Active Courses	Select this check box to filter terms by Active only.
Campus Course	Equivalent course offered by the selected campus
Credits to Transfer	Number of credits to transfer
Hours to Transfer	Number of clock hours to transfer
Status	Transfer status. A not yet **APPROVED** transfer status displays on the Degree Progress Audit only if a **Campus Course** is selected on the **Transfer Credits** folder. **Note**: If configured (Lists > Admissions > Transfer Status), the field displays course information on the Degree Progress Audit.
In Degree Audit?	This check box is enabled when the **Campus Course** selected is in the Program Version's required course list.
Grade	The student's grade to associate with the transferred course
Term	Term when the credits are applied **Note**: Non-term functionality in CampusNexus Student allows users to add transfer credits at any point during the student life cycle. Transfer credits adjust the academic year attributes and therefore the time it takes a student to complete the program.
View only Active Terms	Select this check box to filter terms by Active only. By default all terms, active and inactive, appear on the Term list.
Comments	Any related comments

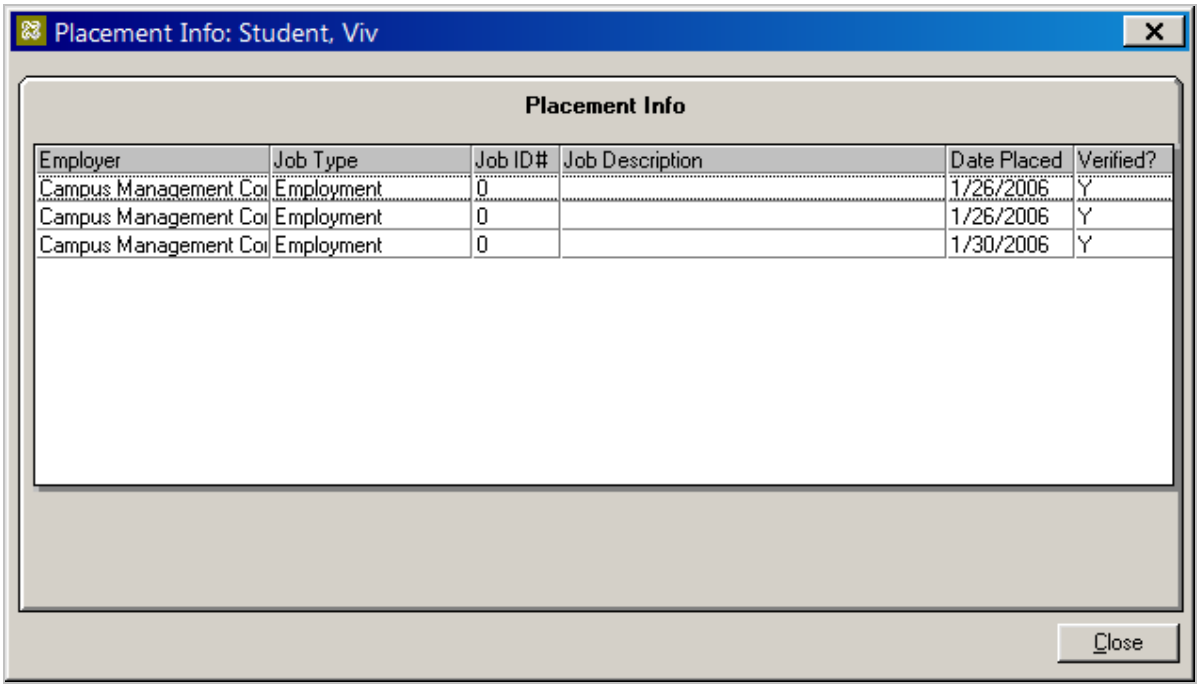
Field	Description
Details for Additional GPAs The fields **Credits Attempted**, **Hours Attempted**, **Credits Earned**, **Hours Earned**, and **Grade Points** capture the information from previous institutions so that you can include courses for students from other schools in a school-defined GPA calculation. See school-defined GPAs/Additional GPAs. When adding a new transfer credit record, the fields Credits Attempted, Hours Attempted, Credits Earned, and Hours Earned are populated from Course Credits and Course Clock Hours as soon as you select a course. If the school-defined GPA is configured to use transfer courses and is a weighted GPA, these grade points are multiplied by the credits attempted to get the quality points for the calculation.	
Credits Attempted	Number of Credits Attempted from the student's transcript
Hours Attempted	Number of Hours Attempted from the student's transcript
Credits Earned	Number of Credits Earned from the student's transcript
Hours Earned	Number of Hours Earned from the student's transcript
Grade Points	Number of Grade Points from the student's transcript

Placement Info

The Placement Info form displays a student's employer, job type, job number, job description, placement date, and verification status.

To view a student's placements:

1. Select a student.
2. Navigate to **View** > **Academic Records** > **Placement Info**. The Placement Info form is displayed.



3. Click **Close** to close the form.

Note: To add or edit placement information, navigate to **View** > **Career Services** > **Placements**. For more information, see Student Placements.

Term Confirmation Overview

The Term Confirmation feature allows clients to determine the Starting Student Body (SSB) for a current or upcoming term. System administrators turn Term Confirmation on and off when setting up campus locations and make it available by staff group permissions in Setup > Security. The default setting for Term Confirmation is None. Select "Automatically Unconfirm a Term…" to have CampusNexus Student set a term to unconfirmed when all courses in a term are unregistered. Only registration terms may be confirmed. Therefore, a typical Parent term cannot be confirmed and the confirmation is on the child term.

Clients set student Term Confirmation status under the Academic Records menu and review it from the Enrollment menu Term Summary. Clients can generate a printed report called Registered Credits by Confirmed Terms, or export data in Excel and other formats.

As soon as a term is confirmed, CampusNexus Student updates the "Confirmed" flag on the Term Summary form to "Yes." If the Campus Location setting is "No" for Automatic Unconfirm and the term is confirmed on the Term Summary form, the student will remain confirmed for the term even if the student unregisters for all courses in the term.

If the campus-specific setting allows automatic unconfirmation, the term can be unconfirmed only if all courses for the term are unregistered. If the student unregisters for all courses that were previously confirmed, CampusNexus Student removes the term from the Term Confirmations and Term Summary forms.

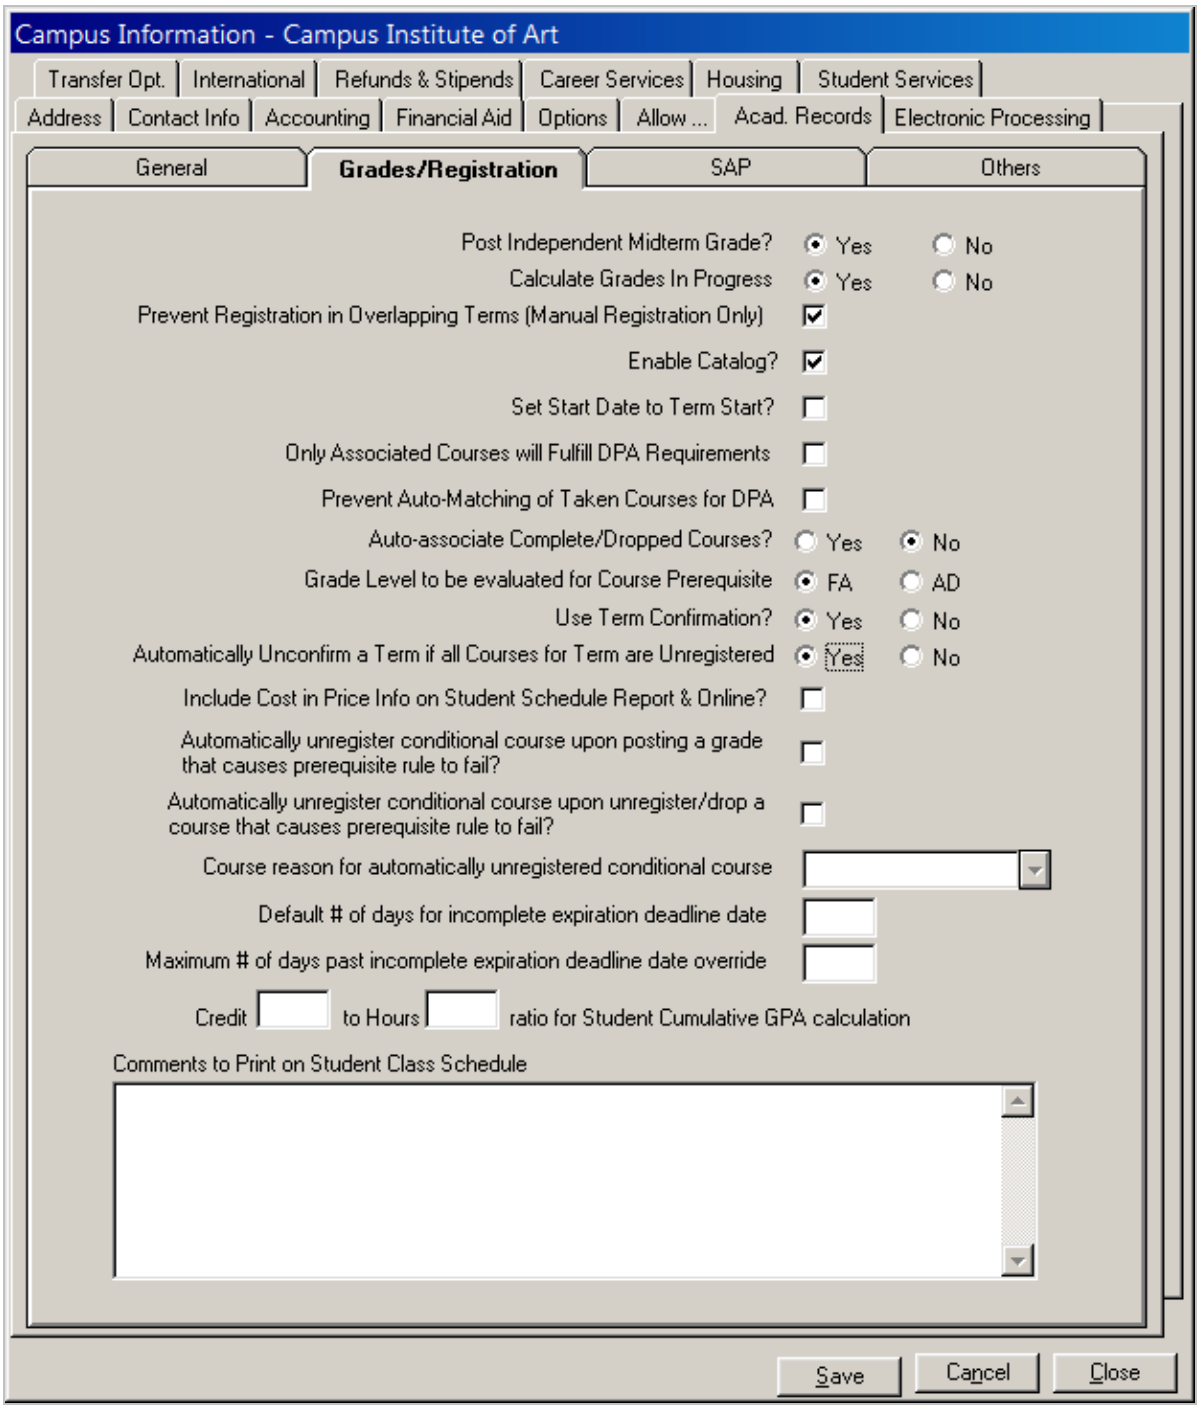
Term Confirmations options on the Student Bar and View menus are visible or hidden according to CampusNexus Student form level security and Campus settings for Term Confirmations.

Term Confirmation Setup

CampusNexus Student establishes Term Confirmation status at the Campus Location level.

To enable the Term Confirmation feature:

1. Navigate to **Setup > Campus Locations > <select a campus> Academic Records**.
2. Select the **Grades/Registration** tab.



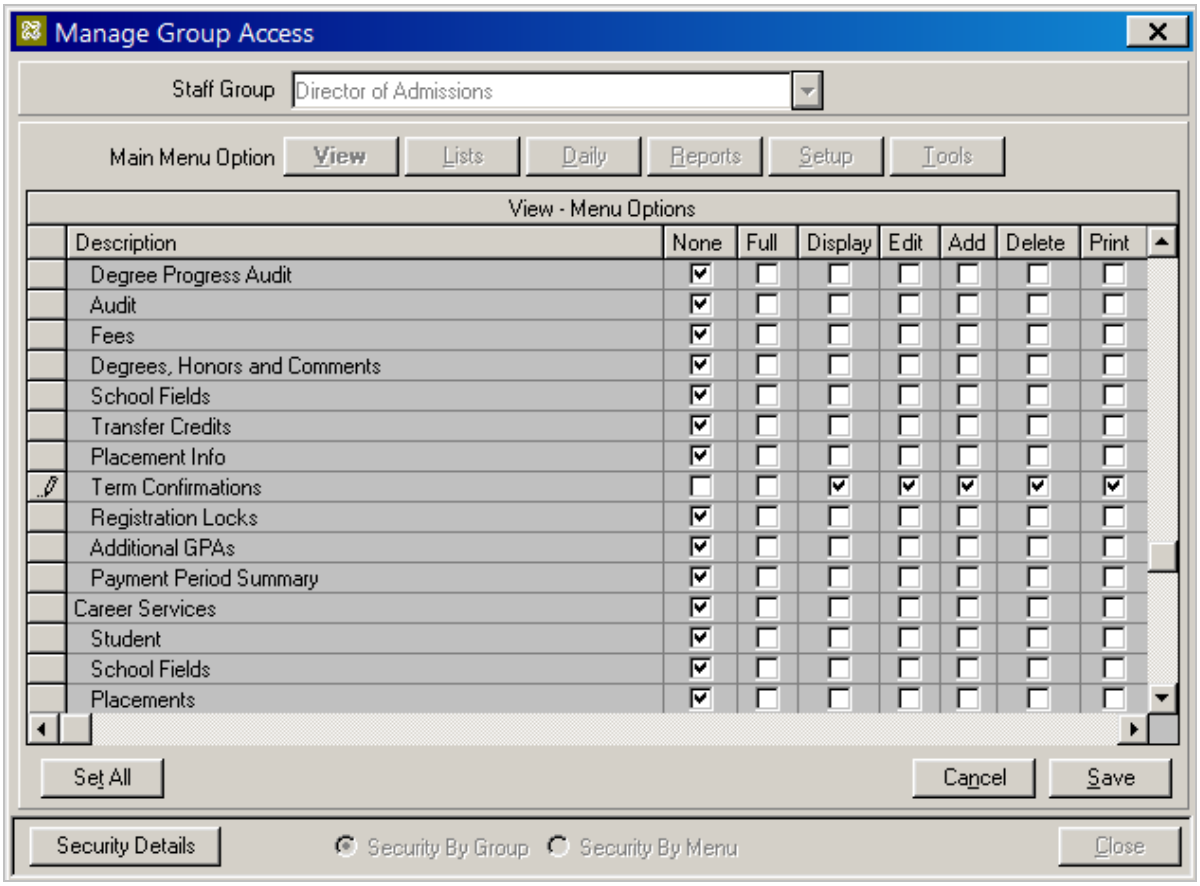
3. Select **Yes** for *Use Term Confirmation?* to enable the Term Confirmation feature.
4. Select **Yes** for *Automatically Unconfirm if all Courses for Term are Unregistered*.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Term Confirmation Staff Access

CampusNexus Student security establishes permissions to set or change Term Confirmation status at the staff group level.

To assign Term Confirmation permissions:

1. Navigate to **Setup > Security**.
2. Select the **Staff Group** for which you want to establish Term Confirmation permissions.
3. Click **View** and scroll down to Term Confirmations.



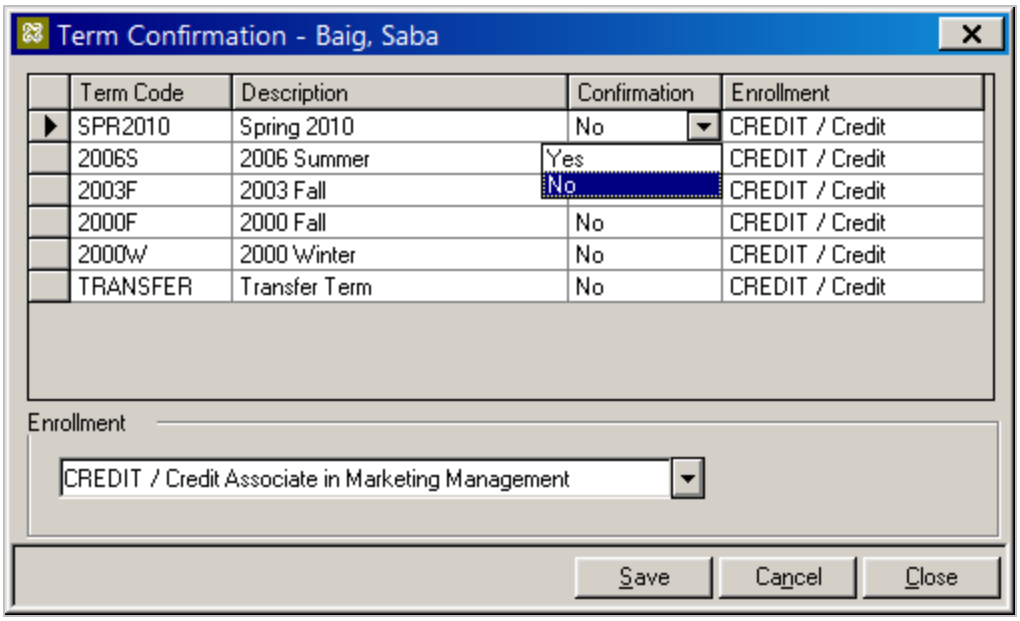
4. Select **Display**, **Edit**, **Add**, **Delete**, or **Print** permissions, or select **Full** to select all permissions.
5. Click **Save**.
6. Click **Close** to close the form.

Student Term Confirmation Status

Authorized staff can set or change student Term Confirmation status and review the settings on the Term Summary tab of the Enrollment form.

To set the student Term Confirmation status:

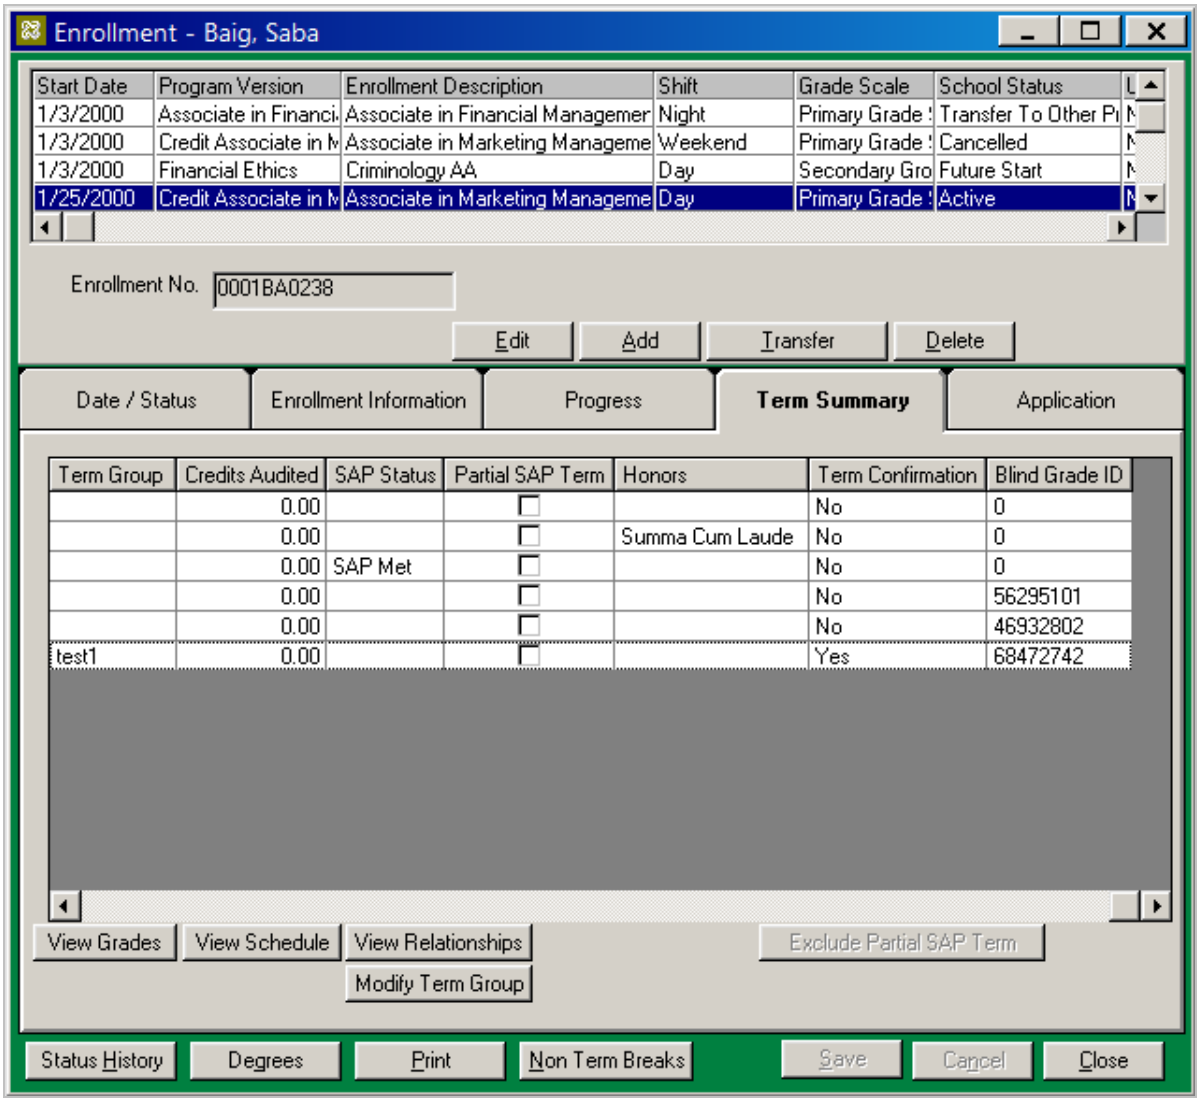
1. Select a student.
2. Navigate to **View > Academic Records > Term Confirmations** or select Term Confirmations from the Academic Records option of the Student menu. The Term Confirmation form for the selected student is displayed.



3. Use the **Confirmation** drop-down menu to set the term confirmation status for that student in a term. The default setting is No. The other fields of this form are locked and cannot be edited.
4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To review the Term Confirmation settings for a student:

1. Select a student.
2. Navigate to **View > Academic Records > Enrollment**.
3. Select the **Term Summary** tab and scroll to the right to review the Term Confirmation status. This status is locked and cannot be edited on this form.



4. Click **Close** to close the form.

Registration Locks

The Registration Locks form can be used in two different modes, depending on where the form is opened.

- Student mode allows you to configure registration locks for a specific student.
- Student group mode allows you to configure registration locks for a student group.

Use the Registration Locks form to associate a registration lock with a student or student group. You can add, edit, and delete registration locks.

To manage Registration Locks:

1. To open the Registration Locks form in student mode, navigate to **View** > **Academic Records** > **Registration Locks**.

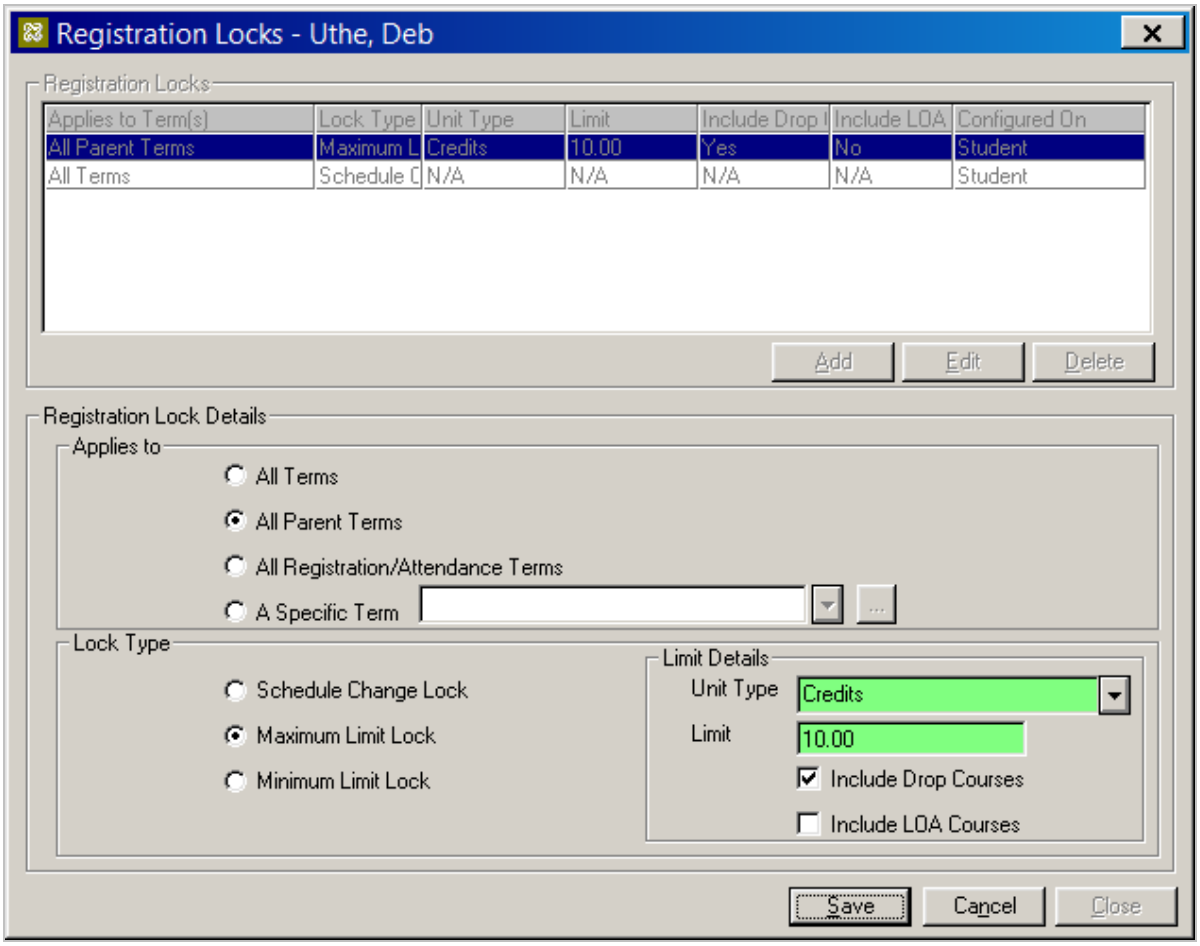
   - OR -

   To open the form in student group mode, navigate to **View** > **Student Groups**, select a student group and click **Registration Locks**.

   The Registration Locks form is displayed. This grid displays the details of all registration locks configured for a student or student group. The grid data is sorted in descending order (i.e., the last record created is the first row in the grid).

   - If the form was opened in student mode, the grid displays all registration locks associated with the student and registration locks configured for any student group to which the student belongs.
   - If the form was opened in student group mode, the grid displays all registration locks associated with the student group.

   Registration locks configured for an inactive student group are displayed in both student and student group modes, even though such locks are not enforced when they are evaluated.



2. Click **Add** in the Registration Locks grid section to add a registration lock.

   - When in student mode, any newly added registration lock is associated with the student, and not a student group.
   - When in student group mode, any newly added registration lock is associated with the student group.

   - OR -

   Click **Edit** to modify an existing registration lock.

   Note: When in student mode, the **Edit** button is disabled if the selected registration lock is a student group configured lock.

3. Specify the Registration Lock Details for the student or student group as appropriate.

   a. In the Applies to section, select one of the following term types.

      - **All Terms** - to configure the registration lock for all terms.
      - **All Parent Terms** - to configure the registration lock for all terms of type parent (terms which have children).
      - **All Registration/Attendance Terms** - to configure the registration lock for all terms of type

registration/attendance.

- **A Specific Term** - to configure the registration lock for a specific term. When this option is selected, the adjacent drop-down box, along with the button, becomes enabled and a term selection is required. The drop-down box is populated with terms that satisfy the following criteria:
  - Active Terms.
  - Terms which are not closed.
  - In student mode, terms that are associated with the student's campus or at least one of the student's enrollment campuses
  - In student group mode, terms that are applicable to at least one of the students in the student group.
  - Terms that are parent terms (i.e., there is at least one child term associated with the term and the child term usage is "Registration/Attendance"), or have their term usage set to "Registration/Attendance" in the term setup.

b. In the Lock Type section, select one of the following options:

- **Schedule Change Lock** - to configure the registration lock type as "Schedule Change" (prevents course registration, unregistering a course, and drops).
- **Maximum Limit Lock** - to configure the registration lock type as "Maximum Limit".
- **Minimum Limit Lock** - to configure the registration lock type as "Minimum Limit".

Note: When you select Maximum/Minimum lock types, the **Limit Details** section is enabled requiring you to specify the **Unit Type** and **Limit**.

c. In the Limit Details section, select one of the following options:

- **Unit Type** - to configure the unit type. Options available are: Credits; Enroll Status Credits; Enroll Status Hours; and Hours.
- **Limit** - to configure the limit for the selected unit type.
- **Include Drop Courses** - to configure if dropped courses are included when evaluating the Minimum and Maximum limit.
- **Include LOA Courses** - to configure if Leave of Absence (LOA) courses is included when evaluating the Minimum and Maximum limit.

4. Click **Save** to save your changes, or **Cancel** to discard any changes.
5. Click **Delete** to delete a registration lock. Click **Yes** confirm.

   Note: In student mode, the **Delete** button is disabled if the selected registration lock is a student group configured lock.
6. Click **Close** to close the form.

Additional GPAs

This form consists of all additional, non-system GPAs in a view -only format. (there are no options to save or edit for security purposes).

To view additional GPAs:

1. Select a student.
2. Navigate to **View** > **Academic Records** > **Additional GPAs**. The Additional GPAs form for the selected student is displayed.

   Note: If there are no additional school-defined GPAs, the following message is displayed: *No additional GPAs are calculated for the student*.

   Within the main cumulative GPA view, you can view the courses for a specific GPA. Additionally, when the GPA is configured to do so, you may also view a term by term breakdown of the GPA calculation.

   The Cumulative GPA column includes all courses taken that are selected to be included in the GPA calculation. In the case of a cumulative GPA displayed on a term, it consists of all the courses taken up to and within the terms that are also selected to be included in the GPA calculation. The current GPA is made up of only the courses that occurred in that term.

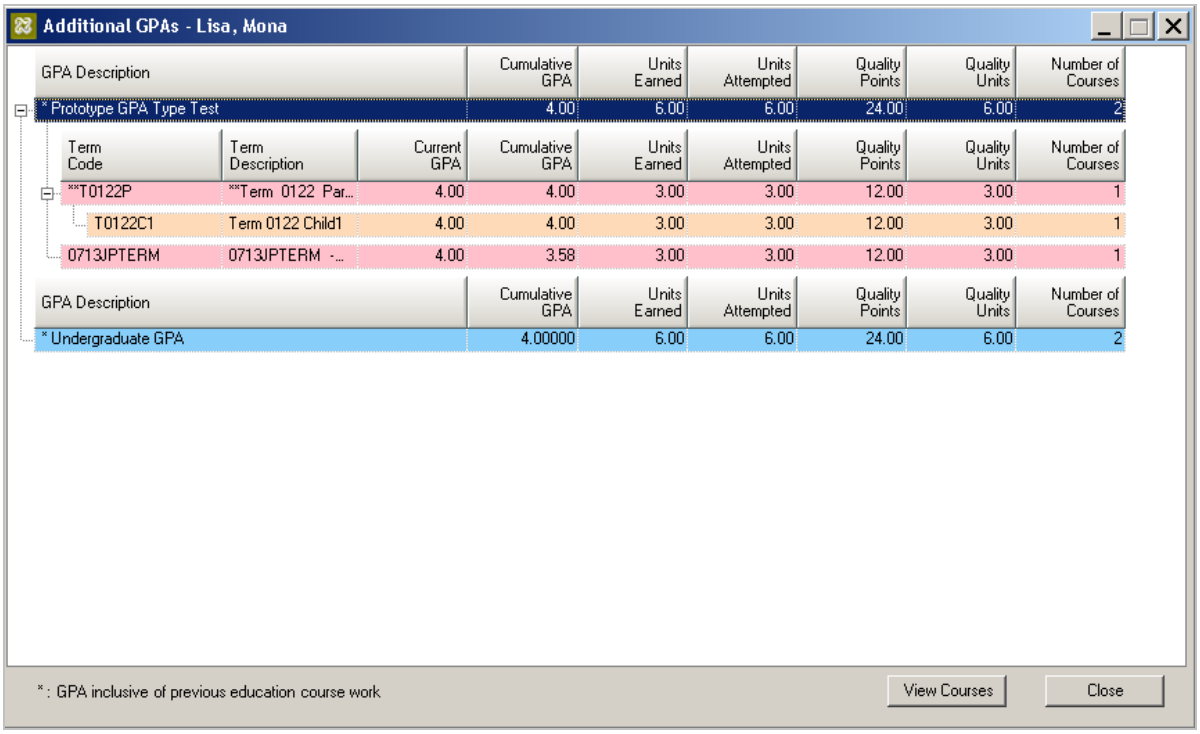
3. Click **View Courses** to see all the student's courses taken. If the GPA has been configured with any of the Previous Education options based on transfer records, all of the student's courses from the transfer credit folder appear in the lower half of the form, labeled Previous Education Courses.

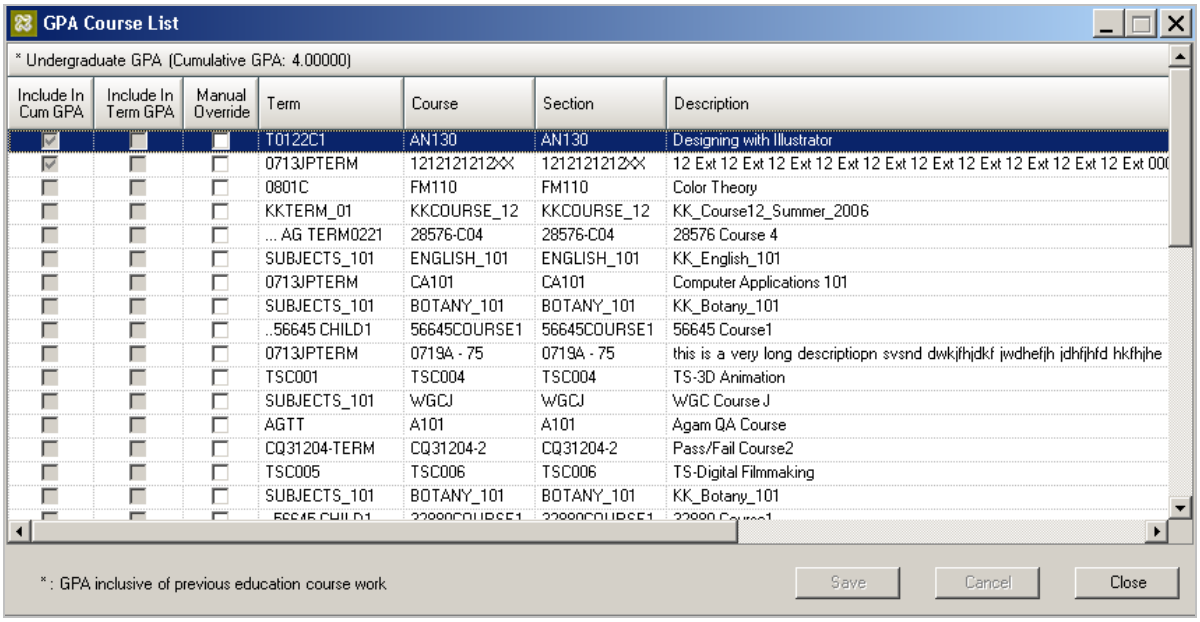
   Click the column headers to sort the data. The default sort order on this form is by Course Description.

If an asterisk appears to the left of the GPA Description, the GPA has been configured with one of the **Previous Education** options enabled.

When a GPA has been configured to **Include Term Calculations**, every term that a student has taken courses is listed regardless of whether any courses from that term are included in the GPA calculation. The Units Earned, Units Attempted, Quality Points, Quality Units and Number of Courses are totals that reflect that term only.

The Additional GPAs form displays the weighted and unweighted courses separately in the two sections on the form.





Note: The configurable GPA Type options determine which courses are included in the GPA calculations by default. Each time a new grade is posted, applicable courses are selected as included in the GPA on this form. Graded courses that do not satisfy the GPA configurations are listed as not included. Users with edit permissions on this form can override this and include the course in the calculation. Additionally, these users can edit the **Units Attempted** and **Units Earned** for students. These new GPAs will always be student-based, meaning courses from all enrollments are available for inclusion.

All completed and dropped courses are displayed for the student as long as grades are posted.

4. Click **Close** to close the form.

Note: For clients using the HOPE GPA, beginning in Fall 2011 the Learning Support Courses is excluded from the GPA calculation. Learning Support Courses are identified by being flagged as Remedial.

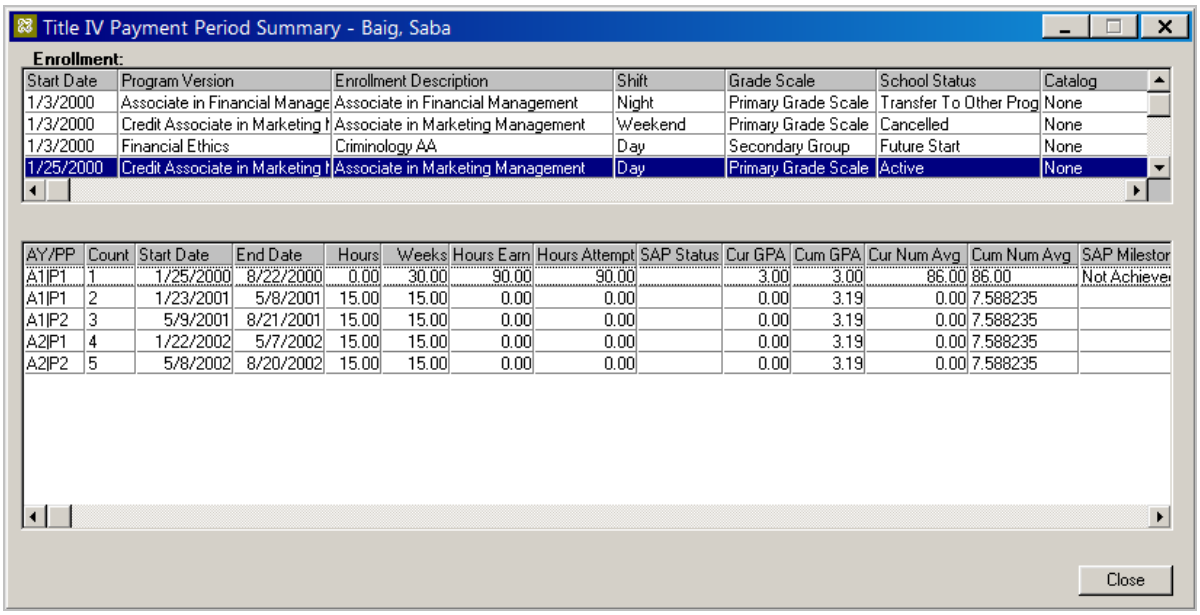
Payment Period Summary

The Title IV Payment Period Summary form enables academic advisors to view Payment Period summary results for students that are evaluated through SAP based on a completed Payment Period.

For information about locking payment periods, see Payment Period Locking and the Completed Flag.

To view the payment period summary:

1. Select a student.
2. Navigate to **View** > **Academic Records** > **Payment Period Summary**. The Title IV Payment Period Summary form for the selected student is displayed.



3. Select an **Enrollment**. The enrollment details are displayed in the grid below.

   The Payment Period Summary form displays the proper amount of time in the Hours Att and Hours Sched fields for students enrolled in Clock Hours programs with a program specified to use scheduled hours (the Use Scheduled Hours check box is selected on the Program Versions form). This information matches what is present on the Final Grades form once attendance is posted

   Note: Hours must be posted for these fields to be occupied.

4. Click **Close** to close the form.

Payment Period Locking and the Completed Flag

About the Completed Flag

The Completed flag for a payment period is set automatically by CampusNexus Student when the instructional weeks date for the payment period is equal to or less than the system date and there are enough credits earned for a credit hour payment period or enough clock hours posted for a clock hour payment period. When the Completed flag is set on a payment period, the Student Pace Evaluation Tool (SPE) will not automatically change any dates associated with that payment period.

Locking Payment Periods

CampusNexus Student allows users to exclude Academic Year, Loan Period, and payment periods from Auto-Adjustment. “Locking” or excluding those objects from auto-adjustment can be done on the Academic Year, Loan Period and Payment Period forms for a user with the proper permissions. It is important to note that locks applied to Academic Years and the associated payment periods are independent of the locks that are applied to Loan Periods and their associated payment periods.

Locks applied to the start date of an Academic Year/Loan Period and Payment Period 1

Locking a Payment Period 1 will prevent the start date of Payment Period 1 and the start date of the associated Academic Year or Loan period from being adjusted by the Student Pace Evaluation (SPE) Tool. This also prevents any dates from previous Academic Years, Loan Periods and associated payment periods from being adjusted as locks will be auto-applied to those objects. Locks applied to these start dates will still allow the SPE Tool to continue to adjust the end date of Payment Period 1, the start and end date of Payment Period 2 as well as the end date of the Academic Year and Loan Period. All subsequent Academic Years, Loan Periods and their associated objects are adjusted as well.

Locks applied to the end date of an Academic Year/Loan Period and Payment Period 2

Locking a Payment Period 2 will prevent the end date of Payment Period 2 and the end date of the associated Academic Year or Loan period from being adjusted by the SPE Tool. This also prevents any dates prior to the end date of the Academic Years, Loan Periods and associated Payment Period 2 from being adjusted as locks will be auto-applied to those objects. All Prior Academic Years, Loan Periods and their associated objects are locked and excluded from adjustment as well.

Auto Locks

The Student Pace Evaluation Tool Settings form contains a tab where the an administrator can configure CampusNexus Student to apply locks automatically. Please reference the Auto-Locks Help for more information.

Locking Academic Year End vs. Completing the Academic Year

Locks applied to payment periods do not affect the setting of the Completed flag because the criteria for setting the Completed flag involves measuring progression. The Completed flag can also be switched back to Uncompleted if lingering grades affecting the Completion criteria are entered after the Payment Period is marked Complete. This would allow CampusNexus Student to re-adjust the payment period. Locks can be removed or added at anytime by a staff user with permissions to allow CampusNexus Student to make adjustments to a payment period not marked as completed.

Note: Locks and completed flags do not restrict a user from manually changing the dates of Academic Years, Loan Periods or their associated objects.

View > Career Services

The Career Services View menu leads to functions related to job placement. The options on this menu apply to the student selected from the Recent Students list.

Menu Item	Description
Student	Displays the Student Master form.
School Fields	Displays the form used to view or enter data in school-defined fields related to the Career Services module and public fields from other modules.
Placements	Displays exit interview data and job placements for the student. You can edit the data.
Status History	Displays a history of student placement status changes.
Certifications	Displays the student's certifications.
Audit	Displays Placement Record Fields Audit, Deleted Student Placement Records, and Career Services Advisor Audit folders.

The options on the Student Bar are the same as the options on the View menu, unless the Student Bar has been altered by the user.

The Career Services module in CampusNexus Student is designed for efficient monitoring of student placement opportunities. It provides a database of employers, jobs available, exit interviews, student-related employment activity, and student employment history.

You can enter new employer information, new jobs, and interview activity. Jobs can be categorized by industry and job type. When students are placed, you can indicate such data as in field of study, related field, out of field of study, and so on.

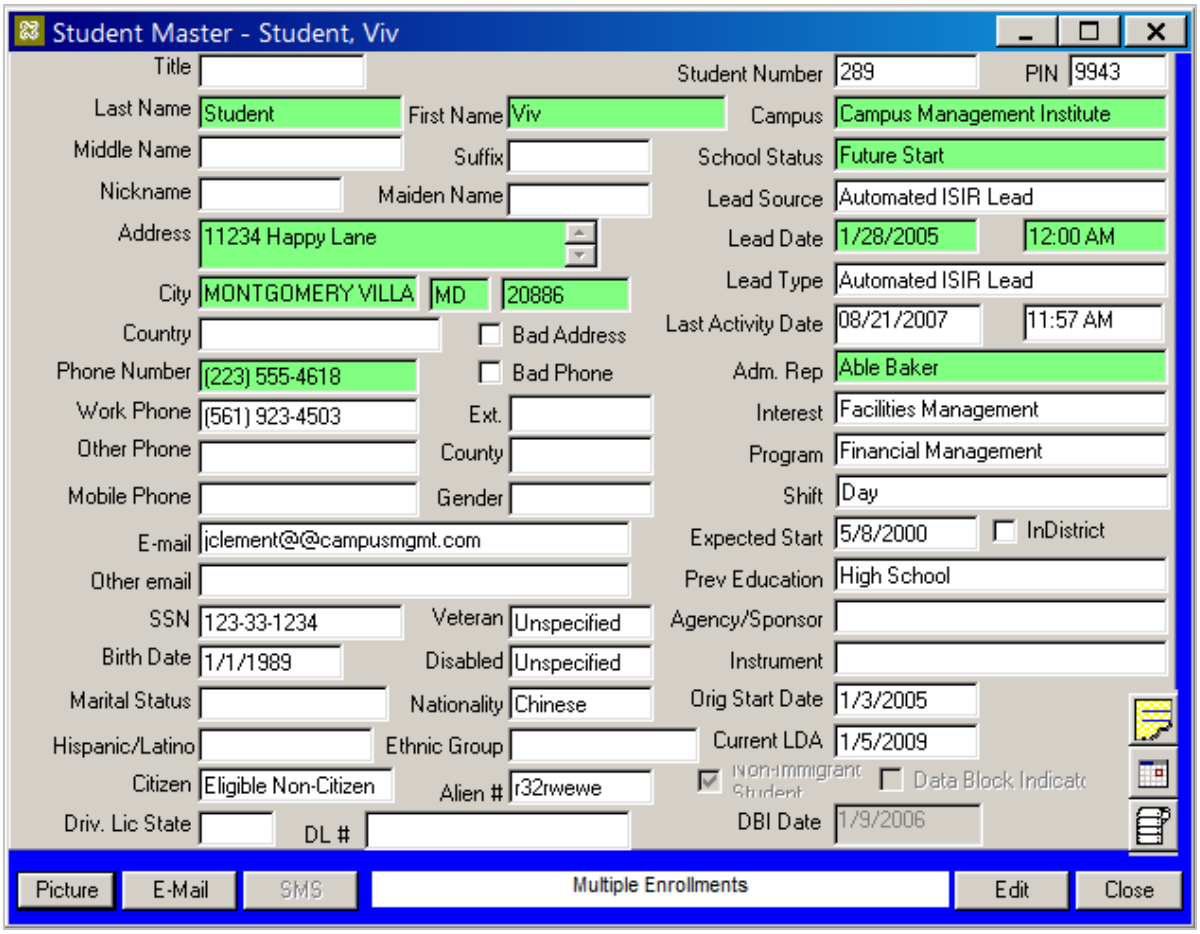
Job listings can be reported individually for bulletin board posting and can contain only the data that you find is necessary for the report's usage. Many other Career Services Reports can be viewed and printed.

Student Master

The Student Master form contains much of a student's basic demographic information. The Student Master form is usually (but not necessarily) populated in the Admissions module by adding a new lead to the database. New leads are entered using the Quick Lead Entry form or the Add New Lead **Ctrl+L** option on the File menu. The **Ctrl+N** key combination can also be used to start a new Student Master record (form) without entering a quick lead.

To view a Student Master form:

1. Select one of the following options:
    - Click **Student** on the Student Bar.
    - Double-click **Recent Students** on the Toolbar. When you change the student in the Recent Students list, a new Student Master form is displayed. If you already have a Student Master form open, it remains open in the background.
    - From the **View** menu navigate as follows:
        - Contact Manager > Student
        - Admissions > Student
        - Financial Aid > Student
        - Student Accounts > Student
        - Academic Records > Student
        - Career Services > Student
        - Loan Management > Student
        - Student Services > Student
        - Housing > Student
    - Use the **Find** menu or click on the Toolbar to search for a student.



Note: The border color around the Student Master form indicates the student's status category. In the setup options under Setup > Status Codes > Colors Tab, your system administrator can choose colors for the status categories.

2. Multiple Student Master forms can be displayed at the same time. The forms always open in the same place in the work area. Unless you have closed, moved, or minimized a previous Student Master form, the next form you open covers the previous form.

   To move between open Student Master forms use the **Window** menu and select **Tile** or **Cascade** to organize all open forms in the work area.

   When you are working with multiple students, ensure that the correct form is current (active). The name of the current student is always shown in the Recent Students text box. The title bar of the active form is always a different color than other forms which may be open in your work area.

3. To edit the information on the form, click **Edit**. See Edit a Student Master.

   Required fields on the form have a background color other than white. If a required field is blank, you must enter data in it when you edit the form, even if you did not intend to provide the information when you clicked Edit.

   Some fields are required by CampusNexus Student (Last Name, First Name, Lead Date, Admissions Rep). Additionally, your institution may designate other fields as required. The system administrator can mark fields as required in either of two ways.

- Open any Student Master (or Quick Lead) form and go to Setup > Required Fields.
- Designate the field as required in the Data Dictionary.

4. To add an activity from the Student Master form, click the **Add Activity** icon at the bottom right of the form. The Activity form is displayed.
5. Click **Close** (Ctrl+F4) to close the active Student Master form. If you are in edit mode when you click Close, you are prompted to save any changes.

Duplicate Student Records

CampusNexus Student checks for duplicate Student Master records when new leads or students are added. The following table columns are used to check for duplicates:

- Student ID
- Social Security Number
- Phone Number
- Date of Birth and Student Name (combined)
- Driver's License Number
- E-mail address.

Each check is performed only if you entered data in the corresponding field. If at least one match is found, a grid showing the matches is displayed

If the lead is a duplicate and can be found on the grid, click the record and the lead form is populated with the information for that lead. The information can then be edited. The campus for the lead can be changed only if the campus ID for the record from the grid is in the list of campuses to which you have access.

School Fields - Placement

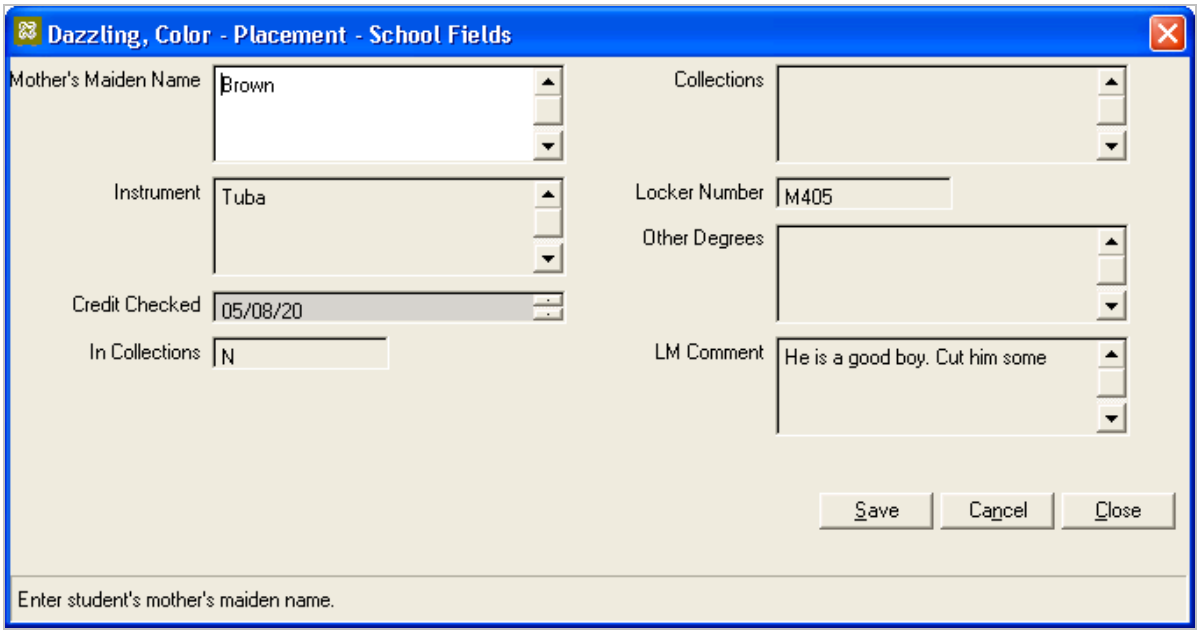
School Defined Fields are set up by your system administrator to collect information that is not required by the generic CampusNexus Student application. See Setup > School Defined Fields.

The fields are organized by department during setup. At least one department has the authority to change each field.

Some fields may be viewed but not edited in your department. A field may be flagged as confidential by the originator, i.e., not viewable outside of the department that is using it. For instance, if a field can only be viewed or edited by the Career Services Department, it will only be visible when the form is opened from View > Career Services > School Fields. If you do not have access to that menu option, you will not see this field.

To view or edit school fields:

1. Navigate to **View > Career Services > School Fields**. The School Fields form is displayed.



2. Click on a field that you want to change. Select an option or enter data to edit the field.

   The fields are displayed in edit mode (white background) if your department has permission to change the data. Fields that are "dimmed" cannot be changed. Fields that are gray and show no data are not filled in yet by the staff member responsible for doing so.

3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Student Placements

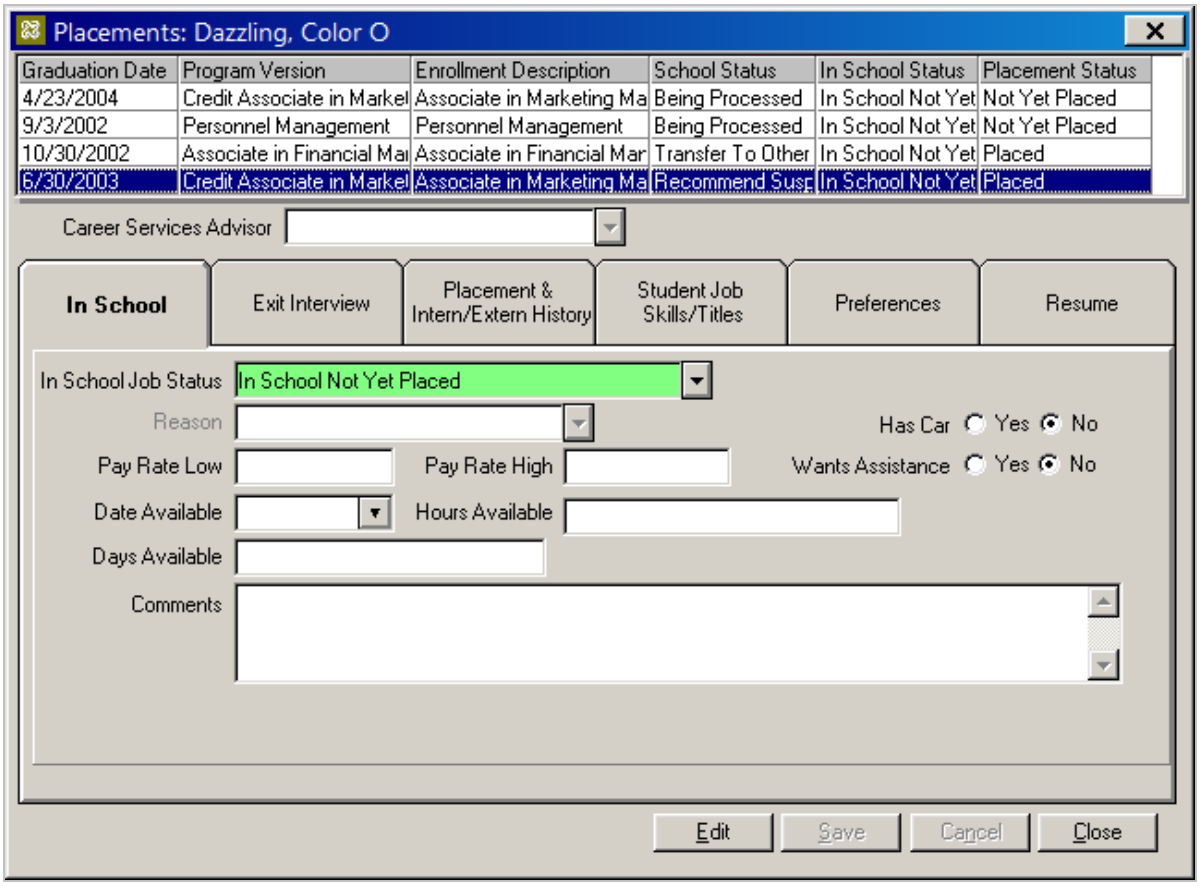
Use the Student Placements feature to record and view placement data for each student enrollment. A placement master record is created for each new student enrollment. Because a student can have more than one enrollment, a student can have more than one placement.

The Contact Manager is helpful in the Placement module to keep track of Career Services Office / Employer / Student interactions such as appointments, telephone conversations, and so on.

The grid displays all enrollments for the student including: Graduation Date, Program Version, Enrollment Description, School Status, In School Status, and Placement Status.

To work with student placements:

1. Select a student.
2. Navigate to **View** > **Career Services** > **Placements**. The Placements form is displayed.



The following fields are displayed in the top section of the form.

Field Descriptions

Field	Description
Graduation Date	Read-only. Indicates the student's graduation date.

Field	Description
Program Version	Read-only. Indicates the student's Program Version.
Enrollment Description	Read-only. Description of the selected enrollment.
School Status	Read-only. Indicates current school status.
In School Status	Display Only. Indicates placement status.
Placement Status	Indicates the current placement status. Click **Edit** to change the student's placement status (to any status other than those tied to **Placed** status). The default is set under **Setup > Career Services**. To see sample student placement statuses for use in the Career Services Department, refer to Status Codes-Setup - Status_Categories. Your institution can develop its own list of placement statuses.
Career Services Advisor	Select the student's Career Services Advisor from the drop-down list. The Career Services Advisor may be selected during the enrollment process if your institution has set up the advisor selection options. See Setup > Academic Records > Enrollment.

3. Continue with the following tabs:

   - In School
   - Exit Interview
   - Placement & Intern/Extern History
   - Student Job Skills/Titles
   - Preferences
   - Resume

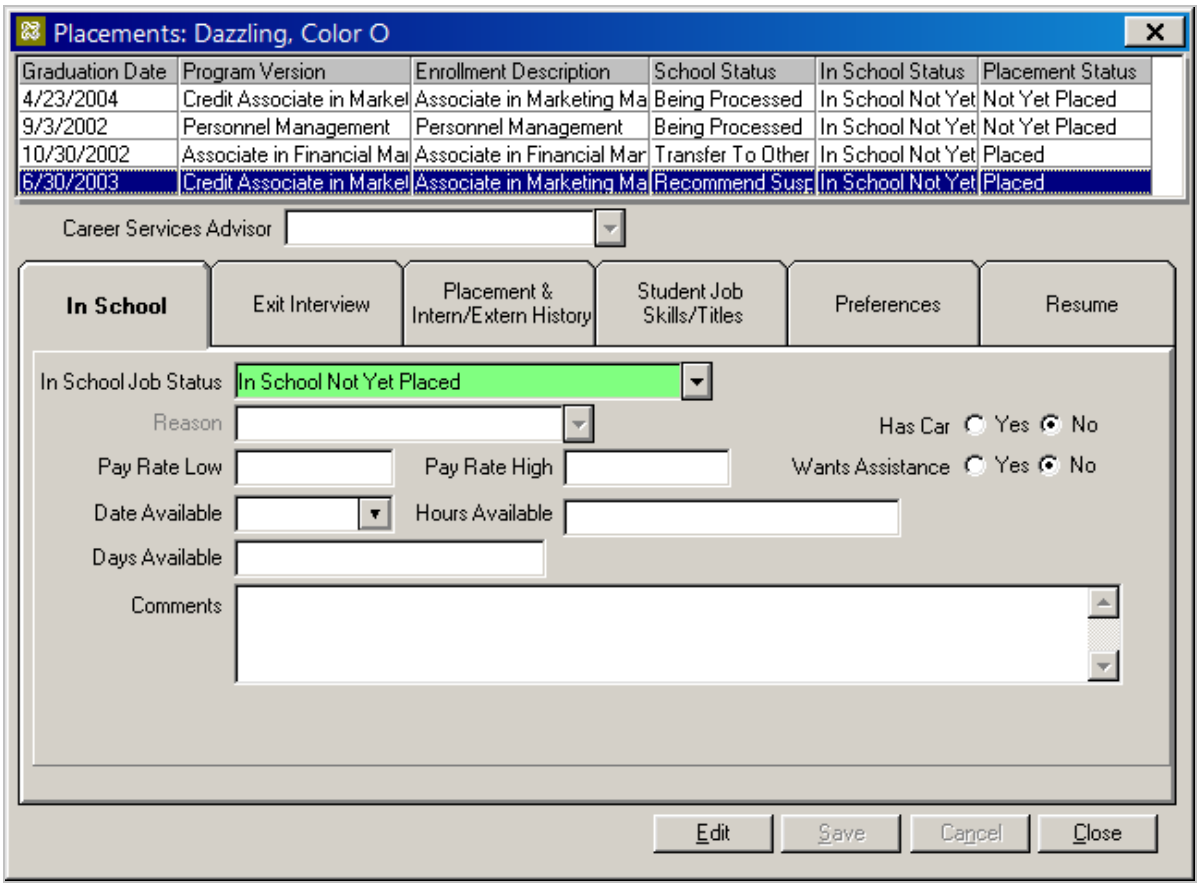
In School

The In School tab of the Placements form tracks the part time placements of students who are still in school. This must be tracked separately from graduate placements which are tracked for statistical and reporting purposes, such as Title IV funding.

The In School tab includes basic information from the student's current placement. It also indicates the current status of the student with regard to placement for the selected enrollment. Placement detail is kept by enrollment, and the enrollment data that is displayed by default is the one at Graduate or Complete status. If neither exists, the most current enrollment for that student is displayed. A placement master record is created for each new student enrollment.

To edit an In School placement record:

1. Select a student.
2. Navigate to **View** > **Career Services** > **Placements**. The Placements form is displayed.
3. Click the **In School** tab.



4. Edit the fields as needed and click **Save**.

Field Descriptions

Field	Description
In School Job Status	Select a status from the list. To see sample student placement statuses for use in the Career Services Department, refer to Status Codes-Setup - Status_Categories. Your institution can develop its own list of placement statuses.
Reason	Select a reason for changing the student's Placement Status.
Has Car?	Select **Yes** or **No** to indicate if the student has a car available for traveling to and from work.
Pay Rate Low / Pay Rate High	Enter the salary range that the student has agreed to accept from an employer.
Wants Assistance	Select **Yes** or **No** to indicate if the student wants assistance in obtaining employment.
Date Available?	Enter the date that the student is available to begin work.
Hours Available	Enter the hours that the student is available for work. This is an unformatted text box. Type text as required.
Days Available	Enter the days that the student is available for work. This is an unformatted text box. Type text as required.
Comments	Enter comments.

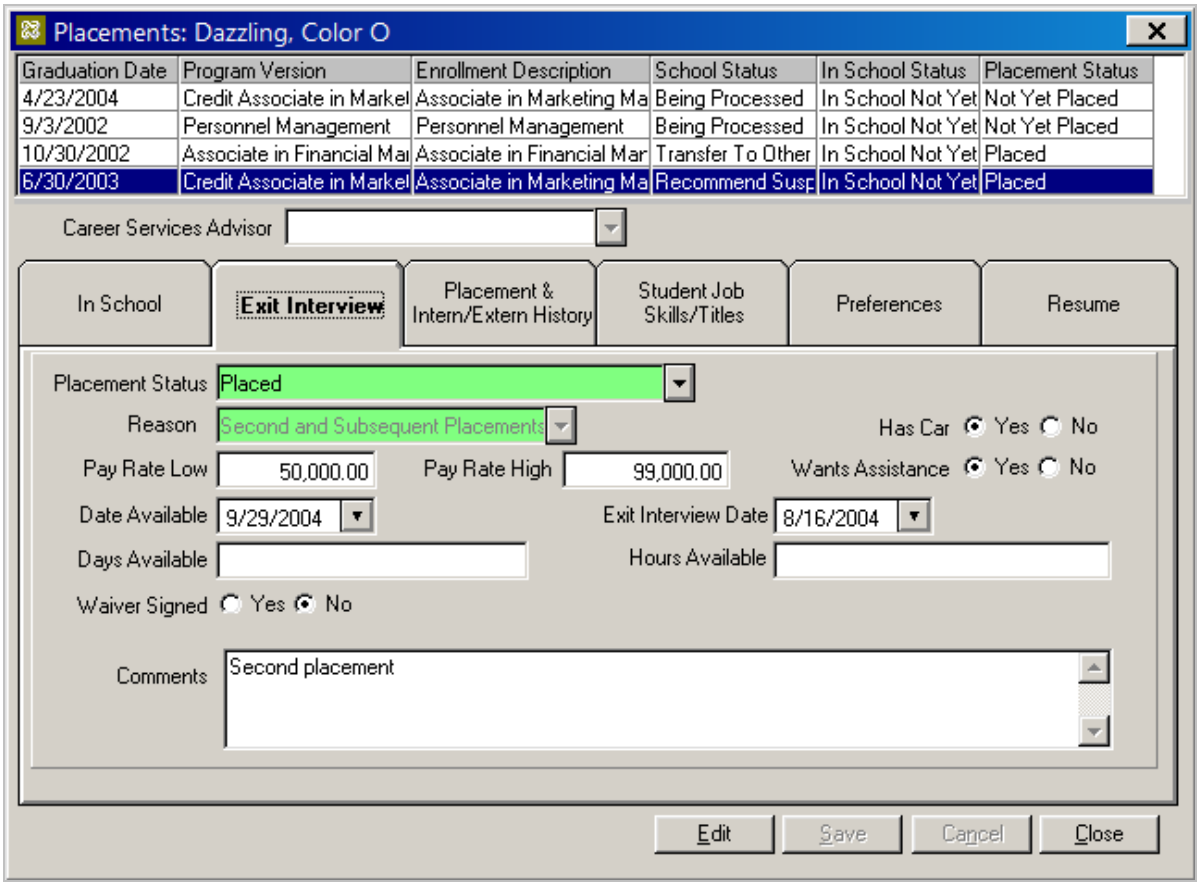
Exit Interview

The Exit Interview tab of the Placements form includes basic information from the student's Placement Exit Interview. It also indicates the current status of the student with regard to placement for the selected enrollment. Placement detail is kept by enrollment. The enrollment data displayed by default is the one at Graduate or Complete status. If neither exists, the most current enrollment for that student is displayed. A placement master record is created for each new student enrollment.

In conjunction with the Automatic Document Scheduler feature, document schedules based on Enrollment are evaluated when the Placement Status for a student is modified and saved on the Exit Interview tab. If the student's data matches the specified criteria for a document schedule where the criteria includes placement status, all documents attached to the document schedule that are not already scheduled are scheduled for the student.

To edit an exit interview record:

1. Select a student.
2. Navigate to **View > Career Services > Placements**. The Placements form is displayed.
3. Click the **Exit Interview** tab.



4. At the top of the form, select the **Enrollment** for which to edit the exit interview.
5. Click on the data entry fields to change the contents. Some fields are read-only and cannot be changed. See the section below for an explanation of the data entry fields.
6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Field Descriptions

Field	Description
Placement Status	Select a Placement Status from the drop-down list.
Reason	Select a reason for changing the student's Placement Status.
Has Car?	Select **Yes** or **No** to indicate if the student has a car available for traveling to and from work.
Pay Rate Low / Pay Rate High	Enter the salary range that the student has agreed to accept from an employer.
Wants Assistance	Select **Yes** or **No** to indicate if the student wants assistance in obtaining employment.
Date Available?	Enter the date that the student is available to begin work.
Exit Interview Date	Enter the date that the placement exit interview occurred.
Days Available	Enter the days that the student is available for work. This is an unformatted text box. Type text as required.
Hours Available	Enter the hours that the student is available for work. This is an unformatted text box. Type text as required.
Waiver Signed	Select **Yes** or **No** to indicate if the student has signed a waiver of placement assistance from your institution.
Comments	Enter any appropriate comments from the exit interview.

Placement & Intern/Extern History

The Student Placement History page of the Placements Form displays of job placements for the selected student. From this page, you can add a new placement, edit an existing one or assign/view Contact Manager Activities that pertain to this placement.

The form fields vary based on whether the position is an Employment position or Internship/Externship position. The Internship/Externship job placement wizard and the detail form for such a position do not display salary information. The Employment forms display salary information.

Note: To protect students' privacy, staff members and staff groups are prevented from viewing, printing, or exporting Social Security Numbers (SSNs), unless the System Administrator has set up permissions for these functions. See Social Security Number (SSN) Handling in CampusNexus Student.

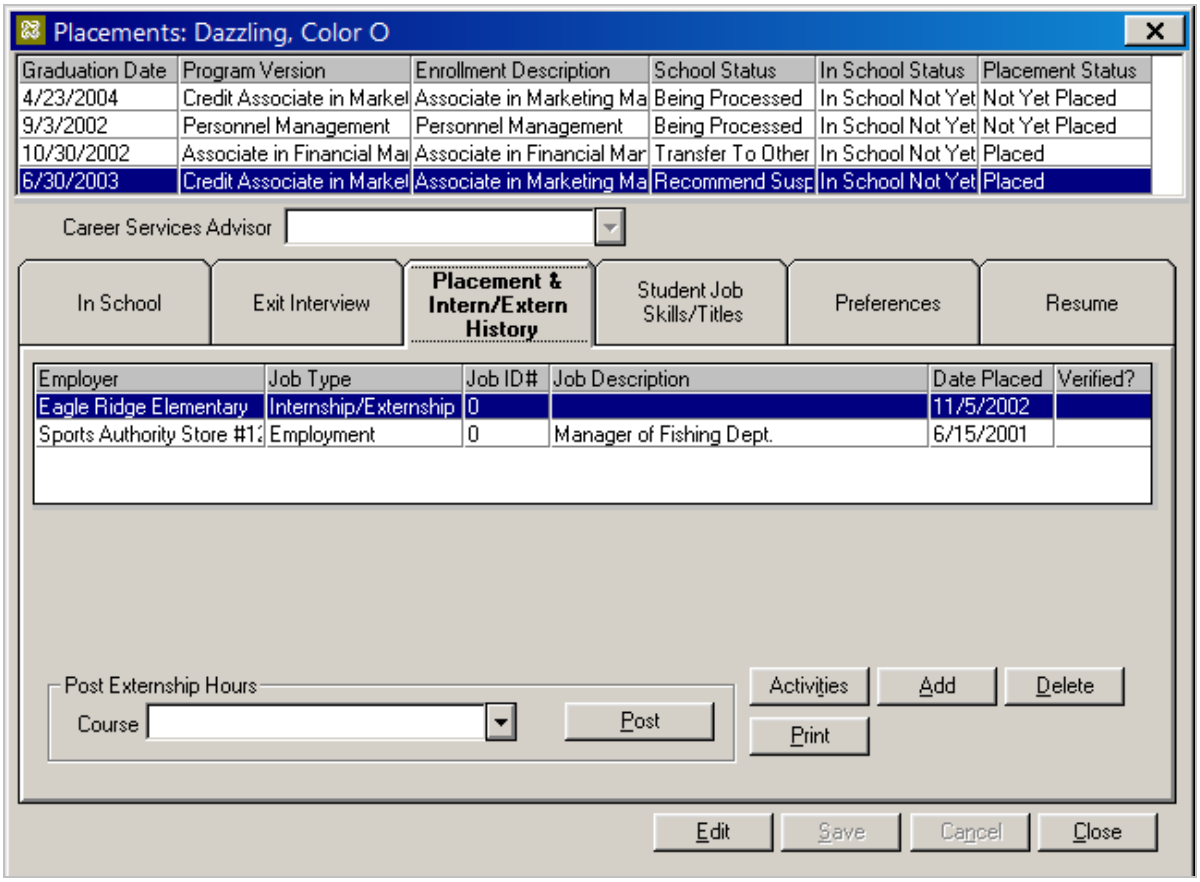
To add/view activities:

Select a placement from the grid and click **Activities**. The Contact History form is displayed. This form has two tabs: Current and Historical.

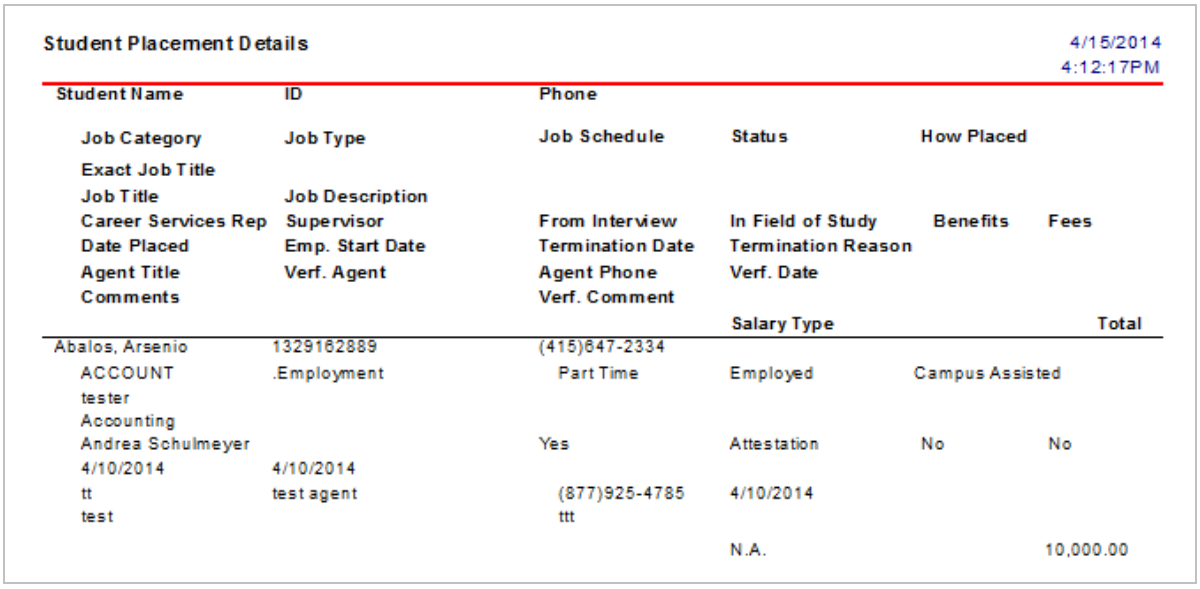
Click **Add** in the **Current** tab to add Contact Manager activities associated with this placement. The **Historical** tab is a read-only record of all Contact Manager activities associated with this placement.

To add a job placement record:

1. Select the student for whom the job placement record is to be added.
2. Navigate to **View > Career Services > Placements**. The Placements form is displayed
3. Click the **Placement & Intern/Extern History** tab. The list of placements for the selected student is displayed. If this is the first placement for the student, the list is empty. A field with student's courses of type Externship allows you to post externship hours.



4. Click **Add** to add a placement to this grid. The Student Placement wizard is displayed.
5. Follow the steps in the topic: Placement Wizard.
6. Select a placement and click **Delete** to remove the placement.
7. Click **Edit** to change information about the selected placement.
8. Click **Print** to view the Report Selection form. Select filtering criteria to generate the Student Placement Details Report.



Student Placement Details 4/15/2014 4:12:17PM

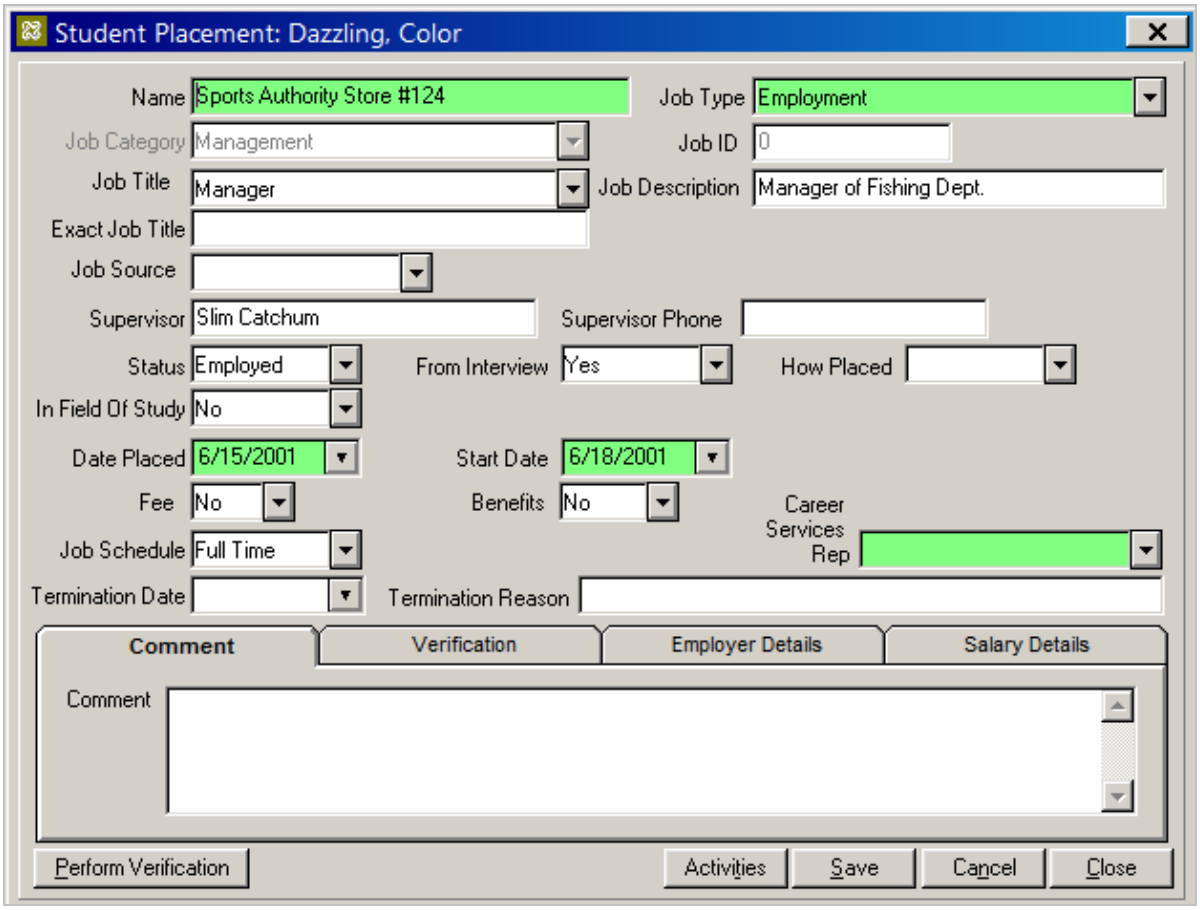
9. After you have completed the information for the Student Placement Wizard, you will return to this form where you can **Save** and **Close** to save your changes.

To view or edit a job placement:

1. Select the student for whom the job placement record is to be viewed or edited.
2. Select **View** > **Career Services > Placements**. The Placement form is displayed.
3. Click the **Placements** tab. The list of placements for the selected student is displayed. If the student has not been placed, there will be no items on the list. Refer to the discussion on adding a job placement.

4. Select a job placement from the list and click **Edit**. The Student Placement form is displayed.



Converting an Intern/Externship to a Job

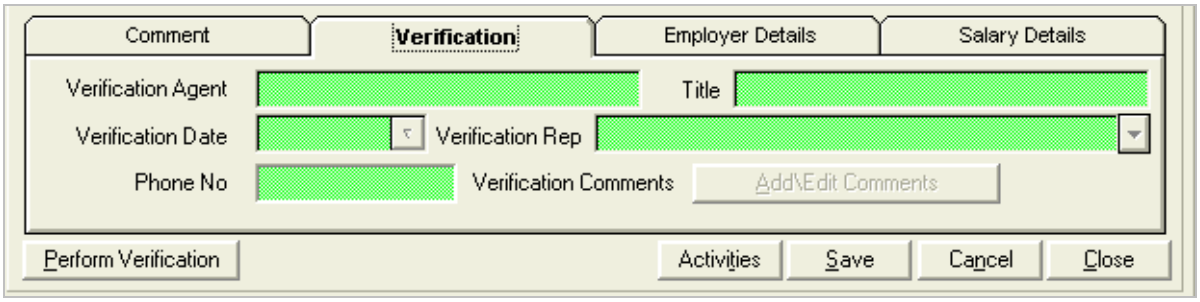
If the placement being edited has a Job Type of 'Internship/Externship', it is possible to convert the job type to 'Employment. When an 'Internship/Externship' job type is edited, a 'Convert to Job' button is displayed. When you click this button, CampusNexus Student prompts for the information required to convert the internship/externship to a full time employment status. The Student Placement wizard requests information (Verification, Employer Details, and Salary Details) in the same manner as if a new placement was being entered; however, the existing employer information is retained. After the process is complete, a new line entry appears under the Placement & Intern/Extern History tab.

Comment Tab

Enter any comments that are relevant to this student placement. CampusNexus Student inserts the job description from the Available Job listing.

Verification Tab

Click **Perform Verification** to enable the Verification tab. If the Verification Date is null, CampusNexus Student displays the **Perform Verification** button. Otherwise, the Perform Verification button is not available. If the verification information is already complete (the Verification Date is not null), the fields are available for editing.



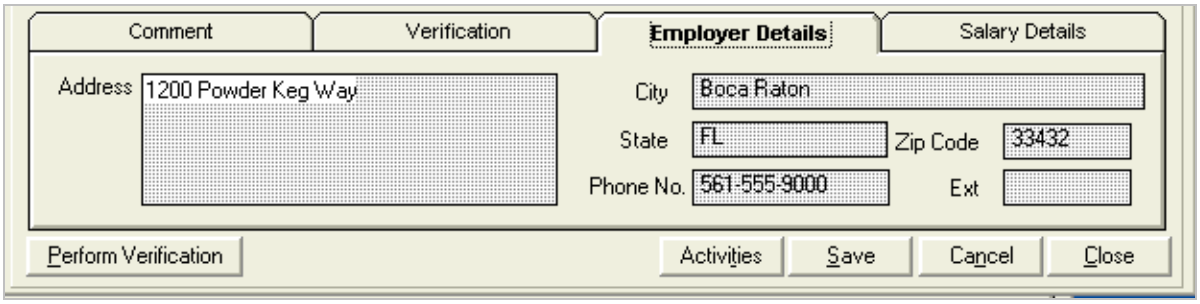
CampusNexus Student provides a message if one or more of the verification fields is empty or null: "*All verification fields must be completed to save changes when the verification date is populated.*" Once you save the verification data, the "Perform Verification" button is removed. If the "Perform Verification" selection was not made while you are editing the form, CampusNexus Student does not validate the verification fields.

Field Descriptions

Field	Description
Verification Agent	Required. Enter the name of the person who verified that the student has started the job.
Title	Required. Enter the title of the Verification Agent.
Verification Date	Required. Enter the date that the verification was performed. This date defaults to today's date when you click the Perform Verification button. You can edit the date if necessary.
Verification Rep	Required. Select the school staff person who verified the student's employment. By default CampusNexus Student displays the person who is logged in if that person is a member of the Placement Rep group.
Phone Number	Required. Enter the telephone number of the Verification Agent. This field is defaulted to the Employer telephone number when you click the Perform Verification button.
Verification Comments	Required. Click Add/Edit Comments. Enter any comments concerning the verification. The Verification Comment must be populated to save the verification data.

Employer Details Tab

This tab displays read-only employer address information.



Salary Details Tab

This tab displays read-only information about the job salary. Click **Adjust Salary** to edit this information.

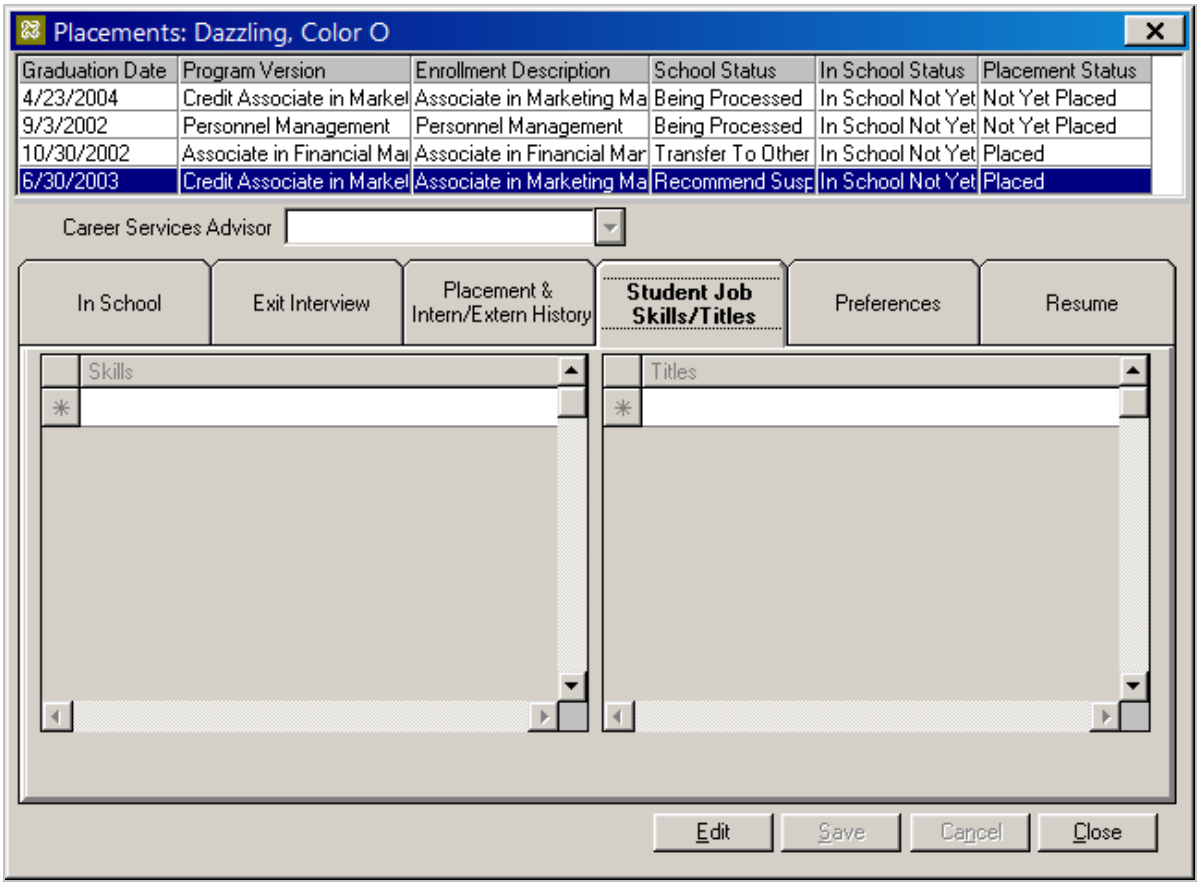
Student Job Skills/Titles

The Student Job Skills form is used to select skills that apply to the selected student from a previously defined list of skills. These skills are used to manually match up qualified students with available jobs.

To select a list of special skills and job titles that apply to the selected student:

1. Select a student.
2. Navigate to **View > Career Services**. The Placements form is displayed.
3. Click the **Student Job Skills/Titles** tab. The skills and titles for the selected student are displayed.



4. Click **Edit** to add a skill or job title to the list, then click the field where you want to add a skill or title. Select the item from the drop-down list.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To delete a skill or title from the list:

1. On the **Student Job Skills/Job Titles** tab of the Placements form, click **Edit** to modify the list.
2. Click the arrow button to the left of the skill or title to be deleted.
3. When the item to be deleted is highlighted, press the **Delete** key.

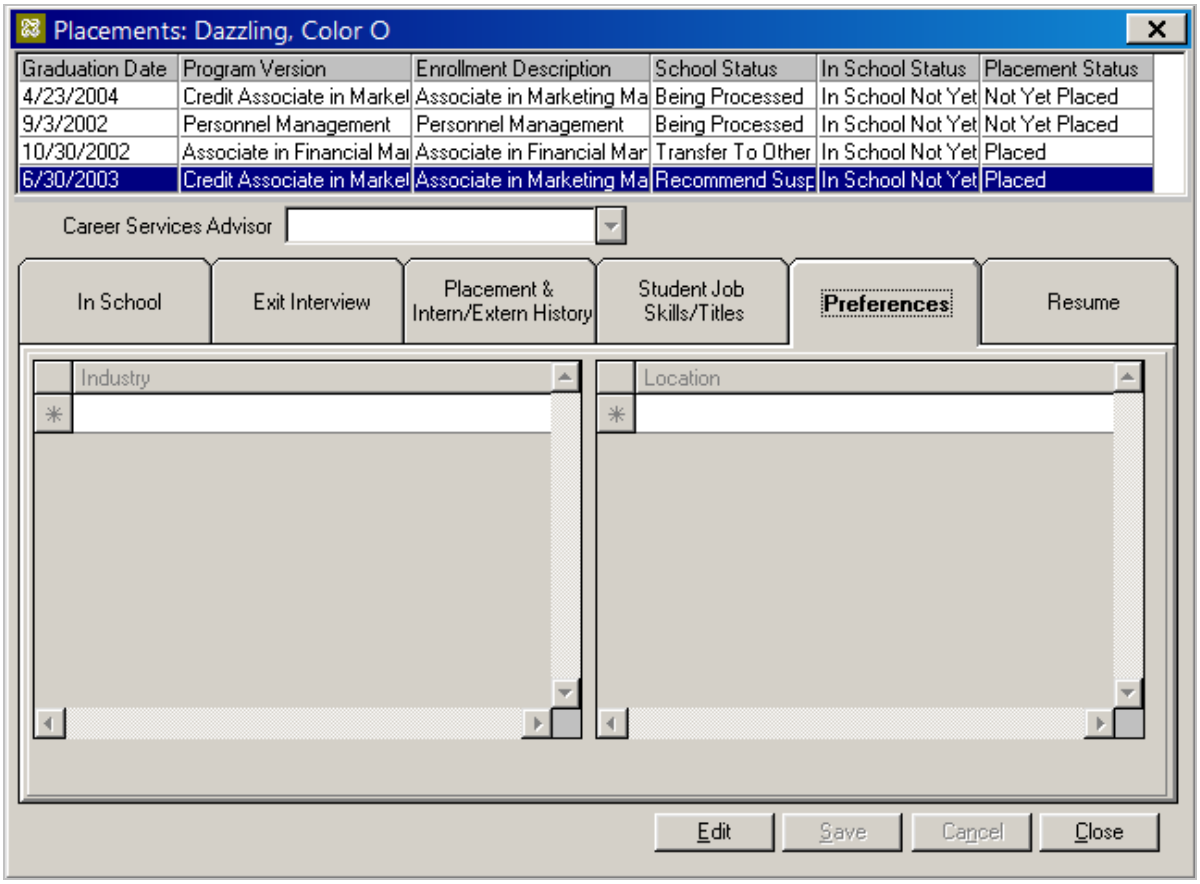
4. CampusNexus Student displays a confirmation message. Click **Yes** to delete the item from the list.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Placement Preferences

The Preferences tab is used to indicate a preferred industry and location for a student.

To designate preferences that apply to the selected student:

1. Select the student for whom the preferences are to be added.
2. Navigate to **View** > **Career Services> Placements**. The Placements form is displayed.
3. Click the **Preferences** tab to view the list of preferred industries and locations (if any) for the selected student.



4. Click **Edit** to add a new preference to the list, then click the field where you want to add a preference. Select the preference from the drop-down menu.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To delete a preference from the list:

1. With the **Preferences** tab on the **Placements** form active, click **Edit** to modify the list.
2. Click the arrow button to the left of the item to be deleted.
3. When the item to be deleted is highlighted, press the **Delete** key.
4. CampusNexus Student displays a confirmation message. Click **Yes** to delete the item from the list.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Resume

The Resume tab is used to store electronic copies of the student's resume and if desired, one other document. The other document is typically a work sample, drawing, or some other presentation to demonstrate the student's proficiency in a particular field. Students can upload their documents to this page from Portal > My Career > My Resume.

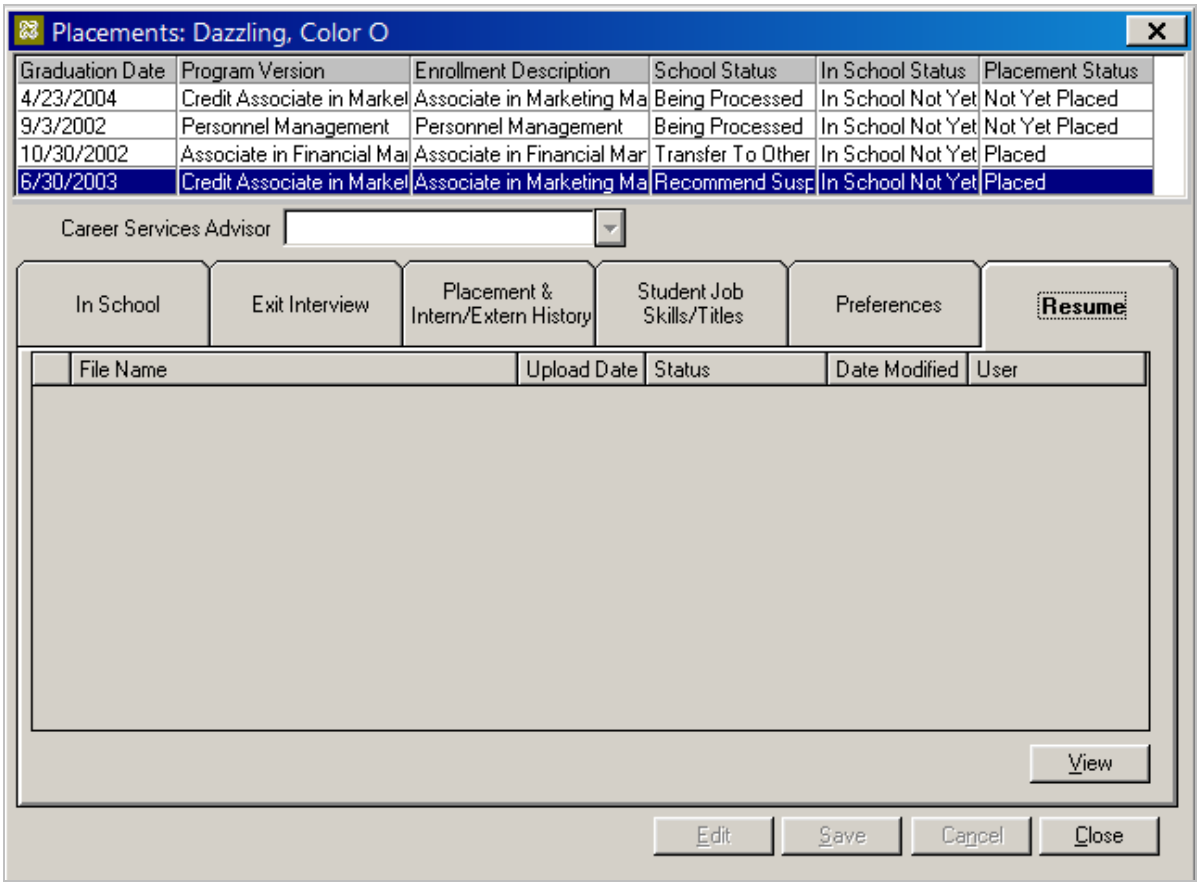
Note: ImageNow must be installed and running to view resumes on file. See Display Document for further information regarding ImageNow (View > Contact Manager > Documents).

Authorized staff members receive documents and allow viewing in View > Contact Manager > Documents > Document Tracking.

The system supports only one resume. If the student wishes to add an updated resume, the system over-writes the old one and replaces it with the new one. In this way, only the most current student resume is accessed.

To access a student's resume:

1. Navigate to **View > Career Services > Placements**. The Placements form is displayed.
2. Click **Resume**. CampusNexus Student displays the student-determined File Name, Upload Date (when uploaded by student), Status (when introduced into the system and approved, if required,by staff), Date Modified (Over-written with a later version by the student) and the User (staff member).



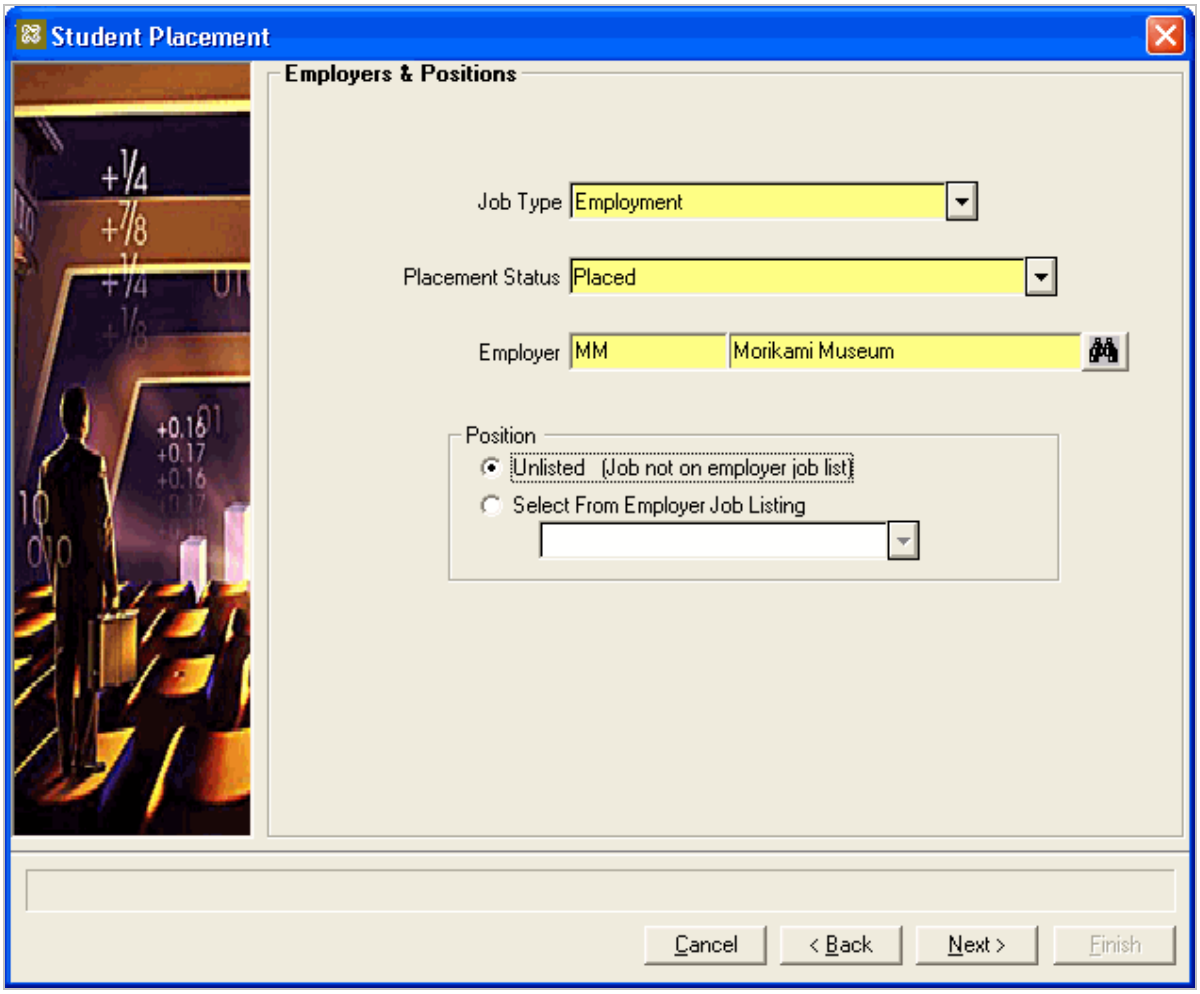
3. Select a document in the grid and click **View**.
4. Click **Close** to close the form.

Placement Wizard

When you are ready to place a student in an available job, a wizard guides you through the steps.

To place a student in an available job:

1. Select the student for whom the job placement record is to be added.
2. Navigate to **View > Career Services > Placements > Placement & Intern/Extern History** (tab). The Student Placement form displays placements for the selected student
3. Click **Add** to launch the Student Placement wizard. The Employers & Positions form is displayed.
4. Select the **Job Type**, **Employer**, and the **Job** in which the student has been placed. Click **Next**.

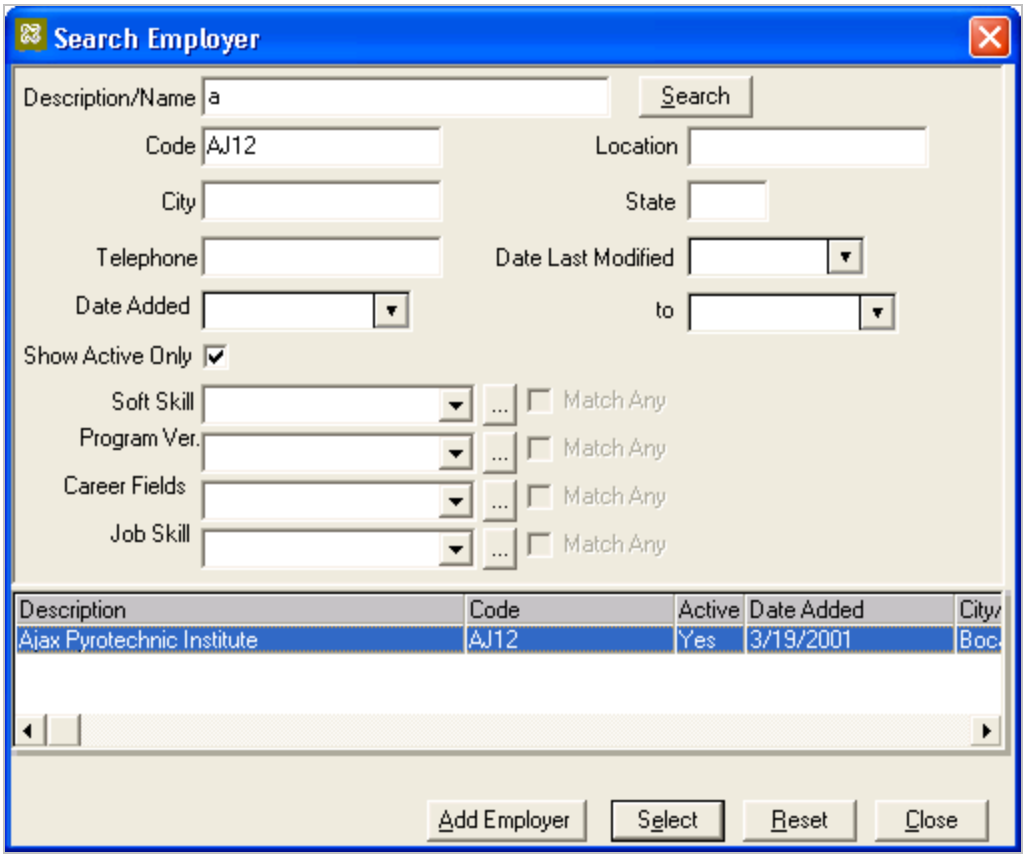


Note: When you add a new placement, click **Search Employers** to shorten the list of employers displayed when you click the Employer list. Enter a value for which CampusNexus Student can search. CampusNexus Student populates the list with only those employers that match your search value. CampusNexus Student compares your search value with the employer name, code, city, and state. If only one employer matches, CampusNexus Student selects the record and fills in the code and description.

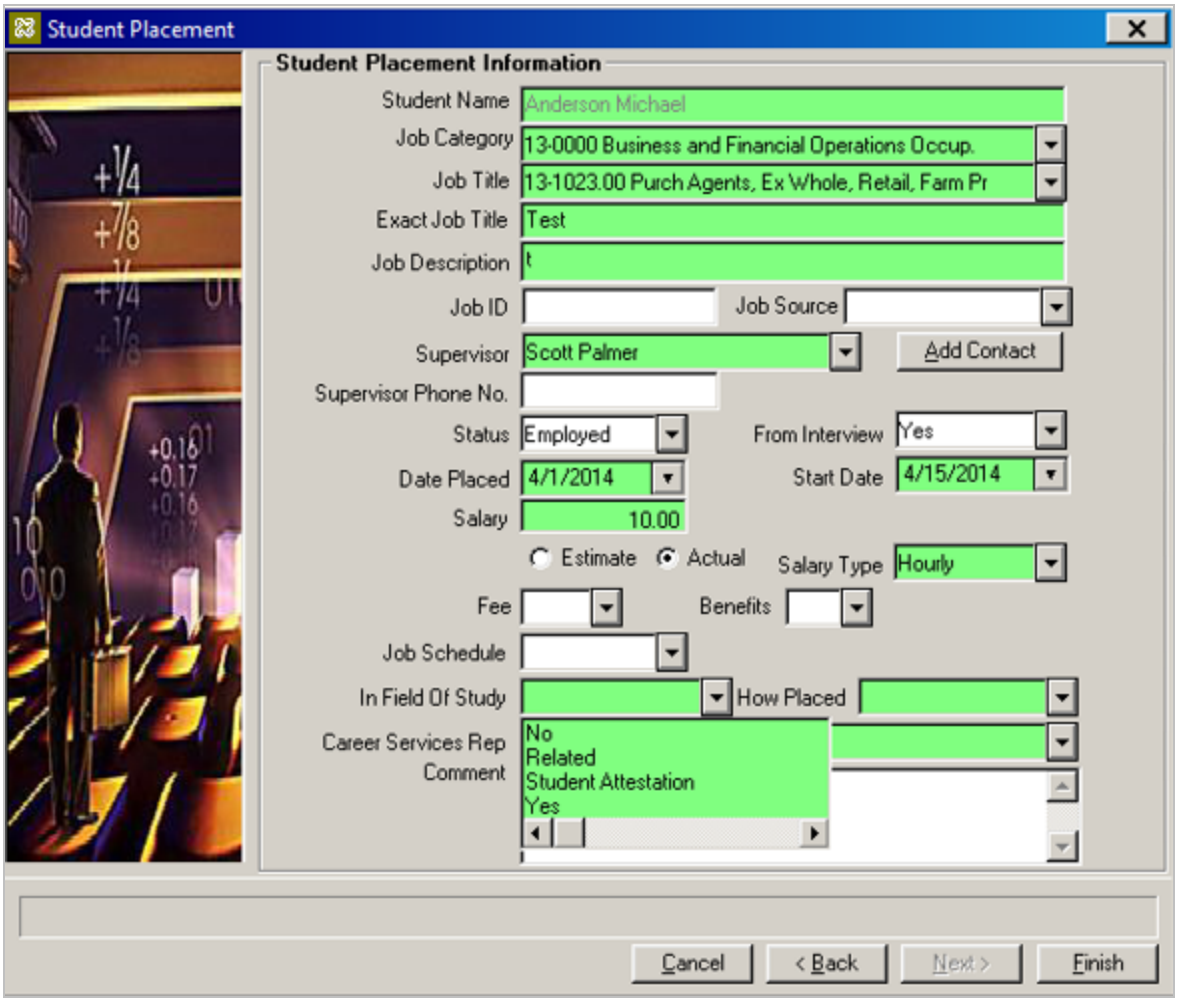
Add New Employers

5. Click **Add Employer** to enable the Employer form. In this form, enter information about a new employer, and add

that employer to your database.



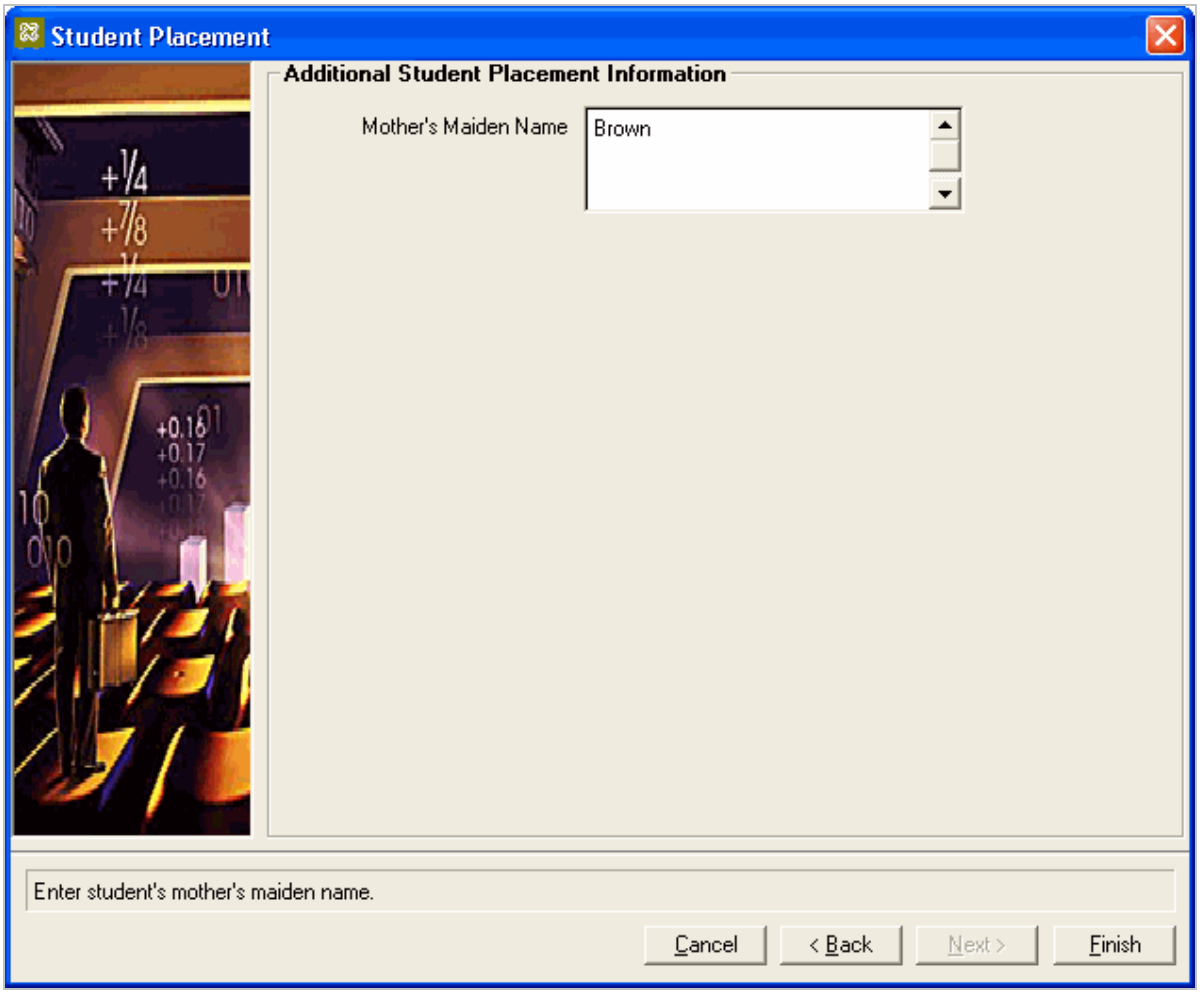
6. Enter the details about the job placement. Refer to the Descriptions of Fields on the Student Placement Information Form. Click **Next**.



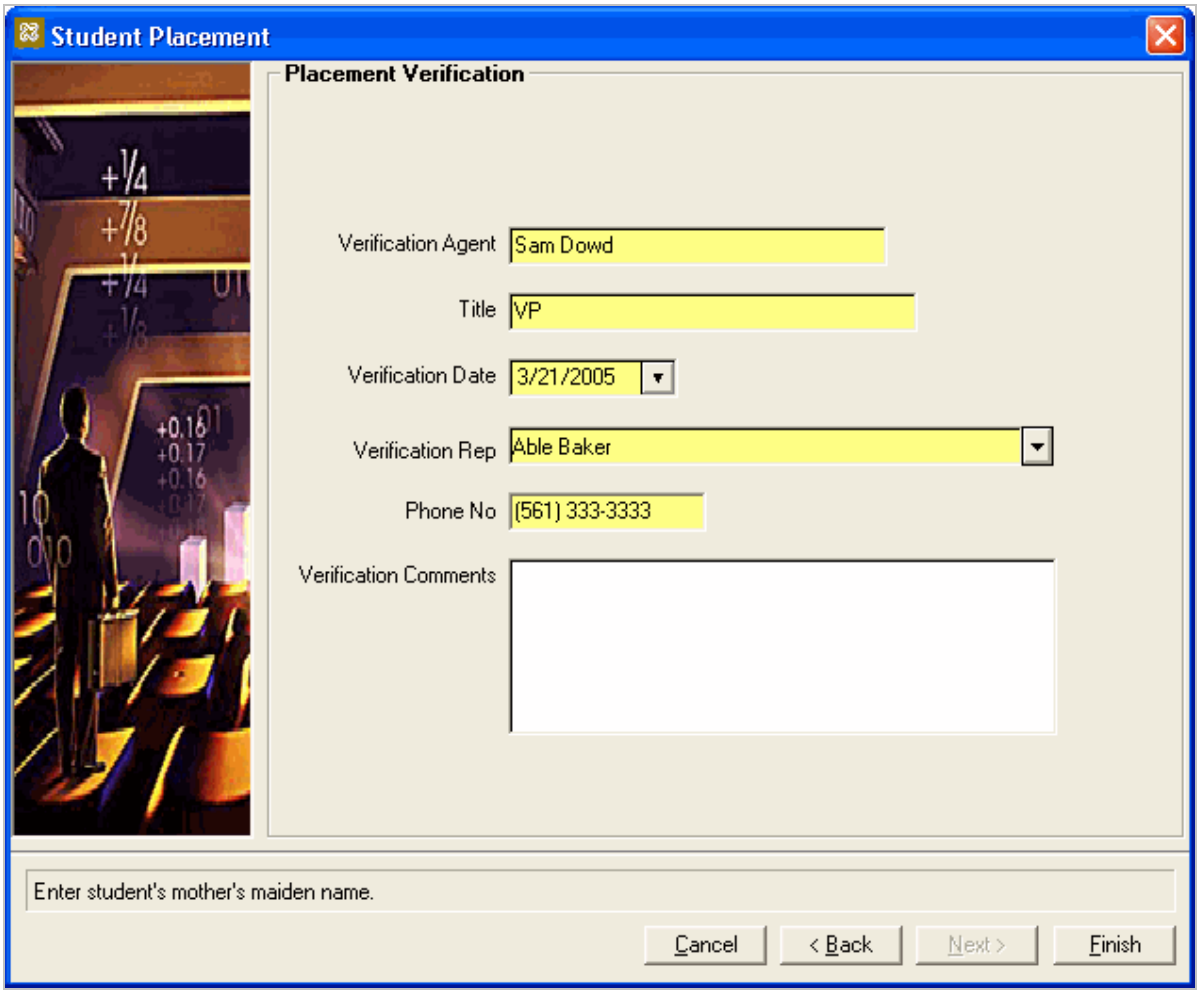
7. Enter the remaining details about the job placement. The comments box contains the job description. Add any additional comments that are required.

   Note: If your campus has customized the Student Placement Wizard with school-defined fields or has enabled placement verification, the Next button is enabled and you can view an additional wizard form by clicking **Next**.

8. The optional **School Defined Fields** form is displayed if your campus has that feature enabled. Enter the information as required.



9. The optional **Placement Verification** form is displayed if your campus has enabled that feature in the **Lists > Career Services > Job Type** settings. Enter the information as required.



10. Click **Finish**.
11. Click **OK** on the confirmation message.

Fields Descriptions: Employer & Positions Form

Field	Description
Job Type	The type of job is a required field that is selected from a drop-down list. This list is set up on the **Lists** > **Career Services** > **Job Type** form.
Placement Status	The placement status is selected from a drop-down list of placement status codes. This list is set up on the **Lists** > **Career Services** > **Status Codes** form.
Employer	You can enter the employer information, or click the Search button to find the employer.
Position Fields	• Unlisted (Job not on employer job list) - Enable the **Unlisted** option if the position is not listed on the employer's job list. • Select from Employee Listing - Enable the **Select from Employee Listing** option if the position is already posted on the employer's job list. This allows you to select it from the drop-down list of jobs.

Field Descriptions: Student Placement Information Form

Field	Description
Student Name	The name of the student being placed.
Job Category	Select a job category from the list. Multiple selections can be associated with Job Titles. You cannot select a Job Category for a campus where you do not have authorization. After making a selection, CampusNexus Student fills the Job Title associated with the select Job Category.
Job Title	Select the title of the job from the list.
Exact Job Title	Enter the exact job title.
Job Description	Enter a description of the job.
Job ID	This number is generated automatically.
Job Source	How was the student placed in this job? The choices are by the college, by the student (without college assistance), or Continuing Ed. Continuing Education refers to those students who are continuing their education even though they are employed with or without employment assistance from your school.
Supervisor	Enter the name of the supervisor for this position.
Supervisor Phone Number	Enter the name of the supervisor's phone number
Status	Select the status of the placement: **Employed** or **Terminated**.
From Interview	Was the job acquired from the interview set up by the school with the employer? Select **Yes** or **No**.
Date Placed	Enter the date the student is being placed, or select it from the calendar tool.
Start Date	Enter the date the student starts the job, or select it from the calendar tool.
Current	Is the student currently holding the job? Select **Yes** or **No**.
End Date	Enter the date the job ends, or select it from the calendar tool.
Salary	Enter the salary amount in dollars.
Salary Category	Enter the salary or wage rate accepted by the student for this job. Use the radio buttons to indicate if this is actual or estimated.
Salary Type	Select a user-defined Salary Type from the drop-down list.
Fee	If a fee is associated with this placement, select **Yes** from the list.
Benefits	Are employee benefits such as vacation, insurance, holidays, retirement plan, and so on included with this job offer? Enter **Yes** if this is so.
Job Schedule	Select Full time or Part time.
From / To	Specify the job hours.

Field	Description
In Field of Study	Was this job in the student's field of study? Select **Yes**, **No**, **Related** or **Student Attestation**. **Note**: Students can be placed through the option, 'Student Attestation', which treats their placement the same as 'placed in a related field' or 'placed in field', yet distinguishes them so that accurate placement in the system can be demonstrated. Placement audits reflect this choice when options are edited in the forms. For example, the Placement Stats by Field Of Study cube report includes Student Attestation, and when Student Attestation is chosen as the option, the placement percentage behaves the same as using 'placed in a related field' for its reports. On creating a new placement record, if both the system level and Attestation switches are 'On', Student Attestation is displayed as one of the items on the In Field of Study combo box; if either of the switches is 'Off', the combo box will become invisible and disabled. But, when editing an existing placement record, regardless of the value of the switches, the In Field of Study combo box will show whatever the value for that student is. If it has Student Attestation, it will show as that regardless of the value of the switches.
How Placed	Select the method of placement from the How Placed drop-down list.
Career Services Rep	Select the Career Services Representative from the Career Services Rep drop-down list.
Comment	Type any comments related to this placement into the Comment field.

Field Descriptions: Placement Verification Form

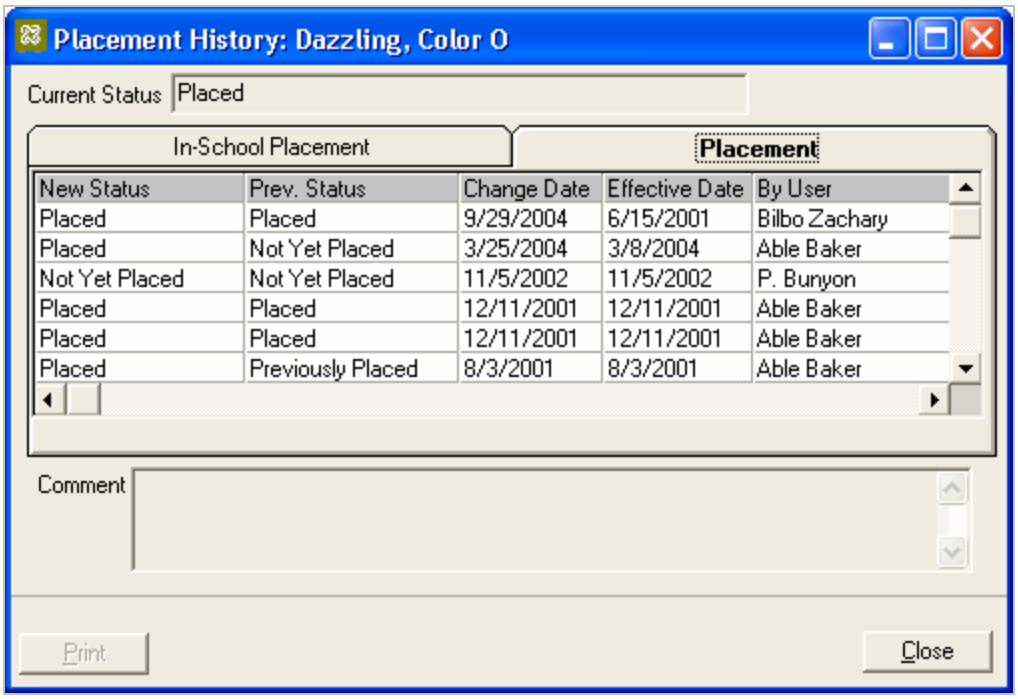
Field	Description
Verification Agent	Enter the name of the verification agent.
Title	Enter the title of the verification agent.
Verification Date	Enter the date of verification.
Verification Rep	Enter the name of the verification representative.
Phone Number	Enter the phone number of the verification representative.
Verification Comments	Enter any comments related to verification.

Placement Status History

The Placement Status History form provides tracking documentation for change-of-status events in the student's placement sequence. In Placement Setup, your school selects an initial Placement Status for students that have not yet been placed. Once a placement action changes that status, a record is kept for each change.

Certain placement status codes are provided and required when CampusNexus Student is installed. Your school may wish to add other placement status codes using the Setup > Status Codes procedures.

When you select the **View > Career Services > Status History** menu option, CampusNexus Student displays a Placement History form similar to the one below. This is a read-only form.



The form shows the student's **Current Status** at the top of the form. The grid displays the following data:

- **New Status**: The status to which the student was changed.
- **Previous Status**: The status from which the student was changed.
- **Change Date**: The current system date when the change was made.
- **Effective Date**: The date on which the change is effective.
- **By User**: The user who entered the change.
- **Reason**: (Shown below the grid.) Click a row on the grid to see system-generated reasons related to the status change. Users do not enter these reasons.

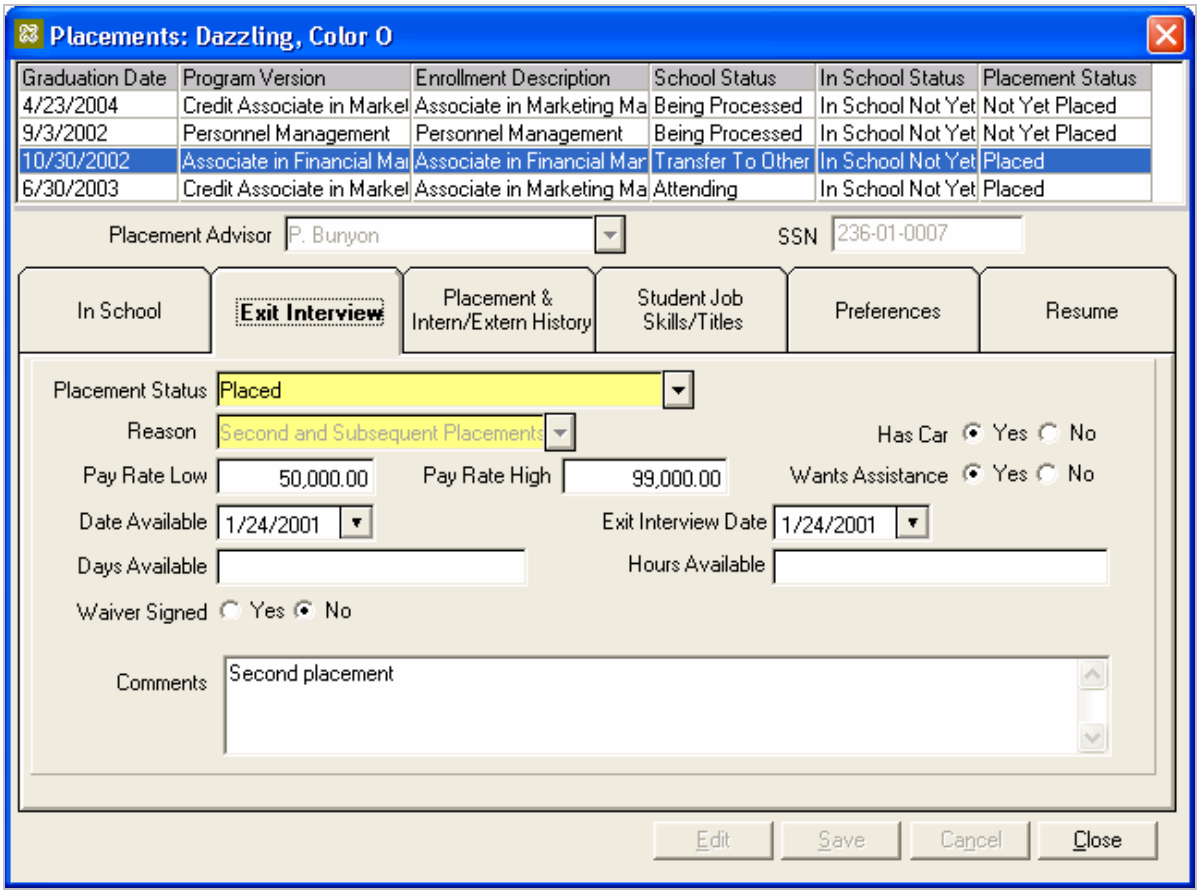
The student's Placement Status is changed on the Exit Interview tab of the Placements form.

The Placements form below illustrates the **Exit Interview** page on which the **Placement Status** appears.



Note: The Placement Status History is different from the **Employment Status** shown on the Student Placement form. The Student Placement form is reached from **View > Career Services > Placements > Placement & Intern/Extern History >** Add or Edit (See the example below.) Do not confuse the status of a **job placement** (Employed or Terminated) with **Placement Status**. Employment Status does not appear on the Placement History form.

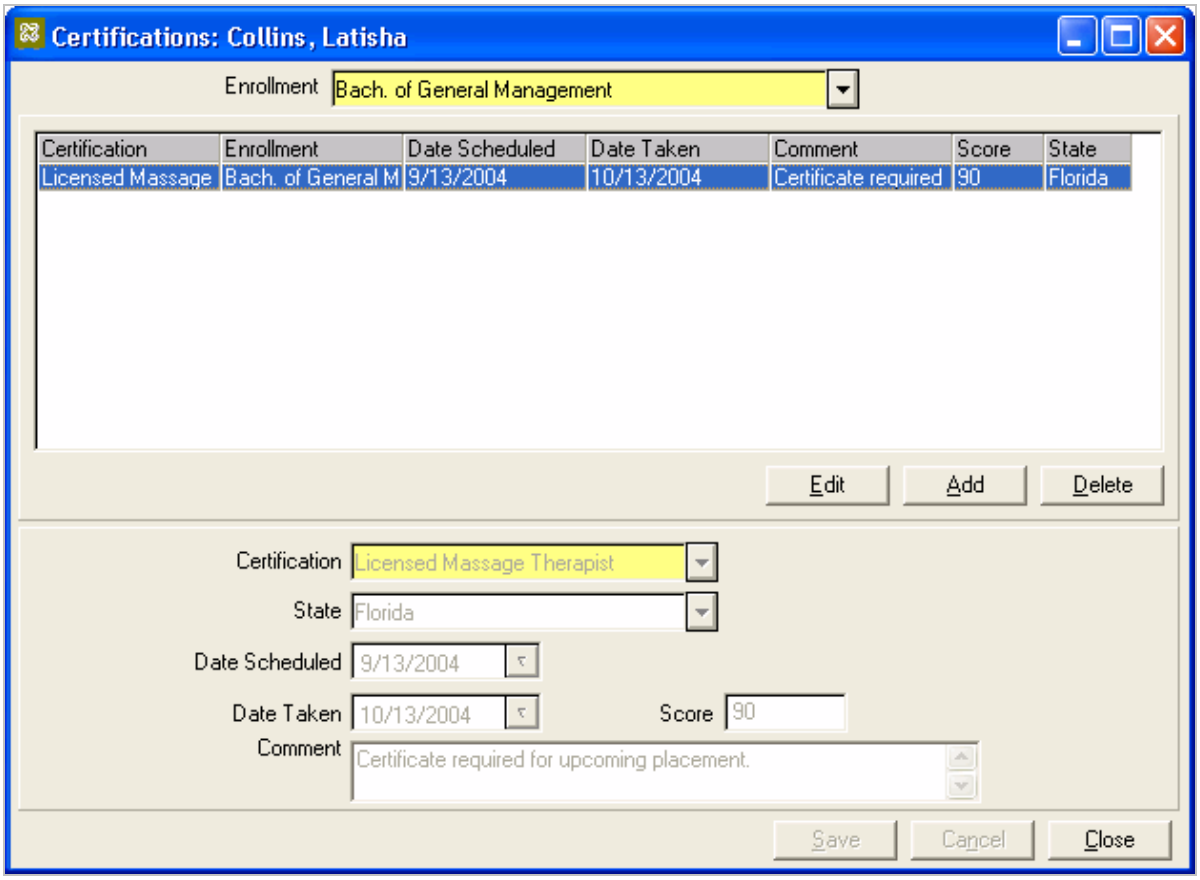
Certifications

The Certifications feature permits you to view or modify information about a student's certifications.

To view or edit certifications for a student:

1. Select a student..
2. Navigate to **View > Career Services > Certifications**. If the student has any certifications, they are displayed in the form.



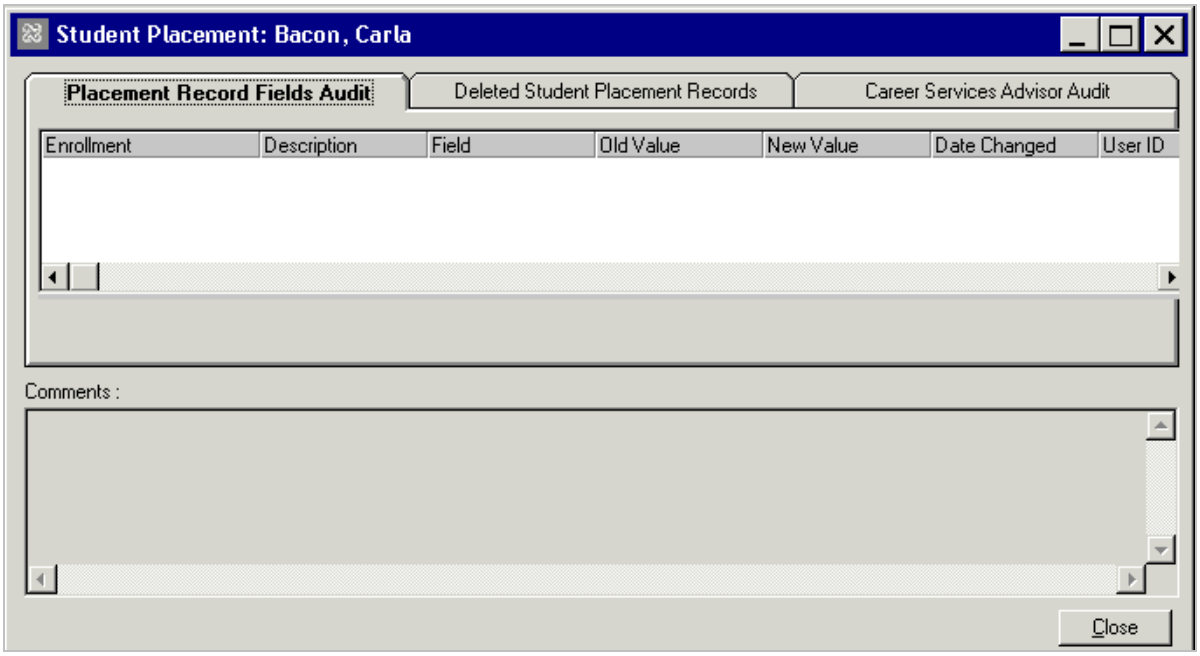
3. Click **Add**, or select a record and click **Edit**. Enter or select appropriate certificate information.
4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Placement Audit

The Placement Audit feature tracks any updates or deletions made to a student placement record. It does not enter a record for the initial entry of the placement record; it records only changes.

To view the Placement Audit record:

1. Select the student whose placement record you want to view.
2. Navigate to **View > Career Services > Audit**. Data is displayed for the selected student's placement record.



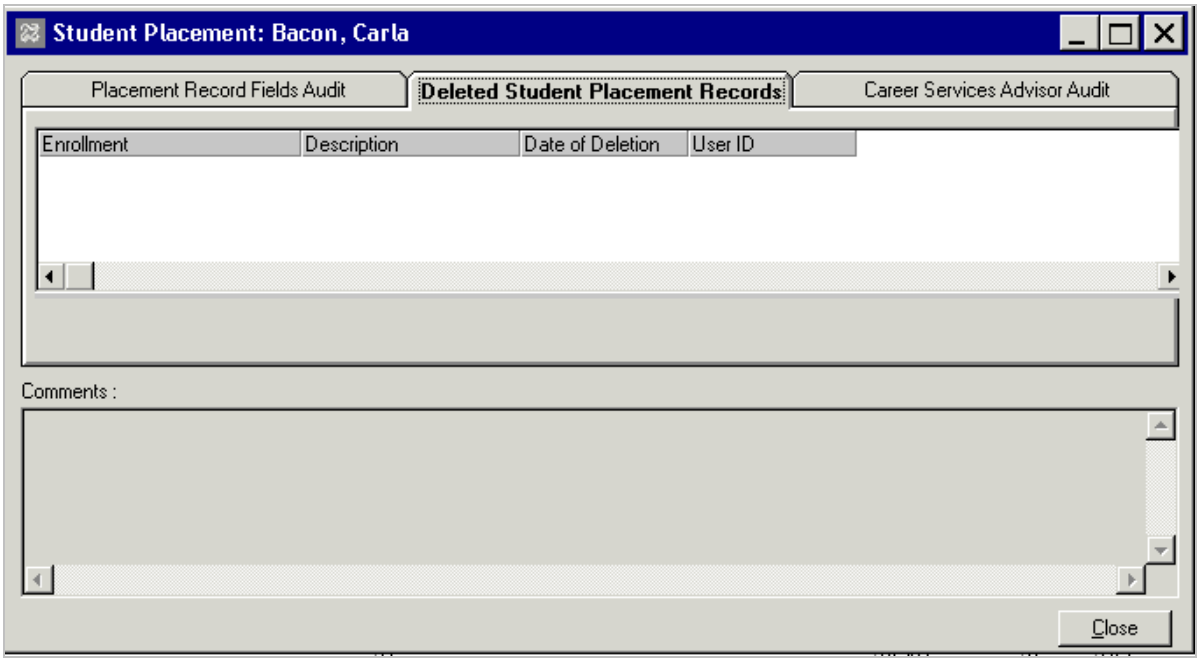
Each tab on the Placement Audit form displays different data for the selected student. The information cannot be modified on this form.

Placement Record Fields Audit tab

This tab (pictured above) displays modifications to placement record fields such as salary information.

Deleted Student Placement Records tab

This tab displays any deleted placement records for the student.



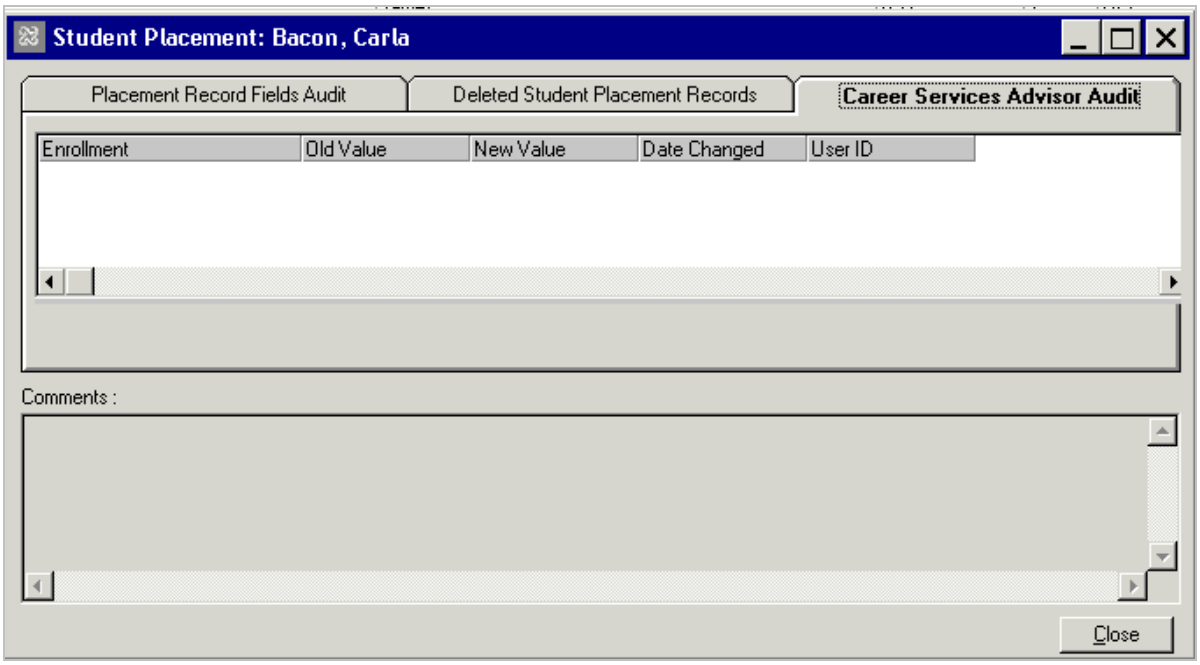
When deleting a placement record, the student's placement status reverts to the default not placed status, unless there is another placement record associated with the student.

When deleting a placement record, if the placement was linked to a job with a filled status, you have the option of reverting the job to an available status if today's date is still within the available date range. The number filled for this job will decrease by one, and the openings field will increase by one. If you choose to not revert the job status to available, the data will not be changed.

When a placement record is deleted, the placement history that is associated with the employer is also deleted.

Career Services Advisor Audit tab

This tab displays an entry each time the Career Services Advisor is changed, or edited.



View > Loan Management

Functions related to loan management, loan status history, and school-defined fields are handled via this menu. The options on this menu apply to the student selected from the Recent Students list.

Menu Item	Description
Student	Displays the Student Master form.
Loan Management	Displays a list of the student's loans. You can edit certain items of loan information for the selected student, print an Exit Interview report, and view the student's loan status history.
Loan Status History	Displays the history of loan status changes for the student.
School Fields	Displays the form used to view or enter data in school-defined fields related to the Loan Management module and public fields from other modules.

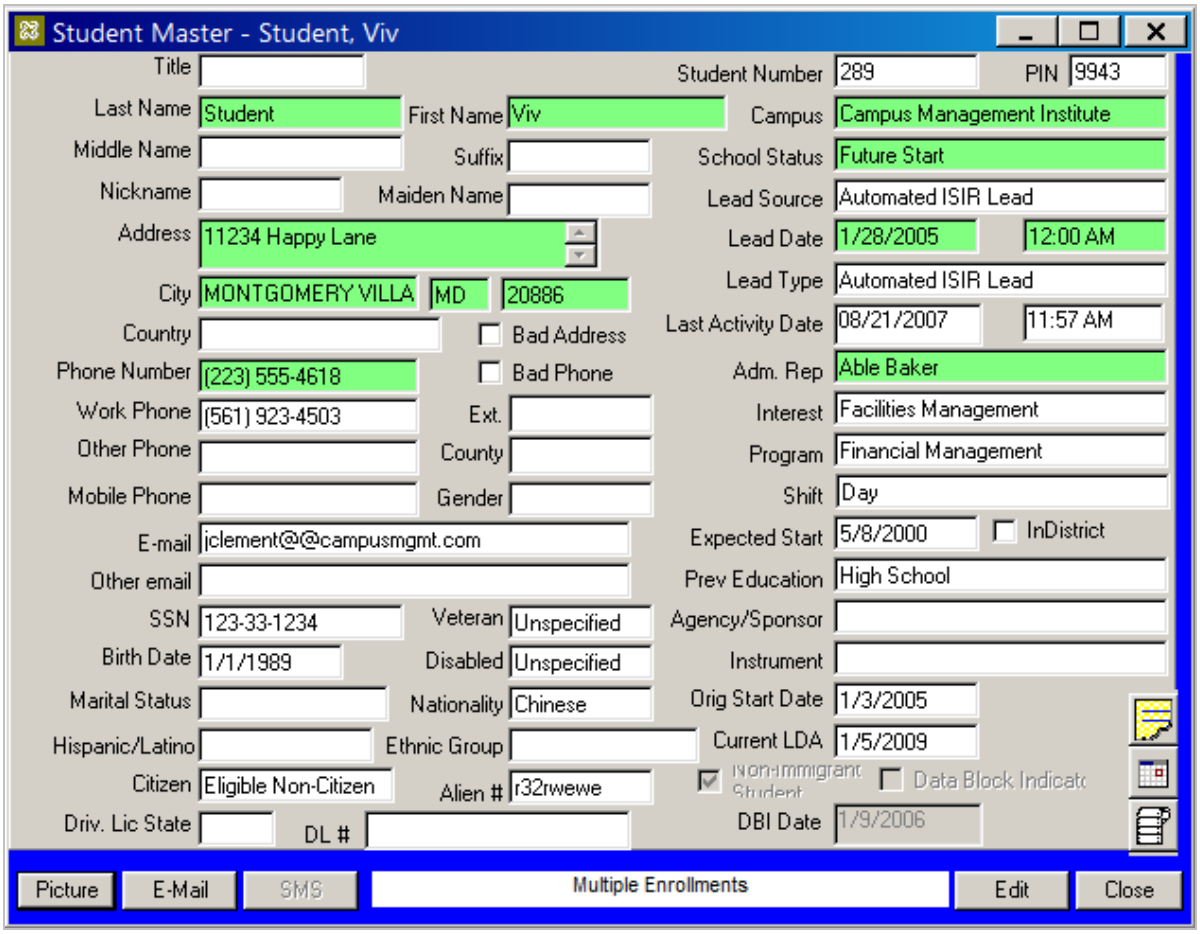
The options on the Student Bar are the same as the options on the View menu, unless the Student Bar has been altered by the user.

Student Master

The Student Master form contains much of a student's basic demographic information. The Student Master form is usually (but not necessarily) populated in the Admissions module by adding a new lead to the database. New leads are entered using the Quick Lead Entry form or the Add New Lead **Ctrl+L** option on the File menu. The **Ctrl+N** key combination can also be used to start a new Student Master record (form) without entering a quick lead.

To view a Student Master form:

1. Select one of the following options:
    - Click **Student** on the Student Bar.
    - Double-click **Recent Students** on the Toolbar. When you change the student in the Recent Students list, a new Student Master form is displayed. If you already have a Student Master form open, it remains open in the background.
    - From the **View** menu navigate as follows:
        - Contact Manager > Student
        - Admissions > Student
        - Financial Aid > Student
        - Student Accounts > Student
        - Academic Records > Student
        - Career Services > Student
        - Loan Management > Student
        - Student Services > Student
        - Housing > Student
    - Use the **Find** menu or click on the Toolbar to search for a student.



Note: The border color around the Student Master form indicates the student's status category. In the setup options under Setup > Status Codes > Colors Tab, your system administrator can choose colors for the status categories.

2. Multiple Student Master forms can be displayed at the same time. The forms always open in the same place in the work area. Unless you have closed, moved, or minimized a previous Student Master form, the next form you open covers the previous form.

   To move between open Student Master forms use the **Window** menu and select **Tile** or **Cascade** to organize all open forms in the work area.

   When you are working with multiple students, ensure that the correct form is current (active). The name of the current student is always shown in the Recent Students text box. The title bar of the active form is always a different color than other forms which may be open in your work area.

3. To edit the information on the form, click **Edit**. See Edit a Student Master.

   Required fields on the form have a background color other than white. If a required field is blank, you must enter data in it when you edit the form, even if you did not intend to provide the information when you clicked Edit.

   Some fields are required by CampusNexus Student (Last Name, First Name, Lead Date, Admissions Rep). Additionally, your institution may designate other fields as required. The system administrator can mark fields as required in either of two ways.

- Open any Student Master (or Quick Lead) form and go to Setup > Required Fields.
- Designate the field as required in the Data Dictionary.

4. To add an activity from the Student Master form, click the **Add Activity** icon at the bottom right of the form. The Activity form is displayed.
5. Click **Close** (Ctrl+F4) to close the active Student Master form. If you are in edit mode when you click Close, you are prompted to save any changes.

Duplicate Student Records

CampusNexus Student checks for duplicate Student Master records when new leads or students are added. The following table columns are used to check for duplicates:

- Student ID
- Social Security Number
- Phone Number
- Date of Birth and Student Name (combined)
- Driver's License Number
- E-mail address.

Each check is performed only if you entered data in the corresponding field. If at least one match is found, a grid showing the matches is displayed

If the lead is a duplicate and can be found on the grid, click the record and the lead form is populated with the information for that lead. The information can then be edited. The campus for the lead can be changed only if the campus ID for the record from the grid is in the list of campuses to which you have access.

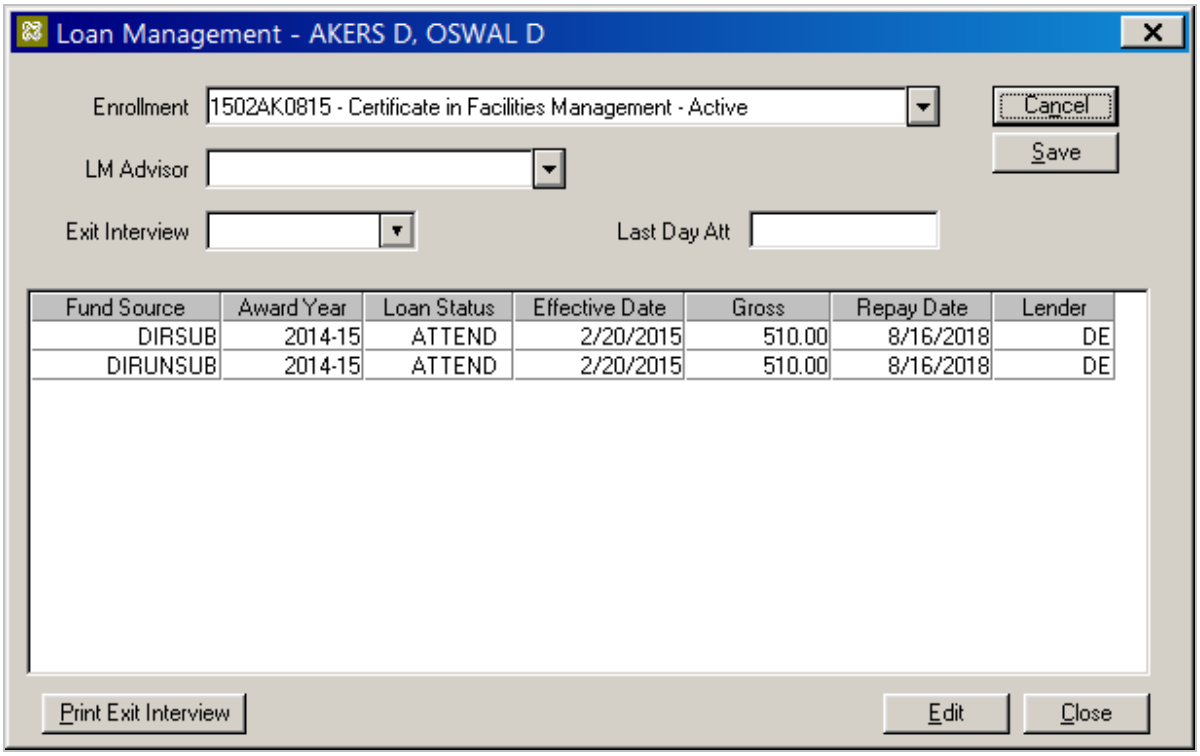
Loan Management

The Loan Management form lists the student's loans. From this form, you can edit certain items of loan information for the selected student, print an Exit Interview report, and view the student's loan status history.

Note: Some fields shown on the Loan Management form are for your information only and are entered by you, the user. These fields include, monthly payment, interest rate, loan balance, number of payments, and so on.

To work with the student's loan management data:

1. Select a student.
2. Navigate to **View** > **Loan Management** > **Loan Management**. The Loan Management form is displayed.

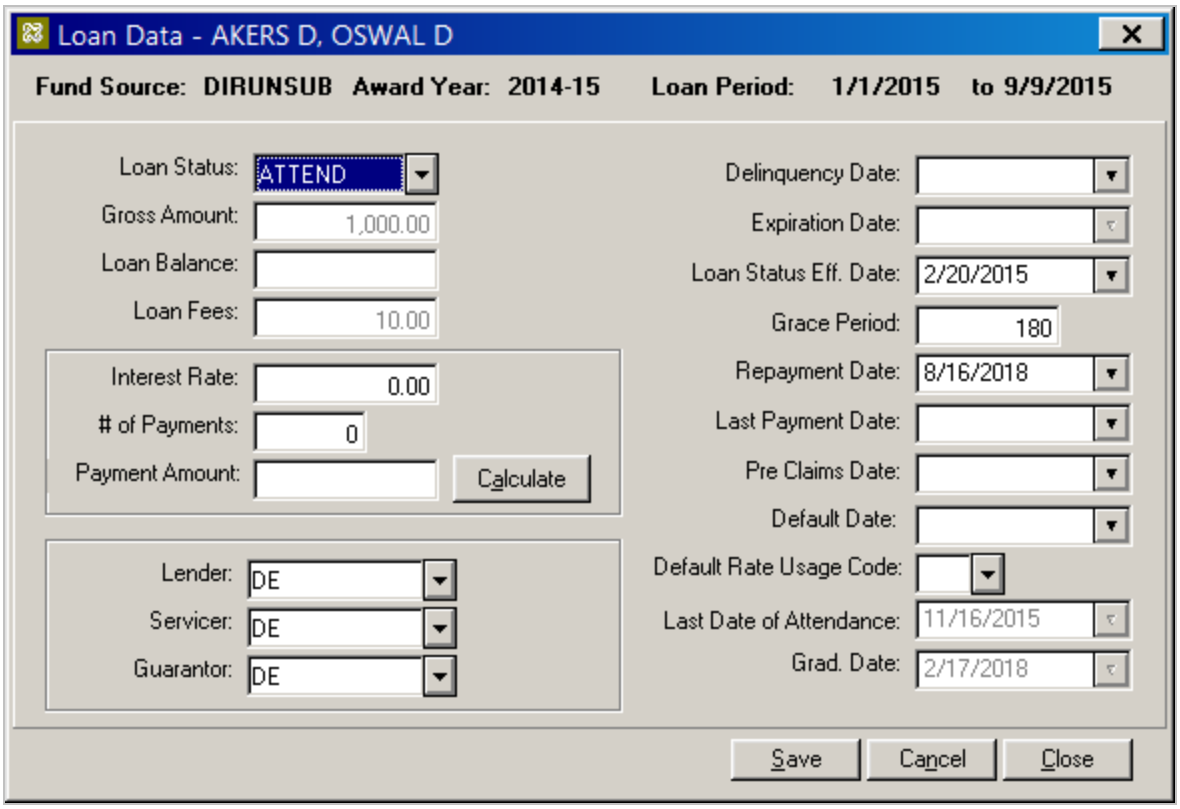


3. Select the **Enrollment**. The drop-down displays the enrollment number, program description and school status. This is helpful when a student has more than one enrollment in the same Program Version.
4. Select a **Loan Management Advisor**. You can edit the advisor if you have the authority to do so. The LM Advisor may be selected during the enrollment process if your institution has been set up to do so. For more information, see Setup > Academic Records > Enrollment.
5. Enter an **Exit Interview Date** if it is time to do so. If you enter a date, click **Save** at the top of the form to save it. The last date of attendance is displayed in the **Last Day Att.** field.
6. Click **Print Exit Interview** to get a report that can be used by the Loan Management Office for conducting the exit interview with a departing student.

   The report is to be signed by the student to indicate that the student understands the terms of the loans and repayment obligations. If the student has a PLUS or a DIRPLUS loan, the report is to be signed by the student's parent.

An Exit Interview report for groups of students can be produced from **Reports > Loan Management**.

7. Select a loan and click **Edit** to see the details. The Loan Data form is displayed.



8. Select or enter data in the form based on the table below. Some fields are read-only.

Loan Data Fields

Field Label	Display/Edit	Comments
Fund Source	Display	
Award Year	Display	
Loan Period	Display	
Loan Status	Edit	
Gross Amount	Display	
Loan Balance	Edit	
Loan Fees	Display	
Interest Rate	Edit	
# of Payments	Edit	
Payment Amount	Edit	Click **Calculate** to calculate and display the payment amount.

Field Label	Display/Edit	Comments
Number of Payments	Edit	
Delinquency Date	Edit	
Expiration Date	Edit	When the Loan Status is changed to Forbearance or Deferment, you must enter an Expiration Date. If you do not enter the date, you are prompted for it when you click **Save**. Display only after LmLoanStatusType is changed to DEFER or FORB.
Loan Status Effective Date	Edit	
Lender	Edit	
Servicer	Edit	
Guarantor	Edit	
Grace Period	Edit	
Repayment Date	Edit	
Last Payment Date	Edit	
Pre Claims Date	Edit	
Default Date	Edit	Represents the date that the student is considered to be in default of the loan. Enter or select the date from the calendar.
Default Rate Usage Code	Edit	The usage code identifies how the loan is used in the institution's default rate calculation and is supplied on the Loan Records Detail Report that the institution receives. The following system defined codes are available: • B – Both Numerator and Denominator • D – Denominator only • E – Eligible but not counted • N – Not used
Last Date of Att.	Display	
Grad. Date	Display	

9. Click **Save** to save any changes.

   When you save changes to Loan Management data, you are prompted to confirm if you want to change all the student's loans.

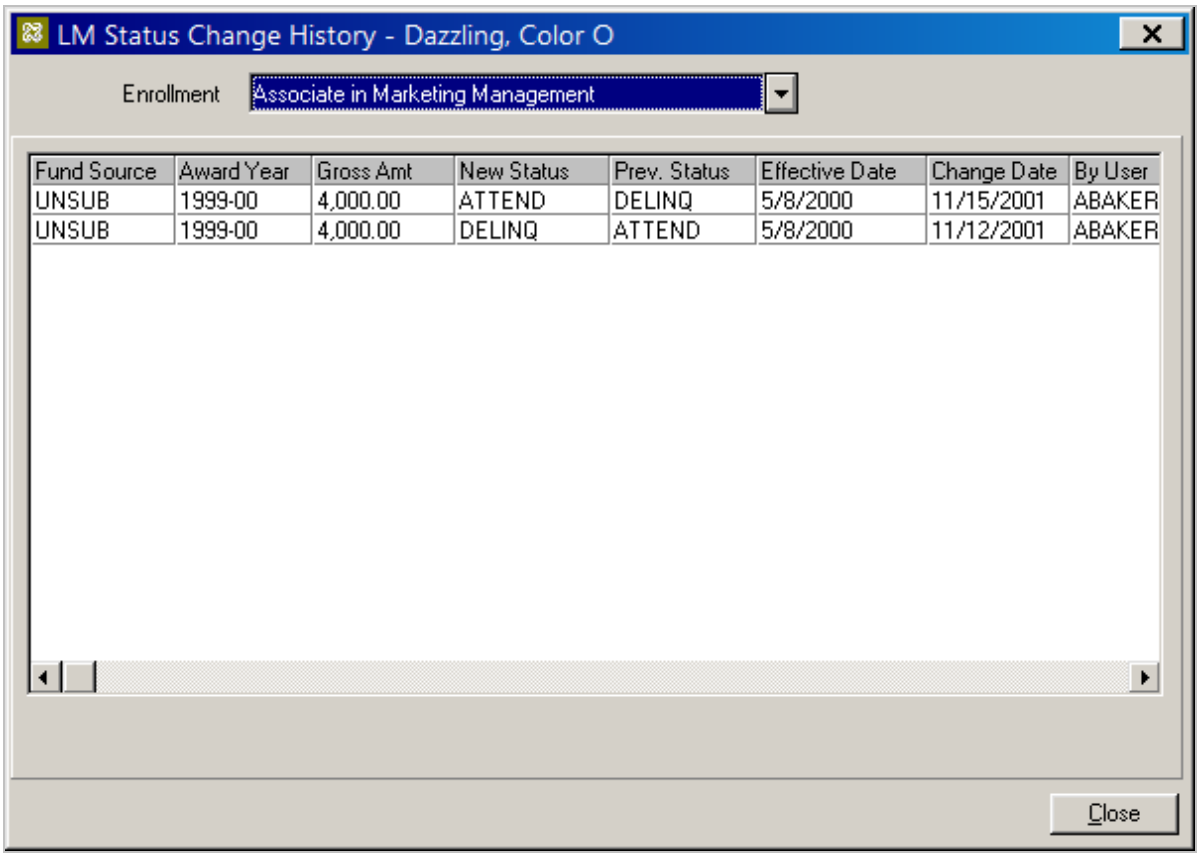
   - If you click **Yes**, all records shown in the grid are updated with the changes you make to the current record.
   - If you click **No**, only the current record is changed.

When the Loan Status is changed, the Financial Aid Loan information is updated and a record is added to the Loan Management Status Change table. The status change table is updated with the previous status, new status, effective date of the change, date changed, and user who made the change.

Loan Status History

You can view loan status changes for a selected student. Loan status changes are made automatically by the CampusNexus Student (such as when a student changes from enrollment status to attending) and manually by the Loan Management office. See View > Loan Management > Loan Management.

1. Select a student.
2. Navigate to **View > Loan Management > Loan Status History**. The LM Status Change History form is displayed. This is a read-only form.



3. Click **Close** to close the form.

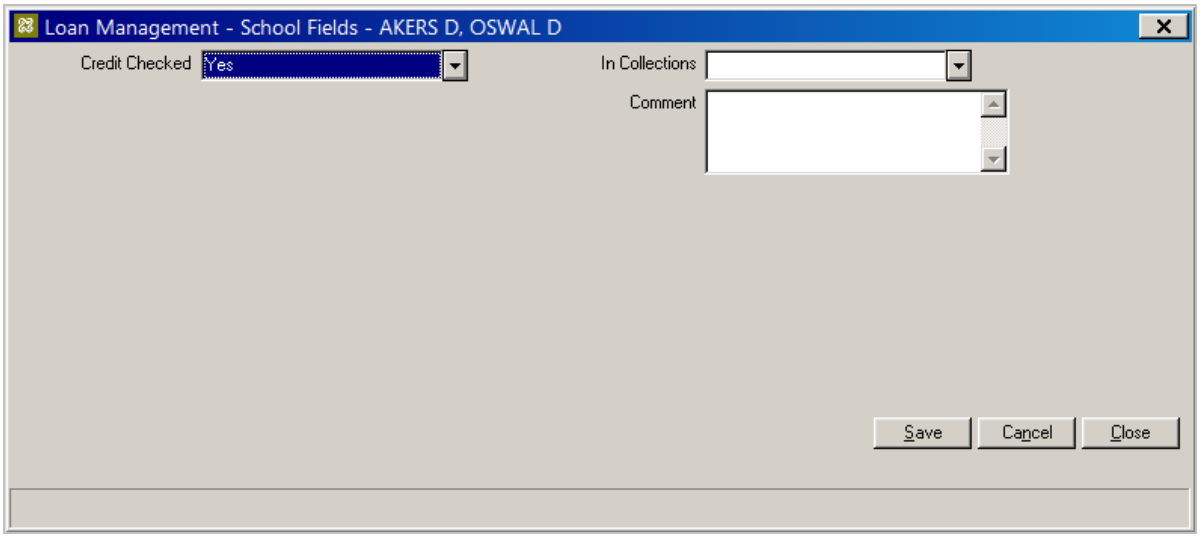
School Fields - Loan Management

School-defined fields can be created for loan management at your institution. These fields are created by the administrator under Setup > School Defined Fields > Student.

To view or edit school-defined fields:

1. Select a student.
2. Navigate to **View**>**Loan Management**>**School Fields**. The Loan Management - School Fields form is displayed if fields have been defined for your institution.

   Fields that you can edit have a white background. Fields that you can view but not edit have a gray background. These fields are usually controlled by other departments. Either type of field may not have any data at the time you view it.



3. Enter data as required in the fields that you can edit.
4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

View > Student Services

Functions related to student services such as housing, athletics, and veteran information are handled via this menu. The options on this menu apply to the student selected from the Recent Students list.The options on this menu apply to the student selected from the Recent Students list.

Menu Item	Description
Student	Displays the Student Master form.
Housing Information	Displays housing information for enrolled students.
School Fields	Displays the form used to view or enter data in school-defined fields related to the Student Services module and public fields from other modules.
Services	Displays the form used to define all services for which students are billed by the institution.
Athletics	Displays the athletics information for the student.
Disability Services	Displays the disability services for the student.
Audit	Displays the audit for disability services, veteran information, and athletics.
Veteran Information	Displays the veteran information for the student.

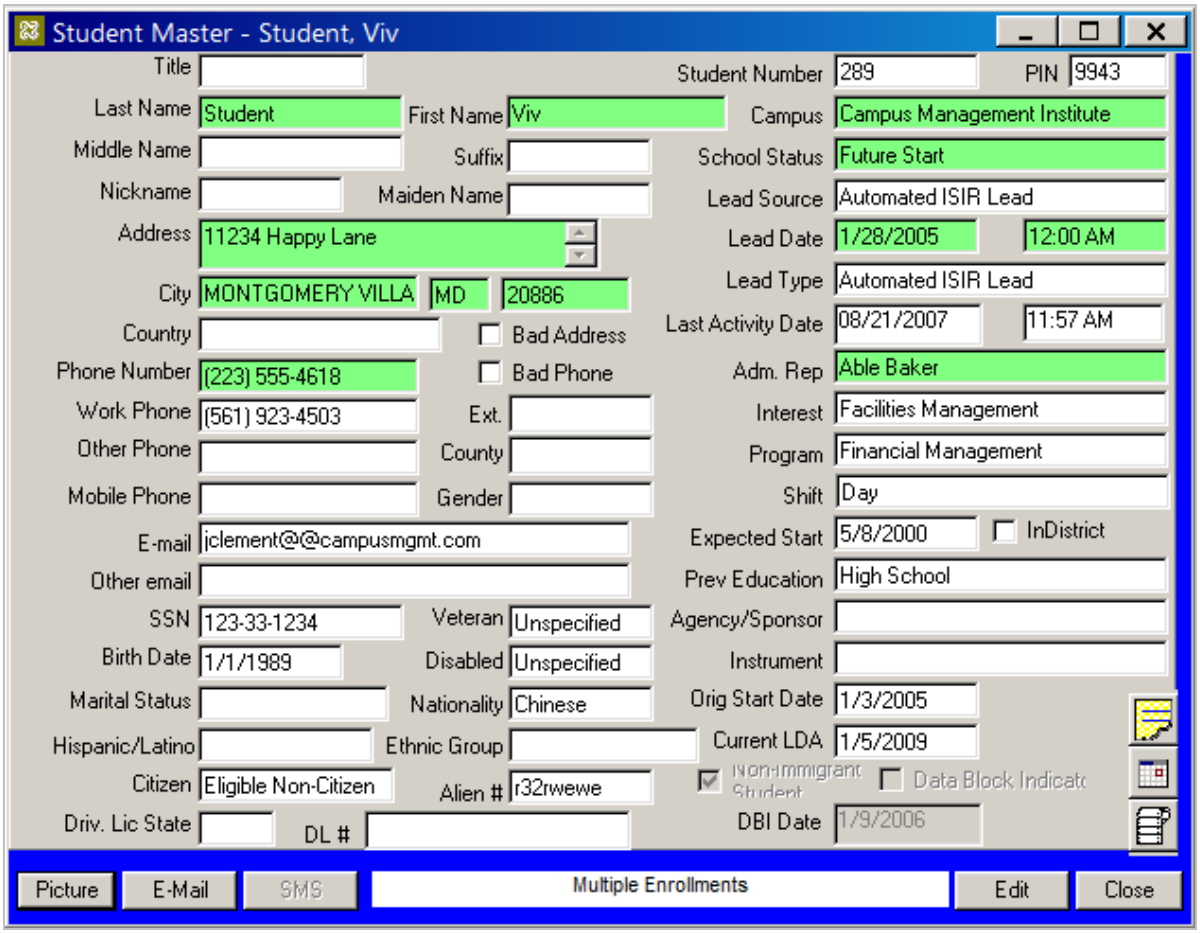
The options on the Student Bar are the same as the options on the View menu, unless the Student Bar has been altered by the user.

Student Master

The Student Master form contains much of a student's basic demographic information. The Student Master form is usually (but not necessarily) populated in the Admissions module by adding a new lead to the database. New leads are entered using the Quick Lead Entry form or the Add New Lead **Ctrl+L** option on the File menu. The **Ctrl+N** key combination can also be used to start a new Student Master record (form) without entering a quick lead.

To view a Student Master form:

1. Select one of the following options:
    - Click **Student** on the Student Bar.
    - Double-click **Recent Students** on the Toolbar. When you change the student in the Recent Students list, a new Student Master form is displayed. If you already have a Student Master form open, it remains open in the background.
    - From the **View** menu navigate as follows:
        - Contact Manager > Student
        - Admissions > Student
        - Financial Aid > Student
        - Student Accounts > Student
        - Academic Records > Student
        - Career Services > Student
        - Loan Management > Student
        - Student Services > Student
        - Housing > Student
    - Use the **Find** menu or click on the Toolbar to search for a student.



Note: The border color around the Student Master form indicates the student's status category. In the setup options under Setup > Status Codes > Colors Tab, your system administrator can choose colors for the status categories.

2. Multiple Student Master forms can be displayed at the same time. The forms always open in the same place in the work area. Unless you have closed, moved, or minimized a previous Student Master form, the next form you open covers the previous form.

   To move between open Student Master forms use the **Window** menu and select **Tile** or **Cascade** to organize all open forms in the work area.

   When you are working with multiple students, ensure that the correct form is current (active). The name of the current student is always shown in the Recent Students text box. The title bar of the active form is always a different color than other forms which may be open in your work area.

3. To edit the information on the form, click **Edit**. See Edit a Student Master.

   Required fields on the form have a background color other than white. If a required field is blank, you must enter data in it when you edit the form, even if you did not intend to provide the information when you clicked Edit.

   Some fields are required by CampusNexus Student (Last Name, First Name, Lead Date, Admissions Rep). Additionally, your institution may designate other fields as required. The system administrator can mark fields as required in either of two ways.

- Open any Student Master (or Quick Lead) form and go to Setup > Required Fields.
- Designate the field as required in the Data Dictionary.

4. To add an activity from the Student Master form, click the **Add Activity** icon at the bottom right of the form. The Activity form is displayed.
5. Click **Close** (Ctrl+F4) to close the active Student Master form. If you are in edit mode when you click Close, you are prompted to save any changes.

Duplicate Student Records

CampusNexus Student checks for duplicate Student Master records when new leads or students are added. The following table columns are used to check for duplicates:

- Student ID
- Social Security Number
- Phone Number
- Date of Birth and Student Name (combined)
- Driver's License Number
- E-mail address.

Each check is performed only if you entered data in the corresponding field. If at least one match is found, a grid showing the matches is displayed

If the lead is a duplicate and can be found on the grid, click the record and the lead form is populated with the information for that lead. The information can then be edited. The campus for the lead can be changed only if the campus ID for the record from the grid is in the list of campuses to which you have access.

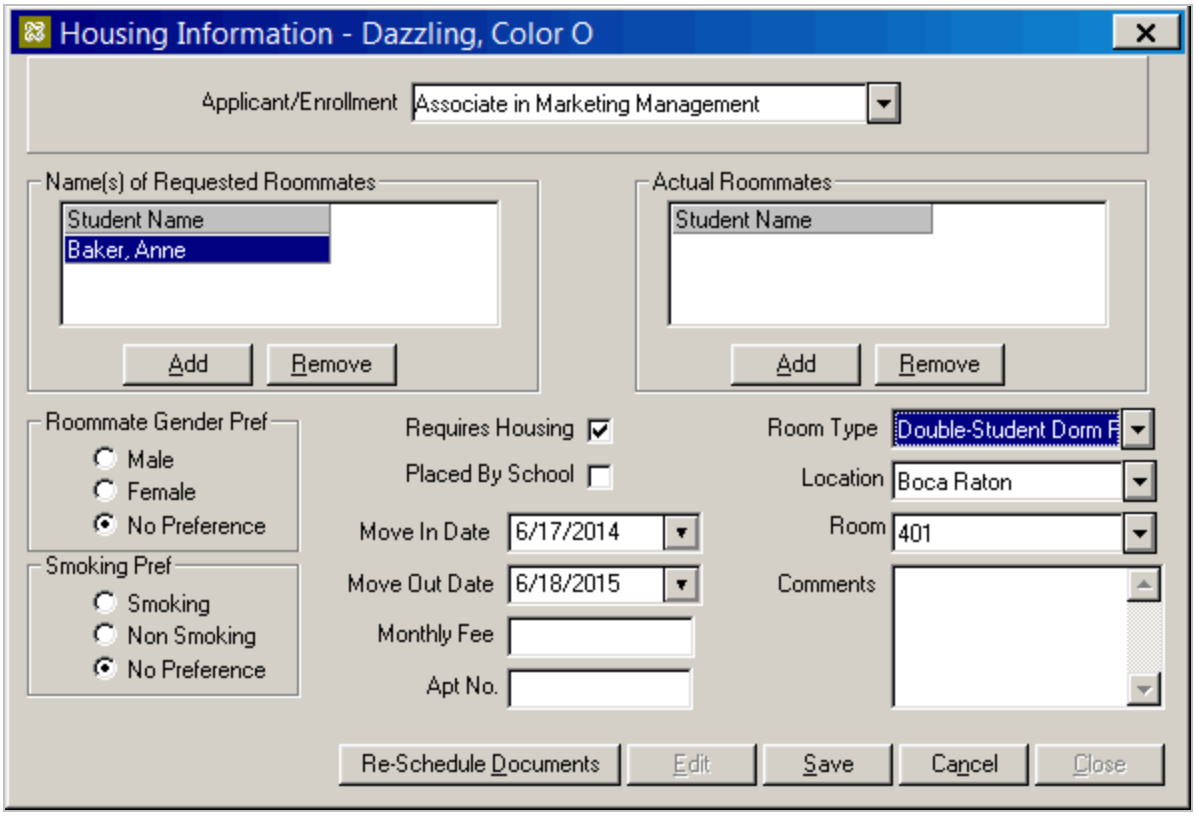
Housing Information

The Housing Information form is available for enrolled students only. You can indicate that a student requires housing assistance. You can select the names of requested roommates and actual roommates from a search of students in your school. Additional information on this form includes roommate gender preference, smoking preference, room type preference, location, room assigned, move in and move out dates, and monthly fees.

Room Types, Locations, and Rooms, Service Categories, Services and Service Billing Method are set up under **Lists > Student Services**.

To enter student housing information:

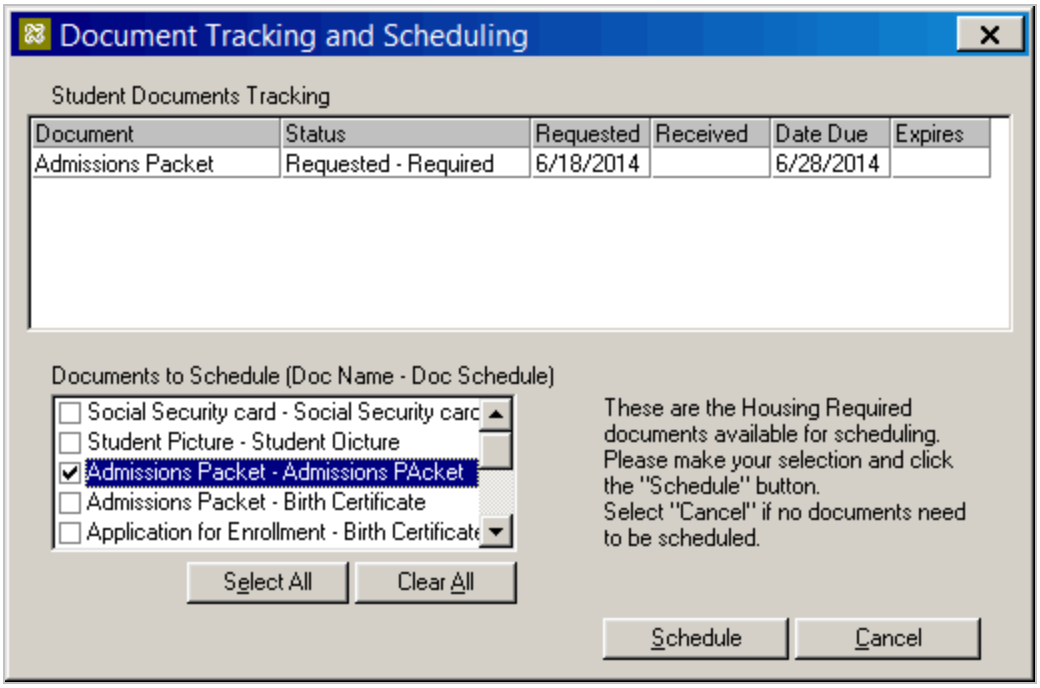
1. Navigate to **View** > **Student Services > Housing Information**. A form similar to the one below is displayed.



2. Click **Add** in the Names of Requested Roommates and Actual Roommates boxes. The **Student Search** form is displayed. Search and select a student.
3. Use the radio buttons to select **Preferences**.
4. Use the drop-down lists to select **Move In Date** and **Move Out Date**.
5. Select or clear **Requires Housing**. If you indicate that the student requires housing, certain documents, such as proof of health insurance and proof of immunizations will be added to the student's list of required documents. For details, refer to Schedule Documents.
6. Select or clear **Placed by School** to indicate that the student was placed in this housing by the school.
7. Fill in the other information as desired and click **Save**.

8. Click **Re-Schedule Documents** to update required documents for student housing. The **Document Tracking and Scheduling** form is displayed. This form shows all documents associated with "Required Housing" that are available for scheduling.

   To associate documents with the Required Housing flag, go to Daily > Contact Manager > Schedule Documents.



9. Select documents from the list, assign dates, and click **Schedule**. Click **Cancel** if no documents need to be scheduled. Use the **Select All** and **Clear All** buttons if appropriate.

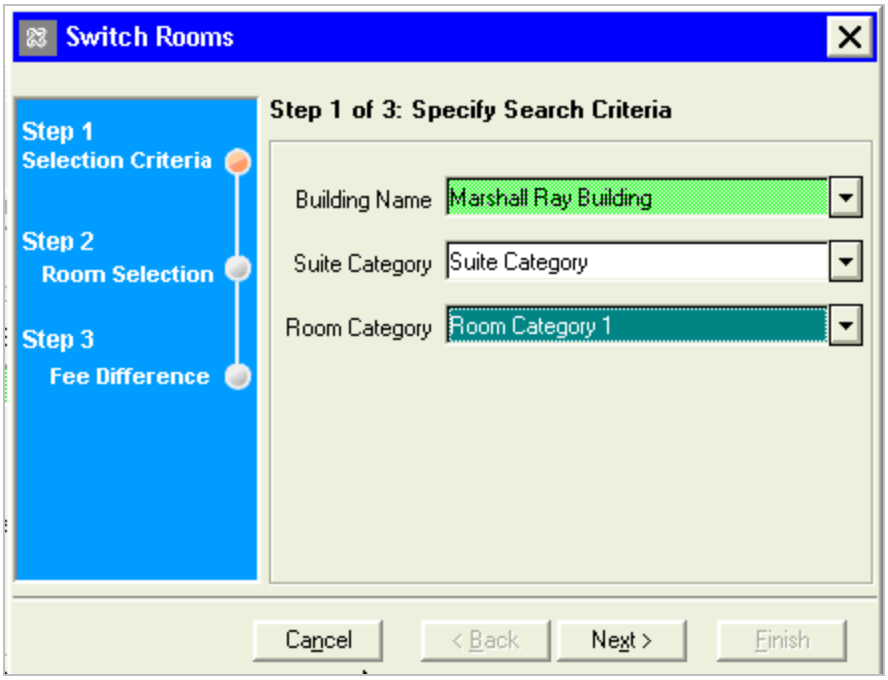
Switch Rooms

The Switch Rooms wizard automates the process of moving a student from one room to another. You can use this wizard to move a student from an assigned room to another available room.

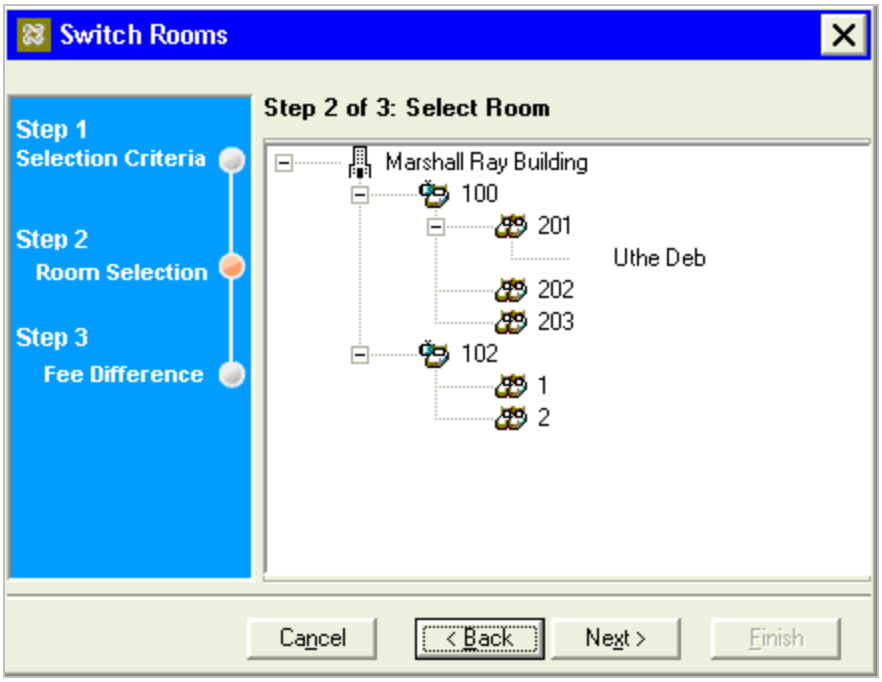
The Switch Rooms wizard allows you to select the room search criteria, assign a new available room to the student, and adjust the fee difference. You can then confirm that the student's lease is reassigned to the new room.

To switch rooms:

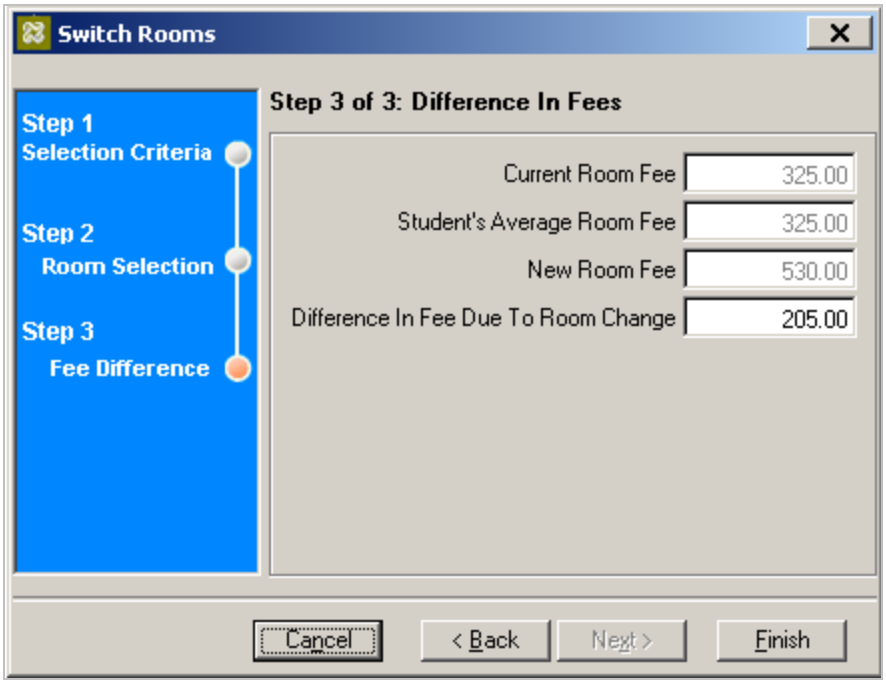
1. Navigate to **View > Housing >*select student's room record*> Edit > Switch Rooms**.
2. Step 1 of the Switch Rooms wizard is displayed. The **Select Search Criteria** form, allows you to search by the Building Name, Suite Category, and Room Category. The available rooms are displayed based on the search criteria that you have selected. Make your selections and click **Next** to continue.



3. Step 2 is the **Select Rooms** form. The room that the student is assigned to is displayed. You can select the new room for the student. In this example, the student is currently assigned to room 201 and will be moved to room 202.



4. Click on room 202 and click **Next** to move the student to room 202.
5. Step 3 of the Switch Rooms wizard displays the fee difference between the rooms. The monetary values of each room are displayed and may not be changed. However, the **Difference in Fee Due to Room Change** field reflects the difference in the fees, but may be altered before clicking **Finish**.



6. The Lease History for the student now reflects the room changed to room 202.

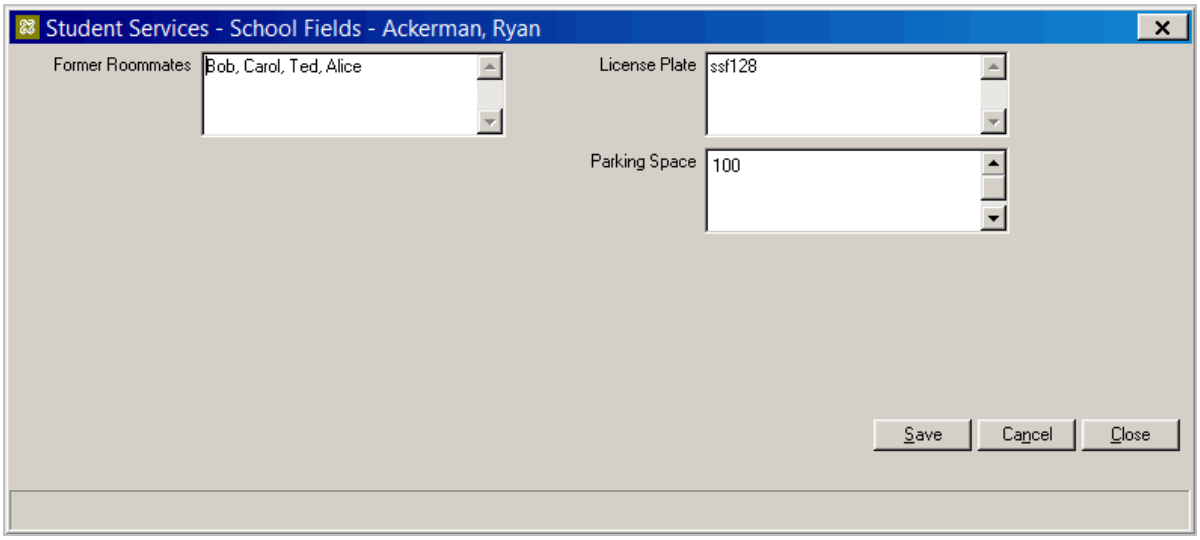
School Fields - Student Services

You can add information for a student in the Student Services - School Fields form. School-Defined Fields are set up under Setup > School-Defined Fields.

To enter information into the School Fields form:

1. Navigate to **View** > **Student Services > School Fields**.



2. Specify the data and click **Save**.

Services

Student Services are non-academic items that are part of the student life cycle, such as housing, meal plans, insurance, and parking. Fees for Services can apply during registration billing or at any time throughout the term. The Student Services form enables you to define all Services for which students are billed by the institution.

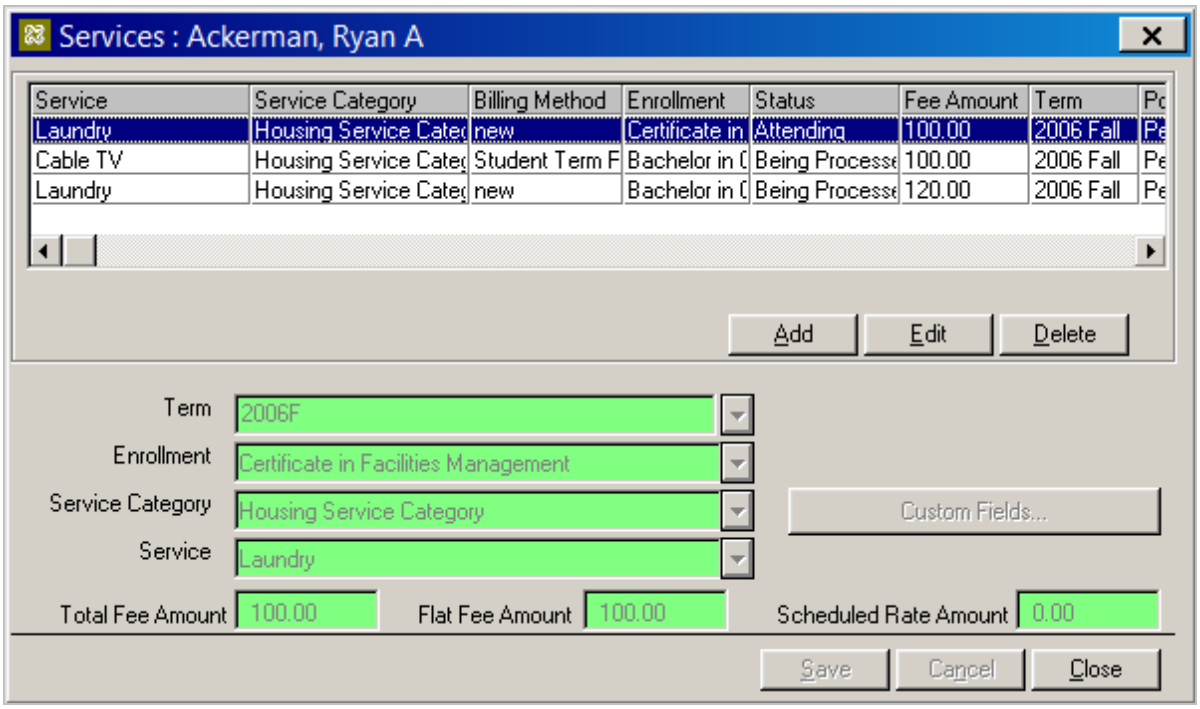
While Student Services staff are the owners of the Services and their assessments, Student Accounts staff can review and change any charges before they are posted to a student account.

For billable school services that are not included in those provided by CampusNexus Student, add School-Defined Services and then create and associate Custom Fields with a Student Service. You can enter values in the Custom Fields when they are added to a student record. CampusNexus Student stores these values on each instance of a Service per student.

Students can view a list of services available to them on Portal. There is also a configurable option to permit or deny students to edit a custom field on the Student Services form.

To manage Student Services:

1. Navigate to **View** > **Student Services > Services**.

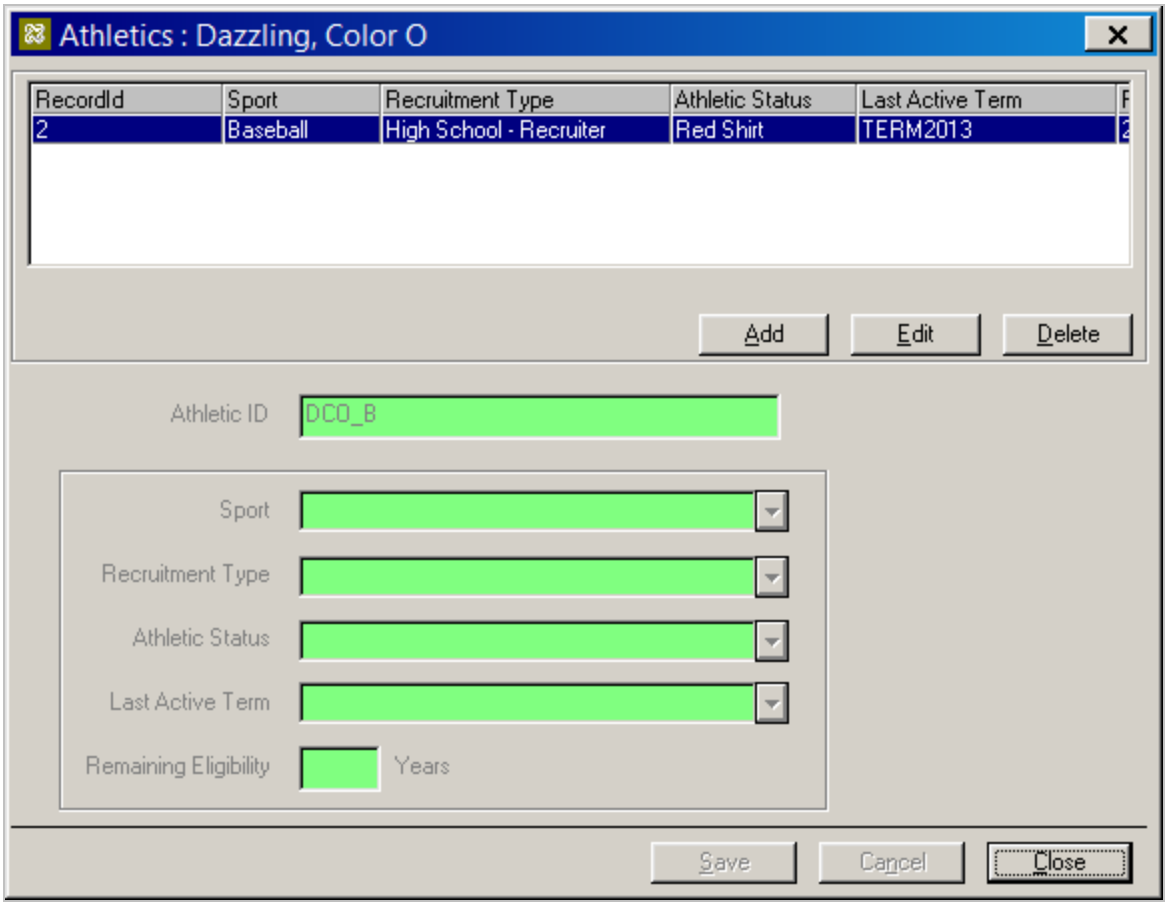


2. Click **Add** to add a Service.
3. Click **Edit** to edit an existing Service.
4. Click **Save** to save your changes.
5. Click **Delete** to delete a Service.

Athletics

The Athletics form is available if your institution is configured as a Member of an Athletic Association.

1. Navigate to **View > Contact Manager > Student** and **search** for the desired student.
2. Navigate to **View > Student Services > Athletics**.



3. Click **Add**. The fields on the form become enabled.
4. Specify the **Athletic ID**. (This ID is assigned to the student by an Athletic Association such as NCAA or NJCAA).
5. Select the type of sport this student participates in from the **Sports** drop-down menu.
6. Select the **Recruitment Type**.
7. Select the current **Athletic Status**.
8. Select the last active **Term**.
9. Specify the number of **Remaining Eligibility** Years.
10. Click **Save** and **Close**.

Repeat these steps for all your student athletes.

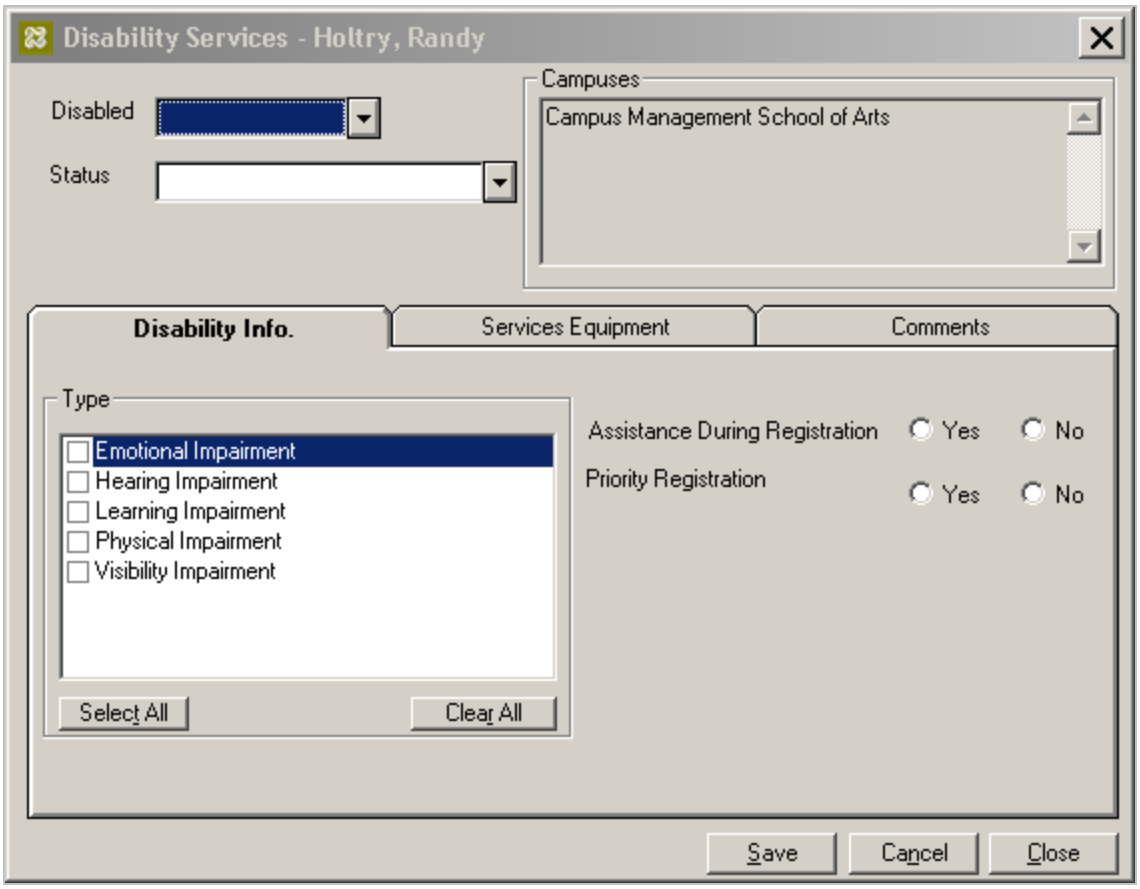
Notes:

- You can add fields to this form to make it more usable to your type of campus sport offerings. See School-Defined Fields. Moreover, custom fields can be created to accommodate special services for your campus. See Custom Fields for Student Services.
- You can define Registration Groups to enable Priority Registration for your student athletes. Moreover, student groups can be used to designate student athletes who may only have changes made to their schedule or course load by staff members who have been given authority to override registration blocks or credit limits through the use of Registration Locks.

Disability Services

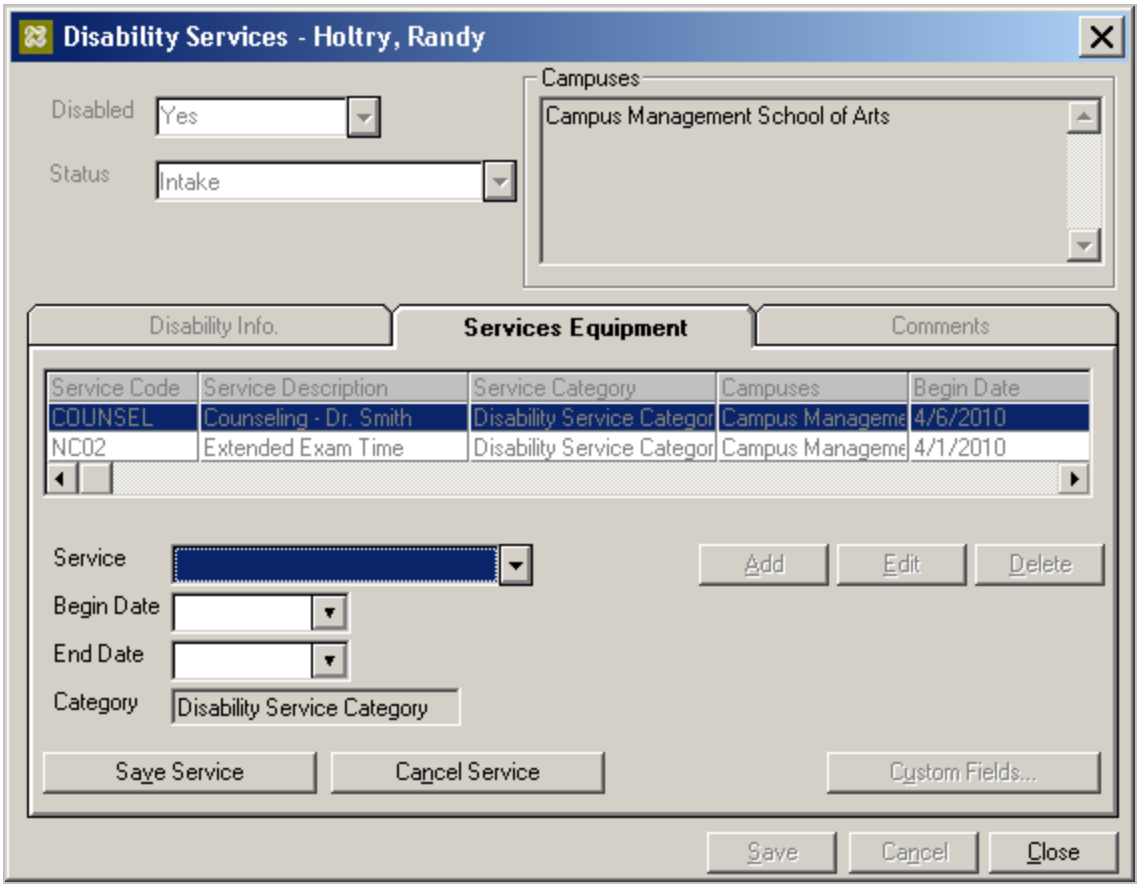
You or your system administrator can assign one or more staff groups permissions to access to the Disability Services information. The permissions can be configured by navigating to Setup > Security.

1. Locate a student by navigating to View > Contact Manager > Student and search for the desired student.
2. Navigate to **View > Student Services > Disability Services**.



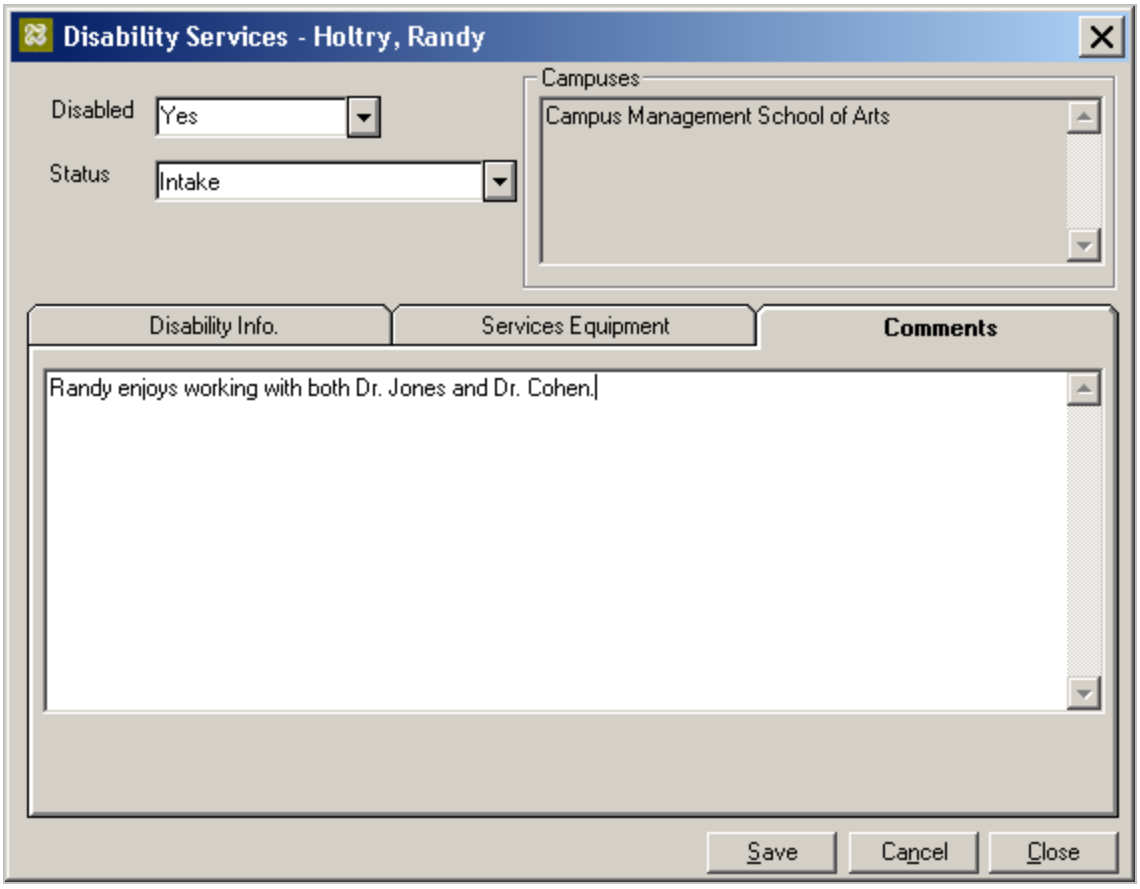
3. Select the "Yes" or "No" from the **Disabled** drop-down list.
4. Select the appropriate **Status**.

   Note: The Status options are configurable by navigating to **Lists > Student Services > Disability Services Status**.
5. Note the student's enrolled campuses, the student's master campus, and the student's class schedule campus.
6. On the **Disability Info.** tab, select the disability types applicable to the student.
7. Click **Save**.
8. A confirmation message is displayed. Click **OK**.
9. Select the **Service Equipment** tab.
10. Click **Add** to enable the fields.



11. Select the services, one at a time for the student from the **Service** list.
12. Enter the **Begin Date** and **End Date** of the selected service.

    Note: The Service Category is automatically saved as a Disability Service Category and cannot be changed or edited.
13. Click **Save** to add this service for the student. The service you selected, along with the begin and end dates, is added to the service details grid.
14. Click **Edit** to change any of the information in the service details grid.
15. Click **Delete** to delete a service shown in the service details grid.
16. Click **Cancel Service** to cancel the service.
17. To view any custom data that has been defined for the Services Equipment, click **Custom Fields**. See Custom Fields.
18. Continue these steps until you have recorded all necessary services for the student.
19. Click the **Comments** tab. Enter any comments in the **Comment** field.

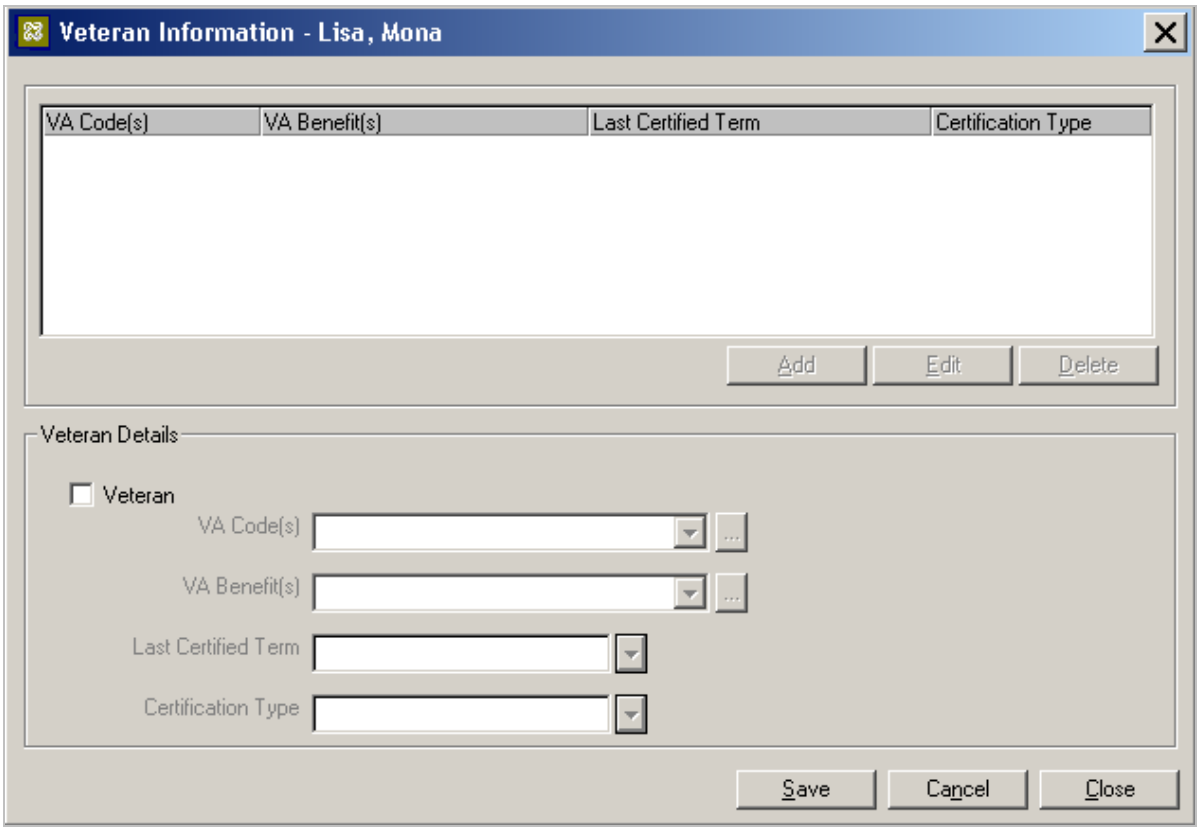


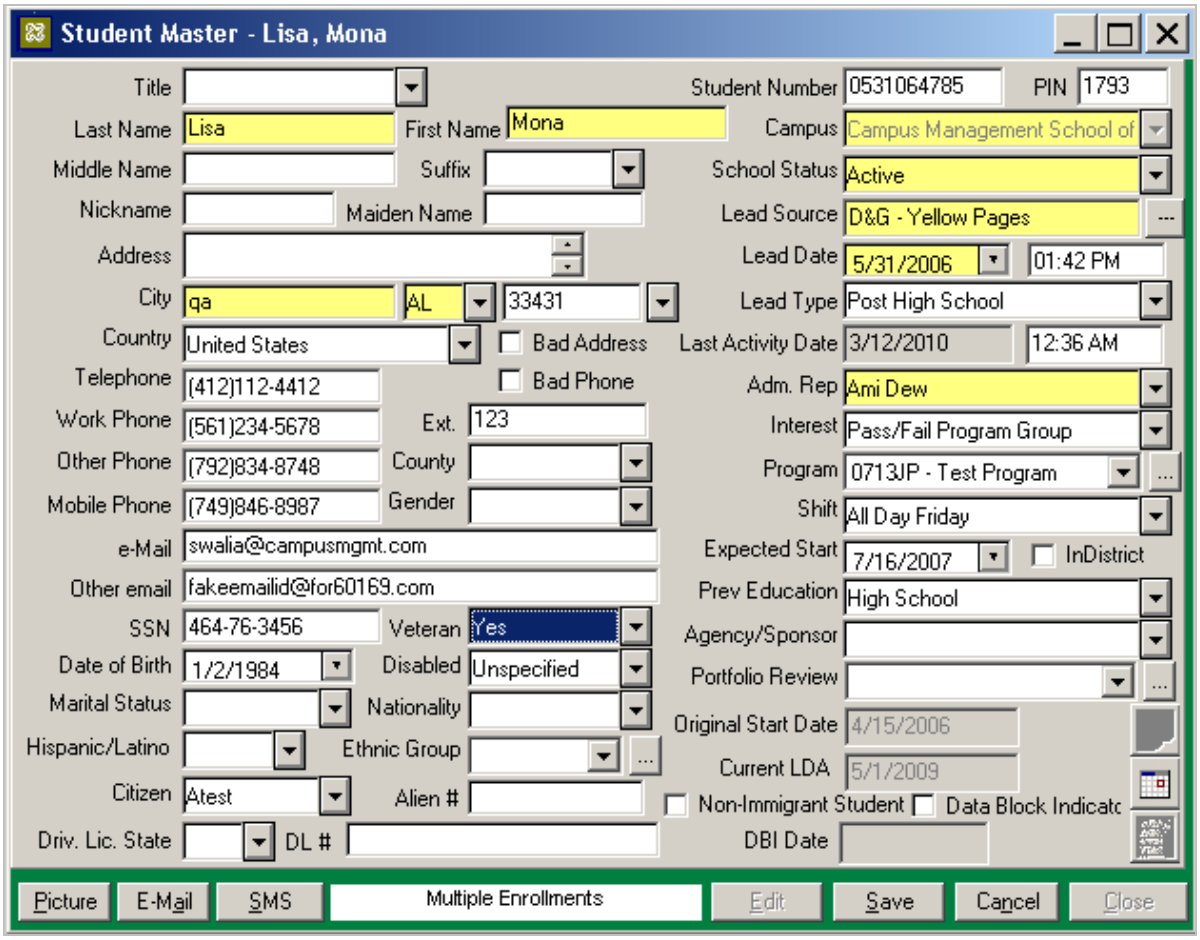
20. Click **Save**.
21. A confirmation message is displayed. Click **OK**.

Veteran Information

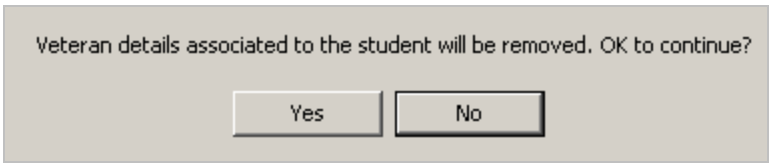
You or your Veterans Affairs (VA) Advisors can assign the Veteran attribute to a student.

1. Navigate to **View > Student Services > Veteran Information**.
2. Select the **Veteran** check box under the Veteran Details. The Student Master form will be updated and the Veteran field will be set to "Yes".





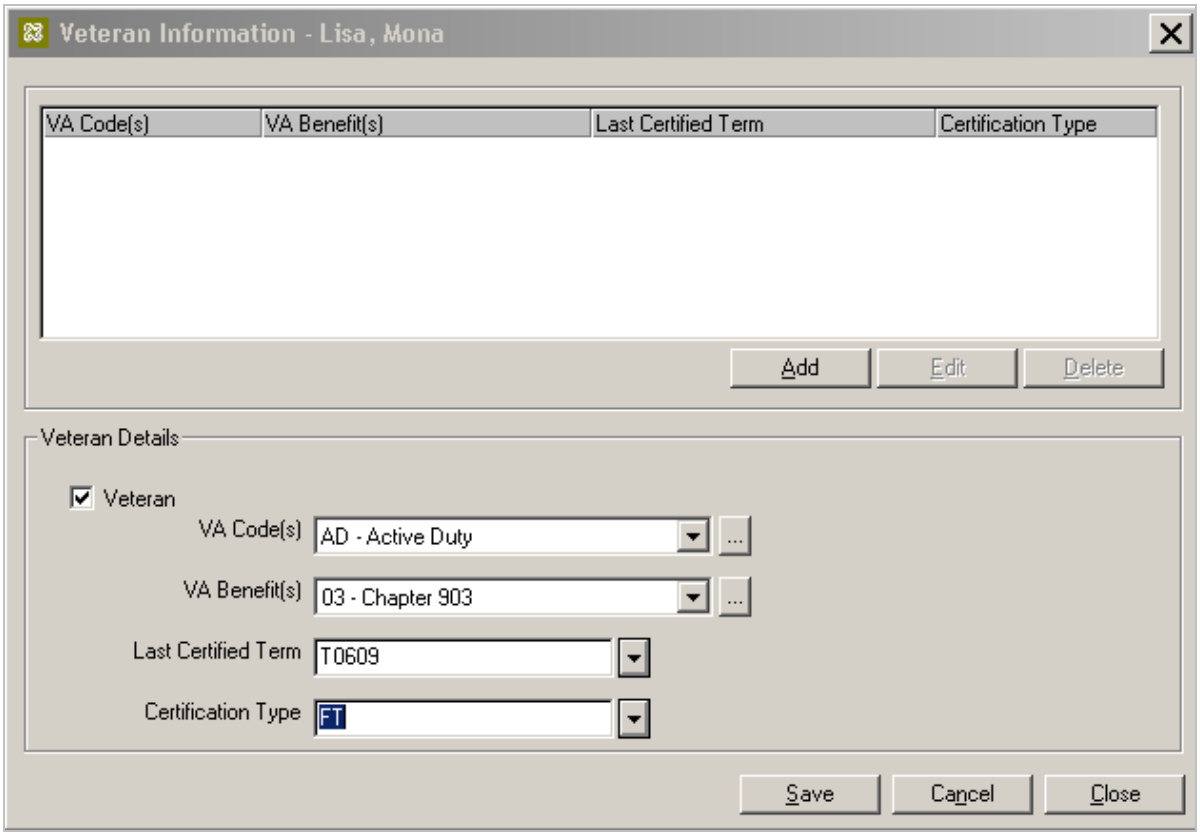
Note: If you try to change a student's Veteran Status on the Student Master form, the following message is displayed:



If you select yes, the Veteran Information is removed from both the Student Master form and the Veteran Information Details form.

3. Click **Save**.
4. A confirmation message is displayed. Click **OK**.
5. Click **Add**.
6. Select the **VA Code(s)**, **VA Benefit(s)**, **Last Certified Term**, and **Certification Type**).

   Note: The VA Code(s) and VA Benefit(s) lists allows multiple selections.



7. Click **Save**. .
8. A confirmation message is displayed. Click **OK**.
9. Click **Close** to close the form.

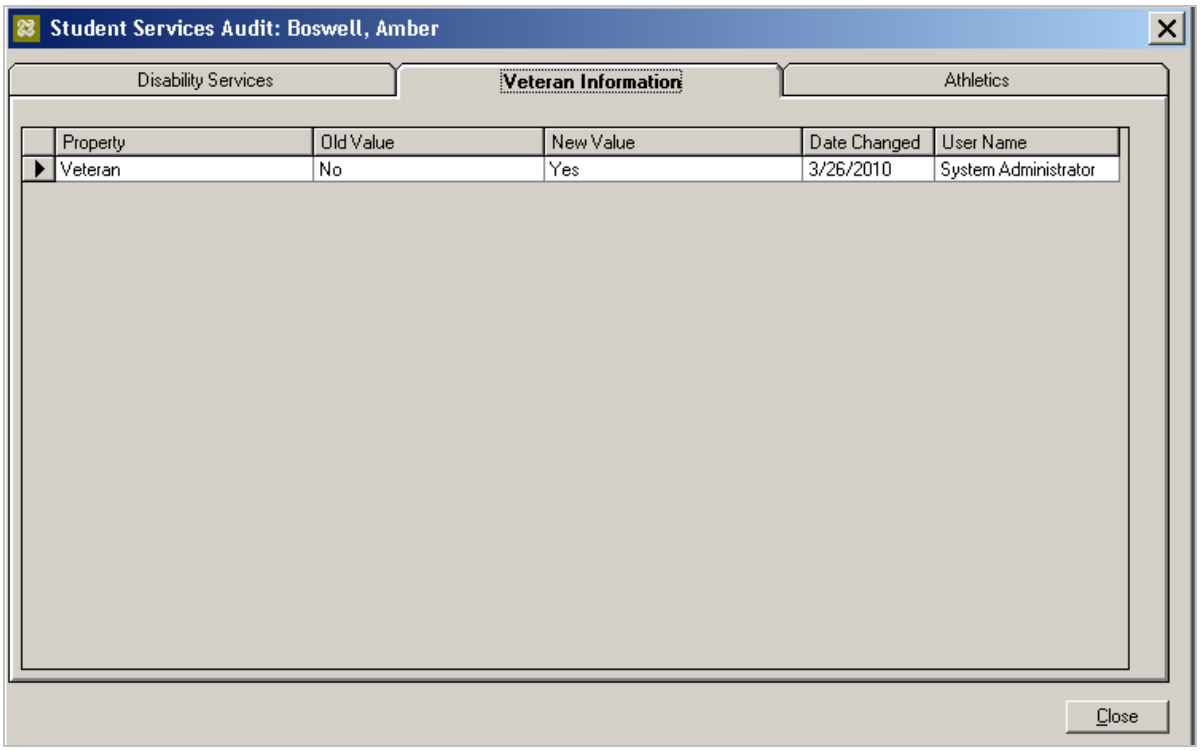
Best Practices

To report on current and previous certified terms it is suggested to:

Run the Veteran Information Report and save the output as a student group at the end of each term, or add a new VA record for each term the student is certified.

Audit

This form can be accessed by navigating to View > Student Services > Audit. The Audit form stores the Veterans Affairs property, old and new value, date of change and the user who made the change. Audits are viewable for **Athletics**, **Disability Services** and **Veteran Information**, by selecting the appropriate tab.



View > Housing

Functions related to campus housing arrangements and fees are handled via this menu. The options on this menu apply to the student selected from the Recent Students list.The options on this menu apply to the student selected from the Recent Students list.

Menu Item	Description
Student	Displays the Student Master form.
Deposits	Displays the form used to post housing deposits.
Application / Lease	Displays the form used to work with the housing applications and housing leases for a student.
Services	Displays the form used to add a service for a student and place the specified charge on the student's ledger.
School Fields	Displays the form used to view or enter data in school-defined fields related to the Housing module and public fields from other modules.
Audit	Displays the audit for housing leases and student applications.

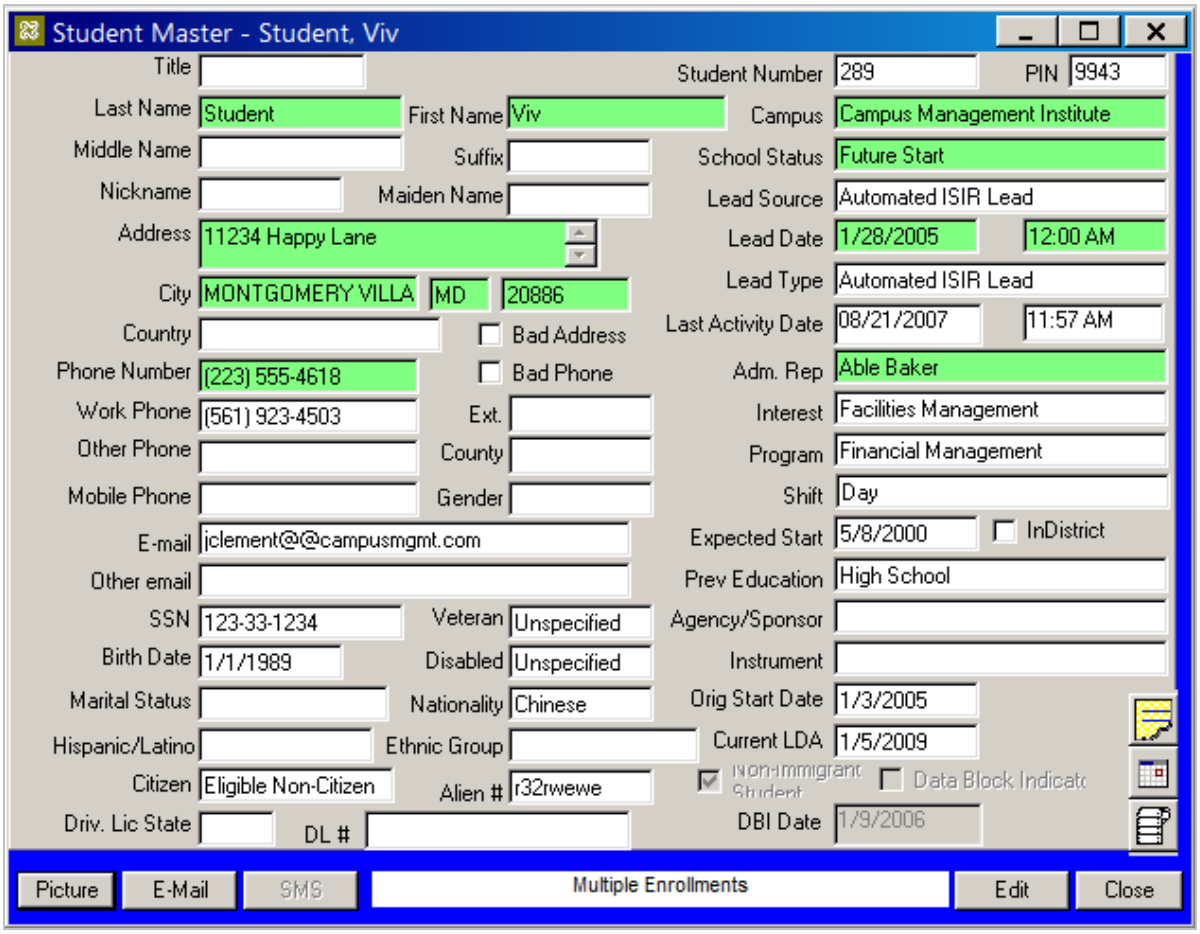
The options on the Student Bar are the same as the options on the View menu, unless the Student Bar has been altered by the user.

Student Master

The Student Master form contains much of a student's basic demographic information. The Student Master form is usually (but not necessarily) populated in the Admissions module by adding a new lead to the database. New leads are entered using the Quick Lead Entry form or the Add New Lead **Ctrl+L** option on the File menu. The **Ctrl+N** key combination can also be used to start a new Student Master record (form) without entering a quick lead.

To view a Student Master form:

1. Select one of the following options:
    - Click **Student** on the Student Bar.
    - Double-click **Recent Students** on the Toolbar. When you change the student in the Recent Students list, a new Student Master form is displayed. If you already have a Student Master form open, it remains open in the background.
    - From the **View** menu navigate as follows:
        - Contact Manager > Student
        - Admissions > Student
        - Financial Aid > Student
        - Student Accounts > Student
        - Academic Records > Student
        - Career Services > Student
        - Loan Management > Student
        - Student Services > Student
        - Housing > Student
    - Use the **Find** menu or click on the Toolbar to search for a student.



Note: The border color around the Student Master form indicates the student's status category. In the setup options under Setup > Status Codes > Colors Tab, your system administrator can choose colors for the status categories.

2. Multiple Student Master forms can be displayed at the same time. The forms always open in the same place in the work area. Unless you have closed, moved, or minimized a previous Student Master form, the next form you open covers the previous form.

   To move between open Student Master forms use the **Window** menu and select **Tile** or **Cascade** to organize all open forms in the work area.

   When you are working with multiple students, ensure that the correct form is current (active). The name of the current student is always shown in the Recent Students text box. The title bar of the active form is always a different color than other forms which may be open in your work area.

3. To edit the information on the form, click **Edit**. See Edit a Student Master.

   Required fields on the form have a background color other than white. If a required field is blank, you must enter data in it when you edit the form, even if you did not intend to provide the information when you clicked Edit.

   Some fields are required by CampusNexus Student (Last Name, First Name, Lead Date, Admissions Rep). Additionally, your institution may designate other fields as required. The system administrator can mark fields as required in either of two ways.

- Open any Student Master (or Quick Lead) form and go to Setup > Required Fields.
- Designate the field as required in the Data Dictionary.

4. To add an activity from the Student Master form, click the **Add Activity** icon at the bottom right of the form. The Activity form is displayed.
5. Click **Close** (Ctrl+F4) to close the active Student Master form. If you are in edit mode when you click Close, you are prompted to save any changes.

Duplicate Student Records

CampusNexus Student checks for duplicate Student Master records when new leads or students are added. The following table columns are used to check for duplicates:

- Student ID
- Social Security Number
- Phone Number
- Date of Birth and Student Name (combined)
- Driver's License Number
- E-mail address.

Each check is performed only if you entered data in the corresponding field. If at least one match is found, a grid showing the matches is displayed

If the lead is a duplicate and can be found on the grid, click the record and the lead form is populated with the information for that lead. The information can then be edited. The campus for the lead can be changed only if the campus ID for the record from the grid is in the list of campuses to which you have access.

Housing Deposits

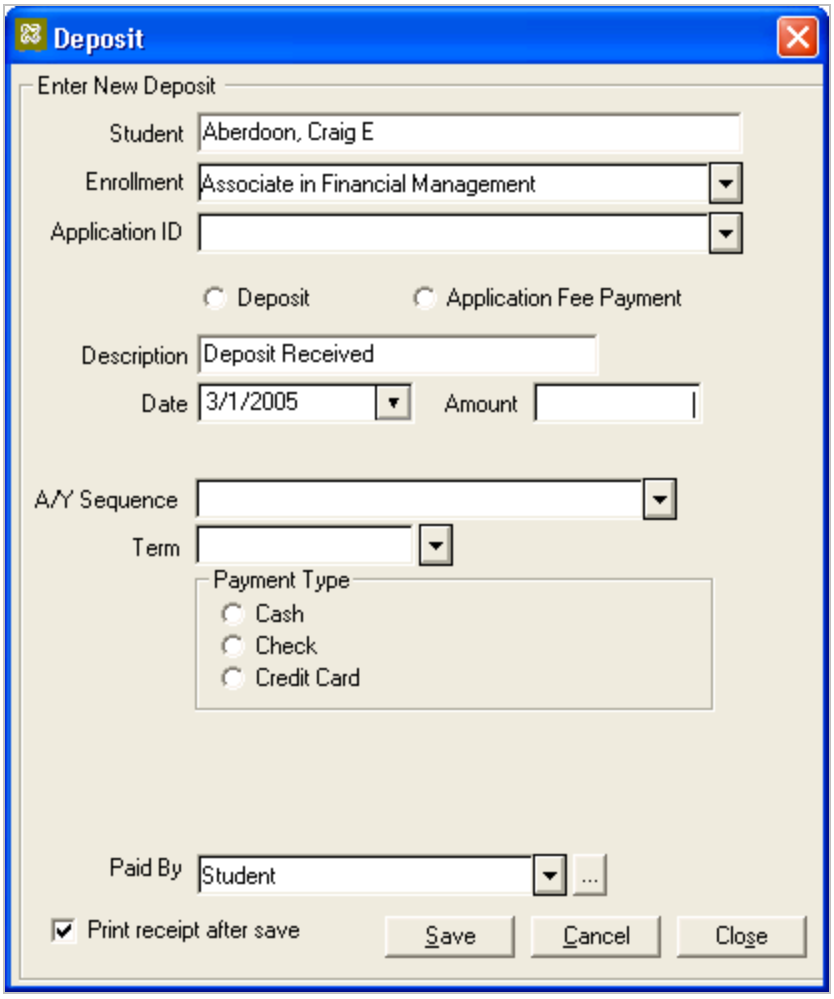
Schools can collect admission and housing deposits and application fee payments using a Deposit form that closely mimics the functionality of the current Admissions Deposit form. The housing deposit may be processed even when an application is not submitted.

Deposits do not show on the ledger card until they are posted in the Student Accounts department. There is an option on the Daily menu in Student Accounts to post deposits to the student's ledger card.

Housing deposits are included on the Admissions Deposits report.

To post housing deposits:

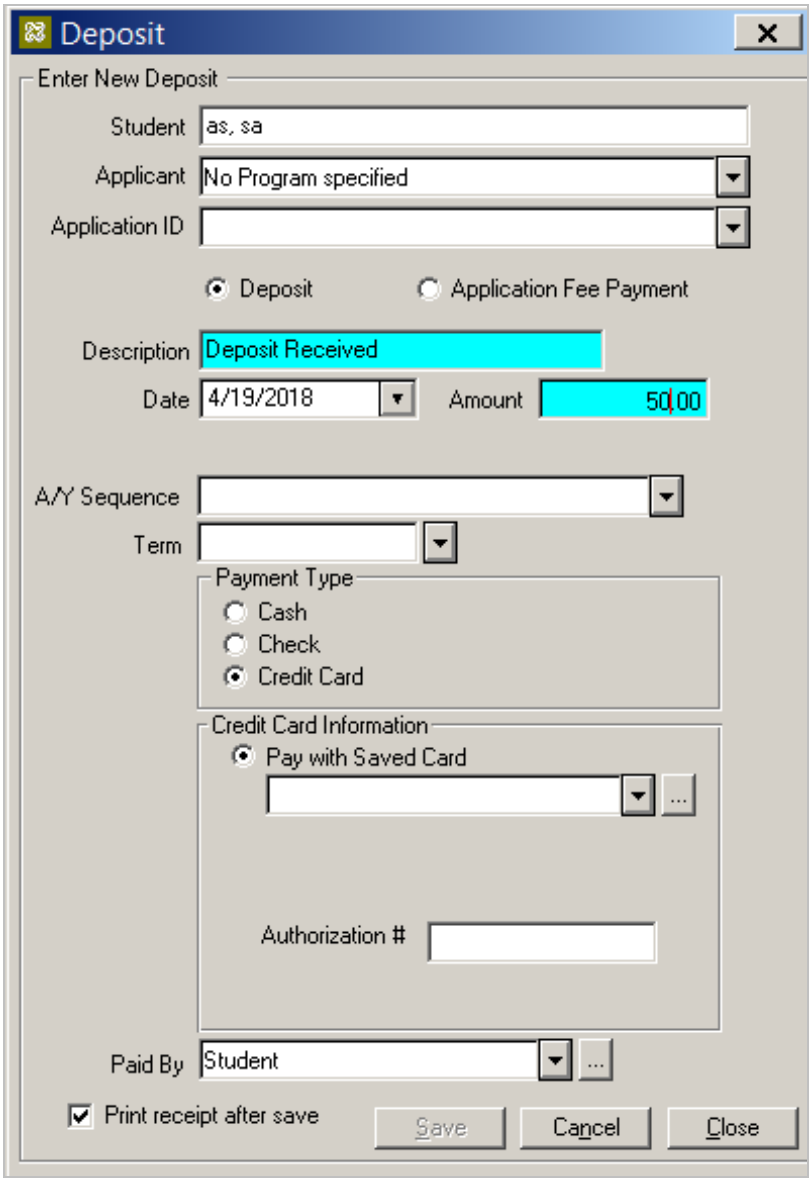
1. Navigate to **View > Housing > Deposits**. If you are posting the first deposit for the student, the Deposit form is displayed. See also Post Deposits.



2. If there are any deposits already on file for the selected student, a grid showing the previous deposits is displayed. You can select a deposit and click **Cancel Deposit** and cancel it. To reprint the receipt, click **Reprint Receipt**.
3. Click **Close** to close the form.
4. Click **New Deposit** to post payments for deposits and application fee payments.

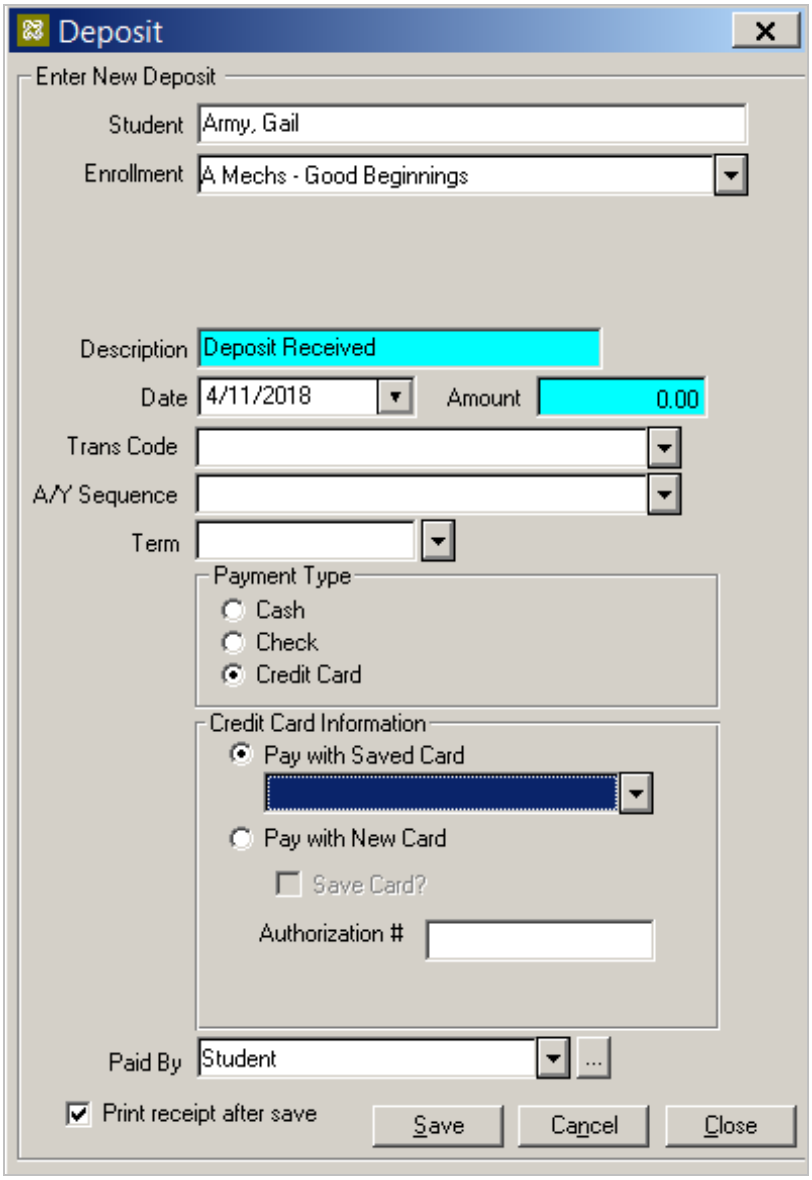
5. Select an Application ID. The application code is displayed from the Student Application form (under **Lists > Housing > Application** tab **> Application Code Setup**).
6. If the radio button **Deposit** is selected, the **Description** field, by default, displays **Deposit Received**. Similarly, if the radio button **Application Fee Payment** is selected, the **Description** field displays **Application Fee Payment Received**.
7. Enter the **Date** and **Amount** of the deposit or fee.
8. Select the **Term** that this deposit is for.
9. Select the **A/Y (Academic Year) Sequence**.
10. If you are entering a new deposit, select one of the **Paid By** options, student, parent, etc.
11. Select a **Payment** type. The options are **Cash**, **Check**, or **Credit Card**.

    If you select the **Credit Card** payment type, the system changes the form to show the **Credit Card Information** fields and buttons. For details see the topic Deposit.



Note: If the student's campus is configured to Verify Credit Card Payments Posted Using CampusNexus Student (Campus Information - Electronic Processing Tab), there are two options for Credit Card Payment Type:

- Pay with Saved Card
- Pay with New Card



12. Click **Save**. If you want a receipt, select **Print receipt after save**.
13. If you have selected the **Pay with New Card** option, you are redirected to the payment gateway provider's hosted page to enter credit card information to complete the transaction.**Note:** Selecting the **Save Card?** check box will save the new card to the database as Active for future transactions. If you do not save the card, the card will be saved but will be marked as Inactive and won't be available for selection for future transactions.

View Housing Applications

This form allows you to work with the housing applications and housing leases for a student.

The tasks you can accomplish with this form include:

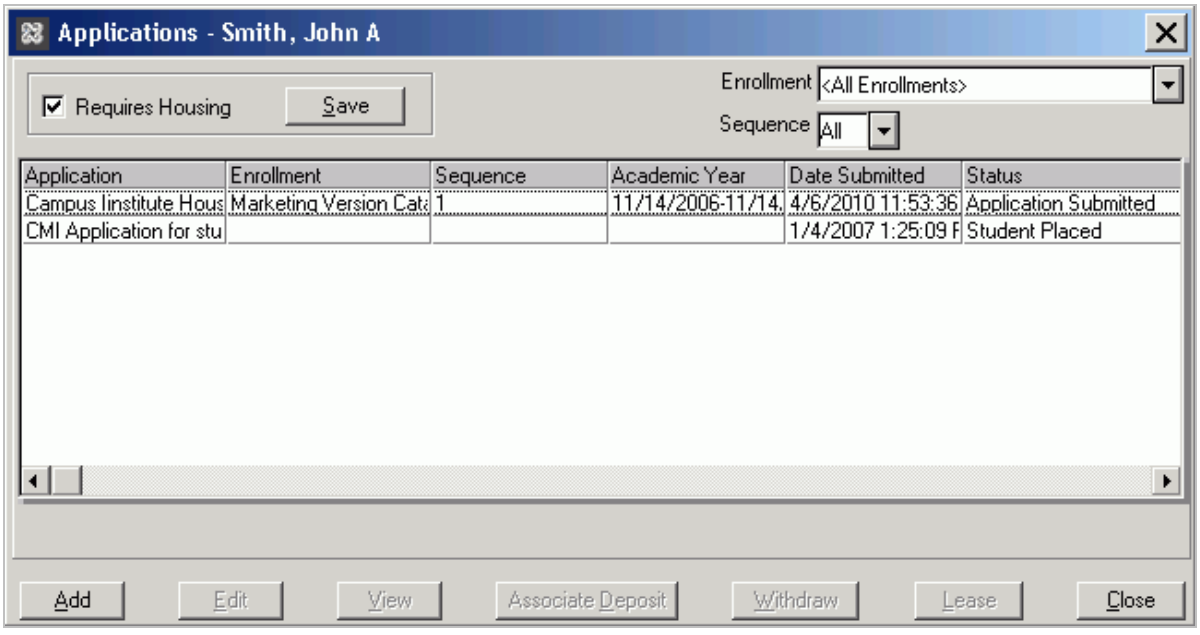
- Add or Edit a housing application for a student
- Accept housing deposits without student filling housing application
- View a housing application submitted by a student
- Withdraw a housing application submitted by a student
- View room or roommate information for a lease
- Generate a charge schedule for a lease
- View or edit a charge schedule for a lease
- Bill outstanding charges for a lease
- Print a charge schedule for a lease
- Print a lease
- Edit a housing lease
- Attach documents to a lease
- Add an activity to a lease
- Change the room assigned to a student
- Renew a housing lease
- Search Applications

Working with Housing Applications

See also Housing Applications, Housing Deposits, Post Rent Charges, and Move Out or Renewal.

To work with the housing applications for a student:

1. Navigate to **View > Housing > Application/Lease**. The housing applications submitted by the student are listed. Use the **Enrollment** and **Sequence** fields to filter the housing applications.



2. Saving a Housing Application enables the **Requires Housing** check box. The change in the Requires Housing

status for a student is also reflected on the student's Housing Information form, and vice-versa.

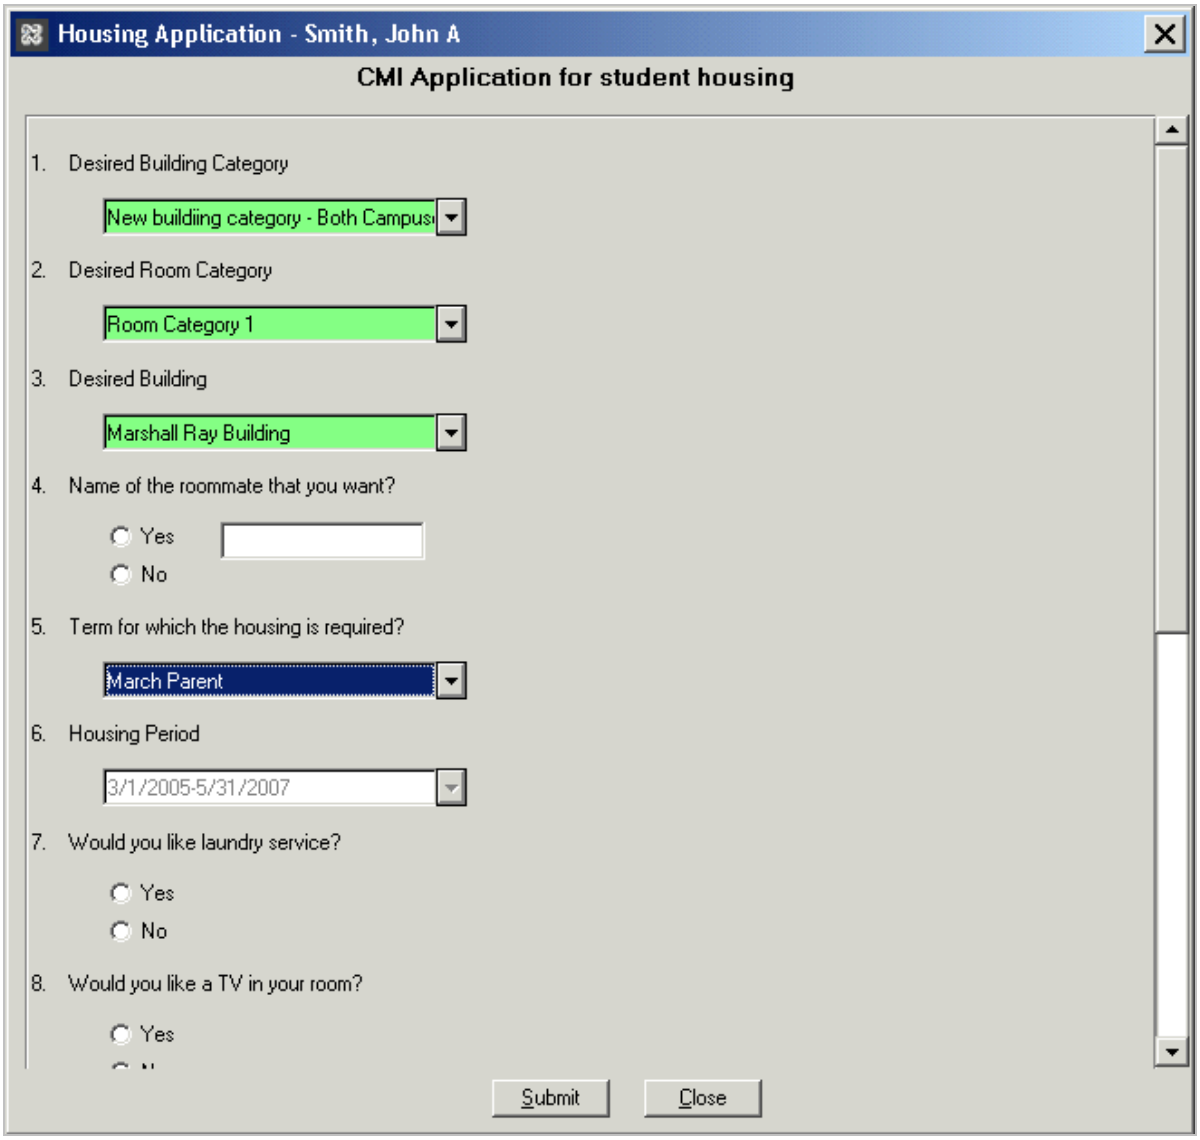
3. Select add, edit, view, associate a deposit, withdraw, lease, or **Close** on the bottom of the form.

To view a student's housing application:

Select a housing application from the Applications form, and click **View**. The housing application as submitted by the student is displayed in read-only mode.

To add a housing application for the student:

1. Click **Add** on the Applications form. The active housing application associated with the student's campus is displayed.



2. Enter the answers for various questions in the housing application.

Important note before you begin: If the ampersand (&) and/or quotation mark (") are entered into the Housing Application text fields, the application cannot be saved. If these characters are used, a message prompts you to avoid using them.

Note: When entering a Housing Application that is configured with a question asking for the student's Academic Year, the following rules apply.

- For the degree seeking student, the Academic Years pertaining to the selected enrollment is displayed. Select the corresponding Academic Year(s) that the Housing Application pertains to.
- For the non degree seeking enrollment student, once you select the student's enrollment on the housing application, the Academic Years is grayed out. CampusNexus Student automatically assigns the start date and end date based on the enrollment's expected start date and expected graduation date.

3. Click **Submit**.
4. Click **Close**.

   The added housing application is now listed on the Applications form.

To edit a housing application for the student:

1. Select a housing application from the list on the Applications form, and click **Edit**. The housing application as submitted by the student is displayed.
2. Make the required changes in the housing application.
3. Click **Submit** to resubmit the housing application.
4. Click **Close** to close the form.

   The added housing application is now listed on the Applications form.

To withdraw a housing application submitted by the student

1. Select an application from the Applications form, and click **Withdraw**. A confirmation box is displayed.
2. Click **Yes** to confirm withdrawing the housing application. The status of the housing application is set to **Withdrawn**.

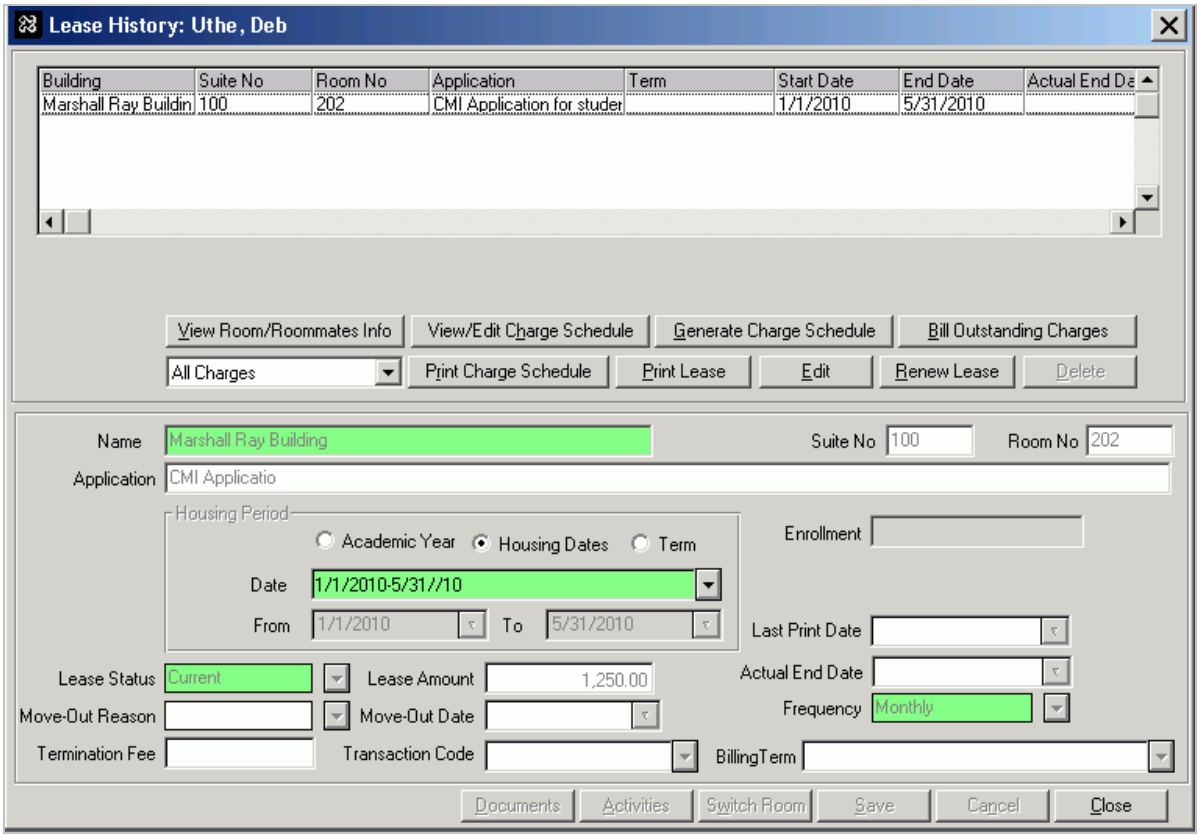
   Note: If the status of the housing application being withdrawn is **Application Being Processed**, CampusNexus Student checks if a lease was created (with the status of **Pending**) for the housing application. If this is the case, the lease related to the housing application is deleted when the application is withdrawn.

Working with Housing Leases

To work with housing leases for a student:

1. Navigate to **View > Housing > Application/Lease**. The housing applications submitted by the student are listed.
2. Select a housing application from the list and click **Lease**. The Lease History form for the selected housing applic-

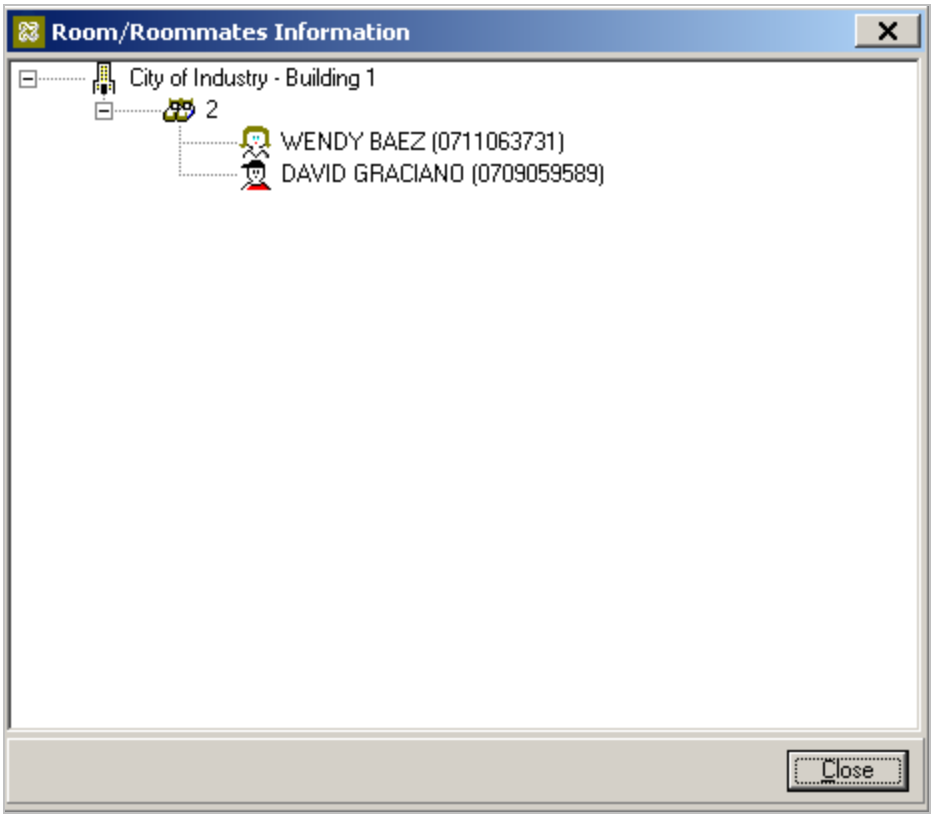
ation is displayed.



The Lease History form displays all lease(s) that have been associated with the selected housing application.

To view room/roommate information for a lease:

1. Select a lease from the Lease History form, and click **View Room/Roommates**. The Room/Roommate Information form is displayed. Room/roommate information can be viewed only for active leases.



The tree structure displays the building, the suite, the room, and the roommate(s) assigned to the student in his or her lease. When viewing roommate information for a particular student, CampusNexus Student displays information of all the rooms in that suite, in addition to the student's room information. All building, room, suite, student's name, and gender information is displayed for the suite.

To generate the charge schedule for a lease:

1. Select a lease from the Lease History form, and click **Generate Charge Schedule**. A dialog box is displayed, indicating that the charge schedule has been generated.
2. Click **OK** to close the dialog box.

   There are three system-defined status for a charge schedule:

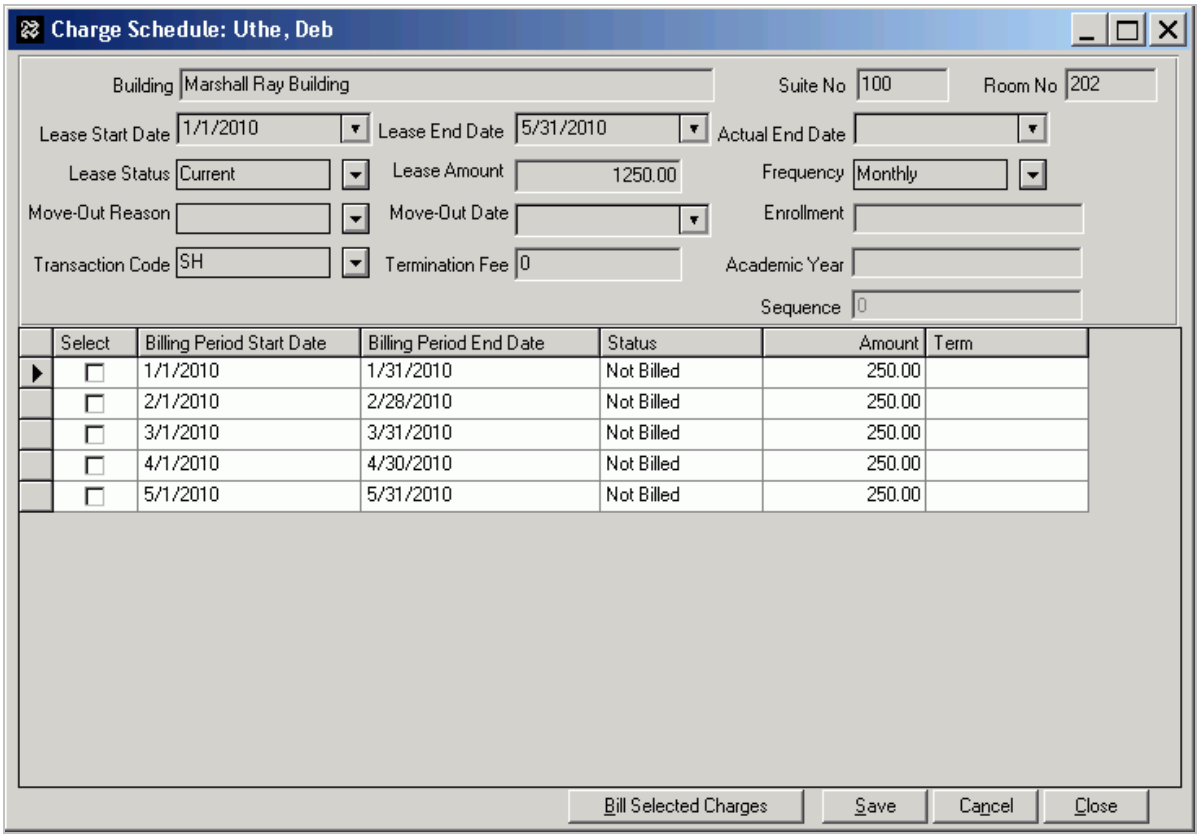
   - Not Billed
   - Billed
   - Pending

CampusNexus Student assigns an appropriate status to a charge schedule depending on the billing status of the lease.

Note: If you re-generate an existing charge schedule by clicking the **Generate Charge Schedule** button, all charges with the status of **Billed** or **Pending** are not generated again.

To view/edit charge schedule for a lease:

1. Select a lease from the Lease History form, and click **View/Edit Charge Schedule**. The Charge Schedule form is displayed.



Note: The **View/Edit Charge Schedule** button on the Lease History form remains disabled until the charge schedule for a student is generated for the first time.

Note: If CampusNexus Student is set up to not require a term (Setup > Student Accounts > Require Term Codes), housing charges may be billed without a term.

2. Specify/change the relevant information in the various fields on the Charge Schedule form. The **Billing Period Start Date** and **Billing Period End Date** fields are not editable on this form, because these values are associated with the payment plan when you generate the charge schedule for the lease.
3. The value in the **Amount** field can be edited, if the charge has not been billed, i.e., the status of the charge is **Not Billed**.
4. To bill a charge, select the corresponding check box, and click **Bill Selected Charges**. The status of the charge is changed to **Billed**.
5. Click **Save** to save the changes.
6. Click **Close** to close the form.

To bill outstanding charges for a lease:

1. Select a lease from the Lease History form.
2. Click **Bill Outstanding Charges**.

To print the charge schedule:

1. Select a lease from the Lease History form.
2. To the left of the **Print Charge Schedule** button is a list box which allows you to choose whether to print a charge schedule containing **All Charges** or **Outstanding Charges**.

3. Click **Print Charge Schedule** .

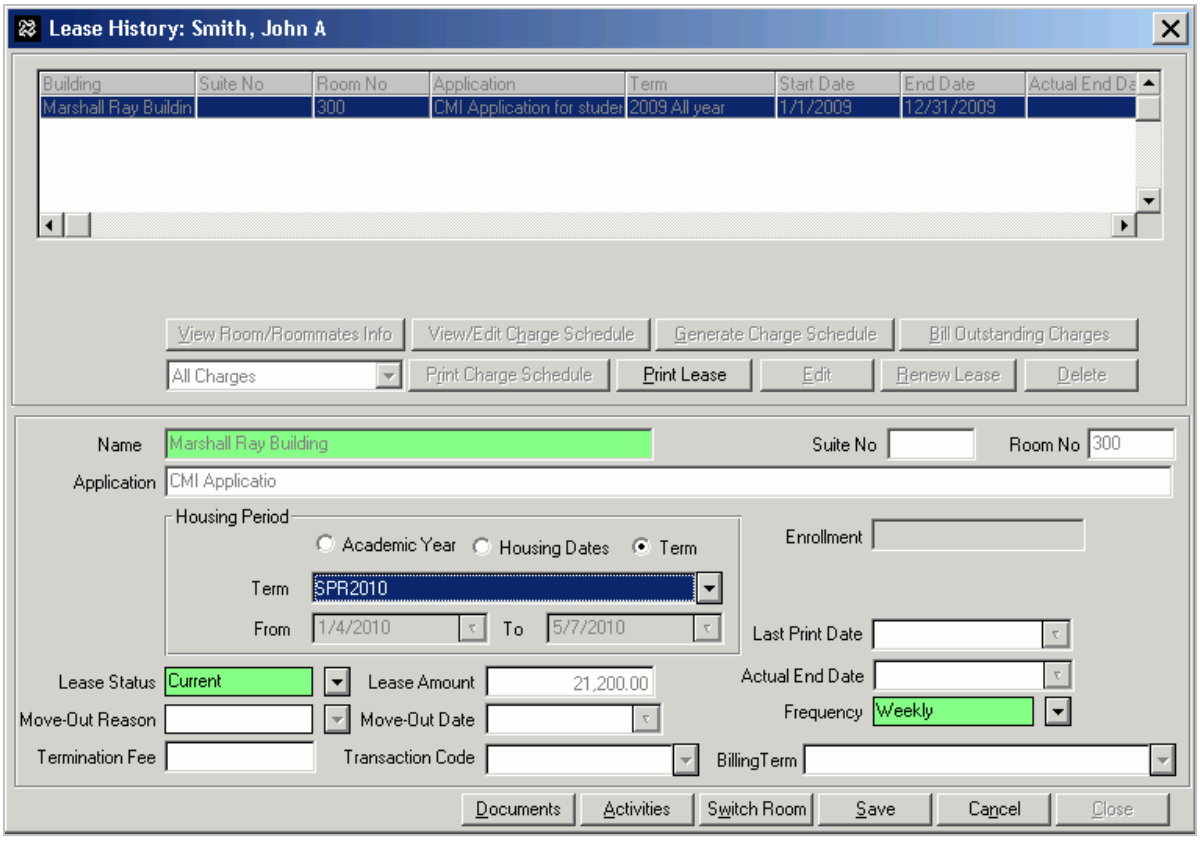
To Print a lease:

1. Select a lease from the Lease History form.
2. Click **Print Lease**.
3. The **Last Print Date** field is updated with the date on which the lease was printed.

   Note: The Last Print Date is reset if a room change is made.

To edit the housing lease for the student:

1. Select a lease from the Lease History form, and click **Edit**. The fields showing the lease details at the bottom of the form become active.



2. The Housing Period may be one of **Academic Year**, **Housing Dates**, or **Term**. Depending on the Housing Period

in use, as indicated by the Radio Buttons, the list box used to select a housing period may be labeled **Academic Year**, **Date**, or **Term**. When a housing period is selected, the **From** and **To** dates are populated with the correct information.

Note: The Housing Period fields may not be edited unless the individual accessing the form has been given individual or group access allowing them to edit housing period dates on a lease.

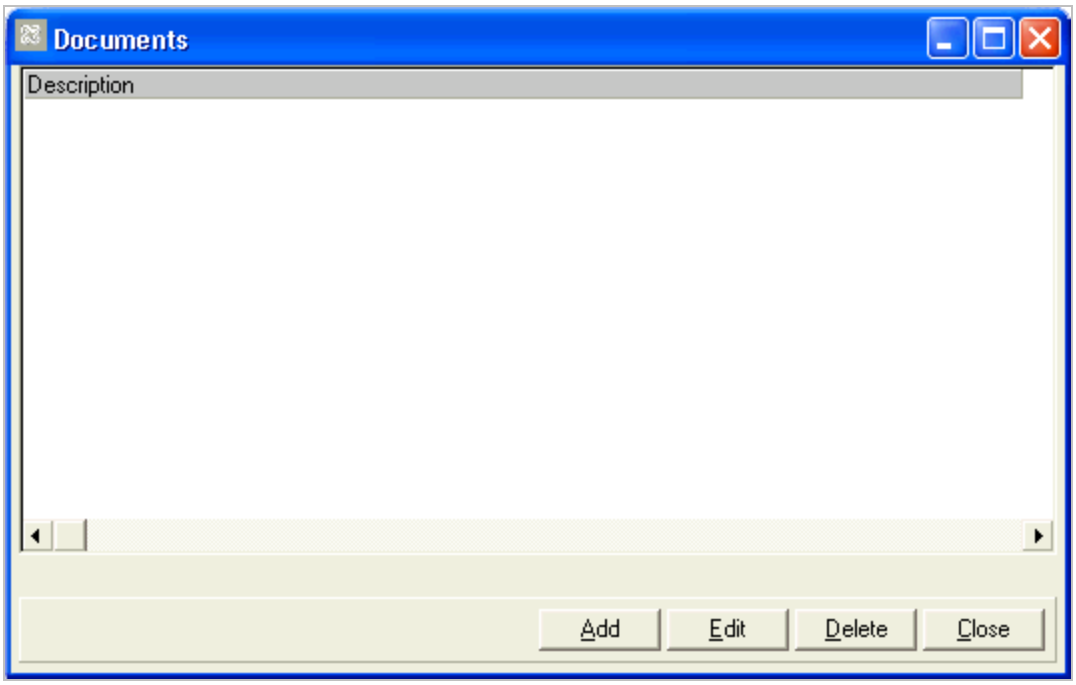
3. The status of other fields while editing a lease is given below:
   - Not Editable: **Building**, **Suite No**, **Room No**, **Application**, **Lease Amount**, and **Transaction Code**.

     Note: The lease amount is a calculated field, which depends on the room rent and the duration of the lease.
   - Editable: **Actual End Date**, **Status**, and **Frequency**.

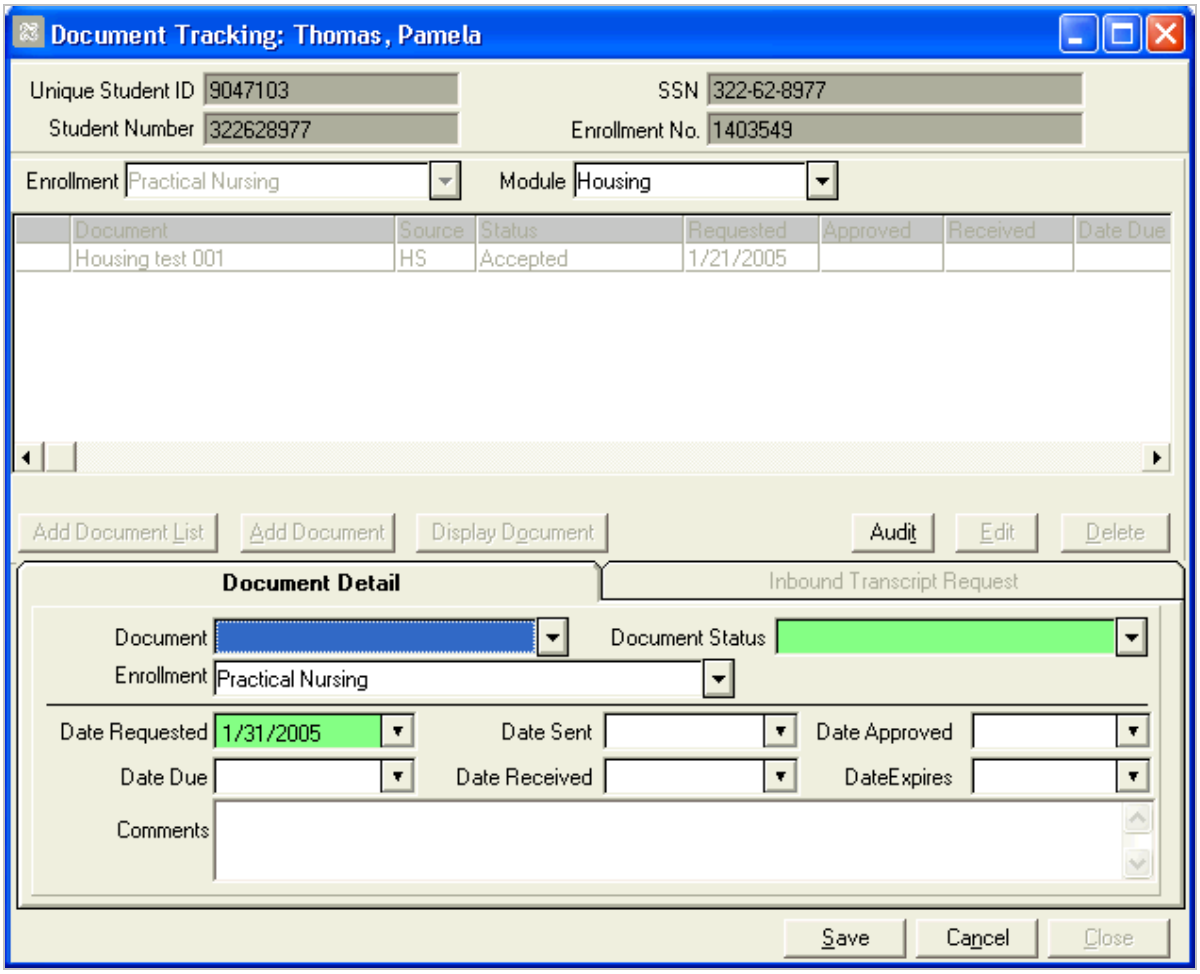
     Note: If you change the lease status to Expired or Lease-Broken, CampusNexus Student inserts the current date into the **Actual End Date** field. You can change the date entered by CampusNexus Student if required.
   - Editable only while setting the lease status to **Expired** or **Lease Broken**: **Move-Out Reason**, **Move-Out Date**, and **Termination Fee**. Once the status is saved, these fields are not editable and cannot be changed.
   - Select the **Termination Fee Subsidiary Code** from the list of all subsidiary associated with the selected transaction code. This field is populated only when the billing transaction code selected for termination fee is associated with single or multiple subsidiaries.
4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To attach documents to a lease:

1. Select a lease from the Lease History form, and click **Edit**.
2. Click **Documents**. The Documents form is displayed. This form lists the documents attached to the lease (if any).



3. Click **Add** on the Documents form. The Document Tracking form for the student is displayed.



4. Select the document to attach from the **Document** list on the **Document Detail** tab on this form, and provide a status for the document from the **Document Status** list.
5. Click **Save** to attach the document.
6. Click **Close** to close the form. The attached document can be seen listed in the Documents form.
7. Click **Close** to close the form.

To add a contact manager activity to a housing lease:

1. Selects a lease from the Lease History form, and click **Edit**.
2. Click **Activities**. The Activities form is displayed. This form lists the activities already added to the lease (if any).
3. Click **Add** on the Activities form. If the lease start date is in the future (i.e. the lease start date is not the current date or a past date) the Days Before Start of Activity form is displayed. Enter the number of days before the start of the activity, and then click **Next**.
4. The Activity form for the student is displayed now.
5. Set the details of an activity using this form.
6. Click **Save** to add the activity to the lease.

7. Click **Close** to close the form.

   The added activity can be seen listed in the Activities form.

Note: The added activity also appears in the Activities window (**View> Contact Manager > Activity**) for the student.

To change the room assigned to a student

To change the room assigned to a student in his/her housing lease, see the Help topic located at View Menu (Student Bar) > Housing > Switch Rooms.

To renew a housing lease:

1. Select a housing lease from the Lease History form, and then click **Renew Lease**. The **Renew Lease** button is active only if the student application selected is applicable on the current date.
2. The status of the lease being renewed changes to 'Expired' and a new lease is created. The fields showing the lease details become active.

   Lease Details

Field	Default Value	Editable?
Building	Old lease value	No
Suite No.	Old lease value	No
Room No.	Old lease value	No
Application	Old lease value	No
Academic Year/Date/Term	Old lease value, if applicable	Yes
From	Current date	Yes
To	New end date for the new lease	Yes
Actual End Date	No value	Yes
Status	Current	Yes
Lease Amount	Old lease value. The default value is the original lease amount. To change this amount, you must change the charges and re-generate the schedule.	No
Frequency	Old lease value. The default value is the original lease frequency. To change this amount, you must change the frequency and re-generate the schedule.	Yes
Move-Out Reason	No value	No
Move-Out Date	No value	No
Transaction Code	No value	No
Termination Fee	No value	No

3. After changing these values, click **Save** to save the lease.

Accept housing deposits without student filling housing in application

Navigate to **View > Housing >** Deposits. Fill in all required fields. The deposit may be processed even when an application is not selected. Click the **Save** button to retain deposit information. Verify that the system allowed the acceptance of a housing deposit without an application submission by navigating to View > Housing > Application/Lease and accessing the 'Applications' form for the student. If the 'Requires Housing' check box is selected, then the student still needs to fill/submit an application even though the deposit was processed.

After the student fills/ submits an application, you can associate the housing deposit with the application or any existing application whose status is "Application Submitted", "Application Being processed" or "Placed". Navigate to View > Housing > Application/Lease, select an application with one of the statuses listed above and click the **Associate Deposit** button. The Associate Housing Deposit form is displayed listing all housing deposit records for the student. Select the desired housing deposit listing and click the **Save** button. The system will associate the selected housing deposit with the application.

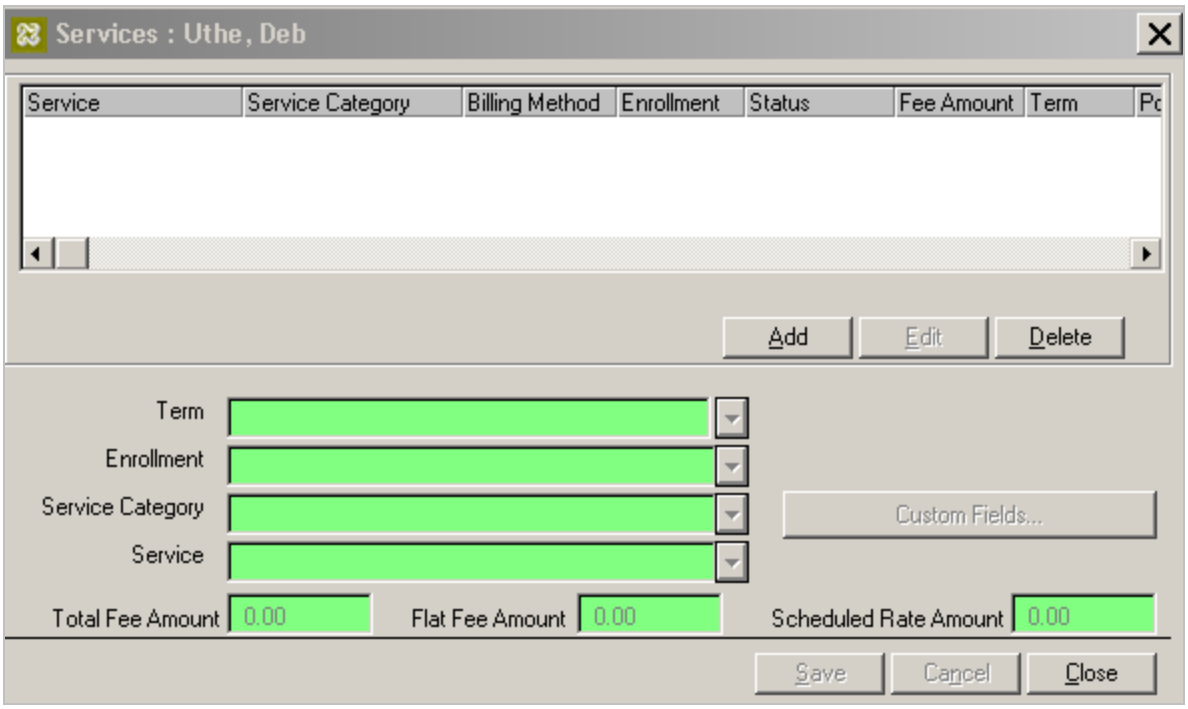
Services

To assign the cost of a housing related service to a student for subsequent billing, it is necessary to assign the service to the student for the *Term*, *Enrollment*, *Service Category* and specified *Service*. The Service Category and Services must have been previously defined through entries created in the Student Services Lists. Services are grouped by *Service Categories*. For example, Cable TV or Parking fees can be grouped in the *Housing Service Category*. Service Categories must be set up before Services can be assigned to Service Categories.

The Services screen provides the ability to indicate the specific services that a student will receive. For each service the fee specified for that service will be placed on the student's ledger card for subsequent posting.

To add a service for a student and place the specified charge on the student's ledger:

1. Select the student to whom you want to assign the service.
2. Navigate to **View > Housing > Services**.



3. To add a service, click **Add**.
4. Select the **Term** in which the service will be rendered.
5. Select the appropriate **Enrollment**.
6. Select the **Service Category**. Service Categories might include items such as Housing or Meal Plans.
7. Select the **Service**. When this is done the **Total Fee Amount**, **Flat Fee Amount**, and **Scheduled Rate Amount** fields will be filled in from the information on file for that service.
8. Click **Save**. The Service entry will be saved and displayed on the grid at the top of the form.

The cost of the Service will be placed on to the Student's Ledger Card with a post status of 'Pending'.

An existing service entry may be edited by highlighting the service on the grid and clicking on the **Edit** button.

An existing service entry may be deleted by highlighting the service on the grid and clicking the **Delete** button. A dialog box will appear requesting confirmation of the deletion. After confirmation, the service entry will be deleted.

Once the charges associated with a service have been posted to the student's ledger, the post status for this service will be changed to 'Posted'. Once the charges have been posted, the service may not be edited.

Note: Services can also be applied to more than one student at a time. **Daily > Student Services > Batch Assign Services** launches a three-step wizard that enables users to associate a service to multiple students. Filtering criteria are Start Date, Program Version, Status, and Charge Amount.

Custom fields can be created to accommodate special services for your campus or campuses. For more information, see the Custom Fields for Student Services topic.

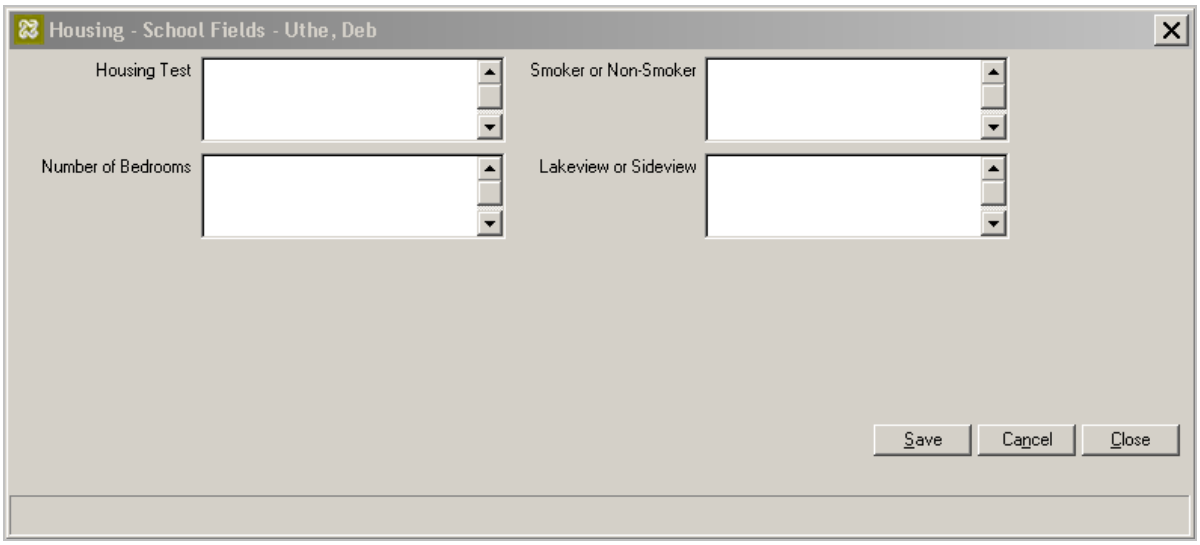
School Fields - Housing

School-defined fields are set up by your system administrator to collect information that is not required by the generic CampusNexus Student application. (See Setup > School Defined Fields.) The fields are organized by department during setup. At least one department has the authority to change each field.

Some fields may be viewed but not edited in your department. A field may be flagged as confidential by the originator, i.e., not viewable outside of the department that is using it. For instance, if a field can only be viewed or edited by the Housing Department, it will only be visible when the form is opened from View > Housing > School Fields. If you do not have access to that menu option, you will not see this field.

To view or edit school fields:

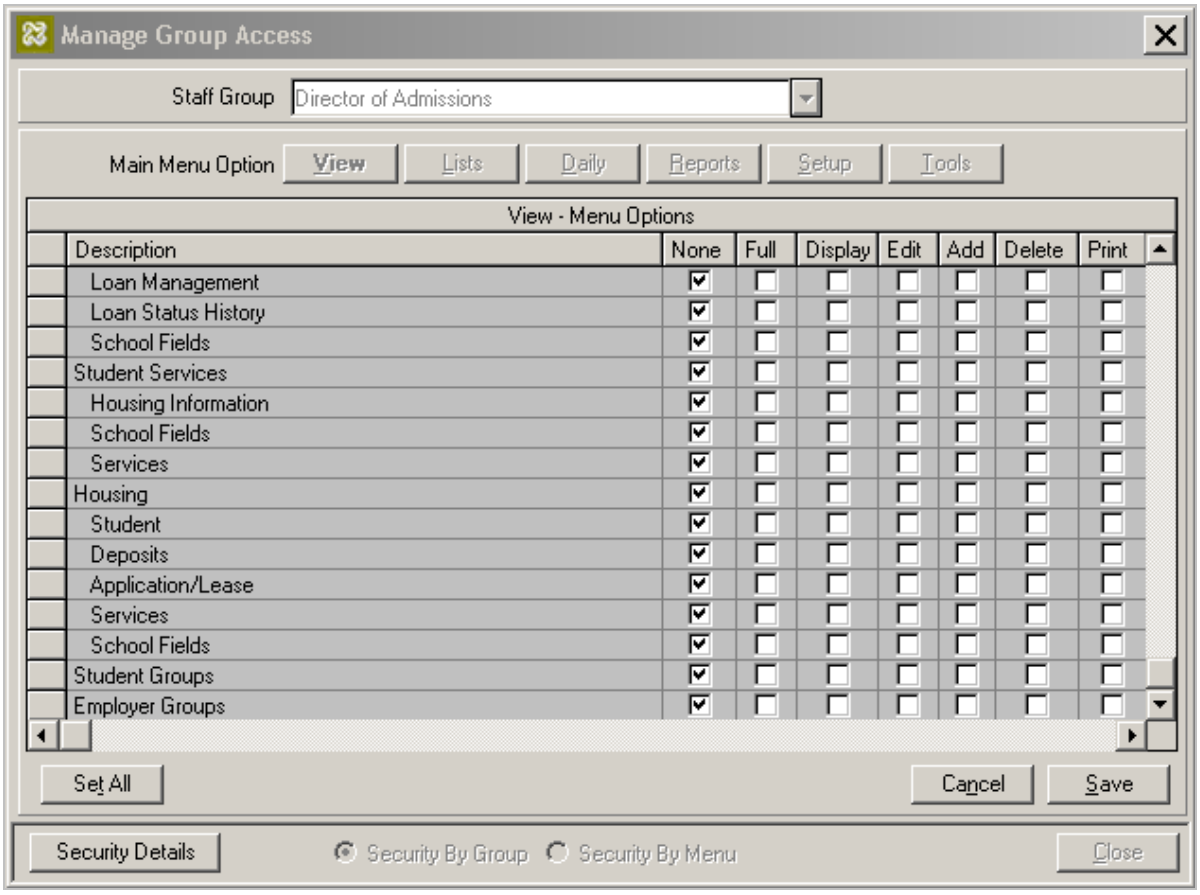
1. Navigate to **View > Housing > School Fields**. The School Fields form is displayed.



2. Click on or tab to a field that you want to change. Select an option or enter data to edit the field.

   The fields are displayed in edit mode (white background) if your department has been given permission to change the data. Fields that are "dimmed" cannot be changed. Fields that are listed but are gray and show no data are simply not to be filled in yet by the staff member responsible for doing so.

   Note: To provide users with security permissions to this form, navigate to **Setup > Security** (Staff Group drop-down) > **View** (button) > **Housing** (Description section) > **School Fields**.



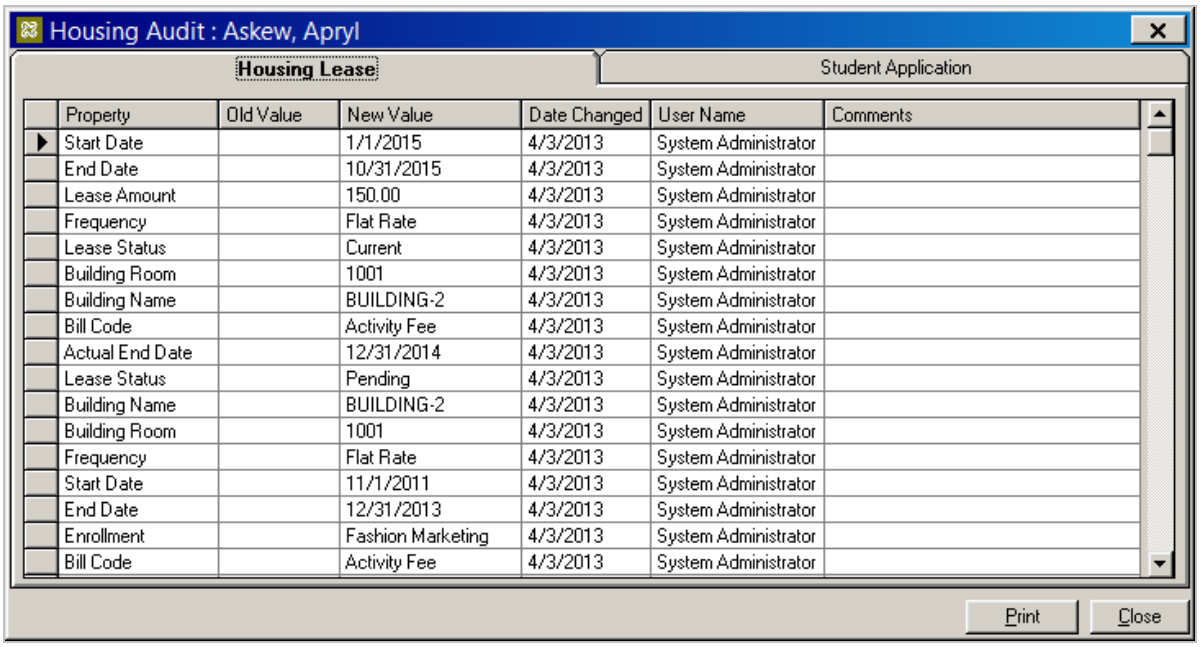
3. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. .

Audit

The Audit form displays changes to housing information. Any changes made to a student's lease(s) as well those made to a student's housing application(s) are displayed.

To view the Housing Audit:

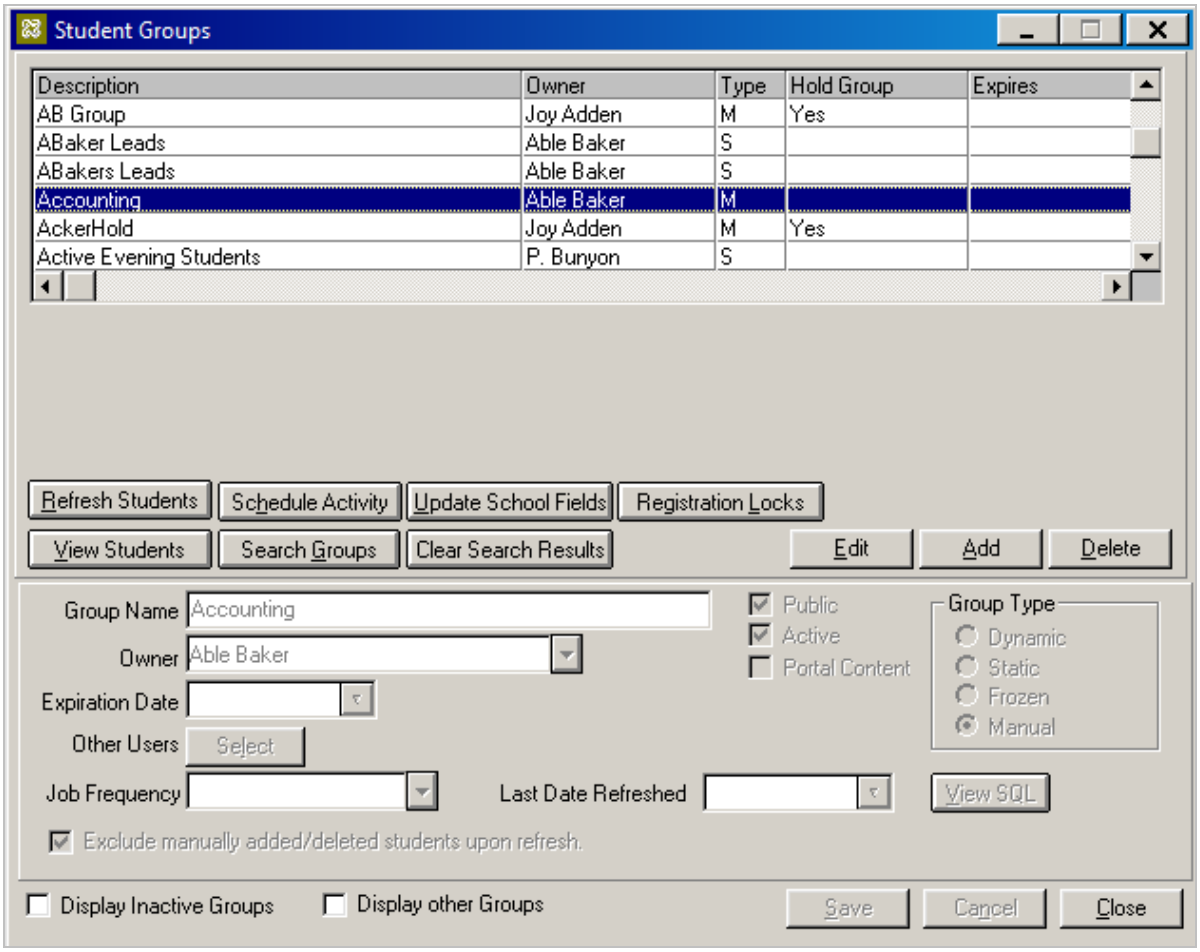
1. Select the student for whom you want to view the housing change data.
2. Navigate to **View > Housing > Audit**.
3. Select the tab containing the desired information.



4. Click **Print** to print the data or **Close** to close the form.

Student Groups

Student Groups serve to organize a list of students who have one or more characteristics in common. They may all have the same status, or they may be in the same program, or just about anything else you can think of.



Note: The Update School Fields button is only enabled if you have 'View' permissions for Daily > Contact Manager > Batch Update School Fields. Clicking this button opens the Batch Update School Fields form.

The Registration Locks button is only enabled if you have 'View' permissions for View > Academic Records > Registration Locks. A tool tip stating Configure Registration Locks is displayed when you hover over the Registration Locks button. Clicking this button opens the Registration Locks form.

A student group can be created as follows:

1. through lists of students on a report,
2. through a search of student master records,
3. by manually adding a new group and selecting students to be members of it

The process of creating a student group via a report is described in the topic Report Viewer Controls. The process of creating a group via a search is described under Find > Student > Search.

Creating a Student Group from a Report

The process of manually creating a student group is described later in this topic.

You can view the list of students who are members of a group, add students to a group, and remove students from a group. You can schedule activities for the members of the group as a whole. (To schedule an activity for an individual member of the group, you must do so through the View menu, Contact Manager, Activities function.)

A group is "owned" by the user who creates it. Ownership can be transferred from one owner to another. Once ownership of a private group is transferred, the previous owner no longer has the right to see the group.

A group can be Public or Private. A Public group can be viewed and edited by persons other than the one who created the group. A Private group can be viewed and edited only by the person who created it, or those authorized to do so by the group's creator. A group that is formed by saving a search or running a report is typically designated as Private (not Public) until the owner intentionally sets it to be Public. A manually created group defaults to Public. The person creating the group must clear the Public option if necessary to keep it private.

A group can be active or inactive as required by the owner.

Adding and Deleting Group Members

If the group is a manual group type and it is "Public", any user with appropriate access rights can add and delete students. Only the owner of a Private group or the system administrator can perform maintenance, such as adding and removing students.

The owner of a Private group or the system administrator can add or delete staff members who have access to that group. When the Public check box is disabled, the **Other Users Select** button becomes available. Clicking **Select** displays the **Student Group Staff** form.

Note: Additional users can only add/remove students from the group from the student's **View** menu, not from their **Manage Student Groups** form.

The authorized user can search for staff members and add them to the list of Selected Staff for the group. The **Search** button becomes available when the user enters data in any of the search criteria fields or selects a Staff Group from the drop-down list.

Display Inactive Groups

Select this check box to view inactive groups. The default view of the Student Groups form lists only student groups that are active.

Display other Groups

The default view of the Student Groups form lists all student groups that the logged-in user owns or has been given permission to edit. Select the **Display other Groups** check box to view public groups not owned by the logged-in user. Note: This applies only to groups that contain students. Empty groups will not be displayed.

Exclude manually added/deleted students upon refresh

This check box provides the following functionality:
If the check box is selected for a group, students who were manually added will not be removed from a static or dynamic group once it is refreshed; students who were manually deleted by a user will not be added back to a static or dynamic group once it is refreshed.

Group Types

Group types can be **Dynamic**, **Static**, **Frozen**, or **Manual**. Dynamic, Static, and Frozen groups are typically formed by saving the results of a search or a report. These group types can be changed from one type to another, including Manual. The Manual type, however, cannot be changed to any of the other types since there are no automatic parameters involved.

Dynamic Group

The list of students in a **dynamic group** changes when a student qualifies for the group by virtue of a change in the variable upon which the group was selected. For example, if a group is made up of students in the General Management Program Version 2, any student who is enrolled in that version of the program is automatically a member of the group. A student who leaves the pro-

gram is automatically removed from the group. A dynamic group can be changed to a manual group, but once you save it as a manual type, it cannot be changed back to dynamic.

An "Allow Dynamic Groups" option is available in the System setup parameters. If you select **No** for this option, the program will make the Dynamic student group type unavailable when creating new groups. On the Student Groups maintenance form, if the Allow Dynamic Groups option is **No**, the program does not allow the group type to be changed to dynamic. It will display a message, "Dynamic Groups have been disabled by the system administrator". If you select **Yes**, the program will function as described above.

Static Group

A **Static** group is one that once created can be "refreshed" from time to time by clicking **Refresh**. A static group can be changed to a Manual group, but once you save it as a Manual type, it cannot be changed back to Static.

Frozen Group

A **Frozen** group is one that once created cannot be updated. This type of group can be used when you want to compile a list of students that will never change. The students meet a certain criteria on a given date and the members of the group must be retained indefinitely. For instance, you might want a list of students who started on a given date. No one else can qualify for the group except the students who actually started on the given date and you want to track them for some time into the future.

Note the distinction between "Frozen" and "Not Active". A Frozen group is still available for use in the purpose for which it was created. A group that is not Active is no longer available for use.

Manual Group

A **Manual** group is created and maintained by the user. The user can include or remove students from the list at will. You as the user might create an initial list for the group by running a report and then add or remove students from the group as required.

Group Type Change Warning

If you attempt to add or delete a student in a dynamic, static, or frozen group, the program will display a verification message indicating that removing the student from this group will convert the group type to manual. Click **Yes** to continue, **No** to stop the process.

If you answer **Yes** to this message, the group is converted to a **Manual** group type. It no longer behaves as an automatically controlled group type.

Add a Manual Group

To add a manual group:

1. Navigate to **View** > **Student Groups**. The Student Groups form is displayed.
2. Click **Add**.
3. Type a name for the group in the **Group Name** text box.
4. Your name will appear on the **Owner** text box as a default. You can select another name from the drop-down list if necessary.
5. To make the list available to other users, be sure that **Public** has a check mark in the box. The default is to make the group public.
6. To make the list active, be sure that **Active** has a check mark in the box. The default is to make the group active. Additionally, to configure the student groups for Portal filter, the Active check box on the Student Groups

form must be selected.

7. Click **Save** to save the new group. It will be added to the list.

Note: The group is automatically designated as a "Manual" group.

Delete a Group

Only the owner of the group can delete it from the list of groups.

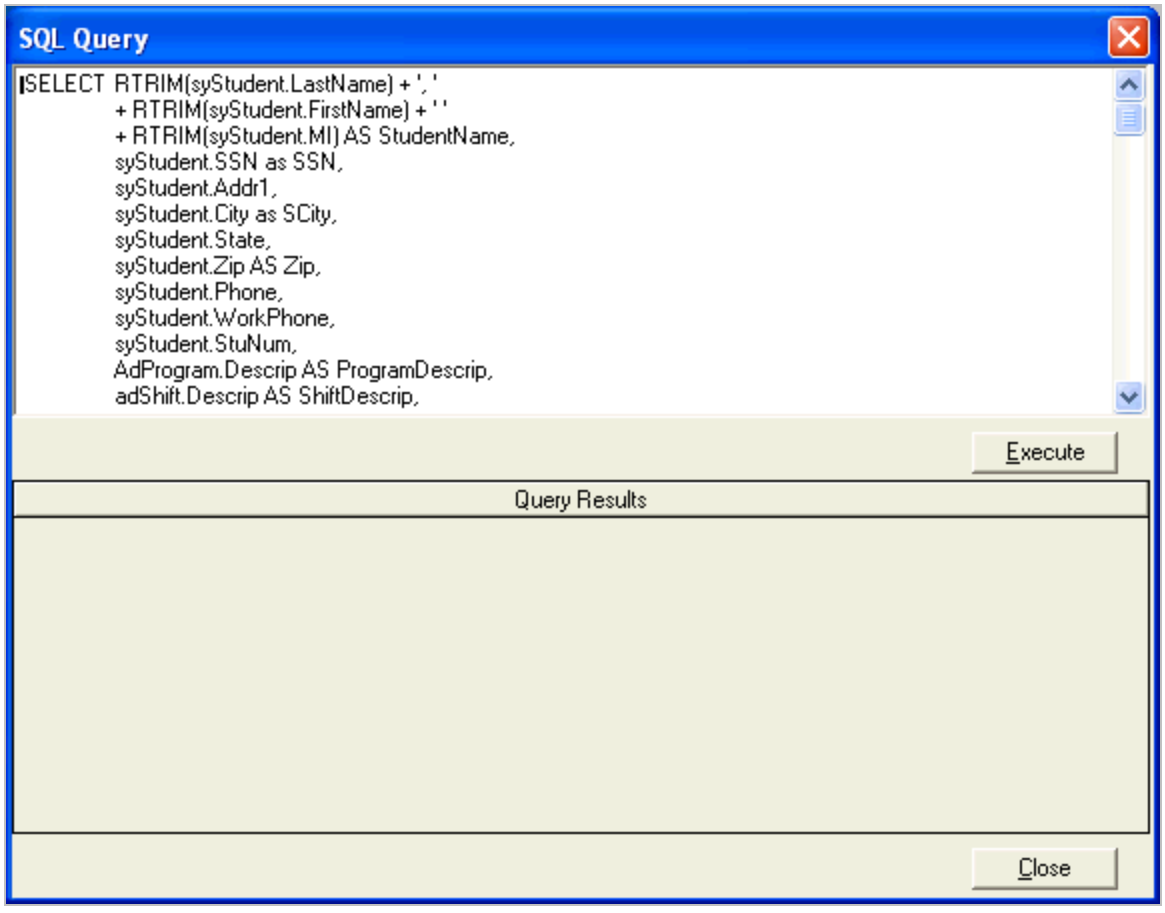
Note that deleting a student group does not remove the students in the group from the CampusNexus Student database. Deleting a student group simply dissolves the symbolic relationship of the students in the group.

To delete a group:

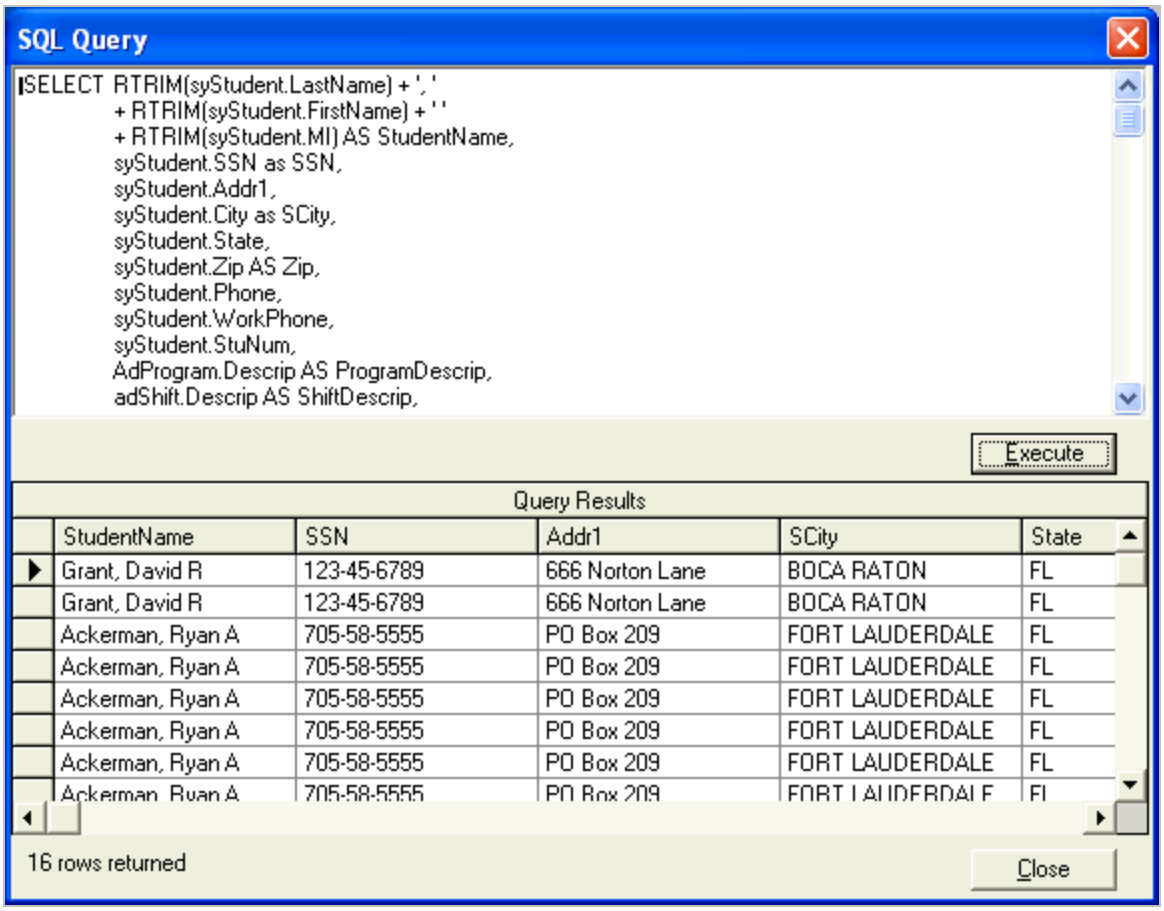
1. Navigate to **View** > **Student Groups**. The Student Groups dialog is displayed.
2. Select (highlight) the group to be deleted.
3. Click **Delete**. Confirm your intention to delete the group.
4. Click **Yes** to confirm the deletion.

View SQL

If you select a group and click **View SQL**, you can see the SQL statement used to create the group.



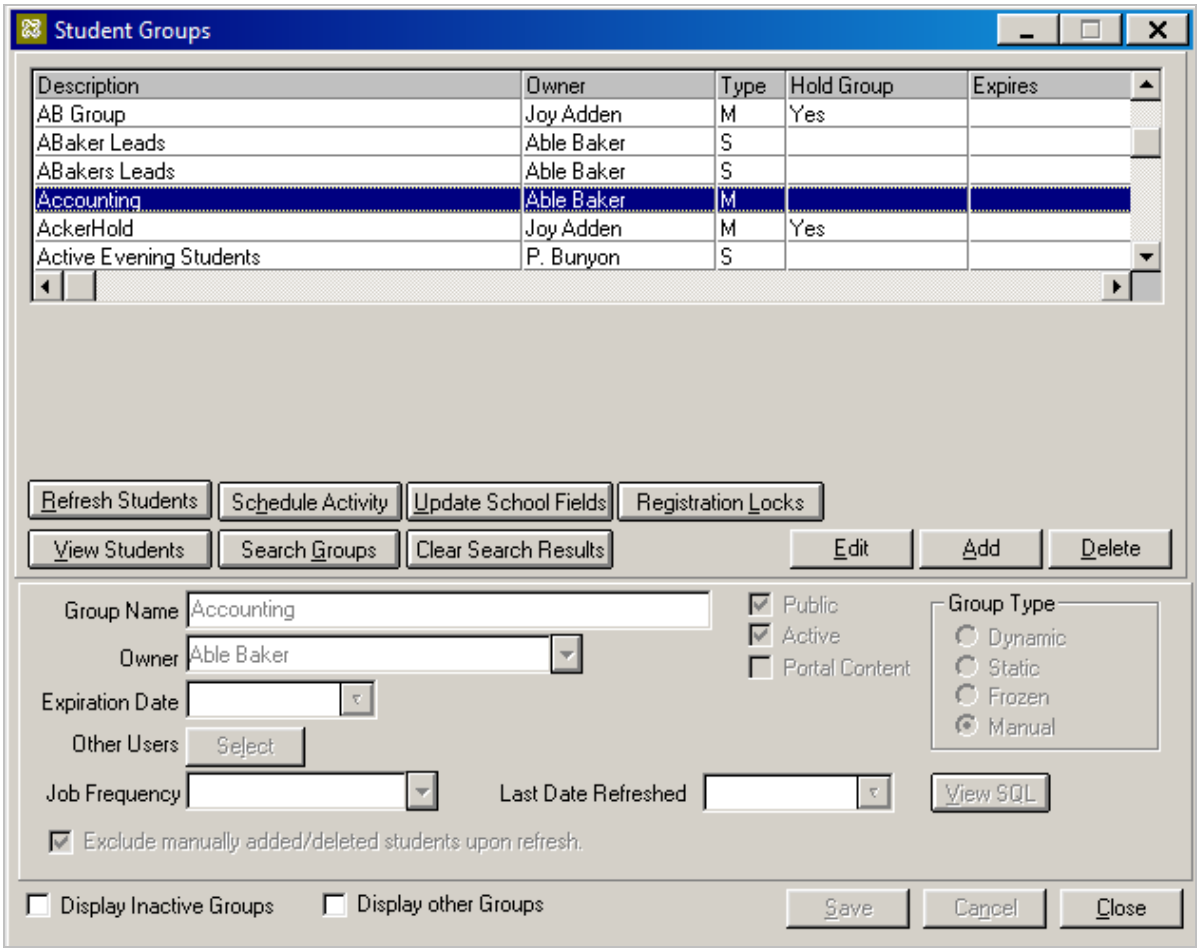
Click **Execute** to execute the query. The **Query Results** form shows all students who are members of the group and detailed information about each.



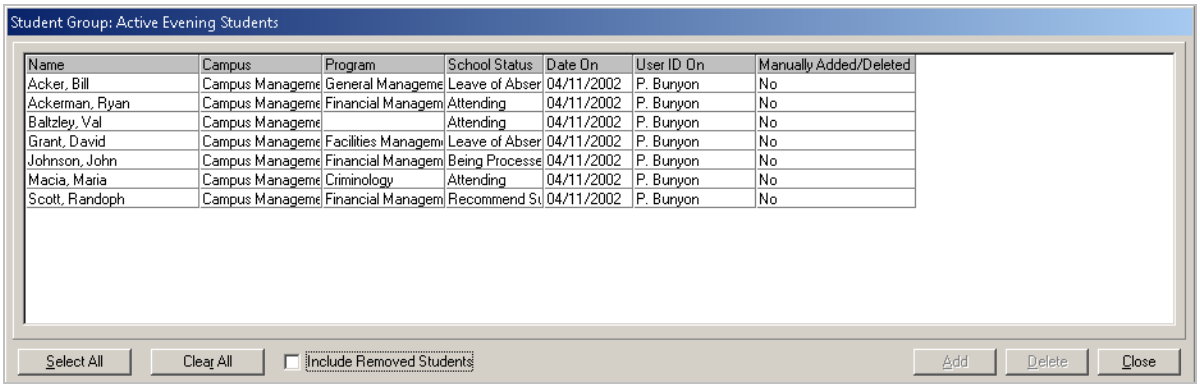
View Students

To see a list of the members in a student group:

1. Navigate to **View** > **Student Groups** (or click the icon on the Toolbar). The Student Groups form is displayed.



2. Select the Student Group for which you want to view the included students.
3. Click the **View Students** button. The Student Group form with members of the group is displayed.



The form could be confusing when it lists students having multiple enrollments. A student could be active in one enrollment and dropped or graduated from another enrollment. The column header that lists the "School Status" is showing the student's status in school (most recent status) as opposed to the student's status in the listed program (i.e., enrollment). In the illustrated example, the student David Grant was added to the list because he was "Dropped" from the "Facilities Management" program but he is shown as "Active" because he is active in another program.

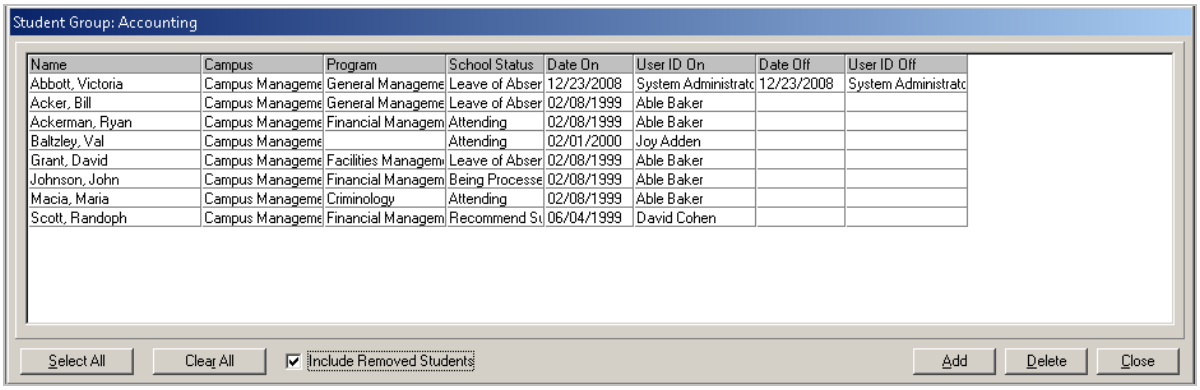
The **Date On** and **User ID On** columns indicate when, and by whom, the student was added as a member of the group.

The **Manually Added/Deleted** column shows you which students were added or deleted manually, as opposed to automatically by the system; this column is only applicable for group types other than Manual.

The **Add** and **Delete** buttons apply if the list is a manual list. If you attempt to add or delete a student in a dynamic, static, or frozen list, warning messages appear about changing the group to a manual group.

Use the **Select All** and **Clear All** buttons to assist you in selecting/clearing students in the list. You may also use the Shift and Ctrl keys for multi-selection.

If the **Include Removed Students** check box is selected, then the two additional columns **Date Off** and **User ID Off** become visible, allowing you to see when, and by whom, those students were removed from the group.



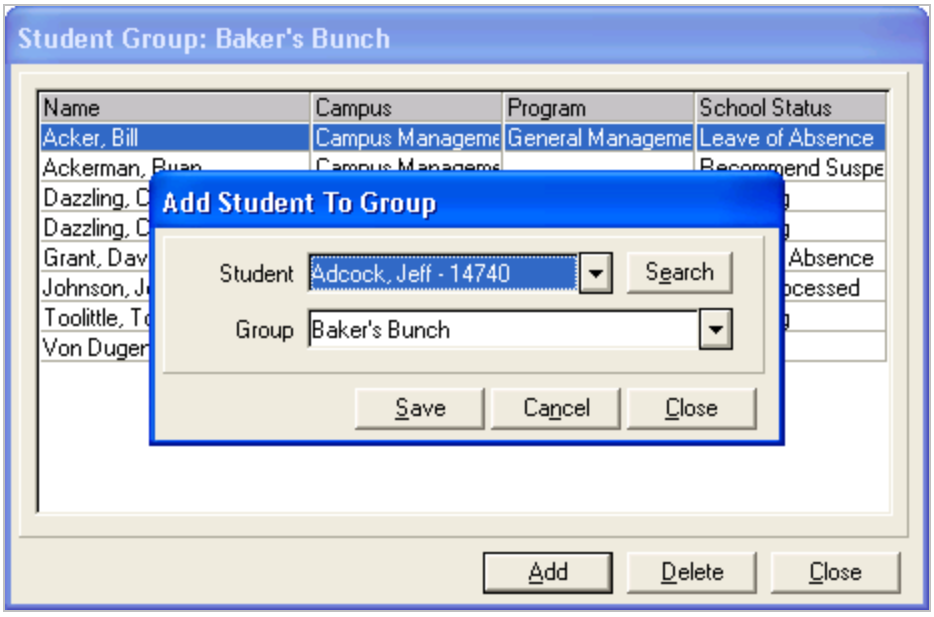
4. Click **Close** to close the form.

Add a Student to a Group

You can manually add students to dynamic, static, and frozen group types; however, CampusNexus Student will warn you that the group will be converted to a manual group type if you do so. A dynamic group is automatically maintained as students meet the necessary criteria for inclusion or exclusion. A static group is maintained when the owner chooses Refresh on the Student Group form. A frozen group is intended to remain unchanged indefinitely. If you add a student to any of these automatically controlled group types, you defeat the purpose of the group.

To add a new student to a manually maintained group:

1. Navigate to **View** > **Student Groups**. The Student Group form is displayed.
2. Select a group and click **View Students**. The list of group members is displayed.



3. Click **Add** to add a new member to the group. The Add Student to Group form is displayed.
4. Select a student from the **Student** list or click **Search** to find the student (or students) to be included in the group.
5. If the group name is not shown in the **Group** text box, select it from the list.
6. Click **Save** to complete the addition of the student to the group.
7. Add Student to Group form: Click **Close** to close the form.
8. Student Group: Click **Close** to close the form.

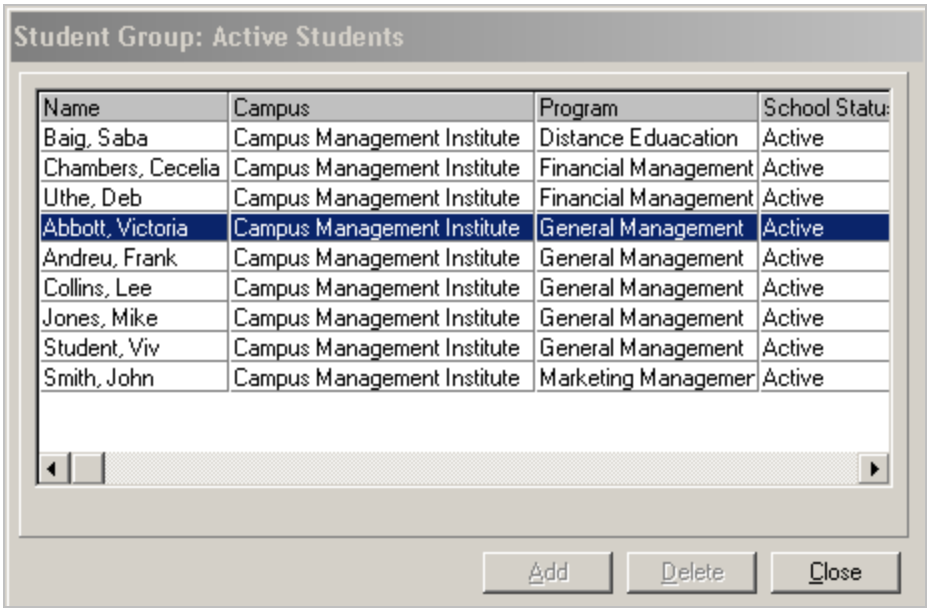
Remove a Student from a Group

A dynamic group is automatically maintained as students meet the necessary criteria for inclusion or exclusion. A static group is maintained when the owner chooses Refresh on the Student Groups form. A frozen group is intended to remain unchanged indefinitely. If you remove a student from any of these automatically controlled group types, you defeat the purpose of the group.

Note: While it is possible to manually remove students from dynamic, static, and frozen group types, the program will warn you that the group will be converted to a manual group type if you do so.

To remove a student from a manually maintained group:

1. Navigate to **View** > **Student Groups**. The Student Groups form is displayed.
2. Select a group from the list, then click **View Students**. The list of group members is displayed.



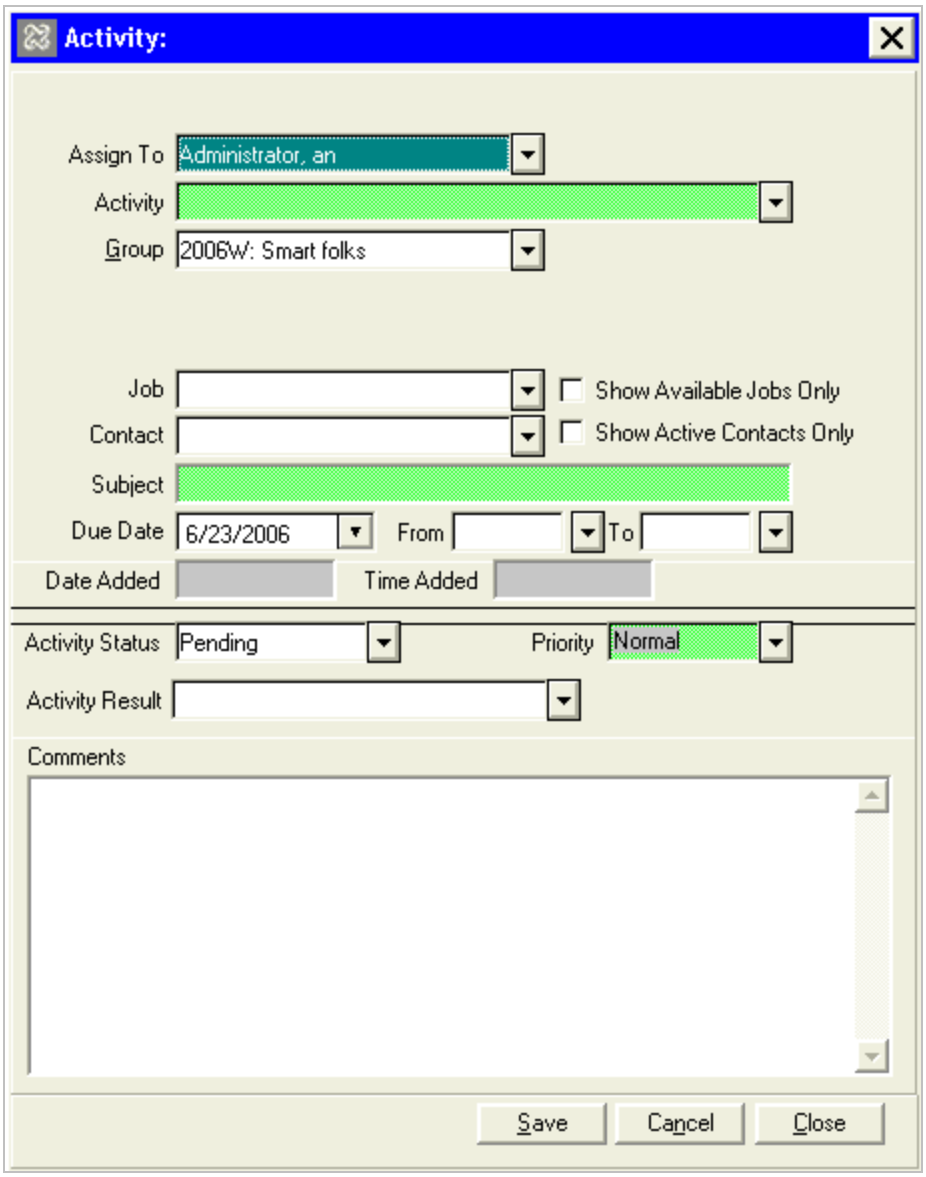
3. Select a student on the list.
4. Click **Delete**. A confirmation message is displayed asking if it is OK to remove the student from the group.
5. Click **Yes** to remove the student from the group, or click **No** to cancel the deletion of the selected student from the group.
6. Click **Close** to close the form that lists the student members of the group.
7. Click **Close** again to close the Student Groups Form.

Add a Group Activity

By selecting a group from the list of groups and then selecting Schedule Activity, you can assign the same activity to all students in the group. The activity you want to assign must already be available as an option on the possible activities list.

To add an activity to a group:

1. Navigate to **View > Student Groups**. The Student Groups form is displayed.
2. Click the name of a group to select it.
3. Click **Schedule Activity**. The Group Activity form is displayed. See also Activity form.



4. Check that the correct **Group name** is shown on the form. If it is not, select the correct one from the list.
5. Select an **Activity**. The description of the activity also appears in the Subject text box, but you can change the

subject if necessary.

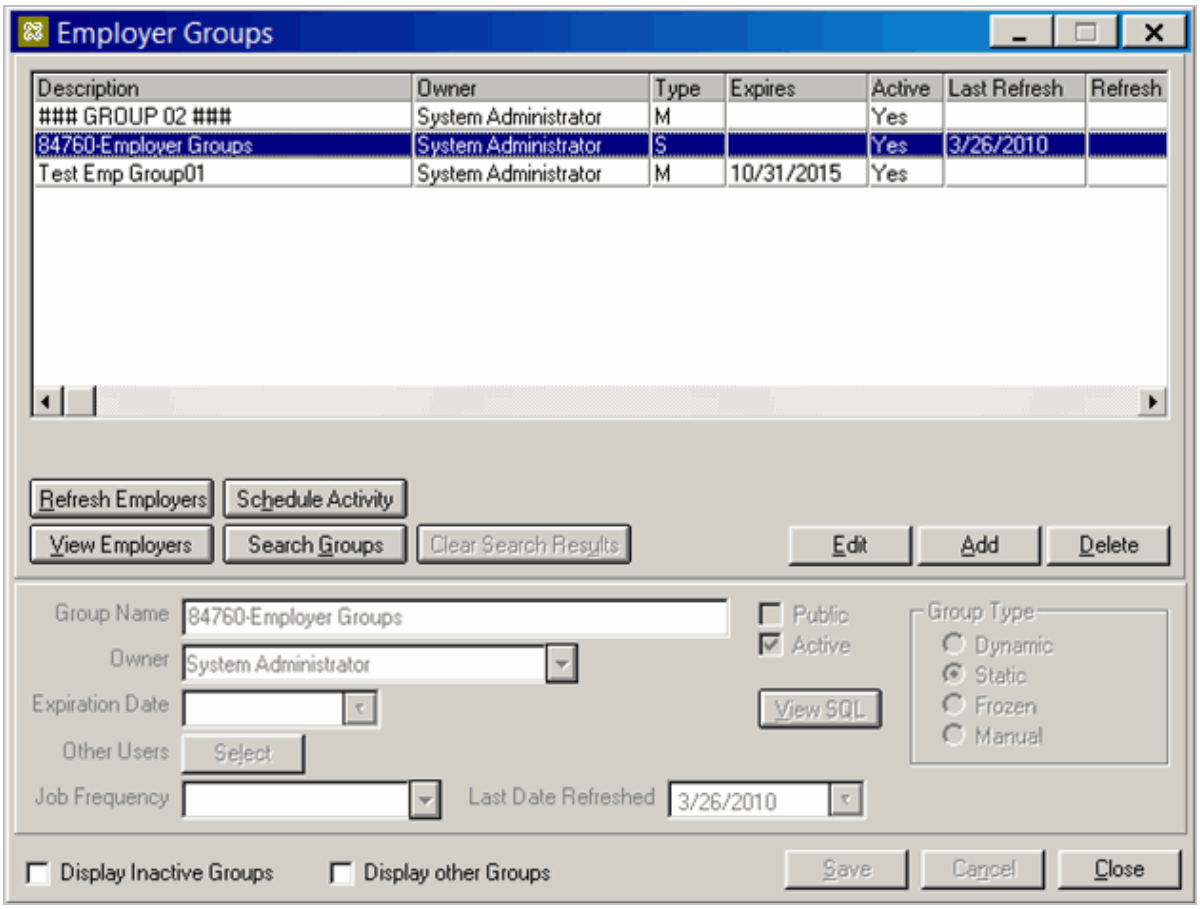
6. Select the **Due Date**.
7. If necessary, select the **From and To** times.
8. Select the appropriate **Status** of the activity.
9. Select the appropriate **Priority** of the activity.
10. Enter any necessary **comments** in the large text box.
11. Click **Save** to save the activity and apply it to all members of the group. The Group Activity form is closed.

Employer Groups

Groups serve to organize a list of employers who have one or more characteristics in common. They may all be related to a particular field of study, offer only part-time or intern/extern jobs, or just about anything else you can think of.

When you select an employer from the Employer Group list, the View Employers, Schedule Activity, and Search Groups buttons become available to use.

Select the **Display Inactive Groups** check box if you only want to see a list of Inactive Groups or select the **Display other Groups** to only see a list of other Groups.



An employer group can be created in the following ways:

- Through lists of employers on a report
- Through a search of employers
- By manually adding a new group and selecting employers to be members of it

The process of creating an employer group via a report is described in "Employer Report Preview". See also Employer Search for creating an Employer Group via the Employer Search process.

Creating a Employer Group from a Report

Only authorized users may create an Employer Group from a Report. Authorization may be established by setting the Allow Dynamic Groups option to "Yes" for the staff member. See System settings for additional information.

The process of manually creating an Employer Group is described later in this topic.

Only authorized users may view/edit/add/delete/ or print Employer Groups. See System settings to set up these permissions.

You can view the list of employers who are members of a group, add employers to a group, and remove employers from a group. You can schedule activities for the members of the group as a whole. (To schedule an activity for an individual member of the group, you must do so through the Daily > Career Services > Employers > Activities button path.)

A group is "owned" by the user who creates it. Ownership can be transferred from one owner to another. Once ownership of a private group is transferred, the previous owner no longer has the right to see the group.

A group can be Public or Private. A public group can be viewed and edited by persons other than the one who created the group. A Private group can be viewed and edited only by the person who created it, or those authorized to do so by the group's creator. A group that is formed by saving a search or running a report is typically designated as Private (not Public) until the owner intentionally sets it to be Public. A manually created group defaults to Public. The person creating the group must clear the Public option if necessary to keep it private.

A group can be active or inactive as required by the owner.

Adding and Deleting Group Members

If the group is a manual group type and it is "Public", any user with appropriate access rights can add and delete employers. Only the owner of a Private group or the system administrator can perform maintenance, such as adding and removing employers.

The owner of a Private group or the system administrator can add or delete staff members who have access to that group. When the Public check box is disabled, the Other User **Select** button becomes available. Clicking **Select** displays the **Student Group Staff** form.

Note: Additional users can only add/remove employers from the group from the employer's **View** menu, not from their **Manage Student Groups** form.

The authorized user can search for staff members and add them to the list of Selected Staff for the group. The **Search** button becomes available when the user enters data in any of the search criteria fields or selects a Staff Group from the drop-down list.

Check the **Display Inactive Groups** box at the bottom of the form to view inactive groups. The default view lists only employer groups that are active.

Check the **Display other Groups** box at the bottom of the form to view public groups not owned by the logged in user. The default view lists all employer groups that the logged in user owns or has been given permission to edit.

Group Types

Group types can be **dynamic**, **static**, **frozen**, or **manual**. Dynamic, static, and frozen groups are typically formed by saving the results of a search or a report. These group types can be changed from one type to another, including manual. The manual type, however, cannot be changed to any of the other types since there are no automatic parameters involved.

Dynamic Group

The list of employers in a dynamic group changes when an employer qualifies for the group by virtue of a change in the variable upon which the group was selected. For example, if a group is made up of employers in the General Management Program Version 2, any employer who is enrolled in that version of the program is automatically a member of the group. A employer who leaves the program is automatically removed from the group. A dynamic group can be changed to a manual group, but once you save it as a manual type, it cannot be changed back to dynamic.

An "Allow Dynamic Groups" option is available in the System setup parameters. If you select No for this option, the program will make the dynamic employer group type unavailable when creating new groups.

On the Student Groups maintenance form, if the Allow Dynamic Groups option is **No**, the program does not allow the group type to be changed to dynamic. It will display a message, "*Dynamic Groups have been disabled by the System Administrator*". If you select **Yes**, the program will function as described above.

Static Group

A static group is one that once created can be "refreshed" from time to time by clicking **Refresh**. A static group can be changed to a Manual group, but once you save it as a Manual type, it cannot be changed back to Static.

Frozen Group

A frozen group is one that once created cannot be updated. This type of group can be used when you want to compile a list of employers that will never change. The employers meet a certain criteria on a given date and the members of the group must be retained indefinitely. For instance, you might want a list of employers who started on a given date. No one else can qualify for the group except the employers who actually started on the given date and you want to track them for some time into the future.

Note the distinction between "frozen" and "not active". A frozen group is still available for use in the purpose for which it was created. A group that is "not active" is no longer available for use.

Manual Group

A manual group is created and maintained by the user. The user can include or remove employers from the list at will. You as the user might create an initial list for the group by running a report and then add or remove employers from the group as required.

Group Type Change Warning

If you attempt to add or delete an employer in a dynamic, static, or frozen group, a verification message is displayed indicating that removing the employer from this group will convert the group type to manual. Click Yes to continue, No to stop the process.

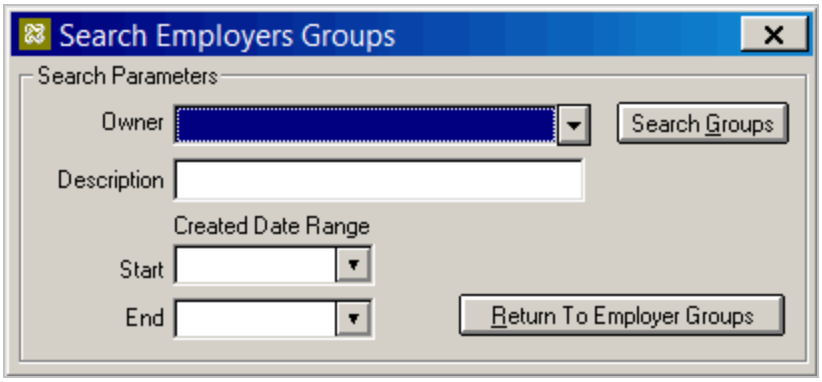
If you answer **Yes** to this message, the group is converted to a Manual group type. It no longer behaves as an automatically controlled group type.

View Employers

Click View Employers to add an existing Employer to a Group. The Employer Group form will appear.

Search Groups

Search for Employer Groups by clicking on Search Groups. The Search Employer Groups form is displayed. Enter your search criteria and click on **Search Groups**. You are returned to the Employer Groups form and a list of Employer Groups meeting the search criteria that you entered is displayed.

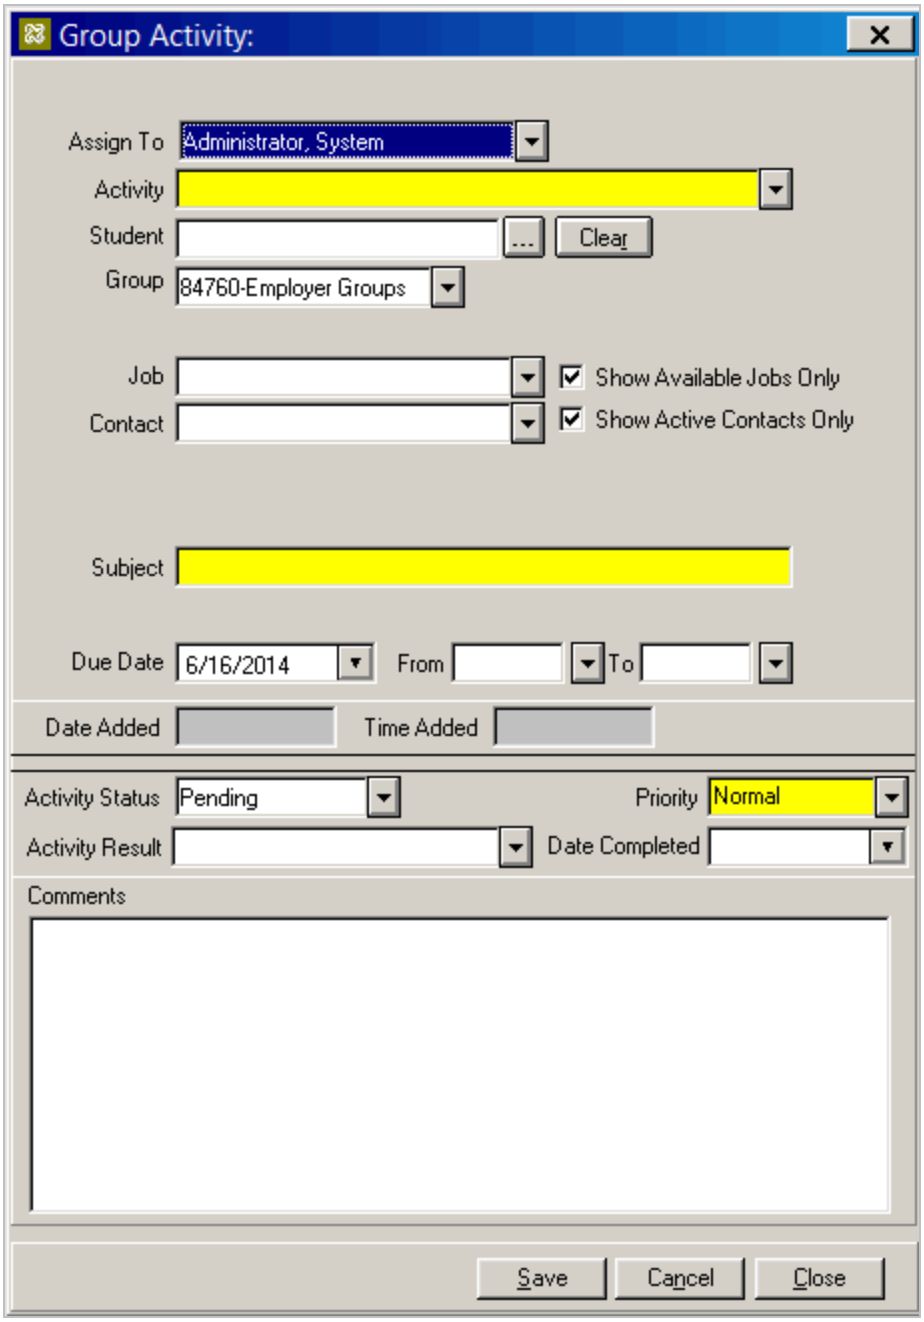


Clear Search Results

Click **Clear Search Results** to clear the search results and begin a new search. Upon clicking this button, the Search Groups button will become available.

Schedule Activity

Click the Schedule Activity button to schedule an activity for the Employer Group. The Group Activity form will appear. Select an activity from the **Activity** drop-down list and enter a subject in the **Subject** line. Click the **Save** button to save the scheduled activity.



Adding a Manual Group

To add a manual group:

1. Navigate to **View > Employer Groups**. The Student Groups form is displayed.
2. Select **Add**.
3. Type a name for the group in the **Group Name** text box.
4. Your name will appear on the **Owner** text box as a default. You can select another name from the drop-down list if necessary.
5. To make the list available to other users, be sure that **Public** has a check mark in the box. The default is to make the group public.
6. To make the list active, be sure that **Active** has a check mark in the box. The default is to make the group active.
7. Click **Save** to save the new group. It will be added to the list.

Note: The group is automatically designated as a "**Manual**" group.

Deleting a Group

Only the owner of the group can delete it from the list of groups.

Deleting an employer group does not remove the employers in the group from the CampusNexus Student database. Deleting an employer group simply dissolves the symbolic relationship of the employers in the group.

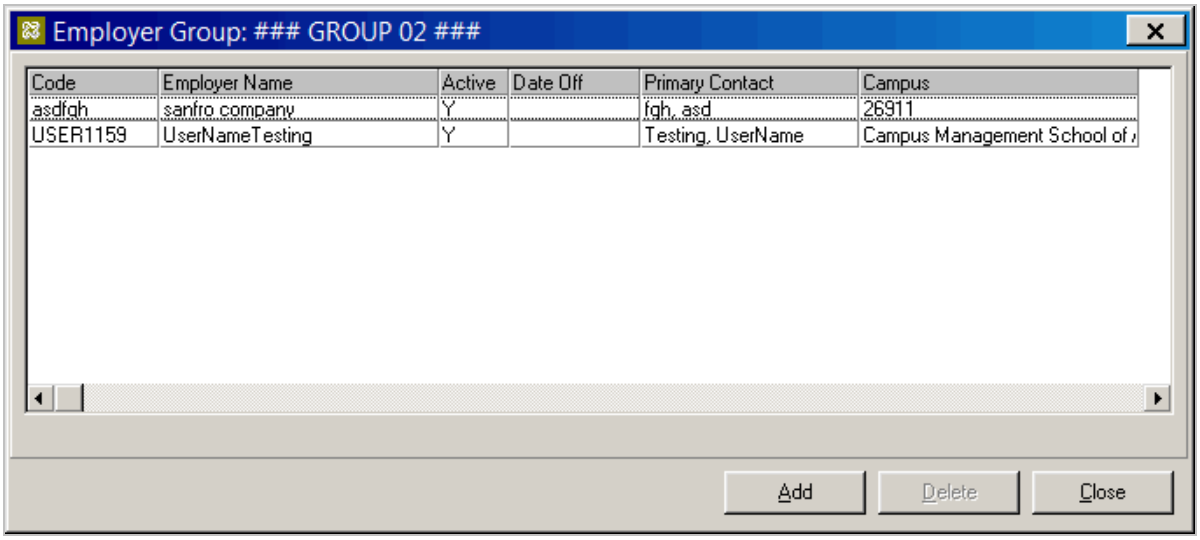
To delete a group:

1. Navigate to **View > Employer Groups**. The Student Groups form is displayed.
2. Select (highlight) the group to be deleted.
3. Click **Delete**. Confirm your intention to delete the group.
4. Click **Yes** to confirm the deletion.

View Employers

To view a list of the members in an employer group:

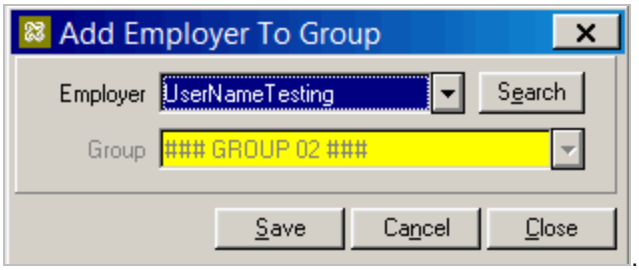
1. Navigate to **View** > Employer Groups (or click the Employer Groups icon or the View Groups for this Employer icon on the Toolbar). The Employer Groups form is displayed.
2. Select an Employer Group and click **View Employers**. The Employer Group form is displayed listing members of the group.



3. Double-click an employer in the grid to view the contact information on the Employers form.

Adding an Employer to an Employer Group

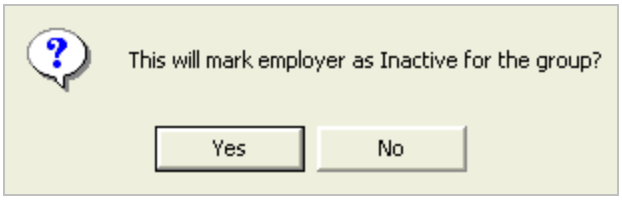
4. If you are authorized to add an employer to an employer group, click **Add**.
5. On the Add Employer to Group form, select a Employer from the drop-down list.



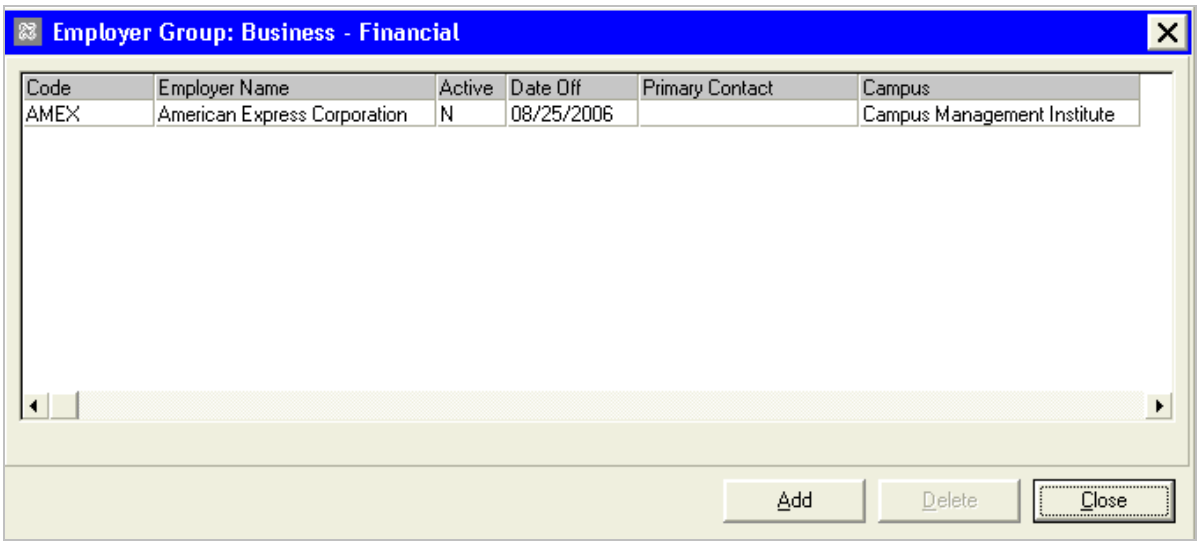
6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Deleting an Employer from an Employer Group

4. An authorized user can remove an employer from an employer group by clicking **Delete**.
5. A following warning message will appear. Select **Yes** to continue, otherwise select **No**.



6. An 'N' will be placed in the Active column of the employer and the 'Date Off' column indicates the date when the employer was removed from the group.



7. Click **Close** to close the form.

Note: If you attempt to add or delete an employer in a dynamic, static, or frozen list, a warning message is displayed about changing the group to a manual group.

Employer Report Preview

When you have selected the appropriate parameters from the Report Selection form, click **Preview** to see a preview of your report.

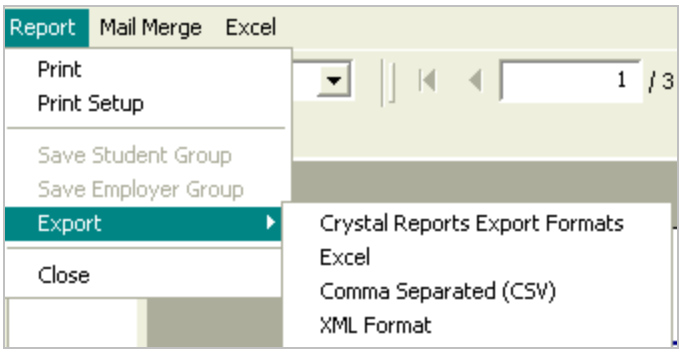
Our example is the Employer Master Listing report from the Career Services reports list.

Report Viewer Controls

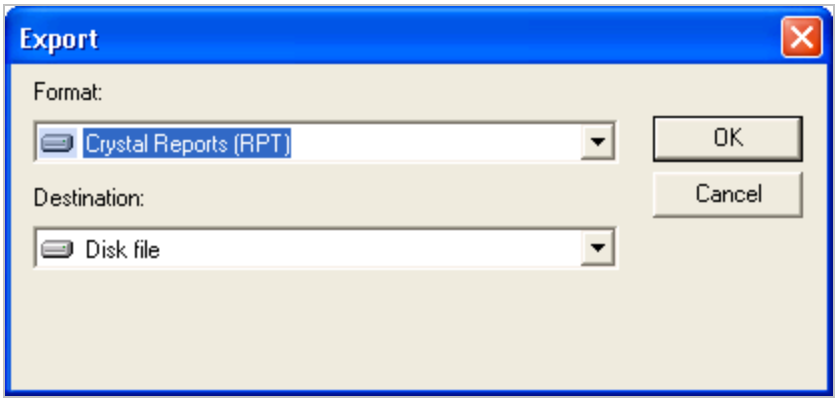
Report Menu. The Report menu on the Report Viewer form provides for printing the report, printer setup, exporting the report to other applications such as Excel, and closing the viewer window.

- **Print**. Select the print option when you are ready to print the report. A print tool is also provided at the top of the form.
- **Print Setup**. The Print Setup option calls the typical Windows printer setup form from which you can select a printer, set the number of copies to be printed and other reporting functions.
- **Save Employer Group**. If the internal Campus ID and internal Employer Id are contained in the record set for the report, you can save the employers listed on the report as a group. Select this option and give your group a name.

  The new employer group is initially saved as a "Static" group, meaning that there will be no change in the members of the group. You can, however, open the group via **View > Employer Groups** and change the group type to Dynamic, Frozen, or Manual. See the Employer Groups topic for more on this procedure.
- **Export**. If you select the Export option, the report selection dialog opens.



- With each report selection you can then select the format and destination of your report. Several options are available for both **Format** and **Destination**. Click **OK** after you make your selections.



- **Close**. Select Close to close the report preview. You can do this before or after you print the report. The program will return to the Report Selection form.

Mail Merge

When you click the Mail Merge option, all letter activities are listed as options. You can select one with which to merge the data on the displayed report.

When you select to use the Mail Merge feature, you can run the selected report, use the Merge tool to combine and print letters, and update the employer's activity record after processing the letter, if you so choose. The system will prompt you with a dialog box asking if you would like to update the Contact Manager. If you select 'Yes', then the employer's Contact Manager history will be updated after the Mail Merge from the reports.

Excel

This option exports the data on the report to an Excel spreadsheet. This feature appears on every report. The export procedure uses column names for headings. A maximum of 65,000 rows can be exported. Sub-reports are not exported.

Navigation Tools

At the top of the Report Viewer form, there is a set of navigation tools to help you maneuver in a multi-page report. By clicking the appropriate tool, you can go to the first page of the report, the next page, the previous page, and the last page.

Report Views The report viewer provides a method of narrowing your view of the previewed report. By double-clicking on a report heading or sub-heading, you can open a view containing only that heading and the data below it. When you open a view of a heading, the program creates a view tab at the top of the report. You can alternate between views until you get the information you require. You can also print only a selected view of the report.

Close Current View. Click on the view to be closed and then click to close it.

Group Tree. On the left side of the Report Viewer is a control known as the Group Tree. It is used to drill down to specific portions of your report. It is more significant in long reports and in those that have more than one or two groups. Click on the plus and minus boxes beside the group names to expand or contract the tree list. Click on a tree item to go to that portion of the report.

Toggle Group Tree. Use this tool to show or hide the Group Tree. To see more of the report page in your viewer window, hide the Group Tree by clicking this tool. Click it again to bring back the Group Tree.

Report Size. Use this tool  to size the image of the report to a convenient viewing size. Select one of the options from the drop-down list or specify your own percentage value.

Text Search. Find the text you need in the report preview by typing it in the Text Search box and clicking the binoculars. The program will find the first occurrence of the text in the report. If you click the binoculars again, it will find the next occurrence, and so on. Your search text entries are saved in a list so that you can go back to them by clicking the arrow beside the text box. When you close the report, your search entries are discarded.

Changing System Administrator Session Parameters

Properly setting Session Parameters for the institution's campus, term, FA year, and module can reduce the amount of time it takes for a user to navigate to the features they use most and assist users who need to see forms that may change every year.

An authorized user can view and change the System Administrator Session Parameters:

1. Navigate to **View > Session Defaults** or double-click on the campus code on the bottom task bar. The System Administrator Session Parameters form is displayed, showing only options that the user has permissions to change.
2. Select the Campus, Term, FA Year that CampusNexus Student defaults to when opened. The Term, FA Year and Module (default module that opens after sign on) can be set to None or no default. The Campus must be chosen. **Note:** If a Module is selected, the Document Tracking form for a student displays a grid showing only documents associated with this module.
3. Select **Show this screen every time CampusNexus Student starts** to see this form at the start of every session.
4. If a user signed in using a CampusNexus Student database password, the Change Password button can be clicked. This is the only way that the "Administrator" account user can change the sign on password. Click **Change Password**, and the User Password Change form is displayed. Type the Old Password int he appropriate field and then type a new password in the other two fields. Click **Save**, or click **Cancel** to cancel changes.
5. Click **Save**.

Important: There is no way to cancel any changes that have been made to this form. To revert to options that existed before the form was changed, change the options back and then click Save or close the form.

Menu Bar

The CampusNexus Student Menu Bar is essentially the gateway to the program. What you see on your Menu Bar may vary from the illustration here depending on your work assignments. Access to all menu commands in CampusNexus Student is controlled by the security features built into the system. See your supervisor or system administrator if you need access to additional CampusNexus Student menu commands.

Some commands on the drop-down menus may be "dimmed". This indicates that the command is unavailable (not active) at the time you are viewing it. A "dimmed" option may become available at some other time depending on conditions that change from moment to moment during program operations.

- To open the menus from the Menu Bar, point to the menu name with your mouse and click the left mouse button. You can also use your computer keyboard to access the menus by holding down the Alt key and pressing the underlined letter in each menu name (for example the F in File). This is referred to as the "access key". Note that when two menu names on the menu bar -- or two commands on a menu -- begin with the same letter (e.g., File and Find), the first letter of the word is not always used as the access key. The access key for Find is the Alt I combination. (Uppercase and lowercase are not important in this context.)
- When you select a menu command, a submenu is displayed in some cases. Note that many commands on the various submenus also have access keys associated with them. When you learn to use these key combinations, you can minimize your use of the mouse and speed up your work.

Menus on the CampusNexus Student Menu Bar

File: This menu includes commands for adding a new lead, creating new records for various forms, editing displayed records, saving edited data, canceling an edit operation, closing the active window, refreshing the active form, deleting a record, printing a picture of your screen, setting up printer options, and exiting from the CampusNexus Student program.

Find: Select this menu to find an individual student or group of students.

View: This menu enables you to view and edit the information related to individual students in the CampusNexus Student system. Commands are grouped into departmental submenus. Generally, the commands that are available on the View menu correspond to the groups of folders accessible from the Student Bar.

Note: On the Student Bar, It is possible to "drag" a folder from one group to another. It is also possible to rearrange the folders by "dragging" them within a given group. These user actions will create differences between the commands on the View menu and the group folders on the Student Bar. Because these are user choices, Help topics will always refer to the commands on the View menu and submenus, which cannot be changed by a user, rather than to the folders and groups arranged on the Student Bar.

The View menu also includes a command you can use to see and edit your session defaults: the Campus, Term, and FA year with which you are working. The defaults will remain set until you change them here, even if you sign out and sign in again.

On the View menu, you can elect to see or hide the Student Bar, Recent Student Bar, and Status Bar.

Lists: The Lists menu is used to set up the many options used by your institution to control your daily operations. The lists are organized by department. When you select a department, a form is opened containing the lists for that department. Each list is represented by a tab on the form. Each departmental list is further described in a Help topic. General list maintenance procedures can be found in Lists Menu > List Maintenance.

Daily: The Daily menu refers to functions that are performed frequently during everyday operation of your college, school, or campus. Again, the menu is organized by department. Each department has a submenu of commands associated with its own daily procedures.

Reports: The Reports menu is also organized by departments. Each department has a list of reports that are relevant to the work it does.

Other commands on the Reports menu include:

- **Custom Reports**: This command invokes a listing of customized reports designed specifically for your campus.
- **Open Report Selector**: This command opens a form on which all reports, including custom reports, are listed by module.

Window: This menu lists the windows that are currently open in the CampusNexus Student. Since CampusNexus Student can have many windows (forms) open at the same time, the menu listing is constantly changing as you open and close windows. On the list of open windows, the active window is indicated by a check mark to the left of the window name.

This menu also includes commands for arranging windows in the work area in tiled format or in cascaded format.

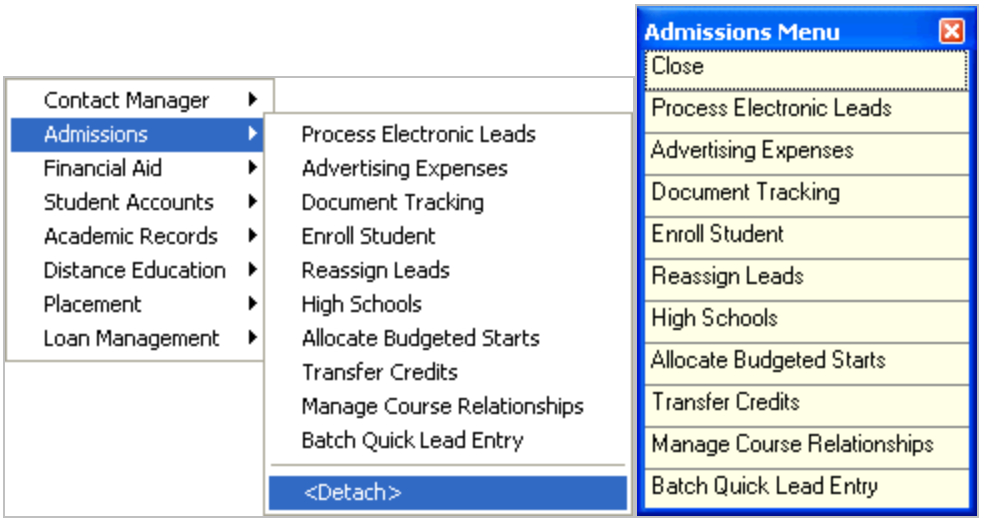
Setup: The Setup menu is available to users with CampusNexus Student system administrator (SA) privileges for the control of system parameters such as Campus and Staff Member identification, system-level settings for the various modules, security issues, access to the data dictionary, and other functions that may be added to the system.

Through appropriate management of security settings, specific menus and commands can be made available to users not having overall SA authority. For instance, the Financial Aid Administrator may be given access to Setup > Financial Aid.

Help: The Help menu lists the various options available to you for getting help with CampusNexus Student.

Detaching Submenus from the Daily Menu

Most modules accessible from the Daily menu include a **<Detach>** command on their submenus. This feature enables you to "detach" the submenu so that it remains on the screen at all times. This prevents you from having to select **Daily > Module > Command** each time you want to repeat an option.



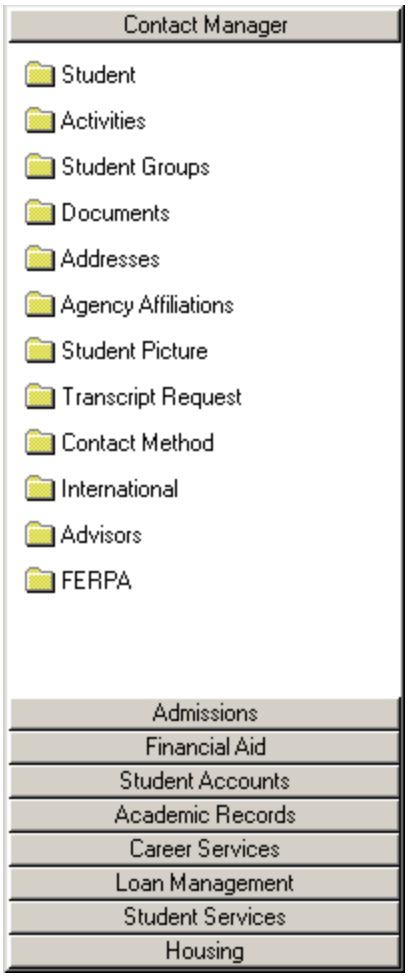
To detach a submenu for a module listed on the Daily menu, click the **<Detach>** command.

The list of commands will remain on the screen until you select **Close** at the top of the detached submenu or click **X** in the upper right corner of the submenu.

CampusVue Finance, HR & Payroll Launch

This feature allows a user who logged into CampusNexus Student to start CampusVue Finance, HR & Payroll without having to log in a second time. CampusVue Finance, HR & Payroll must be installed, and the end user must be given permission to access CampusVue Finance, HR & Payroll through the Centralized Security Application. If the user has the appropriate security rights, clicking the CampusVue Finance, HR & Payroll icon located at the far right of the Menu Bar will open the application.

Student Bar



The Student Bar organizes the functions in CampusNexus Student that are related to an individual student. To enable these functions, you must first select a student with which to work.

You can show or hide the Student Bar by navigating to **View > Student Bar**.

The student currently displayed in the Recent Students list box on the Toolbar is assumed to be the one you want to use.

Note that the group folders displayed on the Student Bar correspond to the options available on the View menu. If a user has no access to any commands on the View menu, the Student Bar will be cleared and the caption removed.

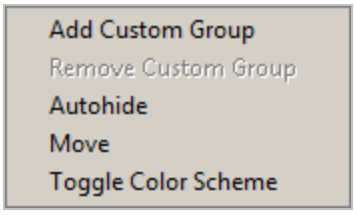
The Student Bar is organized by department. Each department contains one or more folders. Clicking a folder opens it in the work area with the student's relevant data displayed on a corresponding form.

Note: You can drag a folder from one group header to another on the Student Bar, and you can rearrange the folders by dragging them within a group header. These actions will create differences between the options on the View menu and the folders on the Student Bar. Because these are user choices, Help topics always refer to the View menu options, which cannot be changed by a user, rather than to the folders displayed on the Student Bar.

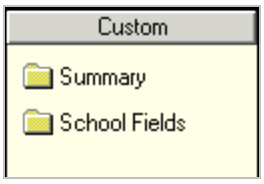
Adding a Custom Group to the Student Bar

To create a Custom group at the top of the Student Bar:

1. **Right-click** on the Student Bar. A shortcut menu appears.



2. Select **Add Custom Group**. A group header called **Custom** is added at the top of the Student Bar and the following message is displayed: *"Custom group has been added. Drag folders from other groups to your new custom group."*
3. Drag folders into the Custom group from other groups as needed.



4. To remove the Custom group from the Student Bar, right-click the Student Bar and select **Remove Custom Group**. Any folders remaining under the Custom group will be returned to the group from which they were dragged.

Autohide Student Bar

You can "autohide" the Student Bar, i.e., cause it to disappear and reappear under specific conditions.

To turn on the Autohide feature, **right-click the Student Bar** and select **Autohide** from the menu.

In Autohide mode, the Student Bar will disappear when you select an item from the Student Bar or when you move the mouse pointer more than ½ inch away from the border of the Student Bar. The Student Bar reappears when you move the mouse pointer to within ½ inch of the border of the Student Bar.

Note: Autohide does not work when a form is maximized in the work area.

More information on the items associated with the Student Bar can be found in topics related to the View menu.

Toolbar

You can display or hide the toolbar in your CampusNexus Student main window.

- If the toolbar is displayed, select **View** > **Toolbars**. The toolbar is hidden.
- If the toolbar is not displayed, select **View** > **Toolbars**. The toolbar is displayed.

Tool Descriptions

Tool	Description
Quick Lead Entry (short form)	This tool is the same as the Add New Lead command on the File menu. **Ctrl+L** also starts a new lead form.
New Lead (Student Master form) or New Employer	The New Lead tool opens the same form as the New Lead (full) command on the File menu. Click to see commands for entering a new student or employer. **Ctrl+N** also starts the Student Master form. The New Employer command opens the Employer Master form. Print	This tool sends an image of the CampusNexus Student window to the user's default printer. This is the same as the Print command on the File menu. **Ctrl+P** also prints the window.
Find an individual student, student group, or employer.	This tool opens a Search form from which you can find one or more student or employer records. Click to see commands for finding a student or employer.
Manage Student Groups	This tool opens the Student Groups form. Using this form, you can create student groups and work with groups that have been created from other procedures.
Contact Manager	This tool opens the Contact Manager form, which is also accessed by navigating to Daily > Contact Manager > Contact Manager.
Manage Employer Groups	This tool opens the Employer Groups form. Using this form, you can create employer groups and work with groups that have been created from other procedures.
Close All Forms	This tool closes all forms in the CampusNexus Student work area.

Tool	Description
Exit	This tool starts the procedure to close CampusNexus Student.
Students/Employers Switch	This tool switches the most recent window list from most recently accessed students to most recently accessed employers, or back.
Recent Students 	The Recent Students list box contains a list of students with whom you have recently worked. The number of students that appear on the list depends on a system value chosen by the system administrator. CampusNexus Student can be configured to show the student's school ID or the student's Social Security Number (SSN) beside the name in the text box. Another location for the most recent students list is on the **File** menu where the nine most recent students with whom you worked are listed. Students are added to the list of recent students when you create a new student record or when you search for a student that has already been entered in the system. (Go to the Find menu or click to search for student records.)
Recent Employers 	The Recent Employers list box contains a list of employers with whom you have recently worked. The number of employers that appear on the list depends on a system value chosen by the system administrator.
Hold Signal	If the currently selected student is on hold, this signal is red. If the student is not on hold, the signal is green. When you open the Student Master record of a student on hold, the signal turns red. A sound can also be played (.wav file). If you hover the mouse pointer over the red signal, a tooltip is displayed to indicate the type of hold involved. More than one type of hold may be indicated.
View Contact History	Select this tool to see a list of Contact Manager activities for the currently selected student.
View Student Groups	Select this tool to see a list of student groups to which the currently selected student belongs.
View Documents	Select this tool to see a list of documents requested from the currently selected student.

Tool	Description
View Addresses	Select this tool to see a list of alternative addresses related to the currently selected student.
Search Reference Addresses	Select this tool to open a search form in which you can search for students by the contents of their alternative addresses.
View Employer Groups	Select this tool access the Groups for Employer form.

Status Bar

At the bottom of the main window is the Status Bar. Helpful hints, messages, and other basic information is displayed at various times on the Status Bar.

Right Side of the Status Bar

The right side of the Status Bar displays some basic information about the program and what's happening. From the left, this information includes:

- **Add/Display/Edit Mode Indicator**: indicates ADD, DISPLAY, or EDIT mode.

  You can change data on a form when you are in ADD or EDIT mode. ADD mode occurs when you add a new record to the database.

- **User ID**: indicates the identification code of the user who is currently logged into CampusNexus Student on this computer.
- **Campus ID**: indicates the identification code of the currently selected campus.
- **Active Form**: indicates the name of the currently active form.
- **System Date**: shows the current system date.

Left Side of the Status Bar

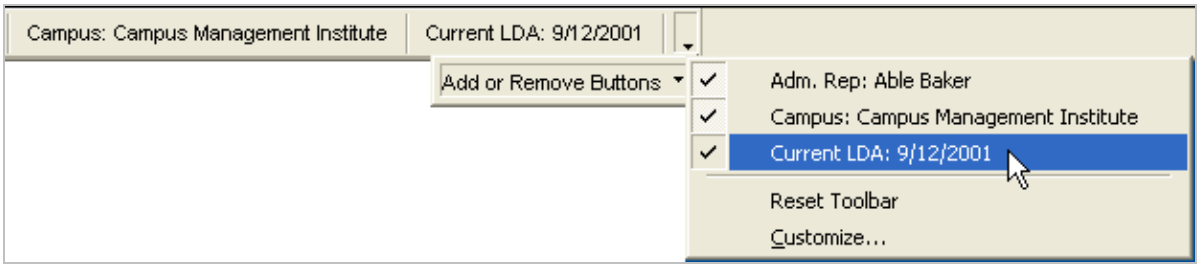
The left side of the Status Bar is reserved for messages and instructions that you will find helpful when working in CampusNexus Student. Data entry tips, messages regarding system operations, and other variable information may be displayed here at any given time. Look here first when you want to know what's happening behind the scenes.

Show or Hide the Status Bar

You can show or hide the Status Bar that is just below your work area.

- When the Status Bar is displayed, select **View > Status Bar**. The Status Bar is hidden.
- When the Status Bar is not displayed, select **View > Status Bar**. The Status Bar is revealed.

User Toolbar



The User Toolbar is customizable based on the forms you have access to and is refreshed with a change in students. These forms are represented by icons that you can specify. You can define "hanging data elements" that will always be displayed on the User Toolbar. The hanging data elements might be the SSN, Start Date, Program, and so on. The available data elements are fields associated with the Student Master record. The customize procedures are described in Customize User Toolbar.

The **User Toolbar** command on the **View** menu provides a means to toggle the User Toolbar on and off in the CampusNexus Student main window:

- If the User Toolbar is displayed, select **View** from the Main Menu, then click **User Toolbar**. The User Toolbar will be removed.
- If the User Toolbar is **not** displayed, select **View** from the Main Menu, then click **User Toolbar**. The User Toolbar will be added.

Once data items and forms are added to your User Toolbar, you can temporarily add or remove items by clicking the down-arrow button (Tooltip: More Buttons) located next to the form icons or data items. The **Add or Remove Buttons** option is displayed. Click it and slide the mouse pointer to the right to see the forms icon buttons (or data items) and other available commands.

Click a forms icon or data item to remove it from the toolbar or, if the item is not selected, click it to add it to the User Toolbar. The **Reset Toolbar** and **Customize...** options are temporary run-time functions. Any changes you make from these options are not saved when you close your current CampusNexus Student session.

Right-click the User Toolbar to display a shortcut menu on which you can open or close the Forms toolbar or the Data toolbar. The "Customize..." option on this menu makes available some temporary settings for the current session only.

User Toolbar Customization

You can configure the User Toolbar to provide customized data elements. The toolbar is customizable based on the forms you can access; the forms refresh with a change in students. You can define "hanging data elements" that will permanently be displayed on the toolbar. Hanging data elements include, for example, Social Security Number (SSN), Start Date, and Program. The available data elements are fields associated with the Student Master record. Staff members must be given permission to configure the User Toolbar. Available forms are selected, icons assigned to the forms, and description or code display options selected for the data elements, so that the staff member can view the information applied to the User Toolbar.

Display Options

In the **Display** field of the **Customize User Toolbar** form, you can select whether you prefer to view a **Description** of the icons or the **Code** associated with these icons. Click **Apply** to apply your selections to the toolbar. Or double-click any element in the **Available** grid to open the **Select Icon** form.

Data Elements

In the bottom half of the **Customize User Toolbar** form, select the **Data Element** by clicking the name of the data element, and then clicking the right double-arrow button (>>) in the middle of the dialog box. The selected data element will be moved to the right-hand text box. Click **Apply** to apply your selections to the toolbar.

Note: Only information from the most current enrollment will be presented for these hanging data elements when the student has more than one enrollment in CampusNexus Student.

Assigning Permissions to Customize the User Toolbar

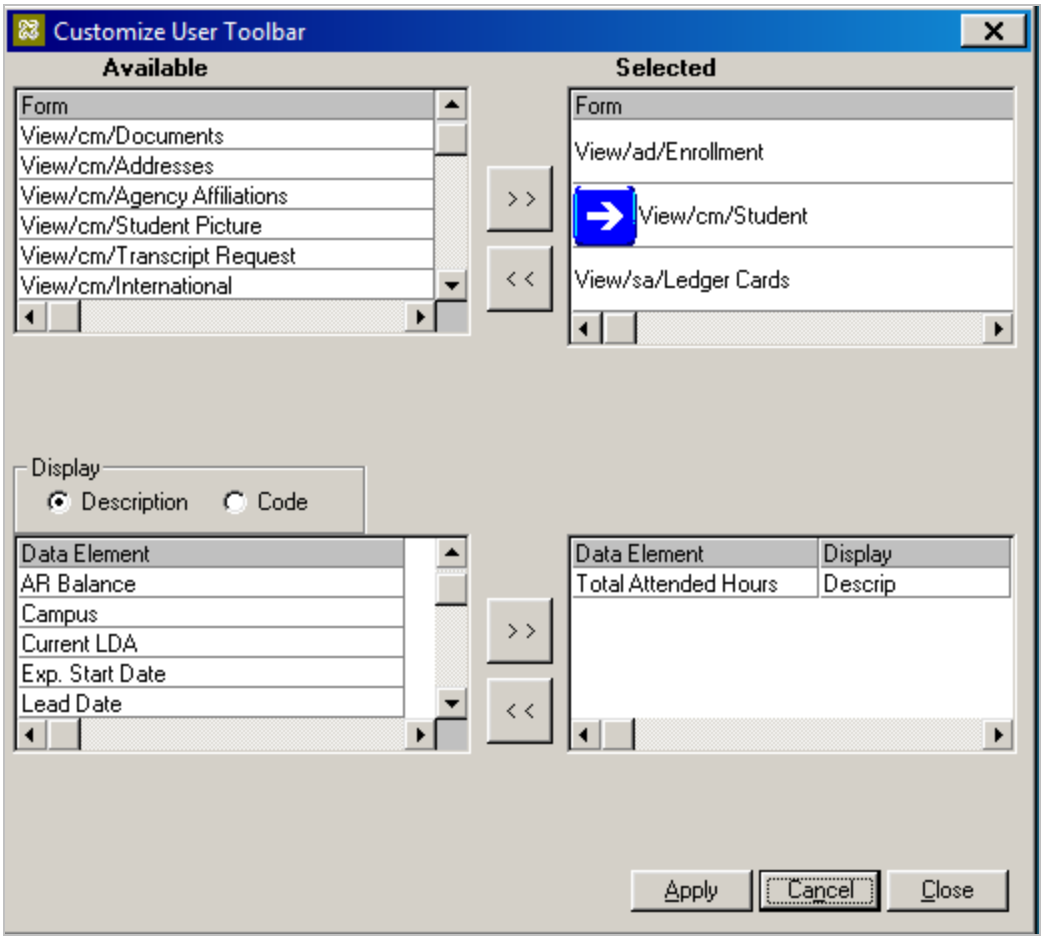
To allow a staff member to configure the customization of the toolbar:

1. Navigate to **Setup** > **Staff**. The Staff Maintenance form is displayed.
2. Click the **Staff Members** tab.
3. Select the name of the staff member who wants a customized toolbar and click **Edit**.
4. When the Staff Information form is displayed, select the **User Info** tab.
5. The General tab contains the Enable User Toolbar check box. Select this check box to activate the feature.
6. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Staff Maintenance form.
7. Click **Close** to close the form.

Configuring Forms and Elements to View on the User Toolbar

To configure the forms and data elements you want to view on the User Toolbar:

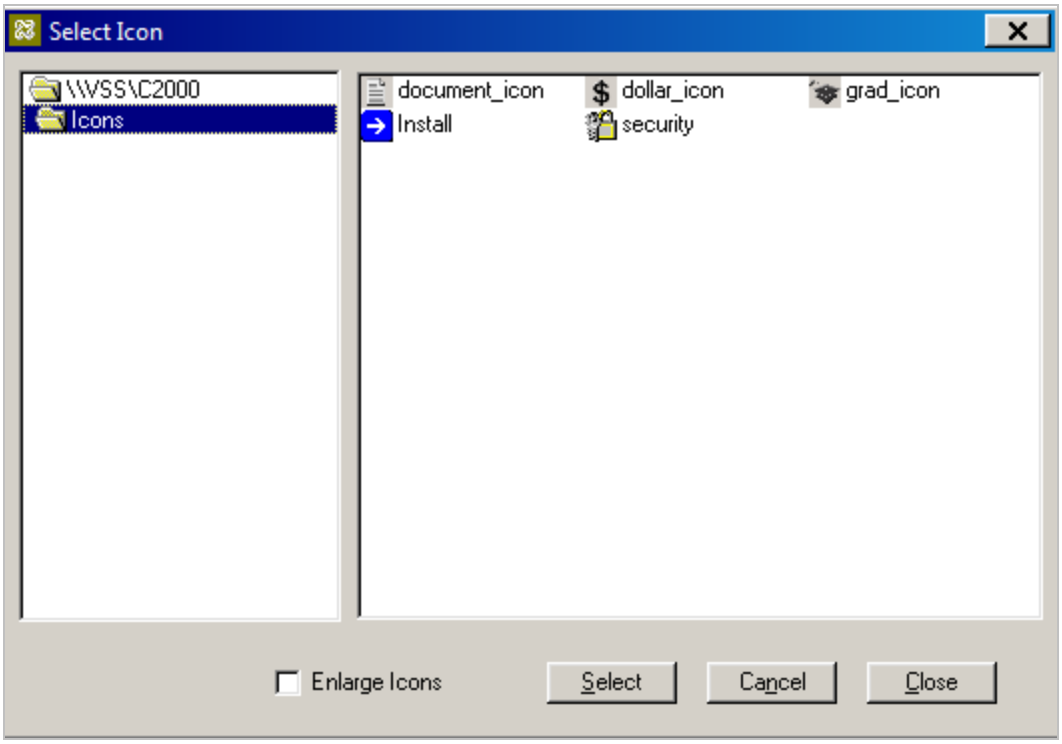
1. Navigate to **View** > **Customize User Toolbar**. A two-part form is displayed. The top half is a list of available forms you can select for quick access.



2. To select a form to display, click the name of the form in the **Available** list and then click

in the middle of the dialog box. The **Select Icon** form appears.

   Note: You can also double-click any element in the **Available** grid to open the **Select Icon** form.



3. Select an icon from the list that is displayed, or add one of your own for displaying on the customized toolbar. Then, the selected **Available** Data Element will be moved along with the selected icon to the **Selected** list on the right side of the **Customize User Toolbox** form.

   If you have trouble seeing the icons clearly, select the **Enlarge Icons** check box located on the bottom of the form. The icons appear in a magnified view.

   Note: A dedicated icon folder has been set up by your system administrator. To find the location of the icon folder, navigate to **Setup > System > General** tab. Scroll down the list of system settings to User Toolbar Icon Folder. If no path is displayed in the field, click the down arrow to find the folder labeled **Icons**. This form is in the CampusNexus Student Icons folder. The **Select Icon** form shows all icons in the icon folder.

4. Under **Display**, select whether you want to view a **Description** of the icons or the **Code** associated with these icons.

5. Under **Data Element**, click the name of the data element you want to display on the toolbar, and then click in the middle of the dialog box. The selected data element will be moved to the right-hand text box.

6. Click **Apply** to apply your selections to the toolbar.

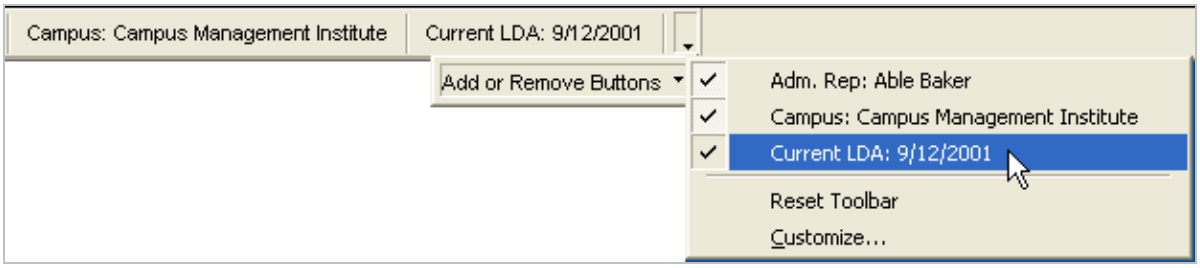
   Note: Only information from the most current enrollment is presented for these hanging data elements when the student has more than one enrollment in CampusNexus Student.

Viewing the Customized User Toolbar

To view the customized User Toolbar:

1. Once you have configured the hanging data elements that you would like to add to your **User Toolbar**, navigate to **View > User Toolbar**. If the **User Toolbar** was already displayed, then navigating to this path will cause the toolbar to be hidden; if the **User Toolbar** was not displayed, then navigating to this path will cause the **User Toolbar** to be displayed. The path acts as a show/hide toggle.

   
   Once data items and forms are configured for your **User Toolbar**, you can temporarily add or remove items by clicking the down-arrow button beside the form icons or the data items. The **Add** or **RemoveButtons** option is displayed. Click it and slide the mouse pointer to the right to see the forms icon buttons (or data items) and other options.

2. Click a forms icon or data item to remove it from the toolbar or, if the item is not selected, click it to add it to the **User Toolbar.** The **Reset Toolbar** and **Customize...** options are temporary run-time functions. In other words, any changes you make from these options are not saved when you close your current CampusNexus Student session.

3. Right-click the **User Toolbar** to display a shortcut menu on which you can open or close the **Forms toolbar** or the **Data toolbar**. The **Customize...** option on this menu leads to some temporary settings for the current session only.

   Note: You can drag and drop the **User Toolbar** anywhere on your work area according to personal preference and ease of use.

Viewing the Packaging Status on the User Toolbar

To configure the Packaging Status to view on the User Toolbar:

1. Navigate to **View** > **Customize User Toolbar**. The Customize User Toolbar form is displayed.
2. In the Available section, click **View/cm/Agency Affiliations**.
3. In the Data Element Available pane at the bottom left, scroll down and select **Packaging Status**.
4. Click the right double-arrow button (**>>**) to move Packaging Status to the Selected pane on the right.
5. Click **Apply**.
6. Click **Close** to close the form.

The User Toolbar now displays the student's Packaging Status.

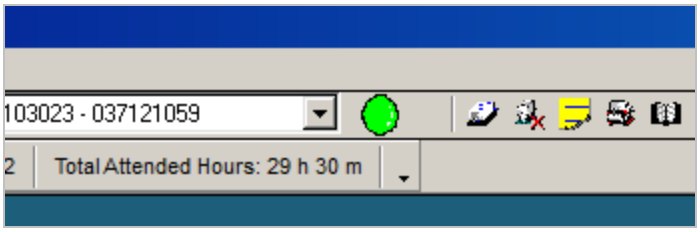
Note: Multiple packaging statuses may apply to a student based on the academic year, enrollment, and the student's position in an award year. The packaging status toolbar is used to enable users to assess the key attributes of a student's record. It should be noted that the packaging status displayed on the toolbar represents a specific status and may not be the status for the selected enrollment period or award year. Therefore, it is important to review the complete information (especially for continuing students with packaging for multiple periods.)

Enabling the Display of Total Attended Hours on the User Toolbar

To display Total Attended Hours for the most recent enrollment on the User Toolbar, perform the steps below. For additional information on customizing the User Toolbar, see the topic Configuring Forms and Elements to View on the User Toolbar.

1. Navigate to **View** > **Customize User Toolbar**. The Customize User Toolbar form is displayed.
2. In the Data Element Available pane at the bottom left, scroll down and select **Total Attended Hours**.
3. Click **>>** to move Total Attended Hours to the Selected pane on the right.
4. Click **Apply**.
5. Click **Close** to close the form.

The User Toolbar displays the student's Total Attended Hours in the format `## h ##m`.



Note: The Total Attended Hours data element will be empty if the Program Version is Non-Clock Hour.

Lists Menu

This menu is used to set up the lists that represent options used by your institution to control your daily operations. The lists are organized by department / module, e.g., Contact Manager, Admissions, Financial Aid, and so on.

Each list is represented by a tab on the form. To quickly access a tab, click the **Go To** button (or press **Alt+G**) displayed in the upper right-hand corner of the form. A drop-down list appears containing alphabetically sorted items corresponding to the form's tabs. Select the an item from this list to go directly to the corresponding tab. Click **Edit** to see the setup details for a selected list code or click **Add** to create a new code.

List codes are used throughout CampusNexus Student to help users make appropriate choices while completing forms. Drop-down lists on forms are designed so that list items that are set to 'Inactive' are not listed when adding or editing student information. Drop-down lists are refreshed immediately. By refreshing the drop-down lists, you can see all options available, including options added by other users while you are signed on. In some cases, the check box 'Include Inactive' is displayed. When this option is selected, all codes are listed; when cleared, only 'Active' codes are listed.

Refer to Maintaining Lists for more information about lists. Each list in CampusNexus Student is described in a topic you can select from the Table of Contents.

Maintaining Lists

Lists are the means through which the policies and procedures of your institution are translated into terms that CampusNexus Student can understand. When you enter data in the lists, you tailor CampusNexus Student to suit the needs of your operations. Lists serve to coordinate daily operations and make them consistent throughout your institution. Through the lists, terminology that is used in your environment is transmitted into the student records and administrative records.

Each module of CampusNexus Student has several lists associated with it. With appropriate access permissions you can view and edit some or all lists. Typically, the privilege of modifying most lists is reserved for management-level staff members.

The procedure for maintaining lists is consistent throughout CampusNexus Student.

To add a list item:

1. Select **Lists** from the main menu.
2. Select the department in which the list is used, for example, Admissions.
3. The Lists setup form (Setup - Admissions Lists) is displayed containing a number of tabs. Click the applicable tab, for example, Lead Source. The Lists setup form containing a list of the tab subject is displayed (Setup - Admissions Lists [Lead Sources]).
4. Click **Add** to add a list item. The tab subject Code Setup form is displayed (Lead Source Code Setup form).
5. Enter data in the appropriate fields. Fields with a colored background are required.
6. Select the **Active** check box if you want the code to be available for future use. A 'Y' in the Active column of the grid means that the item can be used; an 'N' means that it cannot be used in new records.
7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To edit a list item:

1. Select **Lists** from the main menu.
2. Select the department in which the list is used, for example, Admissions.
3. The Lists setup form (Setup - Admissions Lists) is displayed containing a number of tabs. Click the applicable tab, for example, Lead Source. The Lists setup form containing a list of the tab subject is displayed (Setup - Admissions Lists [Lead Sources]).
4. Select a list item and click the **Edit** button. The tab subject Code Setup form is displayed (Lead Source Code Setup form).
5. Modify the data in the fields.
6. Select the **Active** check box if you want the code to be available for future use. A 'Y' in the Active column of the table means that the item can be used; an 'N' means that it cannot be used in new records.
7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To delete a list item:

Note: CampusNexus Student does not allow you to delete an item from a list if the item is used in student or administrative records. As an alternative to deleting an item from a list, consider "disabling" it (changing it to inactive).

1. Select **Lists** from the main menu.
2. Select the department in which the list is used.

3. The Lists setup form is displayed. Click the applicable tab. The Lists setup form containing a list of the tab subject is displayed.
4. Select a list item and click **Delete** .
5. A confirmation message is displayed. Click **Yes**. The item is removed from the list.

To disable or enable a list item:

Note: Disabling an item in a list means that it can no longer be assigned to student or administrative record. The item remains on file for historical and reporting purposes. This is usually preferable to deleting an item since no record of a deleted list item is maintained in CampusNexus Student.

1. Select **Lists** from the main menu.
2. Select the department in which the list is used.
3. The Lists setup form is displayed. Click the applicable tab. The Lists setup form containing a list of the tab subject is displayed.
4. Select a list item and click **Disable** .
5. The Active column for the selected list item changes from 'Y' (yes) to 'N' (no). The Disable button changes to Enable. If you click **Enable**, the Active column changes to 'Y'.

To print a report of list items:

1. Select **Lists** from the main menu.
2. Select the department in which the list is used.
3. The Lists setup form is displayed. Click the applicable tab. The Lists setup form containing a list of the tab subject is displayed.
4. Select a list item and click the **Print** button. The Report Selection form is displayed.
5. Click **Preview** to view the report on-screen.
6. Click the **Print** icon in the Report Viewer to print the report.

Lists > Contact Manager

When you navigate to Lists > Contact Manager, the Setup - Contact Manager Lists form is displayed. Add, edit, delete, disable, and print Contact Manager lists from the following tabs:

- Academic Record Information
- Activities
- Activity Categories
- Activity Results
- Activity Status
- Address Types
- Document Status
- Documents
- Document Lists
- Incident Type
- SMS Service Provider
- Visas

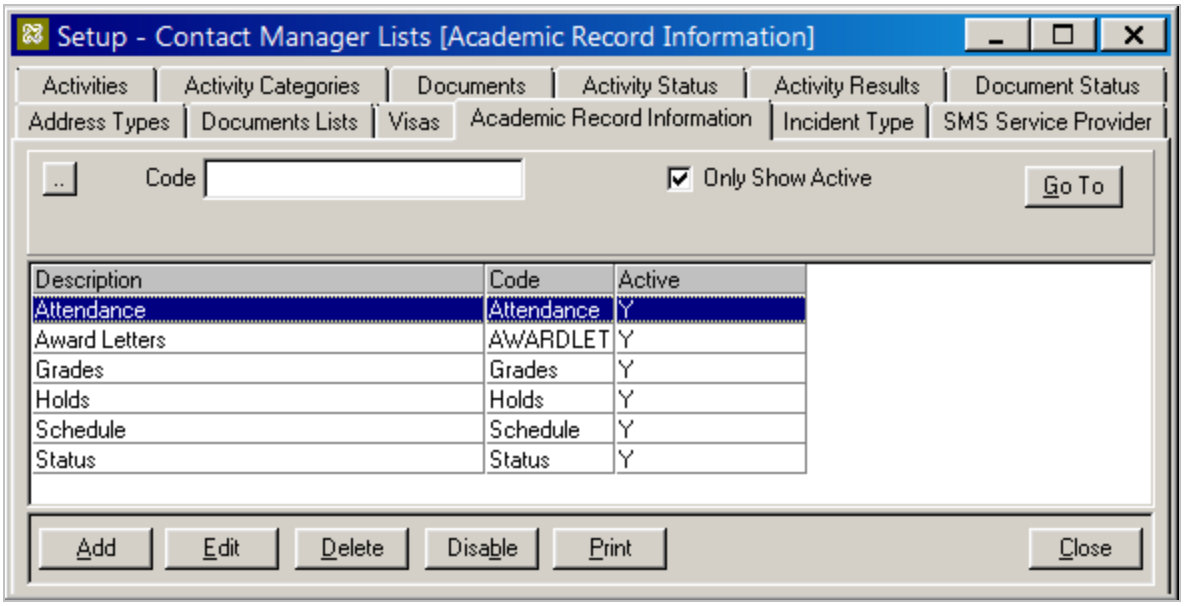
See Maintaining Lists for instructions on adding, editing, deleting, disabling, enabling, and printing lists.

Setup - Contact Manager Lists [Academic Record Information]

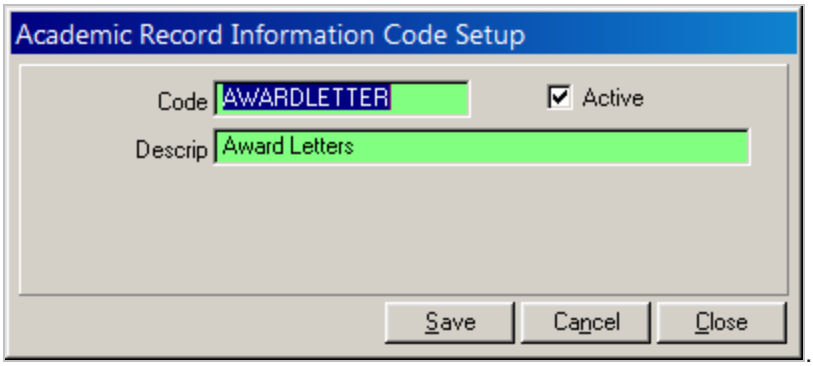
The Academic Record Information tab of the Contact Manager Lists form enables institutions to create proprietary academic record information that is more meaningful than the default selections. Grades, Holds, Status, Attendance, and Schedule are designated as system academic records as defined by the FERPA Act.

To add or edit a list of academic record information codes:

1. Navigate to **Lists** > **Contact Manager**. The Setup - Contact Manager Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Academic Record Information**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Academic Record Information Code Setup form is displayed.



6. Specify a unique **Code**.
7. Enter a **Description**.

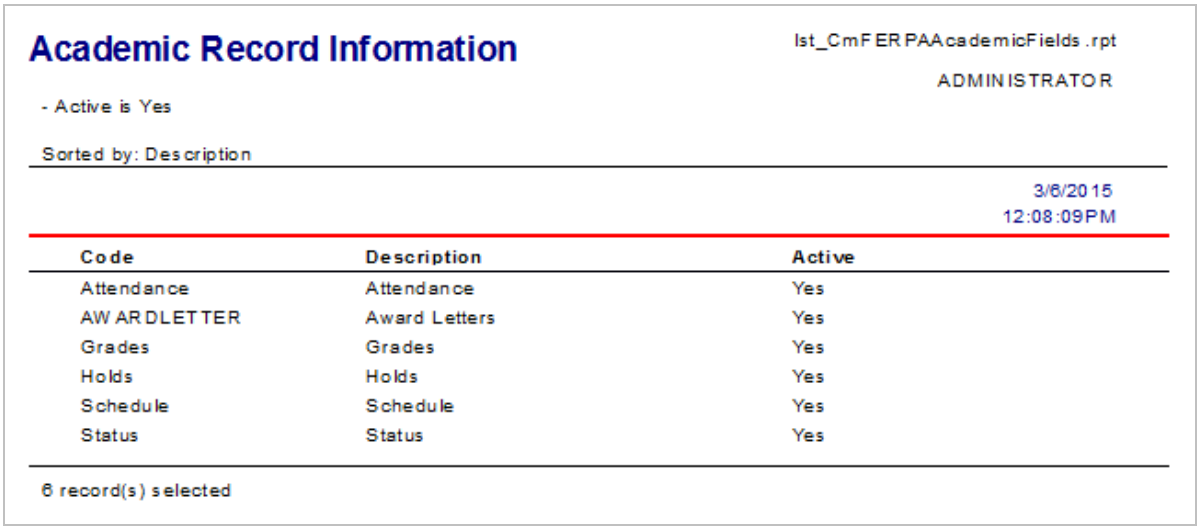
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To print a list of academic record information codes:

1. Click **Print** on the Setup - Contact Manager Lists [Academic Record Information] form. The Report Selection form is displayed.
2. Select appropriate options on the Selection tab.

   Select or clear **Yes** or **No** next to the Active label. If you select Yes, active records are listed on the report. If you select No, inactive records are listed. If you select both, active and inactive records are listed.

   If no records match the selection criteria, the message *"No records selected for the report"* is displayed.
3. Click **Preview**. The report is assembled and displayed in the Report Viewer. The report contains the Code, Description, and Active indicator.



Academic Record Information

lst_CmFERPAAcademicFields.rpt

ADMINISTRATOR

- Active is Yes

Sorted by: Description

3/6/2015
12:08:09PM

Code	Description	Active

AWARDLETTER	Award Letters	Yes
Grades	Grades	Yes
Holds	Holds	Yes
Schedule	Schedule	Yes
Status	Status	Yes

6 record(s) selected

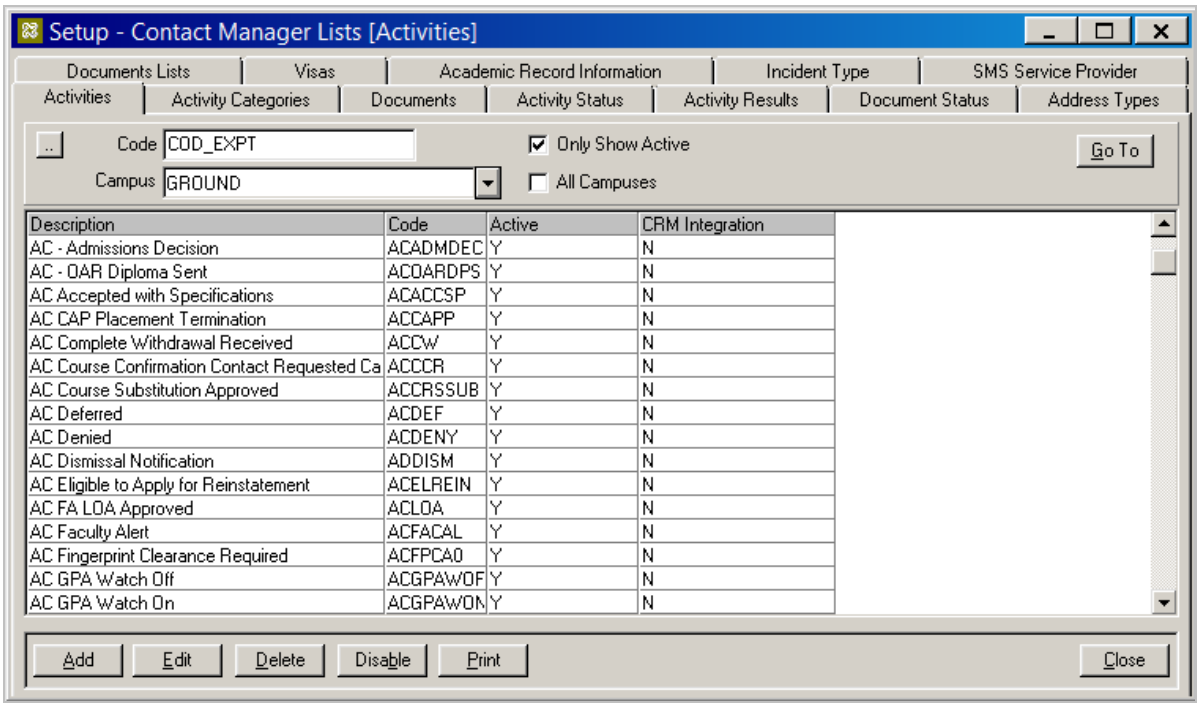
4. See Report Viewer for instructions on printing or exporting the report.

Setup - Contact Manager Lists [Activities]

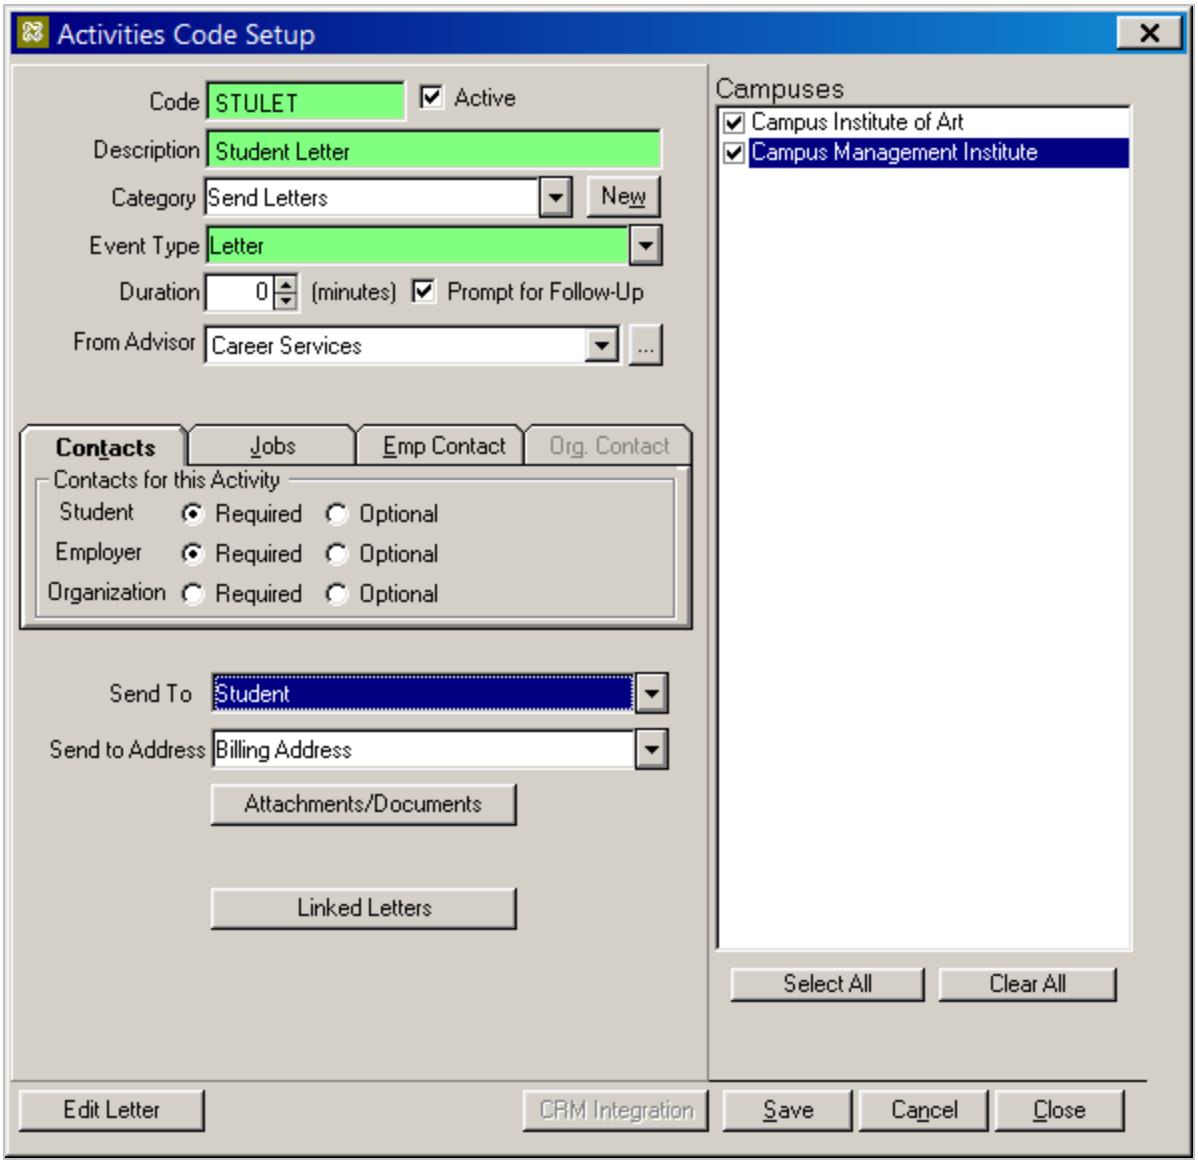
The Setup - Contact Manager Lists [Activities] form is used to define the properties of Activities. Staff members perform activities associated with tasks or events in the life of a lead, prospect, student, employer, or staff member at specific campuses. Activities can be triggered by an event or condition in CampusNexus Student. The triggering effect is controlled by the Activity Scheduler.

To add or edit an activity code:

1. Navigate to **Lists** > **Contact Manager**. The Setup - Contact Manager Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Activities**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Activities Code Setup form for the selected activity is displayed ('Student Letter' in our example).



Notes:

- Student Letter (STULET) is set to 'Y' on the Setup - Contact Manager Lists [Activities] form to enable the Mail Merge feature on the Report Viewer menu bar.
- The fields in this example relate to the Letter activity type (Event Type). For information on other types, see Examples of Other Activity Types.
- Depending on the selected activity type, different fields and tabs are displayed on the Activities Code Setup form.

7. Specify a unique **Code**.

   Note: The Code is used as the file name for an associated letter activity.

8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.

10. Select a **Category**, or click to create a new Activity Category.
11. Select an **Event Type**. Event Types (also known as Activity Types) are defined by CampusNexus Student and are not maintained by users.
12. Specify the estimated **Duration** of the activity in minutes.
13. Select an advisor in the **From Advisor** field. Click to select multiple advisors.
14. If the **Prompt for Follow-Up** check box is selected and you choose to close the activity without a follow-up, the following message is displayed: *"Are you sure you want to close this activity without scheduling a follow-up?"*
    - Choose **Yes** and close the activity without scheduling a follow-up activity.
    - Choose **No** and proceed to schedule the follow-up for it.
15. Select applicable options on the **Contacts**, **Jobs**, **Empl. Contact**, and **Org. Contact** tabs.
    - Select whether the activity is **Required** or **Optional**. On the Contacts tab, select an option for both employer and student. When you select Required or Optional for the employer, CampusNexus Student prompts you to select the employer.
    - Click Setup Questions/Script to create a script containing questions that can be followed by your staff for meetings, incoming phone call, and outgoing phone call activities.
16. Select one or more **Campuses**. If you try to edit or disable an activity that is not assigned to a campus to which you have access, CampusNexus Student prevents you from doing so.
17. Select Student, Employer, or Organization from the **Send To** list.

    Send to Student

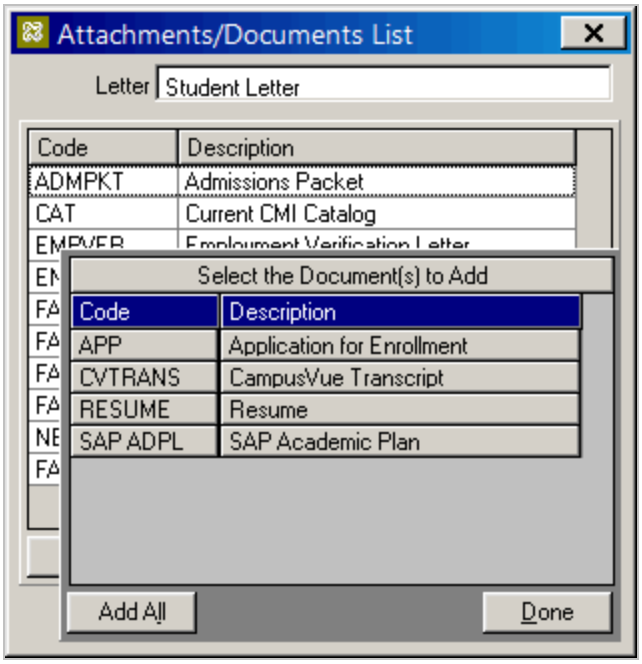
    a. Select **Student** from the Send To list. If the activity is a letter to an employer, the list of mail merge fields in Word changes to employer information when editing and merging the letter.

    b. The **Send to Address** field is displayed only if Student is selected from the Send To list and the Event Type is Letter. This option enables you to choose an address when sending letters to students, without having to change the default address in the student's address folder.

    c. Click **Attachments/Documents** to create a list of attachment or documents to be packaged with the letter and sent to the recipient. When you print the Activities Code list, the Attachments/Documents associated with each letter are also listed.

    Note: The Attachments/Documents button does not appear on a new Activity form until you click Save.

    d. Click **Add** on the Attachments/Documents Lists form and select the documents to be added. Click **Add All** to select all items.



e. Click **Done** and **Close** to return to the Activities Code Setup form.

Send to Employer

a. Select **Employer** from the Send To list. The list of mail merge fields in Word changes to employer information when editing and merging the letter. The Send to Address field and Attachments/Documents options are not available for Employers.

Note: Letters to employers are printed from **Daily > Career Services > Print Employer Letters**.

Send to Organization

a. Select **Organization** from the Send To list. The organization's contact person receives the event type such as email, letter, etc.

b. Select the **Organization Type**. The Organization Type field appears only if Organization was selected from the Send To list and the Event Type is Letter or Email to Organization. The option currently only selects High School.

c. Click **Attachments/Documents** to create a list of attachments or documents that are to be packaged with the letter and sent to the recipient. If you print the Activities Code list, the Attachments/Documents associated with each letter are also listed.

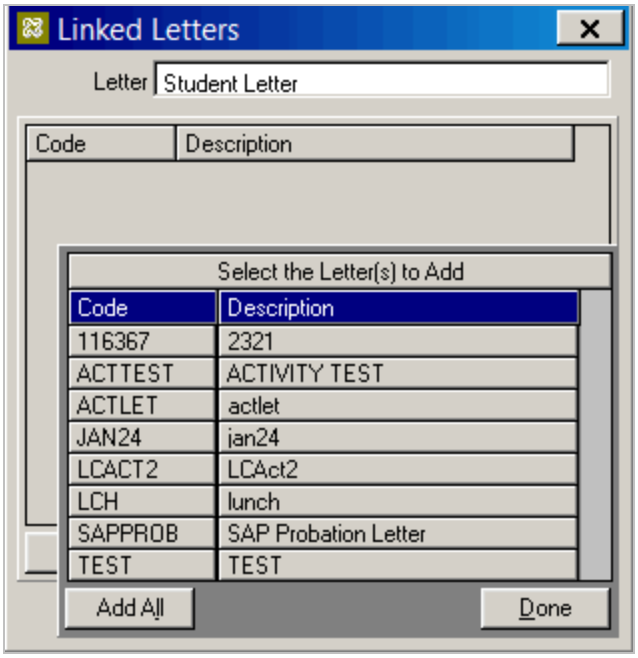
Note: The Attachments/Documents button does not appear on a new Activity form until you click Save.

d. Click the **Linked Letters** link to view a form that enables you to add or remove letter activities that may be associated with this activity.

18. When setting up or editing a letter, click **Linked Letters** to view and edit the list of materials that are to be gathered and sent with the letter when it is printed, or link other letters or documents to the one that you are setting up. When the student or employer letter you are setting up is printed, the linked letters, labels, documents, and so on are also printed.

Note: The Linked Letters button does not appear when you are creating a new activity. The button is displayed when you Save an activity and select it from the Activities list to return to the Activities Code Setup form.

a. Click **Add** to add documents. A list of available letters that may be linked is displayed.



b. Click on a letter in the list or click **Add All** and click **Done**. CampusNexus Student adds the items to the Linked Letters lists.

c. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

19. Depending on the activity, the Edit Letter or HTML Editor button is displayed.

Edit Letter

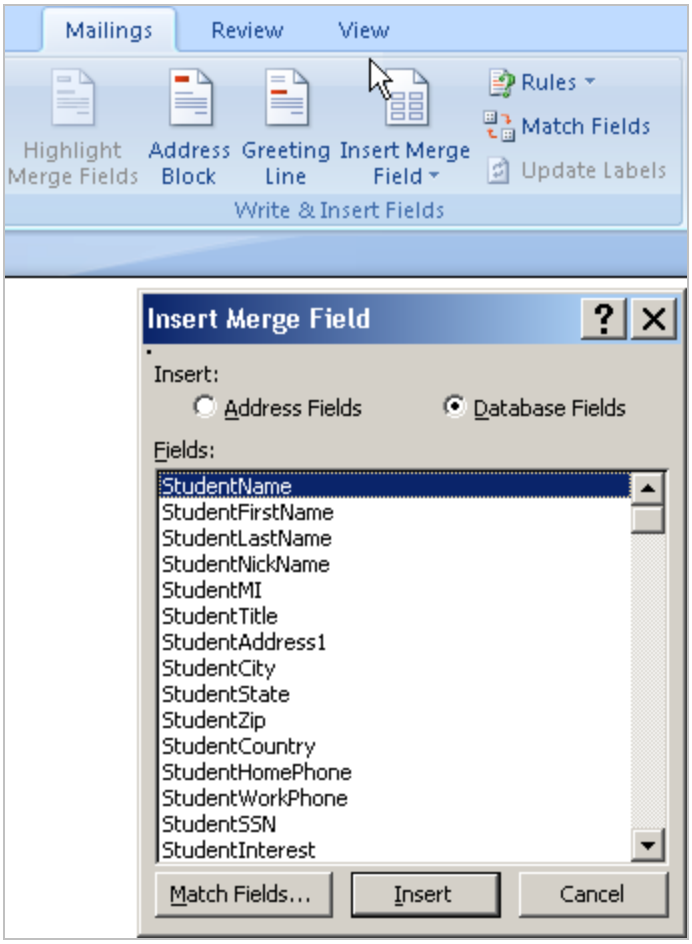
a. Click **Edit Letter** on the Activities Code Setup form. CampusNexus Student starts Microsoft Word and opens the file containing the letter associated with the activity.

Note: CampusNexus Student version 15.2 or later supports the `.docx` extension for Microsoft Word files.

If you created a `.doc` file and `.docx` file for the same Activity Code, for example *Program_Start.doc* and *Program_Start.docx*, remove one of the files from the server where the files are stored to enable CampusNexus Student to open the correct file for the selected Activity Code.

b. CampusNexus Student address and database fields can be incorporated into letters. See Mail Merge Codes

for a complete listing of mail merge codes available for letter activities.



HTML Editor

- See Creating HTML Email for an example of using the HTML editor.

20. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Examples of Other Activity Types

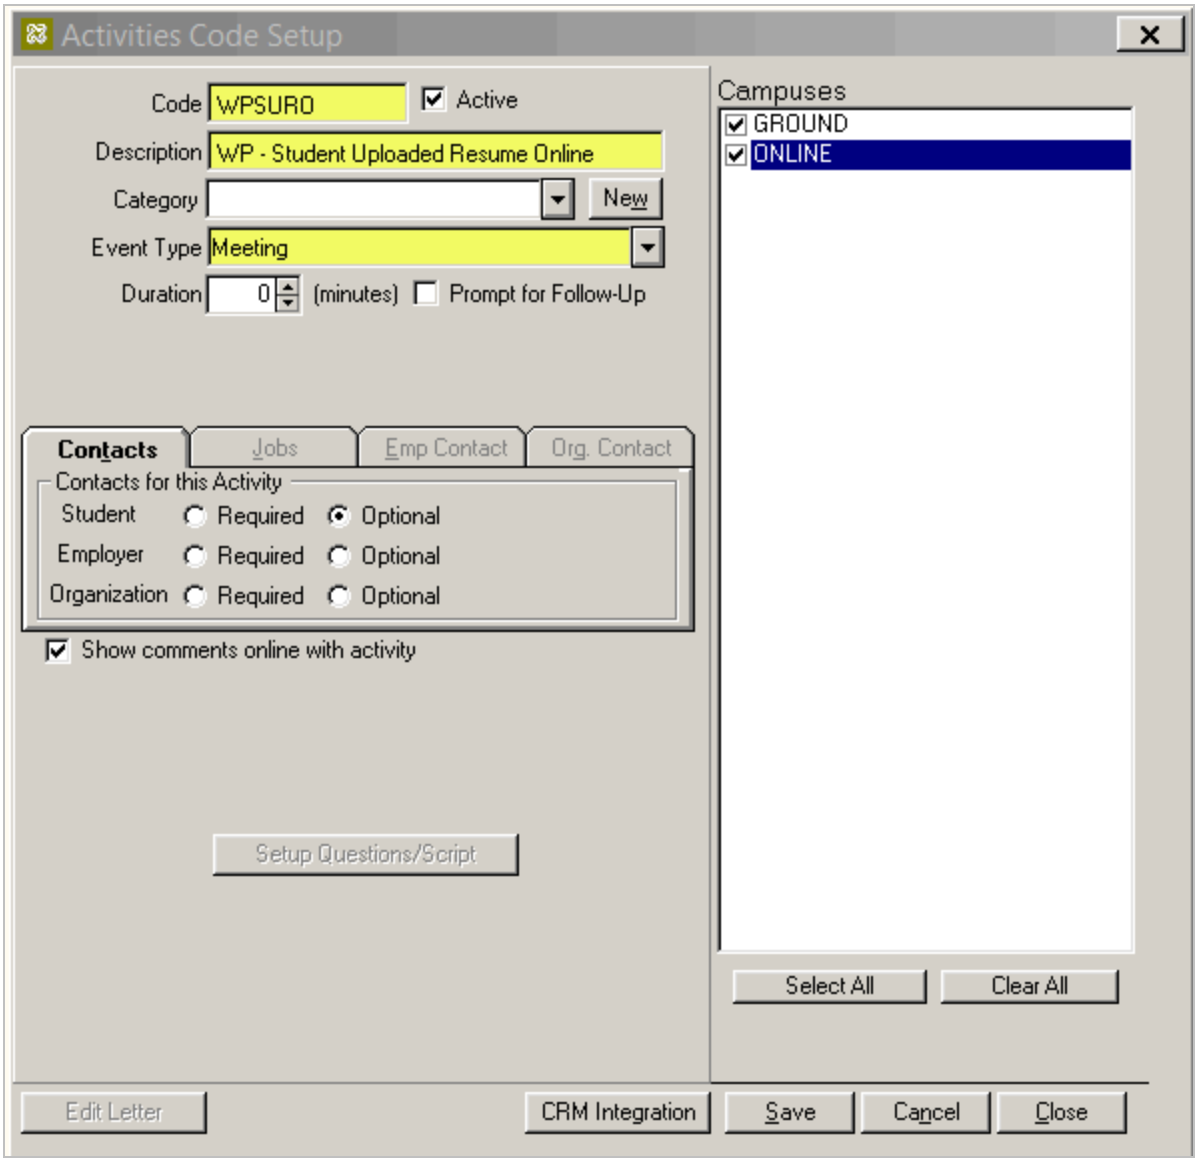
Other types of activities include:

- Outgoing Phone Call
- Incoming Phone Call
- Meeting
- Incident
- Message
- Other Task
- SMS-Text Message
- Email
  - Student Email
  - Staff to Employer Email
- Waitlist Activities
- Web Alert
- Auto Disb. Cancellation/Disb. to Re-expect Alert

Meeting

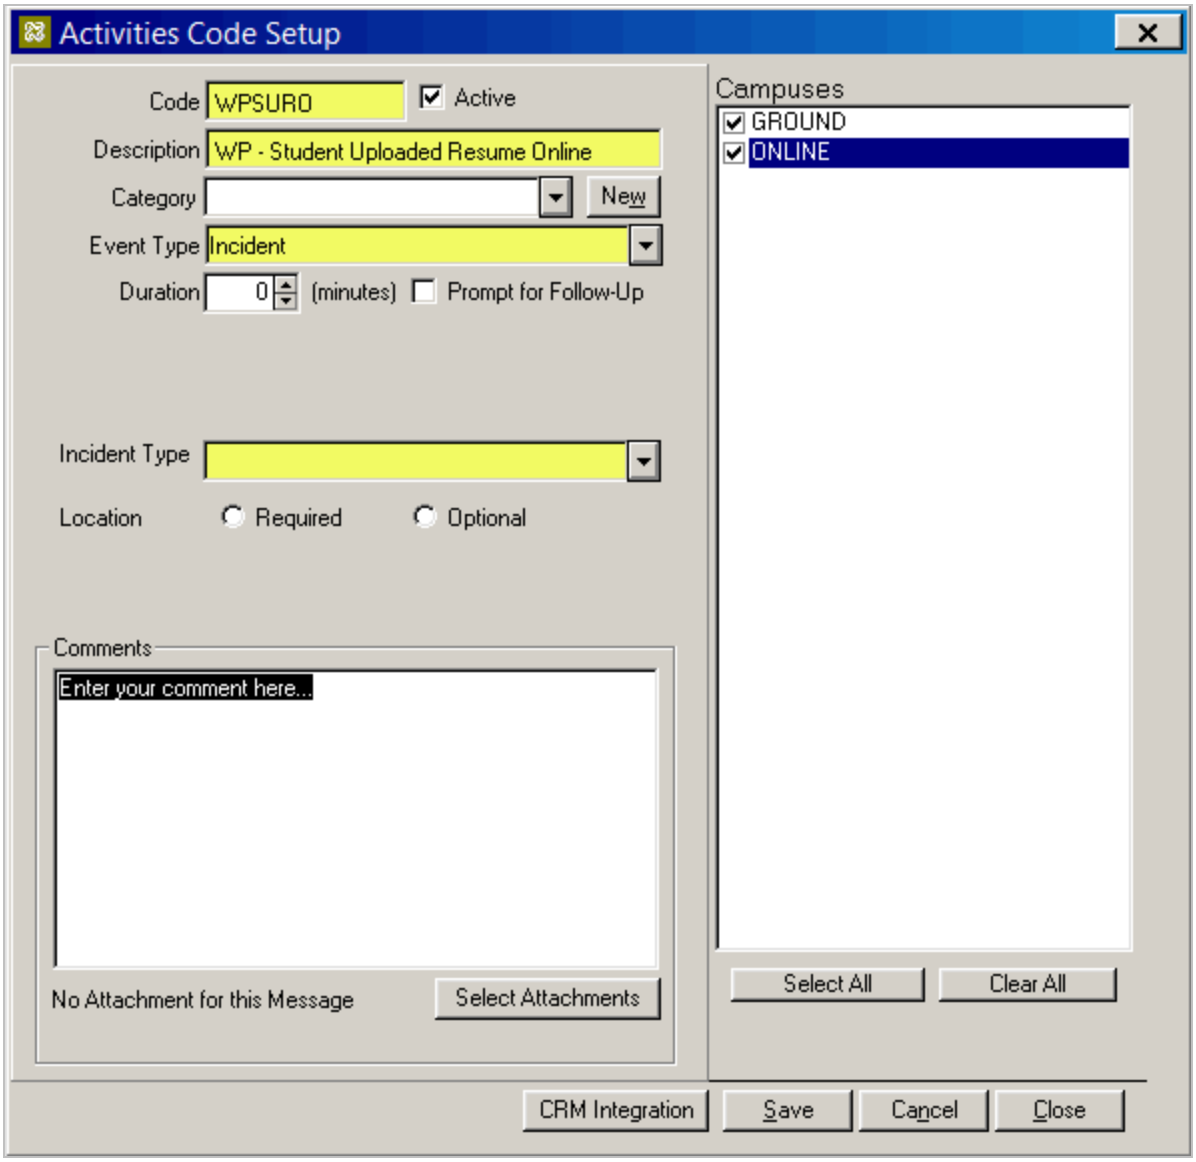
A meeting activity enables staff members to enter comments for the upcoming meeting activity and use those comments as reminders to themselves.

Select **Show comments online with activity** to enable students to view the comments in Portal.



Incident

You can track student conduct violations that need to be included in the Jeanne Clery Campus Crime Report. This report is a federally required statistical reporting of all crimes and student conduct violations that occur within the population of students on a campus. See Incident Types for details on creating types of incidents for the Activities codes.



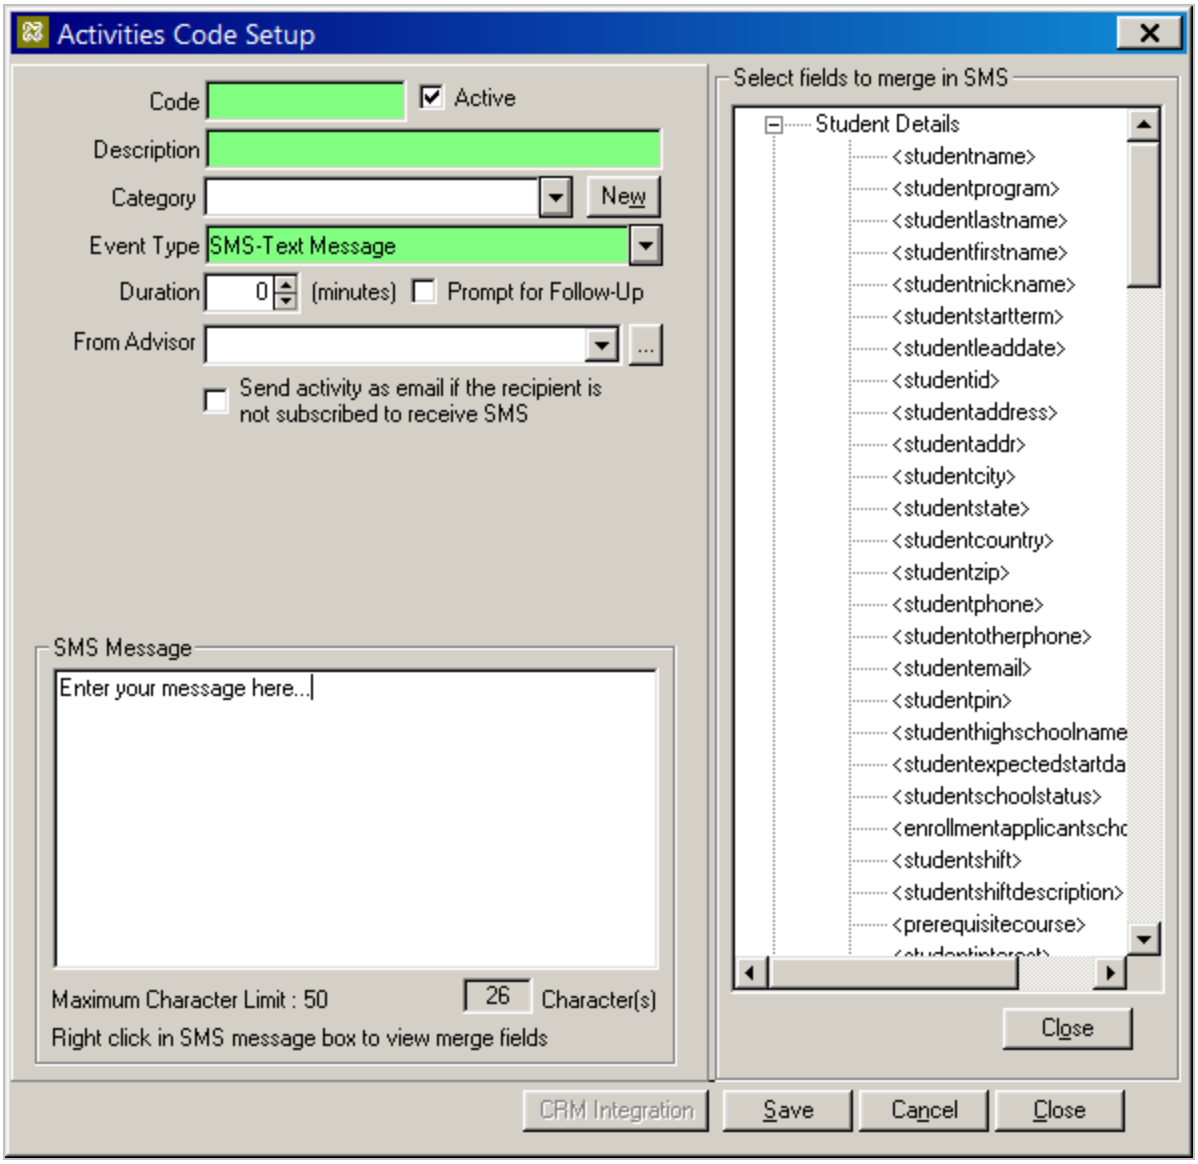
SMS-Text Message

The following requirements must be in place for students to receive SMS text messages:

- The student must have a mobile phone number on file on the Student Master form.
- An SMS service provider must be selected.
- The 'Subscribe to SMS Service' check box must be selected under SMS Preference on the Contact Method form (Contact Manager).

  If the check box is selected, the student has subscribed to receive text messages from the school. If the check box is not selected, the student has not subscribed or has unsubscribed and does not want to receive text messages from the school. Students can use Portal to subscribe and unsubscribe.

Define Contact Manager activities using the Event Type **SMS-Text Message** on the Activities Code Setup form.



Create your message in the SMS Message box. **Right-click** inside the message box to view the merge fields. **Double-click** a merge field to insert it into the message.

You can schedule an activity with an event type of SMS for a student.

Select **Send activity as email if the recipient is not subscribed to receive SMS** to specify that email is to be sent to students who have not subscribed to receive SMS for this activity.

- If the student did not subscribe to receiving SMS and the **Send activity as email ...** check box is selected, an email is sent in place of an SMS message.
- If the student did not subscribe to receiving SMS and the **Send activity as email ...** check box is **not** selected, a message indicates that the student has not subscribed for this service and you must cancel.

You can schedule an activity with an event type of SMS for a student group.

- If any students in the group did not subscribe to receiving SMS and the **Send activity as email ...** check box is selected, an email is sent in place of an SMS. CampusNexus Student sends the activity only to students who subscribed to SMS.

- If any students in the group did not subscribe to receiving SMS and the **Send activity as email ...** check box is **not** selected, a message indicates that some students have not subscribed for this service. Some of the intended recipients are not notified before you save and close the activity. CampusNexus Student sends the activity only to students who have subscribed to SMS. Run an Activity Report to determine which students were not notified.

Since most SMS service providers have a character limit, CampusNexus Student verifies the limit established for that campus under the setup of the SMS Service Provider. You can view the Maximum Character Limit allowed under the message box. Next to the Maximum Character Limit, in the Character(s) box, the number of characters typed is displayed as you create the message. A red warning message is displayed stating that text will be truncated if you exceed the maximum character limit.

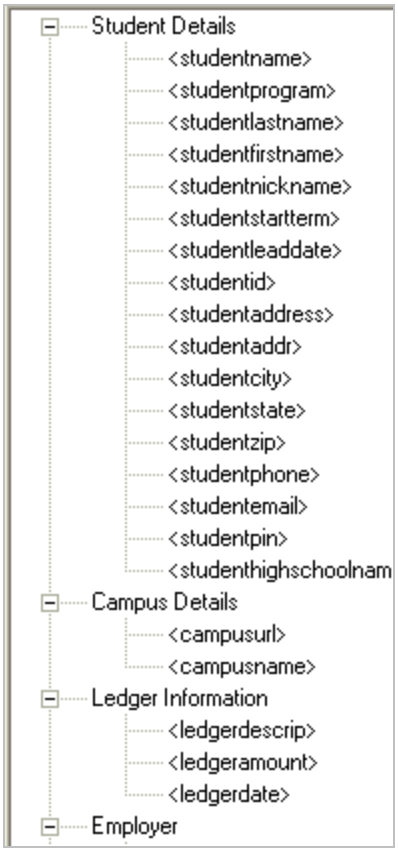
Email

Before an email can be sent, you need to set up some email parameters. You also need to select an Event Type before you can view the field that allows you to enter the main text of the email message.

To include mail merge fields in the body of your email, **right-click** inside the text box where you are entering the main body of the email. A list of fields (mail merge codes) available for the email is displayed. These are used to merge data from CampusNexus Student into emails, letters, labels, and other documents created in Microsoft Word. The data fields can range from a simple name field to a complex data table of financial aid data. **Double-click** a merge field to insert it into the message.

Note: See the topic Mail Merge Codes for a complete listing of mail merge codes available for email activities.

When embedding these variables in your message, enter them as shown in the list below. CampusNexus Student substitutes data from the Student Master records. Letters can be either uppercase or lowercase, but be sure to include the angle brackets < and > before and after the variables and no spaces within the field name. For example:



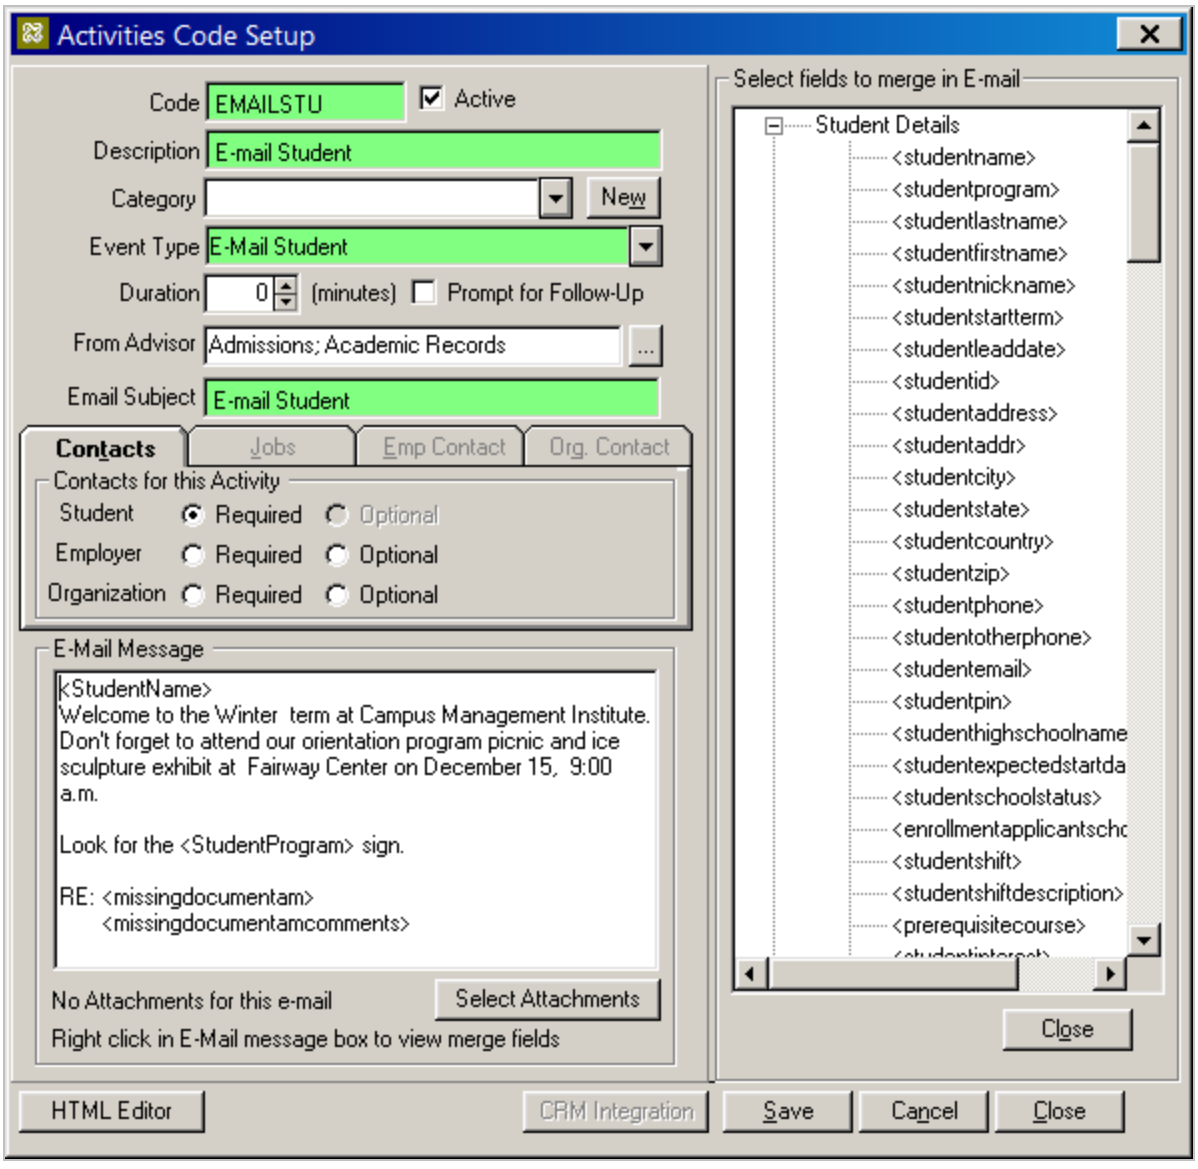
Student Email

When you add or edit an activity that has an email event type, an outgoing subject line, which you define, is added to the Activity form. The outgoing email subject line is automatically displayed on the Activity form. If you select the template from the Activity

Trigger form (Daily > Contact Manager > Schedule Activities), the outgoing subject line is displayed on the email when the scheduled activity is triggered.

The **Email Subject** line is a required field which can be edited as needed.

To choose which groups of students should receive the email, **right-click** in the email message box. A list of mail merge fields is displayed in the right hand box. **Double-click** a merge field to insert it into the message. Select appropriate groups of students who will receive this email.



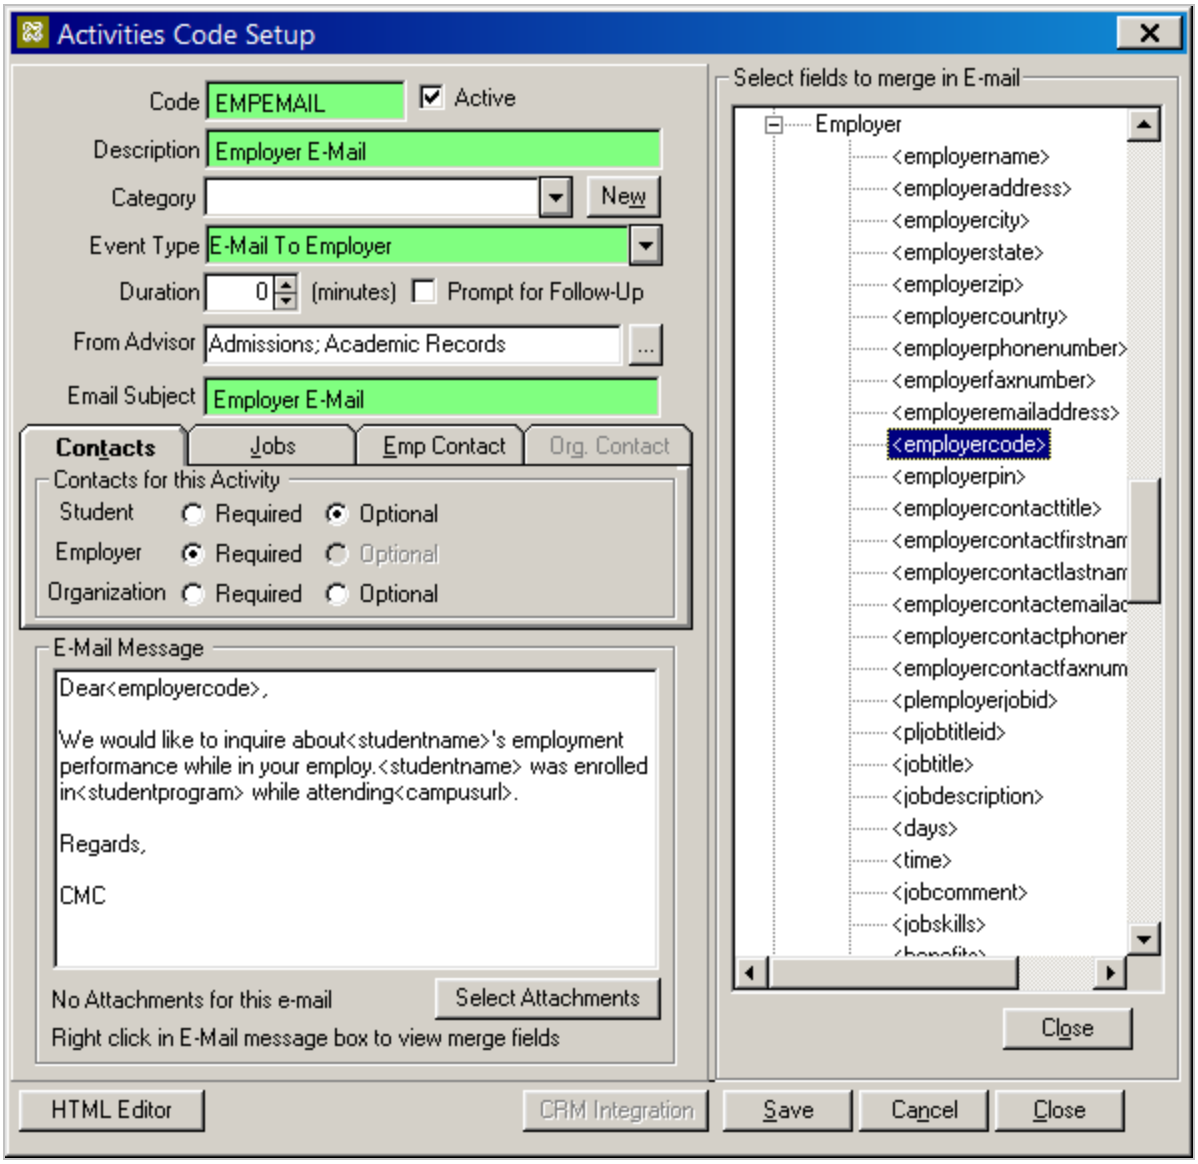
To modify the HTML code, click the **HTML Editor** button. CampusNexus Student supports common HTML tags (see Creating HTML email).

To add attachments to the email, click **Select Attachments** and browse for the attachment.

Staff to Employer Email

Select the **Email to Employer** Event Type.

Right-click in the email message box to obtain a list of mail merge codes available for the email. **Double-click** a merge field to insert it into the message.



Notice that the employercode, studentname, studentprogram, and campusurl fields were selected and incorporated into the email.

To modify the HTML code, click the **HTML Editor** button.

Click **Select Attachments** to attach a file to the letter.

Select **Required** or **Optional** on the Jobs tab and Emp. Contact tab.

Web Alert

Web alerts are emails sent to individual students, groups of students, school staff, and employers. You can create Student Alerts as Contact Manager activities. Student Alerts also provide a means to validate receipt of messages.

1. Select **Student Alert** on the Setup - Contact Manager Lists [Activities] form.
2. Select one or more **Campuses**.
3. The **Durations** fields are not applicable to this activity. Do not select the duration and follow-up.

4. Select contacts for this activity. Select **Student**. If the activity pertains to placement, select **Employer** as well.
5. Assign this activity to a staff member. See Adding Activities by Student Groups.

To assign a web alert as an activity:

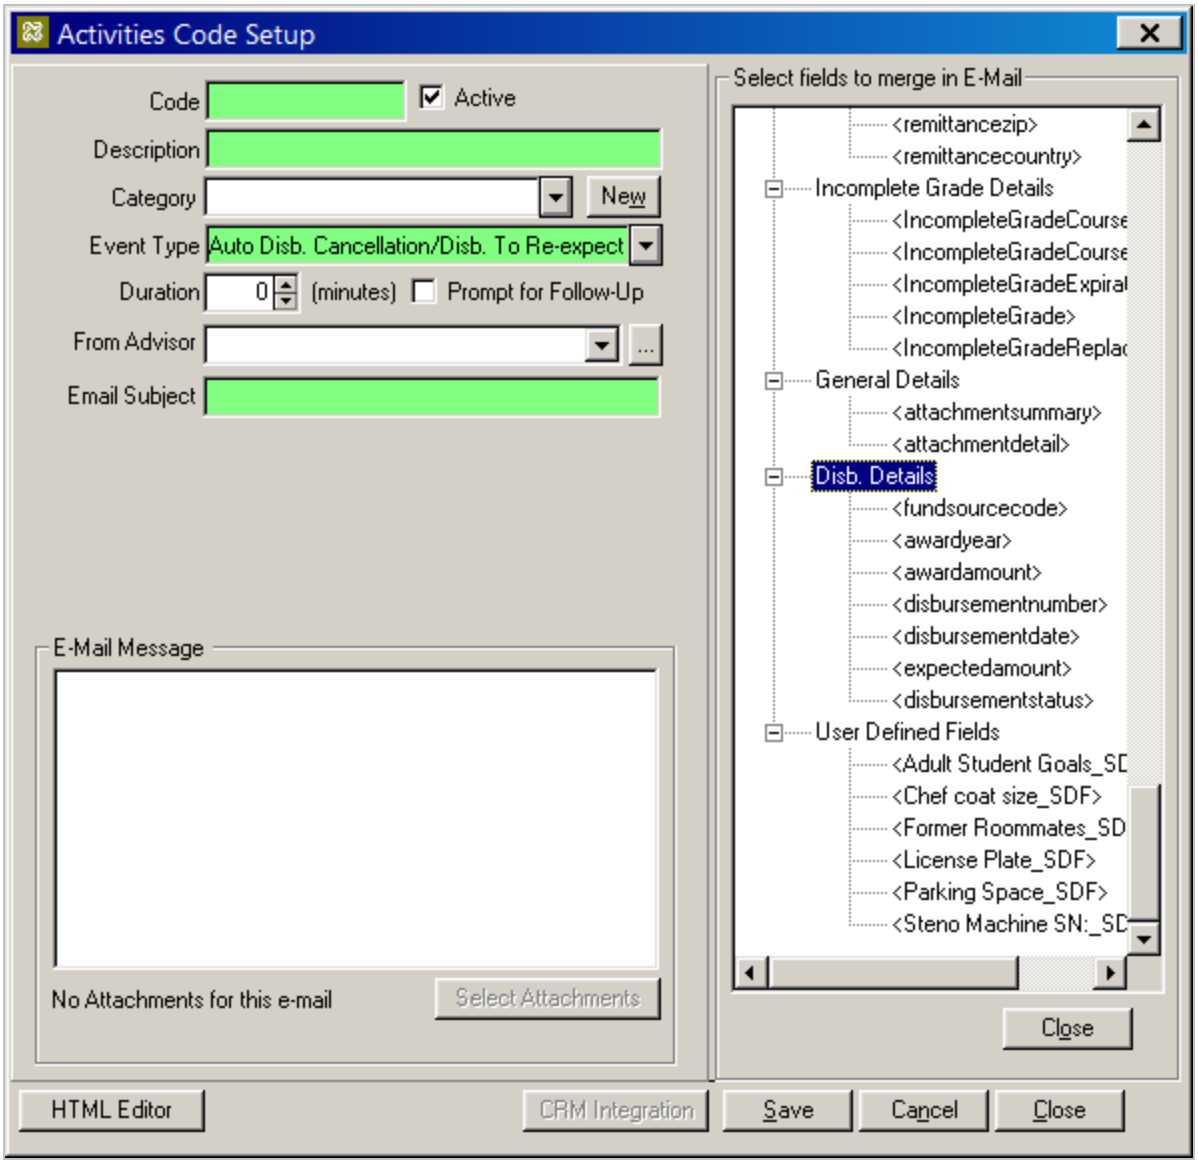
1. Navigate to **Contact Manager** > **Activities**.
2. Click **Add Activity**. The Activity form is displayed.
3. Select the **Staff Member**,**Type of Activity**, and **Student Group** who will receive the Web Alert from the lists.
4. Select the **Subject**, **Dates**, **Activity Status**, and **Priority Level**. Use the free-type field to enter a description of the email you are assigning.
5. Click **Save**. The Web Alert is saved to the Activities List of the staff member to whom you have assigned this task.

Students can check for web alerts and other school correspondence when they log on to their pages on the school website.

Auto Disb. Cancellation/Disb. to Re-expect Alert

The Event Type **Auto Disb. Cancellation/Disb. To Re-expect Alert** is an email type event that is available for sending notifications to associated staff if a disbursement is cancelled or a cancelled disbursement is moved back to the associated award year range by the Student Pace Evaluation (SPE) tool.

For additional information on disbursement cancellation and notification of assigned staff members in such cases, refer to the topics on SPE tool logic and Disbursement Alerts.



Right-click in the email message box to obtain a list of mail merge codes available for the email.

Several merge field codes are available specifically for the Auto Disb. Cancellation/Disb. To Re-expect Alert event type (merge field group **Disb. Details**):

- Fund Source Code
- Award Year
- Award Amount
- Disbursement Number
- Disbursement Date
- Expected Amount
- Disbursement Status

See Mail Merge Codes for a complete listing of mail merge codes available for email and letter activities in CampusNexus Student.

Double-click a merge field to insert it into the message.

Creating HTML Email

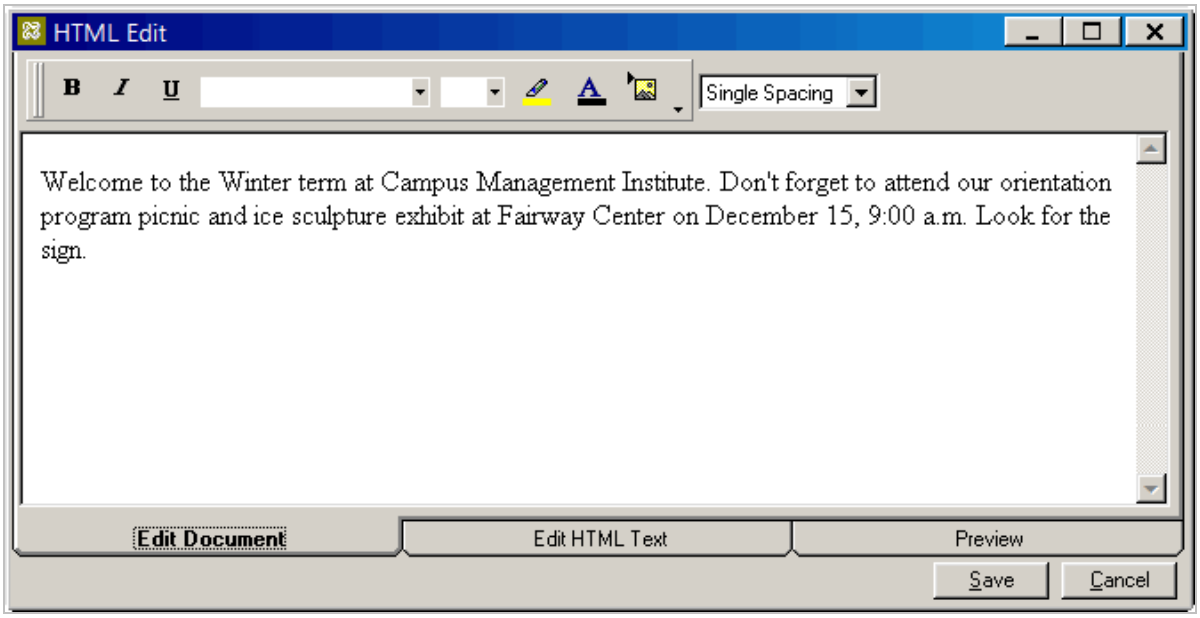
1. Navigate to **Setup** > **Contact Manager** > Email and select the Email Format **HTML**.
2. Navigate to **Lists** > **Contact Manager** > Activities, add or edit an activity with an **Event Type** of 'Email Student'.
3. Insert the email text in the **Email Message** box.
4. Click **Save**.
5. To send the email message to a single student, select the student and add the **Student Email** activity to the student's activity list.
6. Click **Save**. The email message is sent and a row is added to the student's list of activities. The staff member assigned to send the email can then close the activity.

   If you add (schedule) an email activity for the group, the message is sent to all members of the group when the activity is saved and an activity is added the student contact history tables.

   If you create a scheduled email activity, when the conditions of the scheduled event are met, the email message is sent to the targeted student or group.

HTML Editor

You can modify, preview, or edit the HTML code directly for emails using the HTML Editor.



The following are common HTML tags that can be used in the Email Message box.

-
- <body bgcolor=?>
-
-
-

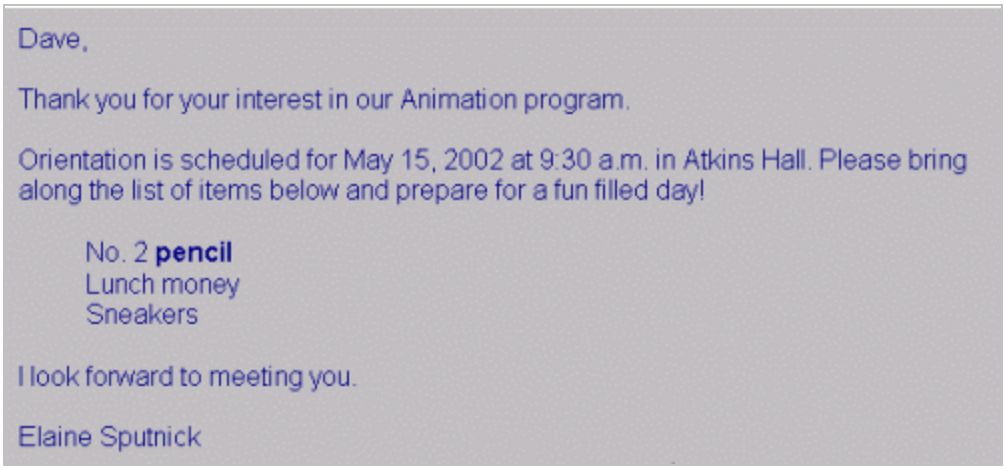
For example, if you enter the following text in the Email Message box:

```
<body bgcolor=silver>
<font color=navy>
<font face=Arial>
<p><StudentFirstName>,</p><br>
<p>Thank you for your interest in our <StudentProgram> program.</p>
<p>Orientation is scheduled for May 15, 2002 at 9:30 a.m. in Atkins Hall. Please bring along the
list of items below and prepare for a fun filled day!</p>
<ul><li>No. 2 <b>pencil</b></li>
<li>Lunch money</li>
<li>Sneakers</li></ul>
<p>I look forward to meeting you.</p><br>
<p>Elaine Sputnik</p></br></font>
```

The following email message is sent to the student:



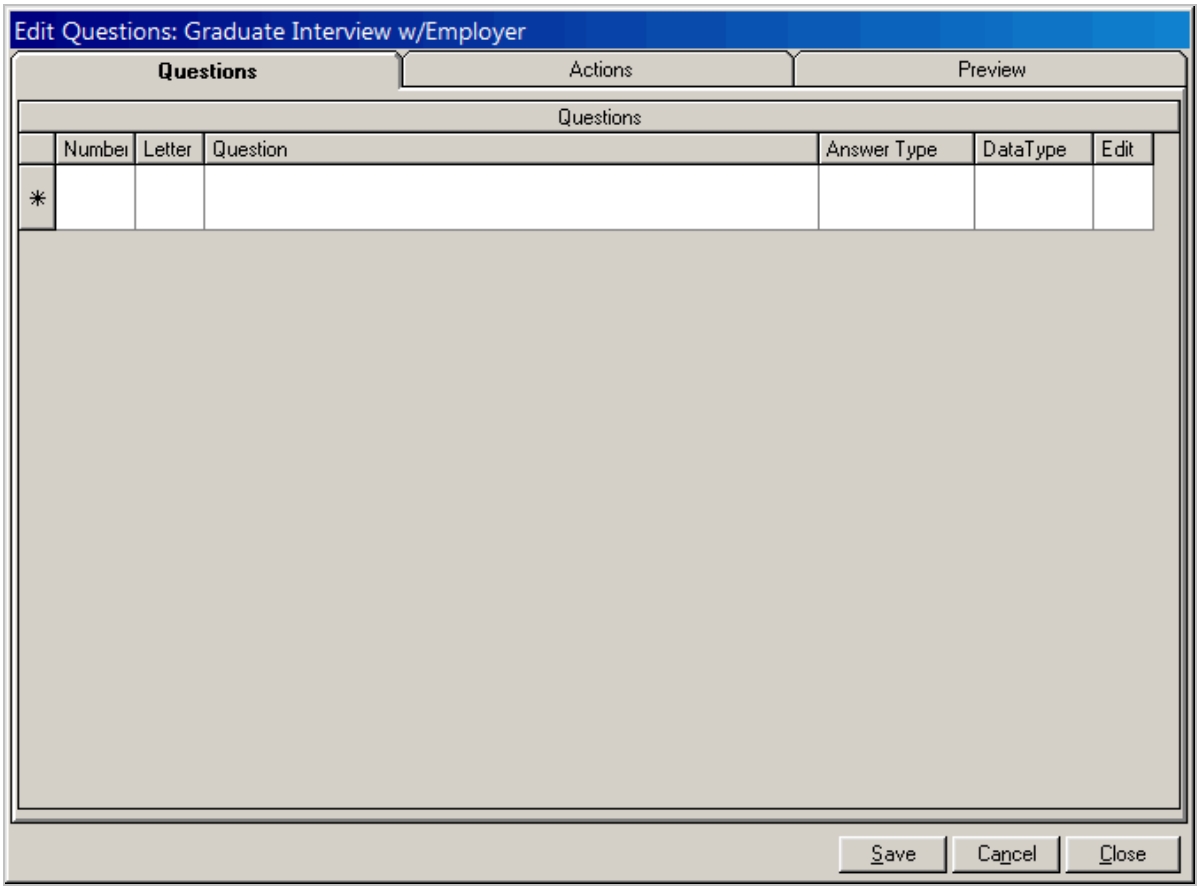
Setup Questions-Script

When you set up some activities in Contact Manager, you can define scripts or list of questions to be used by the staff member who will execute the activities. The purpose of this feature is to ensure that your school gets the information it requires, and the time spent is used efficiently. The types of activities that can have a related script include:

- Telephone call
- Meeting
- E-mail
- Letter

To set up a script and/or questions for an activity:

1. Add or edit a telephone call, meeting, e-mail, or letter activity. See Setup - Contact Manager Lists [Activities].
2. Click **Setup Questions/Script**. The Edit Questions form is displayed.

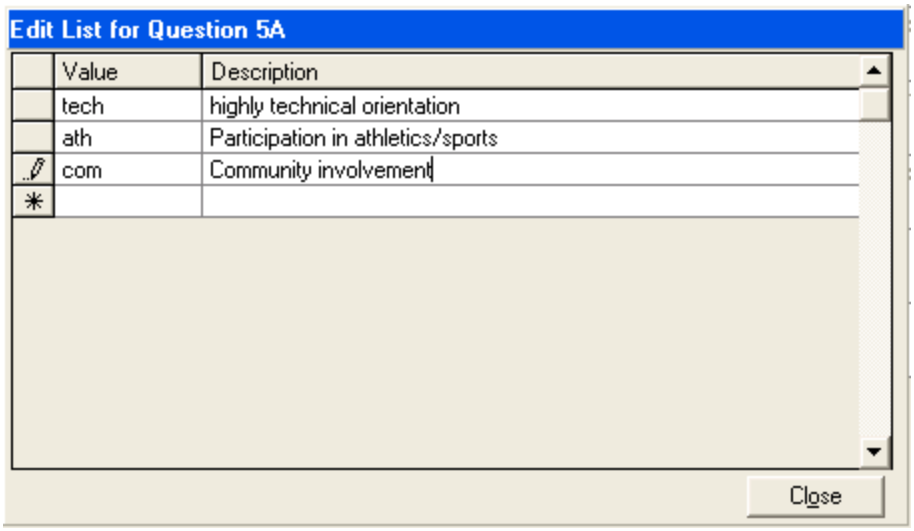


3. In the Questions tab, in the row marked with an asterisk, specify the following:
   - **Number** of the question
   - **Letter** of the question (optional)
   - **Question** text
4. In the same row, click the cell in the **Answer Type** column and click to see a list of answer types. Answer types include:

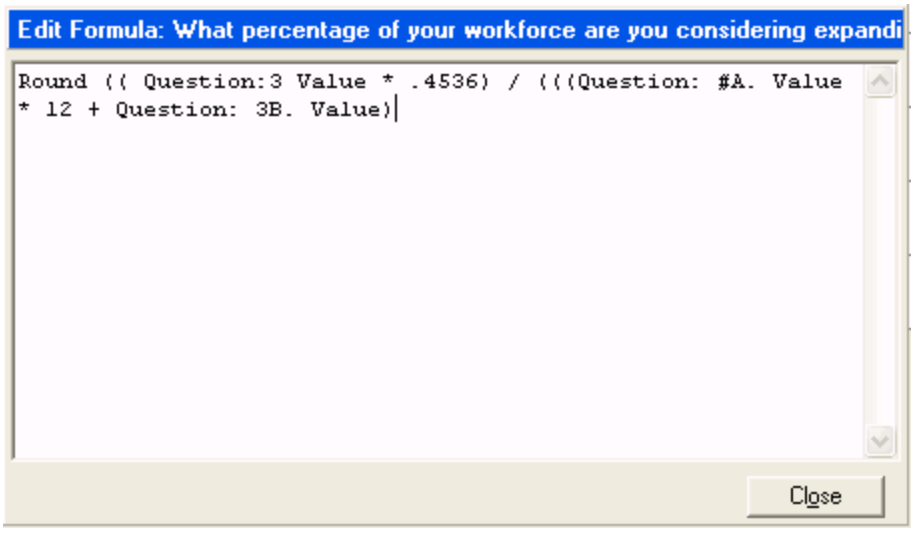
- Yes/No
- True/False
- List of Values
- Plain Text
- Calculation

5. When you select the answer type **List of Values**, click the **Edit** cell, and click the button that appears in the cell. The Edit List for Question form is displayed.

6. Enter the list **Values** and **Descriptions** for your question. Click **Close** to save the list.

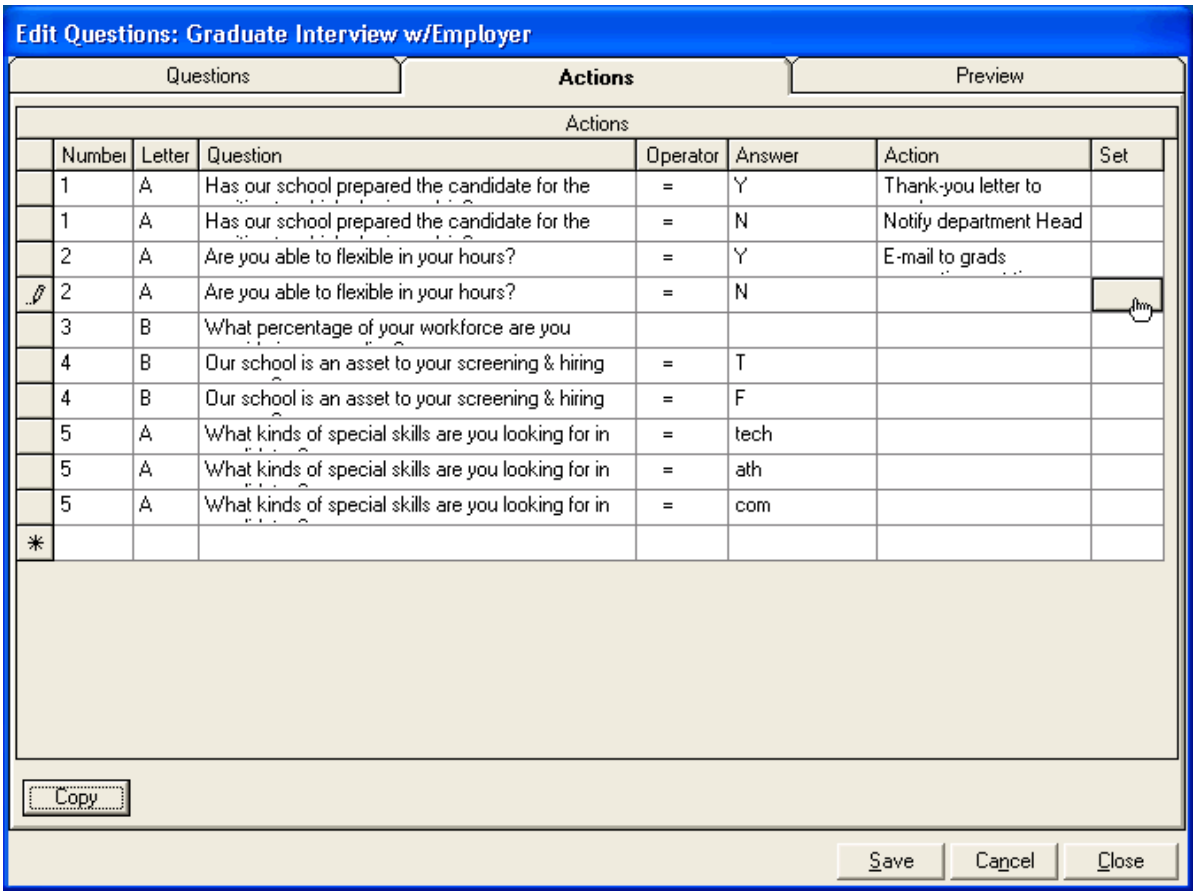


7. When you select the answer type **Calculation**, click the **Edit** cell, and click the button that appears in the cell. The Edit Formula form is displayed. The example below is a formula for calculating body mass using answers to previous questions. It is written in **VB Script** format. When you have entered your formula, click **Close** to save it.

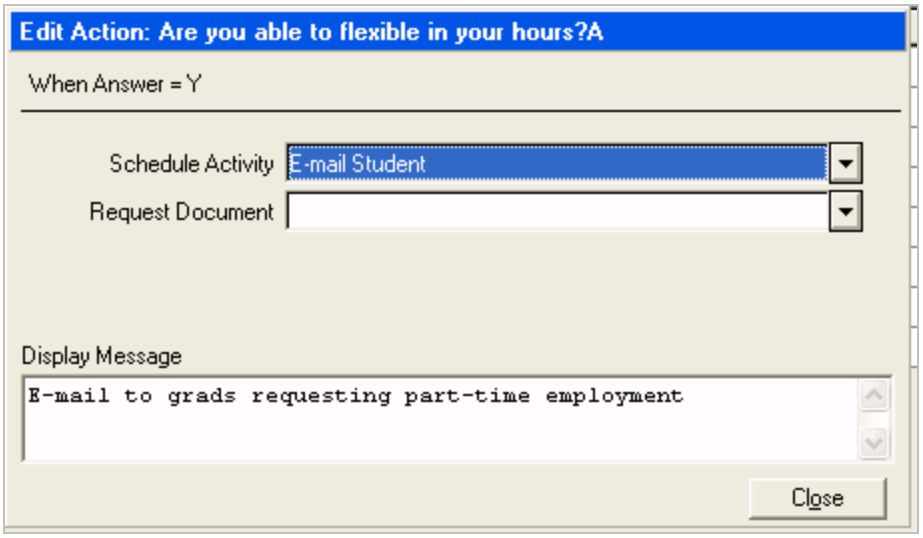


8. After you have entered all your questions, click **Save**.

9. Click the **Actions** tab to assign specific actions to the possible answers to your questions.

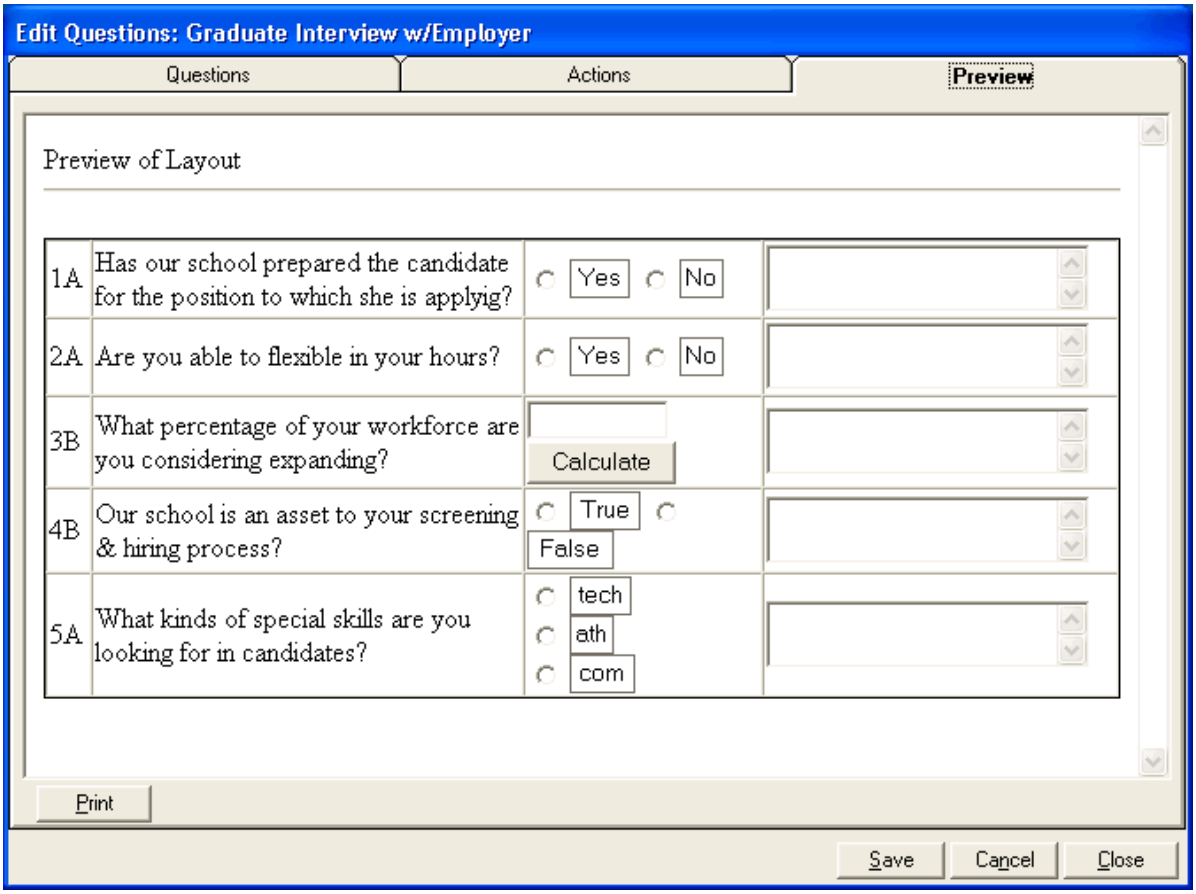


10. Click the **Set** cell to set up an action to be taken in response to the selected answer. The Edit Action form is displayed.



11. Select applicable options to schedule an activity, request a document, and/or display a message.
12. Click **Close** to save your Action selections.
13. Click **Preview** to see a preview of your script layout. The questions and listed answers are displayed as designed

on the Questions and Actions tabs.



14. Click **Print** to print a copy of the questions and answers.
15. Click **Save** to save any additions or changes to your script.
16. Click **Close** to close the form.

Close Activity

The Close Activity form shows the script as it appears when you are working with the Contact Manager. When you close an activity, the Close Activity form displays a Call Script button.

Click the **Call Script** button to see the Close Activity form. The staff member completes the form as the telephone conversation progresses. When the script is completed and saved,CampusNexus Student schedules the designated activities for the new lead.

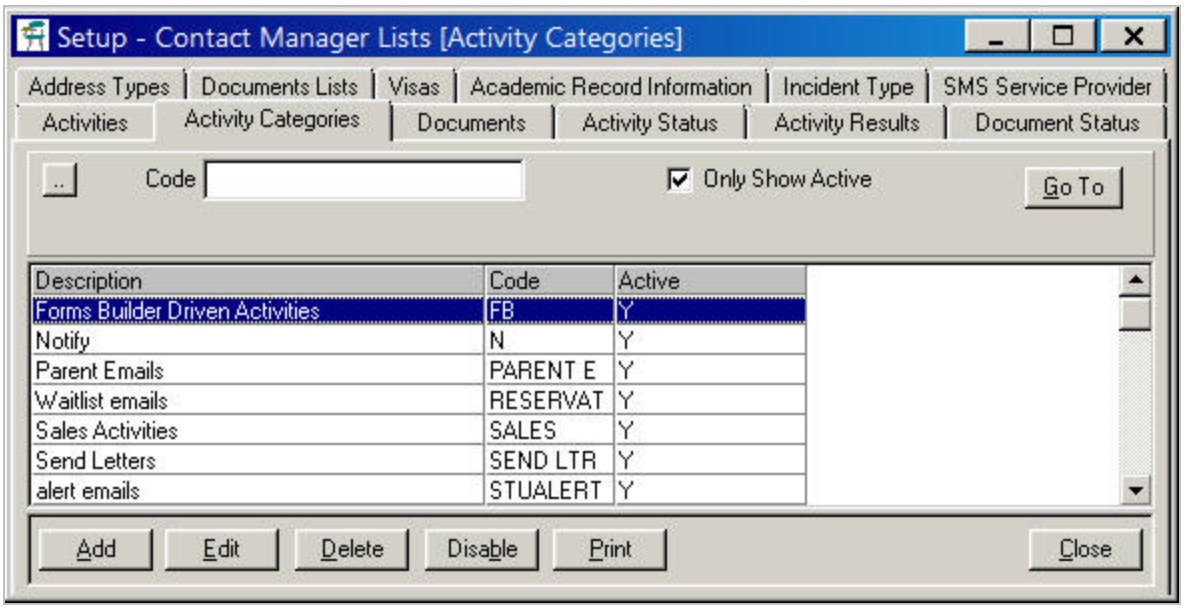
For detailed information on closing an activity, see Daily > Contact Manager > Contact Manager > Activities > Close Activity.

Setup - Contact Manager Lists [Activity Categories]

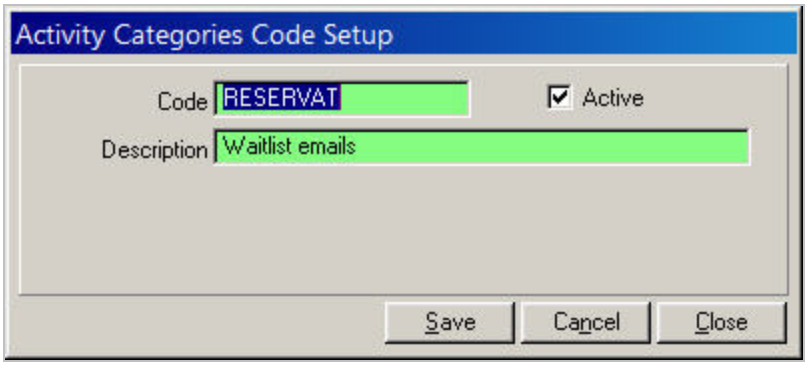
The Activity Categories lists contains codes that can be associated with specific Contact Manager activities. This association is used as a filter in Contact Manager Reports.

To add or edit a list of activity category codes:

1. Navigate to **Lists** > **Contact Manager**. The Setup - Contact Manager Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Activity Categories**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Activity Categories Code Setup form is displayed.



Note: Set up a Waitlist activity category that can be associated with all activities associated with course reservations.

6. Specify a unique **Code**.

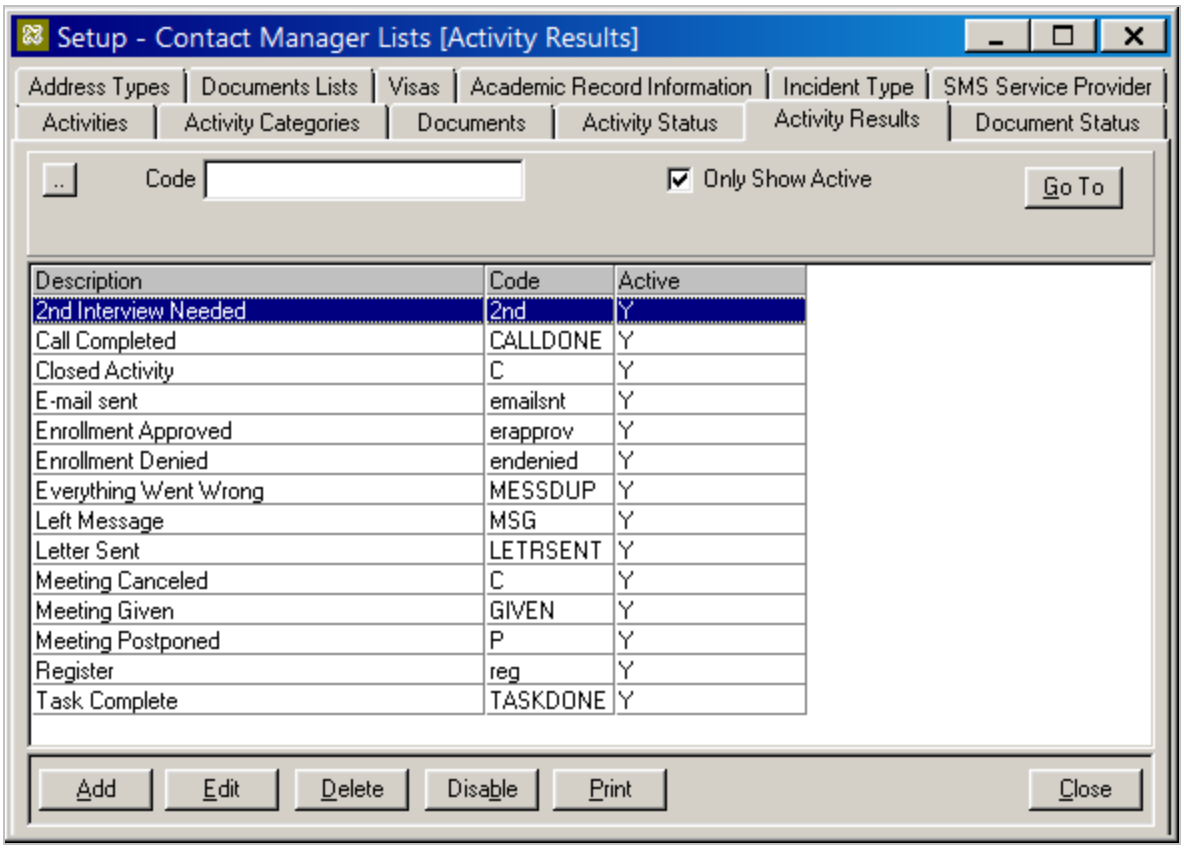
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. Enter a **Description**.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Contact Manager Lists [Activity Results]

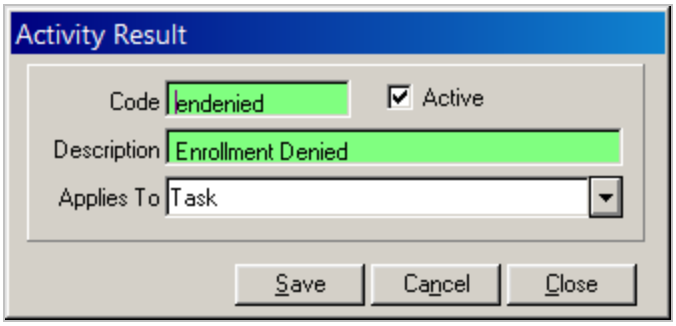
The Activity Results list codes are used to indicate what happens when an activity or task is completed. Part of the result may be a follow-up activity or task.

To add or edit a list of activity results codes:

1. Navigate to **Lists** > **Contact Manager**. The Setup - Contact Manager Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Activity Results**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Activity Results code setup form is displayed.



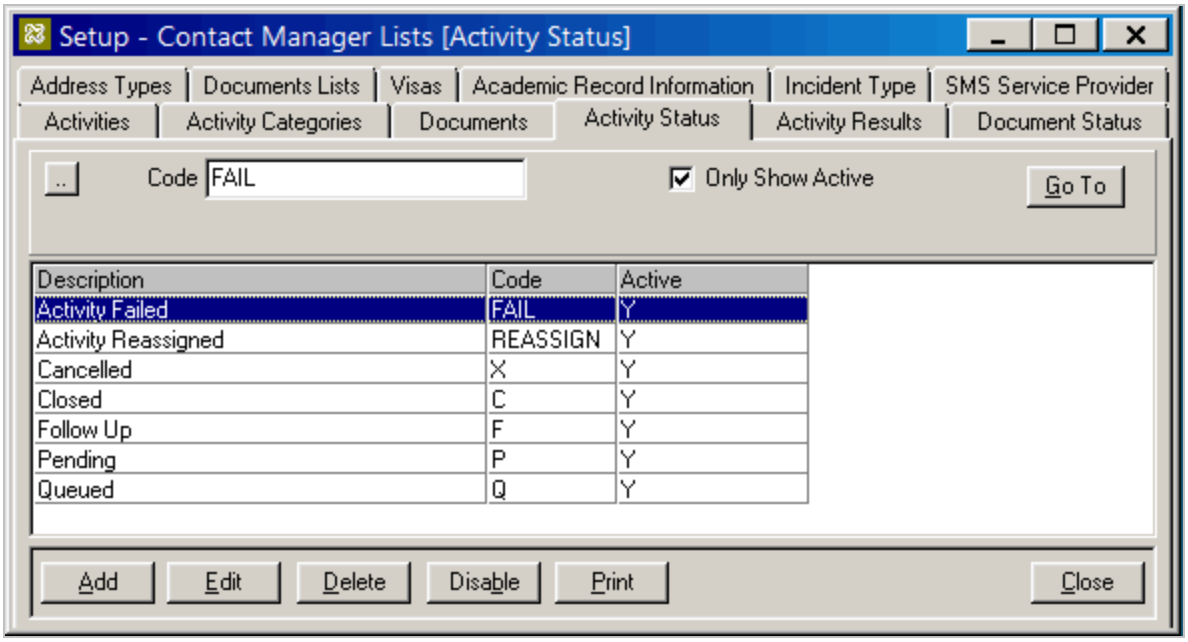
7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.
10. Select an **Applies To** option. The values on the 'Applies To' list are activities to which the activity result code could apply. Set up a different code for each result that might occur for an activity.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Contact Manager Lists [Activity Status]

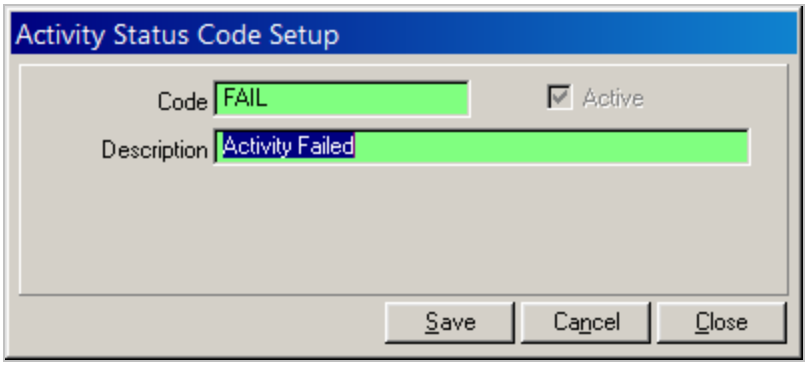
The Activity Status list contains codes that indicate the status of activities assigned to staff members.

To add or edit a list of a activity status codes:

1. Navigate to **Lists** > **Contact Manager**. The Setup - Contact Manager Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Activity Status**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Activity Status Code Setup form is displayed.



6. Specify a unique **Code**.
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.

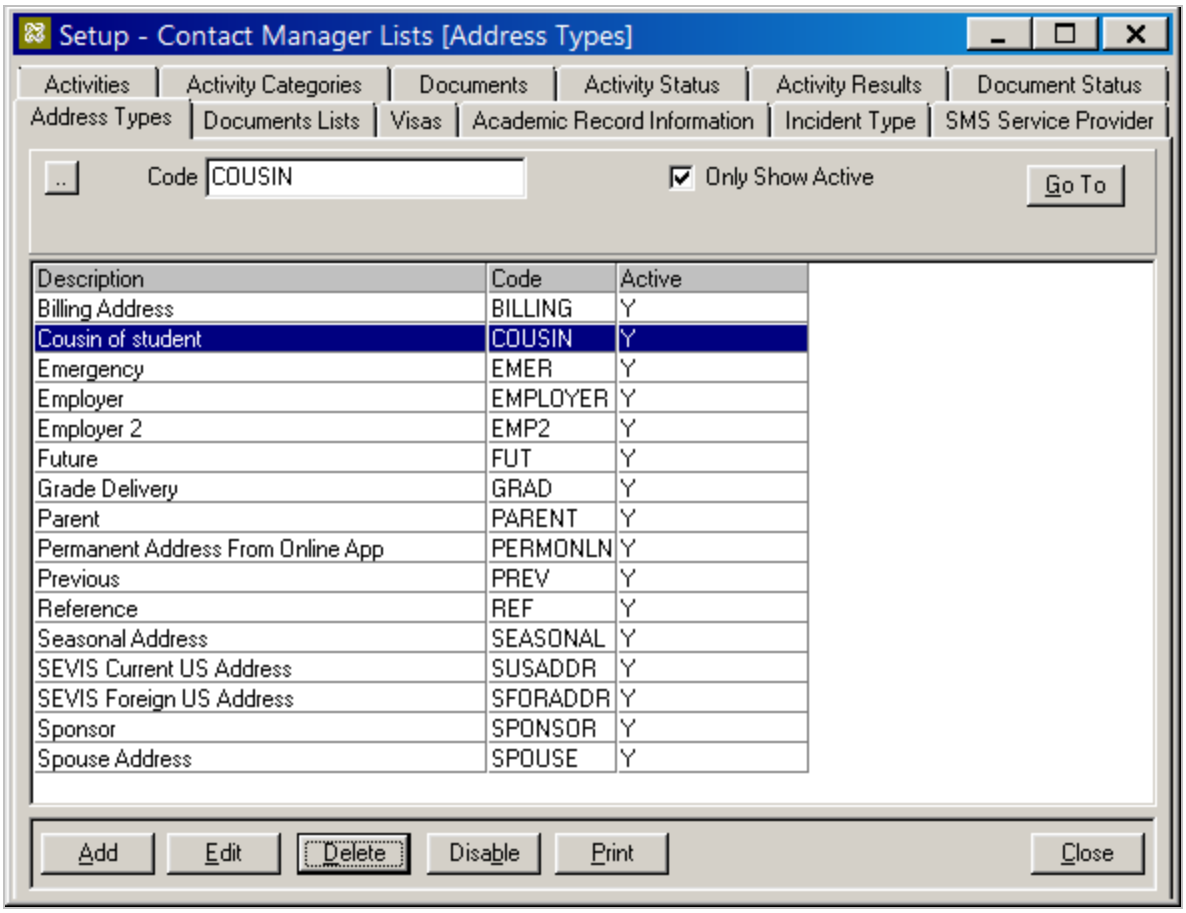
8. Enter a **Description**.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Contact Manager Lists [Address Types]

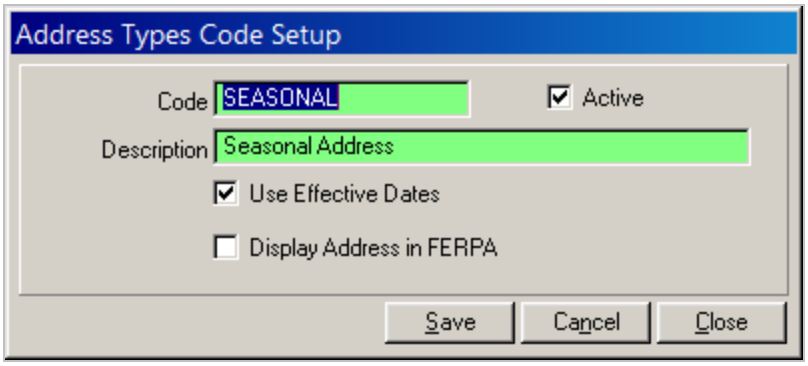
When you record addresses for leads, students, or graduates in CampusNexus Student, you are asked for an address type. The Address Types list is used to define codes for address types used at your institution.

To add or edit a list of address type codes:

1. Navigate to **Lists** > **Contact Manager**. The Setup - Contact Manager Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Address Types**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Address Types Code Setup form is displayed.



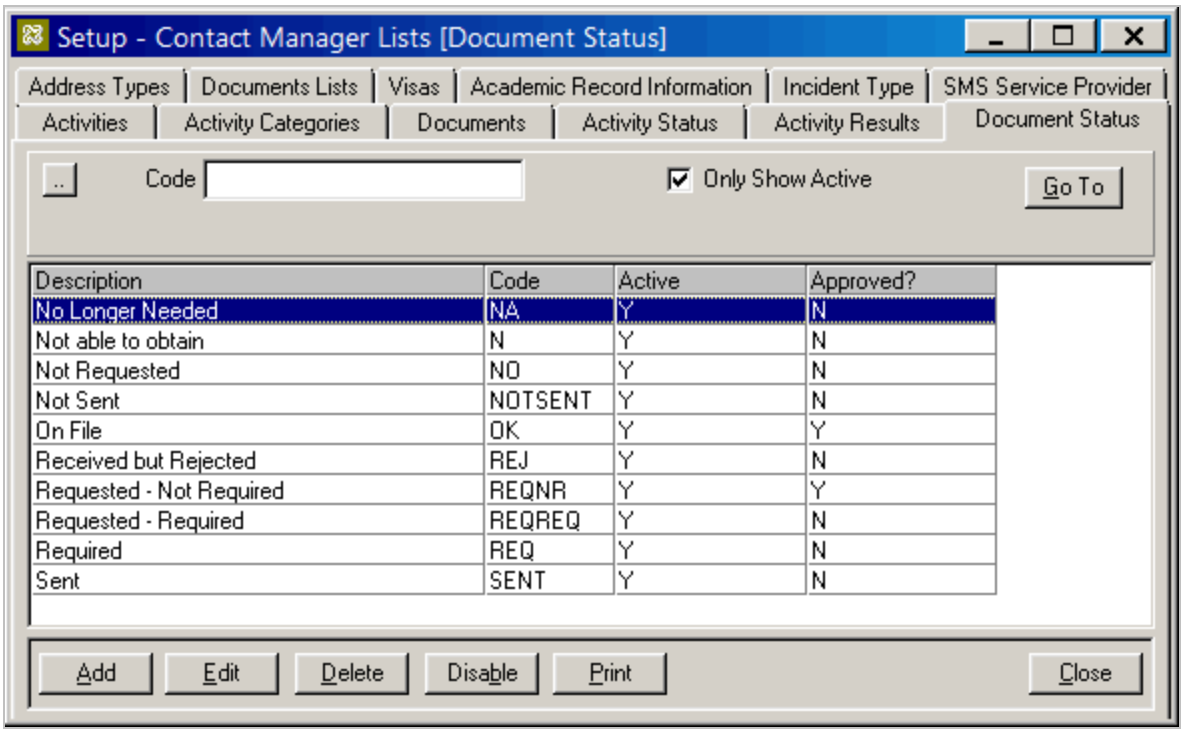
6. Specify a unique **Code**.
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. Enter a **Description**.
9. Select **Use Effective Dates** if the address type code is associated with a seasonal/temporary address. For instance, if a student would like to receive mail at an address for a certain length of time, select the check box and assign the seasonal/temporary address to this address type. See Addresses to associate this address type with a student's address.
10. Select or clear **Display Address in FERPA** as required.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Contact Manager Lists [Document Status]

The Document Status list contains codes that you can assign to documents requested from leads or students. Assign these codes when you are working with the document tracking list for each student and when updating documents under various modules of the Daily menu. In this case, you are selecting a particular document and monitoring its status for groups of students.

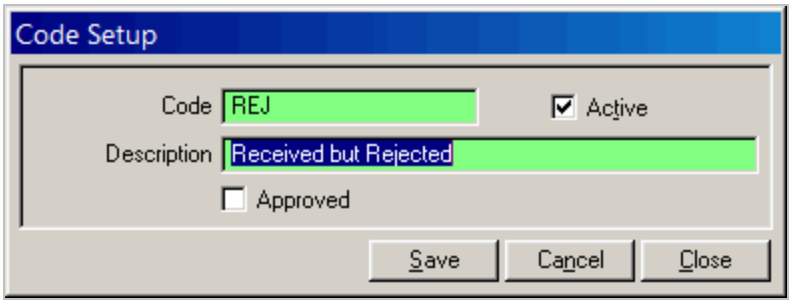
To add or edit a list of document status codes:

1. Navigate to **Lists** > **Contact Manager**. The Setup - Contact Manager Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Document Status**.



Note: *Sent* and *Not Sent* are system-required codes. They are used with outgoing documents.

3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Document Status Code Setup form is displayed.



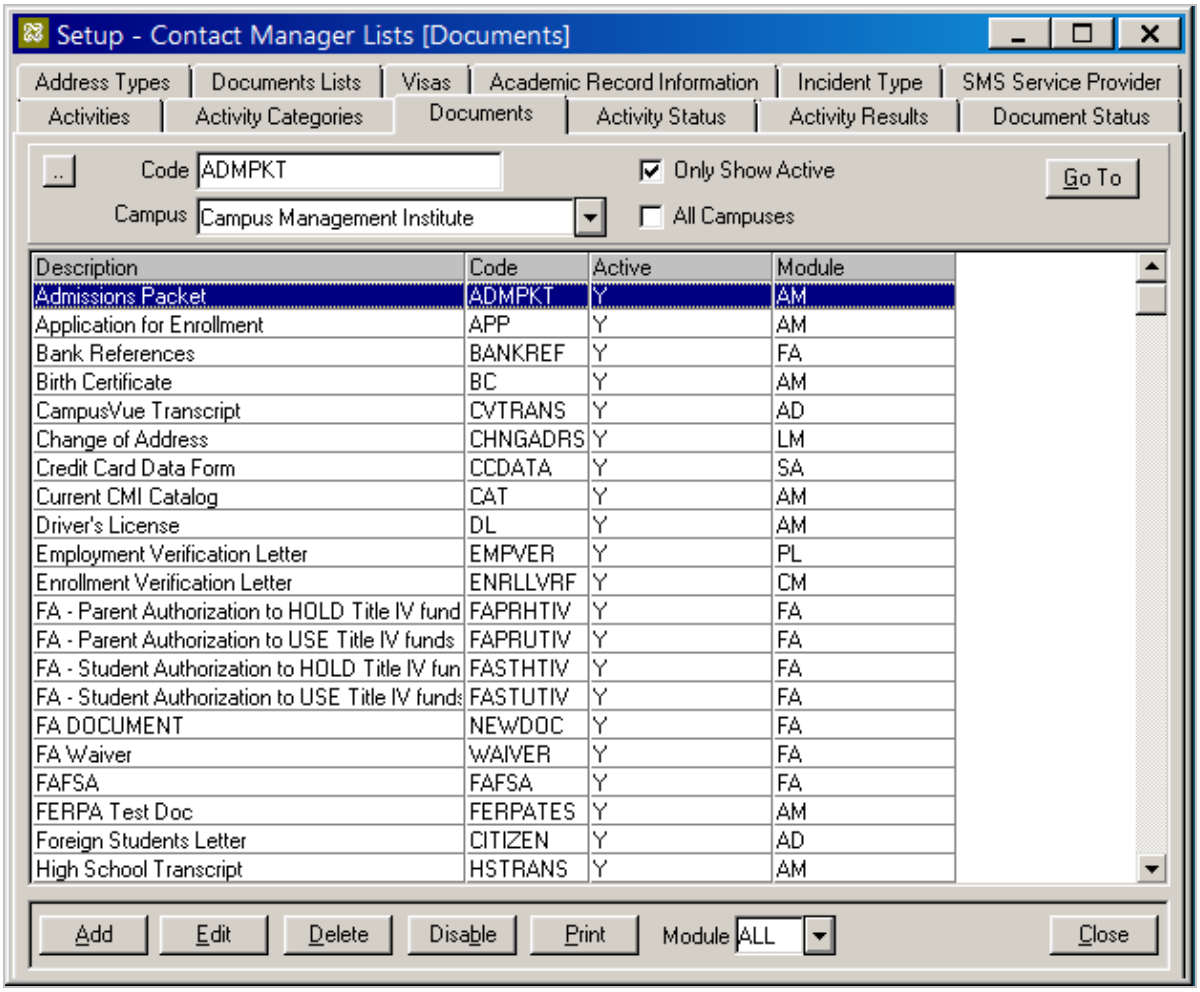
6. Specify a unique **Code**.
7. Enter a **Description**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Select the **Approved** check box to indicate that the document is in an approved status when it is associated with the Code and Description entered above, otherwise clear the check box.
10. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Contact Manager Lists [Documents]

The Documents list contains codes for documents that your institution requests from leads or students or sends to them, for example, a driver's license, high school transcript, or application form. The documents can be related to campus groups, CampusNexus Student modules, academic programs, and sponsoring agencies. The documents are classified by types such as receive/incoming, send and receive, or send out.

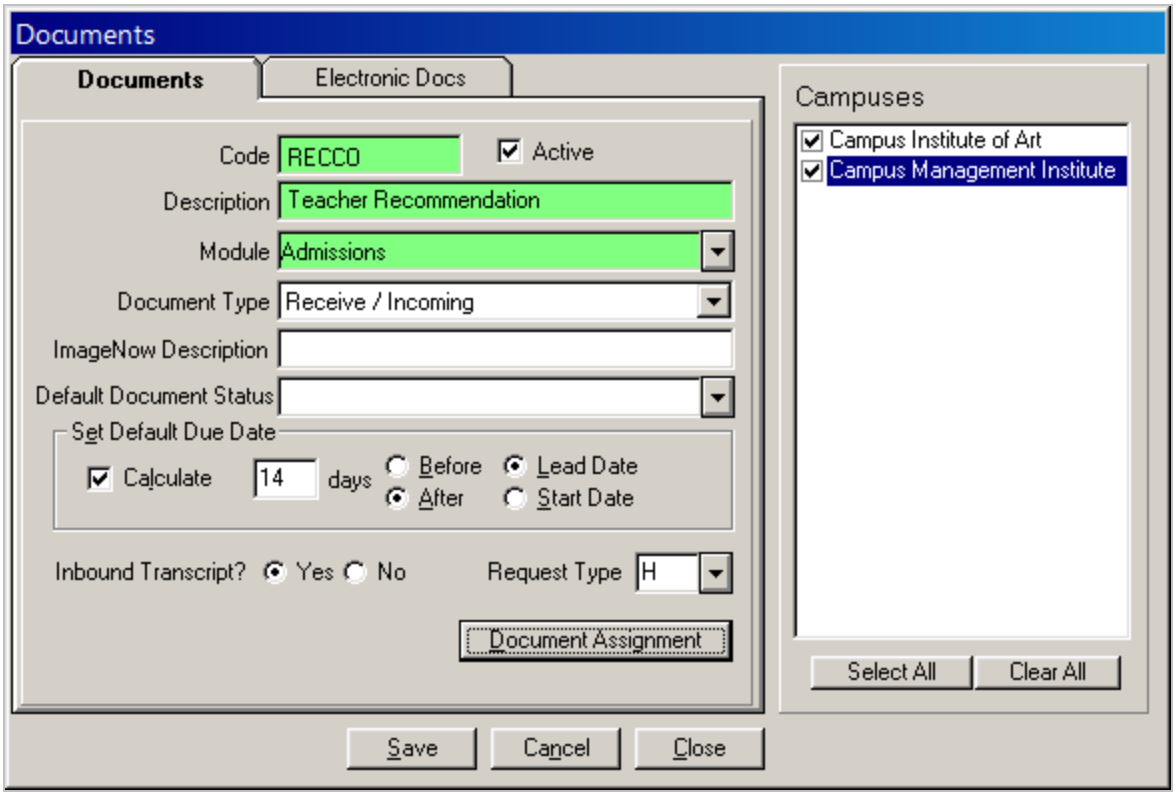
To add or edit a list of document codes:

1. Navigate to **Lists** > **Contact Manager**. The Setup - Contact Manager Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Documents**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.

6. Select a **Module** (at the bottom of the form) to filter the list by module.
7. Click **Add**, or select a record and click **Edit**. The Documents form is displayed.



5. Specify a unique **Code**.
6. Enter a **Description**.
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. Select one or more **Campuses**.
9. Select a CampusNexus Student **Module** that uses the document.
10. Select the **Document Type**. The options are:

    - Receive/Incoming
    - Send Out
    - Send and Return
    - FERPA

    The 'Send Out' and 'Send and Return' document types are available as attachments to letters.

11. The **ImageNow Description** field is displayed only if the selected campuses are set up for ImageNow. The ImageNow application is used to scan, file, display, and send stored documents.

    Enter a description of the document. Your description must match the ImageNow document description exactly. Ask your system administrator for a list of ImageNow document names.

12. Select a **Default Document Status** for your document. This is an optional field for new documents. You can define the default document status that is assigned when a document is triggered. This ability to assign a different default

status to documents allows you to refine your institution's internal work flow as it pertains to student documents. If no default status is selected, document triggers use the status **Requested - Required**.

13. In the **Set Default Due Date** section, selected or clear **Calculate** as required.

    - If you choose to use the calculate option, enter the number of **days**.
    - Select **Before** or **After**.
    - Select **Lead Date** or **Start Date**.

    These values are used to determine the due date when the documents are automatically added to the student document list. These fields are NOT used when a user manually adds documents to the students document folder. They are also used when selecting "fulfillment" documents for a contact manager item that has attached documents.

    Note: When the document is set up on the Program Version (as opposed to the Program), the Due Date is generated based on the Expected Start Date from the Enrollment wizard (rather than from the Student Master).

14. In the **Inbound Transcript?** section, select **Yes** if this is a document coming from another school.

15. The **Request Type** field is enabled if you selected Yes for Inbound Transcript? Select **C** for College, **H** for High School to indicate the source of the document.

16. The **Placement Specific** check box is displayed if the selected Module is Career Services. If this check box is selected, multiple documents with this code can be added to the student's document list for each enrollment record.

17. The **Is Award year Specific?** check box is displayed if the selected Module is Financial Aid. Select this check box to indicate that the document is award-year specific.

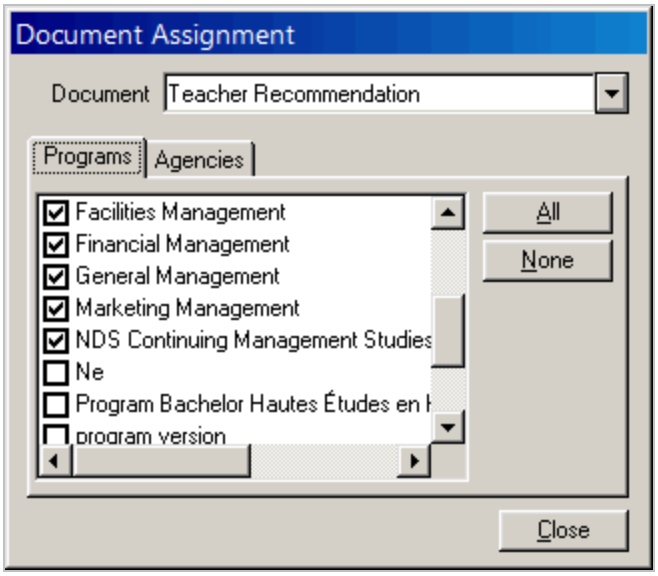
18. The **Registration Prerequisite Document** check box is displayed if the Module is Academic Records. This check box allows the document to be configured as a course or course section prerequisite. Additionally, the check box enables the Permit Details tab when adding a Registration Prerequisite Document to a student's Documents folder. Within the Permit Details tab, you can specify the course for which the document should allow registration.

    - When Registration Prerequisite Document check box selected, Inbound Transcript controls are disabled and set to No.
    - When Inbound Transcript is set to Yes, the Permit Check check box is disabled and cleared.

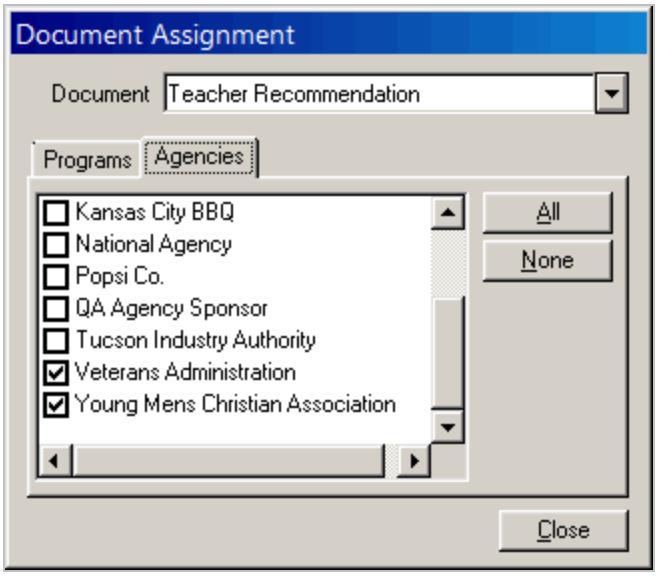
18. Click the **Document Assignment** button to assign the document to programs and/or Sponsoring Agencies. The Document Assignment form is displayed.

19. Verify that the correct document is displayed in the **Document** field.

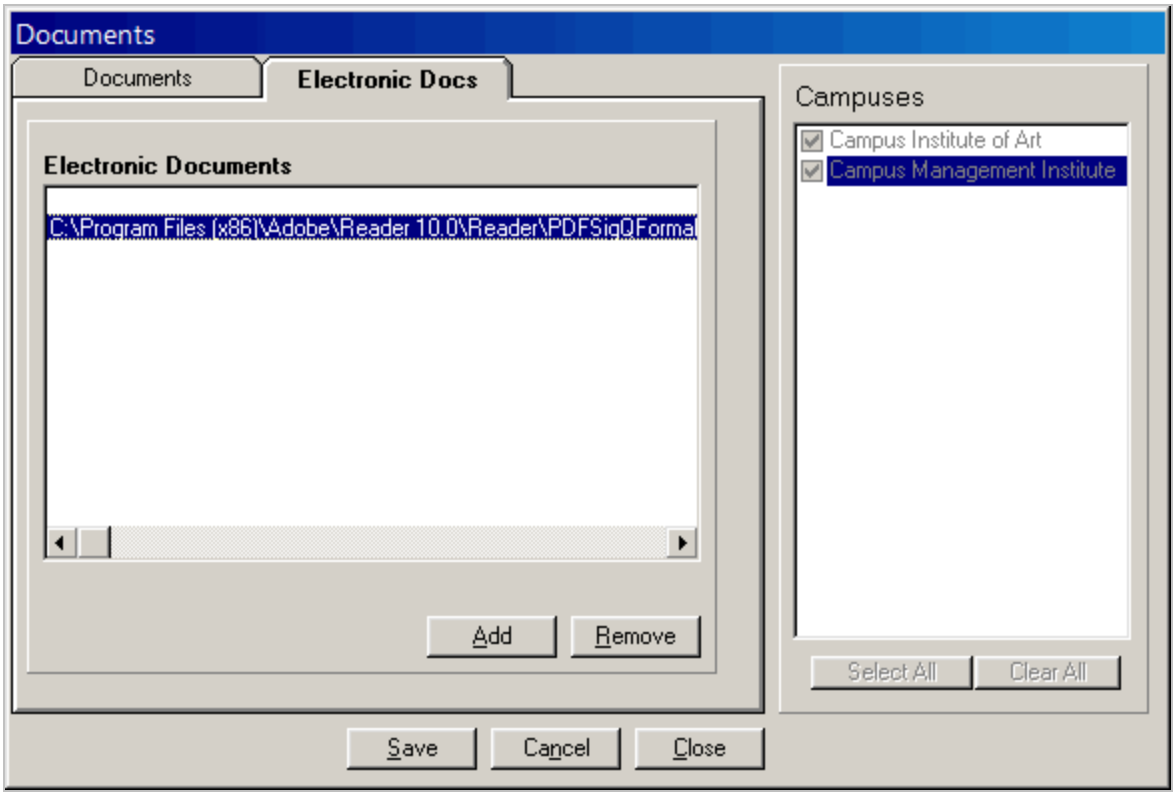
20. In the **Programs** tab, select the programs for which the document is required.



21. In the **Agencies** tab, select agencies for which the document is required.



22. Click **Close** to close the form.
23. The **Electronic Docs** tab is enabled if you select *Send and Return* or *Send Out* in the Documents tab. This tab enables you to add and remove electronic documents that have been scanned into the institution's system.



24. Click **Add**. The Open form is displayed. Browse the directories and select the file that you want to include in the Document List. Only one electronic document can be added in the Student Document folder.

    Note: Ensure that the documents are stored in a folder which is accessible by the COM server. The Windows Service retrieves documents from the path defined in the Downloadable Documents Path and cannot retrieve the document if the path does not refer to a local path or a shared public folder. For assistance contact your system administrator.

25. Select a file and click **Remove** to delete a file from the list.

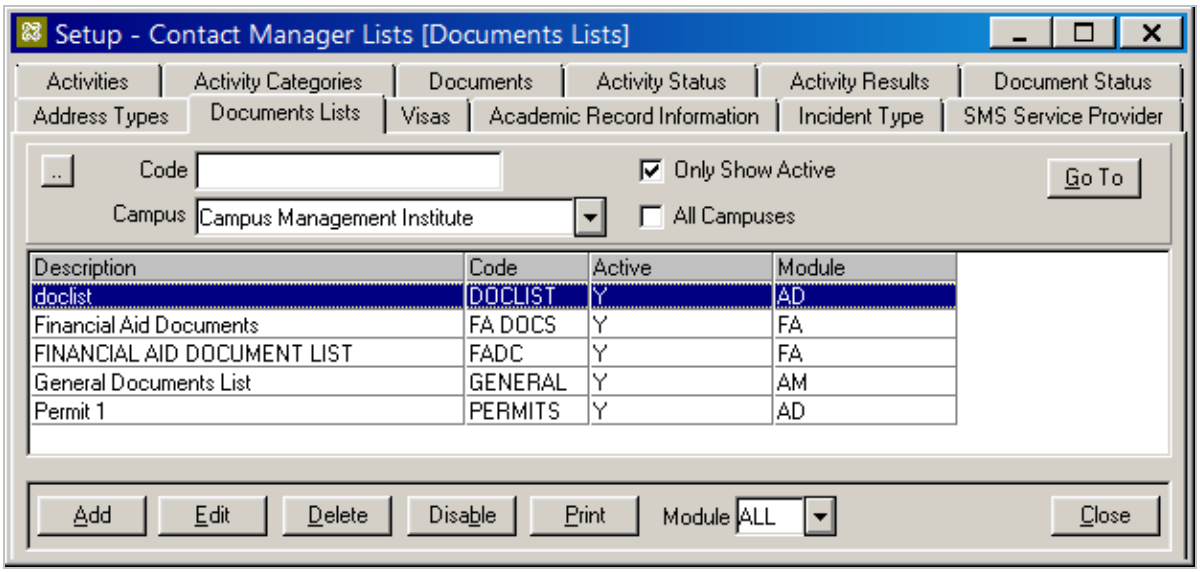
26. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Contact Manager Lists [Document Lists]

Document Lists define sets of documents that can be assigned to a student based on various parameters. You can create Document Lists that are specific to campus groups and assign documents to students based on school-defined criteria.

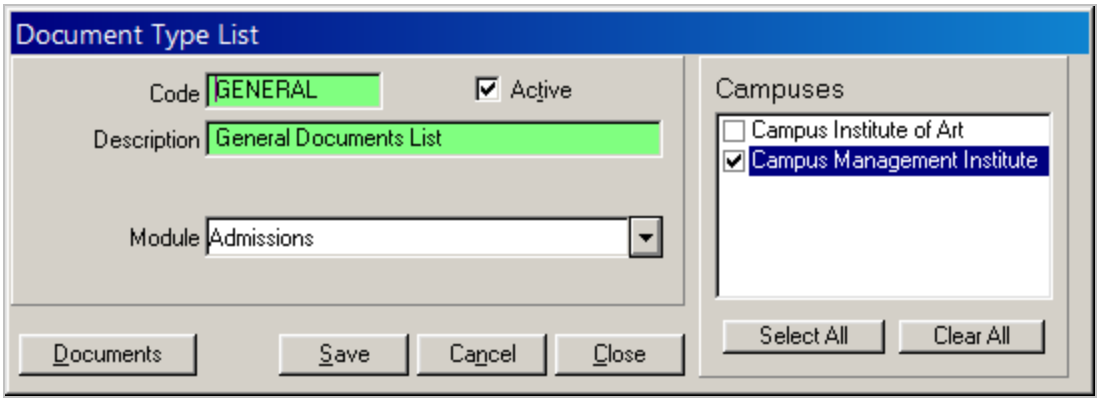
To add or edit a list of document list codes:

1. Navigate to **Lists** > **Contact Manager**. The Setup - Contact Manager Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Document Lists**.



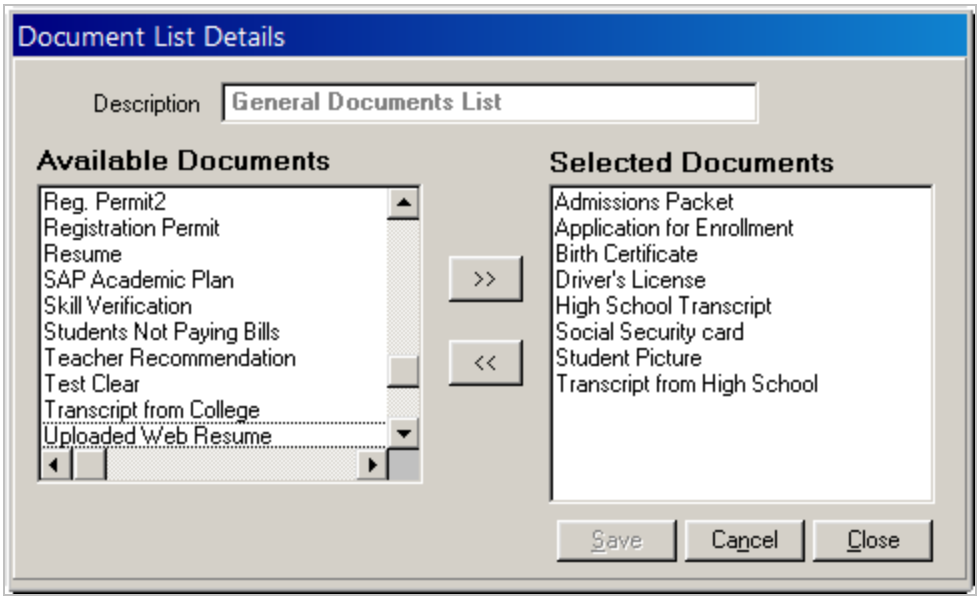
3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Document Type List form is displayed.

   Note: The Documents button is disabled if this form is activated in Add mode. The Documents button is enabled after you save the Document List record, or if this form is activated in Edit mode.



7. Specify a unique **Code**.
8. Enter a **Description**.
9. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
10. Select one or more **Campuses**. The list of campuses that is displayed in the Campuses field include only those to which you are authorized to assign document lists.
11. Select a CampusNexus Student **Module** to which the Document List applies, for example Financial Aid, Student Accounts, Housing, and so on.

    The Module list displays the same values as the Module list on the Documents form (frmCmDocType).
12. Click **Save**. The CM Document Type List table is updated.
13. Click **Documents** to select documents for the Document List. The Document List Details form is displayed.



14. To add a document to the list, select it in the **Available Documents** area and click >>.
15. To remove a document from the list, select it in the **Selected Documents** area and click <<.

16. Click **Save**. All documents in the Selected Documents column are updated to the CM Document Type List Detail table.

    CampusNexus Student first deletes any existing rows in the table for the document list being edited or added. A row for each selected document is then inserted into the table.

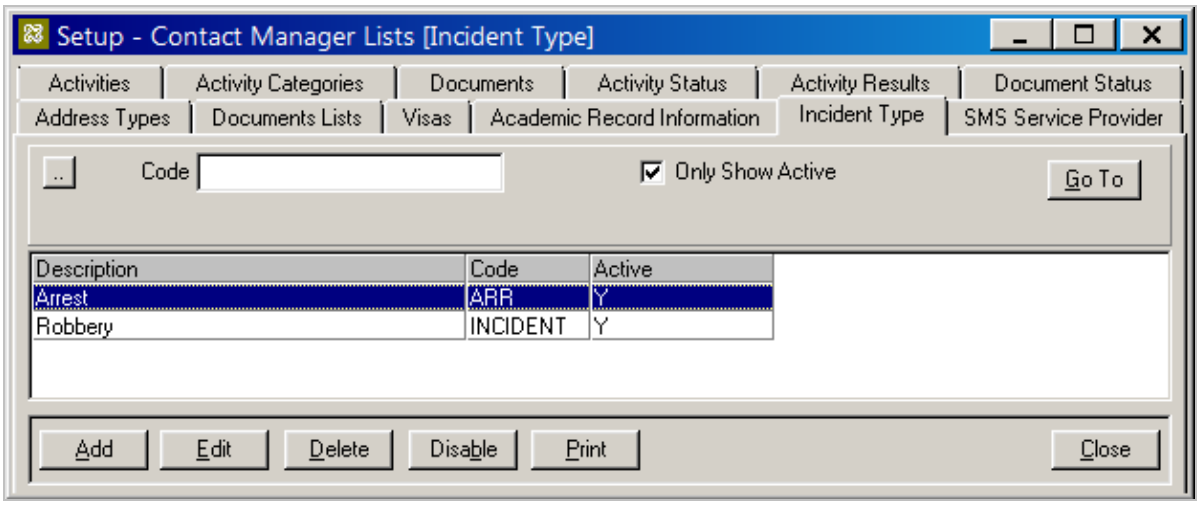
17. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Contact Manager Lists [Incident Type]

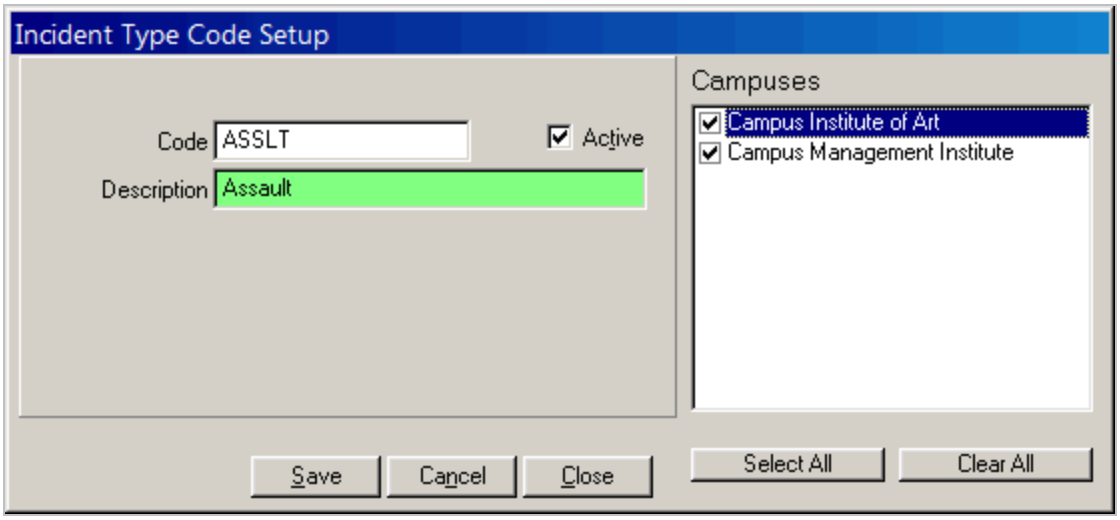
The Incident Type list defines codes for student conduct violations that occur on a campus. Users can track student conduct violations that need to be included in the Jeanne Clery Campus Crime Report. This report is a federally required statistical reporting of all student conduct violations that occur for the population of students on a campus.

To add or edit a list of incident type codes:

1. Navigate to **Lists** > **Contact Manager**. The Setup - Contact Manager Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Incident Type**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Incident Type Code Setup form is displayed.



6. Specify a unique **Code**.

7. Enter a **Description**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Select one or more **Campuses**. The list of campuses that is displayed in the Campuses field include only those to which you are authorized to assign incident types.
10. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

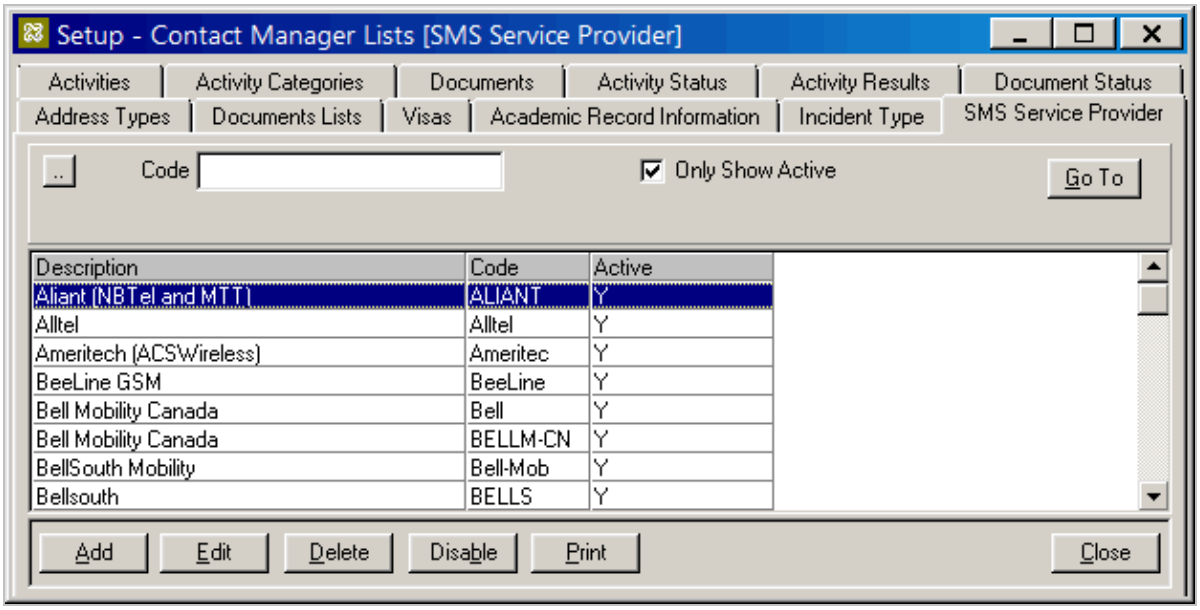
Setup - Contact Manager Lists [SMS Service Providers]

Students can subscribe to Short Message Service (SMS) communications from their campus on their mobile phones, tablets, desktop computers, and some fixed phones.

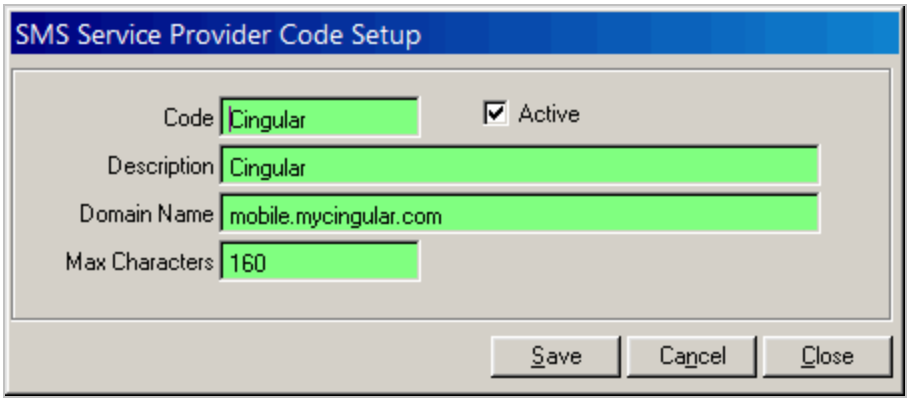
Institutions can configure the settings for the SMS service providers for each campus from the SMS Service Provider tab on the Campus Information form.

To add or edit a list of SMS service provider codes:

1. Navigate to **Lists** > **Contact Manager**. The Setup - Contact Manager Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **SMS Service Provider**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The SMS Service Provider Code Setup form is displayed.



7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.
10. In the **Domain Name** field, specify a location for the service provider (75 characters maximum).
11. In the **Max Characters** field, specify the maximum number of characters (3 digits maximum) that can be used in a text message before exceeding the service provider's limit.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

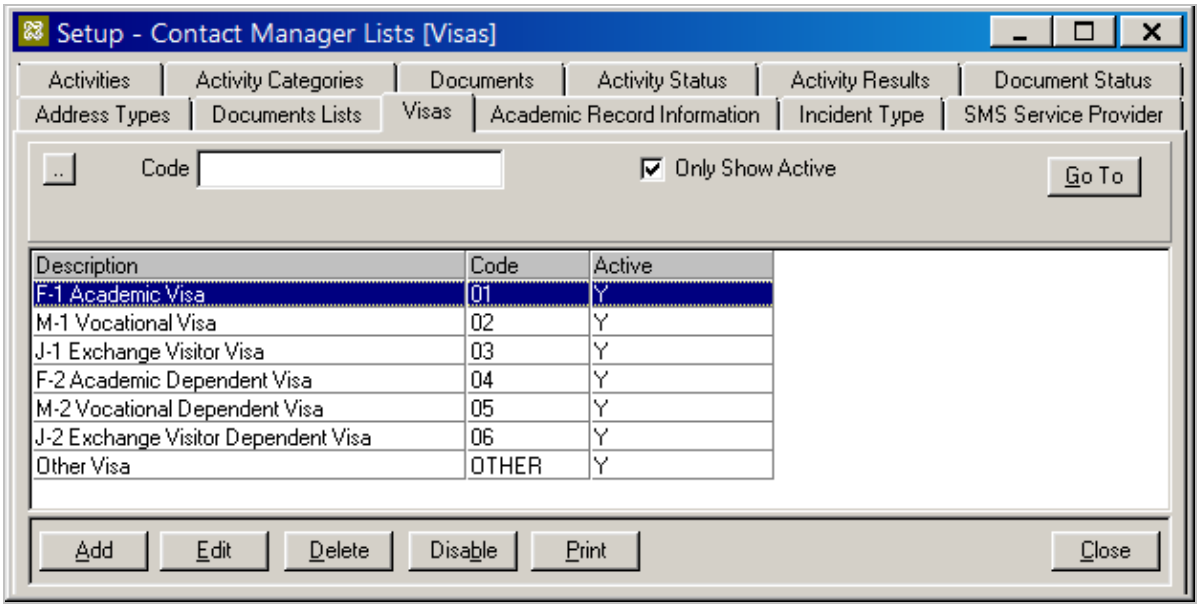
Setup - Contact Manager Lists [Visas]

The Visas list contains codes for SEVIS processing and transmission to the SEVIS system. Codes 01 through 06 are system codes. They cannot be deleted. The "Other Visa" code was added as an example of a school-defined code. Student records with this type of visa (or any other school-defined visa code) are not transmitted to SEVIS.

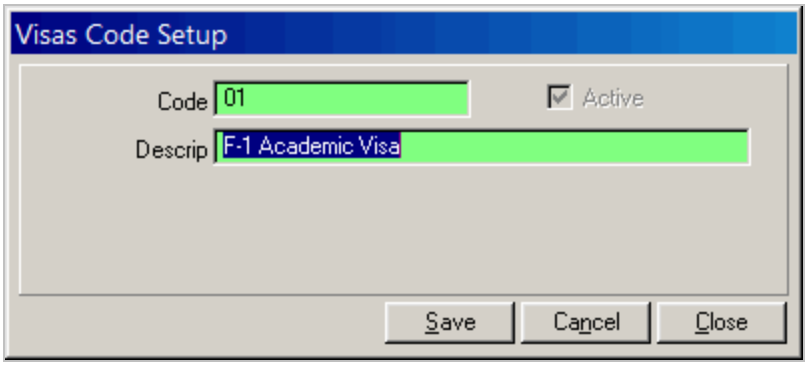
Refer to SEVIS Overview for more on the SEVIS features in CampusNexus Student.

To add or edit a Visa code:

1. Navigate to **Lists** > **Contact Manager**. The Setup - Contact Manager Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Visas**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Visas Code Setup form is displayed.



6. Specify a unique **Code**.

Codes 01 through 06 are system codes. You can edit the description of the system codes if necessary. In the illustration, the description was edited by adding the words "Academic Visa".

7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. Enter a **Description**.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Integration of Contact Manager Activities

As of Release 14.0, when CampusNexus Student is integrated with a CRM system, you can integrate selected activities on a per campus basis. When Release 14.0 is installed, by default, all Contact Manager activities are non-integrated. Integrating only selected activities enhances performance by reducing the number of messages sent from CampusNexus Student through Connector to the CRM and reduces the risk that sensitive information is passed to the CRM system.

Previously, when CampusNexus Student was integrated with a CRM system, all Contact Manager activities were integrated by default. There was no option to configure which activities to share with the CRM system. As a result, numerous records that were not relevant for the CRM system were migrated to and archived in the CRM system.

Integrating Activities with a CRM System

When CampusNexus Student is integrated with a CRM system, you can select Contact Manager activities to be integrated and to specify the effective date of the integration using the following procedures.

Prerequisite: CRM integration must be enabled at the CampusNexus Student system level.

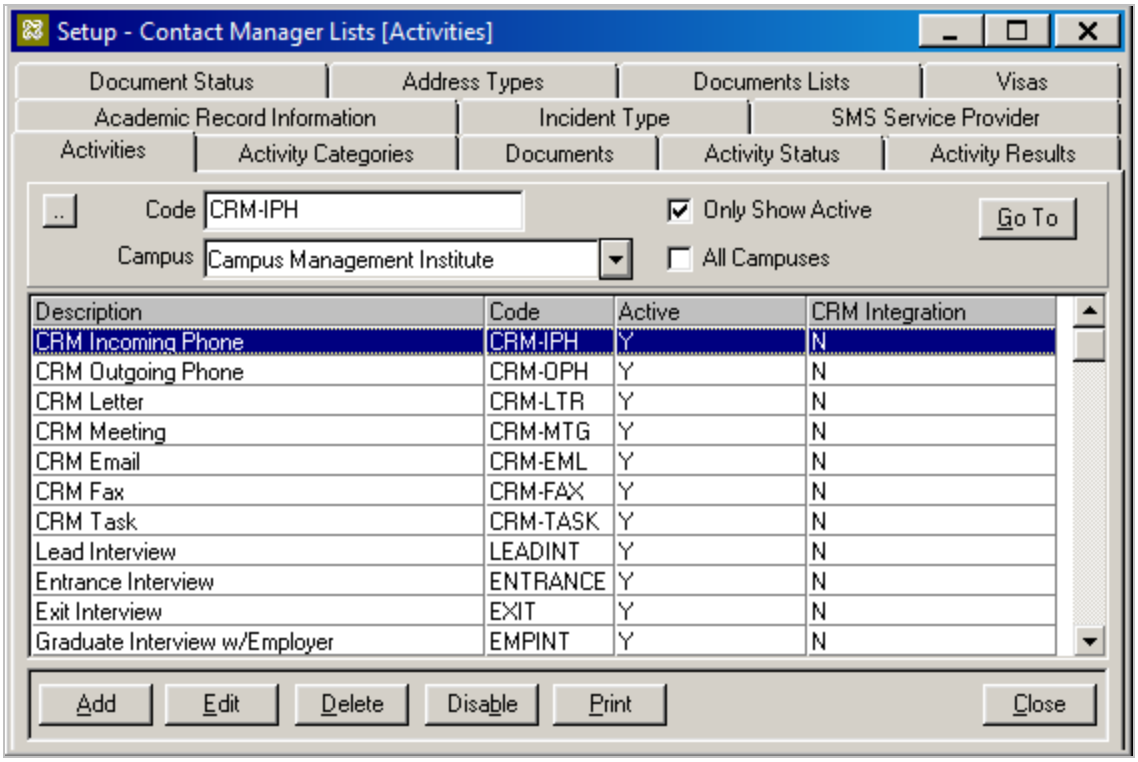
To verify that the prerequisite is met:

1. Navigate to **Setup** > **System**. The System Settings form is displayed.
2. Click the **Integration** tab. The Integration tab of the System Settings form is displayed.
3. Verify that the **CRM Integration** check box is selected.

To integrate selected Contact Manager activities with a CRM system:

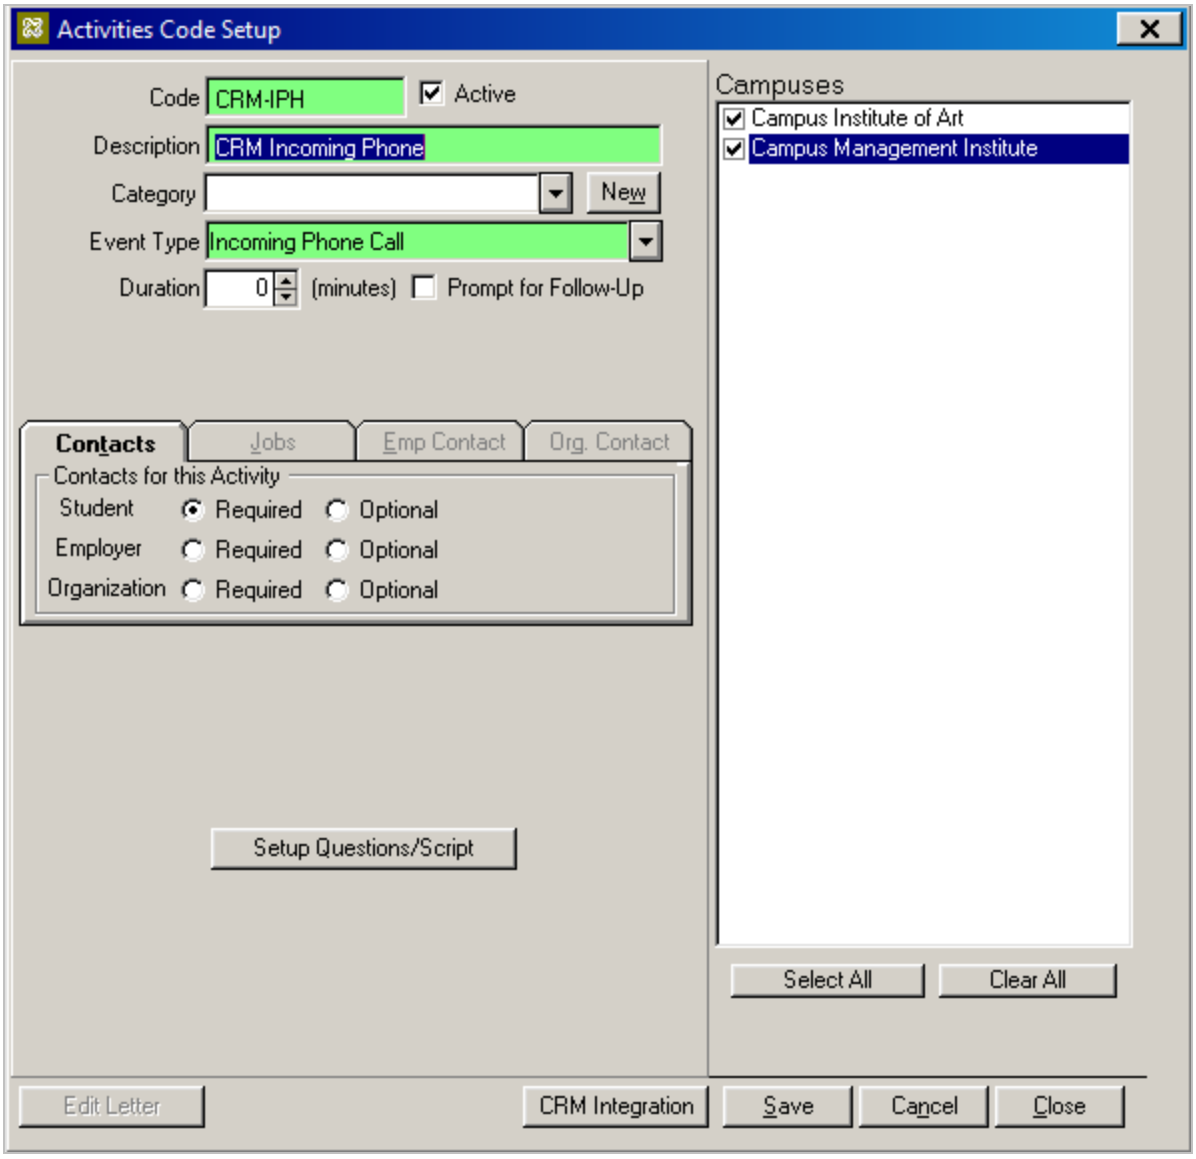
1. Navigate to **Lists** > **Contact Manager** > **Activities**(tab). The Setup - Contact Manager Lists (Activities) form is displayed.

   Note: When CRM Integration is enabled at the system level, the CRM Integration column is displayed in the Activities grid. In this column, integrated activities are marked with a Y; non-integrated activities are marked with an N.

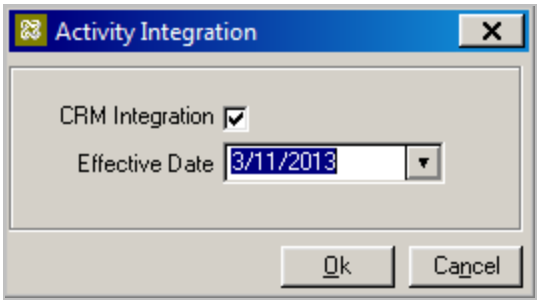


2. Select an **Activity** and click **Edit**. The Activities Code Setup form is displayed.

   Note: Only when CRM Integration is enabled at the system level, the CRM Integration button is displayed on the Activities Code Setup form.



3. On the Activities Code Setup form, click **CRM Integration**. The Activity Integration form is displayed.



4. Select the **CRM Integration** check box and enter an **Effective Date**. Activities that occur on or after the Effective Date are integrated.

Note: If the Effective Date is changed to a later date and the activities have previously been integrated for some students, then the activities will remain integrated for those students, but won't be integrated for future students.

Examples:

If the Effective Date on the Activity Integration form is today's date, 3/15/2013, and the activity gets created using this template on 3/15/2013 and later, then the activity will be integrated. If the activity gets created using this template on 3/14/2013, then the activity will NOT be integrated.

If you change the Effective Date from 3/15/13 to 3/12/13 and if this activity is already integrated, then there will be no impact on the integrated activity. In other words, once the activity is integrated it remains integrated.

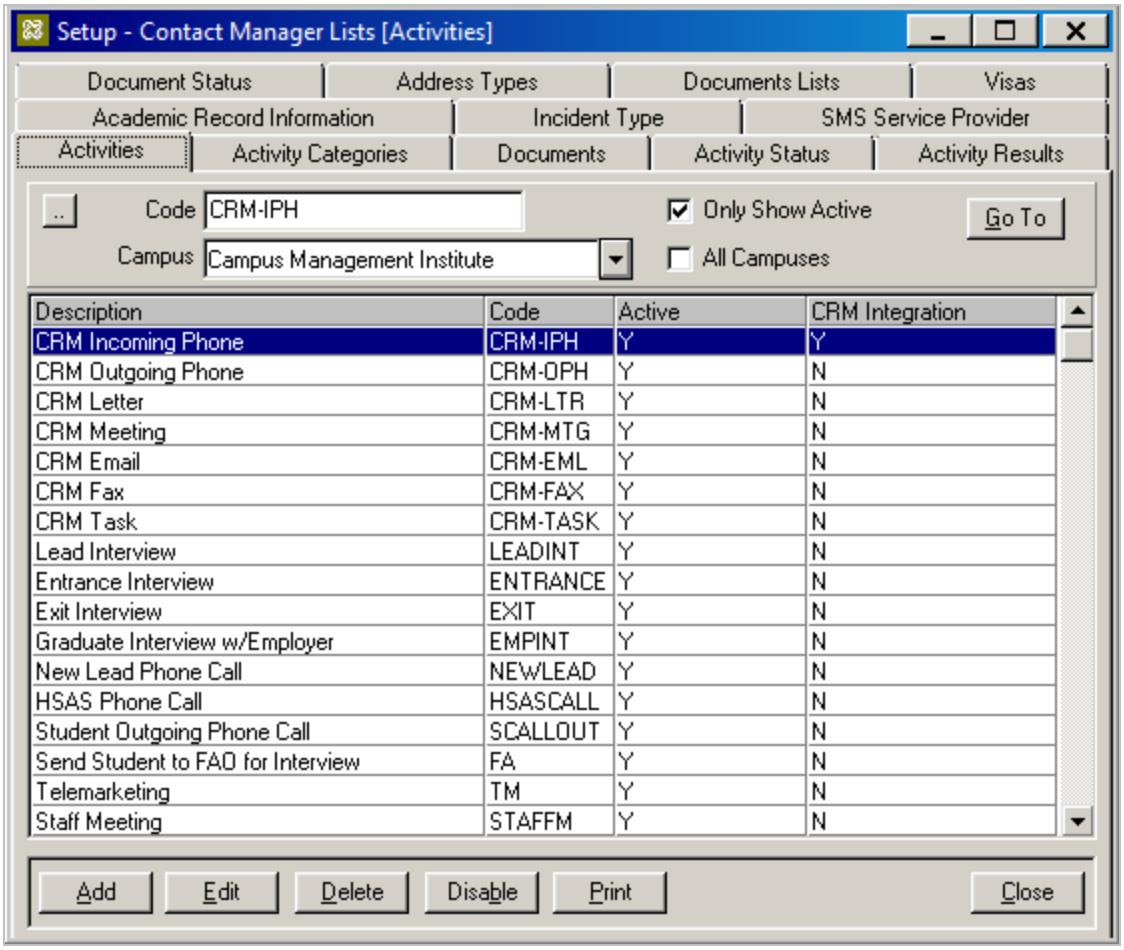
5. Click **Ok**. The Activity Integration form closes.
6. On the Activities Code Setup form, click **Save** and **Close** .

   The integrated activity is now marked with a Y in the CRM Integration column on the Setup - Contact Manager Lists (Activities) form.

To remove the integration of Contact Manager activities with a CRM system:

1. Navigate to **Lists** > **Contact Manager** > **Activities** (tab). The Setup - Contact Manager Lists (Activities) form is displayed.

   Note: Integrated activities are marked with a Y, non-integrated activities are marked with an N in the CRM Integration column.



2. Select an integrated **Activity** and click **Edit**. The Activities Code Setup form is displayed.
3. Clear the **CRM Integration** check box.
4. Click **Ok**. The Activity Integration form closes.
5. On the Activities Code Setup form, click **Save** and **Close** .

   The integrated activity is now marked with a N in the CRM Integration column on the Setup - Contact Manager Lists (Activities) form.

Producing a Report on Integrated Activities

When CampusNexus Student is integrated with a CRM system, specific Contact Manager activities may be configured to be integrated, while other activities are not integrated. You can produce a report that displays the integration status of activities using the following procedure.

Prerequisite: CRM integration must be enabled at the CampusNexus Student system level.

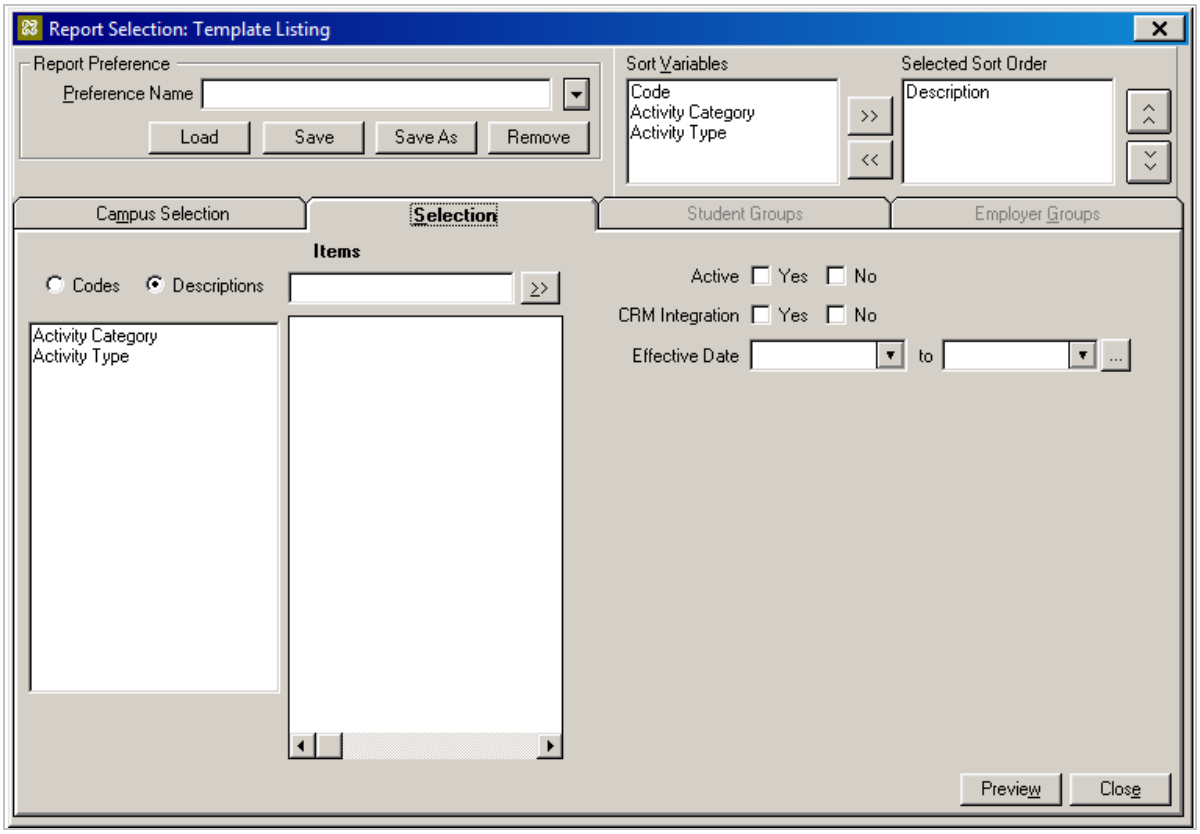
To verify that the prerequisite is met:

1. Navigate to **Setup** > **System**. The System Settings form is displayed.
2. Click the **Integration** tab. The Integration tab of the System Settings form is displayed.
3. Verify that the **CRM Integration** check box is selected.

To produce a report on Contact Manager activities:

1. Navigate to **Lists** > **Contact Manager** > **Activities** (tab). The Setup - Contact Manager Lists (Activities) form is displayed.
2. On the Setup - Contact Manager Lists (Activities) form, click **Print**. The Report Selection - Template Listing form is displayed.
3. On the Campus Selection tab, select appropriate options and click **Continue**.
4. Select appropriate options on the Selection tab.

   Note: The selection options **Active: Yes/No**, **CRM Integration: Yes/No**, and **Effective Date** are independent of each other. For example, you can select an Effective Date without selecting Active or CRM Integration and vice versa.



5. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   Details on the report include:

   - Activity Code
   - Description
   - Effective Date (indicates CRM Integration)
   - Duration
   - Default Status
   - Event Type
   - Activity Category
   - Required Follow Up
   - Active

   The following example uses the selection criteria Active = Yes and CRM Integration = Yes.

   Integrated activities are those for which a date is displayed in the Effective Date column on the report.

Lists > Admissions

When you navigate to Lists > Admissions, the Setup - Admissions Lists form is displayed. Add, edit, delete, disable, and print Admissions lists from the following tabs:

- Agency Type
- Applicant Type
- Application
- Citizenship
- Colleges
- Contact Type
- Counties
- Countries
- Education Level
- Ethnic Codes
- Exam Location
- Extra-Curricular
- Gender
- Grade Level
- Lead Categories
- Lead Sources
- Lead Type
- Lead Vendors
- Marital Status
- Nationality
- Rep Type
- States
- Suffix
- Tests
- Titles
- Transfer Status
- Transfer Type
- ZIP Code Distance Zone

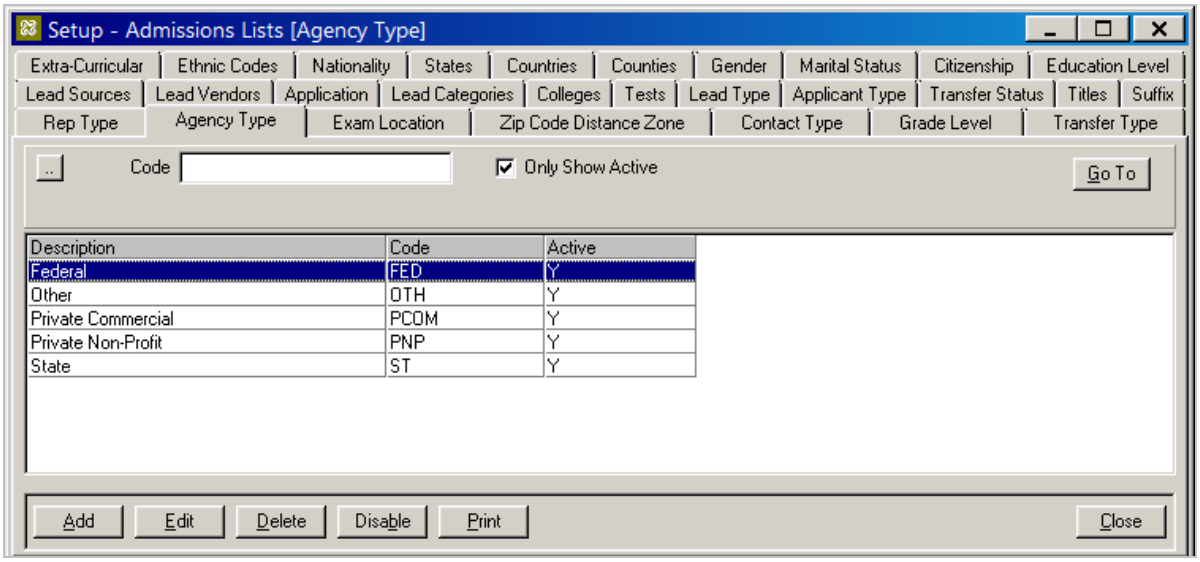
See Maintaining Lists for instructions on adding, editing, deleting, disabling, enabling, and printing lists.

Setup - Admissions Lists [Agency Type]

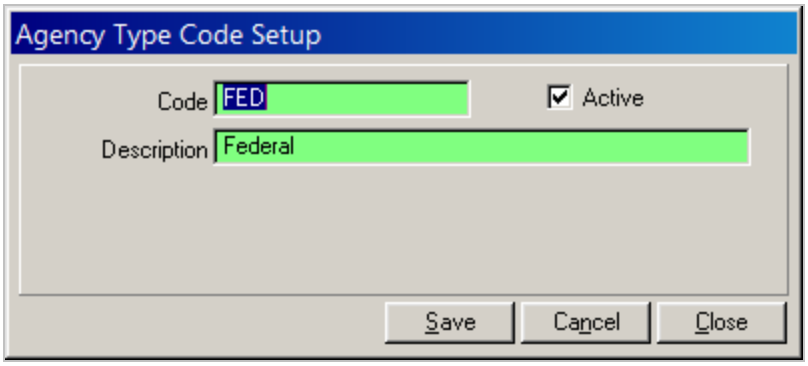
Agency type codes are used when agencies are added or edited from the Daily > Contact Manager > Agency/Third Party menu.

To add or edit a list of agency type codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Agency Type**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Agency Type Code Setup form is displayed.



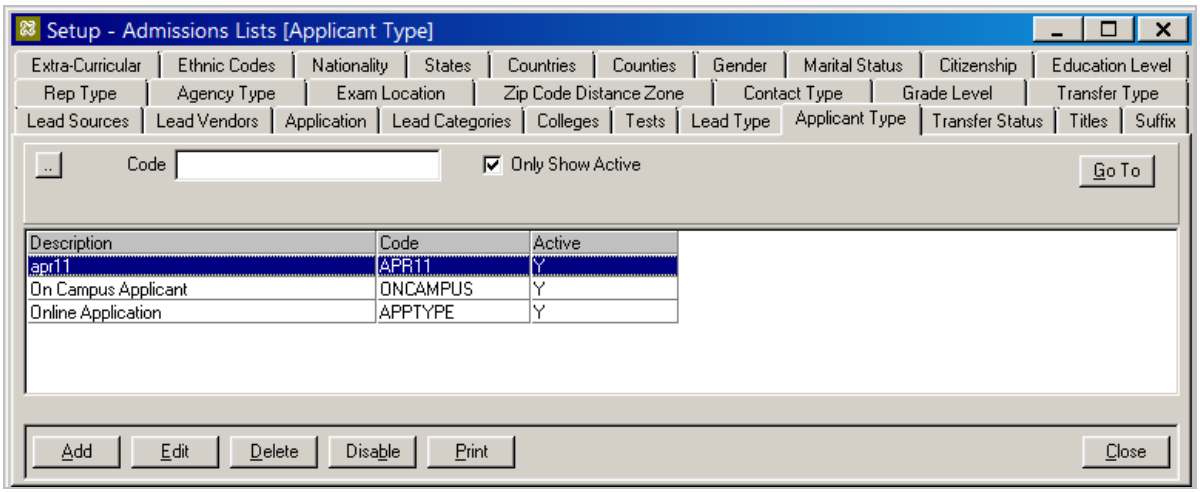
6. Specify a unique **Code**.
7. Enter a **Description**..
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Admissions Lists [Applicant Type]

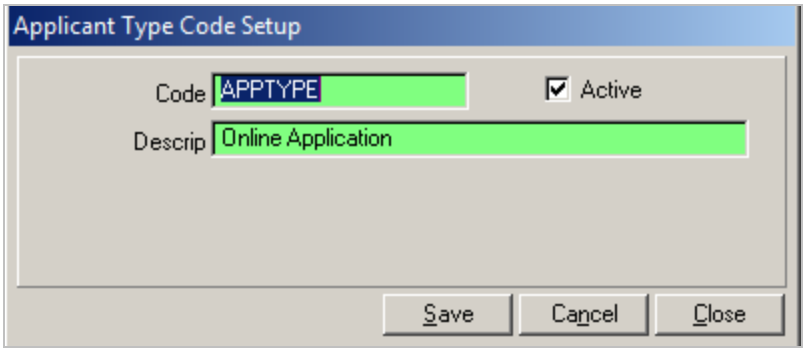
Applicant type codes are used to categorize the type of applicant applying for admission. For example, an institution may want to keep track of the students that fill out applications online and set up an applicant type of 'Online Applicant'.

To add or edit a list of applicant type codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Applicant Type**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Applicant Type Code Setup form is displayed.



6. Specify a unique **Code**.
7. Enter a **Description**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Admissions Lists [Application]

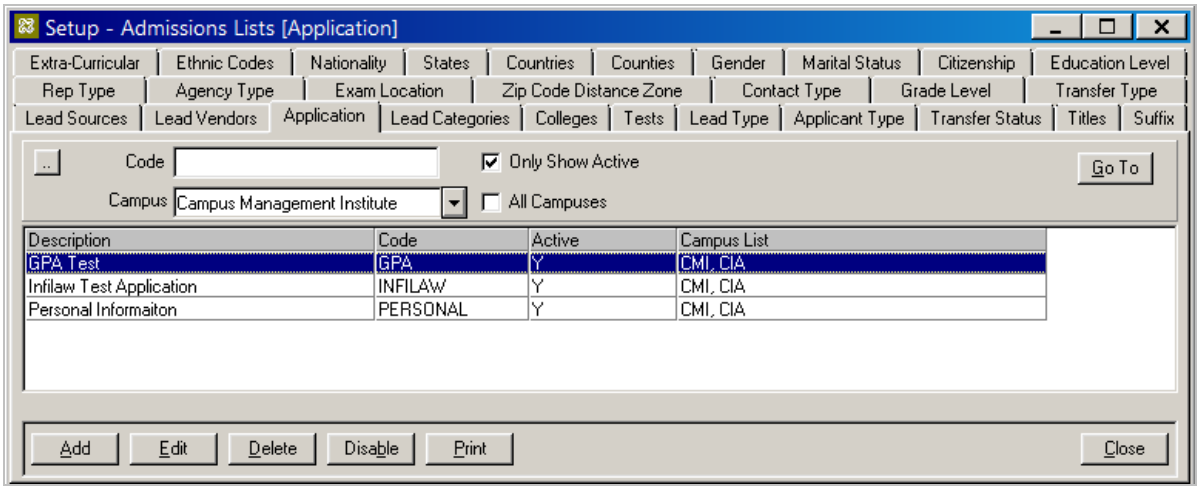
Use the Setup - Admissions Lists [Application] form to view and create Admissions applications. You can perform the following tasks:

- Add or edit a list of application codes
- Add questions and responses to an application
- Preview or print an application
- Print a list of applications

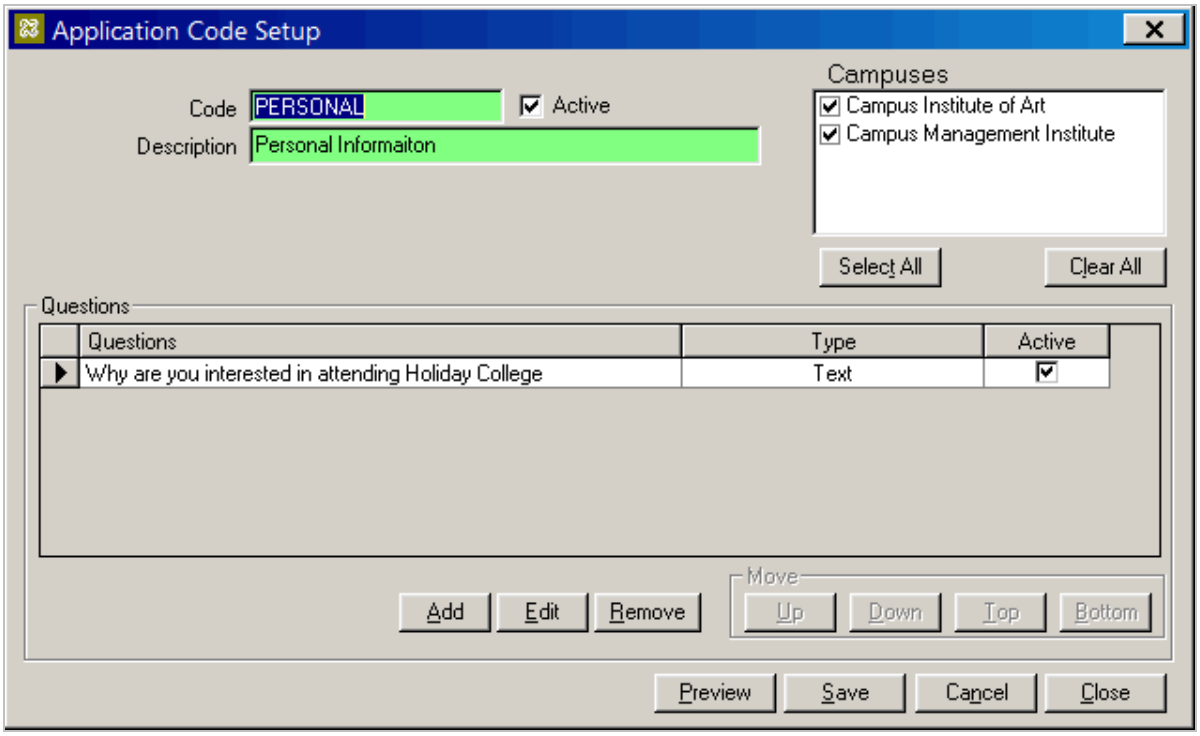
For more information, see Applicant Record Data Elements and Business Processing, Deposits, and Admission Reports.

To add or edit a list of application codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Application**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Application Code Setup form is displayed.



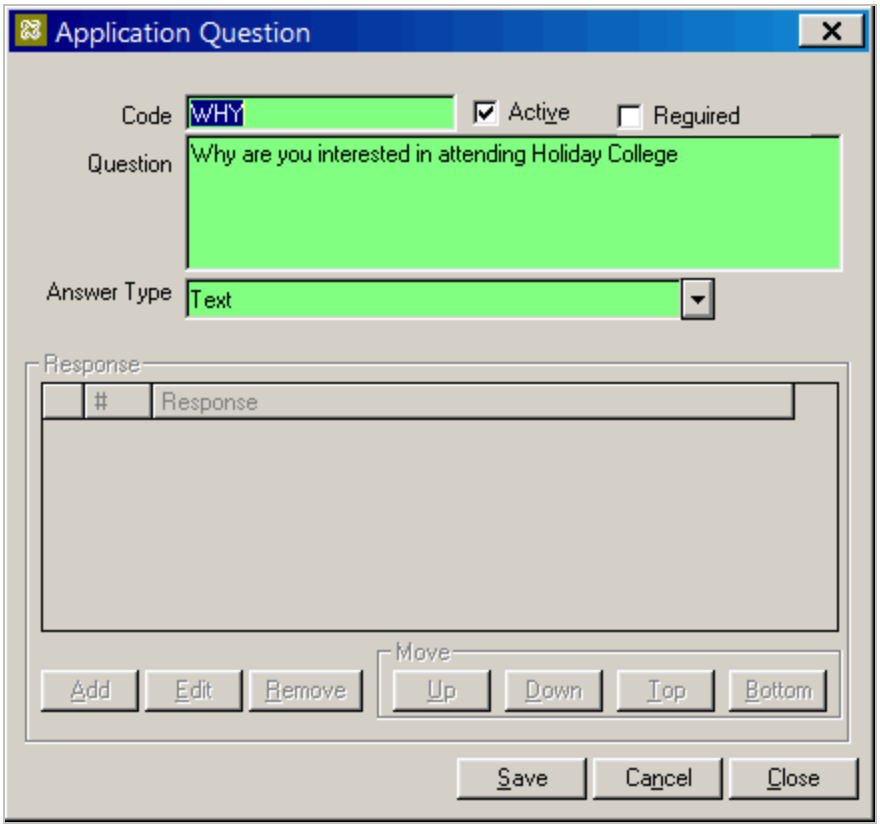
Note: When the option "Use Terms for Academic Year dates" flag is selected on the Campus Information form, Financial Aid Tab, CampusNexus Student creates the missing subsequent academic years for an applicant if the academic year exists for the current enrollment and program version, enrollment status, and exp. start date are selected on the applicant form.

7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.If no active application is available for the selected campus, the Active check box is selected by default.
9. Enter a **Description**.
10. Select one or more **Campuses**.

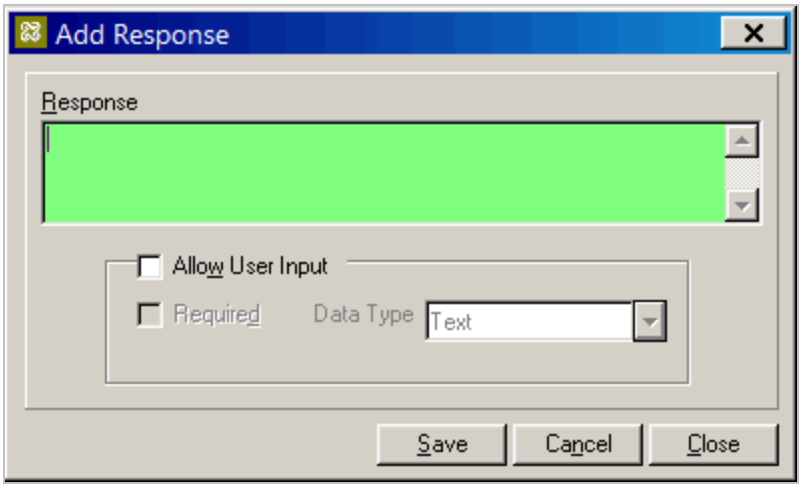
When an application is saved, system defined questions are automatically added to it.

To add questions and responses to the application:

1. Click **Add** in the **Questions** field of the Application Code Setup form. The Application Question Setup form is displayed.



2. Specify a unique **Code**.
3. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
4. Select the **Required** check box to set the status of the question to 'required'. Clear this check box to make the question optional for the student to answer. An application is not considered complete until all required questions are answered.
5. Specify the text of the question in the **Question** field.
6. Select the **Answer Type**. The Answer Type field and the Response area are inactive if you are editing a system-defined question. The answer types are:
    - Multiple Answer Multiple Select
    - Multiple Answer Singe Select
    - Text
    - True/False
    - Yes/No
7. Click **Save**. The Response area in the Application Question Setup form is activated after you save the question for Multiple Answer Multiple Select and Multiple Answer Singe Select answer types.
8. If you selected Multiple Answer Multiple Select or Multiple Answer Single Select as the answer type, click **Add** in the Response area to add the response options for the question. The Add Response form is displayed.



9. Add the response text in the **Response** field. In the application, the response is displayed as a button that the student can select.
10. Select **Allow User Input** if you want the user to be able to provide any more information related to the response you have provided.
11. Select the **Data Type** that you want as the user response. Options are:

    - Date
    - Integer
    - Text.

    Select **Required** if you want the user response to be a required field in the application.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.
13. Add more response options for Multiple Answer Multiple Select or Multiple Answer Singe Select answer types as needed.
14. The added responses appear in the Response list in the Application Question form. Use the **Up**, **Down**, **Top**, and **Bottom** buttons to change the sequence in which the responses appear in the application.
15. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.
16. Add more questions to the application if required.
17. The added questions appear in the Questions list in the Application Code Setup form. Use the **Up**, **Down**, **Top**, and **Bottom** buttons to change the sequence in which the questions will appear in the application.
18. Click **Save** to save the application.

To preview or print an application:

1. Click the **Preview** button on the Application Code Setup form, or select an application from the Application tab (**Lists > Admissions > Application** tab) and click the **Print** button. The Application Preview form is displayed. Only questions that are saved with the status of 'Active' are displayed in the application preview.
2. Click **Print** on the Application Preview form to print the application.
3. Click **Close** to close the form.

To print a list of applications:

1. Click **Print**. The Report Selection form is displayed.
2. Select appropriate report options and print the list of applications.
3. On the Campus Selection tab, select appropriate options and click **Continue**. Click to add Campuses to the right side of the form, indicating that you would like the system to gather room categories associated with the Campuses that appear on the right side of the form. Click to remove Campuses listed on the right side of the form.
4. Select the **Yes** or **No** check box next to the Active label. If you select Yes, the *active* Applications appear on the report. If you select No, the *inactive* Applications are listed. Sort the Applications report by Code or Description.

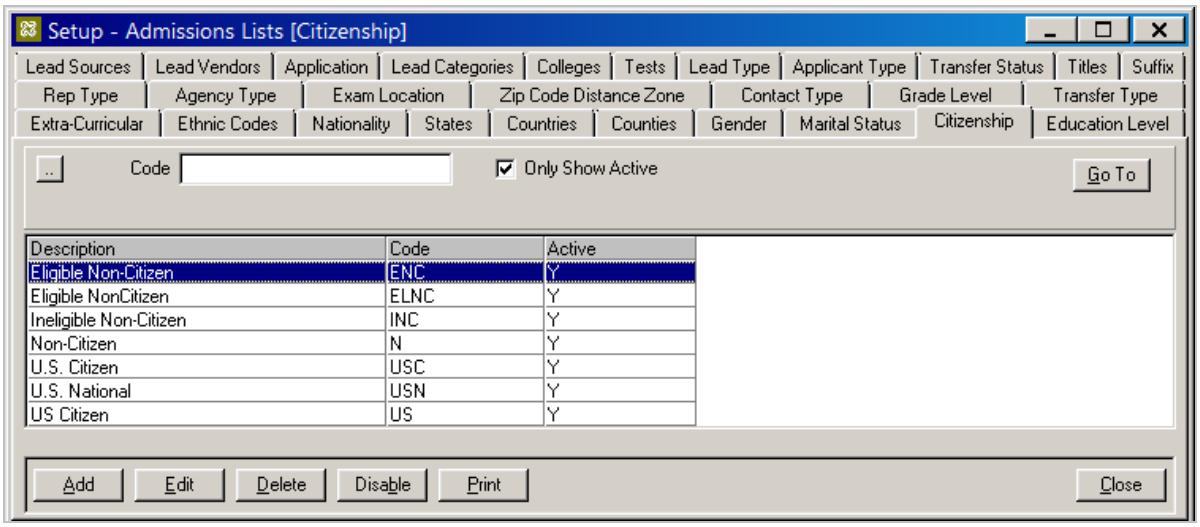
   An informational message is displayed stating "*No records selected for the report*" when you selected to print the active Applications, but there are no active Applications, or you selected to print the inactive Applications and there are no inactive Applications.
5. Click **Preview**. The report is assembled and displayed in the Report Viewer. The report contains the Code, Description, and Active indicator.
6. See Report Viewer for instructions on printing or exporting the report.

Setup - Admissions Lists [Citizenship]

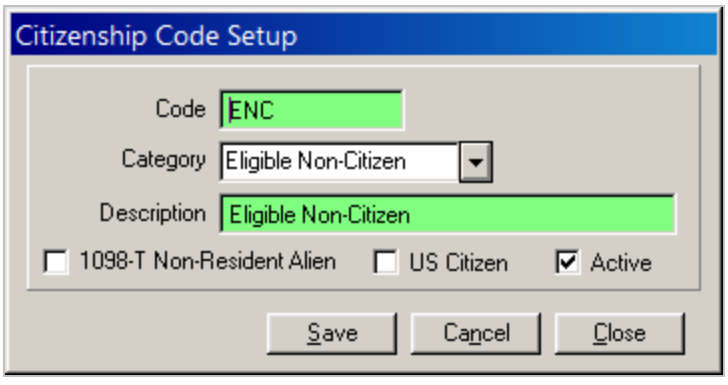
The codes on the Citizenship list are used to indicate a lead's (student's) eligibility for financial aid . The citizenship status is important when a student applies for federal or state financial aid. This is not the place where you record the student's nationality. That is done with the Nationality list.

To add or edit a list of citizenship codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Citizenship**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Citizenship Code Setup form is displayed.



6. Specify a unique **Code**.
7. Select a **Category** for this citizenship code. Citizenship categories are used in some types of financial aid

processing. The categories are:

- U.S. Citizen
- U.S. National
- Eligible Non-Citizen
- Ineligible Non-Citizen

8. Enter a **Description**.
9. Select or clear the **1098-T Non-Resident Alien** check box to designate that students in this citizenship category should only receive 1098-Ts upon request.

   Previously, if this check box was selected, the students were not gathered in a 1098-T batch unless they were manually added by a staff member. As of the 2009 tax year, the 1098-T processing utility allows administrators to select which citizenships should always be included in the batch and which citizenships support the Allow Manual Add feature. By default, any citizenship with this check box selected is selected in the Allow Add category when processing 1098-Ts for the 2009 tax year and forward.
10. Select **U.S. Citizen** if this is your code for designating that a student is a citizen of the United States. CampusNexus Student needs to know which code you use for this purpose.

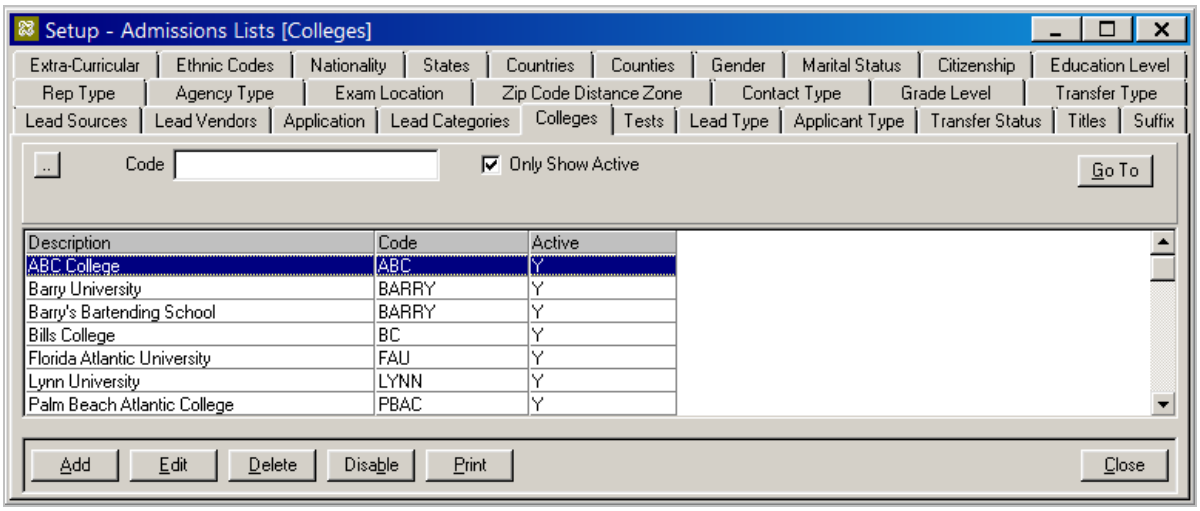
    Citizenships designated as US Citizens are also used as the default for the Include selections in the 1098-T Processing Utility as of the 2009 tax year.
11. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Admissions Lists [Colleges]

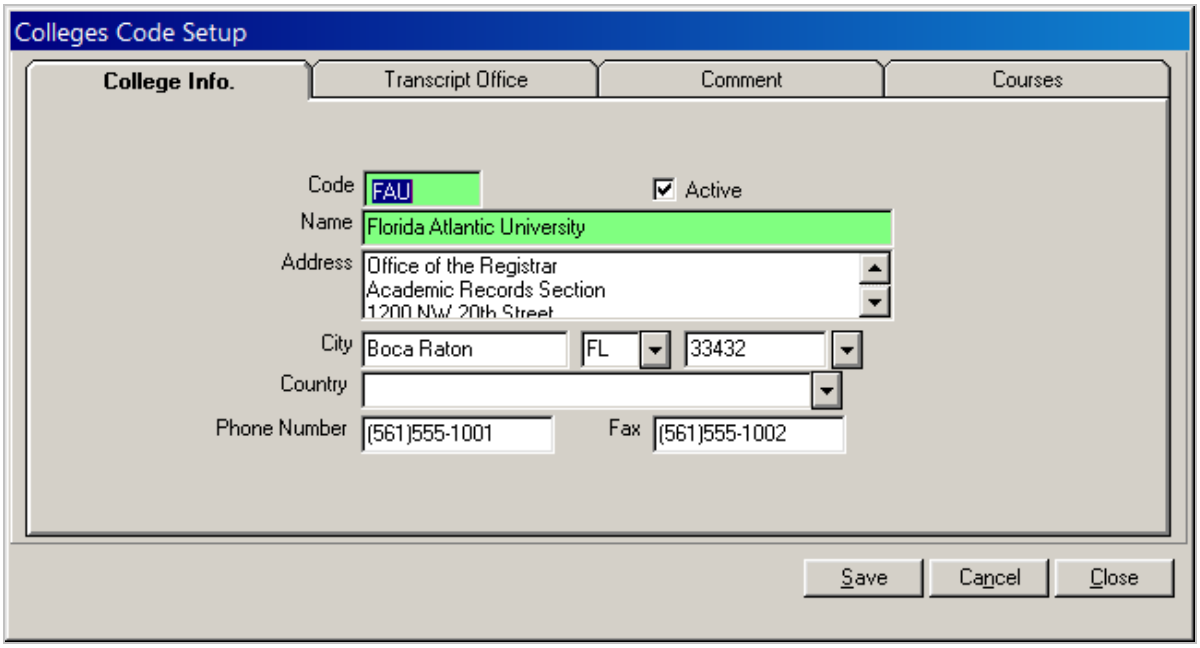
The Colleges list contains the names and addresses of other institutions with which your students have had contact. You can relate these colleges to students on the Education form.

To add or edit a list of college codes:

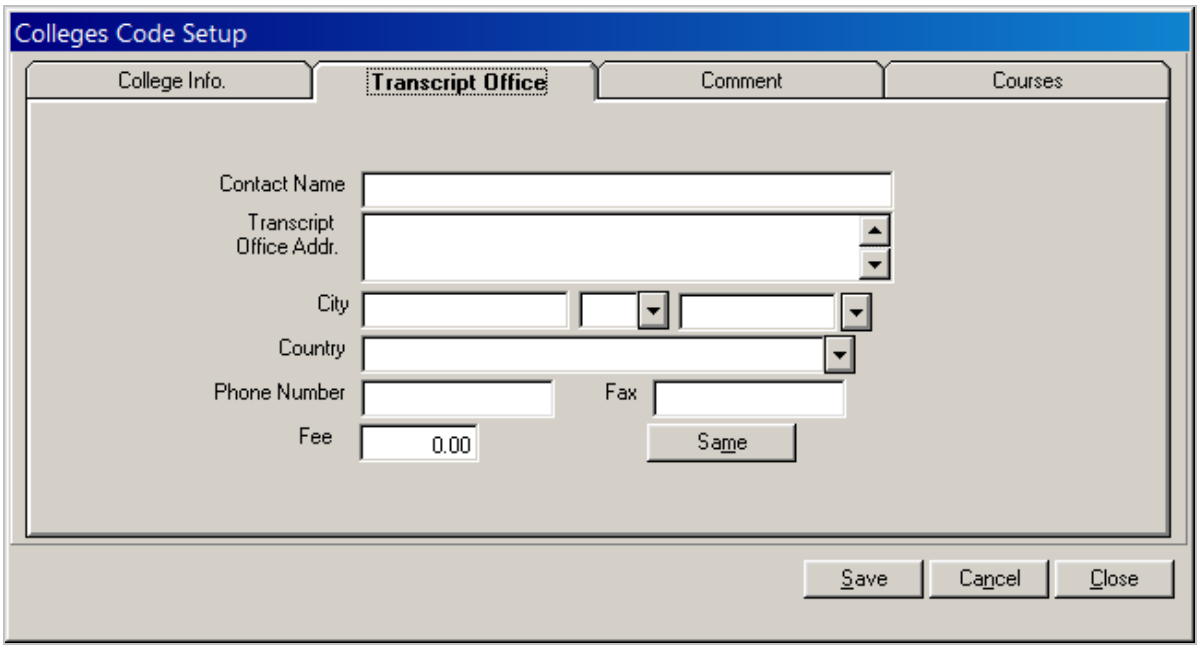
1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Colleges**.



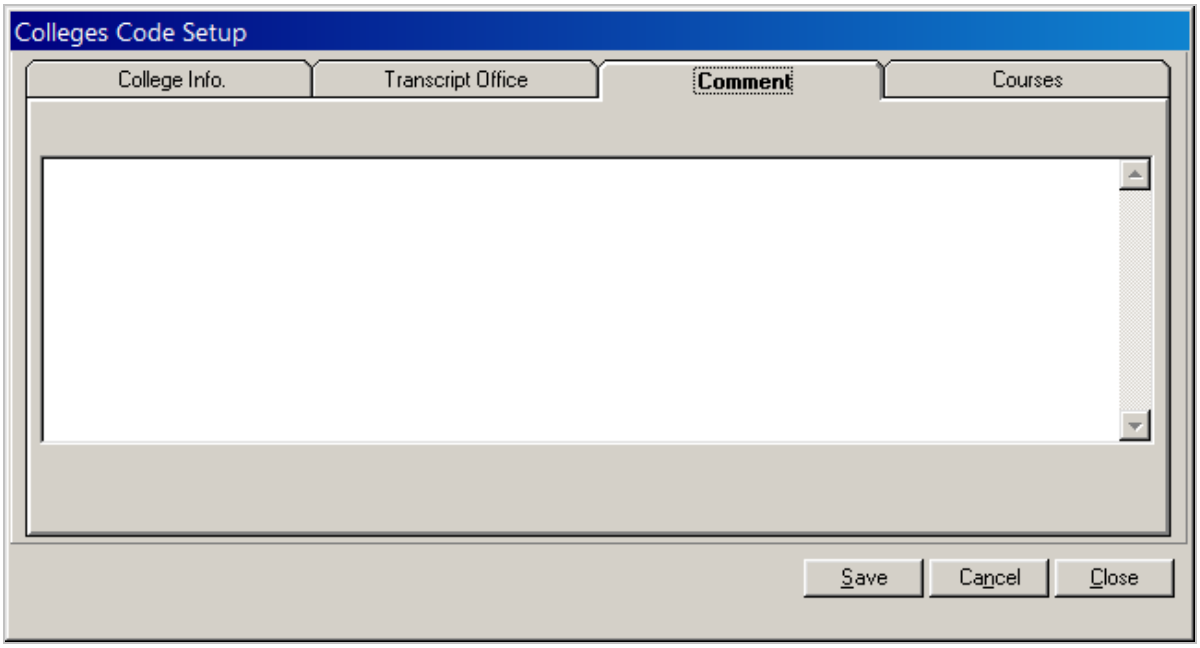
3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Colleges Code Setup form is displayed.



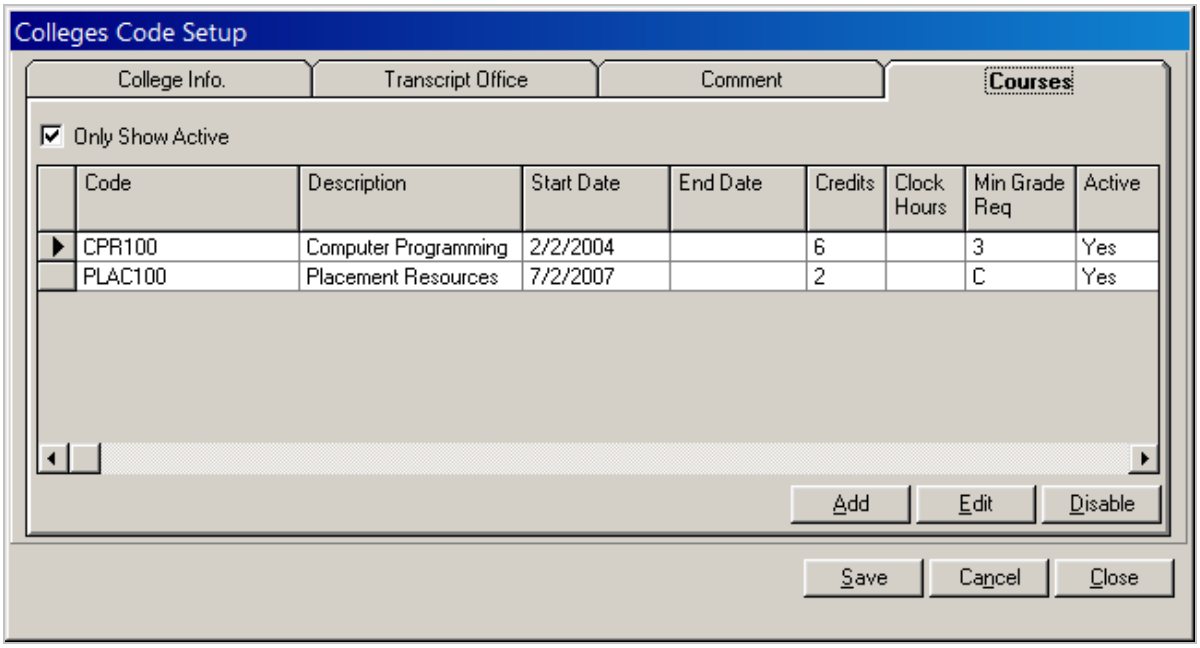
6. Specify a unique **Code**.
7. Specify the **Name** of the college.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter the address and phone information.
10. Click **Transcript Office** tab.



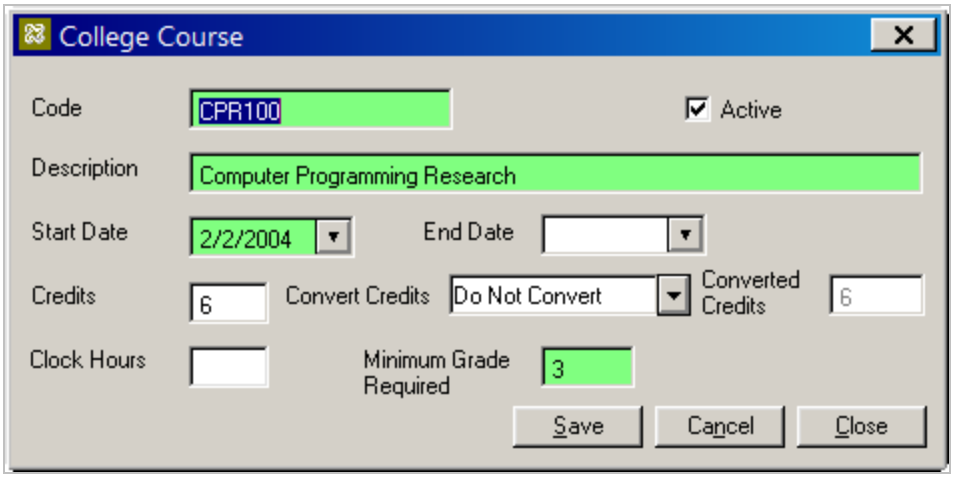
11. Enter the name and address information for the Transcript Office contact. If the address information for the contact is the same as for the school, click **Same**. The college address information is copied to the contact form.
12. Click the **Comment** tab.



13. Enter any comments in the **Comment** field.
14. Click **Save**.
15. Click the **Courses** tab. The form displays a grid showing courses offered by the selected college.



16. Click **Enable/Disable** to enable or disable college courses, respectively.
17. Click **Add** or **Edit**. The College Course form is displayed.



a. Specify a unique **Code** (no more than 16 characters) that indicates a course specific to the campus.

b. Select or clear the **Active** check box to designate the record as active or inactive, respectively.

c. Enter a **Description**.

d. Select the effective **Start Date** (and **End Date**, if known)

e. In the **Credits** field, assign the number of credits that successful completion of the course earns at the selected college.

f. Select a **Convert Credits** option. The options are:

- Do Not Convert (default)
- Quarter Credits
- Semester credits

The conversion result is displayed in the **Converted Credits** field.

- When converting transfer credits from Semester to Quarter credit, CampusNexus Student multiplies the credit value entered for the other college's course by **1.5** to determine the quarter credits and saves this value on the college's course record, unless manually overridden by the user.
- When converting transfer credits from Quarter to Semester credit, CampusNexus Student multiplies the credit value entered for the other college's course by **.67** to determine the semester credits and saves this value on the college's course record, unless manually overridden by the user.

g. In the **Clock Hours** field enter clock hours for the course if applicable.

h. In the **Minimum Grade Required** enter the letter grade required to earn credits.

i. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

You are returned to the Colleges Code Setup form.

18. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

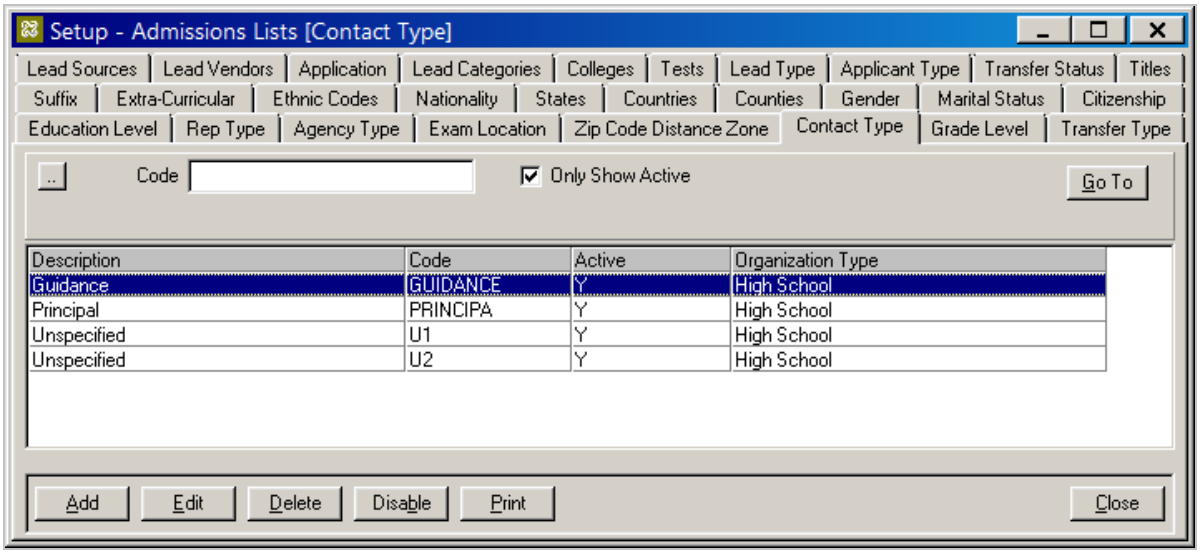
Setup - Admissions Lists [Contact Type]

The Contact Types lists is used defined codes for contacts high schools and the general public.

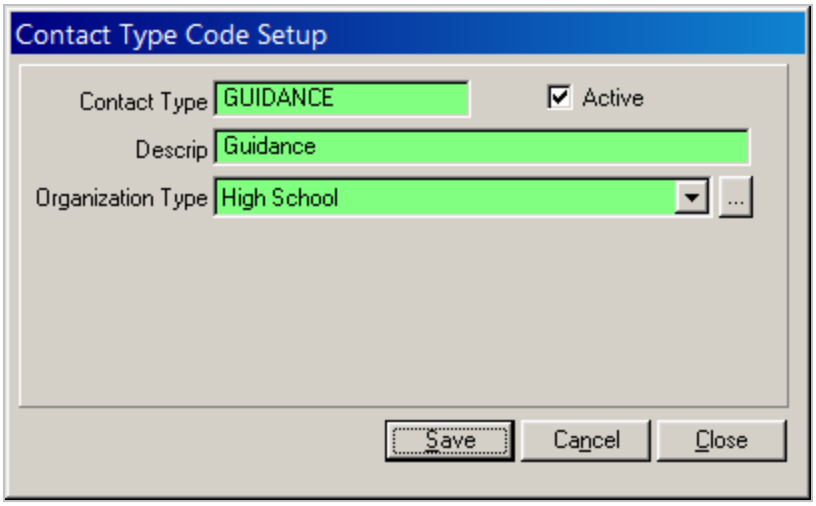
- High school contacts are recorded on the Education form when Admissions staff associate a high school with a student. The student's primary high school contact can be different from the institution's primary high school contact.
- General public contacts are recorded when campus security records information about individuals who are not staff or students who may have been involved in incidents that have occurred on or near campus. A general public contact type code can be used to define categories such as guests of students, vendors, contractors, and local residents.

To add or edit a list of contact type codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Contact Type**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Contact Type Code Setup form is displayed.



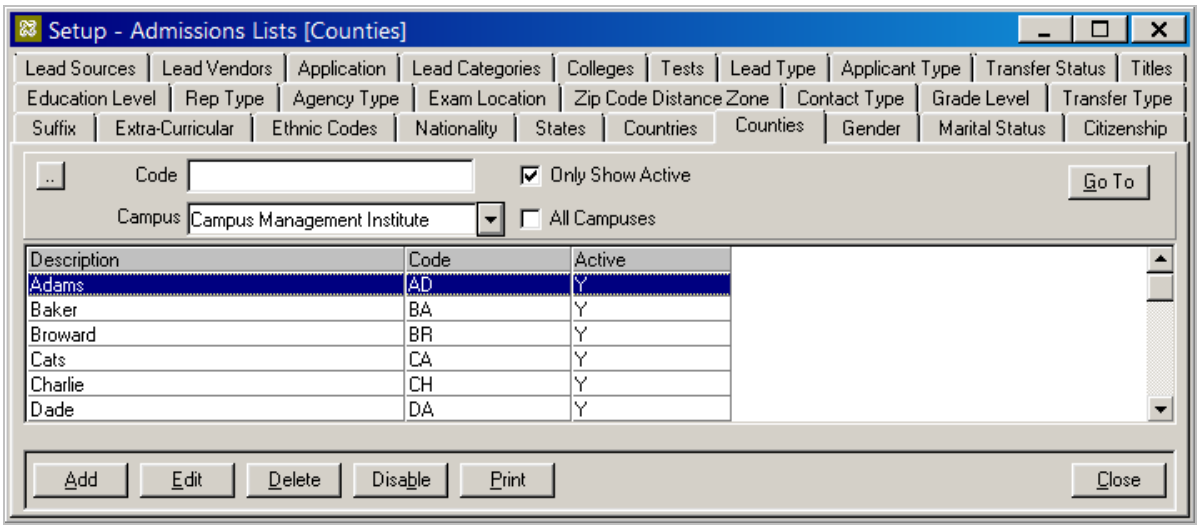
6. Specify a unique **Code**..
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. Enter a **Description**.
9. Select an associated **Organization Type** to create an association between the contact type and the organization type. The options are:
    - High School
    - General Public
10. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Admissions Lists [Counties]

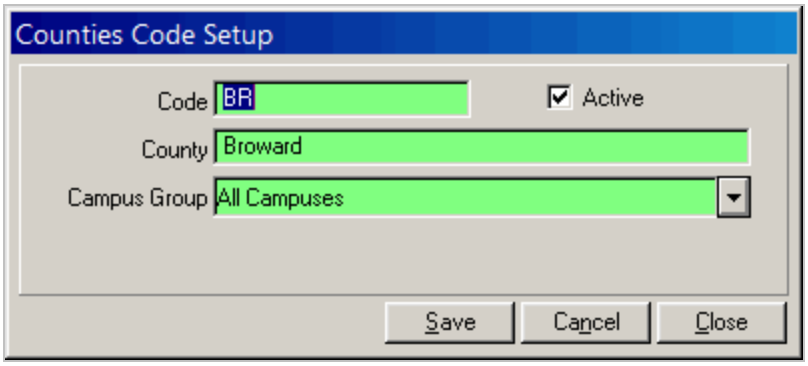
The Counties list contains codes and names of counties in which your students reside. Populate this list with the counties surrounding your campuses and any other counties from which your student population is drawn. A field on the Student Master form uses this list.

To add or edit a list of county codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Counties**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Counties Code Setup form is displayed.



7. Specify a unique **Code**.

8. Enter a **Description**.
9. Select a **Campus Group** to which the county code is related.
10. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Admissions Lists [Countries]

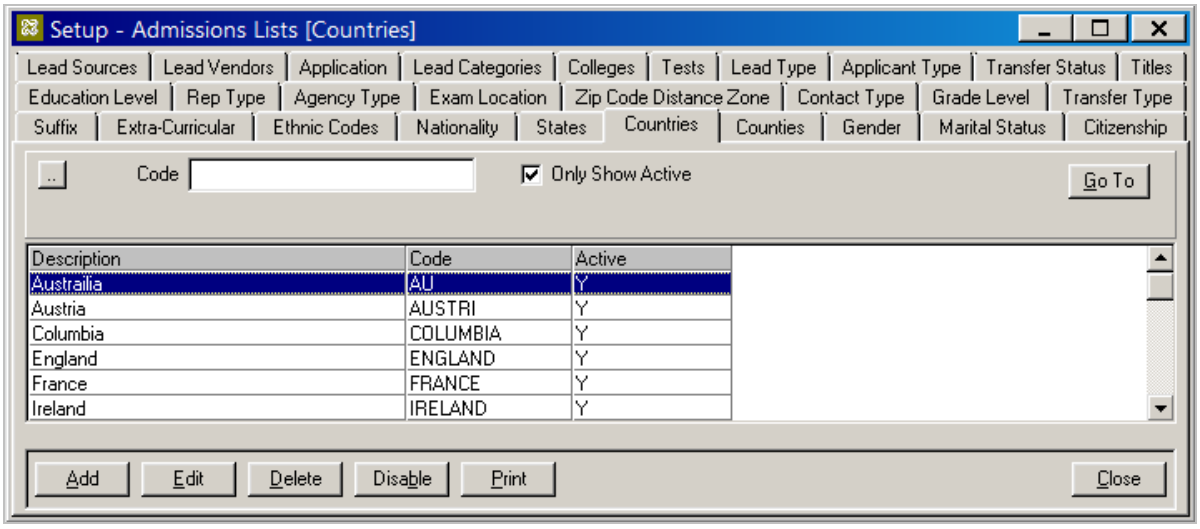
Use the Countries Code Setup form to create a list of countries from which your students are drawn. The Country codes are used on the Student Master form.

The code for The United States of America (USA) is optional unless your school is not in the USA. Mailing addresses typically do not need to show the country when it is the home country of the school. If country is a required field on your Student Master form, you must set up a code for the USA, even if the post office does not require it for mailing addresses.

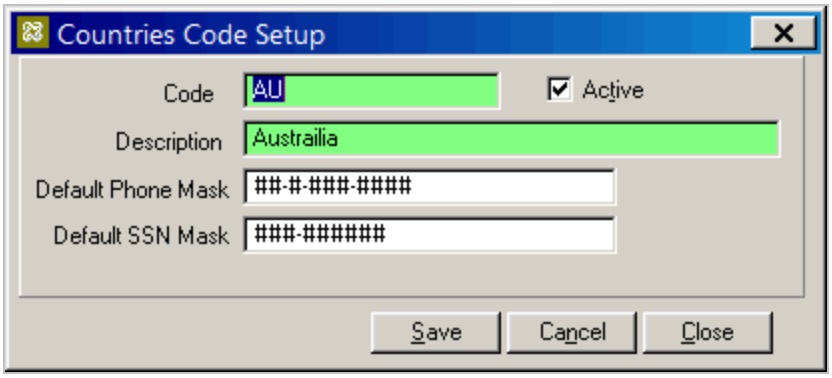
Note: The Countries code list is not the same as the Nationality code list, even though the two lists are likely to have similar entries. For instance, in countries, a person whose address may include a country called Japan, might have a nationality code of Japanese. Likewise, country is not the same thing as Citizenship, which refers to whether the student is a U.S. citizen or some other citizenship classification.

To add or edit a list of country codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Countries**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Countries Code Setup form is displayed.



6. Specify a unique **Code**.
7. Enter a **Description**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Specify the **Default Phone Mask**.
10. Set up the two mask fields for each country in which the institution does business or from which it receives students. Valid characters for the mask fields are:

    + Plus sign

    - Hyphen

    (Open parenthesis

) Close parenthesis

    # Octothorpe (the pound sign is a place-holder for digits 0 - 9)

    . Period

    Space - Embedded spaces only, no leading or trailing spaces.

    0 Zero (In the leading positions, zero is used to indicate that leading zeros are permitted in the field; in other positions, zero represents a constant. For instance, to allow a Social Security Number such as 093-22-1060, the mask must be 0##-##-####. The U.S. does have Social Security Numbers beginning with zero.)

    No other characters are accepted in the mask fields.
11. Specify the **Default SSN Mask**. Valid mask characters are the same as those used in the Default Phone mask.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Admissions Lists [Education Level]

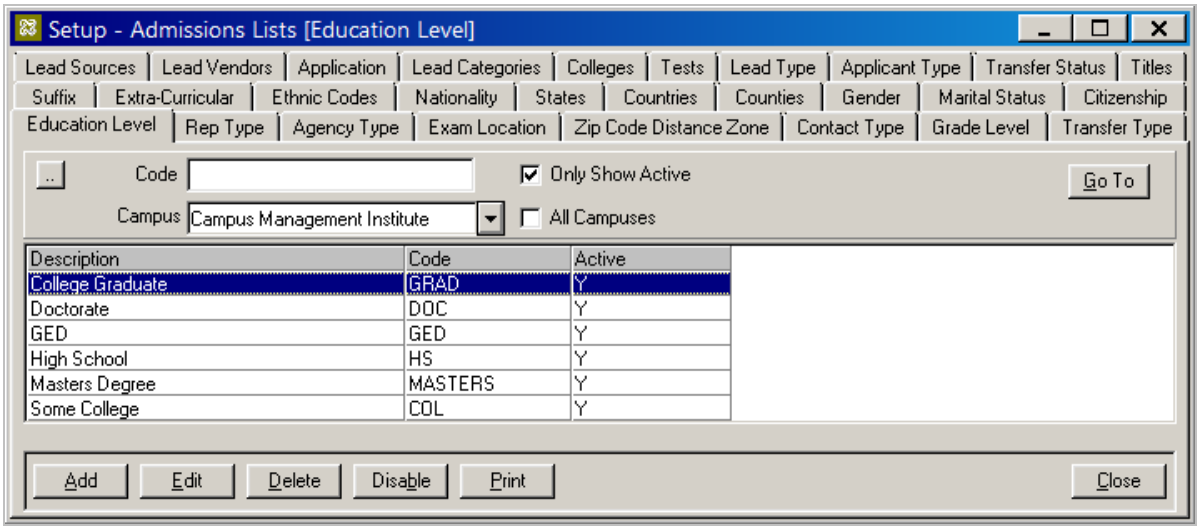
The Education Level list is used to categorize leads (students) by their level of previous education and to associate the lead types with the appropriate Ability to Benefit (ATB) codes. Set up the education levels that are appropriate for your institution.

For years 2013-14 and forward, COD stores new valid ATB values, for students with a high school diploma (06) or a GED (07). Codes 03 and 05 are no longer valid. If you have students with ATB codes of 03 or 05, you must change the code for their record to pass COD validation.

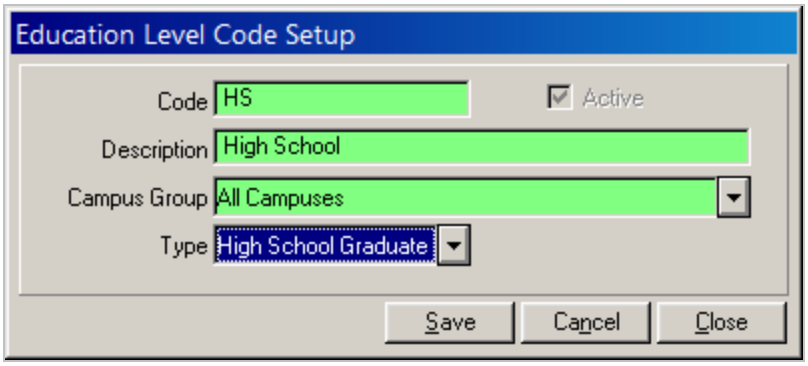
Important: For a student to receive Title IV funding, there must be a valid ATB code associated with their records (in the Prev Education field of the Student Master). Many students may not have a valid ATB code assigned, or they may have no ATB code assigned. Student records lacking a proper ATB code fail validation at COD.

To add or edit a list of education level codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Education Level**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Education Level Code Setup form is displayed.



7. Specify a unique **Code**.
8. Enter a **Description**.
9. Select a **Campus Group** to which the education level is related.
10. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
11. Select the **Type** to which the code is related. These types are College, High School, GED, ATB, and None.

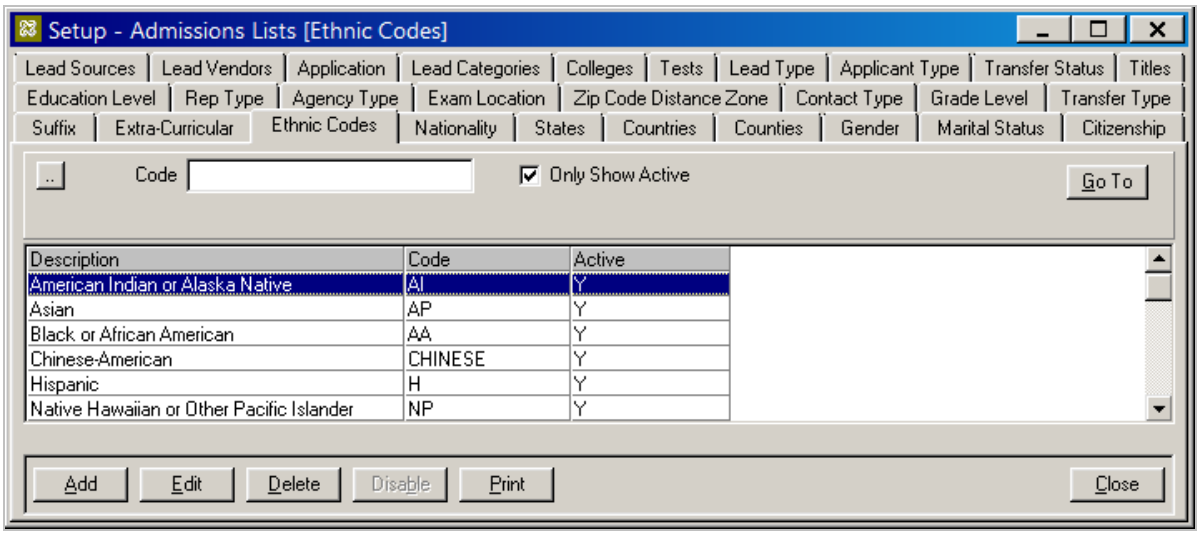
    Note: The types College or None should be used for codes assigned to students who are not eligible for Title IV funding (and will not be part of COD processing) because they have a college degree but cannot prove they have a GED or have graduated from a high school.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Admissions Lists [Ethnic Codes]

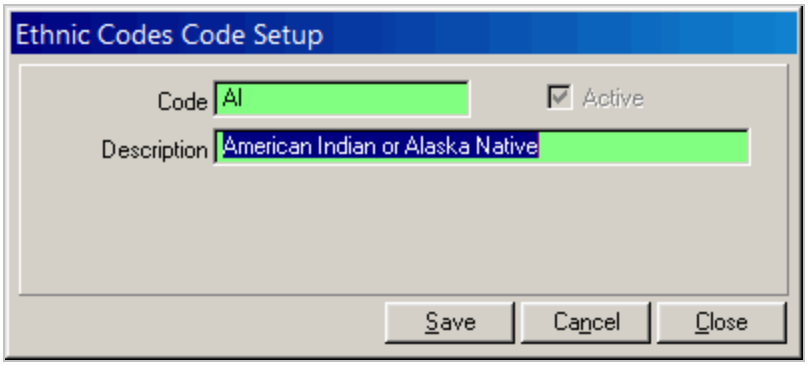
The Ethnic Codes list is used to classify students for population and demographic reports such as the Department of Education IPEDS report. CampusNexus Student is installed with the standard Department of Education codes. You can add codes if necessary.

To add or edit a list of ethnic codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Ethnic Codes**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Ethnic Codes Code Setup form is displayed.



6. Specify a unique **Code**.
7. Enter a **Description**.

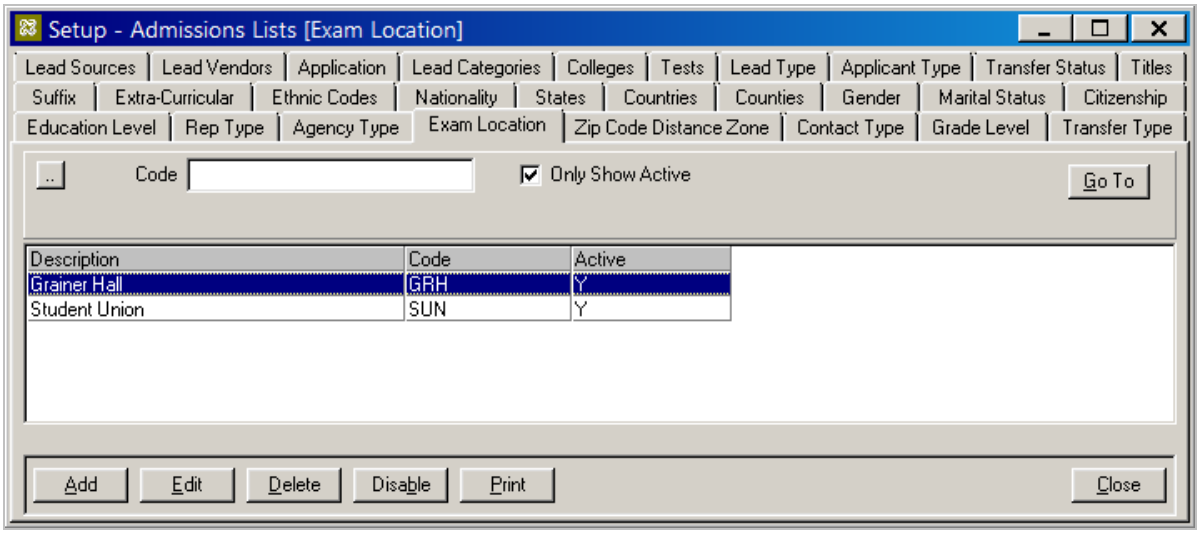
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Admissions Lists [Exam Location]

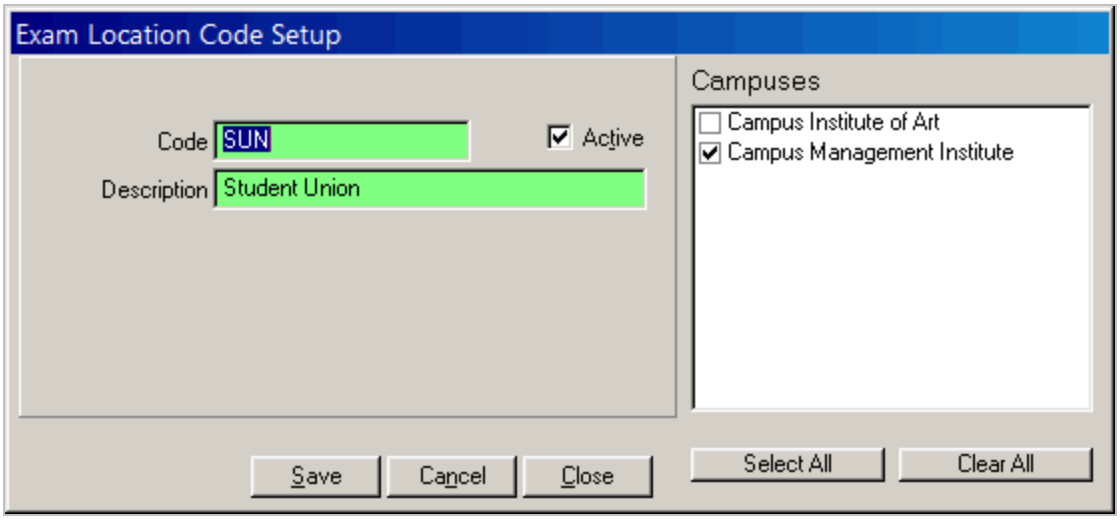
Exam Location codes are linked to sites where exams are administered.

To add or edit a list of exam location codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Exam Location**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Exam Location Code Setup form is displayed.



6. Specify a unique **Code**.

7. Enter a **Description**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Select the **Campuses** to which the exam location applies.
10. Select or clear the **Active** check box to designate the record as active or inactive, respectively.

Setup - Admissions Lists [Extra-Curricular]

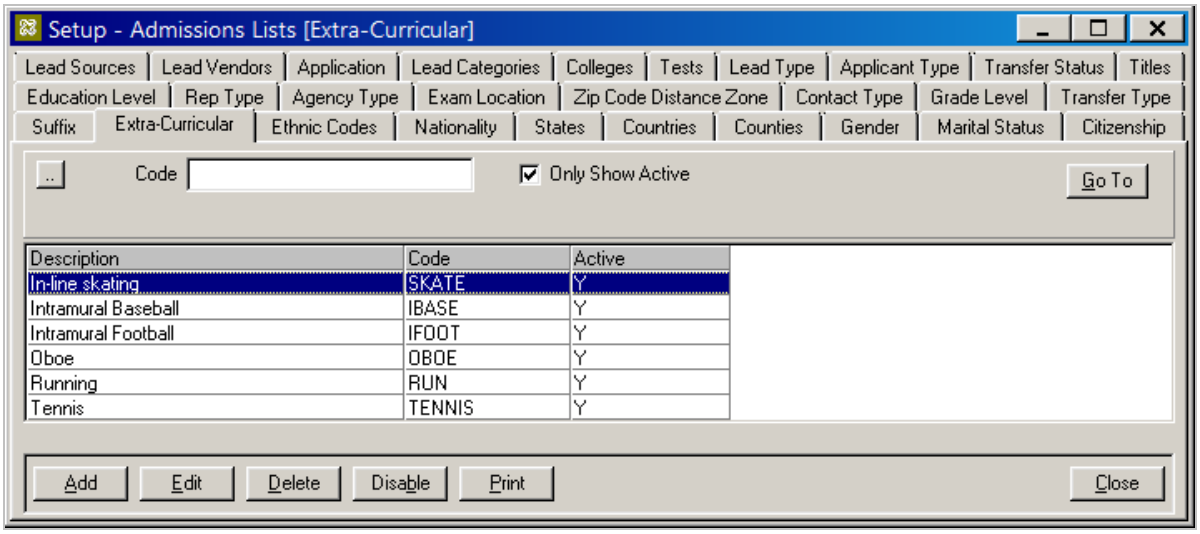
The Extra-Curricular list contains codes that describe a student's extra-curricular activities such as intramural sports, clubs, and so on.

If this information is not significant in your institution, you can change the meaning of this list to something that is more important. For example, a school of music might find an instrument list more useful. To accomplish this, change the label of the data field in the data dictionary at Setup > Data Dictionary. Changing the label of the field in the data dictionary will not change the label on the Lists tab, but it will change it on the Student Master form.

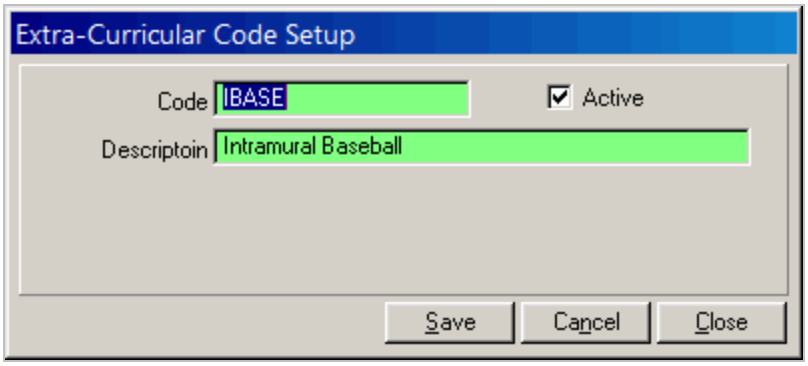
There is no generic CampusNexus Student report that shows this field as related to individual students, but it could be added to one by the system administrator at your institution. (See Setup > Report Maintenance.)

To add or edit a list of extra-curricular codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Extra-Curricular**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Extra-Curricular Code Setup form is displayed.



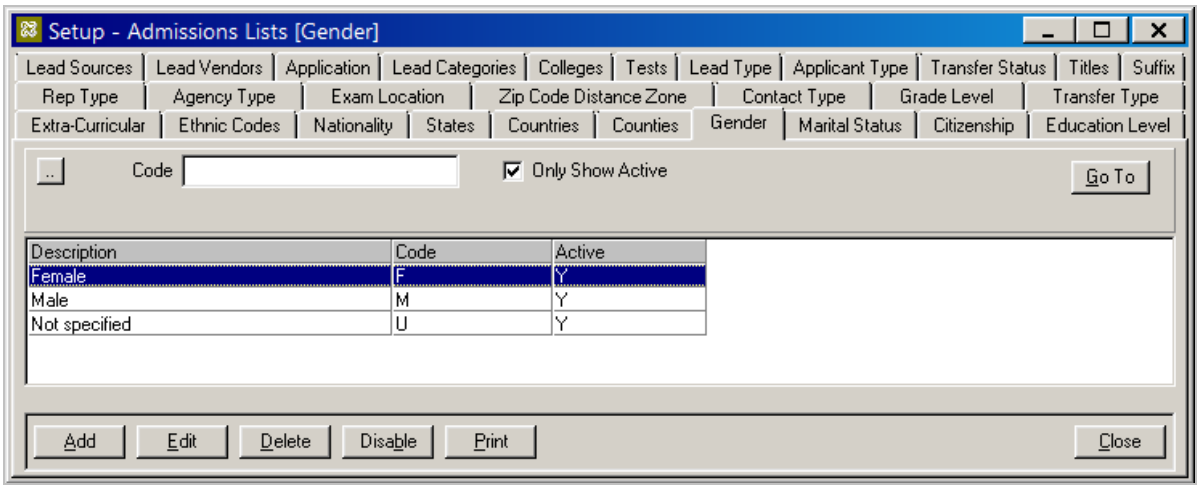
6. Specify a unique **Code**.
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. Enter a **Description**.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Admissions Lists [Gender]

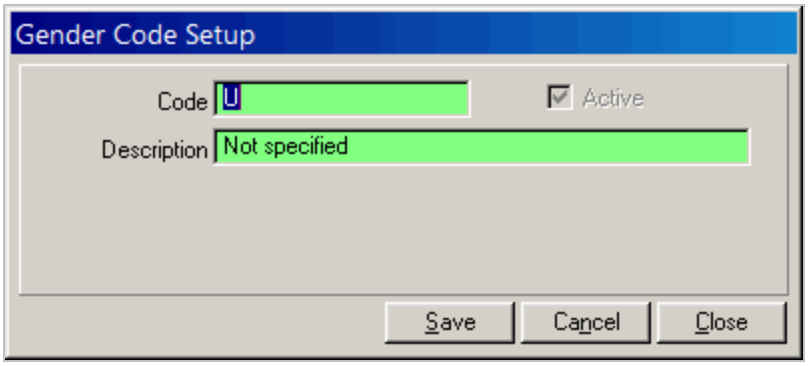
The Gender list is a table of gender (sex of student) codes used in your institution. One of these codes is recorded in each lead (student) record.

To add or edit a list of gender codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Gender**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Gender Code Setup form is displayed.



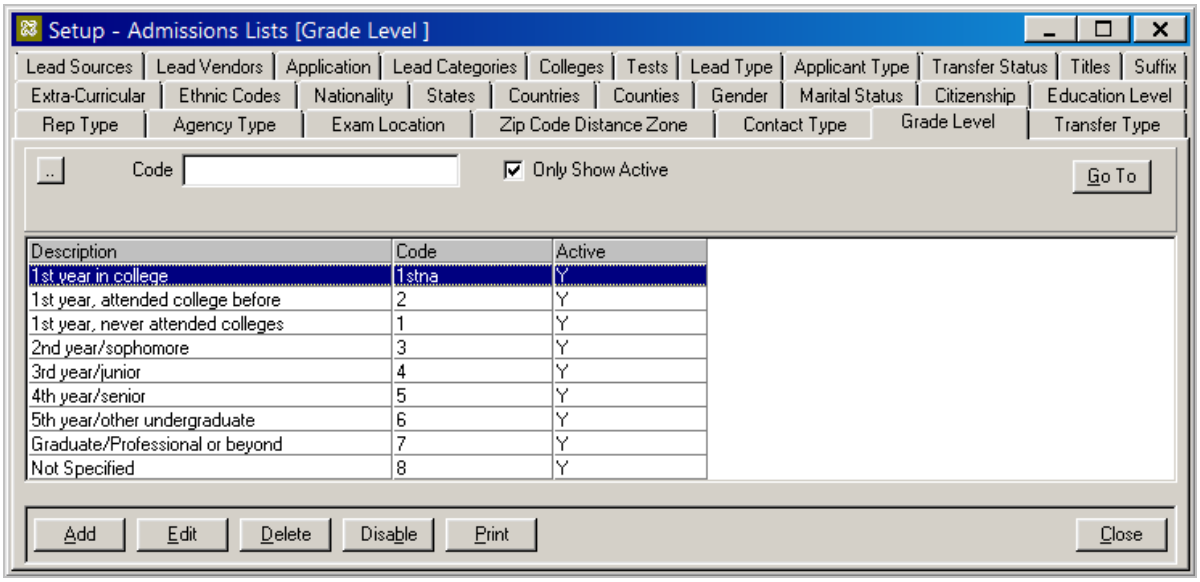
6. Specify a unique **Code**.
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. Enter a **Description**.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Admissions Lists [Grade Level]

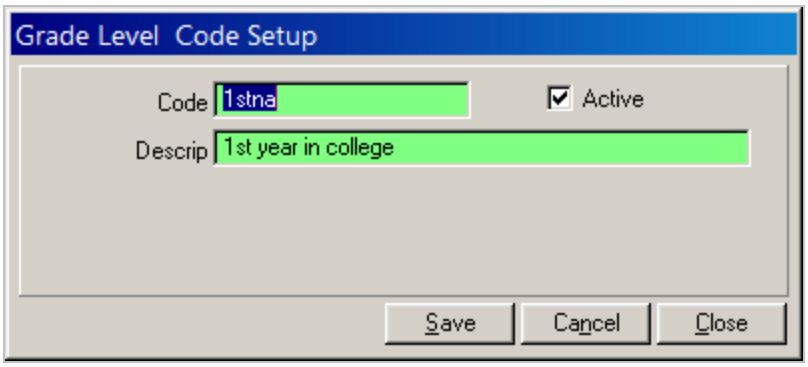
The Grade Level list is used for the selection of grade levels when entering applicant records.

To add or edit a list of state codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Suffix**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Grade Level Code Setup form is displayed.



6. Specify a unique **Code**.
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.

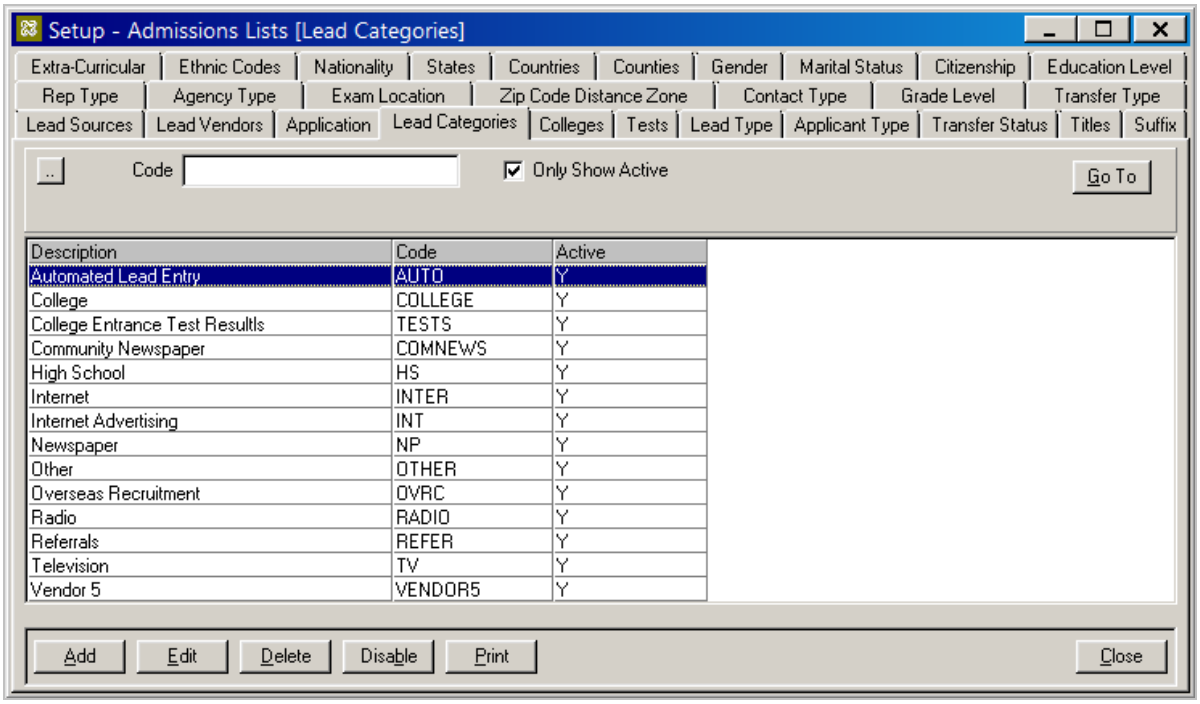
8. Enter a **Description**.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Admissions Lists [Lead Categories]

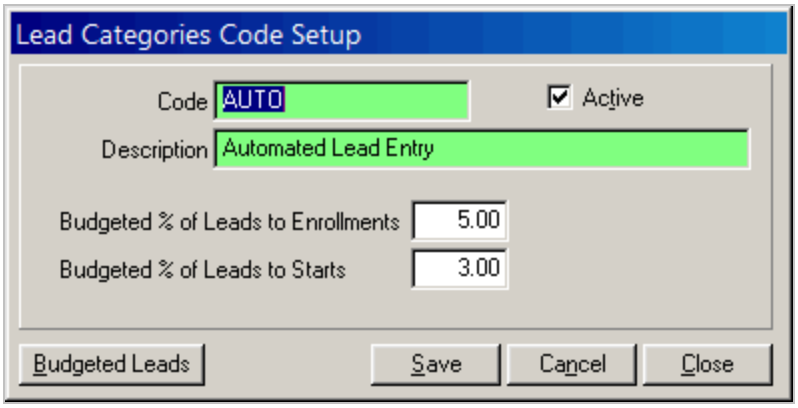
Lead Categories are used to classify lead sources into groups for the analysis of marketing effectiveness. You can run reports to determine which category of lead sources generates most leads. You can specify budget data for lead categories that are used in the Executive Summary Report.

To add or edit a list of lead category codes:

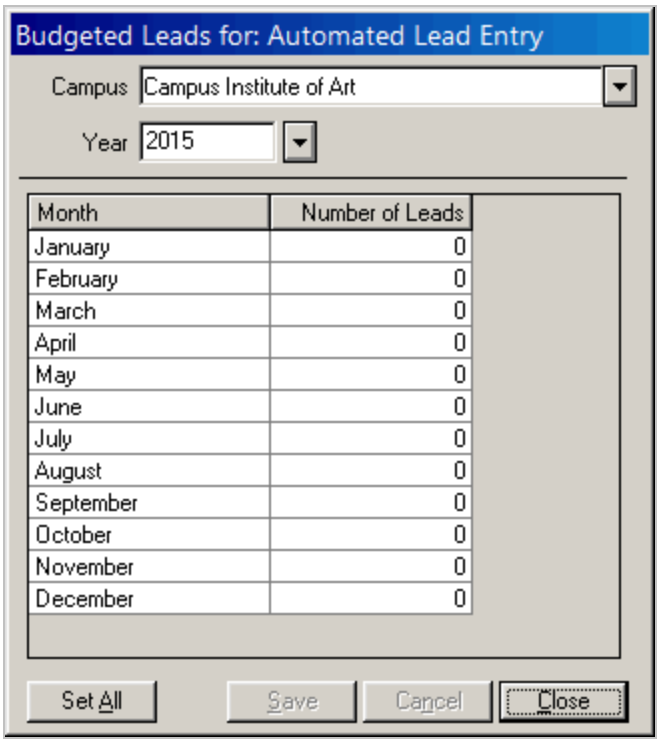
1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Lead Categories**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Lead Categories Code Setup form is displayed.



6. Specify a unique **Code**.
7. Enter a **Description**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Specify the **Budgeted Percentage of Leads to Enrollments**.
10. Specify the **Budgeted Percentage of Leads to Starts**.
11. Click **Budgeted Leads**. The Budgeted Leads form is displayed.



a. Select the **Campus**.
b. Select the **Budget Year**.
c. Enter the lead budget data for each of the months. If all months are the same, enter the first month and click

Set All to set all months to the same value.

d. Change the **Budget Year** and repeat entering the monthly budgets for the next year.

e. Change the **Campus** and repeat entering the budget year data for the next campus.

f. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form. You are returned to the Lead Categories Code Setup form.

12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

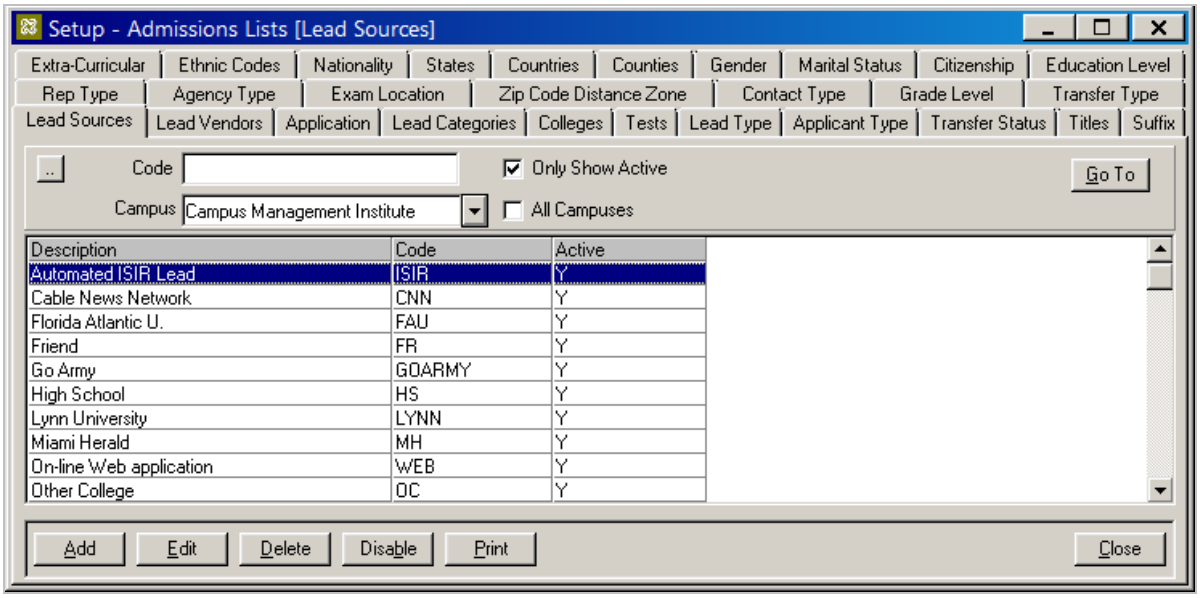
Setup - Admissions Lists [Lead Sources]

The lead source list is used to specify how a lead (prospect) heard about your institution. One or more lead source codes can be recorded in a lead's record and later summarized with others to measure the effectiveness of your advertising program.

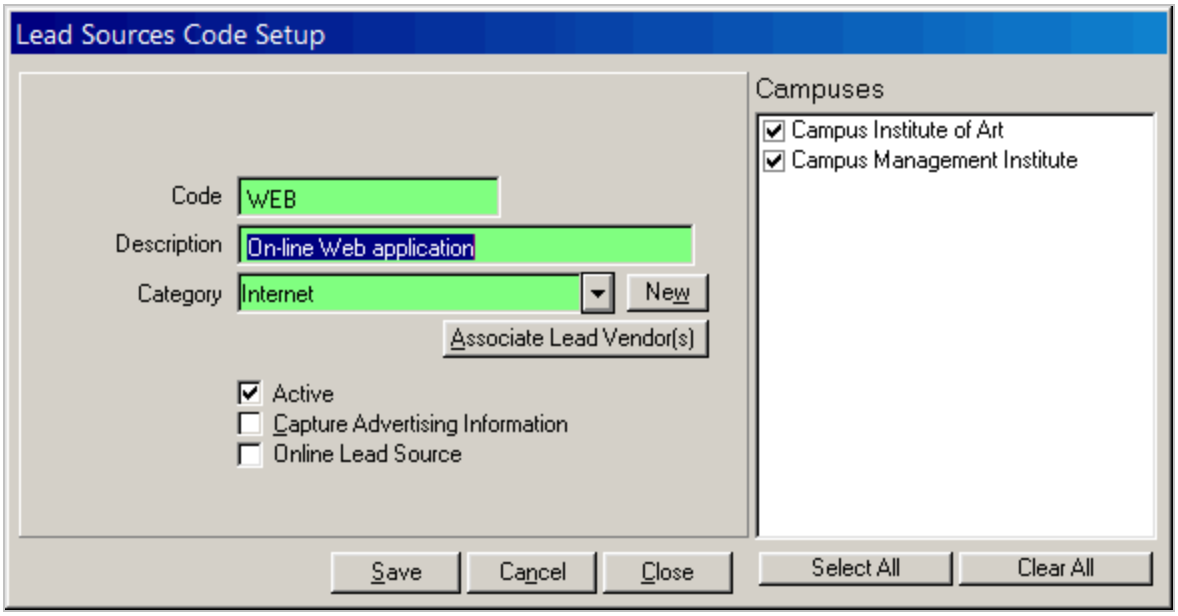
Each lead source is associated with a lead category. Lead categories are used to classify lead sources for further analysis in groups such as newspapers, radio, television, flyers, and so on.

To add or edit a list of lead source codes:

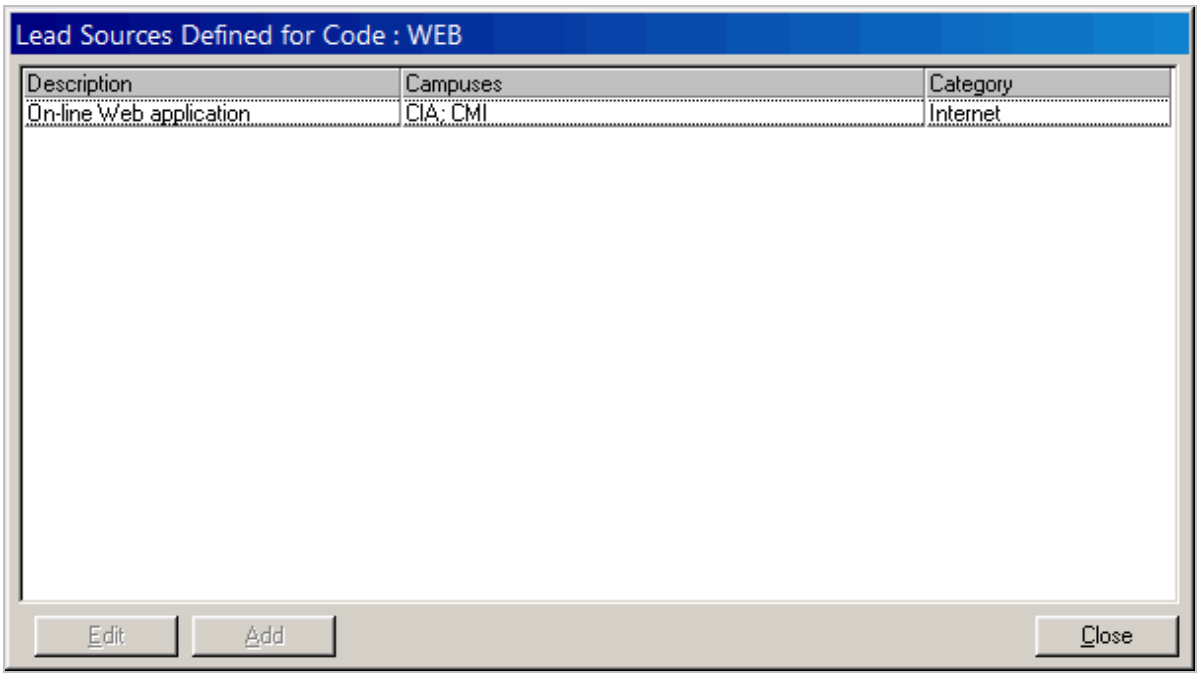
1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Lead Sources**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Lead Sources Code Setup form is displayed.



7. Specify a unique **Code**.
8. Enter a **Description**.
9. If you are adding a duplicate lead source code, when you leave the Code field, a form lists all duplicates of the code you entered.



10. If, after reviewing the list, you want to continue adding the new lead source code, click **Add**. CampusNexus Student displays the Lead Source Code Setup form again, after eliminating all campuses for which the code already exists.
11. In the Category field on the Lead Sources Code Setup form, click

and select a Category to which the lead source belongs.

If necessary, click to add a Category. The Code Setup form is displayed. Specify a Code and Description. CampusNexus Student inserts the new Code in the Lead Source Category list box when you save it.

12. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
13. Select or clear **Capture Advertising Information** as required. If selected, this lead source is included in the Lead Source Performance report. (Reports > Admissions > Lead Source Performance).

    Note: The Capture Advertising Information check box on the Lead Sources Code Setup form must be selected and the Track Multiple Lead Inquiries check box (Setup > Campus Locations > Add/Edit Campus > Allow tab > Student Inquiries) must be selected for the Response Number, Response Time, and Response Date fields to be displayed on the Student Inquiry form.
14. Select or clear **Online Lead Source** as required. If selected, this lead source appears as an option in the Lead Source drop-down list in Step 1 of the application and request information process in Portal.
15. Select one or more **Campuses**.
16. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

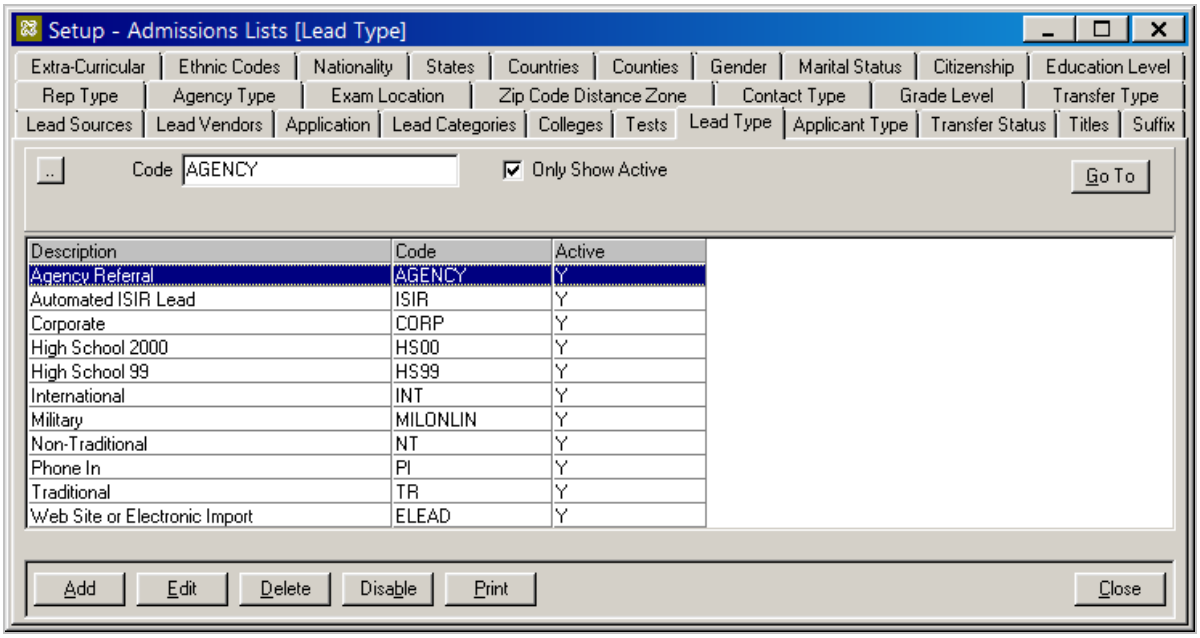
Setup - Admissions Lists [Lead Types]

Lead types are used to classify your leads according to any grouping you find useful. Lead types can refer to the background from which the lead comes such as high school or corporation.

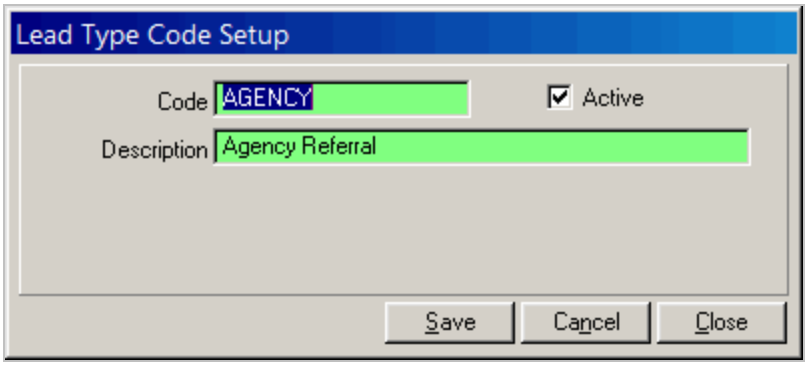
Lead types are different from lead sources and lead categories because lead types are not necessarily related to marketing and advertising efforts, although there may be some correlation between the source of the lead and the type of lead produced.

To add or edit a list of lead type codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Lead Type**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Lead Type Code Setup form is displayed.



6. Specify a unique **Code**.
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. Enter a **Description**.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Admissions Lists [Lead Vendors]

The Lead Vendors list is used to designate the vendors who provided leads (prospects). Institutions can use this data to obtain metrics on lead vendors, sub vendors, affiliates, search engine optimization tactics, and any other data element sent with the source of the lead.

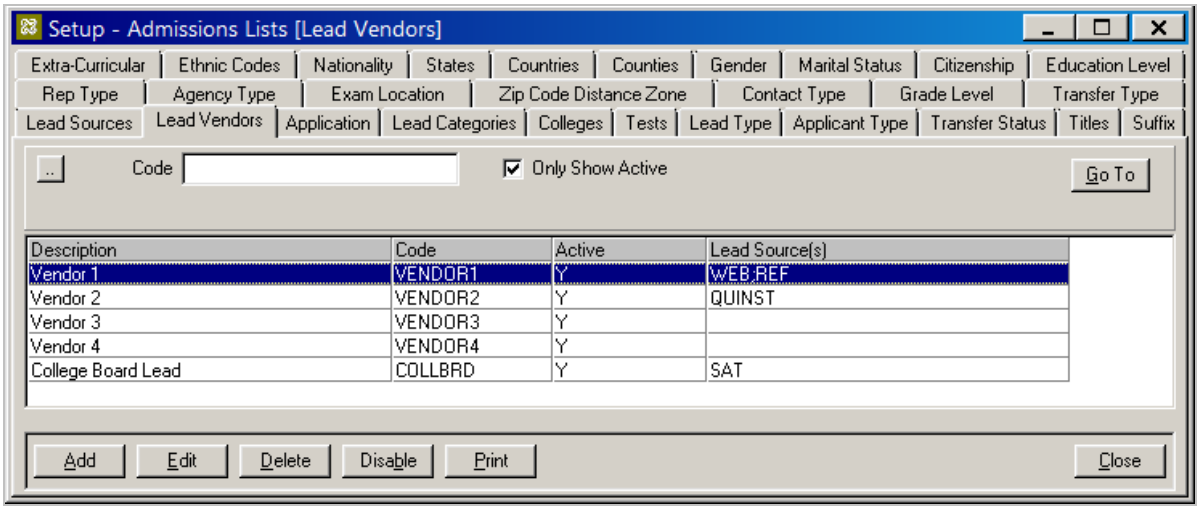
You can do the following with lead vendor tracking:

- Define list of lead vendors in CampusNexus Student.
- Capture and store an additional data field, from eLeads, in the database.
- Associate multiple lead sources to vendors, when adding or editing lead vendors.
- Associate multiple lead sources to sub vendors (if the sub vendor has been associated with the selected vendor), when adding or editing sub vendors.

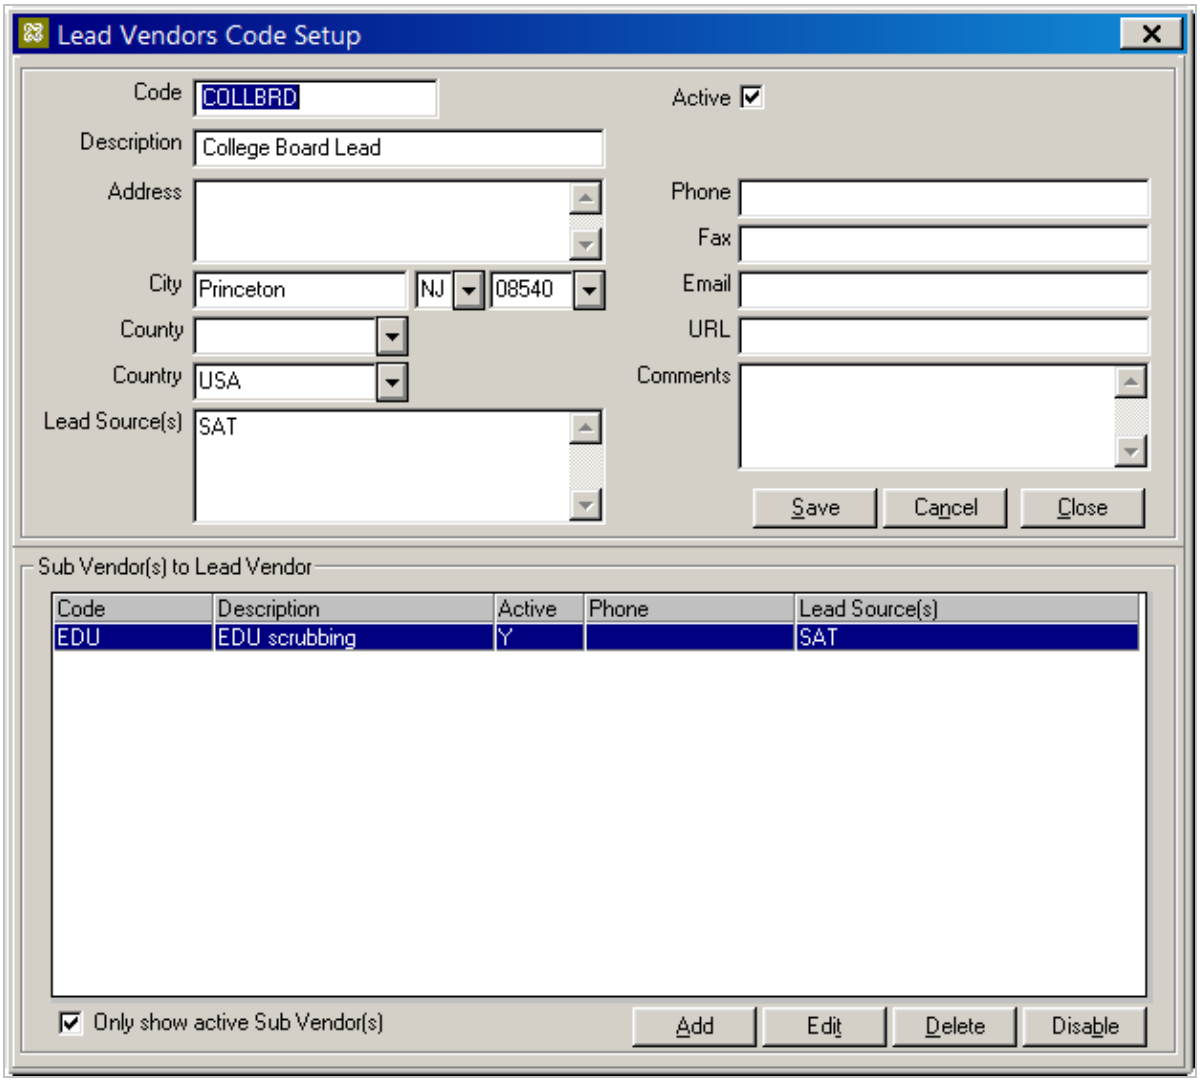
Note: Each vendor is associated with a lead source.

To add or edit a list of lead vendor codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Lead Vendors**.



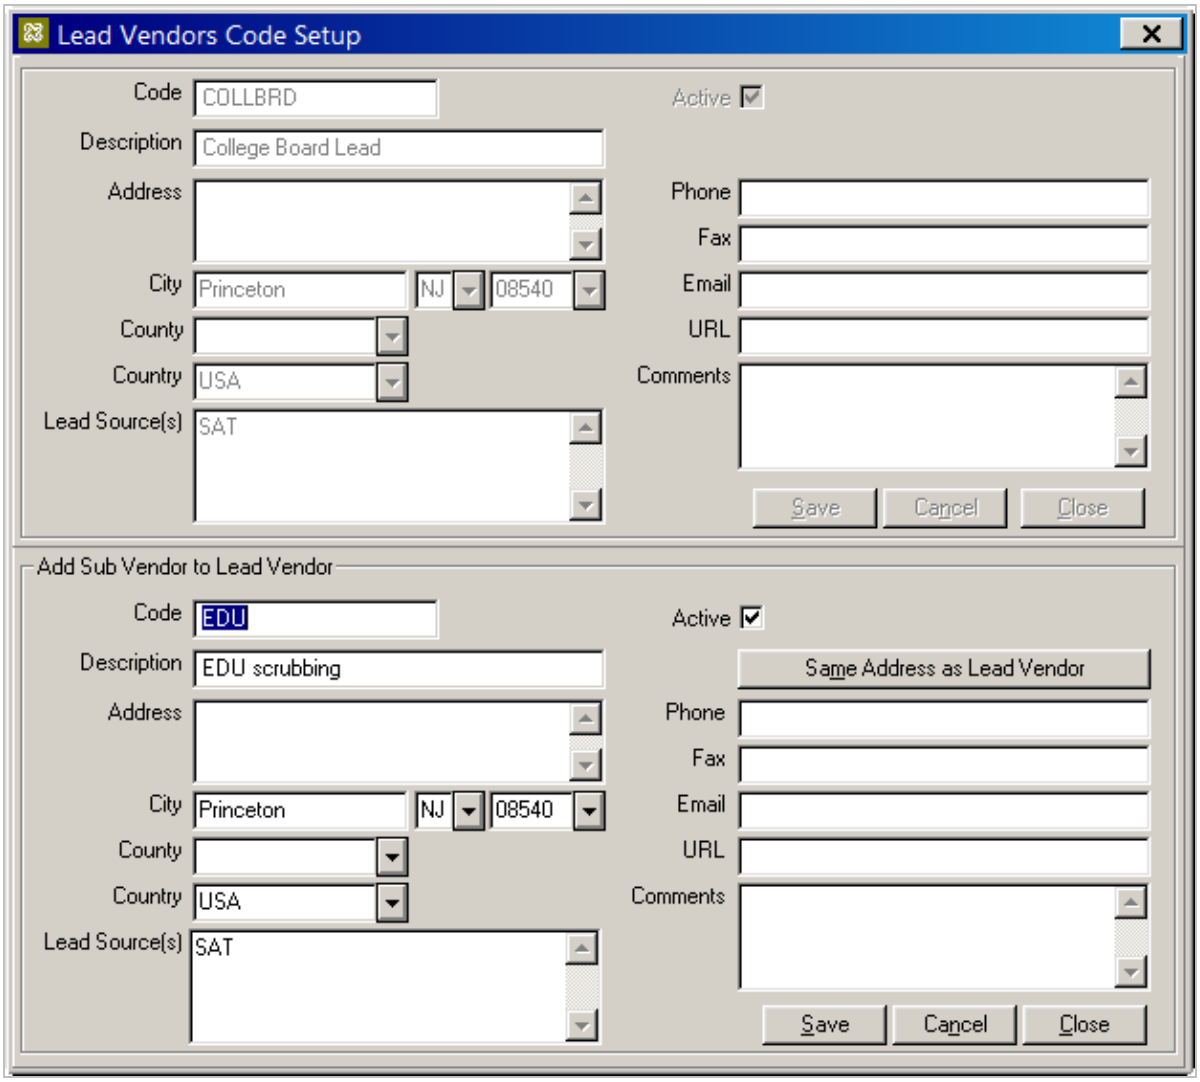
3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Lead Vendors Code Setup form is displayed.



6. Specify a unique **Code**.
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. Enter a **Description**.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To add or edit sub vendors:

1. In the 'Sub Vendor(s) to lead Vendor' section of the Lead Vendors Code Setup form, select **Only show Active Sub Vendors(s)** to filter the list of sub vendors.
2. Click **Add**, or select a record and click **Edit**.



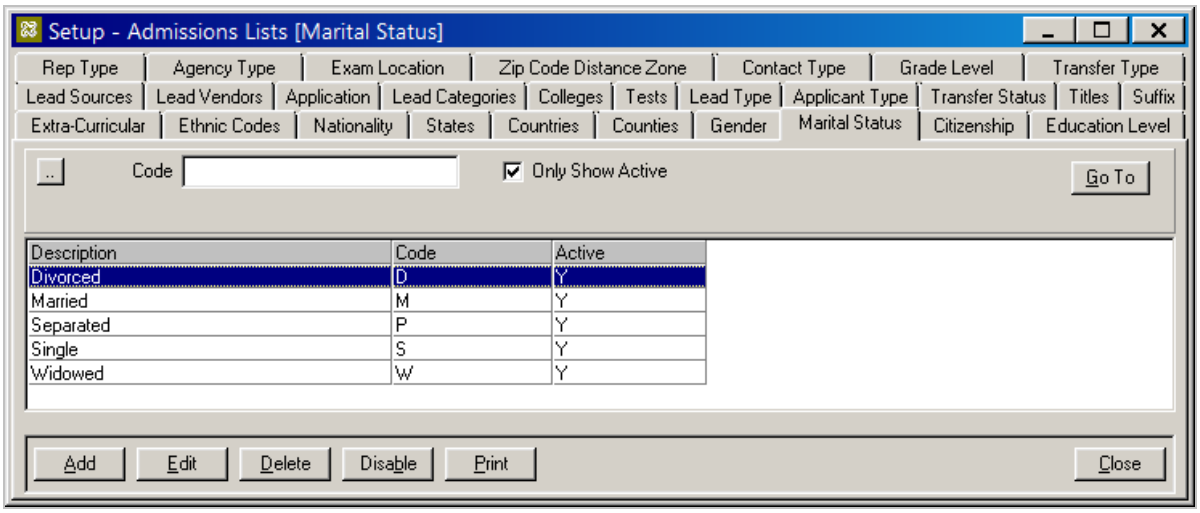
3. Specify a unique **Code**.
4. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
5. Enter a **Description**.
6. Specify the address and contact information as appropriate or click **Same Address as Lead Vendor**.
7. Enter any comments in the **Comment** field.
8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Admissions Lists [Marital Status]

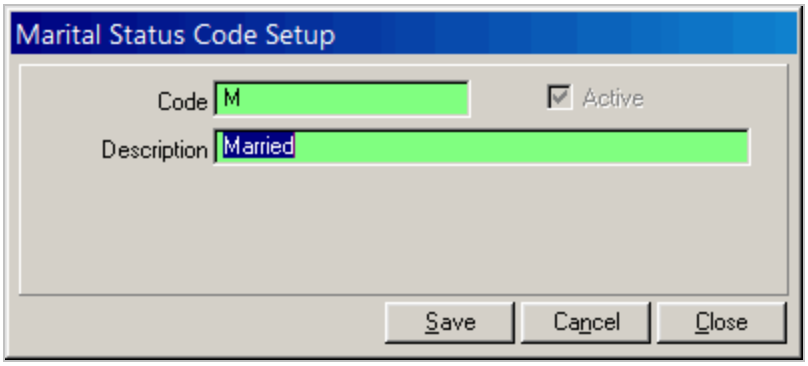
The marital status list contains the marital statuses used by your institution. You can set up codes with which your staff is familiar. The list should reflect the categories used by the Department of Education Financial Aid programs.

To add or edit a list of marital status codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Marital Status**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Marital Code Setup form is displayed.



6. Specify a unique **Code**.
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. Enter a **Description**.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

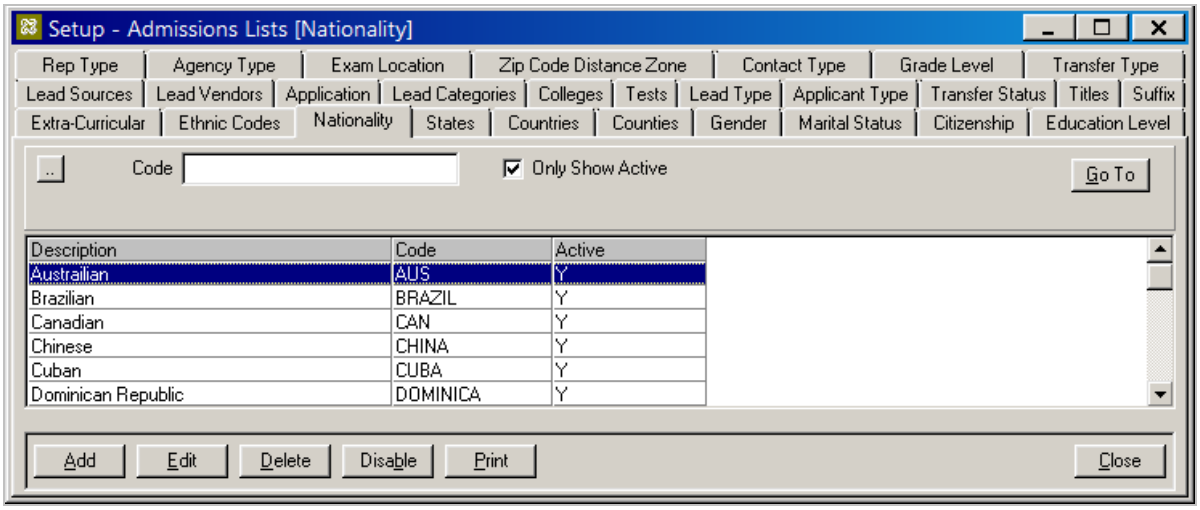
Setup - Admissions Lists [Nationality]

The Nationality list contains entries for the nationalities of your leads and students. As part of a student's record, this list is useful in determining special educational needs such as "English as a Second Language".

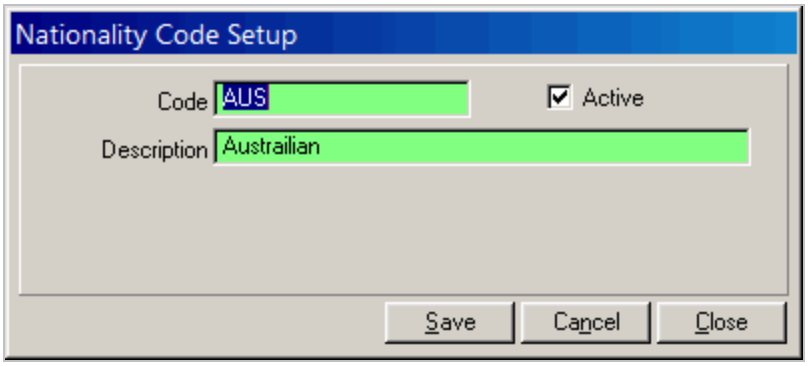
Note: The Nationality code list is not the same as the Countries code list, even though the two lists are likely to have similar entries. For instance, a person whose address may include a country called Australia, might have a nationality code referring to the person as Australian. The Nationality code is also not the same as the Citizenship code, which is used for determining financial aid eligibility.

To add or edit a list of nationality codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Nationality**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Nationality Code Setup form is displayed.



6. Specify a unique **Code**.

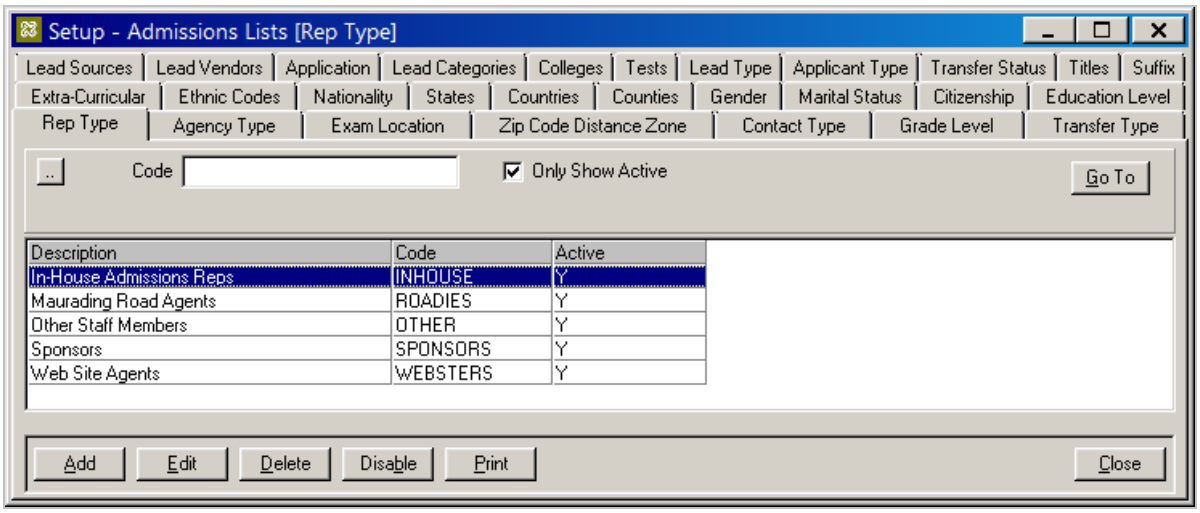
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. Enter a **Description**.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Admissions Lists [Rep Type]

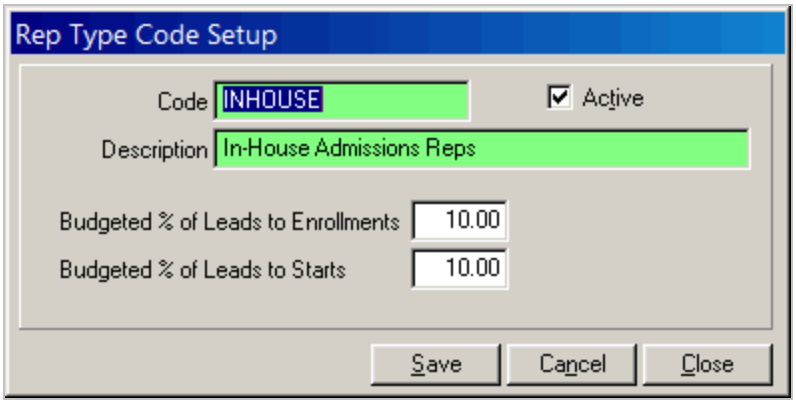
The Rep Type codes are assigned to staff members in the Admissions Rep group. With this code, admissions representatives can be grouped in departments for reporting purposes. See Setup > Staff > Staff Members and Setup > Staff > Staff Groups.

To add or edit a list of admissions rep type codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Rep Type**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Rep Type Code Setup form is displayed.



6. Specify a unique **Code**.
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. Enter a **Description**.

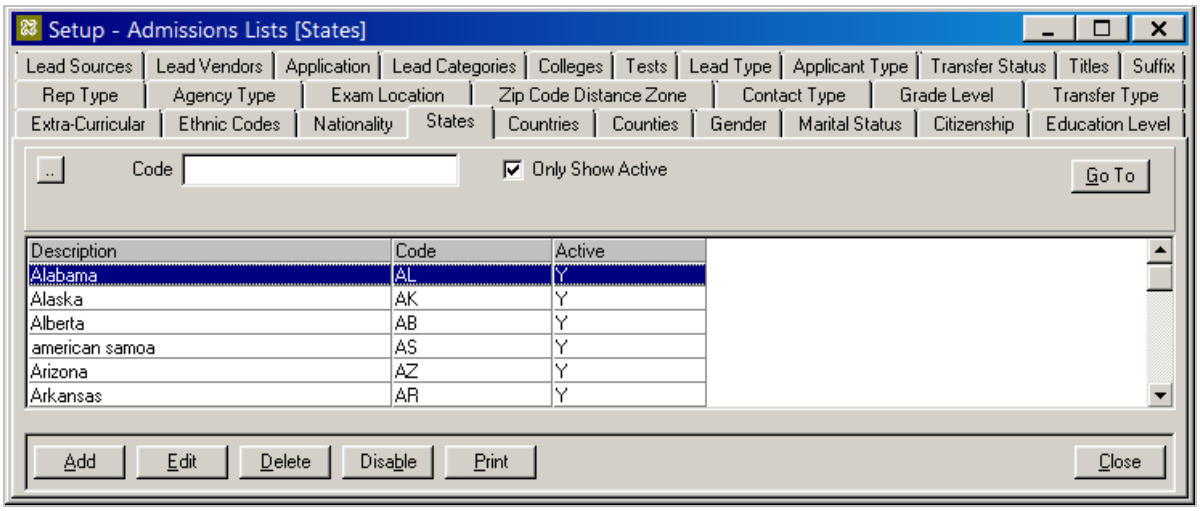
9. Specify the **Budgeted % of Leads to Enrollments**. This value is used on the Executive Summary Report.
10. Specify the **Budgeted % of Leads to Starts**. This value is used on the Executive Summary Report.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Admissions Lists [States]

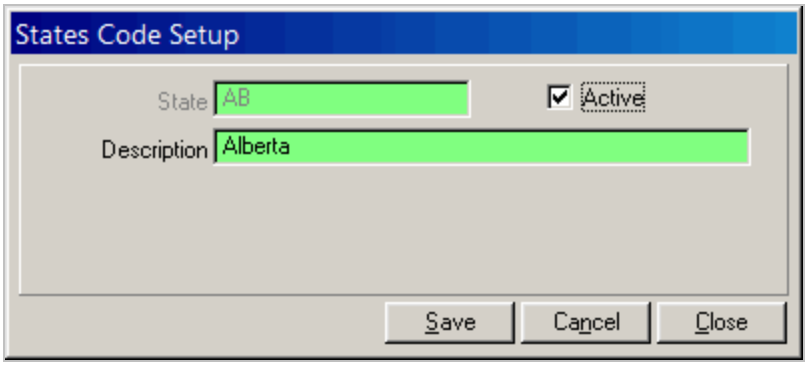
The States list is used for the selection and validation of state postal codes when entering address records. A standard list of states is provided when CampusNexus Student is installed. You can add to the list if you require additional codes such as Canadian provinces and foreign postal codes.

To add or edit a list of state codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **States**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The State Code Setup form is displayed.



6. Specify a unique **Code**.
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.

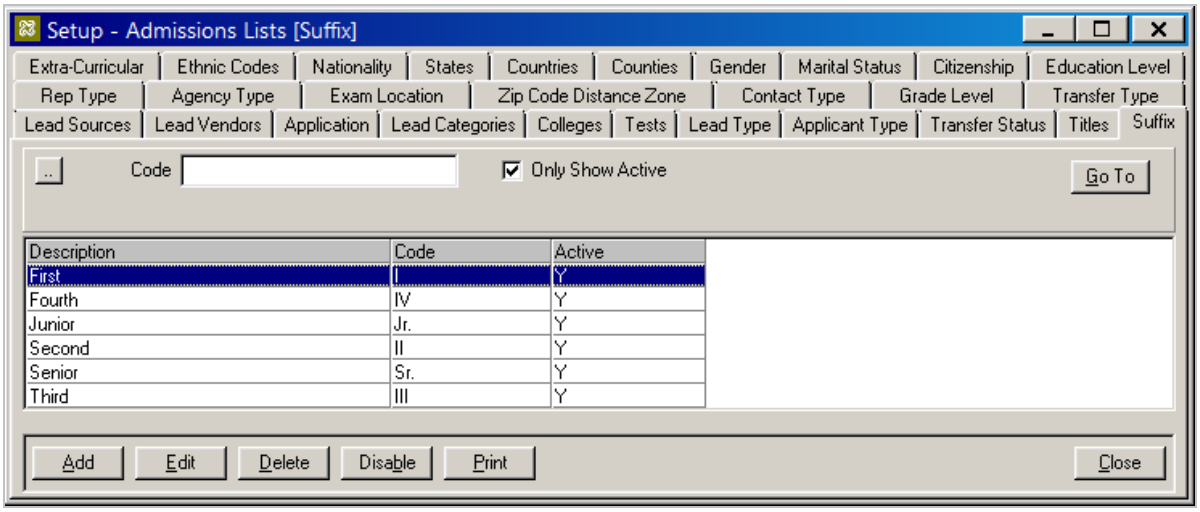
8. Enter a **Description**.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Admissions Lists [Suffix]

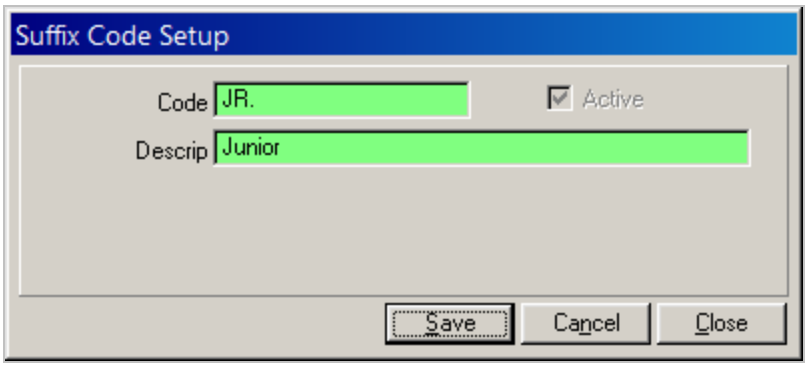
The Suffix list is used for the selection of suffixes, such as Senior or Second (II), when entering name records.

To add or edit a list of state codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Suffix**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Suffix Code Setup form is displayed.



6. Specify a unique **Code**.
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. Enter a **Description**.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Admissions Lists [Tests]

The Tests list defines codes for tests. Entrance tests are used to qualify students for enrollment in your institution. Test codes are entered in the lead record with resulting test scores.

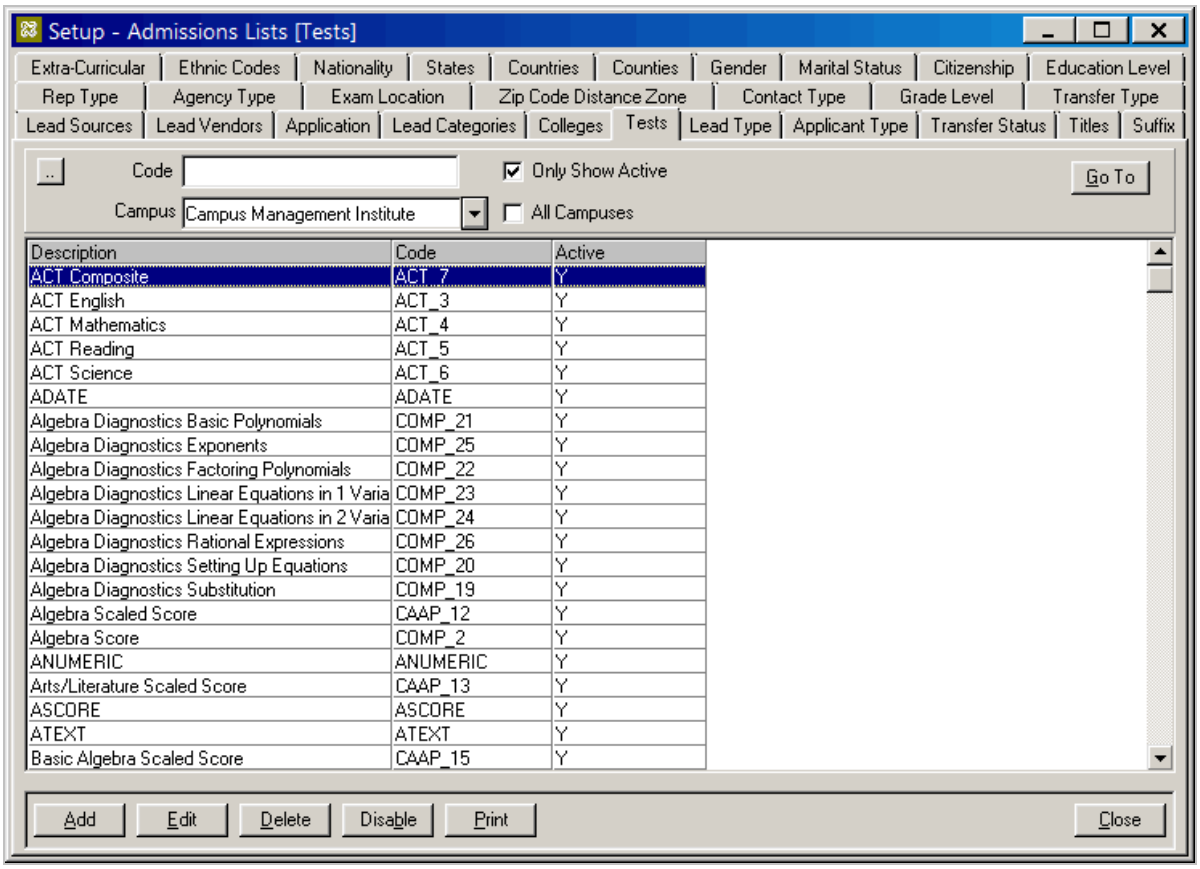
Schools have flexibility when setting up entrance tests to accommodate some of the more complicated tests that require sub-scores or other information. For example, when creating a single test for SAT, verbal, reading, and essay information can be set up and stored as sub-scores.

The tests can be configured in a hierarchical order, such that any given test can have any number and/or levels of sub-tests or supporting information. Remedial courses can be configured for the tests when a student does meet the minimum criteria established for the test and/or sub-score. CampusNexus Student assigns the configured remedial courses to a student schedule if the student's test score is not satisfactory for that Program / Program Version / Agency.

Multiple sub-tests can be assigned to a main test, and multiple lower level sub-tests can be assigned any sub-test. Each can be associated with the applicable campus. All Tests can be assigned for each enrollment.

To add or edit a list of test codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Tests**.

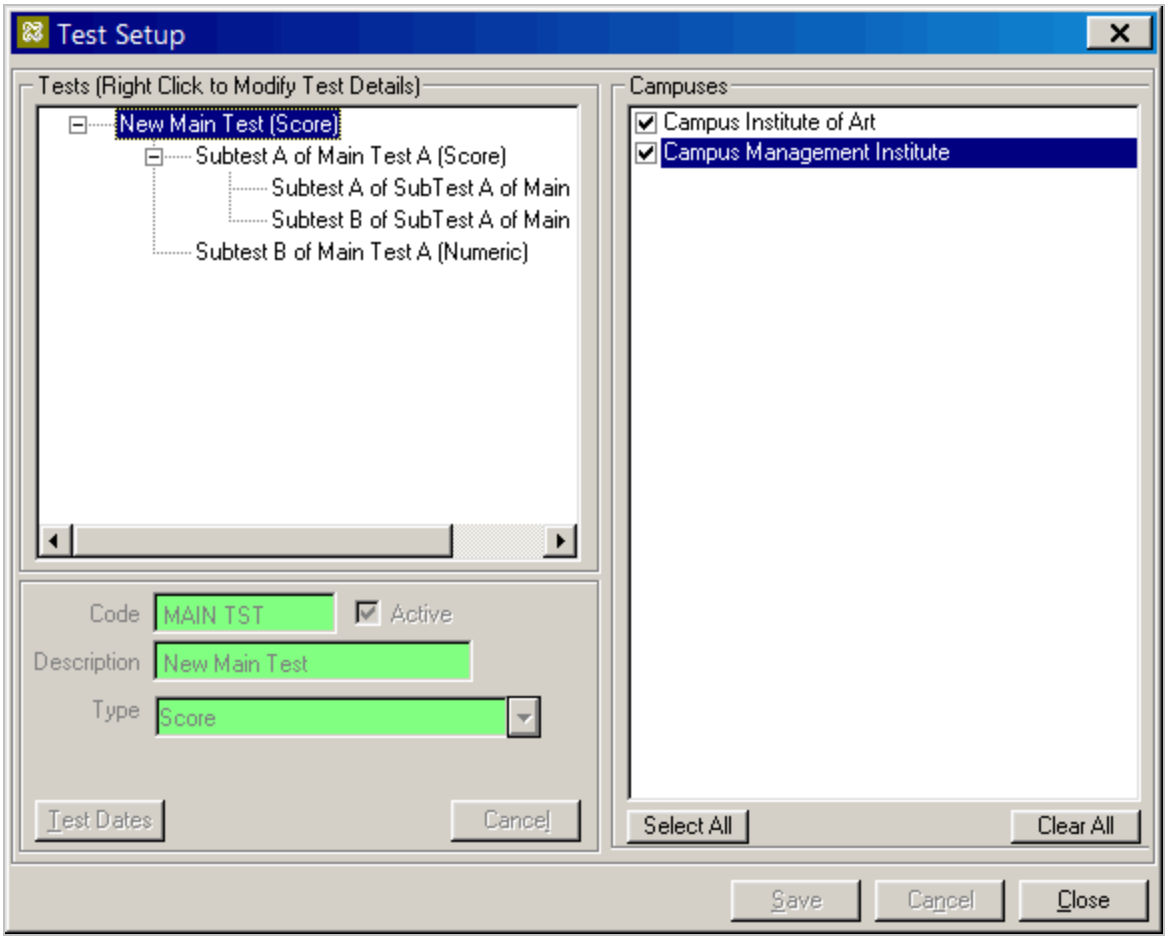


Note: When you click the **Print** button, the Code, Description, Campus Group, and Active flag for each main test on the Tests Listing report are listed. (The sub-fields of the main tests *are not* listed).

3. Click

... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.

4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Test Setup form is displayed.



7. Specify a unique **Code**.
8. Enter a **Description**.
9. Select the **Campus (es)** that will use the entrance test.
10. Select a test **Type**. The options are:

    - Score
    - Date
    - Numeric
    - Text

    Different fields are enabled depending on the selected test type.

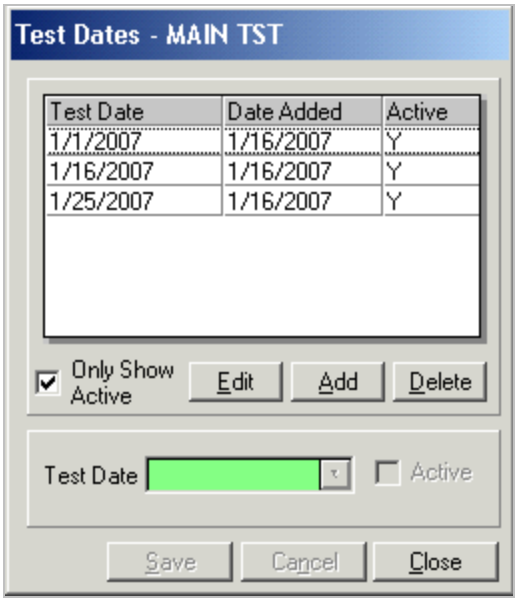
To add, edit, or delete test details within a hierarchy:

1. Right-click in the Tests area. Select the option to **Add**, **Edit**, or **Delete** test details.
2. Select the **Campus**, **Code**, **Description**, and **Type** for a new test.
3. Click **Save**. A confirmation message is displayed. Click **OK**.
4. The new test is displayed in the hierarchical list.
5. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To specify test dates:

The Test Dates button is enabled only for main tests.

1. Click the **Test Dates** button. The Test Dates form is displayed.



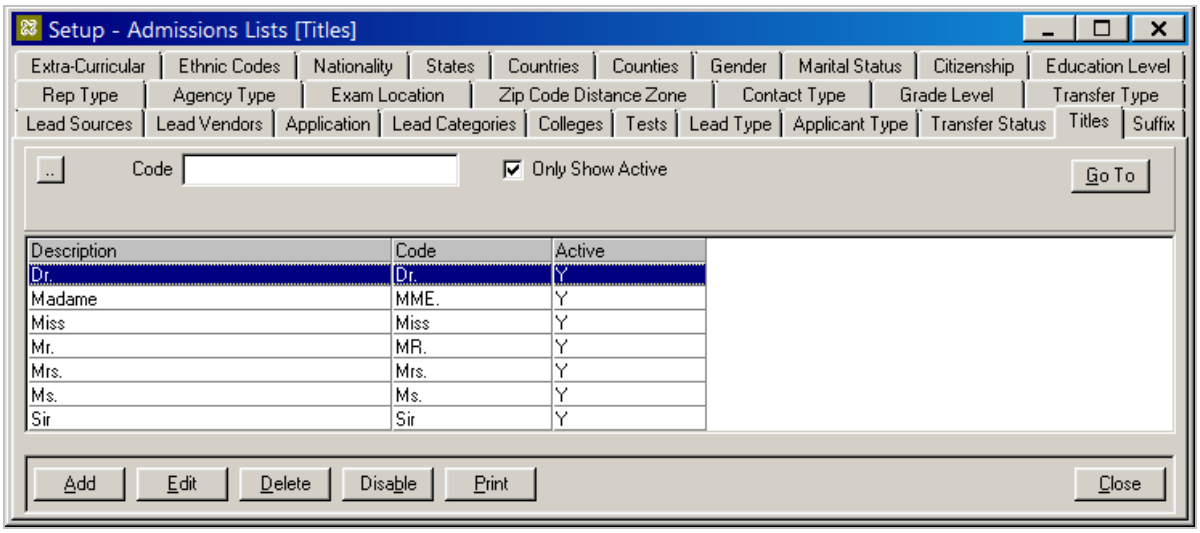
2. Click **Add** to add new test dates.
3. Select a test date and click **Edit** to modify the date, or click **Delete** to remove a test date.
4. Click in the **Test Date** field and select the test date from the calendar.
5. Click **Save**. . The selected Test Date is added to the test date list.
6. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Admissions Lists [Titles]

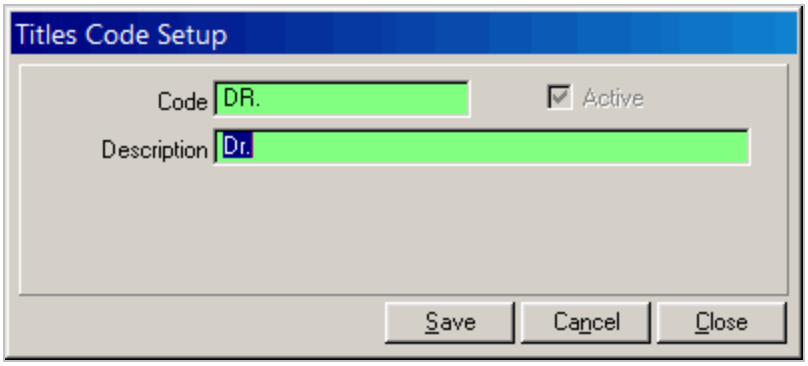
The Titles list contains the common titles that may be used in your lead, student, and staff records. The titles are frequently used as name prefixes on written correspondence with these individuals.

To add or edit a list of title codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Titles**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Title Code Setup form is displayed.



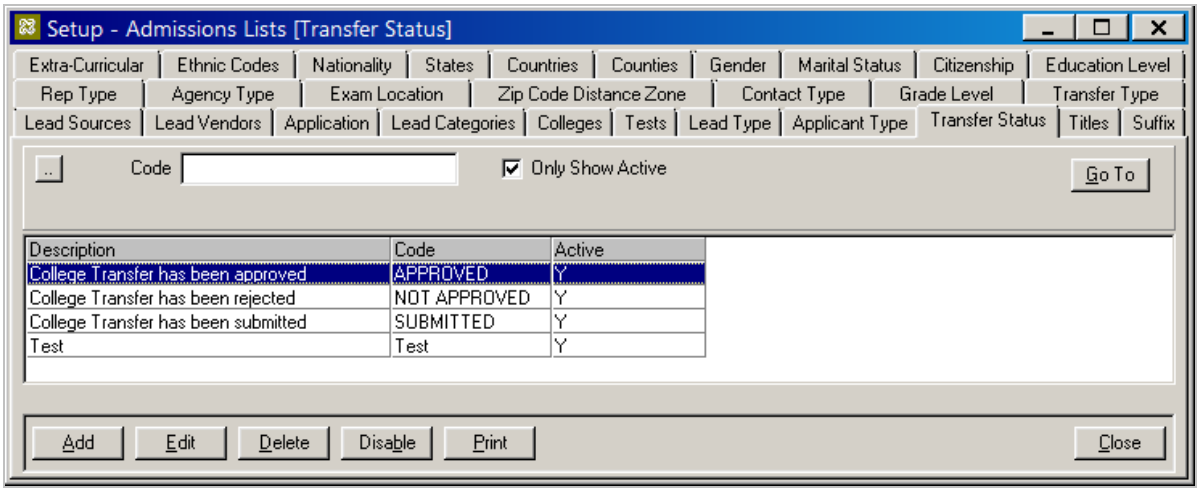
6. Specify a unique **Code**.
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. Enter a **Description**.
9. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Admissions Lists [Transfer Status]

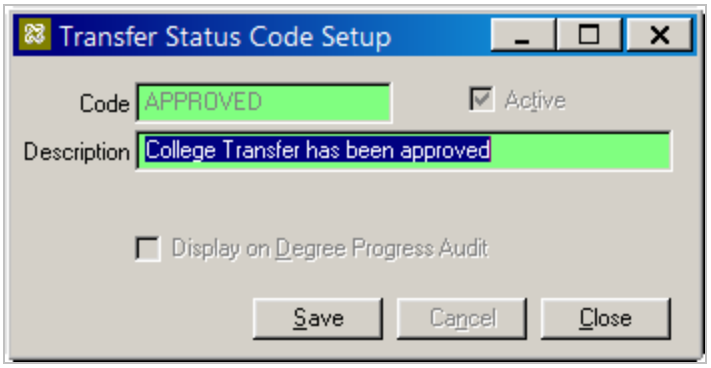
The Transfer Status list defines codes for the statuses that can be assigned for a college transfer.

To add or edit a list of transfer status codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Transfer Status**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Transfer Status Code Setup form is displayed.



6. Specify a unique **Code**.
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. Enter a **Description**.
9. Select the check box **Display on Degree Progress Audit** if the transfer status and information should appear on

the Degree Progress Audit (including the Hypothetical Degree Progress Audit).

Note: If the status code is APPROVED, the check box is disabled because transfer credits in an APPROVED status are automatically displayed on the Degree Progress Audit.

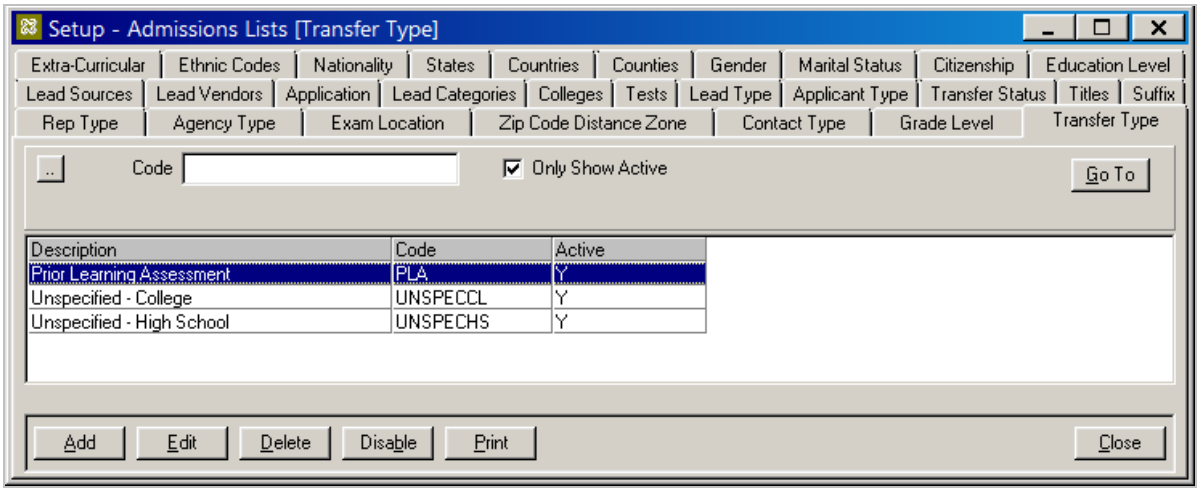
10. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Setup - Admissions Lists [Transfer Type]

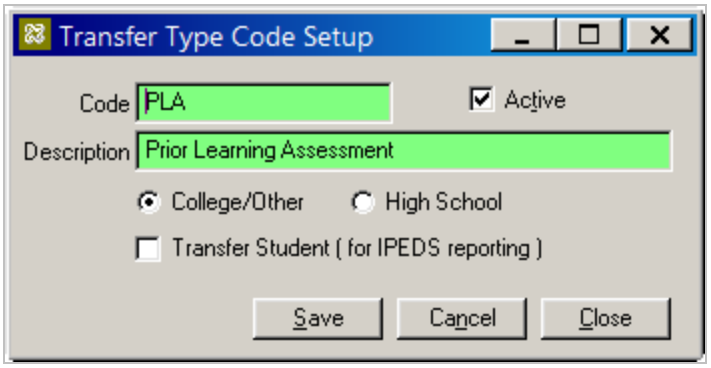
The Transfer Type list contains codes to identify the various transfer types that can be assigned when posting transfer credits.

To add or edit a list of transfer type codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Transfer Type**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Transfer Type Code Setup form is displayed.



6. Specify a unique **Code**.
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. Enter a **Description**.
9. Select **College/Other** or **High School** to indicate the institution and course list to be used when entering transfer

credits for a student.

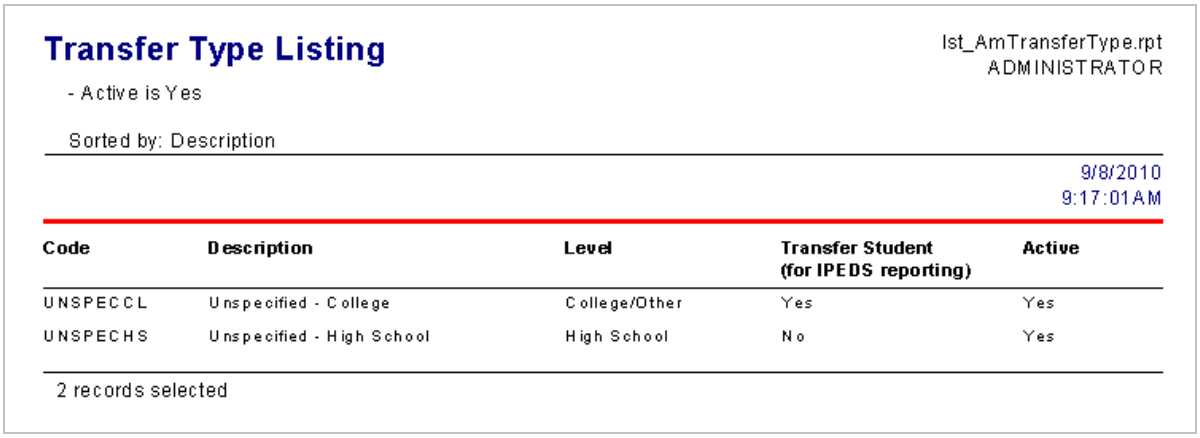
10. If applicable, select **Transfer Student (for IPEDS reporting)** to designate that the transfer type is not to affect a student's transfer status in IPEDS reporting.
11. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

To print a list of transfer types:

1. Click **Print** on the Setup - Admissions Lists [Transfer Type] tab. The Report Selection form is displayed.
2. Select appropriate options on the Selection tab.

   Select or clear **Yes** or **No** next to the Active label. If you select Yes, active records are listed on the report. If you select No, inactive records are listed. If you select both, active and inactive records are listed.

   If no records match the selection criteria, the message *"No records selected for the report"* is displayed.
3. Click **Preview**. The report is assembled and displayed in the Report Viewer. The report contains the Code and Description for each Housing Date configured.



Transfer Type Listing

lst_AmTransferType.rpt
ADMINISTRATOR

- Active is Yes

Sorted by: Description

9/8/2010
9:17:01AM

Code	Description	Level	Transfer Student (for IPEDS reporting)	Active
UNSPECCL	Unspecified - College	College/Other	Yes	Yes
UNSPECHS	Unspecified - High School	High School	No	Yes

2 records selected

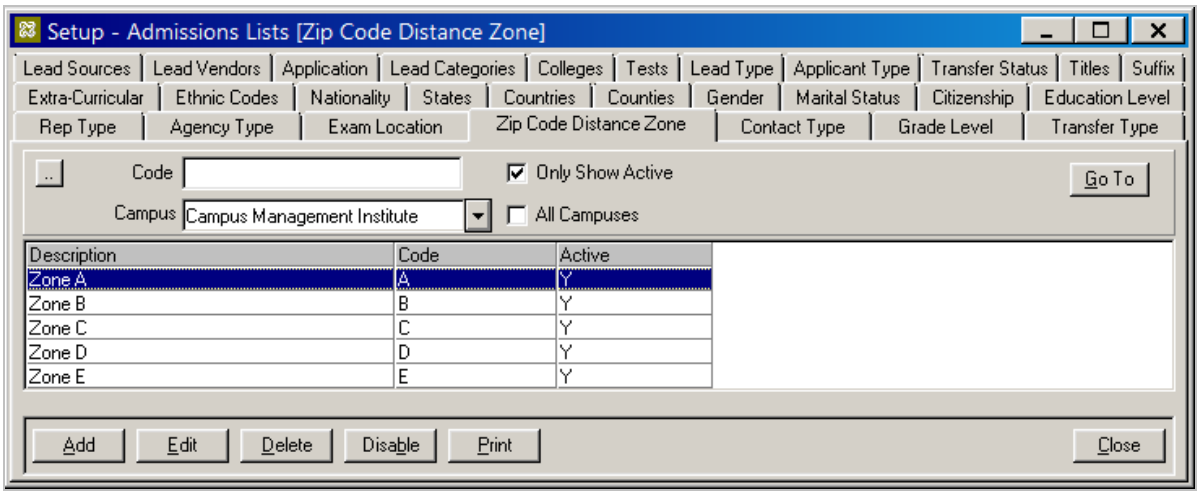
4. Use the available Report Viewer Controls as needed to process the Transfer Type Listing.

Setup - Admissions Lists [ZIP Code Distance Zone]

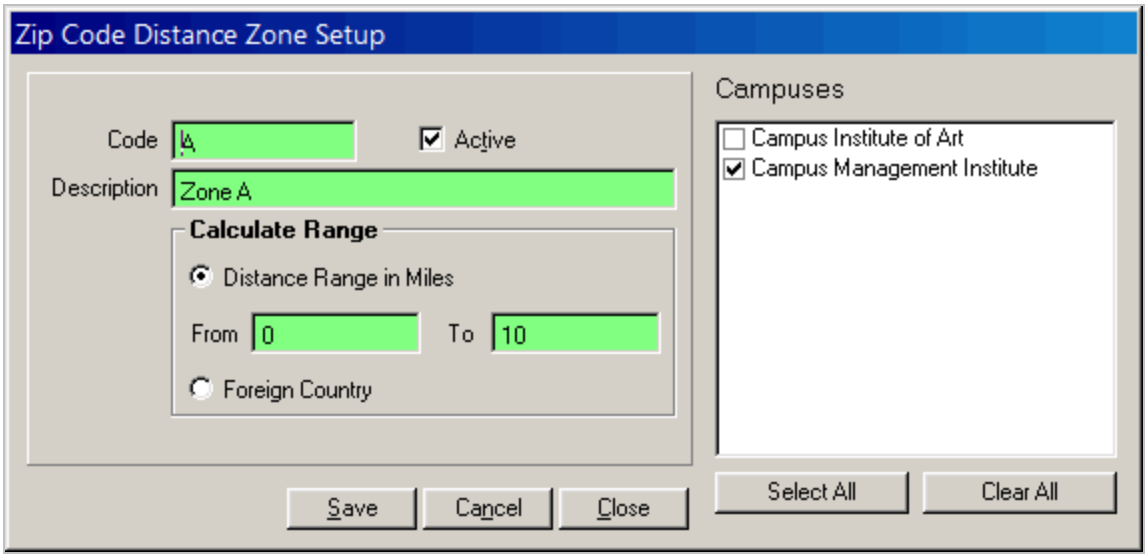
The ZIP Code Distance Zone list provides a means of assigning zones to students. The zones are determined by calculating the direct line distance between the ZIP code of each campus and the ZIP code of the student's address. An option is provided to assign a zone for any student from a foreign country (outside of the ZIP code system).

To add or edit a list of ZIP code distance zone codes:

1. Navigate to **Lists** > **Admissions**. The Setup - Admissions Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **ZIP Code Distance Zone**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The ZIP Code Distance Zone Code Setup form is displayed.



7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.
10. In the Calculate Range area, select whether the zone is determined by distance or by country.
    - If the zone is based on distance, select **Distance Range in Miles** and specify the **From** and **To** range.
    - If the zone is based on another country, select **Foreign Country**.
11. Select one or more **Campuses**.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Lists > Financial Aid

When you navigate to Lists > Financial Aid, the Financial Aid Lists form is displayed. Add, edit, delete, disable, and print Financial Aid lists from the following tabs:

- Academic Years
- Budgets
- Disbursement Approval Criteria
- Disbursement Schedules
- FA G/L Funds
- Fund Source
- Lenders
- Packaging Methods
- Packaging Statuses
- Packaging Status Promotion
- Programs

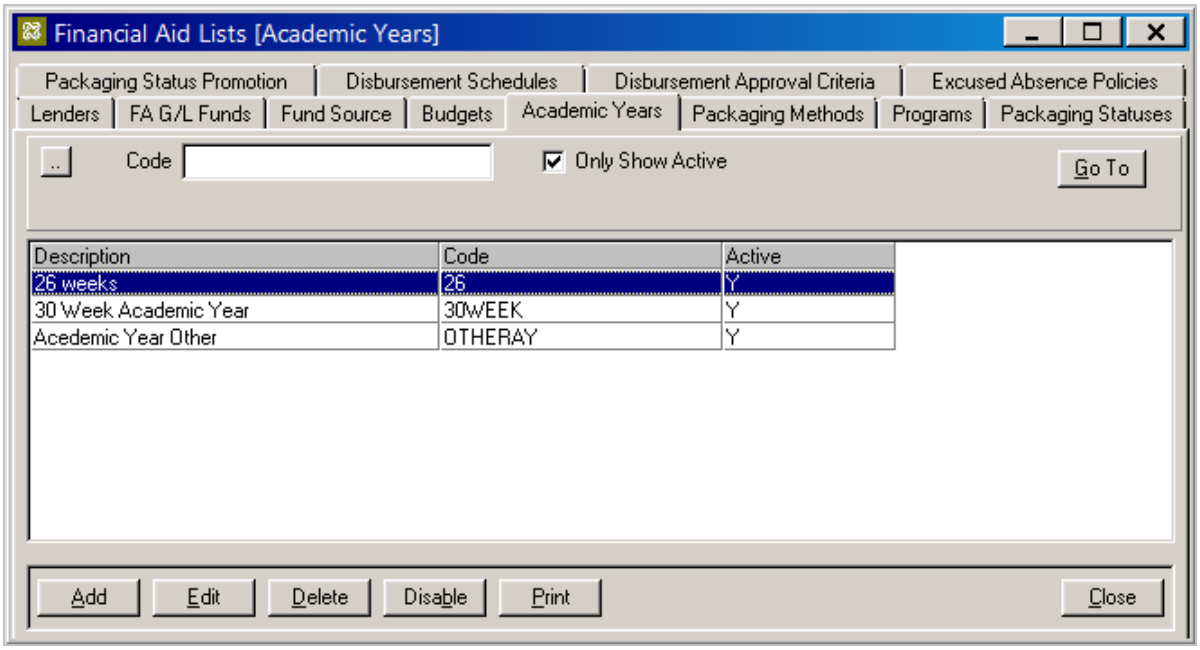
See Maintaining Lists for instructions on adding, editing, deleting, disabling, enabling, and printing lists.

Financial Aid Lists [Academic Years]

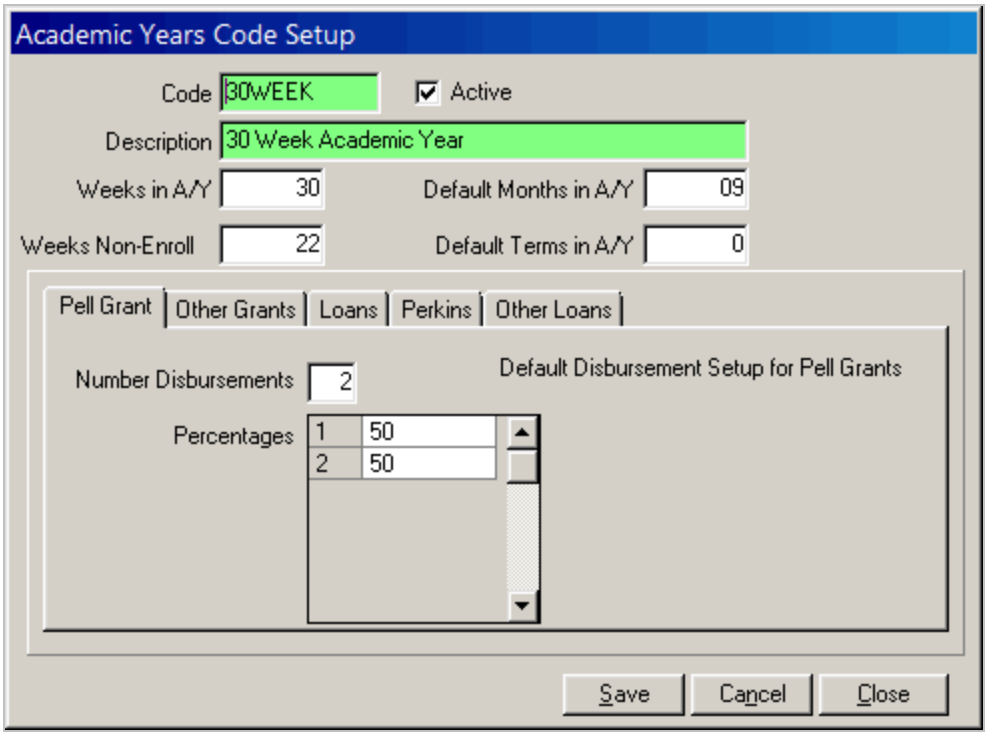
The Financial Aid Lists [Academic Years] form is used to describe the characteristics of your institution's academic years. The academic years you define here are used when setting up programs in financial aid lists. Typically, an institution would have only a few variations of the academic year (AY) and possibly only one.

To add or edit a list of academic years codes:

1. Navigate to **Lists** > **Financial Aid**. The Financial Aid Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Academic Years**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Academic Years Code Setup form is displayed.



6. Specify appropriate options. See Field Descriptions.
7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Field Descriptions

Field	Description
Code	Specify a unique **Code**.
Description	Enter a **Description**. **Note**: The description should indicate the number of weeks, months, or clock hours included in the academic year if your institution has more than one type of academic year.
Weeks in A/Y	Specify the number of weeks in the academic year. The total of Weeks in A/Y and Weeks Non-Enroll should add up to 52. A Higher Education Reconciliation Act (HERA) provision reduces the minimum 30 weeks of instructional time for programs measured in clock hours to 26 weeks. The minimum 30 weeks academic year definition remains in effect for term and non-term credit hour programs.
Weeks Non-Enroll	Specify the number of weeks in the academic year that the student is not expected to be in attendance. The total of Weeks in A/Y and Weeks Non-Enroll should add up to 52. This number is used (combined with Weeks in A/Y) to estimate the time between the start of one academic year and the start of the next academic year.

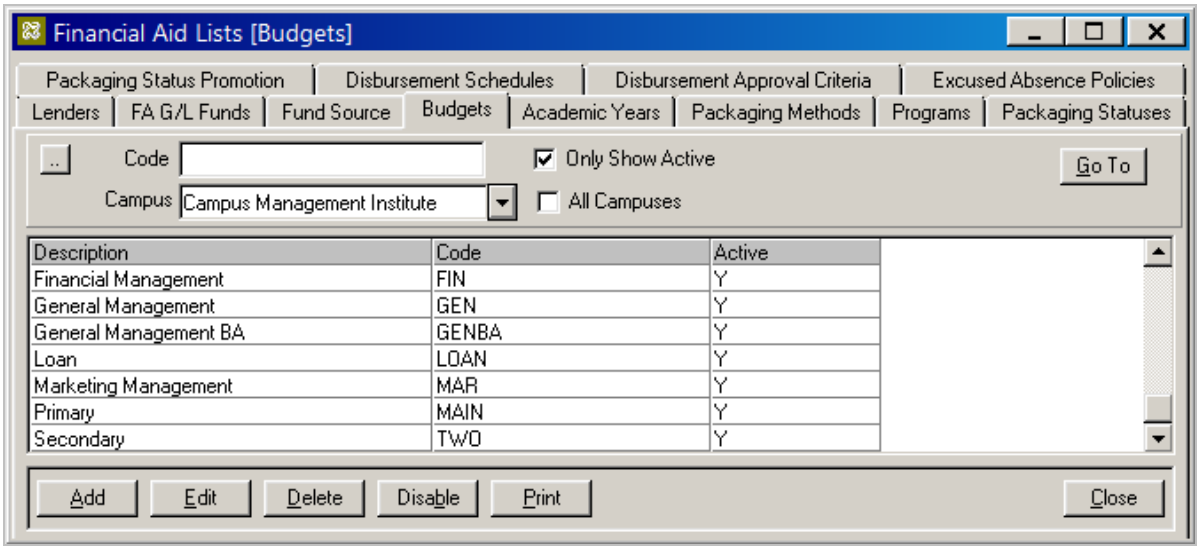
Field	Description
Default Months in A/Y	*Optional*: Specify the default number of months in the academic year. CampusNexus Student calculates the number of months in an academic year using the formula: (Default weeks in AY / 4.33). The number of months in this field will override the calculation. If this new field is greater than 0, CampusNexus Student uses this value as the months in an Academic Year. If this field is set to 0, CampusNexus Student uses the existing logic and calculates the months in the AY.
FA Fund Source Tabs	Each fund source tab represents a class of fund sources, not the specific fund sources used by your institution. The fields on each fund tab are similar.
Number of Disbursements	Specify the default number of disbursements you expect to make for this academic year. The valid range is 1 to 15. The maximum number of disbursements allowed by financial aid type is as follows: • Pell Grant - 15 • Other Grants - 6 • Loans - 20 • Perkins - 6 • Other Loans - 6
Percentages	When you enter the default number of disbursements, CampusNexus Student calculates the percentage of the financial aid amount in each disbursement. Percentages can be entered with two decimal places. For example, a fund source with three disbursements can be set up as 33.34%, 33.33%, and 33.33%. If the number of disbursements is one or two, decimals are not allowed. If the number of disbursements is three or more, decimals are allowed. All percentages entered for a financial aid type must add up to 100.00.

Financial Aid Lists [Budgets]

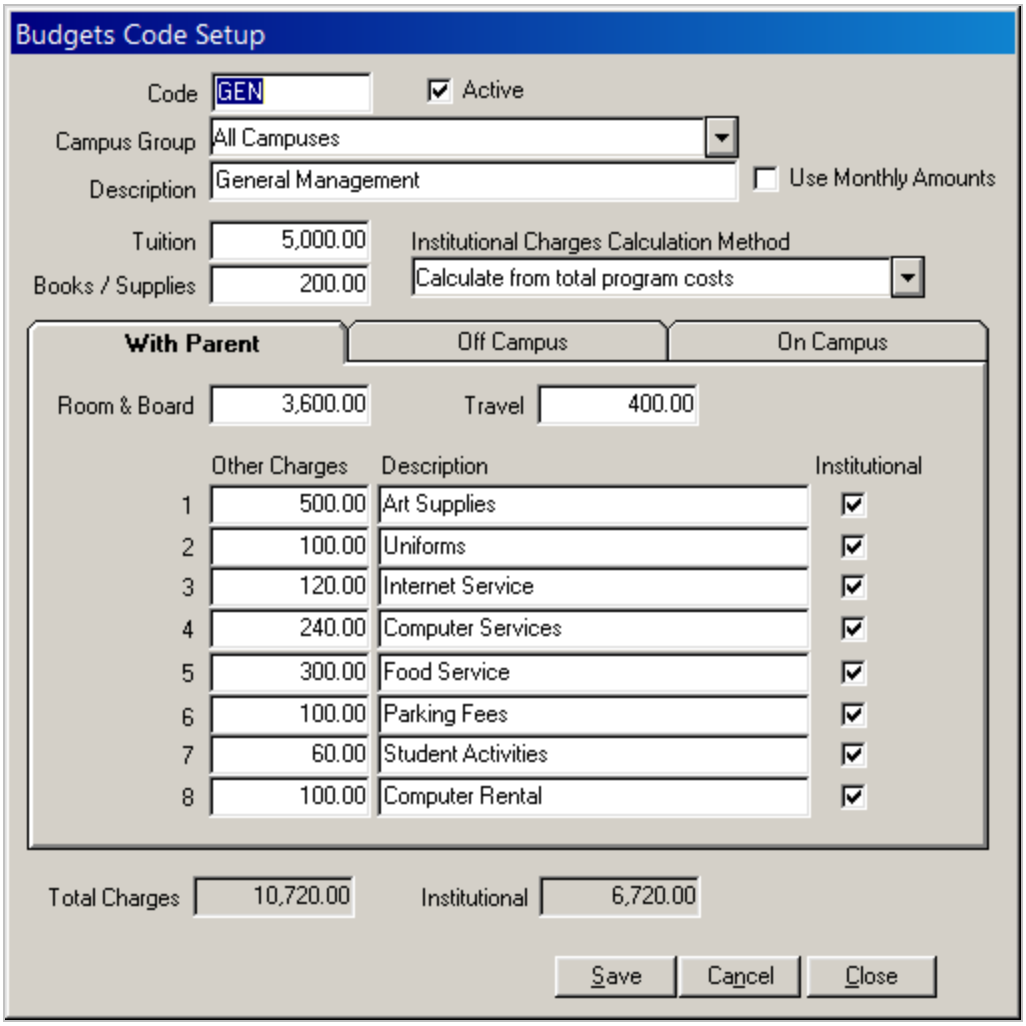
Use the Financial Aid Lists [Budgets] form to set up budgets for student financial aid packaging. These budgets are also known as the Cost of Attendance (COA) budget. Budgets are normally set up to cover an academic year. They are the basis for financial aid grants and loans which are also based on academic years. Budgets can vary based on the dependency model that fits the student. You need to select a budget from a list of available budgets when packaging a student. Authorized users can configure new budgets or change existing budgets.

To add or edit a list of budget codes:

1. Navigate to **Lists** > **Financial Aid**. The Financial Aid Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Budgets**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Budgets Code Setup form is displayed.



Institutions can set up budgets for students according to housing status. A budget shares common tuition, books and supplies components, but the room and board, travel, and personal expense components can be calculated separately depending on student's housing status.

CampusNexus Student can associate a budget with a program version. Costs for "Tuition" and "Books / Supplies" are specified in the Programs Code Setup form (Lists > Financial Aid > Programs).

7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Select a **Campus Group** to which this budget applies.
10. Enter a **Description**.
11. Select the **Use Monthly Amounts** check box to configure a budget that uses monthly amounts for budget allowances rather than literal values.
12. The **Institutional Charges Calculation Method** determines how the institutional charges portion of the budget is calculated when the budget is assigned to an academic year for a student. Select one of the following options:

a. **Calculate from Enrollment Fees**

   This option gathers the institutional costs for the budget from the student's records in the Program Fees (AdFees) table. This table defines the billing schedule for a student. The records gathered from this table depend on the defined billing method for the student's program.

   - If billing is based on full program, the full program costs are gathered from the Fees table for the student and used as the institutional costs for the budget.
   - If billing is based on academic year, the institutional costs for the budget are calculated by gathering the records in the Fees table for the academic year being packaged.
   - If billing is based on term, and a rate schedule is not used, the charge records found in the Fees table are multiplied by the number of billing cycles that occur in an academic year (AdProgramVersion.TermsInAY) to calculate the institutional costs for the budget.
   - If billing is based on course, or based on term using a rate schedule, the Calculate from AdFees option applies.

b. **Calculate from total program costs**

   This option calculates the institutional costs of the budget as follows:

   The total tuition cost of the program (AdProgramVersion.TotalTuitionCost) is divided by the total number of weeks in the program (AdProgramVersion.TotalWeeks) to arrive at a cost per week. The cost per week is then multiplied by the number of weeks in the academic year being packaged (FaStudentAY.WeeksInAY - FaStudentAY.WeeksNonEnroll) to arrive at the tuition cost for the budget.

   The books and other costs are calculated the same way. The total books cost is stored in AdProgramVersion.TotalBooksSuppliesCost and the total other cost is stored in AdProgramVersion.TotalOtherCost.

c. **Use amounts entered here**

   This option uses the institutional costs that are entered in the Budget Code Setup form.

13. Specify amounts for **Tuition**, **Books / Supplies**, **Room & Board**, **Travel**, and **Other Charges**.

    Tuition and Books / Supplies are institutional charges by default.

    For Other Charges, select the **Institutional** check box if the charge is to be included in that category when packaging student financial aid.

    Note: The U.S. Department of Education's definition of an institutional charge is: *"In general, an **institutional charge** is a charge for educational purposes by a institution for which the institution requires direct payment. ...Tuition charges are always institutional charges, but everything else (fees, room and board charges, books and supply costs, etc.) is subject to Departmental guidance and state or accrediting agency refund rules."* --The Federal Student Financial Aid Handbook 1998-99, page 3-87.

14. The **Total Charges** and **Institutional** totals are read-only fields.

15. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

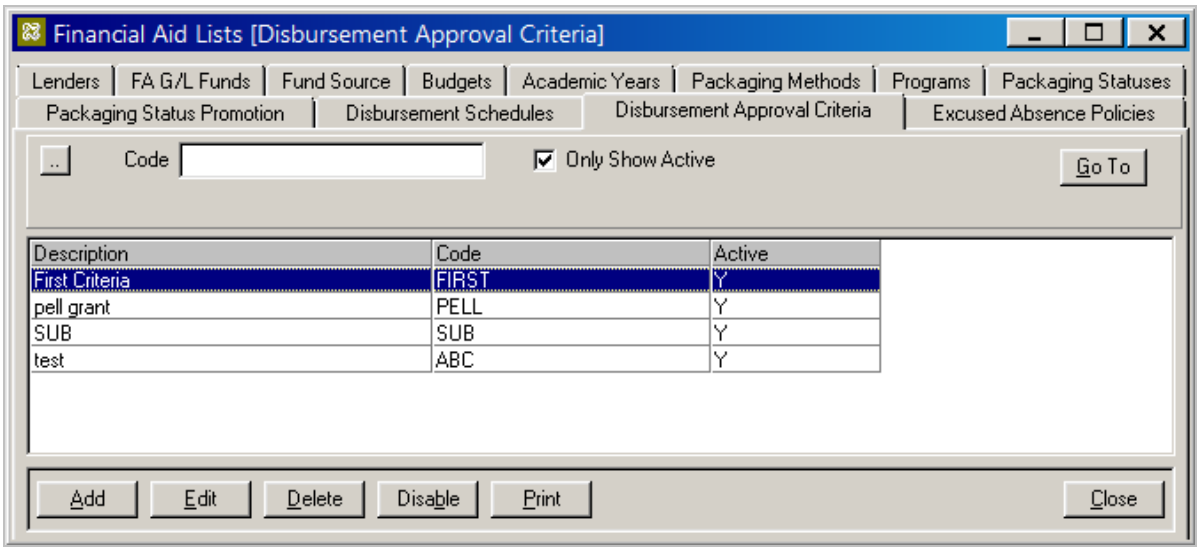
Financial Aid Lists [Disbursement Approval Criteria]

Note: Please access Regulatory Help for the latest content about FAFSA, ISIR, and COD processing.

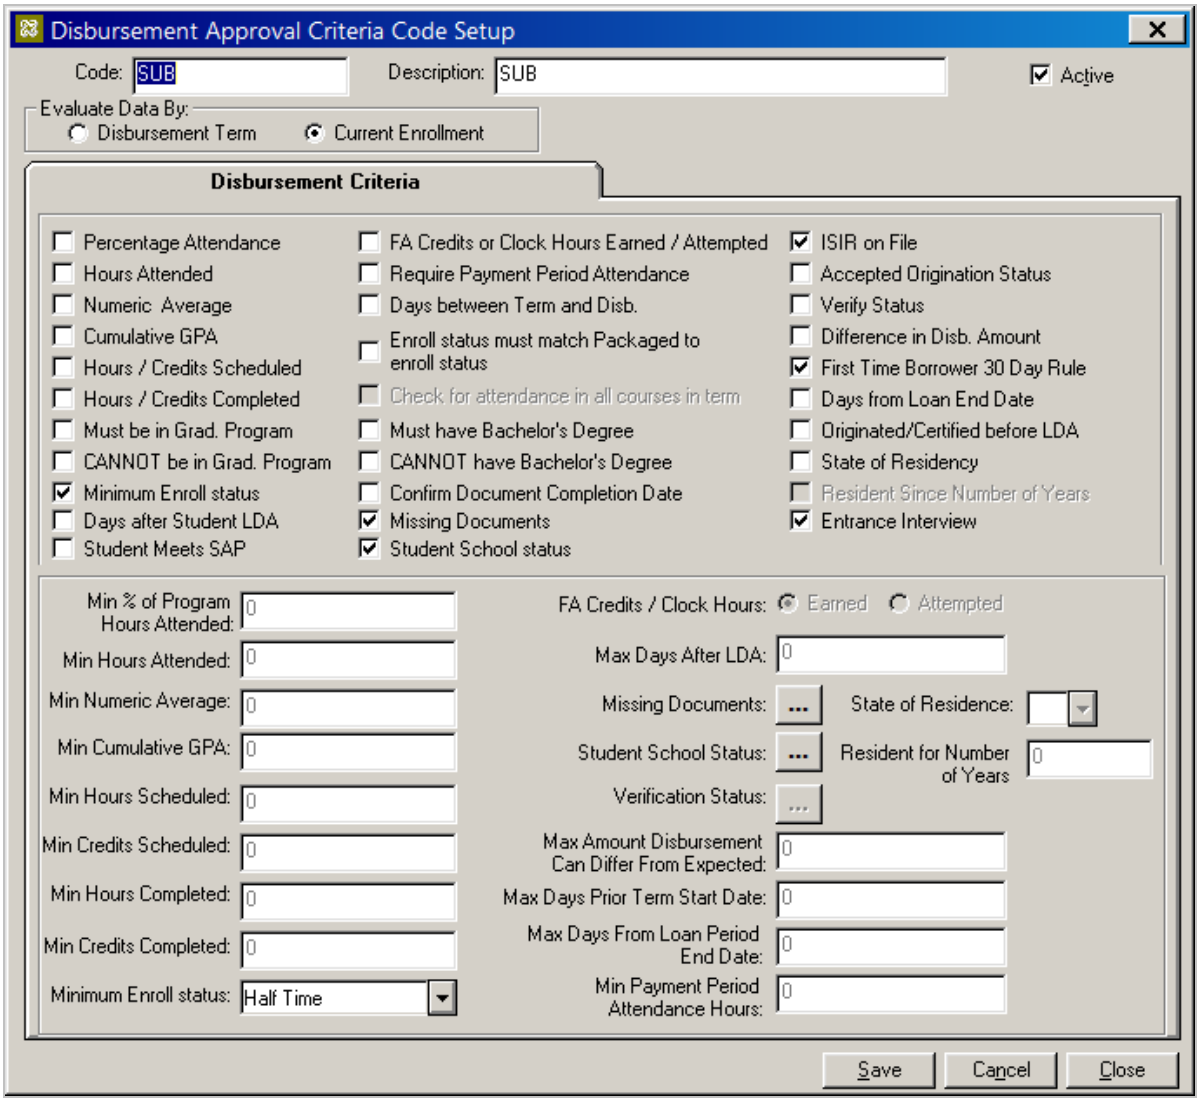
Use the Financial Aid Lists [Disbursement Approval Criteria] form to create disbursement approval criteria (DAC) sets. Disbursements are batch processes. During processing, CampusNexus Student validates that the student has met the criteria for disbursement. When one or more requirements are not met, the disbursement fails, and the reasons for the failure are displayed in Approve Disbursements to Pay form.

To add or edit a list of disbursement approval criteria codes:

1. Navigate to **Lists** > **Financial Aid**. The Financial Aid Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Disbursement Approval Criteria**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Disbursement Approval Criteria Code Setup form is displayed.



Notes:

- The criteria selection is independent of a specific campus. See Fund Source to associate the disbursement approval criteria with a fund source for a campus.
- The Disbursement Approval Criteria Code Setup form provides ... buttons to select multiple values for **Missing Documents**, **Student School Status**, and **Verification Status**.

6. Specify a unique **Code**.
7. Enter a **Description**.
8. Select one of the following options:
   - Click **Disb. Term** to evaluate by the term on the disbursement.
   - Click **Enrollment** to evaluate by the current enrollment data. The **Check for attendance in all courses in**

term check box is disabled when selecting this option.

9. Choose the approval criteria by selecting appropriate check boxes.

   Note: The criteria 'Confirm Document Completion Date' through 'Days from Loan End Date' do not rely on a term for evaluation.

   Field Descriptions

Field	Description
Percentage Attendance	The percentage of attendance achieved should be greater than or equal to the minimum value defined in the criteria.
Hours Attended	The number of hours attended should be greater than or equal to the minimum value defined in the criteria.
Numeric Average	The numeric average achieved should be greater than or equal to the minimum value defined in the criteria.
Cumulative GPA	The cumulative GPA achieved should be greater than or equal to the minimum value defined in the criteria.
Hours / Credits Scheduled	The number of hours/credits scheduled, plus attempted, should be greater than or equal to the minimum value defined in the criteria. • If the student's program version is set up as a clock hour program (AdprogramVersion.ClockCredit=H), this criteria will be evaluated based on enrollment status hours. For a disbursement to pass this criteria, the sum of the enrollment status hours for all courses the student has attempted, plus the enrollment status hours for courses the student is currently scheduled for, must be greater than or equal to the number specified for this criteria. Hours are considered attempted if the student receives a letter grade that has the "Include in Credits Attempted" check box selected in the Letter Grade setup (Lists > Academic Records > Grade Scale > Grades). • If the student's program version is set up as a credit based program (AdprogramVersion.ClockCredit = 'C'), this criteria will be evaluated based on enrollment status credits. The sum of the enrollment status credits for all courses that the student has attempted, plus the enrollment status credits for courses the student is currently scheduled for, must be greater than or equal to the number specified for this criteria.

<table>
<tr><th>Field</th><th>Description</th></tr>
<tr><td>Hours / Credits Completed</td><td>The number of hours completed should be greater than or equal to the minimum value defined in the criteria.
If the student's program version is set up as a clock hour program (AdprogramVersion.ClockCredit='H'), this criteria will be evaluated based on enrollment status clock hours. For a disbursement to pass this criteria, the sum of the enrollment status hours for all courses the student has taken and received a letter grade that has the "Include in Credits Earned" check box selected, must be greater than or equal to the number specified for this criteria.
If the student's program version is set up as a credit based program (AdprogramVersion.ClockCredit = 'C'), this criteria will be evaluated based on enrollment status credits. The sum of the enrollment status credits for all courses the student has taken and received a letter grade that has the "Include in Credits Earned?" check box selected, must be greater than or equal to the number specified for this criteria.
If a student is enrolled as a non-term or clock hour student and has a stub loan period (see Packaging for Overlapping Loans), CampusNexus Student does not use completed credits/hours and weeks as criteria when approving direct loan disbursements associated with the stub loan period or disbursements associated with the first payment period of the second loan period. This means disbursements for direct loans associated with a stub loan period or disbursements associated with the first payment period of the second loan period can be automatically approved regardless of how many clock/credit hours or weeks of instructional time have been completed (provided that all other criteria have passed validation). Disbursements associated with the second payment period of the second loan period or later are still subject to the normal BBAY3 rules in that the student must complete credits/hours and weeks of instruction time before being eligible to receive the disbursements. See Volume 3, Chapter 1 of FSA Handbook (Topic: Direct Loan periods when student transfers to a new school).</td></tr>
<tr><td>Must be in Grad. Program</td><td>The Graduate Program criterion requires a student to be a graduate. Select Must be in Grad. Program or CANNOT be in Grad. Program, but not both. The graduate level flag should be enabled for the degree program when selecting this option.</td></tr>
<tr><td>CANNOT be in Grad. Program</td><td>The Graduate Program criterion requires that a student is not a graduate. Select Must be in Grad. Program or CANNOT be in Grad. Program, but not both. The graduate level flag should not be enabled for the degree program when selecting this option.</td></tr>
<tr><td>Minimum Enroll Status</td><td>Select an option from the Minimum Enroll Status field.<table><tr><th>Description</th><th>Code</th></tr><tr><td>3/4 Time</td><td>Q</td></tr><tr><td>Full Time</td><td>F</td></tr><tr><td>Half Time</td><td>H</td></tr><tr><td>Less than half time</td><td>L</td></tr></table></td></tr>
<tr><td>Days after Student LDA</td><td>The number of days between the disbursement date and the student's Last Date of Attendance (LDA) is within a certain number of days defined in the criteria. If a student's LDA is empty or NULL, the criteria will fail.</td></tr>
</table>

Field	Description
Student Meets SAP	The criteria check is performed using the SAP status assigned to the enrollment when the “Evaluate Data by” is set to current enrollment. If the “Evaluate Data by” is set to disbursement term, the check is performed using the payment period/term associated with the disbursement. If no SAP status is found there, the previous payment period/term with an SAP status is used for the evaluation. This is because SAP is typically not run until after a term/payment period has been completed and often not run against every disbursement term/payment period. If SAP has never been run for an enrollment, then the Approve Disbursements to Pay process will NOT perform this check or hold disbursements for this criteria. An SAP status being reported as “Not Calculated” will not produce an exception or hold a disbursement for this criteria.

Field	Description
FA Credits or Clock Hours Earned / Attempted	The number of FA credits or clock hours attempted/earned must be greater than or equal to the minimum threshold value calculated in the evaluation logic. This criteria is only evaluated for student's whose program version has a value specified in the FA Clock to Credit Conversion Rate field. • The total number of Financial Aid credits in the student's program is calculated by dividing the total number of hours in the program by the number specified in the **FA Clock to Credit Conversion Rate**. **Note**: For information regarding the updated clock to credit hour conversion rules effective as of July 1, 2011, see Impact of Clock to Credit Conversion Rate on Disbursement Approval. • Calculate the total # of disbursements in the program by summing the # of disbursements defined for each academic year attached to the program version. The number of disbursements for each academic year are determined by looking up the default # of disbursements defined for the fund source being evaluated on the academic years setup. • Determine the minimum required FA credits for each disbursement number. This is done by dividing the total number of FA credits calculated in Step 1 by the total # of disbursements in the program calculated in Step 2. For example, if there are 100 FA credits in the program and a total of 4 disbursements, then the number of FA credits required for each subsequent disbursement will be incremented by 25. *Example*: Minimum FA credits required ◦ Disb # 1 0 ◦ Disb # 2 25 ◦ Disb # 3 50 ◦ Disb # 4 75 • The criteria will pass if the student has attempted or earned (depending on how the FA credits criteria is set up) a number of FA credits that is greater than or equal to the minimum number of FA credits calculated for that disbursement number. In the example above, if the third disbursement of a loan was being evaluated, the student would have to have earned/attempted at least 50 FA credits for the criteria to pass. • Non-term programs using payment periods can enable this setting with the corresponding radio button set to “FA Credits/Clock Hours: Earned” to allow the “Approve Disbursements to Pay” process to check for prior payment period completion before auto approving a non TIV disbursement that is associated to a payment period. If this setting is not enabled, non TIV disbursements associated to a payment period will not check for prior payment period completion. Note that any TIV fund source associated to a DAC policy will check for prior payment period completion in the “Approve Disbursements to Pay” process regardless of any DAC settings if a disbursement is associated to a TIV payment period.

Field	Description
Require Payment Period Attendance	When this check box is selected, CampusNexus Student requires positive attendance in a payment period as criteria for approving disbursements, and the Min Payment Period Attendance Hours field is enabled. If the criteria entered for Min Payment Period Attendance Hours field is not met, the criteria fails and an exception occurs preventing a disbursement for the student.
Days between Term and Disb.	The number of days between the term start date and the disbursement date has to be less than or equal to a number defined in the criteria. If the amount of days is set to zero on the criteria, the disbursement date and term start date will have to be the same date for the criteria to pass. If the student does not have a term associated with the disbursement, the criteria will be approved.
Enroll status must match Packaged to enroll status	Select this option to verify that the current enroll status for a student matches the Packaged to enroll status before disbursements can be approved. CampusNexus Student compares the student's current enrollment status to the student's 'Packaged To' enrollment status stored in the student's Academic Year. If the two statuses are not equal, an exception occurs preventing a disbursement for the student.
Check for attendance in all courses in term	This option is available only if **Evaluate by Disbursement Term** was selected above.
Must have Bachelor's Degree	This option requires that a student has completed an undergraduate program. Select **Must have Bachelor Degree** or **CANNOT have Bachelor's Degree**, but not both.
CANNOT have Bachelor's Degree	This option requires that a student has not completed an undergraduate program. Select **Must have Bachelor's Degree** or **CANNOT have Bachelor's Degree**, but not both.
Confirm Document Completion date	This option is available if **Missing Documents** is not selected. Choose one or the other, but not both. Select this option to confirm that there is a document completion date.

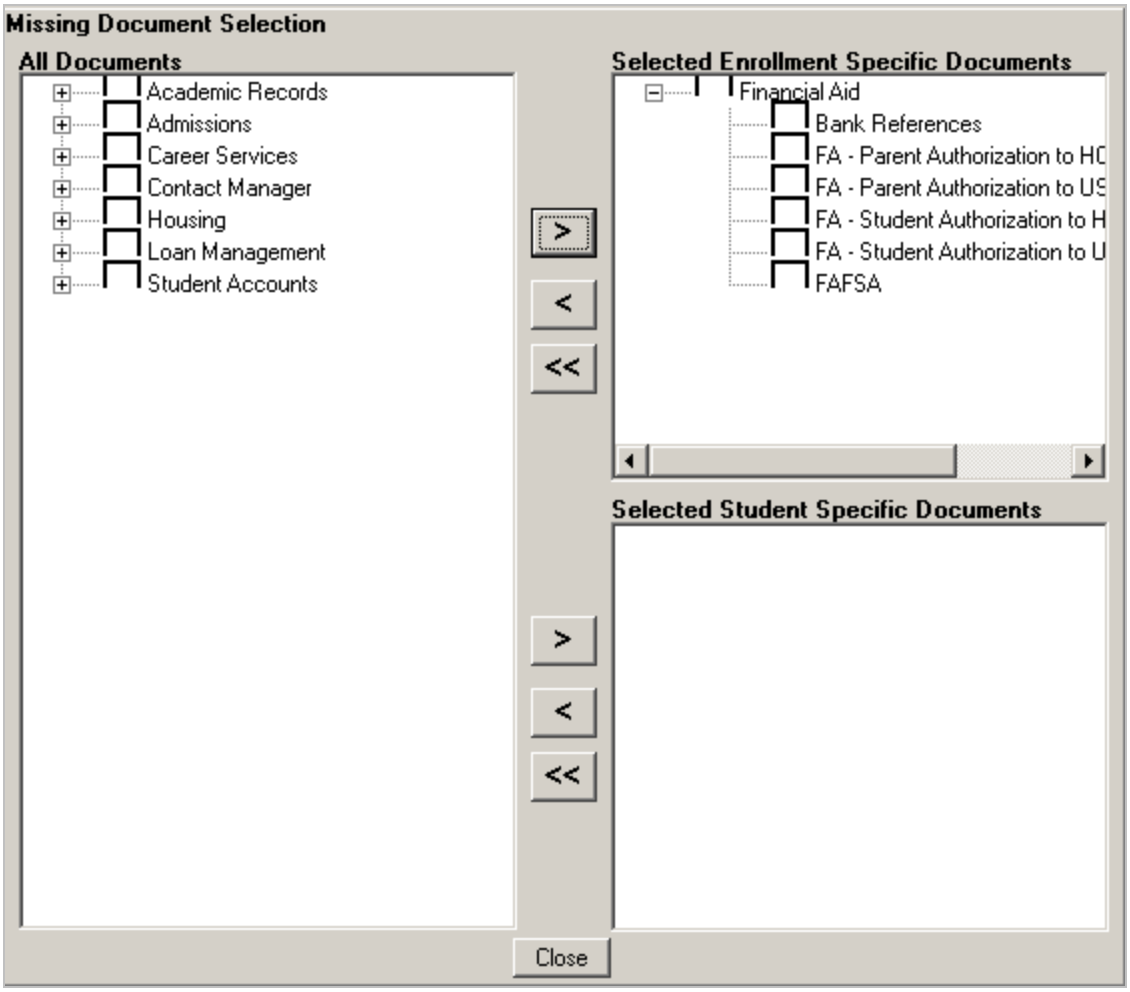
Field	Description
Missing Documents	Click ... next to the Missing Documents label to display a list of documents that you want to require as part of the disbursement approval criteria. The criteria will fail only when the missing documents check box is selected and the missing documents have been selected. If the option is not selected, the disbursement is approved even if the student has Financial Aid or other documents that are missing. See also Definition of Financial Aid Missing Documents. Missing Documents can be defined as *Enrollment Specific* or *Student Specific* documents. • *Enrollment specific* means that a document is considered *on file* if no Enrollment ID is specified on the document, **OR** an Enrollment ID is specified and it matches the Enrollment ID on the disbursement being evaluated. • *Student specific* means that a document is considered *on file* if the Student ID matches the Student ID on the disbursement being evaluated. When documents are configured as student specific, CampusNexus Student ignores any enrollment associated with the award. Some documents, such as Proof of Graduation, only need to be collected by an institution one time, while other documents may be enrollment specific. Documents considered by the Approve Disbursement to Pay process are specific to a student's enrollment. This means that the document is associated with the enrollment for which the disbursement is scheduled. When you select a module such as Academic Records, all assigned documents for the module are selected as well. Use the arrows buttons to move documents from the **All Documents** list to the **Selected Enrollment Specific Documents** and **Selected Student Specific Documents** lists. 
Field	Description
Student School status	Select the Student School status option if a student must be in a specified school status before a disbursement may be approved. The student's school status should be one defined in the criteria. To approve the criteria, the student status should match at least one of the statuses defined in the criteria.
ISIR on File	The student has an ISIR on file for the award year of the aid record containing the disbursement being evaluated. To approve this criteria, the FaStudentPell.DateISIRRcvd field should be populated with a valid date. Any other wrong data (null included) causes the criteria to fail.
Accepted Origination Status	The student has an accepted origination before a disbursement is approved. This criteria is applied when the fund source type is Pell, DIRPLUS, DIRSUB, or DIRUNSUB. If the fund source type is not one of the mentioned before, the criteria will be approved.
Verify Status	The student has a verification status that matches one of the statuses specified in this criteria for the award year of the aid record containing the disbursement being evaluated.
Difference in Disb. Amount	The expected amount of the disbursement does not differ from the actual amount of the disbursement by more than an amount defined in the criteria. If the amount of zero is set on the criteria, the received disbursement amount must be exactly equal to the amount expected for the criteria to pass.
First Time Borrower 30 Day Rule	Allow disbursements if the student meets the 30 day rule. • If the fund source type is SUB, UNSUB, DIRSUB, DIRUNSUB, and the First Time Borrower 30 Day Rule flag is true, the Disbursement should be greater than 30 days from the Term start date, the criteria will be approved. • If the student is not related to any term, the criteria will fail without being evaluated. • If the fund source does not belong to the ones previously mentioned, the criteria will be approved.
Days from Loan End Date	Specify the number of days between the loan period end date and the disbursement date is less than or equal to a number defined in the criteria. • If the fund source type is DIRPLUS, DIRSUB, DIRUNSUB, LOANNB, LOANNNB, PERKINS, SUB, or UNSUB, and the loan end date is not null, and the difference in days between the loan period end date and the disbursement date is less or equal to the amount of days set in the criteria, the disbursement will be approved. • If the loan end date is null, the criteria will not be evaluated but approved. • If the fund source does not belong to the ones previously mentioned, the criteria will be approved.
Originated/Certified before LDA	This flag enables you to prevent loan disbursements from Auto-Approving when a student withdraws temporarily or permanently before a loan is Originated or Certified. For more information, see Approve Disbursement to Pay.

Field	Description
State of Residency	Select this option, if you want CampusNexus Student to verify the State of Residency and Resident Since Number of Years verification as part of the disbursement approval criteria. Select the applicable state from the list.
Resident Since Number of Years	The **Resident Since Number of Years** option is disabled until the **State of Residency** option is selected. Select this option and enter the number of years the student has lived in the state selected from the Resident for Number of Years field. See also State of Residence and Resident Since Number of Years verification checks.
Resident for Number of Years	If the State of Residency and Resident Since Number of Years check boxes are selected, enter the number of years the student has been a resident of the selected state in the **Resident for Number of Years** field. **State of Residency and Resident Since Number of Years validation** First, the student's dependency status is determined. If the student is dependent, the parents' state of residency is considered; otherwise, the student's state of residency is considered. Depending on the dependency status, the correct state from the ISIR (or FAFSA) is used for matching. If the criteria of State is specified, the Resident Since Date may also be specified. If the date is specified, the date must be before the Resident Since Date in ISIR (or FAFSA). The number in 'Resident for Number of Years' represents how many years prior to the award year the individual needs to have been a resident. For example, a value of 5, when used to evaluate a disbursement for the 2006-2007 award year, means that the individual needs to have been a resident since January 1 of 2001 (2001 is 5 years before 2006).
Entrance Interview	The date of the entrance/counseling interview (if the interview was done) is associated with an enrollment rather than with the student. However, once a student has had the interview, the association is made with ALL enrollments. Select this option, if you want to require that an entrance interview be conducted before a disbursement may be approved.

10. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Selecting Missing Documents

To specify documents that are required before a disbursement can be approved, select the applicable check box under the **All Documents** section and click the right arrow (>) button to move the documents into the **Selected Enrollment Specific Documents section** or the **Selected Student Specific Documents** section. In this example, the Financial Aid documents have been selected from the **All Documents** section and moved to the **Selected Enrollment Specific Documents** section.



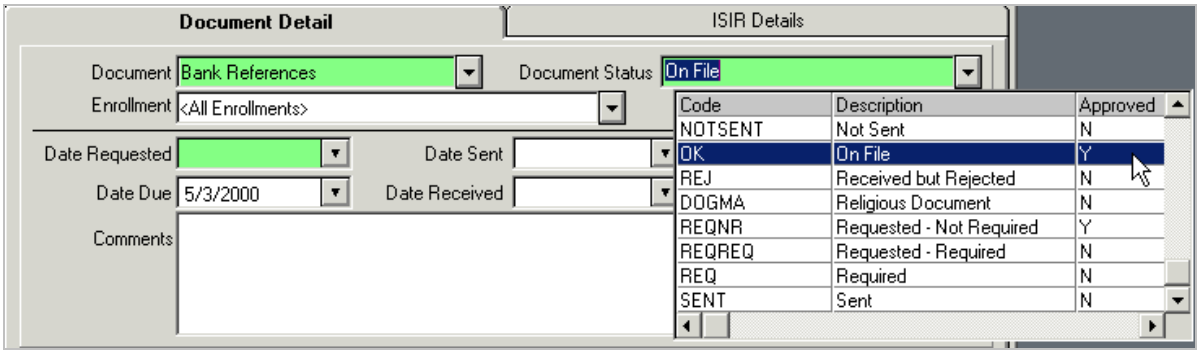
Definition of Financial Aid Missing Documents

The document is considered missing only under the following conditions:

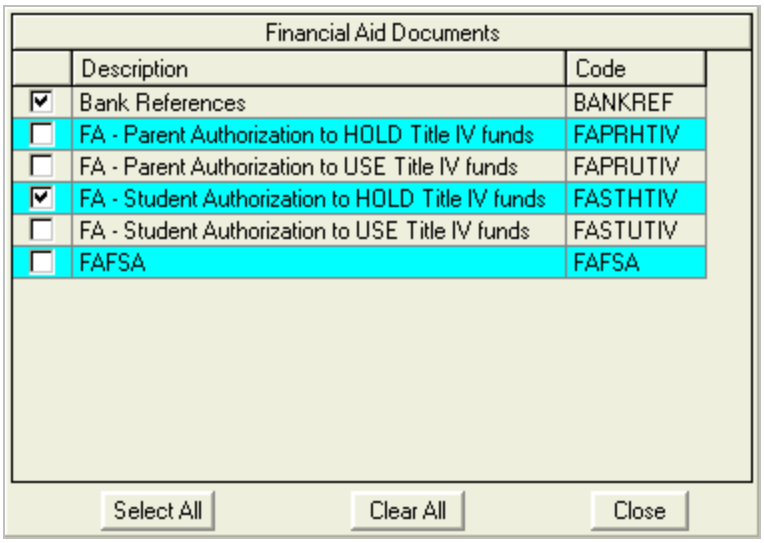
- The document configured in the missing documents criteria was requested of the student and the document has not been received (i.e., status has not changed from requested).
- The enrollment under consideration for auto-approval is for the campus and fund source at which the missing documents criteria was configured.
- The requested document is a Financial Aid document.
- The document is in the status of required (code 'REQ') or requested-required (code 'REQREQ').
- The document was set up in the criteria configuration.

If a document status has been configured as an approved status (column for Approved has a "Y" in it), a document assigned that status is considered approved.

If the Document Status changes to a status that is considered Approved , the document is *not* considered missing. The Document Status is considered an Approved status if it is configured in the Document Detail tab, and a "Y" is displayed in the Approved field.



Sample documents are listed here:

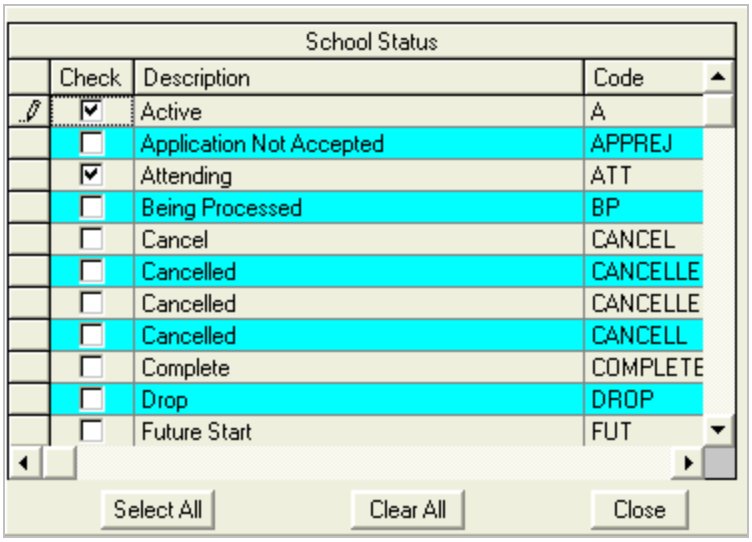


Click **Select All** or **Clear All** to select/deselect the entire list of documents. You may also select individual documents within the list.

Any documents that are chosen or cleared in this list are not saved until the **Close** button is click and the **Save** button in the **Disbursement Approval Criteria Code Setup** form is clicked. These documents were configured in the Documents tab.

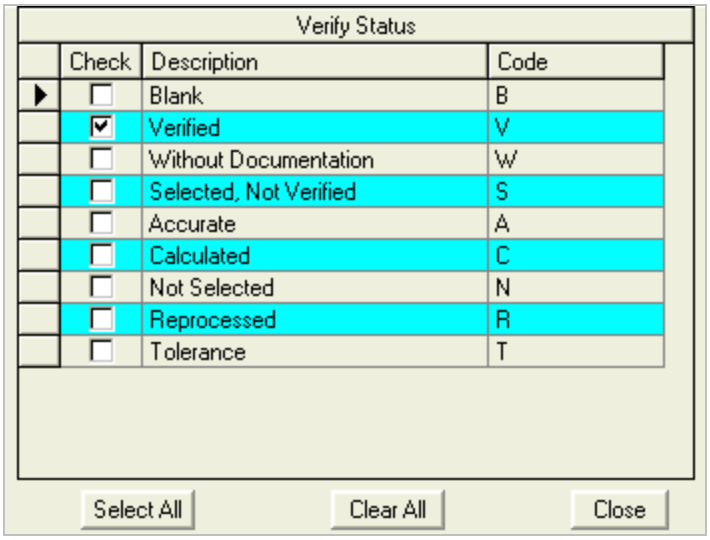
Selecting Student's School Status

If the Student School Status check box is selected, the ... button next to the **Student School Status** field is enabled. Click ... to obtain a list of school statuses. Select the applicable school statuses by selecting the check box next to the school status description field. Click **Select All** to select all school statuses, or click **Clear All** to clear all school statuses. Click **Close** to close the form.



Selecting Verification Status

If the Verify Status check box is selected, the ... button next to the **Verification Status** field is enabled. Click ... to obtain a list of verification statuses. Select the applicable verification statuses by selecting the check box beside the verification status description field. Click **Select All** to select all verification statuses, or click **Clear All** to clear all verifications statuses. Click **Close** to close the form.



Impact of Clock to Credit Conversion Rate on Disbursement Approval

The Approve Disbursements to Pay process takes the Clock to Credit conversion into consideration for a program that is configured as being subject to the conversion. It does this by evaluating the hours configured for scheduled courses and applying the conversion rate to those hours. Prior to the Final Rule for Program Integrity Issues published in the Federal Register on October 29, 2010, clients typically entered the value 20 for Quarter Credit programs or 30 for Semester Credit programs. With the publication of these final regulations, which are effective as of July 1, 2011, an updated Clock to Credit conversion rate and effective date can be configured on the FA Program version form and used for all enrollments on or after the stated effective date.

This effective date allows branching logic to apply the current conversion rate for students who enroll prior to July 1, 2011 (the effective date for the current rate) regardless of whether the disbursement date is before or after the older effective date. For students who enroll after July 1, 2011, the updated rate will be applied. July 1, 2011 is the date dictated by regulation, but since it is configurable schools may choose any date.

Example: Quarter Credit Program

This example assumes that the current rate defined in the regulations of 20 for Quarter Credit Programs is configured on the FA Program Version. The school enters the updated conversion rate of 25 required in the new regulation and enters an Effective Date of July 1, 2011.

When the Approve Disbursement to Pay process is run, the process applies branching logic that applies the 20:1 Clock to Credit ratio for all students that enrolled in the Quarter Credit program prior to the Effective Date, regardless of date of the disbursement. For all students who enrolled on or after July 1, 2011 the logic will apply the 25:1 ratio.

Example: Semester Credit Program

This example assumes that the current rate defined in the regulations of 30 for Semester Credit Programs is configured on the FA Program Version. The school enters the updated conversion rate of 37.5 required in the new regulation and enters an Effective Date of July 1, 2011.

When the Approve Disbursement to Pay process is run, the process applies branching logic that applies the 30:1 Clock to Credit ratio for all students that enrolled in the Semester Credit program prior to the Effective Date, regardless of date of the disbursement. For all students who enrolled on or after July 1, 2011 the logic will apply the 37.5:1 ratio.

Financial Aid Lists [Disbursement Schedules]

Important: The Disbursement Schedules feature and settings are disabled when a CampusNexus license is purchased and the Multiple Disbursements feature is enabled. For more information, see Multiple Disbursements.

Use the Financial Aid Lists [Disbursement Schedules] form to define disbursement dates and term codes for expected disbursements by campus group and fund source group. Duplicate Disbursement Schedule Codes are allowed in the database but not in the campus.

Once a disbursement schedule is added to the list, if you delete a selected schedule, you will remove the record from FaDisbSched for the selected FaDisbSchedID and all corresponding records in FaDisbSchedDetail, FaDisbSchedFS, and FaFundSourceGrp. The following message is displayed: *"This will remove all detailed schedules assigned to this disbursement schedule. Are you sure you want to continue?"*

When packaging students, it is important that users select a disbursement schedule to ensure they are not simply entering a date that they feel is correct, but rather relying on the disbursement schedules with dates that someone with more knowledge and authority has configured. Disbursement dates should align with the term start and end dates for credit hour term programs.

Disbursement schedules are tied to a fund source and to an academic year sequence. This enhances the speed and efficiency of packaging financial aid for students (see New Source of Aid).

CampusNexus Student provides the following configuration options related to disbursement schedules:

- Configuration for staff level security permissions provide the option to prevent the staff member from editing disbursement dates when packaging a student. If this permission is not granted for the staff member, the staff member cannot edit any disbursements when adding or editing a financial aid award.
- The Disbursement Schedule field can be configured as a required field when adding new aid to a student's package. If a disbursement schedule is not selected, a message prompts the user to select a disbursement schedule.

CampusNexus Student provides the following user support when working with disbursement schedules and packaging financial aid for students:

- When creating or editing disbursement schedules, an Academic Year sequence is available for selection to associate with the disbursement schedule.
- When adding new aid to a student's package, the Disbursement Schedule list contains disbursement schedules for the academic year that is being packaged. It also contains the disbursement schedules that are not mapped to any Academic Year sequence.
- When auto-packaging or re-packaging aid for a student,CampusNexus Student assigns the disbursement schedule for the academic year that is being packaged. Disbursement schedules that are not associated with any sequence will also be used while packaging.
- When batch packaging students and selecting the auto packaging method, CampusNexus Student assigns the disbursement schedule for the academic year that is being packaged. Disbursement schedules that are not associated with any sequence are also used while packaging.
- When editing a student's package, and re-assigning aid from one academic year to another, CampusNexus Student validates the disbursement schedule for the new academic year. If the validation fails, the option to cancel or select a new disbursement schedule for that academic year may be chosen.

The following tables contain data related to disbursement schedules:

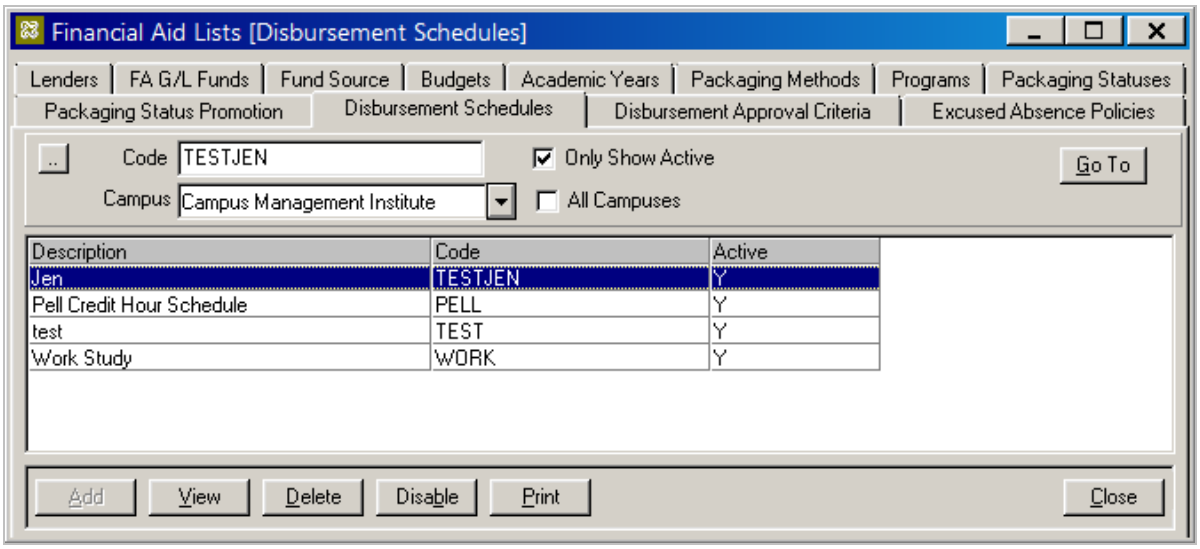
- `FaDisbSched` - defines Disbursement Schedules.
- `FaFundSourceGrp` - defines the FaFundSourceGrpID created when Detailed Disbursement Schedules are

created.

- `FaDisbSchedFS` - holds the FaFundSourceIDs associated with a Detailed Disbursement Schedule; one record per FaFundSourceID selected in the disbursement schedule.
- `FaDisbSchedDetail` - holds the Disbursement Schedule Details.

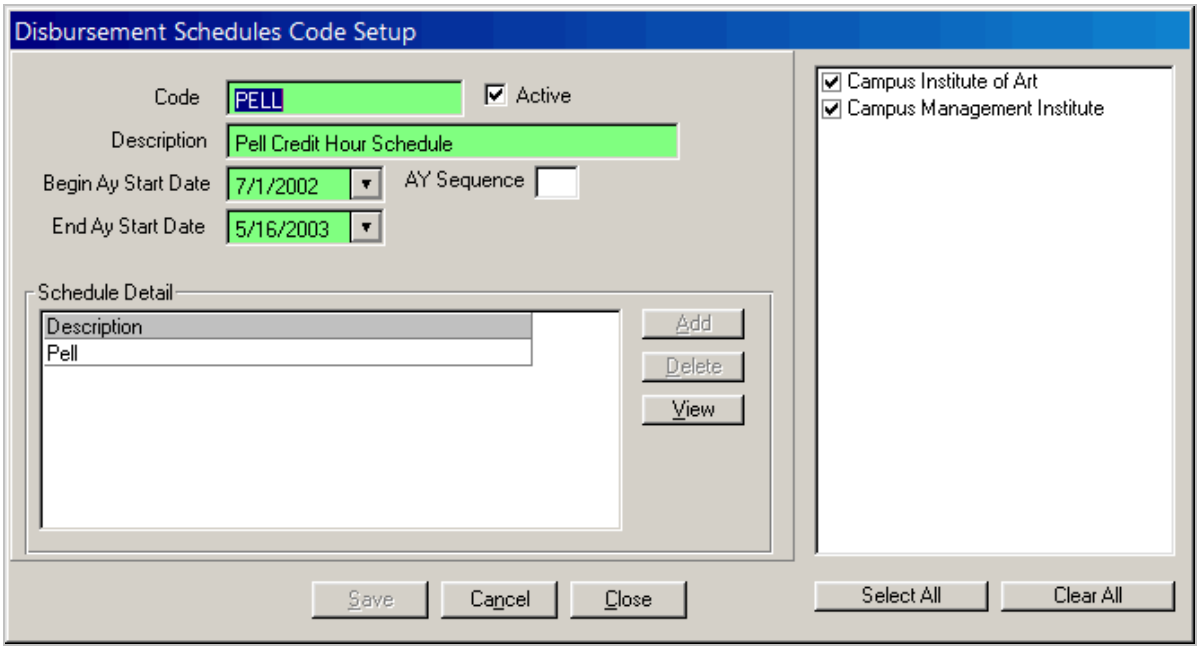
To add or edit a list of disbursement schedule codes:

1. Navigate to **Lists** > **Financial Aid**. The Financial Aid Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Disbursement Schedules**.

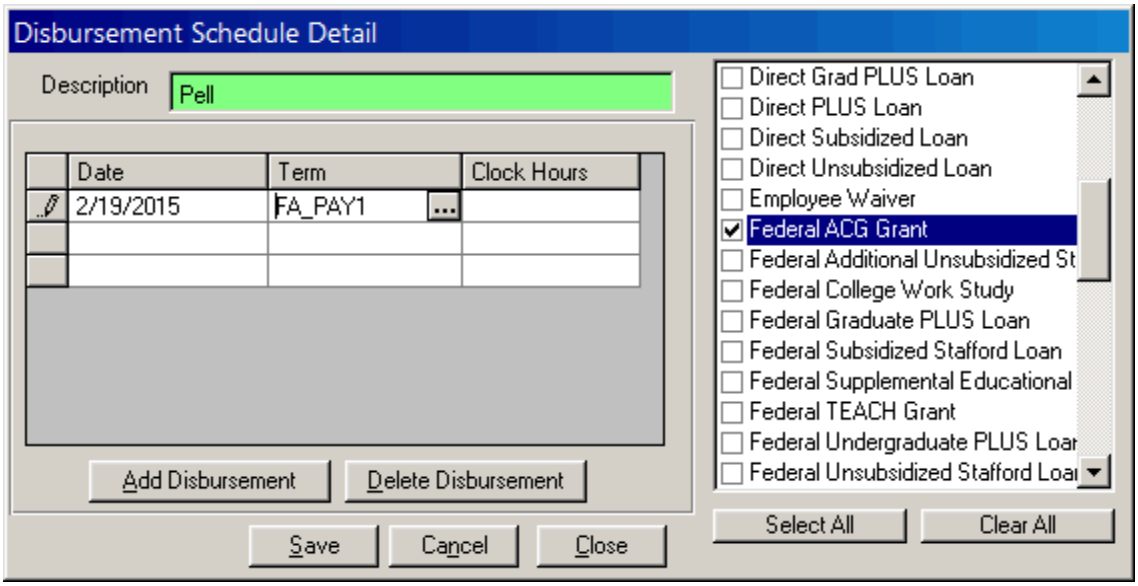


3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Disbursement Schedules Code Setup form is displayed.

   Note: Add and Edit functions are not available when the Multiple Disbursements feature is enabled for the campus.



7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.
10. Specify the **Beginning Academic Year Start Date** and the **Ending Academic Year Start Date**.
11. Select one or more **Campuses**. Only the campuses to which you have access are listed.
12. Click **Save**.
13. Click **Add** to add disbursement schedule details. The Disbursement Schedule Detail form is displayed.



14. Enter a **Description**.

15. On the right side of the form, select at least one **fund source** to which the disbursement schedule details apply.

    CampusNexus Student loads only active fund sources associated with the campuses selected on `frmFaDisbSched` to which you have access.

    Note: Fund sources of type Cash and Other are not included in the list because they are not used on disbursement schedules.

16. Specify the disbursement **Date**, **Term**, and **Clock Hours**.

    Click in a field in the grid and select applicable date and term values.

    The Clock Hour field allows an entry in the format: `###.##`.

    Note: The Clock Hours column is displayed only if a record exists in the `AdProgramVersion` table and `CreditClock` is "H".

17. Click **Add** to add another row to the grid. There is no maximum number of disbursements.
18. Click **Edit** to edit an existing disbursement.
19. Click **Delete** to remove a row from the grid.
20. Click **Save** to save your disbursement schedule details.

    When the new disbursement schedule detail is saved, a row is added to `FaFundSourceGrp` with the `FaDisbSchedID`, one row is added to `FaDisbSchedFS` for each fund source selected, and one row is added to `FaDisbSchedDetail` for each disbursement defined.

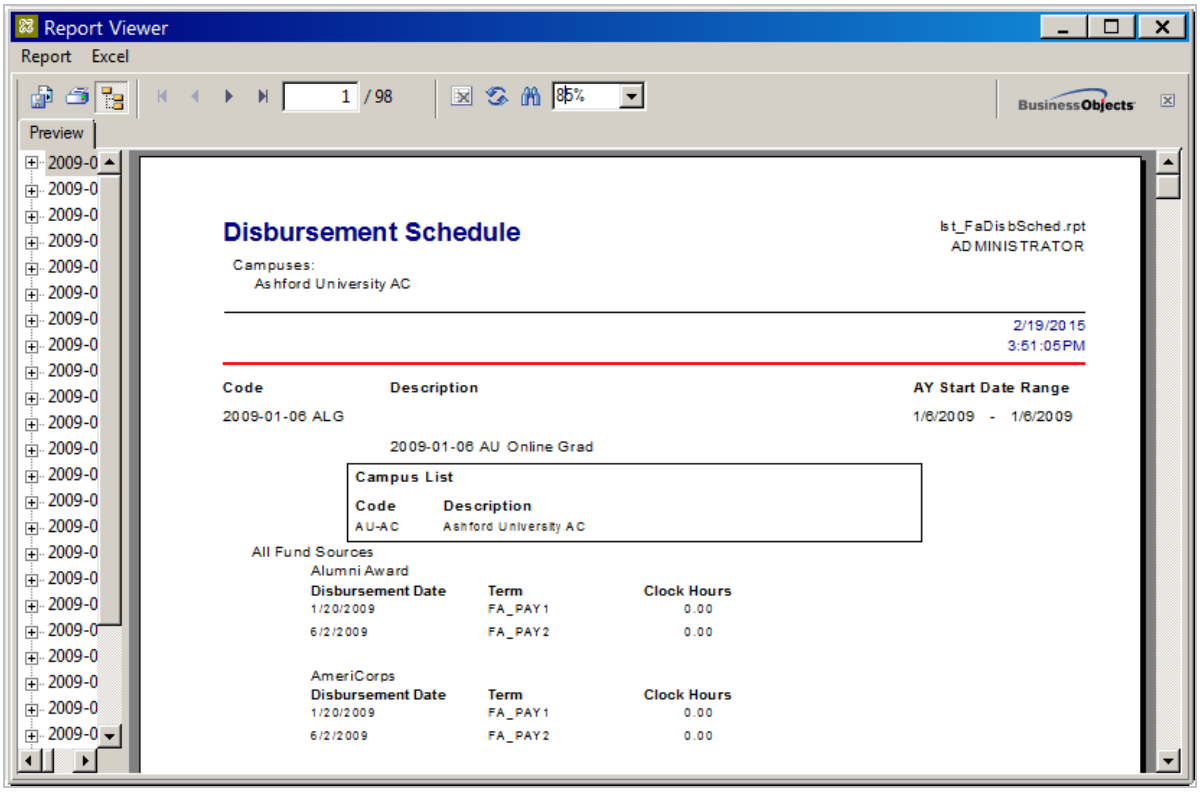
To print a list of disbursement schedules:

1. On the Financial Aid Lists [Disbursement Schedules] tab, click **Print**. The Report Selection form is displayed.
2. Select or clear **Yes** or **No** next to the Active label. If you select Yes, active records are listed on the report. If you select No, inactive records are listed. If you select both, active and inactive records are listed.

   If no records match the selection criteria, the message *"No records selected for the report"* is displayed.

3. Click **Preview**. The report is assembled and displayed in the Report Viewer.

   The Disbursement Schedules report contains the Code, Description, Academic Year Start Date Range, Schedules, and Fund Sources. It also lists the Fund Source Group Description for each schedule, the Fund Sources defined by the schedule, and the Disbursement Schedule Detail from your associated campus groups.



4. See Report Viewer for instructions on printing or exporting the report.

Financial Aid Lists [Excused Absence Policies]

Excused absence limits that are lower than the 10% excused absence allotment mandated by FSA regulations can be configured for clock hour programs based on a combination of campuses and program names.

In a clock hour program, a limited number of excused absences are allowed when deciding whether the student has satisfied the attendance obligation in a payment period. An excused absence occurs when a student is excused from hours that were scheduled were missed and do not have to be made up for the student to receive the degree or certificate for the program.

To be counted for FSA purposes, excused absences must be permitted in the institution's written policies. FSA regulations state that students can be absent up to 10% of their total clock hours and still be eligible to receive an associated degree or certificate, or be eligible to receive the next scheduled financial aid disbursement.

If an institution's accrediting agency or state agency that legally authorizes the institutiuon's operations states that the excused absence allotment is less than 10%, the institution must follow the stricter standard rather than the FSA standard. To answer these regulations, CampusNexus Studentprovides a way to manage excused absence limits in Clock Hour programs.

Example: A student in a program that has 900 hours in two 450-clock-hour-payment periods misses 20 clock hours. If the institution uses an Excused Absence Policy that allows 10% excused absences, the 20 missed clock hours are considered excused, and this student can be paid the next disbursement.

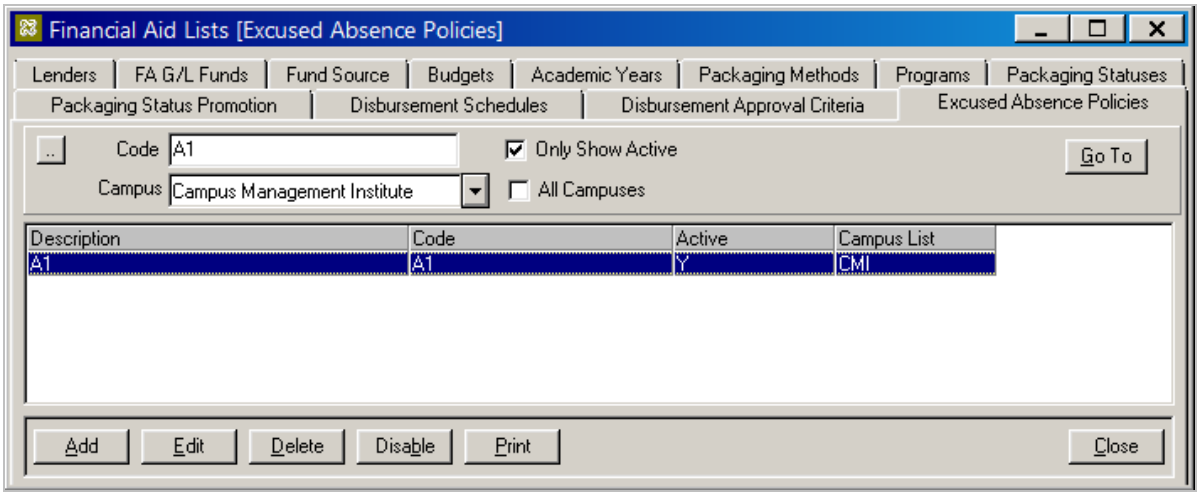
The Excused Absence Policy for an institution is configured for a specific time period using an Effective Begin Date and Effective End Date. CampusNexus Student does not allow more than one policy to be active at the same time per clock hour program.

Excused absence hours are counted as regular hours in CampusNexus Student. In the example above, if a student has 20 excused absence hours and no other absences in that time period, a total of 450 hours is counted for the 450 clock hour payment (430 hours attended + 20 hours excused = 450 hours). When a student's attendance is posted, the effective dates of the active Excused Absence Policy are taken into account to calculate the total hours attended.

For more information, see: IFAP home page.

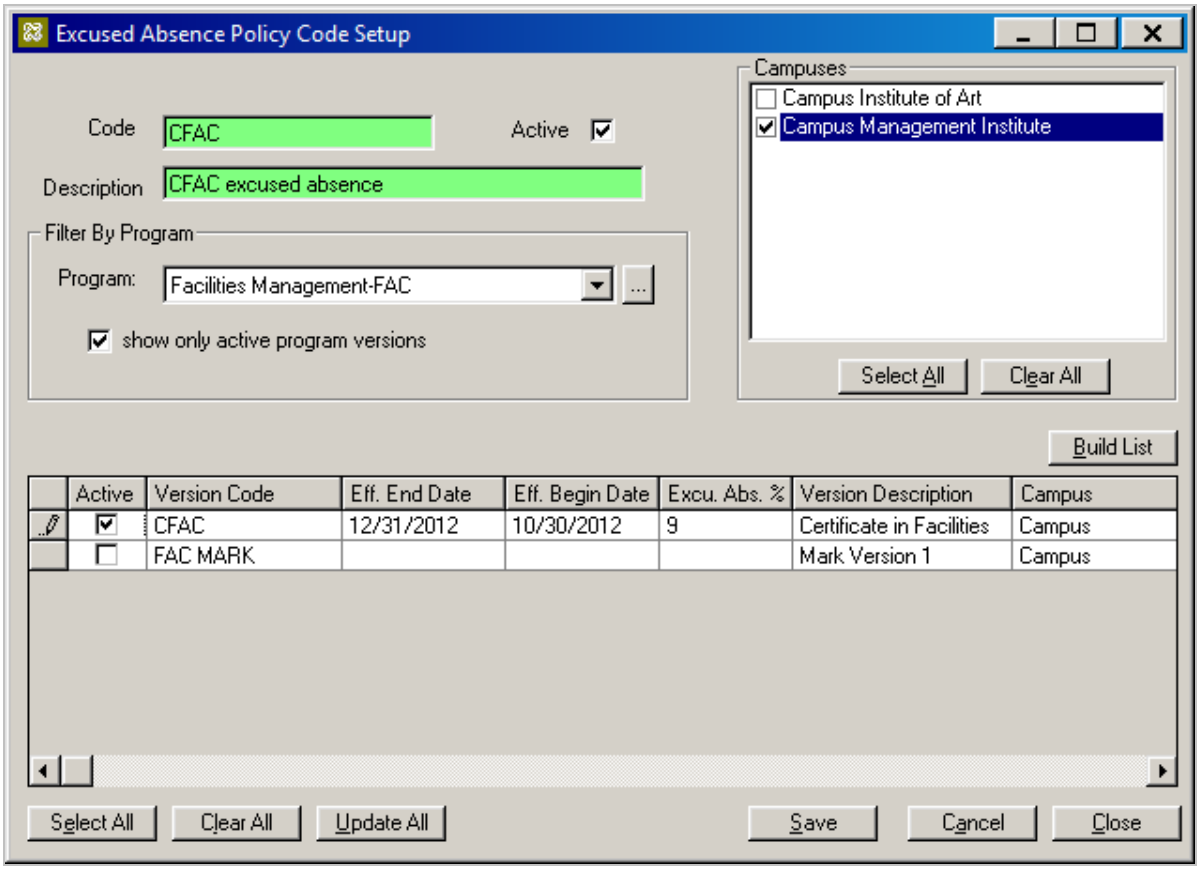
To add or edit a list of excused absence policy codes:

1. Navigate to **Lists** > **Financial Aid**. The Financial Aid Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Excused Absence Policies**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.

5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Excused Absence Policy Code Setup form is displayed.



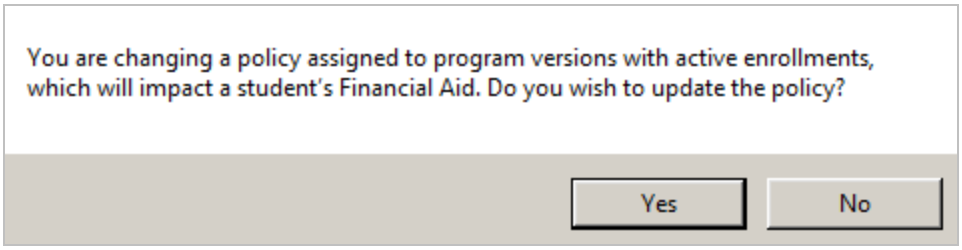
7. Specify a unique **Code**.
8. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
9. Enter a **Description**.
10. Select one or more **Campuses**.
11. In the Filter by Program area, select a **Program** from the drop-down list. To select multiple programs, click ... . Optionally, select **show only active program versions** to filter the list by active programs.
12. Click **Build List**. A list of program versions for the select program (or programs) displays.
13. Select a **Program Version**.
14. Specify the following data for your Excused Absence Policy:
    - **Excu. Abs%**: Enter a numeric value between 1 and 10 to define the excused absence percentage.
    - **Eff. Begin Date**: Double-click a date on the calendar to select the effective begin date.
    - **Eff. End Date**: Double-click a date on the calendar to select the effective begin date.
15. Select the **Active** check box if you want the policy to be active.

The **Select All** and **Clear All** buttons set the statuses for all policies listed on the form.

Note: Only one policy for a program version can be active at the same time.

16. If a change to the policy affects active enrollments, you are prompted to confirm the change.

    Click **Yes** to confirm or **No** to return to the Excused Absence Policies form.



17. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

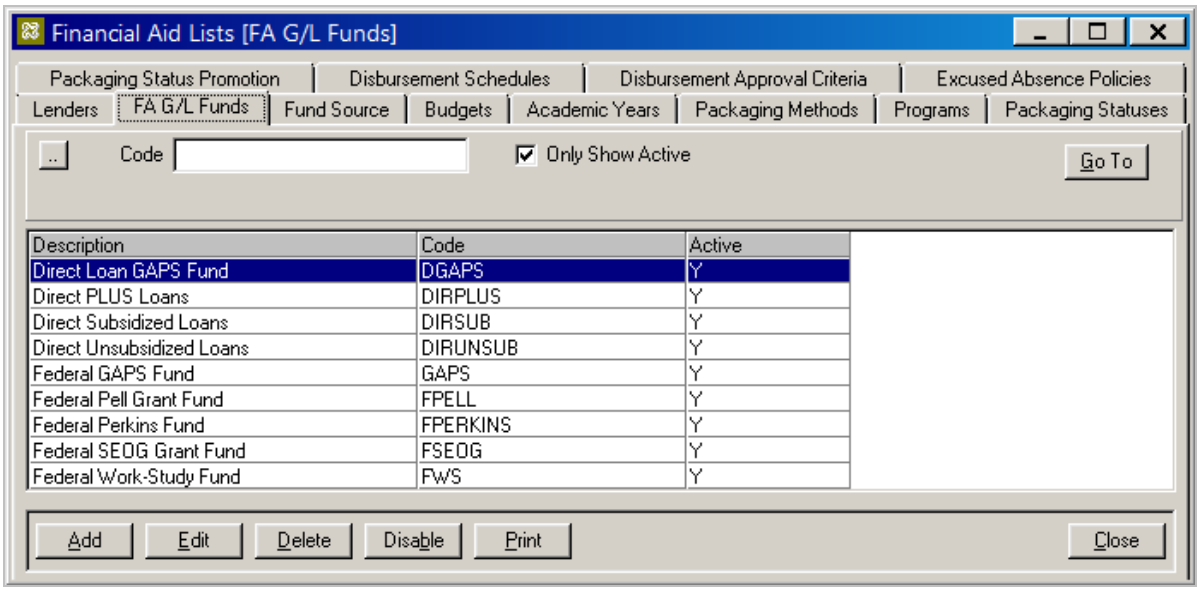
Financial Aid Lists [FA G/L Funds]

Use the Financial Aid Lists [FA G/L Funds] form to set up the FAGL Chart of Accounts (CoA) and to track fund source authorization levels.

See FAGL Overview for a discussion of the FAGL system in CampusNexus Student and FAGL Authorization for authorization levels for the FA G/L funds.

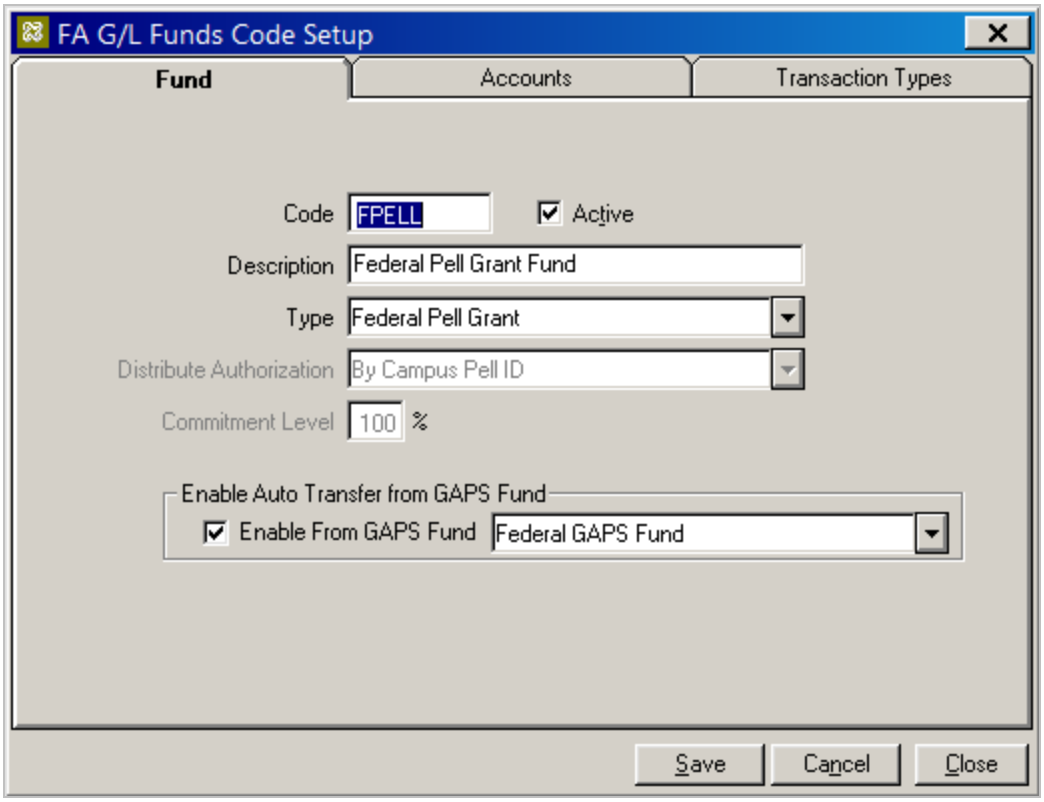
To add or edit the list of FA G/L fund codes:

1. Navigate to **Lists** > **Financial Aid**. The Financial Aid Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **FA G/L Funds**. A list of the funds used by your school for financial aid resources is displayed. The initial list is provided by CampusNexus Student. You can add funds or delete unused funds as needed.



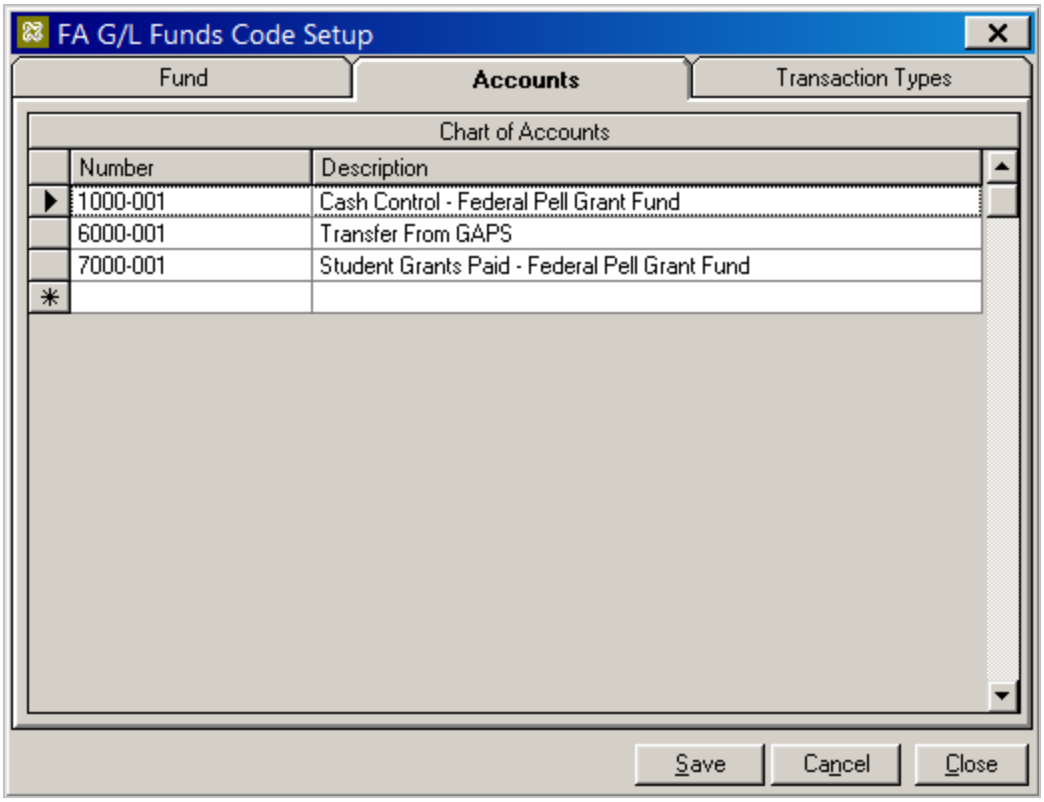
3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The FA G/L Funds Code Setup form is displayed.

   The fields that are enabled on the Fund tab vary depending on the fund type.

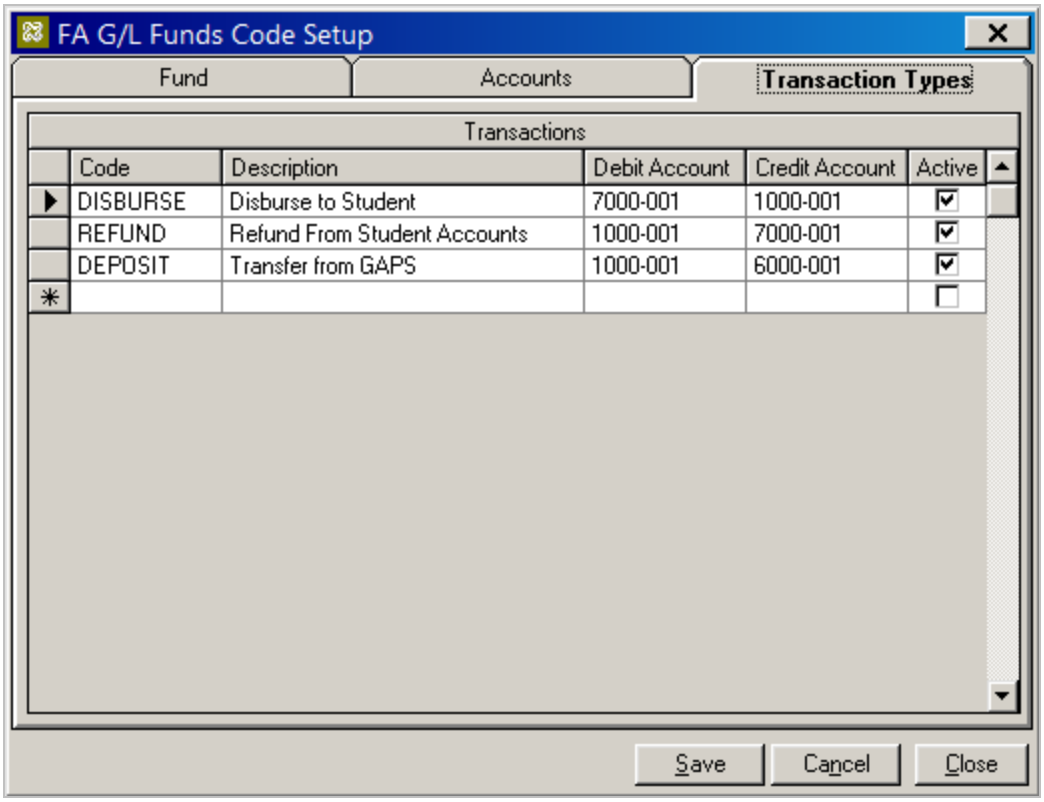


6. Specify a unique **Code**.
7. Enter a **Description**.
8. Select the fund **Type**. Fund types include:
    - G - GAPS
    - P - Federal Pell Grant
    - S - Federal SEOG
    - W - Federal Work Study
    - K - Federal Perkins Loan
    - D - Direct Loan - GAPS
    - L - Direct Loan - Program Fund
    - F - FFEL
    - O - Other (Non-Title IV Fund)
    - A - Federal ACG Grant
    - M - Federal SMART Grant
    - T - Federal TEACH Grant
    - I - Iraq and Afghanistan Service Grant
9. Select the **Distribute Authorization**. The options are:
    - C - By Campus
    - D - By Direct Loan ID (Direct Loans)
    - S - By Serial Number (Perkins, SEOG, FWS)
10. Enter the **Commitment Level Percentage**. See the FAGL Overview for a discussion of the commitment level.
11. Select or clear **Enable Auto Transfer from GAPS Fund**.
12. Select the **GAPS Fund** for automatic transfers.

13. Click the **Accounts tab** to set up the FAGL account numbers for the new or edited fund.



14. Set up a new account by entering the **Number** and **Description** in the row with the asterisk (*) on the left side.
15. Click the **Transaction Types** tab to set up the types of transactions used with the new or edited fund.



16. For each new transaction type, enter a **Code**, **Description**, **Debit Account**, **Credit Account**, and **Active status** in the row with the asterisk (*) on the left side.

17. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Financial Aid Lists [Fund Source]

Use Financial Aid Lists [Fund Source] form to set up the types of financial aid available to students in your institution. Some fund sources are grants that the student is not required to repay. Other fund sources are loans from the Department of Education (direct loans) or from other institutions such as banks and other lending organizations. Loans have to be repaid to the lender by the student or parents, usually with interest. See also Cash-Other Source Form and Posting Cash/Other Payment Plans (Reamortizing future payments) for additional information on the fund source type of Cash-Other.

You can post FA disbursements received without requiring that they be scheduled first. This is a quicker method of posting FA disbursements to a Ledger Card. You are prompted for a minimal amount of information concerning the financial aid. The information is used to fill in the standard FA packaging tables when the payment is saved.

Elsewhere in CampusNexus Student, your financial aid department uses these fund sources to assemble a "package" of financial aid to cover the student's cost of attendance (COA) by combining funds from these fund sources. For details on Packaging, refer to Awards and Packaging.

On July 29, 2006, the Common Origination and Disbursement (COD) System began sending Electronic Statement of Account (ESOA) reports reflecting authorizations for the new grants to institutions. See COD grants.

The College Cost Reduction and Access Act of 2007 created the Teacher Education Assistance for College and Education (TEACH) Grant program which provides grants of up to $4,000 per year to students who intend to teach in a public or private elementary or secondary school that serves students from low income families. This program took effect on July 1st, 2008. Students must be U.S. citizens and be eligible for a Pell Grant. See COD grants.

TEACH Grant awards are validated to ensure that if the earliest disbursement occurred after March 1, 2013, the maximum amount packaged is reduced as required in the sequestration legislation. Any institution that disbursed TEACH funds to students with the earliest disbursement after March 1, 2013 using the pre-sequester maximum award amounts must recalculate the TEACH Grant award amounts for upcoming payment periods.

Beginning in the 2010-2011 award year, Pell-ineligible students who were dependents of a veteran who died as a result of service in Iraq or Afghanistan after September 11, 2001 may be eligible for the new Iraq and Afghanistan Service Grant. Students who are eligible for this grant must meet the following conditions:

1. The “Dependent of Deceased Veteran” must be selected on the student when awarding an Iraq and Afghanistan Service Grant.
2. The award amount must not be greater than the Pell award maximum for the award year.
3. The student is not Pell Eligible due to EFC.
4. The award year is 2010-11 or greater.

The Return to Title IV worksheets reflect the current versions of the Department of Education which include the IASG grant. The Department of Education posted revised Return of Title IV Aid (R2T4) Worksheets which must be used for any student whose withdrawal date is on or after July 1, 2010. The R2T4 calculation for students who withdraw after July 1, 2010 was modified to ensure that the calculation is performed correctly and to ensure that institutions are compliant with the current regulation.

Note: If a refund calculation has been created for a student who has a withdrawal date on or after July 1, 2010 prior to the installation of this enhancement, the forms are refreshed, but the calculated values are not updated. The number of students that have the IASG grant on file is expected to be small, but a script has been created that can be provided to the users upon request so that the users can recalculate the students, if needed.

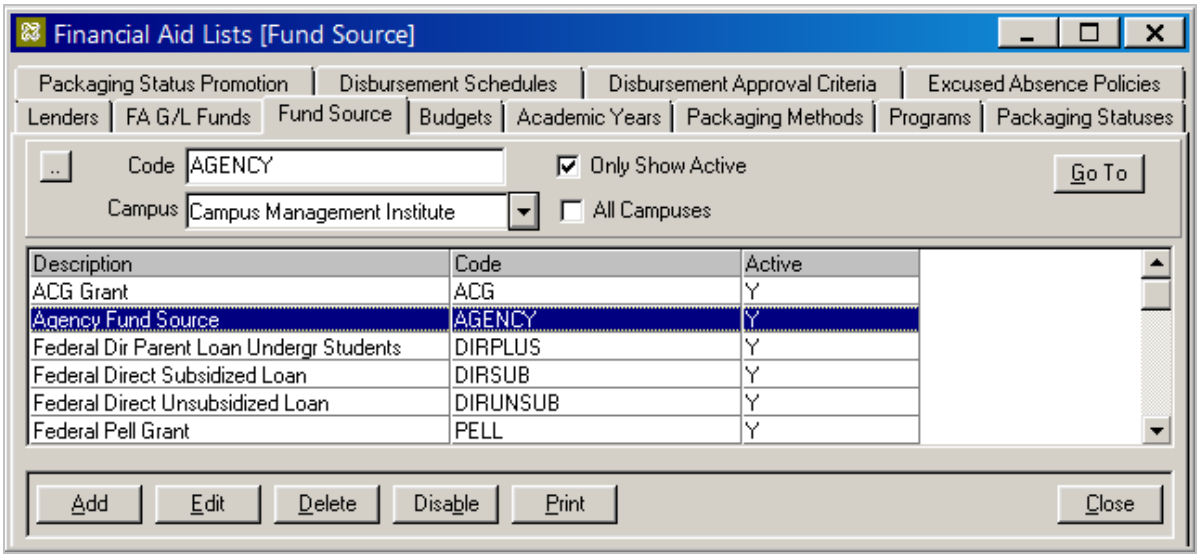
See Transaction Codes and Cash Receipts Summary for additional information regarding an institution's compliance with 90/10 regulations.

Refer also to Fund Source Permissions.

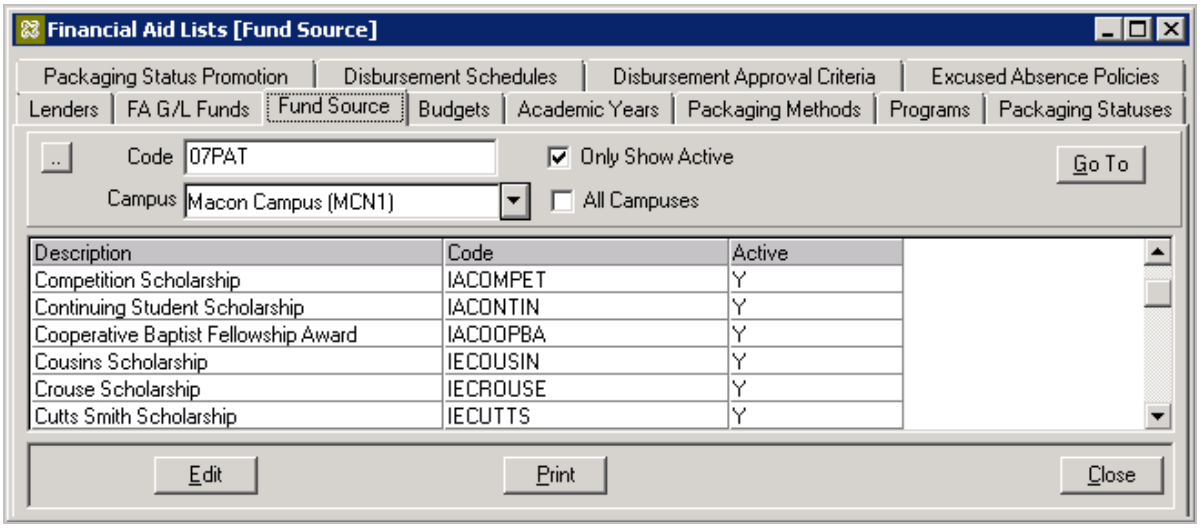
See Noel Levitz Properties for information regarding Noel Levitz reporting properties.

To add or edit a list of fund source codes:

1. Navigate to **Lists** > **Financial Aid**. The Financial Aid Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Fund Source**.



Note: When CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll, fund sources are created in CampusNexus Finance, HR & Payroll. The Fund Source Code Setup forms displays only the fund sources that are configured in CampusNexus Finance, HR & Payroll to appear in CampusNexus Student. Fund sources cannot be deleted in CampusNexus Student and the following fields are in read-only mode: Code, Description, Active, fund source type, and associated Campuses fields. Modifications to these fields can only take place in CampusNexus Finance, HR & Payroll. The Add, Delete, and Disable buttons are removed from the Financial Aid Lists [Fund Source] form.

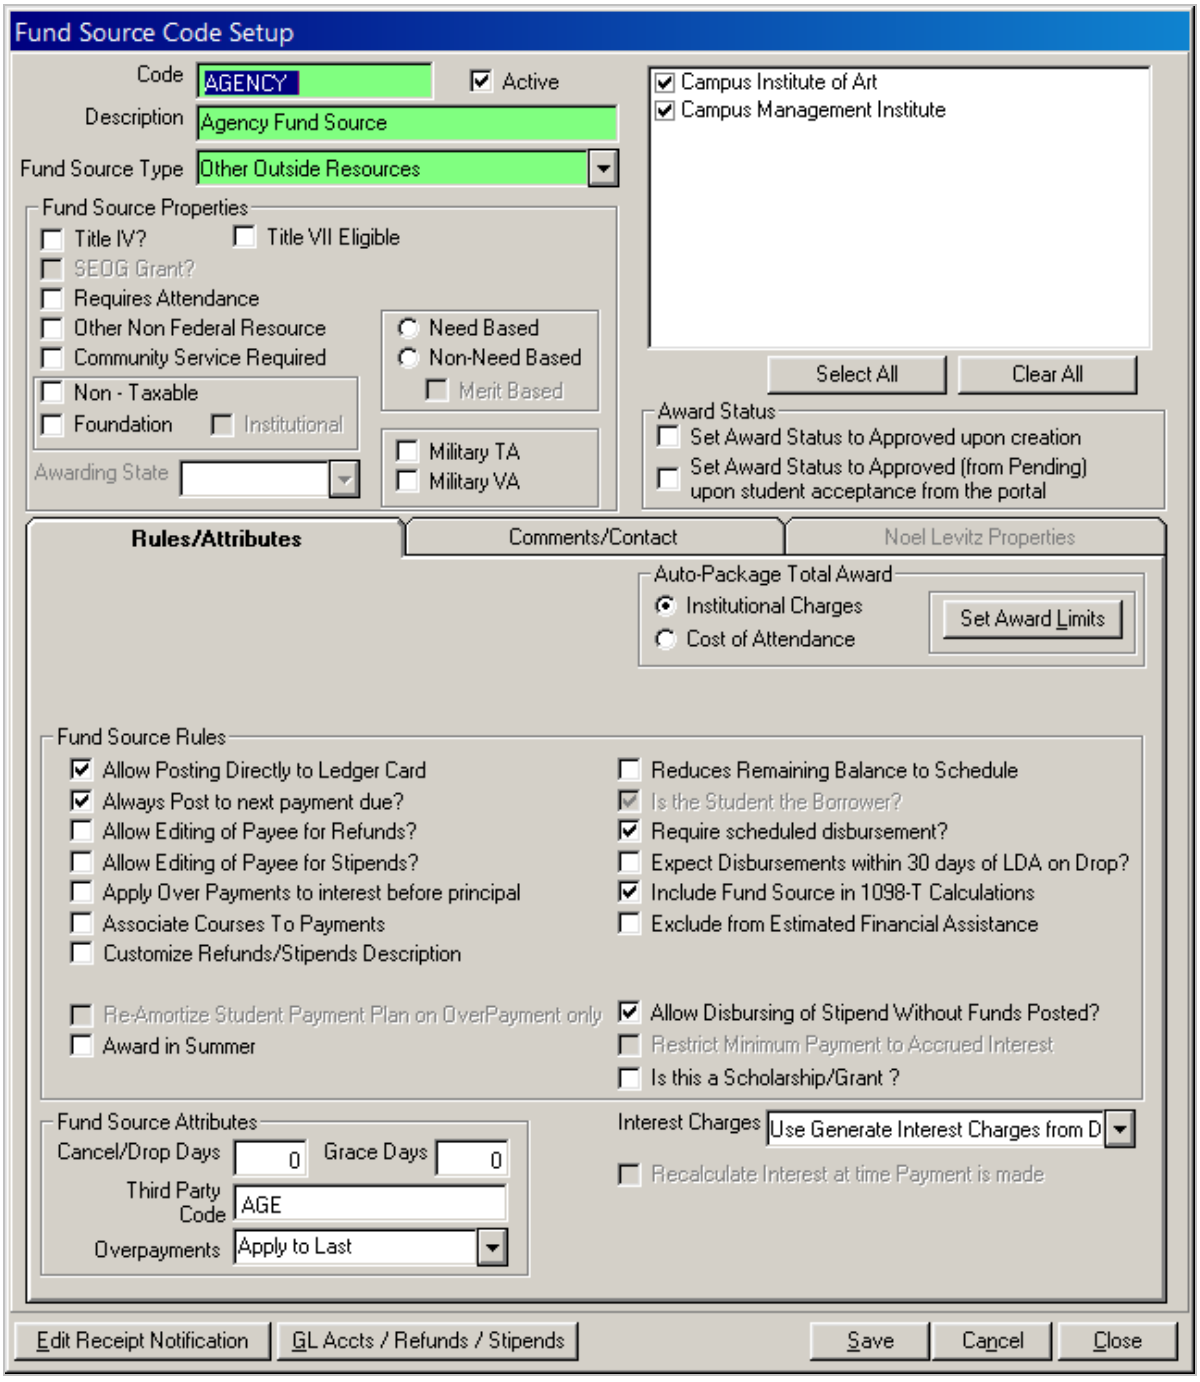


See Initial Configuration of CampusNexus Finance, HR & Payroll.

3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in

the text box and press **Enter** to view the corresponding record in the list.

4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Fund Source Code Setup form is displayed.



7. Specify appropriate options. See Field Descriptions.

8. Click **Edit Receipt Notification** to edit the Notification of Receipt Report. Access to the Crystal Reports system is required for this function. CampusNexus Student checks if a report exists for the selected fund source. If a report exists (cst_FaXXXXXXXXReceipt), the report is loaded. If a report does not exist, the default receipt (lst_FaDefaultReceipt) is copied to cst_FaXXXXXXXXReceipt. The cst_FaXXXXXXXXReceipt is then loaded for editing.
9. Click **GL Accounts/Refunds/Stipends** to specify general ledger (GL) debit and credit account numbers for each fund source. The account numbers are used to release transactions to the general ledger when funds for the fund source are received or refunded. Refunds and stipends do not have to share the same debit and credit account numbers. Typical cash transactions debit the cash account and credit the AR account; however, for some FA fund sources, the GL entry are different. If the GL accounts are blank for a fund source, the default accounts for a cash-received transaction are used to post to the GL. See the GL Account form example.
10. The **Disb Approval Criteria** button is enabled when the **Automated Disbursement Approval** check box is selected for least one of the campuses in the Fund Source Campus List. Click this button to specify which approval criteria set to use for each campus and fund source.

    See Loans, Award Limits (Set Banks and Set Award Limits buttons), and Collections.
11. Click **Save**. If a Fund Source Security message is displayed, follow the path listed in the message and refer to Financial Aid General Setup to implement Financial Aid Fund Source Security permissions.
12. Click **Close** to close the form.

Field Descriptions

Field	Description
Code	Enter a unique code that can be recognized in your institution as belonging to this fund source.
Active	Select the Active check box, if this is an active fund source. Clear the check box to block the use of this fund source for future financial aid packaging.
Description	Specify a description for the fund source.
Campus	Select the campuses that use this fund source for packaging students.

Field	Description
Fund Source Type	Select the fund source type. Types of grant and loan fund sources include: • Pell Grant • Grant (Other than Pell) • Perkins Loan • Other Need-Based Loans (LOANNB) • Other Non-Need-Based Loans (LOANNNB) • Parent Loan (PLUS) • Subsidized Stafford • Unsubsidized Stafford • Work Study • Direct Subsidized Loan (from DE) • Direct Unsubsidized Loan (from DE) • Direct Parent Loan (from DE) • Student Payments • Other Outside Resources • Scholarship • Grant (TEACH) Teacher Education Assistance for College and Education • Iraq and Afghanistan Service Grant (IASG) The fields displayed and enabled on the form depend on the fund source type selection.
Fund Source Properties	
Title IV?	Select this option if this is a Title IV fund source. If this check box is cleared, the Other Non Federal Resource check box becomes available.
SEOG Grant?	This check box is enabled when the fund source type is Grant. If the fund source is a Supplemental Educational Opportunity Grant (SEOG), select this check box to distinguish it from other grants. This field is used in the FISAP report logic to identify the SEOG records to include in the report.
SEOG Match %	This field is enabled when the SEOG? option is selected. Specify the percentage of matching SEOG grant funds provided by your institution in the SEOG Match % field. The format for entering the percentage is ##.## where 25.00 = 25%. This information is important when returning Title IV funds.
Requires Attendance	Select this option if attendance is mandated by an outside entity for students receiving this fund source. Enabling this option ensures that the LDA is used as the NSLDS Withdrawal Date.
Other Non Federal Resource	This check box is enabled only if the Title IV? check box is cleared. Select this option to indicate that this fund source will be applied toward students' institutional cost before Title IV and other cash payments in the institution's 90/10 calculation. Setting this flag may affect whether stipends/credit balances are counted as revenue in the 90/10 formula. See 90/10 Report.

Field	Description
Institutional	This option is available only for fund sources that have fund source types of Grant (other than Pell), Scholarship, or Cash. Select this check box to indicate that the fund source is an Institutional Grant (other than Pell) or Institutional Scholarship fund source type. This enables you to configure your institution's scholarships and grants so that the 90/10 rule can properly address aid of these types in the calculation. **Note**: On August 14, 2008, the Higher Education Opportunity Act (HEOA) - H.R. 4137 went into effect allowing institutions to count as revenue (between July 1, 2008 and July 1, 2012) the net present value of loans made by the institution. This law will revert back in 2013 to only allow payments received to be counted as revenue. As such, you can configure a fund source type of Student Payment (Code = CASH) as an Institutional loan. You may specify a 90/10 Report Calculation Reserve % Rate for years 2009 through 2010 for the Student Payment (Code = CASH) fund source. The Reserve rate percent must a value of 100 or less.

Field	Description
Need Based / Non-Need Based / Merit Based	When a fund source type of Scholarship, Grant Other than Pell, or Other Outside Resources is selected in the fund source type list, the Need Based and Non-Need Based options become enabled. These options allow authorized users, who are not configured to use Automated Processes in CampusNexus Student, to configure the need based and non-need based aid for these fund source types. If 'Non-Need Based' is selected, the 'Merit Based' check box becomes enabled. Indicate whether the fund source that is non-need based is merit based by selecting the 'Merit Based' check box. For institutions using CampusNexus Student 16.0 and higher, you can configure the Other Outside Resources fund source type as a Scholarship or Grant by selecting the 'Is this a Scholarship/Grant?' check box. This selection ensures proper record keeping and processing of 1098-T data (the fund source is treated like a scholarship when the check box is selected). If the check box is not selected, the fund source is not treated as a scholarship and the existing 1098-T Processing Utility functionality is preserved. If the scholarships are greater than the charges, the 1098-T Processing Utility no longer allows the printing of the 1098-T statement. This functionality applies to all versions of the CampusNexus Student. **Note**: This option should not be configured if the intended use of the fund source is to be a student payment or cash plan. CampusNexus Student recognizes the Need Based and Non-Need Based configurations on the Fund Source Code Setup form for the fund sources selected when calculating financial aid packages for students in the following areas: • Manual Packaging • Auto Packaging • FA Batch Packaging • RBS (Remaining Balance to Schedule) The calculations for the Need Based Aid Packaged and the Non-Need Based Aid Packaged are populated with the correct RBS (Remaining Balance to Schedule) on the Financial Aid Packaging form. The Need Based Aid calculation is displayed in the Gross Need Based Aid Pkgd field and the Non-Need Based Aid calculation appears in the Non-Need Based Aid Pkgd field. If neither Need Based or Non-Need Based aid is configured for these fund sources, aid is will calculated and stored as Need Based.
Award Status	
Set Award Status to Approved upon creation	Select this option to specify that CampusNexus Student will automatically package the award in approved status when predefined conditions are met. This applies to Auto Packaging, Batch Packaging, and Estimates. These awards do not require student acceptance from Portal.

Field	Description
Set Award Status to Approved (from Pending) upon student acceptance from the portal	Select this option to specify that the award will be automatically approved after the student accepts the award online. **Note**: You can select one Award Status option or the other, but not both. You may leave both options cleared.
Rules/Attributes tab	
Collection Options	Collection Options are available to manage student collections if the fund source type is Student Payments and the fund source is Cash. Select the 'Use Outside Collections' check box if you are using an outside collections agency or vendor. In the Grace Period field, specify the number of days between billing cycles. The number entered must be a numeric value greater than or equal to zero. Negative numbers are not allowed. Loan types other than Cash are not displayed in the collections fields.

Field	Description
Set Banks (button)	The Set Banks button is only available when the selected fund source is a loan. 1. Click **Set Banks** to define the "Defaults for Fund Source" per Campus location. The Fund Source banks form is displayed.  2. In the Display By section, select **Code** or **Description** to sort the grid. 3. For each campus, use the drop-down list to select the Lender, Servicer, and Guarantor. • Lender - Enter the bank to use as the default lender when adding a new loan. **Note**: A default lender and/or guarantor needs to be specified for loan fees to be calculated when this fund source is packaged within the Financial Aid Estimates option. A lender and guarantor is not entered by the user who creates an Estimated FA package. The lender and guarantor is assumed using the default lender and guarantor specified here. The resulting fees for each loan packaged are calculated using the fee percentages set up for the lender and guarantor that are specified on this form. If a default lender and guarantor are not specified for the fund source being packaged, the loan fees are not calculated. Thus, the gross and net award amounts will be the same. • Servicer - Enter the bank to use as the default servicer when adding a new loan. • Guarantor - Enter the bank to use as the default guarantor when adding a new loan. The default banks set here are displayed when adding awards via View > Financial Aid > Estimates, or View > Financial Aid > Awards, and batch packaging under Daily > Financial Aid > Batch Processing > Batch Packaging > Packaging paths. 4. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.
Auto-Package Total Award	Select whether you want to auto-package the total award based on Institutional Charges or Cost of Attendance (COA).

Field	Description
Set Award Limits (button)	The Set Award Limits button is not displayed if one of the following fund source types is selected: Pell, SUB, UNSUB, PLUS, DIRSUB, DIRUNSUB, DIRPLUS or TEACH. The Set Award Limits button is available for Agency fund sources and is used configure award limits of the fund source for individual campuses. See Award Year Settings for additional information. 1. Click **Set Award Limits**. The Award Year Settings form is displayed. It lists the campuses for which you have permissions. The fund source name is listed next to the caption "Campus Award Limits".  2. Select the **Award Year**. 3. Select the **One Award Per Year** check box and specify the **Maximum Amount** of the award for a campus. If these fields are left blank, there are no loan limits for the campus, fund source, and award year. 4. Select **Keep New Input Values to Update Subsequent years** if applicable. 5. Click **Save** and **Finish** to close the form.
Fund Source Rules	
Allow Posting Directly to Ledger Card	Select this option if your institution allows postings that affect this fund source directly to the student's ledger card. Such postings could be rather than, or in addition to automated procedures such as posting FA disbursements.
Always Post to next payment due	This option is enabled only when the Allow posting Directly to Ledger card option is selected. The default is set to Yes when setting up a new fund source.

Field	Description
Allow Editing of Payee for Refunds?	Select this option to allow users to change of the payee information when processing a refund check.
Allow Editing of Payee for Stipends?	Select this option to allow users to change the payee information when processing a stipend check.
Apply Over Payment to interest before principal	This option is available for fund source types of Cash or Other only. Select this option to indicate that payments should be applied to interest before principal.
Associate Courses To Payments	This option is available only for Cash, Other, or Scholarship fund source types. By selecting this option the Auto Create Payment Schedule check box becomes enabled. Select this option to associate a course with a payment. The course associated with the payment is printed on the Agency Billing Invoice. This is useful when Agencies are billed for students and require that the course appear on the invoice. See also Cash/Other Source Form and Grant/Scholarship Form.
Customize Refunds/Stipends Description	Select this option to customize refund and stipend transactions. The Refund's Description and Stipend's Description fields become enabled upon selecting this option. Enter appropriate descriptions in each field. We recommend that you include the fund source in the description. CampusNexus Student adds the financial aid award year to the descriptions entered in the fields for up to 100 characters. These descriptions are displayed to the student in Portal. Refer to Post Refunds, Post Stipends, Process Refunds and Stipends and Ledger Cards for additional information.
Allow Printing of Promissory Notes	Select this option to print promissory notes from CampusNexus Student. Promissory Notes are used with any type of Student Payments (i.e., fund source type Cash).
Reduces Remaining Balance to Schedule	This option is displayed if you select a fund source type of Other. By default this option is cleared indicating that your institution does not reduce the remaining balance due to other types of funding, such as Veterans Administration benefits, paid directly to the student. This feature prevents over-awarding students.
Award in Summer	Select this option for the fund sources that you want to have included in the Financial Aid Summer Term packaging. When this option is not selected, the packaging process excludes the fund source for summer.
Package Crossover Term/Payment Period with Award Year 2 ISIR	Selecting the 'Package Crossover Term/Payment Period with Award Year 2 ISIR' check box enables users to allow the term/payment period that is crossing over to be packaged in the second award year using that second ISIR value. This can occur only if the student has exhausted their Pell award for Award Year 1 and has not been packaged for any additional funding for that term/payment period. If the check box is not selected, the standard awarding of the disbursement by the term/payment period falling within the award year that is being packaged is followed. By default, this check box is cleared.

Field	Description
Is the Student the Borrower?	This field is enabled only when the fund source type is Other Need-based Loan (LOANNB), or Other Non-Need-based Loan (LOANNNB). Select this option if the student is the borrower. Clear the check box if someone other than the student is the borrower. CampusNexus Student checks the flag when saving the record.
Graduate Student Borrower? (Graduate PLUS)	The check box is enabled only when the fund source type is Parent Loan (PLUS) or Direct PLUS Loan (DIRPLUS). Select this option if the borrower is a graduate student. CampusNexus Student checks the flag when saving the record. The Master Promissory Note displays the proper caption depending on how this flag is set. If this option is selected, the second line on Section A reads, *"I am a Graduate or Professional Student"*; otherwise, it reads, *"I am a Parent of a Dependent Undergraduate Student"*. Under the Higher Education Reconciliation Act (HERA), graduate students may be eligible to receive PLUS loans. Previously, PLUS loans were made to parents of students enrolled in institutions to assist in funding the students education. To support the Grad PLUS loans, this flag is available for fund source types that are PLUS and DIRPLUS. You can package Grad PLUS under the Direct Loan and FFEL PLUS programs for students by setting up fund sources with the PLUS or DIRPLUS fund source type. Direct Loan Grad PLUS loans may be processed through COD functionality.
Expect Disbursements within 30 Days of LDA on Drop?	Select this option to leave disbursements in a scheduled status if the scheduled disbursement date is within 30 days of the student's last day of attendance (LDA), and the student's status is changed to 'Drop'. The default for this check box is cleared.
Include Fund Source in 1098-T Calculations	This check box is enabled when a fund source type of IASG, Scholarship, Other, Pell, TEACH,, or Grant is selected. Select or clear this check box to indicate whether the fund source shall be included in the 1098-T calculation for scholarships and grants.

Field	Description
Round all Disbursements to whole dollars?	This option is displayed only for the Pell Grant fund source type. When this option is selected, the ability to Round Refund Amounts on R2T4 becomes available. CampusNexus Student rounds Direct Loan funds per COD requirements and allows Pell amounts to be rounded as defined in the FSA Handbook. CampusNexus Student makes the adjustments when posting the Financial Aid Refund Calculation. Rounding can be configured to be activated within the Refund Calculations for refund amounts, and for it to be applied when the results from the refund calculation are posted to the student ledger (i.e., the refund calculation results may show a particular fund with cents, but when the results from the refund calculation are posted to the ledger, the rounding logic is applied rounding to the nearest dollar). If the 'Round all Disbursements to whole dollars' check box is cleared and the registry key to allow Pell Cents is enabled, then the exact amount of cents is displayed and saved for the Pell origination amount. The Pell origination amount is processed and saved with the properly calculated amount of cents in regards to Year-Round Pell Additional Eligibility Indicator. **Note**: This option takes effect with any refunds that are done from the time of implementation of CampusNexus Student version 15.0; there is no retroactive handling of rounding of any existing refunds that have not been posted.
Require Disb. Sched. when Awarding New Aid	Select this option to set disbursement schedules as a required field when setting up new aid.
Exclude from Estimated Financial Assistance	This option is displayed only if you choose a fund source type of Other or IASG. This option allows authorized users to specify if a fund source will not reduce the student's remaining "Need" for financial aid. By default this option is cleared.
90/10 Report Configuration - Disbursed from an established restricted account, and funded by outside sources	When the selected fund source type is Grant (Other than Pell) or Scholarship and the Institutional check box is selected, the 90/10 Report Configuration section is enabled displaying a check box labeled 'Disbursed from an established restricted account, and funded by outside sources'. When this check box is selected, the fund source is an institutional scholarship or grant that meets the defined conditions (i.e., the scholarships or grants are disbursed from an established restricted account and funded by outside sources or income earned on such funds). The 90/10 report includes this aid in the revenue calculation.
Require scheduled disbursement?	When adding a new fund source, this check box is selected by default. Clear this check box to post Financial Aid disbursements without requiring that they be scheduled first. This check box is disabled for fund source types IASG, Pell, DIRSUB, DIRUNSUB, and DIRPLUS. Disbursements for these fund sources are required to be scheduled before disbursements are processed. Work study awards are an exception, and because no payments can be scheduled for work-student, the check box is not displayed.

<table>
<tr><th>Field</th><th>Description</th></tr>
<tr><td>Allow Disbursing of Stipend Without Funds Posted</td><td>This option (selected by default) at fund source level works in conjunction with the Disburse Stipends? options at campus and system level so that different fund sources can be separated, if necessary, to validate whether a stipend can be posted for a specific fund source that has not yet had funds posted.

Note: See the table of possible interaction scenarios between campus/system level and fund source level configurations.</td></tr>
<tr><td colspan="2">Fund Source Attributes</td></tr>
<tr><td>Cancel/Drop Days</td><td>Specify the number of days with in which the student is permitted to cancel or drop the enrollment and loan without having to repay a portion of the loan.</td></tr>
<tr><td>Grace Days</td><td>Specify the number permitted to the student after graduation or dropping out of school before the repayment of the loan must begin. This value is used to calculate the first repayment date for each loan in the Exit Interview form.</td></tr>
<tr><td>Third Party Code</td><td>Specify a Third Party Code (ID number) which represents the institution's third party servicer (if any). This number is usually provided to the institution by the servicer and represents an identifier by which the institution is known to the servicer.

Note: When using a servicer to process awards that are sent to COD, the following fund source types must be selected for the corresponding fund sources:

Fund Source Types
<table>
<tr><th>Fund Source</th><th>Fund Source Type</th></tr>
<tr><td>TEACH</td><td>Grant (other than Pell)</td></tr>
<tr><td>Pell</td><td>Pell Grant</td></tr>
<tr><td>Direct Subsidized Loan</td><td>Subsidized Stafford</td></tr>
<tr><td>Direct Unsubsidized Loan</td><td>Unsubsidized Stafford</td></tr>
<tr><td>Direct Plus Loan</td><td>Plus Loan</td></tr>
</table></td></tr>
<tr><td>EFT</td><td>Select EFT if the fund source uses electronic funds transfer to send disbursement funds.</td></tr>
<tr><td>Overpayments</td><td>This option applies to fund source types Cash and Other only. It does not apply to grants, loans, or scholarships.

Select one of the following options for overpayments received for the fund source:

• Apply to First - The overpayment amount is applied to the next scheduled payment.
• Apply to Last - The overpayment amount is applied to the last scheduled payment.</td></tr>
<tr><td>Interest Charges</td><td>Select interest charges for the fund source.</td></tr>
</table>

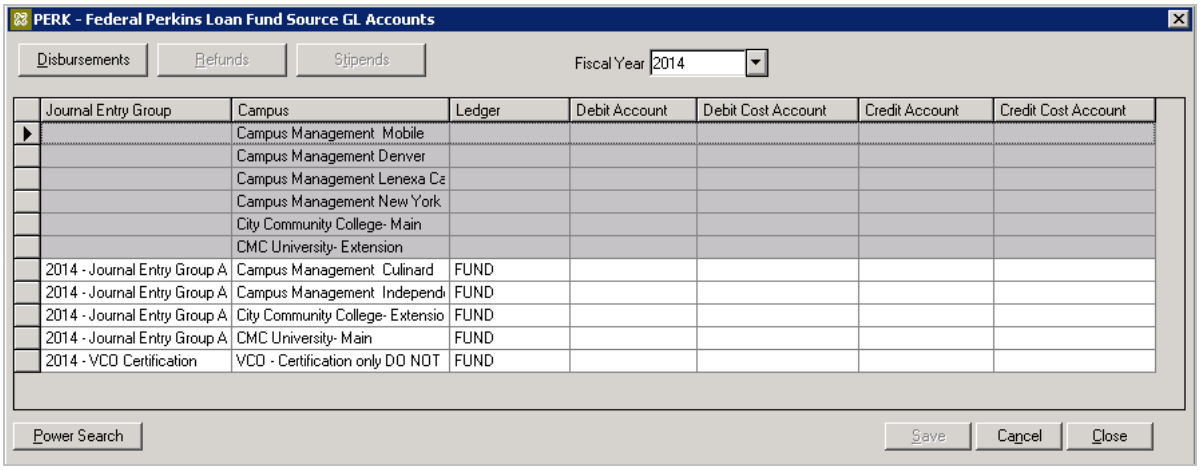
Field	Description
Recalculate Interest at time Payment is made	Select this option to allow CampusNexus Student to recalculate the interest at the time the payment is made when the Fund Source is Cash or Other.
Auto Create Payment Schedule (button)	This option is available only if a system registry key for this feature is enabled. Contact Anthology Inc. for more details. This option allows course registration through Portal to be linked to the creation of scheduled disbursements. By selecting this option, system administrators can configure fund source types (payment methods) of Cash, Other, and Scholar for students to select from to pay for a class via Portal. When this option is selected, the Payment Schedule Option button is enabled. This option allows system administrators to configure specific due dates of the scheduled payment for the fund source types of Cash, Other and Scholar. The options for due dates include specifying the number of (X) days before a course start date, after a course start date, before a term start date, or after a term start date. When a student selects a fund source type to pay for a class fromPortal, CampusNexus Student creates an award with a single scheduled disbursement for that course, fund source, and payment type combination. If multiple payment types are selected for a single course, multiple awards are created. Therefore, a separate payment plan for each course and credit card combination can be created. **Note**: Third party agencies, such as Military Tuition Assistance and Corporate Tuition Assistance, are not linked to a credit card. These agencies have a payment plan with a scheduled disbursement with no associated credit card. The Remaining Balance to Schedule by Course report displays the amounts remaining to schedule for each student by course.
Comments/Contact	
FA G/L Fund	Select the FA G/L fund for the selected fund source. Transactions affecting this fund source will be posted in the FAGL accounts to which this fund source is related. See FAGL Funds.
Comments	Enter any comments to further describe the fund source.
Receipts Comments	Enter any comments to be printed on the Notification of Receipt.
Refund Payable To	This field is used when printing refund checks from a fund source where the type is Grant or Pell. The first line of this field is displayed on the check and the check ledger. Alternate Payee, Check Payee.
Fund Source Contact Information	Specify the address and telephone number of the fund source contact person.
Noel Levitz Properties	

Field	Description
This tab is enabled when the following features are activated: • Student Financial Aid Awarding (Daily > Automated Processes > Configuration > Process Activation > Setup Automation by Campus > Student Financial Aid Awarding (select check box)) • Noel Levitz Integration (Daily > Automated Processes > Configuration > Student Financial Aid Awarding > Settings and Triggers > Activate Noel Levitz Integration (select check box)) for selected Campus(es).	
Community Service Required	Select this option for fund sources requiring a service component for reporting.
Title VII Eligible	Select this option for fund sources to be designated as Title VII funding.
Source	Select the fund source.
Basis	Select the basis for the award.
Funding	Specify if the award is funded or not funded.
Award Type	Specify the award type as work, loan, or gift.

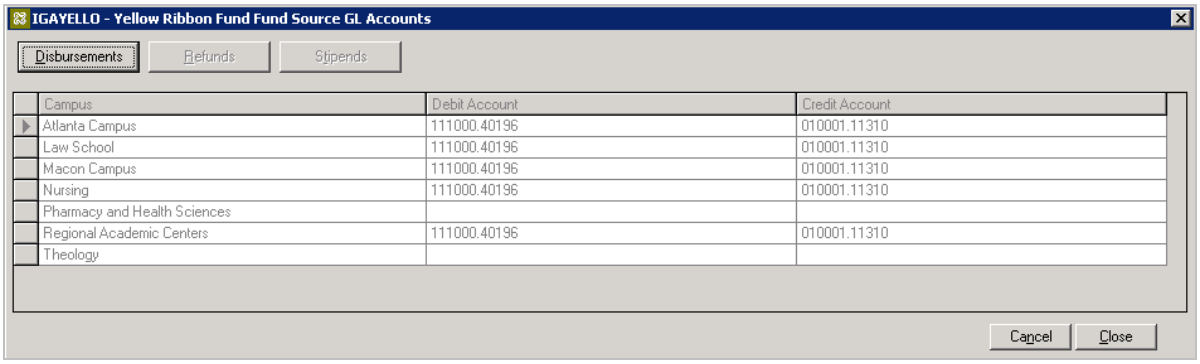
Fund Source GL Accounts/Refunds/Stipends

Institutions can set up a different GL Account numbers for handling disbursements, refunds, and stipends. Debit and Credit accounts can be designated for each fund source and campus to be used when posting refunds. If the GL Account is not specified for the Refund or the Stipend, the GL release uses the GL Debit/Credit accounts associated with the Bank Account from which the checks are written.

The Fund Source GL Accounts form contains the **Disbursements**, **Refunds**, and **Stipends** buttons. When you click one of the buttons, CampusNexus Student displays the list of accounts for each campus for the fund source. The form lists all campuses to which you have access.



Note: When CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll, the forms display fund source GL Accounts in read-only mode. Fund Source GL Accounts for Disbursements, Refunds, and Stipends forms are configured in CampusNexus Finance, HR & Payroll.



For each campus, enter a **Debit Account** and a **Credit Account**. Click **Save** to save any changes and **Close** to close the form. The business rules for entering GL account numbers on this form are the same as for the GL Link account setup.

Note: By default, Refund and Stipend Credit/Debit account numbers are the same. Click **Stipends** to enter different debit and credit account numbers for use with stipends. These account numbers are treated the same way as refunds, subject to the same verification and reporting criteria and limitations. If you do not enter new, valid account numbers for stipends, the old functionality stays in place where refund and stipend account numbers are the same. The exception to the verification process is in Export to GL-Other, where account number validation does not occur.

- If the Great Plains search feature is enabled, select a row, and click the **Great Plains Search** button to search for Debit Account or Credit Account numbers in the Great Plains GL.

  a. In the Search Great Plains GL Accounts form, click the **Search By** list. Search for GL Accounts using the **Account Number** or **Description**.

  Note: These searches also return Stipend Account information when you have set up separate debit and credit account numbers for stipends.

  b. In the **Search For** field, enter the account number or description.

  c. Specify the **Search Pattern**. The Search pattern works as follows:

- “Starts With” finds an exact match on data that starts with the characters you specify.

  Enter dashes when using this method. For example, if you have a mask that uses ###-####-## and you enter 0000, you will not get any matches. You must enter 000- or 000-0 to get matches, where the first four digits in the account number are zeros.

- "Contains" finds any value that contains what you have entered.
- "Wildcard" searching uses % for any string that follows what is entered. The "_" only replaces a single character.
- "Exact Match" must contain everything you enter. There cannot be additional characters before or after what was entered. If you are not sure of the exact wording, choose “Contains”.

d. Click **Search**. All GL Accounts that meet the specified criteria are displayed in the result grid.

   Based on the value specified in the Max GP GL Account Search field, the results grid displays the data in one page or across many pages. If there are more records than the default number of rows, CampusNexus Student displays:

   - Number of records displayed.
   - Total number or records matched.
   - A Next button to display the next records matched.

e. Double-click the applicable row, or click **Select** to add the account details to the Debit Account or Credit Account field.

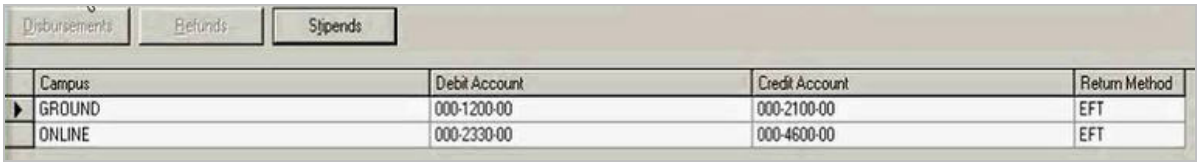
f. Click **Save**. CampusNexus Student saves all records for all campuses that use Great Plains, that contain both a valid Debit and Credit Account or both the Debit and Credit accounts are blank. An error message is displayed if any campus that uses Great Plains is using an incorrect Debit and/or Credit account.

   The **Reset** button on the Search GP GL accounts form clears the fields for a new Search.

Note: The form displayed for **Refunds** includes a **Return Method** column that can be used to configure the return method for the campus and fund source in question. Possible values are Check, Master Check, EFT, ACH, Credit Card, and Net. For additional information, see Default Return Method Hierarchy.

The possible Return Methods for **Stipends** are Check, EFT, ACH and Net.

Initially, Stipend Accounts are populated with the same values as Refund Accounts, so that institutions who do not want to separate refunds and stipends do not have to make any changes. If institutions elect to use different account numbers for stipends, they change the account here.



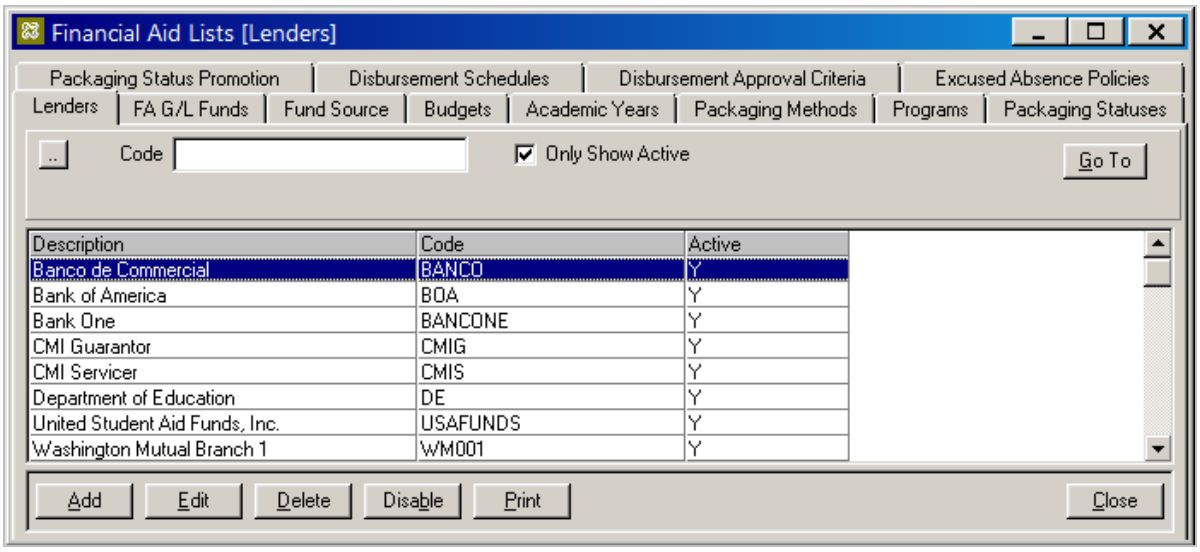
Financial Aid Lists [Lenders]

Use the Financial Aid Lists [Lenders] form to set up loan providers, loan servicers, and loan guarantors. Enter the demographic information for each of the lenders used by your students. Be sure to include loan origination fees and interest rates on the Fees & Interest Rates tab for lenders *other than* the Department of Education (Direct Loans).

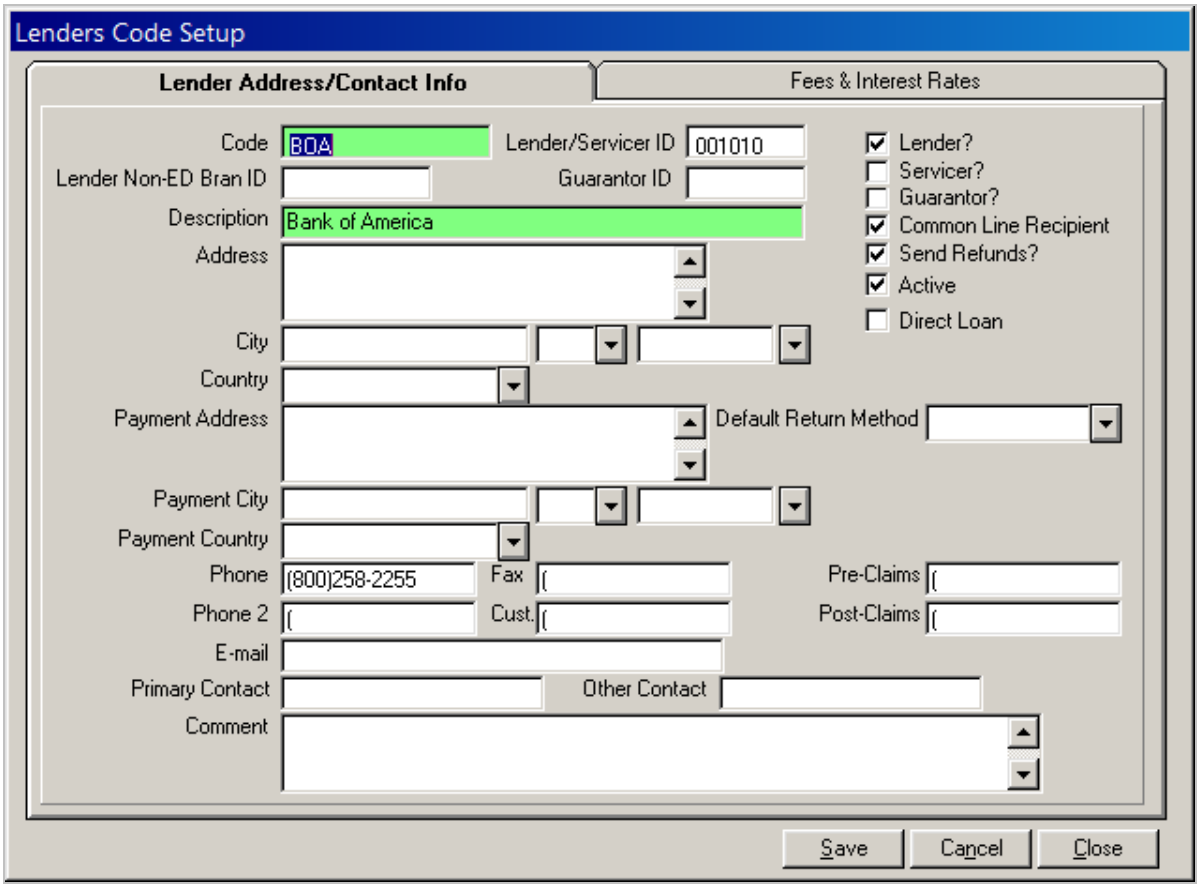
Refer to the Direct Loan Setup form to set up Direct Loan origination fees and interest rates for lenders through the Department of Education.

To add or edit a list of lender codes:

1. Navigate to **Lists** > **Financial Aid**. The Financial Aid Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Lenders**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Lenders Code Setup form is displayed.



6. Specify appropriate options. See Field Descriptions.

   If the lender is the Department of Education under the Direct Loan Program, the fees and interest rates must be configured in the Direct Loan Setup form. Otherwise click the Fees and Interest Rates tab and follow the instructions below.

7. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Field Descriptions

Field	Description
Lender Address/Contact Info tab	
Code	Specify a unique code.
Lender Non-ED Bran ID	Specify a unique 4-character identifier assigned (by an entity other than ED) to the lender's branch office. This field is enabled only if the Lender? check box is selected.
Guarantor ID	Specify a unique 3-character identifier This field is enabled only if the Guarantor? check box is selected.
Lender?	Select the check box if it applies.

Field	Description
Servicer?	Select the check box if it applies.
Guarantor?	Select the check box if it applies.
Send Refunds?	Select the check box if the refunds should be sent using change transaction records.
Active	Select the check box to designate the record as active.
Direct Loan	Select the check box if this is the lender record for Direct Loans. If so, it will be the Department of Education (ED) record.
Description	Specify a description of the lender.
Address	Enter the address of the institution.
City/State/Postal Code	If you enter the Postal Code first, CampusNexus Student fills in the City and State fields.
Country	The field defaults to the country of your default (login) campus. If necessary, select another country.
Payment Address	Enter the address where the loan payments are sent.
Default Return Method	Select Check, Master Check, EFT, or Net. For additional information, see Default Return Method Hierarchy.
Payment City/State/Postal Code	If you enter the Postal Code first, CampusNexus Student fills in the City and State fields.
Payment Country	The field defaults to the country of your default (login) campus. If necessary, select another country.
Phone	Enter the primary telephone number for the institution.
Fax	Enter the fax number for the institution.
Phone 2	Enter the secondary telephone number for the institution.
Cust.	Enter a telephone number for a customer service representative.
Pre-Claims	Enter the number of the Pre-Claims office (if different from other phones).
Post-Claims	Enter the number of the Post-Claims office (if different from other phones).
E-mail	Enter an e-mail address for this institution.
Primary Contact	Enter the name of the Primary Contact person.
Other Contact	Enter the name of the Other Contact person.
Comment	Enter any comment.
Fees & Interest Rates tab	

Field	Description
Loan Fees #1 / #2	Enter up to two fees that this lender charges when processing loans. When a loan is originated, if both fees are present here, they are both charged to the borrower.
Percentage / Flat Amount	Select Percentage to enter a fee based on a percentage of the gross loan amount or Flat Amount if the value you entered is in dollars and applies to all loans equally.
Description	Enter a description of the fee.
Interest Rate	Enter the interest rate the lender charges for loan repayment. The value in this field and the value in the Default # of Monthly Payments field are used to calculate the estimated monthly payments in the Exit Interview report.
Default # of Monthly Payments	Enter the default number of monthly payments required to repay a loan offered by this lender.
Servicer Code	Enter the Servicer Code for the default Servicer that this lender uses.
Guarantor Code	Enter the Guarantor Code for the default Guarantor that this lender uses.

Financial Aid Lists [Packaging Methods]

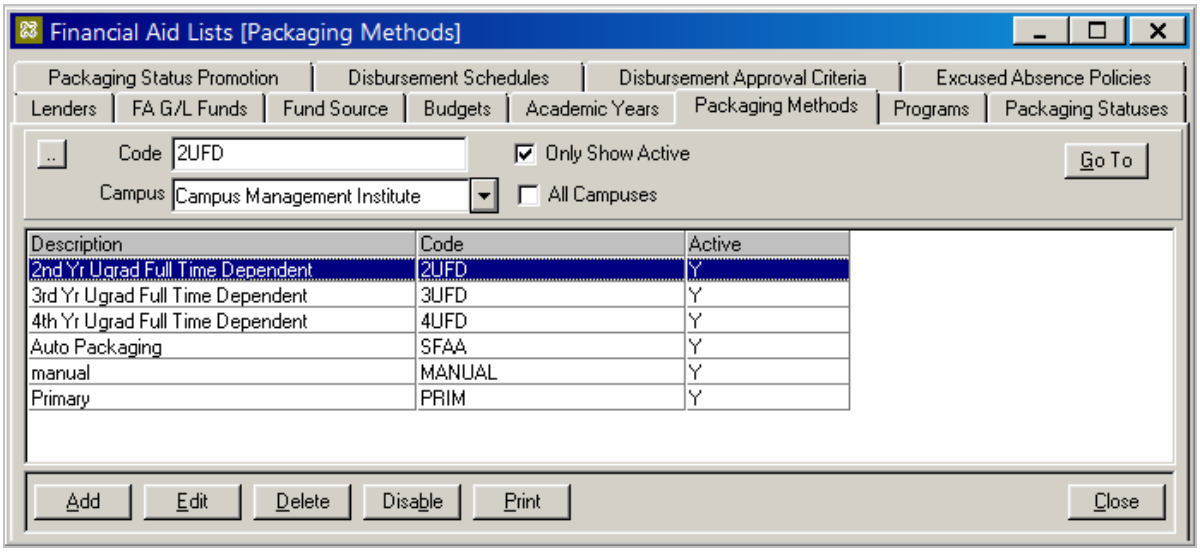
Use the Financial Aid Lists [Packaging Methods] form to create a list of packaging methods used at your institution. Packaging methods are guidelines for planning financial aid for your students. CampusNexus Student's automated packaging feature depends on these tables. When you package a student, you select one of these tables to be used by the automatic packager. When the time comes to consider the needs of individual students, the Financial Aid Officer can make adjustments to the student's FA packaging plan.

Since there is always a variety of circumstances to consider when a student requires financial aid, you can anticipate that a variety of packaging methods will be required. For instance, it is likely that you want to establish a different packaging method for full time students and part time students. Pell and other grant programs, as well as the various loan programs all have different benefit maximums for full and part time students. You may want different packaging parameters for first year, second year, third year, fourth year, and graduate students. Maximum benefits also vary according to the student's progress toward the completion of their program of study.

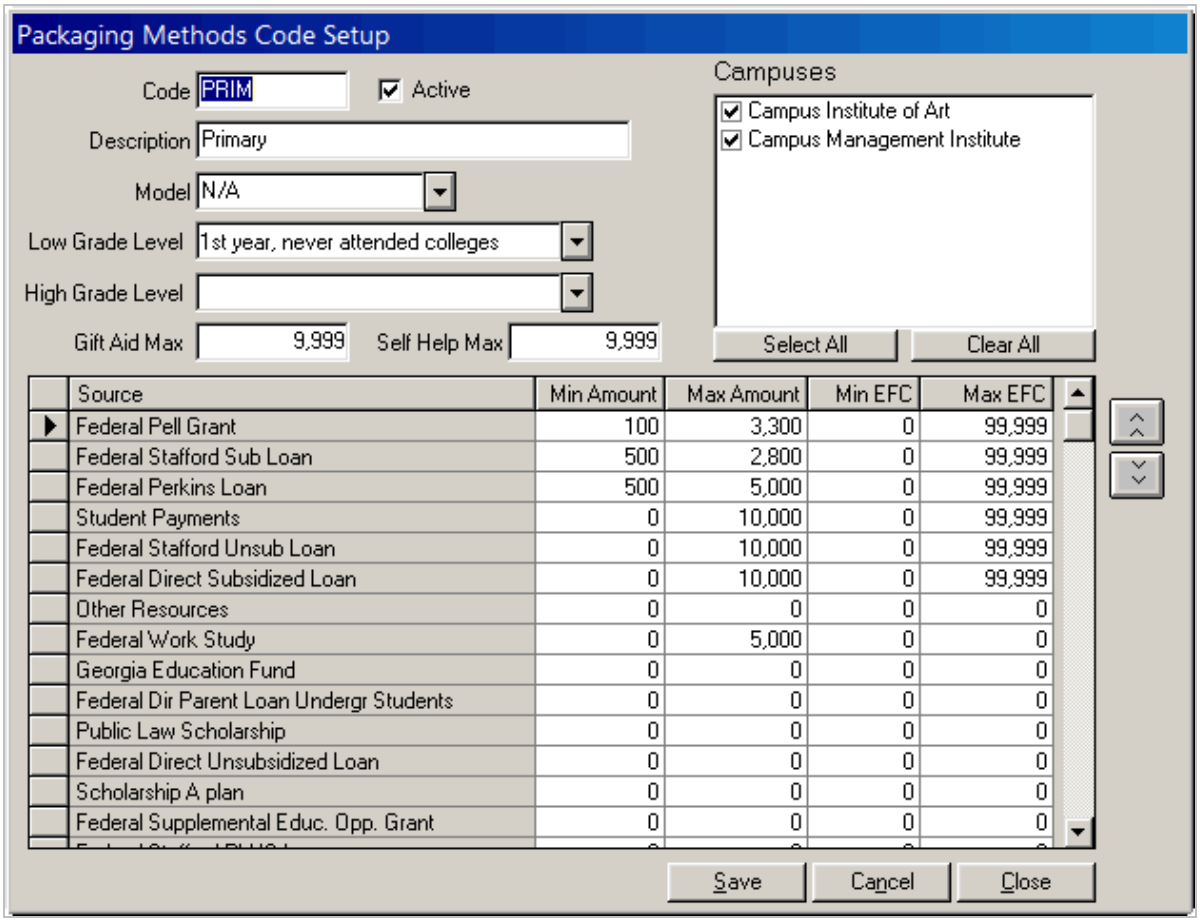
Another factor to consider are the dependent and independent models as defined by the Department of Education. Dependent students qualify for a different level of benefits than do independent students. In your institution's environment, you may identify additional factors that have to be considered in your own packaging methods. All of these factors contribute to the setup of packaging methods for your financial aid programs.

To add or edit a list of financial aid packaging method codes:

1. Navigate to **Lists** > **Financial Aid**. The Financial Aid Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Packaging Methods**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Packaging Methods Code Setup form is displayed.



7. Specify appropriate options. See Field Descriptions.
8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Field Descriptions

Field	Description
Code	Enter a code for this packaging method that can be easily recognized by your staff.
Active	Select or clear this flag to control the future use of this packaging method.
Description	Enter a descriptive name for this packaging method.
Campuses	Select the campuses to which this packaging method applies. CampusNexus Student allows duplicate packaging method codes within the database; however, duplicate codes are not allowed within a campus or campus group. The Packaging Methods form enables multi-campus selection.
Model	Select Dependent, Independent, or N/A.
Low Grade Level	Select the lowest grade level in your school to which this packaging method applies.
High Grade Level	Select the highest grade level in your school to which this packaging method applies.

Field	Description
Gift Aid Max	Enter the maximum amount of gift aid (Pell Grant, other grants, scholarships) that can be awarded when using this packaging method. If you are doing automatic packaging, CampusNexus Student checks this amount to determine when to stop allocating grants and begin packaging loans.
Self Help Max	Enter the maximum amount of self help (subsidized and unsubsidized loans, other loans, work study, and so on) that can be awarded when using this packaging method. If you are doing automatic packaging, CampusNexus Student checks this amount to determine when to stop allocating loans.
Source	The fund sources in the packaging methods list come from the Fund Source Type list. Arrange the order of the fund sources by clicking the and buttons on the right side of the list. It is important to put the sources in the order in which they will be applied when the student's aid package is implemented, especially if you choose to use the automated packaging feature of CampusNexus Student. It is not necessary to enter data in every fund source. If a source is not applicable in a given packaging method, leave the values for the source at zero. For readability, promote the sources that are used (higher in the list) and demote those that are not used.
Min Amount	Enter the minimum amount that the student can expect from the fund source. Students are restricted from accepting less than the configured minimum amount of a loan fund source for the student's packaging method. CampusNexus Student validates the student's packaging method and the scheduled minimum amount for each fund source against the values configured on this form.
Max Amount	Enter the maximum amount that the student can expect from the fund source. The maximum amount is validated against the amount previously scheduled. If in Portal a user enters a Gross Amount that is not within the minimum and maximum range configured for the loan fund source, CampusNexus Student displays an error message indicating the fund source and the scheduled minimum and maximum amounts the user is allowed to accept.
Min EFC	Enter the minimum expected family contribution amount that the student and his or her family must provide for benefits from this fund source.
Max EFC	Enter the maximum expected family contribution amount that the student and his or her family must provide for benefits from this fund source.

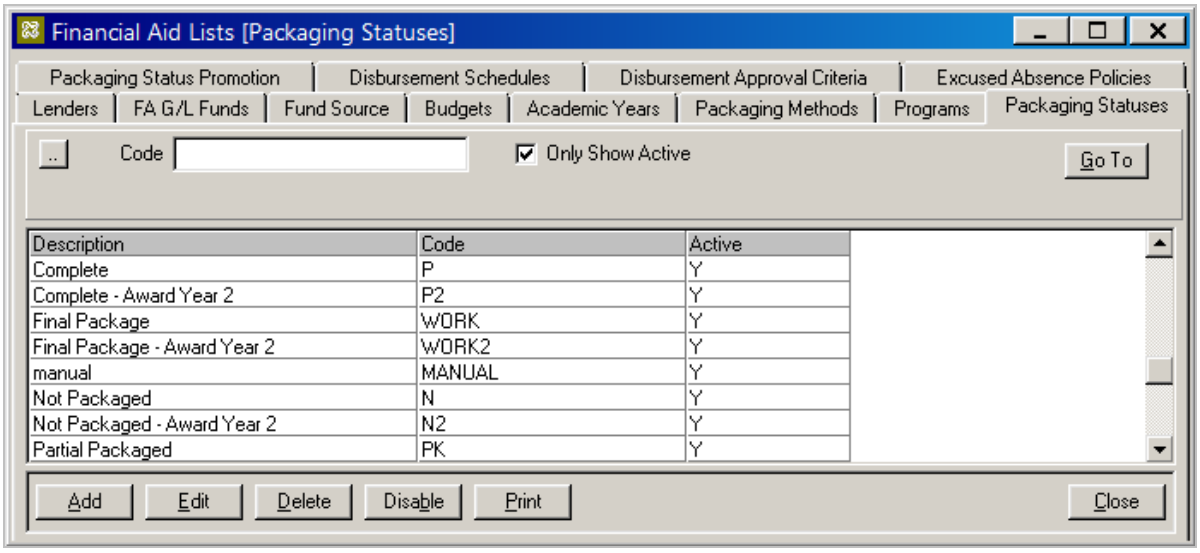
Financial Aid Lists [Packaging Statuses]

Use the Financial Aid Lists [Packaging Statuses] form to create a list of codes for financial aid packaging statuses. These statuses are indicators of the student's progress through the financial aid process. Each student will have a packaging status for each academic year.

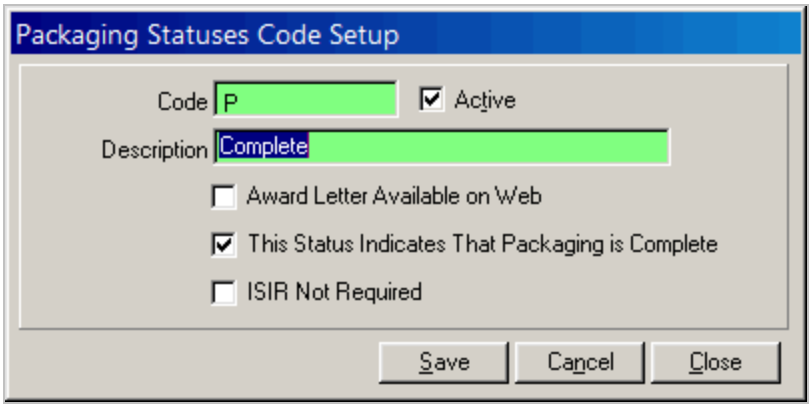
A student's financial aid packaging status is displayed when you select the student and navigate to View > Financial Aid > Packaging. For detailed information on packaging, refer to Packaging.

To add or edit a list of financial aid packaging status codes:

1. Navigate to **Lists** > **Financial Aid**. The Financial Aid Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Packaging Statuses**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Packaging Statuses Code Setup form is displayed.



6. Specify a unique **Code**.
7. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
8. Enter a **Description**.
9. Select **Award Letter Available on Web** to cause the award letter to be viewable on the web automatically (ready for student viewing) when this status is achieved.
10. Select **This Status Indicates That Packaging is Complete** if this is the appropriate code for the packaging complete status.
11. Select **ISIR Not Required** to set the packaging status for students making cash payments for the program.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Financial Aid Lists [Packaging Status Promotion]

Note: For the latest content about FAFSA, ISIR and COD processing, access Regulatory Help.

Use the Financial Aid Lists [Packaging Status Promotion] form to add or edit promotion requirements for each packaging status. The information on the grid is saved in the FaPackStatusPromoLevel table. See Configurable Values for Packaging Status Promotion below for descriptions of the grid columns.

On the campus Financial Aid page (Setup > Campus Locations > Campuses > Financial Aid), you can select a "Package Status Promotion" code. The value is saved to SyCampus.FaPackStatusPromoID. The list of available methods is from the FaPackStatusPromo table which is maintained with this list.

When updating a financial aid package (View > Financial Aid > Packaging > Edit), you can select a values from a list of packaging statuses. The form shows only packaging statuses where "Allow Manual Change" is selected if the campus has a Packaging Status Promotion Method defined (SyCampus.FaPackStatusPromoID is not null).

The current packaging status from the FaStudentAY record (FaStudentAy.FaPackStatusID) is displayed on the list regardless of how the "Allow Manual Change" flag is set.

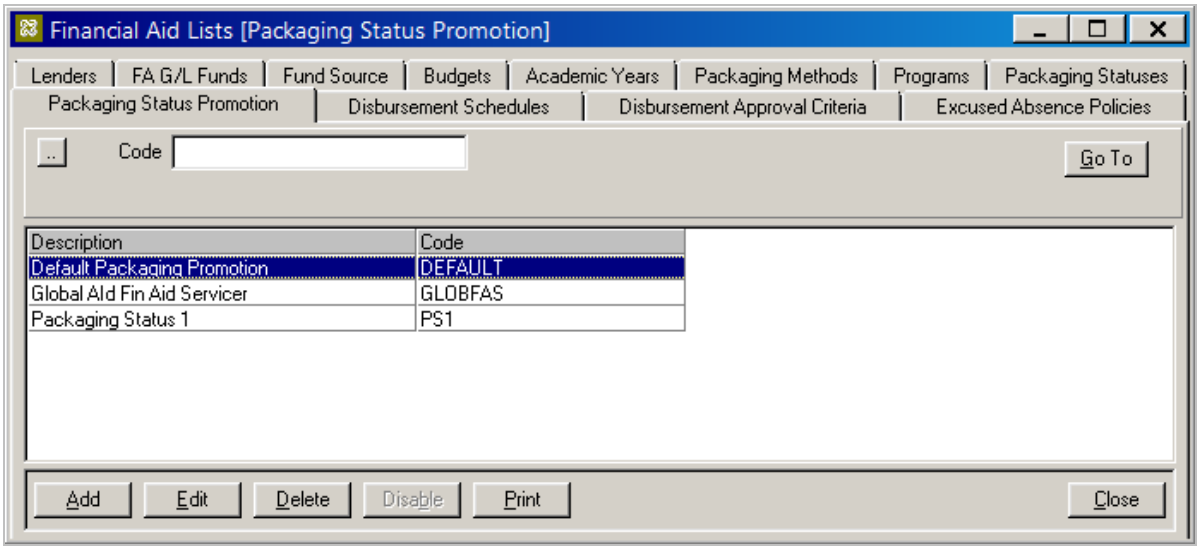
Auto Status Promotion

CampusNexus Student runs a job every two minutes during which it evaluates each financial aid package touched since the last run and determines which packages to update automatically. The following actions can result in a financial aid package's status being automatically recalculated and updated:

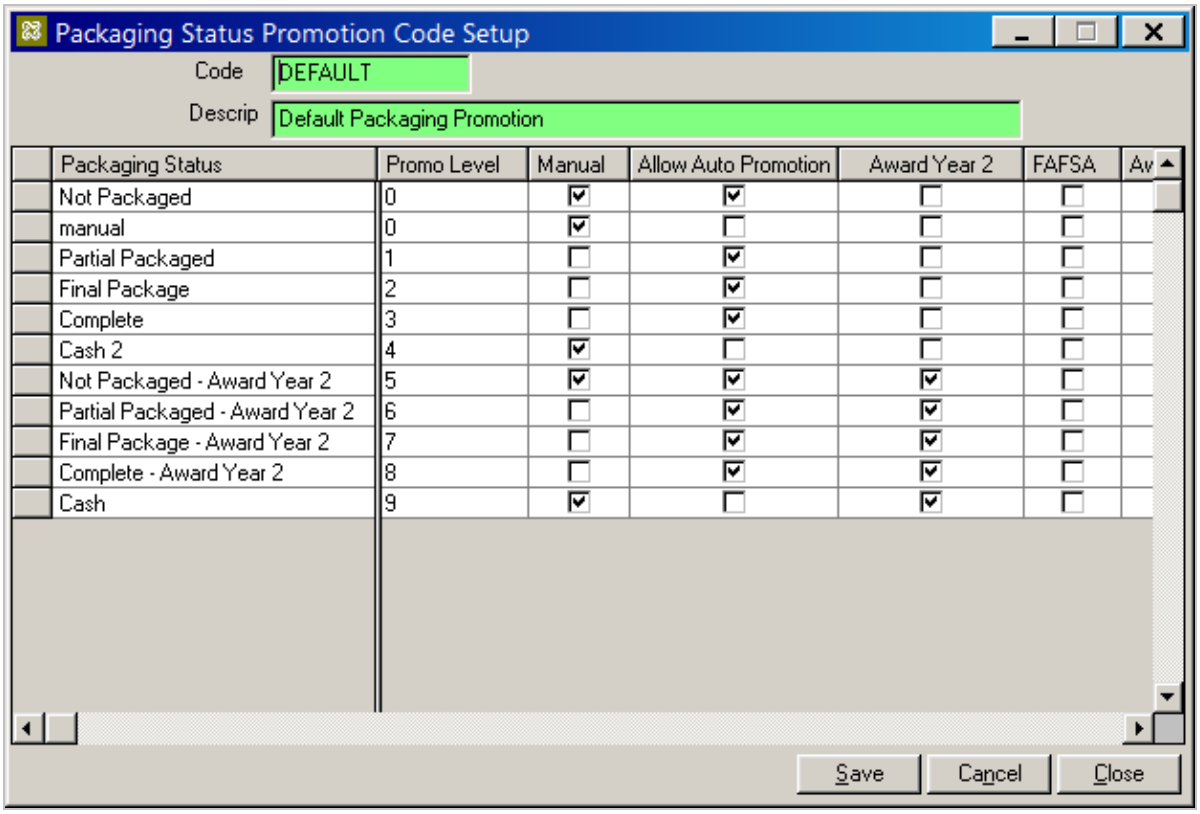
- User clicks Save in the Financial Aid Academic Year form.
- User changes the ISIR Verification Status and clicks Save on the Financial Aid Packaging form.
- User clicks Save after adding or editing a Funding Source on the Financial Aid Packaging form.
- User Deletes a Funding Source on the Financial Aid Packaging form.
- User Deletes a Funding Source on the Payment Schedule Setup form.
- User clicks Finish in the Approve Packaged Aid form.
- User Saves or Deletes a Document Attachment in the Document Attachment form.
- User clicks Save in the Document List Details form.
- User clicks Save or selects Yes to Ready to Send in the FAFSA Results form.
- User Imports an ISIR file on the Import ISIR File form.
- User clicks Save in the Document Tracking form.
- User clicks Save in the Attendance Recording form.
- User adds an Award Year 2 in the drop-down list on the Financial Aid Academic Year form.
- User performs Scantron procedure in the Scantron Services form to update attendance.

To add or edit a list of packaging status promotion codes:

1. Navigate to **Lists** > **Financial Aid**. The Financial Aid Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Packaging Status Promotion**.



3. Click ... to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Click **Add**, or select a record and click **Edit**. The Packaging Status Promotion Code Setup form is displayed. Use the horizontal scroll bar to see the entire list of check boxes.



5. Specify a unique **Code**.
6. Enter a **Description**.

7. For each Packaging Status, select options in each column. See Field Descriptions.
8. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

Field Descriptions

Field	Description
Packaging Status	Read-only: FaPackStatus.Descrip. You can create two sets of packaging statuses on Lists > Financial Aid > Packaging Statuses. One set of statuses applies to the first award year evaluation criteria. The second set applies to cross over students for the second award year packaging.
Promo Level	The promotion level determines the order in which statuses are evaluated for auto promotion. Statuses are evaluated from the highest promotion level to the lowest promotion level. A promotion level can be 0 or greater. If more than one status is set with the same promotion level, one cannot predict which is evaluated first. As statuses are evaluated from highest to lowest promotion Level, the first status encountered for which the package satisfies the selected criteria (see FAFSA, Award Letter, etc.) is the status to which the package is automatically set. If two statuses had the same criteria selected, and a package satisfies those criteria, the one with the higher promotion level is one that the package would be set to. Example usage of promotion level: • New (Not Packaged) = 1 • Partially Packaged = 2 • Packaged = 3.
Manual	This indicates if you are able to set this packaging status on the Student Academic Year form.
Award Year 2	Select this check box if the status belongs to the second award year.
Allow Auto Promotion	This indicates if this status is used in auto promotion. If this option is not selected, the remaining columns have no meaning and should be cleared. For a package to be set automatically to a new status, it must be currently set to a status that participates in auto promotion, as determined by the Allow Auto Promotion flag. The package can be set only to those statuses that are part of auto promotion. The columns from "FAFSA" on are conditions that can be required for auto promotion to select a status to which the package will be set. A status may be flagged as participating in auto promotion, but have no conditions required. In this case that status will never be selected as a status for a package (unless Reevaluate is not selected); however, auto promotion allows packages to be changed to another status from this status. **Note**: When a package evaluated for auto promotion meets none of the conditions specified for statuses that require conditions, and a new status has not been established as a result of the Reevaluate flag, the package is set to the NEW status.
FAFSA	Indicates that a FAFSA (EFC) must be calculated before the packaging status can be set.
Award Letter	Indicates that the award letter must be printed before the packaging status can be set. The FaStudentAY.AwardNoticePrinted is evaluated to determine if the award letter was printed.

Field	Description
ISIR Received	Indicates that a valid ISIR must be on file. The FaStudentPell.ISIRDateRecv is checked to see if a valid ISIR was received. The FaStudentPell.AwardYear must match the FaStudentAY.AwardYear1. The date can be anything other than a null value to satisfy this condition. The ISIR must not have Reject Codes on it to be considered valid. CampusNexus Student checks FaStudentPell.RejectCodes to determine this.
Verify Cleared	Indicates that if validation is required on the ISIR – it must be resolved FaStudentPell.VerifStatus <> "S". The FaStudentPell.AwardYear must match the FaStudentAY.AwardYear1 and the status must be anything other than "S" for this condition to be met.
Aid on File	If any FaStudentAid rows are found for the FaStudentAyID where the amount packaged is greater than zero, this condition is met. The Packaging Status Promotion Process applies a tolerance to the four packaging status promotion attributes listed below. The RBS tolerance level can be configured in the Tolerance Amount field on the Campus Information Setup form on the Financial Aid tab. The maximum tolerance limit is $1000. If the Tolerance Amount field is zero or remains blank, no tolerance is applied.
Aid > COA	If the sum of FaStudentAid.AmountPackaged is greater than or equal to the FaStudentAy.CostofAttend, this condition is met.
Aid > Inst Costs	If the sum of FaStudentAid.AmountPackaged is greater than or equal to the FaStudentAy.InstitutionalCharges, this condition is met.
Approved > COA	If the sum of FaStudentAid.AmountPackaged where the status equals "A" is greater than or equal to the FaStudentAy.CostofAttend, this condition is met.
Approved > Inst Costs	If the sum of FaStudentAid.AmountPackaged where the status = "A" is greater than or equal to the FaStudentAy.InstitutionalCharges, this condition is met.
Docs	All documents specified in the document list (CmDocTypeListID) are evaluated against the student's document folder. If the document(s) exist, the document must have a status that is approved for the condition to be met. If an Award Year specific document is defined in the document list and that document is in the student's document folder, the document is evaluated based on the Award Year defined on the document folder. The document must have a status that is approved for the condition to be met for the Award Year being evaluated.

Field	Description
Document List	If the "RequireFADocsReceived" column is 1 (true), select the document list to be used to verify that all documents are on file. This column contains a drop-down list of all the document lists that have been defined for financial aid. Lists > Contact Manager > Document Lists. Financial Aid automatic package status promotion evaluates the document list to see if the student has all listed documents Assigned and On File/Approved. • If the student is assigned any of the documents in the list and the documents are also On File/Approved, the packaging status is automatically changed to the next packaging status level (as set up in Lists > Financial Aid > Packaging Status). • If a student is Assigned any document in the document list, and one or more of the assigned documents is not On File, the packaging status is not automatically changed to the next packaging status level. • If the document is Award Year specific, the document is evaluated for the Award Year specified in the student's document folder. • If the document is Assigned and On File/Approved, the packaging status is automatically changed to the next packaging status level if the Award Year being evaluated matches the Award Year specified for the document. • If the Award Year specified for the document does not match the Award Year being evaluated, the packaging status does not promote. Double-click in the list box to select a document list or to close the list box.
Fund Source Types	Use this feature to set up a Package Status Auto Promotion scheme. If a student's financial aid package is made up of certain "cash-like" types, such as direct loans, you can specify the funding sources. Whenever the student's package, is re-evaluated, the Package Status is automatically updated if the funding sources include funding from ONLY the types specified in this form. Select the check box in this column to enable functionality in the Selected Fund Source Types list in the column immediately to the right. If you do not select this check box, you cannot choose a fund source(s).
Selected Fund Source Types	If the Fund Source check box to the left of this column is selected, click inside the Selected Fund Source Types field, and click . CampusNexus Student displays a list of all available fund sources. Use the check boxes to select all that apply. Click OK to save your selections and return to the Packaging Status Code Setup form. If you click Cancel, your selections are saved before CampusNexus Student returns to the Packaging Status Code Setup form.

Field	Description
Reevaluate	The Reevaluate flag sets "ratchet-points" below which the auto promotion logic does not promote packages. A reevaluate=0 means that even if the package no longer qualifies for this status, auto-promotion does not change the package's status from a higher promo level/status to one below this status that has reevaluate=0. Once a package reaches a status/promo level where the Reevaluate check box is not selected, it never falls below that promo level/status automatically. **Note**: Normally, statuses that are flagged to participate in auto promotion but that have no conditions specified for them are statuses that a package can be changed from, but not to. However, if such a status also does not have the Reevaluate option selected, a package that no longer meets any conditions specified by other statuses would be set to this status.

The table below illustrates a Packaging Status Promotion setup that applies to the different packaging statuses.

Packaging Status Promotion Setup

Packaging Status	Promo Level	Manual	Allow Auto Promotion	Award Year 2	FAFSA	Award Letter	ISIR Rcvd	Aid on File	Docs
Not Packaged	0	X	X						
Partial Packaged	1		X		X				
Final Package	2		X		X	X	X		
Complete	3		X		X	X	X	X	X
Cash	4	X							
Not Packaged - AY 2	5	X	X	X					
Partial Packaged - AY 2	6		X	X	X				
Final Package - AY 2	7		X	X	X	X	X		
Complete - AY 2	8		X	X	X	X	X	X	X
Cash 2	9	X		X					

Note:

Two sets of statuses are necessary to differentiate crossover students by the packaging status.

- The first set is used for the first award year defined on the academic year.
- The second set is used to determine the packaging status for crossover students where a second award year is defined on the academic year.

The two statuses work independently of each other therefore, it is not necessary to ensure all required elements for Award Year 1 be satisfied to allow the statuses for Award Year 2 to promote.

Financial Aid Lists [Programs]

Administrators can use the Financial Aid Lists [Programs] form to set up the FA parameters for your institution's program versions.

Programs must be set up under Lists > Academic Records > Programs before they appear on this list. You cannot add, delete, or disable programs on this list.

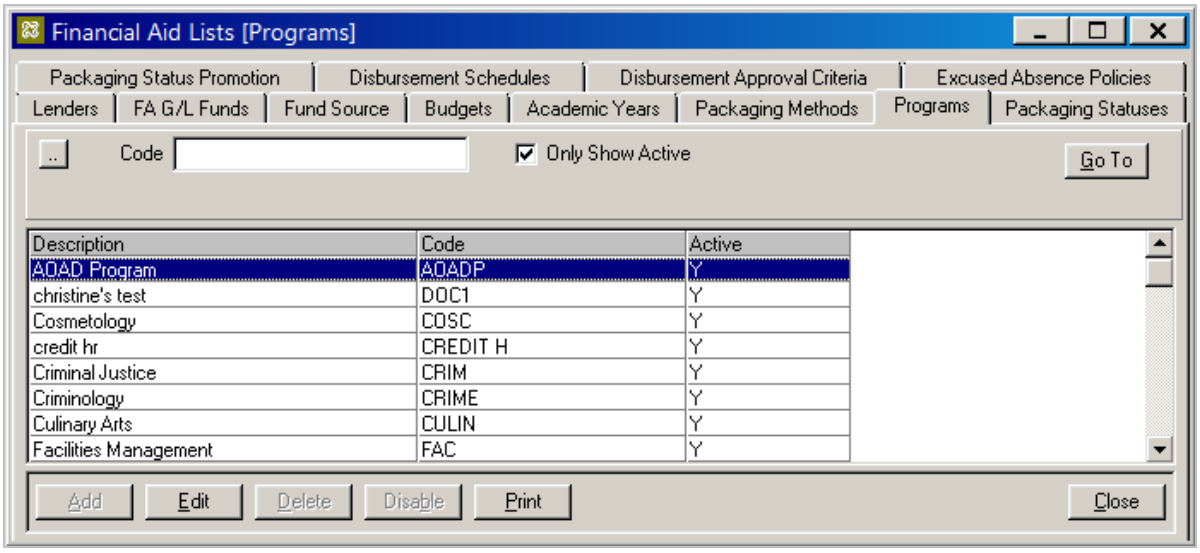
The Financial Aid Lists [Programs] form captures the total program costs and the number of terms in an academic year (if applicable). The total program costs fields are displayed on this form regardless of the billing method specified for the program. These fields are: Total Tuition Cost, Total Books/Supplies Cost, and Total Other Cost. The values of these fields come from AdProgramVersion.TotalTuitionCost, TotalBooksSuppliesCost, and TotalOtherCost tables.

The enrollment status (full time, three-quarter time, half time, less than half time, and so on) also plays a role in the program setup.

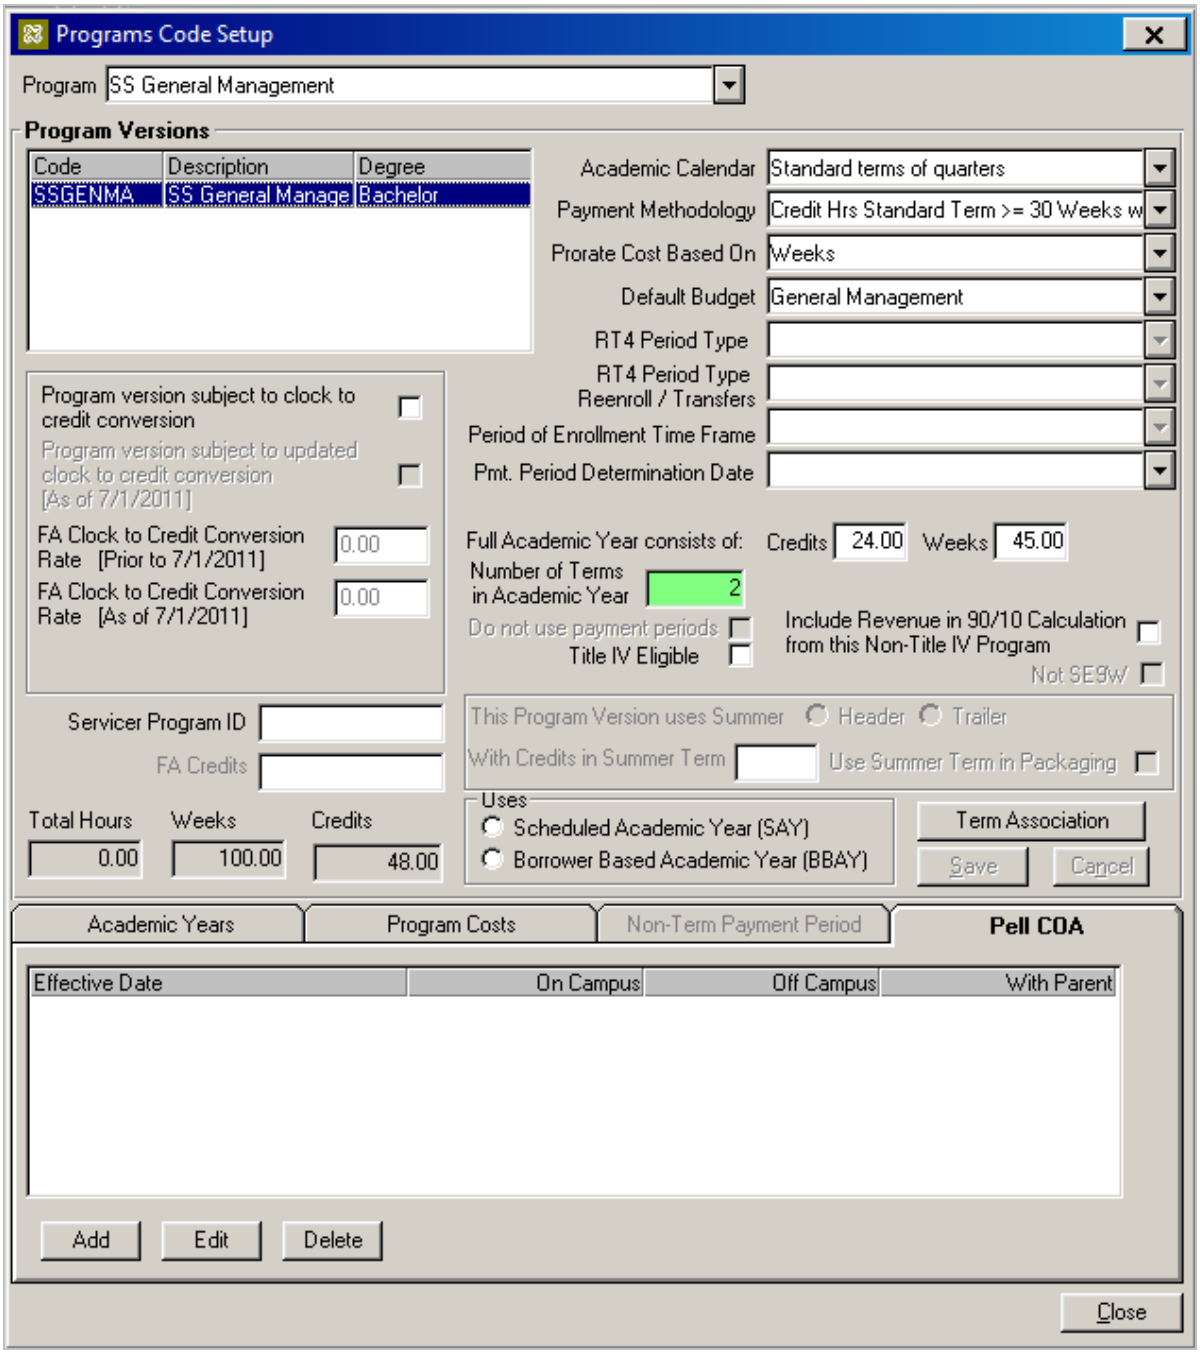
Note: An academic year is generally equivalent to the freshman, sophomore, junior, or senior year. In institutions where part time students are admitted, there are variations of the traditional academic years. The Department of Education defines academic years based on the way your institution's terms are set up (semesters, trimesters, quarters, clock hours, etc.).

To add or edit a list of FA program codes:

1. Navigate to **Lists** > **Financial Aid**. The Financial Aid Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Programs**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Click **Add**, or select a record and click **Edit**. The Programs Code Setup form is displayed.



6. Select the **Program** and **Program Versions**. Version Information is displayed for your selections.
7. Specify data for the program version. See Field Descriptions.

Field Descriptions

Field	Description
Program	Select a program.

Field	Description
Program Versions	Select a program version to view the related data on the form. If you edit program version information on the Programs Code Setup form, click **Save** before closing the form.
Total Hours	Total contact hours for the program version.
Weeks	Total weeks of instruction for the program version.
Credits	Total credits required to complete the program version.
FA Credits	The field is used to measure progression and adjust Academic Year and Loan Period sequences if the total FA credits for a program version is different than the Academic Credits. This field is available for programs configured to use Academic Calendar 6 if "Allow Course to be exempt from Progression" is enabled.
Academic Calendar	Select one of the following options: • 1 Credit hours - non-standard terms • 2 Credit hours - standard terms of quarters • 3 Credit hours - standard terms of semesters • 4 Credit hours - standard terms of trimesters • 5 Clock hours • 6 Credit hours without terms These options correspond to calendar options required by the Department of Education. A default academic calendar for each campus is set up under **Setup** > **Campus Locations**. **Note**: If **Academic Calendar 1 - Non-standard terms** is selected, the **Payment Period SAP** check box only is displayed if Term or Cumulative AND Payment Period is selected as the SAP mode for Academic Calendar 1. When the Payment Period SAP check box is selected on the Program (Lists > Financial Aid > Programs), SAP based on Payment Period evaluates students in those programs. See also SAP System Level Configuration and Satisfactory Academic Progress. 
Field	Description
Payment Meth-odology	Select an option from the list. • 1 – Credit hour with standard terms in which Fall through Spring terms equal or exceed 30 weeks, or equal or exceed academic year with waiver (AC: 2,3,4) • 2 – Credit hour with standard terms in which Fall through Spring terms are less than 30 weeks without waiver (AC: 2,3,4) • 3 – Credit hour with standard or non-standard terms (AC: 1-4) • 4 – Clock hour or Credit Hour without terms (AC: 5,6) • 5 – Nonresidential portion of programs offered by correspondence without terms (AC: 1-4,6) The options on this list vary depending on the Academic Calendar selected above. A default payment methodology for each campus is set up under **Setup > Campus Locations**.
Prorate Cost Based On	Choose whether the tuition cost for budgets shall be calculated using Weeks or Credits when the budget's 'Institutional Charges Calculation Method' is equal to 'Calculate from Total Program Cost'.
Default Budget	Select a default budget for the program version from a list of the budgets configured. The Default Budget consists of institutional costs, but not housing costs. The COA is the Default Budget plus the costs of housing, based on Housing Status.
RT4 Period Type	This list is enabled if the program version has a non-traditional academic calendar (non-standard terms, clock hours or credit hours without terms). The Return of Title IV Funds calculation is always calculated for a defined time frame. This defined time frame is the Title IV payment period or period of enrollment the student was attending when the student withdrew from school.
RT4 Period Type Reen-roll / Trans-fers	This list is enabled if the program version has a non-traditional academic calendar (non-standard terms, clock hours or credit hours without terms). The Return of Title IV Funds calculation is always calculated for a defined time frame. This defined time frame is the Title IV payment period or period of enrollment the student was attending when the student withdrew from school.
Period of Enrollment Time Frame	This list is enabled for non-traditional academic calendars with a period of enrollment type. The start and end dates can be based on the program (P) or the academic year (A). The Period of Enrollment start and end dates are validated as follows: • The period end date must be greater than the period begin date. • The period begin date must be greater than or equal to the student's start date. • The period end date must be less than or equal to the student's expected graduation date.

Field	Description
Pmt. Period Determination Date	Select one of the following options: • LDA • Date of Determination • NSLDS Withdrawal Date The selected option determines the date that used to evaluate whether the student has attended a payment period when the student is moved to the "Permanent Out" Status category. It automatically generates an origination change to adjust the Loan Period End Date (**Setup > Financial Aid > Direct Loan Setup**). If 'Auto create Loan Period Orig. Changes when student Withdraws or Refunds is posted?' is activated, and a student is withdrawn from a program version, the date value configured for this field is used as the date to evaluate whether the student has attended a payment period after the initial payment period on the Direct Loan. If the student does not show any attendance, an origination change is created to adjust the Loan Period End Date to exclude that payment period from the Loan Period.
Full Academic Year consists of:	**Credits**: Enter the number of credits required in the academic year. **Weeks**: Enter the number of weeks of instruction in the academic year. The Higher Education Reconciliation Act (HERA) provision modifies the academic year definition by reducing the minimum 30 weeks of instructional time for programs measured in clock hours to 26 weeks. The minimum 30 weeks academic year definition remains in effect for term and non-term credit hour programs. **Number of Terms in Academic Year**: Enter the number of terms in an academic year. If you selected Clock Hours or Credit hours without terms under Academic Calendar AND Clock Hr/Credit Hr without terms under Payment Methodology, two additional fields are displayed: • **Number of payment periods:** Enter the number of payment periods for this academic year. • **Title IV Loan payment periods:** Enter the number of Title IV Loan payment periods for this academic year.
Do not use payment periods	For a non-term program version, this check box prevents the creation of payment periods on the academic year. When Academic Calendar 1 is selected, this check box is disabled.
Include Revenue in 90/10 Calculation from this non Title IV Program	Select this check box to indicate that funds received to pay charges for non Title IV eligible programs are included as revenue in the 90/10 calculation. This check box is only enabled for Programs with a Program Version configured with a Program Type of 'Non-Degree' (Lists > Academic Records > Programs > Add/Edit > Versions > Add/Edit > Program Type).

Field	Description
Auto recalculate budgets	This field is enabled for program version configurations that use Academic Calendar 5 or 6. When the program version for the enrollment has "Auto recalculate budgets" selected in conjunction with the budget assigned to the Academic Year configured to "Use Monthly Amounts" and the Institutional Charges Calculation Method is set to "Use Amounts Entered Here", CampusNexus Student can automatically recalculate budget amounts based on instructional weeks (IW) that occur between the Academic Year and Loan Period dates. The amounts on the budget are multiplied by the value contained in the "IW Months" field to populate values in the budget section of the Academic Year. Locked academic years and loan periods should not be recalculated. The program version report accessed from Lists > Financial Aid > Programs can be filtered to only include program versions configured to recalculate the budget so that you can determine program versions enabled for this functionality.
Not SE9W	This field is enabled for program version configurations that use Academic Calendar 1. Select this check box if the program version is Non SE9W. • If this box is selected, Pell will use terms as the payment period • If this box is selected, direct loans will use payment period/loan periods and not terms • If this box is cleared, Pell will use terms as the payment period • If this box is cleared, direct loans will terms as the payment period **Note**: An SE9W program is a credit-hour program with nonstandard terms, all substantially equal in length, and each of those terms is at least 9 weeks of instructional time. Nonstandard terms are classified as substantially equal in length if no term in the loan period is more than 2 weeks of instructional time longer than any other term in that loan period.
Program version subject to clock to credit conversion	Select or clear this check box as required. The default is cleared (No). **Note**: When you select this check box, the Clock to Credit Conversion Rate filters on the Academic Years and Non-Term Payment Period tabs also become available.
Program version subject to updated clock to credit conversion (As of 7/1/2011)	This option is enabled only if you selected **Program version subject to clock to credit conversion**. It allows you to indicate that the program version is also subject to the updated conversion rate for students enrolling into the program (having a Program Version start date) on or after July 1, 2011. Select or clear this check box as required. The default is cleared (No). **Note**: When you select this check box, the updated conversion rate is included in the Clock to Credit Conversion Rate filters on the Academic Years and Non-Term Payment Period tabs. If you do not select this option, the existing Clock to Credit rate that is configured will continue to be used for program versions on or after July 1, 2011. This would be the proper configuration for programs that are exempt from the updated clock to credit conversion rate.

Field	Description
FA Clock to Credit Conversion Rate (Prior to 7/1/2011)	This field is enabled when the **Program version subject to clock to credit conversion** check box is selected. The number you enter in this field (typically 20 for quarter-based program versions and 30 for semester- or term-based program versions) is divided into the clock hours completed to get the FA credits completed. This field accepts decimal values to the hundredths (second position to the right of the decimal point).
FA Clock to Credit Conversion Rate (As of 7/1/2011)	This field is enabled when the **Program version subject to updated clock to credit conversion (As of 7/1/2011)** check box is selected. This option allows you to enter an updated clock to credit conversion rate that will be applicable to all students enrolling into the program (having a Program Version start date) on or after July 1, 2011. The number you enter in this field (typically 25 for quarter-based program versions and 37.5 for semester- or term-based program versions) is divided into the clock hours completed to get the FA credits completed. This field accepts decimal values to the hundredths (second position to the right of the decimal point).
Total Out of Class Coursework Hours	This field is only visible when **Program version subject to clock to credit conversion** is selected. You can enter any positive value with one decimal point. When you click 'Save', a warning message is displayed if the Financial Aid Hours from the courses which exist in the Program Version Course list are not equal to the Total Financial Aid Hours configured on the Program Version (total Hours + outside Coursework Hours). This warning message contains Yes and No options. If you select 'Yes', the value is saved in the database; if you select 'No', the value is not saved in the database
Servicer Program ID	If you are using a Financial Aid servicer such as Global, you will have a program ID that is recognized by the servicer. 1 to 16 characters. The Servicer Program ID identifies the program to the servicer. It can include the program code used by the servicer to identify this program, or a Q or S determined by semester or quarter hours when the program is subject to the clock to credit conversion, or any other designator the servicer would like to have. This data is extracted in the Academic Extract files on each students detail record. Contact your servicer for questions on these issues.

<table>
<tr><th>Field</th><th>Description</th></tr>
<tr><td>Uses</td><td>
You can configure a Program Version to use Scheduled Academic Year (SAY) or Borrower Based Academic Year (BBAY). The Program Version can only be configured to use the SAY option if the academic calendar year is 2, 3, or 4. If the academic calendar year (Non standard Terms) is 1, 5, or 6, institutions must use BBAY, in which case the SAY option will be disabled.

If you select SAY, This Program Version uses Summer Header or Trailer becomes enabled. Selecting the Header or Trailer option will then enable With Credits in Summer Term and Use Summer Term in Packaging options. These options allow you to configure a program version to use the Summer Header or Trailer. and to specify the number of default credits to be awarded in a Summer Term as a Header or Trailer, with the ability to choose packaging in the Summer. If you select a Summer Header or Trailer option, and then decide not to use the option, you can clear your selection by using the Delete key.

The number of credits in the Summer term is an optional entry. If summer credits are not provided, the existing SAY logic will determine the number of credits in the Summer Term (i.e., full credits in the Academic Year will be divided by the total number of terms in the Academic Year, including the Summer Term). If summer credits are provided, the Total Academic Year credits will be the Full Academic Year credits added to the Summer credits.

Note:
1. When enrolling into a Program that is configured for SAY (Lists > Academic Records > Term), terms in the Enroll Student wizard will be filtered with Standard Terms. In addition, based on the academic year selected, the 'Number of Terms in Academic Year' entry will be restricted to the corresponding terms in the SAY (as shown in the example below).

Scheduled Academic Year Example
<table>
<tr><th>Academic Calender</th><th>Terms</th></tr>
<tr><td>Semesters</td><td>2</td></tr>
<tr><td>Trimesters</td><td>2</td></tr>
<tr><td>Quarters</td><td>3</td></tr>
</table>
2. When SAY is selected, Academic Years do not need to be associated with the Program Version. If Academic Years are attached, they are ignored because the Academic Year is created based on the 'Full Academic Year consists of' configuration on this form.
3. The Credits and Weeks fields (in the 'Full Academic Year consists of:' field) need to be populated for the Academic Year creation process to function properly.

Use the Term Association button to do the following:
• Associate terms and program versions
• Build the Academic Years based on this association
• Preview the term and program version association structure
• Copy a program version's term association data to all other program versions listed under the same program.

Note: The Term Association button is enabled only if the academic calendar year is 1 (non-standard term SE9W), 2, 3, or 4.
</td></tr>
</table>

Packaging for SAY with the Summer Term as Header or Trailer

The Financial Aid Packaging process, including Auto-Packaging, Batch-Packaging, and FA-Estimates, includes the Scheduled Academic Year (SAY) with the Summer Term as Header or Trailer. When packaging for SAY, the number of disbursements and Title IV amounts are calculated based on the SAY with the Summer Term Header or Trailer. The Summer term as Header or Trailer considers only fund sources marked Award in Summer.

Correct Number of Disbursements

The following guidelines are used to determine the correct number of disbursements.

Guidelines to Determine the Number of Disbursements

Selection	Start Term	Number of Disbursements	Disbursement Start Date
Semesters Fall and Spring with a Summer Trailer and Package for Summer	Fall	Three disbursements in the SAY	Disbursement 1 - Fall term Disbursement 2 - Spring term Disbursement 3 - Summer term
	Spring	Two disbursements	Disbursement 1 - Spring term Disbursement 2 - Summer term
	Summer	One disbursement for Summer Trailer	Disbursement 1 - Summer term
Semesters Fall and Spring with a Summer Header plus Package for Summer	Summer	Three disbursements in the SAY	Disbursement 1 - Summer term Disbursement 2 - Fall term Disbursement 3 - Spring term
	Fall	Two disbursements	Disbursement 1 - Fall term Disbursement 2 - Spring term
	Spring	One disbursement	Disbursement 1 - Spring term

Selection	Start Term	Number of Disbursements	Disbursement Start Date
Quarters Fall, Winter, and Spring with a Summer Trailer plus Package for Summer	Fall	Four disbursements in the SAY	Disbursement 1 - Fall term Disbursement 2 - Winter term Disbursement 3 - Spring term Disbursement 4 - Summer term
	Winter	Three disbursements in the SAY	Disbursement 1 - Winter term Disbursement 2 - Spring term Disbursement 3 - Summer term
	Spring	Two disbursements in the SAY	Disbursement 1 - Spring term Disbursement 2 - Summer term
	Summer	One disbursements in the SAY	Disbursement 1 - Summer term
Quarters Fall, Winter, and Spring with a Summer Header plus Package for Summer	Summer	Four disbursements in the SAY	Disbursement 1 - Summer term Disbursement 2 - Fall term Disbursement 3 - Winter term Disbursement 4 - Spring term
	Fall	Three disbursements in the SAY	Disbursement 1 - Fall term Disbursement 2 - Winter term Disbursement 3 - Spring term
	Winter	Two disbursements in the SAY	Disbursement 1 - Winter term Disbursement 2 - Spring term
	Spring	One disbursement in the SAY	Disbursement 1 - Spring term

Correct Award Amount

The following guidelines are used when determining the award amount for SAY with a Summer Header or Trailer plus the Package for Summer selected.

Maximum Limit / Terms Student will attend in AY

Semesters Summer Header/Trailer

- Title IV Grants: Amount configured on Packaging Method / 3
- Title IV Loans: Maximum Loan Limit based on Grade Level / 3

Quarters Summer Header/Trailer

- Title IV Grants: Amount configured on Packaging Method / 4
- Title IV Loans: Maximum Loan Limit based on Grade Level / 4

Correct Pell Amount

The following guidelines are used in determining the Pell amount for Summer Header or Trailer.

Semesters

- Maximum limit based on Summer enrollment status / 2

Quarters

- Maximum limit based on Summer enrollment status / 3

Correct Summer Enrollment Status

Summer enrollment status is calculated based on summer credits configured for the Program Version.

Total Pell award = Regular Pell + Summer Pell and if total Pell is more than AY maximum limit, then Pell record year around eligibility flag is checked.

- Existing logic in determining award amounts and number of disbursements is intact for SAY without Summer header or trailer.

Academic Year Creation Process including Summer Term as Header or trailer

The Enrollment wizard logic now includes the Summer Term as Header or Trailer in the Academic Year creation process, matching the start and end dates with the Summer Header or Trailer when configured. If the Summer Term as Header or Trailer is not configured, the logic for Academic Year creation remains as before.

For SAY, Student Academic Years are created based on total credits calculated and the number of terms in the academic year and the credits in the full academic year. Terms are calculated based on the SAY academic calendar, the Semester and Trimester based academic calendar has two terms, and the Quarters based academic calendar has three terms, plus with the Summer Header or Trailer, four terms. Using this configuration, Student Academic Years will be created until all the credits are assigned.

For a student who is enrolled with transfer credits, the total credits for the program that the student is being enrolled into are reduced by the number of the transfer credits.

Academic Years

Enrollment Status: Select an enrollment status option. These options correspond to the Department of Education requirements.

Academic Year List: This is a list of academic year setups that have already been completed. Click **Add** to add a new academic year or click **Edit** to edit a listed AY.

Term Association

Term Association lets you select and associate Terms and Program Versions with Uses set to SAY and BBAY when building the academic years.

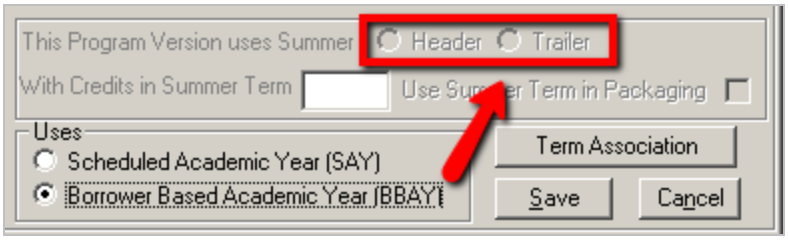
Term Association can be used with program versions with an Academic Calendar 1 (non-standard term SE9W) setting.

Note: When the Term Association button is selected, the SAY and BBAY options under Uses are disabled.

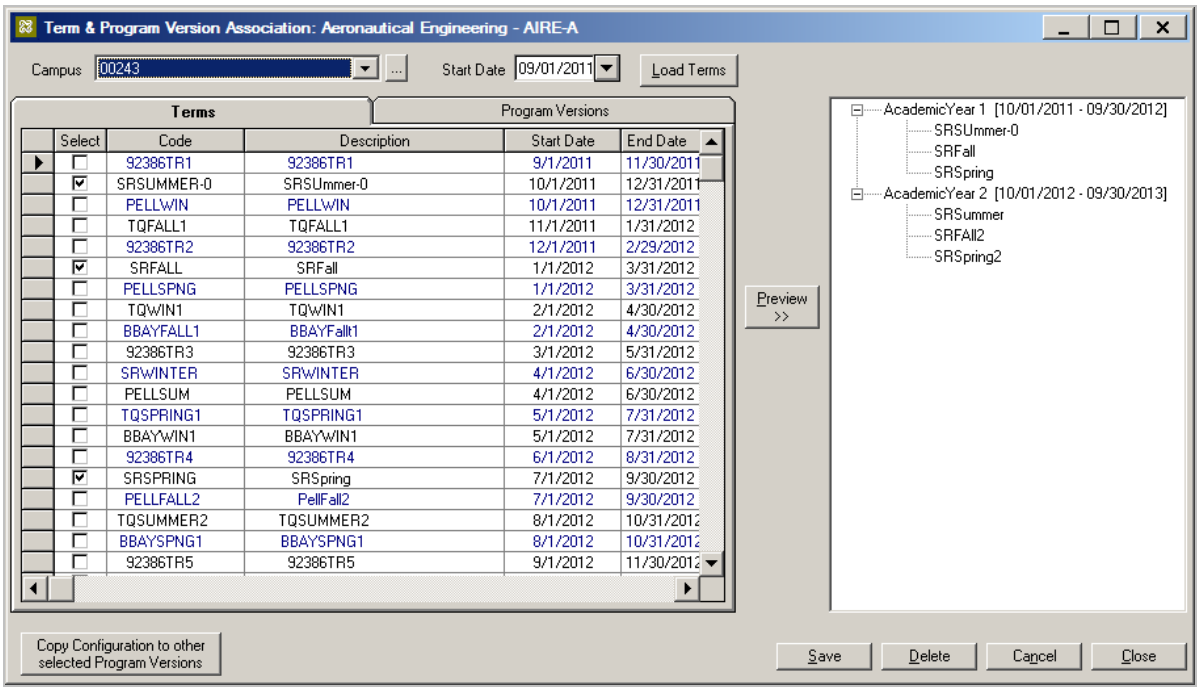
Using the Term Association configuration is necessary for term based program versions in CampusNexus Student to determine Loan Period and Academic Year dates which are required to be accurately reported to COD, NSLDS under guidance provided in Dear Colleague Letter (DCL) GEN-13-13. Institutions that choose not to use the Term Association feature will be responsible for manually managing and adjusting Loan Period and Academic Year dates to ensure regulatory compliance required under GEN-13-13. This includes processes such as Gainful Employment and SSCR.

Term Association lets you select and associate Terms to Program Versions for building the academic years (AY). The Uses options for SAY and BBAY allows the Term Association logic to identify the pattern to use for building AY sequences from the configured standard terms.

Note: If you select BBAY, the Header and Trailer option buttons are disabled in the summer header and trailer section.



If you created Academic Years using the Academic Years tab on the FA Program setup up form and created Academic Years using Term Association, the data in the Term Association form takes precedence.



To associate terms and program versions and build an academic year:

1. In the **Campus** list, select the applicable campuses. The Campus list is populated with all the campuses that the selected program version is associated with.
2. Select the **Start Date**. Start Dates are configured under Lists > Academic Records > Start Date.

   Note: The displayed start dates are related to only those campuses that the selected program version is associated with. For example, if a Start Date is related to a campus that is not associated with the selected program version, that Start Date is not displayed in the list.

   All the terms that belong to the selected program version and campuses are loaded in the Term tab. A term that is not shared between the selected campuses is not selectable (as indicated by the asterisks)..

   The Terms displayed are filtered based on the Academic Calendar selected. For example, if a program is set to Standard terms of Semesters or Trimesters you will only see terms that have been identified as semester or trimesters in Lists > Academic Records > Terms.

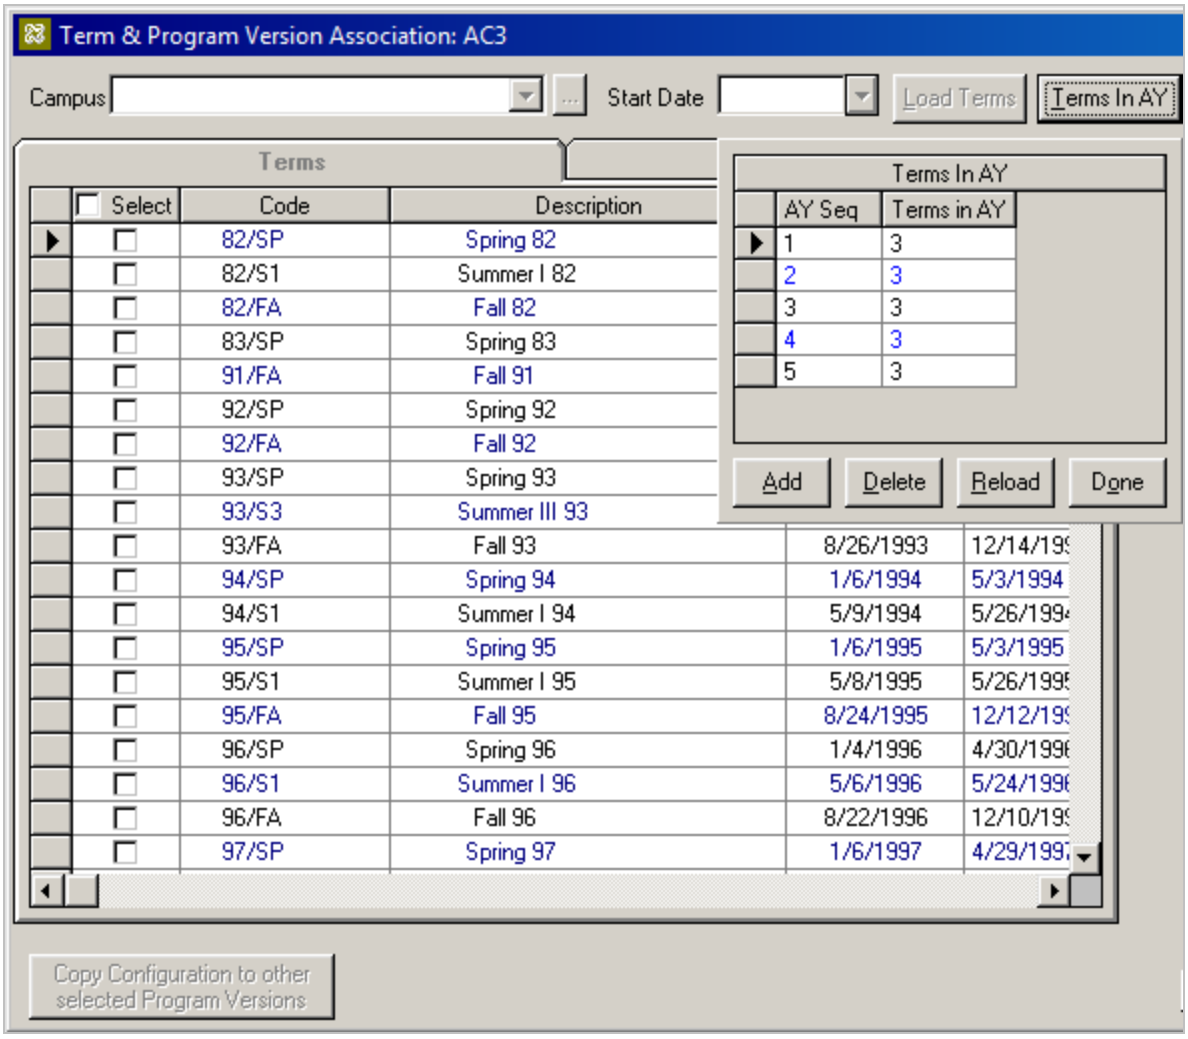
   - If the Academic Calendar is Standard terms of quarters, you will only see terms setup as quarters when selecting term association.
   - If your Program uses only summer trailers, you will only see Terms set up as summer trailers.
   - If your Program uses only summer headers, you will only see Terms set up as summer headers.

   Note: The same filtering is applied, if the Uses is set to BBAY. However, you will see all summers, as the concept of summer header or trailer in BBAY does not exist.

   If you have multiple term and program version configurations stored in the database, the form always lists the term and program version association data for the first Start Date, by default.

   If the Academic Year is configured as non-standard terms, the **Terms in AY** button appears. Selecting this button displays the number of calculated academic year sequences that will be created and enables the user to modify the number of terms for each academic year sequence. It also enables a value to be modified to a value less than the number of terms in a full Academic year and allow the additional academic year sequences, if needed.

   Note: The Delete button will not remove any academic year sequence past the minimum calculated needed to complete the program version based on the student attending full time for each term.



Note: It is recommend that the terms do not over lap.

3. In the Term tab, select all the terms that you want, and click **Preview**. The Preview button lists the academic years along with the terms that you've selected.

   The number of terms listed under each academic year are based on the Academic Calendar type. For example if you select Standard terms of semesters in the Academic Calendar list with a summer header or trailer, the maximum number of terms each academic year has listed is three.

   The academic years are built based on the following data from the selected program version:

   - Academic Calendar (type)
   - Academic year Credits, Weeks
   - Number of terms in the academic year
   - Number of credits in a Summer Term
   - Total Hours, Weeks, Credits in the program version

   Note: The academic years listed in the Preview pane may vary from the actual student academic years based on the student's Start Date and any transfer credits.

   Note: The Academic Years configured are validated to ensure they are always a complete Academic Year based

on the selected Start Date term. For example, if you select a Spring Start date for a Program Version using SAY, the Fall term prior to that Spring is displayed and must be selected to build a complete first Academic Year for Direct Loan purposes. But the enrollment process will only build the terms on or after the Start Date selected, so the Fall term will be ignored within that process. All subsequently configured Academic Years are also validated to ensure they are configured to contain the expected terms.

Academic Year Configuration

Academic Year	Summer	Term
Semester/Trimester	No Summer Term	Fall, Spring
Semester/Trimester	Summer Header	Summer, Fall, Spring
Semester/Trimester	Summer Trailer	Fall, Spring, Summer
Quarters	No Summer Term	Fall, Winter, Spring
Quarters	Summer Header	Summer, Fall, Winter, Spring
Quarters	Summer Trailer	Fall, Winter, Spring, Summer

For non-standard term program versions, the academic years are created from the number of terms per sequence within the Terms in AY grid.

4. Click **Save** to store the term and program version association data, or **Delete** to clear the values and start over.

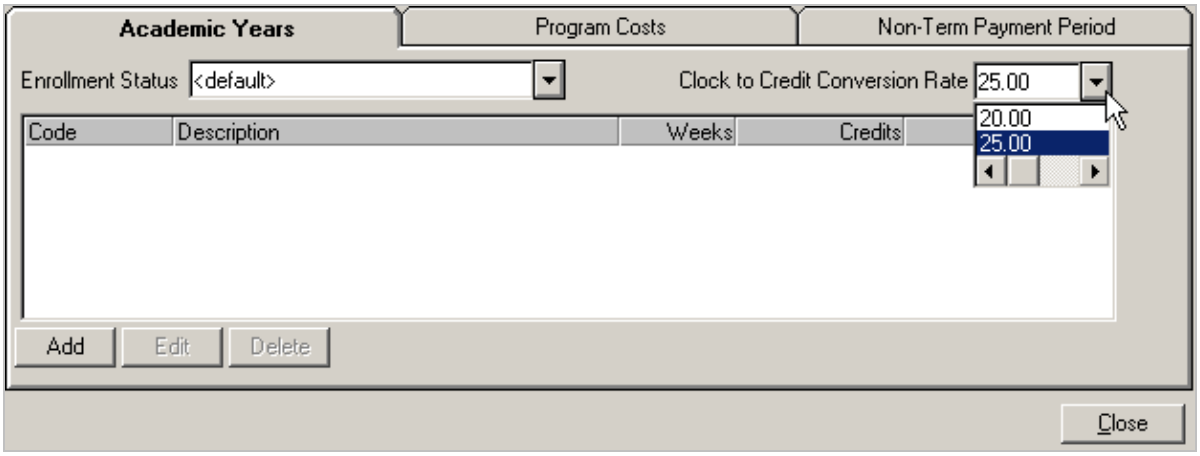
   When you click **Save**, the **Copy Configuration to other selected Program Versions** button will be enabled. This button will be disabled if term and program version association data does not exist.

   Note: You can only copy configuration to other programs that share the same academic calendar. The programs must share the same academic calendar if it includes the use of summer header or trailer.

5. In the **Program Versions** tab, select a program version to copy its term association data to all other program versions listed under the same program.

Academic Years tab

When working with the **Academic Years**, first select the **Enrollment Status**. You can use the **<Default>** if the academic years apply to all enrollment statuses (full time, 3/4 time, half time, etc.).



During the enrollment process, CampusNexus Student populates the applicable budget columns in the Student's Academic Year table if a default budget has been specified for any of the academic years defined for the program version in which the student is being enrolled. One of the steps that occur when a student is enrolled is population of the Student's Academic Year table with one record for each academic year defined for the program version. The academic years defined for each program version are stored. If the Budget ID column contains a value, the budget costs are calculated and updated in the applicable fields in the student's Academic Year table.

Note: If an updated FA Clock to Credit Conversion Rate (As of 7/1/2011) has been added to the configuration, the program academic year configuration can use the updated rate and the academic years can be filtered based on the conversion rate.

The new logic compares the Program Version Start Date of the student to the effective date to ensure that the proper clock to credit conversion rate is used. Once the conversion rate is selected, CampusNexus Student builds the Academic years that are configured for that rate.

To add or edit a new Academic Year to a Program

The **FA Program Academic Year** form allows a default budget to be specified. If a default budget is selected, this budget will be used for any student in this program version being packaged for the specified academic year. The caption for the new field is "Default Budget". The drop-down list for this field will be generated from the FA Budget table.

1. Click **Add** to add a new academic year to your program, or select an existing line on the AY grid and click **Edit** to view or change it. The Financial Aid Program Academic Year form is displayed.

   CampusNexus Student displays Program version, A/Y Sequence, and Enrollment Status from the previous form.

2. Select a **Default Budget** for the selected Academic Year.
3. Select the AY **Definition**. The AY description is displayed.

   Note: To add a new academic year definition, click **New** to open the Financial Aid Academic Year Definitions form.

4. Enter the number of **Hours In A/Y** and the number of **Terms in A/Y**.
5. Click **Save** to save the academic year data.
6. Financial Aid Program Academic Year form: Click **Close** to close the form.
7. Program Code Setup form: Click **Close** to close the form.

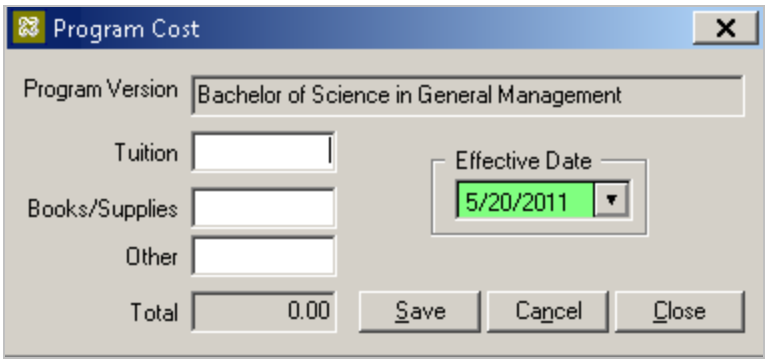
Program Costs Tab

Budget Tuition (Total Program Cost) - CampusNexus Student displays data in this field if the program budget is set up for option B - Calculate from Total Program Costs.

Budget Other (Total Program Cost) - CampusNexus Student displays data in this field if the program budget is set up for option B - Calculate from Total Program Costs.

Budget Books/Supplies (Total Program Cost) - CampusNexus Student displays data in this field if the program budget is set up for option B - Calculate from Total Program Costs.

1. Select a program in this tab and click **Add**, **Delete** or **Edit**.
2. Fill in the Program Cost form.



Program Version - Read-only.

Tuition, Books/Supplies, Other - Type in these costs.

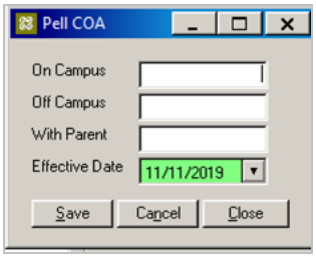
Effective Date - Select the effective dates for the tuition and books/supplies components of budgets on program versions. This feature enables program versions to have multiple tuition and books/supplies amounts if needed.

3. Click **Save** (in the Program Version box) to save changed data.

Pell COA Tab

You can configure a Pell cost of attendance (COA) instead of using a calculated Pell COA. The value will be displayed on the Awards form in the Need Analysis grid by matching the housing status on the student's academic year with the corresponding housing status configured here.

1. Select a program in this tab and click **Add**, **Delete** or **Edit**.
2. Fill in the Pell COA form.



Note: When you click Edit for an existing program, the fields will be populated by the current configured Pell amounts.

On Campus - Enter amount if student lives on campus.

Off Campus - Enter amount if student lives off campus.

With Parent - Enter amount if student lives with parents.

Effective Date - Select the effective date for the Pell components of budgets on program versions. This date will be compared to the students Academic Year start date to determine if it will be used.

3. Click **Save**.

Non-Term Payment Period tab

The configuration options available on this tab help set the payment period parameters that will be evaluated within the Disbursement Approval Criteria of the auto disbursement feature. The concept of payment period in the FA Program Setup form is strictly payment period time-frame estimations. The settings here do not define the actual Title IV payment periods that are

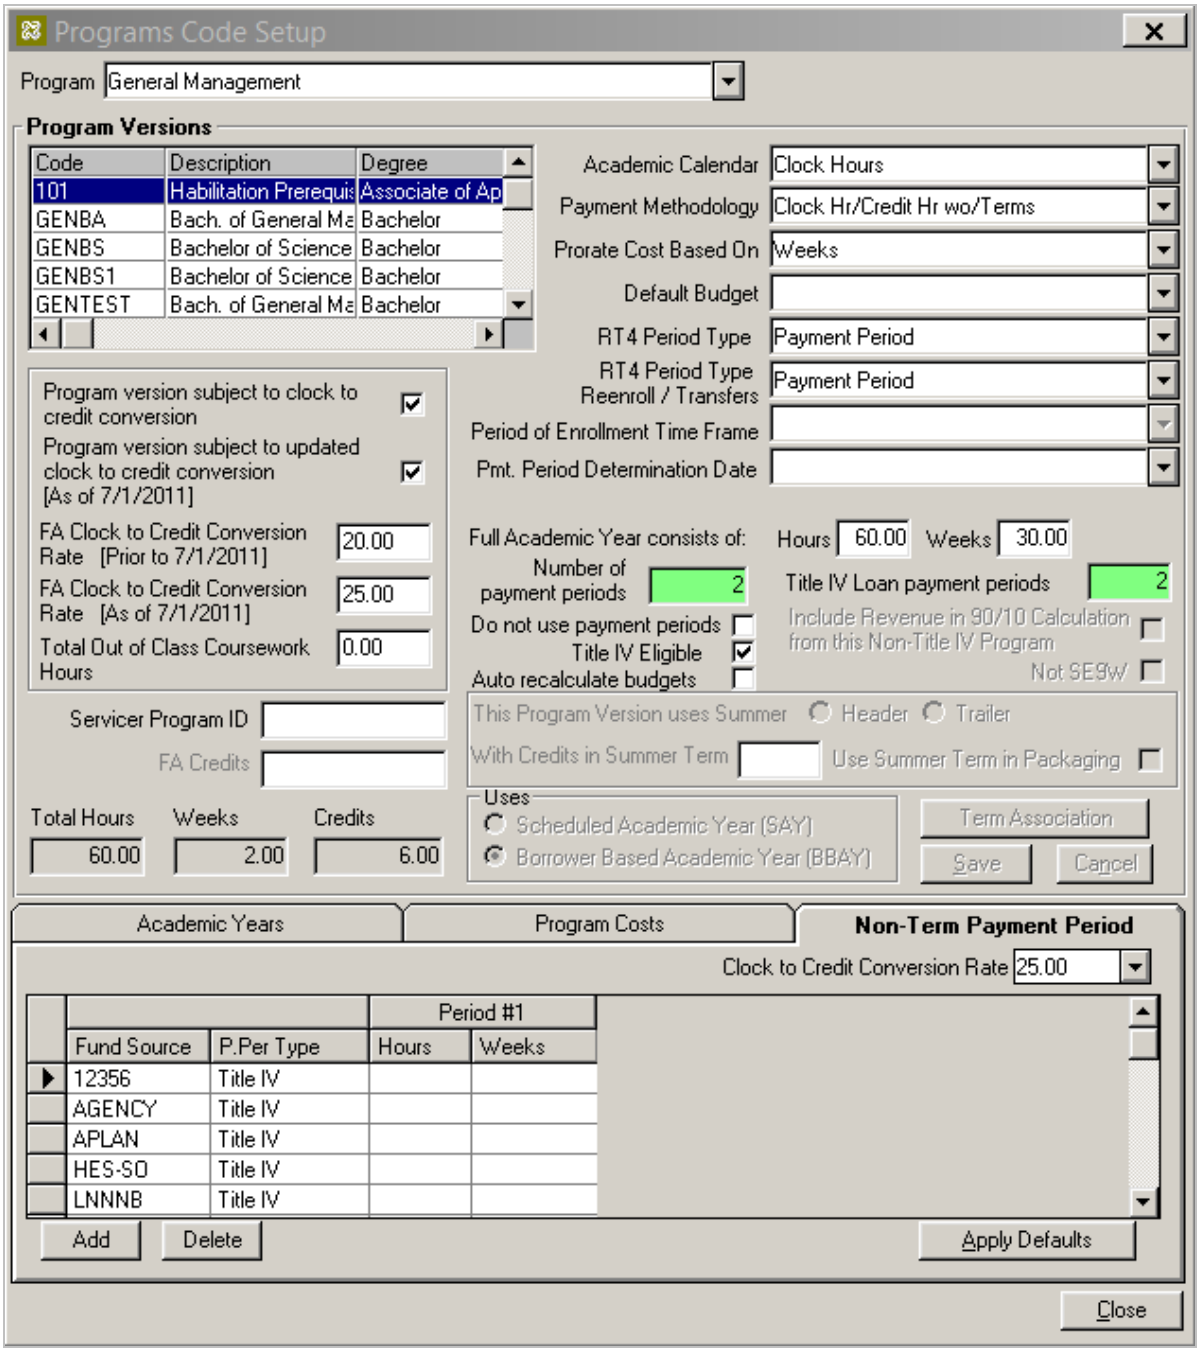
visible in students' Award forms. The Title IV payment periods visible in the Award form is a built-in calculation within CampusNexus Student, depending on the program's academic year settings. See Title IV Payment Periods for more information on this topic.

The number of credits or hours defined for each fund source in the grid indicate the minimum number of credits or hours students must achieve within the given payment period time-frame, estimated by the number of weeks entered, to receive awards for the select fund source. The hours or credits values entered here are evaluated as Disbursement Approval Criteria in the auto disbursement approval feature.

You can make changes with this tab under the following conditions:

- **Academic Calendar** is configured and set to **Clock Hours** or **Credit hours without terms**.
- **Payment Methodology** is configured and set to **Clock Hr/Credit Hr wo/Terms**.

The tab displays the payment periods for the Academic Year, with a separate column assigned to each payment period. The number of columns displayed must match the number of payment periods entered in the **Number of payment periods** field just above this section. For example, if you enter "3" in this field and then click **Apply Defaults**, three columns are displayed:



These columns are also used for the non Title IV non-loan payment periods. This list excludes Work Study and Cash awards. Click **Add** to add columns. Click **Delete** to remove columns.

The **Number of payment periods** field has a dual purpose. First, this field initially fills the grid below the **Non-Term Payment Period** tab with the number of columns indicated in that field. For example, if you indicate three payment periods, this grid will fill with three columns. This field also indicates the number of payment periods for Pell, SEOG, ACG and SMART grants.

The configuration options for **Full Academic Year consists of: Hours** and **Weeks**, the two payment configuration values, plus the weeks specified for each payment period in the grid in the lower half of the form help set the payment period parameters that will be evaluated within the Disbursement Approval Criteria of the auto disbursement feature. The concept of payment period in the FA Program Setup form is strictly payment period time-frame estimations. The settings here do not define the actual Title IV payment periods that are visible in students' Award forms. The Title IV payment periods visible in the Award form is a built-in cal-

culation within CampusNexus Student, depending on the program's academic year settings. See Title IV Payment Periods for more information on this topic.

The number of payment periods for Title IV loans may differ from all other loan types. The **Number of payment periods** represents the number of payment periods for non Title IV loan awards and all Title IV awards besides Title IV loans. The **Title IV Loan payment periods** field represents the number of payment periods within each academic year for Title IV loans only.

The number of credits or hours defined for each fund source in the grid indicate the minimum number of credits or hours students must achieve within the given payment period time-frame, estimated by the number of weeks entered, to receive awards for the select fund source. The hours or credits values entered here are evaluated as Disbursement Approval Criteria in the auto disbursement approval feature.

Note: You cannot display fewer columns than the **Number of payment periods** field display. For example, if you have entered '3' into that field, you cannot display fewer than three columns.

If the **Academic Calendar** is set to **Clock Hours**, this tab displays **Hours and Weeks** under the **Period** columns. If the **Academic Calendar** is set to **Credit hours without terms**, then two columns appear below each period, **Credits and Weeks.**

Note: When an Academic Calendar 6 (Credit Hours without Terms) program version is selected, the **Credits** field/column MUST have a non-zero value. The system prevents an AC6 program from being saved if there is a non-zero value in the **Credits** field.

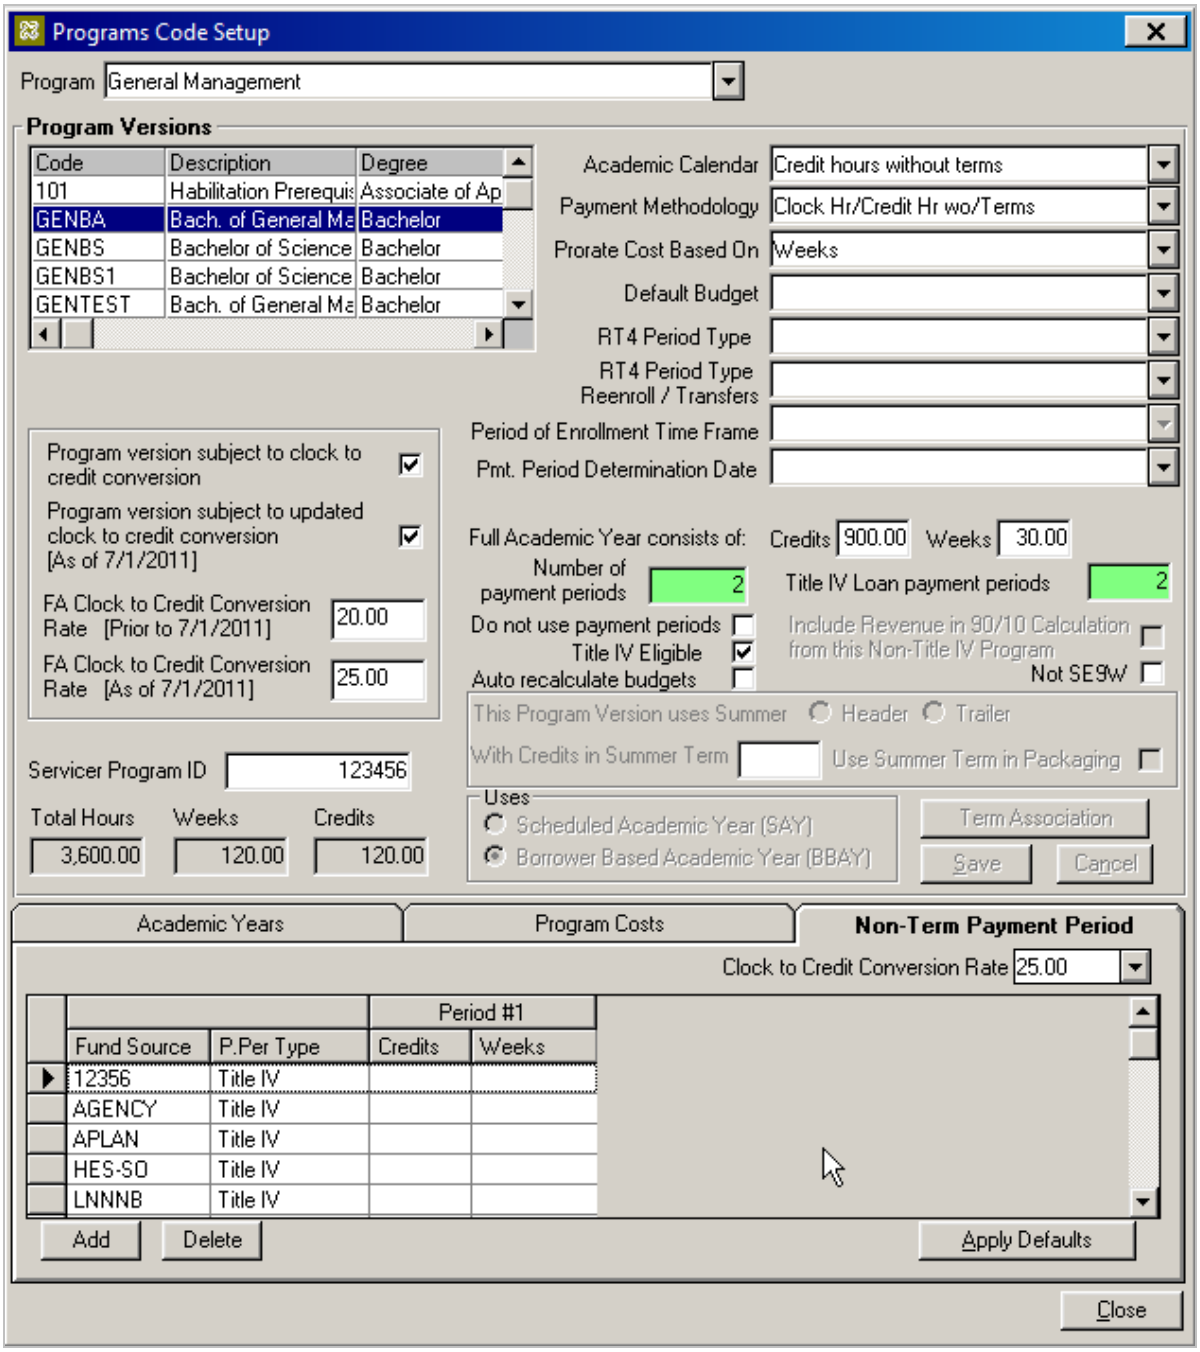
The **Do not use payment periods** check box enables you to select whether you would like to use Title IV in the **P Per Type** (Payment Period Type) column on the Non-Term Payment Period tab.

- If this column is designated as Title IV and the **Do not use payment periods** check box is cleared, then selecting this check box will display a message inquiring if you would like to set all entries in the grid to "Do Not Use". If you select Yes, then the **P Per Type** column will auto-populate with Do Not Use; likewise, if you select No, the column will remain as is.
- If this column is designated as Do Not Use and the Do not use payment periods check box is selected, then deselecting this check box will display a message inquiring if you would like to set all entries in the grid to "Use Title IV". If you select Yes, then the P Per Type column will auto-populate with Title IV; likewise, if you select No, the column will remain as is.

Note: When the Program Version is saved, the totals of the fields contained under the Period columns will be verified against the program totals listed for the Program Version. An error message is displayed and the save will be cancelled.

For example when the Academic Calendar is set to Clock Hours, if the sum of the Hours and Weeks in the Payment Period columns do not equal the Total Program Hours and Weeks, an error message is displayed. After acknowledging the error message, the Weeks (or Hours) in the Payment Period columns must be changed so that their sum will match the Total Program Hours or Weeks.

Likewise when the Academic Calendar is set to Credit hours without terms, the sum of the Weeks and Credits in the Payment Period columns will be compared against the Total Weeks and Total Credits for the Program Version.

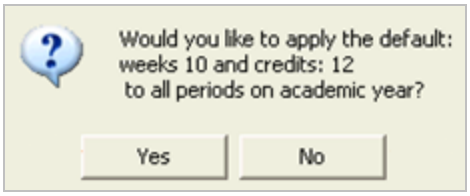


Note: This grid displays **only** non Title IV, non Cash and non-Work study fund sources.

1. Click **Add** to add columns.

   Note: When Add is clicked, the fields change from the default setting of blank and fill with zeros.

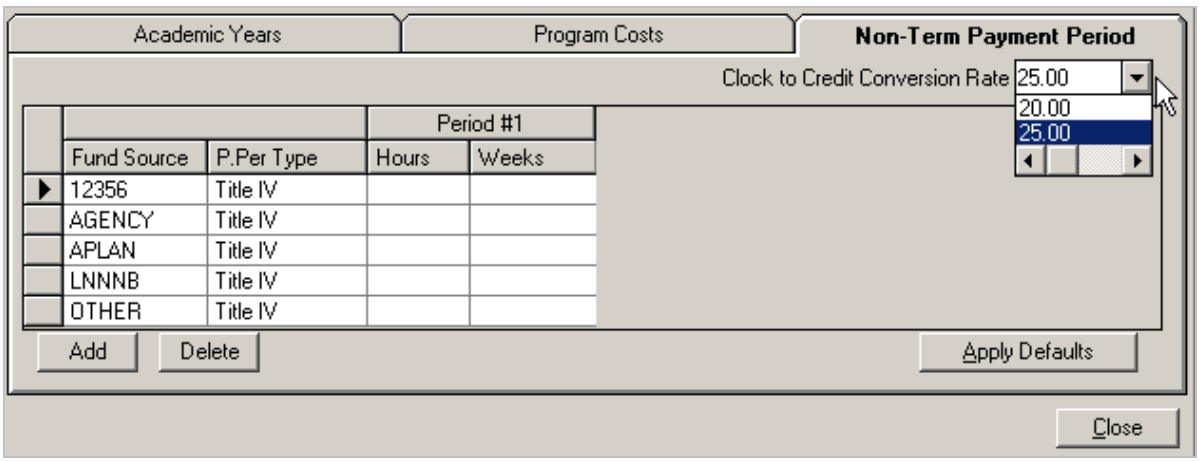
2. Click **Apply Defaults** to use pre-filled values in the grid. A new dialog box is displayed asking if you want to apply the default weeks and credits to all periods on an academic year.



Clicking **Yes** will fill the grid in with these predefined values.

Note: If an updated FA Clock to Credit Conversion Rate (As of 7/1/2011) has been added to the configuration, the non-term payment period configuration can use the updated rate and the non-term payment periods can be filtered based on the conversion rate.

With the multiple Clock to Credit conversion rates, you can configure different payment periods based on the Clock to Credit rate.



Example: Full Formula Conversion of Clock Hours to Semester Hours

Institutions are responsible for validating that they are not overawarding credit when converting clock hours for courses requiring out-of-class work that is customized for each course. The example presented here -- based on guidance provided by the Department of Education (ED) on the Full Formula options for clock to credit conversions -- will help institutions ensure that they do not enter hours that are too high for the base (in-class) hour value.

Scenario

A program with 720 clock hours consists of:

- Five (5) classroom courses with 120 clock hours each, and
- A 120 clock-hour externship with no out-of-class student work

The institution determines that:

- For the first three classroom courses, a student generally is required to perform 40 hours of out-of-class work for each course, and
- The last two classroom courses have eight (8) hours of out-of-class work for each course

Using the Full Formula option:

- Conversion is based on both clock hours and out-of-class work to determine the maximum allowable credit hours
- Several outcomes are possible, depending on the institutional policy for rounding (if rounding, always round down course-by-course):
  22.026, 22, 21 semester hours

	In-class clock hours		Allowable out-of-class prep hours	Total clock and prep hours	Semester hours	Semester hours (rounded)	Sem. Hrs. (Alternative rounding)	Notes
Course #1 (40 hours of actual out-of-class student work)	120	+	7.5 * 4 = 30	150	4	4	4	(A), (C)
Course #2 (40 hours of actual out-of-class student work)	120	+	7.5 * 4 = 30	150	4	4	4	(A), (C)
Course #3 (40 hours of actual out-of-class student work)	120	+	7.5 * 4 = 30	150	4	4	4	(A), (C)
Course #4 (8 hours of actual out-of-class student work)	120	+	8	128	3.413	* 3	3.4	(B), (D)
Course #5 (8 hours of actual out-of-class student work)	120	+	8	128	3.413	* 3	3.4	(B), (D)
Externship (no out-of-class student work)	120	+	0	120	3.2	* 3	3.2	(E)
						* All fractions are rounded down, even if greater than .5		
Total clock hours and out-of-class student work (amount not relevant) must look at each course				826				
Total semester hours if no rounding					22.026			
Total semester hours if rounding (must round down any fractions to ensure no overawards)						21	22	

NOTES:

Limitation: the rules do not allow more than 7.5 hours of out-of-class prep for every 30 hours in class

(A) 120 in-class hours divided by 30 hours = 4 — There are 10 hours of out-of-class prep per 30 clock hours (40/4 = 10), but cannot have more than 7.5 (4 * 7.5 = 30)

- Must meet thirty clock-hour minimum
- Is no carry over of out-of-class work between courses

(B) 120 in-class hours divided by 30 hours = 4 — There are 7.5 or fewer hours of out-of-class prep per 30 clock hours (8/4 = 2), so use actual hours of out-of-class prep (8)

- Use all out-of-class work for courses #4 and #5
- Have more than 30 clock hours per semester hour

Semester hours per course

(C) 150 total clock and prep hours divided by 37.5 = 4

(D) 128 total clock and prep hours divided by 37.5 = 3.413

(E) 120 total clock hours divided by 37.5 = 3.2

- Calculate semester hours based on total clock hours and allowable prep hours per course

Lists > Student Accounts

When you navigate to Lists > Student Accounts, the Setup - Student Accounts Lists form is displayed. Add, edit, delete, disable, and print Student Accounts lists from the following tabs:

- Account Statuses
- Bank Codes
- Billing Methods
- Cash Drawers
- Cash Payment Descriptions
- Course Refund Policies
- Credit Card Types
- Drawdown/Return Sources
- Earnings Methods
- Programs
- Refund Policies
- Subsidiaries
- Term Group
- Transaction Codes
- Tuition Discount Policies

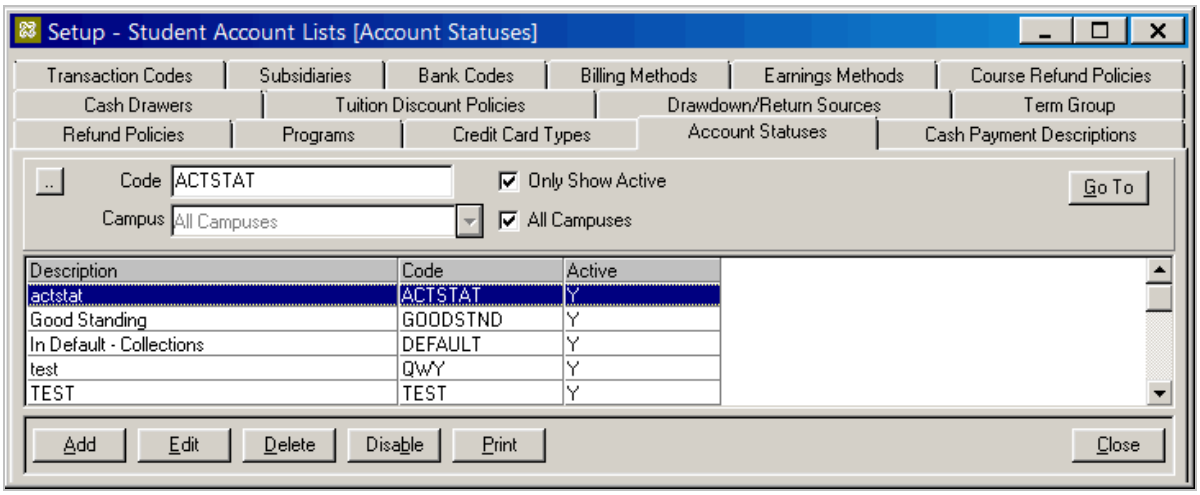
See Maintaining Lists for instructions on adding, editing, deleting, disabling, enabling, and printing lists.

Setup - Student Account Lists [Account Statuses]

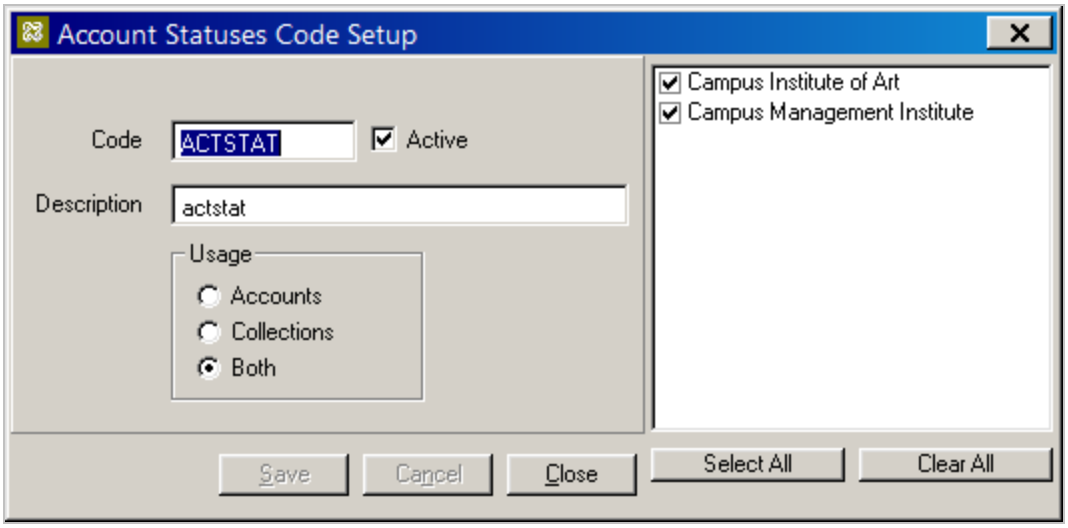
The Account Statuses list defines account and collections statuses (Legal, Bankruptcy, Sold Receivable, Write Off, Collection, and so on) to the Ledger Card. This enables you to track internal collections, external collections, and high risk collection groups within the application. You can define a list of statuses and assign statuses to the student's Ledger Card.

To add or edit a list of account statuses codes:

1. Navigate to **Lists** > **Student Accounts**. The Setup - Student Accounts Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Account Statuses**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Account Statuses Code Setup form is displayed.



7. Specify a unique **Code**.
8. Enter a **Description**.
9. Select one or more **Campuses**.
10. Select or clear the **Active** check box to designate the record as active or inactive, respectively.
11. In the Usage section, select:
    - **Accounts** if the account status is only used to indicate an account status.
    - **Collections** if the account status is only used to indicate a collection status.
    - **Both** if the account status is used as an account status and/or a collection status.
12. Click **Save** to save the changes (or click **Cancel** to discard the changes). Click **Close** to close the form.

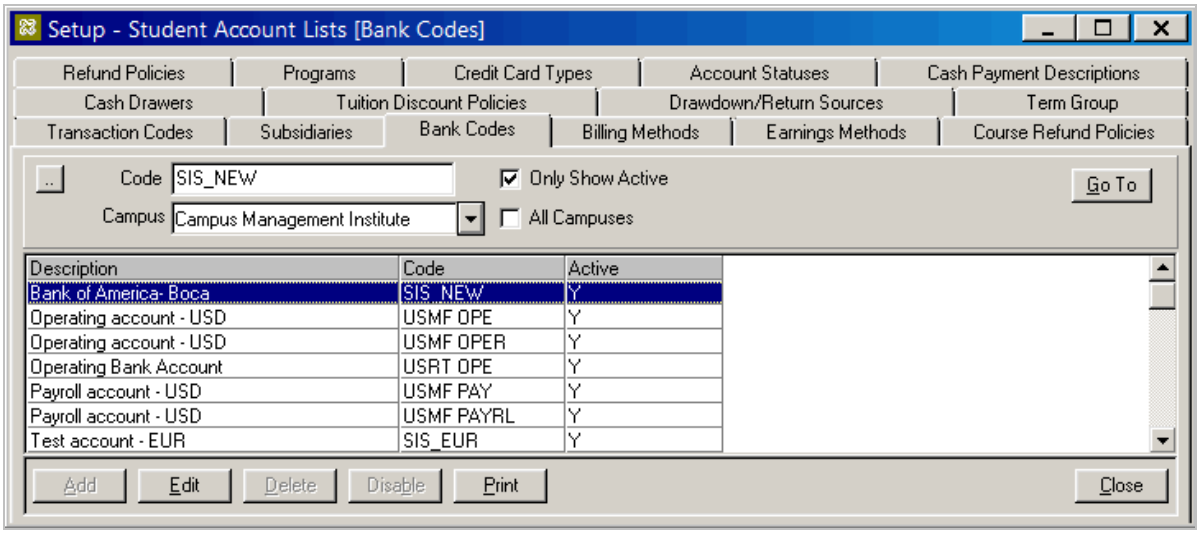
Setup - Student Account Lists [Bank Codes]

Use the Setup - Student Account Lists [Bank Codes] form to identify the banks with which your institution does business. You can set up multiple accounts in each bank. Each bank account is related to a general ledger account number for posting transaction activity. You can set up separate debit and credit accounts for stipends so that you do not have to use the same accounts as those used for refunds. You can also print a list of your banks and the accounts in each bank from the Setup - Student Account Lists [Bank Codes] form.

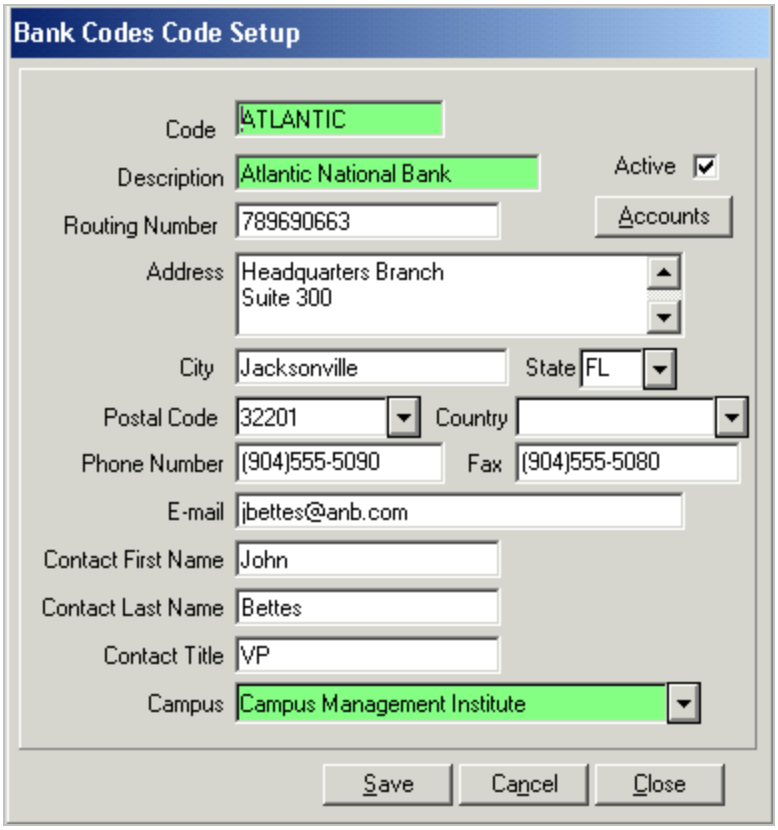
If your CampusNexus Student system is integrated with an accounting system, refer to CampusVue Finance, HR & Payroll or CampusNexus Finance, HR & Payroll for instructions on setting up bank accounts and bank codes.

To add or edit a list of bank codes:

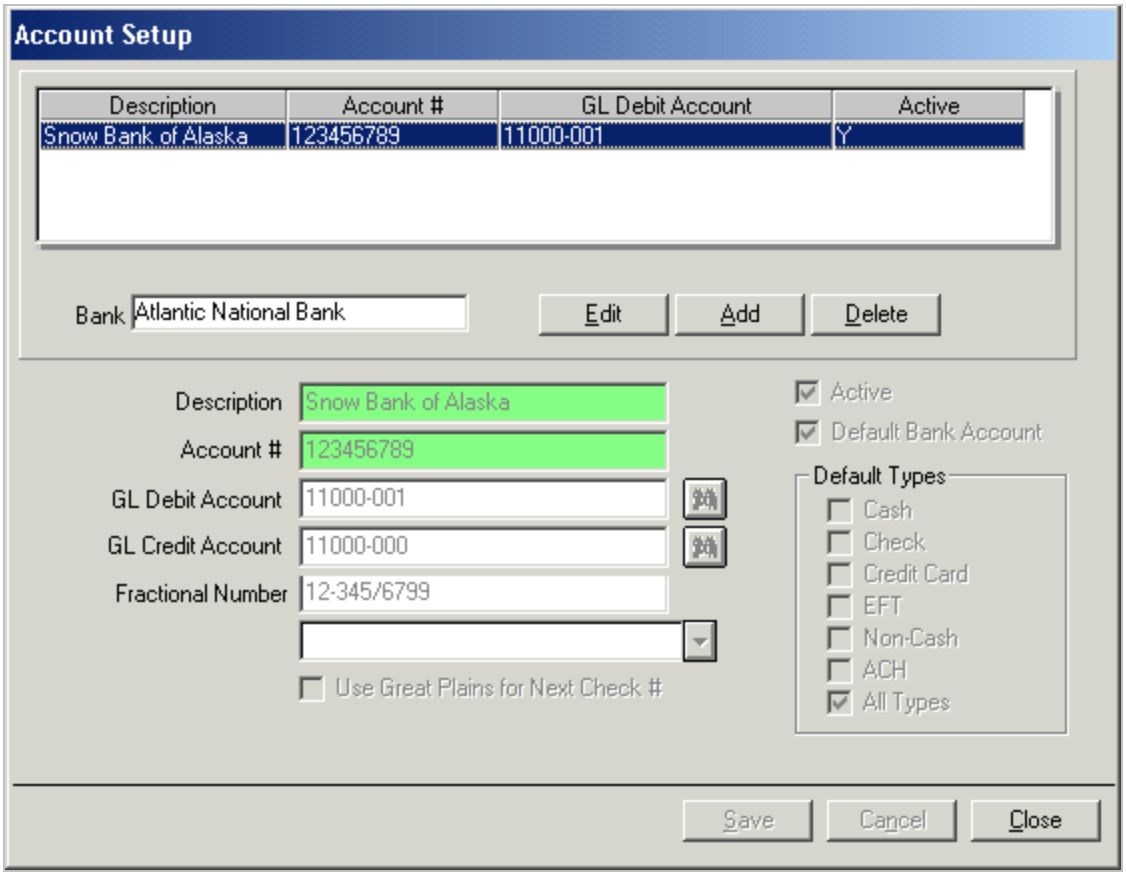
1. Navigate to **Lists** > **Student Accounts**. The Setup - Student Accounts Lists form is displayed.
2. Select the applicable **tab**, or click the **Go To** button, click and select **Bank Codes**.



3. Click to switch between Code and Description when searching for a record. Specify a **Code** or **Description** in the text box and press **Enter** to view the corresponding record in the list.
4. Select **Only Show Active** to view only active records. Clear this check box to view all records.
5. Select a **Campus** to view records only for a selected campus, or select **All Campuses** to view records for all campuses of your institution.
6. Click **Add**, or select a record and click **Edit**. The Bank Codes Code Setup form is displayed.

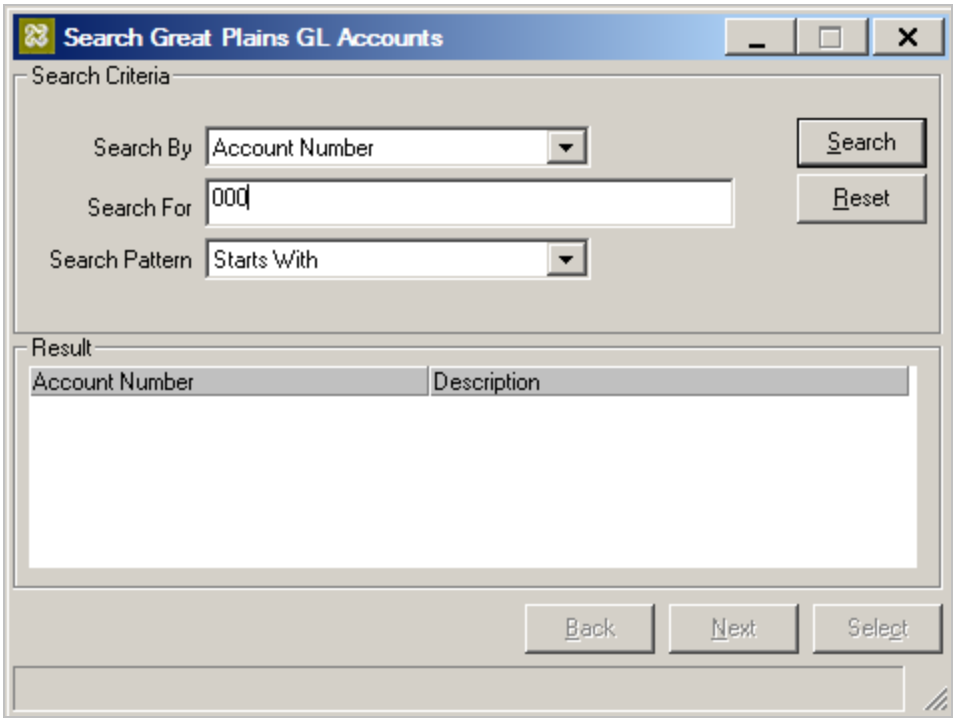


7. Specify the necessary data. If you add or edit a bank record, click **Save** before working with the account details. Be sure to select a campus.
8. Click **Accounts**. The **Account Setup** form is displayed. The grid on this form accommodates 28-character G/L account numbers. If necessary, resize the table columns.



9. To edit an account, select the account from the list and click **Edit**.
10. To add an account for the selected bank, click **Add**.
11. Enter a **Description**, **Account Number**, and related **General Ledger Account Numbers**.
    - If the Great Plains search feature is enabled, select a row, and click the **Great Plains Search** button to search for Debit Account or Credit Account numbers in the Great Plains GL.
        a. In the Search Great Plains GL Accounts form, click the **Search By** list. Search for GL Accounts using the **Account Number** or **Description**.

        Note: These searches also return Stipend Account information when you have set up separate debit and credit account numbers for stipends.



b. In the **Search For** field, enter the account number or description.

c. Specify the **Search Pattern**. The Search pattern works as follows:

- “Starts With” finds an exact match on data that starts with the characters you specify.

  Enter dashes when using this method. For example, if you have a mask that uses ###-####-## and you enter 0000, you will not get any matches. You must enter 000- or 000-0 to get matches, where the first four digits in the account number are zeros.

- "Contains" finds any value that contains what you have entered.
- "Wildcard" searching uses % for any string that follows what is entered. The "_" only replaces a single character.
- "Exact Match" must contain everything you enter. There cannot be additional characters before or after what was entered. If you are not sure of the exact wording, choose “Contains”.

d. Click **Search**. All GL Accounts that meet the specified criteria are displayed in the result grid.

Based on the value specified in the Max GP GL Account Search field, the results grid displays the data in one page or across many pages. If there are more records than the default number of rows, CampusNexus Student displays:

- Number of records displayed.
- Total number or records matched.
- A Next button to display the next records matched.

e. Double-click the applicable row, or click **Select** to add the account details to the Debit Account or Credit Account field.

f. Click **Save**. CampusNexus Student saves all records for all campuses that use Great Plains, that contain both a valid Debit and Credit Account or both the Debit and Credit accounts are blank. An

error message is displayed if any campus that uses Great Plains is using an incorrect Debit and/or Credit account.

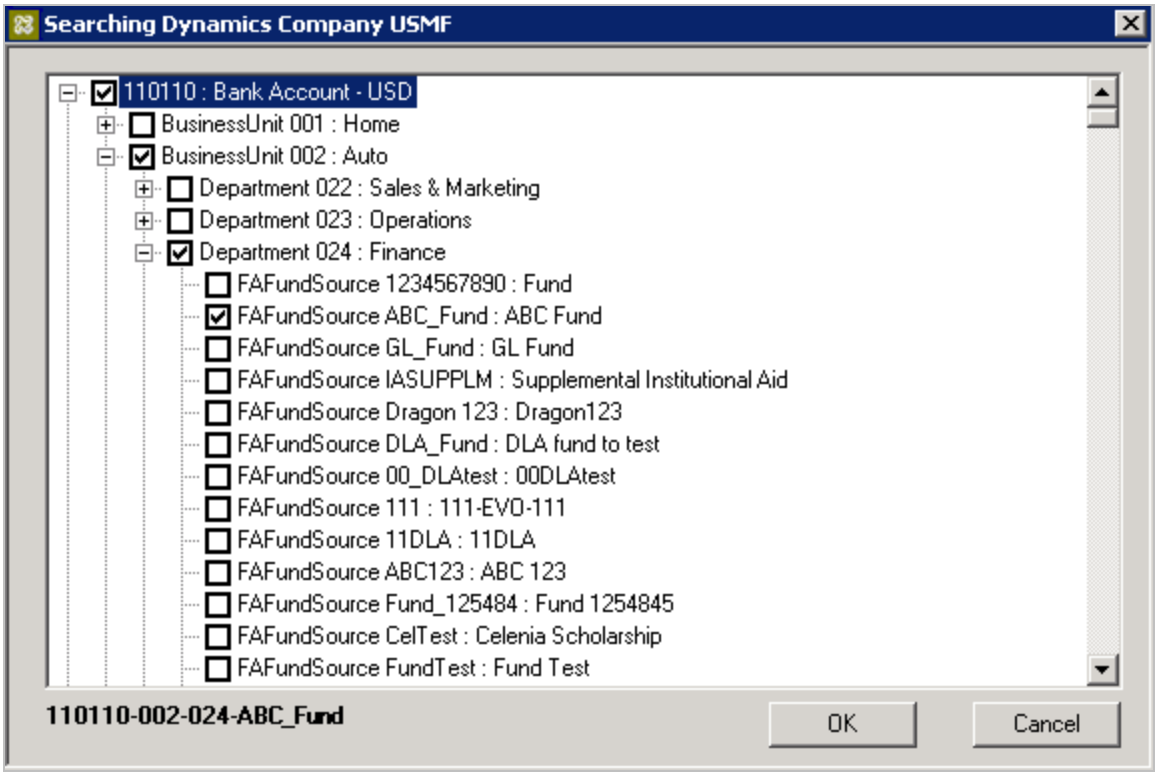
The **Reset** button on the Search GP GL accounts form clears the fields for a new Search.

- If CampusNexus Student is integrated with CampusVue Finance, HR and Payroll or CampusNexus Finance, HR and Payroll, select a row and click the **Power Search** (for CampusVue Finance, HR and Payroll) or **Select GL Account** (for CampusNexus Finance, HR and Payroll) button to search for the appropriate GL Debit and GL Credit accounts.
    - If using CampusVue Finance, HR & Payroll, select the appropriate Ledger Account and click **OK**.
    - If using CampusNexus Finance, HR & Payroll, select the appropriate dimension attribute and click **OK**.

Note

- Your permissions in the accounting system determine which GL accounts you can view and select in CampusNexus Student.
- The Main account node can be displayed at any level in the account hierarchy. This is based on the account structure setting that is configured in Microsoft AX. For information about this setting, your administrator must see Microsoft AX Help.

When you click **Save** after selecting the account, the system validates your selection against the account structure setting in Microsoft AX. This validation also occurs when transactions are released to G/L.



12. Enter a **Fractional Number**. The Fractional Routing Number identifies the paying bank and consists of a number in the following format: 12-345/6789. Typically, this number is displayed in the upper right corner of a check.

13. If the 'Integrate Bank Reconciliation with GP' feature is enabled in Setup > Student Accounts, select **Great Plains Checkbook**. Use the drop-down list to select the Great Plains checkbook record that is associated with the CampusNexus Student bank account.
14. Select the **Use Great Plains for Next Check #** check box to display the next check number currently stored in the Great Plains checkbook master record. If the bank account is set up to get the next check number from Great Plains, it is so indicated on the Check Printing form and CampusNexus Student prevents you from changing the check number on the form.
15. Select **Active** to indicate that this is an Active account.
16. Select **Default Bank Account** if this is the account in which deposits are normally made for this campus. If a deposit must go into a different account, users can change it at the time the deposit is prepared. For more information on selecting default bank accounts, refer to Default Bank Account Setup.
17. In the **Default Types** section, select a type of payment for which this account will be used, or select **All Types**.
18. Click **Save**.
19. To remove an account, select the account and click **Delete**.

    A confirmation message is displayed. Click **Yes**.

Note: The General Ledger Accounts report lists the general ledger debit and credit account numbers for the selected transaction codes.

CampusVue Finance, HR & Payroll

CampusNexus Student and CampusVue Finance, HR & Payroll provide the ability to define banks, establish multiple accounts within each bank, and post deposits and checks to the bank accounts.

Setting up Banks and Bank Accounts

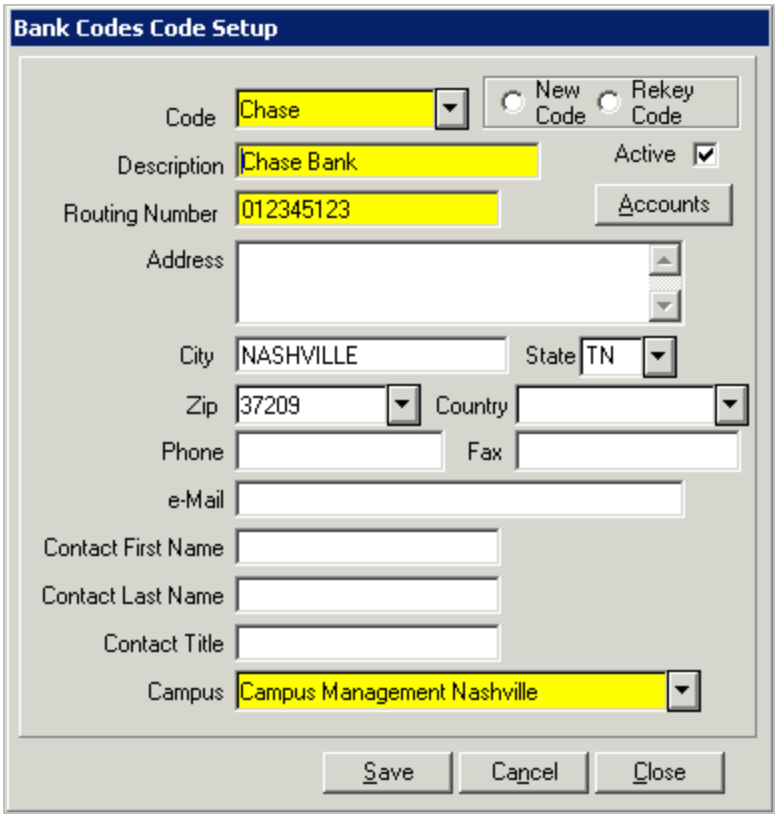
The setup of banks and bank account information is entered in CampusNexus Student and passed to CampusNexus Student where it will be verified in the banking setup tables, banks, and bank accounts values. Whenever a Bank Code is changed, a database trigger modifies all transactions and setups in CampusVue Finance, HR & Payroll.

Since Banks and Bank Accounts are longer accessible in CampusVue Finance, HR & Payroll, fields that do not exist in CampusNexus Student but are needed for CampusVue Finance, HR & Payroll are added to CampusNexus Student. A Bank Alias field is added to the Bank Accounts form. CampusNexus Student validates that the value entered is unique. A Bank Alias drop-down list enables the user to add, edit, or re-key bank aliases.

Unique Bank Name, Bank Alias, Bank Account, and Routing Number values are required when CampusVue Finance, HR & Payroll is installed since they are used simultaneously. Therefore, these fields are required when creating or editing a bank account in CampusNexus Student.

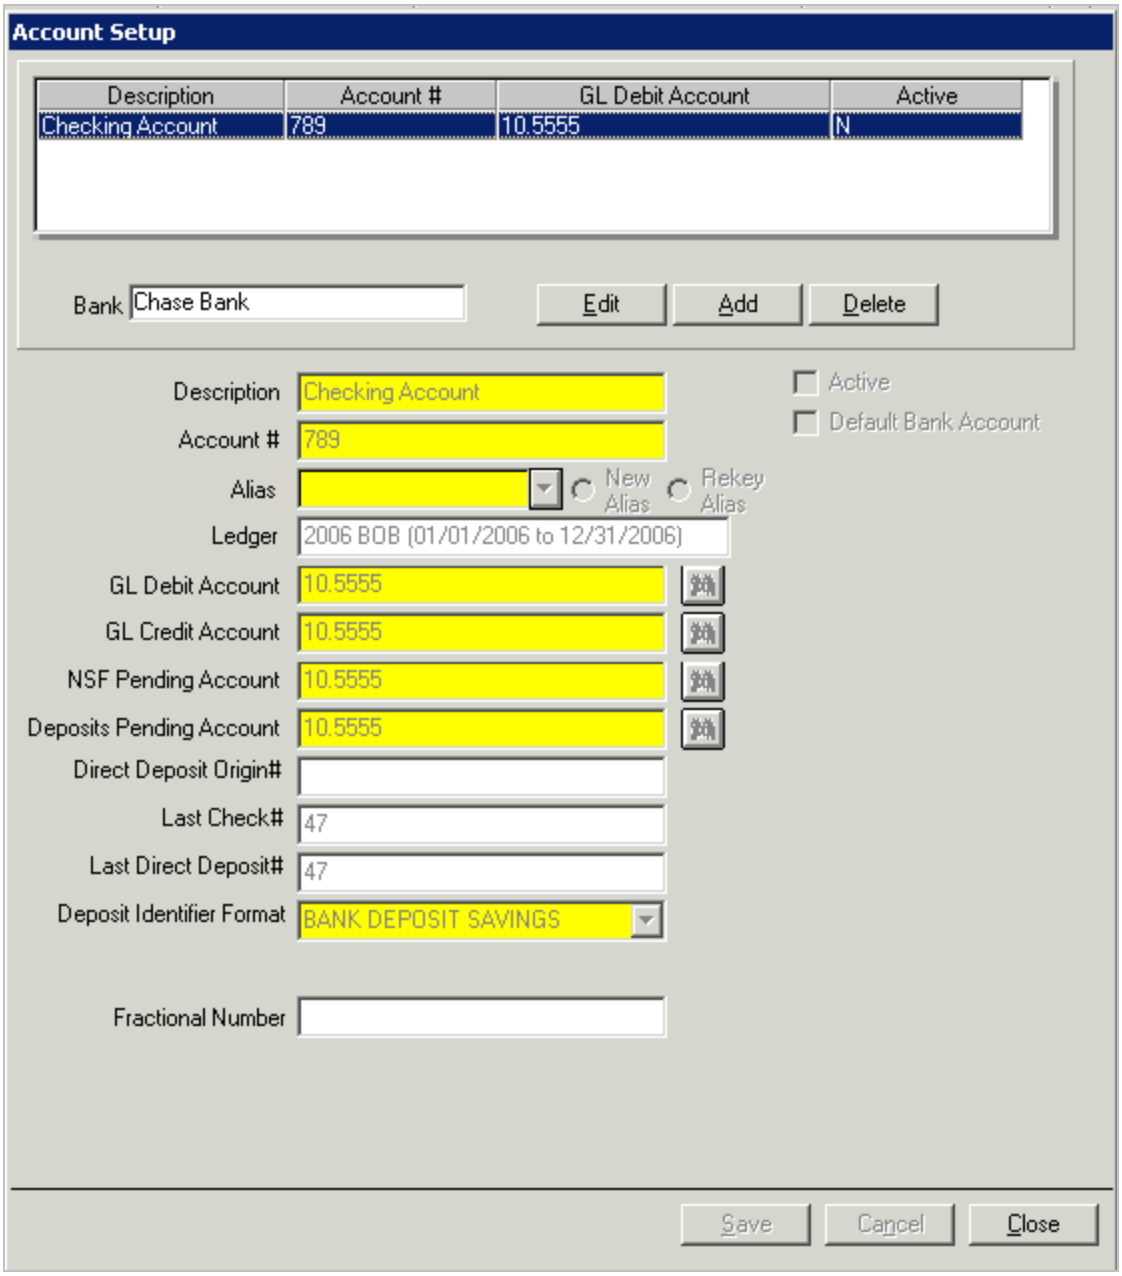
If a Bank Name or Bank Account is added, edited, or deleted and the corresponding records in CampusVue Finance, HR & Payroll cannot be updated, the changes are not saved and an informational message is displayed.

1. Navigate to **Lists > Student Accounts > Bank Codes** (tab). The Bank Codes Code Setup form is displayed.



2. The drop-down list on the **Bank Code** field enables you to link multiple Banks from different campuses to a single bank in CampusVue Finance, HR & Payroll.
3. You can add, edit, or re-key a bank code. The routing number at the top of the form is linked to the Bank Code field. Both fields must be completed when adding, or re-keying the bank code. Information changed on a bank linked to a bank code changes all banks linked to the same bank code.
4. To add a bank code and routing number, select the **New Code** option, specify data in the required fields, and click **Save**.
5. To rekey a bank code and routing number, select the **Rekey Code** check box, specify data in the required fields, and click **Save**. All Banks with the same bank code are updated to the new value.
6. Click **Accounts** to set up bank accounts. The **Alias** field on the **Account Setup** form allows multiple bank accounts within CampusNexus Student to be linked to a single Bank Alias in CampusVue Finance, HR & Payroll.

   Information changed on a bank account linked to a bank alias changes all bank accounts linked to the same alias. The Alias field is required and functions the same as the Bank Code fields above. You can add, edit, or rekey the bank's alias, but the value must be unique. When selected, the associated GL Debit and Credit Account numbers, NSF Pending Account, Deposits Pending Account, and Deposit Identifier Format values are extracted from CampusVue Finance, HR & Payroll and posted to the **Account Setup** form.

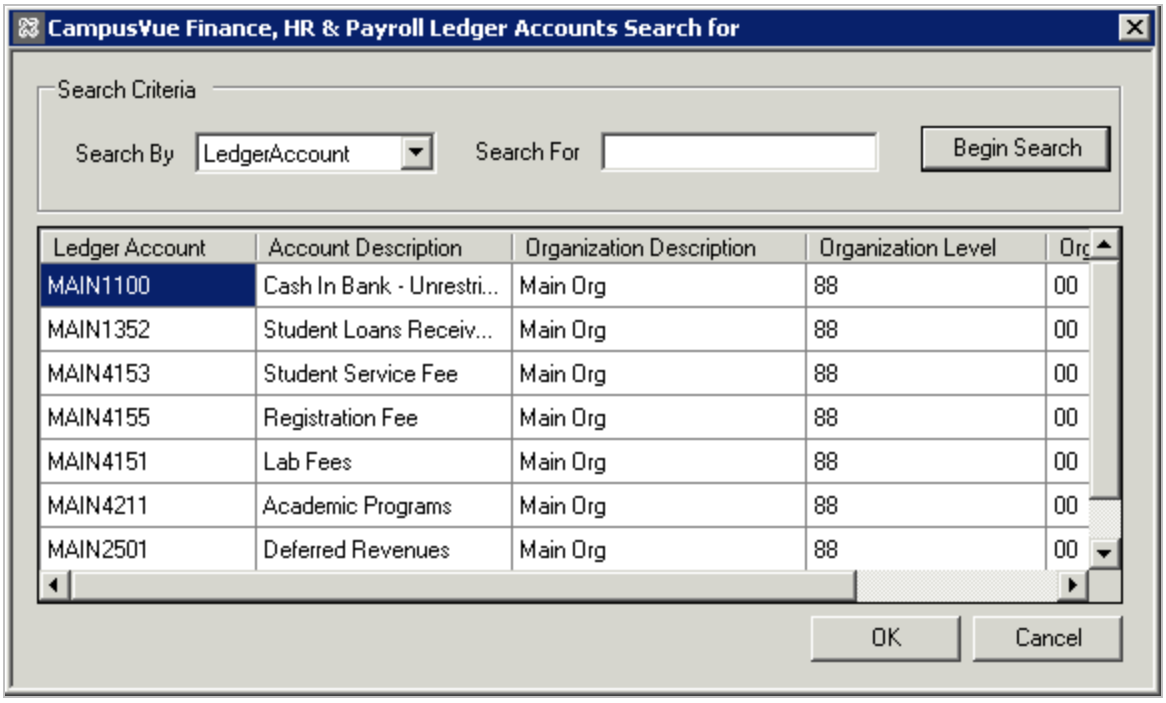


Account Setup

Account	Used as
GL Debit Account	a. Debit side of the journal entry when the Bank Deposit Wizard is run for this bank (increasing cash). b. Credit side of the journal entry on Student Ledger refunds from this bank (reducing cash), that is not connected to the fund source, or the fund source refunds G/L account for the corresponding fund source and campus has not been filled in. c. Credit side of the journal entry on Subsidiary refunds when the Subsidiary G/L accounts for refunds for this subsidiary and campus have not been filled in (reducing cash). d. This is normally the G/L account for the cash account associated with this bank account.

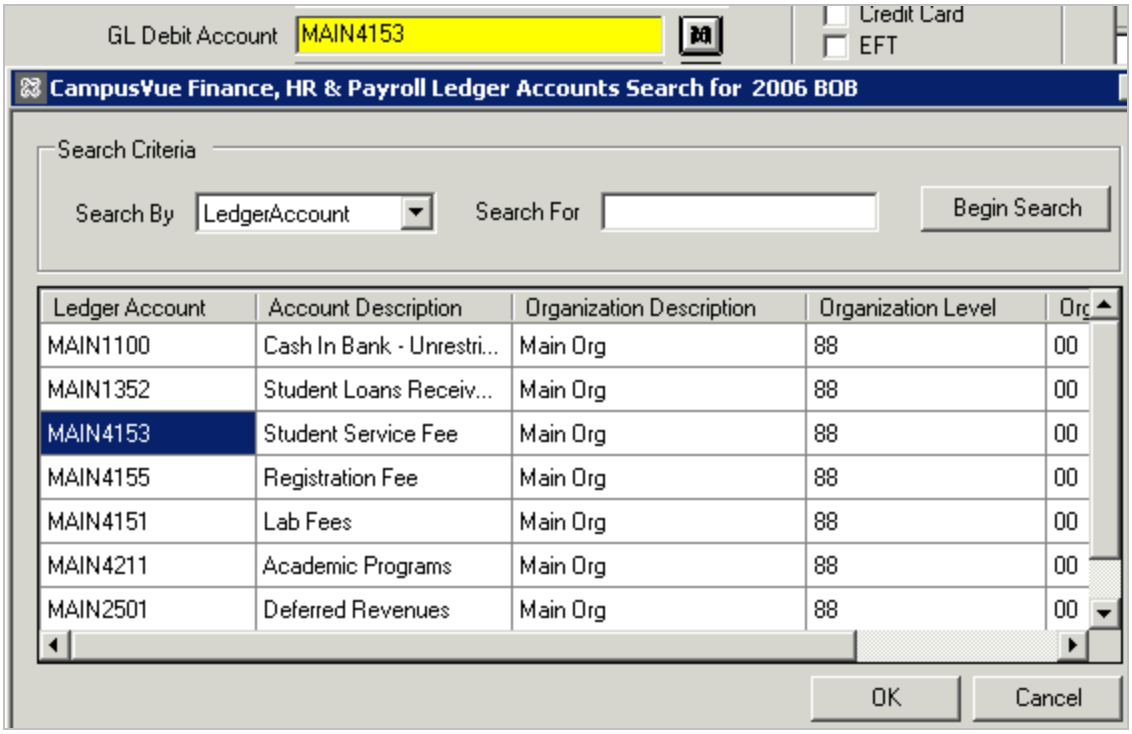
Account	Used as
GL Credit Account	a. Credit side of the journal entry on Student Ledger payments received for this bank, that are not connected to a fund source, or the fund Source Disbursements G/L account for the corresponding fund source and campus has not been filled in. b. Debit side of the journal entry on Student Ledger negative payments received, NSF payments or voids of payments received for this bank, that are not connected to a fund source, or the fund Source Disbursements G/L account for the corresponding fund source and campus has not been filled in. c. Debit side of the journal entry on Student Ledger refunds for this bank, that are not connected to a fund source, or the fund Source Disbursements G/L account for the corresponding fund source and campus has not been filled in. d. Credit side of the journal entry on Subsidiary payments received when the Subsidiary G/L accounts for refunds for this subsidiary and campus have not been filled in. e. Debit side of the journal entry on Subsidiary negative payments received, NSF payments, and voids of payments received for this bank when the Subsidiary G/L accounts for Disbursements for this subsidiary and campus have not been filled in. f. Debit side of the journal entry on Subsidiary refunds when the Subsidiary G/L accounts for refunds for this subsidiary and campus have not been filled in.
NSF Pending Account	a. Credit side of the journal entry for Returned Checks positive payments previously received. b. Debit side of the journal entry for Returned Checks on negative payments previously received. c. An entry must be done in CampusVue Finance, HR & Payroll to offset the NSF Pending Account to the appropriate Cash account. This is typically performed in the bank reconciliation adjustment screen. d. Use the NSF Pending Account when a check is returned and recorded in CampusNexus Student.
Deposits Pending Account	a. Debit side of the journal entry on Student Ledger payments received for this bank that is either not connected to a fund source, or the fund Source Disbursements G/L account for the corresponding fund source and campus has not been filled in. b. Credit side of the journal entry on negative Student Ledger payments received, and voids of payments received for that bank, that are either not connected to a fund source, or the fund Source Disbursements G/L account for the corresponding fund source and campus has not been filled in. c. Debit side of the journal entry on Subsidiary payments received when the Subsidiary G/L accounts for Disbursements for this subsidiary and campus have not been filled in. d. Credit side of the journal entry on negative Subsidiary payments received and voids of payments received on that subsidiary for this bank. e. Debit side of the journal entry on positive Miscellaneous Receipts. f. Credit side of the entry on negative Miscellaneous Receipts. g. Use the Deposits Pending Account when payments are entered in CampusNexus Student.

7. Click next to the applicable field to look up account numbers for the **GL Debit Account**, **GL Credit Account**, **NSF Pending Account**, and **Deposits Pending Account** fields. The power search form is displayed. Click **Begin Search**.



8. Double-click the desired ledger account. CampusNexus Student copies the contents to the field next to the find icon that was clicked.

   For example, the GL Debit Account find icon was clicked, and then the MAIN4153 ledger account cell was double-clicked on the **CampusVue Finance, HR & Payroll Ledger Accounts Search** form. CampusNexus Student copies the ledger account to the GL Debit Account field on the **Account Setup** form.



If the **GL Debit** or **GL Credit** account is invalid based on current fiscal year and ledger for the appropriate Journal Entry Group, the field is highlighted in red. The account must be corrected before modifications can be saved.

9. Click **OK** to close the CampusVue Finance, HR & Payroll Ledger Accounts Search form and return to the Account Setup form.

   The remaining fields on the Account Setup form provide the following data:

   - **Currency** – This field is displayed only if more than one currency is used in CampusVue Finance, HR & Payroll.
   - **Deposit Identifier Format** – This value is configured in CampusVue Finance, HR & Payroll and viewed from the drop-down list in CampusNexus Student.
   - **Direct Deposit Origin #** – This is the value that your bank wants in positions 14 through 23 of the NACHA File Header Record. It is typically your Federal Tax Identification Number or a bank assigned number. It is used in CampusVue Finance, HR & Payroll.
   - **Last Check #** – This field is populated during the check printing process, and can be edited to set a default check number. This field is read from and written to CampusVue Finance, HR & Payroll.
   - **Last Direct Deposit #** – This field is populated during direct deposit process.

10. Click **Save** and close the form.

CampusNexus Finance, HR & Payroll

When CampusNexus Student is integrated with CampusNexus Finance, HR & Payroll, bank accounts and bank codes are created in the accounting system and transferred to CampusNexus Student.

To view bank information created in CampusNexus Finance, HR & Payroll and to edit CampusNexus Student bank account specific fields:

1. Navigate to **Lists > Student Accounts > Setup - Student Accounts Lists > Bank Codes** (tab). The Setup - Student Account Lists [Bank Codes] form displays the list of bank codes that were created in CampusNexus Finance, HR & Payroll.
